HAAKONJARL

Det Nordenfjeldske D/S; 1904; Fredrikstad Mek. Verksted; 1,482 tons; 237-6x35-1x19-6; 138 n.h.p.; triple-expansion engines.

The Norwegian steamship *Haakon Jarl*, under German control, was torpedoed and sunk by a British submarine on August 17th, 1941, on a voyage from Kirkenes to Hamburg.

HACHIANMARU

Japanese Government; 1903; Hong Kong & Whampoa Dock Co.; 2,733 tons; 290 x 54-1x10-1; 260 n.h.p.; triple-expansion engines.

The steamship *Hachian Maru* was formerly the *Kinshan*, seized by the Japanese at Hong Kong in December, 1941. She was torpedoed and sunk by the U.S. submarine *Thresher* on December 29th, 1942, S. of Billiton Island, Java Sea.

HACHIGENMARU

Japanese Government; 1923; Taikoo Dockyard; 3,113 tons; 320x46• 1 x 23-7; 175 n.h.p.; triple-expansion engines. The steamship *Hachigen Maru* was formerly the British *Wenchow sei* and was torpedoed and sunk by the U.S. submarine *Seawolf* on August 14th, 1942, N. of Kudat, North Borneo.

HACHIJIN MARU

Nanyo Kaiun K.K.; 1,918 tons.

The Japanese steamship *Hachijin Maru* was torpedoed and sunk by a British submarine on November 2nd, 1944, about 150 miles E.S.E. of Bintan Island, Malaya.

HACHIMANZAN MARU

Tsurumaru Kisen K.K.; 2,461 tons.

The steamship *Hachimanzan Maru* was torpedoed and sunk by the U.S. submarine *Drum* on October 9th, 1942, off Katsuura, Japan.

HACHIROGATA MARU

Nakagawa Kisen K.K.; 1,999 tons.

The steamship *Hachirogata Maru* was torpedoed and sunk by the U.S. submarine *Apogon* on September 27th, 1944, 125 miles north of Kunashir Island, Japan.

HACKENSACK

Brown, Jenkinson & Co.; 1904; Tyne Iron S.B. Co.; 4,060 tons; 350 x 48 x 17-9; 372 n.h.p.; triple-expansion engines. The British steamship *Hackensack*, on a voyage from Cienfuegos and Halifax to Queenstown with sugar, was torpedoed and sunk by a German submarine on April 26th, 1917, about 300 miles W. of the Fastnet. Six of her crew were lost.

HADA COUNTY

A/S J. Ludwig Mowinckels Rederi; 1921; Craig, Taylor & Co.; 4,853 tons; 386x53x26-6; 528 n.h.p.; triple-expansion engines.

The Norwegian steamship *Hada County* went ashore on December 6th, 1941, at Grand Manan Island, N.B., and became a total loss. The ship was carrying coal from Swansea to St. John, N.B.

HADDON HALL

Hall Line; 1895; Palmers'Co.; 4,177 tons; 380x45-3x29-1; 404 n.h.p.; triple-expansion engines.

The British cargo ship *Haddon Hall* was wrecked five miles north of Saldanha Bay on February 1st, 1913, while on a voyage from Liverpool to East London carrying a general cargo.

HAFNIA

P. Brown, Jr. & Co.; 1888; Helsingors Jernskibs-og Maskinsbyg.; 1,619 tons; 260-7x36x16-7; 159 n.h.p.; triple-expansion engines.

The Danish steamship *Hafnia* struck a mine and sank in the Bay of Biscay on June 7th, 1917.

HAGA

*Erik Bancks Rederi; 1918; Solvesborgs Skeppsvarf.; 1,296 tons; 242 - 7x36*2x16; 159 n.h.p.; triple-expansion engines.* The Swedish steamship *Haga* struck a mine and sank on May 1st, 1940, W. of the entrance to the Kattegat on a voyage from the Tyne

HAGAN

to Helsingborg with coal. Some survivors were picked up by a German submarine.

HAGAN

Paco Tankers Inc.; 1919; *Bethlehem Shipbuilding Corp.*; 6,401 tons; 416'9x56'2x32-7; 391 n.h.p.; 10-5 knots; triple-expansion engines.

The American tanker *Hagan*, Capt. B. B. Caiaway, was torpedoed and sunk by a German submarine on June 11th, 1942, on a voyage from Antilla to Havana with 900,000 gallons of molasses. Six of her crew were killed and three wounded. Capt. Caiaway was among the survivors.

HAGANE MARU

Ikedashoji K.K.; 1938; *Mukaishima Dock K.K.*; 1,901 tons; 281-5x39-4x20-7; triple-expansion engines. The steamship *Hagane Maru* was torpedoed and sunk by the U.S. submarine *Sennet* on April 19th, 1945, off Susami, Japan.

HAGIKAWA MARU

Kawasaki Kisen K.K.; 2,995 tons. The steamship *Hagikawa Maru* was torpedoed and sunk by the U.S. submarine *Sennet* on July 28th, 1945, off Aomori, Japan.

HAGIKAZE

Japanese Navy, destroyer; 1940; *Uraga*; 2,000 tons; 364x35x11; 45,000 s.h.p.; 36 knots; turbine engines; Kanpon boilers; six 5 in. guns, 2 m.g., 8 T.T.

The Japanese destroyer *Hagikaze* was sunk in an action in Vella Gulf, between the islands of Kolombangara and Vella Lovella, Solomons Group, shortly before midnight on August 6th, 1943.

The *Hagikaze* carried a complement of over 200. For full details of the action, which was known as the battle of Vella Gulf, see the Japanese destroyer *Arashi*.

HAGUE MARU

Osaka Shosen K.K.; 1920; *Osaka Iron Works*; 5,641 tons; 407-2x50-8x32-5; 559 n.h.p.; triple-expansion engines. The steamship *Hague Maru* was torpedoed and sunk by the U.S. submarine *Drum* on October 8th, 1942, N.E. of Katsuura, Japan.

HAGURO

Japanese Navy, heavy cruiser; 1928; *Mitsubishi*; 10,000 tons; 640x62-3x16-5; 100,000 s.h.p.; 33 knots; turbine engines; Kanpon boilers; ten 8 in. guns, eight 4 • 7 in., eight 47 mm., 2 m.g., 8 T.T., 4 air craft.

The Japanese heavy cruiser *Haguro* was attacked by aircraft from the British escort carrier *Shah*, 11,420 tons, off Penang on the night of May 15th, 1945. The vessel suffered some damage and on the following night was located by a British destroyer flotilla consisting of *Saumarez*, *Venus*, *Verulam*, *Vigilant* and *Virago*. A brisk action took place and the *Haguro* was torpedoed and sunk.

HAGURO MARU

Itaya Shosen K.K.; 1928; *Yokohama Dock Co.*; 3,352 tons; 340 X 49x25- 7; 392 n.h.p.; triple-expansion engines. The steamship *Haguro Maru* was bombed and sunk by U.S. land-based aircraft on January 13th, 1944, 50 miles S.W. of Queen Charlotte Island, Bismarck Archipelago.

HAHIRA

Atlantic Refining Co.; 1920; *Bethlehem S.B. Corp.*; 6,855 tons; 435-5x56-2x33-5; 421 n.h.p.; triple-expansion engines. The American tanker *Hahira* was torpedoed and sunk by a German submarine on November 3rd, 1942, on a voyage from New York to England.

HAI CHU

1923; *Taikoo Dockyard & Engineering Co.*; 1,078 tons; 178-1x35-5x10-7; 57 n.h.p.; triple-expansion engines. The Chinese steamship *Hai Chu*, Capt. Thorbjornson, struck a mine and sank on November 8th, 1945, near Boca Tigris, at the mouth of the Canton River. The ship was on a voyage from Canton to Hong Kong with some 2,000 soldiers and 100 civilians in addition to her crew. There were only 300 survivors.

HAI HING

Bruusgaard, Kidsteruds Skibs-Ajs; 1929; *Gotaverken A/B*; 2,561 tons; 287-2x45-1x17; 543 n.h.p.; oilengines. The Norwegian motorship *Hai Ring* was torpedoed and sunk by a submarine on November 4th, 1942, about 200 miles E. of Lourenco Marques on a voyage from Bombay to Durban. The captain and 25 men were lost.

HAICHING

Douglas S.S. Co.; 1898; *D. J. Dunlop & Co.*; 2,183 tons; 280-9X38-2x16-9; 239 n.h.p.; triple-expansion engines. The steamship *Hatching* was torpedoed and sunk by a submarine on October 2nd, 1943, off Bombay on a voyage from Calcutta to Karachi. Twelve of her crew were lost.

HAIG ROSE

Richard Hughes & Co.; 1920; *J. Fullerton & Co.*; 1,117 tons; 220-2x34-2x13-1; 96 r.h.p.; 9 knots; triple-expansion engines. The steamship *Haig Rose*, Capt. Owen Roberts, left Barry on November 5th, 1940, bound for Plymouth. She was never seen again and was believed to have been sunk by striking a mine.

HAIPHONG

Douglas S.S. Co.; 1885; *Wigham Richardson & Co.*; 1,743 tons; 255-3x35-2x24-4; 170hp.; compound engines. The British cargo ship *Haiphong* was wrecked west of Iro-o-saki Light, Japan, on June 28th, 1892. She was on a voyage from Hong Kong to Yokohama carrying a sugar and general cargo.

HAIRREDIN BARBAROSSE

Turkish Navy, 1st class battleship; 1891; *Germany*; 9,874 tons; 354-2x64x26; 10,200 i.h.p.; 17 knots; triple-expansion engines six 11 in. guns, eight 4 -1 in., eight 3 • 4 in., 4 m.g., 2 T. T. The Turkish battleship *Hairredin Barbarosse* was acquired from the * German government in 1910 together with another ship of the same class, the *Torgud Reis*. She carried a complement of 568 officers and men. During the fighting in the Dardanelles in 1915 she had been moored in the straits between Maidos and Chanak. From this position she had maintained a long range bombardment of the sector occupied by the Anzac troops on Gallipoli, and also on the anchorage.

As the campaign progressed the Turkish army became short of munitions and there was imperative need of immediate supplies. As a result it was decided to risk the *Hairredin Barbarosse* on this mission and, on August 8th, in company with a destroyer, she was off Bulair lines with munitions. Just before 5 a.m. she was sighted by the British submarine *E-II*, Cdr. M. E. Nasmith, which at once manoeuvred to attack. The Turks were totally unaware of their danger and before they discovered the hostile periscope the torpedo had been discharged, striking the *Hairredin Barbarosse* full amidships. She immediately took a heavy list and steered for the shore, at the same time opening a rapid but ineffective fire on the *E-II*. Twenty minutes later there was a loud explosion and she heeled over and sank.

Cdr. Nasmith was later awarded the Victoria Cross for his work in the straits and in the Sea of Marmara.

HAKAZE

Japanese Navy, destroyer; 1920; *Maizuru*; 1,215 tons; 336-5X 29-2x9-5; 38,500 s.h.p.; 34 knots; turbine engines; Kanpon boilers; four 4-7 in. guns, 2 A.A.m.g., 6 T.T. The Japanese destroyer *Hakaze* was torpedoed and sunk in the Steffen Strait, Bismarck Archipelago, on January 23rd, 1943, by the U.S. submarine *Guardfish*. The destroyer's normal complement was 148.

HAKKAI MARU

Itaya Shosen K.K.; 1938; *Tama S.B. Co.*; 5,114 tons; 422-4X 58-1x27-2; 855 n.h.p.; oilengines. The motor vessel *Hakkai Maru* was taken over by the Japanese Navy for service as a salvage and repair vessel. On January 17th, 1944, she was bombed and sunk by U.S. land-based aircraft off the north west coast of New Guinea.

HAKKAISAN MARU

Kaburagi Risen K.K.; 1937; *Harima S.B. & Eng. Co.*; 3,311 tons; 318 • 5 X 45 - 9 X 24 • 6; 190 n.h.p.; triple-expansion engines.

The steamship *Hakkaisan Mam* was taken over by the Japanese Navy and converted into an auxiliary gunboat. On October 22nd, 1942, she was sunk by U.S. warships N. of the Ellice Islands.

HAKKO MARU

Teikoku Senpaku K.K.; 1917; *Chester S.B. Co.*; 6,046 tons; 401 - 9x54-3x30-2; 569 n.h.p.; triple-expansion engines. The steamship *Hakko Maru* was torpedoed and sunk by the U.S. submarine *Bluefish* on January 4th, 1944, about 200 miles N. of Great Natuna Island in the South China Sea.

HAKKO MARU

Japanese Government; 1916; *A/S Moss Vcerft*; 1,132 tons; 226'2x36-6x15-7'; 97 n.h.p.; triple-expansion engines. The steamship *Hakko Maru* was formerly the Norwegian *Randf*, seized by the Japanese at Bangkok in December, 1941. She was sunk by U.S. carrier-based aircraft on October 12th, 1944, off Kaohsiung, Formosa.

HAKKO MARU

Chosen Yusen K.K.; 1,948 tons. The Japanese ship *Hakko Maru* was torpedoed and sunk by the U.S. submarine *Queenfish* on November 8th, 1944, about 50 miles W. of the Shichi-to Islands, Japan.

HAKKO MARU

10,022 tons. The tanker *Hakko Maru* was torpedoed and sunk by the U.S. submarine *Flasher* on December 4th, 1944, about 250 miles W. of Mindoro Island, Philippines.

HAKKO MARU

Japanese Government; 1925; *Wilton's E. & Slipway Co.*; 1,030 tons; 230-1x38-2x10-4; compound engines. The steamship *Hakko Mam* was formerly the Dutch *Duymaer van Twist*, seized by the Japanese. On May 7th, 1945, she was bombed and sunk by U.S. land-based aircraft off Macassar.

HAKKO MARU No. 2

Nippon Yusosen K.K.; 10,023 tons. The tanker *Hakko Maru No. 2* was torpedoed and sunk by the U.S. submarine *Spadefish* on August 22nd, 1944, off the north west coast of Luzon Island, Philippines.

HAKODATE MARU

Nippon Yusen K.K.; 1919; *Mitsubishi Zosen Kaisha*; 5,302 tons; 400x54-5x30; 510 n.h.p.; triple-expansion engines. The steamship *Hakodate Maru* was torpedoed and sunk by the U.S. submarine *Seadragon* on July 16th, 1942, off Hone Cahe, Indo-China.

HAKONE MARU

Nippon Yusen K.K.; 1921; *Mitsubishi Zosen*; 10,420 tons; 495 x62x 37; 1,510 n.h.p.; 16-5 knots; turbine engines. The liner *Hakone Maru* was bombed and sunk by U.S. army aircraft in the Formosa Strait on November 27th, 1943.

HAKONESAN MARU

Mitsui Bussan Kaisha; 1929; *Mitsui Bussan Kaisha*; 6,673 tons; 437-6x56-5x33; 951 n.h.p.; oil engines. The motor vessel *Hakonesan Maru* was torpedoed and sunk by the U.S. submarine *Greenling* on October 18th, 1942, off Shiogama, Japan.

HAKOZAKI MARU

Nippon Seitetsu K.K.; 1939; *Mitsubishi Jukogyo K.K.*; 3,948 tons; 353 - 2x49-2x26-5; 206 n.h.p.; compound engines. The steamship *Hakozaki Maru* was torpedoed and sunk by the U.S. submarine *Herring* on December 14th, 1943, off the west coast of Cheju Do, Korea.

HAKOZAKI MARU

Nippon Yusen K.K.; 1922; *Mitsubishi Zosen*; 10,413 tons; 495 x62x 37; 1,590 n.h.p.; 16-5 knots; turbine engines. The liner *Hakozaki Maru* was taken over by the Japanese government during the Second World War for service as a transport. On March 19th, 1945, when in the Yellow Sea she was torpedoed and sunk by the U.S. submarine *Balao*, Capt. R. K. R. Worthington.

HAKUAI MARU

Nippon Suisan K.K.; 1898; *Lobnitz & Co.*; 2,614 tons; 312 X 39-2 x 18-7; triple-expansion engines. The Japanese steamship *Hakuai Maru* was torpedoed and sunk by the U.S. submarine *Apogon* on June 18th, 1945, in the northern Kurile Islands.

HAKUBA MARU

Nippon Yusen Kaisha; 2,858 tons. The steamship *Hakuba Maru* was bombed and sunk by U.S. land-based aircraft on December 7th, 1944, off the west coast of Leyte Island, Philippines.

HAKUBAI MARU

Kitanippon Kisen K.K.; 2,921 tons. The steamship *Hakubai Maru* was torpedoed and sunk by the U.S. submarine *Sawfish* on May 5th, 1943, S. of Shimizu, Japan.

HAKUBASAN MARU

Mitsui Bussan Kaisha; 1928; *Mitsui Bussan Kaisha*; 6,650 tons; 437-6x56-5x33; 951 n.h.p.; oil engines. The motor vessel *Hakubasan Maru* was torpedoed and sunk by the U.S. submarine *Crevalle* on July 28th, 1944, off Cape Bolinao, Philippines.

HAKUHO MARU

Nippon Yusen Kaisha; 2,857 tons. The steamship *Hakuho Maru* was sunk by U.S. carrier-based aircraft on September 12th, 1944, W. of Leyte Island, Philippines.

HAKUJU MARU

Hakuyo Kisen K.K.; 2,220 tons. The steamship *Hakuju Maru* was torpedoed and sunk by the U.S. submarine *Tirante* on June 11th, 1945, off Kagoshima, Japan.

HAKUJU MARU

Nitto Kisen K.K.; 2,863 tons. The tanker *Hakuju Maru* was torpedoed and sunk by the U.S. submarine *Sennet* on July 28th, 1945, off Funakawa, Japan.

HAKUSA

Japanese Government; 3,841 tons. The *Hakusa* was taken over by the Japanese Navy for use as an aircraft transporter. On June 8th, 1945, she was torpedoed and sunk by a U.S. submarine N.E. of Kamao Point, Indo-China.

HAKUSAN MARU

Nippon Yusen K.K.; 1923; *Mitsubishi Zosen*; 10,380 tons; 495 x62x 37; 1,607 n.h.p.; 16-5 knots; turbine engines. The liner *Hakusan Maru* was taken over by the Japanese government during the Second World War for service as a transport. On June 4th, 1944, when some hundreds of miles E. of Formosa, she was torpedoed and sunk by the U.S. submarine *Flier*.

HAKUSAN MARU

Tomoe Gumi Senpakubu K.K.; 1920; *Uchida S.B. & Eng. Co.*; 2,197 tons; 270 x39x23-9; triple-expansion engines. The steamship *Hakusan Maru* was torpedoed and sunk by the U.S. submarine *Crevalle* on June 11th, 1945, about 200 miles E. of Tamagawa, Japan.

HAKUSHIKA MARU

Tatsuuma Kisen K.K.; 1917; *Asano S.B. Co.*; 8,150 tons; 445 X 58x40; 708 n.h.p.; triple-expansion engines. The steamship *Hakushika (Hakusika) Maru* was torpedoed and sunk by the U.S. submarine *Bluegill* on October 18th, 1944, about 100 miles W. of Bataan, Philippines.

HAKUTETSU MARU No. 7

Hakatawan Tetsudo Kisen K.K.; 1936; *Namura Zosensho*; 1,018 tons; 206x31x18; 88 n.h.p.; triple-expansion engines. The steamship *Hakutetsu (Hakutetu) Maru No. 7* was torpedoed and sunk by the U.S. submarine *Pipefish* on September 12th, 1944, about 100 miles S. of Katsuura, Japan.

HAKUTETSU MARU No. 13

Saikai Kisen K.K.; 1,334 tons. The steamship *Hakutetsu Maru No. 13* was torpedoed and sunk by the U.S. submarine *Drum* on September 8th, 1943 off Vanimo, New Guinea.

HAKUYO MARU

Japanese Government; 1929; *Kawasaki Dockyard Co.*; 1,327 tons; 225x36x20; 320n.h.p.; oilengines. The motorship *Hakuyo Maru* was torpedoed and sunk by the U.S. submarine *Pollack* on March 20th, 1944, 450 miles south east of Nagoya.

HAKUYO MARU

Osaka Shosen K.K.; 5,742 tons. The steamship *Hakuyo Maru* was torpedoed and sunk by the U.S. submarine *Seal* on October 25th, 1944, W. of the Kurile Islands.

HAKUYO MARU

Japanese Government; 1929; *Kawasaki Dkyd. Co.*; 1,327 tons; 225x36x20; 320n.h.p.; oilengines. The motorship *Hakuyo Maru* was torpedoed and sunk by the U.S. submarine *Dace* on June 10th, 1945, W. of the Kurile Islands.

HALBERDIER

Fisher Renwick Manchester-London Steamers; 1915; *Ropner & Sons*; 1,049 tons; 230x35x14-9; 170 n.h.p.; 8-5 knots; triple-expansion engines. The steamship *Halberdier* was torpedoed and sunk by a German submarine 27 miles W. by N. of Bardsey Island on January 6th, 1918. Five of her crew were killed. The captain was among the survivors.

HALCYON

George Horsley & Son; 1877; *R. Dixon & Co.*; 1,586 tons; 264'6x33-4x19; 140 h.p.; compound engines. The British cargo ship *Halcyon* sank after a collision with the *Rheubina*, 1,158 tons, near Vigo on August 11th, 1890, while carrying an ore cargo on a voyage from Ergasteria to Newport, Mon. Thirteen of the crew were drowned.

HALCYON

Halcyon S.S. Co.; 1917; *Rotterdam Droogdok Maats.*; 3,531 tons; 361 -4x49-9x22-1; 310 n.h.p.; triple-expansion engines. The Panamanian steamship *Halcyon* was shelled and sunk by a German submarine during the night of February 5th, 1942, about 300 miles W. of the Bermudas, on a voyage from Halifax to Demerara.

HALCYON MED

Cia. Mar. Med.; 1940; *Smith's Dock Co.*; 1,948 tons; 315x44'3X—; triple-expansion engines. The Lebanese ship *Halcyon Med* collided in thick fog off the S. coast of Spain with the *Esso Switzerland* on August 24th, 1960, and was cut in two. The afterpart sank. The forepart was taken in tow but sank on the following day.

HALDON

Miller & Richards; 1889; *E. Withy & Co.*; 1,519 tons; 250x35 x 17; 136 n.h.p.; triple-expansion engines. The British cargo ship *Haldon* was wrecked on Storkallegrund, Gulf of Bothnia, on September 22nd, 1897. She was on a voyage in ballast from Swinemunde to Mo, Sweden.

HALEAKALA

United States Shipping Board; 1919; *Long Beach S.B. Co.*; 5,587 tons; 410-5x54-3x27-2; 359 n.h.p.; triple-expansion engines. The American steamship *Haleakala* left Norfolk, Va. on September

3rd, 1926, for the River Plate and was in wireless communication on the 8th, but she was not seen again.

HALLAND

Ministry of War Transport (G. Gibson & Co.); 1923; *Howaldts-werke*; 1,264 tons; 238x37-2x13-7; 102 n.h.p.; 10 knots; triple-expansion engines. The steamship *Halland*, Capt. Kristensen, was bombed and sunk by German aircraft on September 15th, 1940, when about eight miles off Dunbar. She was manned by a Danish crew of 22, of whom only five survivors were picked up.

HALLFRIED

P.Kleppe; 1918; *Bethlehem S.B. Corp.*; 2,968 tons; 310-4X 48-5x21-3; 329 n.h.p.; triple-expansion engines. The Norwegian steamship *Hallfried* was torpedoed and sunk by a German submarine on October 31st, 1943, on a voyage from Gibraltar to Androssan. Thirty-one lives were lost.

HALLIGAN

United States Navy, destroyer; 1943; *Boston Navy Yard*; 2,050 tons; 376-5x39-3x12-2; 60,000 s.h.p.; 36-5 knots; turbine engines; five 5 in. guns, four 40 mm., four 20 mm., 10 T.T. The destroyer *Halligan* was mined and sunk off Okinawa on March 26th, 1945. The vessel carried a complement of over 250.

HALO

George Horsley; 1879; *E. Withy & Co.*; 1,429 tons; 244-2x 32 • 1 x 18 • 6; 120 h.p.; compound inverted engines. The British cargo ship *Halo* was wrecked near Corrededo, Spain, on January 1st, 1884, while on a voyage from Braila to Rotterdam carrying a cargo of grain.

HALO

Cities Service Oil Co.; 1920; *Bethlehem S.B. Corp.*; 6,986 tons; 435x56x33-8; 421 n.h.p.; triple-expansion engines. The American tanker *Halo* was torpedoed and sunk by a German submarine on May 20th, 1942, off the mouth of the Mississippi on a voyage from Tampico to New Orleans with crude oil. Thirty-nine of her crew were lost and three saved.

HAMAKAZE

Japanese Navy, destroyer; 1940; *Japan*; 2,000 tons; 364x35x11; 45,000 s.h.p.; 36knots; turbine engines; six 5 in.guns, 2 m.g. 8 T.T. The Japanese destroyer *Hamakaze* was one of four such vessels sunk in the sea-air action S.W. of Kyushu on April 7th, 1945. All four were sunk by carrier borne aircraft of the U.S. Fifth Fleet. The *Hamakaze* carried a complement of over 200. For full story of the battle see the battleship *Yamato*, also the destroyer *Asashimo*.

HAMANAMI

Japanese Navy, destroyer; 1942; *Japan*; 2,200 tons; 415x35x—; 34 knots; turbine engines; six 5 in. guns, eight 25 mm.A.A., 15 T.T. The Japanese destroyers *Hamanami*, *Naganami* and *Shimakaze* all of 2,200 tons, the *Wakatsuki* of 2,500 tons and two others were escorting four transports carrying approximately 8,000 troops to reinforce the army on Leyte Island. On November 11th, 1944, when entering Ormoc Bay the ships were attacked and sunk by aircraft from a squadron of fast carriers of the U.S. Third Fleet commanded by Vice-Admiral J. S. McCain. Of the six destroyers, the four above-mentioned were sunk as well as the transports, which were as follows: *Saiho Maru*, 4,639 tons, *Mikasa Maru*, 3,143 tons, *Tensho Maru*, 5,013 tons, and *Taizan Maru*, 3,528 tons. Each of the destroyers carried a complement of over 200.

HAMBURG

German Government; 1911; *Bremer Vulkan*; 5,470 tons; 419-8 x54-5x28-2; 601 n.h.p.; quadruple-expansion engines. The German steamship *Hamburg* was boarded and sunk on March 5th, 1941, during a Commando raid on the Lofoten Islands.

HAMBURG MARU

Osaka Shosen K.K.; 1920; Uchida S.B. & E. Co.; 5,271 tons; 400 x 54 - 5 X 30; 513 n.h.p.; triple-expansion engines. The steamship Hamburg Mam was torpedoed and sunk by the U.S. submarine Pomfret on November 2nd, 1944, about 100 miles S. of Formosa.

HAMILDOC

Pater son Steamships; 1927; Swan, Hunter & Wigham Richardson; 1,926 tons; 252-8x43-4x17-8; 92 n.h.p.; triple-expansion engines.

The Canadian cargo ship *Hamildoc* foundered on January 1st, 1943, in 9° 10' N., 60° 30' W., while on a voyage from Demerara to Trinidad.

HAMLA

*Cory & Strick; 1929; J. Readhead & Sons; 4,416 tons; 370-4X 52-3x25-9; 341 n.h.p.; 10-5 knots; triple-expansion engines. The steamship Hamla, Capt. W. A. Shute, O.B.E., left Rio de Janeiro on August 11th, 1942, for Freetown, with a crew of 38 and four gunners. She was never seen again and was presumed to have been sunk on or about the 18th, by a German raider known to have been off Fernando de Noronha at that time. Capt. Shute was in command of the *Tunisia* when she was bombed and sunk off Ireland about twelve months previously.*

HAMM

Hamburg-Amerika Linie; 1921; Blohm & Voss; 5,874 tons; 449-4x58-2x26-9; 882 n.h.p.; turbine engines. The German steamship Hamm was torpedoed and sunk by a British submarine on April 18th, 1940, in the Skagerrak.

HAMMANN

United States Navy, destroyer; 1939; Federal Shipbuilding Co.; 1,570 tons; 341x35x10; 44,000 s.h.p.; 36-5 knots; turbine engines; Express boilers; five 5 in. guns, 12 T.T. The destroyer Hammann was a unit of the U.S. fleet which took part in the battle of Midway Island, June 3rd-6th, 1942. The Hammann was torpedoed by a Japanese submarine on the last day of the battle. Most of her complement of about 170 were saved.

For full story of the battle of Midway Island see U.S.S. *York-town*.

HAMMAREN

Rederiaktieib. Transatlantic; 1930; A/B Gotaverken; 3,220 tons; 154-1x50-1x21-7; 543 n.h.p.; oilengines. The Swedish motorship Hammaren was shelled, torpedoed and sunk by a German submarine on August 22nd, 1942, about five miles offshore 40 miles from Bahia, on a voyage from Liverpool to Bahia. Five of her crew were killed.

HAMMONIA

Hamburg-Amerika Linie; 1909; A. Stephen & Sons; 7,197 tons; 419-7x54-2x34-4; 945 n.h.p.; triple-expansion engines. The German ship Hammonia was carrying passengers and general cargo from Hamburg and Vigo to Puerto Mexico when she foundered on September 9th, 1922, off the coast of Portugal.

HAMPSHIRE

Macbeth & Gray; 1880; W. Doxford & Sons; 2,597 tons; 316-1x38x25-1; 300 h.p.; compound engines. The British cargo ship Hampshire sprang a leak and sank near St. Ives on November 18th, 1893, while on a voyage in ballast from Liverpool to Cardiff. All the crew got away in the boats but only one man, the first mate, reached shore alive.

HAMPSHIRE

British Navy, armoured cruiser; 1905; Armstrong Whitworth; 10,850 tons; 450x68-5x25-5; 21,000 i.h.p.; 22-4 knots; triple-expansion engines; Yarrow boilers; four 7-5 in. guns, six 6 in., two 12pdr., twenty 3pdr., 2 T.T.

I

The armoured cruiser *Hampshire* was detached from the Grand ! Fleet for the special duty of conveying Lord Kitchener and his staff to Russia in June 1916. The series of defeats which had overwhelmed that country during 1915 made it imperative for a minister of high rank and influence to go there and examine the situation on the

spot. The great reputation which Lord Kitchener had won as the creator of Britain's new armies and the organiser of her resistance along the Western Front singled him out as the one man who could impart confidence to the Russians. Moreover a demand for huge consignments of munitions of all kinds had been made, and here again Kitchener was equipped with the knowledge to enable him to gauge how far the home factories could go toward fulfilling this need.

The Mission arrived at Scapa on the morning of June 5th. The weather was bad with a N.E. gale and there was little possibility of a change for some time. The voyage of *Hampshire* promised, therefore, to be unpleasant from the outset. The presence of submarines along the eastern coast of the Orkneys had been reported on two occasions during the preceding week, which led to the abandonment of this route. Another which ran through the Pentland Firth to Cape Wrath was negated for the same reason, a German submarine having been sighted that very morning. The third route was along the west coast where, in the prevailing weather, the ship would be more sheltered and her destroyer escort could maintain better station. It was thought to be clear of mines and the safest route of the three, and at 4.45 p.m. on June 5th, *Hampshire* left Scapa.

The gale was so strong as to render the two destroyers useless for the purpose of escort and after about an hour of battling against a head sea, Capt. H. J. Savill, of *Hampshire*, ordered them to return to port. He then reduced speed and carried on alone. At about 7.40 p.m., in a position between Marwick Head and the Brough of Birsay, *Hampshire* struck a mine and sank within 15 minutes. Survivors stated that Lord Kitchener and his staff came up on to the quarter-deck, Capt. Savill calling for him to get into a boat, probably the galley, which was being got out.

Later it was ascertained that a minefield had been sown on the night of May 28th-29th, by Cdr. Kurt Beitzen of the German submarine *U-75*.

Three rafts, carrying anything from 50 to 70 men each, managed to push off from the ship, but the seas and the intense cold caused nearly all to perish within a short time. One boat was lowered but smashed, most of the occupants being drowned. On the following morning one warrant officer and 11 men from the rafts reached the rocky Orkney coast in safety. Others who landed thereabouts died soon afterwards from exposure.

The official complement of *Hampshire* was 655, to which number must be added Lord Kitchener, Brig.-Gen. W. Ellershaw, Lt. Col. O. A. G. Fitzgerald, military secretary, Mr. H. J. O'Beirne of the Foreign Office, Sir H. F. Donaldson, Mr. L. S. Robertson of the Ministry of Munitions, and 2nd Lt. R. I. Macpherson, comprising the Military and Financial Mission.

HAMPTON ROADS

Polar S.S. Corp.; 1920; Manitowoc S.B. Co.; 2,689 tons; 253-5x43-9x25-9; 326 n.h.p.; triple-expansion engines. The American steamship Hampton Roads was torpedoed, shelled and sunk by a German submarine on June 1st, 1942, 150 miles S.W. of Key West on a voyage from Tampa to San Juan, P.R. Five of her crew were killed.

HAMSTERLEY

*Hartley Steamship Co.; 1925; Smith's Dock Co.; 2,160 tons; 280 X 41 - 6x20-1; 228 n.h.p.; triple-expansion engines. The British cargo ship Hamsterley sank after a collision with the *Accrington* on December 3rd, 1939, about three miles south of Haisbro' light. She was on a voyage in ballast from London to Hartlepool.*

HANAGAWA MARU

Kawasaki Kisen K.K.; 4,739 tons. The tanker Hanagawa Maru was sunk by U.S. carrier-based aircraft on February 17th, 1944, in the Caroline Islands.

HANAU

Hamburg-Amerika Linie; 1921; Blohm & Voss; 5,892 tons; 450x58-2x27; 882 n.h.p.; turbine engines. The German steamship Hanau struck a mine and sank on January 30th, 1944, in the Fehmarn Belt.

HANKOW MARU

HANKOW MARU

Yamashita Kisen K.K.; 1919; *Kawasaki Dockyard Co.*; 4,105 tons; 345 x48x30; 356 n.h.p.; triple-expansion engines. The steamship *Hankow Maru* was bombed and sunk by U.S. land-based aircraft on September 2nd, 1943, off the Schouten Islands, New Guinea.

HANNA

Rederiaktieb. Henckel; 1885; *R. Dixon & Co.*; 1,573 tons; 257X36x18-5; 170 n.h.p.; triple-expansion engines. The Swedish cargo ship *Hanna* was torpedoed and sunk by a German submarine in the North Sea on March 13th, 1915.

HANNAH

Shaw & Co.; 1826; *St. Johns, N.F.L.*; 287 tons. The brig *Hannah*, Capt. Shaw, with a company of some 190 persons, chiefly Irish agricultural labourers and their families emigrating to Canada, left Newry for Quebec on April 3rd, 1849. The voyage was without incident until April 27th, when at about 4 a.m. the ship collided with an ice floe and began to sink. Capt. Shaw, together with the first and second officers, lowered a boat and abandoned the sinking ship, leaving the crew to assist the passengers. The seamen rose to the occasion and succeeded in getting most of the emigrants on to the ice floe. The *Hannah* sank about 40 minutes after striking, and the seamen had little opportunity to bring away any clothing or stores for the shipwrecked people. They did, however, manage to find some blankets and a small quantity of spirits which they shared among the company. At about 5 o'clock on the following afternoon they were sighted by the barque *Nicaragua*, Capt. Marshall, bound for Quebec. This ship took everyone on board without further mishap.

The number rescued was 129, about 60 being lost. The captain and officers were picked up four days later.

HANNAH

F. W. Uitenbogaart; 1913; *Tyne Iron S.B. Co.*; 3,730 tons; 350 • 1 X 50 - 1 X 23 - 8; 348 n.h.p.; triple-expansion engines. The Dutch steamship *Hannah* was torpedoed and sunk on January 11th, 1938, by an unknown submarine six miles off Cape San Antonio, during the Spanish Civil War.

HANNAH M. BELL

Crosby, Magee & Co.; 1893; *Ropner & Son*; 2,998 tons; 315X 40-5x20-3; 236 n.h.p.; triple-expansion engines. The British cargo ship *Hannah M. Bell* was wrecked near Carrisfort Light on April 3rd, 1911. She was on a voyage from Boston, via Newport News, to Vera Cruz carrying a cargo of coal.

HANNE

D/Saft1937A/S; 1905; *FredrikstadMek. Verksted*; 1,080 tons; 230-1x35-1x14-5; 104 n.h.p.; triple-expansion engines. The Danish steamship *Hanne* struck a mine and sank on December 28th, 1939, about one mile E. of Blyth Pier, with the loss of 15 lives.

HANNE

OveSkou; 1918; *P.Ph.Stuhrs*; 1,253 tons; 238-7x36-2x13-4; 106 n.h.p.; triple-expansion engines. The Danish steamship *Hanne* struck a mine and sank on October 5th, 1943, near Drogden lightship. Five of her crew were killed. The vessel was subsequently raised and repaired at Elsinore, and re-commissioned in 1945 under the name *Hanne Skou*.

HANOVER

The sailing ship *Hanover* with a crew of 27 all told struck on the rocks at the entrance to Bath harbour, Maine, U.S.A., on November 9th, 1849. The vessel went to pieces very quickly after striking, and all on board, with the exception of the first officer, were drowned.

HANOVERIAN

Allan Line S.S. Co.; 1882; *W. Doxford & Sons*; 3,603 tons; 366X42-2x29-8; 450 h.p.; compound engines. The British iron cargo ship *Hanoverian* was wrecked on August 31st, 1885, in Trepassey Bay, N.F.L., while on a voyage from Baltimore to Liverpool.

HANS ARP

Heinrich F. C. Arp; 1926; *A/S Rodby Havns Jernskibs.*; 2,645 tons; 316-6x44x21-2; 316 n.h.p.; triple-expansion engines. The German steamship *Hans Arp* was torpedoed and sunk by a British submarine on November 16th, 1942, at Ras Hilal.

HANS BORNHOFEN

R.Bornhofen; 1905; *JanSmit, Czn.*; 2,130 tons; 280-4x41-2x20-5; 203 n.h.p.; triple-expansion engines. The German steamship *Hans Bornhofen, ex-Magdalena Reith*, was torpedoed and sunk by a British submarine on February 13th, 1944, in the Skudenesfjord.

HANS BROGE

D/S A/S Progress; 1922; *A/S Koge Veer ft Skibs. & Maskin*; 2,095 tons; 289-9x43-1x19-5; 228 n.h.p.; triple-expansion engines. The Danish steamship *Hans Broge*, under German control, was torpedoed and sunk by a British aircraft on June 15th, 1941, W. of Texel.

HANS CHRISTOPHERSEN

H. W. Christopher sen; 1928; *Flensburger Schiffsbau Ges.*; 1,599 tons; 262-6x40-2x15-3; 105 n.h.p.; triple-expansion engines. The German steamship *Hans Christopher sen* struck a mine and sank on July 21st, 1941, off Texel.

HANS CHRISTOPHERSEN

German Government; 1921; *Scheepswerf Baanhoek*; 2,041 tons; 267-1x42-1x18-4; 207 n.h.p.; triple-expansion engines. The steamship *Hans Christopher sen* was formerly the Dutch *Naald-wijk*, taken over by the Germans. On December 24th, 1943, she was sunk by mine or torpedo in the Gulf of Bothnia, on a voyage from Stettin to Finland.

HANS GUDE

V. Torkildsen; 1910; *Bergens Mek. Verksted*; 1,110 tons; 229-1x35-3x15-8; 106 n.h.p.; triple-expansion engines. The Norwegian cargo ship *Hans Gude* was sunk by a German submarine off Ushant on March 31st, 1916.

HANS HEDTOFT

Royal Greenland Trading Co.; 1958; *Frederikshavns*; 2,875 tons; 383x51x24; oil engines. The motorship *Hans Hedtoft*, Capt. P. Rasmussen, was proceeding from Julianehaab, Greenland, to Copenhagen on the return half of her maiden voyage. On January 30th, 1959, in a gale, accompanied by thick snow squalls, she ran into an iceberg about 30 miles S.E. of Cape Farewell. Radio messages that she was sinking slowly were picked up by the U.S. cutter *Campbell* and the German trawlers *Johannes Kriiss* and *Justus Haslinger*.

The violence of the seas and the snow squalls prevented the rescue ships from reaching the scene of the disaster for several hours, the *Johannes Kriiss* being the first to arrive. No trace of the damaged vessel could be found. Later aircraft of the Canadian and United States air forces carried out a search over a wide area lasting several days, but without results.

The *Hans Hedtoft* carried 55 passengers and 39 crew, all of whom were lost, among them being Hr. Augo Lyng, a Greenland M.P. of the Danish parliament. This gentleman had in the past urged the Minister for Greenland Affairs to ban winter voyages between Greenland and Denmark because of navigational risks. Nothing had been done in the matter up to the time of the disaster.

On February 3rd the Minister, Hr. Kai Lindberg, announced the formation of a Commission to consider sailing conditions on the Denmark-Greenland route, and it was subsequently announced that in future passengers would be carried at their own risk during the winter months.

The *Hans Hedtoft* had been especially designed and strengthened for navigation in northern waters. The collision with the iceberg was, however, of such force as to render nugatory all the improved safety devices incorporated in the ship by her builders.

HANS LEONHARDT

Leonhardt & Blumberg; 1938; Neptunwerft Rostock G.m.b.H.; 4,174 tons; 399-8x55-9x20-7; 367 n.h.p.; compound engines & L.P. turbine.

The German steamship *Hans Leonhardt* was bombed and sunk by British aircraft on June 1st, 1944, S.E. of Kvam Island, near Stadtlandet.

HANS LUDEMANN

German Navy, destroyer; 1937; Deschimag, Bremen; 1,811 tons; 384x38-3x9-5; 55,000 s.h.p.; 36 knots; turbine engines; five 5 in. guns, four 37 mm., 8 T.T.

The *Hans Ludemann* was one of a flotilla of German destroyers sunk in the second battle of Narvik on April 13th, 1940. A full account of both battles is given under the British flotilla leader *Harby*, which was sunk in the first action on April 10th. There is also a short account under the Norwegian coast defence ship *Norge*.

HANS RICKMERS

Rickmers Rhederei, A.G.; 1919; J. Readhead & Sons; 5,226 tons; 399 x 52-4x28-1; 513 n.h.p.; triple-expansion engines. The German steamship *Hans Rickmers* struck a mine and sank on November 30th, 1942, in the approaches to Petsamo.

HANS SCHMIDT

Heinrich Schmidt G.m.b.H.; 1920; New Waterway S.B. Co.; 4,427 tons; 370x50-1x26-5; 402 n.h.p.; triple-expansion engines.

The German steamship *Hans Schmidt* struck a mine and sank on January 24th, 1943, near Pola, Yugoslavia.

HANSA

2,800 tons.

The East German cargo ship *Hansa* left Rostock for Tallinn with a cargo of sugar, and during the night of October 31st, 1949, found herself in the midst of Soviet navy manoeuvres. She was boarded by two Russian naval officers and while they were on board the ship was hit by two torpedoes and sunk. Only four of the German crew of 15 were rescued, the two Russians being lost. The ship was sailing on a course proscribed by the Soviet authorities.

HANSA I

1943; 1,923 tons.

The German ship *Hansa I* was bombed and sunk by Allied aircraft on April 10th, 1945, in the Kattegat.

HANSEAT

B.Hansen; 1895; C. S. Swan & Hunter; 3,358 tons; 330x44x18-9; 290 n.h.p.; triple-expansion engines.

The Norwegian steamship *Hanseat* was sunk by a German submarine off the Azores on July 20th, 1917.

HANSESTADT DANZIG

German Government; 1926; Vulcan Werke, A.G.; 2,431 tons; 296-8x38-3x19-1; 814 n.h.p.; oilengines. The German motorship *Hansestadt Danzig* struck a mine and sank on July 9th, 1941, off Oland Island.

HANSLEY

U.S.S.R.; 1904; Schiffswerft von Henry Koch; 1,273 tons; 250-8x37-2x15-1; 117 n.h.p.; triple-expansion engines.

The German cargo ship *Hans Leonhardt* was requisitioned by the British Admiralty and renamed *Hansley*, subsequently being transferred to the Russian Government. On April 9th, 1917, she was torpedoed and sunk by a German submarine in the Arctic.

HAR ZION

Palestine Maritime Lloyd; 1907; Burmeister & Wain; 2,508 tons; 310-8x40-7x18-8; 281 n.h.p.; triple-expansion engines. The steamship *Har Zion*, on a voyage from Liverpool to Savannah, was torpedoed and sunk by a German submarine on August 31st, 1940, off Inishtrahull. Thirty-six of her crew of 37 were lost.

HARALD CASPER

Hessler & Co.; 1918; J. L. Thompson & Sons; 3,104 tons; 331-3x46-8x23-2; 430 n.h.p.; triple-expansion engines. The British cargo ship *Harald Casper* was wrecked on Sable Island on February 11th, 1926. She was on a voyage from Grangemouth to New York carrying a cargo of coal.

HARALD KLITGAARD

Dansk-Russiske Dampskibs.; 1884; Richardson, Duck & Co.; 1,799 tons; 260-7x38x16-3; 143 n.h.p.; compound engines. The Danish steamship *Harald Klitgaard* was torpedoed and sunk by a German submarine in the North Sea on June 6th, 1917.

HARBERTON

Cory Colliers; 1894; S. P. Austin & Son; 1,443 tons; 247x35-3x15-6; 148 n.h.p.; 8-5 knots; triple-expansion engines. The collier *Harberton* left Blyth on March 29th, 1917, for London, with coal. She was never heard of again and was presumed to have been sunk by enemy action. She had a crew of 16.

HARBIN MARU

Nipponkai Risen K.K.; 1915; Kawasaki Dockyard Co.; 5,167 tons; 400x50x27-6; 659 n.h.p.; triple-expansion engines. The steamship *Harbin Mam*, serving as a transport, was torpedoed and sunk by the U.S. submarine *Stingray* on January 10th, 1942, E. of Hue, Indo-China.

HARBLEDOWN

National S.S. Co.; 1933; Lithgows; 5,414 tons; 428x56-2x26; 544 n.h.p.; triple-expansion engines.

The steamship *Harbledown*, on a voyage from Portland, Maine, to London, was torpedoed and sunk by a German submarine on April 4th, 1941, about 800 miles W. of the Hebrides. Fourteen of her crew and two gunners were lost.

HARBOE JENSEN

DISAISBananafart; 1929; AjB Gotaverken; 1,862 tons; 269-3X37-7x21-9; 455 n.h.p.; oil engines.

The Norwegian motorship *Harboe Jensen* was torpedoed and sunk by a German submarine on January 15th, 1943, about 300 miles W. of Madeira. Eighteen of her crew were lost.

HARBOROUGH

Willis S.S. Co.; 1932; Lithgows; 5,415 tons; 428x56-2x26; 481 n.h.p.; triple-expansion engines.

The steamship *Harborough*, on a voyage from Buenos Aires to New York, was torpedoed and sunk by a German submarine on September 14th, 1942, 60 miles off Tobago. Twenty-six of her crew and three gunners were lost.

HARBOURNE

/ & C. Harrison; 1893; S. P. Austin & Son; 1,158 tons; 225 X 33-4x14-4; 120 h.p.; triple-expansion engines. The British cargo ship *Harbourne* sank after a collision off Flam-borough Head on March 29th, 1894, while on a voyage from Blyth to London carrying a cargo of coal.

HARBURY

/ & C. Harrison; 1884; J. Priestman & Co.; 1,570 tons; 255-7 X36x18-4; 160 h.p.; triple-expansion engines. The British cargo ship *Harbury* was wrecked near Algiers on March 11th, 1894, while on a voyage from Odessa to Gibraltar carrying a cargo of maize.

HARBURY

J. & C. Harrison; 1913; Sunderland Shipbuilding Co.; 4,572 tons; 380x53x26; 478 n.h.p.; 11 knots; triple-expansion engines.

The steamship *Harbury* was torpedoed and sunk by a German submarine 170 miles W. \ N. of Ushant on June 9th, 1917, on a voyage from Buenos Aires to Cherbourg with grain. The captain and eleven of the crew were killed.

HARDEN

/. & C. Harrison; 1894; Edwards S.B. Co.; 1,958 tons; 279'X 36-8x16-7; 199 n.h.p.; triple-expansion engines. The British cargo ship *Harden* was wrecked near Cape Passarp, Sicily, on January 15th, 1897. She was carrying a cargo of grain and wool on a voyage from Novorossisk to Rotterdam.

HARDWICK HALL

HallLine; 1896; Palmers'Co.; 4,174 tons; 380x45-3x29-2; 404 n.h.p.; triple-expansion engines.

The British cargo ship *Hardwick Hall* was wrecked on October 18th, 1903, at Farquhar Island, north-east Madagascar, while on a voyage in ballast from Delagoa Bay to Calcutta.

HARDY

British Navy, destroyer; 1936; *Cammell Laird*; 1,505 tons; 334x34x9; 38,000 s.h.p.; 36 knots; turbine engines; 3-drum boilers; five 4 • 7 in. guns, 7 smaller, 8 T.T.

The flotilla leader *Hardy* was commanded by Capt. B. A. W. Warburton-Lee, who also commanded the 2nd Destroyer Flotilla. Five of the ships of this flotilla were operating off Narvik in connection with the sowing of minefields in Norwegian waters to prevent their continued use by German shipping. This operation commenced on Sunday, April 7th, 1940, and in subsequent brushes with enemy ships it became apparent that the Germans were engaged upon a large-scale action—no less than the violation of Norwegian neutrality and the forcible occupation of that country. On April 9th it was known to the world that Germany was attacking Norway, and that as part of her plan 11 of her largest destroyers, each transporting 300 soldiers, and accompanied by several merchantmen, had steamed into Ofot Fjord on their way to Narvik. This news had been transmitted to the Admiralty by Capt. Warburton-Lee who was at once informed that the odds against the small British force were so heavy that it would be left to his judgement, as the commander on the spot, either to attack immediately or to await reinforcements. Whatever decision he came to would receive the full support of the Admiralty. Capt. Warburton-Lee elected to attack before the German forces had time to complete their landing or consolidate their position, and at 3 o'clock on the afternoon of April 10th the five British destroyers entered Ofot Fjord.

There was a great disparity in numbers, tonnage and armament, between the rival flotillas. The British force consisted of *Hardy*, 1,505 tons, five 4-7 in. guns, eight torpedo tubes, leader, *Havock*, *Hostile*, *Hotspur* and *Hunter*, all being of 1,340 tons, armed with four 4-7 in. guns and eight torpedo tubes. The German vessels were all brand new and were of two types, the first of 1,811 tons with five 5 in. guns and eight torpedo tubes; they were the *Diet her Von Roeder*, *Hans Ludemann*, *Hermann Kunne*, *Wilhelm Heidkamp* and *Anton Schmitt*. The second were of 1,625 tons, but carrying the same armament; they were the *Wolfgang Zenker*, *Bernd Von Arnim*, *Erich Giese*, *Bruno Heinemann*, *Georg Thiele* and *Erich Koellner*.

The British steamed down the long fjord without incident and appeared before Narvik harbour at about 4.30 p.m. *Hardy* at once steamed in to reconnoitre, leaving her four consorts outside. She made a circuit of the harbour, which was full of shipping, and engaged a 1,625 ton destroyer with gunfire and torpedo. Two torpedoes were discharged and the German was hit and blew up. Before leaving, *Hardy* engaged another two of the enemy as well as the shore batteries, but was not hit. Capt. Warburton-Lee then ordered his four consorts to circle the harbour in turn, his own ship following. This was repeated a second time, and on withdrawing a fresh force of three enemy destroyers was sighted emerging from the Rombaks Fjord, which opens into the Ofot Fjord above Narvik. This force was immediately engaged and was later reinforced by two other destroyers from the same direction.

The fight that ensued was extremely fierce. *Hardy* was disabled and Capt. Warburton-Lee was mortally wounded. All the officers were either killed or wounded and Paymaster-Lt. G. H. Stanning, himself wounded in the foot, had to assume the duties of bridge officer and ran *Hardy* ashore to prevent further loss of life. In the meantime *Hunter* had been sunk and *Hotspur* badly damaged.

The loss on *Hardy* amounted to two officers, one of whom was Capt. Warburton-Lee, and 16 ratings killed, and three officers and six ratings severely wounded. The ship's complement totalled 175 and most of these reached the shore, Capt. Warburton-Lee dying

as he was being towed on an improvised raft. In recognition of his gallant action he was posthumously awarded the Victoria Cross.

Meanwhile the rest of the flotilla was steaming away from the action unharassed by the Germans who had plainly suffered sufficiently for the day. On their way back the ships met and sank the supply ship *Ravensfeld*, 8,460 tons, loaded with ammunition. The German losses in all amounted to the following:-

Destroyers

Anton Schmitt, 1,811 tons *Wilhelm Heidkamp*, 1,811 tons

Supply-Ships

<i>Jan Wellem</i> , 11,776 tons	<i>Hein Hoyer</i> , 5,836 tons
<i>Ravensfeld</i> , 8,460 tons	<i>Bockenheim</i> , 4,902 tons
<i>Neuenfels</i> , 8,096 tons	<i>Martha Hendrik Fisser</i> , 4,879 tons
<i>Aachen</i> , 6,388 tons	<i>Frielinghaus</i> , 4,339 tons
<i>Altona</i> , 5,892 tons	

The British losses, though severe at first, were greatly reduced when most of the men from *Hardy* and *Hunter* were released after the Second Battle of Narvik which took place on April 13th. As this engagement was intimately related to the First Battle it is told under this heading rather than under the names of the ships which were lost in it.

The gallant action of the 2nd Destroyer Flotilla, though it had severely damaged the enemy had by no means destroyed him, or prevented his plans for invasion taking shape. The Admiralty therefore decided to send in another flotilla of destroyers, this time attended by a battleship, the guns of which could overwhelm the strongest resistance of the enemy. Accordingly a force consisting of the battleship *War spite*, 31,000 tons, eight 15 in. guns, wearing the flag of Vice-Admiral W. J. Whitworth, the "Tribal" destroyers *Bedouin*, *Cossack*, *Eskimo* and *Punjabi*, 1,870 tons, eight 4-7 in. guns, four torpedo tubes; and *Kimberley*, 1,690 tons, *Icarus*, 1,370 tons, *Hero*, 1,340 tons, *Foxhound* and *Forester*, 1,350 tons, all with from four to six 4 • 7 in. guns, and four to eight torpedo tubes.

Against this force were nine German destroyers, some of which were damaged and one, the *Erich Giese*, which had not fought in the former action owing to engine trouble.

The British entered Ofot Fjord at noon on Saturday, the 13th, the nine destroyers being formed in two divisions of four ships each and led by *Icarus*. *War spite* followed five miles astern. The destroyers were equipped with minesweeping apparatus and proceeded through mist and rain which reduced visibility to five miles for about 20 minutes before sighting any enemy ship. Then one destroyer appeared and after exchanging shots with the attackers was lost in the mist, and there was no further contact until another was sighted about ten minutes later, when the fighting became general, two others soon appearing, followed after a short interval by a fourth. *Warspite* was now close enough to bring her 6 in. guns into action and by 2.30 p.m. two Germans had been put out of action and run ashore and one was drifting derelict down the fjord. Four other enemy ships had escaped into Rombaks Fjord under cover of smoke floats and were followed by five British destroyers. Meanwhile *Cossack* had steamed into Narvik harbour and engaged another enemy destroyer moored alongside the jetty. She silenced her opponent's guns, but sustained a good deal of damage and drifted ashore on the west side of the harbour. Here she became the target for a howitzer, but managed to put it out of action. The arrival of *Warspite* relieved her from the danger of any further attacks.

The last phase of the battle now began. *Foxhound* blew up the German destroyer alongside the jetty by gunfire. The four vessels in the Rombaks Fjord had retreated beyond the narrowest part of the channel, only 200 yards wide, where they waited the first of the British pursuers. This was *Eskimo* which for a few minutes was exposed to a concentrated fire as she emerged from the narrow neck. One German was ashore close to this spot with her guns and torpedo tubes trained on the entrance. She succeeded in damaging *Eskimo* to such an extent as to make her unmanageable, but the other British ships were now coming through and in a little while the enemy were in full flight. There was no further fighting and when the Germans were again sighted they were each lying ashore and abandoned, with the exception of one, the *Hans Ludemann*, which was drifting. A boarding-party discovered a wounded German officer as the sole occupant of the vessel and he was removed to safety, *Hero* then sank the *Hans Ludemann* by torpedo.

The British flotilla at once left the narrow waters of the Narvik fjords, taking with them some 130 of the crew of *Hardy* and 47 merchant seamen who had been taken prisoner when the Germans made their surprise attack on April 9th. Two officers and 44 ratings together with 129 merchant seamen held prisoner in the town were released by the Germans when the British attack was seen to be succeeding. Most of the naval party were from *Hunter*, and the whole number were sent overland to Sweden where they were treated with great kindness and ultimately sent back to Britain. *Cossack* was refloated during the night and was able to rejoin the flotilla.

The German loss in both battles of Narvik amounted to the whole flotilla of 11 large destroyers, with many of their crews killed and wounded. The survivors escaped ashore.

Viewed as one sea battle, and not as a series of isolated actions, the naval fighting around the Norwegian coast from April 8th to 13th, 1940, was responsible for the following losses:—

BRITISH:

Destroyers

<i>Glowworm</i>	1345 tons
<i>Gurkha</i>	1870 "
<i>Hardy</i>	1505 "
<i>Hunter</i>	1340 "

NORWEGIAN:

Coastal defence ships	<i>Norge</i>	4166 tons
	<i>Eidsvold</i>	4166 "
Minelayer	<i>Froya</i>	595 "
Destroyers	<i>Aeger</i>	597 "
	<i>Gam</i>	540 "
Torpedo boat	<i>Stegg</i>	220 "

GERMAN:

Heavy cruiser	<i>Blucher</i>	10000 tons
Light cruisers	<i>Karlsruhe</i>	6000 "
	<i>Konigsberg</i>	" "
Destroyers	<i>Bernd van Arnim</i>	1625 "
	<i>Bruno Heinemann</i>	" "
	<i>Erich Giese</i>	" "
	<i>Erich Koellner</i>	" "
	<i>Georg Thiele</i>	" "
	<i>Wolfgang Zenker</i>	" "
	<i>Anton Schmitt</i>	1811 "
	<i>Wilhelm Heidkamp</i>	" "
	<i>Hans Ludemann</i>	" "
	<i>Hermann Kunne</i>	" "
	<i>Diether von Roeder</i>	" "
Torpedo boat	<i>Albatros</i>	800 "

The aggregate loss of the Allies in naval ships amounted to 16,344 tons as compared with 41,605 tons lost by the Germans. In mercantile ships the Germans had lost 96,446 tons up to April 14th.

The story of the encounter between the Germans and the Norwegian ships will be found under the *Norge*.

HARDY

British Navy, destroyer; 1943; John Brown & Co.; 1,710 tons; 360x33x10; 40,000 s.h.p.; 34 knots; turbine engines; 3-drum boilers; four 4-7 in. guns, four 40 mm.A.A., four 20 mm.A.A., 8 T.T.

The destroyer *Hardy*, Capt. W. G. A. Robson, D.S.O., D.S.C., was the second ship of that name to be lost during the Second World War. On January 30th, 1944, she was torpedoed and sunk by a German submarine off Bear Island in the Arctic Ocean. Thirty-five ratings were killed.

HARE

G. Lowen & Co.; 1886; Barclay Curie & Co.; 774 tons; 216x29-6x14-7; 218 n.h.p.; 9 knots; triple-expansion engines. The steamship Hare was torpedoed and sunk by a German submarine seven miles E. of the Kish lightship on December 14th, 1917. Twelve men were killed. The captain was among the survivors.

HARIMA MARU

10,045 tons.

The tanker *Harima Maru* was sunk by U.S. carrier-based aircraft on January 16th, 1945, S.W. of Yulin, Hainan Island.

HARKAWAY

Harkaway Steamship Co.; 1882; H. McIntyre & Co.; 507 tons;

*172-1x25-6x13-5; 70 h.p.; compound engines. The London steamship Harkaway left Hull for Liverpool with a cargo of wheat on May 16th, 1887. The vessel encountered heavy weather from the commencement of the voyage, and shipped a large amount of water. On Friday, 20th, she suddenly foundered. The captain, first officer and a seaman were saved; being picked up by the yacht *Thistle*. The captain's wife and two children, the engineer's wife and nine men were drowned.*

HARLECH

Harrisorfs (London) Colliers; 1914; Osbourne, Graham & Co.;

1,081 tons; 210 x32x15-4; 147 n.h.p.; triple-expansion engines. The British cargo ship Harlech sank after a collision off Spurn Head on October 15th, 1924, while carrying a cargo of coal on a voyage from Hull to Brixham.

HARLESDEN

I. & C. Harrison; 1932; Hawthorn, Leslie & Co.; 5,483 tons;

*427-7x56-3x26; 482 n.h.p.; triple-expansion engines. The steamship Harlesden, on a voyage from Hull to New York, was bombed by a German aircraft on February 22nd, 1941, about 500 miles E.S.E. of Cape Race. Later in the day she was shelled and sunk by the raider *Gneisenau*. Seven of her crew were killed.*

HARLEY

Watergate S.S. Co.; 1919; A. de Jong; 400 tons; 133-3x24-1x11-2; 35 r.h.p.; 9 knots; triple-expansion engines. The steamship Harley, Capt. R. Findlay, was off Fifeness on November 14th, 1944, when she was overwhelmed by stress of weather and sank. Seven men, including Capt. Findlay, lost their lives.

HARLINGEN

I. & C. Harrison; 1905; W. Gray & Co.; 3,471 tons; 342x49-5x22-7; 316 n.h.p.; triple-expansion engines. The British cargo ship Harlingen was wrecked near Cape Frio, South Brazil, on November 9th, 1906, while on a voyage in ballast from Buenos Aires to Port Eads.

HARLINGTON

Peninsular & Oriental S.N. Co.; 1895; S. P. Austin & Son; 1,000 tons; 220x31-5x13-6; 138 n.h.p.; triple-expansion engines.

The British cargo ship *Harlington* was wrecked on West Sunk Sand on December 2nd, 1914. She was on a voyage from the Tees to London carrying an iron and general cargo.

HARLINGTON

Peninsular & Oriental S.N. Co.; 1913; Osbourne, Graham & Co.; 1,089 tons; 210x32x15-4; 142 n.h.p.; 10 knots; triple-expansion engines.

The steamship *Harlington* was mined and sunk four miles S.W. of the Shipwash lightship on December 9th, 1916. Seven men were killed. The captain was among the survivors.

HARLYN

WestHartlepool S.N. Co.; 1891; Edwards' S.B. Co.; 1,453 tons;

245x34x16-2; 136 n.h.p.; triple-expansion engines. The British cargo ship Harlyn was wrecked at Cape Negro, N.S., on July 6th, 1906, while on a voyage from Trapani to Gloucester, Mass., carrying a cargo of salt.

HARMALA

*Gotland S.S. Co.; 1935; Lithgows; 5,730 tons; 433-2x58*2x*

26; 475 n.h.p.; triple-expansion engines. The steamship Harmala, on a voyage from Rio de Janeiro and New York for Liverpool, was torpedoed and sunk by a German submarine on February 7th, 1943, about 750 miles W. of Ireland. Forty of her complement of 64 were lost.

HARMATTAN

HARMATTAN

I. & C. Harrison; 1911; Swan, Hunter & Wigham Richardson; 4,792 tons; 390x50-6x27-8; 421 n.h.p.; 10 knots; triple-expansion engines.

The steamship *Harmattan* was mined and sunk seven miles N. of Cape Rosa, Algeria, on May 5th, 1917. The captain and 35 of the crew were killed.

HARMODIUS

British & South American S.N. Co.; 1919; Ayrshire Dockyard Co.; 5,229 tons; 400-7x52-3x28-5; 3,000 i.h.p.; 11-5knots; triple-expansion engines.

The steamship *Harmodius*, Capt. R. Parry, was in convoy when she was torpedoed and sunk by a German submarine about 120 miles W. of Cape Blanco, Mauritania, on March 8th, 1941. Eleven of her crew were killed. Capt. Parry was among the survivors.

HARMONIDES

British & South American S.N. Co.; 1920; Ayrshire Dockyard Co.; 5,237 tons; 400-2x52-3x28-5; 599 n.h.p.; triple-expansion engines & L.P. turbine.

The steamship *Harmonides*, on a voyage from Calcutta to Lourenço Marques, was torpedoed and sunk by a submarine on August 25th, 1942, about 250 miles S. of Ceylon. Fourteen of her crew were lost.

HAROLD

George Pyman & Co.; 1877; W. Gray & Co.; 1,322 tons; 239-4x32-5x16-9; 120 h.p.; compound inverted engines. The British cargo ship *Harold* was wrecked at Bresno Island on November 10th, 1883, while on a voyage from Hartlepool to Sundsvall carrying a cargo of coal.

HAROLD

Charlton, McAllum & Co.; 1871; A. Leslie & Co.; 1,073 tons; 225-5x30-6x17-4; 99 h.p.; compound engines. The British cargo ship *Harold* sank after a collision off Beachy Head on June 11th, 1889, while on a voyage from Bilbao to the Tyne carrying an ore cargo.

HAROLD

I. B. Walmsley & Co.; 1888; R. Duncan & Co.; 1,376 tons; 240x36-5x21-3.

The barque *Harold* was torpedoed and sunk by a German submarine 65 miles N.N.W. & W. of Tory Island on July 21st, 1917. Thirteen men, including the captain, were killed.

HARPA

Anglo-Saxon Petroleum Co.; 1931; Hawthorn, Leslie & Co.; 3,007 tons; 305x50-1x19-2; 380 n.h.p.; oilengines. The tanker *Harpa*, on a voyage from Singapore to Batavia with aviation spirit, struck a mine, caught fire and sank on January 27th, 1942.

Thirty-three of her crew and two gunners were lost. There were five survivors.

HARPAGON

National S.S. Co.; 1935; Lithgows; 5,719 tons; 428-8x58-2x26; 475 n.h.p.; triple-expansion engines.

The steamship *Harpagon*, on a voyage from Baltimore to Barry, was torpedoed and sunk by a German submarine on April 19th, 1942, about 250 miles S.S.E. of Cape Farewell. Thirty-five of her crew and six gunners were lost.

HARPAGUS

Gowland S.S. Co.; 1940; Bartram & Sons; 5,173 tons; 437x58-5x25; 470 n.h.p.; triple-expansion engines. The steamship *Harpagus*, on a voyage from Baltimore and Halifax to Barry, was torpedoed and sunk by a German submarine on May 20th, 1941, about 250 miles S.S.E. of Cape Farewell. Twenty-five of her crew, four gunners and three passengers were lost, together with 26 survivors from the *Norman Monarch*, sunk earlier on the same day.

HARPALYCE

I. & C. Harrison; 1911; W. Gray & Co.; 5,940 tons; 428x53-5x29; 593 n.h.p.; 12 knots; triple-expansion engines. The steamship *Harpalyce* left Rotterdam in April, 1915, for Nor-

folk, Virginia, in ballast, with a "safe conduct" from the German minister at The Hague. The vessel had "Commission for Belgian Relief" painted on her sides in large letters and also flew a white flag bearing the same words. Despite these indications of her peaceful mission she was torpedoed and sunk by a German submarine on April 10th, about seven miles E. by S. of the North Hinder lightship. The *Harpalyce* sank immediately and there was no time to launch the boats. Fifteen of her crew of 44 were killed.

HARPALYCE

Gowland S.S. Co.; 1940; Bartram & Sons; 5,169 tons; 437x58-5x25; 470 n.h.p.; triple-expansion engines. The steamship *Harpalyce*, on a voyage from the U.S.A. to Hull, was torpedoed and sunk by a German submarine on August 25th, 1940, 23 miles from the Butt of Lewis. The ship sank in one minute with the loss of 37 lives.

HARPERLEY

National S.S. Co.; 1930; W. Gray & Co.; 4,586 tons; 400-2x54-5x24-5; 425 n.h.p.; triple-expansion engines. The steamship *Harperley*, on a voyage from Newport to Buenos Aires, was torpedoed and sunk by a German submarine on May 5th, 1943, about 500 miles S. of Cape Farewell. Ten of her crew and one gunner were lost.

HARRIET

Boulcott & Co.; 1830 (circa); about 350 tons. The whaler *Harriet*, Capt. Barker, was reported at Sydney in 1841-42. For a period of 18 months after she sailed no tidings of the ship were received. News was then brought to England by Capt. Hammer of the whaler *Sussex* that the *Harriet* had called at the island of Ualan, or Strong's Island, in the Caroline group, for wood and water. The natives received the ship's company in a friendly manner, but when landing parties went ashore for the purpose of collecting supplies they were set upon severally and killed. The *Harriet*, with only five men remaining on board, was next attacked, the men taking to the one boat in which they drifted away and were lost. The ship was plundered and then set on fire by the natives. The entire crew of 27 were lost.

HARRIET

M. Carl; 1899; W. Gray & Co.; 1,372 tons; 240x35-5x15-6; 126 n.h.p.; triple-expansion engines.

The Danish steamship *Harriet* was torpedoed and sunk by a German submarine in the North Sea on March 27th, 1916.

HARRILDSBORG

C. K. Hansen; 1907; Helsingors Jernskibs-og Maskinbyg.; 1,547 tons; 237-9x36-7x14-2; 148 n.h.p.; triple-expansion engines.

The Danish steamship *Harrildsborg* was torpedoed and sunk by a German submarine in the North Sea on July 19th, 1917.

HARRINGTON EMERSON

U.S. War Shipping Administration; 1944; Oregon S.B. Corp.; 7,176 tons; 422-8x57x34-8; triple-expansion engines. The American ship *Harrington Emerson* went ashore at Okinawa on October 9th, 1945, during a typhoon, and was completely wrecked.

HARROGATE

Wilsons & North Eastern Railway Shipping Co.; 1911; Earle's Co.; 1,168 tons; 255-1x36-1x15-1; 272 n.h.p.; triple-expansion engines.

The British cargo ship *Harrogate* foundered 50 miles off the coast of Norway on February 20th, 1918. She was on a voyage from Hull to Bergen carrying a cargo of coke.

HARROW

Galbraith, Pembroke & Co.; 1888; W. Gray & Co.; 2,586 tons; 299-6x38-6x22; 240 n.h.p.; triple-expansion engines. The British cargo ship *Harrow* was wrecked at Nieuwe Diep on December 27th, 1897, while on a voyage from Savannah to Bremen carrying a cargo of cotton.

HARRY F. SINCLAIR, JUNR.

Sinclair Navigation Co.; 1931; Bethlehem Shipbuilding Corpn.; 6,151 tons; 416-5x57-1x31-9; 4,000 s.h.p.; 12-5 knots; turbine engines.

The American tanker *Harry F. Sinclair, Junr.*, Capt. William Collegan, was torpedoed and sunk by a German submarine off Cape Lookout, North Carolina, on April 11th, 1942. Ten men were killed, including Capt. Collegan. The vessel was not in convoy at the time.

HARRY G. SEIDEL

Panama Transport Co.; 1930; Fried. Krupp, A.G.; 10,354 tons; 513-2x68-1x39-4; 997 n.h.p.; oilengines. The Panamanian tanker *Harry G. Seidel* was torpedoed and sunk by a German submarine on April 29th, 1942, on a voyage from Aruba to Caripito in ballast.

HARRY LUCKENBACH

E. F. Luckenbach; 1881; W. Gray & Co.; 2,798 tons; 300x40-2x24-5; 279 n.h.p.; compound engines.

The American cargo ship *Harry Luckenbach* was torpedoed and sunk by a German submarine in the Bay of Biscay on January 6th, 1918.

HARRY LUCKENBACH

Luckenbach S.S. Co.; 1919; SunS.B. Co.; 6,366 tons; 448-9x60-2x37-8; 968 n.h.p.; turbine engines.

The American steamship *Harry Luckenbach* was torpedoed and sunk by a German submarine on March 17th, 1943, about 400 miles E.S.E. of Cape Farewell on a voyage from New York to Liverpool. There were no survivors.

HARTINGTON

J. & C. Harrison; 1932; W. Gray & Co.; 5,496 tons; 425-5X 56-2x26; 470 n.h.p.; quadruple-expansion engines. The steamship *Hartington*, bound to Belfast from Halifax, N.S., was torpedoed and sunk by a German submarine at 4 a.m. on November 2nd, 1942, about 450 miles E. of Belle Isle Strait. Twenty-two of her crew and two gunners were lost.

HARTLAND

British Navy, cutter; 1929; Bethlehem Shipbuilding Corpn.; 1,975 tons; 250x42x16; 3,220 i.h.p.; 16 knots; turbo-electric engines; two 5 in. guns, two 3 pdr.

Hartland was formerly the U.S. cutter *Pontchartrain*, transferred to the Royal Navy under the Lease-Lend agreement in March, 1941. On the morning of November 8th, 1942, the vessel in company with *Walney* (which see), also an ex-U.S. cutter, was participating in the attack on Oran, Algeria. The task assigned to *Hartland*, which carried a small British landing party of 52, together with 33 officers and men of the U.S. navy and about 200 U.S. troops, was to run alongside the pier and land troops to silence a battery of 4 • 7 in. guns. At the same time the seamen were to board the French merchant ships and prevent their crews from scuttling them. Both vessels first laid a smoke screen and then passed through it to the attack but *Hartland* was disabled by the bursting of her main steam pipe and collided with the outer mole. She became a target for two shore batteries and the guns of the French destroyer *Typhon* and suffered severe casualties and damage.

Finally she blew up and sank with a loss of four officers and 30 ratings. Many were wounded and were ferried ashore on floats and rafts. The losses among the American contingent were very heavy, nearly 200 being killed.

Walney, which had as her objective the landing of a force to capture the French Naval Headquarters, situated at the far end of the harbour, met with a fierce bombardment from the shore batteries and the destroyers *Epervier* and *Tramontane*. She made a valiant endeavour to land her party, only a few of whom succeeded in reaching shore, and then capsized with heavy loss of life.

The landing at Oran had been regarded by the British and American naval commands as an operation fraught with great difficulty as the Vichy French forces were expected to put up a very resolute defence. Accordingly the Centre Naval Task Force under Cdre.

Thomas Troubridge was of formidable proportions and comprised the battleship *Rodney*, 33,900 tons, nine 16 in. guns, flagship; the aircraft carriers *Furious*, 22,450 tons, *Biter* and *Dasher*, 12,000 tons; the anti-aircraft cruiser *Delhi*, 4,850 tons, together with 13 destroyers, eight minesweepers, seven corvettes and two large cutters. In order to take advantage of any moderation of feeling which the French might be inclined to show toward the Americans, as distinguished from that shown to the British, it had been decided to land a United States force of approximately 39,000 men under command of Maj. Gen. Lloyd R. Fredenall, U.S. Army.

The fighting terminated at 12.30 p.m. on November 10th after about a day and a half's naval and air bombardment and a certain amount of fighting ashore. The allied losses in ships were none, other than *Hartland* and *Walney*. The U.S. army losses were 23 officers and 343 other ranks killed and wounded.

The French, in addition to their killed and wounded, lost 1,364 officers and men as prisoners to the Americans. The French destroyers *Tornado*, *Tramontane* and *Typhon*, all of 1,319 tons, were sunk by the heavy ships supporting the landing.

HARTLEBURY

National S.S. Co. (J. & C. Harrison); 1934; Lithgows; 5,082 tons; 418 x 56 • 2 x 24 • 6; 472 n.h.p.; triple-expansion engines. The British steamship *Hartlebury*, on a voyage from Sunderland and Reykjavik to North Russia, was torpedoed and sunk by a German submarine on July 7th, 1942, off Novaya Zemlya Island. Thirty-nine lives were lost.

HARTLEPOOLS

Hudson Shipping Co.; 1880; W. Gray & Co.; 1,754 tons; 258-5x34-6x19-7; 150 h.p.; compound engines. The British steamship *Hartlepoools* sank after striking a rock at Naalevig, near Ekersund, on December 6th, 1888, while on a voyage to Bergen. Seventeen lives were lost.

HARTLEY

Hartley Steamship Co.; 1924; Smiths Dock Co.; 2,147 tons; 280 x 41 - 6 x 20 • 1; 229 n.h.p.; 10 knots; triple-expansion engines. The steamship *Hartley*, Capt. W. Pearson, with a crew of 20, was lost in mid-channel on November 27th, 1924, during a S.W. gale of extreme violence. Of those on board 18, including the captain, were drowned. The steamship's S.O.S. signal was picked up at Weymouth and Portland during the morning and the light cruiser *Calliope*, the Weymouth lifeboat and Weymouth and Portland tugs put out in search of her. The s.s. *Machaon*, which picked up the *Hartley's* S.O.S. at about 9.30 a.m., also steamed to her assistance and succeeded in approaching to within a quarter of a mile. The *Hartley* had a very heavy list and was settling down but managed to launch a boat. Later this boat capsized, all the occupants being drowned save two who were picked up by the *Machaon*.

The *Hartley* foundered at 11.12 a.m., when in mid-channel in a line from Anvil Point, Swanage.

HARTMUT

German Government; 1938; Eriksbergs Mek. Vcerks.; 2,713 tons; 314-4x50-3x23-3; 608 n.h.p.; oilengines. The motor vessel *Hartmut* was formerly the Norwegian *Mostun*, taken over by the Germans. On October 1st, 1944, she struck a mine and sank outside Aalborg.

HARTSIDE

Charlton, McAllum & Co.; 1909; Short Bros.; 2,740 tons; 313 x47x21 -2; 269 n.h.p.; triple-expansion engines. The British cargo ship *Hartside* was wrecked on August 8th, 1922, at Cape Palmar while on a voyage in ballast from Rio de Janeiro to Buenos Aires.

HARUKIKU MARU

Japanese Government; 1909; Maats. Fyenoord; 3,040 tons; 325-3x44x22-8; 233 n.h.p.; triple-expansion engines. The steamship *Harukiku Mam* was formerly the Dutch *Van Waer-wijk*, seized by the Japanese. On June 26th, 1944, she was torpedoed and sunk by a British submarine in the Straits of Malacca.

HARUNA

Japanese Navy, dreadnought battleship; 1913; Kawasaki; 29,330 tons; 704x95x27^5; 64,000 i.h.p.; 26 knots; turbine engines; Kanpon boilers; eight 14 in. guns, sixteen 6 in., eight 5 in., 4 m.g., 4 T.T., 3 aircraft.

On July 28th, 1945, aircraft from British and American carriers attacked shipping in the great naval port of Kure. Six large warships were sunk and others disabled. Of this number the battleship *Haruna* was destroyed by bombs from aircraft of the U.S. Third Fleet and bombers of the U.S. Army. The normal complement of the *Haruna* was 980.

The battleships *Hyuga* and *Ise*, both 29,990 tons, the cruisers *Aoba*, 7,100 tons, *Oyodo*, 6,000 tons and *Tone*, 14,000 tons, and the destroyer *Nashi* were also sunk. This was the last large scale attack on Japanese warships prior to the cessation of hostilities between the Allies and Japan on August 15th, 1945.

The war had cost the Japanese nearly the whole of their navy, and at its conclusion they were reduced to one battleship fit for service, the *Nagato*, 32,720 tons, eight 16 in. guns, two aircraft carriers and some heavy cruisers damaged but repairable. The British and Americans paid a heavy toll in naval ships as indicated by the following table of those lost in action in Pacific waters.

	Britain	U.S.	Japan
Battleships ...	2	2	10
Aircraft carriers	1	10	20
Cruisers ...	5	10	38
Destroyers ...	8	47	133
Submarines ...	-	41	129
Sloops, etc. ...	3	14	24

HARUNA MARU

*Nippon Yusen K.K.; 1922; Mitsubishi Zosen; 10,421 tons; 495 X62x 37; 1,615 n.h.p.; 16-5 knots; turbine engines. The liner *Haruna Maru* was wrecked in the area of Surga Bay on July 7th, 1942.*

HARUSAME

Japanese Navy, destroyer; 1902; Thornycroft; 365 tons; 9-75 max. draught; 6,000 i.h.p.; 31 knots; triple-expansion engines; one 12 pdr. gun, five 6 pdr., 2 T.T.

The destroyer *Harusame* was overwhelmed in a gale off Cape Shima and foundered on November 23rd, 1911. The destroyer carried a complement of 60, of whom 45 officers and ratings were drowned.

HARUSAME

Japanese Navy, destroyer; 1935; Maizuru; 1,368 tons; 335-5 x 31-7x9-2; 38,000 s.h.p.; 34 knots; turbine engines; Kanpon boilers; five 5 in. guns, 2 m.g., 8 T.T.

The destroyer *Harusame* was bombed and sunk N.W. of Manokwari, New Guinea, by U.S. Army aircraft on June 8th, 1944. Her normal complement was 180.

HARUSHIO MARU

1,989 tons.

The Japanese ship *Harushio Maru* struck a mine and sank on May 7th, 1945, off Karatsu, Japan.

HARUTA MARU

7925; F. Schichau; 1,515 tons; 261-7x40-1x15-6; triple-expansion engines.

The steamship *Haruta Maru* was formerly the Norwegian *Halldor*, seized by the Japanese in December, 1941. On January 21st, 1945, she was bombed and sunk by U.S. land-based aircraft about 50 miles S. of Hong Kong.

HARVEST

English & Co.; 1881; Irvine & Co.; 1,338 tons; 245x33-1x16; 130 h.p.; compound engines.

The British cargo ship *Harvest* was sunk in a collision with the s.s. *Regent*, 528 tons, off the mouth of the Tees on September 12th, 1889. She was on a voyage from Middlesbrough to Stettin carrying a cargo of pig-iron.

HARVESTER

British Navy, destroyer; 1940; British Isles; 1,340 tons; 323 x 33x8-5; 34,000 s.h.p.; 36 knots; turbine engines; 3-drum boilers; six 4 • 7 in. guns, 6 smaller, 8 T.T.

The destroyer *Harvester*, Cdr. A. A. Tait, D.S.O., was one of six such vessels building in Britain for Brazil at the outbreak of the Second World War which were taken over by the British Admiralty on completion. *Harvester* took part in the evacuation of the British army from Dunkirk when she carried nearly 12,000 men across the Channel in four days.

On March 11th, 1943, the ship was escorting a convoy in the North Atlantic in company with the Free French corvette *Aconit* and the Polish destroyer *Burza* when the German submarine *U-444* attempted a torpedo attack. *Harvester* rammed the submarine which passed beneath her and fouled her stern, remaining there for several minutes before swinging free. The *Aconit* rammed the *U-444* a second time and sank her. Another submarine, the *U-432*, discharged a torpedo at *Harvester*, which had been damaged and slowed down by her previous encounter. The *Aconit* again came to the rescue but too late to save *Harvester* which sank almost at once. The French ship depthcharged the *U-432*, forcing her to surface and then ramming her.

The number lost with *Harvester* was nine officers, including Cdr. Tait, and 136 ratings. A few survivors were picked up by the *Aconit*, as well as 25 officers and ratings from the two U-boats.

HARVEY MILLS

Mills & Creighton; 1876; Thomaston; 2,186 tons; 231-1x 43-1x29-8.

The wooden ship *Harvey Mills* had the reputation among deep-water sailors of being the most unfortunate ship sailing the Atlantic. She was a fine vessel and was considered to be one of the best to come out of American east coast yards. At her launch a man was killed, a bad omen in days when seamen were profoundly superstitious. On her maiden voyage, after loading a cargo of cotton at Port Royal, she caught fire and two men died from suffocation. In 1878 she was dismantled in a hurricane. Two years later off the English coast she ran down the barque *Eta*, which involved her in heavy damages. On her return voyage to America she was again dismantled and had to put back to port.

The *Harvey Mills* met with final disaster when she foundered in a gale off Cape Flattery, Washington State, on December 14th, 1886. Of her crew of 25 the captain and 21 others were drowned; the mate and two seamen being picked up by the barque *Majestic*.

HASLAND

Peter Rowe & Sons; 1881; W. Gray & Co.; 1,689 tons; 258-6X 34 • 6x 19 • 5; 172 n.h.p.; compound engines.

The British cargo ship *Hasland* foundered in the Gulf of Lyons on March 29th, 1911. She was on a voyage in ballast from Cette to Bona.

HASLINGDEN

F. Yeoman & Sons; 1895; W. Gray & Co.; 1,934 tons; 270-4X 37-1x 18-8; 169 n.h.p.; 8-5 knots; triple-expansion engines. The steamship *Haslingden* was torpedoed and sunk by a German submarine seven miles E. of Seaham Harbour on May 12th, 1918. The captain and ten of the crew were killed.

HASSHU MARU

Japanese Government; 1914; Werf voorh. Rijkee & Co.; 1,873 tons; 278-2x41-2x16-8; 280 n.h.p.; oilengines. The motorship *Hasshu Maru* was formerly the Dutch *Mijer*, seized by the Japanese at Sourabaya in March, 1942. She was torpedoed and sunk by the U.S. submarine *Tautog* on January 22nd, 1943, off Bonthain, Celebes.

HASSHU MARU

Chosen Yusen K.K.; 1890; Russell & Co.; 2,655 tons; 300-3x 41-2x19-6; 222 n.h.p.; triple-expansion engines.

The *Hasshu Maru* was formerly the British *Yin Ping*, seized by the Japanese in December, 1941. She was bombed and sunk by U.S. land-based aircraft on March 10th, 1944, N. of Tanahmera Bay, Dutch New Guinea.

HASTINGS

Waterman Steamship Corpn.; 1920; *Pensacola Shipbuilding Co.*; 5,401 tons; 400-7x54-2x30-2; 3,000 s.h.p.; 10 knots; turbine engines.

The American steamship *Hastings*, Capt. R. O. West, was in convoy in the North Atlantic on February 23rd, 1943, when she was torpedoed and sunk by a German submarine. Nine men were killed and five wounded. Capt. West was among the survivors.

HASTINGS COUNTY

Lorentz W. Hansens Red.; 1920; *W. Pickersgill & Sons*; 4,178 tons; 380-2x52-3x24-2; 330 n.h.p.; triple-expansion engines. The Norwegian steamship *Hastings County* was wrecked on June 13th, 1926, off Auskerry Light, Orkney Islands, while on a voyage from Hamburg to Montreal. The forward half of the ship broke off and sank.

HASTY

British Navy, destroyer; 1936; *Denny Bros.*; 1,340 tons; 323 X 33x8-5; 34,000 s.h.p.; 35.5 knots; turbine engines; four 4•7 in. guns, 7 smaller, 8 T. T.

The destroyer *Hasty* was one of the ships engaged in "Operation Vigorous" under Rear-Admiral Sir P. Vian. This was an attempt to take a convoy comprising nearly 50 ships from Alexandria to Malta. The date was June 15th, 1942.

An Italian fleet of two new battleships, four cruisers and 12 destroyers was at sea, and an attack by British aircraft from Malta damaged the heavy cruiser *Taranto*. She was later sunk by the British submarine *Umbra*. A hit was also scored on the battleship *Littorio*. The Italians, who were about 100 miles distant and not aware of the exact position of the convoy, turned away and made for their home base, leaving it to their aircraft to attack the British ships.

Hasty was hit by a torpedo, probably from the German torpedo boat S-55. She remained afloat for a time but had to be sunk later by ships in company. The light cruiser *Hermione*, 5,450 tons, the destroyer *Airedale* and the Australian destroyer *Nestor* were also lost, and the convoy was compelled to turn back to Alexandria.

HATAKAZE

Japanese Navy, destroyer; 1924; *Maizuru*; 1,270 tons; 320 X 30-7x9-6; 38,500 s.h.p.; 34 knots; turbine engines; Kanpon boilers; four 4-7 in. guns, 2 A.A.m.g., 6 T. T. The destroyer *Hatakaze* was bombed and sunk off Takao, Formosa, by U.S. naval aircraft on January 15th, 1945. The destroyer's normal complement was 148.

HATASU

Moss-Hutchison Line; 1921; *J. Blumer & Co.*; 3,198 tons; 352-7x50-4x21-9; 367 n.h.p.; 10 knots; triple-expansion engines.

The steamship *Hatasu*, Capt. W. J. Meek, was torpedoed and sunk by a German submarine 600 miles E. of Cape Race, on October 2nd, 1941. Thirty-four of her crew and six gunners were lost, seven survivors were picked up by a U.S. destroyer. The *Hatasu* was not in convoy at the time of the attack.

HATFIELD

E. Jenkins & Co.; 1882; *W. Gray & Co.*; 1,753 tons; 264-2X 36x19-6; 184 n.h.p.; 9 knots; compound engines. The s.s. *Hatfield* was sunk while assisting a disabled steamship in the North Sea. On Saturday, September 30th, 1911, the s.s. *Glasgow*, 1,068 tons, Capt. Turnbull, Rotterdam to Dundee with general cargo, was struck by a heavy sea which smashed her steering gear. At the time of the accident the steamship was 15 miles from the Galloper lightship, where she drifted about until the morning of October 1st when she was sighted by the s.s. *Hatfield*, Capt. Cox, Huelvato Rotterdam with ore. In response to the *Glasgow's* signals of distress the *Hatfield* endeavoured to get a hawser on board and take her in tow. This was a delicate operation in view of the gale and in manoeuvring for position the *Hatfield* came too close to the *Glasgow* and swung across her bows. At the same moment a heavy sea lifted the latter ship and flung her down upon the *Hatfield's* side, tearing a huge hole through which came a torrent of water which sank the steamship in seven minutes. Of the 19 men on board the *Hatfield* only one was saved.

Later in the day the *Glasgow* was taken in tow by the Clan liner, *Clan Macdonald*, and brought to Dover.

HATHOR

H. B. & A. Gourlay; 1894; *Palmers' Co.*; 2,828 tons; 315 X 43x19-7; 243 n.h.p.; triple-expansion engines. The British cargo ship *Hathor* was wrecked at Sepetuba Point, Sao Sebastiao, on March 24th, 1909, while on a voyage from Antwerp, via Rio de Janeiro, to Santos. She was carrying a general cargo.

HATIMURA

British India Steam Nav. Co.; 1918; *J. L. Thompson & Sons*; 6,690 tons; 412-5x55-5x34-4; 566 n.h.p.; triple-expansion engines.

The steamship *Hatimura*, on a voyage from New York to Manchester, was torpedoed and sunk by a German submarine on November 4th, 1942, about 500 miles S.E. of Cape Farewell. Five of her crew were lost.

HATSU MARU

Japanese Government; 1914; *Sunderland S.B. Co.*; 4,260 tons; 364 X 50-7 X 26-1; 344 n.h.p.; triple-expansion engines. The steamship *Hatsu Maru* was formerly the Philippine *Paz*, scuttled at Sourabaya in March, 1942, but raised and repaired by the Japanese. She was sunk by U.S. carrier based aircraft on November 13th, 1944, in Manila Bay.

HATSUHARU

Japanese Navy, destroyer; 1933; *Sasebo*; 1,368 tons; 337-7X 32-5x8-2; 37,000 s.h.p.; 34 knots; turbine engines; Kanpon boilers; five 5 in. guns, 2 m.g., 6 T. T.

The destroyer *Hatsuharu* was bombed and sunk in Manila Bay, Philippine Islands, by aircraft from carriers of the U.S. Third Fleet on November 13th, 1944.

The normal complement of the *Hatsuharu* was 180. For further details of the action see the destroyer *Akebono*.

HATSUKAZE

Japanese Navy, destroyer; 1939; *Kawasaki*; 2,000 tons; 364 x 35x11; 45,000 s.h.p.; 36 knots; turbine engines; Kanpon boilers; six 5 in. guns, 2 m.g., 8 T. T.

The destroyer *Hatsukaze* was sunk in action on the night of November 1st-2nd, 1943, in Empress Augusta Bay, Solomon Islands.

The *Hatsukaze* carried a complement of over 200.

For further details of the action see the cruiser *Sendai*.

HATSUSE

Japanese Navy, 1st class battleship; 1899; *Vickers Sons & Maxim*; 15,240 tons; 400x76x27; 14,700 i.h.p.; 19-11 knots; triple-expansion engines; four 12 in. guns, fourteen 6 in., twenty 12 pdr., eight 3 pdr., four 2½ pdr., 4 T. T.

The Japanese battleship *Hatsuse* was one of the largest and most modern vessels of that country's battle fleet. At the commencement of the Russo-Japanese War in February, 1904, she was the flagship of Rear-Admiral Nashiba, commanding the 2nd sub-division of the 1st Division. The Japanese had six battleships at this time against the Russians 14, seven of which were at Port Arthur and seven in the Baltic.

On the night of the 12th-13th April the Japanese sowed mines in the channels running into Port Arthur, and on the morning of the 13th Admiral Makharoff's flagship *Petropavlovsk* (which see) was blown up. This was a terrible loss to the Russian navy, as the Admiral was one of the outstanding naval officers of the day. In addition the Russians sustained a further loss in the mining and disablement of the battleship *Pobieda*. The operations on this day demonstrated the tremendous power of the floating mine, and the bitter lesson was not forgotten by the Russians, who forthwith concentrated on counter mining.

Among the Port Arthur fleet was a mine-laying ship, the *Amur*, commanded by Capt. Ivanoff. This officer carefully observed the operations of the Japanese ships, noting that squadrons pursued fixed courses when on patrol off the fortress. On May 14th, when visibility was bad he slipped out to sea and sowed his mines in open water.

At about 10 o'clock on the morning of the 15th the battleships *Hatsuse*, *Yashima* and *Shikishima*, under command of Rear-Admiral

Nashiba, came in sight of the lookouts at Port Arthur. A few minutes later there was a loud explosion on the *Hatsuse*, damaging her steering gear and causing her to become unmanageable. She was taken in tow but struck another mine, and, with a series of loud explosions similar to those which distinguished the destruction of the *Petropavlovsk*, she blew up. At the same time a second ship was seen by the Russians to be in difficulties, but the squadron was too far out for happenings to be distinguished clearly. This vessel was the battleship *Yashima* (which see) which was subsequently abandoned off Encounter Rock, where she sank with little loss of life.

Meanwhile the *Hatsuse* had gone down in one and a half minutes, taking with her about two-thirds of her crew of 741, Admiral Nashiba and some 200 officers and men being picked up by boats from the other ships. The Admiral then transferred his flag to the gunboat *Tatsuta*, but when off the Elliot Islands on her return to the main fleet, this ship ran aground in a thick fog. Further along the coast, the light cruiser *Yoshino* (which see) was sunk by collision with the armoured cruiser *Kasuga*. Altogether two battleships, a light cruiser and a gunboat had been lost without any damage being inflicted on the enemy. The gunboat was refloated a month later.

The full extent of the disaster was concealed from the world until the end of the war, when the loss of the *Yashima* was made known.

In dealing with this occurrence the Russians manifested a surprising lack of foresight. Although Admiral Vitgeft, who had succeeded the energetic Makharoff, was aware that the minefield would very likely entrap some of the Japanese ships, he made no preparations to exploit any success which might be gained. The weather was quite clear on the morning of the 15th and every advantage lay with him, despite which only one battleship, the *Poltava*, had steam raised, the others lying idly at anchor. Vitgeft ordered this ship to remain in harbour as he was afraid of Japanese mines, but sent out two flotillas of destroyers to harass, but not attack, the damaged battleship. By the time these arrived the Japanese light cruisers were on the scene and the commander of the destroyers judged it prudent to withdraw. In this tame fashion passed what was probably the greatest opportunity for offensive sea action afforded to the Russians throughout the war.

HATSUSHIMO

Japanese Navy, destroyer; 1933; Uraga; 1,368 tons; 337-7x 32-5x8-7; 37,000 s.h.p.; 34 knots; turbine engines; Kanpon boilers; five 5 in. guns, 2 m.g., 6 T.T.

The destroyer *Hatsushimo* was sunk by mines laid by U.S. Army aircraft in Miyazu Bay, near Maizuru, on July 30th, 1945. The destroyer's complement was 180.

HATSUTAKA

Japanese Navy, minelayer; 1939; Harima; 2,000 tons; 320X—X—; 20 knots.

The minelayer *Hatsutaka* was torpedoed and sunk by the U.S. submarine *Hawkbill* north-east of Pekan on the east coast of Malaya on May 16th, 1945. The vessel carried a complement of over 200.

HATSUYUKI

Japanese Navy, destroyer; 1927; Maizuru; 1,700 tons; 371-5x 33-7x9-7; 40,000 s.h.p.; 34 knots; turbine engines; Kanpon boilers; four 5 in. guns, four A.A.m.g., 9 T.T. The destroyer *Hatsuyuki* was bombed and sunk in an attack by U.S. Army, navy and marine corps bombers on anchorages at the southern end of Bougainville in the Solomons Group. The attack took place on July 17th, 1943, but although great damage was done to shipping the *Hatsuyuki* was the only vessel sunk.

The destroyer's normal complement was 197.

HATSUZUKI

Japanese Navy, destroyer; 1942; Japan; 2,500 tons; 435 x 38 X—; 34 knots; turbine engines; eight 5 in. guns, several smaller, 4 T.T.

The destroyer *Hatsuzuki* was sunk about 250 miles off the island of Luzon in the Philippines by Allied surface craft on October 25th, 1944.

The destroyer carried a complement of over 200.

HATTERAS

United States Navy, steam gunboat; 1850 (circa); U.S. Yard; 1,126 tons; 210 x34x 18; condensing beam engine; four 32 pdr. guns, one 20 pdr. rifled gun.

The United States gunboat *Hatteras*, Lt. H. C. Blake, was a paddle steamer with auxiliary sail. She had a complement of 18 officers and 108 men. At the outbreak of the American Civil War a 20 pdr. rifled cannon was added to her armament of four smooth bore weapons. Her engines were of an old fashioned type, and she had only one boiler. Her speed under steam was moderate for those days.

On January 6th, 1863, when off Galveston, Texas, she stopped a steamship which she took to be a British blockade runner. This vessel was the afterwards famous Confederate cruiser *Alabama*, of 1,040 tons, one 100 pdr. gun, one 68 pdr. six 32 pdrs. and 13-5 knots speed. She was fresh from Lairds yard at Birkenhead and was one of the most formidable fighting ships of her day. Against such an antagonist the *Hatteras* had little chance.

The *Alabama* waited until the boat sent by the *Hatteras* was on her way, and then opened fire with every gun that would bear. The gunboat was heavily damaged and sank with the loss of two men killed and five wounded. The survivors were picked up by the *Alabama* and taken to Port Royal, Jamaica, where they were released under parole. The six men in the boat made their escape. Owing to the great disparity between the ships and their nearness to each other the action terminated in a very short time.

This was the only occasion that the *Alabama* engaged a U.S. warship during her career of commerce raiding until she was sunk off Cherbourg by the U.S. sloop-of-war *Kearsage* in June, 1864.

See also *Alabama*.

HAUGARLAND

Skibs A/S Corona; 1911; Armstrong, Whitworth & Co.; 6,049 tons; 440x58-1x24-6; 447 n.h.p.; triple-expansion engines. The Norwegian steamship *Haugarland*, under German control, struck a mine and sank on June 11th, 1942, off Terschelling.

HAUGASTOL

Fearnley & Eger; 1896; J. Priestman & Co.; 2,118 tons; 280x 40-1x17; 210 n.h.p.; triple-expansion engines. The Norwegian cargo ship *Haugastol* was torpedoed and sunk by a German submarine in the English Channel on November 29th, 1917.

HAULERWIJK

N.V. Stoomvaart Maats. "Oisterwijk"; 1924; Clyde S.B. & E. Co.; 3,278 tons; 325x48-2x23-7; 307 n.h.p.; triple-expansion engines.

The Dutch steamship *Haulerwijk* was torpedoed and sunk by a German submarine on September 30th, 1940, on a voyage from Newport to Tampa.

HAUSSA

Elder, Dempster & Co.; 1901; J. Jones & Sons; 1,477 tons; 219-8x36-1x13-2; 121 n.h.p.; compound engines. The British cargo ship *Hausa* was wrecked on June 15th, 1903, off Garraway, Liberia, while on a voyage from Lagos to Hamburg carrying a cargo of palm kernels.

HAV

Thv. Halvorsen; 1877; W. Pearse & Co.; 1,254 tons; 244X 32x18-2; 135 n.h.p.; compound engines.

The Norwegian steamship *Hav* went ashore on December 13th, 1921, at Halsebaen Sildegabet and turned over. The ship was sailing from Blyth to Trondhjem with coal.

HAVANA MARU

Osaka Shosen K.K.; 1920; Osaka Iron Works; 5,652 tons; 407-2x50-8x30; 559 n.h.p.; triple-expansion engines. The steamship *Havana Maru* was bombed and sunk by U.S. land-based aircraft on November 18th, 1942, S.E. of Ponape, Caroline Islands.

HAVANT

British Navy, destroyer; 1939; J. S. White & Co.; 1,375 tons; 323x33x8-5; 34,000 s.h.p.; 35-5 knots; turbine engines; 3-drum boilers; four 4 • 7 In. guns, 8 T. T.

The destroyer *Havant*, Lt. Cdr. Bumell-Nugent, was one of a group of six building for Brazil at the outbreak of the Second World War, which were taken over by the British Admiralty on completion. *Havant* took part in the evacuation of the British Army from Dunkirk, May 28th-June 1st, 1940, and on the last day was bombed and sunk by German aircraft. Her official complement was 145, but it is not known what number of troops and crew were on board when she sank.

The full story of the Dunkirk Evacuation is told under the destroyer *Grafton*.

HAVBOR

A/S Havbor; 1930; Swan, Hunter & Wigham Richardson; 7,614 tons; 460-5x59-5x34-1; 1,010n.h.p.; oilengines. The Norwegian tanker Havbor was torpedoed and sunk by a German submarine on November 14th, 1940, on a voyage from Table Bay to Freetown. Twenty-nine of her crew were killed.

HAVBORG

Lykkes Rederi A/S; 1924; A/S Rodby Havns Jernsk.; 1,234 tons; 236'9x37-2x14-8; 96n.h.p.; triple-expansion engines. The Norwegian steamship Havborg, under German control, was bombed and sunk by British aircraft on November 27th, 1940, in the River Weser.

HAVBRIS

Albert Harlo JTs Rederi; 1919; Stavanger Stoberi & Dok.; 1,315 tons; 242-3x37-2x16; 132 n.h.p.; triple-expansion engines. Sailing from Norway to Hamburg, the Norwegian ship Havbris was reported to have sunk off Songvar during a heavy storm on January 27th, 1945.

HAVMANN

A/S Havbor (P. Meyer); 1937; Nylands Verksted; 1,342 tons; 250-9x41-3x14-8; 107n.h.p.; compound engines & L.P. turbine.

The Norwegian ship *Havmann* left Rotterdam on September 17th, 1938, for Charlottetown, P.E.I., and was in wireless communication on the 21st when she was W. of Ireland. There was no further news and she is believed to have been lost during a hurricane. A lifeboat and lifebuoys were picked up.

HAVMOY

A/S Havtor (P. Meyer); 1934; Langesands Mek. Verksted; 1,546 tons; 248-3x38-6x18-2; 109 n.h.p.; compound engines & L.P. turbine.

The Norwegian steamship *Havmoy*, Capt. Albert Knutsen, left the Black River, Jamaica, for Havre with a cargo of logwood, but foundered in a gale at 2 a.m. on April 9th, 1935, when she was 20-30 miles off the S. coast of Jamaica. Captain Knutsen, the second engineer and 5 others got away on a raft, and 11 men were lost with the ship. The raft with 5 men was picked up two days later, the two officers having died of exposure.

HAVNA

M. H. Lindvig; 1908; Bergens Mek. Verks.; 1,150 tons; 228-4x36-2x15-9; 106n.h.p.; triple-expansion engines. The Norwegian cargo ship Havna was torpedoed and sunk by a German submarine in St. George's Channel on March 2nd, 1918.

HAVOCK

British Navy, destroyer; 1936; W. Denny & Bros.; 1,335 tons; 323x33x8-5; 34,000 s.h.p.; 36knots; turbine engines; 3-drum boilers; four 4 • 7 in. guns, 6 smaller, 8 T. T.

The destroyer *Havock* had a very distinguished career in the Second World War, taking part in the first battle of Narvik on April 10th, 1940, and also the battle of Cape Matapan on March 27th, 1941. She sustained severe damage when escorting a convoy to Malta under Rear-Admiral Vian, and had to undergo considerable repairs.

On April 6th, 1942, the destroyer was bound for Gibraltar with a large number of officers and ratings as passengers, in addition to

her official complement of 145. She ran ashore off Kelibia, on the coast of Tunisia, and became a total wreck, but only one rating of her entire company lost his life.

The French authorities, who were not friendly to the British at the time, placed all the survivors in a prison camp at Laghouat, in Algeria. They were released when General Eisenhower's forces landed in North Africa in November, 1942.

HAVRE

Anglo-Saxon Petroleum Co.; 1905; W. Gray & Co.; 2,073 tons; 288x39x22-4; 1,200i.h.p.; 9 knots; triple-expansion engines. The tanker Havre, Capt. G. C. Pearson, was torpedoed and sunk by an enemy submarine between Alexandria and Matruh on June 10th, 1942. Twenty-five men, including Capt. Pearson, were killed.

HAVRE MARU

*Osaka Shosen K.K.; 1920; Osaka Iron Works; 5,652 tons; 407-2x50-8x30; 559n.h.p.; triple-expansion engines. The steamship Havre Maru was torpedoed and sunk by the U.S. submarine *Pintado* on June 6th, 1944, about 200 miles W. of the Ladrone Islands.*

HAVTOR

A/S Havtor (P. Meyer); 1930; Porsgrund Mek. Verksted; 1,524 tons; 245-7x37-9x18-3; 66n.h.p.; compound engines. The Norwegian steamship Havtor was torpedoed and sunk by a German submarine on June 11th, 1941, on a voyage from Reykjavik to Pictou, N.S. Six of her crew were lost.

HAWAII MARU

*Osaka Shosen K.K.; 1915; Kawasaki Dockyard Co.; 9,467 tons; 475x61x38-1; 895 n.h.p.; triple-expansion engines. The steamship Hawaii Maru was torpedoed and sunk by the U.S. submarine *Sea Devil*, Cdr. R. E. Styles, U.S.N., on December 2nd, 1944, about 150 miles S.W. of Kagoshima, Japan.*

HAWKE

*British Navy, protected cruiser; 1893; Chatham Dockyard; 7,350 tons; 360x60x23-7; 12,000 i.h.p.; 20-2 knots; triple-expansion engines; two 9-2 in. guns, ten 6 in., 2m.g., 2 T.T. The protected cruiser Hawke, Capt. H. P. E. T. Williams, was, at the commencement of the First World War a unit of the 10th Cruiser Squadron, commanded by Rear-Admiral D.R. S. de Chair. The ship was over 20 years old, as were her five consorts, the *Crescent*, flagship, *Edgar*, *Endymion*, *Grafton* and *Theseus*. The duty of the squadron was to maintain the Northern Patrol, which had been established to control the trade route of Germany north-about. The old ships had drawn their complements partly from the Royal Naval Reserve, and, while useful as a cruiser screen and a blockading force were not of great fighting value.*

On October 15th, when the 10th Cruiser Squadron had been detached from the Northern Patrol and was stationed off the N.E. coast, the ships, less the flagship, which had put in to Cromarty to coal, were steaming line abreast at ten mile intervals with *Endymion* to starboard and *Hawke* next. At 9.30 a.m. both ships stopped while a boat from *Hawke* went to *Endymion* to collect mail. This action bore a fatal resemblance to the circumstances attending the loss of the armoured cruisers *Aboukir*, *Cressy* and *Hogue* (which see) off the Dutch coast about a month before. There can be no doubt but that the stopping of the two cruisers gave a lurking submarine its opportunity, for at 10.30 a.m., when *Hawke* was again under steam and proceeding at about 12 knots to regain her station, she was hit by a torpedo abreast the foremost funnel. She listed immediately and sank within a few minutes, there being only sufficient time to launch two boats, one of which, containing three officers and 46 men, was picked up by a Norwegian steamship. The other was never heard of again. *Endymion* had in the meantime steamed out of sight on her task of delivering mails to the other ships.

Hawke did not send out any distress signals and the first intimation that submarines were about was at 1.20 p.m., when *Theseus* reported an attack. This information was received by *Edgar*, senior ship, which ordered the squadron to steam N.W. at full speed. To this message *Hawke* made no reply so the flotilla leader *Swift* was despatched to make a search and after some hours reported picking up a raft from *Hawke* with one officer and 20 men.

HAWKINGE

The total loss of life in this disaster was nearly 500 officers and men, including Capt. Williams. The survivors numbered four officers and 66 men.

HAWKINGE

Constants (South Wales); 1922; Irvines" S.B. & D.D. Co.; 2,743 tons; 326 X 45x20- 7; 292 n.h.p.; triple-expansion engines. The British cargo ship *Hawkinge* was wrecked near Finisterre on December 12th, 1929, while on a voyage in ballast from London to Bilbao.

HAWKINGE

Constants (South Wales); 1924; Burnisland Shipbuilding Co.; 2,475 tons; 298-5x44x21-2; 251 n.h.p.; 10 knots; triple-expansion engines. The steamship *Hawkinge*, Capt. W. Isaksson, was torpedoed and sunk by a German submarine on July 27th, 1941, about 500 miles N.W. of Corunna. Fifteen of her crew were killed. Capt. Isaksson was among the survivors.

HAWNBV

R.Ropner&Co.; 1895; Ropner&Son; 2,136 tons; 280x40x 15-6; 187 n.h.p.; triple-expansion engines. The British cargo ship *Hawnby* was wrecked at Johnshaven, near Montrose, on September 10th, 1914. She was on a voyage from Hull to Archangel carrying a cargo of coal.

HAXBY

Ropner Shipping Co.; 1929; W. Gray & Co.; 5,207 tons; 421-2 x 54-2 x 27-2; 529 n.h.p.; 11 knots; triple-expansion engines. The steamship *Haxby* left the Clyde on April 8th, 1940, in ballast for Corpus Christi in convoy. On April 17th, she left the convoy in the latitude of St. Vincent, C.V., and on the 24th she was intercepted and sunk by a German raider. Two officers and 14 men were killed and the captain and 23 of the crew taken prisoner. On September 3rd of the same year the prisoners were rescued from the *Tropic Sea* (which see).

HAYAHIMARU

Daido Kaiun K.K.; 6,919 tons. The Japanese ship *Hayahi Maru* struck a mine and sank on July 13th, 1945, off Shimonoseki.

HAYANAMI

Japanese Navy, destroyer; 1941; Japan; 2,200 tons; 415x35x —; 34 knots; turbine engines; six 5 in. guns, eight 25 mm.A.A., 15 T.T. The destroyer *Hayanami* was torpedoed and sunk S.E. of Sibutu Passage, Philippine Islands, by U.S. submarine *Harder* on June 7th, 1944. The destroyer carried a complement of over 200.

HAYASHIMO

Japanese Navy, destroyer; 1942; Japan; 2,200 tons; 415x35x —; 34 knots; turbine engines; six 5 in. guns, eight 25 mm.A.A., 15 T.T. The destroyer *Hayashimo* was bombed and sunk S.E. of Mindoro on October 26th, 1944, during the battle of Leyte Gulf, October 23rd-27th, 1944.

She had a complement of over 200.
The full story of the battle of Leyte Gulf is told under the battle ship *Musashi*.

HAYASHIO

Japanese Navy, destroyer; 1939; Uraga; 2,000 tons; 364 x 35x11; 45,000 s.h.p.; 36 knots; turbine engines; Kanpon boilers; six 5 in. guns, 2 m.g.; 8 T.T. The destroyer *Hayashio* was bombed and sunk by U.S. Army aircraft in Huon Gulf, New Guinea, on November 24th, 1942. The destroyer carried a complement of over 200.

HAYASUI

6,500 tons (approx.). The tanker *Hayasui* was torpedoed and sunk by the U.S. submarine *Bluefish* on August 19th, 1944, about 100 miles W. of San Fernando, Luzon Islands, Philippines.

HAYATE

Japanese Navy, destroyer; 1925; Isikawazima; 1,270 tons; 320x30x9-6; 38,500 s.h.p.; 34 knots; turbine engines; Kanpon boilers; four 4-7 in. guns, 2 A.A.m.g., 6 T.T. The destroyers *Hayate* and *Kisagari* were part of a force detailed for the capture of the American base on the island of Wake. The attack followed immediately upon the Japanese air raid on Pearl Harbour and on December 11th, 1941, when engaged with the shore batteries defending Wake Island, both destroyers were hit and sunk. The normal complements of the vessels were 148 and 150 respectively.
See also *Kisagari*.

HAYATORI

Japanese Navy, destroyer; 1903; Yokosuka Dockyard; 375 tons; 220x20-5x9-5; 6,000 i.h.p.; 29 knots; triple-expansion engines; two 12pdr., four 6pdr., 2 T.T. The destroyer *Hayatori* was a unit of the 4th flotilla which participated in the attacks on the Russian Pacific Squadron at Port Arthur in February 1904, at the commencement of the Russo-Japanese War. For many months she formed one of the blockading fleet outside the fortress. On September 3rd, 1904, she struck a floating mine and sank with the loss of two officers and 18 men killed and eight severely wounded, out of a complement of 63.

HAYOMARU

Toyo Kisen K.K.; 1921; Asano S.B. Co.; 5,446 tons; 400X 53-2x29-4; 513 n.h.p.; triple-expansion engines. The Japanese steamship *Hayv Maru* was in company with the 3rd Gunboat Division in the Lingayen Gulf, Philippine Islands, on December 22nd, 1941, when she was torpedoed and sunk by the U.S. submarine *S-38 Lt W. G. Chappie, U.S.N.* The gulf was very shallow and unsuited to submarine operations, nevertheless the American submarine brought off a most difficult attack, and made her escape despite heavy depth charges in shoal water.

HAZARD

British Navy, torpedo-gunboat; 1894; Great Britain; 1,070 tons; 250x30-5x13; 3,500 i.h.p.; 18-5 knots; triple-expansion engines; two 4-7 in. guns, four 6pdr., 5 T.T. The torpedo-gunboat *Hazard* was sunk in a collision off Portland Bill on January 28th, 1918. The vessel carried an official complement of 120.

HAZEL BRANCH

F. & W. Ritson; 1889; Bartram, Haswell & Co.; 2,623 tons; 300x40x26-8; 245 n.h.p.; triple-expansion engines. The British cargo ship *Hazel Branch* was wrecked in Smyth Channel, Chile, on November 12th, 1907. She was on a voyage from the west coast of South America to Liverpool carrying a cargo which included copper ore.

HAZELDENE

Isaac Crocker; 1881; Palmers'Co.; 2,204 tons; 292x37-2x 23-6; ^227 n.h.p.; compound engines. The British cargo ship *Hazeldene* was wrecked on Cannon Rock, Co. Down, on December 26th, 1906, while on a voyage from Aguilas to the Clyde carrying an iron ore cargo.

HAZELSIDE

Charlton S.S. Co.; 1928; Short Bros.; 4,646 tons; 395 X 52-7 X 25-9; 388 n.h.p.; triple-expansion engines. The British steamship *Hazelside*, on a voyage from Tacoma to Liverpool, was torpedoed and sunk by a German submarine on September 24th, 1939, 12 miles off the Fastnet. Eleven of her crew were killed.

HAZELWOOD

Gascony S.S. Co.; 1894; Ropner&Son; 3,120 tons; 325 X 48x23-1; 273 n.h.p.; 9 knots; triple-expansion engines. The steamship *Hazelwood* was torpedoed and sunk by a German submarine eight miles S. by E. i E. of Anvil Point on October 18th, 1917. Thirty-two men, including the captain, were killed.

HEALDTON

Standard Oil Co. (New Jersey); 1908; Greenock & Grange-mouth Dkyd. Co.; 4,489 tons; 369x50-9x27-3; 472 n.h.p.; triple-expansion engines.

The American tanker *Healdton* was torpedoed and sunk by a German submarine in the North Sea on March 21st, 1917.

HEATHCOTE

Dominion Shipping Co.; 1898; J. Priestman & Co.; 2,345 tons; 300x42-5x20-2; 210 n.h.p.; triple-expansion engines. The Canadian cargo ship *Heathcote* sank after a collision in Cabot Strait on July 25th, 1917, while on a voyage from Port au Port, NFL, to Sydney, N.S.

HEATHERSIDE

Charlton Steam Shipping Co.; 1909; Short Bros.; 2,167 tons; 313x47x21-2; 269 n.h.p.; 9-5 knots; triple-expansion engines. The steamship *Heather side* was on a voyage from Milford Haven to Malta with a cargo of coal when she was torpedoed and sunk by the German submarine *U-93* in the Atlantic, on August 25th, 1917. Twenty-seven men, including the captain, were killed.

HEATHFIELD

Eastern Navigation Co.; 1887; E. Withy & Co.; 2,140 tons; 283-3x37x19-1; 210 n.h.p.; 9 knots; triple-expansion engines. The steamship *Heathfield* left Blyth for Savona on October 12th, 1910, with a cargo of coal. She was commanded by Capt. William McPhee and carried a crew of 22. The weather increased to almost hurricane force during the night and by next morning, the 13th, the ship was in difficulties off Sheringham. The second officer, Mr. T. H. Mowat, was on the bridge when the *Heathfield* struck on the Sheringham Shoal, four to five miles from shore. The captain, who was below at the time, came on deck and decided to send a boat to obtain assistance. The second officer and the boatswain made the attempt and ultimately the boat reached the shore, but by that time the *Heathfield* had disappeared.

Next day the masts and funnel of the ship were visible above water and several bodies were seen lashed to the rigging. The total loss of life was 16, including Capt. McPhee.

HEATHPOOL

Beckingham & Co.; 1906; Furness, Withy & Co.; 3,828 tons; 340x47-1x27-4; 317 n.h.p.; triple-expansion engines. The British cargo ship *Heathpool* struck the Outer Dowsing, off the River Humber, and sank on December 10th, 1906, while on a voyage from Hull to the River Plate. She was carrying a cargo of coal. All on board were lost.

HEBBLE

Lancashire and Yorkshire Railway Co.; 1891; W. Dobson & Co.; 904 tons; 225x31-6x15-5; 181 n.h.p.; 12 knots; triple-expansion engines.

The steamship *Hebble* was mined and sunk one and a half miles E. of Roker Pier, Sunderland, on May 6th, 1917, while on Admiralty service. Five of her crew were killed. The captain was among the survivors.

HEBBURN

Burnett Steamship Co.; 1908; Wood, Skinner & Co.; 1,938 tons; 272x40x17-8; 200 n.h.p.; 9-5 knots; triple-expansion engines. The steamship *Hebburn* was torpedoed and sunk by a German submarine 64 miles W.N.W. of the Smalls on September 25th, 1918. Six of her crew were killed. The captain was among the survivors.

HEBE

G. Lamy & Co.; 1909; Sunderland S.B. Co.; 1,494 tons; 257x35x16; 169 n.h.p.; triple-expansion engines. The French steamship *Hebe* struck a mine and sank in the North Sea on March 26th, 1916.

HEBE

British Navy, fleet minesweeper; 1936; Devonport Dockyard; 835 tons; 230x33-5x7-9; 1,750 i.h.p.; 17 knots; turbine engines; 3-drum boilers: two 4 in. A.A. guns, 3 smaller. The fleet minesweeper *Hebe*, Lt. A. L. Gulvin, was mined and sunk

off Bari on November 22nd, 1943. The vessel's normal complement was 80.

HECLA

British Navy, depot ship; 1940; J. Brown & Co.; 11,000 tons; 623X — X-; 7,500 s.h.p.; 17 knots; turbine engines; 3-drum boilers; eight 4-5 in. guns.

The depot ship *Hecla* took part in the North African landings and was torpedoed by a German submarine W. of the Straits of Gibraltar on November 11th, 1942. She sank with the loss of 13 officers and 266 ratings.

HECTOR

A. Holt & Co.; 1924; Scotfs S.B. Co.; 11,198 tons; 498-Sx62-3x34-9; 15 knots; turbine engines; 6 in. guns. The British liner *Hector* had been in service for more than 15 years when she was taken over for service as an auxiliary cruiser in the Second World War. The vessel was lying in Colombo harbour on April 5th, 1942, when the town was attacked by a strong force of Japanese aircraft from aircraft carriers. The *Hector* was hit several times and sank during the morning.

HECTOR

Koninklijke Nederlandsche Stoomb. Maats.; 1939; N.V. Scheepswerf Gebr. Pot; 1,828 tons; 292-5x41-1x14-9; 338 n.h.p.; oil engines.

The Dutch motorship *Hector* was torpedoed and sunk by a German submarine on May 24th, 1942, between Hampton Roads and Curacao.

HEDDERNHEIM

Unterweser Reed. A.G.; 1921; F. Schichau; 4,947 tons; 361X51-4x31-4; 323 n.h.p.; compound engines & L.P. turbine. The German steamship *Heddernheim* was torpedoed and sunk by the British submarine *Ursula* on March 21st, 1940, nine miles N.N.E. of the Skaw on a voyage from Narvik to Germany with iron ore.

HEDIA

Compania Naviera General, S.A.; 1915; Craig, Taylor & Co.; 2,434 tons; 295-3x45-2x —; triple-expansion engines. Leaving Casablanca for Venice on March 10th, 1962, the Liberian steamship *Hedia* reported "all well" by radio on the 14th, from the neighbourhood of Galita Island. She was not seen again but wreckage was found 12 days later. The *Hedia* had a crew of 20.

HEDRUN

Stockholms Rederi-AjB Svea; 1920; A/B Oresundsvaret; 2,325 tons; 317-5x44-9x19-4; 252 n.h.p.; turbine engines. The Swedish steamship *Hedrun* was torpedoed and sunk by a German submarine on August 16th, 1940, on a voyage from Swansea to Newport, Rhode Island.

HEEMSKERK

Vereenigde Nederlandsche Scheepvaart Maats.; 1919; Neptunwerf; 6,516 tons; 438x57-2x30-2; 482 n.h.p.; quadruple-expansion engines.

The Dutch steamship *Heemskerk* was bombed and sunk by German aircraft on January 20th, 1941, about 220 miles W. of Ireland, on a voyage from Rangoon to Liverpool. Eight of her crew were lost.

HEENVLIET

Nationale Stoomv. Maats.; 1917; Arnheemsche Stoom-Sleephelling; 492 tons; 151-5x25-2x11-5; 58n.h.p.; triple-expansion engines.

The Dutch steamship *Heenvliet* was intercepted by a German submarine and sunk by gunfire on February 28th, 1918. The attack took place 15 miles S.W. of the Swartebank lightship, the steamship going down with seven of her crew.

HEFFRON

Weyerhaeuser S.S. Co.; 1919; Bethlehem S.B. Corp.; 7,611 tons; 440X56x35-2; 598 n.h.p.; triple-expansion engines. The American steamship *Heffron*, in convoy from Murmansk to the U.S.A., struck a mine and sank on July 5th, 1942, off Reykjavik. Four other ships in the convoy were sunk in the same minefield.

HEIAN MARU

HEIAN MARU

Kasahara Shoji K.K.; 1890; *C. Cornell & Co.*; 2,963 tons; 329'2x41-3x28-3; 265 n.h.p.; triple-expansion engines. The steamship *Heian Mam* went ashore on February 11th, 1926, at Cape Soyedomari, Hokkaido, while on a voyage from Otaru to Muroran, and became a total loss.

HEIAN MARU

Nippon Yusen K.K.; 1930; *Osaka Iron Works*; 11,616 tons; 511-6x66x41; 2,190 n.h.p.; 18-5 knots; oil engines. The liner *Heian Maru* was taken over by the Japanese Navy and converted into a submarine tender. On February 17th, 1944, she was sunk by U.S. carrier-based aircraft at Truk in the Caroline Islands.

HEIAN MARU

Amakasu Sangyo K.K.; 1921; *Prince Rupert D.D. & E. Co.*; 5,346 tons; 400X52x28-5; 369 n.h.p.; triple-expansion engines. The steamship *Heian Maru* was sunk by U.S. carrier-based aircraft on November 13th, 1944, in Manila Bay.

HEIJO MARU

Chosen Yusen K.K.; 2,627 tons. The steamship *Heijo Maru* was taken over by the Japanese Navy and converted into an auxiliary gunboat. On September 4th, 1943, she was torpedoed and sunk by the U.S. submarine *Albacore*, 150 miles S.W. of Seniavina Island, Caroline Islands.

HEIKEI MARU

Chosen Yusen K.K.; 2,750 tons. The Japanese ship *Heikei Maru* was bombed and sunk by U.S. land-based aircraft on April 3rd, 1945, off Hong Kong.

HEIM

T. H. Skogland; 1882; *W. Gray & Co.*; 1,669 tons; 259-5X 34-5x19-5; 173 n.h.p.; compound engines. The Norwegian cargo ship *Heim* was sunk by a submarine on April 18th, 1917. The position of the ship at the time was unknown.

HEIMARA

Greek Government; 1905; *Stettiner Oderwerke*; 1,427 tons; 250-3x33-9x13-4; triple-expansion engines. The Greek steamship *Heimara*, on a voyage from Thessaloniki to Piraeus with a crew of 80 and 524 passengers, including 150 soldiers and 45 political prisoners, struck a mine and sunk on January 19th, 1947, off Gaidaros Island, Marathon Bay. Ships going to the rescue picked up 226 persons, but 378 were lost.

HEIMDAL

Seereederei Frigga A.G.; 1921; *A/S Aalborg Maskin-og Skibs.*; 2,186 tons; 283x40-9x20-5; 155 n.h.p.; triple-expansion engines. The German steamship *Heimdal* struck a mine and sank on September 19th, 1940, off TerschelJing.

HEIMDAL

Nya Angf.-ALB Heimdal; 1928; *D. & W. Henderson & Co.*; 4,499 tons; 382-6x52-3x—; triple-expansion engines. The Swedish ship *Heimdal* sprang a leak and went aground during a fog on March 4th, 1957, at Stangskar Point, Landsort. She broke in two and the afterpart sank, and in a severe storm in September the forepart sank.

HEIMEI MARU

Tochigi Shoji K.K.; 1919; *Osaka Iron Works*; 4,364 tons; 345X49-8x28-2; 391 n.h.p.; triple-expansion engines. The steamship *Heimei Maru* was bombed and sunk by U.S. land-based aircraft on January 4th, 1944, off Kupang, Timor Island.

HEINA

A/S J. Ludwig Mowinckels Rederi; 1925; *Kjobenhavens Flydk. & Skibs.*; 4,028 tons; 229x35x15-2; 111 n.h.p.; triple-expansion engines. The Norwegian steamship *Heina* was torpedoed and sunk by a German submarine on February 10th, 1942, on a voyage from Halifax to Liverpool.

HEINRICH SCHULTE

AtlasRederei A.G.; 1918; *Harland & Wolff*; 5,056 tons; 399-3x 52-3x28-5; 517 n.h.p.; triple-expansion engines. The German steamship *Heinrich Schulte* was torpedoed and sunk by a British submarine on January 28th, 1944, off Tromsø.

HEINRICH V. RIEDEMANN

Panama Transport Co.; 1930; *Bremer Vulkan*; 11,020 tons; 521-1x70-2x38-8; 1,592 n.h.p.; oil engines. The Panamanian motor tanker *Heinrich v. Riedemann* was torpedoed and sunk by a German submarine on April 17th, 1942, between Trinidad and Aruba.

HEINRICH VON PLAUEIN

German Government; 1896; *S. P. Austin & Son*; 1,746 tons; 268-2x37-7x17; triple-expansion engines. The steamship *Heinrich von Plauen* was formerly the Estonian *Aarne*, seized by the Germans. On June 6th, 1943, on a voyage from Danzig to Riga with coal, she was torpedoed and sunk by a Russian aircraft.

HEISHIN MARU

Naniwa Risen K.K.; 1889; *J. Laing*; 3,020 tons; 340x41x 18'6; 292 n.h.p.; triple-expansion engines. Sailing from Hakata to Shimizu with a cargo of coal, the *Heishin Maru* was wrecked on January 1st, 1924, at Omayesaki lighthouse, Shizuoka Prefecture.

HEISHIN MARU

Osaka Shosen K.K.; 1,577 tons. The *Heishin Maru* was bombed and sunk by U.S. land-based aircraft on March 20th, 1945, off Swatow.

HEITO MARU

Osaka Shosen K.K.; 1935; *Mitsubishi Jukogyo K.K.*; 4,468 tons; 357x49-2x32-8; 500 n.h.p.; turbine engines. The steamship *Heito Maru* was bombed and sunk by U.S. land-based aircraft on August 23rd, 1943, off Car Nicobar, Nicobar Islands.

HEIWA MARU

Kai Shoten; 1890; *R. Duncan & Co.*; 1,993 tons; 269-9X 37-1x23-2; 196 n.h.p.; triple-expansion engines. Sailing from Ryojuin, Port Arthur to Tokuyama, the *Heiwa Maru* struck a rock and foundered at 4.30 a.m. on July 21st, 1932, off Mokpo, Korea.

HEIWA MARU

Mitsui Sempaku; 5,578 tons. The steamship *Heiwa Maru* was torpedoed and sunk by the U.S. submarine *Raton* on December 24th, 1943, N. of the Moluccas.

HEIYEN

Japanese Navy, armoured gunboat; 1887; *Fuchau*; 2,150 tons; 200x40x16; 1,200 i.h.p.; 11 knots; triple-expansion engines; one 26 cm. gun, four 4•7 in., two 3 pdr., six 2 pdr., two 1 pdr. The Japanese gunboat *Heiyen* was employed on guard duty between Reef and Iron Islands, in the neighbourhood of Port Arthur, during the Russo-Japanese War. On the night of September 17th the Russian destroyer *Skori* laid a minefield in the area which the *Heiyen* was patrolling. The weather was rough and on the next evening, when making for her base, the Japanese ship struck a mine, being holed amidships on the starboard side. The heavy seas prevented the launch of her boats and she sank in a very few minutes, taking with her 197 officers and men. The survivors were two officers and 11 men.

HEIYO MARU

Nippon Yusen K.K.; 1930; *Osaka Iron Works*; 9,815 tons; 460x60x40-5; 2,004 n.h.p.; oil engines. The motor vessel *Heiyo Maru* was torpedoed and sunk by the U.S. submarine *Whale* on January 17th, 1943, in the Marshall Islands.

HEIZAN MARU

Japanese Government; 1921; Kiangnan Dock & Engineering Works; 1,061 tons; 197-6x31x9-5; 98 n.h.p.; triple-expansion engines.

The steamship *Heizan Mam* was formerly the British *Wantung*, seized by the Japanese. On December 28th, 1943, she was bombed and sunk by U.S. land-based aircraft near Anking, Lower Yangtze River.

HEKLA

Faaberg & Jakobsson; 1907; Frederikstad Mek. Verksted; 1,215 tons; 225x33-7x20-3; 138 n.h.p.; triple-expansion engines.

The Icelandic steamship *Hekla* was torpedoed and sunk by a German submarine on June 29th, 1941, about 500 miles S.W. of Iceland. Fourteen of her crew of 20 were lost.

HEKTORIA

Hector Whaling; 1899; Harland & Wolff; 13,797 tons; 550-2X 63-3x32; 4,800 i.h.p.; 13-5 knots; quadruple-expansion engines.

The whale oil refinery ship *Hektoria*, bound from Liverpool to New York, was torpedoed and sunk by a German submarine in the North Atlantic on September 11th, 1942. Only one man was killed.

HELA

German Navy, light cruiser; 1895; Weser; 2,040 tons; 328X 36x15-7; 6,000 i.h.p.; 20-5 knots; triple-expansion engines; four 3-4 in. guns, six 6 pdr., 2 m.g., 3 T.T.

The light cruiser *Hela* was torpedoed and sunk by the British submarine *E-9*, Lt. Cdr. Max Horton, early on the morning of September 13th, 1914. The submarine, which had been lying submerged at a depth of 120 feet on a position some six miles S.S.W. of Heligoland, surfaced within two miles of the cruiser. Approaching to 600 yards without attracting attention she discharged two torpedoes, one of which was heard to explode as the submarine dived.

The *Hela* sank within an hour. She carried a complement of 178, many of whom were rescued by German trawlers.

HELEN MACGREGOR

Mississippi passenger steamer; 182-; U.S.A.; approx. 400 tons.

The paddle steamer *Helen Macgregor*, Capt. Tyson, was on her way from New Orleans to Louisville on Wednesday, February 24th, 1830. At about 8 a.m. she made fast to the landing stage at Memphis for her usual stop of from 30 to 45 minutes, during which time there was a considerable amount of activity connected with the departure and arrival of passengers and the disposal of cargo. The steamship was crowded with people, having some four to five hundred on board, including crew. As she cast off at about half-past eight her boiler exploded. No passenger list was available but it is estimated that nearly 60 persons were killed, many being blown overboard and drowned. Twenty-five persons were injured, more than half of them seriously.

One fortunate happening prevented a much heavier loss, as portions of the boiler were blown into the dining saloon where 60 people were seated at breakfast, but struck against a row of stout iron stanchions which resisted the impact.

Capt. Tyson was slightly injured but continued to supervise the efforts of those engaged in life-saving.

HELEN W. ALMY

H. Mohn; 1859; Fairhaven, U.S.A.; 315 tons; 116-4x29x12-5.

The American wooden barque *Helen W. Almy*, bound from San Francisco to the Klondyke, was seen by a passing ship to be floating upside down on March 22nd, 1898, off Point Bonita. Nothing was ever heard of her crew of 14 and 27 passengers.

HELENA

A. C. Lensen's Stoomv. Maats.; 1907; Craig, Taylor & Co.; 1,798 tons; 280x38-3x18-3; 167 n.h.p.; triple-expansion engines.

The Dutch steamship *Helena* struck a mine and sank in the North Sea on November 21st, 1916.

HELENA

United States Navy, cruiser; 1938; New York Navy Yard; 10,000 tons; 600x61-5x19-7; 100,000 s.h.p.; 32-5 knots; turbine engines; Babcock & Wilcox boilers; fifteen 6 in. guns, eight 5 in., 12 smaller, 4 aircraft.

The cruiser *Helena* was part of a task force of three cruisers and four destroyers under Rear-Admiral W. L. Ainsworth. Early on the morning of July 6th, 1943, this force intercepted two small groups of Japanese ships in the Kula Gulf, in the Solomon Islands. These vessels formed what was designated by the Americans the "Tokyo Express" because of the regularity with which they ran nightly through the Blackett Strait and Kula Gulf with troops and supplies for Vila. A brief but very sharp action ensued in which the Japanese suffered the loss of two destroyers, the *Nizuki*, 2,500 tons, and the *Nagatsuki*, 1,315 tons, out of a squadron estimated at four cruisers and six destroyers. The *Helena* was credited with sinking both the enemy ships, but she was hit by three torpedoes, one of which blew away her bow, and she sank. Of her complement, 675 were taken off by ships in company and ten days later about 100 were rescued from the island of Vella Lovella by destroyers. The Americans sustained no damage to their other ships.

The action was known as the first battle of Kula Gulf.

The *Helena* was one of the cruisers damaged by the Japanese in their air raid on Pearl Harbour in December, 1941. Up to the time of her loss the ship had fought in a dozen actions and had fired more shells than any other warship in American naval history.

For the second battle of Kula Gulf, also a night action, fought on the 13th, see the Japanese cruiser *Jintsu*.

HELENA FAULBAUMS

Max Faulbaums; 1920; Grangemouth Dockyard Co.; 1,951 tons; 280-1x41-9x18-9; 230 n.h.p.; triple-expansion engines. Sailing from Liverpool to Blyth the Latvian ship *Helena Faulbaums* encountered a heavy gale on October 26th, 1936. She put into the Firth of Lorne for shelter and anchored off the west side of Belnahunha, near Luing Island, but the anchors failed to hold and she was driven broadside onto the rocks. Four of her crew jumped onto the rocks and were later taken off by lifeboat, but the remaining 14 were drowned.

HELENA MARGARETA

Euxine Shipping Co.; 1915; A. Vuijk & Zonen; 3,316 tons; 326-6x48-2x22-9; 290 n.h.p.; triple-expansion engines. The British steamship *Helena Margareta*, on a voyage from the Tyne to Takoradi, was torpedoed and sunk by a German submarine on April 8th, 1941, about 450 miles N.W. of Madeira. Twenty-seven of her crew of 36 were lost.

HELENA SLOMAN

Robert M. Sloman; 1850; Pirn & Co.; 800 tons; steam engines. The iron steamship *Helena Sloman* safely accomplished her first two transatlantic voyages, but was unlucky on her third crossing.

On November 1st, 1850, she left Southampton for New York with 150 passengers, in addition to crew, having left Hamburg on October 26th. The weather was rough, and the engines were disabled a few days after leaving the English Channel. Sail was hoisted but conditions worsened and by the 29th the ship was sinking. Fortunately the sailing ship *Devonshire* was standing by, and by good seamanship contrived to take off nearly all the passengers and crew.

Nine persons were lost by the capsizing of a boat.

HELENE

Dampsk. Selskabet Torm; 1896; Howaldtswerke; 1,567 tons; 240-5x36x20-3; 94 n.h.p.; triple-expansion engines. The Danish steamship *Helene* was torpedoed and sunk by a German submarine in the Bristol Channel on August 17th, 1918.

HELENE

H. W. Christopher sen; 1898; J. Blumer & Co.; 2,160 tons; 290 X 42x19-2; 227 n.h.p.; triple-expansion engines. The German steamship *Helene* struck a mine and sank on May 22nd, 1940, off Hubert Gat.

HELENSLEA

HELENSLEA

A. Stephen & Sons; 1879; A. Stephen & Sons; 1,248 tons; 228x35-2x21-8

The iron barque *Helenslea* was sunk in a collision with the Cunard steamship *Catalonia* off Roches Point, near Queenstown on December 25th, 1881. Nine of the crew were drowned. The captain and 15 others were picked up by the *Catalonia*.

HELENUS

Ocean S.S. Co.; 1913; Scotts Shipbuilding & Engineering Co.; 7,366 tons; 455-2x56-2x32-5; 572 n.h.p.; 13-5 knots; triple-expansion engines.

The liner *Helenus*, Capt. P. W. Savery, was torpedoed and sunk by a German submarine on March 3rd, 1942, about 100 miles S.W. of Freetown. Five of the crew were killed. Capt. Savery was among the survivors.

HELGA

M. Carl; 1897; W. Gray & Co.; 1,182 tons; 232x34x16-6; 127 n.h.p.; triple-expansion engines.

The Danish steamship *Helga* was sunk by a German submarine in the English Channel on or about October 21st, 1916.

HELGA

German Government; 1919; Bergens Mek. Verksted; 1,620 tons; 244'6x37-7x15-8; 138 n.h.p.; triple-expansion engines. The steamship *Helga* was originally the Norwegian *Hadrian*, seized by the French at Dakar on July 9th, 1941, and later taken over by the Germans. She was lost on May 11th, 1944, during German naval operations off the Crimea.

HELGA FERDINAND

Hugo Ferdinand; 1897; W. Gray & Co.; 2,566 tons; 314x44-1x20-8; 242 n.h.p.; triple-expansion engines. The German steamship *Helga Ferdinand* was bombed and sunk by British aircraft on November 8th, 1944, off Midtgulen.

HELGE

Aktieb.H.Uner; 1877; W. Gray & Co.; 1,133 tons; 236-2X 31-4x17-8; 101 n.h.p.; compound engines. The Swedish cargo ship *Helge* was torpedoed and sunk by a German submarine in the English Channel on August 26th, 1918.

HELIOS

Argentine Nav. Co.; 1892; Scotswood S.B. Co.; 1,496 tons; 260 x32x 12; 516 n.h.p.; triple-expansion engines. Sailing from Buenos Aires to Real San Carlos with passengers, the Uruguayan steamship *Helios* struck a rock and was beached on August 12th, 1923, at Colonia.

HELLE

Greek Navy, cruiser minelayer; 1912; New York Navy Yard; 2,115 tons; 322x39x14; 7,500 i.h.p.; 20-5 knots; turbine engines; Yarrow boilers; three 6 in. guns, four 6pdr., two 40 mm., 2 T.T., 110 mines.

On the morning of August 15th, 1940, the cruiser minelayer *Helle* was lying at anchor about 900 yards outside the mole of Tinos harbour. There was a local feast and holiday in the town and the ship was dressed with flags. The occasion was purely one of pleasure and there was no reason to anticipate attack from any quarter. At about 8.30 a.m. three torpedoes were fired at the cruiser from a submarine which was not sighted at any time by those on board. One torpedo struck the ship amidships beneath the boiler-room, bursting the boilers and causing the oil fuel to catch fire. The other two torpedoes exploded against the mole.

The *Helle* did not sink immediately and an attempt was made by merchant ships within the harbour to tow her into shallow water. Unfortunately the cables parted and the ship, now heavily on fire, began to sink. At 9.45 a.m. she went down, all save one of her company getting away in safety. The casualties were light, there being one engineer petty-officer killed by the explosion and 29 men injured.

It was later proved from fragments of the torpedoes that they were of Italian origin, but for fear of precipitating a conflict with Italy the report of the Court of Inquiry was kept secret, and it was

not until war broke out between the two countries in the following October that the Greek Government issued an official statement.

HELLE

Rederi A/S Henneseid; 1918; Pusey & Jones; 2,467 tons; 300-5x44-2x19-9; 248 n.h.p.; compound engines. The Norwegian steamship *Helle* was torpedoed and sunk by a German submarine on April 3rd, 1941, about 800 miles E. of Cape Farewell on a voyage from Halifax to London.

HELLEN

Bruusgaard, Kiosterud & Co.; 1921; Hong Kong & Whampoa Dock Co.; 5,289 tons; 400-2x52-2x28-5; 517 n.h.p.; triple-expansion engines.

The Norwegian steamship *Hellen* was torpedoed and sunk by a German submarine on December 21st, 1941, 17 miles S. of Ceuta lighthouse.

HELLENIC SKIPPER

E.P. Yannoulatos; 1895; W. Cramp & Sons; 1,548 tons; 241-3 x38-Ox!6-3; 111 n.h.p.; triple-expansion engines. On a voyage from Grays Harbour to Hong Kong with lumber there was an explosion on the Greek ship *Hellenic Skipper* on July 10th, 1940, and a fire broke out, when she was 104 miles W.N.W. of Astoria. She was taken in tow but sank on July 13th.

HELLENIC TRADER

China Hellenic Lines; 1907; Newport News S.B. & D.D. Co.; 2,052 tons; 277x43x17-3; 171 n.h.p.; triple-expansion engines. The Panamanian steamship *Hellenic Trader* was shelled and sunk by a submarine on June 11th, 1942, about six miles from the entrance to Bahia de Cruce, in the Mozambique Channel, on a voyage from Mombasa to Lourenco Marques. Nine of her crew were lost.

HELLOPES

Harris Bros.; 1889; J.Reid & Co.; 2,774 tons; 320-4x40-lx 17-8; 287 n.h.p.; triple-expansion engines.

The British cargo ship *Helopes* took a heavy list when her cargo shifted and foundered in Mounts Bay on December 21st, 1911, while on a voyage from Garston to Falmouth carrying a cargo of coal.

HELMSPEY

Strath S.S. Co.; 1931; J. L. Thompson & Sons; 4,764 tons; 401x54-5x25; 424 n.h.p.; 11 knots; triple-expansion engines. The steamship *Helmspey*, Capt. H. Jones, was torpedoed and sunk by a German submarine not far from Port Elizabeth on February 11th, 1943. Five of her crew were killed. Capt. Jones was among the survivors.

HELMSTEDT

R. Ropner & Co.; 1877; E. Withy & Co.; 1,525 tons; 267X 33-3x18-9; 140 h.p.; compound engines.

The British cargo ship *Helmstedt* struck a rock and sank in the Dora Channel on March 22nd, 1890, while on a voyage in ballast from Leghorn to Constantinople.

HELVELLYN

Caledonian Steam Packet Co.; 1937; Fairfield Co.; 642 tons; 223-6x30-1x9-7; 288 n.h.p.; triple-expansion engines. The paddle steamer *Helvellyn*, formerly the *Juno*, was taken over by the British Admiralty after the outbreak of the Second World War for service as an anti-aircraft ship. On March 19th, 1941, she was bombed and sunk by German aircraft whilst lying in London Docks.

HELVEVIA

W. Lowden & Co.; 1911; Armstrong, Whitworth & Co.; 4,937 tons; 375-1x52x28-2; 480 n.h.p.; triple-expansion engines. The British cargo ship *Helvetia* sank after a collision off Cape Magdalen on July 27th, 1912. She was on a voyage from Sydney, N.S., to Montreal carrying a cargo of coal.

HENG CHONG

Heng Chong S.S. Co.; 1904; Rickmers A.G.; 1,790 tons; 253 • 2 x 37 • 4 x 19 • 6; 136 n.h.p.; triple-expansion engines. On a voyage from Tsingtao to Shanghai with a cargo of coal, the Chinese ship *Heng Chong* foundered on January 21st, 1929, near Shawsheishan Island.

HENLEY

Britain S.S. Co.; 1894; A. Stephen & Sons; 3,249 tons; 330X 43x26-3; 286 n.h.p.; 9 knots; triple-expansion engines. The steamship *Henley* was torpedoed and sunk by a German submarine 25 miles S.W. -J- W. of the Lizard on April 10th, 1918. Six of her crew were killed. The captain was among the survivors.

HENLEY

United States Navy, destroyer; 1937; Mare Island Navy Yard; 1,500 tons; 341 -7x34-7x9-9; 42,800 s.h.p.; 36-5 knots; turbine engines; Express boilers; four 5 in. guns, 5 m.g., 16 T.T. The United States destroyer *Henley* was part of a task force engaged in landing an Australian force near Finschaven in New Guinea. The landing was accomplished without loss but about a week later, on October 3rd, 1943, the *Henley* was torpedoed by a Japanese submarine. She carried a complement of about 200.

HENRIESTIER

Cie. de Nav. Mixte; 1930; Swan, Hunter & Wigham Richardson; 1,904 tons; 253-6x38-6x18-8; 175 n.h.p.; triple-expansion engines.

The French steamship *Henri Estier* was bombed and sunk by British aircraft on March 7th, 1943, N.N.E. of Zembra Island, Tunisia.

HENRI LE COUR

Chargeurs de VQuest; 1917; Forth S.B. & E. Co.; 2,488 tons; 305-3x42-8x21-5; 234 n.h.p.; triple-expansion engines. The French steamship *Henri Le Cour* was torpedoed and sunk by a German submarine in the Bay of Biscay on January 5th, 1918.

HENRIMORY

Union Industrielle & Maritime; 1920; Monmouth S.B. Co.; 2,384 tons; 303-2x43-0x20-7; 217n.h.p.; triple-expansion engines.

The French ship *Henri Mory* went ashore on October 6th, 1931, at Cabo Carvoeiro, while on a voyage from Dunkirk to Casablanca. The ship quickly broke up.

HENRI MORY

Ministry of Shipping (H. Gonnerille, Ltd.); 1921; Ateliers & ChantiersdeBretagne; 2,564 tons; 292-6x43-5x19-7; turbine engines.

The steamship *Henri Mory*, on a voyage from Pepel and Bermuda to Barrow, was torpedoed and sunk by a German submarine on April 26th, 1941, about 300 miles W. of Ireland. Twenty-nine of her crew of 32 were lost.

HENRIETTE

A. Capel & Co.; 1913; Ateliers & Chantiers de la Loire; 2,005 tons; 266-7x39x23; 149 n.h.p.; triple-expansion engines. The French steamship *Henriette* was torpedoed and sunk by a German submarine in the Atlantic on August 24th, 1917.

HENRIETTESCHULTE

Schulte & Bruns; 1944; 1,923 tons.

The German ship *Henriette Schulte* was wrecked on January 17th, 1945, at Memel.

HENRIK

Bruusgaard, Kiosteruds Skibs A/S; 1920; New Engineering & Dixon&Co.; 3,928 tons; 360x52-2x23-9; 370 n.h.p.; triple-expansion engines.

The Norwegian cargo ship *Henrik* was torpedoed and sunk by a German submarine off Ushant on July 3rd, 1917.

HENRIK

Bruusgaard, Kiosteruds Skibs A/S; 1920; New Engineering & Shipbuilding Works; 1,350 tons; 242-7x37-2x15; 132 n.h.p.; triple-expansion engines.

The Norwegian steamship *Henrik* was torpedoed and sunk by a German submarine on February 5th, 1943, about 800 miles W. of Madeira.

HENRIK

D/SA/SMagnhild; 1922; A.G.Neptun; 1,301 tons; 237-6X 36-5x14-4; triple-expansion engines.

The Norwegian steamship *Henrik* struck a mine and sank on May 25th, 1949, near Falsterbo.

HENRIKLUND

W.Gilbert; 1906; W. Doxford & Sons; 4,226 tons; 344-2 X 50-8x20-6; 310 n.h.p.; triple-expansion engines.

The Norwegian cargo ship *Henrik Lund* was sunk by a German submarine off Labrador on June 8th, 1918.

HENRY

CurwenBros.; 1872; Potter & Hodgkinson; 1,013tons; 221-2x 29-8x20; 90 h.p.; triple-expansion engines. The British cargo ship *Henry* struck a rock and sunk on August 18th, 1891, off Cape Prior, north-west coast of Spain. She was on a voyage from Swansea to Algiers carrying a cargo of coal and patent fuel.

HENRY B. PLANT

United States War Shipping Administration, 1944; St. Johns River S.B. Co.; 7,240 tons; 422-8x57x34-8; triple-expansion engines.

The American steamship *Henry B. Plant* was torpedoed and sunk by a German submarine on February 6th, 1945, 17 miles W. of Ramsgate on a voyage from New York and Liverpool to Antwerp. Twelve of her crew were lost.

HENRY BACON

United States War Shipping Administration; 1942; N. Carolina S.B. Co.; 7,177 tons; 422-8x57x34-8; 339 n.h.p.; triple-expansion engines.

The American steamship *Henry Bacon*, on a voyage from Murmansk to the Clyde, straggled from convoy and was torpedoed and sunk by German aircraft on February 23rd, 1945, 400 miles E. of Iceland. Fifteen of her crew and seven gunners were lost.

HENRY DESPREZ

Cie. Auxiliaire de Navigation; 1932; Bumeister & Wain; 9,895

tons; 489-9x65-2x36-7; 712n.h.p.; oilengines. The French tanker *Henry Desprez* was torpedoed and sunk by a British submarine on June 3rd, 1943, 20 miles N.E. of Messina.

HENRY KNOX

United States War Shipping Administration; 1942; California Shipbuilding Corp.; 7,176 tons; 422-8x57x34-8; 2,500 i.h.p.; 11 knots; triple-expansion engines.

The steamship *Henry Knox*, Capt. Eugen M. Olsen, was on a voyage from Fremantle to Bandar Shahpur in the Persian Gulf on the evening of July 19th, 1943, when she was hit on the port side by two torpedoes from a Japanese submarine. The lifeboats were damaged by the explosion but three got away, the captain being picked up by one of them after the vessel had foundered. The Japanese submarine came alongside one of the boats and removed all water and food as well as sails and charts. Several more men were picked up during the night. The boats encountered rough weather and were separated but after 11 days at sea they managed to make a landing on a small atoll, from whence they were rescued by a native lugger. Of the 41 men who formed the crew 13 were killed.

HENRY R. JAMES

Henry R. James Steamship Co.; 1909; J. L. Thompson & Sons; 3,146 tons; 325x49-5x22-1; 318 n.h.p.; 10 knots; triple-expansion engines.

The steamship *Henry R. James* bound from Bilbao for Middlesbrough with iron ore, was mined and sunk ten miles E. by N. of He de Bas on July 16th, 1917. Twenty-four of her crew were killed. The captain was among the survivors.

HENRY R. MALLORY

HENRY R. MALLORY

Clyde-Mallory; 1916; Newport News S.B. & D.D. Co.; 6,063 tons; 424 -3x54-5x22-3; 518 n.h.p.; triple-expansion engines. The American passenger liner *Henry R. Mallory* was proceeding in convoy from the United States to Iceland on the night of February 7th, 1943. She had on board 381 American troops, 2 civilians, 34 armed guard and 77 crew. The convoy was under constant attack from a U-boat pack, and just before dawn the transport was hit and badly holed. Nevertheless she remained afloat for 90 minutes, during which time there was much confusion and only half the lifeboats were got away. Of the total of 494 persons on board the vessel about 270 were drowned.

The Fighting French corvette *Lobelia* sank the *U-609*, and an R.A.F. Liberator aircraft from Iceland sank the *U-624*. The rest of the U-boat pack were not sighted.

HENRY STANLEY

Elder Dempster Lines; 1929; Ardrossan Dry Dock Co.; 5,026 tons; 370-5x51-6x20-1; 650 n.h.p.; 13knots; oilengines. The motor vessel *Henry Stanley*, Capt. R. Jones, was torpedoed and sunk by a German submarine at 11.45 p.m. on December 6th, 1942, in the North Atlantic. Twelve passengers and 52 crew were killed. Capt. Jones, the sole survivor, was taken prisoner by the submarine.

HENRY STEINBRENNER

The Kinsman Transit Co.; 1901; Jenks S.B. Co.; 4,345 tons; 420 x 50x24; triple-expansion engines.

The American ship *Henry Steinbrenner* sank during heavy weather on May 11th, 1953, about 14 miles S. of Isle Royale, Lake Superior. The cause of sinking could not be determined. She was carrying iron ore from Duluth to Cleveland, O. Sixteen of her crew of 31 were lost.

HENRY T. SCOTT

FredLinderman; 1913; Union Iron Works; 1,596 tons; 234-5x 42-7x14-5; 158 n.h.p.; triple-expansion engines. Sailing from San Francisco to Seattle, the American ship *Henry T. Scott* was involved in a collision on July 16th, 1922, near Neah Bay, Paget Sound, and sank.

HENRY WOODALL

Stephenson Clarke & Co.; 1935; Hawthorn Leslie & Co.; 625 tons; 177x27-6x10-9; 94 r.h.p.; 9-5 knots; triple-expansion engines.

The collier *Henry Woodall*, Capt. J. M. Bain, was mined and sunk three miles E. of Withernsea on May 10th, 1940. Six of her crew and one gunner were killed. Capt. Bain was among the survivors.

HERA

RhederiAkt. Ges. von 1896; 1886; J.C.Tecklenborg; 2,084 tons; 276x41x23-9.

The German four masted barque *Hera*, bound from Pisagua, Chile to Falmouth with nitrate, encountered a heavy southerly gale which drove her ashore on the night of January 31st, 1914, near Port-scatho, Cornwall. In response to signals of distress the Falmouth lifeboat put out but passed right over the sunken *Hera* in the darkness and would not have been aware of her presence had it not been for a whistle which one of the shipwrecked men was blowing at intervals. The lifeboat turned back and sent up flares, by the light of which she was able to distinguish five men clinging to the jigger topmast of the barque, the only portion remaining above water.

The number of the *Hera's* crew was 24, but 16 had been drowned when one of her boats capsized. The remaining eight clung to the rigging, but three of them were washed away shortly before the arrival of the lifeboat. The captain and first and second officers were among the drowned.

HERA

Det Bergenske D/S; 1889; Earle's Co.; 1,079 tons; 215-lx 30-4x14-7; 168 n.h.p.; triple-expansion engines. Sailing from Kirkenes to Bergen with passengers and general cargo, the Norwegian ship *Hera* was wrecked on March 18th, 1931, at Havoygavlen, near Havosund. Seven of the 62 persons on board were drowned.

HERA

A. Jansson; 1882; J. Readhead & Co.; 1,379 tons; 256-8x 36-1x15-3; 135 n.h.p.; compound engines. The Finnish steamship *Hera* was torpedoed and sunk by a Russian submarine on September 11th, 1942, in the Gulf of Bothnia.

HERACLIDES

R. P. Houston & Co.; 1886; Boulds, Sharer & Co.; 2,977 tons; 320x40-4x19-2; 319 n.h.p.; triple-expansion engines. The British cargo ship *Heraclides* was wrecked at Hottentot Bay, near Angra Pequena, on October 26th, 1907. She was on a voyage from Table Bay to Swakopmunde carrying a cargo of coal.

HERAKLEA

Deutsche Levante Linie; 1922; Schiffs-u Dockbauwerft Flender A.G.; 1,927 tons; 287-7x52-2x25-7; 494 n.h.p.; triple-expansion engines.

The German steamship *Heraklea* was torpedoed and sunk by a British submarine on March 28th, 1941, 70 miles S.S.W. of Pantellaria.

HERAKLIOS

l. Arvanitidi fils; 1896; W. Pickersgill & Sons; 2,878 tons; 310x42-9x19-2; 252 n.h.p.; triple-expansion engines. The Greek cargo ship *Heraklios* was torpedoed and sunk by a submarine in the Mediterranean on September 26th, 1917.

HERAULT

Cie. Generale Transatlantique; 1906; Chant. & Atel. de Provence; 2,299 tons; 278-3x39-1x24-9; 229 n.h.p.; triple-expansion engines.

The French steamship *Herault* was sunk by a submarine in the Mediterranean on June 23rd, 1916.

HERBERT G. WYLIE

Standard Oil Co. of Venezuela; 1912; Armstrong Whitworth & Co.; 4,292 tons; 360x50-2x28-7; 330 n.h.p.; triple-expansion engines.

There was an explosion on board while the Venezuelan tanker *Herbert G. Wylie* was at Caripito; fire broke out and the ship sank on January 12th, 1939. She was carrying crude oil.

HERBERT SAUBER

Gebr. Sauber; 1909; W. Doxford & Sons; 2,474 tons; 269-3x 44-7x22-1; 217 n.h.p.; triple-expansion engines. The German ship *Herbert Sauber* foundered in the North Sea on November 3rd, 1922, while carrying coal from Seaham to Hamburg.

HERBORG

Skibs-A/S Jolund; 1931; Burmeister & Wain; 7,892 tons; 457-2x59-7x34-9; 625 n.h.p.; oilengines. The Norwegian tanker *Herborg*, on a voyage from Abadan to Fremantle, was captured by a German raider on June 17th, 1942, in the South Indian Ocean, and taken to Japan. She loaded a cargo of soya bean oil at Dairen and left that port in January, 1943, in an attempt to reach a German controlled port. On February 26th, 1943, she was intercepted by British warships and sunk by gunfire about 500 miles W.S.W. of Cape Finisterre.

HERCULES

Shipping Controller (W. Coupland & Co.); 1909; Bergens Mek. Verksted; 1,295 tons; 235-2x34-2x14-7; 144 n.h.p.; 9 knots; triple-expansion engines.

The steamship *Hercules* was torpedoed and sunk by a German submarine three miles E.N.E. of Whitby on December 30th, 1917, while employed as an Admiralty collier. The captain and 11 of the crew were killed.

HEREDIA

United Fruit S.S. Corp.; 1908; Workman, Clark & Co.; 4,732 tons; 378-8x49-8x29-6; 413 n.h.p.; triple-expansion engines.

The American steamship *Heredia* was torpedoed and sunk by a German submarine on May 19th, 1942, on a voyage from Corpus Christi to New Orleans. Thirty of her crew of 48 were lost.

HEREWARD

British Navy, destroyer; 1936; Vickers Armstrong; 1,340 tons; 323x33x8-5; 34,000 s.h.p.; 36knots; turbine engines; 3-drum boilers; four 4.7 in. guns, 6 smaller, 8 T.T.

The destroyer *Hereward*, Lt. J. W. Munn, was bombed and sunk during the evacuation of the British troops from Crete on May 29th, 1941. The ship carried a complement of 145, but at the time of her loss she had on board many others extra to her regular personnel. Four officers and 71 ratings were killed, and six officers and 83 ratings taken prisoners of war. The Italian naval authorities issued a statement shortly after the action claiming 229 prisoners from *Hereward*. Included in this number were the 89 officers and men of the destroyer, the remainder being personnel evacuated from Crete.

For further details of the naval operations around Crete see the cruisers *Calcutta* and *Fiji*, which were both lost in the fighting.

HERISLE

Hercol Shipping Co.; 1919; Superior S.B. Co.; 2,640 tons; 251X43-7x26; triple-expansion engines.

The British cargo ship *Herisle* sank on February 28th, 1946, after a collision with the *William A. Jones*, while at anchor in Gibraltar Bay during a gale. She was on a voyage from Huelva to the United Kingdom carrying a cargo of phosphates and pyrites. Five of her crew were lost.

HERLAND

Hercol Shipping Co.; 1920; Detroit S.B. Co.; 2,645 tons; 250-9x43-7x26; 352 n.h.p.; triple-expansion engines. The steamship *Herland*, on a voyage from Methil to London, struck a mine and sank on November 7th, 1940, off the Nore lightship. Sixteen of her crew and two gunners were killed.

HERMAN SAUBER

Gebr. Sauber; 1912; W. Doxford & Sons; 2,966 tons; 315 X 43-7x23-3; 242 n.h.p.; triple-expansion engines. The German steamship *Herman Sauber* left the Tyne on October 30th, 1922, for Hamburg with a cargo of coal, but was not seen again.

HERMAN WINTER

Seatrade Corporation; 1887; W. Cramp & Sons S. & E. Co.; 2,638 tons; 271-8x41-6x19-2; 284 n.h.p.; triple-expansion engines.

The American ship *Herman Winter* was wrecked on March 7th, 1944, off the Devils Back, Martha's Vineyard Island, Massachusetts.

HERMANN KUNNE

German Navy, destroyer; 1937; Deschlag, Bremen; 1,811 tons; 384x38-3x9-5; 55,000 s.h.p.; 36knots; turbine engines; five 5 in. guns, four 37 mm., 8 T.T.

The *Hermann Kunne* was one of the flotilla of German destroyers sunk in the second battle of Narvik on April 13th, 1940. A full account of both battles is given under the British flotilla leader *Hardy*, which was sunk in the first action on April 10th. There is also a short account under the Norwegian coast defence ship *Norge*.

HERMANN SCHOEMANN

German Navy, destroyer; 1936; Germania Werft; 1,625 tons; 374x37x9-3; 40,000 s.h.p.; 36 knots; turbine engines; five 5 in. guns, four 37 mm., 8 T.T.

The destroyer *Hermann Schoemann* was a unit of a raiding force operating from Norwegian harbours against British convoys to North Russia. On December 31st, 1942, when off Bear Island a German force consisting of the pocket battleship *Lutzow*, the heavy cruiser *Hipper* and several destroyers attacked a north-bound convoy. The British escorting ships, all destroyers, were commanded by Capt. Robert Sherbrooke, D.S.O., who accepted the challenge of the much heavier enemy force without hesitation. The subsequent action, resulted in the sinking of the *Hermann Schoemann* by gunfire.

The British lost one destroyer, the *Achates*, which was disabled and foundered when in tow. British cruisers arriving after the action had been in progress for over two hours drove off the German ships and sank the destroyer *Friedrich Eckoldt* (which see).

Capt. Sherbrooke, was wounded during the action, losing the sight of one eye. He was later awarded the Victoria Cross.

See also under the destroyer *Achates*.

HERMANN SCHULTE

Schulte & Bruns; 1904; A.G. Neptun; 1,305 tons; 239-3X 35-8x15-2; 98 n.h.p.; triple-expansion engines.

The German steamship *Hermann Schulte* was bombed and sunk by British aircraft on March 29th, 1944, N. of Juist.

HERMES

R. P. Houston & Co.; 1882; Aitken & Mansel; 2,175 tons; 290-3x40-1x22; 280 h.p.; compound inverted engines. The British cargo ship *Hermes* was wrecked in Castellos Bay, Uruguay, on September 12th, 1885. She was on a voyage from Liverpool to the River Plate carrying a general cargo which included cattle.

HERMES

R. P. Houston & Co.; 1899; J. Blumer & Co.; 3,400 tons; 350-2x47x17; 431 n.h.p.; triple-expansion engines. The British cargo ship *Hermes* was wrecked on Blauwberg Beach, Table Bay, on May 13th, 1901, while on a voyage from Rosario to Table Bay carrying a cargo of hay.

HERMES

British Navy, seaplane carrier (ex protected cruiser); 1898; Fairfield Co.; 5,600 tons; 350x54x22; 10,000 i.h.p.; 20-5 knots; triple-expansion engines; Babcock boilers; eleven 6 in. guns, eight 3 in., six 3pdr., 2 m.g., 2 T.T.

The cruiser *Hermes*, Capt. C. R. Lambe, had seen nearly 14 years service at the outbreak of the First World War, by which time she had been converted into a seaplane carrier. The ship was one of the early victims of submarine warfare. On October 30th, 1914, she arrived at Dunkirk bringing seaplanes from Portsmouth. The presence of German submarines in the Straits of Dover had been reported on the 29th, and the greatest vigilance was maintained. She cleared Dunkirk for Dover on the early morning of the 31st and, when some eight miles W.N.W. of Calais, was attacked by a submarine, which hit her with two torpedoes.

Despite her injuries *Hermes* remained afloat for nearly two hours. Off her complement over 400, including Capt. Lambe, were taken off by the South Eastern and Chatham Railway Co's steamship *Invicta*, and two destroyers. The drowned numbered about 44.

HERMES

Erik Brodin; 1915; Fredrikstad Mek. Verksted; 1,483 tons; 242-7x39-3x16-9; 138 n.h.p.; triple-expansion engines. The Swedish ship *Hermes* was under charter to the Munson Line when she sank after a collision on March 8th, 1928, 32 miles from New Orleans.

HERMES

British Navy, aircraft carrier; 1919; Armstrong Whitworth; 10,850 tons; 598x90x18-7; 40,000 s.h.p.; 25 knots; turbine engines; Yarrow boilers; six 5-5 in. guns, three 4 in., 18 smaller, 15 aircraft.

The aircraft carrier *Hermes*, Capt. R. F. J. Onslow, M.V.O., D.S.C. was the first ship of the Royal Navy to be specially designed as such, the earlier aircraft carriers being converted cruisers or battleships. The official complement of planes carried by *Hermes* was 15, a very small number considering her size.

In April, 1942, the vessel was at the naval base of Trincomalee, Ceylon, when a Japanese raiding force of three battleships, five aircraft carriers and many smaller vessels entered the Bay of Bengal. On April 8th the ship left Trincomalee and on the 9th was 80 miles south along the coast of Ceylon, and about 20 miles off shore, when the Japanese carrier borne aircraft made their attack on the naval base. *Hermes* was discovered by enemy reconnaissance planes and bombers were sent out to attack her and the Australian destroyer *Vampire* acting as escort. About 70 dive bombers participated in the attack and within ten minutes *Hermes* sank, followed shortly after by *Vampire*.

Of the complement of *Hermes*, 19 officers, including Capt. Onslow, and 283 ratings were killed. Included in this number were 18 ratings of the South African Navy.

HERMIONE

HERMIONE

*British Navy, light cruiser; 1939; A. Stephen & Son; 5,450 tons; 506x51-5x14; 62,000 s.h.p.; 33 knots; turbine engines; 3-drum boilers; ten 5-25 in. guns, 16 smaller, 6 T. T. The light cruiser *Hermione*, Capt. G. N. Oliver, D.S.O., was a unit of the Eastern Convoy which left Alexandria for Malta under Rear-Admiral P. J. Vian in mid-June, 1942, having among its number a few ships for Tobruk. The latter vessels were detached from the main body and entered Tobruk harbour a week before the town fell to the Germans. At about the same time the Western Convoy under Vice-Admiral Curteis left Gibraltar for Malta. The Eastern Convoy was warned by aerial reconnaissance that an Italian squadron consisting of two 35,000 ton battleships, four cruisers and eight destroyers was steaming to intercept it. This caused Rear-Admiral Vian to call for air support from Malta and Libya and to take avoiding action, in doing which he expended a considerable amount of fuel and was ultimately compelled to return to Alexandria. In the meantime British and American bombers attacked the Italian fleet and torpedoed the 10,000 ton cruiser *Trento* from the air. Later this vessel was torpedoed and sunk by the British submarine *Umbra*.*

Hermione was torpedoed by an enemy submarine on June 16th and sank stern first with eight officers and 79 ratings out of a complement of about 450. Capt. Oliver was among the survivors.

Other ships of the escort which were lost were the destroyers *Hasty*, 1,340 tons, *Airedale* and *Grove*, 904 tons each, and the Australian destroyer *Nestor*.

HERMOD

C. K. Hansen; 1922; Royal Navy Yard (Copenhagen); 1,949 tons; 264 -1 x 37 • 9 x 19 • 6; 117 n.h.p.; triple-expansion engines. The

Hermod left Helsingborg on September 30th, 1927, for Newport with a cargo of iron, but after sending out an SOS message on October 3rd, she was not heard of or seen again.

HERMOD

Stockholms Rederi A/B Svea; 1919; Sodra Varfets A/B; 1,495 tons; 246-8x38-3x16; 138 n.h.p.; triple-expansion engines. The Swedish steamship *Hermod* was torpedoed and sunk by a British motor torpedo boat at midnight on March 12th, 1943, off Terschelling on a voyage from Rotterdam to Helsingborg. The captain and four of the crew were killed.

HERMON

George Horsley; 1883; E. Withy & Co.; 1,462 tons; 245-5X 34 X17-2; 130 h.p.; compound inverted engines. The British cargo ship *Hermon* was wrecked near Honfleur on December 13th, 1886. She was on a voyage from Gefle to Honfleur carrying a cargo of deals and boards.

HERNODIA

H. Hamberg; 1915; Lindholmens Verkstads A/B; 2,006 tons; 290-8x43-2x16-5; 199 n.h.p.; triple-expansion engines. The Swedish cargo ship *Hernodia* struck a mine and sank in the Baltic on May 23rd, 1915.

HERO

P. A. Musceus; 1907; Bergens Mek. Verksted; 1,106 tons; 229-1x35-1x15-8; 156 n.h.p.; triple-expansion engines. The Norwegian cargo ship *Hero* was sunk by a German submarine in the North Sea on December 18th, 1916.

HERO

Bruusgaard Kiosteruds Skibs-A/S; 1918; New Eng. & S.B. Works; 1,375 tons; 242-7x37-2x14-7; 132 n.h.p.; triple-expansion engines. The Norwegian steamship *Hero* was torpedoed and sunk by a German submarine on July 6th, 1942, off Haifa. Thirty lives were lost.

HERON

British Navy, sloop; 482 tons; 12 guns. The brig rigged sloop *Heron*, Cdr. W. H. Truscott, was lost between Ascension Island and Sierra Leone on May 9th, 1859. Of those on board 25, including Cdr. Truscott, were saved.

HERON

General Steam Navigation Co.; 1889; Gourlay Bros.; 885 tons; 225-3x33-2x14-7; 144 n.h.p.; 9 knots; triple-expansion engines.

The steamship *Heron* was torpedoed and sunk by a German submarine 400 miles W. of Ushant on September 30th, 1917. Twenty-two men, including the captain, were killed.

HERRENWYK

Lubeck Linie; 1901; Helsingors Jernskibs & Maskin.; 2,514 tons; 315-8x45-2x19-7; 241 n.h.p.; triple-expansion engines. Sailing from Hernosand to New York with a cargo of wood pulp, the German ship *Herrenwyk* sprang a leak and sank in heavy weather on November 23rd, 1928, in mid-Atlantic. Ships answering the distress calls were unable to approach on account of the weather, but eventually the Danish steamship *Estonia* managed to take off 13 survivors.

HERRENWYK

German Government; 1912; A.G. Neptun; 4,616 tons; 361 -5 x 50x23-7; 470 n.h.p.; triple-expansion engines. The steamship *Herrenwyk* was formerly the Swedish *Martti Ragnar*, seized by the Germans at Bergen in April, 1940. On May 4th, 1942, she struck a mine and sank in Kiel Bay.

HERTFORD

Federal Steam Navigation Co.; 1920; Bremer Vulkan; 10,923 tons; 520-7x64-2x38-2; 1,300 n.h.p.; 14 knots; triple-expansion engines & LP turbine.

The liner *Hertford*, Capt. J. C. Tuckett, was torpedoed and sunk by a German submarine in the North Atlantic, about 150 miles S.E. of New Bedford, on March 29th, 1942. Three persons were killed and one man died in hospital.

HESLEYSIDE

Charlton, McAllum & Co.; 1900; R. Thompson & Sons; 2,631 tons; 313x45x20-5; 260 n.h.p.; triple-expansion engines. The British cargo ship *Hesleyside* was wrecked at Abaco on October 4th, 1908, while on a voyage in ballast from St. Michael's to Key West.

HESPER

George Horsley & Son; 1890; Ropner & Son; 2,720 tons; 290-3x40x19-4; 221 n.h.p.; triple-expansion engines. The British cargo ship *Hesper* was wrecked on Ram Island, Cape Sable, N.S., on July 6th, 1896. She was on a voyage in ballast from Las Palmas to St. John, N.B.

HESPERIAN

Allan Line S.S. Co.; 1908; A. Stephen & Sons; 9,599 tons; 485-5x60-3x30; 803 n.h.p.; 15 knots; triple-expansion engines. On September 4th, 1915, the liner *Hesperian*, Capt. Maine, with 653 passengers and crew was 85 miles S.W. by S. of Fastnet when she was torpedoed by the German submarine *U-20*, Cdr. W. von Schwieger. The ship was on a voyage from Liverpool to Montreal with general cargo. At about 8.30 p.m. she was hit amidships but did not sink for several hours. Thirty-two persons lost their lives but the remainder of the passengers and crew took to the boats and were later picked up by warships which tried to tow the *Hesperian* to Queenstown. After making some 35 miles she began to sink and Capt. Maine and a small party of volunteers who had remained on board were forced to abandon her 130 miles W. of Queenstown.

The *U-20* was the submarine which had torpedoed the *Lusitania*.

HESPERIDES

O. Williams; 1884; R. & J. Evans & Co.; 2,290 tons; 286-5x 38-3x24-3; 240 n.h.p.; compound engines. The British cargo ship *Hesperides* was wrecked on Hatteras Shoal on October 10th, 1897. She was on a voyage from St. Jago de Cuba to Baltimore carrying a cargo of iron ore.

HESPERUS

L. Krogius; 1903; R. Craggs & Sons; 2,231 tons; 280-2x 39-9x17-1; 217 n.h.p.; triple-expansion engines. The Finnish cargo ship *Hesperus* was torpedoed and sunk by a German submarine off the Scilly Isles on April 3rd, 1917.

HESSMARINER

Hess Tankship Co.; 1945; Marinship Corp.; 10,564 tons; 523-5x68-2x —; turbine engines.

On October 1st, 1961, the American tanker *Hess Manner* was about 110 miles E. of Jacksonville on a voyage from Houston to Perth Amboy, carrying oil in barrels, when there was an explosion in the engine room. The ship was holed, broke in two and sank.

HESTER

840 tons; 191x31-5x19-5 (approx.).

The sailing ship *Hester*, in company with the *Doelwyck*, 740 tons, was bound from Sydney, N.S.W., to Batavia. On the night of April 21st, 1854, both ships ran on a ledge of rock off Grand Manan Island, in the Bay of Fundy. The ship carried five boys as passengers and a crew of 36 under Capt. Newman. At about one o'clock on the morning of Monday, October 25th, 1909, the *Hestia* impaled her bows upon the Old Protection Ledge in such a manner as to allow her after part to swing to and fro at the mercy of the seas.

HESTIA

Donaldson Bros.; 1890; W. Doxford & Sons; 3,790 tons; 365 X 44-2x19-4; 390 n.h.p.; 10 knots; triple-expansion engines. The steamship *Hestia* was on a voyage from Glasgow to St. John, N.B., and Baltimore, when she struck on a ledge of rock off Grand Manan Island, in the Bay of Fundy. The ship carried five boys as passengers and a crew of 36 under Capt. Newman. At about one o'clock on the morning of Monday, October 25th, 1909, the *Hestia* impaled her bows upon the Old Protection Ledge in such a manner as to allow her after part to swing to and fro at the mercy of the seas.

Capt. Newman ordered out the boats, the first containing the five boy passengers and 12 of the crew. This boat capsized and only two men, both crew, got back to the ship. A second boat was then launched with the captain and the remainder of the crew, except six, but this party was never seen again. The survivors who comprised the third officer, Mr. S. G. Stewart, the second engineer, Mr. A. Morgan and four seamen, lashed themselves to the rigging, where they remained for 24 hours. Eventually they were taken off and brought to shore.

The number of persons lost was 35, including Capt. Newman.

HESTIA

Nederlandsch Indische Tankstoomb. Maats.; 1916; Gebr. Pot; 959 tons; 190x32-7x13-2; 98 n.h.p.; oil engines. The Dutch tanker *Hestia* was bound from Rotterdam to London when she was intercepted by the German submarine *UB-23* and sunk by gunfire and torpedo. The attack took place on March 31st, 1917, 31 miles W. of Maas lightship. Thirteen of the crew were drowned.

HESTON

William Cory & Son; 1900; S. P. Austin & Son; 1,780 tons; 268-3x37-7x17; 196 n.h.p.; triple-expansion engines. The British cargo ship *Heston* sank after a collision 60 miles south of Ushant on May 26th, 1902. She was on a voyage from Decide to Rotterdam carrying a cargo of iron ore.

HESVIK

Carl Bech & Co.; 1897; Actien Ges. "Neptun"; 1,234 tons; 233-3x35-3x14-2; 93 n.h.p.; triple-expansion engines. The Norwegian cargo ship *Hesvik* struck a mine and sank in the North Sea on September 23rd, 1914.

HEXHAM

John Coull; 1880; A. Leslie & Co.; 1,689 tons; 260-9x34-2x 23-3; 170 n.h.p.; compound engines. The British cargo ship *Hexham* was wrecked on Logskar Rock, Aland Island, on July 7th, 1904, while on a voyage in ballast from Cronstadt to Lulea.

HEYTHROP

British Navy, destroyer; 1940; Vickers Armstrong; 1,050 tons; 272-5x28-2x7-7; 19,000 s.h.p.; 27-5 knots; turbine engines; 3-drum boilers; four 4 in. A.A. guns, 8 smaller. The destroyer *Heythrop*, Lt. Cdr. R. S. Stafford, was a unit of the 5th Destroyer Flotilla which left Alexandria on March 19th, 1942,

to carry out an anti-submarine sweep between that port and Tobruk, as an important convoy for Malta was to sail on the 20th. Whilst engaged in this operation *Heythrop* was torpedoed and sunk by a submarine. Sixteen ratings were killed. The convoy consisted of H.M.S. *Breconshire*, 10,000 tons, auxiliary supply ship, the steamships *Clan Campbell*, *Pampas* and the Norwegian *Talabot* escorted by the cruisers *Cleopatra*, flagship of Rear-Admiral P. L. Vian, D.S.O., *Dido* and *Euryalus*, all of 5,450 tons, ten 5-25 in. guns, and the anti-aircraft cruiser *Carlisle*, 4,200 tons, eight 4 in. A.A. guns, with about a dozen destroyers, and sailed at 7 a.m. At 9.30 a.m. on the 22nd the force was attacked by enemy bombers followed at 2.30 p.m. by enemy warships, among which was a battleship of the *Littorio* class, 35,000 tons, nine 15 in. guns. There was some long range firing in which the destroyer *Havock* was hit and stopped, but was later able to proceed to Malta. The destroyer *Lively* was also hit by one of the battleship's 15 in. shells but was able to reach Alexandria. The *Cleopatra* sustained a hit on her bridge which killed one officer and 14 ratings and wounded one officer and four ratings.

On the Italian side the battleship was hit by a torpedo and also set on fire by shells, and the light cruiser *Giovanni Delle Bande Nere*, 5,069 tons, eight 6 in. guns, was heavily damaged. The latter was torpedoed and sunk by H.M. submarine *Urge* on the following day.

Meanwhile the convoy continued on its way harassed by determined air attacks. The *Clan Campbell*, the slowest ship of the convoy, was hit and sunk by bombs on the 23rd, when eight miles from Filfolia Island, near Malta. The *Breconshire* was got into Marsax-lokk in a damaged condition and was bombed and sunk at anchor on the 25th.

The destroyer *Southwold* was mined on the 24th whilst screening the *Breconshire* and sank with the loss of one officer and four ratings, all efforts to save her being frustrated by bad weather. Two ships, the *Pampas* and the Norwegian *Talabot*, reached Malta but were sunk by air attack shortly afterwards. Of the 25,900 tons of cargo despatched in the four ships only 5,000 tons was unloaded at Malta.

The action commencing the 22nd March, 1942, was known as the battle of Sirte.

HIBARI MARU

Nissan Kisen K.K.; 6,550 tons. The steamship *Hibari Maru* was torpedoed by the U.S. submarine *Gato* and bombed and sunk by land-based aircraft on February 19th, 1943, off the Solomon Islands.

HIBERNIA

Anchor Line; 1865; Glasgow; 2,000 tons (approx.); 260x33x 22 (approx.); 350r.h.p.; 10-5 knots; compound engines. The Anchor Line was founded in 1856 by Messrs. Handyside & Henderson of Glasgow, its ships plying between that port and Canada and New York. On Saturday afternoon, November 14th, 1868, the steamship *Hibernia* left New York for Glasgow under command of Capt. Munro, having 133 persons on board, of whom 59 were crew. There was a stiff breeze blowing and from the outset the *Hibernia* had to fight against heavy weather. At two o'clock on the morning of the 24th when about six or seven hundred miles from the coast of Ireland the propeller shaft broke in the stern tube, damaging the sternpost and making it difficult to use the rubber. Water commenced to pour in and during the day both passengers and crew were occupied with throwing over much of the cargo. The engines were kept going to work the pumps, but the water continued to gain, and on the 25th it was decided to take to the boats. This was accomplished without loss of life and by seven in the morning the *Hibernia* was abandoned, her engines still going and her pumps working. At about 7.20 a.m. she foundered, going down by the stern, her position at the time being lat. 53 20 N., long. 29 W.

The first tragedy now occurred, a boat containing 33 persons in charge of the first officer being capsized. The gale was still blowing and as the boats were a quarter of a mile apart nothing could be done for the unfortunate people. In the evening the captain's boat was picked up by the ship *Star of Hope*, Capt. Talbot, from Quebec to Aberdeen. A sharp lookout was kept and the boatswain's boat was picked up shortly before midnight. After some 30 hours the search for the other boats was abandoned.

HIBI MARU

The first officer's boat was righted and ultimately reached Donegal with the second officer and two seamen. Altogether 55 persons were saved of whom 52 were in the two boats picked up by the *Star of Hope*.

The drowned numbered 78.

HIBI MARU

Nissan Kisen K.K.; 5,874 tons.

The steamship *Hibi Maru* was torpedoed and sunk by the U.S. submarine *Hake* on June 20th, 1944, off Tinaca Point, Mindanao Island, Philippines.

HIBURI MARU

Yamashita Kisen K.K.; 1919; *Osaka Iron Works*; 4,365 tons; 345x49-8x28-2; 391 n.h.p.; triple-expansion engines. The steamship *Hiburi Maru* was torpedoed and sunk by the U.S. submarine *Herring* on June 1st, 1944, off the Kurile Islands.

HIDA MARU

Nippon Yusen Kaisha; 5,320 tons.

The steamship *Hida Maru* was bombed and sunk by U.S. land-based aircraft on December 19th, 1944, 60 miles south-east of Hong Kong.

HIDAKA MARU

Japanese Government; 1899; *W. Hamilton & Co.*; 3,733 tons; 330-7x45-7x16-2; 301 n.h.p.; triple-expansion engines. The *Hidaka Maru* was wrecked on January 2nd, 1924, off Soyamisaki, Hokkaido, while sailing from Olomari to Yokohama with pulp and lumber.

HIDAKA MARU

Nippon Yusen Kaisha; 5,486 tons.

The steamship *Hidaka Maru* was torpedoed and sunk by the U.S. submarine *Batfish* on January 20th, 1944, about 200 miles E. of Kyushu Island.

HIDALGO

Ellermarks Wilson Line; 1908; *Northumberland Shipbuilding Co.*; 4,271 tons; 380x49x18; 372 n.h.p.; 10 knots; triple-expansion engines.

The steamship *Hidalgo* was torpedoed and sunk by a German submarine 120 miles N.E. % N. of North Cape, Norway, on August 28th, 1917, on a voyage from Manchester to Archangel with munitions. Fifteen men were killed. The captain was among the survivors.

HIDE MARU

Tochiki Shoji K.K.; 1930; *Harima S.B. & E. Co.*; 5,256 tons; 400-9x53x31; 390 n.h.p.; triple-expansion engines. The steamship *Hide Maru* was torpedoed and sunk by the U.S. submarine *Silver sides* on June 11th, 1943, S. of the Caroline Islands.

HIDLEFJORD

K. Olsen; 1928; *Burmeister & Wain*; 7,639 tons; 451-9X 59-2x33-9; 7 14 n.h.p.; oil engines.

The Norwegian motorship *Hidlefjord* was bombed and sunk by German aircraft on April 1st, 1941, 20 miles N.W. of the Smalls lightship. Twenty-nine of her crew were lost.

HIE MARU

Kita Nippon Kisen K.K.; 4,943 tons.

The steamship *Hie Mam* was torpedoed and sunk by a Dutch submarine on December 23rd, 1941, off Kuching, Sarawak.

HIE MARU

Nippon Yusen K.K.; 1930; *Yokohama Dock Co.*; 11,621 tons; 511-6x66x41; 2,187 n.h.p.; 18-5 knots; oil engines. The liner *Hie Maru* was taken over by the Japanese government during the Second World War for service as a submarine tender. On November 17th, 1943, she was torpedoed and sunk by the U.S. submarine *Drum* about 300 miles N.E. of New Ireland.

HIEI

Japanese Navy, dreadnought battleship; 1912; *Yokosuka*; 29,330 tons; 704x92x27-5; 64,000 i.h.p.; 26 knots; turbine engines; *Kanpon boilers*; six 14 in. guns, sixteen 6 in., four 5 in.A.A., four 3 in.A.A., 4 T.T., 3 aircraft.

The Japanese battleship *Hiei* in company with her sister ship the *Kirishima*, six cruisers and ten destroyers was proceeding to attack the American ships landing troops and munitions on Guadalcanal. When steaming through the Lengo Channel in the early hours of November 13th, 1942, in pitch darkness, this force ran into an American squadron of five cruisers and eight destroyers returning from the convoy of the transports. The *Hiei* and the U.S. heavy cruiser *San Francisco*, 9,050 tons, nine 8 in. guns, Capt. Young, flagship of Rear-Admiral D. J. Callaghan, engaged in a bitter duel at close range in which both the admiral and his flag-captain were killed and both ships received heavy damage. After 15 minutes firing the action between the big ships was broken off, but the destroyers continued to make attacks, in one of which the *Hiei* was torpedoed by the destroyer *Laffey*, Lt. Cdr. W. E. Hank. The *Laffey* discharged all her port torpedoes at close range and then swept the battleship's bridge with her 5 in. guns.

The *Hiei* was located next day off Savo Island by aircraft from the U.S. aircraft carrier *Enterprise*. She was by then unable to steam at more than five knots and was bombed repeatedly by the carrier's planes. Finally she was scuttled by her crew, having sustained 11 hits from torpedoes, underwater and aerial, and six hits from bombs.

The full story of the battle is told under the battleship *Kirishima* and the U.S. cruiser *Atlanta*.

HIGANE MARU

Nippon Yusen Kaisha; 5,320 tons.

The steamship *Higane Maru* was torpedoed and sunk by the U.S. submarine *Hammerhead* on October 1st, 1944, 25 miles west of Jesselton, North Borneo.

HIGHBURY

Watts, Ward & Co.; 1879; *Tyne Iron S.B. Co.*; 1,853 tons; 270 X 35x24-6; 200 h.p.; compound inverted engines. The British cargo ship *Highbury* was wrecked on Falsterbo Reef on November 16th, 1881. She was on a voyage from Cronstadt to Pottery carrying a cargo of railway iron.

HIGHBURY

Watts, Ward & Co.; 1877; *Tyne Iron S.B. Co.*; 1,967 tons; 287x34-6x24-7; 200 h.p.; compound engines. The British cargo ship *Highbury* was wrecked near Marabout, Alexandria on February 17th, 1894. She was on a voyage from Newport to Alexandria carrying a cargo of coal and coke.

HIGHCLIFFE

G.T. Readhead & Co.; 1927; *J. Readhead & Sons*; 3,847 tons; 363'9x50-5x23-7; 371 n.h.p.; triple-expansion engines. The British cargo ship *Highcliffe* was wrecked on Forewick Holm, Shetland Isles, on February 6th, 1940. She was carrying a cargo of iron ore on a voyage from Narvik to Methil and Immingham.

HIGHFLYER

U.S. War Shipping Administration (Lykes Bros. S.S. Co.); 1944; *Moore Drydock Co.*; 6,214 tons; 438-9x63-1x27-7; turbine engines.

The American steamship *Highflyer* was loading ammonium nitrate at Texas City when, at 9.15 a.m. on April 16th, 1947, she was set on fire by the explosion of the French steamship *Grandcamp*, loading a similar cargo at the next berth. The *Highflyer* blew up while being towed away.

HIGHGATE

Turnbull, Scott & Co.; 1882; *T. Turnbull & Son*; 1,395 tons; 243 X 34x17-9; 130 n.h.p.; compound engines. The steamship *Highgate*, on a voyage from Mostyn to Cardiff, collided with the wood ship *Sovereign* on February 19th, 1890, off Lundy Island. Six of her crew were lost. There were 13 survivors. See also *Sovereign*.

HIGHLAND CORRIE

Nelson Steam Navigation Co.; 1910; Russell & Co.; 7,583 tons; 414x56-3x27-1; 837 n.h.p.; 13 knots; triple-expansion engines. The steamship *Highland Corrie* was torpedoed and sunk by a German submarine four miles S. of the Owers lightship on May 16th, 1917. Five lives were lost. The captain was among the survivors.

HIGHLAND HARRIS

Nelson Line; 1904; Russell & Co.; 6,032 tons; 390x52-5x26-7; 640 n.h.p.; 14 knots; triple-expansion engines. The steamship *Highland Harris* was torpedoed and sunk by a German submarine 82 miles N. J.W. of Eagle Island, off Co. Mayo, on August 6th, 1918. Twenty-four lives were lost.

HIGHLAND HOPE

Nelson Steam Navigation Co.; 1929; Harland & Wolff; 14,129 tons; 523-4x69-4x37-1; 2,190 n.h.p.; 16 knots; oil engines. The motor vessel *Highland Hope* left London at 6.40 a.m. on November 15th, 1930, for Buenos Aires, under command of Capt. Thomas J. Jones. She carried about 150 passengers and a crew of 139, together with a valuable cargo. Later in the day the ship called at Boulogne where she embarked the mails and a few additional passengers, leaving for Vigo on the 16th. At the latter port, which she reached on the morning of the 18th, she embarked a further 217 Spanish and Portuguese emigrants and 400 tons of general cargo, leaving at 6 o'clock on the same evening.

The weather was inclined to be misty and shortly before 4 a.m. on the 19th the lookout reported a light on the port bow, which may have been the Burlings light, but the officer of the watch failed to discern it. Shortly afterwards the liner ran into a bank of dense fog and at 4.57 a.m. struck the N.E. Farilhoes Rocks, running over them for the greater part of her length. The vessel was sufficiently afloat to lurch from side to side, but despite this it was possible to put all the passengers into the boats. The Spanish and Portuguese emigrants preserved admirable discipline, due partly to the fact that a number of Portuguese sailors had been signed on at Vigo to look after their compatriots during the voyage. One emigrant attempted, against orders, to jump into a boat, and injured himself so badly that he died in hospital on the following day. This was the only casualty.

After the liner was abandoned a number of Portuguese fishermen boarded her and commenced to pilfer, in which act they were surprised by the Portuguese government salvage ship *Patrao Lopez*, which drove them away and kept the *Highland Hope* under her searchlight for the remainder of the night.

HIGHLAND PATRIOT

Royal Mail Lines; 1932; Harland & Wolff; 14,172 tons; 523-4x69-4x37-1; 2,190 n.h.p.; oil engines. The motorship *Highland Patriot*, on a voyage from Buenos Aires to the Clyde, was torpedoed and sunk by a German submarine on October 1st, 1940, about 500 miles W. of the Bishop Rock. Three of her complement of 143 were killed.

HIGHLAND PRIDE

Nelson Steam Navigation Co.; 1910; Russell & Co.; 7,469 tons; 405x56-2x34-8; 830 n.h.p.; 13 knots; triple-expansion engines. The Nelson liner *Highland Pride* was on a voyage from London to Buenos Aires and had just left Vigo on the night of September 8th, 1929, with 63 passengers, 89 crew and some 3,000 tons of general cargo together with the South American mail when she struck on the Roca Negra, off the Cies Islands at the entrance to Vigo Bay. It was raining heavily at the time and the commander, Capt. Alford, and the third officer were on the bridge.

The discipline on board was excellent and the passengers were placed in the lifeboats or taken off by Spanish fishing boats without loss. Later it was seen that there was no hope of saving the ship, which by that time had several feet of water in the engine room, and she was abandoned. All of the shipwrecked people were landed at Bayona, a fishing village some 22 miles from Vigo.

At daylight it was seen that the *Highland Pride* was lying on her keel with her stern in the air. Attempts were made to save the cargo and a number of pedigree bulls, heifers and sheep were got ashore.

It proved impossible to refloat the vessel and on September 10th she broke in two and the after part sank. On the 13th the Post-

master General announced that the whole of the South American mail had been recovered.

HIGHLAND SCOT

H. & W. Nelson; 1910; Russell & Co.; 7,604 tons; 414x56-3x27-1; 837 n.h.p.; triple-expansion engines. The British cargo ship *Highland Scot* was wrecked at Maricas Island, Brazil, on May 6th, 1918. She was carrying a general cargo and meat on a voyage from Buenos Aires to Rio de Janeiro.

HIGHLAND WARRIOR

H. & W. Nelson; 1911; Russell & Co.; 7,485 tons; 414x56-3x27-1; 837 n.h.p.; triple-expansion engines. The British cargo ship *Highland Warrior* was wrecked north of Cape Prior on October 3rd, 1915. She was on a voyage from London to Corunna and Buenos Aires carrying a general cargo.

HIKOSAN MARU

GokoShokai; 1892; J.Laing; 3,555 tons; 340-3x44-7x18-3; 289 n.h.p.; triple-expansion engines. The Japanese steamship *Hikosan Mam* was torpedoed and sunk by a German submarine off the south-west coast of Spain on October 2nd, 1917.

HIKOSAN MARU

Tsurumaru Hirotaro; 1918; Shindo Zosenho; 989 tons; 190 x 31x18-6; 67 n.h.p.; triple-expansion engines. Carrying coal from Ainoura to Osaka, the Japanese ship *Hikosan Mam* was caught in a heavy storm outside Hakata Bay on January 30th, 1936, and sank. Thirteen of her crew were drowned.

HIKOSAN MARU

Tomoe Gumi Kisen K.K.; 1902; S. P. Austin & Son; 2,073 tons; 289-0x43-1x18-7; triple-expansion engines. The Japanese steamship *Hikosan Mam* was sunk by U.S. carrier-based aircraft on January 22nd, 1945, S. of Okinawa Island.

HIROSHIMA MARU

Mitsubishi Kisen K.K.; 2,854 tons. The tanker *Hikoshima Mam* was torpedoed and sunk by the U.S. submarines *Barb*, *Piluda* and *Queenfish* on January 8th, 1945, 20 miles N.W. of Hsinchu, Formosa.

HILDA

London & South Western Railway Co.; 1882; Aitken & Mansel; 848 tons; 235-6x29-1x14-2; 1,530 i.h.p.; 14 knots; compound engines.

On Friday, November 17th, 1905, at about 10 p.m. the steamship *Hilda* left Southampton for St. Malo. She was delayed at the outset by dense fog and lay off Yarmouth, Isle of Wight, until the following morning. She carried 131 persons all told, of whom 79 were Breton onion sellers who had been trading in England. Her other passengers numbered 24 and there was a crew of 28, under command of Capt. William Gregory.

The *Hilda* left the Isle of Wight at about 6 a.m., the weather being fine and clear until early afternoon when she encountered a series of snow squalls, with rising wind and sea. By about 6 p.m. the vessel had reached the Chenal de Petite Porte at the entrance to St. Malo, but here she met another blinding snow squall and put about for open sea until the weather cleared. For the next five or six hours she lay off the coast awaiting an opportunity to make harbour. At some time during this period she must have been headed shorewards, for just before midnight she struck on a reef known as the Pierres des Portes.

The first boat lowered was smashed before it reached the water and before others could be got away the ship broke in two, the stern portion going down with most of the passengers.

Of the passengers and crew only six persons were saved, five of whom were Breton onion sellers and one, James Grinter, an able seaman. The Breton peasants, true to their seafaring ancestry, exhibited great courage in attempting to save the lives of their fellow voyagers, but the violence of the gale made their efforts unavailing. A few people managed to climb into the rigging, as both masts remained above water, but of these all save the six referred to died from exposure or were washed away by the icy seas. At 9.30

HILDA

next morning the survivors were taken off by the steamship *Ada* belonging to the same company and taken to St. Malo.

Sixty bodies, including that of Capt. Gregory, were washed ashore at St. Cast, a little village seven miles from St. Malo. The total number drowned was 125.

At low tide it was found possible to examine the wreck and photographs were taken which revealed that the entire bottom of the *Hilda* had been torn away forward of the engine room.

HILDA

K. F. Homeri; 1915; *Trondheims Mek. Verksted*; 1,144 tons; 237x36-5x15-6; 116 n.h.p.; triple-expansion engines. The Finnish steamship *Hilda* was torpedoed and sunk by a German submarine on June 21st, 1940, 90 miles off the Atlantic coast of Spain. Five of her crew were lost.

HILDA

Swedish Government; 1925; *Trondheims Mek. Verksted*; 1,237 tons; 232-6x36-5x15-7; 116 n.h.p.; triple-expansion engines. The former Norwegian steamship *Hilda* was seized by the Swedish authorities in 1940. On October 21st, 1941, she was bombed and sunk by British aircraft on a voyage from Bremerhaven to Rotterdam.

HILDAWELL

T. W. Willis & Co.; 1892; *W. Gray & Co.*; 2,494 tons; 290-4X39x20-3; 224 n.h.p.; 10 knots; triple-expansion engines. The steamship *Hildawell*, Bilbao to Middlesbrough with iron ore, was mined and sunk in the North Sea on December 20th, 1916. The captain and 21 of the crew were killed.

HILDEGARD

Lubeck-Wyburger Dampfs.-Ges.; 1906; *Fevigs Jernskibsbyg.*; 1,260 tons; 245-2x35-6x17-6; 159 n.h.p.; triple-expansion engines.

The German steamship *Hildegard* was bombed and sunk by Allied aircraft on September 26th, 1943, S. of Ventspils, Latvia.

HILDEGARDE

Dunford & Elliot; 1882; *Palmers' Co.*; 1,886 tons; 262-4X36-2x22-1; 178 n.h.p.; compound engines. The British cargo ship *Hildegarde* was wrecked on Kimmeridge Ledge, near St. Albans Head, on November 12th, 1900, in thick fog while on a voyage from Almeria, via Benisaf, to the Tyne. She was carrying a cargo of iron ore and esparto grass.

HILMA LAU

J.Lauritzen; 1922; *Schiffswerft v. H. Koch A.G.*; 2,414 tons; 296-4x42-5x20-2; triple-expansion engines. The Danish steamship *Hilma Lau*, under German control, was torpedoed and sunk by a Russian submarine on October 12-13th, 1944, about 26 miles S. of Bornholm Island.

HILONIAN

Einar Olander; 1880; *R.Dixon & Co.*; 2,921 tons; 340x37-3x27-2; 360 n.h.p.; triple-expansion engines. The Swedish cargo ship *Hilonian* was torpedoed and sunk by a submarine in the Mediterranean on May 16th, 1917.

HILVERSUM

Stoomvaart Maats. Oostzee; 1883; *Tyne Iron S.B. Co.*; 1,505 tons; 260 x 35-2x15-5; 147 n.h.p.; compound engines. The Dutch steamship *Hilversum* fell victim to a mine laid by the German minelaying submarine *UC-51* on June 24th, 1917. The steamship was bound from Havre to Barry and ran into the minefield in the Bristol Channel, five miles E. of Lundy Island. She sank with the loss of six of her crew.

HIMALAYA

Messageries Maritimes; 1902; *Messageries Maritimes*; 5,620 tons; 427-8x47-8x23-9; 545 n.h.p.; 13 knots; triple-expansion engines. The liner *Himalaya* was off the coast of Algeria on June 22nd, 1917, when she was torpedoed by a German submarine. At the time of her loss she was serving with the French navy as an auxiliary cruiser and carried a complement of 204, of whom 28 were drowned.

HIMALAYA MARU

Osaka Shosen K.K.; 1918; *Mitsubishi Zosen Kaisha*; 5,228 tons; 400X54-5x30; 494 n.h.p.; triple-expansion engines. The steamship *Himalaya Mam* was bombed and sunk by U.S. land-based aircraft on December 2nd, 1943, 150 miles N.E. of Manus Island.

HINDENBURG

Hamburg-Amerika Linie; 1921; *Bremer Vulkan*; 7,880 tons; 468-8x58-3x32-7; 554 n.h.p.; triple-expansion engines. The German steamship *Hindenburg* was torpedoed and sunk by a Russian submarine on November 17th, 1942, near Uto.

HINDOO

T. Wilson, Sons & Co.; 1872; *Lawrie & Co.*; 3,136 tons; 379-8x37-1x21-1; 350 h.p.; compound-inverted engines. The steamship *Hindoo* left New York on February 11th, 1880, with passengers, a cargo of grain and a large number of cattle. During the voyage the grain shifted and the vessel became unmanageable. Her funnel was carried away and the decks swept clear. The first and second officers, quartermaster and three seamen were washed overboard.

On the 22nd the derelict ship was sighted by the steamship *Alexandria*, which took off the remaining 53 crew and passengers.

HINDOO

United States Maritime Commission; 1925; *Fredrikshavn Vcerft & Flydedok*; 1,531 tons; 280-7x37-7x16; compound engines & L.P. turbine.

Sailing from New York to Cartagena, Colombia, the Panamanian steamship *Hindoo* was in collision with the *Australia Star* and sank on September 9th, 1944.

HINDPOOL

Pool Shipping Co.; 1928; *W. Gray & Co.*; 4,897 tons; 405x53-5x26-5; 505 n.h.p.; 11 knots; triple-expansion engines. The steamship *Hindpool*, Capt. Tinnpck, on a voyage from Peper to Oban with grain, was some 500 miles W. of Cape Blanco, West Africa, on March 8th, 1941, when she was torpedoed and sunk by a German submarine. Seven officers, including Capt. Tinnock, and 21 men were killed.

HINKO MARU

Dairen Kisen K.K.; 1936; *Harima S.B. & E. Co.*; 5,418 tons; 398-4x57-4x30; 449 n.h.p.; triple-expansion engines. The steamship *Hinko Mam* was sunk by U.S. carrier-based aircraft on June 12th, 1944, about 150 miles W. of the Ladrones Islands.

HINNOY

E.H. Samuelsen; 1925; *Akt.Ges.Neptun*; 3,999 tons; 360-2 X 51-1x24-2; 492 n.h.p.; oil engines. Sailing from Antwerp to Hong Kong with a cargo of chemicals, matches, etc., below decks and sulphuric acid on deck, the Norwegian motorship *Hinnoy* was near Minikoi on March 14th, 1933, when there was an explosion in No. 4 hold and the ship caught fire and sank. Fifteen of her crew were lost.

HINO MARU

Hinomaru Kisen K.K.; 1929; *Mitsubishi Zosen Kaisha*; 2,671 tons; 315x46x25; 388 n.h.p.; oil engines. The motor vessel *Hino Mam* was torpedoed and sunk by the U.S. submarine *Padilla* on April 16th, 1944, 20 miles S. of the Obi Islands.

HINO MARU No. 3

Hinomaru Kisen K.K.; 1937; *Mitsubishi Jukogyo K.K.*; 4,391 tons; 360-1x50x29; 383 n.h.p.; turbine engines. The steamship *Hino Maru No. 3* was torpedoed and sunk by the U.S. submarine *Kingfish* on December 7th, 1942, about 150 miles W. of Iwojima Island.

HINO MARU No. 5

Hinomaru Kisen K.K.; 1940; *Mitsubishi Jukogyo K.K.*; 2,725 tons; 307-8x44-9x24-9; steam engines. The steamship *Hino Maru No. 5* was bombed and sunk by U.S. land-based aircraft on October 10th, 1943, E. of New Ireland.

HINODE MARU

1,916 tons.

The steamship *Hinode Mam* was bombed and sunk by U.S. land-based aircraft on June 16th, 1944, off Halmahera Island, Celebes.

HIOKI MARU*Nippon Yusen Kaisha*; 5,320 tons.

The steamship *Hioki Mam* was sunk by U.S. carrier-based aircraft on September 21st, 1944, off Corregidor, Philippines.

HIPSANG

Indo-China S.N. Co.; 1899; *Craig, Taylor & Co.*; 1,659 tons; 265 -1 x 35 - 2 x 13 - 4; 225 n.h.p.; triple-expansion engines. The British cargo ship *Hip Sang*, on a voyage from Newchwang to Chefoo with passengers, was intercepted by a Russian torpedo boat in Pigeon Bay on July 16th, 1904. Her captain ignored an order to heave-to and the ship was torpedoed. The Chinese crew and passengers rushed the boats and the European officers got away from the ship by swimming.

Twenty-one survivors were picked up by the Russians and kept prisoner until August 2nd, when they were set adrift in a captured Chinese junk. Some time afterwards they were taken off by the German steamship *Sullberg*.

HIRADO MARU

Noguchi Kisen K.K.; 1899; *Wood, Skinner & Co.*; 1,441 tons; 240-8x35-1x18; 138 n.h.p.; triple-expansion engines. Carrying a cargo of timber from Biro to Kushiro the steamship *Hirado Mam* went ashore in a snowstorm on March 9th, 1927, off Shironuka and sank.

HIRAN MARU*Japanese Government*; 1923; *Uraga Dock K.K.*; 3,459 tons; 350 X 52 X 22; turbine engines.

The ferry *Hiran Mam* was sunk by U.S. carrier-based aircraft on July 14th, 1945, off Misawa, Japan.

HIRANO MARU*Nippon Yusen Kaisha*; 1908; *Mitsubishi Dockyard*; 7,936 tons; 473-9x54-7x31-3; 4,250 i.h.p.; 12-5 knots; triple-expansion engines.

The liner *Hirano Mam* was torpedoed by a German submarine in a strong gale off the Irish coast on October 4th, 1918. The vessel was carrying 320 persons, of whom about 200 were passengers, and was attacked at 5.30 a.m. when most of these were in their bunks. The time available for saving life was very short and the gale made the task of getting out the boats one of extreme difficulty. Only 28 persons were saved of whom 11 were passengers.

HIRANO MARU*Shimatani Kisen K.K.*; 1916; *Osaka Iron Works*; 1,226 tons; 220X33-5x18-5; triple-expansion engines.

The steamship *Hirano Mam* was sunk by U.S. carrier-based aircraft on July 15th, 1945, off Noshiro, Japan.

HIROKAWA MARU

Kawasaki Kisen K.K.; 1940; *Kawasaki Dockyard Co.*; 6,872 tons; 479-5x62-3x30-3; 2,140 n.h.p.; oilengines. The motor vessel *Hirokawa Mam* was sunk by U.S. land- and carrier-based aircraft and gunfire from warships on November 15th, 1942, in the Solomon Islands.

HIROSAKI MARU

Kinkai Yusen K.K.; 1902; *Sir Raylton Dixon & Co.*; 1,354 tons; 243-8x34-2x20-5; 217 n.h.p.; triple-expansion engines. The *Hirosaki Mam* was carrying passengers and a general cargo from Honto to Adomari when she grounded on July 3rd, 1936, at Notoro, Sakhalin, and became a total loss.

HIROSHIMA MARU

Nippon Yusen Kaisha; 1891; *R. Thompson & Sons*; 3,275 tons; 320 X 42x19- 7; 293 n.h.p.; triple-expansion engines. The *Hiroshima Mam* was wrecked on September 22nd, 1916, off Imai-saki, Kurile Islands.

HIROTA MARU*Nippon Yusen Kaisha*; 1940; *Hakodate Dock K.K.*; 2,211 tons; 305-1x45-3x26-2; steam engines.

The steamship *Hirota Mam* was bombed and sunk by U.S. carrier-based aircraft on October 10th, 1944, 175 miles south west of Okinawa Island.

HIROTAMA MARU*Tamae Shosen K.K.*; 1939; *Kawaminami Kogyo K.K.*; 1,911 tons; 271-7x40x20-3; steam engines.

The steamship *Hiroshima Mam* was taken over by the Japanese Navy and converted into an auxiliary gunboat. On February 14th, 1943, she was torpedoed and sunk by the U.S. submarine *Trout* off Pulo Laut, Borneo.

HIRYU*Japanese Navy, aircraft carrier*; 1937; *Yokosuka*; 10,050 tons; 688-5x68-5x16-5; 60,000 s.h.p.; 30 knots; turbine engines;

Kanpon boilers; twelve 5 in. guns, 40 aircraft. The aircraft carrier *Hiryu* was a unit of a squadron of four such vessels supported by battleships, cruisers and destroyers, engaged in convoying a large fleet of troop and supply ships for an intended landing on the island of Midway. The number of Japanese vessels was estimated at 80 and when first sighted by U.S. aircraft on June 3rd, 1942, the fleet was steaming in five columns in an easterly direction, about 700 miles distant from Midway.

The ships of the rival navies did not approach nearer than 100 miles of each other, and the action was fought out with aircraft. The *Hiryu* was heavily attacked by aircraft and under a succession of direct hits she caught fire. After blazing throughout the night she sank on the morning of the 5th.

The full story of the battle of Midway Island is told under the U.S.S. *Yorktown*.

HISAGAWA MARU*Kawasaki Kisen K.K.*; 6,886 tons.

The *Hisagawa Mam* was bombed and sunk by U.S. carrier-based aircraft on January 9th, 1945, 25 miles S.W. of Tainan, Formosa.

HISAR*Kalkavan Zade Riza ve Mahdumu Ismail*; 1919; *Supple-Ballin S.B. Co.*; 2,398 tons; 294x46-7x23-8; 205 n.h.p.; triple-expansion engines.

The wooden Turkish ship *Hisar* was carrying coal to Derince when she ran ashore and sank on December 22nd, 1937, at Irva Deresi in the Black Sea at the entrance to the Bosphorus. Twenty-four of her crew of 25 were lost.

HISASHIMA MARU*Iino Kaiun K.K.*; 2,742 tons.

The steamship *Hisashima Mam* was torpedoed and sunk by the U.S. submarine *Permit* on March 8th, 1943, off the north-east coast of Honshu Island.

HISHIGATA MARU*Japanese Government*; 2,833 tons.

The *Hishigata Mam* was bombed and sunk by U.S. land-based aircraft on January 2nd, 1945, off San Fernando, Philippines.

HISO*C. T. Boe & Son*; 1898; *Short Bros.*; 1,562 tons; 255-7x36-8x18-1; 156 n.h.p.; triple-expansion engines.

The Norwegian cargo ship *Hiso* struck a mine and sank in the Mediterranean on September 7th, 1916.

HISPANIA

Svenska Lloyd; 1912; *Antwerp Engineering Co.*; 1,337 tons; 266-8x37-3x15-5; 175 n.h.p.; triple-expansion engines. Sailing from Liverpool to Varberg the Swedish ship *Hispania* struck a reef and sank on December 18th, 1954, in the Sound of Mull, off the coast of Morren. Most of the crew were saved but the master went down with his ship.

HITACHI MARU

Nippon Yusen Kaisha; 1906; Mitsubishi Dockyard; 6,557 tons; 449-6x50-1x30-3; 631 n.h.p.; 14 knots; triple-expansion engines.

The liner *Hitachi Mam* with a number of passengers and a valuable cargo was in the neighbourhood of One-and-a-half Degree Channel, at the southern end of the Maldive Islands, when she was chased by the German commerce raider *Wolf* on September 26th, 1917. The Japanese vessel was equipped with one gun, and with this Capt. Tominaga endeavoured to beat off the raider, at the same time sending out wireless calls for help. It was only after 14 of his men had been killed and six wounded that he decided to surrender.

For more than a month the Japanese liner lay with her captor at a lonely atoll being cleared of her coal and cargo. The passengers and crew were transferred to the *Wolf*, among them Capt. Tominaga who was so distressed that he jumped overboard some weeks later.

On November 7th, when the ships reached the Cargados Carajos Group, the *Hitachi Mam* was sunk by time bombs. The Japanese cruiser *Tsushima* spent most of the month of October searching for the missing vessel and at last the Japanese Admiralty concluded that she had been wrecked. The search for survivors was continued throughout November by the French cruiser *D'Estrees* but without avail, and it was not until some months later that the loss of the liner was attributed to the depredations of the *Wolf*.

HITACHI MARU

Nissan Kisen K.K.; 1939; Osaka Iron Works; 6,540 tons; 424-1x57-4x34-4; 517 n.h.p.; turbine engines. The steamship *Hitachi (Hitati) Mam* was sunk by U.S. land-based aircraft on February 14th, 1943, S. of the Caroline Islands.

HITAKA

Japanese Navy, aircraft carrier; 1942; Japan; 28,000 tons; 745x88x—; 28 knots; Diesel engines; sixteen 5 in.A.A. guns, many 47 mm., 60 aircraft.

On June 15th, 1944, the American army landed on the island of Saipan, an important Japanese base in the Mariana Islands. In the face of this challenge Japan was compelled to risk the carefully husbanded heavy units of her main fleet. On the 19th June carrier-based aircraft from the U.S. Fifth Fleet, Admiral Raymond A. Spruance, sighted a fleet of battleships and aircraft carriers about halfway between Luzon, in the Philippines, and the Marianas. The battle which developed was fought mainly with aircraft and at no time did the surface ships of the rival fleets sight each other. The fighting went heavily against the Japanese and at nightfall they broke off the action and turned about, steaming for the channel between Luzon and Formosa.

The American ships suffered very little damage but the Japanese met with losses which, though not overwhelming, were certainly disastrous in respect of aircraft carriers. In addition to the *Hitaka* they lost the *Shokaku*, 29,800 tons, and the *Taiho*, 30,000 tons, (both torpedoed by submarines) as well as the destroyer *Shiratsuyu*, 1,368 tons. Several battleships and cruisers received heavy damage.

The *Hitaka* did not sink until the 20th, the day after the main battle, and on the same day the aircraft carrier *Hiyo* (see below) was sunk.

The aircraft losses for the whole Marianas operation totalled 747 for the Japanese and 151 for the Americans.

HITAKA MARU

Japan National Railways; 1948; Uraga Dock K.K.; 2,932 tons; 373 X 52x22-3; turbine engines.

The train ferry *Hitaka Mam* sank during a typhoon in Tsugaru Strait on September 26th, 1954, and the crew were drowned. A year later she was raised and repaired.

HITERU MARU

Nissan Kisen K.K.; 5,857 tons.

The steamship *Hiteru Mam* was torpedoed and sunk by the U.S. submarine *Greenling* on December 30th, 1942, in the Admiralty Islands.

HITORA MARU

Japanese Government; 1920; Submarine Boat Corp.; 3,513 tons; 324x46-2x25; 386 n.h.p.; turbine engines. The steamship *Hitora Maru* was formerly the Panamanian *Ramona*,

seized by the Japanese in December, 1941. She was sunk by war causes on December 2nd, 1943, off Japan.

HIYAMA MARU

Nissan Kisen K.K.; 1920; Ropner S.B. & Rpg. Co.; 6,171 tons; 411-7x54-5x33-6; 402 n.h.p.; triple-expansion engines. The steamship *Hiyama Maru* was torpedoed and sunk by the U.S. submarine *Seadragon* on July 12th, 1942, off Hone Cohe, Indo-China.

HIYAMA MARU

Miyachi Kisen K.K.; 2,838 tons.

The *Hiyama Mam* was torpedoed and sunk by the U.S. submarine *Guardfish* on July 17th, 1944, off the north-west coast of Luzon Island, Philippines.

HIYO

Japanese Navy, aircraft carrier; 1943 (circa.); Japan; 18,500 tons; 800 X — X—; 30 knots; turbine engines; twelve 5 in.A.A. guns, 45 aircraft.

The aircraft carrier *Hiyo* was first in action around Attu in the Aleutian Islands in May, 1943. The ship returned to Japan about a month later and was torpedoed by the U.S. submarine *Trigger* off Tokyo Bay on June 11th. She did not sink and was towed into Yokosuka by the light cruiser *Isuzu*. She was repaired and sent to reinforce the Japanese fleet off the Mariana Islands. Here, on June 20th, 1944, she was bombed by American aircraft and sunk.

HIYORI MARU

Nippon Yusen Kaisha; 5,320 tons.

The steamship *Hiyori Maru* was torpedoed and sunk by the U.S. submarine *Hammerhead* on October 1st, 1944, 25 miles west of Jesselton, North Borneo.

HIYOSHI MARU

Azuma Kisen K.K.; 1937; Kawasaki Dockyard Co.; 4,046 tons; 352x50x27-5; 333 n.h.p.; turbine engines. The steamship

Hiyoshi (Hiyosi) Maru was torpedoed and sunk by the U.S. submarine *Gunnel* on December 4th, 1943, N.E. of the Bonin Islands.

HIYOSHI MARU

Konan Kisen K.K.; 1936; Asano S.B. Co.; 1,287 tons; 219-4X 35-8x18-5; triple-expansion engines.

The steamship *Hiyoshi (Hiyosi) Maru* was taken over by the Japanese Navy for use as an auxiliary gunboat. On June 13th, 1945, she struck a mine and sank off Shimonoseki.

HIYOSHI MARU

Nittetsu Kisen K.K.; 1949; Hitachi Zosen; 2,349 tons; 302-4 X 43 • 3 X—; turbine engines.

After collision with the *Aimeria Lykes* the Japanese ship *Hiyoshi Maru* sank on November 19th, 1961, between Kyushu and Honshu.

HO AN

Hop Tai S.S. Co.; 1885; Martens, Olsen & Co.; 1,422 tons; 231-9x33-2x19-4; 101 n.h.p.; triple-expansion engines. Carrying 60 passengers as well as a general cargo the Chinese ship *Ho An* was in collision with the *Johanne Juste sen* on May 20th, 1933, and went aground at Whangpoo in the Astraea Channel.

HOBART BAKER

U.S. War Shipping Administration; 1943; Permanente Metals Corp.; 7,176 tons; 422-8x57x34-8; 339 n.h.p.; triple-expansion engines.

The American steamship *Hobart Baker* was attacked and sunk by Japanese aircraft on December 29th, 1944, off Bug Bug Point, Mindoro Island, Philippines.

HOBBEMA

Netherlands Government; 1918; Skinner & Eddy Corp.; 5,507 tons; 409-6x54-2x27-1; turbine engines. The Dutch steamship *Hobbema* was torpedoed and sunk by a German submarine at 8.10 p.m. on November 3rd, 1942, about 300 miles S.E. of Cape Farewell on a voyage from New York to Belfast Lough. Twenty-four of her crew and four gunners were lost.

HOBBS VICTORY

U.S. War Shipping Administration; 1945; Permanente Metals Corp.; 7,607 tons; 439-1 x62-1 x34-5; turbine engines. The steamship *Hobbs Victory* was bombed by Japanese aircraft, and blew up and sank on April 6th, 1945, off Okinawa. Thirteen of her complement of 98 were killed.

HOCHSEE

W. Schuchmann; 1926; Schiffswerft v. H. Koch A.G.; 2,245 tons; 282-8x45-3x17-8; 186 n.h.p.; triple-expansion engines. The German steamship *Hochsee* was torpedoed and sunk by a Russian submarine on July 15th, 1944, in the Baltic.

HOCHST

Hamburg Amerika Linie; 1927; Flensburger Schiffsbau Ges.; 6,854 tons; 461-7x61x27-7; fur bine engines. On a voyage from Tjilatjap to London and Hamburg, the German ship *Hochst* went aground on September 20th, 1929, on Minikoi Island. She caught fire and was completely burnt out.

HOCKWOLD

William Cory & Son; 1911; S. P. Austin & Son; 1,472 tons; 245x36-2x15-9; 170 n.h.p.; triple-expansion engines. The British steamship *Hockwold* sank after a collision about six miles west of the *Lizard* on September 7th, 1917, while employed as an Admiralty collier. She had sailed from Penarth.

HODNABERG

O. & H. Holta A/S; 1922; P. & A. Ruytenberg; 765 tons; 184-8x29-3x12-3; triple-expansion engines. The Norwegian steamship *Hodnaberg* struck a mine and sank on February 24th, 1946, outside Hals, Denmark. Nine of her crew were lost.

HODUR

Seereederei Frigga A.G.; 1913; D. & W. Henderson & Co.; 5,386 tons; 424-5x54-8x25-5; 470 n.h.p.; triple-expansion engines.

The German steamship *Hodur* was torpedoed and sunk by a British submarine on April 20th, 1942, N.W. of Namsos, Norway.

HOEGH CARRIER

Skibs A/S Arnstein; 1935; Burmeister & Wain; 4,906 tons; 392-9x54-3x26-1; 644 n.h.p.; oil engines. The Norwegian motorship *Hoegh Carrier*, under German control, was bombed and sunk by British aircraft on April 18th, 1943, outside Helder, Holland.

HOEGH GIANT

Skibs A/S Abaco, Aruba, Astrea & Noruega; 1937; Deutsche Werft A.G.; 10,990 tons; 508-1x69-2x36-5; 1,362 n.h.p.; oil engines.

The Norwegian tanker *Hoegh Giant* was torpedoed and sunk by a German submarine on June 3rd, 1942, 400 miles E. of Guiana on a voyage from Freetown to Trinidad.

HOEGH SBLVERDAWN

Skibs A/S Arizona; 1940; Burmeister & Wain; 7,715 tons; 444-3x58-3x35; 1,064 n.h.p.; oil engines. The Norwegian motorship *Hoegh Silverdawn* was shelled and sunk by a German raider on June 15th, 1943, about 1,400 miles out of Fremantle bound to Abadan. Thirty-six of her crew of 58 were killed.

HOEISAN MARU

Yamashita Risen K.K.; 1918; Osaka Iron Works; 6,032 tons; 407-2x50-8x32-5; 553 n.h.p.; triple-expansion engines. The steamship *Hoeisan Maru* was sunk by U.S. carrier-based aircraft on October 18th, 1944, off Manila.

HOEL

United States Navy, destroyer; 1943; Bethlehem Steel Co.; 2,050 tons; 376-5x39-3x—; 60,000 s.h.p.; 35-5 knots; turbine engines; five 5 in. guns, four 40mm, 10 T.T. The United States destroyer *Hoel* was sunk in action with Japanese warships off Samar, battle of Leyte Gulf, October 25th, 1944. The vessel carried a complement of over 200.

The full story of the battle of Leyte Gulf is told under the Japanese battleship *Yamashiro*.

HOFUKU MARU

Kokusai Risen K.K.; 1918; Kawasaki Dockyard Co.; 5,825 tons; 385x51x36; 436 n.h.p.; triple-expansion engines. The steamship *Hofuku (Hohuku) Maru* was sunk by U.S. carrier-based aircraft on September 21st, 1944, off the west coast of Luzon Island, Philippines.

HOGARTH

Aberdeen Steam Navigation Co.; 1893; Hall, Russell & Co.; 1,231 tons; 252-8x32-7x17-6; 343 n.h.p.; 10 knots; triple-expansion engines.

The steamship *Hogarth* was torpedoed and sunk by a German submarine 10 miles S. ^ E. of the Longstone Lighthouse, Northumberland, on June 7th, 1918. Twenty-six men, including the captain, were killed.

HOGLAND

Curt Mattson Rederi A/B; 1914; J. Readhead & Sons; 4,360 tons; 374-8x50-4x26-3; 400 n.h.p.; triple-expansion engines.

The Finnish steamship *Hogland* was torpedoed and sunk by a British submarine on August 21st, 1941, off Stavanger, bound for a German Baltic port with iron ore. Eight of her crew were lost.

HOGUE

British Navy, armoured cruiser; 1900; Vickers; 12,000 tons; 454x69-5x28; 21,000 i.h.p.; 22-1 knots; triple-expansion engines; Belleville boilers; two 9-2 in. guns, twelve 6 in., twelve 12 pdr., three 3 pdr., 2 T.T.

The armoured cruiser *Hogue*, under command of Capt. Wilmot Nicholson, was one of the three ships of the 7th Cruiser Squadron which met with disaster at the hands of the German submarine *U-9* on September 22nd, 1914. The squadron, consisting of the *Aboukir*, acting flagship, *Cressy* and *Hogue*, was cruising off Ymuiden after a heavy gale. The ships were without a destroyer screen and they were too far north for safety. At 6.30 a.m. *Aboukir* was torpedoed, followed shortly afterwards by *Hogue* and lastly *Cressy*.

The loss of life was appalling, over 1,400 officers and men going down within three-quarters of an hour. The survivors numbered 60 officers and 777 men, including Capt. Nicholson. The full story of this disaster is related under *Aboukir*.

HOHSING

Japanese Government; 1900; Workman, Clark & Co.; 2,111 tons; 278-6x41-2x20-9; triple-expansion engines. The steamship *Hohsing*, formerly Chinese, was seized by the Japanese. On August 3rd, 1945, she struck a mine and sank off Tsuruga, Japan.

HOIHOW

China Nav. Co.; 1933; Taikoo Dock & Engineering Co.; 2,798 tons; 299-7x44-2x23-1; 175 n.h.p.; triple-expansion engines. The British steamship *Hoihow* left Mauritius on July 2nd, 1943, for Tamatave, with about 120 passengers, 94 crew and seven gunners. A few hours later she was torpedoed and sunk by a submarine 105 miles W.N.W. of Mauritius. Only 12 persons got away from the ship, six on one raft, three on another and three on an overturned boat. Of these one passenger and three Indian seamen survived.

HOKAZE

Japanese Navy, destroyer; 1921; Maizuru; 1,215 tons; 336-5X 29-2x9-5; 38,500 s.h.p.; 34 knots; turbine engines; Kampon boilers; four 4-7 in. guns, 2 A.A.m.g., 6 T.T. The destroyer *Hokaze* was torpedoed and sunk S. of the Celebes Sea by the U.S. submarine *Paddle* on July 6th, 1944. The destroyer's normal complement was 148.

HOKI MARU

Japanese Government; 1922; W. Denny & Bros.; 7,112 tons; 450-3x58-2x31-4; 1,085 n.h.p.; oil engines. The motor vessel *Hoki Maru* was formerly the British *Hauraki* captured by the Japanese on July 19th, 1942. On February 17th,

HOKKAI MARU

1944, she was sunk by U.S. carrier based aircraft in the Caroline Islands.

HOKKAI MARU

Nihonkai Risen K.K.; 1933; *Mitsubishi Zosen K.K.*; 8,416 tons; 446-8x60-5x40-7; 1,678 n.h.p.; oil engines. The motor vessel *Hokkai Maru* was bombed and sunk by Allied aircraft in August, 1945, off Sourabaya.

HOKKI MARU

Kitagawa Sangyo K.K.; 1919; *Palmers' Co.*; 5,599 tons; 400X52•3X28•4; 517 n.h.p.; triple-expansion engines. The tanker *Hokki Maru* was torpedoed and sunk by the U.S. submarine *Apon* on September 27th, 1944, 300 miles N.W. of Manila.

HOKKO MARU

Dairen Kisen K.K.; 1940; *Harima S.B. & E. Co.*; 5,385 tons; 398-5x53x30; turbine engines. The steamship *Hokko Maru* was torpedoed and sunk by the U.S. submarine *Harder* on November 19th, 1943, about 200 miles N. of the Ladrone Islands.

HOKKO MARU

Yamashita Kisen Goshi Kaisha; 1918; *Short Bros.*; 5,347 tons; 400X52•4x28-5; 517 n.h.p.; triple-expansion engines. The steamship *Hokko Maru* was torpedoed and sunk by the U.S. submarine *Raton* on November 28th, 1943, 350 miles N. of Vanimo, New Guinea.

HOKO MARU

Nichiro Gyogyo K.K.; 1923; *Yokohama Dock Co.*; 1,504 tons; 250-5x37x19; 126 n.h.p.; triple-expansion engines. The steamship *Hoko Maru* was torpedoed and sunk by the U.S. submarine *Piluda* on March 20th, 1944, 100 miles N.E. of the Yap Islands.

HOKOKU MARU

Japanese Government, auxiliary cruiser; 1939; *Tama S.B. Co.*; 10,439 tons; 499-5x66-3x40-7; 2,490 n.h.p.; oil engines; six 6 in. guns, several m.g., 2 T.T., 2 aircraft. The liner *Hokoku Maru* was taken over by the Japanese government on its entering the Second World War in December, 1941. The ship was given the dual duties of commerce raider and supply ship to the flotilla of five large submarines operating in the Indian Ocean. These tasks she shared with her consort, the *Aikoku Maru*.

In April, 1942, the whole force of seven vessels left Penang for a rendezvous S. of Madagascar. The submarines wrought havoc among Allied shipping, but the auxiliary cruisers did little to distinguish themselves.

On November 11th, when cruising in company in lat. 19° 45' S., long. 92° 40' E., they fell in with the Dutch tanker *Ondina*, Capt. W. Horsman, one 4 in. gun, escorted by the Indian minesweeper *Bengal*, Lt. Cdr. W. J. Wilson, R.I.N., 733 tons. The two Japanese vessels opened fire at a range of 3,500 yards, the time being just after 12 noon. The fairly close range gave the minesweeper's small 12 pdr. gun an opportunity to hit, and she sent several shells into the *Hokoku Maru* which caused an explosion and set the raider on fire. The 4 in. gun of the *Ondina*, which had a mixed gun crew of three Royal Artillerymen, three Royal Naval gunners and a Dutch merchant navy gun-layer, also scored a number of hits on both Japanese ships.

Despite their heavy armament of 6 in. guns the Japanese failed to benefit. Their gunnery was indifferent, and although they struck the tanker's bridge, killing Capt. Horsman, and scored two hits with torpedoes they did not destroy the ship. Finally, when all their ammunition was expended, the tanker's crew took to the boats, which the Japanese machine gunned, killing the chief engineer and several men.

The four combatants became widely scattered, and the *Bengal* had received several hits which compelled her to withdraw from the action. The *Hokoku Maru* was heavily on fire, and had suffered considerable damage from a second explosion which caused her to sink later. Those on board the *Bengal* believed the *Ondina* to have sunk, while the latter vessel's crew, having got back on to their own

badly damaged ship after the *Aikoku Maru* had steamed away, believed the *Bengal* to have sunk. The Japanese, for their part, thought that both Allied ships had sunk.

Some days later the *Bengal* reached Colombo, and the *Ondina* reached Fremantle.

The action had ended in an outstanding victory for the small Indian minesweeper and her Dutch charge. They had engaged two fast and heavily armed raiders, equipped with all modern devices, and had sunk one of them in a straightforward ship to ship action. In addition to this achievement they had managed, despite their shattered condition, to voyage hundreds of miles of ocean and come safely to harbour.

HOKOKU MARU

Hinode Kisen K.K.; 1936; *Tsurumi Seitetsu Zosen K.K.*; 1,274 tons; 217-8x35-7x18-5; triple-expansion engines. The steamship *Hokoku Maru* was sunk by U.S. carrier-based aircraft on July 14th, 1945, in the Tsugaru Strait.

HOKUAN MARU

Dairen Kisen K.K.; 1938; *Tama S.B. Co.*; 3,712 tons; 350-7X 50-2x24-5; 453 n.h.p.; oil engines. The motor vessel *Hokuan Maru* was torpedoed and sunk by the U.S. submarine *Flasher* on February 14th, 1944, W. of Mindoro, Philippines.

HOKUHI MARU

Japanese Government; 1,500 tons. The steamship *Hokuhi Maru* was bombed and sunk by U.S. land-based aircraft on March 2nd, 1945, 50 miles W. of Changhua, Formosa.

HOKUREI MARU

Toa Kaiun K.K.; 1924; *Yokohama Dock Co.*; 2,407 tons; 274-5x41-5x22-8; triple-expansion engines. The steamship *Hokurei Maru* was sunk by U.S. carrier-based aircraft on October 18th, 1944, 25 miles N.W. of Laoag, Philippines.

HOKUROKU MARU

Osaka Shosen K.K.; 1930; *Mitsubishi Zosen Kaisha*; 8,359 tons; 446x60-5x40-7; 1,495 n.h.p.; oil engines. The motor vessel *Hokuroku Maru* was torpedoed and sunk by the U.S. submarine *Lapon* on March 18th, 1944, 300 miles S.E. of Hong Kong.

HOKURYU MARU

Kitta Nippon Kisen K.K.; 1917; *Osaka Ironworks*; 4,378 tons; 345x49x28-2; 390 n.h.p.; triple-expansion engines. The Japanese ship *Hokuryu Maru* went ashore on December 20th, 1944, on Tembai Island during a storm.

HOKURYU MARU No. 23

1,550 tons. The *Hokuryu Maru No. 23* was sunk by U.S. carrier-based aircraft on July 14th, 1945, off Hakodate.

HOKUSEI MARU

Ogawa Gomei Kaisha; 1918; *Uraga Dock Co.*; 1,394 tons; 200 x 32x22-9; 106 n.h.p.; triple-expansion engines. The steamship *Hokusei Maru* was sunk by war causes on September 22nd, 1943, in the Sea of Okhotsk.

HOKUSEI MARU

Hinode Kisen K.K.; 1918; *Uraga Dock Co.*; 1,284 tons; 228X 33x16-3; triple-expansion engines. The steamship *Hokusei Maru* was bombed and sunk by U.S. land-based aircraft on July 29th, 1945, off Pusan, Korea.

HOKUSHIN MARU

Nippon Suisan K.K.; 1920; *Osaka Iron Works*; 5,819 tons; 407-2x50-8x30; triple-expansion engines. The *Hokushin (Hokusin) Maru* was torpedoed and sunk by the U.S. submarine *Lagarto* on June 30th, 1945, in the South China Sea.

HOKUSHO MARU

Kita Nippon Kisen K.K.; 1937; Uraga Dock Co.; 4,211 tons; 359-3x49-1x28-9; 350 n.h.p.; compound engines & L.P.

turbine

The steamship *Hokusho (Hokusyo) Mam* was torpedoed and sunk by the U.S. submarine *Narwhal* on September 11th, 1943, off Nauru Island.

HOKUSUIMARU

Amakasu Sengyo Kisen K.K.; 1898; Russell & Co.; 3,945 tons; 344 '9x49-8x17-8; 346 n.h.p.; triple-expansion engines. The *Hokusui Mam* sank on March 6th, 1945, at Fukushima, Hokkaido, during a storm.

HOKUTAIMARU

Kitagawa Sangyo Kaiun K.K.; 1918; Harland & Wolff; 5,220 tons; 400-4x52-3x28-4; 518 n.h.p.; triple-expansion engines. On March 30th, 1944, the steamship *Hokutai Mam* was attacked by U.S. carrier-based aircraft and sunk off Babelthuap, Palau Islands.

HOKUTOMARU

Sadao Sato; 1896; C. S. Swan & Hunter; 3,045 tons; 310 X 42x16-8; 254 n.h.p.; triple-expansion engines. Carrying coal from Otaru to Yokkaichi the steamship *Hokuto Maru* was wrecked on November 28th, 1928, off Fukuyama.

HOKUTOMARU

Nippon Yusen K.K.; 1923; Hakodate Dockyard Co.; 2,270 tons; 270X40-8x24; 189 n.h.p.; triple-expansion engines. The steamship *Hokuto Maru* struck a mine and sank on March 4th, 1943, off Hakodate.

HOKUTOMARU

Heian Kisen Goshi Kaisha; 1923; Hakodate Dockyard Co.; 2,270 tons; 270X40-8x24; 189 n.h.p.; triple-expansion engines. The Japanese steamship *Hokuto Maru* was the first victim of a "wolf pack" raid by U.S. submarines into the Sea of Japan. The flotilla of nine submarines was commanded by Comdr. E. T. Hydeman, U.S.N., in the *Sea Dog*, and left Guam on May 27th, 1945. By June 9th the submarines were at their stations ready to begin their attacks. Between June 9th and 20th they sank 27 small cargo steamers, all of which were of less than 3,000 tons gross.

The *Hokuto Maru* was torpedoed and sunk off the N. coast of the island of Honshu on June 9th, by the submarine *Creville*.

Of the American submarines which took part in the raid, only one, the *Bonfish*, was lost. She was also the last U.S. submarine to be lost in the war.

HOKUYO MARU

Kita Nippon Kisen K.K.; 1936; Uraga Dock Co.; 4,216 tons; 357x49-2x28-9; 350 n.h.p.; compound engines. The steamship *Hokuyo Maru* was sunk by U.S. carrier-based aircraft on February 17th, 1944, in the Caroline Islands.

HOKUYO MARU

Kyodo Kaiun K.K.; 1919; Nitta Kisen K.K.; 1,590 tons; 240X36x20-9; 111 n.h.p.; triple-expansion engines. The steamship *Hokuyo Maru* was torpedoed and sunk by the U.S. submarine *Herring* on May 31st, 1944, off the Kurile Islands.

HOKUZANMARU

Japanese Government; 1,329 tons. The steamship *Hokuzan Maru* was formerly the Norwegian *Ngow Hock*, seized by the Japanese at Hong Kong in December, 1941. She was bombed and sunk by U.S. land-based aircraft on October 26th, 1943, off Hoihow, Formosa.

HOLCOMBE

British Navy, destroyer; 1941; Vickers Armstrong; 1,025 tons; 272-5x28-2x7-7; 19,000 s.h.p.; 27-5 knots; turbine engines; 3-drum boilers; four 4 in.A.A. guns, 8 smaller. The destroyer *Holcombe*, Lt. F. M. Graves, was torpedoed and sunk by the German submarine *U-593* off Bougie on December 12th, 1943. Two officers and 80 ratings were killed and six officers wounded.

HOLDER

United States Navy, destroyer; 1944; United States; 1,200 tons; 306x36-9x—; 6,000 s.h.p.; 21 knots; turbine engines; three 3 in. guns, two 40 mm.A.A., four 20 mm.A.A., three T.T. The United States destroyer *Holder* was bombed and sunk by German aircraft in the Mediterranean on April 11th, 1944. The vessel carried a complement of 220.

HOLLAND

Nederlandsche Stoomboot Maatschappij; 1878; Nederlandsche Stoomb. Maats.; 726 tons; 216-5x28-6x13-8; 88 n.h.p.; compound engines.

The Dutch steamship *Holland* was wrecked in the Nieuwe Waterweg, Rotterdam, on January 28th, 1901. Fifteen of the crew were drowned.

HOLLAND

Miller & Richards; 1906; W. Doxford & Sons; 3,828 tons; 350-3x50-1x22-4; 292 n.hp.; triple-expansion engines. The British cargo ship *Holland* sank after a collision off Hythe on November 24th, 1916, while on a voyage from the Tyne to St. Nazaire carrying a cargo of coal.

HOLLANDMARU

Kawasaki Kisen K.K.; 1920; Kawasaki Dockyard Co.; 5,870 tons; 385x51x36; 437 n.h.p.; triple-expansion engines. The Japanese steamship *Holland Maru* was torpedoed and sunk by the U.S. submarine *Trigger*, Lt. Cdr. R. S. Benson, U.S.N., off Tokyo Bay on October 17th, 1942.

HOLLANDER

Sleepdienst Hoek van Holland; 1898; J. P. Rennoldson & Sons; 177 tons; 102-2x21-8x11-7; 75 n.h.p.; triple-expansion engines.

The Dutch tug *Hollander* was sunk in a collision with the steamship *James Westoll* off Dungeness at 3 a.m. on August 17th, 1904. All her crew were drowned except one man who managed to jump aboard the *James Westoll*.

HOLLANDIA

F. Sternhagen; 1912; Goteborgs N.V. Aktieb.; 1,115 tons; 221-6x35-1x13-7; 131 n.h.p.; triple-expansion engines. The Swedish cargo ship *Hollandia* was torpedoed and sunk by a German submarine in the North Sea on March 31st, 1916.

HOLLANDIA

Hellenic Lines; 1911; Schiffswerft v. H. Koch; 1,759 tons; 278 X 39 • 2 X 17 • 9; 209 n.h.p.; triple-expansion engines. The Greek steamship *Hollandia* was bombed, set on fire and sunk by German aircraft on April 27th, 1941, near Hermioni, during the invasion of Greece.

HOLLINGTON

F.S.Holland; 1912; Northumberland Shipbuilding Co.; 4,221 tons; 380x49x26-4; 372 n.h.p.; 10 knots; triple-expansion engines.

The steamship *Hollington* was torpedoed and sunk by a German submarine 14 miles S. of the Faroe Islands on June 2nd, 1917. Thirty men, including the captain, were killed.

HOLLYHOCK

British Navy, corvette; 1940; Henry Robb; 925 tons; 193 X 32x16; 2,750i.h.p.; 17 knots; quadruple-expansion engines; one 4 in.A.A. gun, several smaller.

The corvette *Hollyhock*, Lt. Cdr. T. E. Davies, O.B.E., R.N.R., was bombed and sunk by Japanese aircraft E. of Ceylon on April 9th, 1942. Lt. Cdr. Davies, one officer and 46 ratings were killed.

HOLME FORCE

West Coast Shipping Co.; 1930; Goole S.B. & R. Co.; 1,216 tons; 216x34-2x —; 144 n.h.p.; triple-expansion engines. The steamship *Holme Force*, on a voyage from the Tyne to Devon-port, was torpedoed and sunk by a German motor torpedo boat on August 8th, 1940, eight miles off Newhaven. Three of her crew and three gunners were killed.

HOLMELEA

HOLMELEA

Cliff side Shipping Co.; 1928; Sir John Priestman & Co.; 4,223 tons; 365x51-5x25-1; 375 n.h.p.; 10 knots; triple-expansion engines.

The steamship *Holmelea*, Capt. J. R. Potts, was torpedoed and sunk by a German submarine on February 28th, 1941, about 280 miles due W. of Erris Head, Co. Mayo. Twenty-eight men, including Capt. Potts, were killed.

HOLMESIDE

George Pyman & Co.; 1901; W. Gray & Co.; 3,833 tons; 346-6 X 49 - 7 X 25 - 6; 322 n.h.p.; triple-expansion engines. The British cargo ship *Holmeside* was wrecked on Mogotes Point, near Cape Corrientes, on August 26th, 1913. She was carrying a cargo of patent fuel on a voyage from Newport to Puerto Militar.

HOLMGLEN

Holm Shipping Co.; 1956; Bodewes Scheepswerven; 485 tons; 148-5x28-3x10-9; 9 knots.

The motorship *Holmglen*, Capt. E. J. E. Regnaud, left Dunedin, New Zealand on November 23rd, 1959, with 300 tons of general cargo. She put in to Oamam next day and loaded further cargo, sailing at 3.45 p.m. for Wanganui. She carried a crew of 15.

At 9.12 p.m. on the 24th the Radio Stations at Taiaroa Head and Wellington picked up distress signals from her stating that she had a heavy list to port and that she was about to launch her boats. At the time the message was received there was a strong southerly wind and a moderate sea.

In response to the *Holmglen's* distress signal two naval launches, followed by a number of other craft at once put to sea, but failed to find any trace of the missing vessel. At daylight a large quantity of oil was observed by the *Holmburn* of the same company. This ship was using an echo-sounder by means of which she located the hull lying at a depth of 30 fathoms, at a spot 22 miles E.S.E. of Timaru.

This was reported to the authorities and divers of the New Zealand Navy were sent down to make an examination. They found the vessel lying on an even keel, but could discover nothing which would indicate the reason for her sinking.

HOLMSIDE

Burnett S.S. Co.; 1930; Cowpen Dry Dock & Shipbuilding Co.; 3,433 tons; 338x48x22-4; 298 n.h.p.; 10-5 knots; quadruple-expansion engines.

The steamship *Holmside* was torpedoed and sunk by a German submarine on July 19th, 1941, roughly 400 miles S.W. of Cape Blanco. Twenty-one of her crew were killed outright. The 16 survivors, nearly all injured, put off on three rafts, the boats being unusable, and after drifting about for five days without food or water and, in some cases, having had the clothing blown from their bodies, were picked up by the Portuguese steamship *Saudades* and taken to Lisbon. Later Capt. Manuel Rainho, of the *Saudades*, when offered payment by the British Consul at Lisbon for the clothing and other necessities which he had provided declined to accept it, stating that what he had done repaid in some measure the kindness vouchsafed to himself when picked up by a British ship after being torpedoed during the First World War.

HOLMWOOD

W. France Fenwick & Co.; 1902; Northumberland S.B. Co.; 1,327 tons; 230x36x15; 159 n.h.p.; triple-expansion engines. The British cargo ship *Holmwood* sank after a collision off Orfordness on January 5th, 1910, while on a voyage from the Tyne to London carrying a cargo of coal.

HOLTENAU

German Government; 1931; Smiths Dock Co.; 4,102 tons; 366-4x52x24-7; 368 n.h.p.; triple-expansion engines. The steamship *Holtenu* was formerly the British *Dulwich*, which was run ashore at Dunkirk with a damaged rudder in June, 1940, and subsequently taken over by the Germans. On October 17th, 1942, she was bombed and sunk by British aircraft N.E. of Calais.

HOLYHEAD

London & North Western Railway Co.; 1883; R. Duncan & Co.; 842 tons; 300-2x33-1x12-1; 280 h.p.; compound engines. The cattle steamship *Holyhead* collided with the German barque

Alhambra at midnight on October 31st, 1883. Both vessels sank. The collision took place in the Irish Sea between Dublin and Holyhead, and 15 persons were drowned, two from the *Holyhead* and 13 from the *Alhambra*.

HOLYROOD

Raeburn & Verel; 1889; R. Duncan & Co.; 2,714 tons; 300-4X 40-1x25-1; 214 n.h.p.; quadruple-expansion engines. The British cargo ship *Holyrood* sank after a collision about 175 miles west of the Fastnet on March 28th, 1902, in fog. She was on a voyage from Portland, Me., to London carrying a general cargo.

HOLYSTONE

Northumbrian Shipping Co. (Common Bros); 1927; Short Bros.; 5,462 tons; 397-4x54x28-6; 332 n.h.p.; 11 knots; compound engines.

The British cargo ship *Holystone* sailed in ballast from Oban on February 10th, 1941, for Halifax, N.S. She was last reported in the Atlantic on February 14th, but no subsequent information was received. The ship carried two passengers in addition to her crew of 36 and two gunners.

HOLYWELL

Tyzack & Branfoot; 1896; J. L. Thompson & Sons; 3,300 tons; 350 x45x16-2; 288 n.h.p.; triple-expansion engines. The British cargo ship *Holywell* sank after a collision off Newark Light on February 21st, 1903. She was on a voyage from Middlesbrough, via London, to Delagoa Bay carrying a general cargo.

HOMER

Dick & Page; 1881; J. Readhead & Co.; 1,308 tons; 250x 34-2x17-4; 151 n.h.p.; compound engines. The steamship *Homer* was involved in a collision with the Russian barque *Hopper* off Spurn Head, Yorkshire, on February 15th, 1901. Sixteen of the crew were drowned.

HOMESTEAD

United States Shipping Board; 1919; Federal S.B. Co.; 6,629 tons; 395-5x55x31-4; 619 n.h.p.; turbine engines. Sailing from Calcutta to Bombay and New York the *Homestead* encountered heavy weather off the Malabar coast and foundered on July 21st, 1927.

HOMESTEAD

U.S. War Shipping Administration; 1945; Kaiser Co. Inc.; 10,448 tons; 504x68-2x39-2; turbine engines. While at Jacksonville with a cargo of gasoline the American tanker *Homestead* was struck by lightning on August 5th, 1946. Fire broke out and burned for eight days.

HONAN MARU

Nippon Seitetsu; 5,401 tons. The steamship *Honan Mam* was torpedoed and sunk by the U.S. submarine *Whale* on April 9th, 1944, 75 miles west of Sasebo, Japan.

HONAN MARU

Japanese Government; 1920; Sir J. Laing & Sons; 5,647 tons; 400x52-4x28-4; 517 n.h.p.; triple-expansion engines. The tanker *Honan Maru* was formerly the British *War Sirdar*, bombed and run ashore near Batavia on February 28th, 1942, and subsequently repaired by the Japanese. She was torpedoed and sunk by the U.S. submarine *Bluegill* on March 28th, 1945, off Camranh Bay, Indo-China.

HONESTAS

Soc. Anon, di Nav. Mare Nostrum; 1920; F. Schichau; 4,959 tons; 374-6x51-4x31-5; 357 n.h.p.; turbine engines. The Italian steamship *Honestas* was torpedoed and sunk by a British submarine on December 14th, 1942, 27 miles from Cap Bon.

HONFLEURAISE

Soc. Navale Caennaise; 1923; S. P. Austin & Son; 1,782 tons; 260x37'-5x17'-5; 206 n.h.p.; triple-expansion engines. The French steamship *Honfleuraise* was bombed and sunk by German aircraft in June, 1940, in the River Gironde.

HONG KHENG

Ho Hong S.S. Co.; 1903; Reihersteig Schiffs. & Masch. Fabrik; 6,167 tons; 415 - 8 X 50 - 4 X 28 - 1; triple-expansion engines. The British steamship *Hong Kheng* was wrecked on July 19th, 1947, at Chilang Point in 22° 39' N., 115° 34' E. She was carrying passengers on a voyage from Rangoon to Swatow.

HONG KONG

Watts, Milburn & Co.; 1871; Mitchell; 1,881 tons; 290-4X 35-3x25-4; 200 n.h.p.; 10 knots; compound engines. The steamship *Hong Kong*, Capt. W. G. Conley, left Gravesend on January 24th, 1875, bound for Japan, and reached Port Said on February 10th. On clearing from the last named place she had on board 49 persons, of whom nine were passengers, with 2,400 tons of general cargo including 300 tons of gunpowder.

On the morning of February 22nd she struck a submerged rock not shown on Admiralty charts, off Abdel Kuri, near Socotra, and foundered. The boats were got out and everybody was safely transferred to them when, unfortunately, the first officer's boat capsized, drowning all its 12 occupants, including a lady passenger and her five children. The remainder of the shipwrecked people came safely to shore.

HONG KONG

Peninsular & Oriental S.N. Co.; 1889; Caird & Co.; 3,174 tons; 349 - 4x42 - 1x26 - 5; 450 h.p.; triple-expansion engines. The British steamship *Hong Kong* was wrecked on Azalea Rock in the Red Sea on December 5th, 1890. She was on a voyage from Shanghai to London carrying a general cargo.

HONG MOH

Ho Hong S.S. Co.; 1881; C. Connell & Co.; 3,954 tons; 400X 42-1x30-1; 560 n.h.p.; triple-expansion engines. The British steamship *Hong Moh*, on a voyage from Singapore to Arroy with some 1,100 Chinese passengers, was wrecked on March 3rd, 1921, on White Rocks, Lamock Island, off Swatow, in a storm. The British warship *Foxglove* and the light cruiser *Carlisle* went to her assistance and *Foxglove* took off 28 men but the worsening weather made further rescue impossible until Capt. Evans of the *Carlisle* swam to the wreck carrying a line. By this means a further 230 persons were saved.

HONGKONG MARU

Toa Kaiun K.K.; 1935; Mitsubishi Jukogyo K.K.; 2,797 tons; 298-5x44-9x25-3; 367 n.h.p.; turbine engines. The transport *Hongkong Maru* was sunk by war causes on June 21st, 1943, off Formosa.

HONOMU

Matson Nav. Co.; 1919; Skinner & Eddy Corp.; 6,977 tons; 409-6x54-2x27-1; 359 n.h.p.; triple-expansion engines. The American steamship *Honomu*, on a voyage from Philadelphia to Murmansk, was torpedoed and sunk by a German submarine on July 5th, 1942, in the Barents Sea. The captain and 18 men were taken on board the submarine and 21 others were picked up and landed in Russia.

HONTESTROOM

N.V. Hollandsche Stoomv. Maats.; 1921; N.V. Haarlemsche Scheepsbouw Maats.; 1,857 tons; 265-5x37-2x20-2; 203 n.h.p.; triple-expansion engines. Sailing from Liverpool to Reykjavik with coke, the Dutch ship *Hontestroom* went ashore on March 15th, 1943, on Skage Reef, Iceland, and became a total loss.

HOOD

British Navy, battle cruiser; 1919; John Brown & Co.; 42,100 tons; 860-6x105-2x31-5; 144,000 s.h.p.; 31 knots; turbine engines; Yarrow boilers; eight 15 in. guns, twelve 5-5 in., eight 4 in., 15 m.g., 4 T.T.

The loss of the *Hood* added another name to the list of battle cruisers—the disastrous records of which appear with such frequency on the pages of modern naval history—which met with sudden and overwhelming destruction when in action. The *Hood* was the last of her type to be built, and she was launched in August

1918. She was the largest warship afloat, having a displacement of 42,100 tons and a complement of 1,341.

In May, 1941, *Hood* was the flagship of Vice-Admiral L. E. Holland, C.B., and was commanded by Capt. R. Kerr, C.B.E. On the 22nd of the month the German battleship *Bismarck*, accompanied by the 8 in. gun cruiser *Prinz Eugen*, put to sea from Bergen. Dispositions were at once made to prevent the enemy ships from escaping into the Atlantic and harrying the convoys. The heavy cruisers *Norfolk* and *Suffolk* were detailed to watch the Denmark Strait, between Iceland and Greenland, and on the evening of the 23rd they sighted the German ships steaming very fast on a south westerly course along the edge of the icefield. Despite poor visibility, at times reduced by mist and snow squalls to little more than one mile, the two British cruisers successfully shadowed the enemy until morning when the *Hood*, accompanied by the new battleship *Prince of Wales*, engaged the *Bismarck* with such good effect that she was seen to be on fire.

Shortly after this, when everything pointed to a rapid and successful conclusion to the action the *Bismarck* fired a salvo at extreme range (approximately 23,000 yards) and scored a hit upon the *Hood*. The battle cruiser must have been struck in a vital spot, probably in the neighbourhood of a magazine, for she blew up with a tremendous explosion.

An eye witness on the *Prince of Wales*, only a few hundred yards away from the *Hood*, states that at the moment both sides were steaming on opposite courses approaching each other. Firing had just recommenced when shells from the *Bismarck* appeared to fall just ahead of the *Hood's* after 15 in. gun turret. There was an immediate burst of flame accompanied by thick black smoke. Meanwhile *Hood* continued to fire and her speed in no way diminished, when a sheet of flame suddenly enveloped her and she disintegrated. Parts of masts, funnels and other portions of her superstructure were hurled upwards and she disappeared, going down stern first.

Of her complement of 1,341 only one midshipman and two ratings were picked up by one of the escorting destroyers.

A full description of the engagement is given under the *Bismarck*, which was sunk three days later.

HOPOE

Cork S.S. Co.; 1868; Barclay, Curie & Co.; 1,297 tons; 236-6x31-6x16-8; 150 h.p.; triple-expansion engines. The British cargo ship *Hoopoe* sank after a collision off the Cornish coast on November 29th, 1888, while carrying a general cargo on a voyage from Liverpool to Antwerp.

HOP

A/SDISFro; 1916; Boele's Scheepsbouw; 1,365 tons; 239 - 6 X 36-1x16-8; 138 n.h.p.; triple-expansion engines. The Norwegian steamship *Hop* left Bergen on February 3rd, 1940, for the Tyne, with a crew of 18, but was not seen again.

HOPECASTLE

Novocastria Shipping Co.; 1937; Swan, Hunter & Wigham Richardson; 5,178 tons; 418-9x57-4x25-6; 688 n.h.p.; oil engines.

The motorship *Hopecastle*, on a voyage from Cochin to Liverpool, was torpedoed and sunk by a German submarine on October 28th, 1942, off the Canary Islands. Three of her crew and two gunners were killed.

HOPEDALE

Mrs. D. M. Laing; 1895; W. Doxford & Sons; 1,746 tons; 280X38x18-4; 175 n.h.p.; triple-expansion engines. The British cargo ship *Hopedale* sank after a collision off St. Catherine's Point on July 24th, 1908, in dense fog while on a voyage from Sunderland to Bordeaux carrying a cargo of coal.

HOPEFUL

F.H. Powell & Co.; 1888; Ailsa S.B. Co.; 1,215 tons; 231 - 2x 33 - 2x16 - 9; 98 n.h.p.; triple-expansion engines. The British cargo ship *Hopeful* sank after a collision off the Long-ships on February 13th, 1903, while on a voyage from Liverpool to London carrying a general cargo.

HOPELYN

Stamp, Mann & Co.; 1918; Swan, Hunter & Wigham Richardson; 2,348 tons; 285 - 3 X 41 - 5 X 19 - 1; 249 n.h.p.; triple-expansion engines.

The British cargo ship *Hopelyn* was wrecked on Scroby Sands on October 19th, 1922, while on a voyage from the Tyne to London carrying a cargo of coal.

HOPESTAR

Wallsend Shipping Co.; 1936; Swan, Hunter & Wigham Richardson; 5,627 tons; 416-8x57-4x27; 400 n.h.p.; 12 knots; turbine engines.

The cargo steamship *Hopestar*, Capt. F. H. Dufton, left the Tyne on November 2nd, 1948, for Philadelphia in ballast. She carried a crew of 40 all told. In addition to her ordinary cargo-carrying duties the vessel was a weather reporting ship, sending news to the Air Ministry in London on her trips across the Atlantic.

On this, her last voyage, she radioed the company's agents in Philadelphia on the 14th from lat. 42° N., long. 57° W., saying that she had sustained damage to her deep tank owing to heavy weather. This was the last news received from her.

There was a constant stream of ships on the northern route but none reported sighting her, and on December 31st she was posted missing.

HOPETARN

Clive Shipping Co.; 1939; Swan, Hunter & Wigham Richardson; 5,231 tons; 418-9x57-4x25-6; 688 n.h.p.; oil engines.

The motorship *Hopetarn*, homeward bound from Calcutta, was torpedoed and sunk by a submarine on May 29th, 1943, about 400 miles E. of Durban. Six of her crew and one gunner were killed.

HORAI MARU

Osaka Shosen K.K.; 1912; W. Denny & Bros.; 9,192 tons; 451 X 60x37-4; 1,378 n.h.p.; quadruple-expansion engines.

The steamship *Horai Mam* was sunk by gunfire from Allied warships and bombs from aircraft on March 1st, 1942, in the Sunda Strait.

HORAI MARU

Toho Risen K.K.; 1916; Osaka Iron Works; 3,198 tons; 305 X 43-9x27-3; 288 n.h.p.; triple-expansion engines. The steamship *Horai Mam* was bombed and sunk by U.S. carrier-based aircraft on October 10th, 1944, 50 miles S. of Naha, Okinawa Island.

HORAIZAN MARU

Tsurumaru Hiroto; 1920; Teikoku S.S. Co.; 1,999 tons; 270 x 39 x 23 - 9; 256 n.h.p.; triple-expansion engines.

The steamship *Horaihan Maru* was torpedoed and sunk by the U.S. submarine *Silver sides* on May 29th, 1944, about 50 miles N.W. of Saipan Island, Ladrone Islands.

HORATIO

T. Wilson, Sons & Co.; 1896; Furness, Withy & Co.; 3,197 tons; 330 X 43x26-7; 265 n.h.p.; triple-expansion engines.

The British cargo ship *Horatio* was wrecked in Muros Bay, near Cape Villano, on April 21st, 1904, while on a voyage from Odessa to Hull carrying a cargo of wheat.

HORDA

A/S J. Ludwig Mowincke Vs Rederi; 1920; W. Gray & Co.; 4,301 tons; 380-1x53-5x24-1; 413 n.h.p.; triple-expansion engines.

The Norwegian ship *Horda* left the River Mersey for Halifax on March 17th, 1941, was reported on March 23rd, but was not seen again. She was considered to have been sunk by a submarine on about March 24th approximately 1,000 miles W. of the Bishop Rock.

HOREI MARU

Toa Kaiun K.K.; 5,588 tons.

The steamship *Horei Maru* was torpedoed and sunk by the U.S. submarine *Fogy* on February 23rd, 1944, about 200 miles W. of Iwojima Island.

HORN SHELL

Anglo-Saxon Petroleum Co.; 1931; Deutsche Werft A.G.; 8,272 tons; 456-1x62-1x34; 4,000 i.h.p.; 12-5 knots; oil engines.

The motor tanker *Horn Shell*, Capt. A. McDougall, was torpedoed and sunk by a German submarine on July 26th, 1941, about midway between Madeira and the Azores. Seventeen men were killed. Capt. MacDougall was among the survivors.

HORNET

United States Navy, aircraft carrier; 1940; Newport News S.B. & D.D.Co.; 20,000 tons; 809-5x83-2x21-7; 120,000 s.h.p.; 34 knots; turbine engines; Babcock & Wilcox boilers; eight 5 in. guns, 32 smaller, 85 aircraft.

The aircraft carrier *Hornet* formed part of an American naval force under Rear-Admiral T. C. Kinkaid operating in the waters around the island of Guadalcanal on which U.S. troops had landed in August, 1942. The squadron comprised one battleship, two aircraft carriers, three heavy cruisers, two anti-aircraft cruisers and 14 destroyers. On October 26th, Japanese naval forces converged upon Guadalcanal in three groups, the first group comprising an aircraft carrier and a few lighter ships; the second, two battleships, one heavy cruiser and seven destroyers, and the third, two aircraft carriers and some lighter ships. Despite the odds against him Admiral Kinkaid interposed his squadron between the Japanese and the island. The *Hornet* sent up two waves of bombers, and her sister ship, the *Enterprise*, one wave. The *Hornet* succeeded in scoring four hits with 1,000lb. bombs on one carrier of the third enemy group with its first wave, and two heavy cruisers and a destroyer in another group were hit by the second wave. The planes from the *Enterprise* after a fight with Japanese planes located the enemy battleship group and bombed, but did not sink, one battleship.

In the meantime the two American carriers sustained a fierce attack by Japanese planes. The *Hornet* was hit by a big bomb and petrol on board caught fire and seriously damaged the signal bridge. Two hours later, when the fire had been got under, the enemy put in an attack by torpedo bombers and the *Hornet* was hit by two torpedoes. The ship was disabled and again caught fire from bomb hits and a crashing Japanese plane. She was taken in tow by the cruiser *Northampton* which took off all the wounded.

The battle had begun early in the morning and it was now afternoon with many hours of daylight still to run. The Japanese were able, therefore, to locate the damaged carrier again before dark and to make a third attack upon her with torpedo and dive bombers. Her hopes of survival against this attack were slender indeed and it was decided to take off the remainder of the crew and to sink the vessel.

The *Hornet* carried a complement of 2,170, of whom by far the greater proportion were saved.

The *Enterprise* received several hits but was able to continue at sea.

In this sea-air action, which was known as the battle of Santa Cruz Island, the enemy attacked with about 180 planes, losing 56 by anti-aircraft fire and about 50 by aerial combat. Of this number the *Hornet* was credited with bringing down 50. The American loss, in addition to the *Hornet* and 74 planes, was the destroyer *Porter*. No Japanese ships were sunk though many were damaged.

HORSA

Herskind & Co.; 1894; W. Gray & Co.; 2,949 tons; 314x 40-5x21-3; 256 n.h.p.; triple-expansion engines.

The British ship *Horsa* was torpedoed and sunk by a submarine on April 30th, 1917, 195 miles south-west by west from the Fastnet. The captain and 10 of the crew were killed. A gunner was taken prisoner.

HORSEFERRY

Gas Light & Coke Co.; 1930; J. Crown & Sons; 951 tons; 217 x 32 x 13'5; 115 n.h.p.; 9 knots; triple-expansion engines. The collier *Horseferry*, Capt. L. B. Anderson, was torpedoed and sunk by a German motor torpedo boat on March 11th, 1942, near Smith's Knoll. Eleven men were killed. Capt. Anderson was among the survivors.

HORSTED

Stephenson Clarke & Co.; 1936; *Burntisland Shipbuilding Co.*; 1,670 tons; 256x37-5x16-4; 197 n.h.p.; 10 knots; triple-expansion engines.

The collier *Horsted*, Capt. M. Hunter, was torpedoed and sunk by a German submarine off the Humber on December 4th, 1939. Five men were killed. Capt. Hunter was among the survivors. The *Horsted* was in convoy at the time.

HORTA

Portuguese Government; 1892; *Caird & Co.*; 3,472 tons; 348-9x42x26-2; 398 n.h.p.; triple-expansion engines. The German steamship *Schaumburg* was requisitioned by the Portuguese Government and renamed *Horta*. Subsequently she was torpedoed and sunk by a submarine in the Mediterranean on July 8th, 1918.

HOSANGER

Westfal-Larsen & Co. A/S; 1911; *Bergens Mek. Verksted*; 1,591 tons; 244-6x37-7x15-6; 138 n.h.p.; triple-expansion engines.

The Norwegian steamship *Hosanger* was torpedoed and sunk by a German submarine on January 27th, 1940, 15 miles S.E. of Copinsay Light. Seventeen of her crew were lost.

HOSEN MARU

Alcohol Yuso; 1,039 tons.

The Japanese ship *Hosen Mam* was torpedoed and sunk by the U.S. submarine *Blenny* on March 20th, 1945, off Swatow.

HOSHI MARU

Japanese Government; 1905; *Napier & Miller*; 2,853 tons; 314-1x41-9x13-3; triple-expansion engines. The steamship *Hoshi Maru* was formerly the Panamanian *Foch*, seized by the Japanese at Yokohama in December, 1941. On July 25th, 1945, she struck a mine and sank off Osaka.

HOSHI MARU No. 11

Yamashita Kisen K.K.; 1,944 tons.

The Japanese ship *Hoshi Maru No. 11* was bombed and sunk by U.S. carrier-based aircraft on March 1st, 1945, 354 miles E. of Naha, Okinawa Island.

HOSHIN MARU

1,000 tons.

The *Hoshin Maru* was bombed and sunk by U.S. land-based aircraft on July 25th, 1944, at Kitchioh, China.

HOSTE

British Navy, destroyer; 1916; *CammellLaird & Co.*; 1,666 tons; 325x31x10; 36,000 s.h.p.; 34 knots; turbine engines; *Yarrow boilers*; four 4 in. guns, 3 smaller, 4 T.T.

The destroyer *Hoste* was in collision with the destroyer *Negro*, 1,025 tons, during very bad weather in the North Sea on December 21st, 1916. The damage to both vessels was so extensive and the seas so heavy that both foundered. *Hoste* had an official complement of 116.

HOSTILE

British Navy, destroyer; 1936; *Scott's Shipbuilding Co.*; 1,340 tons; 323X33x8-5; 34,000 s.h.p.; 35-5knots; turbine engines; 3-drum boilers; four 4 - 7 in. guns, 7 smaller, 8 T. T. The destroyer *Hostile*, Lt. Cdr. A. F. Burnell-Nugent, D.S.C., played an important part in the first battle of Narvik, in which she was severely damaged. She was repaired and sent to sea a few weeks later but did not have a long career. On August 23rd, 1940, when off Cap Bon, Tunisia, she struck a mine and sank. Four ratings were killed and three were wounded.

HOTEN MARU

Dairen Kisen K.K.; 1928; *Mitsubishi Zosen Kaisha*; 3,974 tons; 360X46x28-5; turbine engines.

The steamship *Hoten Maru* was sunk by U.S. carrier-based aircraft on October 18th, 1944, about 40 miles N. of Luzon Island, Philippines.

HOULGATE

1903; *Chicago S.B. Co.*; 1,550 tons; 241x41x15-6; 97 n.h.p.; triple-expansion engines.

The French steamship *Houlgate*, formerly sailing under the American flag as the *John Lambert*, was shelled and sunk by a German submarine in the English Channel on November 22nd, 1916.

HOUN MARU

Toho Kisen K.K.; 1940; *Kawaminami Kogyo K.K.*; 1,917 tons; 271-6x40x20-3; 150 n.h.p.; triple-expansion engines. The steamship *Houn Maru* was bombed and sunk by U.S. land-based aircraft on May 14th, 1943, off Bougainville.

HOUNSLOW

Watts, Watts & Co.; 1890; *W. Gray & Co.*; 2,902 tons; 314-6X 40-6x20-5; 235 n.h.p.; triple-expansion engines. The British cargo ship *Hounslow* was wrecked 20 miles north of Corinto in April, 1906. She was on a voyage from Acajutla to Ancon carrying a cargo of coffee.

HOUSATONIC

United States Navy, steam sloop-of-war; 1862; *U.S. Yard*; 1,240 tons; 207x38x16-9; 12 knots (approx.); two horizontal direct acting engines; two boilers; one 100 pdr. rifled gun, three 30pdr. rifled, one 12 pdr. rifled, one 11 in. smooth bore, two 24 pdr. howitzers, one 12 pdr. howitzer and two 33 pdr. smooth bore. The United States steam sloop-of-war *Housatonic* was the first warship to be sunk by a submarine. During the American Civil War the sloop formed one of the blockading squadron off Charleston, South Carolina. On February 17th, 1864, she was lying at anchor some two miles off Battery Marshall in the north channel entrance to Charleston Harbour, in 27 feet of water. The night was calm with bright moonlight, despite which the warship's lookouts did not see the submarine until she was within one hundred yards of them.

No such craft as a submarine had ever been seen before and the watch on deck at first mistook her for a large drifting log. By the time that they recognised her for what she was, she was too close for the *Housatonic's* guns to be depressed sufficiently to fire on her. A volley from small arms was discharged without effect, and the sloop slipped her cable and endeavoured to back away. The submarine however approached at right angles and struck her with a torpedo under water just abaft the mizzen mast.

The explosion which followed blew wreckage high above the masts, and the ship settled down immediately on a fairly even keel with her masts above water. Five of the crew were killed, the survivors taking refuge in the rigging, from which they were later taken off in safety.

The submarine which caused this destruction was the *H. L. Hunley*, which was built by Park & Lyons of Mobile, Alabama, to the designs of Lts. W. A. Alexander and G. E. Dixon of the Confederate Army Engineers. She was fashioned from a cylindrical iron steam boiler with tapered ends added, was not equipped with engines and carried a crew of nine. One man acted as helmsman and the remaining eight turned the hand-cranked propeller, which gave her a speed of four knots. She had ballast tanks at each tapered end which could be flooded or pumped dry by hand; iron weights were fastened to the underside of the hull and could be dropped by unscrewing the bolts from inside. She carried a mercury depth gauge and a compass. Light was provided by a single candle, the failing light of which gave warning of dwindling air supply. Two hollow pipes with stop cocks could be raised above water to admit air. Glass portholes in the coamings of the two manholes were used for sighting.

On two occasions the submarine sank, once in harbour when five men were drowned, and again at diving practice when Horace L. Hunley, who had introduced some improvements, and after whom the vessel was named, was drowned with a crew of seven. Originally the submarine towed the torpedo, but later she carried a Lee spar torpedo, to operate which it was necessary to have her manhole portholes showing above water.

The explosion which sank the *Housatonic* also sank the submarine which was either damaged by its own torpedo or was sucked under when the sloop sank. All the crew of nine were drowned.

HOUSATONIC

HOUSATONIC

Anglo-American Oil Co.; 1893; Naval Construction & Armament Co.; 4,041 tons; 347-4x45-6x27-2; 345 n.h.p.; triple-expansion engines.

The British tanker *Housatonic* struck a rock and sank on January 5th, 1908, off Maiden Rocks near Larnie. She was on a voyage from Barrow to New York.

HOUSTON

United States Navy, heavy cruiser; 1929; Newport News S.B. & D.D. Co.; 9,050 tons; 600-2x66x23; 107,000 s.h.p.; 32-7 knots; turbine engines; Witte-Forster boilers; nine 8 in. guns, four 5 in., two 3 pdr., 8 m.g.

The heavy cruiser *Houston* formed part of an Allied Squadron under Rear-Admiral K. Doorman of the Royal Netherlands Navy which was overwhelmed and sunk in its entirety in attempting to prevent a Japanese landing on the island of Java. She had been in action against enemy bombers on February 4th, 1942, when she was hit by a 500lb. bomb which killed 60 of her complement and damaged her after 8 in. gun turret beyond repair. The *Houston* was the largest unit on the Allied side in the battle of February 27th, and managed to survive the first phase which commenced at 4 p.m. She put into Tandjong Priok after nightfall where she met the Australian cruiser *Perth*, 6,980 tons, eight 6 in. guns, which had also escaped the first action. Both ships refuelled and left harbour the next evening in company with the Dutch destroyer *Evertsen*.

The ships were intercepted by a strong Japanese force in the Sunda Strait in bright moonlight. The *Houston* was sunk by enemy torpedoes during the first hour and the *Perth* sank shortly afterwards. The *Evertsen* was chased by two enemy cruisers and was driven ashore on a reef off Sebutu Island.

The *Houston* carried a complement of over 700. A few men from all three ships managed to escape, but most became prisoners of war.

For the full story of the battle of the Java Sea, see the Dutch cruiser *De Ruyter*, flagship of Rear-Admiral Doorman.

HOUDTIJK

Solleveld, van der Meer & T. H. Van Hat turn; 1902; W. Gray & Co.; 2,336 tons; 303x43-2x20; 226n.h.p.; triple-expansion engines.

The Dutch steamship *Houtdijk* was bound from Leningrad to Rotterdam on August 20th, 1914, when she ran into a German minefield. The steamer struck two mines in succession and sank with the loss of 14 of her crew. Her position at the time was 20 miles N. of Dagerort, Estonia.

HOVDE

Stranger & Co.; 1888; Blyth S.B. Co.; 1,196 tons; 242x33x16-5; 130 n.h.p.; triple-expansion engines.

The Norwegian cargo ship *Hovde* was torpedoed and sunk by a German submarine in the English Channel on October 15th, 1917.

HOVEY

United States Navy, fleet minesweeper; 1919; W. Cramp & Sons; 1,190 tons; 314x30x10; 26,000 s.h.p.; 35 knots; turbine engines; four 5 in. guns, one 3 in.

The fleet minesweeper *Hovey* was formerly a destroyer. On January 6th, 1945, she was attacked by Japanese aircraft in the Lingayen Gulf and sank after being hit by an aerial torpedo.

HOWARD OLSON

Oliver J. Olson & Co.; 1917; Great Lakes Engineering Works; 2,477 tons; 253 X 43 • 5 X 25 • 6; triple-expansion engines. After collision with the *Marine Leopard* on May 14th, 1956, the steamship *Howard Olson* broke in two and both parts sank. The casualty took place about 100 miles S. of San Francisco. Six of her crew were lost. Twenty-three survivors were picked up by the *Marine Leopard* and one by another ship.

HOYO MARU

Nippon Tanker K.K.; 1936; Mitsubishi Jukogyo K.K.; 8,691 tons; 474 X61x37-5; 1,163 n.h.p.; oil engines. The motor tanker *Hoyo Mam* was sunk by U.S. carrier-based aircraft on February 17th, 1944, in the Caroline Islands.

HOZAN MARU

Kokoku Sangyo K.K.; 1918; Detroit S.B. Co.; 2,260 tons; 251-2x43-8x22-5; 267n.h.p.; triple-expansion engines. The steamship *Hozan Maru* was torpedoed and sunk by the U.S. submarine *Wahoo* on March 21st, 1943, off the west coast of Korea.

HOZAN MARU

Osaka Shosen K.K.; 1907; Kawasaki Dockyard Co.; 2,345 tons; 305-9x39-7x21-7; 248 n.h.p.; triple-expansion engines. The steamship *Hozan Maru* was torpedoed and sunk by the U.S. submarine *Red fish* on November 23rd, 1944, 50 miles E. of Ilan, Formosa.

HOZAN MARU

Noun Kisen K.K.; 1914; Osaka Iron Works; 1,175 tons; 218-7x32-2x17-3; triple-expansion engines. The steamship *Hozan Maru* struck a mine and sank on April 4th, 1945, in the Bungo Channel, Japan.

HOZUGAWA MARU

Toyo Kaiun K.K.; 1,925 tons. The steamship *Hozugawa Maru* was bombed and sunk by U.S. land-based aircraft on January 16th, 1944, off Queen Charlotte Island, Bismarck Archipelago.

HSIN FUH-TAI

Woo Ping S.S. Co.; 1894; Palmers' Co.; 2,831 tons; 303X43x19-7; 240 n.h.p.; triple-expansion engines. On a voyage from Pukow to Ningpo with 3,800 tons of coal, the Chinese ship *Hsin Fuh-Tai*, Capt. L. Koshman, grounded on a rock off Northwest Home on December 26th, 1932, and sank. Thirty-five of the crew were lost.

HSIN KONG

China Merchants S.N. Co.; 1906; Farnham, Boyd & Co.; 2,146 tons; 270X40-1X—; triple-expansion engines. On a voyage from Shanghai to Tientsin, the Chinese ship *Hsin Kong* was involved in a collision on July 21st, 1929, and sank off Shantung Promontory with the loss of 60 lives.

HSIN NINGSHAO

Japanese Government; 1914; New Eng. & S.B. Works; 3,387 tons; 289-5x46x15; triple-expansion engines. The steamship *Hsin Ningshao* was formerly the German *Nohlenhof*, taken over by the Japanese. On July 1st, 1945, she was bombed and sunk by U.S. land-based aircraft off Chinghai, Chekiang.

HSIN TA KOU MARU

Nissin Kisen Kaisha. Sailing from Hsingkong to Shanghai the Japanese launch *Hsin Ta Kou Maru* capsized in the Yangtze Delta on October 16th, 1939. Three hundred lives were lost.

HSIN TIEN

Soc. de Transports Maritimes de Chine; 1920; 1,403 tons; On a voyage from Shanghai to Swatow, the French ship *Hsin Tien* sprang a leak in heavy weather and foundered on April 8th, 1921, when one mile S. of Lamocks lighthouse.

HSIN WAH

China Merchants Steam Navigation Co.; 1921; Napier & Miller; 1,940 tons; 270x40x21-6; 162 n.h.p.; Wknots; triple-expansion engines.

The steamship *Hsin Wah*, under command of Capt. N. R. Jensen, a Dane, on a voyage from Shanghai to Hong Kong, via Swatow, struck the rocks off Waglan Island on January 16th, 1929. The vessel carried 429 persons, of whom about 100 were crew, the passengers comprising 50 disbanded soldiers, 30 women with many children, and a large number of labourers and emigrants. Of the officers five were European including two Scottish engineers, P. Campbell and H. Beveridge, and an Estonian, P. A. Jacobsen who was first officer. At 3.45 a.m. on the 16th, in very bad weather, the steamship ran on the North Rock of the Ninepins, off Waglan Island, in full view of the lighthouse. The Chinese second officer was in charge of the ship with one quartermaster on the bridge beside himself. Immediately

the ship struck, the second officer gave orders to let go both anchors but the cables snapped and the ship, which had rebounded after the first impact, struck again. The officer then decided to head for the shore, but before the ship had gone more than five cables length she foundered.

From the accounts given by survivors it was established that the lights failed after the first impact and that panic broke out among the passengers. Two lifeboats were launched but the heavy seas swamped one of these as soon as it touched the water. Four large rafts crowded with people got away but only one, on which there were originally 11 persons, came to land with 3 survivors, one of whom lost his reason and committed suicide. Captain Jensen was last seen on the bridge making signals. The lighthouse keepers on Waglan Island wirelessed to Hong Kong for assistance but it was two hours before a tug arrived, by which time the *Hsin Wah* had foundered, only the tops of her masts being visible. Mr. Jacobsen, the first officer, was picked up by fishermen after six hours in the water. He was the only officer saved.

The British authorities at Hong Kong despatched two R.A.F. aircraft to search for survivors. The number rescued and brought to Hong Kong was 28, leaving 401 as the total of those lost.

HSIN YANG MARU

Toa Kaiun K.K.; 1929; *Shanghai Dock & E. Co.*; 1,674 tons; 239X39-9X10; triple-expansion engines. The steamship *Hsin Yang Mam* struck a mine and sank on January 27th, 1945, in the Yangtze River.

HSING TAI PING

Chung Wei S.S. Co.; 1902; *W. Hamilton & Co.*; 3,175 tons; 324X47x22-4; 305 n.h.p.; triple-expansion engines. The Chinese ship *Using Tai Ping* was seized by the Japanese naval authorities and operated by Daido Kaiun K.K. Sailing from Karafuto to Nagoya she went ashore on October 21st, 1938, at Oshima, about 40 miles S.S.W. of Yokohama, in a typhoon.

HSING YUN MARU

Toa Kaiun K.K.; 3,414 tons. The Japanese ship *Hsing Yun Mam* struck a mine and sank on April 6th, 1945, in the lower reaches of the Yangtze River, China.

HSUAN HUAI

China Merchants Steam Navigation Co.; 1945; *Avondale Marine Ways*; 1,873 tons; 250-4X42-1X18-4; compound engines. The Chinese ship *Hsuan Huai* was carrying barrels of petrol on November 2nd, 1948, when there was an explosion and she sank at the mouth of the River Lino, near Yingkow. Ten of her crew were killed.

HUALLAGA

Cia. Peruana de Vap. y dique du Callao; 1911; *Chantiers de Normandie*; 4,403 tons; 360x44-7x21-3; 384 n.h.p.; triple-expansion engines. Sailing from Ilo to Callao, the Peruvian ship *Huallaga* went ashore on February 4th, 1927, and was wrecked.

HUASHAN MARU

2,103 tons. The Japanese ship *Huashan Mam* struck a mine and sank on June 20th, 1945, off Nagasaki.

HUDDERSFIELD

Great Central Railway; 1872; *J. Elder & Co.*; 1,082 tons; 231 x 30 - 2 x 16 • 4; 139 n.h.p.; compound engines. The steamship *Huddersfield* left Antwerp on May 25th, 1903, for Grimsby with 15-20 passengers, mostly seamen returning to England to collect arrears of pay. On the following day she was sunk by collision in the Scheldt. All the passengers were drowned.

HUDDERSFIELD

Evan Jones & Co.; 1900; *S. P. Austin & Son*; 2,055 tons; 289x43-1x18-7; 214 n.h.p.; triple-expansion engines. The British cargo ship *Huddersfield* was wrecked near Clovelly on January 27th, 1908, while on a voyage from Barry to Santa Elena carrying a cargo of coal.

HUELVA

Oldenburg Portugiesische Dampfs. Rhederei; 1944; 1,923 tons. The German ship *Huelva* was bombed and sunk by Russian aircraft on April 24th, 1945, 80 miles from Liban.

HUEMUL

Cia. Sud Americana de Vapores; 1890; *Blohm & Voss*; 3,032 tons; 321 -1X 40 • 2 X 23 • 4; 261 n.h.p.; triple-expansion engines. The Chilean steamship *Huemul* was carrying 250 passengers and grain from Buenos Aires to Callao when the cargo shifted and the ship capsized and sank on February 21st, 1945.

HUGH L. SCOTT

United States Navy; 1921; *Bethlehem S.B. Corp.*; 12,579 tons; 517x72-2x27-8; turbine engines. The American steamship *Hugh L. Scott* was torpedoed and sunk by the German submarine *U-130* on November 12th, 1942, off Casablanca, during the Allied invasion of North Africa. For the full story see *Joseph Hewes*.

HUGHENDEN

Charlton & Thompson; 1900; *J. L. Thompson & Sons*; 3,097 tons; 342 x 45 • 3 x 16 • 1; 292 n.h.p.; triple-expansion engines. The British cargo ship *Hughenden* foundered during a gale on December 21st, 1911, in 48° N., 7° W., while on a voyage from Smyrna to Dublin carrying a cargo of barley. The s.s. *Devonshire*, which was near-by at the time, picked up two men from the sea, but the remainder of the crew were drowned.

HUGIN

Angf. Aktieb. Svithiod; 1889; *Mackie & Thomson*; 1,667 tons; 260 x 36 - 7 x 16 • 6; 150 n.h.p.; triple-expansion engines. The Swedish cargo ship *Hugin* was torpedoed and sunk by a German submarine in the English Channel on February 21st, 1918.

HUGO

Holm & Warsild; 1907; *Howaldtswerke*; 1,422 tons; 241-2X 36-1x16-5; 97 n.h.p.; triple-expansion engines. The Danish ship *Hugo* left Ivigtut on May 20th, 1927, for Copenhagen but was not seen again.

HUGO HAMILTON

Aug. Leffler & Sons; 1883; *Harland & Wolff*; 2,584 tons; 308-2x42-8x25; oilengines. The Swedish motorship *Hugo Hamilton* was sunk by a German submarine off the west coast of Ireland on February 12th, 1917.

HULDRA

Skibs A/S William Hansens Rederi II; 1940; *Nylands Verksted A/S*; 2,112 tons; 275x44x—; compound engines & L.P. turbine. The Norwegian steamship *Huldra*, under German control, struck a mine and sank on March 1st, 1941, off Hustadviken.

HULL

United States Navy, destroyer; 1934; *New York Navy Yard*; 1,395 tons; 341-2x34-2x8-9; 42,800 s.h.p.; 36-5 knots; turbine engines; four 5 in. guns, several smaller, 8 T.T. The destroyers *Hull*, *Monaghan* and *Spence* were returning from patrol with their fuel tanks almost empty when they were overwhelmed by a typhoon E. of Samar, Philippine Islands. The storm broke at dawn on December 17th, 1944, with a wind velocity estimated at 130 miles per hour. The vessels attempted to refuel at sea but the conditions made this impossible. The *Spence* was the first to get into difficulties and at about 9 a.m. her steering gear was damaged and she became unmanageable. Three hours later she sank with most of her complement of 341.

The *Hull* was at first more fortunate than her consorts but at about 11 a.m. she too lost her steering gear and although she remained afloat for more than an hour afterwards there was never any hope of saving her. She sank with 201 officers and ratings. The survivors numbered 62.

The *Monaghan*, a sister ship to the *Hull*, foundered half-an-hour later with the loss of all but six of her crew.

HULL TRADER

HULL TRADER

Free Trade Wharf Co.; 1917; J.P. Rennoldson & Sons; 7 17 tons; 178-2x30x13-1; 98 n.h.p.; triple-expansion engines. The steamship *Hull Trader*, on a voyage from London to Hull, struck a mine and sank on June 23rd, 1941, off the River Humber. Eleven of her crew of 14 were killed.

HUMANITAS

Soc. Anon. Industria Armamento; 1943; 7,980 tons; oil engines. The Italian motorship *Humanitas* was bombed by German aircraft and torpedoed by a Dutch submarine at Bastia on September 11th, 1943.

HUMBER

Mercantile S.S. Co.; 1888; W. Gray & Co.; 2,198 tons; 281-4X38-1x20-5; 217 n.h.p.; triple-expansion engines. The British cargo ship *Humber* was wrecked on Sand Island, Pescadores, on March 5th, 1896, while on a voyage from Moji to Fiume carrying a cargo of rice.

HUMBER

Lancashire & Yorkshire Railway Co.; 1903; A. McMillan & Co.; 1,023 tons; 240'1x33-1x15-7; 229 n.h.p.; triple-expansion engines.

The British cargo ship *Humber* sank after a collision on February 12th, 1912, about five miles west of Elbe Lightship No. 1. She was carrying a coal and general cargo on a voyage from Goole to Hamburg.

HUMBER

I. B. Knapp; 1899; Ardrossan Dry Dock Co.; 280 tons; 130-2x22-4x9-4; 35 r.h.p.; 8 knots; compound engines. The steamship *Humber* was torpedoed and sunk by a German submarine two miles E. of Sunderland on January 25th, 1918. Seven men, including the captain, were killed.

HUMBOLT

New York & Havre Steam Navigation Co.; 1851; Westervelt & McKay, New York; 2,350 tons; 292x40x27; 10-3 knots. The *Humbolt* was one of two paddle steamers owned by the New York & Havre Steamship Co., and sailed under the American flag. After a very brief career of two years she was wrecked on the "Sister's Rock," near Halifax, N.S., on December 5th, 1853. Her loss was due to a local fisherman who represented himself as an experienced pilot, although he knew little about such matters. Eight months later the other ship of the line which had maintained the service, the *Franklin* (which see), was wrecked off New York.

Fortunately everyone on board the *Humbolt*, with the exception of one person, was saved. The company never recovered from the loss of these two ships and it was wound up in 1861, on the outbreak of the American Civil War.

HUNDVAAGO

H. Ostervold; 1915; Bergens Mek. Vcerks.; 1,901 tons; 266-9 x 42-1x18-1; 155 n.h.p.; triple-expansion engines. The Norwegian cargo ship *Hundvaago* was torpedoed and sunk by a German submarine in the Bay of Biscay on August 4th, 1918.

HUNGARIAN

Allan Line; 1859; W. Denny & Bros.; 2,190 tons; 298x38-5x17; 400 n.h.p.; 12 knots; direct acting engines. The steamship *Hungarian* left Liverpool for Portland, Maine, on February 8th, 1860. She carried 205 persons and the mails. On the morning of the 20th at about 4 o'clock her lights were seen from the shore of Cape Sable Island, Nova Scotia. At daybreak no trace of the ship could be discovered, but later six mail bags floated ashore. When the tide ebbed the ship became visible, lying in about 25 feet of water, her starboard bow being clear and the hull having a heavy list. One boat in good condition was found, and fragments of others drifted ashore. There were also many bodies, but no survivors.

An Inquiry established the fact that there had been a grave dereliction of duty on the part of the lighthouse keepers at Barrington, on the mainland of Nova Scotia, and that on the night of the wreck the light was not burning. This was no doubt a contributory, if not the main cause, of the disaster in which every one of the 205 persons on board lost their lives.

HUNGERFORD

Shipping Controller (G. Heyn & Sons); 1913; A. G. Weser; 5,811 tons; 420-4x56-2x29-6; 520 n.h.p.; 11 knots; triple-expansion engines.

The steamship *Hungerford* was torpedoed and sunk by a German submarine on April 16th, 1918, nine miles S.S.E. of the Owers lightship. Eight of her crew were killed. The captain was among the survivors.

HUNSBROOK

G. Heyn & Sons; 1909; Swan, Hunter & Wigham Richardson; 4,463 tons; 400-8x52-5x25-7; 523 n.h.p.; triple-expansion engines.

The British cargo ship *Hunsbrook*, was wrecked in 23 ° S., 14 ° 22' E., on November 7th, 1919, while on a voyage from Barry to Reunion, carrying a cargo of coal.

HUNTER

British Navy, destroyer; 1936; Swan, Hunter & Wigham Richardson; 1,340 tons; 323x33x8-5; 34,000 s.h.p.; 35-5 knots; turbine engines; 3-drum boilers; four 4-7 in. guns, 7 smaller; 8 T.T.

The destroyer *Hunter* was one of a flotilla of five ships which entered Ofot Fjord on April 10th, 1940, to engage a German flotilla of 11 large and heavily armed destroyers. In the action which ensued *Hunter* was sunk, but owing to the intensity of the fighting none of the British ships could afford her any help. It was at first thought that she had gone down with the whole of her complement of 145, but later it was discovered that two officers and 44 ratings had been picked up by the German destroyer *Erich Giese*. This party was landed at Narvik and held prisoner until April 13th, on which date a second British attack made by the battleship *Warspite* and nine destroyers, sank all the German warships. *Hunter's* party, together with 129 merchant seamen, was released by the Germans and sent to Sweden.

The full story of the battle of Narvik is told under the flotilla leader *Hardy*, which was lost in the first action.

HUNTINGDON

Federal Steam Navigation Co.; 1920; Bremer Vulkan; 10,946 tons; 520-7x64-2x38-1; 1,270 n.h.p.; 14 knots; triple-expansion engines & L.P. turbines.

The liner *Huntingdon*, Capt. J. P. Styryn, sailed from the Clyde on February 19th, 1941, bound for Freetown and Brisbane. On February 24th, she was torpedoed and sunk by a German submarine about 500 miles W. of the Hebrides. There were no casualties.

This was the second occasion on which Capt. Styryn lost his ship through enemy action, he having been in command of the *Middlesex* when she was mined some seven weeks previously.

HUNTLEY

British Navy, fleet minesweeper; 1919; Eltringham; 710 tons; 231x28-3x7-5; 2,200 i.h.p.; 16 knots; triple-expansion engines; Yarrow boilers; one 4 in. gun, 1 smaller. The fleet minesweeper *Huntley*, Lt. Cdr. E. S. Cotsell, was attacked by enemy aircraft between Alexandria and Derna on January 31st, 1941. The vessel was struck by an aerial torpedo and sank with the loss of Lt. Cdr. Cotsell and 17 ratings.

HUNTSCLIFF

Union-Castle Mail S.S. Co.; 1911; Bremer Vulkan Schiff. & Masch.; 5,442 tons; 419-8x54-5x28-2; 387 n.h.p.; quadruple-expansion engines.

The British cargo ship *Huntsdiff*, formerly the captured German ship *Rufidji*, foundered 120 miles off the Irish coast on October 17th, 1918. She was on a voyage from Montreal to the United Kingdom carrying a cargo of oats.

HUNTSMOOR

The Admiralty (G. Heyn & Sons); 1901; Flensburger Schiffsbau Ges.; 4,957 tons; 391x47-8x21-6; 810 n.h.p.; 14 knots; quadruple-expansion engines.

The steamship *Huntsmoor* was torpedoed and sunk by a German submarine on February 20th, 1918, 23 miles S. 4 W. of the Owers lightship. The captain and 19 of the crew were killed.

HUNTSTRICK

F. C. Strick & Co.; 1902; *Workman Clark & Co.*; 8,151 tons; 501 X 59 -3 X32-9; 831 n.h.p.; 12 knots; triple-expansion engines. The steamship *Huntstrick* was torpedoed and sunk by a German submarine 80 miles W.N.W. of Cape Spartel on June 8th, 1917. The captain and 14 of the crew were killed.

HUNTSVALE

Fisher Alimonda & Co.; 1898; *Flensburger Schiffsbau Ges.*; 5,398 tons; 416-3x53-9x20-1; 500 n.h.p.; 12 knots; quadruple-expansion engines.

The steamship *Huntsvale* was torpedoed and sunk by a German submarine 200 miles E. of Malta on November 4th, 1916. The captain and six of her crew were killed.

HUPEH

John Swire & Son; 1891; *Wm. Gray & Co.*; 2,819 tons; 304-5X41-1x19-1; 240 n.h.p.; triple-expansion engines. The British cargo ship *Hupeh* foundered in about 14° N., 117° E., in November, 1899, while on a voyage from Sourabaya to Hong Kong carrying a cargo of sugar.

HURRICANE

British Navy, destroyer; 1939; *Vickers Armstrong*; 1,375 tons; 323x33x8-5; 34,000 s.h.p.; 35-5 knots; turbine engines; 3 drum boilers; four 4 - 7 in. guns, 7 smaller, 8 T.T. The destroyer *Hurricane*, Cdr. J. R. Westmacott, was under construction for the Brazilian navy as the *Japura* and was taken over by the Admiralty at the outbreak of the Second World War in September, 1939. The destroyer was one of those which went to the rescue of the s.s. *City of Benares* (which see) and took off a number of children from that vessel. In 1941 she was bombed and sunk, but fortunately in shallow water, and was raised shortly afterwards.

On December 24th, 1943, when N.E. of the Azores the *Hurricane* was torpedoed and sunk by a German submarine.

HURST CASTLE

British Navy, corvette; 1943; *Caledon Shipbuilding Co.*; 1,010 tons; 252x36-7x13-5; 2,880 Lh.p.; 18-5 knots; triple-expansion engines; one 4 in. gun, several smaller.

The corvette *Hurst Castle*, Lt. H. G. Chesterman, D.S.C., R.N.R., was torpedoed and sunk by a German submarine off Tory Island on September 1st, 1944. The vessel carried a complement of about 100.

HURWORTH

British Navy, destroyer; 1941; *Vickers Armstrong*; 1,025 tons; 272-5x28-2x7-7; 19,000 s.h.p.; 27-5 knots; turbine engines; 3 drum boilers; four 4 in. A.A. guns, 8 smaller. The destroyer *Hurworth*, Cdr. R. H. Wright, D.S.C., was mined and sunk off Kalimno Island, Dodecanese, on October 22nd, 1943. Six officers and 127 ratings were killed. Cdr. Wright and another officer were wounded.

HUSSAR

British Navy, fleet minesweeper; 1934; *Thornycroft & Co.*; 815 tons; 230x33-5x7-9; 1,770 i.h.p.; 16-5 knots; compound engines; 3-drum boilers; two 4 in. A.A. guns, 9 m.g. The fleet minesweepers *Hussar* and *Britomart* were the victims of an attack by Allied aircraft off Cap d'Antifer on August 27th, 1944. Both ships were mistaken for enemy light craft and were bombed and sunk. The *Hussar*, which was commanded by Lt. R. Nash, M.B.E., R.K.R., went down with three officers and 52 ratings. Lt. Nash and three other officers were wounded.

HUTTON

H. Clapham & Co.; 1871; *W. Doxford*; 2,323 tons; 301X 36-3x26; 200 h.p.; compound inverted engines. The British cargo ship *Hutton* was wrecked at Perim on December 22nd, 1882. She was on a voyage from Bombay to Port Said carrying a cargo of linseed.

HUZAN MARU

Miyachi Kisen K.K.; 1907; *Swan, Hunter & Wigham Richardson*; 1,972 tons; 286 x 42-1X18•5; 210n.h.p.; triple-expansion engines. The *Huzan Maru* sank after a collision on July 16th, 1943.

HUZAN MARU

Korea S.S. Co.; 1920; *Osaka Tekkoshu*; 1,631 tons; 260X 35X—; 710 n.h.p.; triple-expansion engines. The *Huzan Maru* went ashore on July 21 st, 1947, in Southern Korea and was wrecked.

HVOSLEF

H. Staubo & Co.; 1927; *Swan, Hunter & Wigham Richardson*; 1,630 tons; 255-1x35-5x11-3; 314n.h.p.; triple-expansion engines.

The Norwegian steamship *Hvoslefwas* torpedoed and sunk by a German submarine on March 10th, 1942, on a voyage from Saga La Grande to New York. Six of her crew were killed.

HWA TUNG

East China S.S. Co.; 1918; *Bethlehem S.B. Corp.*; 4,078 tons; 341 x48-2x24-5; 339 n.h.p.; triple-expansion engines. The *Hwa Tung* was carrying phosphate from Los Angeles to Shanghai when she sprang a leak and sank on December 14th, 1946, 335 miles W. of San Pedro.

HWAH YANG

China Merchants Nav. Co.; 1883; *D. & W. Henderson & Co.*; 1,768 tons; 280x33-2x17-6; 121 n.h.p.; triple-expansion engines.

The Chinese ship *Hwah Yang* was carrying passengers when she went ashore on April 21st, 1931, on Saddle Island, in the Heishan Group, and was attacked by pirates. Fortunately loss of life was prevented by the timely arrival of the Chinese steamship *Kung Ping*, which drove off the pirates and rescued the passengers and crew.

HWEI AN

HweiHaiS.S. Co.; 1896; *Helsingors Jernsk & Maskin.*; 1,377 tons; 239-9x34-4x20-1; 127n.h.p.; triple-expansion engines. The *Hwei An* sank in July, 1937, in the Yangtze River.

HYBERT

Lykes Bros. S.S. Co.; 1920; *C. A. Fuller & Co.*; 6,120 tons; 395-5x55x34-9; 596 n.h.p.; triple-expansion engines. The American steamship *Hybert*, in convoy from Murmansk to New York, struck a mine and sank on July 5th, 1942, off Reykjavik. Four other ships in the convoy were sunk in the same minefield.

HYDRA

Netherlands Navy, minelayer; 1911; *Amsterdam Dockyard*; 593 tons; 163x29x9; 800 i.h.p.; 12 knots; three 3 in. guns, 1 m.g.

The Dutch minelayers *Hydra* and *Medusa* were sunk in the Zuider Zee during the German invasion of Holland which commenced on May 10th, 1940.

HYDRA H

Bruusgaard, Kiosteruds Dampsk-A/S; 1919; *New Eng. & S.B. Works*; 1,375 tons; 242-7x37-2x15-9; 132 n.h.p.; triple-expansion engines.

The Norwegian steamship *Hydra II* was torpedoed and sunk by a Japanese submarine on December 12th, 1941, on a voyage from Bangkok to Hong Kong. Forty-one of her crew were lost.

HYDRAIOS

Ath. Coulouras; 1902; *C. Cornell & Co.*; 4,476 tons; 385-5 x 50-2x28-5; 422 n.h.p.; triple-expansion engines. The Greek steamship *Hydraios* was torpedoed and sunk by a German submarine on July 6th, 1943, off Inhambane on a voyage from Aden to Lourenco Marques.

HYDRO

T. Wilson, Sons & Co.; 1911; *Earless Shipbuilding Co.*; 1,228 tons; 250-2x35-2x15-9; 116n.h.p.; 10-5 knots; triple-expansion engines.

The steamship *Hydro*, Capt. G. Sharp, was bound from Liverpool to Trondhjem with a general cargo of cotton, rubber and other goods. She carried a crew of 20. On Thursday, January 21st, 1915, heavy seas washed away the hatches and the ship began to fill. At 9 p.m. the captain gave orders to launch the boats, one of which was washed away. In the early hours of the 22nd, 15 miles off

HYPERIA

Giants Causeway, the *Hydro* sank with 14 of her crew. The first officer was among the survivors.

HYPERIA

British & South American Steam Navigation Co.; 1895; J. L. Thompson & Sons; 3,908 tons; 358x45-2x19; 350n.h.p.; 10 knots; triple-expansion engines.

The steamship *Hyperia* was torpedoed and sunk by a German submarine 84 miles N.W. by N. of Port Said on July 28th, 1918. Seven men, including the captain, were killed.

HYPERION

British Navy, destroyer; 1936; Swan, Hunter & Wigham Richardson; 1,340 tons; 323x33x8-5; 34,000 s.h.p.; 35-5 knots; turbine engines; 3-drum boilers; four 4-7 in. guns, 7 smaller; 8T.T.

The destroyer *Hyperion*, Cdr. H. L. Nicholson, was mined and sunk in the Adriatic on the night of December 18th, 1940. The ship was part of a force of cruisers and destroyers engaged in a sweep of the Adriatic as far as Bari and Durazzo. She lay off the Italian batteries in a disabled condition for over two hours without being discovered after which she was taken in tow. Later in the night all hope of saving her had to be abandoned and she was sunk by ships in company.

The *Hyperion* carried a complement of 145, of whom two ratings were killed and one officer and 12 ratings wounded.

HYPOLITE WORMS

Worms & Cie.; 1882; Lobnitz & Co.; 1,117 tons; 238x31-6x16-8; 208 n.h.p.; compound engines.

While on a voyage from Dunkirk to Havre the French ship *Hypolite Worms* was in collision with another on March 16th, 1924, and sank in the mouth of the River Seine.

HYTHE

South Eastern & Chatham Railway Co.; 1905; W. Denny & Bros.; 509 tons; 195-3x28-1x14-2; 104r.h.p.; 12 knots; triple-expansion engines.

The steamship *Hythe* was serving as an auxiliary minesweeper during the First World War. On the night of October 28th-29th, 1915, when off Cape Helles in the Dardanelles, she was run down by the armed boarding-steamer *Sarnia*. At the time the *Hythe*, commanded by Lt. Cdr. Bird, was carrying troops. There was scant time for saving life and altogether two military officers and 143 rank and file, together with one warrant officer and nine ratings, members of the crew, were drowned.

HYTHE

British Navy, fleet minesweeper; 1940; British Isles; 672 tons; 174x28-5x9-5; 2,400 s.h.p.; 16 knots; turbine engines; 3-drum boilers; one 3 in.A.A. gun, two 20mm.A.A.m.g. The fleet minesweeper *Hythe*, Lt. Cdr. L. B. Miller, was torpedoed and sunk by a German submarine off Bougie, Algeria, on October 11, 1943. The vessel's normal complement was 60.

HYUGA

Japanese Navy, dreadnought battleship; 1917; Mitsubishi; 29,990 tons; 683x94x28-7; 45,000 s.h.p.; 23 knots; turbine engines; Kanpon boilers; twelve 14 in. guns, eighteen 5-5 in., eight 5 in.A.A., 7 m.g., 4 T.T., 3 aircraft.

The battleship *Hyuga* was one of a group comprising three battleships, two heavy cruisers and one light cruiser, lying in Kure harbour on July 24th, 1945, when a concentrated attack was made upon shipping by British and American naval aircraft. Every ship was sent to the bottom, two of them sinking in shallow water. This was the last large scale air attack prior to the cessation of hostilities between Japan and the Allies on August 15th, 1945.

I. C. WHITE

Panama Transport Co.; 1920; *Sun S.B. Co.*; 7,052 tons; 429-3 X59-2x33-2; 612 n.h.p.; triple-expansion engines. The Panamanian tanker *I. C. White* was torpedoed and sunk by a German submarine on September 27th, 1941, on a voyage from Curacao to Table Bay.

I. P. SUHR

AjSDetDanskeKulkompagni; 1927; *Ostsee Werft A.G.*; 1,999 tons; 267'9x41-1x18-6; compound engines. The Danish ship *I. P. Suhr* was carrying coal from Gdynia to Aarhus when she ran into bad weather on December 1st, 1950, 5 miles S. of Sandhammaren. The vessel shipped a heavy sea which broke the hatch covers and rilled her with water. Twenty of the crew left in one boat which was never seen again. The third engineer, who got away in a boat by himself, was the sole survivor.

IA

Manuel Hadjilias; 1917; *Short Bros.*; 4,860 tons; 385x53x27-3; 369 n.h.p.; triple-expansion engines. The Greek steamship *la* was torpedoed and sunk by a German submarine on July 11th, 1940, on a voyage from Rosario to Cork.

IASON

George J. Livanos; 1943; *Cook, Welton & Gemmell*; 449 tons; 153-8x27-6x14; triple-expansion engines. The trawler *Iason* sank during heavy weather on March 13th, 1955, in approximate lat. 38° 2' N., long. 18° 2' E. The crew were rescued by a lifeboat from s.s. *Stratheden*, but this capsized and 11 of the *Iason* crew and eight of the *Stratheden* crew were drowned.

IBERIAN

F. Leyland & Co.; 1867; 2,930 tons; 390x37-2x29-3; 350 h.p.; compound inverted engines. The British cargo ship *Iberian* was wrecked near Bird Island, Cork, on November 21st, 1885, while on a voyage from Boston to Liverpool, carrying a general cargo.

IBERIAN

F. Leyland & Co.; 1900; *Sir J. Laing & Sons*; 5,223 tons; 437X 48-8x29-9; 470 n.h.p.; 12 knots; triple-expansion engines. The steamship *Iberian*, Capt. Jago, was intercepted by a German submarine nine miles S. by W. of Fastnet, on Friday, July 30th, 1915, at about 4 p.m. The ship was shelled by the submarine, beginning at a range of four miles and gradually decreasing. When quite near, the submarine commander hailed Capt. Jago, telling him to lower his boats and abandon ship. This order was obeyed and the Germans then handed over to Dr. Patrick Burns and the captain some bandages for those wounded. The submarine then sank the *Iberian*.

During the shelling several persons had been killed, the first shot hitting the *Iberian's* forecandle and exploding among the crew, killing four and wounding eight. Other casualties included three Americans killed and six wounded. The survivors numbered 63, of whom two died in the boats. Rough weather nearly swamped the boats, but after six hours all were picked up.

IBEX

Jackson Bros. & Cory; 1880; *E. Withy & Co.*; 1,300 tons; 245-5x34x15-4; 130 h.p.; compound engines. The British cargo ship *Ibex* was wrecked near Soderarm lighthouse on November 21st, 1892, while on a voyage from Stettin to Sunds-vall carrying a cargo of flour.

IBIS

British Navy, sloop; 1940; *British Isles*; 1,250 tons; 229-5X 38x8-5; 3,600 s.h.p.; 19-25 knots; turbine engines; 3-drum boilers; six 4 in. A.A. guns, 10 smaller. The sloop *Ibis*, Cdr. H. M. Darrell-Brown, took part in the landing operations at Algiers on November 10th, 1942, when she fell victim to the bombs of French aircraft and sank. Cdr. Darrell-Brown, three officers, and 104 ratings were killed.

IBURI MARU

Hokkaido Tanko Risen K.K.; 1938; *Tama S.B. Co.*; 3,291 tons; 332-8x47x25; 191 n.h.p.; triple-expansion engines & L.P. turbine. The steamship *Iburi Maru* was torpedoed and sunk by the U.S. submarine *Sailfish* on June 25th, 1943, off Kamaishi, Japan.

ICARION

Aegeon S.S. Co.; 1912; *Northumberland S.B. Co.*; 4,013 tons; 375-1x51-3x24-2; 385 n.h.p.; triple-expansion engines. The Greek steamship *Icarion* was torpedoed and sunk by a German submarine on January 20th, 1942, about 90 miles E. of Newfoundland on a voyage from Manchester to Halifax. Nine of her crew of 29 were lost.

ICHANG

China Navigation Co.; 1873; *A. & J. Inglis*; 1,782 tons; 242• 6 X 36-1x20-8; 250 h.p.; lever engines. The British cargo ship *Ichang* was wrecked near Ningpo on November 15th, 1891, while on a voyage from Shanghai to Ningpo carrying a general cargo.

ICHIYO MARU

Asano Bussan K.K.; 5,106 tons. The tanker *Ichio Maru* was torpedoed and sunk by the U.S. submarine *Jack* on February 19th, 1944, about 200 miles W. of Luzon Island, Philippines.

ICHIYU MARU

Kyodo Kogyo K.K.; 5,061 tons. The tanker *Ichiyu Maru* was torpedoed and sunk by the U.S. submarine *Blue fish* on December 29th, 1943, in the Karimata Strait, S.W. Borneo.

IDA

A.N. Kambani; 1889; *W. Gray & Co.*; 1,708 tons; 260-2X 36-6x18-2; 148 n.h.p.; triple-expansion engines. The Russian ship *Ida* was captured by the German battleship *Goeben*, which was flying the Turkish flag. The seizure was on October 29th, 1914, before the outbreak of hostilities between Turkey and Russia. She was condemned as a prize, renamed probably *Iniada* or *Candilli*, and sailed for the Turkish Government between Zonguldak and Constantinople (Istanbul). Two versions are given of her loss (a) she was attacked by a Russian submarine, ran aground at Cape Keften and became a total loss (b) she was sunk by gunfire from a Russian naval ship. She is supposed to have been lost in 1916 or 1917.

IDA

H. Skougaard; 1883; *A. Hall & Co.*; 1,172 tons; 239-9x34x16-1; 143 n.h.p.; compound engines. The Norwegian cargo ship *Ida* was sunk by a German submarine in the North Sea on February 8th, 1917.

IDA

Italia Soc. Anon. di Nav.; 1923; *Cantiere Navale Triestino*; 6,131 tons; 417-7x54-2x30-2; 517 n.h.p.; triple-expansion engines. The Italian steamship *Ida* foundered during a storm on October 23rd, 1944, off the south coast of Sjaelland, Denmark.

IDA KNUDSEN

Knut Knutsen, O.A.S.; 1925; *A/S Nakskov Skibsværft*; 8,913 tons; 465-7x62-1x37-3; 714 n.h.p.; oil engines. The Norwegian motor vessel *Ida Knudsen* was torpedoed and sunk by a German submarine on July 21st, 1941, 400 miles from Gibraltar inward bound from Trinidad with 13,000 tons of petrol. Five of her crew were killed.

IDAHO

Shipping Controller (H. Samman & Co.); 1899; *W. Gray & Co.*; 3,023 tons; 325x47x22-4; 256 n.h.p.; 9 knots; triple-expansion engines. The steamship *Idaho* was torpedoed and sunk by a German submarine on August 19th, 1918, 120 miles N. by W. i W. of Cape

IDRAET

Villano. Eleven men were killed. The captain was among the survivors.

IDRAET

G.T.Monsen; 1873; *Short Bros.*; 1,067 tons; 219-9x31-1x16-7; 121 n.h.p.; compound engines.

The Norwegian steamship *Idraet* foundered in the North Sea on March 10th, 1899. Twelve of the crew were drowned.

IGRANE

Obalna Plovidba; 750 tons.

During a gale on December 24th, 1959, in the N. Adriatic about one mile off Rijeka, the Yugoslav wood auxiliary sailing ship *Igrane* sank after the cargo of pyrites had shifted and there was an explosion. Seven of the crew of 13 were lost.

IIDA MARU

Japanese Government; 1911; *Trondhjems Mek. Verksted*; 1,105 tons; 226-1x36-5x15-8; triple-expansion engines. The steamship *Iida Maru* was formerly the Norwegian *Hai Ping*, seized by the Japanese. On February 16th, 1945, she was bombed and sunk by U.S. land-based aircraft about 100 miles W. of Palawan Island, Philippines.

IJORA

U.S.S.R.; 1921; *Murdoch & Murray*; 2,815 tons; 324x46-4x23-8; 265 n.h.p.; triple-expansion engines.

The Russian steamship *Ijora*, on a voyage from North Russia to Iceland, was intercepted by a German raider on March 12th, 1942, S. of Spitzbergen, and sunk by gunfire. A few survivors landed at Svalbard.

IKA

Ungaro Croata di Nav.; 1885; *Stabilimento Tecnico*; 110 tons; 123 X14x6; 22 n.h.p.; compound engines.

The Austrian pleasure steamship *Ika* with a large number of passengers on board was in collision with the British steamship *Tyria* 2936 tons, off Fiume on September 20th, 1897. Between 30 and 40 passengers and crew of the *Ika* were drowned.

IKAZUCHI

Japanese Navy, destroyer; 1931; *Uraga*; 1,700 tons; 371-5 x 33-7x9-7; 40,000 s.h.p.; 34 knots; turbine engines; six 5 in. guns, 4 A.A.m.g., 9 T.T.

The destroyer *Ikazuchi* was torpedoed and sunk off the island of Guam, in the Marianas Group, by the U.S. submarine *Harder* on April 13th, 1944. The destroyer's normal complement was 197.

IKHONA

British India S.N. Co.; 1900; *A. & J. Inglis*; 5,252 tons; 410-2 X 50-7x28-8; 387 n.h.p.; triple-expansion engines.

The British cargo ship *Ikhona* was sunk by the Russian cruiser *Terek* on June 5th, 1905, 150 miles north of Hong Kong. She was on a voyage from Rangoon to Yokohama carrying a cargo of rice.

IKI MARU

Japanese Government Railways; 1905; *Mitsubishi Dockyard & Engineering Works*; 1,608 tons; 270-3x34-8x21-2; 205 n.h.p.; triple-expansion engines.

The *Iki Maru* was reported overdue in November, 1923, and was not seen again.

IKOMA MARU

Nippon Yusen K.K.; 1925; *Yokohama Dock Co.*; 3,156 tons; 352-7x46x27; 284 n.h.p.; triple-expansion engines. The

steamship *Ikoma Maru* was torpedoed and sunk by the U.S. submarine *Seahorse* on January 21st, 1944, about 200 miles N. of New Guinea.

IKOMASAN MARU

Goshu Risen K.K.; 1916; *Osaka Iron Works*; 3,173 tons; 305 X 43-7x27-2; triple-expansion engines.

The steamship *Ikomasan Maru* was torpedoed by the U.S. submarine *Spot* and sunk by carrier-based aircraft on March 17th, 1945, off Foochow.

IKOTSU GO

Japanese Government; 1904; *Nylands Vcerksted*; 1,398 tons; 231-5x35-2x14-7; 132 n.h.p.; triple-expansion engines. The steamship *Ikotsu Go* was formerly the Chinese *Yu Tung*, seized by the Japanese. On August 9th, 1945, she was bombed and sunk by unidentified aircraft off Seishin, Manchuria.

IKUSHIMA MARU

Hamane Shoten K.K.; 1936; *Osaka Iron Works*; 3,943 tons; 365-5x50x26-6; 433 n.h.p.; turbine engines. The steamship *Ikushima (Ikusimd) Maru* was torpedoed and sunk by the U.S. submarine *Stingray* on March 30th, 1944, 235 miles south east of the Volcano Islands.

IKUTA MARU

Nippon Yusen K.K.; 1936; *Mitsubishi Jukogyo K.K.*; 2,969 tons; 301-8x45-3x26-2; 214 n.h.p.; triple-expansion engines. The steamship *Ikuta Maru* was taken over by the Japanese Navy and converted into an auxiliary gunboat. On January 12th, 1944, she was bombed and sunk by U.S. land-based aircraft off Lae Island.

IKUTA MARU

Tochigi Kisen K.K.; 1,018 tons.

The tanker *Ikuta Maru* struck a mine and sank on August 11th, 1944, off Palembang, Sumatra.

IKUTAGAWA MARU

Toyo Kaiun K.K.; 2,220 tons.

The steamship *Ikutagawa Maru* was torpedoed and sunk by the U.S. submarine *Kingfish* on October 24th, 1944, off the Bonin Islands.

IKUTAGAWA MARU

Japanese Government; 4,013 tons.

The *Ikutagawa Maru* was bombed and sunk by U.S. carrier-based aircraft on January 12th, 1945, 15 miles E. of Gocong, Viet-Nam.

ILA

Per T. Lykke; 1939; *Porsgrund Mek. Vcerksted*; 1,583 tons; 246-6x37-9x18-2; 63 n.h.p.; compound engines & L.P. turbine.

The Norwegian steamship *Ila* was torpedoed and sunk by a German submarine on October 15th, 1941, on a voyage from Sydney, N.S.W. to Glasgow. Fourteen of her crew were killed.

ILDERTON

William Milburn & Co.; 1882; *A. Leslie & Co.*; 2,474 tons; 300 x37x27-3; 300 h.p.; compound inverted engines. The British cargo ship *Ilderton* was wrecked on June 23rd, 1883, off Ushant. She was on a voyage from Bombay to Hull carrying a cargo of wheat and linseed.

ILE DE BREHAT

Cie. Generale Transatlantique; 1919; *Northwest Steel Co.*; 6,176 tons; 409-8x54-2x27-7; 579 n.h.p.; turbine engines. The French steamship *He de Brehat* struck a mine and sank on February 11th, 1944, outside Naples.

ILES DE LOS

Cie. Marsaillaise de Navigation a Vapeur; 1934; *Helsingors Jernsk&Msk.*; 2,900 tons; 310x42-7x26-2; 404 n.h.p.; oil engines.

Having been reported in distress 11 miles S.W. of El Hank, the French motorship *lies de Los* was wrecked on January 2nd, 1935, at Ain Diab, three miles S. of Casablanca, and broke in three.

ILIOS

Lumsden, Byers & Co.; 1882; *Short Bros.*; 2,020 tons; 274-7X 37x27-1; 162 n.h.p.; compound engines.

The steamship *Ilios* was sunk in a collision with the steamship *Pierremont*, 1,312 tons, off Soutar, South Shields, on December 16th, 1898. Twenty were drowned.

ILLER

Norddeutscher Lloyd; 1938; Deutsche Schiff-u. Maschinbau, A.G. Weser; 3,290 tons; 358x50-2x19-9; 885 n.h.p.; oil engines.
The German motorship *Iller* was bombed and sunk by Russian aircraft on October 9th, 1944, off Mantu Oesel Island.

ILLINOIS

States Steamship Co.; 1920; Los Angeles S.B. & D.D. Co.; 5,447 tons; 410x54x27-2; 422 n.h.p.; triple-expansion engines.
The American steamship *Illinois* was torpedoed and sunk by a German submarine on June 2nd, 1942, about 400 miles N.W. of Puerto Rico on a voyage from Vizagapatam to Baltimore with manganese ore. Thirty-two of her crew of 38 were lost.

ILLYRIAN

F. Leyland & Co.; 1867; 2,967 tons; 390x37-2x29-3; 350 h.p.; compound inverted engines.
The British cargo ship *Illyrian* was wrecked off Cape Clear on May 15th, 1884, while on a voyage from Liverpool to Boston carrying a general cargo.

ILMARINEN

Finnish Navy, coastal defence ship; 1931; A.B. Crichton-Vulcan; 3,900 tons; 305x55-5x14-7; 5,000 b.h.p.; 15-5 knots; Diesel engines; four 10 in. guns, eight 4-1 in.A.A., four 2 pdr., two 20mm.
The Finnish coastal defence ship *Ilmarinen* struck a mine and sank in the Gulf of Finland on September 20th, 1941, during the Russo-Finnish War. The vessel's normal complement was 329.

ILMEN

U.S.S.R.; 1923; J. Frerichs & Co. A.G.; 2,369 tons; 295-2X 42-5x20-3; 186 n.h.p.; triple-expansion engines. The Russian steamship *Ilmen* was torpedoed and sunk by a Japanese submarine on February 17th, 1943, about 900 miles W. of San Diego, California, with the loss of seven lives.

ILMENAU

Bugsier Reed. & Bergungs. A.G.; 1922; Werft Nobiskrug; 1,201 tons; 250 x 37 • 5 x 12 • 9; triple-expansion engines.
The German steamship *Ilmenau* blew up and sank on April 10th, 1941, off Libau.

ILORIN

Elder Dempster Lines; 1920; London & Montrose S.B. Co.; 815 tons; 189-4x30-2x12-6; 99 r.h.p.; 10 knots; triple-expansion engines.
The tender *Ilorin*, Capt. C. L. Bott, was torpedoed and sunk by a German submarine on September 1st, 1942, not far from Accra, on the Gold Coast. Thirty-two men, including Capt. Bott, were killed.

ILSE FRITZEN

German Government; 1922; Ateliers & Chantiers de France; 5,099 tons; 352-8x52-6x28-6; triple-expansion engines. The steamship *Use Fritzen* was formerly the French *St. Octave*, seized by the Germans. On January 26th, 1945, she was bombed and sunk by British aircraft near Askeroll, Norway.

ILSTON

Swansea Steamers; 1915; Dunlop Bremner & Co.; 2,426 tons; 300-2x44-1x18-8; 255 n.h.p.; 9-5 knots; triple-expansion engines.
The steamship *Ilston* was torpedoed and sunk by a German submarine four miles S.E. of the Lizard on June 30th, 1917. Six men were killed. The captain was among the survivors.

ILTIS

German Navy, gunboat; 1878; Danzig; 489 tons; 139-7X 25-1x9-9; 380 i.h.p.; 9 knots; compound engines; two 4-1 in. guns.
The gunboat *Iltilis* spent the whole of her time as a unit of the German navy in service on the China station. She returned home for a brief period in 1886-87, when she was given a thorough overhaul and

sent out again. During the Sino-Japanese War she played a prominent part in protecting her country's interests in Chinese waters, and on one occasion saved the lives of many Chinese seamen after a naval action.

On July 23rd, 1896, she was driven ashore by a typhoon, nine miles S.E. of Shan-tung promontory, and sank with the loss of 68 officers and men. Eleven men were saved, of whom Paymaster Loss was the only officer.

ILTIS

German Navy, gunboat; 1898; Schichau; 900 tons; 203x30x 11; 1,400 i.h.p.; 14 knots; triple-expansion engines; Thorny croft boilers; four 3 • 5 in. guns, six 1 pdr., 2 m.g.
The gunboat *Iltilis* was one of a flotilla of four such vessels blown up by the Germans on the fall of the fortress of Tsingtau on November 7th, 1914. The ship carried a complement of 121 and was of little fighting value. A full account of the ships lost at Tsingtau will be found under the light cruiser *Cormoran*.

ILTIS

German Navy, torpedo boat; 1927; Wilhelmshaven Yard; 800 tons; 304x28x9; 25,000 s.h.p.; 34 knots; turbine engines; Schulz-Thornycroft boilers; three 4-1 in. guns, two 1 pdr., 6 T.T.
The German torpedo boats *Iltilis* and *Seeadler* were escorting a convoy in the Channel in the early hours of May 13th, 1942, when they were attacked near Boulogne by British light forces. The night was rainy with a heavy sea and visibility was poor, enabling the British to discharge torpedoes at close range, and to sink both torpedo boats.

The vessels carried a normal complement of 123.

ILVINGTON COURT

Court Line; 1911; Northumberland Shipbuilding Co.; 4,217 tons; 380x49x26-4; 372 n.h.p.; 10 knots; triple-expansion engines.
The steamship *Ilvington Court* was torpedoed and sunk by a German submarine eight miles N.W. by N. of Shershel, Algeria, on December 6th, 1917. Eight men were killed. The captain was among the survivors.

IMAGIMARU

1,986 tons.
The steamship *Imagi Maru* struck a mine and sank on September 16th, 1944, off Tinaca Point, Mindanao Island, Philippines.

IMERA

Soc. Anon. di Navigazione La Sicania; 1870; W. Pile & Co.; 1,172 tons; 225-7x31x24-6; 138 n.h.p.; compound engines. The Italian cargo ship *Imera* was torpedoed and sunk by a submarine in the Mediterranean on October 2nd, 1917.

IMIZU MARU

Nipponkai Kisen K.K.; 1939; Uraga Dock Co.; 2,925 tons; 305-1x45x24-6; 226 n.h.p.; compound engines. The steamship *Imizu Maru* was sunk by U.S. carrier-based aircraft on June 12th, 1944, about 100 miles W. of the Ladrone Islands.

IMMINGHAM

Great Central Railway Co.; 1906; Swan, Hunter & Wigham Richardson; 2,083 tons; 271x41-2x20-4; 398 n.h.p.; triple-expansion engines.
The British steamship *Immingham* sank off Mudros on June 6th, 1915, while employed as an Admiralty supply ship.

IMO

South Pacific Whaling Co. A/S; 1889; Harland & Wolff; 5,043 tons; 430-7x45-2x30-3; 424 n.h.p.; 12 knots; triple-expansion engines.
The steamship *Imo* was chartered by the Belgian Relief Commission during the First World War. On December 6th, 1917, she was steaming across Halifax Bay, Nova Scotia, when she collided with the French munitions ship *Mont Blanc*. The *Imo* was in ballast at the time and was in consequence somewhat awkward to handle. She struck the *Mont Blanc* a violent blow abreast of the forward hold,

causing some barrels of benzol, carried as deck cargo, to ignite the picric acid in the hold below.

The crew of the *Mont Blanc*, aware of the dangerous nature of their cargo, managed to abandon ship in time, but those on board the *Imp*, 41 all told, were nearly all overwhelmed by the terrific explosion which wrecked their ship and destroyed a large part of the city of Halifax with great loss of life.

The full story of the disaster is told under the *Mont Blanc*.

IMOGEN

British Navy, destroyer; 1936; Hawthorn Leslie; 1,370 tons; 320x33x8-5; 34,000 s.h.p.; 36knots; turbine engines; 3-drum boilers; four 4 • 7 in. guns, 7 smaller, 10 T.T. The destroyer *Imogen*, Cdr. C. L. Firth, M.V.O., was sunk in a collision in dense fog off Duncansby Head, North Scotland, on July 16th, 1940. The vessel caught fire and had to be abandoned. Seventeen ratings were drowned and one died from injuries. One officer and eight ratings were injured.

IMPAVIDO

Italian Navy, torpedo boat; 1942; Italy; 860 tons; 274-5 X31 X8; 16,000 s.h.p.; 28 knots; turbine engines; 3-drum boilers; three 3-9 in. guns, six 20 mm.A.A.; 2 T.T.

The torpedo boat *Impavido* was scuttled off Elba at the time of the capitulation of Italy on September 8th, 1943. The Germans raised the vessel and recommissioned her as the *TA-23*. On April 25th, 1944, she was mined and sunk off Capri.

IMPERATOR ALEXANDER III

Russian Navy, 1st class battleship; 1904; Baltic Works; 13,516 tons; 367-5x76x26; 15,800i.h.p.; 17-6knots; triple-expansion engines; four 12 in. guns, twelve 6 in., two 2% in., twenty 12 pdr., twenty 3 pdr., 4 T.T.

At the outbreak of the Russo-Japanese War in February, 1904, the battleship *Imperator Alexander III* was being completed at Leningrad for the Russian navy, together with three sister ships. These four vessels were destined to play a tragic part as the 1st Division of the famous Baltic Fleet, which was ordered to join the remnants of the Pacific Squadron at Port Arthur. Few naval operations have been so dilatory, or so badly organised. Had all the ships chosen been of the same quality as the *Imperator Alexander III* the result might have been different, but the Russians made the fatal mistake of mixing brand new units with old and slow ones. Such a course could only lead to failure.

The *Imperator Alexander III* was officially credited with a complement of 840 officers and men, her commander being Capt. Buchvostoff. At the battle of Tsu-Shima, fought on May 27th, 1905, it fell to the lot of this ship to lead the Russian line, after the *Kniaz Suvaroff*, flagship of Admiral Rojdestvensky, had been badly mauled and forced to drop out. This occurred just before 3 p.m. and within an hour of the commencement of the battle. Capt. Buchvostoff first swung his line southward to increase its distance from the enemy, then turned northwards, a manoeuvre which the Japanese parried, reversing the direction of their battle fleet by making two 8-point turns to port at intervals of seven minutes. This placed them in a position to cross the "T" of the Russian line.

It was the hope of the Russians on their northward course to break through to Vladivostock, but by 4.30 p.m. they had been forced to turn away and complete a full circle, the ships being in a worse position than when the movement started. The *Imperator Alexander III* and her next stern and sister ship, the *Borodino*, had received the brunt of the Japanese fire, the former now having, in her turn, to haul out of the line for repairs. By 6.30 p.m. she was again in the line and maintained the fight for another hour, but after this she was compelled to turn away and was lost to sight in the fog, which had settled down with the coming of night. •• At about 8 p.m., Admiral Kamimura, commanding the 2nd Japanese division, saw the *Imperator Alexander III* for the last time. She was drifting through the fog with a heavy list. Soon afterwards she capsized and went down. Of her complement of 840 only four were saved, 41 officers and 795 men being drowned.

The full story of the battle of Tsu-Shima is told under the *Kniaz Suvaroff*, flagship of Admiral Rojdestvensky, which was among those lost.

IMPERATRIZA MARIA

Russian Navy, dreadnought battleship; 1914; Nikolaieff Dockyard; 22,500 tons; 551x89-7x27-7; 25,000 i.h.p.; 21 knots; turbine engines; ten 12 in. guns, twenty 5 in., four 2-5 in., four 3pdr., 4 T.T.

The Russian dreadnought *Imperatriza Maria* was completing at Nikolaieff Dockyard, in the Black Sea, when the First World War broke out, but owing partly to shortage of material caused by the war it was some time before the ship was ready for sea. She was, however, the first of a group of three ships of identical design to be completed, but her career was extremely brief. On October 20th, 1916, she caught fire, and although every effort was made to control the flames and flood the magazines, the ship blew up with the loss of about 200 of her crew.

About two years previously the German battle cruiser *Goeben* and the light cruiser *Breslau* (which see) had escaped from the Mediterranean through the Dardanelles and had considerably reinforced the weak Turkish navy. These ships were more than a match for the old battleships and cruisers which constituted Russia's main strength in the Black Sea. The loss of the *Imperatriza Maria*, therefore, was a major disaster for the Russians, as it deprived them at a crucial moment of their one modern battle unit.

IMPERIAL

British Navy, destroyer; 1936; Hawthorn Leslie; 1,370 tons; 320x33x8-5; 34,000 s.h.p.; 36knots; turbine engines; 3-drum boilers; four 4-7 in. guns, 6smaller, 10 T.T.

The destroyer *Imperial*, Lt. Cdr. C. A. de W. Kitcat, was engaged in evacuating the British army from Crete in May, 1941. On the 29th she was the target for a determined attack by German dive-bombers. Although she was not hit, a near miss damaged the steering gear without her officers becoming aware of the damage. Some hours afterwards when approaching the Kaso Straits she suddenly began to steam in circles. Rear-Admiral Rawlings, in command of the force, realised that the ship was too close to Crete to be towed home. He therefore gave orders for the crew to be taken off, together with 300 soldiers. Under cover of darkness all on board were transferred to the destroyer *Hotspur* which then sank her with two torpedoes.

The full story of the Crete Evacuation is told under the cruiser *Calcutta*.

IMPERIAL STAR

F.Leyland&Co.; 1935; Harland& Wolff; 12,427 tons; 524-2x70-4x32-3; 12,000 b.h.p.; 16knots; oilengines.

The liner *Imperial Star*, Capt. S. J. C. Phillips, on a voyage from Liverpool to Malta, in convoy, was torpedoed and sunk by German aircraft on September 27th, 1941, about 50 miles N.E. of Bizerta. She was carrying 340 troops and had a crew of 105 but no lives were lost.

IMPETUOSO

Italian Navy, destroyer; 1913; Pattison, Naples; 680 tons; 238x24x8-4; 18,200 s.h.p.; 35-8 knots; turbine engines;

Thornycroft boilers; one 4-7 in. gun, two 14pdr AA; 2 T.T. The Italian destroyer *Impetuoso* was torpedoed and sunk by the Austrian submarine U-17. The attack took place in the Straits of Otranto on July 10th, 1916. The destroyer's normal complement was 71.

IMROZ

Turkish Government; 1943; W. Simons & Co.; 1,125 tons; 217 • 8 x 37-9 X—; triple-expansion engines.

On January 13th, 1959, there was an explosion and fire on the *Mirador* at Iskenderun, which set fire to the *Imroz*, a salvage vessel. The hull was completely burned away above the waterline and 11 on board were killed.

IN AGHZI

Soc. Ottomane des Mines La Miniere; 1881; C. Putnam; 1,086 tons; 189-9x37-1x22.

The Turkish wood auxiliary sailing ship *In Aghzix Tris lerarchai* was carrying coal from Zonguldak to Constantinople (Istanbul) on September 3rd, 1924, when she sank off Kevken.

INAKE

Campania Naviera Basoa, S.A.; 1888; W. Gray & Co.; 2,292 tons; 290x38-2x20-3; triple-expansion engines. The Spanish steamship Inake went ashore during a fog on April 13th, 1949, half-a-mile E. of Suances Harbour. She was broken up by the heavy seas and disappeared.

INARI MARU

Konan Risen K.K.; 2,759 tons. The Inari Mam struck a mine and sank on July 24th, 1945, in the Inland Sea of Japan.

INAZUMA

Japanese Navy, destroyer; 1932; Fujinagata S.B. Co.; 1,700 tons; 371-5x33-7x9'7; 40,000 s.h.p.; 34 knots; turbine engines; six 5 in. guns, 4 A.A.m.g., 9 T.T.

The destroyer *Inazuma* was torpedoed and sunk off Tawitawi, Philippine Islands, by the U.S. submarine *Bonefish* on May 14th, 1944. The destroyer's normal complement was 197.

INCHULVA

J.E. Guthe & Co.; 1881; C. Mitchell & Co.; 2,229 tons; 285 x 38-1x26-3; 222 n.h.p.; compound engines. The British cargo ship Inchulva foundered on November 4th, 1895, at Santa Maria, Conception Bay, while on a voyage from Cardiff to Acapulco carrying a cargo of coal.

INDEFATIGABLE

British Navy, battle cruiser; 1909; Devonport Dockyard; 18,750 tons; 580x79-5x27-7; 43,000 i.h.p.; 29-1 knots; turbine engines; Babcock boilers; eight 12 in. guns, sixteen 4 in. 3 T.T. The battle cruiser Indefatigable was one of three ships forming the 2nd

Battle Cruiser Squadron, the others being New Zealand, flagship, and Australia. She had a complement of 57 officers and 950 men, under command of Capt. C. F. Sowerby, and, at the battle of Jutland, had on board five civilians. The squadron was not at full strength on this day, as Australia was in dockyard hands.

Prior to the commencement of the battle, the two ships were disposed three miles on the port beam of the 1st Battle Cruiser Squadron, led by Vice-Admiral Beatty, the position of the flagship *Lion* being 56° 46' N., 3° 36' E. at noon, G.M.T. About five miles astern of the battle cruisers was the 5th Battle Squadron, under Rear-Admiral H. Evan-Thomas, and the 1st Destroyer Flotilla. In addition there were a number of light cruisers ahead with another destroyer flotilla acting as a screen. These squadrons and flotillas were engaged in the first phase of the battle of Jutland, the full account of which is told under *Invincible*, flagship of the 3rd Battle Cruiser Squadron, which was lost.

On the German side of the North Sea was Admiral von Hipper, in command of the Scouting Force, consisting of five battle cruisers, five light cruisers and 33 destroyers. This fleet had left the Jade at 2 a.m. and was in the same latitude as the squadrons under Admiral Beatty, but totally unaware of his presence. The distance between the opposing fleets gradually reduced as the day wore on, the cause of their coming together being a neutral steamship which was being overhauled by a German destroyer from one quarter, while H.M.S. *Galatea* overhauled her from another. In this manner the rival admirals became aware of each other's approach, and within a few minutes Beatty had ordered his ships to pursue the enemy. At 3.20 p.m. the main squadrons came in sight of each other and at about 3.45 firing commenced, the range being approximately 16,000 yards. The opposing forces were as follows:—

BRITISH

	tons	knots	guns
<i>Lion</i> (flagship)	...26,350	28-5	eight 13-5 in. sixteen 4 in.
<i>Princess Royal</i>	"	"	" " " "
<i>Queen Mary</i> ...	"	"	" " " "
<i>Tiger</i>	... 28,000	28	" " twelve 6 in.
<i>New Zealand</i> ...	18,800	"	" " sixteen 4 in.
<i>Indefatigable</i> ...	18,750		

GERMAN	tons	knots	guns
<i>Lutzow</i> (flagship)	...28,000	27	eight 12 in. twelve 5-9 in.
<i>Derfflinger</i> ...	"	"	" " " "
<i>Seydlitz</i>	...24,640	26-2	ten 11 in.
<i>Moltke</i>	...22,640	28-4	" " " "
<i>Yonder Tann</i> ...	18,700	25	" " twenty 3-4 in.

The position of the British at the commencement of the action was that all the battle cruisers were in line ahead, *Indefatigable* being the rear ship, and were intended to fire on their opposite targets. Unfortunately the signal from *Lion* was made by flag, and by reason either of distance or of the density of smoke, it was not accepted by *Queen Mary* (which see) and *Tiger*. The distribution of the British fire was therefore very uneven, a factor which contributed in no small measure to the disasters which befell the battle cruiser squadrons. It was Admiral Beatty's intention that *Lion* and her next astern, *Princess Royal*, should concentrate on the German flagship *Lutzow*, leaving *Queen Mary* to fire on the *Derfflinger*. Owing to the signal not being received the latter ship enjoyed immunity from salvos for a considerable time, *Queen Mary* firing on the third ship in the German line, the *Seydlitz*, while *Tiger* fired on the *Moltke*, which was actually the target of *New Zealand*. *Indefatigable* and the *Von Der Tann*, as the rear ships of each line had a contest to themselves without interference from any other vessel.

The Germans enjoyed the advantage of the light, the British being clearly visible against the western sky. At the first onset the shooting was all in favour of the enemy, *Lion* and *Tiger* receiving several hits. A factor which made this phase of the battle much worse for the British was that Admiral Beatty in his eagerness to close von Hipper, had left Evan-Thomas with the 5th Battle Squadron some seven miles behind. These vessels, of *Queen Elizabeth* class, were the fastest and most powerful battleships in the Grand Fleet, and the failure to make use of them from the very outset brought deplorable consequences, permitting what might well have been an overwhelming victory to elude the British.

The range had now decreased to 13,000 yards, and at this distance *Queen Mary* discovered the *Derfflinger's* immunity from salvos and immediately began to register on the German ship. The action had been in progress for 20 minutes when *Lion* was struck by a heavy shell and nearly blown up. She was saved by the presence of mind of Major Harvey of the Marines, who, though mortally wounded, gave orders to close the magazine doors and flood the magazines.

Soon after this, at a little past 4 o'clock, the *Von Der Tann* got a salvo of three shots that fell upon *Indefatigable's* upper deck and penetrated to her magazines. The ship was enveloped in smoke and flame and was observed to haul out of the line heavily down by the stern. A second salvo struck her, and with a loud explosion she turned over and sank.

Of her company of 1,012 only two were picked up by the Germans the suddenness of her disappearance accounting for the loss of the remainder.

The loss of *Indefatigable*, *Queen Mary* and *Invincible* at the battle of Jutland, and the narrow escape of *Lion*, revealed a radical weakness in the protection of this class of ship. The remaining units were at once taken in hand and the defect remedied, so that there was no longer any danger of a flash from exploding shells penetrating the magazines.

INDIA

Peninsular & Oriental Steam Navigation Co.; 1896; J. Caird & Co.; 7,940 tons; 499-9x54'3x25-1; 11,000 i.h.p.; 18 knots; triple-expansion engines.

The liner *India* was taken over by the Admiralty in 1914 and commissioned as an auxiliary cruiser under Cdr. W. G. A. Kennedy, having a complement of 301. On August 8th, 1915, she was torpedoed by a German submarine off the island of Hellevoer, near Bodo, Norway.

The *India* sank with a loss of ten officers and 150 ratings. The survivors numbered 22 officers, including Cdr. Kennedy, and 119 ratings.

INDIA

The Texas Co. (Norway) A/S; J939; Deutsche Werft A.G.; 9,977 tons; 503-8x67-4x34-3; 1,167 h.p.; oilengines. The Norwegian motor tanker India left Talara on September 3rd,

INDIA ARROW

1943, for Sydney and was not seen again. She was thought to have been sunk by a surface raider in about latitude 20° S., longitude 115° W., probably on September 11th.

INDIA ARROW

Socony-Vacuum Oil Co.; 1921; Bethlehem Shipbuilding Corp.; 8,327 tons; 468-3x62-7x32; 3,200 i.h.p.; 11 knots; quadruple-expansion engines.

The American tanker *India Arrow*, Capt. Carl S. Johnson, was torpedoed and sunk by a German submarine off the southern coast of New Jersey on February 4th, 1942. Twenty-six men were killed and one wounded. Capt. Johnson was among the survivors. The vessel was not in convoy at the time of the sinking.

INDIA MARU

Kawasaki Kisen K.K.; 1920; Kawasaki Dockyard Co.; 5,872 tons; 385x51x36; 440 n.h.p.; triple-expansion engines. The steamship *India Maru* was bombed and sunk by U.S. land-based aircraft on April 14th, 1943, N. of Wewak, New Guinea.

INDIAN

P. Pellier; 1848; Jersey; 472 tons.

The wooden barque *Indian* was bound from London to Bombay when she struck on the Cargados Reef on the evening of April 4th, 1850. The captain was aware that the ship was dangerously near the islands but apparently took no steps to check his position or to lie to until daylight. As a consequence of this neglect the ship ran ashore and soon became a total wreck. The captain and eight seamen got into a boat and abandoned the rest of the company. After suffering great privations on the islands for about a fortnight eight survivors were rescued by a passing vessel and taken to Mauritius.

The *Indian* had on board about 22 persons of whom a few were passengers.

INDIAN

Allan Line; 1855; W. Denny & Bros.; 1,764 tons; 278x34x24; 350 n.h.p.; 12 knots; steam engines.

The barque rigged, screw steamship *Indian* left Liverpool in November, 1859, with 157 persons on board, bound for Portland, Maine, with mails for Canada.

In the early morning of November 21st the *Indian* was travelling at full speed under steam and canvas in thick weather. The captain was badly out in his reckoning, believing that he was near Sable Island. Soundings were taken which seemed to confirm him in his opinion. Suddenly the vessel crashed full on to rocks near Cape Race. Three out of the seven boats carried capsized on launching and the fourth was stove in by the breakers.

The ship broke in two and at daylight the forward portion disappeared. The three remaining boats were launched and fared better than their predecessors. About 50 people were picked up by the schooner *Wave* during the day, and in all 130 persons were rescued by various means. The mails were saved, but many of the passengers complained of being plundered by the people along the shore.

The drowned numbered 27.

INDIAN ENTERPRISE

India Steamship Co.; 1946; Shipbuilding Corp. (Wear Branch); 7,319 tons; 431 • 2 x 56 - 3 x 35 - 6; triple-expansion engines. The British cargo ship *Indian Enterprise* was sunk by an explosion on June 19th, 1950, in the Red Sea in 25° 31' N., 35° 27' E. She was carrying a general cargo and 538 tons of explosives on a voyage from Bremen, via London, to Calcutta. A Court of Inquiry found that the explosion was probably due to spontaneous combustion. The master, Capt. P. S. Campbell, and 72 of the crew were lost. There was only one survivor.

INDIANA

Bailey & Leatham; 1889; R. Dixon & Co.; 2,226 tons; 277x38-2x19-2; 188 n.h.p.; triple-expansion engines. The British cargo ship *Indiana* sank after a collision off Worthing on March 1st, 1901, while on a voyage from Venice, via Buriana, to London. She was carrying a general cargo.

INDIANA HARBOR

Pillsbury & Curtis; 1920; American S.B. Co.; 2,612 tons; 251X43-6X26-1; 352 n.h.p.; triple-expansion engines. The American ship *Indiana Harbor* was carrying ore and general cargo from San Francisco to Portland when she went ashore on May 18th, 1927, on Reynolds Rock, ten miles S. of Point Gorda.

INDIANAPOLIS

United States Navy, heavy cruiser; 1931; New York Shipbuilding Corp.; 9,950 tons; 610-2x66x17-3; 107,000 s.h.p.; 32-7 knots; turbine engines; White-Forster boilers; nine 8 in. guns, 12-5 in., 12 smaller, 4 aircraft.

The heavy cruiser *Indianapolis* was torpedoed by a Japanese submarine N.E. of Leyte on July 29th, 1945. The vessel had been used to transport atomic bomb material from San Francisco to Guam and she was returning from this voyage when she was torpedoed.

INDIER

Cie. Maritime Beige (Lloyd Royal); 1918; J. Priestman & Co.; 5,409 tons; 400-3x52-3x28-4; 517 n.h.p.; triple-expansion engines.

The Belgian steamship *Indier* was torpedoed and sunk by a German submarine with the loss of 42 lives on April 3rd, 1941, about 700 miles E.S.E. of Cape Farewell on a voyage from Halifax to the Clyde.

INDIGIRKA

V.S.S.R.; 1886; Scott & Co.; 2,336 tons; 314-9x38x23-7; 249 n.h.p.; triple-expansion engines.

The *Indigirka* struck a reef and sank on December 12th, 1939, in the Okhotsk Sea, near Wakkanai on the N. coast of Hokkaido Island. She was carrying passengers and about 750 lives were lost.

INDONOR

Pan-Norse S.S. Co. S.A. (Wallem & Co.); 1942; W. Gray & Co.; 2,828 tons; 327-9x46-6x —; triple-expansion engines. The *Indonor* went aground on a reef on February 3rd, 1960, on Karimon Djawa, Eilanden, while sailing from Palembang to Surabaya with coal. The ship was pounding heavily and all the crew with the exception of the master were taken off. She sank on February 7th.

INDRA

Torsten Carlbon; 1900; W. Gray & Co.; 2,032 tons; 280-1X39-2x15-7; 153 n.h.p.; triple-expansion engines. The *Indra* left Barry on October 16th, 1941, for Huelva, passed Barry Island on the 17th, and was not seen again. A ship's boat was washed ashore.

INDUNA

Maclay & McIntyre; 1898; A. Stephen & Sons; 4,441 tons; 380X49-9X25-6; 380 n.h.p.; triple-expansion engines. The British cargo ship *Induna* sank after a collision in 33° 16' S., 51° 54' W., on July 11th, 1918. She was on a voyage from Buenos Aires to Liverpool carrying a cargo of wheat and oats.

INDUNA

Maclay & McIntyre; 1925; A. Stephen & Sons; 5,086 tons; 402x52-2x27-5; 431 n.h.p.; triple-expansion engines. The steamship *Induna*, in convoy from Reykjavik to North Russia, was torpedoed and sunk by a German submarine on March 30th 1942, in the Barents Sea. Twenty-five of her crew and six gunners were lost, together with 11 survivors from another torpedoed ship in the convoy.

INDUS

Mercantile S.S. Co.; 1877; C. S. Swan & Co.; 1,907 tons; 285-2x34-2x24-6; 200 h.p.; compound inverted engines. The British cargo ship *Indus* was wrecked near Havre on January 15th, 1883, while on a voyage from Akyab to Rouen carrying a cargo of rice.

INDUS

Peninsular & Oriental S.N. Co.; 1871; W. Denny & Bros.; 3,462 tons; 360-4x40-4x34-1; 535 h.p.; compound inverted engines. The British steamship *Indus* was wrecked 60 miles north of Trin-

comalee on November 8th, 1885, while on a voyage from Calcutta to London carrying a general cargo.

INDUS

Indian Navy, sloop; 1934; Hawthorn Leslie; 1,190 tons; 296-5 x 35-5 x 8-7; 2,000 s.h.p.; 16-5 knots; turbine engines; 3-drumboilers; two 4•7 in. guns, four 3 pdr, 11 smaller. The Indian sloop *Indus* was bombed and sunk by Japanese aircraft at Akyab on April 6th, 1942, when a powerful enemy squadron consisting of three battleships, five aircraft carriers, several cruisers and a large number of destroyers entered the Bay of Bengal. Carrier-borne aircraft made extensive raids on ports and shipping and sank many British warships. The *Indus* carried a normal complement of 119, and her casualties were ten ratings wounded.

INDUS

James Nourse; 1940; Chas. Cornell & Co.; 5,187 tons; 415-6X 55-2x25-6; 387 n.h.p.; 10 knots; oil engines. The motor vessel *Indus*, Capt. C. E. Bryan, was shelled and sunk by the German raider *Santa Cruz* on July 20th, 1942, in lat. 27° S., long. 82° 50' E., on a voyage from Colombo to Fremantle. Twenty-two men were killed. Capt. Bryan was among the survivors.

INDUS MARU

Osaka Syosen K.K.; 1918; Osaka Iron Works; 4,361 tons; 345X49-8x28-1; 390 n.h.p.; triple-expansion engines. The steamship *Indus Maru* was torpedoed and sunk by the U.S. submarine *Gar* on May 15th, 1943, E. of Mindoro, Philippines.

INDUTIOMARE

Lloyd Royal Beige; 1910; W. Pickersgill & Sons; 1,577 tons; 259-2x39-2x17-6; 162 n.h.p.; triple-expansion engines. The Belgian cargo ship *Indutiomare* was torpedoed and sunk by a German submarine in the North Sea on July 6th, 1917.

INEBOLU

Deniz Yollari Isletmesi Mudurlugu; 1892; Gourlay Bros. & Co.; 1,080 tons; 246-3x33-7x16-2; 303 n.h.p.; triple-expansion engines.

The *Inebolu* foundered in a hurricane on 8.30 pan. on November 11th, 1935, outside Pelican Point at the entrance to Izmir harbour. The ship was carrying 154 passengers, as well as cotton, rice and wheat. It was decided that the loss was due to the faulty stowage of the cargo. Twenty-six lives were lost.

INES CORRADO

Corradp Soc. Anon. di Nav.; 1942; 8,061 tons; oil engines. The Italian motorship *Ines Corrado* was bombed and sunk by Allied aircraft on March 7th, 1943, west of Marettimo.

INFANTA MARIA TERESA

Spanish Navy, armoured cruiser; 1890; Bilbao Dockyard; 6,889 tons; 340x65x21-5; 13,758 i.h.p.; 20-25 knots; triple-expansion engines; two 11 in. guns, ten 5-5 in., eight 2-2 in., eight 1-4 in., 2 m.g., 6 T.T.

The *Infanta Maria Teresa* was the flagship of Admiral Pascual Cervera, in command of the Spanish Atlantic Squadron which had been concentrated in St. Vincent Harbour, Cape Verde Islands, prior to the American-Spanish War. The territory was Portuguese, but the authorities permitted the fleet to lie there without protest. On April 21st, 1898, war broke out between Spain and the United States and the squadron was ordered to prepare for sea. The ships were in the worst possible condition for hostilities but on April 23rd they weighed anchor and sailed for Cuba, reaching Santiago on May 19th without being intercepted by the larger and more powerful American fleet.

For six weeks the Spanish admiral lay in the harbour making no attempt to harry the enemy and even missing simple opportunities to capture colliers, although his ships were short of coal. At last, when matters ashore were very grave, and the Spanish army heavily engaged with the Cuban rebels and the Americans, it was decided to make a dash for Havana. It was hoped that in doing so some damage might be inflicted on the U.S. blockading squadron. This was the theory, but neither ships nor seamen were equal to the task, and the ensuing battle was more of a sacrifice to Spanish national pride than anything else.

The *Infanta Maria Teresa* carried a crew of 556 officers and men, under command of Capt. Concas. It should be noted that the speed given is the designed and not the actual, which was much below this figure. In this respect all the ships were alike, for, in addition to the fouling of the hulls during their months in commission, their engines were in a very poor state of repair. The ammunition supply was fair but not good, and the cartridges did not always fit the guns. The American ships were also foul hulled and suffered some reduction in speed as a consequence, but otherwise they were immeasurably superior to their antagonists.

Admiral Cervera had anticipated finding a well stocked base at Santiago, strongly fortified and able to effect any small repairs that his ships might require. Instead he discovered that the forts mounted only four modern guns of light calibre and that there was little coal, stores or provisions. On their side the people of Santiago experienced a bitter disappointment, for they had been led to expect at least eight large warships and a dozen destroyers. When the news came that the battleship *Pelayo*, 9,744 tons, and the armoured cruiser, *Emperador Carlos V*, 9,089 tons, were not with the squadron owing to the chronic inability of the home yards to overhaul or complete any ship to time, dismay turned to despair.

The fighting going on around Santiago necessitated a call being made on the fleet, and a naval brigade of 1,200 seamen and marines was put ashore. Of this number 34 were either killed or wounded before they were withdrawn to man the ships for their desperate sortie.

The squadron was composed of four armoured cruisers and two destroyers, the ships being as follows:—

	tons	knots	guns
<i>Infanta Maria Teresa</i> (flagship)	6,889	20-25-2	11 in. 10-5-5 in.
<i>Viscaya</i>	"	21	"
<i>Almirante Oquendo</i>	"	20	"
<i>Cristobal Colon</i>	6,840	"	" 10 in. " 6 in
<i>Furor</i> (destroyer)	370	28	" 12 pdr 2-6 pdr
<i>Pluton</i> (destroyer)	400	30	" 14 " " "

The U.S. blockading fleet was much more powerful and composed entirely of modern naval units.

U.S. NORTH ATLANTIC SQUADRON

	tons	knots	guns
<i>New York</i> (flagship, armoured cruiser)	8,200	21	6-8 in. 12-4 in.
<i>Iowa</i> , battleship	11,340	17-8	4-12 in. 8-8 in.
<i>Indiana</i> (battleship)	10,288	15-5	" 13 in. " "
<i>Oregon</i> (battleship)	10,242	16-8	" " " "
<i>Cincinnati</i> (cruiser)	3,213	19	11-5 in.
<i>Detroit</i> (cruiser)	2,089	18-7	10 " "
<i>Marblehead</i> (cruiser)	"	18-9	" " "
<i>Montgomery</i> (cruiser)	"	18-8	" " "
<i>Puritan</i> (monitor)	6,060	12-4	4-12 in. 6-4 in.
<i>Terror</i> (monitor)	3,990	10-5	" 10 in.

Torpedo boats:—*Cushing, Ericsson, Rogers, Foote, Dupont* and *Winslow*, 105 to 165 tons, 22-5 to 28-5 knots.

In addition to the above ships there was a very fast and powerful Flying Squadron, composed as follows:—

	tons	knots	guns
<i>Brooklyn</i> (flagship, armoured cruiser)	9,215	21-9	8-8 in. 12-5 in.
<i>Texas</i> (battleship)	6,315	17-8	2-12 in. 6-6 in.
<i>Massachusetts</i> (battleship)	10,288	16-2	4-13 in. 8-8 in.
<i>Columbia</i> (cruiser)	7,375	22-8	1-8 in. 2-6 in. 8-4 in.
<i>Minneapolis</i> (cruiser)	"	23	" " " "

At about 9.30 on Sunday morning, July 3rd, when the American ships were just making ready for church, the Spanish squadron, led by the *Infanta Maria Teresa*, steamed out and turned westward along the coast. It was first sighted by the U.S. battleship *Oregon*, which had steam raised, the other vessels having allowed their steam pressure to fall off. The *Oregon*, followed by the armed yacht *Gloucester*, at once gave chase, the others coming along as soon as they could raise sufficient steam. The *New York*, flagship, was many miles away at Siboney where Admiral Sampson had gone to confer with General Shafter, the U.S. army commander.

The conduct of the Spanish admiral, once he accepted battle, was highly creditable to him. The *Infanta Maria Teresa* sustained the concentrated fire of the big American battleships from the outset, and maintained a hopeless fight for about 45 minutes. At a quarter past ten she turned shorewards and ran aground off Nimanima, six and a half miles west of Santiago. She had been hit several times, the chief damage being caused by two 12 in. shells which had penetrated her to port, just above the water line, blowing out both her sides and damaging her stern turret. In addition two 8 in. shells and a 5 in. shell killed a number of men and set the ship alight in two places. The fire burned with great intensity, driving the engineers from the engine room and the gunners from the guns. Altogether 40 officers and men were killed.

In these circumstances the flagship ceased to be a fighting unit and most of her crew took to the water, whence they were rescued by the boats of the *Gloucester*. Admiral Cervera, who was slightly wounded, was rescued in this manner and taken first to the *Gloucester* and later to the *Iowa*. He was received with every mark of respect by the Americans in recognition of his gallant fight.

The other ships of the squadron now began to haul out of the line. The *Almirante Oquendo*, which was the rear ship of the cruisers, ran ashore about a mile and a half to the westward, beyond the blazing flagship. She was subjected to devastating fire and blew up on the beach. The *Viscaya*, though badly damaged, made a gallant effort to withstand the onslaught of the *Brooklyn*, flagship of Commodore Schley, in order that the *Cristobal Colon* might escape. A shell from the *Brooklyn* struck the bow torpedo tube of the *Viscaya*, exploding the torpedo loaded there and blowing the whole of the fore part of the ship into the air. At 11.15 a.m., exactly one hour after the destruction of her flagship, the *Viscaya*, in flames and frequently exploding, ran ashore and hauled down her flag.

The *Cristobal Colon* was now the only survivor, the two destroyers having been sunk by the yacht *Gloucester* and other vessels some time previously. She was the newest ship of the squadron, but had been sent to sea without her main armament, her turrets fore and aft being empty. Relying on her secondary armament the *Cristobal Colon* kept her enemies at bay and bade fair to escape altogether when it was discovered that her best steam coal was exhausted and that she would have to fall back on some of an inferior quality. Her steam pressure decreased and within a short time she was at the mercy of her enemies. She made for the Tarquino River, a small creek on the coast, and there scuttled herself. Thus ended the battle of Santiago de Cuba.

The complement of the Spanish squadron was 2,225 officers and men, of whom 392 were either killed or drowned, 150 were wounded, 150 escaped ashore and just over 1,500 unwounded prisoners surrendered to the Americans.

The U.S. ships received little damage and their total loss was one man killed and two wounded.

INGA I

A/SD/Singal; 1921; *Huiskens & van Dijk*; 1,304 tons; 236-8x37-1x16-1; 127 n.h.p.; triple-expansion engines. The Norwegian steamship *Inga I* was torpedoed and sunk by a German submarine on July 28th, 1941, 200 miles W. of Cape Finisterre.

INGE CHRISTOPHERSEN

H. W. Christophersen; 1905; *Flensburger Schiffsbau Ges.*; 1,353 tons; 230•6X34•4X15•2; triple-expansion engines. The German steamship *Inge Christophersen* was bombed and sunk by Russian aircraft on October 9th, 1944, off Mantu Oesel Island.

INGEBORG

F. Hein; 1892; *R. Thompson & Sons*; 1,141 tons; 215x35x20-5. The Norwegian barque *Ingeborg* was bound from New Zealand to

Newcastle, N.S.W. On the night of August 14th, 1907, when off Port Stephens, N.S.W., she was in collision with the steamship *Arawatta*. Of those on board seven persons were drowned.

INGEBORG

L. Lauritzen; 1917; *Kjobenhavns Flydedok & Skibsverft*; 1,207 tons; 239-9x35-7x14-5; 98 n.h.p.; triple-expansion engines. The Danish steamship *Ingeborg* was torpedoed and sunk by a German submarine in the North Sea on July 28th, 1917.

INGEBORG S.

German Government; 1924; *Kjobenhavns Flydedok & Skibsverft*; 1,200 tons; 235-4x36-2x13-7; 83 n.h.p.; triple-expansion engines.

The steamship *Ingeborg S.* was formerly Danish, seized by the French and later taken over by the Germans. On October 11th, 1943, she was torpedoed and sunk by a British submarine off Amorogos Island, Greece.

INGENIEUR GENERAL HAARBLEICHER

French Government; 1944; *Wm. Hamilton & Co.*; 7,067 tons; 433-5x56-2x34-2; triple-expansion engines. The French ship *Ingenieur General Haarbleicher* was carrying explosives from Marseilles to Saigon when she went ashore on Stromboli Island on November 21st, 1945, and broke in two.

INGER

A/B Transmarin; 1929; *Helsingborgs Varfs & Svetsnings Aktieb.*; 1,707 tons; 247-3x38-1x15-2; 145 n.h.p.; triple-expansion engines.

The Swedish ship *Inger* was in collision with the Italian ship *Literno* and sank seven miles S.W. of Beachy Head on May 31st, 1930. She was carrying coal from Swansea to Sundsvall.

INGER

A/S Inger; 1930; *Trondhjems Mek. Verksted*; 1,418 tons; 249-8x38x15-7; 144 n.h.p.; triple-expansion engines. The Norwegian steamship *Inger* was torpedoed and sunk by a German submarine on August 23rd, 1941, 30 miles N.W. of the Butt of Lewis. Seven of her crew and two gunners were killed.

INGER BENEDICTE

A/S Inger; 1883; *Sunderland S.B. Co.*; 1,946 tons; 280x37-1x20-5; 203 n.h.p.; triple-expansion engines. While on a voyage from Grimsby to Reykjavik with coal, the Norwegian ship *Inger Benedicte* was in collision and sank at Reykjavik on December 29th, 1924.

INGER ELISABETH

Aj Singer; 1920; *Frammes Mek. Verksted*; 2,166 tons; 289-5X44-2X19-4; 223 n.h.p.; triple-expansion engines. The Norwegian ship *Inger Elisabeth* was torpedoed and sunk by a German submarine on September 15th, 1942, four miles from Cape Rosier in the Gulf of St. Lawrence.

INGER JOHANNE

A/S Inger; 1938; *Lubecker Flender-Werke A.G.*; 1,202 tons; 231-5x34-7x14-4; 189 n.h.p.; oil engines. The Norwegian tanker *Inger Johanne*, under German control, was sunk by gunfire or rockets from British aircraft on October 15th, 1944, at Lillesand, Norway. Sixteen of her crew were killed.

INGERFEM

Al Singer; 1912; *W. Doxford & Sons*; 3,978 tons; 370-5X51-2x22-7; 329 n.h.p.; triple-expansion engines. The Norwegian steamship *Ingerfem* was torpedoed and sunk by a German submarine on December 29th, 1942, in the North Atlantic, with the loss of 40 lives. Twelve days later the American motorship *Stag Hound* picked up one of her boats with one survivor and seven boats.

INGERFIRE

A/S Inger; 1905; *Short Bros.*; 3,835 tons; 346-5x49-6x25-5; 339 n.h.p.; triple-expansion engines. The Norwegian steamship *Ingerfire* was torpedoed and sunk by a

German submarine on April 11th, 1943, about 400 miles E. of Newfoundland. Eight of her crew were killed.

INGERSEKS

A/S Inger; 1913; *Sir Rayltpn Dixon & Co.*; 4,969 tons; 380x52-5x27-4; 390 n.h.p.; triple-expansion engines. The Norwegian steamship *Ingerseks*, under German control, was bombed and sunk by British aircraft on April 23rd, 1945, in the Sogne Fjord, Norway.

INGERTO

A/S Inger; 1920; *Union S.B. Co.*; 3,089 tons; 318-6x46-2x22; 300 n.h.p.; triple-expansion engines. The Norwegian ship *Ingerito* left the River Clyde on February 26th, 1942, bound for Mobile. She was never seen again.

INGERTRE

A/S Inger; 1920; *Union S.B. Co.*; 3,088 tons; 318-8x46-2x22; 300 n.h.p.; triple-expansion engines. The Norwegian ship *Ingeritre* went ashore on January 12th, 1936, at Trefodskjer, S. of Floro. She slid off and sank.

INGERTRE

A/S Inger; 1921; *Burntisland Shipbuilding Co.*; 2,462 tons; 301 x43-7x22-2; triple-expansion engines. The Norwegian steamship *Ingeritre* went ashore in a fog on October 16th, 1949, at Alkhornet, at the entrance to Icefjord. Salvage was impossible.

INGLEFIELD

Field S.S. Co. (E. Aston); 1898; *Richardson, Duck & Co.*; 2,412 tons; 310x44-1x20-4; 245 n.h.p.; triple-expansion engines. The British steamship *Inglefield* was wrecked on February 20th, 1905, on Polonio Rock near Montevideo while on a voyage from the River Plate to Europe with a cargo of wheat.

INGLEFIELD

British Navy, destroyer; 1936; *Cammell Laird*; 1,530 tons; 327x34-5x8-7; 38,000 s.h.p.; 36-5 knots; turbine engines; 3-drum boilers; five 4-7 in. guns, 7 smaller; 10 T.T. The destroyer *Inglefield*, Cdr. C. F. H. Churchill, D.S.C., was sunk by a bomb from a German aircraft off Nettuno on February 25th, 1944, when taking part in the operations in support of the Fifth Army at Anzio. One officer and 34 ratings were lost.

The *Inglefield* had served with distinction in the Mediterranean fighting. She was the first British ship to arrive at Brindisi when Italy capitulated in September, 1943, and also took part in the bombardment of Catania, Sicily, just before the army landed. She had seen service in Norwegian waters and was one of the ships participating in the raid on the fish oil depots in Flore Fjord.

The full story of the Anzio landing is told under the cruiser *Penelope*.

INGLESIDE

Rowlands & Marwood's Steamship Co.; 1910; *Tyne Iron Shipbuilding Co.*; 3,736 tons; 348-5x50-1x23-5; 307 n.h.p.; 9-5 knots; triple-expansion engines. The steamship *Ingleside* was torpedoed and sunk by a German submarine 80 miles N. by E. of Algiers on May 8th, 1918. Eleven men were killed. The captain was among the survivors.

INGO

Hamburg-Bremer Afrika-Linie; 1926; *J. Frerichs & Co.*; 3,950 tons; 382-4x50-2x21-9; 316 n.h.p.; triple-expansion engines. The German steamship *Ingo* was bombed and sunk off the Algerian coast on January 27th, 1941.

INGRAHAM

United States Navy, destroyer; 1941; *United States*; 1,630 tons; 348x35-3x10-2; 44,000 s.h.p.; 36-5 knots; turbine engines; Express boilers; four 5 in. guns, 10 smaller, 5 T.T. The destroyer *Ingraham* was sunk in a collision in the North Atlantic in dense fog on August 22nd, 1942. The vessel carried a complement of over 200.

INGRID

A/S I.A. Hamres Red. (Ingrid Hamre); 1920; *McDougall Duluth Co.*; 2,607 tons; 251 x43-7x25-8; 226 n.h.p.; triple-expansion engines. While on a voyage from the Tyne to Hampton Roads and Cuba, the Norwegian steamship *Ingrid* was wrecked on January 19th, 1942, in 56° 32' N., 6° 56' W., off Tiree.

INGRID II

O. Mohn; 1889; *R. Thompson & Sons*; 1,145 tons; 230x32-5x15-3; 135 n.h.p.; compound engines. The Norwegian cargo ship *Ingrid II* was torpedoed and sunk by a German submarine in the Bristol Channel on December 19th, 1917.

INGRID HORN

H.C. Horn; 1928; *F. Schichau*; 4,006 tons; 313-8x48-7x27-7; 620 n.h.p.; oil engines. The German motorship *Ingrid Horn* was bombed and sunk by British aircraft on July 25th, 1944, at Kiel.

INGRID LEONHARDT

Leonhardt & Blumberg; 1944; 1,923 tons. The German ship *Ingrid Leonhardt* struck a mine and sank on April 22nd, 1945, S. of Langeland.

INNEROY

Erling H. Samuelsen Rederi; 1936; *Eriksbergs Mek. Verkstad*; 8,260 tons; 469-2x61-1x34-5; 644 n.h.p.; oil engines. The Norwegian motor tanker *Inneroy* was torpedoed by a German submarine, and caught fire and sank, on January 22nd, 1942, on a voyage from Aruba to Halifax. Thirty-six of her crew were killed.

INNISCARRA

City of Cork Steam Packet Co.; 1903; *Wigham Richardson & Co.*; 1,412 tons; 280-5x38-2x17; 529 n.h.p.; 16 knots; triple-expansion engines. The steamship *Inniscarra* was torpedoed and sunk by a German submarine ten miles S.E. | E. of Ballycotton Island on May 12th, 1918. Twenty-eight persons were killed. The captain was among the survivors.

INNISFALLEN

City of Cork Steam Packet Co.; 1896; *Wigham Richardson & Co.*; 1,405 tons; 272x35-7x16-9; 486 n.h.p.; 14 knots; triple-expansion engines. The steamship *Innisfallen* was torpedoed and sunk by a German submarine 16 miles E. J N. of the Kish lightship on May 23rd, 1918. Ten men were killed. The captain was among the survivors.

INNISFALLEN

British & Irish Steam Packet Co.; 1930; *Harland & Wolff*; 3,071 tons; 321x45-7x15-2; 1,193 n.h.p.; 18 knots; oil engines. The motor vessel *Innisfallen*, Capt. J. Firth, was mined and sunk at the entrance to Canada Dock, the River Mersey, on December 21st, 1940. Four persons were killed and seven wounded. Capt. Firth was among the survivors.

INSTER

Leth & Co.; 1928; *J.L. Thompson & Sons*; 4,747 tons; 403 -2 x 55-8x23-1; 430 n.h.p.; triple-expansion engines. The steamship *Inster* was formerly the British *Thistlebrae*, seized by the Germans on April 13th, 1940, while under repair at Trondheim. She was bombed and sunk by British aircraft on May 3rd, 1945, in the Great Belt.

INSTERBURG

Kohlen-Import u. Poseidon Schiff. A.G.; 1922; *Howaldtswerke*; 865 tons; 194-6x32-9x13-9; 73 n.h.p.; triple-expansion engines. The German steamship *Insterburg* left Rotterdam on October 17th, 1935, for Konigsberg but did not arrive and was feared lost in heavy gales. A lifeboat was washed ashore. Years later the wreck was found in Kiel Bay.

INSTRUCTOR

INSTRUCTOR

T. & J. Harrison; 1912; Russell & Co.; 4,422 tons; 884-5x 49-8x26-4; 401 n.h.p.; triple-expansion engines. The British cargo ship *Instructor* sank after a collision on July 15th, 1918, in 43° 50' N., 34° 50' W. while on a voyage from Portland to Montreal carrying a cargo of Government stores.

INTERNATIONAL

India Rubber, Gutta Percha & Telegraph Works Co.; 1870; Richardson, Duck & Co.; 1,381 tons; 240x30-1x17-4; 142 n.h.p.; compound engines.

On September 30th, 1899, the British cargo ship *International* was being towed from London to Cherbourg by the tug *Gauntlet*. When off Birling Gap the tow rope parted, and the *International* was driven ashore and wrecked.

INTREPID

Gordon S.S. Co.; 1879; Short Bros.; 1,399 tons; 251-3x34X 18-5; 155 n.h.p.; compound engines.

The British collier *Intrepid* was wrecked at Ristna (Dagerort), Esthonia, on July 7th, 1904, while on a voyage from the Tyne to Cronstadt.

INTREPID

British Navy, destroyer; 1936; J. S. White & Co.; 1,370 tons; 320x33x8-5; 34,000 s.h.p.; 36 knots; turbine engines; 3-drum boilers; four 4 - 7 in. guns, 7 smaller, 10 T. T. The destroyer

Intrepid, Cdr. C. A. de W. Kitcat, was bombed and sunk by German aircraft in Leros harbour on September 27th, 1943. Three officers and 12 ratings were killed.

INTREPIDO

Italian Navy, Destroyer; 1912; Pattison, Naples; 680 tons; 238x24x8-4; 18,200 s.h.p.; 35-8 knots; turbine engines;

Thomycroft boilers; one 4-7 in. gun, two 14pdr AA; 2 T.T. The Italian destroyer *Intrepido* was mined and sunk off Valona on December 4th, 1915. The destroyer's normal complement was 71.

INTREPIDO

Italian Navy, torpedo boat; 1943; Italy; 860 tons; 274-5X 31x8; 16,000 s.h.p.; 28 knots; turbine engines; 3-drum boilers; three 3-9 in. guns, six 20 mm.A.A., 2 T.T.

The torpedo boat *Intrepido* was torpedoed and sunk by a British motor torpedo boat off Spezia on June 14th, 1944.

INVER

Thomas Jack; 1883; Workman, Clark & Co.; 1,032 tons; 217-3x31-9x13-6; 99 n.h.p.; compound engines. The British cargo ship *Inver* sank after a collision off Coningbeg lightship on February 16th, 1917.

INVER

Shamrock Shipping Co.; 1919; Ramage & Ferguson; 1,543 tons; 250-7x36-2x17-2; 178 n.h.p.; triple-expansion engines. The steamship *Inver*, on a voyage from Blyth to Cowes, struck a mine and sank on December 17th, 1940, in the Thames estuary. Fifteen of her crew, one gunner and the pilot were killed. Only three men survived.

INVERBERVIE

Inverkip Steamship Co.; 1913; Russell & Co.; 4,309 tons; 385-3x49-7x 26; 361 n.h.p.; 11 knots; triple-expansion engines. The steamship *Inverbervie* was torpedoed and sunk by a German submarine 17 miles S. by W. of Cape Rizzuto, Italy, on September 14th, 1916. Six men were killed. The captain was among the survivors.

INVERDARGLE

Inver Tanker; 1938; Deutsche Werft A.G.; 9,456 tons; 503-2 X 67-3x34-2; 997n.h.p.; 12 knots; oilengines. The tanker *Inverdargle*, on a voyage from Trinidad to Avonmouth with aviation spirit, was torpedoed and sunk by a German submarine on January 16th, 1940, in the Bristol Channel. She carried a crew of 45, none of whom was ever heard of again.

INVERESK

T. B. Royden; 1907; C. Cornell & Co.; 4,986 tons; 400X 52-3x29-3; 495 n.h.p.; triple-expansion engines. The British cargo ship *Inveresk* was wrecked at Juan de Nova, Mozambique Channel, on March 22nd, 1911. She was carrying a cargo which included rails and structural machinery on a voyage from New York to Yokkaichi.

INVERILEN

Inver Tankers; 1938; Deutsche Werft A.G.; 9,456 tons; 503-2X 67-3x34-2; 997n.h.p.; oilengines.

The British motor tanker *Inverilen*, on a voyage from New York to Stanlow with 13,000 tons of clean oil, was torpedoed and sunk by a German submarine at 2 a.m. on February 3rd, 1943, about 750 miles W. of Inishtrahull. Twenty-five of her crew and six gunners were lost.

INVERLEE

Inver Tankers; 1938; Bremer Vulkan; 9,158 tons; 480-lx 63-8x35-7; 1,001 n.h.p.; 12 knots; oil engines. The tanker *Inverlee* was on passage from Trinidad to Gibraltar with 14,000 tons of fuel oil when, at 2 a.m. on September 19th, 1941, she was torpedoed and sunk by a German submarine some 30 miles from Cape Sparte, Morocco. She carried a crew of 43, of whom 21 were killed.

INVERLIFFEY

Inver Tankers; 1938; Deutsche Werft A.G.; 9,456 tons; 503-2x 67-3x34-2; 997n.h.p.; oilengines.

The British tanker *Inverliffey*, on a voyage from Trinidad to the Thames with 13,000 tons of gasolene, was torpedoed and sunk by a German submarine on September 11th, 1939, 270 miles W.S.W. of Lands End.

INVERNESS

B. J. Sutherland & Co.; 1940; J. L. Thompson & Sons; 4,897 tons; 415-1x58-2x24-8; 365 n.h.p.; triple-expansion engines.

The steamship *Inverness*, on a voyage from Liverpool to Table Bay, was torpedoed and sunk by a German submarine on July 9th, 1941, about 350 miles N.W. of the Azores. Seven of her crew were killed.

INVERSHANNON

Inver Tankers; 1938; Bremer Vulkan; 9,154 tons; 480-lx 63-8x35-7; 1,001 n.h.p.; 12 knots; oilengines. The tanker

Invershannon was about 800 miles W. of Scotland at about 11.30 on the night of September 20th, 1940, when she was torpedoed by a German submarine. After remaining afloat for some hours she sank on the morning of the 21st. Sixteen of her crew of 47 were lost, together with a survivor from the *Baron Blythswood*, sunk earlier on the same day, picked up by the submarine and then put into one of the *Invershannon's* boats.

INVINCIBLE

British Navy, battle cruiser; 1908; Armstrong Whitworth; 17,250 tons; 560 x 78-6 x—; 41,000i.h.p.; 28-6 knots; turbine engines;

Yarrow boilers; eight 12 in. guns, sixteen 4 in., 5 m.g., 3 T.T. The battle cruiser *Invincible* was the flagship of Rear-Admiral the Hon. H. L. A. Hood, C.B., commanding the 3rd Battle Cruiser Squadron at the battle of Jutland on May 31st, 1916. As she was the only flagship lost on the British side it is fitting to include under her name a summary of the Jutland action. The ship was in the first group of her class, which was designed in accordance with the views of Admiral Sir John (afterwards Lord) Fisher, First Sea Lord of the Admiralty. The ships, with their high speed, powerful armament and weak armour, were intended to operate against all other craft lighter than themselves and by reason of their speed and gun-power overwhelm their opponents at negligible risk. Under certain conditions they might have to fight in the line against dreadnoughts, in which case it was confidently believed that their high speed would outweigh their defects in armour protection.

The battle of Jutland was the inevitable clash between the young and confident German navy and the tremendously powerful British Grand Fleet. A trial of strength which the world had waited for and speculated upon ever since the first day that Britain entered the war was now about to begin. In all previous encounters the Germans, in defeat as well as in victory, had shown themselves resolute and

capable seamen, possessed of a high standard of training and equipped with superb ships of war. They had waited patiently for their new heavy units to be completed and by May, 1916, the High Seas Fleet was as powerful, in comparison with the Grand Fleet, as it could ever hope to be. Nothing was to be gained by further delay

and Admiral Scheer was eagerly watching the weather for an early opportunity of steaming out and severely damaging his enemy. On the morning of May 30th, 1916, Admiral Jellicoe received information that the High Seas Fleet was assembling in Jade Roads, and that German submarine flotillas were taking up their stations in the North Sea. By 10.30 on the same evening the British Fleet was making for its rendezvous E. of the Long Forties. It was an immense array of ships, covering a vast area of the North Sea, and was composed as follows: —

	tons	knots	guns	
1st Battle Squadron				
<i>Iron Duke</i> ...	25,000	21	10-13 -5 in.,	12-6 in.
(fleet flagship)				
<i>Marlborough</i> ...	"	"	"	"
<i>Revenge</i> ...	25,750	22	8-15 in.,	"

DESTROYERS	1st Flotilla	3rd Flotilla	7th Flotilla
	(one half)	5th Flotilla	9th Flotilla
	2nd Flotilla	6th Flotilla	

The first contact of the rival fleets came at 2.20 p.m. on May 31st, when *Galatea* on the British side, and the *Elbing* and one destroyer on the German side, came within sight of each other. *Galatea's* signal brought Beatty's battle cruisers on the scene at high speed.

The *Elbing* in her turn called up Vice-Admiral von Hipper's 1st Scouting Group, composed of the five German battle cruisers, and at 3.45, the two squadrons engaged at 16,000 yards. Visibility was excellent but the British experienced some trouble from smoke, and a signal from *Lion* for her next astern, *Princess Royal*, to concentrate with her on Hipper's flagship, the *Liitzow*, and for *Queen Mary* to fire on the *Derfflinger*, *Tiger* to fire on the *Seydlitz* and so on down the line of six British ships was missed by the *Queen Mary* and *Tiger*. Hence for ten minutes of hard hitting the *Derfflinger*, second in the German line, was immune from attack. When, at last, *Queen Mary* discovered the omission many hits had been scored by the enemy. Eventually the British fire was evenly distributed, but the Germans still had the advantage of having their targets clearly defined against the western sky. Meanwhile the 5th Battle Squadron, under Rear-Admiral H. Evan-Thomas, which was assigned the duty of co-operating with the battle cruiser fleet, had to be left eight miles behind with very little idea of what was happening. This squadron was composed of the newest and most heavily armed dreadnoughts, almost as fast as the battle cruisers* The failure to bring them into action at top speed was the second, and more serious omission in the opening stages of the battle. Just after 4 o'clock *Indefatigable*, when hotly engaged with her opposite number, the *Von der Tann*, was struck twice in quick succession by plunging salvos on her upper deck and blew up and sank with all her company save two—a loss of 57 officers and 960 ratings, including five civilians. Twenty minutes after this disaster *Queen Mary* suffered the same fate, three officers and six men surviving, and 57 officers and 1,209 ratings going down with the ship. A similar tragedy on board *Lion* was averted by the promptitude of a dying officer, Major Harvey of the Marines, who gave the order to close the magazine doors and flood the magazines.

It was at this point that the 5th Battle Squadron managed to draw near enough to engage at extreme, but gradually decreasing range. The fight which up to then had been going all in favour of the Germans now turned to their disadvantage and was reflected in their unsteady shooting and in their desire to break off the action. German flotillas led by the light cruiser *Regensburg*, made a determined attack upon the four ships of the 5th Battle Squadron, forcing Admiral Evan-Thomas to turn away to a slight degree, but failing to score any hits. At the same time the British 13th Flotilla attacked the German battle cruisers, but failed to score a hit though von Hipper was compelled to turn away. For about half-an-hour there was a brisk destroyer action in which *Nestor* and *Nomad* were so badly damaged that they were not able to avoid Scheer's battleships which were now coming up. Both destroyers were sunk by gunfire at point blank range.

Following upon the destroyer action there developed a brief but sanguinary encounter between the 5th Battle Squadron and Admiral Scheer's main fleet. *Barham*, flagship, and *Malaya* were repeatedly hit and suffered many casualties, but on the German side the *Konig*, which was nearest, received considerable punishment. Although the Germans at this moment were in greater force and trying to close the range Admiral Evan-Thomas managed to turn his four ships in succession in full view of the enemy without damage to two of them, *Warspite* and *Valiant*. At one time Evan-Thomas was engaging von Hipper with his two leading ships, while his two rear ships were still battling with Scheer.

It was at 5.30 that a renewal of the fighting between von Hipper's squadron and Scheer's leading battleships on the one hand, and Beatty's and Evan-Thomas's ships on the other, took place. There was a brief engagement between the German 2nd Scouting Group and Admiral Hood's battle cruisers at about 5.37 when the *Wiesbaden* was totally shattered, the British losing the destroyer *Shark* in an attack upon the German light cruisers. Later, at 6.20 p.m., the armoured cruiser *Defence*, flagship of Rear-Admiral Sir R. Arbuthnot, ran into close range of von Hipper's squadron and was sunk immediately with the loss of all her company, 903 including four civilians. Her next astern, *Warrior*, was so badly damaged as to be of no further fighting value and was abandoned next morning.

It was now the turn of the 3rd Battle Cruiser Squadron to engage this redoubtable foe. Led by *Invincible* the three ships closed to within 9,000 yards, hitting with such force that two of von Hipper's ships were compelled to haul out of the line. The range, however, brought the British under fire of some of Scheer's battleships, particularly *Konig*, and *Invincible* received a number of salvos in quick succession and sank with the loss of 59 officers and 961 ratings, including five civilians. The drowned included Rear-Admiral Hood and Flag-Capt. A. L. Cay. The survivors, all of whom were picked up by the destroyer *Badger*, were Cdr. H. E. Dannreuther, Lt. C. S. Sandford and four ratings. *Invincible* was the last of the battle cruisers to be sunk on that fatal afternoon.

The final phase of Jutland came with the engagement of the big ships from 7.10 p.m. to 9.30 p.m. The main fleets engaged at ranges varying between 11,000 and 14,000 yards, and so surprised were the Germans at having encountered the full force of the British, and so hampered by the deteriorating visibility in which they occupied the less favourable position, their opponents being at times shrouded in mist, that Admiral Scheer strove to break off the action. To this end he ordered his battle cruisers to charge the British line. The German ships received frightful punishment, only the stoutness of their armour preventing their complete annihilation. At this moment there were only four ships available, as the *Liitzow* was too battered to be of further use and von Hipper had not been able to transfer his flag, so that the "death ride", as the Germans termed it, was led by Capt. Hartog in the *Derfflinger*. Under the cover of this attack the German Fleet turned away to starboard and made for the Horn Reefs. With the breaking off of the engagement between the main fleets all serious fighting ceased.

The night brought disaster to both sides however. The armoured cruiser *Black Prince*, having lost touch with her consorts, blundered into Scheer's dreadnoughts in the darkness and was blown up by concentrated salvos, going down with 857 officers and men, there being no survivors. The German pre-dreadnought *Pommern* was torpedoed by destroyers of the 12th Flotilla, sinking with all her complement of 840. The *Liitzow*, von Hipper's flagship, had been torpedoed earlier and sank before morning, but the surviving members of her crew were taken off by her escorting destroyers.

The table of losses was as follows:—

BRITISH SHIPS

Battle cruisers	<i>Indefatigable</i>	Destroyers	<i>Ardent</i>
	<i>Invincible</i>		<i>Fortune</i>
	<i>Queen Mary</i>		<i>Nestor</i>
Cruisers	<i>Black Prince</i>		<i>Nomad</i>
	<i>Defence</i>		<i>Shark</i>
	<i>Warrior</i>		<i>Sparrowhawk</i>
			<i>Tipperary</i>

GERMAN SHIPS

Battleship	<i>Pommern</i>	Destroyers	V4 V48
Battle cruiser	<i>Liitzow</i>		

Light cruisers

	<i>Elbing</i>		
	<i>Frauenlob</i>		
	<i>Rostock</i>		
	<i>Wiesbaden</i>		
	Killed	Wounded	Prisoners
British Officers	328	25	10
Men	5,769	485	167
German Officers	160	40	
Men	2,385	454	

Thus this greatest of all sea conflicts cost the combatants 21 ships and 9,823 officers and men.

IOANNA

Eleftherios Veliotis; 1901; *Ailsa S.B. Co.*; 1,192 tons; 235-5X 33-1x16-6; 155 n.h.p.; triple-expansion engines. The Greek steamship *Ioanna* was bombed and sunk by German aircraft on April 21st, 1941, at Patras, during the invasion of Greece.

IOANNIS FAFALIOS

S. & D. Fafalios; 1900; *J. Readhead & Sons*; 3,122 tons; 323-5x47-1x23-7; 278 n.h.p.; triple-expansion engines. The Greek ship *Ioannis Fafalios* was carrying iron ore from Huelva to Dunkirk on May 4th, 1928, when she was involved in a collision and sank in latitude 50° 08' N., longitude 02° 05' W. Twelve lives were lost.

IOANNIS FAFALIOS

S. & D. Fafalios; 1919; *Merchant S.B. Corp.*; 5,671 tons; 400-7x54-2x30-1; 359 n.h.p.; triple-expansion engines. The Greek steamship *Ioannis Fafalios* was torpedoed and sunk by a submarine on September 5th, 1944, 300 miles N.E. of Mombasa on a voyage from Durban to Aden. Seven of her crew and one gunner were lost.

IOANNIS G. KULUKUNDIS

Manuel E. Kulukundis & others; 1944; *Delta S.B. Co.*; 7,176 tons; 422-8x57x34-8; triple-expansion engines. Carrying wheat from Vancouver to Cape Town, the Greek ship *Ioannis G. Kulukundis* went ashore in a fog at Point Arguello, California, on July 11th, 1949, and broke in two.

IOANNIS P. GOULANDRIS

John P. Goulandris; 1897; *Richardson, Duck & Co.*; 3,153 tons; 330-5x46-1x24-1; 303 n.h.p.; triple-expansion engines. The Greek cargo ship *Ioannis P. Goulandris* was sunk by a German submarine in the Bay of Biscay on May 4th, 1917.

IOCASTI

Hellenic Transport S.S. Co.; 1919; *J. Coughlan & Sons*; 5,747 tons; 410-6x54-1x27-5; turbine engines. On a voyage from New York to Constantinople (Istanbul) with a cargo of oil, the Greek steamship *locasti* caught fire and was abandoned on February 8th, 1921.

IONIA

Hamburg-Amerika Linie; 1922; *Akt. Ges. Neptun*; 3,102 tons; 337-7x48-3x20-9; 259 n.h.p.; triple-expansion engines. The German steamship *Ionia* was torpedoed and sunk by a British submarine on April 11th, 1940, in Narvik Fjord.

IONIA

Hellenic Mediterranean Lines Co.; 1923; *Hawthorn, Leslie & Co.*; 1,978 tons; 282-3x40-1x16-1; 547 n.h.p.; triple-expansion engines.

The Greek passenger ship *Ionia* went ashore on December 14th/15th, 1944, at Arcaki Islet, near Skiathos. Three persons were killed. Others were drowned when attempting to swim ashore, and about 90 were rescued by naval craft.

IONIAN

Allan Line; 1901; *Workman, Clark & Co.*; 8,268 tons; 470 x 57-5x37; 604 n.h.p.; 14 knots; triple-expansion engines. The steamship *Ionian* was torpedoed and sunk by a German submarine on October 20th, 1917, off Milford Haven, with the loss of seven lives.

IONIAN

Ellerman Lines; 1938; *W. Gray & Co.*; 3,114 tons; 345-7x 50-1x20-7; 606 n.h.p.; triple-expansion engines & L.P. turbine. The steamship *Ionian*, on a voyage from London to Hull, struck a mine and sank on November 29th, 1939, four miles from the Newark lightship.

IOWA

States S.S. Co.; 1920; *Western Pipe & Steel Co.*; 5,724 tons; 410-5x54x27-1; 359 n.h.p.; triple-expansion engines. The American ship *Iowa* was carrying general cargo and lumber from Tacoma to Baltimore on January 12th, 1936, when she went ashore on Peacock Spit at the north entrance to the Columbia River. All the crew were lost.

IPSDEN

John Wood & Co.; 1890; *W. Gray & Co.*; 1,748 tons; 260X 36-5x18-2; 147 n.h.p.; triple-expansion engines. The British cargo ship *Ipsden* was wrecked on Belle Amour Point, Straits of Belle Isle, in July, 1898. She was on a voyage from Montreal to Plymouth carrying a cargo of lumber.

IRADA

J. H. Welsford & Co.; 1900; *Workman, Clark & Co.*; 8,124 tons; 501x59-3x33; 831 n.h.p.; triple-expansion engines. The British cargo ship *Irada* was wrecked at Mizen Head on December 22nd, 1908, while on a voyage from Galveston to Liverpool carrying a cargo of cotton. The captain, 4 men and a stewardess were lost.

IRAKO

6,500 approx.
The Japanese steamship *Irako* was sunk by U.S. carrier-based aircraft on September 24th, 1944, S. of the Calarrian Group, Philippines.

IRENE

Trinity House; 1890; *Palmers' Co.*; 543 tons; 224x27-1x13-3; 245 n.h.p.; 12 knots; triple-expansion engines. The steamship *Irene* was mined and sunk ~11 miles E.S.E. of the Tongue lightship on November 9th, 1915. The captain and 20 of the crew were killed.

IRENE

China Merchants S.N. Co.; 1890; *Napier, Shanks & Bell*; 1,343 tons; 219 x 40x12-5; 142 n.h.p.; triple-expansion engines. The Chinese steamship *Irene*, on a voyage from Shanghai to Amoy with 258 passengers and crew, was captured by pirates on October 19th, 1927. The pirates, who had joined the ship as passengers, set a course for Bias Bay but were intercepted by a British submarine. When the ship did not comply with an order to stop the submarine fired a shell into the engine room, setting the *Irene* on fire. Passenger's, crew and pirates were taken off by other small naval craft and the *Irene* sank on the 21st. Fourteen passengers were later found to be missing.

IRENE MARIA

Ministry of Shipping (Broomhill Steamships); 1922; *Antwerp Eng. Co.*; 1,860 tons; 279x40-2x18-2; 213 n.h.p.; triple-expansion engines.
The British cargo ship *Irene Maria* was lost without trace after sailing from Milford Haven on November 22nd, 1940, for Bridgewater, N.S. She carried a crew of 25. The loss was considered to be due to enemy action.

IRENE OLDENDORFF

Egon Oldendorff; 1950; *Lubecker Masch. Ges.*; 1,494 tons; 268-1x43-3x15-1; compound engines.
The German steamship *Irene Oldendorff* was carrying coke from Emden to Ystad when, on December 31st, 1951, the cargo shifted during a gale and she capsized and sank about five miles off Hubert Gat, near Borkum Island. Eleven bodies were found. Divers reported that the wreck could not be salvaged as it was heavily sanded up.

IRENEE DUPONT

IRENEE DUPONT

International Freighting Corp.; 1941; Newport News S.B. & D.D. Co.; 6,125 tons; 439x63-2x27-3; 1,100 n.h.p.; turbine engines.

The American steamship *Irene Dupont* was torpedoed and sunk on March 17th, 1943, 1,100 miles W. of the Fastnet on a voyage from New York to Liverpool. Twenty-two of her crew, ten gunners and two passengers were lost.

IRIDIO MANTOVANI

Azienda Generate Italiana Petroli; 1939; Cantieri Riuniti delV Adriatico; 10,540 tons; 520-2x68-6x36-6; 1,260 n.h.p.; 13 knots; oil engines.

The tanker *Iridio Mantovani* was intercepted and sunk by the British cruiser *Aurora* south of the Kerkenna Islands on December 1st, 1941, when carrying 10,000 tons of oil fuel to the Italian army in Libya. A number of survivors were picked up by the *Aurora*.

For further details see *Alvise da Mosto*.

IRINA

M. C. Mitrichevich; 1879; Palmers' Co.; 2,210 tons; 285X 37-2x24-4; 253 n.h.p.; compound engines. The Russian cargo ship *Irina* was torpedoed and sunk by a German submarine in the Arctic on November 4th, 1917.

IRIS

C.T. Abrahamsen; 1889; W. Gray & Co.; 1,594 tons; 257-4x 34-7x19-7; 167 n.h.p.; triple-expansion engines. The Swedish ship *Iris* was sunk by ice on February 17th, 1924, 11 miles S. of Russard while on a voyage from Hango to Kolding.

IRISBROOK

Miller & Richards; 1902; J. Blumer & Co.; 2,759 tons; 319-6X 46x21-2; 301 n.h.p.; triple-expansion engines. The British cargo ship *Irisbrook* sank after a collision off the Royal Sovereign lightship on March 25th, 1911. She was on a voyage from Swansea, via London, to Manaos carrying a general cargo.

IRISH PINE

Irish Shipping; 1919; J. F. Duthie & Co.; 5,621 tons; 410-4x 54x30-2; 359 n.h.p.; triple-expansion engines. The Irish cargo ship *Irish Pine* left Dublin on October 28th, 1942, on a voyage to Boston and Tampa, and was last reported in the Atlantic on November 13th. She carried a crew of 33. A German report stated that the vessel was sunk 400 miles S.S.W. of Sable Island on the 15th, and that a boat was seen to be launched.

IRMA

Bergenske D/S; 1905; Sir Raylton Dixon & Co.; 1,392 tons; 244x32-8x13-3; 243 n.h.p.; triple-expansion engines. The Norwegian steamship *Irma*, under German control, was torpedoed and sunk by a British submarine on February 13th, 1944, on a voyage from Aalesund to Christiansund, with passengers. Sixty-one of her crew and passengers were lost.

IRMTRAUT CORDS

A. G. Neptun; 1924; Helsingors Jernskibs & Maskin.; 2,814 tons; 316-9x48-4x20-1; 282 n.h.p.; triple-expansion engines. The German steamship *Irmtraut Cords* was bombed and sunk by Allied aircraft on May 3rd, 1945, in Kiel Bay.

IRO

6,500 tons.
The Japanese tanker *Iro* was attacked by U.S. carrier-based aircraft on March 30th, 1944, and sunk off Babelthuap, Palau Islands.

IRON CHIEFTAIN

Broken Hill Proprietary Co.; 1937; Lithgows; 4,812 tons; 404-5x52-6x23-2; 553 n.h.p.; quadruple-expansion engines. The Australian steamship *Iron Chieftain* was torpedoed and sunk by a Japanese submarine on June 3rd, 1942, 35 miles E. of Sydney on a voyage from Newcastle, N.S.W., to Whyalla. Twelve of her crew were lost.

IRON CROWN

Interstate Steamships Proprietary; 1922; Government Dockyard, Williamstown; 3,353 tons; 331x47-9x23-6; 387 n.h.p.; triple-expansion engines.

The Australian steamship *Iron Crown* was torpedoed and sunk by a Japanese submarine on June 4th, 1942, off Cape Howe on a voyage from Whyalla to Port Kembla, with iron ore. Thirty-eight of her crew of 43 were lost.

IRON KNIGHT

Broken Hill Proprietary Co.; 1937; Lithgows; 4,812 tons; 404-5x56-2x23-2; 553 n.h.p.; quadruple-expansion engines. The Australian steamship *Iron Knight* was torpedoed by a Japanese submarine on February 7th, 1943, broke in two and sank off Montagu Island on a voyage from Whyalla to Newcastle, N.S.W., with iron ore. The captain and 35 of the crew were lost.

IRON PRINCE

Broken Hill Proprietary Co.; 1909; Russell & Co.; 3,116 tons; 331-5x49x21-8; 276 n.h.p.; triple-expansion engines. The Australian cargo ship *Iron Prince* was wrecked at Cape Howe on April 19th, 1923. She was on a voyage from Devonport, Tasmania, to Newcastle, N.S.W., carrying a cargo of limestone.

IRRESISTIBLE

British Navy, 1st class battleship; 1902; Chatham Dockyard; 15,000 tons; 430x75x29; 15,000 i.h.p.; 18-5 knots; triple-expansion engines; Belleville boilers; four 12 in. guns, twelve 6 in., sixteen 12pdr., six 3pdr., 2 m.g., 4 T.T. The British battleship *Irresistible* was one of the casualties resulting from the failure of the attempt to force the Dardanelles in March, 1915, the full story of which is related under *Majestic*. The battleship was commanded by Capt. D. L. Dent and carried a complement of 780. On March 18th she was engaged in the bombardment of the forts in company with the other heavy ships of the British fleet. At about a quarter past three in the afternoon she was struck by a shell from Fort Hamidieh I, there was a loud explosion at the water line and the ship began to list. An hour later, when drifting with engines stopped, she struck on a moored mine which exploded under the bilge of her starboard engine room, flooding it and drowning all but three of those within.

The *Irresistible* now became a target for all the enemy guns which could be brought to bear, nevertheless the destroyer *Wear* succeeded in coming to her assistance and later the battleship *Ocean* arrived. By this time shells were bursting on the upper deck and spreading havoc in all directions, despite which *Wear* managed to embark 28 officers and 582 ratings. *Ocean* now tried to take *Irresistible* in tow, ten of the latter's company remaining aboard for this purpose, but the enemy fire was so intense that the attempt had to be abandoned and the ten men taken off. The next proposition was to approach the battleship under cover of darkness with destroyers and mine-sweepers and endeavour to work her out of range of the forts. Before this plan came into operation *Ocean* was also mined and during the night both ships foundered.

IRTHINGTON

Maclay & McIntyre; 1880; Osbourne, Graham & Co.; 1,909 tons; 270x36x24-7; 184 n.h.p.; compound engines. The British cargo ship *Irthington* was wrecked on Pearl Rock, Gibraltar, on April 4th, 1901, while on a voyage from Almeria to the Clyde carrying an ore cargo.

ISAAC SWEERS

Netherlands Navy, destroyer; 1940; Koninkl. Maats. de Schelde; 1,628 tons; 348-7x33-7x11-5; 45,000 s.h.p.; 36 knots; turbine engines; Yarrow boilers; five 4-7 in. guns, four 40 mm. A.A.; 8 T.T.

The destroyer *Isaac Sweers* was torpedoed and sunk by an enemy submarine off the coast of Algeria on November 13th, 1942, whilst engaged in operations connected with the Allied landing. The vessel had been towed to Britain from Holland at the time of the German invasion in May, 1940, completed in Britain and served in the Mediterranean with a British flotilla. On December 14th, 1941, she was one of four destroyers under command of Cdr. G. H. Stokes which sank the Italian cruisers *Alberico da Barbiano* and *Alberto di Giussano*.

ISABELA

Agwilines Inc.; 1911; *Newport News S.B. & D.D. Co.*; 3,110 tons; 335x46-8x22-7; 309 n.h.p.; triple-expansion engines. The American steamship *Isabela* was torpedoed and sunk by a German submarine on May 18th, 1942, on a voyage from Hampton Roads to San Juan, Puerto Rico.

ISABELLE

A. Capel & Cie.; 1913; *Ateliers & Chantiers de la Loire*; 2,466 tons; 285'5x43'-3x22'-5; 148 n.h.p.; triple-expansion engines. The French steamship *Isabelle* was torpedoed and sunk by a German submarine in the North Sea on November 9th, 1917.

ISABO

Soc. Anon di Nav. Marco U. Martinolich; 1914; *Cant. Nav. Triestino*; 6,827 tons; 422x54x27-4; 2,800 i.h.p.; 12 knots; triple-expansion engines.

The Italian steamship *Isabo* bound for Hamburg from Montreal with grain, stranded on the Scilly Rock, off Bryher, Scilly Isles, on the afternoon of October 27th, 1927, in a dense fog. The St. Mary's lifeboat and two others put out but were unable to approach the *Isabo* owing to the heavy seas. Nevertheless, 27 out of a crew of 38 were rescued, the remaining 11 men clinging to the rigging throughout the night. These men were still there at daylight on the next day when some of them attempted to reach shore on floating wreckage. Ultimately four were saved, six drowned and one died from exposure.

The *Isabo* broke in two some hours after striking and the cargo spread itself over the sea, adding to the already difficult task of the lifeboats.

ISADORA

S. & R. Steamships; 1915; *G. Brown & Co.*; 1,212 tons; 235 x 33-2x13-6; 152 n.h.p.; triple-expansion engines. The British steamship *Isadora* was damaged by insurgent aircraft on April 25th, 1938, at Valencia, during the Spanish Civil War. She was again attacked on June 8th, at Castellon and sunk.

ISARCO

Italia Soc. Anon, di Nav.; 1924; *Stabilimento Tecnico*; 5,915 tons; 405-6x54x29-3; 465 n.h.p.; triple-expansion engines. The Italian steamship *Isarco* was torpedoed and sunk by the Dutch submarine *O-21* on September 5th, 1941, on a voyage from Naples to Bona.

ISCHIA

A.Lauro; 1907; *W. Hamilton & Co.*; 5,101 tons; 414x52x28-2; 429 n.h.p.; triple-expansion engines.

The Italian steamship *Ischia* was torpedoed and sunk by a British submarine on February 28th, 1943, one mile off Portofino.

ISDALEN

T.L.Ravn; 1891; *J. L. Thompson & Sons*; 2,275 tons; 290 X 38-7x19-9; 211 n.h.p.; triple-expansion engines.

The Norwegian cargo ship *Isdalen* was sunk by a submarine in the Mediterranean on August 24th, 1916.

ISE

Japanese Navy, dreadnought battleship; 1916; *Kawasaki Dockyard*; 29,990 tons; 683x94x28-7; 45,000 s.h.p.; 23 knots; turbine engines; Kanpon boilers; twelve 14 in. guns, eight 5-5 in., eight 5 in.A.A., 7 m.g., 4 T.T., 3 aircraft.

The Japanese battleship *he* was one of a group comprising three battleships, two heavy cruisers and one light cruiser, lying in Kure harbour on July 28th, 1945, when a concentrated attack was made upon shipping by British and American naval aircraft, and she was sunk. The full story of the attack is told under the battleship *Haruna*.

ISEO

Adriatica Soc. Anon, di Nav.; 1918; *W. Gray & Co.*; 2,366 tons; 297-9x42x19-1; 266 n.h.p.; triple-expansion engines. The Italian steamship *Iseo* was torpedoed and sunk by British aircraft on December 29th, 1942, 28 miles off Cap Bon.

ISERE

Cie. Generate Transatlantique; 1887; *Richardson, Duck & Co.*; 2,159 tons; 277x37-4x18-4; 200 n.h.p.; triple-expansion engines.

The French steamship *Isere* was torpedoed and sunk by a German submarine west of Gibraltar on June 23rd, 1917.

ISERLOHN

Hamburg-Amerika Linie; 1922; *Fried. Krupp A.G.*; 3,704 tons; 338-7x47-7x26-2; 290 n.h.p.; triple-expansion engines. The German steamship *Iserlohn* was sunk by British light naval craft on April 16th, 1941, off the Kerkenna Islands, Tunisia.

ISHIKARI MARU

Hokkaido Tanko K.K.; 1938; *Tama S.B. Co.*; 3,291 tons; 33x47x25; 191 n.h.p.; triple-expansion engines & L.P. turbine. The steamship *Ishikari (Isikari) Maru* was torpedoed and sunk by the U.S. submarine *Grayback* on March 17th, 1942, off the Bonin Islands.

ISIDORO PONS

Cia. Gen. de Tabacos de Filipinas; 1895; *Cia. Trasatlantica*; 1,027 tons; 224x31-9x18-5; 105 n.h.p.; triple-expansion engines.

The American steamship *Isidoro Pons* was carrying passengers from Manila to Aparri when she went ashore on July 21st, 1936, off Zambales. The ship slipped off and sank in deep water.

ISIS

Hamburg-Amerika Linie; 1922; *Deutsche Werft*; 4,454 tons; 376-2x51-8x25-9; 717n.h.p.; oilengines. The German motorship *his* was reported to be in distress with No. 1 hatch stove in on November 8th, 1936, in 49° 34' N., 11° 9' W., while on a voyage from Hamburg to New York. Several ships in the vicinity went to her assistance, but she sank before help arrived. One survivor of her crew of 40, a cabin boy, was picked up by the s.s. *Westernland*.

ISIS

British Navy, destroyer; 1936; *Yarrow & Co.*; 1,370 tons; 320x33x8-5; 34,000 s.h.p.; 36knots; turbine engines; 3-drum boilers; four 4 - 7 in. guns, 6 smaller, 5 T.T. The destroyer *his*, Lt. H. D. Durell, was sunk by mine or torpedo off Normandy on July 20th, 1944. Eleven officers, including Lt. Durell, and 143 ratings were killed.

ISLA DE CUBA

Spanish Navy, 3rd class cruiser; 1887; *Spain*; 1,030 tons; 185 X 30x11-5; 2,200 i.h.p.; 16 knots; triple-expansion engines; four 4 • 7 in. guns, four 6pdr., two 3pdr., 2 m.g., 3 T. T.

For the narrative of the loss of this vessel, see *Reina Cristina*, flagship of Rear-Admiral Montojo at the battle of Manila Bay, May 1st, 1898, when the Spanish Asiatic Squadron was destroyed.

ISLA DE LUZON

Spanish Navy, 3rd class cruiser; 1887; *Spain*; 1,030 tons; 185 x 30x11-5; 2,200 i.h.p.; 16 knots; triple-expansion engines; four 4 • 7 in. guns, four 6pdr., two 3pdr., 2 m.g., 3 T. T.

For the narrative of the loss of this vessel, see *Reina Cristina*, flagship of Rear-Admiral Montojo at the battle of Manila Bay, May 1st, 1898, when the Spanish Asiatic Squadron was destroyed.

ISLA DE MENORCA

Compania Trasmediterranea; 1883; *Forges et Chantiers de la Mediterranee*; 1,003 tons; 230x29-9x16-8; 114 n.h.p.; compound engines.

The steamship *Isla de Menorca* was bombed, machine-gunned and sunk by insurgent aircraft off Tarragona on March 14th, 1938, during the Spanish Civil War.

ISLA DE PANAY

Cia. Trasatlantica; 1882; *Scott & Co.*; 3,484 tons; 362-4X 43-2x29-2; 582 n.h.p.; triple-expansion engines. The Spanish steamship *Isla de Panay* was wrecked on December 7th, 1929, between San Carlos and Santa Isabel while on a voyage from Barcelona to Fernando Po.

ISLANDA

ISLANDA

British India S.N. Co.; 1900; Sir Raylton Dixon & Co.; 5,237 tons; 410x50-8x28-8; 405 n.h.p.; triple-expansion engines. The British cargo ship *Islanda* was wrecked at Delia Mara Point, Malta, on December 10th, 1917. She was on a voyage in ballast from Syracuse to Malta.

ISLANDER

Canadian Pacific Navigation Co.; 1888; Napier, Shanks & Bell; 1,495 tons; 240x42x14; 324 n.h.p.; 14 knots; triple-expansion engines.

The steamship *Islander*, on a voyage from Alaska to Vancouver, struck an iceberg and sank in the early hours of August 20th, 1901. Fortunately the ship was only one mile from land, near Juneau, and the sea was calm, so 107 persons were able to reach safety. Sixty-five passengers and crew, including the captain, were lost with the ship.

ISLE OF BUTE

Dixon, Robson & Co.; 1882; T. & W. Smith; 1,117 tons; 225-8 x 33-1x15; 99 h.p.; compound inverted engines. The British cargo ship *Isle of Bute* was wrecked on Bilbao bar on December 10th, 1883, while on a voyage from Lisbon to the Tyne carrying an iron ore cargo.

ISLE OF IONA

Dixon, Robson & Co.; 1889; T. & W. Smith; 1,139 tons; 225 X 33-2x15-9; 98 n.h.p.; triple-expansion engines. The British cargo ship *Isle of Iona* was wrecked off Whitby on December 7th, 1906. She was carrying coal on a voyage from the Tyne to Rochester.

ISLE OF IONA

Dixon, Robson & Co.; 1905; Furness, Withy & Co.; 3,789 tons; 340-1x47-1x20-4; 314 n.h.p.; triple-expansion engines. The British cargo ship *Isle of Iona* was wrecked near Hatteras Inlet on December 14th, 1914, while on a voyage from Daiquiri to Baltimore carrying an iron ore cargo.

ISLEWORTH

Watts, Watts & Co.; 1911; Ropner & Sons; 4,879 tons; 390x52x27-8; 434 n.h.p.; triple-expansion engines. The British cargo ship *Isleworth* was wrecked at Chebuetto Head on March 13th, 1912. She was on a voyage in ballast from Boston to Halifax, N.S., and Louisburg.

ISLEWORTH

Britain S.S. Co.; 1896; R. Thompson & Sons; 2,871 tons; 320-2x46x21-3; 236 n.h.p.; 9 knots; triple-expansion engines. The steamship *Isleworth*, bound from Bilbao to Middlesbrough, was torpedoed and sunk by a German submarine three miles S.W. of Ventnor, Isle of Wight, on April 30th, 1918. Twenty-nine men were killed. The captain was among the survivors.

ISMORE

J.H. Welsford & Co.; 1899; Barclay, Curie & Co.; 7,744 tons; 459 X 52 - 5 x 31 -1; 607 n.h.p.; triple-expansion engines. The British steamship *Ismore* was wrecked on December 3rd, 1899, in St. Helena Bay, 75 miles north of Table Bay, while in service as a Government transport. She was on a voyage from Liverpool, via Milford Haven, to Table Bay.

ISOKAZE

Japanese Navy, destroyer; 1940; Sasebo; 2,000 tons; 364 x 35 X11; 45,000 s.h.p.; 36 knots; turbine engines; six 5 in. guns, 2m.g., 8 T.T.

The destroyer *Isokaze* was one of four such vessels sunk in the sea-air action S.W. of Kyushu on April 7th, 1945. All four ships were sunk by carrier borne aircraft of the U.S. Fifth Fleet.

-The *Isokaze* carried a complement of over 200.

For the full story of the battle see the battleship *Yamato* also the destroyer *Asashimo*.

ISOKAZE MARU

Japanese Government; 1945; Mitsubishi Jukogyo K.K.; 891 tons; 198'2x31-2x17-9; triple-expansion engines. The Japanese training ship *Isokaze Mam* struck some rocks 100

miles S.W. of Tokyo on July 13th, 1949, and sank off Shimoda. The crew and 55 trainees were saved. Seven trainees were lost. The ship was sailing from Shimizu to Yokohama in ballast.

ISOLDA

The Commissioners of Irish Lights; 1928; Dublin Dockyard Co.; 734 tons; 198-3x32-4x13-9; 203 n.h.p.; triple-expansion engines.

The lighthouse tender *Isolda* was bombed and sunk by German aircraft on December 19th, 1940, near the Barrels Rock lightship. Six of her crew were killed.

ISONAMI

Japanese Navy, destroyer; 1927; Uraga Dock Co.; 1,700 tons; 371-5x33-7x9-7; 40,000 s.h.p.; 34 knots; turbine engines; Kanpon boilers; six 5 in. guns, 4 A.A.m.g., 9 T.T. The destroyer *Isonami* was torpedoed and sunk in the Buton Passage, Celebes, by the U.S. submarine *Tautog* on April 9th, 1943. The destroyer's normal complement was 197.

ISSEI MARU

Fuso Kaiun K.K.; 1929; Uraga Dock K.K.; 1,864 tons; 27 lx 40x20-7; triple-expansion engines. The steamship *Issei Maru* was torpedoed and sunk by the U.S. submarine *Threadpin* on January 30th, 1945, about 50 miles S. of Susami, Japan.

ISSHIN MARU

Nihon Sekiyu K.K.; 10,000 (approx.). The tanker *Isshin Maru* was torpedoed and sunk by the U.S. submarine *Finback* on January 2nd, 1944, about 200 miles N. of Okinawa.

ISTRIA

Italia Soc. Anon. di Nav.; 1921; Stabilimento Tecnico; 5,416 tons; 404• 1x53-9x29-5; 465 n.h.p.; triple-expansion engines. The steamship *Istria* was bombed and sunk by British aircraft on August 27th, 1942, N.N.E. of Ras el Tin.

ISTROS

C. A. Theophilatos; 1903; J. L. Thompson & Sons; 1,891 tons; 288-3x40-9x18-3; 250 n.h.p.; triple-expansion engines. The Greek steamship *Istros* was sunk by a submarine in the Mediterranean on May 22nd, 1916.

ISUZU

Japanese Navy, light cruiser; 1921; Uraga Dock Co.; 5,170 tons; 535x46-7x15-9; 70,000 s.h.p.; 33 knots; turbine engines; Kanpon boilers; seven 5-5 in. guns, two 3 in., 2 m.g., 8 T.T., 1 aircraft.

The light cruiser *Isuzu* was torpedoed and sunk north of Soembawa on April 7th, 1945, by the U.S. submarines *Charr* and *Gabilan*. Her normal complement was 438.

ISUZU MARU

Hinode Kisen K.K.; 1939; Tsurumi Seitetsu Kosen; 2,866 tons; 332-4x45-1x24-6; 267 n.h.p.; turbine engines. The steamship *Isuzu Maru* was torpedoed and sunk by the U.S. submarine *Trout* on July 2nd, 1943, W. of Marinduque, Philippines.

ISUZUGAWA MARU

Toyo Kaiun K.K.; 4,212 tons. The steamship *Isuzugawa Maru* was torpedoed and sunk by the U.S. submarine *Bonefish* on October 10th, 1943, off the east coast of Indo-China.

ITAGIBA

Cia. Nacional de Nav. Costeira; 1913; Ailsa S.B. Co.; 2,169 tons; 288-3x43-2x17-6; 304 n.h.p.; triple-expansion engines. The Brazilian steamship *Itagiba* was torpedoed and sunk by a German submarine on August 17th, 1942, on a voyage from Rio de Janeiro to Pernambuco. Ten of her crew and 22 passengers were lost.

ITALTA

Cie. Marseillaise de Navigation a Vapeur; 1904; Cie. Francaise de Navigation et de Constr. Navales; 1,305 tons; 260-7x28-5x16-2; 305 n.h.p.; triple-expansion engines.
The French steamship *Italia* was sunk by a submarine in the Mediterranean on May 30th, 1917.

ITALIA

Italian State Railways; 1909; A. Rodger & Co.; 3,456 tons; 346 • 1 x 47 • 6 x 22 • 6; 262 n.h.p.; triple-expansion engines. The Italian steamship *Italia* was torpedoed and sunk by a submarine in the Mediterranean on October 11th, 1917.

ITALIA

The Texas Company (Norway) A/S; 1939; Deutsche Werft A.G.; 9,973 tons; 503-8x67-4x34-3; 1,166 n.h.p.; oilengines. The Norwegian tanker *Italia* was torpedoed and sunk by a German submarine on June 15th, 1940, about 60 miles W. of the Stilly Isles, with the loss of 19 lives.

ITALIA

Lloyd Triestino Soc. Anon. di Nav.; 1905; N. Odero & Co.; 5,203 tons; 393-7x47-8x27; 545 n.h.p.; triple-expansion engines.
The steamship *Italia* was attacked by British aircraft on July 6th, 1944, near Trieste. The first salvo of rockets was followed by an internal explosion that destroyed the ship.

ITALIAN

Bibby & Co.; 1861; Harland & Wolff; 1,860 tons; 313x34x25; 500 h.p.; compound engines.
The steamship *Italian* with 45 passengers and crew, struck on a submerged rock 5 miles off Cape Finisterre at the end of March, 1869. The vessel sank on 10 minutes with the loss of 32 lives.

ITALICA

Ybarra & Co.; 1884; J.L. Thompson & Sons; 1,070 tons; 220 x 31-3x16-6; 113 n.h.p.; compound engines. The Spanish cargo ship *Italica* struck rocks off Vigo and sank on January 13th, 1922.

ITALIER

Lloyd Royal Beige; 1908; Short Bros.; 1,905 tons; 281x41x18-1; 188 n.h.p.; triple-expansion engines.
The Belgian ship *Italier* struck a reef and sank on July 30th, 1922, near Villano, while on a voyage from Antwerp to Valencia.

ITALO BALBO

Soc. Anon. Emanuele V. Parodi; 1919; Fairfield S.B. & E. Co.; 5,114 tons; 413-2x52-3x28-4; 489 n.h.p.; triple-expansion engines.
The Italian steamship *Italo Balbo* was torpedoed and sunk by a British submarine on September 10th, 1941, about ten miles W. of Elba.

ITALY MARU

Tamai Shosen K.K.; 1919; Kawasaki Dockyard Co.; 5,859 tons; 385x51x36; 1,637 n.h.p.; triple-expansion engines. The transport *Italv Mam* was bombed and sunk by U.S. land-based aircraft on December 27th, 1942, E. of New Ireland.

ITAPAGE

Cia. Nacional de Nav. Costeira; 1927; Chantiers de Normandie; 4,998 tons; 371-6x52-1x24-3; 714 n.h.p.; oilengines. The Brazilian motorship *Itapage* was torpedoed and sunk by a German submarine on September 26th, 1943, 20 miles S. of Maceio. Twenty lives were lost, including some passengers.

ITATA

Cia. Nacional de Vapores; 187B; R. & J. Evans & Co.; 1,971 tons; 290-7x39-9x19-7; 160 n.h.p.; triple-expansion engines. The Chilean steamship *Itata*, on a voyage from Valparaiso to Coquimbo with over 200 passengers, ran into heavy weather off Coquimbo on August 28th, 1922. Her rudder was smashed and she foundered soon afterwards. Three boats, heavily loaded, got away from the ship but capsized. Only 13 survivors reached the shore.

ITAURI

Hamburg-Amerika Linie; 1923; Flensburger Schiffsbau Ges.; 6,838 tons; 439x55-6x31-3; 428 n.h.p.; triple-expansion engines.
The German steamship *Itauri* was sunk by carrier-based aircraft on April 26th, 1944, off Bodo, Norway.

ITCHEN

British Navy, destroyer; 1903; Cammell Laird & Co.; 550 tons; 225x23-5x12; 7,000i.h.p.; 25-5 knots; triple-expansion engines; four 12pdr. guns, 2 T.T.
The destroyer *Itchen* was torpedoed and sunk by a German submarine in the North Sea on July 6th, 1917. Her official complement was 70.

ITCHEN

British Navy, frigate; 1941; Fleming & Ferguson; 1,445 tons; 306x37-5x—; 21 knots; turbine engines; 3-drum boilers; two 4 in. A.A. guns, several smaller.
The frigate *Itchen*, Cdr. C. E. Bridgman, D.S.O., R.N.R., was escorting an Atlantic westbound convoy in company with the corvettes *Polyanthus* (which see) and *Morden* and the Canadian destroyer *St. Croix* (which see). On September 23rd, 1943, when S. of Iceland *Itchen* was torpedoed during an attack by German submarines, and sank with the loss of 14 officers, including Cdr. Bridgman, and 134 ratings, together with five officers and 75 ratings of the *St. Croix* which had been sunk previously.

The full story of the action is told under the *St. Croix*.

ITHAKA

Atlas Levante-Linie A.G.; 1922; Norddeutsche Unionwerke A.G.; 1,773 tons; 283-2x39-7x17'-6; 137 n.h.p.; triple-expansion engines.
The German steamship *Ithaka* was torpedoed and sunk by a British submarine on November 10th, 1941, near Milo Island in the Aegean Sea.

ITONUS

British India Steam Navigation Co.; 1898; Vickers Sons & Maxim; 5,340 tons; 449x54-2x24-7; 649 n.h.p.; 10-5 knots; triple-expansion engines.
The steamship *Itonus*, Capt. T. Costello, was used as a hospital ship during the Dardanelles campaign, returning to her former service in 1916. On December 20th of that year, when 60 miles N.W. by W. i W. of Malta bound from Marseilles to Sydney, N.S.W., she was torpedoed and sunk by an Austrian submarine. One engineer and four native engine room hands were drowned, the remainder of the crew escaping in the boats.
Capt. Costello was taken prisoner.

ITRIA

British India S.N. Co.; 1901; A. & J. Inglis; 5,318 tons; 410-3X 50-7x28-8; 387 n.h.p.; triple-expansion engines. The British cargo ship *Itria* sank after a collision on April 18th, 1918, in 35° 30' N., 21° 30' E., while on a voyage from Calcutta to London carrying a general cargo.

ITSUKUSHIMA

Japanese Navy, minelayer; 1929; Uruga Dock Co.; 1,970 tons; 328x42x10; 3,000b.h.p.; 16knots; oilengines; three 5-5in. guns, two 3 in. AA, 250 mines.
The minelayer *Itsukushima* was torpedoed and sunk by a Dutch submarine about 100 miles N.E. of Rembang, Java, on October 17th, 1944. The normal complement of the vessel was 235.

ITSUKUSHIMA MARU

Nippon Suisan K.K.; 1937; Kawasaki Dkyd. Co.; 10,007 tons; 503-3x65x37-1; 2,250 n.h.p.; oilengines. The tanker *Itsukushima (Itukusima) Maru* was bombed and sunk by U.S. land-based aircraft on October 29th, 1944, off Kudat, North Borneo.

IVANHOE

IVANHOE

British Navy .destroyer; 1937; Yarrow; 1,370 tons; 320x33x 8-5; 34,000 sh.p.; 36 knots; turbine engines; 3-drum boilers; four 4 - 7 in. guns, 7 smaller, 10 T. T.

The destroyer *Ivanhoe*, Cdr. P. H. Hadow, was mined and sunk in the North Sea on September 1st, 1940. The ship carried a complement of 145, of whom one officer and 30 ratings were killed and three ratings wounded.

IVAR

L. H. Carl; 1907; W. Gray & Co.; 2,139 tons; 285-3x43-2x 18-9; 235 n.h.p.; triple-expansion engines.

The Danish steamship *Ivar* was sunk by a submarine in the Mediterranean on August 13th, 1916.

IVERNIA

Cunard S.S. Co.; 1900; C. S. Swan & Humer; 14,278 tons; 582x64-9x37-8; 1,668 n.h.p.; 16 knots; quadruple-expansion engines.

The liner *Ivernia*, commissioned as an auxiliary transport, was torpedoed and sunk on January 1st, 1917, 58 miles S.E. of Cape Matapan when on her way to Alexandria. At the time of the attack the *Ivernia* was carrying about 2,400 troops of the Argyle & Sutherland Highlanders, Royal Scots Fusiliers, Rifle Brigade and Yeomanry. Of these three officers and 82 other ranks were drowned. The ship's surgeon, the chief engineer and 34 of the crew were also drowned.

The submarine responsible for the sinking was the *UB-47*, which was one of the craft sent from Germany to the Mediterranean in sections and assembled at Pola. She was commanded by Lt. Cdr. Steinbauer who had torpedoed the French battleship *Gaulois* (which see), a few days previously.

IVOREA

Italo-Baltica Soc. Anon. Italiana di Nav. e Commercio; 1908; Nederlandsche Scheepsbouw Maats.; 3,274 tons; 354 -IX 42-2 x 22-8; 503 n.h.p.; triple-expansion engines.

The Italian steamship *Ivorea* was bombed and sunk by German aircraft on October 7th, 1943, at Leros Island.

IVYDENE

I. T. Lunn & Co.; 1885; Sir W. G. Armstrong, Mitchell & Co.; 2,821 tons; 310x39-2x19-4; 280 n.h.p.; triple-expansion engines.

The British cargo ship *Ivydene* was wrecked at Lemanche Bay, N.F.L. on January 2nd, 1901. She was on a voyage from Hamburg to Wilmington carrying a cargo of salt.

IWAKI MARU

Osaka Shosen Kaisha; 3,124 tons.

The steamship *Iwaki Mam* was torpedoed and sunk by the U.S. submarine *Herring* on June 1st, 1944, off the Kurile Islands.

IWAKUNI MARU

Mitsubishi Risen K.K.; 2,860 tons.

The tanker *Iwakuni Mam* was bombed and sunk by U.S. land-based aircraft on March 29th, 1945, about 30 miles S.W. of Kaohsiung, Formosa.

IWANAMI

Japanese Navy, destroyer; 1942; Japan; 2,200 tons; 415X 35x—; 34 knots; turbine engines; six 5 in. guns, eight 25 m.m. A.A., 15 T.T.

The destroyer *Iwanami* was torpedoed and sunk in the South China Sea by the U.S. submarine *Flasher* on December 4th, 1944. The destroyer carried a complement of over 200.

IWASHIRO MARU

Kaiyo Risen K.K.; 1939; Harima S.B. & Eng. Co.; 3,550 tons; 338-6x48x26; 241 n.h.p.; triple-expansion engines. The steamship *Iwashiro (Iwasiro) Mam* was torpedoed and sunk by the U.S. submarine *Whale* on January 13th, 1943, in the Marshall Islands.

IWATE MARU

Nippon Yusen K.K.; 1921; Teikoku S.S. Co.; 2,985 tons; 305x 43-7x27-2; 352 n.h.p.; triple-expansion engines. The steamship *Iwate Mam* was bombed and sunk by U.S. carrier-based aircraft on January 30th, 1944, at Rabaul.

IXIA

I. Robinson & Sons; 1922; J. Blumer & Co.; 2,985 tons; 331 x 47-7x21-9; 318 n.h.p.; triple-expansion engines. The British cargo ship *Ixia* was wrecked on the Brisons, Cape Cornwall, on June 30th, 1929, while on a voyage from Swansea to Constantinople carrying a cargo of coal.

IXION

China Mutual Steam Nav. Co.; 1912; Scotts Shipbuilding & Engineering Co.; 10,263 tons; 506x60-3x39-5; 586 n.h.p.; 14 knots; triple-expansion engines.

The liner *Ixion*, Capt. W. F. Dark, bound from Glasgow to New York, was torpedoed by a German submarine on May 7th, 1941, in the North Atlantic about 200 miles due S. of Reykjavik, and sank the next day. There were no casualties.

IZARO

Zabala, Goiliay Cia.; 1889; W. Gray & Co.; 1,987 tons; 270X 36-5x20; 165 n.h.p.; triple-expansion engines. The Spanish cargo ship *Izaro* struck a rock and foundered on August 20th, 1930, off Las Hormigas, Cabo Palos.

J. C. JACOBSEN

Det Forenede Dampskibs Selskab; 1890; Burma'ster & Wain; 1,221 tons; 219-3x31-1x20-J; 116 n.h.p.; triple-expansion engines.

The Danish ship *J. C. Jacobsen* on a voyage from Antwerp to Copenhagen, sprang a leak and sank on February 4th, 1947, 11 miles N.E. of Pit lightship. The master and chief engineer were lost. A lifeboat was later washed ashore.

J. M. SMITH

James Westoll; 1885; Short Bros.; 2,055 tons; 288 x38-7'x 19 3; 195 n.h.p.; triple-expansion engines.

The British cargo ship *J. M. Smith* sank after a collision 58 miles north-west of Heligoland on March 3rd, 1907. She was carrying a cargo of coal on a voyage from Hull to Hamburg.

J. N. MADVIG

P. Brown; 1884; Jernsk. & Maskin Bygg.; 1,762 tons; 267-5 x 35-3x16-5; 187 n.h.p.; compound engines. The Danish steamship *J. N. Madvig* was sunk by a German submarine in the English Channel on September 13th, 1916.

J. N. PEW

Sun Oil Co.; 1921; Sun Shipbuilding Co.; 9,033 tons; 480-5X 66x36-8; 620 n.h.p.; 11 knots; triple-expansion engines. The United States tanker *J. N. Pew*, Capt. Thomas E. Bush, was in convoy in the Atlantic on February 21st, 1942, when she was torpedoed and sunk by a German submarine. Capt. Bush and 32 of the crew were killed.

JAAMERI

Finska Fiskeri A/B; 1920; Monmouth S.B. Co.; 2,522 tons; 312-9x43x20-7; 271 n.h.p.; triple-expansion engines. The Finnish steamship *Jaameri* struck a mine and sank on April 26th, 1944, off the Baltic coast of Germany.

JACK

United States Maritime Commission; 1919; American S.B. Co.; 2,622 tons; 251x43-6x26-2; 267 n.h.p.; triple-expansion engines.

The American steamship *Jack* was torpedoed and sunk by a German submarine on May 27th, 1942, S.E. of Jamaica on a voyage from Ponce to New Orleans with 3,000 tons of sugar. Forty-seven of her complement of 63 were lost.

JACK CARNES

Sinclair Refining Co.; 1942; Federal S.B. & D.D. Co.; 10,907 tons; 508-2x72-1x38; 1,178 n.h.p.; turbine engines. The American tanker *Jack Carnes* was shelled, torpedoed and sunk by a German submarine on August 30th, 1942, on a voyage from Swansea to Aruba. The entire crew got away in the boats, but one of these, with the captain and 26 men, was last seen on the night of the 31st.

JACKAL

British Navy, destroyer; 1938; John Brown & Co.; 1,690 tons; 348x35x9; 40,000 s.h.p.; 36 knots; turbine engines; 3 drum boilers; six 4-7 in. guns, 6 smaller, 10 T.T.

On the afternoon of May 11th, 1942, a destroyer division consisting of *Jervis*, *Jackal*, *Kipling* and *Lively* was patrolling between Crete and Libya when it was sighted by enemy aircraft. In the ensuing attack by German dive bombers *Lively* and *Kipling* were sunk and *Jackal* was hit and disabled, but was taken in tow by *Jervis*. The destroyer managed to keep afloat until the early hours of the 12th when it was realised that it was impossible to save her. All members of the crew remaining on board were taken off by *Jervis* which then sank her with a torpedo.

The Joss on board *Jackal* was nine ratings killed.

JACKSONVILLE

United States War Shipping Administration; 1944; Kaiser Co.; 10,448 tons; 504x68-2x39-2; turbo-electric engines. The tanker *Jacksonville*, on a voyage from New York to Shell Haven with 14,300 tons of motor spirit, was torpedoed by a German submarine on August 30th, 1944, some 200 miles N. of Ireland.

The ship was broken in two, the forepart sinking immediately. The after part caught fire and sank some time later. Only three of her complement of 78 were saved and these were badly injured.

JACOB JONES

United States Navy, destroyer; 1915; New York Shipbuilding Co.; 1,050 tons; 310x29-9x9-5; 17,000 i.h.p.; 29-5 knots; turbine engines; Normand'boilers; four 4 in. guns, 8 T.T. The destroyer *Jacob Jones*, Lt. Cdr. David Bagley, in company with the destroyer *Nicholson* was escorting a convoy off Queenstown on December 6th, 1917. At 9 a.m. the vessels separated as the *Jacob Jones* was to carry out target practice before returning to port. This was duly performed and the destroyer turned about for Queenstown at 13 knots, her position being roughly 40 miles S.W. of the Scilly Isles. The gunfire attracted the attention of a German submarine which approached to within 800 yards without being detected and discharged a torpedo which struck the destroyer on the starboard beam. The engine room was flooded and the ship began to sink by the stern, her depth charges exploding and killing numbers of the crew.

The submarine which made the attack was the *U-53*, Lt. Cdr. Hans Rose, and she came to the surface and took on board two prisoners. Luckily a merchant steamer picked up some men in the motor boat and sent a wireless message to Queenstown. The following morning the sloop *Camellia* arrived on the scene and picked up 25 from rafts, among whom was Lt. Cdr. Bagley. The war complement of the *Jacob Jones* was 139.

JACOB JONES

United States Navy, destroyer; 1918; New York Shipbuilding Co.; 1,090 tons; 314-3x30-5x12; 27,000 s.h.p.; 35 knots; turbine engines; four 4 in. guns, 12 T.T.

The U.S. destroyer *Jacob Jones*, Lt. Cdr. H. D. Black, was off Cape May, New Jersey, when she was torpedoed by a submarine just before dawn on February 28th, 1942. The vessel was hit in the bow, the explosion killing many of the men below and also those on the bridge. A few minutes later a second torpedo blew up the stern and all the depth charges.

The *Jacob Jones* carried a complement of about 150. Of this number only nine engine room ratings and two seamen were saved.

JACOB LUCKENBACH

Luckenbach S.S. Co.; 1944; Ingalls S.B. Corp.; 7,869 tons; 468-5x69-6x29-5; turbine engines.

The American ship *Jacob Luckenbach* was on charter to the Pacific Far East Line, and on July 14th, 1953, was carrying passengers, mail and cargo from San Francisco to Yokohama. When only 11 miles off the Golden Gate she was in collision with the *Hawaiian Pilot* during a fog and sank.

JACOBUS FRITZEN

Johs. Fritzen & Sohn; 1909; W. Doxford & Sons; 4,090 tons; 348-8x51-1x24; 310 n.h.p.; triple-expansion engines. The German steamship *Jacobus Fritzen* was sunk by mine or torpedoed October 14th, 1942, N. of Cap Arkona, East Germany.

JACONA

Cairn Line of Steamships; 1889; J. Laing; 2,969 tons; 320-4X 41x19-5; 285 n.h.p.; 10 knots; triple-expansion engines. The steamship *Jacona* was mined and sunk 25 miles N.N.W. off Troupe Head, Banffshire, on August 12th, 1915. Twenty-nine men were killed. The captain was among the survivors.

JACQUELINE

Ant. Dom. Bordes & Fils; 1897; Forges et Chantiers de la Mediterranee; 2,899 tons; 322-2x45-7x25-4. The French sailing ship *Jacqueline* was sunk in the Atlantic by a German submarine or about September 25th, 1917.

JACQUES FRAISSINET

Cie. Marseillaise de Nav. a Vap.; 1915; Soc. Anon. des Ch. & Atel. de St. Nazaire; 3,845 tons; 351x46x25-9; 288 n.h.p.; triple-expansion engines.

On a voyage from Marseilles to Constantza, the French ship *Jacques Fraissinet* struck a rock at Zeitn Bouroum on February 15th, 1929, and sank.

JADARLAND

JADARLAND

Sandnaes D/S A/S; 1918; Schiffswerft v. Herny Koch; 938 tons; 196X30'9x18-3; 95 n.h.p.; triple-expansion engines. The Norwegian steamship *Jadarland* struck a mine and sank on May 31st, 1940, outside Haugesund. Seven of her crew and 12 passengers were killed.

JAEGERSBORG

A/SD/SDannebrog; 1919; Stuhr's Mask. & Skibs.; 1,254 tons; 238 • 7 x 36 - 2 x 13 • 4; 83 n.h.p.; triple-expansion engines. The Danish ship *Jaegersborg* with a cargo of agricultural products left Copenhagen on December 14th, 1939, for Leith. Nothing more was seen of her. One body was washed ashore and another picked up on a raft. The remainder of the crew of 18 were never found.

JAFFA

Ellermans Wilson Line; 1897; J. Scott & Co.; 1,383 tons; 260 - 1x35-2x16-4; 251 n.h.p.; 11 knots; triple-expansion engines.

The steamship *Jaffa* was torpedoed and sunk by a German submarine three miles E. by S. of the Owers lightship on February 2nd, 1918. Ten men were killed. The captain was among the survivors.

JAGERSFONTEIN

N.V. Vereenigde Nederlandsche Scheeps. Maats.; 1934; N.V. Nederlandsche Scheepsbouw Maats.; 10,083 tons; 457-2x 63-2x34-9; 2,334 n.h.p.; oilengines.

The Dutch liner *Jagersfontein* was torpedoed and sunk by the German submarine *U-107* on June 26th, 1942, 500 miles E. of the Bermudas on a voyage from Galveston to Liverpool. There was no loss of life.

JAGUAR

German Navy, gunboat; 1898; Schichau; 900 tons; 203x30x 11; 1,400 i.h.p.; 14 knots; triple-expansion engines; Thorny-croft boilers; four 3-5 in. guns, six 1 pdr., 2 m.g. The gunboat *Jaguar* was one of a flotilla of four such vessels blown up and abandoned by the Germans on the fall of the fortress of Tsingtau on November 7th, 1914. The ship carried a complement of 121. A full account of the ships lost at Tsingtau will be found under the light cruiser *Cormoran*.

JAGUAR

French Navy, destroyer; 1926; Lorient Dockyard; 2,126 tons; 416x37-5x17-5; 52,000 i.h.p.; 34-7 knots; turbine engines; Du Temple boilers; five 5-1 in. guns, eight 13 mm., 6 T. T. The destroyer *Jaguar*, Cdr. C. F. Adam, was engaged in operations connected with the evacuation of the British and French armies from Dunkirk, when she was bombed and sunk by German aircraft on May 21st, 1940.

The *Jaguar* carried a complement of 230, of whom one officer and 20 ratings were killed.

JAGUAR

British Navy, destroyer; 1938; Denny Bros.; 1,690 tons; 348 X 35x9; 40,000 s.h.p.; 36 knots; turbine engines; 3 drum boilers; six 4 • 7 in. guns, 6 smaller, 10 T. T.

The destroyer *Jaguar*, Lt. Cdr. L. R. K. Tyrwhitt, D.S.C., was torpedoed and sunk by a German submarine off the coast of Libya on March 26th, 1942. Three officers, including Lt. Cdr. Tyrwhitt, and 191 ratings were killed and two officers wounded.

JAGUAR

German Navy, torpedo boat; 1928; Wilhelmshaven Yard; 800 tons; 304x28x9; 25,000 s.h.p.; 34 knots; turbine engines; Schulz-Thornycroft boilers; three 4-1 in. guns, two 1 pdr., 6 T.T. The torpedo boat *Jaguar* was bombed and sunk at the port of Le Havre in company with several other vessels of the same class on June 14th, 1944. The vessel's normal complement was 123.

More details are given under the *Falke*.

JAGUARIBE

Cia. Commercio e Navegacao; 1882; Oswald, Mordaunt & Co.; 2,168 tons; 299-3x36-1x23-9; 217 n.h.p.; compound engines. The Brazilian ship *Jaguaribe* was on a voyage from Rio de Janeiro

to Manaus with 47,000 bags of salt and 150 bags of gunpowder when she was seized by rebels against the Government. She was intercepted off Itacoatiara on August 24th, 1932, by the Lloyd Brasileiro steamship *Inga* and after an engagement lasting 40 minutes she was rammed and sunk.

JAIME PRIMERO

Spanish Republican Navy, battleship; 1914; Sociedad Espanola de Construccion Naval; 15,452 tons; 439-5x78-8x26; 15,500 ihp; 19-5 knots; turbine engines; Yarrow boilers; eight 12 in. guns, twenty 4 in., two 3pdr., 2 m.g., 3 T. T.

The Spanish Civil War of 1936-39 produced very few naval actions, the brief encounters which took place being scarcely worthy of such a definition. At the commencement of the war the opposing parties were roughly equal in naval strength, which was as follows:—

GOVERNMENT

	tons	built	speed	armament
<i>Jaime Primero</i>	15,452	1914	19-5 knots	8-12 in., 20-4 in.
<i>Libertad ...</i>	7,850	1925	33	„ 8-6 in., 4-4 in.
<i>Cervantes</i>		1928		„ „ „ „
<i>MendezNunez</i>	4,650	1923	29	„ 6 „ „ „

14 destroyers, six torpedo boats and nine submarines.

NATIONALIST

<i>Espana ...</i>	15,452	1912	19-5 knots	8-12 in., 20-4 in.
<i>Baleares ...</i>	10,000	1931	33	„ 8-8 in., 8-4-7in.
<i>Canarias ...</i>			„	„ „ „ „
<i>Almirante</i>	7,850	1925		„ 6 in., 4-4 in.
<i>CerveraNavarra ...</i>		5,502	1920	25-5
„ 6 „				

two destroyers, two torpedo boats and four submarines

In the fighting at sea neither side made full use of their capital ships, of which they possessed one apiece. The Nationalists also failed to make the most of the two 10,000 ton, 8 in. gun cruisers, which had fallen into their hands. Engagements between squadrons were hurried affairs in which there was no inclination to close and force a decision. By the end of the war the Government had lost one battleship, two destroyers and two submarines, with one cruiser and three submarines damaged and out of action. The Nationalist losses were more severe, they having had one battleship, one 10,000 ton cruiser, the *Baleares*, and two torpedo craft sunk, the big ships going down with heavy loss of life.

The Government battleship *Jaime Primero* caught fire and blew up in Cartagena harbour on June 17th, 1937. Fortunately the casualties were few, there being 18 killed and about 100 wounded. The *Jaime Primero* was raised after the war and her guns removed.

On March 7th, 1939, at the end of the war, the three Government cruisers, with eight destroyers, steamed to Bizerta, Tunisia, and there surrendered to the French authorities.

JALABALA

Scindia Steam Nav. Co.; 1927; Lithgows; 3,610 tons; 349-9x 49x24-3; 398 n.h.p.; triple-expansion engines. The Indian steamship *Jalabala* was torpedoed and sunk by a Japanese submarine on October 11th, 1943, about 100 miles W. of Koilthottam on a voyage from Colombo to Bombay. Five of her crew were killed.

JALAPALAKA

Scindia Steam Nav. Co.; 1917; Sir R. Dixon & Co.; 4,215 tons; 364 • 9X51-1X26 • 1; 368 n.h.p.; triple-expansion engines. The Indian steamship *Jalapalaka*, on a voyage from Bombay to Rangoon, was shelled and sunk by a Japanese submarine on January 30th, 1942, about 100 miles E. of Madras. Thirteen of her crew were killed.

JALARAJAN

Scindia Steam Nav. Co.; 1925; Bar tram & Sons; 5,102 tons; 400X52-2X28-5; 476 n.h.p.; triple-expansion engines. The Indian steamship *Jalarajan* was torpedoed and sunk by a Japanese submarine on January 14th, 1942, off the west coast of Sumatra on a voyage from Singapore to Calcutta. Five of her crew were killed.

JALATARANG

Scindia Steam Nav. Co.; 1921; *J. I. Thornycroft & Co.*; 2,498 tons; 300-5x43-7x22-2; 240 n.h.p.; triple-expansion engines. The Indian steamship *Jalatarang* was torpedoed, shelled and sunk by a Japanese submarine on January 30th, 1942, on a voyage from Cochín to Rangoon. Thirty-eight of her crew of 49 were lost.

JAMAICA

Skibs.-A/S Rose; 1936; *Burmeister & Wain*; 3,015 tons; 324-4 X 45 - 8 X 26 • 1; 606 n.h.p.; oil engines. The Norwegian motorship *Jamaica* was torpedoed and sunk by a German submarine on March 7th, 1943, on a voyage from Liverpool to New York. Nineteen of her crew and two passengers were killed.

JAMAICA PLANTER

Jamaica Banana Producers S.S. Co.; 1936; *Lithgows*; 4,098 tons; 356-5x50-2x29-7; 808 n.h.p.; oil engines. The British cargo ship *Jamaica Planter* sank after a collision with the *Wellesley* in Barry Roads on December 27th, 1944. She was on a voyage from Halifax, N.S., to Avonmouth carrying a refrigerated cargo.

JAMAICA PROGRESS

Jamaica Banana Producers S.S. Co.; 1932; *Lithgows*; 5,475 tons; 393-7x54-2x30-8; 1,061 n.h.p.; 16 knots; quadruple-expansion engines. The steamship *Jamaica Progress*, Capt. A. McColm, was about 50 miles N.W. by W. of Skerryvore on July 30th, 1940, when she was torpedoed and sunk by a German submarine. Seven men were killed and one wounded. Capt. McColm was among the survivors. The *Jamaica Progress* was not in convoy.

JAMES B. STEPHENS

United States War Shipping Administration; 1942; *Oregon S.B. Corp.*; 7,176 tons; 422-8x57x34-8; triple-expansion engines. The steamship *James B. Stephens* was torpedoed by a submarine on March 8th, 1943, 200 miles N.E. of Durban on a voyage from Suez to Durban. The ship broke in two and caught fire, sinking some time later. Fourteen of her crew were lost.

JAMES CAMERON

James Westoll; 1882; *Short Bros.*; 1,805 tons; 260x38-2x17-9; 200 n.h.p.; compound engines. The British cargo ship *James Cameron* sank after a collision in the North Sea on January 27th, 1910. She was on a voyage in ballast from Rouen to the Tyne.

JAMES CARRUTHERS

St. Lawrence & Chicago S.N. Co.; 1913; *Collingwood S.B. Co.*; 7,862 tons; 550x58-2x26-7; 282 n.h.p.; triple-expansion engines. The Canadian steamship *James Carruthers* foundered in a storm on Lake Huron on November 9th, 1913, while carrying a cargo of wheat on a voyage from Fort William, Ont., to Port Colborne. All of the crew of 22 were lost.

JAMES CROSFIELD

Potter Bros.; 1862; *T. Vernon & Son*; 979 tons; 201x32-5x21-4. The sailing ship *James Crosfield* was wrecked off Langness, Isle of Man, on January 5th, 1867. All on board were lost.

JAMES H. REED

Interlake S.S. Co. (Pickands Mather & Co.); 1903; *Detroit S.B. Co.*; 5,265 tons; 448x52-2x25-3; 198 n.h.p.; quadruple-expansion engines. On a voyage from Escanaba, Mich., to Buffalo with a cargo of iron ore, the *James H. Reed* was in collision with the Canadian steamship *Ashcroft* on April 27th, 1944, and sank 42 miles W. of Long Point, Ont., on Lake Erie.

JAMES MCKAY

Lykes Bros. S.S. Co.; 1941; *Bethlehem Sparrow's Pt. Shipyard*; 6,762 tons; 397-1x60-2x23-7; turbine engines. The American steamship *James McKay* strayed from convoy and

was torpedoed and sunk by a German submarine on December 8th, 1942, 750 miles W. of the Hebrides on a voyage from New York to Belfast Lough. There were no survivors.

JAMES OGLETHORPE

United States War Shipping Administration; 1943; *Southeastern S.B. Corp.*; 7,176 tons; 422-8x57x34-8; 339 n.h.p.; triple-expansion engines. The steamship *James Oglethorpe* was torpedoed and set on fire by a German submarine on March 16th, 1943, about 900 miles E. of Newfoundland on a voyage from New York to Immingham. About 30 of her complement put off in the boats and were eventually saved, but the captain and 43 crew who remained on board to bring the ship to port were never seen again.

JAMES SERVICE

A. Currie & Co.; 1869; *Dobie & Co.*; 455 tons; 153-6x28-1x15-3. The Australian barque *James Service* was bound from Calcutta to Melbourne when she was wrecked S. of Fremantle, Western Australia, on July 23rd, 1878. The barque, which was carrying a few passengers, sank with the loss of 24 lives.

JAMES SPRUNT

United States War Shipping Administration; 1943; *North Carolina S.B. Co.*; 7,177 tons; 422-8x57x34-8; 339 n.h.p.; triple-expansion engines. The steamship *James Sprunt* was torpedoed by a German submarine on March 10th, 1943, S. of Hispaniola on a voyage from Key West to Karachi. The ship blew up and sank with the loss of most of her

JAMES W. ELWELL

H. D. Troop & Son; 1870; *S. King*; 550 tons. The Canadian barque *James W. Elwell*, Capt. J. Wren, left Cardiff for Valparaiso in September, 1872, with a cargo of coal. She carried a crew of 15, including a stewardess who was the wife of the ship's cook.

The voyage was unfortunate from the outset. The first mate injured his foot; erysipelas set in and within a week he died. This was followed by an accident to the cook, from the effects of which he died soon after. The day after the cook's death the cargo of coal was discovered to be on fire. In addition there was a strong gale which hampered the crew in fighting the flames. For some days there was hope of saving the ship, but later the fire increased its hold, and it was decided to abandon ship, the position at the time being 160 miles off the Patagonian coast.

The crew embarked in one large boat, and after four days reached a harbour on the N. coast of the Straits of Magellan. Provisions and water were scanty, and had to be strictly rationed. The boat worked her way along the coast by stages, a number of the crew dying from exhaustion on the journey. Finally only the captain, the stewardess, the carpenter and a seaman were left. These four landed and for a period of 72 days subsisted on shellfish and whatever else they could find which was edible. During this time the carpenter died.

Capt. Wren decided to set sail again, though by this time he and his companions were very weak. Shortly after reaching open sea they were sighted by the White Star liner *Tropic*, Capt. Parsells, and were picked up and taken to Liverpool. Their existence for 72 days on a barren coast, with only the minimum of food to sustain them, is one of the most remarkable records of survival from shipwreck.

JAN VAN GALEN

Netherlands Navy, destroyer; 1928; *Maats. Fyenoord*; 1,316 tons; 322x31-2x10; 31,000 s.h.p.; 36 knots; turbine engines; *Yarrow boilers*; four 4-7 in. guns, one 3 in., four 40mm., four 12-7 mm., 1 m.g., 6 T.T.

The destroyer *Jan Van Galen* was one of the few modern ships of the Royal Netherlands Navy stationed in home waters at the time of the German invasion of Holland. At just after 3 o'clock on the morning of May 10th, 1940, German aircraft crossed the frontiers of Holland and began to drop parachute troops. The *Jan Van Galen* was at that time lying off Den Helder, at the entrance to the Zuider Zee, on the look-out for signs of an enemy seaborne landing. Hearing that an air attack was being made on the Hague she pro-

ceeded there at full speed and helped to drive off the first waves of enemy bombers. From there she steamed along the coast to the New Waterweg leading to Rotterdam. In this the Germans had sown magnetic mines but she successfully avoided these and again engaged the enemy planes which were coming over in great numbers. She shelled the Waalhaven aerodrome which had fallen to the enemy, and also concentrations of German troops. This brought upon her the full weight of the dive bombers which made 31 attacks before they finally sank her.

The *Jan Van Galen* carried a complement of about 150 of whom a number were lost in the action.

The ships lost by the Dutch between May 10th and 7 p.m. on the 14th, when the armed forces at home capitulated, were as follows:—

Jan Van Galen, destroyer, 1,316 tons, bombed and sunk. *Johan Maurits Van Nassau*, sloop, 1,520 tons, bombed and sunk.

Brinto, gunboat, 540 tons, bombed and sunk. *Friso*, gunboat, 540 tons, bombed and sunk. *Hydra*, minelayer, 593 tons, lost in Zuider Zee. *Medusa*, minelayer, 593 tons, lost in Zuider Zee. *Abraham Van Der Hulst*, minesweeper, 525 tons, sunk in action. *Pieter Florisz*, minesweeper, 525 tons, sunk in action.

Besides these were a few submarines destroyed to avoid capture and several vessels on the building slips which were blown up. The cruiser *Jacob Van Heemskerck*, 3,350 tons, six 5-9 in. guns, completing at the Amsterdam Yard of the Nederlandsche Scheepsbouw and the destroyer *Isaac Sweers*, 1,628 tons, completing at the Flushing yard of K. M. de Schelde, were taken in tow for England where they were made ready for sea and commissioned by the Royal Netherlands Navy.

The vessels which joined forces with the Allied navies were as follows:—

CRUISERS

	Tons	guns	
<i>De Ruyter</i> ...	6,450	7-5-9 in	East Indies
<i>Java</i> ...	6,670	10-5-9 in	"
<i>Sumatra</i> ...	"	"	"
<i>Tromp</i> ...	3,350	6 "	"

DESTROYERS

<i>WittDeWith</i> ...	1,316	
<i>Banckert</i>	"	
<i>Van Nes</i>	"	
<i>Van Ghent</i> ...	1,310	"
<i>Evertsen</i>	"	
<i>Kortenaer</i>	"	
<i>PietHein</i>	"	

SLOOPs

<i>Van Kinsbergen</i>	1,760	European Waters
<i>Flares</i> ...	1,457	"
<i>Soemba</i> ...	"	"

MINELAYERS

<i>Prins Van Oranje</i>	1,291	East Indies
<i>Gouden Leeuw</i>	"	"

GUNBOAT

<i>Gruno</i> ...	540	European Waters
------------------	-----	-----------------

There were also 21 submarines, most of them modern, together with a number of miscellaneous vessels of small tonnage. In the East Indies there was also the old guardship *Soerabaja*, 5,644 tons, two 11 in. guns.

JAN VAN RYSWYCK

F. Alexander filsetde.; 1907; *Craig Taylor & Co.*; 2,135 tons; 287 X 44 x 19 • 8; 210 n.h.p.; triple-expansion engines. The Belgian ship *Jan van Ryswyck* was carrying iron, steel and general cargo from Antwerp to Grangemouth on May 21st, 1924, when she was wrecked off Longstone, Fame Island.

JANAKI

Malabar S.S. Co.; 1922; *Howaldtswerke*; 857 tons; 195-hp 32-9x14; triple-expansion engines. The Indian cargo ship *Janaki* capsized about three miles west of Khanderi Island on March 13th, 1954, while on a voyage from

Bombay to Calicut. She drifted bottom up for several days before finally sinking on March 24th, six and a half miles west of Khanderi Island. Seven of the forty persons on board were lost.

JANBI MARU

Mitsubishi Risen K.K.; 5,244 tons.

The tanker *Janbi Maru* was torpedoed and sunk by the U.S. submarine *Ray* on July 18th, 1944, 30 miles N. of Bawean Island in the Java Sea.

JANE KELSALL

William D.C. Balls & Son; 1881; *J. Readhead & Co.*; 1,877 tons; 275 x 35-6x23; 192 n.h.p.; compound engines. The British cargo ship *Jane Kelsall* was wrecked on September 6th, 1898, near Lister Lighthouse on the south coast of Norway. She was carrying a cargo of wheat on a voyage from Philadelphia to Copenhagen.

JANET BOYD

M'Gavan; 1839; *Leith*; 230 tons.

The barque *Janet Boyd*, Capt. J. Topping, sailing from Hamburg was off Margate on January 20th, 1855, in a N.N.E. gale and heavy snow squalls. The ship approached the shore between eight and nine in the morning and made signals for a pilot which were seen by boatmen on Margate sands. The weather was too bad for any pilot to put out and the *Janet Boyd* then attempted to haul offshore.

The ship was gradually blown on to the Tongue Sand and at last struck to the eastward of the Tongue Light. Here she was battered to pieces by the waves, her masts going one by one. At the turn of the tide a number of luggers went out from Margate in the hope of rendering assistance but by that time the ship had been swept clean of all on board. There were no survivors, the loss of life amounting to 28 persons.

JANETA

Glasgow United Shipping Co.; 1929; *Barclay, Curie & Co.*; 5,312 tons; 402-4x55x28-5; 463 n.h.p.; triple-expansion engines.

The steamship *Janeta*, on a voyage from Algiers to the River Plate, was torpedoed and sunk by a German submarine on May 1st, 1944, about 700 miles W.S.W. of St. Helena. Ten of her crew and four gunners were lost.

JANKIKI

Cia. Ltda. Capo Bona Esperanza, S.A.; 1919; *Ayrshire Dockyard Co.*; 5,950 tons; 409-6x53-5 x 33-5; triple-expansion engines & L.P. turbine.

The Panamanian ship *Jankiki* was carrying phosphate from Casablanca to Vlaardingen. The cargo shifted during a storm on November 28th, 1953, and she sank about ten miles N.W. of Berlenga Island. Eleven of her crew were drowned.

JANUS

J. & E. Kish; 1883; *Dobson & Charles*; 1,084 tons; 240-5X 33'2x14-1; 150 h.p.; compound engines.

The British cargo ship *Janus* was wrecked on Haisbro' Sands at 1 a.m. on October 16th, 1892, while on a voyage from Christiania to Honfleur carrying a cargo of timber.

JANUS

Rederi A/B Nordstjeman; 1939; *Oresundsvarvet A/B*; 9,965 tons; 503'2x65-8x37'2; 653 n.h.p.; oil engines. The Swedish tanker *Janus* was torpedoed and sunk by a German submarine on October 20th, 1940, on a voyage from Curacao and Halifax to the Clyde. There were 33 survivors.

JANUS

British Navy, destroyer; 1938; *Swan, Hunter & Wigham Richardson*; 1,690 tons; 348x35x9; 40,000 s.h.p.; 36 knots; turbine engines; 3-drum boilers; six 4-7 in. guns, 6 smaller, 10 T.T.

The destroyer *Janus*, Lt. Cdr. W. B. R. Morrison, took part in the British and American landing at Anzio, Italy, on January 22nd, 1944. Prior to this the ship was in the Adriatic with a force of five destroyers engaged in bombarding railways and bridges and disrupting traffic near Ancona. On January 23rd, when off Nettuno,

she was hit by a torpedo from a German dive bomber and foundered in 22 minutes taking with her seven officers, including Lt. Cdr. Morrison, and 155 ratings. For full story of the Anzio landing see under the cruiser *Penelope*.

JANVOLD

Johs. Larsen; 1904; Grangemouth & Greenock Dkyd. Co.; 1,366 tons; 235x37-2x17-1; 151 n.h.p.; triple-expansion engines.

The Norwegian cargo ship *Janvold* was torpedoed and sunk by a German submarine in the Bristol Channel on May 26th, 1918.

JAPIGIA

Soc. di Navigazione a Vapore Puglia; 1890; Wigham Richardson & Co.; 1,269 tons; 232-4x33-3x20-6; 106n.h.p.; triple-expansion engines.

The Italian cargo ship *Japigia* was torpedoed and sunk by a submarine in the Adriatic on April 21st, 1917.

JARL

E. Olander; 1882; W. Gray & Co.; 1,643 tons; 257-6x35-7x19; 173 n.h.p.; compound engines.

The Swedish cargo ship *Jarl* was torpedoed and sunk by a German submarine off the north-west coast of Scotland on August 7th, 1917.

JARL

Robert Philis; 1900; Craig, Taylor & Co.; 1,349 tons; 245X 37-3x15-6; 162 n.h.p.; triple-expansion engines. The Swedish ship *Jarl* was carrying timber from Viborg and Lovisa to Ostend on December 1st, 1923, when she struck a mine and sank N.W. of Surop Light.

JARVAMAA

Tallinna Laevauhisus AJS; 1894; Campbelltown S.B. Co.; 1,363 tons; 230X32-6X16-4; triple-expansion engines. The Estonian steamship *Jarvamaa*, under German control, was bombed and sunk by Russian aircraft on August 28th, 1941, ten miles E. of Hogland Island, Finland.

JARVIS

United States Navy, destroyer; 1937; Puget Sound Navy Yard; 1,500 tons; 341-7x34-7x9-9; 42,800 s.h.p.; 36-5 knots; turbine engines; Express boilers; four 5 in. guns, 5 m.g., 16 T.T.

The destroyer *Jarvis* was damaged by Japanese aircraft in the operations around Guadalcanal in the Solomon Islands. The vessel was ordered to the naval base at Tulagi to effect repairs, but was attacked for a second time by Japanese bombers and sunk.

The normal complement of the *Jarvis* was 172.

JASEUR

British Navy, gunboat; 301 tons; 80 n.h.p.; steam engines; one 68 pdr. gun, one 32 pdr.

The gunboat *Jaseur*, Lt. J. B. Scott, was wrecked on Paxo Nuevo, in the West Indies, on February 26th, 1859. There was no loss of life.

JASON

A. & J. H. Carmichael; 1870; Barclay, Curie & Co.; 1,586 tons; 253x38-6x23-2.

The British sailing vessel *Jason* left Calcutta on February 15th, 1893, for Boston, U.S., with a cargo of jute and a crew of 27. Crossing the South Indian Ocean she was damaged in a hurricane, but managed to reach Mauritius where she was refitted. She left again in September and made a fair passage to the eastern coast of the United States.

On December 5th, 1893, she ran into a blizzard off Cape Cod and during the night ran ashore and was quickly battered to pieces by the seas. All the crew, save one apprentice who swam ashore, were either swept overboard or were frozen to death in the rigging.

JASON

British Navy, torpedo gunboat; 1892; Great Britain; 810 tons; 230x27x12-5; 3,500 i.h.p.; 19 knots; triple-expansion engines; two 4-7 in. guns, four 3 pdr., 3 T.T.

The torpedo gunboat *Jason* was mined and sunk near Coll Island on the west coast of Scotland on April 7th, 1917. The vessel carried an official complement of 85.

JASPER

P. M. Duncan & Son; 1883; W. B. Thompson; 1,256 tons; 235x31-7x22-4; 99 h.p.; compound engines. The British cargo ship *Jasper* was wrecked at May Island, Firth of Forth, in April, 1894, while on a voyage in ballast from Dundee to Burntisland.

JAVA

Netherlands Navy, cruiser; 1921; K.M. de Schelde, Flushing; 6,670 tons; 509-5x52-5x18; 72,000 s.h.p.; 31 knots; turbine engines; Schulz-Thornycroft boilers; ten 5-9 in. guns, eight 40 mm., four 2pdr., six 12-7 mm., 12 mines, 2 aircraft. The cruiser *Java* was one of the largest units of the Royal Netherlands Navy and had seen nearly 20 years service at the time of the battle of the Java Sea on February 27th, 1942.

At approximately 11.30 p.m. on the 27th the *Java* was sunk either by a Japanese submarine or by striking a mine. Of her complement of about 550 the number of casualties is not known.

The full story of the battle is told under the *De Ruyter*, flagship of Admiral Doorman.

JEAN ET JACQUES

Les Cargos Algeriens Soc. Anon.; 1921; Furness S.B. Co.; 3,493 tons; 363-3x52-2x22; 547 n.h.p.; triple-expansion engines.

The French steamship *Jean et Jacques* was torpedoed and sunk by British motor torpedo boats on March 3rd, 1942, off Cap Blanc Nez.

JEAN JADOT

Cie. Maritime Beige (Lloyd Roy ale) S.A.; 1929; Flensburger Schiffsbau Ges.; 5,859 tons; 443-7x57-2x26-7; 470 n.h.p.; quadruple-expansion engines.

The Belgian steamship *Jean Jadot* was torpedoed and sunk by a German submarine on January 20th, 1943, off Oran on a voyage from Liverpool to Algiers. Six of her crew were lost.

JEAN NICOLET

United States War Shipping Administration; 1943; Oregon S.B. Corp.; 7,176 tons; 422-8x57x34-8; 339 n.h.p.; triple-expansion engines.

The steamship *Jean Nicolet* was torpedoed and sunk by a Japanese submarine on July 2nd, 1944, on a voyage from Los Angeles and Fremantle to Calcutta. Seventy-seven crew and passengers were lost.

JEAN WEEMS

Thameside Shipping Co.; 1918; American S.B. Co.; 2,455 tons; 251 x43-5x22-2; 267 n.h.p.; triple-expansion engines. The British steamship *Jean Weems* was bombed and sunk by insurgent aircraft on October 30th, 1937, off Cape Sebastian, during the Spanish Civil War. The ship had been heavily damaged in a raid on Valencia on September 15th, and was only eight days out of the repair yard when she was sunk.

The ship had been heavily damaged in a raid on Valencia on September 15th, and was only eight days out of the repair yard when she was sunk.

JEANARA

Maclay & McIntyre; 1907; D. & W. Render son & Co.; 4,386 tons; 385 X 50 -1 x 17-7; 408 n.h.p.; triple-expansion engines. The British cargo ship *Jeanara* was wrecked off Gorodetsky lighthouse on July 12th, 1915. She was carrying a cargo of coal on a voyage from Cardiff to Archangel.

JEANIE

E.R. Care; 1882; E. Withy & Co.; 1,793 tons; 275x35-6x18-1; 200n.h.p.; compound engines.

The British cargo ship *Jeanie* was wrecked near Gamzi, Gulf of Onega, on September 15th, 1909. She was on a voyage from Onega to Hull carrying a cargo of wood.

JEANNE CONSEIL

l. Stern; 1880; Palmers' Co.; 2,309 tons; 291-3x37-3x24-5; 242 n.h.p.; compound engines.

The French steamship *Jeanne Conseil* was torpedoed and sunk by a German submarine in the Bay of Biscay on November 28th, 1917.

JEANNE GOUGY

JEANNE GOUGY

J. Le Bonder; 1948; Marine Industries; 273 tons; 137-1x 24-9x16-5; oil engines.

The Dieppe motor trawler *Jeanne Gouguy* left Irish fishing grounds on Friday, November 2nd, 1962, for Dieppe. She carried a crew of 18.

Crossing from Ireland the weather was bad, with squalls of rain reducing visibility to nil as the trawler approached the Cornish coast. Those on board did not see the breakers, and in pitch darkness at 5.15 on the morning of Saturday, November 3rd, she crashed on to the Armoured Knight rock immediately below the 250 feet cliffs at Land's End. The skipper, engineer and radio-officer were washed off the bridge shortly after she struck and were not seen again.

For about an hour the trawler lay fast upon the rock, during which time distress flares were burned. At 6.15 she was hit by a huge wave which flung her on to her port side and she became three-parts submerged. Meanwhile the flares had been seen by the coastguards at St. Just, and the Sennen and St. Just lifesaving teams, under Coastguard Officer J. C. T. Bridger, fired rocket lines across the wreck. These fell beyond the reach of those on board and, after a time—it now being full daylight—it was thought that all the crew were lost. The Sennen lifeboat stood by, but could not approach near enough to render assistance.

At noon a woman holidaymaker standing on the cliffs among the onlookers, saw a man's hand waving from a window of the wheelhouse. The rocket team again fired lines, one of which was grasped by the man. Four other men now appeared from the forecabin and hauled in the rope and made fast for the breeches buoy, by which they were brought to safety.

A helicopter from the R.A.F. Station at Chivenor, Devon, now flew over and Sgt. E. Smith was lowered to the wreck. He managed to pick up the exhausted man in the wheelhouse and land him safely. He then returned to make sure that there were no other survivors and found a man in the last stages of exhaustion in the passage between the wheelhouse and the interior of the trawler. This brought the number saved up to six.

JEANNE M

Mooringwell S.S. Co.; 1909; Irvines" S.B. & D.D. Co.; 1,973 tons; 279 • 2 X 40 • 1 X 18 • 2; 175 n.h.p.; triple-expansion engines. The British cargo ship *Jeanne M* sank after a collision with the *Varmdo* near Lappegrund lightship on December 17th, 1938. She was on a voyage in ballast from Stockholm to Kristiansand.

JEANNE M.

Mooringwell S.S. Co.; 1919; Ardrossan D. D. & S.B. Co.; 2,465 tons; 303-3x43x20-7; 265 n.h.p.; triple-expansion engines. The steamship *Jeanne M.*, on a voyage from Cardiff to Lisbon, was torpedoed and sunk by a German submarine on December 2nd, 1940, about 250 miles W. of Lisbon. Seven of her crew were killed.

JEANNE MARIE

Soc. Francaise d'Armement Em. Frisch & Co.; 1912; Ateliers & Chantiers de France; 2,971 tons; 311-6x45-9x20-5; 240 n.h.p. triple-expansion engines.

The French steamship *Jeanne Marie* struck a mine and sank in the English Channel on March 14th, 1918.

JEBBA

Elder, Dempster & Co.; 1896; Sir Raylton Dixon & Co.; 3,813 tons; 52X44-2X23-4; 419 n.h.p.; triple-expansion engines. The British cargo ship *Jebba* was wrecked on March 18th, 1907, near Bolt Tail, South Devon, while on a voyage from the west coast of Africa to Plymouth and Liverpool. She was carrying a cargo of palm oil and rubber,

JEDDO

Peninsular & Oriental Steam Nav. Co.; 1859; Great Britain; 1,632 tons; 277 x36x —; 2,059 i.h.p.; direct inverted engines. The steamship *Jeddo*, on a voyage from Hong Kong to Bombay, struck on the Choul Kadoo Rock, S. of Bombay, on February 2nd, 1866, and was completely wrecked.

JEDDO

Adamson & Co.; 1863; Parsons; 1,059 tons; 195x35-3x22-4. The sailing ship *Jeddo* was carrying a large number of Chinese

coolies from Amoy to British Guiana. There was some unrest among them at the commencement of the voyage, and this was put down with great severity, several men being flogged. On April 16th, 1866, when in the Straits of Sunda, the *Jeddo* caught fire either by accident or by a deliberate act of revenge on the part of the coolies. The vessel was destroyed, and four members of the crew and 146 coolies lost their lives.

JEDMOOR

Moor Line; 1928; W. Doxford & Sons; 4,392 tons; 375x52-6x 25-7; 417 n.h.p.; oil engines.

The motorship *Jedmoor*, on a voyage from Santos and Sydney, N.S., to the Tyne, was torpedoed and sunk by a German submarine on September 16th, 1941, about 300 miles W. of the Orkney Islands. Twenty-six of her crew and five gunners were killed.

JEEP HEE

Pang Kwok Sui; 1902; Nederlandsche Scheeps. Maats.; 1,063 tons; 222-7x36-2x14; triple-expansion engines.

The British cargo ship *Jeep Hee* struck a mine and sank at Woosung in 31° 14' N., 121° 48' E., on August 23rd, 1950, while on a voyage from Hong Kong to Shanghai carrying a rubber and general cargo.

JEMTCHUG

Russian Navy, light cruiser; 1903; Russia; 3,050 tons; 345 X 49x16; 19,000 i.h.p.; 24 knots; triple-expansion engines;

Yarrow boilers; six 4 • 7 in. guns, six 3pdr., two 1 pdr., 5 T.T. The light cruiser *Jemtchug*, was one of the few survivors of the ill-fated Baltic Fleet which was almost destroyed at the battle of Tsushima in the Russo-Japanese War. At the outbreak of the First World War, she was serving in the Far East. On October 28th, 1914, she was lying in the harbour of Penang when what appeared to be a British cruiser approached from seaward without challenge. When within a mile of the Russian warship the newcomer hoisted the German ensign and at 900 yards fired a torpedo. The same unreadiness which had marked the Russians ten years before in their war with Japan, still operated among them and the *Jemtchug* had no guns manned, or even cleared, and had only set a harbour watch. In these circumstances it is not surprising that she was an easy victim for the enemy which proved to be the famous German raider *Emden*.

The torpedo struck the *Jemtchug* aft and flooded her engine room, the *Emden* closing to 300 yards and pouring in her salvos at that range. The German ship then ran down the harbour, turned and came back past the Russian, which was now in flames, and fired another torpedo which blew up the ship.

Of the 340 officers and men on board the *Jemtchug* one officer and 90 men were killed and two officers and 106 men wounded.

Having disposed of the Russian cruiser the *Emden* lowered her boats with the object of capturing the liner *Glenturret*, but was compelled to recall them on the appearance of the French destroyer *Mousquet* (which see) which gallantly attacked. In a very brief encounter the *Emden* destroyed the French ship, picked up all survivors and then made off to the northward. Thus ended the famous raid on Penang.

JEMTLAND

Angf. A/B Tirfing (Dan Brostrom); 1898; J. L. Thompson & Sons; 3,074 tons; 325x45-5x23-7; 258 n.h.p.; triple-expansion engines.

Sailing from Buenos Aires to Gothenburg with a cargo of corn, the Swedish ship *Jemtland* struck a mine and sank on January 1st, 1920, off Hertha flak, North Jutland. Five of her crew of 26 were lost.

JENA

French Navy, 1st class battleship; 1898; Brest Dockyard; 11,870 tons; 400-7x68-2x27-5; 15,500 i.h.p.; 18 knots; triple-expansion engines; four 12 in. guns, eight 6-4 in., eight 3-9 in., sixteen 1-8 in., eighteen 1-4 in., 4 T.T.

On March 12th, 1907, the French battleship *Jena* was occupying the Messiesy drydock at Toulon, in preparation for the coming naval manoeuvres. She was under command of Capt. Adjard, and her official complement was 631 officers and men. The ship's company had just resumed work on her after their mid-day meal when a tremendous explosion shook the vessel, and indeed the whole

town. At the time many of the crew were busy in the boiler and engine rooms, while the midshipmen were attending a history lecture.

The first explosion occurred in the after magazine where a quantity of "B" powder was stored. The lower portion of the stern was blown out on the port side and the stern framework perforated like a colander. Despite this the stern-walk with its ornamental balustrade remained intact. Admiral Manceron who was in his cabin at the time received no serious injury.

The explosions, occurred at intervals of from 12 to 15 minutes, for about one hour and a quarter. Men endeavouring to save the ship or rescue the injured were themselves killed, one being Ensign Roux who was leading a party to open the dock sluices.

As the explosions continued it was decided to flood the dock, but the keys of the gates could not be found. A gunboat stationed at Toulon was therefore ordered to fire at the gates and blow them open in order to admit the water.

A survey of the wreck revealed that the main explosions took place in the stern on the port side abaft the heavy gun turret, and between the same turret and the after bridge immediately above it. The heaviest explosions were below the waterline.

The death-roll was 103, Capt. Adjard being among the killed.

JENNY CHANDRIS

J.D. Chandris; 1920; Kawasaki Dkyd. Co.; 5,815 tons; 384-8X 51-2x25-5; 437 n.h.p.; triple-expansion engines.

On a voyage from Morehead City to Rotterdam with scrap iron, the Greek ship *Jenny Chandris* foundered 40 miles N.E. of Diamond Shaol on November 13th, 1937. Eight of her crew of 28 were lost.

JEREMIAH VAN RENSSELAER

United States War Shipping Administration; 1942; North Carolina S.B. Co.; 7,777 tons; 422-8x57x34-8; 339 n.h.p.; triple-expansion engines.

The steamship *Jeremiah Van Rensselaer* was torpedoed by a German submarine on February 2nd, 1943, 800 miles S.E. of Cape Farewell on a voyage from New York to the Clyde. The ship caught fire, was abandoned and then sunk by a convoy escort ship. Thirty-five of her crew and 11 gunners were lost.

JERSBEK

Knorr & Bur chard Nfl.; 1938; Lubecker Maschinbau Ges.; 2,804 tons; 325-7x48-2x19-1; 352 n.h.p.; compound engines. The German steamship *Jersbek* was torpedoed and sunk by a Russian submarine on March 31st, 1945, off Libau.

JERSEY

British Navy, destroyer; 1938; J. S. White & Co.; 1,690 tons; 348x35x9; 40,000 s.h.p.; 36 knots; turbine engines; 3-drum boilers; six 4 7 in. guns, 6 smaller, 10 T.T.*

The destroyer *Jersey*, Cdr. A. F. Burnell-Nugent, D.S.C., was mined and sunk at the entrance to Grand Harbour, Malta? on May 2nd, 1941. Two officers and 33 ratings were killed.

JERSEYMOOR

Walter Rinciman & Co.; 1901; W. Doxford & Sons; 3,746 tons; 342x46-7x24-8; 300 n.h.p.; triple-expansion engines. The British cargo ship *Jerseymoore* was wrecked on Burbo Bank on June 23rd, 1915. She was on a voyage from Bombay to Manchester carrying a cargo of wheat.

JERV

T. Hansen; 1906; Bergens Mek. Vcerks.; 1,112 tons; 229 X 35-2x15-9; 106 n.h.p.; triple-expansion engines.

The Norwegian cargo ship *Jerv* struck a mine and sank in the North Sea on February 1st, 1917.

JERVIS BAY

Aberdeen & Commonwealth Line; 1922; Vickers; 14,164 tons; 530-6x68-3x39-9; 1,977 n.h.p.; 16 knots; turbine engines; 6 in. guns.

Early in November, 1940, the liner *Jervis Bay*, serving as an auxiliary cruiser, was escorting a convoy of 38 ships across the Atlantic to British ports. The ship was under command of Capt. E. S. Fogarty Fegen, the convoy being under command of Rear-Admiral H. B. Maltby, who flew his flag on the *Cornish City*. On November 5th,

at about 5 p.m., the convoy was attacked by the pocket battleship *Admiral Scheer*, 10,000 tons, main armament six 11 in. guns, at a position some 1,000 miles E. of Newfoundland. The enemy opened fire at a range of ten miles and the *Jervis Bay* steamed to engage although her 6 in. guns were outranged by the other's heavy 11 in. weapons. The action which ensued lasted for about an hour, the *Jervis Bay* sustaining the full weight of the enemy's fire and effectively preventing him from concentrating on the convoy. At the end of that time the auxiliary cruiser was heavily on fire with every gun out of action, but night was coming on and the convoy, having concealed its movements by throwing over smoke floats, had scattered over a wide area.

The *Jervis Bay* though badly mauled, still continued to float, but two hours after the action ceased she sank with colours flying. Capt. Fogarty Fegen, to whom a posthumous award of the Victoria Cross was made, lost an arm during the action, and went down with his ship. The number saved was 65, including a few officers. The number lost was 33 officers and 147 ratings killed, 13 of the latter being Canadians, and one officer and nine ratings died of wounds.

A Swedish vessel which was sailing with the convoy turned back in a very gallant manner and her commander, Capt. Sven Olander, lowered his boats and picked up the survivors. From the evidence of these men it was established that the steering gear of the *Jervis Bay* was smashed early in the action.

Only six ships of the convoy were lost out of 38. These were the cargo liner *Beaverford*, 10,042 tons, Capt. E. Pettigrew, which attempted to defend the convoy after the *Jervis Bay* was put out of action, and was lost with her captain and 76 officers and men: the *Maidan*, 7,908 tons, Capt. C. L. Miller, lost with all hands, 90 officers and men: the *Mopan*, 5,389 tons, Capt. S. A. Sapsworth, 68 prisoners of war: the *Fresno City*, 4,955 tons, Capt. R. A. Law-son, one man killed: the *Kenbane Head*, 5,229 tons, and the *Trewel-lard*, 5,201 tons.

The *Admiral Scheer* managed to elude the allied forces and to return in safety to Germany.

JESSIE LOGAN

Logan & Co.; 1830 (circa); 850 tons. The East Indian *Jessie Logan* was homeward bound from India with a cargo of rum, sugar and spices. On January 16th, 1843, the ship was running for the shelter of Tintagel or Bude Haven before a strong N.W. wind which was favourable for reaching either of those places. Unfortunately the wind increased to gale force and the ship became unmanageable, with the result that she was driven ashore near Boscastle. She sent up signals of distress but the fury of the seas prevented any aid from shore and during the night the ship became a total wreck.

The exact number on board was not known, and only a few persons escaped with their lives.

The *Jessie Logan* was North American built, of a type known as a "Quebecker".

JESSIE MAERSK

Ministry of Shipping (W. T. Gould); 1920; A. Vuijk & Zonen; 1,972 tons; 280-1x40-2x19; 224 n.h.p.; triple-expansion engines.

The steamship *Jessie Mcersk*, on a voyage from London to Blyth, was torpedoed and sunk by a German motor torpedo boat on October 7th, 1942, off Sheringham. The ship sank in two minutes with the loss of 16 of her crew and four gunners.

JESSMORE

Wm. Johnston & Co.; 1885; Whitehaven S.B. Co.; 1,728 tons; 261'5x36-2x18-3; 160 h.p.; compound inverted engines. The British cargo ship *Jessmore* was wrecked on December 12th, 1887, about seven miles south of Ushant light. She was on a voyage from Braila to Antwerp carrying a cargo of wheat and maize.

JESUS

The Spanish barque *Jesus*, of Bilbao, was bound from Manila to Liverpool with a cargo of sugar when she was wrecked on Cymyram Beach, Carnarvon Bay, on or about October 14th, 1870. The captain and seven men were drowned.

JEYPORE

P. & O. Steam Nav. Co.; 1920; W. Gray & Co.; 5,318 tons; 400x52-3x28-4; 517 n.h.p.; triple-expansion engines. The steamship *Jeypore*, on a voyage from Baltimore to Hull, was torpedoed and sunk by a German submarine on November 3rd, 1942, about 450 miles S.S.W. of Cape Farewell. Nine of her crew were killed.

JHELUM

James Nourse; 1936; Barclay, Curie & Co.; 4,038 tons; 381 - 1x 52-7x23-7; 325 n.h.p.; triple-expansion engines & L.P. turbine. The steamship *Jhelum*, on a voyage from Izmir to Oban via the Cape, was torpedoed and sunk by a German submarine on March 21st, 1941, about 300 miles N.W. of the Cape Verde Islands. Eight of her crew were lost.

JINBU MARU

Taiheiyo Gyogyo K.K.; 1894; Naval Constr. & Armament Co.; 5,228 tons; 400x48-2x29-3; 532 n.h.p.; triple-expansion engines.

The steamship *Jinbu (Zinbu) Mam* was torpedoed and sunk by the U.S. submarine *S-30* on June 11th, 1943, between Sakhalin and the Kurile Islands.

JINDAI MARU

Amagasaki Kisenbu Gomel Kaisha; 1875; Caird & Co.; 1,095 tons; 227 '7x27-4x16-2; compound engines. The Japanese steamship *Jindai (Zindai) Maru* struck a mine and sank on May 30th, 1945, off Fukuoka, Japan.

JINEI MARU

Nitto Shosen K.K.; 10,500 tons.

The tanker *Jinei Maru* was torpedoed and sunk by the U.S. submarine *Sterlet* on October 25th, 1944, S.W. of the Shichi-to Islands, Japan.

JINJU MARU

G.Hori; 1890; Irvine & Co.; 2,359 tons; 290-6x38x19-3; 212 n.h.p.; triple-expansion engines.

The Japanese ship *Jinju Maru* was sailing from Yokohama to Karatsu in ballast when on December 31st, 1927, she was wrecked at Mikomobo Island off Idzu, with the loss of all on board.

JINJU MARU

Daiko Shosen K.K.; 3,192 tons.

The steamship *Jinju Maru* was bombed and sunk by U.S. land-based aircraft on May 20th, 1944, about 200 miles S.E. of Hong Kong.

JINKAI MARU

Sugaya K.K.; 1904; Bartram & Sons; 3,835 tons; 379x46-1x 18-3; 352 n.h.p.; triple-expansion engines.

The *Jinkai Maru* was sailing from Muike to Hong Kong with a cargo of coal. On March 23rd, 1937, she went ashore at Waglan off Hong Kong, broke up and sank in deep water.

JINMU MARU

Kuribayashi Shosen K.K.; 1940; Kawaminami Kogyo K.K.; 1,912 tons; 271 - 7x40x20-3; steam engines. The steamship *Jinmu (Zinmu) Maru* was torpedoed and sunk by the U.S. submarine *Wahoo* on May 9th, 1943, off Ofunato, Honshu Island.

JINTSU

Japanese Navy, light cruiser; 1923; Kawasaki Dockyard; 5,195 tons; 535x46x15; 70,000 s.h.p.; 33 knots; turbine engines; Kanpon boilers; seven 5-5 in. guns, two 3 in., 6 m.g., 8 T.T., 1 aircraft.

The light cruiser *Jintsu* took part in the second battle of Kula Gulf off Kolombangara in the Solomons Group on the night of July 12th-13th, 1943. The Japanese had organised a supply service for their army on the island of Vila, making nightly runs through Blackett Strait and Kula Gulf. So regular were the convoys that the Americans designated them the "Tokio Express", and a task force consisting of the U.S. cruisers *Honolulu* and *St. Louis*, 10,000 tons, 15 6 in. guns, and the New Zealand cruiser *Leander*, 7,270 tons,

eight 6 in. guns, with ten destroyers under command of Rear-Admiral W. L. Ainsworth, was despatched to intercept them. An action took place in Kula Gulf in the early morning of July 6th (see *Helena*). The second battle was fought a week later, the Japanese being in two small groups, the first of which was severely handled by the Americans, the *Jintsu* being sent to the bottom and several other vessels being badly damaged. In this action the *Leander* was hit by a torpedo which did no vital damage. The second group met with better fortune and damaged the U.S. cruisers *St. Louis* and *Honolulu* with torpedoes. The destroyer *Gwin* was also torpedoed and sank in tow.

The *Jintsu* carried a complement of about 500.

The losses in the two battles were; Japanese, one cruiser, two destroyers; American, one cruiser, one destroyer. In addition the damage inflicted upon ships on both sides was extremely heavy. The balance was on the whole favourable to the Americans as the "Tokio Express" was abandoned by the Japanese after the second battle.

JINYO

Japanese Navy, escort carrier; 1935; A.G. Weser; 18,184 tons; 625-6x74-1x41; 26,000 s.hp.; 21 knots; turbo-electric engines twelve 5 in.A.A. guns, many 47 mm., 30 aircraft. The escort carrier *Jinyo* was formerly the North German Lloyd liner *Scharnhorst* which had been lying in a Japanese harbour up to the time that Japan declared war on the United States. The vessel was converted into an escort carrier and was commissioned during 1943. She was torpedoed and sunk by the U.S. submarine *Spadefish* south of the Yellow Sea on November 17th, 1944.

JINYO MARU

Toyo Risen K.K.; 6,862 tons.

The steamship *Jinyo Maru* was torpedoed and sunk by the U.S. submarine *Trepang* on December 6th, 1944, off the north coast of Luzon Island, Philippines.

JINZAN MARU

Kokoku Sangyo K.K.; 1919; Short Bros.; 5,216 tons; 400x52-4x28-5; 517 n.h.p.; triple-expansion engines.

The steamship *Jinzan (Zinzan) Maru* was torpedoed and sunk by the U.S. submarine *Guardfish* on July 16th, 1944, 75 miles off the north-west coast of Luzon Island, Philippines.

JIUL

Eujenia & Constance Simatu; 1913; J. Priestman & Co.; 3,127 tons; 345 X 48 X 21 • 1; 302 n.h.p.; triple-expansion engines. The Rumanian steamship *Jiul* was sunk in Piraeus harbour on May 30th, 1941, as a result of the explosion which destroyed the Bulgarian steamship *Knyaguinya Maria Louisa*—(which see).

JOAO PESSOA

Hamburg-Sudamerikanische Dampfsch. Ges.; 1922; Bruckenbau Flender A.G. Stems; 3,023 tons; 237-7x48-2x21 -1; 246 n.hp.; triple-expansion engines.

The German ship *Joao Pessoa* struck a rock and sank two miles from San Sebastian on June 7th, 1942.

JOGU MARU

Ukon Sho'i K.K.; 1906; Richardson, Duck & Co.; 4,803 tons; 369-2x50-8x27-6; 371 n.h.p.; triple-expansion engines. The steamship *Jogu Maru* was sunk by U.S. carrier-based aircraft on October 18th, 1944, off Manila.

JOHAN MAURITS VAN NASSAU

Netherlands Navy, escort vessel; 1932; Flushing; 1,520 tons; 258x38x12-4; 2,100 i.h.p.; 15 knots; triple-expansion engines; Yarrow boilers; three 5-9 in. guns, four 12-7 mm., 4 m.g. The sloop *Johan Maurits Van Nassau* took part with the destroyer *Jan Van Galen* (which see) in the attempt to repel the German invasion of Holland which began on May 10th, 1940. On the 14th, when the remnants of the Dutch Navy were withdrawing to English ports she was bombed and sunk.

The full story of the fighting round the Dutch coast from May 10th to 14th is told under the *Jan Van Galen*.

JOHANN SCHULTE

German Government; 1920; G. M. Standifer Construction Corp.; 6,094 tons; 401-4x53-2x31-9; 552 n.h.p.; triple-expansion engines.

The steamship *Johann Schulte* was formerly the Greek *Ioannis Chandris*, damaged during the bombing of Antwerp in May, 1940, and later taken over by the Germans. On January 29th, 1944, she struck a mine and sank off Kiel.

JOHANN WESSELS

Atlas Reederei A.G.; 1913; Irvine's S.B. & D.D. Co.; 4,601 tons; 384-1x52-1x27-1; 320 n.h.p.; triple-expansion engines. The German steamship *Johann Wessels* was bombed and sunk by British aircraft on September 15th, 1941, N.W. of Juist.

JOHANNA THORDEN

A/B Finska Nordamerika Linjen (G. B. Thorden); 1936; Oresundsvarvet A/B; 3,223 tons; 362x51x17-7; 675 n.h.p.; oilengines. Carrying motor cars and general cargo from Baltimore and New York to Gothenburg the Finnish motorship *Johanna Thorden* went aground at 5.50 a.m. on January 12th, 1937, at the Tarf of Swona, Orkney Islands. The forepart was carried four miles by the gale and driven ashore at Tarf Tail at the S. end of Swona. Thirty persons were lost, including two women and two children.

JOHANNISBERGER

German Government; 1940; Chantiers & Ateliers de St. Nazaire; 4,533 tons; 405 X 54 -9 x 34; triple-expansion engines. The steamship *Johannisberger* was originally built to the order of French owners as the *Lyon* and taken over by the Germans on completion. She was sunk by unknown causes off Kirkenes on March 16th, 1943, with the loss of all on board.

JOHN

Rawle & Co.; 1810; Chester; 465 tons.

The wooden barque *John*, left Plymouth Sound on the afternoon of May 3rd, 1855, with 282 persons on board, of whom 19 were crew, 149 adult passengers and 114 children. The ship was bound for Quebec, her commander being Capt. E. Rawle and the bulk of her passengers coming from Devon and Cornwall.

At 9.30 p.m. the ship was in sight of St. Anthony Light, Falmouth, but failed to pick up the Lizard Light which should have been seen shortly afterward. It was the second officer's watch and on the captain coming on deck it was reported to him that the ship was too close inshore, but he declined to alter course. About half-an-hour after this, when making about nine knots, the *John* struck on the Manacle Rocks, off Falmouth. The weather was hazy, and shortly before she struck the lookout shouted "Fishing boats ahead!", but these turned out to be the pinnacles of the dreaded Manacles. The vessel was carrying all sail with a great way on her and she ran over the outer rocks and was washed toward those further in. An attempt was made to bring her up by letting go the anchor, but she swung broadside-on to the rocks. There was much confusion and the first boat was launched without plugs or thole-pins, nevertheless the four sailors in her managed to reach shore and to get into touch with the coastguard. They refused, however, to return to the ship, and the dangerous shore prevented the coastguard boats from going out until daybreak.

In the meantime the crew of the *John* had become intoxicated and neither they nor the captain made any efforts to save the unfortunate emigrants, although there were still three boats on board. Some of the passengers attempted to launch the cutter, but she stove in and sank. The vessel struck at two-thirds ebb and, although full of water below, her decks were dry. The captain was ignorant of the tides and would not allow the two remaining boats to be launched, his error was apparent when the incoming tide began to break over the wreck. The two boats were smashed and scores of the hapless emigrants washed overboard.

At daybreak boats from the shore approached, into which the crew scrambled, leaving the terrified people to shift for themselves. All of the crew were saved, but 196 men, women and children were drowned. The survivors numbered 86.

JOHN A. JOHNSON

United States War Shipping Administration; 1943; Oregon S.B. Corp.; 7,176 tons; 422-8x57x34-8; 339 n.h.p.; triple-expansion engines.

The American steamship *John A. Johnson* was torpedoed and sunk by a Japanese submarine on October 30th, 1944, about 1,000 miles out of San Francisco bound to Pearl Harbor. Ten of her complement of 70 were lost.

JOHN A. POOR

United States War Shipping Administration; 1943; New England S.B. Corp.; 7,176 tons; 422-8x57x34-8; 339 n.h.p.; triple-expansion engines.

The steamship *John A. Poor* was torpedoed and sunk by a Japanese submarine on March 19th, 1944, 250 miles W. of Mangalore on a voyage from Karachi and Cochin to Aden. Twenty-five of her crew and nine gunners were lost.

JOHN ADAMS

Mississippi River steamboat.

The Mississippi river steamboat *John Adams* was bound from New Orleans to Memphis when she struck a submerged object, probably the trunk of a tree. The disaster occurred on, or about, January 29th, 1851, the steamboat breaking in two with the force of impact and going down almost immediately. The number of persons on board was 230, of whom 123 were drowned. The position of the steamboat at the time was about 200 miles below Memphis.

JOHN ADAMS

United States Maritime Commission; 1942; Richmond S.B. Corp.; 7,180 tons; 422-8x57x34-8; 339 n.h.p.; triple-expansion engines.

The steamship *John Adams*, on a voyage from Noumea to Brisbane with aviation spirit in drums, was torpedoed by a Japanese submarine on May 5th, 1942, 120 miles S.W. of Amadee Lighthouse. The ship caught fire and blew up on the following day. Five gunners were lost.

JOHN BARRY

United States War Shipping Administration; 1942; Oregon S.B. Corp.; 7,176 tons; 422-8x57x34-8; 339 n.h.p.; triple-expansion engines.

The American steamship *John Barry* was torpedoed and sunk by a Japanese submarine on August 28th, 1944, E. of the Gulf of Aden on a voyage from Philadelphia to Bahrein. Only two lives were lost. The ship was carrying 26 million dollars in silver.

JOHN BURKE

United States War Shipping Administration; 1942; Oregon S.B. Corp.; 7,180 tons; 422-8x57x34-8; 339 n.h.p.; triple-expansion engines.

The steamship *John Burke* was sunk by Japanese aircraft diving on to the deck at 2.20 a.m. on December 28th, 1944, off Mindoro Island, Philippines. The ship blew up and sank with the loss of all on board.

JOHN CARTER ROSE

United States War Shipping Administration; 1942; Bethlehem Fair field Shipyards; 7,191 tons; 423x57-1x34-8; 339 n.h.p.; triple-expansion engines.

The steamship *John Carter Rose* was torpedoed, shelled and sunk by a German submarine on October 8th, 1942, 700 miles E. of Barbados on a voyage from New York and Trinidad to Accra. Five of her crew and three gunners were lost.

JOHN D. ARCHBOLD

Standard Oil Co. (New Jersey); 1914; Newport News S.B. & D.D. Co.; 8,374 tons; 458-3x60x28-6; 533 n.h.p.; quadruple-expansion engines.

The American tanker *John D. Archbold* was torpedoed and sunk by a German submarine off Ushant on June 16th, 1917.

JOHN D. GILL

Atlantic Refining Co.; 1941; Sun S.B. & D.D. Co.; 11,641 tons; 528-5x70-2x39-7; turbo-electric engines. The American tanker *John D. Gill* was torpedoed and sunk by a

JOHN DRAYTON

German submarine on March 12th, 1942, 200 miles E. of Charleston on a voyage from Atreco to Philadelphia with crude oil. Twenty-three of her crew were lost.

JOHN DRAYTON

United States War Shipping Administration; 1942; North Carolina Shipbuilding Co.; 7,177 tons; 422-8x57x34-8; 339 n.h.p.; 10 -5 knots; triple-expansion engines.

The American steamship *John Drayton*, Capt. Carl Norman, was torpedoed and sunk by an enemy submarine 300 miles S.E. of Durban on April 21st, 1943. Thirty-one men were killed. Capt. Norman was among the survivors. The vessel was not in convoy at the time.

JOHN DUNCAN

Reed & Co.; 1855; New Brunswick; 970 tons; 173-1x36-2x21-9;

The sailing ship *John Duncan*, Capt. R. Logie, left St. John, New Brunswick, for Liverpool, on December 2nd, 1868. The vessel foundered in a gale in mid-Atlantic with loss of 13 lives.

JOHN FOTHERGILL

James Westoll; 1892; Short Bros.; 2,730 tons; 300-2x40-4x24-1; 220 n.h.p.; triple-expansion engines.

The British cargo ship *John Fothergill* sank after a collision at Kavak in August, 1908, while on a voyage from Poti to Garston carrying an ore cargo.

JOHN G. McCOLLOUGH

United States S.S. Co.; 1890; Union Dry Dock Co.; 1,985 tons; 255X40-1X21-5; 149 n.h.p.; triple-expansion engines.

American cargo ship *John G. McCollough* was torpedoed and sunk by a German submarine in the Bay of Biscay on May 18th, 1918.

JOHN H. COUCH

U.S. War Shipping Administration; 1943; Oregon S.B. Corp.; 7,176 tons; 422-8x57x34-8; 339 n.h.p.; triple-expansion engines.

The American steamship *John H. Couch* was torpedoed by a Japanese aircraft and severely damaged in 9° 20' S., 160° 8' E., on October 10th, 1943. She was beached but became a total loss.

JOHN HARRISON

H. Harrison; 1924; Furness Shipbuilding Co.; 1,550 tons; 245-4x38-6x15-5; 156 n.h.p.; 9-5 knots; triple-expansion engines.

The steamship *John Harrison* left the Tyne on December 26th, 1924, with a cargo of 2,369 tons of coal for Amsterdam. The pilot, who was dropped from the vessel at 1.10 a.m., stated later that the weather was then clear and calm. The *John Harrison*, under command of Capt. J. W. Beeching with a crew of 17, was last reported passing Flamborough Head. One of her lifeboats was washed ashore near Wyk-auf-Fohr, Germany.

It was assumed that she foundered in the S.W. gale which developed in the North Sea soon after she left the coast.

JOHN KNOX

N. McLean & Co.; 1883; Palmers' Co.; 2,069 tons; 281X 37-2x23-1; 220 h.p.; compound inverted engines. The steamship *John Knox*, Capt. Broolly, was bound from Glasgow to Quebec. On May 1st, 1887, when passing through the South-West Island channel, near St. John's, Newfoundland, she stranded at a spot where it was impossible to render aid. There was a violent south-westerly gale at the time.

A large number of people gathered along the shore, but were compelled to be impotent witnesses of the breaking up of the steamship. All hands, 29 in number, were drowned.

JOHN KNUDSEN

«/ A. Knudsen; 1916; Laxevaags Maskin & Jernskibs.; 1,670 tons; 246-2x37-9x16-8; 138 n.h.p.; triple-expansion engines. The Norwegian cargo ship *John Knudsen* was torpedoed and sunk by a submarine in the Mediterranean on September 22nd, 1917.

362

JOHN L. AVERY

Mississippi River steamboat.

The disaster to the Mississippi river steamboat *John L. Avery* occurred shortly after the coming into force of the Steamboat Act of 1852, which did so much to reduce the succession of dreadful accidents to steamboats on American rivers. It was not, unfortunately, fully effective when the *John L. Avery* left New Orleans in March, 1854. She carried a heavy cargo and some hundreds of passengers, and at times the water washed over her deck. Not long after her departure, about the 12th, she struck a submerged tree trunk with such violence that she capsized, throwing overboard a large number of people on deck and hurling the twin funnels into the water.

Within five minutes the *John L. Avery* had broken in two and sunk. Over 80 lives were lost.

JOHN MARYCHURCH

R. T. Arthurs & Co.; 1880; J. L. Thompson & Sons; 1,524 tons; 260 -3x36x15-6; 156 n.h.p.; compound engines. The British steamship *John Mary church* was wrecked on August 11th, 1912, on Gorianow Island, White Sea. She was on a voyage from Grangemouth to Soroka with coal, machinery and general cargo.

JOHN MILES

Stephenson, Clarke & Co.; 1908; S. P. Austin & Son; 687 tons, 164 x30x11 -9; 113 n.h.p.; triple-expansion engines. On February 22nd, 1917, the British steamship *John Miles* struck a mine and sank 11 miles S.E. of Hartlepool. The captain and nine of the crew were killed.

JOHN MORGAN

U.S. Maritime Commission; 1943; Bethlehem, Fair field Ship-yard; 7,176 tons; 423x57-1x34-8; 339 n.h.p.; triple-expansion engines. The American ship *John Morgan* was carrying ammunition from Baltimore to the Persian Gulf when she was involved in a collision and sank off Cape Henry on June 1st, 1943.

JOHN MORRISON

A.J. Hutchins; 1883; J. Laing; 1,920 tons; 270x36-4x21; 174 n.h.p.; compound engines.

The British cargo ship *John Morrison* sank after a collision at Constantinople on January 26th, 1904. She was on a voyage from Odessa to Havre carrying a cargo of seed.

JOHN O. SCOTT

Ch. Salvesen & Co.; 1906; Wood, Skinner & Co.; 1,235 tons; 240x33-7x15-5; 156 n.h.p.; 8-5 knots; triple-expansion engines.

The steamship *John ti*. *Scott* was torpedoed and sunk by a German submarine nine miles W. by N. of Trevoise Head on September 18th, 1918. Eighteen men, including the captain, were killed.

JOHN P. GAINES

U.S. Maritime Commission; 1943; Oregon S.B. Corp.; 7,176 tons; 422-8x57x34-8; 339 n.h.p.; triple-expansion engines. The American cargo ship *John P. Gaines* was wrecked on November 24th, 1943, at Koniuji Island, Alaska, and broke in two. The forepart sank and the afterpart was swept ashore. Eleven of her crew were lost.

JOHN P. PEDERSEN

A/S Havtank; 1930; Swan, Hunter & Wigham Richardson; 6,128 tons; 420-8x58-5x31-2; 1,010 n.h.p.; oil engines. The Norwegian tanker *John P. Pedersen* was torpedoed and sunk by a German submarine on May 20th, 1941, about 150 miles S. of Greenland. Twenty-one of her crew were killed.

JOHN PENN

United States Navy; 1931; New York S.B. Co.; 9,360 tons; 450X61 -5X42 -5; turbine engines.

The steamship *John Penn* was taken over by the U.S. Navy for use as a transport. On about September 23rd, 1943, she was bombed and sunk by Japanese aircraft off Guadalcanal, having just landed troops and cargo.

JOHN RETTIG

Angf. Aktieb. Gefle; 1915; Sorlandets Skibsbyg.; 1,809 tons; 265x42x20; 150 n.h.p.; triple-expansion engines. The Swedish cargo ship *John Rettig* was torpedoed and sunk by a German submarine in the North Sea on July 27th, 1918.

JOHN RUTLEDGE

New York & Liverpool packet; 1840 (circa); 1,600 tons. The American sailing ship *John Rutledge* left Liverpool for New York on January 16th, 1856, with 120 passengers and a crew of 16 under command of Capt. Kelly. Soon after leaving port the ship encountered severe weather, one seaman and one passenger being washed overboard and drowned. On February 20th, in the neighbourhood of the Newfoundland Banks the *John Rutledge* collided with an iceberg. The pumps were manned by passengers and seamen but the ship was too badly holed to be saved and the captain decided to abandon her. There were five large boats in which to accommodate 134 persons and these were taken off without mishap, although there was some panic among the passengers. Only one compass, in the captain's boat was available for the whole party, and when the boats separated navigation became difficult for the other four.

On February 28th the *Germania*, Capt. Wood, from Havre to New York, picked up one of the *John Rutledge*'s lifeboats containing several dead bodies and one youth, Thomas W. Nye, of New Bedford, U.S.A. Nye, who was a member of the crew, proved to be the sole survivor of the ship, 135 others having perished.

JOHN STRAUB

U.S. War Shipping Administration; 1943; Oregon S.B. Corp.; 7,176 tons; 422-8x57x34-8; 339 n.h.p.; triple-expansion engines.

The American ship *John Straub* was on a voyage from Port Townsend to Dutch Harbour with high octane petrol and oil on April 19th, 1944, when there was an explosion and she sank 20 miles off Sannak Island. All 65 on board were lost.

JOHN TRACY

M. & J. Tracy; 1919; Great Lakes Eng. Works; 2,469 tons; 253-4x43-7x24-5; 210 n.h.p.; triple-expansion engines. The American ship *John Tracy* left Norfolk, Va., on January 8th, 1927, with coal for Boston. She was reported on January 11th, off Pollock Rip lightship, but was not seen again.

JOHN TWOHY

A. D. Cummins & Co.; 1891; G.E. Carrier; 1,020 tons; 193-2X 39x20-3.

The American sailing ship *John Twohy* was sunk by a German submarine off the Azores on July 21st, 1917.

JOHN WILLIAMSON

Cay, Hall & Co.; 1870; C. Mitchell & Co.; 1,272 tons; 244-5x 32x17-6; 120 h.p.; compound engines.

The British cargo ship *John Williamson* sank after a collision near Sines on May 7th, 1889, while on a voyage from the Tyne to Malaga carrying a cargo of coal.

JOHN WINTHROP

U.S. Maritime Commission; 1942; South Portland S.B. Corp.; 7,176 tons; 422-8x57x34-8; 339 n.h.p.; triple-expansion engines.

The American ship *John Winthrop* sailed from the Clyde anchorage on September 19th, 1942, for New York, but was never seen again.

JOHNSTON

United States Navy, destroyer; 1943; Seattle-Tacoma Shipbuilding Co.; 2,050 tons; 376-5x39-5x—; 60,000 s.h.p.; 35-5 knots; turbine engines; five 5 in. guns, four 40 mm., four 20mm., 10 T.T.

The destroyer *Johnston* was sunk by gunfire from Japanese ships in the battle of Leyte, October 25th, 1944. The full story of the battle is told under the Japanese battleship *Yamashiro*.

JOHORE MARU

Nanyo Kaiun K.K.; 1932; Harima S.B. & Eng. Co.; 6,182 tons; 411-7x56x32-5; 733 n.h.p.; triple-expansion engines & L.P. turbine

The steamship *Johore Maru* was torpedoed and sunk by the U.S. submarine *Silver sides* on October 24th, 1943, N. of the Admiralty Islands.

JOKUJA MARU

Nanyo Kaiun K.K.; 1944; 6,440 tons.

The steamship *Jokuja Maru* was torpedoed and sunk by the U.S. submarine *Aspro* on May 15th, 1944, about 250 miles N.W. of the Caroline Islands.

JONATHAN HOLT

l. Holt & Co.; 1938; Cammell, Laird & Co.; 4,973 tons; 370-4 x 52-8x20-6; 471 n.h.p.; 10-5 knots; triple-expansion engines & L.P. turbine.

The steamship *Jonathan Holt*, Capt. W. Stephenson, was torpedoed and sunk by a German submarine on February 24th, 1941, approximately 350 miles W. of the Shetland Islands. Capt. Stephenson, 38 of the crew, two gunners and 11 passengers were lost.

JONATHAN STURGES

United States War Shipping Administration; 1942; Delta S.B. Co.; 7,176 tons; 422-8x57x34-8; 339 n.h.p.; triple-expansion engines.

The steamship *Jonathan Sturges* was torpedoed and sunk by a German submarine on February 23rd, 1943, 500 miles W. of the Bishop Rock on a voyage from Liverpool to New York. The ship had 73 persons on board of whom 18 were picked up 17 days later and another five after having been 41 days in a boat.

JONGE JACOBUS

N.V. Maats. Stm. "Jonge Catharina"; 1921; N.V. Schpsf. vjh De Groot & Van Vliet; 1,757 tons; 279-8x39-3x17-8; 241 n.h.p.; triple-expansion engines.

On a voyage from Antwerp to Alexandria the Dutch ship *Jonge Jacobus* foundered in heavy weather on January 27th, 1937, 20 miles off the Burlings. All on board were lost.

JONKOPING I

Rederi Aktieb. Nordstjernen; 1881; Bartram, Haswell & Co.; 1,519 tons; 257-2x35x18-7; 193 n.h.p.; compound engines.

The Swedish cargo ship *Jonkoping I* was torpedoed and sunk by a German submarine in the North Sea on August 13th, 1918.

JONKOPING II

Rederi Aktieb. Nordstjernen; 1888; Gourlay Bros. & Co.; 1,274 tons; 245-5x34-2x16'; 140 n.h.p.; triple-expansion engines.

The Swedish cargo ship *Jonkoping II* was torpedoed and sunk by a German submarine in the North Sea on January 24th, 1918.

JO-O MARU

Kansai Risen K.K.; 1904; Japan; 401 tons. The ferry *Jo-o Maru*, with 340 passengers on board, struck a mine and sank on January 28th, 1948, near Okayama, Honshu Island, with the loss of some 200 lives.

JORDAN

Mercantile S.S. Co.; 1889; J. L. Thompson & Sons; 2,100 tons; 275x38'2x20'6; 217 n.h.p.; triple-expansion engines. The British cargo ship *Jordan* was wrecked on the Aceitera rocks, Cape Trafalgar, on December 27th, 1898. She was on a voyage from Penarth to Kustendje carrying a cargo of coal.

JOSE DE LARRINAGA

Larrinaga & Co.; 1913; Russell & Co.; 5,017 tons; 420-2X 54x25-8; 439 n.h.p.; 10 knots; triple-expansion engines. The steamship *Jose De Larrinaga* was torpedoed and sunk by a German submarine 150 miles W.N.W. of Fastnet on April 28th, 1917. The captain and 11 of the crew were killed.

JOSE DE LARRINAGA

JOSE DE LARRINAGA

Larrinaga S.S. Co.; 1920; Canadian Vickers; 5,303 tons; 400 x 52 - 3 x 28 • 4; 310 n.h.p.; triple-expansion engines. The British cargo ship *Jose de Larrinaga* was lost on a voyage from New York to Newport, MOD. She joined a convoy at Sydney, N.S., on August 25th, 1940, but disappeared from the convoy on the night of September 6th/7th, when in approximately 58° 30' N., 16° 10' W. The ship was carrying a crew of 39 and one gunner together with a cargo of steel and linseed.

JOSEFINA THORDEN

Ministry of War Transport (British Tanker Co.); 1932; Eriksbergs Mek. Verkstad; 6,620 tons; 408-1x55-2x32-4; 543 n.h.p.; 10 knots; oilengines.

The tanker *Josefina Thorden*, Capt. A. Clarkson, struck a mine and sank on April 6th, 1943, near the Sunk Head Buoy, Thames Estuary. Fifteen men were killed. Capt. Clarkson was among the survivors.

JOSEPH CHAMBERLAIN

W. & C. T. Jones S.S. Co.; 1910; W. Gray & Co.; 3,709 tons; 350-3x50x23-6; 3 36 n.h.p.; 10 knots; triple-expansion engines.

The steamship *Joseph Chamberlain* was torpedoed and sunk by a German submarine 50 miles N. by W. of Muckle Flugga, Shetland Islands, on September 18th, 1917. Eighteen men were killed. The captain and the ship's gunner were taken prisoner.

JOSEPH CUDAHY

American-Italian Commercial Corp.; 1917; Baltimore D.D. & S.B.Co.; 3,302 tons; 292-3x47-2x26-9; turbine engines. The American tanker *Joseph Cudahy* was torpedoed and sunk by a German submarine in the Atlantic on August 17th, 1918.

JOSEPH HEWES

United States Navy; 1930; New York S.B. Co.; 9,359 tons; 450x61-6x42-3; turbine engines.

The United States transports *Joseph Hewes*, *Tasker H. Bliss*, *Edward Rutledge* and *Hugh L. Scott* were lying in the Fedhala Roads, Casablanca, on November 11th-12th, 1942. In all there were 15 transports and cargo ships in the roadstead, protected by a minefield and a destroyer screen. Despite this, on the evening of the 11th the German submarine *U-173* evaded the screen and passed through the minefield. She torpedoed and sank the *Joseph Hewes* and torpedoed, but did not sink, the destroyer *Hambleton* and the oiler *Winooski*. She also torpedoed the destroyer *Electra* of the U.S. Navy on the 15th, but failed to sink her.

On the following evening the *U-130* made the passage through the minefield and sank the *Tasker H. Bliss*, *Edward Rutledge* and *Hugh L. Scott*.

Over 100 officers and men were killed in these attacks and a considerable number wounded. Some of the cargo of the transports was afterwards salvaged.

The *U-130* was sunk by U.S. destroyers on the 16th.

JOSEPH M. CUDAHY

Sinclair Refining Co.; 1921; Sun S.B. Co.; 6,950 tons; 430-2X 59-2x32-8; 612 n.h.p.; triple-expansion engines. The American tanker *Joseph M. Cudahy* was torpedoed and sunk by a German submarine on May 4th, 1942, N. of Tortugas Island on a voyage from Galveston to Philadelphia. Twenty-seven of her crew of 37 were lost.

JOSEPH S. McDONAGH

United States War Shipping Administration; 1944; South Eastern S.B. Corp.; 7,198 tons; 422-8x57x34-8; 339 n.h.p.; triple-expansion engines.

The American steamship *Joseph S. McDonagh* went ashore on March 31st, 1946, at the mouth of the River Canete, S. of Cerro AVul, and broke in two.

JOSEPH SMITH

United States War Shipping Administration; 1943; Permanente Metals Corp., (Shipyard No. 2); 7,176 tons; 422-8x57x34-8; 339 n.h.p.; triple-expansion engines.

The American ship *Joseph Smith* sprang a leak in heavy weather and was abandoned in a sinking condition on January 11th, 1944,

in 44° 30' N., 43° 1' W., on a voyage from Liverpool to New York. Survivors were landed at St. John's, N.F.L. The *Joseph Smith* was afterwards shelled by a British naval ship and last seen going down by the stern.

JOSEPH SWAN

London Power Co.; 1938; S. P. Austin & Son; 1,571 tons; 239x38-7x16-2; 193 n.h.p.; 9-5 knots; triple-expansion engines.

The collier *Joseph Swan*, Capt. A. R. Pirie, was torpedoed and sunk by a German motor torpedo boat on September 4th, 1940, off Lowestoft. Sixteen men were killed.

JOSEPH WHEELER

United States War Shipping Administration; 1942; Alabama D.D. & S.B. Co.; 7,176 tons; 422-8x57x34-8; 339 n.h.p.; triple-expansion engines.

The steamship *Joseph Wheeler*, with 8,000 tons of munitions on board, was bombed by German aircraft on December 2nd, 1943, at Bari. The ship blew up and sank.

JOSEPHINE CHARLOTTE

Cie. Maritime Beige (Lloyd Royal); 1929; Rotterdam Droogdok Maats.; 3,405 tons; 339-9x48-5x23; 396 n.h.p.; triple-expansion engines.

The Belgian steamship *Josephine Charlotte* struck a mine and sank on January 16th, 1940, three and a half miles E.N.E. of the *Tongue* lightship.

JOSEPHINE WILLIS

Fletcher & Co.; 1840 (circa.); 786 tons.

The New Zealand packet ship *Josephine Willis*, Capt. Canney, left St. Katherine's Dock, London, on Friday, February 1st, 1856, bound for Auckland, New Zealand. She had 110 persons on board, of whom ten were 1st class passengers and 60 steerage, with 40 crew. She had been chartered by Messrs. Willis & Co. for the New Zealand run, as that firm maintained a monthly packet service.

On the night of the 3rd the ship was some nine miles S.S.W. of Folkestone, the first officer, Mr. Clayton, being in charge. The *Josephine Willis* was sailing at seven knots on the port tack when a steamship was seen to be approaching. The packet ship turned to starboard but the steamship, which proved to be the *Mangerton*, 363 tons, Capt. Bouchier, did not alter course in time. The vessels collided with great force, the *Josephine Willis* being struck on the starboard side abaft the foremast. Capt. Canney, who was below at the time, hurried on deck to find his ship sinking. In the first confusion the boats were sent away half empty and the remaining passengers were directed to make what use they could of hen coops and other material which would float. One distressing feature of the disaster was the fact that there were no plugs for some of the boats.

After about ten minutes the *Mangerton* backed away and the water rushed into the side of the stricken ship, causing her to heel over until she lay on her beam ends.

The number drowned was 69, of whom 57 were passengers. Capt. Canney was among those lost. The steamship picked up boats containing 26 survivors.

JOSHU GO

Japanese Government; 1917; Laxevaags Mask. & Jernskibs-baggeri; 1,658 tons; 246x38x15-6; 138 n.h.p.; triple-expansion engines.

The steamship *Joshu Go* was formerly the Chinese *Hsu Chow*, seized by the Japanese. She was torpedoed and sunk by the LT.S. submarine *Tang* on October 10th, 1944, about 50 miles W. of Keelung, Formosa.

JOSHUA NICHOLSON

Joshua Nicholson Steamship Co.; 1880; Tyne Iron Shipbuilding Co.; 1,853 tons; 270x35x24-5; ISO n.h.p.; 8-5 knots; triple-expansion engines.

The steamship *Joshua Nicholson* was torpedoed and sunk by a German submarine off the Wolf Rock on March 18th, 1917. The captain and 25 of the crew were killed.

JOSIE TROOP

H.D. Troop & Son; 1881; 1, Lynch; 1,099 tons; 187-5X 37-3x22-3.

The barque *Josie Troop*, Capt. G. W. Cook, left London for Philadelphia on January 2nd, 1889, with a crew of 17. On February 22nd, she was off Chicamacomico, North Carolina, in severe weather and thick fog, when she ran on a sandbank. Her position was hopeless from the outset and the heavy seas made the task of the rescuers one of extreme danger. Only six men were rescued, the captain and ten men being drowned.

Capt. Cook had retired from seafaring but had taken over command of the ship for one voyage, as a relief for the vessel's regular captain.

JUAN CASIANO

Petroleos Mexicanos S.A.; 1919; W. Doxford & Sons; 7,064 tons; 412 • 1 x; 55 • 3 X 34 - 2; 619 n.h.p.; triple-expansion engines. The Mexican ship *Juan Casiano* was in a collision on October 19th, 1944, about 90 miles off Savannah during a storm. It was considered that she afterwards sank due to breaking up in heavy weather, and not because of the collision. Twenty-one of her crew were lost.

JUAN DE ASTIGARRAGA

Cia. Naviera Bachi; 1929; Napier & Miller; 3,561 tons; 343-4X49-1 x 26 • 2; 318 n.h.p.; triple-expansion engines. The Spanish steamship *Juan de Astigarraga* was torpedoed and sunk by a German submarine on February 26th, 1943, three miles off San Remo.

JUBILEE

Nine Island Shipping Co.; 1897; D. Drake; 140 tons; 95-3X 24-1x7-6; 10 n.h.p.; oil engines. The auxiliary schooner *Jubilee* left Auckland on August 15th, 1920, for Nine Island, with a general cargo and a number of horses. She put in to Kawau, where she remained for several days, and then resumed her voyage, being due at Niue Island on September 4th.

The schooner carried a crew of ten and seven passengers, and shortly after leaving Kawau ran into a cyclone accompanied by waterspouts of great violence. Some weeks later the Government s.s. *Tutanekai* made an exhaustive search, but no trace of the *Jubilee* was found.

JUHO MARU

Yamazaki K.K.; 1889; Wood, Skinner & Co.; 1,404 tons; 249-3x33-8x15-3; 138 n.h.p.; triple-expansion engines. The *Juho Mam* was wrecked on September 28th, 1923, on the coast of Hokkaido.

JULIA

Hired government transport; 1840 (circa); 450 tons (approx.). The sailing vessel *Julia*, with part of the 4th troop of Horse Artillery on board, left Karachi for Bombay on June 29th, 1857. The ship was being towed out of harbour when she struck on the bar in the heavy seas. The hawser parted and the ship drifted on to the rocks near Clifton, where she became a total wreck. Fourteen lives were lost, the majority of the troops being landed in safety.

JULIA WARD HOWE

United States War Shipping Administration; 1942; South Portland S.B. Corp.; 7,176 tons; 422-8x57x34-8; 339 n.h.p.; triple-expansion engines.

The American steamship *Julia Ward Howe* was torpedoed and sunk about 300 miles S. of the Azores on January 27th, 1943, on a voyage from New York to North Africa.

JULIET

C. T. Bowring & Co.; 1881; R. Dixon & Co.; 2,090 tons; 276x 36-3x24-4; 250 h.p.; compound inverted engines. The British cargo ship *Juliet* was wrecked on the Bahamas on October 6th, 1886, while on a voyage from Cardiff to New Orleans carrying a cargo of railway iron.

JULIUS HUGO STINNES 27

Hugo Stinnes Reed. A.G.; 1924; Fried. Krupp Akt. Ges.; 2,530 tons; 277-8x44-2x20-8; 187n.h.p.; triple-expansion engines. The German steamship *Julius Hugo Stinnes 27* struck a mine and sank on February 13th, 1942, off Trolberg.

JUMIEGES

Worms & Co.; 1913; Wood, Skinner & Co.; 1,708 tons; 260-3x 37-7x16-4; 180 n.h.p.; triple-expansion engines. The French ship *Jumieges* on a voyage from Toulon to North Africa was in distress on January 7th, 1943. She is presumed to have foundered because nothing more was heard or seen of her.

JUMNA

James Nourse; 1929; A. Stephen & Sons; 6,078 tons; 423-9X 55-9x28-1; 612n.p.h.; 12 knots; triple-expansion engines & L.P. turbine.

The steamship *Jumna*, Capt. N. R. Burgess, on a voyage from Liverpool to Calcutta, was presumed to have been sunk by a German raider on December 25th, 1940, about 200 miles N. of the Azores. All on board, 61 crew, two gunners and 48 passengers were lost.

JUNEAU

United States Navy, anti-aircraft cruiser; 1941; Federal Shipbuilding Co.; 6,000 tons; 541x52x—; 38 knots; turbine engines; twelve 5 in. guns, 12 smaller, 6 T.T., 2 aircraft. The anti-aircraft cruiser *Juneau* formed part of a force of cruisers and destroyers under Rear-Admiral D. J. Callaghan engaged in covering transports and merchantmen landing troops and supplies on the island of Guadalcanal. Shortly before midnight on November 12th, 1942, the American and Japanese squadrons made contact in the Lengo Channel.

The *Juneau* was sunk in the forenoon of the 13th by a torpedo from a Japanese submarine after having been badly damaged in the night's action.

The full story of the battle is told under the Japanese battleship *Kirishima* and the U.S. cruiser *Atalanta*.

JUNO

Finska Angf. Aktieb.; 1906; Laxevaags Msk. & Jernsk.; 1,239 tons; 226-4x33-5x15-9; 114n.h.p.; triple-expansion engines. On a voyage from London to Abo, the Finnish ship *Juno* was wrecked on December 30th, 1925, at Kokarsoren.

JUNO

Finska Angfartygs AIB; 1920; Hawthorns & Co.; 1,241 tons; 256-5x39-1x15-9; 217 n.h.p.; triple-expansion engines. The Finnish steamship *Juno* was sunk by mine or torpedo on October 30th, 1939, 40 miles N.E. of Spurn Head on a voyage from London to Viipuri.

JUNO

British Navy, destroyer; 1938; Fairfield Shipbuilding Co.; 1,690 tons; 348x35x9; 40,000s.h.p.; 36 knots; turbine engines; 3-drum boilers; six 4-7 in. guns, six smaller, 10 T.T. The destroyer *Juno*, Cdr. St. J. R. J. Tyrwhitt, was bombed and sunk on May 21st, 1941, during the Cretan campaign. Five officers and 113 ratings were killed. The survivors numbered 104, of whom six were officers. For fuller details of the fighting off Crete see anti-aircraft cruiser *Calcutta* and the cruiser *Fiji*.

JUNO

A. Hansen; 1903; Akt. Ges. Neptun; 2,038 tons; 292-1x41-2x 18-1; 180 n.h.p.; triple-expansion engines. The German steamship *Juno* was bombed and sunk by British aircraft on May 30th, 1945, at Wilhelmshaven.

JUNONA

Russian S.N. & Trading Co.; 1898; Wigham Richardson & Co.; 3,462 tons; 345-3x46-1x15-4; 255n.h.p.; triple-expansion engines.

The Russian cargo ship *Junona* was torpedoed and sunk by a German submarine off the north coast of Scotland on August 25th, 1917.

JUNPO MARU

Japanese Government; 1911; Rickmers Akt. Ges.; 4,277 tons; 368x47-7x27-5; 325n.h.p.; triple-expansion engines. The steamship *Junpo Mam* was torpedoed and sunk by the U.S. submarine *Barbero* on December 25th, 1944, 50 miles north west of Pontianak, Borneo.

JUNYO MARU

JUNYO MARU

Baba Shoji K.K.; 1913; *R. Duncan & Co.*; 5,065 tons; 405X53x27-2; 475n.h.p.; triple-expansion engines. The steamship *Junyo (Zyunyo) Mam* was torpedoed and sunk by a British submarine on September 18th, 1944, off Tndrapura, Sumatra.

JUPITER

W. R. Bradley; 1901; *Grangemouth & Greenock Dockyard Co.*; 2,124 tons; 285-9x43-2x19; 222n.h.p.; 10 knots; triple-expansion engines.

The steamship *Jupiter* was torpedoed and sunk by a German submarine 15 miles W. of Beachy Head on May 21st, 1917. The captain and 18 of her crew were killed.

JUPITER

British Navy, destroyer; 1938; *Yarrow & Co.*; 1,690 tons; 348x35x9; 40,000s.h.p.; 36 knots; turbine engines; 3-drum boilers; six 4-7 in. guns, 6smaller, 10 T.T.

The destroyer *Jupiter*, Lt. Cdr. N. V. J. T. Thew, formed part of an Allied force under Rear-Admiral K. Doorman of the Royal Netherlands Navy engaged in resisting a Japanese landing on the island of Java.

The action commenced at 4 o'clock on the afternoon of February 27th, 1942, the Japanese cruisers being forced to turn away under a smoke screen laid by their destroyers. The *Jupiter* and her consorts *Encounter* and *Electra* attacked through the smoke, but were unable to fire their torpedoes at the enemy. During this brief action *Electra* was engaged by three large enemy destroyers and sunk. After dark the opposing forces again made contact, *Jupiter* being hit by a torpedo. She sank four hours later. Four officers and 91 ratings were killed in the action. The Japanese picked up a number of survivors, 27 of whom died in captivity.

The full story of the battle is told under the cruiser *De Ruyter*, flagship of Admiral Doorman, which was lost, together with the entire Allied squadron.

JURA

Admiral Shipping Co.; 1929; *Burntisland S.B. Co.*; 1,759 tons; 271-6 x 39-7 x 19; 156n.h.p.; triple-expansion engines. The steamship *Jura*, from Huelva to Aberdeen with ore, was bombed and sunk by German aircraft on February 9th, 1941, off Portugal. Fifteen of her crew and two gunners were killed.

JUSAN MARU

KokokuKisenK.K.; 1918; *Gt. Lakes Eng. Works*; 2,111 tons; 253-5x43-8x20-4; 226n.h.p.; triple-expansion engines. The steamship *Jusan (Zyuzan) Mam* was torpedoed and sunk by the U.S. submarine *Finback* on December 16th, 1944, 75 miles N.W. of the Chichi Jima Retto Islands.

JUSSI H.

Laiva O/Y Jussi H.; 1910; *Ateliers & Chantiers de France*; 2,323 tons; 299-5x42-9x19-6; 208n.h.p.; triple-expansion engines.

The Finnish steamship *Jussi H.* was torpedoed and sunk by a Russian submarine on September 11th, 1942, off Mantyluoto.

JUSTICIA

White Star Line; 1917; *Harland & Wolff*; 32,234 tons; 740-5 x 86-4x43-1; 18 knots; triple-expansion engines & L.P. turbine. The liner *Justicia* was built by Harland & Wolff for the Holland-Amerika Line as the *Statendam*, but the British government took her over before completion for war service. On Friday, July 19th, 1918, when off the N.W. coast of Ireland, bound from Liverpool to New York in convoy, she was attacked by German submarines. At 2:30 p.m. the first torpedo struck her in the engine room and at 4:30 two more torpedoes were fired, one of which missed and the other was diverted by gunfire. At 8 p.m. the *Justicia* was taken in tow and shortly afterwards a fourth torpedo was discharged, but gunfire

again proved successful in diverting the aim. The next morning at 4:30 a fifth torpedo was discharged, but missed. Finally at 9:15 a.m. on July 20th two torpedoes struck her on the port side in way of Nos. 3 and 5 holds. These proved fatal and the *Justicia* sank stern first at 12:40 p.m.

At the time of the attack she was carrying from 600 to 700 crew, but no passengers. The third engineer and 15 of the engine room staff were killed, the survivors were taken off by the escorting ships. H.M. destroyer *Marne* succeeded in sinking one of the submarines.

JUSTINA

N.V. Curacaosche Scheepv. Maats.; 1924; *Nederlandsche Scheeps. Maats.*; 2,700 tons; 305x50-2x15-1; 236 n.h.p.; triple-expansion engines.

The Dutch tanker *Justina* was in collision with the *Yamhill* and sank on September 23rd, 1944, in the Caribbean.

JUSTITIA

Chellev Steamship Management Co.; 1935; *Burntisland Shipbuilding Co.*; 4,562 tons; 412x56x25; 283 n.h.p.; 10-5 knots; triple-expansion engines.

The steamship *Justitia*, Capt. D. L. Davies, was torpedoed and sunk by a German submarine about 80 miles W. of North Aran Island on November 22nd, 1940. Thirteen of her crew were lost.

JUTA

Ministry of War Transport (Tyne & Wear Shipping Co.); 1908; *Blyth S.B. Co.*; 1,559 tons; 245x36-7x16; triple-expansion engines.

The British cargo ship *Juta* struck on rocks during a fog off St. Goven's Head and sank two miles off Caldy Island on October 7th, 1945. She was on a voyage in ballast from Rouen to Glasgow.

JUTLAND

Anglo-Bretagne Shipping Co.; 1898; *J. L. Thompson & Sons*; 2,824 tons; 326x47x21-5; 257 n.h.p.; 9 knots; triple-expansion engines.

The steamship *Jutland* was torpedoed and sunk by a German submarine 18 miles N.E. by N. of Ushant on November 19th, 1917. The captain and 25 of the crew were killed.

JUVENTUS

Soc. Commerciale diNav.; 1920; *S.A. Cantieri Navali F. Tosi*; 4,920 tons; 394-3x51-7x27-6; 606 n.h.p.; oilengines. The Italian motor vessel *Juventus* was torpedoed and sunk by the British submarine *Swordfish* on February 16th, 1941, three miles N.E. of Kuriat Island, Tunisia.

JUVIGNY

C. D. Mallory & Co.; 1920; *Detroit S.B. Co.*; 2,309 tons; 251 x43-6x22-2; 265 n.h.p.; triple-expansion engines. The American ship *Juigny* was involved in a collision and sank on January 31st, 1927, near Delaware Breakwater.

JUYO MARU

Toyo Kisen K.K.; 1926; *Asano S.B. Co.*; 5,458 tons; 400X53x32; 513 n.h.p.; triple-expansion engines. The steamship *Juyo (Zyuyo) Mam* struck a mine and sank on March 8th, 1944, in the Gulf of Siam.

JUZAN MARU

Dairen Kisen K.K.; 3,943 tons. The *Juzan Maru* was torpedoed and sunk by the U.S. submarine *Tirante* on April 14th, 1945, off the N.W. coast of Cheju Do, South Korea.

JYTTE

D/S Ove Skou AJS; 1884; *J.Laing*; 1,877 tons; 270x36-4x21; 173 n.h.p.; compound engines.

The Danish steamship *Jytte* struck a mine and sank on December 19th, 1939, 18 miles E. of Souter Point, River Tyne.

K. G. MELDAHL

K.K. Rasmussens Rederi A/S; 1938; *Fredrikstad Mek. Verks A/S*; 3,799 tons; 365-2x57-3x20-2; 353 n.h.p.; compound engines. The Norwegian steamship *K. G. Meldahl* was torpedoed and sunk by a German submarine on November 10th, 1942, off East London, South Africa.

KAAPAREN

Rederiaktieb. Transatlantic (G. Carlsson); 1930; *Gotaverken A/B*; 3,386 tons; 354-1x50-1x20-2; 724 n.h.p.; oil engines. The Swedish motorship *Kaaparen* was in collision with the *Tungsha* and sank on June 14th, 1942, in the vicinity of Halifax East lightship.

KABALO

Cie. Maritime Beige (Lloyd Royal); 1917; *Cammell Laird & Co.*; 5,186 tons; 400x52-4x28-4; 490 n.h.p.; triple-expansion engines. The Belgian steamship *Kabalo* was torpedoed and sunk by a German submarine on October 15th, 1940, 400 miles off the Azores.

KACHAOSAN MARU

Mitsui Bussan Kaisha; 1924; *Mitsui Bussan K.K.*; 2,427 tons; 284-5x42x23-3; triple-expansion engines. The steamship *Kachaosan (Katyosan) Maru* was sunk by U.S. carrier-based aircraft on March 23rd, 1945, W. of Amami O., Ryukyu Islands.

KACHIDOKI MARU

Japanese Government; 1921; *New York S.B. Corp.*; 10,509 tons; 502-1x62-2x28-3; 782 n.h.p.; triple-expansion engines. The transport *Kachidoki Maru* was formerly the American liner *President Harrison* seized by the Japanese at Whangpoo in December, 1941. On September 12th, 1944, she was torpedoed and sunk by the U.S. submarine *Pampanito* about 50 miles E. of Hainan Island.

KADIO

Mme. K. G. Sigalas; 1911; *S. P. Austin & Son*; 1,430 tons; 240x36x15-6; 172 n.h.p.; triple-expansion engines. The Greek ship *Kadio* was loaded with benzine in cases when she caught fire at Suez on October 20th, 1941. There was an explosion and she sank.

KAFFRARIA

W. S. Bailey; 1864; *J. Laing*; 1,039 tons; 237-8x29x16-2; 90 h.p.; compound engines. The British cargo ship *Kaffraria* was wrecked on January 8th, 1891, at Otterndorf while on a voyage from Hull to Hamburg carrying a general cargo.

KAFIRISTAN

Hindustan S.S. Co.; 1924; *Short Bros.*; 5,193 tons; 390x53-5 X 28-6; 363 n.h.p.; 10 knots; triple-expansion engines. The steamship *Kafiristan*, Capt. John Busby, was torpedoed and sunk about 300 miles off south-west Ireland on September 17th, 1939. The crew numbered 35 and of these six were drowned by the capsizing of the first lifeboat, launched while the vessel was still moving. The remaining boats got away without incident and the commander of the German submarine, which had surfaced, offered to tow them toward the land. He also offered to send out an S.O.S. call but these things were never carried out as a British bomber appeared and, after spraying the submarine with machine-gun bullets as she lay on the surface, dropped two bombs close alongside. The submarine dived and was not seen again.

The survivors of the *Kafiristan* were picked up and landed at New York by the United States steamship *American Farmer*, Capt. Pederson, which witnessed the aeroplane attack.

KAGA

Japanese Navy, aircraft carrier; 1921; *Kawasaki Dockyard*; 26,900 tons; 715x102-7x21-5; 91,000 s.h.p.; 23 knots; turbine engines; Kanpon boilers; ten Sin. guns, twelve 4-7in., 28 m.g., 60 aircraft. The aircraft carrier *Kaga* was one of a squadron of four carriers escorting a convoy of transports steering for Midway Island, one of

the American bases in the Pacific. The force was very large and comprised about 80 ships of all kinds. On June 3rd, 1942, it was sighted by an American patrol plane and was shortly afterwards attacked by land-based and carrier-borne aircraft. The *Kaga* was hit repeatedly and a number of planes on her flight deck caught fire and burned out the ship. By nightfall on the 4th she was in a sinking condition and was destroyed by her own people early on the 5th.

The Japanese losses were four aircraft carriers with 275 planes and one heavy cruiser. The Americans lost one aircraft carrier and one destroyer.

The full story of the battle of Midway Island is told under the U.S.S. *Yorktown*.

KAGAWA MARU

Kamaishi Kozan K.K.; 1880; *W. Denny & Bros.*; 2,058 tons; 284-7x35-2x23-8; 194 n.h.p.; compound engines. The *Kagawa Maru* left Muroran for Kamaishi on November 20th, 1924, with a cargo of coal and was not seen again.

KAGERO

Japanese Navy, destroyer; 1938; *Maizuru*; 2,000 tons; 364 X 35 X 11; 45,000 s.h.p.; 36 knots; turbine engines; Kanpon boilers; six 5 in. guns, 2 m.g., 8 T.T.

The destroyers *Kagero*, *Kuroshio* and *Oyashio*, all 2,000 tons, were steaming through the Blackett Strait, New Georgia, on May 8th, 1943, when they ran into a minefield laid by U.S. naval aircraft. All three vessels struck mines, the *Kuroshio* being sunk and the other two disabled. A squadron of U.S. naval dive bombers then came on the scene and completed the destruction of the two disabled destroyers.

The vessels carried complements of over 200 apiece.

KAGESHIMA MARU

Japanese Government; 1898; *R. Craggs & Sons*; 4,687 tons; 361 X 48x20-3; 326 n.h.p.; triple-expansion engines. The Japanese steamship *Kageshima Maru* was torpedoed and sunk by a German submarine in the Bay of Biscay on July 20th, 1917.

KAGI MARU

Osaka Shosen K.K.; 1907; *Kawasaki Dockyard Co.*; 2,343 tons; 305-9x39-7x21-6; 248 n.h.p.; triple-expansion engines. The transport *Kagi Maru* was torpedoed and sunk by the U.S. submarine *Saury* on May 26th, 1943, N. of the Ryukyu Islands.

KAGU MARU

Kokusai Kisen K.K.; 1936; *Harima S.B. & Eng. Co.*; 6,806 tons; 453-3x61x31; 1,850 n.h.p.; oil engines. The motorship *Kagu Maru* was torpedoed and sunk by the U.S. submarines *Ray*, *Bream* and *Guitarro* on November 4th, 1944, off Masinlok, Philippines.

KAHOKU MARU

Dairen Kisen K.K.; 1931; *Mitsubishi Zosen Kaisha*; 3,350 tons; 336-6x48-5x24; 389 n.h.p.; oil engines. The motor vessel *Kahoku Maru* was taken over by the Japanese Navy and converted into an auxiliary gunboat. On June 8th, 1943, she was torpedoed and sunk by the U.S. submarine *Finback* N.W. of the Caroline Islands.

KAHUKU

Matson Navigation Co.; 1920; *Pacific Coast Shipbuilding Co.*; 6,062 tons; 402-5x53x32; 2,800 s.h.p.; 9-5 knots; turbine engines.

The American cargo liner *Kahuku*, Capt. Eric H. Johanson, was steaming in convoy through the Caribbean Sea on June 15th, 1942, when she picked up 63 survivors from the steamships *Cold Harbor* and *Scottsburg* which had been torpedoed shortly before. Early on the same evening the *Arkansas* was torpedoed and about three hours later the *Kahuku* was struck on the starboard side near the engine room. The submarine then surfaced and opened fire on the steamship killing Capt. Johanson and Lt. Kamerer, commanding the U.S. naval gun crew, and 14 men, including several of those rescued earlier in the day. The *Kahuku* then sank, the survivors being picked up by one of the escorting warships.

KAI

Ministry of Shipping (J. & A. Gardner & Co.); 1904; Nylands Værksted; 1,251 tons; 241-5x35-7x17-8; 132n.h.p.; triple-expansion engines.

The British cargo ship *Kai* struck submerged wreckage and sank between Trevoise Head and Newquay on February 1st, 1941. She was on a voyage from Swansea to Southampton carrying a cargo of coal.

KAI

D/S A/S Myren; 1921; Kjøbenhavns Flydedok & Skibsværft; 1,746 tons; 261'1x40-1x16-9; 132 n.h.p.; triple-expansion engines.

The Danish steamship *Kai*, under German control, struck a mine and sank on December 7th, 1941, on a voyage from Rotterdam to Aarhus with coal.

KAIAPOI

Wallem & Co.; 1906; Osbourne, Graham & Co.; 2,003 tons; 279-2x40-1x18-1; 194 n.h.p.; triple-expansion engines. The Panamanian ship *Kaiapoi* was on a voyage from Shanghai to Ningpo via Wenchow with a cargo of coal. She struck rocks and sank on January 25th, 1939, outside Wenchow Bay.

KAIETEUR

Steel, Young & Co.; 1876; E. Withy & Co.; 1,254 tons; 230X 31-8x17-4; 110h.p.; compound inverted engines. The British cargo ship *Kaieteur* foundered in 44° N., 11° W., on December 30th, 1887, while on a voyage from Messina to Rouen carrying a cargo of wine.

KAIYUKU MARU

Kita Nippon Risen K.K.; 1917; Osaka Iron Works; 3,177 tons; 305x43-8x27-3; 287 n.h.p.; triple-expansion engines. The steamship *Kaiyuku (Kaiyuku) Maru* was torpedoed and sunk by the U.S. submarine *Seawolf* on November 4th, 1943, S.W. of Macao.

KAIHEI MARU

Simutani Risen K.K.; 1934; Mitsui Bussan Kaisha; 4,575 tons; 362-2x50x29-1; 452 n.h.p.; oilengines.

The motor vessel *Kaihei Maru* was torpedoed and sunk by the U.S. submarine *Seawolf* on April 15th, 1943, N.E. of the Ladrone Islands.

KAIHO MARU

Uno Kaiun K.K.; 10,239 tons.

The tanker *Kaiho Maru* was bombed and sunk by U.S. carrier-based aircraft on January 9th, 1945, ten miles S. of Kaohsiung, Formosa.

KAIHO MARU

Japanese Government; 1,093 tons.

The *Kaiho Maru* was torpedoed and sunk by the U.S. submarine *Sunfish* on April 19th, 1945, S.E. of Muroran, Japan.

KAIHO MARU

Japanese Government; 1905; Swan, Hunter & Wigham Richardson; 2,563 tons; 312X44-3X13-2; 407 n.h.p.; triple-expansion engines. The steamship *Kaiho Maru* was formerly the British *Kaiping*, seized by the Japanese at Manila. She struck a mine and sank on April 27th, 1945, off Shimonoseki, Japan.

KAIHOKU MARU

Yabuki Kinzo Syoten K.K.; 1940; Tsurumi Seitetsu Zosen K.K.; 1,286 tons; 219-3x35-8x18-5; steam engines. The *Kaihoku Maru* was in collision with the *Kyozin Maru No. 1* and sank on May 24th, 1941.

KAIJO MARU

Nippon Tanker K.K.; 1937; Mitsubishi Jukogyo K.K.; 8,636 tons; 474-9x61x37-5; 1,163 n.h.p.; oilengines. The tanker *Kaijo (Kaizyo) Maru* was torpedoed and sunk by the U.S. submarine *Grampus* on March 1st, 1942, S. of the Caroline Islands.

KAIJO MARU

Dairen Kisen K.K.; 1939; Harima S.B. & Eng. Co.; 3,270 tons; 312x48-6x25; 485 n.h.p.; oilengines.

The tanker *Kaijo (Kaizyo) Maru* was bombed and sunk by U.S. land-based aircraft on March 10th, 1943, off the Gulf of Boni, Celebes.

KAIJO MARU

Osaka Syosen K.K.; 1906; Kawasaki Dockyard Co.; 2,025 tons; 285-5x38x20-5; triple-expansion engines. The steamship *Kaijo (Kaizyo) Maru* was sunk by U.S. carrier-based aircraft on March 24th, 1945, in the East China Sea.

KAIKA MARU

Dairen Kisen K.K.; 2,087 tons.

The steamship *Kaika Maru* was torpedoed and sunk by the U.S. submarine *Blackfish* on January 16th, 1944, about 400 miles N. of the Admiralty Islands.

KAIKO MARU

Kaiyo Kisen K.K.; 3,548 tons.

The steamship *Kaiko Maru* was torpedoed and sunk by the U.S. submarine *Sandlance* on February 28th, 1944, between Sakhalin and the Kurile Islands.

KAIKO MARU

Japanese Government; 1902; Tyne Iron S.B. Co.; 2,698 tons; 326x45-3x21-8; 277 n.h.p.; triple-expansion engines. The steamship *Kaiko Maru* was formerly the British *Mary Moller*, seized by the Japanese in the Whangpoo River in December, 1941. She was bombed and sunk by U.S. land-based aircraft on October 26th, 1944, off Hoihow, Hainan Island.

KAIKEI MARU

Kaiyo Kisen K.K.; 1919; Hong Kong & Whampoa Dock Co.; 5,254 tons; 400-2x50x28-5; 517 n.h.p.; triple-expansion engines.

The steamship *Kaimei Maru* was torpedoed and sunk by the U.S. submarine *Guardfish* on September 4th, 1942, off Tamagawa, Japan.

KAIMOKU

Matson Navigation Co.; 1919; Skinner & Eddy Corp.; 6,367 tons; 402-6x54-9x32-1; 359 n.h.p.; triple-expansion engines.

The American steamship *Kaimoku* was torpedoed and sunk by a German submarine on August 8th, 1942, in lat. 56° 30' N., long. 32° 14' W., on a voyage from Sydney, N.S., to Immingham. She had a cargo of steel and munitions.

KAIMON

Japanese Navy, gunboat; 1882; Yokosuka Dockyard; 1,350 tons; 210 X 32 x 16 • 5; 1,250 i.h.p.; compound engines; one 17 cm. gun, one 12 pdr., 5 m.g.

The Japanese gunboat *Kaimon* was engaged upon surveying duties, from which she was recalled at the outbreak of the Russo-Japanese War in February, 1904. She was employed with the fleet off Port Arthur and on July 5th, 1904, struck a floating mine and sank with a loss of three officers, including the captain, and 19 ratings, out of a complement of 226.

KAINAN MARU

Okada Gumi K.K.; 1907; Clyde S.B. & E. Co.; 1,134 tons; 210-3x31-4x14-8; 145 n.h.p.; triple-expansion engines. The steamship *Kainan Maru* was torpedoed and sunk by a British submarine on June 12th, 1944, off Puket, Thailand.

KAIRAKI

Kaiapoi Shipping & Trading Co.; 1909; Dublin Dockyard Co.; 462 tons; 160x28 • 6x9-9; 66 r.h.p.; 9-5 knots; triple-expansion engines.

The New Zealand coastal steamship *Kairaki*, Capt. W.G. Scott, left Wellington at 3.30 a.m. on September 24th, 1914, for Greymouth. She had on board a cargo transhipped from the s.s. *Remuera* and carried a crew of 17.

What happened to her after that date is not known with any certainty. On the 26th reports began to come in to Greymouth that considerable quantities of merchandise and wreckage had been

found on the beach at Ten Mile. Later two lifebuoys bearing the ship's name were washed ashore.

The Greymouth Harbour Board's tug *Westland* searched along the coast and found the steamship lying with her derricks visible above water. The position of the wreck was three miles from Point Elizabeth and five miles from Greymouth.

On the night of the 25th a westerly gale of great violence was blowing.

KAIROUAN

Cie. Delmas freres & Vieljeux; 1923; Atel & Ch. de la Gironde; 4,578 tons; 362-9x49-2x24-4; 280n.h.p.; triple-expansion engines.

The French ship *Kairouan* went ashore at 3 a.m. on November 3rd, 1934, near Cape Juby, Morocco, and became a total loss.

KAISARI

Bombay & Persia Steam Nav. Co.; 1886; J. L. Thompson & Sons; 2,494 tons; 300x40-1x25-1; 265 n.h.p.; triple-expansion engines. The steamship *Kaisari* was wrecked off Reunion Island on January 17th, 1901. Twenty-five men, including the captain, were drowned.

KAISER WILHELM DER GROSSE

Norddeutscher Lloyd; 1897; Akt. Ges. Vulkan; 13,952 tons; 626-7x66x39; 30,000i.h.p.; 22-5 knots; triple-expansion engines; six 10-5 cm. guns.

The German liner *Kaiser Wilhelm der Grosse* eluded the British blockade and for a few weeks in August, 1914, did some damage as a commerce raider. The ship was armed with six 10-5 cm. guns and had a speed of 22 • 5 knots. She left Bremen on August 4th and by hugging the Norwegian coast and navigating round the north of Iceland escaped into the Atlantic. Her first victim was the trawler *Tubal Cain*, which she sank after taking the crew prisoners. On August 15th she arrived south-westward of the Canaries where she captured the *Galician*, homeward bound from South Africa, the *Kaipara* of the New Zealand Shipping Co., the R.M.S.P. Co's liner *Arlanza*, and the Elder, Dempster liner *Nyanga*. The *Galician* and the *Arlanza* were permitted to continue their voyage, after their wireless sets had been destroyed, as they were carrying passengers who would have proved embarrassing to the raider. The other ships were sunk and their crews transferred later to a German collier.

On the 17th the *Arlanza* met the armoured cruiser *Cornwall* off Las Palmas and signalled the news of the raider's presence in those waters. This was immediately wirelessly by the cruiser to Rear-Admiral J. M. de Robeck commanding the St. Vincent-Finistere Station, who at once set ships in motion to compass the destruction of the raider. The German sailing ship *Werner Vinnen* was captured with 4,000 tons of coal on board, and the steamship *Professor Woermann*, with stores, was captured next day, thus depriving the raider of supplies.

On the afternoon of the 26th, just three weeks after breaking out into the Atlantic, the *Kaiser Wilhelm der Grosse* was surprised by the light cruiser *Highflyer*, 5,600 tons, eleven 6 in. guns, 20 knots, Capt. H. T. Buller. She was lying off the Rio de Oro with a collier on each side and one on watch some distance out. Capt. Buller was aware that the Germans were within Spanish waters and that it behoved him to act with great circumspection. He sent in a demand for the surrender of the four ships, which was refused, waited for about two hours in case the enemy decided to come out, and then opened fire. The fighting lasted from 3.10 p.m. to 4.45 p.m., when the *Kaiser Wilhelm der Grosse* sank in shallow water, the survivors of her crew putting ashore in the boats.

The losses in the action were fairly heavy on the German side, though no figures can be given. The *Highflyer* had one man killed and five wounded.

KAISERIN-ELISABETH

Austrian Navy, cruiser; 1890; Austria; 4,060 tons; 321x49x19; 8,000 i.h.p.; 19 knots; triple-expansion engines; eight 6 in. guns, sixteen 3pdr., 1 m.g., 4 T.T.

The cruiser *Kaiserin-Elisabeth* was lying at the German Far Eastern base of Tsing-Tau in August, 1914, when the base was attacked by Allied sea and land forces. The investment of the fortress commenced on August 27th, and on November 3rd a reconnaissance by the besieging forces showed that the *Kaiserin-Elisabeth* had been blown up and sunk.

KAISHO MARU

Hachiuma Kisen K.K.; 1918; Osaka Iron Works; 6,070 tons; 407-3x50-8x32-6; 553n.h.p.; triple-expansion engines. The steamship *Kaisho (Kaisyo) Mam* was torpedoed and sunk by the U.S. submarine *Finback* on August 3rd, 1943, N. of Rembang, Java.

KAISHO MARU

Kaiyo Kisen K.K.; 1938; Harima S.B. & Eng. Co.; 4,164 tons; 363-6x50x29; 467n.h.p.; turbine engines. The steamship *Kaisho (Kaisyo) Maru* was torpedoed and sunk by the U.S. submarine *Tullibee* on August 22nd, 1943, 275 miles S.E. of Guam.

KAISOKU MARU

Nippon Tanker K.K.; 1931; Yokohama Dock Co.; 1,126 tons; 220-8x34-5x18-2; 327n.h.p.; oil engines. The tanker *Kaisoku Maru* was sunk by U.S. carrier-based aircraft on July 25th, 1945, off Kure, Japan.

KAITO MARU

Kaiyo Kisen K.K.; 2,745 tons. The steamship *Kaito Maru* was bombed and sunk by U.S. land-based aircraft on December 20th, 1943, off New Ireland.

KAIYO

Japanese Navy, aircraft carrier; 1939; Japan; 12,755 tons; 516x68x7; 17,000 b.h.p.; 20 knots; diesel engines; twelve 5 in.A.A. guns, many 47 mm., 30 aircraft.

The aircraft carrier *Kaiyo* was completing as the Nippon Yusen liner *Argentina Maru* when Japan entered the Second World War on December 7th, 1941. She was taken over by the Japanese Admiralty and converted to an aircraft carrier, her name being changed to *Kaiyo*. She was bombed and sunk in Beppy Bay, Kyushu, by U.S. naval aircraft on July 24th, 1945.

See also the aircraft carrier *Chuyo*.

KAKANUI

New Zealand Government; 1879; R. S. Sparrow & Co.; 83 tons; 97-5x14-5x7-5; 22h.p.; compound engines. The steamship *Kakanui*, Capt. W. Best, was chartered by the New Zealand Government to go to the relief of a small sealing expedition which was known to be established on Macquarie Island. The food supplies of the party when it left New Zealand in April, 1890, were sufficient for six months, and as it was now December it was feared that extreme privation, if not total disaster, had overtaken it. Altogether there were nine men and the wife of the leader, Mr. Mellish, on the island.

The steamship left Invercargill on December 24th, 1890, with all necessary supplies and reached Lusitania Bay, Macquarie Island, on January 3rd, 1891. The Government Agent, Mr. James Stevens, a customs officer, went ashore and found all the party in good health. He proposed that they should leave the island forthwith, to which eight of the sealers agreed. Mr. and Mrs. Mellish had their permanent residence there and did not wish to leave. The steamship, therefore, left as soon as the men had collected their belongings, having stayed no more than a few hours. On her return trip she had on board eight sealers, the Government Agent, and a crew of ten, of whom one, Capt. J. Eckhoff, was carried as a pilot, making 19 persons in all.

Mr. and Mrs. Mellish stated later that they had watched the steamship out of sight and that all was well, but from that time she was never seen again. No news of her came to New Zealand, and on January 22nd, the Government steamship *Hinemoa*, Capt. Fairchild, was despatched to make a search. After visiting Macquarie Island, Capt. Fairchild returned to New Zealand to report the failure of his search. He set out again in February, returning on March 11th, having visited the Antipodes, Bounty and Chatham Islands without discovering any trace of the relief ship.

An Inquiry was held at Dunedin in April, 1891. Mr. Mellish, who had resided on Macquarie for 16 years, stated that one of the worst storms in his experience occurred on the day after the *Kakanui* sailed, and in the light of this evidence the Court decided that the vessel was lost through extreme stress of weather.

KAKO

Japanese Navy, heavy cruiser; 1925; Kawasaki Dockyard; 7,100 tons; 595x50-7x14-7; 95,000s.h.p.; 33 knots; turbine engines; Kanpon boilers; six 8in. guns, four 4-7in., 6m.g., 12 T.T., 2 aircraft.

The heavy cruiser *Kako* was a unit of the fleet engaged in defending the Solomon Islands against the American invasion forces. On August 7th, 1942, the U.S. Marines landed on Guadalcanal and Tulagi and a succession of fierce sea battles between the rival fleets was initiated. On the 10th, when north of New Ireland, the *Kako* was torpedoed and sunk by the U.S. submarine *S-44*. The vessel's normal complement was 620.

KAKOGAWA MARU

Tayo Kaiun K.K.; 6,886 tons.

The steamship *Kakogawa Maru* was sunk by U.S. carrier-based aircraft on November 13th, 1944, in Manila Bay.

KAKUZAN MARU

Japanese Government; 1930; Taikoo Dock & Engineering Co.; 2,938 tons; 295x46-1x20; 143n.h.p.; triple-expansion engines.

The steamship *Kakuzan Maru* was formerly the British *Wuhu*, seized by the Japanese in the Yangtze River in December, 1941. She was bombed and sunk by U.S. land-based aircraft on December 29th, 1943, near Anking, Yangtze River.

KALDNES

German Government; 1941; 2,000 tons; oilengines. The motor vessel *Kaldnes* was built to the order of Norwegian owners as the *Mosstrand* and taken over by the Germans on completion. On January 29th, 1943, she was bombed and sunk by British aircraft ten miles S.W. of Stavanger.

KALE

British Navy, destroyer; 1904; Hawthorn, Leslie; 545 tons; 225 X23-5x12; 7,000 i.h.p.; 25 5 knots; triple-expansion engines; Yarrow boilers; four 12pdr. guns, 2 T.T.* The destroyer *Kale* struck a mine and sank in the North Sea on March 27th, 1918. Her official complement was 70.

KALEWA

British & Burmese Nav. Co.; 1940; Wm. Denny & Bros.; 4,389 tons; 409-2x55-2x24-9; 283n.h.p.; triple-expansion engines. The British steamship *Kalewa* sank after a collision with the *Boringia* in 30° 16' S., 13° 38' E., on August 1st, 1942. She was on a voyage from Glasgow to Table Bay, Port Sudan and Aden, carrying a general cargo and government stores.

KALIBIA

Clyde Shipping Co.; 1902; Scott & Co.; 4,930 tons; 410-6X 50-2x28-3; 350n.h.p.; 9-5 knots; triple-expansion engines.

The steamship *Kalibia* was torpedoed and sunk by a German submarine 29 miles S.W. of the Lizard on November 30th, 1917. Twenty-five men were killed. The captain was among the survivors.

KALLIOPH

D. J. Pateras & Sons; 1910; Northumberland S.B. Co.; 4,065 tons; 390X52-5x27-1; 415 n.h.p.; triple-expansion engines. The Greek ship *Kalliopi* was torpedoed and sunk by a German submarine in lat. 54° N., long. 26° 35' W., on February 7th, 1943, on a voyage from Halifax to London.

KALLIOPH

P. D. Pateras; 1943; North Carolina S.B. Co.; 7,176 tons; 422-8x57x34-8; 339 n.h.p.; triple-expansion engines. The Greek steamship *Kalliopi* struck a mine and sank on December 20th, 1947, in the North Adriatic. She was on a voyage from Charleston to Rijeka.

KALYPSO VERGOTTI

Eptanisos S.S. Co. (A. Vergottis); 1918; A. McMillan & Son; 5,686 tons; 400-4x52-3x28-5; 490 n.h.p.; triple-expansion engines.

The Greek ship *Kalypso Vergotti* left Freetown on June 18th, 1941, for Glasgow. She was last reported on June 29th, but was not seen again.

KAMAKURA MARU

Nippon Yusen K.K.; 1930; Yokohama Dock Co.; 17,526 tons; 560x74x42-5; 4,000 n.h.p.; 21 knots; oilengines. The liner *Kamakura Maru* was taken over by the Japanese Government for service as a transport during the Second World War. On April 28th, 1943, when in the Sulu Sea, off the Philippine island of Palawan, she was torpedoed and sunk by the U.S. submarine *Gudgeon*.

KAMCHATKA

Russian Navy, repair ship; 1902; New Dockyard, Leningrad; 7,200 tons; 360 X — X—; 2,800 i.h.p.; 12 knots; triple-expansion engines; six 6 pdr. guns.

The Russian repair ship *Kamchatka* was attached to the Baltic Fleet which was sent to the Far East in 1905. The ship had an official complement of 267, of whom a large number were artificers employed in her workshops. She was a vessel of great importance to the fleet, as Port Arthur had fallen during the voyage and there was no home port nearer than Vladivostok at which repairs might be undertaken.

On May 25th, 1905, two days prior to the battle of Tsu-Shima, the Russian transports and auxiliaries were detached and sent to Shanghai, but the *Kamchatka* was kept with the fleet, together with five other vessels. During the first phase of the battle, which took place on the 27th, the ships were unmolested, but when the Russian battle fleet swung round upon the convoy in an attempt to avoid the Japanese fire there was a period of the utmost confusion. The cruisers and auxiliaries on the inner circle of this movement were no longer immune from shellfire and the *Kamchatka* found herself, helpless and in flames, close to the flagship *Kniaz Suvaroff*, which had been badly battered. While they remained afloat both vessels continued to fire, the *Kamchatka* from her ridiculously inadequate six pounders, and the battleship from whatever gun remained.

Lt. Nikonov, on whom the command now fell, though dying, refused to surrender, and the *Kamchatka* sank at about 6.50 p.m. with her colours flying. About 50 artificers escaped in boats, drifting for two days until picked up by Japanese fishermen who took them to Japan.

The full story of the battle is related under the *Kniaz Suvaroff*, which sank a few minutes after the *Kamchatka*.

KAMIKAWA MARU

Nippon Yusen Kaisha; 1903; Sir Raylton Dixon & Co.; 1,364 tons; 243-8x34-2x20-5; 217 n.h.p.; triple-expansion engines. The Japanese ship *Kamikawa Maru* was wrecked on February 23rd, 1919, near Oniwaki lighthouse, Hokkaido.

KAMIKAWA MARU

Kawasaki Kisen K.K.; 1937; Kawasaki Dockyard Co.; 6,853 tons; 479-4x62-3x30-3; 1,860 n.h.p.; oilengines. The motorship *Kamikawa Maru* was taken over by the Japanese Navy and converted into an auxiliary seaplane tender. On May 28th, 1943, she was torpedoed and sunk by the U.S. submarine *Scamp* in the Admiralty Islands.

KAMIKAZE MARU

Todai Kisen K.K.; 1937; Osaka Iron Works; 4,916 tons; 369-8 X54-1X29-2; 542 n.h.p.; turbine engines.

The motor torpedo boat tender *Kamikaze Maru* was attacked by U.S. carrier based aircraft on March 30th, 1944, and sunk off Babelthup, Palau Islands.

KAMISHIKA MARU

Kuribayashi Shosen K.K.; 2,857 tons.

The *Kamishika Maru* was torpedoed and sunk by the U.S. submarine *Tench* on June 10th, 1945, off Hakodate.

KAMITSU MARU

Settu Syosen K.K.; 1937; Harima S.B. & Eng. Co.; 2,723 tons; 303-0x45-0x24-5; turbine engines.

The steamship *Kamitsu (Kamitu) Maru* was taken over by the Japanese Navy for use as an auxiliary gunboat. She was torpedoed and sunk by the U.S. submarine *Parche* on June 26th, 1945, near Kamaishi, Japan.

KAMMA

M. Carl; 1910; *Wood, Skinner & Co.*; 1,270 tons; 237-7X 35-1x16-5; 139 n.h.p.; triple-expansion engines.

The Danish steamship *Kamma* struck a mine and sank in the North Sea on September 2nd, 1914.

KAMMA

O. Torstenson; 1883; *Palmers^o Co.*; 1,516 tons, 250-7X 35•3X17•3; 150 n.h.p.; compound engines. The Swedish cargo ship *Kamma* struck a mine and sank in the North Sea on January 22nd, 1917.

KAMO

U.S.S.R.; 1905; *Ropner & Son*; 3,800 tons; 355x46-2x 23-5; 308 n.h.p.; triple-expansion engines.

The Russian ship *Kamo*, Capt. Snitko, bound for Kamchatka with passengers, furs and supplies, was wrecked off Karagin Island on December 9th, 1936. Her steering gear failed, she drifted on some rocks and filled with water.

KAMO MARU

Nippon Yusen K.K.; 1908; *Mitsubishi Dockyard & Eng. Works*; 7,955 tons; 464-9x55-8x34-5; 973 n.h.p.; triple-expansion engines.

The steamship *Kamo Mam* was torpedoed and sunk by the U.S. submarine *Tinosa* on July 3rd, 1944, about 100 miles W. of Kagoshima, Japan.

KAMOGAWA MARU

Toyo Kaiun K.K.; 1938; *Mitsubishi Jukogyo K.K.*; 6,440 tons; 439-4x58-3x32; 1,166 n.h.p.; oil engines.

The motor vessel *Kamogawa Mam*, serving as an aircraft transporter, was torpedoed and sunk by the U.S. submarine *Sailfish* on March 2nd, 1942, off Sumbawa Island, Indonesia.

KAMOI MARU

Hokkaido Tanko Kisen K.K.; 1937; *Mitsui Bussan Kaisha*; 5,355 tons; 391-4x53-8x29-8; 407 n.h.p.; triple-expansion engines & L.P. turbine.

The steamship *Kamoi Mam* was torpedoed and sunk by the U.S. submarine *Wahoo* on December 10th, 1941, off New Britain.

KAMPAR

Straits Steamship Co.; 1915; *Hong Kong & Whampoa Dock Co.*; 971 tons; 223-2x36x13-2; 106 n.h.p.; triple-expansion engines.

The steamship *Kampar* was requisitioned by the Admiralty early in the Second World War for service as an anti-submarine vessel. On December 12th, 1941, she was lying at Penang when she was attacked and severely damaged by Japanese bombers. It was not possible to save her and she sank on the following day.

KANAKUK

W. J. Smith; 1902; *Armstrong, Whitworth & Co.*; 4,006 tons; 350x47x27-6; 346 n.h.p.; triple-expansion engines.

The British tanker *Kanakuk* caught fire and sank in 2° 37' S., 116° 43' E., on October 2nd, 1915, while on a voyage from Balik Papan to Europe carrying a cargo of benzine.

KANAN MARU

Osaka Shosen K.K.; 1920; *Osaka Ironworks*; 2,567 tons; 284-5 X 42-5 X 23; 288 n.h.p.; triple-expansion engines.

The steamship *Kanan Mam* was torpedoed and sunk by the U.S. submarine *Skipjack* on May 6th, 1942, off Gana, Indo-China.

KANAN MARU

Dairen Kisen K.K.; 1931; *Mitsubishi Zosen Kaisha*; 3,312 tons; 336-6x48-5x24; 389 n.h.p.; oil engines.

The motorship *Kanan Maru* was torpedoed and sunk by the U.S. submarine *Bluefish* on June 21st, 1944, about 150 miles W.S.W. of Macassar.

KANARIS

N. Embiricos & Sons; 1901; *C. S. Swan & Hunter*; 3,793 tons; 351 x 46-1x27-7; 302 n.h.p.; triple-expansion engines. The Greek cargo ship *Kanaris* was torpedoed and sunk by a German submarine in the Bay of Biscay on January 6th, 1918.

KANAYAMASAN MARU

Kaburagi Kisen K.K.; 2,869 tons.

The steamship *Kanayamasan Maru* was bombed and sunk by U.S. land-based aircraft on November 22nd, 1943, 250 miles N.E. of the Admiralty Islands.

KANAZAWA MARU

Hachiuma K.K.; 1872; *Denton, Gray & Co.*; 1,246 tons; 235-7 X 28•9 X 22-5; 115 n.h.p.; compound engines. The *Kanazawa Mam* was wrecked on November 26th, 1927, in Kurushima Strait while on a voyage from Fusan to Tokio.

KANBE

British & Burmese Steam Nav. Co.; 1941; *W. Denny & Bros.*; 6,244 tons; 409-2x55-2x33-9; 320 n.h.p.; 11 knots; triple-expansion engines.

The steamship *Kanbe*, Capt. J. Burke, was off the coast of Liberia on May 8th, 1943, when she was torpedoed and sunk by a German submarine. Capt. Burke and 65 of the crew were killed. The *Kanbe* was not in convoy.

KANDAHAR

British Navy, destroyer; 1939; *W. Denny & Bros.*; 1,690 tons; 348x35x9; 40,000 s.h.p.; 36 knots; turbine engines; 3 drum boilers; six 4-7 in. guns, 6 smaller, 10 T.T.

The destroyer *Kandahar*, Cdr. W. G. A. Robson, D.S.O., D.S.C., was in company with the cruisers *Neptune*, *Aurora* and *Penelope* and several destroyers off Tripoli on December 19th, 1941. In the early hours of the morning *Neptune* (which see) ran into an enemy minefield and was badly holed. *Kandahar* entered the minefield with the intention of taking the cruiser in tow, but also fouled a mine and had to be sunk by British ships on the 20th. Two officers and 70 ratings were lost. The 178 survivors, among whom was Cdr. Robson, were taken off by the destroyer *Jaguar*.

KANETSU MARU

Osaka Shosen Kaisha; 2,867 tons.

The *Kanetsu Maru* was sunk by U.S. carrier-based aircraft on July 24th, 1945, off Kure, Japan.

KANGTAI

Tung Yu S.S. Co.; 1894; *Flensburger Schiffsb. Ges.*; 2,185 tons;

259-5 x 38 x 20-3; 196 n.h.p.; triple-expansion engines. On a voyage from Vladivostok to Shanghai with passengers and timber, the Chinese ship *Kangtai* was in collision with the Italian cruiser *Libia* lying at anchor at Woosung on March 27th, 1929. The *Kangtai* sank.

KANJO MARU

Chosen Yusen K.K.; 1918; *Ishikawajima S.B. Co.*; 2,197 tons;

268x40-7x23-5; 169 n.h.p.; triple-expansion engines. The steamship *Kanjo (Kanzyo) Maru* struck a mine and sank on January 12th, 1944, off Kaohsiung, Formosa.

KANJU MARU

Osaka Syosen K.K.; 1926; *Mitsubishi Zosen Kaisha*; 7,267 tons; 430x56x36; 1,164 n.h.p.; oil engines. The transport *Kanju (Kanzyu) Mam* was bombed and sunk by U.S. carrier-based aircraft on January 12th, 1945, 15 miles E. of Gocong, Vietnam.

KANKO MARU

Osaka Syosen K.K.; 1938; *Uraga Dock Co.*; 2,929 tons; 297-9 X 45x23-8; 255 n.h.p.; compound engines & L.P. turbine. The steamship *Kanko Maru* was taken over by the Japanese Navy and converted into an auxiliary gunboat. On January 10th, 1942, she was torpedoed and sunk by the U.S. submarine *Pickrel*, W. of Mindanao Island, Philippines.

KANKO MARU

Chosen Yusen K.K.; 1917; *Ishikawajima S.B. & E. Co.*; 1,288 tons; 230 x 33x19-6; 88 n.h.p.; triple-expansion engines.

The steamship *Kanko Maru* was torpedoed and sunk by the U.S. submarine *Wahoo* on October 6th, 1943, off the east coast of Korea.

KANKO MARU

KANKO MARU

Iino Risen K.K.; 1903; *Furness, Withy & Co.*; 2,995 tons; 324-7x47x22-3; 301 n.h.p.; triple-expansion engines. The steamship *Kanko Maru* was torpedoed and sunk by the U.S. submarine *Wahoo* on October 9th, 1943, off the east coast of Korea.

KANNIK

Brodrene Olsen; 1894; *A. Stephen & Sons*; 2,397 tons; 300 x 42x20-4; 211 n.h.p.; triple-expansion engines. The Norwegian cargo ship *Kannik* was torpedoed and sunk by a German submarine in the English Channel on March 23rd, 1916.

KANO

Elder, Dempster & Co.; 1901; *Caledon S.B. & E. Co.*; 1,452 tons; 220 x36-2x13-2; 114 n.h.p.; compound engines. The British cargo ship *Kano* was wrecked on July 28th, 1907, on Lagos bar while trading on the West African coast with a general cargo.

KANO MARU

Rokusai Risen R.R.; 1934; *Uraga Dock Co.*; 8,572 tons; 453-5x60-7x30-8; 2,187 n.h.p.; oilengines. The motor vessel *Kano Maru* was sunk by bombs from U.S. aircraft and gunfire from warships on August 8th, 1942, off the Aleutian Islands.

KANO MARU

Toho Suisan R.R.; 1917; *Harima Co.*; 1,275 tons; 228x33x 18-7; 38 n.h.p.; triple-expansion engines. The Japanese ship *Kano Maru* went ashore during a fog on April 17th, 1945, off the north end of Awo Island, while on a voyage from Muroran to Fushiki.

KANO MARU No. 3

Kano Risen R.R.; 1918; 1,708 tons, 250x37-7x20-5. On a voyage from Daitozima to Tokyo the *Kano Maru No. 3* sank during a typhoon on August 5th, 1941, 20 miles E. of Tokunosima.

KANOWNA

Australasian United S.N. Co.; 1903; *W. Denny & Bros.*; 6,983 tons; 415-6x52-2x28-6; 770 n.h.p.; quadruple-expansion engines. The Australasian steamship *Kanowna* struck a rock at Wilson's Promontory and sank on February 18th, 1929. She was carrying passengers on a voyage from Sydney to Melbourne.

KANSAI MARU

Hatada Risen R.R.; 1930; *Yokohama Dock Co.*; 8,614 tons; 461-7x61-5x39-7; 2,350 n.h.p.; oilengines. The motor vessel *Kansai Maru* was torpedoed and sunk by the U.S. submarine *Scamp* on September 18th, 1943, 150 miles N. of Manus Island, Admiralty Islands.

KANSAN

American-Hawaiian S.S. Co.; 1903; *New York S.B. Co.*; 7,913 tons; 490x58-3x31-8; 997 n.h.p.; triple-expansion engines. The American steamship *Kansan* was torpedoed and sunk by a German submarine in the Bay of Biscay on July 10th, 1917.

KANSEISHI MARU

Dairen Risen R.R.; 1929; *Osaka Iron Works*; 4,804 tons; 371 x51x 29; 346 n.h.p.; triple-expansion engines. The steamship *Kanseishi (Kanseisi) Maru* was torpedoed and sunk by the U.S. submarine *Swordfish* on June 15th, 1944, about 150 miles N. of the Bonin Islands.

KANTO MARU

Harada Risen R.R.; 1930; *Yokohama Dock Co.*; 8,606 tons; 461-7x61-5x39-7; 2,350 n.h.p.; oilengines. The aircraft transporter *Ranto Maru* was torpedoed and sunk by the U.S. submarine *Saury* on September 11th, 1942, in the Strait of Macassar.

KANZAKI MARU

Okubo Risen R.R.; 1918; *Matsuda Co.*; 1,285 tons; 221x 32-7x20-5; 97 n.h.p.; triple-expansion engines. The *Kanzaki Maru* sank on June 15th, 1944, in 36° VN., 129° 41' E.

KANZLER

Dada Mia Khandwani; 1892; *Blohm & Voss*; 3,136 tons; 321 X 39-2x27-7; 280 n.h.p.; triple-expansion engines. The Indian cargo ship *Ranzler* was wrecked on Malcolm Reef, Maldives Islands, on August 14th, 1914, while on a voyage from Karachi to Mauritius carrying a general cargo.

KAPARIKA

C. Wildhagen; 1894; *J. J. Thompson & Sons*; 1,232 tons; 235x34-1x14-7; 146 n.h.p.; triple-expansion engines. The Norwegian cargo ship *Kaparika* was torpedoed and sunk by a German submarine in the North Sea on May 6th, 1917.

KAPETAN STRATIS

D. Coumbis, X. Xenios Partners; 1906; *R. Craggs & Sons*; 3,574 tons; 346-5x50-6x23-1; 340 n.h.p.; triple-expansion engines.

The Greek steamship *Kapetan Stratis* was bombed and sunk by German aircraft on January 22nd, 1941, off the west coast of Ireland, with the loss of all on board.

KAPITAN DIEDRICHSEN

German Navy; 1943; 6,406 tons; oil engines. The motor vessel *Kapitän Diedrichsen* was formerly the Italian *Sebastiano Venier* taken over by the Germans for use as a minelayer. On February 29th, 1944, she was sunk by a Free French warship in the North Adriatic.

KAPONGA

Union S.S. Co. of New Zealand; 1925; *W. Gray & Co.*; 2,346 tons; 280x44-3x18-9; 274 n.h.p.; triple-expansion engines. The British cargo ship *Raponga* was wrecked on Greymouth Bar, New Zealand, on May 27th, 1932. She was on a voyage from Greymouth to Auckland carrying a cargo of coal.

KAPUNDA

Trinder, Anderson & Co.; 1875; *A. McMillan & Son*; 1,095 tons; 221-5x34-6x19-6.

The sailing ship *Kapunda* was chartered by the Crown Agents to carry emigrants to Western Australia, a task which she carried on for four years prior to her loss. On December 18th, 1886, she left Plymouth for Fremantle with more than 270 passengers and a crew of 41 under command of Capt. John Masson. On January 20th, 1887, the vessel was in a position south of Maceio, Brazil, when she was sunk in a collision with the barque *Ada Melmore*, 591 tons, of Belfast. The night was fine and clear when the barque, carrying no port or starboard lights, came in sight of the emigrant ship. There was a certain amount of hesitation and then the *Ada Melmore* altered course and in a few moments drove into the starboard side of the *Kapunda* in way of the fore rigging, and nearly cut her in two. The time of the collision was 3.25 a.m., all the emigrants being asleep below, and within five minutes the *Kapunda* had foundered.

Some of the crew and seven emigrants jumped on to the *Ada Melmore*, which lowered one boat and picked up Mr. William Cottrell, the first officer, and also rescued five persons from one of *Kapunda's* boats. Sixteen of these survivors were transferred on January 25th to the French barque *Ulysse* which landed them at Bahia. The total number drowned was 303, including Capt. Masson.

See also *Ada Melmore*.

KARA

F. C. Strick & Co.; 1919; *W. Gray & Co.*; 2,479 tons; 303X 43x20-9; 266 n.h.p.; triple-expansion engines. The British cargo ship *Kara* was wrecked at Cape Quintres, 11 miles west of Santana, on March 22nd, 1920. She was on a voyage in ballast from Heysham to Bilbao.

KARANJA

British India Steam Navigation Co.; 1931; A. Stephen & Sons; 9,891 tons; 471-3x64-2x29-4; 1,746n.h.p.; 18 knots; turbine engines.

The liner *Karanja* was taken over by the British Admiralty during the Second World War for service as a transport. The vessel was bombed and sunk by enemy aircraft off Bougie, Algeria, on November 12th, 1942.

KARAWEERA

Adelaide S.S. Co.; 1882; Hodgson & Soulsby; 1,613 tons; 250x35-1x17-6; 187 n.h.p.; compound engines.

The Australian cargo ship *Karaweera* was wrecked on July 7th, 1902, in the Fitzroy River, Queensland. She was carrying coal and produce from Brisbane to Rockhampton.

KAREN

W. Gilbert; 1905; Fevigs Jernskibsbyg; 1,689 tons; 269-6x39x10-6; 207n.h.p.; triple-expansion engines.

The Norwegian cargo ship *Karen* struck a mine and sank in the Mediterranean on December 12th, 1917.

KAREN ROGENCES

N. Rogences; 1916; N.V. Boeles Schip. & Mch.; 2,332 tons; 294x44-2x19-7; 225 n.h.p.; triple-expansion engines. Carrying corn from Montreal to Skien the Norwegian ship *Karen Rogences* went ashore on October 1st, 1921, on Point Ferrole, Strait of Belle Isle.

KARHULA

Finska Fiskeri A/B (A/B R. Nordstrom & Co.); 1909; Flensburger Schiffsb. Ges.; 2,214 tons; 305-2x42-4x19-2; triple-expansion engines.

The Finnish ship *Karhula* sprang a leak, broke in two and sank on February 12th, 1950, about 20 miles W. of Den Helder. Eighteen of the crew were saved, but 11 were lost.

KARI

German Government; 1920; C. Hill & Sons; 1,925 tons; 270 X42-2x17-8; 156 n.h.p.; triple-expansion engines. The steamship *Kari* was a former Norwegian ship seized by the French and later taken over by the Germans. On October 16th, 1943, she was torpedoed and sunk by a British submarine soon after leaving Piraeus with about 1,500 German troops on board.

KARIBA

Unison Steamship Co.; 1904; J. L. Thompson & Sons; 3,697 tons; 346-5x50-8x22-9; 332n.h.p.; 11 knots; triple-expansion engines.

The steamship *Kariba* was torpedoed and sunk by a German submarine 260 miles W.N.W. of Ushant on April 13th, 1917. The starboard lifeboat was smashed by the explosion but two boats got away, one of which, containing ten men, was picked up after having been 12 days adrift. The other boat was also picked up. The number killed or dead from exposure was 13. The captain was among the survivors.

KARIN

German Government; 1931; Koninklijke Maats. De Schelde; 7,322 tons; 449-9x60-8x30-7; 1,245 n.h.p.; oilengines. The motorship *Karin* was formerly the Dutch *Kota Nopan*, captured by the German raider *Komet* on August 17th, 1941, off the Galapagos Islands, and taken to St. Nazaire. On March 10th, 1943, she was intercepted by U.S. warships about 400 miles W.N.W. of Ascension Island and a prize crew put on board. Soon afterwards the ship was sunk by explosive charges laid by the Germans. Eight of the boarding party and an unspecified number of Germans were killed.

KARINA

African S.S. Co.; 1905; A. Stephen & Sons; 4,222 tons; 370x46-2x23-3; 422 n.h.p.; 10-5 knots; triple-expansion engines. The steamship *Karina* was torpedoed and sunk by a German submarine 17 miles S.S.W. 1 W. of Hook Point, Co. Waterford, on August 1st, 1917. Eleven men were killed* The captain was among the survivors.

KARLSRUHE

German Navy, light cruiser; 1912; Krupp; 4,320 tons; 456 X45x17; 25,500 i.h.p.; 27-25 knots; turbine engines; Schulz-Thornycroft boilers; twelve 4-1 in. guns, 2 T.T. In July, 1914, the German light cruiser *Karlsruhe* arrived in American waters to relieve the *Dresden*. Capt. Erich Kohler of the latter ship transferred to the *Karlsruhe* and on July 26th, she sailed for Havana. The vessel had a complement of 372 officers and men. On her arrival at Havana she received news of the imminence of war and four days later she put to sea, steering westwards but later heading for the Bahamas.

On reaching Plana Cays Capt. Kohler got into wireless touch with the North German Lloyd liner *Kronprinz Wilhelm*, his orders being to equip that ship with whatever guns he could spare in order that she might become a commerce raider. The rendezvous was 120 miles N.E. of Watling Island and the date August 6th. The work of arming the liner had not been proceeding long when both ships were surprised by the arrival of H.M.S. *Suffolk*, at that time flagship of Rear-Admiral Sir C. Cradock. The *Karlsruhe* hastily cast off from the liner, having transferred two 3 • 4 in. guns and some machine guns to her, but lacking time to provide much ammunition for them.

The *Karlsruhe* immediately made off, hotly pursued by *Suffolk* which failed to bring the German within range. About 400 miles away the light cruiser *Bristol* was ordered by wireless from *Suffolk* to attempt to cut off the *Karlsruhe* and she was successful in establishing contact at 8.15 on the same evening. It was brilliant moonlight and both ships could see each other clearly. There was sharp exchange of gunfire but at the critical moment *Bristol's* condensers began to give trouble, reducing her speed to 18 knots, and the *Karlsruhe* was able to get away.

The German ship's coal was now nearly exhausted, there being just sufficient to reach San Juan, Puerto Rico. Only a few hundred tons was procurable and with this on board the *Karlsruhe* put to sea once more. By great good fortune the ship had managed to elude *Suffolk* on going to Puerto Rico, and to do the same on sailing to Curacao, Dutch West Indies. Here coal was plentiful and the ship cleared after 24 hours with full bunkers, she also chartered the German steamship *Stadt Schleswig* to meet her with further supplies of coal on the north coast of Brazil. German agents in South America also provided colliers at frequent intervals so that by careful organisation the *Karlsruhe* was kept at sea for two and a half months, during which time she captured the following 16 British ships and one Dutchman on British charter: *Bowes Castle*, *Strathroy*, *Maple Branch*, *Highland Hope*, *Indrani*, *Maria* (Dutch), *Cornish City*, *Rio Iguassu*, *Farn*, *Nicoto de Larrinaga*, *Lynrowan*, *Cervantes*, *Pruth*, *Condor*, *Glanton*, *Hurstdale Vandyck*. Of these she sank 14 and retained the other three as tenders. The total tonnage destroyed was 76,000 and the estimated value £1,500,000, including cargo.

No fewer than 41 allied warships were occupied in the task of searching for the raider and the two armed merchantmen, *Kronprinz Wilhelm* and *Prinz Eitel Friedrich*.

On November 4th, 1914, the *Karlsruhe* when some 350 miles E. of Trinidad blew up with the loss of 261 officers and men, including Capt. Kohler. The ship was broken in two by the violence of the explosion and the survivors, 146 officers and men, were picked up by the two captured merchantmen which were cruising in company.

KARLSRUHE

German Navy, cruiser; 1927; Deutsche Werke; 6,000 tons; 570x49-7x17-7; 65,000 i.h.p.; 32 knots; turbine engines; Schulz-Thornycroft boilers; nine 5-9 in. guns, six 3-5 in., 12 m.g., 12 T.T., 2 aircraft.

The light cruiser *Karlsruhe* was engaged in operations connected with the German invasion of Norway in April 1940. Her active participation in hostilities was very brief, for soon after reaching the Norwegian coast, when she was bombarding Horten Fort, near Christiansand, she was torpedoed and sunk by the British submarine *Traunt*, Lt. Cdr. C. H. Hutchinson. The attack took place on April 9th, the German cruiser having a screen of three destroyers which the submarine eluded. Three hits were scored on the *Karlsruhe* and the ship sank in full view of hundreds of persons gathered along the shore. Of her complement of 571 most were taken off before she sank.

KARMOY

KARMOY

John K. Haaland & Co. A/S; 1921; Forth S. & E. Co.; 2,498 tons; 295-7x43-6x20-6; 182 n.h.p.; triple-expansion engines. The Norwegian steamship *Karmoy*, under German control, was sunk by British carrier-based aircraft on October 28th, 1944, at Lodingen, Norway. Six of her crew were killed.

KARMT

Skibs A/S Corona; 1938; Blythwood S.B. Co.; 4,991 tons; 417-6x56-1x24-7; 387n.h.p.; oilengines. The Norwegian ship *Karmt* was torpedoed and sunk by a German submarine on April 18th, 1945, near Dover.

KARNAK

Messageries Maritimes; 1898; Messageries Maritimes; 6,816 tons; 446-2x50-9x36-1; 832 n.h.p.; triple-expansion engines. The French steamship *Karnak* was torpedoed and sunk by a submarine in the Mediterranean on November 27th, 1916.

KARONGA

Ellerman & Bucknall S.S. Co.; 1907; Armstrong Whitworth & Co.; 4,665 tons; 400x52-1x27; 477 n.h.p.; 10 knots; triple-expansion engines. The steamship *Karonga* was torpedoed and sunk by a German submarine in the Straits of Messina on April 29th, 1917. Eighteen men were killed. The captain was taken prisoner.

KARPFANGER

Hanseatische Reederei Emit Offen & Co.; 1922; Deutsche Werke A.G.; 4,974 tons; 407-6x54-4x24-8; turbine engines. The German steamship *Karpfanger* was bombed and sunk by British aircraft on September 17th, 1942, off Egersund, Norway.

KARRAKATTA

C. Bethell & Co.; 1897; J. Scott & Co.; 2,091 tons; 300X 42-2x17-6; 251 n.h.p.; triple-expansion engines. The British steamship *Karrakatta* was wrecked on March 26th, 1901, in 16° 19' S., 123° 02' E., while on a voyage from Fremantle, via Derby (Western Australia) to Singapore. She was carrying passengers and a general cargo.

KARUKAYA

Japanese Navy, destroyer; 1923; Fujinagata; 820 tons; 275 x 26-5x8-2; 21,500 s.h.p.; 31-5 knots; turbine engines; Kanpon boilers; three 4 • 7 in. guns, 2 m.g., 4 T.T. The destroyer *Karukaya* was torpedoed and sunk off Manila Bay, Philippine Islands, by the U.S. submarine *Cod* on May 10th, 1944. The destroyer's normal complement was 110.

KASADO MARU

Shimatani Kisen K.K.; 1922; Kassado Shima Sentyo K.K.; 1,422 tons; 225x33-9x20; 121 n.h.p.; triple-expansion engines. The *Kasado Mam* went ashore on December 31st, 1935, at Oshima off Tsugaru Strait.

KASADO MARU

Nippon Suisan K.K.; 1900; Wigham Richardson & Co.; 6,003 tons; 400-5x50-4x19; triple-expansion engines. The *Kasado Mam* was bombed and sunk by Russian aircraft on August 8th, 1945, off the Northern Kurile Islands.

KASAGI

Japanese Navy, protected cruiser; 1898; W. Cramp & Sons; 4,760 tons; 396x48x24-5; 15,000 h.p.; 22-5 knots; triple-expansion engines; 8 cylindrical boilers; two 8 in. guns, ten 4-7 in., twelve 12 pdr., six 2½ pdr., 4 T.T. The Japanese protected cruiser *Kasagi* was wrecked in the Tsugaru Straits in July, 1916. The normal complement of the ship was 405.

KASAGI MARU

Nippon Yusen K.K.; 1928; Yokohama Dock Co.; 3,140 tons; 325-7x46x27; 284 n.h.p.; triple-expansion engines. The steamship *Kasagi Maru* was taken over by the Japanese Navy for service as a salvage and repair vessel. On January 27th, 1944, she was torpedoed and sunk by the U.S. submarine *Swordfish* about 150 miles S. of Yokohama.

KASAGISAN MARU

Mitsui Bussan Kaisha; 1925; Mitsui Bussan Kaisha; 2,427 tons; 284-5x42x23-3; 181 n.h.p.; triple-expansion engines. The steamship *Kasagisan Maru* was sunk by a U.S. carrier-based aircraft on November 25th, 1944, in Lingayen Bay, Philippines.

KASHH

Japanese Navy, training cruiser; 1940; Mitsubishi; 5,800 tons; 425 x 52 X18; 8,000 s.h.p.; 18 knots; turbine engines; Kanpon boilers; four 5-5 in. guns, two 5 in. A.A., several 47 mm., 8 T.T. In January, 1945, a fast carrier squadron belonging to the U.S. Third Fleet made a sortie into the South China Sea in support of the army landings in the Lingayen Gulf. On the 12th, aircraft of this squadron located the Japanese training cruiser *Kashii* off the coast of Indo-China between Saigon and Camranh Bay. The cruiser, which was performing the duties of an escort vessel, was attacked and sunk.

KASHII MARU

KokusaiKisen K.K.; 1936; Harima S.B. & Eng. Co.; 8,407 tons; 453-1x60-7x30-8; 1,875n.h.p.; oilengines. The motor vessel *Kashii (Kasii) Maru* was bombed and sunk by U.S. land-based aircraft on November 10th, 1944, off the west coast of Cebu Island, Philippines.

KASHIMA MARU

Kabafuto K.K.; 1887; W. Gray & Co.; 2,351 tons; 282-3X37-6x19-5; 219n.h.p.; triple-expansion engines. The *Kashima Maru* was wrecked on January 1st, 1929, near Muroran, while on a voyage from Yokohama to Muroran.

KASHIMA MARU

Nippon Yusen K.K.; 1913; Kawasaki Dockyard Co.; 9,908 tons; 489-8x60-7x36-4; 1,152n.h.p.; triple-expansion engines. The transport *Kashima (Kasima) Maru* was torpedoed and sunk by the U.S. submarine *Bonefish* on September 27th, 1943, about 200 miles E. of Saigon.

KASHIMA MARU

Tochigi Kisen K.K.; 2,211 tons. The *Kashima Maru* struck a mine and sank on August 14th, 1945, off Pusan, Korea.

KASHIMASAN MARU

Mitsui Sempaku K.K.; 2,825 tons. The steamship *Kashimasan Maru* was torpedoed and sunk by the U.S. submarine *Pintado* on June 6th, 1944, about 200 miles W. of the Ladrone Islands.

KASHIN MARU

Okazaki Kisen K.K.; 1885; G. Howaldt; 1,098 tons; 220-5 x 29-7x21; 85n.h.p.; compound engines. The *Kashin Maru* was disabled by ice, struck a wreck and sank on February 22nd, 1928, at Daidoku, Korea.

KASHIN MARU

Hokkaido Tanko Kisen K.K.; 1920; Mitsui Bussan Kaisha; 2,428 tons; 284-5x42-5x21; 272n.h.p.; triple-expansion engines. Carrying coal from Hokkaido to Yokohama the *Kashin Maru* is supposed to have foundered on March 10th, 1928, off Cape Inuboye, as she was not seen again.

KASHINO

Japanese Government; 4,000 tons (approx.). The supply ship *Kashino* was torpedoed and sunk by a U.S. submarine on September 4th, 1942, off Keelung, Formosa.

KASHMIR

British Navy, destroyer; 1939; Thornycroft & Co.; 1,690 tons; 348x35x9; 40,000 s.h.p.; 36 knots; turbine engines; 3-drum boilers; six 4-7 in. guns, 6 smaller, 10 T.T. The destroyer *Kashmir*, Cdr. H. A. King, was a unit of Admiral King's force which set out to intercept an Italian convoy proceeding from Greece to Crete on May 22nd, 1941. The duty assigned to *Kashmir* and her sister ship *Kelly* after the day's fighting had

destroyed most of the convoy, was to bombard positions seized on the island of Crete by German parachute troops. The following morning just after daylight they sighted two caiques carrying men and munitions to the enemy. Both these vessels were sunk, thus completing the destruction of the whole convoy, but in doing so the two British destroyers attracted the attention of German dive bombers which scored a hit on *Kashmir* with a 1,000lb. bomb, sinking her in two minutes. *Kelly* was sunk sometime later.

Nine officers and 150 ratings of *Kashmir's* complement were picked up later in the day by the destroyer *Kipling*. One officer and 78 ratings were killed.

For fuller details see *Fiji*.

KASHU MARU

FukuyoKisenK.K.; 1919; *Asano S.B. Co.*; 5,460 tons; 400X 53-2x29-4; 513 n.h.p.; triple-expansion engines. The steamship *Kashu (Kasyu) Mam* was torpedoed and sunk by the U.S. submarine *Guardfish* on October 8th, 1943, 125 miles N. of Manus Island, Admiralty Islands.

KASII MARU

Nippon Seitetu K.K.; 1929; *Kobe Steel Works*; 3,218 tons; 320x46-5x25; 241 n.h.p.; triple-expansion engines. The *Kasii Maru* was involved in a collision and sank on February 28th, 1942, in 34° 30' N., 135° 56' E.

KASONGO

Cie. Maritime Beige (Lloyd Royal); 1918; *A. Stephen & Sons*; 5,254 tons; 400-1x52-3x28-5; 369n.h.p.; triple-expansion engines.

The Belgian steamship *Kasongo* was torpedoed and sunk by a German submarine on February 26th, 1941, on a voyage from Liverpool to Freetown. Six of the crew were killed.

KASTOR

George D.Gratsos Co.; 1921; *F.Schichau*; 5,497 tons; 398-7X 55-9x29-1; 390n.h.p.; triple-expansion engines. The Greek ship *Kastor* was torpedoed and sunk by a German submarine in lat. 11° 6' N., long. 59° 5' W., on August 1st, 1942, on a voyage from Table Bay to Trinidad.

KASUGA

Japanese Navy, coastal defence ship; 1902; *Ansaldo*; 7,080 tons; 357x61-9x25-2; 13,500 i.h.p.; 20 knots; triple-expansion engines; *Kanpon boilers*; one 10 in. gun, two 8 in., four 6 in., five 3 in., 2m.g., 4T.T.

The coast defence ship *Kasuga* was originally one of the famous armoured cruisers of Admiral Togo's fleet during the Russo-Japanese War, 1904-05. The vessel, with her sister-ship, the *Nisshin*, was built in Italy for the Argentine Republic. Before the ships were finished and only a few months prior to the outbreak of the war with Russia, they were both purchased by Japan and navigated to that country by volunteer crews of British naval reservists.

In 1945 the *Kasuga* was still afloat and employed in coastal duties. In the last phase of the American air assault upon the Japanese mainland in the early months of 1945 she was repeatedly hit by bombs, and on July 18th sustained a succession of hits from U.S. carrier-borne aircraft which caused her to capsize in Yokosuka harbour.

KASUGA MARU

NaigaiKisenK.K.; 1936; *Osaka Ironworks*; 3,967 tons; 351x 50x26-6; 296 n.h.p.; triple-expansion engines & L.P. turbine. The steamship *Kasuga Maru* was torpedoed and sunk by a Dutch submarine on March 13th, 1943, off Karathuri, Burma.

KASUGA MARU

ShimatamiKisenK.K.; 1916; *S.Ono*; 1,377 tons; 225X33-9X 20; triple-expansion engines. The steamship *Kasuga Maru* was torpedoed and sunk by the U.S. submarine *Flying Fish* on April 24th, 1943, in the Tsugaru Strait.

KASUMI

Japanese Navy, destroyer; 1937; *Uraga Dock Co.*; 1,500 tons; 356x33-3x9; 39,000 s.h.p.; 34 knots; turbine engines; *Kanpon boilers*; six 5 in. guns, 2 m.g.; 8 T.T.

The destroyer *Kasumi* was one of four such vessels sunk by carrier-borne aircraft of the U.S. Fifth Fleet S.W. of Kyushu on April 7th, 1945.

The *Kasumi* carried a normal complement of 190.

For full story of the battle see the battleship *Yamato* also the destroyer *Asashimo*.

KASUMI MARU

Japanese Government; 1,400 tons. The steamship *Kasumi Maru* struck a mine and sank on May 12th, 1944, off Penang.

KASUMI MARU

1913; *MackayBros.*; 1,274 tons; 241x36x16-7; triple-expansion engines.

The steamship *Kasumi Maru* was formerly the British salvage vessel *Kathleen Moller*, seized by the Japanese at Hong Kong in December, 1941. On June 1st, 1945, she struck a mine and sank off Shimonoseki.

KATE

N. D. Lykiardopulo; 1918; *Harland & Wolff*; 5,197 tons; 400-6x52-3x28-5; 517 n.h.p.; triple-expansion engines. The Greek steamship *Kate* struck a mine and sank on January 28th, 1941, outside Thessaloniki.

KATE

Rud. Christ. Gribel; 1922; *Stettiner Oderwerke*; 1,599 tons; 230-9x36-4x14-6; 105 n.h.p.; triple-expansion engines. The German steamship *Kate* was torpedoed and sunk by a Russian submarine on July 30th, 1942, W. of the Gulf of Riga.

KATE GRAMMERSTORF

KarlGrammerstorf; 1915; *Rickmers Werft*; 5,088 tons; 401-1x 53-2x27-5; 514 n.h.p.; triple-expansion engines.

The German steamship *Kate Grammerstorf* struck a mine and sank on May 22nd, 1941, 12 miles S. of Heligoland.

KATE THOMAS

Evan Thomas, Radcliffe & Co.; 1883; *Palmers'Co.*; 1,431 tons; 260 X 36-3x16-3; 168 n.h.p.; compound engines. The British cargo ship *Kate Thomas* was wrecked near Ceuta, Morocco, on October 21st, 1895, while on a voyage from Cardiff to Brindisi carrying a cargo of coal.

KATE THOMAS

W.Thomas, Sons & Co.; 1885; *W. Doxford & Sons*; 1,748 tons; 258x39-5x23-1.

The four masted barque *Kate Thomas* left Antwerp for Port Talbot, in ballast, in tow of the Belgian tug *John Bull* on Friday, April 1st, 1910. The barque, under command of Capt. Williams, carried 20 persons, including the captain's wife and the wife of Mr. Roberts, the first officer, the seamen being mostly Belgians as it was intended to complete the crew at Port Talbot. At about 4 a.m. on April 4th, between the Longships and Pendeen lighthouses, off Land's End, the *Kate Thomas* was run into by the Penzance steamship *India*, 364 tons, Capt. T. F. Mitchell, and struck on the starboard side. The night was dark but clear and the lights of the three vessels were plainly visible. The barque gradually heeled over to starboard, the tug standing by and lowering her boats, but the *India* continued on her course. After about ten minutes the *Kate Thomas* sank, taking with her everyone of her company save John Nelson, an apprentice, who swam to the tug.

KATERINA

Soc. Anon. Hellenique Maritime Transpetrol; 1887; *Barclay, Curie & Co.*; 2,398 tons; 286-9x43-5x24-1; 384 n.h.p.; oil engines.

The Greek tanker *Katerina* was bombed and sunk by German aircraft on April 23rd, 1941, near Piraeus, during the invasion of Greece.

KATHA

KATHA

British & Burmese Steam Nav. Co.; 1938; W. Denny & Bros.; 4,357 tons; 409-2x55-2x24-9; 283 n.h.p.; 9-5 knots; triple-expansion engines.

The steamship *Katha* Capt. S. Thomson, in convoy some distance off the coast of Portugal, was torpedoed and sunk by a German submarine on April 2nd, 1943. Six men were killed and four wounded. Capt. Thomson was among the survivors.

KATHARINA DOROTHEA FRITZEN

Johs. Fritzen & Sohn vorm W. Kunstmann; 1916; W. Doxford & Sons; 7,843 tons; 459x58-1x33-2; 593 n.h.p.; triple-expansion engines.

The German steamship *Katharina Dorothea Fritzen* struck a mine and sank on June 4th, 1942, near Langeoog.

KATHE O.

German Government; 1903; Caledon S.B. & E. Co.; 1,905 tons; 279-2x41x18-1; 191 n.h.p.; triple-expansion engines. The steamship *Kathe O.* was formerly the Latvian *Ausma*, seized by the Germans. On July 13th, 1942, she struck a mine and sank off Sassiniz.

KATHOLM

L. H. Carl; 1904; Chantiers Navals Anversois; 1,324 tons; 229-8X35-6X14-6; 132 n.h.p.; triple-expansion engines. The Danish steamship *Katholm* was sunk by a submarine in the Mediterranean on July 30th, 1916.

KATINA

Pandelis Lemos & Panagiotis Lemos; 1891; W. Pickersgill & Sons; 2,464 tons; 292-1x39-3x19-7; 215 n.h.p.; triple-expansion engines.

The Greek steamship *Katina* was sunk by a German submarine off Ushant on March 28th, 1917.

KATINA BULGARI

N. Th. Bulgari; 1912; Richardson, Duck & Co.; 4,569 tons; 390X52-5X25-6; 409 n.h.p.; triple-expansion engines. Carrying coal from Hull to Buenos Aires the *Katina Bulgari* was in collision with the *Meanticut* five miles S. of the Humber lightship and sank on February 8th, 1939.

KATINA P.

G. J. Papayannakis; 1900; Mackie & Thomson; 1,216 tons; 228x34-5x14-4; 135 n.h.p.; triple-expansion engines. The Greek steamship *Katina P.* was bombed and sunk by German aircraft on May 7th, 1941, during the invasion of Greece.

KATONG

Straits S.S. Co.; 1915; Hong Kong & Whampoa Dock Co.; 1,461 tons; 250x38-1x15-8; 212 n.h.p.; triple-expansion engines.

The British steamship *Katong*, on a voyage from Singapore to Palembang, was attacked by Japanese aircraft and sunk by cannon fire on February 2nd, 1942, in the Banka Strait. Only the captain, the chief officer and three engineers survived.

KATORI

Japanese Navy, training cruiser; 1939; Mitsubishi; 5,800 tons; 425x52x18; 8,000 s.h.p.; 18 knots; turbine engines; Kanpon boilers; four 5-5 in. guns, two 5 in.A.A., several smaller, 8 T.T. The training cruiser *Katori* was engaged in the defence of the island of Truk, in the Carolines Group when a U.S. force under Vice-Admiral R. A. Spruance delivered an attack on it in mid-February, 1944. The *Katori* was damaged by carrier-borne aircraft on the 17th, and later in the day was sunk by the gunfire of a U.S. cruiser squadron. • For full details see the cruiser *Agano*.

KATORI MARU

Nippon Yusen K.K.; 1913; Mitsubishi Dockyard & E. Works; 9,849 tons; 489-8x60-7x36-4; triple-expansion engines & L.P. turbine.

The steamship *Katori Mam* was torpedoed and sunk by a Dutch submarine on December 23rd, 1941, off Kuching, Sarawak.

KATORI MARU

Hinode Kisen K.K.; 1938; Tsurumi Seitetsu Zosen K.K.; 1,920 tons; 270x40x20-3; 266 n.h.p.; triple-expansion engines.

The steamship *Katori Maru* was torpedoed and sunk by the U.S. submarine *Growler* on June 29th, 1944, about 50 miles N. of Luzon Island, Philippines.

KATORI MARU

Tochigi Kisen K.K.; 2,218 tons.

The *Katori Maru* struck a mine and sank on July 22nd, 1945, off Ebisu, Japan.

KATSUKAWA MARU

Kawasaki Kisen K.K.; 6,886 tons.

The steamship *Katsukawa Maru* was torpedoed and sunk by the U.S. submarine *Shark* on June 4th, 1944, about 300 miles W. of the Ladrone Islands.

KATSURA MARU

Marutatsu Kaiun K.K.; 1937; Urabe Zosen Tekkoshu; 1,368 tons; 228 x34x 19; 118 n.h.p.; triple-expansion engines. The steamship *Katsura (Katura) Maru* was taken over by the Japanese Navy and converted into an auxiliary gunboat. On September 19th, 1943, she was torpedoed and sunk by the U.S. submarine *S-28 W.* of Onokotan in the Kurile Islands.

KATSURAGI MARU

Kokusai Kisen K.K.; 1931; Uraga Dock Co.; 8,033 tons;

443-6x59-7x40-1; 814 n.h.p.; oilengines. The aircraft transporter *Katsuragi (Katuragi) Maru* was torpedoed and sunk by the U.S. submarine *Sturgeon* on October 1st, 1942, S. of Rabaul.

KATSURAGISAN MARU

Mitsui Bussan Kaisha; 1925; Mitsui Bussan K.K.; 2,427 tons;

284-5x42x23-2; 181 n.h.p.; triple-expansion engines. The steamship *Katsuragisan (Katuragisan) Maru* struck a mine and sank on January 7th, 1944, off Truk Island, Caroline Islands.

KATUURA MARU

Toa Kaiun K.K.; 1916; Mitsubishi Dkyd. & E. Wks.; 1,725

tons; 250x37-7x20-5; 168 n.h.p.; triple-expansion engines.

The *Katuura Maru* sank on February 2nd, 1945, in 25° 37' N., 119° 4rE.

KATWIJK

Erhardt & Dekkers; 1903; Scheepswerf Jan Smit, Czn.; 2,040

tons; 281-1x41x20-3; 220 n.h.p.; triple-expansion engines.

The Dutch steamship *Katwijk* was torpedoed and sunk by a German submarine in the North Sea on April 14th, 1915.

KATY

Gordon S.S. Co.; 1883; J. L. Thompson & Sons; 2,061 tons;

272 X 38-8x19-9; 224 n.h.p.; compound engines. The British

collier *Katy* on a voyage from the Tyne to Hamburg encountered heavy weather. Her hatch covers were swept off and the vessel filled and sank on December 7th, 1909, off Terschelling.

KAUNAS

AjB Lietnros Baltijas Lloydas; 1931; Porsgrund Mek. Verksted;

1,566 tons; 246-6x37-9x18-2; 66 n.h.p.; compound engines. The

Lithuanian steamship *Kaunas* struck a mine and sank on November 17th, 1939, about six and a half miles W.N.W. of the Noord Hinder Light.

KAVAK

Moss, Hutchison Line; 1929; A. Macmillan & Son; 2,782 tons;

333-1x47-2x19-5; 418 n.h.p.; 11 knots; triple-expansion

engines.

The steamship *Kavak*, Capt. J. Napier, in convoy in the North Atlantic was torpedoed and sunk by a German submarine on December 2nd, 1940. Capt. Napier and 24 of the crew were killed.

KAWACHI

Japanese Navy, dreadnought battleship; 1910; Kure Dockyard; 21,420 tons; 526x84x28-25; 25,000 i.h.p.; 20 knots; triple-expansion engines; Miyabara boilers; twelve 12 in. guns, ten 6 in., eight 4•7 in., twelve 14pdr., 4 m.g., 5 T.T. The battleship *Kawachi* was blown up by internal explosion on July 12th, 1918, while lying in Tokuyama Bay and sank within four minutes. More than 500 lives were lost. The survivors totalled 25 officers, 12 warrant officers and over 300 ratings. The ship sank in seven fathoms.

KAWAKAZE

Japanese Navy, destroyer; 1936; Fujinagata; 1,368 tons; 337-7x32-5x8-7; 37,000 s.h.p.; 34 knots; turbine engines; Kanpon boilers; five 5 in. guns, 2 m.g., 6 T.T. The destroyer *Kawakaze* was sunk in action in Vella Gulf, between the islands of Kolombangara and Vella Lavella, Solomons Group, shortly before midnight on August 6th, 1943.

The *Kawakaze* carried a complement of about 200.

For full details of the action, known as the battle of Vella Gulf, see the Japanese destroyer *Arashi*.

KAWATIRI

Union S.S. Co. of New Zealand; 1882; H. McIntyre & Co.; 516 tons; 170-5x26-1 X11-2; 70 r.h.p.; compound engines. The Tasmanian steamship *Kawatiri* was bound from Strachan to Melbourne. When leaving Strachan harbour she struck the breakwater and sank. The disaster occurred on August 15th, 1907. Six persons were drowned.

KAYESON

Coolham S.S. Co.; 1929; Hawthorn, Leslie & Co.; 4,606 tons; 393-1x54-3x25-7; 404 n.h.p.; 11 knots; triple-expansion engines.

The British steamship *Kayeson*, Capt. W. Ayres, on a voyage from Liverpool to Montevideo, was torpedoed and sunk by a German submarine on October 2nd, 1940, about 675 miles W. of Ireland. The entire crew of 38 were lost.

KAYING

China Nav. Co.; 1922; Taikoo Dockyard & Engineering Co.; 2,626 tons; 310-3x44-2x20-9; turbine engines. The steamship *Kaying* was torpedoed and sunk by a German submarine on March 18th, 1943, between Tripoli and Alexandria. Seven of her crew and two gunners were killed.

KAYO MARU

Hokkaido Tanko K.K.; 1925; Osaka Iron Works; 4,368 tons; 345 X 49 - 8 X 28 - 1; 390 n.h.p.; triple-expansion engines. The steamship *Kayo Maru* was torpedoed and sunk by the U.S. submarine *Peto* on March 4th, 1944, about 150 miles N.W. of Hollandia, Dutch New Guinea.

KAZAHAYA

Japanese Government; 8,000 tons (approx). The tanker *Kazahaya* was torpedoed and sunk by the U.S. submarines *Tinosa* and *Steelhead* on October 6th, 1943, N.W. of Namonuito Island, Caroline Islands.

KAZAN MARU

Sekiguchi Kisen K.K.; 1936; Asano S.B. Co.; 1,893 tons; 269-9x40x20-3; 156 n.h.p.; triple-expansion engines. The steamship *Kazan Maru* was torpedoed and sunk by the U.S. submarine *Silver sides* on October 24th, 1943, N. of the Admiralty Islands.

KAZEGUMO

Japanese Navy, destroyer; 1941; Japan; 2,200 tons; 415x 35x—; 34 knots; turbine engines; six 5 in. guns, eight 25 mm A.A., 15 T.T.

The destroyer *Kazegumo* was torpedoed and sunk off Davao, Mindanao, Philippine Islands, by the U.S. submarine *Hake* on June 8th, 1944. The destroyer carried a complement of over 200.

KEARSAGE

United States Navy, wooden steam sloop; 1861; Portsmouth Navy Yard, U.S.; 1,461 tons; 245 (approx.)x — x—; 13 knots; steam engines, screw.

The United States sloop-of-war *Kearsage*, Capt. J. A. Winslow, was built of white oak. During the American Civil War she was engaged in the search for the Confederate cruiser *Alabama*. Capt. R. Semmes. This ship was discovered lying in Cherbourg harbour, where she had put in for repairs. On Sunday, June 19th, 1864, the *Alabama* steamed out and one of the most notable naval duels of the 19th century took place.

After an engagement lasting about 70 minutes the Confederate ship sank. The full story is told under *Alabama*.

The *Kearsage*, which received little damage, served in the American navy for a further 30 years. She was wrecked on the Roncador Reef, in the Caribbean Sea, on February 2nd, 1894.

KEELUNG

China Navigation Co.; 1880; Scott & Co.; 1,424 tons; 250-2X 31 -3x23-1; 160 h.p.; compound engines.

The British cargo ship *Keelung* was wrecked on Dodd Island on October 9th, 1884, while on a voyage from Swatow to Shanghai carrying a general cargo.

KEELUNG

Ellerman & Bucknall Steamship Co.; 1914; Earle's Co.; 6,672 tons; 449-2x56-8x30-8; 641 n.h.p.; 14 knots; triple-expansion engines.

The British steamship *Keelung* was torpedoed and sunk by a German submarine 110 miles W. of Ushant on June 27th, 1918. Six men were killed. The captain was among the survivors.

KEEPER

J. Bannatyne & Sons; 1906; Ailsa S.B. Co.; 572 tons; 179-lx 27-1x10-7; 79 r.h.p.; compound engines.

The British ship *Keeper* was lost, believed to have been sunk by a German submarine, in the Irish Channel on or about June 10th, 1917. The captain and crew of 11 were killed.

KEGUMS

Grauds-Harlow; 1912; W. Denny & Bros.; 5,525 tons; 425 X 54-2x28-3; 369 n.h.p.; triple-expansion engines. Carrying coal from Hampton Roads to Bordeaux, the Latvian ship *Kegums* went aground on December 8th, 1948, at the entrance to Bordeaux, about two and a half miles off shore. She broke in two and sank.

KEHREA

T. N. Epiphaniades; 1912; Dunlop Bremmer & Co.; 1,968 tons; 276 x 40 - 1 x 18 - 4; 227 n.h.p.; triple-expansion engines. The Greek steamship *Kehrea* was bombed and sunk by German aircraft on April 24th, 1941, in the Bay of Frangolimano, during the invasion of Greece.

KEIANMARU

Chosen Yusen K.K.; 1925; Kobe Steel Works; 2,085 tons; 280 X 42x21; 189 n.h.p.; triple-expansion engines. The steamship *Keian Maru* was sunk by U.S. carrier-based aircraft on September 12th, 1944, W. of Leyte Island, Philippines.

KEIFUKUMARU

Daiko Shosen K.K.; 1919; Kawasaki Dockyard Co.; 5,833 tons; 385x51x36; 436 n.h.p.; triple-expansion engines. The steamship *Keifuku (Keihuku) Maru* was bombed and sunk by U.S. land-based aircraft on January 5th, 1943, off the north west coast of New Britain.

KEIJO MARU

Chosen Yusen K.K.; 1939; Uraga Dock Co.; 2,626 tons; 305-1x45x24-6; 174 n.h.p.; compound engines & L.P. turbine. The steamship *Keijo (Keizyo) Maru* was taken over by the Japanese Navy for service as an auxiliary gunboat. On June 21st, 1942, she was torpedoed and sunk by the U.S. submarine *S-44* at the eastern end of the Caroline Islands.

KELJO MARU

KELJO MARU

Nakagawa Kisen K.K.; 1903; *KawasakiDkyd. Co.*; 1,051 tons; 228-8x28x13; 175 n.h.p.; triple-expansion engines. The steamship *Keijo (Keizyo) Mam* was torpedoed and sunk by the U.S. submarine *Queenfish* on November 8th, 1944, about 50 miles W. of the Shichi-to Islands, Japan.

KELJO MARU

Inui Risen K.K.; 2,220 tons. The *Keijo Maru* was bombed and sunk by U.S. land-based aircraft on June 20th, 1945, off Cheju Do Island, Korea.

KEIKO MARU

Osaka Shosen K.K.; 1938; *Uraga Dock Co.*; 2,929 tons; 297-9x45x23-8; 255 n.h.p.; compound engines & L.P. turbine. The steamship *Keiko Maru* was taken over by the Japanese Navy and converted into an auxiliary gunboat. On November 8th, 1942, she was torpedoed and sunk by the U.S. submarine *Seawolf* off Mindanao Island, Philippines.

KEILAWARRA

W. H. Smith & Sons; 1878; *J. Key & Sons*; 784 tons; 200 -2 X 29x12-2; 140 h.p.; 10 knots; compound engines. The *Keilawarra* was engaged in the Australian coastal service and at the time of the disaster was on a voyage from Sydney to Brisbane. The vessel carried a full cargo, two racehorses and a full complement of passengers. On the night of December 8th, 1886, in clear weather, the steamship *Helen Nicoll*, from Grafton to Sydney, crashed into the *Keilawarra*, striking her on the port side about 15 feet from the bow. The two ships lay close together for a short time and passengers on board the *Helen Nicoll* sprang on to the deck of the *Keilawarra* under the impression that their own ship was sinking.

The *Keilawarra* sank in a very few minutes, only two of her boats being able to get away. The number drowned was 41 including six of the people who had jumped from the *Helen Nicoll*.

The *Helen Nicoll*, badly damaged, was able to make Trial Bay safely with survivors.

KEISHIN MARU

Awanokuni Kyodo Kisen K.K.; 1939; *Sanogawaya Yasutaro*; 1,434 tons; 224-5x35-8x19; steam engines. The steamship *Keishin (Keisin) Maru* was taken over by the Japanese Navy and converted into an auxiliary gunboat. On May 1st, 1943, she was torpedoed and sunk by the U.S. submarine *Pogy*.

KEISHO MARU

Showa Shosen K.K.; 1929; *Uraga Dock Co.*; 5,879 tons; 417x56x31-7; 1,170 n.h.p.; oilengines. The motor vessel *Keisho (Keisyo) Maru* was bombed and sunk by U.S. land-based aircraft on October 12th, 1943, in the St. George Channel, New Britain.

KEISHU MARU

Chosen Yusen K.K.; 1918; *Ishikawajima S.B. & E. Co.*; 1,289 tons; 230X33x19-6; 88 n.h.p.; triple-expansion engines. On a voyage from Fusan to Moppo the *Keishu Maru* stranded on September 4th, 1936, at Maikotsuto, Tsushima Strait, and sank.

KEITH

British Navy, destroyer; 1930; *J. S. White & Co.*; 1,400 tons; 323x32-5x12; 34,000 s.h.p.; 35 knots; turbine engines; 3-drum boilers; four 4-7 in. guns, 6 smaller, 8 T.T. The destroyer *Keith*, Capt. E. C. Berthon, was one of the ships engaged in evacuating the British Army from Dunkirk. At about 8.30 on the morning of June 1st, 1940, when off La Panne in company with the destroyer *Basilisk* and the minesweepers *Salamander* and *Skipjack* the force was subjected to intensive bombing by about 40 German aircraft. The *Keith* was hit and set on fire and had to be abandoned. The majority of the troops and crew on board was taken off in safety. The *Skipjack* was also hit and sank with a very heavy loss of life. Later *Basilisk* was hit and foundered on the way home.

The full story of the Dunkirk Evacuation is told under the destroyer *Grafton*.

378

KEIUN MARU

Harada Kisen K.K.; 1921; *Osaka Iron Works*; 1,921 tons; 256X39x22-5; triple-expansion engines. The *Keiun Maru* was bombed and sunk by U.S. land-based aircraft on May 15th, 1945, in the Korea Strait.

KEIYO MARU

Toyo Kisen K.K.; 1937; *Mitsubishi Jukogyo K.K.*; 6,442 tons; 439-4x58-3x32; 1,167 n.h.p.; oilengines. The motor vessel *Keiyo Maru* was bombed by U.S. carrier-based aircraft and sunk by gunfire on June 12th, 1944, off Saipan Island, Ladrone Islands.

KEIZAN MARU

Yamamoto Kisen K.K.; 1940; *Nippon Kokan K.K.*; 2,864 tons; 309-3x45x24-9; steam engines. The steamship *Keizan Maru* was torpedoed and sunk by the U.S. submarine *S-31* on October 26th, 1942, off the Kurile Islands.

KEIZAN MARU

Kokoku Kisen K.K.; 1918; *Gt. Lakes Eng. Works*; 2,116 tons; 253-5x43-8x20-4; triple-expansion engines. The steamship *Keizan Maru* was torpedoed and sunk by the U.S. submarine *Kete* on March 10th, 1945, about 100 miles N.W. of Amami O., Ryukyu Islands.

KELKHEIM

Lehnkering & Cie. A.G.; 1920; *F. Schichau*; 4,943 tons; 362 X 51-3x31-7; 425 n.h.p.; triple-expansion engines. The German ship *Kelkheim* was involved in a collision on February 29th, 1944, and sank south of Raotingen. She was carrying ore.

KELLERWALD

Hamburg-Amerika Lime; 1923; *Deutsche Werft A.G.*; 5,032 tons; 399-6x54-2x27-4; 414 n.h.p.; triple-expansion engines. The German steamship *KeUerwald* struck a mine and sank on March 13th, 1943, in the Heligoland Bight.

KELLOGG

S.Edenborn; 1898; U.S.A.; 1,178 tons; steam engines. The American car ferry *Kellogg* was carrying freight cars when she buckled and sank on March 21st, 1928, one and a half miles above Torras, Old River, Louisiana.

KELLWYN

DillwynS.S.Co.; 1920; *J. Lewis & Sons*; 1,459 tons; 234-8 X 35-7x16-6; 86 n.h.p.; triple-expansion engines. The British steamship *Kellwyn*, on a voyage from the Tyne to Lisbon, was torpedoed and sunk by a German submarine on July 27th, 1941, about 350 miles W. of Cape Finisterre. The captain and 13 of the crew were lost.

KELLY

British Navy, destroyer; 1938; *Hawthorn Leslie*; 1,695 tons; 348x35x9; 40,000 s.h.p.; 36 knots; turbine engines; 3-drum boilers; six 4-7 in. guns, 6 smaller, 10 T.T.

The destroyer *Kelly*, Capt. Lord Louis Mountbatten, was badly damaged in June, 1940. She was torpedoed by a German torpedo boat in foggy weather, the torpedo exploding under the bridge and blowing a huge hole in her side which almost broke her in two. She was taken in tow but with small chance of survival as a gale sprang up shortly afterwards.

For four days and nights she was at the mercy of the seas, and on some occasions had to be temporarily abandoned by her crew. During this time there were frequent attacks by enemy aircraft to be contended with, all of which were successfully beaten off. She was eventually brought safely to harbour and repaired.

On the night of May 22nd, 1941, in company with the destroyer *Kashmir*, *Kelly* was bombarding German positions on the island of Crete. At daybreak on the 23rd, they destroyed two caiques carrying troops and ammunition. This action brought upon the two destroyers the unwelcome attention of German dive-bombers and from 5.30 a.m. they were repeatedly attacked. The *Kashmir* was struck amidships by a 1,000lb. bomb and sank immediately. The *Kelly* was hit soon afterwards and sank with great rapidity, taking

with her nine officers and 119 ratings. Eight officers, including Capt. Lord Louis Mountbatten, and 120 ratings were picked up by the destroyer *Kipling* which also saved a number of the crew of *Kashmir*.

KELVINBANK

Glasgow Steam Shipping Co.; 1905; R. Thompson & Sons; 4,072 tons; 374x49-7x17-2; 361 n.h.p.; 10 knots; triple-expansion engines.

The steamship *Kelvinbank* was torpedoed and sunk by a German submarine 100 miles N. of Cape Wrath on June 13th, 1917. The captain and 15 of the crew were killed.

KELVINBANK

Bank Line; 1921; W. Hamilton & Co.; 3,872 tons; 350-5X 49-9x24-7; 475 n.h.p.; 10 knots; oil engines. The motor vessel Kelvinbank was off the coast of French Guiana at 11 o'clock on the morning of March 9th, 1943, when she was torpedoed and sunk by a German submarine. The vessel carried a crew of 60 of whom 29 were killed.

KELVINSIDE

Glasgow S.S. Co.; 1902; Short Bros.; 3,531 tons; 352-5X 46-1x 16-7; 374 n.h.p.; triple-expansion engines. The British cargo ship Kelvinside sank on February 18th, 1903, after striking a bank eight miles N.N.E. of Braganza Light. She was on a voyage from Buenos Aires to Para carrying a cargo of cattle and hides. Her captain and eight of the crew were drowned.

KEMPTON

British Navy, minesweeper; 1916; Ferguson Bros.; 810 tons; 245-7x29x6-7; 1,400 i.h.p.; 15 knots; diagonal compound engines; one 3 in. gun, one 6 pdr., two 2pdr. The minesweeper Kempton was one of 32 such vessels laid down by the Admiralty in 1915. They were all paddle steamers of shallow draught. On June 24th, 1917, Kempton and Redcar were in company off the Spindle Buoy, N. of Gravelines, when they both struck mines and sank. The official complement of this class of vessel was 72.

KEN AN MARU

Inui Kisen K.K.; 3,129 tons. The steamship Kenan Maru was torpedoed and sunk by the U.S. submarine Sandlance on May 3rd, 1944, off Saipan Island, Ladrone Islands.

KENAN MARU

Inui Kisen K.K.; 2,220 tons. The Kenan Maru struck a mine and sank on June 20th, 1945, off Karatsu, Japan.

KENBANE HEAD

Ulster S.S. Co.; 1919; Workman, Clark & Co.; 5,225 tons; 400-3x52-3x28-4; 3,000 i.h.p.; 13 knots; triple-expansion engines. The steamship Kenbane Head, Capt. T. F. Milner, in convoy in the North Atlantic on November 5th, 1940, was attacked by the German pocket battleship Admiral Scheer. The convoy scattered under cover of a smoke screen and the auxiliary cruiser Jervis Bay engaged the raider. Later the Kenbane Head was overhauled and sunk with the loss of 23 men. Capt. Milner was among the survivors.

For full story of the action see *Jervis Bay*.

KENDAL CASTLE

Lancashire Shipping Co.; 1910; Short Bros.; 3,885 tons; 351-8x50-1x25-7; 353 n.h.p.; 10-5 knots; triple-expansion engines.

The steamship *Kendal Castle* was torpedoed and sunk by a German submarine four miles S.E. of Berry Head on September 15th, 1918. The captain and 17 of the crew were killed.

KENEI MARU

Inui Kisen K.K.; 4,815 tons. The Kenei Maru was bombed and sunk by U.S. carrier-based aircraft on April 19th, 1945, 15 miles E. of Gocong, Indo-China.

KENJO MARU

Inui Kisen K.K.; 6,933 tons. The steamship Kenjo Maru was torpedoed and sunk by the U.S. submarines Segundo and Razorback on December 7th, 1944, off the north coast of Luzon Island, Philippines.

KENJO MARU

Konan Kisen K.K.; 1905; Irvine's S.B. & D.D. Co.; 3,142 tons; 325-3x47-1x13-8; triple-expansion engines. The Kenjo (Kenzyo) Maru was torpedoed and sunk by the U.S. submarine Skate on June 12th, 1945, near Kamazawa, Japan.

KENKERRY

Guardian Line; 1927; Tyne Iron S.B. Co.; 3,930 tons; 355-3x50-5x24-1; 357 n.h.p.; triple-expansion engines. The British cargo ship Kenkerry was wrecked at Black Rock Point, near Portuguese Cove, N.S., on January 17th, 1935. She was on a voyage in ballast from Havana to Halifax, N.S. The master, Capt. Duncan Milne, was lost.

KENKOKU MARU

Minamimanshu Kisen K.K.; 1892; D. & W. Mender son & Co.; 3,217 tons; 324-8x43x24-6; 249 n.h.p.; triple-expansion engines. The Japanese steamship Kenkoku Maru was shelled and sunk by a submarine in the Mediterranean on December 29th, 1915.

KENKOKU MARU

Nisshin Kaiun Shokai; 1920; Lloyd Royal Beige (Gt. Britain); 3,127 tons; 331 x46-6x25-5; 359 n.h.p.; triple-expansion engines. The steamship Kenkoku Maru was torpedoed and sunk by the U.S. submarine Rasher on October 13th, 1943, in the Manipa Strait, Moluccas.

KENKON MARU

Inui Gomei Kaisha; 1882; Armstrong Mitchell & Co.; 2,750 tons; 310-5x39x25-2; 334 n.h.p.; compound engines. The Kenkon Maru was wrecked on April 9th, 1925, at Yerimosaki, Hokkaido. She was carrying railway sleepers and logs.

KENKON MARU

Inui Kisen K.K.; 1935; Mitsui Bussan Kaisha; 4,575 tons; 362-2x50x29-1; 453 n.h.p.; oil engines. The transport Kenkon Maru was torpedoed and sunk by the U.S. submarine Gato on January 21st, 1943, off the east coast of Bougainville.

KENKON MARU No. 12

Inui Gomei Kaisha; 1890; W. Denny & Bros.; 3,390 tons; 340x43-1x26; 315 n.h.p.; quadruple-expansion engines. The Kenkon Maru No. 12 was in collision on May 30th, 1928, and sank about 140 miles E.S.E. of Tsingtao.

KENKYU MARU

Nichiman Kisen Kaisha; 1899; W. Denny & Bros.; 5,230 tons; 410x50-7x28-9; 390 n.h.p.; triple-expansion engines. The Kenkyu Maru struck a rock and sank on December 8th, 1929, while on a voyage from Batupahat to Moji with a cargo of iron ore.

KENMARE

City of Cork Steam Packet Co.; 1895; Wigham Richardson & Co.; 1,330 tons; 264-5x35-6x16-9; 437 n.h.p.; 14 knots; triple-expansion engines. The steamship Kenmare was torpedoed and sunk by a German submarine 25 miles N.W. of the Skerries on March 2nd, 1918. Twenty-nine men, including the captain, were killed.

KENMORE

James Gardiner & Co.; 1898; C. Connell & Co.; 3,762 tons; 354 X 45 X 25-7; 354 n.h.p.; triple-expansion engines. The British cargo ship Kenmore was wrecked on January 13th, 1904, on Traba Beach, near Cape Viliano, while on a voyage from Barry to Aden carrying a cargo of coal. Six of her crew were lost.

KENMORE

KENMORE

Johnston Line; 1912; Richardson, Duck & Co.; 3,919 tons; 360-4x50x24-6; 301 n.h.p.; 9-5 knots; triple-expansion engines.

The steamship *Kenmore* was torpedoed and sunk by a German submarine 30 miles N. of Inishtrahull Island, off Co. Donegal, on August 26th, 1917. Five men were killed. The captain was among the survivors.

KENMURE CASTLE

T. Skinner & Co.; 1873; J. Softley & Co.; 1,951 tons; 286X 35-2x24-9; 200 h.p.; 10 knots; compound inverted engines. The iron brig-rigged steamship *Kenmure Castle*, Capt. J. D. Barrett, left London on January 23rd, 1883, for Shanghai, with eight passengers and 40 crew.

The weather was bad, developing into a strong N.W. gale in the Bay of Biscay. On Thursday, February 1st, the heavy seas destroyed the steering gear and crushed the saloon. During the night the whole superstructure was washed overboard, the passengers being rescued with difficulty and conveyed to the engine room. Soon afterwards the stokehold began to flood and the captain ordered out the boats, one of which with the second officer in charge, got away with eight passengers and seven Chinese seamen. Before any others could be launched the ship sank with all on board.

The boat was in a dangerous position, 160 miles from the nearest land, with the seven Chinese doped with opium and the female passengers clad only in nightdresses and coats. In this plight Mr. Holmes, the second officer, managed to keep the boat afloat until the evening of the third day, being once washed overboard and then swept back again. He was then able to attract the attention of the French steamship *Montataire*, Capt. Ordronneau. His party was by that time in the last stages of exhaustion as there had been no food, and very little water on the boat when it had left the *Kenmure Castle*, but all survived.

Of the 48 persons on board the *Kenmure Castle*, 32 were drowned, including the captain and eight British members of the crew.

KENNEBEC

Seaboard & Gulf S.S. Co.; 1901; Jenks S.B. Co.; 2,183 tons; 243-5x43-2x24; 140 n.h.p.; triple-expansion engines. The American ship *Kennebec* sprang a leak and sank on June 18th, 1921, 30 miles off Barnegat while on a voyage from New York to Houston.

KENNEBEC

Anglo-American Oil Co.; 1919; R. Duncan & Co.; 5,548 tons; 400-3x52-2x28-4; 517 n.h.p.; triple-expansion engines. The tanker *Kennebec*, homeward bound from Aruba, was torpedoed and sunk by a German submarine on September 8th, 1939, off the mouth of the Seine.

KENNECOTT

Alaska S.S. Co.; 1921; Todd D.D. & Constn. Corp.; 3,620 tons; 345-3x49-6x24-3; 410 n.h.p.; oilengines. The American motorship *Kennecott*, on a voyage from Cordova, Alaska, to Tacoma with copper ore and concentrates, was wrecked on October 9th, 1923 at Hunters Point, 60 miles S. of Frederick Island.

KENNETT

Steel, Young & Co.; 1883; E. Withy & Co.; 1,795 tons; 259-4X 34-7x22-7; 160 h.p.; compound engines. The British cargo ship *Kennett* was wrecked off Gando Point, Canary Islands, on April 29th, 1888. She was on a voyage from London to the River Plate carrying a cargo of iron rails.

KENNICHI MARU

DaidoKaiunK.K.; 1,938 tons. The steamship *Kennichi Maru* was torpedoed and sunk by the U.S. submarine *Tang* on June 24th, 1944, about 100 miles W. of Kagoshima, Japan.

KENORDOC

Paterson Steamships; 1926; Furness S.B. Co.; 1,780 tons; 252-5x43-2x17-8; 111 n.h.p.; triple-expansion engines. The Canadian steamship *Kenordoc*, on a voyage from Quebec to

Bristol, was shelled and sunk by a German submarine on September 15th, 1940, about 500 miles W. of the Orkney Islands. Seven of her crew were killed.

KENRYU MARU

Inui Kisen K.K.; 1935; Mitsui Bussan Kaisha; 4,575 tons; 362-2x50x29-1; 453 n.h.p.; oilengines. The motorship *Kenryu Maru* was torpedoed and sunk by the U.S. submarine *Snapper* on November 29th, 1943, about 150 miles S. of Yokohama.

KENSEI MARU

1941; Hong Kong & Whampoa Dock Co.; 4,644 tons; 357-1x 53-2x23-6; 404 n.h.p.; oilengines. The *Kensei Maru* was formerly the British *Hinsang*, when she was scuttled at Hong Kong during December, 1941. The Japanese raised, repaired and renamed the ship. On January 12th, 1945, she was bombed and sunk by U.S. carrier-based aircraft 25 miles S.E. of Phanrang, Vietnam.

KENSHIN MARU

Inui Kisen K.K.; 1940; Harima S.B. & Eng. Co.; 3,126 tons; 318-4x45-9x24-6; steam engines. The steamship *Kenshin (Kensin) Maru* was bombed and sunk by U.S. land-based aircraft on January 17th, 1944, off the north west coast of New Guinea.

KENSHO MARU

Inui Kisen K.K.; 1938; Tama S.B. Co.; 4,862 tons; 384-4X 52-5x30-3; 642 n.h.p.; oil engines. The motorship *Kensho (Kensyo) Maru* was sunk by U.S. carrier-based aircraft on February 17th, 1944, in the Caroline Islands.

KENSINGTON COURT

Court Line; 1927; Napier & Miller; 4,863 tons; 396-5x 53-2x26-5; 416 n.h.p.; triple-expansion engines. The steamship *Kensington Court*, on a voyage from Rosario to Liverpool, was torpedoed and sunk by a German submarine on September 18th, 1939, about 100 miles S.W. of the Bishop Rock.

KENTAR

N. V. Nederlandsch-Indische Maats. voor Zeevaart I.; 1920; Flenburger Schiffsbau Ges.; 5,878 tons; 449-6x58-2x27; 902 n.h.p.; triple-expansion engines & L.P. turbine. The Dutch steamship *Kentar* was torpedoed and sunk by a German submarine at 9 p.m. on July 31st, 1942, 350 miles E. of the Windward Islands on a voyage from Bombay and Durban to Trinidad with manganese ore. Seventeen of her complement of 79 were lost.

KENUN MARU

Inui Kisen K.K.; 4,643 tons. The *Kenun Maru* was torpedoed and sunk by the U.S. submarine *Nautilus* on October 24th, 1942, off the north east coast of Honshu Island, Japan.

KENWA MARU

Nitto Kisen K.K.; 6,384 tons. The tanker *Kenwa Mam* was sunk by U.S. carrier-based aircraft on September 24th, 1944, off the north west coast of Negros Island, Philippines.

KENYO MARU

Inui Kisen K.K.; 1938; Harima S.B. & Eng. Co.; 6,486 tons; 438-8x58-6x32-8; 750 n.h.p.; turbine engines. The steamship *Kenyo Maru* was torpedoed and sunk by the U.S. submarine *Whale* on March 23rd, 1943, W. of the Ladrone Islands.

KENYO MARU

Kokuyo Kisen K.K.; 1939; Kawasaki Dkyd. Co.; 10,022 tons; 502-1x64-9x37-1; 2,250 n.h.p.; oilengines. The tanker *Kenyo (Ken-yo) Maru* was torpedoed and sunk by the U.S. submarine *Guardfish* on January 14th, 1944, about 600 miles N. of Vanimo, New Guinea.

KENYO MARU

Toyo Kisen K.K.; 2,217 tons.
The *Kenyo Mam* was sunk by U.S. carrier-based aircraft on March 18th, 1945, in the Van Diemen Strait, Japan.

KENZAN MARU

Kokoku Kisen K.K.; 1919; *Standard S.B. Corp.*; 4,705 tons; 377x52x29; 488 n.h.p.; triple-expansion engines. The steamship *Kenzan Mam* was torpedoed and sunk by the U.S. submarine *Albacore* on November 25th, 1943, about 200 miles N. of the Admiralty Islands.

KENZUI MARU

Inui Kisen K.K.; 4,156 tons.
The steamship *Kenzui Mam* was torpedoed and sunk by the U.S. submarine *Blenny* on December 23rd, 1944, off San Fernando, Philippines.

KERAMIAI

Cephalonian Maritime Co.; 1917; *Swan, Hunter & Wigham Richardson*; 5,085 tons; 400-3x52-2x28-4; 517 n.h.p.; triple-expansion engines.
The Greek steamship *Keramiyai* was torpedoed and sunk by a German submarine on January 30th, 1940, 117 miles S.W. of Land's End on a voyage from London to Ciudad Trujillo. Twenty-eight survivors were picked up.

KERET

Det Bergenske D/S; 1927; *Ateliers & Chantiers de la Seine Maritime*; 1,718 tons; 251 '8x39-2x16-1; 167n.h.p.; triple-expansion engines.
The Norwegian steamship *Keret* was torpedoed and sunk by a German submarine on August 22nd, 1940, on a voyage from the Tyne to Sydney, N.S. Thirteen of her crew were killed.

KERKYRA

Hellenic Coast Lines Co.; 1912; *Mackie & Thomson*; 1,461 tons; 224 x 33 • 9 x 19; 126 n.h.p.; triple-expansion engines. The Greek steamship *Kerkyra* was bombed and sunk by German aircraft on April 23rd, 1941, off Salamis, during the invasion of Greece.

KEROULA

Cairns, Young & Noble; 1880; *S. P. Austin & Son*; 1,547 tons; 260•4x35•5x17•1; 173n.h.p.; compound engines. The British cargo ship *Keroula* was wrecked on Seby, Oland, on September 14th, 1903, while on a voyage from Wyburg to Calais with a cargo of wood.

KERRY HEAD

W. T. Herriott; 1913; *J. Fuller ton & Co.*; 825 tons; 195 X 31-1x11-4; 96 r.h.p.; triple-expansion engines. The steamship *Kerry Head*, on a voyage from Limerick to England in ballast, was bombed and sunk by German aircraft on October 22nd, 1940, about five miles off Sheep Head, Co. Cork. There were no survivors.

KERSHAW

Merchants & Miners Transportation Co.; 1899; *Harlan & Hollingsworth Co.*; 2,741 tons; 274x42x26; 381 n.h.p.; triple-expansion engines.
On a voyage from Boston to Norfolk and Baltimore, the American ship *Kershaw* was involved in a collision with the American steamship *President Gar field* on June 1st, 1928, and sank eight miles E. of Martha's Vineyard. Seven of the *Kershaw's* crew were lost.

KERVEGAN

Ministry of Shipping (Evan T. Radcliffe & Co.); 1922; *Soc. Anon. Anciens Ch. Dubigeon*; 2,018 tons; 270-3x39-3x18-9; 189 n.h.p.; triple-expansion engines.
The British cargo ship *Kervegan* reported on February 9th, 1941, that she was in distress and in danger of capsizing in 43° 40' N., 61° 33' W. No further news was received from the ship but wreckage was later washed ashore in Nova Scotia. She had sailed from Halifax, N.S., on February 8th, for Loch Ewe and London, carrying a cargo of pulpwood.

KEYSTORM

Keystone Transportation Co. of Canada; 1910; *Swan, Hunter & Wigham Richardson*; 1,673 tons; 250x42-5x17-5; 122 n.h.p.; triple-expansion engines.
The Canadian cargo ship *Keystorm* sank after striking Howe Island reef, River St. Lawrence, on October 26th, 1912. She was on a voyage from Charlotte to Montreal carrying a cargo of coal.

KHAI DINH

Japanese Government; 1914; *W. Denny & Bros.*; 5,110 tons; 380 x 51 - 8 X 30 • 5; 788 n.h.p.; triple-expansion engines. The steamship *Khai Dinh* was a French passenger vessel seized by the Japanese in Indo-China. She was bombed and sunk by U.S. land-based aircraft on November 22nd, 1942, S. of Haiphong.

KHARTOUM

British Navy, destroyer; 1939; *Swan, Hunter & Wigham Richardson*; 1,690 tons; 348x35x9; 40,000 s.h.p.; 36 knots; turbine engines; 3-drum boilers; six 4-7 in. guns, 6 smaller, 10 T.T. The destroyer *Khartoum* was wrecked by an internal explosion in the Red Sea on June 23rd, 1940. She was beached and abandoned near Perim.

KHEDIVE ISMAIL

Ministry of War Transport (British India Steam Nav. Co.); 1922; *Scott's Shipbuilding & Engineering Co.*; 7,513 tons; 422-8X 56-2x30-4; 1,469 n.h.p.; 17knots; turbine engines. The liner *Khedive Ismail* was torpedoed and sunk by a submarine on February 12th, 1944, in the area of the Maldive Islands. She was carrying 1,324 troops and 183 crew, including gunners. One hundred and thirty-seven of the crew and 1,134 troops were lost.

KHOLMOGORY

U.S.S.R.; 1930; *Baltic S.B. & Eng. Works*; 2,332 tons; 284-8 x 43 • 1 x —; triple-expansion engines.
The Russian ship *Kholmogory* was on a voyage from Antwerp to Ventspils when she was in collision with the *Bischofstein* on March 22nd, 1959, in the North Sea during a fog. Most of the crew were saved.

KHYBER

Galgate Shipping Co.; 1880; *W. H. Potter & Son*; 2,026 tons; 276-6x40-1x24-2.
The British sailing ship *Khyber* left Port Phillip, Australia, for Queenstown with a cargo of wheat and a crew of 26. From Queenstown she sailed for the English Channel, but encountered a violent gale and was driven ashore at Porthgwarra, Cornwall, on March 15th, 1905, with the loss of 23 lives.

KIANG HSIN

China Merchants Steam Nav. Co.; 1905; *S. C. Farnham & Co.*; 3,373 tons; 325x44x14-6; 311 n.h.p.; triple-expansion engines. The Chinese steamship *Kiang Hsin* was bombed and sunk by Japanese aircraft on June 23rd, 1938, near Yochow, Yangtze River, during the Sino-Japanese hostilities. Over 1,000 refugees were killed. The ship was later raised and repaired but on September 5th, 1949, she was destroyed by bombing at Shanghai, during the Chinese Civil War.

KIANG KIEN

China Merchants Steam Nav. Co.; 1906; *Atel. & Ch. de France*; 2,240 tons; 278-2x42-9x24-8; triple-expansion engines. The Chinese ship *Kiang Kien* went aground and sank on October 21st, 1949, in Lian Lu Bay, Quemoy.

KIANG LING

China Merchants Steam Nav. Co.; 1906; *Kawasaki Dockyard Co.*; 1,362 tons; 228-8x39-5x9-6; triple-expansion engines. The Chinese ship *Kiang Ling* was shelled by Communist shore guns on July 30th, 1949, between Nanking and Woosung in the Yangtze River. She caught fire and sank.

KIANG YA

China Merchants Steam Nav. Co.; 1939; *Harima S.B. & Eng. Co.*; 3,731 tons; 322-1x50x15-4; steam engines. The Chinese passenger ship *Kiang Ya* was sailing from Shanghai to

KIBI MARU

Ningpo on December 3rd, 1948, when there was an explosion and the ship sank 15 miles off Woosung breakwater. It was stated that the explosion was not in the boiler. The number of passengers missing totalled 3,520. The ship was raised by the Chinese Communists in October, 1956, throughly repaired and put into service in 1959.

KIBI MARU

Tochigi Risen K.K.; 2,909 tons.
On March 30th, 1944, the steamship *Kibi Mam* was attacked by U.S. carrier-based aircraft and sunk off Babelthuap, Palau Islands, (7° 19' N., 134° 28' E.)

KIBI MARU

Hinode Risen R.R.; 2,759 tons.
On March 30th, 1944, the steamship *Kibi Maru* was attacked by U.S. carrier-based aircraft and sunk off Babelthuap, Palau Islands, (7° 30' N., 134° 30' E.)

KIBI MARU No. 11

Okazaki Risen R.R.; 1918; 1,351 tons; 220x32-5x21. The *Kibi Maru No. 11* left Muroan on February 14th, 1922, with a cargo of coal for Yokohama and disappeared.

KIBI MARU No. 12

Toyosaki Risen R.R.; 1918; 1,351 tons; 310x43x26. The *Kibi Maru No. 12* was wrecked on January 18th, 1921, at Sawasaki, Sado Island. She had a cargo of salt.

KIBI MARU No. 16

Toyosaki Risen R.R.; 1919; Japan; 1,225 tons; steam engines. The steamship *Kibi Maru No. 16* capsized and sank during a typhoon on August 24th, 1922, off Daitozaki with the loss of all on board. She was carrying coal.

KIBITSU MARU

Nippon Yusen Raisha; 9,575 tons.
The *Kibitsu Maru* struck a mine and sank on August 7th, 1945, off Kobe.

KIEL

Hamburg-Amerika Lime; 1922; *Fr. Rrupp A.G.*; 3,703 tons; 338-7x 47• 4X 26-2; 290 n.h.p.; triple-expansion engines. The German steamship *Kiel* was bombed and sunk by British aircraft on November 21st, 1944, off Kladesholm, Sweden.

KIEN YUAN

E-Hsiang S.S. Co.; 1919; *Poison Iron Works*; 2,160 tons; 25IX 43 • 5 X 22 • 1; triple-expansion engines. The Chinese steamship *Rien Yuan* was carrying coal from Keelung to Shanghai when on January 27th, 1949, in foggy weather, she was in collision with the *Tai Ping* in Bonham Strait, N. of Chusan Island. Both ships sank. The Australian destroyer *Warramunga* picked up 35 survivors from the two ships. The *Tai Ping* was reported to have had over 1,500 persons on board.

KIEV

U.S.S.R.; 1917; *Flensburger Schiffsbau Ges.*, 5,823 tons; 449 -3x 58 -2x 27; 793 n.h.p.; triple-expansion engines. The Russian steamship *Kiev* was torpedoed and sunk by a German submarine on April 13th, 1942, E. of the North Cape on a voyage from Murmansk to Iceland.

KIFUNE MARU

Nippon Yusen R.R.; 1918; *Nagata Sanjuro*; 1,606 tons; 240x 36• 1x 20• 9; triple-expansion engines. The steamship *Rifune (Rihune) Maru* struck a mine and sank on June 4th, 1945, off the west coast of Honshu Island, Japan.

KIKI ISSAIAS

C. E. Zalocostas & G. A. Issaias; 1894; *Ropner & Son*; 2,993 tons; 322x41-5x20-7; 236 n.h.p.; triple-expansion engines. The Greek steamship *Kiki Issaias* was torpedoed and sunk by a submarine in the Mediterranean on October 31st, 1916.

KIKUKAWA MARU

Kawasaki Risen R.R.; 1937; *Kawasaki Dkyd. Co.*; 3,833 tons; 354-7x50x27-5; turbine engines. The *Rikukawa Maru* sank on October 7th, 1943, in 7° 22' N., 151° 54' E.

KIKUSUI MARU

Japanese Government; 3,887 tons.
The tanker *Rikusui Maru* was torpedoed and sunk by the U.S. submarine *Snook* on October 24th, 1944, about 200 miles N.W. of Luzon Island, Philippines.

KIKUTSUKI

Japanese Navy, destroyer; 1926; *Maizuru*; 1,315 tons; 320x 39x9-9; 38,500 s.h.p.; 34 knots; turbine engines; *Ranpon boilers*; four 4• 7 in. guns, 2 A.A.m.g., 6 T.T. The destroyer *Rikutsuki* was bombed and sunk in the harbour of Tulagi, Solomons Group, on May 4th, 1942, by carrier-based aircraft during the battle of the Coral Sea.

The normal complement of the *Rikutsuki* was 150.
For the story of the battle of the Coral Sea see *Shoho*.

KIKUZUKI MARU

Japanese Government; 1922; *Ateliers Maritimes de Haiphong*; 1,266 tons; 226• 5x 32-8x 16-5; 104 n.h.p.; triple-expansion engines.

The steamship *Rikuzuki Maru* was formerly the Greek *Sparta*, seized by the Japanese in December, 1941. On January 27th, 1944, she was torpedoed and sunk by the U.S. submarine *Thresher* about 50 miles W. of Kaohsiung, Formosa.

KILBRENNAN

Napier & Cornell; 1903; *C. Cornell & Co.*; 3,640 tons; 353X 45X 25• 9; 353 n.h.p.; triple-expansion engines. The British cargo ship *Rilbrennan* was wrecked on Fish Point, near East London, on March 28th, 1907, while on a voyage from Barry to Diego Suarez carrying a cargo of coal.

KILBURN

Watts, Watts & Co.; 1893; *Ropner & Son*; 3,271 tons; 330x 43x18-5; 273 n.h.p.; triple-expansion engines. The British cargo ship *Rilburn* was wrecked on Ethel Reef, off the Yasawa Islands, Fiji, on May 20th, 1910. She was on a voyage from Newcastle, N.S.W. to Guaymas carrying a cargo of coal.

KILDARE

R. M. Hudson & Son; 1883; *J. Laing*; 3,463 tons; 334x 42-4X 20-6; 400 n.h.p.; compound engines. The British cargo ship *Rildare* foundered on October 4th, 1888, in 15° N., 110° E., while on a voyage from Pasareoang to Hong Kong carrying a cargo of sugar. The captain and four of the crew were lost.

KILDIN

Archangel Mourman S.N. Co.; 1908; *W. Dobson & Co.*; 1,640 tons; 260x38x18-1; 181 n.h.p.; triple-expansion engines. The Russian cargo ship *Kildin* was torpedoed and sunk by a German submarine in the North Sea on July 30th, 1917.

KILDONAN

Seville & United Kingdom Carrying Co.; 1898; *W. Pickersgill & Sons*; 2,118 tons; 286x43-1x19-8; 210 n.h.p.; 9 knots; triple-expansion engines. The steamship *Rildonan* was torpedoed and sunk by a German submarine two miles N.N.W. of Pendeen Lighthouse on September 29th, 1917. The captain and 13 of the crew were killed.

KILISSI

Compagnie des Chargeurs Reunis; 1934; *Chantiers & Ateliers de Provence*; 3,723 tons; 324-8x48-6x22-7; 296n.h.p.; triple-expansion engines.

The French steamship *Rilissi*, flying the German flag, was bombed and sunk by Allied aircraft on March 12th, 1944, off the River Ebro.

KILMAHO

Seville & United Kingdom Carrying Co.; 1898; J. Priestman & Co.; 2,155 tons; 286x43x19-8; 204 n.h.p.; 9-5 knots; triple-expansion engines.

The steamship *Kilmaho* was torpedoed and sunk by a German submarine ten miles W.N.W. of the Lizard on May 16th, 1917. The captain and 20 of the crew were killed.

KILMORE

Wm. Johnston & Co.; 1890; Edwards' S.B. Co.; 2,215 tons; 286-5x 38-2x 17-7; 218 n.h.p.; triple-expansion engines. The British cargo ship *Kilmore* sank after a collision with the British s.s. *Montezuma* off West Hinder on July 29th, 1906, while on a voyage in ballast from Antwerp to Liverpool.

KIMIKAWA MARU

Kawasaki Risen K.K.; 1937; Kawasaki Dkyd. Co.; 6,863 tons; 479-5x62-3x30-3; 1,851 n.h.p.; oilengines. The motor vessel *Kimikawa Maru* was taken over by the Japanese Navy and converted into a seaplane tender. On October 23rd, 1944, she was torpedoed and sunk by the U.S. submarine *Sawfish* about 150 miles W.N.W. of Negra Point, Luzon Island, Philippines.

KIMISHIMA MARU

Iino Kisen K.K.; 1938; Tsuriumi Seitetsu Zosen K.K.; 5,193 tons; 489-3x54-1x30-5; 500 n.h.p.; turbine engines. The steamship *Kimishima (Kimisima) Maru* was torpedoed and sunk by the U.S. submarine *Plunger* on February 23rd, 1944, about 200 miles N.N.W. of the Bonin Islands.

KINA

Ostasiatiska Kompagni; 1939; Nakskov Skibs A/S; 9,823 tons; 489-3x 65 • 2x 38 • 8; oil engines. The Danish motorship *Kina* went ashore on December 25th, 1947, on Kamandag Island, and later sank. She was on a voyage from Shanghai to Europe with 13 passengers and general cargo. There were some survivors.

KINABALU

Harrisons & Crosfield (Borneo); 1914; Ardrossan D.D. & S.B. Co.; 429 tons; 150 • 4x 26x 10 • 6; 59 n.h.p.; triple-expansion engines. The British cargo ship *Kinabalu* was wrecked on September 29th, 1940, at Batu Mandi, on the west coast of North Borneo. She was carrying a general cargo and cattle on a voyage from Jesselton, via Usukan, to Sandakan. Five of the crew were lost.

KINAI MARU

Osaka Syosen K.K.; 1930; Mitsubishi Zosen Kaisha; 8,360 tons; 446x 60-5x 40-7; 1,495 n.h.p.; oilengines. The motor vessel *Kinai Maru* was torpedoed and sunk by the U.S. submarine *Plunger* on May 10th, 1943, N.E. of Guam.

KINCORA

Water ford Steamship Co.; 1895; Hawthorn Leslie & Co.; 944 tons; 230x32x14-6; 175 n.h.p.; 9 knots; triple-expansion engines. The steamship *Kincora*, Capt. Power, plying between Limerick and Liverpool, was run down off the Tuskar Rock in St. George's Channel by the White Star liner *Oceanic*, 17,274 tons, Capt. Cameron, at 1.15 a.m. on August 8th, 1901, in thick fog. The *Kincora* had reduced speed and kept her siren sounding at the regulation intervals, but did not see or hear anything of the *Oceanic* until the latter's bows crashed into her. Capt. Cameron lowered two boats and flung ropes from the forecabin on to the decks of the steamship. Several of the crew were saved by this means but seven went down with the ship. The *Kincora* sank in seven minutes.

KINE MARU

Settsu Syosen K.K.; 1924; Kobe Steel Works; 2,193 tons; 285-5x 40x 24; triple-expansion engines. The steamship *Kine Maru* was bombed and sunk by U.S. land-based aircraft on April 5th, 1945, off Kitchioh, China.

KING ALBERT

F. C. Strick & Co.; 1909; Wood, Skinner & Co.; 2,124 tons; 281-5x 43-1x 19-5; 201 n.h.p.; triple-expansion engines. The British cargo ship *King Albert* foundered about two and a half miles north-west of Ceuta on September 8th, 1915. She was on a voyage from Benisaf to the Tyne carrying a cargo of iron ore.

KING ALFRED

Philipps & Co.; 1889; Blyth S.B. Co.; 1,137 tons; 225x 32-7x15-8; 99 h.p.; triple-expansion engines. The British cargo ship *King Alfred* was wrecked at South Uist, Hebrides, on April 15th, 1894, while on a voyage from Fernandia to Bo'ness carrying a cargo of phosphate.

KING ALFRED

King Line; 1919; W. Doxford & Sons; 5,272 tons; 400x 52-4x 28-5; 517 n.h.p.; triple-expansion engines. The steamship *King Alfred*, on a voyage from St. John's, N.F.L. to Methil, was torpedoed and sunk by a German submarine on August 4th, 1940, about 400 miles W. of the Hebrides. Five of her crew were killed.

KING ARTHUR

Thomas Turnbull & Son; 1874; Thomas Turnbull & Son; 1,007 tons; 225X 30x 17-1; 99 h.p.; compound inverted engines. The British cargo ship *King Arthur* was wrecked off Kilios on February 21st, 1883, while on a voyage from Kustendje to Dunkirk carrying a cargo of linseed and barley. Fourteen of the crew were drowned.

KING CADWALLON

Philipps, Philipps & Co.; 1900; A. Rodger & Co.; 3,275 tons; 326-2x48-1x23-8; 278 n.h.p.; triple-expansion engines. The British cargo ship *King Cadwallon* was wrecked on the Lewis Rocks, Isles of Scilly, in dense fog on July 22nd, 1906. She was on a voyage from Barry to Naples carrying a cargo of coal.

KING CITY

Reardon Smith Line; 1928; W. Gray & Co.; 4,744 tons; 400-5X54-3x25-6; 339 n.h.p.; 11 knots; triple-expansion engines. The British steamship *King City*, Capt. H. W. Marshall, was requisitioned by the British Admiralty in the Second World War for service as a collier. She was some hundreds of miles N. of the island of Rodriguez, in the Indian Ocean, on August 24th, 1940, when she was intercepted by the German raider *Atlantis*. The vessel was shelled and torpedoed and eventually sank. Six of her crew were killed and the remainder, including Capt. Marshall, were taken prisoners.

KING EDWARD

King Line; 1919; Workman Clark & Co.; 5,224 tons; 400x 52 • 3x 28-4; 517 n.h.p.; 11-5 knots; triple-expansion engines. The British steamship *King Edward*, Capt. J. H. Ewens, was in convoy in the North Atlantic on December 27th, 1942, when she was torpedoed and sunk by a German submarine. Twenty-three men were killed. Capt. Ewens was among the survivors.

KING EDWARD VII

British Navy, 1st class battleship; 1906; Devonport Dockyard; 16,350 tons; 453-7x78x26-7; 18,000 i.h.p.; 19-1 knots; triple-expansion engines; Babcock boilers; four 12 in. guns, four 9-2 in., ten 6 in., fourteen 12 pdr., 2 m.g., 4 T.T. The battleship *King Edward VII* was the flagship of the 3rd Battle Squadron during the First World War, flying the flag of Vice-Admiral E. E. Bradford. The ship had an official complement of 777 officers and men and was commanded by Capt. C. Maclachlan.

On January 16th, 1916, *King Edward VII* was off Cape Wrath on her way from Scapa to Belfast to refit when she struck a mine. At first it was believed that a submarine had caused the damage, as the seas round about were regarded as free of mines, but later it was discovered that a new minefield had been sown across the western entrance of the Pentland Firth by the German raider *Moewe*. The battleship was towed for nine hours, but by the end of that time it was evident that she could no longer face the seas.

The whole of the ship's company were transferred to the attendant destroyers before the battleship sank.

KING FREDERICK

KING FREDERICK

King Line; 1920; Hong Kong & Whampoa Dock Co.; 5,106 tons; 400-2X 52-3x28-5; 517 n.h.p.; 11-5 knots; triple-expansion engines.

The British steamship *King Frederick*, Capt. R. Esslemont, was about 100 miles S. of the Laccadive Islands in the Indian Ocean on July 19th, 1944, when she was torpedoed and sunk by a German submarine. Twenty-five of the crew and five gunners were killed. Capt. Esslemont was among the survivors.

KING GRUFFYD

King Line; 1919; Hong Kong & Whampoa Dock Co.; 5,072 tons; 400-9X 52-4x28-3; 517 n.h.p.; 11-5 knots; triple-expansion engines.

The British steamship *King Gruffyd*, Capt. H. Griffiths, was in convoy in the North Atlantic on March 17th, 1943, when she was torpedoed and sunk by a German submarine. Capt. Griffiths, 19 of the crew and two gunners were killed.

KING IDWAL

King Line; 1920; Taikoo Dockyard & Engineering Co.; 5,115 tons; 400-2x52-3x28-5; 517 n.h.p.; 11-5 knots; triple-expansion engines.

The British steamship *King Idwal*, Capt. R. Storm, was in convoy in the North Atlantic on November 23rd, 1940, when she was torpedoed and sunk by a German submarine. Twelve men were killed. Capt. Storm, who had been in command of the *King Alfred* when she was torpedoed in August of the same year was, among the survivors.

KING LUD

Dodd, Thomson & Co.; 1928; Harland & Wolff; 5,224 tons; 400-7X 54-8X 27-2; 489 n.h.p.; oilengines. The British cargo ship *King Lud* sailed from New York on April 22nd, 1942, on a voyage to Bombay. She arrived safely at Table Bay and left there on May 31st, but was subsequently lost without trace. The ship was carrying Government stores together with a crew of 34 and five Army and Naval personnel.

KING MALCOLM

Dodd, Thomson & Co.; 1925; D. & W. Henderson & Co.; 5,120 tons; 400-3x59x25-9; 489 n.h.p.; oilengines. The British cargo ship *King Malcolm* was on a voyage from Haifa, via Table Bay and Sydney, N.S., to Belfast and Garston, carrying a cargo of potash. She arrived safely at Sydney, N.S. and sailed from there on October 17th, 1941. The ship was reported in 47° 40' N., 51° 15' W., on October 21st, but no subsequent information was received. She carried a crew of 34 and four gunners.

KING ORRY

Isle of Man Steam Packet Co.; 1913; Cammell Laird; 1,877 tons; 300x 43-1x 15-9; 1114 n.h.p.; 21 knots; turbine engines. The Isle of Man packet *King Orry*, Cdr. J. Elliott, had a varied career during the First World War, serving as an armed boarding vessel, a general utility ship, and for a time, as a "Q" (decoy) ship under the name of *Viking Orry*. She survived the war and was returned to her owners in 1919, but was again taken over on the outbreak of the Second World War. In May, 1940 she took part in the evacuation of the British Army from the Dunkirk beaches, and was damaged on the 27th but managed to carry on until the night of the 29th-30th. On that night she ran into Dunkirk harbour in the hope of picking up more troops. She found the harbour empty save for burning and sinking ships and after waiting in vain for some signs of men to embark she left again, but was hit and sunk as she drew away.

The full story of the Dunkirk Evacuation is told under the destroyer *Grafton*.

KINGSBRIDGE

Baring & Croshaw; 1869; T. Oswald & Co.; 1,534 tons; 230-7x 38-8x24-6.

The iron sailing ship *Kingsbridge* was sunk after a collision with the sailing ship *Candahar*, 1,418 tons, on October 14th, 1874, off the Lizard. The captain, his wife and daughter, and eight of the crew were drowned.

KINGSDYKE

Lowlands S.S. Co.; 1888; Schlesinger, Davis & Co.; 1,710 tons; 260x36-3x19-3; 207 n.h.p.; 8-5 knots; compound engines.

The British steamship *Kingsdyke* was torpedoed and sunk by a German submarine 20 miles N.E. of Cape Barfleur on January 17th, 1918. The captain and 15 of the crew were killed.

KINGSTON

Commercial S.S. Co.; 1871; Oswald; 1,449 tons; 262-2x 32x 19-5; 130 h.p.; compound-inverted engines. The British cargo ship *Kingston* was wrecked in the Gulf of Suez on February 16th, 1881, while on a voyage from London to Aden carrying a cargo of coal.

KINGSTON

British Navy, destroyer; 1939; J. S. White & Co.; 1,690 tons; 348x35x9; 40,000 s.h.p.; 36 knots; turbine engines; 3-drum boilers; six 4 • 7 in. guns, 6 smaller, 10 T.T.

The destroyer *Kingston* was bombed and sunk by enemy aircraft at Malta on April 11th, 1942. Her normal complement was 183.

KINGSTON HILL

Ministry of Shipping (Counties Ship Management Co.); 1940; W. Hamilton & Co.; 7,628 tons; 421-1x60-4x35-8; 520 n.h.p.; triple-expansion engines.

The steamship *Kingston Hill*, on a voyage from Cardiff to Alexandria via the Cape, was torpedoed and sunk by a German submarine on June 7th, 1941, about 450 miles S.W. of the Cape Verde Islands. Fourteen of her crew were lost.

KINGSWOOD

Leopold Walford (London); 1896; Ropner & Son; 1,916 tons; 270x39-5x14-4; 167 n.h.p.; triple-expansion engines. The British cargo ship *Kingswood* sank after a collision off Penmon on March 15th, 1917, while on a voyage from the Tyne to Bayonne.

KINJOSAN MARU

MitsuiBussan Kaisha; 1936; MitsuiBussan Kaisha; 3,262 tons; 332-8x47-1x25; 250 n.h.p.; triple-expansion engines & L.P. turbine.

The steamship *Kinjosan (Kinzyosan) Maru* was torpedoed and sunk by the U.S. submarine *Greenling* on May 4th, 1942, off the Caroline Islands.

KINKA MARU

Kokusai Kisen K.K.; 1937; Kawasaki Dkyd. Co.; 9,305 tons; 481-9x 62-3X 40-2; 2,115 n.h.p.; oilengines. The motor vessel *Kinka Maru* was sunk by U.S. carrier-based aircraft on November 13th, 1944, in Manila Bay.

KINKAI MARU

M. Kotani; 5,852 tons.

The *Kinkai Maru* was torpedoed and sunk by the U.S. submarine *Greenling* on October 3rd, 1942, off Shiogama, Japan.

KINKAI MARU

Tokushima Shokai K.K.; 1918; Bingo Dock Co.; 3,227 tons; 314-9x44-5x —; oil engines.

The motorship *Kinkai Maru* on a voyage from Osaka to Hong Kong with bags of cement was involved in a collision with the *Chunchi* on January 13th, 1961, in Akashi Strait, near Kobe, and sank.

KINKASAN MARU

Mitsui Bussan Kaisha; 1911; Sir Raylton Dixon & Co.; 4,980 tons; 380x 53-5x 27-2; 417 n.h.p.; triple-expansion engines. The steamship *Kinkasan Maru* was torpedoed and sunk by the U.S. submarine *Peto* on October 1st, 1943, S. of the Caroline Islands.

KINKO MARU

Shirokazi Yokuhi; 1903; J. Thompson & Sons; 3,151 tons; 325X 48x 21-6; 285 n.h.p.; triple-expansion engines. The *Kinko Maru* was attacked by pirates and ran ashore on February 28th, 1928, off Foochow.

KINKO MARU

Chosen Yusen K.K.; 1917; *Toba Zosensho*; 1,268 tons; 229-lx 33x18; 88 n.h.p.; triple-expansion engines. The steamship *Kinko Mam* was formerly the British *Siangtan*, seized by the Japanese at Ichang in December, 1941. On May 5th, 1943, she was torpedoed and sunk by the U.S. submarine *Snook* about 100 miles S. of Dairen.

KINNEIL

Love & Stewart; 1900; 1,409 tons; 255x36x15-7; 142 n.h.p.; triple-expansion engines. The British cargo ship *Kinneil* sank after a collision on October 30th, 1913, 75 miles west of the Scaw while on a voyage from Vilajoki to Bo'ness carrying a cargo of pit-props.

KINOENE MARU

Hamaguchi Risen K.K.; 1903; *J. Priestman & Co.*; 4,520 tons; 347x46-5x19-9; 358 n.h.p.; triple-expansion engines. The *Kinoene Maru* was wrecked on March 8th, 1927, at Tongo-chato, Korean Archipelago, while sailing from Nagoya to Dairen.

KINPOSAN MARU

MitsuiBussan Kaisha; 1936; *MitsuiBussan Kaisha*; 3,261 tons; 330 x47x 25; 250 n.h.p.; triple-expansion engines & L.P. turbine. The steamship *Kinposan Maru* was torpedoed and sunk by the U.S. submarine *Greenling* on January 16th, 1943, N. of New Britain.

KINREI MARU

ToaKaiun K.K.; 5,947 tons. The steamship *Kinrei Maru* was torpedoed and sunk by the U.S. submarine *Bang* on May 4th, 1944, about 250 miles S.E. of Hong Kong.

KINREI MARU

1,300 tons. The *Kinrei Maru* was bombed and sunk by U.S. carrier-based aircraft on January 3rd, 1945, off Taipei, Formosa.

KINROSS

British Navy, minesweeper (paddle); 1918; *Fairfield Shipbuilding Co.*; 800 tons; 231x28-5x7-5; 2,200 i.h.p.; 16 knots; triple-expansion engines; *Yarrow boilers*; one 4 in. gun, one 12pr. The minesweeper *Kinross* survived the First World War but was mined and sunk in the Aegean Sea on June 16th, 1919. Her official complement was 72.

KINRYO MARU

Yabuki Gomei Kaisha; 1905; *A. Rodger & Co.*; 4,390 tons; 369-7x 50x 18-8; 393 n.h.p.; triple-expansion engines. The steamship *Kinryo Maru* was torpedoed and sunk by the U.S. submarine *Haddo* on August 21st, 1944, in the Mindoro Straits, Philippines.

KINRYU MARU

Kokusai Kisen K.K.; 1938; *Kawasaki Dockyard Co.*; 9,310 tons; 482x62-3x40; 2,115 n.h.p.; oilengines. The motor liner *Kinryu Maru* was taken over by the Japanese Navy for service as an auxiliary cruiser. On August 25th, 1942, she was bombed and sunk by U.S. land-based aircraft off Tulagi, Solomon Islands.

KINRYUZAN MARU

Turumaru Hirotaro; 1918; *Osaka Yogyo K.K.*; 1,370 tons; 228X34X 19•5; triple-expansion engines. The steamship *Kinryuzan Maru* struck a mine and sank on May 25th, 1945, off Shimonoseki.

KINSHU MARU

Dairen Kisen K.K.; 1919; *J. Coughlan & Sons*; 5,591 tons; 410-7x 54-lx 27-5; 536 n.h.p.; triple-expansion engines. The steamship *Kinshu (Kinsyu) Maru* was torpedoed and sunk by the U.S. submarine *Hake* on June 17th, 1944, E. of Mindanao Island, Philippines.

KINU

Japanese Navy, light cruiser; 1922; *Kawasaki Co.*; 5,170 tons; 535x46-8x15-9; 70,000 s.h.p.; 33 knots; turbine engines; *Kanpon boilers*; seven 5-5 in. guns, two 3 in., 2 m.g., 8 T.T., 1 aircraft.

The light cruiser *Kinu* took part in the battle of Leyte Gulf, October 24th-26th, 1944, and was one of the unfortunate Central Force which sustained such heavy losses in the action off Samar. The cruiser was crippled in the righting of the first two days and on the 26th she was bombed and sunk by U.S. carrier-based and Army aircraft off Masbate.

Her normal complement was 438.

For full story of the battle see Japanese battleship *Musashi*.

KINUGASA

Japanese Navy, heavy cruiser; 1926; *Kawasaki Dockyard*; 7,100 tons; 580x50-7x14-7; 95,000 s.h.p.; 33 knots; turbine engines; *Kanpon boilers*; six 8 in. guns, four 4-7 in., 10 m.g., 12 T.T. 2 air craft.

The heavy cruiser *Kinugasa* took part in the battle of Guadalcanal, November 13th-15th, 1942. Aircraft from the U.S. carrier *Enterprise* damaged several of the larger Japanese units and on the 14th an attack was made on the *Kinugasa* with bombs and aerial torpedoes. The cruiser was hit several times and eventually sank. She carried a complement of about 650.

The full story of the battle is told under the battleship *Kirishima* and the U.S. cruiser *Atlanta*.

KINUGASA MARU

Kokusai Kisen K.K.; 1936; *Kawasaki Dkyd. Co.*; 8,407 tons; 456-3x61x40; 1,850 n.h.p.; oilengines. The motor vessel *Kinugasa Maru* was torpedoed and sunk by the U.S. submarines *Hawkbill* and *Baya* on October 7th, 1944, 380 miles west of Manila.

KINUGAWA MARU

ToyoKaiun K.K.; 1938; *Mitsubishi Jukogyo K.K.*; 6,937 tons; 437-4x58-5x32-8; 839 n.h.p.; oilengines. The motor vessel *Kinugawa Maru* was sunk by U.S. land- and carrier-based aircraft and gunfire from warships on November 15th, 1942, in the Solomon Islands.

KINZAN MARU

Hashimoto Kisen K.K.; 2,220 tons. The *Kinzan Maru* was sunk by U.S. carrier-based aircraft on March 1st, 1945, off the north Ryukyu Islands.

KIPLING

British Navy, destroyer; 1938; *Yarrow*; 1,690 tons; 348x 35x9; 40,000 s.h.p.; 36 knots; turbine engines; 3-drum boilers; six 4-7 in. guns, 6 smaller, 10 T.T. On the afternoon of May 11th, 1942, a destroyer division consisting of *Kipling*, Cdr. A. St C. Ford, p.s.o., *Jervis*, *Jackal* and *Lively* was patrolling between Crete and Libya when it was sighted by enemy aircraft. In the ensuing attack by German dive bombers *Lively* (which see) was hit and sunk with heavy loss of life followed about two hours later by *Kipling*, which sank with the loss of two officers and 23 ratings. Finally *Jackal* was hit and disabled. She was taken in tow by *Jervis* but sank during the night. The total loss of life in this action was three officers and 95 ratings killed or drowned.

KIRIHA MARU

Tatuuma Kisen K.K.; 1919; *Irvines S.B. & D.D. Co.*; 3,057 tons; 331 • 1 x 46 - 8x 23 - 1; 430 n.h.p.; triple-expansion engines. The steamship *Kiriha Maru* was torpedoed and sunk by the U.S. submarine *Triton* on March 6th, 1943, off the Admiralty Islands.

KIRIKAWA MARU

Kawasaki Kisen K.K.; 1937; *Kawasaki Dockyard Co.*; 3,836 tons; 354• 7x 50x 27-6; 333 n.h.p.; turbine engines. The steamship *Kirikawa Maru* was bombed and sunk by U.S. land-based aircraft on February 27th, 1943, off Timor Laut Island.

KIRISHIMA

Japanese Navy, dreadnought battleship; 1913; Mitsubishi; 29,330 tons; 704x95x27-5; 64,000 i.h.p.; 26 knots; turbine engines; Kampon boilers; eight 14 in. guns, sixteen 6 in., eight 5 in., 4m.g., 4 T.T., 3 aircraft.

The battle of Guadalcanal fought by two strong forces of Japanese and American ships took place off Savo Island and covered the three days, November 13th-15th, 1942. The opposing fleets were well matched, the balance being slightly in favour of the Japanese who disposed of four battleships, two aircraft carriers, six cruisers and a number of destroyers (placed as high as 30 by some authorities). To meet this the Americans brought into action before the conclusion of the battle on the third day two new battleships, one large aircraft carrier, five cruisers and 12 destroyers.

The first phase of the battle occurred just before midnight on the 12th when a squadron of U.S. cruisers returning from escorting a convoy of transports which had landed their troops and supplies on Guadalcanal, encountered one of the Japanese squadrons in the Lengo Channel, off Savo Island. This squadron consisted of the battleships *Hiei* and *Kirishima*, both of 29,330 tons, with some cruisers and destroyers.

The American commander was Rear-Admiral D. J. Callaghan, in the *San Francisco*, 9,050 tons, nine 8 in. guns, with Rear-Admiral Norman Scott in the *Atlanta*, 6,000 tons, twelve 5 in. guns, as second-in-command. The other cruisers were the *Portland*, 9,800 tons, nine 8 in. guns, *Helena*, 10,000 tons, fifteen 6 in. guns, and *Juneau*, 6,000 tons, twelve 5 in. guns, with eight destroyers.

The night was dark with no moon and the Americans were in line ahead formation with four destroyers leading, followed by the five cruisers with the remaining four destroyers astern. So dark was the night that the advance units nearly ran into each other before they were aware of what was happening. The Japanese turned on their searchlights and both sides commenced firing simultaneously at close range, the exchange of salvos lasting 15 minutes. In this short space of time, with neither side prepared to give way, the Americans lost the destroyers *Laffey* and *Barton*, both blown up, the cruiser *Atlanta* out of control and on fire with Rear-Admiral Scott killed, the *San Francisco* badly damaged with Rear-Admiral Callaghan and Capt. Young killed, the *Portland* torpedoed and the *Juneau* so badly damaged that, for a time, she was compelled to haul out of the line. The destroyers *O'Bannon* and *Sterrett* were damaged and the *Cushing* sinking.

The Japanese had suffered less severely, one destroyer having been blown up by the *San Francisco*, which had also badly damaged the battleship *Hiei*. Two cruisers had been set on fire but there was no evidence of vital damage to the remainder. The American heavy units now withdrew leaving it to what destroyers remained to carry on the battle. In the brief encounter of not more than ten minutes which ensued the destroyer *Monssen* torpedoed the *Hiei*, which had previously been hit by torpedoes from the *Laffey*, and the *Fletcher* torpedoed a heavy cruiser. The *Monssen* was hit and disabled and sank later. By the afternoon of the 13th several of the damaged American ships had sunk, namely the cruisers *Atlanta* and *Juneau*, the latter torpedoed by a submarine, and the destroyers *Aaron Ward*, *Monssen* and *Cushing*.

Meanwhile the U.S. heavy squadron under Rear-Admiral W. A. Lee comprising the new battleships *Washington* and *South Dakota*, 35,000 tons, nine 16 in. guns each, with the aircraft carrier *Enterprise*, 19,900 tons, and four destroyers was approaching the scene of the action. On the same afternoon aircraft from the *Enterprise* located the damaged *Hiei* off Savo Island and sunk her with bombs and aerial torpedoes. On the 14th the heavy cruiser *Kinugasa* was bombed and sunk off Savo as well as six Japanese transports bringing troops to reinforce the garrison on Guadalcanal.

The second phase of the battle occurred in the early hours of the 15th when a Japanese force was sighted N. of Savo Island. The big U.S. battleships immediately brought their guns to bear on the *Kirishima*, which turned on her searchlights and opened a destructive fire on the *South Dakota*. The *Washington* then took up the action and as a result of salvos from both American battleships the *Kirishima* blew up and sank.

Meanwhile the four U.S. destroyers were engaged with a Japanese flotilla estimated at from six to ten vessels. In this action the destroyers *Benhan*, *Preston* and *Walke* were sunk and the *Gwin* disabled.

The sinking of the *Kirishima* marked the end of the fighting and the now shattered fleets were content to break off the action. The

rate of loss was terribly high. Of 15 large units belonging to both sides which took part in the actual fighting five had been sunk and all the others, save the *Washington* and *Enterprise*, badly damaged. On the Japanese side two battleships, one heavy cruiser and three destroyers, the *Akatsuki* and *Ayanami* of 1,700 tons, and the *Yudachi*, 1,368 tons, had been sunk. On the American side two anti-aircraft cruisers and seven destroyers had suffered a similar fate.

The Japanese transports making for Guadalcanal were repeatedly bombed by American aircraft from Henderson Field, where an aerodrome had been established, and from the *Enterprise*. Eight of the transports were sunk and four were set on fire and eventually ran ashore near Cape Esperance. The loss in personnel to the Japanese army has been placed by some authorities as high as 30,000 men.

The battle of Guadalcanal was the most desperate naval action of the Second World War, most of the vessels lost being sunk by gunfire. Of those ultimately sunk by air attack all had been disabled by gunfire in the first instance. By contrast with the battle of Leyte Gulf it was a more restricted engagement, but while Leyte exemplified the power of the aeroplane as a destructive weapon Guadalcanal demonstrated that under given conditions the heavy gun was still a tremendously important factor.

For further details see under the U.S. anti-aircraft cruiser *Atlanta*.

KIRISHIMA MARU

Kokosai Kisen K.K.; 1931; Kawasaki Dockyard Co.; 8,120 tons; 442-9x59-7x29-9; 1,857 n.h.p.; oil engines. The motor vessel Kirishima (Kirisima) Maru was torpedoed and sunk by the U.S. submarine Bowfin on September 25th, 1943, 350 miles N.W. of Brunei, Sarawak.

KIRKHAM ABBEY

Hull & Netherlands Steamship Co.; 1908; Earle's Co.; 1,166 tons; 255-2x33-7x15-4; 499 n.h.p.; 14 knots; triple-expansion engines.

The steamship *Kirkham Abbey* was torpedoed and sunk by a German submarine two miles N.E. by E. of Winterton on July 27th, 1918. Eight men were killed. The captain was among the survivors.

KIRKPOOL

Pool Shipping Co.; 1928; Sir J. Laing & Sons; 4,842 tons; 405-2x53-6x26-5; 491 n.h.p.; 11 knots; triple-expansion engines.

The steamship *Kirkpool*, Capt. Kennington, on a voyage from Durban to Montevideo with coal, was intercepted and sunk by a raider on April 10th, 1942, some distance N.N.E. of Tristan da Cunha. Three officers and 14 men were killed. The survivors were taken as prisoners to Japan where Capt. Kennington died in captivity.

KIRKWALL

A. Mawson & Co.; 1891; Tyne Iron S.B. Co.; 2,582 tons; 300-5x38-6x20-6; 246 n.h.p.; triple-expansion engines. The British cargo ship Kirkwall sank after a collision with an unknown barque off Ameland on August 5th, 1908, while carrying an ore cargo on a voyage from Huelva to Hamburg. The only survivors were the first mate and boatswain, who were found clinging to floating wreckage some hours later.

KIRKWOOD

*Wm. France, Fenwick & Co.; 1930; Hawthorn, Leslie & Co.; 2,780 tons; 306x44x19-3; 219 n.h.p.; triple-expansion engines. The British cargo ship Kirkwood sank after a collision with the *President Harding* on April 26th, 1930, about two miles west of the Elbe No. 1 lightship. She was on a voyage from the Tyne to Hamburg carrying a cargo of coal.*

KIRNWOOD

Joseph Constantine S.S. Line; 1928; J. Readhead & Sons; 3,829 tons; 389-6x52-5x22; 334 n.h.p.; 11 knots; triple-expansion engines.

The steamship *Kirnwood*, Capt. Norton, was in convoy in the North Atlantic on December 10th, 1941, when she was torpedoed and sunk by a German submarine. Capt. Norton and 11 of the crew were killed.

KERSTEN

D/S A/S Torm; 1919; Kjo'benhavns Flydedok & Skibsvarft; 1,196 tons; 235-4x36-2x13-7; 83n.h.p.; triple-expansion engines.

The Danish steamship *Kirsten* struck a mine and sank on August 9th, 1940, between [^]Ebelo and Bjornskrude.

KIRSTEN B

Th. Brovig; 1918; American S.B. Co.; 2,013 tons; 251x 43-5x20; 274 n.h.p.; triple-expansion engines. While on a voyage from Brest and Rotterdam to Farsund, the Norwegian ship *Kirsten B* went ashore at Loshavn on March 28th, 1930, and broke in two. The after part sank.

KIRSTEN SKOU

OveSkouRed.A/S; 1952; Helsingor Skibs & Msk.; 4,153 tons; 416•2X56-5x—; oil engines.

The Danish motorship *Kirsten Skou* was in collision with the *Karpfanger* in a fog on March 29th, 1962, and sank six miles S. of Dover. She was on a voyage from Bremen to Beira.

KISA

Svenska Sockerfabriks; 1920; Ph. Stuhr's Mask. & Skibs.; 1,241 tons; 236-7x36-1x13-4; 101 n.h.p.; triple-expansion engines.

The Swedish ship *Kisa* was in collision with the trawler *Island* during a fog on December 11th, 1943, and sank S.W. of Lang-baden Shoal, near Tistlarne. She was carrying sugar.

KISARAGI

Japanese Navy, destroyer; 1925; Maizuru; 1,315 tons; 320x 30x9-9; 38,500 s.h.p.; 34 knots; turbine engines; Kanpon boilers; four 4 - 7 in. guns, 2 A.A.m.g., 6T.T. The destroyers *Hayate* and *Kisaragi* were part of a Japanese force detailed for the capture of the American base on the island of Wake. The defences of the island were entrusted to the U.S. Marine Corps and the first attack, made on December 11th, 1941, four days after the air raid on Pearl Harbour, was repulsed with heavy loss. Both the *Hayate* and *Kisaragi* were sunk by the guns of the shore batteries, and in manoeuvring off the coast the submarine *RO-66* was run down by one of the ships in company. A second attack succeeded in overwhelming the small garrison and Wake Island surrendered on the 20th.

The normal complement of the destroyers was 148 and 150 respectively, and that of the *RO-66* was 48.

KISH

Clyde Shipping Co.; 1902; Scott & Co.; 4,928 tons; 410-1x 50-2x28-4; 350 n.h.p.; 10-5 knots; triple-expansion engines. The steamship *Kish* was torpedoed and sunk by a German submarine 160 miles N.W. by W. of Fastnet on April 17th, 1917. Six men were killed. The captain was among the survivors.

KISHINAMI

Japanese Navy, destroyer; 1942; Japan; 2,200 tons; 415X 35X —; 34 knots; turbine engines; six 5 in. guns, eight 25mm A.A. The destroyer *Kishinami* was torpedoed and sunk in the South China Sea by the U.S. submarine *Flasher* on December 4th, 1944. The destroyer carried a complement of over 200.

KISHU MARU

Osaka Syosen K.K.; 1920; Osaka Iron Works; 2,548 tons; 284-5x42-5x23; triple-expansion engines. The steamship *Kishu* (*Kisyu*) *Mam* was bombed and sunk by U.S. land-based aircraft on March 26th, 1945, about 50 miles S.W. of Formosa.

KISHUN MARU

Tatuuma Kisen K.K.; 1918; Mitsubishi Zosen Kaisha; 1,864 tons; 250x37-7x20-5; triple-expansion engines. The steamship *Kishun* (*Kisyun*) *Mam* struck a mine and sank on June 1st, 1945, off Shimonoseki.

KISO

Japanese Navy, light cruiser; 1920; Mitsubishi; 5,100 tons; 535x 46-8x 15-8; 70,000 s.h.p.; 33 knots; turbine engines; Kanpon boilers; seven 5-5 in. guns, two 3 in., 2 m.g., 8 T.T., 80 mines, 1 aircraft.

The light cruiser *Kiso* was one of the many victims of intensive bombing of Philippine harbours by American carrier-borne aircraft during November, 1944. In all three cruisers and seven destroyers as well as a large number of auxiliaries and supply ships were sunk by bombs in that month. The *Kiso* was sunk in Manila harbour on November 13th, after sustaining six hits from aircraft of the U.S. Third Fleet.

The vessel's normal complement was 439.

KISO MARU

Syoyo Syosen K.K.; 1920; Mitsui Bussan Kaisha; 4,071 tons; 345x 50x 26-6; 350 n.h.p.; triple-expansion engines. The steamship *Kiso Maru* was torpedoed and sunk by the U.S. submarine *Tinosa* on November 22nd, 1943, off the Palau Islands.

KISOGAWA MARU

Toyo Kaiun K.K.; 1940; Kawaminami Kogyo K.K.; 1,914 tons; 271 - 7x40x20-3; steam engines.

The steamship *Kisogawa Mam* was torpedoed and sunk by a British submarine on November 10th, 1943, off the west coast of Malaya.

KITAHUKU MARU

Kitagawa Sangyo Kaiun K.K.; 1912; J. L. Thompson & Sons; 5,977 tons; 388 - 4X 53 • 8X 36 - 5; 445 n.h.p.; triple-expansion engines.

The *Kitahuku Mam* went ashore on March 17th, 1940, E. of Kumesima.

KITAKATA MARU

NikkaKyoshinKoshi; 1901; BlythS.B.Co.; 2,380 tons; 286-7x 43-3x19-4; 234 n.h.p.; triple-expansion engines.

The steamship *Kitakata Mam* was torpedoed and sunk by the U.S. submarine *Drum* on May 25th, 1942, off Tateyama, Japan.

KITAKATA MARU

Kuribavashi Shosen K.K.; 2,218 tons.

The *Kitakata Maru* struck a mine and sank on May 25th, 1945, off Yawata, Japan.

KITANO MARU

Nippon Yusen K.K.; 1909; Mitsubishi Dockyard & E. Works; 7,951 tons; 464-9x55-8x34-5; 973 n.h.p.; triple-expansion engines.

The steamship *Kitano Maru* struck a mine and sank on March 27th, 1942, off Lingayen, Philippines.

KITE

British Navy, sloop; 1941; Cammell Laird; 1,250 tons; 229-5x 38x8-7; 4,300 s.h.p.; 20 knots; turbine engines; six 4 in. A.A. guns, 2pom-poms.

The sloop *Kite*, Lt. Cdr. A. N. G. Campbell, was a unit of a force under command of Vice-Admiral F. H. G. Dalrymple-Hamilton, C.B., in the aircraft carrier *Vindex*, which was escorting a large convoy to Russia. On August 21st, 1944, the convoy was attacked by a strong force of submarines, several of which had previously been sighted by aircraft from *Vindex* and *Striker*. An attack was made on the enemy formation from the air and depth charges from Swordfish aircraft sank one submarine. Later destroyers and frigates accounted for two others, but during these operations *Kite* was torpedoed and sunk with a loss of ten officers, including Lt. Cdr. Campbell, and 207 ratings.

KITHIRA

Sakellaropoulos, Scambavia & Spathis; 1890; E. Withy & Co.; 2,240 tons; 300x38-5x20-6; 232 n.h.p.; triple-expansion engines.

The Greek cargo ship *Kithira* was sunk by a German submarine off the west coast of Africa on February 16th, 1918.

KITSURIN MARU

KITSURIN MARU

Osaka Syosen K.K.; 1935; *Mitsubishi Jukogyo Kaisha*; 6,783 tons; 427X 56 • 1 x 33 -1; turbine engines.

The *Kitsurin (Kiturin) Mam* struck a mine and sank on May 11th, 1945, off Kobe.

KITTIWAKE

Cork Steamship Co.; 1906; *Swan, Hunter & Wigham Richardson*; 1,866 tons; 290x38-5x20-1; 304 n.h.p.; 12 knots; triple-expansion engines.

The steamship *Kittiwake* was torpedoed and sunk by a German submarine 25 miles N.W. of the Maas lightship on April 9th, 1917. Seven men were killed. The captain was among the survivors.

KITTY'S BROOK

Bowater's Newfoundland Pulp & Paper Mills; 1907; *Irvine's S.B. & D.D. Co.*; 4,031 tons; 324-7x 45-9x 30-7; 312 n.h.p.; triple-expansion engines.

The Canadian steamship *Kitty's Brook* was torpedoed and sunk by a German submarine on May 9th, 1942, about 450 miles out from New York on a voyage to Argentina, N.F.L. Nine of her crew were killed.

KIYO MARU

Asano Bussan K.K.; 1930; *Deutsche Werft A.G.*; 7,251 tons; 416-6x 57x 33; 975 n.h.p.; oilengines.

The tanker *Kiyo Mam* was torpedoed and sunk by the U.S. submarine *Rasher* on January 4th, 1944, about 100 miles N. of Great Natuna Island in the South China Sea.

KIYO MARU

Kaiyo Kisen K.K.; 1912; *W. Doxford & Sons*; 4,428 tons; 390X 54 -1X 27 • 5; triple-expansion engines. The steamship *Kiyo Maru* was bombed and sunk by U.S. carrier-based aircraft on January 12th, 1945, 15 miles E. of Gocong, Indo-China.

KIYOKAWA MARU

Kawasaki Kisen K.K.; 1937; *Kawasaki Dockyard Co.*; 6,862 tons; 479-4x62-3x30-3; 1,850 n.h.p.; oilengines.

The motorship *Kiyokawa Maru* struck a mine and sank on May 24th, 1945, off Nagasaki.

KIYONAMI

Japanese Navy, destroyer; 1941; *Japan*; 2,200 tons; 415x 35x —; 34 knots; turbine engines; six 5 in. guns, eight 25 mm. A.A., 15 T.T.

The destroyers *Kiyonami* and *Yugure* were part of a force escorting a convoy in a last desperate attempt to reinforce their troops on the island of New Georgia. The convoy took the route through the Vella Gulf on the night of July 20th, 1943, but was located by U.S. aircraft of the Army, Navy and Marine Corps and compelled to disperse. The two destroyers were sunk and several transports damaged.

The complement of the *Kiyonami* was over 200 and of the *Yugure* was 180.

KIYOSHIMO

Japanese Navy, destroyer; 1942; *Japan*; 2,200 tons; 415x 35x —; 34 knots; turbine engines; six 5 in. guns, eight 25 mm. A.A. 15 T.T.

The Japanese destroyer *Kiyoshimo* was off Mindoro on December 26th, 1944, when she was attacked by U.S. aircraft and a motor torpedo boat. The vessel was hit and sunk. She carried a complement of over 200.

KIYOSUMI MARU

Kokusai Kisen K.K.; 1934; *Kawasaki Dockyard*; 8,614 tons; 453-5x60-7x40-1; 2,178 n.h.p.; 16-5 knots; oilengines. The liner *Kiyosumi Maru* was taken over by the Japanese Admiralty during the Second World War for service as an auxiliary cruiser. On February 17th, 1944, when in the Caroline Islands area, she was bombed and sunk by U.S. carrier-borne aircraft.

KIYOTADA MARU

Ube Cement K.K.; 1936; *Mitsubishi Jukogyo K.K.*; 3,079 tons; 305-1x 50x 22; 272 n.h.p.; oil engines.

The motorship *Kiyotada Maru* struck a mine and sank on July 28th, 1945, off Shimonoseki.

KIZAN MARU

Tsurumaru Kisen K.K.; 2,841 tons. The *Kizan Maru* was bombed and sunk by U.S. land-based aircraft on November 23rd, 1943, in Kau Bay, Moluccas.

KIZILIRMAK

Turk Silepcilik Limitet Sirketi; 1898; *Irvine's S.B. & D.D. Co.*; 2,794 tons; 324x46x20-5; 267 n.h.p.; triple-expansion engines. The Turkish ship *Kizilirmak* sank during a storm on the night of December 22nd/23rd, 1939, six miles W. of Sinop in the Black Sea. The crew of 20 were drowned.

KIZUGAWA MARU

Toyo Kaiun K.K.; 1,915 tons. The steamship *Kizugawa Maru* was torpedoed and sunk by the U.S. submarine *Seahorse* on April 8th, 1944, 30 miles south of Guam Island.

KJOBENHAVN

D/S Pacific A/S; 1923; *Howaldtswerke*; 1,264 tons; 238x 37• 2x 13-7; 102 n.h.p.; triple-expansion engines. The Danish steamship *Kjobenhavn*, under German control, struck a mine and sank on February 20th, 1943, near Borkum.

KJOBENHAVN

Forenede Dampskibs Selskab; 1918; *Helsingors Jernskibsverf A/S*; 1,668 tons; 270-4x 40-2x 14-3; 288 n.h.p.; 14-5 knots; triple-expansion engines.

The passenger steamship *Kjobenhavn* was on a voyage from Copenhagen to Aalborg with 350 passengers and a crew of 52, on the morning of Friday, June 11th, 1948, when she struck a drifting mine some 15 miles off the coast of Jutland. The mine exploded on the starboard side amidships and the vessel took a heavy list preventing the launching of many of the lifeboats, only two of which got afloat. Within ten minutes the ship had foundered.

The steamship *Frigga* of the same company answered the S.O.S. call and arrived in time to rescue 216 passengers and 45 crew. The explosion occurred just before 5 a.m. when the passengers were asleep below and the immediate failure of the electric light greatly hampered their efforts to gain the deck.

The route used by the *Kjobenhavn* was considered perfectly safe as it had been swept for mines and had been in use for a considerable time after the war.

KLAMATH

Chas. R. McCormick & Co.; 1909; *H. D. Bendixsen S.B. Co.*; 1,083 tons; 207-5x41-6x15-4; 112 n.h.p.; triple-expansion engines.

The wooden American ship *Klamath* was wrecked on February 5th, 1921, near Del Mar Landing, California, while on a voyage from San Francisco to Portland, Or.

KLAMPENBORG

C. K. Hansen; 1889; *Tyne Iron S.B. Co.*; 1,785 tons; 265X 36-5x16-2; 177 n.h.p.; triple-expansion engines. The Danish steamship *Klampenborg* was sunk by a German submarine off Ushant on January 19th, 1917.

KLAUS FRITZEN

Johs. Fritzen & Sohn vorm. W. Kunstmann; 1922; *Vulcan Werke*; 2,936 tons; 316-5x45-1x21-3; 147 n.h.p.; triple-expansion engines.

The German steamship *Klaus Fritzen* was bombed and sunk by British aircraft on May 4th, 1943, in the North Sea.

KLAUS HOWALDT

Bernhard Howaldt; 1938; *Nordseewerke Emden*; 5,956 tons; 437-4x59x23-6; 306 n.h.p.; compound engines & L.P. turbine. The German steamship *Klaus Howaldt* was bombed and sunk by British aircraft on May 13th, 1943, off the Naze, Norway.

KLEBER

French Navy, armoured cruiser; 1902; Creusot; 7,578 tons; 426-5x58-5x24-5; 17,000 i.h.p.; 21 knots; triple-expansion engines; Niclausseboilers; eight6-4 in.guns, four 4 in., ten3pdr., 2 T.T.

The French armoured cruiser *Kleber* was off Cape St. Mathieu on June 27th, 1916, when she struck a mine and sank. The ship had been serving on the West African station where she had acted as flagship to Rear-Admiral Jaures.

Of the *Kleber's* complement of 520 nearly all were saved by the escorting torpedo boats. The cruiser sank in a very short time" Her captain remained on the bridge until he was flung into the sea as the cruiser foundered. He came to the surface and was rescued.

KLIPFONTEIN

Vereenigde Nederlandsche Scheepv. Maats.; 1939; N.V. Mch. & Scheepswrf. van P. Smit Jr.; 10,544 tons; 499-3x62-9x33-1; 2,052 n.h.p.; 17 knots; oilengines.

The Dutch liner *Klipfontein*, on a voyage from Lourenco Marques to Beira, struck a submerged reef on January 8th, 1953, five miles from Cape Barra, near Inhambane. This caused an explosion in the forward oil tank and the ship sank some 45 minutes later. There was no loss of life. The crew of 119 and 114 passengers were taken off by the Union-Castle liner *Bloemfontein Castle*.

KLUPFEL

Fried. Krupp A.G.; 1922; Fried. Krupp A.G.; 3,959 tons; 338 x 47 • 4 X 26 - 2; 289 n.h.p.; triple-expansion engines. The German ship *Klupfel*, carrying coal from Hull to Bremerhaven, was disabled in a heavy storm on August 30th, 1923, between Terschelling and Borkum. The captain ordered the crew of 41 into the boats but himself remained on board. He was taken off by the Dutch trawler *Java* just before the *Klupfel* sank, but all the men in the boats were drowned.

KNAPTON HALL

Dixon & Harris; 1870; Palmers" Co.; 903 tons; 221x29-2x 17-5; 99 h.p.; compound inverted engines.

The steamship *Knapton Hall* was sunk in a collision with the iron sailing ship *Lochfyne*, 1,270 tons, on October 15th, 1877. The steamship sank with the loss of nine lives.

KNEBWORTH

Dalglish S.S. Co.; 1919; Dunlop, Bremner & Co.; 2,555 tons; 302-9x42-9x20-7; 262 n.h.p.; triple-expansion engines. The British cargo ship *Knebworth* was wrecked near Biarritz lighthouse on January 27th, 1930. She was on a voyage from Blyth to Bayonne carrying a cargo of coal.

KNIAZ SUVAROFF

Russian Navy, 1st class battleship; 1904; Baltic Works; 13,516 tons; 376-5x76x26; 15,800i.h.p.; 17-6knots; triple-expansion engines; four 12 in. guns, twelve 6 in., two 2% pdr., twenty 12 pdr., twenty 3 pdr., 4 T.T.

The battleship *Kniaz Suvaroff* was newly completed when the Russo-Japanese War broke out on February 8th, 1904. Japanese torpedo boats attacked and damaged a number of Russian warships lying off Port Arthur. The course of the conflict, both on land and sea, went heavily against Russia, but public opinion in that country was loud in its demand that a fleet, adequate to the task, should be sent to the Far East to retrieve the fortunes of the day. In response to this demand, and with much more optimism than thoroughness, the Russian naval authorities prepared a large number of ships drawn from their Baltic ports to form a second Far Eastern fleet. It was to be assembled by September, 1904, and there was, ready to hand, a group of four new battleships nearing completion on the Neva and at Cronstadt. One of these was the *Kniaz Suvaroff*, which was fitted out as flagship for Vice-Admiral Zinivy Petrovich Rojdestvensky, who was appointed commander-in-chief.

After many delays, and the repair of a multitude of defects, the heterogeneous collection of vessels left Libau on October 15th, for Port Arthur. Neither the ships nor the men were in fighting trim, while the combination of brand new battleships and cruisers with a number of much less modern ships was manifestly unwise. In the light of subsequent events the best arrangement would have been for the newest and fastest ships of all classes, manned by the very best officers and men of the Russian navy, to have made an immediate dash for Port Arthur while that fortress was still holding out. As it was, time, skill and energy were frittered away in preparing ships long past their prime, and in spreading the trained personnel throughout a large and unwieldy fleet. This was particularly the case with engineers and stokers experienced in the new tubular boilers, and with trained gun layers.

The cruise of the fleet to the Far East until it met the Japanese occupied no less than seven months and ten days, during which time the crews of the first contingent improved to some degree, but at the cost of the efficiency of the ships, all of which fell off in speed owing to foul hulls. From the outset the voyage was dogged by misfortune. A rumour that the Japanese had acquired a number of fast light craft, to act as torpedo boats in European waters, made the officers in command very nervous. As a result a Swedish merchantman and a German fishing smack were fired on as the fleet passed out of the Baltic, and later, when off the Dogger Bank, English fishing trawlers were subjected to a very heavy fire at night. One boat was sunk and several men were killed and injured. This aroused great public indignation in England, and some diplomatic tension, until Russia agreed to participate in an international inquiry.

The fleet, which was still known as the Baltic Fleet, though it was officially designated the Second Pacific Squadron, arrived at Tangier on November 3rd, where it divided, the first division under the commander-in-chief going by the Cape route, and the second division under Rear-Admiral Fokkersham through the Suez Canal. On November 7th a third division, consisting of two armoured and three auxiliary cruisers, with a flotilla of destroyers and some storeships, left Libau. Later, on February 15th, 1905, a fourth division was despatched, composed of old battleships and cruisers, under command of Rear-Admiral Nebogatoff. This reinforcement was not welcomed by Admiral Rojdestvensky, who protested strongly to the Russian Admiralty against the inclusion of such a useless addition of naval scrap iron. He left Madagascar without waiting for it and steamed across the Indian Ocean for 5,000 miles without touching port, hoping thereby to prevent it joining him before his meeting with the Japanese. This was not to be, and in May the fourth division caught up with the rest of the fleet off French Cochinchina.

Meanwhile the object which had called forth all this expenditure of wealth and effort, ceased to be attainable. On January 1st, 1905, General Stoessel, defending Port Arthur, asked for terms, and surrendered the fortress next day. This catastrophe rendered the already difficult task of the Baltic Fleet far more perilous; nevertheless Admiral Rojdestvensky determined to press on to Vladivostock. On approaching Japanese waters the admiral made his first mistake in deciding to send his colliers, store ships and armed merchantmen, into the Wusung River for safety. This tactic advertised that he intended to pass through the straits of Tsu-Shima and, if necessary, give battle there. The folly of this move was not long lost upon the Japanese.

The composition of the Baltic Fleet about to do battle was as follows:—

	tons	knots	guns
1st Division			
<i>Kniaz Suvaroff</i> (flagship)	13,516	17-6	4-12 in., 12-6 in.
<i>Imperator Alexander III</i>	"	17-8	"
<i>Borodino</i>	"	17-6	"
<i>Orel</i>	"	17-6	"
2nd Division			
<i>Ossliabya</i> (flagship)	12,674	18-3	„ 10 in., 11 „
<i>Sissoi Veliki</i>	10,400	15-7	„ 12 in., 6
<i>Navarin</i>	10,206	"	"
<i>Admiral Nakimoff</i>	8,524	16-6	8-8 in., „ 10

3rd Division	tons	knots	guns
<i>Imperator Nikolai I.</i> (flagship) <i>General</i>	9,672	14	2-12 in., 4-9 in., 8-6 in.
<i>Admiral Apraxin</i>	4,126	16	3-10 in., 4-4-7 in.
<i>Admiral Senyavin</i>	4,960	16-1	4-9-4 in., 4-6 in.
<i>Admiral Ushakoff</i>	4,126	„	„ „ „ „
Cruiser Division			
<i>Oleg</i> (flagship)	6,645	23	12-6 in.
<i>Aurora</i>	6,731	20	8 „
<i>Dimitri Donskoi</i>	6,200	16-5	6 „ 10-4 . 7 in.
<i>Vladimir Monomach</i>	5,593	17-5	5 „ 6 „

The light cruisers *Jemtchug* and *Izumrud*, sister ships of 3,103 tons and six 4-7 in. guns, acted as flotilla leaders as they were both 24 knot ships. The light cruisers *Almaz* and *Svietlana*, 3,285 tons and 3,828 tons respectively, acted as escorts. In addition there was the auxiliary cruiser *Ural*, formerly the German liner *Konigin Maria Theresa*, a flotilla of nine destroyers, several transports, two repair ships and two hospital ships. The speed given above is the paper speed, and it is doubtful if any vessels, except the very new ones, could attain to the figure ascribed to them.

To add to the Russian difficulties, Rear-Admiral Folkersham, who had been a sick man during the latter part of the voyage, died two days before the battle, his coffin, under the Imperial ensign, being carried on the upper deck of his flagship, the *Ossliabya*, which continued to fly his flag in order that the news of his death might not depress the spirits of the superstitious Russian sailors.

The much advertised and lengthy cruise of the Baltic Fleet had, in part, been made possible by the alliance with France, for it was in the ports of the French colonial possessions that Rojdestvensky had found refuge. Along the coast of French Africa, at Madagascar and last of all in Cochin China, the fleet had coaled, exercised and drilled. During this time there had been an exchange of diplomatic notes between Japan and France, until the latter country's patience with its naval guests had worn very thin.

On May 27th, Admiral Togo was at Sylvia Basin, Korea, awaiting news of the approach of the Russians. The fleet under his command was as perfect and ready as that of his adversary was imperfect and unready. On paper both fleets were formidable, in practice poles asunder. There was, however, one noticeable likeness between them, and this was that both contained a large proportion of old ships. In the Japanese case this was because they could not afford to do without them, or to discard any unit capable of steaming in line or firing a gun.

The Japanese fleet was composed as follows:—1st

Division	tons	knots	guns
<i>Mikasa</i> (flagship)	15,140	18	4-12 in., 14-6 in.
<i>Shikishima</i>	14,850	„	„ „ „
<i>Asahi</i>	15,200	„	„ „ „
<i>Fuji</i>	12,450	„	„ „ „
<i>Nisshin</i>	7,628	20	4-8 in., 14 „
<i>Kasuga</i>	7,628	„	1-10 in, 2-8 in, 14-6 in.
2nd Division			
<i>Idzumo</i> (flagship)	9,750	20-75	4-8 in., 14-6 in.
<i>Iwate</i>	„	„	„ „
<i>Tokiwa</i>	„	21-5	„ „
<i>Asama</i>	9,700	„	„ „
<i>Yakumo</i>	9,646	20	„ 12
<i>Adzuma</i>	9,307	„	„ „
3rd Division			
<i>Kasagi</i> (flagship)	4,862	22-5	2 10-4 . 7 in
<i>Chitose</i>	4,760	„	„ „
<i>Nitaka</i>	3,365	20	6-6 in „
<i>Otawa</i>	3,000	21	2 6-4 . 7 in

4th Division	tons	knots	guns
<i>Naniwa</i> (flagship)	3,650	18	8
<i>Takachiho</i>			2-10 in., 6-6 in.
<i>Tsushima</i>	3,365	20	6-6 in.
<i>Akashi</i>	2,657	„	2 „ 6-4-7 in.
5th Division			
<i>Itsukushima</i> (flagship)	4,210	16	1-12-5 in., 11-4-7 in
<i>Hashidate</i>	„	„	„ „
<i>Matsushima</i>	„	„	„ „
<i>Chin-yen</i>	7,220	15	4-12 in, 4-6 in.
6th Division			
<i>Suma</i>	2,657	20	2-6 in., 6-4-7 in
<i>Chiyoda</i>	2,450	19	10-4-7 in
<i>Akitsushima</i>	3,150	„	4-6 in., 6-4-7 in.
<i>Izumi</i>	2,950	17	2
7th Division			
<i>Fuso</i> (flagship)	3,718	13	4-24 cm. guns, 4-6 in.

and five gunboats, the *Tsukushi*, *Takao*, *Maya*, *Chokai* and *Uji*, 1,774 to 615 tons, 13 to 16-5 knots, 10 in. to 6 in. guns.

It will be seen from the above that the Japanese possessed a definite superiority when it came to fast light cruisers, though none of these were very big, or heavily armed. Their usefulness lay in their ability to keep the Russians under constant surveillance and to report everything to Togo. The Japanese also had five torpedo squadrons comprising 21 destroyers and 80 torpedo boats, with two or three torpedo gunboats.

The morning of the battle dawned with mist and a heavy sea, and until two in the afternoon Togo was content to shadow his foes as they steamed through the straits. There was a little desultory firing between 11 o'clock and noon, which the Russian admiral peremptorily stopped, being anxious to conserve his ammunition. The Baltic Fleet was steaming at about 12 knots, on a north-westerly course, in two columns line ahead, the starboard column being the stronger. Admiral Togo, for two reasons, decided to attack the port column, firstly because it was nearest on the course to Vladivostok, and secondly because it was the weaker. He therefore increased speed and headed N.W. by N., crossing the bows of his enemy about five miles ahead, then turning to port and steaming parallel in an opposite direction. The Russians continued to forge to the North and the distance between the two fleets rapidly decreased. Togo was anxious to prevent the battle developing into a chase, for that would have meant the possible escape of many Russian ships, probably the best of them. The Japanese admiral had a choice of three moves.

- (i) He could permit the battle to develop into a chase, in which case he must abandon hope of his enemy's complete destruction.
- (ii) He could turn his line together to bring his ships on the same course as his enemy, which would mean that his line would be reversed and his flagship would be last, and not first, as it should be.
- (iii) He could turn his ships in succession, which would mean that each unit would steam to the point at which the leading ship had turned and then turn and follow the ship in front of her. This would involve a dangerous bunching of the ships for several minutes, during which time an enterprising enemy might concentrate a destructive fire without exposing himself to much harm. If, however, the manoeuvre succeeded, then the Japanese admiral would be in a position to head off the enemy from his northward course and compel him to fight a close and desperate action.

Admiral Togo had already gauged the quality of Russian seamanship and he elected for the third course, dangerous as it appeared. When it was completed he could cross the "T" of the opposing line and overwhelm the leading ships.

The turn in succession of the Japanese 1st and 2nd Divisions occupied 16 minutes, their mean speed being 15 knots. At its con-

elusion they were running parallel with the Russians, whose fire had been fierce but ineffective. Moreover the latter had previously attempted to station their first division ahead of their second, thus making a single line of battle. This they had not been able to do in time and the confusion among them had undoubtedly prevented their taking full advantage of the Japanese turn. As it was the *Ossliabya*, flagship of the rear-admiral, was out of the line and nearer to the Japanese than were her consorts. She became the target for an overwhelming fire and slowly turned over until her gun ports were level with the water, when she capsized. This disaster was witnessed by both fleets and had a profound effect upon the morale of the Russians.

Meanwhile Rojdestvensky had turned away to starboard, his flagship being subjected to the same overwhelming fire as that sustained by the *Ossliabya*. His speed, owing to the presence of so many old ships, was reduced to ten knots. After an hour the *Kniaz Suvaroff* was driven out of the line, and for four dreadful hours lay helpless between the rival fleets, receiving salvo after salvo from passing ships, but always replying to their fire. Her steering gear smashed, her upper works and bridges a mass of twisted iron, her big gun turrets out of action, her lower decks full of mangled and dying men, she still fought on. At a little past seven in the evening, having been reduced to a blazing wreck, the vessel was attacked and sunk by torpedo boats. With her flags flying and her few remaining guns firing the *Kniaz Suvaroff* went down, having maintained a discipline and a fighting spirit worthy of the highest traditions of any navy. Only a mere fraction of her complement were saved. Admiral Rojdestvensky, twice wounded and almost unconscious, was transferred to the destroyer *Buiny*, which ran alongside the stricken battleship and at great risk took off a number of wounded officers and men. This was about 5 o'clock, and for some time prior to that the Russians had been led by the *Imperator Alexander III*, but by 7 o'clock this ship had capsized and sunk, followed by the *Borodino*, which blew up a quarter of an hour later. Of the five new Russian battleships the *Orel* was now the only one afloat. She attached herself to Admiral Nebogatoff's division, which, with the cruiser *Izumrud*, was battered but intact.

Throughout the night these ships dodged the Japanese torpedo attacks, making what speed they could for Vladivostock. At dawn the ships were seen to be surrounded by Japanese cruisers, which could pour in a concentrated fire while themselves keeping out of range of the old Russian guns, the three 12 in. guns of the *Orel* being the only ones capable of hitting. In these circumstances Admiral Nebogatoff decided to surrender, being convinced that no useful purpose would be gained by sacrificing the 2,000 odd men under his command. All the ships hauled down their colours, except the *Izumrud*, which ran for Vladivostock and was wrecked in a dense fog when entering Vladimir Bay. The *Admiral Ushakoff* had fallen considerably behind her consorts during the night and, on becoming aware of what had happened decided to go down fighting, which she did, taking her brave captain with her.

There now remained nothing of the Baltic Fleet but a few odd ships, and of these only three, the light cruiser *Almaz* and the destroyers *Brawy* and *Gresny*, reached Vladivostock. Admiral Enquist with the *Oleg*, *Aurora* and *Jemtchug* (which see) steamed through the straits of Tsu-Shima in darkness and by devious courses reached Manila. The old ships *Navarin*, *Dimitri Donskoi*, *Admiral Nakimoff*, *Sissoi Veliki* and *Vladimir Monomach*, together with the cruiser *Svietlana*, lost touch with the main fleet and were destroyed either by torpedo or gunfire during the night or the following day. All these ships fought well and upheld the best naval traditions.

Admiral Rojdestvensky was surrendered to the Japanese by the destroyer *Buiny*, which could make no dispositions for his safety against such overwhelming odds.

The Russian losses in ships consisted of all their battleships, four out of their eight cruisers, and seven of their nine destroyers. The loss of life amounted to 4,830 officers and men, with over 10,000 wounded and captured.

The Japanese lost two torpedo boats, the *Nos*, 35 and 65, and their loss of life was 117 officers and men, with under 1,000 wounded.

On their return to Russia Admiral Nebogatoff and his officers were tried and sentenced to a term of imprisonment for the surrender of their ships, despite the protest of Admiral Rojdestvensky at the injustice of the proceeding. The Russian Admiralty would not give way, however, and the sentences were carried out.

KNIGHT COMMANDER

Greenshields, Come & Co.; 1890; Palmers' Co.; 4,306 tons; 400x47-2x27-9; 435 n.h.p.; triple-expansion engines. The British cargo ship *Knight Commander* was sunk by a Russian warship off Idzu, Japan, on July 23rd, 1904. She was on a voyage from New York to Yokohama carrying a general cargo.

KNIGHT COMPANION

Greenshields, Come & Co.; 1900; W.Dobson&Co.; 4,111 tons; 370 '5x47x19-6; 376 n.h.p.; triple-expansion engines. The British cargo ship *Knight Companion* was wrecked on the coast of Japan in 35° N., 140° E., on February 3rd, 1902. She was on a voyage from Portland, Oregon, to Japan carrying a general cargo.

KNIGHT TEMPLAR

Henry Samman; 1874; Austin & Hunter; 1,567 tons; 262 X 32-2x23-9; 160 h.p.; compound engines.

The British cargo ship *Knight Templar* was wrecked off Finisterre on December 18th, 1888, while on a voyage from Odessa to Hull carrying a cargo of wheat and barley.

KNIGHT OF ST. GEORGE

Greenshields, Come & Co.; 1890; Palmers' Co.; 4,710 tons; 404-5x48x27-4; 435 n.h.p.; triple-expansion engines. The British cargo ship *Knight of St. George* was wrecked on a reef one mile north of Egeria Passage, Tongatabu, on August 20th, 1911. She was on a voyage from Tacoma to Sydney, N.S.W., carrying a general cargo.

KNIGHT OF THE BATH

Greenshields, Come & Co.; 1881; T. Roy den & Son; 2,311 tons; 320 x 35x24-4; 300 h.p.; compound inverted engines. The British cargo ship *Knight of the Bath* was wrecked off Kuria Muria Island on June 17th, 1883, while on a voyage from Bombay to Havre carrying a general cargo. The captain and 16 of the crew reached shore and were subsequently taken off by an Indian Government ship, but the rest of the crew were drowned.

KNIGHT OF THE THISTLE

A. Holt & Co.; 1903; C. Cornell & Co.; 6,675 tons; 455-8X 55-2x30-7; 552 n.h.p.; triple-expansion engines. The British cargo ship *Knight of the Thistle* foundered on December 10th, 1917, in 42° 19' N., 56° 50' W., while on a voyage from New York to London carrying a general cargo.

KNITSLEY

Consitt Iron Co.; 1924; Wood, Skinner & Co.; 2,272 tons; 294-6x40-7x18-2; 239 n.h.p.; triple-expansion engines. The steamship *Knitsley*, on a voyage from London to the Tyne, was torpedoed and sunk by a German motor torpedo boat on December 12th, 1942, off Lowestoft. Eleven of her crew and one gunner were killed.

KNUD

N.K.Stroyberg; 1871; Hall, Russell & Co.; 1,020 tons; 231-2 X 30-3x17; 130 n.h.p.; triple-expansion engines. The Danish steamship *Knud*, outward bound for Valencia with coal, was sunk in a collision with the steamship *Swaledale*, 3,658 tons, on November 20th, 1902, outside South Shields, River Tyne. The captain and seven of the crew were lost.

KNUD VILLEMoes

D/S A/S Jyden; 1905; Niiske & Co.; 1,582 tons; 247-4X 36-8x16-6; 120 n.h.p.; triple-expansion engines. The Danish steamship *Knud Villemoes*, under German control, struck a mine and sank on July 27th, 1941, off Heligoland.

KNUT HAMSUN

Olaf Orvig; 1911; W. Gray & Co.; 5,272 tons; 410x54x26-5; 369 n.h.p.; triple-expansion engines.

The Norwegian ship *Knut Hamsun*, Capt. Frich, was sailing from Tocopilla to Jacksonville with 8,500 tons of nitrate when she caught fire and sank at 10 p.m. on June 10th, 1934, about 30 miles S.W. of Roncador Bank in the Caribbean Sea.

KNUTE NELSON

A/SBorga; 1926; *Odense Staalskibsværft*; 5,749 tons; 435-9 X 56-2x27-8; 951 n.h.p.; oil engines.

The Norwegian motorship *Knute Nelson*, under German control, was torpedoed and sunk by a British submarine on September 27th, 1944, off the Norwegian coast. Nine of her crew were lost.

KNYAGUINYA MARIA LUISA

Soc. Commerciale Bulgare de Nav. a Vap.; 1919; *Chantiers & Ateliers de Provence*; 3,821 tons; 353-5x46-6x22-6; 502 n.h.p.; triple-expansion engines.

The Bulgarian steamship *Knyaguinya Maria Luisa* was bombed by British aircraft at the entrance to Piraeus harbour on May 30th, 1941. Her deck cargo of benzine in drums caught fire and this detonated her cargo of munitions. The ship blew up with an explosion that sank three ships in the harbour and caused some 200 casualties.

KOA MARU

Kyokuyo Hogeï K.K.; 1932; *Swan, Hunter & Wigham Richardson*; 2,024 tons; 266-2x40x19-5; 292 n.h.p.; triple-expansion engines.

The steamship *Koa Maru* was torpedoed and sunk by the U.S. submarine *Porpoise* on April 4th, 1943, off Eniwetok, Marshall Islands.

KOAN MARU

Dairen Kisen K.K.; 1936; *Uraga Dock Co.*; 3,462 tons; 347-8X 50x24-5; 308 n.h.p.; compound engines.

The steamship *Koan Maru* was bombed and sunk by U.S. carrier-based aircraft on January 24th, 1944, off Rabaul, New Guinea.

KOAN MARU

Hiroumi Shozï K.K.; 1924; *Osaka Iron Works*; 3,183 tons; 305X43-9X27-2; 288 n.h.p.; triple-expansion engines. The steamship *Koan Maru* was torpedoed and sunk by the U.S. submarine *Rasher* on June 14th, 1944, in the Celebes Sea.

KOAN MARU

Amakasu Sangyo Risen K.K.; 1905; *Akt. Ges. "Neptun"*; 4,305 tons; 376-6x48-7x26-9; triple-expansion engines. The steamship *Koan Maru* struck a mine and sank on May 17th, 1945, off Kobe.

KOBE MARU

Toa Kaiun K.K.; 1940; *Mitsubishi Jukogyo K.K.*; 7,938 tons; 430-2x59x32; 1,917 n.h.p.; turbine engines. The *Kobe Maru* was in collision with the *Tenzan Maru* on November 11th, 1942, and sank 90 nautical miles E. of the Yangtze estuary.

KOBENHAVN

Ostasiatiske Kompagni; 1921; *Ramage & Ferguson*; 3,901 tons; 368-9x49-3x26-9; 139 n.h.p.; oil engines. The Danish motorship *Kobenhavn* left Buenos Aires on December 14th, 1928, for Melbourne. A wireless communication was received from her on the 21st, but nothing more. The remains of a lifeboat and skeletons were found half buried in the sand on the S.W. African coast in 1935, and it is thought that these may have belonged to the *Kobenhavn*. She carried a crew of 15 and 45 cadets.

KOCHI MARU

Settu Syosen K.K.; 1920; *Teikoku S.S. Co.*; 2,910 tons; 305x43-7x27-2; 352 n.h.p.; triple-expansion engines. The steamship *Kochi (Koti) Maru* was torpedoed and sunk by the U.S. submarine *Finback* on May 27th, 1943, W. of the Caroline Islands.

KOEFIA

A. Lauro; 1903; *Rickmers A.G.*; 3,823 tons; 362x45-lx 26-2; 332 n.h.p.; triple-expansion engines. The Italian ship *Koefia*, with a cargo of nitrate, was reported to be in distress on January 16th, 1933, and sank at 1 a.m. on January 17th about eight miles N. of Oran.

KOEI MARU

Nitto Kisen K.K.; 10,238 tons. The tanker *Koei Maru* was torpedoed and sunk by the U.S. submarine *Parche* on July 31st, 1944, off the W. coast of Dalupiri Island, Philippines.

KOFUKU MARU

Yamashita Kisen K.K.; 1918; *Kawasaki Dockyard Co.*; 5,822 tons; 385 X 51 x 36; 440 n.h.p.; triple-expansion engines. The steamship *Kofuku (Kohuku) Maru* was bombed and sunk by U.S. land-based aircraft on June 1st, 1942, off Burma.

KOFUKU MARU

Daiko Shosen K.K.; 1939; *Kawaminami Kogyo K.K.*; 1,920 tons; 271-7x40x20-3; 150 n.h.p.; triple-expansion engines. The steamship *Kofuku (Kohuku) Maru* was torpedoed and sunk by the U.S. submarine *Silver sides* on March 16th, 1944, 250 miles southeast of the Palau Islands.

KOFUKU MARU

Taiko Syosen K.K.; 1945; *Japan*; 2,219 tons; steam engines. The steamship *Kofuku Maru*, on a voyage from Wakamatsu to Tsingtau with a cargo of salt, went aground on March 21st, 1947, at Saishu Island during a storm and became a total loss.

KOGANE MARU

Nippon Kaiun K.K.; 1938; *Harima S.B. & Eng. Co.*; 3,132 tons; 318-4x45-9x24-6; 200 n.h.p.; triple-expansion engines. The steamship *Kogane Maru* was torpedoed and sunk by the U.S. submarine *Rasher* on October 9th, 1943, in the Manipa Strait, Moluccas.

KOGEN MARU

Nippon Yusen Kaisha; 6,600 tons. The steamship *Kogen Maru* was torpedoed and sunk by the U.S. submarine *Tang* on October 25th, 1944, off the Pescadores Islands.

KOGIKU MARU

Sawaguchi Kisen Kogyo K.K.; 1911; *Wood, Skinner & Co.*; 2,417 tons; 281-2x43x19-1; 225 n.h.p.; triple-expansion engines. Sailing from Wakamatsu to Jinsen with a cargo of coal, the *Kogiku Maru* went ashore at 3 a.m. on December 7th, 1932, on Shinto Island 40 miles S. of Chemulpo. She slipped off the rocks and sank in deep water.

KOYO MARU

Kogada Gumi K.K.; 1938; *Uraga Dock Co.*; 6,353 tons; 423-2x 59x32-8; 517 n.h.p.; turbine engines. The steamship *Kogyo Maru* was sunk by U.S. carrier-based aircraft on September 24th, 1944, off the north-east coast of Palawan Island, Philippines.

KOHATSU MARU

Matsuura Shizuo; 1902; 1,774 tons; 260x36-6x22-2; triple-expansion engines. Carrying salt from Waihaiwei to Fusan the *Kohatsu Maru* was in collision with the *Aeneas* and sank on July 14th, 1930, near Shantung Cape.

KOHINA MARU

S. Nakamura; 1884; *Harland & Wolff*; 3,164 tons; 350-5X 40-3x25-2; 323 n.h.p.; compound engines. The Japanese steamship *Kohina Maru* was torpedoed and sunk by a submarine in the Mediterranean on August 2nd, 1916.

KOHINUR

Asiatic Steam Navigation Co.; 1905; *Chas. Cornell & Co.*; 2,265 tons; 296x40-5x22-2; 277 n.h.p.; 10 knots; triple-expansion engines. The steamship *Kohinur*, Capt. Henry S. Terry, was torpedoed and sunk by a German submarine 150 miles N. of Alexandria on May 25th, 1917. Capt. Terry and 36 of the crew were killed.

KOHINUR

Asiatic Steam Navigation Co.; 1922; Lithgows; 5,168 tons; 404-3x52-2x27-4; 435 n.h.p.; triple-expansion engines. The steamship *Kohinur*, on a voyage from Glasgow to the Middle East, was torpedoed and sunk by a German submarine on November 15th, 1940, about 150 miles S.W. of Monrovia. Forty-nine lives were lost.

KOHLNIMPORT

Poseidon; 1906; Rotterdam Droogd. Maats.; 1,124 tons; 230x34-3x13-8; 145 n.h.p.; triple-expansion engines. The German cargo ship *Kohlenimport* was carrying coke from London to Elsinore on March 3rd, 1930, when she collided with the Swedish s.s. *Gudur* and sank 11 miles N.E. of Terschelling.

KOHO MARU

Toa Kaiun K.K.; 4,291 tons. The steamship *Koho Maru* was torpedoed and sunk by the U.S. submarine *Sandlance* on May 14th, 1944, S.W. of Guam.

KOHOKUMARU

Osaka Shosen K.K.; 1915; Kawasaki Dkyd. Co.; 2,573 tons; 284-5x42-5x20-7; 267 n.h.p.; triple-expansion engines. The steamship *Kohoku Maru* was torpedoed and sunk by the U.S. submarine *Hoe* on October 8th, 1944, 260 miles south-east of Hong Kong.

KOHRUMARU

Kobe Sanbashi K.K.; 1918; Earless Co.; 5,228 tons; 400-2X 52-2x28-5; 369 n.h.p.; triple-expansion engines. The *Kohryu Maru* was carrying timber from Tacoma to Yokohama when she was wrecked during a typhoon on March 10th, 1928, 20 miles N. of Cape Inuboye, near Tokyo Bay, with the loss of all her crew.

KOHSHUN MARU

Kobe Sanbashi Co.; 1919; Asano S.B. Co.; 5,460 tons; 400X 53x29-4; 513 n.h.p.; triple-expansion engines. The *Kohshun Maru* was sailing from Portland, Or., to Yokohama with wheat, lumber and scrap iron when she went ashore on February 20th, 1930, at Scotch Lighthouse, Urimak Pass, Alaska.

KOHUKUMARU

Yamasina Keiko; 1934; Mitsui Bussan Kaisha; 3,210 tons; 317-7x46x25-4; 205 n.h.p.; triple-expansion engines. The *Kohuku Maru* sank after a collision off the W. coast of Japan on September 6th 1943.

KOJUN MARU

Hiroumi Shoji K.K.; 1924; Osaka Iron Works; 1,931 tons; 255x39x22-7; 211 n.h.p.; triple-expansion engines. The steamship *Kojun (Kozyun) Maru* was torpedoed and sunk by the U.S. submarine *Bluegill* on August 13th, 1944, off the southeast coast of Mindanao Island, Philippines.

KOJUN MARU

Dairen Risen K.K.; 1917; 2,177 tons; 268x40-7x23-5. The *Kojun (Kozyun) Maru* struck a mine and sank on July 12th, 1945, off Ebisu, Japan.

KOKAIMARU

Simatani Risen K.K.; 1939; Hakodate Dock Co.; 3,871 tons; 340-4x48-2x26-2; 232 n.h.p.; triple-expansion engines. The steamship *Kokai Maru* was bombed and sunk by U.S. land-based aircraft on February 21st, 1944, off New Hanover, Admiralty Islands.

KOKAIMARU

Kita Nippon Kisen K.K.; 1918; Yoshiura Zosensho; 1,269 tons; 226-7x33-5x18-5; triple-expansion engines. The *Kokai Maru* was torpedoed and sunk by the U.S. submarine *Sea Dog* on June 19th, 1945, near Esashi, Japan.

KOKI MARU

Hashimoto Kisen K.K.; 1921; Ishikawajima S.B. Co.; 5,290 tons; 388X53-2x32; 513 n.h.p.; triple-expansion engines. The steamship *Koki Maru* was torpedoed and sunk by the U.S. submarine *Snook* on July 4th, 1943, about 150 miles E. of Shipu, East China Sea.

KOKKA MARU

5,500 tons.
The steamship *Kokka Maru* struck a mine and sank on September 7th, 1944, W. of Keelung, Formosa.

KOKKO MARU

Kokusaki Kisen K.K.; 5,486 tons. The *Kokko Maru* was torpedoed and sunk by the U.S. submarine *Seawolfon* August 31st, 1943, about 150 miles N.E. of Yungkia, China.

KOKKO MARU

Iino Kaiun K.K.; 2,863 tons. The steamship *Kokko Maru* struck a mine and sank on August 24th, 1944, in the Mahakam River, Borneo.

KOKO MARU

Nichiro Gyogyo K.K.; 1922; Yokohama Dock K.K.; 1,520 tons; 240x35x20; triple-expansion engines. The *Koko Maru* struck a mine and sank on March 11th, 1945, off Hangchow.

KOKUEIMARU

Nit to Kisen K.K.; 5,154 tons. The tanker *Kokuei Maru* was torpedoed and sunk by the U.S. submarine *Jack* on February 19th, 1944, about 150 miles S.E. of the Paracel Islands, South China Sea.

KOKURA MARU

Nippon Yusen Kaisha; 1887; R. Dixon & Co.; 2,468 tons; 320 X 38x25-7; 309 n.h.p.; triple-expansion engines. The *Kokura Maru* was wrecked on November 10th, 1920, at Yap, Caroline Islands, when she was nearing the end of a voyage from Yokohama to Angaur.

KOKURYU MARU

Dairen Kisen K.K.; 1921; Osaka Iron Works; 6,112 tons; 407-2x50-8x30; 553 n.h.p.; triple-expansion engines. The steamship *Kokuryu Maru* was torpedoed and sunk by the U.S. submarine *Scorpion* on July 3rd, 1943, in the Yellow Sea.

KOKURYU MARU

Osaka Shosen K.K.; 1937; Mitsubishi Jukogyo K.K.; 7,369 tons; 425-8x57-1x33-3; 1,083 n.h.p.; turbine engines. The steamship *Kokuryu Maru* was torpedoed and sunk by the U.S. submarine *Seadragon* on October 24th, 1944, about 150 miles N.W. of Luzon Island, Philippines.

KOKUSEIMARU

Nippon Yusen Kaisha; 5,396 tons. The steamship *Kokusei Maru* was torpedoed and sunk by the U.S. submarine *Hammerhead* on October 1st, 1944, 25 miles west of Jesselton, North Borneo.

KOKUYO MARU

Osaka Shosen Kaisha; 4,667 tons. The steamship *Kokuyo Maru* was torpedoed and sunk by the U.S. submarine *Sandlance* on March 13th, 1944, 160 miles south of Tokyo.

KOKUYO MARU

Kokuyo Kisen K.K.; 1938; Kawasaki Dkyd. Co.; 10,026 tons; 503-3x65x37-1; 2,250 n.h.p.; oilengines. The tanker *Kokuyo Maru* was torpedoed and sunk by the U.S. submarine *Bonefish* on July 30th, 1944, about 85 miles W. of Jolo in the Sulu Archipelago.

KOLA

KOLA

U.S.S.R.; 1919; *American International S.B. Corp.*; 4,994 tons; 390x54-2x27-6; 600 n.h.p.; turbine engines. The Russian steamship *Kola*, bound to Kamchatka, was stopped and examined by Japanese warships on February 15th, 1943. On the 17th the ship was torpedoed and sunk by a submarine said not to be Japanese. There were only four survivors.

KOLAASTIND

Akties, Statland; 1888; *W. Pickersgill & Sons*; 2,363 tons; 286X39-2X20-2; 299 n.h.p.; triple-expansion engines. The Norwegian tanker *Kolaastind* was torpedoed and sunk by a German submarine in the North Sea on April 11th, 1917.

KOLCHIS

Synodinos Bros.; 1909; *Atel. & Ch. de France*; 2,219 tons; 288-7x42-8x19-7; 208 n.h.p.; triple-expansion engines. The Greek ship *Kolchis*, Capt. Sourbanos, was not seen after she left Sydney, N.S., on November 22nd, 1940, for Cardiff, with a cargo of grain.

KOLGA

I. Silberberg & others; 1912; *Campbeltown S.B. Co.*; 3,526 tons; 348x50x23-6; 322 n.h.p.; triple-expansion engines. The Estonian steamship *Kolga* was bombed and sunk by German aircraft on July 4th, 1940, on a voyage from the Tyne to Wilmington, N.C. There were 29 survivors.

KOLKHOSNIK

U.S.S.R.; 1925; *J. Readhead & Sons*; 3,880 tons; 364-2x 50-6x23-7; 371 n.h.p.; triple-expansion engines. The Russian ship *Kolkhosnik* had left Boston for Halifax to pick up a cargo for Archangel but went ashore on Sambro Shoal on January 16th, 1942, and sank.

KOLL

Odd Berg's Tankrederi A/S; 1930; *Deutsche Werft A.G.*; 10,044 tons; 487-4x66x37-3; 1,175 n.h.p.; oil engines. The Norwegian motor tanker *Koll* was torpedoed, shelled and sunk by a German submarine on April 6th, 1942, 400 miles N.W. of the Bermudas on a voyage from Bay town to Halifax with 13,000 tons of gas oil.

KOLLBJORG

Odd Berg & Hjalmar Bjarke; 1937; *Eriksbergs MjV*; 8,259 tons; 469-2x61-1x34-5; 644 n.h.p.; oil engines. The Norwegian tanker *Kollbjorg* broke in two in the N. Atlantic on January 24th, 1943. Survivors were rescued from the stern portion on the following day. The ship was sailing from New York to Stanlow.

KOLLSKEGG

Odd Berg's Tankrederi A/S; 1940; *Eriksbergs MjV*; 9,858 tons; 498-4x65-3x36-4; 861 n.h.p.; oil engines. The Norwegian motor tanker *Kollskegg* was torpedoed and sunk by a German submarine on April 6th, 1942, 350 miles N.W. of the Bermudas on a voyage from Curacao to Halifax with 14,000 tons of crude oil. Five of her crew were lost.

KOLN

German Navy, light cruiser; 1909; *Krupp*; 4,350 tons; 402 X 46x17-7; 20,000 i.h.p.; 26-8 knots; turbine engines; *Schulz-Thornycroft* boilers; twelve 4-1 in. guns, four 5pdr., 4 m.g., 2 T.T. The light cruiser *Koln* was the flagship of Rear-Admiral Leberecht Maas, commanding destroyer flotillas, at the battle of the Heligoland Bight on August 28th, 1914. The British Admiralty had planned an excursion into the Bight with the object of intercepting and sinking the destroyer and light cruiser patrols which the Germans sent out each evening to guard the approaches during the hours of darkness. To this end a large force of submarines and destroyers was disposed in readiness to act at dawn on the 28th, supported by light cruisers, with Vice-Admiral Beatty and the Battle Cruiser Squadron further back in readiness to engage any heavy units which the Germans might send out.

At about 7 a.m. Cdre. Tyrwhitt, commanding the British destroyer flotillas, sighted the first German destroyer, the *G. 194*. The weather was misty and the action which ensued, fought out

over a fairly wide area and with fresh ships coming in on both sides at unexpected moments, is somewhat difficult to follow.

Four German light cruisers, including the *Koln*, were lying in Wilhelmshaven, with one, the *Mainz* (which see) lying off the Ems. Orders were hurriedly given for the vessels at Wilhelmshaven to proceed to sea, but the *Mainz* was only ordered to stand by.

At about 12.10 p.m. the *Koln*, steaming at high speed, with visibility limited to two miles, sighted *Arethusa*, flagship of Cdre. Tyrwhitt, which had already been damaged in the previous fighting. Both ships were engaged, when Admiral Beatty's flagship *Lion*, appeared out of the mist and the German vessel broke off the action and tried to make her escape. For about 20 minutes the *Koln* was under fire from the battle cruiser when the latter sighted another German light cruiser, the *Ariadne* (which see) and went in pursuit of her, leaving the *Koln* a blazing and battered wreck. At 1.25 the *Lion* came back, having sunk the *Ariadne*, to discover her former antagonist steering S.E. for home. Ten minutes sufficed for the Battle Cruiser Squadron to blow the *Koln* to pieces and she sank with all hands save one, a stoker.

According to German accounts the ship carried a crew of 507, a large number for a vessel of only 4,350 tons.

The German losses in the battle were the light cruisers *Mainz*, 4,350 tons, *Ariadne*, 2,608 tons, and *Koln*, 4,350 tons, with the torpedo boat *V187*. The losses in personnel were 712 killed, 149 wounded and 381 prisoners, a total of 1,242.

The British suffered no losses in ships, but had 32 killed and 55 wounded.

KOLN

Norddeutscher Lloyd; 1922; *Bremer Vulkan*; 7,881 tons; 474 x 60-7x32-8; 556 n.h.p.; triple-expansion engines. The German ship *Koln* was carrying 9,000 tons of iron ore from Lulea to Hamburg on June 26th, 1940, when she went ashore at Argosgrund, S. of Gefle, and broke in two.

KOLN

German Navy, cruiser; 1928; *Wilhelmshaven*; 6,000 tons; 570x49-9x17-7; 65,000 i.h.p.; 32 knots; turbine engines; *Schulz-Thornycroft* boilers; nine 5-9 in. guns, six 3-5 in., eight 3pdr., 4m.g., 12 T.T.

The cruiser *Koln* took part in the invasion of Norway in April 1940, and was at one time claimed as having been bombed and sunk by the R.A.F. She was undoubtedly damaged during the Norwegian fighting but came back into service not long after. She did not play any important part in the naval fighting after that time and toward the end of hostilities was lying in Wilhelmshaven harbour when the British subjected the shipping to a series of devastating air-raids. The *Koln* was hit repeatedly and sometime during March 1945 was reduced to a wreck and sank in the harbour.

KOMAKI MARU

Kokusai Kisen K.K.; 1933; *Harima S.B. & Eng. Co.*; 8,525 tons; 453-5x60-7x40-1; 2,185 n.h.p.; oil engines. The motor vessel *Komaki Mam*, serving as a transport, was bombed and sunk by U.S. land-based aircraft on April 18th, 1942, off Weewak, New Guinea.

KOMATA

Union S.S. Co. of New Zealand; 1938; *A. Stephen & Sons*; 3,900 tons; 344-6x52-7x25-5; 516n.h.p.; triple-expansion engines. The New Zealand steamship *Komata* was sunk by a German raider on December 8th, 1940, on a voyage from Suva to Nauru. Some survivors were picked up by the raider.

KOMEI MARU

Kokai Kisen K.K.; 2,857 tons. The steamship *Komei Mam* was torpedoed and sunk by the U.S. submarine *Guitarro* on October 31st, 1944, off Olongapo, Philippine Islands.

KOMET

DjSajSDanto; 1912; *Laxevaags Maskin & Jernskibs.*; 1,147 tons; 229-2x35-2x15-9; 106 n.h.p.; triple-expansion engines. The Norwegian steamship *Komet* was bombed and sunk by German aircraft on July 17th, 1940, in the English Channel.

KOMET

North German Lloyd; 1937; A. G. Weser; 3,287 tons; 358 -8 X 50-2x19-9; 19 knots; oilengines; six 5-9 in. guns, 7 smaller, 4 T.T., 25 mines, 1 aircraft.

The German motorship *Ems* was a very fast vessel, and this influenced the German Admiralty to choose her for the task of commerce raiding at the commencement of the Second World War. She was given a very heavy armament for her tonnage and was renamed *Komet*. Her captain was Robert Eysen, an experienced officer who had joined the navy in 1911, and had served for part of his time in command of a surveying vessel.

The *Komet's* first voyage was distinctive. Leaving Bergen on July 9th, 1940, she successfully navigated the north-east passage around northern Europe and Asia, helped by three Russian icebreakers, and arrived in the Pacific on September 10th. On October 18th she joined the raider *Orion*, 7,021 tons, Capt. K. Weyher, and the tanker *Kulmerland*. These three ships remained in company until December 22nd, when the *Komet* left for the island of Nauru, where she bombarded the oil tanks, lighters and shore establishments.

The *Komet* also sank the following vessels during this voyage:—

<i>Holmwood</i>	546 tons	British	25.11.'40	(in company
<i>Rangitane</i>	16,712 "	"	27.11.'40	with the <i>Orion</i>)
<i>Triona</i>	4,400 "	"	.12.'40	" "
<i>Vinni</i>	5,181 "	Norwegian	7.12.'40	" "
<i>Komata</i>	3,900 "	British	7.12.'40	<i>Komet</i> alone
<i>Australind</i>	5,020 "	"	14. 8.'41	" "
<i>KotaNopan</i>	7,322 "	Dutch	17. 8.'41	" "
<i>Devon</i>	9,036 "	British	19. 8.'41	" "

On November 30th, 1941, the raider reached Hamburg, having been at sea for nearly 18 months. Her cruise had not been attended with the same success as her sister raiders, but she had done moderately well. After a long stay in port, during which she was overhauled, she left Flushing on October 8th, 1942, for her second cruise.

The British Admiralty, to whom the *Komet* was known as "Raider B.", suspected that an attempt was about to be made to send her to sea and had stationed a strong force of fast craft in the Channel. It was divided into two groups. The first, Group A, lay off Cap de la Hague, and the second, Group B, lay six miles W. of Guernsey.

On the morning of October 14th the *Komet*, escorted by four motor torpedo boats and some minesweepers, ran into Group A, which comprised five destroyers and several torpedo boats. The action was very short, the *Komet* being overwhelmed by gunfire and blowing up within a few minutes. Two torpedo boats and a minesweeper were also sunk.

KOMETA

Societe Commerciale de Napthe Mazout; 1893; Grangemouth Dockyard Co.; 2,005 tons; 260x36-2x17; 171 n.h.p.; 9 knots; triple-expansion engines.

The Russian tanker *Kometa* was sighted by the New Zealand Shipping Co.'s liner *Limerick* on April 26th, 1914, some 20 miles W. of Algiers, heavily on fire. The *Limerick* steamed round the blazing vessel and found five men still on board. These she managed to take off and ten more were picked up by other ships. From these survivors it was learned that the *Kometa* had exploded amidships, near the officers' quarters, and caught fire. The men in the fore-castle had to run the gauntlet of the flames in order to reach the boats and several lost their lives in the attempt.

The total number burned or drowned was 15.

KOMSOMOL

U.S.S.R.; 1932; Severney S.B. Yard; 5,109 tons; 381 -3 x 53-2x29-4; 764 n.h.p.; oilengines.

The Russian motorship *Komsomol* was reported to have been set on fire and sunk on December 14th, 1936, by Spanish insurgents between Oran and Carthage. She was carrying 6,209 tons of manganese ore consigned to a Belgian firm. The crew were understood to have landed on the Moroccan coast.

KONANMARU

Kihara Syosen Kogyo K.K.; 1918; Mitsubishi Zosen Kaisha; 5,226 tons; 400 x54-5x30-3; 548 n.h.p.; triple-expansion engines & L.P. turbine.

The steamship *Konan Mam* was torpedoed and sunk by the U.S. submarine *Sargo* on June 13th, 1943, about 300 miles S.W. of Yap Island.

KONANMARU

Osaka Shosen K.K.; 1915; Osaka Iron Works; 2,627 tons; 284-7x42-5x23; 283 n.h.p.; triple-expansion engines. The steamship *Konan Maru* was torpedoed and sunk by the U.S. submarine *Grayback* on December 21st, 1943, about 150 miles S. of Nagasaki.

KONDOR

German Navy, torpedo boat; 1926; Wilhelmshaven Yard; 800 tons; 277-7x27-5x9-2; 24,000 s.h.p.; 33 knots; turbine engines; Schulz-Thornycroft boilers; three 4-1 in. guns, two Ipd., 6T.T.

The torpedo boat *Kondor* was bombed and sunk by R.A.F. aircraft at Le Havre on June 28th, 1944. The vessel's normal complement was 121.

More details are given under the *Falke*.

KONEIMARU

Yamashina Kisen K.K.; 1930; Mitsui Bussan K.K.; 2,345 tons; 291-2x42x21-7; 169 n.h.p.; triple-expansion engines. The steamship *Konei Maru* was torpedoed and sunk by the U.S. submarine *Peto* on December 1st, 1943, N. of the Admiralty Islands.

KONEIMARU

Japanese Government; 1917; Detroit S.B. Co.; 1,922 tons; 260-9x43-6x18-5; 274 n.h.p.; triple-expansion engines. The steamship *Konei Maru* was formerly the Italian *Furiere Con-solini*, chartered by the Japanese. On August 2nd, 1944, she was torpedoed and sunk by the U.S. submarine *Tautog* off the S. coast of Shikoku, Japan.

KONG HAAKON

H.M. Wrangell & Co.; 1889; Palmers' Co.; 2,231 tons; 290x 39-3x22-8; 316 n.h.p.; triple-expansion engines.

The Norwegian cargo ship *Kong Haakon* was shelled and sunk by a German submarine in the Bay of Biscay on June 24th, 1917.

KONG HALFDAN

Det Nordenfjeldske D/S; 1923; Schiffbau Ges. Unterweser; 1,463 tons; 228-5x34-5x20; 110 n.h.p.; triple-expansion engines.

The Norwegian steamship *Kong Halfdan*, under German control, struck a mine and sank on December 2nd, 1944, near Marstrand, Norway.

KONG RING

O. Rustad; 1913; Nylands Verksted; 1,611 tons; 250x34-7x 22-2; 225 n.h.p.; triple-expansion engines.

The Norwegian cargo ship *Kong Ring* was sunk by a German submarine off the Scilly Isles on September 11th, 1916.

KONG RING

Det Sondenfjelds Norske D/S; 1929; Nylands Verksted; 1,994 tons; 271-3x38-2x19-4; 233 n.h.p.; triple-expansion engines. The Norwegian steamship *Kong Ring*, under German control, was sunk by mine or torpedo on December 26th, 1941, off the north coast of Norway, with the loss of 30 lives.

KONGO

Japanese Navy, dreadnought battleship; 1912; Vickers; 29,330 tons; 704x92x27-5; 64,000 i.h.p.; 26 knots; turbine engines; Kanpon boilers; eight 14 in. guns, sixteen 6 in., eight 5 in. A.A., 4 m.g., 4 T.T., 3 aircraft.

The battleship *Kongo* was one of the Central Force at the battle of Leyte Gulf, from which she escaped with minor damage. About a month later on November 21st, 1944, she was torpedoed and sunk by the U.S. submarine *Sealion* some 400 miles N. of Formosa.

The normal complement of the *Kongo* was 980.

KONGO MARU

KONGO MARU

KokusaiKisen K.K.; 1935; *Harima S.B.&Eng. Co.*; 8,624 tons; 453-5x60-7x30-8; 2,115 n.h.p.; oil engines. The motor vessel *Kongo Mam* was taken over by the Japanese Navy for use as an auxiliary cruiser. On March 10th, 1942, she was attacked by U.S. carrier-based aircraft and sunk off Lae, New Guinea.

KONGO MARU

Japanese Government; 1936; *Mitsubishi Jukogyo K.K.*; 7,081 tons; 415x57-2x32-8; turbine engines. The steamship *Kongo Mam* struck a mine and sank on May 27th, 1945, off Fukuoka, Japan.

KONGOSAN MARU

Chosen Yusen K.K.; 1927; *Uraga Dock Co.*; 2,119 tons; 280X41x23-5; 156 n.h.p.; triple-expansion engines. The steamship *Kongosan Mam* was taken over by the Japanese Navy for use as an auxiliary gunboat. On May 4th, 1942, she was torpedoed and sunk by the U.S. submarine *Trout* off Katsuura, Japan.

KONGSGAARD

SkibsAJSolvang; 1937; *Kockums Mek. Verkstad*; 9,467 tons; 505-4x63-1x36-4; 1,358 n.h.p.; oil engines. The Norwegian tanker *Kongsgaard* was torpedoed by a German submarine on February 21st, 1942, and destroyed by fire, off Western Point, Curacao. Thirty-eight of her crew were lost.

KONGSHAUG

Dampsk. AJS Kongshaugs Rederi; 1898; *Fevigs Jernskibsbyg.*; 1,156 tons; 217-4x31-9x20-7; 106 n.h.p.; triple-expansion engines. The Norwegian steamship *Kongshaug* was shelled and sunk by German warships on July 9th, 1942, about 50 miles N.W. of Alderney. Eight of her crew were killed.

KONIGIN LOUISE

Hamburg-Amerika Linie; 1934; *Howaldtswerke A.G.*; 2,400 tons; 288 x42-1x21-4; 885 n.h.p.; oil engines. The German motorship *Konigin Louise* struck a mine and sank on September 25th, 1941, near Helsinki.

KONIGIN LUISE

Hamburg-Amerika Linie; 1913; *Akt. Ges. Vulkan*; 2,163 tons; 275-9x38-8x21-2; 21 knots; turbine engines; two 37 cm. guns, 200 mines.

On August 1st, 1914, three days before the outbreak of the First World War, the *Konigin Luise* was taken over by the German Admiralty and fitted with minelaying gear. She put to sea on the night of August 4th with her saloons and staterooms in their original condition. Her complement was 130 officers and men under Cdr. Biermann and she left Wilhelmshaven without mounting the two 3.4 in. guns intended for her. Her orders were to lay her mines off the English coast and at about 10.40 on the morning of the 5th this work began some 30 miles E. of the Suffolk coast. British ships came in sight but the *Konigin Luise* continued until the last of her mines had gone overboard, when she turned for home at 22 knots, or one knot faster than her designed speed.

The vessels which had sighted her were the destroyers of the Second Flotilla, led by the light cruiser *Amphion* (which see). At 11.15 the first shot was fired by the British at a range of 4,500 yards, to which the German ship could only reply with two pom-poms and a number of rifles. She was hit repeatedly by the 4 in. guns of the *Amphion* and the destroyers *Lance* and *Landrail*. After 50 minutes fighting she was on fire in several places, more than half her company were dead or wounded, she had a heavy list to port and her rudder no longer functioned. In this state it was decided to abandon her but at about 12.20 p.m. she rolled over to port and sank, taking with her 85 of her company. Cdr. Biermann was among the survivors.

On the following day the light cruiser *Amphion* struck on a mine laid by the *Konigin Luise* and sank with heavy loss of life. This caused the British Admiralty to bring minesweeping trawlers into use sooner than had been anticipated.

KONIGSBERG

German Navy, light cruiser; 1905; *Kiel Dockyard*; 3,400 tons; 354-2x43-7x17-5; 13,200 i.h.p.; 23-5knots; triple-expansion engines; Schulz-Thornycroft boilers; ten 4-1 in. guns, eight 3pr., 4m.g., 2 T.T.

At the outbreak of the First World War the German light cruiser *Konigsberg* was based at Dar-es-Salaam, German East Africa. On July 31st, 1914, she left harbour prepared for a long period at sea. For six days she was lost to sight, but on August 6th she captured the steamship *City of Winchester*, 6,600 tons, bound from Colombo to England with a cargo of tea valued at £250,000. The prize was escorted to Makalla, on the Arabian coast, where her passengers were transferred to the armed German merchantman *Zieten*. Her coal and stores were shared between the two German ships and the *City of Winchester* was scuttled.

The *Konigsberg* again disappeared, this time for about seven weeks when on September 20th, she appeared off Zanzibar and destroyed H.M.S. *Pegasus*, which was undergoing boiler repairs in the port. It was not until nearly another seven weeks had elapsed that she was reported by H.M.S. *Chatham* to be lying in a branch of the Rufiji River, screened by the forest. In order to prevent her escape the steamship *Newbridge* was sunk across the channel. Meanwhile the crew of the *Konigsberg* posted snipers and machine-guns in the jungle to hold off a land attack. An aeroplane was brought into use and was successful in directing the British gunners so that they were able to shell the ship at long range. Shortly after it had performed this service it was shot down by the Germans.

The destruction of the ship proved a tough proposition and the cruisers *Weymouth*, *Fox*, *Cornwall*, *Pyramus* and *Pioneer*, were employed in the blockade at various times. She was eventually destroyed by the monitors *Mersey* and *Severn*, sent from Malta. On July 6th, 1915, the bombardment by these ships began, aided by four seaplanes as spotters, and on July 11th the *Konigsberg* was destroyed. The survivors of her crew escaped into the jungle and united with the German East African force.

KONIGSBERG

German Navy, light cruiser; 1927; *Wilhelmshaven Dockyard*; 6,000 tons; 570x49x10-5; 65,000 s.h.p.; 32 knots; turbine engines; Schulz-Thornycroft boilers; nine 5-9 in. guns, six 3-5in. eight 3pr., 4m.g., 12 T.T.

The light cruiser *Konigsberg* was one of the ships engaged in the invasion of Norway on April 9th, 1940. On the evening of that day it was reported that two light cruisers, one of which was the *Konigsberg*, and two destroyers were lying in Bergen harbour. On the morning of the following day bombers of the Fleet Air Arm attacked and scored three direct hits with 500lb. bombs upon the *Konigsberg*, which was moored alongside the quay. The raid took place at about 7.30 a.m. and clear evidence of the ship's destruction was furnished by Capt. W. E. Wollaston of the American steamship *Flying Fish*, and by a journalist who ultimately succeeded in getting his account through to the newspapers of the Allied countries. The assumption of the American captain that the ship was the *Koln* led to a report that this was the vessel sunk, but it was afterwards proved beyond doubt that it was the *Konigsberg*.

One bomb struck the cruiser between the funnels, sending up a column of black smoke. At 9 a.m. there was a loud explosion accompanied by an outbreak of fire and the cruiser began to sink by the head, heeling over till her masts and funnels were level with the water, her stern and propellers remaining visible for a time and finally sank some two and a half hours later.

The *Konigsberg* carried an official complement of 571 and of this number a large proportion were casualties.

KONIGSBERG-PREUSSEN

Kohlen-Import-u. Poseidon A.G.; 1924; *Fried. Krupp Akt. Ges.*; 2,530 tons; 277-8x44-2x20-8; 188 n.h.p.; triple-expansion engines.

The German steamship *Konigsberg-Preussen* struck a mine and sank on February 1st, 1941, off Cuxhaven.

KONING DER NEDERLANDEN

Stoomvaart Maats. Nederland; 1872; *J. Elder & Co.*; 3,063 tons; 352-1x39-5x21-2; 400 h.p.; compound inverted engines. The Dutch steamship *Koning der Nederlanden*, Capt. Bruyns, left Batavia on September 24th, 1881, for Amsterdam. On October

4th, in lat. 5° S., long. 64° E., her propeller shaft broke and the ship began to fill. All passengers and crew put off in the boats, provisioned for three weeks, and set course for the Chagos Islands, some 400 miles away. The first officer's boat was picked up by the steamship *Wyberton* on the 11th and the steamship *Delcomyn* picked up another boat with 19 persons. Capt. Bruyns and 38 passengers and crew were picked up by the steamship *Madura* and 29 other survivors managed to reach Ceylon, but some 90 passengers and crew were never found.

KONINGIN EMMA

Stoomv. Maats. Nederland; 1913; Maats. Fyenoord; 9,181 tons; 470-2X57•3X35; 1,094 n.h.p.; quadruple-expansion engines. The Dutch steamship *Koningin Emma* struck a mine and sank in the North Sea on September 22nd, 1915.

KONINGIN REGENTES

Stoomvaart Maats. Zeeland; 1895; Fairfield Co.; 1,970 tons; 320 x 35 • 8 X 16; 1,305 n.h.p.; triple-expansion engines. The Dutch passenger steamship *Koningin Regentes*, in service as a hospital ship, was bound from Boston, Lincolnshire, to Rotterdam on June 6th, 1918, when she was torpedoed and sunk by a German submarine. The attack took place 21 miles E. of Leman lightship, the steamship going down with seven of those on board.

KONINGIN WILHELMINA

Stoomv. Maats. Zeeland; 1895; Fairfield Co.; 1,964 tons; 320 x 35-8x 16; 1330 n.h.p.; triple-expansion engines. The Dutch steamship *Koningin Wilhelmina* struck a mine and sank in the North Sea on July 31st, 1916.

KONRI MARU

1920; Pt. Arthur S.B. Co.; 3,106 tons; 320-3x44-1x22-6; triple-expansion engines. The steamship *Komi Mam* was formerly the Chinese *Kwen Lee*, seized by the Japanese. On July 1st, 1945, she was torpedoed and sunk by the U.S. submarine *Haddo* about 100 miles S.W. of Chinnampo, Korea.

KONRON MARU

Japanese Government; 7,908 tons. The transport *Konron Mam* was torpedoed and sunk by the U.S. submarine *Wahoo* on October 5th, 1943, E. of Tsushima in the Korea Strait.

KONSAN MARU

Dairen Kisen K.K.; 1929; Mitsui Bussan Kaisha; 2,733 tons; 326-5x46-5x21-5; 270 n.h.p.; oil engines. The motor vessel *Konsan Mam* was torpedoed and sunk by the U.S. submarine *Tinosa* on July 3rd, 1944, about 400 miles S.E. of Katsuura, Japan.

KONSTAN

Compania Naviera Amaya; 1899; S. P. Austin & Son; 1,857 tons; 263-7x39-3x17-1; 199 n.h.p.; triple-expansion engines. The Spanish steamship *Konstan* was sunk by the Insurgent warship *Almirante Cervera* off Santander on August 26th, 1936, during the Spanish Civil War.

KONSTANTINOS HADJIPATERAS

I. C. & A. Hadjipateras; 1913; J. L. Thompson & Sons; 5,962 tons; 388-5x54-1 X 26; 455 n.h.p.; triple-expansion engines. The Greek steamship *Konstantinos Hadjipateras* struck a mine and sank on October 24th, 1939, about three miles S. of the Inner Dowsing Light.

KONSUL SCHULTE

Schulte & Bruns; 1898; W. Gray & Co.; 2,975 tons; 318X 46x20-8; 264 n.h.p.; triple-expansion engines. The German steamship *Konsul Schulte* was torpedoed and sunk by a British submarine on February 5th, 1942, in the Porsanger Fjord, Norway.

KONTUM

Cie. Cotiere de VAnnam; 1923; Flensburger Schiffsbau Ges.; 1,565 tons; 262-7x39-7x15; 135 n.h.p.; triple-expansion engines. The French steamship *Kontum* struck a mine, broke in two and sank on April 1st, 1946, off Cap St. Jacques, Indo-China.

KONZAN MARU

Kokoku Kisen K.K.; 1919; Columbia River S.B. Corp.; 5,488 tons; 410-4x54-2x27-7; turbine engines. The steamship *Konzan Maru* was torpedoed and sunk by the U.S. submarine *Bonefish* on June 19th, 1945, near Toyama, Japan.

KOOMBANA

Adelaide Steamship Co.; 1908; A. Stephen & Son; 3,668 tons; 340-1x48-2x20-8; 423 n.h.p.; 12-5 knots; triple-expansion engines. The steamship *Koombana* left Port Headland on March 20th, 1912, for Broome, Western Australia, some 300 miles along the coast and exchanged signals with the s.s. *Montoro* on the 21st. The number on board was 125, of whom 48 were passengers. On the night of March 21st the coast thereabouts was swept by a typhoon of great violence and for nearly a fortnight nothing was heard of the *Koombana*, but on April 3rd a quantity of wreckage was washed ashore and was identified as belonging to her.

KOON SHING

Indo-China S.N. Co.; 1905; Hall, Russell & Co.; 2,130 tons; 265x40-2x21 • 1; 200 n.h.p.; triple-expansion engines. The British steamship *Koon Shing* was wrecked on Hu an Lok rocks, Wei-Hai-Wei on October 31st, 1922. She was carrying passengers and a general cargo on a voyage from Shanghai to Tientsin.

KOONYA

Union S.S. Co. of New Zealand; 1898; Grangemouth Dkyd. Co.; 1,091 tons; 225 X 34-2 x 13-2; 138 n.h.p.; triple-expansion engines. The British cargo ship *Koonya* was wrecked at Sandy Cape, on the west coast of Tasmania, on June 3rd, 1919, while on a voyage from Strahan to Sydney, N.S.W.

KOOPHANDEL

Brys & Gylsen; 1911; Irvine's S.B. & D.D. Co.; 1,736 tons; 279'3x40-1x18-4; 175 n.h.p.; triple-expansion engines. The Belgian cargo ship *Koophandel* was sunk by a German submarine off Ushant on August 1st, 1915.

KORANTON

R. Chapman & Son; 1920; W. Doxford & Sons; 6,695 tons; 412-6x55-5x34-4; 596 n.h.p.; triple-expansion engines. The British cargo ship *Koranton* sailed from Philadelphia on September 8th, 1940, for Loch Ewe and Hull, via Halifax, N.S. She arrived at Halifax safely and left there on March 10th, 1941. The ship was reported in the Atlantic on March 24th, but no subsequent information was received. She was carrying a crew of 34 and two gunners together with a cargo of pig iron.

KORASAN MARU

Tsurumaru Kisen K.K.; 2,300 tons. The *Korasan Maru* struck a mine and sank on July 13th, 1945, off Shimonoseki.

KORI GO

Japanese Government; 1908; W. Gray & Co.; 1,339 tons; 255-1x33-7x15-5; triple-expansion engines. The steamship *Kori Go* was formerly the Chinese *Houlee*, seized by the Japanese. On March 25th, 1945, she was bombed and sunk by U.S. land-based aircraft about 80 miles S.E. of Shanghai.

KORI MARU

1897; Howaldtswerke; 1,091 tons; 230x33-1x12-7; triple-expansion engines. The steamship *Kori Maru* was formerly the Chinese *Kwanglee*, seized by the Japanese. On August 5th, 1945, she was torpedoed and sunk by the U.S. submarine *Billfish* about 100 miles S.E. of Chinwangtar, Manchuria.

KORIETZ

Russian Navy, gunboat; 1886; Bergsund's Yard, Stockholm; 1,270 tons; 210x35x10; 1,564 i.h.p.; 13-5 knots; triple-expansion engines; two 8 in.guns, one 6 in., one 2-5in., four 9pdr., 6m.g., 1 T.T.

The gunboat *Korietz* with the cruiser *Variag* was lying in the harbour of Chemulpo, Korea, just prior to the outbreak of the Russo-Japanese War in February, 1904. The ships were separated from their main fleet, with a Japanese squadron not far away. On February 6th Capt. Roudneff, in command of the *Variag*, and senior naval officer, decided to send the *Korietz* to Port Arthur with mails and despatches. The ship had barely got out of harbour when she encountered part of the Japanese squadron, escorting transports to make a landing. The captain of the *Korietz* was aware that his passage would be challenged, and cleared for action. He fired twice from his light guns, these being the first shots of the war, and turned about and dropped anchor close to the *Variag*.

The Japanese squadron having completed the landing without molestation from the Russians, remained outside the port until the 9th. On this date Admiral Uriu, commanding, notified the neutral warships in the harbour that hostilities had broken out, and informed the Russians that they must leave by 12 noon, or be attacked at their anchorages. Capt. Roudneff decided to steam out, and by 11.45 was in action, a full description of which will be found under the *Variag*. The *Korietz* was outranged for the greater part of the fight, but managed to fire a few times from her heavier guns. She avoided the enemy shells and toward the end of the action turned about for Chemulpo, where she was abandoned and blown up by her crew. She suffered no casualties among her 179 personnel.

KORMORAN

Hamburg-Amerika Linie, auxiliary cruiser; 1938; Fried. Krupp Germaniawerft; 9,400 tons; 515-1x66-3x30-5; 1,767 n.h.p.; 16 knots; diesel-electric engines; six 5-9 in. guns, 2 T.T., 2 aircraft.

The liner *Kormoran* was built for her company as the *Steiermark* and was designed for service as an auxiliary cruiser in time of war. On being taken over by the German Admiralty at the outbreak of hostilities in 1939 her name was changed to *Kormoran*. As an auxiliary cruiser she carried a complement of some 400 and she left Germany for the high seas in December 1940. The area of her operations was very wide, extending from the North Atlantic to the Indian Ocean and in a little over eleven months she sank nine ships, of which seven were British. These were the *British Union*, *Afric Star*, *Eurylochus*, *Agnita*, *Craftsman*, *Velebit* and *Marceba*. The remaining two were the *Antonis* and the *Stamatios G. Embricos*, both flying the Greek flag.

On November 19th, 1941, the *Kormoran* was brought to action by the Australian cruiser *Sydney* (which see), about 300 miles from Carnarvon, Western Australia. The raider scored the first hit, smashing the *Sydney's* control tower and later setting her on fire. Nevertheless the first of the two ships to sink was the *Kormoran*, despite the fact that she had managed to hit her antagonist with a torpedo. Of her ship's company 330 took to the boats and landed in Australia, where they were interned as prisoners of war. They reported that when last seen the *Sydney* was slowly steaming out of sight and heavily on fire.

No news of the fate of the *Sydney* ever came to hand.

KORSFJORD

Bergh & Helland; 1913; Bergens M/V; 1,620 tons; 244-2x37-6x15-7; 138 n.h.p.; triple-expansion engines.

The Norwegian ship *Korsfjord* was in collision with the *Bandar Shahpour* on January 21st, 1941, and sank in 60° 40' N. 12° 9' W. She was on a voyage from Reykjavik to Kirkwall and Hull with herring meal.

KORSHAMN

Rederi A/B Jamaica; 1920; Harland & Wolff; 6,673 tons; 410-7x54-3x32-8; 810 n.h.p.; oilengines. The Swedish motorship *Korshamn* was torpedoed and sunk by a German submarine on March 17th, 1941, on a voyage from New York to Liverpool. Twenty-five of her crew were killed.

KORSHOLM

A 1B Svenska Amerika Mexiko Linien; 1925; A/B Gotaverken; 2,647 tons; 336-2x45-6x19-9; 355 n.h.p.; oilengines. The Swedish motorship *Korsholm* was shelled by a German submarine on April 13th, 1942, caught fire and blew up, 70 miles off Cape Canaveral on a voyage from Tampa to Halifax, N.S., with phosphates. Nine of her crew, including the captain, were killed.

KORSVIK

JensAndvig; 1883; Palmers'Co.; 1,183 tons; 225-5x31-1x17-2; 119 n.h.p.; compound engines.

The Norwegian steamship *Korsvik* was torpedoed and sunk by a British submarine on December 1st, 1944, N. of the Skaw, while under the German flag.

KORTENAER

Netherlands Navy, destroyer; 1927; Burgerhouts, Rotterdam; 1,310 tons; 322x31-2x10-5; 31,000 s.h.p.; 36 knots; turbine engines; Yarrow boilers; four 4-7 in. guns, two 3 in., four 12-7mm 2 m.g., 6 T.T., 24 mines.

The destroyer *Kortenaer* was the first Allied unit to be lost in the battle of the Java Sea on February 27th, 1942. The Japanese admiral was forced to turn away his cruisers in the face of the heavy and accurate Allied fire and to send in his destroyers to make a torpedo attack. In the second of these attacks the *Kortenaer* was torpedoed and sunk.

The *Kortenaer* carried a complement of about 150. The number lost is not known.

For full story of the battle see under the Dutch cruiser *De Ruyter*.

KORTHION

Simbouras Bros.; 1909; Scheepswerf. Jan Smit, Czn.; 2,116 tons; 286-9x42-2x19-5; 221 n.h.p.; triple-expansion engines. The Greek steamship *Korthion* was torpedoed and sunk by a German submarine on April 14th, 1942, on a voyage from Paramaribo to New York. Fourteen of her crew were killed.

KORYU MARU

HiroumiShozik.K.; 1931; Mitsubishi Zosen Kaisha; 6,680 tons; 436-4x58-5x32-8; 747 n.h.p.; oilengines. The motor vessel *Koryu Maru* was bombed and sunk by U.S. land-based aircraft on April 22nd, 1944, 60 miles east of Gocong, Indo-China.

KORYU MARU

Eguti Kisen K.K.; 1919; Poison Iron Works Co.; 2,170 tons; 251X 43 • 6 X 20 • 7; 175 n.h.p.; triple-expansion engines. The steamship *Koryu Maru* was bombed and sunk by U.S. carrier-based aircraft on October 10th, 1944, 85 miles south west of Naha, Okinawa Island.

KOSEI MARU

Hiroumi Syozj K.K.; 1933; Mitsubishi Zosen Kaisha; 6,667 tons; 436-4x58-5x32-8; 839 n.h.p.; oilengines. The motor vessel *Kosei Maru* struck a mine and sank on March 10th, 1942, off Masinlok, Philippines.

KOSEI MARU

Okada Gumi K.K.; 1919; Submarine Boat Corp.; 3,262 tons; 324X46x28-5; turbine engines. The steamship *Kosei Maru* was torpedoed and sunk by the U.S. submarine *Sunfish* on March 13th, 1943, in the East China Sea.

KOSEI MARU

Nippon Suisan K.K.; 1920; Workman, Clark & Co.; 8,237 tons; 450-2x58-3x37-1; turbine engines. The steamship *Kosei Maru* was torpedoed and sunk by the U.S. submarine *Tunny* on April 7th, 1943, N. of the Caroline Islands.

KOSEI MARU

Chosen Yusen K.K.; 1937; Mitsubishi Jukogyo K.K.; 3,551 tons; 341-2x48-2x27-9; 316 n.h.p.; triple-expansion engines. The steamship *Kosei Maru* was torpedoed and sunk by the U.S. submarine *Sargo* on November 11th, 1943, about 100 miles E. of Okinawa.

KOSEIMARU

Daiko Shosen K.K.; 1,920 tons.
The steamship *Kosei Maru* was bombed and sunk by U.S. land-based aircraft on January 17th, 1944, off the north west coast of New Guinea.

KOSEIMARU

Shimatani Kisen K.K.; 1924; *Kobe Steel Works*; 2,205 tons; 285 -8x42x23; 189 n.h.p.; triple-expansion engines. The steamship *Kosei Maru* was torpedoed and sunk by the U.S. submarine *Thresher* on January 27th, 1944, about 50 miles W. of Kaohsiung, Formosa.

KOSHIN MARU

Hiroumi Shoji K.K.; 1924; *Osaka Iron Works*; 5,485 tons; 407-2x50-8x32-5; 553 n.h.p.; triple-expansion engines. The steamship *Koshin (Kosin) Maru* was torpedoed and sunk by the U.S. submarine *Tinosa* on January 22nd, 1944, 100 miles W. of Kudat, North Borneo.

KOSHIN MARU

2,555 tons.
The tanker *Koshin Maru* was bombed and sunk by U.S. carrier-based aircraft on January 12th, 1945, 25 miles S.E. of Phanrang, Viet Nam.

KOSHO MARU

Eguti Kisen K.K.; 1940; *Namura Shpyd. Co.*; 1,365 tons; 226-1x35-8x19; steam engines.
The steamship *Kosho (Kosyo) Maru* was torpedoed and sunk by a U.S. submarine on May 22nd, 1944, off Penang.

KOSHO MARU

Iino Kaiun K.K.; 2,854 tons.
The steamship *Kosho Maru* was bombed and sunk by U.S. land-based aircraft on October 30th, 1944, off Sandakan, North Borneo.

KOSHU MARU

2,612 tons.
The *Koshu (Kosyu) Maru* was torpedoed and sunk by the U.S. submarine *Ray* on August 4th, 1944, 90 miles S.W. of Cape Mandhar, Celebes.

KOSHUMARU

KaiMidori; 1911; *Kawasaki Dkyd. Co.*; 2,812 tons; 298-IX 43-6x23; triple-expansion engines.
The steamship *Koshu Maru* was sunk by U.S. carrier based aircraft on March 24th, 1945, in the East China Sea.

KOSHUNMARU

Osaka Shosen K.K.; 1927; *Yokohama Dock Co.*; 4,271 tons; 355-7x48-5x32-5; 732 n.h.p.; turbine engines. The *Koshun Maru* went ashore on June 6th, 1937, S. of Kagoshima, and broke up.

KOSIN MARU

Okada Gumi K.K.; 1938; *Osaka Iron Works*; 6,530 tons; 424-1x57x34-4; 517 n.h.p.; turbine engines. The *Kosin Maru* sank on August 9th, 1944, in 26° 10' N., 124° 15' E., due to marine causes.

KOSIN MARU

KuribayasiSyosen K.K.; 1917; *American S.B. Co.*; 1,868 tons; 251 x43-5x20; 274 n.h.p.; triple-expansion engines. The *Kosin Maru* went aground at Kawasaki on December 11th, 1945, during a storm and became a total loss.

KOSMOS

Hvalfangerselskapet Kosmos A/S; 1929; *Workman Clark*; 17,801 tons; 554-1x77-2x49-6; 988 n.h.p.; quadruple-expansion engines.
The Norwegian whale oil refinery *Kosmos* was intercepted and sunk by a German raider on September 16th, 1940, about 200 miles S.E. of Ascension Island on a voyage from Table Bay to Curacao with a part cargo of whale oil.

KOSMOS II

Hvalfangerselskapet Kosmos II A/S; 1931; *Workman, Clark*; 16,966 tons; 553-4x77-2x37-6; 938 n.h.p.; quadruple-expansion engines.
The Norwegian whale oil refinery *Kosmos II* was torpedoed by a German submarine at 3.45 a.m. on October 28th, 1942, about 600 miles S.E. of Cape Farewell on a voyage from New York to the Clyde with 21,000 tons of black oil. Although badly damaged the tanker was still navigable so the passengers were put into the boats and a working crew remained on board to get her to port. At 7.20 a.m., however, she was again torpedoed and sank. Forty of her complement of 129 were lost.

KOSSEIR

Khedivial Mail S.S. & Graving Dock Co.; 1884; *J. Laing*; 1,855 tons; 276-5x36-4x17; 2,329 n.h.p.; 12knots; compound engines.
The steamship *Kosseir* was torpedoed and sunk by a German submarine 40 miles N.E. by N. % N. of Alexandria on July 20th, 1918. The captain and 38 of the crew were killed.

KOTAPINANG

Rotterdamsche Lloyd; 1930; *Nederlandsche Scheepsbouw. Maats.* 7,277 tons; 449-3x60-7x29-7; 1,857 n.h.p.; oilengines. The Dutch motorship *Kota Pinang* was taken over by the Germans for use as a raider or supply ship. On October 3rd, 1941, she was sunk by British warships about 300 miles N. of the Azores.

KOTARADJA

Rotterdamsche Lloyd; 1927; *Koninklijke Maats. de Schelde*; 7,177 tons; 448-8x60-8x30-7; 1,250 n.h.p.; oilengines. The Dutch motorship *Kota Radja* was bombed by Japanese aircraft on February 24th, 1942, at Sourabaya, loaded with rubber. The ship was set on fire and completely destroyed. Nothing was ever heard of her crew.

KOTA TJANDI

Rotterdamsche Lloyd; 1930; *Wilton's Engineering & Slipway Co.*; 7,295 tons; 449-6x60-8x29-7; 1,857 n.h.p.; oilengines.
The Dutch motorship *Kota Tjandi* was torpedoed and sunk by a German submarine on April 30th, 1943, off Sierra Leone on a voyage from Haifa to England. Seven of her crew were lost.

KOTOMARU

Sanko Kisen K.K.; 1939; *Nakata Zosensho*; 1,053 tons; 200 X 31-5x18-5; 83 n.h.p.; triple-expansion engines.
The steamship *Koto Maru* was torpedoed and sunk by the U.S. submarine *Barb* on May 31st, 1944, off the Kurile Islands.

KOTO MARU

Chosen Yusen K.K.; 1937; *Mitsubishi Jukogyo K.K.*; 3,557 tons; 341-2x48-2x28; 214 n.h.p.; triple-expansion engines. The steamship *Koto Maru* was torpedoed and sunk by the U.S. submarine *Flasher* on July 7th, 1944, off Hone Cohe, Indo-China.

KOTOBUKIMARU

18,765 tons.
The *Kotobuki Maru*, probably an oil tanker, struck a mine and sank on May 8th, 1945, S.W. of Mokpo, Korea.

KOTOHIRA MARU

Naigai Kisen K.K.; 1918; *Osaka Iron Works*; 6,101 tons; 407-2x50-8x32-5; 553 n.h.p.; triple-expansion engines. The steamship *Kotohira Maru* was bombed and sunk by U.S. land-based aircraft on January 5th, 1943, S.W. of the Aleutian Islands.

KOTOHIRASAN MARU

Mitsui Sempaku K.K.; 2,220 tons.
The *Kotohirasasan Maru* was torpedoed and sunk by the U.S. submarine *Pogy* on August 5th, 1945, about 50 miles W. of Funakawa, Japan.

KOTOKU MARU

Hiroumi Syozi K.K.; 1937; *Mitsubishi Jukogyo K.K.*; 6,701 tons; 436-4x58-5x32-8; 839 n.h.p.; oilengines.

The motor vessel *Kotoku Mam* was bombed and sunk by U.S. land-based aircraft on August 8th, 1942, in the Caroline Islands.

KOTOKU MARU

Daiko Shosen K.K.; 1,943 tons.

The steamship *Kotoku Mam* was torpedoed and sunk by the U.S. submarine *Picuda* on August 25th, 1944, off the north west coast of Luzon Island, Philippines.

KOUMOUNDOUROS

C. E. Embiricos; 1925; *R. Thompson & Sons*; 3,598 tons; 360x50-5x22-6; 349 n.h.p.; triple-expansion engines. The Greek steamship *Koumoundouros* was torpedoed and sunk by a German submarine on October 8th, 1942, about 20 miles S.W. of Cape Point, South Africa. Five of her crew were killed.

KOUN MARU

Japanese Government; 1,665 tons.

The *Koun Mam* struck a mine and sank on June 13th, 1945, off Macao, China.

KOVDA

1905; *Flensburger Schiffs. Ges.*; 1,225 tons; 240-1x35-5x14-6; 110 n.h.p.; triple-expansion engines.

The German cargo ship *Taurus*, which was requisitioned by the Russian Government and renamed *Kovda*, struck a mine and sank in the Baltic in August, 1916.

KOW SHING

Indo-China Steam Nav. Co.; 1883; *Barrow S.B. Co.*; 2,134 tons; 250 x 39 • 2 x 21; 241 h.p.; 10 knots; compound engines. The steamship *Kow Shing*, Capt. T. R. Galsworthy, was chartered by the Chinese government to carry 1,500 troops to Korea just before the outbreak of the Sino-Japanese War. She also carried a German artillery officer, Capt. C. von Hanneken. At 9 a.m. on July 20th, 1894, the vessel was in the Asan Strait escorted by the Chinese sloop *Tsao-Kiang* when she was intercepted by the Japanese cruiser *Naniwa*, 3,800 tons, Capt. H. Togo, later the famous admiral.

Shortly before this meeting a Japanese squadron of three ships, of which the *Naniwa* was one, had engaged the Chinese cruiser *Chi-Yuen*, 2,300 tons, and the gunboat *Kuang-I*, 1,200 tons, and severely damaged both. The weather was misty and it was while in search of the retreating Chinese that the *Naniwa* ran into the troopship and her escort. The *Tsao-Kiang* steamed away leaving the merchantman to the Japanese who signalled her to stop, which she did, and the warship sent a boat. The officer in charge returned with the news that Capt. Galsworthy and his British officers were held prisoner by the Chinese.

A difficult situation now arose, and one which has seldom occurred at sea. The Chinese general in command of the troops on the vessel insisted that the captain continue the voyage, relying on the protection afforded by the British flag. The captain refused because he believed that the Japanese would at once sink the ship, for the safety of which he was responsible to his owners. Lastly Capt. Togo had to decide whether to forego his prize, or sink her and risk a grave dispute between the British and Japanese governments. Sinking a merchantman flying the Red Ensign while pursuing her lawful occasions on the high seas was no light matter.

For some hours the ships lay hove-to exchanging messages; the Chinese adopting a defiant attitude and refusing to allow the British officers to leave. Finally Capt. Togo, seeing that it was impossible to deal with the Chinese other than by force fired a torpedo which hit the *Kow Shing* in the coal bunker and blew up the boilers. The *Naniwa* then fired two broadsides and opened fire with machine guns on the Chinese troops on board and in the water.

Capt. Galsworthy, his chief officer and the boatswain, the only survivors of the crew, were picked up by the Japanese. Capt. von Hanneken escaped and eventually reached Chemulpo, Korea. Forty-one Chinese also survived.

Admiral Freemantle, commanding the British Far Eastern Fleet, addressed a strong note to Vice-Admiral Ito, forbidding the Japanese navy to stop any British ship on the high seas. This was followed some days later by a protest from the Foreign Office to the Japanese government, after which the incident was closed.

KOWA MARU

Nippon Kogyo Risen K.K.; 1909; *Clyde S.B. & E. Co.*; 3,217 tons; 331-2x43-2x22-4; 397 n.h.p.; triple-expansion engines.

The steamship *Kowa Maru* was torpedoed and sunk by the U.S. submarine *Wahoo* on March 19th, 1943, S. of Dairen,

KOWA MARU

Shiota Shoji K.K.; 1906; *Grangemouth & Greenock Dockyard Co.*; 4,520 tons; 370x52-2x17-5; 353 n.h.p.; triple-expansion engines.

The steamship *Kowa Maru* was torpedoed and sunk by the U.S. submarine *Harder* on September 23rd, 1943, off Oshima, Japan.

KOWA MARU

Sanko Kisen K.K.; 1940; *Nakata Zosensho*; 1,106 tons; 211-6X32x18-5; 160 n.h.p.; oil engines.

The motor vessel *Kowa Maru* was bombed and sunk by U.S. land-based aircraft on February 21st, 1944, off New Hanover, Admiralty Islands.

KOWARRA

Australian Steamships Proprietary Ltd.; 1916; *J. Priestman & Co.*; 2,125 tons; 270x40x17-8; 242 n.h.p.; 11 knots; triple-expansion engines.

The steamship *Kowarra*, Capt. Donald MacPherson, was torpedoed and sunk by an enemy submarine on April 24th, 1943, off Sandy Cape Lighthouse, Queensland. Capt. MacPherson, 19 of the crew and one gunner were lost.

KOYO MARU

Daiko Shosen K.K.; 6,435 tons.

The *Koyo Maru* was torpedoed and sunk by the U.S. submarine *Gunnell* on June 15th, 1943, about 100 miles S. of Korea.

KOYO MARU

Nippon Yusen K.K.; 1919; *Matsuo Ironworks & Dockyard*; 3,010 tons; 311 x44-2x27; 300 n.h.p.; triple-expansion engines.

The steamship *Koyo Maru* was torpedoed and sunk by the U.S. submarine *Harder* on September 9th, 1943, S. of Choshi, Japan.

KOYO MARU

Toyo Kisen K.K.; 1919; *Uraga Dock Co.*; 5,471 tons; 400X53-2x32; 513 n.h.p.; triple-expansion engines. The steamship *Koyo Maru* was torpedoed and sunk by the U.S. submarine *Snook* on February 23rd, 1944, about 150 miles N.N.W. of the Bonin Islands.

KOYU MARU

Hiroumi Shoji K.K.; 1021; *Mitsubishi Zosen Kaisha*; 5,325 tons; 400X54-5x30; 496 n.h.p.; triple-expansion engines.

The steamship *Koyu Maru* was torpedoed and sunk by the U.S. submarine *Gar* on January 20th, 1944, S.W. of the Caroline Islands.

KOZAN MARU

Yamamoto Kisen K.K.; 1935; *Mitsubishi Jukogyo K.K.*; 4,180 tons; 360x50x29; 370 n.h.p.; oilengines. The motor vessel

Kozan Maru was torpedoed and sunk by the U.S. submarine *Sunfish* on September 4th, 1943, W. of Kaohsiung, Formosa.

KOZAN MARU

Japanese Government; 3,923 tons.

The *Kozan Maru* struck a mine and sank on March 19th, 1945, off Soochow, China.

KOZAN MARU No. 2

Yamamoto Kisen K.K.; 6,886 tons.

The *Kozan Maru No. 2* was bombed and sunk by U.S. land-based aircraft on May 6th, 1945, N.W. of Mokpo, Korea.

KOZUI MARU

Takatitoh Syosen K.K.; 1937; *Mitsubishi Jukogyo K.K.*; 7,072 tons; 436-4x58-5x30-8; 839 n.h.p.; oilengines.

The motor vessel *Kozui Maru* was torpedoed and sunk by the U.S. submarine *Grayback* on October 14th, 1943, N. of Okinawa Island.

KRAKATAU

Netherlands Navy, minelayer; 1924; Soerabaja Dockyard; 982 tons; 213x34-5x10-5; 2,500 h.p.; 15-5 knots; two 3 in.A.A., guns, 4 m.g.

The minelayer *Krakatau* was one of the ill-fated Allied East Indies Squadron, nearly all the units of which were lost in February or the early days of March, 1942. The vessel was attacked about February 12th by a Japanese force which sank her in action off Bali. Her normal complement was 91.

KRASNY PARTIZAN

U.S.S.R.; 1927; Baltic S.B. & Eng. Works; 2,418 tons; 276-7X 43x20-5; 192 n.h.p.; triple-expansion engines. The Russian ship *Krasny Partizan* left Murmansk on January 24th, 1943, for the United States, but was not seen again.

KRASNY PROFINTERN

U.S.S.R.; 1902; R. Craggs & Sons; 4,648 tons; 332-5x48x 28-8; 379 n.h.p.; triple-expansion engines.

The Russian steamship *Krasny Profintern* was bombed and sunk by German aircraft on November 12th, 1941, at Odessa loaded with benzine and munitions.

KREMLIN

Raeburn & Verel; 1879; A. Stephen & Sons; 1,188 tons; 230-2X30-2x22; 130 h.p.; compound-inverted engines. The British cargo ship *Kremlin* was wrecked about two miles north of Cape Finisterre on September 5th, 1886, while on a voyage from Patras to London carrying a cargo of dried fruit.

KRETA

German Government; 1930; Deutsche Schiff.-u. Maschinbau; A.G. Weser; 2,600 tons; 319-6x43-4x25-4; turbine engines. The steamship *Kreta* was formerly the French *lie de Beaute*, seized by the Germans. On September 21st, 1943, she was torpedoed and sunk by a submarine S.W. of Leghorn.

KRINGSJAA

Kr. Knudsen; 1886; W. Doxford & Sons; 1,750 tons; 258 X 39-5x23-1.

The Norwegian sailing ship *Kringsjaa* was sunk by a German submarine in the Western Atlantic on June 14th, 1918.

KROM

T. C. Munakaldt Vekaleti Devlet Denizyolari Isletme U.M.; 1927; Napier & Miller; 3,359 tons; 340-2x48-7x23-2; 240 n.h.p.; triple-expansion engines.

The Turkish steamship *Krom* was torpedoed and sunk by an unidentified submarine on March 30th, 1944, off Marmarice, Turkey.

KRONOS

Dampfs. Ges. Neptun; 1925; Flensburger Schiffsbau Ges.; 1,412 tons; 240-8x38-8x15-3; 168 n.h.p.; triple-expansion engines.

The German steamship *Kronos* struck a mine and sank on April 24th, 1945, off Vestfjord, Norway.

KROSFOND

Svithun Linjen A/S; 1904; Wood, Skinner & Co.; 1,707 tons; 259-1x36-8x19-8; 156 n.h.p.; triple-expansion engines.

The Norwegian cargo ship *Krosfond* was torpedoed and sunk by a German submarine in the English Channel on November 22nd, 1917.

KUALA

Straits S.S. Co.; 1911; Caledon S.B. & E. Co.; 954 tons; 225-2x35-6x12-8; 132 n.h.p.; triple-expansion engines. The steamship *Kuala* left Singapore on the night of February 13th, 1942, for Australia with refugees; between 100 and 200 nursing sisters and many women and children. On the following day the ship was bombed and sunk by Japanese aircraft off Banka Island. About 150 persons managed to get ashore on Pom Pom Island and were taken off soon afterwards by a small coasting steamship. This ship was sunk by gunfire shortly afterwards and only three persons were saved, the remainder being killed or taken prisoner.

KUDAT

Straits S.S. Co.; 1914; Caledon S.B. & E. Co.; 1,725 tons; 250-5x37-1x18-4; 182 n.h.p.; triple-expansion engines. The steamship *Kudat* was bombed and sunk by Japanese aircraft on December 31st, 1941, near Port Swettenham.

KUJAWIAK

Polish Navy, destroyer; 1942; Yarrow; 1,025 tons; 272-7X 28-3x7-7; 19,000 s.h.p.; 27-5 knots; turbine engines.; 3-drum boilers; four 4 in. guns, 8 smaller.

The destroyer *Kujawiak* was formerly the British 'Hunt' class destroyer *Oakley*. In mid-June 1942 the vessel was part of a naval force under Vice-Admiral Curteis escorting a convoy from Gibraltar to Malta. The ships were sighted by enemy aircraft when some days out and a strong attack by bombers, submarines and surface craft developed. On the 15th the *Kujawiak* struck a mine when nearing Malta and sank.

For full story of the action see under the destroyer *Bedouin*.

KUL

AjSThv. Halvorsen; 1907; Mackay Bros.; 1,310 tons; 230-8X 34-2x16; triple-expansion engines.

The Norwegian ship *Kul* was carrying iron ore and a deck cargo of timber from Ronnskar to Eitrheirn on November 21st, 1950, when the cargo shifted in heavy seas and she capsized and sank near the Almagrundet lightship.

KUMA

Japanese Navy, light cruiser; 1919; Sasebo; 5,100 tons; 535X 46-8x15-8; 70,000 s.h.p.; 33 knots; turbine engines; Kanpon boilers; seven 5-5 in. guns, two 3 in., 2 m.g., 8 T.T., 80 mines, 1 aircraft.

The light cruiser *Kuma* was torpedoed and sunk by the British submarine *Tally ho* on January 11th, 1944, off Penang. Her normal complement was 439.

KUMAGAWA MARU

Toyo Kaiun K.K.; 1934; Mitsubishi Zosen Kaisha; 7,508 tons; 436-3x58-5x32-8; 839 n.h.p.; oil engines. The motorship *Kumagawa Mam* was bombed and sunk by U.S. carrier-based aircraft on January 12th, 1945, 50 miles E. of Gocong, Indo-China.

KUMANO

Japanese Navy, heavy cruiser; 1936; Kawasaki Dockyard; 14,000 tons; 639-8x59-8x14-8; 90,000 s.h.p.; 33 knots; turbine engines; Kanpon boilers; eight 8 in. guns, eight 5 in.A.A., 12 T.T., 4 aircraft.

The heavy cruiser *Kumano* was one of the large number of vessels sunk during November 1944 by carrier-borne aircraft of the U.S. Navy. The *Kumano* was lying in Dasol Bay, near Santa Cruz, on November 25th, when she was hit by aerial torpedoes and capsized. Her normal complement was 850.

KUMANOVO

Dubrovacka Plovidba A.D.; 1907; Kockums M/V AJB; 1,409 tons; 250-6x34-2x20-1; 357 n.h.p.; triple-expansion engines.

The Yugoslav ship *Kumanovo* sprang a leak and sank on December 27th, 1944, E. of Sicily.

KUMANOYAMA MARU

Mitsui Sempaku K.K.; 2,857 tons.

The steamship *Kumanoyama Maru* was torpedoed and sunk by the U.S. submarine *Grouper* on June 24th, 1944, off Shimodo, Japan.

KUMARI

National S.S. Co.; 1919; Teikoku S.S. Co.; 1,190 tons; 228X 33 X16-5; 140 n.h.p.; triple-expansion engines. The British cargo ship *Kumari* foundered near Dwarka on June 14th, 1932, while on a voyage from Karachi, via Bombay and Tuticorin, to Colombo carrying a cargo of grain and cotton. The captain and eight of the crew were lost.

KUMSANG

KUMSANG

Indo-China S.N. Co.; 1920; *Sir J. Laing & Sons*; 5,447 tons; 420-3x55x27-9; 712 n.h.p.; 10 knots; triple-expansion engines.

The British steamship *Kumsang*, Capt. W. J. Lawrence, was torpedoed and sunk by a German submarine some 400 miles W. of Sierra Leone on September 30th, 1942. Some of the crew were killed. The *Kumsang* was not in convoy.

KUNG WO

Indo-China Steam Nav. Co.; 1921; *Hong Kong & Whampoa Dock Co.*; 4,636 tons; 350x48-5x14; 533 n.h.p.; triple-expansion engines.

The steamship *Kung Wo*, on a voyage from Singapore to Australia, was bombed and sunk by Japanese aircraft on February 14th, 1942, off Banka Island.

KUNIKAWA MARU

Kawasaki Risen K.K.; 1937; *Kawasaki Dkyd. Co.*; 6,863 tons; 479-5x62-3x30-3; 1,850 n.h.p.; oil engines. The motor vessel *Kunikawa Mam* was taken over by the Japanese Navy for use as a seaplane tender. On April 30th, 1945, she was bombed and sunk by U.S. land-based aircraft off Balik Papan, Borneo.

KUNISHIMA MARU

Iino Kisen K.K.; 1937; *Harima S.B. & Eng. Co.*; 4,083 tons; 363-5x50x29; turbine engines.

The steamship *Kunishima (Kunisima) Maru* was torpedoed and sunk by the U.S. submarine *Sunfish* on February 23rd, 1944, off Tenian Island, Ladrone Islands.

KUNITAMA MARU

Tamai Shosen K.K.; 3,127 tons.

The *Kunitama Maru* was torpedoed and sunk by the U.S. submarine *Capelin* on November 11th, 1943, N.E. of Bum Island, Celebes.

KUNITSU MARU

Settsu Shosen K.K.; 1937; *Harima S.B. & Eng. Co.*; 2,724 tons; 303x45x24-5; 266 n.h.p.; turbine engines. The steamship *Kunitsu (Kunitu) Maru* was bombed and sunk by U.S. carrier-based aircraft and British aircraft on April 19th, 1944, off Sabang.

KUNIYAMA MARU

Miyaji Kisen K.K.; 2,871 tons.

The steamship *Kuniyama Maru* was bombed and sunk by U.S. land-based aircraft on September 9th, 1944, S. of Basilan Island, Philippines.

KURAMASAN MARU

Mitsui Bussan Kaisha; 1927; *Mitsui Bussan Kaisha*; 1,995 tons; 275-5x40-7x21; 224 n.h.p.; oil engines.

The motor vessel *Kuramasan Maru* was torpedoed and sunk by the U.S. submarine *Barbero* about 50 miles N.W. of Macassar.

KURDISTAN

F. C. Strick & Co.; 1906; *Clyde S.B. & E. Co.*; 2,813 tons; 330'8x43-2x14-3; 354 n.h.p.; triple-expansion engines.

The British cargo ship *Kurdistan* foundered, in heavy weather, 60 miles from the Scilly Isles on October 20th, 1910, while on a voyage from Manchester, via Marseilles, to Bussorah. She was carrying a general cargo. Ten of the crew got away in a boat, which as picked up 26 hours later by the sailing vessel *Vincent*. By this time, however, eight of the ten men had died of exposure or had been washed overboard.

KURDISTAN

Hindustan S.S. Co.; 1928; *Short Bros.*; 5,844 tons; 420x54x29-3; 430 n.h.p.; triple-expansion engines.

The British steamship *Kurdistan*, on a voyage from New York to Manchester, was torpedoed and sunk by a German aircraft on December 10th, 1941, about 300 miles W. of the Hebrides. Seven of her crew, one gunner and two of the Convoy Commodore's staff were killed.

KURENAI MARU

Osaka Shosen K.K.; 1924; *Osaka Iron Works*; 1,547 tons; 238-2x38x19-6; 449 n.h.p.; oil engines.

The motor vessel *Kurenai Maru* was sunk by U.S. carrier-based aircraft on September 9th, 1944, in the Sulu Sea.

KURETAKE

Japanese Navy, destroyer; 1922; *Kawasaki*; 820 tons; 275 X 26-5x8-2; 21,500 s.h.p.; 31-5 knots; turbine engines; Kampon boilers; three 4-7 in. guns, 2 m.g., 4 T.T.

The Japanese destroyer *Kuretake* was torpedoed and sunk in the Luzon Strait, Philippine Islands, by the U.S. submarine *Razorback* on December 30th, 1944. The destroyer's normal complement was 110.

KURETAKE MARU

Tatsuzuma Kisen K.K.; 1925; *R. Duncan & Co.*; 5,175 tons; 404-9x53x27-6; 477 n.h.p.; triple-expansion engines. J The steamship *Kuretake Maru* was sunk by gunfire from U.S. warships on January 24th, 1942, S. of Gorontalo, Celebes.

KURETAKE MARU

Nippon Yusen K.K.; 1938; *Kawaminami Kogyo K.K.*; 1,924 tons; 271-7x40x20-3; triple-expansion engines.

The *Kuretake Maru* was torpedoed and sunk by the U.S. submarine *Sterlet* on May 29th, 1945, in the La Perouse Strait, Japan.

KUROGANE MARU

Ishihara Kisen K.K.; 2,844 tons.

The steamship *Kurogane Maru* was sunk by U.S. carrier-based aircraft on September 21st, 1944, off Corregidor.

KUROHIME MARU

Kurohime Kisen Goshi Kaisha; 1920; *Lithgows*; 4,697 tons; 384-8x52x26-7; 543 n.h.p.; triple-expansion engines. The steamship *Kurohime Maru* was torpedoed and sunk by the U.S. submarine *Tuna* on March 30th, 1943, N. of Manus Island.

KUROKAMISAN MARU

Turumaru Hirotarō; 1918; 1,243 tons; 228x33x18-7. The *Kurokamisan Maru* was bombed and sunk by U.S. land-based aircraft on May 14th, 1945, in the Korea Strait.

KUROSHIO

Japanese Navy, destroyer; 1938; *Fujinagata*; 2,000 tons; 364 x 35x11; 45,000 s.h.p.; 36 knots; turbine engines; Kampon boilers; six 5 in. guns, 2 m.g., 8 T.T.

The destroyers *Kagero*, *Kuroshio* and *Oyashio*, all of 2,000 tons, were steaming through the Blackett Strait, New Georgia, on May 8th, 1943, when they ran into a minefield. All three vessels struck mines, the *Kuroshio* being sunk and the other two disabled. A squadron of U.S. naval dive bombers then came on the scene and completed the destruction of the two disabled destroyers.

The vessels carried complements of over 200 apiece.

KUROSHIO MARU

Tyugai Kaiun K.K.; 1938; *Harima S.B. & Eng. Co.*; 10,518 tons; 504-7x66x37-5; turbine engines.

The tanker *Kuroshio Maru* was sunk by U.S. carrier-based aircraft on January 21st, 1945, off Kaohsiung, Formosa.

KURTULUS

Taviloglu Mustafa ve Kardesleri Kollektif Sirketi; 1883; *Caird Purdie & Co.*; 1,742 tons; 250-7x35-1x21-8; 195 n.h.p.; compound engines.

The Turkish cargo ship *Kurtulus* went ashore on January 20th, 1942, at Polatli, on the north coast of Marmara Island, Turkey, and sank.

KUSNETS LESOV

U.S.S.R.; 1933; *States k.B. Yd. "Marti"*; 3,974 tons; 347-6x51-6x24-9; 497 n.h.p.; oil engines.

The Soviet motorship *Kusnets Lesov* left Archangel on November 17th, 1942, for Loch Ewe, but was not seen again.

KUSONOKI

Japanese Navy; destroyer; 1943 (circa); Japan; 1,260 tons; 320x30x9-7; 38,500 h.p.; 34 knots; turbine engines; four 4-7 in. guns, 2 A.A.m.g., 6 T.T.

The Japanese destroyer *Kusonoki* was sunk by American warships on December 3rd, 1944, in a naval action in Ormoc Bay, Philippines.

KUSUYAMA MARU

Yamashita Risen K.K.; 1919; R. Thompson & Sons; 5,306 tons; 400'3x52-3x28-5; 517 n.h.p.; triple-expansion engines. The steamship *Kusuyama Maru* was torpedoed and sunk by the U.S. submarine *Tunny* on February 8th, 1943, about 100 miles S.W. of Kaohsiung, Formosa.

KUT SANG

Indo-China Steam Navigation Co.; 1905; Swan, Hunter & Wigham Richardson; 4,895 tons; 385-5x51-3x20-4; 555 n.h.p.; 12 knots; quadruple-expansion engines.

The steamship *Kut Sang* was torpedoed and sunk by a German submarine 40 miles E.S.E. of Cape Palos on April 29th, 1918. Fifty-nine persons, including the captain, were killed.

KUTAHYA

D.B. Deniz Nak.T.A.S.; 1949; Fredrikstad M/V A/S; 3,113 tons; 354-4x52-2x—; compound engines.

The Turkish cargo ship *Kutahya* was carrying cotton from Izmir to Hamburg when, on November 13th, 1960, she was in collision with the *Spreewald* and sank near the Terschelling Bank lightship.

KUWA

Japanese Navy; destroyer; 1942; Japan; 1,000 tons; 300 X—X—; 30 knots; turbine engines; four 4-7 in. guns, several A.A., 4 T.T.

The destroyer *Kuwa* was sunk in a night action between American and Japanese ships in Ormoc Bay, Leyte, Philippine Islands on December 3rd, 1944. The U.S. force consisted of three destroyers, one of which, the *Cooper*, 2,200 tons, was sunk by torpedo. On the Japanese side there was no loss other than the *Kuwa*, but one destroyer was badly damaged.

The *Kuwa* carried a complement of about 120.

KUWAYAMA MARU

Yamashita Kisen K.K.; 5,724 tons. The *Kuwayama Maru* was torpedoed and sunk by the U.S. submarine *Thresher* on February 22nd, 1943, off Flores Island.

KUZAN MARU

1,000 tons. The steamship *Kuzan Mam* was bombed and sunk by U.S. land-based aircraft on January 20th, 1944, about 150 miles W. of Kaohsiung.

KVERNAAS

Morkands Rederi A/S; 1918; Fredrikstad Mek. Verksted; 1,819 tons; 265x42-1x17-9; 150 n.h.p.; triple-expansion engines.

The Norwegian steamship *Kvernaas* struck a mine and sank on February 17th, 1940, four miles N.W. of Schouwen Bank, Holland.

KWANAN MARU

Zamashita Kisen K.K.; 1920; Uraga Dock Co.; 2,194 tons; 280x43-2x21; 156 n.h.p.; triple-expansion engines. The *Kwanan Maru* was on a voyage from Takao to Keelung on December 4th, 1931, when she went ashore on the N.E. point of Formosa near Giran. She broke in two and the afterpart sank.

KWANG CHI

Chinese Navy; light cruiser; 1885; Stettin; 1,300 tons; 217x 31 x—; 3,000 i.h.p.; 15 knots; triple-expansion engines; two 6 in. guns, five 4-7 in., 8 m.g.

The Chinese light cruiser *Kwang Chi* played a brief and inglorious part in the battle of the Yalu against the Japanese on September 17th, 1894. The *Tsi Yuen*, which was on the extreme left of the Chinese line, turned about and fled immediately the Japanese warships opened fire. The *Kwang Chi*, after a few minutes of enemy shelling, followed her consort's example and steamed down the

coast to Talién-Wan Bay. On the same evening she struck on a reef at the entrance to the bay and foundered, taking with her most of her complement. For full story of the battle of the Yalu, see *Chi-Yuen*.

KWANGSE

China Navigation Co.; 1898; Scott & Co.; 1,985 tons; 275-2X 38-2x21-4; 169 n.h.p.; triple-expansion engines. The British cargo ship *Kwangse* was wrecked on Ping rock in 25° 11' N., 119° W.E., on October 21st, 1928, while on a voyage from Swatow to Shanghai carrying a general cargo.

KWANGTUNG

China Navigation Co.; 1922; Taikoo Dockyard & Engineering Co.; 2,626 tons; 310-3x44-2x20-9; 12 knots; turbine engines. The British steamship *Kwang tung*, with a crew of 96 and 35 military personnel on board was intercepted and torpedoed by a Japanese submarine S. of Java at about 3 a.m. on January 4th, 1942. The j submarine came to the surface and opened fire on the ship and sank her and then fired at the four lifeboats at close range. She then rammed the captain's boat and sank it. The chief officer's boat waited until the submarine had submerged and then went in search of survivors, picking up 12 men. The submarine surfaced a second time and gave chase, cutting the chief officer's boat in two, both portions of which remained afloat with 13 men clinging to them. These men were picked up next day by a passing steamship. Thirty-five survivors, including two European officers, landed at Sourabaya.

KWASIND

Arctic Steamship Co.; 1894; W. Doxford & Sons; 2,211 tons; 297X 40x21-7; 233 n.h.p.; 10 knots; triple-expansion engines. The steamship *Kwasind* was mined and sunk off Southwold on March 11th, 1917. Twelve men were killed. The captain was among the survivors.

KWEIYANG

China Navigation Co.; 1890; London & Glasgow Co.; 1,718 tons; 255 X36-1x21-8; 150 n.h.p.; triple-expansion engines. The British cargo ship *Kweiyang* was wrecked on Little Ockseu on April 23rd, 1910. She was on a voyage from Hong Kong to Ningpo carrying a general cargo.

KWONG SANG

Indo-China Steam Nav. Co.; 1902; Wigham Richardson & Co.; 2,283 tons; 290x42-1x15-2; 212 n.h.p.; 10-5 knots; triple-expansion engines.

The steamship *Kwong Sang* left Shanghai at about 4 o'clock on the afternoon of August 8th, 1931, for Swatow, under command of Capt. C. I. A. Hendry with a crew of six British officers and 44 Chinese. On the 9th she encountered a typhoon and was driven ashore on the island of Fuyan, N. of Foochow, early next morning. All but three of the crew perished, the survivors falling into the hands of Chinese pirates. Nothing of this came to the knowledge of the authorities for about a week, but in the meantime four steamships were sent out to make a search. Finally it was decided to dispatch the destroyer *Sepoy* and the Chinese gunboat *Tung Chi I* to search in the pirate area between Funing Bay and Santuao Bay. The ships landed a force on the peninsula between the two bays and compelled the pirates to give up the three men and also to return a quantity of the ship's gear.

KYARRA

Australasian United Steam Navigation Co.; 1903; W. Denny & Bros.; 6,953 tons; 415-5x52-2x28-6; 770 n.h.p.; 14 knots; triple-expansion engines.

The steamship *Kyarra* was taken over for service as a hospital ship during the First World War and on May 26th, 1918, was torpedoed and sunk by a German submarine two miles S.S.E. of Anvil Point. Six persons were killed. The captain was among the survivors.

KYBFELS

Deutsche Dampfs. Ges. Hansa; 1937; Deutsche Schiff-u. Maschinenbau A.G. Weser; 7,764 tons; 485-6x61-3x31-1; 1,830 n.h.p.; oilengines.

The German motorship *Kybfels* struck a mine and sank on May 21st, 1941, N.W. of Ithaca, Greece.

KYLECLARE

KYLECLARE

Limerick Steamship Co.; 1932; Caledon Shipbuilding & Engineering Co.; 700 tons; 211'7x32-7x12-6; 173 n.h.p.; 10-5 knots; triple-expansion engines.

The steamship *Kyleclare*, Capt. A. R. Hamilton, was torpedoed and sunk by a German submarine about 100 miles W. of the mouth of the River Douro, Portugal, on February 21st, 1943. Eighteen men, including Capt. Hamilton, were killed.

KYLEGLEN

Monroe Bros.; 1917; C. Connell & Co.; 3,670 tons; 352 -9 x 47-7x26-9; 367 n.h.p.; triple-expansion engines. The British cargo ship *Kyleglen* sailed in ballast from the Tees on December 3rd, 1940, on a voyage to Baltimore, via Oban and Sydney, N.S. She arrived safely at Oban and left on December 9th, but no subsequent information was received. The ship carried a crew of 36 and one gunner.

KYLEMOOR

Walter Runciman & Co.; 1896; J. Readhead & Sons; 3,103 tons; 323-5x46-1x23-1; 278 n.h.p.; triple-expansion engines. The British cargo ship *Kylemoor* sank after a collision in Sulina Roads on September 23th, 1896, while on a voyage from Ibrail to Antwerp carrying a cargo of grain.

KYLEMORE

Williamson-Buchanan Steamers; 1897; Russell & Co.; 319 tons; 200-5x24-1x7-7; 93 r.h.p.; 18 knots (estimated); diagonal compound engines.

The paddle steamship *Kylemore* was taken over by the British Admiralty at the beginning of the First World War for service as a minesweeper. On the outbreak of the Second World War she was again taken over for netlaying duties and was bombed and sunk by German aircraft off Harwich on August 21st, 1940.

KYLERA

Abram & Addie; 1879; Irvine & Co.; 1,590 tons; 259x34-1x19-6; 169 n.h.p.; compound engines.

The British cargo ship *Kylerea* was sunk in a collision on June 23rd, 1908, off Majorca. She was carrying a cargo of coal from the Tyne to Cannes.

KYMA

Maroulis Bros.; 1898; J. L. Thompson & Sons; 3,420 tons; 350X47X24-3; 293 n.h.p.; triple-expansion engines. The Greek cargo ship *Kyma* was sunk by a German submarine off the west coast of Africa on June 21st, 1917.

KYMA

N. Sittas & Co.; 1912; Short Bros.; 3,994 tons; 363x50x25-6; 365 n.h.p.; triple-expansion engines.

The Greek steamship *Kyma* was torpedoed and sunk by a German submarine on May 24th, 1940, about 300 miles W. of Ushant on a voyage from Rosario to Avonmouth with maize. Seven of her crew were killed.

KYNO

Ellermarfs Wilson Line; 1913; Dunlop Bremner & Co.; 3,034 tons; 310-3x44-7x26-9; 249 n.h.p.; 9-25 knots; triple-expansion engines.

The steamship *Kyno* was torpedoed and sunk by a German submarine nine miles N. by E. J. E. of Cherchell, Algeria, on November 16th, 1917. Five men were killed. The captain was among the survivors.

KYNO

Ellermarfs Wilson Line; 1924; Goole S.B. & R. Co.; 3,946 tons; 332-8x46-6x28-9; 241 n.h.p.; triple-expansion engines. The steamship *Kyno*, on a voyage from New York to Hull, was torpedoed and sunk by a German submarine on August 28th, 1940, about 200 miles W. of the Hebrides. Five of her crew were killed.

KYODO MARU

Kagitomi Shosaku; 1914; Gebr. Pot; 1,090 tons; 190x33-5x17; 384 n.h.p.; oil engines.

The tanker *Kyodo Mam* was bombed and sunk by U.S. carrier-based aircraft on January 6th, 1945, 30 miles S.W. of Batac, Philippines.

KYODO MARU No. 13

Oginuno Sotaro; 1896; Workman, Clark & Co.; 1,999 tons; 284-5x40x21; triple-expansion engines.

The *Kyodo Maru No. 13* was sunk by U.S. carrier-based aircraft on July 14th, 1945, in Rikuoka Bay, Japan.

KYODO MARU No. 28

Toa Kaiun K.K.; 1919; Swan, Hunter & Wigham Richardson; 1,506 tons; 258x34-8x23-7; 207 n.h.p.; triple-expansion engines.

The steamship *Kyodo Maru No. 28* was torpedoed and sunk by the U.S. submarine *Seahorse* on July 4th, 1944, about 150 miles S.S.W. of Hong Kong.

KYODO MARU No. 36

Awanokuni Kyodo Kisen K.K.; 1929; Kawasaki Dkyd. Co.; 1,499 tons; 240x36x20; 144 n.h.p.; triple-expansion engines. The steamship *Kyodo Maru No. 36* was torpedoed and sunk by the U.S. submarine *Lapon* on July 18th, 1944, off the S.W. coast of Palawan.

KYOEI MARU No. 2

Kyoei Tanker K.K.; 1940; Harima S.B. & Eng. Co.; 1,157 tons; 209-1x34-4x17-2; steam engines.

The tanker *Kyoei Maru No. 2* was torpedoed and sunk by the U.S. submarine *Dace* on July 27th, 1944, S. of Jolo in the Sulu Archipelago.

KYOEI MARU No. 3

Kyoei Tanker K.K.; 1,182 tons.

The coastal tanker *Kyoei Maru No. 3* was torpedoed and sunk by the U.S. submarine *Bumper* on July 20th, 1945, about 150 miles S. of Cap St. Jacques, Indo-China.

KYOEI MARU No. 6

Kyoei Tanker K.K.; 1,178 tons.

The tanker *Kyoei Maru No. 6* was bombed and sunk by U.S. carrier-based aircraft on January 6th, 1945, 30 miles S.W. of Batac, Philippines.

KYOEI MARU No. 7

Kyoei Tanker K.K.; 1,160 tons.

The *Kyoei Maru No. 7* was bombed and sunk by U.S. carrier-based aircraft on January 12th, 1945, 70 miles S.E. of Gocong, Indo-China.

KYOEI MARU No. 10

Kyoei Tanker K.K.; 1,180 tons.

The tanker *Kyoei Maru No. 10* was bombed and sunk by U.S. carrier-based aircraft on January 6th, 1945, 30 miles S.W. of Batac, Philippines.

KYOKKO MARU

Yamashita Kisen K.K.; 1920; Teikoku S.S. Co.; 6,783 tons; 425x53-6x34-9; 584 n.h.p.; triple-expansion engines.

The steamship *Kyokko Maru* was torpedoed and sunk by the U.S. submarine *Crevalle* on November 15th, 1943, off Olongapo, Philippines.

KYOKO MARU

Japanese Government; 1921; S. Western S.B. Co.; 5,792 tons; 412 x 53 • 3 X 31; 556 n.h.p.; triple-expansion engines.

The tanker *Kyoko Maru* was formerly the Dutch *Semiramis*, seized by the Japanese at Palembang in February, 1942. She was torpedoed and sunk by the U.S. submarine *Ray* on December 27th, 1943, in the Gulf of Bone, Celebes.

KYOKUEIMARU

Nitto Risen K.K.; 10,570 tons.
The tanker *Kyokuei Maru* was torpedoed and sunk by the U.S. submarine *Bluefish* on November 8th, 1943, about 200 miles W. of Luzon Island.

KYOKUHO MARU

10,059 tons.
The tanker *Kyokuho Maru* was torpedoed and sunk by the U.S. submarine *Cabrilla* on October 1st, 1944, off Iba, Philippines.

KYOKUSEIMARU

Asahi Shoji K.K.; 1920; *J. Coughlan & Sons*; 5,493 tons; 410-5x54x29-7; 520 n.h.p.; triple-expansion engines. The steamship *Kyokusei Maru* was bombed and sunk by U.S. land-based aircraft on March 2nd, 1943, off the north coast of New Britain.

KYOKUTO MARU

Iino Shoji K.K.; 1934; *Kawasaki Dkyd. Co.*; 10,051 tons; 502-3x65x37-1; 2,115 n.h.p.; oil engines. The tanker *Kyokuto Maru* was sunk by U.S. carrier-based aircraft on September 21st, 1944, off Corregidor.

KYOKUUN MARU

Kyokuyo Hogeï K.K.; 10,045 tons.
The tanker *Kyokuun Maru* was bombed and sunk by U.S. carrier-based aircraft on January 12th, 1945, 25 miles N.E. of Binh Dinh, Indo-China.

KYOKUYO MARU

Kyokuyo Hogeï K.K.; 1938; *Kawasaki Dockyard Co.*; 17,548 tons; 537x74x48-8; 1,560 n.h.p.; oil engines.
The whale oil factory *Kyokuyo Maru* was sunk by war causes on November 13th, 1943, in the East China Sea.

KYOKUZANMARU

6,300 tons.
The steamship *Kyokuzan Maru* was sunk by U.S. carrier-based aircraft on September 24th, 1944, off the north-west coast of Negros Island, Philippines.

KYPHISSIA

Hamburg-Amerika Linie; 1923; *Schiffs-u. Dockbauw. Flender, A.G.*; 2,964 tons; 337-7x48-2x21-1; 246 n.h.p.; triple-expansion engines.
The German steamship *Kyphissia* was bombed and sunk by British aircraft on May 17th, 1943, off Texel.

KYRAPANAGIA II

A.G. Chalaris; 1899; *Ailsa S.B. Co.*; 1,012 tons; 224x33-lx 15-6; 123 n.h.p.; triple-expansion engines.
The Greek steamship *Kyrapanagia II* was bombed and sunk by German aircraft in April, 1941, during the invasion of Greece.

KYRIAKI

Poutous Maritime Co.; 1912; *Russell & Co.*; 5,528 tons; 423-4x56x27-9; 538 n.h.p.; triple-expansion engines. The Greek steamship *Kyriaki* was bombed and sunk by German aircraft on April 24th, 1941, at Suda Bay, during the invasion of Greece.

KYTHERA

P. Th. Katrakis; 1902; *Fevigs Jernskibsbyggeri*; 1,070 tons; 225-1x34-2x17-1; 117 n.h.p.; triple-expansion engines. The Greek steamship *Kythera* was bombed and set on fire by German aircraft on May 16th, 1941, off Crete. The ship burned for three days before sinking.

KYUEIMARU

Nitto Kisen K.K.; 10,171 tons.
The tanker *Kyuei Maru* was torpedoed and sunk by the U.S. submarine *Flying Fish* on December 27th, 1943, 150 miles S.W. of Kaohsiung, Formosa.

KYUKO MARU

Toa Kaiun K.K.; 3,222 tons.
The *Kyuko Maru* struck a mine and sank on July 14th, 1945, in the Korea Strait.

KYURYUMARU

1919; *Jonker & Stans*; 1,339 tons; 236-5x36-5x15-4; triple-expansion engines.
The steamship *Kyuryu Maru* was formerly the British *Saint Vincent de Paul*, seized by the Japanese at Hongkong in December, 1941. She struck a mine and sank on February 24th, 1945, off Bangkok.

KYUSHU MARU

Harada Kisen K.K.; 1937; *Mitsubishi Jukogyo K.K.*; 8,666 tons; 466-9x62-3x41; 1,960 n.h.p.; oil engines. The motor vessel *Kyushu (Kyusyu) Maru* was bombed and sunk by U.S. land- and carrier-based aircraft on October 15th, 1942, off the Solomon Islands.

L. J. DRAKE

Standard Oil Co. of New Jersey; 1918; Ames S.B. & D.D. Co.; 6,693 tons; 419-6x57-2x30; 480n.h.p.; triple-expansion engines.

The American tanker *L. J. Drake* was torpedoed by a German submarine on June 5th, 1942, on a voyage from Aruba to San Juan, P.R., loaded. The ship blew up and sank with the loss of all on board.

L'ADROIT

French Navy, destroyer; 1926; Chantiers de France, Dunkirk; 1,378 tons; 331x32-2x9-5; 32,000 i.h.p.; 32 knots; turbine engines; four 5 • 1 in. guns, two 37 mm., 6 T.T. The French destroyer *VAdroit*, Cdr. Dupin de Saint-Cyr, was engaged in operations connected with the evacuation of the French and British armies from Dunkirk, when she was bombed by German aircraft. The attack took place on May 21st, 1940, and the destroyer was so badly damaged that she sank.

L'Adroit carried a complement of 159, of whom 27 ratings were lost when she sank.

L'ALCBMENE

French Navy, corvette; thirty-six guns.

The French corvette *UAlcmene*, Capt. the Comte Harcourt, was on a voyage from Tasmania to Whangaroa, New Zealand, where she was to take on board a consignment of kauri spars. On June 3rd, 1851, when somewhere between Hokiang and Kaipara she became embayed and her captain, who was very far out in his reckoning, had no other course than to run her ashore. There was a heavy sea at the time and in coming ashore 12 of her complement of 204 were drowned and many more were injured.

The vessel was so badly off course that after they landed the French officers had no idea of their whereabouts. They erected huts from salvaged timber, and brought ashore whatever supplies were accessible. It was not until later that a reconnaissance party discovered the Maori village of Okaro, which consisted of some 100 people. As it was their "sacred day" the natives were unwilling to send help, but suggested that a messenger be sent back to the Frenchmen's camp saying that help would follow on the next day.

This was done and the shipwrecked party, with their injured men carried on improvised stretchers, reached the village after a march lasting two days. From here boats and canoes conveyed them to Auckland, where they stayed until Capt. Harcourt could charter a ship to take them to Tahiti, and thence to France.

On August 1st, 1851, the American ship *Alexander* left Auckland with 192 survivors of the corvette, some of whom were women. Later the Maoris were suitably rewarded by the French Government.

The place where *UAlcmene* ran ashore was known as Bayley's Gorge. In 1934, more than 80 years after the wreck, a succession of high tides and heavy seas brought the hull to the surface once more.

L'AUDACIEUX

French Navy, destroyer; 1934; Chantiers de la Mediterranee, La Seyne; 2,569 tons; 434-3x39-3x14; 74,000 s.h.p.; 37 knots; turbine engines; five 5-5 in. guns, four 37 mm., four 13mm., 9 T.T.

On September 11th, 1940, the French Vichy government despatched a strong naval force to the port of Dakar, in West Africa. This force comprised the cruisers *George Leygues*, *Gloire*, and *Mont-calm*, sister ships of 7,600 tons, nine 6 in. guns, and the large destroyers *VAudacieux*, *Le Fantasque* and *Le Malin*, also sister ships, of 2,569 tons, five 5-5 in. guns. The squadron was permitted to pass through the straits of Gibraltar unchallenged and reached Dakar on the 14th, where it lay in readiness to repel any attempts at landing by the Free French.

On September 23rd, General de Gaulle with three sloops, the *Savorgnan de Brazza*, 1,969 tons, three 5-5 in. guns, *Commandant Domine*, and *Commandant Duboc*, 630 tons, two 3-9 in. guns, appeared off the port accompanied by some transports carrying Fighting French troops, and some British men-of-war. A motor launch flying a white flag and the Tricolor with four emissaries was sent into the harbour, but was fired upon and compelled to turn back, two of the emissaries, Cdrs. d'Argenlieu and Perrin, being seriously wounded. The offer of parley having failed of its object, an attempt was made to land the Fighting French troops.

This was resisted from the shore, and the three sloops came under a hot fire, receiving many hits and sustaining casualties. Under these circumstances the troops were withdrawn as it was not part of General de Gaulle's policy to bring about hostilities between Frenchmen.

Meanwhile the British force was lying off shore in readiness to assist the Fighting French. This force now became a target for the shore batteries and the 16 in. guns of the *Richelieu*, as well as for three submarines. After due warning that the British would reply if the firing continued, fire was opened on the batteries and the *Richelieu*. Two of the submarines were sunk, but the crew of one was saved without loss, and two destroyers were hit and set on fire, one of them, *Vaudacieux*, sinking later. No attempt was made by the British to press matters to a conclusion, and as soon as the Fighting French were back on board, the expedition sailed for England.

This ended the abortive Dakar Expedition, and it was not until November 1942, that the whole resources of this port, with its ships of war and garrison, passed over to the Allied cause.

LA BAYONNAISE

Cie. des Chargeurs Francais; 1911; Ateliers & Chantiers de France; 2,425 tons; 287-9x42-7x19-4; 208 n.h.p.; triple-expansion engines.

The French steamship *La Bayonnaise* was torpedoed and sunk by a submarine in the Mediterranean on June 8th, 1918.

LA BELLA

D. C. Turnbull & Co.; 1893; Joh. Smith's Jernskibsbyggeri; 406 tons; 144x27-3x12-5.

The New Zealand three masted schooner *La Bella*, was wrecked on a reef, near Warrnambool, Victoria, when attempting to enter harbour without a pilot on November 10th, 1905. Seven of her crew of 12 were lost.

LA BOURGOGNE

Compagnie Generale Transatlantique; 1885; Forges et Chantiers de la Mediterranee; 7,395 tons; 494-4x52-2x34-8; 9,800 i.h.p.; 17-9 knots; quadruple-expansion engines. The liner *La Bourgogne* left New York on Saturday, July 2nd, 1898, bound for Havre with 711 persons on board. Among the passengers was a party of Austrian seamen who had been shipwrecked sometime previously and were returning home, also a large number of Italians. When the vessel reached the Newfoundland Banks she ran into dense fog and this, coupled with faulty navigation, contrived to throw her 160 miles N. of her true course. Despite the fog the ship proceeded at an excessive speed throughout the night of the 3rd-4th July.

At about 5 o'clock on the morning of July 4th, some 60 miles S. of Sable Island, *La Bourgogne* was in collision with the British ship *Cromarty shire*, 1,462 tons, Capt. Henderson, from Dunkirk to Philadelphia with coal. The French vessel was struck on the starboard side abreast the engine room, which was immediately flooded. The heavy swell hastened the end of the ship, which kept afloat only a short time.

The passengers were seized with panic, the Italians and Austrians using their knives and revolvers in a mad attempt to rush the boats. Capt. Deloncle and his officers were powerless to control the disorderly elements. The second officer particularly distinguished himself in providing for the safety of the passengers, while three Roman Catholic priests did their utmost to quell the panic. All four men went down with the vessel.

The boats on the port side were the only ones fit for service, as the collision had smashed all those to starboard. A short, but fatal, delay in launching these was caused by the captain's decision to steam for Sable Island. It soon became obvious, however, that this was impossible and the port boats were lowered, several being swamped in the process, and one, filled with women and children, was smashed by the fall of a funnel. No lifebelts were distributed to the unfortunate people, so that those among them who could not swim were drowned immediately they fell into the water. The *Cromarty shire*, whose people were at first persuaded that their own ship would be the one to sink, carried only two or three boats. These proved of little assistance, as the way on *La Bourgogne* at the time of the collision carried her some distance beyond the British ship.

The total number drowned was 546, including Capt. Deloncle and all his officers. The saved numbered 165, of whom 104 were crew and 61 passengers, there being only one woman survivor.

The *Cromartyshire* picked up the survivors and transferred them later in the day to the Allan liner *Grecian*. This ship then took the sailing vessel in tow and brought her to Halifax. The *Cromartyshire* had her bows cut off by the impact and her foremast and main top-gallant mast carried away.

LA CAMPINE

American Petroleum Co.; 1890; *Palmers' Co.*; 2,557 tons; 309-7x39x26-3; 218 n.h.p.; triple-expansion engines. The Dutch tanker *La Campine* was sunk by a German submarine in the North Sea on March 13th, 1917.

LA CARRIERE

Trinidad Leaseholds; 1938; *Swan, Hunter & Wigham Richardson*; 5,685 tons; 415x53-8x30-6; 590 n.h.p.; triple-expansion engines.

The British steamship *La Carriere* was torpedoed and sunk by a German submarine on February 24th, 1940, 30 miles off Puerto Rico on a voyage from New York to Trinidad. Eleven of her crew and four gunners were lost.

LA CHAUSSADE

1897; *Palmers' Co.*; 4,494 tons; 380x45-2x29-2; 402 n.h.p.; triple-expansion engines.

The French steamship *La Chaussade* was torpedoed and sunk by a submarine in the Mediterranean on August 13th, 1918.

LA COMBATTANTE

Free French Navy, destroyer; 1942; *Fairfield Shipbuilding Co.*; 1,025 tons; 280x29x7-7; 19,000 s.h.p.; 27-5 knots; turbine engines; 3-drum boilers; four 4 in. guns, two 20 mm.A.A. The destroyer *La Combattante* was originally the *Haldon*, of the Hunt class, and was transferred to the Free French forces in 1942. The vessel participated in several actions between light craft. On February 23rd, 1945, when off the East Dudgeon Light she struck a mine and sank.

LA CRESCENTA

Crescent Nav. Co.; 1923; *Furness S.B. Co.*; 5,880 tons; 400x53x32-8; 573 n.h.p.; triple-expansion engines. The British tanker *La Crescenta*, Capt. N. S. Upstill, left Port San Luis, California, on November 24th, 1934, with a cargo of oil for Osaka, Japan. She carried a crew of 29. On December 5th, early in the day, she exchanged calls with the s.s. *Athelviscount*, when all was well. The same ship called her in the evening, but did not receive a reply. From that date no news of her came to hand and in due course she was posted missing.

It was reported at the Inquiry that a passing ship had observed an area of about two square miles of sea covered with crude oil in lat. 34° 51' N., long. 163° 24' W. This was undoubtedly the spot where the tanker had sunk.

LA DIVES

Cie. Generale Transatlantique; 1897; *Nederlandsche Scheeps. Maats.*; 2,108 tons; 272-1x36-7x20-3; 260 n.h.p.; triple-expansion engines.

The French steamship *La Dives* was torpedoed and sunk by a submarine in the Mediterranean on February 1st, 1918.

LA EPOCA

Dodero Hnos.; 1893; *D. & W. Henderson & Co.*; 2,432 tons; 293x43x24-4.

The Uruguayan sailing ship *La Epoca* was sunk by a German submarine in the Bay of Biscay on October 29th, 1917.

LA FLANDRE

American Petroleum Co.; 1888; *Armstrong, Mitchell & Co.*; 2,018 tons; 270x37-7x25-9; 181 n.h.p.; triple-expansion engines.

The Dutch tanker *La Flandre* was bound from New York to Rotterdam when she ran into a minefield laid by the German

minelaying submarine *UC-5*. The tanker struck one of the mines and sank with 29 of her crew. The disaster occurred on February 21st, 1916, near the Galloper lighthouse.

LA FOCE

Soc. Anon. Ilva; 1921; *N. Odero fu A. & Co.*; 2,497 tons; 286-9x41-2x28-4; 115 n.h.p.; triple-expansion engines. The Italian steamship *La Foce* was torpedoed and sunk by a British submarine on December 18th, 1943, off Chiavari.

LA LOIRE

Cie. Nantaise de Navigation a Vapeur; 1902; *Ateliers & Chantiers de Normandie*; 5,343 tons; 381-8x48-2x25-6; 508 n.h.p.; triple-expansion engines.

The French steamship *La Loire* was torpedoed and sunk by a submarine in the Mediterranean on March 31st, 1918.

LA PLATA

W. T. Henley & Co.; 1862; *Palmer Bros.*; 1,218 tons; 249-6X30-5x21-9; 120 n.h.p.; 9-5 knots; inverted direct action engines.

La Plata was an iron screw steamship, barge-rigged, fitted for cable laying and carrying 183 nautical miles of deep sea cable as well as a consignment of telegraph poles and wire. On November 26th, 1874, she left Woolwich for Rio Grande do Sul, having on board 85 men including cable engineers.

On the evening of the 28th the wind began to freshen. By early morning on Sunday 29th a full gale was blowing and *La Plata* was swept from stem to stern by the seas. Her canvas was blown away, boats were swept overboard and finally the engine room was flooded and the ship became unmanageable.

During the day much of the cable was thrown overboard to lighten the ship but the water continued to rise. At about noon all hope of saving *La Plata* was abandoned and the remaining boats were got ready, but not launched, as the seas would not permit. It was hoped that by having the boats ready they would float off the deck, but when the vessel sank only one boat, with 15 men, got away. Two other men, Boatswain Lament and Quartermaster Hooper, managed to support themselves on a damaged raft.

The boat was picked up at daybreak on the 30th by the ship *Gareloch*, Capt. Greenwood. Later on the same day the survivors were transferred to the steamship *Antenor* bound for London. The two men on the raft were rescued after four days by the Dutch schooner *Wilhelm Berkelson* which landed them at Gibraltar. Altogether 68 men, including Capt. Dudden, the commander, were drowned.

LA PLATA

W. S. Bailey; 1866; *Palmer Bros. & Co.*; 1,779 tons; 298-3X32-1x21-5; 250 h.p.; compound inverted engines. The British cargo ship *La Plata* was wrecked off Hanstholm on July 2nd, 1886, while on a voyage from the Tyne to Reval carrying a cargo of coal and bricks.

LA PROVENCE

Compagnie Generale Transatlantique; 1906; *Chantiers & Ateliers de St. Nazaire*; 13,753 tons; 602-3x65x38-3; 2,997 n.h.p.; 22-5 knots; triple-expansion engines; five 5•5 in. guns, two 3 in., four 2 in.

The French liner *La Provence*, taken over for service as a transport, under Cdr. Vesco, was carrying 1,800 troops and crew when she was torpedoed in the Central Mediterranean on February 26th, 1916. The submarine which caused the sinking was the *U. 35*, commanded by Capt. Arnauld de la Periere, a German of French ancestry. The transport sank very rapidly and over 900 of those on board were drowned. The survivors numbered 870.

The difficulties of rescue were increased by the sea that was running and by the explosion of several of the ship's boilers.

LA RAILLEUSE

French Navy, destroyer; 1926; *Chantiers Dubigeon*; 1,378 tons; 330-7x32-2x9-5; 32,000 s.h.p.; 32 knots; turbine engines; four 5•1 in. guns, two 37 mm., 6 T. T.

The destroyer *La Railleuse*, Capt. Hourcade, was sunk by internal explosion while lying off Casablanca on March 24th, 1940. She carried a complement of nine officers and 150 ratings, of whom 28 ratings were killed.

LA RANGE

LA RANCE

Cie. Generate Transatlantique; 1906; Ateliers & Chantiers de Normandie; 2,610 tons; 298-5x40-1 X23-1; 223 n.h.p.; triple-expansion engines.

The French steamship *La Rance* was sunk by a submarine in the Mediterranean on December 2nd, 1917.

LA SALLE

Waterman S.S. Corp.; 1920; Merchant S.B. Corp.; 5,462 tons; 400'7x54-2x30-4; 635 n.h.p.; turbine engines. The American ship *La Salle*, Capt. W. A. Sillars, left New York on September 10th, 1942, for Table Bay and then Karachi. On September 26th, she was at Balboa and left to sail via Cape Horn but was not seen again. She carried a crew of 40.

LA SEYNE

Messageries Maritimes; 1870; LaSeyne; 2,379 tons; 312-3X 38x29-7; 241 n.h.p.; 10 knots; compound engines. The French mail steamship *La Seyne* was in the Rho Straits on her way to Singapore when she collided with the British India liner *Onda*. The collision took place near Pulo Sauh at 4 o'clock on the morning of Sunday, November 14th, 1909, the French vessel sinking in two minutes. She carried 162 persons, of whom 101 were drowned, including the captain.

The *Onda*, which had her bows smashed and her fore compartment carried away, immediately lowered her boats and picked up 61 survivors, the work of rescue being greatly impeded by sharks which attacked the drowning people.

LA SOMME

Cie. des Chemins de Per du Nord; 1882; R. & J. Evans; 1,477 tons; 256-7x33-3x20-5; 134 n.h.p.; compound engines.

The French steamship *La Somme* struck a mine and sank in the English Channel on April 29th, 1918.

LA TOUR D'AUVERGNE

French Navy, cruiser minelayer; 1929; Lorient Dockyard; 4,773 tons; 500-5x51x20; 57,000 s.h.p.; 30 knots; turbine engines; four 5-5 in. guns, four 3 in.A.A., two 37mm.A.A., twelve 13 mm.A.A., 290 mines.

The French cruiser minelayer *La Tour d'Auvergne*, formerly the *Pluton*, Capt. Peries, was sunk by internal explosion on September 13th, 1939, while lying in Casablanca harbour. The vessel carried a complement of 396, of whom 11 officers and 204 ratings were killed.

LAATEFOS

ThorThoresen, Jr.; 1913; Fredrikstad Mek. Verks.; 1,458 tons; 243 x 39 • 2 x 19 • 2; 150 n.h.p.; triple-expansion engines.

The Norwegian cargo ship *Laatefos* was torpedoed and sunk by a German submarine in the North Sea on June 21st, 1917.

LAB

AJS Lab (H. Tangvald-Pedersori); 1912; Akers Mek. Verksted; 1,118 tons; 226-4x36-5x15-7; 127 n.h.p.; triple-expansion engines.

The Norwegian steamship *Lab* was torpedoed and sunk by a German submarine on November 19th, 1942, five miles off the Eddystone Light.

LABARROUERE

Morel; 1880; Palmers'Co.; 1,173 tons; 241-2x33-2x15-6; 99 r.h.p.; compound engines.

The British cargo ship *Labarrouere* sank after a collision with an unknown sailing ship off Lundy Island on November 25th, 1897, while on a voyage from Cardiff to St. Nazaire carrying a cargo of coal. The captain and four of the crew were drowned. A boat carrying 13 survivors was picked up after 24 hours.

LABRADOR

Mississippi & Dominion S.S. Co.; 1891; Harland & Wolff; 4,737 tons; 401x47-2x28-3; 573 n.h.p.; triple-expansion engines.

The British cargo ship *Labrador* was wrecked on Mackenzie Rock, near the Skerryvore lighthouse on March 2nd, 1899. She was on a voyage from St. John, N.B., to Liverpool carrying a general cargo.

LACKENBY

Ropner Shipping Co.; 1928; W. Gray & Co.; 5,112 tons; 412-1x54-2x27; 515 n.h.p.; 11 knots; triple-expansion engines.

The steamship *Lackenby*, Capt. W. A. Allon, with a cargo of phosphate, was torpedoed and sunk by a German submarine on January 23rd, 1943, in approx. lat. 55° N., long. 47° W. All 45 of her crew were lost.

LACONIA

Cunard S.S. Co.; 1912; Swan, Hunter & Wigham Richardson; 18,099 tons; 600-6x71-3x40-3; 2,170 n.h.p.; 17 knots; quadruple-expansion engines.

The liner *Laconia*, Capt. Irvine, returning from the United States was torpedoed by a German submarine 160 miles N.W. by W. of the Fastnet at just after 9 p.m. on February 25th, 1917. The first torpedo struck the liner on the starboard side just abaft the engine room, but did not sink her. Twenty minutes later a second torpedo exploded in the engine room, again on the starboard side, and the vessel sank at 10.20 p.m.

The *Laconia* had 292 persons on board, of whom 34 were first class and 41 second class passengers. Six passengers and six members of the crew were killed.

LACONIA

Cunard-White Star Line; 1922; Swan, Hunter & Wigham Richardson; 19,695 tons; 601-3x73-7x40-6; 12,500 s.h.p.; 16 • 5 knots; turbine engines.

The liner *Laconia*, Capt. R. Sharpe, was torpedoed and sunk by a German submarine on September 12th, 1942, about 500 miles S. of Cape Palmas, Liberia. She was homeward bound from Suez via the Cape with a crew of 692, 766 passengers and 1,793 Italian prisoners of war.

The submarine surfaced to take prisoners and, hearing of the Italian prisoners, summoned other submarines to help rescue them. This operation was terminated by the arrival of Allied aircraft which attempted to bomb the cluster of submarines and ship's boats. Eventually about 975 survivors were picked up by a French cruiser and taken to Casablanca. Capt. Sharpe, who was lost with the ship, was in command of the *Lancastria* (which see) when she was sunk on June 17th, 1940.

LACONIKOS

M.A.Embricos; 1914; C. Connell & Co.; 3,803 tons; 365-2x 47-1 x 27 • 3; 382 n.h.p.; triple-expansion engines. The Greek steamship *Laconikos* was torpedoed and sunk by a German submarine on May 7th, 1943, about 400 miles W. of Vigo on a voyage from Freetown to Ardrossan. The vessel sank within a minute of being hit and 23 of her crew were lost.

LADOGA

W. Thomson & Co.; 1914; S. P. Austin & Son; 1,917 tons; 275x40x19-2; 194 n.h.p.; 9 knots; triple-expansion engines. The steamship *Ladoga* was torpedoed and sunk by a German submarine 15 miles S.E. of South Arklow lightship on April 16th, 1918. Twenty-nine men, including the captain, were killed.

LADY ANN

Lambton & Hetton Collieries; 1882; Austin & Son; 1,016 tons; 225-3x33x16-3; 99 r.h.p.; 9 knots; compound engines. The collier *Lady Ann* was torpedoed and sunk by a German submarine three miles E. by S. of Scarborough on February 16th, 1917. The captain and ten of the crew were killed.

LADY CAIRNS

L. Tulloch; 1869; Harland & Wolff; 1,287 tons; 216-4x35-4x 22-5.

The sailing ship *Lady Cairns* was sunk in a collision with the German barque *Mona*, 1,096 tons, 25 miles E. of the Kish lightship, Kingstown, on March 20th, 1904. All 22 of her crew were drowned.

LADY CHARLOTTE

Lewis Lougher & Co.; 1905; Tyne Iron S.B. Co.; 3,593 tons; 348-7x50-1 X23-1; 317 n.h.p.; triple-expansion engines. The British steamship *Lady Charlotte* was wrecked on May 11th, 1917, in 49° 55' N., 6° 18' W., while employed as an Admiralty collier. She was on a voyage from Cardiff to Alexandria.

LADY CORY-WRIGHT

Cory Colliers; 1906; S. P. Austin & Son; 2,516 tons; 310x 44-1x20-3; 251 n.h.p.; 9 knots; triple-expansion engines. The collier *Lady Cory-Wright* was torpedoed and sunk by a German submarine 14 miles S.S.W. of the Lizard on March 26th, 1918. The captain and 38 men were killed.

LADY DRAKE

Canadian National Steamships; 1929; Cammell Laird; 7,985 tons; 419-5x59-1x28-2; 14 knots; turbine engines. The liner *Lady Drake*, Capt. Percy Kelly, on a voyage from Demerara to St. John's, N.F.L., with a total of 272 on board, passengers and crew, was torpedoed and sunk by a German submarine some distance N. of Bermuda on May 5th, 1942. Six of the crew and six passengers were killed. Capt. Kelly was among the survivors. The *Lady Drake* was not in convoy.

LADY ELGIN

Hubbard & Co.; 1851; Canada; 1,000 tons; 300x — x—; 11 knots; side lever engines.

The American paddle steamer *Lady Elgin* left Chicago late on the evening of Friday, September 7th, 1860, for an excursion up Lakes Michigan and Superior. The ship had on board 393 persons including the crew and was under command of Capt. John Wilson. There was a stiff breeze, a heavy sea and driving rain, the passengers being below dancing in the saloon, when at 2 o'clock on the morning of the 8th the steamship was run down by the schooner *Augusta*. Capt. Malott. The ships were about 10 miles from land, off Waukegan, and the *Augusta* sailing before the wind at 11 knots crashed into the *Lady Elgin* abaft the paddle box on the port side. The steamer, her engines running at full speed, continued on her course for some distance and in five minutes the two ships had lost sight of each other. There was alarm on both vessels, those on the schooner being under the impression that she was sinking. The *Lady Elgin* was in the worse plight, having only three boats, the first of which was launched with only one oar and proved almost useless, the other two put off with eight and 13 persons respectively. About 30 minutes after the collision the steamer foundered, her engines and boilers falling through the bottom.

The number drowned was 279 including Capt. Wilson.

The schooner *Augusta* reached port in safety with the loss of her jib-boom and damage to her bows.

LADY FRANCES

Jackson Bros. & Cory; 1876; W. Gray & Co.; 1,375 tons; 246-6x32-2x18-2; 120 h.p.; compound inverted engines. The British cargo ship *Lady Frances* was wrecked on Ishailah Rocks, 170 miles W. of Alexandria, on September 11th, 1885, while on a voyage from South Shields to Alexandria carrying a cargo of coal. The crew left the ship in three boats, one of which with nine men reached the shore, although one man was lost when landing. A tug was sent to the scene of the wreck and picked up another boat with two men on the 18th. Six other men in this boat had been drowned trying to swim ashore.

LADY GLANELY

Tatem Steam Nav. Co.; 1938; Wm. Doxford & Sons; 5,497 tons; 430-5x57-7x26-5; 516 n.h.p.; oil engines. The British motorship *Lady Glanely*, on a voyage from Vancouver to London, was torpedoed and sunk by a German submarine on December 2nd, 1940, 400 miles W. of Ireland. There were no survivors.

LADY HAWKINS

Canadian National Steamships; 1928; Cammell Laird & Co.; 7,988 tons; 419-5x59-1x28-2; 14 knots; turbine engines. The liner *Lady Hawkins*, Capt. H. Griffin, was torpedoed and sunk on January 19th, 1942, midway between Cape Hatteras and Bermuda. The *Lady Hawkins*, which was carrying 212 passengers and 109 crew, was hit by two torpedoes, the first of which exploded in No. 2 hold and the second between No. 3 hold and the engine room, also smashing one of the lifeboats. Three lifeboats were launched but only one, containing 71 persons, was picked up. The survivors stated that five of their number had died during the time

they had been adrift. Mr. Percy A. Kelly, the first officer, by great skill kept the boat afloat although she was only intended to carry 63 persons and had 76 on board at the outset. Eventually the steamship *Coamo*, 7,057 tons, of the New York and Puerto Rico Line, sighted the boat and brought the occupants to San Juan, Puerto Rico.

The number of persons drowned, or who had died from exposure, was approximately 250, of whom 88 were crew, including Capt. Griffin.

LADY HELEN

Marquis of Londonderry; 1909; S. P. Austin & Son; 811 tons; 200 x 30 x 12 • 1; 138 n.h.p.; 10 knots; triple-expansion engines. The steamship *Lady Helen* struck a mine and sank ½ mile E. of South Cheek, Robin Hood Bay, on October 27th, 1917. The captain and six men were killed.

LADY ISMAY

P. & A. Campbell; 1911; Ailsa Shipbuilding Co.; 495 tons; 220 x 26 • 1 X 8 • 8; 165 n.h.p.; 17 knots; diagonal compound engines.

The paddle steamer *Lady Ismay* was taken over by the British Admiralty early in the First World War for service as a minesweeper. On December 21st, 1915, she was mined and sunk near the Galloper lightship. She had an official complement of 60.

LADY IVEAGH

John Weather ill & Sons; 1892; Richardson, Duck & Co.; 2,286 tons; 290X38-3x18-5; 218 n.h.p.; triple-expansion engines. The British steamship *Lady Iveagh* was wrecked near St. Quentin Point on December 24th, 1915, while in service as an Admiralty collier. She had sailed from Penarth.

LADY JOICEY

Taylor & Sander son S.S. Co.; 1898; Short Bros.; 3,194 tons; 351 X 45 • 1 X 16 - 2; 308 n.h.p.; triple-expansion engines. The British cargo ship *Lady Joicey* caught fire and sank in 16° N., 69° W., on December 23rd, 1903. She was carrying a cargo of nitrate on a voyage from Taltal to Savannah.

LADY JOSYAN

R. Gordon & Co.; 1872; M. Pearse & Co.; 1,054 tons; 225-2X 30-1x17; 99 h.p.; compound engines.

The British cargo ship *Lady Josyan* sank after a collision off Flamborough Head on October 26th, 1884. She was carrying a cargo of coal on a voyage from the Tyne to London.

LADY LEWIS

W. J. Tatem & Co.; 1897; Richardson, Duck & Co.; 2,950 tons; 330-2x43-1x23-2; 245 n.h.p.; triple-expansion engines. The British cargo ship *Lady Lewis* was wrecked near Mogotes Point, Argentine, on April 3rd, 1906. She was carrying a cargo of wheat on a voyage from Bahia Blanca to Barcelona.

LADY McCALLUM

Ceylon S.S. Co.; 1908; Caledon S.B. & E. Co.; 1 097 tons; 220-5x37-1x12-3; 191 n.h.p.; triple-expansion engines. The British cargo ship *Lady McCallum* struck a reef and sank off Poolavi Point, ten miles north of Kalkudah, Ceylon, on January 1st, 1926. She was on a voyage from Kalkudah to Trincomalee carrying a cargo of copra and rice.

LADY NUGENT

Sir George Hodgkinson; 1840 (circa); Bengal; 642 tons. The wooden ship *Lady Nugent* was chartered by the government of Madras to carry the 25th Regiment of Madras (Native) Light Infantry to Rangoon. She left Madras on May 10th, 1854, with Lt. Col. Johnstone and four other officers, besides 350 rank and file, 20 women and children and 34 crew, making 409 all told. The *Lady Nugent* was commanded by Capt. G. C. Bannerman.

About a fortnight after the vessel left Madras the Bay of Bengal was swept by a typhoon of unusual violence. No news of the *Lady Nugent* ever came to hand and eventually the authorities were compelled to post her as missing.

LADY SOMERS

LADY SOMERS

Canadian National Steamship Co.; 1929; Cammell Laird & Co.; 8,194 tons; 420-3x60-2x30-2; 1,094 n.h.p.; 14 knots; turbine engines.

The steamship *Lady Somers*, serving as an auxiliary cruiser, Cdr. G. L. Dunbar, R.D., R.N.R., with a complement of 175 was torpedoed and sunk by a German submarine in the North Atlantic on July 15th, 1941. Of those on board 138 survivors were picked up by Spanish ships and landed at a neutral port. Later the remainder of the crew were reported safe and there was no loss of life.

LADYBIRD

British Navy, gunboat; 1915; Lobnitz & Co.; 625 tons; 237-5 X 36x4; 2,000 i.h.p.; 14 knots; triple-expansion engines; Yarrow boilers; two 6 in. guns, one 3 in., 10 smaller.

The gunboat *Ladybird*, Cdr. J. F. Blackburn, was bombed and sunk near Tobruk, Libya, on June 11th, 1941. The ship beat off 47 attacks by German dive bombers but was eventually hit and disabled. She managed to make Tobruk harbour where she sank with one gun above water. Four ratings were killed.

During the siege of Tobruk her gunners put off from shore whenever enemy raiders were overhead and opened fire on them from the one serviceable gun.

LADYBURN

Shankland & Co.; 1869; R. Steele; 1,515 tons; 241-9x37-1x 23.

The iron sailing ship *Ladyburn*, Capt. Laing, left the Clyde for Calcutta on her maiden voyage in the second week of December 1869. Crossing the Bay of Biscay she ran into a violent storm and foundered with all hands.

She was among the new type of iron sailing ship of heavy tonnage then coming into use, a type which encountered many mishaps and difficulties before proving serviceable.

LAERTES

Ocean S.S. Co.; 1904; Hawthorn Leslie & Co.; 4,541 tons; 382-7x47-2x28-2; 350 n.h.p.; 12 knots; triple-expansion engines.

The steamship *Laertes* was torpedoed and sunk by a German submarine H miles S.S.W. of Prawle Point on August 1st, 1917. Fourteen men were killed. The captain was among the survivors.

LAERTES

Hung Hing S.S. Co.; 1879; Scott & Co.; 2,183 tons; 320-5X 34-3x26; 188 n.h.p.; compound engines.

The British cargo ship *Laertes* sank after a collision in the Malacca Straits on December 15th, 1917, while on a voyage in ballast from Rangoon to Singapore.

LAERTES

Nederlandsche Stoomv. Maats. Ozean; 1919; Taikoo Dockyard & Eng. Co.; 5,825 tons; 423-9x52-3x29-9; 413 n.h.p.; 13-5 knots; triple-expansion engines.

The Dutch steamship *Laertes* was torpedoed and sunk by the German submarine *U. 564* on May 3rd, 1942, off the east coast of Florida, on a voyage from New York to Bombay via the Cape. Eighteen of her crew were lost.

LAFFEY

United States Navy, destroyer; 1941; Bethlehem Steel Co.; 1,700 tons; 348-5x36—; 50,000 s.h.p.; 36-5 knots; turbine engines; four 5 in. guns, four 40 mm., 5 T.T.

The destroyer *Laffey*, Lt. W. E. Hank, took part in the battle of Guadalcanal on the night of November 12th-13th, 1942. Early in the action the *Laffey* encountered the Japanese battleship *Hiei*, at which she fired all her port torpedoes and then swept the enemy's bridge with her 5 in. guns. As a result of this the *Hiei* was disabled and was sunk by American aircraft on the following day. The *Laffey* was torpedoed and sunk later in the action.

The full story of the battle is told under the U.S. cruiser *Atlanta* and the Japanese battleship *Kirishima*.

LAFONIA

Falkland Islands Co.; 1911; Greenock & Grangemouth Dkyd. Co.; 1,961 tons; 283-3x36-1x19; 249 n.h.p.; triple-expansion engines.

The British cargo ship *Lafonia* sank after a collision in 55° 21' N., 1° 22' W., on March 26th, 1943, while on a voyage in ballast from London to Greenock.

LAFOREY

British Navy, destroyer; 1913; Fairfield Co.; 995 tons; 269 X 27-5x10-5; 24,500 i.h.p.; 29 knots; turbine engines; three 4 in. guns, one 2 pdr., 1 m.g., 4 T.T.

The destroyer *Laforey* was mined and sunk in the English Channel on March 23rd, 1917. The vessel carried a complement of about 100.

LAFOREY

British Navy, destroyer; 1938; Yarrow & Co.; 1935 tons; 354x37x10; 48,000 s.h.p.; 36-5 knots; turbine engines; 3-drum boilers; six 4 7 in. guns, one 4 in.A.A., 4 T.T.

The destroyer *Laforey*, Capt. H. T. Armstrong, D.S.O., p.s.c., took part in the operations leading to the landing on the Italian coast in 1944. On March 30th, 1944, she was torpedoed and sunk by a German submarine off Nettuno with the loss of ten officers, including Capt. Armstrong, and 167 ratings. She had taken part in the bombardment of German positions and had fired more than 2,000 rounds at the enemy. She had also rendered great service with the Malta convoys throughout 1942.

The full story of the Anzio landing is told under the cruiser *Penelope*.

LAFOREY

Derwent Trawlers; 1949; J. Lewis & Sons; 609 tons; 170-4X 29-2x14-3; triple-expansion engines.

The British trawler *Laforey* ran aground and capsized on Sendingane rocks, near Batalden, north-west of Floro, on February 7th, 1954. She had sailed from Grimsby for the Norwegian fishing grounds. Her crew of 20 were lost.

LAGES

Lloyd Brasileiro; 1907; Swan, Hunter & Wigham Richardson; 5,472 tons; 421-9x55-3x20-3; 528 n.h.p.; quadruple-expansion engines.

The Brazilian steamship *Lages* was torpedoed and sunk by a German submarine on September 27th, 1942, outward bound from Para.

LAGOA

Cie. de Nav. Carregadores Acoreanos; 1911; Act. Ges. "Neptun"; 1,992 tons; 285-9x41-2x16-8; 192 n.h.p.; triple-expansion engines.

The Portuguese ship *Lagoa* was wrecked on December 18th, 1928, at Cavallos do Foa, near Oporto.

LAGOS

Elder, Dempster & Co.; 1883; David J. Dunlop & Co.; 1,731 tons; 300-3x36-2x20-2; 214 n.h.p.; compound engines. The British cargo ship *Lagos* was wrecked in dense fog on January 18th, 1902, on the Desertas, near Madeira, while on a voyage from Liverpool to the west coast of Africa carrying a general cargo.

LAGOSIAN

United Africa Co.; 1930; Greenock Dockyard Co.; 5,449 tons; 421-4x59-2x24-7; 604 n.h.p.; 12 knots; quadruple-expansion engines.

The steamship *Lagosian*, Capt. G. W. Irvin, was in convoy off Rio de Oro, West Africa, on March 28th, 1943, when she was torpedoed and sunk by a German submarine. Five men were killed and four wounded. Capt. Irvin, who was among the survivors, was in command of the *Congonian* when that vessel was torpedoed in November 1940.

LAHAINA

Matson Navigation Co.; 1920; Western Pipe & Steel Co.; 5,645 tons; 410-5x54-2x27-2; 359 n.h.p.; triple-expansion engines.

The American steamship *Lahaina* was shelled by a Japanese submarine on December 11th, 1941, E. of Honolulu, and sank on the following day. Five of her crew were killed.

LAHNECK

Deutsche Dampf. Ges. Hansa; 1923; A. G. Weser; 1,663 tons; 241 - 3x36-3x15-2; 168 n.h.p.; triple-expansion engines. The German ships *Lahneck* and *Treuensfels* collided on March 6th, 1942, at Christiansand and the *Lahneck* sank.

LAI YUEN

Imperial Chinese Navy, cruiser; 1887; Stettin; 2,850 tons; 270x40x16-3; 3,600 i.h.p.; 16-5 knots; triple-expansion engines; four 8-25 in. guns, 8 m.g.
The Chinese cruiser *Lai Yuen* took part in the battle of the Yalu against the Japanese on September 17th, 1894. At the conclusion of the battle, which ended disastrously for the Chinese, the fleet retired to the fortified base at Wei-hai-wei, where it was sunk at anchor by torpedo boat attacks and gunfire from cruisers at the end of a long blockade by the Japanese fleet.

On February 5th-6th, 1895, the *Lai Yuen* was torpedoed in one of these attacks and capsized. She lay on her side with a number of her crew imprisoned in her water-tight compartments. These unfortunate men continued knocking on the vessel's side for several days, but when aid reached them they were found to be dead from asphyxiation.

For further details see *Ting Yuen*. For battle of the Yalu, see *Chi Yuen*.

LAIRDSMOOR

*Burns & Laird Lines; 1919; A.&J.Inglis; 1,578 tons; 265 x 36 - 1 x 15 * 9; 414 n.h.p.; triple-expansion engines.* The British steamship *Lairds Moor* sank after a collision with the *Taranaki* off Black Head, Wigtownshire, on April 7th, 1937. She was carrying passengers, cattle and a general cargo on a voyage from Dublin to Glasgow.

LAKE EDON

*United States Shipping Board; 1918; American S.B. Co.; 2,371 tons; 251X 43 - 5 x 24 * 2; 326 n.h.p.; triple-expansion engines.* The American cargo ship *Lake Edon* was torpedoed and sunk by a German submarine in the Bristol Channel on August 21st, 1918.

LAKE LUGANO

C. Strubin & Co.; 1900; Craig, Taylor & Co.; 2,120 tons; 289'2x43-2x20-1; 206 n.h.p.; triple-expansion engines. The British steamship *Lake Lugano*, Capt. Thompson, was bombed and set on fire by insurgent aircraft on August 7th, 1938, at Palamos, during the Spanish Civil War. She was again attacked the next day and sunk.

LAKE OSWEYA

Ford Motor Co.; 1918; Saginaw S.B. Co.; 2,398 tons; 251x 43-6x24-2; 382 n.h.p.; oilengines.
The American motorship *Lake Osweya* left New York on February 17th, 1942, for Halifax, N.S., and Reykjavik and did not arrive at the former port. It is assumed that she was torpedoed.

LAKE OWENS

United States Shipping Board; 1918; Great Lakes Engineering Works; 2,308 tons; 253-5x43-8x20-4; 289 n.h.p.; triple-expansion engines.
The American cargo ship *Lake Owens* was torpedoed and sunk by a German submarine in the Bristol Channel on September 3rd, 1918.

LAKE PORTAGE

United States Shipping Board; 1918; McDougall-Duluth Co.; 1,998 tons; 251x43-6x18-1; 274 n.h.p.; triple-expansion engines.
The American cargo ship *Lake Portage* was torpedoed and sunk by a German submarine off Ushant on August 3rd, 1918.

LAKEMOOR

United States Shipping Board; 1917; McDougall-Duluth Co.; 2,045 tons; 251x43-8x18-2; 274 n.h.p.; triple-expansion engines.
The American cargo ship *Lakemoor* was torpedoed and sunk by a German submarine in the Irish Sea on April 11th, 1918.

LAKME

Cie. des Bateaux a Vap. du Nord; 1896; A. Stephen & Sons; 3,117 tons; 330 X 43 - 2 X14; 272 n.h.p.; triple-expansion engines. The French steamship *Lakme* struck a mine and sank in the Bay of Biscay on February 29th, 1916.

LAKONIA

Shipping Investment Corporation; 1930; Nederlandsche Scheepsbouw Maats.; 20,314 tons; 608-7x74-8x —; 17 knots; oil engines.
The Greek cruise liner *Lakonia*, Capt. M. Zarbis, was formerly the *Johan van Oldenbarnevelt* of the Dutch Nederland Company. On Thursday, December 19th, 1963, she left Southampton with 651 passengers, all of whom were British with the exception of 21, and a crew of 385, chiefly composed of Greek seamen and German stewards. Her first place of call was to be Madeira, and the cruise was to be of 11 days duration. At about midnight on Sunday the 22nd, when 180 miles N. of Madeira, the alarm of fire was given. The larger number of passengers were in bed, but many were dancing, or strolling on the promenade deck.

Despite the efforts of the crew the fire took firm hold upon the liner and in a few hours she was well ablaze. The aircraft carrier *Centaur*, 22,000 tons, and the liners *Stratheden*, 23,732 tons, *Montcalm*, 4,999 tons, and the Argentine liner *Salta*, 12,053 tons, together with the Pakistan steamship *Mehdi*, 5,640 tons, went to the rescue. The United States Air Force base in the Azores also sent aircraft to search the area and to drop life rafts.

Some days later a statement was issued by the Greek company announcing that 95 passengers and 33 crew had been lost in the disaster. Capt. Zarbis was among the survivors.

The burned out hull of the *Lakonia* was taken in tow for Gibraltar by salvage vessels, but sank in a gale on Sunday, 29th December, 1963, when 250 miles from port.

LAKSNES

Norwegian Government; 1927; Flensburger Schiffsbau Ges.; 1,587 tons; 263-4x40-2x15-3; triple-expansion engines. The Norwegian ship *Laksnes* was carrying cement from Brevik to Namsos when she grounded, broke in two and sank on November 27th, 1946, at Ronglevaer near Feje.

LALEN-MENDI

Sola y Aznar; 1896; Richardson, Duck & Co.; 2,183 tons; 290X42x19-5; 219 n.h.p.; triple-expansion engines. The Spanish cargo ship *Lalen-Mendi* was torpedoed and sunk by a German submarine in the English Channel on November 17th, 1917.

LALY

C. T. Gogstad & Co.; 1894; Furness, Withy & Co.; 1,880 tons; 270X 3 6 - 6 X 17; 192 n.h.p.; triple-expansion engines. The Norwegian cargo ship *Laly* was sunk by a German submarine in the North Sea on March 25th, 1917.

LAMMOT DU PONT

International Freighting Corp.; 1914; N. of Ireland S.B. Co.; 5,102 tons; 405x52x28-1; 525 n.h.p.; triple-expansion engines. The American steamship *Lammot du Pont* was torpedoed and sunk by a German submarine on April 23rd, 1942, 500 miles S. of the Bermudas on a voyage from Buenos Aires to New York. Thirteen of her crew were lost.

LAMORICIERE

Compagnie Generale Transatlantique; 1921; Swan, Hunter & Wigham Richardson; 4,713 tons; 370x50x29-8; 17 knots; turbine and triple-expansion engines.
The liner *Lamoricie*, Capt. Miliasseau, left Algiers on January 7th, 1942, for Marseilles with 272 passengers and 100 crew. Soon after leaving port she encountered a violent storm, and on the 8th distress signals were received reporting her disabled with engine room flooded and in need of assistance. The call was answered by the steamships *Gouverneur General de Gueydon*, *Gouverneur General Chanzy* and the destroyer *L'Impetueuse* but the weather precluded any attempt at rescue and the vessel foundered on the 9th, some three miles N. of Minorca.

LAMOTTE-PICQUET

The loss of life was heavy, only 95 persons were picked up; these were landed at Barcelona on the 11th.

LAMOTTE-PICQUET

French Navy, cruiser; 1924; Lorient Dockyard; 7,249 tons; 594-7x57-5x20-7; 102,000 s.h.p.; 33 knots; turbine engines; Guyot boilers; eight 6-1 in. guns, four 3 in., two 3pdr., 4 m.g., 12 T.T.

The cruiser *Lamotte-Picquet* was serving on the Far East station at the outbreak of the Second World War. On the capitulation of France in June, 1940, the ships on the station adhered to the Vichy government and when fighting broke out between France and Siam the *Lamotte-Picquet* with several sloops and gunboats engaged the Siamese coastal defence ships *Ayutia* and *Dhamburi*, both of 2,265 tons, four 8 in. guns. The Siamese vessels were badly damaged in the action and took no further part in hostilities. The *Lamotte-Picquet*, owing to her long commission in Far Eastern waters, became unfit for active service and on January 12th, 1945, when lying partially dismantled off Saigon, she was hit and sunk by U.S. carrier-borne aircraft. There were no casualties among her crew.

LAMPADA

Gas Light & Coke Co.; 1889; Short Bros.; 2,220 tons; 28 1x 40x19-8; 209 n.h.p.; 9 knots; triple-expansion engines. The collier *Lampada* was torpedoed and sunk by a German submarine three miles N. of Whitby on December 8th, 1917. Five men were killed. The captain was among the survivors.

LAMPO

Italian Navy, destroyer; 1931; Officine e Cantieri Partenopei; 1,220 tons; 315-2x30-5x10-2; 44,000 s.h.p.; 38 knots; turbine engines; 3-drum boilers; four 4-7 in. guns, four 37 mm. A.A., four 13 mm. A.A., 6 T.T.

The destroyer *Lampo* was driven ashore on the island of Pantellaria after an action with British destroyers on April 15th, 1941. She was refloated sometime later and recommissioned. On April 30th, 1943, she was bombed and sunk by Allied aircraft off Ras Mustapha. The vessel's official complement was 150.

LAMUT

U.S.S.R.; 1919; Gt. Lakes Eng. Works; 2,694 tons; 253-8X 43-6x25-1; 226 n.h.p.; triple-expansion engines. The Soviet ship *Lamut* was on a voyage from Vladivostock to Seattle when she went ashore on April 1st, 1943, in the vicinity of Cape Flattery.

LANARK

G. M. Steeves & Co.; 1890; Russell & Co.; 3,109 tons; 319-6X 42-6x25-7; 250 h.p.; triple-expansion engines. The British cargo ship *Lanark* was wrecked near Cocanada on June 1st, 1894, while on a voyage from Middlesbrough to Cocanada carrying a cargo of railway materials.

LANARKSHIRE

Burr ell & Son; 1871; Blackwood & Gordon; 929 tons; 210x 28-2x21-5; 85 h.p.; compound inverted engines. The steamship *Lanarkshire* was lost on Codling Bank, off Wicklow, on January 15th, 1882 while on a voyage from the Clyde to Lisbon carrying a cargo of coal.

LANCASTER

American South African, Inc.; 1918; Sun S.B. Co.; 7,516 tons; 434-3x57-7x35-3; 575 n.h.p.; triple-expansion engines. The American ship *Lancaster* went ashore on December 30th, 1942, off Casablanca and broke up.

LANCASTER CASTLE

Lancashire Shipping Co.; 1937; Sir J. Laing & Sons; 5,172 tons; 437-4x51-1x24-3; 466 n.h.p.; 12 knots; triple-expansion engines. The steamship *Lancaster Castle*, Capt. J. Sloan, was a unit of a convoy to North Russia. On March 24th, 1942, while anchored in the river at Murmansk, the ship was attacked by German bombers and set on fire. Although badly damaged the ship remained afloat until April 15th, when she was again attacked and sunk by five bomb hits. Twelve men, including Capt. Sloan, were killed and 17 were wounded in the two attacks.

412

LANCASTRIA

Cunard White Star Line; 1922; W. Beardmore & Co.; 16,243 tons; 552-8x70-4x38-8; 2,527 n.h.p.; 16-5 knots; turbine engines.

On June 17th, 1940, the liner *Lancastria*, Capt. J. Sharp, was lying off St. Nazaire taking on board British troops who were being evacuated from France. The embarkation began at 8 a.m. and continued until 4 p.m., by which time the liner was ready to weigh anchor. In addition to the soldiers there was a small party of about 50 civilians, and their wives and children. As far as can be ascertained there were 5,310 persons on board, of whom 300 were crew.

The first attack by aircraft came about 2 p.m., followed after a short interval by a second raid. In these attacks the Orient liner *Oronsay*, 20,000 tons, also engaged in the embarkation of troops, was hit and damaged, but still remained seaworthy.

At about 4.30 p.m., in a third attack the ship was struck by a salvo of bombs, one of which passed right through the dining saloon and burst in the engine room. The damage to the *Lancastria* was vital and she took a heavy list, and although the boats were got out with all possible speed it was evident from the outset that there was no hope of rescue for thousands of those on board. Only two lifeboats managed to get away, the others capsizing owing to difficulties with the falls or through being overloaded. Tugs and other small craft were quickly on the scene and picked up hundreds of men in the water.

The *Lancastria* remained afloat for barely 30 minutes, turning gradually over to port so that those still on board were able to walk upon her side as she lay. After floating on this position for some time she capsized completely and went down by the head. Meanwhile the German airmen occupied themselves by firing from their machine-guns at the men in the water, and by firing incendiary bullets which set fire to the oil floating on the surface.

Of those on board 2,477 were saved[^], including Capt. Sharp, who was picked up some hours later, and most of the civilian passengers. There was also a small number of people who came ashore singly or in very small parties, some of whom were captured and interned by the Germans.

LANCASTRIAN PRINCE

J. Knott; 1881; Palmers' Co.; 1,746 tons; 262x35-2x22-2; 178 n.h.p.; triple-expansion engines.

The British cargo ship *Lancastrian Prince* was wrecked on Morant Cays on September 22nd, 1895. She was on a voyage from the Clyde to Kingston, Jamaica, carrying a general cargo.

LANCASTRIAN PRINCE

Prince Line; 1940; Smith's Dock Co.; 1,914 tons; 304x44-2x 16-5; 2,270 i.h.p.; 13 knots; triple-expansion engines. The steamship *Lancastrian Prince*, Capt. F. R. Elliott, was in convoy in the North Atlantic, when she was torpedoed and sunk by a German submarine on April 11th, 1943. All her crew of 45 and seven gunners were lost.

LANCIERE

Italian Navy, destroyer; 1938; Tirreno; 1,620 tons; 350 X 38-5x10-7; 48,000 s.h.p.; 39 knots; turbine engines; 3-drum boilers; four 4-7 in. guns, six 37 mm. A.A., four 13 mm. A.A., 6 T.T.

The destroyer *Lanciere* was lost in a gale in the Ionian Sea on March 23rd, 1942. The vessel carried a complement of about 200.

LANDANA

Elder, Dempster & Co.; 1897; Sir Raylton Dixon & Co.; 2,834 tons; 310x44-1x15-8; 244 n.h.p.; triple-expansion engines.

The British cargo ship *Landana* sank after a collision with the s.s. *Knarwater* on September 8th, 1898, in the English Channel. She was on a voyage from the Tyne, via Hamburg, to the west coast of Africa carrying a general cargo.

LANDONIA

Gascony Steamship Co.; 1917; Clyde Shipbuilding & Engineering Co.; 2,504 tons; 300-2x44-7x19-3; 250 n.h.p.; 9-5 knots; triple-expansion engines.

The steamship *Landonia* was torpedoed and sunk by a German submarine 27 miles N. by W. of Strumble Head, Pembrokeshire, on April 21st, 1918. Twenty-one men were killed. It was reported that the captain or the gunner had been taken prisoner.

LANFRANC

Booth S.S. Co.; 1907; Caledon Shipbuilding & Engineering Co.; 6,287 tons; 418-5x52-2x27-3; 850 n.h.p.; 15 knots; triple-expansion engines.

The liner *Lanfranc* was taken over by the Admiralty and converted into a hospital ship. On the evening of April 17th, 1917, when crossing from France to England with wounded she was torpedoed by a German submarine 42 miles N. -J- E. of Havre. She was carrying 234 British and 167 German wounded together with 52 medical staff and a crew of 123.

The *Lanfranc* sank with the loss of 34 lives, of whom two were British officers and 12 other ranks, two German officers and 13 other ranks, and five crew. The remainder of those on board were rescued by naval patrol ships.

LANGANES

Consolidated Fisheries; 1929; Cochrane & Sons; 358 tons; 140-4x25x13-2; 103 n.h.p.; triple-expansion engines. The British trawler *Langanes* was wrecked at Dyraf jord on February 8th, 1935. She had sailed from Grimsby for the Icelandic fishing grounds. Her crew of 14 were lost.

LANGANO

Zenise Schiano di Valentino fu G.; 1894; H. Koch; 1,246 tons; 234-1x32-2x18-3; triple-expansion engines. Carrying cement from Marseilles to Duala, the Italian ship *Langano* went ashore at 10.30 p.m. on September 17th, 1950, at Bajos de Mahon, near Cabo Barba. Fifteen members of the crew were rescued.

LANGELI

Ellingsen & Johannesen; 1896; Short Bros.; 1,565 tons; 259-2X 36-8x18-1; 156 n.h.p.; triple-expansion engines. The Norwegian cargo ship *Langeli* was torpedoed and sunk by a German submarine in the North Sea on March 20th, 1916.

LANGFOND

S. Bergesen; 1914; Trondhjems Mek. V&rks.; 1,097 tons; 226-3x36-5x15-6; 116 n.h.p.; triple-expansion engines. The Norwegian cargo ship *Langfond* was sunk by a German submarine off the north-west coast of Ireland on April 28th, 1917.

LANGHAM

W. Coupland & Co.; 1892; R. Thompson & Sons; 2,748 tons; 305 x 40 X 20 - 5; 254 n.h.p.; triple-expansion engines. The British cargo ship *Langham* foundered on November 18th, 1911, in 46° N., 7° W., while on a voyage from Newport to Naples carrying a cargo of coal.

LANGKOEAS

N.V. Nederlandsch-Indische Maats. voor Zeevaart.; 1930; Brenter Vulkan; 7,395 tons; 476-6x63-1x28-4; turbine engines.

The Dutch steamship *Langkoeas* was formerly the German *Stassfurt*, seized by the Dutch at Tjilatjap in April, 1941. On January 2nd, 1942, she was torpedoed and sunk by a Japanese submarine N. of Bawean on a voyage from Java to Egypt. All the crew got away in the boats but the submarine rammed one of these and machine-gunned the others. Only three of the ship's company of 94 survived.

LANGLEEGORSE

Medomsley S.S. Co.; 1927; Palmers'Co.; 4,524 tons; 386-3X 52-7X26; 451 n.h.p.; triple-expansion engines. The British steamship *Langleegorse* on a voyage from Durban to London, was bombed and sunk by German aircraft on January 23rd, 1941, 200 miles W. of Ireland. All 36 of her crew and a gunner were lost.

LANGLEY

United States Navy, seaplane tender; 1912; Mare Island Navy Yard; 11,050 tons; 542x65-5x24; 7,152 s.h.p.; 14-9 knots; turbine engines; four 5 in. guns, 2 air craft.

The seaplane tender *Langley* was part of the small force comprising the Asiatic Fleet at the outbreak of war between America and Japan in December, 1941. On February 27th, 1942, she was the target for an intensive and prolonged attack by Japanese dive-bombers south

of the island of Java. She was so badly damaged that she had to be abandoned. Of her complement of 341 and her flying personnel about 12 were killed. Many of the survivors, picked up by the naval tanker *Pecos*, were lost when that ship was sunk two days later.

LANGRIGG HALL

Herron, Dunn & Co.; 1880; W. Doxford & Sons; 1,394 tons; 239-4x35-9x21-8.

The iron barque *Langrigg Hall* left Liverpool on December 14th, 1882, for Calcutta. In the absence of a favourable wind she was being towed down the St. George's Channel when, at 9.30 p.m. on the 15th, eight miles off Tuskar, the tow rope parted. The barque then made sail but when wearing off struck on South Rock and broke in two. The captain and 23 of the crew were lost. Two men in a small boat landed near Wexford.

LANGSHAW

McIntyre Bros. & Co.; 1875; J. McIntyre; 1,840 tons; 281-3X 33-4x25-3; 140 h.p.; compound inverted engines. The British cargo ship *Langshaw* was wrecked near Trepassey, N.F.L., on June 4th, 1883, while on a voyage from Montreal to London carrying a cargo of grain and cattle.

LANGTON GRANGE

Houlder Bros. & Co.; 1896; Workman, Clark & Co.; 5,852 tons; 420x54-2x29-5; 568 n.h.p.; triple-expansion engines. The British cargo ship *Langton Grange* was wrecked on August 5th, 1909, on the North Bishops, Pembrokeshire, while on a voyage in ballast from the Clyde to Newport, Mon.

LANGUEDOC

Soc. Gen. de Transports Maritimes a Vapeur; 1884; W. B. Thompson; 1,612 tons; 255-2x34x16-8; 262 n.h.p.; compound engines.

The French steamship *Languedoc* was sunk by a submarine in the Mediterranean on May 20th, 1916.

LANOMA

T.B. Walker; 1876; S.P. Austin & Hunter; 665 tons; 184-6X 31-1x17-9.

The Australian barque *Lanoma* was bound from Australia to London. At 11.45 p.m. on March 8th, 1888, when nearly at the end of her voyage, she was wrecked in thick weather on Chesil Beach, Portland Bill. The captain and 11 of the crew were drowned. Six men were saved.

LANSDALE

United States Navy, destroyer; 1939; Boston Navy Yard; 1,630 tons; turbine engines; Express boilers; four 5 in. guns, 10 smaller, 5 T.T.

The destroyer *Lansdale* was attacked by two German torpedo bombers at dusk on April 20th, 1944, off the coast of Algeria. The destroyer, which carried a complement of 210, was hit by an aerial torpedo and sunk. Both the German planes were shot down.

LANZEROTTO MALOCELLO

Italian Navy, destroyer; 1929; Ansaldo; 1,628 tons; 352 X 33-5x16-7; 50,000 s.h.p.; 38 knots; turbine engines; Odero boilers; six 4-7 in. guns, four 37 mm.A.A., eight 13 mm.A.A. & 4 T.T.

The destroyer *Lanzerotto Malocello* was mined and sunk 25 miles N. of Cap Bon on March 24th, 1943. The vessel carried a complement of about 200.

LAOS

Cie. Asiatique de Navigation; 1918; Nuscke & Co. A.G.; 1,467 tons; 265x40x14-6; 163 n.h.p.; triple-expansion engines. During a typhoon on October 11th, 1942, off the coast of Indo-China, the French ship *Laos* sank with a cargo of coal while on her way to Saigon. Two of the crew were picked up later on a raft.

LAPPLAND

P. A. Welin; 1906; Lindholmens Verkstads Akt.; 2,238 tons; 288-4x40x20-7; 205 n.h.p.; triple-expansion engines. The Swedish cargo ship *Lappland* was sunk by a German submarine in the North Sea on June 3rd, 1915.

LAPWING

LAPWING

General Steam Navigation Co.; 1920; Bow, McLachlan & Co.; 1,348 tons; 250-6x37-1x14; 273 n.h.p.; 12 knots; triple-expansion engines.

The steamship *Lapwing*, Capt. Hyam, was in convoy in the North Atlantic when she was torpedoed and sunk by a German submarine on September 26th, 1941. Capt. Hyam, 20 crew and three gunners were killed. The *Petrel* of the G.S.N. Co. was also lost on the same occasion by submarine attack.

LAPWING

British Navy; sloop; 1943; Scotts Shipbuilding & Engineering Co.; 1,250 tons; 229-5x38x8-8; 4,300 s.h.p.; 20 knots; turbine engines; 3-drum boilers; six 4 in. A.A. guns, eight 2 pdr. pom-poms.
The sloop *Lapwing* was torpedoed and sunk by a German submarine in the Kola Inlet, North Russia, on March 20th, 1945. Nine officers and 149 ratings were killed and one officer wounded.

LARCHBANK

BankLine; 1925; Harland & Wolff; 5,151 tons; 420-2x53-9x26-5; 717 n.h.p.; 11 knots; oil engines.

The motor vessel *Larchbank* was torpedoed and sunk by a German submarine about 250 miles W. of Cape Comorin on the afternoon of September 9th, 1943. The ship carried a crew of 58, 12 gunners and five passengers. Thirty-three of the crew, seven gunners and two passengers were lost.

LARCHGROVE

Alexander & Mair; 1894; Sir Raylton Dixon & Co.; 2,430 tons; 294-9x41-3x17-9; 246 n.h.p.; triple-expansion engines. The British steamship *Larchgrove* was sunk in a collision on October 27th, 1918, off Tangier. She was carrying a cargo of iron ore from Seville to Ardrossan.

LARCHMONT

Joy S.S. Co.; 1885; New England S.B. Co.; 1,606 tons; 252-2X37x14-8; 332 n.h.p.; 12 knots; beam engines. The wooden paddle steamer *Larchmont*, Capt. G. W. McVey, was engaged in passenger-cargo service along the eastern coast of the United States. At 7 p.m. on February 11th, 1907, the vessel left Providence, Rhode Island, for New York. She carried her passenger list with her, but no duplicate had been deposited with the marine authorities ashore. As a consequence it was not possible to give the exact number on board when she sailed. This was an unfortunate lapse; for public opinion in America had been much perturbed over the loss of the *Portland* (which see) which had foundered in 1898 taking with her the only passenger list available. In the intervening nine years, however, nothing seems to have been done to remedy this careless method. It was assumed that there were just over 200 persons—passengers and crew—on board and about half lost their lives in the subsequent disaster.

There was a strong N.W. wind when the steamer sailed, but the sea was not unduly rough. Just before midnight the helmsman, who appears to have acted as his own lookout, sighted a schooner pursuing a somewhat erratic course, and coming dangerously near the *Larchmont*. The helmsman took avoiding action but the schooner altered course at the same time, and within seconds had struck the steamer on the port side just forward of midships.

Capt. McVey came on to the bridge to find the engines stopped by the inrush of water and the vessel listing badly. Five lifeboats and two rafts were got away, and finally the captain left in the sixth lifeboat. It was pitch dark; the wind was rising and the sea was icy. The Sandy Point Light, near which the vessel had foundered, was visible to those in the boats and they immediately rowed toward it. So bitter was the cold that many of the occupants froze to death before reaching land.

Meanwhile the schooner *Harry Knowlton*, Capt. F. T. Haley, was in a bad way and had to be abandoned some hours after the collision. There was no loss of life and the crew landed safely.

Capt. McVey was among the survivors.

LARISSA

Atlas Levante-Linie A.G.; 1922; Norddeutsche Unionwerke A.G.; 1,819 tons; 283-1x39-8x17-8; 136 n.h.p.; triple-expansion engines.

The German steamship *Larissa* struck a mine and sank on May 1st, 1941, in the Gulf of Velos, during the invasion of Greece,

LARISTAN

F. C. Strick & Co.; 1896; W. Gray & Co.; 2,134 tons; 290X 42-2x19-2; 218 n.h.p.; triple-expansion engines. The British cargo ship *Laristan* sank after a collision with the s.s. *Crimea* off the Goodwin Sands on October 22nd, 1899, while on a voyage from Bona to Rotterdam carrying a cargo of iron ore.

LARISTAN

Hindustan Steam Shipping Co.; 1916; W. Gray & Co.; 4,293 tons; 385-1x53-5x24-1; 421 n.h.p.; 10 knots; triple-expansion engines.

The steamship *Laristan* left Swansea on January 9th, 1926, for New York with a cargo of coal. On Monday 25th the Norddeutscher Lloyd liner *Bremen*, Cdr. Wurpts, picked up a wireless message from the *Laristan* saying that the aft bulkhead of the bridge deck bulkhead was stove-in and that she was in a sinking condition. The *Bremen* proceeded to the spot and stood by for 36 hours. The state of the sea would not permit of boats being launched but lines were fired to the disabled steamship and a connection was made on four separate occasions, but the crew of the *Laristan* would not accept so perilous a transit. Lines attached to lifebuoys were then drifted down but were not effectual. At last one boat on board the *Laristan* was made fast to one of the *Bremen's* lines and launched with seven men, one of whom was drowned in the crossing. These six survivors were all that could be rescued of her crew 31 and at about midnight on the 26th the *Bremen* glimpsed the *Laristan* for the last time. Next morning the liner sighted a quantity of floating wreckage but no survivors.

The spot at which the *Laristan* foundered was lat. 45° 12' N., long. 43° 12' W.

LARIUS

Piceni, Gessaga & Co.; 1920; M. Trappani; 1,134 tons; 212 X 33-1x18-9; 61 n.h.p.; triple-expansion engines. The wooden Italian steamship *Larius* left Barletta on December 2nd, 1925, for Castellamare Stabia but disappeared.

LARPOOL

Rowland & Marwood's S.S. Co.; 1924; W. Pickersgill & Sons; 3,872 tons; 363-5x51-4x22-8; 345 n.h.p.; 10 knots; triple-expansion engines.

The steamship *Larpool*, Capt. C. Patton, O.B.E., was torpedoed and sunk by a German submarine 250 miles E.S.E. of Cape Race on November 2nd, 1941. Twenty-six men were killed. Capt. Patton was among the survivors.

LARRISTON

Jardine, Matheson & Co.; 1852; Greenock; 474 tons; 180 h.p.; 11 knots; compound engines.

The wooden steamship *Larriston* left Shanghai for Hong Kong at about 6 o'clock on the morning of April 30th, 1853. She had on board 101 persons of whom 16 were Europeans and the rest Lascars and Chinese. The weather was bad and on leaving Woosung, where she had called to load cargo, the *Larriston* came into collision with the U.S. frigate *Plymouth*. The damage was chiefly to spars and of a superficial character and the ship shortly proceeded on her voyage to Hong Kong. The weather still continued thick and just before 11 p.m. she struck on the rocks of Turnabout Island, some 80 miles from Poochow, when steaming at 11 knots. The captain reversed his engines but the ship was firmly fixed on the rocks and did not back into deep water. The native crew attempted to rush the boats but were beaten off by the officers and passengers armed with cutlasses.

The weather grew steadily worse and by morning the ship was rapidly breaking up. At about 11 a.m. she slipped off the rocks and sank in deep water. All the Europeans were saved, but 28 Lascars and three Chinese were drowned. The survivors found some native fishermen on the island and after four days were taken off by a Chinese junk and taken to Haitan.

LARRY DOHENY

Richfield Oil Corp.; 1921; Sun Shipbuilding Co.; 7,038 tons; 430-4x59-5x33-3; 3,000 i.h.p.; 10-5 knots; triple-expansion engines.

The American tanker *Larry Doheny*, Capt. Olaf Brieland, was torpedoed and sunk by a Japanese submarine off the coast of

Oregon on October 5th, 1942. Six men were killed. Capt. Brieland was among the survivors. The vessel was not in convoy.

LARS KRUSE

Svendsen & Christensen; 1898; Carmichael, Maclean & Co.; 1,460 tons; 254x36-5x18; 160n.h.p.; triple-expansion engines. The Danish steamship *Lars Kruse* was torpedoed and sunk by a German submarine off Ushant on February 3rd, 1917.

LARS KRUSE

Ministry of War Transport (Lambert Bros.); 1923; Aalborg Skibsv&rtf; 1,807 tons; 276-8x42-1 X17-8; 169 n.h.p.; triple-expansion engines. The steamship *Lars Kruse*, on a voyage from Barletta to Bari with aviation spirit in drums, was bombed and sunk by German aircraft on December 2nd, 1943, at Bari. Seventeen of her crew and two gunners were lost.

LARS MAGNUS TROZELLI

HolmensBruks & Fabriks A/B; 1920; J. & A. v.d. Schuyt; 1,951 tons; 265-4x42-1 x 17-9; 190 n.h.p.; triple-expansion engines. The Swedish steamship *Lars Magnus Trozelli* struck a mine and sank on January 1st, 1940, about 50 miles N.E. of Frazerburgh, on a voyage from Norrköping to Blyth. Seven of her crew were lost.

LAS CHOAPAS

Petroleos Mexicanos S.A.; 1898; Delaware River Co.; 2,005 tons; 263-4x40-3x20; 203 n.h.p.; triple-expansion engines. The Mexican tanker *Las Choapas* was torpedoed, set on fire and sunk by a German submarine on June 27th, 1942, on a voyage from Minatitlan to Tampico.

LASBEK

Knohr & Bur chard Nfl.; 1930; Lubecker Maschinenbau Ges.; 2,159 tons; 281-8x44-2x16-9; 216 n.h.p.; compound engines. The German steamship *Lasbek* was bombed and sunk by British aircraft on April 26th, 1944, off Ameland.

LASSELL

Lamport & Holt Line; 1922; A. Macmillan & Son; 7,417 tons; 430-2x56-2x34-9; 832 n.h.p.; 11 knots; oilengines. The liner *Lassell*, Capt. A. R. Bibby, O.B.E., left Liverpool for South America early in April 1941. On the night of the 30th, about 300 miles S.W. of the Cape Verde Islands, she was torpedoed and sunk by a German submarine, going down by the stern within ten minutes.

Two men were killed by the explosion. Capt. Bibby was in the sea for five hours until found by one of the boats. This boat, with 25 men, was picked up by the steamship *Benrackle* on May 9th, but 15 of these men were lost when the *Benrackle* was torpedoed on the 13th. The chief officer's boat with the rest of the crew was picked up by the steamship *Egba*.

LASSOO

British Navy, destroyer; 1915; W. Beardmore & Co.; 1,010 tons; 269x27-5x10-5; 24,500 i.h.p.; 29knots; turbine engines; two 4 in. guns, one 2pdr., 1 m.g., 4 T.T. The destroyer *Lassoo* was torpedoed and sunk by a German submarine off the Maasightship on August 13th, 1916. She carried a complement of about 100.

LASTINGHAM

Lidgett & Sons; 1876; W. Gray & Co.; 1,217 tons; 221-6X 35-3x20-8.

The iron sailing ship *Lastingham*, Capt. A. Morrison, was bound from London to Wellington, and was within 24 hours run of her destination when she encountered a violent N.W. gale. On the night of September 1st, 1884, when passing through Cook Strait, she was driven onto the rocks off Cape Jackson, near to the entrance to Queen Charlotte Sound.

The vessel struck bow-on and was swept by a succession of heavy seas which carried away all standing gear, boats and deck-houses. After about an hour of this the ship slipped from the rocks into deep water and sank, taking with her the captain, his wife, five passengers and ten crew.

^Fifteen of the crew managed to reach shore in safety. After 40 hours without food or shelter, they were taken off by the ketch *Agnes* and brought to Wellington.

LATONA

Cairns, Noble & Co.; 1893; Sunderland S.B. Co.; 4,338 tons; 400X47-6x26-6; 552 n.h.p.; quadruple-expansion engines. The British cargo ship *Latona* sank after a collision with the s.s. *Japanic* off the Wolf Light on May 20th, 1908. She was on a voyage from Montreal to London carrying a general cargo.

LATONA

British Navy, minelayer; 1940; British Isles; 2,650 tons; 410 x 39x11; 72,000 s.h.p.; 40 knots; turbine engines; 3-drum boilers; six 4-7 in. guns, several smaller, 100 mines. The minelayer *Latona*, Capt. S. L. Bateson, was bombed and sunk off the coast of Libya on October 25th, 1941. Four officers and 16 ratings were killed.

LATYMER

Finchley S.S. Co.; 1919; Poison Iron Works Co.; 2,218 tons; 251 x 43 • 6 x 20 • 7; 276 n.h.p.; triple-expansion engines. The steamship *Latymer*, Capt. J. R. Nisbet, was bombed and sunk by German aircraft on October 2nd, 1940, four miles W. of the Skelligs on a voyage from Lisbon to London. Six of her crew were killed.

LAURA

George Pyman & Co.; 1881; Irvine & Co.; 1,090 tons; 230-6X 32-4x13-9; 99 h.p.; compound engines. The British cargo ship *Laura* sank after a collision off Bromo Island on August 26th, 1892. She was carrying a cargo of timber on a voyage from Sundsvall to Westzaan.

LAURA

DeLuca; 1918; Wallace Shipyard; 3,202 tons; 300x45x24-9; 303 n.h.p.; triple-expansion engines. The Italian ship *Laura* was in collision with the British steamship *Lorenzo* on December 13th, 1924 and sank one mile S.E. by E. off West Hinder lightship.

LAURA C.

Italia Soc. Anon, di Nav.; 1923; Cantiere Navale Triestino; 6,181 tons; 417-7x54-2x30-2; 512 n.h.p.; triple-expansion engines. The Italian steamship *Laura C.* was torpedoed and sunk by a British submarine on July 3rd, 1941, near Capo delPAmi.

LAURA CORRADO

Soc. Anon, di Nav. Corrado; 1899; Sir J. Laing & Sons; 3,645 tons; 349-6x45x28-1; 326 n.h.p.; triple-expansion engines. The Italian tanker *Laura Corrado* was torpedoed and sunk by a British submarine on March 31st, 1941, about 45 miles N. of Trapani.

LAURA GABRIELLA T.

Navimar, Navigazione Marittima Fluviale; 1957; Offic. Mecc. Nav. G. Soffolo-Venice; 616 tons; 207-8x32-9x—; oilengines. The Italian motorship *Laura Gabriella T.* sank during a storm on January 26th, 1959, off Antipaxos Island. There were eight survivors and eight were drowned.

LAUREL

Pacific Atlantic S.S. Co.; 1920; Ames S.B. & D.D. Co.; 5,759 tons; 410-5x54-2x29-2; 369 n.h.p.; triple-expansion engines. The American ship *Laurel*, carrying lumber from Seattle and Astoria to Philadelphia, was wrecked on June 16th, 1929, on Peacock Spit, Columbia River.

LAUREL BRANCH

F. & W. Kit son; 1893; Bar tram, Haswell & Co.; 3,308 tons; 328x42-8x19-5; 287 n.h.p.; triple-expansion engines. The British cargo ship *Laurel Branch* was wrecked at Stewart Bay, Chile, on September 10th, 1903, while on a voyage from Guayaquil to Liverpool carrying a general cargo. There were 28 survivors, passengers and crew.

LAURELWOOD

LAURELWOOD

Constantine & Pickering S.S. Co.; 1896; Ropner & Son; 2,485 tons; 290x43x16-5; 211 n.h.p.; triple-expansion engines. The British cargo ship *Laurelwood* was wrecked on Sein Bank, near Brest, on January 11th, 1904, while on a voyage from Rio de Janeiro to Middlesbrough carrying an ore cargo. The crew of 23 put off in two boats, one of which capsized almost immediately. One man was saved by the other boat which was later picked up with 13 on board.

LAURENTIAN

Allan Line S.S. Co.; 1872; R. Steele & Co.; 4,522 tons; 400 X 42-2x35-5; 424 n.h.p.; 11 knots; triple-expansion engines. The old Allan liner *Laurentian* was bound from Boston to Glasgow with 40 passengers, besides crew, under Capt. Henry Imrie. On September 7th, 1909, the ship ran ashore in a dense fog at Mistaken Point, Tripassey Bay, some few miles from Cape Race lighthouse. The stranding occurred about six in the morning and the boats were lowered and all on board taken off.

LAURENTIC

White Star Line; 1908; Harland & Wolff; 14,892 tons; 550-4x 67-3x41-2; 11,000 i.h.p.; 18 knots; triple-expansion and turbine engines.

The liner *Laurentic*, commanded by Capt. R. A. Norton, and serving as an auxiliary cruiser, left port in fine but bitterly cold weather on January 23rd, 1917. About an hour later she struck a mine in Lough Swilly and sank in 45 minutes. Fifty-two officers and 316 ratings were saved.

In his evidence at an inquest on some of the drowned Capt. Norton stated that his ship left port at 5 p.m. At 5.55 p.m. when he was on the bridge there was a loud explosion on the port side abreast the foremast. A second explosion, again on the port side, came 20 seconds later abreast the engine room. The dynamo stopped running and the ship was in darkness with no power for her wireless. The captain expressed the opinion that most of those lost died from exposure owing to the bitter weather. The ship sank in approximately 23 fathoms.

LAURENTIC

Cunard-White Star Line; 1927; Harland & Wolff; 18,724 tons; 578-2x75-4x40-6; 17 knots; triple-expansion engines & L.P. turbine.

The liner *Laurentic*, Capt. E. P. Vivian, was taken over by the Admiralty early in the Second World War for service as an auxiliary cruiser. On November 3rd, 1940, when in the North Western Approaches the *Laurentic* was torpedoed and sunk by a German submarine. Fifty-two officers, including Capt. Vivian, and 315 ratings were saved, nine of the latter being wounded. Three officers and 46 ratings were killed.

The auxiliary cruiser *Patroclus*, which stood by to pick up boats and rafts, became a target for the submarine which sank her shortly afterwards.

LAUST MAERSK

A. P. Moller; 1957; Odense Staalskibsverft A/S; 9,106 tons; 497-2x63-9x27-5; oil engines.

The Danish motorship *Laust Mcersk* was involved in a collision with the *Alcoa Pioneer* on February 5th, 1961, off Kannon Saki, Tokyo Bay, and sank about 2,140 metres from the Kannon Saki light.

LAUTARO

Houlden, Middleton & Co.; 1897; A. Rodgers & Co.; 3,476 tons; 344-9x44'6x26; 292 n.h.p.; triple-expansion engines. The British cargo ship *Lautaro* sank after an internal explosion in 66° 56' N., 41° 20' E., on December 3rd, 1917. She was carrying a cargo of munitions on a voyage from St. Nazaire to Murmansk.

LAUTERFELS

Deutsche Dampfs. Ges. Hansa; 1921; Akt. Ges. Weser; 6,310 tons; 431-6x56-3x30-4; 608 n.h.p.; triple-expansion engines & L.P. turbine.

The German steamship *Lauterfels* struck a mine and sank on October 7th, 1942, off Terschelling.

LAVENDER

British Navy, sloop; 1915; A. Macmillan & Sons; 1,250 tons; 267-7x33-5x11-7; 2,400 i.h.p.; 17 knots; triple-expansion engines; two 4 • 7 in. guns, two 3pdr.

The sloop *Lavender* was torpedoed and sunk by a German submarine in the English Channel on May 5th, 1917. Her official complement was 93.

LAVERNOCK

Alien Adams & Co.; 1888; Palmers' Co.; 2,406 tons; 275X 40-3x20-9; 226 n.h.p.; 9 knots; triple-expansion engines. The steamship *Lavernock* was torpedoed and sunk by a German submarine five miles S.W. of Trevoise Head on September 17th, 1918. The captain and 24 men were killed.

LAVINGTON COURT

Court Line; 1940; Harland & Wolff; 5,372 tons; 433x57-9 X 25-7; 378 n.h.p.; 12 knots; oil engines.

The motor vessel *Lavington Court*, Capt. Sutherland, was torpedoed by a German submarine while in convoy about 200 miles N. of the Azores, on July 19th, 1942. She was taken in tow by two tugs but sank before she could reach port. Six men were killed.

LAWFORD

British Navy, frigate; 1943; U.S.A.; 1,300 tons; 300X35X —; 5,500 h.p.; 20 knots; turbine engines; three 3 in. guns, two 40 mm.

The frigate *Lawford*, Lt. Cdr. M. C. Morris, took part in the landing of the British and American armies in France on "D" Day, June 6th, 1944. She was attacked by German aircraft off the Normandy coast on the 8th and sank with the loss of 24 ratings. Six officers were wounded.

LAXHAM

R. Harrowing & Co.; 1879; J. Readhead & Co.; 1,295 tons; 243 x 32 • 7 x 17 • 4; 110 h.p.; compound-inverted engines.

The steamship *Laxham*, Capt. Lothian, collided with the Spanish steamship *Gijon*, 1,843 tons, in fog off Cape Finisterre on the night of July 21st, 1884. Both vessels sank. The Spanish steamship *Santo Domingo* picked up 45 passengers from the *Gijon* and 11 crew from the *Laxham*. The schooner *Nelson Hervertson* picked up 15 crew and passengers of the *Gijon* and one passenger of the *Laxham*. Another 15 crew and passengers from both ships landed at Muros in boats.

LAYETANO

Naviera Layetana; 1892; Ramage & Ferguson; 2,401 tons; 283-6x40-2x17-2; 326 n.h.p.; triple-expansion engines.

Carrying ore from Huelva to Bordeaux, the Spanish ship *Layetano* sprang a leak and sank on June 9th, 1921, off Faro.

LE CALVADOS

Cie. Generale Transatlantique; 1890; Soc. Anon. John Cockerill; 1,658 tons; 286-9x35-6x23-2; 217 n.h.p.; triple-expansion engines.

The French steamship *Le Calvados*, serving as a transport, was torpedoed and sunk by the German submarine *U-38*, Lt. Cdr. Max Valentiner, on November 4th, 1915, off Oran. Fifty-five survivors, all crew, were picked up the next day by the steamship *Lady Plymouth*, but 740 troops and crew were lost.

LE CHEVALIER PAUL

French Navy, destroyer; 1932; LaSeyne; 2,441 tons; 424-2x 39x15-7; 64,000 s.h.p.; 36 knots; turbine engines; five 5 • 5 in. guns, four 37 mm., 6 T.T.

The destroyer *Le Chevalier Paul*, Capt. Sala, was operating in conjunction with the French forces defending Syria during the British advance into that country in June, 1941. On the 16th, when off Cyprus, the destroyer was sunk by a Swordfish aircraft which scored a hit with an aerial torpedo. *Le Chevalier Paul*, which carried a complement of 240, sank with the loss of one officer and eight ratings.

LE CARD

Cie. Generate Transatlantique; 1890; Soc. Anon. John Cockerill; 1,658 tons; 286-9x35-6x24-4; 217 n.h.p.; triple-expansion engines.

The French steamship *Le Card* was torpedoed and sunk by a submarine in the Mediterranean on May 26th, 1918.

LE MAIRE

Koninklijke Paketv. Maats.; 1908; Maats. Fyenoord; 3,271 tons; 325-5x44x22-3; 233 n.h.p.; triple-expansion engines. The Dutch ship *Le Maire* was reported to have left Tjilatjap on February 27th, 1942, for Bunbury during the Japanese invasion, but was not seen again.

LE TARN

Cie. Generale Transatlantique; 1889; Soc. John Cockerill; 1,658 tons; 275-6x35-4x23-1; 217 n.h.p.; triple-expansion engines.

The French steamship *Le Tarn* was torpedoed and sunk by a submarine in the Mediterranean on October 26th, 1917.

LE TRE MARIE

D. Tripovich & Ci.; 1925; Cantiere Navale Triestino; 1,086 tons; 222-2x35x13; 194 n.h.p.; triple-expansion engines. The Italian steamship *Le Tre Marie* was torpedoed and sunk by a British submarine on February 4th, 1943, six miles S. of Punta Alice.

LEADGATE

Conssett Iron Co.; 1925; Smith's Dock Co.; 2,125 tons; 280x 41 - 6x20-1; 228 n.h.p.; triple-expansion engines. The British cargo ship *Leadgate* was lost without trace after sailing from Halifax, N.S. on February 25th, 1943, on a voyage to Liverpool, carrying a cargo of flour. She had a crew of 26 and four gunners.

LEALTA

Soc. Anon. Lloyd del Pacifico; 1888; Palmers'Co.; 4,021 tons; 400 x 45 • 3 X 27 - 7; 424 n.h.p.; triple-expansion engines. The Italian cargo ship *Lealta* was torpedoed and sunk by a submarine in the Mediterranean on August 10th, 1917.

LEANDER

L. Wetlesen; 1892; Tyne Iron S.B. Co.; 2,968 tons; 315x 40-5x21-1; 267 n.h.p.; triple-expansion engines. The Norwegian cargo ship *Leander* was torpedoed and sunk by a German submarine in the North Sea on October 20th, 1917.

LEANDROS

C. Hadjipateras & N. & D. Pateras; 1888; J. Readhead & Co.; 1,658 tons; 259 X36x17 -9; 181 n.h.p.; triple-expansion engines. The Greek steamship *Leandros* was torpedoed and sunk by a submarine in the Mediterranean on August 25th, 1916.

LEARY

United States Navy, destroyer; 1919; New York S.B. Corp.; 1,090 tons; 314-5x30-5x8-5; 26,000 h.p.; 35 knots; turbine engines; four 4 in. guns, one 3 in.A.A., 12 T.T. The United States destroyer *Leary*, Cdr. J. E. Kyes, was one of three destroyers escorting the U.S. aircraft carrier *Card* on her way to Bermuda on December 23rd, 1943. The force was attacked by a pack of German submarines which continued to harry it for several hours. The destroyer *Schenck*, one of the escort, sank the *U-645*. Early on the morning of the 24th the submarine *U-245* hit the *Leary* with two torpedoes.

The destroyer, which carried a crew of 142 officers and men, sank very quickly. Cdr. Kyes gave his life jacket to one of the crew and was afterwards drowned. In all 42 officers and men were lost when the *Leary* sank.

LEASOWE CASTLE

Shipping Controller(Union-Castle Mail S.S. Co.); 1915; Cam-mell Laird; 9,737 tons; 488-5x58-2x32-9'; 1,759 n.h.p.; 14 knots; quadruple-expansion engines. The Union-Castle liner *Leasowe Castle* was built to the order of

Greek owners as the *Vasilissa Sophia*, but never delivered to them. She was taken over by the British government in 1917. Soon after going into service she was torpedoed off Gibraltar on April 20th, 1917, but managed to reach port and effect repairs. On May 27th, 1918, she was in convoy from Egypt to Marseilles when she was torpedoed and sunk 104 miles W. by N. % N. of Alexandria. On this occasion she was carrying some 3,000 troops, and was under command of Capt. E. J. Holl. Ninety-two persons, including the captain, were killed.

LEBERECHT MAASS

German Navy, destroyer; 1936; Deutsche Werke; 1,625 tons; 374x37x9-3; 40,000 s.h.p.; 36 knots; turbine engines. The destroyer *Leberecht Maass* in company with the *Max Schultz* was in the North Sea on February 22nd, 1940, when she and her consorts were attacked by bombers of the German Air Force in mistake for British ships. Both vessels were hit and sunk. The normal complement of the *Leberecht Maass* was 283.

LEBORE

Ore S.S. Corp.; 1924; Bethlehem S.B. Corp.; 8,289 tons; 549-6x72-2x40-5; turbine engines.

The American steamship *Lebore* was torpedoed and sunk by a German submarine on June 16th, 1942, 70 miles off San Andres Island, Gulf of Mosquitos, on a voyage from Baltimore to Cruz Grande with coal. Five days previously the ship had picked up 49 survivors from the Dutch steamship *Crijnsen*, making a total of 95 persons on board. Fifty lives were lost.

LEDA

Morel; 1862; Richardson, Duck & Co.; 1,192 tons; 245X 28-5x17-2; 95 n.h.p.; compound engines.

The British cargo ship *Leda* was wrecked near Bayonne on June 12th, 1896, while on a voyage in ballast from Nantes to Bayonne.

LEDA

Koninklijke Nederlandsche Stoomb. Maats.; 1898; Rijkee & Co.; 1,140 tons; 228x32x18-4; 121 n.h.p.; triple-expansion engines.

The Dutch steamship *Leda* was bound from Methil to Amsterdam on December 6th, 1917, when she was torpedoed and sunk by the German submarine *U-49*. Seven of her crew were lost.

LEDA

British Navy, fleet-minesweeper; 1937; Devonport Dockyard; 815 tons; 230x33-5x7-9; 1,750 i.h.p.; 17 knots; turbine engines; 3-drum boilers; two 4 in. guns, 5 smaller. The minesweeper *Leda*, Cdr. A. H. Wynne-Edwards, was a unit in a force escorting a very large convoy to Russia in September 1942. The convoy was attacked by German submarines and dive-bombers from the 9th to the 15th September, but about 70 per cent of the convoy reached port and delivered the largest consignment of ammunition and supplies to Russia up to that date. When returning with the homeward bound convoy on the 20th, *Leda* was torpedoed and sunk by a German submarine.

The full story of the convoy is told under the destroyer *Somali*.

LEDA

Panama Transport Co.; 1925; Howaldtswerke; 8,546 tons; 470-1x63-2x35-3; 776 n.h.p.; oilengines. The Panamanian tanker *Leda* was torpedoed by a German submarine on November 3rd, 1942, between Trinidad and Guanta-namo Bay. The tanker was taken in tow, but sank on the 5th.

LEE

British Navy, gunboat; 299 tons; 80 n.h.p.; steam engines screw; one 68 pdr. gun, one 32 pdr., 2 howitzers.

The steam gunboat *Lee*, Lt. W. H. Jones, was one of a flotilla engaged in the bombardment of the Pei-ho Forts in the China War of 1856-59. The action lasted from June 25th to 28th, 1859. *Lee* sinking on the 25th.

The flotilla lost 25 officers and men killed, and 93 wounded. For full story of the action see *Plover*.

LEE PING

LEE PING

Lee Ping S.S. Co.; 1907; Sir R. Dixon & Co.; 1,985 tons; 275-7X40-4X18-7; 175 n.h.p.; triple-expansion engines. The Chinese steamship *Lee Ping* was sunk by Japanese gunfire off Nantao, Yangtze River, on August 23rd, 1937.

LEE SANG

Indo-China S.N.Co.; 1885; London & Glasgow Co.; 1,697 tons; 250X36-2X16-1; 150hp.; triple-expansion engines. The British cargo ship *Lee Sang* was wrecked at Lian-ti-shan on July 28th, 1888. She was on a voyage from Chefoo to Newchwang carrying a general cargo.

LEE TUNG

Japanese Navy; 1884; Napier, Shanks & Bell; 1,853 tons; 265-5x35-7x18-4; compound engines. The Chinese steamship *Lee Tung* was seized by the Japanese Navy. On April 9th, 1945, she was torpedoed and sunk by the U.S. submarine *Spade fish* in the Yellow Sea.

LEEDS CITY

Sir W. R. Smith & Sons; 1913; Richardson, Duck & Co.; 4,809 tons; 411-2x55x24-3; 488 n.h.p.; triple-expansion engines. The British cargo ship *Leeds City* foundered on September 19th, 1925, after striking an uncharted reef ten miles south-east of Bawean Island. She was on a voyage from Tjilatjap to Kobe and Yokohama carrying a cargo of sugar.

LEEDSTOWN

United States Government; 1933; Federal S.B. & D.D. Co.; 9,135 tons; 484-4x72-2x25-8; turbine engines. The *Leedstown* was formerly the liner *Santa Lucia*, taken over by the U.S. Government for use as a transport. On November 9th, 1942, during the Allied landings in North Africa, she was bombed by German aircraft off Algiers at 1 p.m. and torpedoed and sunk at 1.20 p.m.

LEENA

John Nurminen O/Y; 1905; S. P. Austin & Son; 1,133 tons; 220-9x33-3x14; 145 n.h.p.; triple-expansion engines. The Finnish ship *Leena* left Mantyluoto on February 10th, 1946, for Copenhagen with a cargo of cellulose. She was not seen again and wreckage was washed ashore near Visby.

LEERSUM

Stoomvaart Maats. Oostzee (Vinke & Co.); 1898; Sunder land S.B. Co.; 1,455 tons; 240x37x17-7; 162 n.h.p.; triple-expansion engines. The Dutch steamship *Leersum* was bound from Rotterdam to Newcastle on December 16th, 1914, when she ran into a minefield off Scarborough. She struck a mine and sank with the loss of ten of her crew.

LEESEE

W. Schuchmann; 1922; Nuske & Co.; 2,624 tons; 322-9x46x19-2; 176 n.h.p.; triple-expansion engines. The German steamship *Leesee* was bombed and sunk by Allied aircraft on April 25th, 1943, off the north coast of Norway.

LEFFORT

Russian Navy, line-of-battleship; 84 guns. The Russian line-of-battleship *Leffort*, 84 guns, was on her way from Reval to Cronstadt in company with the *Imperatrice Alexandra*, 84, *Vladimir*, 84, and *Pamiat Asova*, 74 guns, under command of Rear-Admiral I. Nordman. The ship had on board 756 officers and men, also 53 women and 17 children. When off the island of Hogland in the Gulf of Finland on the morning of September 23rd, 1857, the squadron was caught in a violent storm. The *Leffort* was under shortened sail when she suddenly heeled over, righted herself and then heeled over again. In the space of ten minutes she had foundered in deep water, her keel appearing once above the waves before she finally sank. The time and place of her loss was at 7.23 a.m., five and a half miles N.N.E. of Grand-Tuters Island. Not one of her company of 826 persons was saved.

It was assumed that owing to the presence of the women and children, the ports had been left open for the circulation of fresh

air, and that when the squall canted the vessel over she filled and went down.

LEFKOSIA

D. Pavlatros & Co.; 1872; Barclay, Curie & Co.; 1,087 tons; 244-3x28x20-7; 152 n.h.p.; compound engines. The Greek cargo ship *Lefkosia* was sunk by a submarine in the Mediterranean on May 11th, 1917.

LEGAZPI

Compania Trasmediterranea; 1904; Sir R. Dixon & Co.; 4,349 tons; 375-5x47x23-3; 589 n.h.p.; triple-expansion engines. The Spanish steamship *Legazpi* was attacked by insurgent aircraft and disabled near Benicasim on May 19th, 1937, during the Spanish Civil War. On the 24th, she was again bombed and sank off Cas-tellon.

LEGION

British Navy, destroyer; 1939; Hawthorn Leslie & Co.; 1,920 tons; 354x37x10; 48,000 s.h.p.; 36-5 knots; turbine engines; 3-drum boilers; six 4-7 in. guns, one 3 in.A.A., several 20 mm., 4 T.T.

The destroyer *Legion* was bombed and sunk during an enemy air attack on Malta on March 26th, 1942. The vessel's normal complement was about 250.

LEGISLATOR

T. & J. Harrison; 1888; R. Dixon & Co.; 2,997 tons; 330x40-1x20-2; 307 n.h.p.; triple-expansion engines. The British cargo ship *Legislator* caught fire after an internal explosion on February 16th, 1898, in the North Atlantic. She was on a voyage from Liverpool to Colon with a general cargo. Six men were killed by the explosion. The crew fought the fire for three days until the s.s. *Flowergate* arrived on the scene and took off the survivors, most of them badly burned. The *Legislator* sank soon afterwards.

LEICESTER

Great Central Railway Co.; 1891; Earless Co.; 1,001 tons; 240-3x32-3x15-1; 250 n.h.p.; 14 knots; triple-expansion engines.

The steamship *Leicester* was mined and sunk two and a half miles S.E. by E. of Folkestone Pier on February 12th, 1916. Seventeen persons were killed. The captain was among the survivors.

LEIESTEN

Skibs A/S Leiesten (Rafen & Loennechen); 1930; Armstrong, Whitworth & Co.; 6,118 tons; 396-2x55-1x32-3; 583 n.h.p.; oil engines.

The Norwegian tanker *Leiesten* was torpedoed and sunk by a German submarine on January 23rd, 1942, 400 miles E.S.E. of Cape Race on a voyage from Manchester to Baton Rouge. Six of her crew were killed.

LEIF

D/S A/S Laly; 1937; A/B Lindholmens Varv.; 1,582 tons; 285-4x42-3x16-3; 398 n.h.p.; oil engines. The Norwegian motorship *Leif* was torpedoed and sunk by a German submarine on February 28th, 1942, on a voyage from New York to Ciudad Trujillo. Fifteen of her crew were killed.

LEIKANGER

Westfal-Larsen & Co.AjS; 1923; Lithgpws; 4,003 tons; 375-3x52-3x23-9; 339 n.h.p.; triple-expansion engines. The Norwegian steamship *Leikanger* was torpedoed and sunk by a German submarine on July 27th, 1942, on a voyage from Table Bay to Trinidad and Baltimore. Eighteen of her crew, including the captain, were killed.

LEINSTER

City of Dublin Steam Packet Co.; 1897; Laird Bros.; 2,646 tons; 360x41-5x27-3; 529 n.h.p.; 23-5 knots; triple-expansion engines.

The steamship *Leinster* maintained the Irish-English service of her company throughout four years of the First World War. On the morning of October 10th, 1918, she left Kingstown for Holyhead

with 680 passengers and crew under command of Capt. W. Birch. When only a few hours out she was torpedoed by a German submarine and sank with the loss of 480 lives. Two torpedoes struck the ship, the first exploding near the bow where 22 Post Office officials were engaged in sorting the mail. Of these men 21 were killed instantly. The second torpedo penetrated her engine room and killed and injured many persons. Capt. Birch had an eye blown out by splinters from the explosion and his leg smashed; he was pulled into a boat but was drowned when it capsized later.

The weather was bad, with a very heavy sea, nevertheless an attempt was made to take the steamship in tow, while an S.O.S. was sent out. In response to this a destroyer came on the scene in time to rescue 33 persons, but too late to assist the *Leinster*, which had foundered in the meantime.

At the time of the attack many passengers were lying in their berths owing to the rough sea, and there was much confusion when they rushed on deck. Several of the boats were got out too hurriedly and capsized.

LEIPZIG

German Navy, light cruiser; 1906; Weser; 3,250 tons; 341 X 43-5x17-5; 11,000 ih.p.; 22-4 knots; triple-expansion engines; Schulz-Thornycroft boilers; ten 4-1 in. guns, ten 1 pdr. 4 m.g., 2 T.T.*

On August 2nd, 1914, the light cruiser *Leipzig* left Mazatlan, Mexico, and cruised for some weeks in the Gulf of Mexico, capturing and sinking the s.s. *Elsinore*, 6,542 tons, on September 11th and the s.s. *Bankfields*, 3,763 tons, in the Gulf of Guayaquil, on the 25th. By October 14th the *Leipzig* had steamed to Easter Island, where she joined the rest of the East Asiatic Squadron under Admiral von Spee.

The ship took part in the battle of Coronel on November 1st (see *Good Hope*) and on the following day captured and sank the French barque *Valentine*. On December 2nd she sank the barque *Drummuir*, 1,844 tons, off Cape Horn. Then came the battle of the Falkland Islands on December 8th.

In this action the *Leipzig*, the slowest ship of the squadron, was engaged with the light cruiser *Glasgow* and the armoured cruiser *Cornwall* in a running fight lasting from 2.45 p.m. to 9.23 p.m., when she sank. The vessel fought in a most determined manner and although ablaze fore and aft did not cease firing until every gun had been put out of action. Of her complement of 286 only five officers and 13 men were saved.

The full story of the battle will be found under Admiral von Spee's flagship *Scharnhorst*.

LEISE MCERSK

Ministry of Shipping (Burnett S.S. Co.); 1921; A. P. Moller; 3,136 tons; 320-2x44-2x26-2; 355 n.h.p.; oil engines. The motorship *Leise Mcersk*, on a voyage from Three Rivers to Sharpness, was torpedoed and sunk by a German submarine on November 23rd, 1940, about 300 miles W. of Inishtrahull. The captain and 16 of the crew were lost.

LEITRIM

R. M. Hudson & Sons; 1896; C. S. Swan & Hunter; 4,284 tons; 365x48-5x19-3; 442 n.h.p.; triple-expansion engines. The British cargo ship *Leitrim* was wrecked on Plakka Point, Corfu, on May 5th, 1913. She was on a voyage in ballast from Venice to Varna.

LEIV EIRIKSSON

AIS Labor emus; 1936; Brerner Vulkan; 9,952 tons; 492-9 X 66-1x36-4; 1,167 n.h.p.; oil engines. The Norwegian tanker *Leiv Eiriksson* was torpedoed and sunk by a German submarine on June 27th, 1942, off the Windward Islands, on a voyage from Trinidad to Gibraltar with 14,366 tons of fuel oil.

LEIXOES

1890; R. Stephenson & Co.; 3,245 tons; 339-7x41x18-9; 291 n.h.p.; triple-expansion engines. The German steamship *Cheruskia* was requisitioned by the Portuguese Government and renamed *Leixoes*. Subsequently she was torpedoed and sunk by a German submarine in the Western Atlantic on September 11th, 1918.

LEKA

C. T. Gogstad & Co.; 1892; Richardson, Duck & Co.; 1,845 tons; 270-4x36-6x16-6; 193 n.h.p.; triple-expansion engines. The Norwegian cargo ship *Leka* was torpedoed and sunk by a German submarine in the North Sea on September 24th, 1917.

LELIA

W. C. Rickarby & Co.; 1864; W. C. Miller & Sons; 1,100 tons; 252x30x12-2; 300 n.h.p.; 14 knots; compound diagonal engines.

The paddle steamer *Lelia*, a new vessel on her first voyage, left Liverpool for Bermuda on the morning of January 14th, 1865, under command of Capt. Skinner. She carried about 60 persons, passengers and crew, including a Confederate States officer, Capt. Arthur Sinclair. She had on board 700 tons of coal, but at Bermuda she was to collect a more valuable cargo with which she was to run the blockade into Wilmington. The ship was cutter rigged and of very light draught, having been specially designed for blockade running.

There was a heavy sea at the mouth of the Mersey when the vessel sailed and at about 2 p.m. when she was off Great Orme's Head it was decided to get the anchors inboard. While this was in operation a sea dashed one of them through the deck. The hole quickly filled with water from successive seas and the vessel began to settle by the head. She was turned about and ran for home at reduced speed, but after a little while her bows were under water and the boats were lowered, two out of the four being smashed. The position of the *Lelia* was about six miles W. of the N.W. lightship and the boats, one carrying 18 persons and the other 12, decided to make for this. The first boat with its 18 occupants was flung athwart the lightship's bows and swamped, 14 being drowned. The people in the second boat seeing what had happened were afraid to approach too near and four jumped overboard and drowned, the remaining eight being saved.

The tug *Blazer* now came up but was unable to assist because of the cross seas and returned to Liverpool for a lifeboat. On her way back with the lifeboat in tow she encountered a heavy sea off East Hoyle Bank and the boat capsized. Out of a crew of 11 men, seven were drowned. The loss of life through this succession of disasters amounted to about 50 persons.

LELLO

Ricardo Telesio fu Agostino; 1889; J. de Decker Gs.; 1,384 tons; 256-1x32x20-4; 142 n.h.p.; triple-expansion engines. The Italian steamship *Lello* struck a mine and sank on January 18th, 1941, outside Spezia.

LEMNOS

J. Nicoll & Co.; 1880; Short Bros.; 1,530 tons; 270-3x34x 18-7; 174 n.h.p.; compound engines. The British steamship *Lemnos* was wrecked near the Tees breakwater on December 16th, 1915, while employed as an Admiralty collier.

LEMUEL BURROWS

Koppers Coal Co.; 1917; New York S.B. Corp.; 7,610 tons; 437-2x63-7x33-7; 629 n.h.p.; triple-expansion engines. The American steamship *Lemuel Burrows* was torpedoed and sunk by a German submarine on March 14th, 1942, 5-10 miles S.S.W. of Atlantic City. Twenty of her crew of 34 were killed.

LENA

Whitefield S.S. Co.; 1904; Craig Taylor & Co.; 2,463 tons; 306 x 44 -2 x 20 • 1; 236 n.h.p.; 10 knots; triple-expansion engines. The steamship *Lena* was presumed to have been sunk by enemy action on, or about, April 14th, 1917, on a voyage from Huelva to Bristol. All the crew of 25 were lost.

LENNA

O. Tiedemann; 1897; W. Gray & Co.; 1,576 tons; 250x36-7x 17-5; 238 n.h.p.; triple-expansion engines. The Esthonian cargo ship *Lenna* was carrying wood from Kasko to London when the deck cargo shifted. She capsized and sank in the North Sea on November 24th, 1938.

LENNOK

J.Linde; 1890; J. Priestman & Co.; 1,142 tons; 231 - 5x32-Ix 15-3; 114 n.h.p.; triple-expansion engines.

The Russian cargo ship *Lennok* was sunk by a German submarine in the North Sea on July 13th, 1915.

LENNOX

John Warrack & Co.; 1895; Barclay, Curie & Co.; 3,677 tons; 352' 6 X 44 • 2 X 25 • 4; 299 n.h.p.; triple-expansion engines. The British cargo ship *Lennox* was wrecked on South Saltee Island on December 29th, 1916, while carrying a cargo of coal on a voyage from Barry to Port Said.

LEO

Leo Steamship Co.; 1879; C. S. Swan & Co.; 1,938 tons; 285 X 55 • 2 x 24 • 5; 197 n.h.p.; compound engines. The steamship *Leo* was wrecked off Stalman, Denmark, on November 11th, 1895. Fifteen of the crew were drowned and there were six survivors.

LEO

L. Krogius; 1903; R. Craggs & Sons; 2,224 tons; 280 - 2 X 39-9x17-1; 217 n.h.p.; triple-expansion engines. The Finnish cargo ship *Leo* was torpedoed and sunk by a German submarine off the south coast of Ireland on July 9th, 1915.

LEO

Ellerman's Wilson Line; 1908; Stettiner Oderwerke; 1,140 tons; 225'7x35-4x14-4; 128 n.h.p.; triple-expansion engines. The steamship *Leo* was bombed and sunk by German aircraft on July 25th, 1940, in the Thames estuary on a voyage from Seaham to Portsmouth. Six of her crew were killed.

LEO DAWSON

Edwardian S.S. Co.; 1918; Blyth S.B. & D.D. Co.; 4,330 tons; 363'2x51x26-3; 377 n.h.p.; triple-expansion engines. The British cargo ship *Leo Dawson* was lost without trace after sailing from Narvik on January 29th, 1940, on a voyage to Immingham, carrying a cargo of iron ore. She had a crew of 35.

LEON

Delmas Freres; 1895; W. Pickersgill & Sons; 2,401 tons; 295 X 42 - 3 X17 M'; 220 n.h.p.; triple-expansion engines. The French steamship *Leon* was torpedoed and sunk by a German submarine in the English Channel on January 7th, 1918.

LEON

Greek Navy, destroyer; 1911; Cammell Laird; 1,050 tons; 293x27x10; 19,750 s.h.p.; 32 knots; turbine engines; Yarrow boilers; four 4 in. guns, two 2pdr., 6 T.T., 40 mines. The old Greek destroyer *Leon* was bombed and badly damaged by German aircraft about April 20th-21st, 1941, when the Greek authorities were leaving the country for Alexandria. The vessel was taken in tow to Suda Bay, Crete, which soon came within the range of the German bombers and before the evacuation of the British army on May 31st she had been hit again and sunk.

An account of the partial destruction of the Greek fleet is given under the *Psara*.

LEON GAMBETTA

French Navy, armoured cruiser; 1903; Brest Dockyard; 12,416 tons; 486-7x70-2x26-5; 27,500 i.h.p.; 23 knots; triple-expansion engines; Niclausse boilers; four 7-6 in. guns, sixteen 6-4 in., twenty-four 3pdr., 5 T.T.

The armoured cruiser *Leon Gambetta* was torpedoed and sunk by an Austrian submarine off the coast of Italy on April 27th, 1915. The ship, wearing the flag of Admiral Senes, was on patrol duty with two other cruisers at the entrance to the straits of Otranto, the night being clear with a very bright moon, and had stopped to send a boat to examine a sailing ship.

The loss of life was extremely heavy, only 136 men being saved of a complement of 714.

LEON MARTIN

Ministry of Shipping (Anglo-American Oil Co.); 1936; Chan-tiers & Ateliers de St. Nazaire; 1,951 tons; 253-3x46x17-1; 369 n.h.p.; triple-expansion engines.

The tanker *Leon Martin* struck a mine and sank off Falmouth on November 11th, 1940, on a voyage from Swansea to Hamble. Sixteen of her crew were lost.

LEONARDO DA VINCI

Italian Navy, dreadnought battleship; 1911; Ansaldo; 22,000 tons; 577x91-7x27-7; 24,000 i.h.p.; 22-5 knots; turbine engines; Blechynden boilers; thirteen 12 in. guns, eighteen 4 • 7 in., fourteen 3 in., 3 T.T.

The dreadnought *Leonardo da Vinci* was lying in Taranto Harbour when, on August 2nd, 1916, fire broke out near the aft magazine. Prompt action was taken by the officer of the watch who gave orders for the immediate flooding of the magazine. Despite this precaution a series of heavy explosions occurred which wrecked the ship. She sank within 45 minutes with the loss of 21 officers and 227 ratings from a complement of 1,190.

The Italian navy possessed only four dreadnoughts at that time and the destruction of the *Leonardo da Vinci* was a severe blow to Italy's power in the Adriatic.

LEONARDO PALOMBA

Leonardo Palomba; 1899; Strand Slipway Co.; 1,110 tons; 222-4x35-1x14-3; 154 n.h.p.; triple-expansion engines. The Italian steamship *Leonardo Palomba* was torpedoed and sunk by a British submarine on September 22nd, 1942, eight miles E. of Kuriat, Tunisia.

LEONE

Italian Navy, destroyer; 1923; Ansaldo; 1,526 tons; 372x34x 11-5; 40,000 s.h.p.; 34 knots; turbine engines; Yarrow boilers; eight 4-7 in. guns, two 40 mm., 4 m.g., 4 T.T., 100 mines. At the time of her entry into the Second World War (June 11th, 1940) Italy had a number of modern destroyers and submarines based on Massawa, chief port of her East African colony of Eritrea. In addition the port became a rendezvous for various German units. On April 1st, 1941, the British occupied Asmara, capital of the colony, and naval aircraft began a search for the Italian destroyers of which there were five, the *Leone*, *Pantera* and *Tigre*, 1,526 tons each, *Daniele Manin* and *Nazario Sauro*, 1,058 tons each. The *Leone* was located at Massawa on the 1st and was bombed and sunk, the *Pantera* and *Tigre* escaping to the coast of Saudi Arabia where they scuttled themselves. One of the submarines, the *Galileo Galilei*, 880 tons, had surrendered to H.M. trawler *Moonstone* some months before, whilst four other passed out of the Red Sea and, aided by German supply ships, managed to reach Bordeaux about five weeks after the fall of Massawa.

The *Leone* carried a complement of 201, of whom a large number were saved as well as many from the *Daniele Manin* and *Nazario Sauro*.

A sixth destroyer, the *Francesco Nullo*, 1,058 tons, had been run ashore and blown up after an action with H.M. destroyer *Kimberley*, 1,690 tons, on October 21st, 1940.

LEONE PANCALDO

Italian Navy, destroyer; 1929; Tirreno; 1,628 tons; 352 X 33-5x16-7; 50,000 s.h.p.; 38 knots; turbine engines; Odero boilers; six 4-7 in. guns, four 37 mm.A.A., eight 13 mm.A.A., 4 T.T.

The Italian destroyer *Leone Pancaldo* was bombed and sunk on two occasions, once off Syracuse on July 10th, 1940, after which she was raised and recommissioned. The second occasion was on April 30th, 1943, when she was lying off La Goulette, Tunis, and was sunk by British aircraft. She carried a complement of about 200.

LEONITA

L. de Ansoleaga y Cia.; 1919; Submarine Boat Corpn.; 3,545 tons; 324X46-2x25; turbine engines. The Spanish ship *Leonita* was carrying coal from Norfolk, Va. to Gibraltar on March 13th, 1921, when she foundered in 36° 24' N., 7° 20' W.

LEOPARD

French Navy, destroyer; 1924; Chantiers de la Loire; 2,126 tons; 416x37-5x17-3; 55,000 s.h.p.; 35-5 knots; turbine engines; Du Temple boilers; five 5-1 in. guns., eight 13 mm.A.A., 6 T.T. The destroyer *Leopard*, Capt. EvenoA/ was wrecked off Tobruk on May 27th, 1943. All of the vessel's complement of ten officers and 220 ratings were saved.

LEOPARDI

Tirrenia Soc. Anon. di Nav.; 1915; Tyne Iron S.B. Co.; 3,298 tons; 349 • 7 X 48 - 6 X 22 • 6; 429 n.h.p.; triple-expansion engines.

The Italian steamship *Leopardi* was torpedoed and sunk by the British submarine *Osiris* on August 14th, 1940, about six miles E. of Tolmetta.

LEOPOLD

United States Navy, destroyer; 1943; U.S.A.; 1200 tons; 306x36-9X—; 6,000 s.h.p.; 21 knots; turbine engines; three 3 in. guns, two 40 mm.A.A., four 20 mm.A.A., 3 T.T. The destroyer *Leopold* was escorting a convoy in the Atlantic on March 9th, 1944, when she was torpedoed and sunk by a German submarine. The vessel carried a complement of 220 from the U.S. Coastguard service.

LEOPOLD II

Cie. Royale Belgo-Argentine; 1906; W. Dobson & Co.; 2,902 tons; 331-2x44-2x16-2; 312 n.h.p.; triple-expansion engines.

The Belgian steamship *Leopold II* struck a mine and sank on December 23rd, 1941, off the River Ouse on a voyage from Methil to London. Thirty-three crew and two gunners were lost.

LEOPOLDVILLE

Cie. Maritime Beige (Lloyd Royal) Soc. Anon.; 1929; Soc. Anon. John Cockerill; 11,509 tons; 501-8x62-2x35; 1,225 n.h.p.; 16-5 knots; quadruple-expansion engines & L.P. turbines. The Belgian liner *Leopoldville* had been employed in the Antwerp and Congo service, and was taken over as a troopship when Belgium was invaded by Germany in May, 1940. On December 24th, 1944, she was ferrying some 2,200 troops of the U.S. 66th Division from Southampton to Cherbourg when there was an explosion caused by a mine or torpedo.

None of the troops on board had received instruction in lifeboat drill, or had been shown how to fasten their lifebelts. The explosion caused the two after decks of the ship to collapse, and a large number of the men were trapped. Despite this the Belgian captain did not appreciate the seriousness of the situation, and he dropped anchor five and a half miles from Cherbourg harbour. Three quarters of an hour elapsed before the work of disembarking began and it was carried on in a leisurely fashion.

Meanwhile the British destroyer *Brilliant* stood by while the other vessels of the escort went in search of the submarine. At 7.30 p.m. the destroyer left for Cherbourg with the first detachment of soldiers, it being thought that the transport was in no immediate danger. An hour later the bulkheads gave way and the vessel sank within ten minutes. Owing to a mistaken order part of the crew abandoned ship, leaving the unfortunate soldiers to launch the remaining boats as best they could. In all 802 troops and six of the crew, including the captain, were drowned. Small craft from Cherbourg arrived too late, and only a few men were rescued from the sea.

LEPANTO

T. Wilson, Sons & Co.; 1877; Earlf's Co.; 2,287 tons; 305X 36 • 1 X 26; 270 n.h.p.; triple-expansion engines. The British cargo ship *Lepanto* sank after a collision with the British steamship *Knight of St. George* off St. Catherine's Point on January 7th, 1898, while on a voyage from Boston to Hull carrying a general cargo.

LEPUS

Madrigal Shipping Co.; 1911; Gt. Lakes Eng. Works; 2,294 tons; 253 X 43 - 7 X 24 • 7; triple-expansion engines. The Philippine ship *Lepus* was carrying scrap iron from Legaspi to Hirohata, but during a typhoon on October 20th, 1956, in approximately 19° 15' N., 126° 15' E., she sank, and 25 of the crew were drowned. Eleven survivors were picked up.

LERICI

G.B. Bibolini; 1941; 6,070 tons; oilengines. The Italian motorship *Lerici* was torpedoed and sunk by a British submarine on August 16th, 1942, about 120 miles N. of Ras Amer, Libya.

LERO

Neptune S.N. Co.; 1882; J.Laing; 2,224 tons; 288-5x37-4X 27; 260 h.p.; compound engines.

The British cargo ship *Lew* was wrecked near Goerree on January 24th, 1891, while on a voyage from Baltimore to Rotterdam carrying a cargo which included cotton and tallow.

LERO

Adriatica Soc. Anon. di Nav.; 1936; Cantieri Ruiniti deW Adriatico; 1,980 tons; 263-9x40-2x21-1; 656 n.h.p.; oil engines. The Italian motorship *Lero* was torpedoed and sunk by a British submarine on October 20th, 1942, six miles S.W. of Simi Island, Aegean Sea.

LERWICK

Wallem & Co.; 1938; J. L. Thompson & Sons; 5,626 tons; 409-3x57-6x29-1; 395 n.h.p.; triple-expansion engines.

The British steamship *Lermck* was bombed and sunk by German aircraft on January 13th, 1942, in the mouth of the River Tyne inward bound from London. Five of her crew were killed.

LESBURY

Pyman Bros.; 1891; W. Gray & Co.; 2,663 tons; 306-5X 41-6x19-8; 239 n.h.p.; triple-expansion engines. The British cargo ship *Lesbury* was wrecked near Farallon, River Plate, on November 21st, 1902, while carrying a cargo of grain from Rosario to St. Vincent, Cape Verde Islands.

LESTRIS

Cork S.S. Co.; 1872; J. L. Thompson; 1,065 tons; 220-5X 30-2x16-7; 100 h.p.; compound engines.

The Irish packet *Lestris* was carrying a cargo of palm oil and cotton from Liverpool to Antwerp when she was in collision with the steamship *Mersey*, 319 tons, in the River Mersey on May 23rd, 1891. Both vessels sank with the loss of six lives in all.

LETIMBRO

Sicilia Societa di Navigazione; 1883; Blackwood & Gordon; 2,210 tons; 299-2x37-2x23-6; 242 n.h.p.; compound engines.

The Italian cargo ship *Letimbro* was torpedoed and sunk by a submarine in the Mediterranean on July 29th, 1916.

LETTIA

Anchor-Donaldson; 1912; Scotts S.B. & E. Co.; 8,991 tons; 470-4x56-9x28-8; 962 n.h.p.; triple-expansion engines.*

The British steamship *Letitia* was employed as a hospital ship during the First World War. While on a voyage from Liverpool to Halifax she was wrecked on August 1st, 1917, off Portuguese Cove, N.S.

LETO

Hudig & Veder; 1914; Rotterdam Droogdok Maats.; 3,225 tons; 331X 48 - 1X 22 • 3; 249 n.h.p.; triple-expansion engines. The Dutch steamship *Leto* struck a mine and sank in the North Sea on January 4th, 1916.

LETO

N.V. Maats. Zeevaart (Hudig & Veder); 1929; Rotterdam Droogdok Maats.; 4,712 tons; 400-8x55-3x25-1; 339 n.h.p.; triple-expansion engines & L.P. turbine.

The Dutch steamship *Leto* was torpedoed and sunk by the German submarine *U-553* on May 12th, 1942, eight miles off Cape Magdalen, Gulf of St. Lawrence, outward bound with a cargo of grain. Ten of her crew and two passengers were lost.

LEUTHEN

German Government; 1912; Caird & Co.; 7,131 tons; 449-7X 52x30-6; 628 n.h.p.; quadruple-expansion engines. The steamship *Leuthen* was formerly the British *Nankin*, captured

by the Germans in May, 1942, in the South Indian Ocean and taken to Yokohama. On November 30th, 1942, she was completely wrecked when the nearby tanker *Uckermark* blew up in Yokohama harbour.

LEVEN

R. Ropner & Co.; 1889; *W. Gray & Co.*; 2,328 tons; 290x38x20-3; 212 n.h.p.; triple-expansion engines. The British cargo ship *Leven* was wrecked near Peniche on December 28th, 1905. She was on a voyage from Cardiff to Malta carrying a cargo of coal.

LEVENVALE

J. M. Lennard & Son; 1882; *R. Dixon & Co.*; 1,266 tons; 235'1x33-2x17; 99 h.p.; compound-inverted engines. The British cargo ship *Levenvale* was wrecked near Isle Vierge near Brest, on September 20th, 1884, while on a voyage from Rochester to Poti carrying a cargo of cement.

LEVERKUSEN

Hamburg-Amerika Linie; 1928; *Deutsche Werft*; 7,386 tons; 463-6x60-1x28; 1,585 n.h.p.; oil engines. The German motorship *Leverkusen* was torpedoed and sunk by a British submarine on May 1st, 1941, E. of the Kerkenna Islands, Tunisia.

LEVERKUSEN

Schiffahrt-u. Assekuranz-Ges. E. Russ & Co.; 1938; *Lubecker Flenderwerke A.G.*; 1,273 tons; 243-3x36-3x14-3; 241 n.h.p.; oil engines.

The German motorship *Leverkusen* was bombed and sunk by Russian aircraft on December 18th, 1944, at Gdynia.

LEVERRIER

Wilkie & Turnbull; 1877; *Bartram, Haswell & Co.*; 1,820 tons; 275-3x35-1x24-2; 170 h.p.; compound-inverted engines. The British cargo ship *Leverrier* was wrecked near Cape Spartel on July 19th, 1884, while on a voyage from Liverpool to Bombay carrying a cargo of coal.

LEVIS

Canadian Navy, corvette; 1940; 925 tons; 205x33x14-5; 2,800 ih.p.; 16 knots; triple-expansion engines; 3-drum boilers one 4 in.A.A. gun, several smaller. The corvette *Levis* was torpedoed and sunk by a German submarine off the coast of Greenland on September 20th, 1940. Eighteen ratings were killed.

LEWIS CASS

U.S. Maritime Commission; 1943; *California S.B. Corp.*; 7,176 tons; 422-8x57x34-8; 339 n.h.p.; triple-expansion engines. The American Liberty ship *Lewis Cass* was on a voyage from Los Angeles to Balboa when, on January 26th, 1943, she went ashore at Guadalupe Island, Mexico, and broke in two.

LEWIS L. DYCHE

U.S. Shipping Administration; 1943; *Oregon S.B. Corp.*; 7,176 tons; 422-8x57x34-8; 339 n.h.p.; triple-expansion engines. The steamship *Lewis L. Dyche* was bombed and sunk by Japanese aircraft on January 4th, 1945, off Mindoro Island, Philippines.

LEWIS LUCKENBACH

E. F. Luckenbach; 1903; *J. H. Dialogue & Son*; 3,906 tons; 355x48x28; 349 n.h.p.; triple-expansion engines. The American cargo ship *Lewis Luckenbach* was sunk by a German submarine off Ushant on October 11th, 1917.

LEWISHAM

Britain S.S. Co.; 1898; *W. Gray & Co.*; 2,810 tons; 318x47-1x20-9; 256 n.h.p.; 9 knots; triple-expansion engines. The steamship *Lewisham* was torpedoed and sunk by the German submarine *U-46* in the Atlantic on May 17th, 1917. Twenty-four men were killed. The captain and two ship's gunners were taken prisoner.

LEXA MAERSK

A.P. Moller; 1949; *Bartram & Sons*; 5J20 tons; 434-2x58-5x25-9; oil engines.

The Danish motorship *Lexa Mcersk* caught fire on December 25th, 1954, in Singapore outer roads. She burned for three days and was beached on December 28th and the fire extinguished. She was carrying a cargo of rubber from Nagoya to New York and Halifax.

LEXINGTON

Cornelius Vanderbilt; 1835; 205 x — x —; 14 knots. The wooden paddle steamer *Lexington*, Capt. G. Childs, was a passenger vessel on Long Island Sound in the 1830's, running between Stonington, Connecticut, and New York. She was popular with passengers and could maintain a speed of 14 knots under favourable conditions, which was excellent for those days. On the afternoon of Monday, January 13th, 1840, she left New York for her usual run with approximately 154 persons—passengers and crew—on board. Owing to the fact that passenger lists were not made in duplicate the only one prepared was carried on the vessel, thus making it impossible to ascertain the total number lost in the event of shipwreck.

Some little time after sailing fire was discovered in the casing of the funnel. A fire-fighting party under the Second Mate, Mr. D. Crowley, failed to subdue the flames, the steamer proceeding at speed during this time as it was impossible to stop the engines owing to the fire. Later many passengers, rendered frantic by the fierce heat, jumped overboard, while others tried to launch the boats in disregard of the captain's orders, as the ship's speed caused them to be swamped immediately they touched water. Capt. Childs was said to have lost his life in his attempts to help the terrified people.

The sloop *Merchant*, Capt. Meeker, which was nearest the burning vessel, proceeded to the rescue but ran aground and was not refloated until some hours later. Another small vessel tried to reach the *Lexington*, but the latter's speed was so great that the smaller craft was rapidly outpaced.

So far as can be established 150 persons were burned or drowned in the disaster, and only four were saved.

LEXINGTON

United States Navy, aircraft carrier; 1925; *Fore River Shipbuilding Co.*; 33,000 tons; 888x105-5x32; 180,000 s.h.p.; 33-25 knots; turbine engines; Yarrow boilers; eight 8 in. guns, twelve 5 in. four 6pdr., 8 m.g., 90 aircraft.

The American aircraft carrier *Lexington*, Capt. F. C. Sherman, flagship of Rear-Admiral A. W. Fitch, formed part of a task-force of the American Pacific Fleet sent to locate the Japanese in the Solomon Islands. This task-force was under command of Rear-Admiral Frank J. Fletcher and on May 4th, 1942, his carriers surprised a Japanese squadron lying in Tulagi harbour, in the Southern Solomons. One Japanese destroyer, the *Kikutsuki*, 1,315 tons, and some merchant ships were destroyed. From this date until the 8th there was constant aerial fighting in which the Japanese aircraft carrier *Shoho*, 12,000 tons, 42 aircraft, was sunk. On the 8th an attack was launched against the *Lexington* by aircraft from Japanese carriers. The ship, the largest of its kind in the world, presented a splendid target and despite a vigorous defence she was hit by at least two bombs and two torpedoes which started serious fires. The crew managed to keep the *Lexington* seaworthy, extinguishing the fires and recovering her aircraft, but some hours later there was a terrific internal explosion, attributed to a leakage of petrol from one of the pipes below deck. Fire broke out again and the carrier was abandoned and sunk.

The complement of the *Lexington* was 1,899, of whom 169 were officers. The U.S. Navy Department later reported that 92 per cent of those on board, including Capt. Sherman, were saved. In addition to the *Lexington* the Americans lost the destroyer *Sims* and the tanker *Neosho*. See also the Japanese aircraft carrier *Shoho*.

LEYSIAN

F. Leyland & Co.; 1906; *Armstrong, Whitworth & Co.*; 4,703 tons; 400x52x27; 477 n.h.p.; triple-expansion engines. The British cargo ship *Leynian* was wrecked seven miles south of

Stumble Head light on February 20th, 1917, while on a voyage in ballast from Belfast to Cardiff.

LI WO

Indo China Steam Navigation Co.; 1938; Hongkong & Whampoa Dock Co.; 707 tons; 163-8x30-1 x 9-1; 278 n.h.p.; triple expansion engines; one 4 in. gun, 2 m.g.

The armed auxiliary *Li Wo*, Lt. Thomas Wilkinson, R.N.R., was formerly a passenger steamship on the Upper Yangtze. On February 14th, 1942, the vessel was on her way from Singapore to Batavia when she met a Japanese convoy escorted by a large cruiser and several destroyers. On encountering the convoy Lt. Wilkinson called all hands and announced his intention of attacking despite the fact that he possessed only 13 rounds of practice ammunition for his 4 in. gun. He then hoisted his battle ensign and steered for the convoy, machine-gunning the crews of several transports as well as severely damaging one by shells from his 4 in. gun. After expending all his ammunition he decided to ram the transport which was now on fire. This having been accomplished and the *Li Wo* coming under the salvos of the cruiser, the order was given to 'abandon ship'. Of the 84 officers and men on board 74, including Lt. Wilkinson, were killed and Sub. Lt. R. G. Stanton and nine ratings became prisoners of war.

The Victoria Cross was awarded posthumously to Lt. Wilkinson in recognition of his gallantry, Sub. Lt. Stanton received the D.S.O. and there were several awards to members of the crew.

LIANA

Rederi A/B Lerberget; 1898; W. Gray & Co.; 1,657 tons; 265 X 38 • 5 X 17 • 4; 150 n.h.p.; triple-expansion engines. The Swedish steamship *Liana* was torpedoed and sunk by a German submarine on February 16th, 1940, 24 miles N. of Kinnaird Head on a voyage from Blyth to Halmstad with coal. Ten of her crew were lost.

LIBAN

Fraissinet et Compagnie; 1882; R. Napier & Sons; 2,308 tons; 300-3x36-2x19-4; 388 n.h.p.; 12 knots; triple-expansion engines.

The steamship *Liban* was on a voyage from Marseilles to Bastia on the afternoon of Sunday, June 7th, 1903. She carried 240 persons, including 24 officers and men of the French army, and the crew. At approximately 12.30 p.m. she collided with the steamship *Insulaire*, also of the Fraissinet company, and sank by the head in about 20 minutes. Great disorder prevailed on board the *Liban*, increased by the explosion of the boilers as the vessel settled down. The conduct of the soldiers amid the general panic was admirable and all of the party were saved. Several vessels in the vicinity picked up a large number of survivors, but despite their efforts about 100 persons lost their lives.

The *Insulaire* was inward bound for Marseilles from Nice and Toulon.

LIBAU

German Government; 1920; Werf Gusto Firma A.F. Smulders; 3,663 tons; 360-4x50-5x22; 347 n.h.p.; triple-expansion engines.

The steamship *Liban* was formerly the Russian *Kaganovitch*, captured by the Germans. She was torpedoed and sunk by a Norwegian submarine on October 18th, 1942, at the entrance to Vilnesfjord.

LIBBY-MAINE

Pargram S.S. Corp.; 1918; G. M. Standifer Const. Corp.; 1,811 tons; 496 x 68 x 40; oil engines.

The American wooden motorship *Libby-Maine* was carrying steel rails to Puerto Rico when she was caught in a storm in the Caribbean Sea on September 25th, 1941. Her steering gear was disabled and she foundered on the same day.

LIBECCIO

Italian Navy, destroyer; 1934; Tirreno; 1,449 tons; 350 x 33-3x10; 44,000 s.h.p.; 38 knots; turbine engines; 3-drum boilers; four 4-7 in. guns, four 37 mm., four 13 mm., 6 T.T.

The destroyer *Libeccio* was one of a flotilla escorting a convoy of ten merchantmen across the Central Mediterranean on November

8th, 1941. As an additional protection to the convoy the Italian Admiralty had assigned two heavy cruisers as a covering force. Despite these precautions a small British squadron of two cruisers, *Aurora*, Capt. W. G. Agnew, and *Penelope*, both of 5,270 tons, with two destroyers, attacked the convoy. Every merchantman was sunk. The *Libeccio* stopped to pick up survivors from the destroyer *Fulmine* and was herself torpedoed and sunk later in the day. The Italian heavy cruisers took no part in the action.

LIBERATOR

LykesBros. S.S. Co.; 1918; Bethlehem S.B. Corp.; 7,720 tons; 410 x 56 X 29; 609 n.h.p.; triple-expansion engines. The American steamship *Liberator* was torpedoed and sunk by a German submarine on March 19th, 1942, three miles E. of Diamond Shoal Buoy on a voyage from Galveston to New York.

LIBERIA

Cie. Francaise de Navigation a Vapeur; 1887; Flensburger Schiffs. Ges.; 1,942 tons; 289-5x36-6x21-9; 289 n.h.p.; triple-expansion engines.

The French steamship *Liberia* was torpedoed and sunk by a submarine in the Mediterranean on April 4th, 1918.

LIBERIA

French Government; 1905; Russell & Co.; 3,890 tons; 369-7X 49x17-6; 384 n.h.p.; triple-expansion engines. The steamship *Liberia* was formerly the Greek *Cape Corso*, captured by the French. She was torpedoed and sunk by a British submarine on September 21st, 1942, off the coast of Tunisia.

LIBERTIA

Parodi & Corrado; 1900; Barclay, Curie & Co.; 4,073 tons; 376-2x48x26-3; 311 n.h.p.; triple-expansion engines. The Italian cargo ship *Liberia* was sailing from Spezia to Rotterdam in ballast when, on February 14th, 1926, she went ashore in dense fog and was wrecked on Bolt Head, Devon.

LIBERTAD

Cuban Government; 1921; Stabilimento Tecnico; 5,441 tons; 404-1x53-9x29; 465 n.h.p.; triple-expansion engines. The steamship *Libertad* was torpedoed and sunk on December 4th, 1943, 15 miles N. of the Bermudas on a voyage from Antilla to Baltimore with 8,000 tons of sugar. Twenty-five of her crew were killed.

LIBERTE

French Navy, 1st class battleship; 1905; St. Nazaire; 14,635 tons; 434-7x79-5x27-5; 18,000 i.h.p.; 18 knots; triple-expansion engines.

The disaster which befell the French battleship *Liberte* was the second of a major character to occur in Toulon harbour within a little over four years, and from the evidence the causes were identical. On the morning of Monday, September 25th, 1911, the ship was lying at anchor in the harbour of Toulon when, about an hour after dawn, she suddenly blew up without previous warning. The first explosion was followed at short intervals by two others, each of increasing violence and obscuring the ship in a cloud of smoke and flame. When this had cleared away it was seen that the *Liberte* had broken in two and was lying half submerged.

The explosion occurred nearly amidships, abaft of the second funnel, in a wide space in the superstructure between that and the third funnel, which was set well aft. The after bridge and the after port and starboard 7-6 in. gun turrets were destroyed and that portion of the vessel was completely wrecked. Two fortunate circumstances operated to reduce the death-roll, the first being that a large number of warships and other ships were in harbour at the time and these sent away their boats with great promptitude, and the second that the disaster occurred at half tide which enabled the rescuers to take off from the wreck many hundreds of men who would otherwise have been drowned.

The official complement of the *Liberte* was 793, all of whom were fortunately not on board at the time. The loss of life amounted to 204 officers and men killed, with 184 injured. In addition to this number many persons on nearby ships were killed and injured by pieces of flying wreckage.

LIBIA

LIBIA

Cyprien Fabre & Co.; 1889; *C. S. Swan & Hunter*; 2,416 tons; 309'8x39-1x22'5; 258 n.h.p.; triple-expansion engines. The French steamship *Libia* was torpedoed and sunk by a German submarine off Ushant on August 2nd, 1917.

LIBOURNE

Cie. Francaise des Chemins de Per de Paris Orleans; 1921; *W. Pickersgill & Sons*; 4,186 tons; 364-3x52-9x24-3; 347n.h.p.; triple-expansion engines. The French cargo ship *Libourne* was sailing from Hampton Roads to Three Rivers with a cargo of coal on July 26th, 1924, when she went ashore and was wrecked on Gull Ledge, N.S.

LIBRA

General Steam Navigation Co.; 1869; *GourlayBros.*; 1,034 tons; 250 X 30 • 1 x 16 • 6; 300 h.p.; triple-expansion engines. The British cargo ship *Libra* sank after a collision with the British s.s. *Staincliffe* on April 17th, 1889, near Outer Dowsing, while on a voyage from Granton to London carrying a general cargo.

LIDINGO

Rederi A/B Rex; 1917; *Goteborgs Nya Verkstads A/B*; 5,842 tons; 406-2x53-7x31 -6; 430 n.h.p.; triple-expansion engines. The Swedish steamship *Lidingo* struck a mine and sank on November 6th, 1942, off Rostock.

LIDO G.

N.Gavagnin; 1872; *W.Watson*; 1,003 tons; 233-4x30-3x21-4; 175 n.h.p.; compound engines. The Italian cargo ship *Lido G.* was torpedoed and sunk by a submarine in the Mediterranean on October, 1917.

LIEGE

Cie. Nationale Beige de Transp. Mat.; 1908; *Flensburger Schiffsbau Ges.*; 4,398 tons; 383-7x52-1x25-3; 306n.h.p.; triple-expansion engines. The steamship *Liege*, under German control, was shelled and sunk by British light surface craft on March 13th, 1943, off Terschelling.

LIEN SHING

Un Mau Chuen; 1890; *London & Glasgow Co.*; 1,659 tons; 250X36-1x21-5; 169 n.h.p.; triple-expansion engines. The British cargo ship *Lien Shing* sank after striking a rock off Kega Point, near Saigon, on November 30th, 1919. She was on a voyage from Hong Kong to Saigon carrying a general cargo.

LIEN SHING

Indo-China S.N. Co.; 1924; *Hong Kong & Whampoa Dk. Co.*; 2,417 tons; 285x44-3x20-3; 503n.h.p.; triple-expansion engines. The British steamship *Lien Shing* was wrecked on Amherst rock on December 12th, 1926. She was carrying passengers on a voyage from Tientsin to Shanghai. Some of the Chinese crew were drowned.

LIEUTENANT BURAKOFF

Russian Navy, destroyer; 1898; *Schichau Works*; 280 tons; 193s7X21X—; 6,000 i.h.p.; 33-6 knots; triple-expansion engines; six 3pdr. guns, 2 T.T. The Russian destroyer *Lieutenant Burakoff* was captured from the Chinese during the Boxer Rebellion in 1900. She was the fastest ship in the Russian navy, and for that reason was invaluable to the Pacific Squadron in carrying despatches between Port Arthur and Newchang. On the night of July 23rd, 1904, the destroyer, with the *Boevoi* and *Grozovoi*, was sent to Ta-Ho Bay to lie in wait for Japanese mine-layers. The Russians were, however, discovered by the 14th Japanese torpedo boat flotilla, which torpedoed the *Lieutenant Bmakoff* amidships, causing her to sink immediately.

LIFEGUARD

Laing & Co.; 1857; *Newcastle*; 491 tons; 80h.p. The auxiliary steamship *Lifeguard*, Capt. Cracknell, left Newcastle for London at the end of December, 1862, with 32 passengers and 21 crew. She sank in the North Sea with all on board. Some boxes from her cargo were washed ashore a few days later.

LIFF

P.Edw.Arnesen; 1913; *Craig S.B. Co.*; 2,521 tons; 291x44x19-6; 201 n.h.p.; triple-expansion engines. The Norwegian cargo ship *Liff* was sunk by a German submarine in the Bay of Biscay on October 30th, 1917.

LIFLAND

Ministry of War Transport (G. Nisbet & Co.); 1920; *Odense Staalskibsvaerft*; 2,254 tons; 284-9x42-4x19-9; 1,050n.h.p.; 10 • 5 knots; turbine engines. The steamship *Lifland*, Capt. Nils Jensen, with a crew of 29 and three gunners, left Sydney, N.S., on September 20th, 1942, in convoy for Belfast Lough. She lost touch with the convoy at 5.30 p.m. on the 22nd, in fog off Cape Race, and was never seen again. It was considered probable that she was sunk by a submarine on or about the 28th some 600-700 miles S.E. of Cape Farewell.

LIGHTBURNE

Texas Co.; 1919; *Texas S.S. Co.*; 6,429 tons; 416-8x56-1x31-1; 556 n.h.p.; triple-expansion engines. The American tanker *Lightburne* was carrying petrol and kerosene from Port Arthur to Providence on February 10th, 1939, when she went ashore on Block Island, broke up and sank.

LIGHTNING

British Navy, destroyer; 1895; *Palmer*; 320 tons; 200x19x9; 4,000 i.h.p.; 27knots; triple-expansion engines; one 12pdr., five 6pdr., 2 T.T. The destroyer *Lightning*, Lieutenant Cavendish, was an old boat of 20 years service when she fell a victim to the German minelaying submarines. These vessels, known as UC-boats, carried from 12 to 18 mines and began their operations in June, 1915, by laying small minefields off the East Coast, the mouth of the Thames and round to the Straits of Dover. On June 30th, the *Lightning* struck one of these mines and foundered off the Kentish Knock lightship.

LIGHTNING

British Navy, destroyer; 1940; *Hawthorn Leslie & Co.*; 1,920 tons; 354x37x10; 48,000s.h.p.; 36-5 knots; turbine engines; 3-drum boilers; six 4 • 7 in. guns, one 4 in.A.A., 4 T.T. The destroyer *Lightning*, Cdr. H. G. Walters, D.S.C., was torpedoed and sunk by an Italian motor torpedo boat off the North African coast on March 12th, 1943. Two officers and 44 ratings were killed and eight ratings wounded.

LIGURIA

Rederi A/B Svenska Lloyd; 1914; *Lindholmens Verkstads A/B*; 1,751 tons; 283 x 43 x 16-4; 254 n.h.p.; triple-expansion engines. The Swedish steamship *Liguria* was torpedoed and sunk by a German submarine on March 29th, 1941, 600 miles E.S.E. of Cape Farewell on a voyage from the Clyde to Las Palmas. Eighteen of her crew were lost.

LIKA

Austrian Navy, destroyer; 1913; *Austria*; 800 tons; 265-7x25-7x8-2; 17,000 i.h.p.; 32 knots; turbine engines; *Yarrow* boilers; two 4 in. guns, six 12pdr., 4 T.T. On December 29th, 1915, an Austrian destroyer flotilla from Cattaro bombarded the Albanian port of Durazzo and sank a steamship and two sailing ships lying in the harbour, besides dropping a few shells inside the land batteries. The raiding force consisted of the light cruiser *Helgoland* under Capt. Seitz, commanding the flotilla, and the destroyers *Czepel*, *Tatra*, *Lika*, *Triglav* and *Balaton*. The ships left Cattaro just before midnight on the 28th and on their passage down the coast the *Balaton* rammed and sank the French submarine *Monge*, from which two officers and 25 men were saved. Durazzo, which was reached at 7.30 a.m. on the 29th, was found to be devoid of warship protection and the Austrians were able to carry out their bombardment unimpeded. On leaving the harbour the destroyer *Lika* struck two mines in quick succession and sank with most of her crew.

Shortly afterwards the *Triglav* also struck a mine but was taken in tow by the *Czepel*, which ship had the misfortune to get the tow rope foul of her screw, reducing her speed to 20 knots and compelling her to relinquish the tow. This was now undertaken by the *Tatra* and the flotilla returned to its base at the slow rate of six knots.

It was under these conditions that Capt. Seitz was surprised by a mixed force of British, Italian and French cruisers and destroyers. The *Triglav* was promptly scuttled and the flotilla fought a spirited retiring action until darkness and the near approach of Austrian battleships from Cattaro forced the pursuers to abandon the chase.

LILIAN DROST

Flinti, Drost & Co.; 1892; *Edward's S.B. Co.*; 1,961 tons; 275 -5 X 36- 7x16-6; 176n.h.p.; triple-expansion engines. The Danish steamship *Lilian Drost* struck a mine and sank in the North Sea on May 8th, 1915.

LILIAN MOLLER

Matter Line; 1913; *Sir J. Laing & Sons*; 4,866 tons; 390 x 50-6x28; 427 n.h.p.; triple-expansion engines. The British steamship *Lilian Moller*, on a voyage from Calcutta to London via the Cape, was torpedoed and sunk by a German submarine on November 18th, 1940, in the North Atlantic. There were no survivors.

LILLA

F. Degrossi; 1888; *T. Turnbull & Son*; 2,819 tons; 289 -2 x 38-3x20-8; 219n.h.p.; triple-expansion engines. The Italian steamship *Lilla* was torpedoed and sunk by a submarine in the Mediterranean on October 13th, 1917.

LILLIAN

A. H. Bull S.S. Co.; 1920; *Bethlehem S.B. Corp.*; 3,482 tons; 328x46-2x22-9; 292n.h.p.; triple-expansion engines. On February 26th, 1939, during a fog, the American ship *Lillian* carrying a cargo of sugar was in collision with the *Wiegland* and sank on the next day about 25 miles N.E. of Barnegat lightship.

LILLIAN LUCKENBACH

Luckenbach S.S. Co.; 1919; *Sun S.B. Co.*; 6,369 tons; 448-9X 60-2x28-2; 1,032n.h.p.; turbine engines. On March 27th, 1943, the American ship *Lillian Luckenbach* was in collision with the *Cape Henlopen* and sank in 36°58'N., 75° 25'W.

LILLIE

Pyman, Watson & Co.; 1875; *W. Gray & Co.*; 1,089 tons; 225 X 30x16- 7; 99 h.p.; compound engines. The British cargo ship *Lillie* foundered off the Eddystone lighthouse on December 15th, 1894. She was on a voyage from Cardiff to St. Malo carrying a cargo of coal.

LILLOIS

Cie. des Bateaux a Vap. du Nord; 1910; *C. Connell & Co.*; 3,681 tons; 349-6x45-9x27; 300 n.h.p.; triple-expansion engines. The French steamship *Lillois* was torpedoed and sunk by a submarine on March 28th, 1943, off Cape Scalea, Italy.

LILY

1840 (circa); 160 tons. The brig *Lily*, bound from Liverpool to Ambrazo on the coast of Africa, with a mixed cargo, including 60 tons of gunpowder, was driven ashore on the Calf of Man at about noon on Monday, December 24th, 1852. Of the crew of 14 the captain and four others were drowned. The wreck was taken over on the same day by Lloyd's Agent from Port St. Mary, Isle of Man. On Tuesday morning the wreck was discovered to be on fire, due either to incendiarism or carelessness.

At five minutes past eight there was a terrific explosion, the fire having reached the gunpowder, nearly all those working on the wreck or nearby being killed instantly. The death roll amounted to 30 persons, to whom must be added the five lost when the *Lily* drove ashore.

LILY

British Navy, gunboat; 1874; *R. Napier & Son*; 720 tons; 150x28-5x13-5; 830 i.h.p.; 10-6 knots; compound engines; two 4 ton guns, two 64 pdr., 2 m.g. The gunboat *Lily* was commissioned at Bermuda in January, 1888,

under Cdr. Gerald W. Russell, as a unit of the North American squadron. On September 16th, 1889, the vessel put out from St. Margaret's Bay, Newfoundland, with the intention of crossing the Straits of Belle Isle to Forteau Bay on the coast of Labrador. The weather was boisterous but clear at the outset but later a dense fog came on aggravated by the smoke from a forest fire on the Labrador shore. The steam whistle of the lighthouse on Point d'Amour was plainly heard on board *Lily* but owing to the strong on-shore wind the sound seemed two or three miles distant. At about 6 p.m. the navigating officer was in the act of taking soundings when the breakers on shore became audible. The ship was under sail and steam and the engines were immediately reversed but too late to save the vessel which crashed on the rocks and heeled over to starboard, breaking her back.

The boats were launched but after three had capsized in succession it was left to the crew to get ashore as best they could. Fortunately the water about the rocks was shallow and nearly everybody got ashore in safety. The weather was bitterly cold and the men suffered greatly from exposure. When a roll-call was made it was found that seven men had lost their lives.

LILY

N. G. Calvocoressis & E. Culucundis; 1900; *W. Gray & Co.*; 2,993 tons; 325-3x47-1x22-4; 264 n.h.p.; triple-expansion engines. The Greek cargo ship *Lily* was torpedoed and sunk by a submarine in the Mediterranean on December 31st, 1917.

LILY

D/S A/S Progress (Marius Nielsen & Son); 1920; *F. Schichau*; 1,281 tons; 224-3x33-6x13-5; 74 n.h.p.; triple-expansion engines. The Danish steamship *Lily* left Fowey on April 2nd, 1940, bound for Aarhus with china clay. Nothing was heard of her after leaving Kirkwall on the 25th.

LILY

Ch. N. Pateras; 1920; *Uchida S.B. & Eng. Co.*; 5,719 tons; 400x54-5x30; 513 n.h.p.; triple-expansion engines. The Greek steamship *Lily* was torpedoed and sunk by a German submarine on March 9th, 1942, on a voyage from Belfast to Halifax.

LILYADA

Lloyd Adriatico; 1902; *J. L. Thompson & Sons*; 3,738 tons; 362-9x48x25-8; 329 n.h.p.; triple-expansion engines. While on a voyage from Bona to Rotterdam carrying iron pyrites, the Italian ship *Lilyada* was involved in a collision with the Spanish steamship *Cabo Menor* on June 14th, 1925, and sank in 38° 55' N., 9°36'W.

LIMA

Pacific Steam Navigation Co.; 1907; *J. Brown & Co.*; 4,943 tons; 401 -3x52-2x25-8; 485 n.h.p.; 12knots; triple-expansion engines.

The liner *Lima*, Capt. Percy Jacob, left Liverpool for Callao on December 23rd, 1909. On February 5th, 1910, she ran ashore on Huamblin Island, in lat. 44° 45' S., long. 75° 12' W., in very rough weather. Her signals of distress were seen by the s.s. *Hatumet*, Capt. J. Peters, which stood by and assisted in the rescue of 205 persons, of whom 188 were passengers, including all the women and children. The first officer of the *Lima*, Mr. Isaac Nicholson, and the boatswain managed between them to get two boats under the stern of the vessel and to pass a line to those on board. By this means most of those rescued were hauled into the boats and taken to the *Hatumet*. During the night the rope became entangled with the rocks, capsizing Mr. Nicholson's boat with the loss of its crew of six.

The captain of the *Hatumet* seeing that he could serve no useful purpose by standing by made for Ancud with his 205 survivors, hoping to find a warship which might go to the scene of the wreck with a rocket apparatus.

On the following day a Chilean cruiser took off the 88 persons still on board the *Lima*.

LIMA

LIMA

Rederi A/B Nordstjernen; 1918; *Burmeister & Wain*; 4,959 tons; 364-1x51-5x22-1; 629 n.h.p.; oil engines. The Swedish motorship *Lima* was torpedoed and sunk by a German submarine on September 12th, 1942, off the west coast of Africa.

LIMA MARU

Nippon Yusen K.K.; 1920; *Mitsubishi Zpsen Kaisha*; 6,989 tons; 445 x 58 x 34; 620 n.h.p.; triple-expansion engines. The steamship *Lima Mam* was torpedoed and sunk by the U.S. submarine *Snook* on February 8th, 1944, about 50 miles S.W. of Nagasaki.

LIMBOURG

Cie. Nationale Beige de Transports Maritimes; 1938; *Soc. Anon. John Cockerill*; 2,483 tons; 307-6x45-2x27-7; 337 n.h.p.; oil engines.

The Belgian motorship *Limbourg*, on a voyage from Halifax to Aberdeen with phosphates, was torpedoed by a German submarine on March 29th, 1941, about 350 miles W.S.W. of the Vestmann Islands. The ship blew up and sank. Only two survivors were found.

LIMBOURNE

British Navy, destroyer; 1940; *Vickers-Armstrong*; 904 tons; 272-5x28-2x7-7; 19,000 s.h.p.; 27-5 knots; turbine engines; 3-drum boilers; four 4 in. A.A., 8 smaller.

The destroyer *Limbourne*, Cdr. W. J. Phipps, O.B.E., in company with the cruiser *Charybdis* and other vessels was engaged upon an offensive sweep off the French coast between Ushant and the Channel Islands on the night of Saturday, October 23rd, 1943. Visibility was poor and the ships ran into an enemy force of German torpedo boats which attacked them with torpedoes. *Charybdis* (which see) was sunk with heavy loss of life and *Limbourne* was torpedoed and rendered useless. One officer and 41 ratings were killed and the remainder were taken off by ships in company, after which the destroyer was sunk.

LIMERICK

Union Steamship Co. of New Zealand; 1898; *Workman Clark & Co.*; 6,827 tons; 420x54-2x29-5; 558 n.h.p.; 12 knots; triple-expansion engines.

The liner *Limerick* was torpedoed and sunk by a German submarine on May 28th, 1917, 140 miles W. i S. of the Bishop Rock, Scilly Isles. Eight of her crew were killed.

LINA

Navigazione e Commercio Soc. Anon. Italiana; 1909; *Armstrong Whitworth & Co.*; 1,235 tons; 208x34x17-5; 136 n.h.p.; triple-expansion engines.

The Italian tanker *Lina* was bombed and sunk by British aircraft on December 17th, 1941, about 80 miles N.W. of Tripoli.

LINA MATKOVIC

E. Matkovic; 1914; *Nuscke & Co.*; 2,325 tons; 291-4x41-5x17; 224 n.h.p.; triple-expansion engines.

The Yugoslav steamship *Lina Matkovic*, on a voyage from New Orleans to Cristobal, struck a mine and sank on June 21st, 1942, at the entrance to Cristobal. Five of her crew were killed.

LINARIA

Stag Line; 1924; *Sunderland Shipbuilding Co.*; 3,385 tons; 331 X48x23-2; 249 n.h.p.; 10 knots; triple-expansion engines.

The steamship *Linaria*, Capt. H. T. Speed, left Loch Ewe on February 20th, 1941, bound for Halifax. She was last heard of on the 24th, after which no further news of her came to hand. Presumably she was lost by enemy action. The *Linaria* carried a crew of 35.

LINCE

Italian Navy, torpedo boat; 1938; *Quarnaro*; 679 tons; 267x26x7-7; 19,000 s.h.p.; 34 knots; turbine engines; 3-drum boilers; three 3-9 in. guns, two 37 mm. A.A., two 13 mm., 4 T.T. The torpedo boat *Lince* was torpedoed and sunk by the British submarine *Utor* in the Gulf of Taranto on August 28th, 1943. The vessel carried a complement of about 100.

LINDA

John Ridley, Son & Tully; 1873; 1,342 tons; 242-6x32-4x17-4; 121 h.p.; compound-inverted engines.

The British cargo ship *Linda* was torn from her moorings and wrecked in a heavy gale at Civita Vecchia on January 20th, 1881. She had just arrived from the Tyne carrying a cargo of coal. No survivors were reported.

LINDEN

Robert Thorman; 1877; *Short Bros.*; 1,068 tons; 218 -3 X 31X17-5; 99 h.p.; compound engines.

The British cargo ship *Linden* was wrecked at Sunderland on January 29th, 1888, while on a voyage in ballast from London to Sunderland.

LINDENHALL

West Hartlepool Steam Navigation Co.; 1937; *W. Gray & Co.*; 5,248 tons; 439x56-1x26; 548 n.h.p.; 10-5 knots; triple-expansion engines & LP. turbine.

The steamship *Lindenhall*, Capt. F. Kjelgaard, was torpedoed and sunk by a German submarine on November 7th, 1942, about 50 miles W. by S. of the island of Grenada, British West Indies. Forty-two men, including Capt. Kjelgaard, were killed.

LINDISFARNE

E. R. Newbiggin; 1870; *T. & W. Smith*; 1,151 tons; 244-7X30-6x17-5; 99 n.h.p.; compound engines.

The British cargo ship *Lindisfarne* sank after a collision off the Hook of Holland on January 3rd, 1908. She was on a voyage from Methil to Rotterdam carrying a cargo of coal.

LINDISFARNE

Tyne-Tees S.S. Co.; 1925; *Hawthorn, Leslie & Co.*; 999 tons; 231 - 3 X 35 • 1X14 • 3; 240 n.h.p.; triple-expansion engines. The steamship *Lindisfarne*, on a voyage from London to the Tyne, was torpedoed and sunk by a German motor torpedo boat on December 12th, 1942, off Lowestoft. The captain, nine crew and six gunners were lost.

LINDUS

Huddart, Parker & Co.; 1881; *E. Withy & Co.*; 1,679 tons; 257-4x34-6x17-8; 178 n.h.p.; compound engines. The

Australian cargo ship *Lindus* was wrecked on Oyster Bank, Newcastle, N.S.W., on June 4th, 1899, while on a voyage from Newcastle, N.S.W. to Port Adelaide carrying a cargo of coal and coke.

LINDVANGEN

Skibs AIS Karaibien; 1931; *International S.B. & E. Co.*; 2,412 tons; 291 -2x45-7x18-5; 229 n.h.p.; compound engines.

The Norwegian steamship *Lindvangen* was torpedoed and sunk by a German submarine on September 23rd, 1942, off Trinidad. Fifteen of her crew were killed.

LINGFIELD

Finchley S.S. Co.; 1917; *Lobnitz & Co.*; 1,002 tons; 195x35-5x14-4; 151 n.h.p.; triple-expansion engines. The British cargo ship *Lingfield* sank after a collision with the *Ubari* in 52° 28' N., 2° 02' E., on October 17th, 1941. She was carrying a cargo of coal on a voyage from the Tyne to Portsmouth.

LINK ONE

Associated Anglo-Scandinavian Shpg.; 1953; *Trondhjems Mek. Verksted*; 2,088 tons; 323-8x44x19-9; compound engines. The British cargo ship *Link One* sank after a collision with the *Pulkovo* during fog on December 5th, 1962, in 54° 27' N., 12° 12' E., while on a voyage from Monstera to Rochester carrying a cargo of wood pulp.

LINKMOOR

W. Runciman & Co.; 1913; *J. Blumer & Co.*; 3,175 tons; 331 X47-7x22-5; 291 n.h.p.; triple-expansion engines. The British cargo ship *Linkmoor* was wrecked at Skarfskerry Head, Brough Bay, on November 10th, 1930, while on a voyage in ballast from Liverpool to Blyth.

LINWOOD

A. Holland & Co.; 1883; *C. S. Swan & Hunter*; 2,525 tons; 316-7x38-1x24-7; 275hp.; *compoundinverted engines*. The British cargo ship *Linwood* was wrecked at Maldonado on September 18th, 1884, while on a voyage from Buenos Aires to Falmouth carrying a cargo of maize.

LINWOOD

Joseph Constantine S.S. Line; 1932; *Burntisland Shipbuilding Co.*; 992 tons; 199-9x33-7x12-4; 500i.h.p.; 9-25 knots; *triple-expansion engines*.

The steamship *Linwood*, Capt. Bainbridge, was mined and sunk a quarter of a mile E. of Longsand Buoy, Thames Estuary, on November 15th, 1942. Six men were killed and one wounded. Capt. Bainbridge was among the survivors.

LIPARI

Chargeurs Reunis; 1922; *Ateliers & Chantiers de la Loire*; 9,954 tons; 478-5x59-2x27-4; *turbine engines*.

The French steamship *Lipari* was shelled by Allied warships at Casablanca on November 8th-11th, 1942. She caught fire, broke in two and sank.

LIPPE

NorddeutscherLloyd; 1917; *Bremer Vulkan*; 7,449 tons; 475-3x60-7x32-9; 817 n.h.p.; *triple-expansion engines*. The German steamship *Lippe* was torpedoed and sunk by a British submarine on March 7th, 1944, off Namsos, Norway.

LIRA

Italian Navy, torpedo boat; 1937; *Quarnaro*; 679 tons; 267X 26x7-7; 19,000s.h.p.; 34 knots; *turbine engines*; 3-drum boilers; three 3-9 in. guns, four 37 mm.A.A., two 13 mm.A.A., 4TT.

The torpedo boat *Lira* was scuttled at Spezia on September 9th, 1943, the day after the capitulation of Italy. She was raised and recommissioned by the Germans but was bombed and sunk by British aircraft on October 4th, 1944. The vessel carried a complement of about 100.

LIRO

Tallinna Laevauhisus A/S; 1876; *M. Pearse & Co.*; 1,333 tons; 250-6x32-5x18-5; 131 n.h.p.; *compound engines*. The Estonian ship *Liro*, with three passengers and 17 crew, left Hull on December 10th, 1931, for Tallinn. She did not arrive and it was assumed that she had foundered in stormy weather. Wreckage was washed ashore in the Memel area.

LIRQUEN

Herman Ossa Polanco; 1891; *Lobnitz & Co.*; 1,811 tons; 255-4x35-6x21-2; *triple-expansion engines*. The Chilean ship *Lirquen* had been sold for breaking up, but she had been re-commissioned to take 500 tons of manganese ore from Coquimbo to San Vicente. On June 18th, 1950, she struck a reef at Pajaros Rocks abreast of Tortuga lighthouse and foundered in deep water.

LISA

German Government; 1922; *Stabilimento Tecnico*; 5,343 tons; 404-2x54x29; 600 n.h.p.; *turbine engines*. The steamship *Lisa* was formerly the Italian *Livenza*, taken over by the Germans. On February 22nd, 1944, she was torpedoed and sunk by a British submarine near Candia, Crete.

LISBETH

K. Knutsen; 1915; *Bergens Mek. Varks*; 1,621 tons; 244-5X 37-6x15-7; 138 n.h.p.; *triple-expansion engines*. The Norwegian cargo ship *Lisbeth* was sunk by a German submarine in the North Sea on March 31st, 1917.

LISBETH M

Metcalf Motor Coasters; 1953; *DeHaan & Oerlemans*; 939 tons; 218-1x33-1x14-3; *oilengines*.

The British cargo ship *Lisbeth M* sank after a collision with the *Sir John Snell* in foggy weather off Margate on April 4th, 1957. She

was carrying a cargo of stone from Plymouth to London. Five of her crew of fourteen were lost.

LISBOA

Empreza Nacional de Navegacao; 1910; *D. & W. Render son & Co.*; 7,459 tons; 432-6x54-1x34-7; 947n.h.p.; 14 knots; *triple-expansion engines*.

The Portuguese liner *Lisboa* left Lisbon on October 1st, 1910, for Mozambique with 300 persons on board. On Sunday night, the 23rd, at just before 11 o'clock she struck on the Soldier's Reef, near Paternoster, about 100 miles from Cape Town. The sea was calm and all the boats save one were lowered without mishap. The falls of this particular one broke while it was being lowered, with the result that seven persons were drowned, among whom was the chief engineer, Mr. Brown, a British subject.

No other fatalities occurred and the passengers and crew got safely ashore. The occasion was the first on which wireless was used on the South African coast. The *Lisboa* sent out a call when she struck which was picked up by the steamship *Adolf Woermann*, which was in dock at Cape Town, and the British cruiser *Hermes* was immediately dispatched to the scene of the disaster.

LISBOA

Oldenberg-Portugiesische Dampfs. Rhed.; 1911; *Schiffsw. v. Henry Koch*; 1,799 tons; 277-7x39-2x17-9; 163n.h.p.; *triple-expansion engines*.

The German steamship *Lisboa* was torpedoed and sunk by a British submarine on January 31st, 1943, about four miles from Susa.

LISBON MARU

Nippon Yusen K.K.; 1920; *Yokohama Dock Co.*; 7,053 tons; 445x58x34; 632 n.h.p.; *triple-expansion engines*. The liner *Lisbon Maru* was taken over by the Japanese Navy for service as a transport. On October 1st, 1942^a she was torpedoed and sunk by the U.S. submarine *Grouper* about 100 miles off Ningpo.

LISCOMBE BAY

United States Navy, aircraft carrier; 1943; *United States*; 6,730 tons; 498x80x19-7; 11,200 i.h.p.; 18 knots; *Skinner-Unaflow engines*; one 5 in. gun, twenty-four 20 mm. A.A.

The aircraft carrier *Liscombe Bay*, Capt. I. D. Wiltsie, was the flagship of Rear-Admiral H. M. Mullinnix who was escorting transports to Tarawa and Makin islands in the Gilberts group. On November 24th, 1943, the vessel was torpedoed and sunk by a Japanese submarine as she was approaching Makin Island. She carried a complement of 1,500, of whom Rear-Admiral Mullinnix, Capt. Wiltsie and a large number of officers and ratings were killed.

LISE

S. Holter-Sorensen; 1931; *W. Doxford & Sons*; 6,826 tons; 416-2x58x32-8; 598 n.h.p.; *oilengines*.

The Norwegian tanker *Lise* was torpedoed, shelled and sunk by a German submarine on May 12th, 1942, off Curacao, inward bound from Southampton. Twelve of her crew were lost.

LISE

W. Rostedt; 1920; *Limhamns Skeppsv. A/B*; 1,442 tons; 251-8x38x16-1; *triple-expansion engines*.

The Finnish ship *Lise* struck a mine and sank on March 3rd, 1955, in Aalborg Bay, ten miles S. of Laeso.

LISMORE

J. Cornfoot & Co.; 1885; *C. Cornell & Co.*; 1,676 tons; 255X 39x22-9.

The sailing ship *Lismore* was bound from Melbourne to Talcahuario, with wheat. On May 29th, 1906, she was wrecked at Santa Maria, Chile, with the loss of 22 of her crew of 26.

LISMORE

City of Cork Steam Packet Co.; 1905; *Gourlay Bros.*; 1,305 tons; 260-3x35-6x17-2; 227 n.h.p.; 12 knots; *triple-expansion engines*.

The steamship *Lismore* was torpedoed and sunk by a German submarine 22 miles N.W. by N. i N, of Havre on April 12th, 1917. Five persons were killed. The captain was among the survivors.

LISSA

LISSA

Clydesdale Shipowners Co.; 1927; *R.Duncan & Co.*; 1,511 tons; 254 X 39 - 2 x 17 - 4; 207 n.h.p.; triple-expansion engines. The British cargo ship *Lissa* was lost without trace on a voyage from Milford Haven to Lisbon, carrying a cargo of coal. She left Milford Haven on September 11th, 1941 and the last report of her was received on September 21st. The ship had a crew of 21 and five gunners.

LISTO

Herlof Andersens Rederi A/S; 1918; *Port Arthur S.B. Co.*; 1,998 tons; 251 • 3 x 43 • 7X 20 • 6; 278 n.h.p.; triple-expansion engines.

The Norwegian steamship *Listo*, under German control, struck a mine and sank on February 16th, 1943, in the Storebelt.

LITTLE

United States Navy, destroyer; 1944; *United States*; 2,050 tons; 376-5X39-5X-; 60,000 s.h.p.; 35-5 knots; turbine engines; five 5 in. guns, four 40 mm., four 20 mm., 10 T. T. The U.S. destroyer *Little* was bombed and sunk by Japanese aircraft off Okinawa on May 3rd, 1945. The vessel carried a complement of over 250.

LITTLE BECK

Groves, Maclean & Co.; 1877; *J. Readhead & Co.*; 1,175 tons; 235 x 31 - 1 x 17 - 4; 100 h.p.; compound-inverted engines. The steamship *Little Beck* was wrecked near the mouth of the Maas on October 26th, 1884, on a voyage from Ibrail to Rotterdam with rye. Twelve of the crew of 18 were lost.

LITTLE GEM

E. Stephens & Co.; 1893; *W. Date & Sons*; 114 tons; 84-9X 21-8x10-8.

The wooden schooner *Little Gem* was reported to have been torpedoed and sunk by a German submarine off the Channel Islands on December 13th, 1917. The captain and crew of four were killed.

LIU HSING

Japanese Government; 1,076 tons. The steamship *Liu Hsing* was formerly a Chinese armed lighthouse tender, seized by the Japanese. She was bombed and sunk by U.S. land-based aircraft on January 24th, 1944, off Santuao, China.

LIVADIA

Cay, Hall & Co.; 1877; *J. Readhead & Co.*; 1,447 tons; 255 x 32-5x23; 140 h.p.; compound-inverted engines. The British cargo ship *Livadia* was wrecked on Middle Cross Sand on February 28th, 1882, while on a voyage from the Tyne to Alexandria carrying a cargo of coal. All on board were lost except the boatswain, who was picked up by the Gorleston lifeboat.

LIVADIA

Deutsche Ost-Afrika Linie; 1923; *Schiffs-Dockbauwerke Flender A.G.*; 3,094 tons; 337-7x48-2x21-1; 246n.h.p.; triple-expansion engines.

The German steamship *Livadia* was shelled and sunk by British coastal batteries on October 3rd-4th, 1943, off Boulogne.

LIVANOS

M.G.Livanos; 1894; *R. Stephenson & Co.*; 3,355 tons; 344-6 x 43-1x18-8; 448 n.h.p.; triple-expansion engines. The Greek ship *Livanos* was sailing from Follonica to Hamburg with iron ore. She was wrecked at Chapelet in the Strait of Bonifacio on August 27th, 1923.

LIVELY

British Navy, gunboat; 254 tons; 60 n.h.p.; steam engines; one 68 pdr. gun, one 32 pdr.

The gunboat *Lively*, Lt. W. Walsh, was wrecked off the Dutch coast on December 23rd, 1863. The number lost is not known.

LIVELY

British Navy, despatch vessel; 985 tons; 1,460 i.h.p.; steam engines; 2 guns.

The naval paddle steamer *Lively*, Cdr. A. A. C. Parr, was wrecked off Stornoway on June 7th, 1883. There was no loss of life.

LIVELY

British Navy, destroyer; 1939; *Cammell Laird*; 1,920 tons; 354x37x10; 45,000 s.h.p.; 36-5 knots; turbine engines; six 4-7 in. guns, 8 T.T.

On the afternoon of May 11th, 1942, a division of destroyers consisting of *Lively*, Lt. Cdr. W. F. E. Hussey, D.S.O., D.S.C., *Jackal*, *Jervis* and *Kipling*, was patrolling between Crete and Libya when it was attacked by German aircraft. The *Lively* was hit while steaming at full speed and turned over and sank in four minutes, taking with her Lt. Cdr. Hussey and 64 ratings. The remainder of her company was picked up by *Jervis* and *Kipling*.

The only ship of the division to escape was *Jervis*, *Kipling* and *Jackal* both sinking from bomb hits later in the day. The total loss of life in this action was three officers and 95 ratings.

LIVERPOOL MARU

Kokusai Kisen K.K.; 1919; *Kawasaki Dockyard Co.*; 5,865 tons; 385 x 51 x 36; 440 n.h.p.; triple-expansion engines. The steamship *Liverpool Maru* was torpedoed and sunk by the U.S. submarine *Snook* on July 4th, 1943, 150 miles E. of Shipu, East China Sea.

LIVINGSTON

Bowater's Newfoundland Pulp & Paper Mills; 1928; *Armstrong, Whitworth & Co.*; 2,140 tons; 253x43-7x19-3; 190 n.h.p.; triple-expansion engines.

The Canadian steamship *Livingston* was torpedoed and sunk by a German submarine on September 3rd, 1944, 80 miles E. of Cape Breton on a voyage from Boston to St. John's, N.F.L. Thirteen of her crew and one gunner were killed.

LIVONIA

J. Cormack & Co.; 1880; *Aitken & Mansel*; 983 tons; 209 -6 X 29-4x13-9 ; 117 n.h.p.; compound engines. The British steamship *Livonia* sank after a collision off Oeland on October 10th, 1895, with the steamship *Napier*, 1,927 tons. The *Livonia* was on a voyage from Grangemouth to Riga carrying a general cargo. Eleven of her crew were lost.

LIVONIA

Shipping Controller (Lambert Bros.); 1904; *Howaldtswerke*; 1,879 tons; 285-5x42-2x17-6; 180 n.h.p.; 8 knots; triple-expansion engines.

The steamship *Livonia* was torpedoed and sunk by a German submarine four miles E. by N. \ N. of Start Point on December 3rd, 1917. Twenty-three men, including the captain, were killed.

LIVORNO

Rob. M. Sloman, Jr.; 1924; *Akt. Ges. Neptun*; 1,829 tons; 287- 1x41-3x16-7; 191 n.h.p.; triple-expansion engines. The German steamship *Livorno* was torpedoed and sunk by a British submarine on September 11th, 1941, about 24 miles from Benghazi.

LIZZIE

Peter Rowe & Sons; 1876; *T. Turnbull & Son*; 1,405 tons; 252-9x33-7x19; 126 h.p.; compound engines. The British cargo ship *Lizzie* was wrecked at St. Nazaire on January 1st, 1892, while carrying a cargo of coal from Cardiff to St. Nazaire.

LIZZIE BELL

P. Iredale & Porter; 1877; *R.Thompson*; 1,070 tons; 214-5 X 34-4x21-3.

The iron barque *Lizzie Bell*, Capt. J. Rees, left Wellington for Newcastle, N.S.W., in ballast, on 24th July, 1901. The weather was fine with favourable winds when, at about 11 p.m. with all sail set and running at 12 knots, the vessel struck on a rock a mile or two distant from the mouth of the Oeo river.

So violent was the crash that two of the crew were flung overboard on to the rocks below and killed. There seemed to have been

difficulties with the boats, and only one is mentioned as having been available to the crew. This boat capsized twice, drowning six men, while four other occupants died from exposure, making a loss of 12 from a complement of 18. The captain was among the survivors, all of whom suffered terribly from exposure.

LIZZIE C. TROOP

H. D. Troop & Son; 1873; S. J. King; 1,391 tons; 198x39-1x24.

The sailing ship *Lizzie C. Troop*, Capt. B. G. Fownes, left Nagasaki for Puget Sound on September 15th, 1890. She carried a crew of 23 and the captain's wife and son. On the 22nd she was caught in a cyclone and driven ashore on the Loochoo Islands.

Capt. Fownes, with his son and ten of the crew, was lost. Mrs. Fownes and 12 others were saved. The survivors suffered much injury from the sharp edges of the coral reefs and landed badly cut and bruised. Capt. Fownes was washed ashore, but died immediately afterwards.

The Loochoo Islanders, who had never seen Europeans before, treated the shipwrecked people with great kindness. After a stay of about a fortnight the natives took them in their boats to an island 106 miles distant. From here they were taken by ship to Japan. A gift of 250 dollars was later made to the islanders as a reward for their humane conduct.

LLANASHE

Evan Thomas Radcliffe & Co.; 1936; Bartram & Sons; 4,836 tons; 417 • 8 x 56 • 6 X 25 -1; 348 n.h.p.; 10 knots; triple-expansion engines & L.P. turbine.

The steamship *Llanashe*, Capt. James Parry, was torpedoed and sunk by a German submarine off Port Elizabeth on February 17th, 1943. Twenty-eight men, including Capt. Parry and three naval gunners, were killed.

LLANDAFF CASTLE

Union-Castle Mail S.S. Co.; 1926; Workman, Clark & Co.; 10,799 tons; 471-2x61-7x39-2; 1,086n.h.p.; 14 knots; triple-expansion engines.

The liner *Llandaff Castle*, Capt. C. J. Clutterbuck, was torpedoed and sunk by a submarine 100 miles S.E. of Lourenco Marques on November 30th, 1942. The vessel was serving as a troopship and had taken part in the Madagascar landings, being mainly employed on the East African coast and the Red Sea. Three lives were lost.

LLANDILO

Evan Thomas Radcliffe & Co.; 1928; Bartram & Sons; 4,966 tons; 400-2x53-4x26; 460n.h.p.; triple-expansion engines. The steamship *Llandilo*, Capt. William R. Burgess, was torpedoed and sunk by a German submarine on November 2nd, 1942, about 1,200 miles W. of the coast of South-West Africa. Twenty-one men, including Capt. Burgess and three gunners, were killed.

LLANDOVERY CASTLE

Union-Castle Mail S.S. Co.; 1914; Barclay, Curie & Co.; 11,423 tons; 500-1x63-3x37-2; 1,135n.h.p.; 13 knots; quadruple-expansion engines.

In December, 1915, the *Llandoverly Castle* was taken over by the government as a transport and was employed in carrying troops to France. On one occasion when conveying German prisoners it was discovered that these had contrived to set the ship on fire. Fortunately the vessel was near Dover and with the help of the naval and local fire brigades the fire was extinguished. In September, 1917, she was transferred to the hospital service.

On June 20th, 1918, she left Halifax, N.S., for Liverpool with 258 persons, of whom 94 were medical officers and nurses of the Canadian Medical Service. At 9.30 on the evening of June 27th, while clearly displaying her illuminated Red Cross sign, she was torpedoed without warning and sank in ten minutes. Her position at the time was about 114 miles W. of Fastnet. Capt. Sylvester, in command, got his boats away as quickly as conditions would allow. The weather was fine and rescue within the next few hours was reasonable expectation. This hope was dashed when the submarine surfaced and deliberately fired 12 rounds at the lifeboats. At dawn only one containing 24 survivors remained afloat.

The submarine was the *U-86* commanded by Capt. Patzig.

Of those on board the *Llandoverly Castle* 234 persons lost their lives, Capt. Sylvester was among the 24 survivors.

LLANISHEN

Evan Thomas Radcliffe & Co.; 1929; Bartram & Sons; 5,053 tons; 400-5x54x25-9; 460 n.h.p.; 10 knots; triple-expansion engines.

The steamship *Llanishen*, Capt. John E. Thomas, was bombed and sunk by German aircraft on August 23rd, 1940, about 30 miles due N. of Banff. Eight men were killed. Capt. Thomas was among the survivors.

LLANQUIHUE

S.A. Comm. BraunyBlanchard; 1893; Harland & Wolff; 3,590 tons; 360-6x43-2x27-3; 302n.h.p.; triple-expansion engines.

The Chilean ship *Llanquihue* was wrecked on September 2nd, 1928, in the English Narrows, Magellan. She was on a voyage from Valparaiso to Buenos Aires.

LLANWERN

Evan Thomas Radcliffe & Co.; 1928; Bartram & Sons; 4,966 tons; 400-2x53-4x26; 460n.h.p.; 10 knots; triple-expansion engines.

The steamship *Llanwern*, Capt. D. James, was bombed and sunk by German aircraft on February 26th, 1941, in convoy about 300 miles W. of Blacksod Bay, Co. Mayo. Capt. James, 24 of the crew and two gunners were killed.

LLEWELLYN HOWLAND

Danlan S.S. Corpn.; 1888; Armstrong, Mitchell & Co.; 2,748 tons; 283-1x40-3x30-3; 210n.h.p.; triple-expansion engines.

The American tanker *Llewellyn Howland* went ashore on April 21st, 1924, on Brentons Reef while on a voyage from Fall River to Portland, Me.

LLONGWEN

W. & C. T. Jones Steamship Co.; 1907; Richardson Duck & Co.; 4,683 tons; 369-2x50-9x27-6; 361 n.h.p.; 10 knots; triple-expansion engines.

The steamship *Llongwen* was shelled and sunk by a German submarine 90 miles N.E. of Algiers on July 18th, 1916. Fourteen men were killed. The captain was among the survivors.

LLWYNGWAIR

HarrisBros. & Co.; 1913; Antwerp Engineering Co.; 1,304 tons; 229-2x35-7x14-7; 156n.h.p.; 8 knots; triple-expansion engines.

The steamship *Llwyngwair* was torpedoed and sunk by a German submarine five miles S.S.E. of Seaham Harbour on April 26th, 1918. Eight men, including the captain, were killed.

LOANDA

Elder, Dempster & Co.; 1891; Naval Construction & Armaments Co.; 2,702 tons; 327-6x39-4x22; 253 n.h.p.; triple-expansion engines.

The British cargo ship *Loanda* sank after a collision with the Russian s.s. *Junona* on May 31st, 1908, nine miles east of the North Goodwin Light. She was on a voyage from Hamburg to the west coast of Africa carrying a general cargo.

LOASSO

Polena Soc. di Nav.; 1921; Ansaldo San Giorgio; 5,968 tons; 394-3x51-7x35-1; 862n.h.p.; oil engines. The Italian motorship *Loasso* struck a mine and sank on June 26th, 1940, about three miles off Gargano.

LOCHARD

General Shipping Co.; 1873; Chas. Cornell & Co.; 1,693 tons; 262-7x38-3x23.

The ship *Loch Ard* was unfortunate from first to last. On her maiden voyage she lost her masts when scarcely out of sight of land. She made a fresh start on January 26th, 1874, but was again dismasted. Her crew got her under jury rig and she made Hobson's Bay 118 days after leaving England.

On her third voyage the ship was bound for Australia under Capt. Gibb, who was a stranger to the seas of the Antipodes. She left

LOCH LOMOND

Gravesend on March 2nd, 1878, and after an uneventful voyage of some 90 days she went ashore at Curdles Inlet, 27 miles from Cape Otway, Victoria.

The wreck occurred between five and six o'clock on the morning of June 1st, and of the 52 persons on board only two were saved, these being Thomas Pearce, an apprentice, and a passenger Miss Carmichael who was rescued by Pearce.

LOCH LOMOND

Union Steamship Co. of New Zealand; 1870; J. G. Lawrie; 1,249 tons; 226-3x35-8x21-5.

The barque *Loch Lomond*, Capt. J. F. Thompson, left the Clyde on December 20th, 1907 for Lyttelton, New Zealand. The vessel had been recently acquired by the Union Steamship Co. which proposed to use her as a training hulk for the company's cadets. She was at Melbourne from the beginning of April until mid-June, 1908 and then went on to Newcastle, N.S.W., sailing from that port on July 16th, bound for Lyttelton.

She was never seen again and was supposed to have foundered off the N.W. coast of North Island, New Zealand, on or about September 16th. Wreckage from her was widely distributed, life-buoys being picked up as far away as the New Hebrides, and other items off Great Barrier Island and Cape Maria Van Diemen.

The *Loch Lomond*, which carried a crew of 19, had been known in her day as 'the Scottish Man-o-War' because of her smart appearance when under command of Cdr. Grey, R.N.R.

LOCH LONG

General Shipping Co.; 1876; J. & G. Thomson; 1,261 tons; 228-5x35-8x21-3.

The barque *Loch Long*, Capt. J. Strachan, sailed from New Caledonia on April 29th, 1903, bound for the Clyde with nickel ore, but never arrived. It was assumed that she had foundered with all hands on the Chatham Islands as wreckage was afterwards found there.

LOCH MAREE

Glasgow Shipping Co.; 1873; Barclay Curie & Co.; 1,657 tons; 255-8x38-6x22-9.

The sailing ship *Loch Maree* left Geelong on October 29th, 1881, homeward bound. On the next day she was spoken by the *Gerfulcon* off Kent's Group. This was the last seen of her and the cause of her loss has never been discovered.

LOCH MAREE

Dundee Loch Line; 1890; Palmers'Co.; 2,629 tons; 312-5X 40-3x23-9; 248 n.h.p.; triple-expansion engines. The steamship *Loch Maree*, homeward bound from Odessa with grain, ran into a storm on October 1st, 1903. The cargo shifted and the vessel took a heavy list to port. The crew and the only passenger put off in two boats and were hardly clear of the ship when she turned over and sank. One of the boats with ten persons was swamped by a large wave and the men were drowned. The other boat with 16 men managed to keep afloat until picked up by the Dutch steamship *Olanda*.

LOCH MOIDART

General Shipping Co.; 1881; Barclay, Curie & Co.; 2,081 tons; 287-4x42-6x24.

The iron four-masted barque *Loch Moidart*, on a voyage from Pisagua to Hamburg, was driven ashore at Callandzoo, near Dieppe, on January 27th, 1890. Thirty of her crew were drowned. There were only two survivors.

LOCH RANZA

Glasgow United Shipping Co.; 1934; A. Stephen & Sons; 4,958 tons; 415x56-2x25-5; 382 n.h.p.; compound engines. The British steamship *Loch Ranza* was bombed and set on fire by Japanese aircraft on February 3rd, 1942, on a voyage from Singapore to Batavia. The burning ship was beached and blew up shortly afterwards. Five men were killed on board and two others died in hospital at Palembang.

LOCH SLOY

Glasgow Shipping Co.; 1877; D. & W. Henderson; 1,280 tons; 225-5x35-6x21-2.

The barque *Loch Sloy*, Capt. P. Nicol, was on passage from Glasgow to Adelaide and Melbourne with a general cargo when she met with disaster on the coast of Kangaroo Island at the mouth of the Gulf of St. Vincent, South Australia. The ship overran her distance when trying to pick up the light at Cape Borda. She was too close inshore and the light was hidden by the cliffs between Cape Bedout and Cape Couldie. In the darkness of the morning of April 24th, 1899, she ran full on to the Brothers Rocks, about 300 yards from the shore. She was dismasted and swept by huge seas and there was little opportunity for her crew to save themselves.

A few of the men with seven saloon passengers took refuge in the rigging but the masts went almost immediately, drowning all who clung to them. Four persons, a passenger, two seamen and an apprentice managed to struggle ashore. They were many miles from a settlement and were forced to subsist on shell fish and dead penguins cast up by the sea. Two of the party walked to Cape Borda lighthouse and one reached May's Settlement, but a passenger who was too ill to walk died from exposure.

Of a complement of about 34 persons only these three survived.

LOCH VENNACHAR

Glasgow Shipping Co.; 1875; J. & G. Thomson; 1,552 tons; 250-1x38-3x22-4.

The iron sailing ship *Loch Vennachar*, Capt. W. S. Hawkins, was bound from Glasgow to Adelaide with a general cargo in September 1905. On the 6th of the month she was spoken by the steamship *Yongala* 160 miles W. of Neptune Island, after which nothing was heard of her. On the 29th the ketch *Annie Win* reported on her arrival at Adelaide that she had picked up a reel of blue printing paper 18 miles N.W. of Kangaroo Island. As a consignment of paper had been part of the *Loch Vennachar's* cargo it was assumed that it came from that vessel.

A search was made and a quantity of wreckage was found on Kangaroo Island in the neighbourhood of the Backstairs Passage, the ship having presumably struck the Young Rocks and gone down with all hands.

LOCHAVON

Royal Mail Lines; 1938; Harland & Wolff; 9,205 tons; 477-7X 66-3x30-2; 2,052 n.h.p.; oilengines.

The British motorship *Lochavon* was torpedoed and sunk by a German submarine on October 14th, 1939, about 200 miles W. of the Bishop Rock on a voyage from Vancouver to Liverpool.

LOCHKATRINE

Royal Mail Lines; 1922; J. Brown & Co.; 9,419 tons; 485-4X 62-3x35-8; 1,317n.h.p.; oilengines.

The British motorship *Lochkatrine*, on a voyage from Liverpool to New York, was torpedoed by a German submarine 300 miles E. of St. Johns', N.F.L., on August 3rd, 1942, and sank some time later. Eight of her crew and one passenger were lost.

LOCKSLEY HALL

Hall Line; 1893; W. Denny & Bros.; 3,635 tons; 345x44-1x 27-3; 329 n.h.p.; 11 knots; triple-expansion engines. The steamship *Locksley Hall* was torpedoed and sunk by a German submarine 30 miles S.E. by S. of Malta on May 12th, 1917. Six men were killed. The captain was among the survivors.

LODES

M. A. Morris & Co.; 1898; R. Williamson & Son; 396 tons; 153-6x23-7x8-9; 60 r.h.p.; 8-5 knots; compound engines. The steamship *Lodes* was mined and sunk four miles S.E. of Ballycotton on May 5th, 1917. The captain and six men were killed.

LODEWIJK VAN NASSAU

Koninklijke West-Indische Maatschappij; 1913; W. Hamilton & Co.; 3,350 tons; 342-2x44-3x25-3; 494 n.h.p.; triple-expansion engines.

The Dutch steamship *Lodewijk van Nassau* was bound from Chile to Rotterdam. On April 20th, 1916, when nearing the end of her voyage, she struck a mine laid by the German minelaying submarine *UC-L*. She sank near the Galloper lighthouse with the loss of five lives.

LODOLETTA

Giovanni Gavarone; 1904; W. Dobson & Co.; 2,822 tons; 327X43-8x21-3; 311 n.h.p.; triple-expansion engines. The Italian steamship *Lodoletta* was bombed and sunk by British aircraft on August 3rd, 1940, off Derna, Libya.

LOFARO

F. Lofarodi P.; 1876; F. Sirello; 721 tons; 159-8x30-1x21. The Italian barque *Lofaro*, on a voyage from Hamburg to Cardiff in ballast, was wrecked in heavy weather on February 2nd, 1902, off St. Martin's Head, Scilly Isles. All on board were lost.

LOFOTEN

Shipping Controller (W. Coupland & Co.); 1913; Akers Mek. Vcerks.; 942 tons; 185x30-2x20-5; 88 n.h.p.; 8 knots; triple-expansion engines.
The steamship *Lofoten* was torpedoed and sunk by a German submarine seven miles S.E. by E. of Start Point on February 3rd, 1918. Seventeen men were killed. The captain was among the survivors.

LOGAN VICTORY

United States War Shipping Administration; 1945; Oregon S.B. Corp.; 7,607 tons; 439-1x62-1x34-5; turbine engines. The steamship *Logan Victory*, loaded with ammunition and explosives from San Francisco, had just anchored at Okinawa when, on April 6th, 1945, a Japanese aircraft dived on to the deck. The ship exploded and sank with the loss of 12 of the crew and three gunners.

LOGICIAN

Charente S.S. Co.; 1928; Cammell, Laird & Co.; 5,993 tons; 420-3x54-6x30-4; 524 n.h.p.; 13 knots; triple-expansion engines.
The steamship *Logician*, Capt. W. Jones, was damaged by German aircraft on May 16th, 1941, in Suda Bay, Crete. On the 23rd she was hit again and on the 25th at the end of a series of attacks she sank. Five of the crew were killed and nine wounded. Twenty-one officers and men, including Capt. Jones, became prisoners of war.

LOGNA

Chr. Salvesen & Co.; 1882; Hodgson & Soulsby; 1,189 tons; 242X33-1X16-5; 146 n.h.p.; compound engines. The British cargo ship *Logna* was wrecked near Oxelosund on December 16th, 1898, while on a voyage in ballast from Stockholm to Oxelosund.

LOIRE

Cie. Generate Transatlantique; 1928; Lithgows; 4,285 tons; 370x51x25-4; 310 n.h.p.; triple-expansion engines. The French steamship *Loire* was on charter to the Cie. Generate d'Armement Maritime when she left Oran on November 12th, 1939, for Dunkirk carrying minerals. She did not arrive but wreckage was found near Malaga and it was assumed that she had capsized.

LOKOJA

Elder, Dempster & Co.; 1901; Clyde S.B. & E. Co.; 2,604 tons; 325-5x45x19-7; triple-expansion engines.
The British cargo ship *Lokoja* was wrecked on January 28th, 1902, at Half Assinie, Gold Coast, while on a voyage from Liverpool to the west coast of Africa carrying a general cargo.

LOLITA A.

Artaza y Cia.; 1923; Swan, Hunter & Wigham Richardson; 1,718 tons; 245-6x37-2x22-3; 184 n.h.p.; triple-expansion engines.
The Spanish ship *Lolita A.* went ashore at Vieux Boucau during a fog on November 26th, 1934. She broke amidships and became a total loss. The *Lolita A.* was carrying coal from the Tyne to Pasajes.

LORN

Dampsk. A/S Ibis; 1920; N.V. Scheepswerfde Merwede; 1,268 tons; 238-8x36-8x15-6; 127 n.h.p.; triple-expansion engines.
The Norwegian steamship *Lorn* was bombed and sunk by German aircraft on December 2nd, 1943, at Bari. Seven of her crew were killed.

LONADA

1,286 tons.
On December 29th, 1916, the British cargo ship *Lonada* struck a mine and sank five miles N. by E. \ E. from the Ship wash lightship. Six of the crew were killed.

LONDON

Money, Wigram & Co.; 1864; Blackball Yard; 1,752 tons; 267-2x35-9x24-1; 200 n.h.p.; 11 knots; compound engines. The *London* was the first auxiliary steamship built and owned by the famous Victorian firm of Money, Wigram & Co. She was constructed of iron, fully-rigged, tall-sparred, long and narrow with a somewhat low freeboard. Her bulwarks were six feet high; a dangerous handicap in a heavy sea. She was regarded as a wonderful advance upon the type of ship hitherto employed in the Australian trade, and on her second voyage to and from Australia created a record.

The *London*, commanded by Capt. John Martin, commenced her third voyage on December 30th, 1865, when she left Gravesend for Melbourne; her final call before leaving England being Plymouth.

She cleared from Plymouth carrying a company of 263 persons including six stowaways. By Monday, the third day out, the ship was meeting very heavy weather in the Bay of Biscay which later attained hurricane force. She rolled badly and the seas poured down the hatches despite all efforts to make them watertight. The jib-boom and the fore and main masts were carried away and the behaviour of the ship began to give cause for alarm. A large part of her cargo consisted of railway iron and this added to the danger, while a boom lashed alongside the engine room broke loose and did much damage.

The vessel became waterlogged, the boiler fires were out and the only hope seemed to lie in returning to Plymouth. This decision proved fatal as, although those on board were unaware of it, the ship had reached the edge of the storm. At last, in the heart of the storm, an attempt was made to launch the boats. The pinnace got away, occupied by Mr. Greenhill the chief engineer, three male passengers and 15 members of the crew. No other boat was successful in leaving.

Shortly afterward the *London* sank, taking with her 244 persons. The 19 men in the pinnace were picked up next day by the Italian barque *Marianople* and taken to Falmouth.

LONDON MARU

Osaka Shosen K.K.; 1921; Cammell, Laird & Co.; 7,190 tons; 451-1x56-5x35-2; turbine engines.
The steamship *London Maru* was bombed and sunk by U.S. land-based aircraft on April 22nd, 1944, 60 miles east of Gocong.

LONDON TRADER

London Welsh Steamship Co.; 1913; Smith's Dock Co.; 684 tons; 200X31-5X12-4; 171 n.h.p.; triple-expansion engines. The steamship *London Trader*, Capt. Paddy, was under charter to the British & Irish Steamship Co. and carrying a general cargo from Dublin to London, when she foundered nine miles S.S.E. by E. of the Longship's Lighthouse on February 5th, 1915. Ten of the crew were drowned.

LONDONER

Tyne S.S. Co.; 1891; Schlesinger, Davis & Co.; 1,513 tons; 270 X 35 - 2 X 15 • 7; 450 h.p.; triple-expansion engines. The British cargo ship *Londoner* sank after a collision off Yarmouth in May, 1893, while on a voyage from London to the Tyne carrying a general cargo.

LONDONIAN

Wilson & Furness—Leyland Line; 1896; A. Stephen & Sons; 5,532 tons; 450x49-1x30-9; 660 n.h.p.; 11-5 knots; triple-expansion engines.
The liner *Londonian*, Capt. E. B. Lee, left Boston, Mass., for London on November 15th, 1898, with a company of 70. The cargo consisted chiefly of grain, there being also 150 head of cattle. After about a week at sea the ship ran into foul weather, increasing later to a gale, and she began to make water: her steering-gear jammed and it became impossible to keep her head-on.

The ship broached to and she was thrown on her beam ends, and her engine room flooded. The cattle were driven overboard to

lighten the ship which continued to drift for two days and nights, until the morning of the 25th when she was sighted by the Johnston liner *Vedamore*, Capt. Bartlett.

The captain of the *Londonian* asked to be taken in tow, but this the *Vedamore's* captain declined to do, though he was prepared to take off the crew. About noon therefore Capt. Lee decided to abandon his ship and the *Vedamore* made an attempt to get a boat alongside, but after three hours struggle the boat returned without having rescued a single man. Other efforts by rocket and line from windward of the derelict were equally unsuccessful and operations had to be suspended until daybreak when lines attached to life-buoys were floated down to the *Londonian*. After many hours one of these was picked up and a heavier line taken on board. A lifeboat was lashed to this and was hauled to and fro between the ships, 22 men being saved on the first journey. At the second attempt the rope broke and the boat capsized. Another boat under Mr. Doran, the first officer, was lowered by the *Vedamore* but this was smashed, the crew barely escaping with their lives. These efforts had lasted throughout the day and there was another pause during the hours of darkness. Next morning one of the *Londonian's* boats was got over the side where it at once capsized, drowning all its occupants. A second boat got away with 23 men who were taken on board the *Vedamore*. All day attempts to effect further rescues continued but without success. At dawn on the morning of the 28th those on board the *Vedamore* saw no sign of the *Londonian*, so with the survivors on board the ship proceeded on her way to Baltimore.

Meanwhile the derelict *Londonian* with Capt. Lee and seven men still on board was drifting helplessly with the gale. At midnight on the 28th one of their flares was seen by the German steamship *Maria Rickmers*, Capt. Grosch, which sent a boat under Mr. Lenz, the second officer. After a struggle of many hours a line was passed to the ship and all the survivors were taken off.

The number drowned was 17, and 45 men were rescued by the *Vedamore* and eight by the *Maria Rickmers*.

LONDONIER

Lloyd Royal Beige Soc. Anon.; 1911; Irvine's S.B. & D.D. Co.; 1,870 tons; 279 x 40 • 1 X18 -5; 175 n.h.p.; triple-expansion engines. The Belgian cargo ship *Londonier* was torpedoed and sunk by a German submarine in the English Channel on March 13th, 1918.

LONG

United States Navy, minesweeper; 1919; W. Cramp & Sons; 1,190 tons; 310x30x9-5; 25,000 s.h.p.; 35 knots; turbine engines; four 5 in. guns, one 3 in.A.A., 12 T.T. The United States minesweeper *Long*, Lt. S. Caplan, was one of 16 destroyers relegated to minesweeping duties during the Second World War. On January 6th, 1945, she was with a minesweeping flotilla in the Lingayen Gulf clearing Japanese minefields. The Japanese made desperate efforts to hinder this work, and at about 12.15 p.m. a Zeke bomber crashed on to the *Long* and caused extensive fires. Five hours later another Zeke dived on her, breaking her back and causing her to sink. One man was killed and 35 wounded, the survivors being taken off by the minesweeper *Hovey*.

LONGHIRST

Dunford & Elliott; 1879; Wigham Richardson & Co.; 2,048 tons; 285x36•2X24•4; 204n.h.p.; compound engines. The British cargo ship *Longhirst* sank after a collision with the Norwegian s.s. *Setubal* near the East Goodwin lightship on June 2nd, 1901. She was on a voyage from the Tyne to Barcelona carrying a cargo of coal.

LONGSTONE

Farrar, Groves & Co.; 1888; R. Dixon & Co.; 2,309 tons; 295•3X38•1X20•3; 220hp.; triple-expansion engines. The British cargo ship *Long stone* was wrecked east of Dellys, Algeria, on March 16th, 1894, while on a voyage from Odessa to London carrying a cargo of grain.

LONGWY

Soc. Anon des Chargeurs de VQuest; 1903; Chantiers Nantais de Constructions Maritimes; 2,315 tons; 282-6 x 40 - 6 x 19-6; 228 n.h.p.; triple-expansion engines. The French steamship *Longwy* was torpedoed and sunk by a German submarine in the Irish Channel on November 4th, 1917.

LOODIANA

British India S.N. Co.; 1884; DennyBros.; 3,269 tons; 340-lx 42-2x25-6; 372 n.h.p.; triple-expansion engines. The British steamship *Loodiana*, Capt. Ross, left Port Louis, Mauritius, for Colombo on January 10th, 1910. She carried a crew of 92 and nine European and 74 native passengers, as well as a general cargo. She failed to arrive at Colombo, but there was no undue alarm as it was assumed that she had developed engine trouble. On February 3rd the British India company sent the steamship *Itola* to make a search. She returned sometime later having visited the Cargados Group, and also searched in the direction of Reunion, but without success.

A report that a vessel was ashore on Cosmoledo Island was received on March 17th, and the French gunboat *Vaucluse* left Tamatave on the 25th. Another British India vessel, the *Islanda*, was sent to join in the search, but the reported wreck could not be found.

The s.s. *Galavale* which sailed from Mauritius on the same day as the *Loodiana* returned on the 18th January badly damaged. Herboats had been washed away, and her steering gear and machinery put out of order. She reported having encountered a cyclone of great violence a few days after leaving port. Ultimately the *Loodiana* was posted missing with the loss of 175 persons.

LOOKOUT

U.S. War Shipping Administration; 1932; Odense Staalskibs; 5,339 tons; 441-4x57x25-8; 983 n.h.p.; oilengines. The Panamanian motorship *Lookout* struck a wreck in the North Sea on December 12th, 1944, and sank.

LORD ANTRIM

Clark & Service; 1890; Palmers'Co.; 3,079 tons; 320x42-2x 26-6; 277n.h.p.; triple-expansion engines. The British cargo ship *Lord Antrim* was wrecked at Cape Raso on June 29th, 1914, while on a voyage from Bona to Granton. She was carrying a cargo of esparto and iron ore.

LORD CHARLEMONT

Sun Shipping Co.; 1886; Harland & Wolff; 3,209 tons; 345-6X 40-9x26-7; 309n.h.p.; 9-5 knots; triple-expansion engines. The steamship *Lord Charlemont* was torpedoed and sunk by a German submarine 22 miles N. of Alboran Island in the Western Mediterranean on April 19th, 1918. Eight men were killed. The captain was among the survivors.

LORD LANSDOWNE

T. Dixon & Sons; 1884; Harland & Wolff; 2,726 tons; 340-5X 38-3x26; 300 n.h.p.; compound engines. The British cargo ship *Lord Lansdowne* was wrecked on Cobbler's Reef, Barbados, on May 21st, 1912, while on a voyage from Norfolk, Va. to Barbados carrying a cargo of coal.

LORD O'NEILL

T. Dixon & Sons; 1884; Harland & Wolff; 2,751 tons; 340-5X 38-3x26; 300 n.h.p.; compound engines. The British cargo ship *Lord O'Neill* was wrecked off the Blasketts on January 20th, 1898. She was on a voyage from Baltimore to Dublin carrying a general cargo.

LOREDAN

Adriatica Soc. Anon, di Nav.; 1936; Cant. Riuniti Dell ^Adriatico; 1,357tons; 236-8x35-6x18-6; 440n.h.p.; oilengines. The Italian motorship *Loredan* was torpedoed and sunk by a British submarine on April 10th, 1943, about ten miles from Cagliari.

LORELLA

City Steam Fishing Co.; 1947; Cook, Welton & Gemmell; 559 tons; 170-8x29-2x14-2; triple-expansion engines. The British trawler *Lorella* sailed from Hull on January 14th, 1955, for the Icelandic fishing grounds. At 1.30 p.m. on January 26th a distress message was sent from the ship stating that she was capsizing during a hurricane north-east of North Cape, Iceland. No further information was received and her crew of 20 were lost.

LORENTZ W. HANSEN

DjSAISSonga; 1920; C. Hill & Sons; 1918; 270x42-2x17-9; 188n.h.p.; triple-expansion engines.

The Norwegian ship *Lorentz W. Hansen* was intercepted by a German raider and sunk by gunfire on October 14th, 1939, on a voyage from Nelson, N.B., to Garston.

LORENZO MARCELLO

Societa Fiumana di Nav.; 1928; *Stabilimento Tecnico*; 1413 tons; 233-9x34-6x20-5; 440 n.h.p.; oil engines. The Italian passenger motorship *Lorenzo Marcello* struck a mine and sank on June 19th, 1943, two miles from Santa Maura Island.

LORETO

A. Lauro; 1912; *Sunderland S.B. Co.*; 1,055 tons; 231-6x 32-9x13-8; 127n.h.p.; triple-expansion engines. The Italian steamship *Loreto* was torpedoed and sunk by a British submarine on October 13th, 1942, four miles from Cape Gallo, Sicily.

LORIENT

Ministry of War Transport (British Continental Coal & Investment Co.); 1921; *Tyne Iron S.B. Co.*; 4,737 tons; 364-5x52-8x 24-5; 347 n.h.p.; triple-expansion engines.

The British cargo ship *Lorient* sailed from London on April 10th, 1943, on a voyage in ballast to New York. She called at Oban and left there on April 22nd, but no subsequent information was received. The ship carried a crew of 41 and five gunners.

LORINA

Southern Railway Co.; 1918; *W. Denny & Bros.*; 1,578 tons; 291-3x36-1x14-7; 4,750 s.h.p.; 18 knots; turbine engines. The steamship *Lorina*, Capt. A. Sight, was bombed and sunk by German aircraft on May 29th, 1940, while evacuating units of the British Army from Dunkirk. Eight men were killed and four wounded. Capt. Sight was among the survivors.

The full story of the Dunkirk Evacuation is told under the destroyer *Grafton*.

LORLE

Alexander Shipping Co.; 1896; *Irvine & Co.*; 2,686 tons; 312 X 44x20-7; 240 n.h.p.; 9 knots; triple-expansion engines. The steamship *Lorle* was torpedoed and sunk by a German submarine 12 miles S.S.W. of the Lizard on June 11th, 1918. The captain and 18 crew were killed.

LORMONT

Moss Hutchinson; 1927; *Greenock Dockyard Co.*; 1,561 tons; 241-4x40-2x12-7; 341 n.h.p.; 10 knots; triple-expansion engines.

The steamship *Lormont* was taken over by the Admiralty early in the Second World War for service as a guardship. On December 7th, 1940, the vessel was sunk in a collision off the Humber.

LORNA

Otto W. Bergman; 1897; *J. Priestman & Co.*; 3,286 tons; 325x47x25-6; 300 n.h.p.; triple-expansion engines. The Norwegian cargo ship *Lorna* was torpedoed and sunk by a German submarine in the Atlantic on August 7th, 1918.

LORNE

John Warrack & Co.; 1870; *Aitken & Mansel*; 1,614 tons; 276-8x32-9x23-6; 150 h.p.; compound inverted engines. The British cargo ship *Lorne* was wrecked on Hainan Island, China, on December 3rd, 1887. She was on a voyage from Saigon to Hong Kong carrying a cargo of rice and paddy. The captain and four of the crew were lost. Sixty-nine were saved.

LOSMAR

Calmar S.S. Corp; 1919; *Northwest Steel Co*; 5,549 tons; 409-8x54-2x27-7; 582 n h p ; triple-expansion engines. The American steamship *Losmar* was torpedoed and sunk by a Japanese submarine on September 24th, 1942, off the Maldives Islands on a voyage from Port Said to Colombo with 3,000 tons of salt. Twenty-seven of her crew of 48 were lost.

LOSNA

W. Wilhelmsen; 1904; *Sir Raylton Dixon & Co.*; 4,187 tons; 360x50-2x17-9; 367 n.h.p.; triple-expansion engines. The Norwegian ship *Losna* went ashore on November 28th, 1921, 20 miles E. of Great Fish Point and broke in two.

LOT

French Navy; 1939; *Ateliers & Chantiers de France*; 6,135 tons. The naval tanker *Lot* was torpedoed by a German submarine on June 22nd, 1943, about 1,000 miles S.E. of the Bermudas on a voyage from New York to Casablanca with 6,000 tons of fuel oil. Twenty-three of her crew were lost.

LOTOS

A/S Stener S. Mullers Rederi; 1920; *H. Te Veldhuis Werf.*; 1,327 tons; 238-1x36-5x 16; 126n.h.p.; triple-expansion engines. The Norwegian steamship *Lotos* was torpedoed and sunk by a German submarine on September 15th, 1940, 15 miles N.W. of Rockall on a voyage from Dalhousie, N.B., to the Tyne with timber. Eight survivors were picked up.

LOTTE HALM

KolnerReedA.G.; 1914; *Howaldtswerke*; 1,198 tons; 233-4X 34-6x15-1; 84 n.h.p.; triple-expansion engines. The German steamship *Lotte Halm* was bombed and sunk by British aircraft on August 14th, 1941, S.W. of Heligoland.

LOTTE LEONHARDT

Leonhardt & Slumberg; 1937; *Neptunwerft Rostock*; 4,167 tons; 399 -8x55-8x20-7; 367 n.h.p.; compound engines & LP. turbine. The German steamship *Lotte Leonhardt* was bombed and sunk by British aircraft on April 26th, 1944, off Bodo, Norway.

LOUGH FISHER

Lough Fisher Steamship Co.; 1887; *Mcllwaine, Lewis & Co.*; 418 tons; 168-2x25-1x11-6; 61 r.h.p.; 9 knots; compound engines.

The steamship *Lough Fisher* was intercepted by a German submarine 12 miles S.S.E. of Helvick Head on March 30th, 1918. The submarine opened fire from the surface and sank the vessel. The captain and 12 men were killed.

LOUIS

British Navy, destroyer; 1913; *Fairfield Co.*; 965 tons; 269 x 27x10-5; 24,000 s.h.p.; 29 knots; turbine engines; three 4 in. guns, 4 T.T.

The destroyer *Louis*, Lt. Cdr. A. D. A. Hall, with a complement of 100 on board was driven ashore at Sulya Bay on November 1st, 1915, in a fierce south-westerly gale which raged for several days. All efforts to get *Louis* afloat were frustrated by the weather and she became a total wreck.

There was no loss of life.

LOUISBURG

Dominion Coal Co.; 1881; *J. L. Thompson & Son*; 1,816 tons; 260x36x18-5; 225 n.h.p.; compound engines. The Canadian collier *Louisburg* was wrecked at Cape English, St. Mary's Bay, on May 5th, 1918, while on a voyage from Louisburg to St. John's, N.F.L.

LOUISBURG

Canadian Navy, corvette; 1942; 925 tons; 205x33x11-5; 2,800i.h.p.; 16 knots; triple-expansion engines; 3-drum boilers; one 4 in. A.A. gun, several smaller.

The corvette *Louisburg* was on convoy duty in the Mediterranean on February 6th, 1943, when she was torpedoed and sunk near Oran by an enemy submarine. Thirty-eight officers and ratings were killed.

LOUISE LYKES

LykesBros. S.S. Co.; 1941; *Federal S.B. & D.D. Co.*; 6,155 tons; 439 X 63 -1X 27 - 5; 1,000 n.h.p.; turbine engines. The American steamship *Louise Lykes* was torpedoed and sunk by a German submarine on January 9th, 1943, about 700 miles W. of Inishtrahull on a voyage from New York to Cardiff. There were no survivors.

LOUISE MOLLER

MollerLine; 1907; J.L. Thompson & Sons; 3,764 tons; 346-5 X 50-8x22-9; 307 n.h.p.; triple-expansion engines. The British steamship *Louise Moller* was torpedoed and sunk by a submarine on November 13th, 1942, 600 miles out from Durban bound to Mombasa. Eleven of her crew were lost.

LOUISIANA

DetForenedeDampskibsSelsk.; 1896; Armstrong & Co.; 3,015 tons; 319-8x46x23-2; 280 n.h.p.; triple-expansion engines. The Danish steamship *Louisiana* was torpedoed and sunk by a German submarine in the North Sea on April 18th, 1917.

LOUISIANA

Gulf & Southern S.S. Co.; 1919; Gt. Lakes Eng. Works; 2,674 tons; 253-4x43-8x26; 225 n.h.p.; triple-expansion engines. The American cargo ship *Louisiana* was involved in a collision with the American s.s. *Madison* on October 27th, 1926, off the mouth of the Mississippi and sank.

LOUISIANA

The Texas Company; 1937; Sun S.B. & D.D. Co.; 8,587 tons; 468-1x65-3x34-3; 1,197n.h.p.; oilengines. The American tanker *Louisiana* was torpedoed and sunk by a German submarine on August 17th, 1942, about 300 miles N.E. of Cayenne, outward bound from Trinidad with petrol and heavy oil.

LOUKIA

I. G. Mavris and others; 1910; Armstrong, Whitworth & Co.; 2,143 tons; 275x39x23-8; 196n.h.p.; triple-expansion engines. The Greek ship *Loukia* struck a mine and sank on March 4th, 1937, two miles off Cape San Sebastian. She was carrying petrol to Barcelona.

LOUVAIN

Great Eastern Railway Co.; 1897; Earle's Co.; 1,830 tons; 302-1x38-1x16-3; 476 n.h.p.; 18 knots; triple-expansion engines. The steamship *Louvain* was taken over by the Admiralty in the First World War for service as a boarding steamship. On January 21st, 1918, she was torpedoed and sunk by a German submarine when proceeding from Malta with 70 Maltese ratings in addition to her own complement.

The *Louvain* was under command of Lt. Cdr. M. G. Easton, and sank with a loss of seven officers and 217 ratings.

LOUVRE

Cie. Parisienne de Nav.; 1891; P.Oriolle; 473 tons; 173-4X 28x11-8; triple-expansion engines. The French coasting steamship *Louvre* employed between Northern France and Bayonne, was wrecked off the Point of Penmach on the night of October 27th, 1892. Seventeen men were drowned.

LOVLAND

Skibs. A/S Sunde; 1907; Short Bros.; 2,389 tons; 295x45x 19-6; 241 n.h.p.; triple-expansion engines. The Norwegian ship *Lovland*, sailing from Ardrossan to Pugwash, went ashore on August 18th, 1939, at Money Point, C.B., and was wrecked.

LOVLI

Soc. Nazionale di Navigazione; 1916; Mitsubishi Dkyd. & Eng. Works; 7,212 tons; 445x58x34; turbine engines. The Italian steamship *Lovli* was torpedoed and sunk by a submarine in the Mediterranean on October 11th, 1917.

LOWLAND

Shipping & Coal Co.; 1911; Rijkee & Co.; 974 tons; 216-5x 32-7x13-8; 164 n.h.p.; triple-expansion engines. The British steamship *Lowland* struck a mine and sank on November 22nd, 1939, in the Thames estuary on a voyage from Blyth to London. Nine of her crew were killed.

LOWMOUNT

A. Capel & Co.; 1888; S. P. Austin & Son; 2,070 tons; 282-3X 38-1x17-8; 204 n.h.p.; 9-5 knots; triple-expansion engines. The steamship *Lowmount* was mined and sunk four miles S.E. of the Nab lightship on May 7th, 1917. Five men were killed. The captain was among the survivors.

LOYALIST

Furness, Withy & Co.; 1891; A. Stephen & Sons; 2,294 tons; 305x39x23-3; 306 n.h.p.; triple-expansion engines. The British cargo ship *Loyalist* was wrecked at Freshwater Cove, N.F.L. on September 27th, 1904, while on a voyage from Halifax. N.S., to London. She was carrying a general cargo.

LOYALTY

British Navy, fleet minesweeper; 1942; Harland & Wo Iff; 950 tons; 235x35x11-5; 2,000 h.p.; 16-5 knots; triple-expansion engines; 3-drum boilers; one 4 in. A.A. gun, four 20 mm. The fleet minesweeper *Loyalty*, Lt. Cdr. J. E. Maltby, R.D., R.N.R., struck amine and sank off the Nab on August 22nd, 1944. Lt. Cdr. Maltby and 19 ratings were killed and one officer wounded.

LOZERE

Cie. Generale Transatlantique; 1910; Schiffsw. v. H. Koch A.G.; 2,365 tons; 277-7x39-2x17-9; 163 n.h.p.; triple-expansion engines.

The French ship *Lozere* was wrecked in Cauvres Bay, Kerguelen Island on February 12th, 1928. She was carrying whale oil.

LUABO

Companhia Nacional de Navegacao; 1909; Russell & Co.; 1,435 tons; 240X33-5x19-2; 144 n.h.p.; triple-expansion engines. The Portuguese ship *Luabo* was sailing from Durban to Lourenco Marques when, in heavy weather on April 27th, 1956, the cargo shifted, she developed a heavy list and sank off the Zululand coast. Out of the crew of 57, six Europeans and eight Africans were lost.

LUANA

Raffaele Romano; 1892; S. P. Austin & Son; 1,140 tons; 235-9x33-4x14-4; 136 n.h.p.; triple-expansion engines. The Italian steamship *Luana* struck a mine and sank on March 3rd, 1947, 20 miles S. of Porer, Italy. Twelve of her crew were killed.

LUBRAFOL

Gulf Oil Corporation; 1924; Armstrong Whitworth & Co.; 7,138 tons; 440-8x57-4X34; 774 n.h.p.; oil engines. The Panamanian tanker *Lubrafol* was torpedoed by a German submarine and caught fire and sank on May 9th, 1942, on a voyage from Aruba to New York. Thirteen of her crew were killed.

LUCA TARIGO

Italian Navy, destroyer; 1928; Ansaldo; 1,628 tons; 352 X 33-5X 16-7; 50 s.h.p.; 38 knots; turbine engines; Odero boilers; six 4• 7 in. guns, four 37 mm., six 13 mm., 4 T.T. On April 16th, 1941, the British 14th Flotilla, comprising the *Jervis*, 1,760 tons, leader, Capt. Mack, *Janus*, 1,690 tons, *Mohawk* and *Nubian*, 1,870 tons each, was cruising between Sicily and Tripoli when it sighted an Italian convoy of five merchant ships escorted by the destroyers *Luca Tarigo* and *Baleno*, 1,220 tons. A spirited action took place and the whole convoy of two supply ships of approximately 5,000 tons each, one of 4,000 tons loaded with ammunition and two others of 3,000 tons acting as transports was sunk. Both the escorting destroyers were also sunk. The British lost the destroyer *Mohawk*, Cdr. J. W. M. Eaton, by torpedo.

The *Luca Tarigo* carried a complement of 185, of whom a large number were lost, as were the crews of the other seven ships, the ammunition ship blowing up with the probable loss of all her company.

LUCANIA

DittaLuigiPittaluga Vapori; 1902; W. Gray & Co.; 8,106 tons; 483-1x55x32-9; 581 n.h.p.; triple-expansion engines. The Italian steamship *Lucania* was torpedoed and sunk by a British submarine on February 12th, 1942, near Punta Alice, Italy.

LUCE

United States Navy, destroyer; 1943; Bethlehem Steel Co.; 2,050 tons; 376-5x39-5x—; 60,000 s.h.p.; 35-5 knots; turbine engines; five 5 in. guns, four 40 mm, four 20 mm, 10 T.T. The destroyer *Luce* was bombed and sunk by Japanese aircraft off Okinawa on May 4th, 1945. The vessel carried a complement of over 250.

LUCERNE

Lucerne Steamship Co.; 1878; Laird Bros.; 1,944 tons; 29 lx 34-3x24-6; 194 n.h.p.; 9 knots; compound engines. The steamship *Lucerne* of St. John's, Newfoundland, was bound for that port with a cargo of coal from Ardrossan. On February 3rd, 1901, she ran ashore and became a total wreck in Trinity Bay, Newfoundland. The weather was rough and all the crew of 24 were lost. Wreckage from the ship was found to be badly charred, indicating that she was on fire at the time of loss.

LUCHS

German Navy, gunboat; 1899; Danzig Dockyard; 900 tons; 203-5x30x11; 1,350 i.h.p.; 14 knots; triple expansion engines; Thorny croft boilers; two 4 • 1 in. guns, six 1 pdr., 2 m.g. The gunboat *Luchs* was one of a flotilla of four such vessels blown up by the Germans on the fall of the fortress of Tsingtau on November 7th, 1914. The ship carried a complement of 121. A full account of the ships lost at Tsingtau will be found under the light cruiser *Cormoran*.

LUCHS

German Navy, torpedo boat; 1928; Wilhelmshaven Yard; 800 tons; 304x28-9x—; 25,000 s.h.p.; 34 knots; turbine engines; Schulz-Thorny croft boilers; three 4-1 in. guns, two 1 pdr., 6 T.T. The German torpedo boat *Luchs* was torpedoed by a British submarine in the North Sea on July 26th, 1940. The vessel's normal complement was 123.

LUCIA

United States Shipping Board; 1912; Cantiere Navale Triestino; 6,774 tons; 411-8x51-7x26-3; 520 n.h.p.; triple-expansion engines. The American steamship *Lucia* was torpedoed and sunk by a German submarine in the Atlantic on October 18th, 1918.

LUCIANO

E. Szabados; 1913; Earls Co.; 3,329 tons; 332x42-4x21-8; 343 n.h.p.; triple-expansion engines. The Italian steamship *Luciano* was torpedoed and sunk by British aircraft on April 15th, 1941, off Valona.

LUCINDA

Herskind & Woods; 1880; W. Gray & Co.; 1,756 tons; 257-6X 34-6x19-7; 140 h.p.; compound engines. The British cargo ship *Lucinda* sank after a collision on May 1st, 1888, in 19° N., 40° E., while on a voyage from Akyab to Port Said carrying a cargo of rice.

LUCRETIA

Wilkie & Turnbull; 1878; Bartram, Hawell & Co.; 1,515 tons; 260-5x33-3x21-8; 150 h.p.; compound inverted engines. The British cargo ship *Lucretia* foundered in 57° N., 40° E., on November 28th, 1885. She was carrying a cargo of old iron rails on a voyage from Gothenburg to Civita Vecchia.

LUDGATE

Carrington S.S. Co.; 1906; Bartram & Sons; 3,708 tons; 346-5x50-8x22-7; 313 n.h.p.; 10 knots; triple-expansion engines. The steamship *Ludgate* struck a mine and sank two miles S. of Galley Head, Co. Cork, on July 26th, 1917. Twenty-four men, including the captain, were killed.

LUDLOW

British Navy, minesweeper; 1916; Goole Shipbuilding Co.; 810 tons; 245-7x29x6-7; 1,400 i.h.p.; 15 knots; diagonal compound engines; one 3 in. gun, one 6 pdr., two 2 pdr. The paddle minesweeper *Ludlow* struck a mine and sank on

December 29th, 1916, off the Shipwash lightship. Her official complement was 72.

LUDOLF OLDENDORFF

Egon Oldendorff; 1903; C. S. Swan & Hunter; 1,953 tons; 247-6x42x20-5; 210 n.h.p.; triple-expansion engines. The German steamship *Ludolf Oldendorff* was bombed and sunk by British aircraft on October 9th, 1944, at Egersund, Norway.

LUDWIG

Steinmann & Co.; 1861; Caird & Co.; 3,987 tons; 328x42x—; 11 knots; compound engines. The Belgian liner *Ludwig*, Capt. Keil, began her career as the *Hansa* of the Norddeutscher Lloyd. From this company she passed to the British flag, but with the same name, and in 1883 was sold to Steinmann & Co. and renamed *Ludwig*.

On July 3rd, 1883, the vessel left Antwerp for Montreal with between 70 and 80 persons, passengers and crew, on board, and was reported passing Prawle Point. She was never heard of again.

LUGANO

John Glynn & Son; 1882; Barrow S.B. Co.; 3,598 tons; 350-IX 40-1x24; 419 n.h.p.; triple-expansion engines. The British cargo ship *Lugano* was wrecked on Ajax Reef, Florida, on March 9th, 1913, while on a voyage from Liverpool to Havana carrying a general cargo.

LUIGI

Angelo Scinicariello; 1920; Fredrikstad Mek. Verksted; 4,283 tons; 383-2x52-1x25-9; 271 n.h.p.; triple-expansion engines. The Italian steamship *Luigi* was torpedoed and sunk by British aircraft on November 24th, 1942, about 50 miles S. of Cape Bella-vista, Sardinia.

LUIMNEACH

Limerick S.S. Co.; 1915; J. T. Eltringham & Co.; 1,074 tons; 220-1x33-4x13-9; 174 n.h.p.; triple-expansion engines. The Irish steamship *Luimneach*, on a voyage from Huelva to Drogheda, was shelled and sunk by a German submarine on September 4th, 1940, 200 miles W.N.W. of Ushant. Nine of her crew were killed.

LUISA

Hijos de Jose Toy a S. en C.; 1897; Russell & Co.; 3,603 tons; 340x45-9x17-8; 288 n.h.p.; triple-expansion engines. The Spanish cargo ship *Luisa* was torpedoed and sunk by a German submarine in the Bristol Channel on April 12th, 1918.

LUISA

Dani & C.; 1905; Fredrikstad Mek. Verks.; 1,483 tons; 237-7 X 35-1x19-6; 138 n.h.p.; triple-expansion engines. The Italian ship *Luisa* was reported to have sunk in a collision on February 22nd, 1942, S.W. of Punta del Pizzo.

LUISE LEONHARDT

Leonhardt & Blumberg; 1921; Burntisland S.B. Co.; 3,464 tons; 330 X 48 • 8 x 25 -1; 316 n.h.p.; triple-expansion engines. The German ship *Luise Leonhardt* sailed from Hamburg for Sears-port, Me., but went aground on November 23rd, 1930, at the W. point of Vogelsand, near the Elbe lightship, and broke in two. All the crew of 30 were lost.

LUISIANO

Ditta G. M. Barbageleta; 1917; Collingwood S.B. Co.; 2,552 tons; 255-9x43-6x23-4; 211 n.h.p.; triple-expansion engines. The Italian tanker *Luisiano* was torpedoed and sunk by British aircraft on October 29th, 1942, 20 miles from Navarino.

LUKKOS

Stoomv. Maats. Atlas (Wambersie & Zoon); 1921; N.V. Schpsb. v/h Wd. A. van Duijvendijk; 1,744 tons; 252x40x17-7; 175 n.h.p.; triple-expansion engines. The Dutch ship *Lukkos*, Capt. Gieseke, left Antwerp on February 14th, 1923, for Tangier, and passed Dungeness on the same day. She was not seen again. The crew numbered 25.

LUKSEFJELL

Olsen & Ugelstad; 1889; J. Laing; 2,007 tons; 273 -5 x 38 -3 X 19 • 2; 170 n.h.p.; triple-expansion engines.
The Norwegian cargo ship *Luksefjell* was torpedoed and sunk by a German submarine in the Bay of Biscay on October 11th, 1918.

LULWORTH HILL

Dorset S.S. Co.; 1940; W. Hamilton & Co.; 7,628; 421-1x 60-4x35-8; 520 n.h.p.; triple-expansion engines. The British steamship *Lulworth Hill*, on a voyage from Mauritius to the Mersey, straggled from convoy on March 14th, 1943, and was torpedoed and sunk by a German submarine on the 19th, about 800 miles E. of Ascension Island. Thirty-seven of her crew and six gunners were lost, one member of the crew was taken prisoner and two survivors were picked up from a raft by a British warship on May 7th.

LUMME

Argo Reederei Richard Adler & Co.; 1928; Frerichswerft A.G.; 1,730 tons; 275-5x42-2x15-5; 242 n.h.p.; triple-expansion engines & L.P. turbine.
The German steamship *Lumme* was bombed and sunk by British aircraft on October 12th, 1944, off Kirkenes.

LUNA

Wachsmuth & Krogmann; 1885; Germania Werft; 846 tons; 182-4x31-9x18-5.
The German barque *Luna* was wrecked on the Brissons, near the Longships lighthouse, Lands End, on March 1st, 1903, with the loss of all on board.

LUNA

Stockholms Rederiaktieb. Svea; 1905; Fredrikstads Mek. Verksted; 1,005 tons; 216-5x32-7x13-9; 126 n.h.p.; triple-expansion engines.
The Swedish cargo ship *Luna* struck a mine and sank in the Baltic on December 6th, 1914.

LUPO

Italian Navy, torpedo boat; 1937; Quarnaro; 679 tons; 267 x 26x7-7; 19,000 s.h.p.; 34 knots; turbine engines; 3-drum boilers; three 3-9 in. guns, four 37 mm.A.A., two 13 mm.A.A., 4T.T.
The torpedo boat *Lupo* was brought to action in the Bocche di Kerkennah by British destroyers on December 2nd, 1942. After a brief engagement the *Lupo* was sunk by gunfire. The vessel carried a complement of about 100.

LURIGETHAN

Mountain S.S. Co.; 1916; Rotterdam Dry Dock; 3,564 tons; 361-6x50-1x21-8; 310 n.h.p.; 10-5 knits; triple-expansion engines.
The steamship *Lurigethan*, Capt. M. Kennedy, was bombed and set on fire by German aircraft on January 23rd, 1941, in convoy about 250 miles W. of Aran Island, Galway Bay. The burning wreck floated for two days but sank before salvage operations could be commenced. Sixteen men were killed. Capt. Kennedy was among the survivors.

LUSHAN MARU

ToaKaiunK.K.; 1920; Uraga Dock Co.; 2,531 tons; 284-5x 42-6x23; 303 n.h.p.; triple-expansion engines. The steamship *Lushan (Lusyan) Maru* was bombed and sunk by U.S. land-based aircraft on February 5th, 1944, about 125 miles E. of Hong Kong.

LUSITANIA

Elder, Dempster & Co.; 1871; Laird Bros.; 3,912 tons; 379-9X41-3x35-2; 638 n.h.p.; triple-expansion engines. The British cargo ship *Lusitania* was wrecked on June 26th, 1901, three miles north of Cape Ballard, N.F.L., while on a voyage from Liverpool to Montreal carrying passengers and a general cargo.

LUSITANIA

Empresa Nacional de Navegacao; 1906; Sir R. Dixon & Co.; 5,537 tons; 420-6x51-2x19-9; 752 n.h.p.; 15 knots; triple-expansion engines.
The Portuguese liner *Lusitania* was one of the largest and most important ships of Portugal's mercantile marine. On April 8th, 1911, the liner left Mozambique for Lisbon with nearly 800 persons on board, of whom some 200 were European passengers 450 indentured natives travelling to the cocoa plantations of Sao Thome, and the remainder crew. Just before midnight on Tuesday, April 18th, when rounding the Cape of Good Hope to come into Table Bay the *Lusitania* struck on the Bellows Rocks. Visibility was poor but the sea was calm and it was possible to launch the boats without difficulty. Three of the boats reached shore close to Cape Point. Other personnel were taken off the ship by H.M.S. *Forte* and the tug *Scotsman*.

One of the boats capsized and the Third Officer and three passengers were drowned. The *Lusitania* remained fast on the rocks for four days when she was washed off by the swell and sank in deep water.

LUSITANIA

CunardS.S.Co.; 1907; J. Brown & Co.; 30,396 tons; 762-2X 87-8x56-6; 68,000 i.h.p.; 25-85 knots; turbine engines. On the outbreak of the First World War the *Lusitania* continued to maintain the service between Liverpool and New York, without incident until the spring of 1915, completing five round trips in all. On May 1st of that year there appeared in the New York newspapers an ominous advertisement, couched in the form of an official statement. It was remarked upon at the time that this advertisement was inserted at very short notice, for the *Lusitania* was scheduled to sail from New York on the same morning.

The advertisement ran as follows:—

'Travellers intending to embark for an Atlantic voyage are reminded that a state of war exists between Germany and her allies and Great Britain and her allies; that the zone of war includes the water adjacent to the British Isles, that in accordance with the formal notice given by the Imperial German Government, vessels flying the flag of Great Britain or any of her allies are liable to destruction in those waters; and that travellers sailing in the war-zone in ships of Great Britain and/or any of her Allies do so at their own risk.'

IMPERIAL GERMAN EMBASSY
WASHINGTON, D.C.,

April 22nd, 1915

Despite this warning, the total number on board when the ship left New York was 1,959, of whom 1,257 were passengers and 702 crew, the commander being Capt. W. J. Turner. The voyage across the Atlantic was uneventful but on approaching the Irish coast the captain was warned by wireless of the presence of German submarines. For some time the entrance to St. George's Channel had been a cause of much anxiety to the British Admiralty, for the patrols available were weak and scattered. In the week of the *Lusitania*'s crossing one ship was attacked and three others sunk in this area, and reports of submarines lying off the coast were too frequent and top detailed to permit of the danger being taken lightly. Instructions wireless to ship-masters were to avoid headlands and steer a mid-channel course. The first warning reached the *Lusitania* on the 5th and she was again warned on the 6th and 7th. On approaching St. George's Channel double look-outs were posted and speed reduced to 18 knots so that the vessel should not arrive at the Mersey Bar before the tide permitted her to cross. At 12.40 p.m. on the 7th she altered course and closed Brow Head in order to fix her position. Soon afterwards another warning was received stating that submarines had been sighted 20 miles off Coningbeg. Captain Turner thereupon decided to keep inshore until a last warning, reporting that submarines had been sighted south of Cape Clear, 30 miles astern, caused him to believe that the danger was now past and he returned to his former course.

At 2.15 p.m., when the *Lusitania* was about ten miles south of the Old Head of Kinsale, she was struck by a torpedo between the third and fourth funnels. A second and less violent explosion, which may have occurred in the boiler room, came shortly after. The turbines stopped immediately and the ship continued under way until she sank, which together with an increasing list to star-

board considerably hindered the launching of the boats. At 2.26 p.m. the *Lusitania* foundered, having remained afloat for less than 15 minutes from the time of being torpedoed.

Of those on board no fewer than 1,198 were drowned, including 291 women, 94 children and 124 American citizens. Altogether 761 persons, including Capt. Turner were saved, either by the ship's boats or by the trawler *Bluebell*, which arrived in time to rescue many from the water.

The submarine which fired the torpedo was the *U-20*, commanded by Capt.-Lt. Schwieger, who entered in his log that he discharged one torpedo. This record must be set against that of several witnesses on the *Lusitania* who asserted that two torpedoes were fired, and it can only be assumed that the second explosion occurred within the ship.

The reactions throughout the world on receipt of the news of the torpedoing of the *Lusitania* were profoundly damaging to the German cause, and it did much to alienate the sympathy of neutral nations, as well as to arouse a resentment in the United States which undoubtedly influenced that nation to enter the war on the side of the Allies at a later date.

LUTECE

A. Lemoine et Fils; 1893; S. P. Austin & Son; 1,346 tons; 247 x 35 • 3 x 15 • 1; 171 n.h.p.; triple-expansion engines. The French steamship *Lutece* was torpedoed and sunk by a German submarine in the Bristol Channel on February 3rd, 1918.

LUTFI DJELIL

Turkish Navy, turret ironclad; 1870 (circa); 2,700 tons; 235x38x17-8; 3,000 i.h.p.; 12 knots; steam engines, twin screws; two 9 in. m.l.r. guns, two 5 in. m.l.r., 1 smaller. The Turkish ironclad *Lutfi Djelil*, Capt. Kezim Bey, was one of a group of four vessels of the same design serving in the Turkish navy prior to the outbreak of the Russo-Turkish War of 1877-78. On May 11th, 1877, the ironclad, a three-masted vessel, put out from the Turkish fortress of Matchin on the Danube escorted by two gunboats. She took up a position behind a wooded island which screened all but her topmasts from the Russian shore batteries, the intention being that she should bombard the town of Braila on the following morning.

The Russians, however, detected her masts and opened fire with light artillery which was not effective at long range. Two heavy 8 in. guns were then brought up and began firing at their highest angle. One shell penetrated the Turkish warship's deck and exploded in her magazine, blowing her up with the loss of nearly all the 200 officers and men on board.

The Russians took the Turks by surprise and Capt. Kezim Bey, who was ashore at the time, was not able to regain his ship before she blew up.

LUTJEHORN

Hansegesellschaft Aschpurwis & Veltjens; 1883; T. & W. Smith; 1,953 tons; 276x36-7x21-2; 180 n.h.p.; triple-expansion engines.

The German steamship *Lutjehorn* struck a mine and sank on January 4th, 1945, in the Cadet Channel.

LUTZOW

German Navy, battle cruiser; 1915; Schichau; 26,600 tons; 689x95x27-5; 70,000 i.h.p.; 29 knots; turbine engines; eight 12 in. guns, twelve 6 in., twelve 24 pdr., 5 T.T. The Lutzow, the newest and most formidable of the German battle cruisers, was the flagship of Vice-Admiral von Hipper, commanding the German Scouting Force at the battle of Jutland, May 31st, 1916, and was commanded by Capt. Harder.

The *Lutzow* became engaged at 3.45 in the afternoon with the *Lion* and *Princess Royal*, leading ships of the British line, and was badly mauled. During the second phase of the action, between 6 p.m. and 7 p.m. she was torpedoed by the destroyer *Acasta*, Lt. Cdr. J. O. Barrow, and was heavily on fire from the salvoes of the British battle cruisers. As darkness set in she became unmanageable, and early on the morning of June 1st it was decided to abandon her, and her crew were taken off without further loss.

The full story of the Battle of Jutland will be found under the battle cruiser *Invincible*.

LUTZOW

German Navy, pocket battleship; 1933; Deutsche Werke; 10,000 tons; 609-5x67-5x21-5; 54,000 h.p.; 26 knots; six 11 in. guns, eight 5-9 in., six 4-1 in.A.A., eight 3pdr., 10 m.g., 8 T.T., 2 aircraft.

The German pocket battleship *Lutzow*, formerly the *Deutschland*, was the first of a famous trio of warships with all-welded hulls. The amount of weight saved by dispensing with rivets was 550 tons per ship. The other vessels of this class were the *Admiral Graf Spee* and the *Admiral Scheer* (which see), and they were the fastest capital ships of their day other than battle cruisers. It was hoped that they would achieve great things as commerce raiders in the event of war.

The *Lutzow* was given her new name in November, 1939, when she returned from a rather barren raid into the N.W. Atlantic, having captured two merchantmen of a total tonnage of 7,000. On her return to home waters the pocket battleship was assigned the duty of escorting the German invading forces which landed in Oslo in April, 1940. She was torpedoed and badly damaged by the British submarine *Spearfish* when returning to Kiel on the 10th, and did not come back into commission for many months. On June 13th, 1941, when off Norway, and about to break out into the Atlantic on a second raiding expedition, she was attacked by British torpedo bombers and badly damaged for a second time. She was repaired, but ill-luck still dogged her, for on July 3rd, 1942, when taking part in large-scale operations against a British convoy, she ran aground near Narvik. She was refloated, but from that time remained in the Baltic or off the Atlantic coast of Norway.

Towards the end of the war, April 16th, 1945, she was lying at Swinemunde, where she had become a target for persistent attacks by British bombers. She was so damaged as to be no longer seaworthy and had to be scuttled.

LUVSEE

W.Schuchmann; 1898; R. Craggs & Sons; 2,373 tons; 298.5 x 43-3x20-3; 245 n.h.p.; triple-expansion engines. The German steamship *Luvsee* was torpedoed and sunk by a British submarine on September 23rd, 1941, six miles off the Dalmatian coast.

LUX

M. Lennard & Sons; 1888; Sir W. G. Armstrong, Mitchell & Co.; 1,635 tons; 250x35-1x24-1; 150 h.p.; triple-expansion engines.

The British tanker *Lux* caught fire and sank near the island of Negropoint in November, 1891, while carrying petroleum on a voyage from Batoum to Antwerp. The captain and 15 of the crew died; there were six survivors.

LUX

Lux Navigation Co.; 1893; Forges et Chantiers de la Mediterranee; 2,621 tons; 281-5x39-9x27-1; 298 n.h.p.; 11 knots; triple-expansion engines.

The tanker *Lux*, with a crew of 29, left New York on January 20th, 1917, for Calais, and was never seen again.

She was considered to have been sunk by enemy action.

LUX

Cie. de Vapeurs Francais; 1893; Forg. et Chant, de la Mediterranee; 2,621 tons; 281-5x39-9x27-1; 298 n.h.p.; triple-expansion engines.

The French passenger steamship *Lux*, Capt. Boju, left Marseilles for Oran on March 15th, 1920, and was never heard of again. She had a crew of 75 and 46 passengers and a general cargo.

As soon as the steamship became overdue the tug *Fulton* was sent from Toulon to make a search, in which an airship from the aerodrome at Aubagne also joined. After ten days the tug returned, having picked up a lifeboat and some wreckage from the vessel off the Balearic Islands. The airship made no discoveries and the search was abandoned.

LUZON MARU

Japanese Government; 1905; Schiffswerft v. Henry Koch; 1,679 tons; 260-8x37-2x16-1; 175 n.h.p.; triple-expansion engines.

The steamship *Luzon Maru* was formerly the Philippine *Luzon*, seized by the Japanese. On March 1st, 1945, she was sunk by U.S. carrier-based aircraft off the north Ryukyu Islands.

LY-EE-MOON

Australasian Steam Navigation Co.; 1859; Thames Ironworks Co.; 1,202 tons; 282-4x27-3x16-6; 160 n.h.p.; compound inverted engines.

The *Ly-ee-Moon* was originally built as a paddle steamship and converted to screw propulsion in 1874.

On Saturday, May 29th, 1886, the *Ly-ee-Moon* left Melbourne for Sydney. At about 9 o'clock on the following evening the ship was off Green Cape, the night being clear and the lighthouse light distinctly visible. Capt. A. Webber, in command, was making his first run with the ship and was unfamiliar with the coast, as was the third officer who was on watch. The captain had gone below leaving instructions that he was to be called as soon as Green Cape light was near. Shortly after this the ship crashed on the rocks at the foot of the cape.

There was a heavy sea running and it was impossible to launch the boats. An attempt to get the ship off the rocks by reversing the engines proved unsuccessful. Within ten minutes the *Ly-ee-Moon* broke in two, the fore part drifting shorewards and eventually swinging round to face the after part. The forward portion contained the saloon and the foremast, and the helpless passengers endeavoured to find security in the rigging, but the mast snapped and most of them were flung into the sea. A number of seamen managed to reach shore and from there to get a line to the vessel. In this they were assisted by the keepers from the lighthouse. Meanwhile the after part, with the steerage passengers and engineers, sank in deep water.

Eighty lives were lost and there were 15 survivors.

LYLEPARK

Denholm Line Steamers; 1929; Scoffs Shipbuilding & Engineering Co.; 5,186 tons; 407-3x53-3x28-5; 534 n.h.p.; 11 knots; triple-expansion engines.

The steamship *Lylepark*, Capt. Charles S. Low, was intercepted by an enemy raider N.W. of Mossamedes, Angola, on June 11th, 1942, and sunk by gunfire. Thirty-six men were killed and three wounded. Capt. Low was among the survivors. The *Lylepark* was not in convoy.

LYMINGE

Constants (South Wales); 1918; Wood, Skinner & Co.; 1,757 tons; 260-4x37-7x16-4; 270 n.h.p.; triple-expansion engines. The British cargo ship *Lyminge* was wrecked on Ebal Rock, Gurnard Head, six miles north of Penzance, on September 19th, 1931. She was on a voyage from Cardiff to Oporto carrying a cargo of coal.

LYNBURN

Stainburn Steamship Co.; 1917; R. Williamson & Son; 587 tons; 165-7x26-6x11; 87r.h.p.; 9 knots; triple-expansion engines. The steamship *Lynburn* was mined and sunk half a mile S.E. of North Arklow lightship on August 29th, 1917. Eight men were killed. The captain was among the survivors.

LYNDIANE

De Chanaud & Cie.; 1883; J. L. Thompson & Sons; 1,564 tons; 259-8x36x18-6; 240 n.h.p.; triple-expansion engines.

The French steamship *Lyndiane* was torpedoed and sunk by a German submarine in the Bay of Biscay on July 16th, 1918.

LYNX

British Navy, destroyer; 1912; London & Glasgow Shipbuilding Co.; 950 tons; 266x27x9; 25,000 s.h.p.; 32 knots; turbine engines.

The destroyer *Lynx*, Cdr. J. F. H. Cole, was serving in North Scottish waters during the First World War when she struck a mine and sank off the Moray Firth on August 9th, 1915. Of her complement about 70 officers and ratings, including Cdr. Cole, were

drowned. The survivors numbered four officers and 22 ratings. The mines had been sown by the German raider *Meteor* (which see).

LYONNAIS

Franco-American Co.; 1856; Lairds; 1,070 tons; 200x34x—; 12 knots; compound engines.

The iron screw steamship *Lyonnais* left New York on November 1st, 1856, for Havre, under command of Capt. De Vaix, and had on board 146 persons, of whom 39 were cabin passengers, and a large number in the steerage. On the night of Sunday, the 2nd, the ship was about 50 miles S.E. of the Nantucket lightship, when she collided with the barque *Adriatic*.

The *Lyonnais* was making 11 knots under steam and sail and was struck on the starboard side amidships, being seriously holed below the waterline. The ship managed to steam for about ten minutes, after which the engine room was flooded. The collision occurred at 11 p.m. and the vessel remained afloat till 3 o'clock on the following afternoon when it was decided to abandon her. A raft had been constructed in the meantime to carry 40 persons. Two of the boats had been smashed in the collision but four remained, and all the passengers and crew were taken off without mishap.

The weather now became stormy and in the opinion of the second officer, who was one of the survivors, it was impossible for the raft to have remained long afloat. The boats separated in a fog next day, only one, with 16 occupants, being picked up by the German barque *Elise*, Capt. Nordenbolott, after drifting for six days.

The total loss was 130 persons, including Capt. De Vaix. The action of the captain of the *Adriatic* in standing on his course after the collision was open to censure. His excuse was that the night was very dark and that having sustained little damage, himself he concluded that the steamship, which still continued under way, was also slightly damaged.

LYONS MARU

Nippon Yusen K.K.; 1920; Yokohama Dock Co.; 7,017 tons; 445x58x34; 632 n.h.p.; triple-expansion engines. The steamship *Lyons Maru* was bombed and sunk by U.S. land-based aircraft on January 17th, 1944, off the north west coast of New Guinea.

LYRA

C. T. Gogstad & Co.; 1917; Akties. Moss Va>rft; 1,141 tons; 237-6x36-3x16-6; 97 n.h.p.; triple-expansion engines. The Norwegian cargo ship *Lyra* was torpedoed and sunk by a German submarine in the North Sea on November 4th, 1917.

LYSAKER

B. Stolt-Nielsen; 1899; W. Gray & Co.; 2,013 tons; 275X 41-6x17-7; 206 n.h.p.; triple-expansion engines. The Norwegian cargo ship *Lysaker* struck a mine and sank in the Arctic on July 6th, 1915.

LYSAKER III

L. Lorentzen; 1923; Swan, Hunter & Wigham Richardson; 1,167 tons; 235-4x36x14; 160 n.h.p.; triple-expansion engines. The Norwegian ship *Lysaker III* was carrying ore from Rekefjord, near Egersund, which she left on February 28th, 1936, to Rotterdam. A lifeboat was seen on March 13th, but there was no other trace of the ship.

LYSEFJORD

A/S D/S Lysefjord (K. Olsen); 1915; Stavanger Stoberi & Dok; 1,091 tons; 237-5x33-1x15-2; 149 n.h.p.; triple-expansion engines.

The Norwegian steamship *Lysefjord* was torpedoed and sunk by a German submarine on April 1st, 1943, between Tampa and Tela, Honduras.

M 15

British Navy monitor; 1915; W. Gray & Co.; 540 tons; 170x31x6; 500 h.p.; 12 knots; triple-expansion engines; one 9-2 in gun, one 3 in.A.A., 2 m.g.

The monitor *M 15* was engaged in the bombardment of Turkish positions off the coast near Gaza at the time when the British army under Gen. Allenby was nearing the city. On November 11th, 1917, the Allied warships withdrew to the anchorage at Deir-el-Belah as their services to the army were not required for the time being. The anchorage, which was crowded with shipping, was protected by a torpedo net, the entrances at either end being patrolled by trawlers. On the night of the 11th the *UC-38*, Lt. Hans Wendlandt, evaded the patrol and sank the *M 15* and the destroyer *Staunch*.

M 21

British Navy monitor; 1915; Sir R. Dixon & Co.; 540 tons; 170x31x6; 640 b.h.p.; 12 knots; oil engines; one 7.5 in. gun, one 3 in.A.A., one 12 pdr., 2 m.g.

The monitor *M 21* was mined and sunk off Ostend on October 20th, 1918. The vessel carried a complement of about 90 officers and men.

M 25

British Navy monitor; 1915; Sir R. Dixon & Co.; 540 tons; 170x31x6; 640 b.h.p.; 12 knots; oil engines; one 7.5 in. gun, one 3 in.A.A., one 12 pdr., 2 m.g.

The monitor *M 25* was operating on the Dvina River, North Russia, against the Bolsheviks, in company with the monitor *M 27*. On September 17th, 1919, both vessels were sunk by the enemy. Each carried a complement of about 90 officers and men.

M 27

British Navy monitor; 1915; Sir R. Dixon & Co.; 540 tons; 170x31x6; 640 b.h.p.; 12 knots; oil engines; one 4-7 in. gun, two 3 in.A.A., two 2 pdr., 2 m.g.

The monitor *M 27*, in company with the *M 25*, was operating on the Dvina River, North Russia, against the Bolsheviks. On September 17th, 1919, both vessels were sunk by the enemy. Each carried a complement of about 90 officers and men.

M 28

British Navy monitor; 1915; Sir R. Dixon & Co.; 570 tons; 170x31x6; 640 b.h.p.; 12 knots; oil engines; one 9-2 in. gun, 3 smaller.

The Monitor *M 28*, Lt. Cdr. Donald P. Macgregor, was lying in Kusa Bay, Imbros, in company with the monitor *Raglan*, 6,150 tons, two 14 in. guns, Cdr. Viscount Broome, on the morning of January 20th, 1918, when the German light cruiser *Breslau*, followed later by the battle cruiser *Goeben*, made an attack on the anchorage. Both monitors were sunk and the *M 28* caught fire and blew up with a loss of three officers and eight ratings from her complement of 82.

The full story of the action is told under the *Raglan*.

M 30

British Navy monitor; 1915; Workman Clark & Co.; 535 tons; 170x31x6-7; 400 h.p.; 10 knots; triple-expansion engines; Yarrow boilers; two 6 in. guns, one 6pdr.A.A., 2 m.g.

The monitor *M 30*, Lt. Cdr. E. L. B. Lockyer, was engaged in the bombardment of Turkish batteries in the neighbourhood of Cape Aspro, Gulf of Smyrna, during May, 1916. On the night of the 13th-14th the monitor was hit in the engine room by gunfire from shore batteries and caught fire.

About 50 of the crew, including wounded, were taken off by the armed motor yacht *California* and the monitor sank shortly afterwards.

M. C. HOLM

P. Brown; 1894; Richardson, Duck & Co.; 2,458 tons; 290x42x17-4; 219 n.h.p.; triple-expansion engines.

The Danish steamship *M. C. Holm* struck a mine and sank in the North Sea on December 31st, 1914.

M. F. ELLIOTT

Standard Oil Co. of New Jersey; 1921; Moore Shipbuilding Co.; 6,940 tons; 425-8x57x33-1; 3,200 Lh.p.; 10-5 knots; triple-expansion engines.

The American tanker *M. F. Elliott*, Capt. Harold I. Cook, left Newport News in ballast on May 20th, 1942, in convoy as far as the Florida Keys, whence she sailed for Caripito, Venezuela, without escort. At about 3.50 on the afternoon of June 3rd, 150 miles N.W. of Trinidad, she was struck on the starboard side aft by a torpedo from a German submarine. She took a heavy list to starboard and sank by the head in six minutes. Of her crew of 38 with seven naval gunners, 13 men of the crew were lost. Capt. Cook was among the survivors.

M. G. ZALINSKI

U.S. Government; 1919; 2,616 tons.

The army transport *M. G. Zalinski* struck a rock and sank on September 29th, 1946, on Pitt Island in the Grenville Channel south of Prince Rupert. She was on a voyage from Seattle to Whittier in Alaska.

M. T. CICERONE

S. A. Armatrice Carboni; 1920; Furness S.B. Co.; 6,521 tons; 412-4x55-6x34-4; 678 n.h.p.; turbine engines. The Italian ship

M. T. Cicerone went ashore on February 6th, 1927, at the entrance to Ponta Delgada. She was on a voyage from Philadelphia to Savona with a cargo of coal.

MAAS

Naam. Venn. Houtvaart; 1914; A. Vuijk & Zonen; 1,234 tons; 236-6x36-3x15-8; 151 n.h.p.; triple-expansion engines.

The Dutch steamship *Maas* was bound from Tunis to Rotterdam. On July 24th, 1916, when nearing the end of her voyage, she struck a mine laid by the German minelaying submarine *UC-1*. She sank two miles east of the North Hinder lightship with the loss of ten lives.

MAAS

Naam. Venn. Houtvaart; 1920; A. Vuijk & Zonen; 1,966 tons; 281'5x40-3x19-1; 225 n.h.p.; triple-expansion engines.

The Dutch steamship *Maas* was torpedoed and sunk by a German submarine on September 11th, 1940, 350 miles west of Inisshtrahull on a voyage from Sunderland to Rimouski. Only two of her crew survived.

MABEL BAIRD

J. W. Baird & Co.; 1901; Soc. Anon. J. Cockerill; 2,500 tons; 289-1x45-3x21-9; 233 n.h.p.; 9 knots; triple-expansion engines.

The steamship *Mabel Baird* was torpedoed and sunk by a German submarine four miles W.S.W. of the Lizard on December 22nd, 1917. Five men were killed. The captain was among the survivors.

MABELLA

A/S Mabella (Karl Bruusgaard); 1926; F. Schichau; 1,515 tons; 261-7x40-1x15-6; 142 n.h.p.; triple-expansion engines.

The Norwegian steamship *Mabella* was torpedoed, shelled and sunk by a Japanese submarine on March 13th, 1942, about 150 miles N.E. of Madras on a voyage from Colombo to Calcutta. Six of her crew were lost.

MABRITON

R. Chapman & Son; 1920; W. Doxford & Sons; 6,694 tons; 412-6x55-5x34-4; 596 n.h.p.; triple-expansion engines.

The British steamship *Mabriton*, on a voyage from the Tyne to Montreal, was torpedoed and sunk by a German submarine at 1.30 a.m. on September 25th, 1940, about 900 miles W. of the Hebrides. Twelve of her crew were lost.

MACAO

1912; Flensburger Schiffs. Gesellschaft; 3,557 tons; 364-3x51x22; 318 n.h.p.; triple-expansion engines.

The German steamship *Palatia* was requisitioned by the Brazilian Government and renamed *Macao*. Subsequently she was torpedoed and sunk by a German submarine in the Atlantic on October 18th, 1917.

MACASSAR MARU

MACASSAR MARU

Nanyo Kaiun K.K.; 1920; *Mitsubishi Zosen Kaisha*; 4,026 tons; 345 x 50 x 29; 342 n.h.p.; triple-expansion engines. The steamship *Macassar Maru* was torpedoed and sunk by the U.S. submarine *Aspro* on October 7th, 1944, 50 miles south west of Vigan, Philippines.

McCAWLEY

U.S. Navy; 1928; *Furness S.B. Co.*; 7,712 tons; 465x63-9x 28-5; 8,000h.p.; oilengines. The motorship *McCawley*, serving as a transport, was torpedoed and sunk by a Japanese submarine on June 30th, 1943, after having landed troops at Rendova, New Georgia. Several of the crew were lost.

McCULLOCH

United States Navy, revenue cutter; 1898; *United States*; 1,280 tons; 219 X 33 X 15; single screw; 6 light guns. The United States revenue cutter *McCulloch* was lost by collision in the Pacific in October 1917.

McDOWELL

United States War Shipping Administration; 1943; *Sun S.B. & Dry Dock Co.*; 10,195 tons; 504x68-2x39-2; turbo-electric engines. The tanker *McDowell* was torpedoed and sunk by a German submarine on December 16th, 1943, on a voyage from New York to Aruba.

MACEDONIA

Anchor Line (Henderson Bros.); 1864; *Malcolmson & Co.*; 2,273 tons; 315x34x24-2; 486h.p.; compound inverted engines. The British iron cargo ship *Macedonia* was wrecked on May 30th, 1881, on the Mull of Kintyre while on a voyage from New York to the Clyde with cattle and a general cargo.

MACEDONIA

Hellenic Coast Lines Co.; 1898; *Bath Iron Works*; 1,839 tons; 262-5x35-6x20-1; 294 n.h.p.; triple-expansion engines. The Greek steamship *Macedonia* was bombed and sunk by German aircraft on April 23rd, 1941, in the Gulf of Corinth, during the invasion of Greece.

MACEDONIA

G. Bock & Co.; 1922; *Schiffs.-u. Docksbauwerke Flender*; 2,875 tons; 337-8x48-5x19; 262 n.h.p.; triple-expansion engines. The German steamship *Macedonia* was torpedoed and sunk by a British submarine on December 13th, 1942, off Susa.

MACEDONIER

Cie. Maritime Beige (Lloyd Royal) Soc. Anon.; 1921; *Lloyd Royal Beige (Gt. Britain)*; 5,227 tons; 400-5x52-3x28-7; 567n.h.p.; triple-expansion engines. The Belgian steamship *Macedonier* was torpedoed and sunk by a German submarine on December 12th, 1940, on a voyage from Halifax to the Tees.

MACEIO

79/0; *Bremer Vulcan*; 3,739 tons; 351x50-2x23-8; 222n.h.p.; triple-expansion engines. The German steamship *Santa Anna* was requisitioned by the Brazilian Government and renamed *Maceio*. Subsequently she was torpedoed and sunk by a German submarine off the N.W. coast of Spain on August 3rd, 1918.

MACLEAY

North Coast S.N. Co.; 1883; *Forrest & Son*; 398 tons; 155 x 25-3x10-7; 60r.h.p.; compound engines. The Australian coasting steamship *Macleay* with crew and passengers numbering 17 all told, foundered near Boondelbah Island, off Port Stephens, N.S.W., on October 11th, 1911. Fifteen persons were drowned.

MACORIS

Luigi Ohio; 1884; *Tyne I.S.B. Co.*; 2,052 tons; 287x37x22; 191 n.h.p.; compound engines. The ex-Dominican ship *Macoris* under the Italian flag was on her way from Piraeus to Venice to be broken up, but she foundered when 50 miles off Crete on the night of January 4th/5th, 1924.

MADALI

Les Cargos Algeriens Soc. Anon.; 1911; *Akt. Ges. Neptun*; 3,014 tons; 337 • 1 x 48 • 2 x 29 - 2; 309 n.h.p.; triple-expansion The French steamship *Madali*, under German control, was shelled and sunk by British warships on September 27th, 1943, off the north coast of France.

MADAME RENEE

T.G. Beatley & Son; 1904; *PorsgrundMek. Verksted*; 509 tons; 160 • 7 x 27 • 7 X 77; 52 r.h.p.; compound engines. The British ship *Madame Renee* was torpedoed and sunk by a German submarine one mile N.N.E. of Scarborough on August 10th, 1918. Ten lives were lost.

MADDALENA ODERO

Navigazione Odero Soc. Anon.; 1921; *N. Odero fu A. & Co.*; 5,479 tons; 394-4x51-7x27-2; turbine engines. The Italian steamship *Maddalena Odero* was torpedoed by a British submarine on August 17th, 1941, and bombed and sunk the following morning off Lampedusa.

MADDOX

United States Navy, destroyer; 1919; *Bethlehem S.B. Corp.*; 1,060 tons; 314-5x30-5x8-5; 25,000h.p.; 35 knots; turbine engines; four 4 in. guns, one 3 in.A.A., 12 T.T. The United States destroyer *Maddox*, Lt. Cdr. Sarsfield, was on anti-submarine patrol off Licata, Sicily, at the time of the American army landing on the island on July 10th, 1943. Just after daylight a German bomber dropped a bomb which exploded under her propellers, blowing up the after magazine and blowing away the stern. The *Maddox* rolled over and sank immediately, going down with Lt. Cdr. Sarsfield and nearly all her crew.

MADEIRA

Elder, Dempster & Co.; 1884; *Barclay, Curie & Co.*; 1,773 tons; 300 x 36 • 2 x 19 • 9; 221 n.h.p.; compound engines. The British cargo ship *Madeira* foundered 35 miles west of Ushant on November 17th, 1914, while carrying a general cargo from the west coast of Africa to Liverpool.

MADEIRA

7597; *ReiherstiegSchiffs.&Masch.*; 4,792 tons; 376-6x46-3x 27-3; 300n.h.p.; quadruple-expansion engines. The German steamship *Petropolis* was requisitioned by the Portuguese Government and renamed *Madeira*. Subsequently she was torpedoed and sunk by a submarine in the Mediterranean on October 7th, 1918.

MADELEINE

Ant. Dom. Bordes & Fils; 1902; *Chantier & Ateliers de St. Nazaire*; 2,709 tons; 282-8x44-1x22-7. The French sailing vessel *Madeleine* was sunk by a German submarine in the Atlantic on July 31st, 1917.

MADLINE

Pym, Bell & Co.; 1874; *Withy, Alexander & Co.*; 1,310 tons; 238-1x31'8x19-4; 130 h.p.; compound engines. The British cargo ship *Madeline* was wrecked on Storgrund Reef on October 24th, 1891, when carrying a cargo of deals from Munksund to London.

MADIANA

Quebec S.S. Co.; 1876; *R. Napier & Sons*; 3,080 tons; 344-8 x 39-4x21-1; 383 n.h.p.; triple-expansion engines. The Canadian steamship *Madiana* was wrecked off Bermuda on February 10th, 1903. She was carrying passengers from New York to Kingston, Jamaica.

MADIMBA

Compagnie de Nav. Africaine; 1919; Teikoku Stm. Shipyard; 2,013 tons; 270x39x21-7; 144 n.h.p.; triple-expansion engines. The Belgian ship *Madimba* was involved in a collision with the Belgian s.s. *Italier* and sank near the Ruytingen lightship on March 5th, 1921. She was on a voyage from Antwerp to Matadi. There were no survivors of the 43 crew.

MADRAS MARU

Nanyo Kaiun K.K.; 1919; Mitsubishi Zosen Kaisha; 3,802 tons; 345 X 50x29; 380 n.h.p.; triple-expansion engines. The steamship *Madras Maru* was torpedoed and sunk by the U.S. submarine *Barb* on May 31st, 1944, off the Kurile Islands.

MADRID

Hamburg-Sudamerika Dampfs. Ges.; 1922; Vulcan Werke; 8,777 tons; 439-5x56-7x27-4; 642n.h.p.; triple-expansion engines.

The German steamship *Madrid* was bombed and sunk by British aircraft on December 9th, 1941, at Ymuiden.

MADRUGADA

Gravenhorst & Co.; 1917; McEachern Shpyd Co.; 1,613 tons; 229-4x48x18-8; 137n.h.p.; auxiliary oil engines. The American auxiliary sailing ship *Madrugada* was sunk by a German submarine in the Western Atlantic on August 15th, 1918.

MADURA

Furness, Withy & Co.; 1873; Richardson, Duck & Co.; 2,324 tons; 309 X 36 • 1 X19 - 7; 242 n.h.p.; triple-expansion engines. The British cargo ship *Madura* foundered in 43 °N., 32° W., on November 28th, 1895, while carrying a cargo of salt from Hamburg to Port Royal.

MAEBASHI MARU

Nanyo Kaiun K.K.; 1921; Yokohama Dock Co.; 7,005 tons; 445 x58x 34; 632 n.h.p.; triple-expansion engines. The steamship *Maebashi (Maebasi) Mam* was torpedoed and sunk by the U.S. submarine *Pogy* on September 30th, 1943, S.W. of the Caroline Islands.

MAEDA

Andromeda Cia. Nav. S.A. (A. Lusi); 1921; W. Dobson & Co.; 4,877 tons; 369 x 52 X—; triple-expansion engines. The Costa Rican ship *Maeda* was on a voyage from Rio de Janeiro to Rotterdam with iron ore when she was involved in a collision with the Norwegian tanker *Salsaa*s and sank in a fog on July 16th, 1956, in 51° 50'N., 11°E.

MAGALLANES

S.A. Comm. Braun & Blanchard; 1909; A. Rodger & Co.; 1,880 tons; 270x37-4x18-7; 236n.h.p.; triple-expansion engines.

The Chilean ship *Magallanes* was wrecked on May 1st, 1938, at Huafo, Chile.

MAGANE MARU

Japanese Navy; 3,120 tons. The steamship *Magane Maru* was taken over by the Japanese Navy and converted into an auxiliary gunboat. On January 23rd, 1944, she was torpedoed and sunk by the U.S. submarine *Snook* about 300 miles S. of Yokohama.

MAGDA

H.A. Meyer; 1905; R. Duncan & Co.; 1,603 tons; 227-7x 35-1x14-5; 125 n.h.p.; triple-expansion engines. The Norwegian steamship *Magda* was torpedoed and sunk by a German submarine in the Bristol Channel on August 18th, 1915.

MAGDALA

Petroleum Maats La Corona (Anglo-Saxon Petroleum Co.); 1931; N.V. C. Van der Giessen & Zonens Schps.; 8,248 tons; 450-9x62x34-1; 714 n.h.p.; oil engines. The Dutch tanker *Magdala* left Reykjavik on January 15th, 1945, for Manchester in ballast, but was not seen again.

MAGDALENA

Smith, Hogg & Co.; 1923; Craig, Taylor & Co.; 3,118 ton; 325 x 48x22-4; 297 n.h.p.; triple-expansion engines. The British steamship *Magdalena*, on a voyage from St. John's, Nfld., to Liverpool, was torpedoed and sunk by a German submarine on September 18th, 1940, about 600 miles W. of the Hebrides. All her crew of 30 and one gunner were lost.

MAGDAPUR

T.&J.Brocklebank; 1921; Lithgows; 8,641 ton; 473x64x 34-2; 1,147n.h.p.; 13-5 knots; turbine engines. The steamship *Magdapur*; Capt. A. G. Dixon, was mined and sunk about five miles off Aldeburgh, Suffolk, on September 10th, 1939. Two European and four Indian members of the crew were killed, and five Europeans, including Capt. Dixon, and 13 Indians were wounded. The survivors numbering about 80, including 17 British, were taken off by two steamships.

MAGDEBURG

German Navy, light cruiser; 1911; Weser; 4,550 tons; 446 x 43 X16-5; 22,300 i.h.p.; 25-5 knots; turbine engines; Schulz-Thornycroft boilers; twelve 41 in. guns, four 5pr., 4 m.g., 2 T.T.

The German light cruiser *Magdeburg* was one of the early casualties in the First World War. The ship was operating at the entrance to the Gulf of Finland in company with a number of destroyers and torpedo-boats during the last week of August, 1914. This force came into contact with a small Russian squadron, including the cruisers *Bogatyr* and *Pallada*. In the engagement which followed the *Magdeburg* ran aground off the island of Odensholm and became an easy target for the Russians, who swiftly completed her destruction. One prize which fell into their hands was the secret signal code of the German navy, and this the Russians passed on to the British.

The escorting destroyers escaped, some in a badly damaged condition, and eventually arrived at Kiel.

The *Magdeburg* carried a complement of 370, but what proportion of this number was lost in the action is not recorded.

MAGDEBURG

Hamburg-Amerika Linie; 1925; Blohm & Voss; 6,128 tons; 449-4x58-2x26-8; 1,587 n.h.p.; oil engines. The German motorship *Magdeburg* was bombed, and sunk by Allied aircraft on August 13th, 1944, off Royan, France.

MAGELLAN

Messageries Maritimes; 1897; Messageries Maritimes; 6,027 tons; 446-2x50-8x36-1; 417n.h.p.; triple-expansion engines. The French steamship *Magellan* was torpedoed and sunk by a submarine in the Mediterranean on December 11th, 1916.

MAGELLAN

Ant. Dom. Bordes & Fils; 1904; Chantier & Ateliers de St. Nazaire; 6,265 tons; 406-5x50-7x28-3; 534n.h.p.; triple-expansion engines.

The French steamship *Magellan* was torpedoed and sunk by a German submarine in the Atlantic on December 28th, 1917.

MAGGIE

Rich. Peterson; 1915; Akers Mek. Varksted; 1,118 tons; 226'4x36-3x16-6; 127n.h.p.; triple-expansion engines. The Norwegian steamship *Maggie* was torpedoed and sunk by a German submarine off the N.W. coast of Ireland on June 22nd, 1917.

MAGIC

British Navy, fleet minesweeper; 1942; United States; 890 tons; 220-5x32x—; 2,400 b.h.p.; 18 knots; oil engines; two 3 in. guns, several smaller.

The fleet minesweeper *Magic*, Lt. Cdr. T. P. Davies, R.N.R., was sunk by a "human torpedo" off the coast of Normandy on July 6th, 1944. Three officers and 23 ratings were killed. Lt. Cdr. Davies was among the survivors.

See also *Cato*.

MAGICIAN

MAGICIAN

Charente S.S. Co.; 1925; New Waterway S.B. Co.; 5,105 tons; 394•9x52•5x27•9; 465 n.h.p.; triple-expansion engines. The British cargo ship *Magician* was wrecked at Craig Ewen Point, two miles N. of Peterhead on April 14th, 1944. She was on a voyage from Trinidad to London carrying a general cargo.

MAGNE

Stockholms Rederi. Svea; 1912; Helsingor Jernskibs & Maskin; 1,226 tons; 246-9x37-1x14; 169 n.h.p.; triple-expansion engines.

The Swedish steamship *Magne* was torpedoed and sunk by a German submarine on Marciv 14th, 1945, on a voyage from Dundee to London. Ten of her crew were killed.

MAGNHILD

M. Clausen; 1898; Fevigs Jernskibsbyg.; 1,136 tons; 216-4x31-9x20-7; 106 n.h.p.; triple-expansion engines.

The Norwegian ship *Magnhild*, Capt. T. Velde, was under charter to the Newfoundland—Canada S.S. Co. when she went ashore on June 6th, 1936, at Mistaken Point about seven miles W. of Cape Race. She sank in the heavy seas. She was on her way from St. Pierre, Miq. to St. John's, Nfld., with coal, cattle and general cargo.

MAGNUS

Det Forenede D/S; 1906; Sunder land S.B. Co.; 1,339 tons; 240X36-5x16-7; 145 n.h.p.; triple-expansion engines. The Danish steamship *Magnus* struck a mine and sank on December 9th, 1939, 40 miles E.N.E. of Peterhead. There was only one survivor.

MAGPIE

British Navy, steam gunboat; 236 tons; 60 n.h.p.; steam engine; one 68pr. gun, one 32pr. The gunboat *Magpie*, Lt. G. R. Bell, was wrecked in Galway Bay on April 3rd, 1864. The loss of life is not known.

MAHAN

United States Navy, destroyer; 1935; United Dry Docks Co.; 1,500 tons; 341-2x34-7x9-9; 42,800s.h.p.; 36-5 knots; turbine engines; Express boilers; four 5 in. guns, several smaller, 12 T.T.

The destroyer *Mahan* was bombed and sunk by Japanese aircraft in Ormoc Bay, Leyte Island, Philippines, on December 7th, 1944. The vessel carried a complement of over 250.

MAHENGE

Cie. Maritime Congolaise; 1944; California S.B. Corp.; 7,647 tons; 439•1x62•1x34•5; turbine engines.

The Belgian ship *Mahenge* was on a voyage from Antwerp to Matadi when, on June 30th, 1952, in a fog off Alderney, she was involved in a collision with the *Granville* and sank.

MAHRATTA

T. & J. Brocklebank; 1892; Harland & Wolff; 5,730 tons; 446x49-2x30; 429 n.h.p.; triple-expansion engines. The British cargo ship *Mahratta* was wrecked on the Goodwins on April 19th, 1909. She was on a voyage from Calcutta to London and Dundee carrying a general cargo.

MAHRATTA

British Navy, destroyer; 1941; British Isles; 1,920 tons; 354X37x10; 48,000s.h.p.; 36-5 knots; turbine engines; 3-drum boilers; six 4•7 in. guns, one 3 in. A.A., 4 T.T. The destroyer *Mahratta*, Lt. Cdr. E. A. F. Drought, D.S.C., was torpedoed and sunk by a German submarine in the Barentz Sea while escorting a convoy to North Russia on February 25th, 1944. Eleven officers, including Lt. Cdr. Drought, and 209 ratings were killed.

MAHUKONA

Navebras Soc. Anon. (De Carvalho); 1919; Gt. Lakes Eng. Works; 2,512 tons; 253-4x43-7x24-5; 210n.h.p.; triple-expansion engines.

On a voyage from New York to Rio de Janeiro with a cargo of coal, the Brazilian ship *Mahukona* was reported to be in distress on

March 15th, 1941, and was abandoned by her crew. Naval ships searched for her but apart from some wreckage nothing was found of the ship or her crew.

MAID OF KENT

Southern Railway; 1925; W. Denny & Bros.; 2,693 tons; 329-5x45-1x17-1; 21-5 knots; turbine engines. The steamship *Maid of Kent*, Capt. Addenbrooke, was serving as a hospital ship during the evacuation of the British army from France in May, 1940. On the 21st, when in Dieppe harbour, the vessel was bombed and sunk by German dive-bombers. Forty-three lives were lost. Capt. Addenbrooke was among the survivors.

MAID OF ORLEANS

Southern Railway; 1918; W. Denny & Bros.; 2,386 tons; 341-1x42-1x16; 24 knots; turbine engines. The steamship *Maid of Orleans*, Capt. C. M. Masters, was serving as an auxiliary transport during the invasion of Normandy. On June 28th, 1944, the vessel embarked a number of troops from the Normandy beaches and set course for the Isle of Wight. During the crossing she was torpedoed and sunk by a German submarine with the loss of five killed. Capt. Masters was among the survivors.

MAID OF SPETSAL

Byron S.S. Co.; 1921; J. I. Thornycroft & Co.; 1,511 tons; 240-5x36-2x16-4; 176 n.h.p.; triple-expansion engines. The British cargo ship *Maid of Spetsal* sank after a collision 43 miles W. of the Casquets on January 26th, 1924. She was on a voyage from the Tyne, via London, to Piraeus and Constantinople carrying a general cargo and coal.

MAIDAG

R. Peter son; 1916; P. Ph. Stuhr's Mask. & Skibs.; 1,235 tons; 238•9X36•3X13•5; 83 n.h.p.; triple-expansion engines. The Norwegian steamship *Maidag* was torpedoed and sunk by a German submarine on December 15th, 1917.

MAIDAN

T. & J. Brocklebank; 1912; W. Hamilton & Co.; 8,205 tons; 500X58-2X32-7; 747n.h.p.; quadruple-expansion engines. The British cargo ship *Maidan* was wrecked on Rocky Island, near St. John's Island in the Red Sea, on June 10th, 1923. She was carrying a general cargo from Calcutta to the United Kingdom.

MAIDAN

T. & J. Brocklebank; 1925; C. Connell & Co.; 7,908 tons; 470X62-2X32-4; 1,047n.h.p.; 12 knots; turbine engines. The steamship *Maidan*, Capt. C. L. Miller, was a unit of what has become known as the *Jervis Bay* convoy. The ship was sunk in the North Atlantic by the German pocket battleship *Admiral Scheer* on November 5th, 1940. The whole of the crew of 19 Europeans, including a naval gunner, and 71 Indians went down with the vessel. The full story of the action is told under the auxiliary cruiser *Jervis Bay*.

MAIDEN CREEK

Waterman Steamship Corp.; 1919; American International S.B. Corp.; 5,731 tons; 390x54-2x27-6; 2,500i.h.p.; 10-5 knots; turbine engines.

The American steamship *Maiden Creek*, Capt. G. R. Cook, foundered on December 31st, 1942, on a voyage from Botwood, Nfld. to New York. Twenty men were drowned and 16 injured. Capt. Cook was among the survivors picked up on January 3rd about 80 miles S.E. of Long Island.

MAIDEN CREEK

Waterman Steamship Corp.; 1943; Gulf Shipbuilding Corp.; 6,165 tons; 445x63x31-2; 16 knots; turbine engines. The American steamship *Maiden Creek*, Capt. Oscar Pedersen, was the second ship of that name to be lost by the Waterman Steamship Corp. in the Second World War. On March 17th, 1944, she was torpedoed and sunk by an enemy submarine off South-Western Sardinia. Six men were killed and five wounded. Capt. Pedersen was among the survivors.

MAIKAZE

Japanese Navy, destroyer; 1941; Japan; 2, 200 tons; 415x35x—; 34 knots; turbine engines; six 5 in. guns., eight 25 mm.A.A. 15 T.T.

The destroyer *Maikaze* was one of the vessels lost in the defence of the naval base of Truk in the Carolines Group. The fighting extended over three days, February 16th-18th, 1944, and was between mainly U.S. carrier-borne aircraft and Japanese warships. The *Maikaze* was damaged by gunfire and sunk by bombs on the 17th. She carried a complement of over 200.

For further details see the light cruiser *Agano*,

MAIKOP

U.S.S.R.; 1929; Nicolaieff State S.B. Yard; 1,846 ton; 250-9x37-4x20-7; 315 n.h.p.; oil engines. The Russian motorship *Maikop* was bombed and sunk by Japanese aircraft on December 26th, 1941, off the Gulf of Davao, Min-dano Islands, Philippines.

MADLLE

French Navy, destroyer; 1931; Penhoet, St. Nazaire; 2,441 tons; 424-2x39x15-7; 64,000 s.h.p.; 36 knots; turbine engines; Penhoet boilers; five 5-5 in. guns, four 27 mm., 6 T.T. The destroyer *Maille Breze*, Capt. Glotin, caught fire while lying off Greenock on April 30th, 1940. All efforts to subdue the flames were unavailing and later the destroyer blew up and sank. She carried a complement of ten officers and 230 ratings, of whom 28 ratings lost their lives.

MAIMOA

Shaw Savill & Albion Co.; 1920; Palmers' Co.; 10,123 tons; 473-9x63x31-2; 1,039 n.h.p.; 14 knots; quadruple-expansion engines.

The liner *Maimoa*, Capt. H. S. Cox, was intercepted and sunk by the German raider *Pinguin* on November 20th, 1940, in the Indian Ocean, approximately 1,000 miles W. of Fremantle, Western Australia. There were no casualties but those on board were taken prisoner by the raider.

MAIN

Main Colliery Co.; 1904; Mackie & Thomson; 715 tons; 195x29x11-6; 140 n.h.p.; 9 knots; triple-expansion engines. The collier *Main* was intercepted by a German submarine one and a half miles E. of Drummore, Luce Bay, Wigtownshire, on October 9th, 1917. The submarine opened fire from the surface and sank the vessel by gunfire. Twelve men were killed. The captain was among the survivors.

MAINDY HILL

M.Taylor; 1911; Osbourne, Graham & Co.; 1,918; 279-5 x 41-8x18-3; 188 n.h.p.; triple-expansion engines. The collier *Maindy Hill* was requisitioned by the Admiralty early in the Second World War. On March 9th, 1940, she was sunk in collision off Hartlepool.

MAINDY KEEP

D. R. Llewellyn, Merrett & Price; 1921; Rennie, Ritchie & Newport S.B. Co.; 973 tons; 207-5x33-6x13-5; 106n.h.p.; triple-expansion engines.

The British cargo ship *Maindy Keep* foundered in lat. 48° 45' N., long. 4° 55' W., on August 18th, 1924, while on a voyage from Swansea to Bordeaux carrying a cargo of coal.

MAINE

United States Navy, 2nd class battleship; 1890; New York Navy Yard; 6,682 tons; 324x57x21-5; 9,293 i.h.p.; 17-45 knots; triple-expansion engines; four 10 in. guns, six 6 in., seven 6 pdr., four 1 pdr., 4 m.g., 4T.T.

The United States ship *Maine* was a small 2nd class battleship carrying four 10 in. guns in two turrets arranged 'en echelon' and built out on sponsons, the forward turret being on the starboard side and the after turret on the port side. In October, 1897, she formed part of the U.S. North Atlantic Squadron. The relationship between Spain and the United States was at that time somewhat

strained owing to the insurrection in Cuba, and on October 8th the *Maine* was detached from the squadron and sent to Port Royal, South Carolina, to await further orders.

During the next three months an attempt was made by the diplomats on both sides to relax the tension, but apart from this the feeling among the populace of both countries still ran very high. In January, 1898, there was rioting at Havana, Cuba, directed against those who desired autonomy for the island and, by implication, the United States residents. No overt act occurred, however, and with a view to sobering the more fiery spirits the government at Washington suggested a friendly exchange of visits, thus enabling it to send a warship to the spot without arousing hostile feelings. It was arranged for the Spanish armoured cruiser *Viscaya* to proceed to New York and the *Maine* to proceed to Havana.

On January 25th the U.S. battleship dropped anchor off Morro Castle, Havana, and swung, innocently enough, so as to be able to bring her guns to bear on the shore batteries with very little difficulty. Outwardly everything was calm, but the visit was not desired by the Spanish authorities, and the Americans, for their part, were taking no chances. The usual formal calls were exchanged and then the ship's company settled down to a lengthy stay. For three weeks the *Maine* lay at anchor, during which time things appeared to be improving.

The ship was under command of Capt. Charles Dwight Sigsbee and carried 22 officers and 328 men. On the evening of February 15th the captain was writing letters in his cabin when the vessel was rent by a tremendous explosion. The lights failed immediately and the captain groped his way on deck to find that the forward magazine had exploded and blown the whole of the bow portion of the ship into the air. The crew's quarters were there and as the men had turned in only half-an-hour before, the loss of life was appalling. The survivors gathered aft on the quarter-deck and were quickly taken off by the boats of the Spanish cruiser *Alfonso XII* and the American ship *City of Washington*, Capt. Sigsbee being carried to the latter vessel.

Meanwhile the *Maine* was subsiding into a mass of blazing wreckage. A roll-call established that two officers and 250 men had been killed or drowned. Eight badly injured men were landed at Havana and died soon afterwards, making a total loss of 260 lives. Many of the survivors were injured, but most of the officers escaped owing to the explosion having occurred in the men's quarters forward.

Capt. Sigsbee was quick to perceive what might eventuate when the news was given out, and in his first report, made shortly after the explosion, he urged that "... public opinion should be suspended until further report". This sound advice was of little avail in the excited state of mind of the American people.

Separate Courts of Inquiry were set up by the governments of Spain and the United States. The Spanish commission considered that the explosion was caused internally, and published its findings to that effect. The U.S. commission reported as follows:—

1. That the U.S. battleship *Maine* arrived in the harbour of Havana, Cuba, on the 25th day of January, 1898, and was taken to buoy No. 4, in from five to six fathoms of water by the regular Government pilot.

The U.S. Consul-General at Havana had notified the authorities at that place, the previous evening, of the intended arrival of the *Maine*.

2. The state of discipline on board the *Maine* was excellent, and all orders and regulations in regard to the care and safety of the ship were strictly carried out.... On the night of the destruction of the *Maine* everything had been reported secure for the night at 8 p.m. by reliable persons, through the proper authorities, to the commanding officer. At the time the *Maine* was destroyed the ship was quiet, and, therefore, least liable to accident caused by movements from those on board.

3. The destruction of the *Maine* occurred at 9.40 p.m. on the 15th day of February, 1898, in the harbour of Havana, Cuba, she being at the time moored to the same buoy to which she had been taken upon her arrival. There were two explosions of a distinctly different character, with a very short but distinct interval between them, and the forward part of the ship was lifted to a marked degree at the time of the first explosion. The first explosion was more in the nature of a report like that of a gun, while the second explosion was more open, prolonged, and of greater volume. This second explosion was, in the opinion of the court, caused by

the partial explosion of two or more of the forward magazines of the *Maine*.

4. The evidence bearing upon this, being principally obtained from divers, did not enable the court to form a definite conclusion as to the condition of the wreck, although it was established that the after part of the ship was practically intact, and sank in that condition a very few minutes after the destruction of the forward part.

5. . . . In the opinion of the court this effect could have been produced only by the explosion of a mine situated under the bottom of the ship at about frame 18 and somewhat on the port side of the ship.

6. The court finds that the loss of the *Maine* on the occasion named was not in any respect due to fault or negligence on the part of any of the officers or members of the crew of the said vessel.

7. In the opinion of the court the *Maine* was destroyed by the explosion of a submarine mine, which caused the partial explosion of two or more of the forward magazines.

8. The court has been unable to obtain evidence fixing the responsibility for the destruction of the *Maine* upon any person or persons.

There can be no doubt that the disaster to the U.S.S. *Maine* brought about the American-Spanish War of 1898. Intense public feeling was manifested in North America arising from a conviction that the Spaniards had deliberately mined the vessel.

In 1909 it was decided to raise the wreck of the *Maine* as it was a danger to navigation and a hindrance to the growing port of Havana. The United States appointed Major Ferguson, U.S. Engineers, as expert investigator. From his survey it appears as though the plates of the ship had been blown inwards from some outside explosive force. Major Ferguson reported therefore that the findings of the original U.S. Court of Inquiry were substantially correct. The ship was eventually brought to the surface in June, 1911.

MAINZ

German Navy, light cruiser; 1909; Vulkan Co.; 4,350 tons; 426x46x17-7; 20,000 i.h.p.; 27-2 knots; turbine engines; Schuh-Thornycroft boilers; twelve 4-1 in. guns, four 5pr. 4m.g.; 2 T.T.

On the morning of August 28th, 1914, the German light cruiser *Mainz* was lying off the Ems, when she was ordered to stand by for the Heligoland Bight. The British had commenced a sweep of the German light forces in that area, but the *Mainz* was not released from her guard duty until 9 a.m. She then steamed at full speed on an easterly course and later, in obedience to an order to go to the assistance of the *Sralsund*, she turned N.E. running into the British 1st Flotilla. The destroyers went in chase and after about 20 minutes the *Mainz* changed her course 16 points, as she had sighted the 1st Light Cruiser Squadron under Commodore Goodenough. There was an exchange of salvos but no hits were scored and the *Mainz* was saved for a few minutes by running into the mist. At her re-appearance she sighted the light cruiser *Fearless* and the 1st Division of the 1st Flotilla, upon which she immediately opened fire with telling effect. The destroyers *Laurel*, *Liberty* and *Laertes* were all hit and badly damaged, having 49 killed and wounded.

The 1st Light Cruiser Squadron now appeared and these ships began to fire at a range of under 6,000 yards with great accuracy. In a short time the *Mainz* was a shambles and burning fiercely. She was finally torpedoed by the destroyer *Lydiard* and at 1.8 p.m. she turned over and sank. Of her complement of 437 officers and men 89 were killed and 60 wounded. The destroyer *Lurcher* took on board 346 survivors and the cruiser *Liverpool* picked up two officers.

A more detailed account of the battle may be seen under the *Kohn*, flagship of the German squadron, which was also sunk.

MAIORESE

John Glynn & Son; 1875; Bowdler, Chaffer & Co.; 1,739 tons; 272•6x33•4x22•9; 202 n.h.p.; compound engines. The British cargo ship *Maiorese* foundered after striking North Stack Rocks, Holyhead, on May 23rd, 1913. She was on a voyage from Liverpool to Genoa carrying a general cargo.

MAIPU

Cia. Arg. de Nav. Dodero; 1951; N.V. Konink. Maats. "De Schelde"; 11,515 tons; 490-4x64 -2x35 oil engines. Carrying 107 passengers and general cargo from Buenos Aires to Hamburg, the Argentine ship *Maipu* was in collision with the *General M.L. Hersey* during a fog at the mouth of the River Weser on November 4th, 1951. She sank in about 80 feet.

MAITAI

Union S.S. Co. of New Zealand; 1892; C. S. Swan & Hunter; 3,393 tons; 345 x42-2x25-1; 722 n.h.p.; triple-expansion engines. The British cargo ship *Maitai* was wrecked at Raratonga on December 25th, 1916, while on a voyage from San Francisco to Wellington.

MAITLAND

Newcastle & Hunter River Steamship Co.; 1870; McCulloch & Co.; 880 tons; 231-5x27-1x12-6; 401 n.h.p.; 10 knots; compound engines.

The paddle steamship *Maitland* left Sydney for Newcastle, N.S.W., at 11 o'clock on the night of May 5th, 1898, with a crew of 33 and 30 passengers. The weather was very rough and once outside Sydney Heads the ship encountered the full force of the gale. A heavy deck cargo of machinery broke adrift and began to cause serious damage, the vessel took water and it was decided to put back to Sydney, about 19 miles distant.

The engines were kept going until the water gained upon the pumps and the engine room was flooded. Just before daybreak the *Maitland* crashed upon the rocks off Barrenjoey Lighthouse, near Broken Bay and heavy seas broke her in two. The bow was partly under water and passengers and crew who were on that portion of the wreck were swept away and drowned. In all 21 persons were lost, including the first officer.

MAITLAND

I.Scheja; 1882; Earle's Co.; 1,557 tons; 267x34-1x18-1; 134 n.h.p.; compound engines.

On February 3rd, 1926, the Swedish ship *Maitland*, carrying wood-pulp from Oslo to Ridham Dock, was involved in a collision and sank in the Thames Estuary, five miles S. of Cross Sand.

MAJA

Rederi Aktieb. Tertia; 1883; S. P. Austin & Sons; 1,420 tons; 245x36-1x17-6; 169 n.h.p.; compound engines. The Swedish steamship *Maja* was torpedoed and sunk by a German submarine in the Irish Channel on October 11th, 1918.

MAJA

AID John Millars Eftf.; 1883; C. S. Swan & Hunter; 1,297 tons; 245-2x34-1x17-3; 118 n.h.p.; triple-expansion engines. The Swedish ship *Maja*, carrying coal from Hartlepool to Kopmanholmen, ran ashore and sank on July 4th, 1936, outside Trysunda.

MAJA

Lauritzen; 1923; Ostseewerft Schiffb. & Maschin A.G.; 2,203 tons; 263-5x41-1x16-9; 243 n.h.p.; triple-expansion engines.

The Danish steamship *Maja*, under German control, struck a mine and sank on January 31st, 1941, off the River Elbe.

MAJA

Anglo-Saxon Petroleum Co.; 1931; C. van der Giessen; 8,181 tons; 451 x62-1x34; 4,200 b.h.p.; 12-5 knots; oil engines. The tanker *Maja*, Capt. W. C. Robinson, was torpedoed and sunk by a German submarine on January 15th, 1945, about 30 miles S.W. of the Isle of Man. Seventeen of her crew and eight gunners were killed. Capt. Robinson was among the survivors.

MAJESTIC

British Navy, 1st class battleship; 1895; Portsmouth Dockyard; 14,900 tons; 413x75x30; 12,000 i.h.p.; 17-9 knots; triple-expansion engines; four 12 in. guns, twelve 6 in., sixteen 12pr., twelve 3pr., 2 m.g., 5 T.T.

At the outbreak of the First World War the battleship *Majestic* was a unit of the 7th Battle Squadron, forming part of the Channel

Fleet. Later she was employed in escorting the first Canadian contingent to England. On February 1st, 1915, she sailed for the Dardanelles, arriving on the 25th, a few days after the first bombardment of the forts had taken place.

The *Majestic* had an official complement of 757 officers and men, commanded by Capt. H. F. G. Talbot. On May 26th she lay at anchor off Cape Helles, opposite 'W Beach, with her torpedo nets spread and surrounded by a number of transports. At 6.45 on the following morning her lookouts descried a periscope at a distance of some 400 yards and at once opened fire. The submarine was manoeuvred with great skill, however, and finding a clear run for her torpedo between the anchored merchantmen, hit the *Majestic* with two torpedoes. The battleship capsized and sank in seven minutes.

About 40 men were killed. Capt. Talbot was among the survivors.

The *U-21*, which made the attack, was commanded by Lt. Cdr. Hersing.

During the Dardanelles offensive the following battleships were lost:—

<i>Messudieh</i>	Turkish	10,000 tons	December 3th,	1914	submarine
<i>Bouvet</i>	French	12,205	March 18 th	1915	mine
<i>Irresistible</i>	British	15,500	" "	" "	" "
<i>Ocean</i>	"	12,950	" "	" "	" "
<i>Goliath</i>	"	12,950	May 13 th	" "	submari
<i>Triumph</i>	"	11,985	" 25 th	" "	" "
<i>Majestic</i>	"	14,900	" 27 th	" "	" "
<i>Harredin Barbarosse</i>	Turkish	9,900	August 8 th	" "	" "

MAJESTIC

Cosens & Co.; 1901; *A.&J.Inglis*; 408 tons; 215-5x27-1x8-9; 226 n.h.p.; 15 knots; triple-expansion engines.

The paddle steamship *Majestic* was taken over by the Admiralty during the First World War for service as an auxiliary patrol vessel. On July 28th, 1916, she sprang a leak and sank near Oran without loss of life.

MAJORWHEELER

Baltimore-Insular Line; 1918; *Hanlon D.D. & S.B. Co.*; 3,431 tons; 305 x 46x24-5; 1,633 i.h.p.; 11 knots; triple-expansion engines.

The American steamship *Major Wheeler*, Capt. Frank Losey, was torpedoed and sunk by a German submarine in the South Atlantic on February 10th, 1942. Thirty men, including Capt. Losey, were killed. The vessel was not in convoy.

MAJORKA

K.Brugsgaard; 1882; *R.Duncan & Co.*; 1,684 tons; 259-5x38-2x23-1.

The Norwegian sailing ship *Majorka* was torpedoed and sunk by a German submarine off the north coast of Scotland on August 14th, 1917.

MAJU

Killick & Martin; 1874; *Brown*; 953 tons; 201-5x32-1x21-2. The new iron clipper ship *Maju* of London, Capt. J. Smith, was wrecked off the Hebrides on October 20th, 1874, with the loss of all on board. She was a few days out of Dundee on her maiden voyage to China.

MAKALLA

T. & J. Brocklebank; 1918; *R. Duncan & Co.*; 6,677 tons; 445x58-2x31-2; 701 n.h.p.; 12 knots; triple-expansion engines.

The steamship *Makalla*, Capt. A. S. Bain, was in convoy in the Pentland Firth on August 23rd, 1940, when she was bombed and sunk by German aircraft. There were twelve killed and seventeen wounded, including Capt. Bain.

MAKIGUMO

Japanese Navy, destroyer; 1941; *Japan*; 2,200 tons; 415 x35x—; 34 knots; turbine engines; six 5 in. guns, eight 25 mm.A.A., 15 T.T.

The destroyer *Makigumo* struck a mine and sank off Guadalcanal on February 1st, 1943. She carried a complement of over 200.

MAKINAMI

Japanese Navy, destroyer; 1941; *Japan*; 2,200 tons; 415x35x—; 34 knots; turbine engines; six 5 in. guns, eight 25 mm.A.A., 15 T.T.

The destroyers *Makinami* and *Onami*, both of 2,200 tons, and the *Yugiri* of 1,700 tons, with several others were patrolling S. of New Ireland on the night of November 25th, 1943, when they ran into four U.S. destroyers engaged upon the same duty. The three above-mentioned destroyers were sunk and the remainder retired from the action. The locality in which the fight took place was between Buka and Cape St. George. No American ship was lost or damaged.

The *Makinami* and *Onami* carried complements of over 200 apiece and the normal complement of the *Yugiri* was 197.

MAKKAVEI

M.&J. Rosenstein Bros.; 1900; *Sir W. G. Armstrong, Whitworth & Co.*; 1,727 tons; 260-5x36-1x19-8; 202 n.h.p.; triple-expansion engines.

The Russian steamship *Makkavei* struck a mine and sank in the Black Sea in April, 1915.

MAKKIFALBAUMS

German Government; 1912; *Irvine's S.B. & D.D. Co.*; 1,913 tons; 279x40-1x18-5; 175 n.h.p.; triple-expansion engines.

The steamship *Makki Faulbaums* was formerly Latvian, seized by the Germans. On February 11th, 1944, she was torpedoed and sunk by a British submarine about 24 miles N.W. of Namsos, Norway.

MALABAR

Burns, Philp & Co.; 1925; *Barclay, Curie & Co.*; 4,512 tons;

350-9x48-7x22-7; 625 n.h.p.; oil engines. The British motorship *Malabar* was wrecked seven miles S. of Port Jackson, N.S.W., on April 2nd, 1931. She was on a voyage from Melbourne, via Sydney, to Singapore carrying passengers and a general cargo.

MALABAR

T. & J. Brocklebank; 1938; *W. Hamilton & Co.*; 7,976 tons;

475-8x62-7x32-3; 1,035 n.h.p.; 12 knots; turbine engines. The steamship *Malabar*, Capt. H. H. Armstrong, O.B.E., was bound for London in convoy with a general cargo when she was torpedoed by a German submarine 60 miles W.N.W. of the Bishop Rock, Stilly Isles, on October 29th, 1939. The attack took place at 3 a.m. without warning, the torpedo striking the ship on the starboard side and exploding in the engine room. The crew numbered 75, of whom five were killed and two wounded. The survivors, including Capt. Armstrong, took to the boats and were picked up without further loss.

MALACCA MARU

Nippon Yusen K.K.; 1920; *Mitsubishi Zosen Kaisha*; 5,374 tons; 400x54-5x30; 493 n.h.p.; triple-expansion engines. On May 4th, 1939, the Japanese ship *Malacca Maru* went ashore and broke in two near Wood Island. She was on a voyage from Vizagapatam to Osaka.

MALAGA

79/7; *Akers Mek. Vcerks.*; 1,115 tons; 226-4x36-5x15-8; 127 n.h.p.; triple-expansion engines.

The Norwegian ship *Alix*, owned by A. Salvesen, was seized by Spanish insurgents in 1937 and renamed *Malaga*. She struck a rock and sank on May 31st, 1938, at Cabo de Quejo.

MALAKOFF

Soc. Aux. des Chargeurs Francais; 1903; *Northumberland S.B. Co.*; 4,597 tons; 360x47-9x20-2; 357 n.h.p.; triple-expansion engines.

On a voyage from Antwerp to Madagascar, the French ship *Malakoff/as* wrecked on January 2nd, 1929, near Port Mahon, Minorca Island. The ship sank in seven minutes, dragging down one of the boats with 27 men. The remaining six of the crew in another boat managed to pull clear and were later picked up.

MALANTIC

MALANTIC

C. D. Mallory Corp.; 1929; *Northumberland S.B. Co.*; 3,837 tons; 370-3x51-5x22-6; 298 n.h.p.; quadruple-expansion engines. The American steamship *Malantic* was torpedoed and sunk by a German submarine on March 9th, 1943, on a voyage from New York to Barry. Twenty-five of her crew were lost.

MALAYMARU

Hachiuma Risen K.K.; 4,556 tons. The steamship *Malay Maru* was torpedoed and sunk by the U.S. submarine *Silversides* on January 25th, 1945, W. of the Shichi-to Islands, Japan.

MALAYA

Ty Cameo Sobrino; 1906; *Hawthorn, Leslie & Co.*; 1,527 tons; 230-2x36•2x21-5; 185 n.h.p.; triple-expansion engines. The American ship *Malaya* was on a voyage from Manila to Amoy with a cargo of sugar when she went ashore on April 2nd, 1924, and sank.

MALAYA

Transporte de Minerales S.A.; 1920; *Government Yard*; 2,050 tons; 273-8x39-8x —; triple-expansion engines. The Panamanian ship *Malaya* was on a voyage from Hong Kong to Kobe when the cargo of scrap shifted, and knocked a hole in the ship's side. She sank on October 6th, 1959.

MALAYA II

Ministry of War Transport (United Baltic Corp.); 1921; *Burmeister & Wain*; 8,651 tons; 445-8x60-3x39-1; 987 n.h.p.; 12-5 knots; oil engines. The former Danish steamship *Malaya II*, Capt. V. Kragelund, was torpedoed and sunk by a German submarine in the North Atlantic on June 27th, 1941. Forty-one men, including Capt. Kragelund, were killed.

MALDA

British India Steam Navigation Co.; 1913; *Barclay Curie & Co.*; 7,896 tons; 450x58-2x33-3; 900 n.h.p.; 12-5 knots; triple-expansion engines.

The liner *Malda*, Capt. Charles Davidson, was torpedoed by a German submarine 130 miles W. i S. of the Bishop Rock, Scilly Isles, on August 25th, 1917. The attack took place at 1.40 p.m. in a north-westerly gale, the ship being struck on the port side and the engine-room flooded. She did not sink at once, however, and the submarine surfaced and endeavoured to contact the boats but could not make her demands known owing to the gale.

Capt. Davidson set course for the Scillies but was picked up by a ship in an eastbound convoy and landed at Milford Haven. Meanwhile the first officer's boat found the *Malda* still afloat and stood by in the hope of boarding her next morning, but the submarine again came on the scene and forced the boat to sail away. By morning the *Malda* had foundered.

The boats reached land at various places and it was first reported that seven men had lost their lives, four of them were killed by the explosion, one died from exposure in the boats, and the remaining two were lost overboard. An official report published later, however, gave the number of lives lost as 64.

MALDA

British India Steam Nav. Co.; 1922; *Barclay, Curie & Co.*; 9,066 tons; 465x58-3x33-5; 1,008 n.h.p.; turbine engines. The steamship *Malda*, on a voyage from Calcutta to Colombo, was bombed by Japanese aircraft and sunk by gunfire from Japanese cruisers on April 6th, 1942, off Gopalpore. Twenty-five of her crew were lost.

MALINI

Siam S.N. Co.; 1925; *A/S Naskov Skibsv.*; 1,278 tons; 223-5x35-6x18-2; 245 n.h.p.; oil engines. The Siamese ship *Malini* was sailing from Singapore to Bangkok when there was an explosion and she sank on March 9th, 1939, S.E. of Pulo Tioman.

MALLARD

Bengal Burma S.N. Co.; 1903; *Bow, McLachlan & Co.*; 193 tons; 116x22x8-4; 43 r.h.p.; compound engines. The British tug *Mallard* capsized and sank during a cyclone on October 23rd, 1947. She was lying at anchor at Motirchara, in Muscal Channel, having previously sailed from Chittagong for Cox's Bazar. Her crew of 12 and 50 passengers were lost.

MALLENY

Hughes & Co.; 1868; *T. Royden & Sons*; 1,053 tons; 204-7x34-8x20-9.

The iron sailing ship *Malleny*, bound from Cardiff to Rio de Janeiro with coal, was wrecked on the Tuskar rock, Bristol Channel, on October 15th, 1886. She sank with all hands, about 20 men.

MALMANGER

H. Westfal-Larsen; 1917; *Chester S.B. Co.*; 5,672 tons; 401x54x32-7; turbine engines.

The Norwegian tanker *Malmanger* struck a mine and sank off the S. coast of Ireland on March 22nd, 1917.

MALMANGER

Westfal-Larsen & Co. A/S; 1920; *Sir J. Laing & Sons*; 7,078 tons; 425x57x33-1; 559 n.h.p.; triple-expansion engines. The Norwegian tanker *Malmanger* was torpedoed and sunk by a German submarine on August 9th, 1942, about 750 miles W. of Sierra Leone on a voyage from Trinidad to Pointe Noire with 10,000 tons of fuel oil. Sixteen of her crew were lost.

MALMESBURY

Capper, Alexander & Co.; 1928; *R. Duncan & Co.*; 5,173 tons; 405x52-4x27-5; 510 n.h.p.; triple-expansion engines. The British cargo ship *Malmesbury* was wrecked on Jacob Reef, near St. Helena Bay, on September 9th, 1930, while on a voyage from Barry to Table Bay.

MALMLAND

Axel Brostrom & Son; 1904; *W. Doxford & Sons*; 3,676 tons; 336-6x50-2x22-5; 300 n.h.p.; triple-expansion engines. The Swedish steamship *Malmland* was torpedoed and sunk by a German submarine in the North Sea on August 8th, 1915.

MALOJA

Peninsular & Oriental Steam Navigation Co.; 1911; *Harland & Wolff*; 12,431 tons; 550-4x62-9x34-4; 1164 n.h.p.; 19 knots; quadruple-expansion engines.

The P. & O. liner *Maloja*, Cdre. C. E. Irving, R.N.R., the largest ship in the company's fleet, left London on Saturday, February 26th, 1916, for Bombay with 456 persons, of whom 121 were passengers. On the 27th at about 10.30 a.m. she struck a mine two miles S.W. of Dover Pier and foundered in a very short time, taking with her 155 of those on board. The engines were reversed to take the way off the ship and enable the remaining boats to be lowered, but the engine room flooded and the engines could not be stopped. The *Maloja* therefore continued to go astern for some time at eight or nine knots and with a list of some 75 degrees.

The Canadian liner *Empress of Fort William*, 2,181 tons, Capt. W. D. Shepherd, endeavoured to render assistance, but was herself mined. The crew of this ship escaped without loss.

MALOJA

Swiss Shipping Co.; 1906; *S. P. Austin & Son*; 1,788 tons; 267•7x37•8x17-4; 220 n.h.p.; triple-expansion engines. The Swiss steamship *Maloja* was bombed by German aircraft and then torpedoed and sunk by a submarine on September 7th, 1943, near Ajaccio, Corsica.

MALTA

Cunard Steamship Co.; 1865; *J. & G. Thomson*; 2,244 tons; 303-1x39•3x25; 212 h.p.; compound engines. The British steamship *Malta* was wrecked near Land's End on October 15th, 1889, while carrying a general cargo on a voyage from Liverpool to Venice.

MALTAMARU

Ishihara Sangyo Kaiun Kaisha; 1919; Asano S.B. Co.; 5,500 tons; 400x53-2x29-4; 513n.h.p.; triple-expansion engines.
The steamship *Malta Mam* was torpedoed and sunk by the U.S. submarine *Pogy* on February 10th, 1944, off the east coast of Formosa.

MALTBY

R. Ropner & Co.; 1889; Ropner & Son; 2,834 tons; 314x40-4x20-2; 256n.h.p.; triple-expansion engines. The British cargo ship *Maltby* was wrecked on Black Middens, Tyne, on December 7th, 1899. She was on a voyage from the Tyne to Table Bay carrying a cargo of coal.

MALTBY

Sir R. Ropner & Co.; 1906; Ropner & Son; 3,977 tons; 350x50x25; 358 n.h.p.; 11 knots; triple-expansion engines.
The steamship *Maltby* was torpedoed and sunk by a German submarine ten miles S.W. by S. of Pantellaria on February 26th, 1918. Five men were killed. The captain was among the survivors.

MALVERN

Wilson & Co.; 1858; Sunderland; 428 tons; 128x27-5x17-9.
The barque *Malvern*, on a voyage from Sunderland to Singapore, foundered off the latter port on September 23rd, 1874. All on board were lost.

MALVERNIAN

Ellerman Lines; 1937; W. Gray & Co.; 3,133 tons; 345-6x50-1x20-7; 606n.h.p.; 11-5 knots; turbine engines.
The British steamship *Malvernian* was requisitioned by the Admiralty early in the Second World War for service as an ocean boarding vessel. On July 1st, 1941, in the Bay of Biscay, she was bombed and set on fire by German aircraft. She remained afloat until the 19th when she had to be abandoned by the crew. The captain and 31 others reached Corunna on the 21st July, and 25 landed at Vigo on the 22nd. Another boatload was picked up by German minesweepers. The crew numbered 164 in all.

MALVINA

London & Edinburgh Shipping Co.; 1879; J. & G. Thomson; 1,244 tons; 254-4x31-2x18-3; 381 n.h.p.; 11 knots; triple-expansion engines.
The steamship *Malvina* was torpedoed and sunk by a German submarine one mile N.N.E. of Flamborough Head on August 2nd, 1918. The captain and 13 men were killed.

MAMARI

British Admiralty; 1911; Harland & Wolff; 7,924 tons; 477-5 x 63-1x31-5; 995 n.h.p.; quadruple-expansion engines.
The steamship *Mamari* was taken over by the Admiralty for use as a fleet tender. On June 2nd, 1941, she ran on to a submerged wreck off the Norfolk coast and, while trying to free herself, was torpedoed and sunk by a German motor torpedo boat.

MAMBARE

Burns, Philp & Co.; 1900; Campbeltown S.B. Co.; 1,218 tons; 230 x34-5x17-3; 120 n.h.p.; triple-expansion engines.
The Australian cargo ship *Mambare* was wrecked on Tutuba Island, New Hebrides, on August 30th, 1902, while on a voyage from Walla Island to Malo Pass.

MAMBI

Cia. Cubana de Transporte de Miele; 1883; Oswald Mordaunt & Co.; 1,983 tons; 269x39-5x24-2; 188 n.h.p.; triple-expansion engines.
The Cuban tanker *Mambi* was torpedoed and sunk by a German submarine on May 13th, 1943, between Nuevitas and Antilla. Twenty-three of her crew were lost.

MAMIYA

Japanese Government; 7,000 (approx.).
The steamship *Mamiya* was torpedoed and sunk by a U.S. submarine on December 20th, 1944, 285 miles S. of Hong Kong.

MAMURA

N.V. Petroleum Maats. La Corona; 1932; Wilton; 8,245 tons; 450-8x62x34-1; 714n.h.p.; oilengines.
The Dutch tanker *Mamura*, with a crew of 50 and six gunners, left Houston on February 22nd, 1942, for Halifax and Belfast with 11,500 tons of clean oil. Nothing was heard of the ship until a German broadcast claimed that a tanker answering to her description had been torpedoed and sunk on the 26th, about 200 miles E.N.E. of Cape Canaveral.

MANAAR

T. & J. Brocklebank; 1917; Chas. Connell & Co. & 7,242 tons; 470x58x32-1; 787n.h.p.; 12 knots; turbine engines.
The steamship *Manaar*, Capt. C. Shaw, D.S.C., was torpedoed by a German submarine 65 miles W.N.W. of Cape Roca, Portugal, on September 6th, 1939. The torpedo exploded amidships and the submarine then surfaced and commenced to shell the vessel. Three other submarines also surfaced and joined in the shelling. Meanwhile the crew of the *Manaar* were endeavouring to launch the four port lifeboats, the starboard side being under fire, but the vessel swung round exposing the men to the fire of the submarine. One European and six lascars were killed and four Europeans and three lascars wounded, Mr. T. G. M. Turner, wireless operator, exhibiting great bravery in the saving of a wounded lascar.
The boats managed to get clear without further loss and the *Manaar* was struck by another torpedo which broke her in two. One lifeboat with 23 occupants was picked up by the Italian steamship *Castelbianco* and others by the Dutch steamship *Mars* and the Portuguese steamship *Carvalho Araujo*. Altogether 85 survivors and the body of one of the lascar seamen were landed at Lisbon on the 8th. The *Manaar* was not in convoy.

MANAIA

Northern S.S. Co.; 1898; W. Denny & Bros; 1,159 tons; 220x33-1x13-2; 103n.h.p.; triple-expansion engines.
The New Zealand cargo ship *Manaiia* was wrecked off Slipper Island, Bay of Plenty, on June 10th, 1926, while on a voyage from Tauranga to Auckland.

MANAQUI

Furness, Withy & Co.; 1921; Workman, Clark & Co.; 2,802 tons; 303 x 47 • 2 x 21 • 7; 217 n.h.p.; triple-expansion engines.
The British cargo ship *Manaqi* left Cardiff on February 19th, 1942, on a voyage to Kingston, Jamaica. She called at Belfast Lough and sailed from there on February 23rd. The *Manaqi* fell behind from her position in the convoy on March 3rd, in 35° 20' N., 22° 12' W., and was not seen again. She was probably sunk by enemy action on the 15th. She was carrying a general cargo and had a crew of 35 and six gunners.

MANATAWNY

Madrigal & Co.; 1920; American International S.B. Corp.; 5,030 tons; 390x54-2x27-8; turbine engines.
The Philippine tanker *Manatawny* was bombed and severely damaged by Japanese aircraft at Manila on December 13th, 1941. She sank on January 11th, 1942.

MANAU

Royal Mail Steam Packet Co.; 1892; Sir Ray It on Dixon & Co.; 2,745 tons; 309-6x40-5x17-5; 283n.h.p.; triple-expansion engines.
The British cargo ship *Manau* was wrecked seven miles N. of Bahia on May 21st, 1906. She was on a voyage from Rio de Janeiro to Antwerp and her cargo included ore and rubber.

MANBO MARU

Japanese Government; 1900; Campbeltown S.B. Co.; 1,253 tons; 230x34-5x17-3; 120 n.h.p.; triple-expansion engines.
The steamship *Manho Maru* was formerly the Philippine *Mauban*, seized by the Japanese at Manila. She struck a mine and sank on May 12th, 1945, in the Inland Sea of Japan.

MANCHESTER

MANCHESTER

British Navy cruiser; 1936; Hawthorn, Leslie & Co.; 9,400 tons; 591-5x62-3x20; 75,000s.h.p.; 32 knots; turbine engines; 3-drum boilers; twelve 6 in. guns, eight 4 in., 21 smaller, 6 T.T., 3 aircraft.

The cruiser *Manchester*, Capt. H. Drew, D.S.C., was one of a force of cruisers and destroyers under command of Rear-Admiral H. M. Burrough engaged in escorting a convoy to Malta from August 10th to 12th, 1942. On the 11th, when approaching the Sicilian Channel the ships were subjected to an attack by German dive bombers and torpedo bombers, submarines and torpedo boats. The *Eagle*, one of a squadron of four aircraft carriers, was hit and sunk on this day. The attack continued throughout the night, the cruiser *Cairo* being hit by a torpedo from a U-boat which damaged her so badly that she had to be sunk by the British forces. The *Manchester* was hit and had to be abandoned during the night; she foundered off the Tunisian coast. Twenty-eight officers and 375 ratings landed and were interned by the French authorities. A further three officers and 142 ratings were picked up by British ships. The *Manchester* carried a complement of 700.

In addition to the above ships the destroyer *Foresight* was also lost. The enemy losses were two submarines and 39 aircraft.

See also aircraft carrier *Eagle*.

MANCHESTER BRIGADE

Manchester Liners; 1918; Irvine's S.B. & D.D. Co; 6,042 tons; 418x53-5x33-4; 3,500 i.h.p.; 12-5 knots; triple-expansion engines.

The steamship *Manchester Brigade*, Capt. F. Clough, was in convoy off the coast of Co. Mayo, Ireland, on September 26th, 1940, when she was torpedoed and sunk by a German submarine. The captain and 51 men were killed.

MANCHESTER CITIZEN

Manchester Liners; 1925; Furness S.B. Co.; 5,343 tons; 417-7 x 57x27-7; 691 n.h.p.; 13-5 knots; triple-expansion engines.

The steamship *Manchester Citizen*, Capt. G. S. Swales, was in convoy in the Gulf of Guinea, S.E. of Accra, when she was torpedoed and sunk by a German submarine on July 9th, 1943. Fifteen men were killed. Capt. Swales was among the survivors.

MANCHESTER COMMERCE

Manchester Liners; 1899; Furness Withy & Co.; 5,363 tons; 430-7x48-2x30-8; 541 n.h.p.; 12 knots; triple-expansion engines.

The steamship *Manchester Commerce* ran into a minefield laid by the North German Lloyd liner *Berlin* 20 miles N. ^ E. of Tory Island. She was bound from Manchester to Quebec and sank on October 26th, 1914, with the loss of 14 of her crew, including the captain. Unfortunately owing to the nearby coastguard station not possessing telegraphic communication, it was not possible to circulate the news of the steamship's loss at once. As a result of this the loss of the ship was not known to the Admiralty until after a battle squadron had steamed into the minefield, and on the next day the battleship *Audacious* (which see) was lost in the same area through striking a mine.

MANCHESTER ENTERPRISE

Manchester Liners; 1890; Gourlay Bros. & Co.; 3,878 tons; 360 X 46 x 29; 430 n.h.p.; triple-expansion engines.

The British cargo ship *Manchester Enterprise* foundered in 50° N., 42° W., on November 15th, 1899, while on a voyage from Manchester to Montreal carrying a general cargo.

MANCHESTER MARKET

Manchester Liners; 1902; Furness, Withy & Co.; 4,091 tons; 360'6x48-2x20-2; 374 n.h.p.; triple-expansion engines.

The British cargo ship *Manchester Market* was wrecked on Gipsy Rock, off Tuskar, on April 27th, 1903. She was on a voyage from Manchester to Philadelphia carrying a general cargo.

MANCHESTER MERCHANT

Manchester Liners; 1900; Palmers' Co.; 5,657 tons; 452x 52-2x28-3; 642n.h.p.; triple-expansion engines.

The British cargo ship *Manchester Merchant* was destroyed by fire

in Dingle Bay on January 15th, 1903. She was carrying a cargo which included cotton from New Orleans to Manchester.

MANCHESTER MERCHANT

*Manchester Liners; 1940; Blythswood Shipbuilding Co.; 7,264 tons; 432x57x35-2; 824 n.h.p.; 13*5 knots; turbine engines.*

The steamship *Manchester Merchant*, Capt. F. O. Struss, was torpedoed and sunk by a German submarine on February 25th, 1943, while in convoy in the North Atlantic. Thirty-six men were killed. Capt. Struss was among the survivors.

MANCHESTER MILLER

Manchester Liners; 1903; Northumberland S.B. Co.; 4,2 34 tons; 360x48x20-2; 372 n.h.p.; 10-5 knots; triple-expansion engines.

The steamship *Manchester Miller* was torpedoed and sunk by a German submarine 190 miles N.W. i N. of Fastnet on June 5th, 1917. Eight men were killed. The captain was among the survivors.

MANCHESTER REGIMENT

Manchester Liners; 1922; Furness Shipbuilding Co.; 5,989 tons; 450-4x58-1x28-3; 5,000 i.h.p.; 13 knots; turbine engines.

The steamship *Manchester Regiment*, Capt. E. W. Raper, with a crew of 74 was in convoy 150 miles S.W. of Cape Race on the night of December 4th, 1939. A vessel in company had just been sunk and the s.s. *Oropesa*, 14,072 tons, was returning to the convoy with 42 survivors when she collided with the *Manchester Regiment*. The latter did not sink at once and Capt. Raper, having transferred 50 of his crew to the *Oropesa*, continued his efforts to save her. The sea was rough with a cross swell and the plight of the liner was serious. A lifeboat was lowered manned by 17 men, including the captain, in order that the latter might confer with his opposite number on the *Oropesa*, but this boat capsized, drowning seven men. This ended the attempt to save the *Manchester Regiment* and she sank soon afterwards.

MANCHU

D. R. Spedding; 1866; Chas. Mallory; 804 tons; 195-4x 37x17; inverted direct-acting engines.

On March 14th, 1874, the wood steamship *Manchu* left Nagasaki for Shanghai. Two days later she ran into a strong wind and rolled heavily; the coal bunkers gave way and the coal choked the engines, so that the ship was helpless. She was abandoned on March 17th. Captain Lowell, the second mate and a Chinese fireman were the only survivors of the 57 persons on board. Mr. Spedding, the registered owner, was among those lost.

MANCHURIA

Metcalfe Simpson & Co.; 1905; W. Gray & Co.; 2,997 tons; 330-9x46-1x21-9; 280n.h.p.; 9-5 knots; triple-expansion engines.

The steamship *Manchuria* was torpedoed and sunk by a German submarine 60 miles N.W. of Ushant on October 17th, 1917. The captain, and twenty-five men were killed.

MANDASOR

T. & J. Brocklebank; 1920; W. Hamilton & Co.; 5,0144 tons; 400-1x52-3x28-5; 517 n.h.p.; 13 knots; triple-expansion engines.

The steamship *Mandasor*, Capt. A. Hill, O.B.E., was intercepted and sunk by a German raider some hundreds of miles E. of the Seychelle Islands on January 24th, 1941. Three Europeans and three Indians were killed. The 76 survivors, including 16 Europeans, became prisoners of war. Six Europeans and 14 Indians were wounded. The *Mandasor* was not in convoy.

MANEI MARU

Nitto Kisen K.K.; 5,226 tons.

The tanker *Manei Maru* was torpedoed and sunk by the U.S. submarine *Hardhead* on November 8th, 1944, about 100 miles S.W. of Olongapo, Philippines.

MANFREDO CAMPERIO

Lloyd Triestino; 1925; Cantiere Navale Triestino; 5,463 tons; 407-8x54x29-1; 779n.h.p.; oilengines.

The Italian motorship *Manfredo Camperio* was torpedoed and sunk by a British submarine on August 27th, 1942, off Cape Spada.

MANGARA

Maclay & MacIntyre; 1889; A. Stephen & Sons; 1,821 tons; 260x36'8x16-6; 149 n.h.p.; 9 knots; triple-expansion engines.
The steamship *Mangara* was torpedoed and sunk by a German submarine a quarter of a mile E. of Sizewell Buoy, Aldeburgh, on July 28th, 1915. Eleven men were killed. The captain was among the survivors.

MANGEN

O. F. Ahlmark & Co. Efr. A/B; 1922; Christiansands Mek. Verksted; 1,253 tons; 235-3x36'2x13'4; 127n.h.p.; triple-expansion engines.
The Swedish steamship *Mangen* was torpedoed and sunk by a German submarine on December 21st, 1940, 300 miles W. of Oporto on a voyage from Cardiff to Lisbon with coal. Eight lives were lost.

MANGKAI

Dutch Government; 1915; Flensburger Schiffsbau Ges.; 8,298 tons; 477-9x62-3x32-7; 742 n.h.p.; quadruple-expansion engines.
The steamship *Mangkai* was formerly the German *Scheer*, seized by the Dutch at Macassar on May 10th, 1940. She was shelled and sunk by a German raider thought to be the *Scharnhorst* on March 16th, 1941, about 450 miles W. of Cape Race on a voyage from Glasgow to Hampton Roads.
Nine survivors were reported to be prisoners of war.

MANGKALIHAT

N.V. Nederland Indische Maats. voor Zeevaart II; 1928; J. C. Tecklenborg A.G.; 8,457 tons; 490-7x62-2x32-3; 785 n.h.p.; triple-expansion engines.
The Dutch steamship *MangkaUhat* was formerly the German *Lindenfels*, seized by the Dutch at Sabang on May 10th, 1940. She was torpedoed by a German submarine on August 1st, 1943, about 200 miles E. of Lourengo Marques. She was taken in tow but sank on the 4th. Eighteen of her crew were killed. The *MangkaUhat* had previously been badly damaged by striking a mine on May 4th, 1942, 33 miles from Table Bay.

MANILA MARU

Osaka Shosen K.K.; 1915; Mitsubishi Dockyard & Engineering Works; 9,846 tons; 475x61x38-1; 1 £13 n.h.p.; triple-expansion engines.
The steamship *Manila Maru* was torpedoed and sunk by the U.S. submarine *Mingo* on November 25th, 1944, 120 miles west of Brunei, Borneo.

MANIN

G. Ansaldo & Co.; 1900; N. Odero fu A. & Co.; 2,691 tons; 299-7x40'9x18-2; 221 n.h.p.; triple-expansion engines.
The Italian steamship *Manin* was torpedoed and sunk by a German submarine off the N.W. coast of Spain on October 1st, 1918.

MANIPUR

T. & J. Brocklebank; 1920; Lithgows; 8,652 tons; 473-4x64x34; 1,147 n.h.p.; 13-5 knots; turbine engines.
The steamship *Manipur*, Capt. R. Mallet, O.B.E., was torpedoed and sunk by a German submarine on July 17th, 1940, while in convoy off Cape Wrath. Seven Europeans and seven Indians were killed and four Europeans and one Indian wounded. Capt. Mallet was among the survivors.

MANISTEE

Elders & Fyffes; 1904; Swan Hunter & Wigham Richardson; 3,869 tons; 350-5x46x29-3; 515 n.h.p.; 12 knots; triple-expansion engines.
The steamship *Manistee* was torpedoed and sunk by a German submarine 86 miles W.S.W. of Bishop Rock, Stilly Isles, on June 26th, 1917. Five men were killed. The captain was among the survivors.

MANISTEE

Elders & Fyffes; 1920; Cammell Laird & Co.; 5,360 tons; 400-2x51-1x30-3; 447 n.h.p.; 13-5 knots; triple-expansion engines.
The steamship *Manistee*, Lt. Cdr. E. H. Smith, R.N.R., was taken over by the Admiralty for use as a boarding vessel in the Second World War. She was torpedoed by a German submarine on February 23rd, 1941, and again on the following day about 500 miles south of Iceland. There were no survivors.

MANJU MARU

Yamashita Risen K.K.; 1919; Kawasaki Dockyard Co.; 5,577 tons; 385x51x36; 444 n.h.p.; triple-expansion engines.
The steamship *Manju Maru* was torpedoed and sunk by the U.S. submarine *Par go* on November 29th, 1943, 350 miles W. of the Ladrone Islands.

MANJU MARU

Asahi Sekiyu K.K.; 1921; Kobe Steel Works; 6,515 tons; 420 x 54x32-9; 560 n.h.p.; triple-expansion engines.
The tanker *Manju (Manzyu) Maru* was sunk by U.S. carrier-based aircraft on January 21st, 1945, off Kaohsiung, Formosa.

MANKO MARU

Nichiro Gyogyo K.K.; 1923; Yokohama Dock Co.; 1,503 tons; 250 X 37x19; 126 n.h.p.; triple-expansion engines.
The steamship *Manko Maru* was bombed and sunk by U.S. land-based aircraft on November 2nd, 1943, off New Ireland.

MANKOMARU

Nippon Yusen K.K.; 1935; Yokohama Dock Co.; 4,471 tons; 364-2x50-9x32-5; turbine engines.
The steamship *Manko Maru* was torpedoed and sunk by the U.S. submarine *Parche* on July 31st, 1944, off the west coast of Dalupiri Island, Philippines.

MANNERT L. ABELE

United States Navy, destroyer; 1944; Bath Iron Works Corp.; 2,200 tons; 376-5x40-5x12-5; 60,000s.h.p.; 36 knots; turbine engines; six Sin. guns, twelve 40 mm.A.A., eleven 20 mm.A.A., 10 T.T.
The United States destroyer *Mannert L. Abele*, Lt. Cdr. A. E. Parker, was on a radar picket station some distance from the island of Okinawa, Japan, on April 12th, 1945, when she was attacked by a new type of bomb. This was a baka, a glide-bomb carrying 2,645 pounds of explosive in its warhead and boosted by three rockets. A bomber crashed on the destroyer first, followed by the baka, breaking her keel and propeller shafts and rendering her helpless. The hull broke in several places and the *Mannert L. Abele* sank in five minutes with the loss of 79 officers and men.

MANNINGHAM

Carl Schell; 1880; C. Mitchell & Co.; 1,988 tons; 286-6X36-1x22-4; 198 n.h.p.; compound engines.
The Swedish steamship *Manningham* was sunk by a German submarine in the English Channel on February 21st, 1917.

MANO

Ministry of War Transport (Springwell Shipping Co.); 1925; Helsingors Jernsk. & Mask.; 1,418 tons; 249-5x38-1x15; 150 n.h.p.; triple-expansion engines.
The British cargo ship *Mano* was wrecked on Geirfuglasker, S.W. of Reykjanes, on August 21st, 1944. She was on a voyage from London to Reykjavik carrying a cargo of cement.

MANON

Ministry of War Transport (British India Steam Nav. Co.); 1901; Wigham, Richardson & Co.; 5,597 tons; 428-1 X55-1 X26-9; 494 n.h.p.; quadruple-expansion engines.
The steamship *Manon*, on a voyage from Calcutta to Colombo, was torpedoed and sunk by a Japanese submarine on October 7th, 1942, about 200 miles E.S.E. of Masulipatam. Eight of her crew were lost.

MANORAVON

Griffiths, Lewis & Co.; 1907; Bartram & Sons; 3,711 tons; 346-5x50-8x22-9; 307 n.h.p.; triple-expansion engines. The British cargo ship *Manoravon* was wrecked on Isla de Lobos, Uruguay, on July 5th, 1908, while on a voyage from Barry to Buenos Aires carrying a cargo of coal.

MANRYOMARU

Japanese Government; 1906; Maryland Steel Co.; 1,185 tons; 222 x 33 X 21 • 3; 166 n.h.p.; triple-expansion engines. The steamship *Manryo Mam* was formerly the Philippine *Marion*, seized by the Japanese at Hongkong. She was torpedoed and sunk by a British submarine on October 12th, 1944, off Port Swettenham, Malaya.

MANRYUMARU

Japanese Government; 1920; Bergens Mek. Verksted; 1,624 tons; 244• 5 X 37 • 7 X if5 • 7; 138 n.h.p.; triple-expansion engines. The steamship *Manryu Maru* was formerly the Norwegian *Bordvik*, seized by the Japanese at Sourabaya in January, 1942. She was torpedoed and sunk by the U.S. submarine *Sunfish* on April 16th, 1945, off Kamaishi, Japan.

MANSHU MARU

Nipponkai Risen K.K.; 1912; Kawasaki Dkyd. Co.; 3,054 tons; 324 X 43 X 30; 337 n.h.p.; triple-expansion engines. The steamship *Manshu (Mansyu) Maru* was torpedoed and sunk by the U.S. submarine *Queenfish* on September 9th, 1944, about 100 miles N. of Luzon Island, Philippines.

MANSHU MARU

*Dairen Kisen K.K.; 1921; Uchida S.B. & Eng. Co.; 5,266 tons; * 400 X 54 - 5 x 30; 513 n.h.p.; triple-expansion engines.* The steamship *Manshu (Mansyu) Maru* struck a mine and sank on May 5th, 1945, off Yawata, Japan.

MANTAIMARU

Yamashita Kisen K.K.; 1919; Kawasaki Dkyd. Co.; 5,863 tons; 385 x 57 x 36; 440 n.h.p.; triple-expansion engines. The steamship *Mantai Maru* was torpedoed and sunk by the U.S. submarine *Guardfish* on July 16th, 1944, 75 miles off the north west coast of Luzon Island, Philippines.

MANTIQUEIRA

Lloyd Brasileiro; 1908; Workman, Clark & Co.; 1,696 tons; 276-2x44-9x16-4; 126 n.h.p.; triple-expansion engines. The Brazilian ship *Mantiqueira* was lost on August 9th, 1942, off the Ilha das Araras.

MANTOLA

British India Steam Navigation Co.; 1916; Barclay, Curie & Co.; 8,260 tons; 450-4x58-2x32-7; 900 n.h.p.; 14-5 knots; triple-expansion engines.

The liner *Mantola*, Capt. D. J. Chivas, was a new ship outward bound to India when she was torpedoed by a German submarine 143 miles W.S.W. of Fastnet on February 8th, 1917. The ship was struck on the port side abreast the bridge but did not sink. Capt. Chivas did all he could to save his vessel but she was sinking by the head and had to be abandoned. In launching the boats seven native seamen were drowned, otherwise everyone got away in safety.

The submarine re-appeared when the boats were afloat and commenced to shell the liner but she was disturbed by the arrival of H.M.S. *Laburnum* and submerged and made off. The *Laburnum* picked up the boats and took the *Mantola* in tow but at 11.30 p.m. the tow rope parted and the seas were too rough to permit a second attempt. The liner was therefore left to sink and the survivors were taken to Bantry, where they landed on the following day.

MANUEL CARSI

DustrusyCarsi; 1893; Hall, Russell & Co.; 1,988 tons; 260-3X36 - 2 X16 • 1; 190 n.h.p.; triple-expansion engines. The Spanish ship *Manuel Car si* was wrecked on May 19th, 1921, off Cape Torinana.

MANUEL L. VILLAVERDE

Cia.Trasatlantica; 1882; Lobnitz&Co.; 1,501 tons; 260-5X 31-5x17-4; 250 n.h.p.; compound engines. The Spanish ship *Manuel L. Villaverde* was carrying passengers from Barcelona to Fernando Po when she struck the Yoruba Rock near Cape Palmas and sank on July 12th, 1921.

MANUKA

Union S.S. Co. of New Zealand; 1903; W. Denny & Bros.; 4,534 tons; 368-7x47-2x31-1; 423 n.h.p.; triple-expansion engines.

The New Zealand cargo ship *Manuka* was wrecked on Long Point, between Bluff and Dunedin, on December 16th, 1929. She was on a voyage from Melbourne to Wellington carrying a general cargo.

MANVANTARA

N.V. PetroleumMaats. La Corona; 1931; Nederlandsch Scheepsbouw Maats.; 8,237 tons; 450-8x62x34-1; 714 n.h.p.; oil engines. The Dutch tanker *Manvantara* was bombed and sunk by Japanese aircraft on February 13th, 1942, between Palembang and Batavia.

MANX

A/S Wilhelms Rederi; 1916; Van der Giessen & Zonen; 1,343 tons; 239-1x36-2x16-4; 127 n.h.p.; triple-expansion engines.* The Norwegian steamship *Manx* struck a mine and sank on January 9th, 1940, off Kinnaird Head, with the loss of 13 lives.

MANXMAN

U.S. & Canada Transport & Trading Co.; 1888; Harland & Wolff; 4,827 tons; 430-7x45-2x30; 424 n.h.p.; triple-expansion engines.

The Canadian cargo ship *Manxman* foundered in lat. 41° 53' N., long. 59° 51' W., on December 18th, 1919. She was on a voyage from Portland, Me., to Gibraltar carrying a cargo of wheat.

MANYOMARU

Ono Shoji Gomet K.; 1919; Osaka Iron Works; 7J54 tons; 415X55-5x34-7; 551 n.h.p.; quadruple-expansion engines. The Japanese ship *Manyo Mam* which was operated by Yamashita Kisen K.K. and carrying coal to Tokio, sprang a leak and went aground on October 23rd, 1936, off Otaru, Hokkaido. She broke in two and sank.

MANYOMARU

Toyo Kisen K.K.; 1937; Mitsubishi Jukogyo K.K.; 2,904 tons; 305-4x45-3x26-2; 202 n.h.p.; triple-expansion engines. The steamship *Manyo Maru* was torpedoed and sunk by the U.S. submarine *Sea Robin* on March 5th, 1945, about 150 miles W. of Labuan, North Borneo.

MANZANILLO

Empresa Naviera de Cuba S.A.; 1915; Forges & Chantiers de la Mediterranee; 1,025 tons; 216-5x34'1x14'8; 80 n.h.p.; triple-expansion engines.

The Cuban steamship *Manzanillo* was torpedoed and sunk by a German submarine on August 12th, 1942, on a voyage from Miami to Havana. Her captain, 30 crew and three passengers were lost.

MANZONI

Tirrenia Soc. Anon, di Nav.; 1902; Wigham-Richardson & Co.; 3,955 tons; 375-4x48'2x17-8; 361 n.h.p.; triple-expansion engines.

The Italian steamship *Manzoni* was torpedoed and sunk by British aircraft on July 5th, 1940, at Tobruk.

MANZONI

Tirrenia Soc. Anon, di Nav.; 1942; 4,550 tons; oilengines. The Italian motorship *Manzoni* was bombed and sunk by British aircraft on March 22nd, 1943, off Carrena Point, Capri.

MAORI

Shaw, Savill & Albion Co.; 1893; Swan Hunter; 5,317 tons; 402-6x48-3x29-6; 4,200 i.h.p.; 12 knots; triple-expansion engines.

The steamship *Maori* left Table Bay at 11.30 on the night of Wednesday, August 4th, 1909, bound for New Zealand with a cargo consisting largely of explosives. The night was very thick and rain was falling in torrents, with a north-westerly gale. Soon after leaving the shelter of Table Bay the vessel was driven inshore and crashed upon the rocks near Duiker Point. She was swung round by the seas and lay with her bows submerged and her stern high out of the water.

Attempts were made to launch the boats, but the ship having driven right in among the breakers this was an almost impossible task. Three boats put off, but two were swamped. The third, under the first officer, got as far as the shore but capsized in the surf, five out of its 14 occupants being drowned.

The place where the *Maori* had gone ashore was hidden from the coast road and remote from habitation. During the afternoon of the 5th a fisherman observed the wreck with a number of men clinging to the rigging. He made a long journey on foot to the Cape Town Police Station, but as he could only speak broken English his narrative was somewhat obscure, and the authorities did not take immediate action. When they did they found only 12 survivors on the wreck, all of whom were saved by the Rocket Brigade and by a fisherman named Messina, who crawled to the ship with a line.

Of a crew of 55 only 21 were saved, the captain being among the drowned.

MAORI

British Navy, destroyer; 1909; W. Denny & Bros.; 980 tons; 280x26-5x8-2; 15,500 i.h.p.; 33 knots; turbine engines; Yarrow boilers; two 4 in. guns, 2 T.T.

The destroyers *Maori*, Cdr. B. W. Barron, and *Crusader*, Lt. Cdr. T. K. Maxwell, were engaged in the task of spotting German batteries near Dunkirk on May 7th, 1915. The *Maori* struck a mine and began to sink. Her crew took to the boats but the enemy fire was so hot that *Crusader*, although she lowered boats and remained offshore for an hour and a half, could not pick them up, and was compelled to steam away and leave them.

The *Maori's* complement amounted to seven officers and 88 men, all of whom were taken to Zeebrugge as prisoners, together with some boats' crews from *Crusader*.

MAORI

British Navy, destroyer; 1937; Fairfield Shipbuilding Co.; 1,870 tons; 355-5x36-5x9; 44,000s.h.p.; 36-5 knots; turbine engines; 3-drum boilers; eight 4-7 in. guns, 8 smaller, 4 T.T.

The destroyer *Maori* was sunk in the Grand Harbour at Malta during an attack by German dive bombers on the night of February 11th, 1942. The vessel's normal complement was 190.

MAPLE BRANCH

F. & W. Kit son; 1888; Bar tram, Haswell & Co.; 2,681 tons; 300-4x40x18-4; 242 n.h.p.; triple-expansion engines.

The British cargo ship *Maple Branch* was wrecked on Sandray Island, Barra, on July 5th, 1897, while on a voyage in ballast from the Clyde to Sunderland.

MAPLECOURT

United Towing & Salvage Co.; 1894; Globe Iron Works Co.; 3,388 tons; 365-4x44⁸8x23-4; 181 n.h.p.; triple-expansion engines.

The Canadian steamship *Maplecourt*, on a voyage from Montreal to Preston, was torpedoed and sunk by a German submarine on February 6th, 1941, about 300 miles W. of the Hebrides. All her crew of 37 were lost.

MAPOCHO

Soc. Anon. Maritima de Chile; 1882; Laird Bros.; 2,652 tons; 331-2x41-4x19-3; 2,000 i.h.p.; 14-5 knots; compound engines.

The steamship *Mapocho*, Capt. Nicholas U. Gundian, left Iquique for Arica and ports beyond on March 20th, 1945, with 141 persons and a general cargo including nitrate. When off Frente Caleta

Buena she caught fire and within a short time became a blazing wreck. She sank within 30 minutes. Of those on board 78 persons lost their lives.

MAR-ADRIATICO

Cia. Maritima del Nervion; 1895; W. PickersgW & Sons; 2,410 tons; 295x42-3x17-1; 230n.h.p.; triple-expansion engines. The Spanish steamship *Mar-Adriditico* was sunk by a German submarine in the Bay of Biscay on February 14th, 1917.

MAR-BALTICO

Cia. Maritima del Nervion; 1899; Campbeltown S.B. Co.; 2,023 tons; 281-8x40-1x19-1; 174n.h.p.; triple-expansion engines.

The Spanish steamship *Mar-Baltico* was torpedoed and sunk by a German submarine in the English Channel on March 23rd, 1918.

MARBIANCO

A. Ganichi; 1912; Workman, Clark & Co.; 8,446 tons; 506-9X 61-4x32-9; 804 n.h.p.; triple-expansion engines.

The Italian steamship *Mar Bianco* was bombed and sunk by British aircraft on December 7th, 1943, off Zara.

MAR CASPIO

Cia. Maritima del Nervion; 1919; E. Finch & Co.; 3,080 tons; 331 x 46 • 8 x 23 • 1; 513 n.h.p.; triple-expansion engines. The Spanish steamship *Mar Caspio* was intercepted and shelled by an Insurgent armed trawler off the River Adous on March 29th, 1937. While endeavouring to escape she ran ashore and was wrecked.

MAR COR

M. Maresca & Co.; 1894; C. S. Swan & Hunter; 3,257 tons; 330 x 43 • 1 x 19 - 3; 297 n.h.p.; triple-expansion engines. The Italian steamship *Mar Cor* was torpedoed and sunk by a German submarine off the Scilly Isles on June 9th, 1917.

MAR DEL PLATA

Gorbea y Monje; 1919; Soc. Anon. Astilleros del Nervion; 1,191 tons; 231-6x31x13-5; 115 n.h.p.; compound engines. The Spanish ship *Mar del Plata* left the Clyde on January 30th, 1923, with a cargo of coal for Bilbao. She was not seen again and was supposed to have struck the Hats and Barrels Rocks, near the Smalls, on January 31st.

MARANA

G. Bell & Co.; 1880; Aitken & Mansel; 2,177 tons; 285-7 x 36 x 22-3; 220 h.p.; compound engines.

The steamship *Mar ana* was one of 15 ships wrecked on the Cornish coast, chiefly in the Falmouth area, in the great snowstorm of March, 1891. Most of the vessels were small, the loss of life on them amounting to 40. The *Marana*, which struck on the night of the 9th March, not far from the four-masted sailing ship *Bay of Panama* (which see), was lost with 22 of her crew.

MARANGONA

Compagnia Italiana Marittima; 1914; J. Frerichs & Co. A.G.; 5,257 tons; 402-1x51-7x28-7; 505n.h.p.; triple-expansion engines.

The Italian steamship *Marangona* struck a mine and sank on December 10th, 1940, about 27 miles S. of Pantellaria.

MARBURG

Norddeutscher Lloyd; 1928; F. Schichau; 7,564 tons; 503-6x 61-2x28-7; 2,440n.h.p.; oil engines.

The German motorship *Marburg* struck a mine and sank on May 21st, 1941, N.E. of Ithaca.

MARC FRAISSINET

Cie. Marseillaise de Navigation a Vap.; 1901; Chantiers & Ateliers de Provence (Port de Bouc); 3,060 tons; 314-1x44x 26-3; 283 n.h.p.; triple-expansion engines.

The French steamship *Marc Fraissinet* was torpedoed and sunk by a submarine in the Mediterranean on October 28th, 1917.

MARCATO

MARCATO

H.K.H.Pohlman; 1883; J.Blumer & Co.; 1,651 tons; 26 1-6 X 38x17-3; 177 n.h.p.; compound engines.

The Swedish ship *Marcato*, carrying woodpulp from Namsos to Rochester, struck a sunken wreck and sank on February 4th, 1926, off East Oaze in the Thames Estuary.

MARCEL

L.Hermans; 1908; Blyth S.B.Co.; 1,433 tons; 245x36-7x16; 181 n.h.p.; triple-expansion engines.

The Belgian steamship *Marcel* was sunk by a German submarine in the English Channel on September 5th, 1916.

MARCELLA

Kaye Transport Co.; 1928; Lithgows; 4,592 tons; 385x52x 26-6; 477 n.h.p.; 11 knots; triple-expansion engines.

The steamship *Marcella*, Capt. R. Downie, was torpedoed and sunk by a German submarine about 200 miles N.W. of Oporto on March 13th, 1943. All her crew of 35 and nine gunners were lost.

MARCHIONESS

Gordon Steam Shipping Co.; 1884; Short Bros.; 1,980 tons; 286-5x38-6x20-7; 214 n.h.p.; compound engines. The British cargo ship *Marchioness* was wrecked off Hoborg Lighthouse, Gothland, on November 22nd, 1900, while on a voyage in ballast from Stettin to New York.

MARCO

Societd Alluminio Veneto-Anonima; 1901; Grangemouth & Greenock Dockyard Co.; 1,487 tons; 254-4x36-2x16-2; 144 n.h.p.; triple-expansion engines.

The Italian steamship *Marco* was bombed and sunk by British aircraft on October 31st, 1943, at Gruz, Yugoslavia.

MARCO POLO

Cia. Italiana di Nav. S.A.L.; 1923; Hong Kong & Whampoa Dock Co.; 3,063 tons; 300-4x54-1x11-8; 332 n.h.p.; triple-expansion engines.

The Italian steamship *Marco Polo* struck a mine and sank on July 16th, 1945, about four miles from Woosung.

MARCONI

Kaye, Son & Co.; 1917; Harland & Wolff; 7,402 tons; 440-8 x 56-2x35-6; 887n.h.p.; 12-5 knots; quadruple-expansion engines. The steamship *Marconi*, Capt. F. E. Hailstone, was torpedoed and sunk by a German submarine on May 20th, 1941, when in convoy about 270 miles S.E. of Greenland. Six days later the U.S. coast-guard cutter *General Greene*, on ice patrol, picked up 39 of the crew of 80 in an exhausted condition and brought them to St. John's, Newfoundland. Eleven men were killed on board, eight died in the boats and three died in hospital at St. John's.

MARDINIAN

EllermanLines; 1919; S. P. Austin & Son; 2,434 tons; 303-2X 43x20-8; 266 n.h.p.; triple-expansion engines. The steamship *Mardinian*, on a voyage from Trinidad to Methil, was torpedoed and sunk by a German submarine on September 9th, 1940, about 150 miles W. of the Hebrides. Six of her crew were killed.

MARECA

Dent & Co.; 1882; Palmers'Co.; 2,211 tons; 300-2x37-3X 23; 231 n.h.p.; compound engines.

The British cargo ship *Mareca* was wrecked west of St. Govan's Head on January 21st, 1898, while on a voyage in ballast from Cork to Newport.

MAREEBA

Australasian United S.N. Co.; 1898; S. P. Austin & Son; 1J47 tons; 263-8x39-3x17-1; 214 n.h.p.; triple-expansion engines. The Australian steamship *Mareeba* was wrecked on July 31st, 1908, on Stockton Beach, north of Newcastle, N.S.W., on a voyage from Rockhampton to Sydney.

MAREEBA

Australasian United S.N. Co.; 1921; Walkers; 3,472 tons; 332-7x47 • 1 x 27 • 1; 520 n.h.p.; triple-expansion engines. The Australian steamship *Mareeba* left Singapore on June 1st, 1941, for Colombo. On the 26th she was intercepted and sunk by a German raider about 350 miles N.W. of the Nicobar Islands. Twenty-six of her crew were lost and the remainder taken prisoner.

MAREOTIS

James Moss & Co.; 1899; J. Blumer & Co.; 3,184 tons; 330-5X46-1x16-9; 309 n.h.p.; triple-expansion engines. The British cargo ship *Mareotis* was wrecked at Cape Anguille, N.F.L., on June 26th, 1900, while on a voyage from Quebec to Liverpool carrying a cargo of lumber.

MARGA

A/SBruusgaard; 1924; Ny lands Vcerksted; 1,595 tons; 254-2x 39-2x17; triple-expansion engines.

The Norwegian ship *Marga*, carrying ore, sprang a leak on February 20th, 1951, and was towed into Camaret, near Brest. On March 11th, she left in tow, but on March 13th there was a gale and she sank.

MARGAREE

Canadian Navy, destroyer; 1932; Palmer & Co.; 1,375 tons; 326x33x8-5; 36,000 s.h.p.; 36 knots; turbine engines; 3-drum boilers; four 4-7-in.guns, 6smaller, 8 T.T.

The destroyer *Margaree* was formerly H.M.S. *Diana* and had been transferred to the Canadian navy to replace the *Fraser* (which see) lost in collision a few months previously. On the night of October 22nd, 1940, the vessel was escorting a convoy in the North Atlantic in bad weather when she collided with one of the merchantmen. Both ships were steaming without lights and there was very little time in which to save life. Of the *Margaree's* complement of 171 officers and ratings 140 were lost.

MARGARET

Pimm & Co.; 250 tons; 120x — x—; 9 knots; compound engines.

The steamship *Margaret* left Hamburg bound for Hull on October 19th, 1845, with 16 passengers and a crew often, under command of Capt. Rawlinson. When off Cuxhaven a violent N.W. gale sprang up which lasted for three days. Just before daybreak on the 22nd she was driven on the Memmett Sand off Norderney, the seas sweeping over her with terrific violence the moment she struck. Many people were washed overboard and drowned and others lost their lives in the longboat, which capsized.

There were only seven survivors, all of whom were crew.

MARGARET

A. H. Bull S.S. Co.; 1916; Maryland Steel Co.; 3,352 tons; 327-2x46-2x22-9; 1,500 i.h.p.; 10 knots; triple-expansion engines.

The American steamship *Margaret*, Capt. L. L. Davis, was torpedoed and sunk by a German submarine in the South Atlantic on or about April 15th, 1942. Capt. Davis and 28 men were killed. The vessel was not in convoy.

MARGARET ROSE

Gill Amin & Co.; 1945; S. P. Austin & Son; 567 tons; 151- O x 27-1x11-6; triple-expansion engines.

The British cargo ship *Margaret Rose* capsized and sank off Dwarka on June 9th, 1959, while on a voyage from Bombay to Port Okha carrying a cargo of tin plates. Twelve of the crew of 26 were lost.

MARGARET AND JESSIE

Confederate States of America; 1858; Great Britain; 700 tons; 205 x 26x14; 17-25 knots ; compound engines; three guns. The

paddle steamer *Margaret and Jessie* was the fastest paddle steamer afloat, and this attracted the attention of Confederate States agents who were seeking fast ships for service as blockade runners in the American Civil War.

The steamer was sold to the Confederates in 1862 and was renamed and armed with three guns. Her upper works were altered and she was painted naval grey. As a blockade runner she did not

last long, despite her speed. In 1863 she fell in with the U.S. gunboat *Rhode Island*, which drove her ashore at Eleutha, in the Bahamas, blowing up her boiler and causing other damage. The number of casualties is not known.

MARGARETA

Lovisa Angf. A/B; 1902; *Murdoch & Murray*; 2,755 tons; 296'7x43-3x18-7; 210 n.h.p.; triple-expansion engines.

The Finnish steamship *Margareta* was torpedoed and sunk by a German submarine on June 9th, 1940, on a voyage from Bathurst, River Gambia, to Greenock. Five of her crew were killed.

MARGARETA

RederiA/B Strim; 1884; *Irvine & Co.*; 1,272 tons; 245x33x16; 156 n.h.p.; compound engines.

The Swedish steamship *Margareta* was torpedoed and sunk by a British submarine on July 9th, 1942, near Norrköping.

MARGARETA

Finska Angf. A/B; 1919; *Fredrikstad Mek. Værks.*; 1,860 tons; 277-4X42-1 X17-5; 150 n.h.p.; triple-expansion engines.

The Finnish ship *Margareta* was carrying paper pulp from Kotka to Bremen when she was involved in a collision with the *Ligur* and sank on March 26th, 1944, between Moen and Gedser.

MARGARETHA

Giacomo Calo; 1889; *R. Craggs & Sons*; 2,092 tons; 280 X 37-5x18; 201 n.h.p.; triple-expansion engines.

The Italian steamship *Margaretha* was torpedoed and sunk by a submarine in the Mediterranean on October 13th, 1916.

MARGARETHE CORDS

Aug. Cords; 1927; *Akt. Ges. Neptun*; 1,912 tons; 266-9 X 42-1x16-9; 143 n.h.p.; triple-expansion engines.

The German steamship *Margarethe Cords* was torpedoed and sunk by a Russian submarine on March 17th, 1945, S. of Bornholm.

MARGARITA

N. B. Metaxas; 1901; *Barclay Curie & Co.*; 4,443 tons; 385-5 X 48-7x27; 311 n.h.p.; triple-expansion engines.

The Greek ship *Margarita* left East London on October 7th, 1925, for Dakar carrying maize and hides. On the following day a wireless call was received from her "in distress, unmanageable with 20° list in heavy westerly gale". Nothing more was heard of the ship or of the 36 persons on board.

MARGIT

Margit S.S. Co.; 1913; *Forges & Chantiers de la Mediterranee*; 3,257 tons; 346-4x44-6x22-2; 490 n.h.p.; triple-expansion engines.

The Panamanian steamship *Margit* was bombed and sunk by an aircraft on April 19th, 1941, at Malta.

MARGIT

Ministry of War Transport (Atkinson & Prickett); 1924; *Kjøbenhavn's Flydedok & Skibs.*; 1,735 tons; 261-1x40-1x16-9; triple-expansion engines.

The British cargo ship *Margit* sailed from the Tyne on January 29th, 1944, on a voyage to Reykjavik. She called at Loch Ewe and left there in a convoy on February 5th. Two days later the convoy scattered due to bad weather and the *Margit* was subsequently lost without trace. She had a crew of 24 and six gunners and was carrying a cargo of coal.

MARGUERITE

F. Bouet; 1912; *Osbourne, Graham & Co.*; 1,544 tons; 260x36-5x15-8; 189 n.h.p. triple-expansion engines.

The French steamship *Marguerite* was torpedoed and sunk by a German submarine in the English Channel on June 28th, 1917.

MARGUERITE DOLLFUS

Soc. des Voiliers Francais; 1898; *Ateliers & Chantiers de la Loire*; 1,948; 270-5x39-7x22-3.

The French sailing vessel *Marguerite Dollfus* was sunk by a German submarine in the English Channel on December 7th, 1916.

MARIA

Mississippi River steamboat.

The Mississippi steamboat *Maria* was sunk in a collision with another steamboat on the night of November 21st, 1846. The collision took place on the lower Mississippi. The *Maria*, which was ascending the river, should have hugged the shore whilst descending boats ran the bends. This rule was not followed in many instances, owing to the captains wishing to make a quick passage.

From 30 to 50 lives were lost. Many people on the *Maria* were scalded to death by the bursting of a steam pipe.

MARIA

Emigrant ship; 1835 (circa); 300 tons (approx.).

The sailing vessel *Maria* left Limerick for Quebec on April 2nd, 1849, with a crew of ten and 111 Irish emigrants under command of Capt. Hesligeau. Some 50 miles from St. Paul's Island she ran into an icefield, the weather at the time being very severe, and on the night of May 10th she collided with a large iceberg, which stove in her bows and caused her to sink by the head. Most of the passengers were drowned as they lay asleep below, the ship taking down with her 109 persons, including the captain.

On the following day the barque *Roslin Castle* and the brig *Falcon* rescued three survivors in a small boat and nine found drifting on the ice.

MARIA

Barcelonesa de Navegacion S.A.; 1881; *C. S. Swan & Hunter*; 2,165 tons; 296-4x37x24-8; 258 n.h.p.; compound engines. The Spanish steamship *Maria* was torpedoed and sunk by a submarine in the Mediterranean on October 5th, 1918.

MARIA

It alia Soc. Anon. di Nav.; 1926; *Cantiere Navale Triestino*; 6,339 tons; 418x53-2x24-7; 606n.h.p.; oilengines. The Italian motorship *Maria* was shelled and sunk by British warships on November 9th, 1941, about 120 miles S.E. of Punta Stilo.

MARIA CELESTE

Companhia Navegacao Sao Paula S.S.; 1944; *Kane S.B. Co.*; 632 tons; 178-4x30-1x12; oil engines.

The Brazilian motorship *Maria Celeste* carrying 1,000 drums of paraffin and 3,000 drums of petrol was in Sao Luiz harbour on March 16th, 1954, when there was an explosion in the cargo and the ship caught fire. She sank three days later. Thirteen men were killed and three missing.

MARIA EUGENIA

Soc. Esercizio Armamento; 1928; *Craig, Taylor & Co.*; 4,702 tons; 414-9x53-5x25-1; 417n.h.p.; triple-expansion engines.

The Italian steamship *Maria Eugenia* was bombed and sunk by British aircraft on September 17th, 1940, at Benghazi.

MARIA FOSCARINI

Soc. Italiana di Armamento; 1943; 6,406 tons; oilengines. The Italian motorship *Maria Foscarini* was torpedoed and sunk by a British submarine on April 21st, 1943, about 40 miles W. of Favignana.

MARIA P.

Marini & Bricchetto; 1886; *Sunderland S.B. Co.*; 722 tons; 175x27-1x12-9; 106n.h.p.; compound engines.

The Italian steamship *Maria P.* was bound from Naples to Genoa with a crew of 17 and 173 emigrants who were to board another ship in that port for South America. On July 21st, 1895, at the entrance to the Gulf of Spezia, off Isola del Tino, she collided with the Italian steamship *Ortigia* with such force that the latter penetrated the starboard side of the *Maria P.* to a depth of 18 feet. The *Maria P.* sank in three minutes. The collision occurred at 1.30 a.m. on a very dark night and the *Ortigia* stood by until daylight when she was able to pick up 14 of the crew and 28 passengers who were clinging to wreckage.

MARIA POMPEI

MARIA POMPEI

Giuseppe Palomba; 1909; *J. Crown & Sons*; 1,407 tons; 246-2 X 36x15-6; 174 n.h.p.; triple-expansion engines. The Italian steamship *Maria Pompei* struck a mine and sank on October 23rd, 1941, about two miles off Kotor.

MARIA ROSA

Francesco Gallifu G.; 1914; *Northumberland S.B. Co.*; 4,211 tons; 370x50-9x26-2; 371 n.h.p.; triple-expansion engines. The Italian steamship *Maria Rosa* struck a mine and sank on February 29th, 1940, about four miles from Cross Sand Light, Great Yarmouth. Eleven of her crew were killed.

MARIA S. MULLER

Otto A. Mtiller; 1936; *Flensburger Schiffsbau Ges.*; 1,589 tons; 259-7x41-3x16; 153 n.h.p.; compound engines. The German steamship *Maria S. Mtiller* struck a mine and sank on August 7th, 1942, about 22 miles off Ostend.

MARIA STATHATOS

G. N. Stathatos; 1922; *Ropner S.B. & Repp. Co.*; 6,303 tons; 411-7x54-5x33-6; 402 n.h.p.; triple-expansion engines. The Greek steamship *Maria Stathatos* was bombed and sunk by German aircraft on April 26th, 1941, near Mylos, during the invasion of Greece.

MARIA TOFT

D/S Jutlandia A/S; 1928; *Antwerp Engineering Co.*; 1,922 tons; 278-5x40-2x18-3; 175 n.h.p.; triple-expansion engines. The Danish steamship *Maria Toft* was shelled and sunk by British warships on March 16th, 1943, off Terschelling. The ship had previously been bombed and sunk at Dunkirk in May, 1940, but was afterwards raised and repaired by the Germans.

MARIA VICTORIA

Viudade F. Astorqui; 1918; *Wood Skinner & Co.*; 3,135 tons; 331-3x46-9x23-1; 429 n.h.p.; triple-expansion engines. The Spanish ship *Maria Victoria* was on a voyage from London to Spezia when she was wrecked on November 8th, 1929, on Baldayo Beach.

MARIANA

Agwilines Inc.; 1915; *Newport News S.B. & D.D. Co.*; 3,110 tons; 335x46-8x22-7; 309 n.h.p.; triple-expansion engines. The American ship *Mariana* left Guanica on March 3rd, 1942, for Boston but did not arrive, and was presumed to have been torpedoed.

MARIANNE

A/S Nesjar; 1920; *T. van Duijvendyk* s Scheepswerf.*; 1,915 tons; 265-4x42-2x18-6; 162 n.h.p.; triple-expansion engines. The Norwegian steamship *Marianne* was sunk by gunfire from German surface craft on December 12th, 1942, off Lowestoft. Fourteen of her crew were killed.

MARIANNE

D/S A/S Progress; 1924; *A/S Rodby Havns Jernskibs.*; 1,239 tons; 236-4x37-1x14-6; 83 n.h.p.; triple-expansion engines. The Danish steamship *Marianne* struck a mine and sank on May 28th, 1946, in the Sound, off Stevns.

MARIANNE TOFT

A/S Jutlandia (Jens Toft); 1930; *Sir J. Priestman & Co.*; 2,302 tons; 283-8x42x17-8; 198 n.h.p.; triple-expansion engines. The Danish ship *Marianne Toft* was in collision with the *Cornelius Ford* and sank on September 12th, 1945, nine miles N. of Chickens, Isle of Man. She was carrying iron ore from Oxelosund to Barrow. Ten of the crew were missing.

MARIE

M. Goossens; 1924; *Swan, Hunter & Wigham Richardson*; 1,444 tons; 240x37-2x17-7; 168 n.h.p.; triple-expansion engines. On a voyage from Rotterdam to La Pallice with a cargo of coal, the Belgian ship *Marie* was involved in a collision in foggy weather with the *Bharatkhand* on July 18th, 1948, and sank.

MARIE CELESTE (see MARY CELESTE)

MARIE FANNY

D'Orbigny & Faustin; 1878; *Austin & Hunter*; 574 tons; 195-5X 27-5x15; 94 n.h.p.; compound engines. The French steamship *Marie Fanny* was wrecked on the Casquets, Channel Islands, on December 14th, 1896. Fifteen of the crew were drowned.

MARIE FERDINAND

H. Ferdinand; 1911; *R. Thompson & Sons*; 1,157 tons; 267-4 X 38-5x17; 218 n.h.p.; triple-expansion engines. The German steamship *Marie Ferdinand* was wrecked on January 10th, 1943, at Steinort, near Libau.

MARIE JOSE

Les Cargos Algeriens Soc. Anon.; 1925; *Swan, Hunter & Wigham Richardson*; 2,477 tons; 315-9x45-1x20-6; 283 n.h.p.; triple-expansion engines. The French steamship *Marie Jose* was torpedoed and sunk by a German submarine on May 29th, 1940, 40 miles N.W. of Vigo on a voyage from Casablanca to Bordeaux.

MARIE LEONHARDT

The Admiralty (Everett & Newbigiri); 1902; *Schiffswerft v. H. Koch*; 1,466 tons; 250-9x36-8x15-8; 129 n.h.p.; 9 knots; triple-expansion engines. The steamship *Marie Leonhardt* was mined and sunk off the Sunk lightship on February 14th, 1917. Five men were killed.

MARIE MOERSK

Ministry of War Transport (C. T. Bowring & Co.); 1928; *Burmeister & Wain*; 8,271 tons; 466-3x61-8x34-2; 542 n.h.p.; oil engines. The British tanker *Marie Mcersk* was bombed and set on fire by German aircraft on March 21st, 1941, off Crete. She reached port under her own power and was again bombed and set on fire on April 12th, in Salamis Bay, and sank on the next day. Six of her crew were killed in the first attack and eight in the second. The tanker was raised by the Italians and towed to Trieste, where she was finally bombed and destroyed by Allied aircraft in February, 1945.

MARIE MOLINOS

Soc. des Voiliers Fran^aise; 1899; *Ateliers & Chantiers de la Loire*; 1,946 tons; 270-5x39-7x22-3. The French sailing vessel *Marie Molinos* was sunk by a German submarine in the Bay of Biscay on May 3rd, 1916.

MARIENBURG

Kohlen Import u. Poseidon Schiffahrt A.G.; 1917; *Jonker & Stans*; 1,322 tons; 236-7x36-5x15-9; 177 n.h.p.; triple-expansion engines. The German steamship *Marienburg* was bombed and sunk by Russian aircraft on September 1st, 1944, off the Latvian coast.

MARIETTA DAL

Dalhousie Steam & Motor ship Co.; 1944; *Bethlehem Fair field Shpyd. Inc.*; 7,236 tons; 423-3x57-1x34-8; 2,500 i.h.p.; triple-expansion engines. The British cargo ship *Marietta Dal* was wrecked on Smith Rock, Cape Moreton, about 30 miles N. of Brisbane, on May 15th, 1950. She was carrying a general cargo from Galveston to Adelaide.

MARIETTA E.

Leith Hill Shipping Co.; 1940; *W. Hamilton & Co.*; 7,628 tons; 421-1x60-4x35-8; 520 n.h.p.; triple-expansion engines. The British steamship *Marietta E.* on a voyage from New York and Durban to Alexandria, was torpedoed and sunk by a submarine on March 4th, 1943, soon after leaving Durban. Nine of her crew were lost.

MARIFUMARU

Mitsubishi Kisen K.K.; 5,135 tons. The tanker *Marifum Mam* was sunk by U.S. carrier-based aircraft on November 6th, 1944, about 50 miles W. of Batangas, Philippines.

MARIGOLA

G.B. Bibolini; 1906; *W. Denny & Bros.*; 5,996 tons; 439 -6 x 54x31-5; 741 n.h.p.; triple-expansion engines. The Italian steamship *Marigold* was shelled and sunk by a British submarine on November 1st, 1941, about two miles off Kuriat Island, Tunisia.

MARIGOLD

British Navy corvette; 1941; *H. Robb*; 925 tons; 193x32x16; 17 knots; quadruple-expansion engines; one 4 in.A.A., several smaller.

The corvette *Marigold*, Lt. J. A. S. Halcrow, R.N.R., was bombed and sunk by enemy aircraft W. of the Straits of Gibraltar on December 9th, 1942. Of those on board three officers, including Lt. Halcrow, and 46 ratings were killed. In November, 1941, *Marigold* was responsible for sinking the German submarine *U-433*, which she forced to the surface with depth charges and then engaged with gunfire. Her commander and 37 others were picked up by *Marigold*.

The *U-433* was credited with having sunk the *Ark Royal*.

MARILYSE MOLLER

Mollers; 1915; *Kiangnan Dock & Engineering Works*; 786 tons; 204'3x35-1x11-8; 68 r.h.p.; triple-expansion engines. The British steamship *Marilyse Moller* was torpedoed and sunk by a submarine on July 1st, 1942, on a voyage from Port Said to Haifa. Thirty-one of her crew of 35 were lost.

MARIN SANUDO

Lloyd Trieslino Soc. Anon di Nav.; 1926; *Cantiere Navale Triestino*; 5,081 tons; 418-1x53-2x25-3; 489 n.h.p.; oil engines. The Italian motorship *Marin Sanudo* was torpedoed and sunk by a British submarine on March 3rd, 1942, about ten miles off Lampion Island.

MARINA

Donaldson Line; 1900; *Furness Withy & Co.*; 5,204 tons; 400X52x29-2; 510 n.h.p.; 12 knots; triple-expansion engines. The *Marina*, Capt. Browne, was torpedoed and sunk by a German submarine 30 miles W. of Fastnet on October 28th, 1916, whilst on a voyage to the United States. There was little time for saving life and the boats got away with scarcely any provisions, one party having only a few biscuits and a little bully beef between them. This boat was picked up 30 hours later. Of those on board the *Marina* 51 were Americans, of whom six were drowned. The captain and chief engineer were the last to leave the vessel and both were drowned in jumping for a boat. Ten others also lost their lives.

MARINA RASKOVA

U.S.S.R.; 1919; *Chester S.B. Co.*; 5,695 tons; 400-7x 54-2 x 30-1; 537 n.h.p.; triple-expansion engines. The steamship *Marina Raskova* was formerly the American *Ironclad*, one of a group of ships lent by the U.S. Government to the Russians. She was torpedoed and sunk by a German submarine on August 12th, 1944, near Murmansk.

MARINE MERCHANT

Marine Nav. Co.; 1944; *New England S.B. Corp.*; 6,639 tons; 422-8x57x34-8; triple-expansion engines. The American ship *Marine Merchant* was carrying sulphur from Port Sulphur to Portland, Me., on April 14th, 1961, when she encountered heavy weather and broke in two and sank 40 miles S.E. of Portland lightship.

MARINE SULPHUR QUEEN

Marine Sulphur Trans. Corp.; 1944; *Sun S.B. & D.D. Co.*; 7,240 tons; 523-5x68-2x —; turbo-electric engines. The American tanker *Marine Sulphur Queen* was carrying molten sulphur from Beaumont to Norfolk. She left the former port on February 2nd, 1963, and was in wireless communication on the following day, but she was not seen again. Debris and lifejackets were found.

MARIONGA

Neill & Pandelis; 1912; *Richardson, Duck & Co.*; 4,214 tons; 380 x 51 x 24 - 8; 394 n.h.p.; triple-expansion engines. The Greek steamship *Marionga* was torpedoed and sunk by a German submarine on May 23rd, 1941, on a voyage from Glasgow to Takoradi. Twenty-six of her crew were lost.

MARIONGA GOULANDRIS

P. Goulandris; 1905; *A. McMillan & Son*; 3,191 tons; 345•6x47-5x22-2; 320 n.h.p.; triple-expansion engines. The Greek steamship *Marionga Goulandris* was torpedoed and sunk by a submarine in the Mediterranean on July 5th, 1917.

MARIPOSA

Elder, Dempster & Co.; 1891; *Sir W. G. Armstrong, Mitchell & Co.*; 5,305 tons; 421X48x29-2; 584 n.h.p.; triple-expansion engines. The British cargo ship *Mariposa* was wrecked at Forteau Point, Labrador, on September 27th, 1895. She was on a voyage from Montreal to Liverpool carrying cattle and a general cargo.

MARISTON

W. S. Miller & Co.; 1909; *R. Duncan & Co.*; 2,611 tons; 310X 46-1x20-4; 248 n.h.p.; triple-expansion engines. The British cargo ship *Mansion* was wrecked near Cape Goro-detsky, at the entrance to the White Sea, on August 30th, 1911. She was on a voyage from Zaandam to Archangel and was sailing in ballast.

MARISTON

Mar is ton Steamship Co.; 1915; *Russell & Co.*; 2,908 tons; 344-8x48x20-8; 285 n.h.p.; 9-5 knots; triple-expansion engines. The steamship *Mariston* was torpedoed and sunk by a German submarine 82 miles W. of Fastnet on July 15th, 1917. The captain and 27 men were killed.

MARITH

A/S Jensens Rederi II; 1922; *Armstrong Whitworth & Co.*; 7,417 tons; 440-8x57-4x34; 424 n.h.p.; triple-expansion engines. The Norwegian tanker *Marit II* was carrying oil from Curacao to New York when on September 13th, 1946, she was caught in a hurricane, broke in two and sank in 35° 09' N., 73° 34' W. Eighteen survivors in a boat were picked up by the tanker *Pan Amoco* and another six by the tanker *Gulphawk*, but the captain, his wife and ten of the crew were lost.

MARITANA

Suchet Mauran & Co.; 1857; *Quincy, Mass.*; 991 tons. The sailing ship *Maritana*, Capt. Williams, left Liverpool on September 25th, 1861, for Boston with 39 persons, passengers and crew, and general cargo. The voyage was normal until November 2nd when the ship was off the Highland Light at Cape Cod at 4.30 in the afternoon. Shortly after 8 p.m. Capt. Williams took a bearing on Race Point Light and continued on his course for Boston Light. The weather was rapidly growing worse with a south-easterly gale and frequent squalls of snow. Just before midnight the Boston Light was sighted for a brief period and then obscured by a heavy squall. An attempt was made to tack ship, but before she could be brought to the wind she struck on the Egg, or Shag Rocks, half a mile E. of Boston Light.

A member of the crew, Thomas Haney, swam ashore with a line but was unable to obtain a hold on the rocks and had to be hauled back again suffering from severe injuries. With the fall of the tide the *Maritana* broke in two, Capt. Williams being killed by falling from the deck into the wreckage of the ship as she broke.

Twelve persons were saved, of whom seven were washed ashore on the poop when it floated free of the wreck, and five seamen who swam to the Shag Rocks. Lighthouse keeper Moses Barrett endeavoured to signal to the small town of Hull, across the channel, but the snow frustrated his efforts.

The *Maritana* carried a figurehead which had been previously carried by the French warship *Berceau* and then by the sailing ship *Caroline*, both of which had met with misfortune.

MARITANA

MARITANA

Culliford & Clark; 1882; J. L. Thompson & Son; 1,806 tons; 277x36x20-5; 173h.p.; compound engines. The Sunderland steamship *Maritana* was sunk in a collision with the *Esmeralda* off Brest on May 13th, 1895. Eleven of the *Maritana's* crew were drowned.

MARITIMA

Neill & Pandelis; 1912; Hawthorn, Leslie & Co.; 5,801 tons; 426 X 54 -1 x 29 - 3; 777 n.h.p.; quadruple-expansion engines. The British steamship *Maritima*, on a voyage from New York to Glasgow, was torpedoed and sunk by a German submarine on November 2nd, 1942, about 500 miles E. of Belle Isle strait. Twenty-seven of her crew and three gunners were lost.

MARITZA

Fleisburger Dampfercompagnie Harold Schuldt & Co. K.G.; 1936; Neptunwerft Rostock; 2,910 tons; 332-1x49x19-1; 207 n.h.p.; compound engines. The German steamship *Maritza* was shelled and sunk by British warships on November 24th, 1941, S.W. of Crete.

MARJORIESEED

Seed Shipping Co.; 1907; Osbourne, Graham & Co.; 1,860 tons; 279 - 3 x 40 -1 X18 -1; 190 n.h.p.; triple-expansion engines. The British cargo ship *Marjorie Seed* was wrecked off Lady Island, Ayr Bay, on December 25th, 1924. She was on a voyage from Glasgow to Huelva carrying a cargo of coal and coke.

MARK

N.V.Houtvaart; 1930; A. Vuijk&Zonen; 1,514 tons; 244-1 x 38-9x17; 195 n.h.p.; triple-expansion engines. The Dutch steamship *Mark* struck a mine and sank on September 9th, 1939, off the west coast of Jutland.

MARK LANE

John Cory & Sons; 1878; Palmers' Co.; 1,995 tons; 287x 35-3x24-3; 212 n.h.p.; compound engines. The British cargo ship *Mark Lane* was wrecked near Punta Entinas, Spain, on June 12th, 1912. She was on a voyage from Newport to Almeria carrying a cargo of coal.

MARKAY

Keystone Tankship Corpn.; 1942; Sun S.B. & Dry Dock Co.; 10,342 tons; 503-9x68-3x36-9; 1,726 n.h.p.; turbine engines. The American tanker *Markay* was at Wilmington, Calif., with a cargo of butane on June 22nd, 1947, when there was an explosion and she caught fire. The explosion wrecked the ship and caused damage in the harbour to the extent of some \$2,000,000.

MARKELLA

J.E.Xenios; 1881; W.B.Thompson; 1,124 ton; 218x30-2x 21; 127 n.h.p.; compound engines. The Greek steamship *Markella* was torpedoed and sunk by a German submarine in the Bay of Biscay on November 23rd, 1917.

MARKERSDALL

Akties. Dampsk. Rodby Havn; 1907; Akt. Burmeister & Wain; 1,640 tons; 269-9x39-2x17-6; 144 n.h.p.; triple-expansion engines. The Danish steamship *Markersdall* was torpedoed and sunk by a German submarine in the North Sea on June 30th, 1917.

MARLAY

Tedcastle, McCormick & Co.; 1890; Workman, Clark & Co.; 798 tons; 200-2x29-2x14; 170 n.h.p.; compound engines. The collier *Mar lay* was lost off Baily, Dublin Bay, on December 16th, 1902, while carrying a cargo of coal from Liverpool to Dublin. Fourteen of the crew were drowned.

MARLBOROUGH

J.Leslie; 1876; R. Duncan & Co.; 1,191 tons; 228x35x21. The full-rigged ship *Marlborough*, Capt. W. Hird, left Lyttelton, New Zealand, for London on January 11th, 1890, with a cargo of frozen meat and wool. She carried one passenger and a crew of 29, and was spoken by a passing vessel when two days out, after which she was never heard of again.

MARLBOROUGH

G. W. Churchill; 1863; Fuller, N.S.; 1,383 tons; 202-2X 39-8x25. The full-rigged ship *Marlborough* was lost in heavy weather in the North Atlantic on April 3rd, 1898. Fifteen of the crew were drowned.

MARLENE

Kaye Transport Co.; 1920; Barclay, Curie & Co.; 6,507 tons; 450-4x58-2x29-2; 845 n.h.p.; triple-expansion engines. The British steamship *Marlene*, on a voyage from Calcutta to London via the Cape, was torpedoed, shelled and sunk by a German submarine on April 4th, 1941, off Sierra Leone. Thirteen of her crew were lost.

MARLOO

Adelaide S.S. Co.; 1891; Palmers' Co.; 2,628 tons; 323x 40-3x17-2; 441 n.h.p.; triple-expansion engines. The Australian cargo ship *Marloo* was wrecked on September 27th, 1914, south of Sandy Cape, Queensland, while on a voyage from McKay to Brisbane.

MARLY

Paul Blich; 1918; Akers Mek. Vcerks; 1,115 tons; 226-5X 36-5x15-7; 150 n.h.p.; triple-expansion engines. On a voyage from Karachi to Cochin, the Norwegian ship *Marly* was abandoned in a sinking condition on October 15th, 1940, in 18° 30' N., 72° 21' E. Searchers found no trace of the ship and no survivors.

MARMION

Pyman Steamship Co.; 1912; Irvine's S.B. & D.D. Co.; 4,066 tons; 380x51-2x24-8; 435 n.h.p.; 11 knots; triple-expansion engines. The steamship *Marmion* was torpedoed and sunk by a German submarine 300 miles W. of Ushant on August 26th, 1917. Seventeen men were killed. The captain was among the survivors.

MARMION

British Navy, destroyer; 1915; Swan, Hunter & Wigham Richardson; 1,029 tons; 271x26-7x8-7; 25,000 s.h.p.; 34 knots; turbine engines; Yarrow boilers; three 4 in. guns, one 2 pdr., 1 m.g., 4 T.T. The destroyer *Marmion* was sunk in a collision in the North Sea on October 21st, 1917. The vessel carried a complement of about 100.

MARMION

London & North Eastern Railway Co.; 1906; A. & J. Inglis; 409 tons; 210x24x8-3; 212 n.h.p.; compound-diagonal engines. The paddle steamer *Marmion* was taken over by the Admiralty during the First World War for service as a minesweeper. She survived the war and returned to her service in the Kyles of Bute where she continued until the outbreak of the Second World War when she was again taken over by the Admiralty. On the night of April 8th, 1941, she was bombed and sunk off Harwich and although she was subsequently raised she was found to be unfit for further service.

MARMORA

Peninsular & Oriental Steam Navigation Co.; 1903; Harland & Wolff; 10,509 tons; 530-4x60-3x25-5; 13,000 i.h.p.; 18-5 knots; quadruple-expansion engines. The *Marmora* was taken over by the British Admiralty as an armed merchant cruiser and served in that capacity through nearly four years of the First World War. She was chiefly employed in the South Atlantic, where she took part in the search for the German raider *Moewe*, and in escorting convoys. On July 23rd, 1918, she was torpedoed off the Irish coast by a German submarine and sank soon afterwards. All her complement, except for ten ratings who were killed by the explosion, were taken off in safety. At the time of her loss the *Marmora* was commanded by Capt. Walter E. Woodward, D.S.O.

MARNA

Chr. Salvesen & Co.; 1879; *Austin & Hunter*; 1,022 tons; 224•5 X 32-1 x 14-4; 99hp.; compound-inverted engines. The British cargo ship *Marna* was wrecked off Ameland Light on December 7th, 1882. She was on a voyage from Libau to Antwerp carrying a cargo of grain.

MARNE

Cie. de Navigation d'Orbigny; 1917; *Sunderland S.B. Co.*; 4,019 tons; 375x52x23-7; 371 n.h.p.; triple-expansion engines. The French steamship *Marne* was torpedoed and sunk by a German submarine in the Bay of Biscay on June 28th, 1917.

MARNIX VAN SINT ALDEGONDE

Stoomv. Maats. Nedqrland; 1930; *Nederlandsche Scheepsbouw Maats.*; 19,355 tons; 586-2 x 74 -8 x 36- 1; 3JOO n.h.p.; oil engines. The motor liner *Mar nix van Sint Aldegonde* was torpedoed by German aircraft on November 6th, 1943, about six miles off Cape Bougaroin Light, Algeria. She was taken in tow but sank before reaching port. The liner was carrying some 3,000 troops from Liverpool to North Africa and all these, together with her crew, were safely landed at Philippeville.

MARO

S. Theophanides; 1924; *Odense Staalskibs.*; 3,838 tons; 306-5 x 51x21-5; 450 n.h.p.; oil engines. The Greek motorship *Maro* left the River Mersey on January 2nd, 1942, for Halifax. She reported on January 9th, but was never heard of again. A lifebuoy was washed ashore. She was believed to have been sunk by a submarine on or about January 17th.

MAROC

Delmas Freres; 1898; *W. Gray & Co.*; 2,808 tons; 306x43x 18-2; 250 n.h.p.; triple-expansion engines. The French steamship *Maroc* was torpedoed and sunk by a German submarine in the English Channel on April 14th, 1918.

MAROON

Glasgow Navigation Co.; 1883; *E. Finch & Co.*; 1,509 tons; 240 x 35'4x18-3; 146 n.h.p.; compound engines. The British cargo ship *Maroon* anchored \ miles off Biarritz on December 17th, 1910, to repair an engine breakdown. A storm blew up and the ship was torn from her moorings and wrecked. She was carrying a cargo of coal from the Clyde to Bayonne.

MAROSANNA

Cayman Islands Co.; 1928; *Pusey & Jones Corp.*; 2,076 tons; 293 - 7 X 38 - 2 x —; oil engines. The British cargo ship *Marosanna* sprang a leak and sank on August 1st, 1961, in lat. 5° 30' N., long. 79° W. She was carrying a cargo of bananas from Guayaquil to Tampa.

MAROUADIO INGLESSI

Oriental Shipping Co. (A. A. Capparis); 1894; *Palmer's* Co.*; 2,835 tons; 315x43-2x20'3; 245 n.h.p.; triple-expansion engines. The Greek ship *Maroudio Inglessi* was carrying coal from Barry to Piraeus when on February 15th, 1921, she went ashore on the Estellas Group near the Burlings.

MAROUKO PATERAS

Anastassios Pateras Sons; 1917; *W. Pickersgill & Son*; 4,269 tons; 390x52*3x23*5; 466 n.h.p.; triple-expansion engines. The Greek ship *Marouko Pateras* went ashore on November 3rd, 1941, on Double Island, near Battle Harbour. She was refloated but sank on November 5th, two miles S.W. of Double Island.

MAROUSSIO LOGOTHETIS

Goulandris Bros.; 1913; *Irvine's S.B. & D.D. Co.*; 4,669 tons; 385 X 52 X 27 - 1; 320 n.h.p.; triple-expansion engines. The Greek steamship *Maroussio Logothetis* was torpedoed and sunk by a German submarine on May 15th, 1943, 300 miles S.W. by S. of Freetown, inward bound from Rio de Janeiro. The captain, 25 of the crew and one gunner were lost.

MARQUES DE CAMPO

Cia. Trasmediterranea; 1918; *Cia. Euskalduna*; 2,252 tons; 265 x 36 - 5 x 23 - 7; 217 n.h.p.; triple-expansion engines. The Spanish ship *Marques de Campo* was wrecked on May 10th, 1924, off Dar el Beida lighthouse near Casablanca.

MARQUES DE MUDELA

Cia. Anon. de Nav. Izarra; 1883; *A. Stephen & Sons*; 1,930 tons; 280 -5 X 38 -2 x 22 -3; 226 n.h.p.; compound engines. The Spanish steamship *Marques de Mudela* was torpedoed and sunk by a German submarine in the Bay of Biscay on August 31st, 1917.

MARQUES DEL DUERO

Spanish Navy, gunboat; 1875; *Spain*; 500 tons; 157-5 X 25-5 x 8-5; 550 i.h.p.; 10 knots; compound engines; one 6-2 in. m.l. gun, two 4-7 in., 1 m.g. For narrative of the loss of this vessel, see *Reina Cristina*, flagship of Rear-Admiral Montojo at the battle of Manila Bay, May 1st, 1898, when the entire Spanish Asiatic Squadron was destroyed.

MARQUETTE

Atlantic Transport Co.; 1898; *A. Stephen & Sons*; 7,057 tons; 486 X 52-3x31 -3; 770 n.h.p.; 13 • 5 knots; triple-expansion engines. The transport *Marquette* left Egypt for Salonika on October 19th, 1915, carrying the ammunition column of the 29th Division and the New Zealand Stationary Hospital. The troops on board numbered 22 officers and 588 other ranks, mostly Royal Field Artillery. There was also a party of 36 nurses in addition to the crew, and 541 transport animals. On October 23rd the *Marquette* was sighted by the *U-35*, Lt. Cdr. Waldemar Kophamel, 36 miles S. of Salonika. The troopship was torpedoed and badly damaged but did not sink immediately.

The total loss of life was 128, of whom 11 were nurses, 88 troops and 29 crew. The survivors were picked up by British and French patrol boats.

MARS

A. Heard & Co.; 1862; *C. J. Mare & Co.*; 1,021 tons; 261 -6x 31-3 x 21-1; inverted direct-acting engines. The iron steamship *Mars*, Capt. A. A. McCaslin, left Hong Kong early on June 14th, 1871, bound for Amoy with 233 Chinese passengers, \$7,000 in treasure and a general cargo. At 2.30 a.m. on the following day she struck on a reef near Cupchi Point and was totally wrecked. One of the boats was swamped and five Chinese sailors lost their lives. The remainder of the crew and the passengers were saved.

MARS

Harris & Dixon; 1898; *Furness, Withy & Co.*; 3,856 tons; 340 X 47 -1 x 20 -1; 302 n.h.p.; triple-expansion engines. The British cargo ship *Mars* was wrecked off Rurui, La Perouse Straits, on March 17th, 1905. She was on a voyage from Barry to Vladivostok carrying a cargo of coal. Some days later a boat with five men was picked up. These were the only survivors reported.

MARS

Rederi A/B Iris; 1924; *Bergens Mek. Verksted*; 1,877 tons; 265'8x42-2x17-8; 162 n.h.p.; triple-expansion engines. The Swedish steamship *Mars* struck a mine and sank on December 20th, 1939, about one mile from Blyth on a voyage from Kopman-holmen to London. Seven of her crew were lost.

MARS

Rederi A/B Wallonia; 1882; *J. Readhead & Co.*; 1,475 tons; 255x36x17-5; 158 n.h.p.; compound engines. The Swedish steamship *Mars* struck a mine and sank on December 21st, 1939, about 80 miles E. of Aberdeen on a voyage from Leith to Malmo. Eighteen lives were lost.

MARS

Koninklijke Nederlandsche Stoomb. Maats.; 1925; *New Waterway S.B. Co.*; 1,582 tons; 267-9x39-1x16-8; 207n.h.p.; triple-expansion engines. The Dutch steamship *Mars* struck a mine, caught fire and sank on May 29th, 1945, outside Patras. The cargo included 1,033 tons of high octane spirit in drums. Five of her crew were killed.

MARSALA

MARSALA

R.M.Sloman, Jr.; 1926; *Akt. Ges. Neptun*; 1,856 tons; 285-8 X 41-2 X 16 • 7; 191 n.h.p.; triple-expansion engines. The German ship *Marsala* was on a voyage from Savona to Hamburg with a cargo of rice, and when 20 miles N.N.E. of Ushant on April 8th, 1938, in dense fog, she was in collision with the *Tafna* and sank.

MARSHALL

Elbe & Number Steam Navigation Co.; 1846; *Shields*; 307 tons; *SOr.h.p.*; 9 knots; compound engines. The steamship *Marshall* left Hamburg for Hull on November 26th, 1853, under command of Capt. Rohrs, with 30 passengers and a crew of 18. When approaching the mouth of the Humber the *Marshall* ran into the barque *Woodhouse*, Stockholm for Hull, Capt. Catgens, and struck her heavily on the starboard bow. The captain of the *Woodhouse* hailed the steamship, asking that she would reverse her engines and also asking her name. No reply came to these hails and the *Marshall* swung round and struck the *Woodhouse* another heavy blow on the stern. This was the last seen of her and it was presumed that she sank.

The collision took place in thick weather off Kilnsea, five miles from the Newsand Float near the mouth of the Humber. The *Woodhouse* lost her jib-boom and fore top-gallant-mast and an apprentice fell overboard and was drowned.

The only further news of the *Marshall* was brought by some North Sea fishermen who saw the tops of her masts at low tide off Kilnsea, while another fishing smack found one of her boats.

MARSLEW

Walmar S.S.Co.; 1926; *Lithgows*; 4,542 tons; 385x52x26-6; 467 n.h.p.; 11 knots; triple-expansion engines. The steamship *Marslew*, Capt. H. R. Watkins, was torpedoed and sunk by a German submarine about 300 miles N.N.W. of Rockall on February 23rd, 1941. The captain and 12 of the crew were lost.

MARTAZAN

H. Fernie & Sons; 1906; *R. Craggs & Sons*; 3,466 tons; 352-5 X 47x15-7; 334 n.h.p.; triple-expansion engines. The British cargo ship *Martazan* sank after a collision in 16° 34' N., 26° 49' W., on January 5th, 1917. She was on a voyage from Sierra Leone to Liverpool carrying a general cargo.

MARTE

Soc. Ligue di Armamento; 1917; *Cantiere Navale Riuniti*; 5,290 tons; 394-9x51-7x27-6; 335 n.h.p.; triple-expansion engines. The Italian steamship *Marte* was torpedoed and sunk by a British submarine on December 29th, 1942, two miles from Cape Ferrato, Sardinia.

MARTHA

M. Carl; 1897; *W. Gray & Co.*; 1,182 tons; 232x34x16-6; 127 n.h.p.; triple-expansion engines. The Danish steamship *Martha* was torpedoed and sunk by a German submarine in the North Sea on May 15th, 1915.

MARTHA HENDRIK FISSER

Hendrik Fisser A.G.; 1911; *Ropner & Sons*; 4,879 tons; 387-5x 52-1x27; 434 n.h.p.; triple-expansion engines. The German steamship *Martha Hendrik Fisser* was sunk by British destroyers on April 11th, 1940, at Narvik, during the invasion of Norway.

MARTHA WOERMANN

Woermann Linie A.G.; 1902; *Blohm & Voss*; 2,310 tons; 300-5x38-3x23-4; 157 n.h.p.; triple-expansion engines. The German steamship *Martha Woermann* was wrecked on July 11th, 1924, at Forcados while on a voyage from Sapele to Hamburg.

MARTHE ROUX

Gillet & Fils; 1899; *Ateliers & Chantiers de la Loire*; 1,962 tons; 270-5x39-7x22-3. The French sailing vessel *Marthe Roux* was sunk by a submarine in the Mediterranean on July 3rd, 1917.

MARTIN

British Navy, destroyer; 1941; *British Isles*; 1,920 tons; 354x 37x10; 48,000 s.h.p.; 36-5 knots; turbine engines; 3-drum boilers; six 4 • 7 in. guns, one 3 in.A.A., 4 T.T. The destroyer *Martin*, Cdr. C. P. R. Thomson, D.S.O., took part in the landing at Algiers in November, 1942. On the 10th she was torpedoed and sunk by a German submarine in the Western Mediterranean, with the loss of seven officers, including Cdr. Thomson, and 154 ratings.

MARTIN GOLDSCHMIDT

D/S AIS Progress; 1922; *A/S Koge Veer ft Mas kin.*; 2,094 tons; 289-9x43-1x19-5; 228 n.h.p.; triple-expansion engines. The Danish steamship *Martin Goldschmidt* was torpedoed and sunk by a German submarine on February 13th, 1940, off the north west coast of Scotland. Fifteen of her crew of 20 were killed.

MARTOS

Compania Valenciana de Navegacion; 1883; *Gourlay Bros. & Co.*; 1,427 tons; 234x33-1x16-7; 153 n.h.p.; 9 knots; compound engines.

The Spanish steamship *Martos* was bound from Cadiz to Malaga with ten saloon and 78 third class passengers and a crew of 20. On the night of August 15th, 1910, she ran into dense fog, but continued to steam at three-quarter speed. At about 2 o'clock on the morning of the 16th, when 32 miles W. of Tarifa, the *Martos*, which was sounding her siren at the prescribed intervals, collided with the German steamship *Elsa*. She was struck amidships, her engine room flooded and she sank in three minutes.

The crew of the *Elsa* showed commendable promptitude in getting out the boats, which picked up over 70 survivors. The number drowned amounted to 23 passengers and seven crew, including the captain, a man of over 70 years of age who went down on the bridge.

The *Elsa*, which had her starboard bow stove in and her forepeak full of water, managed to reach Gibraltar with survivors.

MARUKOMARU

Japanese Government; 3,068 tons (approx.). The steamship *Maniko Mam* struck a mine and sank on April 10th, 1945, off Shanghai.

MARVALE

Allan Line S.S. Co.; 1907; *Barclay Curie & Co.*; 11,438 tons; 500-3x61-2x38; 917 n.h.p.; 16 knots; triple-expansion engines.

The liner *Marvale*, Capt. Lewis, left Quebec on May 18th, 1923, for Glasgow. On the afternoon of the 21st in dense fog she ran on Freef's Rock, off Pine Point, Newfoundland. The discipline on board was excellent and within 25 minutes 437 persons were transferred to the boats without the loss of a single life. The shipwrecked people were taken to St. John's and later they were conveyed to Southampton on board the steamship *Melita*.

MARWICK HEAD

A. F. Henry & McGregor; 1920; *Day, Summers & Co.*; 496 tons; 165-5x25-7x9-6; 61 r.h.p.; triple-expansion engines. The British steamship *Marwick Head*, on a voyage from Bo'ness to London with coal, struck a mine and sank on December 12th, 1939, off Caister. Five of her crew were lost.

MARY

Emigrant ship; 1835 (circa); 368 tons. The sailing vessel *Mary* was chartered to ply between London and New South Wales. On May 19th, 1845, she left Port Jackson on her homeward voyage with 43 passengers beside crew. Her commander was Capt. Newby who was accompanied by his wife and three daughters, and of those on board 20 were women. The ship was not in the best of trim and was known to leak badly. At first the captain attempted to make a quick passage by hugging the Australian coast, but after four days this course became too dangerous.

The weather worsened considerably on the 24th and at about 11 p.m. the ship struck on Flinder's Island, Bass Strait, and became a total wreck. Owing to the confusion in the darkness and the succession of heavy seas which swept the vessel, 17 of the women were washed overboard and drowned.

There was no other loss of life, but the survivors were stranded for eight days and were then rescued by settlers.

MARY ANNING

J.H. Anning; 1880; Palmers' Co.; 1,237 tons; 240-5x30-7x20; 99hp.; compound inverted engines.
The British collier *Mary Anning* was sunk in a collision while at anchor at Tail of the Bank, River Clyde, on January 24th, 1885, at the start of a voyage to Odessa with a cargo of coal.

MARY BAIRD

Page Shipping Co.; 1908; A. G. Neptun; 1,830 tons; 261 - 1x 39-2x16-9; 176 n.h.p.; triple-expansion engines. The British steamship *Mary Baird* hit a mine and sank two and a half miles from Pendeen Cove on May 18th, 1917. Seven of the crew were killed.

MARY CELESTE

J. H. Winchester and others; 1861; Joshua Dewis; 282 tons; 103x25-7x16-2.
The *Mary Celeste* was launched from the yard of Joshua Dewis, Spencer Island, N.S., as the *Amazon*. In 1868 she was registered under the United States flag as the brig *Mary Celeste* and purchased by Capt. Winchester in 1869.
On November 7th, 1872, she sailed from New York to Genoa with a cargo of 1,701 barrels of crude alcohol, having on board Capt. B. S. Briggs, his wife and two year old daughter and a crew of seven. On December 5th, 1872, the Nova Scotian brigantine *Dei Gratia* sighted the *Mary Celeste* about 590 miles W. of Gibraltar. Capt. Morehouse of the *Dei Gratia* could see that the other ship was in distress and, being unable to obtain any response to his hail, he approached to within a few hundred yards and saw through his glass that there was no helmsman and that the deck was unoccupied. He therefore ordered his chief mate with two others to row across and investigate.

The *Mary Celeste* was found to be in a perfectly seaworthy condition. Contrary to many subsequent stories, her boat had gone and it was plain that she had been abandoned in a hurry. The captain's chronometer, sextant, Navigation Book and most of the ship's papers were missing. The Log Book had been entered up to November 24th, and the log-slate showed that the last observation had been made at 8 a.m. on November 25th. There were no signs of violence and no half-eaten meals on the tables, both fictions which led to extravagant speculation in later stories. The forehatch had been removed, probably to ventilate the cargo hold, a normal precaution with a cargo of crude alcohol.

Later, when the ship was unloaded at Genoa, nine barrels were found to be empty, having apparently leaked during the voyage. Herein may lie the solution of the mystery, that fear of fire or explosion may have caused the captain to abandon the ship temporarily but, the weather worsening, he and his unfortunate companions were swept away and lost. Weather reports of November 25th support this theory.

The mate and two seamen from the *Dei Gratia* sailed the derelict brig into Gibraltar, and Capt. Morehouse received a salvage award of £1,700.

On January 3rd, 1885, the *Mary Celeste*, under new ownership, was wrecked on Roskell's Reef, near Miragoane, Haiti, on a clear day and in a calm sea, the reef being marked on the charts and clearly visible. None of her crew of seven was lost.

MARY E. MOORE

*Moore Mill & Lumber Co. Inc.; 1913; Craig S.B. Co.; 1,783 tons; 221 - 5x40*2x14; 74 n.h.p.; compound engines.* The American ship *Mary E. Moore* lost her propeller and tailshaft on February 23rd, 1927, and filled and sank off the Coquille River.

MARY ISABEL

R. S. Lamb & Co., Sydney; 1892; Grangemouth Dockyard Co.; 339 tons; 146x27-2x11-2.
The barquentine *Mary Isabel*, Captain A. L. D. Cooper, left Whangape, New Zealand, on September 8th, 1911, for Sydney with a cargo of kauri wood. Soon after leaving port she encountered very bad weather and was never seen again. One of her lifeboats was picked up by the Norwegian barque *Este*, and the steamship

Navua reported sighting a derelict in the Tasman Sea which may have been the missing vessel. Her crew numbered 11 all told.

MARY K.

Kansas Compania Naviera; 1896; Short Bros.; 1,594 tons; 259x36-8x — ; triple-expansion engines.
The Costa Rican ship *Mary K.* left Straton on November 29th, 1957, for Constantza with a cargo of iron pyrites. She reported on December 1st that her cargo had shifted and she was in distress. Nothing more was heard of her and she was assumed to have sunk with all hands. Two empty lifeboats were found and a body was washed up on Skyros Island.

MARY LAWTON

G. H. Lovitt & Co.; 1870; Grosse Coques, N.S.; 743 tons; 159-7x34-4x19-5.
The Canadian wooden barque *Mary Lawton* left Liverpool on December 26th, 1881, for Baltimore. On February 2nd 1882, she was dismasted in heavy weather off the mouth of the English Channel.

Six men were washed overboard and drowned. The remainder of the crew were taken off by the Norwegian barque *Norma*.

MARY LIVANOS

Livanos Bros. Maritime Co.; 1938; W. Gray & Co.; 4,771 tons; 419-2x56-7x25-3; 463 n.h.p.; triple-expansion engines. The Greek steamship *Mary Livanos* was torpedoed and sunk by a submarine on July 11th, 1943, on a voyage from Beira to Aden. Eight of her crew were killed.

MARY LUCKENBACH

Luckenbach S.S. Co.; 1919; American International S.B. Corp.; 5,049 tons; 390x54-2x27-6; 600 n.h.p.; turbine engines.
The American steamship *Mary Luckenbach*, on a voyage from New York and Loch Ewe to North Russia, was a unit of a convoy attacked by German dive bombers on September 14th, 1942, about 600 miles W.N.W. of the North Cape. One of the aircraft crashed on to the deck of the *Mary Luckenbach* which blew up and sank with the loss of all on board. *

MARY ROSE

British Navy, destroyer; 1916; Palmer & Co.; 1,025 tons; 271x26x8-7; 25,000 s.h.p.; 34 knots; turbine engines; Yarrow boilers; three 4 in. guns, 4 T.T.

The destroyer *Mary Rose*, Lt. Cdr. C. L. Fox, left Lerwick on October 15th, 1917, in company with her sister destroyer *Strongbow*, Lt. Cdr. Edward Brooke, and two armed trawlers, the *Elise* and the *P. Fannon*, escorting an eastbound convoy. Next day the destroyers separated, *Mary Rose* going ahead to meet the approaching westbound convoy near Marsten, Norway. The *Strongbow* was ordered to continue with the eastbound convoy and superintend its dispersal and rejoin *Mary Rose* at sea.

On the afternoon of the 16th, *Mary Rose* left Marsten with 12 merchantmen in convoy and on the same evening was joined by *Strongbow*.

At 6 a.m. on the following morning *Strongbow* was surprised by the German minelaying cruisers *Brummer* and *Bremse* of 3,800 tons, 34 knots and armed with four 5-9 in. guns apiece, and before she could bring her guns into action she was rendered helpless by a salvo from the enemy ships which severed her main steampipe. The *Strongbow* was abandoned and sank at about 7.30 a.m.

In the meanwhile the firing had been heard by the *Mary Rose* which put about and made contact with the enemy cruisers, but was struck by a salvo and rendered unmanageable. She sank in a very short time taking with her most of her complement of 88 officers and ratings, including Lt. Cdr. Fox. A few survivors with one officer, Sub Lt. Freeman, managed to escape on a raft.

Of the 12 merchant ships in the convoy nine, mostly Scandinavian, were sunk, the Germans subjecting all boats and rafts to an indiscriminate shelling, whereby many persons lost their lives. The armed trawler *Elise* came upon the scene in time to pick up a number of survivors from boats and rafts, but altogether about 250 lives were lost in this attack. In addition to the *Elise* the trawler *P. Fannon* and three British steamships managed to escape.

MARY SLESSOR

MARY SLESSOR

Elder Dempster Lines; 1930; A. McMillan & Son; 5,027 tons; 370-6x51-2x20-1; 652 n.h.p.; 13 knots; oil engines. The motor vessel *Mary Slessor*, Capt. C. H. Sweeney, was mined and sunk not far from Ceuta on the Riff coast on February 7th, 1943. Thirty-two men were killed. Capt. Sweeney was among the survivors.

MARY TATHAM

Tatham & Co.; 1879; P. Hardcastle & Co.; 1,627 tons; 251 x 33-4x23-2; 160 h.p.; compound inverted engines. The British cargo ship *Mary Tatham* was wrecked at Cape Yerimo, Japan, on April 10th, 1882, while on a voyage from Nagasaki to Portland, Or., carrying a general cargo.

MARYLAND

Det Forenede Dampskibs Selskab; 1914; J. C. Tecklenborg A.G.; 5,136 tons; 417-7x55-8x31-8; 340 n.h.p.; triple-expansion engines.

The Danish steamship *Maryland* struck a mine and sank in the North Sea on August 21st, 1914.

MARYLAND

Det Forenede D/S; 1921; Hall, Russell & Co.; 4,895 tons; 362'2x50-2x31-6; 327 n.h.p.; triple-expansion engines. The Danish ship *Maryland*, with a crew of 34, left Madeira on February 7th, 1940, for Copenhagen. She was in wireless communication on February 9th, but was not heard of again.

MARYLYN

Kaye Transport Co.; 1930; Lithgows; 4,555 tons; 385x52x 26-6; 489 n.h.p.; 11 knots; triple-expansion engines. The steamship *Marylyn*, Capt. T. C. Townsend, was torpedoed and sunk by a German submarine on October 30th, 1942, about 150 miles S.W. of the St. Paul Rocks. Fifteen men were killed. Capt. Townsend was among the survivors.

MASAKI MARU No. 2

Kusakabe Kisen K.K.; 1918; Osaka Iron Works; 1,238 tons; 220 X 33 • 6 X 18 - 5; 79 n.h.p.; triple-expansion engines. The steamship *Masaki Mam No. 2* was torpedoed and sunk by the U.S. submarine *Wahoo* on September 29th, 1943, 125 miles E. of Hungnam, Korea.

MASASHIMA MARU

Iino Kaiun K.K.; 2,742 tons. The steamship *Masashima Mam* was bombed and sunk by ILS land-based aircraft on March 13th, 1945, about 40 miles S. of Canton.

MASAYA

Seaboard Steamship Corp.; 1920; Fore River S.J.B. Corp.; 1,174 tons; 314-4x31-7x20-7; 398 n.h.p.; oil engines. The American motorship *Masaya* was bombed and sunk by Japanese aircraft on March 28th, 1943, about five miles from Oro Bay, New Guinea. Six of her crew were killed.

MASCARA

MacLay & McIntyre; 1912; A. Stephen & Sons; 4,957 tons; 402-1x52-2x27-4; 425 n.h.p.; triple-expansion engines. The British cargo ship *Mascara* was wrecked near Danilov Island in July, 1915, while on a voyage from Barry to Archangel carrying a cargo of coal.

MASCOT

Scotto, Ambrosino, Pugliese, Fils & Co.; 1922; Christiansands Mek. Verksted; 1,225 tons; 239-5x36-2x13-1; 127 n.h.p.; triple-expansion engines. The French steamship *Mascot* was bombed and sunk by British aircraft on December 8th, 1942, outside Bougie.

MASHOBRA

British India Steam Navigation Co.; 1914; Barclay Curie & Co.; 8,236 tons; 449-4x58-2x32-8; 900 n.h.p.; 13 knots; triple-expansion engines. The liner *Mashobra*, Capt. H. J. Brooks, rendered useful service in

the early months of the First World War, when she acted as a transport during the Gallipoli campaign. Later she resumed her normal service and on April 15th, 1917, was torpedoed by an Austrian submarine 140 miles S.W. of Cape Matapan. She was hit abreast the engine room and eight of the engineer's staff were killed by the explosion. The crew were ordered to abandon ship and Capt. Brooks was taken prisoner. The enemy then fired 70 shells at the ship which sank at about 1.40 p.m.

The survivors were picked up by trawlers and landed at Malta on the following day.

MASHONA

Ellerman & Bucknall S.S. Co.; 1894; Russell & Co.; 4,145 tons; 368-7x47-5x26-9; 399 n.h.p.; triple-expansion engines. The British cargo ship *Mashona* was wrecked 30 miles west of Zavora Point on July 15th, 1915. She was on a voyage from the Tees and London to Beira and Kobsichang carrying a general cargo.

MASHONA

British Navy, destroyer; 1937; Vickers Armstrong; 1,870 tons; 355-5x36-5x9; 44,000 s.h.p.; 36-5 knots; turbine engines; 3-drum boilers; eight 4 • 7 in. guns, 7 smaller, 4 T.T. The destroyer *Mashona*, under command of Cdr. Selby, was one of those taking part in the pursuit of the German battleship *Bismarck* (which see). On May 28th, 1941, the day following the *Bismarck's* destruction, the British forces were heavily bombed by German aircraft and *Mashona* was hit and sunk with the loss of one officer and 45 ratings out of her complement of 190.

MASSALIA

E. Petritzis fils; 1888; Short Bros.; 2,186 tons; 292x39-1x18-9; 228 n.h.p.; triple-expansion engines. The Greek steamship *Massalia* was sunk by a German submarine W. of Gibraltar on October 29th, 1916.

MASSMAR

Calmar Steamship Corp.; 1920; Kawasaki Dockyard Co.; 5,828 tons; 385x51-2x25-6; 3,000 i.h.p.; 9 knots; triple-expansion engines.

The American steamship *Massmar*, Capt. Albert C. Leimbach, was steaming in convoy off Reykjavik on July 5th, 1942, when she struck a mine and sank. The captain and 16 men were killed and three wounded. Four other ships in the convoy were lost in the same minefield.

MATABELE

British Navy, destroyer; 1937; Scott's Shipbuilding & Engineering Co.; 1,870 tons; 355-5x36-5x9; 44,000 s.h.p.; 36-5 knots; turbine engines; 3-drum boilers; eight 4-7 in. guns, 8 smaller; 4 T.T.

The destroyer *Matahele*, Cdr* A. C. Stanford, D.S.C., was torpedoed and sunk by a German submarine in the Barents Sea on January 17th, 1942, while escorting a convoy to North Russia. Twelve officers, including Cdr. Stanford, and 22 ratings were killed.

MATADI

Elder, Dempster & Co.; 1889; Naval Construction & Armaments Co.; 2,683 tons; 311-6x39-2x24-7; 253 n.h.p.; triple-expansion engines.

The British cargo ship *Matadi* was destroyed by an explosion of gunpowder at Boma, West Africa, on March 7th, 1896. She was on a voyage from Liverpool to Loanda carrying a general cargo. Twenty-five lives were lost.

MATAURA

New Zealand Shipping Co.; 1896; Barclay, Curie & Co.; 5J64 tons; 421 x 54 - 6 x 29 -1; 502 n.h.p.; triple-expansion engines. The British cargo ship *Mataura* was wrecked at Sealer's Cove, Straits of Magellan, on January 27th, 1898. She was on a voyage from Wellington to London carrying a general cargo.

MATHERAN

T. & J. Brockebank; 1919; Lithgows; 7,653 tons; 470-3x58-2x32-1; 800 n.h.p.; 12 knots; triple-expansion engines. The steamship *Matheran*, Capt. J. Greenall, was torpedoed and sunk by a German submarine on October 19th, 1940, in convoy

about 400 miles W. of the Hebrides. Nine persons, including Capt. Greenall, were killed.

MATILDE PEIRCE

Peirce Bros.; 1908; *J. Blumer & Co.*; 3,533 tons; 321-5x46x14; 280 n.h.p.; triple-expansion engines. The Italian ship *Matilde Peirce* was wrecked on November 18th, 1922, at Marittimo Island, near Trapani, while on a voyage from Genoa to New York.

MATINA

Elders & Fyffes; 1929; *Cammell Laird & Co.*; 5,389 tons; 400'2x51-4x30'4; 447 n.h.p.; 13-5 knots; triple-expansion engines.

The steamship *Matina*, Capt. D. A. Jack, left Port Antonio, Jamaica, on October 12th, 1940, for Garston. She was never heard of again and was considered to have been sunk by enemy action. Her complement was 68 in all. Capt. Jack had previously been in command of the *Carare* when she was mined in the Bristol Channel in May, 1940.

MATRA

T. & J. Brocklebank; 1926; *W. Hamilton & Co.*; 8,003 tons; 470-1x62-2x32-2; 1,047 n.h.p.; 12 knots; turbine engines. The steamship *Matra*, Capt. J. F. Butterworth, was mined and sunk in the Thames Estuary one mile E. of the Tongue lightship on November 13th, 1939. Sixteen Indian seamen were killed.

MATSU

Japanese Navy, destroyer; 1942; *Japan*; 1,000 tons; 300 X — x —; 30 knots; turbine engines; four 4 - 7 in. guns, 4 T.T. The destroyer *Matsu* was sunk in an engagement with American cruisers and destroyers N.W. of Bonin Islands on August 4th, 1944. The *Matsu* carried a complement of about 120.

MATSUE MARU

Nippon Yusen K.K.; 1921; *Yokohama Dock Co.*; 7,061 tons; 445 x 58 x 34; 632 n.h.p.; triple-expansion engines. The steamship *Matsue (Matue) Maru* was torpedoed and sunk by the U.S. submarine *Harder* on April 17th, 1944, 350 miles S.W. of Guam Island.

MATSUEIMARU

Morita Kogyo K.K.; 1938; *Osaka Iron Works*; 1,877 tons; 271 - 7x40x20-3; steam engines. On March 30th, 1944, the steamship *Matsuei (Matuei) Maru* was attacked by U.S. carrier-based aircraft and sunk off Babelthuap, Palau Islands.

MATSUKAWA MARU

Kawasaki Risen K.K.; 1938; *Kawasaki Kisen K.K.*; 3,825 tons; 354-7x50x27-6; 333 n.h.p.; turbine engines. The steamship *Matsukawa (Matukawd) Maru* was torpedoed and sunk by the U.S. submarine *Jack* on June 30th, 1944, about 50 miles W. of Batangan, Philippines.

MATSUKAZE

Japanese Navy, destroyer; 1923; *Maizuru*; 1,270 tons; 320 x 30x9-6; 38,500 s.h.p.; 34 knots; turbine engines; Kanpon boilers; four 4•7 in. guns, 2 A.A.m.g., 6 T.T. The destroyer *Matsukaze* was torpedoed and sunk E. of the Bonin Islands by the U.S. submarine *Swordfish* on June 9th, 1944. The destroyer's normal complement was 148.

MATSUMAEMARU

Japanese Government; 1924; *Mitsubishi Zosen K.K.*; 3,429 tons; 350 X 52x22; turbine engines. The ferry *Matsumae (Matumae) Maru* was sunk by U.S. carrier-based aircraft on July 14th, 1945, in the Tsugaru Strait.

MATSUMOTOMARU

Nippon Yusen K.K.; 1921; *Yokohama Dock Co.*; 7,024 tons; 445 x 58x 34; 632 n.h.p.; triple-expansion engines. The steamship *Matsumoto (Matumoto) Maru* was torpedoed and sunk by the U.S. submarine *Tang* on October 25th, 1944, off the Pescadores Islands.

MATSUO MARU

Japanese Government; 1906; *Schiffswerft v. Henry Koch*; 1,911 tons; 275x40x16-6; 121 n.h.p.; triple-expansion engines. The steamship *Matsuo Maru* was formerly the Italian *Matteo Ricci*, chartered by the Japanese. She struck a mine and sank on June 13th, 1945, off Shimonoseki.

MATSUSHIMA

Japanese Navy, cruiser; 1890; *La Seyne*; 4,277 tons; 295 x 50-7x21-2; 5,400 i.h.p.; 17-5 knots; triple-expansion engines; one 12-5 in. gun, eleven 4 - 7 in., five 6 pdr., eleven 3 pdr., 6 m.g., 4 T.T.

The cruiser *Matsushima* had taken part in the Sino-Japanese War of 1894 and again in the Russo-Japanese War of 1904-5. Later she became a unit of a small training squadron under Admiral Yoshimatsu, consisting, besides herself, of the cruisers *Itsukushima* and *Hashidate*. This squadron was anchored off Makang, in the Pescadores, when at 4.8 a.m. on April 30th, 1908, the *Matsushima's* stock magazine blew up and she sank in a few minutes.

As far as can be established she had on board some 348 officers and men, of whom 58 were cadets, under command of Capt. Y. Yashiro. Of this number 23 officers, 33 cadets, one warrant officer and 150 men, making a total of 207, were lost. The survivors numbered 141, of whom 30 were saved by boats from the other cruisers. Capt. Yashiro was among the drowned.

MATSUSHIMA MARU

Nippon Kiyo Kogyo K.K.; 10,488 tons. The tanker *Matsushima Maru* was sunk by U.S. carrier-based aircraft on January 16th, 1945, about 50 miles S. of Hong Kong.

MATSUURA MARU

Matsuura Kisen K.K.; 1918; *Osaka Zosenho*; 1,218 tons; 227-4x32-6x17-3; 97 n.h.p.; triple-expansion engines. The Japanese ship *Matsuura Maru* struck a submerged wreck and sank on September 14th, 1938, off the Amherst Rock at the entrance to the Yangtze River. She was carrying coal from Newchwang to Shanghai.

MATTEO RENATO IMBRIANI

1977; *J. C. Teckknborg A.G.*; 5,882 tons; 450-8x57^2x27; 697 n.h.p.; triple-expansion engines. The German steamship *Albany* was requisitioned by the Italian Government and renamed *Matteo Renato Imbriani*. Subsequently she struck a mine and sank in the Mediterranean on March 20th, 1918.

MATTHEW CAY

Cay, Hall & Co.; 1872; *Softley & Co.*; 1,355 tons; 241-9x 31'6x17-4; 120 h.p.; compound engines. The British cargo ship *Matthew Cay* was wrecked near Cape Finisterre on September 23rd, 1887. She was on a voyage from Troon to Genoa carrying a cargo of coal and iron. Most of the crew were drowned.

MATTI

Bechs Rederi Akties.; 1907; *A. Vuijk & Zonen*; 2,139 tons; 280 '8x41-1x20-3; 247 n.h.p.; triple-expansion engines. The Norwegian steamship *Matti* was torpedoed and sunk by a German submarine in the North Sea on September 22nd, 1917.

MAULE

S.A. Comm. Braun y Blanchard; 1882; *Hall, Russell & Co.*; 1,598 tons; 260-6x35-4x21-2; 197 n.h.p.; triple-expansion engines. On a voyage from Lota to Magallanes with a cargo of coal, the Chilean ship *Maule* was wrecked on September 8th, 1928, at Columbine Point, Farquhar Pass, Magellan.

MAUNA ALA

Matson Navigation Co.; 1918; *Texas S.S. Co.*; 6,256 tons; 420-5x54-2x31-4; 555 n.h.p.; triple-expansion engines. The American ship *Mauna Ala* went ashore on December 10th, 1941, on Clatsop Beach, four miles S. of the mouth of the Columbia River, and broke up.

MAUNA LOA

Matson Navigation Co.; 1919; Los Angeles S.B. & D.D. Co.; 5,436 tons; 410x54-4x27-2; 422n.h.p.; triple-expansion engines.

The American steamship *Mama Loa* was bombed and sunk by Japanese aircraft at Port Darwin, N. Australia, on February 19th, 1942. Five of her crew were killed.

MAURICE TRACY

M. & J. Tracy, Inc.; 1916; Gt. Lakes Eng. Works; 2,468 tons; 253-3x43-6x25-4; 284 n.h.p.; triple-expansion engines. The American ship *Maurice Tracy* collided with another ship and sank on June 16th, 1944, in 39° 53' N., 73° 58' W.

MAVISBROOK

S.S. Tregenna Co.; 1912; J. Blumer & Co.; 3,152 tons; 332-5x 48-7x21-9; 284 n.h.p.; 9 knots; triple-expansion engines. The steamship *Mavisbrook* was torpedoed and sunk by a German submarine 50 miles S.E. by S. \ S. of Cabo de Gata, on the Mediterranean coast of Spain, on May 17th, 1918. The captain and 17 men were killed.

MAX SCHULTZ

German Navy, destroyer; 1936; Deutsche Werke, Kiel; 1,625 tons; 374x37x9-5; 40,000 s.h.p.; 36 knots; turbine engines; five 5 in. guns, four 37 m.m., 8 T.T.

The German destroyer *Max Schultz* in company with the *Leberecht Maass* was in the North Sea on February 22nd, 1940, when she and her consort were attacked by bombers of the German Air Force in mistake for British ships. Both vessels were hit and sunk. The normal complement of the *Max Schultz* was 283.

MAY

I. E. Guthe & Co.; 1890; J. Priestman & Co.; 1,178 tons; 231-5 X 32-1 X 15-5; 115 n.h.p.; triple-expansion engines. The British cargo ship *May* foundered in the Caribbean Sea on January 5th, 1897, while on a voyage from Barranquilla to New York. She was carrying a cargo which included coffee and hides.

MAY

W. Turnbull & Co.; 1869; Southwick; 237 tons; 114-7x25-1x 12-8

The three-masted schooner *May*, Capt. J. Urquhart, left Kaipara Harbour, New Zealand, for Onehunga on October 16th, 1902. She had a cargo of 180,000 feet of sawn timber and carried a crew of seven. There was a westerly gale and the schooner was in tow of the small steamship *Pilot* of only 80 h.p.

After battling with the seas from 8 a.m. to 2 p.m. the *May* cast off the tow, as both vessels were in danger of sinking. The schooner soon afterwards began to drift shorewards, and at 5.30 on the following morning, about 20 miles S. of Kaipara Heads, she ran ashore and capsized in the breakers. All the crew were drowned with the exception of a Maori boy named W. Dunn, who was a local swimming champion. After a terrific struggle of over 30 minutes he managed to cover the short distance between the wreck and the shore, which he reached in an exhausted condition.

The steamship *Pilot*, regarded as missing for several days, was found to have taken shelter further down the coast.

MAYA

Cisterne Italiane Soliani & Saltamerenda; 1894; D. G. Dunlop & Co.; 3,867 tons; 355-4x44-4x30-1; 413n.h.p.; triple-expansion engines.

The Italian steamship *May a* was torpedoed and sunk by a British submarine on September 5th, 1941, about six miles S. of Tenedos, Aegean.

MAYA

Japanese Navv, heavy cruiser; 1930; Kawasaki Dockyard; 9,850 tons; 650x62' 3x16-5; 100,000s.h.p.; 33knots; turbine engines; Kampon boilers; ten 8 in. guns, four 4 7 in. 9 eight 47 mm., 4 m.g., 8 T.T., 4 aircraft.*

The Japanese heavy cruisers *May a* and *At ago* were torpedoed by the U.S. submarines *Dace* and *Darter* respectively in the Palawan Passage, Philippines, on October 23rd, 1944. The attack occurred on

462

the day prior to the commencement of the main battle of Leyte Gulf, each cruiser sustaining four torpedo hits.

For further details see *Atago* and for full story of the battle see under the battleship *Musashi*.

MAYA MARU

Toa Kaiun K.K.; 1925; Yokohama Dock Co.; 3,145 tons; 352x46x27; 284 n.h.p.; triple-expansion engines. The steamship *Maya Mam* was torpedoed and sunk by the U.S. submarine *Cabrilla* on July 17th, 1944, 75 miles W. of Mandih in the Philippines.

MAYACHIMARU

Hokkaido Tanko Risen K.K.; 1916; Uraga Dock Co.; 2,159 tons; 268x40-7x23-6; 169 n.h.p.; triple-expansion engines. The steamship *Mayachi (Mayati) Mam* was torpedoed and sunk by the U.S. submarine *Pompon* on August 12th, 1944, off the east coast of Sakhalin.

MAYASAN MARU

Mitsui Senpaku; 9,433 tons.

The steamship *Mayasan Maru* was torpedoed and sunk by the U.S. submarine *Picuda* on November 17th, 1944, about 100 miles W.S.W. of Cheju Do Island, Korea.

MAYFELD

Woods, Taylor & Brown; 1890; Bute S.B. & E. Co.; 2,632 tons; 300X39x20-5; 245 n.h.p.; triple-expansion engines. The British cargo ship *Mayfield* was wrecked near Niarbyl Point, Isle of Man, on September 25th, 1909. She was on a voyage from the Clyde to Savona carrying a cargo of coal.

MAYSTONE

Thomas Stone; 1945; Grangemouth Dkyd. Co.; 2,025 tons; 272x40x17-2; triple-expansion engines.

The British cargo ship *Maystone* sank after a collision with the aircraft carrier *Albion* during a gale on October 18th, 1949. She was about four miles E. of Longstone Light on a voyage from Methil to London carrying a cargo of coal. The *Albion* saved four of the crew and these were the only survivors.

MAZEPPA

Renwick, Wilton & Co.; 1872; Palmers' Co.; 1,164 tons; 256'7x30-1x17-4; 134 n.h.p.; compound engines. The British cargo ship *Mazeppa* was wrecked at Flamborough Head on June 24th, 1908. She was on a voyage from the Tyne to Dartmouth carrying a cargo of coal.

MAZUR

Polish Navv, torpedo boat; 1915; Vulkan Werke, Hamburg; 349 tons; 205-5x20-5x7-5; 6,000 i.h.p.; 30 knots; four 3 in. guns, 2 m.g., 2 T.T.

The torpedo boat *Mazur* was attacked and sunk by German aircraft off Gdynia on September 1st, 1939. Her normal complement was 74.

MAZZINI

S.A. Cooperativa Garibaldi; 1913; Akt. Ges Weser; 5,809 tons; 420-3x56-2x29-6; 520 n.h.p.; triple-expansion engines. The Italian ship *Mazzini*, carrying coal from Baltimore to Algiers, went ashore at Graciosa on March 31st, 1925.

MEANDROS

Livanos Bros.; 1914; W. Dobson & Co.; 4,309 tons; 400-5x 52x25-1; 427n.h.p.; triple-expansion engines. The Greek ship *Meandros* collided during a fog with the *Dartford* and sank on February 12th, 1934, off St. Catherine's Point. She was on a voyage from Rosario to Amsterdam with a cargo of grain.

MECANICIEN DONZEL

Messageries Maritimes; 1918; Uraga Dock Co.; 8,227 tons; 445 x 58x40; 703 n.h.p.; triple-expansion engines. The French steamship *Mecanicien Donzel* was torpedoed and sunk by a submarine in the Mediterranean on June 3rd, 1918.

MECANICIEN PRINCIPAL CARVIN

Cie. Commercial de VAfrique Equatorial Fran false; 1922; Chantiers & Ateliers de la Gironde; 4,282 tons; 362-9x49-2x 24-4; 280n.h.p.; triple-expansion engines. The French steamship *Mecanicien Principal Carvin* was bombed and sunk by German aircraft on June 21st, 1940, at Verdon, River Gironde.

MECCA

British India S.N. Co.; 1873; A. & J. Inglis; 1,460 tons; 270 X 31 - 3x24-5; 138n.h.p.; triple-expansion engines. The British steamship *Mecca*, Capt. Parkman, on a voyage from Calcutta to Rangoon with passengers and general cargo, came across the British India steamship *Lndula* adrift with a broken propeller shaft, and took her in tow on May 23rd, 1898. During the following day the tow rope parted and while manoeuvring to make fast again the *Mecca* crossed the bows of the *Lndula* and was sunk by the ensuing collision. The captain and 52 passengers and crew were lost.

MECHANICIAN

Charente S.S. Co.; 1900; Workman Clark & Co.; 9,044 tons; 482 X 57 • 3 x 31 • 5; 604 n.h.p.; 13 knots; triple-expansion engines. The steamship *Mechanician*, serving as an armed escort vessel in the First World War, was torpedoed by a German submarine eight miles W. of St. Catherine's Point on January 20th, 1918. The ship was beached and became a total loss. Thirteen ratings were killed.

MECKLENBURG

Stoomvaart Maats. Zeeland; 1909; Fair field Co.; 2,88 5 tons; 349'8x42-7x16-4; 1,130 n.h.p.; triple-expansion engines. The Dutch steamship *Mecklenburg* struck a mine and sank in the North Sea on February 27th, 1916.

MEDANMARU

Mitsubishi Kisen K.K.; 5,755 tons. The tanker *Medan Mam* was torpedoed and sunk by the U.S. submarine *Seahorse* on June 27th, 1944, about 150 miles S. of Kaohsiung, Formosa.

MEDEA

N.V. Koninklijke Nederlandsche Stoomboot Maats.; 1916; Werf. Voorh. Rijkee & Co.; 1,311 tons; 266-4x39-2x14-4; 150n.h.p.; triple-expansion engines. The Dutch steamship *Medea* was torpedoed and sunk by a German submarine on August 12th, 1942, off the south coast of Cuba on a voyage from New York to Curacao. Five of her crew were lost.

MEDICEO

M. Querci; 1918; C. Cornell & Co.; 5,083 tons; 400-8x52-3x 28-5; 490 n.h.p.; triple-expansion engines. The Italian steamship *Mediceo* was bombed and sunk by British aircraft on January 31st, 1945, off Tagliamento.

MEDIE

Cie. de Navigation Paquet; 1911; Forges & Chantiers de la Mediterranee; 4,770 tons; 385-9x45-9x28; 380n.h.p.; triple-expansion engines. The French steamship *Medie* was torpedoed and sunk by a submarine in the Mediterranean on September 23rd, 1917.

MEDINA

Peninsular & Oriental Steam Navigation Co.; 1911; J. Caird & Co.; 12,358 tons; 550x62-8x34-5; 1,164 n.h.p.; 19 knots; quadruple-expansion engines. The liner *Medina*, Capt. H. S. Bradshaw, left Plymouth for London on April 28th, 1917, on the last lap of her voyage from India. The same evening, three miles E.N.E. of Start Point, she was torpedoed in the starboard engine room by a submarine. The engines stopped and the vessel began to sink. Wireless calls were sent out and passengers and crew went to the boats without confusion or hurry. At 7.15 p.m., 45 minutes after she had been hit, the *Medina* sank.

Mr. Palmer, the fourth engineer, and five native firemen were killed by the explosion, theirs being the only lives lost. The boats were taken in tow by destroyers and motor launches and brought to Dartmouth and Brixham.

MEDJERDA

Cie. de Navigation Mixte; 1898; Wigham Richardson & Co.; 1,918 tons; 287-5x36-3x15-8; 349n.hp.; triple-expansion engines.* The French steamship *Medjerda* was torpedoed and sunk by a submarine in the Mediterranean on May 11th, 1917.

MEDJERDA

La Tunisienne S.N. Co.; 1924; W. Gray & Co.; 4,380 tons; 370x52x25-5; 340 n.h.p.; 10-5knots; triple-expansion engines. The steamship *Medjerda*, Capt. C. E. Banks, left Peipel on March 7th, 1941, and Freetown March 13th, for Middlesbrough with iron ore. Nothing more was ever heard of the ship or her complement of 54.

MEDJIDIEH

Turkish Navy, protected cruiser; 1904; W. Cramp & Sons; 3,330 tons; 331x43x17; 12,500 i.h.p.; 22 knots; triple-expansion engines; Niclausse boilers; two 6 in. guns, eight 4 - 7 in., six 3 pdr., six 1 pdr., 2 T. T. The protected cruiser *Medjidieh* formed part of the squadron operating in the Black Sea during the First World War. Besides the above named ship there were the *Hamidieh*, *Goeben*, *Breslau* and a few destroyers. Although Turkish in name the squadron was dominated by the Germans, and was commanded by Admiral Souchon. The *Medjidieh* had a complement of 312 officers and men. On April 3rd, 1915, the squadron made an unsuccessful raid upon the transports assembled off the port of Odessa. During this operation the *Medjidieh* ran into a minefield and was sunk.

MEDOC

Worms et Cie.; 1930; D. & W. Render son & Co.; 1,166 tons; 237-3x34-1 X14-7; 188 n.h.p.; triple-expansion engines. The French steamship *Medoc*, flying the British flag, was torpedoed and sunk by German aircraft on November 26th, 1940, near the Eddystone Lighthouse. Thirty-nine of her crew were lost.

MEDUSA

British Navy, destroyer; 1915; J. Brown & Co.; 1,007 tons; 273-3x26-7x10-2; 25,000 i.h.p.; 32 knots; turbine engines; Yarrow boilers; three 4 in. guns, 4 T.T. The destroyer *Medusa*, Lt. Cdr. Hemans, was part of the famous Harwich Force commanded by Cdre. Tyrwhitt during the First World War. On March 24th, 1916, the force left Harwich for Hoyer, on the coast of Schleswig, escorting the seaplane carrier *Vindex*, with the intention of launching an air attack on the Zeppelin airship station. At 9 a.m. on the following day when close to the enemy coast two armed trawlers were discovered in the course of a destroyer sweep and both were sunk. This apprised the Germans of what was taking place and they attacked the flotilla from the air. In taking avoiding action *Laverock* rammed *Medusa* reducing the latter's speed to six knots; eventually she was taken in tow by *Lightfoot*. The weather had changed for the worse and the sea was rising. In these circumstances, and with the possibility of the High Seas Fleet making a sortie at any moment, *Medusa* was abandoned. She was not sunk at once as there was some hope that the derelict might be picked up next day, but owing to the rough weather she foundered during the night.

MEDWAY

British Navy, depot ship; 1928; Vickers-Armstrong; 14,650 tons; 580 x 85 x 22; 8,000 h.p.; 16 knots; oil engines; two 4 in. guns, four 4 in. A.A., 12 smaller. The depot ship *Medway*, Capt. Philip Ruck-Keene, C.B.E., was torpedoed by a German submarine off Alexandria on June 30th, 1942. The normal complement of the vessel was 400.

MEERKERK

N.V. Vereenigde Nederlandsche Scheepv. Maats.; 1916; Breuter Vulkan; 7,995 tons; 508-6x60-8x32-9; 954 n.h.p.; triple-expansion engines. The Dutch steamship *Meerkerk* struck a mine, broke in two and sank on June 16th, 1946, off Walcheren on a voyage from Rotterdam to Australia. Twelve of her crew were lost.

MEGAERA

MEGAERA

British Navy, storeship; 1,395 tons; 350 n.h.p.; steam engines', 6 guns.

The storeship *Megcera*, Capt. A. T. Thrupp, was wrecked on St. Paul Island, in the Indian Ocean on June 19th, 1871. The number lost is not known.

MEIAN

Standard Vacuum Oil Co.; 1901; Shanghai; 935 tons; steam engines.

The American steamship *Mei An* was bombed by Japanese aircraft on December 12th, 1937, near Hohsien, Yangtze River. She was again bombed and set on fire on about January 3rd, 1938, and became a total wreck. The vessel was carrying refugees at the time.

MEI HSIA

Standard Vacuum Oil Co.; 1926; Shanghai; 1,048 tons; steam engines.

The American tanker *Mei Hsia* was bombed and set on fire by Japanese aircraft on December 12th, 1937, near Hohsien, Yangtze River. She was beached but slipped off and sank. The tanker was carrying refugees on deck.

MEI PING

Standard Vacuum Oil Co.; 1927; Shanghai; 1,119 tons; steam engines.

The American steamship *Mei Ping* was bombed and set on fire by Japanese aircraft on December 12th, 1937, near Hohsien, Yangtze River, and sank later. She was carrying refugees at the time.

MEIGEN MARU

Meiji Kaiun K.K.; 1920; Asano S.B. Co.; 5,434 tons; 400X 53-2x29-4; 513 n.h.p.; triple-expansion engines.

The steamship *Meigen Maru* was torpedoed and sunk by the U.S. submarine *Gudgeon* on March 22nd, 1943, N. of Sourabaya,

MEIGLE

ShawS.S.Co.; 1881; Bar clay, Curie & Co.; 1,060 tons; 220-2 x 30-1 x 15-2; compound engines.

The Canadian cargo ship *Meigle* was wrecked at Marine Cove, one mile N. of St. Shotts, St. Mary's Bay, on July 19th, 1947. She was on a voyage from Charlottetown to St. John's, N.F.L., carrying livestock and a general cargo.

MEIHO MARU

Meiji Kaiun K.K.; 2,857 tons.

The steamship *Meiho Maru* was bombed and sunk by U.S. land-based aircraft on March 28th, 1945, about 50 miles W. of Keelung, Formosa.

MEIJI MARU No. 1

Hinode Risen K.K.; 1937; Tsurumi Seitetsu Zosen K.K.; 1,934 tons; 270X40x20-3; 156 n.h.p.; triple-expansion engines. The steamship *Meiji Maru No. 1* was taken over by the Japanese Navy and converted into an auxiliary gunboat. On April 20th, 1943, she was torpedoed and sunk by the U.S. submarine *Scorpion* off Onahama, Honshu Island.

MEIKAI MARU

Meiji Kaiun K.K.; 1917; Osaka Iron Works; 3,197 tons; 305 x 43 • 7 x 27 - 2; 288 n.h.p.; triple-expansion engines. The steamship *Meikai Maru* was torpedoed and sunk by the U.S. submarine *Gar* on May 15th, 1943, E. of Mindoro Island, Philippines.

MEIRYU MARU

Meiji Kaiun K.K.; 4,739 tons.

The steamship *Meiryu Maru* was bombed and sunk by U.S. land-based aircraft on January 2nd, 1945 off San Fernando, Philippines.

MEISEI MARU

Hiyoshi Kaiun K.K.; 1917; Superior S.B. Co.; 1,893 tons; 251 x 43 • 8 x 18 - 2; 274 n.h.p.; triple-expansion engines. The steamship *Meisei Maru* was torpedoed and sunk by the U.S. submarine *Flying Fish* on June 11th, 1945, about 100 miles E. of Rashin, Manchuria.

MEISHO MARU

Meiji Kaiun K.K.; 2,735 tons.

The steamship *Meisho (Meisyo) Maru* was bombed and sunk by U.S. land-based aircraft on January 16th, 1944, off Queen Charlotte Island, Bismarck Archipelago.

MEITEN MARU

Meiji Kaiun K.K.; 1938; Tama S.B. Co.; 4,474 tons; 363-Sx 50x29; 453 n.h.p.; oilengines.

The motor vessel *Meiten Maru* was torpedoed and sunk by the U.S. submarine *Tautog* on June 20th, 1943, about 250 miles S.W. of the Ladrone Islands.

MEIU MARU

Taisho Kaiun K.K.; 1918; Uruga Dock Co.; 8,230 tons; 445X 58x40; 703 n.h.p.; triple-expansion engines. The steamship *Meiu Maru* was torpedoed and sunk by the U.S. submarine *Silversides* on January 20th, 1943, N. of the Admiralty Islands.

MEIWA MARU

Meiji Kaiun K.K.; 2,921 tons.

The steamship *Meiwa Mam* was torpedoed and sunk by the U.S. submarine *Narwhal* on August 1st, 1942, off the north-west coast of Honshu.

MEIYO MARU

Toyo Risen K.K.; 1920; Asano S.B. Co.; 5,435 tons; 400x 43-2 x 29 - 4; 513 n.h.p.; triple-expansion engines. On a voyage from Vancouver to Yokohama, the Japanese ship *Meiyo Maru* went ashore on Umnak Island, Alaska, on February 11th, 1929.

MEIYOMARU

Meiji Kaiun K.K.; 1940; Tama S.B. Co.; 5,628 tons; 406-8 x 55-1x30-8; 379 n.h.p.; triple-expansion engines & L.P. turbine. The steamship *Meiyo Maru* was torpedoed and sunk by the U.S. submarine *S-38* on August 8th, 1942, S. of Rabaul, New Guinea.

MEIZAN MARU

Miyachi Risen K.K.; 1920; J. Coughlan & Sons; 5,480 tons; 410-5X54•1x27•5; 520n.h.p.; triple-expansion engines. The steamship *Meizan Maru* was formerly the Norwegian *Ven Koh*, seized by the Japanese. She was torpedoed and sunk by the U.S. submarine *Grayling* on August 27th, 1943, off the north-east coast of Mindoro Island, Philippines.

MEKNES

Compagnie Generate Transatlantique; 1913; Chantiers & Ateliers de St. Nazaire; 6J27 tons; 413-8x55'2x28-4; 12 knots; triple-expansion engines & L.P. turbines. The liner *Meknes* left Southampton on July 24th, 1940, with 1,281 French sailors, of whom 102 were crew, and 99 officers and 1,080 ratings were personnel of the French Navy. France had capitulated in June and the seamen were being repatriated. The ship was marked with French colours and was brightly illuminated in order that no possibility of mistake as to nationality might occur. At about 10.30 p.m., in a position somewhere off Portland, she was intercepted by a German torpedo boat which opened fire with machine and quick firing guns. The *Meknes* signalled her name and nationality and came to a standstill to await the E-boat commander's explanation. Instead of this she received a torpedo and sank in ten minutes.

Of those on board the *Meknes*, 898 survivors were landed in England, leaving nine officers and 374 ratings to be accounted for, of whom some may have reached France in boats. Over 100 of the survivors had to be sent to hospital.

MELANIE

Alexander & Mair; 1903; W. Gray & Co.; 2,996 tons; 325-4 x 47-1x22-4; 276 n.h.p.; 9 knots; triple-expansion engines. The steamship *Melanie* was torpedoed and sunk by a German submarine two miles E. of South Cheek, Robin Hood Bay, on June 16th, 1918. Five men were killed. The captain was among the survivors.

MELANIE SCHULTE

Schulte & Bruns; 1952; Nordseewerke, Emden; 6,170 tons; 446x58x24-8; oil engines.

The German motor cargo ship *Melanie Schulte*, Capt. H. Rohde, left Narvik on December 17th, 1952, for Mobile with a cargo of 9,307 tons of iron ore. She carried a crew of 35 all told.

Four days after leaving port, when about 90 miles W. of the Hebrides she sent out her position, stating that the weather was bad and getting worse. Her reports were required to be sent out at regular intervals, and this was the last her owners received. Later ships were asked to keep a look-out for her, and the Royal Navy and the Royal Air Force instituted a search, but without result.

On February 17th, 1953, one of the ship's lifebuoys was washed ashore on Benbecula Island, west coast of Scotland, and two pieces of wreckage identified as coming from her were washed ashore elsewhere.

MELBOURNE

R. M. Hudson & Sons; 1890; W. Pickersgill & Sons; 5,777 tons; 355x46x26; 331 n.h.p.; triple-expansion engines. The British cargo ship *Melbourne* was wrecked two miles north of Isla Argao, Philippines, on October 6th, 1913. She was on a voyage from Newcastle, N.S.W., to Cebu carrying a cargo of coal.

MELBOURNE STAR

F. Leyland & Co.; 1936; Cammell, Laird & Co.; 12,806 tons; 530x70-4x32-2; 12,000 b.h.p.; 16knots; oilengines. The liner *Melbourne Star*, Capt. J. B. Hall, was torpedoed and sunk by a German submarine about 600 miles S.E. of the Bermudas on April 2nd, 1943. Thirty-one passengers and 82 crew, including Capt. Hall, were killed. The only four survivors were landed at Bermuda on May 10th.

MELILLA

Oldenbrg.-Portugiesische Dampfsch. Rhederi; 1923; H. C. Stulcken Sohn; 2,653 tons; 279-3x40-9x24-9; 205 n.h.p.; triple-expansion engines.

The German steamship *Melilla* struck a mine and sank on February 22nd, 1943, between Rotterdam and Cuxhaven.

MELITA

William Gray & Co.; 1877; William Gray & Co.; 1,390 tons; 248x32x18-4; 120 h.p.; compound-inverted engines. The British cargo ship *Melita* was wrecked on Bunzus Rock, Morocco, on April 20th, 1886. She was on a voyage from Benisay to Newport carrying a cargo of iron ore.

MELMERBY

I. G. Ross & Co.; 1863; Nevins & Co.; 1,486 tons; 207-3x40-5x24.

The Canadian wooden sailing ship *Melmerby* left Quebec on September 30th, 1890, for Greenock with a cargo of timber. On October 3rd she ran into a heavy gale and was completely dismasted. The ship drifted for a week until she was driven on to a small island near Pictou, Nova Scotia, on the 12th. The captain and 16 men attempted to reach land by boat but the boat capsized in the heavy seas and only the pilot and two others were able to swim ashore. The remaining four of the crew stayed on board the wrecked *Melmerby* and were taken off later.

MELMORE HEAD

Ulster S.S. Co.; 1918; Workman, Clark & Co.; 5,273 tons; 390-4x51-8x29-8; 12 knots; turbine engines. The steamship *Melmore Head*, Capt. W. J. Leinster, was torpedoed and sunk by a German submarine in the North Atlantic on December 28th, 1942. Fourteen men were killed. Capt. Leinster was among the survivors.

MELO

Soc. Anon. di Navigazione a Vapore "Puglia"; 1887; Armstrong, Mitchell & Co.; 1,115 tons; 215x31-7x13-1; 121 n.h.p.; triple-expansion engines.

The Italian steamship *Melo* was torpedoed and sunk by a submarine in the Mediterranean on December 3rd, 1917.

MELPOMENI

P.M.Lemos; 1878; A.&J.Inglis; 1,084 tons; 249-8x30-3x15-9; 206n.h.p.; compound engines.

The Greek ship *Melpomeni* struck a mine and sank on March 10th, 1921, off Cape Baba.

MELPOMENE

Italian Navy, corvette; 194-; Italy; 565 tons; 220x27x7-7; 3,400 b.h.p.; 19 knots; oil engines; two 3-9 in. guns, five 20mmAA.

The corvettes *Melpomene* and *Spingarna* with the torpedo boat *Audace*, manned by German crews, were patrolling off Pag Island, between Fiume and Zara, on the night of November 1st, 1944, when they were brought to action by the British destroyers *Wheatland* and *Avon Vale*, both of 1,025 tons, six 4 in. guns. The fight was very brief, both corvettes being disabled in the first ten minutes and the *Audace* sunk about 30 minutes later. A large number of survivors was picked up from the three ships.

The full story of the action is told under the *Audace*.

MELROSE

G. Gibson & Co.; 1906; Ramage & Ferguson; 1,589 tons; 260-4x40-1 x 17; 200 n.h.p.; 11 knots; triple-expansion engines.

The steamship *Melrose*, Capt. Johnston, was mined and sunk near Ostend on March 15th, 1940. The vessel carried a crew of 23, of whom Capt. Johnston and five men were saved.

MELROSE ABBEY

Frederick Jones; 1877; T. Turnbull & Son; 1,211 tons; 236-2 X 32 • 1 X 17 • 1; 127 n.h.p.; compound engines.

The British cargo ship *Melrose Abbey* was wrecked on Les Fourches Rock, off the west coast of France, on July 31st, 1909. She was carrying a cargo of pit props from Arcachon to Cardiff.

MELROSE ABBEY

Frederick Jones & Sons; 1917; Campbeltown S.B. Co.; 1,256 tons; 230x35-8x15-6; 142 n.h.p.; triple-expansion engines. The British cargo ship *Melrose Abbey* sank after a collision off the Lizard on July 11th, 1926, while on a voyage in ballast from Cardiff to Delfzyl.

MELROSE ABBEY

CurrieLine; 1936; W. Gray & Co.; 2,473 tons; 307-7x45-1x 20-7; 234 n.h.p.; 95 knots; triple-expansion engines.

The steamship *Melrose Abbey*, Capt. F. J. Ormrod, was in convoy in the North Atlantic on December 27th, 1942, when she was torpedoed and sunk by a German submarine. Seven men were killed. Capt. Ormrod was among the survivors.

MELVILLE E. STONE

United States War Shipping Administration; 1943; Permanente Metals Corp.; 7,176 tons; 422-8x57x34-8; 39 n.h.p.; triple-expansion engines.

The American steamship *Melville E. Stone* was torpedoed and sunk by a German submarine on November 24th, 1943, about 60 miles from Cristobal on a voyage from Antofagasta to New York. Sixteen of her crew were killed.

MEMAS

A. Vergottis; 1900; Napier & Miller; 4,359 tons; 375-2 x

50x25-9; 415 n.h.p.; triple-expansion engines. The Greek steamship *Memas* was bombed and sunk by German aircraft on April 16th, 1941, at Chalkis, during the invasion of Greece.

MEMAS

N. D. Courouclis; 1912; G. Seebeck Akt. Ges.; 1,755 tons; 258 • 9 x 38 -1 x 17 • 8; 186 n.h.p.; triple-expansion engines. The Greek steamship *Memas* was torpedoed and sunk on June 28th, 1942, S.S.W. of Haifa. Seven of her crew were killed.

MEMBLAND

Macbeth & Co.; 1900; W. Gray & Co.; 3,027 tons; 330-4X 47-1x22-4; 262 n.h.p.; 10 knots; triple-expansion engines.

The steamship *Membland* left Hull at 8 a.m. on February 15th, 1915, bound for the Tyne, with a crew of 20 and a pilot. She was never heard of again and was presumed to have struck a mine.

MEMELLAND

MEMELLAND

German Government; 1906; W. Gray & Co.; 1,892 tons; 280 x 39 -1 x 19; 185 n.h.p.; triple-expansion engines. The steamship *Memelland* was formerly the Estonian *Julia*, seized by the Germans. She struck a mine and sank in late June 1944, in the North Sea.

MEMENTO

Acties. Ganger Rolf; 1884; Campbell, Mackintosh & Bowstead; 1,076 tons; 220 -5x35-1 x11 -9; 124 n.h.p.; compound engines. The Norwegian steamship *Memento* struck a mine and sank in the North Sea on March 31st, 1916.

MEMFI

Cia. Italiana Transat.; 1883; A. Stephen & Sons; 2,955 tons; 350 x 40 x 26 -1; 273 n.h.p.; triple-expansion engines. The Italian ship *Memfi* was carrying passengers from Genoa to Tunis when she went aground on February 4th> 1927, on Berni Reef, Capo Carbonara, Sardinia.

MEMNON

Elder Line; 1890; Harland & Wolff; 3,203 tons; 345-6X 40-9x26-7; 278 n.h.p.; 10 knots; triple-expansion engines. The steamship *Memnon* was torpedoed and sunk by a German submarine 20 miles S.W. of Portland Bill on March 12th, 1917. Six men were killed. The captain was among the survivors.

MEMNON

China Mutual S.N. Co.; 1931; Caledon Shipbuilding & Engineering Co.; 7,506 tons; 460x59-4x29-2; 1,304 n.h.p.; 16 knots; oil engines. The motorship *Memnon*, Capt. J. P. Williams, was torpedoed and sunk by a German submarine on March 11th, 1941, about 200 miles due W. of Cape Blanco, West Africa. Five of the crew were killed.

MEMPHIAN

F. Leyland & Co.; 1908; Harland & Wolff; 6,305 tons; 400 -3 X 52-3x26-9; 350 n.h.p.; 12 knots; quadruple-expansion engines. The steamship *Memphian* was torpedoed and sunk by a German submarine seven miles E.N.E. of North Arklow lightship on October 8th, 1917. Thirty-two persons were killed. The captain was among the survivors.

MEMPHIS

African S.S. Co.; 1890; Harland & Wolff; 3,797 tons; 345-6 x 40 - 9 X 26 - 7; 278 n.h.p.; triple-expansion engines. The British cargo ship *Memphis* was wrecked at Mizen Head, Dunlough Bay, on November 17th, 1896, while on a voyage from Montreal to Avonmouth carrying cattle and a general cargo. Nine of her crew were drowned.

MEMPHIS

Messageries Maritimes; 1892; Gourlay Bros. & Co.; 2^382 tons; 317-6x39-2x23-6; 300 n.h.p.; triple-expansion engines. The French steamship *Memphis* was torpedoed and sunk by a submarine in the Adriatic on February 16th, 1916.

MEMPHIS

A. Klat; 1920; Canadian Allis Chalmers; 2,088 tons; 251-7x 43-6x21-2; 274 n.h.p.; triple-expansion engines. The Egyptian steamship *Memphis*, on a voyage from Manchester to Vigo, ran into heavy weather off the north-west coast of Ireland on February 28th, 1941. Soon afterwards her engines broke down and she foundered with all on board, which included 29 survivors from the Norwegian motor vessel *Benjamin Franklin*—which see.

MENADO MARU

Osaka Shosen K.K.; 1922; Osaka Iron Works; 2,166 tons; 270x43x22-5; 210 n.h.p.; triple-expansion engines. The steamship *Menado Maru* was bombed and sunk by U.S. land-based aircraft on January 20th, 1944, off the Pescadores Islands.

MENANTIC

T. Hogan & Sons; 1893; J. L. Thompson & Sons; 3,024 tons; 322x42-7x18-6; 291 n.h.p.; triple-expansion engines. The British cargo ship *Menantic* was wrecked near Coronei on December 9th, 1904, while on a voyage from New York to Iquique carrying a general cargo.

MENAPIER

Brys & Gylsen; 1908; Short Bros.; 1,886 tons; 281X41X18-1; 188 n.h.p.; triple-expansion engines. The Belgian cargo ship *Menapier* was torpedoed and sunk by a German submarine in the North Sea on June 7th, 1915.

MENAPIER

Lloyd Royal Beige (Great Britain); 1907; W. Doxford & Sons; 3,920 tons; 349-7x49-1x24; 292 n.h.p.; triple-expansion engines. The British cargo ship *Menapier* sank after a collision one mile off Cala Burras Point on November 11th, 1917. She was carrying an iron ore cargo on a voyage from Villaricos to Gibraltar.

MENDANAU

N.V. Nederlandsch-Indische Maats. voor Zeevaart I; 1922; Blohm & Voss; 6,047 tons; 450x58-2x27; 882 n.h.p.; turbine engines. The Dutch steamship *Mendanau* was torpedoed and sunk by a German submarine on August 19th, 1942, on a voyage from Trinidad to Table Bay. Sixty-nine of her crew were lost.

MENDI

British & African S.N. Co.; 1905; A. Stephen & Sons; 4,230 tons; 370-2x46-2x23-3; 424 n.h.p.; 11-5 knots; triple-expansion engines. During the First World War the steamship *Mendi*, Capt. Henry A. Yardley, was used as a transport. On January 16th, 1917, the ship was one of a convoy of six vessels carrying South African and Australian troops to France, escorted by the armoured cruiser *Cornwall*. The German raider *Wolf* shadowed the ships for a time, but left on seeing the *Cornwall*. The convoy proceeded without further incident, the *Mendi* putting into Plymouth about a month later.

At 4.30 p.m. on February 20th in thick weather the ship left Plymouth for Havre. She carried 806 officers and men of an African native labour battalion and 88 crew. At 5 a.m. on the 21st, when off St. Catherine's Point, steaming dead slow and sounding her siren at the proper intervals, but without navigation lights, she collided with the liner *Darro*, 11,000 tons, Capt. Henry W. Stamp, also steaming without lights. The *Mendi* was struck on the starboard side in the vicinity of the fore troop deck, and many of the native contingent who were sleeping there were killed. The troopship took a heavy list which prevented the lifeboats on the port side from getting away. She sank in 20 minutes with a loss of 607 officers and men of the native battalion and 29 members of the crew. Owing to the danger from enemy submarines the *Darro* did not remain to render assistance, but proceeded on her course.

Capt. Yardley was struck on the head by a mast as the ship turned over but came to the surface and was rescued.

MENDI

Zugadi y Cia.; 1874; J. L. Thompson; 1,088 tons; 221-6x 30-5x20-7; 115 n.h.p.; compound engines. The Spanish ship *Mendi* was wrecked on the San Esteban de Pravia bar on December 21st, 1919.

MENDIBIL-MENDI

Cia. Nav. Sota y Aznar; 1903; J. Priestman & Co.; 4,501 tons; 347x46-5x21 -4; 322 n.h.p.; triple-expansion engines. The Spanish steamship *Mendibil-Mendi* struck a mine and sank in the North Sea on June 18th, 1916.

MENDOZA

Ministry of War Transport (A. Holt & Co.); 1920; Swan Hunter & Wigham Richardson; 8,233 tons; 451x58x32; 8,000 s.h.p.; 15 knots; turbine engines. The liner *Mendoza*, Capt. B. T. Batho, was torpedoed and sunk by a German submarine on November 1st, 1942, about 100 miles E.

of Durban. Twenty-eight members of the crew, including Capt. Batho, and a number of service personnel were killed.

MENDOZA

Hamburg-Sudamerikanische Dampfs. Ges.; 1920; W. Dobson & Co.; 5,193 tons; 399-5x52-3x28-4; 452n.h.p.; triple-expansion engines.

The German steamship *Mendoza* was bombed and sunk by Russian aircraft on April 9th, 1945, at Pillau.

MENES

Hamburg-Amerika Linie; 1926; Bremer Vulkan; 5,609 tons; 438-6x55-3x25-4; 437 n.h.p.; triple-expansion engines. The German steamship *Menes* struck a mine and sank on December 3rd, 1942, seven miles E. of Cani Island, Tunisia.

MENIN RIDGE

Ridge S.S. Co.; 1924; Burntislands S.B. Co.; 2,474 tons; 298-5X 44x21-2; 251 n.h.p.; triple-expansion engines. The British steamship *Menin Ridge*, on a voyage from Djidjelli to Port Talbot with iron ore, was torpedoed and sunk by a German submarine on October 24th, 1939, 80 miles W. of Gibraltar. Twenty of her crew were lost.

MENTANA

Scott Brothers; 1884; Palmers' Co.; 1,664 tons; 266-5x 36-3x16-8; 150 h.p.; compound engines. The British cargo ship *Men tana* sank after a collision with the German steamship *Fried. Krupp* off Ushant on May 15th, 1891, while on a voyage from the Tyne to Genoa carrying a cargo of coal.

MENTOR

G. C. Dracoulis; 1902; Ropner & Son; 3,050 tons; 325x 48-1x22-2; 273 n.h.p.; triple-expansion engines. The Greek steamship *Mentor* was torpedoed and sunk by a German submarine on March 7th, 1941, on a voyage from Cardiff to Peipel. Seven of her crew were lost.

MENZALEH

Khedivial Mat' Steamship Co.; 1888; Hall, Russell & Co.; 1,859 tons; 270-4x35-2x23; 202 n.h.p.; 9 knots; triple-expansion engines.

The steamship *Menzaleh* was torpedoed and sunk by a German submarine 230 miles E.S.E. of Malta on June 5th, 1918. Ten men were killed. The captain was taken prisoner.

MERAK

United States Shipping Board; 1910; Rotterdam Droogdok Maats.; 3,024 tons; 325-6x47x20-7; 249 n.h.p.; triple-expansion engines.

The American steamship *Merak* was sunk by a German submarine in the Western Atlantic on August 6th, 1918.

MERANO

Adriatica Soc. Anon. diNav.; 1909; Lloyd Austriaco; 3,705 tons; 346-7x45-5x25-9; 390 n.h.p.; triple-expansion engines. The Italian steamship *Merano* was shelled and sunk by British warships on October 15th, 1943, near Cattaro.

MERCATOR

Victor Ek; 1891; Irvine & Co.; 2,827 tons; 314-4x40-6x20-9; 250 n.h.p.; triple-expansion engines.

The Finnish steamship *Mercator* struck a mine and sank in the English Channel on October 13th, 1916.

MERCEDES

JR. O. Artinano; 1887; W. Gray & Co.; 2,164 tons; 282-3X 37-6x19-5; 217 n.h.p.; triple-expansion engines. The Spanish steamship *Mercedes* was torpedoed and sunk by a German submarine in the Bay of Biscay on October 4th, 1918.

MERCHANTMAN

Mahanjee Hurry Doss; 1852; Sunderland; 1,018 tons; 175X 34x22.

The Indian wooden sailing ship *Merchantman* was lost off the Sandheads at the mouth of the Hooghly on September 24th, 1885.

Sixty-nine of the passengers and crew were drowned, and only two were saved.

MERCHISTON

Walter Scott & Co.; 1901; W. Gray & Co.; 1,840 tons; 280X 40-2x18-3; 165 n.h.p.; triple-expansion engines. The British cargo ship *Merchiston* sank after a collision with the British steamship *Eda* off Spurn Head on April 1st, 1906. She was carrying a mineral cargo from Bilbao to Middlesbrough.

MERCIER

Cie. Maritime Beige (Lloyd Roval) Soc. Anon.; 1915; Bremer Vulkan; 7,886 tons; 476-2x60-7x32-9; 554 n.h.p.; triple-expansion engines.

The Belgian steamship *Mercier* was torpedoed and sunk by a German submarine on June 9th, 1941, 60 miles E. of Newfoundland on a voyage from Liverpool to Montreal. The captain and six of the crew were lost.

MERCURY

Caledonia Steam Packet Co.; 1934; Fair field Shipbuilding Co.; 621 tons; 223-8x30x9-5; 230 n.h.p.; 17-25 knots; triple-expansion engines.

The paddle steamer *Mercury* was taken over by the Admiralty during the Second World War for service as a minesweeper. On December 26th, 1940, she struck a mine and sank off the coast of S. Ireland.

MERCURY SUN

Motor Tankship Corp.; 1931; Sun S.B. & D.D. Co.; 8,893 tons; 480-5x66x36-8; 690 n.h.p.; 11 knots; oil engines. The

American motor tanker *Mercury Sun*, Capt. Willard Davis, was torpedoed and sunk by a German submarine in the Atlantic on May 18th, 1942. Six men were killed. Capt. Davis was among the survivors. The *Mercury Sun* was not in convoy.

MEREDDIO

E. Malmstrom; 1885; W. Gray & Co.; 1,372 tons; 245X35-3X 15-1; 136 n.h.p.; triple-expansion engines.

The Swedish steamship *Mereddio* was sunk by a German submarine in the North Sea on December 20th, 1916.

MEREDITH

United States Navy, destroyer; 1940; Boston Navy Yard; 1,630 tons; 348x35-3x10-1; 44,000 s.h.p.; 36-5 knots; turbine engines; Express boilers.

The destroyer *Meredith* was attacked by Japanese aircraft on October 15th, 1942, while engaged in patrolling duties off the Solomon Islands. She was hit by an aerial torpedo and sank shortly afterwards. For losses of U.S. destroyers on this patrol see U.S.S. *O'Brien*.

MEREDITH

United States Navy, destroyer; 1943; Bath Ironworks; 2,200 tons; 376-5x40-9x—; 60,000 s.h.p.; 35-5 knots; turbine engines; six 5 in. guns, twelve 40 mm.

The United States destroyer *Meredith* was one of the units supporting the landing of the 1st U.S. Army on the Normandy beaches on June 8th, 1944. The destroyer was patrolling some three miles off the St. Marcouf Islands when she was attacked by German bombers. A glide-bomb struck her near the water line and deprived her of engine power. She was taken in tow but broke in two and sank. Several of her complement were killed and wounded.

MEREL

General Steam Navigation Co.; 1925; Ayrshire Dockyard Co.; 1,088 tons; 245-8x36-1x12-5; 298 n.h.p.; 11 knots; triple-expansion engines.

The steamship *Merel*, Capt. Wastall, was mined and sunk off the Gull lightship on December 8th, 1939. Sixteen persons, including Capt. Wastall, were killed and two wounded.

MERENNETO

Koiviston Meriliike O/Y; 1883; J. C. Tecklenborg; 7,077 tons; 228-8x30-2x16-3; 105 n.h.p.; compound engines. The Finnish ship *Merenneito* collided on May 9th, 1935, with the Swedish steamship *Tyr* off Falsterbo and sank.

MERIDA

MERIDA

New York & Cuba Mail S.S. Co.; 1906; W. Cramp & Sons; 6,207 tons; 400 x 50 x 30; 749 n.h.p.; triple-expansion engines. The American cargo ship *Merida* sank after a collision with the American steamship *Admiral Farragut* on May 12th, 1911, off Virginia Capes. She had gold and silver on board. Salvage operations were undertaken in July, 1933. She was on a voyage from Vera Cruz to New York.

MERIDA

C. T. Bowing & Co.; 1918; Armstrong, Whitworth & Co.; 5,951 tons; 420-4x55-3x28-7; turbine engines. The British cargo ship *Merida* was wrecked off Le Touquet on December 29th, 1918. She was carrying a cargo of wheat on a voyage from Baltimore to Havre and Dunkirk.

MERIDIAN

Hall & Co.; 1852; Sunderland; 579 tons. The sailing ship *Meridian*, Capt. Hernaman, sailed from London on June 4th, 1853, for Australia with 84 passengers, of whom 41 were children, and a crew of 24.

On the night of August 24th, in a heavy gale, the *Meridian* struck the rocks at the S.W. end of Amsterdam Island. Her hatchways were open at the time and the ship was flooded. The captain and two seamen were washed overboard and drowned, and shortly afterwards the ship broke in two. At daylight the survivors saw that the mainmast had fallen across the ship to the rocks, and by means of this the first officer transferred the shipwrecked people safely ashore. At the end of four days of squally weather a sail was sighted which proved to be the American whaler *Monmouth*. As the seas forbade the close approach of this vessel a further five days had to be spent on the island, until, having traversed it to find a more sheltered spot, the survivors were able to board the *Monmouth's* boats.

MERIDIAN

U.S. Maritime Commission; 1920; Northumberland S.B. Co.; 5,592 tons; 413-5x53x32-8; 517n.h.p.; triple-expansion engines.

The *Meridian*, sailing under the Panamanian flag, left Sydney, N.S., on November 4th, 1941, for Hvalfjord and Archangel, in convoy. She could not be found when stragglers from the convoy were rounded up on the 10th and was not seen again.

MERISAAR

A/S Merilaid & Co.; 1900; Stabilitimento Tecnico; 2,136 tons; 290 x 42 -1 x 19 - 5; 200 n.h.p.; triple-expansion engines. The Estonian steamship *Merisaar* was bombed and sunk by German aircraft on July 15th, 1940, off Queenstown on a voyage from New Orleans to the Clyde. The crew were known to have got away in the boats but were never seen again.

MERIWETHER LEWIS

United States Maritime Commission; 1942; Oregon S.B. Corp.; 7,176 tons; 422-8x57x34-8; 339 n.h.p.; triple-expansion engines.

The American steamship *Meriwether Lewis* was torpedoed and sunk by a German submarine on March 2nd, 1943, on a voyage from New York to Loch Ewe. Six of her crew were killed.

MERKSWORTH

C. Parbury; 1874; J. Fullerton & Co.; 270 tons; 144-9x22-2x11-6; 40r.h.p.; compound engines.

The Australian steamship *Merksworth* foundered in a violent gale when in Stockton Bight, Newcastle, N.S.W., on May 7th, 1898. Nine of the crew were drowned.

MERKUR

J. Rang; 1913; A. Vuijk & Zonen; 1,291 tons; 235x35-6x15-4; 147 n.h.p.; triple-expansion engines.

The Estonian steamship *Merkur* was torpedoed and sunk by a German submarine on July 30th, 1940, on a voyage from Lisbon to Garston.

MEROPE

N.V. Koninklijke Nederlandsche Stoomboot Maats.; 1918; C. Van der Giessen & Zonen's Scheepsbouw; 1,162 tons; 256-2 x 36-7x13-6; 138 n.h.p.; triple-expansion engines. The Dutch steamship *Merope* was sunk by mine or torpedo on April 27th, 1943, off Cape Bengut, Algeria. Ten of the crew were killed.

MEROPI

A. Pappas; 1911; J. Readhead & Sons; 4,181 tons; 363 X 51 • 1 x 26 • 1; 382 n.h.p.; triple-expansion engines. The Greek steamship *Meropi* was torpedoed and sunk by a German submarine on February 15th, 1942, on a voyage from the Tyne to Halifax. Twenty-six lives were lost.

MERRIMACK

Merchant & Miners Transportation Co.; 1920; McDougall Duluth Co.; 2,606 tons; 251x43-6x26-2; 386 n.h.p.; triple-expansion engines.

The American steamship *Merrimack* was torpedoed and sunk by a German submarine on June 10th, 1942, S.W. of Cazumel Island, Mexico, while in service as a transport.

MERSEY

Rogers & Bright; 1882; Allsup & Sons; 319 tons; 141x20 -7'x11-6; 70h.p.; compound engines.

The small coasting steamship *Mersey* was carrying a cargo of rails from Burryport to Liverpool when she collided with the Irish packet *Lestris*, 1,065 tons, in the river Mersey on May 23rd, 1891. Both vessels sank with the loss of six lives in all. Divers found that the bow of the *Mersey* had been completely torn off by the collision.

MERSEY

London Midland & Scottish Railway; 1906; Swan Hunter & Wigham Richardson; 1,037 tons; 255x36-1x16-4; 342n.h.p.; 14 knots; triple-expansion engines.

The steamship *Mersey*, Capt. W. Rocket, struck a mine and sank in the Downs, near Midbrake Buoy, on April 20th, 1940. Capt. Rocket and 13 men were killed.

MERTAINEN

Trafik-A/B Grangesberg-Oxelosund; 1907; W. Hamilton & Co.; 4,531 tons; 376-2x52-2x17-4; 366 n.h.p.; triple-expansion engines.

The Swedish steamship *Mertainen* was bombed and sunk by German aircraft on April 16th, 1940, off Trondheim, during the invasion of Norway.

MERTONHALL

Hall Line; 1889; Palmers'Co.; 4,327 tons; 400-5x47-2x27-9; 435 n.h.p.; 11 knots; triple-expansion engines.

The steamship *Merton Hall* was torpedoed and sunk by a German submarine 30 miles N. by E. of Ushant on February 11th, 1918. Fifty-seven men, including the captain, were killed.

MERULA

N.V. Petroleum Maats. "La Corona"; 1932; Nederlandsche Scheepsbouw. Maats.; 8,228 tons; 451-2x62x34-2; 714 n.h.p.; oil engines.

The Dutch tanker *Merula* was bombed by Japanese aircraft on February 13th, 1942, in the Banka Strait, Sumatra, while in convoy from Palembang to Batavia. She was taken in tow by the Norwegian motorship *Herborg* but sank soon afterwards. All her crew of 38 and four of the twelve passengers were lost.

MERVILLE

Yorkshire Coal & S.S. Co.; 1903; Dundee Shipbuilders' Co.; 1,035 tons; 220 X 34 -1 x 12 - 5; 161 n.h.p.; triple-expansion engines.

The British cargo ship *Merville* foundered off Steenbakh on March 15th, 1923, while on a voyage from Goole to Ghent carrying a cargo of coal. Twelve of her crew were drowned. Two survivors were picked up by the Norwegian steamship *FrithjofEide*.

MERVINIAN

Owen & Watkin Williams & Co.; 1891; *W. Gray & Co.*; 1,969 tons; 276'3x36x14-1; 212 n.h.p.; triple-expansion engines. The British cargo ship *Mervinian*, on a voyage from Swansea to Marseilles with coal, ran into a gale in the Bay of Biscay on October, 3rd, 1907. The cargo shifted, bursting open the hatches, and the ship was laid over on her beam ends. She filled rapidly and sank.

MERVYN

Martyn, Martyn & Co.; 1908; *W. Pickersgill & Sons*; 2,118 tons; 286x43-3x18-6; 233 n.h.p.; triple-expansion engines. The British cargo ship *Mervyn* sank after a collision 15 miles S.S.E. of Penzance on February 20th, 1917. She was on a voyage from Port Talbot to Bordeaux carrying a cargo of coal.

MERVYN

Martyn, Martyn & Co.; 1924; *R. Thompson & Sons*; 3,402 tons; 337-4x48x22-5; 322 n.h.p.; triple-expansion engines. The British cargo ship *Mervyn* sank after a collision with the *Langleeford* on November 1st, 1939. She was ten miles S.E. of the Smalls Light, off the S.W. coast of Wales, carrying a cargo of coal from Barry to Lisbon.

MESABA

Atlantic Transport Co.; 1898; *Harland & Wolff*; 6,833 tons; 482-1x52-2x31-6; 772 n.h.p.; 13-5 knots; triple-expansion engines.

The steamship *Mesaba* was torpedoed and sunk by a German submarine 21 miles E. of Tuskar Rock on September 1st, 1918. Twenty persons, including the captain, were killed.

MESNA

W. Wilhelmsen; 1917; *J. L. Thompson & Sons*; 5,424 tons; 385X53•7X31•6; 497 n.h.p.; triple-expansion engines. The Norwegian ship *Mesna* went ashore on September 4th, 1924, on the Hakaufisi Reef, near Nukualofa 20° 9' S., 174° 55' W. She had a cargo of zinc ore and copra.

MESOPOTAMIA

Lynch Bros.; 1871; *Henderson & Co.*; 1,217 tons; 230-6X30-1x23-3; 160 h.p.; compound-inverted engines. The steamship *Mesopotamia* was wrecked off Peniche, Portugal, on December 18th, 1878. Eight of the crew were drowned.

MESSICANO

A. D'Esposito & G. Longobardo; 1918; *Osaka Iron Works*; 4,343 tons; 345x49-8x28-2; 390 n.h.p.; triple-expansion engines.

The Italian steamship *Messicano* left Aguilas on November 17th, 1928, for Rotterdam with an ore cargo. She was in wireless communication on November 23rd, but that was the last heard of her.

MESSUDIEH

Turkish Navy, battleship; 1874, reconstructed 1902; *Ansaldo*; 10,000 tons; 331x59x27; 11,000 i.h.p.; 16 knots; triple-expansion engines; Niclausse boilers; two 9-2 in. guns, twelve 6 in., fourteen 12 pdr., ten 6 pdr.

On the entry of Turkey into the First World War in 1914 her fleet found security behind a minefield laid across the Narrows of the Dardanelles. This form of defence consisted of five lines of mines which, while the fortifications on either shore remained intact, was impenetrable to hostile warships. In December, 1914, the Allied naval command decided to put these defences to the test and a British submarine, the J5-7, Lt. N. D. Holbrook, was chosen to make the attempt. The ship was fitted with specially devised guards for the task and on December 13th she ran down the straits and successfully negotiated the mine barrier, surfacing on the far side without attracting the attention of the enemy.

The first vessel sighted by Lt. Holbrook was the battleship *Messudieh*, which was lying in the roadstead of Nagara, acting as guardship over the minefield. Approaching to within 800 yards, still unobserved, Lt. Holbrook discharged a torpedo and struck the battleship a mortal blow. She remained afloat for about ten minutes, after which she turned over and sank in shoal water.

The loss of life amounted to ten officers and 27 ratings, the survivors numbering 49 officers and 587 ratings. Many of the latter

were imprisoned in the ship when she sank, but were rescued later by divers who cut holes in her hull. The *Messudieh's* guns were salvaged and mounted on the fortifications along the straits.

Lt. Holbrook was awarded the Victoria Cross for having torpedoed the *Messudieh* and navigated his submarine back to safety despite a defective compass.

META

AIBTrampart(K.Hanseri); 1887; *E. Withy & Co.*; 1,699 tons; 264-7x36x17-5; 193 n.h.p.; triple-expansion engines. The Finnish ship *Meta* went ashore on February 21st, 1935, one mile S.W. of Russaro outside Hango. She broke in two and the afterpart sank.

METEOR

Det Bergenske D/S; 1904; *Blohm & Voss*; 3,718 tons; 346-2 x 44-2x26-4; 235 n.h.p.; triple-expansion engines. The Norwegian steamship *Meteor* was bombed and sunk by Russian aircraft on March 9th, 1945, at Pillau, while being used as a hospital ship by the Germans.

METIS

Maclay & McIntyre; 1897; *C. S. Swan & Hunter*; 3,359 tons; 330x45-2x18-2; 296 n.h.p.; triple-expansion engines. The British cargo ship *Metis* was wrecked off Japarica Point, 20 miles east of Salinas, Brazil, on October 20th, 1912. She was carrying coal and a general cargo from Cardiff to Para.

METON

Paco Tankers Inc.; 1920; *Moore S.B. Co.*; 7,027 tons; 425-8 x 57x33-1; 352 n.h.p.; triple-expansion engines. The American tanker *Meton* was torpedoed and sunk by a German submarine on November 5th, 1942, soon after leaving Curapao for Guantanamo Bay, Cuba, with fuel oil.

MEUSE

Cie. de Navigation d'Orbigny; 1914; *Sunderland S.B. Co.*; 4,075 tons; 375 x 52x23-7; 371 n.h.p.; triple-expansion engines. The French steamship *Meuse* was torpedoed and sunk by a German submarine in the Atlantic on May 14th, 1917.

MEUSE

Arm. L. Hermans, S.A.; 1916; *A. van Duijvendijk*; 726 tons; 180-8x28-3x12-4; 83 n.h.p.; triple-expansion engines. The Belgian ship *Meuse* left the Tyne with a cargo of coal on January 15th, 1940, for Bruges. She was not seen again but a raft with four dead bodies was found.

MEUSE II

1916; *Chantiers de Normandie*; 5,270 tons; 385-5x51-1x32-2; 399 n.h.p.; triple-expansion engines. The French tanker *Meuse II* was torpedoed and sunk by a German submarine off Ushant on August 17th, 1917.

MEXICAN

Union-Castle Mail S.S. Co.; 1882; *J. Laing*; 4,661 tons; 378-2x47x29-3; 649 n.h.p.; 12 knots; triple-expansion engines. The steamship *Mexican*, under command of Capt. Copp, left Cape Town for Southampton on the morning of April 4th, 1900, carrying 104 passengers and the mail. She had not steamed many miles when she ran into dense fog and at 2 o'clock on the morning of the 5th, about 80 miles from Cape Town going dead slow, she collided with the steamship *Winkfield*, 4,116 tons. The *Mexican* began to sink slowly and as the *Winkfield* was little damaged it was decided to transfer the passengers and mail to her. Finally, the captain and crew, having given up hope of saving their ship, also embarked on the *Winkfield*. The *Mexican* sank about 12 hours after the collision.

MEXICANO

Phillips, Philipps & Co.; 1893; *J. Laing*; 1,973 tons; 270X 38-2x22-6; 203 n.h.p.; triple-expansion engines. The British tanker *Mexicano*, on a voyage from Philadelphia to Vera Cruz, ran into heavy weather on September 17th, 1903. One enormous wave broke over her, sweeping the decks bare, smashing engine room skylights and flooding the engine room. The tanker

MEXICO

foundered shortly afterwards. Seven of her crew of 22 were found clinging to wreckage by the British steamship *Roxby* and the Norwegian *Vidar*.

MEXICO

Elder, Dempster & Co.; 1890; *Harland & Wplff*; 5,755 tons; 345-6x40-9x26-7; 278 n.h.p.; triple-expansion engines. The British cargo ship *Mexico* was wrecked near Belle Isle Lighthouse on July 15th, 1895, while on a voyage from Montreal to Bristol carrying a general cargo.

MEXICO

Skibs ALS Mexico; 1920; *A/S Makskov Skibsvcerft*; 3,017 tons; 301x44-2x26-4; 452 n.h.p.; oilengines. The Norwegian tanker *Mexico* struck a mine and sank on March 6th, 1941, in the Thames estuary. Ten of her crew were lost.

MEXICO CITY

Mexico Steamship Co.; 1896; *Sunderland Shipbuilding Co.*; 5,078 tons; 400x47-6x20-2; 516 n.h.p.; 12knots; quadruple-expansion engines. The steamship *Mexico City* was torpedoed and sunk by a German submarine 15 miles W. by S. \ S. of South Stack, Holyhead, on February 5th, 1918. The captain and 28 men were killed.

MEXICOMARU

Osaka Shosen K.K.; 1910; *Mitsubishi Dockyard & Engineering Works*; 5,755 tons; 400X51x32-4; 578 n.h.p.; triple-expansion engines. The steamship *Mexico Maru* was torpedoed and sunk by the U.S. submarine *Jack* on August 29th, 1944, about 50 miles N. of Buol, Celebes.

MEXIQUE

Cie. Generate Transatlantique; 1915; *Chantiers & Ateliers de Provence*; 12,220 tons; 546-5x64-2x34-8; compound engines. The French steamship *Mexique* struck a mine and sank on June 19th, 1940, while entering Verdon Roads from Oran. There was no loss of life.

MIANTONOMOH

United States Navy, minelayer; 1938; *Pusey & Jones Co.*; 3,056 tons; 280-2x48-7x13-5; 5,000 s.h.p.; 17knots; turbine engines; four 5 in. guns. The minelayer *Miantonomoh* was formerly the merchant steamship *Quaker*. On September 25th, 1944, when operating off Le Havre she struck a mine and sank.

MIAOULIS

Hellenic Electrical Co.; 1893; *J. L. Thompson & Sons*; 2,918 tons; 312x41x20-8; 266 n.h.p.; triple-expansion engines. The Greek steamship *Miaoulis* was sunk by a submarine in the Mediterranean on February 24th, 1917.

MICHAEL

S. G. Embiricos; 1890; *J. L. Thompson & Sons*; 2,410 tons; 300-5x40-2x19-2; 222 n.h.p.; triple-expansion engines. The Greek steamship *Michael* was sunk by a submarine in the Mediterranean on November 25th, 1916.

MICHAEL

German Government; 1903; *J. Blumer & Co.*; 2,722 tons; 313-8x46-4x20-7; 257 n.h.p.; triple-expansion engines. The steamship *Michael* was formerly the Latvian *Kangars*, seized by the Germans. On April 1st, 1942, she was torpedoed and sunk by a British submarine eight miles from Kirkenes, Norway.

MICHAEL J. GOULANDRIS

Goulandris Bros.; 1921; *W. Doxford & Sons*; 6,669 tons; 420 x 54x34-3; 577 n.h.p.; triple-expansion engines. On a voyage from Newcastle, N.S.W., to Fremantle the Greek ship *Michael J. Goulandris* went ashore on December 21st, 1944, three miles S. of d'Entrecasteaux Point.

MICHAEL JEBSEN

Ministry of War Transport (D. Alexander & Sons); 1927; *Howaldtswerke*; 2,323 tons; 281-2x41-9x21-9; 180 n.h.p.; triple-expansion engines.

The British steamship *Michael Jepsen*, on a voyage from Trinidad to Halifax and England with 2,750 tons of sugar, was torpedoed and sunk by a German submarine on August 14th, 1942, W. of the Bahamas. Seven of her crew were killed.

MICHAIL ONTCHOUKOFF

Dansk-Russiske Dampskibsselskab; 1905; *Clyde S.B. & E. Co.*; 2,75 tons; 294-7x42x19-5; 225 n.h.p.; triple-expansion engines.

The Danish steamship *Michail Ontchoukoff* struck a mine and sank in the North Sea on December 17th, 1916.

MICHALIOS

Xilas Bros.; 1908; *Akt. Ges. Neptun*; 3,742 tons; 351-8x 50-2x15-4; 231 n.h.p ; triple-expansion engines. The Greek steamship *Michalios* was torpedoed and sunk by a German submarine on June 27th, 1943, of IFLattakia.

MICHEL

Worms & Cie.; 1881; *R. Thompson & Sons*; 1,773 tons; 260x 36-6x23-3; 170 n.h.p.; compound engines. The French steamship *Michel* struck a mine and sank in the Bay of Biscay on March 19th, 1917.

MICHEL

German Navy, auxiliary cruiser; 1940; *Stocznia Gdanska*; 4,140 tons; 455x55x —; 18knots; oilengines; six 5-9 in. guns, several smaller. 2 T.T., 2 aircraft, 1 m.t.b. The motorship *Bielsko* was under construction at Danzig for the Gdynia America Line, but was seized by the Germans and launched as *Bonn* at the end of 1939. In 1941 she was converted into an armed merchant cruiser by F. Schichau and renamed *Michel*.

She left Flushing on March 13th, 1942, on her maiden voyage under the command of Capt. H. von Ruckteschell, escorted by five torpedo boats and nine minesweepers. Capt. von Ruckteschell had been in command of the raider *Widder*, in which he had had a most successful cruise.

Shortly after leaving Flushing the convoy was attacked by a British force of five destroyers, six torpedo boats and three gunboats. The shooting in the darkness was not very accurate on either side and, although she was hit several times and eight of her crew killed, the *Michel* managed to reach Havre without further damage. She left again on the 20th and by April 19th had begun operations in the South Atlantic.

On March 2nd, 1943, the raider arrived at Kobe, Japan, having sunk 14 Allied merchantmen in her 12 months at sea. Later she went into dock at Mitsubishi, and during this period Capt. von Ruckteschell fell ill and the command was transferred to Capt. Gumprich. By May she was once more ready for sea and left Japan on the 21 st.

The raider had now entered the second phase of her cruise, which was neither so long nor so eventful as the first. Between May and October she sank a further three vessels, bringing her total to 17.

On the night of October 17th, when some 60 miles off Yokohama, and steaming in bright moonlight, she was sighted by the U.S. submarine *Tarpon*, Cdr. T. L. Wogan, who thought her to be a Japanese naval auxiliary. The submarine followed the raider unsuspected for over an hour and then discharged four torpedoes, two of which hit. The *Michel* stopped and listed to port, and after a time the American captain fired again, scoring two more hits. The last of these caused a tremendous explosion and sank the vessel. It was not known until some time afterwards that she was a German raider. On the night that she was blown up she was supposed to have had a Japanese naval escort, but it failed to appear.

During her cruise which lasted for a year and seven months, the *Michel* is known to have sunk the following vessels:—

<i>Patella</i>	7,468 tons	British	19.4.42
<i>Connecticut</i>	8,684 „	United States	21. 4.42
<i>Kattegat</i>	4,245 „	Norwegian	20. 5.42
<i>George Clymer</i>	7,176 „	United States	6. 6.42
<i>Lylepark</i>	5,200 „	British	12. 6.42

<i>Gloucester Castle</i>	8,006 tons	British	15. 7.42
<i>William F. Humphrey</i>	7,982	United States	16. 7.42
<i>Aramis</i>	7,984	Norwegian	17. 7.42
<i>Arabistan</i>	5,874	British	11. 8.42
<i>American Leader</i>	6,778	United States	8.42
<i>Empire Dawn</i>	7,241	British	11. 9.42
<i>Reynolds</i>	5,113	British	11.12.42
<i>Sawokla</i>	5,882	United States	11.12.42
<i>Eugenia Livanos</i>	4,816	Greek	11.12.42
<i>Empire March</i>	7,040	British	3. 1.43
<i>Hoegh Silver dawn</i>	7,715	Norwegian	14. 6.43
<i>India</i>	9,900	Norwegian	11. 9.43
According to a German source the ships, totalling 136,000 tons gross.			

MICHELET

G. Be lot; 1902; Ateliers & Chantiers de la Loire; 2,636 tons; 281-2x40-2x22-7.
The French sailing ship *Michelet* was sunk by a German submarine in the Atlantic on April 25th, 1918.

MICHELINA

Salv. Altieri; 1879; Bar tram, Haswell & Co.; 1,239 tons; 251X 34 -1 x 18 • 2; 167 n.h.p.; compound engines. The Italian ship *Michelina*, on a voyage from Augusta to Genoa with a cargo of salt, struck a rock and sank on February 23rd, 1928, off Augusta.

MICHI MARU

Tochiki Skoji K.K.; 1914; Tochigi Zosensho; 1,383 tons; 245x34x20-5; 151 n.h.p.; triple-expansion engines. The steamship *Michi (Miti) Maru* struck a mine and sank on July 9th, 1945, off Yawata, Japan.

MICHISHIO

Japanese Navy, destroyer; 1937; Fujinagata; 1,500 tons; 356x33-3x9; 39,000 s.h.p.; 34 knots; turbine engines; six 5 in. guns, 2 m.g., 8 T.T.
The destroyer *Michishio* was sunk in action with American destroyers on October 25th, 1944, during the battle of the Surigao Strait. She carried a complement of over 200.

For details of the Surigao Strait action, see the battleship *Yamashiro*. For Leyte Gulf action, see the battleship *Musashi*.

MICMAC

I. Carmichael & Co.; 1893; C. Connell & Co.; 2,502 tons; 300x40-5x22-6; 245 n.h.p.; triple-expansion engines. The British cargo ship *Micmac* was wrecked at Broad Cove, N.F.L., on August 14th, 1907. She was on a voyage from St. John, N.B. to the United Kingdom carrying a cargo of timber.

MIDORI MARU

Osaka Shosen K.K.; 1928; Mitsubishi ZosenKaisha; 1,724 tons; 243x38x19-5; 218 n.h.p.; oilengines.
The Japanese motorship *Midori Maru* with 169 passengers on board collided with the *Sensan Maru* at 1 a.m. on July 3rd, 1935 off Jizo-saki in a fog and sank in three minutes. Many lives were lost.

MIE MARU

Nippon Yusen K.K.; 1920; Toba Shipyard; 2,913 tons; 305 x 43-7x27-2; 352 n.h.p.; triple-expansion engines.
The steamship *Mie Maru* struck a mine and sank on July 24th, 1943, in McCluer Gulf, Netherlands New Guinea.

MIFUKU MARU

Tsurumaru Hiroto; 1918; Matsuo Magohashi; 1,211 tons; 200 X 33x20; 88 n.h.p.; triple-expansion engines. The steamship *Mifuku (Mihuku) Maru*, struck a mine and sank on June 27th, 1945, off Nanao, Japan.

MIGET

Cia. de Nav. Las Cruces S.A.; 1920; McDougall Duluth Co.; 2,606 tons; 251 x43-7x25-8; triple-expansion engines. The Panamanian ship *Miget* went ashore two miles S. of Ocracoke Inlet, Cape Hatteras, during a storm on February 3rd, 1952, and broke in two. She was on a voyage from Baltimore to Recife with a cargo of wheat.

MIGNONETTE

British Navy, sloop; 1916; Dunlop & Bremner; 1,250 tons; 267 '7x33'5x11-7; 2,400 i.h.p.; 17 knots; triple-expansion engines; two 4-7 in. guns, two 3 pdr. The sloop *Mignonette* was mined and sunk off the S.W. coast of Ireland on March 17th, 1917. Her official complement was 93.

MIGUEL DE LARRINAGA

Larrinaga & Co.; 1901; Russell & Co.; 4,089 tons; 369 -5X50-1x25-2; 378 n.h.p.; triple-expansion engines. The British cargo ship *Miguel de Larrinaga* foundered 400 miles off Cape Race on February 5th, 1918. She had sailed from New York.

MIHO MARU

Nippon Yusen K.K.; 4,667 tons. The steamship *Miho Maru* was torpedoed and sunk by the U.S. submarine *Trepang* on April 30th, 1945, about 150 miles S.W. of Mokpo, Korea.

MIIKE MARU

Nippon Yusen K.K.; 11,739 tons.
The steamship *Miike Maru* was torpedoed and sunk by the U.S. submarine *Trigger* on April 27th, 1944. NE. of Palau Islands, Caroline Islands.

MIIKESAN MARU

Sugaya Kisen K.K.; 1916; Osaka Iron Works; 3,179 tons; 305 x 43 - 7 x 27 - 2; 288 n.h.p.; triple-expansion engines. The steamship *Miikesan Maru* was bombed and sunk by U.S. land-based aircraft on August 14th, 1944, about 50 miles S.W. of Formosa.

MIKAGE MARU

Muko Kisen K.K.; 1897; Russell & Co.; 2,761 tons; 315-6X 40- 1x14-6; 291 n.h.p.; triple-expansion engines.
The steamship *Mikage Maru* was torpedoed and sunk by the U.S. submarine *Croaker* on October 24th, 1944, off Cheju Do, Korea.

MIKAGE MARU No. 5

Muko Kisen K.K.; 1904; W. Gray & Co.; 3,532 tons; 340 x 49-1x22-8; 335 n.h.p.; triple-expansion engines.
The Japanese ship *Mikage Maru No. 5* went ashore on February 1st, 1941, off Kyogasaki, Kyoto Prefecture, and sank.

MIKAGE MARU No. 11

Muko Kisen K.K.; 1911; W. Doxford & Sons; 3,394 tons; 334-5x48-5x23-3; 310 n.h.p.; triple-expansion engines. The *Mikage Maru No. 11* went ashore on August 8th, 1932, at Saghalien and broke in two.

MIKAGE MARU No. 18

Muko Kisen K.K.; 1937; Mitsubishi Jukogyo K.K.; 4,319 tons; 360 X 50x29; 383 n.h.p.; turbine engines.
The steamship *Mikage Maru No. 18* was torpedoed and sunk by the U.S. submarine *Silversides* on May 10th, 1944, N. of the Caroline Islands.

MIKAGE MARU No. 20

Bukoh Kisen K.K.; 2,718 tons.
The steamship *Mikage Maru No. 20* was torpedoed and sunk by the U.S. submarine *Porpoise* on August 31st, 1943, S.W. of Wake Island.

MIKASA

Japanese Navy, 1st class battleship; 1902; Vickers; 15,200 tons; 400x76x27-2; 15,000 i.h.p.; 18-6 knots; triple-expansion engines; Belleville boilers; four 12 in. guns, fourteen 6 in., twenty 12 pdr., eight 3 pdr., four 2 pdr., 4 T. T.
The battleship *Mikasa*, flagship of Admiral Togo, was lying at the naval base of Sasebo after the conclusion of the Russo-Japanese war when, just before midnight on September 10th, 1905, fire broke out amidships and all efforts to extinguish it failed. Less than one hour later the after magazine exploded. A huge rent, 80 feet long was torn in the port side below the waterline and running aft, besides which there were nine other holes of lesser dimensions blown through the hull. The ship sank immediately in shallow water.

MIKASA MARU

The loss of life was very heavy, 256 being killed and 343 wounded. The ship's official complement was 935, but it is probable that there were fewer than this number on board at the time. Boats from the battleships *Asahi* and *Shikishima*, together with others from smaller units, were quickly on the scene. Unfortunately the promptitude of these parties involved them in the same danger as that of the *Mikasa's* crew, and many of them were killed by the explosion.

An Inquiry was held by the Japanese Admiralty but it was found impossible to account for the outbreak of fire. The explosion of the magazine was found to be due to the deterioration of the gunpowder.

The *Mikasa* was raised and towed into dock about 12 months later, where she was repaired.

MIKASA MARU

Toa Kaiun K.K.; 1928; *Yokohama Dock Co.*; 3,143 tons; 325x46x27; 284n.h.p.; triple-expansion engines. The steamship *Mikasa Mam* was sunk by U.S. carrier-based aircraft on November 11th, 1944, off the west coast of Cebu Island, Philippines.

MIKATSUKI

Japanese Navy, destroyer; 1926; *Sasebo*; 1,315 tons; 320x30x9-9; 38,500 s.h.p.; 34 knots; turbine engines; *Kanpon boilers*; four 4 - 7 in. guns, 2 A.A.m.g., 6 T.T. The destroyers *Ariake* and *Mikatsuki* were off Cape Gloucester, New Britain, on July 28th, 1943, when they were attacked and sunk by U.S. army bombers. The destroyers' normal complements were 180 and 150 respectively.

MIKAZUNI MARU

Japanese Government; 1890; *Nederlandsche Stoomboot Maats.*; 1,412 tons; 235 x32-8x16-4; 203 nhp.; triple-expansion engines. The steamship *Mikazuni Maru* was formerly the Chinese *Tin Seng*, seized by the Japanese. She struck a mine and sank on May 17th, 1945, in the Grand Canal, China.

MIKELIS

E. M. Michalitsianos; 1885; *E. Withy & Co.*; 2,430 tons; 302-1x38-1x20-2; 225 n.h.p.; triple-expansion engines. The Greek steamship *Mikelis* was torpedoed and sunk by a German submarine in the Irish Channel on July 24th, 1917.

MIKUMA

Japanese Navy, heavy cruiser; 1934; *Mitsubishi*; 14,000 tons; 639-7x59-7x14-7; 90,000 s.h.p.; 33 knots; turbine engines; *Kanpon boilers*; eight 8 in. guns, eight 5 in., 6 m.g., 12 T.T. 4 aircraft.

The cruiser *Mikuma* was attacked by American aircraft at about 9.30 a.m. on June 6th, 1942, during the battle of Midway Island, and was sunk just after noon.

The cruiser carried a complement of more than 900.

The full story of the battle of Midway Island is told under the U.S.S. *Yorktown*.

MILAN

French Navy, destroyer; 1931; *Lorient Dockyard*; 2,441 tons; 423-2X40X16; 68,000 s.h.p.; 37 knots; turbine engines; five 5 - 5 in. guns, four 37 mm., 6 T. T.

The destroyer *Milan*, Capt. Costet, was stationed at Casablanca and participated in the defence of that port when the American forces made their landing on November 8th, 1942. The *Milan* led a sortie of six destroyers from the port about 8.20 a.m. against American landing craft W. of Cape Fedhala. She came under fire of the U.S. destroyers *Wilkes* and *Ludlow* and was set on fire. She turned about for the harbour and was run ashore just outside. Her casualties were heavy, two officers and 40 ratings being killed and a large number wounded, out of a complement of 240.

The full story of the action is told under the cruiser *Primauguet* which was sunk on the same occasion.

MILAN MARU

Ishihara Sangyo Kaiun Kaisha; 1920; *Asano S.B. Co.*; 5,467 tons; 400x53-2x29-4; 513 n.h.p.; triple-expansion engines. The steamship *Milan Maru* was bombed and sunk by U.S. land-based aircraft on September 6th, 1943, off Rangoon.

MILANO

Tirrenia Soc. Anon. di Nav.; 1913; *Cantieri Navali Riuniti*; 4,028 tons; 361-6x44-7x24-4; 454 n.h.p.; triple-expansion engines.

The Italian steamship *Milano* was bombed and sunk by Allied aircraft on January 14th, 1944, near Sibenik.

MILAZZO

Navigazione Generate Italiana; 1916; *Soc. Fiat San Giorgio*; 11,477 tons; 517-4x65-6x29-4; 458 n.h.p.; quadruple-expansion engines.

The Italian steamship *Milazzo* was torpedoed and sunk by a submarine in the Mediterranean on August 29th, 1917.

MILBANKE

R.M.Hudson; 1868; *Sunderland*; 1,296 tons; 243-3x31-1x17-6; 150 h.p.; steam engines.

The steamship *Milbanke* inward bound with a cargo of zinc from Carthage was sunk in a collision with the steamship *Hankow* on July 28th, 1874. The collision took place off Dungeness at about 1.30 a.m., the *Milbanke* sinking with 14 of her crew.

MILCREST

Crest Shipping Co.; 1919; *Swan, Hunter & Wigham Richardson*; 5,283 tons; 400-1x52-4x28-4; 517n.h.p.; triple-expansion engines.

The British cargo ship *Milcrest* sank on October 7th, 1942, after a collision with the *Empire Lightning* in lat. 43° 53' N., long. 62° 25' W. She was on a voyage in ballast from Hull to New York and Hampton Roads.

MILDURA

Australasian United S.N. Co.; 1901; *J. Reid & Co.*; 2,217 tons; 300-4x42-1x13-8; 253 n.h.p.; triple-expansion engines. The Australian steamship *Mildura* was wrecked on March 12th, 1907, at North-West Cape, W. Australia. She was on a voyage from Wyndham to Fremantle with a cargo of bullocks.

MILE END

Commercial Gas Co.; 1911; *W. Dobson & Co.*; 859 tons; 165-6x38x14-5; 165 n.h.p.; triple-expansion engines. The British collier *Mile End* sank after a collision with the armed trawler *Faraday* in the North Sea on January 19th, 1940. She was on a voyage in ballast from London to Sunderland. Five of her crew were lost.

MILL HILL

Mill Hill S.S. Co.; 1930; *W. Doxford & Sons*; 4,318 tons; 370-4x52-9x24-9; 368 n.h.p.; triple-expansion engines. The British steamship *Mill Hill*, on a voyage from Boston to the Tees with steel scrap, was torpedoed and sunk by a German submarine on August 30th, 1940, about 300 miles W. of the Orkney Islands. All her crew of 34 and the gunner were lost.

MILLET

Barzilay & Benjamin; 1883; *A. McMillan & Son*; 1,728 tons; 259-8x36-7x15-5; 229 n.h.p.; compound engines. The Turkish ship *Millet* sank on January 2nd, 1939, at Bender Ereğli during a gale. It was afterwards stated that she had collided with the *Nicolaos Nomicos*. Eighteen of the crew were drowned and only two were saved. The gale was one of the worst ever experienced in these waters. Thirteen large ships were driven ashore and scores of small craft sunk.

MILLINOCKET

A. H. Bull S.S. Co.; 1910; *Maryland Steel Co.*; 3,274 tons; 317-3x44-2x23-8; 1,500 i.h.p.; 10 knots; triple-expansion engines.

The American steamship *Millinocket*, Capt. L. W. Callis, was torpedoed and sunk by a German submarine 14 miles from Cuba on June 17th, 1942. Nine men, including Capt. Callis, were killed. The vessel was not in convoy.

MILLISLE

John Kelly; 1911; *R. Williamson & Son*; 617 tons; 170 X 27 - 1X11 • 1; 110 n.h.p.; triple-expansion engines. The British steamship *Millisle* was bombed and sunk by German aircraft on March 21st, 1941, in the Bristol Channel. Nine of her crew and the gunner were killed. Three survivors were picked up.

MIL0

Letricheux & David; 1903; *Campbeltown S.B. Co.*; 1,475 tons; 240'5x32-8x16-9; 207 n.h.p.; triple-expansion engines. The British steamship *Milo* sank after a collision ten miles south of St. Alban's Head on May 22nd, 1917, while employed as an Admiralty collier. She was on a voyage in ballast from Rouen to Cardiff.

MIL0S

Red. A/B Helsingborg (O. Hillerstroni); 1898; *Blyth S.B. Co.*; 5,055 tons; 325-1x47x22-4; 280 n.h.p.; triple-expansion engines. The Swedish ship *Milos* left New York on February 23rd, 1943, for Grimsby, but was not seen again.

MIL0S

Deutsche Levante-Linie Hamburg A.G.; 1907; *Flensburger Schiffsbau Ges.*; 2,702 tons; 290-3x44x23-8; 192 n.h.p.; triple-expansion engines. The German steamship *Milos* struck a mine and sank on October 20th, 1944, off Lister, Norway.

MILTON

Lamport & Holt; 1888; *D. & W. Render son & Co.*; 2,679 tons; 310x39-2x23-8; 252 n.h.p.; triple-expansion engines. The British cargo ship *Milton* was wrecked near Cape Espichel, Portugal, on June 15th, 1911, while on a voyage from London to Santos carrying a general cargo.

MILWAUKEE

United States Navy, 1st class cruiser; 1904; *Union Ironworks*; 9,100 tons; 426-5x66x23-25; 21,000 i.h.p.; 21-5 knots; triple-expansion engines; *Babcock boilers*; fourteen 6 in. guns, eighteen 14 pdr., four 3 pdr. The cruiser *Milwaukee* was engaged in salvage operations in connection with the U.S. submarine *H-3* wrecked near Eureka, California. The ships were enveloped in thick fog when the *Milwaukee* ran ashore on January 13th, 1917. She was so battered by the heavy seas that all hope of saving her had to be abandoned and she became a total wreck. There was no loss of life. The *Milwaukee* carried a complement of 727 officers and men.

MILWAUKEE

Grand Trunk-Milwaukee Car Ferry Co.; 1902; *American S.B. Co.*; 2,933 tons; 338 x 56x19-5; 461 n.h.p.; triple-expansion engines. The American car ferry *Milwaukee*, in service between Milwaukee and Grand Haven, foundered on October 22nd, 1929. All of the 52 persons on board were lost.

MIM

Skibs-A/S Skytier en; 1938; *Flensburger Schiffsbau Ges.*; 4,996 tons; 414-3x55-7x25; 973 n.h.p.; oil engines. The Norwegian motor vessel *Mim* drove ashore in heavy weather on November 1st, 1939, and broke up on Reef Dyke, North Ronaldshay.

MIMI HORN

H. C. Horn; 1944; 3,944 tons. The German ship *Mimi Horn* was bombed and sunk by British aircraft on January 14th, 1945 at Gotenhafen.

MIMIS

Maison Stringo S.A.; 1888; *J. Readhead & Co.*; 276 tons; 133x22-6x12-9; 101 n.h.p.; triple-expansion engines. The Greek tug and salvage vessel *Mimis* struck a mine and sank at Saronikos on March 28th, 1941. Twenty-four persons were lost.

MIMOSA

French Navy, corvette; 1941; *British Isles*; 925 tons; 193x 32x16; 2,800 i.h.p.; 15-5 knots; triple-expansion engines; cylindrical boilers; one 4 in.A.A. gun, two 57 mm.A.A., one 40 mm.A.A., two 20 mm. The corvette *Mimosa* of the Free French Navy was operating in the North Atlantic when she was torpedoed and sunk by a German submarine on June 9th, 1942. The vessel's normal complement was 85.

MINA

l. Michelmann & J. Adamson & Co.; 1899; *W. Dobson & Co.*; 1,173 tons; 212-3x35x14-1; 148 n.h.p.; triple-expansion engines. The Esthonian ship *Mina*, Capt. Boris Leppik, left London on December 12th, 1939, for Hull and Gothenburg. The pilot left the ship at 8 a.m. on December 13th, and that was the last seen of her. Some wreckage was washed ashore but none of the crew of 17 was found.

MINAMI MARU

Japanese Government; 1910; *Burmeister & Wain*; 2,398 tons; 281X 41 - 3 x 23 - 1; 214 n.h.p.; triple-expansion engines. The steamship *MinamiMaru* was formerly the Panamanian *Capella*, seized by the Japanese. She was torpedoed and sunk by the U.S. submarine *Flying Fish* on April 1st, 1944, 230 miles east of Naha, Okinawa, Ryukyu Islands.

MINAS

Soc. Anon. A. ParodifuB.; 1891; *G. Ansaldo & Co.*; 2,854 tons; 331 '4x40-1x18-5; 248 n.h.p.; triple-expansion engines. The Italian steamship *Minas* was torpedoed and sunk by a submarine in the Mediterranean on February 15th, 1917.

MINAS

D. Diacakis; 1892; *Naval Construction & Armaments Co.*; 2,506 tons; 284-2x40-3x22-7; 178 n.h.p.; triple-expansion engines. The Greek steamship *Minas* was torpedoed and sunk by a submarine in the Mediterranean on December 2nd, 1917.

MINAS QUEEN

Minas Queen Shipping Co.; 1916; *W. R. & C. A. Huntley*; 492 tons; 170x35-4x12-9. The three-masted schooner *Minas Queen* was shelled and sunk by a German submarine 350 miles N.W. of Cape Finisterre on August 26th, 1917. The captain and five men were killed.

MINATITLAN

Soc. Cooperativa di Nav. Garibaldi; 1941; 7,599 tons; oil engines. The motor tanker *Minatitlan*, built in Italy for Mexican owners, was taken over on completion by the Italians. On November 9th, 1941, she was shelled and sunk by British warships about 120 miles S.E. of Punta Stilo.

MINAZUKI

Japanese Navy, destroyer; 1926; *Uraga Dockyard*; 1,315 tons; 320x30x9-9; 38,500 s.h.p.; 34 knots; turbine engines; *Kanpon boilers*; four 4• 7 in. guns, 2 A.A.m.g.* 6 T.T. The destroyer *Minazuki* was torpedoed and sunk S. of Sibutu Passage, Philippine Islands, by the U.S. submarine *Harder* on June 6th, 1944. The destroyer's normal complement was 150.

MINDANAO

Cia. Maritima; 1918; *J. Brown & Co.*; 5,236 tons; 400-7X 52-3x28-5; 489 n.h.p.; triple-expansion engines. The Philippine tanker *Mindanao* was bombed and sunk by Japanese aircraft on February 10th, 1942, off the north-west of Mindoro Island.

MINDANAO

United States Navy, gunboat; 1927; *Kiangnan Dock Co.*; 560 tons; 210-7x31x7; 3,150 h.p.; 16 knots; triple-expansion engines; *Thornycroft boilers*; two 3 in.A.A. guns, 10 m.g. The gunboat *Mindanao* was bombed and sunk by Japanese aircraft

MINDINI

at Corregidor on May 5th, 1942. The vessel was one of the few ships of the U.S. Navy left in the Philippines after the Japanese invasion. She carried a complement of about 100.

MINDINI

Burns, Philp & Co.; 1905; Blyth S.B. Co.; 2,065 tons; 280X 39-5x18-3; 212 n.h.p.; triple-expansion engines. The British cargo ship *Mindini* was wrecked on Mellish Reef on March 8th, 1923, while on a voyage from the Solomon Islands to Brisbane carrying a cargo of copra.

MINEGUMO

Japanese Navy, destroyer; 1937; Fujinagata; 1,500 tons; 356x33-3x9; 39,000 s.h.p.; 34 knots; turbine engines; Kanpon boilers; six 5 in. guns, 2 m.g., 8 T.T.

The destroyers *Minegumo* and *Murasame* formed part of a light force which attacked a squadron of U.S. cruisers and destroyers bombarding Vila and Munda in the Central Solomons on the night of March 5th-6th, 1943. The fight was short and sharp and resulted in the two destroyers being sunk by the gunfire of the American squadron. The Japanese were compelled to break off the action. No American ship was lost.

The two Japanese destroyers carried complements of about 200 apiece.

MINEKAZE

Japanese Navy, destroyer; 1919; Maizuru; 1,215 tons; 336-5X 29-2x9-5; 38,500 s.h.p.; 34 knots; turbine engines; Kanpon boilers; four 4-7 in. guns, 2 A.A.m.g., 6 T.T. The destroyer *Minekaze* was torpedoed and sunk in the Formosa Strait by the U.S. submarine *Fogy* on February 10th, 1944. The destroyer's normal complement was 148.

MINERVA

O. Fostenes; 1905; J. Priestman & Co.; 3,736 tons; 346-5X 50-8x24-7'; 320 n.h.p.; triple-expansion engines. The Norwegian steamship *Minerva* was torpedoed and sunk by a German submarine in the North Sea on May 22nd, 1915.

MINERVA

Soc. Anon. Sbarchi, Imbarchi e Trasporti; 1918; Cantieri Navali Riuniti; 1,905 tons; 266-8x38-3x23-6; 89 n.h.p.; triple-expansion engines.

The Italian steamship *Minerva* was torpedoed and sunk by British aircraft on December 3rd, 1942, S.E. of the Kerkenna Islands, Tunisia.

MING CHIANG

Ming Sung Industry Co.; 1925; China; 329 tons; oilengines. Trading between Ichang and Chungking in the Yangtze River the Chinese motorship *Ming Chiang* struck some rocks and sank on May 13th, 1936, at Shuangyutzu near Wanh sien. Over 40 lives were lost.

MINISTER TAK VAN POORTVLIET

Stoomv. Maats. Friesland; 1899; Earle's Co.; 1,106 tons; 240 X 33 x 15 • 1; 189 n.h.p.; triple-expansion engines. The Dutch steamship *Minister Tak van Poortvliet* was sunk by a German submarine in the North Sea on April 24th, 1917.

MINISTRE DE SMET DE NAEYER

Cie. Roy ale Belgo-Argentine; 1907; Akt. Gesellschaft Neptun; 2,712 tons; 291-5x44x16-9; 216 n.h.p.; triple-expansion engines.

The Belgian steamship *Ministre de Smet de Naeyer* struck a mine and sank in the North Sea on April 6th, 1918.

MINMI

J. & A. Brown & Abermain Seaham Collieries; 1927; D. & W. Henderson & Co.; 1,508 tons; 250x37-1x15-3; 241 n.h.p.; triple-expansion engines.

The Australian cargo ship *Minmi* was wrecked at Cape Banks, N.S.W., on May 13th, 1937, while on a voyage in ballast from Melbourne to Newcastle, N.S.W.

MINNEAPOLIS

Atlantic Transport Co.; 1900; Harland & Wolff; 13,543 tons; 600'7x65-5x39⁷/₈; 1,227n.h.p.; 16knots; quadruple-expansion engines.

The liner *Minneapolis*, Capt. Marker, serving as a transport in the First World War, was torpedoed by a German submarine 195 miles E. £ N. of Malta on March 23rd, 1916. She remained afloat for some hours and an attempt was made to tow her to Malta, but had to be abandoned.

Of the 189 persons on board 12 lost their lives. The remainder were landed safely at Malta.

MINNEHAHA

R. Hughes; 1857; New Brunswick; 845 tons; 158x33-7x22-4. The British sailing ship *Minnehaha* was bound from Falmouth to Dublin with a cargo of guano. She carried a crew of 20. In dense fog on the night of January 18th, 1874, she ran on the rocks at the foot of Peninnis Head, St. Mary's, Scilly Isles. The watch on deck saved themselves by taking refuge in the rigging, and when daylight came they managed to get ashore by jumping from the jib-boom on to the rocks below. The captain, pilot and eight men were drowned.

MINNEHAHA

Atlantic Transport Line; 1900; Harland & Wolff; 13,714 tons; 600-7x65-5x39-5; 1,227n.h.p.; 16knots; quadruple-expansion engines.

The liner *Minnehaha* was torpedoed and sunk by a German submarine 12 miles S.E. of Fastnet on September 7th, 1917. Forty-three persons were killed. The captain was among the survivors.

MINNETONKA

Atlantic Transport Line; 1902; Harland & Wolff; 13,528 tons; 600-7x65-5x39-7; 1,227n.h.p.; 16knots; quadruple-expansion engines.

The liner *Minnetonka*, serving as an auxiliary transport, was torpedoed and sunk by the submarine *U-64*, Lt. Cdr. Robert W. Morant, on January 31st, 1918, 40 miles E.N.E. of Malta. She was not carrying troops.

MINO MARU

Nippon Yusen K.K.; 4,667 tons.

The steamship *Mino Maru* was bombed and sunk by U.S. land-based aircraft on December 11th, 1944, off the west coast of Leyte Island, Philippines.

MINORCA

Leith, Hull & Hamburg Steam Packet Co.; 1892; Ramage & Ferguson; 1,145 tons; 225x33-2x14-5; 136 n.h.p.; 9 knots; triple-expansion engines.

The steamship *Minorca* was torpedoed and sunk by a German submarine three miles off Cape de las Huertas on December 11th, 1917. The captain and 14 men were killed.

MINORCA

CurrieLine; 1921; Ouse Shipbuilding Co.; 1,123 tons; 220X 35-1x 13-8; 160 n.h.p.; 9 knots; triple-expansion engines. The steamship *Minorca*, Capt. J. R. Mouat, on a voyage from London to Grangemouth with cement, was torpedoed and sunk by a German motor torpedo boat on February 26th, 1941, off Shering-ham Shoal. Capt. Mouat, 16 of the crew and two passengers were lost.

MINOS

Dampfs. Ges. Neptun; 1939; Schiffbau Ges. Unterweser; 1,127 tons; 234-9x34-7x13-4; 147n.h.p.; oilengines. The German motorship *Minos* was torpedoed and sunk by a Russian submarine on October 6th, 1944, near Memel.

MINOTAUR

United States Maritime Commission; 1918; New York S.B. Corp.; 4,553 tons; 362-3x51-2x32-2; 301 n.h.p.; triple-expansion engines.

The American steamship *Minotaur* was torpedoed and sunk by a German submarine on January 9th, 1943, off Paramaribo on a voyage from New York to Rio de Janeiro. Six of her crew were killed.

MINRYO MARU

Tatunami Shosen K.K.; 1938; *Kawaminami Kogyo K.K.*; 2J93 tons; 257 - 1 x 40 - 4 x 23 - 0; 294 n.h.p.; triple-expansion engines. The steamship *Minryo Mam* was torpedoed and sunk by the U.S. submarine *Flasher* on February 14th, 1944, W. of Mindoro, Philippines.

MINSK

Det Forenede D/S; 1911; *Burmeister & Wain*; 1,229 tons; 252 x 4 x 37 - 2 x 15 - 1; triple-expansion engines. The Danish steamship *Minsk* was torpedoed and sunk by a German submarine on March 19th, 1940, near the Pentland Firth on a voyage from Kirkwall to Esbjerg. Eleven of her crew of 20 were lost.

MINSTER

Southern Railway Co.; 1924; *D. & W. Render son & Co.*; 707 tons; 220 - 4 x 33 - 6 x 14 - 1; 165 n.h.p.; 15 knots; triple-expansion engines.

The steamship *Minster* was taken over by the Admiralty during the Second World War for service as a mercantile auxiliary. She was mined and sunk in Seine Bay, Normandy, on June 8th, 1944, during the "D-Day" invasion.

MINSTREL

Emigrant ship; 1830 (circa); 300 tons. The sailing vessel *Minstrel* left Limerick for Quebec on April 21st, 1841. She was under command of Capt. Outerbridge and carried 156 persons, of whom 15 were crew, the passengers being nearly all Irish emigrants. On May 18th, when approaching her destination, the *Minstrel* encountered very heavy weather and was driven on to the Red Island Reef. The boats were launched and over 100 passengers were embarked in the boats. While the boats were still alongside and attached to the ship by their painters she suddenly foundered. There was no time to cut the painters and the boats with their unfortunate occupants were drawn under with the ship. Only one boat containing four seamen and four passengers was able to get away as the rope attaching her to the stern of the ship broke with the strain.

The number of persons who lost their lives was 148, including Capt. Outerbridge.

MIOCENE

Lotco Shipping Co.; 1911; *American S.B. Co.*; 2J53 tons; 250 X 43 - 1 X 20 - 7; 759 n.h.p.; triple-expansion engines. During the Spanish Civil War, at 11.0 a.m. on January 24th, 1939, the British steamship *Miocene* was bombed and set on fire by Insurgent aircraft off Barcelona. She sank later.

MIRA

Sac. Gen. de Transports Maritimes; 1895; *J. Readhead & Sons*; 3,050 tons; 315'2x41-2x16-7; 285 n.h.p.; triple-expansion engines.

The French steamship *Mira* was sunk by a submarine in the Mediterranean on May 15th, 1916.

MIRA

Det Bergenske D/S; 1891; *A. & J. Inglis*; 1,152 tons; 221-7X 30 - 1 X 15 - 1; 188 n.h.p.; triple-expansion engines.

The Norwegian steamship *Mira* was sunk by gunfire during a naval raid on the Lofoten Islands on March 4th, 1941.

MIRAFLORES

Standard Fruit & S.S. Co.; 1921; *Swan, Hunter & Wigham Richardson*; 2,755 tons; 270-7x39x14-7; 305 n.h.p.; triple-expansion engines.

The British cargo ship *Miraflores* sailed from Port de Paix, Haiti, on February 14th, 1942, on a voyage to New York, but was lost without trace. She carried a crew of 34.

MIRAMAR

Raeburn & Verel; 1880; *Murdoch & Murray*; 1,190 tons; 230-2x31-2x20-8; 125h.p.; compound inverted engines. The British cargo ship *Miramar* foundered near Wenchow on September 23rd, 1884, while on a voyage from Nagasaki to Hong Kong carrying a cargo of coal. The only survivors were two Chinese who managed to swim to land.

MIRAMAR

Socd. Nac. Buques y Maderas; 1899; *J. Readhead & Sons*; 3,566 tons; 341 x 46-7x26; 293 n.h.p.; triple-expansion engines. The Chilean cargo ship *Miramar* was wrecked during a gale on June 9th, 1926, at Valparaiso.

MIRANDA

C. T. Bowring & Co.; 1884; *Wigham Richardson & Co.*; 1,158 tons; 220 x 31 - 2 x 16; 180 h.p.; compound engines. The British steamship *Miranda* left New York on July 7th, 1894, for an Arctic cruise. On the way she sustained minor damage after touching an iceberg but was able to continue the voyage. Later in the month she ran aground on the coast of Greenland and sprang a leak. The passengers remained on board for some days and were then taken to Sydney, C.B., on another ship. Temporary repairs were effected to the *Miranda* and she was taken in tow for New York but foundered on August 9th.

MIRANDA

M. Johannesens Red.-A/S; 1921; *Huiskens & van Dijk*; 1,328 tons; 237x37-2x16; 127n.h.p.; triple-expansion engines. The Norwegian steamship *Miranda* was sunk by a mine or torpedo on January 20th, 1940, about 30 miles N.W. of Peterhead, with the loss of 14 lives.

MIRANDA

Wallem & Co.; 1920; *Submarine Boat Corp.*; 3,476 tons; 324 x 46 - 2 x 25; turbine engines. The Panamanian ship *Miranda* was on a voyage from Keelung to Saga, near Moji with a cargo of copper ore. When 45 miles E.N.E. of Keelung on March 19th, 1950, the cargo shifted and the *Miranda* capsized and sank.

MINI MARU

Mitsubishi Risen K.K.; 10,564 tons. The tanker *Mimi Maru* was sunk by U.S. carrier-based aircraft on January 15th, 1945, off Tainan, Formosa.

MIRIAM

A/S Det Selmerske Rederi; 1904; *Caledon S.B. & E. Co.*; 3,496 tons; 330 x 48x23-5; 273 n.h.p.; triple-expansion engines. The Norwegian ship *Miriam* was wrecked on September 23rd, 1923, at Seal Island, N.S., while on a voyage from Portland, Me., to Notre Dame Bay.

MIRLO

W. E. Moss & Co.; 1917; *Sir J. Laing & Sons*; 6,978 tons; 425x57x33-1; 559 n.h.p.; 12 knots; triple-expansion engines. The tanker *Mirlo* was torpedoed and sunk by a German submarine half a mile S. by E. of Wimble Shoal Buoy, Cape Hatteras, on August 16th, 1918. Nine men were killed. The captain was among the survivors.

MISAKIMARU

Matsuoka Kisen K.K.; 1907; *W. Hamilton & Co.*; 4,422 tons; 376'3x52-3x17-4; 366n.h.p.; triple-expansion engines. The steamship *Misaki Maru* was torpedoed and sunk by the U.S. submarine *Barbel* on November 14th, 1944, about 150 miles E. of Quanghai, Indo-China.

MISAKI MARU No. 5

Matsuura Shizuo; 1891; *Edward's S.B. Co.*; 3,247 tons; 333x40-4x19-1; 268n.h.p.; triple-expansion engines. The *Misaki Maru No. 5* was wrecked on August 17th, 1928, near Pinnacle Island, S.W. Korea, while on a voyage from Dairen to Kobe.

MISHIMA MARU

Hinode Kisen K.K.; 1940; *Tsurumi Seitetsu Zosen K.K.*; 1,934 tons; 271-6x40x20-3; 214n.h.p.; triple-expansion engines. The steamship *Mishima (Misimd) Maru* struck a mine and sank on May 13th, 1945, off Kobe.

MISSANABIE

MISSANABIE

Canadian Pacific Railway Ocean Lines; 1914; Barclay Curie & Co.; 12,469 tons; 500-6x64-2x38; 1,492n.h.p.; 16 knots; quadruple-expansion engines.

The liner *Missanabie* was torpedoed and sunk by a German submarine 52 miles S. by E.-^E. of Daunt's Rock, Co. Cork, on September 9th, 1918. Forty-five persons were killed. The captain was among the survivors.

MISSIR

Khedivial Mail S.S. & Graving Dock Co.; 1864; Barclay Curie & Co.; 786 tons; 226-5x28x15-6; 135 n.h.p.; 9 knots; compound engines.

The steamship *Missir* was torpedoed and sunk by a German submarine 80 miles W. by N. of Alexandria on May 29th, 1918. Thirty-four persons were killed. The captain was among the survivors.

MISSISSINEWA

U.S. Navy; 1944; 11,300 tons.

The naval tanker *Mississinewa* was torpedoed and sunk by a Japanese submarine on November 19th, 1944, in the Central Pacific. About 25 of her crew were lost.

MISSOURI

United States Navy, frigate; 1841; New York Navy Yard; 1,692 tons; 229x40x23-5; 458 n.h.p.; 10 knots; side-lever engines; 28ft. paddles; two 10 in. guns, eight 8 in. The paddle frigate *Missouri*, with her sister ship the *Mississippi*, was the newest and finest vessel in the U.S. Navy. She was barque rigged and carried 19,000 sq. ft. of canvas.

On the night of August 26th, 1843, when lying in Gibraltar Bay, a large jar of turpentine was broken in the store room and caught fire. This ignited the other stores and the fire spread with great rapidity. The officers and crew fought the flames to the last moment, many barely escaping with their lives. The *Missouri* burned to the water's edge and sank. There was no loss of life.

The burned-out hull of the frigate lay at the bottom of Gibraltar Bay for some time, but the American Congress eventually voted 60,000 dollars for the purpose of raising and removing it.

MISSOURI

G. Warren & Co.; 1881; C. Connell & Co.; 5,146 tons; 425-6X 43-6x27-9; 600 h.p.; compound inverted engines. The British cargo ship *Missouri* was wrecked in Caernarvon Bay on March 1st, 1886, while on a voyage from Boston to Liverpool carrying a general cargo.

MISSOURI BELLE

Mississippi River Steamboat.

The Mississippi river steamboat *Missouri Belle* was sunk in a collision with another steamboat on the night of October 24th, 1834. The collision took place on the lower Mississippi, the *Missouri Belle* sinking with the loss of 30 lives.

MISSOURIAN

American-Hawaiian S.S. Co.; 1903; Maryland Steel Co.; 7,924 tons; 491-5x58-2x24-4; 936n.h.p.; triple-expansion engines.

The American steamship *Missourian* was sunk by a submarine in the Mediterranean on April 4th, 1917.

MISTRAL

T.&A. W. Wilhelms; 1889; Ropner & Son; 2,219 tons; 272-3x 38-8x18-6; 212n.h.p.; triple-expansion engines. The Norwegian ship *Mistral* struck on the Tekselsen Rock, north of Marstenen Light, on January 11th, 1927, while on a voyage from Sunderland to Bergen.

MISTRESS OF THE SEAS

Canadian; 1863; Miramichi, N.B.; 1,241 tons; 190x38x24. The Canadian wooden sailing ship *Mistress of the Seas* was on a voyage from Greenpck to Calcutta in 1870, when she foundered in the Indian Ocean with the loss of ten of her crew.

MISURATA

Sicilia Soc. di Navigazione; 1888; Blohm & Voss; 2,691 tons; 337'9x40-2x22-2; 274n.h.p.; triple-expansion engines. The Italian steamship *Misurata* was torpedoed and sunk by a German submarine in the Atlantic on May 3rd, 1917.

MITAKESAN MARU

Kaburagi Risen K.K.; 1937; Harima S.B. & Eng. Co.; 4,441 tons; 363-6x50x29; 467n.h.p.; turbine engines. The steamship *Mitakesan Mam* was torpedoed and sunk by the U.S. submarine *Sandlance* on May 11th, 1944, off Tenian Island, Ladrone Islands.

MITO MARU

Nippon Yusen K.K.; 1921; Yokohama Dock Co.; 7,061 tons; 445 x 58x34; 632 n.h.p.; triple-expansion engines. The steamship *Mito Maru* was torpedoed and sunk by the U.S. submarine *Paddle* on April 16th, 1944, 20 miles S. of the Obi Islands.

MITSU MARU

Taihei Risen K.K.; 1919; Lithgoffs; 5,682 tons; 400-3x52-2x 28'4; 517 n.h.p.; triple-expansion engines. The steamship *Mitsu (Mitu) Maru* struck a mine and sank on July 12th, 1945, off Susami, Japan.

MIYADONO MARU

Tatsuuma Risen K.K.; 1918; Craig, Taylor & Co.; 5,196 tons; 400'1x52-3x28-5; 517n.h.p.; triple-expansion engines. The steamship *Miyadono Maru* was torpedoed and sunk by the U.S. submarine *Grouper* on June 19th, 1943, about 200 miles N. of Manus Island, Admiralty Islands.

MIYAJIMA MARU

Tochigi Kisen K.K.; 2,000 tons.

The steamship *Miyajima Maru* struck a mine and sank on May 14th, 1945, off Kobe.

MIYAKO

Japanese Navy, despatch vessel; 1897; Kure Dockyard; 1,772 tons; 314-7x36x13-2; 6,000 i.h.p.; 20knots; triple-expansion engines; two 4•7 in. guns, six 3pdr., four 2pdr., 2 T.T. The despatch vessel *Miyako* was blown up by a floating mine while bombarding the forts at Port Arthur, during the Russo-Japanese War. The operations commenced on May 12th, 1904, when the *Miyako*, in company with the cruisers *Itsukushima* and *Nisshin*, opened fire on the forts. Four flotillas of torpedo boats also swept the coast for mines, one vessel, torpedo boat No. 48, being mined and sunk in carrying out this task. The waters when cleared of mines were buoyed, and the Japanese squadron steamed in again on the 14th with the intention of repeating the bombardment. In the meantime the Russians had altered the position of the buoys, as a result of which the *Miyako* was destroyed early in the action.

The ship sank in 23 minutes, but the loss of life was not heavy. Two seamen were killed and 19 wounded out of a complement of 227.

MIYATAMA MARU

Tamai Shosen K.K.; 6859 tons.

The steamship *Miyatama Maru* was bombed and sunk by U.S. land-based aircraft on May 1st, 1945, off Mokpo, Korea.

MIYAURA MARU

Nippon Yusen K.K.; 1919; Mitsubishi Zosen Kaisha; 1,856 tons; 250 X 37 • 7 x 20 • 5; 188 n.h.p.; triple-expansion engines. The steamship *Miyaura Maru* was torpedoed and sunk by the U.S. submarine *Bluegill* on May 20th, 1944, north of Halmahera, Celebes.

MIYAZAKI MARU

Nippon Yusen Kabushiki Kaisha; 1909; Kawasaki Dockyard Co.; 7,892 tons; 465x56-2x31-5; 975n.h.p.; triple-expansion engines. The Japanese steamship *Miyazaki Maru* was torpedoed and sunk by a German submarine off Ushant on May 31st, 1917.

MIYAZAKIMARU

Nippon Seitetsu K.K.; 1940; *Mitsubishi Jukogyo K.K.*; 3,944 tons; 353-2x79-2x26-5; turbine engines. The steamship *Miyazaki Mam* was torpedoed and sunk by the U.S. submarine *Tautog* on May 8th, 1944, off Hakodate, Japan.

MIYUKI

Japanese Navy, destroyer; 1933; *Uruga Dock*; 1,700 tons; 371-5x33-7x9-7; 40,000 h.p.; 34 knots; turbine engines; *Kanponboilers*; six 5 in. guns, 4m.g.A.A., 9 T.T. The destroyer *Miyuki* was off the coast of Korea on July 3rd, 1934, when she collided with the destroyer *Inaduma* of the same class. The *Myuki* did not sink immediately and it was possible to transfer her crew save for six ratings who were lost. Four ratings were injured. The destroyer was taken in tow but sank on the way to Sasebo.

MIZPAH

W. Cawthorn; 1875; *Softley & Co.*; 380 tons; 156-8x22-5x12; 56 h.p.; compound inverted engines. The steamship *Mizpah* was sunk in a collision with an unknown vessel early on the morning of December 6th, 1877, 15 miles S.W. of Beachy Head. The *Mizpah* sank with upwards of six persons.

MIZUHO MARU

Osaka Shosen K.K.; 1912; *Russell & Co.*; 8,506 tons; 459-5x58-2x36-8; 1,134 n.h.p.; quadruple-expansion engines. The transport *Mizuho Maru* was torpedoed and sunk by the U.S. submarine *Redfish* on September 21st, 1944, off the north west coast of Luzon Island, Philippines.

MIZUKIMARU

Japanese Government; 6,440 tons. The steamship *Mizuki Maru* was sunk by U.S. carrier-based aircraft on October 12th, 1944, W. of Penghu Island, Pescadores.

MOA

New Zealand Navy, corvette; 1941; *Henry Robb*; 600 tons; 156 x 30 x 13; 14 knots; triple-expansion engines; one 4 in. gun, one 2 pdr., 4 m.g. The corvette *Moa* was one of the Allied units operating off Guadalcanal. On April 7th, 1943, she was in company with several U.S. vessels when the Japanese made a heavy air attack. The *Moa* was hit and sunk, together with the U.S. destroyer *Aaron Ward* and the U.S. fleet-tanker *Kanawha*.

For further details, see *Aaron Ward*.

MOANDA

Cie. Maritime Beige (Lloyd Royal) S.A.; 1937; *Soc. Anon. John Cockerill*; 4,621 tons; 387-6x54x24-7; 644n.h.p.; oilengines. The Belgian motor vessel *Moanda* was torpedoed, set on fire, and sunk by a German submarine on March 28th, 1943, E. of the Canary Islands on a voyage from Algiers to Takoradi. Twenty-eight of her crew were lost.

MOBILE

American; 1851; *United States*; 1,000 tons. The American sailing vessel *Mobile* left Liverpool on Tuesday, September 28th, 1852, for New Orleans under command of Capt. Furer. She had on board a crew of 23 and 60 passengers. On leaving port she had a fair wind but later ran into an E.N.E. gale and at 2.30 on Wednesday morning, the 29th, struck Blackwater Bank. Efforts were made to launch the boats but the heavy seas would not permit of this and during the night most of the passengers were washed overboard.

One passenger and eight seamen were saved and 71 were drowned. Evidence was given later that the captain went below at midnight leaving the second officer in charge with instructions to keep a W.S.W. course. The wind increased but the captain was not called until 2 a.m. when he discovered that the course set was W.N. W. and that the ship was in a dangerous position. Before anything could be done to repair the error the vessel struck the Blackwater Bank.

MOCHIZUKI

Japanese Navy, destroyer; 1927; *Uruga Dock*; 1,315 tons; 320x30x9-9; 38,500 s.h.p.; 34 knots; turbine engines; *Kanponboilers*; four 4-7 in. guns, 2 A.A.m.g.; 6 T.T. The destroyer *Mochizuki* was bombed and sunk by U.S. naval aircraft E. of New Britain, Solomons Group, on October 24th, 1943. Her normal complement was 150.

MOD

A/S Ivarans Rederi; 1921; *Fredrikstad Mek. Vterks*; 4,446 tons; 371-2x52-1x25-9; turbine engines.

The Norwegian ship *Mod* foundered in a heavy gale on January 22nd, 1922, over 1,000 miles E. of Halifax N.S., while on a voyage from New York to Antwerp. All her boats had been washed away but fortunately the steamships *Melmore Head* and *Montcalm* arrived in time to save 23 of the crew. The captain and eight others were drowned.

MODE

Stockholms Rederi A/B Svea; 1912; *Helsingors Jernskibs & Maskin.*; 1,227 tons; 246-9x37-1x14; 169 n.h.p.; triple-expansion engines.

The Swedish steamship *Mode* struck a mine and sank on July 20th, 1944, on a voyage from Skien to Halmstad.

MODEMI

I. A. Christensen; 1912; *Antwerp Eng. Co.*; 1,481 tons; 243X 38x15-8; 156 n.h.p.; triple-expansion engines. The Norwegian steamship *Modemi* was torpedoed and sunk by a German submarine in the North Sea on November 17th, 1917.

MODENA

James Currie & Co.; 1881; *R. Steele & Co.*; 1,211 tons; 248-5X33-2x17; 120 h.p.; compound-inverted engines. The British cargo ship *Modena* was wrecked on Tonsarne Rocks, Kattegat, Sweden, on March 29th, 1886. She was on a voyage from Bo'ness to Copenhagen carrying a cargo of coal.

MODERN GREECE

Pearson & Co.; 1859; *Richardson*; 753 tons; 210x29x17-2; 120 h.p.; compound engines. The British steamship *Modern Greece* was sunk by gunfire from Union warships in June, 1862, while engaged in blockade running during the American Civil War.

MODESTA

Ministry of War Transport (Euxine Shipping Co.); 1916; *J. Priestman & Co.*; 3,849 tons; 346-5x50-8x23-5; 319 n.h.p.; triple-expansion engines. The British steamship *Modesta* was torpedoed and sunk by a German submarine on April 25th, 1942, 120 miles N.E. of Bermuda on a voyage from Trinidad to New York. Eighteen of her crew and one gunner were lost.

MODIG

I. An. Christensens Rederi; 1913; *Nylands Vcerksted*; 1,704 tons; 264-9x40-2x18-6; 152 n.h.p.; triple-expansion engines. The Norwegian steamship *Modig* struck a mine and sank in the North Sea on December 21st, 1916.

MODIVA

I. A. Christensen; 1911; *Antwerp Eng. Co.*; 1,276 tons; 229-2X 35-5x14-8; 142 n.h.p.; triple-expansion engines. The Norwegian steamship *Modiva* struck a mine and sank in the North Sea on January 31st, 1917.

MODJOKERTO

Rotterdamsche Lloyd; 1922; *W. Gray & Co.*; 8,806 tons; 480-1x57-4x38-4; 1,835 n.h.p.; 15-5 knots; oilengines. The Dutch motorship *Modjokerto* was bound from Tjilatjap to Australia when she was intercepted by the Japanese heavy cruiser *Chikuma* and badly damaged by gunfire. The attack took place some 250 miles S.W. of Tjilatjap on March 1st, 1942. The steamship did not sink immediately, but was torpedoed later by the Japanese submarine /-55, going down with 42 of her crew.

MODUM

Finn Friis & C. O. Lund; 1892; Irvine & Co.; 2,937 tons; 314x40-6x20-9; 249 n.h.p.; triple-expansion engines. The Norwegian steamship *Modum* was sunk by a German submarine off Ushant on December 8th, 1916.

MOENA

Stoomv. Maats. Nederland; 1923; Sir J. Laing & Sons; 9,286 tons; 480-5x60-4x37-4; 1,053 n.h.p.; triple-expansion engines. The Dutch steamship *Moena* was torpedoed and sunk by a German submarine on August 24th, 1942, soon after leaving Trinidad for St. John, N.B., and the U.K.

MOERO

German Government; 1937; Flensburger Schiffsbau Ges.; 6,111 tons; 426-5x55-7x25; 972 n.h.p.; oilengines. The motor vessel *Moero* was formerly Belgian, seized by the Germans. She was bombed and sunk by Russian aircraft on September 22nd, 1944, at Riga.

MOGAMI

Japanese Navy, heavy cruiser; 1934; Kure Dockyard; 14,000 tons; 639-7x59-7x14-7; 90,000 s.h.p.; 33 knots; turbine engines; Kanpon boilers; eight 8 in. guns, eight 5 in.A.A., 6 m.g., 12 T.T., 4 aircraft.

The heavy cruiser *Mogami* was one of the ships engaged in the disastrous action in the Surigao Strait on the night of October 24th, 1944. The *Mogami* turned about to escape but sustained severe damage and was sighted at dawn on the 25th in a disabled condition in the Mindanao Sea. She was attacked and sunk by U.S. carrier-borne aircraft.

The full story of the Surigao Strait action is told under the battleship *Yamashiro*. The full story of the battle of Leyte Gulf, of which the above action formed part, is told under the battleship *Musashi*.

MOGAMIGAWA MARU

Toyo Kaiun K.K.; 1934; Mitsubishi Jukogyo K.K.; 7,497 tons; 436-3x58-5x32-8; 839 n.h.p.; oilengines. The aircraft transporter *Mogamigawa Maru* was torpedoed and sunk by the U.S. submarine *Pogy* on August 1st, 1943, N. of Dunkin Reef, Caroline Islands.

MOHAMED ALIEL-KEBIR

Pharaonic Mail Line; 1922; Scotfs S.B. & E. Co.; 7,527 tons; 422-8x56-2x30-4; 1,469 n.h.p.; turbine engines. The Egyptian steamship *Mohamed Ali El-Kebir*, on a voyage from Avonmouth to Gibraltar with troops and military stores, was torpedoed and sunk by a German submarine on August 7th, 1940, off the west coast of Ireland. Some 740 survivors were landed out of a total of 860 on board.

MOHAWK

United States Navy, revenue cutter; 1902; United States; 980 tons; 205x32x11; single screw; 2 guns. The United States revenue cutter *Mohawk* was lost by collision off New York on October 1st, 1917.

MOHAWK

Clyde S.S. Co. Inc.; 1908; W. Cramp & Sons S. & E.B. Co.; 4,623 tons; 367x48-3x20-4; 336 n.h.p.; triple-expansion engines. The American ship *Mohawk*, carrying passengers and general cargo from New York to Charleston, caught fire on January 2nd, 1925, and was beached at Delaware Breakwater.

MOHAWK

Agwilines Inc.; 1926; Newport News S.B. & D.D. Co.; 5,896 tons; 387-5x54-3x20; 4,200 i.h.p.; 15 knots; turbine engines. The liner *Mohawk* left New York on the afternoon of January 24th, 1935, in bitterly cold weather. She was commanded by Capt. Joseph E. Wood and carried 53 passengers, 110 crew and general cargo. At about 9.30 p.m. when four miles off Seagirt, New Jersey,

she collided with the Norwegian steamship *Talisman*, Capt. Wang. A hole was torn in the liner's side and it was at once apparent that she must sink. Great difficulty was experienced in getting out the boats as the boat davits were thick with ice.

Capt. Wood made an effort to beach his ship while she was still under steam but the engine room flooded and the attempt failed. Meanwhile the liner *Algonquin* of the same line and the *Limon* of the United Fruit Line had come on the scene. The former picked up four of the *Mohawk's* boats containing 97 persons and the latter picked up two others with very few survivors. The *Mohawk* developed a heavy list and sank in less than an hour. The number drowned was 45, of whom 15 were passengers.

MOHAWK

British Navy, destroyer; 1937; Thornycroft & Co.; 1,870 tons; 355-5x36-5x9; 44,000 s.h.p.; 36-5 knots; turbine engines; 3-dmm boilers; eight 4 - 7 in. guns, 7 smaller, 4 T. T. The destroyer *Mohawk*, Cdr. J. W. M. Eaton, was one of a half flotilla consisting of *Jervis*, leader, Capt. Mack, *Janus* and *Nubian*, cruising between Sicily and Tripoli on April 15th, 1941. The ships sighted an Italian convoy of five merchantmen escorted by three destroyers. In the ensuing action the whole of this force was sunk by the British with great loss of life to the Italians.

Mohawk was hit by a torpedo and sank later with the loss of two officers and 39 ratings killed and 23 ratings wounded.

See also Italian destroyer *Luca Tarigo*.

MOHEGAN

Atlantic Transport Co.; 1898; Earle's Co.; 6,889 tons; 482-4X 52-1x31-3; 894 n.h.p.; 13 knots; triple-expansion engines. The liner *Mohegan* left London for New York on October 13th, 1898, with 149 persons on board, of whom 53 were passengers. She was commanded by Capt. Griffiths, commodore of the line. On the afternoon of the 14th she was reported off Rame Head, and by 7 o'clock the same evening her lights were observed by watchers at Porthoustock, near Falmouth. She was steaming at between 12 and 13 knots and was well off her proper course. The only indication of her presence was her masthead and cabin lights and she was so close inshore as to make any warning unavailing. Shortly after being sighted she passed to shoreward of the Manacles Bell Buoy and struck on the Maen Voces Rock, in the Varsis Ledge.

The *Mohegan* struck the rocks head on and the impact was so violent that the electric lights failed immediately. The oil lamps were in the lamp locker in the fore part of the ship and it was impossible to reach them, consequently there was no light of any sort available. Rockets were sent up in response to which the Porthoustock lifeboat put out, followed later by those from Cadgwith, Falmouth and Polperro. Meanwhile the liner was rocking to and fro on the ledge, making the task of getting away her boats a most difficult one, despite which two cleared the side though only partly full.

In the black darkness of the winter's night without the guidance of lights from the stricken ship the lifeboats searched around in a vain endeavour to find the wreck. At last they came upon the drifting boats whose occupants told them that the *Mohegan* had foundered in 15 minutes.

The ship sank by the bow in 11 fathoms with a list to port, only her masts and funnel showing above water. Unfortunately the side canted to port held the rocket apparatus and many of the rockets plunged into the sea instead of soaring upwards. A number of people managed to climb the rigging, among them Quartermaster Juddery who swam to a lifeboat, obtained a line and swam back to the masts, thus enabling 16 people to be hauled through the sea to safety. On shore the rocket apparatus came into action but failed to reach the wreck which lay too far out.

The number drowned was 106, including Capt. Griffiths and all his officers.

MOHICAN

Clyde S.S. Co. Inc.; 1904; W. Cramp & Sons S. & E.B. Co.; 2,255 tons; 237-9x40'1x19-5; 97 n.h.p.; triple-expansion engines. The American ship *Mohican* caught fire on May 10th, 1925, on a voyage from Jacksonville to Miami and sank off Cape Canaveral.

MOIDART

J. Cor mack & Co.; 1878; *E. Withy & Co.*; 1,303 tons; 243-7 X 32x16-8; 156 n.h.p.; 8-5 knots; compound engines. The steamship *Moidart* was torpedoed and sunk by a German submarine seven miles S.E. of E. of Lyme Regis on June 9th, 1918. Eleven of the crew were lost and there were only five survivors.

MOJI MARU

Nippon Yusen K.K.; 3,831 tons. The steamship *Moji Mam* was sunk by U.S. carrier-based aircraft on June 12th, 1944, about 150 miles W. of the Ladrone Islands.

MOKO MARU

Dairen Risen K.K.; 1922; *Osaka Iron Works*; 7,144 tons; 415 x 55 - 5 x 34 • 6; 552 n.h.p.; triple-expansion engines. The *Moko Mam* was carrying ore from Dungun to Moji on October 15th, 1936, when she was reported to be in distress and leaking badly. She foundered off Piedra Point.

MOLDANGER

Westfal-Larsen & Co. A/S; 1933; *Nederlandsche Scheepsbouw Maats.*; 6,827 tons; 464-1x61-2x27-4; 1,842 n.h.p.; oil engines. The Norwegian motorship *Moldanger* was torpedoed and sunk by a German submarine on July 23rd, 1942, about 300 miles S.E. of Philadelphia. Fourteen of her crew were lost.

MOLDAVA

Mercantile S.S. Co.; 1890; *C. S. Swan & Hunter*; 2,292 tons; 280x 37-5x19-3; 219 n.h.p.; triple-expansion engines. The British cargo ship *Moldava* sank after striking an iceberg in approximately 47° N., 49° W., in August, 1896. She was on a voyage from Cardiff to Halifax, N.S., carrying a cargo of coal.

MOLDAVIA

Peninsular & Oriental Steam Navigation Co.; 1903; *J. Caird & Co.*; 9,500 tons; 520-6x58-3x24-8; 12,000 i.h.p.; 18-5 knots; triple-expansion engines.

The liner *Moldavia*, serving as an auxiliary cruiser, was carrying a number of U.S. soldiers when she was torpedoed by a German submarine on May 23rd, 1918, in the English Channel. She continued under her own steam for 15 minutes, but at the end of that time it was realised that she was gradually sinking. Troops and crew were safely transferred to the escorting destroyers, but 56 American soldiers who were on a lower deck lost their lives by reason of the explosion and the sudden inrush of water.

MOLESEY

Britain S.S. Co.; 1899; *Ropner & Son*; 3,809 tons; 347-8X 49-5x25-5; 340 n.h.p.; 9•5 knots; triple-expansion engines. The steamship *Molesey* left Manchester on November 24th, 1929, for Cardiff. She was under command of Capt. G E. Huntley and carried a crew of 33, in addition to whom were the wife of the first officer and another woman passenger. Shortly after leaving port the steamship ran into a 70 miles per hour gale which battered her severely and when off St. David's Head her propeller was broken and she became helpless. The only possible refuge was Jack's Sound, a very dangerous passage, in which the *Molesey* dropped anchor and burned flares and discharged rockets. Later she dragged both anchors and went ashore at Skomer Island, 20 miles from Milford Haven, on the night of the 25th.

The Angle motor lifeboat put out and cruised about all night but the seas prevented any attempt to approach the wreck. At about 8 o'clock on the morning of the 26th the lifeboat by very fine seamanship ran under the stern of the *Molesey* and took off all the survivors.

The number drowned was seven, including the wife of the first officer.

MOLIERE

Delmasfreres; 1882; *Palmers'Co.*; 1,545 tons; 265-2x35-5x 16-8; 180 n.h.p.; compound engines. The French steamship *Moltere* was torpedoed and sunk by a German submarine in the Bristol Channel on May 27th, 1918,

MOLINA

J. Ringens RederiAkties.; 1905; *Nylands Vcerksted*; 1,122 tons; 229 x 36 x 16-9; 109 n.h.p.; triple-expansion engines. The Norwegian steamship *Molina* was torpedoed and sunk by a German submarine in the English Channel on January 22nd, 1918.

MOLLY PITCHER

U.S. War Shipping Administration; 1943; *Bethlehem Fair field Shipyard*; 7,200 tons; 423-1x57-1x34-8; 339 n.h.p.; triple-expansion engines.

The American steamship *Molly Pitcher* was torpedoed and sunk by a German submarine on March 17th, 1943, on a voyage from New York to Casablanca.

MOMBASSA

Maclay & McIntyre; 1899; *Russell & Co.*; 3,877 tons; 344-6X 49-9x17-9; 345 n.h.p.; triple-expansion engines. The British cargo ship *Mombassa* caught fire and sank 57 miles north of Madras on December 23rd, 1902. She was on a voyage from Calcutta to New York carrying a cargo which included jute.

MOMI

Japanese Navy, destroyer; 1922; *Japan*; 820 tons; 275 X 26-5x8-5; 21,500 s.h.p.; 31-5 knots; turbine engines; Kanpon boilers; three 4 - 7 in. guns, 2 m.g., 4 T.T.

The Japanese destroyer *Momi* was sunk by U.S. naval aircraft S.W. of Manila on January 5th, 1945. The vessel carried a complement of about 130.

MOMO

Japanese Navy, destroyer; 1916; *Sasebo*; 755 tons; 275 x 25x7-7; 16,000h.p.; 31-5 knots; turbine engines; Kanpon boilers; three 4 • 7 in. guns, 3 m.g., 6 T.T.

The destroyer *Momo* was torpedoed and sunk by the U.S. submarine *Hawkbill*, W. of Luzon, on December 15th, 1944. The vessel carried a complement of about 120.

MOMOGAWA MARU

Kawasaki Kisen K.K.; 3,829 tons. The steamship *Momogawa Mam* was sunk by U.S. carrier-based aircraft on February 17th, 1944, in the Caroline Islands.

MOMOHA MARU

Tatsuuma Kisen K.K.; 1918; *Craig, Taylor & Co.*; 3,103 tons; 331 - 1x46-8x23-2; 359 n.h.p.; triple-expansion engines. The steamship *Momoha Maru* was torpedoed and sunk by the U.S. submarine *Trigger* on March 15th, 1943, W. of the Admiralty Islands.

MOMOYAMA MARU

Yamashita Kisen K.K.; 1918; *Workman, Clark & Co.*; 5,217 tons; 400-4x52-3x28-4; 518n.h.p.; triple-expansion engines. The steamship *Momoyama Maru* was bombed and sunk by U.S. land-based aircraft on March 13th, 1943, about 100 miles N. of Wewak, New Guinea.

MONAGHAN

United States Navy, destroyer; 1935; *Boston Navy Yard*; 1,395 tons; 341-2x34-2x8-9; 42,800s.h.p.; 36-5 knots; turbine engines; *Yarrow boilers*; four 5 in. guns, several smaller, 8 T. T. The destroyers *Monaghan*, *Hull* and *Spence* were returning from patrol with their fuel tanks almost empty when they were overwhelmed by a typhoon E. of Samar on December 17th, 1944. The *Monaghan*, after fighting the storm from dawn, foundered at about 12.30 p.m. with all but six of her complement of 162. The full story of the disaster is told under the destroyer *Hull*

MONARCH

C. J. Svendsen; 1878; *Wigham Richardson & Co.*; 1,318 tons; 250-8x33-2x18-5; 143n.h.p.; compound engines. The Norwegian steamship *Monarch* struck a mine and sank in the North Sea on May 23rd, 1917.

MONARCH OF THE SEAS

Sailing Ship. The emigrant ship *Monarch of the Seas* left Liverpool on March 19th, 1866, with 738 persons, passengers and crew, on board. On

MONARK

May 2nd a letter enclosed in a bottle was washed ashore. It stated that the vessel had been dismasted in a gale on April 3rd, and that those on board were short of provisions and were without fresh water. The letter was signed by William Johnstone, and the writing was identified later by Mrs. Johnstone as being that of her son. This was the last heard of the *Monarch of the Seas*.

MONARK

Rederi A/B Monark; 1938; AjB Lindholmens Varv; 1,786 tons; 296-1x43-2x16; 217n.h.p.; compound engines. The Swedish steamship *Monark* was seized by the Germans at Bergen during the invasion of Norway. She was torpedoed and sunk by a British submarine on May 3rd, 1940, about 25 miles from Stavanger with a German prize crew on board.

MONA'S QUEEN

Isle of Man Steam Packet Co.; 1934; Cammell Laird; 2,800 tons; 336x48x26; 21 knots; turbine engines. The *Mona's Queen*, Cdr. J. C. K. Dowding, struck a mine and sank on May 29th, 1940, when assisting in the evacuation of the British Army from the Dunkirk beaches. Twenty-six persons were killed.

The full story of the Dunkirk Evacuation is told under the destroyer *Grafton*.

MONDOC

Pater son Steamships; 1928; Swan, Hunter & Wigham Richardson; 1,926 tons; 253x43-3x17-8; 92n.h.p.; triple-expansion engines.

The Canadian cargo ship *Mondoc* was lost off the E. coast of Trinidad on October 5th, 1941. It is probable that she struck Darien Rock. The ship was on a voyage from Demerara to St. Thomas carrying a cargo of bauxite.

MONESS

W. Maclean & Co.; 1889; J. Readhead & Sons; 2,294 tons; 290-5X39-1X20-2; 229n.h.p.; triple-expansion engines. The British cargo ship *Moness* was wrecked on Halten Island on February 13th, 1907, while on a voyage in ballast from Stavanger to Narvik.

MONGARA

British India Steam Navigation Co.; 1914; Swan Hunter & Wigham Richardson; 8,205 tons; 450-1 x 58 • 3 x 32 - 8; 894 n.h.p.; 14-5 knots; triple-expansion engines.

The liner *Mongara* was approaching Messina from Port Said on July 3rd, 1917, escorted by an Italian destroyer when she was torpedoed by a German submarine and sank in a few minutes. The attack took place about a mile from the breakwater and the destroyer had already entered the harbour ahead of her charge. An armed trawler bringing up the rear was not attacked.

MONGINEVRO

Navigazione AltaItalia; 1941; Italy; 5,324 tons; oilengines. The Italian motorship *Monginevro* was torpedoed and sunk by British aircraft on April 17th, 1943, ten miles from Zambretta Island.

MONGOLIA

Peninsular & Oriental Steam Navigation Co.; 1903; J. Caird & Co.; 9,505 tons; 520-9x58-3x24-8; 1,588n.h.p.; 18-5 knots; triple-expansion engines.

The P & O. liner *Mongolia*, with passengers and the mails for India, China and Australia, as well as a full general cargo for Australia, struck a mine on June 23rd, 1917, 50 miles S. by W. of Bombay, and sank. Three passengers, three engineer officers and 14 native crew and three Europeans were killed by the explosion.

The survivors were taken off without further loss, but it was not possible to get at the mails which went down with the vessel.

MONGOLIA

Rederi A/B Arild; 1909; W. Pickersgill & Sons; 2,124 tons; 286x43-3x18-7; 233 n.h.p.; triple-expansion engines. The Swedish steamship *Mongolia* struck a mine and sank on August 13th, 1940, in Kiel Bay.

MONGOLIAN

Indian & Peninsular Steam Navigation Co.; 1891; D. & W. Henderson & Co.; 4,892 tons; 400x45-2x23-3; 582n.h.p.; 12 knots; triple-expansion engines.

The steamship *Mongolian* was torpedoed and sunk by a German submarine five miles S.E. of Filey Brig, Yorkshire, on July 21st, 1918. Thirty-six persons were killed. The captain was among the survivors.

MONIQUE

Cie. Auxiliaire de Navigation; 1922; Chantiers & Ateliers de la Gironde; 7,011 tons; 425x56-7x33; 416 n.h.p.; triple-expansion engines.

The French tanker *Monique* was sunk by enemy action in early June, 1940, off the French coast on a voyage from Haifa to Havre. There were only four survivors.

MONIQUE SCHIAFFINO

Soc. Algerienne de Nav. pour VAfrique du Nord; 1929; Howaldts-werke A.G.; 3,236 tons; 330-6x48-1x23-7; 227 n.h.p.; triple-expansion engines.

The French steamship *Monique Schiaffino* was bombed and sunk by German aircraft on May 30th, 1940, at Dunkirk,

MONITOR

United States Navy, turret-ironclad; 1862; Continental Iron Works, New York; 987 tons; 173x41-5x11-5; 6 knots; double-trunk engines; box boilers; two 11 in. m.l.guns. The turret-ironclad *Monitor* of the United States Navy was probably the most important warship of the 19th century. For many years her designer

John Ericsson, of Swedish ancestry and living in the United States, had been experimenting with a type of warship designed to carry a revolving turret containing two heavy guns on a flat deck with a completely clear field of fire. In Britain at the same time Capt. Cowper Coles, R.N., was working on a similar principle, and later he designed the British turret-ironclad *Captain* (which see). Both designers lacked knowledge of how their creations would behave in rough weather at sea, and in the event both ships were lost.

The need for a vessel with qualities such as the *Monitor* was presumed to possess arose with the outbreak of the American Civil War. The Federal Government contracted with Ericsson for a turret-ironclad designed in accordance with his ideas. The vessel was built from keel to date of launch in 100 days. A month later she was commissioned, although not completed, and dockyard hands worked upon her until the very last moment.

This ironclad was the forerunner of all the gigantic battleships which figure in naval history from that time to the end of the Second World War. She demonstrated the tremendous advantage of the revolving armoured turret over every other form of gun mounting and changed, in one brief and indecisive action, the whole trend of naval design and tactics. She was hurriedly constructed at a time of great emergency, which probably accounted for the peculiarities of her design. Her hull was built on the barge principle, and was 122 ft. long by 34 ft. beam, on which was placed a flat upper hull 173 ft. long by 41 ft. 6 in. beam. Amidships of this upper hull was placed a turret 9 ft. high and 20 ft. in diameter, and 8 in. thick, the metal being bolted on in strips each 1 in. thick. It was cylindrical in shape and revolved by steam. There was a square armoured conning-tower right forward, sunk into the deck so that only 3 ft. 10 in. stood above deck level. It was very small, being only 3 ft. 6 in. long by 2 ft. 8 in. wide. There were two short funnels and two crows aft which, with boats and other gear, could be removed when the ship went into action. Her speed of six knots was very low, and her two 11 in. guns were muzzle-loading smooth bores.

On March 6th, 1862, the *Monitor*, under command of Capt. J. L. Worden, left New York in tow of the tug *Seth Low* and escorted by two gunboats. She carried a crew of 58. The day after she left port the famous engagement between the Confederate ironclad *Merrimac* (named *Virginia* by the South) and the Federal wooden ships *Cumberland* and *Congress* took place. Both wooden ships were battered to pieces by the ironclad. On the following day, Sunday, March 9th, the *Monitor* met the *Merrimac* and the historic naval duel took place. After much bombardment with low-power charges and iron shot, which did not penetrate the stout armour of the two antagonists, both the ships withdrew. The *Merrimac* did not

put to sea again and the Federals claimed the victory. The full story of the battles in Hampton Roads is told under the *Cumberland*.

After lying in the Roads for some two months the *Monitor* returned to Washington, D.C., for repairs, and was laid up for about six months. In November she proceeded to Norfolk Navy Yard, which she left on December 29th in tow of the paddle steamer *Rhode Island*. On the night of the 30th, when off Cape Hatteras in rough weather, she made signals of distress and the steamer went to her assistance. The *Monitor*, however, was sinking fast, and before all her crew could be taken off she foundered with the loss of 16 lives.

Thus ended the short career of the first of the turret-ironclads.

MONMOUTH

Mississippi River steamboat; 135 tons.

The Mississippi river steamboat *Monmouth* was hired by the United States Government to transport the tribes of Cree Indians across the Mississippi to a new settlement. She was too small for the job, and greatly overloaded. On October 30th, 1837, when proceeding up river in darkness and heavy rain she was sunk in a collision with the steamship *Warren*.

The collision occurred at a bend in the river, the *Warren* having another vessel in tow, and not being capable of rapid alteration of course. The *Monmouth*, which had 500 Indians on board, sank very quickly, with the loss of 235 persons. A large number of survivors floated ashore on a cabin which broke loose after the collision.

MONMOUTH

British Navy, armoured cruiser; 1901; London & Glasgow Shipbuilding Co.; 9,800 tons; 448x66x24-5; 22,000 Lh.p.; 23-9 knots; triple-expansion engines; Belleville boilers; fourteen 6 in. guns, eight 12 pdr., three 3 pdr., 2 T.T.

The armoured cruiser *Monmouth*, Capt. Brandt, a ship of about ten years' service was commissioned at the outbreak of the First World War and sent to the North American Station to strengthen the squadron under Rear-Admiral Sir Christopher Cradock. *Monmouth* arrived on August 22nd, 1914 and from that time was engaged as one of the ships sweeping down the coast of South America in search of the German light cruisers *Karlsruhe* and *Dresden*. Eventually, as part of a squadron consisting of the flagship *Good Hope* (which see), the light cruiser *Glasgow* and the auxiliary cruiser *Otranto*, *Monmouth* met the German East Asiatic Squadron under Admiral Graf von Spee off Coronel, Chile.

The two German armoured cruisers, *Scharnhorst* (flagship) and *Gneisenau*, were armed with eight 8-2 in. guns apiece and greatly outranged the British ships. Three light cruisers, the *Dresden*, *Leipzig* and *Nurnberg*, completed the German squadron, all the units of which were very speedy.

The rival forces made contact at about 6 p.m. on November 1st, and, after an hour's manoeuvring, the superior speed of the Germans placed them in a position to fire at the British ships on the horizon line, silhouetted against the setting sun. The first shot was fired at 7.04 p.m. and in a short time the two British armoured cruisers were on fire. At 7.53 p.m. the flagship *Good Hope* blew up and sank with the Admiral and all on board, leaving the fight to be maintained by *Monmouth*. The two light ships had been ordered to seek safety in flight, and *Glasgow* saw *Monmouth* for the last time at about 8.15 p.m. It was then dark and the big cruiser, with a heavy list, was steaming stern on to the seas, which were very rough. *Glasgow* signalled as she passed "The enemy is following us", but received no reply. She again signalled, telling her to shape a course to the N.W. clear of the enemy. She then made her best efforts to escape.

The darkness was now dispelled by the moon, and this enabled the German cruisers to establish the whereabouts of the British ship. At 9.25 p.m. those on board *Glasgow* counted 75 gun flashes, and then no more. *Monmouth*, with Capt. Brandt and all her company had foundered.

The official complement of *Monmouth* was 678.

A more detailed account of the battle will be found under *Good Hope*.

MONMOUTH COAST

Coast Lines; 1924; Ayrshire Dockyard Co.; 878 tons; 200-4X 30-6x13-2; 155 n.h.p.; 9-5 knots; triple-expansion engines. The steamship *Monmouth Coast*, Capt. A. Standen, was torpedoed

and sunk by a German submarine 80 miles from Sligo on April 24th, 1945. Fourteen men, including Capt. Standen and two gunners, were killed. One survivor was picked up.

MONOMOY

T. Hogan & Sons; 1892; Bartram, Haswell & Co.; 2,783 tons; 310x41 • 1 x 18-5; 275 n.h.p.; triple-expansion engines. The British cargo ship *Monomoy* was wrecked at Marwick Head, Orkneys, on January 6th, 1896. She was on a voyage from New York to Leith carrying a general cargo.

MONROSA

Navigazione Alia Italia Soc. Anon.; 1920; J. Coughlan & Sons; 6,703 tons; 428x54-3x27-3; 420 n.h.p.; triple-expansion engines.

The steamship *Monrosa* was torpedoed and sunk by a British submarine on October 25th, 1941, in the Aegean Sea.

MONROVIA

Elder, Dempster & Co.; 1890; Sir Raylton Dixon & Co.; 2,402 tons; 297-5x40-1x18-7; 221 n.h.p.; triple-expansion engines. The British cargo ship *Monrovia* was wrecked at Black Point, near Loango, on June 15th, 1914, while on a voyage from Liverpool to the west coast of Africa carrying a general cargo.

MONSALDALE

Lucas & Co.; 1905; Richardson, Duck & Co.; 2,805 tons; 331 x 47-5 x 20-1; 276 n.h.p.; triple-expansion engines. The British cargo ship *Monsaldale* sank after a collision eight miles east of Tuskar on May 12th, 1917, while carrying an ore cargo from Benisaf to Barrow.

MONSELET

Cie. Nantaise des Chargeurs de VOuest; 1929; R. Thompson & Sons; 3,372 tons; 340x47-5x21-9; 247 n.h.p.; triple-expansion engines.

The French steamship *Monselet* was sunk by British aircraft on September 20th, 1941, in the Gulf of Gabes, Tunisia.

MONSSEN

United States Navy, destroyer; 1940; Puget Sound Navy Yard; 1,630 tons; 348x35-3x10-2; 44,000s.h.p.; 36-5 knots; turbine engines; Express boilers; five 5 in. guns, 10 smaller; 10 T.T.

The destroyer *Monssen* of the United States Navy took part in the battle of Guadalcanal, fought off that island on the night of November 12th-13th, 1942. The Japanese were encountered in the Lengo Channel shortly before midnight and were engaged at close range. The *Monssen* survived the first phase of the action but sustained heavy damage by gunfire when making an attack upon the battleship *Hiei* on which she scored a hit. Later the *Monssen* was set on fire and foundered during the forenoon of the 13th.

The *Monssen* carried a complement of about 200, among whom there were a large proportion of casualties.

The full story of the battle is told under the U.S. cruiser *Atlanta* and the Japanese battleship *Kirishima*.

MONSTELLA

Navigazione Aha Italia; 1918; W. Doxford & Sons; 5,311 tons; 413-2x52-3x28-5; 369 n.h.p.; triple-expansion engines. The Italian steamship *Monstella* was torpedoed and sunk by a British submarine on August 30th, 1942, off Corfu Roads.

MONT BLANC

Compagnie Generale Transatlantique; 1899; Sir R. Dixon & Co.; 3,121 tons; 320x44-8x15-3; 247 n.h.p.; 9-5 knots; triple-expansion engines.

The steamship *Mont Blanc*, Capt. Lamodec, was bound from New York to Halifax, Nova Scotia, with a cargo of some 5,000 tons of high explosive. On the morning of December 6th, 1917, she was passing through the narrows leading from the outer harbour of Halifax into Bedford Basin, in charge of a pilot, Mr. McKay. Proceeding on an opposite course was the Norwegian steamship *Imp*, 5,043 tons, both ships having plenty of room and the weather being clear.

MONT LOUIS

The *Mont Blanc* was steaming at half speed and sighted the *Imo* some two miles distant heading toward the north side of the bay. As the ships approached each other there was a good deal of confusion and the *Imo* reversed her engines. This might have avoided a collision had the ship not been in ballast, as it was she swung round to port with her bow pointing to the *Mont Blanc*. A collision was unavoidable and Capt. Lamodec manoeuvred the *Mont Blanc* so that she should be struck at a spot where there was less likelihood of exploding her dangerous cargo. This consisted of picric acid in the forward hold, which would not explode on impact, and T.N.T. in the next two holds, which in all probability would explode. The *Imo* struck the *Mont Blanc* in way of the forward hold and smashed 20 barrels of benzol loaded on the forward deck; these poured their contents below and ignited the picric acid. In a moment there was an outburst of flame which could not be extinguished. Much time was wasted in futile efforts to combat the fire and when this was at last given up as hopeless it was too late to flood the vessel and sink her. The crew took to the boats and rowed hard for the shore, the explosion coming just after they landed among the woods along the harbour, some 20 minutes after the collision.

No words can describe the frightful desolation wrought by the explosion of thousands of tons of high explosive. The *Imo*, which had made for the North, or Dartmouth, side of the harbour was blown bodily ashore. The *Mont Blanc* was reduced to a mass of wreckage, but it was the unfortunate city of Halifax which suffered the most damage.

The suburb of Richmond, which lay upon the side of a hill and in which nearly all the houses were of wood, was struck down as though by earthquake. Thousands of people were either buried or badly cut by flying splinters of glass; freight cars were blown through the air to a distance of two miles; ships in the harbour lost two thirds of their crews killed, and many persons were killed at some distance inland; schools collapsed and out of 500 children who were at school at the time, about 9.20 in the morning, less than ten survived. In the Dartmouth school 200 children were killed, and at the Protestant Orphans Home the matron and every child perished.

Official figures were published on the day following the disaster as follows: killed 1,500; injured 8,000; missing 2,000; dwellings destroyed 3,000; loss to property owners 30,000,000 dollars. This computation, though subject to modification as more accurate information came to hand, gives sufficient indication of the widespread ruin caused by the explosion.

MONT LOUIS

Hall Corporation of Canada; 1927; Smith's Dock Co.; 1,905 tons; 252'6x43'4x17-8; 81 n.h.p.; triple-expansion engines. The Canadian steamship *Mont Louis* was torpedoed and sunk by a German submarine on May 8th, 1942, on a voyage from Paramaribo to Trinidad. Thirteen of her crew of 21 were lost.

MONT ROSE

Soc. Generale de Transports Maritimes a Vapeur; 1902; Ch. & Atel.de Provence; 3,848 tons; 346-1 x44-6x27-8; 272 n.h.p.; triple-expansion engines. The French steamship *Mont Rose* left Oran on January 3rd, 1924, for Rouen and Dunkirk with a cargo of wheat. She was reported to be in the Atlantic on January 8th/9th but was not seen again.

MONT VISO

Soc. Generale de Transports Maritimes a Vapeur; 1912; Chantiers et Ateliers de St. Nazaire; 4,820 tons; 366-7x49-3x24; 295 n.h.p.; triple-expansion engines. The French steamship *Mont Viso* was torpedoed and sunk by a submarine in the Mediterranean on June 30th, 1917.

MONT VISO

Soc. Generale de Transports Maritimes a Vapeur; 1921; Sir R. Dixon & Co.; 4,531 tons; 369-6x53-3x26; 364 n.h.p.; triple-expansion engines. The French steamship *Mont Viso* was torpedoed and sunk on November 3rd, 1943, off Tenes, Algeria.

MONTAGUE

British Navy, 1st class battleship; 1901; Devonport Dockyard; 14,000 tons; 405x75-5x26-5; 18,285 i.h.p.; 18-8 knots; triple-expansion engines; Belleville boilers; four 12 in. guns, twelve 6 in., twelve 12 pdr., six 3 pdr., 4 m.g., 4 T.T. The battleship *Montague* was proceeding to a fleet rendezvous during a dense fog in the Bristol Channel on the night of Wednesday, May 30th, 1906. Her commander, Capt. T. B. S. Adair, considered it of prime importance to arrive at his rendezvous at the appointed time, and although the fog was very thick he continued under way. At 2.10 a.m. the ship ran ashore on the Shutters, a ledge of rocks running out from Lundy Island, and despite long and costly efforts to refloat her, became a total wreck. There was no loss of life.

MONTAN

Ernst Komrowski; 1934; Fried. Krupp Germaniawerft; 1,275 tons; 231-4x36-2x13-9; 222 n.h.p.; oilengines. The German motorship *Montan* struck a mine and sank on July 26th, 1940, at Borkum.

MONTANA

Liverpool & Great Western Steam Nav. Co.; 1873; Palmers' Co.; 4,321 tons; 400-4x43-7x32-7; 900 n.h.p.; 14 knots; compound engines. The *Montana* was a sister ship to the *Dakota* (which see). She was wrecked on the coast of North Wales on March 14th, 1880, not far from Anglesey where the *Dakota* had been wrecked three years before. There was no loss of life.

MONTANA

Cie. Generale Transatlantique; 1903; Blohm & Voss; 5,351 tons; 410-8x50-9x28-5; 385 n.h.p.; triple-expansion engines. The French cargo ship *Montana* went ashore at Desirade near Pointe a Pitre on March 22nd, 1928, on a voyage from Antwerp to the West Indies.

MONTANA

U.S. Maritime Commission; 1934; Helsingors Jernskibs & Maskin; 1,549 tons; 290x39-7x15-3; 192 n.h.p.; compound engines & LP turbine. The Panamanian steamship *Montana* was torpedoed and sunk by a German submarine on September 11th, 1941, 400 miles N.E. of Cape Farewell on a voyage from Wilmington to Reykjavik with lumber. Eighteen of her crew of 26 were lost.

MONTANAN

American-Hawaiian S.S. Co.; 1913; Maryland Steel Co.; 6,659 tons; 407-7x53-7x36-1; 704 n.h.p.; quadruple-expansion engines. The American steamship *Montanan* was torpedoed and sunk by a German submarine in the Atlantic on August 15th, 1918.

MONTANAN

American-Hawaiian Steamship Co.; 1917; W. Cramp & Sons; 4,898 tons; 404-6x53-9x34-2; 2,500 i.h.p.; 11 knots; quadruple-expansion engines. The American liner *Montanan*, Capt. C. H. McGahan, was torpedoed and sunk by a German submarine about 250 miles N. of Mauritius on June 3rd, 1943. Five men, including Capt. McGahan, were killed and one wounded. The vessel was not in convoy.

MONTAUBAN

Cie. Delmas Freres & Vieljeux; 1920; Forth S.B. & E. Co.; 4,191 tons; 364-4x52-8x24-3; 347 n.h.p.; triple-expansion engines. The French steamship *Montauban* went ashore on January 9th, 1940, on Saltscar Rocks, Redcar. She broke up and was finally smashed in a gale. The *Montauban* was on a voyage from the Tyne to Marseilles with a cargo of coal.

MONTAUK

British & African S.N. Co.; 1894; W. Gray & Co.; 4,040 tons; 365 x 47x27-1; 404 n.h.p.; triple-expansion engines. The British cargo ship *Mont auk* was wrecked on Sherbro Reef on January 14th, 1911, while on a voyage from Cardiff to the west coast of Africa. She was carrying a cargo of coal and patent fuel.

MONTBRETIA

Norwegian Navy, corvette; 1941; Fleming & Ferguson; 1,925 tons; 193x32x16; 2,800b.h.p.; 17 knots; quadruple-expansion engines; 3 drum boilers; one 4 in.A.A. gun, several smaller. The corvette *Montbretia* was lent to the Norwegian navy by the British Admiralty and was manned by a Norwegian crew. In November, 1942, she was torpedoed and sunk in the North Atlantic by a German submarine. She carried a complement of about 100.

MONTECERVANTES

Hamburg-Sudamerikanische Dampfsch. Ges.; 1927; Blohm & Voss; 13,913tons; 500-6x65-8x37-9; 1,440n.h.p.; oilengines. The German motorship *Monte Cervantes* on a voyage from Buenos Aires to Ushuaia, Argentine, and then to Hamburg, struck an uncharted rock on January 23rd, 1930, near Les Eclaireurs lighthouse, Beagle Channel, Tierra del Fuego. She was carrying 1,517 passengers and 330 crew. The passengers and crew were taken off by a sister ship, but the captain remained on board and was drowned when, on the following day, the *Monte Cervantes* slipped off and sank. The ship was refloated in 1954 but sank in heavy seas while being towed to Buenos Aires.

MONTEGARGANO

Adriatica Soc. Anon, di Nav.; 1931; Cantieri Riuniti deW Adriatico; 1,976 tons; 267-3x40-2x22-6; 654 n.h.p.; oil engines. The Italian motorship *Monte Gargano* was torpedoed and sunk by British aircraft on August 22nd, 1940, in the Gulf of Bomba.

MONTEGORBEA

Naviera Aznar S.A.; 1923; Compania Euskalduna; 3,720 tons; 345-8x48-7x22-4; 489n.h.p.; oil engines. The Spanish motorship *Monte Gorbea* was torpedoed and sunk by a German submarine on September 19th, 1942, about 60 miles from Martinique on a voyage from Buenos Aires to Bilbao with grain. Three of the ship's four boats were wrecked by the explosion. The remaining boat with the captain, 23 crew and four passengers landed at Martinique, but 23 of the crew and an unspecified number of passengers were lost. The German Government afterwards paid compensation for the loss of the ship.

MONTEGRAPPA

Nav. Liber a Tries tina; 1920; Stabilimento Tecnico Triestino; 7,434 tons; 464 -2x57-4x22; 680 n.h.p.; triple-expansion engines. Carrying grain from Montreal to Venice, the Italian ship *Monte Grappa* encountered heavy weather, the cargo shifted, and she sank on November 14th, 1922.

MONTEGURUGU

Naviera Aznar S.A.; 1921; C. Hill & Sons; 3,554 tons; 325 x 48x25-2; 320n.h.p.; triple-expansion engines. Carrying coal from Newport to Genoa, the Spanish ship *Monte Gurugu* sank during a storm on November 13th, 1949, S. of Lundy Island. Twenty-five of the crew were rescued, but six were dead and six missing.

MONTEISABELA

Naviera Aznar S.A.; 1921; Ropner S.B.&Rpg. Co.; 3,615 tons; 340-2x48-7x22-4; 358 n.h.p.; triple-expansion engines. On a voyage from Las Palmas to Cuba, the Spanish ship *Monte Isabela* struck a reef and sank on September 20th, 1946, off Gando, near Las Palmas.

MONTEMONCAYO

Naviers Aznar S.A.; 1913; Compania Euskalduna; 4,291 tons; 365X50-2x25-2; 401 n.h.p.; triple-expansion engines. The Spanish steamship *Monte Moncayo* was torpedoed and sunk by a submarine on September 27th, 1940, 22 miles off Cape Carbonara, Sardinia.

MONTENEGRO

Naviera Aznar, S.A.; 1919; Harland & Wolff; 5,252 tons; 400-1x52-3x28-3; 517 n.h.p.; triple-expansion engines. The Spanish ship *Monte Negro* went ashore outside Takoradi breakwater on December 22nd, 1950, and was wrecked in heavy seas. She was carrying bauxite from Takoradi to Grangemouth.

MONTE NEVOSO

S.A. Cooperativa "Garibaldi"; 1920; Northumberland S.B. Co.; 5,843 tons; 399-9x52-9x32-8; 572 n.h.p.; triple-expansion engines.

The Italian ship *Monte Nevoso* went aground on October 14th, 1932, on Haisbro' Sand and broke in two. She was sailing from Rosario to Hull with a cargo of grain.

MONTEOLIVIA

Hamburg-Sudamerikanische Dampfsch. Ges.; 1925; Blohm & Voss; 13,750 tons; 500-6x65-8x37-9; 1,309 n.h.p.; oil engines. The German motorship *Monte Olivia* was bombed and sunk by British aircraft on April 4th, 1945, at Kiel.

MONTEPASUBIO

Armatori Riuniti Soc. di Nav.; 1920; Monmouth S.B. Co.; 6,568 tons; 412-4x55-8x34-5; 678 n.h.p.; turbine engines. The Italian ship *Monte Pasubio* on a voyage from Genoa to Bahia Blanca went ashore on April 1st, 1924, near Quequen.

MONTE SARMIENTO

Hamburg-Siidamerikanische Dampfsch. Ges.; 1924; Blohm & Voss; 13,625tons; 500-6x65-8x37-9; 1,300 n.h.p.; oilengines. The German motorship *Monte Sarmiento* was bombed and sunk by British aircraft on February 26th, 1942, at Kiel.

MONTEBELLO

Ellermarfs Wilson Line; 1911; Earle's Co.; 4,324 tons; 385x 50-5x27-2; 398 n.h.p.; 10 knots; triple-expansion engines. The steamship *Montebello* was torpedoed and sunk by a German submarine 320 miles W. i N. of Ushant on June 21st, 1918. The captain and 40 men were killed.

MONTELLO

Navigazione Alta Italia; 1927; Cantieri del Tirreno; 6,117 tons; 403 -5x54-5x33-6; 516 n.h.p.; triple-expansion engines. The steamship *Montello* was bombed and sunk by British aircraft on June 3rd, 1941, N.E. of Kerkenna Islands, Tunisia.

MONTEREY

Canadian Pacific Railway Co.; 1898; Palmers' Co.; 5,455 tons; 445 x 52 • 2 x 27 • 6; 661 n.h.p.; triple-expansion engines. The Canadian cargo ship *Monterey* was wrecked on July 15th, 1903, on Plata Point, St. Pierre, while on a voyage from Montreal to Bristol carrying a general cargo and cattle.

MONTEVIDEO

Uruguayan Government; 1920; Northumberland S.B. Co.; 5,785 tons; 413 -4x52-9x33; 572 n.h.p.; triple-expansion engines. The Uruguayan steamship *Montevideo* was torpedoed, shelled and sunk by a German submarine on March 8th, 1942, off the north west coast of Haiti on a voyage from Montevideo to New York. Eighteen of her crew of 50 were lost.

MONTEVIDEO MARU

Osaka Shosen K.K.; 1926; Mitsubishi Zosen Kaisha; 7,267 tons; 430x56x36; 1,164 n.h.p.; oilengines. The motor vessel *Montevideo Mam* was torpedoed and sunk by the U.S. submarine *Sturgeon* on July 1st, 1942, W. of Luzon Island.

MONTFORT

Canadian Pacific Railway Ocean Lines; 1899; Palmers^o Co.; 6,578 tons; 445x52-2x27-8; 731 n.h.p.; 14 knots; triple-expansion engines. The liner *Montfort* was torpedoed and sunk by a German submarine 170 miles W. by S. f S. of Bishop Rock, Stilly Isles, on October 1st, 1918. Five men were killed. The captain was among the survivors.

MONTGOMERY

United States Navy, minelayer; 1918; Newport News Shipbuilding Co.; 1,160 tons; 314x30-5x9-9; 27,000 s.h.p.; 35 knots; turbine engines; four 4 in. guns, one 3 in., 80 mines. The minelayer *Montgomery* was formerly a destroyer of the 1918 flush deck type. On October 17th, 1944, when operating in the Ngulu Lagoon, South Pacific, she struck a mine and sank. The vessel carried a complement of 128.

MONTI

MONTI

Tirrenia Soc. Anon. di Nav.; 1942; Italy; 4,301 tons; oil engines. The Italian motorship *Monti* was bombed and sunk by British aircraft on March 22nd, 1943, about 17 miles from Bizerta.

MONPELIER

Elder, Dempster & Co.; 1897; A. McMillan & Son; 3,483 tons; 344x44-5x25-9; 358 n.h.p.; triple-expansion engines. The British cargo ship *Montpelier* was wrecked on Duck Island, Cape Ray, N.F.L., on May 4th, 1900, while on a voyage in ballast from Las Palmas to Montreal.

MONTREAL

Mississippi & Dominion S.S. Co.; 1879; C. Connell & Co.; 3,308 tons; 329-5x39-3x25-2; 375 n.h.p.; compound engines. The British cargo ship *Montreal* was wrecked at Belle Isle on August 4th, 1889, while on a voyage from Montreal to Liverpool carrying a general cargo.

MONTREAL

Cie. Generate Transatlantique; 1896; R. Napier & Sons; 3,342 tons; 345-7x44-1x24-6; 441 n.h.p.; triple-expansion engines. The French steamship *Montreal* was torpedoed and sunk by a German submarine in the Bay of Biscay on March 24th, 1917.

MONTREAL

Canadian Pacific Ocean Services; 1900; C. S. Swan & Hunter; 8,644 tons; 469-5x56-2x31-9; 702 n.h.p.; triple-expansion engines. The Canadian steamship *Montreal* sank after a collision off Morecambe Bay on January 29th, 1918, while on a voyage from Liverpool to St. John, N.B., carrying a general cargo.

MONTREAL

Canada S.S. Lines; 1904; Richelieu & Ontario Nav. Co.; 4,282 tons; 332-4x43-5x14-8; 680 n.h.p.; triple-expansion engines. The Canadian steamship *Montreal* was destroyed by fire near Sorel, P.Q., on November 19th, 1926, while on a voyage from Montreal to Quebec carrying a general cargo and cattle. The fire started in the hay carried for the cattle.

MONTREAL CITY

Bristol City Line of Steamships; 1920; North of Ireland S.B. Co.; 3,066 tons; 331-1x46-7x23-2; 378 n.h.p.; 10-5 knots; triple-expansion engines. The steamship *Montreal City*, Capt. E. R. W. Chanter, on a voyage from Bristol to New York, straggled from convoy on the night of December 21st, 1942, and was torpedoed and sunk by a German submarine. The weather was bad at the time and the boats could not be got away. Help from ships in company was not possible owing to the storm and the darkness, and also to the fact that there were several submarines in the area. The *Montreal City* sank during the night with all her crew, 40 officers and men.

MONTREAL MARU

Kawasaki Risen K.K.; 1922; *Kawasaki Dockyard Co.*; 6,577 tons; 405x53x37; 578 n.h.p.; triple-expansion engines. The steamship *Montreal Maru* was bombed and sunk by U.S. land-based aircraft on January 5th, 1943, S.W. of the Aleutian Islands.

MONTROLITE

Imperial Oil; 1926; F. Krupp Akt. Ges.; 11,309 tons; 510-9x68-2x37-9; 905 n.h.p.; 11 knots; oil engines. The tanker *Montrolite* was in convoy in the North Atlantic on February 4th, 1942, when she was torpedoed and sunk by a German submarine. Twenty-seven of her crew and one gunner were lost.

MONUMENTAL CITY

Peter Stroebed; 1852; Murray Hazelhurst, Baltimore; 1,000 tons; 475 n.h.p.; 11 knots; oscillating direct acting engines. The *Monumental City* was the first steamship to cross the Pacific from San Francisco to Sydney. She took over two months on the voyage, leaving on February 17th, 1853, and arriving on April 23rd. Her arrival was the occasion for great excitement in Australia where

much was hoped from her. The gold discoveries were attracting thousands of people from overseas, and as land travel in Australia was tedious and difficult any ship which could maintain speedy and comfortable coastal service was doubly welcome.

The *Monumental City* was placed in the Melbourne-Sydney trade under command of Capt. W. H. Adams who had brought her from San Francisco. After only a few weeks in her new service she left Melbourne under sail and as the captain and officers were new arrivals they were not well acquainted with the coast. The officer of the watch was warned by an Australian captain, travelling as a passenger that he was much too near the shore. No thanks was given for the advice, the Australian being told to mind his own business. This piece of foolishness brought about a terrible disaster within the next few hours.

At 3.45 on Sunday morning, May 15th, the vessel ran upon a small rocky island near Gabo, being still under sail. The captain ordered sail to be taken in and the foremast cut away, but in the confusion part of the mainmast was also carried away and later the ship broke in two. The boats were either capsized or smashed, one only being serviceable. Of the 86 persons on board 33 were drowned, including Mr. Peter Stroebed, the owner of the vessel.

MONVISO

Navigazione Alia Italia; 1941; Italy; 5,322 tons; oil engines. The Italian motorship *Monviso* was torpedoed and sunk by a British submarine on August 3rd, 1942, about eight miles from Sidi Sueicher.

MOOLTAN

Peninsular & Oriental Steam Navigation Co.; 1905; J. Caird & Co.; 9,123 tons; 520-4x58-3x24-7; 14,000 h.p.; 18-5 knots; quadruple-expansion engines. The liner *Mooltan* was passing through the Mediterranean on July 26th, 1917, escorted by two Japanese destroyers when she was torpedoed and sunk by a German submarine 53 miles N.N.W. from Cape Serrat. She was carrying 554 persons, passengers and crew, at the time of the attack but by her own efforts and those of her escorts managed to get all save two of her company away in safety before she sank.

MOON

Far Eastern & Panama Transp. Corp.; 1946; Aalborg Vcerft A/S; 2,830 tons; 359-5x51x —; compound engines. The Panamanian ship *Moon* on a voyage from Sandakan to Osaka, was in collision with the *Nisshun Maru* and sank on November 17th, 1960, N.E. of Shichi-to Island, Japan.

MOORDRECHT

N.V. Phs. Van Ommeren; 1930; Rotterdam Droogdok Maats.; 7,493 tons; 440-3x58-7x35; 652 n.h.p.; oil engines. The Dutch motorship *Moordrecht* was torpedoed and sunk by the German submarine *U-43* on June 20th, 1940, about 200 miles N.W. of Cape Finisterre on a voyage from Port Arthur to Corunna. There were only four survivors.

MOORGATE

Dowgate S.S. Co.; 1907; J. L. Thompson & Sons; 3,785 tons; 346x49-5x25-3; 350 n.h.p.; triple-expansion engines. The British cargo ship *Moorgate* was wrecked near Salinas, Brazil, on February 8th, 1910, while on a voyage from Barry to Manaus with a cargo which included rails.

MOORLANDS

Mitre Shipping Co.; 1910; W. Doxford & Sons; 3,602 tons; 356-5x50-2x21-7; 331 n.h.p.; 10 knots; triple-expansion engines. The steamship *Moorlands* was torpedoed and sunk by a German submarine three miles S.E. by E. of Whitby on June 24th, 1918. Ten men were killed. The captain was among the survivors.

MOORTOFT

T.H. Donking & Sons; 1927; Porsgrund Mek. Vcerks.; 875 tons; 202x32-1x12-1/2; 75 n.h.p.; triple-expansion engines. The British cargo ship *Moortoft* was lost without trace after sailing from Green December 3rd, 1939, on a voyage to Calais. She was carrying a crew of 13 and had a cargo of pitch.

MOPANG

U.S. Shipping Board; 1920; Submarine Boat Corp.; 5,253 tons; 324x46-2x25; turbine engines.
The American ship *Mopang* struck a mine and sank on June 30th, 1921, one mile north of Sesopolis, Gulf of Burghaz.

MORA

F. C. Strick & Co.; 1922; G. Seebeck Akt. Ges.; 5,067 tons; 370-3x51x27-1; 349 n.h.p.; triple-expansion engines. The British cargo ship *Mora* was wrecked near Cape St. Vincent on February 8th, 1924. She was on a voyage from Manchester, via Rotterdam, to Savona carrying a cargo of coal. The captain and 16 of the crew were lost; 18 were saved.

MORALEDA

Chilean State Railways; 1912; Trondheims Mek. Vcerks; 785 tons; 180x29-4x20-2; 121 n.h.p.; triple-expansion engines. The Chilean passenger ferry *Moraleda*, sailing between Puerto Montt and Punta Arenas, struck on Lynch Rock, Fairway Island, and sank on August 3rd, 1940. Eighty passengers and crew were drowned.

MORAR

Western Nav. Co.; 1924; Swan, Hunter & Wigham Richardson; 7,507 tons; 240x37-2x17-7; 168 n.h.p.; triple-expansion engines.
The British steamship *Morar*, on a voyage from London to Belfast with cement, struck a mine and sank on November 26th, 1943, off Harwich. Fourteen of her crew and three gunners were lost.

MORAVIAN

Allan Line S.S. Co.; 1864; R. Steele; 3,567 tons; 389-3x39-5x32-1; 500 h.p.; compound inverted engines. The British iron cargo ship *Moravian* was wrecked on December 30th, 1881, at Flat Island, N.S., while on a voyage from Portland, Me., to Liverpool.

MORDENWOOD

Constantine & Pickering S.S. Co.; 1910; Ropner & Sons; 3,125 tons; 331x47x23-3; 271 n.h.p.; 9-5 knots; triple-expansion engines.
The steamship *Mordenwood* was torpedoed and sunk by a German submarine 90 miles S.E. of Cape Matapan on May 19th, 1917. The captain and 20 men were killed.

MOREA

M. Querei; 1918; Chicago S.B. Co.; 1,968 tons; 261-3x43-5x18-3; 274 n.h.p.; triple-expansion engines.
The Italian steamship *Morea* was shelled and sunk by a British submarine on August 16th, 1940, about 50 miles from Durazzo.

MORENA

Canadian Lake & Ocean Navigation Co.; 1890; S. & H. Morion & Co.; 1,279 tons; 230x34-1x13; 99 r.h.p.; triple-expansion engines.
The Canadian cargo ship *Morena* was wrecked near Cape Ray, Nfld., on May 18th, 1907, while on a voyage from Middlesbrough to Toronto carrying a cargo of pig iron.

MORESBY

I. Dodd & Co.; 1882; Whitehaven Ship Bldg. Co.; 1,259 tons; 223-5x36-1x21-2.
The iron sailing ship *Moresby* was wrecked in Dungavan Bay, Waterford, on December 24th, 1895. The captain, his wife and son, and 14 of the crew were lost. Five were saved.

MORESBY

I. G. White & Co.; 1881; Sir R. Dixon & Co.; 1,763 tons; 260-8x34-6x24; 198 n.h.p.; 9 knots; compound engines. The steamship *Moresby* was torpedoed and sunk by a German submarine 120 miles N.W. of Alexandria on November 28th, 1916. Thirty-three men were killed. The captain was among the survivors.

MORILD I

Bjornstad & Co.; 1883; T. & W. Smith; 1,354 tons; 243-7x34-3x17-5; 168 n.h.p.; compound engines. The Norwegian steamship *Morild I* was sunk by a German submarine in the Bay of Biscay on March 29th, 1917.

MORMACKITE

Moore-McCormack Lines, Inc.; 1945; Moore D.D. Co.; 6,195 tons; 438-9x63-1x27-7; turbine engines. The American ship *Mormackite* was on a voyage from Rio Grande and Victoria to Baltimore and New York when the cargo of ore shifted during a storm and the vessel foundered on October 7th, 1954, about 140 miles E.S.E. of Cape Henry, Va. Out of a crew of 47 11 survivors were picked up, 11 bodies were found, and 25 were missing.

MORMACsul

U.S. Maritime Commission; 1920; Los Angeles S.B. & D.D. Co.; 5,481 tons; 410x54-4x27-8; 422 n.h.p.; triple-expansion engines.
The steamship *Mormacsul* was bombed and sunk by German aircraft on May 27th, 1942, off the North Cape on a voyage from Philadelphia to North Russia.

MORNA

Belfast & London Packet; 1845 (circa); 363 tons; 110 n.h.p.; 11 knots; compound engines.
The steamship *Morna* left Belfast at 1 a.m. on February 25th, 1855, carrying 93 persons, of whom 55 were army recruits with two artillerymen, four passengers and the remainder crew. She ran into thick weather when crossing the Irish Sea, with strong cross-currents. After passing the Calf of Man the *Morna* appears to have gone badly off her course and at seven in the evening struck on the North Bishop's Rock, off St. David's Head. The boats were got out very promptly and 72 persons came safely to shore, including the captain and the first officer.
The drowned numbered 21, all of whom were either recruits or seamen.

MORO

Pan Norse S.S. Co. S.A.; 1928; Taikoo D. & E. Co.; 549 tons; 190-6x29-2x—; triple-expansion engines. The Panamanian ship *Moro* was bombed by Indonesian Government aircraft and sunk on April 28th, 1958, in Donggala harbour. The master and 21 of the crew were safe, but eight were killed and two wounded.

MORRISON

United States Navy, destroyer; 1943; Seattle-Tacoma Shipbuilding Co.; 2,050 tons; 376-5x39-5x—; 60,000 s.h.p.; 36-5 knots; turbine engines; five 5 in. guns, four 40 mm. of four 20 mm., 10 T.T.
The destroyer *Morrison* was bombed and sunk by Japanese aircraft off Okinawa on May 4th, 1945. The vessel carried a complement of over 250.

MORRO CASTLE

Agwi S.S. Lines Inc.; 1930; Newport News S.B. & D.D. Co.; 11,520 tons; 508 X 70 • 9 X 39; turbo-electric engines. The American ship *Morro Castle*, Acting-Capt. W. F. Warms, caught fire on September 8th, 1934, six miles off Asbury Park, N.J. She was taken in tow but the line parted and she went ashore. The fire was extinguished on September 16th. The *Morro Castle* was being operated by the New York & Cuba Mail S.S. Co., a subsidiary of the Ward Line, and was on a passenger cruise from Havana to New York. As a result of the disaster the captain died of a heart attack and 133 lives were lost. Survivors numbered 422.

MORVEN

James Gardiner & Co.; 1879; E. Withy & Co.; 1,365 tons; 242'8x32'6x16'7; 130 h.p.; compound engines. The British cargo ship *Morven* was wrecked at St. Kitts on May, 2nd, 1890, while on a voyage from Sombrero to Stettin carrying a cargo of phosphates.

MORVIKEN

MORVIKEN

Wallem & Co. A/S; 1938; Oresundsvarvet A.B.; 5,008 tons; 438'4x57-4x22-5; 752 n.h.p.; oil engines. The Norwegian motorship *Morviken* was intercepted by the German raider *Pinguin* and sunk on August 27th, 1940, about 300 miles E. of Madagascar on a voyage from Table Bay to Calcutta. The crew of 35 were taken prisoner.

MOSCHA L. GOULANDRIS

Goulandris Bros.; 1918; Caledon S.B. & E. Co.; 5,199 tons; 400-1x52-2x28-5; 517 n.h.p.; triple-expansion engines. The Greek steamship *Moscha L. Goulandris* was bombed and sunk by German aircraft between April 18th and 23rd, 1941, near Chalkis, during the invasion of Greece.

MOSCOW

W. Thomson & Co.; 1881; J.Laing; 1,603 tons; 253-5x34x17; 150 h.p.; compound engines. The British cargo ship *Moscow* was wrecked near Jabea on January, 16th, 1890, while on a voyage in ballast from Savona to Carthage.

MOSELLE

Isaac Perrin; 183-; United States; 199 tons. The American river steamship *Moselle*, Capt. Perrin, left Cincinnati for Fulton, a few miles up the Ohio river, on April 25th, 1838. Here she was to take on more passengers and cargo before her run to St. Louis. At the time of departure from Cincinnati she carried 85 first class passengers, which was more than she could comfortably accommodate, and from 120 to 150 deck passengers. The crew numbered 30.

The steamship had a reputation for speed, and her captain was known to be desirous of making her the fastest boat on the river. Her progress was watched by a large number of people along the banks, and they were witnesses of her sudden destruction. When not very far from the city her boilers blew up, killing, as far as can be ascertained, 136 persons. Bodies were blown on to the roofs of houses, and a portion of one boiler of 48 square feet and weighing 336 pounds, was hurled a distance of 480 feet into the back shop of a tanyard.

MOSELLE

Royal Mail Steam Packet Co.; 1871; J. Elder & Co.; 3,280 tons; 358-2x41x33-6; 600 h.p.; compound engines. The British cargo ship *Moselle* was wrecked near Colon on October 29th, 1891, while on a voyage from Port Limon to Southampton carrying a general cargo.

MOSFRUIT

A/S Mosvold Shipping Co.; 1938; Eriksbergs Mek. Verkstad; 2,714 tons; 314-4x50-3x23-3; 608 n.h.p.; oil engines. The Norwegian motorship *Mosfruit* was torpedoed, shelled and sunk by a German submarine on June 29th, 1942, 800 miles W. of Inishtrahull on a voyage from St. John, N.B., to Liverpool.

MOSQUITO

British Navy, river gunboat; 1939; Yarrow & Co.; 585 tons; 197x33x5; 3,800 s.h.p.; 17 knots; turbine engines; two 4 in. guns, one 3 • 7 in. howitzer, 8 m.g. The river gunboat *Mosquito* with her sister ship *Locust* was sent to the Dunkirk beaches to assist in the evacuation of the British Army in May, 1940. On June 1st, she was bombed and sunk by German aircraft. Her official complement was 74, but it is not known what number of troops and crew she was carrying at the time of her loss. The full story of the Dunkirk Evacuation is told under the destroyer *Grafton*.

MOSS BROW

Pyman Bros.; 1882; T. Turnbull & Son; 1,751 tons; 260x35 • 1x17-8; 184 n.h.p.; compound engines. The British cargo ship *Moss Brow* foundered near Kallbadan lightship, in the Gulf of Finland, on October 21st, 1896. She was on a voyage from the Tyne to Cronstadt carrying a cargo of coal. The captain and 14 of the crew were drowned.

MOSSAMEDES

Companhia Nacional de Navegacao; 1895; A. Stephen & Sons; 4,615 tons; 400x — X25-7; 2,200 i.h.p.; 11 knots; triple-expansion engines.

The liner *Mossamedes* left Cape Town for Lisbon on April 20th, 1923, with 237 passengers and crew. On the 24th wireless signals were sent out that the ship had run ashore on the coast of Angola. The liner *Port Victor* immediately altered course and made for the wreck. On arrival she found the *Mossamedes* lying high and dry on the shore, but no trace of passengers or crew. No lifeboats were visible and the *Port Victor* after searching for some time proceeded to Cape Town.

The boats of the wrecked liner, with the exception of one which capsized when launching, had decided to make for Porto Alexandre, the nearest place. For nearly a week they voyaged on the open sea, becoming separated and suffering much hardship. One boat containing 24 people was never heard of again. The others were picked up by the French gunboat *Cassiopee*, the Portuguese gunboat *Salvador Correia* and by fishing vessels from Porto Alexandre.

In all 31 persons were lost, seven by drowning when the ship's boat capsized and 24 in the lifeboat. Two hundred and six persons reached Porto Alexandre. Mr. Paulino, the first officer, exhibited great gallantry in repeatedly diving into the sea and rescuing people who had been flung out of the overturned lifeboat.

MOSSOUL

Messageries Maritimes; 1898; Barclay, Curle & Co.; 3,135 tons 345x42-2x23; 300 n.h.p.; triple-expansion engines. The French steamship *Mossoul* was torpedoed and sunk by a submarine in the Mediterranean on November 21st, 1917.

MOSTAGANEM

Cie. France-Navigation S.A.; 1921; T. van Duijvendijk; 1,942 tons; 265-2x42-3x18-6; 162 n.h.p.; triple-expansion engines. The French steamship *Mostaganem* was bombed by British aircraft, torpedoed and sunk on April 18th, 1943, N. of Marittimo.

MOTANO

Standard Oil Co. (New Jersey); 1890; Armstrong, Mitchell & Co.; 2,130 tons; 308-7x40-2x28-3; 225 n.h.p.; triple-expansion engines.

The American tanker *Motano* was torpedoed and sunk by a German submarine in the English Channel on July 31st, 1917.

MOTO

Pelton S.S. Co.; 1913; S. P. Austin & Son; 1,941 tons; 267x38x17-6; 221 n.h.p.; triple-expansion engines. The British cargo ship *Moto* sank after a collision in lat. 55° 22' N., long. 1° 29' W., on December 10th, 1918, while on a voyage from Methil to the Tyne.

MOTOMAR

Navemar, Soc. Anon, de Nav.; 1920; Limhamn Skeppsv. AID; 414 tons; 180'8x28-4x11-5; oil engines.

The Argentine motorship *Motomar* sank on May 2nd, 1959, 100 miles off the Gulf of San Matias. Three of her crew of 18 were picked up from a boat and a raft and four more reached land in a small boat some days later.

MOTRICINE

Cie. de Navegacion Mixte; 1913; Atelier & Chantiers de St. Nazaire; 4,047 tons; 348x47-2x25-8; 375 n.h.p.; oil engines. The French tanker *Motricine* was torpedoed and sunk by a German submarine off Ushant on May 17th, 1918.

MOUNT DELPHI

Mount Olympus Shipping Corp.; 1919; British American S.B. Co.; 2,042 tons; 261X43-4X —; triple-expansion engines. The Liberian ship *Mount Delphi* sprang a leak, struck a rock and sank on June 2nd, 1958, about 1 mile S. of Sail Rock off Mormugao.

MOUNT DIRFYS

Atlanticos S.S. Co.; 1918; W. Dobson & Co.; 5,242 tons; 400 • 1x52 • 3X28-4; 517 n.h.p.; triple-expansion engines. The Greek ship *Mount Dirfys* went ashore at Frying Pan Shoals on December 26th, 1936, and broke in two. She was carrying chrome ore from Lourenço Marques to Wilmington, N.C.

MOUNT HYMETTUS

I. A. Cosmetto & Kulukundis; 1921; Atelier & Chantiers de St. Nazaire; 5,820 tons; 425-8x57-4x29; 560n.h.p.; triple-expansion engines.

The Greek steamship *Mount Hymettus* was torpedoed and sunk by a German submarine on June 11th, 1940, about 200 miles N.W. of Oporto on a voyage from Bilbao to New York. There were 24 survivors.

MOUNT IDA

Atlanticos S.S. Co.; 1938; Wm. Hamilton & Co.; 4,202 tons; 380-5x56-2x23-5; 380 n.h.p.; triple-expansion engines. The Greek ship *Mount Ida*, on a voyage from Vancouver to Hull, went aground on October 9th, 1939, near Ower Bank, 32 miles E. of Cromer, and broke her back.

MOUNT KITHERON

Kulukundis Shipping Co.; 1912; J. Readhead & Sons; 3,876 tons; 367-3x53-9x22-8; 372 n.h.p.; triple-expansion engines. The Greek steamship *Mount Kitheron* was torpedoed and sunk by a German submarine on January 25th, 1942, two miles from St. John's, N.F.L. Twelve of her crew were killed.

MOUNT KYLLENE

Kulukundis Shipping Co. & others; 1919; W. Doxford & Sons; 5,313 tons; 412-6x55-5x26-4; 619n.h.p.; triple-expansion engines.

The Greek ship *Mount Kyllene* was on a voyage from Amsterdam to Panama City in ballast on April 9th, 1938, when she encountered heavy weather. There was an internal explosion and the ship broke in two. Both parts remained afloat with 17 men on the fore part and 14 aft. Four men were drowned when jumping for rescue boats, including the wireless operator, who at great risk, rigged a temporary aerial after the explosion. The disaster occurred in 43° 30' N., 28° W., and 11 days later the wreck was still afloat in 43° 9' N., 31° 22' W.

MOUNT LEBANON

John Bruce & Co.; 1881; A. Stephen & Sons; 2,420 tons; 319-5x38x24'6; 258 n.h.p.; compound engines. The British cargo ship *Mount Lebanon* foundered in August, 1908, 70 miles west of the Scilly Isles. She was carrying a coal and general cargo on a voyage from the Clyde to Alexandria.

MOUNT LYCABETTUS

Atlanticos S.S. Co.; 1917; Sir Raylton Dixon & Co.; 4,292 tons; 364-8x51-1x26-1; 468 n.h.p.; triple-expansion engines. The Greek ship *Mount Lycabettus* left Baltimore on March 11th, 1942, for Leixoes and was not seen again. It was assumed that she had been sunk by enemy action.

MOUNT MCKINLEY

Alaska S.S. Co. Inc.; 1918; W. Cramp & Sons S. & E.B. Co.; 4,861 tons; 360-2x51-6x22-8; 633 n.h.p.; quadruple-expansion engines.

The American ship *Mount McKinley* went ashore on March 11th, 1942, four miles N. of Scotch Cap lighthouse and broke up.

MOUNT MYCALE

Atlanticos S.S. Co. & Georgilis Bros.; 1907; Tyne Iron S.B. Co.; 3,556 tons; 348-5x50-1x23-1; 307n.h.p.; triple-expansion engines.

The Greek steamship *Mount Mycale* was torpedoed and sunk by a German submarine on January 22nd, 1943, about 200 miles N.E. of Cape Race on a voyage from St. John, N.B., to Loch Ewe. All on board were lost.

MOUNT MYRTO

I. A. Cosmetto & Kulukundis Shipping Co.; 1919; Canadian Vickers; 5,403 tons; 400-3x52-4x28; 397n.h.p.; triple-expansion engines.

The Greek steamship *Mount Myrto* was torpedoed, shelled and sunk by a German submarine on June 14th, 1940, on a voyage from Galveston to London.

MOUNT OLYMPUS

Atlanticos S.S. Co.; 1920; Harima Dockyard Co.; 6,692 tons; 425-2x54x35; 600 n.h.p.; triple-expansion engines. The Greek steamship *Mount Olympus* struck a mine, broke into three and sank on May 14th, 1942, off Port Said.

MOUNT PELION

E. G. Culucundis & S. C. Costomeni; 1917; Kawasaki Dkyd. Co.; 5,655 tons; 385-5x51-3x33-5; 440n.h.p.; triple-expansion engines.

The Greek steamship *Mount Pelion* was torpedoed and sunk by a German submarine on November 2nd, 1942, on a voyage from St. John, N.B., to Belfast Lough. Seven of her crew were killed.

MOUNT TAYGETUS

Rethymmis & Kulukundis (Hellas) S.A.; 1921; New York Harbor D.D. Corp.; 3,286 tons; 324 X 46 - 2 x 25; 380 n.h.p.; triple-expansion engines.

The Greek steamship *Mount Taygetus* was torpedoed and sunk by a German submarine on September 7th, 1942, on a voyage from Montreal to the U.K. Five of her crew were killed.

MOUNT PARK

J. & J. Denholm; 1897; R. Duncan & Co.; 1,149 tons; 225x34x15; 121 n.h.p.; triple-expansion engines.

The British cargo ship *Mountpark* sank after a collision with the British s.s. *Tremont* 27 miles W.N.W. of West Hinder lightship on February 16th, 1911. She was on a voyage from Cadiz to Great Yarmouth carrying a cargo of salt. Fourteen of the crew were drowned. On the next morning four men were found clinging to a capsized boat, but one of these died of exposure.

MOUNT PARK

I. & J. Denholm; 1912; Dunlop, Bremner & Co.; 1,376 tons; 250 x 37-2x16-4; 160 n.h.p.; triple-expansion engines. The British steamship *Mountpark* sank after a collision six miles north-west of Bull Point on August 21st, 1917, while employed as an Admiralty collier. She was on a voyage from Newport to Dover.

MOUNT PARK

Denholm Line Steamers; 1938; Chas. Connell & Co.; 4,648 tons; 407-4x54-7x24-5; 431 n.h.p.; 10 knots; triple-expansion engines.

The steamship *Mountpark*, Capt. John Edwards, was bombed and sunk by a German aircraft off Northern Ireland on April 26th, 1941. Six men were killed and five wounded.

MOURNE

British Navy, frigate; 1943; A. & J. Inglis; 1,300 tons; 300 x 35 X-r-5,500 h.p.; 20 knots; turbine engines; three 3 in. guns, two 40 mm., four 20 mm.

The frigate *Mourne*, Lt. Cdr. R. S. Holland, R.D., R.N.R., took part in the landing of the British and American armies in France on "D" Day, June 6th, 1944. *Mourne* was torpedoed by a German submarine off the Lizard on the 15th, going down with the loss of eight officers, including Lt. Cdr. Holland, and 102 ratings.

MOUSQUET

French Navy, destroyer; 1903; France; 303 tons; — x — x10-6; 6,300 i.h.p.; 30-2 knots; triple-expansion engines; Normand boilers; one 9pdr., six 3pdr., 2 T.T.

The destroyer *Mousquet* was stationed at Penang for patrolling duties in the early months of the First World War. At about 5.30 on the morning of October 28th, 1914, the German raider *Emden* approached the harbour unchallenged and sank the Russian light cruiser *Jemtchug* (which see), and then prepared to capture shipping. At this juncture the *Mousquet* returned from patrol and at once attacked the raider with great gallantry. The fight did not last for more than seven minutes, by which time the destroyer was sunk.

The *Emden* stood by to pick up survivors from the *Mousquefs* complement of 62 and then steamed away. The plucky action of the Frenchman undoubtedly saved the shipping in the harbour and caused the raider to make a hurried departure. Of the 36 persons rescued by the *Emden*, three afterwards died.

MOUSSE LE MOYEC

MOUSSE LE MOYEC

Ministry of Shipping (Etablissement Marcesche & Co.); 1921; Construction Navales Lorient; 2,147 tons; 269 X 39 • 5 X 19 • 6; turbine engines.

The French cargo ship *Mousse le Moyec*, flying the British flag, was wrecked at Hartland Point on December 6th, 1940. She had sailed in ballast from Plymouth for the Bristol Channel.

MOWE

German Navy, torpedo boat; 1926; Wilhelmshaven Yard; 800 tons; 277-7x27-5x9 -2; 24,000 s.h.p.; 33 knots; turbine engines; Schulz-Thornycroft boilers; three 4-1 in. guns, two 1pdr., 6 T.T. The torpedo boat *Mowe* was bombed and sunk at the port of Le Havre in company with several other vessels of the same class on June 14th, 1944. The vessel's normal complement was 121. More details are given under the *Falke*.

MOYORI MARU

Nippon Yusen Kabushiki Kaisha; 1902; Craig, Taylor & Co.; 3,746 tons; 330-8x45-1x18; 306n.h.p.; triple-expansion engines.

The Japanese steamship *Moyori Mam* was shelled and sunk by a German submarine off the W. coast of Africa on October 20th, 1917.

MOZAFFARI

Bombay & Persia S.N. Co.; 1882; Schlesinger, Davis & Co.; 2,255 tons; 285x37-3x26*5; 288n.h.p.; compound engines. The British cargo ship *Mozaffari* was wrecked at the mouth of the harbour of Mozambique on January 19th, 1910. She was on a voyage to Bombay carrying a general cargo.

MOZART

Jenneson Taylor; 1882; North of England S.B. Co.; 2,398 tons; 285x37-6x28-2; 250 h.p.; compound engines. The British cargo ship *Mozart* was wrecked on Haisbro' Sands on May 16th, 1889, while on a voyage from Sunderland to Genoa. She was carrying a cargo of coal and coke.

MRAV

Brodarsko Ackionarsko Društvo "Oceania"; 1905; R. Stephen-son & Co.; 3,870 tons; 340-8x47-2x20; 316 n.h.p.; triple-expansion engines.

The Yugoslav ship *Mrav*, Capt. Anta Begovic, collided in a fog on April 29th, 1936, with the *Mari* five miles S.E. of Dungeness, and sank in 35 minutes.

MSTA

U.S.S.R.; 1921; Ardrossan D.D. & S.B. Co.; 1,984 tons; 271'7x41-6x19-4; 221n.h.p.; triple-expansion engines. The Soviet ship *Msta* was crushed in heavy ice and sank on February 6th, 1944, S. of Nagaevo in about 58° N., 151° E.

MUANSA

Deutsche Ost-Afrika Lime; 1911; Bremer Vulkan; 5,472 tons; 419'8x54-5x28-2; 387n.h.p.; quadruple-expansion engines. The German steamship *Muansa* was torpedoed and sunk by a British submarine on January 1st, 1943, off the north coast of Norway.

MUKO MARU

Taihei Kisen K.K.; 1937; Osaka Iron Works; 4,862 tons; 369-8x54-1x29-2; 378n.h.p.; triple-expansion engines. The steamship *Muko Maru* was torpedoed and sunk by the U.S. submarine *Thresher* on November 13th, 1943, about 200 miles N. of Truk Island.

MUNAKATA MARU

Showa Tanker K.K.; 10,045 tons. The tanker *Munakata Maru* was sunk by U.S. carrier-based aircraft on January 21st, 1945, off Keelung, Formosa.

MUNAKATA MARU No. 1

Idemitsu Kosan K.K.; 1957; Sasebo Sempaku Kogyo; 1,972 tons; 202x41-6x18-4; oilengines.

The Japanese tanker *Munakata Maru No. 1* was in collision with the Norwegian tanker *Tharald Brovig*, 21,634 tons, in dense fog at about 8 a.m. on November 18th, 1962. The collision took place in Kawasaki Port, Tokyo Bay, at a time when all the channels were crowded with shipping. The Japanese tanker, which carried a crew of 36, was struck at an angle of 45 degrees, and there was an immediate gush of oil from one of her tanks. About ten minutes later there was a loud explosion and the vessel became enveloped in flames. Two oil barges which were passing also caught fire, three of the men on board being killed.

The Norwegian tanker, which had just discharged her cargo of oil, was returning to the Persian Gulf. She was severely burned on one side, but none of the 47 people on board, including four women, was killed. Ten were slightly injured.

All the crew of the *Munakata Maru No. 1* were killed, making with those on the barges a total loss of 39 persons.

The fire on the *Munakata Maru No. 1* was extinguished, and the ship was later repaired and put back into service.

MUNCASTER CASTLE

Lancashire Shipping Co.; 1928; Cammett Laird & Co.; 5,853 tons; 428x56-1x28-9; 953 n.h.p.; 13-5 knots; oilengines. The motor vessel *Muncaster Castle*, Capt. H. W. Harper, O.B.E., serving as an auxiliary transport, was torpedoed and sunk by a German submarine on March 30th, 1942, some 400 miles S.W. of the coast of Liberia. Twenty-seven persons were killed. Capt. Harper was among the survivors. The *Muncaster Castle* was not in convoy.

MUNDRA

British India Steam Navigation Co.; 1920; Barclay Curie & Co.; 7,341 tons; 450-2x58-1x32-8; 832 n.h.p.; 13 knots; triple-expansion engines.

The steamship *Mundra* was off St. Lucia Bay, Natal, on July 6th, 1942, when she was intercepted by an enemy submarine which sank her by torpedo and gunfire. At the time of the attack the *Mundra* was carrying as passengers survivors from other ships. One officer and about 93 Indian ratings were lost.

MUNERIC

Bright Navigation Co.; 1919; Workman, Clark & Co.; 5,229 tons; 400-5x52-3x28-5; 517 n.h.p.; triple-expansion engines. The British steamship *Muneric*, on a voyage from Rio de Janeiro to Middlesbrough with iron ore, was torpedoed and sunk by a German submarine on September 10th, 1941, about 100 miles N.E. of Cape Farewell. All her crew of 56, five gunners and two stowaways were lost.

MUNGER T. BALL

Sabine Transportation Co.; 1920; Terry S.B. Corp.; 5,104 tons; 391-9x51-2x30; 562n.h.p.; triple-expansion engines. The American tanker *Munger T. Ball* was torpedoed and sunk by a German submarine on May 4th, 1942, N. of the Tortugas Islands on a voyage from Port Arthur to Norfolk with gasoline. Twenty-nine of her crew of 33 were lost.

MUNSTER

Coast Lines; 1938; Harland & Wolff; 4,305 tons; 353x50-2x14-6; 5,200b.h.p.; 18knots; oilengines. The motor vessel *Munster* left Belfast just before midnight on February 6th, 1,940, for Liverpool under Capt. J. W. Paisley with over 200 passengers. When approaching the Bar lightship off Liverpool she struck a mine and sank. There were no fatal casualties but one person was injured. The boats were picked up by a coasting vessel and the occupants landed at Liverpool.

MUNSTERLAND

Hamburg-Amerika Linie; 1922; Blohm & Voss; 6,408 tons; 449x58-3x26-9; 856n.h.p.; oil engines. The German motorship *Munster land* was shelled and sunk by British coastal batteries on January 20th, 1944, off Calais.

MURAKUMO

Japanese Navy, destroyer; 1927; Fujinagata; 1,700 tons; 371-5x33-7x9-9; 40,000 s.h.p.; 34 knots; turbine engines; Kampon boilers; six 5 in. guns, 4 A.A.m.g.; 9 T.T.

The destroyer *Murakumo* took part in the night action off Cape Esperance on October 11th-12th, 1942. There were two phases of this action, one before midnight on the 11th and the other on the following morning. The *Murakumo* survived the first phase but was bombed and sunk by U.S. naval aircraft when partly disabled off New Georgia on the morning of the 12th.

The full story of the action, which was known as the battle of Cape Esperance, is told under the U.S. destroyer *Duncan*.

MURASAME

Japanese Navy, destroyer; 1935; Fujinagata; 1,368 tons; 337-7x32-5x8-7; 37,000s.h.p.; 34 knots; turbine engines; Kampon boilers; five 5 in. guns, 2 m.g., T.T.

The destroyers *Minegumo* and *Murasame* formed part of a light force which attacked a squadron of U.S. cruisers and destroyers bombarding Vila and Munda in the Central Solomons on the night of March 5th, 1943. The fight was short and sharp and resulted in the two destroyers being sunk by the gunfire of the American squadron. The Japanese were compelled to break off the action. No American ship was lost.

The two Japanese destroyers carried complements of around 200 apiece.

MURIEL

Chas. Howard & Sons; 1880; R. Dixon & Co.; 1,384 tons; 240-5x33-3x17¹/₇; 120h.p.; compound engines. The British cargo ship *Muriel* was wrecked at Lobps Island on January 24th, 1893, while on a voyage from Valencia to Buenos Aires carrying a general cargo which included wine.

MURIEL

J. Coverdale & Son; 1889; W. Gray & Co.; 2,398 tons; 290-5x38-1x20-3; 210n.h.p.; triple-expansion engines. The British cargo ship *Muriel* was wrecked at San Martinko on August 19th, 1903, while carrying a cargo of coal on a voyage from Cardiff to Genoa.

MURISTAN

F. C. Strick & Co.; 1913; W. Gray & Co.; 2,886 tons; 320-3x46-7x21-1; 288n.h.p.; triple-expansion engines. The British cargo ship *Muristan* was wrecked one mile S. of Blyth on November 19th, 1916, while on a voyage from the Tyne to Rouen.

MURJEK

Rederi Aktieb. Lulea-Ofoten; 1913; J. L. Thompson & Sons; 4,146 tons; 351-7x50-9x25-9; 350n.h.p.; triple-expansion engines.

The Swedish steamship *Murjek* struck a mine and sank off the N. coast of Scotland on April 11th, 1916.

MURJEK

Trafik A/B Grangesberg-Oxelosund; 1925; A/B Gotaverken; 5,070 tons; 392-2x52-6x26-6; 489n.h.p.; oilengines. The Swedish motorship *Murjek* left Freetown about February 10th, 1941, for Gothenburg. It was assumed that she was sunk by enemy action as she was not heard of again.

MURO MARU

Osaka Shosen K.K.; 1926; Mitsubishi S.B. & Eng. Co.; 1,606 tons; 230x37x20; 386n.h.p.; oilengines. The motor vessel *Muro Maru* was sunk by U.S. carrier-based aircraft on November 13th, 1944, in Manila Bay.

MURORAN MARU

Nippon Yusen K.K.; 1919; Mitsubishi Zosen Kaisha; 5,374 tons; 400x54-5x30; 495 n.h.p.; triple-expansion engines. The steamship *Muroran Maru* was bombed and sunk by U.S. land-based aircraft on December 30th, 1944, W. of Luzon Island.

MURORAN MARU No. 1

Kuribayashi Shosen K.K.; 1917; Aizawa Iwakichi; 1,225 tons; 218X32-2x19; 79n.h.p.; triple-expansion engines. The Japanese ship *Muroran Maru No. 1* was wrecked in a hurricane on March 11th, 1928, off Cape Inuboye with the loss of all on board.

MUROTO

Japanese Navy; 4,500 tons (approx.).

The Japanese steamship *Muroto* was torpedoed and sunk by the U.S. submarine *Sea Dog* on October 22nd, 1944, N. of the Ryukyu Islands.

MUROTO MARU

Tosa Shosen K.K.; 1922; Osaka Iron Works; 1,257 tons; 215 x 37x20; 146n.h.p.; triple-expansion engines. The passenger steamship *Muroto Maru* struck a mine and sank on October 7th, 1945, off Tarumizu Island in the Inland Sea. There were about 180 survivors of the hundreds of passengers on board.

MUSASHI

Japanese Navy, dreadnought battleship; 1940; Japan; 42,500 tons; 870x139x—; 160,000 s.h.p.; 30 knots; turbine engines; nine 16 in. guns, six 6-1 in., twelve 5 in.A.A., many smaller. The battleship *Musashi* was sunk in the action fought in the Sibuyan Sea on October 25th, 1944. This action, with two others extending over a period of four days, 23rd to 26th, was known as the battle of Leyte Gulf, a large area of water between the islands of Leyte and Samar in the Philippines. More than two years of hard fighting in Pacific waters had brought the American Navy once again to the coasts of the Philippines and in October, 1944, everything was ready for a landing. This landing took place on the morning of the 20th on the island of Leyte and constituted a supreme challenge to Japanese naval power in the Pacific.

In the early hours of October 23rd two Japanese heavy cruisers of 9,850 tons, ten 8 in. guns, the *Atago* and the *Maya*, were torpedoed in the Palawan Passage by the U.S. submarines *Dace* and *Darter*. These cruisers were units of a fleet the Americans designated the "Central Force". Its main units were as follows:—

Battleships			
<i>Musashi</i>	42,500 tons,	9-16 in.	guns
<i>Yamato</i>	42,500 "		
<i>Nagato</i>	32,720 "	8 "	"
<i>Haruna</i>	29,330 "	8-14 in.	"
<i>Kongo</i>	29,330 "	"	"
Cruisers			
<i>Chikuma</i>	14,000 tons,	8-8 in.	guns
<i>Suzuyu</i>	14,000 "		
<i>Atago</i>	9,850 "	10 "	"
<i>Chokai</i>	9,850 "	" "	"
<i>Maya</i>	9,850 "	" "	"
<i>Noshiro</i>	6,000 "	6-6.1 "	"
<i>Kiriu</i>	5,170 "	7-5.5 "	"

Two other Japanese fleets were converging on Leyte. Of these a much smaller one consisting of two battleships, one heavy cruiser and four destroyers, was steaming through the lower portion of the Sulu Sea toward the Surigao Strait. The ships in this fleet designated by the Americans the "Southern Force", were as follows:—

Battleships			
<i>Fuso</i>	29,330 tons,	12-14 in.	guns
<i>Yamashiro</i>	29,330 "	"	"
Cruiser			
<i>Mogami</i>	14,000 tons,	8-8 in.	guns

In addition to the above ships there was a small group of three cruisers and three destroyers which formed part of the "Southern Force", but did not take part in the night action of the 25th. Several of these vessels were bombed and sunk at a later stage of the battle.

The third fleet, was located on the 24th by carrier aircraft of the U.S. Third Fleet, about 200 miles off Cape Engano at the north-eastern tip of the island of Luzon. It was very powerful, though not superior to the Central Force, except in aircraft carriers, and

MUSASHI MARU

comprised the following large vessels:—

Battleships	
<i>he</i>	29,990 tons, 14 in. guns
<i>Hyunga</i>	29,990 „ „
	(fitted with flight decks)
Cruisers	Destroyers
<i>Tama</i>	5,100 tons
	One heavy cruiser
	Three light cruisers
Aircraft carriers	
<i>Zuikaku</i>	29,800 tons
<i>Zuiho</i>	12,000 „
<i>Chitose</i>	9,000 tons
<i>Choyoda</i>	9,000 „

The total number of ships of all kinds at the disposal of the American commander, Admiral Chester W. Nimitz, was 650. Of these many were landing craft and vessels of small fighting value. Among the heavier units were the following:—

Battleships	
<i>West Virginia</i>	33,590 tons, 8-16 in. guns
<i>Maryland</i>	33,590 „ „
<i>Tennessee</i>	35,190 „ 12-14 in. „
<i>California</i>	35,190 „ „
<i>Pennsylvania</i>	33,100 „ „
<i>Washington</i>	35,000 „ 9-16 in. „
<i>North Carolina</i>	35,000 „ „
<i>South Dakota</i>	35,000 „ „
<i>New York</i>	27,000 „ 10-14in. „
<i>Idaho</i>	33,400 „ 12 „ „
<i>Texas</i>	27,000 „ 10 „ „
<i>Arkansas</i>	26,100 „ 12-12in. „
<i>Nevada</i>	29,000 „ 10-14in. „
Aircraft carriers	
<i>Hornet</i>	27,000 tons
<i>Lexington</i>	27,000
<i>Wasp</i>	27,000
<i>Princeton</i>	11,000
<i>Gambler Bay</i>	6,730
<i>St. Lo</i>	6,730
<i>Suwanee</i>	12,000
<i>Santee</i>	12,000
<i>White Plains</i>	6,730
<i>Kitkum Bay</i>	6,730
Australian cruisers	
<i>Australia</i>	10,000 tons, 8-8 in. guns
<i>Shropshire</i>	10,000 „ „ „ „

Of the three actions, all proceeding simultaneously, that which concerned the "Central Force" will be dealt with first. The U.S. Third Fleet under the command of Admiral William F. Halsey took up a position which enabled it to cover the San Bernardino Strait, N. of Samar Island, and the Surigao Strait, S. of Leyte, the Americans lying to eastward in each case. Aircraft from Vice-Admiral Mitscher's squadron of large and fast aircraft carriers located the Central Force in the Sibuyan Sea and the Southern Force in the Sulu Sea early on October 24th. Attacks were made by carrier borne aircraft on the Central Force throughout the day and when the Japanese reached Mindoro Strait an intensive attack on the battleship *Musashi*, 42,500 tons, one of the two largest vessels in the Japanese navy, resulted in her blowing up after repeated hits by bombs and aerial torpedoes. This was followed by the destruction of the heavy cruiser *Chokai*, 9,850 tons, with aerial torpedoes. The destroyer *Wakaba*, 1,368 tons, was sunk by bombing.

Despite these losses and heavy damage to the battleship *Yamato*, sister ship to the *Musashi*, the Japanese held their course and ran through the San Bernardino Strait and thence southward along the east coast of Samar. At daybreak on the 25th the force was again sighted, this time by aircraft from a group of escort carriers commanded by Rear-Admiral C. A. F. Sprague. This group, comprising six carriers, three destroyers and four destroyer escorts, retired at high speed from the heavier Japanese fleet and a running fight took place. Two other groups of escort carriers in the vicinity, as well as aircraft from the Third Fleet carriers, joined in the battle

and after two-and-a-half hours of desperate fighting the Japanese turned about for the San Bernardino Strait. This action resulted in heavy losses on both sides, the Americans losing the escort carrier *Gambier Bay*, 6,730 tons, the destroyers *Johnston*, 2,050 tons, and *Hoel*, 2,100 tons, and the destroyer escort *Samuel B. Roberts*, 1,275 tons, all sunk by gunfire. The Japanese lost the heavy cruisers *Chikuma* and *Suzuya*, both 14,000 tons.

In addition to these losses the Americans lost the light aircraft carrier *Princeton*, 11,000 tons, sunk by Japanese shore-based planes and the escort carrier *St. Lo*, 6,730 tons, sunk by enemy dive bombers from Samar.

On the 26th, aircraft from the American carriers continued their attacks on the retreating Japanese, inflicting much damage and sinking a disabled destroyer, the *Hayashimo*.

Meanwhile another engagement on a smaller scale was taking place in the Surigao Strait. Part of the Japanese Southern Force, consisting of two battleships, one heavy cruiser and four destroyers, had entered the strait in the early hours of the 25th. The American defence measures had been left in the hands of Rear-Admiral J. B. Oldendorf, who disposed his torpedo boats and destroyers on either side of the strait and sealed it at the further end with his heavy units. The Japanese steaming in column through the darkness fell into his trap and were completely taken by surprise. The battleships *Yamashiro* and *Fuso*, both of 29,330 tons were sunk before they could make any effective reply. Three destroyers, the *Asagumo*, *Michishio* and *Yamagumo*, all of 1,500 tons, were also sunk by gunfire. The heavy cruiser *Mogami*, 14,000 tons, and one destroyer escaped, but the cruiser was sighted in a disabled condition on the following day and was sunk by bombs from aircraft of the U.S. Seventh Fleet carriers.

The American loss was trivial by comparison, the destroyer *Albert W. Grant* receiving severe damage by gunfire.

The third and last action of the series took place some time after the other two had begun. On the afternoon of the 24th aircraft sent out from Admiral Halsey's Third Fleet located the Northern Force about 200 miles off Cape Engafio, on the N.E. tip of Luzon Island steaming southward. During the night of the 24th the Americans effected a concentration of their large and fast aircraft carriers and before daybreak on the 25th commenced to bomb this fleet which consisted of two battleships, four aircraft carriers, five cruisers and six destroyers. Both Japanese battleships suffered considerable damage and all their aircraft carriers, the *Zuikaku*, 29,800 tons, *Zuiho*, 12,000 tons, *Chitose* and *Chiyoda*, both of 9,000 tons, were sunk as well as the light cruiser *Tama*, 5,100 tons, and one destroyer.

The magnitude of the Japanese defeat may be realised by the following summary of losses:—

three battleships; four aircraft carriers; six heavy cruisers; four light cruisers; nine destroyers.

The American losses were as follows:—

three aircraft carriers; three destroyers.

With regard to the aerial fighting, which constituted a most important part of the battle, the Japanese aircraft based on the Philippines failed to afford even moderate protection to their ships, and proved no match for the American carrier borne planes. The sum total of their losses in aircraft was 150 against 105 from all American carriers engaged in the action.

MUSASHI MARU

Nippon Yusen Kaisha; 1889; Lobnitz & Co.; 2,639 tons; 300'5x40-1x25-5; 290n.h.p.; triple-expansion engines. The Japanese mail steamship *Musashi Maru* was lost in the great gale which raged off the south coast of Japan on September 18th, 1890. Only one of her crew survived. The Turkish frigate *Ertogrul* -(which see) was lost in the same storm, together with many smaller vessels.

MUSKOGEE

C. D. Mallory & Co.; 1913; F. Schichau; 7,034 tons; 45 Ix 58x31-3; 344 n.h.p.; triple-expansion engines. The American ship *Muskogee* left Caripito on March 13th, 1942, for Halifax and was not seen again. She was believed to have been sunk by enemy action on March 16th or 17th in approximately 20°N., 60°W.

MUTLAH

Occidens Soc. Anon.; 1907; C. Connell & Co.; 3,641 tons; 349-8x44-1 x 19-5; 426 n.h.p.; triple-expansion engines. The Italian ship *Mutlah* left Cagliari on December 27th, 1923, and was reported to be in distress on December 29th. She was not seen again.

MUTSU

Japanese Navy, dreadnought battleship; 1921; Yokosuka; 32,720 tons; 700 x 95 x 30; 80,000 s.h.p.; 23 knots; turbine engines; Kanpon boilers; eight 16 in. guns, 20 5-5 in., eight Sin. A.A., 7m.g., 6 T.T., 3 aircraft.

The battleship *Mutsu* was destroyed by internal explosion on June 8th, 1943, while lying in Hiroshima Bay, in the Inland Sea. Her official complement was 1,332, but was probably less than this at the time of the disaster, the details of which were never permitted to become public.

MUTSUYO MARU

Toyo Risen K.K.; 2,726 tons,

The Japanese steamship *Mutsuyo Maru* was sunk by U.S. carrier-based aircraft on June 12th, 1944, off Tenian Island, Ladrone Islands.

MUZIO ATTENDOLO

Italian Navy, cruiser; 1934; Cant. Riuniti delV Adriatico; 6,941 tons; 587-7x54-5x14-7; 106,000 s.h.p.; 37 knots; turbine engines; 3-drum boilers; eight 6 in. guns, six 3-9 in., eight 37 mm., eight 13 mm.; 4 T.T.; 3 aircraft. On the night of December 4th, 1942, a force of U.S. bombers attacked Naples and caused great havoc among shipping. A battleship and two cruisers lying in the harbour were hit, and one of the latter, the *Muzio Attendolo*, afterwards capsized at her anchorage and became a total loss. It is not known what proportion of the vessel's complement was on board at the time, nor the number who became casualties.

MYLIE

Haichow S.S. Co.; 1919; Nicolas Tsu; 2,180 tons; 250-3 x 40-3x24; 162 n.h.p.; triple-expansion engines. The British cargo ship *My lie* foundered in the Yellow Sea during a typhoon on August 23rd, 1923, while on a voyage from Ching-wantao to Shanghai carrying a cargo of coal. All on board were lost.

MYOGI MARU

Nippon Yusen K.K.; 1939; Mitsubishi Jukogyo K.K.; 4,020 tons; 362-8x50x29; 600 n.h.p.; turbine engines. The steamship *Myogi Mam* was sunk by U.S. carrier-based aircraft on November 13th, 1944, in Manila Bay.

MYOHO MARU

Toa Kaiun K.K.; 1939; Harima S.B. & Eng. Co.; 4,122 tons; 364 x 50 x 29; 600 n.h.p.; turbine engines. The steamship *Myoho Maru* was torpedoed and sunk by the U.S. submarine *Swordfish* on January 19th, 1943, off the east coast of Bougainville.

MYOKEN MARU

Toa Kaiun K.K.; 1938; Harima S.B. & Eng. Co.; 4,124 tons; 360x50x29; 600 n.h.p.; turbine engines. The steamship *Myoken Maru* was torpedoed and sunk by the U.S. submarine *Swordfish* on January 24th, 1942, in the Celebes.

MYOKO MARU

Toa Kaiun K.K.; 1939; Mitsubishi Jukogyo K.K.; 4,103 tons; 364x50x29; 600 n.h.p.; turbine engines. The steamship *Myoko Maru* was bombed and sunk by U.S. land-based aircraft on January 8th, 1943, off Buna, New Guinea.

MYOKO MARU

Hay a Shosen K.K.; 1937; Tama Zosensho; 5,087 tons; 422-4 x 58-1x27-2; 855 n.h.p.; oil engines. The motorship *Myoko Maru* was torpedoed and sunk by the U.S. submarine *Drum* on June 17th, 1943, N.E. of the Admiralty Islands.

MYOSEI MARU

Meiji Kaiun K.K.; 6,886 tons. The steamship *Myosei Maru* struck a mine and sank on June 1st, 1945, off Shimonoseki.

MYRDAL

Fearnley & Eger; 1890; Tyne Iron S.B. Co.; 2,631 tons; 300x 41x19-6; 257 n.h.p.; triple-expansion engines. The Norwegian steamship *Myrdal* was sunk by a German submarine in the Bay of Biscay on January 25th, 1917.

MYRMIDON

British Navy, destroyer; 1900; Palmers'Co.; 370 tons; 6,300 i.h.p.; 30 knots; turbine engines; one 12pdr. gun, five 6pdr; 2 T.T. The destroyer *Myrmidon* struck a mine and sank in the English Channel on March 26th, 1917. Her official complement was 60.

MYRTLE

British Navy, sloop; 1915; Lobnitz & Co.; 1,250 tons; 267-7x 33-5x11-7; 2,400 i.h.p.; 17 knots; triple-expansion engines; two 4 • 7 in. guns, two 3 pdr.

The sloop *Myrtle* was mined and sunk in the Gulf of Finland on July 16th, 1919, when in company with the sloop *Gentian* which also struck a mine and sank. The vessels were operating against the Russian Bolshevik forces at the time. Each had an official complement of 93.

MYRTLE BRANCH

Nautilus S.S. Co.; 1899; J. L. Thompson & Sons; 3,741 tons; 381 x 45 - 9 x 25 • 6; 336 n.h.p.; triple-expansion engines. The British ship *Myrtle Branch* was torpedoed and sunk by a German submarine on April 11th, 1918, nine miles N.E. by N. of Inishtrahull. The captain and 14 of the crew were killed.

MYRTLEDENE

Northumbrian Shipping Corp.; 1890; Palmers Co.; 2,571 tons; 312 -5x40-4x24-6; 253 n.h.p.; triple-expansion engines.* The British cargo ship *Myrtledene* was wrecked near Portland Bill on March 25th, 1912, while carrying an ore cargo from Sagunto to Rotterdam.

MYRTLEGROVE

Alexander & Mair; 1884; J. Readhead & Sons; 2,642 tons; 303 x 41 • 6 X19 • 1; 252 n.h.p.; triple-expansion engines. The British steamship *Myrtlegrove* was sunk in a collision ten miles S.W. by W. of the Needles on November 23rd, 1917.

N. C. MONBERG

N. C. MONBERG

Ministry of Shipping (Richley, Halvorsen & Sample); 1928; Burmeister & Wain; 2,301 tons; 275-8x41-3x19; 175 n.h.p.; triple-expansion engines.

The steamship *N. C. Monberg*, on a voyage from the Tyne to London with coal, was torpedoed and sunk by a German motor torpedo boat on December 15th, 1940. Eight of her crew and one gunner were lost.

N. HADZIKYRIAKOS

G. Hadzikiyakos; 1904; A. McMillan & Son; 3,533 tons; 335 x 49 • 7X24 • 2; 332 n.h.p.; triple-expansion engines. The Greek steamship *A.T. Hadzikiyakos* was torpedoed and sunk by a German submarine in the Atlantic on May 31st, 1917.

N. T. NIELSEN-ALONSO

Hvalfangerselsk. Polaris A/S; 1900; C. Cornell & Co.; 9,348 tons; 481-7x57-2x31-9; 690 n.h.p.; triple-expansion engines. The Norwegian whale oil refinery *N. T. Nielsen-Alonso* was torpedoed and sunk by a German submarine on February 22nd, 1943, on a voyage from Glasgow to New York.

N. VERBERCKMOES

Cie. des Bateaux a Vapeur du Nord; 1890; J. Readhead & Sons; 1,353 tons; 250 x 33x23-9; 189 n.h.p.; triple-expansion engines. The French steamship *N. Verberckmoes* was torpedoed and sunk by a German submarine in the Bristol Channel on August 14th, 1917.

N. W. BLETHEN

Dennis & Doane; 1874; Beaver River, N.S.; 1,092 tons. The sailing ship *N. W. Blethen*, Capt. J. F. Cox, left Baltimore for London on July 25th, 1876, with a cargo of com. She carried a crew of 18, in addition to whom were the captain's wife and two children. On the 31st, when six days out, the vessel ran into heavy weather. Her sails were blown away and she lay helpless to the seas. The captain was washed overboard just before she capsized.

The *N. W. Blethen* went down with the loss of 17 persons, including the captain's wife and children. The second mate, two seamen and the ship's boy drifted about on pieces of wreckage for 56 hours, when they were picked up by the barque *C. E. Jaynes*, Capt. Osborne, of New York.

NACHI

Japanese Navy, heavy cruiser; 1927; Kure; 10,000 tons; 640 X 62-5x16-5; 100,000 s.h.p.; 33 knots; turbine engines; Kanpon boilers; ten 8 in. guns, eight 4-7 in., eight 47 mm.A.A., 2 m.g., 8 T.T., 4 aircraft.

The heavy cruiser *Nachi* was torpedoed by aircraft of the U.S. Third Fleet on November 5th, 1944, while lying in Manila Bay, and sank shortly afterwards. Her normal complement was 692.

NACHISAN MARU

MitsuiBussan Kaisha; 1931; MitsuiBussan Kaisha; 4,433 tons; 339-5x49x30; 362 n.h.p.; oilengines.

The motorship *Nachisan (Natsan) Maru* was torpedoed and sunk by the U.S. submarine *Trigger* on November 13th, 1943, about 100 miles W. of Cheju Do Island, Korea.

NADEJDA

F. C. Svorono & E. Di Pollone; 1896; Tyne Iron S.B. Co.; 3,849 tons; 350 X 47 X 17-2; 357 n.h.p.; triple-expansion engines. The Russian steamship *Nadejda* was torpedoed and sunk by a German submarine in the Irish Channel on January 2nd, 1918.

NAECO

Pennsylvania Shipping Co.; 1918; Bethlehem Shipbuilding Corp.; 5,373 tons; 411-6x53-4x31-2; 2,600 i.h.p.; 9 knots; triple-expansion engines.

The American tanker *Naeco*, Capt. E. H. Engelbrecht, was torpedoed and sunk by a German submarine off Morehead City, North Carolina, on March 23rd, 1942. Twenty-four men, including Capt. Engelbrecht, were killed and three wounded. The vessel was not in convoy.

NAESBORG

Dampsk. Selsk. Neptun; 1907; Helsingors Jernsk. & Maskinbyggeri; 1,547 tons; 237-9x36-7x14-2; 148 n.h.p.; triple-expansion engines.

The Danish steamship *Ncesborg* was sunk by a German submarine in the English Channel on January 4th, 1917.

NAGANAMI

Japanese Navy, destroyer; 1942; Japan; 2,200 tons; 415 x 35 X—; 34 knots; turbine engines; six 5 in. guns, eight 25 mm.A.A., 15 T.T.

The Japanese destroyer *Naganami* with others was escorting a convoy of four troopships bound for Leyte, Philippine Islands, on November 11th, 1944. When in Ormoc Bay the ships were attacked by aircraft from carriers of the U.S. Third Fleet, and four destroyers as well as the four transports were sent to the bottom.

The *Naganami* carried a complement of over 200.

For details of the action see the destroyer *Hamanami*.

NAGANOMARU

Nippon Yusen K.K.; 1917; Mitsubishi Dockyard & Engineering Works; 3,824 tons; 345x50x29; 342 n.h.p.; triple-expansion engines.

The steamship *Nagano Maru* was sunk by U.S. carrier-based aircraft on February 17th, 1944, in the Caroline Islands.

NAGARA

Japanese Navy, light cruiser; 1921; Sasebo; 5,170 tons; 535 x 46-8x15-9; 70,000 s.h.p.; 33 knots; turbine engines; Kanpon boilers; seven 5-5 in. guns, two 3 in.A.A., 2 m.g., 8 T.T., 1 aircraft. The light cruiser *Nagara* was torpedoed and sunk by the U.S. submarine *Croaker W.* of Kyushu on August 7th, 1944. Her normal complement was 438.

NAGARAMARU

Nippon Yusen K.K.; 1934; Yokohama Dock Co.; 7,148 tons; 449-6x62-3x34-4; 1,851 n.h.p.; oilengines. The motorship *Nagara Maru* was sunk by U.S. land and carrier-based aircraft on November 14th, 1942, in the Solomon Islands.

NAGASAKIMARU

ToaKaiun K.K.; 1922; W. Denny & Bros.; 5,268 tons; 395 x 54-2x29; 1,852 n.h.p.; turbine engines.

The steamship *Nagasaki Maru* struck a mine and sank on May 13th, 1942, off Nagasaki. She was serving as a transport at the time.

NAGATAMARU

Japanese Government; 1936; Mitsubishi Jukogyo K.K.; 2,969 tons; 305-4x45-3x26-2; 214 n.h.p.; triple-expansion engines. The steamship *Nagata Maru* was taken over by the Japanese Navy for use as a gunboat. On April 22nd, 1944, she was attacked by U.S. land-based aircraft and sunk 60 miles E. of Cap St. Jacques, Indo-China.

NAGATOMARU

Nippon Yusen K.K.; 1918; Kawasaki Dockyard Co.; 5,901 tons; 385 x 51 x 36; 444 n.h.p.; triple-expansion engines. The steamship *Nagato Maru* was bombed and sunk by U.S. land-based aircraft on September 2nd, 1943, off the Schouten Islands, New Guinea.

NAGATSUKI

Japanese Navy, destroyer; 1926; Ishikawajima; 1,315 tons; 320x30x9-9; 38,500 s.h.p.; 34 knots; turbine engines; Kanpon boilers; four 4-7 in. guns, 2 A.A.m.g., 6 T.T. The destroyer *Nagatsuki* was a unit of a squadron of cruisers and destroyers which met a similar force in a night action in the Kula Gulf, Solomon Islands, on July 6th, 1943. The fighting was very determined, the Americans losing the cruiser *Helena*, 10,000 tons, by torpedoes, and the Japanese losing the destroyers *Nagatsuki* and *Niizuki* by gunfire, as well as several ships damaged.

The full story of the action, which was known as the battle of Kula Gulf, is told under the U.S. cruiser *Helena*. For the second battle, also a night action fought a week later, see the Japanese cruiser *Jintsu*.

NAGISAN MARU

MitsuiBussan Kaisha; 1931; MitsuiBussan Kaisha; 4,391 tons; 361-5 x50 x29; 361 n.h.p.; oil engines.
On March 30th, 1944, the motorship *Nagisan Maru* was attacked by U.S. carrier-based aircraft and sunk off Babelthuap, Palau Islands.

NAGOYA MARU

NanyoKaiun K.K.; 1932; Mitsubishi Zosen Kaisha; 6,072 tons; 406-8x55-5x32-5; 691 n.h.p.; triple-expansion engines. The aircraft transporter *Nagoya Maru* was torpedoed and sunk by the U.S. submarine *Herring* on January 1st, 1944, 200 miles S. of Shizuoka, Japan.

NAGPORE

Peninsular & Oriental Steam Navigation Co.; 1920; Earle's Co.; 5,283 tons; 400-4x52-2x28-5; 3,000 i.h.p.; 11-5 knots; triple-expansion engines.
The cargo liner *Nagpore*, Capt. P. E. Tonkin, was torpedoed and sunk by a German submarine on October 28th, 1942, 200 miles N.W. of the Canary Islands, when homeward bound from Free-town in convoy. Capt. Tonkin and 18 men were killed.

NAIAD

British Navy, light cruiser; 1939; Hawthorn Leslie; 5^450 tons; 506x51x14; 62,000 s.h.p.; 33 knots; turbine engines; 3-drum boilers; ten 5-25 in. guns, 16 smaller; 6T.T., 1 aircraft. The cruiser *Naiad*, Capt. C. Grantham, D.S.O., flagship of Rear-Admiral P. Vian, commanding the 15th Cruiser Squadron, was torpedoed and sunk by a German submarine in the Eastern Mediterranean on March 11th, 1942. Two officers and 75 ratings were killed and 1 officer wounded.

NAILSEA COURT

Banham S.S. Co.; 1936; Bartram & Sons; 4,946 tons; 420-3x56x25^4; 255 n.h.p.; 11 knots; triple-expansion engines & L.P. turbine.
The steamship *Nailsea Court*, Capt. R. J. Lee, was torpedoed and sunk by a German submarine about 300 miles N.W. of Rockall on March 10th, 1943. Capt. Lee and 43 men were killed.

NAILSEA LASS

Nailsea S.S. Co.; 1917; J. Readhead & Sons; 4,289 tons; 370-3x50-4x25-8; 484 n.h.p.; triple-expansion engines. The British steamship *Nailsea Lass*, on a voyage from Calcutta to London, was torpedoed and sunk by a German submarine on February 24th, 1941, 60 miles W. of the Fastnet. Five of the crew died in the boats, the captain and first officer were taken aboard the submarine.

NAIRUNG

Asiatic S.N. Co.; 1942; Lithgows; 5,414 tons; 409-5x54x28-7; 524 n.h.p.; triple-expansion engines.
The British cargo ship *Nairung* left Durban on August 13th, 1944, on a voyage to Bombay, via Dar-es-Salaam. She was carrying government stores and a general cargo, and had a crew of 83 and eight gunners. She was torpedoed and sunk by the German submarine *U-862* off the coast of Madagascar with the loss of all hands.

NAJADE

S.Marcussen; 1888; J. C. Tecklenborg; 1,773 tons; 255-6 x39-4x23.
The Norwegian sailing ship *Najade* was sunk by a German submarine in the North Sea on March 21st, 1917.

NAKA

Japanese Navy, light cruiser; 1925; Yokohama Dock Co.; 5,195 tons; 535x46x15-9; 700,00s.h.p.; 33 knots; turbine engines; Kanpon boilers; seven 5-5 in. guns, two 3 in.A.A., 6 m.g., 8T.T., 1 aircraft.
The light cruiser *Naka* was engaged in the defence of the island of Truk in the Carolines Group when a U.S. force under Vice-Admiral R. A. Spruance delivered an attack on it in mid-February, 1944. The *Naka* was attacked on the 17th by aircraft from the U.S.

carriers *Bunker Hill* and *Cowpens* and sustained several hits from bombs and aerial torpedoes. She sank shortly afterwards.

The normal complement of the *Naka* was 450.
For further details see the light cruiser *Agano*.

NAKAGAWA MARU

ToyoKaiun K.K.; 6,886 tons.
The steamship *Nakagawa Maru*, serving as a transport, was bombed and sunk by U.S. land-based aircraft on May 6th, 1945, in the Korea Strait.

NAKO MARU

Nippon Yusen K.K.; 1934; Uruga Dock Co.; 7,145 tons; 449-7x62-3x34-4; 1,851 n.h.p.; oil engines. The motorship *Nako Maru* was sunk by U.S. land and carrier-based aircraft on November 14th, 1942, in the Solomon Islands.

NAM YONG

Heap Eng. Moh S.S. Co.; 1875; Sir Raylton Dixon & Co.; 1,512 tons; 255-5x32-2x23-9; 187 n.h.p.; triple-expansion engines.
The British cargo ship *Nam Yong* was wrecked off the Brenti Light, near Pulau Sambo, on February 12th, 1915. She was on a voyage from Singapore to Batavia carrying a general cargo.

NAM YONG

Heap Eng. Moh S.S. Co.; 1917; Gebroeder Jonker; 1,345 tons; 240X36-2X16-7; 127 n.h.p.; triple-expansion engines. The British steamship *Nam Yong*, on a voyage from Batavia to Fremantle, was torpedoed and sunk by a Japanese submarine on February 28th, 1942, about 800 miles S. of Tjilatjap, Java. The captain and four other survivors were taken prisoner.

NAMBA MARU

2,500 tons (approx.)
The steamship *Namba Maru* struck a mine and sank on September 1st, 1944, off Hangchow.

NAMCHOW

Chuah yu Pung; 1870; Wigham, Richardson & Co.; 1,712 tons; 268-5x36-3x23-8; ISO h.p.; compound engines. The Chinese steamship *Namchow* broke her propeller shaft and foundered off Cupchi Point, China, prior to January 11th, 1892. The steamship was crowded with passengers, and it was not possible to accommodate more than a small number in the boats. Four hundred and fourteen lives were lost, including all the Europeans in the crew.

NAMDO

Rederi A/B Rex; 1907; Ropner & Son; 2,860 tons; 317x46x20-9; 247 n.h.p.; triple-expansion engines. The Swedish steamship *Namdo* struck a mine and sank on August 12th, 1944, off the mouth of the River Elbe.

NAMINOUE MARU

Osaka Shosen K.K.; 1936; Mitsui Bussan Kaisha; 4,731 tons; 351-1x51-5x32; 750 n.h.p.; oil engines.
The motorship *Naminoue Maru* was taken over by the Japanese Navy for use as a transport. On October 7th, 1942, she was torpedoed and sunk by the U.S. submarine *Sculpin* off Rabaul.

NAMOA

Douglas S.S. Co.; 1872; Hall, Russell & Co.; 1,375 tons; 239x31-1x17-3; 154 n.h.p.; compound engines. The British steamship *Namoa* was wrecked near Brown Rocks, at the northern entrance to the Haitan Straits, China, on October 3rd, 1897. She was on a voyage from Amoy to Foochow carrying passengers and a general cargo.

NAMPO MARU

Awano Kuni Kyodo Risen K.K.; 1940; Tama S.B. Co.; 1,206 tons; 219-8x33-5x18-5; 150 n.h.p.; triple-expansion engines. The steamship *Nampo Mam* was taken over by the Japanese Navy for service as an auxiliary gunboat. On June 15th, 1942, she was torpedoed and sunk by the U.S. submarine *Seawolf* about 100 miles W. of Manila.

NAMPO MARU

NAMPO MARU

Iino Kaiun K.K.; 10,033 tons.

The tanker *Nampo Maru* was torpedoed and sunk by the U.S. submarine *Gray back* on February 24th, 1944, off the south east coast of Formosa.

NANA MARU

Osaka Shosen K.K.; 1940; *Harima S.B.&Eng. Co.*; 6,764 tons; 438-8x58-6x32-8; 982 n.h.p.; oil engines. The motorship *Nana Maru* was bombed and sunk by Dutch aircraft on January 24th, 1942, S. of Gorontalo, Celebes.

NANCY

Damps. Akt. Skagerak; 1888; *S. P. Austin & Son*; 1,311 tons; 232 x 35 -1 x 15; 147 n.h.p.; triple-expansion engines. The Danish steamship *Nancy* was torpedoed and sunk by a German submarine in the North Sea on April 9th, 1917.

NANCY MOLLER

MollerLine; 1907; *J. Priestman & Co.*; 3,916 tons; 343-5x49x24-3; 292 n.h.p.; triple-expansion engines. The British steamship *Nancy Moller*, on a voyage from Durban to Colombo, was torpedoed and sunk by a Japanese submarine on March 18th, 1944, about 250 miles S. of Ceylon. Thirty of her crew and two gunners were lost, one gunner being taken aboard the submarine.

NANEI MARU

Japanese Government; 1920; *American International S.B. Corp.*; 5,019 tons; 390x54-2x27-8; turbine engines. The tanker *Nanei Maru* was formerly the Philippine *Manatawny*, bombed and sunk by the Japanese at Manila on December 13th, 1941, and afterwards raised and repaired. She was torpedoed and sunk by the U.S. submarine *Jack* on February 19th, 1944, about 150 miles S.E. of the Paracel Islands, South China Sea.

NANIWA MARU

Tanaka Kozan Kabushiki Kaisha; 1876; *Cole Bros.*; 1,674 tons; 265 X 34x24-4; 142 n.h.p.; compound engines. On a voyage from Muroran to Kamaishi, the *Naniwa Maru* went aground and sank on July 8th, 1922, at Shikotsisaki, near Kamaishi.

NANIWA MARU

Taihei Risen K.K.; 1937; *Osaka Iron Works*; 4,858 tons; 369'8x54-1x29-2; 379 n.h.p.; triple-expansion engines. The steamship *Naniwa Maru* was torpedoed and sunk by the U.S. submarine *Gudgeon* on August 3rd, 1942, in the Caroline Islands.

NANKA MARU

Kotani Mokunosuke; 1906; *A. McMillan & Son*; 4,065 tons; 360-8x50x16-9; 314 n.h.p.; triple-expansion engines. The steamship *Nanka Maru* was torpedoed and sunk by the U.S. submarine *Hake* on February 1st, 1944, off Cape Gamtjake, Moluccas.

NANKAI MARU

Osaka Shosen K.K.; 1933; *Mitsubishi Zosen Kaisha*; 8,416 tons; 446-8x60-5x40-7; 1,678 n.h.p.; oilengines. The motor vessel *Nankai Maru* was torpedoed and sunk by the U.S. submarine *Sealion II* on September 12th, 1944, about 100 miles N.E. of the Paracel Islands, South China Sea.

NANKAIMARU

NankaiKisen K.K.; 1956; 494 tons; oilengines. The motor ferry *Nankai Maru* sank during a storm on January 26th, 1958, in Kii Strait between Shikoku Island and Wakayama. She was carrying 166 passengers and crew, and there were no survivors. She was refloated in the following March and went back into service as the *Naruto Maru*.

NANKAI MARU No. 1

Toyo Sangyo K.K.; 1938; *Ohara Zosen Tekkosho K.K.*; 1,163 tons; 216-5x34x18-5; 89 n.h.p.; triple-expansion engines. The steamship *Nankai Maru No. 1* was sunk by U.S. carrier-based aircraft on October 10th, 1944, off the Ryukyu Islands.

NANKAI MARU No. 2

Toyo Sangyo K.K.; 1940; *Osaka Zosensho*; 1,960 tons; 271-7x40x20-3; triple-expansion engines.

The steamship *Nankai Maru No. 2* was bombed and sunk by U.S. land-based aircraft on December 23rd, 1943, in the Marshall Islands.

NANKING MARU

Kita Nippon Kisen K.K.; 1914; *Osaka Iron Works*; 3,005 tons; 305-3x42-2x24-8; 288 n.h.p.; triple-expansion engines. The steamship *Nanking Maru* was torpedoed and sunk by the U.S. submarine *Spot* on March 17th, 1945, about 100 miles W. of Keelung, Formosa.

NANMAN MARU

Yamashita Kisen K.K.; 1921; *Kawasaki Dockyard Co.*; 6,550 tons; 405x53x37; 578 n.p.h.; triple-expansion engines. The steamship *Nanman Maru* was torpedoed and sunk by the U.S. submarine *Flying Fish* on October 27th, 1943, midway between Guam and the Philippines.

NANN SMITH

E. B. Aaby; 1907; *Newport News S.B. & D.D. Co.*; 2,093 tons; 277x43x17-3; 171 n.h.p.; triple-expansion engines. The Norwegian steamship *Nann Smith* struck a mine and sank off Ushant on May 22nd, 1917.

NANNA

A. Schjelderup; 1900; *Trondhjems Mek. Vcerksted*; 1,125 tons; 231 -4x34-4x13-6; 106 n.h.p.; triple-expansion engines. The Norwegian steamship *Nanna* was torpedoed and sunk by a German submarine in the English Channel on October 4th, 1918.

NANNIN MARU

Japanese Government; 1923; *Taikoo Dockyard & Eng. Co.*; 2,486 tons; 295-8x44-2x19-6; 138 n.h.p.; triple-expansion engines.

The steamship *Nannin Maru* was formerly the British *Naming*, seized by the Japanese. She struck a mine and sank on July 16th, 1945, off Yawata, Japan.

NANREIMARU

Toa Kaiun K.K.; 1924; *Yokohama Dock Co.*; 2,407 tons; 274-5x41-5x22-8; 240 n.h.p.; triple-expansion engines. The steamship *Nanrei Maru*, serving as a transport, was torpedoed and sunk by the U.S. submarine *Angler* on October 14th, 1944, 45 miles S. of Mindoro Island.

NANSEI MARU

Japanese Government; 1922; *Hongkong & Whampoa Dock Co.*; 5,878 tons; 412x53-3x33; 517 n.h.p.; triple-expansion engines. The tanker *Nansei Maru* was formerly the British *Plelodon*, seized by the Japanese. She was torpedoed and sunk by the U.S. submarine *Ray* on August 18th, 1944, off the south-west coast of Palawan Island, Philippines.

NANSEI MARU

2,218 tons.
The steamship *Nansei Maru* was sunk by U.S. carrier-based aircraft on September 21st, 1944, off Bataan, Philippines.

NANSHIN MARU

Japanese Government; 1930; *Kiousin S.B. & E. Works*; 1,422 tons; 218-8x33-5x10-5; 164 n.h.p.; oilengines. The motor vessel *Nanshin Maru* was formerly the Chinese *Yung An*, seized by the Japanese. She was torpedoed and sunk by the U.S. submarine *Bluefish* on June 16th, 1944, in the Straits of Macassar.

NANTAISE

F. Bouet; 1925; *Atel. & Ch. de la Loire*; 1,969 tons; 277x40-7x17-3; 205 n.h.p.; triple-expansion engines. Carrying coal from Rotterdam to Brest, the French ship *Nantaise* was wrecked on August 27th, 1925, on Pierres Vertes, near Ushant.

NANTAISE

Societe Navale Caennaise; 1920; *S. P. Austin & Son*; 1,798 tons; 260 x 37 - 5 x 17 - 5; 201 n.h.p.; triple-expansion engines. The French steamship *Nantaise*, flying the German flag, was torpedoed and sunk by a British submarine on August 7th, 1943, outside the Dardanelles.

NANTES

Cunard Steamship Co.; 1873; *Blackwood & Gordon*; 1,473 tons; 238'3x32-2x26-5; 160 h.p.; compound engines. The British steamship *Nantes* sank after a collision with the German sailing ship *Theodor Ruger* 40 miles E.S.E. of the Lizard on November 6th, 1888, while on a voyage from Liverpool to Havre carrying a coal and general cargo.

Three of the crew jumped aboard the sailing ship, two of these landed at Havre with 14 survivors of the sailing ship which sank soon after the collision.

Most of the boats of the *Nantes* were smashed by the collision, the remaining boat was smashed while being lowered.

The *Nantes* sank suddenly at 10 a.m. on the following day with the loss of all on board save one man, picked up some hours later clinging to floating wreckage.

NANYO MARU

Japanese Government; 1923; *Osaka Iron Works*; 3,610 tons; 344-6x44x30-3; 276 n.h.p.; triple-expansion engines. The steamship *Nanyo Maru* was torpedoed and sunk by the U.S. submarine *Pogy* on February 20th, 1944, about 100 miles E. of Formosa.

NANYOMARU

Okada Shosen K.K.; 2,218 tons. The steamship *Nanyo Maru* was sunk by U.S. carrier-based aircraft on October 10th, 1944, off the Ryukyu Islands.

NAPIERSTAR

Blue Star Line; 1927; *Lithgows*; 10,116 tons; 513-3x67-3x36-6; 1,582 n.h.p.; 15 knots; turbine engines. The steamship *Napier Star*, Capt. W. Walsh, was torpedoed and sunk by a German submarine about 500 miles S.S.W. of the Vestmann Islands on December 18th, 1940. Twelve passengers and 59 crew, including Capt. Walsh, were killed.

NAPLES MARU

Kokusai Kisen K.K.; 1919; *Kawasaki Dockyard Co.*; 5,824 tons; 385 X 51 X 36; 437 n.h.p.; triple-expansion engines. The steamship *Naples Maru* was bombed and sunk by U.S. land-based aircraft on November 20th, 1943, off New Ireland.

NAPOLI

Achille Lauro; 1940; 6,142 tons; oil engines. The Italian motorship *Napoli* was torpedoed and sunk by a British submarine on February 3rd, 1942, about three and a half miles from Mehedia, Tunisia.

NARANCO

Naviera Anjel Alvarez S.A.; 1920; *Astilleros de Gijon*; 984 tons; 212-8x30-3x —; triple-expansion engines. On a voyage from Aviles to Rotterdam the Spanish ship *Naranco* was in collision during a fog with the *Goldstone* on August 23rd, 1959, and sank six miles from Dungeness. Twenty survivors were picked up.

NARBROUGH

British Navy, destroyer; 1916; *J. Brown & Co.*; 1,010 tons; 271-5x26'7x10-2; 25,000 s.h.p.; 34 knots; turbine engines; Yarrow boilers; three 4 in. guns, 2 smaller, 4 T.T. The destroyers *Narbrough* and *Opal* were in company off Scapa Flow on January 12th, 1918, when both were wrecked in a violent gale and snowstorm. The vessels, which were sister ships, each carried an official complement of 80.

NARDANA

British India Steam Navigation Co.; 1919; *Barclay Curie & Co.*; 7,974 tons; 449-5x58-2x37-1; 1,356 n.h.p.; 14 knots; triple-expansion engines & L.P. turbines. The steamship *Nardana*, Capt. C. E. White, was in a convoy of 52

ships escorted by H.M. battleship *Malaya* and two destroyers. At 2.50 a.m. on March 8th, 1941, about 400 miles W. of Cape Blanco, Mauritania, she was torpedoed and sunk by a German submarine. Three officers and 16 Indian ratings were killed. Capt. White was among the survivors.

NARITAMARU

Naigai Kisen K.K.; 1,915 tons. The steamship *Narita Maru* was bombed and sunk by U.S. land-based aircraft on April 12th, 1944, near Hollandia, New Guinea.

NARKUNDA

Peninsular & Oriental Steam Navigation Co.; 1920; *Harland & Wolff*; 16,632 tons; 581-4x69-4x44-5; 15,300 i.h.p.; 17-5 knots; quadruple-expansion engines. The liner *Narkunda*, Capt. L. Parfitt, D.S.C., was serving as an auxiliary transport during the Allied landings in French North Africa in November, 1942. She disembarked her troops at Bougie and had turned about for home when, toward evening on the 14th, she was bombed and sunk some distance off Bougie. Thirty-one persons were killed. Capt. Parfitt was among the survivors.

NARONIC

White Star Line; 1892; *Harland & Wolff*; 6,594 tons; 470x 53-1x31-6; 3,700 i.h.p.; 12-5 knots; triple-expansion engines. The cargo liner *Naronic*, Capt. W. Roberts, left Liverpool for New York on February 11th, 1893. From that date nothing was heard of her until March 3rd when a bottle containing a message was picked up on the shore of Bay Ridge, an inlet of New York Bay.

This message was as follows:—

"NARONIC is sinking with all hands ..." L.

Winsel.

Another message, picked up on the beach at Ocean View, Virginia, read:—

"February 19th, 1893. The ship is fast sinking ... we can never live in the small boats ... one boat has already sunk. The ship struck an iceberg in blinding snow ... she has floated for two hours, it is now 3.20 in the morning and the deck is level with the sea".

This letter was alleged to have been written by John Olsen, a cattleman on board the *Naronic*.

Further evidence of the sinking was provided by the steamship *Covenry* which reported on reaching port that at dawn one morning she had passed one of the *Naronic's* boats floating keel upwards, and on the following afternoon had passed another attached to a sea anchor of oars and spars, but empty.

NARRAGANSETT

Anglo-American Oil Co.; 1903; *Scott's Shipbuilding & Engineering Co.*; 9,196 tons; 512x63-4x32-6; 790 n.h.p.; 12 knots; triple-expansion engines.

The tanker *Narragansett* was torpedoed and sunk by a German submarine off S.W. Ireland on March 16th, 1917. The captain and 45 men were killed.

NARRAGANSETT

British Mexican Petroleum Co.; 1936; *Fried. Krupp Akt. Ges.*; 10,389 tons; 490-4x69-9x36-9; 912 n.h.p.; 11 knots; oil engines.

The tanker *Narragansett*, on a voyage from Port Arthur to Halifax with clean oil, was torpedoed and sunk by a German submarine on March 25th, 1942, about 400 miles E. of Hampton Roads. All her crew of 43 and six gunners were lost.

NARUO MARU

Taiyo Kisen K.K.; 4,823 tons. The steamship *Naruo Maru* was torpedoed and sunk by the U.S. submarine *Barb* on November 12th, 1944, about 200 miles E. of Shanghai.

NARUTO

Japanese Navy; 6,500 tons. The tanker *Naruto* was sunk by U.S. carrier-based aircraft on January 24th, 1944, off Rabaul, New Guinea.

NARUTO MARU

NARUTO MARU

Nippon Yusen K.K.; 1934; *Yokohama Dock Co.*; 7,149 tons; 449-7x62-3x34-4; 1,851 n.h.p.; oil engines. The aircraft transporter *Naruto Mam* was torpedoed and sunk by the U.S. submarine *Whale* on August 8th, 1943, 100 miles S. of Iwojima Island.

NARUTO MARU

Osaka Syosen K.K.; 1900; *S. C. Farnham & Co.*; 1,288 tons; 238x30x12-8; 82 n.h.p.; triple-expansion engines. The Japanese steamship *Naruto Mam* sank during a storm at Osaka on September 18th, 1945.

NARVA

Scottish Navigation Co.; 1937; *Burnt Island S.B. Co.*; 1,575 tons; 265x40-5x16-3; 111 n.h.p.; triple-expansion engines. The British steamship *Narva*, on a voyage from Naples to Alexandria with military stores, was sunk by an explosion on January 15th, 1945, about 100 miles off the north-west coast of Libya. Sixteen of her crew of 27 were killed.

NARVA

Scottish Navigation Co.; 1943; *Nya A/B Gayle Varv & Verks.*; 2,044 tons; 266-5x41-1x18-7; compound engines. The British cargo ship *Narva* sank during heavy weather in lat. 57° 28' N, long. 3° E., on December 22nd, 1957. She was on a voyage from Hudiksvall to Aberdeen and Grangemouth carrying a cargo of wood pulp. Her crew of 28 were lost.

NARVIK

Trafik A/B Grangesberg-Oxelosund; 1914; *J. L. Thompson & Sons*; 4,251 tons; 385x53-7x23-6; 509 n.h.p.; triple-expansion engines. The Swedish steamship *Narvik* was bombed and sunk by British aircraft on April 29th, 1943, near the Frisian Islands.

NARVIK

German Government; 1941; *Holland*; 5,822 tons. The steamship *Narvik* was built to the order of Dutch owners as *Stad Leiden*, taken over by the Germans on completion and renamed *Narvik*. On June 17th, 1943, she struck a mine and sank in the North Sea.

NASCENT

Westoll; 1915; *J. Priestman & Co.*; 4,969 tons; 350x50-9x24-5; 325 n.h.p.; 9-5 knots; triple-expansion engines. The steamer *Nascent* was torpedoed and sunk by a German submarine 27 miles S. of the Bishop Rock, Stilly Isles, on August 25th, 1917. Six men were killed. The captain was among the survivors.

NASE MARU

Osaka Shosen K.K.; 1917; *Osaka Iron Works*; 1,218 tons; 220x33-6x18-5; 79 n.h.p.; triple-expansion engines. The steamship *Nase Mam* was torpedoed and sunk by the U.S. submarine *Tirante* on March 28th, 1945, off Kagoshima, Japan.

NASHI

Japanese Navy, destroyer; 1919; *Kawasaki Co.*; 770 tons; 275x26x8; 17,500 s.h.p.; 31-5 knots; turbine engines; Kanpon boilers; three 4-7 in. guns, 2 m.g., 4 T.T. The Japanese destroyer *Nashi* was sunk at Kure by aircraft of the U.S. Third Fleet on July 28th, 1945. The vessel carried a complement of about 120.

NASTURTIUM

British Navy, sloop; 1915; *A. Macmillan & Sons*; 1,250 tons; 267-7x33-5x11-7; 2,000 i.h.p.; 16-5 knots; triple-expansion engines; cylindrical boilers; two 4-7 in. guns. The sloop *Nasturtium*, Lt. Cdr. Robin W. Lloyd, was engaged in mine-sweeping duties in the Central Mediterranean when she struck a mine and sank on April 27th, 1916. Seven ratings were killed.

NASUSAN MARU

Mitsui Bussan Kaisha; 1931; *Mitsui Bussan Kaisha*; 4,399 tons; 361-5x50x29; 362 n.h.p.; oil engines. The motor vessel *Nasusan Maru* was torpedoed and sunk by the U.S. submarine *Tang* on June 24th, 1944, about 100 miles W. of Kagoshima, Japan.

NATAL

British Navy, armoured cruiser; 1907; *Vickers*; 13,500 tons; 480x73-5x27-5; 23,500 i.h.p.; 23-1 knots; triple-expansion engines; Yarrow boilers; six 9-2 in. guns, four 7-3 in., 24 3 pdr., 4 m.g., 3 T.T.

The armoured cruiser *Natal*, Capt. E. P. C. Back, was a unit of the 2nd Cruiser Squadron during the First World War. The ship had an official complement of 704 officers and men.

On December 30th, 1915, she was lying in Cromarty harbour when fire broke out on board. Within a short time the ship was torn asunder by the explosion of her after magazines and sank almost immediately. The loss of life was heavy, amounting to 25 officers, including Capt. Black, and 380 ratings.

NATAL

Lloyd Nacional; 1892; *J. Smit, Czn.*; 1,883 tons; 248x37-7x27-3; 198 n.h.p.; triple-expansion engines. The Brazilian ship *Natal* sprang a leak in the engine room and sank on February 27th, 1922, near Imbituba, while on a voyage from Fortaleza to Porto Alegre.

NATAL

Haniburg-Sudamerikanische D.G.; 1921; *Akt. Ges. Neptun*; 3,172 tons; 337-7x48-3x20-9; 247 n.h.p.; triple-expansion engines.

The German ship *Natal* was wrecked on January 7th, 1944, on the north Norwegian coast.

NATCHEZ

Inland Waterways Corp'n. (Federal Barge Co.); 1920; *Chas. Ward Engineering Co.*; 757 tons; 200x40x7-9; triple-expansion engines.

The American steamship *Natchez* was towing six barges carrying 60,000 barrels of oil in the Mississippi River on March 4th, 1948, when she struck Greenville bridge and capsized and sank. There were 11 survivors, but 17 men were missing.

NATHANIEL HAWTHORNE

United States Maritime Commission; 1942; *Oregon S.B. Corp.*; 7,176 tons; 422-8x57x34-8; 339 n.h.p.; triple-expansion engines.

The American steamship *Nathaniel Hawthorne* was torpedoed and sunk by a German submarine on November 7th, 1942, on a voyage from Trinidad to New York. The captain and 37 crew were killed.

NATORI

Japanese Navy, light cruiser; 1922; *Mitsubishi Dockyard*; 5,917 tons; 535x46-8x15-9; 70,000 s.h.p.; 33 knots; turbine engines; Kanpon boilers; seven 5-5 in. guns, two 3 in. A.A., 2 m.g., 8 T.T.; 1 aircraft.

The light cruiser *Natori* was sunk by the U.S. submarine *Hardhead* to the eastward of Samar on August 18th, 1944. The normal complement of the *Natori* was 438.

NATSUGUMO

Japanese Navy, destroyer; 1937; *Sasebo*; 1,500 tons; 356x33-3x9; 39,000 s.h.p.; 34 knots; turbine engines; Kanpon boilers; six 5 in. guns, 2 m.g., 8 T.T.

The destroyer *Natsugumo* was sunk by gunfire off Savo Island during the night action off Cape Esperance on October 11th, 1942.

The full story of the action, which was known as the battle of Cape Esperance, is told under the U.S. destroyer *Duncan*.

NATSUKAWA MARU

Kawasaki Risen K.K.; 4,500 tons. The steamship *Natsukawa Maru* was bombed and sunk by U.S. land-based aircraft on November 19th, 1944, off Labuan Island, North Borneo.

NATSUSHIO

Japanese Navy, destroyer; 1937; Fujinagata; 2,000 tons; 364x35x15; 45,000 s.h.p.; 36 knots; turbine engines; Kanpon boilers; six 5 in. guns, 2 m.g., 8 T.T.

The destroyer *Natsushio* was engaged in the fighting which developed in the Macassar strait early in 1942 between the Japanese and a mixed force of British, American and Dutch ships. On February 8th, 1942, she was torpedoed and sunk off Macassar by the U.S. submarine *S-37*.

NAUSICAA

Compania Maritima Istmenia; 1922; N. of Ireland S.B. Co.; 5,005 tons; 388x52-7x29; 495 n.h.p.; triple-expansion engines.

During the Spanish Civil War, the Panamanian tanker *Nausicaa* was bombed by Insurgent aircraft on May 27th, 1938, and caught fire and sank. She was on a voyage from Las Piedras to Port de Bouc.

NAUTILUS

Netherlands Navy, minelayer; 1929; Rotterdam Dry Dock Co.; 800 tons; 191¹5x31x11-5; 1,350h.p.; 14 knots; two 3 in. guns, one 37 mm. two 40 mm.A.A.

The minelayer *Nautilus* was sunk in a collision in British waters on May 22nd, 1941. Her normal complement was 50.

NAUTILUS

Nereide Soc. Anon, di Nav.; 1921; Fried. Krupp A.G.; 2,070 tons; 287-3x40-5x23-5; 371 n.h.p.; oilengines. The Italian motor tanker *Nautilus* was torpedoed and sunk by a British submarine on October 13th, 1942, four miles from Cape Figari, Sardinia.

NAUTILUS

Arnold Thyseius; 1922; Chantiers Navals Franfais; 3,218 tons; 314-5x45-9x20; triple-expansion engines. The German steamship *Nautilus* was on a voyage from Swansea to Delfzijl with 4,000 tons of coal when she ran into heavy weather 15 miles N.W. of Texel lightship.

The weather was extremely bad, gusts of wind up to 112 miles per hour being reported from areas adjacent to her position. At 5.44 a.m. on December 16th, 1962, the *Nautilus* reported by wireless that she was sinking and that the crew were taking to the boats.

The German coastal vessel *Gretchen von Allworden* picked up one man—the sole survivor of her crew of 24. She also saw two men in a small boat, but before she could go to their assistance they disappeared.

NAVARIN

Russian Navy, 1st class battleship; 1895; Franco-Russian Works; 10,206 tons; 338 x 67x25; 9,144 i.h.p.; 15 - 9 knots; triple-expansion engines; four 12 in. guns, eight 6 in., two 2 • 5 in., eighteen 3pdr., 6 T.T.

The Russian battleship *Navarin* was a unit of the 2nd Division of the Baltic Fleet at the battle of Tsu-Shima, on May 27th, 1905. During the battle the *Navarin* seems to have been fairly fortunate compared with her consorts, and at nightfall she was heading for Vladivostok in company with the armoured cruiser *Admiral Nakimoff* and several other vessels. She was somewhere near the end of the line and at about 8 p.m. beat off an attack by Japanese torpedo craft. After a lapse of some hours she was again the object of attack, this time by a more powerful flotilla of destroyers under command of Cdr. Suzukin. She was hit by two torpedoes, but managed to continue on her course.

On the afternoon of the 28th, she was again hit by two torpedoes. She sank so rapidly that very few of her complement of 550 were saved.

The full story of the battle of Tsu-Shima is told under the *Kniaz Sivaroff*.

NAVARRA

Donald & Taylor; 1906; Tyne Iron S.B. Co.; 3,066 tons; 331x48x21-8; 286 n.h.p.; triple-expansion engines. The British cargo ship *Navarra* was wrecked on Old Providence Island reef on June 10th, 1907. She was carrying a cargo of timber on a voyage from Fernandina to Colon.

NAVARRA

Donald & Taylor; 1909; R. Stephenson & Co.; 4,387 tons; 355 - 5x50x27-6; 356 n.h.p.; triple-expansion engines. The British cargo ship *Navarra* was wrecked on Tusket Island, N.S., on December 30th, 1914, while on a voyage from St. John, N.B., to Havre carrying a cargo of hay and oats.

NAVARRA

Hijo de Ramon A. Ramos; 1908; R. Thompson & Sons; 1,693 tons; 250x35x16; 153 n.h.p.; triple-expansion engines. The Spanish steamship *Navarra* was torpedoed by an Insurgent submarine on February 8th, 1937, at Tarragona, during the Spanish Civil War. The ship ran ashore and was completely wrecked.

NAVARRA

Dampsk. Intsk. Garonne; 1921; Osbourne, Graham & Co.; 2,118 tons; 285 x 43 • 5 x 19 -1; 210 n.h.p.; triple-expansion engines.

The Norwegian steamship *Navarra* was torpedoed and sunk by a German submarine on April 6th, 1940, N.W. of Scotland. Twelve of her crew were killed.

NAVARRE

Leith, Hull & Hamburg Steam Packet Co.; 1866; Liverpool; 552 tons; 230-2x30-2x15 > 5; 120 h.p.; compound-inverted engines.

The steamship *Navarre*, on a voyage from Copenhagen to Leith, foundered in heavy weather on March 7th, 1883, some 200 miles off Spurn Head.

About 45 passengers and crew were lost, 16 were saved.

NAVASOTA

Royal Mail Lines; 1917; Swan, Hunter & Wigham Richardson; 8,795 tons; 430x61-3x35-9; 1,094 n.h.p.; quadruple-expansion engines.

The steamship *Navasota*, on a voyage from Liverpool to Buenos Aires, was torpedoed and sunk by a German submarine on December 5th, 1939, about 150 miles W. of the Bishop Rock. Thirty-seven of her crew were lost.

NAWORTH CASTLE

Angus Shipping Co.; 1878; J. L. Thompson & Sons; 1,713 tons; 260-5 X34x23-8; 170 n.h.p.; triple-expansion engines. The British cargo ship *Naworth Castle* sank after a collision with the Belgian steamship *Vaderland* off the South Goodwin Light on January 19th, 1907. She was on a voyage from the Tyne to Pozzuoli with general cargo.

NAZARIO SAURO

*Italian Navy, destroyer; 1926; Odero-Terni-Orlando; 1,058 tons; 295•7x30-5x10*5; 36,000 s.h.p.; 35 knots; turbine engines; Express boilers; four 4-7 in. guns, four 37 mm., two 13 mm., 4 T.T.*

The destroyer *Nazario Sauro* was a unit of the destroyer flotilla which Italy maintained at Massawa, Eritrea. On April 1st, 1941, the day the British army entered Asmara, capital of the colony, she was bombed and sunk. She carried a normal complement of 142, most of whom were saved.

For full details see under the destroyer *Leone*.

NEDJAN

Rederiaktieb.Ostkusten; 1893; Scott & Co.; 883 tons; 212-7x 31-2x14; triple-expansion engines.

The Swedish ship *Nedjan*, on a voyage from Norrsundet to Ipswich with timber, wirelessed for help on January 10th, 1954, reporting that her rudder was broken in a gale, and that she was being driven on to the rocks off Eggegrund.

A sea and air search revealed only floating wreckage and up-turned boats.

All her crew of 16 were lost.

NEEBING

United Towing & Salvage Co.; 1892; Craig S.B. Co.; 1,109 tons; 193x40-5x12-3; 77 r.h.p.; compound engines. The Canadian salvage vessel *Neebing* sank after an explosion in Nipigon Strait, about 60 miles N.E. of Port Arthur, Ont., on

NEERA

September 24th, 1937. She was towing a barge carrying gravel from Paradise Island to Red Rock.

NEERA

Moss S.S. Co.; 1868; *A. Leslie & Co.*; 2,167 tons; 330-4X34-5 X25; 300 h.p.; compound-inverted engines. The British cargo ship *Neera* was wrecked on Shab Mobyet Reef, in the Red Sea, on February 21st, 1884. She was carrying coal and a general cargo from Liverpool to Suakin.

NEFELI

Embricos Bros.; 1912; *W. Doxford & Sons*; 3,868 tons; 369-9x51x25-1; 328 n.h.p.; triple-expansion engines. The Greek steamship *Nefeli* was torpedoed and sunk by a submarine in the Mediterranean on November 3rd, 1917.

NEGRO

British Navy, destroyer; 1916; *Palmer & Co.*; 1,025 tons; 271-5x26-7x8-7; 25,000 s.h.p.; 34 knots; turbine engines; Yarrow boilers; three 4 in. guns, 2 smaller, 4 T.T. The destroyer *Negro* came into collision with the destroyer *Hoste*, 1,666 tons, during very bad weather in the North Sea on December 21st, 1916. The damage to both vessels was so extensive and the seas so heavy that both foundered. The official complement of *Negro* was 80.

NEIKAIMARU

Toa Kaiun K.K.; 2,827 tons. The steamship *Neikai Maru* was bombed and sunk by U.S. land-based aircraft on January 28th, 1944, 75 miles S. of Queen Charlotte Island, Bismarck Archipelago.

NEIRISHEVKET

Turkish Navy, line-of-battle ship; 90 guns. The line-of-battle ship *Neiri Shevket* was the flagship of the Grand Admiral of the Turkish fleet. At about 10 o'clock on the morning of October 23rd, 1850, the vessel, which was lying off the arsenal at Constantinople, blew up with terrible loss of life. In addition to Vice-Admiral Mahmoud Pasha and his officers and men there were a large number of workmen and visitors on board at the time. Of these 206 were saved, 43 being badly injured, while 16 officers and about 500 men were killed.

The cause of the disaster was negligence in transferring canisters of powder from the ship to the arsenal ashore.

NEKKA MARU

Osaka Shosen K.K.; 1935; *Mitsubishi Jukogyo K.K.*; 6,784 tons; 427x56-1x33-1; 1,225 n.h.p.; turbine engines. The steamship *Nekka Maru*, serving as a transport, was torpedoed and sunk by the U.S. submarine *Gudgeon* on November 23rd, 1943, off Nantien, China.

NELLIE

And. S. Aorberg; 1905; *Osbourne, Graham & Co.*; 1,239 tons; 235-5x33-8x15; 157 n.h.p.; triple-expansion engines. The Swedish ship *Nellie* foundered during heavy weather on August 19th, 1927, six miles S.E. of Kapelludden, Oland.

NELLIE

Oceanos Maritime S.S. Co.; 1913; *J. L. Thompson & Sons*; 4,826 tons; 388-7x54-1x26; 455 n.h.p.; triple-expansion engines.

The Greek steamship *Nellie* was torpedoed and sunk by a German submarine on October 13th, 1942, on a voyage from Three Rivers to the U.K. Twenty-seven crew and five gunners were killed.

NELLORE

Eastern & Australian S.S. Co.; 1913; *Caird & Co.*; 6,942 tons; 450 X 52 • 2 X 30 • 6; 710 n.h.p.; quadruple-expansion engines. The British steamship *Nellore*, on a voyage from Bombay to Sydney with passengers, was torpedoed, shelled and sunk by a Japanese submarine on June 29th, 1944, about 400 miles E. of the Chagos Archipelago. About 100 of her complement of 341 were lost.

NELSON

A. W. Pickard & Co.; 1898; *W. Doxford & Sons*; 1,842 tons; 280x39 X18-1; 175 n.h.p.; triple-expansion engines. The British cargo ship *Nelson* was wrecked on the Pierres Vertes, near Ushant, on March 10th, 1906. She was carrying a cargo of coal from Port Talbot to St. Nazaire.

NEMANJA

Jugoslavenska Lloyd a.d.; 1918; *Bar tram & Sons*; 5,226 tons; 400-3x52-3x28-5; 517 n.h.p.; triple-expansion engines. The Yugoslav steamship *Nemanja* was torpedoed and sunk by a German submarine on April 8th, 1942, on a voyage from Macoris to Halifax. The captain and 12 of the crew were killed.

NEMBO

Italian Navy, destroyer; 1903; *Pattison*; 330 tons; 6,000 i.h.p.; 30 knots; triple-expansion engines; five 6 pdr. guns, 4 T.T. The destroyer *Nembo* was escorting the transport *Bormida* to Valona, Albania, on October 16th, 1916, when the latter ship was attacked by the Austrian submarine *U-16*. One torpedo was fired at the transport, which carried nearly 3,000 troops, but the *Nembo* intercepted it and was badly damaged. She nevertheless endeavoured to ram the submarine but the latter submerged. The destroyer then dropped depth charges which forced the *U-16* to come to the surface in a sinking condition. Both vessels then sank together, the survivors comprising 11 of the crew of the submarine and a few of the 53 officers and men who formed the complement of the *Nembo*.

NEMBO

Italian Navy, destroyer; 1927; *Odero-Terni-Orlando*; 1,092 tons; 307-5x30-5x10-8; 40,000 s.h.p.; 36 knots; turbine engines; Express boilers; four 4-7 in. guns, four 37 mm., two 13 mm., 6 T.T.

The destroyer *Nembo* was attacked by British torpedo bombers at Tobruk on July 20th, 1940. She was hit and sunk by torpedo. The normal complement of the vessel was 142.

NEMEA

G. N. Stathatos; 1919; *C. Cornell & Co.*; 5,101 tons; 400 x 52-2x28-3; 517 n.h.p.; triple-expansion engines. The Greek steamship *Nemea* was torpedoed and sunk by a German submarine on January 15th, 1941, about 700 miles W. of the Fastnet on a voyage from Barry to Thessaloniki with coal. Seventeen of her crew were lost.

NEMESIS

Huddart, Parker & Co.; 1880; *T. Turnbull & Son*; 1,393 tons; 240-2x34x17-9; 151 n.h.p.; compound engines. The Australian steamship *Nemesis* left Newcastle, N.S.W., on July 8th, 1904, for Melbourne with coal. She was never seen again and was probably lost in a heavy gale on the 10th. She had 31 persons on board.

NENOHI

Japanese Navy, destroyer; 1932; *Uruga Dockyard*; 1,368 tons; 335-5x31-8x9-2; 37,000 s.h.p.; 34 knots; turbine engines; Kanpon boilers; five 5 in. guns, 2 m.g., 8 T.T. The Japanese destroyer *Nenohi* was engaged in the operations around the Aleutian Islands following upon a Japanese landing early in June, 1942. She was torpedoed and sunk by the U.S. submarine *Triton* on July 4th, 1942 off Agattu.

The destroyer's normal complement was 180.

NEOSHO

United States Navy, tanker; 1939; *United States*; 8,000 tons; 553x75x29-9; 13,000 s.h.p.; 18 knots; turbine engines; four 5 in. guns; capacity 6,000,000 gallons. The U.S. tanker *Neosho*, escorted by the destroyer *Sims* (which see) was in the vicinity of the Louisiade Archipelago, Coral Sea, on May 7th, 1942, when she was attacked by Japanese carrier-borne aircraft. The ship was sunk, with little loss from her complement of about 70. For further details see the U.S. aircraft carrier *Lexington*.

NEPAUL

Peninsular & Oriental S.N.Co.; 1876; *A. Stephen & Sons*; 3,550 tons; 375-2x40-1x32-1; 600 h.p.; compound engines. The British cargo ship *Nepaul* was wrecked on Shagstone reef, off Plymouth, on December 11th, 1890. She was on a voyage from Calcutta to London carrying a general cargo.

NEPTUNA

Burns, Philp & Co.; 1924; *Fried. Krupp A.G.*; 5,952 tons; 393-1x51-9x25-3; 762 n.h.p.; oil engines. The motorship *Neptuna* was bombed and sunk by Japanese aircraft on February 18th, 1942, while in port at Darwin. The bombs detonated a consignment of depth charges in the holds and the ship was blown in two. The captain and 15 of the crew were killed.

NEPTUNE

J. & P. Hutchison; 1860; *J. R. Napier*; 437 tons; 182-6X 25-4x14-5; 67 h.p.

The Glasgow steamship *Neptune* was carrying a cargo of sugar and syrup from Stettin to Greenock when she was sunk in a collision with the Russian steamship *Archangel* off Oslo on October 19th, 1888.

All her crew were saved together with eight from the *Archangel* but the captain and 17 of the crew of the *Archangel* were lost.

NEPTUNE

Mexican Fruit Steamship Corp.; 1883; *Earless Co.*; 1,352 tons; 260x31-4x22-5; 325 n.h.p.; compound engines. The American ship *Neptune* stranded and sank on March 18th, 1921, on Palas Rock near Cardenas.

NEPTUNE

British Navy, cruiser; 1933; *Portsmouth Dockyard*; 7,175 tons; 554-5x55-2x16; 72,000 s.h.p.; 32-5 knots; turbine engines; 3-drum boilers; eight 6 in. guns, eight 4 in., 14 smaller, 8 T.T. The cruiser *Neptune*, Capt. Rory C. O'Connor, was off Tripoli in the early hours of December 19th, 1941, in company with the cruisers *Aurora*, 5,270 tons, Capt. W. G. Agnew, and *Penelope*, 5,270 tons, Capt. Angus Nicholl, with the destroyer *Kandahar*, 1,690 tons, Cdr. W. G. A. Robson, and some others. The *Neptune* was leading the cruisers when she ran into an enemy minefield, striking three mines in quick succession. The ships, which belonged to the famous Mediterranean Force K, were only 20 miles distant from Tripoli and it was impossible to remain in the area in daylight. Capt. Agnew, commanding the force, therefore withdrew in the *Aurora*, the *Penelope* following later. Cdr. Robson, commanding the destroyers, in the *Kandahar* (which see) penetrated the minefield with the intention of taking the *Neptune* in tow, but struck a mine on the way. The *Neptune* then fouled a fourth mine and sank. Of her complement 47 officers, including Capt. O'Connor, and 719 ratings, of whom 147 were New Zealanders, were killed. A number of survivors were picked up by the enemy and became prisoners of war.

NEPTUNIA

Italia Soc. Anon. di Nov.; 1932; *Cantieri Riuniti di WAdriatico*; 19,475 tons; 589-7x76-5x45-5; 4,280 n.h.p.; 19-5 knots; oil engines.

The Italian liner *Neptunia* was taken over for service as a transport early in 1941. She was torpedoed and sunk on September 18th, 1941, by the submarine *Upholder*, Lt. Cdr. M. D. Wanklyn, 58 miles from Tripoli, Libya, when transporting troops to North Africa. Her sister ship the *Oceania* was also torpedoed and sunk by the same submarine on the same day. Over 5,000 troops were drowned when the transports sank.

NEPTUNIAN

Swan, Hunter & Wigham Richardson (W. A. Souter & Co.); 1925; *Swan, Hunter & Wigham Richardson*; 5,155 tons; 400-3 x 55-3x27-1; 598 n.h.p.; oil engines.

The British motorship *Neptunian* left Santiago on July 30th, 1940, on a voyage to Liverpool. She called at Sydney, N.S., and sailed from there in convoy on August 25th. On the night of September 6th she disappeared from the convoy in lat. 58° 30' N., long 16° 10'

W., and no subsequent news of her was received. She was carrying a cargo of sugar and had a crew of 35 and one gunner.

NEREID

Kirby & Gillies; 1873; *W. Doxford & Co.*; 775 tons; 208-9X 29-2x17-2; 90 h.p.; compound engines. The British steamship *Nereid* was sunk in a collision with the sailing ship *Killochan* off Dungeness on February 3rd, 1889. Both ships sank. Six of the crew of the *Nereid* were drowned and 17 from the *Killochan*.

NEREUS

W. Wingardh; 1900; *Mackie & Thomson*; 1,233 tons; 228 -1X 34-5x14-4; 135 n.h.p.; triple-expansion engines. The Swedish steamship *Nereus* struck a mine and sank in the North Sea on December 25th, 1915.

NEREUS

Saguenay Terminals; 1913; *Newport News S.B. & D.D. Co.*; 10,647 tons; 502-2x62-3x36-9; 756 n.h.p.; triple-expansion engines.

The Canadian steamship *Nereus* was lost without trace after sailing from St. Thomas, Virgin Islands, on December 10th, 1941, on a voyage to Portland, Me. She was carrying a cargo of bauxite.

NERISSA

Bermuda & West Indies S.S. Co.; 1926; *W. Hamilton & Co.*; 5,583 tons; 349-5x54-3x30-4; 732 n.h.p.; triple-expansion engines.

The British steamship *Nerissa*, on a voyage from Halifax, N.S., to Liverpool with passengers and general cargo, was torpedoed and sunk by a German submarine at 10.30 p.m. on April 30th, 1941, about 200 miles W. of Inishtrahull. Eighty-three of her crew and 124 passengers were lost.

NERO

Ellermarfs Wilson Line; 1909; *Earle's Co.*; 1,257 tons; 250 X 35-2x15-7; 116 n.h.p.; triple-expansion engines.

The British cargo ship *Nero* was disabled in heavy weather on January 31st, 1920, and abandoned by the crew, the captain remaining on board. The ship was wrecked on the Pierris Noires, near Coquet. She was carrying general cargo from Swansea to Lisbon.

NERVA

Hilmar Reksten; 1924; *Barclay, Curie & Co.*; 1,564 tons; 250-6x39-8x 17-9; 160 n.h.p.; triple-expansion engines. The Norwegian ship *Nerva*, under German control, went ashore and sank on February 6th/7th, 1943, north of Rorvik, while on a voyage from Fineidet to Germany with iron ore.

NERVIER

Lloyd Royal Beige Soc. Anon.; 1909; *Short Bros.*; 1,759 tons; 281X41x18-1; 188 n.h.p.; triple-expansion engines. The Belgian steamship *Nervier* was lost in the North Sea on October 9th, 1917. She was probably sunk by a German submarine.

NESJAR

H. L. Meyer & L. Sandsdalen; 1916; *Laxevaags Maskin & Jernskibsbyggeri*; 1,609 tons; 246-1x37-9x16-2; 138 n.h.p.; triple-expansion engines.

The Norwegian steamship *Nesjar* was sunk by a German submarine in the Arctic on October 1st, 1916.

NESSMORE

Wm. Johnston & Co.; 1882; *Barrow S.B. Co.*; 3,377 tons; 340 x40-4x24-2; 340 n.h.p.; compound engines. The British cargo ship *Nessmore* was wrecked at the Island of Coll on November 21st, 1895. She was on a voyage from Montreal to Liverpool carrying a general cargo which included cattle.

NESSREE

Indian pilgrim ship; 1840 (circa); 500 tons. The sailing ship *Nessree* was a British owned vessel engaged in the India-Arabia trade. In April, 1853, she embarked some 400 Indian pilgrims returning from Arabia to Bombay. When almost at the

end of her voyage she ran into thick weather and heavy rain squalls. These lasted from the night of June 6th to the night of the 7th and were of such violence that the *Nessree's* rudder was unshipped and she became unmanageable. The ship was gradually driven inshore and the pilgrims gave way to panic and rushed the boats. These were swamped owing to overcrowding and 60 of the pilgrims were drowned. At about midnight on June 7th, the *Nessree* ran ashore near Hubshee Jungeera, 35 miles south of Bombay, her masts going by the board one by one and drowning some 100 persons who were clinging to them.

Out of approximately 450 persons who were on board only 94 survived the wreck.

NESSUS

British Navy, destroyer; 1915; Swan, Hunter & Wigham Richardson; 1,022 tons; 271 -5 x 26- 7 x 10 -2; 25,000 s.h.p.; 34 knots; turbine engines; Yarrow boilers; three 4 in. guns, 2 smaller, 4 T.T. The destroyer *Nessus* was patrolling in the North Sea in dense fog on September 8th, 1918, when she collided with the cruiser *Amphitrite*, 11,000 tons, acting as a minelayer. The *Nessus* sank. Her official complement was 80.

NESTOR

British Navy, destroyer; 1915; Swan, Hunter & Wigham Richardson; 1,025 tons; 275x26x8-7; 25,000 s.h.p.; 34 knots; turbine engines; Yarrow boilers; three 4 in. guns, 4 T.T. The destroyer *Nestor*, Cdr. the Hon. E. B. S. Bingham, was a unit of the 13th Flotilla at the battle of Jutland on May 31st, 1916. At 4.15 on the afternoon of the battle the flotilla attacked Admiral Hipper's battle cruisers, *Nestor* leading. She discharged two torpedoes at the flagship, the *Lutzow*, at a range of 5,000 yards but the German ships turned away. Cdr. Bingham followed and made a second attempt at 3,500 yards, his ship and *Nicator*, following in line, coming under heavy fire from the light cruiser *Regensburg* for most of the time. This attack also failed and in retiring *Nestor* was hit by the *Regensburg* and had two boilers put out of action, greatly reducing her speed.

The destroyer *Nomad* which had been immediately astern of *Nestor* in the first attack had also been hit in the boilers and put out of action and it was while both ships were close to each other that a German battle squadron, coming to the assistance of Admiral Hipper, brought them under fire. Both managed to discharge two torpedoes apiece, but without effect, before they were overwhelmed by the enemy salvos.

The loss of life on board *Nestor* was surprisingly small, amounting to two officers and four ratings killed out of a complement of 86. Five officers and 75 ratings were picked up by a German destroyer and became prisoners of war.

NESTOR

Australian Navy, destroyer; 1939; Fairfield Shipbuilding Co.; 1,690 tons; 348x35x9; 40,000 s.h.p.; 36 knots; turbine engines; 3-drum boilers; six 4-7in.guns,one 4in.A.A.,6smaller, 5 T.T.

The destroyer *Nestor*, Cdr. A. S. Rosenthal, R.A.N., D.S.O., formed part of a force under Rear-Admiral P. J. Vian escorting a convoy from Alexandria to Malta. The ships were sighted by enemy aircraft S.W. of Crete and a concerted attack by bombers, torpedo boats and submarines was made upon them. On June 15th, 1942, when the convoy had been forced to turn about for Alexandria, the *Nestor* was hit by bombs and badly damaged so that she had to be sunk by ships in company. Three of her crew were killed and one wounded, about 200 survivors being taken off.

For full story of the convoy see under the light cruiser *Hermione*.

NESTOR

Dampfs. Ges. Neptun; 1939; Bremer Vulkan; 2,446 tons; 333-4x47-8x14-4; 975 n.h.p.; oilengines. The German motorship *Nestor* struck a mine and sank on June 14th, 1943, off the River Gironde.

NESTORIAN

F. Leyland & Co.; 1911; Hawthorn, Leslie & Co.; 6,395 tons; 400-5x52-5x35; 510 n.h.p.; quadruple-expansion engines. The British cargo ship *Nestorian* was wrecked south of Cape Clear Island on January 2nd, 1917. She was on a voyage from Galveston to Liverpool carrying a general cargo.

NESTOS

N. G. Livanos; 1919; W. Pickersgill & Sons; 5,764 tons; 405x52-3x31-9; 546 n.h.p.; triple-expansion engines. The Greek ship *Nestos*, Capt. Pandelis Tsiropinos, went aground on April 2nd, 1941, on East Hoyle Bank, six miles S. of Bar lightship, and was wrecked.

NETLEY ABBEY

Pyman, Watson & Co.; 1878; W. Gray & Co.; 1,620 tons; 260x34-9x22-9; 191 n.h.p.; compound engines. The British cargo ship *Netley Abbey* sank after a collision with a British warship in dense fog about eight miles from the Shambles lightship on August 5th, 1899. She was on a voyage from Cardiff to Cronstadt carrying a cargo of coal.

NETTLESWORTH

R. Gordon & Co.; 1878; J. L. Thompson & Sons; 1,406 tons; 241 x34x18-1; 160 h.p.; compound engines. The British cargo ship *Nettlesworth* was wrecked near Ostergam Light on July 20th, 1888, while on a voyage from Cardiff to Cronstadt carrying a cargo of coal.

NETTLETON

W. A. Massey & Sons; 1891; Bar tram, Haswell & Co.; 2,413 tons; 290x39-1x21; 240 n.h.p.; triple-expansion engines. The British cargo ship *Nettleton* was wrecked six miles north of Bude on February 11th, 1916, while on a voyage from the Clyde to Barry Roads.

NETTUNO

Neptune S.N. Co.; 1882; Tyne Iron S.B. Co.; 1,895 tons; 275 x 37-5x20-3; 250 h.p.; compound-inverted engines. The British cargo ship *Nettuno* lost her rudder in a gale and foundered in lat. 51° N., long. 35° W., on January 18th, 1887, while on a voyage from Rotterdam to Baltimore carrying a general cargo.

NEUENFELS

Deutsche Dampfs. Ges. Hansa; 1925; Act. Ges. Weser; 8,096 tons; 469-9x60-5x32-5; 873 n.h.p.; oilengines. The German motorship *Neuenfels* was sunk by gunfire on April 9th, 1940, at Narvik, during the invasion of Norway.

NEUKUHREN

German Government; 1923; Chantiers & Ateliers de la Gironde; 4,518 tons; 362-9x49-2x24-4; triple-expansion engines. The steamship *Neukuhren* was formerly the Greek *Thermaikos*, seized by the Germans at Antwerp in May, 1940. She was bombed and sunk by British aircraft on April 24th, 1945, in the Kattegat.

NEUQUEN

Buenos Ayres Great Southern Railway Co.; 1913; Campbelltown Shipbuilding Co.; 3,583 tons; 348-2x49-9x23'6; 327n.h.p.; 11 knots; triple-expansion engines. The steamship *Neuquen* was torpedoed and sunk by a German submarine 20 miles N.W. by W. of the Skelligs, off Co. Kerry, on January 20th, 1917. The captain and 17 men were drowned.

NEVA

Convict ship; 1825 (circa); 837 tons. The convict ship *Neva*, Capt. J. H. Peck, left Cork for Sydney on January 8th, 1835. The vessel was carrying a company of 240 persons of whom 26 were crew, 150 were female convicts with 55 children and nine voluntary emigrants. As was the rule in all convict ships the unfortunate prisoners were locked in a space below decks. The voyage was uneventful until May 14th when at about 2 a.m. the watch on deck sighted breakers ahead. The vessel was then at the western end of Bass Strait, close to King's Island, the rocks of which could be dimly discerned.

Capt. Peck was on deck at the time but before any orders given by him could be executed the *Neva* struck with such force as to unship her rudder and render her unmanageable. Shortly afterwards she struck again, this time on the port bow, and swung broadside on to the reef. The prison doors below decks burst open and released a panic stricken crowd of female convicts who swarmed on deck. A boat had just been launched and in their terror they jumped into this until it capsized under the succession of falling

bodies. A second boat was launched and care was taken to prevent overcrowding, but in the darkness she capsized in the surf, all the occupants save the captain and mate being drowned. These two managed to swim to the ship which was rapidly breaking up.

The seas carried the wreck back into deep water, taking with it most of the terrified women, who were no longer capable of making any effort to save themselves. The *Neva* then foundered, leaving behind on the rocks 22 persons, of whom seven afterwards died from exposure. Capt. Peck was among the drowned.

The drift of the tide and floating wreckage brought these people ashore on King's Island, at a point about nine miles from the scene of the wreck. Here after a few days they were discovered by another party of shipwrecked persons, these being the survivors of the wreck of the *Tartar*, a ship owned by Mr. C. Friend of Hobart. The two parties joined forces and a month later, on June 15th, another of Friend's vessels calling at the island saw their distress signals and brought them safely to Tasmania.

Of the 240 persons on the *Neva* 15 were saved, seven died from exposure and 218 were drowned.

NEVA

A/B Transmarin; 1928; Helsingborgs Varfs A/B; 1,456 tons; 247-3X38-1x15-2; 145 n.h.p.; triple-expansion engines. The Swedish steamship *Neva* was torpedoed and sunk by a German submarine on January 22nd, 1943, about 500 miles W. of the Shetland Islands. Nineteen of her crew of 21 were lost.

NEVADA

States Steamship Co.; 1920; S. Western S.B. Co.; 5,645 tons; 410-5x54-3x27-2; 359 n.h.p.; triple-expansion engines. The American ship *Nevada* went ashore on September 29th, 1932, on the eastern point of Amatignak Island, Aleutians, and broke in three. Thirty-eight lives were lost.

The American liner *President Madison* came to the rescue but was unable to launch her boats because of the heavy seas. A seaman, however, saved three survivors by swimming with a line to the rocks to which they were clinging.

NEVADA

U.S. Army; 1915; Manitowoc S.B. & D.D. Co.; 1,685 tons; 221-2x42-2x24-7; 188 n.h.p.; triple-expansion engines. The U.S. Army merchant ship *Nevada* foundered on December 16th, 1943, in the North Atlantic during a violent storm.

NEVILLE

F. H. Green & Co.; 1914; Osbourne, Graham & Co.; 1,081 tons; 210X32x15-4; 142 n.h.p.; triple-expansion engines. The British cargo ship *Neville* sank after her cargo had shifted on April 1st, 1927. She was five miles S.S.E. of Runnelstone on a voyage from Barry to Rouen carrying a cargo of coal.

NEW ERA

American emigrant ship; 1854; Bath, Maine; 1,828 tons. The American sailing vessel *New Era* left Bremen in October, 1854, for New York with 410 persons, mostly German emigrants, under command of Capt. Henry. The ship had a normal passage for that time of the year until she arrived off the New Jersey coast. Here she encountered a violent gale and on November 11th was driven ashore near Long Branch, some 35 miles N. of New York. At daylight on the next day she was discovered by watchers on shore and an attempt at rescue was organised. A line was run from the shore to the ship by which 20 persons were safely landed. Unfortunately when the vessel struck some 200 of the emigrants who were between decks were drowned by the rushing water. After much courageous effort boats managed to take off a further 135 people from the wreck, making 155 survivors.

The number drowned was 255. Capt. Henry, his officers and crew, with the exception of one steward, were among those saved.

NEW GUINEA

Mcllwraith, McEacharn & Co.; 1884; W. Doxford & Sons; 2,674 tons; 300 x40-1x24-5; 274 n.h.p.; compound engines. The Australian cargo ship *New Guinea* was wrecked west of Green Cape Lighthouse, Disaster Bay, N.S.W., on February 13th, 1911. She was on a voyage from Melbourne to Sydney carrying a general cargo.

NEW JERSEY

Texas Company; 1921; Texas S.S. Co.; 6,414 tons; 416-8x56-1x32-7; 549 n.h.p.; triple-expansion engines.

The American tanker *New Jersey* was torpedoed and sunk by a German submarine on May 28th, 1942, on a voyage from Baltimore to Aruba.

NEW MATHILDE

Pang Kwok Sui; 1906; Howaldtswerke; 1,559 tons; 230-8x34-1x19-3; 97 n.h.p.; triple-expansion engines. The British steamship *New Mathilde* sank during heavy weather in lat. 21° 05' N., long. 110° 50' E., on October 21st, 1939. She had sailed from Fort Bayard and her cargo consisted of pigs, chicken and cattle.

NEW SEVILLA

Sevilla Whaling Co.; 1900; Harland & Wolff; 13,801 tons; 550-2x63-3x47-9; 641 n.h.p.; 11 knots; quadruple-expansion engines.

The whale oil refinery *New Sevilla*, Capt. O. Hansen, was torpedoed and sunk by a German submarine on September 20th, 1940, off Inishtrahull on a voyage from Liverpool to Aruba and South Georgia. Two men were killed.

NEW SWEDEN

Akt. Svenska Ostasiatiska Kompaniet; 1913; Earless Co.; 5,319 tons; 430-2x54-2x26-2; 534 n.h.p.; triple-expansion engines.

The Swedish steamship *New Sweden* was torpedoed and sunk by a submarine in the Mediterranean on May 20th, 1918.

NEW YORK

Ministry of War Transport (Coast Lines); 1924; Bethlehem Shipbuilding Corp.; 4,989 tons; 385-3x72-5x20-9; 11 knots; turbine engines.

The steamship *New York*, Capt. C. Mayers, was torpedoed and sunk by a German submarine on September 25th, 1942, in the North Atlantic in convoy. Capt. Mayers, 50 crew and nine gunners were lost.

NEW YORK MARU

Kokusai Risen K.K.; 1919; Kawasaki Risen K.K.; 5,864 tons; 385 x 57 X 36; 440 n.h.p.; triple-expansion engines. The *New York Maru* went ashore on November 6th, 1921, on Bombay Reef, Paracels Islands.

NEWARK CASTLE

Union-Castle Mail S.S. Co.; 1902; Barclay, Curie & Co.; 6,224 tons; 414-1x51-2x28; 650 n.h.p.; 12-5 knots; triple-expansion engines.

The liner *Newark Castle* left Durban for Delagoa Bay and Mauritius just before noon on March 12th, 1908. She had on board 115 persons, of whom 69 were crew and 46 passengers. Most of the latter were soldiers drafted to the Mauritius garrison.

Some six hours after leaving port the *Newark Castle* ran ashore four miles from the coast, in Richard's Bay near the Umhlatuzi River. The sea was calm and the passengers were sent off in the boats. The captain and some of the officers and crew remained on board and were eventually taken off by a Government tug.

It was the intention of the lifeboats to make for Durban but the weather changed and the sea became very rough. Rockets were sent up by the liner and the trawler *Elelyn*, of Durban, proceeded to the scene. Next morning she picked up the boats with the exception of one which had capsized in an attempt to reach shore. Three persons were drowned.

The *Newark Castle* drifted away and grounded again on a sandbank some seven miles distant, eventually becoming a total wreck.

NEWBRIDGE

R. Mackie & Co.; 1882; E. Withy & Co.; 1,698 tons; 257-4X34-6x19-4; 150 h.p.; compound engines.

The British cargo ship *Newbridge* was wrecked near Lemvig on November, 23rd, 1894, while on a voyage from Leith to Pillau carrying a cargo of coal.

NEWBURGH

NEWBURGH

R. Mackie & Co.; 1874; *M. Pearse & Co.*; 1,158 tons; 230 X 30 - 2 x 17; 110 h.p.; compound engines.

The British cargo ship *Newburgh* foundered about 100 miles east of the Isle of May on November 20th, 1888. She was carrying a cargo of coal from Grangemouth to Aarhus.

NEWBURY

Alexander Shipping Co.; 1927; *R. Duncan & Co.*; 5,102 tons; 404-9x53x27-5; 503n.h.p.; 11 knots; triple-expansion engines.

The steamship *Newbury*, Capt. T. Pryse, was torpedoed and sunk by a German submarine on September 15th, 1941, about 800 miles S.E. of Cape Farewell on a voyage from Cardiff to Buenos Aires with coal. All on board, 39 crew and six gunners, were lost.

NEWCASTLE CITY

Christopher Furness; 1882; *E. Withy & Co.*; 2,729 tons; 285-5x36x24; 220 h.p.; compound engines. The British cargo ship *Newcastle City* was wrecked off Nantucket Island on December 23rd, 1887, while on a voyage from Newcastle to New York carrying a general cargo.

NEWFOUNDLAND

Johns ton Warren Lines; 1925; *Vickers*; 6,791 tons; 406-1x55-4x31-8; 11047n.h.p.; quadruple-expansion engines. The steamship *Newfoundland*, in service as a hospital ship, was bombed and set on fire by German aircraft on September 13th, 1943, off the Salerno beaches during the Allied landings in Italy. After burning for two days she was sunk by gunfire. Four of her crew, five doctors, six nurses and six Army medical staff were killed. Fortunately only two patients were on board at the time.

NEWHOLM

Newcastle Steamship Co.; 1899; *C. S. Swan & Hunter*; 3,399 tons; 330-6x48x23-6; 293 n.h.p.; 10 knots; triple-expansion engines. The steamship *Newholm* was mined and sunk one mile S. of Start Point on September 8th, 1917. Twenty men were killed. The captain was among the survivors.

NEWNHAM

Temperley & Co.; 1880; *Palmers' Co.*; 1,962 tons; 285X 35-3x23-3; 240 h.p.; compound engines. The British cargo ship *Newnham* was wrecked near Nieuwe Diep on December 19th, 1889, while on a voyage from Savannah to Bremen carrying a cargo of cotton.

NEWSTEAD

Alban Steamship Co.; 1894; *Palmers' Co.*; 2,836 tons; 315x 43x20-2; 245 n.h.p.; 9-5 knots; triple-expansion engines. The steamship *Newstead* was torpedoed and sunk by a German submarine 150 miles W.N.W. of Fastnet on March 3rd, 1917. Fifteen men were killed. The captain was among the survivors.

NEWTON

Liverpool Brazil & River Plate S.N. Co.; 1864; *Caird & Co.*; 1,324 tons; 249-5x31-3x19-9; 90 h.p.; compound-inverted engines. The British cargo ship *Newton* was wrecked off Madeira on April 9th, 1881. She was on a voyage from Bahia to London carrying a cargo of coffee and sugar.

NEWTON

Hardy, Wilson & Co.; 1883; *C. S. Swan & Hunter*; 1,423 tons; 245-5x34-2x17-2; 123 h.p.; compound-inverted engines. The British cargo ship *Newton* was wrecked near Borwenstow on March 21st, 1886, while sailing in ballast from Bremen to Newport.

NEWTON ASH

C. Strubin & Co.; 1925; *W. Pickersgill & Sons*; 4,625 tons; 372-8x54-6x26-8; 346n.h.p.; triple-expansion engines. The British steamship *Newton Ash*, on a voyage from St. John, N.B., to Hull with grain, was torpedoed and sunk by a German submarine on February 8th, 1943, about 700 miles W. of Inishtra-hull. There were only four survivors of her crew of 38 and five gunners.

NEWTON BEECH

Tyneside Line; 1925; *W. Pickersgill & Sons*; 4,651 tons; 372-8x54-6x26-8; 346n.h.p.; triple-expansion engines. The British steamship *Newton Beech*, on a voyage from Table Bay to London with 7,080 tons of maize, was sunk by the German raider *Graf Spee* on October 8th, 1939, off the coast of Angola.

NEWTON PINE

Graig Shipping Co.; 1925; *Sir J. Priestman & Co.*; 4,212 tons; 365 x 51 • 5 x 25 • 1; 380n.h.p.; triple-expansion engines. The British steamship *Newton Pine* left Loch Ewe on October 3rd, 1942, for Halifax in convoy. She lost contact with the convoy on the 15th in a storm and was never seen again. It was thought that she was probably sunk by a submarine.

NEWTOWN

Harrison, Sons & Co.; 1915; *J. Crown & Sons*; 1,153 tons; 220x34-1X13-1; 183 n.h.p.; triple-expansion engines. The British cargo ship *Newtown* was wrecked on Baricane Rocks, North Devon, on January 7th, 1916. She was carrying a cargo of pitprops from Oporto to Newport.

NGAHERE

Mann, George & Co.; 1908; *A. Rodger & Co.*; 1,090 tons; 225X33-1x15-7; 165 n.h.p.; triple-expansion engines. The British cargo ship *Ngahere* was wrecked on Greymouth Bar, NZ, on May 12th, 1924. She was on a voyage from Greymouth to Miramar and Wellington carrying a cargo of coal and timber.

NIAGARA

Elder, Dempster & Co.; 1883; *M. Pearse & Co.*; 3,033 tons; 324-5x40x26-3; 315 n.h.p.; compound engines. The British cargo ship *Niagara* was wrecked on the Pipas Buceo rocks, near Montevideo, on July 19th, 1899, while on a voyage from Cardiff, via Boma, Congo, to Buenos Aires. She was carrying a cargo of coal and iron.

NIAGARA

J. & J. T. Matthews; 1875; *M. Simpson*; 468 tons; 171-6 X 26-2x12; ISO.h.p.; compound engines. The Canadian steamship *Niagara* was wrecked off Long Point, Lake Erie, on December 5th, 1899. All her crew of 16 were drowned.

NIAGARA

Canadian-Australian Line; 1913; *John Brown & Co.*; 13,415 tons; 524-7x66-3x34-5; 18 knots; triple-expansion engines & L.P. turbine.

The liner *Niagara*, Capt. W. Martin, left Auckland on June 18th, 1940, for Suva, Honolulu and Vancouver with 136 passengers and about 200 crew. She carried a valuable cargo consisting of £2,500,000 in gold, and half the New Zealand stock of small arms ammunition for trans-shipment to Britain. Early on the morning of the 19th the liner ran into a minefield laid in the Hauraki Gulf by a German raider a few days before. She struck a mine in way of No. 2 hold and began to settle by the head. Wireless calls for aid were sent out, in response to which the liner *Wanganella*, 9,576 tons, and the steamship *Kapiti*, 249 tons, took off all the passengers and crew. The *Niagara* sank in 73 fathoms.

Salvage operations were put in hand and by February, 1942, bullion to the value of £2,379,000 had been recovered, a notable achievement at such a depth.

Eleven years later, in June 1953, 24 gold ingots valued at £120,000 were recovered.

NICARAO

United Fruit S.S. Corp.; 1920; *Standard S.B. Corp.*; 1,445 tons; 234-3x34-1x20-3; 200n.h.p.; triple-expansion engines. The American steamship *Nicarao* was torpedoed and sunk by a German submarine on May 15th, 1942, off the Bahamas on a voyage from Kingston, Jamaica, to Jacksonville. Eight of her crew were lost.

NICHIAIMARU

Nissan Risen K.K.; 1919; *Asano S.B. Co.*; 5,439 tons; 400X 53-2x29-4; 513 n.h.p.; triple-expansion engines. The steamship *Nichiai (Nitiiai) Mam* was bombed and sunk by U.S. land-based aircraft on February 3rd, 1944, 30 miles S. of Queen Charlotte Island, Bismarck Archipelago.

NICHIAN MARU

Nissan Kisen K.K.; 1912; *W. Doxford & Sons*; 6,197 tons; 439-5x57x26-3; 340 n.h.p.; triple-expansion engines. The steamship *Nichian (Nitian) Maru* was torpedoed and sunk by the U.S. submarine *Spadefish* on September 8th, 1944, E. of Keelung, Formosa.

NICHIEI MARU

OkazakiHontenK.K.; 1938; *Naniwa Dockyard Co.*; 2,436 tons; 281-2x43x23; 210 n.h.p.; triple-expansion engines. The steamship *Nichiei (Nitiei) Maru* was sunk by U.S. carrier-based aircraft on September 12th, 1944, W. of Leyte Island, Philippines.

NICHIEI MARU

Nihon Yusen K.K.; 5,396 tons. The steamship *Nichiei Maru* was torpedoed and sunk by the U.S. submarine *Jack* on November 14th, 1944, about 50 miles S.W. of Cana, Indo-China.

NICHIEI MARU

Nitto Kogyo Kisen K.K.; 1938; *Kawasaki Dockyard Co.*; 10,020 tons; 503-3x65x37-1; 2,250 n.h.p.; oilengines. The tanker *Nichiei (Nitiei) Maru* was torpedoed and sunk by the U.S. submarine *Besugo* on January 6th, 1945, 60 miles N.E. of Kota Bharu, Malaya.

NICHIHO MARU

Nissan Kisen K.K.; 1912; *W. Doxford & Sons*; 6,363 tons; 439-7x56-8x28-9; 339 n.h.p.; triple-expansion engines. The steamship *Nichiho (Nitihd) Maru* was torpedoed and sunk by the U.S. submarine *Guardfish* on October 21st, 1942, in the East China Sea.

NICHH MARU

Nissan Kisen K.K.; 1939; *Osaka Iron Works*; 6,550 tons; 424-1x57-4x34-4; 517 n.h.p.; turbine engines. The steamship *Nichii (Nitii) Maru* was bombed and sunk by U.S. land-based aircraft on November 21st, 1943, off New Ireland.

NICHIMAN MARU

ToaKaiunK.K.; 1917; *Harada Shoko GoshiKaisha*; 1,922 tons; 250X37-7X20-5; 139 n.h.p.; triple-expansion engines. The steamship *Nichiman (Nitiman) Maru* was torpedoed and sunk by the U.S. submarine *Spadefish* on September 8th, 1944, E. of Keelung, Formosa.

NICHIMEI MARU

Nissan Kisen K.K.; 1912; *Armstrong, Whitworth & Co.*; 4,704 tons; 400x52-2x24-9; 339 n.h.p.; triple-expansion engines. The steamship *Nichimei (Nitimei) Maru* was bombed and sunk by U.S. land-based aircraft on January 15th, 1943, off the coast of Burma.

NICHINAN MARU

Nissan Kisen K.K.; 2,750 tons. The steamship *Nichinan Maru* was torpedoed and sunk by the U.S. submarine *Rasher* on March 27th, 1944, off the Kangean Islands.

NICHINAN MARU

Taiyo Kogyo K.K.; 1,945 tons. The steamship *Nichinan Maru* was torpedoed and sunk by a British submarine on November 19th, 1944, 25 miles N.E. of Bengkalis, Sumatra.

NICHINAN MARU No. 2

Iino Kaiun K.K.; 5,226 tons. The tanker *Nichinan Maru No. 2* was torpedoed and sunk by the U.S. submarine *Redfin* on November 8th, 1944, about 200 miles W.S.W. of Olongapo, Philippines.

NICHIRAN MARU

Nanjo Kaiun K.K.; 1938; *Mitsubishi Jukogyo K.K.*; 6,504 tons; 419-9x57-2x33-8; 750 n.h.p.; turbine engines. The steamship *Nichiran (Nitirari) Maru* was torpedoed and sunk by the U.S. submarine *Piranha* on July 12th, 1944, about 50 miles E. of San Vicente, Luzon Island, Philippines.

NICHIREI MARU

Nissan Kisen K.K.; 5,396 tons. The steamship *Nichirei Maru* was torpedoed and sunk by the U.S. submarine *Lapon* on March 9th, 1944, about 200 miles S.E. of Hongkong.

NICHIREN MARU

Murao Kisen Goshi Kaisha; 1892; *W. Gray & Co.*; 1,992 tons; 277 X 38x18- 7; 175 n.h.p.; triple-expansion engines. The steamship *Nichiren Maru* was wrecked on February 21st, 1922, on Hainan Head Bank.

NICHIREN MARU

Nissan Kisen K.K.; 1920; *Asano S.B. Co.*; 5,460 tons; 400x 53-2x29-4; 513 n.h.p.; triple-expansion engines. The steamship *Nichiren (Nitiren) Maru* was torpedoed and sunk by the U.S. submarine *Tautog* on March 16th, 1944, 50 miles south of Kushiro, Japan.

NICHIRIN MARU

Nissan Kisen K.K.; 5,162 tons. The tanker *Nichirin Maru* was torpedoed and sunk by the U.S. submarine *Jack* on February 19th, 1944, about 200 miles W. of Luzon Island, Philippines.

NICHIRIN MARU

Japanese Government; 1915; *C. Rennoldson & Co.*; 1,020 tons; 220x35-2x13; 165 n.h.p.; triple-expansion engines. The steamship *Nichirin Maru* was formerly the British *Mata Hari*, bombed and sunk by the Japanese in the Banka Strait on February 28th, 1942, afterwards raised and repaired. She was bombed and sunk by U.S. land-based aircraft on March 2nd, 1945, 230 miles N.W. of Naha, Okinawa Island.

NICHIRO MARU

Nissan Kisen K.K.; 1939; *Osaka Iron Works*; 6,534 tons; 424-1x57-4x34-4; 517n.h.p.; turbine engines. The steamship *Nichiro (Nitiro) Maru* was torpedoed and sunk by the U.S. submarine *Sargo* on February 17th, 1944, S.W. of Yap Island, Caroline Islands.

NICHIRYO MARU

Okazaki Honten K.K.; 1939; *Osaka Iron Works*; 2,721 tons; 305-1x45x24-9; 150 n.h.p.; triple-expansion engines. The steamship *Nichiryō (Nitiryō) Maru* was torpedoed and sunk by the U.S. submarine *Bonefish* on December 1st, 1943, in the Celebes Sea.

NICHIRYU MARU

Nissan Kisen K.K.; 1919; *Asano S.B. Co.*; 5,447 tons; 400x 53x29-4; 513 n.h.p.; triple-expansion engines. The steamship *Nichiryū (Nitiryū) Maru* was bombed and sunk by U.S. land-based aircraft on January 7th, 1943, off Arawe Harbour, New Britain.

NICHIU MARU

Nissan Kisen K.K.; 2,723 tons. The steamship *Nichiu Maru* was torpedoed and sunk by the U.S. submarine *Gato* on January 29th, 1943, off Bougainville.

NICHIWA MARU

Nissan Kisen K.K.; 4,955 tons. The steamship *Nichiwa Maru* was torpedoed and sunk by the U.S. submarine *Tunny* on May 17th, 1944, about 150 miles W. of Tenian Island, Ladrone Islands.

NICHIYO MARU

Nissan Kisen K.K.; 6,300 tons. The steamship *Nichiyō Maru* was bombed and sunk by U.S. land-based aircraft on December 7th, 1944, off the west coast of Leyte Island, Philippines.

NICHİYOKU MARU

Nissan Kisen K.K.; 1,945 tons. The tanker *Nichiyoku Maru* was torpedoed and sunk by the U.S. submarine *Becuna* on February 22nd, 1945, about 80 miles S.E. of Cana, Indo-China.

NICHIIYU MARU

NICHIIYU MARU

Nissan Risen K.K.; 1938; *Kawanami Kogyo K.K.*; 6,817 tons; 451-8x58-1x32-8; 420 n.h.p.; triple-expansion engines. The steamship *Nichiyu (Nitiyu) Mam* was torpedoed and sunk by the U.S. submarine *Halibut* on March 3rd, 1943, N. of the Caroline Islands.

NICHIIYU MARU No. 1

Nissan Risen K.K.; 6,873 tons. The steamship *Nichiyu Maru No. 1* struck a mine and sank on June 29th, 1945, off Shimonoseki.

NICHIIYU MARU No. 2

Nissan Kisen K.K.; 6,589 tons. The steamship *Nichiyu Maru No. 2* was sunk by U.S. carrier-based aircraft on January 21st, 1945, off Kaohsiung, Formosa.

NICHIZUI MARU

Nissan Kisen K.K.; 6,584 tons. The steamship *Nichizui Maru* was bombed and sunk by U.S. land-based aircraft on October 19th, 1944, 75 miles S. of Hongkong.

NICHOLAS

United States Navy, destroyer; 1919; *Bethlehem Shipbuilding Corp.*; 1,215 tons; 310x30-9x9-3; 27,500 s.h.p.; 35' knots; turbine engines; Yarrow boilers; four 4 in. guns, one 3 in. A.A. 12 T.T. The United States destroyer *Nicholas* was one of a flotilla of seven such vessels steaming through a dense fog at high speed near the island of Santa Barbara, off the coast of California, on September 8th, 1923. All the ships ran upon the rocks and became total wrecks, but most of the crews got away in safety. The full story of the disaster is told under the *Delphy*, leading ship of the flotilla.

NICOLAAS

W.H. Berghuys; 1903; *S. P. Austin & Son*; 1,101 tons; 222-2x33-3x14-3; 145 n.h.p.; triple-expansion engines. The Dutch steamship *Nicolaas*, bound from Gothenburg to Amsterdam, struck a mine near the Dogger Bank lightship on January 2nd, 1920. She sank with the loss of seven lives.

NICOLAOS

G. N. Pittas Bros. & Co.; 1882; *Hodgson & Soulsby*; 1,215 tons; 242x33-1x15-2; 146 n.h.p.; compound engines. The Greek steamship *Nicolaos* was sunk by a submarine in the Mediterranean on March 1st, 1917.

NICOLAOS

Moller & Co.; 1878; *Schlesinger, Davis & Co.*; 1,369 tons; 250-6x32-7x19; 149 n.h.p.; compound engines. The British cargo ship *Nicolaos* sank after a collision in 52° 14' N., 6° 02' W., on May 12th, 1917. She was carrying a cargo of coal from the Clyde to Rouen.

NICOLAOS PIANGOS

M. N. Piangos & Partners; 1912; *Northumberland S.B. Co.*; 4,499 tons; 385x52x27-1; 320 n.h.p.; triple-expansion engines. The Greek steamship *Nicolaos Piangos* was bombed by German aircraft and set on fire on November 1st, 1941. She drove ashore and broke in two off Harwich. Six of her crew were killed.

NICOLAOS ROUSSOS

I. Roussos Sons; 1890; *Richardson, Duck & Co.*; 2>421 tons; 307x41-1x20-7; 251 n.h.p.; triple-expansion engines. The Greek steamship *Nicolaos Roussos* was torpedoed and sunk by a submarine in the Mediterranean on October 4th, 1917.

NICOLAOU GEORGIOS

N. G. Nicolaou; 1930; *W. Gray & Co.*; 4,108 tons; 390-7x53-7x23-3; 502 n.h.p.; triple-expansion engines. The Greek steamship *Nicolaou Georgios*, loaded with munitions, was bombed and sunk by German aircraft on April 23rd, 1941, at Nauplia.

504

NICOLAS ANGELOS

I. Angelos; 1912; *Greenock & Grangemouth Dockyard Co.*; 4,351 tons; 375-8x52-2x25-5; 320 n.h.p.; triple-expansion engines. The Greek steamship *Nicolas Angelos* was torpedoed and sunk by a German submarine on February 1st, 1941, on a voyage from Liverpool to New York. There were no survivors.

NICOLAS-NORBERT

Mory & Cie.; 1919; *N.V. Holland S.B. Co.*; 1,059 tons; 215x34-3x15-5; 83 n.h.p.; triple-expansion engines. The French ship *Nicolas-Norbert* was wrecked on January 7th, 1928, on Quenrocks, near Calais. She was carrying coal from Blyth to Boulogne.

NICOLAS PATERAS

C. N. & E. N. Pat eras; 1910; *Northumberland Shipbuilding Co.*; 4,362 tons; 365x51-4x25-9; 335 n.h.p.; triple-expansion engines. The Greek steamship *Nicolas Pateras* was torpedoed and sunk by a German submarine on June 24th, 1941, S. of Greenland, with the loss of all on board.

NICOLE SCHIAFFINO

Soc. Algerienne de Nav. pour VAfrique du Nord; 1920; *Palmers* Co.*; 4,974 tons; 386-4x52-5x25-8; 453 n.h.p.; triple-expansion engines. The French steamship *Nicole Schiaffino* was sunk by mine or torpedo on March 16th, 1942, near Tromso, Norway.

NICOYA

Elders & Fyffes; 1929; *A. Stephen & Sons*; 5,364 tons; 400-5 X 51-2x30-1; 447 n.h.p.; 13-5 knots; triple-expansion engines. The steamship *Nicoya*, Capt. E. H. Brice, was torpedoed and sunk by a German submarine in the Gulf of St. Lawrence on May 12th, 1942. Six persons were killed. Capt. Brice was among the survivors. On the same day another of the company's ships, the *Cristales*, was torpedoed off the coast of Newfoundland.

NIDARNES

Rederi A/S Nidaros; 1920; *Toledo S.B. Co.*; 2,647 tons; 251 x43*6x25-8; 315 n.h.p.; triple-expansion engines. The Norwegian steamship *Nidarnes* was torpedoed and sunk by a German submarine on June 3rd, 1942, on a voyage from New Orleans to Cristobal. Thirteen of her crew were killed.

NIDELVEN

Nordenfjeldske Dampskibsselskab; 1908; *Trondhjems Mek. Verksted*; 1,262 tons; 231-1x33-3x13-6; 132 n.h.p.; triple-expansion engines. The Norwegian steamship *Nidehen* struck a mine and sank in the North Sea on April 27th, 1917.

NIEDER SACHSEN

German Government; 1934; *Burmeister & Wain*; 1,794 tons; 284-5x41-5x15-4; 404 n.h.p.; oil engines. The motor vessel *Nieder Sachsen* was formerly the French *Guyane*, taken over by the Germans. On February 15th, 1944, she was torpedoed and sunk by an Allied submarine off Toulon.

NIELS R. FINSEN

A/S Dansk Norske D/S; 1904; *J. Smit, Czn.*; 1,850 tons; 275-5x41-1x17-8; 175 n.h.p.; triple-expansion engines. The Danish steamship *Niels R. Finsen*, under German control, was bombed and sunk by British aircraft on May 30th, 1942, W. of Borkum.

NIEMEN

Maurel Freres; 1909; *Ateliers & Chantiers de France*; 1,888 tons; 251-9x36-4x20-6; 204 n.h.p.; triple-expansion engines. The French steamship *Niemen* was torpedoed and sunk by a German submarine in the Bay of Biscay on September 17th, 1917. <

NIEMEN

Zegluga Polska Spolka Akcyjna; 1928; *Craig, Taylor & Co.*; 3,350 tons; 325 x 48x22-2; 293 n.h.p.; triple-expansion engines. The Polish ship *Niemen* was in collision with the *Lawhill* in the Skagerrak on October 1st, 1932, and sank within seven minutes.

NIEUW ZEELAND

Koninklijke Paketvaart Maats.; 1928; *Rotterdam Droogdok Maats.*; 11,069 tons; 540x62-5x33-4; turbine engines. The Dutch steamship *Nieuw Zeeland* was torpedoed and sunk by the German submarine *U-380* on November 11th, 1942, off the north coast of Africa. Fifteen of her crew were killed.

NIEUWLAND

Scheepvaart en Steenkolen Maats.; 1920; *J. Smit & Zoon*; 1,075 tons; 217x32-8x13-7; 175 n.h.p.; triple-expansion engines. The Dutch steamship *Nieuwland* was sunk by a German motor torpedo boat on September 4th, 1940, between Sunderland and London. Eight of her crew were killed.

NIGEL

G. Gibson & Co.; 1903; *Grangemouth & Greenock Dockyard*; 1,400 tons; 260-2x34-2x17-4; 277n.h.p.; 10 knots; triple-expansion engines. The steamship *Nigel* was mined and sunk off Boulogne on November 12th, 1915. Five men were killed. The captain was among the survivors.

NIGER

British Navy, torpedo gunboat; 1892; *Great Britain*; 810 tons; 230 x27x12-5; 3,500 i.h.p.; 19 knots; triple-expansion engines; *Reed boilers*; two 4-7 in. guns, four 3 pdr., 3 T.T. The torpedo gunboat *Niger*. Lt. Cdr. A. P. Moore, was torpedoed and sunk by a German submarine at about noon on November 11th, 1914, off Deal pier. No lives were lost, the ship's company being taken off by the *Deal* and *Kingsdown* lifeboats.

NIGER

British Navy, fleet minesweeper; 1936; *J. S. White & Co.*; 815 tons; 230x33-5x7-9; 2,000 i.h.p.; 17 knots; triple-expansion engines; 3-drum boilers; two 4 in.A.A. guns, 5 smaller. The fleet minesweeper *Niger* was mined and sunk off Iceland on July 6th, 1942. The vessel's normal complement was 80.

NIGERIAN

United Africa Co.; 1936; *Deutsche Schiffs-u. Maschinebau*; 5,423 tons; 417-5x57-7x23-6; 350 n.h.p.; 10 knots; triple-expansion engines & L.P. turbine. The steamship *Nigerian*, Capt. E. R. Owen, was 130 miles S.E. of Trinidad on December 8th, 1942, when she was torpedoed and sunk by a German submarine. Four of the crew and one passenger were killed.

NIGITSUMARU

Nippon Kaiun K.K.; 9,547 tons. The steamship *Nigitsu Maru*, serving as a transport, was torpedoed and sunk by the U.S. submarine *Hake* on January 12th, 1944, about 850 miles E. of Formosa.

NIITAKA MARU

Kita Nippon Risen K.K.; 1904; *Russell & Co.*; 2,478 tons; 294x40-3x17-6; 295 n.h.p.; triple-expansion engines. The steamship *Niitaka Maru* was torpedoed and sunk by the U.S. submarine *Plunger* on July 12th, 1943, W. of Iwanai, Japan.

NIITAKA MARU

Nissan Kisen K.K.; 3,244 tons. The steamship *Niitaka Maru* was sunk by U.S. carrier-based aircraft on October 12th, 1944, off Kaohsiung, Formosa.

NIIZUKI

Japanese Navy, destroyer; 1941; *Japan*; 2,500 tons; 435 X 38 X—; 34 knots; turbine engines; eight 5 in. guns, several smaller, 4 T.T. The destroyer *Niizuki* was sunk by gunfire in the early hours of July 6th, 1943, in the first battle of Kula Gulf.

The full story of the first battle of Kula Gulf is given under the U.S. cruiser *Helena*. The second battle of Kula Gulf, also a night action, was fought a week later, for which see the Japanese cruiser *Jintsu*.

NIKITASK.

Minos Compania Maritima; 1919; *Osbourne, Graham & Co.*; 2,178 tons; 290-3x40-5x—; triple-expansion engines. The Panamanian ship *Nikitas K.* sank during a gale off the Turkish Black Sea coast on November 29th, 1957. The captain and five of the crew were drowned.

NIKKA MARU

Shimaru Kaiun O.K.; 1918; *K.K. Yoshiura Zosensho*; 1,269 tons; 228x33x18-7; 88 n.h.p.; triple-expansion engines. The steamship *Nikka Maru*, on a voyage from Tokyo to Murooran, was wrecked in a gale on April 22nd, 1937, two miles N. of Choshi, Chiba Prefecture.

NIKKAIMARU

Nissan Kisen K.K.; 1938; *Uraga Dock Co.*; 2,562 tons; 297-9 x 45x23-8; 201 n.h.p.; compound engines & L.P. turbine. The steamship *Nikkai Maru* was taken over by the Japanese Navy and converted into an auxiliary gunboat. On November 26th, 1943, she was torpedoed and sunk by the U.S. submarine *Ray* 350 miles N. of the Admiralty Islands.

NIKKAIMARU

Nissan Kisen K.K.; 1944; *Hitachi Zosen*; 2J 13 tons; 328-7X 45-4 x —; oilengines. The motorship *Nikkai Maru* foundered during a typhoon on November 12th, 1959, about 250 miles S. of Okinawa.

NIKKAKU MARU

Nissan Kisen K.K.; 1,946 tons. The steamship *Nikkaku Maru* struck a mine and sank on January 23rd, 1945, off Belawan, Sumatra.

NIKKIEMARU

Nissan Kisen K.K.; 1920; *Ames S.B. & D.D. Co.*; 5,811 tons; 410-5x54-2x29-2; 369 n.h.p.; triple-expansion engines. The steamship *Nikkei Maru* was torpedoed and sunk by the U.S. submarine *Silver sides* on August 8th, 1942, S. of Susami, Japan.

NIKKIMARU

Nissan Kisen K.K.; 5,857 tons. The steamship *Nikki Maru* was torpedoed and sunk by the U.S. submarine *Balao* on February 23rd, 1944, N. of Schouten Island, Dutch New Guinea.

NIKKIN MARU

Nissan Kisen K.K.; 1919; *J.F. Duthie Co.*; 5,705 tons; 410-3X 54-2x27-7; 359 n.h.p.; triple-expansion engines. The steamship *Nikkin Maru* was torpedoed and sunk by the U.S. submarine *Tang* on June 30th, 1944, about 100 miles W. of Mokpo, Korea.

NIKKO MARU

Toa Kaiun K.K.; 1903; *Mitsubishi Dockyard & Engineering Works*; 5,949 tons; 428-1x48-8x26-7; 785 n.h.p.; triple-expansion engines. The steamship *Nikko Maru* was torpedoed and sunk by the U.S. submarine *Harder* on November 20th, 1943, about 200 miles N.E. of the Ladrone Islands.

NIKKO MARU

Okazaki Honten K.K.; 1919; *Sir Raylton Dixon & Co.*; 3,098 tons; 33 1x46-5x25-5; 412 n.h.p.; triple-expansion engines. The steamship *Nikko Maru* struck a mine and sank on July 1st, 1944, off the east coast of North Borneo.

NIKKO MARU

Toa Kaiun K.K.; 1903; *Mitsubishi Dockyard & Engineering Works*; 5,057 tons; 428-1x48-8x26-7; 785n.h.p.; triple-expansion engines. The steamship *Nikko Maru*, serving as a transport, was torpedoed

NIKKYU MARU

and sunk by the U.S. submarine *Tirante* on April 9th, 1945, in the Yellow Sea.

NIKKYUMARU

Nissan Kisen K.K.; 6,529 tons.
The steamship *Nikkymaru* was torpedoed and sunk by the U.S. submarine *Jack* on July 4th, 1943, S. of Shizuoka, Japan.

NIKOKLIS

N. G. Moraitis; 1921; *N.V. Burgerhouts M. & F.*; 3,576 tons; 360-2x50•3x21•8; 345 n.h.p.; triple-expansion engines. The Greek steamship *Nikoklis* was torpedoed and sunk by a German submarine on July 14th, 1941, off the Azores. Seventeen of her crew of 28 were killed. The survivors were eventually picked up at Cape Juby, Morocco, 20 days later.

NIKOLAOS STATHATOS

G.N. Stathatos; 1882; *W. Denny & Bros.*; 3,801 tons; 322-6x42-1x25-1; 309 n.h.p.; compound engines. The Greek ship *Nikolaos Stathatos* was lost on about December 13th, 1920, when approximately 40 miles from Cape Ortegal. She was carrying coal from Barry to Genoa.

NIKOLAUS

German Government; 1922; *J.L. Thompson & Sons*; 6,397 tons; 411-8x55x33-6; 402 n.h.p.; triple-expansion engines. The steamship *Nikolaus* was formerly the Greek *Nicolaon Ourania*, bombed at Suda Bay in April, 1941 during the invasion of Greece, and repaired by the Germans.

On September 21st, 1943, she was torpedoed and sunk by a Polish submarine outside Rastia.

NIKOLINA MATKOVIC

E. Matkovic; 1918; *Long Beach S.B. Co.*; 3,672 tons; 340-5 x 48x24-7; 488 n.h.p.; oil engines.
The Yugoslav motorship *Nikolina Matkovic* was torpedoed and sunk by a German submarine on October 13th, 1942, on a voyage from New York to Liverpool. Fourteen of her crew were killed.

NILE

British & Irish Steamship Co.; 1849; *Greenock*; 700 tons; 200 n.h.p.; 10 knots; compound engines.
The steamship *Nile*, Captain Moppett, left Liverpool for Penzance and London on the evening of November 28th, 1854, with five passengers together with 25 crew. On the night of the 30th, in heavy seas and thick weather, she ran on to a group of rocks known as the "Stones", stretching out from Godrevy Island, near St. Ives and sank in deep water.
The vessel was lost with all her passengers and crew.

NILE

Peninsular & Oriental S.N. Co.; 1906; *Caird & Co.*; 6,702 tons; 449-8x52-2x30-6; 707 n.h.p.; quadruple-expansion engines. The British cargo ship *Nile* was wrecked off Awashima Island on January 11th, 1915, while on a voyage from London, via Moji, to Kobe. She was carrying a cargo of pig iron, sulphate of ammonia and cotton.

NILS GORTON

Rederi-AB Gylfe; 1921; *Howaldtswerke*; 1,809 tons; 260-9 X 40-9x17-5; 149 n.h.p.; triple-expansion engines. The Swedish steamship *Nils Gorton* was torpedoed and sunk by a German submarine on August 13th, 1940, on a voyage from St. John's, N.F.L., to Ridham Dock.

NIMBA

U.S. Maritime Commission; 1900; *Osbourne, Graham & Co.*; 1,854 tons; 281-2x40-5x18-1; 192 n.h.p.; triple-expansion engines.
The Panamanian steamship *Nimba* was torpedoed and sunk by a German submarine on September 13th, 1942, between Paramaribo and Trinidad. The captain, 17 crew and seven passengers were lost.

506

NIMBIN

North Coast Steam Nav. Co.; 1927; *Burmeister & Wain*; 1,052 tons; 215x35-1x11-9; 235 n.h.p.; oil engines. The Australian motorship *Nimbin* struck a mine and sank on December 5th, 1940, off Sydney, N.S.W. The captain and six of the crew were killed.

NIMROD

Cork Steamship Co.; 1843; *Vernon & Co.*; 583 tons; 177x 25 X16; 300 n.h.p.; 10 knots; side lever engines. The paddle steamer *Nimrod*, Capt. Lyell, left Liverpool for Cork on February 25th, 1860, with 45 persons all told. Her engines broke down in the Irish Sea on the 27th and she was in a bad way when the steamship *City of Paris*, bound for Waterford, arrived and offered assistance. There was a certain amount of bargaining between the two captains as to the cost of towing the ship to Milford, and eventually the captain of the *City of Paris* offered to bring the *Nimrod* to port and leave the question of costs to be decided between the respective owners. This offer was declined. The *City of Paris* resumed her voyage and the *Nimrod* continued under sail. Later the *Nimrod*'s plight became so bad that she drove on to the rocks off St. David's Head and became a total wreck. Observers on the cliffs watched the ship gradually driven to her doom without being able to afford assistance. All 45 persons on board were drowned.

NINA

Soc. Anon. Ilva; 1919; *Poison Iron Works Co.*; 2,212 tons; 259-8x43-8x21-6; 175 n.h.p.; triple-expansion engines. The Italian steamship *Nina* was torpedoed and sunk by a British submarine on February 10th, 1944, outside Genoa.

NINA

E. Mortensen; 1917; *N.V. Boele's Scheepsbouw & Maschinenfabriek*; 1,488 tons; 240-2x36-2x16-8; 138 n.h.p.; triple-expansion engines.
The Norwegian steamship *Nina*, under German control, struck a mine and sank on October 27th, 1944, at Schulz's Grund, in the Kattegat.

NINA BIANCHI

Raffaele Bianchi; 1918; *Poison Iron Works Co.*; 2,180 tons; 261-1x43-6x20-7; 175 n.h.p.; triple-expansion engines. The Italian ship *Nina Bianchi* was sunk in a collision with the steamship *Veloce* on October 10th, 1940, off San Cataldo di Lecce.

NINA BORTHEN

H. Borthen & Co. A/S; 1930; *Armstrong Whitworth & Co.*; 6,123 tons; 396-2x55-1x32-3; 582 n.h.p.; oil engines. The Norwegian motorship *Nina Borthen* left Milford Haven on September 30th, 1940, for Table Bay and was not seen again. She was thought to have been sunk by a German submarine on about October 6th, midway between Inishtrahull and Cape Farewell.

NINETTO G.

G. Gavarone; 1913; *Cantiere Navale Triestino*; 5,335 tons; 400-1x52-1x28-8; 499 n.h.p.; triple-expansion engines. The Italian steamship *Ninotto G.* was torpedoed and sunk by a British submarine on April 5th, 1942, S. of the Strait of Messina.

NINUCCIA

G. Gavarone; 1910; *Richardson, Duck & Co.*; 4,583 tons; 395-4x50-1x24-4; 310 n.h.p.; triple-expansion engines. The Italian steamship *Ninuccia* was torpedoed, shelled and sunk by a British submarine on January 28th, 1942, off Cape Planka, S. of Sibenik.

NIobe

British Navy, sloop; *Great Britain*; 1,083 tons; 187x36x9-2; 300 n.h.p.; 12 knots; steam engines; one 7 in. gun, three 40pdrs. While serving on the North American Station, under Cdr. David Boyle, the sloop *Niobe* was wrecked off Miquelon Island, near Newfoundland, on May 21st, 1874. The number lost is not known.

NIOBE

Societe Navale Caennaise; 1905; Sunderland S.B. Co.; 1,319 tons; 240x34x15-7; 156n.h.p.; triple-expansion engines. The French steamship *Niobe* was torpedoed and sunk by a German submarine in the Bay of Biscay on February 16th, 1917.

NIOBE

German Navy, training ship; 1913; Frederikshaven; 650 tons; 151-2x30x15-9; 240 n.h.p.; 8 knots; auxiliary motor. The German training ship *Niobe* was originally a Norwegian vessel which had been adjudged a prize during the First World War. She was barque rigged and fitted with an auxiliary motor.

On July 25th, 1932, the *Niobe* left Kiel for a training cruise in the Baltic under Captain-Lieutenant Ruhfass, having on board 109 persons, of whom about 80 were naval cadets. Shortly after leaving port, and when close to the Fehmarn Island lightship the barque was capsized by a sudden squall and sank in four minutes.

The *Niobe* went down with 69 officers, seamen and cadets. Captain-Lieutenant Ruhfass, who was on deck at the time, was among the survivors.

Boats from the lightship and the steamship *Therese Russ*, which was nearby, picked up 40 of the ship's company.

Salvage operations were commenced without loss of time and the ship was raised on August 19th, when it was found that all her masts had gone by the board. The bodies of 34 of her people were found below deck.

The disaster is comparable with that which befell the British training frigate *Eurydice* (which see) off the Isle of Wight on March 24th, 1878.

NIOBE

Societe Navale Caennaise; 1920; Blyth S.B. & D.D. Co.; 1,684 tons; 260-3x37-3x16-4; 244 n.h.p.; triple-expansion engines.

The French steamship *Niobe* struck a mine and sank on June 11th, 1940, outside Havre.

NIOBE

German Navy, anti-aircraft cruiser; 1900; Rotterdam Dockyard; 3,512 tons; 311-7x48-3x17-7; 10,000h.p.; 15 knots; Yarrow boilers; 8 heavy A.A. guns, 2 T.T.

The old Dutch cruiser *Gelderland* was captured by the Germans when they invaded Holland in 1940. They reconstructed the ship which they renamed the *Niobe*, as an anti-aircraft cruiser. On July 16th, 1944, she was in the Baltic in the Finnish Leads when the Russian Air Force made a strong attack upon the shipping there. Altogether 130 bombers, torpedo bombers and fighters took part in the operation. The anti-aircraft cruiser was unable to repel the repeated attacks made upon her by the Russian aircraft and she was finally blown up and sunk.

NIPPO MARU

Okazaki Honten K.K.; 1936; Kawasaki Dockyard Co.; 3,755 tons; 353-6x50x27-9; 500 n.h.p.; turbine engines.

The steamship *Nippo Mam* was sunk by U.S. carrier-based aircraft on February 17th, 1944, in the Caroline Islands.

NIPPO MARU

Japanese Government; 1938; Eriksbergs Mek. Verkstad; 6,079 tons; 461-8x62-2x27-2; 1,282 n.h.p.; oilengines. The motor vessel *Nippo Maru* was formerly the Swedish *Ningho*, seized by the Japanese at Hongkong in December, 1941. She was torpedoed and sunk by the U.S. submarine *Flasher* on June 29th, 1944, N.E. of Zingga Island, Indonesia.

NIPPO MARU

Nissan Risen K.K.; 1,942 tons.

The steamship *Nippo Maru* was torpedoed and sunk by the U.S. submarine *Skate* on July 16th, 1944, about 200 miles W. of the Kurile Islands.

NIPPO MARU

Tino Kaiun K.K.; 10,528 tons.

The tanker *Nippo Maru* was torpedoed and sunk by the U.S. submarine *Bergall* on October 27th, 1944, about 50 miles N.W. of Kudat, North Borneo.

NIPPON MARU

Yamashita Kisen K.K.; 1936; Kawasaki Dockyard Co.; 9,975 tons; 499-1x64-9x37-1; 2,115 n.h.p.; oilengines.

The tanker *Nippon Maru* was torpedoed and sunk by the U.S. submarine *Scamp* on January 14th, 1944, about 250 miles S.W. of the Caroline Islands.

NIPPONKAI MARU

Shimatani Kisen K.K.; 1932; Mitsui Bussan Kaisha; 2,681 tons; 299-2x43x22-7; 268 n.h.p.; oilengines.

The motor vessel *Nipponkai (Nihonkai) Maru* was taken over by the Japanese Navy for use as a motor torpedo boat tender. On June 17th, 1944, she was torpedoed and sunk by the U.S. submarine *Flounder* east of Mindanao Island, Philippines.

NIPSIC

United States Navy, wooden steam frigate; barque rigged; 1878; Washington Navy Yard; 1,375 tons; 183-9x36x14-2; 839 i.h.p.; 10-7 knots; compound engines; four 9 in. guns, one 60 pdr. (all m.l.r.), 2 smaller; 1 m.g.

The *Nipsic* was one of a squadron of three ships under command of Rear-Admiral Kimberley, U.S.N., lying in the harbour of Apia, Samoa, on the night of the hurricane of March 15th-16th, 1889.

At the height of the storm the *Nipsic* was run on to the beach by her captain, Cdr. D. W. Mullen, in order to save her from being flung on the reef at the upper end of the harbour. In getting out the ship's boats one capsized and seven men were lost. The action of the captain undoubtedly saved both ship and the remainder of the crew, for the *Nipsic* was subsequently towed off and repaired.

The full story of the hurricane is told under the name of the U.S. flagship *Trenton*.

NIREFS

Hellenic Co. of Marine Enterprises; 1915; Craig, Taylor & Co.; 4,080 tons; 383 X52-7X22-9; 368 n.h.p.; triple-expansion engines.

The Greek steamship *Nirefs* struck a mine and sank off Ushant on June 14th, 1917.

NIRITOS

G. C. Dracoulis; 1906; Short Bros; 3,756 tons; 350-4X50-1x23-1; 319 n.h.p.; triple-expansion engines.

The Greek steamship *Niritos* was sunk by a submarine in the Mediterranean on April 12th, 1917.

NIRITOS

G. C. Dracoulis; 1907; W. Gray & Co.; 3,854 tons; 345X50-IX 25; 316 n.h.p.; triple-expansion engines.

The Greek steamship *Niritos* was torpedoed and sunk by a German submarine on October 18th, 1940, W. of Ireland. There were 14 survivors.

NIRPURA

British India Steam Navigation Co.; 1921; W. Gray & Co.; 5,961 tons; 450x56x27; 656n.h.p.; 12 knots; triple-expansion engines.

The steamship *Nirpura* with 737 horses, mules and donkeys on board was steaming in convoy from Durban on March 3rd, 1943, when she was torpedoed by a submarine off East London. The attack took place during darkness but the vessel did not sink until daybreak, when she broke in two. Two officers, six Indian ratings, of whom three belonged to another vessel, and about 30 South African Army mule tenders were lost.

NISHI MARU

Japanese Government; 1921; Scott's S.B. & E. Co.; 2,655 tons; 310-3x44-2x20-9; turbine engines.

The steamship *Nishi Maru* was formerly the British *Kalgan*, seized by the Japanese at Bangkok in December, 1941. She was sunk by U.S. carrier-based aircraft on November 13th, 1944, in Manila Bay.

NISHIYAMA MARU

Itaya Shosen K.K.; 1921; Matsuo Iron Works & Dockyard; 3,016 tons; 311x44-2x27; 261 n.h.p.; triple-expansion engines.

The steamship *Nishiyama Maru* was torpedoed and sunk by the U.S. submarine *Swordfish* on August 22nd, 1943, 450 miles N.W. of Schouten Island, Dutch New Guinea.

NISSAN MARU

Nissan Risen K.K.; 1938; *Osaka Iron Works*; 6,537 tons; 424-1x57-4x34-4; 500 n.h.p.; turbine engines. The steamship *Nissan Maru* was bombed and sunk by U.S. land-based aircraft on June 18th, 1942, S.W. of Adak Island, Aleutian Islands.

NISSAN MARU No. 1

Nissan Risen K.K.; 6,889 tons. The steamship *Nissan Maru No. 1* struck a mine and sank on May 26th, 1945, off Shimonoseki.

NISSEIMARU

Japanese Government; 1889; *Sunderland S.B. Co.*; 1,468 tons; 243-2X34-1X18•1; 138 n.h.p.; triple-expansion engines. The steamship *Nissei Maru* was formerly the Chinese *Lee Cheng*, seized by the Japanese. She was torpedoed and sunk by the U.S. submarine *Thresher* on September 25th, 1944, about 150 miles W. of Inchon, Korea.

NISSHIN MARU

Otsubo Tomijiro; 1878; *Foochow French Arsenal*; 1,128 tons; 216-5 x29-1x17; 161 n.h.p.; compound engines. The *Nisshin Maru* founded on February 9th, 1920, off Taipeh, on a voyage from Yaeyama to Keelung with passengers.

All the passengers were saved but about half the crew were drowned.

NISSHIN MARU

Hayashikane Shoten K.K.; 1936; *Kawasaki Dockyard Co.*; 16,801 tons; 537x74 X48-8; 1561 n.h.p.; oil engines. The tanker *Nisshin (Nissin) Maru* was torpedoed and sunk by the U.S. submarine *Greville* on May 6th, 1944, 60 miles north of Senaja, North Borneo.

NISSHIN MARU

Okazaki Honten K.K.; 1916; *Harima S.B. Co.*; 1,179 tons; 223X33X17-9; 88 n.h.p.; triple-expansion engines. The steamship *Nisshin (Nissin) Maru* was torpedoed and sunk by the U.S. submarine *Sea Devil* on April 2nd, 1945, about 120 miles S.W. of Mokpo, Korea.

NISSHIN MARU No. 2

Taiyo Hogeï K.K.; 1937; *Kawasaki Dockyard Co.*; 17,579 tons; 537x74x48-8; 1,561 n.h.p.; oil engines. The tanker *Nisshin (Nissin) Maru No. 2* sank on April 17th, 1943, off Formosa. The cause of her sinking is not known.

NISSHO MARU

Minami Kusutaro; 1896; *Wood, Skinner & Co.*; 1,412 tons; 243-3x36x18; 139 n.h.p.; triple-expansion engines. The *Nissho Mam* was carrying salt from Dairen to Kobe when she was wrecked at Pinnacle Island, Korea, on June 20th, 1925.

NISSHO MARU

Showa Tanker K.K.; 1938; *Mitsubishi Jukogyo K.K.*; 10,526 tons; 528-8x65-6x39-4; 2,250 n.h.p.; oil engines. The tanker *Nissho (Nissyô) Maru* was torpedoed and sunk by the U.S. submarine *Hoe* on February 25th, 1944, about 250 miles E. of Luzon Island, Philippines.

NISSHO MARU

Manshu Kaiun K.K.; 1,276 tons. The steamship *Nissho Maru* struck a mine and sank on June 18th, 1945, off Wakamatsu.

NISSHO MARU

Japanese Government; 1904; *Swan, Hunter & Wigham Richardson*; 2,284 tons; 290'4x42-1x15-4; 226 n.h.p.; triple-expansion. The steamship *Nissho Maru* was formerly the British *Yat Shing*, seized by the Japanese at Hongkong in December, 1941. She struck a mine and sank on July 17th, 1945, off Yawata, Japan.

NISSHO MARU No. 1

Marusho Kaiun K.K.; 1937; *Ohara Dockyard Co.*; 1,362 tons; 225-6x35x20-5; 106 n.h.p.; triple-expansion engines. The steamship *Nissho (Nissyô) Maru No. 1* struck a mine and sank on May 12th, 1945, off Karatsu, Japan.

NISSHO MARU No. 2

Marusho Kaiun K.K.; 1,386 tons. The steamship *Nissho Maru No. 2* was taken over by the Japanese Navy for use as an auxiliary gunboat. She was torpedoed and sunk by the U.S. submarine *Trepang* on March 3rd, 1945, 75 miles S. of Yokosuka.

NISSHO MARU No. 8

Marusho Kaiun K.K.; 1916; *Harima S.B. Co.*; 1,174 tons; 223 x33x 18; 88 n.h.p.; triple-expansion engines. The steamship *Nissho (Nissyô) Maru No. 8* struck a mine and sank on June 14th, 1945, off Inchon, Korea.

NISSHO MARU No. 16

Marusho Kaiun K.K.; 1939; *Ohara Zosen Tekkosho*; 1,174 tons; 216-5x33-8x18-2; triple-expansion engines. The steamship *Nissho (Nissyô) Maru No. 16* was taken over by the Japanese Navy for use as a submarine chaser. On February 1st, 1945, she struck a mine and sank off the south-west coast of Korea.

NISSHU MARU

Nissan Kisen K.K.; 1917; *Union Iron Works Co.*; 7,785 tons; 410-9x56-2x38-4; 600 n.h.p.; triple-expansion engines. The steamship *Nisshu (Nissyû) Maru* was torpedoed and sunk by the U.S. submarine *Cobia* on July 18th, 1944, N.W. of the Bonin Islands.

NISSHUN MARU

Nissan Kisen K.K.; 6,380 tons. The steamship *Nisshun Maru* was torpedoed and sunk by the U.S. submarine *Drum* on April 18th, 1943, about 400 miles N.E. of New Ireland.

NITA

A.Lauro; 1913; *Bonn&Mees*; 6,813 tons; 446x54-2x26-4; 470 n.h.p.; triple-expansion engines. The Italian steamship *Nita* was torpedoed and sunk by British aircraft on August 7th, 1942, about 20 miles S.W. of Lampedusa.

NITCHO MARU

Nissan Kisen K.K.; 1,940 tons. The steamship *Nitcho Mîru* was sunk by U.S. carrier-based aircraft on June 12th, 1944, about 200 miles W. of the Ladrone Islands.

NITEDAL

T. Sagen; 1903; *Laxevaags Maskin & Jernskibs.*; 1,974 tons; 268-2x38-8x17-3; 149 n.h.p.; triple-expansion engines. The Norwegian steamship *Nitedal* was torpedoed and sunk by a German submarine in the North Sea on October 20th, 1917.

NITH

Steel, Young & Co.; 1874; *R. Irvine & Co.*; 1,156 tons; 230X 30-9x17-2; 110 h.p.; compound-inverted engines. The British cargo ship *Nith* sank after a collision at Lisbon on April 7th, 1884, while on a voyage from Braila to Lisbon carrying a cargo of maize.

NITHSDALE

R. Mackill & Co.; 1900; *Tyne Iron S.B. Co.*; 3,478 tons; 335 X 48 X 24 • 7; 350 n.h.p.; triple-expansion engines. The British cargo ship *Nithsdale* was wrecked 15 miles from Kurrachee on July 9th, 1907, while on a voyage from Bunbury to Kurrachee carrying a cargo of railway sleepers.

NITSA

Kassos Steam Nav. Co.; 1915; *Irvine's S.B. & D.D. Co.*; 4,972 tons; 385 X 52x27-1; 320 n.h.p.; triple-expansion engines. The Greek steamship *Nitsa* was torpedoed and sunk by a German submarine on December 2nd, 1943, on a voyage from Calcutta to Aden. Eleven of her crew were killed.

NITTAI MARU

Nissan Kisen K.K.; 1921; *W. Doxford & Sons*; 6,484 tons; 420x54x34-3; 577 n.h.p.; triple-expansion engines. The steamship *Nittai Maru* was torpedoed and sunk by the U.S. submarine *Rasher* on March 3rd, 1944, about 100 miles N. of Menado, Celebes.

NITTATSU MARU

Nissan Kisen K.K.; 2,859 tons. The steamship *Nittatsu Maru* was torpedoed and sunk by the U.S. submarine *Bang* on April 30th, 1944, about 100 miles N.W. of Luzon Island, Philippines.

NITTETSU MARU

Nissan Kisen K.K.; 5,993 tons. The steamship *Nittetsu Maru* was torpedoed and sunk by the U.S. submarine *Dale* on October 14th, 1944, 45 miles W. of Pappar, North Borneo.

NITTO MARU

Toa Kaiun K.K.; 1920; *Fujinagata S.B. Co.*; 2,186 tons; 272 X 40 X 24 • 1; 226 n.h.p.; triple-expansion engines. The steamship *Nitto Maru* was torpedoed and sunk by the U.S. submarine *Seahorse* on July 3rd, 1944, about 250 miles E. of Hainan Island.

NITTOKU MARU

Akai Shoten K.K.; 1905; *Armstrong Whitworth & Co.*; 3,591 tons; 350 X 52 x 23-4; 337 n.h.p.; triple-expansion engines. The steamship *Nittoku Maru* was torpedoed and sunk by the U.S. submarine *Snook* on February 14th, 1944, off Nagasaki.

NITTSU MARU

Okazaki Honten K.K.; 1917; *Ishikawajima S.B. & E. Co.*; 2,183 tons; 268x40-7x23-5; 169 n.h.p.; triple-expansion engines. The steamship *Nittsu (Nittu) Maru* was torpedoed and sunk by the U.S. submarine *Wahoo* on March 21st, 1943, off the west coast of Korea.

NIVERNAIS

Soc. Gen. de Transports Maritimes a Vapeur; 1882; *J. Elder & Co.*; 2,555 tons; 325-5x37-1x25-5; 277 n.h.p.; compound engines. The French steamship *Nivernais* was torpedoed and sunk by a submarine in the Mediterranean on June 10th, 1918.

NIVOSE

French Navy; 1931; *Deutsche Werft*; 9,131 tons; 466-8x 61-8x36'5; 256 n.h.p., compound engines. The tanker *Nivose*, on a voyage from Hampton Roads to North Africa with 11,000 tons of fuel oil, was bombed by German aircraft, and blew up and sank on November 11th, 1943, off the coast of Algeria.

NIYO MARU

Japanese Government; 1921; *New Engineering & S.B. Works*; 1,350 tons; 243 x 37 x 15; 138 n.h.p.; triple-expansion engines. The steamship *Niyo Maru* was formerly the Norwegian *Hafthor*, captured by the Japanese in December, 1941. She was sunk by British aircraft on September 12th, 1942, off Burma.

NIYO MARU

Asano Bussan K.K.; 10,022 tons. The tanker *Niyo Maru* was sunk by U.S. carrier-based aircraft on September 21st, 1944, off Corregidor.

NOBORIKAWA MARU

Hokkaido Tanko Kisen K.K.; 1922; *Uruga Dock Co.*; 2,182 tons; 268x40-7x23-6; triple-expansion engines. The steamship *Noborikawa Maru* was torpedoed and sunk by the U.S. submarine *Trigger* on June 1st, 1943, off Tateyama, Japan.

NOJIMA

Japanese Navy; 4,500 tons (approx.). The steamship *Nojima* was bombed and sunk by U.S. and Austro-

lian land-based aircraft on March 3rd, 1943, in the Straits of Macassar.

NOJIMA MARU

Nippon Yusen K.K.; 1935; *Mitsubishi Jukogyo Kaisha*; 7,189 tons; 449-6x62-3x34-4; 1,851 n.h.p.; oil engines. The motorship *Nojima (Nozima) Maru* was bombed and sunk by U.S. land-based aircraft on September 28th, 1942, off the Aleutian Islands.

NOKAZE

Japanese Navy, destroyer; 1921; *Maizuru*; 1,215 tons, 336-5x29-2x9-5; 38,500 s.h.p.; 34 knots; turbine engines; Kampon boilers; four 4-7 in. guns, 2 A.A. m.g., 6 T.T. The destroyer *Nokaze* was torpedoed and sunk off Cape Varella, Indo-China, by the U.S. submarine *Pargo* on February 20th, 1945. The destroyer's normal complement was 148.

NOMAD

British Navy, destroyer; 1916; *A. Stephen & Sons*; 1,025 tons; 271x26x8-7; 25,000 s.h.p.; 34 knots; turbine engines; Yarrow boilers; three 4 in. guns, 4 T.T. The destroyer *Nomad*, Lt.Cdr. P. Whitfield, was a unit of the 13th Flotilla at the battle of Jutland on May 31st, 1916. At 4.15 on the afternoon of the battle the flotilla made a determined attack on Admiral Hipper's battle cruisers, *Nomad* being the second in the line. She was hit in the boilers and disabled before she came within torpedo range. About 30 minutes later the battleships of the German High Seas Fleet steaming to the assistance of Admiral Hipper came upon *Nomad* and her sister ship, *Nestor*, lying athwart their course. Despite the avalanche of fire that fell upon them both destroyers discharged their torpedoes in a gallant, but futile, gesture of defiance. The survivors from both craft then took to the boats, being picked up later by a German destroyer.

Considering the heavy fire to which they had been subjected the casualties among *Nomad's* complement of 80 were miraculously light, amounting to one officer and seven ratings killed. Four officers and 68 ratings became prisoners of war.

NOMINOE

Soc. Anon. des Chargeurs de VQuest; 1913; *W. Gray & Co.*; 3,155 tons; 320'3x46-5x21-1; 288 n.h.p.; triple-expansion engines. The French steamship *Nominoe* was torpedoed and sunk by a German submarine while lying at anchor off Lowestoft on March 19th, 1916.

NONNI

Russian Volunteer Fleet Association; 1909; *Rickmers Akt. Ges.*; 4,105 tons; 366x9-47-7x27-3; 261 n.h.p.; triple-expansion engines. The Russian steamship *Nonni* was torpedoed and sunk by a German submarine in the English Channel on December 8th, 1917.

NOR

Akties. Rodseth & Co.; 1901; *Laxevaags Maskin & Jernskibs*; 1,418 tons; 245'1x36-2x16-8; 132 n.h.p.; triple-expansion engines. The Norwegian steamship *Nor* was torpedoed and sunk by a German submarine in the Irish Channel on December 14th, 1917.

NORA

M. G. Martinson; 1902; *Hasseldalens Jernskibs.*; 1,186 tons; 231-4x34x13-7; 97 n.h.p.; triple-expansion engines. The Estonian steamship *Nora* was torpedoed and sunk by a German submarine on October 13th, 1940, about 200 miles W. of the Hebrides on a voyage from Pughwash to Belfast.

NORA SALIARI

K. Ch. Saliaris & A. Negropontes; 1902; *R. Stephenson & Co.*; 3,869 tons; 340 X 47 • 1 x 20; 314 n.h.p.; triple-expansion engines. The Greek ship *Nora Saliari* foundered on May 19th, 1924, off Cape Carbon, near Bougie. She was carrying ore.

NORAH MOLLER

Moller Line; 1915; Harland & Wolff; 4,434 tons; 365-2 x 50-1x26-5; 567-n.h.p.; oilengines.

The British motorship *Norah Moller*, on a voyage from Singapore to Calcutta, was bombed and set on fire by Japanese aircraft on the night of February 2nd, 1942. The fire could not be controlled and the ship was abandoned the next morning off West Nangka Point, Banka Strait. Seventeen of her crew were killed.

NORANMORE

Belgian Maritime Trading Co.; 1898; W. Doxford & Sons; 5,640 tons; 420 x50-2x—; 413 n.h.p.; triple-expansion engines.

The Belgian steamship *Noranmore*, on a voyage from Batoum to Bombay with case oil, capsized during a heavy gale on August 25th, 1901, off Athina, Black Sea.

The sole survivor of her crew of 40 was picked up from a waterlogged boat four days later.

The *Noranmore* floated upside down for 12 days before sinking.

NORBITON

Commercial S.S. Co.; 1873; Wither, Alexander & Co.; 1,037 tons; 225-4x29-9x16-8; HOH.p.; compound engines. The British cargo ship *Norbiton* sank after a collision with the Greek steamship *Andrea Vagliano* about 20 miles south of Start Point on August 13th, 1887, while on a voyage from Cardiff to Rouen carrying a cargo of coal. Eleven of her crew were saved.

NORD

Anglo-Saxon Petroleum Co.; 1900; Grangemouth & Greenock Dkyd. Co.; 1,892 tons; 269-4x42-2x17-5; 204 n.h.p.; triple-expansion engines.

The British steamship *Nord* foundered on November 7th, 1915, off Cape Pillar, Tasman Island, while on a voyage from Melbourne to Hobart.

NORD

Wallem & Co.; 1904; Sunderland S.B. Co.; 3,193 tons; 314X 46-5x20-6; 262 n.h.p.; triple-expansion engines. The Panamanian steamship *Nord* was torpedoed and sunk by a Japanese submarine on January 21st, 1942, in Preparis North Channel on a voyage from Calcutta to Rangoon with coal. A few survivors were reported to have landed in Burma.

NORDANLAND

Axel Brostrom & Son; 1946; Eriksbergs Mek. Verkstad; 4,147 tons; 408-1x57-8x20-8; 1,107n.h.p.; oilengines. The Swedish motorship *Nordanland* was at Genoa on February 19th, 1955, when she smashed against the quay, sprang leaks and became partially submerged. She was carrying calcium carbide. Two days later the cargo exploded and the resulting fire burned until March 5th. A further explosion on March 11th wrecked the ship completely.

NORDEFLENGE

Constants (South Wales); 1942; W. Gray & Co.; 2,873 tons; 315-4x46-5x23; 269 n.h.p.; 10 knots; triple-expansion engines.

The steamship *Nordeflinge*, Capt. G. G. Maunder, was bombed and sunk by German aircraft on the night of May 30th, 1944, about 40 miles N.E. of Algiers. Twelve men were killed. Capt. Maunder was among the survivors.

NORDENHAM

Midgard Deutsche Seeverkehrs; 1914; J. C. Tecklenborg A.G.; 4,592 tons; 386-7x49-1x30; 400 n.h.p.; triple-expansion engines.

The German steamship *Nordenham* was torpedoed and sunk by a Russian submarine on December 9th, 1944, near Windau.

NORDEFAHRT

Norddeutsche Kohlen-u. Cokeswerke; 1910; Wood, Skinner & Co.; 2,543 tons; 304-4x42-2x18-7; 254 n.h.p.; triple-expansion engines.

The German steamship *Nordfahrt* struck a mine and sank on February 10th, 1945, in Kiel Bay

NORDFJELD

Gorrissen & Co.; 1900; C. S. Swan & Hunter; 3,631 tons; 348x45-3x17-8; 308 n.h.p.; triple-expansion engines. The Norwegian ship *Nordfjeld* was wrecked on November 22nd, 1922, in Flowers Cove, Newfoundland, while on a voyage from Sunderland to Gaspe, carrying coal.

NORDHAV

BechsRederiAkties.; 1893; Russell & Co.; 2,846 tons; 280-2 X 44-8x22-9.

The Norwegian sailing ship *Nordhav* was sunk by a German submarine in the Western Atlantic on August 17th, 1918.

NORDHAVET

P. Brown, Jr. & Co.; 1930; Burmeister & Wain; 4,671 tons; 385-6x54-9x24-8; 541 n.h.p.; oil engines. The Danish motorship *Nordhavet* struck a submerged object and sank on September 24th, 1945, when about 14 miles S. of Cape St. Mary. She was carrying grain from Montreal to Antwerp.

NORDIA

Red. A/B Hogands; 1921; N.V. Scheepswerf Juliana; 1,316 tons; 236-3x36-4x 16; 127 n.h.p.; triple-expansion engines. The Swedish ship *Nordia* was on a voyage from Hull to Gothenburg when she was involved in a collision and sank off the Norwegian coast on February 26th, 1940.

NORDKYN

Alb. Harloff; 1895; Ropner & Son; 3,244 tons; 325x43x18; 272 n.h.p.; triple-expansion engines.

The Norwegian steamship *Nordkyn* was torpedoed and sunk by a German submarine in the Atlantic on March 12th, 1918.

NORDPOL

H. C. Gorrissen; 1903; Constructora Naval Espanola; 2,055 tons; 281-4x40x19-1; 184 n.h.p.; triple-expansion engines. The Norwegian steamship *Nordpol* was torpedoed and sunk by a submarine in the Mediterranean on December 25th, 1917.

NORDSTRAND

The Shipping Controller (W. A. Massey & Sons); 1891; Richardson, Duck & Co.; 1,939 tons; 269-9x36-6x16-5; 176 n.h.p.; triple-expansion engines.

The British cargo ship *Nordstrand* was wrecked three-quarters of a mile north-east of Whitby Piers on March 18th, 1918. She was on a voyage from the Tyne to Rouen carrying a cargo of coal.

NORDVANGEN

Gorrissen & Co.; 1929; International S.B. & E. Co.; 2,400 tons; 291 • 2x45-7x18-5; 215 n.h.p.; compound engines. The Norwegian ship *Nordvangen* was carrying bauxite from Paramaribo, which she left on February 18th, 1942, to Trinidad and New Orleans, but she was not seen again. A lifeboat was washed ashore.

NORVDARD

German Government; 1925; Kockums Mek. Verkstad; 4,111 tons; 377-6x54x22-9; 439 n.h.p.; oilengines. The motorship *Nordvard* was formerly Norwegian, captured by a German raider in the Indian Ocean on September 15th, 1940, and taken to Bordeaux. On December 29th, 1944, she was bombed by British aircraft at Moss, Norway, and blew up and sank with the loss of 116 lives.

NORFOLK

*Federal Steam Navigation Co.; 1918; Bremer-Vulkan; 10,948 tons; 520*7x64-2x38-1; 1,270 n.h.p.; 14 knots; triple-expansion engines & L.P. turbines.*

The liner *Norfolk*, Capt. F. Lougheed, was torpedoed and sunk by a German submarine on June 18th, 1941, approximately 150 miles N.N.W. of Malin Head on a voyage from Newport to New York and New Zealand. One man was killed.

NORFOLK

Canada Steamship Lines; 1923; Swan, Hunter & Wigham Richardson; 1,901 tons; 252x42-5x18; 111 n.h.p.; triple-expansion engines.

The Canadian steamship *Norfolk*, on a voyage from Paramaribo Trinidad, was torpedoed and sunk by a German submarine on September 18th, 1942, off the coast of British Guiana. Six of her crew of 20 were lost.

NORFOLK COAST

Coast Lines; 1910; W. Harkess & Son; 782 tons; 195x30x11'6; 128 n.h.p.; 9 knots; triple-expansion engines. The steamship Norfolk Coast was torpedoed and sunk by a German submarine 23 miles S.E. of Flamborough Head on June 18th, 1918. Eight men were killed. The captain was among the survivors.

NORFOLK COAST

Coast Lines; 1937; Ardrossan Dockyard; 646 tons; 200-6X33-lx11-1; 224 n.h.p.; 11-5 knots; oil engines. The motor vessel Norfolk Coast, Capt. T. Humphreys, was torpedoed and sunk by a German submarine off the South Bishops, Stilly Isles, on February 28th, 1945. Seven persons were killed and six wounded; one of these died soon after being landed. Capt. Humphreys was among the survivors.

NORFOLK MARU

*Kawasaki Kisen K.K.; 1921; Kawasaki Dockyard Co.; 6,576 tons; 405x53x37; 578 n.h.p.; triple-expansion engines. The steamship Norfolk Maru was torpedoed and sunk by the U.S. submarine *Haddo* on August 21st, 1944, about 50 miles W. of Mindoro Island, Philippines.*

NORGE

Det Forenede D/S; 1881; A. Stephen & Sons; 3,318 tons; 337-6x40-8x22-7; 346 n.h.p.; 11-5 knots; compound engines.

The Danish steamship *Norge*, left Copenhagen on June 22nd, 1904, for New York with 700 emigrants and a crew of about 80. She ran on to the rocks at Rockall at 7.45 a.m. on June 28th. The engines were reversed and the ship came off the rocks but was badly holed and sank very quickly. Only 129 persons were saved; 27 were picked up by the trawler *Silvia*, 32 by the steamship *Cervona* and the captain's boat, with 70 people, was picked up later by the steamship *Energie*.

NORGE

Norwegian Navy, coast defence ship; 1900; Armstrong & Co.; 4,166 tons; 301-2x50-6x17-7; 4,500 i.h.p.; 16-5 knots; triple-expansion engines; Yarrow boilers; two 8-2 in. guns, six 5-9 in., eight 3 in., two 3 pdr.

On April 9th, 1940, the two Norwegian coast defence ships *Norge* and *Eidsvold* (which see) were lying at Narvik awaiting a German attack. It had been reported that a large enemy force of destroyers was proceeding up the coast with the intention of landing at the port, though the exact strength of this force, which turned out to be 11 destroyers, each carrying 300 soldiers, and several merchantmen, was not known. Neither of the Norwegian ships had its full complement of 270 on board as the suddenness of the German move had caught the Norwegian authorities unawares. The *Norge*, commanded by Capt. Askim, carried 199 all told. At 4.30 a.m., in thick weather, she weighed anchor and took up a position with her guns commanding the entrance to the port, the *Eidsvold* meanwhile was outside the harbour. Not long after this two German destroyers appeared out of the mist but did not answer to the Norwegian challenge, though a shot was fired across their bows. They disappeared without firing in reply, while at the same moment two other destroyers appeared close to the *Eidsvold*, to which ship they sent an officer to demand her surrender. This demand was promptly rejected and the ship was torpedoed, having signalled the German officer the refusal by firing a Very-light. The torpedo struck the *Eidsvold* in her forward magazine and she blew up and sank with 185 out of her crew of 193.

At 4.45 a.m. the *Norge* saw two German destroyers approaching out of the mist and opened fire with both 8-2 in. and 5-9 in. guns. The weather was in favour of the Germans, though visibility had

improved and they discharged six torpedoes, the last two striking the *Norge* amidships. She sank in a few minutes taking with her 110 officers and men, there being 89 survivors including Capt. Askim.

This disastrous action had cost the Norwegians the two largest and most powerful ships of their small navy, with a total loss of 295 officers and men killed. So dense were the mists and snow squalls that at no time was visibility greater than 900 yards. Five of the enemy destroyers were of 1,811 tons, and six were of 1,625 tons, all carrying the same armament of five 5 in. guns and eight torpedo tubes. These ships were the largest and newest of their type in the German Navy. They were destroyed by the British within the next five days, the story of their defeat being told under the *Hardy*, a flotilla leader lost in the first of the two battles of Narvik.

NORGE

A. Zanchi; 1907; Workman, Clark & Co.; 6,511 tons; 460-4x55-3x30-4; 650 n.h.p.; triple-expansion engines. The Italian steamship Norge was torpedoed and sunk by British aircraft on December 21st, 1940, E. of the Kerkenna Islands, Tunisia.

NORHAM

Thompson Steam Shipping Co.; 1896; C. S. Swan & Hunter; 1,791 tons; 280x38x19-1; 203 n.h.p.; triple-expansion engines. The British cargo ship Norham was wrecked on Longsand, near Harwich, on January 9th, 1904. She was on a voyage from Bilbao to Middlesbrough carrying an ore cargo.

NORHAUG

M. H. Kongshavn; 1899; Framnes Mek. Vcerksted; 1,245 tons; 240-8x35-3x14-8; 111 n.h.p.; triple-expansion engines. The Norwegian steamship Norhaug was torpedoed and sunk by a German submarine off Ushant on May 26th, 1917.

NORHAUK

Norwegian Government; 1919; G. M. Standifer Construction Corp.; 6,086 tons; 401-4x53-2x31-9; 553 n.h.p.; triple-expansion engines. The Norwegian steamship Norhauk struck a mine and sank on December 21st, 1943, in the Straits of Dover. Eleven of her crew were killed.

NORLAND

*Norwegian Government; 1941; Blythswood S.B. Co.; 8,134 tons; 463-2x61-2x33; 490 n.h.p.; oil engines. The Norwegian tanker Norland was torpedoed and sunk by a German submarine on May 20th, 1942, on a voyage from the Clyde to Corpus Christi. Fourteen of her crew were picked up by the Dutch motorship *Polyphemus*, which was herself sunk six days later.*

NORLANDIA

Merchants & Miners Transportation Co.; 1919; Manitowoc S.B. Co.; 2,689 tons; 253-4x43-8x26-2; 206 n.h.p.; triple-expansion engines. The American steamship Norlandia was torpedoed and sunk by a German submarine on July 4th, 1942, between San Juan, Puerto Rico, and Nuevitas. Nine of the crew were killed.

NORLANTIC

Norlasco S.S. Corp.; 1920; Detroit S.B. Co.; 2,606 tons; 251 x43-6x26-1; 226 n.h.p.; triple-expansion engines. The American steamship Norlantic was torpedoed, shelled and sunk by a German submarine on May 12th, 1942, N. of Guirra on a voyage from Pensacola to Puerto la Cruz. Ten of her crew were lost.

NORLA VORE

North Atlantic & Gulf S.S. Co.; 1919; Globes S.B. Co.; 2,713 tons; 253-4x43-8x26-9; 266 n.h.p.; triple-expansion engines. The American ship Norlavore left Baltimore on February 22nd, 1942, for Puerto la Cruz but was not seen again. It was assumed that she had been torpedoed by a German submarine, probably on the 26th, about 300 miles E. of Wilmington, North Carolina.

NORLINA

NORLINA

*Garland S.S. Corp.; 1909; W. Gray & Co.; 4,523 tons; 385x51*1x26-4; 391 n.h.p.; triple-expansion engines.*
The American ship *Nor Una* was wrecked on August 4th, 1926, at Horseshoe Point, 45 miles N. of San Francisco.

NORLINDO

Merchants & Miners Transportation Co.; 1920; Globe S.B. Co.; 2,686 tons; 255-4x43-8x26-9; 194n.h.p.; triple-expansion engines.
The American steamship *Norlindo* was torpedoed and sunk by a German submarine on May 4th, 1942, on a voyage from Mobile to Havana. Five of the crew were killed.

NORMA

Rederiaktieb. Kdrnan; 1885; J. Readhead & Co.; 1,443 tons; 256-4x36-1x15-8; 160 n.h.p.; compound engines. The Swedish steamship *Norma* was torpedoed and sunk by a German submarine in the English Channel on March 26th, 1917.

NORMAN

Northern Fishing Co. (Hull); 1943; Cook, Welton & Gemmell; 629 tons; 178-5x30x15-2; triple-expansion engines. The British trawler *Norman* was wrecked during fog off Cape Farewell, Greenland, on October 4th, 1952. She had sailed from Hull for the Greenland fishing grounds. Her crew of 20 scrambled on to a reef but fog and heavy seas prevented any attempt to rescue them until early on the following morning, by which time only one man was left alive.

NORMAN MONARCH

Monarch S.S. Co.; 1937; Caledon S.B. Co.; 47 18 tons; 432-6x 56-7x23-8; 292 n.h.p.; triple-expansion engines. The British steamship *Norman Monarch*, on a voyage from Halifax to Barry with wheat, was torpedoed and sunk by a German submarine on May 20th, 1941, about 200 miles S.S.E. of Cape Farewell. All her crew of 40 and eight gunners were taken off by the *Harpagiis*, in the same convoy, but 26 of these were drowned when the *Harpagus* was sunk later in the day.

NORMAN PRINCE

Prince Line; 1940; Smith's Dock Co.; 1,913 tons; 304x44-2 X 16-5; 2,270i.h.p.; 13 knots; triple-expansion engines. The steamship *Norman Prince*, Captain W. R. Harries, was torpedoed and sunk by a German submarine on May 28th, 1942, 80 miles W. of St. Lucia, Windward Islands. Captain Harries and 16 men were killed and two wounded.

NORMAN QUEEN

British Channel Islands Shipping Co.; 1938; Burntisland S.B. Co.; 957 tons; 197-2x32-3x13-1; 129 n.h.p.; triple-expansion engines. The steamship *Norman Queen* was torpedoed and sunk by a German motor torpedo boat on March 8th, 1941, off Cromer on a voyage from London to Boston, Lines. The captain was taken out of the water by the Germans but the remaining 12 of the crew and two gunners were drowned.

NORMANDIE

Compagnie Generale Transatlantique; 1935; Chantier et Ateliers de Saint Nazaire (Penhoet); 83,423 tons; 981-4 X117-9 x57-6; 28-5 knots; turbo-electric engines.
Until the advent of the *Queen Elizabeth* the *Normandie* was the largest ship in the world. On her maiden voyage she gained the Blue Riband of the Atlantic from the Italian liner *Rex*, but lost it in 1936 to the *Queen Mary*. She regained it in 1937 and held the record for both east and west crossings until August, 1939, when they again passed to the *Queen Mary*.

At the outbreak of war in 1939, the *Normandie* was laid up at the Hudson River Pier, New York, and in December, 1941, she was requisitioned by the U.S. Navy and renamed *Lafayette*.

In February, 1942, the flame from a workman's acetylene torch set fire to woodwork on the promenade deck. There was a high wind and the flames spread quickly. Damage was extensive and the vessel rolled over on her side in 50 feet of water. She was refloated and placed on an even keel in 1943, but she was never repaired and was finally broken up after the war.

NORMANDJET

The Shipping Controller (Lambert Bros.); 1902; Hellerup's Skibsveerft & Maskin; 1,843 tons; 265-7x37^2x16-1; 132 n.h.p.; triple-expansion engines.
The British ship *Normandjet* was torpedoed and sunk by a German submarine 34 miles S.W. by W. from the Calf of Man on April 21st, 1918. The captain and 18 of the crew were killed.

NORMANDY

London & South Western Railway Co.; 1863; J. Ash & Co.; 550 tons; 210x24x14; 225 n.h.p.; 15-5 knots; compound engines. The paddle steamship *Normandy*, Capt. C. B. Harvey, left Southampton for Jersey on March 18th, 1870, with 65 persons on board. Off the Isle of Wight, in dense fog, she collided with the steamship *Mary*, of Grimsby. The *Normandy* was cut down to the water's edge, the bow of the *Mary* striking her amidships. Two boats were launched and got away safely, the *Normandy* remaining afloat for about 30 minutes.

The crew of the *Normandy* behaved with great gallantry, and a memorial to their self sacrifice now faces the entrance to the harbour of St. Helier. The loss of life amounted to 34 persons, of whom 17 were passengers and 17 crew, including Capt. Harvey, the first officer and the chief engineer. The 31 survivors were picked up by the *Mary*, which was badly damaged but managed to reach port.

NORMANDY

*Joseph Constant; 1910; Earle's Co.; 1,714 tons; 250*4x42-5x17-8; 144 n.h.p.; triple-expansion engines.*
The British cargo ship *Normandy* struck a rock and sank near Great Island, N.F.L., on May 7th, 1910. She was on a voyage from the Tees to Toronto carrying a cargo of pig iron.

NORMANDY

London & South Western Railway Co.; 1910; Earle's Co.; 618 tons; 192X29-2x14-1; 82r.h.p.; 9 knots; triple-expansion engines.
The steamship *Normandy* was torpedoed and sunk by a German submarine eight miles E. by N. of Cape La Hague on January 25th, 1918. Fourteen men were killed. The captain was among the survivors.

NORMANDY COAST

Coast Lines; 1916; Sir Raylton Dixon & Co.; 1,428 tons; 260 X 38 x 15; 162 n.h.p.; 9 knots; triple-expansion engines.
The steamship *Normandy Coast*, Capt. F. Mara, was torpedoed and sunk by a German submarine off Anglesey on January 11th, 1945. Nineteen persons were killed and eight wounded. Capt. Mara was among the survivors.

NORMANNIA

P. Brown, Jr., & Co.; 1897; Howaldtswerke; 2,598 tons; 312-2X 45x20-5; 204 n.h.p.; triple-expansion engines. The Danish ship *Normannia* foundered on January 17th, 1924, 28 miles E. of Frying Pan Shoals lightship.

NORMANTON

William Milburn & Co.; 1882; Campbell, Mackintosh & Bowstead; 2,367 tons; 291-2x37^3x27-4; 300h.p.; compound inverted engines.
The British cargo ship *Normanton* was wrecked off Oosima, Japan, on October 24th, 1886, while on a voyage from Yokohama to Hiogo. She was carrying a general cargo which included tea.

NORNA

Rederi A/B Esperia; 1914; Akers Mek. Verksted; 1,022 tons; 221-5x34'9x14-8; 116 n.h.p.; triple-expansion engines. The Swedish ship *Norna*, with a crew of 18, left Gibraltar on February 7th, 1940, for Stockholm, but was not seen again.

NORNE

H. Kihlme; 1930; Eriksbergs Mek. Værks.; 3,971 tons; 350-7X 50-8x25-6; 355n.h.p.; oilengines.
The Norwegian motorship *Norne* was torpedoed and sunk by a German submarine on August 30th, 1940, E. of Stronsay. Seventeen of her crew were lost.

NORONIC

Canada S.S. Lines; 1913; Western D.D. & S.B. Co.; 6,905 tons; 362 x 52 x 24-8; triple-expansion engines.

The Canadian steamship *Noronic* was lying in Toronto harbour when fire broke out at 2.40 a.m. on September 17th, 1949. The ship was extensively damaged and sank on the following day. Of the 690 crew and passengers on board at the time of the fire, 136 lost their lives.

NORRVIK

Norrkøping Rederiaktieb.; 1881; W. Gray & Co.; 1,633 tons; 257-6 x 35-8 x 17-9; 170 n.h.p.; compound engines. The Swedish steamship *Norrvik* struck a mine and sank in the North Sea on December 2nd, 1915.

NORSA

Herskind & Woods; 1889; W. Gray & Co.; 2,085 tons; 275-1 x 37-3 x 19; 180 h.p.; triple-expansion engines. The British cargo ship *Norsa* was wrecked near Galle on January 17th, 1890. She was on a voyage from Middlesbrough to Madras carrying a cargo which included railway materials.

NORSE KING

Odd Godager; 1920; J. F. Duthie & Co.; 5,701; 410-4 x 54-2 x 27-7; 359 n.h.p.; triple-expansion engines. The Norwegian steamship *Norse King* was torpedoed and sunk by a German submarine on December 28th, 1942, on a voyage from Swansea to Boston. Thirty-eight lives were lost.

NORTH BRITAIN

North Shipping Co.; 1940; J. Readhead & Sons; 4,635 tons; 405-6 x 53-6 x 24-4; 406 n.h.p.; triple-expansion engines. The British steamship *North Britain* was torpedoed and sunk by a German submarine on May 5th, 1943, about 300 miles S. of Cape Farewell on a voyage from Glasgow to Halifax. Twenty-eight of her crew and six gunners were lost.

NORTH BRITON

Gibbs & Lee; 1892; Richardson, Duck & Co.; 2,157 tons; 282 x 37-5 x 17-3; 201 n.h.p.; triple-expansion engines. The British cargo ship *North Briton* foundered off Ushant on March 5th, 1912, while on a voyage from Sunderland to Sulina carrying a cargo of coal. The only survivor reported was picked up by the British steamship *Canada*.

NORTH CAMBRIA

Hugh Roberts & Son; 1907; Furness, Withy & Co.; 3,577 tons; 348-5 x 49-7 x 23-1; 312 n.h.p.; triple-expansion engines. The British cargo ship *North Cambria* sank after a collision in lat. 48°57'N., long. 6°47'W., on August 1st, 1918. She was on a voyage from New York to La Pallice carrying a cargo of railway material.

NORTH GWALIA

Munro Shipping Co.; 1888; J. Readhead & Co.; 2,233 tons; 290 x 39 x 18-8; 223 n.h.p.; triple-expansion engines. The British cargo ship *North Gwalia* sank after a collision with the Norwegian steamship *Mauranger* off Yarmouth on April 25th, 1909. She was on a voyage from Sunderland to St. Nazaire carrying a cargo of coal.

NORTH SEA

John P. Bruce; 1881; A. Stephen & Sons; 1,076 tons; 230 x 30-9 x 15-9; 137 n.h.p.; compound engines. The British cargo ship *North Sea* was wrecked on the Island of Stroma, Pentland Firth, on May 8th, 1896, while on a voyage from the Clyde to Copenhagen carrying a cargo of coal.

NORTH STAR

British Navy, destroyer; Palmer & Co.; 1,042 tons; 276-5 x 26-7 x 10-2; 25,000 s.h.p.; 34 knots; turbine engines; Yarrow boilers; three 4 in. guns, 4 T.T. The destroyer *North Star*, Lt. Cdr. K. C. Helyar, was a unit of the force under Vice-Admiral Sir Roger Keyes charged with the task of blockading the German submarine harbour at Zeebrugge. The

expedition concentrated in the Straits of Dover on the night of April 23rd, 1918, *North Star* and *Phoebe* being assigned the duty of patrolling off Zeebrugge mole in readiness to beat off any attack by enemy destroyers. At one o'clock on the morning of the 24th, just prior to the withdrawal of the British forces after sinking the block-ships, *North Star* made a torpedo attack on some enemy ships lying alongside the mole. This brought her within range of the German shore batteries which opened a hot and accurate fire. She became unmanageable and sank very quickly, *Phoebe* running alongside and taking off the majority of her crew of 80 officers and ratings.

The full story of the block-ships at Zeebrugge is told under *Vindictive*.

NORTH VOYAGEUR

Cia. de Nav. Mundial S.A.; 1909; A.G. Neptun; 1,014 tons; 214-6 x 32-1 x 13-7; triple-expansion engines. The Honduran ship *North Voyager* ran into heavy weather soon after leaving Halifax, N.S., for St. John's, N.F., with coal.

The ship sprang a leak in the engine room and took a heavy list. On the morning of October 22nd, 1950, the pumps became clogged with ash and the crew abandoned ship.

Eight survivors on a raft were picked up the next day by a Coastguard cutter.

NORTH WALES

North Wales Shipping Co.; 1909; J.L. Thompson & Sons; 4,072 tons; 351-7 x 51 x 25-7; 350 n.h.p.; 10 knots; triple-expansion engines.

The steamship *North Wales* with a crew of 30 left Hull on October 20th, 1916, for Canada in ballast, and was last reported in the neighbourhood of the Scilly Isles.

She was presumed to have been sunk by a German submarine.

NORTH WIND

Buckeye S.S. Co.; 1888; Globe Iron Works Co.; 2,476 tons; 299-5 x 40-8 x 21-6; 241 n.h.p.; triple-expansion engines. The American ship *North Wind* struck a reef and sank on July 1st, 1926, on Robinson Shoal, Georgina Bay.

NORTHAMPTON

United States Navy, heavy cruiser; 1929; Bethlehem Steel Co., Quincy; 9,050 tons; 600-2 x 66 x 23; 107,000 s.h.p.; 32-7 knots; turbine engines; White-Forster boilers; nine 8 in. guns, eight 5 in., two 3 pdr., 8 m.g.

The battle in which the U.S. heavy cruiser *Northampton* was lost was a sequel to the battle of Guadalcanal (see under *Atlanta*). The losses sustained by the Americans in this action, although they repulsed the Japanese, made it imperative for them to strengthen their cruiser arm in case the enemy made a second attempt to reinforce his troops on the island. They therefore formed a squadron of heavy cruisers under Rear Admiral C. H. Wright comprising the following ships: *Minneapolis*, *New Orleans*, *Northampton* and *Pensacola*, all over 9,000 tons with nine to ten guns of 8 in. calibre. Another cruiser, *Honolulu*, 10,000 tons, fifteen 6 in. guns, with four destroyers was attached to the force.

At the end of November the American naval authorities had reason to suppose that the Japanese contemplated landing troops and supplies on Guadalcanal within a few days. Admiral Wright was therefore ordered to Savo Sound where he was joined by two more destroyers making his squadron 11 ships in all. Late on the night of November 30th, 1942, when crossing the sound he ran into a squadron of seven Japanese ships. Visibility was not good and it was difficult to distinguish the enemy formation or the class of ship composing it. The American destroyers commenced the action with a torpedo attack the results of which remained in doubt. The *Minneapolis* and *New Orleans* then got the range of the Japanese destroyer *Takanami* and blew her up, but shortly afterwards every one of the American cruisers, except the *Honolulu*, was torpedoed. The Japanese force then retired having failed to land its reinforcements.

The only American vessel with vital damage was the *Northampton*, which sank during the night after her crew had been taken off. The other cruisers managed to reach harbour and were repaired.

The action was known as the battle of Tassafaronga. It marked the last attempt of the Japanese to pass reinforcements to Guadalcanal.

NORTHERN PRINCE

Prince Line; 1929; Lithgows; 10,917 tons; 496-2x64-9x 25-9; 10,000 b.h.p.; 16-5knots; oilengines. The liner *Northern Prince*, Capt. H. M. Butlin, was steaming in convoy through the Antikithera Channel, Greece, on April 3rd, 1941, when she was bombed and sunk by German aircraft. No lives were lost.

NORTHERN STAR

Nichol & Matthews; 1875; J. Yeo, Prince Edward Island; 338 tons; 120x27-7x14-9.
The wooden barque *Northern Star*, Capt. J. McKenzie, left Hokianga, New Zealand, on February 20th, 1893, for Wellington with a cargo of timber. She had a crew of eight.

A series of violent gales occurred between the time of her sailing and the 15th March when she was found floating bottom upwards at South Head near Kaipara. It was conjectured that at sometime during this stormy period she had been badly battered and had capsized.

NORTHERN SWORD

Sword Line Inc.; 1918; Bethlehem S.B. Corp.; 2,648 tons; 299-6x45x22-6; 220 n.h.p.; triple-expansion engines. The American ship *Northern Sword* was in collision with the *Fisher Ames* on February 8th, 1943, and sank about 50 miles N. of Cristobal.

NORTHFIELD

H.Keep; 1901; TyneIron Shipbuilding Co.; 2,099 tons; 288-5 x 43x18-9; 210 n.h.p.; 9 knots; triple-expansion engines. The steamship *Northfield* was torpedoed and sunk by a German submarine 25 miles S.W. of Lundy Island on March 3rd, 1918. The captain and 14 men were killed.

NORTHFLEET

JohnPatton & Co.; 1853; Pitcher & Co.; 951 tons; 180x32-3X 20-9.
The sailing ship *Northfleet*, Capt. Knowles, was lying at anchor off Dungeness on the night of January 22nd, 1873. There were 379 persons on board, most of whom were railway workmen who were to construct the Tasmanian railway. The cargo was chiefly railway iron, and the ship's destination was Tasmania. Her lights were burning brightly and the weather was clear.

At about 10.30p.m. the Spanish steamship *Murillo*, 300 tons, Capt. Berrute, collided at speed with the anchored ship, the passengers of which were asleep below. The *Northfleet* was struck amidships and cut down to the waterline; the *Murillo*, without waiting to ascertain the extent of the damage, made off in the darkness. There was considerable panic and Capt. Knowles fought, revolver in hand to hold back the crowd and save the women and children. Meanwhile the tug *City of London*, the lugger *Mary*, the *Princess* and a pilot cutter took off a number of people. There were many ships in the vicinity, but with the exception of the vessels mentioned they rendered no aid. The clipper *Corona* was lying at anchor 300 yards away but was not aware of the tragedy as the only man on watch-keeping duty was asleep.

Two other circumstances delayed prompt rescue, the first being that Capt. Knowles did not realise the seriousness of his ship's condition and therefore did not send up signals of distress until 15 minutes after the collision. The second was that the signal gun could not be fired owing to the touch hole being blocked.

Of those on board 320 were drowned, including the captain. The *Murillo* was arrested off Dover on September 22nd, eight months after the disaster. A Court of Admiralty condemned her to be sold and severely censured the officers.

In recognition of the courage and self-sacrifice of Capt. Knowles, his widow was awarded a Civil List pension.

NORTHMOOR

Moor Line; 1928; W.Doxford&Sons; 4,392 tons; 375x52-6x 25 • 7; 417 n.h.p.; oil engines.
The British motorship *Northmoor*, on a voyage from Lourenço Marques to Buenos Aires with coal, was torpedoed and sunk by a German submarine on May 17th, 1943, about 200 miles S.E. of Durban. Eleven of her crew and one gunner were lost.

NORTHWESTERN

U.S. Navy; 1890; Delaware River Co.; 3,094 tons; 336-2x 43-2x22; 339n.h.p.; triple-expansion engines. The steamship *Northwestern* was used as a hostel for men working on a new naval base at Dutch Harbour, Aleutian Islands. She was destroyed by Japanese aircraft on June 4th, 1942.

NORTIND

Norwegian Government; 1941; Harland & Wolff; 8,221 tons; 465-6 x 59 -5 x 33 • 8; 502 n.h.p.; oil engines. The motorship *Nortind* was torpedoed and sunk by a German submarine on January 26th, 1943, on a voyage from New York to Stanlow. Forty-one crew and two passengers were lost.

NORTON

Viking Corporation; 1940; Fredrikstad Mek. Verksted; 3,663 tons; 365 -2x57 -3x20 2; 353 n.h.p.; compound engines. The Panamanian steamship *Norton* was torpedoed and sunk by a German submarine on March 20th, 1943, on a voyage from Table Bay to Bahia. Nine of the crew were killed.

NORVAL

Hunter & Hendry; 1873; Watson & Co.; 1,427 tons; 243x 38-5x22-7.
The iron clipper ship *Norval*, Capt. G. Halliday, left Hull for San Francisco on October 28th, 1881. She carried a cargo of 1,865 tons of coal, and her crew numbered 29 all told. On February 28th, 1882, when nearing San Francisco, smoke began to appear from the fore hatch. Despite all efforts by the crew the fire gained a hold on the ship, and by March 4th she was in flames from end to end.

The crew took to the boats, and the first officer's boat containing eight men drifted away and was never seen again. Capt. Halliday with two boats reached Honolulu on the 26th after being three weeks adrift.

NORVANA

North Atlantic & Gulf S.S. Co.; 1920; Saginaw S.B. Co.; 2,677 tons; 253-4x43-8x26-2; 226n.h.p.; triple-expansion engines. The American ship *Norvana* left Nuevitas on January 14th, 1942, for Philadelphia and is believed to have been torpedoed, probably on the 21st.

NORVIK

Tanker Corporation; 1938; Deutsche Werft A.G.; 10,034 tons; 489-4x65-7x36-2; 1,163 n.h.p.; oilengines. The Panamanian tanker *Norvik* was torpedoed, shelled and sunk by a German submarine on January 9th, 1943, about 500 miles W. of Tenerife on a voyage from Trinidad to Gibraltar with 13,000 tons of fuel oil. Two of the crew were killed.

NORVIKEN

Wallem & Co. A/S; 1925; W. Hamilton & Co.; 2,924 tons; 295x45-7x26; 244 n.h.p.; triple-expansion engines. The Norwegian steamship *Norviken* was bombed by Japanese aircraft and set on fire on April 9th, 1942, off Ceylon. She broke in two and sank.

NORWALK

Eastern S.S. Lines Inc.; 1920; Pusey & Jones Co.; 2,157 tons; 250-8x42-6x25-6; 188 n.h.p.; triple-expansion engines. On January 10th, 1943, the American ship *Norwalk* collided with the *Nidareid* about 50 miles N. of Sagua la Grande and sank in over 100 fathoms.

NORWAY

FredOlsen&Co.; 1910; Nylands Vcerksted; 1,447tons; 231-9 x 35-7x22-9; 188 n.h.p.; triple-expansion engines. The Norwegian steamship *Norway* was sunk by a German submarine in the North Sea on May 26th, 1917.

NORWAYMARU

Kawasaki Kisen K.K.; 1920; Kawasaki Dockyard Co.; 5,832 tons; 385x51x36; 440 n.h.p.; triple-expansion engines. The steamship *Norway Mam* was sunk by U.S. carrier-based aircraft on September 21st, 1944, off Corregidor.

NORWEGIAN

F. Leyland & Co.; 1913; *Caledon S.B. & E. Co.*; 6,327 tons; 400-6x52-4x35; 508n.h.p.; 11-5 knots; quadruple-expansion engines.

The steamship *Norwegian* was torpedoed and sunk by a German submarine four miles S.W. of Seven Heads, Co. Cork, on March 13th, 1917. Five persons were killed. The captain was among the survivors.

NORWICH CITY

Reardon Smith Line; 1911; *W. Gray & Co.*; 5,587 tons; 397X 53-5x23; 2,500i.h.p.; 10 knots; triple-expansion engines. The steamship *Norwich City*, Capt. Hamer, went ashore on Gardner Island, Phoenix Islands, in heavy weather on the night of November 30th, 1929. She subsequently caught fire and was burnt out.

Eleven men were killed when the ship first struck, the remaining 24 scrambled on to the reef.

Rescue ships sent food and water to these men by rocket line but could not take them off because of surf conditions.

Eventually, on December 4th, the survivors were taken off by native boatmen in surf boats.

NOSHIRO

Japanese Navy, light cruiser; 1941; *Japan*; 6,000 tons; 550X—X—; 34 knots; turbine engines; six 6 • 1 in. guns, many 47 mm. The light cruiser *Noshiro* was a unit of the Japanese Central Force at the battle of Leyte Gulf, October 23rd-26th, 1944, and took part in the action in the Sibuyan Sea and San Bernardino Strait. She was bombed and sunk by carrier-borne aircraft on October 26th, N.W. of Panay.

For full story of the battle of Leyte Gulf see the battleship *Musashi*.

NOSHIRO MARU

Kawasaki Risen K.K.; 1919; *Dominion S.B. Co.*; 2,333 tons; 251-1x43-6x21-5; 328n.h.p.; triple-expansion engines. The steamship *Noshiro Mam* was torpedoed and sunk by the U.S. submarine *Guavina* on April 26th, 1944, about 100 miles N.W. of the Benin Islands.

NOSHIRO MARU

Nippon Yusen K.K.; 1934; *Mitsubishi Jukogyo Kaisha*; 7,189 tons; 449-2x62-3x34-4; 1,851 n.h.p.; oil engines. The motorship *Noshiro (Nosiro) Mam* was taken over by the Japanese Navy for use as an auxiliary cruiser. On September 21st, 1944, she was sunk by U.S. carrier-based aircraft off Corregidor.

NOSIRO MARU

Nippon Yusen K.K.; 1934; *Mitsubishi Jukogyo*; 7,189 tons; 449-6x62-3x33-4; 6,700 b.h.p.; 18 knots; oil engines. The motorship *Nosiro Mam* was taken over by the Japanese Admiralty during the Second World War for service as an auxiliary cruiser. On September 21st, 1944, when off the small island of Catanduanes, E. of the Philippines, she was bombed and sunk by U.S. carrier-borne aircraft.

NOTO

Italian Government; 1938; *International S.B. & E. Co.*; 3,168 tons; 324-8x45-6x26-5; 1,170 n.h.p.; oil engines. The motorship *Noto* was formerly the French *Djebel Nadpr*, seized by the Italians. She was bombed and sunk by British aircraft on January 30th, 1943, at Bizerta.

NOTO MARU

Nippon Yusen K.K.; 1934; *Mitsubishi Jukogyo Kaisha*; 7,191 tons; 449-6x62-3x34-4; 1,851 n.h.p.; oil engines. The motor vessel *Noto Mam* was bombed and sunk by U.S. land-based aircraft on November 2nd, 1944, off the south coast of Leyte Island, Philippines.

NOTOU

Societe Le Nickel; 1930; *W. Gray & Co.*; 2,488 tons; 305-4x44x20-6; 275n.h.p.; triple-expansion engines. The French steamship *Notou* was intercepted and sunk by a German auxiliary cruiser on August 16th, 1940, S. of Noumea on a voyage from Newcastle, N.S.W., to Noumea.

NOTTINGHAM

British Navy, light cruiser; 1913; *Pembroke Dockyard*; 5,400 tons; 450x49¹x—; 12,000 i.h.p.; 24-75 knots; turbine engines; *Yarrow boilers*; nine 6 in. guns, four 3 pdr., 2 T. T.

Nottingham was a unit of the 2nd light cruiser squadron of the Grand Fleet in 1916. On August 19th she was one of a light cruiser screen guarding the southern flank of the fleet, which had put to sea on hearing the news that Admiral Scheer was in the North Sea. The early morning was very hazy and at 5.30 *Dublin* sighted what she took to be a small fishing boat. In reality this was the submarine *U-52*, which 30 minutes later sent two torpedoes into *Nottingham*, flooding her boiler fires and extinguishing her electric light.

The ship managed to keep afloat while *Dublin* did her best to keep the submarine down, but 25 minutes later a third torpedo hit the cruiser on the port side and all hope of saving her was abandoned. Capt. C. B. Miller ordered the crew to take to the boats and at 7.10am *Nottingham* sank.

Thirty-eight men were killed.

NOTTINGHAM

Federal Steam Navigation Co.; 1941; *A. Stephen & Sons*; 8,532 tons; 457-5x60-3x35-6; 1,294n.h.p.; 15 knots; oil engines. The motorship *Nottingham*, Capt. F. C. Pretty, was on her maiden voyage from Glasgow to New York when she was torpedoed and sunk by a German submarine in the North Atlantic on November 7th, 1941. All her crew of 56 and six gunners were lost.

NOTUNG

Ernst Sohn; 1882; *A. Dixon & Co.*; 1,133 tons; 248-2X 34-8x13-3; 112n.h.p.; compound engines. The Finnish steamship *Notung* was bombed and sunk by Russian aircraft on January 24th, 1940, between Abo and the Aaland Islands.

NOVIEMBRE

S.Innerarity; 1895; *Tyne Iron S.B. Co.*; 3,500 tons; 345x44x 18-3; 287n.h.p.; triple-expansion engines. The Spanish steamship *Noviembre* was torpedoed and sunk by a German submarine in the Bay of Biscay on December 13th, 1917.

NOVIK

Russian Navy, 3rd class cruiser; 1901; *Schichau Works*; 3,080 tons; 347-7x41-5x16; 17,000i.h.p.; 25 knots; triple-expansion engines; six 4-7in. guns, one 2% in., six 3pdr., 4 m.g., 5 T.T. At the outbreak of the Russo-Japanese War the light cruiser *Novik* was serving with the Russian Pacific Squadron at Port Arthur. The arrival of the Japanese Army on heights overlooking the harbour forced the Russians to attempt a sortie with the object of breaking through the Japanese fleet and reaching Vladivostok.

They sailed out of the harbour on August 10th, 1904, the composition of the fleet being as follows:—

Battleships	Tons	Armament
<i>Tsarvitch</i> (flagship)	12,900	4-12 in 12-6 in.
<i>Retvizan</i>	12,902	4-12 in 12-6 in.
<i>Pobeda</i>	12,692	4-10 in. 11-6 in.
<i>Peresvet</i>	12,674	4-10 in. 11-6 in.
<i>Sevastopol</i>	11,842	4-12 in. 12-6 in.
<i>Poltava</i>	10,960	4-12 in. 12-6 in.
Cruisers	Tons	Armament
<i>Askold</i> (flagship)	5,905	12-6 in.
<i>Pallada</i>	6,823	8-6 in.
<i>Diana</i>	6,657	8-6 in.
<i>Novik</i>	3,080	6-4-7 in.

The *Novik* was leading a flotilla of eight destroyers, and the fleet was followed by the hospital ship *Mongolia*.

NOVILLO

The Japanese fleet, under Admiral Togo, comprised the following heavy units:—

<i>Battleships</i>	<i>Tons</i>	<i>Armament</i>
<i>Mikasa</i> (flagship)	15,140	4-12 in. 14-6 in.
<i>Asahi</i>	15,200	4-12 in. 14-6 in.
<i>Fuji</i>	12,450	4-12 in. 10-6 in.
<i>Shikishima</i>	14,850	4-12 in. 14-6 in.
<i>Chin-yen</i>	7,220	4-12 in. 4-6 in.
<i>Cruisers</i>	<i>Tons</i>	<i>Armament</i>
<i>Kasuga</i>	7,628	1-10 in. 2-8 in. 14-6 in.
<i>Misshin</i>	7,628	4-8 in. 14-6 in.
<i>Yakumo</i>	9,646	4-8 in. 12-6 in.
<i>Asama</i>	9,700	4-8 in. 14-6 in.

In addition there were nine protected cruisers, 17 destroyers and 29 torpedo boats.

The two fleets met on the afternoon of August 10th, and after the Russian flagship *Tsarvitch* had been badly damaged the other battleships, protected by mist and their own smoke, returned to Port Arthur where they were eventually destroyed by the Japanese.

The *Tsarvitch* and three destroyers made for the German port of Kiao-chao, where they were interned until the end of the war. The cruiser *Askoldand* one destroyer reached Shanghai, where they also were interned, while the cruiser *Diana* met with the same fate at Saigon.

The *Novik* called at Kiao-chao where she stayed only ten hours to refuel. On August 20th she was lying in Korsakovsh Bay when she was sighted by the Japanese cruiser *Tsushima*. Both ships were severely damaged in the fighting which followed and withdrew to effect repairs during the night, but when the *Tsushima* was joined by the cruiser *Chitose* the Russian captain decided to scuttle his ship and put the crew ashore.

The total Russian losses in the battle of the Yellow Sea were eight officers and 72 men killed, 38 officers and 375 men wounded, and 83 officers and 2,156 men interned or captured.

NOVILLO

A/S Valberg; 1895; *Hawthorn, Leslie & Co.*; 2,336 tons; 312'6x40x21-9; 276n.h.p.; triple-expansion engines. The Danish steamship *Novillo* was torpedoed and sunk by a German submarine in the North Sea on October 22nd, 1917.

NOWAKE

Japanese Navy, destroyer; 1940; *Maizuru*; 2,000 tons; 364 x 35x11; 45,000 s.h.p.; 36 knots; turbine engines; Kanpon boilers; six 5 in. guns, 2 r.n.g., 8 T.T.

The destroyer *Nowake* was sunk on October 26th, 1944, during the battle of Leyte Gulf. She carried a complement of over 200.

For full story of the battle of Leyte Gulf see the battleship *Musashi*.

NOZAKI

Japanese Navy; 1,135 tons.

The steamship *Nozaki* was torpedoed and sunk by the U.S. submarine *Dace* on December 28th, 1944, 50 miles N.E. of Nhatrang, Indo-China.

NUBIA

Leith, Hull & Hamburg Steam Packet Co.; 1895; *Ramage & Ferguson*; 1,173 tons; 244-1x33-1x 14-9; 205n.h.p.; triple-expansion engines.

The British cargo ship *Nubia* sank after a collision off Great Yarmouth on January 23rd, 1915, while on a voyage from the Tyne to Cherbourg carrying a cargo of coal.

NUBIA

Peninsular & Oriental S.N. Co.; 1895; *Caird & Co.*; 5,913 tons; 430x49-3x29-9; 662 n.h.p.; triple-expansion engines. The British cargo ship *Nubia* was wrecked 1 mile N. of Colombo on June 20th, 1915, while on a voyage from Bombay to Shanghai carrying a general cargo.

NUBIAN

Union S.S. Co.; 1876; *C. Mitchell & Co.*; 3,085 tons; 359x38-6x27*2; 385h.p.; triple-expansion engines. The British cargo ship *Nubian* sank after striking rocks in the Tagus river on December 21st, 1892. She was on a voyage from Southampton to Table Bay carrying a general cargo.

NUEVA MONTANA

Soc. Anon. Nueva Montana; 1891; *J. L. Thompson & Sons*; 2,039 tons; 275x38x17'-7; 181 n.h.p.; triple-expansion engines. The Spanish steamship *Nueva Montana* was sunk by a German submarine off Ushant on January 28th, 1917.

NUMAKAZE

Japanese Navy, destroyer; 1922; *Maizuru*; 1,215 tons; 336-5x29-3x9-5; 38,500s.h.p.; 34 knots; turbine engines; Kanpon boilers; four 4-7 in. guns, 2 A.A.m.g., 6 T.T.

The destroyer *Numakaze* was torpedoed and sunk in the East China Sea by the U.S. submarine *Grayback* on December 19th, 1943. The destroyer's normal complement was 148.

NUMBDIA

Anchor Line (Henderson Bros.); 1901; *D. & W. Henderson & Co.*; 6,399 tons; 450-8x55-2x30-1; 417n.h.p.; triple-expansion engines.

The British steamship *Numidia* was wrecked on July 26th, 1901, on the Brothers in the Red Sea. She was on a voyage from the Clyde to Calcutta.

NUMIDIA

D. Tripicovich; 1913; *Cantiere San Rocco*; 5,339 tons; 404-5x52-7x26-9; 415n.h.p.; triple-expansion engines. The Italian steamship *Numidia* was torpedoed and sunk by a British submarine on August 18th, 1944, off Parenzo.

NUNIMA

Trechmann Bros.; 1903; *W. Gray & Co.*; 2,938 tons; 325x47x22-4; 287n.h.p.; triple-expansion engines. The British cargo ship *Nunima* sank after a collision 4 miles off Folkestone on January 4th, 1918. She was on a voyage from Bilbao to Middlesbrough carrying a cargo of iron ore.

NUORO

Italian Government; 1920; *W. Gray & Co.*; 3,075 tons; 310x46-5x23-7; 414 n.h.p.; triple-expansion engines. The steamship *Nuoro* was formerly the French *St. Ambroise*, seized by the Italians. On March 31st, 1943, she was torpedoed and sunk by British aircraft off Cap Bon.

NUPHAR

Joseph Robinson & Sons; 1881; *Tyne Iron S.S. Co.*; 1,963 tons; 287x37x21-9; 180 h.p.; compound engines. The British cargo ship *Nuphar* was wrecked at New Jersey on September 23rd, 1882. She was carrying a cargo of pig iron from the Tyne to Philadelphia.

NURIAHAN

Asiatic S.N. Co.; 1884; *Harland & Wolff*; 2,967 tons; 350-5x40-3x25-2; 350h.p.; compound engines.

The British steamship *Nurjahan* was wrecked on November 21st, 1890, near Cape Comorin while on a voyage from Bombay to Calcutta, carrying a general cargo.

NURMAHAL

Asiatic S.N. Co.; 1923; *C. Cornell & Co.*; 5,419 tons; 405-2x52-9x29; 475 n.h.p.; triple-expansion engines. The British cargo ship *Nurmahal* sailed from Safaga Island, Red Sea, on August 29th, 1942, on a voyage in ballast to Charleston and New York. She called at Table Bay and left there on October 15th, but was not heard of again. It was presumed that she had been torpedoed 200 miles N.E. of Barbados on November 11th.

NURNBERG

German Navy, light cruiser; 1906; Kiel; 3,450 tons; 360 X 44-5 x 17-5; 13,200 i.h.p.; 23-5 knots; triple-expansion engines; Schulz-Thornycroft boilers; ten 4-1 in. guns, eight 5 pdr., 4 m.g., 2 T.T.

The *Nurnberg* was at the outbreak of the First World War a unit of the German East Asiatic Squadron under Admiral Graf von Spee. She participated in the action off Coronel on November 1st, 1914, and later took part in the battle of the Falkland Islands, when the entire East Asiatic Squadron was destroyed, with the exception of the light cruiser *Dresden*. An account of the battle of Coronel will be found under *Good Hope*, the flagship of Rear-Admiral Sir C. Cradock, and a more detailed account of the battle of the Falkland Islands may be seen under *Scharnhorst*, the flagship of Admiral von Spee.

On the morning of December 7th, 1914, the *Nurnberg* in company with the armoured cruiser *Gneisenau* (which see) was detached to ascertain the strength of the British forces at the Falkland Islands. If possible a landing was to be made and the governor of the islands taken prisoner. This scheme was frustrated by the arrival of Vice-Admiral Sir Doveton Sturdee a few hours before with two battle cruisers and three armoured cruisers.

Immediately these big ships were sighted the Germans made off to rejoin their main squadron, hotly pursued by the British. At 12.47 p.m. the battle cruiser *Inflexible* fired the first shot, and at 1.15 von Spee signalled "Light cruisers scatter. Use every effort to get away". By this time the *Nurnberg* had become the target of the battle cruisers and in response to the signal she hauled out of the line and proceeded independently, followed by the *Leipzig*. The ships in chase were *Cornwall*, *Kent* and *Glasgow*. At 4 o'clock the *Nurnberg* parted from her consort and was followed by *Kent*. The pace was very hot, both ships working up to 25 knots, though *Kent* had never done better than 23 and the *Nurnberg* was only designed for 23-5.

At 5 o'clock with both ships steaming a course S.E. and the range barely 12,000 yards the *Nurnberg* opened fire, the salvos from her after 4 • 1 in. guns passing over *Kent*. The British ship replied but her 6 in. guns, though heavier, were out-ranged by the German. There was a slight drizzle and visibility was decreasing, making it highly probable that the *Nurnberg* would escape when, at 5.35 p.m., two of her boilers burst and her speed fell off by about a quarter.

The fight continued with *Kent* gaining and gradually pounding her adversary to pieces. The *Nurnberg* was a mass of flames, most of her guns were out of action, but she still kept her flag flying and 20 minutes after her guns had ceased to fire she rolled over and sank. As she lay for a few moments a party of German sailors could be seen in the rays of *Kent's* searchlight waving their battle ensign in a last defiance.

Only seven survivors were picked up out of a complement of 295.

Kent lost one killed and nine wounded. She sustained 37 hits and had her wireless destroyed so that she was unable to report her victory to Admiral Sturdee until she arrived back at Port Stanley, Falkland Islands.

NYANZA

Maclay & MacIntyre; 1897; A. Stephen & Sons; 4,053 tons; 370 x 48 x 24-7; 351 n.h.p.; 10-5 knots; triple-expansion engines.

The steamship *Nyanza* was torpedoed and sunk by a German submarine 14 miles T.E. by E. of the Maidens, off Co. Antrim, on September 29th, 1918. The captain and 12 men were killed.

NYDAL

Frimann & Pedersen; 1916; Frederikstads Mek. Værksted; 1,809 tons; 265 x 42 x 20; 188 n.h.p.; triple-expansion engines. The Norwegian steamship *Nydal* was sunk by a German submarine in the Bay of Biscay on May 6th, 1917.

NYHAUG

A/S Atlas; 1925; A/S Nakskov Skibsværft; 4,044 tons; 350-7 x 51-5 x 24-7; 354 n.h.p.; oil engines.

The Norwegian motorship *Nyhaug* was bombed and sunk by German aircraft on April 27th, 1940, near Aalesund, during the invasion of Norway.

NYHOLT

*D/S A/S Idaho; 1931; Odense Staatskibsværft; 8,087 tons; 460*7 x 60-3 x 34*4; 622 n.h.p.; oil engines.* The Norwegian motorship *Nyholt* was torpedoed and sunk by a German submarine on January 17th, 1942, 200 miles S.E. of Cape Race, on a voyage from Reykjavik to New York. Eighteen of her crew, two passengers and one gunner were lost.

NYLAND

V. Torkildsen; 1915; Nylands Værksted; 1,824 tons; 265 x 42-2 x 18-8; 188 n.h.p.; triple-expansion engines. The Norwegian steamship *Nyland* was sunk by a German submarine in the Bay of Biscay on February 23rd, 1917.

NYLAND

Angf. A/S Tirfing; 1909; W. Doxford & Sons; 3,378 tons; 326-9 x 48-6 x 21-7; 382 n.h.p.; triple-expansion engines. The Swedish steamship *Nyland* was torpedoed and sunk by a German submarine on September 28th, 1939, 45 miles S.W. of Stavanger.

NYLAND

*Vilhelm Torkildsen; 1940; Nylands Værksted; 1,374 tons; 250*9 x 41-3 x 14-8; 54 n.h.p.; compound engines & L.P. turbine.* The Norwegian steamship *Nyland*, on a voyage from the Tyne to Mackenzie, was last sighted on the evening of December 5th, 1940, by the Norwegian steamship *Marga*, off Skerryvore. She was reported to have been wrecked on West Rock, Iona, the following day but nothing more was heard of the ship or her crew until a piece of wreckage bearing her name was found two weeks later.

NYMPHCEA

Joseph Robinson & Sons; 1871; Iliff; 1,138 tons; 230-6 x 30-1 x 18; 98 h.p.; compound inverted engines. The British cargo ship *Nymphcea* was wrecked on Sunk Sand on January 5th, 1881, while on a voyage from the Tyne to Piraeus carrying a cargo of coal.

NYMPHAEA

Joseph Robinson & Sons; 1882; Tyne Iron S.B. Co.; 1,969 tons; 286-9 x 37 x 21-8; 187 n.h.p.; compound engines. The British cargo ship *Nymphaea* was wrecked one and a half miles S. of Whinnyfold, Aberdeenshire, on July 14th, 1914. She was on a voyage in ballast from the Tyne to Cienfuegos.

NYSTRAND

J. N. Abrahamsen & Chr. Sommerfelt; 1905; Trondhjems Mek. Værksted; 1,397 tons; 220-9 x 34-2 x 15-2; 116 n.h.p.; triple-expansion engines. The Norwegian steamship *Nystrand* was sunk by a German submarine in the North Sea on December 19th, 1916.

O. A. BRODIN

O. A. BRODIN

E. Brodin, 1915; *Sorlandets Skibsbyggeri*; 1,798 tons; 265 X 42x20; 150 n.h.p.; triple-expansion engines. The Swedish steamship *O. A. Brodin* was sunk by a German submarine off Ushant on January 22nd, 1917.

O. A. BRODIN

Rederi-A/B. Kare; 1920; *E. Brodins Varfs.*; 2,119 tons; 266-lx 42-8 x 18-4; 176n.h.p.; compound engines. The Swedish steamship *O. A. Brodin* was torpedoed and sunk by a German submarine on July 17th, 1940, on a voyage from St. John's, N.F.L., to Rldham Dock.

O. A. KNUDSEN

K. Knutsen; 1907; *Craig, Taylor & Co.*; 3,587 tons; 342xSix 22-5; 307n.h.p.; triple-expansion engines. The Norwegian ship *O. A. Knudsen* was wrecked on June 30th, 1923, at Gull Island, St. Mary's Bay, while on a voyage from Sydney, C.B., to Wabana.

O. A. KNUDSEN

Skibs-A/S Marie Bakke; 1938; *Deutsche Werft A.G.*; 11,007 tons; 508-1x69-2x36-5; 1,360n.h.p.; oilengines. The Norwegian tanker *O. A. Knudsen* was torpedoed, shelled and sunk by a German submarine on March 5th, 1942, off the Bahamas on a voyage from Port Arthur to Halifax and the U.K. with motor spirit. Only two lives were lost.

OAHU

United States Navy, gunboat; 1927; *Kiangnan Dock Co., Shanghai*; 450 tons; 191x28x6-6; 2,250 h.p.; 15 knots; triple-expansion engines; Thornycroft boilers; two 3 in. A. A. guns, 10 m.g.

The gunboat *Oahu* was sunk by gunfire of Japanese warships off Corregidor on May 4th, 1942. The vessel was one of the few ships of the U.S. Navy left in the Philippines after the Japanese invasion, and carried a complement of about 70.

OAKBANK

Bank Line; 1926; *Harland & Wolff*; 5,154 tons; 420-3x53-9x 26-5; 717n.h.p.; 11 knots; oilengines.

The motor vessel *Oakbank* was some 200 miles N.N.E. of Fortaleza, northern Brazil, at 10.50 on the morning of December 27th, 1942, when she was torpedoed and sunk by a German submarine. The vessel carried a crew of 63 of whom 28 were killed. The captain and one apprentice were taken on board the submarine as prisoners.

OAKBURN

Burn Line; 1904; *Russell & Co.*; 3,766 tons; 359-6x49-1x17-6; 369 n.h.p.; triple-expansion engines.

The British cargo ship *Oakburn* was wrecked on Duikar Point, near Cape Town, on May 21st, 1906, while on a voyage from New York to Sydney, N.S.W., carrying a general cargo.

OAKCREST

Crest Shipping Co.; 1929; *R. Duncan & Co.*; 5,407 tons; 403x52-4x27-5; 512 n.h.p.; triple-expansion engines. The British steamship *Oakcrest*, on a voyage from Liverpool to New York, was torpedoed and sunk by a German submarine on November 22nd, 1940, about 250 miles S.W. of the Fastnet. Thirty-five lives were lost.

OAKDENE

J.T. Lunn & Co.; 1884; *Short Bros.*; 1,594 tons; 240x38-lx 18-2; 140 h.p.; compound engines.

The British cargo ship *Oakdene* was wrecked at Assateague, Va., on March 3rd, 1895, while on a voyage from Hamburg to Baltimore carrying a cargo of salt and cement.

OAKFELD

Burrell & Son; 1883; *Oswald, Mordaunt & Co.*; 1,748 tons; 259-5⁵x36x18; 176n.h.p.; compound engines. The British cargo ship *Oakfield* was wrecked at St. Michael's on January 22nd, 1897, while on a voyage from Demerara to London carrying a cargo of sugar and rum.

OAKLAND

North Coast S.N. Co.; 1890; *Murray Bros.*; 398 tons; 154x24x 10-5; 70 r.h.p.; triple-expansion engines.

The Australian coasting steamship *Oakland* & s wrecked on Cabbage Tree Island, off Port Stephens, N.S.W., in a heavy S.W. gale on May 26th, 1903. Eleven of those on board were drowned. A boat with a number of exhausted survivors was picked up on the following day by the steamship *Bellinger*.

OAKLANDS

Hardy, Wilson & Co.; 1880; *W. Gray & Co.*; 1,114 tons; 228x30x16-8; 99 h.p.; compound inverted engines. The British cargo ship *Oaklands* sank after a collision with a German warship off Koppergrund, Kattegat, on September 10th, 1885, while on a voyage from Blyth to Stockholm carrying a cargo of coal. All on board were lost.

OAKMAR

Calmar S.S. Corp.; 1920; *Mitsui Bussan Kaisha*; 5,766 tons; 385 X 51 x 33*7; 554 n.h.p.; triple-expansion engines. The American steamship *Oakmar* was torpedoed and sunk by a German submarine on March 20th, 1942, about 300 miles E. of Wilmington, N.C., on a voyage from Calcutta to Boston. Six of her crew were lost.

OAKMOOR

Walter Runciman & Co.; 1909; *J. Blumer & Co.*; 2,838 tons; 315-5 x 46-5 x 21-3; 257n.h.p.; triple-expansion engines. The British cargo ship *Oakmoor* was wrecked on Cabezos Shoals, near Gibraltar, on November 26th, 1910. She was on a voyage from Taganrog to Liverpool carrying a cargo of wheat.

OASIS

Compagnie de Nav. Mixte; 1938; *Fredrikstad Mek. Verksted*; 7,327 tons; 250 x 42 x 13-6; 82 n.h.p.; compound engines. The French steamship *Oasis* was shelled and sunk by a British submarine on February 26th, 1943, about 30 miles S. of Capo Mele, with the loss of five lives.

OAXACA

Compania Mexicana de Nav.; 1921; *Akt. Ges. Vulkan*; 4,351 tons; 388-4x51x26; 1,068 n.h.p.; turbine engines. The Mexican steamship *Oaxaca* was torpedoed and sunk by a German submarine on July 26th, 1942, off Corpus Christi on a voyage from New Orleans to Tampico. Six of her crew were lost.

OB

U.S.S.R.; 1917; *Werf Gusto*; 2,198 tons; 267x42-3x18-2; 169 n.h.p.; triple-expansion engines.

The Russian steamship *Ob*, on a voyage from Vladivostok to Petropavlovsk with a crew of 40 and 60 passengers, was torpedoed and sunk by a submarine, said not to be Japanese, on July 5th, 1944-, about 150 miles E. of Sakhalin Island. There were only 21 survivors.

OBELL

Isaac Ochberg; 1888; *J. Laing*; 1,797 tons; 260x36-6x16-1; 209 n.h.p.; triple-expansion engines.

The British cargo ship *Obeli* was wrecked south of the Bashee River on December 28th, 1916. She was on a voyage from Madagascar, via Port Natal, to Table Bay and London and was carrying a cargo of graphite, beans and raffia.

OBERNAI

W.N. Macdonald; 1920; *Davie S.B. & Repairing Co.*; 1,100 tons; 195x40-6x15-2; 24 r.h.p.; compound engines. The Canadian cargo ship *Obernaï* foundered 80 miles N.E. of Scatterie Island on March 8th, 1924, while on a voyage from Louisburg, N.S., to Port aux Basques, N.F.L., carrying a cargo of coal.

OBERON

Finska Angf.-A/B; 1925; *Ateliers & Chantiers de St. Nazaire*; 3,008 tons; 291x44-1x21-4; 655n.h.p.; triple-expansion engines. The Finnish steamship *Oberon* left HangS on December 17th, 1930,

for Hull with a crew of 60 and 21 passengers. At 9.35 p.m. on the 19th, in dense fog, she collided with the Finnish steamship *Arctums* seven miles S. of LsesS Trindel lightship and sank in five minutes. Forty survivors, clinging to buoys and wreckage, were picked up by boats from the *Arctums*.

OBERON

Koninklijke Nederlandsche Stoomboot Maats.; 1911; Clyde S.B. & E. Co.; 1,996 tons; 295-3x43-2x17; 217n.h.p.; triple-expansion engines.

The Dutch steamship *Oberon* was torpedoed and sunk by the German submarine *U-123* on June 27th, 1941, on a voyage from Duala to Hull. Six of the crew were lost.

OBERRENDER

United States Navy .destroyer; 1944; United States; 1,200 tons; 306x36-9x—; 6,000s.h.p.; 21 knots; turbine engines; three 3 in. guns, two 40 mm.A.A., four 20 mm.A.A., 3 T.T. The destroyer *Oberrender* was bombed and sunk by Japanese aircraft off Okinawa, on May 9th, 1945. The vessel carried a complement of 220.

OBJ

Th. Thoresen Jr., A/S; 1917; Fredrikstads Mek. Verksted; 1,828; 265x42-1x17-9; 188 n.h.p.; triple-expansion engines. The Norwegian steamship *Obj* was sunk by a German submarine in the Arctic on or about November 5th, 1917.

OBORO

Japanese Navy, destroyer; 1930; Sasebo; 1,700 tons; 371-5 x 55-7x9-5; 40,000s.h.p.; 34 knots; turbine engines; Kanpon boilers; six 5 in. guns, 4 A.A.m.g., 9 T.T.

The destroyer *Oboro* was bombed and sunk by U.S. Army aircraft off the Aleutian Islands on October 16th, 1942.

The destroyer's normal complement was 197.

O'BRIEN

United States Navy, destroyer; 1939; Boston Navy Yard; 1,570 tons; 341x35x11; 44,000 s.h.p.; 36-5 knots; turbine engines; Express boilers; four 5 in. guns, 8 T.T.

The destroyer *O'Brien* was employed in the task of maintaining the supply lines for the American Army operating on Guadalcanal. On September 15th, 1942, she was hit by a torpedo and badly damaged, sinking sometime later in the area S. of the Solomon Islands.

OBSERVER

CharenteS.S.Co.; 1928; C. Cornell & Co.; 5,881 tons; 420 X 54-5x30-4; 524 n.h.p.; 13 knots; turbine engines. The steamship *Observer*, Capt. J. Davidson, was torpedoed and sunk by a German submarine about 350 miles off Cape San Roque, Northern Brazil, on December 16th, 1942. The vessel carried a crew of 81, of whom 66, including Capt. Davidson, were killed.

OCCANA

N. V. Petroleum Maats. La Corona; 1938; N. V. Wilton Eyoenoord; 6,256tons; 428-1x54-6x30-9; 377n.h.p.; oilengines. The Dutch tanker *Ocana* was torpedoed by the German submarine *U-552* on March 25th, 1942, on a voyage from Curasao to Halifax with 8,500 tons of clean oil.

The tanker remained afloat and was sunk by the Canadian warship *Burlington* on April 15th, Forty-seven of her crew of 50 and two of her seven gunners were lost.

OCEAN

British Navy, 1st class battleship; 1900; Devonport Dockyard; 12,950 tons; 418x74x26-5; 13,500i.h.p.; 18-5 knots; triple-expansion engines; Belleville boilers; four 12 in. guns; twelve 6 in., ten 12pdr., six 3pdr., 2 m.g., 4 T.T.

The battleship *Ocean* was a unit of the Allied Fleet engaged in the bombardment of the Dardanelles forts in the First World War. On March 18th, 1915, at about 3 p.m. the battleship *Irresistible* ran on a mine and took a heavy list. It was believed at the time that she could be saved and the destroyer *Wear*, and later *Ocean*, came alongside to give assistance. *Wear* took off most of the battleship's crew, while *Ocean* passed a wire hawser and prepared to tow *Irresistible* out of range of the forts. The intensity of the enemy's fire soon convinced

the captains of both ships that the attempt, at least in daylight, was attended by too great a risk. The volunteers of *Irresistible* were therefore taken off and the ship allowed to drift till nightfall.

The *Ocean* had not steamed more than a mile from her stricken consort when she in turn struck a mine, which exploded on her starboard side, flooding her bunkers and jamming her helm. She was also hit by a heavy shell which flooded her steering engine room. The destroyers *Chelmer*, *Colne* and *Jed* were called alongside and Capt. Hayes-Sadler and his entire company were safely transferred.

Both battleships sank during the night.

OCEAN COURAGE

Ministry of War Transport (Hain Steamship Co.); 1942; Todd-Bath Iron S.B. Corp.; 7,173 tons; 425-1x57x34-8; 505 n.h.p.; 11 knots; triple-expansion engines.

The steamship *Ocean Courage*, Capt. T. H. Kemp, was about 400 miles W. of Bathurst, West Africa, on January 15th, 1943, when she was torpedoed and sunk by a German submarine. Capt. Kemp and 51 men were killed.

OCEAN CRUSADER

Ministry of War Transport (Dodd, Thomson & Co.); 1942; Todd-Bath Iron S.B. Corp.; 7,178 tons; 425-1x57x34-8; 505n.h.p.; 11 knots; triple-expansion engines.

The British cargo ship *Ocean Crusader* left Portland, Me., on November 13th, 1942, on a voyage to Avonmouth. She called at New York and sailed from there in convoy on November 19th, carrying a general cargo. During heavy weather on November 25th, she straggled from the convoy in lat. 50° N., long. 47° W., and the following day sent out a submarine distress signal giving her position as lat. 50° 30'N., 45° 30'W. No subsequent information was received.

OCEAN HOME

Emigrant ship, Brunswick, Maine; 1840 (circa); 646 tons. The American sailing vessel *Ocean Home* left Rotterdam for New York on September 1st, 1856, with 105 persons on board and general cargo. She was under command of Capt. A. H. Merryman, and most of her 88 passengers were German emigrants. At 2 o'clock on the morning of Friday, September 5th, in sight of the Lizard Light, the ship collided with the American vessel *Cherubim*, 1,850 tons. Capt. Smith, New York for London. Within 20 minutes the *Ocean Home* had foundered with 77 of her people. The second officer, two seamen and a passenger escaped in the longboat immediately after the collision and 22 persons were taken off by the *Cherubim*.

At the time of the disaster the emigrants were asleep below and had little opportunity of saving themselves. The captain had a very narrow escape as he was carried down by the ship, but managed to swim to the surface, where he clung to floating wreckage until he was picked up by a boat from the *Cherubim* some four hours later.

OCEAN HONOUR

Ministry of War Transport (Chellew Navigation Co.); 1942; Todd-Bath Iron S.B. Corp.; 425-1x57x34-8; 505n.h.p.; 11 knots; triple-expansion engines.

The steamship *Ocean Honour*, Capt. P. Bond, was torpedoed and sunk by an enemy submarine near Cape Guardafui, at the entrance to the Gulf of Aden, on September 16th, 1942. Fifteen of the crew and five gunners were lost. Capt. Bond was among the survivors.

OCEAN LIBERTY

A/SSjofart; 1943; New England S.B. Corp.; 7,176 tons; 422-Sx 57x34-8; 339 n.h.p.; triple-expansion engines. The Norwegian ship *Ocean Liberty* was at Brest on July 28th, 1947, when she caught fire, exploded and sank. She was carrying 3,309 tons of nitrate of ammonia and some general cargo from Baltimore to Antwerp.

OCEAN MONARCH

American emigrant ship; E. Train & Co.; 1843; D. McKay; 1,301 tons; 178-6x40x26-9.

The American sailing vessel *Ocean Monarch* left Liverpool for the United States on the morning of August 24th, 1848, with 396 persons, of whom 32 were first and second class cabin passengers, 322 were emigrants and 42 crew. Just after noon of the same day a steward reported to Capt. Murdock that he had discovered a

OCEAN PRINCE

passenger lighting a fire in one of the ventilators in the after part of the ship. The captain at once sent an officer and a seaman to put out the fire and to bring back the delinquent, but by that time the ship was burning. She was put before the wind to lessen the draught, but had to be brought to again, and the flames, fanned by the wind, soon gained the mastery.

The *Ocean Monarch's* position was six miles off Great Orme's Head, North Wales, and as the fire was gaining rapidly the anchors were dropped to keep her stationary. Many of the unfortunate emigrants took refuge in the bows and in the rigging of the foremast, until both foremast and jib-boom snapped and the whole mass of people was flung into the sea.

At the time of the disaster the Brazilian frigate *Alfonso* was running her steam trials under command of Capt. Joaquim Lisboa. The *Alfonso* at once lowered her boats and went to the rescue of the emigrant ship. At the same time the yacht *Queen of the Ocean* and the American packet *New World* also came to the rescue. Between them these ships managed to save 218 persons, including those saved in the ship's boats, Capt. Murdock being among the survivors.

The loss of life amounted to 178, either from drowning or fire. The ship sank at her anchors at 1.30 p.m.

OCEAN PRINCE

Prince Line; 1907; Swan, Hunter & Wigham Richardson; 5,101 tons; 401x50-2x29-6; 464n.h.p.; triple-expansion engines.

The British cargo ship *Ocean Prince* was wrecked at La Hague on December 16th, 1916, while on a voyage from Halifax, N.S. to Europe carrying a cargo of grain.

OCEAN TRANSPORT

Houlder Bros. & Co.; 1913; Irvine's S.B. Co.; 4,643 tons; 385 x 52 x 27; 320 n.h.p.; triple-expansion engines. The British cargo ship *Ocean Transport* lost her propeller and was driven ashore and wrecked at Ocean Island on January 30th, 1928.

OCEAN VANGUARD

Ministry of War Transport (W. H. Seager & Co.); 1941; Todd-California S.B. Corp.; 7,174 tons; 425-1x57x34-8; 505 n.h.p.; triple-expansion engines.

The British steamship *Ocean Vanguard*, on a voyage from Suez to New York, was torpedoed and sunk by a German submarine on September 13th, 1942, about 70 miles E. of Trinidad. Ten of her crew and one gunner were lost.

OCEAN VENTURE

Ministry of War Transport (Larrinaga Steamship Co.); 1941; Todd-California S.B. Corp.; 7,174 tons; 425-1x57x34-8; 505 n.h.p.; 10 knots; triple-expansion engines. The steamship *Ocean Venture*, Capt. Reginald S. Craston, was torpedoed and sunk by a German submarine on February 8th, 1942, off the coast of Virginia. Thirty-one men were lost. Capt. Craston, who was among the survivors, commanded the *Ena De Larrinaga* when she was torpedoed in April, 1941. The *Ocean Venture* was not in convoy.

OCEAN VENUS

Ministry of War Transport (J. Morrison & Son); 1942; Todd-California S.B. Corp.; 7,174 tons; 425-1x57x34-8; 505 n.h.p.; 11 knots; triple-expansion engines.

The steamship *Ocean Venus*, Capt. Parkes, was torpedoed and sunk by a German submarine on May 3rd, 1942, off St. Augustine, Florida. Five men were killed. Capt. Parkes was among the survivors.

OCEAN VOYAGER

Ministry of War Transport (H. Hogarth & Sons); 1942; Todd-California S.B. Corp.; 7,174 tons; 425-1x57x34-8; 505 n.h.p.; triple-expansion engines.

The British steamship *Ocean Voyager*, at Tripoli with a cargo of aviation spirit and munitions, was bombed by German aircraft on March 19th, 1943. The ship caught fire and blew up. The captain and five others were killed.

OCEANA

Peninsular & Oriental Steam Navigation Co.; 1888; Harland & Wolff; 6,610 tons; 468-4x52x26-9; 7,000 i.h.p.; 16 knots; triple-expansion engines.

The liner *Oceana* left Tilbury for Bombay on March 15th, 1912, carrying a general cargo, with 40 passengers and a crew of 210 under command of Capt. T. H. Hyde, R.N.R. At about 4 a.m. the next morning when off Beachy Head in charge of a pilot the ship collided with the German four masted barque *Pisagua*, 2,850 tons, from Mexillones for Hamburg with nitrate. The sailing ship's bows tore a hole 45 feet in length along the *Oceana's* side extending to below the water line. Orders were at once given to close water tight doors and to swing out the boats. There was a certain amount of confusion and one boat was lowered without orders while the vessel was under way. As a result the boat capsized, drowning seven passengers and two of the crew.

Fortunately the weather was clear and the sea calm and after one other boat had been lowered without accident, to pick up survivors from the first, the London, Brighton & South Coast Railway steamship *Sussex*, 1,117 tons, came to the rescue.

This vessel took off all the passengers and crew with the exception of a few officers and men who stood by the ship. The Newhaven tug *Alert* then took the *Oceana* in tow for Dover, the Eastbourne lifeboat and the steamship *Queensgarth* standing by. For some hours the liner remained afloat, but her list growing more pronounced it was decided to abandon her. The cables were cut and she foundered some few miles S. of Eastbourne.

The *Oceana* was carrying £747,110 in gold and silver destined for Port Said and Bombay. As she lay with her masts above water in an almost upright position it was not difficult for divers to reach her and within ten days the Liverpool Salvage Association had begun to recover a quantity of the treasure. Within a short time nearly all of it was brought to the surface.

The German barque *Pisagua* sustained much damage to her bows and also lost her foretopmast.

OCEANIA

L. Pittaluga; 1902; J. L. Thompson & Sons; 4,217 tons; 368 x 49-5x19; 453 n.h.p.; triple-expansion engines. The Italian steamship *Oceania* was torpedoed and sunk by a submarine in the Mediterranean on February 14th, 1917.

OCEANIA

Italia Soc. Anon. di Nav.; 1933; Cantieri Riuniti dell'Adriatico; 19,507 tons; 589-7x76-7x45-5; 4,888 n.h.p.; 19 knots; oil engines.

The Italian liner *Oceania* was taken over for service as a transport early in 1941. She was torpedoed and sunk on September 18th, 1941, by the submarine *Upholder*, Lt.Cdr. M. D. Wanklyn, 58 miles from Tripoli, Libya, when transporting troops to North Africa. Her sister ship the *Neptunia* was also torpedoed and sunk on the same day by the same submarine. Over 5,000 troops were drowned when the transports sank.

OCEANIC

Oceanic Steamship Nav. Co.; 1899; Harland & Wolff; 17,274 tons; 685-7x68-3x44-5; 27,000 i.h.p.; 20-72 knots; triple-expansion engines.

The liner *Oceanic* was taken over by the British Admiralty for service as an auxiliary cruiser early in the First World War. The ship had not been commissioned many weeks when, on September 8th, 1914, she ran on the rocks of Foula Island in the Shetlands in a dense fog. The trawler *Glenogil* sighted the *Oceanic* on the rocks and came to her assistance, taking off the crew of 400 officers and ratings.

OCEANO

Andrew Weir & Co.; 1900; Russell & Co.; 4,657 tons; 369-7x52x27-2; 403 n.h.p.; triple-expansion engines. The British cargo ship *Oceano* was wrecked off Kandafuri Island on July 19th, 1917, while on a voyage from Port Said to Calcutta carrying a cargo of salt.

OCEOLA

A. Ramage & Co.; 1870; *J. Reid & Co.*; 898 tons; 204-2X 34-2x20-6.

The British barque *Oceola* was engaged in the Montreal—Liverpool trade, in which she had a very short career. In October 1871, when off Bardsey Island, North Wales, and 16 days out from Quebec, she was run down by the barque *Marmion* and sank in five minutes. Five of her crew were drowned.

OCKENFELS

Deutsche Dampfs. Ges. Hansa; 1921; *J. C. Tecklenborg A.G.*; 7,574 tons; 468-5x58-5x32-4; 666n.h.p.; triple-expansion engines.

The German steamship *Ockenfels* struck a mine and sank on February 19th, 1943, off Borkum.

OCKLINGE

Constants (South Wales); 1923; *Chantiers & Ateliers de St. Nazaire*; 2,343 tons; 271x42x19-4; 148n.h.p.; triple-expansion engines.

The British cargo ship *Ocklinge* was wrecked on the Manacles Rocks, Cornwall, on March 4th, 1932. She was on a voyage from Bilbao, via Falmouth, to Port Talbot carrying a cargo of iron ore.

OCTAVIAN

ALS Rederiet Julian (Hilmar Reksten); 1938; *Nylands Verksted*; 1,345 tons; 250'9x41-3x14-8; 396 n.h.p.; compound engines. The Norwegian ship *Octavian* left Galveston on January 9th, 1942, for St. John, N.B., but was not seen again. A German broadcast on July 12th claimed that she had been sunk by a submarine.

OCTO

B. Stolt-Nielsen; 1910; *Short Bros.*; 1,620 tons; 259x37-9x 18-1; 162 n.h.p.; triple-expansion engines. The Norwegian steamship *Octo* struck a mine and sank in the the Mediterranean on June 13th, 1918.

ODATSUKIMARU

Kaiyo Risen K.K.; 1,988 tons. The steamship *Odatsuki Mam* was torpedoed and sunk by the U.S. submarine *Tinosa* on February 15th, 1944, off Siargao, Philippines.

ODEN

B. Carlstrom; 1895; *W. Gray & Co.*; 1,278 tons; 232-1x34-6x16-3; 127 n.h.p.; triple-expansion engines. The Swedish ship *Oden* was on a voyage from Danzig to Norrkoping with a cargo of coal when she was wrecked on January 17th, 1927, outside Norrkoping.

ODENSHOLM

A/B Svenska Amerika-Mexiko Linien; 1927; *Eriksbergs Mek. Verkstad*; 2,856 tons; 334x46-9x20-2; 355 n.h.p.; oilengines. The Swedish motorship *Odenholm* was on a voyage from Gothenburg to Baltimore with wood pulp on September 6th, 1932, when she went ashore at Burnt Head, 15 miles N.E. of Cape Race.

ODIEL

Scott Brothers; 1880; *Palmer's Co.*; 1,328 tons; 241X33-2x 16-5; 120h.p.; compound engines. The British cargo ship *Odiel* was wrecked near Cabo de Gata, Spain, on July 19th, 1887. She was on a voyage from Newcastle to Savona carrying a cargo of coal.

ODIN

Schjelderup & Schjott; 1898; *Bergens Mek. Verksted*; 1,045 tons; 225-2x32-2x13-3; 97n.h.p.; triple-expansion engines. The Norwegian steamship *Odin* was torpedoed and sunk by a German submarine off Ushant on February 2nd, 1917.

ODIN

Seereederei A. G. Frigga; 1929; *Nordseewerke*; 5,806 tons; 432-5x59x23; 252 n.h.p.; compound engines. The German steamship *Odin* was sunk by an underwater explosion on May 9th, 1944, in Narvik Harbour.

ODYSSEUS

G. C. Dracoulis; 1922; *Campbeltown S.B. Co.*; 3,527 tons; 348-5x50x23-6; 328 n.h.p.; 10 knots; triple-expansion engines.

The Greek steamship *Odysseus*, Capt. Maroulis, left Novorossisk for Antwerp on January 8th, 1927, with a cargo of grain. She put in at Malta and left again on January 16th, from which date little was ever heard of her. Early in February enquiries were sent out from England to which the Danish steamship *Erik Boye* replied that she had been in wireless communication with her. A similar statement, afterwards modified, was by the Italian steamship *Charitas*. It appears that the wireless message from England had been misunderstood by these vessels and in the case of the *Charitas* she denied having contacted the *Odysseus*. A few days later a lifeboat and a quantity of ship's gear belonging to the Greek steamship was washed up along the Algerian coast not far from Philippeville, from which it was deduced that she must have foundered.

OEI MARU

Nittoh Kisen K.K.; 2,858 tons. The steamship *Oei Maru* struck a mine and sank on February 6th, 1945, at the southern end of the Singapore Strait.

OGADEN

Messina & Co.; 1905; *C. Cornell & Co.*; 4,553 tons; 391-4x49-7x26-6; 423 n.h.p.; triple-expansion engines. The Italian steamship *Ogaden* was torpedoed and sunk by a British submarine on August 12th, 1942, nine miles from Ras el Tin.

OGASHIMA MARU

Nakagawa Risen K.K.; 1936; *Mitsubishi Jukogyo K.K.*; 1,424 tons; 241-6x37x19-7; 183 n.h.p.; oilengines. The motor vessel *Ogashima (Ogasimd) Maru* was sunk by U.S. carrier based aircraft on January 24th, 1944, off Kwajalein, Marshall Islands.

OGONO

Compania Naviera Bidassoa; 1894; *Furness, Withy & Co.*; 2,416 tons; 290x40-5x18-8; 775 i.h.p.; 8-5 knots; triple-expansion engines. The Spanish steamship *Ogono* was on a voyage from Castro Urdiales to Middlesbrough with a cargo of iron ore. At 3.55 a.m. on August 18th, 1929, when near the Dowsing Light off the Humber she collided with the tug *King's Cross* and sank in six minutes. Fifteen of her crew were drowned, including the captain, first officer and chief engineer.

The *King's Cross* was badly damaged but managed to reach Grimsby with ten survivors from the

OGONIZ

Intercoastal Packing Co.; 1919; *American International S.B. Co.*; 5,057 tons; 390x54-2x27-6; 600 n.h.p.; turbine engines. The American steamship *Ogoniz* was torpedoed and sunk by a German submarine on May 19th, 1942, in the Gulf of Mexico. Nineteen of her crew were killed.

OGURA MARU No. 1

Ogura Sekiyu K.K.; 1929; *Mitsubishi Zosen Kaisha*; 7,270 tons; 430x57x34-5; 82 n.h.p.; oilengines. The tanker *Ogura Maru No. 1* was sunk by U.S. carrier-based aircraft on September 21st, 1944, off the west coast of Luzon Island, Philippines.

OGURA MARU No. 2

Ogura Sekiyu K.K.; 1930; *Mitsubishi Zosen Kaisha*; 7,311 tons; 430X57X34-5; 582n.h.p.; oil engines. The tanker *Ogura Maru No. 2* was torpedoed and sunk by the U.S. submarine *Redfish* on September 16th, 1944, about 100 miles S. of Formosa.

OGURA MARU No. 3

Ogura Sekiyu K.K.; 1916; *Barclay, Curie & Co.*; 7,350 tons; 450-6x58-2x32-7; 830n.h.p.; triple-expansion engines. The tanker *Ogura Maru No. 3* was torpedoed and sunk by the U.S. submarine *Cod* on February 23rd, 1944, about 100 miles N. of Morotai Island, the Moluccas.

OGURASAN MARU

Mitsui Sempaku; 5,069 tons.
The tanker *Ogurasan Mam* was torpedoed and sunk by the U.S. submarine *Bowfin* on November 26th, 1943, off the east coast of Indo-China.

OHAU

Union Steamship Co. of New Zealand; 1884; *W. Denny & Bros.*; 740 tons; 200 X 32 • 2 X 15 -4; 92 h.p.; 9 knots; compound engines. The steamship *Ohau*, Capt. R. Brewer, left Greymouth, New Zealand, on Friday, May 12th, 1899, with a cargo of 800 tons of coal and 13,000 feet of timber, bound for Dunedin. She carried a crew of 22.

The weather worsened considerably as the ship proceeded, until the 14th when a full gale was blowing. The *Ohau* was sighted on the 13th off Brothers Island by the s.s. *Rosamund*, and later she was in full view of the lighthouse-keeper at Cape Campbell until 5.20 p.m. This was the last that was seen of her.

Owing to the violence of the gale a number of ships in its vicinity arrived at their destinations several days overdue. There was therefore, no anxiety for the *Ohm's* safety for some little while, but after a week with no news it was feared that she was lost. The s.s. *Brunner* was sent out to make a search but returned without having found a trace of the missing steamship. On the 28th news came of lifebuoys and other wreckage washed ashore between Castlepoint and Cape Turnagain.

OHI

Japanese Navy, light cruiser; 1920; *Kawasaki Dockyard*; 5,100 tons; 535x46-8x15-8; 70,000 s.h.p.; 33 knots; turbine engines; Kanpon boilers; seven 5-5 in. guns, two 3 in., 2 m.g.; 8 T.T., 80 mines, 1 aircraft.

The light cruiser *Ohi* was torpedoed and sunk in the South China Sea by the U.S. submarine *Flasher* on July 19th, 1944. The cruiser's normal complement was 439.

OHIO

W.F. Mitchell; 1880; *A. McMillan & Son*; 3,967 tons; 360 x 43-1x24-8; 265 n.h.p.; quadruple-expansion engines. The British cargo ship *Ohio* was wrecked at Ping Yang Inlet, Korea, on October 22nd, 1904. She was on a voyage from Muroto to Chinnampo carrying a cargo of railway sleepers.

OHIO

Soc. Anon, des Chantiers & Ateliers de St. Nazaire; 1914; *Chantiers de Normandie*; 8,719 tons; 445x61-2x27-5; 542 n.h.p.; triple-expansion engines.

The French steamship *Ohio* was torpedoed and sunk by a German submarine off the W. coast of Ireland on March 7th, 1917.

OHIO MARU

Hakuyo Risen K.K.; 1920; *Kawasaki Dockyard Co.*; 5,872 tons; 385x51x36; 437 n.h.p.; triple-expansion engines. The steamship *Ohio Mam* was sunk by the U.S. submarine *Tautog* on August 6th, 1942, in the South China Sea.

OHIOAN

American-Hawaiian Steamship Co.; 1920; *G. M. Standifer Construction Corp.*; 5,075 tons; 401-4x53'2x31-9; 2,800 i.h.p.; 10-75 knots; triple-expansion engines. The American steamship *Ohioan*, Capt. F. H. Roberts, was torpedoed and sunk by a German submarine about 300 miles E. of the Bahamas on May 8th, 1942. Fifteen men were killed and four wounded. Capt. Roberts was among the survivors. The vessel was not in convoy.

OIGAWA MARU

Toyo Kaiun K.K.; 6,493 tons.
The steamship *Oigawa Maru* was sunk by bombs from Allied land-based aircraft and gunfire from U.S. warships on March 3rd, 1943, in the Straits of Macassar.

OILFIELD

Field Tank S.S. Co.; 1938; *Odense Staalskibsverft*; 8,516 tons; 475-9x61-8x33-8; 653 n.h.p.; 11 knots; oil engines. The motor tanker *Oilfield*, Capt. Anderson, was torpedoed and

sunk by a German submarine approximately 350 miles N.N.W. of the Hebrides on April 28th, 1941. Capt. Anderson and 46 men were killed.

OILPIONEER

British Oil Shipping Co.; 1928; *Swan, Hunter & Wigham Richardson*; 5,666 tons; 410 x 53 • 5 x 31; 676 n.h.p.; oil engines. The British tanker *Oilpioneer* was sunk by gunfire and a torpedo from German warships on June 8th, 1940, near Narvik, during the operations following the invasion of Norway. The captain and 19 of her crew were killed.

OITA MARU

Osaka Shosen K.K.; 1907; *Osaka Iron Works*; 711 tons; 186 • 8 x 26 - 3 X 18 • 1; 67 n.h.p.; triple-expansion engines. The Japanese cargo steamship *Oita Maru* was torpedoed and sunk by the U.S. submarine *Tang* on the night of October 11th, 1944. The attack took place off the northern extremity of Formosa.

OITE

Japanese Navy, destroyer; 1924; *Uraga*; 1,270 tons; 320 x 30x9*6; 55,500 s.h.p.; 34 knots; turbine engines; Kanpon boilers; four 4-7 in. guns, 2 A.A.m.g., 6 T.T. The destroyer *Oite* was one of the vessels lost in the defence of the naval base of Truk in the Carolines Group. She was sunk by U.S. carrier-borne aircraft on February 17th, 1944. Her normal complement was 148.

For further details see the light cruiser *Agano*.

OKARA

British India Steam Navigation Co.; 1895; *W. Denny & Bros.*; 5,291 tons; 410x50-6x24-7; 10 knots; triple-expansion engines.

The British India cargo steamship *Okara*, Capt. Smith, was bound for Rangoon with a cargo of coal when she was overwhelmed in a cyclone which swept the Bay of Bengal on May 6th, 1923. The ship sent out an S.O.S. message from lat. 19° N., long. 91° E., which was picked up by the liner *Angora*, Capt. Diamond, and the steamship *Takada*, Capt. Rowe. Both vessels altered course and steered for the disabled steamship, but failed to reach her in time. The last message received by the *Angora* asked for the distance separating the two ships; a reply was sent that the liner was nine miles away. After a brief flicker of S.O.S. calls there was no further signal and Capt. Diamond realised that the *Okara* had foundered.

The *Okara* carried a crew of 11 Europeans and 70 Indians, all were drowned.

OKEMENT

Westoll & Co.; 1915; *W. Pickersgill & Sons*; 4,349 tons; 365x51x25*9; 376 n.h.p.; 10 knots; triple-expansion engines. The steamship *Okement* was torpedoed and sunk by a German submarine 140 miles S.E. by S. of Malta on February 17th, 1917. The captain and ten men were killed.

OKHLA

British India Steam Navigation Co.; 1895; *W. Denny & Bros.*; 5,288 tons; 410 x 50 - 7 X 21; 354 n.h.p.; 10-5 knots; triple-expansion engines.

The steamship *Okhla* struck a mine 30 miles W. of Bombay on July 29th, 1917, and sank with the loss of nine persons, including the captain. She was one of the many ships which fell victim to the mines sown by the German commerce-destroyer *Wolf*.

OKIGAWA MARU

Kawasaki Risen K.K.; 10,043 tons.
The tanker *Okigawa Maru* was sunk by U.S. carrier-based aircraft on September 24th, 1944, about 150 miles S.W. of Bataan, Philippines.

OKIKAZE

Japanese Navy, destroyer; 1919; *Maizuru*; 1,215 tons; 336-5X 29-3x9-6; 38,500 s.h.p.; 34 knots; turbine engines; four 4-7 in. guns, 2 A.A.m.g., 6 T.T.

The destroyer *Okikaze* was torpedoed and sunk off Honshu on January 10th, 1943, by the U.S. submarine *Trigger*. The destroyer's normal complement was 148.

OKINAMI

Japanese Navy, destroyer; 1942; Japan; 2,200 tons; 415 X 35 X—; 34 knots; turbine engines; six 5 in. guns, eight 25 mm. A.A., 15 T.T.

The destroyer *Okinami* was bombed and sunk in Manila Bay, Philippine Islands, by aircraft from fast carriers of the U.S. Third Fleet on November 13th, 1944.

The *Okinami* carried a complement of over 200. For further details see the destroyer *Akebono*.

OKINAWA MARU

*Konan Risen K.K.; 1896; Lobnitz & Co.; 2,254 tons; 296 -5 x 40x13-5; 313 n.h.p.; triple-expansion engines. The steamship *Okinawa Mam* was torpedoed and sunk by the U.S. submarine *Silver sides* on May 10th, 1944, N. of the Caroline Islands.*

OKINOSHIMA

Japanese Navy, minelayer; 1935; Harima; 4,400 tons; 386-5 X 51-2x16-5; 9,000 s.h.p.; 20 knots; turbine engines; Kanpon boilers; four 5-5 in. guns, 4 m.g.

The minelayer *Okinoshima* was torpedoed and sunk in St. Georges Channel, Bismarck Archipelago, by the U.S. submarine *S-42* on May 11th, 1942. The vessel carried a complement of about 300.

OKINOYAMA MARU No. 5

Okinoyama Tanko K.K.; 1932; Osaka Iron Works; 1,543 tons; 251x39x19; 190 n.h.p.; oil engines.

The motorship *Okinoyama Maru No. 5* was sunk by U.S. carrier-based aircraft on March 25th, 1945, about 40 miles S.W. of Okinawa Island.

OKITSU MARU

*Japanese Government; 1939; Harima S.B. & Eng. Co.; 6,666 tons; 437-2x58-5x32-8; turbine engines. The steamship *Okitsu (Okiti)* Maru was taken over by the Japanese Navy and converted into an auxiliary seaplane tender. On January 26th, 1944, she was torpedoed and sunk by U.S. submarine *Skipjack* about 100 miles N.E. of Truk, Caroline Islands.*

OKLAHOMA

Gulf Refining Co.; 1908; New York S.B. Co.; 5,853 tons; 419x55-2x28-8; 424 n.h.p.; 11-5 knots; triple-expansion engines.

The tanker *Oklahoma*, in ballast, ran into heavy weather about 50 miles off Atlantic City on January 4th, 1914, and broke in two forward of the engine room. The after part turned turtle and sank with the greater part of the crew. Two boats stowed forward were thrown into the sea as there was no other means of launching them. The first boat capsized and out of 11 occupants five were drowned but the remainder succeeded in righting her. This boat was picked up later by the steamship *Gregory*, Capt. W. Aspinall, and five of the six men were found to be alive, though greatly exhausted. The second boat containing three dead bodies was picked up by the U.S. revenue cutter *Seneca* several days later.

The forepart of the *Oklahoma* was sighted by the Spanish steamship *Manuel Calvo*, which wirelessed the news to New York. At the time it was too rough for boats to attempt a rescue, but eventually eight men, mostly officers, were taken off the tanker's bridge by the Hamburg-Amerika liner *Bavaria*.

The crew of the tanker numbered 38, of whom 25 lost their lives.

OKLAHOMA

*United States Navy, dreadnought battleship; 1914; New York Shipbuilding Co.; 29,000 tons; 583x107-9x32-5; 25,000 i.h.p.; 20-5 knots; triple-expansion engines; Bureau-Express boilers; ten 14 in. guns, twenty 5 in., four 3 pdr., 8 m.g. The battleship *Oklahoma* was struck by an aerial torpedo during the Japanese air attack on Pearl Harbour on December 7th, 1941. She capsized in shallow water and was raised in 1943, when her condition was found to be beyond repair and she was broken up in the following year.*

The full story of the attack on Pearl Harbour is told under the battleship *Arizona*.

OKLAHOMA

*The Texas Co.; 1940; Sun S.B. & D.D. Co.; 9,298 tons; 488'8x68-3x36-2; 1,718 n.h.p.; turbine engines. The American tanker *Oklahoma* was torpedoed and sunk by a German submarine on March 28th, 1945, on a voyage from Aruba to Dakar. The survivors numbered ten crew and 12 gunners.*

OKLAHOMA

*Rederi A/B Transatlantic; 1949; A/JB Gotaverken; 5,914 tons; 456-7x59-1x22-2; 2,120 n.h.p.; oil engines. The Swedish motorship *Oklahoma* broke in two and sank during a storm on December 26th, 1953, about 400 miles E. of Newfoundland.*

OKUNI MARU

*Naigai Kisen K.K.; 5,633 tons. The steamship *Okuni Maru* was torpedoed and sunk by the U.S. submarine *Barb* on August 31st, 1944, about 100 miles S. of Formosa.*

OKUYOMARU

*Toyo Kisen K.K.; 1938; Mitsubishi Jukogyo K.K.; 2,904 tons; 305-4x42-7x26-2; 202 n.h.p.; triple-expansion engines. The steamship *Okuyo Maru* was taken over by the Japanese Navy and converted into an auxiliary gunboat. She was torpedoed and sunk by the U.S. submarine *Ray* on January 1st, 1944, off the south west coast of Ceram.*

OLANCHO

Empresa Hondurena de Vapores; 1921; Newburgh Shipyard; 2,494 tons; 301-3x42-3x22-6; 492 n.h.p.; triple-expansion engines.

The Honduran steamship *Olancho* was torpedoed and sunk by a German submarine on March 10th, 1943, between Tela and Tampa.

OLANDA

Stoomv. Maats. Nederlandsche Lloyd; 1899; W. Gray & Co.; 2,138 tons; 290x42-2x19-3; 217 n.h.p.; triple-expansion engines.

The Dutch steamship *Olanda* struck a mine and sank in the North Sea on April 18th, 1915.

OLBIA

*Tirrenia Soc. Anon. di Nav.; 1929; Soc. Anon. Ansaldo; 3,514 tons; 324x43-8x21-4; 1,167 n.h.p.; oil engines. The Italian motorship *Olbia* was torpedoed and sunk by a British submarine on June 20th, 1943, 20 miles S. of Cape Spartivento, Italy.*

OLDENBURG

Oldenburg Portugiesische Dampfs. Rhederei; 1936; Deutsche Werft A.G.; 2,312 tons; 287-9x45-8x18-1; 304 n.h.p.; compound engines & L.P. turbine.

The German steamship *Oldenburg* was torpedoed and sunk by a British submarine on April 15th, 1940, in the Kattegat.

OLDENBURG

*Midgard Deutsche Seeverkehrs A.G.; 1914; J. C. Tecklenborg A.G.; 4,595 tons; 386-7x49-2x30; 400 n.h.p.; triple-expansion engines. The German steamship *Oldenburg* was bombed and sunk by British aircraft on April 7th, 1945, in the Sognefjord, Norway.*

OLE BULL

*H. Westfal Larsen; 1901; Wood, Skinner & Co.; 1,835 tons; 270x38-5x17-7; 149 n.h.p.; triple-expansion engines. The Norwegian steamship *Ole Bull* struck a mine and sank in the North Sea on January 11th, 1917.*

OLEANDER

*British Admiralty; 1922; Pembroke Dockyard; 7,048 tons; 430x57x26-3; 5,250 i.h.p.; 11 knots; triple-expansion engines. The British naval tanker *Oleander* was badly damaged on May 26th, 1940, during the Norwegian campaign. She was run ashore in Harstad Bay, Norway, in the hope of saving her, but on June 8th she sank.*

OLGA

OLGA

German Navy, corvette; 1880; Germany; 2,169 tons; 226-3 x 42-6 x 18-3; 2,397 i.h.p.; 14 knots; compound engines; eight 5-9 in. guns, two 4 in., 4 m.g.

The corvette *Olga*, Capt. von Ehrhardt, was the senior ship of a small squadron lying in the harbour of Apia, Samoa, in March, 1889. On Friday, March 15th, she was driven ashore and wrecked during a hurricane. Fortunately none of her crew was lost.

The full story of the hurricane is told under the U.S. flagship *Trenton*.

OLGA

Soc. Franfaise d'Armement, Em. Frisch & Cie.; 1910; R. Duncan & Co.; 2,964 tons; 310x46x20-5; 265 n.h.p.; triple-expansion engines.

The French steamship *Olga* was sunk by a submarine in the Mediterranean on June 18th, 1916.

OLGA E. EMBIRICOU

C. E. Embiricos; 1922; J. Readhead & Sons; 4,677 tons; 400-3 x 52'1 x 25-9; 455 n.h.p.; triple-expansion engines. The Greek steamship *Olga E. Embiricou* was torpedoed and sunk by a submarine on January 29th, 1944, in the Gulf of Aden. The captain, 17 of the crew and two gunners were killed.

OLIMPIA

A. Lauro; 1920; Rickmers A.G.; 6,040 tons; 435x55-6x29-2; 580 n.h.p.; triple-expansion engines.

The Italian steamship *Olimpia* was shelled and sunk by British warships on October 14th, 1943, off Cattaro.

OLINDA

Hamburg Sudamerikanische Dampfs. Ges.; 1927; Howaldts-werke; 4,576 tons; 349-5 x 50-3 x 29; 247 n.h.p.; compound engines.

The German steamship *Olinda* was shelled and sunk by a British cruiser on September 3rd, 1939, off Rio Grande, Brazil.

OLIVA

Argo Reederei Richard Adler & Co.; 1922; Niiscke & Co.; 1,308 tons; 242-1 x 37 x 14; 108 n.h.p.; triple-expansion engines.

The German ship *Oliva* was reported to have struck a rock on December 28th, 1942, off Uto and sunk, on a voyage from Germany to Finland.

OLIVE BRANCH

Nautilus S.S. Co.; 1881; W. Doxford & Sons; 1,728 tons; 260 x 36 x 18-5; 160 h.p.; compound inverted engines.

The British cargo ship *Olive Branch* sank after a collision with the British steamship *Tudor*, 20 miles S. of St. Catherine's Point on June 5th, 1885. She was on a voyage from Sunderland to Palermo carrying a cargo of coal and gas fittings.

OLIVIA

N. V. Curafaosche Scheepv. Maats.; 1939; *Cantieri Riuniti delVA Adriatico*; 6,307 tons; 428-1 x 54-5 x 30-9; 377 n.h.p.; oil engines.

The Dutch tanker *Olivia* left Abadan on May 27th, 1942, with 9,000 tons of benzine and kerosene for Fremantle. On June 14th, she was intercepted by five Japanese warships about 1,000 miles E.S.E. of Mauritius and sunk by gunfire. Nothing was heard of her crew of 47 until a boat with four survivors reached Madagas car on July 13th, eight men having died during the voyage. The survivors reported that the Japanese machine-gunned the boats and only one boat escaped.

OLIVINE

Wm. Robertson; 1926; J. Lewis & Sons; 929 tons; 199-8 x 30-9 x 12-7; 140 n.h.p.; triple-expansion engines.

The British cargo ship *Olivine* was lost without trace after sailing from Glasgow on March 27th, 1941, for Sharpness. She had a crew of 12 and two gunners and was carrying a cargo of wheat.

OLOPANA

Matson Navigation Co.; 1920; G. M. Standifer Construction Corp.; 6,069 tons; 401-4 x 53-2 x 31-9; 2,800 i.h.p.; 9-5 knots; triple-expansion engines.

The American steamship *Olopana*, Capt. M. C. Stone, was one of a convoy of 35 ships bound to Murmansk on July 5th, 1942, when an attack was made by the German battleship *Tirpitz* and the heavy cruiser *Hipper* with a number of submarines and aircraft. The convoy was compelled to disperse and at about 11 o'clock on the night of the 6th the *Olopana* was struck in the engine room by a torpedo from a submarine. Six men were killed by the explosion and most of the boats and rafts were destroyed. The survivors put off in the three remaining rafts and after 72 hours adrift landed on Novaya Zemlya. Here they were spotted by a Russian plane which directed the British steamship *Empire Tide* to the spot and they were taken off.

OLSA

German Government; 1908; J.L. Thompson & Sons; 3,699 tons; 346-5 x 50-8 x 22-9; 329 n.h.p.; triple-expansion engines. The steamship *Olsa* was formerly the Greek *Omonia*, seized by the Germans. She was bombed and sunk by Russian aircraft on October 11th, 1944, off North Norway.

OLTENIA II

Ministry of War Transport (British Tanker Co.); 1928; *Armstrong, Whitworth & Co.*; 6,394 tons; 423-7 x 55-3 x 32-4; 533 n.h.p.; 10 knots; quadruple-expansion engines. The tanker *Oltenia II*, Capt. A. Laddie, was torpedoed and sunk by a German submarine on January 8th, 1943, some hundreds of miles W. of the Canary Islands, in convoy. Six Europeans, including Capt. Laddie, and 11 Indians were killed.

OLUF MCERSK

D/Saft 912A/S; 1916; A. Vuijk & Zonen; 1,950 tons; 281-3 x 40-2 x 18-9; 208 n.h.p.; triple-expansion engines. The Danish steamship *Oluf Mcersk*, under German control, was bombed and sunk by British aircraft on November 30th, 1941, west of Bokum.

OLYMPIA MARU

Mitsubishi Shoji Kaisha; 1927; *Mitsubishi Zosen Kaisha*; 5,617 tons; 405 x 55 x 32; 582 n.h.p.; oil engines. The motor vessel *Olympia Maru* was sunk by U.S. carrier-based aircraft on September 24th, 1944, off the north-west coast of Negros Island, Philippines.

OLYMPIC

S. Niarchos; 1907; J. Readhead & Sons; 5,335 tons; 370 X 50-1 x 32-1; 374 n.h.p.; triple-expansion engines. The Panamanian ship *Olympic* left Curasao on January 13th, 1942, for Baltimore, but was not seen again. She was thought to have been sunk by a submarine on the 22nd, off Hampton Roads.

OLYMPBER

Cie. Maritime Beige (Lloyd Royal); 1920; *Lloyd Royal Beige (Gt. Britain)*; 5,266 tons; 400-5 x 52*2 x 28-7; 574 n.h.p.; triple-expansion engines.

The Belgian steamship *Olympier* was bombed and sunk by German aircraft on January 30th, 1941, 25 miles S.W. of Ireland, with the loss of eight lives.

OLYMPUS

American sailing ship; 1850; *Kennebunk, U.S.A.*; 744 tons. The sailing ship *Olympus*, Capt. Wallace, left Liverpool on May 24th, 1854, for Boston with 40 passengers and 18 crew, with a general cargo. On the night of June 20th, in squally weather, she collided with the American sailing ship *Trade Wind*, 2,018 tons, in lat 41° 50' N., long 57° 20' W. Capt. Wallace and a number of passengers and crew jumped on to the *Trade Wind* and were carried by her some five miles beyond the *Olympus* which, fortunately, did not sink immediately. At daybreak Capt. Wallace in the *Trade Wind's* gig, manned by some of his own crew, managed to board the *Olympus* and get away her boats with most of those on board. The ship foundered at 6 a.m.

The number drowned was six, of whom three were passengers. See also *Trade Wind*.

OMBRINA

Polena, Soc. Anon.; 1943; Italy; 6,200 tons; oilengines. The Italian motorship Ombrina was bombed and sunk by British aircraft on March 24th, 1943, at Bizerta.

OMEGA

Emigrant ship; 1840 (circa); 1,277 tons. The sailing vessel Omega left Liverpool for New York on January 16th, 1848, with 315 emigrants and 30 crew under Capt. Carrick. For the first fortnight the voyage was favoured by fair weather but after that time there was a succession of gales which dismasted the Omega and left her at the mercy of the seas. On February 17th she sighted the barque Aurora, bound from Wales to St. John, New Brunswick, in ballast, and signalled to her to take off as many of the emigrants as possible. The Aurora complied with this request and 130 persons were transferred to her, but one boat containing the second officer and four seamen capsized and its occupants were drowned. The Aurora then made sail for Halifax, Nova Scotia, which she reached on February 29th, by which time 70 of the survivors had died on the voyage through exposure and overcrowding.

Meanwhile the Omega with what was left of her company continued to beat about the seas until she was sighted by the brig Barbara, from New York to Cork with a cargo of Indian corn. The brig stood by and took on board 150 people, part of her cargo being thrown overboard in order to make sufficient room. She then left the Omega, which still had on board Capt. Carrick, the first officer, eight seamen and 25 emigrants. This party was rescued two days later by the barque Highland Mary and was brought safely to land.

Those on the Barbara were in a most unfavourable position, however, for the ship was already short of water and only two casks could be obtained from the Omega. The passengers suffered greatly from thirst and the ship also encountered heavy weather, which made matters worse. The captain made a mistake in his course and the ship was driven ashore by strong currents close to Heart's Point, a small promontory on the Canadian coast, where she struck on a ledge which stove in her bottom. Twenty persons saved themselves by crawling along the yards to the cliffs and 30 others managed to clamber on to the rocks before the ship sank.

The number drowned was 115, including some of the crew of the Barbara. In all these disasters nearly 250 persons lost their lives. Later the hull of the Omega was discovered, quite undamaged, and had the unfortunate people remained on board her it is probable that not a single life would have been lost.

OMIMARU

Nippon Yusen K.K.; 1912; Napier & Miller; 3,393 tons; 345 -5 x 46 • 3 X 25 • 5; 456 n.h.p.; triple-expansion engines. The steamship Omi Maru was torpedoed and sunk by the U.S. submarine Triton on December 28th, 1942, south of Kusaie Island, Caroline Islands.

OMINESAN MARU

Mitsui Sempaku; 10,536 tons. The tanker Ominesan Maru was torpedoed and sunk by the U.S. submarine Blue fish on March 4th, 1944, about 100 miles W. of Penang.

OMMANEY BAY

United States Navy, air craft carrier; 1943; U.S.A.; 6,730 tons; 498-8x80x19-9; 11,200 i.h.p.; 18 knots; triple-expansion engines; one 5 in. gun, twenty-four 20mm.A.A., 30 aircraft. The United States escort aircraft carrier Ommaney Bay. Capt. Young, was one of a large force of ships proceeding to the Lingayen Gulf, Luzon, Philippine Islands, prior to the landing of the U.S. Army on January 9th, 1945. About 240 Japanese aircraft from various airfields on the island of Luzon attacked the ships with extreme violence. On the 4th, when the American force was entering the Sulu Sea, the Ommaney Bay came under concentrated bombing, being hit on the flight deck, the hanger deck and the forward engine room. Fires broke out in several places, and could not be brought under control as pressure for the hoses had failed.

The first bomb exploded at 5.12 p.m. and three hours later the carrier sank with the loss of 93 killed and 65 wounded. Seven survivors who were picked up by ships in company were killed when

the rescuing ships were bombed. Capt. Young was among the survivors. The Ommaney Bay's normal complement was 800.

OMNIUM

1915; Chantiers de Normandie ; 8,719 tons; 447-8x61-2x27-8; triple-expansion engines. The French steamship Omnium was sunk by a German submarine in the Bay of Biscay on January 2nd, 1917.

OMRAH

Orient Steam Navigation Co.; 1899; Fairfield Co.; 8,130 tons; 490-7x56-7x26; 9,000i.h.p.; 17 knots; triple-expansion engines. The liner Omrah was taken over by the Admiralty for service in the First World War. On May 1st, 1918, she left Alexandria for Marseilles in company with six other transports carrying units of the 52nd and 74th Divisions.

The Omrah was torpedoed and sunk on May 12th, 40 miles S.W. [S. of Cape Spartiyento, on her return voyage from Marseilles, with small loss of life.

OMUROSAN MARU

Mitsui Bussan Kaisha; 1937 Mitsui Bussan Kaisha; 9,204 tons; 491-4x65x 36; 1,231 n.h.p.; oil engines. The tanker Omurosos Maru was torpedoed and sunk by the U.S. submarine Flasher on December 22nd, 1944, 25 miles east of Quang Ngai, Indo-China.

ON SANG

Indo-China S.N. Co.; 1895; Sir Raylton Dixon & Co.; 2,802 tons; 310X40-6X17-6; 244n.h.p.; triple-expansion engines. The British cargo ship On Sang foundered off Point St. John's on July 3rd, 1917. She had sailed from Port Natal carrying a cargo of sugar.

ON WO

Indo-China S.N. Co.; 1870; W. Denny & Bros; 1,354 tons; 224 -7x32^5x20-5; 180 n.h.p.; compound engines. The British steamship On Wo, Capt. Stessar, sank after a collision with the steamship Newchwang near Woosung on April 30th, 1896, on a voyage from Shanghai to Hangkow carrying passengers and a general cargo. The captain, first mate, pilot, two engineers and 250 Chinese were drowned.

ONAMI

Japanese Navy, destroyer; 1941; Japan; 2,200 tons; 415x35x —; 34 knots; turbine engines; six 5 in. guns, eight 25 mm.A.A., 15 T.T. The destroyers Makinami and Onami, both of 2,200 tons, and the Yugiri of 1,700 tons, with several others were patrolling the waters S. of New Ireland on the night of November 25th, 1943, when they ran into four U.S. destroyers engaged upon the same duty. The three above mentioned Japanese destroyers were sunk and the remainder retired from the action. The locality in which the fight took place was between Buka and Cape St. George.

The Makinami and Onami carried complements of over 200 and the normal complement of the Yugiri was 197.

ONCLE JOSEPH

Valery Freres; 1870(circa); St.Nazaire; 823 tons; 210x — x—; 9 • 5 knots; compound engines. The French steamship Oncle Joseph plying between Marseilles, Genoa, Leghorn and Civitavecchia was homeward bound under Capt. Lacombe with 305 persons on board, of whom 272 were passengers, and 800 tons of general cargo. At 3 a.m. on November 24th, 1880, off Spezia, she collided with the Italian steamship Ortigia, 1,853 tons. She was struck heavily amidships at full speed and was cut down to the water's edge, remaining afloat only eight minutes after the collision.

The loss of life amounted to 215 passengers, Capt. Lacombe, the first mate and seven seamen.

The Ortigia was only able to lower one small boat, the greater number of the saved being those who jumped on to her decks from the sinking ship at the moment of impact. She suffered severe damage to her bows, but managed to make Leghorn in safety.

ONDINA

ONDINA

N.V. Petroleum Maats. La Corona; 1939; Nederlandsche Dok Maats; 6,341 tons; 428' 1x54-5x30-9; 377 n.h.p.; oil engines. The Dutch tanker *ONDINA* sailed from Fremantle on November 5th, 1942, bound for Diego Garcia and Abadan, with part cargo of wheat, escorted by the newly-built minesweeper *Bengal*, 733 tons, of the Indian Navy.

On November 11th, in lat. 19°45'S., long. 92° 40'E., the ships were intercepted by the Japanese auxiliary cruiser *Hokoku Maru* in company with the seaplane tender *Kunikawa Mam*.

In the ensuing action the *ONDINA* was severely damaged by gunfire and holed below the waterline by two torpedoes but remained afloat. Her captain, chief engineer and three of the crew were killed.

In the meantime the escorting minesweeper sank the *Hokoku Maru*, whereupon the other Japanese ship broke off the action to rescue survivors. The crew of the *ONDINA* managed to get their ship back to Fremantle, arriving there on November 18th.

For the full account of this action see *Hokoku Maru*.

ONDO

Japanese Navy; 6,500 tons. The tanker *Ondo* was sunk by U.S. carrier-based aircraft on November 13th, 1944, in Manila Bay.

ONEGA

Barber & Co.; 1880 tons; Harland & Wolff; 3,636 tons; 401 x 39-6x21-3; 391 n.h.p.; triple expansion engines. The American steamship *Onega* was torpedoed and sunk by a German submarine in the Bristol Channel on August 30th, 1918.

ONEGA

U.S.S.R.; 1924; Bergens Mek. Verksted; 1,603 tons; 244-4X 37-7x15-7; 138 n.h.p.; triple-expansion engines. The Russian steamship *Onega* was torpedoed and sunk by a German submarine on April 22nd, 1945, in the Barents Sea.

ONEGA

Flakkes A/S; 1921; Schiffswerfte & Maschinenfabrik A.G.; 1,121 tons; 254-6x32x —; oil engines. The Norwegian motorship *Onega* left Gefle on February 3rd, 1960, for Rotterdam, and is believed to have been sunk between Huvudskar and Gotska Sandon, outside Stockholm. Wreckage was afterwards found which suggested that there had been an explosion. All her crew of 16 were lost.

ONEIDA

United States Navy, wooden steam corvette; 1861; New York Navy Yard; 1,032 tons; 201-5x33-9x16; 12knots; horizontal back-acton engines; three 30pdr. Parrotguns, two 9 in. Dahlgren, fourteen 32 pdr., one 12 pdr.

The corvette *Oneida* was leaving Yokohama Harbour for Hong Kong on the evening of January 24th, 1870, when she collided with the P. and O. liner *Bombay*, 1,186 tons, Capt. Eyre. The *Oneida*, under sail and steam, crossed the bows of the liner and was struck forward of her starboard mizzen-rigging. The whole of her starboard quarter, wheel and steering gear were carried away and she began to sink. At the time of the collision, between 6.15 and 6.30 p.m., the ships were off Saratoga Spit, about five miles from shore. The *Oneida* foundered in ten minutes taking with her 115 officers and men out of a complement of 176. Only one of her boats was lowered, all the others having been smashed in the collision. This boat, containing Dr. Stoddart, the boatswain and 15 men, reached shore in safety.

Meanwhile the *Bombay* had proceeded on her course, believing that she had inflicted little damage on the other ship, and attending to her own injuries. The *Oneida* fired five of her guns, which happened to be ready loaded, but this brought no response from the *Bombay*. Both crews in their evidence stated that they heard no sounds from each other, and the passengers on board the *Bombay* experienced only a very slight shock. On arriving at Yokohama, however, the *Bombay* was made aware of the state of affairs and returned to the wreck, where she picked up a number of men.

From survivors' stories it was established that the *Oneida's* officers were at dinner at the time of the collision. Cdr. Williams immediately hurried on deck and found his ship already sinking,

and is stated to have said that he would not attempt to save his life but would go down with her. The ship sank in 14 fathoms.

The total number of survivors from the *Oneida* was 61, of whom four were officers.

ONEIDA

Ford Motor Co., 1920; Detroit S.B. Co.; 2,309 tons; 25 lx 43-6x22-2; 265 n.h.p.; triple-expansion engines. The American steamship *Oneida* was torpedoed and sunk by a German submarine on July 13th, 1942, near Cape Maysi, Cuba. Six of her crew were killed.

ONEIDA

Agwilines, Inc.; 1919; Detroit S.B. Co.; 2,664 tons; 25lx 43-6x26-1; 352n.h.p.; triple-expansion engines. The American ship *Oneida* was taken over by the U.S. Navy for use as a transport. On May 3rd, 1943, on a voyage from New York to Sydney, N.S.W., she ran into heavy weather some 300 miles E. of Hampton Roads and sprang a leak. Before long she was taking water beyond the capacity of her pumps and was abandoned in a sinking condition the following day. Thirty-one of her complement of 62 were lost.

ONESTA

FratelliBeraldo; 1896; Russel&Co.; 2,674 tons; 309x42-6x16-1; 232 n.h.p.; triple-expansion engines. The Italian steamship *Onestd* was torpedoed and sunk by a German submarine in the North Sea on August 7th, 1917.

ONOE MARU

Nippon YusenK.K.; 1939; Harima S.B. &Eng. Co.; 6,667 tons; 437-2x58-5x32-8; turbine engines. The steamship *Onoe Maru* was torpedoed and sunk by the U.S. submarine *Raton* on November 26th, 1943, 150 miles N.E. of the Admiralty Islands.

ONONDAGA

Ford Motor Co.; 1920; Detroit S.B. Co.; 2,310 tons; 251 X 43-6x22-2; 265n.h.p.; triple-expansion engines. The American steamship *Onondaga* was torpedoed and sunk by a German submarine on July 23rd, 1942, between Nuevitas and Havana. Eighteen of her crew were lost.

ONORIA

D. D. Castro & A. Aboaf; 1890; W. Gray & Co.; 2,580 tons; 300-6x41-6x21-2; 240 n.h.p.; triple-expansion engines. The Italian ship *Onoria* caught fire and sank on July 8th, 1921, off Cape Matapan. She was carrying liquid fuel and a general cargo to Smyrna and Galatz.

ONSLow

Scaramanga Bros.; 1899; Barclay, Curie & Co.; 2,722 tons; 312X45-9X20-5; 268 n.h.p.; triple-expansion engines. The British cargo ship *Onslow* was wrecked at Kettleness Point, near Whitby, on August 12th, 1911. She was on a voyage from Sunderland to Piraeus carrying a cargo of coal.

OOMA

W. Crosby & Co.; 1905; Craig, Taylor & Co.; 3,991 tons; 358x49-3x18-2; 391 n.h.p.; triple-expansion engines. The British steamship *Ooma* was wrecked at Sydney Point, Ocean Island, on February 8th, 1926. She was on a voyage from Sydney, N.S.W., to Ocean Island and Nauru Island carrying coal and a general cargo.

OOTMARSUM

Vinke&Co.; 1920; A. Vuijk & Zonen; 3,628 tons; 360-lx 48-2x22-8; 426 n.h.p.; triple-expansion engines. The Dutch ship *Ootmarsum* left Sydney, N.S., for Newport on November 9th, 1940, but is believed to have been lost by enemy action. Three other ships in the same convoy were torpedoed and sunk on the 23rd, 300-400 miles W. of Inishtrahull.

OPAL

W. Robertson; 1894; Scott & Sons; 599 tons; 180x29-1x10-6; 99 r.h.p.; triple-expansion engines.

On December 18th, 1916, the British steamship *Opal* struck a mine and sank off the Isle of Man. The captain and 11 of the crew were killed.

OPAL

British Navy, destroyer; 1915; W. Doxford & Co.; 1,000 tons; 271-5x26'7x10-2; 25,000 s.h.p.; 34 knots; turbine engines; Yarrow boilers; three 4 in. guns, 2 smaller, 4 T.T. The destroyers *Narbrough* and *Opal* were in company off Scapa Flow on January 12th, 1918, when both were wrecked in a violent gale and snowstorm. The vessels, which were sister ships, each had an official complement of 80.

OPAWA

New Zealand Shipping Co.; 1931; A. Stephen & Sons; 10,354 tons; 471x67-3x36-8; 9,000 b.h.p.; 16 knots; oil engines. The cargo liner *Opawa*, Capt. W. G. Evans, was shelled and torpedoed by a German submarine in the North Atlantic on February 6th, 1942. Fifty-three men were killed. Capt. Evans was among the 15 survivors.

OPHELIE

Compagnie Auxiliaire de Nav.; 1922; Chantiers & Ateliers de St. Nazaire; 6,477 tons; 421-6x57-5x29; 398 n.h.p.; triple-expansion engines

The French tanker *Ophelie* was bombed and sunk by German aircraft on May 20th, 1940, in Boulogne Roads.

OPOBO

British & African S.N. Co.; 1884; Barclay, Curie & Co.; 2,078 tons; 320x36-1x21-3; 225 h.p.; compound engines. The British cargo ship *Opobo* was wrecked near Grand Bassam on September 12th, 1890. She was carrying a cargo which included palm oil from the west coast of Africa to Liverpool.

OPTIMA

Argo Reederei A.G.; 1925; Flender A.G.; 1,249 tons; 238-6x37-7x14-7; 116 n.h.p.; triple-expansion engines.

The German steamship *Optima* was shelled and sunk by British warships on March 14th, 1943, at Floro, Norway.

ORAGE

French Navy, destroyer; 1924; Chantiers Navals, Blainville; 1,458 tons; 347x33x13-7; 33,000 i.h.p.; 33 knots; turbine engines; four 5-1 in. guns, two 37 mm., 6 T.T. The destroyer *Orage*, Capt. Viennot de Vaublanc, was engaged in the evacuation of the French and British armies from Dunkirk when she was bombed and sunk by German aircraft on May 23rd, 1940.

The *Orage* carried a complement of 159, of whom two officers and 26 ratings were lost.

ORAMA

Orient Steam Navigation Co.; 1911; J. Brown & Co.; 12,927 tons; 551x64-2x39; 13,000 i.h.p.; 18 knots; triple-expansion engines & L.P. turbine; four 4 • 7 in. guns.

The liner *Orama* was taken over by the British Admiralty on the outbreak of the First World War. On October 19th, 1917, in company with eight United States destroyers, she was escorting a convoy of 17 vessels, when at 5.50 in the afternoon she was torpedoed on the port side by the German submarine *U-62*, Cdr. Ernst Hashagen. The ship began to sink, but very slowly, while the U.S. destroyer *Conyngham* tried to ram the submarine, but without success. About four hours later the *Orama* sank.

ORAMA

Orient Steam Navigation Co.; 1924; Vickers; 19,840 tons; 632x75-2x32-9; 3,900 n.h.p.; 18 knots; turbine engines. The liner *Orama*, Capt. F. G. Sherburne, was serving as an auxiliary transport for the British Expeditionary Force to Norway in the spring of 1940. On June 8th the aircraft carrier *Glorious*, the destroyers *Acasta* and *Ardent*, the tanker *Oil Pioneer* and the *Orama* were in an area some 300 miles W. of Narvik, though the merchant

ships were not near the naval vessels. The German battleships *Scharnhorst* and *Gneisenau* and the heavy cruiser *Admiral Hipper*, escorted by lighter craft, were sweeping this area and completely overwhelmed the British, sinking all five ships.

The *Orama* was sunk by gunfire from the *Admiral Hipper* and was also torpedoed. Nineteen men were killed and 280, including Capt. Sherburne, became prisoners. The *Orama* was not carrying troops at the time.

The full story of the action is told under the aircraft carrier *Glorious*.

ORANAISE

Scot to, Ambrosino, Pugliese Fils & Co.; 1915; Ramage & Ferguson; 1,806 tons; 260x36-1x22-3; 246 n.h.p.; triple-expansion engines.

The French ship *Oranaise* capsized at 4 a.m. on August 13th, 1936, and sank about 40 miles off Mostaganem. She was carrying 15 passengers, barrels of wine and 1,700 tons of cereals in bulk. Thirty-six jives were lost, two of the crew were picked up 30 hours later, clinging to floating wreckage.

ORANGEMOOR

Moor Line; 1923; Northumberland S.B. Co.; 5,775 tons; 399-6x53x32-8; 503 n.h.p.; triple-expansion engines. The British steamship *Orangemoor* was torpedoed and sunk by a German submarine on May 31st, 1940, off Cape St. Vincent on a voyage from Bona to the Tyne. Eighteen of her crew were lost.

ORANIA

Rederi-AjB Fredrika; 1919; Lindholmens Varv; 1,854 tons; 262x42-7x18-1; 216 n.h.p.; triple-expansion engines. The Swedish steamship *Orania* was torpedoed and sunk by a German submarine on February 11th, 1940, about 60 miles N.E. of the Shetland Islands. Fourteen of her crew were lost.

ORANJESTAD

Lago Shipping Co.; 1927; Harland & Wolff; 2,396 tons; 305-7x50-2x14-3; 196 n.h.p.; triple-expansion engines. The British tanker *Oranjestad* was torpedoed and sunk by a German submarine on February 16th, 1942, while at anchor outside Aruba. Fifteen of her crew were killed.

ORATOR

H. E. Moss & Co.; 1877; C. Mitchell & Co.; 1,342 tons; 250 X32x20-1; 170 h.p.; compound engines. The British cargo ship *Orator* was wrecked at Groomsport, Co. Down, on December 21st, 1890, while on a voyage from the Clyde to Licata carrying a cargo of coal.

ORATOR

Charente S.S. Co.; 1905; Workman Clark & Co.; 3,563 tons; 350-3x46-1x18; 305 n.h.p.; 11 knots; triple-expansion engines.

The steamship *Orator* was torpedoed and sunk by a German submarine 84 miles W.N.W. of Fastnet on June 8th, 1917. Five men were killed. The captain was among the survivors.

ORAVIA

Pacific Steam Navigation Co.; 1897; Harland & Wolff; 5,374 tons; 421 x48-8x33; 568 n.h.p.; triple-expansion engines. The British cargo ship *Oravia* was wrecked on Billy Rock, at the entrance to Port Stanley, Falkland Islands, on November 12th, 1912. She was on a voyage from Liverpool to Callao carrying a general cargo.

ORAZIO

Italia Soc. Anon. di Nav.; 1927; Cantieri ed Officini Meridionali; 11,669 tons; 506-1x61-8x40-6; 6,600 b.h.p.; 15 knots; oil engines.

The liner *Orazio*, Capt. Schiano, left Genoa on January 20th, 1940, for South America. The vessel, which carried 645 persons, passengers and crew, was due to call at Barcelona before crossing the Atlantic. On the evening of the 21st, the naval authorities at Toulon received a message asking for help, as the liner was on fire. French destroyers were at once despatched to the scene, arriving to find the *Orazio* a mass of flames. The destroyers took off 48 survivors

ORCADES

between them, while the liners, *Conte Biancamano*, 23,255 tons, and *Colombo*, 11,760 tons, took off 318 and 173 respectively. Capt. Schiano was the last man to leave the liner which by that time was red hot, making the work of rescue extremely difficult. A gale was raging throughout the night and this slowed down the rescue ships, though the *Conte Biancamano*, a 16 knot vessel, managed to cover 180 miles in 12 hours; an excellent performance considering the weather. The wireless cabin of the liner caught fire soon after the outbreak and no further S.O.S. messages could be sent out. The number of persons who lost their lives was 106.

ORCADES

Orient Steam Navigation Co.; 1937; *Vickers Armstrongs*; 23,456 tons; 639-3x82-2x33-6; 24,000 i.h.p.; 21 knots; turbine engines.

The liner *Orcades*, Capt. Charles Fox, was acting as an auxiliary transport and on October 10th, 1942, was approximately 300 miles W.S.W. of the Cape of Good Hope with over 1,000 passengers and troops on board. The weather was rough and during the morning the liner was hit by a torpedo from a German submarine, followed after a short interval by another. Capt. Fox ordered out the boats, the launching of which was attended with some difficulty and one failed to clear the side and capsized, drowning many people. The vessel settled down by the head but could still maintain a speed of five knots. She soon became unmanageable, however, as her steering gear was damaged and eventually was abandoned by her volunteer crew of 55 men and foundered soon afterwards.

Over 1,000 survivors were picked up by the Polish steamship *Narwik*, 7,031 tons. Of those on board the *Orcades* 48 persons were killed and three injured. Capt. Fox was later awarded the C.B.E. and the Lloyd's war medal for bravery at sea.

The *Orcades* was the newest and largest of the company's fleet.

ORCHIS

British Navy, corvette; 1940; *Harland & Wolff, Belfast*; 925 tons; 205x33x14-5; 2,800 i.h.p.; 16 knots; triple-expansion engines; 3-drum boilers; one 4 in.A.A. gun, one pom-pom, two 20 mm.

The corvette *Orchis* was mined and badly damaged during the Normandy landings in June, 1944. The vessel had to be beached and on August 21st, 1944, it was decided to abandon her as being beyond repair.

ORDOVICIAN

O. & W. Williams & Co.; 1900; *W. Harkess & Son*; 1,112 tons; 225-4X34-1X14-3; 131 n.h.p.; triple-expansion engines. The British cargo ship *Ordovician* was wrecked near Torres Vedras, Portugal, on January 8th, 1906. She was on a voyage from Swansea to Genoa carrying a general cargo and patent fuel.

ORDU

Hasan Riza Temelli; 1880; *T. Royden & Sons*; 1,518 tons; 259-5x33-9x17-9; 163 n.h.p.; compound engines. The Turkish ship *Ordu* was in collision with the warship *Hamidiye* on October 22nd, 1937, and sank at Beshik Tash.

OREGON

Cunard Steamship Co.; 1883; *J. Elder & Co.*; 7,375 tons; 501-5x54-2x38; 13,575 i.h.p.; 18 knots; compound engines. The liner *Oregon* left Liverpool for New York in March, 1886, with 641 passengers, 255 crew and a general cargo including 600 bags of mail. On March 14th, she was rammed by an unknown American schooner 26 miles S.E. of Fire Island, New York Bay. The watertight doors were blocked with coal dust and would not close and the vessel soon flooded and sank. The North German Lloyd liner *Fulda* arrived in time to save all on board, and also a proportion of the mail.

The schooner, reported to be the *Charles Morse* which vanished about that time, is believed to have sunk with all hands.

OREGON

Pacific-Atlantic S.S. Co.; 1941; *Seattle Tacoma S.B. Corp.*; 6,544 tons; 397-4x60-1x23-8; 973 n.h.p.; oil engines. The American motorship *Oregon* collided with an American Government ship on December 10th, 1941, and sank 15 miles off Nantucket.

OREGON

The Texas Co.; 1920; *Moore S.B. Co.*; 7,017 tons; 425-8X57x31-2; 579 n.h.p.; triple-expansion engines. The American tanker *Oregon* was torpedoed, shelled and sunk by a German submarine on March 1st, 1942, off Cape Engano on a voyage from Aruba to New York with fuel oil. There were 26 survivors.

OREGON

Oregon S.S. Co.; 1920; *Virginia S.B. Corp.*; 6,008 tons; 402-8x53-3x31-7; 359 n.h.p.; triple-expansion engines. The British steamship *Oregon* was torpedoed and sunk by a German submarine on August 10th, 1942, about 600 miles W. of the Fastnet on a voyage from Baltimore to Liverpool. Nine of her crew were lost.

OREGON I

Ministry of War Transport (Stephens, Suttori); 1916; *Akt. Burmeister & Wain*; 4,774 tons; 407-8x54-2x33-4; 622 n.h.p.; oil engines.

The British motorship *Oregon I* was wrecked at Wilson's Point, Bangor, Co. Down, on January 4th, 1945. She was on a voyage in ballast from Newport to Halifax, N.S.

OREGON EXPRESS

Skibs-A/S Ekspress; 1933; *O dense Staalskibsværft*; 3,442 tons; 338-4x47-2x27-1; 724 n.h.p.; oil engines. The Norwegian motorship *Oregon Express* was torpedoed and sunk by a German submarine on September 23rd, 1943, on a voyage from Manchester to Halifax. Seven of her crew and one passenger were killed.

OREGON MARU

Kawasaki Risen K.K.; 1920; *Kawasaki Dockyard Co.*; 5,873 tons; 385x51x36; 440 n.h.p.; triple-expansion engines. The steamship *Oregon Maru* was taken over by the Japanese Navy for service as a salvage and repair vessel. On November 17th, 1942, she was torpedoed and sunk by the U.S. submarine *Salmon* off Olongapo, Philippines.

OREGONIAN

American-Hawaiian Steamship Co.; 1917; *W. Cramp & Sons*; 4,862 tons; 404-6x53-9x34-2; 631 n.h.p.; 11 knots; quadruple expansion engines.

The steamship *Oregonian*, Capt. H. W. Dowling, was in convoy about 400 miles N.W. of North Cape on September 13th, 1942, when she was attacked by German torpedo-bombers. She was hit by an aerial torpedo and sank with the loss of 21 men, including Capt. Dowling.

ORESTE

M. Scuderi; 1896; *Ropner & Son*; 2,679 tons; 313-6x43x16-4; 230 n.h.p.; triple-expansion engines.

The Italian steamship *Oreste* struck a mine and sank on March 27th, 1942, off Cattaro.

ORFOR

H. M. Thomson; 1921; *W. Doxford & Sons*; 6,578 tons; 420x54x34-3; 577 n.h.p.; triple-expansion engines. The British steamship *Orfor* was torpedoed and sunk by a German submarine on December 14th, 1942, about 500 miles E. of St. Lucia on a voyage from Table Bay to Ciudad Trujillo. Nineteen of her crew and three gunners were lost.

ORFORD

Orient Steam Navigation Co.; 1928; *Vickers*; 20,043 tons; 632-2x75-4x33-1; 3,825 n.h.p.; 18 knots; turbine engines. The liner *Orford*, Capt. Norman Savage, serving as an auxiliary transport, was lying in Marseilles harbour on June 1st, 1940. The evacuation of the British army from France was in full swing and German aircraft were bombing every port from which transports were sailing to England. The *Orford* was bombed and set on fire, eventually becoming a total wreck.

Fourteen persons were killed and 25 wounded. Capt. Savage was among the survivors.

ORIA

Fearnley & Eger; 1913; Sorlandets Skibsbyggeri; 1,845 tons; 279x42-4x18-7; 175 n.h.p.; triple-expansion engines. The Norwegian steamship *Oria* struck a mine and sank in the Bay of Biscay on March 29th, 1917.

ORIANDA

E. Morgan & Co.; 1879; R. & J. Evans & Co.; 1,501 tons; 256 x 32 • 3 x 22 - 3; 114 n.h.p.; compound engines. The British cargo ship *Orianda* sank after a collision with the Swedish steamship *Heliopolis* in the Bristol Channel at 1 a.m. on February 17th, 1907, while on a voyage from Penarth to Spezia carrying a cargo of coal. Fourteen of her crew were drowned, three survivors were picked up by a Barry pilot cutter.

ORIDONO MARU

Tatsuma Risen K.K.; 1917; Mitsubishi Zosen Kaisha; 5,278 tons; 400 x 54 - 5 x 30; 510 n.h.p.; triple-expansion engines. The steamship *Oridono Maru* struck a mine and sank on May 10th, 1942, off Semarang, Java.

ORIENT

Thr. Kramer; 1914; Northumberland S.B. Co.; 4,160 tons; 373'4x51-3x28-1; 326 n.h.p.; triple-expansion engines. The Finnish steamship *Orient* was bombed and sunk by British aircraft on July 21st, 1944, S. of Heligoland.

ORINOCO

Pickford & Black; 1880; W. Gray & Co.; 1,864 tons; 270-4X 34-6x17-5; 259 n.h.p.; compound engines. The Canadian cargo ship *Orinoco* was wrecked at Sagesse Point, Grenada, on November 2nd, 1900, while on a voyage from Demerara to Halifax, N.S., carrying a general cargo.

ORINOCO

Pickford & Black; 1888; Kon. Maats. de Schelde; 2,486 tons; 319-9x36-7x23-2; 257n.h.p.; quadruple-expansion engines. The Canadian cargo ship *Orinoco* was wrecked near Seal Island, N.S., on July 26th, 1907, while on a voyage from Demerara to Halifax, N.S., carrying a cargo which included sugar.

ORINON

Cia. de Nav. Olazarri; 1895; Ropner & Son; 2,571 tons; 300 X 43x16-4; 224 n.h.p.; triple-expansion engines. The Spanish steamship *Orinon* was torpedoed and sunk by a German submarine in the Bay of Biscay on June 25th, 1917.

ORIOLE

*General Steam Navigation Co.; 1914; Ailsa Shipbuilding Co.; 1,489 tons; 260x38-2x14*9; 359n.h.p.; 12-5 knots; triple-expansion engines.* The steamship *Oriole* left London for Havre on January 29th, 1915, with a crew of 21 and general cargo. The next day the *Oriole* was torpedoed by the German submarine *U-20*, Lt.-Cdr. Droscher, E. of Dover Straits. The vessel sank with all hands, two of her lifebuoys being washed ashore near Rye.

ORION

G. & J. Burns & Co.; 1850; British Isles; 899 tons; 1,120i.h.p.; 12 knots; compound engines. The *Orion* left Liverpool for Glasgow on June 18th, 1850, with a crew of 40 and about 170 passengers. The weather was fine and clear and the sea smooth. At about 1.15 a.m. on the 19th, she struck on the rocks off the lighthouse at the entrance to Portpatrick Harbour. There was a certain amount of panic and the first boat away was so crowded with people that she capsized and everyone in her was drowned. The second boat fared better, as by that time some sort of order had been established, and several men who were among the first occupants got out and gave up their places to women and children.

At the time that the ship struck she was running at full speed and the force of the impact tore her bottom out, so that she did not remain afloat for many minutes. Only the two boats above mentioned were got away before she went down.

The steamship *Fenella* of the Ardrossan & Fleetwood service, stood by and lowered boats, and longshoremen from Portpatrick

also came to the rescue. In all about 150 persons were saved and some 60 were drowned.

ORION

Koninklijke Nederlandsche Stoomb. Maats.; 1914; A. Vuijk & Zonen; 1,722 tons; 296-9x43-2x16^1; 196 n.h.p.; triple-expansion engines.

The Dutch steamship *Orion* flying the German flag was bombed and sunk by Russian aircraft on March 18th, 1945, in the Eastern Baltic.

ORION

Hamburg-Amerika Linie; 1930; Blohm & Voss; 7,021 tons; 463-5x61-1x27; turbine engines.

The German steamship *Orion* was bombed and sunk by Russian aircraft on May 4th, 1945, at Swinemunde.

ORISKANY

Ministry of War Transport (Lambert Bros.); 1924; Swan, Hunter & Wigham Richardson; 1,644 tons; 254-9x35-6x21-5; 305 n.h.p.; triple-expansion engines.

The British steamship *Oriskany* was torpedoed and sunk by a German submarine on February 24th, 1945, four miles off the Longships on a voyage from Newport to London. All her crew of 22 and four gunners were lost.

ORISSA

Pacific Steam Navigation Co.; 1895; Harland & Wolff; 5,358 tons; 421X48-8X33; 568n.h.p.; 14 knots; triple-expansion engines.

The liner *Orissa* was torpedoed and sunk by a German submarine 21 miles S.W. by iW. of Skerryvore on June 25th, 1918. Six persons were killed. The captain was among the survivors.

ORIZABA

Pacific Steam Navigation Co.; 1886; Barrow S.B. Co.; 6,300 tons; 460x49-3x19-4; 849n.h.p.; triple-expansion engines. The British cargo ship *Orizaba* was wrecked off Garden Island, W.A. on February 16th, 1905, while on a voyage from London to Sydney, N.S.W., carrying a general cargo.

ORKAN

German Government; 1894; Hall, Russell & Co.; 1,364 tons; 240X34-2x14-6; 159 n.h.p.; triple-expansion engines. The steamship *Orkan* was formerly the Estonian *Baltonia*, seized by the Germans. She struck a mine and sank on June 1st, 1942, off Swinemunde.

ORKAN

Polish Navy, destroyer; 1940; British Isles; 1920 tons; 354x 37x10; 48,000 s.h.p.; 36-5 knots; turbine engines; 3-drum boilers; six 4-7 in. guns, one 3 in. AA., 4 T.T.

The destroyer *Orkan* was engaged on convoying duties in the North Atlantic on October 8th, 1943, when she was torpedoed and sunk by a German submarine. The vessel carried a complement of over 200.

ORKANGER

Westfal-Larsen & Co.; 1928; Ateliers & Chantiers de la Seine Maritime; 8,030 tons; 458x59-8x34-8; 652n.h.p.; oil engines. The Norwegian motorship *Orkanger* was torpedoed and sunk by a German submarine on June 12th, 1940, off Alexandria. Five of her crew were killed.

ORKEDAL

T. Sagen; 1906; A. McMillan & Son; 4,351 tons; 360-3x50x 16-9; 373n.h.p.; triple-expansion engines.

The Norwegian steamship *Orkedal* was torpedoed and sunk by a German submarine in the North Sea on June 9th, 1916.

ORLEANS

Oriental Navigation Corp.; 1905; A. McMillan & Son; 2,853 tons; 315-9x44-7x14'5; 326n.h.p.; triple-expansion engines.

The American steamship *Orleans* was torpedoed and sunk by a German submarine off Ushant on July 3rd, 1917.

ORLOCK HEAD

ORLOCK HEAD

Ulster S.S. Co.; 1921; Dublin Dockyard Co.; 1,563 tons; 240 x 36 - 3 x 19 - 3; 900 i.h.p.; 10 knots; triple-expansion engines. The steamship *Orlock Head*, Capt. P. C. Kerr, was bombed and sunk by German aircraft on July 28th, 1940, about seven miles off Strathie Point, Sutherlandshire. Six men were killed. Capt. Kerr was among the survivors.

ORMINSTER

Minster S.S. Co.; 1914; Bartram & Sons; 5,712 tons; 385 x 52 x 25-1; 401 n.h.p.; triple-expansion engines. The British steamship *Orminster*, returning from the Normandy beaches to the Isle of Wight, straggled from convoy and was torpedoed and sunk on August 25th, 1944, about 35 miles N.W. of Cap d'Antifer. Six lives were lost.

ORONOKO

W. Stewart; 183-; A. Applegate; 367 tons; 173x26x9. The American river steamship *Oronoko*, Capt. J. Crawford, was off Princeton, on the Mississippi, on April 21st, 1838. The steamship had sent a yawl to pick up passengers from shore, and she was lying with engines stopped when her boilers exploded. She was crowded with people, though the exact number is not known. Most of them were steerage passengers, and were sleeping on mattresses on the lower deck, about the engine room, as it was early morning.

This portion of the ship caught the full blast of the explosion, and the unfortunate people were either hurled overboard and drowned or else scalded to death by the steam. The cabin passengers, who were in another part of the ship, escaped, for the most part, without injury.

The exact number killed is not known, but was computed at slightly over 100.

ORONSA

Pacific Steam Navigation Co.; 1906; Harland & Wolff; 8,075 tons; 465-3x56-3x35'9; 1,125 n.h.p.; 14 knots; quadruple-expansion engines.

The liner *Oronsa* was torpedoed by a German submarine in the early hours of April 28th, 1918. She was one of a large inward bound convoy steaming at ten knots in bright moonlight off Bardsey Island, and was carrying 110 passengers, of whom 57 were Americans on their way to France. The torpedo exploded aft, immediately under the state rooms, injuring several passengers and causing the boilers to blow up three minutes later. One of the engineers was killed by the explosion and three members of the crew were either killed or drowned.

The *Oronsa* sank in ten minutes, but Capt. F. Holt Hobson, in command, was able to get his boats away without further loss and about 30 minutes later these were picked up by a destroyer.

ORONSAY

Orient Steam Navigation Co.; 1925; John Brown & Co.; 20,043 tons; 633-6x75-2x33; 3,811 n.h.p.; 18 knots; turbine engines.

The liner *Oronsay*, Capt. Norman Savage, was torpedoed by an enemy submarine when serving as an auxiliary transport on October 9th, 1942. The attack took place approximately 800 miles W.S.W. of Monrovia, Liberia, before daylight in drizzling rain, the explosion wrecking the engine and boiler rooms and bringing the vessel to a standstill. A second torpedo, fired in broad daylight as the boats were being lowered, destroyed one boat, but the other boats got away in safety. The main party of 266 persons was picked up by a British warship soon afterwards and a smaller party was rescued after five days by the French sloop *Dumont d'Urville* and a French merchantman, and taken to Dakar where they were interned.

The loss of life was fortunately very small, only five persons being drowned.

Capt. Savage was later made a Commander of the Order of the British Empire in recognition of his courage and seamanship. He had previously been in command of the *Orford*, a sister-ship, when she was bombed at Marseilles in June, 1940.

OROPESA

Pacific Steam Navigation Co.; 1920; Cammell Laird & Co.; 14,118 tons; 530x66-3x41-2; 1,647 n.h.p.; 15 knots; turbine engines. The liner *Oropesa*, Capt. H. E. H. Croft, serving as an auxiliary

transport, was torpedoed and sunk by a German submarine approximately 100 miles N.W. of Bloody Foreland, Northern Ireland on January 16th, 1941. Capt. Croft and 112 men were killed.

The company's earlier *Oropesa* was sunk in the First World War under the name *Champagne* (which see).

OROPOS

M. A. Embiricos; 1913; Rickmers Akt. Ges.; 4,474 tons; 362-4x50-1x21-5; 379 n.h.p.; triple-expansion engines. The Greek ship *Oropos* left Loch Ewe on December 9th, 1942, for Halifax. She straggled from convoy during the night of the 18th and was probably sunk in about 58° N. 34° W. by one of several German submarines known to be in the vicinity.

OROWAITI

Union S.S. Co. of New Zealand; 1921; Greenock Dockyard Co.; 6,684 tons; 408-6x53-7x27-9; 590 n.h.p.; triple-expansion engines.

The British tanker *Orowaiti* was wrecked at Point Buchon, south of Port San Luis, on August 12th, 1924. She was on a voyage in ballast from Wellington to Port San Luis.

ORPHEUS

British Navy, steam corvette; 1860; Chatham Dockyard; 1,9706 tons; 225x40-7x24-1; 400 n.h.p.; 12 knots; compound engines; 21 guns.

The corvette *Orpheus* was commissioned in October, 1861, as flagship of the Commodore of the Australian Station. She was at Spithead awaiting orders to sail when the news of the stopping of the steamship *Trent* by a U.S. man-of-war and the removal of two Confederate commissioners to Europe caused tension between Britain and America. The ship's destination was changed and she was sent to the North American Station for a time, proceeding to Australia about nine months later.

The *Orpheus* left Sydney on January 31st, 1863, for New Zealand, with a complement of 260 officers and men under command of Cdre. Burnett, C.B. On February 7th the ship was approaching the harbour of Manukau on the west coast of New Zealand, under sail, with steam raised for half speed, steering the course laid down by the Admiralty sailing directions. At about 1.30 p.m., when two miles from the Heads, she struck on the bar, at a point where it had extended itself unknown to the local pilots. The engines were put into reverse but failed to move her. The guns were thrown overboard and every effort made to lighten the ship, which was being pounded by the breakers. Two boats were lowered with the ship's papers with a request for help from shore. The local lifeboats were, however, unserviceable, and a small steamship, the *Wonga-Wonga*, towed the warship's boats back to the wreck. They lay off till morning and rescued a number of the crew, but during the night the masts went by the board and at daybreak there was little of the *Orpheus* remaining.

In all 24 officers and 166 ratings lost their lives, including Cdre. Burnett.

ORPINGTON

Gordon Steam Shipping Co.; 1882; J. L. Thompson & Sons; 2,221 tons; 265x38-8x19-1; 217 n.h.p.; triple-expansion engines.

The British cargo ship *Orpington* foundered in the Bay of Biscay on May 14th, 1898, while on a voyage from Vama to Antwerp carrying a cargo of wheat.

ORSA

Clydesdale Shipowners Co.; 1925; New Waterway S.B. Co.; 1,478 tons; 250x37-1x16-3; 144 n.h.p.; triple-expansion engines.

The British steamship *Orsa* struck a mine and sank on October 21st, 1939, 27 miles S. of Flamboro' Head on a voyage from the Tyne to Bordeaux with coal. Sixteen of her crew were lost.

ORSINO

Hugh Roberts & Son; 1880; R. Thompson, Jun.; 2,048 tons; 284x35x24-2; 199 n.h.p.; compound engines. The British cargo ship *Orsino* was wrecked at Giampileri, Sicily, on March 7th, 1898. She was on a voyage from Stratonì to Philadelphia carrying a cargo of manganese ore.

ORTERIC

Bank Line; 1919; W. Doxford & Sons; 6,696 tons; 412-5x55-5x34-4; 619 n.h.p.; triple-expansion engines. The British steamship *Orteric* was wrecked on Sail Rock, near Point Arena, on December 11th, 1922. She was on a voyage in ballast from San Francisco to Eureka.

ORUNGAL

Australasian United S.N. Co.; 1923; A. Stephen & Sons; 5,826 tons; 390-6x55-2x28-1; 694 n.h.p.; turbine engines. The Australian steamship *Orungal* was wrecked at Barevon Head, Victoria, on November 21st, 1940, while on a voyage from Sydney, N.S.W. to Melbourne carrying a general cargo.

ORWELL

British Navy, destroyer; 1901; Lairds; 380 tons; max. draught lift; 6,300 i.h.p.; 30 knots; triple-expansion engines; one 12 pdr. gun, five 6 pdr., 2 T. T.
On the night of January 30th, 1903, when light forces of the Mediterranean Fleet were engaged in night operations off the coast of Greece, the destroyer *Orwell* was run down by the light cruiser *Pioneer*, 2,200 tons, her fore part being completely carried away. The after portion sank in shallow water, but 15 ratings out of her complement of 60 were drowned. Later *Orwell* was raised and a new forepart was fitted to her hull.

ORYOKUMARU

Osaka Shosen K.K.; 1937; Mitsubishi Jukogyo K.K.; 7,365 tons; 425-8x57-1x33-3; 1,083 n.h.p.; turbine engines. The steamship *Oryoku Maru*, in service as a transport, was bombed and sunk by U.S. carrier-based aircraft on December 15th, 1944, off the Bataan Peninsula, Philippines.

ORZARROSA

Soc. Anon. Ondoibili; 1920; Soc. Espanola de Const. Metalicas; 7,377 tons; 218x33x20-4; 75 n.h.p.; triple-expansion engines. The Spanish ship *Orzarrosa* was carrying ore from Bilbao to Newport and foundered in the Bay of Biscay on December 30th, 1922.

OSAKA MARU

Kobe Sanbashi K.K.; 1936; Kasado Dock Co.; 1,472 tons; 250 x 38 X18 - 8; 441 n.h.p.; oil engines.
The Japanese motorship *Osaka Maru* was carrying ore from Korea to Yokohama and foundered on October 26th, 1936, off Shiomisaki.

OSAKA MARU

Nippon Yusen K.K.; 1922; Yokohama Dock Co.; 3,740 tons; 345 X 50 X 29; 275 n.h.p.; triple-expansion engines. The steamship *Osaka Maru* was torpedoed and sunk by the U.S. submarine *Flying Fish* on May 25th, 1944, about 100 miles N. of the Caroline Islands.

OSCAR MIDLING

A/B.R. Nordstrom & Co.; 1889; J. Readhead & Sons; 2,183 tons; 290-5x39X18-9; 234 n.h.p.; triple-expansion engines. The Finnish steamship *Oscar Midling* was torpedoed and sunk by a British submarine on December 5th, 1940, S. of Aalesund, Norway.

OSCILLA

N.V. Petroleum Maats. La Corona; 1939; C. van der Giessen & Zonen; 6,341 tons; 428-1x54-5x30-9; 377 n.h.p.; oil engines.
The Dutch tanker *Oscilla* was torpedoed and sunk by a German submarine on March 16th, 1942, 100 miles N.E. of the Windward Islands on a voyage from Ardrossan to Curacao.

OSE

Japanese Government; 1935; Deutsche Werft; 7,987 tons; 463x59-3x33-9; 502 n.h.p.; oil engines.
The tanker *Ose* was formerly the Dutch *Genota*, captured by the Japanese in February, 1942. She was sunk by U.S. carrier-based aircraft on March 30th, 1944, off Babelthuap, Palau Islands.

OSHIKAYAMA MARU

Mitsui Sempaku; 6,892 tons.
The steamship *Oshikayama Maru* was torpedoed and sunk by the U.S. submarine *Bonefish* on June 13th, 1945, off Inchon, Korea.

OSHIMA

Japanese Navy, gunboat; 1891; Onohama; 630 tons; 164 x 27-9x—; 1,200 i.h.p.; 13 knots; triple-expansion engines; one 4-7 in. gun, five 12pdr., two 3pdr., three 2-5 pdr.
The gunboat *Oshima* was a unit of a squadron under Rear-Admiral Togo, the younger, during the Russo-Japanese War. On the night of May 16th-17th, 1904, the ships were proceeding through a dense fog between Kai-ping and Chin-chou. At about 1 a.m. on the 17th the gunboat *Akagi* collided with the *Oshima*, damaging her so severely that she sank within 90 minutes. Her complement of 130 officers and men were taken off without loss before she foundered.

OSHIO

Japanese Navy, destroyer; 1937; Maizuru; 1,500 tons; 356 x 33-3x9; 39,000 s.h.p.; 34 knots; turbine engines; Kanpon boilers; six 5 in. guns, 2 m.g., 8 T.T.
The destroyer *Oshio* was torpedoed and sunk N. of the Admiralty Islands by the U.S. submarine *Albacore* on February 20th, 1943. The destroyer's normal complement was 190.

OSLEBSHAUSEN

Fried. Krupp A.G.; 1923; G. Seebeck A.G.; 4,989 tons; 370-6x51x27-3; 426n.h.p.; triple-expansion engines. The German steamship *Oslebshausen* was torpedoed and sunk by British aircraft on September 2nd, 1941, off Stavanger.

OSLO

D/S Pacific A/S; 1920; Kalundborg Skibsvterft; 1,412 tons; 233-3x37-1X16-6; 134n.h.p.; triple-expansion engines. The Danish steamship *Oslo* struck a mine and sank on September 28th, 1944, outside Swinemunde.

OSLOFJORD

Norske Amerikalinje A/S; 1938; A.G. Weser; 18,673 tons; 563-5x73-4x34-1; 4,270n.h.p.; oil engines. The Norwegian liner *Oslofjord* struck a mine, broke in two and sank on December 1st, 1940, off the Tyne.

OSMAN

Red. A/B Wanadis; 1913; Kockums M.V. Aktieb.; 1,314 tons; 237X37-7X16-3; 153n.h.p.; triple-expansion engines. On a voyage from Gothenburg to the United Kingdom, the Swedish ship *Osman* went ashore and sank on March 15th, 1940, outside Risør. Ten of the crew were lost.

OSMANIEH

Khedivial Mail S.S. & Graving Dock Co.; 1906; Swan, Hunter & Wigham Richardson; 4,041 tons; 360-2x45-2x24-3; 650n.h.p.; 17 knots; quadruple-expansion engines.
The liner *Osmanieh*, Lt. Cdr. D. R. Mason, was taken over for service as a fleet auxiliary during the First World War. On December 31st, 1917, she was carrying troops and medical staff to Alexandria when she struck a mine at the entrance to the harbour. She sank very quickly taking with her Lt. Cdr. Mason, two other officers, 21 crew, one military officer, 166 other ranks and eight nurses.

OSMED

Rederi A/B Nordkap; 1903; Sir R. Dixon & Co.; 1,545 tons; 243-6x36-9x17-3; 132 n.h.p.; triple-expansion engines. The Swedish steamship *Osmed* was torpedoed and sunk by a German submarine on February 16th, 1940, 24 miles from Kinnaird Head on a voyage from Blyth to Halmstad with coal. Thirteen of her crew were lost.

OSPREY

British Navy, brig; 1844; Portsmouth Dockyard; 425 tons; 101-5x31-9x13-9; 12 guns.
The brig *Osprey*, Capt. Patten, left Whangaroa, New Zealand, for Hokianga on Monday, March 9th, 1846, calling at Maunganui, which she left the same day.
On the evening of the 10th in thick weather she was off Hokianga harbour and fired two signal guns to announce her arrival, but in view of the hazy conditions obtaining stood out to sea for the night.
The following afternoon at about three she ran ashore at False Hokianga, so called from its resemblance to Hokianga proper, 18 miles N. of what should have been her true position. Her captain

OSPREY

had been misled by the similarity of the headland, and by a flagstaff flying a red flag which he took to be a pilotage signal.

The brig struck bottom three or four times; each time with increasing violence*. Attempts to lighten her by throwing over the guns and cutting away the masts were unsuccessful. The water was extremely shallow for some miles seaward and there was no hope of saving the vessel, but most of her stores were salvaged by the crew, assisted by friendly natives.

OSPREY

Cork Steam Navigation Co.; 1855; Eben Pike & Co.; 426 tons; 214x20x16; 250n.h.p.; 10 knots; compound engines. The steamship *Osprey* was on a voyage from Liverpool to Antwerp with seven passengers and the wife, son and two daughters of Capt. Burtridge, the commander, and 21 crew, making 32 all told. Early on the morning of Tuesday, July 10th, 1866, when under command of the first mate, she was run down and sunk by the British naval sloop *Amazon*, Cdr. J. E. Hunter. The collision took place in the Channel, off Portland, the night being clear and calm. The *Osprey*, which was steaming at 8.5 knots, was cut in two and foundered within a few minutes, most of her crew and passengers being rescued by the boats of the *Amazon*, which were lowered with great promptitude. A total of ten persons, including four lady passengers and the captain's three children, were drowned.

For further details, see *Amazon*.

OSPREY

General Steam Navigation Co.; 1877; M. Pearse & Co.; 1,140 tons; 240-2x31-1x17; 226n.h.p.; triple-expansion engines. The British cargo ship *Osprey* sank after a collision with the British steamship *St. Dunstan* off Winterton on June 5th, 1904, while carrying a general cargo from Granton to London.

OSPREY

United States Navy, minesweeper; 1938; Norfolk Navy Yard; 890 tons; 221-5x32x10-5; 2,976b.h.p.; 18knots; oilengines; one 3 in. gun, four 40 mm.A.A. The United States minesweeper *Osprey* was a unit of a flotilla engaged in sweeping a channel for the invasion force which was to make a landing on the Normandy beaches on T) Day, June 6th, 1944. Rough seas had caused many of the mines to break loose and on the evening of the 5th the *Osprey* hit one of these. The explosion blew a large hole in her forward engine room and she sank very quickly. Six men were killed.

OSSAG

Tankdampferges. Ossag m.b.H.; 1922; Deutsche Werft A.G.; 2,793 tons; 309-7x45-5x22-5; 359 n.h.p.; oil engines. The German tanker *Ossag* was bombed and sunk by Russian aircraft on April 22nd, 1944, off the Crimea.

OSSEO

B.H.M/Corkell; 1889; C.J.Bigger; 1,463tons; 245-3x36-9x 21-7. The barque *Osseo* was wrecked off Holyhead on December 30th, 1894. All her crew of 26 were drowned.

OSSIAN

Rederi-A/B Alfa; 1892; Osbourne, Graham & Co.; 1,564 tons; 260x37x16-5; 174n.h.p.; triple-expansion engines. The Swedish steamship *Ossian* was torpedoed and sunk by British aircraft on May 15th, 1941, off the west coast of Germany.

OSSLIABYA

Russian Navy, 1st class battleship; 1901; New Dockyard, Leningrad; 12,674 ton; 401-2x71-5x26; 15,053 i.h.p.; 18-3 knots; triple-expansion engines; four 10 in. guns, eleven 6 in., two 2-5 in., twenty 12pdr., twenty 3pdr., 5 T.T. The battleship *Ossliabya* was the flagship of Rear-Admiral Folker-sham, commanding the 2nd Division of the Baltic Fleet (Second Pacific Squadron), who died two days before the battle of Tsushima, which took place on May 27th, 1905. The Rear-Admiral died from a paralytic stroke, his coffin being placed on his quarterdeck and his flag kept flying. His death was so close a secret that

Rear-Admiral Nebogatoff, who should have succeeded him in the position of second-in-command, was not informed of it, and the latter officer went through the action without being aware of the responsibilities which had devolved upon him.

On the day of the battle the *Ossliabya* was the leading ship of the 2nd Division and when Admiral Rojdestvensky, commanding the Baltic Fleet, decided to bring the 1st and 2nd Divisions into one line the evolution mis-carried. As a result the *Ossliabya* was left isolated and sustained the brunt of the Japanese fire.

She received three hits in succession by shells of large calibre. The first, from a 12 in. gun, penetrated her armour forward and flooded her two bow compartments. A second hit got home on her port side amidships and flooded her bunkers, causing a heavy list. The third hit came quickly after, smashing her fore turret, killing the crews and putting both guns out of action. An attempt to trim the vessel by opening the valves on the starboard side met with no success, and she heeled over and went down, the time being approximately 2.25 p.m., the first firing having commenced at about 2 p.m.

Of the *Ossliabya's* complement of 732, only 14 officers and 371 men were picked up by the destroyers *Buini*, *Buistri* and *Bravi*.

The full story of the battle of Tsu-Shima is told under the *Kniaz Suvaroff*, flagship of Admiral Rojdestvensky.

OSTHAV

Skibs A/S Osthav; 1931; Deutsche Werft A.G. Betrieb Finkenwerder; 8,525 tons; 465-2x59-7x35-4; oil engines. The Norwegian tanker *Osthav* broke in two during a storm on December 29th, 1951, in 43° 55' N., 4° 28' W. Both parts drifted ashore.

OSTMARK

Deutsche Luffhansa A.G.; 1936; Howaldtswerke A.G.; 1,280 tons; 242-8x37x15-5; 488 n.h.p.; oilengines. The German motorship *Ostmark* was torpedoed and sunk by the British submarine *Tuna* on September 24th, 1940, off the River Gironde.

OSTMARK

German Navy; 1932; Forges et Chantiers de la Mediterranee; 3,047 tons; 325-8x45x26; turbine engines. The steamship *Ostmark* was formerly the French *Cote d'Argent*, taken over by the Germans for use as a minelayer. On April 20th, 1945, she was bombed and sunk by British aircraft 15 miles E. of Anholt, Jutland.

OSTPREUSSEN

Kohlenimport und Poseidon A.G.; 1920; N.V. Boeles Scheepv. & Maschinfabrik; 3,030 tons; 324-8x47-3x21-9; 267 n.h.p.; triple-expansion engines. The German steamship *Ostpreussen* was torpedoed and sunk by a British submarine on August 22nd, 1941, N. of Tromsø.

OSTRO

*Italian Navy, destroyer; 1928; Ansaldo; 1,073 tons; 307-5x30-5x10*8; 40,000 s.h.p.; 36 knots; turbine engines; Express boilers; four 4.7 in. guns, four 37 mm., two 13 mm., 6 T.T.* The destroyer *Ostro* was attacked by torpedo bombers of the British air force when lying off Tobruk on July 20th, 1940. The *Ostro* was struck by an aerial torpedo and caught fire, sinking later. Her normal complement was 142.

OSWALD

Thomas Turnbull & Son; 1890; Thomas Turnbull & Son; 1,835 tons; 258-5x37-2x18-1; 170 h.p.; triple-expansion engines. The British cargo ship *Oswald* was wrecked near Port Logan, Wigtownshire, on December 22nd, 1894, while on a voyage in ballast from Londonderry to Cardiff. All on board were drowned.

OSWALDO ARANHA

Cia. Commercio e Nav.; 1912; Mackie & Thomson; 1,951 tons; 276-7x45-2x15-4; 208n.h.p.; triple-expansion engines. The Brazilian ship *Oswaldo Aranha*, Capt. Luiz Sutter, left Imbituba on April 1st, 1949, for Rio de Janeiro with a cargo of coal, but was not seen again.

OSWESTRY

Sivewright, Bacon & Co.; 1888; *E. Withy & Co.*; 2,419 tons; 299'8x38-5x20-6; 232 n.h.p.; triple-expansion engines. The British cargo ship *Oswestry* was wrecked at Mizen Head, Co. Cork on March 12th, 1899. She was on a voyage from Norfolk, Va., to Manchester carrying a general cargo.

OSWESTRY GRANGE

Houlder Line; 1935; *Blythwood Shipbuilding Co.*; 4,684 tons; 406-8x55-2x24-2; 362 n.h.p.; 11 knots; triple-expansion engines.

The *Oswestry Grange*, Capt. Edgar Stone, was steaming in convoy from Rosario to Liverpool when she was intercepted by the German heavy cruiser *Admiral Hipper* on February 12th, 1941, about 200 miles E. of the Azores. The enemy opened fire at 6.50 a.m. hitting the *Oswestry Grange* in the engine room on the port side and damaging the bridge and shelter deck. The boats were got away, but the captain's boat containing 24 persons had been damaged by shellfire and capsized and sank. Capt. Stone, the fourth engineer and three seamen were drowned, the others being rescued by another boat. This boat was picked up five hours later by a British ship which landed the survivors at Funchal, Madeira, on the 14th.

Other ships of the convoy sunk by the raider in attacks which lasted over February 11th-12th were the *Iceland*, 1,236 tons, *Warlabay*, 4,876 tons, *Westbury*, 4,712 tons, *Shrewsbury*, 4,542 tons and *Derrybane*, 4,896 tons. This was the *Admiral Hipper's* most successful attack during her whole career at sea as a commerce raider.

OTAGO

J. Ingmannson; 1882; *Richardson, Duck & Co.*; 1,410 tons; 241-2x33-7x16-4; 145 n.h.p.; compound engines. The Swedish steamship *Otago* was torpedoed and sunk by a German submarine in the North Sea on June 11th, 1915.

OTAIO

New Zealand Shipping Co.; 1931; *Vickers Armstrongs*; 10,298 tons; 472x67-2x35-7; 9,000 b.h.p.; 16 knots; oil engines. The cargo liner *Otaio*, Capt. G. Kinnell, was torpedoed and sunk by a German submarine on August 28th, 1941, 400 miles W. of the Fastnet on a voyage from Liverpool to Sydney, N.S.W. Thirteen persons were killed. Capt. Kinnell was among the survivors. The vessel was not in convoy.

OTAKA

Japanese Navy, escort carrier; 1940; *Japan*; 16,500 tons; 590x73x28-5; 21,000 i.h.p.; 22 knots; turbine engines; twelve 5 in. A.A. guns, many 47 mm., 30 aircraft. The *Otake* was completing as the Nippon Yusen liner *Kasuga Maru* when Japan entered the Second World War on December 7th, 1941. She was taken over by the Japanese Admiralty and converted to an escort carrier, her name being changed to *Otake*. She was torpedoed and sunk N.W. of Luzon by the U.S. submarine *Rasher* on August 18th, 1944.

See also the escort carrier *Chuyo*.

OTAKI

New Zealand Shipping Co.; 1908; *W. Denny & Bros.*; 9,575 tons; 465-4x60-3x31-3; 471 n.h.p.; 15 knots; triple-expansion engines & L.P. turbine; one 4-7 in. gun. The liner *Otake*, Lt. A. B. Smith, R.N.R., left London for New Zealand early in March, 1917. She carried no passengers or cargo and was armed with one 4-7 in. gun manned by two naval gunners and members of the crew. When 420 miles W. of Lisbon on March 10th, she was chased by a German raider which proved to be the famous *Mowe*. An action ensued lasting for about 20 minutes, until finally the *Otake* was sunk, but not before she had killed five of the enemy and wounded ten, and caused the *Mowe* to take on a heavy list.

The *Otake's* loss in action was four killed and nine wounded, in addition to whom Lt. Smith and the chief steward were drowned when the vessel sank.

The *Mowe* carried two 7-5 in. guns, two 6 in., six 3 in. and four torpedo tubes, which was the armament of a light cruiser, and had a speed of 22 knots against the 15 of the *Otake*. Despite this overwhelming superiority the German was so badly knocked about that

she caught fire, and it was not until three days later that it was finally extinguished.

In recognition of his gallant fight a posthumous award of the Victoria Cross was made to Lt. Smith.

OTARU MARU

Kinkai Yusen K.K.; 1905; *Fevigs Jernskibsbyg.*; 1,464 tons; 235x35-2x14-6; 175 n.h.p.; triple-expansion engines. The *Otaru Maru*, Capt. Yoshimatsu Kitakata, left Yokohama on February 10th, 1937, for Hakodate.

On the 13th she was overtaken by a severe blizzard and, at 11.40 p.m., wirelessly that she was disabled, taking water and in need of assistance, 40 miles S. of Yatsunobe, Awomori Prefecture.

Nothing more was heard of the ship and her crew of 36, but wreckage was washed ashore some days later.

OTHALIA

A. Th. Jonasson; 1880; *Palmers Co.*; 1,205 tons; 238-2x33-2x14-3; 120 n.h.p.; compound engines. The Swedish steamship *Othalia* was torpedoed and sunk by a German submarine in the North Sea on August 7th, 1917.

OTHMARSCHEN

German Government; 1920; *North of Ireland S.B. Co.*; 7,007 tons; 411x53-8x35-6; 710 n.h.p.; triple-expansion engines. The steamship *Othmarschen* was formerly the French *Ville de Metz*, seized by the Germans. She was torpedoed and sunk by a British submarine on February 1st, 1943, near the North Cape.

OTHO

American West African Line; 1920; *Todd D.D. & Construction Corp.*; 4,839 tons; 380-5x53-1x27; 359 n.h.p.; triple-expansion engines.

The American steamship *Otho* was torpedoed and sunk by a German submarine on April 3rd, 1942, 300 miles E. of Wilmington, N.C., on a voyage from Pointe Noire to New York. Twenty-five of her crew, nine gunners and three passengers were lost.

OTIC

Rederi A/B Nordic (F. H. Andersson); 1901; *Mackie & Thomson*; 1,258 tons; 227-9x34-5x14-4; triple-expansion engines. The Swedish ship *Otic* was carrying iron ore from Gefle to Szczecin when she struck a wreck and sank on October 15th, 1948, at Oder Bank, seven miles off shore, N.N.E. of Swinoujcie.

OTINA

Anglo-Saxon Petroleum Co.; 1938; *Odense Staalskibsværft*; 6,217 tons; 431-5x54-6x30-8; 377 n.h.p.; 11-5 knots; oil engines.

The motor tanker *Otina*, Capt. R. Ranson, was in convoy in the North Atlantic on December 20th, 1942, when she was torpedoed and sunk by a German submarine. All her crew of 60 were lost.

OTORIMARU

Japanese Government; 2,105 tons. The steamship *Otori Maru* was torpedoed and sunk by the U.S. submarine *Angler* on May 20th, 1944, about 150 miles E. of Tringano, Malaya.

OTORIYAMA MARU

Mitsui Sempaku; 5,280 tons. The tanker *Otoriyama Maru* was torpedoed and sunk by the U.S. submarine *Flasher* on July 26th, 1944, about 175 miles E. of Laoag, Philippines.

OTOWA

Japanese Navy, light cruiser; 1903; *Yokosuka*; 3,050 tons; 351x41x16-5; 10,000 h.p.; 21 knots; triple-expansion engines; Miyabara boilers; two 6 in. guns, six 4-7 in., four 12 pdr., two 1 pdr., 2 T.T.

The Japanese light cruiser *Otowa* was wrecked near Damio Point, Shima Prefecture, on August 1st, 1917. The normal complement of the ship was 312.

OTOWASAN MARU

MitsuiBussan Kaisha; 1936; *MitsuiBussan Kaisha*; 9,204 tons; 491-1x65x35-8; 1,231n.h.p.; oilengines. The tanker *Otowan Maru* was torpedoed and sunk by the U.S. submarine *Flasher* on December 22nd, 1944, 25 miles east of Quang Ngai, Indo-China.

OTRANTO

Orient Steam Navigation Co.; 1909; *Workman Clark & Co.*; 12,124 tons; 535-3x64x38-6; 12,000 i.h.p.; 18 knots; quadruple-expansion engines; four 4-7 in. guns. The liner *Otranto* was taken over on the outbreak of the First World War for service as an auxiliary cruiser.

On October 16th, 1918, while carrying troops from America, she collided with the P. & O. liner *Kashmir*, 8,841 tons, off the north coast of Islay, drifted ashore and became a total wreck.

The loss of life was heavy; 431 persons were drowned, including 351 U.S. soldiers. There were 367 survivors.

OISUYAMA MARU

Mitsui Sempaku; 6,857 tons. The steamship *Otsuyama Maru* was bombed and sunk by U.S. carrier-based aircraft on January 12th, 1945, 25 miles N.E. of Binh Dinh, Indo-China.

OTTARJARL

Nordenfjeldske D/S; 1913; *Fredrikstad Mek. Verks*; 1,900 tons; 265x42-1x17-9; 188n.h.p.; triple-expansion engines. The Norwegian ship *Ottar Jarl* was involved in a collision and sank on March 22nd, 1924, in 53° IT N., 1° 18' E., while carrying coal and general cargo from the Tyne to Antwerp and Barcelona.

OTTARJARL

Nordenfjeldske D/S; 1921; *Schiff-u. Dockbau Flender A.G.*; 1,459 tons; 228-2x34-5x20; 99n.h.p.; triple-expansion engines. The Norwegian steamship *Ottar Jarl*, under German control, was bombed by British aircraft and sunk by gunfire from warships on September 12th, 1941, off North Norway.

OTTAWA

Mississippi & Dominion S.S. Co.; 1880; *C. Cornell & Co.*; 3,712 tons; 359-5x40-4x24-9; 500h.p.; compound inverted engines. The British cargo ship *Ottawa* was wrecked at Cape La Roche on November 22nd, 1880, while on a voyage from Montreal to Liverpool carrying a general cargo.

OTTAWA

Christopher Furness; 1891; *A. Stephen & Sons*; 1,719 tons; 275-5x35-1x13; 225h.p.; triple-expansion engines. The British cargo ship *Ottawa* was wrecked on Blond Rock, near Seal Island, Bay of Fundy, on November 1st, 1891. She was on a voyage from London, via Halifax, N.S., to St. John, N.B., carrying a general cargo.

OTTAWA

Canadian Navy, destroyer; 1931; *Portsmouth Dockyard*; 1,375 tons; 326x33x8-5; 36,000 s.h.p.; 35-5 knots; turbine engines; 3-chimney boilers; four 4-7 in. guns, 7 smaller. The Canadian destroyer *Ottawa*, Lt. Cdr. C. A. Rutherford, R.C.N., was originally the British *Crusader*. The vessel was torpedoed and sunk by a German submarine in the Gulf of St. Lawrence on September 14th, 1942. Four officers, including Lt. Cdr. Rutherford, and 108 ratings were killed. The survivors numbered 76, of whom five were officers.

OTTERCAPS

Lambton Collieries; 1878; *R. Thompson, jun.*; 900 tons; 216x32-1x16-3; 99 r.h.p.; compound engines. The collier *Otter caps* was lost in a gale off Feunteenet, Bay of Audierne, France, on February 26th, 1903, while carrying an ore cargo from Bilbao to Middlesbrough. The bodies of ten of her crew were washed ashore.

OTTERPOOL

Pool Shipping Co.; 1926; *W. Gray & Co.*; 4,876 tons; 390x55x26-5; 439 n.h.p.; 11 knots; triple-expansion engines. The steamship *Otterpool*, Capt. T. Prince, with a cargo of ore was 80 miles S. of the Scilly Isles on June 20th, 1940, when she was torpedoed and sunk by a German submarine. Twenty-two of her crew and one gunner were lost.

OTTO

T. Wilson, Sons & Co.; 1867; *C. & W. Earle*; 1,023 tons; 244-6x29-9x15-5; 98 h.p.; compound engines. The British cargo ship *Otto* sank after a collision near Lappegrund Sound on August 7th, 1892, while on a voyage from Danzig to Grimsby carrying a general cargo.

OTTO FISCHER

Schroder, Holken & Fischer; 1897; *C. S. Swan & Hunter*; 4,606 tons; 390x47-3x30; 311 n.h.p.; triple-expansion engines. The German ship *Otto Fischer* lost her rudder during heavy weather and foundered on February 20th, 1923, 90 miles N. of Cape Villano.

OTWAY

Orient Steam Navigation Co.; 1909; *Fairfield Shipbuilding Co.*; 12,077 tons; 535-9x63-2x34-2; 12,000i.h.p.; 18 knots; quadruple-expansion engines; four 4-7 in. guns. The liner *Otway*, serving as a unit of the Northern Patrol, was torpedoed and sunk by a German submarine on July 22nd, 1917. The ship was commanded by Capt. Philip H. Colomb. Ten ratings were killed by the explosion.

OUED GROU

Ministry of War Transport (Elder Dempster Lines); 1921; *D. W. Kremer Sohn*; 792 tons; 195-5x30-8x12-4; 10 knots; triple-expansion engines. The steamship *Oued Grou*, Capt. Dodgshon, was torpedoed and sunk by a German submarine in the Bight of Benin, West Africa, on November 4th, 1942. Five men were killed. Capt. Dodgshon was among the survivors.

OUEDMELLAH

Cie. de Navigation Paquet; 1918; *Jas. T. Eltringham & Co.*; 2,413 tons; 290x43-9x21-8; 232 n.h.p.; triple-expansion engines. The French ship *Oued Mellah* was carrying grain from Casablanca to Port Vendres when she was bombed and sunk by an unknown aircraft on October 24th, 1937, 50 miles E. of Barcelona, during the Spanish Civil War.

OUED SEBOU

Cie. de Navigation Paquet; 1897; *R. Napier & Sons*; 1,540 tons; 255x36x20-1; 162n.h.p.; triple-expansion engines. The French steamship *Oued Sebou* was shelled and sunk by a German submarine off the W. coast of Africa on January 7th, 1918.

OUED TIFLET

Cie. de Navigation Paquet; 1914; *Nuscke Co.*; 1,194 tons; 234-1x35-4x14; 99n.h.p.; triple-expansion engines. The French steamship *Oued Tiflet* was torpedoed and sunk by a British submarine on January 14th, 1943, in the Gulf of Genoa.

OUED YQUEM

Cie. de Navigation Paquet; 1920; *A. van Duivendijk*; 1,369 tons; 238'8x36-7x15-8; 127n.h.p.; triple-expansion engines. The French steamship *Oued Yquem* was torpedoed and sunk by a Dutch submarine on October 3rd, 1941, off Sardinia.

OUSEL

Cork S.S. Co.; 1901; *Wigham Richardson & Co.*; 1,284 tons; 255x33-8x18-6; 195n.h.p.; triple-expansion engines. The Irish cargo ship *Ousel* sank after a collision in the Downs on September 14th, 1917, while on a voyage from Rotterdam to Liverpool carrying a general cargo.

OUSHLA

Mitchell Com & Co.; 1891; *J. Blumer & Co.*; 2,514 tons; 290'1x39-1x19-5; 224n.h.p.; triple-expansion engines. The British cargo ship *Oushla* was wrecked at Birling Gap on November 6th, 1916, while on a voyage from London to Liverpool.

OUTREAU

Soc. des Acieries de Paris et d'Outreau; 1881; *J. Laing*; 1,874 tons; 261x35x27-1; 201 n.h.p.; compound engines. The French ship *Outreau* left the Tyne on November 24th, 1922, with a cargo of coal for Boulogne, and was not seen again.

OVAR

Portuguese Government; 1903; *Schiffsw. v. Henry Koch*; 1,650 tons; 261x38 - 7 X17 • 4; 151 n.h.p.; triple-expansion engines. The German steamship *Casablanca* was requisitioned by the Portuguese Government and renamed *Ovar*. Subsequently she was torpedoed and sunk by a German submarine in the Atlantic on August 25th, 1917.

OVE TOFT

D/SJutlandiaA/S; 1921; *Dundee S.B. Co.*; 2,135 tons; 286x43•5 X18•7; 202 n.h.p.; triple-expansion engines. The Danish steamship *Ove Toft* was torpedoed and sunk by a German submarine on December 3rd, 1939, about 100 miles E. of the Tyne on a voyage from Immingham to Gothenburg with coal. Six of her crew were lost.

OVINGTON

HineBros.; 1873; *Osbourne, Graham & Co.*; 697 tons; 187x28-3x14-4; 75 h.p.; compound engines. The British steamship *Ovington* was sunk in a collision with the *Queen Victoria* on December 29th, 1889, near Greenock while on a voyage from Glasgow to Hamburg carrying a cargo of coal. She sank with the loss of six of her crew.

OWASCO

1893; *Harland & Wolff*; 4,630 tons; 397-6x47-6x27-4; 483 n.h.p.; triple-expansion engines. The German steamship *Allemania* was requisitioned by the American Government and renamed *Owasco*. Subsequently she was torpedoed and sunk by a submarine in the Mediterranean on December 10th, 1917.

OXON

Henry Samman; 1883; *J. Blumer & Co.*; 1,432 tons; 240x33x16-9; 180 h.p.; compound engines. The British cargo ship *Oxon* was wrecked near Storgrund on

September 16th, 1889, while on a voyage from Djupvik to Hull carrying a cargo of wood.

OYAMAMARU

BabaShojiK.K.; 3,809 tons. The steamship *Oyama Maru* was torpedoed and sunk by the U.S. submarine *Drum* on April 9th, 1943, north of Mussan Island, Admiralty Islands.

OYASHIO

Japanese Navy, destroyer; 1938; *Maizuru*; 2,000 tons; 364 x 35x11; 45,500s.h.p.; 36 knots; turbine engines; Kanpon boilers; six 5 in. guns, 2 m.g., 8 T.T. The destroyers *Kagero*, *Kuroshio* and *Oyashio*, all of 2,000 tons, were steaming through the Blakett Strait, New Georgia, on May 8th, 1943, when they ran into a minefield. All three vessels struck mines, the *Kuroshio* being sunk and the other two disabled. A squadron of U.S. naval dive-bombers then came on the scene and completed the destruction of the two disabled destroyers. The vessels carried complements of over 200.

OYO MARU

Toyo Risen K.K.; 1921; *Asano S.B. Co.*; 5,458 tons; 400x53-2x29-4; 513 n.h.p.; triple-expansion engines. The steamship *Oyo Maru* was torpedoed and sunk by the U.S. submarine *Hammerhead* on October 20th, 1944, about 100 miles W. of Brunei, North Borneo.

OYODO

Japanese Navy, light cruiser; 1943; *Japan*; 6,000 tons; 550 x — x—; 34 knots; turbine engines; six 6-1 in. guns, many 47 mm., 2 aircraft. The Japanese light cruiser *Oyodo* was one of a group comprising three battleships, two heavy cruisers and one light cruiser, lying in Kure harbour on July 28th, 1945, when a concentrated attack was made by British and American naval aircraft. Every ship was sent to the bottom, the *Oyodo* catching fire and capsizing. This was the last large scale air attack prior to the cessation of hostilities between Japan and the Allies on August 15th, 1945.

The full story of the attack is told under the battleship *Haruna*.

OZORIO

Lloyd Brasileiro; 1919; *Great Lakes Engineering Works*; 2,730 tons; 253•4x43-6x26; 225n.h.p.; triple-expansion engines. The Brazilian steamship *Ozorio* was torpedoed and sunk by a German submarine on September 27th, 1942, 65 miles N. of Salinas Point, Brazil. The captain and four others were killed.

P. L. M. 4

P. L. M. 4

Soc. Nationale d'Affretements; 1916; Great Lakes Eng. Works; 2,640 tons; 253 x 43-5x25-6; 284 n.h.p.; triple-expansion engines.
The French steamship *P. L. M. 4* was torpedoed and sunk by a German submarine in the English Channel on December 27th, 1917.

P. L. M. 8

Soc. Nationale d'Affretements; 1915; New York S.B. Co.; 3,296 tons; 318 x 5x49-5x24-2; 318 n.h.p.; triple-expansion engines.
The French ship *P. L. M. 8* was on a voyage from Phillippeville to Rotterdam when she was wrecked on September 26th, 1922, at Cape Razo.

P. L. M. 15

Soc. Nationale d'Affretements; 1921; Smith's Dock Co.; 3,754 tons; 345x49-5x25; 430 n.h.p.; triple-expansion engines.
The French steamship *P. L. M. 15* was torpedoed and sunk by a German submarine on February 18th, 1940, N.W. of Corsica, with the loss of all on board.

P. L. M. 20

Soc. Nationale d'Affretements; 1920; Sir R. Dixon & Co.; 5,417 tons; 400x56x28-4; 529 n.h.p.; quadruple-expansion engines.
The French steamship *P. L. M. 20* was torpedoed and sunk by a British submarine on March 1st, 1942, off the coast of Tunisia.

P. L. M. 22

Ministry of War Transport (E. R. Management Co); 1921; Sir R. Dixon & Co.; 5,646 tons; 400x56x28-4; 529 n.h.p.; quadruple-expansion engines.
The British steamship *P. L. M. 22* was torpedoed and sunk by a German submarine on June 27th, 1941, about 300 miles S.W. of Teneriffe on a voyage from Pepel to the Tees. Thirty-two of her crew were lost.

P. L. M. 23

German Government; 1921; Sir R. Dixon & Co.; 5,417 tons; 400 x 56x28-4; 529 n.h.p.; quadruple-expansion engines.
The French ship *P. L. M. 23* was under the control of Unterweser Reederei A.G. on behalf of the German Government when she was wrecked on the Scharhorn during bad weather on December 29th, 1940.

P. L. M. 25

Soc. Nationale d'Affretements; 1922; Sir R. Dixon & Co.; 5,391 tons; 400x56x28-4; 532 n.h.p.; quadruple-expansion engines.
The French steamship *P. L. M. 25* struck a mine and sank on February 27th, 1940, about five miles from the Cromer Knoll lightship.

P. L. M. 27

Ministry of War Transport (Gibbs & Co.); 1922; Sir R. Dixon & Co.; 5,633 tons; 400x56x28-4; 552 n.h.p.; quadruple-expansion engines.
The British steamship *P. L. M. 27* was torpedoed and sunk by a German submarine at 3.30 a.m. on November 2nd, 1942, while lying off Bell Island, N.F.L., with iron ore for Sydney, N.S. Twelve of her crew of 50 were lost.

P. MARGARONIS

D. P. Margaronis; 1913; Russell & Co.; 4,979 tons; 405-3x 52-2x27-4; 339 n.h.p.; triple-expansion engines.
The Greek ship *P. Margaronis*, Capt. George Chandris, sailed from the Downs on March 7th/8th, 1940, for the United States. She signalled the Greek steamship *Okeania* on the following day, reporting the presence of mines, but was not seen again.

P. N. DAMM

Svendens & Christensen; 1924; Kjobenhavns Flydedok & Skibsv; 2,281 tons; 305-6x45-4x18-6; 205 n.h.p.; triple-expansion engines.
The Danish ship *P. N. Damm* was involved in a collision and sank on March 28th, 1929, in the Bay of Biscay.

PACIFIC

Collins Line; 1849; William Brown, New York; 2,860 tons; 282x45x31-5; 800 n.h.p.; 13 knots; side lever engines.
The *Pacific* was one of the four famous wooden paddle steamers, the *Atlantic, Arctic, Baltic and Pacific*, with which Mr. E. K. Collins of New York commenced the Collins Line, American rival to the Cunard, in 1850.

The *Pacific* created a name for herself in May 1851, when she crossed from New York to Liverpool in nine days 20 hours ten minutes. During 1852 the Collins Line put up an average of 11 days 22 hours on the westbound passage for all four ships, an achievement which won it much patronage.

The *Pacific* left Liverpool on January 23rd, 1856, with 186 persons on board, of whom 45 were passengers and 141 crew. She was never heard of again, nor was any wreckage, message or other token of her washed up in the ensuing years.

This was the second of the four ships to be lost, the *Arctic* (which see) having been lost in a collision two years previously.

PACIFIC

Swift & Perry, New Bedford, U.S.A.; 350 tons.
The barque *Pacific*, Capt. J. W. Sherman, left New Bedford, U.S.A., for New Zealand toward the end of 1856. The vessel was badly found and in a leaky condition, and was forced to put in to Bunberry, New Holland, to be overhauled and caulked. She left again in January, 1857, and reached the coast of New Zealand early in February.

Her voyage was attended by persistently bad weather, which caused her to spring a leak for the second time, and made her progress extremely slow. The pumps, however, continued to keep her afloat until the night of May 21 st, when she had to be abandoned.

The boats were got out but a succession of heavy seas swept over her, making the operation very hazardous. Only one boat containing eight men seems to have reached shore in safety, the others having been smashed or capsized. The *Pacific* carried a crew of 32 of whom the eight men were the only survivors.

PACIFIC

Goodall, Nelson, Perkins & Co.; 1854; Millwall; 875 tons; 223 x 31x 17; 450 n.h.p.; 16 knots; side lever engines.
The paddle steamer *Pacific* left Victoria, B.C., for San Francisco at 9.15 on the morning of November 4th, 1875, with 238 persons on board, under command of Capt. Howell. At about 8 p.m., the night being clear and not dark, she collided with the sailing ship *Orpheus*, Capt. Sawyer, about 40 miles S. of Cape Flattery.

The *Orpheus* drifted away and all hands turned to repairs to their own ship, leaving those on the *Pacific* to fend for themselves. According to the *Pacific's* only survivor, a quartermaster named Neal O'Haly, there was panic on board the passenger vessel, the crew, who were inexperienced, being unable to launch the boats in a proper manner. The ship had developed a heavy list to port, which made matters worse. Of the five boats, those abaft the paddle-boxes were without oars, but at last one, containing 15 women and six men, was cut loose from the davits and set afloat. Unfortunately it was struck by the falling funnel and capsized, drowning all its occupants. The sea began to rise and the *Pacific* sank within an hour of the collision. Early on the morning of Monday the 8th the U.S. revenue steamship *Oliver Wolcott*, cruising in the Fuca Straits, sighted the wreckage and picked up O'Haly. The remainder of the crew and all the passengers had either been washed away or had died from exposure.

The *Orpheus* made for Vancouver Island after the collision, but Capt. Sawyer lost his bearings and mistook the light on Cape Beale for that on Cape Flattery. As a consequence his ship ran ashore in Barclay Sound and became a total wreck.

PACIFIC

Pacific Shipping Ltd.; 1895; J.L. Thompson & Sons; 2,919 tons, 312x41x20-6; 247 n.h.p.; triple-expansion engines.
The British cargo ship *Pacific* capsized and sank on the Outer Dowsing on September 9th, 1908, while on a voyage from Sunderland to Buenos Aires carrying a cargo of coal. Five of her crew were lost.

PACIFIC

Ministry of War Transport (John L Jacobs & Co.); 1915; Union Iron Works Co.; 6,034 tons; 400x56-2x29-4; 498n.h.p.; 10-5 knots; turbine engines.

The steamship *Pacific*, Capt. A. F. King, was torpedoed and sunk by a German submarine on March 1st, 1941, 180 miles W.S.W. of Sydero Islands, Faroes. Only one man survived of her crew of 35.

PACIFIC

Williamstown Shipping Co.; 1923; Murdoch & Murray; 2,816 tons; 324 x 44 • 2 x 23 • 1; 265 n.h.p.; triple-expansion engines. The British cargo ship *Pacific* left Sunderland on February 7th, 1943, in convoy for London carrying a cargo of coal. The convoy became scattered in bad weather during the night of the 8th, and at daybreak on the 9th, the *Pacific* and two other ships had disappeared. She carried a crew of 38.

PACIFIC COAST

Coast Lines; 1935; Ardrossan Dockyard Co.; 1,210 tons; 251-7x38 > 1x13'1; 312 n.h.p.; 10-5 knots; oilengines. The motor vessel *Pacific Coast*, Capt. H. E. Williams, was destroyed by an internal explosion on November 9th, 1939, while lying in Brest harbour. Capt. Williams and five men were killed and three wounded.

PACIFIC GROVE

Furness, Withy & Co.; 1928; Deutsche Werke Kiel A.G.; 7,117 tons; 450-4x60-8x29^7; 1,014n.h.p.; oilengines. The British motorship *Pacific Grove* was torpedoed and sunk by a German submarine on April 12th, 1943, about 1,000 miles W. of Ireland on a voyage from New York to Glasgow. Ten of her crew and one gunner were lost.

PACIFIC MARU

Tamai Shosen K.K.; 1920; Kawasaki Dockyard Co.; 5,872 tons; 385 x 51 x 36; 440n.h.p.; triple-expansion engines. The steamship *Pacific Maru* was torpedoed and sunk by the U.S. submarine *Guitarro* on October 31st, 1944, off Olongapo, Philippine Islands.

PACIFIC PRESIDENT

Furness, Withy & Co.; 1928; Deutsche Werke Kiel A.G.; 7,113 tons; 450-4x60-8x29-7; 1,014n.h.p.; oilengines. The British motorship *Pacific President* was torpedoed and sunk by a German submarine on December 2nd, 1940, about 550 miles W. of Inishtrahull on a voyage from Leith to New York. All her crew of 52 were lost.

PACIFIQUE

A. D. Bordes & Fils; 1867; Barclay, Curie & Co.; 1,526 tons; 237-2x37-4x23.

The French barque *Pacifique*, on a voyage from the Tyne to Valparaiso with coal, was sunk by collision with the German steamship *Enma* on October 14th, 1895. The captain, pilot and ten of the crew were drowned.

PADDINGTON

Paddington Steamship Co.; 1906; Richardson, Duck & Co.; 5,084 tons; 378-5x52-1x27-9; 419 n.h.p.; 10-5 knots; triple-expansion engines.

The steamship *Paddington* was torpedoed and sunk by a German submarine 250 miles W. of Fastnet on July 21st, 1917. Twenty-nine men, including the captain, were killed. One survivor was taken prisoner by the submarine.

PADDINGTON

H. Harrison (Shipping); 1,924; Craig, Taylor & Co.; 5,545 tons; 244 x 36-8 x 15-8; 163 n.h.p.; triple-expansion engines. The British steamship *Paddington* sank after a collision off Flam-borough Head on February 2nd, 1929, while on a voyage from Blyth to London carrying a cargo of coal.

PADENNA

Marittima Ravennate Soc. Anon.; 1904; H. Koch A.G.; 1,589 tons; 282x36-7x16-2; 163n.h.p.; triple-expansion engines. The Italian steamship *Padenna* was torpedoed and sunk by the British submarine *Thrasher* on September 3rd, 1942, near Tobruk.

PAGANINI

"Tirrenia" Soc. Anon. di Nav.; 1928; Cant. Nav. Triestino; 2,427 tons; 294x40-1x21-1; 357n.h.p.; oilengines. The Italian troopship *Paganini* caught fire and sank on June 28th, 1940, about 12 miles off Durazzo. She was carrying 920 troops at the time and 220 were lost.

PAKENHAM

British Navy, destroyer; 1942; Hawthorn, Leslie; 1,540 tons; 345x35x9; 40,000s.h.p.; 34 knots; turbine engines; 3-drum boilers; four 4-7 in. guns, one 3 in.A.A., two 20 mm.A.A.; 4 T.T. The destroyer *Pakenham*, Cdr. Basil Jones, D.S.C., was hit and badly damaged when engaged against Italian destroyers on the west coast of Sicily. It proved impossible to take her in tow and she was sunk by ships in company. Ten ratings were killed.

PAKHOI

John Samuel Swire; 1880; Scott & Co.; 1,408 tons; 249x31-3x23-1; 160 h.p.; compound inverted engines. The British cargo ship *Pakhoi* was wrecked at Amoy on November 5th, 1881, while on a voyage from Shanghai to Amoy carrying a general cargo.

PALALA

Bullard, King & Co.; 1885; J. Laing; 1,760 tons; 260-7x36-3x16; 200 h.p.; compound engines. The British cargo ship *Palala* was wrecked on Kimmeridge Ledge, Dorset, on May 15th, 1886, while on a voyage from London to Natal carrying a general cargo.

PALAO MARU

Nippon Yusen K.K.; 1934; Mitsubishi Jukogyo Kaisha; 4,495 tons; 362-4x50-8x27-9; 340 n.h.p.; triple-expansion engines & L.P. turbine.

The steamship *Palao Maru* was torpedoed and sunk by the U.S. submarine *Greenling* on August 6th, 1942, off the Caroline Islands.

PALATIA

Hamburg-Amerika Linie; 1928; H. Koch A.G.; 3,979 tons; 374x53-7x22-6; 1,170n.h.p.; oilengines. The German motorship *Palatia* was bombed and sunk by British aircraft on October 21st, 1942, off Lindesnaes, Norway.

PALATINIA

Sivewright, Bacon & Co.; 1899; Furness, Withy & Co.; 3,620 tons; 361-5x49x24-9; 292n.h.p.; triple-expansion engines. The British cargo ship *Palatinia* was wrecked at East London on March 7th, 1911, while on a voyage from Tampa to Kobe carrying a cargo of phosphate.

PALEMBANG

Rotterdamse Lloyd; 1911; Bonn & Mees; 6,674 tons; 432 x 54-3x34; 472n.h.p.; triple-expansion engines. The Dutch steamship *Palembang* was torpedoed and sunk by a German submarine in the North Sea on March 18th, 1916.

PALEMBANG MARU

Japanese Government; 1918; J. Brown & Co.; 5,236 tons; 400'7x52-3x28-5; 489n.h.p.; triple-expansion engines. The tanker *Palembang Maru* was formerly the *Philippine Mindanao*, captured by the Japanese in February, 1942. She was torpedoed and sunk by the U.S. submarine *Bay a* on March 4th, 1945, 25 miles S.E. of Tuyhoa, Indo-China.

PALENA

Cia. Sud-Americana de Vapores; 1896; J. Reid & Co.; 2,640 tons; 350x42-1x19-5; 500n.h.p.; triple-expansion engines. The Chilean ship *Palena* was lying at anchor at Valparaiso when, on May 22nd, 1940, a heavy gale sprang up. Several ships in the harbour were torn from their moorings, among them the Chilean warship *Almirante Latorre*. This ship was driven close to the *Palena* and cut her anchor cables, whereupon the *Palena* was driven ashore and broke up very quickly.

PALERMO

PALERMO

Navigazione Generale Italiana; 1899; *Palmer's Co.*; 9,203 tons; 470x56-8x32-1; 800 n.h.p.; triple-expansion engines. The Italian steamship *Palermo* was torpedoed and sunk by a submarine in the Mediterranean on December 2nd, 1916.

PALERMO

Italian Government; 1910; *Short Bros.*; 2,897 tons; 340-6x46-4x21-5; 389 n.h.p.; triple-expansion engines. The steamship *Palermo* was formerly the Greek *Aihinal*, seized by the Italians. She struck a mine and sank towards the end of May, 1944, off Tagliamento.

PALESTRINA

Jenneson Taylor & Co.; 1894; *Bartram, Haswell & Co.*; 3,469 tons; 350x45x16-3; 280 n.h.p.; triple-expansion engines. The British cargo ship *Palestrina* was wrecked near the Bay of Bulls, NFL, on October 15th, 1896. She was on a voyage in ballast from Rotterdam to Baltimore.

PALESTRO

Italian Navy, ironclad frigate; 186-; *Italy*; 2,000 tons; 200 x 42x15; 300 n.h.p.; 10 knots; compound engines; two S.O.p.d.r. guns, m.l.r., several smaller. The *Palestro* was one of the smaller units of the Italian ironclad squadron under Admiral Count Persano which suffered defeat at the hands of Admiral Tegethoff, commanding the Austrian squadron off the island of Lissa on July 20th, 1866. In the action the *Palestro* was rammed by the Austrian flagship, the *Ferdinand Max*, but without vital damage. Subsequently the ship was set on fire by shells and in this condition she hauled out of the line. Her crew made desperate efforts to beat out the flames and they were under the impression that her magazines were flooded and the danger past when she blew up. The loss of life amounted to about 200 officers and men.

A more detailed account of the battle of Lissa will be found under the *Re d'Italia*.

PALESTRO

John Glynn & Son; 1889; *R. Thompson & Sons*; 2,354 tons; 294x39x19-3; 308 n.h.p.; triple-expansion engines. The British cargo ship *Palestro* was wrecked on the Diamond Shoals, Cape Hatteras, on August 9th, 1900. She was carrying a cargo of timber from Pensacola to Liverpool.

PALESTRO

Italian Navy, destroyer; 1919; *Odero-Terni-Orlando*; 862 tons; 256-5x24-5x8-5; 22,000 s.h.p.; 32 knots; turbine engines; Thornycroft boilers; four 4 in. guns, two 3 in., 4 m.g., 4 T.T., 10 mines. The destroyer *Palestro* was cruising in the Adriatic on September 22nd, 1940, when she was torpedoed and sunk by the British submarine *Osiris*, Lt. Cdr. J. R. G. Harvey. The normal complement of the *Palestro* was 105.

PALIMA

Koninklijke Paketvaart Maats.; . 1922; *Haarlemsche Scheepsbouw Maats.*; 1,179 tons; 231-3x38-2x14-5; 106 n.h.p.; triple-expansion engines. The Dutch steamship *Palima* was torpedoed and sunk by the German submarine C/-97 on June 12th, 1943, ten miles off Saida, Lebanon. The captain and 23 crew were killed.

PALIME

Afrikanische Frucht-Compagnie; 1937; *Deutsche Werft*; 2,863 tons; 360 '4x47-1x16-5; 972 n.h.p.; oil engines. The German motorship *Palime* was torpedoed and sunk by a British submarine on June 5th, 1940, near Feinstein, Norway.

PALINURUS

Embleton & Co.; 1833; *Whitby*; 300 tons. The barque *Palinurus*, on a voyage from Demerara to London with rum and sugar, was wrecked in a gale on December 27th, 1849, on the Lion Rock, Scilly Isles. There were no survivors.

PALLADA

Russian Navy, protected cruiser; 1899; *Gallernii Yard*; 6,823 tons; 413-2x55-7x21; 13,108 i.h.p.; 19-3 knots; triple-expansion engines; eight 6 in. guns, two 2-5 in., twenty-four 12 pdr., 8 m.g., 3 T.T.

The Russian cruiser *Pallada* was the searchlight duty ship, sweeping the approaches to the fortress of Port Arthur on the night of February 8th, 1904, when the Japanese destroyer flotillas made a surprise attack upon the battleships and cruisers of the Pacific Squadron lying in the outer anchorage.

The *Pallada*, whose lights afforded a ready guide to the Japanese attackers, was hit on the port side by a torpedo and a large hole was made amidships, abreast of a coal bunker. The stricken ship made for the harbour, going aground close to the lighthouse on the west side of the entrance.

The cruiser was floated next day and docked about a fortnight later. By June 23rd, when there was a sortie by the Russian fleet, she was once more in fighting trim, and beat off a number of Japanese torpedo attacks on that day and during the succeeding days. She also took part in the battle of the Yellow Sea, a full account of which will be found under the *Novik*, receiving little damage. After this battle the remnants of the Pacific Squadron that returned to Port Arthur lay at anchor, replying as best they could to the fire of the besiegers, which increased in volume every week.

The *Pallada* was badly battered during these months, as she was constantly under fire from the heavy 11 in. howitzers mounted on the heights. On December 7th, 1904, all hope of keeping the ship afloat was abandoned, and she was sunk by the concentrated fire of the investing batteries. For full story of the Pacific Squadron at Port Arthur see *Peresvyet*.

PALLADA

Russian Navy, armoured cruiser; 1906; *Galemi Yard*; 7,775 tons; 450x57x21-2; 16,500 i.h.p.; 21 knots; triple-expansion engines; Belleville boilers; two 8 in. guns, eight 6 in., twenty-two 12 pdr., four 3 pdr., 2 T.T.

On October 11th, 1914, the Russian armoured cruiser *Pallada* was on patrol duty in the Baltic, with the cruisers *Admiral Makharoff* and *Bayan*. At about 2 p.m. she was torpedoed by a German submarine. The torpedo caused a heavy internal explosion and the cruiser sank with the loss of most of her complement of 568.

PALLADE

Italian Navy, torpedo boat; 1937; *Napoletani*; 679 tons; 267x 26x7-7; 19,000 s.h.p.; 34 knots; turbine engines; 3-drum boilers; three 3-9 in. guns, four 37 mm. A.A., two 13 mm. A.A., 4 T.T.

The torpedo boat *Pallade* was lying off Naples on August 5th, 1943, when she was attacked by British bombers. The vessel, which carried a complement of about 100, was hit and sunk.

PALLAS

Clifton & Co.; 1826; *New Brunswick*; 316 tons. The barque *Pallas* with 136 emigrants besides crew, left Cork for Quebec on April 28th, 1856. The ship had a very good passage as far as the mouth of the St. Lawrence when she ran into dense fog. At about ten o'clock on the night of May 30th, when sailing at four and a half knots, she struck on the rocks on the southern side of St. Pauls Island. The emigrants were asleep below and rushed on deck in such a state of panic that the ship's officers found it impossible to control them. They overcrowded the few available boats and refused to leave them when ordered, as a result of which the boats buckled under the weight and most of those in them were drowned.

The captain prevailed on the crew and the rest of the emigrants to remain on the ship until daybreak when all the survivors were taken off in safety by boats from the island. The loss of life amounted to 82, of whom 79 were passengers.

The captain hired the schooner *Nazare*, and took the survivors to Grosse He, from whence the regular steamship took them on to Quebec.

PALLAS

German Navy; 1925; *Ateliers & Chantiers Maritimes du Sud-Ouest*; 5,260 tons; 389-9x53x27-9; 518 n.h.p.; triple-expansion engines. The tanker *Pallas* was a French vessel taken over by the German

Navy. On June 27th, 1944, she was torpedoed and sunk by an Allied submarine off Nice.

PALLION

Peter Rowe & Sons; 1879; W. Gray & Co.; 1,641 tons; 256-6x34-8x29-5; 187 n.h.p.; triple-expansion engines. The British cargo ship *Pallion* was wrecked between Bageceneaud and Les Evains, Bay of Biscay, on December 27th, 1897. She was on a voyage from Cardiff to St. Nazaire carrying a cargo of coal.

PALMA

Peninsulare Italiana Soc. di Cabotaggio; 1919; American S.B. Co.; 2,775 tons; 250-3x43-6x26-2; 184 n.h.p.; triple-expansion engines.

The Italian steamship *Palma* was torpedoed and sunk by a British submarine on January 9th, 1941, off Sardinia.

PALMA

Royal Mail Lines; 1941; Harland & Wolff; 5,419 tons; 433 -3 x 61-3x22-7; 1,236 n.h.p.; oil engines.

The British motorship *Palma* was torpedoed and sunk by a Japanese submarine on February 29th, 1944, nearly 400 miles S. of Ceylon on a voyage from Liverpool to Calcutta. Four of her crew and three gunners were lost.

PALMAIOLA

Soc. Anon. Ilva; 1918; Collingwood S.B. Co.; 1,880 tons; 256-9x43-7x18-2; 150 n.h.p.; triple-expansion engines. The Italian steamship *Palmaiola* was torpedoed and sunk by British aircraft on December 3rd, 1942, S.E. of the Kerkenna Islands.

PALMELLA

Ellerman Line; 1913; Ramage & Ferguson; 1,352 tons; 232-8x37-1x16-6; 192 n.h.p.; 8-5 knots; triple-expansion engines. The steamship *Palmella* was torpedoed and sunk by a German submarine 25 miles N.W. \ W. of South Stack, Anglesey, on August 22nd, 1918. The captain and 27 men were killed.

PALMER

United States Navy, minesweeper; 1918; Bethlehem S.B. Corp.; 1,060 tons; 314-5x30-5x8-5; 25,000 s.h.p.; 35 knots; turbine engines; four 4 in. guns, one 3 in. A.A., 12 T.T. The United States minesweeper *Palmer* was one of 16 destroyers relegated to minesweeping duties by the American navy during the Second World War. Prior to the landing of American troops at Lingayen in January, 1944, the minesweeper was one of a flotilla engaged in clearing the Lingayen Gulf of Japanese mines. At about 6.35 p.m. on the 7th she was subjected to heavy bombing, being hit on the port side amidships on the waterline. Her forward engine room was flooded and there was other heavy damage, causing her to sink very quickly.

Of her complement of 151 there were 28 killed and 38 wounded, the survivors being picked up by the minesweepers *Breeze* and *Hopkins*.

PALMYRA

Bock, Godeffroy & Co.; 1944; Deutsche Werft A.G.; 1,759 tons; 302-3x44-3x —; compound engines.

On a voyage from Hamburg to Istanbul the German ship *Palmyra* was involved in a collision with the *British Mariner* on March 27th, 1962, and sank about 20 miles off Ushant.

PAMIR

Stiftung Pamir und Passat; 1905; Blohm & Voss; 3,103 tons; 377-3x46x —; 4-masted steel barque; auxiliary oil engines. The four-masted steel barque *Pamir* was among the last of that great fleet of sailing ships which flourished at the beginning of the present century. She had a long and eventful career, escaping all the perils of war and of the elements for more than fifty years of voyaging.

She had been built for service in the Chilean nitrate trade and made many voyages around Cape Horn. Later she passed to the Australian grain trade and sailed in the last of those famous races from the Antipodes to Europe, together with the *Passat*, a ship of similar design. Finally both ships were condemned to the ship-breaker's yard, not because they were unseaworthy but because

no one could be found to run them. At the last moment they were rescued by a group of West German shipowners who formed the Pamir-Passat Foundation, an organization created to train officers for the German mercantile marine, and were reconditioned and fitted with auxiliary oil engines.

In September, 1957, the *Pamir* left Buenos Aires for Hamburg with a cargo of barley. She carried a crew of 35 and 51 cadets. On the 21st when about 600 miles W. of the Azores she ran into a hurricane which blew away her canvas so that she no longer possessed sufficient sail to keep head-on to the sea. Messages calling for immediate assistance were sent, in response to which a number of ships in the area went to her aid. Time, however, was short, and sometime during the night the *Pamir* was forced over on to her side and was submerged by the violence of the hurricane.

Of those on board only six survived, of whom five were picked up from a waterlogged lifeboat by the U.S. steamship *Saxon*, 7,251 tons, and transferred later to the U.S. transport *Geiger*, 17,600 tons, which landed them at Casablanca. The other survivor was rescued by the U.S. coastguard cutter *Absecon*, 1,766 tons, and transferred to the French liner *Antiles*, 19,828 tons, which landed him at Puerto Rico.

PAMPA

Soc. General de Transports Maritimes a Vapeur; 1906; London & Glasgow Co.; 4,471 tons; 408x47-4x29-5; 531 n.h.p.; triple-expansion engines.

The French steamship *Pampa* was torpedoed and sunk by a submarine in the Mediterranean on August 27th, 1918.

PANATLANTIC

Pan-Atlantic Steamship Corp.; 1919; Long Beach Shipbuilding Co.; 5,411 tons; 410-5x54-3x27-2; 2,800 Lh.p.; 10-5 knots; triple-expansion engines.

The American steamship *Pan Atlantic*, Capt. J. O. Sieber, was in convoy about 250 miles N.W. of Narvik on July 6th, 1942, when she was bombed and sunk by German aircraft. Eighteen men were killed and three wounded. Capt. Sieber was among the survivors.

PAN-MASSACHUSETTS

National Bulk Carriers; 1919; Bethlehem S.B. Corp.; 8,202 tons; 456-1x56x35-4; 833 n.h.p.; turbine engines. The American tanker *Pan-Massachusetts* was torpedoed and sunk by a German submarine on February 19th, 1942, 50 miles S.E. of Cape Canaveral with the loss of 22 lives.

PAN-NEW YORK

Pan American Petroleum & Transport Co.; 1938; Federal S.B. & D.D. Co.; 7,701 tons; 440x66-5x34-3; 3,300 s.h.p.; 12-5 knots; turbine engines.

The American tanker *Pan-New York*, Capt. H. V. Thompson, was torpedoed and sunk by a German submarine while in convoy in the North Atlantic on October 29th, 1942. Capt. Thompson and 42 men were killed and one wounded.

PAN-PENNSYLVANIA

National Bulk Carriers; 1943; Welding Shipyards; 11,017 tons; 501-2x70x38-5; turbine engines.

The American tanker *Pan-Pennsylvania* was torpedoed and sunk by a German submarine on April 16th, 1944, on a voyage from New York to Barry with 140,000 barrels of high octane fuel. Twenty-five of the crew were killed.

PAN ROYAL

Pan-Atlantic Steamship Corp.; 1918; Southwestern Shipbuilding Co.; 5,627 tons; 410-5x54-3x27-2; 2,800 Lh.p.; 10-5 knots; triple-expansion engines.

The American steamship *Pan Royal*, Capt. W. B. Johnson, was in convoy in the North Atlantic on February 9th, 1943, when she collided with the motor vessel *Evita*, 6,346 tons, and the steamship *George Davis*, 7,177 tons. She sank with the loss of eight men. Capt. Johnson was among the survivors.

PANACHRANDOS

B. & J. Koutsoukos; 1915; Bar tram & Sons; 4,661 tons; 400 x 52-1x25-7; 461 n.h.p.; triple-expansion engines. The Greek ship *Panachrandos*, Capt. B. Kaisikis, sailed from the

PANAGHI LYKIARDOPULO

Downs on January 14th, 1940, with a crew of 31, for the Gulf of Mexico. She radioed Land's End on the following day at 10.2 a.m. but was not seen again.

PANAGHI LYKIARDOPULO

N. D. Lykiardopulo; 1900; *Bar tram & Sons*; 3,193 tons; 350x45x16-4; 297 n.h.p.; triple-expansion engines. The Greek steamship *Panaghi Lykiardopulo* was sunk by a German submarine in the English Channel on May 15th, 1917.

PANAGIOTIS

D. Lemos; 1900; *C. S. Swan & Hunter*; 3,717 tons; 348x45-3 x 17-8; 310 n.h.p.; triple-expansion engines. The Greek ship *Panagiotis* was carrying a cargo of manganese ore from Secondee to Boulogne and Dunkirk. On November 30th, 1929, she was wrecked on Hoevens Rock, Axim Bay.

PANAMA

Thos. Appleby & Co.; 1881; *W. Gray & Co.*; 1,706 tons; 256-2X 34-6x19-6; 150 h.p.; compound engines. The British steamship *Panama* was wrecked on October 13th, 1891, at Astra, Finngrundet, while on a voyage from Umea to Bordeaux with a cargo of wood.

PANAMA

Ministry of War Transport (United Baltic Corp.); 1915; *Burmeister & Wain*; 6,650 tons; 410x55-2x27-4; 2,400 b.h.p.; 12 knots; oil engines. The motorship *Panama*, Capt. C. V. Frederiksen, was on a voyage from Cardiff to Philadelphia when, at 1.15 a.m. on April 11th, 1945, in heavy weather in mid-Atlantic, her engines broke down. Her sand ballast shifted and she capsized and sank at 3.55 a.m. Capt. Frederiksen and 44 men were lost. Five survivors were picked up on April 29th.

PANAMAMARU

Kuribayashi Shosen K.K.; 1910; *Mitsubishi Dockyard & Engineering Works*; 5,287 tons; 400X51x32-4; 536 n.h.p.; triple-expansion engines. The steamship *Panama Maru* was bombed and sunk by Chinese aircraft on January 23rd, 1944, off Santuao, China.

PANAY

United States Navy; 1936; *U.S.A.*; 450 tons; 191x28x6-5; 2,250 h.p.; 15 knots; triple-expansion engines; two 3 in. A.A. guns, 10 m.g. The U.S. river gunboat *Panay*, Lt. Cdr. J. J. Hughes, U.S.N., was serving with the American Far Eastern Fleet in November 1937, during hostilities between China and Japan. On the 22nd it became necessary to evacuate the U.S. Embassy from Nanking. This was done without hurry and on December 11th the *Panay* embarked the last of the staff and a number of civilians. Three Standard Oil barges, two British gunboats and a few British merchantmen formed part of the flotilla. The American vessels had their flags hoisted as well as painted on their decks and sides. Despite this the flotilla was fired on persistently by a Japanese battery during its passage down the Yangtze. The shooting was wild, however, and there were no hits.

On the 12th, when at anchor, the *Panay* and the oil barges were attacked about 3.30 in the afternoon by three Japanese navy bombers, which dropped 18 bombs. The *Panay's* forward gun was wrecked and many of her crew wounded. This attack was followed by another from 12 dive bombers and nine fighters which sank the gunboat and two of the barges.

Two seamen and one civilian were killed, and 11 officers and men wounded, including Lt. Cdr. Hughes. The survivors managed to reach shore, where they were kindly treated by the Chinese.

The Japanese Government made full apology and offered reparation.

PANCHITO

Petrinovic & Co.; 1910; *New York S.B. Co.*; 4,015 tons; 359 x 49-2x25-9; triple-expansion engines. The Panamanian ship *Panchito* was carrying ore from Huelva to Antwerp. When she was off the He de Sein, near Brest, on January 29th, 1948, she broke in two and sank during a storm. There were 12 survivors but 19 of the crew were lost.

PANCRATION

D. N. Koufos & F. J. Sotiriades; 1920; *Government Yard, Brest*; 2,171 tons; 266-7x39-4x23; 149 n.h.p.; triple-expansion engines. The Greek steamship *Pancration* was torpedoed and sunk by German aircraft on April 22nd, 1941, at Milos, during the invasion of Greece.

PANDIAS

Oceanos Maritime S.S. Co.; 1912; *D. & W. Render son & Co.*; 4,981 tons; 403-5x52-2x27-3; 435 n.h.p.; triple-expansion engines. The Greek steamship *Pandias* was torpedoed and sunk by a German submarine on June 13th, 1941, W. of Freetown, with the loss of 11 lives.

PANDION

Cork S.S. Co.; 1904; *Swan, Hunter & Wigham Richardson*; 1,279 tons; 255'4x33-7x18-6; 195 n.h.p.; triple-expansion engines. The Irish cargo ship *Pandion* sank after a collision 11 miles west of the Owers Light on March 15th, 1917. She was on a voyage from Rotterdam to Manchester carrying a general cargo.

PANDION

British & Continental S.S. Co.; 1926; *Burntisland S.B. Co.*; 1,944 tons; 291-2 x 43 • 2 x 19-1; 211 n.h.p.; triple-expansion engines. The British steamship *Pandion* was attacked by a German aircraft off the N. coast of Ireland on January 28th, 1941, and her captain was killed and the chief officer seriously injured. The ship anchored in Lough Swilly on January 30th, but was making water and had to be run aground. She later broke in two and sank. She was on a voyage from the Tyne, via Oban, to Leixoes.

PANEVEZYS

Akc. B.-ve Lietuvds Baltijos Lloydas; 1924; *Akers Mek. Vcersted*; 1,607 tons; 256-9x40x17-3; 168 n.h.p.; triple-expansion engines. The Lithuanian ship *Panevezys* struck a rock and sank on November 13th, 1939, two miles S. of Revelstein reef. She was on a voyage from Leningrad to Memel with a cargo of salt.

PANGANI

F. Laeisz & Co.; 1903; *J. C. Tecklenborg A.G.*; 3,054 tons; 322-2x46-2x26-3. On the night of January 27th, 1913, on a voyage from Hamburg to Valparaiso, the German four-masted barque *Pangani* collided with the French steamship *Phryne*, 2,817 tons, off Cap La Hague. She sank very rapidly, taking with her 30 of the crew, only four men being rescued by the *Phryne*.

PANTELIS

C. P. Laimos & J. C. Ponticos; 1911; *Irvine S.B. & D.D. Co.*; 3,845 tons; 350x51-1x23-9; 340 n.h.p.; triple-expansion engines. The Greek steamship *Pantelis* was torpedoed and sunk by a German submarine on October 8th, 1942, off Capetown on a voyage from Beirut to Buenos Aires in ballast. Twenty-nine of her crew of 38 were lost.

PANTERA

Italian Navy, destroyer; 1923; *Ansaldo*; 1,526 tons; 372x34x 11-5; 40,000 s.h.p.; 34 knots; turbine engines; Yarrow boilers; eight 4-7 in. guns, two 40 mm., 4m.g., 4 T.T., 100 mines. The Italian destroyer *Pantera* was one of a flotilla of destroyers lying in and about Massawa, port of the Italian colony of Eritrea, when that colony was occupied by the British Army. On April 4th, 1941, the destroyer was scuttled off the coast of Saudi Arabia. For full details see under the destroyer *Leone*.

PANTHER

British Navy, destroyer; 1941; *Vickers Armstrongs*; 1,540 tons; 345x35x9; 40,000 s.h.p.; 34 knots; turbine engines; 3-drum boilers; four 4-7 in. guns, one 3 in. A.A., two 20 mm. A.A., 4 T.T. The destroyer *Panther*, Lt. Cdr. Viscount Jocelyn, was bombed and sunk by German aircraft in the Scarpanto Strait on October 9th, 1943. Three officers and 33 ratings were killed. Lt. Cdr. Jocelyn was among the survivors.

PAOLINA

The Whitney & Sodden Co.; 1900; F. Ponziolo; 1,337 tons; 206-2x38-9x22-5.

The American sailing ship *Paolina* was sunk by a German submarine off Ushant on September 26th, 1917.

PAOLINA

Imprese Navigazione Commerciale Soc. Anon.; 1911; Blohm & Voss; 4,894 tons; 422-4x55-2x25-3; 619n.h.p.; triple-expansion engines.

The Italian steamship *Paolina* struck a mine and sank on August 27th, 1942, about six miles off Cap Bon.

PARA

Steel, Young & Co.; 1875; Withy; 1,103 tons; 225-7x30-3x17; 100 h.p.; compound inverted engines.

The British cargo ship *Para* struck a rock and foundered off Cape Sable on February 26th, 1880, while on a voyage from Boston to Hartlepool carrying a general cargo.

PARA

Steel, Young & Co.; 1884; E. Withy & Co.; 1,717 tons; 258-6x34-8x19-5; 161 n.h.p.; triple-expansion engines.

The British cargo ship *Para* sank after striking an iceberg near Tilt Cove, N.F.L., on June 8th, 1898. She was on a voyage in ballast from Swansea to Tilt Cove.

PARA

O. Banck; 1882; Short Bros.; 1,834 tons; 269-6x37-1x20-5; 208 n.h.p.; compound engines.

The Swedish steamship *Para* struck a mine and sank in the Baltic on June 10th, 1916.

PARACIERS

Soc. Anon. des Acieries de Paris & d'Outreau; 1894; Soc. Anon. John Cockerill; 2,542 tons; 321x40-2x23-7; 315 n.h.p.; triple-expansion engines.

The French steamship *Paraciers* was torpedoed and sunk by a German submarine in the North Sea on September 17th, 1917.

PARAGON

British Navy, destroyer; 1913; Thornycroft & Co.; 917 tons; 265-2x26-5x10-2; 22,500 i.h.p.; 31 knots; turbine engines; Yarrow boilers; three 4 in. guns, 2 T. T.

The destroyer *Paragon*, Lt. Bowyer, was patrolling the submarine barrage in the Straits of Dover on the night of March 17th, 1917, in company with the *Laertes*, *Laforey* and *Llewellyn*. At about 10.50 p.m. a German destroyer force led by Cdr. Tillessen steamed into the Straits with the object of breaking the barrage. The first ship to encounter them was the *Paragon*, which was torpedoed and overwhelmed with gunfire when in the act of flashing her challenge. She blew up and sank immediately, only ten of her complement of 77 being picked up.

The *Llewellyn*, which came on the scene in time to rescue the few survivors, was also torpedoed but, fortunately, did not sink.

PARAHYBA

A. Lanfranco; 1889; W. Doxford & Sons; 2,537 tons; 310x38-5x18-1; 226 n.h.p.; quadruple-expansion engines.

The Spanish steamship *Parahyba* was sunk by a German submarine off Ushant on January 19th, 1917.

PARALOS

C. A. Petroutsis; 1906; J. Priestman & Co.; 3,435 tons; 332x49'5x23-6; 316n.h.p.; triple-expansion engines. The Greek steamship *Paralos* struck a mine and sank on December 6th, 1939, seven miles off the North Foreland on a voyage from Antwerp to Piraeus with coal.

PARANA

Cia. Commercio e Navegafao; 1893; W. B. Thompson & Co.; 4,461 tons; 381-8x46-7x27-5; 395n.h.p.; triple-expansion engines.

The Brazilian steamship *Parana* was torpedoed and sunk by a German submarine in the English Channel on April 4th, 1917.

PARANA

Soc. Gⁿ. de Transports Maritimes a Vapeur; 1908; Forges & Chantiers de la Mediterranee; 6,248 tons; 420-6x50-3x31-6; 556 n.h.p.; triple-expansion engines.

The French steamship *Parana* was torpedoed and sunk by a submarine in the Mediterranean on August 23rd, 1917.

PARANAGUA

Hamburg-Amerika Linie; 1939; Howaldtswerke A.G.; 6,062 tons; 446-5x61-3x23-8; 910n.h.p.; oilengines.

The German motorship *Paranagua* struck a mine and sank on December 5th, 1940, off Texel.

PARIGI

Koninklijke Paketvaart Maats; 1922; N.V. Werf Conrad; 1,172 tons; 230x38-2x14-5; 108 n.h.p.; triple-expansion engines.

The Dutch steamship *Parigi* left Tjilatjap on February 28th, 1942, for Bunbury, W.A. On the following day she was intercepted by a Japanese cruiser and sunk by gunfire, with the loss of all on board.

PARINGA

Fan Kon Sang; 1908; Scott of Kinghorn; 1,359 tons; 230-2x36-1x13-9; 195 n.h.p.; triple-expansion engines. The Chinese ship *Paringa*, Capt. A. Macinnes, was towing the *Vincas* from Melbourne to Hong Kong for breaking up, but during a storm off Lakes Entrance, Gippsland, on December 24th, 1935, she cast off the tow and disappeared. On the 26th the *Paringa* was in communication with the motorship *Hauraki* but there was no further news of her. The *Vincas*, with four men on board, drifted inshore and anchored safely off the coast of Victoria. I

PARIS

A/S Ganger Rolf; 1910; Akers Mek. Verksted; 1,634 tons; 241-5x37-2x20-5; 169 n.h.p.; triple-expansion engines.

The Norwegian steamship *Paris* was sunk by a German submarine in the North Sea on April 17th, 1917.

PARIS

Cie. Generate Transatlantique; 1921; Ch. & Atel. de St. Nazaire; 34,569 tons; 735-4x85-3x59-1; turbine engines.

While the French passenger liner *Paris* was in port at Havre on April 18th, 1939, a fire broke out simultaneously in the bakery and on "A" deck. She capsized alongside the quay on the following morning and lay on her side. Art treasures intended for the New York World Fair were saved. The wreck was heavily damaged by air attacks in June, 1944, and after the war she was broken up.

PARIS

Southern Railway Co.; 1913; W. Denny & Bros; 1,790 tons; 293-5x35-6x15-2; 14,000 i.h.p.; 22 knots; turbine engines.

The steamship *Paris* was on her way to Dunkirk to embark wounded when, on June 2nd, 1940, she was bombed by German aircraft and disabled. Tugs were sent to her assistance but she sank shortly after midnight off W. Buoy, ten miles from the French coast. Two men were killed.

The full story of the Dunkirk Evacuation is told under the destroyer *Grafton*.

PARIS

A/S Ganger Rolf; 1922; Akers Mek. Verksted; 1,753 tons; 255-7x39-7x16-9; 169 n.h.p.; triple-expansion engines.

The Norwegian steamship *Paris*, under German control, was torpedoed and sunk by a British motor torpedo boat on the night of March 12th, 1944, near Utsire, Norway.

PARISMINA

United Fruit S.S. Corp.; 1908; Workman, Clark & Co.; 4,732 tons; 378-8x49-8x29-6; 169n.h.p.; triple-expansion engines.

The American steamship *Parismina* was torpedoed and sunk by a German submarine on November 17th, 1942, on a voyage from Reykjavik to Boston. Eight of her crew were killed.

PARK VICTORY

PARK VICTORY

U.S. Maritime Commission; 1945; Permanente Metals Corp. (Shipyards No. 2); 7,607 tons; 439-1x61-1x34-5; turbine engines.

The American ship *Park Victory* went ashore and sank at Uto, near Abo, in a storm on December 24th, 1947. Eight of the crew were lost. The ship was carrying coal from Hampton Roads to Finland.

PARKFIELD

Joseph Brown & Son; 1890; J.L. Thompson & Sons; 2,607 tons; 316x40-6x20'8; 266n.h.p.; triple-expansion engines. The British cargo ship *Parkfield* was wrecked on September 7th, 1895, at Isleta, Grand Canary. She was on a voyage from Buenos Aires to Liverpool carrying a cargo including grain, hides and cattle.

PARKGATE

Parkgate Steamship Co.; 1906; R. Craggs & Sons; 3,232 tons; 330-1x47x22-2; 280n.h.p.; 9 knots; triple-expansion engines.

The steamship *Parkgate* was sunk by a German submarine 80 miles N.E. of Cap de Per on April 4th, 1917. Sixteen men were killed. The captain was taken prisoner.

PARKHAVEN

Gebr. van Uden; 1908; Palmers' Co.; 2,655 tons; 312 x 46x20-6; 237 n.h.p.; triple-expansion engines. The Dutch steamship *Parkhaven* was sunk by a German submarine in the North Sea on October 19th, 1917.

PARKHILL

M. Taylor; 1915; Ardrossan D.D. & S.B. Co.; 500 tons; 162-8x25-6x9-8; 72r.h.p.; compound engines. The British cargo ship *Parkhill* was lost without trace after sailing from Blyth on November 17th, 1939, for Kirkwall. She had a crew of nine and was carrying a cargo of coal.

PARKWOOD

Constantine & Pickering S.S. Co.; 1906; Sir Raylton Dixon & Co.; 1,179 tons; 272-5x40-2x 18-1; 195n.h.p.; triple-expansion engines.

The British cargo ship *Parkwood* was wrecked in Mezen Bay on July 14th, 1915, while on a voyage from Blyth to Archangel carrying a cargo of coal.

PARMA

Italian Government; 1923; Schiffswerfte & Maschinenfabrik; 2,548 tons; 329-1 x 45 - 5 x 18-1; 317 n.h.p.; triple-expansion engines.

The steamship *Parma* was formerly the French *Villiers*, taken over by the Italians. On January 30th, 1943, she struck a mine and sank off La Goulette.

PARNAHYBA

LloydBrasileiro; 1913; Flensburger Schiffsbau Ges.; 6,692 tons; 460-5x59-1x28-8; 670n.h.p.; quadruple-expansion engines. The Brazilian steamship *Parnahyba* was torpedoed and sunk by a German submarine on May 1st, 1942, on a voyage from Rio de Janeiro to New York, with the loss of four lives.

PARRACOMBE

Stanhope Steamship Co.; 1928; W. Gray & Co.; 4,702 tons; 406-5x54-2x25-1; 476n.h.p.; 10-5 knots; triple-expansion engines.

The British steamship *Parracombe*, on a voyage from Leith to the Eastern Mediterranean, struck a mine and sank on May 2nd, 1941, off Cap Bon. There were 25 survivors, 18 of whom were interned at Bizerta.

PARRAMATTA

Australian Navy, sloop; 1939; Cockatoo Dock Co., Sydney; 1,060 tons; 266x36x7-5; 2,000s.h.p.; 16-5 knots; turbine engines; 3-drum boilers; two 4 in. guns, 1 A.A.m.g. The sloop *Parramatta*, Lt. Cdr. J. H. Walker, D.S.C., M.V.O., R.A.N., was engaged in escort duties in the Mediterranean when she was torpedoed and sunk by a German submarine on November 28th,

1941, off the Lybian port of Bardia. She sank very rapidly taking with her 140 officers and ratings out of a complement of 164. Lt. Cdr. Walker was among those killed.

PARROTT

United States Navy, destroyer; 1919; W. Cramp & Sons; 1,190 tons; 314x30x10; 26,000s.h.p.; 35 knots; turbine engines; four 4 in. guns, one 3 in., 12 T.T.

The destroyer *Parrott* was sunk in a collision off Norfolk, Virginia, on May 2nd, 1944. The vessel carried a complement of 122.

PARTENOPE

Italian Navy, minelaying gunboat; 1889; Italy; 900 tons; 245 x 27 x 12; 4,000 h.p.; 19 knots; four 14pdr. guns, 60 mines. The Italian minelaying gunboat *Partenope* was torpedoed and sunk by a submarine off Bizerta on March 24th, 1918. The gunboat's normal complement was 115.

PARTENOPE

Salvatore Bertorello; 1866; Forges & Ch. de la Mediterranee; 1,026 tons; 250-5x29-3x18-3; 152 n.h.p.; triple-expansion engines.

The Italian ship *Partenope* was wrecked on January 10th, 1920, on the eastern side of Cap Bon. She was carrying phosphates from Sfax to Genoa.

PARTHENIA

Donaldson Line; 1917; Russell & Co.; 4,872 tons; 399-7x 51-9x26-9; 488 n.h.p.; triple-expansion engines. The British steamship *Parthenia* sank after a collision with the *Robert F. Hand* about seven miles S.W. of Sanda Light, Firth of Clyde, on November 29th, 1940. She was on a voyage from Montreal to Glasgow carrying a general cargo.

PARTHENON

D. Diamantidis; 1877; Bar tram, Haswell & Co.; 1,308 tons; 239-5x32-3x22-4; compound engines.

The Greek steamship *Parthenon* left Novorossiisk on December 8th, 1902, for Cephalonia with a crew of 28 and a cargo of wheat. She was sighted off the Black Sea coast of Turkey on the 18th, but nothing more was heard of her until wreckage was washed ashore a few days later.

PARTHENON

D. A. Stathatos; 1904; R. Craggs & Sons; 2,934 tons; 330 x 47x20-4; 299 n.h.p.; triple-expansion engines. The Greek steamship *Parthenon* was torpedoed and sunk by a German submarine off the S.W. coast of Ireland on April 30th, 1917.

PARTHENON

Pithis Bros. & Co. and G. Coraikis; 1908; W. Gray & Co.; 3,189 tons; 331x47-7x22-5; 277n.h.p.; triple-expansion engines.

The Greek steamship *Parthenon* was torpedoed and sunk by a German submarine on November 3rd, 1942, on a voyage from St. John's, N.F.L., to Liverpool. Six of her crew were killed.

PARTICIPATION

Ernest De Matteis; 1890; Bar tram, Haswell & Co.; 2,438 tons; 300x39-1x19; 243 n.h.p.; triple-expansion engines. The Italian steamship *Participation* was torpedoed and sunk by a submarine in the Mediterranean on February 4th, 1918.

PARTRIDGE

British Navy, destroyer; 1916; Swan, Hunter & Wigham Richardson; 1,016 tons; 271x26x8-7; 25,000 s.h.p.; 34 knots; turbine engines; Yarrow boilers; three 4 in. guns, 4 T.T. The destroyer *Partridge* was a unit of the force based on Lerwick, Shetland Islands, for the purpose of escorting convoys to and from Scandinavia. On December 11th, 1917, the destroyer left the port in company with the destroyer *Pellew* and the armed trawlers *Livingstone*, *Commander Fuller ton*, *Lord Alverstone* and *Tokio* escorting a convoy of six ships.

At 11.45 a.m. on the 12th the convoy was S.W. of Bjorne Fjord when enemy ships were sighted to northward. After signalling the

merchant ships to scatter, ipt. Cdr. J. R. C. Cavendish of *Pellew*, commanding the convoy, went into action followed by *Partridge* and a wireless signal was sent to the commander-in-chief.

The enemy raiders, consisting of four destroyers commanded by Capt. Hans Kolbe formed in one line of three ships with a fourth detached for the purpose of sinking the merchantmen. In a very few minutes *Partridge* was hit by a shell which severed her main steam-pipe and left her helpless. Her after gun was knocked out and she was struck forward by a torpedo. Under these conditions her captain, Lt. Cdr. R. H. Ransome, gave orders to abandon ship. She was hit by two more torpedoes and sank.

The *Pellew* with only one torpedo tube working, and with her engine room badly damaged managed to keep off the enemy and to "avoid further action in a thick rain squall. She was the sole survivor of the convoy and reached Selbjorn Fjord in a very battered condition.

The losses were heavy, *Partridge* going down with five officers and 92 ratings, while three officers and 21 ratings became prisoners. *Pellew* lost three killed and several wounded. British destroyers rescued ten British and 88 Scandinavian seamen. The crew of the trawler *Lord Alverstone* (12 in all) managed to escape in one boat. The Germans claimed a total of 50 prisoners including those from *Partridge*.

PARTRIDGE

British Navy, destroyer; 1942; Fairfield Shipbuilding Co.; 1,540 tons; 345x35x9; 40,000 s.h.p.; 34 knots; turbine engines; 3-drum boilers; four 4-7 in. guns, one 3 in.A.A., two 20mm.A.A., 4 T.T.

The destroyer *Partridge*, Lt. Cdr. W. A. F. Hawkins, D.S.O., O.B.E., was torpedoed and sunk by a submarine in the Western Mediterranean on December 18th, 1942. Three officers and 35 ratings were killed and two officers wounded.

PARTRIDGE

United States Navy, minesweeper; 1919; Philadelphia Navy Yard; 840 tons; 187-5x35-5x8-5; 1,400 i.h.p.; 14 knots; triple-expansion engines; two 3 in.A.A. guns.

The United States minesweeper *Partridge* was engaged in towing pontoon runways to Omaha Beach during the Normandy landings in June, 1944. German motor torpedo boats were very active in hindering this work and on the night of the 11th the *Partridge*, which was towing a large portion of the pontoon at the time, was torpedoed by a motor torpedo boat and sank in less than a minute. Thirty-two officers and men were drowned.

PASHA

Peninsular & Oriental Steam Navigation Co.; 1842; British Isles; 592 tons; 210n.h.p.; 11 knots; direct acting engines. The paddle steamer *Pasha* left Singapore at 1 p.m. on July 21st, 1851, under command of Capt. Miller bound for Penang and Calcutta. In the Straits of Malacca, about 50 miles out from Singapore, the vessel collided with the *Erin* of the same company, commanded by Capt. Trpnsom. So violent was the collision that the *Pasha* sank in seven minutes, just after midnight. Sixteen persons were drowned.

PASS OF BALMAHA

Bulk Oil S.S. Co.; 1933; Blythswood S.B. Co.; 758 tons; 192-2x30-4x13-9; 139 n.h.p.; triple-expansion engines.

The British tanker *Pass of Balmaha*, on a voyage from Alexandria to Tobruk with petrol, was torpedoed by a submarine on October 17th, 1941. The ship blew up and sank with the loss of all on board.

PASS OF MELFORT

*Gibson & Clark; 1891; Fairfield S.B. Co.; 2,346 tons; 298 -8 x 44*24-5.*

The steel four-masted barque *Pass of Melfort*, on a voyage from Panama to Puget Sound, was wrecked in heavy weather on December 28th, 1905, at Amphitrite Point, Barclay Sound, Vancouver Island. All on board were lost.

PASUBIO

E. Milano & Co.; 1903; Akt. Ges. Neptun; 2,216 tons; 313-8 x 43-2x18-9; 180 n.h.p.; triple-expansion engines. The Italian steamship *Pasubio* was torpedoed and sunk by a British submarine on February 16th, 1943, nine miles from Punta Stilo.

PATAGONIA

Pacific Steam Navigation Co.; 1869; J. Elder & Co.; 2,878 tons; 347 x 41 x 26; 500 h.p.; triple-expansion engines. The British cargo ship *Patagonia* was wrecked near Tome, Chile, on October 2nd, 1894. She was on a voyage from Liverpool to Valparaiso carrying a general cargo.

PATELLA

Anglo-Saxon Petroleum Co.; 1909; Swan, Hunter & Wigham Richardson; 5,617 tons; 406-3x51-3x29-5; 448 n.h.p.; triple-expansion engines.

The British tanker *Patella* was wrecked one mile N. of Cape Razo, near Octavos, Portugal, on August 17th, 1921. She was on a voyage from Port Arthur to Lisbon carrying kerosene.

PATELLA

Anglo-Saxon Petroleum Co.; 1927; Palmers' Co.; 7,468 tons; 440-4x59-3x32-7; 1,200 n.h.p.; 11-5 knots; oilengines. The motor tanker *Patella*, Capt. R. M. Barber, was intercepted and sunk by a German raider on April 19th, 1942, approximately 1,200 miles E. of Rio de Janeiro. Five men were killed. Capt. Barber was taken prisoner and died in captivity.

PATHAN

Indian Navy, corvette; 1918; Workman Clark & Co.; 661 tons; 247-5x26-2x9; 3,500s.h.p.; 20 knots; turbine engines; one 4 in. gun, two 3 in.

The corvette *Pathan*, Lt. Cdr. Karl Durston, was torpedoed and sunk in the Indian Ocean by an Italian submarine on June 23rd, 1940. The vessel carried a complement of about 80, of whom Lt. Cdr. Durston and one other officer and three Indian ratings were killed, and one officer and seven Indian ratings wounded.

PATHFINDER

British Navy, light cruiser; 1904; Cammell Laird & Co.; 2,940 tons; 370x38-7x14; 17,176i.h.p.; 25-3knots; triple-expansion engines; Normand-Laird boilers; nine 4 in. guns, 2 T.T. The *Pathfinder* was one of the early 'scout' class, used in the First World War as flotilla leaders, and known by that name for the first time. The ship had a complement of 268 officers and men, under Capt. Martin Leake, commanding the 4th Destroyer Patrol. On September 5th, 1914, the ship was off St. Abb's Head when she was torpedoed by the German submarine *U-21*. She sank in four minutes with nearly all hands, Capt. Leake, who was wounded, being among the saved.

PATIA

Elders & Fyffes; 1913; Workman Clark & Co.; 6,103 tons; 417-2x53-3x30-1; 594n.h.p.; 15 knots; triple-expansion engines.

The steamship *Patia* was taken over for service as an auxiliary cruiser during the First World War. On June 13th, 1918, she was torpedoed by a German submarine in the Bristol Channel. She sank with the loss of one officer and 15 men, including eight of her mercantile crew.

The *Patia* was commanded by Capt. W. G. Howard.

PATIA

Elders & Fyffes; 1922; Cammell Laird; 5,355 tons; 400x51x30, 3,750 i.h.p.; 13-5 knots; triple-expansion engines. The steamship *Patia*, Cdr. D. M. B. Baker, R.D., serving as a fighter aircraft catapult ship, was bombed and sunk by German aircraft off Northumberland on April 27th, 1941. The vessel put up a strenuous fight and managed to bring down the bomber just before she sank. Cdr. Baker, seven officers and 31 ratings were killed.

PATRIA

Fornjade Angf.-AjB Gotha; 1915; Goteborgs Nya Varv A/B.; 1,185 tons; 213x34-2x13-1; 123n.h.p.; triple-expansion engines.

The Swedish steamship *Patria* struck a mine and sank on January 20th, 1940, off Flamborough Head, with the loss of 19 lives.

PATRIA

Cie. Generate de Nav> d Vapeur Cyp. Fabre; 1914; Forges & Chantiers de la Mediterranee; 11,885 tons; 487-2x59^2x40-1; 900n.h.p.; triple-expansion engines.

The French liner *Patria*, under British control, Capt. F. C. Halliday, was at Haifa with 1,905 illegal immigrants into Palestine awaiting transportation to a British colony and 116 Palestine Police. On November 25th, 1940, the ship was sunk by an internal explosion. Twenty-five persons are known to have been drowned and 254 others were missing.

PATRIA

KBehnke; 1901; W. Gray & Co.; 3,845 tons; 338-6x49-5x25-6; 297n.h.p.; triple-expansion engines.

The German steamship *Patria* was bombed and sunk by British aircraft on April 4th, 1943, between Stavanger and Tromsø.

PATRIA

German Government; 1939; Christiansands Mek. Verksted; 1,341 tons; 250-7x42-1x14; 122n.h.p.; triple-expansion engines.

The steamship *Patria* was a Norwegian ship, seized by the French and renamed *Ste. Christine* and later taken over by the Germans. On July 13th, 1943, she was bombed by Allied aircraft while lying in Messina harbour with a cargo of explosives. The ship blew up and the explosion caused considerable damage in the harbour.

PATRICIAN

Ellerman Line; 1947; J. L. Thompson & Sons; 3,604 tons; 373 x51x22-8; 12-5 knots; turbine engines. The steamship *Patrician*, Capt. H. Riley, collided with the American steamship *Santa Emilia*, 7,251 tons, on July 9th, 1963. The collision took place in thick fog in the Straits of Gibraltar. Thirty-four survivors were picked up by the American ship. Capt. Riley was among the drowned.

PATRICK J. HURLEY

Sinclair Refining Co.; 1941; Federal S.B. & D.D. Co.; 10,865 tons; 508-2x72-1x38; 1,178 n.h.p.; 14-2 knots; turbine engines.

The American tanker *Patrick J. Hurley*, Capt. Carl Stromgren, was shelled and sunk by a German submarine on September 12th, 1942, in lat. 22° 59'N., long. 46° 15' W., on a voyage from Aruba to Avonmouth with high octane and diesel fuel. Forty of her complement of 62 were killed.

PATRIS

Handris S.S. Co.; 1911; Swan, Hunter & Wigham Richardson; 1,706 tons; 280x37x23-6; 362 n.h.p.; triple-expansion engines.

The Maltese steamship *Patris* was bombed and sunk by German aircraft on April 6th, 1941, at Piræus, during the invasion of Greece.

PATROCLUS

Alfred Holt & Co.; 1924; Scott's Shipbuilding Co.; 11,314 tons; 499 x 62x35; 15 knots; turbine engines.

The Holt liner *Patroclus*, Capt. G. C. Wynter, was taken over by the Admiralty early in the Second World War for service as an auxiliary cruiser. On November 3rd, 1940, she was in company with the auxiliary cruiser *Laurentic* (which see) about 150 miles W. of Ireland, when the latter vessel was torpedoed by a German submarine. The *Patroclus* stood by to pick up survivors and so became a target for another attack by the submarine. She was torpedoed and sunk later in the day with the loss of 76 lives. The commander of the enemy submarine was Lt. Com. Kretschmer.

PAUL HAMILTON

U.S. War Shipping Administration; 1942; North Carolina S.B. Co.; 7,177 tons; 422-8x57x34-8; 339n.h.p.; triple-expansion engines.

The American steamship *Paul Hamilton* was torpedoed and sunk by German aircraft on April 20th, 1944, off Cape Bengut, Algeria. The ship, which was loaded with munitions for North Africa, blew up with the loss of all on board, 580 including 498 U.S. Army personnel.

PAULA

German Government; 1920; Smith's Dock Co.; 3,754 tons; 345 x 49-5 x 25; 430 n.h.p.; triple-expansion engines. The steamship *Paula* was formerly the French *P.L.M. 12*, seized by the Germans. On September 18th, 1943, she was shelled and sunk by British warships N. of Stampalia, Italy.

PAULA FAULBAUMS

German Government; 1908; Osbourne, Graham & Co.; 1855 tons; 279x40-1x18-2; 175 n.h.p.; triple-expansion engines. The Latvian ship *Paula Faulbaums* was taken over by the Germans. She went ashore and sank on October 19th, 1941, off Landsort near Stockholm.

PAVLIN VINOGRADOV

U.S.S.R.; 1929; N.V. Mch. & Scheepswrf. van P. Smit, Jr.; 2,864 tons; 310-6x45-9x22-6; 335 n.h.p.; triple-expansion engines.

The Russian ship *Pavlin Vinogradov* was on a voyage from Portland, Or. to Akutan on April 23rd, 1944, when there was an explosion and she sank in 53° 12' N., 160° 22' W. Twenty-nine of her crew of 42 got away from the ship but only nine of these were reported to have reached land.

PAVON

Compagnie de Nav. d'Orbigny; 1930; Napier & Miller; 4,128 tons; 394-5x53x22-7; 501 n.h.p.; triple-expansion engines. The French steamship *Pavon* was bombed by German aircraft, set on fire and wrecked on May 20th, 1940, near Calais.

PEACE

Clapham S.S. Co.; 1889; Blyth S.B. Co.; 1,696 tons; 258-3x36x16-9; 169 n.h.p.; triple-expansion engines. The British cargo ship *Peace* sank after a collision with the Dutch steamship *Sillak*, 2,604 tons, off the coast of Portugal on December 29th, 1895. She was on a voyage from Galatz to Liverpool carrying a cargo of wheat and maize.

PEARLMOOR

Walter Runciman & Co.; 1897; W. Doxford & Sons; 3,480 tons; 340'2x45-5x24-6; 300 n.h.p.; triple-expansion engines. The British cargo ship *Pearlmoor* struck a rock and foundered off Kuria Maria Island, in the Arabian Gulf, on November 17th, 1904. She was on a voyage from Karachi to the United Kingdom carrying a cargo of wheat.

PEARLMOOR

Moor Line; 1923; J. Readhead & Sons; 4,581 tons; 400-3x52-1x25-8; 513 n.h.p.; triple-expansion engines. The British steamship *Pearlmoor*, on a voyage from Peper to Immingham, was torpedoed and sunk by a German submarine on July 19th, 1940, about 80 miles W. of Donegal Bay, Ireland. Thirteen of her crew were lost.

PEARY

United States Navy, destroyer; 1920; W. Cramp & Sons; 314-3x30-7x13-5; 26,000s.h.p.; 35 knots; turbine engines; four 4 in. guns, 12 T.T.

The destroyer *Peary* had taken part in much of the fighting against the Japanese in the East Indies and the Philippines, sustaining some damage by bombing at the latter place. On February 19th, 1942, she was lying in Darwin harbour, North Australia, when she was bombed and sunk by Japanese dive bombers. Sixty-nine of her crew of 122 were lost.

PECOS

U.S. Navy; 1921; 7,383 tons. The naval tanker *Pecos* was bombed and sunk by Japanese aircraft on March 1st, 1942, at Tjilatjap. She had on board some 300 survivors from the U.S. seaplane tender *Langley*, sunk on February 27th. About two thirds of her total complement were lost.

PECTAN

Shell Transport & Trading Co.; 1895; W. Gray & Co.; 4,778 tons; 375-5x48x29-8; 398 n.h.p.; triple-expansion engines. The British cargo ship *Pectan* sank after a collision with the French

steamship *Druentia*, 1,233 tons, off the coast of Algeria between Cape Tenez and Cape Cherchel on August 20th, 1898. She was on a voyage from Calcutta to Hamburg with general cargo.

PECTEN

Anglo-Saxon Petroleum Co.; 1927; *Palmer's* Co.*; 7,468 tons; 440-4x59-3x32-7; 1,200 n.h.p.; 11-5 knots; oil engines. The motor tanker *Pecten*, Capt. H. E. Dale, was torpedoed and sunk by a German submarine on August 25th, 1940, about 15 miles W. of Skerryvore on the west coast of Scotland. Capt. Dale, and 48 of the crew of 57 were lost.

PEER GYNT

H. Gran Kahrs; 1915; *Laxevaags Maskin & Jernskibs.*; 1,144 tons; 228-8x35-2x15-9; 106 n.h.p.; triple-expansion engines. The Norwegian steamship *Peer Gynt* was torpedoed and sunk by a German submarine in the Bristol Channel on August 23rd, 1917.

PEGASUS

British Navy, protected cruiser; 1897; *Palmer & Co.*; 2 J 35 tons; 300x36-5x17; 7,000 i.h.p.; 21-2 knots; triple-expansion engines; Reed boilers; eight 4 in. guns, eight 3 pdr., 2 T.T. The British protected cruiser *Pegasus*, under command of Cdr. J. A. Inglis was on the Cape Station at the outbreak of the First World War. On September 20th, 1914, *Pegasus* was lying at Zanzibar undergoing repairs to her machinery. The armed tug *Helmut* was placed on guard, and on board *Pegasus* the men slept at their guns. Steam could be raised at two hours notice. At 5.25 on this morning the *Helmut* sighted the German light cruiser *Konigsberg* approaching, but was not able to warn *Pegasus*.

The *Konigsberg* opened fire at 9,000 yards, at which range the guns of the British cruiser were impotent. *Pegasus* was put out of action in eight minutes, and sank some time later. Her losses were two officers and 29 men killed and 55 wounded.

PEGASUS

G.N.Louloudis; 1920; *Furness S.B. Co.*; 5,762 tons; 391-7X 52-3x24; 569 n.h.p.; triple-expansion engines. The Greek steamship *Pegasus* was torpedoed and sunk by a German submarine on September 16th, 1941, on a voyage from Leith to Trinidad. Her crew of 29 got away in two boats but one of these capsized and 16 men were drowned.

PEGASUS

Rederi A/B Transoil; 1930; *W. Daxford & Sons*; 9,583 tons; 492-3x65x36-6; 687 n.h.p.; oil engines.

The Swedish tanker *Pegasus*, carrying 12,800 tons of motor spirit, was torpedoed by a German submarine, and caught fire and sank on July 23rd, 1943, 600 miles from Durban inward bound from Abadan.

PEGLI

I. Messina & C.; 1910; *R. Thompson & Sons*; 1,593 tons; 275-6x38x15-6; 246 n.h.p.; triple-expansion engines. The Italian steamship *Pegli* was torpedoed and sunk by a British submarine on March 14th, 1943, six miles from Cape Gallo, Sicily.

PEI HUA

Japanese Government; 1905; *Wood, Skinner & Co.*; 1,380 tons; 260X38x15-3; 156 n.h.p.; triple-expansion engines. The former Chinese steamship *Pel Hua* was bombed and sunk by U.S. land-based aircraft on March 23rd, 1945 off Nantien, China.

PEIK

H. & J. N. Jacobsen; 1896; *Nylands Vvrkstet*; 1,168 tons; 221'1x33-7x12-3; 106 n.h.p.; triple-expansion engines. The Norwegian steamship *Peik* was torpedoed and sunk by a German submarine in the North Sea on July 5th, 1915.

PEIPING

A/B Svenska Ostasiatiska Kompagni; 1931; *Gotaverken A/B*; 6,390 tons; 437-1x57x28-5; 700 n.h.p.; oil engines. The Swedish motorship *Peiping* was torpedoed and sunk by a German submarine on September 9th, 1942, on a voyage from Buenos Aires to New York.

PEKING MARU

Dairen Risen K.K.; 1937; *Mitsubishi Jukogyo K.K.*; 2,288 tons; 265-1x42x21; 206 n.h.p.; compound engines. The steamship *Peking Mam*, in service as a transport, was torpedoed and sunk by the U.S. submarine *Aspro* on July 28th, 1944, off Vigan, Philippines.

PEKING MARU

Osaka Shosen K.K.; 1914; *Osaka Iron Works*; 3,011 tons; 305-3x42-4x24-8; 288 n.h.p.; triple-expansion engines. The steamship *Peking Maru* struck a mine and sank on May 31st, 1945, off Karatsu, Japan.

PELAGIA

Eastern Seaways Corpn.; 1943; *Bethlehem Fair field Shipyard*; 7,238 tons; 422-8x57x34-8; triple-expansion engines. The American steamship *Pelagia* was swamped by heavy seas and sank on September 15th, 1956 in approximately 67° 15' N., 11° 35' E. She was carrying iron ore from Narvik to Baltimore. There were only five survivors out of a crew of 38.

PELAYO

MacAndrews & Co.; 1927; *Harland & Wolff*; 1,346 tons; 270-1x39-1x15-6; 355 n.h.p.; 12 knots; oil engines. The motor vessel *Pelayo*, Capt. R. H. Williams, was in a homeward bound convoy from Gibraltar, when on June 14th, 1942, she was torpedoed and sunk by a German submarine approximately 400 miles W.N.W. of Corunna. Sixteen men were killed and two wounded. Capt. Williams was among the survivors.

PELEUS

Nereus Steam Nav. Co.; 1928; *W. Gray & Co.*; 4,695 tons; 400-2x54-2x25-1; 476 n.h.p.; triple-expansion engines. The Greek steamship *Peleus* was torpedoed and sunk by the German submarine *U-852* on March 13th, 1944, three days out from Freetown, on a voyage from Algiers to Buenos Aires. The submarine surfaced and rammed and machine-gunned the ship's boats. One boat with three survivors and two bodies was picked up by the Portuguese motorship *Alexandre Silva* on April 20th.

PELINAION

G. K. Ktistakis; 1907; *Russell & Co.*; 4,291 tons; 385X 49-9x18-4; 384 n.h.p.; triple-expansion engines. The Greek ship *Pelinaion* went ashore on January 16th, 1940, near St. David's Head, Bermuda, and broke in two. She was carrying iron ore from Takoradi to Baltimore.

PELOTASLOIDE

Lloyd Brasileiro; 1918; *Cantieri Officine Savoia*; 5,228 tons; 395-8x51-7x27-8; 305 n.h.p.; triple-expansion engines. The Brazilian steamship *Pelotasloide* was torpedoed and sunk by a German submarine on July 4th, 1943, five miles N. of Salinas Point on a voyage from Trinidad to Pernambuco. Five of her crew were lost.

PEMEX A.

American Marine Corp.; 1943; *Barnes-Duluth S.B. Co.*; 3,401 tons; 365-9x60x —; triple-expansion engines. The Mexican tanker *Pemex A.*, on a voyage from Campeche to Coatzacoalcos, in ballast, ran aground in bad weather on January 21st, 1960, in 18° 14' N., 94° 13' W., and broke in two.

PENA CASTILLO

Cia. Santanderina de Nav.; 1899; *A. fyfc Millan & Son*; 1,718 tons; 260x37x18-2; 160 n.h.p.; triple-expansion engines. The Spanish steamship *Pena Castillo* was torpedoed and sunk by a German submarine in the Bristol Channel on August 19th, 1915.

PENANG MARU

Nippon Yusen K.K.; 1913; *Russell & Co.*; 5,214 tons; 405x 52-2x27-4; 488 n.h.p.; triple-expansion engines. The steamship *Penang Maru* was torpedoed and sunk by the U.S. submarine *Tautog* on April 9th, 1943, about 100 miles S.W. of Mindanao Island, Philippines.

PENARTH

PENARTH

Morel; 1893; *W. Gray & Co.*; 3,109 tons; 325-5x42-6x21-8; 300 h.p.; triple-expansion engines.

The British cargo ship *Penarth* was wrecked in the Black Sea, nine miles west of the Bosphorus, on February 20th, 1894. She was on a voyage from Odessa to Copenhagen carrying a cargo of rye and barley.

PENARTH

Labarroutre S.S. Co.; 1896; *W. Gray & Co.*; 3,035 tons; 325x47x23-6; 266 n.h.p.; 10 knots; triple-expansion engines. The steamship *Penarth*, Capt. Wyves, left San Nicholas, River Plate, for Hull on December 6th, 1914. She carried a crew of 27 and was loaded with maize. The voyage was normal until the steamship reached the North Sea when she encountered a violent gale with snow squalls and heavy rain. At 3.30 p.m. on Sunday, January 17th, 1915, the ship was struck by a huge wave and disabled. Two of her three boats were smashed and later she ran on the Sheringham Shoal, seven miles from shore. The crew of 27 tried to crowd in to the one remaining boat, but this capsized, drowning most of its occupants. Seven men managed to cling to the keel and were sighted by the minesweeper *Glenprosen*, Capt. S. Nicoll, at about 5 p.m. One man attempted to swim to the minesweeper but was drowned and the chief engineer died from exposure shortly after being picked up.

PENARTH

British Navy, minesweeper; 1918; *Lobnitz & Co.*; 800 tons; 231 x 28-5 x 7-5; 2,200 i.h.p.; 16 knots; triple-expansion engines; *Yarrow* boilers. The paddle minesweeper *Penarth* survived the First World War but was mined and sunk off the Yorkshire coast in the course of her duties on February 4th, 1919. Her official complement was 72.

PENDLETON

National Bulk Carriers (D. K. Ludwig); 1944; *Kaiser Co.*; 10,448 tons; 504x68-2x39-2; turbine engines. The American tanker *Pendleton* broke in two during a gale on February 18th, 1952, S. of Cape Cod. Thirty-two men were taken off the stern section just before it was driven ashore, but eight men on the bow section were lost.

PENDRECHT

Phs. Van Ommeren; 1939; *N.V. Rotterdam Droogdok Maats.*; 10,746 tons; 494-8x73-2x35-6; 633 n.h.p.; oilengines. The Dutch motorship *Pendrecht* was torpedoed and sunk by a German submarine on June 8th, 1941, about 400 miles N.W. of the Azores on a voyage from Swansea to New York. There was no loss of life.

PENELOPE

S. Paramythiotti; 1898; *W. Doxford & Sons*; 3,387 tons; 335 x 46 - 1X 24 - 1; 282 n.h.p.; triple-expansion engines. The Greek ship *Penelope* collided with the British steamship *Heathside* in dense fog and sank on January 23rd, 1929, in 39° 13' N., 9° 39' W., on a voyage from Huelva to Bordeaux.

PENELOPE

A.Lauro; 1907; *Blyth S.B. Co.*; 1,160 tons; 240-8x36x17-1; 156 n.h.p.; triple-expansion engines. The Italian steamship *Penelope* was torpedoed and sunk by a British submarine on May 19th, 1942, about three miles N.W. of Monopoli.

PENELOPE

British Navy, cruiser; 1935; *Harland & Wolff*; 5,270 tons; 500 X51X13-9; 64,000 s.h.p.; 32-25 knots; turbine engines; 3-drum boilers; six 6 in. guns, eight 4 in., two 3 pdr., 14 smaller, 6 T.T., 1 aircraft. The cruiser *Penelope*, Capt. G. D. Belben, D.S.C., A.M., was engaged in the operations off Anzio, Italy, from January 18th, 1944, to the date of her loss. The actual landing of the Fifth American Army under General Mark Clark took place at 2 a.m. on January 22nd after the naval forces had subjected the coast near Anzio to four days heavy bombardment. The supporting force, consisting of British, American, French, Dutch and Greek warships was under

command of Rear-Admiral Lowry, U.S.N., with Rear-Admiral Troubridge, R.N., in command of the British squadron. Despite the heavy shelling by the ships the German high command was uncertain about the landing and events proved that the enemy was taken by surprise, as the troops met with no serious opposition until two hours afterwards.

The *Penelope* was torpedoed and sunk by a submarine on February 18th, 1944. Twenty-four officers, including Capt. Belben, and 391 ratings out of a total complement of about 500 were killed when she foundered. The ship was famous as a unit of Force K, commanded by Capt. W. G. Agnew, and based on Malta during a period of intensive bombing. So many times was *Penelope* hit by bomb splinters and shells that she earned the nickname of H.M.S. *Pepperpot* from the holes and tears in her superstructure.

The naval losses in the Anzio landing fell on the British alone, and comprised the light cruisers *Spartan*, 5,450 tons, January 29th, 1944; *Penelope*, 5,270 tons, February 18th; destroyers *Janus*, 1,690 tons, February 19th; *Inglefield*, 1,530 tons, March 6th; *Laforey*, 1,935 tons, April 15th, and the hospital ship *St. David*, 2,702 tons, January 24th.

The loss of life was heavy, no fewer than 853 officers and men going down with the warships, and 57 with the hospital ship.

PENELOPE BARKER

U.S. War Shipping Administration; 1942; *North Carolina S.B. Co.*; 7,177 tons; 422-8x57x34-8; 339 n.h.p.; triple-expansion engines.

The steamship *Penelope Barker* was torpedoed and sunk by a German submarine on January 25th, 1944, off the North Cape. Ten of her crew and a British Naval Reserve surgeon were killed.

PENERF

Compagnie Generale Transatlantique; 1930; *Napier & Miller*; 2,151 tons; 278-6x42-6x20-7; 241 n.h.p.; triple-expansion engines.

The French steamship *Penerf* was torpedoed and sunk by an Allied submarine on April 14th, 1943, five miles E. of Antibes, with the loss of 20 lives.

PENGUIN

Union S.S. Co. of New Zealand; 1864; *Tod & McGregor*; 824 tons; 220-5x28-5x14-4; 151 n.h.p.; 10 knots; compound engines.

On the night of February 12th, 1909, the *Penguin* was in Cook Strait on a voyage from Picton to Wellington, N.Z. The weather was thick and there was a high sea running, but the waters were well known to the officers and there was no apprehension of danger until the ship suddenly struck on Tom's Rock, near Cape Terawhiti, about 15 miles from Wellington. The seas made the launching of the boats difficult and one, filled with women and children, capsized and drowned all its occupants. Many of the passengers and crew took to hastily constructed rafts, but these proved no safer than the boats.

Only 26 of the 100 persons on board were saved. The captain, who was the last to leave the ship, managed to swim to an upturned boat and to come ashore in safety.

PENHIR

Cie. Nantaise de Nav. a Vapeur; 1930; *G. Brown & Co.*; 1,147 tons; 223-1x35-1x14-2; 152 n.h.p.; triple-expansion engines. The French ship *Penhir* struck a submerged object, sprang a leak and sank on November 3rd, 1935, near Brest.

PENINSULA

H.Scholefield & Son; 1879; *J. L. Thompson & Sons*; 1,611 tons; 266-1x35-1x19-7; 160 h.p.; compound engines. The British cargo ship *Peninsula* sank after a collision near Gothland on April 25th, 1894, while on a voyage in ballast from Swine-munde to Oxelosund.

PENMARCH

Cie. Nantaise de Nav. a Vapeur; 1921; *De Haan & Oerlemans*; 987 tons; 216-4x34-6x13-3; 90 n.h.p.; triple-expansion engines. The French ship *Penmarch* was involved in a collision on July 21st, 1929, and sank 20 miles S.S.E. of St. Catherine's Point. She was on a voyage from Nantes to London.

PENNINGTON COURT

Court Line; 1924; *Richardson Duck & Co.*; 6,098 tons; 400 x 53x32-7; 425 n.h.p.; 12 knots; triple-expansion engines. The steamship *Pennington Court*, Capt. Home, was torpedoed and sunk by a German submarine in convoy in the North Atlantic on October 9th, 1942. There were no survivors. Capt. Horne was in command of the *living ton Court* when she was torpedoed in 1940.

PENNLAND

Nederlandsch-Amerikaansche Stoomv. Maats.; 1922; *Harland & Wolff*; 16,381 tons; 574-4x67-8x40-9; triple-expansion engines & turbine.

The Dutch steamship *Penmland* was bombed and sunk by German aircraft on April 25th, 1941, off Suda Bay, Crete. Four of the crew were killed but there were no casualties among the troops on board.

PENNMAR

Calmar S.S. Corp.; 1920; *Kawasaki Dkyd. Co.*; 5,868 tons; 385 - 3 X 51 • 2 X 36; 440 n.h.p.; triple-expansion engines. The American steamship *Pennmar* was torpedoed and sunk by a German submarine on September 23rd, 1942, on a voyage from Halifax to Liverpool.

PENNSYLVANIA

States S.S. Co.; 1944; *Oregon S.B. Corp.*; 7,608 tons; 439-1x 62-1x34•5; turbine engines.

The American ship *Pennsylvania*, Capt. George P. Plover, left Seattle on January 5th, 1952, for Yokohama. On January 9th, the hull cracked in heavy seas 600 miles N.W. of Cape Flattery. The crew of 45 abandoned the ship when she began to leak, but no trace of them was found by ships and aircraft which searched the area.

PENOLVER

Chellex Navigation Co.; 1912; *W. Gray & Co.*; 3,721 tons; 350x50x23-6; 336 n.h.p.; 10-5 knots; triple-expansion engines.

The steamship *Penolver*, Capt. G. H. Naish, was mined and sunk in the neighbourhood of Harbour Grace, Newfoundland, on October 19th, 1943. Twenty-four of the crew and three gunners were lost. Capt. Naish was among the survivors.

PENSILVA

Chellex Navigation Co.; 1929; *Burntisland S.B. Co.*; 4,258 tons; 370-9x51-4x25-1; 331 n.h.p.; triple-expansion engines. The British steamship *Pensilva*, on a voyage from Durban to Dunkirk with 6,985 tons of maize, was torpedoed and sunk by a German submarine on November 19th, 1939, off the Bay of Biscay.

PENSILVANIA

L. Pittaluga Vapori; 1903; *D. J. Dunlop & Co.*; 6,861 tons; 437-1x53-2x30-7; 597n.h.p.; triple-expansion engines. The Italian steamship *Pensilvania* was destroyed by naval gunfire on about March 7th, 1941, during the bombardment of Mogadiscio harbour.

PENTHAMES

African & Continental S.S. Co.; 1913; *Irvine's S.B. & D.D. Co.*; 3,995 tons; 381x51-2x24-4; 375n.h.p.; triple-expansion engines.

The British steamship *Penthames* was bombed and sunk by Insurgent aircraft on May 31st, 1938, at Valencia, during the Spanish Civil War. The ship had been damaged in a previous raid on the 22nd.

PENTHIEVRE

Compagnie Generale Transatlantique; 1922; *Anciens Chantiers Dubigeon*; 2,382 tons; 288-1x42-6x20-2; 148n.h.p.; triple-expansion engines.

The French steamship *Penthievre* was shelled and sunk by British coastal batteries on March 2nd, 1943, between Cap Gris Nez and Calais.

PENLAND RANGE

Furness, Withy & Co.; 1901; *C. Cornell & Co.*; 3,707 tons; 353-8x45x25-8; 353n.h.p.; triple-expansion engines. The British cargo ship *Pent land Range*, on a voyage from Rosario to Liverpool with maize and general cargo, ran into heavy weather soon after leaving the River Plate. On September 3rd, 1918, the grain cargo shifted, causing the ship to take a list which increased until she capsized and sank.

PENVEARN

R. B. Chellex & Co.; 1906; *W. Doxford & Sons*; 3,710 tons; 342-1x46-6x24-7; 300n.h.p.; 10 knots; triple-expansion engines.

The steamship *Penvearn* was torpedoed and sunk by a German submarine 15 miles N.W. of South Stack, Holyhead, on March 1st, 1918. Twenty-one men were killed. The captain was among the survivors.

PENYLAND

British Navy, destroyer; 1941; *Vickers Armstrongs*; 904 tons; 272-5x28-2x7-7; 19,000s.h.p.; 27-5 knots; turbine engines; 3-drum boilers; four 4 in. A.A. guns, 8 smaller. The destroyer *Penyland*, Lt. Cdr. J. H. Wallace, D.S.C., was torpedoed and sunk by a German motor torpedo boat in the English Channel on December 3rd, 1942. Two officers and 34 ratings were killed.

PENZANCE

W. J. Tillett & Co.; 1878; *Schlesinger, Davis & Co.*; 1,392 tons; 262x33•2x21•1; 179n.h.p.; compound engines. The British cargo ship *Penzance* sank after a collision off Barry Island on October 26th, 1902, while on a voyage from Barry to Brest carrying a cargo of coal.

PENZANCE

British Navy, sloop; 1930; *Devonport Dockyard*; 1,025 tons; 266x34x8; 2,000s.h.p.; 16 knots; turbine engines; 3-drum boilers; two 4 in. guns, 10 smaller.

The sloop *Penzance*, Cdr. A. J. Wavish, was torpedoed by a German submarine about 700 miles off Ireland on August 24th, 1940. The steamship *Blairmore*, 4,141 tons, stopped and picked up eight men, all of whom were injured, and was herself torpedoed immediately afterwards. She managed to launch her boats and to save the eight naval men and 29 of her own crew. The survivors in two boats were adrift for 17 hours, when they were picked up by the Swedish steamship *Eknaren* which landed them at Baltimore on September 5th.

Of *Penzance's* complement Cdr. Wavish, five officers and 84 ratings were lost.

PEONY

W. Deacon; 1852; *Sunderland*; 386 tons; 116-7x26-1x16-9. The Australian barque *Peony* sprang a leak in March, 1877, and foundered near the Richmond River, N.S.W. Five of her crew often were drowned.

PEPPINO PALOMBA

G. Palomba fu M.; 1897; *R. Craggs & Sons*; 2,034 tons; 280-3X40-5X17-6'; 176n.h.p.; triple-expansion engines. The Italian steamship *Peppino Palomba* was torpedoed and sunk by a British submarine on May 8th, 1943, near Santa Maura Island, Greece.

PERA

W. Ross; 1855; *C. J. Mare & Co.*; 2,119 tons; 303-5x42-1x 27-1; 450 h.p.; compound engines.

The steamship *Pera* struck an iceberg and foundered 32 miles S.W. of Cape Race on June 10th, 1882.

PERCY BIRDSALL

P. Scheurman; 1890; *Jackson, Sharp & Co.*; 1,128 tons; 191 x 39x17-6.

The American sailing ship *Percy Birdsall* was sunk by a German submarine in the Bay of Biscay on April 22nd, 1917.

PERE MARQUETTE 5

PERE MARQUETTE 5

Anzac S.S. Co.; 1890; F. W. Wheeler & Co.; 1,825 tons; 226x38x24-2; 158 n.h.p.; triple-expansion engines. The Canadian ship *Pere Marquette 5* foundered on March 10th, 1917, off Cape Cod. She was on a voyage from St. John's, N.F.L., to New York with wood pulp and cured fish.

PEREGRINE

General Steam Navigation Co.; 1892; W. B. Thompson & Co.; 1,681 tons; 280x37-7x16-2; 455n.h.p.; triple-expansion engines.

The British steamship *Peregrine* was wrecked on Longsand on December 29th, 1917, while on a voyage from Rotterdam to London. She was carrying passengers and a general cargo.

PEREKOP

U.S.S.R.; 1922; Forth S.B. & E. Co.; 2,493 tons; 295-7X 43-6x20-6; 182n.h.p.; triple-expansion engines. The Russian steamship *Perekop* was bombed and sunk by Japanese aircraft on December 18th, 1941, E. of Natunas Island, Malay Archipelago, with the loss of eight lives.

PERESVYET

Russian Navy, 1st class battleship; 1898; Baltic Works; 12,674 tons; 401-2x71-7x26; 13,775 i.h.p.; 18-6 knots; triple-expansion engines; four 10 in. guns, eleven 6 in., two 2-5 in., twenty 12pdr., twenty 3 pdr., 8 m.g., 6 T.T.

The battleship *Peresvyet* was the flagship of Rear-Admiral Prince Ukhtomsky, second in command of the Pacific Squadron based on Port Arthur. In February, 1904, the diplomatic relations of Russia and Japan were almost at breaking point. War had for long been regarded as inevitable by both countries, and the Russians had gradually built up a formidable fleet in the Far East, the greater part of which lay at Port Arthur. Seven battleships, seven cruisers, 25 destroyers and 16 gunboats and auxiliary vessels, all of the most modern construction and many fresh from dockyard hands, composed the Pacific Squadron. At Vladivostok were three large armoured cruisers and one light cruiser, together with 17 torpedo boats.

On the night of February 8th, 1904, Vice-Admiral Stark, Commander-in-Chief of the Pacific Squadron, had stationed the cruiser *Pallada* at the entrance to Port Arthur to sweep the channels with her searchlights. He also detailed two destroyers to patrol off shore. During the night a sudden attack by Japanese torpedo craft cost him the battleships *Retvizan* and *Tsarvitch* and the cruiser *Pallada*. A full account of this action will be found under the *Retvizan*.

On August 10th, it was decided to move the squadron to Vladivostok. The Japanese investing army was making the anchorage extremely dangerous for ships, and the need for a safer harbour was imperative. Again the unlucky Pacific Squadron was at a disadvantage as some of the ships had been damaged by Japanese gunfire, and one 12 in. and ten 6 in. guns were disabled. The battleship *Retvizan* in particular had been struck seven times and had a large hole beneath the waterline.

In the engagement that ensued the battleship *Tsarvitch*, flagship of Rear-Admiral Vitgeft, Commander-in-Chief, was struck twice in quick succession by 12 in. shells, which exploded on her bridge. Admiral Vitgeft and many senior officers were killed and others wounded. The flagship was temporarily out of control owing to all those on the bridge becoming casualties, and there was great confusion throughout the fleet. Eventually order was restored, but the squadron turned about and made for Port Arthur, with the exception of the *Tsarvitch*, the cruisers *Askold* and *Diana* and four destroyers. These ships did not remain at large for long and were soon interned at Shanghai, Kiao-chao and Saigon. The story of the battle of the Yellow Sea, as this engagement was called, is told under the *Novik*.

In this battle the *Peresvyet* sustained 39 hits and severe damage to her hull. Her central engine room was struck and the engine put out of action for half an hour, but as she possessed three separate engines, each driving its own propeller, this did not compel the ship to stop.

On the death of Admiral Vitgeft those on board the *Tsarvitch* made the signal to the *Peresvyet*, "Admiral transfers command", whereupon Rear-Admiral Prince Ukhtomsky took over the fleet.

He was severely handicapped by the fact that the *Peresvyet* had both her topmasts shot away and all signals had to be flown from her bridge rails, where they were frequently obscured by smoke.

The casualties on board the ship were the highest in the squadron, she having one officer and 12 men killed, and nine officers and 68 men wounded.

With the failure of the dash for Vladivostok the Russian naval command resigned all initiative to the Japanese. During the next five months the fleet was gradually battered to pieces at its anchorage. In December five of the six battleships remaining, one large cruiser and many smaller ships were totally destroyed. All these vessels, save the *Peresvyet*, were sunk by Japanese gunfire. On December 7th it was decided that the latter possessed no further fighting value and she was scuttled in shallow water by her crew, being submerged to her upper deck.

Some idea of the magnitude of the disaster which had overtaken the Russian Pacific Squadron may be gathered from the following table of losses.

BATTLESHIPS	
<i>Petropavlovsk</i> (flagship)	Mined and sunk. Admiral Makharoff lost
<i>Tsarvitch</i>	Interned, Kiao-chao, Admiral Vitgeft killed
<i>Poltava</i> ...	Blown-up by gunfire
<i>Retvizan</i>	Sunk by gunfire
<i>Pobieda</i> ...	" " " "
<i>Peresvyet</i>	Scuttled after severe damage
<i>Sevastopol</i>	" " " "
CRUISERS	
<i>Varyag</i> ...	Sunk by gunfire, Chemulpo
<i>Pallada</i> ...	" " " "
<i>Bayan</i> ...	" " " "
<i>Boyarin</i> ...	Mined and wrecked
<i>Askold</i> ...	Interned at Shanghai
<i>Diana</i>	" " Saigon
<i>Novik</i> ...	Scuttled by her crew after action.
MINELAYERS	
<i>Yenisei</i> ...	Blown up by own mines.
<i>Amur</i> ...	Sunk by gunfire

In addition to the above there were ten gunboats, 25 destroyers and four torpedo boats sunk, mined or interned.

PERFECT

Skibs-A/S Rauer; 1877; Russell & Co.; 1,088 tons; 211-3x 34x21-1.

The Norwegian sailing ship *Perfect* was shelled and sunk by a German submarine in the North Sea on June 14th, 1917.

PERGAMON

1943; 2,998 tons.

The German ship *Pergamon* was bombed and sunk by British aircraft on January 25th, 1945, off Christiansund.

PERICLES

G. Thompson & Co.; 1908; Harland & Wolff; 10,925 tons; 500-6x62-3x31-1; 1,075 n.h.p.; 15 knots; quadruple-expansion engines. The liner *Pericles*, Capt. A. Simpson, was on a voyage from Brisbane to London when, on March 31st, 1910, she struck on a reef off Cape Leeuwin, West Australia. The sea was calm and the sky clear when she stranded, there being very little shock. Her bottom was badly injured from bow to midships and she soon began to settle, an attempt to beach her failing through the flooding of the engine room. The passengers and crew were landed in the vicinity of the lighthouse at Cape Leeuwin with no loss of life.

PERICLES

D/S A/S Eikland; 1936; Gdtaverken A/B; 8,324 tons; 463-7X 59-2x35-9; 653 n.h.p.; oilengines.

The Norwegian tanker *Pericles* was torpedoed by a German submarine, and broke in two and sank on March 26th, 1941, near Crete.

PERIM

Ellerman Lines; 1877; *London & Glasgow Co.*; 1,348 tons; 241'3x32-6x22-7; 118 n.h.p.; *compound engines*. The British cargo ship *Perim* sank after a collision off Tarragona on October 20th, 1917. She was on a voyage from Manchester to Marseilles carrying a general cargo which included oilcake,

PERITIA

J.Jost; 1908; *Eiderwerft*; 2,117 tons; 274-8x40-6x15-9; 139 n.h.p.; *triple-expansion engines*. The German ship *Peritia* left Riga on September 5th, 1924, for Dordrecht with a cargo of timber but was not heard of after she had been in wireless communication on September 6th.

PERKINS

United States Navy, destroyer; 1935; *Puget Sound Navy Yard*; 1,456 tons; 341-3x34*7x9-7; 42,000 s.h.p.; 36-5 knots; *turbine engines*; *Express boilers*; five 5 in. guns, 5 m.g., 12 T.T. The United States destroyer *Perkins* was sunk in a collision off the north coast of New Guinea on November 29th, 1943. The destroyer carried a complement of about 200.

PERLA

Lloyd Triestino; 1926; *Clyde S.B. & E. Co.*; 5,741 tons; 400-6x54x28-7; 468 n.h.p.; *triple-expansion engines*. The Italian steamship *Per la* was torpedoed and sunk by British aircraft on January 7th, 1942, about 20 miles S. of Pantellaria.

PERM

Det Forenede Dampskibs Selskab; 1883; *Burmeister & Wain*; 1,112 tons; 236-4x30-1x14-9; 217 n.h.p.; *compound engines*. The Danish steamship *Perm* was torpedoed and sunk by a German submarine in the English Channel on November 28th, 1917.

PERONNE

Cie. Fran false de Marine et de Commerce; 1882; *Sunderland S.B. Co.*; 3,342 tons; 320 x42-4x28; 316 n.h.p.; *compound engines*. The French steamship *Peronne* was torpedoed and sunk by a German submarine in the English Channel on September 1st, 1917.

PERSEO

Societa Italiana di Servizi Marittimi; 1883; *R. Napier & Sons*; 3,935 tons; 380-6x42x24-9; 750 n.h.p.; *triple-expansion engines*. The Italian steamship *Perseo* was torpedoed and sunk by a submarine in the Mediterranean on May 4th, 1917.

PERSEO

Societa Ligure di Armamento; 1921; *Cantieri Navali Riuniti*; 4,857 tons; 394-2x52x27-6; 339 n.h.p.; *triple-expansion engines*. The Italian steamship *Perseo* was torpedoed and sunk by a British submarine on August 18th, 1942, off Cape Carbonara.

PERSEO

Italian Navy, torpedo boat; 1935; *Quarnaro*; 642 tons; 269 x 27x7; 19,000 s.h.p.; 34 knots; *turbine engines*; 3-drum boilers; three 3-9 in. guns, four 37 mm.A.A. two 13 mm.A.A., 4 T.T. The torpedo boat *Perseo* was brought to action by the British destroyer *Nubian* off Kelibia, Cape Bon, on May 4th, 1943, and was sunk by gunfire and torpedo. She carried a complement of about 100.

PERSEPHONE

Panama Transport Co.; 1925; *Fried. Krupp A.G.*; 8,426 tons; 468-7x63-2x35-2; 905 n.h.p.; *oilengines*. The Panamanian motorship *Persephone* was torpedoed and sunk by a German submarine on May 25th, 1942, on a voyage from Aruba to New York. Nine of her crew were killed.

PERSEUS

A.Andreatos; 1918; *Harland & Wolff*; 5,172 tons; 400-4 x 52-3x28-4; 518 n.h.p.; *triple-expansion engines*. The Greek steamship *Perseus* was shelled and sunk by a German cruiser on February 12th, 1941, E. of the Azores. The captain and 13 of her crew were killed.

PERSEUS

China Mutual S.N. Co.; 1923; *Caledon Shipbuilding & Engineering Co.*; 10,286 tons; 490-5x62-3x39-6; 14 knots; *turbine engines*. The liner *Perseus*, Capt. G. G. Rundle, was torpedoed and sunk by a submarine on January 16th, 1944, in the neighbourhood of Pondicherry in the Bay of Bengal. There were no casualties among passengers and crew.

PERSEVERANCE

British Navy, troopship; 1,967 tons; 360 n.h.p.; *steam engines*; 2 guns. The troopship *Perseverance*, Cdr. C. R. Power, was wrecked off Mayo, Cape Verde Islands, on October 21st, 1860. There was no loss of life.

PERSIA

Peninsular & Oriental Steam Navigation Co.; 1900; *J. Caird & Co.*; 7,974 tons; 499-8x54-3x24-5; 1,355 n.h.p.; 18 knots; *triple-expansion engines*.

The liner *Persia*, Cdr. W. H. S. Hall, R.N.R., which left London on December 18th, 1915, and Marseilles on the 26th, was 71 miles S.E. by S. of Cape Martello, Crete, on the 30th, when she was torpedoed without warning by the *U-38*, Lt. Cdr. Max Valentiner*. The attack occurred at 1.10 p.m. the vessel being struck on the port bow, and five minutes later the port boiler blew up. She sank in a very short time and 334 of the 501 persons on board were drowned, including Cdr. Hall. Two of her boats were drawn down when she foundered taking all their occupants with them, but four got away in safety. One hundred and sixty seven survivors were picked up, most of them by a trawler 30 hours later, and were landed at Alexandria.

PERSIAN

Ellerman Lines; 1892; *Sir Raylton Dixon & Co.*; 2,734 tons; 309-5x40-5x17-5; 283 n.h.p.; *triple-expansion engines*. The British cargo ship *Persian* sank after a collision in 36° 03' N., 20° 36' E., on July 4th, 1916, while on a voyage from Calcutta to the Clyde, via London, carrying a general cargo.

PERSIANO

G. M. Barbagelata; 1889; *Armstrong, Mitchell & Co.*; 2,474 tons; 304-9x37-8x20-2; 234 n.h.p.; *triple-expansion engines*. The Italian steamship *Persiano* was torpedoed and sunk by a British submarine on April 12th, 1941, 30 miles N.W. of Tripoli,

PERSIER

Compagnie Maritime Beige (Lloyd Royal); 1918; *Northumber* land S.B. Co.*; 5,382 tons; 400-2x52-3x28-5; 517 n.h.p.; *triple-expansion engines*.

The Belgian steamship *Persier* was torpedoed and sunk by a German submarine on February 1st, 1945, four miles from the Eddystone Light on a voyage from Cardiff to Antwerp. Twenty of her crew were lost.

PERTH

Ince Bank Shipping Co.; 1882; *Murdoch & Murray*; 653 tons; 184-1x27x14-1; 80 r.h.p.; *compound engines*. The British ship *Perth* was torpedoed and sunk by a German submarine one mile S.E. by E. of the Cross Sand Lightship on April 1st, 1916. Six of the crew were killed.

PERTH

Australian Navy, cruiser; 1934; *Portsmouth Dockyard*; 6>9SQ tons; 555x56-7x15-7; 72,000s.h.p.; 32-5 knots; *turbine engines*; 3-drum boilers; eight 6 in. guns, eight 4 in., four 3 pdr., 10 smaller, 8 T.T., 1 aircraft.

On February 27th, 1942, the Australian cruiser *Perth*, which was under command of Capt. H. M. L. Waller, D.S.O.* R.A.N., formed part of a force under Rear-Admiral K. Doorman of the Royal Netherlands Navy engaged in resisting a Japanese landing in Java. The squadron consisted of the two Dutch cruisers *De Ruyter* (flagship) and *Java*, of 6,450 and 6,670 tons respectively and armed with 5-9 in. guns; the U.S. cruiser *Houston*, 9,050 tons, nine 8 in. guns; the British cruiser *Exeter*, 8,390 tons, six 8 in. guns, and *Perth*, as well as the Dutch destroyer *Kortenaer*, 1,310 tons, and the British

PERUVIAN

destroyers *Electra* and *Encounter*, both of 1,375 tons, and *Jupiter*, 1,690 tons.

The action commenced at 4 o'clock in the afternoon, the Japanese force consisting of two 10,000-ton 8 in. gun cruisers of the *Nai* class, several light cruisers and about a dozen destroyers. *Perth* survived the first phase of the action in which the two Dutch cruisers and one Dutch and two British destroyers were sunk and *Exeter* badly damaged.

On the 28th *Perth* reached Tandjong Priok where she met the *Houston* which had also escaped. Both ships refuelled and left again in the evening accompanied by the Dutch destroyer *Evertsen*, 1,310 tons, but fell in with a strong Japanese force in bright moonlight in the Sunda Strait. A message received by a shore station at 11.30 p.m. on the 28th saying that battle was about to be joined was the last heard of the ships. Every Allied unit taking part in the action, afterwards known as the battle of the Java Sea, was sunk, the loss of life being exceedingly heavy.

The *Perth* carried a complement of 676 of whom 359 were killed, including Capt. Waller, and 317 became prisoners of war. Of the latter 215 were repatriated and 102 died in captivity.

For the full story of the battle see *De Ruyter*, flagship of Rear-Admiral Doorman.

PERUVIAN

Pitkethly & Co.; 1841; *Arbroath*; 304 tons; 140 (approx.)x —x—. The barque *Peruvian* left Sydney, N.S.W., for China on February 24th, 1846. She carried a crew of 21, and a short time after leaving port was wrecked on the Bellona Reefs, Coral Sea. Seven men managed to reach land on a raft after being 42 days adrift. They found themselves on a lonely part of the coast of Queensland, but managed to get into touch with the natives who treated them with great kindness.

During the next few years six of them died, but a young seaman, James Murrells, lived with the natives for 17 years. Eventually he fell in with some Australian settlers near Port Denison. These men brought him to Brisbane.

PESHAWUR

Peninsular & Oriental Steam Navigation Co.; 1905; *Barclay, Curie & Co.*; 7,634 tons; 479-5x57-3x32-7'; 500 n.h.p.; 14 knots; triple-expansion engines.

The P. & O. liner *Peshawur* was bound from Sydney, N.S., to Britain and had dispersed with the rest of her convoy off Tor Head, Ireland, at 4 a.m. on October 9th, 1917. In company with three other vessels the ship was hugging the Irish coast on Admiralty instructions when she was torpedoed seven miles S.E. of Ballyquintin Point, Co. Down. The torpedo struck on the port side, blowing away one lifeboat and flooding the engine room. Boats were swung out and lowered and all hands stood by as it might be possible to save the ship. After some time the captain decided to get the boats away for fear of a second torpedo from the submarine. This was done in the nick of time, another torpedo striking the ship on the starboard side forward of the bridge.

The *Peshawur* carried a crew of 125, of whom 11 lost their lives. The survivors were picked up by the patrol yacht *Albion HI* and taken to Belfast.

PESHTWA

Asiatic S.N. Co.; 1880; *Harland & Wolff*; 2,159 tons; 336x34-7x23-6; 188 h.p.; compound engines.

The British steamship *Peshwa* was wrecked on June 26th, 1890, north of False Point while on a voyage from Rangoon to Calcutta.

PESTEL

U.S.S.R.; 1890; *Hawthorn, Leslie & Co.*; 1,850 tons; 298-2x37x25; 457 n.h.p.; triple expansion engines. The Russian steamship *Pestel* was torpedoed by a German submarine and bombed and sunk by aircraft on June 19th, 1944, soon after leaving Trabzon for Batum. A few survivors were picked up by a Russian warship.

PETAR

Parobrodarsko drustvo Marovic s.o.j.; 1910; *Schpw. v. Jan Smit, Cz.*; 1,808 tons; 256-5x39x18-7; 183n.h.p.; triple-expansion engines. The Yugoslav ship *Petar*, outward bound from Demerara with

bauxite, was in collision on March 8th, 1942, with a U.S. navy tanker and sank in 10° 34'N., 59° 10'W. Eighteen of her crew were lost and seven saved.

PETAR ZORANIC

Yugoslav Government; 1960; *Brodogradiliste HI Maj*; 17,830 tons; 631 -1x82'3x32'4; turbine engines. The tanker *Petar Zoranic*, on a voyage from Tuapse to Hamburg with benzine and petrol, collided with the Greek tanker *World Harmony* on December 14th, 1960, in the Bosphorus. Both ships caught fire and drifted on to the Turkish steamship *Tarsus*, anchored near Istinye. All three ships were destroyed, the *Petar Zoranic* breaking in two after several internal explosions. Altogether 52 lives were lost among the three ships, and many persons badly burned.

PETER

German Government; 1921; *Smith's Dock Co.*; 3,754 tons; 345x49-5x25; 430 n.h.p.; triple-expansion engines. The steamship *Peter* was formerly the French *P.L.M. 16*, seized by the Germans and renamed *Elbe*, later changed to *Peter*. On February 19th, 1944, she was torpedoed by a British submarine 20 miles N.N.W. of Skiathos Island, Greece, but was able to make the port of Volo. After repairs she sailed from Volo on September 22nd. Soon after leaving port she was again torpedoed, five miles N. of Skiathos Island, and sank.

PETER BORNHOFEN

R. Bornhofen; 1919; *Van der Giessen & Zonen*; 1,349 tons; 239-1x36x16-5; 127n.h.p.; triple-expansion engines. The German steamship *Peter Bornhofen* was bombed and sunk by British aircraft on August 17th, 1944, at Kirkenes, Norway.

PETERHAMRE

S. Tonnesen; 1899; *Laxevaags Maskin & Jernskibbyggeri*; 1,080 tons; 234-3x32-2x13-6; 97n.h.p.; triple-expansion engines.

The Norwegian steamship *Peter Hamre* was torpedoed and sunk by a German submarine in the North Sea on April 1st, 1916.

PETER MCERSK

Ministry of War Transport (Moss Hutchison Line); 1932; *O dense Staalskibsvaerft*; 5,476 tons; 441-4x57x25-8; 983 n.h.p.; oil engines.

The former Danish motorship *Peter Mcersk*, on a voyage from Liverpool to Alexandria via the Cape, was torpedoed and sunk by a German submarine on December 7th, 1942, about 600 miles E. by N. of the Azores. All on board were lost, 48 crew, eight gunners and 11 passengers.

PETERMELNIKOFF

M.A. Mejakoff; 1875; *R. Thompson, jun.*; 1,265 tons; 223-4 X 30-1x17; 115 n.h.p.; compound engines.

The Russian steamship *Peter Melnikoff* was sunk by a submarine in the Black Sea on August 1st, 1915.

PETERSILVESTER

U.S. War Shipping Administration; 1942; *California S.B. Corp.*; 7,176 tons; 422-8x57x34-8; 339n.h.p.; triple-expansion engines.

The steamship *Peter Silvester* was torpedoed by a Japanese submarine and broke in two and sank on February 6th, 1945, about 700 miles W. of Fremantle. Fifty lives were lost of her complement of 175, which included 107 soldiers.

PETERSTUART

T. Stephens & Sons; 1868; *A. McMiHan & Son*; 1,490 tons; 234x38-9x23.

The iron sailing ship *Peter Stuart*, Capt. H. Hughes, was wrecked near Yarmouth, Nova Scotia, on July 3rd, 1892. Thirteen persons were drowned, including the captain's wife and child.

PETERSHAM

Watts, Watts & Co.; 1899; *Richardson, Duck & Co.*; 3,381 tons; 339x46-1x24-7; 299n.h.p.; triple-expansion engines. The British cargo ship *Petersham* sank after a collision ten miles off Trevose Head on May 5th, 1918. She was on a voyage from Bilbao to the Clyde carrying a cargo of iron ore.

PETERTON

R. Chapman & Son; 1919; Richardson, Duck & Co.; 5,221 tons; 400-1X 52 - 4 x 28 - 4; 397 n.h.p.; triple-expansion engines. The British steamship *Peterton*, on a voyage from London to Buenos Aires, was torpedoed and sunk by a German submarine on September 17th, 1942, about 300 miles N.W. of St. Vincent, C.V. Eight of her crew were killed on board and one died in hospital. The captain was taken prisoner.

PETRARCA

Tirrenia Soc. Anon, di Nav.; 1910; Clyde S.B. & E. Co.; 3,329 tons; 356-4x43-6x22-8; 372n.h.p.; triple-expansion engines. The Italian steamship *Petrarca* was torpedoed and sunk by a British submarine on February 15th, 1943, off Punta Vergadoro.

PETREL

General Steam Navigation Co.; 1920; Ailsa Shipbuilding Co.; 1,354 tons; 250x37-2x14; 258n.h.p.; 12 knots; triple-expansion engines.

The steamship *Petrel*, Capt. Klemp, was in convoy in the North Atlantic when she was torpedoed and sunk by a German submarine on September 26th, 1941. Twenty-two persons were killed. Capt. Klemp was among the survivors. The *Lapwing* of the G.S.N. company was also sunk by submarine attack on the same occasion.

PEIRITZIS

E. Peiritzis fils; 1905; J. L. Thompson & Sons; 3,692 tons; 346-6x50-8x23; 321 n.h.p.; triple-expansion engines. The Greek steamship *Peiritzis* was torpedoed and sunk by a German submarine in the Bay of Biscay on June 25th, 1917.

PETROLEA

Petroleum Shipping Co.; 1890; Craig, Taylor & Co.; 2,331 tons; 292-5x37-1x18-5; 250 h.p.; triple-expansion engines. The steamship *Petrolea*, with a cargo of petroleum, was struck by lightning and blew up in Blaye harbour, near Bordeaux, on June 14th, 1892, with the loss of 11 lives.

PETROLITE

Standard Oil Co. (New Jersey); 1894; Akt. Gesellschaft "Vulcan" 3,710 tons; 339-2x43-7x29-5; 287 n.h.p.; triple-expansion engines.

The American tanker *Petrolite* was torpedoed and sunk by a German submarine W. of Gibraltar on June 10th, 1917.

PETRONELLA

Nederlandsch Indische Tankstoomb. Maats.; 1927; Harland & Wolff; 2,770 tons; 305-3x50-2x15-1; 452 n.h.p.; oilengines.

The Dutch tanker *Petronella* struck a mine and sank on October 15th, 1944, on a voyage from Alexandria to Piraeus. Eighteen of her crew and five passengers were killed.

PETROPAVLOVSK

Russian Navy, 1st class battleship; 1894; Gelernii Island; 11,354 tons; 367-5x69x26; 11,213 i.h.p.; 16-9 knots; triple-expansion engines; four 12 in. guns, twelve 5-9 in., two 2-5 in., ten 3pdr., 28 m.g., 6 T.T.

At the outbreak of the Russo-Japanese War, in February 1904, the Russian battleship *Petropavlovsk* was flagship of the Pacific Squadron, based on Port Arthur. The torpedo attacks with which the Japanese initiated their offensive shook the morale of the Russian sailors and, in an attempt to restore confidence, Vice-Admiral S. O. Makharoff took over the command of the fleet.

This officer was one of the foremost naval leaders of the day. He had served in the Russo-Turkish War and had rendered distinguished service, particularly in leading a night attack upon the harbour of Batoum, where he torpedoed several Turkish ships. He was an inventor, a noted hydrographer, a torpedo expert, and a born leader and organiser.

Two days after assuming command Admiral Makharoff in the light cruiser *Novik*, accompanied by the light cruiser *Askold*, and a destroyer flotilla, engaged enemy light forces, retiring only when Admiral Togo, the Japanese commander-in-chief, ordered up a division of heavy ships.

The Japanese laid mines across the entrance to the harbour and on April 13th a decoy flotilla of destroyers was sent close inshore. A Russian squadron, led by Admiral Makharoff in the battleship *Petropavlovsk*, came out to drive them off, and later Japanese heavy units appeared.

After an engagement lasting for about an hour, Admiral Makharoff drew off his ships, but at 10.32 a.m., when almost in harbour, the *Petropavlovsk* struck a mine and blew up and sank. Admiral Makharoff and more than 600 officers and men were lost. Seven officers and 73 men were rescued by the ships of the squadron.

PETSAMO

SuomenKalastusOly; 1907; W. Beardmore & Co.; 4,596 tons; 406-7x50x25-7; 463 n.h.p.; triple-expansion engines. The Finnish steamship *Petsamo* was torpedoed and sunk by a German submarine on July 10th, 1940, about 22 miles off the Fastnet Light.

PETSHENGA

1,647 tons. The Russian steamship *Petshenga* struck a mine and sank in the North Sea on February 27th, 1916.

PEUCETA

A.Lauro; 1902; Craig, Taylor & Co.; 1,926 tons; 291-9x39-3x12-8; 265 n.h.p.; triple-expansion engines. The Italian steamship *Peuceta* was torpedoed and sunk by British aircraft on December 21st, 1940, E. of the Kerkenna Islands, Tunisia.

PHARE

Gas Light & Coke Co.; 1906; Blyth Shipbuilding Co.; 1,282 tons; 234-6x34-5x15-1; 166 n.h.p.; 8-5 knots; triple-expansion engines. The steamship *Phare* was torpedoed and sunk by a German submarine two and a half miles N. % E. of Scarborough on October 31st, 1917. Fourteen men were killed. The captain was among the survivors.

PHEASANT

British Navy, destroyer; 1916; Fairfield Co.; 1,025 tons; 276x26-7x8-7; 25,000 s.h.p.; 34 knots; turbine engines; Yarrow boilers; three 4 in. guns, one 2pdr., 1 m.g., 4 T.T. The destroyer *Pheasant* struck a mine and sank off the Orkney Islands on March 1st, 1917. At the time of her loss she was carrying a complement of about 100.

PHEMIUS

Ocean S.S. Co.; 1921; Scotts S.B. & E. Co.; 7,406 tons; 459-1x56-2x32-5; 6,000 s.h.p.; 14-5 knots; turbine engines. The liner *Phemius*, Capt. J. L. W. Johnston, was torpedoed and sunk by a German submarine on December 19th, 1943, about 100 miles S. of Accra, on the Gold Coast. Five of the crew and 18 passengers were killed. Capt. Johnston was among the survivors.

PHIDIAS

Lampart & Holt; 1913; A. McMillan & Son; 5,623 tons; 415-5x56x28-1; 480 n.h.p.; 11 knots; triple-expansion engines. The cargo liner *Phidias*, Capt. E. Parks, was in the North Atlantic on June 8th, 1941, when she was intercepted by a German submarine. The enemy commenced firing from the surface and later discharged a torpedo which sank the vessel. Eight of her complement of 51 were lost.

PHILADELPHIA

Joh. Wallenstein; 1892; J. C. Tecklenborg; 1,805 tons; 255 X 38-9x23.

The German steel full-rigged ship *Philadelphia*, Capt. J. Wachter, left Newcastle, N.S.W., for Callao on August 27th, 1898, with a cargo of 2,700 tons of coal. This was the last that was heard of her until October 5th, when spars and wreckage were washed ashore at Orepuki, Foveaux Strait. Some of this wreckage bore the ship's name, and later more was found at Stewart Island.

It was assumed that the loss of the *Philadelphia* was due to stress of weather.

PHILIPP M.

PHILIPP M.

Hudson Steamship Co.; 1942; *Burntisland S.B. Co.*; 2,085 tons; 264-5x39-9x23-3; 220 n.h.p.; 9-5 knots; triple-expansion engines.

The steamship *Philipp M.*, Capt. M. Hunter, was torpedoed and sunk by a German motor torpedo boat near Hearty Knoll Buoy, off Great Yarmouth, on February 24th, 1944. Capt. Hunter and six of the crew were killed.

PHOEBE

Cie. Francaise des Chemins de Per de Paris-Orleans; 1912; *Ateliers & Chantiers de France*; 3,956 tons; 350x48-9x22-5; 332 n.h.p.; triple-expansion engines.

The French steamship *Phoebe* was sunk by a German submarine off Ushant on August 15th, 1917.

The ship had previously been sunk after striking a mine on January 20th, 1917, near Brest, raised and repaired.

PHOEBUS

Soc. Anon. Ilva; 1894; *Hawthorn, Leslie & Co.*; 3,133 tons; 324-5x42-1x19-6; 271 n.h.p.; triple-expansion engines. The Italian steamship *Phoebus* was torpedoed and sunk by a German submarine in the Atlantic on July 1st, 1917.

PHOENIX

British Navy, sloop; 187-; *Great Britain*; 1,130 tons; 170 x 36x14-5; 1,130 i.h.p.; 12 knots; compound engines; two 7 in. m.l.r. guns, four 64 pdrs.

The sloop *Phoenix*, Cdr. H. H. Grenfell, was serving on the North American Station in 1882. On September 12th she was wrecked on Prince Edward Island, Canada. There was no loss of life.

PHOENIX

British Navy, destroyer; 1911; *Vickers*; 765 tons; 246x25x9; 16,000 i.h.p.; 28 knots; turbine engines; Yarrow boilers; two 4 in. guns, two 12 pdr., 2 T.T.

In May, 1918, the German submarines in the Mediterranean were very active, as it was imperative to intercept the flow of Allied reinforcements from Alexandria to France, the German offensive being then in full flood. The destroyer *Phoenix* was employed in carrying on the fight against the submarines and it was whilst engaged in this duty that she was torpedoed and sunk on May 14th, 1918.

The *Phoenix* carried a complement of 72.

PHOSPHOR

J. M. Lennard & Sons; 1889; *Armstrong, Mitchell & Co.*; 2,071 tons; 270x37-7x25-9; 181 n.h.p.; triple-expansion engines.

The British tanker *Phosphor* sank after a collision in 49° N., 5° W., on July 13th, 1904, while on a voyage in ballast from Middlesbrough to Ibrail.

PHRYNE

Societe Navale Caennaise; 1938; *Chantiers & Ateliers de St. Nazaire*; 2,660 tons; 306x43-5x21-2; 225 n.h.p.; triple-expansion engines.

The French steamship *Phryne* struck a mine and sank on September 24th, 1939, off Aldeburgh, Suffolk, on a voyage from Immingham to Bayonne with coal. Two empty ship's boats were later recovered.

PHYLLIS

The Shipping Controller (E. A. Casper, Edgar & Co.); 1876; *W. Gray & Co.*; 1,455 tons; 259-1x33x19-2; 132 n.h.p.; compound engines.

The British cargo ship *Phyllis* was wrecked at Hartland Quay on May 17th, 1918, while on a voyage in ballast from Fecamp to Barry.

PIAKO

New Zealand Shipping Co.; 1920; *A. Stephen & Son*; 8,286 tons; 450x58-2x37-2; 14 knots; turbine engines. The steamship *Piako*, Capt. B. Evans, was torpedoed and sunk by a German submarine 120 miles off Freetown on May 18th, 1941. Ten of her crew were killed.

PIAVE

Lloyd Nacional S.A.; 1912; *Western D.D. & S.B. Co.*; 2,347 tons; 257x42-5x23-4; 146 n.h.p.; triple-expansion engines. The Brazilian tanker *Piave* was torpedoed, shelled and sunk by a German submarine on July 28th, 1943, on a voyage from Para to Trinidad.

PICARDIE

French Government (Soc. Francaise de Transports Petroliers); 1936; *Eriksbergs Mek. Verkstad*; 8,263 tons; 469*2x61-1x34-5; oilengines.

The French motor tanker *Picardie* struck an obstruction on February 1st, 1940, and broke in two. Twelve of the crew were lost, but 28 were saved from the afterpart 450 miles N.W. of the Azores. The afterpart was subsequently taken in tow and in 1949 with a new fore end she was renamed *Sireffell* under Norwegian ownership.

PICOTEE

British Navy, corvette; 1940; *H. Robb*; 92 5 tons; 193x32x16; 2,750 i.h.p.; 17 knots; quadruple-expansion engines; one 4 in. A.A. gun, several smaller.

The corvette *Picotee*, Lt. R. A. Harrison, R.N.R., was torpedoed and sunk by a German submarine off Iceland on August 12th, 1941. Five officers, including Lt. Harrison, and 59 ratings were killed.

PIEMONTE

Lloyd Triestino; 1918; *Barclay, Curie & Co.*; 15,209 tons; 546-1x67-2x41-8; triple-expansion engines & L.P. turbine. The

Italian liner *Piemonte* was torpedoed by a British submarine on November 17th, 1942, and towed into port. She was bombed and destroyed by British aircraft on August 15th, 1943, while lying at Messina awaiting repairs.

PIER LUIGI

A. Lauro; 1895; *Lobnitz & Co.*; 2,571 tons; 306-2x40-1x19-7; 162 n.h.p.; triple-expansion engines.

The Italian steamship *Pier Luigi*, flying the German flag, was bombed by British aircraft on November 13th, 1944, in Suda Bay, Crete, and set on fire. The ship was shelled and sunk by the Germans to prevent the fire detonating her cargo of munitions.

PIERO FOSCARI

Adriatica Soc. Anon. di Nav.; 1928; *Stabilimento Tecnico*; 3,423 tons; 329-3x44-5x20-9; 438 n.h.p.; oilengines. The Italian motorship *Piero Foscari* was shelled and sunk by German light surface craft on September 9th, 1943, near Castig-ionicello.

PIEROMARONCELLI

1896; *Flensburger Schiffsbau-Gesellschaft*; 5,143 tons; 404-6x 50-4x21 *2; 426 n.h.p.; triple-expansion engines. The German steamship *Ambria* was requisitioned by the Italian Government and renamed *Piero Maroncelli*. Subsequently she was torpedoed and sunk by a submarine in the Mediterranean on May 30th, 1918.

PIERRE LE GRAND

Caillol & St. Pierre; 1882; *La Seym*; 3,610 tons; 379-6x 40x22-2; 288 n.h.p.; compound engines.

The French steamship *Pierre le Grand* left Odessa on December 13th, 1899, for Marseilles with some 45 persons on board, passengers and crew, 5,000 sheep and part cargo of grain. Nothing was heard of the ship after she passed Pera on the 17th, until sheep carcasses and other wreckage identified with the ship were seen in the Adriatic on the 28th.

PIET HEIN

Netherlands Navy, destroyer; 1927; *Burgerhout*; 1,310 tons; 323x31-2x10'5; 31,000 s.h.p.; 36 knots; turbine engines;

Yarrow boilers; four 4 - 7 in. guns, 6 smaller, 6 T.T., 24 mines. On February 20th, 1942, an Allied striking force formed into two groups left the harbours of Tjilatjap and Surabaya for the purpose of intercepting a Japanese invasion fleet descending upon the island of Bali in the Dutch East Indies. The Tjilatjap force comprised the Dutch cruisers *De Ruyter*, flagship of Rear-Admiral K.

Doorman, and *Java* and the destroyer *Piet Hein*, with two old U.S. destroyers, the *Ford* and the *Pope*. Action was joined with the Japanese in Bandoeng Strait. The night was extremely dark and Admiral Doorman's ships caught the enemy unawares at anchor under shelter of Bali. The two cruisers opened fire at close range, sinking an unspecified number of ships as they passed up the anchorage at high speed. The surprise was so complete that the Dutch cruisers escaped before the full weight of the Japanese guns could be brought to bear.

The *Piet Hein*, being the third in the line, was not so fortunate, the Japanese having just sufficient time to bring her under a concentrated fire. She was hit by twelve 8 in. shells and her after magazine set alight and she drifted out of the line and sank, a few of her complement escaped on rafts, but 64 officers and men were drowned.

The American destroyers, profiting by the enemy's attention to the *Piet Hein*, ran in among the transports and discharged their torpedoes with great effect. By fast and rapid manoeuvring they managed to avoid serious damage and to follow the cruisers into quiet waters.

The full story of the fighting in the Dutch East Indies is told under the *De Ruyter*.

PIETER FLORISZ

Netherlands Navy, minesweeper; 1937; Smit; 525 tons; 183x25-5x7; 1,600 i.h.p.; 15 knots; one 3 in. gun, four 12-7 mm., 1 m.g.
The Dutch minesweepers *Abraham van der Hulst* and *Pieter Florisz* were lost in action when resisting the German invasion of Holland, May 10th-14th, 1940. Both ships were of the same tonnage and dimensions.

PIETRO BARBARO

Societa Fiumana di Nav.; 1940; Italy; 6,330 tons; oil engines.
The Italian motorship *Pietro Barbara* was torpedoed and sunk by British aircraft on September 3rd, 1941, 23 miles E. of Cape Spartivento.

PIETRO ORSEOLO

Soc. Italiana di Arm. Sidarma; 1939; Cantieri Riuniti deW Adriatico; 6,344 tons; 470-7x60-6x23-6; 1,328 n.h.p.; oil engines.
The Italian motorship *Pietro Orseolo*, flying the German flag, was torpedoed and sunk by British aircraft on December 18th, 1943, in Corubion Bay.

PIETRO QUERIM

Salvagno Anon, di Navigazione; 1906; Stavanger Stoberi & Dok; 1,004 tons; 242x33-1x15-3; 127n.h.p.; triple-expansion engines.
The Italian steamship *Pietro Querini* was torpedoed and sunk by a British submarine on June 22nd, 1941, near Pantellaria.

PIJNACKER HORDIJK

Koninklijke Paketvaart Maats.; 1914; Maats. Fyenoord; 2,982 tons; 325-5x40-8x22-7; 233 n.h.p.; triple-expansion engines.
The Dutch steamship *Pijnacker Hordijk* was torpedoed and sunk by a Japanese submarine on February 22nd, 1942, S. of the Sunda Strait on a voyage from Tjilatjap to Australia.

PIKEPOOL

Sir R. Ropner & Co.; 1909; Ropner & Sons; 3,683 tons; 346-5 x 51x23-3; 301 n.h.p.; 10 knots; triple-expansion engines.
The steamship *Pikepool*, Capt J. B. Atkinson, struck a mine and sank 23 miles E.S.E. of the Smalls Light on November 22nd, 1940. Six officers and 11 men were killed. Capt. Atkinson and the survivors were picked up after being adrift for 48 hours on waterlogged rafts. The *Pikepool* was in ballast at the time of the attack.

PILAR DE LARRINAGA

Larrinaga & Co.; 1902; Russell & Co.; 4,136 tons; 369-9x 50-1x25-3; 431 n.h.p.; 10-5 knots; triple-expansion engines.
The steamship *Filar de Larrinaga* was torpedoed and sunk by a German submarine two miles S.E. by S. of the Tuskar lightship on May 4th, 1917. Twenty men, including the captain were killed.

PILLORY

U.S. War Shipping Administration; 1933; Naskov Skibsvcerft-Ajs; 1,515 tons; 271-8x39-7x15-7; 192 n.h.p.; compound engines.
The Panamanian steamship *Pillory* was torpedoed and sunk by a German submarine on June 5th, 1944, soon after leaving San Juan, Puerto Rico, for Guayanilla. Twenty-one crew and four gunners were lost.

PILLSBURY

United States Navy, destroyer; 1920; W. Cramp & Sons; 1,190 tons; 314 x 30x10; 26,000 s.h.p.; 35 knots; turbine engines; four 4 in. guns, one 3 in.A.A., 12 T.T.
The United States destroyers *Edsall* and *Pillsbury* were ordered to leave Japanese waters and make for Australia at the close of the disastrous battle of the Java Sea, February 27th-March 1st, 1942. The vessels, which were sister ships of the old flush-decked type, were intercepted by a superior Japanese force which sank them both. The destroyers each had an official complement of 122.

PILSUDSKI

Gdynia-America Shipping Lines; 1935; Cantieri Riuniti dell' Adriatico; 14,294 tons; 498-8x70-8x32-4; 2,516n.h.p.; oil engines.
The Polish liner *Pilsudski* struck a mine and sank on November 26th, 1939, off the Norfolk coast on a voyage from the Tyne to Australia. Ten of her crew were lost.

PINAR DEL RIO

American & Cuban S.S. Line; 1895; J. Readhead & Sons; 2,504 tons; 306-2x41-1 x 14-9; 262n.h.p.; triple-expansion engines.
The American steamship *Pinar del Rio* was sunk by a German submarine in the Western Atlantic on June 10th, 1918.

PINCHER

British Navy, destroyer; 1910; W. Denny & Bros.; 975 tons; 274-5x28x10; 12,500i.h.p.; 27 knots; turbine engines; Yarrow boilers; one 4 in. gun, three 12pdr., one 3pdr.A.A., 1 m.g., 2 T.T.
The destroyer *Pincher* was wrecked on the Seven Stones on July 24th, 1918*. At the time of her loss she was carrying a complement of about 100.

PINDOS

Pindos S.S. Co.; 1908; Hawthorn, Leslie & Co.; 4,360 tons; 380-4x52x33-2; 492 n.h.p.; triple-expansion engines.
The Greek steamship *Pindos* was torpedoed and sunk by a German submarine on August 4th, 1940, off Tory Island, Ireland.

PINEWOOD

W. France > Fenwick & Co.; 1930; Hawthorn, Leslie & Co.; 2,466 tons; 285-8x42-4x19-5; 204 n.h.p.; 10 knots; triple-expansion engines.
The collier *Pinewood*, Capt. H. H. Henson, struck a mine and sank one and a half miles S. of Southend Pier on January 3rd, 1941. Six of her crew were killed. Capt. Henson was among the survivors.

PINGUIN

German Navy; 1936; A. G. Weser; 7,766 tons; 485-6x61-3x 31-7; 1,830n.h.p.; 17 knots; oil engines; six 5-9 in. guns, 3 smaller, four 20 mm.A.A., 4 T.T., 300 mines, 2 aircraft.
The commerce raider *Pinguin* was formerly the *Kandelfels* of the Hansa Line. She sailed from Bremen on June 22nd, 1940, under command of Capt* F. Krüger, with a crew of 420, on a cruise that lasted nearly 11 months and extended from the Atlantic to the Indian Ocean and the Antarctic. During this time the raider sank or captured 17 merchant ships and 11 whale catchers. In addition three ships were sunk by mines laid off the Australian coast by the *Pinguin* and one of her prizes. On May 7th, 1941, the *Pinguin* intercepted and sank the British tanker *British Emperor* about 350 miles S. of Socotra Island but not before the tanker had sent out a "raider" warning. This was picked up by the British cruiser *Cornwall*, 10,000 tons, Capt. P. G. W. Manwaring, some 500 miles to southward, which made for the position given and sent out her two reconnaissance aircraft.

PINK STAR

At 7 a.m. on the 8th the aircraft reported a ship claiming to be the Norwegian motorship *Tamerlane* but, on approaching more closely, *Cornwall* was able to identify her as the *Pinguin*. The raider was first to open fire, at 5 • 15 p.m., scoring hits which damaged the cruiser's steering gear but *Cornwall* soon began to register with her 8 in. guns and eventually the *Pinguin* blew up and sank. Capt. Krüger, 340 of his crew and a large number of prisoners were killed, 60 of the crew and 27 prisoners were picked up by *Cornwall*.

The following ships were sunk or captured by the *Pinguin*:—
Domingo de

<i>Larrinaga</i>	5,358 tons	British	July 31st, 1940
<i>Filefielt</i>	7,616 ..	Norwegian	Aug. 26th, 1940
<i>British</i>			
<i>Commander</i>	6,901	British	Aug. 27th, 1940
<i>Morviken</i>	5,008	Norwegian	Aug. 27th, 1940
<i>Benavon</i>	5,872	British	Sept. 12th, 1940
<i>Nordvard</i>	4,111	Norwegian	Sept. 16th, 1940
<i>Storstad</i>	8,998	Norwegian	Oct. 7th, 1940
<i>Nowshera</i>	7,920	British	Nov. 17th, 1940
<i>Naimoa</i>	10,123	British	Nov. 20th, 1940
<i>Port Brisbane</i>	8,739	British	Nov. 21st, 1940
<i>Port Wellington</i>	8,301	British	Nov. 30th, 1940
<i>Ole Wegger</i>	12,201	Norwegian	Jan. 13th, 1941
<i>Solelimi</i>	12,246	Norwegian	Jan. 14th, 1941
<i>Pelaeos</i>	12,083	Norwegian	Jan. 15th, 1941
<i>Empire Light</i>	6,828	British	April 25th, 1941
<i>Clan Buchanan</i>	7,266	British	April 28th, 1941
<i>British Emperor</i>	3,663	British	May 7th, 1941

PINK STAR

U.S. Maritime Commission; 1926; A/B Oresundsvarvet; 4,150 tons; 357x51-3x25-4; 391 n.h.p.; oilengines. The Panamanian motorship *Pink Star* was torpedoed and sunk by a German submarine on September 19th, 1941, on a voyage from New York to Liverpool. Eleven of her crew were killed.

PINNA

Anglo-Saxon Petroleum Co.; 1910; J. C. Tecklenborg A.G.; 6,121 tons; 421x55-1x28-7; 517n.h.p.; 10 knots; quadruple-expansion engines.

The tanker *Pinna*, Capt. W. P. Thomas, was bombed by Japanese aircraft on February 3rd, 1942, when in convoy off the island of Lingga, Sumatra. The vessel did not sink, but was bombed and set on fire on the following day and ran aground in a minefield. Twenty men were killed. Capt. Thomas was among the survivors.

PINTAIL

British Navy, corvette; 1939; W. Denny & Bros.; 580 tons; 240x26x6; 3,600s.h.p.; 20 knots; turbine engines; 3-drum boilers; one 4 in.A.A. gun, 8 smaller.

The corvette *Pintail*, Lt. J. L. E. McClintoch, struck a mine and sank off the Humber on June 10th, 1941. Six officers, including Lt. McClintoch, and 48 ratings were killed.

PINTHIS

Lake Tankers Corporation; 1919; Tank S.B. Corp.; 1,111 tons; 206-8x35-6x16-8; 159 n.h.p.; 9 knots; oil engines.

The American tanker *Pinthis* left Fall River for Boston on June 10th, 1930, with 12,000 barrels of petrol. She carried a crew of 20. On the same evening in dense fog she collided with the American steamship *Fairfax*, 5,649 tons, Capt. A. Brooks. The impact was so violent that the petrol on board the tanker blew up and she sank immediately, not one of her crew being seen or heard by those on board the *Fairfax*. The *Fairfax* sustained heavy damage to her bows above the waterline and was set on fire, in addition to which the blazing petrol spread over the surface of the water until the ship was floating in a sea of flame. A certain number of passengers and crew gave way to panic and seven passengers, of whom four were women and one a child, and 16 negro members of the crew, jumped overboard and were drowned. Fortunately the *Fairfax* was carrying a number of seamen and marines of the U.S. Navy returning to their commands. These men set about fighting the fire and finally extinguished it.

The total loss of life was 43, of whom 20 were the crew of the *Pinthis*.

554

PINTO

MacAndrews & Co.; 1928; Harland & Wolff; 1,346 tons; 270-1x39-1x15-6; 355n.h.p.; 12 knots; oilengines. The motor vessel *Pinto*, Capt. Boggs, was acting as convoy escort when she was torpedoed and sunk by a German submarine off Tory Island on September 8th, 1944. Capt. Boggs, 11 of the crew, eight gunners and a naval signalman were lost.

PIONIER

Afrikanische Frucht-Cie.A.G.; 1933; Bremer Vulkan; 3,285 tons; 352-8x44-8x24; 975n.h.p.; oilengines. The German motorship *Pionier* struck a mine and sank on April 10th, 1940, in the Kattegat. Most of the 1,000 troops on board were drowned.

PIRIAPOLIS

Compagnie Maritime Beige (Lloyd Royal); 1938; Soc. Anon. JohnCpckerill; 7,340 tons; 435-9x61-5x26-8; 1,028 n.h.p.; oil engines.

The Belgian motorship *Piriapolis* was bombed and sunk by German aircraft on June 11th, 1940, off Havre, during the evacuation of British Forces from France.

PISTOIA

Italian Government; 1925; Forges et Chantiers de la Mediteranee; 2,448 tons; 279-2x42-1x21-5; 188 n.h.p.; triple-expansion engines.

The steamship *Pistoia* was formerly the French *Oued Sebon II*, taken over by the Italians. On the night of January 23rd, 1943, she was torpedoed and sunk by British aircraft N.N.W. of Ustica.

PIZZARO

MacAndrews & Co.; 1923; W. Beardmore & Co.; 1,367 tons; 241-1x38-2x15-7; 347 n.h.p.; 12 knots; oilengines. The motorship *Pizzaro*, Capt. J. Gillanders, was bound to Gibraltar with an outward bound convoy on January 31st, 1941, when she was torpedoed and sunk by a German submarine about 700 miles W. of the Bishop Rock. Twenty-three men were killed. Capt. Gillanders was among the six survivors.

PLANET

Reederei F. Laeisz G.m.b.H.; 1922; J. C. Tecklenborg A.G.; 5,821 tons; 450 - 8 X 57 • 2 X 27; 762 n.h.p.; turbine engines. The German steamship *Planet* struck a mine and sank on February 2nd, 1945, near Swmemunde.

PLANTER

Charente S.S. Co.; 1927; C. Connell & Co.; 5,887 tons; 420X 54-5x30-4; 524 n.h.p.; 13 knots; triple-expansion engines. The steamship *Planter*, Capt. D. H. Bryant, was torpedoed and sunk by a German submarine off Tory Island on November 16th, 1940. Thirteen of her crew were killed and one wounded. Capt. Bryant was among the survivors.

PLATA

Societa Marittima Italiana; 1878; Barrow S.B. Co.; 1,861 tons; 300 X34x 24; 270 n.h.p.; triple-expansion engines. The Italian steamship *Plata* was torpedoed and sunk by a submarine in the Mediterranean on December 3rd, 1916.

PLATURIA

Standard Oil Co. (New Jersey); 1892; Armstrong, Mitchell & Co. 3,445 tons; 328-2x43-3x29-8; 284 n.h.p.; triple-expansion engines.

The American tanker *Platuria* was torpedoed and sunk by a German submarine W. of Gibraltar on September 15th, 1917.

PLAUDIT

U.S. Maritime Commission; 1913; Wm. Doxford & Sons; 4,988 tons; 434-2x54-1x26-3; 577 n.h.p.; triple-expansion engines.

The Panamanian steamship *Plaudit* was torpedoed, shelled and sunk by a German submarine on November 8th, 1942, off Port Elizabeth, South Africa.

PLEIADI

Italian Navy, torpedo boat; 1937; Napoletani; 679 tons; 267x26x7-7; 19,000 s.h.p.; 34 knots; turbine engines; 3-drum boilers; three 3-9 in. guns, four 37 mm.A.A., three 13 mm.A.A., 4 T.T.
The Italian torpedo boat *Pleiadi* was lying off Tripoli on October 14th, 1941, when she was attacked by British bombers. The vessel which carried a complement of about 100, was hit and sunk.

PLESSEY

A. Tate & Co.; 1881; Hodgson & Soulsby; 1,649 tons; 256x36-1x23-1; 170 n.h.p.; compound engines.
The British cargo ship *Plessey* sprang a leak and foundered at Wapou, Ivory Coast, on June 24th, 1901. She was carrying a general cargo from Antwerp to Boma.

PLINY

Liverpool, Brazil & River Plate S.N. Co.; 1878; Barrow S.B. Co.; 1,671 tons; 288-4x33-3x24; 150 h.p.; compound inverted engines.
The British cargo ship *Pliny* was wrecked at New Jersey on May 13th, 1882. She was carrying a cargo of coffee, hides and wool from Rio de Janeiro to New York.

PLOVER

British Navy, gunboat; 235 tons; 60 n.h.p.; steam engines; one 68 pdr. gun, one 32 pdr., 2 howitzers.
The gunboat *Plover*, Lt. W. H. Rason, was acting as flagship of Rear-Admiral James Hope, C.B., in command of a flotilla of gunboats bombarding the Pei-ho forts during the China War of 1856-59. The channel of the Pei-ho River was blocked by three booms, with Chinese batteries on either side. These batteries mounted 68 guns in all, being large pieces of 32 pds. and upwards. Against these the flotilla of 11 small vessels could only oppose 28 guns and a number of howitzers.

The gunboats forced the booms and on the morning of June 25th, 1859, commenced the bombardment. They came under heavy fire from both the forts and sustained serious damage and many casualties. Lt. Rason was killed and Admiral Hope wounded. The *Plover* and *Lee* were wrecked on the first day of the action, which lasted until the 28th, when *Cormorant* was sunk.

During the fighting Flag Officer Josiah Tatnall, commanding the U.S. Chinese Squadron, visited the wounded Admiral Hope with an offer to assist in the evacuation of the wounded. While he was below with the British Admiral his boat's crew boarded the shattered *Plover*, whose gun crews were killed or wounded, and manned the guns again. This ceased when Tatnall came on deck, and the U.S. seamen withdrew. Later the Americans sent a steamship to tow away boat loads of wounded. Tatnall's famous phrase, "I guess blood's thicker'n water", was uttered on this occasion.

In all, the flotilla lost 25 officers and men killed and 93 wounded.

PLUMPTON

British Navy, minesweeper; 1916; A. McMillan & Co.; 810 tons; 245-7x29x6-7; 1,400 i.h.p.; 15 knots; diagonal compound engines; one 3 in. gun, one 6pdr., two 2pdr. The minesweeper *Plumpton* was one of a flotilla of 32 such vessels laid down by the Admiralty in 1915. They were all paddle steamers of shallow draught. On October 19th, 1918, *Plumpton* struck a mine and sank off Ostend. Her official complement was 72.

PLUTO

Rederi A/B Pluto; 1907; Richardson, Duck & Co.; 3,496 tons; 362-9x47-9x22-5; 330 n.h.p.; triple-expansion engines. The Finnish steamship *Pluto* was torpedoed and sunk by a German submarine on June 28th, 1941, 100 miles N.N.W. of the Butt of Lewis, on a voyage from New York to Kirkwall. Eighteen lives were lost.

PLUTO

German Government; 1905; Maats. Fyenoord; 1,156 tons; 229-7x32x15-8; 121 n.h.p.; triple-expansion engines. The steamship *Pluto*, was formerly Dutch, taken over by the Germans. She was sunk by British light naval forces on September 18th, 1943, N. of Stampalia, Aegean Sea.

PLUTO GO

Japanese Government; 1914; Reiherstieg Schiffswerft; 3,833 tons 361-2x50-3x23-6; 333 n.h.p.; quadruple-expansion engines. The steamship *Pluto Go* was formerly the Italian *Pluto*, taken over by the Japanese. She was bombed and sunk by U.S. land-based aircraft on June 24th, 1945, off Mokpo, Korea.

PLUTON

Spanish Navy, destroyer; 1897; John Brown & Co.; 400 tons; 225 X 25 x 5 - 5; 7,500 i.h.p.; 30 knots; triple-expansion engines; two 14pdr., two 6pdr., two 1 pdr., 2 T.T.
The Spanish destroyer *Pluton*, Lt. Vasquez, was one of a small flotilla of three which accompanied Admiral Cervera's squadron of armoured cruisers to Cuba, during the American-Spanish War of 1898. The other two were the *Furor* and the *Terror*, both of 370 tons and recently constructed on the Clyde. At the battle of Santiago de Cuba, for which see the flagship *Infanta Maria Teresa*, the *Pluton* and the *Furor* came out at the tail of the cruiser line.

The *Pluton* was engaged by the U.S. armed yacht *Gloucester*, Lt. Cdr. Wainwright, and although she possessed 14 pdr. guns against the yacht's 6 pdrs. she failed to score a hit. In a very short time she was disabled and ran for Punta Cabrera, where she struck the rocks and sank.

About 40 of her complement of 80 were killed.

PLUTON

Chr. Hannevig; 1901; Wood, Skinner & Co.; 1,507 tons; 250 x 37 • 2 X16 • 2; 180 n.h.p.; triple-expansion engines. The Norwegian steamship *Pluton* struck a mine and sank in the North Sea on November 9th, 1914.

PLUTON

A/S Sorlandske Lloyd; 1889; J. Blumer & Co.; 1,449 tons; 250 x 35 • 1 x 16 - 6; 133 n.h.p.; triple-expansion engines. The Norwegian steamship *Pluton* was torpedoed and sunk by a German submarine in the English Channel on September 9th, 1917.

PLYMOUTH

U.S. Navy; 1931; F. Krupp; 2,265 tons; 249-3x46-2x25; 863 n.h.p.; oilengines; several light guns.
Mr. W. K. Vanderbilt's yacht *Alva* was taken over by the U.S. Navy when America entered the Second World War in December, 1941. She was renamed *Plymouth* and commissioned as a gunboat, with a complement of 183 officers and men under Lt. O. M. Mitchell. She formed one of the large submarine patrols extending from Florida to Canada.

In July, 1943, a flotilla of nine German minelaying submarines left France for the eastern coast of the United States. Six of these were destroyed at various times when crossing the Atlantic, but three reached their appointed station in the area of Cape Henry, Virginia. On August 5th the *Plymouth* made contact with the U-566, Lt. Cdr. H. Hprnkhol, and prepared to attack with depth charges. The submarine, however, discharged a torpedo which struck the gunboat abaft the bridge and caused vital damage.

The *Plymouth* sank very rapidly with the loss of nearly half her complement. Lt. Mitchell was badly wounded but survived. The attack took place some distance from the coast of North Carolina.

PLYMPTON

Lambert Bros.; 1893; Furness, Withy & Co.; 2,869 tons; 314x40-5x21-3; 256n.h.p.; triple-expansion engines. The British cargo ship *Plympton* was wrecked on St. Agnes Island, Scilly, on August 14th, 1909, while on a voyage from Rosario, via Falmouth, to Dublin carrying a cargo of maize.

PO

Lloyd Triestino; 1911; Lloyd Austriaco; 7,289 tons; 454 x 55-3x28-5; 1,580n.h.p.; quadruple-expansion engines. The Italian steamship *Po* was torpedoed and sunk by British aircraft on March 14th, 1941, in Valona Roads.

POBIEDA

Russian Navy, 1st class battleship; 1900; Baltic Works; 12,692 tons; 401-2x71-5x26; 15,492 i.h.p.; 18-5 knots; triple-expansion engines; four 10 in. guns, eleven 6 in., two 2% in., twenty 12 pdr., twenty-one 3 pdr., 9 m.g., 5 T.T. The Russian battleship *Pobieda* was one of the Pacific Squadron

based on Port Arthur at the outbreak of the Russo-Japanese War in February, 1904. The vessel had a complement of 778 officers and men

On April 13th, when Admiral Makharoff in the *Petrovsk* (which see) was blown up by a floating mine, the *Pobieda* was ordered to drive off the Japanese and to rescue survivors. After patrolling off shore for some hours the ship returned to harbour with the other battleships, but was mined and damaged when not far from port. Fortunately the force of the explosion was broken by a large coal bunker and the ship did not sink. She was quickly repaired and took part in the sortie of June 23rd, and in the battle of the Yellow Sea on August 10th.

The battle of the Yellow Sea was the last occasion that the Russian fleet came out from Port Arthur in full strength. From that time the ships were occupied in replying to the Japanese batteries on the heights, or in supplying guns to strengthen the shore defences. The *Pobieda* was one of the last warships to be destroyed. She had been much knocked about by an 11 in. howitzer battery and sank on December 7th, 1904.

The full story of the Pacific Squadron at Port Arthur is told under the *Peresvyet*, flagship of the Rear-Admiral, which was among those lost.

POCHARD

Cork S.S. Co.; 1883; *D. J. Dunlop & Co.*; 1,135 tons; 260-2x 33-1x15-4; 250 h.p.; compound inverted engines. The Irish cargo ship *Pochard* foundered off Holyhead on December 7th, 1884. There were no survivors. She was on a voyage from Liverpool to Rotterdam carrying a general cargo.

PODEROSA

Russell, Miller & Huskie; 1875; *Cole Bros.*; 1,183 tons; 249-8 x 32-9x19-9; 228 n.h.p.; triple-expansion engines. The British cargo ship *Poderosa* was wrecked on Scoughal Rocks, N.W. of Dunbar, on November 28th, 1896. She was on a voyage in ballast from Grimsby to Grangemouth*

POELAU BRAS

Sioomv. Maats. Nederland; 1929; *Koninklijke Maats. De Schelde*; 9,278 tons; 495-3x61-3x33; 1,450n.h.p.; oilengines. The liner *Poelau Bras* left Tjilatjap on February 27th, 1942, calling at Wijnkoop Bay, Java, to pick up passengers. She sailed from the latter place on March 6th and on the following day was bombed and sunk by Japanese aircraft. Thirty-three of her complement of 151 were killed and the remainder taken prisoner.

POETA AROLAS

Compania Trasmediterranea; 1920; *Compania Euskalduna*; 3,252 tons; 316 x 44 -1 x 26 • 7; 310 n.h.p.; triple-expansion engines. The Spanish steamship *Poeta Arolas* was bombed and sunk by Insurgent aircraft in early May, 1938, at Carthage, during the Spanish Civil War.

POINT JUDITH

Theseus S.S. Co.; 1919; *Todd Dry Dock & Construction Corp.*; 4,810 tons; 379-1x53-1x27; 339n.h.p.; triple-expansion engines. The Greek steamship *Point Judith* was bombed and sunk by German aircraft on April 26th, 1941, at Kythnos, during the invasion of Greece.

POINT PLEASANT PARK

Canadian Government; 1943; *Davis S.B. & R. Co.*; 7,136 tons; 424-6x57-2x34-9; 505 n.h.p.; 11 knots; triple-expansion engines.

The steamship *Point Pleasant Park*, Capt. O. Owens, was intercepted by an enemy submarine on February 23rd, 1945, about 300 miles W. of the mouth of the Orange River, South Africa. The submarine opened fire from the surface and then discharged a torpedo, sinking the vessel with the loss of nine men, Capt. Owens was among the survivors.

POITIERS

Cie. Franfaise des Chemins de Per de Paris-Orleans; 1917; *Superior S.B. Co.*; 2,045 tons; 251x43-8x18-2; 274n.h.p.; triple-expansion engines.

The French steamship *Poitiers* was torpedoed and sunk by a German submarine in the Bristol Channel on April 28th, 1918.

POLA

English and American Shipping Co.; 1898; *J. Readhead & Sons*; 3,061 tons; 323x47x22-7; 288 n.h.p.; 10 knots; triple-expansion engines.

The steamship *Pola* was torpedoed and sunk by a German submarine 280 miles W.N.W. of Ushant on March 18th, 1917. Five men were killed. The captain was among the survivors.

POLA

Italian Navy, heavy cruiser; 1931; *Odero Terni Orlando*; 10,000 tons; 599-5x67-7x19-5; 95,000s.h.p.; 32 knots; turbine engines; 3-drum boilers; eight Sin. guns, twelve 3-9 in., eight 37 mm., eight 13 mm., 2 aircraft.

The heavy cruiser *Pola* of the Italian navy was bombed and disabled by aircraft from the British aircraft-carrier *Formidable* during the battle of Cape Matapan on March 28th, 1941. In the early hours of the 29th the ship was discovered lying helpless some three miles from the British battle squadron under Vice-Admiral Sir Andrew Cunningham. This force was in the act of turning about to attack the *Pola* when it ran into a line of Italian cruisers and destroyers, most of which were sunk at short range. Meanwhile the *Pola* had been sunk by torpedoes, a large proportion of her crew getting away before she foundered. For full details of the battle see *Fiume*.

POLARIA

Houlder, Middleton & Co.; 1893; *Workman, Clark & Co.*; 3,546 tons; 361x44-4x26-2; 328 n.h.p.; triple-expansion engines.

The British cargo ship *Polaria* was wrecked near Alexandria on January 5th, 1918. She was on a voyage from Cardiff to Alexandria carrying a cargo of coal and wagons.

POLARLAND

Dampsk.-A/S Vestland; 1923; *Laxevaags Maskin & Jernskibs.*; 1,591 tons; 246x37-9x15-7; 139 n.h.p.; triple-expansion engines.

The Norwegian steamship *Polarland* was torpedoed and sunk by a German submarine on January 4th, 1945, near Halifax, with the loss of 18 lives.

POLCEVERA

Sicilia Societa di Navigazione; 1882; *Blackwood & Gordon*; 2,207 tons; 299-2x37-2x23-6; 248 n.h.p.; triple-expansion engines.

The Italian steamship *Polcevera* was torpedoed and sunk by a submarine in the Mediterranean on October 26th, 1916.

POLCEVERA

M.Giusti & C.; 1920; *Toledo, O., S.B. Co.*; 2,609 tons; 251 X 43-6x25-8; 315 n.h.p.; triple-expansion engines. The Italian steamship *Polcevera* was torpedoed and sunk by a British submarine on November 20th, 1943, off Carlovassi.

POLDOWN

The Shipping Controller (L. Lougher & Co.); 1904; *Fevigs Jernskibsbyg*; 1,370 tons; 229-7x35x21-8; 142 n.h.p.; 8•5 knots; triple-expansion engines.

The steamship *Poldown* struck a mine and sank on October 9th, 1917, two miles W.S.W. of Trevoze Head. The captain and 17 of the crew were killed.

POLESLEY

Farrar, Groves & Co.; 1905; *Chas. Cornell & Co.*; 4,221 tons; 380x47-5x19-1; 412 n.h.p.; 11 knots; triple-expansion engines.

The steamship *Polesley* was torpedoed and sunk by a German submarine one mile N. of Pendeen Lighthouse, Cornwall, on September 21st, 1918. Forty-three men, including the captain, were killed.

POLINARUS

The wooden sailing ship *Polinarus*, bound from Demerara to London, was wrecked on the Lion Rock, Scilly Isles, on December 27th, 1848. The ship ran ashore so close to the fields that cattle were frightened by the flapping and tearing of the sails. The animals

ran wild and so gave the first alarm to the inhabitants. It was, however, too late to save the crew. The total number lost is not known, but 17 bodies from the wreck were buried at St. Mary's.

POLINIA

A. Lauro; 1911; *R. Thompson & Sons*; 1,592 tons; 271-6 x 38x15-8; 246 n.h.p.; triple-expansion engines. The Italian steamship *Polinnia* was torpedoed, shelled and sunk by a British submarine on June 26th, 1941, S.W. of Ischia.

POLISH PRINCE

James Knott, Sons & Co.; 1894; *Sir Raylton Dixon & Co.*; 2,884 tons; 327x41-7x26; 273 n.h.p.; triple-expansion engines. The British cargo ship *Polish Prince* sank after a collision in lat. 50° 29' N., long. 12° 20' W., on July 17th, 1915. She was on a voyage from Matanzas to Queenstown carrying a cargo of sugar.

POLJAMES

The Shipping Controller (City of Cork Steam Packet Co.); 1872 *Earle's Co.*; 856 tons; 196-3x28x 15; 63 r.h.p.; 8 knots; compound engines.

The steamship *Poljames* was torpedoed and sunk by a German submarine six miles S. of the Lizard on October 2nd, 1918. Thirteen men were killed. The captain was among the survivors.

POLLENSA

The Shipping Controller (John Cory & Sons); 1890; *W. Gray & Co.*; 2,276 tons; 290x38x20-1; 204 n.h.p.; triple-expansion engines.

The British steamship *Pollensa* was wrecked two miles W. of Nash Point, Bristol Channel, on November 22nd, 1919. She was on a voyage in ballast from Ardrossan to Barry.

POLLENTIA

Cunard Steamship Co.; 1893; *Blohm & Voss*; 2,229 tons; 290-7x38-1x23-7; 157 n.h.p.; triple-expansion engines. The British steamship *Pollentia* sprang a leak in heavy weather and foundered 700 miles east of Cape Race on January 23rd, 1916.

POLLOKSHIELDS

Tyzack & Branfoot; 1890; *Reiherstieg Schiffswerft & Masch.*; 2,744 tons; 322-8x40-3x23-5; 281 n.h.p.; triple-expansion engines.

The British cargo ship *Pollokshields* was wrecked on Elba Beach, Bermuda, on September 7th, 1915, while on a voyage from Cardiff to Bermuda carrying a general cargo.

POLLUCE

Italian Navy, torpedo boat; 1937; *Napoletani*; 679 tons; 267x 26x7-7; 19,000 s.h.p.; 34 knots; turbine engines; 3-drum boilers; three 3-9 in. guns, four 37 mm.A.A., two 13 mm.A.A.; 4 T.T.

The Italian torpedo boat *Polluce* was off Tobruk on September 4th, 1942, when she was attacked by British bombers. The vessel, which carried a complement of about 100, was hit and sunk.

POLLUCE

Soc. Anon Ilva; 1917; *N. Odera & Co.*; 1,049 tons; 204-7x 32-2x16-8; 79 n.h.p.; triple-expansion engines. The Italian steamship *Polluce* was bombed and sunk by British aircraft on May 25th, 1943, at La Maddalena, Sardinia.

POLLUX

Det Bergenske D/S; 1907; *Fevigs Jernskibsbyggeri*; 1,196 tons; 225x32x13-7; 140 n.h.p.; triple-expansion engines. The Norwegian steamship *Pollux* was torpedoed and sunk by a German submarine in the North Sea on March 19th, 1917.

POLPERRO

Polpen Shipping Co.; 1937; *N. V. Scheepswerf Foxhol*; 403 tons; 145-6x26x9; 76 n.h.p.; oil engines.

The British motorship *Polperro* was sunk by a German motor torpedo boat on January 6th, 1944, six miles off the Longships on a voyage from Manchester to Penryn. All her crew of eight and three gunners were lost.

POLROSA

Royal Mail Steam Packet Co.; 1912; *Bremer Vulkan*; 3,824 tons; 355-9x49-7x23-7; 302 n.h.p.; quadruple-expansion engines.

The British ship *Polrosa* was wrecked at Barbuda on August 12th, 1915, while on a voyage in ballast from Liverpool to St. Kitts.

POLSTJERNAN

C. G. Wickberg; 1881; *W. Gray & Co.*; 1,656 tons; 256-Sx 34-6x19-4; 170 n.h.p.; compound engines.

The Swedish steamship *Polstjerna* was wrecked during a storm on December 24th, 1901, off Korso, S. of Gronskar. All 22 persons on board were lost.

POLTAVA

Russian Navy, 1st class battleship; 1894; *New Dockyard, Leningrad*; 10,960 tons; 367-5x68x26; 11,255 i.h.p.; 17 knots; triple-expansion engines; four 12 in. guns, twelve 6 in., two 2 in., twelve 3pdr., 28 m.g., 6 T.T.

The Russian battleship *Poltava* was one of the Pacific Squadron based on Port Arthur, at the beginning of the Russo-Japanese War in February, 1904. The ship had an official complement of 651 officers and men. She took part in the battle of the Yellow Sea (August 10th, 1904) in which she was heavily damaged. Her losses in personnel amounted to one officer and 11 men killed, and three officers and 40 men wounded.

The failure of most of the Russian Fleet to break through to Vladivostok compelled a return to Port Arthur, where the ships reverted to their former inactivity, being shelled by the Japanese investing army. On December 5th, the *Poltava*, was struck by an 11 in. howitzer shell in one of her magazines, and blew up.

The story of the Pacific Squadron at Port Arthur is told under the *Peresvyet*.

POLYANA

Red. A/S Hank; 1919; *The Collingwood S.B. Co.*; 2,267 tons; 251-2x43-6x23-6; 150 n.h.p.; triple-expansion engines. The Norwegian ship *Polyana*, carrying coal, left Sunderland on March 22nd, 1941, for Freetown. She sailed from Oban on April 7th, and reported on April 14th, but was not heard of again. She is thought to have been sunk by enemy action.

POLYANTHUS

British Navy, corvette; 1940; *H. Robb & Co.*; 925 tons; 193x 32x16; 17 knots; quadruple-expansion engines; one 4 in.A.A. gun, several smaller.

The corvette *Polyanthus*, Lt. J. G. Aitken, R.N.R., was escorting a westbound convoy in company with the frigate *Itchen* (which see), the Canadian destroyer *St. Croix* (which see) and the corvette *Morden*. On September 19th, 1943, when S. of Iceland a pack of submarines, estimated at 15, began an attack on the convoy over a period of four and a half days. On the 20th *Polyanthus* was torpedoed and sunk with the loss of seven officers, including Lt. Aitken, and 77 ratings.

The full story of the action is told under the *St. Croix*.

POLYBIUS

U.S. Maritime Commission; 1919; *United States*; 6,864 tons; 409-5x30-5x —; 2,500s.h.p.; 11 knots; turbine engines. The American cargo-liner *Polybius*, Capt. O. P. Stender, was sailing in a convoy from Cape Town to New York. On June 27th, 1942, she was torpedoed and sunk by a German submarine in the Atlantic. Four men were killed. Capt. Stender was among the survivors.

POLYKTOR

G. C. Dracoulis; 1914; *W. Picker sgill & Sons*; 4,077 tons; 380x52-4x30-1; turbine engines.

The Greek steamship *Polyktor* straggled from convoy because of engine trouble and was torpedoed and sunk by a German submarine on February 6th, 1943, about 1,000 miles W. of the Fastnet

POLYMNIA

on a voyage from St. John, N.B., to Belfast Lough. Nothing was heard of the crew until the captain and chief engineer were reported to be prisoners of war.

POLYMNIA

Kaye, Son & Co.; 1903; *Blohm & Voss*; 2,426 tons; 300-8x 40-7x23-4; 157 n.h.p.; 9 knots; triple-expansion engines. The cargo-liner *Polymnia* was torpedoed and sunk by a German submarine 15 miles W. of the Lizard on May 15th, 1917. Eight men were killed. The captain was among the survivors.

POLYNESIA

O.R. Cichero; 1881; *C. Mitchell & Co.*; 2,145 tons; 306-1 x 36-1x23-3; 258 n.h.p.; compound engines. The Italian ship *Polynesia* was reported to have been sunk by a mine on August 28th, 1921, three miles off Melito di Porto Salvo.

POLYNESIAN

Messageries Maritimes; 1890; *Messageries Maritimes*; 6,373 tons; 482-3x49-2x34-1; 818 n.h.p.; triple-expansion engines. The French steamship *Polynesian* was torpedoed and sunk by a submarine in the Mediterranean on August 10th, 1918.

POLYPHEMUS

British Navy, sloop; 1840; *Chatham Dockyard*; 801 tons; 164 x 32-7x 18-6; 200 i.h.p.; 10 knots; diagonal compound engines; 5 guns.

The paddle sloop *Polyphemus*, Cdr. Warren, had recently returned from the Baltic during the Crimean War. She left Hull on Sunday, January 27th, 1856, with a complement of 12 officers and 105 ratings. Between ten and 11 on the morning of the 29th, when the men were exercising at the guns, the ship ran into a thick fog and drove ashore seven miles S.W. of Hanstholm Light, on the coast of Jutland. Three boats were launched, the first two pulling out to sea as they could not pass the breakers; the men in them were never seen again. The third boat capsized and the master and ten men were drowned. The masts were cut away, but too late to save the ship. After some hours those remaining on board were taken off by Danish coastguards.

The survivors, including Cdr. Warren, numbered 90.

POLYPHEMUS

Nederlandsche Stoomv. Maats. Oceaan; 1930; *Scott's S.B. & E. Co.*; 6,270 tons; 430-5x56-3x26-3; 687 n.h.p.; oil engines. The Dutch motorship *Polyphemus* was torpedoed and sunk by the German submarine (7-575) on May 26th, 1942, off Bermuda on a voyage from Sydney, N.S.W., to Halifax and the U.K. Thirty survivors were landed. In addition to her crew of 61 the *Polyphemus* had on board 14 survivors from the Norwegian motorship *Norland*.

POLYXENA

Ocean Steamship Co.; 1896; *J.L. Thompson & Sons*; 5,737 tons; 409x50-5x27-1; 402 n.h.p.; 11 knots; triple-expansion engines.

The steamship *Polyxena* was torpedoed and sunk by a German submarine 57 miles W. of the Fastnet on June 11th, 1917. Seven men were killed. The captain was among the survivors.

POLZELLA

Eclipse Shipping & Trading Co.; 1915; *W. Doxford & Sons*; 4,556 tons; 390x52-1x25; 429 n.h.p.; triple-expansion engines. The British steamship *Polzella* sank after a collision off Spurn Head on April 12th, 1928, while on a voyage from the Tyne to Algiers carrying a cargo of coal.

POLZELLA

Eclipse Shipping & Trading Co.; 1929; *W. Gray & Co.*; 4,751 tons; 400-1x54-2x25-1; 440 n.h.p.; triple-expansion engines. The British cargo ship *Polzella* left Narvik on January 13th, 1940, for Middlesbrough carrying a cargo of iron ore, but was subsequently lost without trace. She carried a crew of 37.

POMELLA

Anglo-Saxon Petroleum Co.; 1937; *Cammell, Laird & Co.*; 6,766 tons; 456-9x57-5x31-9; 502 n.h.p.; 11-5 knots; oil engines.

The tanker *Pomella*, Capt. J. B. Hodge, was torpedoed and sunk by a German motor torpedo boat off Tor Bay on July 9th, 1942. Six men were killed. Capt. Hodge was among the survivors.

POMERANIA

Hamburg-Amerika Linie; 1873; *J. Caird & Co.*; 3,382 tons; 360-2x40x26; 600 n.h.p.; 14 knots; compound engines. The liner *Pomerania*, Capt. Schwensen, left New York on November 14th, 1878, for Hamburg with a large number of passengers and the U.S. mails. Early on the morning of Monday, the 25th, she called at Plymouth and landed passengers and mails for England, together with some 7,500 dollars in specie, leaving for Cherbourg with 109 passengers and 111 crew. At about midnight when off Dover, and proceeding at a speed of 14 knots, she was struck on the starboard side, nearly amidships, by the iron barque, *Moel Eilian*, 1,100 tons, Capt. Pritchard. Of the nine boats carried on the liner four were smashed in the collision. The remaining five were got away, but one was overcrowded and capsized, drowning many of its occupants.

Distress signals were sent up and in response the s.s. *Glengarry*, Capt. Hogg, came to the rescue and picked up a number of survivors. The *Pomerania* remained afloat for some 20 minutes after the collision and during that time many passengers went below with the object of securing their valuables, and lost their lives when the vessel suddenly sank. The number drowned was 48. Capt. Schwensen was carried down with the ship, but coming to the surface was later picked up by the *City of Amsterdam* and taken to Maasluis.

The *Moel Eilian* was in such a state as to prevent her from rendering aid, and much damaged she reached Dover.

The German government was prompt to recognise the aid of the *Glengarry*, and £150 was sent to the Board of Trade representative at Leith to be awarded to the crew as soon as the vessel reached that port. Capt. Hogg was presented with £100, and £50 was distributed among the crew.

POMERANIAN

Allan Line; 1882; *Earle's Co.*; 4,241 tons; 381x43-8x33-1; 316 n.h.p.; 9 knots; triple-expansion engines. The liner *Pomeranian* was torpedoed and sunk by a German submarine nine miles N.W. by W.i.W. of Portland Bill on April 15th, 1918. Fifty-five persons, including the captain were killed.

POMMERN

German Navy, 1st class battleship; 1905; *Vulkan Co.*; 12,997 tons; 410 X 72x25; 16,000 i.h.p.; 19-2 knots; triple-expansion engines; Thornycroft boilers; four 11 in. guns, fourteen 6-7 in., twenty 24 pdr., four 1 pdr., 4 m.g., 6 T.T.

The German battleship *Pommern*, Capt. Bolken, was one of the 2nd Battle Squadron of the High Seas Fleet at the Battle of Jutland. This squadron was composed of six pre-dreadnought battleships of identical design. The ships did not play an important part in the battle by reason of their moderate speed and weak armament. On the morning of June 1st, 1916, at about 1.45 a.m., H.M.S. *Faulknor*, Capt. A. J. B. Stirling, leading the 12th Destroyer Flotilla, sighted a line of German battleships steering S.E. The ships were a mixed formation, with 'Kaiser class' dreadnoughts leading and 'Pommern class' ships following. The enemy at once turned away six points and were lost to view for about ten minutes, but re-appeared on the port bow of the British line, which consisted of *Faulknor*, *Obedient*, *Marvel* and *Onslaught*, which attacked with torpedoes, eight being discharged.

There was a loud explosion and one battleship disappeared. The ship afterwards proved to be the *Pommern*, which sank with all her complement of 71 officers and 769 men. She was the only battleship on either side sunk at Jutland.

POMMERN

German Navy; 1939; *Framnces Mek. Verksted*; 2,956 tons; 321'6x46'2x26-1; 680 n.h.p.; oil engines. The motorship *Pommern* was formerly the French *Belain d'Esnam-buc*, taken over by the Germans for use as a minelayer. On October

5th, 1944, she struck a mine off Toulon. The explosion detonated her own mines and she blew up with the loss of almost her entire complement.

POMO

Italian Government; 1906; Framnces Mek. Verksted; 1,425 tons; 234-2x33-6x20; 132 n.h.p.; triple-expansion engines. The steamship *Porno* was formerly the Yugoslav *Niko Matkovic*, seized by the Italians. On June 23rd, 1943, she was torpedoed and sunk by a British submarine off Syracuse.

POMONA

Howland & Frothingham, New York; 1856; Boston; 1,181 tons; 20 ft. draught.

The American emigrant ship *Pomona*, Capt. C. Merrihew, sailed from Liverpool for New York on Wednesday, April 27th, 1859, with a crew of 39 and 372 emigrants. The wind, which was fresh at the outset, increased to gale force as the ship proceeded down the Irish Channel. The captain did not exercise sufficient care in navigation and by nightfall was well off his course. At 4 o'clock on the morning of the 28th, the emigrants being asleep below deck, the *Pomona* went aground on a sandbank some seven miles off Ballyconigar, on the Irish coast. Throughout the night, which was very dark, the gale increased in violence, making it impossible to launch the boats. At daybreak an attempt was made but the boats were stove in and their occupants drowned. The masts were cut away and the pumps manned, the captain showing great presence of mind, though several of the crew behaved badly.

The vessel remained firmly fixed on the sandbank during the day, the seas constantly breaking over her. No help came from the shore, and no further attempts were made to launch the boats. Just before dark the ship suddenly slipped off the sandbank and began to fill. The captain let go his bower anchor and kept 40 men at the pumps in the hope that the ship would again be driven on the sandbank.

The crew now began to abandon the ship, a number of them rushing the whaler and, with a few passengers, reaching shore. The *Pomona* sank shortly afterwards, with the loss of 388 persons, including Capt. Merrihew.

POMONA

A. Lauro; 1921; G. & A. Fratelli Migliardi; 2,198 tons; 290 x 41 • 4 X19 • 1; 490 n.h.p.; oil engines.

The Italian motorship *Pomona* was bombed and sunk by British aircraft on February 12th, 1944, off Pola.

POMONE

Cie. des Vapeurs Francais; 1896; W. Gray & Co.; 2,594 tons; 314x44-1x20-7; 244 n.h.p.; triple-expansion engines. The French steamship *Pomone* was torpedoed and sunk by a German submarine off the north coast of Spain on November 24th, 1917.

POMPOON

U.S. Maritime Commission; 1901; Soderhamns Verkstad A/B; 1,082 tons; 238'1x34-6x14-3; 118 n.h.p.; triple-expansion engines.

The Panamanian steamship *Pompoon* was torpedoed and sunk by a German submarine at midnight on November 12th, 1943, on a voyage from Cristobal to Barranquilla. There were only four survivors of her crew of 23 and four armed guards.

PONTA DELGADA

Portuguese Government; 1891; Caird & Co.; 3,381 tons; 349-3x42x26-3; 398 n.h.p.; triple-expansion engines. The German steamship *Schwarzburg* was requisitioned by the Portuguese Government and renamed *Ponta Delgada*. Subsequently she was torpedoed and sunk by a submarine in the Mediterranean on July 13th, 1918.

PONTA VERDE

Lloyd Brasileiro; 1918; Bethlehem S.B. Corp.; 7,070 tons; 435 X 56x32; 672 n.h.p.; turbine engines.

The Brazilian ship *Ponta Verde* went ashore on April 23rd, 1941, in Smyth Channel on Straggler Island, at the entrance to Santiago, Chile, and broke into three.

PONTET-CANET

Worms & Co.; 1905; Nylands Vaerksted; 1,183 tons; 225X 33-7x12-7; 109 n.h.p.; triple-expansion engines. The French steamship *Pontet-Canet* was torpedoed and sunk by a German submarine in the English Channel on August 25th, 1918.

PONTIDA

Italian Government; 1906; W. Doxford & Sons; 6,018 tons; 399X56-6X26-9; 424 n.h.p.; triple-expansion engines. The German steamship *Kattenturm* was requisitioned by the Italian Government and renamed *Pontida*. Subsequently she struck a mine and sank in the Mediterranean on November 26th, 1917.

PONTOPOROS

National Steam Navigation Co. of Greece; 1913; W. Doxford & Sons; 4,049 tons; 385-8x52-1x22-3; 329 n.h.p.; triple-expansion engines.

The Greek steamship *Pontoporos* was torpedoed and sunk by a German submarine in the Bay of Biscay on August 17th, 1917.

POPE

United States Navy, destroyer; 1920; Cramp & Sons, Philadelphia; 1,193 tons; 314x30-7x13-5; 26,000 s.h.p.; 35 knots; turbine engines; four 4 in. guns, 12 T.T.

The U.S. destroyer *Pope* was in Far Eastern waters in December, 1941, when Japan attacked the Americans at Pearl Harbour. She did not participate in the first phase of the battle of the Java Sea, on February 27th, 1942. The second phase in which all the remaining Allied ships were sunk, took place on the night of the 28th, when the Japanese, aided by bright moonlight, concentrated powerful forces on two small groups of ships endeavouring to leave Javan waters under cover of night.

The *Pope* joined forces in Sourabaya harbour with the British cruiser *Exeter*, damaged in the action, and H.M. destroyer *Encounter*. The three vessels left on the night of the 28th with the intention of steaming to Australia, *Exeter* not being able to proceed at more than half speed owing to an 8 in. shell having exploded in her boiler room. Next day a message was received from the cruiser stating that three Japanese cruisers were approaching. In the ensuing engagement all three Allied ships were sunk. The *Pope* carried an official complement of 122. The full story of the battle of the Java Sea is told under the Dutch cruiser *De Ruyter*, flagship of Admiral Doorman.

POPI S.

K.G. Sigalas; 1904; Sir R. Dixon & Co.; 2,083 tons; 290-8x 40-7x18-7; 138 n.h.p.; triple-expansion engines. The Greek steamship *Popi S.* was bombed and sunk by German aircraft on April 24th, 1941, off Milos Island, during the invasion of Greece.

PORCUPINE

U.S. Navy; 1943; North Carolina S.B. Co.; 7,218 tons; 422-Sx 57x34-8; 339 n.h.p.; triple-expansion engines. The naval auxiliary *Porcupine* was sunk by Japanese naval action in the Pacific on January 10th, 1945.

PORT ANTONIO

A/S Gulftrade; 1913; Sorlandets Skibsbyggeri; 1,266 tons; 235 X 33 - 7 X 20; 188 n.h.p.; triple-expansion engines. The Norwegian steamship *Port Antonio* was torpedoed and sunk by a German submarine on July 19th, 1943, between Puerto Barrios and Tampa, with the loss of 13 lives.

PORT AUCKLAND

PortLine; 1922; Workman Clark & Co.; 8,789 tons; 480-8X 62-4x32-9; 1,070 n.h.p.; 14 knots; triple-expansion engines & L.P. turbine.

The steamship *Port Auckland*, Capt. A. E. Fishwick, was in convoy in the North Atlantic on March 17th, 1943, when she was torpedoed and sunk by a German submarine. Eight persons were killed.

PORT COLBORNE

Forwarders Ltd.; 1909; Swan, Hunter & Wigham Richardson; 1,729 tons; 250x42-5x17-8; 97n.h.p.; triple-expansion engines. The Canadian cargo ship *Port Colborne* was wrecked near Land's

PORT DALHOUSIE

End on October 16th, 1917, while on a voyage in ballast from Rouen to Barry Roads.

PORT DALHOUSIE

R. A. McLelland & Co.; 1913; Swan, Hunter & Wigham Richardson; 1,744 tons; 250x42-5x17-1; SOr.h.p.; 9 knots; triple-expansion engines.

The steamship *Port Dalhousie* was torpedoed and sunk by a German submarine two miles S. \ W. of the Kentish Knock lightship on March 19th, 1916. The captain and 11 of the crew were killed.

PORT DARWIN

*E. Morgan & Co.; 1884; A. Leslie & Co.; 2,425 tons; 300*1 X 37-4x27-1; 274 n.h.p.; compound engines.*

The British cargo ship *Port Darwin* was wrecked off La Guardia, near Vigo, on November 15th, 1905. She was on a voyage from Honaine to Rotterdam carrying a mineral cargo.

PORT DE BREST

Cie. Franfaise d'Armement et d'Importation de Nitrate de Soude; 1906; Russell & Co.; 4,463 tons; 369-7x49-8x19-1; 410 n.h.p. triple-expansion engines.

The French ship *Port de Brest* left Bordeaux on February 8th, 1924, for Dakar. She reported off Finistere on February 12th, but was not seen again.

PORT DENISON

Port Line; 1918; Workman Clark & Co.; 8,043 tons; 480-4x 60-3x32-3; 984 n.h.p.; 13-5 knots; triple-expansion engines & L.P. turbines.

The steamship *Port Denison*, Capt. J. B. Bradley, was in convoy in the North Sea on September 26th, 1940, when she was bombed and sunk by German aircraft. Sixteen persons were killed. Capt. Bradley was among the survivors.

PORT DOUGLAS

William Milburn & Co.; 1891; J. Laing; 4,285 tons; 371-5X 46-1x26-3; 600 h.p.; triple-expansion engines. The British cargo ship *Port Douglas* was wrecked on a reef off Cape Verde on May 24th, 1892. She was on a voyage from London, via the Cape of Good Hope, to Sydney, N.S.W., carrying a general cargo.

PORTELLIOT

Commonwealth & Dominion Line; 1910; Swan, Hunter & Wigham Richardson; 7,395 tons; 471x58-4x31-6; 755 n.h.p.; triple-expansion engines.

The British steamship *Port Elliot* was wrecked at Horwera Point, East Cape, N.Z., on January 12th, 1924. She was carrying a general cargo from New York, via Auckland, to Wellington.

PORT GISBORNE

Port Line; 1927; Swan, Hunter & Wigham Richardson; 10,144 tons; 477-2x63-3x31; 1,281 n.h.p.; 14-5 knots; oil engines. The motorship *Port Gisborne*, Capt. T. Kippins, O.B.E., D.S.C., was in convoy in the North Atlantic on October 11th, 1940, when she was torpedoed and sunk by a German submarine W. of Rockall. Twenty-six persons were killed. Capt. Kipping was among the survivors.

PORT HARDY

Commonwealth & Dominion Line; 1907; Workman, Clark & Co.; 6,533 tons; 450-3x55-3x30-4; 650 n.h.p.; triple-expansion engines.

The British ship *Port Hardy* was torpedoed and sunk by a German submarine 78 miles W. by N. of Cape Spartel on July 6th, 1918. Seven lives were lost.

PORT HUNTER

Port Line; 1922; Hawthorn Leslie & Co.; 8,826 tons; 481 -2 X 62-3x33; 967 n.h.p.; 14 knots; turbine engines.

The steamship *Port Hunter*, Capt. J. B. Bradley, was approximately 500 miles N.W. of the Canary Islands on July 11th, 1942, when she was torpedoed and sunk by an enemy submarine. The captain, 69

of the crew, 14 gunners and five passengers were lost. Capt. Bradley was in command of the *Port Denison* when she was bombed and sunk in September, 1940.

PORT JACKSON

Swift S.S. Co.; 1882; A. Hall & Co.; 2,309 tons; 286-2x 41-1x25-2.

The four masted barque *Port Jackson* was well known for many years as a training ship for cadets of the mercantile marine. During the First World War she reverted to cargo carrying and on April 28th, 1917, was 180 miles W. by N. of Fastnet when she was torpedoed and sunk by a German submarine. The captain and 13 of the crew were killed.

PORT KEMBLA

Commonwealth & Dominion Line; 1920; Hawthorn, Leslie & Co.; 8,435 tons; 481-2x62-3x33; 967 n.h.p.; turbine engines. The British steamship *Port Kemplab* was wrecked at San Salvador, Watling Island, on July 8th, 1926. She was on a voyage from London, via Norfolk, Va., to Lyttleton.

PORT VICTOR

Port Line; 1942; Swan, Hunter & Wigham Richardson; 12,411 tons; 503-5x68-2x38-3; 2,152 n.h.p.; 16 knots; oil engines. The motorship *Port Victor*, Capt. W. G. Higgs, O.B.E., was torpedoed and sunk by a German submarine in the North Atlantic on April 30th, 1943. Ten of her crew, two gunners and five passengers were lost. Capt. Higgs was among the survivors. The *Port Victor* was not in convoy at the time.

PORT YARROCK

Crawford & Rowat; 1886; Russell & Co.; 1,379 tons; 230-8X 36-2x21-7.

The barque *Port Yarrock*, Capt. T. Forbes, put into Brandon Bay, Tralee, on January 20th, 1894, to shelter in very heavy weather, having lost most of her sails. The weather worsened and a tug was sent out to stand by the ship but was not able to approach her. Eventually, on the 28th, the *Port Yarrock* was torn from her moorings and driven ashore, with the loss of all 25 of her crew.

PORTIER

United States Navy, destroyer; 1935; New York Shipbuilding Corp.; 1,850 tons; 381x36-2x10-2; 50,000 s.h.p.; 37 knots; turbine engines; Babcock & Wilcox boilers; eight 5 in. guns, eight 1 pdr., 2 m.g., 8 T.T.

The United States destroyer *Portier* was engaged in the operations around the Solomon Islands, taking part in the sea-air action known as the battle of Santa Cruz Island, the full story of which is told under the aircraft carrier *Hornet*. In the action, which took place on October 26th, 1942, she was torpedoed and sunk by a Japanese submarine while rescuing the crew of an American plane.

The *Portier* carried a complement of about 200.

PORTGWARRA

W. E. Hinde & Co.; 1914; J. Priestman & Co.; 2,222 tons; 290 -5x40-8x17-9; 222 n.h.p.; triple-expansion engines. The British steamship *Portgwarra* ran aground and foundered 11 miles W.S.W. of the Maas lightship on December 31st, 1921, while on a voyage from Blyth to Rotterdam carrying a cargo of coal.

PORTHKERRY

Porthcawl Steamship Co.; 1911; J. Crown & Sons; 1,920 tons; 280X40-2X18-3; 220 n.h.p.; 10 knots; triple-expansion engines.

The steamship *Porthkerry* was torpedoed and sunk by a German submarine 16 miles W. by S. of Beachy Head on May 20th, 1917. The captain and six of the crew were killed.

PORTIA

C. T. Bowring & Co.; 1884; Wigham Richardson & Co.; 1,156 tons; 220-5x31-2x16; 156 n.h.p.; compound engines. The British cargo ship *Portia* was wrecked on Flint Island, ten miles from Halifax, N.S., on July 10th, 1899, in dense fog. She was on a voyage from New York, via Halifax, to St. John's, N.F.L., carrying a general cargo.

PORTIA

J. Lund & Co.; 1914; Trondhjems Mek. Verksted; 1,127 tons; 226'3x36-5x15-7; 116 n.h.p.; triple-expansion engines. The Norwegian steamship *Portia* struck a mine and sank in the North Sea on February 1st, 1917.

PORTLAND

Portland Steam Packet Co.; 1890; Pattee & Co.; 2,284 tons; 291x42x11; 14 knots.

The passenger steamship *Portland*, Capt. H. H. Blanchard, left Boston for Portland, Maine, on the evening of November 26th, 1898, with 65 passengers and 49 crew, besides a large general cargo. The weather was threatening and Capt. Blanchard was known to have discussed the advisability of sailing with Capt. Dennison of the *Bay State* of the same line. He was confident of making the trip without mishap, however, and at 7 p.m., the advertised time of sailing, he left the India Wharf and proceeded to sea.

From that time until the following morning the *Portland* was reported by various ships and shore stations, some of the later reports stating that the steamship was rolling heavily and that her superstructure appeared to have suffered damage from the seas. The night of the 26th of November was long remembered in that part of New England, as a gale of exceptional violence swept the coast, and there is no reason to doubt the accuracy of the reports relating to the condition of the *Portland*. The most authoritative of these came from Capt. S. O. Fisher, of the Life Saving Station at Cape Cod, who stated that he saw a large paddle steamship answering to the *Portland's* description between breaks in the weather between 9 and 10 a.m. on the 27th. He also heard four sharp blasts from the siren but visibility decreased and he did not see the vessel again.

It is assumed that the *Portland* foundered with all on board round about 9 o'clock on the same evening. By midnight quantities of wreckage, including cabin furniture, and many bodies had been washed ashore around Cape Cod and these evidences of disaster were so widespread as to leave no doubt as to the total loss of the vessel.

PORTLAND

Cia. Columbus de Vapores; 1919; Albina Eng. & Machine Works; 2,648 tons; 289x44-1x19-2; 313n.h.p.; triple-expansion engines.

The Panamanian ship *Portland* went aground and sank on February 11th, 1943, off Cape Lookout. She was on a voyage from Philadelphia to Havana.

PORTLAND

Hamburg-Amerika Linie; 1928; Bremer Vulkan; 7,132 tons; 462-3x61-2x26-5; 920 n.h.p.; oil engines. The German motorship *Portland* was shelled and sunk by the French warship *Georges Leygues* on April 13th, 1943, about 600 miles W. of Monrovia.

PORTLOE

Portloe Steamship Co.; 1912; J. Blumer & Co.; 3,187 tons; 331x47-7x22-5; 306n.h.p.; 10 knots; triple-expansion engines.

The steamship *Portloe* was torpedoed and sunk by a German submarine 160 miles W.N.W. of the Fastnet on April 20th, 1917. The captain and 23 of the crew were killed.

PORTMAR

U.S. War Shipping Administration; 1919; Northwest Steel Co.; 5,551 tons; 409-8x54-2x27-7; 582 n.h.p.; triple-expansion engines.

The American steamship *Portmar* was bombed by Japanese aircraft on February 19th, 1942, at Port Darwin, and beached to prevent her sinking. She was later refloated and towed in for repairs. After repairs she sailed from Sydney, N.S.W., for Port Moresby on June 15th, 1943, and on the following day was torpedoed and sunk by a Japanese submarine.

PORTMARNOCK

John Weatherill & Sons; 1895; W. Gray & Co.; 3,080 tons; 325x47-1x22-4; 281 n.h.p.; triple-expansion engines. The British cargo ship *Portmarnock* was wrecked near Cape Frio

on October 14th, 1910, while on a voyage from San Lorenzo to Leith carrying a cargo of maize. Twelve of her crew of 23 were lost.

PORTO DI ADALIA

Soc. Marittima Italiana; 1899; Ateliers & Chantiers de la Loire; 4,073 tons; 376-6x46-8x26-1; 443n.h.p.; triple-expansion engines.

The Italian steamship *Porto di Adalia* was torpedoed and sunk by a submarine in the Mediterranean on July 16th, 1917.

PORTO DI RODI

Soc. Marittima Italiana; 1897; W. Dobson & Co.; 2,480 tons; 320-6x39-2x25-4; 390 n.h.p.; triple-expansion engines. The Italian steamship *Porto di Rodi* was torpedoed and sunk by a submarine in the Mediterranean on April 10th, 1917.

PORTO DI SMIRNE

Soc. Marittima Italiana; 1895; R. Napier & Sons; 2,576 tons; 320-5x38-2x23-1; 306n.h.p.; triple-expansion engines. The Italian steamship *Porto di Smirne* was torpedoed and sunk by a submarine in the Mediterranean on March 6th, 1917.

PORTO SAID

Soc. Marittima Italiana; 1884; W. Denny & Bros.; 5,301 tons; 439-6x46-3x28-9; 1,005 n.h.p.; triple-expansion engines. The Italian steamship *Porto Said* was torpedoed and sunk by a submarine in the Mediterranean on December 10th, 1915.

PORTOFINO

Italian Government; 1912; Akt. Ges. Neptun; 1,754 tons; 287-1x41-1x16-9; 188 n.h.p.; triple-expansion engines. The German steamship *Portofino* was requisitioned by the Italian Government. Subsequently she was torpedoed and sunk by a German submarine in the Bristol Channel on June 3rd, 1917.

PORTOFINO

La Riviera Soc. Anon. diNav.; 1916; Sir R. Dixon & Co.; 6,424 tons; 415-5x54-1x32-4; 495n.h.p.; triple-expansion engines. The Italian steamship *Portofino* was bombed and sunk by British aircraft on November 6th, 1942, at Benghazi.

PORTRIEUX

Societe Maritime Nationale; 1918; Harland & Wolff; 2,257 tons; 285 x42x19; 411 n.h.p.; triple-expansion engines. The French steamship *Portrieux* was bombed and sunk by German aircraft on May 22nd, 1940, near Gravelines. Ten survivors were picked up.

PORTSDOWN

Southern Railway; 1928; Caledon S.B. & E. Co.; 342 tons; 190x25-1x8-7; 193r.h.p.; 13-5 knots; compound diagonal engines.

The paddle steamship *Portstown*, Capt. Chandler, was off the Isle of Wight on September 20th, 1941, when she struck a mine and sank. Capt. Chandler, seven of the crew and 15 passengers were lost.

PORTSEA

SeaS.S.Co.; 1938; BurntislandS.B. Co.; 1,583 tons; 267x40-2x16-2; 167n.h.p.; triple-expansion engines. The British steamship *Portsea* struck a mine and sank on July 24th, 1944, in the Adriatic. Twenty-five of her crew were lost.

PORTUENSE

R. Singlehurst & Co.; 1875; Aitken & Mansel; 1,470 tons; 276-9x30-1x21; 140 h.p.; compound engines. The steamship *Portuense* was caught in a cyclone some 250 miles from Barbados. She was overwhelmed and sunk on, or about, August 28th, 1890. The captain and nine of the crew of 28 were lost.

PORTUGAL

Messageries Maritimes; 1886; Messageries Maritimes; 5,358 tons; 442-9x45-9x36-1; 630n.h.p.; 12 knots; triple-expansion engines. The liner *Portugal* was chartered by the Russians (or acquired by purchase) for service as a hospital ship in the Black Sea. On March 17th, 1916, the vessel was towing a line of boats used for bringing

PORTUGAL

the wounded from the shore to the ship when she was attacked by the German submarine *U-33*, Lt. Cdr. Gansser, which fired two torpedoes. The vessel was lying stopped at the time as she had just previously experienced some difficulty with her tow. In this position she was an easy target, nevertheless the first torpedo missed but the second exploded full amidships and broke her in two.

There were no wounded on board the *Portugal* but 90 persons, of whom 45 were medical staff, lost their lives. The ship was clearly marked as a hospital ship.

PORTUGAL

Armement Adolf Deppe; 1909; Chantiers Navals Anversois; 1,463 tons; 235-5x36x19-5; 150n.h.p.; triple-expansion engines. The Belgian steamship *Portugal* was torpedoed and sunk by a German submarine in the English Channel on August 2nd, 1918.

PORTUGAL

Cie. Nat. Beige de Transp. Maritimes; 1906; Akt. Ges. Neptun; 1,509 tons; 256-7x37-5x16; 132 n.h.p.; triple-expansion engines.

The Belgian ship *Portugal* left Lisbon on January 2nd, 1941, for Methil and Goole, calling at Gibraltar. She left Gibraltar on January 8th and a report was received from her on January 11th, but she was not seen again. She was considered to have been probably sunk by a submarine on January 20th, some 500 miles W. of the Bishop Rock.

PORTUGALETE

Morel, Ltd.; 1882; Palmers' Co.; 1,510 tons; 250-5x35-2x16-9; 99 r.h.p.; compound engines.

The British cargo ship *Portugalete* was wrecked near the entrance to Santander on May 14th, 1901, while on a voyage in ballast from St. Nazaire to Santander.

POSANG

Indo-China S.N. Co.; 1882; London & Glasgow Co.; 1,531 tons; 250'2x35-3x22; 200 h.p.; compound-inverted engines. The British cargo ship *Posang* was wrecked off Steep Island, China, on May 27th, 1884, while on a voyage from Swatow to Shanghai carrying a general cargo.

POSEIDON

United States Shipping Board; 1914; Dunlop, Bremer & Co.; 1,909 tons; 295-8x43-2x17-2; 217n.h.p.; triple-expansion engines.

The American steamship *Poseidon* was sunk in a collision with the British steamship *Somerset*, 9,773 tons, with the loss of six of her crew. The collision occurred off Cape Delaware, U.S., five miles N.N.E. of Five Fathom Bank lightship on July 31st, 1918.

POSEIDON

Koninklijke Nederlandsche Stoomb. Maats.; 1921; Dunlop, Bremner & Co.; 1,928 tons; 295-8x43-2x17-2; 217n.h.p.; triple-expansion engines.

The Dutch tanker *Poseidon* was bound from Demerara to New York when she was torpedoed and sunk by the German submarine *U-653*, some 400 miles N.W. of Bermuda on June 5th, 1942. All the crew of 31 were lost.

POSSIDON

G. N. Pittas Bros. & Co.; 1909; W. Gray & Co.; 3,840 tons; 346-3x50-8x23-1; 274 n.h.p.; triple-expansion engines. The Greek steamship *Possidon* was torpedoed and sunk by a German submarine on September 8th, 1940, on a voyage from Sydney, N.S., to Glasgow. Seventeen of her crew were killed.

POTESTAS

Soc. Anon. Industria Armamento; 1919; Ansaldo San Giorgio; 5,237 tons; 392-8x51-5x27-6; 862 n.h.p.; oilengines. The Italian motorship *Potestas* was sunk by gunfire from German coastal batteries at Kotor on September 20th, 1943.

POTHO

Pathos Shipping Co. (N. J. Nomikos); 1916; A. Vuijk & Zonen; 1,999 tons; 292-7x40-2x—; triple-expansion engines. The Lebanese ship *Potho* went aground, broke into three and sank

on March 15th, 1962, off Sirolo, about seven miles S. of Ancona. Ten of the crew were drowned and 11 saved.

POTLATCH

Weyerhaeuser S.S. Co.; 1920; Moore S.B. Co.; 6,065 tons; 402-6x53x32-2; turbine engines. The American steamship *Potlatch* was torpedoed and sunk by a German submarine on June 27th, 1942, on a voyage from New York to Trinidad. Eight of her crew were killed.

POTOMAC

Mercantile S.S. Co.; 1872; London & Glasgow Co.; 1,832 tons; 262-8x33-1x24-6; 150 h.p.; compound engines. The British cargo ship *Potomac* was wrecked in Bridlington Bay on November 21st, 1893, while carrying a cargo of wheat from Odessa to Aberdeen.

POTOMAC

Anglo-American Oil Co.; 1893; A. & J. Inglis; 3,858 tons; 345-2x44-2x23; 426 n.h.p.; triple-expansion engines. The British tanker *Potomac* was wrecked off Mastic Point, Andros Island, Bahamas, during a hurricane on September 26th, 1929, while on a voyage from Baytown to London and Hull.

POTRERO DEL LLANO

Petroleos Mexicanos S.A.; 1912; Palmers Co.; 4,000 tons; 364X47-5X26-6; 346 n.h.p.; triple-expansion engines.* The Mexican tanker *Potrero del Llano* was torpedoed and sunk by a German submarine on May 12th, 1942, off Miami, on a voyage from Tampico to New York. Thirteen of her crew of 35 were lost.

POWHATAN

Tank Storage & Carriage Co.; 1898; Sir J. Laing & Sons; 6,117 tons; 420-4x53-2x29-1; 567n.h.p.; 11 knots; triple-expansion engines.

The tanker *Powhatan* was torpedoed and sunk by a German submarine 25 miles N. by W. of North Rona, Isle of Bute, on April 6th, 1917. Thirty-six men were killed. The captain was taken prisoner by the submarine.

POWHATTAN

American emigrant ship; 1839; United States; 900 tons. The American emigrant ship *Powhatan*, Capt. Meyers, was on a voyage from Havre to New York. She carried 250 persons, most of whom were of the emigrant class. The ship encountered stormy weather when crossing the Atlantic and approached the American coast in a disabled condition. On April 15th, 1854, she was in the vicinity of Barnegat, New Jersey, when she became entangled in the shoals some 12 miles off the shore. On the afternoon of the next day, Sunday 16th, she struck and became firmly wedged on the Bar about 100 yards from shore.

Capt. Jennings of the local coastguard sent a party of men to bring the rocket apparatus, but they had six miles to go and before their return the ship had begun to break up. The first tragedy was the bursting of her bulwarks and the washing overboard of about 50 persons. Some two hours after this, at about 7 p.m., her masts went by the board and she broke up very rapidly. There were no boats available along the shore and although Capt. Jennings and some of his men waded out for a distance of 75 yards they were unable to rescue a single person from the wreck.

POWIS

Jenkins Bros.; 1889; Palmers' Co.; 2,111 tons; 275-2x37-9x19; 205 n.h.p.; triple-expansion engines.

The British cargo ship *Powis* foundered about 25 miles off Seriphos on June 20th, 1907, while on a voyage from Seriphos to Middlesbrough carrying a cargo of iron ore.

POYANG

Hong Kong, Canton & Macao Steamboat Co.; 1861; Roosevelt & Joyce; 828 tons; 233x31x11-8; vertical beam engines. The wood paddle steamer *Poyang* was lost in a typhoon on May 31st, 1875, while on a voyage from Hong Kong to Macao. About 100 lives were lost in this disaster.

POZZUOLI

A. Lauro; 1915; *Cantiere Navale Triestino*; 5,345 tons; 402-9 x 54-2x28-9; 465 n.h.p.; triple-expansion engines. The Italian steamship *Pozzuoli* was torpedoed and sunk by a British submarine on February 1st, 1943, seven miles from Capo S. Vito, Sicily.

PRESIDENT CHRISTIE

Nordenfjeldske Dampskibs.; 1873; *Bergens Mek. Vcerks.*; 612 tons; 166-6x24-8x20-3; 83 n.h.p.; compound engines. The Norwegian ship *President Christie* was carrying passengers and general cargo from Kirkenes to Oslo. At 2 a.m. on January 31st, 1936, she went aground in a fog at Triesteingrund and sank.

PRAVIA

F. Gonzalez-Fierro; 1883; *Richardson, Duck & Co.*; 1,814 tons; 260x36x20; 187 n.h.p.; compound engines. The Spanish ship *Pravia* was on her way to Bilbao with a cargo of coal on May 14th, 1931, when she was wrecked at San Esteban de Pravia.

PREDSEDMK KOPAJTIC

Jadranska Plovidba D.D.; 1928; *Clyde S.B. & E. Co.*; 1,798 tons; 260-4x40-2x18-2; 188 n.h.p.; triple-expansion engines. The Yugoslav steamship *Predsednik Kopajtic* was torpedoed and sunk by a German submarine on September 21st, 1942, between Trinidad and Demerara.

PREMUDA

Corrado Soc. Anon. di Nav.; 1907; *W. Hamilton & Co.*; 4,427 tons; 376-2x52-3x17-4; 366n.h.p.; triple-expansion engines. The Italian steamship *Premuda* was shelled and sunk by British warships on November 12th, 1940, 12 miles from Saseno.

PRESCOTT

S. J. Ditchfield; 1873; *Richardson, Duck & Co.*; 1,941 tons; 280X35-1x26-1; 160 h.p.; compound engines. The steamship *Prescott*, Capt. Hind, left Sunderland on December 29th, 1894, for Marseilles, and was never seen again. On January 3rd, one of her boats, waterlogged and with oars in the rowlocks, was seen six miles N. of Spurn Head. Other wreckage was found later and it was considered probable that the ship had been sunk in heavy weather while running to the Humber for shelter. She carried a crew of 22.

PRESIDENT

British & American Steam Navigation Co.; 1840; *Curling & Young*; 1,863 tons; 275x37-5x27; 700 i.h.p.; 8-5 knots; side-lever engines.

The paddle steamship *President* was a sister ship to the *British Queen*, both owned by the British & American Steam Navigation Co., which was sponsored by the famous firm of Laird, Birkenhead and Junius Smith, an American lawyer. The ship ran three transatlantic trips, but failed to impart much confidence in her seaworthiness. Her captain was Richard Roberts, an ex-naval lieutenant who had achieved a certain amount of distinction as a resolute commander by forcing the crew of the paddle steamship *Sirius* to continue their voyage across the Atlantic at the muzzle of his revolver. This incident occurred in April, 1838, and when the new ship, the *President*, was completed the company appointed Roberts to be her captain, a position he did not enjoy, for he frankly described her as a 'coffin-ship'.

On March 11th, 1841, the vessel left New York for Liverpool. She carried 136 persons, crew and passengers, among the latter being Tyrone Power, the comedian. Many weeks afterwards a message from him, contained in a bottle thrown overboard, was washed ashore. The message said '*President* sinking fast'; that was all that was ever known of the ill-fated vessel.

The *President* was the first passenger steamship to founder on the transatlantic run.

Her loss brought the British & American Steam Navigation Company to a speedy liquidation.

PRESIDENT COOLIDGE

American President Line; 1931; *Newport News S.S. & D.D.*; 21,936 tons; 615-6x81-3x28-2; 26,500i.h.p.; 21 knots; turbo-electric engines.

The liner *President Coolidge*, acting as an auxiliary transport, was commanded by Capt. Henry Nelson and had on board some 4,000 troops besides crew. On October 26th, 1942, when off Espiritu Santo she struck a mine and sank. Discipline was good and the men took to the boats in excellent order. Of those on board only four soldiers and one seaman lost their lives.

PRESIDENT DOUMER

Ministry of War Transport (Bibby Bros.); 1933; *Societe Provenfale de Construction Navale*; 11,898 tons; 468-5x63-9x 37-8; 1,307n.h.p.; 17knots; oilengines.

The French liner *President Doumer* was taken over by the Ministry of War Transport after the capitulation of France in 1940. On October 30th, 1942, the vessel was some distance N. by E. of Madeira when she was torpedoed and sunk by a German submarine, with the loss of 260 lives.

PRESIDENT FRANCOUI

Purfina-Armement Soc. Anon.; 1928; *New Waterway S.B. Co.*; 4,919 tons; 401X 53x27-8; 489 n.h.p.; oil engines. The Belgium motorship *President Francqui* was torpedoed and sunk by a German submarine on December 29th, 1942, on a voyage from Swansea to New York. Five lives were lost of her complement of 49.

PRESIDENT GRANT

American President Line; 1921; *New York S.B. Corp.*; 10,544 tons; 502-1x62-2x28*3; triple-expansion engines. The American liner *President Grant*, Capt. J. D. Ryan, was wrecked off Ulma Island on February 26th, 1944, whilst serving as a transport. There was no loss of life.

PRESIDENT LEROY LALLIER

Cie. des Bateaux a Vapeur du Nord; 1881; *J. Readhead & Co.*; 1,320 tons; 250'9x33-1x15-1; 186 n.h.p.; compound engines. The French steamship *President LeRoy Lallier* was torpedoed and sunk by a German submarine in the English Channel on April 9th, 1918.

PRESIDENT LINCOLN

United States Government; 1907; *Harland & Wolff*; 18,168 tons; 598-8x68-2x48-3; 827n.h.p.; 14-5 knots; quadruple-expansion engines. The German liner *President Lincoln* became a prize of war of the United States when that country entered the First World War in April, 1917. The ship was used as a transport and helped to bring the American Army to Europe. At 10.40 on the morning of Friday, May 31st, 1918, when returning to America after having brought a contingent of troops to Europe the *President Lincoln* was torpedoed and sunk by a German submarine.

PRESIDENT SERGENT

Ministry of War Transport (Anglo-Saxon Petroleum Co.); 1923; *A tellers & Chantiers de France*; 5,344 tons; 352-9x52-6x31-7; 445 n.h.p.; 10-5 knots; triple-expansion engines. The tanker *President Sergeant*, Capt. P. G. G. Dove, was in the North Atlantic in convoy when she was torpedoed and sunk by a German submarine on November 18th, 1942. Twenty-one men were killed. Capt. Dove was among the survivors.

PRESIDENT TAYLOR

American President Line; 1921; *New York Shipping Co.*; 10,508 tons; 502-1x62-2x28-3; 781 n.h.p.; 13-5 knots; triple-expansion engines.

The liner *President Taylor*, Capt. A. W. Aitten, was wrecked on Canton Island on February 14th, 1942, while serving as a transport. There was no loss of life.

PRESIDENTE TRUJILLO

Compania Naviera Dominicana; 1900; *Howaldtswerke*; 1,668 tons; 240'-4x36x20-9; 204n.h.p.; triple-expansion engines. The Dominican steamship *Presidente Trujillo* was torpedoed and

PRESTO

sunk by a German submarine on May 12th, 1942, soon after leaving Fort de France for San Juan, Puerto Rico. Twenty-four of her crew of 39 were lost.

PRESTO

Pelton Steamship Co.; 1905; J. Crown & Sons; 1,143 tons; 228-4x32-2x14-2; 135n.h.p.; 8-5 knots; triple-expansion engines.

The steamship *Presto* was mined and sunk four miles E. of Roker Point, Sunderland, on April 6th, 1917. Six men were killed. The captain was among the survivors.

PRESTON

General Steam Navigation Co.; 1885; M. Pearse & Co.; 2,099 tons; 275'4x37-2x19-9; 201 n.h.p.; triple-expansion engines.

The British cargo ship *Preston* was wrecked near Camarinas on May 2nd, 1906, while on a voyage from London to Genoa carrying a general cargo.

PRESTON

United States Navy, destroyer; 1936; Mare Island Navy Yard; 1,480 tons; 341-2x34x8-9; 42,800s.h.p.; 36-5 knots; turbine engines; Yarrow boilers; five 5 in. guns, 4 m.g., 8 T.T. The destroyer *Preston* was one of a division of four destroyers comprising, beside herself, the *Benham*, *Gwin* and *Walke*, which was escorting the battleships *Washington* and *South Dakota* and the aircraft carrier *Enterprise*, under command of Rear Admiral W. A. Lee. The object of this squadron was to cut off and, if possible, destroy a Japanese convoy of troops and supplies, covered by a strong naval force, which was proceeding to Guadalcanal in November, 1942.

On the night of the 14th, after the enemy transports had been located by U.S. planes during daylight, Admiral Lee's force made contact with the covering warships and a brisk action ensued in which the Japanese lost the battleship *Kirishima*, 29,330 tons, the heavy cruiser *Kinugasa*, 7,100 tons, and the destroyer *Ayanami*, 1,700 tons, in addition to those sunk on the preceding days.

The American destroyer division made an attack on a mixed group of enemy cruisers and destroyers, but was repelled with the loss of three out of its four units. The *Preston* was hit and sunk by gunfire; the *Benham* was torpedoed and sunk later, and the *Walke* was hit by torpedoes and shells and had to be abandoned, the *Gwin* was damaged and forced to withdraw.

The full story of the battle of Guadalcanal is told under the U.S. cruiser *Atlanta* and the Japanese battleship *Kirishima*.

PRESTONIAN

Becker & Co.; 1901; Ailsa S.B. Co.; 1,152 tons; 223-7x33-2x14-4; 126 n.h.p.; triple-expansion engines.

The British cargo ship *Prestonian* was wrecked in Aberdour Bay on May 25th, 1915. She was carrying a cargo of flax and timber on a voyage from Archangel to Dundee.

PREUSSEN

Laeisz & Co.; 1902; J. C. Tecklenborg A.G.; 5,081 tons; 407-8x53-6x27-1.

The German five-masted schooner *Preussen*, Capt. Nissen, was built of steel and was, at the time of her loss, the largest sailing ship in the world. During the eight years that she was afloat she made several voyages to Japan and was a very successful vessel. She had a cargo carrying capacity of 8,000 tons. On November 4th-5th, 1910, the *Preussen* encountered a heavy gale in the English Channel, and on Sunday morning, the 6th, collided with the Channel steamship *Brighton*, between Newhaven and Dieppe. She was damaged by the impact, losing her jib-boom and springing a leak forward. The Channel steamship lost her mainmast, forward funnel and port boats, the damage being so severe that she put back to Newhaven.

On Sunday evening the *Preussen* anchored off Dungeness but her cables parted and she was driven out to sea. She was picked up by tugs and taken in tow for Dover, but the violence of the seas snapped the tow-ropes when off St. Margaret's Bay, and she ran heavily ashore at the foot of the cliffs, her foremast going by the board. Coastguards and lifeboats were quickly on the scene, but the crew declined at first to abandon their ship as they still had hopes of saving her.

For some weeks the vessel remained hard and fast on the rocks

and it was hoped that she could be salvaged, but during the week January 4th-11th there was a violent gale. The constant pounding of the seas caused the *Preussen* to break in two and all possibility of getting her off vanished. There was no loss of life.

PREUSSEN

German Government; 1926; Stetfner Oderwerke; 2,529 tons; 296-8x38-3x19; 814 n.h.p.; oilengines.

The German motorship *Preussen* struck a mine and sank on July 9th, 1941, off Oland Island, Sweden.

PRIAM

Ocean S.S. Co.; 1870; Scott & Co.; 2,165 tons; 313-2x34x28-2; 220 h.p.; simple engines.

The British steamship *Priam* was wrecked near Corunna on January 12th, 1889, while on a voyage from Liverpool to Shanghai carrying a general cargo. Five of her crew were drowned.

PRIARUGGIA

Messina & C.; 1925; N. Odera fu A. & Co.; 1,196 tons; 209'3x33-9x19-5; 79 n.h.p.; triple-expansion engines. The Italian steamship *Priaruggia* was bombed and sunk by British aircraft on November 28th, 1941, at Benghazi.

PRIMAUGUET

French Navy, cruiser; 1924; Brest Dockyard; 7,249 tons; 594-7x57-5x20-7; 102,000 s.h.p.; 33 knots; turbine engines; Guyot boilers; eight 6-1 in. guns, four 3 in., 7 smaller 12 T.T. On

November 8th, 1942, an American force comprising the new battleship *Massachusetts*, 35,000 tons, nine 16 in. guns, flagship of Rear-Admiral R. C. Giffen commanding the Covering Group, the heavy cruisers *Tuscaloosa* and *Wichita*, 9,975 and 9,324 tons respectively, armed with nine 8 in. guns apiece, and the destroyers *Jenkins*, 2,050 tons, *Wainwright*, 1,570 tons, *Mayrant* and *Rhind*, both of 1,500 tons, escorting a large convoy of transports appeared off Casablanca. The landing was to synchronise with similar operations at Oran and Algiers on the Mediterranean coast of Africa and was to begin at 1 a.m. The French were completely surprised at all points, nevertheless they put up a stout resistance—though of short duration.

The naval and coastal defences of Casablanca were under command of Vice-Admiral F. C. Michelier and the small squadron of warships was commanded by Rear-Admiral Gervais de Lafond. This squadron comprised the new battleship *Jean Bart*, still uncompleted and lying alongside the mole with one turret containing four 15 in. guns trained seawards; the cruiser *Primauguet*, and seven destroyers. The surprise was so complete that the commanders of the French ships were entirely ignorant of the nationality of the enemy they were called upon to face. Fighting commenced at 8.28 a.m. when French destroyers shelled the landing craft W. of Cape Fedhala. At 10 a.m. the *Primauguet*, Capt. Mercier, led a sortie of six destroyers in an attempt to make a torpedo attack on the Covering Group. This failed and the *Primauguet* was hit repeatedly by the heavy cruisers *Augusta* and *Brooklyn*. She steamed back to harbour in a sinking condition and was again hit by bombs from aircraft of the U.S. carrier *Ranger*, which wrecked her bridge, killing Capt. Mercier, and wounding Admiral Lafond. Eventually the cruiser caught fire and was run ashore and burned out. Ten officers and 35 ratings were killed and a much larger number wounded.

The *Jean Bart* was hit by three heavy bombs and put out of action but was subsequently handed over to the French and repaired. All the destroyers except *Valcyon* were sunk.

Fighting ceased at 10 a.m. on November 11th by mutual agreement between the French and Americans, the French retaining such ships as remained to them.

PRIMOS

DeAnduza; 1869; Oswald & Co.; 448 tons; 155-6x27-2x16. The Spanish barque *Primos*, with a cargo of sugar from Havana, left Falmouth on June 22nd, 1871, bound to Greenock. At 4 a.m. on the 24th, in hazy weather, she ran on to the Seven Stones, Scilly Isles, and sank in 12 minutes. A boat was launched but drifted away, the captain and four men got into the captain's gig but this capsized when the barque sank. Only one man was picked up by the islanders after several hours in the water.

PRIMROSE HILL

Sailing Ship Primrose Hill Co.; 1886; T. Royden & Sons; 2,520 tons; 301 • 6x42 • 1x24-7;

The four-masted barque *Primrose Hill*, Capt. J. Wilson, was wrecked near the South Stack, Holyhead, on December 28th, 1900, with the loss of 33 lives.

PRIMULA

British Navy sloop; 1915; *Swan, Hunter*; 1,250 tons; 267x33-5x11 • 7; 2,000 i.h.p.; 16-5 knots; triple-expansion engines; cylindrical boilers; two 4-7 in. guns.

The sloop *Primula* engaged on patrol duties in the Eastern Mediterranean was torpedoed and sunk by a German submarine on March 1st, 1916. Her attacker was the famous *U-35* under command of Cdr. Lothar von Arnauld de la Periere, a German of French descent. The first torpedo struck *Primula* in the bows bringing down her foremast across the deck. Despite these injuries the little ship at once went full speed astern manoeuvring so as to ram the submarine, which narrowly escaped destruction. Von Arnauld fired a second torpedo and then a third, both of which missed. The *Primula*, still going astern, made another attempt to ram but she was hit by a fourth torpedo and sank.

Of the sloop's complement of 110 all were saved with the exception of three ratings. The survivors were landed at Port Said.

PRIMULA

Skibs-AjS Bess; 1918; *De Haan & Oerlemans*; 1,024 tons; 216-5x34-5x13-5; 148 n.h.p.; triple-expansion engines. The Norwegian steamship *Primula* was sunk by mine or torpedo on December 4th, 1939, about 120 miles E. of Stonehaven on a voyage from Oslo to England. Eight of her crew were killed.

PRINCE

General Screw Shipping Co.; 1854; *Blackball*; ^2,710 tons; 300 n.h.p.; 8 knots; compound engines.

The steamship *Prince*, Capt. Goodall, was a new and valuable vessel intended for the Australian trade, but chartered by the Government as a transport. In November 1854 she arrived in the Black Sea with the 46th Regiment for service in the Crimea and a cargo valued at £500,000. The soldiers were landed safely, but the cargo still remained on board. Leaving the harbour of Balaclava the ship dropped anchor outside in 30 fathoms, but the cable had not been properly stopped and ran out and was lost. A second anchor was dropped with the same unfortunate result. The ship then got ready two smaller anchors to which she rode until the gale of November 14th. These, her last cables, parted in the storm, and she was hurled onto the rocks and pounded to pieces.

An endeavour to steam ahead was frustrated by the falling of the masts, which had been cut away, and the cordage of which became entangled with the screw. The vessel broke in two shortly after striking and went to pieces very rapidly.

Only a midshipman and six seamen survived of the *Prince's* crew of 150 officers and men. Capt. Goodall, and Capt. Baynton, R.N., Transport Agent, went down with the ship.

The cargo lost comprised the whole of the winter clothing for the army—40,000 uniforms, with under garments, socks and gloves; a huge consignment of shot and shell and all the medical stores—the latter having been loaded with the usual negligence of the time beneath the ammunition, so that it was impossible to reach it when the ship called at Scutari on her voyage out.

The great gale in Balaclava Bay accounted for much damage to shipping, and had the Admiralty agents been more careful in their dispositions a large part of this might have been averted. On the morning of November 14th there were over 30 ships lying in this unsafe anchorage with the knowledge that a storm was approaching. A protest made to the principal agent by Capt. Lewis of the *Resolute*, which had a valuable Government cargo on board, was unheeded, and the captain was censured for making it.

The British ships *Resolute*, *Kenilworth*, *Rip van Winkle*, *Panola*, *Wild Wave* and the American ships *Progress* and *Wanderer* foundered with great loss of life. Apart from those drowned in the *Prince* a further 340 perished when the above ships were wrecked. Capt. Lewis of the *Resolute* was among the drowned.

PRINCE ALBERT

Ocean Soc. Anon Beige d'Armement & de Navigation; 1904; *Tyne Iron S.B. Co.*; 1,820 tons; 280 X42x18-2; 263 n.h.p.; triple-expansion engines.

The Belgian steamship *Prince Albert* struck a mine and sank in the North Sea on July 30th, 1915.

PRINCE ARTHUR

J. Andersen; 1869; *G. R. Glover & Co.*; 1,666 tons; 247'x40-1x23-7.

The Norwegian barque *Prince Arthur*, on a voyage from Valparaiso to Puget Sound, in ballast, was wrecked in a gale on January 2nd, 1903, near the Ozette River, Cape Flattery, with the loss of 18 lives.

PRINCE PHILIPPE

Belgian Government; 1940; *Soc. Anon. John Cockerill*; 2,938 tons; 357 x49-1x21-4; 2,189 n.h.p.; oil engines. The Belgian motorship *Prince Philippe* was involved in a collision with another ship on July 15th, 1941, in 55° 5' N., 5° 24' W. Only one boat with 29 survivors was picked up.

PRINCE OF WALES

British Navy, dreadnought battleship; 1939; *Cammell Laird & Co.*; 35,000 tons; 739-7x103x27-7; 152,000 s.h.p.; 32 knots; turbine engines; 3-drum boilers; ten 14 in. guns, sixteen 5-25 in., 4pom-poms, 4 aircraft.

The battleship *Prince of Wales* was completed during the Second World War and was commissioned in April, 1941, in time to take some part in the action with the *Bismarck*. In August she was selected to carry Mr. Winston Churchill to his meeting with President Roosevelt in the Western Atlantic. At the conclusion of this meeting at which the Atlantic Charter was formulated *Prince of Wales* returned to fighting service and in November, when relations between the Japanese and the United States were becoming strained, she was sent to Singapore in company with the battle cruiser *Repulse* (which see) 32,000 tons, Capt. W. G. Tennant. The ship was wearing the flag of Admiral Sir Tom Phillips, K.C.B., and was commanded by Capt. John C. Leach, M.V.O., D.S.O. She arrived at Singapore on December 1st, and on the 7th Japan made her surprise attack on the American fleet at Pearl Harbour and Britain immediately became involved in war with that country. The next day a Japanese invasion force commenced to disembark in Malaya.

In view of the urgency of the matter Admiral Phillips decided to take *Prince of Wales* and *Repulse*, together with a flotilla of destroyers, to attack the Japanese and if possible destroy their transports and frustrate their landing. The squadron sailed from Singapore on December 9th and steered for the north-west coast of Malaya, the Admiral hoping to avoid Japanese air observation and make his attack on the following morning. The strongest unit opposed to him was believed to be the battleship *Kongo*, a rather elderly dreadnought built in 1912. One disturbing feature of the expedition was the absence of air protection. There was no aircraft carrier available for the squadron and the Admiral did not request the protection of land-based aircraft until too late to be of service. The ships proceeded to the coast in very cloudy weather, which was unusual at that time of the year, and was most advantageous to aircraft. The *Repulse* signalled the flagship that she was being shadowed by an enemy plane but the Admiral took no action and the squadron continued on its way. After a time the knowledge that the Japanese air reconnaissance would have warned the transports and warships concerned in the landing decided the Admiral to return to his base, and the British ships turned about. At just before noon on the next day, the 10th, an attack by 60 bombers from a height of 15,000 feet was made and the *Repulse* received a bomb in the engine room, *Prince of Wales* escaping with only superficial damage. This raid was followed by a more formidable one made by 27 torpedo carrying aircraft attacking in waves of nine. On this occasion *Repulse* was again hit several times and sank, and *Prince of Wales* had her rudder and propellers damaged to such an extent that she was practically helpless. The vessel was an easy target for the Japanese and was repeatedly hit, sinking about half an hour after her propellers were struck.

The casualties were very high, for *Prince of Wales* carried a complement of 1,625 and *Repulse* a complement of 1,467. Of this number 762 were lost, including Admiral Phillips and Capt. Leach.

PRINCESS

PRINCESS

W. S. Bailey; 1869; Humphrey & Pear son; 1,212 tons; 248x32-5x17-3; 120 h.p.; compound engines.

The British cargo ship *Princess* was wrecked near Ostergarth Light, Gothland, on July 23rd, 1888, while on a voyage from St. Petersburg to London carrying a cargo of oats.

PRINCESS

Taylor & Sander son; 1883; Short Bros.; 2,094 tons; 286 x 38-6x20-6; 180 h.p.; compound engines.

The British cargo ship *Princess* was wrecked during a storm off Flamborough Head on November 19th, 1893, while on a voyage from Bilbao to Sunderland carrying an ore cargo. All on board were lost.

PRINCESS ALICE

London Steamboat Co.; 1865; J. Caird & Co.; 251 tons; 219-2X 20-1x8-4; 140i.h.p.; 12 knots; oscillating engines. The *Princess Alice*, Capt. W. Grinstead was, for her time, a large and commodious river steamship. On the day on which the disaster occurred the weather was fine and warm, attracting many excursionists, and the vessel left London at about 10 a.m. on September 3rd, 1878, with a full load, bound for Gravesend and Sheerness. At about 6 p.m. she left Gravesend on the return trip, being crowded almost to capacity, the number of passengers and crew being estimated at nearly 900. The evening was fine and clear.

At 7.40 p.m., while in Gallion's Reach, about one mile below Woolwich, the *Princess Alice* met the collier *Bywell Castle*, 1,376 tons, Capt. T. Harrison, proceeding upon an opposite course, being at the time in charge of a Thames pilot. The collier was high out of the water, having discharged her coal and returning in ballast. This circumstance made her deck almost inaccessible to the drowning passengers after the collision.

As the two vessels approached each other there were a few moments of fatal indecision on the part of Capt. Grinstead. There were warning shouts from both ships and then the pleasure steamship ran athwart the bows of the collier; being struck on the starboard sponson aft of the paddle-box.

The collier's bow drove into the other's engine room, almost cutting her in two. The bow portion of the *Princess Alice* sank immediately, taking with it all those passengers sitting there. The tide was at two hours ebb, and the *Bywell Castle* under the force of this, and the way from her engines, was swept some distance down before she could stop and drop anchor.

For a few minutes there were scenes of indescribable horror and utmost confusion. According to a statement by Capt. Harrison three boats were got out by the *Bywell Castle*, one of these being a large ship's lifeboat which took some time to lower, and this delay coupled with the distance which the ship had drifted from the wreck, greatly retarded the work of rescue. The pleasure steamship *Duke of Teck*, belonging to the same company as the *Princess Alice*, arrived about ten minutes after the disaster and took on board some survivors. From the moment of the collision to when the vessel foundered was only a brief four to five minutes, allowing scant time for ships in the vicinity to send aid.

The number lost is generally assumed to be 640 persons, including Capt. Grinstead. Those saved numbered a little over 200.

PRINCESS DAGMAR

M. Langlands & Sons; 1907; Napier & Miller; 913 tons; 236-3x34-2x16; 116n.h.p.; 8-5 knots; triple-expansion engines.

The steamship *Princess Dagmar* was torpedoed and sunk by a German submarine on, or about May 7th, 1918, in the Bristol Channel. The captain and 23 crew were killed.

PRINCESS IRENE

Canadian Pacific Railway Co.; 1914; W. Denny & Bros.; 5,934 tons; 395x54x17; 15,000 s.h.p.; 22-5 knots; turbine engines; two 4 in. guns, two 3 in., 400 mines. The liner *Princess Irene*, Capt. M. H. Cobbe, and her sister ship the *Princess Margaret*, were two new vessels completed in 1914 and taken over by the Admiralty for service as minelayers. On May 27th, 1915, the *Princess Irene* was lying in Sheerness Harbour undergoing repairs. In addition to her crew she had 78 dockyard workmen on board when, at about 11.15 a.m. she blew up. Two

columns of flame, estimated to have reached a height of 300 feet, shot up from the ship in quick succession, followed by a tremendous explosion.

At the time of the disaster there were 30 officers and 23 ratings on board in addition to the dockyard workmen. Only one workman and a few seamen escaped.

PRINCESS KATHLEEN

Canadian Pacific Railway Co.; 1925; J. Brown & Co.; 5,908 tons; 350-1X 60-1 x 25-8; steam turbine engines.

The Canadian steamship *Princess Kathleen* was wrecked at Lena Point, Favorite Channel, about 31 miles N. of Juneau, Alaska, during a gale on September 7th, 1952. She was carrying 300 passengers and a general cargo from Vancouver to Skagway.

PRINCESS MARGUERITE

Canadian Pacific Railway Co.; 1925; John Brown & Co.; 5,875 tons; 350-1x60'1x25'8; 2,462 n.h.p.; 21 knots; turbine engines. The liner *Princess Marguerite*, carrying about 1,000 troops from Port Said to Famagusta, was torpedoed and sunk by a submarine on August 17th, 1942, N. of Port Said. Forty-nine lives were lost.

PRINCESS MARY

Southampton, Isle of Wight & South of England Royal Mail Steam Packet Co.; 1911; Day, Summers & Co.; 326 tons; 195-2x 24-1x8-1; 137 n.h.p.; 16 knots; diagonal compound engines. The paddle steamship *Princess Mary* was taken over by the Admiralty early in the First World War for service as a minesweeper. She survived the war but on August 2nd, 1919, when in the Dardanelles, ran into the wreck of the battleship *Majestic* and tore her bottom out, sinking in a very short time. She carried a complement of about 60.

PRINCESS ROYAL

M. Langlands & Sons; 1912; Caledon S.B. & E. Co.; 1,986 tons; 291-4x38-2x14-1; 217n.h.p.; 9 knots; triple-expansion engines.

The steamship *Princess Royal* was torpedoed and sunk by a German submarine three miles W.N.W. of St. Agnes Head, Cornwall, on May 26th, 1918. Nineteen men were killed. The captain was among the survivors.

PRINCESS SOPHIA

Canadian Pacific Railway Co.; 1912; Bow, McLachlan & Co.; 2,320 tons; 245-2x44-1x24; 366n.h.p.; 14-5 knots; triple-expansion engines.

The Canadian steamship *Princess Sophia* left Skagway for Vancouver on October 25th, 1918, with 346 persons, most of the passengers coming from Dawson City or from Alaska. When four hours out the liner ran into a thick snowstorm and during the time that this persisted got considerably off her course, and on the 26th struck on the Vanderbilt Reef, Lynn Canal. Here she remained firmly wedged for 40 hours, the snowstorm giving place to a violent gale. The ship's anchors being unable to hold on the rocky bed she was swept off the reef and foundered with all on board. Next morning nothing of her was visible except a portion of the foremast.

PRINCESS VICTORIA

London, Midland & Scottish Railway Co.; 1939; W. Denny & Bros.; 2,197 tons; 309-8x48-1x13; 875 n.h.p.; 21 knots; oil engines.

The passenger motorship *Princess Victoria* was taken over by the Admiralty early in the Second World War for service as an auxiliary minelayer. She was commanded by Capt. J. B. E. Hall and carried a complement of some 120. On Sunday, May 19th, 1940, when off the entrance to the Humber, she struck a mine and sank very rapidly. Of those on board Capt. Hall, three officers and 32 ratings, of whom seven were employees of the L.M.S. company, were killed. Eighty-five survivors were landed at an east coast port on the same day.

PRINCESS VICTORIA

British Transport Commission; 1947; W. Denny & Bros.; 2,694 tons; 309-8x48-1x13; 19 knots; oil engines. The motorship *Princess Victoria*, employed on ferry service

between Stranraer and Larne, left Stranraer at 7.45 a.m. on January 31st, 1953, with 127 passengers and 49 crew, in bad weather. The weather worsened and a strong northerly gale developed.

At 9.46 a.m. the ship wirelessed that she was hove-to off the mouth of Loch Ryan, not under command and needed assistance.

The destroyer *Contest* put out from Greenock and was expected to reach the ship's position by 1 p.m.; the salvage tug *Salveda* also went to help together with other ships in the vicinity.

At 10.32 a.m. the doors at the after end of the car deck were stove in by heavy seas and the accumulation of water in the car deck caused the ship to list to starboard. By noon the list had increased to 35 degrees.

The last message, at 1.58 p.m., said that the ship was on her beam ends with engine room flooded and was being abandoned. She sank soon afterwards.

Meanwhile *Contest*, already delayed by the gale, was hampered in her search because the ship's reported position was at variance with the bearing taken by Portpatrick W.T. Station on her signals. Furthermore the yawing of the destroyer at high speed in heavy seas prevented the use of her radar direction finder. Rockets were fired by the *Princess Victoria* but owing to her list, did not reach sufficient height to be observed.

Consequently no help arrived until after the ship had sunk but *Contest* and other ships picked up 42 persons, mostly from rafts. The search for other possible survivors by naval craft and lifeboats was maintained during the remaining hours of daylight and resumed at first light on the following day, but without success.

PRINCESSE MARIE JOSE

Ocean Soc. Anon. Beige d'Armement & de Navigation; 1909; Soc. Anon. John Cockerill; 1,954 tons; 299-3x41-9x18-4; 278 n.h.p.; triple-expansion engines.

The Belgian steamship *Princesse Marie Jos* was torpedoed and sunk by a German submarine in the North Sea on July 29th, 1915.

PRINCETON

United States Navy, light aircraft carrier; 1942; New York Shipbuilding Corp.; 11,000 tons; 618x71-5x20; 100,000 s.h.p.; 33 knots; turbine engines; four 5 in. guns, many smaller, 45 aircraft.

The U.S. light aircraft carrier *Princeton* was a unit of the Third U.S. Fleet, commanded by Admiral W. F. Halsey. She was bombed and sunk by Japanese land-based aircraft on the second day of the battle of Leyte Gulf, October 24th, 1944. Her magazines were hit by a salvo of bombs which penetrated her upper decks, but although the havoc was very great she did not sink immediately. Ships in company which went to her assistance were damaged by the explosions which rent her hull. Fortunately the casualties were not heavy and her captain, 133 officers and 1,227 ratings were taken off, after which she was sunk. The air fighting was of the most bitter character and 150 Japanese aircraft were shot down.

The full story of the battle of Leyte Gulf is told under the battleship *Musashi*.

PRINCIPE DE ASTURIAS

Pinillos, Izquierdo & Co.; 1914; Russell & Co.; 8,371 tons; 460x58-2x29-3; 1,134 n.h.p.; 17 knots; quadruple-expansion engines.

The liner *Principe de Asturias* was one of the finest and most modern in the Spanish mercantile marine. On February 24th, 1916, she left Las Palmas, on a voyage from Barcelona to Buenos Aires, having on board 588 persons, of whom 395 were passengers. Her trip across the Atlantic was without incident until, on Sunday, March 5th, she ran into thick fog in the neighbourhood of Ponta Boi, Sao Sebastiao, on the coast of Brazil. At 4.15 a.m. she struck the rocks three miles E. of Ponta Boi with such violence that several of her boilers exploded causing her to capsize and then break in two. There was very little time to save life and within a few minutes the *Principe de Asturias* had foundered in 22 fathoms.

Eighty-six of the crew and 57 passengers were picked up by the French steamship *Vega*, but 107 crew and 338 passengers were drowned.

PRINCIPE UMBERTO

Navigazione Generale Italiana; 1907; Cantieri Navale Riuniti; 7,929 tons; 476-1x53-5x18-9; 760 n.h.p.; 16-5 knots; quadruple-expansion engines.

The liner *Principe Umberto* with two other transports and a destroyer escort was crossing the Lower Adriatic on June 9th, 1916, when an attack was made on the convoy by two Austrian submarines. The only ship to be hit was the *Principe Umberto*, which was badly damaged and sank in a few minutes, taking with her about half the large number of troops on board.

PRINCIPESSA LAETITIA

Navigazione Alia It alia; 1903; Cant. Nav. di Muggiano; 4,011 tons; 336 X48x 24; 356 n.h.p.; triple-expansion engines. The Italian steamship *Principessa Laetitia* was torpedoed and sunk by a submarine in the Mediterranean on March 14th, 1918.

PRINCIPESSA MAFALDA

Navigazione Generale Italiana; 1908; Societa Esercizio Bacini; 9,210 tons; 485-2x55-6x32-6; 917n.h.p.; 18-5 knots; quadruple-expansion engines.

The Italian liner *Principessa Mafalda*, Capt. S. Guli, left the Cape Verde Islands for Rio de Janeiro on October 8th, 1927, with 971 passengers and a crew of 288. At 5.10 on the afternoon of the 25th, when nearing Abrolhos Island, off Brazil, the ship passed close to the Blue Star steamship *Empire Star*, 7,199 tons, Capt. C. R. Cooper. Ten minutes later an S.O.S. from the liner stating 'Danger to engines', was received by the *Empire Star*, which at once turned back to find the Italian liner lying-to with her boats hoisted out. Hundreds of passengers were crowding the upper decks evincing the greatest excitement, some even jumping into the sea, while the boats were lowered with every sign of panic, and were so overcrowded that two of them capsized immediately they reached the water. The *Empire Star* sent her boats to pick up as many as they could of the struggling people, being joined as time went on by the French ships *Formose*, 9,975 tons, and *Mosella*, 10,123 tons; the German ship *Alhena*, 4,930 tons, and the British ships *Avelona*, 1,300 tons, *King Frederick*, 5,106 tons, and *Rossetti*, 6,540 tons.

It appears that when about 90 miles from Abrolhos Island the port propeller shaft broke, water entered the boiler room and the boilers burst. The passengers were alarmed at first, but Capt. Guli's explanation that the engines had broken down sufficed to reassure them. Later, when it was noticed that the ship was settling down in the water with a slight list to port, a panic swept over the unfortunate people, transforming what was previously a mere mishap into a tragedy. The crew, instead of being allowed to carry on with the task of saving the vessel, were compelled to divert their energies to controlling the passengers which, as events proved, was beyond their powers.

The ship remained afloat for four hours and 20 minutes, and at 9.40 she capsized and sank. The drowned numbered 314, including the captain and eight officers.

PRINCIPIA

Arrow Shipping Co.; 1881; Palmer's Co.; 2,749 tons; 316-7X 39-2x26-7; 269 n.h.p.; compound engines.

The British cargo ship *Principia*, Capt. Stannard, caught fire and sank when she subsequently struck a rock off the Faroe Islands on November 21st, 1895. She was on a voyage from the Tyne, via Dundee, to New York carrying a general cargo which included coal and jute. The captain and 27 others were drowned and only one man was saved.

PRINDOC

Paterson Steamships; 1901; West Bay City S.B. Co.; 3,813 tons; 364-8x50-2x23-8; 218 n.h.p.; triple-expansion engines. The Canadian steamship *Prindoc* sank after a collision with the *Battle ford* near Passage Island, Lake Superior, on June 1st, 1943. She was trading in the Great Lakes and was bound for Goderich, Ont., carrying a cargo of wheat.

PRINGLE

United States Navy, destroyer; 1942; Charleston Navy Yard; 2,050 tons; 376-5x40-5x12-5; 60,000 s.h.p.; 36 knots; turbine engines; six 5 in. guns, twelve 40 mm.AA., eleven 20 mm.AA., 4 d.c.t., 10 T.T. The United States destroyer *Pringle*, Lt. Cdr. J. L. Kelley, was on

PRINS ALEXANDER

radar picket station off Okinawa Island, in April 1945. On the 16th she was subjected to an attack by three Japanese bombers, one of which crashed abaft the base of her forward funnel. The explosion which followed was of great violence, buckling the destroyer's keel and causing her to break in two.

The *Pringle* sank very rapidly with the loss of 65 officers and men killed and 110 wounded.

PRINS ALEXANDER

Lim Tjip Hiang; 1872; *Blackwood & Gordon*; 1,009 tons; 246x30x17; 146 n.h.p.; compound engines. The Dutch steamship *Prins Alexander* was sunk in a collision with the steamship *Ban Hin Guan*, 449 tons, off Malacca, on July 30th, 1902. Of those on board 40 were drowned.

PRINS FREDERIK

Stoomv. Maats. Nederland; 1882; *J. Elder & Co.*; 2,997 tons; 350 x 39 - 4 x 21 - 2; 500 n.h.p.; compound engines. The Dutch steamship *Prins Frederik* was bound from Holland to Java. She carried 170 persons, a number of whom were troops, and a general cargo, part of which was specie. On June 25th, 1890, when at the western end of the Channel in fog she was sunk in a collision with the British steamship *Marpessa*. The discipline on board was good, and all save seven soldiers got away in safety. The *Marpessa* was badly damaged but managed to reach Falmouth on the 27th.

PRINS FREDERIK HENDRIK

Maats. Zeetransport N.V.; 1936; *Fredrikstad Mek. Verksted*; 1,288 tons; 250-4x42-2x14; 96 n.h.p.; compound engines. The Dutch steamship *Prins Frederik Hendrik* was bombed and sunk by German aircraft on March 8th, 1941, on a voyage from Cardiff to Bathurst. Eight of her crew were killed.

PRINS HARALD

Norwegian Government; 1942; *Wm. Doxford & Sons*; 7,244 tons; 428-8x56-5x35-5; 516 n.h.p.; oilengines. The Norwegian motorship *Prins Harold* was torpedoed and sunk by a German submarine on November 20th, 1942, on a voyage from the Clyde to North Africa.

PRINS MAURITS

Koninklijke West Indische Mailldienst; 1900; *Blohm & Voss*; 2,21 tons; 284x38x19-8; 266 n.h.p.; triple-expansion engines. The Dutch steamship *Prins Maurits* was bound from New York to the West Indies when she was overwhelmed by a hurricane. She sank on April 3rd, 1915, about 90 miles N.E. of Cape Hatteras. Forty-nine of those on board were drowned.

PRINS OLAV

Det Nordenfjeldske D/S; 1907; *A. & J. Inglis*; 2,147 tons; 275-3x40-1x21-2; 187 n.h.p.; compound engines. The Norwegian steamship *Prins Olav* was bombed and sunk by German aircraft on June 9th, 1940, 70-80 miles E. of Rost Island, North Norway.

PRINS VAN ORANJE

Netherlands Navy, minelayer; 1931; *N. V. Scheepsbouw Maats. de Maas*; 1,291 tons; 216x36x11; 1,750i.h.p.; 15 knots; triple-expansion engines; two 3 in. guns, 6 smaller. On January 10th, 1942, the Japanese landed an invasion force on the island of Tarakan in the Dutch East Indies. The Dutch possessed a small but efficient fleet in those waters but it was not sufficient to protect the many important ports and bases in any strength. The minelayer *Prins van Oranje*, of 1,291 tons and very lightly armed, was the only vessel available at Tarakan. She acknowledged and presumably carried out the orders of the Netherlands Naval Command but nothing more was heard of her, and she was believed to have been sunk by a greatly superior Japanese force on January 12th.

The *Prins van Oranje* carried a complement of 121.

PRINS WILLEM H

Koninklijke West Indische Mailldienst; 1890; *Koninklijke Fabrik van Stoom en Andre Werk*; 1,621 tons; 264 x 36x20-7; 250 n.h.p. triple-expansion engines. The Dutch steamship *Prins Willem II*, Capt. van Slooten, left

Amsterdam for Paramaribo on January 21st, 1910. She carried a crew of 39 and 14 passengers, as well as a general cargo. She passed Ushant on the 23rd, after which she was never heard of again.

On March 16th and subsequently, a case of varnish, lifebuoys and oars, all from the *Prins Willem II*, were washed ashore at Belle Isle on the west coast of France, and at St. Nazaire. This was sufficient proof that the ship had foundered in European waters and the Dutch West Indies Line announced that the vessel was probably lost off the coast of France between January 23rd and 29th, 1910, with all on board.

PRINS WILLEM H

Maats. Zeetransport N.V.; 1938; *Fredrikstad Mek. Verksted*; 1,304 tons; 250-4x42-2x14; 82 n.h.p.; compound engines. The Dutch steamship *Prins Willem II* was torpedoed and sunk by a German submarine on April 8th, 1941, on a voyage from Halifax to London. Ten of her crew were killed.

PRINS WILLEM HI

Maats. Zeetransport N. V.; 1939; *N. V. Scheepswerf De Merwede*; 1,524 tons; 250-3x42x17-7; oilengines. The Dutch motorship *Prins Willem III* was torpedoed by German aircraft on March 26th, 1943, N. of Cherchell, Algeria. The ship was taken in tow by the British tug *Hengist* but capsized and sank at 2.40 a.m. the next day. Ten of her crew and one gunner were lost.

PRINSES ASTRID

Belgian State Railways; 1931; *Soc. Anon. John Cockerill*; 2,950 tons; 347x46-2x22-8; 2,779 n.h.p.; 23 knots; turbine engines.

The steamship *Prinses Astrid* left Ostend for Dover on June 21st, 1949, with 218 passengers and 65 crew. When some three miles off Dunkirk, proceeding through a shallow channel leading to that port, she struck a mine.

The explosion killed five members of the crew and injured five passengers, and the ship began to sink. The captain managed to run her on to a sandbank, where she remained long enough for the passengers and crew to be taken off by the French steamship *Cap Hadid* which landed them at Dunkirk without further loss of life.

On the following day the British Admiralty issued a statement on behalf of the International Mine Clearance Board stating that the channel had been declared safe in 1946. It was thought that the mine had been buried in the sand and had been recently washed free by the seas.

PRINSES IRENE

J. Burning; 1939; *Bodewes Scheepswerven*; 400 tons; 143-8x26-1x9-2; oil engines.

The Dutch motorship *Prinses Irene* was sunk in a collision with the American steamship *Leonidas Polk*, 7,191, ten miles W. of the Mull of Galloway on December 3rd, 1943, the *Prinses Irene* going down with ten of her crew.

PRINSES JULIANA

Stoomvaart Maats. Zeeland; 1909; *Fair field Co.*; 2,885 tons; 349-dx42-7x16-4; 1130 n.h.p.; triple-expansion engines. The Dutch steamship *Prinses Juliana* struck a mine and sank in the North Sea on February 1st, 1916.

PRINSES JULIANA

Stoomvaart Maats. Nederland; 1920; *Koninklijke Maats. De Schelde*; 2,908 tons; 350-4x42-7x23-9; 1,180 n.h.p.; triple-expansion engines.

The Dutch steamship *Prinses Juliana* was bombed and sunk by German aircraft on May 12th, 1940, off the Hook of Holland.

PRINSESSE RAGNHILD

Det Nordenfjeldske D/S; 1931; *Fredrikstad Mek. Verksted*; 1,590 tons; 236-1x37-6x21; 139 n.h.p.; compound engines. The Norwegian steamship *Prinsesse Ragnhild* struck a mine and sank on October 23rd, 1940, in the Landegode Fjord, Norway. Twenty-four crew and 54 passengers were lost.

PRINZ ADALBERT

German Navy, armoured cruiser; 1901; Kiel Dockyard; 9,050 tons; 394x65x25-7; 18,500 i.h.p.; 21 knots; triple-expansion engines; Durr boilers; four 8-2 in. guns, ten 6 in., ten 15 pdr., 4 m.g., 4 T.T.

The German armoured cruiser *Prinz Adalbert*, Capt. W. Bunne-
mann, was a victim of one of the British submarines sent to the Baltic in 1915—the *E-8*. This submarine, under command of Lt. Cdr. F. H. H. Goodhart, was despatched to Reval in August 1915, and had a most exciting trip through the Kattegat, being continuously chased and harried by enemy light craft from August 19th to the 22nd, at which date she made contact with *E-9*, Cdr. Max Horton, and later anchored in Reval Harbour. On October 23rd, 1915, the Germans sent out from Libau a small force consisting of the *Prinz Adalbert* and two destroyers. The ships were steaming west at about 15 knots on a zig-zag course. At 9.28 a.m. the *Prinz Adalbert* was hit by a torpedo fired at 3,000 yards by *E-8*, which exploded her fore magazine and caused her to blow up immediately. The *Prinz Adalbert* carried a complement of 557, nearly all of whom were drowned.

PRIVET

Newry & Kilkeel S.S. Co.; 1936; Scott & Sons; 360 tons; 142-2x23-6x10-5; 62 n.h.p.; triple-expansion engines. The British cargo ship *Privet*, Capt. Parry, was lost without trace on a voyage from Liverpool to Belfast. She sailed from Liverpool on December 5th, 1940, with a cargo of coal and carried a crew of nine.

PRO PATRIA

Netherlands Navy, minelayer; 1922; Sourabaya Dockyard; 537 tons; 154x28-2x—; 650 n.h.p.; 10 knots; one 3 in.A.A., 2m.g.
The minelayer *Pro Patria* was one of the units of the ill-fated Allied East Indies Squadron nearly all of which were lost in February or the early days of March, 1942. On February 16th, the vessel was attacked by a superior Japanese force at Palembang and sunk in action. Her normal complement was 61.

PROBITAS

Soc. Anon. Industria e Armamento; 1919; Ansaldo San Giorgio; 5,084 tons; 392-9x51-7x27-6; 862n.h.p.; oilengines. The Italian motorship *Probitas* was bombed and sunk by German aircraft on September 25th, 1943, on a voyage from Santi Quaranta to Brindisi.

PROCIDA

R.M.Sloman Jr.; 1927; A. G. Neptun; 1,842 tons; 287-9 x 41-1x16-9; 192n.h.p.; triple-expansion engines.
The German steamship *Procida* was sunk by British light naval forces on November 24th, 1941, off Crete.

PRODANO

W.&T. W.Pinkney; 1890; Blyth S.B. Co.; 2,476 tons; 314-5X 40x17-9; 239 n.h.p.; triple-expansion engines. The British cargo ship *Prodano* was wrecked at St. Mary's Bay, N.F.L., on October 2nd, 1899, while on a voyage from Baltimore to Leith carrying a general cargo.

PRODROMOS

Cia. Nav. Prodromos S.A.; 1943; Permanente (Shipyard No. 2); 7,194 tons; 422-8x57x—; triple-expansion engines. The Greek ship *Prodromos* was involved in a collision with the *King Minos* on December 3rd, 1958, during a fog, about two and a half miles S. of Rye harbour. The forepart was taken in tow, but no trace was found of the afterpart which was cut off from No. 5 hatch.

PRODUCE

J.Odland; 1905; Nylands Varksted; 1,171 tons; 225x33-7x 19; 109 n.h.p.; triple-expansion engines.
The Norwegian ship *Produce* went ashore on April 3rd, 1940, on North Reef, Paracel Island. She broke up rapidly as she was in a very exposed position.

PROFESSOR GRUVEL

A/S Congo (S. L. Christensen); 1882; C. Mitchell & Co.; 3,310 tons; 336-8x41-4x26-5; 270 n.h.p.; triple-expansion engines.
The Norwegian whale oil refinery *Professor Gruvel* was sunk by ice on October 12th, 1927, about 600 miles S. of the Falkland Islands.

PROFIT

D/S A/S Produce; 1918; Laxevargs Maskin & Jernskibs.; 1,608 246-2x37-9x15-6; 138 n.h.p.; triple-expansion engines. The Norwegian steamship *Profit* struck a mine and sank on April 17th, 1941, on a voyage from London to Hull. Twelve of her crew were killed.

PROGRESO

B. Samuelson & Co.; 1904; Fevigs Jernskibsbyggeri; 1,620 tons; 258x36-9x13-9; 205n.h.p.; triple-expansion engines. The Norwegian steamship *Progreso* was sunk by a German submarine in the Bay of Biscay on February 14th, 1917.

PROMINENT

D/S A/S Produce; 1918; Hong Kong & Whampoa Dock Co.; 1,377 tons; 270-6x40-1x19-4; 215n.h.p.; triple-expansion engines.
The Norwegian steamship *Prominent* was shelled and sunk by Japanese warships on March 2nd, 1942, 230 miles S. of Tjilatjap. Nine of her crew and five passengers were killed.

PROFITIOUS

Taylor and Sander son; 1880; ShortBros.; 1,781 tons; 278x37x 18-5; 187 n.h.p.; compound engines.
The British cargo ship *Profitious* was wrecked on Bilbao breakwater on April 26th, 1901. She was carrying an ore cargo from Bilbao to Middlesbrough.

PROSERPINA

Soc. Co-operativa di Nav. Garibaldi; 1926; A. Duncan & Co.; 4,870 tons; 375-1x51-7x29; 470 n.h.p.; triple-expansion engines.
The tanker *Proserpina* was formerly the French *Beauce*, taken over by the Italians. On October 26th, 1942, she was torpedoed and sunk by British aircraft 30 miles off Tobruk.

PROSPER IH

H. Westfal Larsen; 1912; Sunder land S.B. Co.; 4,297 tons; 364 x 50 - 7 x 26 • 1; 310 n.h.p.; triple-expansion engines. The Norwegian steamship *Prosper III* struck a mine and sank in the Bay of Biscay on June 4th, 1916.

PROSPER SCHIAFFINO

Societe de Nav. Algerienne pour VAFrique du Nord; 1901; Bergens Mek. Verksted; 1,699 tons; 256-8x39-2x18-2; 225 n.h.p.; triple-expansion engines.
The French steamship *Prosper Schiaffino* struck a mine and sank on November 10th, 1945, off Porquerolles on a voyage from Oran to Nice. Five lives were lost.

PROTECTOR

The Tyne Pilotage Commissioners; 1907; J. P. Rennoldson & Sons; 200 tons; 110x22-1x10-7; SOr.h.p.; triple-expansion engines.
The pilot cutter *Protector* struck a mine off the entrance to the River Tyne on December 31st, 1916. The captain and 18 crew were lost.

PROTEUS

SaguenaY Terminals; 1913; Newport News S.B. & D.D. Co.; 10,653 tons; 502-1x62-3x37; 756n.h.p.; triple-expansion engines.
The Canadian steamship *Proteus* sailed from St. Thomas on November 23rd, 1941, on a voyage to Portland, Me., carrying a cargo of bauxite. She was lost without trace and from subsequent German reports it is probable that she was sunk by war causes on November 25th.

PROVVIDENZA

PROVVIDENZA

Fratelli Rizzuto; 1913; W. Dpxford & Sons; 8,459 tons; 485-1x58x28-5; 723 n.h.p.; triple-expansion engines. The Italian steamship *Provvidenza* was torpedoed and sunk by a British submarine on September 22nd, 1940, three and a half miles from Punta Imperatore, Ischia.

PRUDENTIA

J.M.Lennard&Sons; 1889; Palmers'Co.; 2,781 tons; 312X 40-2x19-8; 269 n.h.p.; triple-expansion engines. The British tanker *Prudentia* sank after a collision off Lpnghope on January 12th, 1916, while employed as an Admiralty oiler.

PRUDENZA

Soc. Anon. di Navigazione Adriatica; 1893; Short Bros.; 3,307 tons; 351-7x45-1x16-2; 291 n.h.p.; triple-expansion engines. The Italian steamship *Prudenza* was sunk by a submarine in the Mediterranean on February 18th, 1917.

PRUNELLA

British Navy; 1930; D.Rowan&Co.; 4443tons;375x53x25-6; triple-expansion engines. The s.s. *Cape Howe*, owned by the Lyle Shipping Co., was taken over by the British Navy in 1939, converted into an anti-submarine 'Q' ship, and renamed *Prunella*. She was torpedoed and sunk south of Iceland on June 21st, 1940.

PRUNELLE

The Shipping Controller (H. W. & C. M. Ezard); 1874; Malmo; 579 tons; 155-9x26-7x12-9; 65r.h.p.; 8 knots; compound engines. The steamship *Prunelle* was torpedoed and sunk by a German submarine two miles S.E. of Blyth on August 22nd, 1918. The captain and 11 crew were killed.

PRUSA

Tampa Inter ocean S.S. Co.; 1919; American International S.B. Corp.; 5,113 tons; 390x54-2x27-6; turbine engines. The American steamship *Prusa* was torpedoed and sunk by a Japanese submarine on December 18th, 1941, about 100 miles S. of Hawaii on a voyage from the Philippines to Baltimore. Eight of her crew were lost.

PRUTH

Hain S.S. Co.; 1916; J. L. Thompson & Sons; 4,698 tons; 400x53x26; 421 n.h.p.; triple-expansion engines. The British steamship *Pruth* was wrecked at the entrance to Port Moresby on December 30th, 1923. She was on a voyage from New York, via Samarai and Port Moresby, to Cairns, Queensland, carrying a general cargo.

PSARA

Greek Navy, destroyer; 1932; Odero, Genoa; 1,389 tons; 303 X 32x12-6; 40,000 s.h.p.; 39-5 knots; turbine engines; Express boilers; four 4-7 in. guns, three 40 mm., 6 T.T. 40 mines. The Greek destroyer *Psara* was lying off Megara on April 20th, 1941, when she was attacked by a squadron of German Stuka bombers. The ship's ability to defend herself was greatly limited by the fact that she was at anchor when the enemy arrived, nevertheless she put up a strong defence but a hit by a heavy bomb shattered her from bow to bridge. Of her complement of 156 about 40 officers and ratings were killed by this one bomb, after which the *Psara* slowly sank. Her gunners continued to fire until the water rose to the breeches of the guns.

Capt. Mezeviris, commanding the Greek flotilla, was among the survivors.

The Greek warships which joined the Allied navies were the old armoured cruiser *Averof*, 9,450 tons, four 9-2 in. guns, the destroyers *Spetsai* and *Coundouriotis* of 1,389 tons each, the *Vasilissa Olga*, 1,350 tons, the *Aetos*, *Ierax* and *Panther* of 1,050 tons each, two torpedo boats and six submarines. Most of these ships united at Alexandria.

PSYCHE

British Navy, despatch vessel; 835 tons; 250 n.h.p.; steam engines; 2 guns. The paddle steamer *Psyche*, Lt. J. Fellowes, was wrecked on Point Mechini, Sicily, on December 15th, 1870. The number lost is not known.

PTARMIGAN

General Steam Navigation Co.; 1891; Gourlay Bros.; 784 tons; 220 X 30 - 6 x 13; 121 n.h.p.; 10 knots; triple-expansion engines. The British steamship *Ptarmigan* was on a voyage from London to Rotterdam when she was torpedoed by a German submarine six miles W. by N. of the North Hinder lightship at 6.30 a.m. on April 15th, 1915. The ship which carried a general cargo and had a crew of 17, was hit on the port side aft and sank in a very few minutes. From survivors' statements it was learned that the periscope of the submarine was sighted about two minutes before the torpedoing took place. The speed at which both vessels were going brought them to within 50 yards of each other, at which range the torpedo was discharged. Of the *Ptarmigan's* crew eight were killed, the survivors, including the captain, being picked up by the Dutch steamship *Veghtstroom*, which brought them to Gravesend.

PUCCINI

Tirrenia Soc. Anon. di Nav.; 1928; Cantiere Navale Triestino; 2,422 tons; 294x40-2x21^A; 391 n.h.p.; oilengines. The Italian motorship *Puccini* was shelled and sunk by British warships on December 2nd, 1942, in the Sicilian Narrows.

PUCKERIDGE

British Navy, destroyer; 1941; J. S. White & Co.; 904 tons; 272-5x28-2x7-7; 19,000 s.h.p.; 27-5 knots; turbine engines; 3-drum boilers; four 4 in.A.A. guns, 8 smaller. The destroyer *Puckeridge*, Lt. J. C. Cartwright, D.S.C., was torpedoed and sunk by a German submarine in the Western Mediterranean on September 6th, 1943. Sixty-one ratings were killed.

PUDETO

Cia. Sud-Americana de Vapores; 1930; W. Hamilton & Co.; 4,316 tons; 352-4x51x21-5; 515 n.h.p.; quadruple-expansion engines. The Chilean ship *Pudeto* was on a voyage from Guayaquil to Valparaiso with a cargo of nitrate, cattle and lumber, as well as mail and passengers. Off Atico on September 24th, 1937, there was an explosion and the ship caught fire. She was towed to Atico but continued to burn until October 9th when she sank.

PUERTORICAN

American-Hawaiian Steamship Co.; 1919; G. M. Standifer Construction Corp.; 6,076 tons; 402-5x53x34-5; 359 n.h.p.; 9 knots; triple-expansion engines. The American liner *Puerto Rican*, Capt. R. A. Oliver, was in convoy 287 miles N.E. of Iceland on March 9th, 1943, when she was torpedoed and sunk by a German submarine. Capt. Oliver and 38 of the crew were killed and one wounded.

PUGLIOLA

G.B.Bibolini; 1917; Detroit S.B. Co.; 2,074 tons; 251-4X 43-6x18; 274 n.h.p.; triple-expansion engines. The Italian steamship *Pugliola* struck a mine and sank on September 12th, 1943, near Gallipoli, Italy.

PUGNALE

Italian Navy, torpedo boat; 1943; Italy; 706 tons; 265-7X 27-2x9; 22,000 s.h.p.; 31-5 knots; turbine engines; 3-drum boilers; two 3-9 in. guns, six 20 mm.A.A., 6 T.T. The Italian torpedo boat *Pugnale* fell into the hands of the Germans at the capitulation of Italy on September 8th, 1943. She was repaired and recommissioned as the *TA-40* and on February 17th, 1945, when off Trieste was bombed and sunk by Allied aircraft.

PUKKASTAN

Hindustan S.S. Co.; 1929; Short Bros.; 5,809 tons; 440-5X 57-5x27-4; 472 n.h.p.; triple-expansion engines. The British steamship *Pukkastan*, on a voyage from Table Bay to

Rotterdam with maize, was torpedoed and sunk by a German submarine on September 7th, 1939, off the Bishop Rock.

PULASKI

Baltimore-Charleston Steamboat; 1837; Baltimore; 687 tons; steam engines.

The steamboat *Pulaski* was a new vessel employed on the eastern coast of the United States between Baltimore and Charleston. On, or about June 18th, 1838, she was on her usual trip when she blew up with a heavy loss of life. She was carrying a large number of passengers at the time and it is estimated that over 100 were killed. This was the third disaster caused by explosion of the boilers on American steamboats in less than three months, the other two being the *Moselle* and the *Oronoko* (which see).

PUNDIT

Asiatic Steam Navigation Co.; 1902; Chas. Connell & Co.; 5,917 tons; 438x51-3x27-7; 497n.h.p.; 11 knots; triple-expansion engines.

The steamship *Pundit* was torpedoed and sunk by a German submarine 85 miles W.N.W. of Alexandria on June 9th, 1918. The captain and five of the crew were killed.

PUNJABI

British Navy, destroyer; 1937; Scotts; 1,870 tons; 355 -5 x 36-5x9; 44,000 s.h.p.; 36-5 knots; turbine engines; eight 4 • 7 in. guns, 8 smaller, 4 T. T.

The destroyer *Punjabi* was escorting a Russian bound convoy, PQ. 15, on May 1st, 1942, E. of Iceland. The convoy, which consisted of 25 merchantmen, was subjected to fierce attacks from German torpedo-bombers, and from submarines. Thick weather brought an added, and serious, complication, and *Punjabi* had the misfortune to cross the bows of the battleship *King George V*. She was rammed so badly that she sank later.

PUNTA GORDA

Lago Shipping Co.; 1928; Borland & Wolff; 2,395 tons; 305-7X50-2x14-3; 196 n.h.p.; triple-expansion engines. On a voyage from Lake Maracaibo to Aruba the British tanker *Punta Gorda* was in collision with the *Ampetco* off Cape San Roman on September 18th, 1944. She caught fire and broke in two before sinking.

PUNTA TEND

Cia. Anon. Nav. de Tenerife; 1883; S. & H. Morton & Co.; 1,042 tons; 211 x28-6x13-9; 96 n.h.p.; compound engines. The Spanish steamship *Punta Teno* was sunk by a German submarine off the N.W. coast of Spain on January 29th, 1917.

PYLADES

British Navy, fleet minesweeper; 1942; United States; 890 tons; 220-5x32x—; 2,400 b.h.p.; 18 knots; diesel engines; two 3 in. guns, several smaller.

The fleet minesweeper *Pylades*, Lt. M. Harris, was sunk by a human torpedo off the coast of Normandy on July 8th, 1944. Of those on board one officer and ten ratings were killed. Lt. Harris was among the survivors.

See also *Cato*.

PYRRHA

James Westoll; 1869; T.R. Oswald; 1,064 tons; 234-6x31-2x17-6; 110 h.p.; compound engines.

The British cargo ship *Pyrrha* was wrecked on Maplin Sand on December 17th, 1890, while carrying a cargo of coal from the Tyne to London.

PYRRHUS

Ocean S.S. Co.; 1914; Workman Clark & Co.; 7,418 tons; 455-5x56-5x32-5; 572 n.h.p.; 13-5 knots; triple-expansion engines.

The liner *Pyrrhus*, Capt. W. T. Spencer, on a voyage from the Clyde to Manila, was torpedoed and sunk by a German submarine on February 17th, 1940, about 100 miles N.W. of Corunna. The ship broke in two, the after part sank but the fore part floated for two days. Eight of her crew of 85 were lost.

PYTHEAS

O.A.T. Skjelbred; 1895; Richardson, Duck & Co.; 2,690 tons; 315x42-8x17-8; 246 n.h.p.; triple-expansion engines.

The Norwegian steamship *Pytheas* was torpedoed and sunk by a submarine in the Mediterranean on February 26th, 1918.

PYTHON

Afrikanische Frucht Compagnie; 1935; Deutsche Werft A.G.; 3,664 tons; 362 - 6 x 47 -1 x 24 • 9; 975 n.h.p.; oil engines. The German motorship *Python*, which had been converted into an auxiliary cruiser for commerce raiding, was sunk by the British cruiser *Dorsetshire* on December 2nd, 1941, about 1,000 miles W. of Luderitz Bay.

QUAIL

QUAIL

British Navy, destroyer; 1942; British Isles; 1,705 tons; 358-7X 35-7x9-5; 40,000s.h.p.; 34 knots; turbine engines; 3-drum boilers; four 4 - 7 in. guns, eight 2pdr. pom-poms, 8 T.T. The destroyer *Quail* was mined and badly damaged in the Adriatic on November 15th, 1943. She was taken to Bari and some months later was taken in tow for Taranto and sank on the voyage on June 18th, 1944.

QUAKER CITY

U.S. Maritime Commission; 1920; American International S.B. Corp.; 4,961 tons; 390x54-2x27-8; turbine engines. The American steamship *Quaker City* was torpedoed and sunk by a German submarine on May 18th, 1942, 320 miles E.N.E. of Barbados on a voyage from Table Bay to Norfolk, Virginia, with manganese ore. Ten of her crew of 40 were lost.

QUARNERO

Italian Government; 1899; Russell & Co.; 3,237 tons; 330-4 X 48x15-9; 291 n.h.p.; triple-expansion engines. The Austrian steamship *Quarnero* which had been requisitioned by the Italian Government was subsequently torpedoed and sunk by a German submarine in the Bristol Channel on March 4th, 1918.

QUARRY KNOWE

British Navy, auxiliary drifter; British Isles; 98 tons; steam engines; 1 small gun.

In May, 1917, a net barrage between Cape Santa Maria di Leuca and Fano Island, across the Strait of Otranto was being maintained by flotillas of British drifters against Austrian and German submarines. The barrage constituted a great hindrance to submarines endeavouring to pass to and from the Adriatic into the Mediterranean. The Austrian Admiralty decided to destroy it, and on May 15th the light cruisers *Novara*, flagship of Capt. Horthy, in command, *Saida* and *Helgoland*, all of 3,500 tons, nine 4-1 in. guns, swept down on the drifter line. This line consisted of 47 small craft dispersed in seven groups. Fourteen were sunk by gunfire from the Austrian cruisers and others were badly damaged. The nets were destroyed.

The drifter *Gowan Lea*, Skipper Joseph Watt, steered for the enemy, firing her 2-5 in. gun. The little ship was hit and the gun disabled. At a later date Skipper Watt was awarded the Victoria Cross.

The drifters lost were the :-

<i>Admirable</i>	90 tons	<i>Helenora</i>	88 tons
<i>Avondale</i>	80	<i>Quarry Knowe</i>	98
<i>Coral Haven...</i>	82	<i>Selby ...</i>	75
<i>Craignoon</i>	77	<i>Serene ...</i>	86
<i>Felicitas</i>	67	<i>Tails ...</i>	93
<i>Girl Grade ...</i>	95	<i>Transit ...</i>	83
<i>Girl Rose</i>	86	<i>Young Linnett</i>	93

QUEBEC

Cie. Generate Transatlantique; 1896; R. Napier & Sons; 3,346 tons; 345'7x44-1x24-6; 441 n.h.p.; triple-expansion engines. The French steamship *Quebec* struck a mine and sank in the Bay of Biscay on January 24th, 1917.

QUEBRA

Mercantile S.S. Co.; 1912; W. Gray & Co.; 4,538 tons; 377-5x53-5x25-4; 394 n.h.p.; triple-expansion engines. The British cargo ship *Quebra* was wrecked off the Blaskets on August 23rd, 1916, while on a voyage from New York to Liverpool carrying a general cargo.

QUEEN

State S.S. Co.; 1906; Russell & Co.; 4,146 tons; 385 x 50x16-5; 456 n.h.p.; triple-expansion engines. The British cargo ship *Queen* was wrecked on Boavista Island, Cape Verde, on June 12th, 1910, while on a voyage from Buenos Aires to Lisbon carrying a cargo of grain.

QUEEN

Rome Steamship Co.; 1907; Russell & Co.; 4,956 tons; 400X 52x19-3; 471 n.h.p.; 12 knots; triple-expansion engines. The steamship *Queen* was torpedoed and sunk by a German submarine N.i.W. of Cape Villano on June 28th, 1918. The captain and 19 of the crew were killed.

QUEEN ANNE

Cadogan S.S. Co.; 1937; Barclay, Curie & Co.; 4,937 tons; 418-2x55-2x25-5; 387n.h.p.; 11 knots; oilengines. The motorship *Queen Anne*, Capt. C. H. Radford, was in convoy on February 10th, 1943, when she was torpedoed and sunk by a German submarine. The attack took place W. of Cape Agulhas on the first day out from Cape Town. Capt. Radford and four of the crew were killed.

QUEEN CRISTINA

T. Dunlop & Sons; 1896; Bar tram & Sons; 3,596 tons; 344 X 45x18-2; 328 n.h.p.; triple-expansion engines. The British cargo ship *Queen Cristina* was wrecked on Lihou Reef, off the coast of Queensland, in a hurricane on December 23rd, 1899. She was on a voyage in ballast from Shanghai to Newcastle, NSW.

QUEEN CRISTINA

T. Dunlop & Sons; 1901; Northumberland S.B. Co.; 4,268 tons; 360 X 48x20-2; 341 n.h.p.; triple-expansion engines. The British cargo ship *Queen Cristina* was wrecked on North Seal Rocks, California, on October 21st, 1907, in fog, while on a voyage in ballast from San Francisco to Portland, Or.

QUEEN ELIZABETH

Queen Steamship Co.; 1872; Aitken; 2,630 tons; 371-4X 36-2x25-9; 350h.p.; 12 knots; compound engines. The steamship *Queen Elizabeth*, Capt. Wallace, left Calcutta on February 14th, 1874, for England via Suez and the Mediterranean. The ship carried 69 persons all told, of whom 56 were crew, and her cargo consisted of about 3,000 tons of East Indian produce. On the night of March 12th, at about 8-45, she ran on a ridge of shingle in Gibraltar Bay, the lookout having mistaken the shore lights. The vessel's broadside was exposed to a heavy, rolling sea which swamped the boiler fires and prevented the use of all the boats save one, a lifeboat. This made three trips to the shore in safety but on the fourth occasion, being overloaded, sank with 23 persons. Of this number three were Spanish sailors who had come from shore to give assistance.

Col. Gordon, C.B., British Consul at Algeciras, rendered great help and organised parties of rescuers, but the rocket apparatus, carried on the backs of mules over rocky and difficult country did not arrive for two days. The number of persons still on board the ship was 25 and these were brought off in safety by the rocket line rigged by men of the Royal Artillery.

QUEEN ELIZABETH

T. Dunlop & Sons; 1888; A. Stephen & Sons; 2,507 tons; 300 x.40 • 1 x 23 -1; 250 h.p.; triple-expansion engines. The British cargo ship *Queen Elizabeth* was wrecked at Ikisimu on March 22nd, 1891, while on a voyage from Japan to Manila carrying a cargo of coal.

QUEEN EUGENIE

Dunlop Steamship Co.; 1909; Northumberland Shipbuilding Co.; 4,358 tons; 385x49-7x26-4; 378n.h.p.; 10-5 knots; triple-expansion engines. The steamship *Queen Eugenie* was torpedoed and sunk by a German submarine 23 miles N.N.E. of Cani Rocks on March 25th, 1917. The captain and 34 of the crew were killed. An apprentice and the ship's gunner were taken prisoner by the submarine.

QUEEN MARY

British Navy, battle cruiser; 1913; Palmer & Co.; 28,000 tons; 725x87x30; 75,000 i.h.p.; 28 knots; turbine engines; Yarrow boilers; eight 13-5 in. guns, sixteen 4 in., 3 T.T. The battle cruiser *Queen Mary*, Capt. C. J. Prowse, was one of the newest ships to take part in the battle of Jutland. She was a unit of the 1st Battle Cruiser Squadron, comprising *Princess Royal*,

flagship of Rear-Admiral O. de B. Brock, *Tiger* and *Queen Mary*. Her complement was 60 officers and 1,215 men. In addition to the above there was the battle cruiser *Lion*, flagship of Vice-Admiral Beatty.

At noon on May 31st, 1916, the 1st Battle Cruiser Squadron, led by *Lion*, and zig-zagging at 19 knots, was at 56° 46'N., 3° 36'E. The 2nd Battle Cruiser Squadron (two ships only) was three miles on the port bow, and the 5th Battle Squadron of *Queen Elizabeth* battleships, was five miles astern. The battle of Jutland, involving many hundreds of ships, and spread over a vast area of the North Sea has necessarily to be taken in phases as it developed, and it was in the first of these phases that *Queen Mary* met with disaster.

At the same time that Admiral Beatty was steaming to his assigned position, Admiral Hipper, commanding the German Scouting Force of five battle cruisers and numerous light craft, was about 50 miles to the eastward. Both admirals were unaware of each other's approach and it was only by chance that the light cruiser *Galatea* and the German light cruiser *Elbing* sighted each other when overhauling a merchantman from opposite directions. At 2 • 20 *Galatea* made the signal, 'Enemy in sight; two cruisers, probably hostile, bearing E.S.E., course unknown'.

On receipt of this message Admiral Beatty called the 2nd Battle cruiser Squadron, *New Zealand* and *Indefatigable*, into line astern, opening fire on the enemy at 3 -45 p.m. at a range of about 16,000 yards. Unfortunately there was some confusion in the British fire orders, a signal by flags from *Lion* not being seen by *Queen Mary* and *Tiger* owing to the smoke. As a consequence there was an unequal distribution of fire, the German battle cruiser *Derfflinger* remaining immune from salvos for ten minutes. The five German battle cruisers were the *Lutzow* (flagship), *Derfflinger*, *Seydlitz*, *Moltke* and *Von der Tann*.

After ten minutes *Queen Mary* perceived that the *Derfflinger* was not a target and at once commenced to fire at her. A similar mistake had arisen in the German line, the *Derfflinger* firing at *Queen Mary*, which was already the target of the *Seydlitz*. At 14,500 yards she was struck by a plunging salvo on the forward deck. The explosion was followed by a heavier and deeper one from within the ship and she blew up, sending a column of smoke 600 feet high into the air. Only three officers and six men were saved, of whom one officer and one man were picked up by the Germans. The total loss of life was 57 officers and 1,209 ratings.

QUEENMARY

Dunlop Steamship Co.; 1912; R. Duncan & Co.; 5,658 tons; 405X53x27-2; 436 n.h.p.; 10 knots; triple-expansion engines. The steamship *Queen Mary* was torpedoed and sunk by a German submarine 180 miles N.W. by W. of the Fastnet on April 16th, 1917. Nine men were killed. The captain was among the survivors.

QUEEN VICTORIA

City of Dublin Steam Packet Co.; 1837; Liverpool; 248 tons; 250 n.h.p.; 11 knots; diagonal compound engines. The paddle steamer *Queen Victoria*, Capt. Church left Liverpool for Dublin on February 14th, 1853. She had on board a total of 120 persons.

At about 1.30 the next morning the ship ran into a heavy snow-storm, and half an hour later picked up the Kish Light, Dublin Bay, and then the Bailey Light, but the latter was immediately obscured by the snow. In these circumstances prudence should have directed that the ship keep well off shore, but instead the opposite course was followed and the shore was hugged. The first officer was on the lookout on the starboard bow when suddenly the cliffs of Howth, north of the Bailey Light, came into sight at a distance of not more than 20 yards. An order to stop the engines was all that could be done before the *Queen Victoria* crashed onto the rocks.

The captain was not on deck at the time and on his arrival he gave orders to reverse the engines, a fatal mistake, as the vessel slipped back into deep water.

The passengers were below either in the steerage or asleep in their cabins and a frightful panic ensued. The captain and officers exhibited commendable coolness, but they were unable to stay a frantic rush for the boats, of which the first was overloaded and swamped, all its occupants being drowned. When last seen Capt. Church and his officers were endeavouring to direct the terrified people to take proper measures of safety, but the ship sank with

her masts above water. These formed a refuge for the survivors, who were rescued by the boats of the *Roscommon*, Capt. Brown, a steamship bound from Dublin to Holyhead. The number lost was 67, including the captain and officers.

QUEEN VICTORIA

T. Dunlop & Sons; 1887; A. Stephen & Sons; 2,312 tons; 290x39x22-5; 182 n.h.p.; triple-expansion engines. The British cargo ship *Queen Victoria* was wrecked at Algoa Bay on April 22nd, 1896, while carrying a general cargo from the Clyde to Delagoa Bay.

QUEEN VICTORIA

T. Dunlop & Sons; 1936; Barclay Curie & Co.; 4,937 tons; 418-2x55-2x25-5; 387 n.h.p.; 11 knots; oil engines. The motorship *Queen Victoria*, Capt. R. MacLeod, left Table Bay on June 21st, 1942, for Aden. Nothing more was heard of the ship and she was presumed to have been sunk by enemy action S. of Mozambique on about June 28th. Some time later a relative of one of the crew received a message saying that he was safe and well as a prisoner of war.

QUEEN OF THE CHANNEL

General Steam Navigation Co.; 1935; W. Denny & Bros.; 1,162 tons; 250-8x34-1x9-2; 560 r.h.p.; 21-5 knots; oil engines.

The passenger ship *Queen of the Channel*, Capt. O'Dell, was taken over by the Admiralty during the Second World War for service as an auxiliary transport. It was whilst acting in this capacity at the time of the evacuation of the British Army from the Dunkirk beaches that the *Queen of the Channel* was lost. On May 28th, 1940, she had stopped off Dunkirk waiting for a suitable moment to approach the harbour when she was hit by bombs. The damage proved too extensive to admit of her being taken in tow and she eventually sank. There was no loss of life, but one man was wounded.

The full story of the Dunkirk Evacuation is told under the destroyer *Grafton*.

QUEEN OF THE THAMES

Devitt & Moore; 1870; R. Napier & Sons; 2,617 tons; 336x41x31; 400 n.h.p.; 14 knots; compound engines. The *Queen of the Thames* was intended by her owners, Devitt & Moore, to inaugurate a new steamship service from England to Australia, via the Cape. Leaving England in November 1870 she made a record voyage to Australia. In February 1871 she left Melbourne on her return trip, having on board Mr. Moore, one of the partners of the firm, and also 200 other passengers. Twenty-four days out she found that her coal was running low, and that it would be necessary to coal at Cape Town instead of St. Helena.

Her run to South Africa was as good as her outward voyage had been and on March 17th, 1871, the African coast was sighted. At 10 o'clock the same evening a light was seen on the shore and thought to be the lighthouse at Cape Agulhas. It was, however, the flare of a bush fire. Course was altered and the ship proceeded for another three hours and then ran on the Klipstrand Reef, east of Struys Point.

The weather was fine and the sea calm, which considerably assisted the work of launching the boats. The wreck was unfortunately accompanied by loss of life, for four persons, the purser, two stewards and a seaman were drowned when one of the boats capsized.

QUEEN OF THE WEST

Canadian; 1849; T. Oliver; 1,060 tons; 158x31x24. The Canadian ship *Queen of the West* was lost at sea in 1850. She was a new vessel fresh from the builder's yard, and precise details of her loss never came to hand. Of those on board 32 persons were drowned.

QUEENS COUNTY

Lorenz W. Hansens Red. A/S; 1920; J. Priestman & Co.; 4,248 tons; 365 x 51 - 5 x 25 • 1; 330 n.h.p.; triple-expansion engines.

The Norwegian ship *Queens County* was carrying grain from Montreal to Hamburg. On August 18th, 1928, she was wrecked on Grange Rock, S. of St. Mary's Island in the Gulf of St. Lawrence.

QUEENWORTH

QUEENWORTH

Watergate S.S. Co.; 1925; S. P. Austin & Son; 2,047 tons; 275x39-9x18-1; 222n.h.p.; 10-5 knots; triple-expansion engines.

The steamship *Queenworth*, Lt. Cdr. R. W. Wainwright, was taken over by the Admiralty early in the Second World War for service as a mine-destroyer vessel. On May 9th, 1941, she was bombed and sunk by German aircraft off the Outer Dowsing light buoy. The *Queenworth* carried a complement of about 150.

QUEENSBURY

Capper, Alexander & Co.; 1931; Burntisland Shipbuilding Co.; 3,911 tons; 372-6x52-3x24-4; 381 n.h.p.; 11 knots; triple-expansion engines.

The steamship *Queensbury*, Capt. A. F. Cleary, was bombed and sunk by German aircraft off Montrose, Scotland, on June 6th, 1941. Capt. Cleary, nine of the crew and one gunner were lost.

QUEENSDYKE

Ross, Allan & Johnston; 1883; Short Bros.; 1,723 tons; 283 x 37-3x20-2; 196 n.h.p.; compound engines. The British cargo ship *Queensdyke* sank after a collision with the steamship *King*, 4,144 tons off the Longships on May 7th, 1911, while on a voyage from the Clyde to Bordeaux carrying a cargo of coal.

QUEENSMORE

Wm. Johnston & Co.; 1889; Harland & Wolff; 4,195 tons; 400-7x46-2x29-5; 500 h.p.; triple-expansion engines. The British cargo ship *Queensmore* was destroyed by fire in Dunmanus Bay on November 8th, 1889. She was on a voyage from Baltimore to Liverpool carrying a cargo which included cattle and cotton.

QUENAST

Armement L Hermans, S.A.; 1903; Bow, McLachlan & Co.; 509 tons; 165-5x28-2x12; 78 r.h.p.; compound engines. The Belgian ship *Quenast* carrying a cargo of salt from the Tees to Antwerp sank on November 26th, 1939, three miles N. of Noord Hinder lightship. Only two of the crew were saved.

QUENTIN

British Navy, destroyer; 1942; British Isles; 1,705 tons; 358-7x35-7x9-5; 40£00 s.h.p.; 34 knots; turbine engines; 3-drum boilers; four 4 • 7 in. guns, several smaller, 8 T. T. The destroyers *Quentin*, Lt. Cdr. A. H. Noble, D.S.C., and *Quiberon*, in company with the cruisers *Aurora*, *Argonaut* and *Syrius*, under command of Rear-Admiral C. H. J. Harcourt, engaged an enemy convoy bound for Tunisia shortly before midnight on December 1st, 1942. The convoy, which had been sighted by British aircraft during the afternoon, threw out a smoke screen on the approach of Admiral Harcourt's force and endeavoured to disperse. Before this operation could be completed, however, the British were within range and four ships were sunk and three destroyers of the escort set on fire and left in a sinking condition.

Admiral Harcourt's force suffered neither damage nor casualties, but at daybreak on the 2nd when the ships were returning to base the enemy pressed home an attack with torpedo-carrying aircraft hitting and disabling *Quentin*. The destroyer did not sink immediately but had to be abandoned later. Twelve ratings were killed.

QUETTA

British India Steam Navigation Co.; 1881; W. Denny & Bros.; 3,484 tons; 380x40-3x29; 500h.p.; 14-5 knots; compound engines.

The steamship *Quetta* left Brisbane on Friday, February 18th, 1890, bound for London with 282 persons on board, a large number of whom were passengers. She called at Cooktown and from there steered for the Torres Straits. At about 9 o'clock on the evening of February 28th, being then in the charge of a Torres Straits pilot, the ship struck on an uncharted rock off Mount Adolphus Island. So great was the impact that the *Quetta* had her port side torn away from the bow to the engine room.

The inrush of water was so overwhelming that the vessel sank in three minutes. Some of the Lascar members of the crew gave way to panic and rushed one or two of the boats, but others were launched

as quickly as possible and in them the survivors got safely to shore at Somerset, a small settlement near Cape York. Of those on board 133 passengers and crew were drowned.

QUIBERON

Union Industrielle et Maritime; 1922; Deutsche Werft A.G.; 1,296 tons; 242-3x36x14-3; 83n.h.p.; triple-expansion engines.

The French motorship *Quiberon* was on a voyage from Rouen, which she left on January 16th, 1940, for Boston, Lines. She sailed from the Downs on January 19th, but was not seen again.

QUICKSTEP

Hill S.S. Co.; 1928; Smith's Dock Co.; 2,722 tons; 305x45-5 x 21-3; 266 n.h.p.; 10 knots; triple-expansion engines. The steamship *Quickstep*, Capt. W. Sparke, sailing in a convoy from London to the Tyne struck a mine and sank on January 12th, 1942. Capt. Sparke and 12 men were killed and two wounded.

QUINAULT VICTORY

U.S. War Shipping Administration; 1944; Oregon S.B. Corp.; 7,608 tons; 439-1x62-1x34-5; turbine engines. The American ship *Quinault Victory* was loading munitions at Port Chicago on July 17th, 1944, when there was an explosion and the ship was destroyed. About 270 persons were killed as a result of this disaster.

QUINCY

United States Navy, heavy cruiser; 1935; Bethlehem Steel Co., Quincy; 9,375 tons; 588x61-9x 18-7; 107,000s.h.p.; 32 knots; turbine engines; Babcock & Wilcox boilers; nine 8 in. guns, eight 5 in., two 3 pdr., 10 smaller, 4 aircraft.

The U.S. heavy cruiser *Quincy* took part in the operations leading up to the landing of American troops on the island of Guadalcanal, in the Solomons Group. Little serious opposition was encountered on the first two days but at 1 -45 on the morning of the 9th August, 1942, a force of Japanese cruisers and destroyers made a dash from Savo Island to destroy the American transports. The attack surprised the Allied warships, the first group of which lost the Australian heavy cruiser *Canberra*. The attack was repelled however and the Japanese turned away, making for a passage N.E. of Savo. Here they were intercepted by an American force consisting of the three heavy cruisers *Astoria*, *Quincy* and *Vincennes*, with lighter cruisers and destroyers. There was an exchange of salvos at little more than torpedo range and the *Quincy* sustained several hits and sank during the night.

The *Quincy* carried a complement of about 700, most of whom were saved. The transports suffered no damage or casualties.

The full story of the action, which was known as the battle of Savo Island, is told under the U.S. heavy cruiser *Astoria*.

QUINTAY

Cia de Muelles de la Poblacion Vergara; 1904; Detroit S.B. Co.; 3,533; 325x44-2x20-9; Quadruple-expansion engines. The Chilean ship *Quintay* went ashore on Penguin Island at the entrance to the Messier Channel on April 28th, 1949. She was on a voyage from Callao to Punta Arenas.

QUINTERO

Alfredo Anate; 1859; A. Mitchell & Co.; 921 tons; 210-3X 30-7x18-9; 132n.h.p.; triple-expansion engines. The Chilean ship *Quintero* was involved in a collision with the Chilean steamer *America* and sank on December 6th, 1928, off Punta Patache. She was on a voyage from Iquique to Caldera. Seventeen lives were lost.

QUINTINO SELLA

Italian Navy, destroyer; 1925; Pattison; 935 tons; 275x27x 9-7; 36,000s.h.p.; 35 knots; turbine engines; Thornycroft boilers; four 4 - 7 in. guns, two 40 mm., 2 m.g., 4 T.T. The Italian destroyer *Quinto Sella* was torpedoed off Venice by a German motor torpedo boat on September 9th, 1943. The vessel was on her way to surrender to the Allies as Italy had ceased hostilities on the previous day. Her normal complement was 120.

QUINTO

Soc. Anon. Ilva; 1888; *J. Readhead & Co.*; 1,796 tons; 280-5X 36-9x17-6; 205n.h.p.; triple-expansion engines. The Italian steamship *Quinto* was torpedoed and sunk by a submarine in the Mediterranean on February 10th, 1917.

QUITO

T. Wilson, Sons & Co.; 1870; *C. & W. Earle*; 1,489 tons; 253-4x34-8x17-5; 154h.p.; compound engines. The British cargo ship *Quito* was wrecked at Nidingen on January 14th, 1891, while on a voyage from Riga to Hull carrying a general cargo.

QUITO

E. I. Harris & Co.; 1900; *W. Hamilton & Co.*; 3,256 tons; 330'7x45-7x16-2; 300 n.h.p.; triple-expansion engines. The British cargo ship *Quito* sank after striking wreckage 150 miles E. of Cullercoats on August 7th, 1922. She was carrying a cargo of iron ore from Lulea to the Tees.

QUORN

British Navy, destroyer; 1940; *J. S. White & Co.*; 1,000 tons; 272-5x28-2x7-7; 19,000s.h.p.; 27-5 knots; turbine engines; 3-drum boilers; four 4 in. guns, 8 smaller. The destroyer *Quorn*, Lt. J. Hall, was sunk by a human torpedo off the coast of Normandy on August 3rd, 1944. Four officers and 126 ratings were killed. Lt. Hall was among the survivors.

R. J. CULLEN

Atlantic Transportation Co.; 1919; Osaka Iron Works; 6,993 tons; 415-1x55-7x32; 553 n.h.p.; triple-expansion engines.

The Canadian steamship *R. J. Cullen* was wrecked two miles N.E. of Castlebay, Outer Hebrides, on January 15th, 1942. She was on a voyage in ballast from Liverpool to Sydney, N.S.

R. P. RESOR

Standard Oil Co. of California; 1936; Federal S.B. & D.D. Co.; 7,451 tons; 435x66-8x34-2; 593 n.h.p.; 12-7 knots; turbine engines.

The American tanker *R. P. Resor*, Capt. Fred Marcus, left Houston, Texas, for Fall River, Massachusetts, on February 19th, 1942, with a cargo of 78,729 barrels of fuel oil. She carried a crew of 41, with an officer and eight U.S. naval ratings as gunners. On the night of the 26th at about 11.30 the vessel was torpedoed on the port side near the bridge and caught fire. Boats and rafts were destroyed by the explosion and a quantity of blazing oil covered the surface of the sea. Only two men survived, being picked up by a U.S. Coastguard patrol.

The *R. P. Resor* continued to drift in flames for two days and capsized and sank on the 28th off Barnegat Light.

R. W. BOYD

Franz Rahitkens & Co.; 1880; J. Readhead & Co.; 1,225 tons; 250 x 32-6x17-2; 134 n.h.p.; compound engines. The British cargo ship *R. W. Boyd* sank after a collision in Yarmouth Roads on February 5th, 1896, while on a voyage from the Tyne to Bilbao carrying a cargo of coal.

R. W. GALLAGHER

Standard Oil Co. of New Jersey; 1938; Bethlehem Shipbuilding Corp.; 7,989 tons; 445-4x64-2x35-2; 985 n.h.p.; 13 knots; turbine engines.

The American tanker *R. W. Gallagher*, Capt. Aage Petersen, left Bolivar Roads, Galveston Bay, under orders from the U.S. Navy on July 12th, 1942. At 1.40 a.m. on the 13th the vessel was struck on the starboard side by a torpedo from a submarine, followed at a very short interval by another. Fire burst out amidships and quantities of blazing oil poured out from the vessel and spread over the sea. After burning fiercely for nearly an hour the *R. W. Gallagher* turned over to starboard and capsized. Of her crew of 40 officers and men and 12 naval gunners, eight men were killed. The tanker was not in convoy at the time of the sinking.

RABAT

Oldenburg-Portuguesische Dampfs. Rhed.; 1929; Deutsche WerftAG.; 2,719 tons; 283-3x46x23; 194 n.h.p.; compound engines.

The German steamship *Rabat* was bombed and sunk by carrier-based aircraft on October 4th, 1943, during a naval raid on Bodo, Norway.

RABAU

W. R. Carpenter Overseas Shipping; 1916; Burmeister & Wain; 6,809 tons; 425-5x55-3x27-8; 717 n.h.p.; oilengines. The Australian motorship *Rabaul*, on a voyage from Newport to Table Bay and Alexandria, was sunk by a German raider on May 14th, 1941, about 450 miles S.W. of Mossamedes. Nine of her crew were killed.

RACEHORSE

British Navy, gunboat; 1860; Wigram & Co.; 695 tons; 185-9 x 28-3x14; 200 n.h.p.; 925 knots; compound engines; 4 guns. The gunboat *Racehorse*, Cdr. C. R. F. Boxer, left Portsmouth on August 10th, 1862, for the China Station with a complement of 108 officers and men. The ship was sent from China to Japan in February 1863, and from that time was principally employed in carrying the mails between Japan and Shanghai.

At 8.30 on the evening of November 4th, 1864, when off Chefoo Cape, at the southern entrance to the Gulf of Pechelli, the ship struck on the rocks not far from shore in comparatively smooth water. The weather was extremely thick at the time and those on board must have mistaken Lung-mun Bay, ill which the ship was

wrecked, for the entrance to Chefoo harbour. Every effort was made to get *Racehorse* off and during the night her masts were cut away, but a gale came on with great violence so that by morning it was impossible to launch the boats. The vessel was swept by enormous seas and 99 of the crew were drowned.

Cdr. Boxer and eight men were rescued two days later by a Chinese junk which found them adrift in a small boat.

RACELAND

U.S. Maritime Commission; 1910; W. Hamilton & Co.; 4,815 tons; 413-1x51-5x27; 507 n.h.p.; triple-expansion engines. The Panamanian steamship *Raceland* was bombed and sunk by German aircraft on March 28th, 1942, S. of Bear Island, with the loss of 33 lives.

RACoon

British Navy, destroyer; 1910; Cammell Laird; 920 tons; 266x28x8-5; 12,500 i.h.p.; 27knots; turbine engines; Yarrow boilers; one 4 in. gun, three 12pr., 2 T.T.

The destroyer *Racoon*, Lt. George L. M. Napier, was wrecked in a snowstorm off the north coast of Ireland on January 9th, 1918. As near as can be established the destroyer struck at 2 a.m. There were no survivors.

The complement of *Racoon* was 100, but of this number nine ratings had been left behind at the last port of call.

RADAAS

Damps. Selsk. Primula; 1890; J. Readhead & Sons; 2,524 tons; 290-4x40x19-9; 234 n.h.p.; triple-expansion engines. The Danish steamship *Radaas* was torpedoed and sunk by a German submarine in the English Channel on September 21st, 1917.

RADBOD

Ender Dampfercompagnie A.G.; 1910; Northumberland S.B. Co.; 4,354 tons; 378x49-1x26-5; 367n.h.p.; triple-expansion engines.

The German steamship *Radbod* was bombed and sunk by British aircraft on December 6th, 1944, at Aalesund, Norway.

RADBURY

Ministry of War Transport (Hadley Shipping Co.); 1910; W. Doxford & Sons; 3,614 tons; 360-2x50-3x21-5; 346 n.h.p.; triple-expansion engines.

The British steamship *Radbury* was torpedoed and sunk by a German submarine on August 13th, 1944, on a voyage from Lourenço Marques to Mombasa. The captain, 18 of the crew and one gunner were lost.

RADETZKY

Austrian Navy, wooden steam frigate; 186-; Austria; 1,826 tons; 226-5x36-1x16-7; 300 i.h.p.; 12 knots; compound engines; 30 guns.

The Austrian steam frigate *Radetzky*, Capt. Danfalik, carried a complement of 368 officers and men. In 1864 she had taken part in the war against the Danes and was in the action off Heligoland. On February 20th, 1869, the vessel was cruising between the islands of Lissa and Lesina in the Adriatic, most of her crew being recruits who were undergoing a course of training. Suddenly there was a loud explosion, so complete in its effect that very few of the ship's company survived to give an account of what happened. In a few minutes the vessel had gone to the bottom.

Capt. Danfalik and 344 of the crew were either killed or drowned.

RADHURST

Ministry of War Transport (J. & C. Harrison); 1910; Cantieri Navale Triestino; 3,454 tons; 331-4x46-3x20-9; 282 n.h.p.; triple-expansion engines.

The British cargo ship *Radhurst* sailed in ballast from the Tyne on January 13th, 1943, for the Clyde. She left there for New York on February 2nd but was subsequently lost without trace with her crew of 38 and four gunners. It is probable that she was sunk by a German submarine in lat. 49° 40' N., long. 41° 50' W. about midnight on February 19th.

RADIUM

Soc. Anon di Armamento Oceania; 1906; Irvine's S.B. & D.D. Co.; 3,254 tons; 324-6x47x13-7; 301 n.h.p.; triple-expansion engines.

The Italian ship *Radium* was wrecked on February 17th, 1923, at Bempton, Yorks., on a voyage from the Tyne to Venice with coal.

RADYR

Rupert Phillips Steamship Co.; 1918; Harland & Wolff; 2,357 tons; 285x42x19; 411 n.h.p.; 11-5 knots; triple-expansion engines. The steamship *Radyr*, Capt. S. Griffiths, left Cardiff for Bordeaux at 7.30 a.m. on December 6th, 1929, with a cargo of 2,799 tons of coal. She carried a crew of 21. Shortly after leaving port the vessel ran into a fierce W.N.W. gale and for most of the day—from 10.30 a.m. to 9 p.m.—she was in view of the s.s. *Heathcliffe*, but this steamship found the seas too much for her and next day put about with engine trouble. At 7.48 a.m. on the 7th the Fishguard Wireless Station received an S.O.S. from the *Radyr* as follows, "Off Hartland Point—require immediate assistance—hatches stove-in." A reply was at once sent asking "Do you want lifeboat or boat stand by." The *Radyr* answered at 7.50 a.m. "Require anything—near sinking—trying launch lifeboat." This was the last message received, the ship was last seen in Bideford Bay at 1.20 p.m. bodies and wreckage were subsequently washed ashore.

RAGLAN

British Navy, monitor; 1915: Great Britain; 6J50 tons; 336 x 88x10; 2,500 i.h.p.; 8 knots; triple-expansion engines; two 14 in. guns, one 6 in.

The monitor *Raglan*, Cdr. Viscount Broome, was sunk in a naval engagement with the German light cruiser *Breslau*. On the morning of January 20th, 1918, *Raglan*, in company with a smaller monitor, *M28*, Lt. Cdr. D. P. Macgregor, was lying in Kusu Bay in the island of Imbros. At about 7 a.m. in misty weather the *Breslau* was sighted by the destroyer *Lizard* steaming in a northerly direction to S.E. of Cape Kephala, followed at a distance of about a mile by the battle cruiser *Goeben*. These two ships were sighted by the monitors soon afterwards and action was joined at 7-40 a.m., the *Breslau* firing on *Raglan* and smashing her range-finding gear and damaging her engine room so that the electric circuits were put out of action. The fight was very brief and *Raglan* sank without having got the enemy's range. The *M28* was next attacked, by which time the *Goeben* had come up, so that the small British ship was overwhelmed by the enemy shells. She caught fire amidships and blew up shortly afterwards. The enemy ships then retired.

The British loss amounted to three officers and 119 ratings on *Raglan*, and three officers and eight ratings on *M28*, beside wounded.

RAGNA

Anders Isachsen; 1892; Wood, Skinner & Co.; 1,747 tons; 260 x36-6x17; 158 n.h.p.; triple-expansion engines. The Norwegian steamship *Ragna* was torpedoed and sunk by a German submarine in the English Channel on December 23rd, 1917.

RAGNAROK

Schjelderup & Schjoit; 1905; Laxevaags Mas kin & Jernskibsbyggeri; 1,107 tons; 228-5x36-2x15-8; 106n.h.p.; triple-expansion engines.

The Norwegian steamship *Ragnarok* struck a mine and sank in the North Sea on August 7th, 1916.

RAGNHILD

H. N. Hartmark & Co.; 1909; Bergens Mek. Vcerksted; 1,117 tons; 229 x35-2 X15-9; 106 n.h.p.; Triple-expansion engines

The Norwegian steamship *Ragnhild* struck a mine and sank in the North Sea on April 27th, 1917.

RAGNHILD

PeltonS.S.Co.; 1895; Flensburger Schiffsbau Ges.; 1,495 tons; 239-8x34-3x20-9; 106n.h.p.; 9 knots; triple-expansion engines.

The British Steamship *Ragnhild* was torpedoed and sunk by a German submarine 14 miles S. by E.J.E. of Flamborough Head on September 3rd, 1917. The captain and 14 of the crew were killed.

RAGNI

D/S A/S Alf Lindos Rederi; 1919; Campbeltown S.B. Co.; 1,264 tons; 229-4x35-8x15-5; 142n.h.p.; triple-expansion engines.

The Norwegian steamship *Ragni* struck a mine and sank on December 15th, 1939, off the River Tyne, with the loss of six lives.

RAHMANI

Framjee, Sons & Co.; 1882; Napier, Shanks & Sell; 2,961 tons; 330-5x40-2x26-3; 364n.h.p.; triple-expansion engines. The Indian cargo ship *Rahmani* sank after a collision in 35° 02'N., 19° 07'B., on July 20th, 1917, while on a voyage from Bombay to Syracuse carrying a general cargo.

RAHMANI

Mogul Line; 1928; Lithgows; 5,436 tons; 410x54x26-7; 541 n.h.p.; triple-expansion engines.

The Indian steamship *Rahmani*, on a voyage from Bombay to Jeddah with a crew of 109, six gunners and 191 passengers, was torpedoed and sunk by a submarine on July 12th, 1943, at the entrance to the Gulf of Aden. Nineteen lives were lost.

RAIFUKUMARU

Kokusai Kisen Kabushiki Kaisha; 1918; Kawasaki Dockyard; 5,867 tons; 385X — X—; 9-5 knots; triple-expansion engines. The Japanese steamship *Raifuku Mam* left Boston on April 18th, 1925, for Hamburg with a cargo of wheat. Shortly after leaving port the steamship encountered very heavy weather and by the morning of the 19th was in distress. An S.O.S. call was sent out which was picked up by the White Star liner *Homeric*, 34,356 tons, Capt. Roberts, 70 miles distant. Shortly afterwards another message was received stating that all lifeboats had been smashed. A last message in broken English 'Now very danger. Come quick', came just before the *Homeric* sighted the derelict. The liner drove through the mountainous seas at a speed of 20 knots to the spot indicated, lat. 41° 43'N., long. 61° 39'W., to find the *Raifuku Mam* with a list of 30 degrees and quite unmanageable. Approaching as near as she dared the liner stood by in the hope of picking up survivors, but none could survive in such a sea, and all 48 of the crew were drowned.

RAIMORAGNAR

A/B R. Nordstrom & Co. O/Y; 1914; Fredrikstad Mek. Vark-sted; 1,972 tons; 276-4x42-1x17-7; 188 n.h.p.; triple-expansion engines.

The Finnish ship *Raimo Ragnar* struck a submerged rock and sank on December 23rd, 1943, three-quarters of a mile W. of Nygrundet.

RAISBY

R. Ropner & Co.; 1889 tons; Ropner & Son; 2,205 tons; 272-3x38-9x18-6; 201 n.h.p.; triple-expansion engines. The British cargo ship *Raisby* was wrecked at San Nicolas Island, Cape Verde at 11 p.m. on June 21st, 1901. She was on a voyage from Villa Constiitucion to Las Palmas carrying a cargo of maize.

RAIZAN MARU

*Tsumaru Kisen K.K.; 2,813 tons** On March 30th, 1944, the *Raizan Maru* was sunk by U.S. carrier-based aircraft off Babelthuap, Palau Islands.

RAJAH

D. Schilling; 1864; Hart & Sinnott; 1,256 tons; 216-8x34-5x22.

The German sailing ship *Rajah* capsized and sank in heavy weather off Lundy Island on December 8th, 1896. Four of the crew managed to get away in the only undamaged boat, without oars, just before the ship sank. Two men were washed out of the boat on the following day and on the 10th it was sighted by the steamship *Springwell* which rescued the two survivors by lifeboat in a gale.

RAJPUTANA

Peninsular & Oriental Steam Navigation Co.; 1926; Harland & Wolff; 16,644tons; 547-7x71 -3x43-4; 2,478n.h.p.; 17knots; quadruple-expansion engines.

The liner *Rajputana*, Capt. F. H. Taylor, D.S.C., was taken over by the Admiralty at the beginning of the Second World War for service as an auxiliary cruiser. The *Rajputana* was engaged in convoy duties

RAKUTO MARU

in the North Atlantic when she was torpedoed by a German submarine on April 22nd, 1941. Six officers and 35 ratings were killed or drowned. Two attacks were made upon the vessel and she was hit twice within two hours, but remained afloat long enough to enable the bulk of the crew to be taken off. Twelve officers and 22 ratings were cast adrift, however, and these were picked up later and landed in Canada.

RAKUTO MARU

Toa Kaiun K.K.; 1935; *Uraga Dock Co.*; 2,962 tons; 297-9x45x23-8; 109 n.h.p.; compound engines.

The steamship *Rakuto Mam* was sunk by U.S. carrier-based aircraft on September 12th, 1944, W. of Leyte Island, Philippines.

RAKUYO MARU

Nippon Yusen K.K.; 1921; *Mitsubishi Zosen Kaisha*; 9,419 tons; 460x60x40-5; 1,153 n.h.p.; turbine engines. The steamship *Rakuyo Maru* was torpedoed and sunk by the U.S. submarine *Sealion* //on September 12th, 1944, about 100 miles N.E. of the Paracel Islands, South China Sea.

RAKUZAN MARU

Japanese Government; 1914; *Taikoo Dockyard & Eng. Co.*; 2,104 tons; 280x40-1x17-8; 196n.h.p.; triple-expansion engines.

The steamship *Rakuzan Maru* was formerly the British *Hsin Peking*, captured by the Japanese in December, 1941. She was sunk by U.S. carrier-based aircraft on August 9th, 1945, off Rashin, Manchuria.

RALEIGH

British Navy, 4th rate ship; 1845; *Chatham Dockyard*; 1,939 tons; 180x50-1x16-7; 50 guns.

The British 4th rate man-of-war *Raleigh*, 50 guns, Cdre. the Hon. Henry Keppel, C.B., was ordered to reinforce the squadron operating in the Canton River during the China War of 1856-59. On April 14th, 1857, when on her way from Hong Kong the vessel struck on an uncharted pinnacle of rock off the S.E. coast of Macao. She was so badly holed that she had to be beached between the Koko and Typa Islands, where she became a total wreck.

Cdre. Keppel exhibited great resource in getting away his ship's company without the loss of a single man, and later in removing all the guns and the ship's stores.

RALEIGH

British Navy, cruiser; 1919; *W. Beardmore & Co.*; 9,750 tons; 605x65x20-5; 65,000 s.h.p.; 30 knots; turbine engines; *Yarrow boilers*; seven 7-5 in. guns, four 3 in., 12 smaller, 10 m.g., 6 T.T.

The cruiser *Raleigh*, flagship of Admiral Sir William Pakenham on the North American Station, was cruising along the Labrador side of the Straits of Belle Isle on August 8th, 1922, when she ran aground off Point Armour and became a total wreck. There was a dense fog at the time and the vessel ran onto the rocks for a considerable portion of her length, precluding all possibility of her being towed off. The coast where she struck was uninhabited and after some days her crew, who had been put ashore, were taken on board the Canadian Pacific liner *Montrose* and conveyed to Liverpool.

The *Raleigh* carried a complement of 730, of whom ten ratings were drowned when the lower part of the vessel flooded after the impact.

RAMAPO

U.S. Maritime Commission; 1924; *Dunlop, Bremner & Co.*; 2,968 tons; 344x48-1x21-9; 225 n.h.p.; triple-expansion engines.

The Panamanian steamship *Ramapo* was torpedoed and sunk by a German submarine on February 16th, 1942, N.W. of the Bermudas on a voyage from London to New York. All her crew were lost.

RAMAZAN

Liverpool Shipping Co.; 1905; *R. Craggs & Sons*; 3,477 tons; 352-5x47x15-7; 334 n.h.p.; 12 knots; triple-expansion engines.

The steamship *Ramazan*, in service as a transport, was carrying a

contingent of 380 Indian troops when she was shelled and sunk by a German submarine 55 miles S.W. of Cerigotto Island in the J3gean Sea, on September 19th, 1915. Of the Indian troops, 305 were drowned, as well as one member of the crew.

The survivors numbered 103.

The great loss of life was in part attributable to the smashing of the troopship's boats by the submarine's shells.

RAMB I

Italian Government; 1937; *Ansaldo*; 3,667 tons; 383-2x49-7x24-8; 1,525 n.h.p.; 18-5 knots; oil engines; four 4-7 in. guns. The Italian commerce raider *Ramb* /had been built for the banana trade upon a design which admitted of her and her three sister ships acting as auxiliary cruisers in time of war. On February 27th, 1941, the *Ramb* /was intercepted in the Indian Ocean by the New Zealand cruiser *Leander*, 7,270 tons, eight 6 in. guns, Capt. R. H. Sevan. The Italian ship was flying the Red Ensign at the time, but hauled it down and hoisted Italian colours when challenged by the New Zealand cruiser. The fight which ensued was very brief, five salvos from the *Leander* sufficing to sink the enemy whose 4-7 in. guns were no match for those of her opponent.

Before sinking the *Ramb I* hauled down her flag, thus preventing a further loss of life. Her exact complement was not known—probably between 200 and 250, of whom 11 officers and 89 ratings were picked up by the *Leander*. Five of the survivors were wounded.

RAMB II

Italian Government; 1937; *Cantieri Riuniti DeW Adriatico*;

3,685 tons; 383-2x49-9x24-8; 1,193 n.h.p.; oil engines. The Italian motorship *Ramb II* was chartered by the Japanese in the Second World War. She was sunk by war causes on January 12th, 1945.

RAMB IV

Ministry of War Transport (English Coaling Co.); 1937; *Cantieri Riuniti DeW Adriatico*; 3,676 tons; 383-2x49-9x24-8; 1,193 n.h.p.; oil engines.

The motorship *Ramb IV* was formerly Italian, captured by the British and converted for use as a hospital ship. On May 10th, 1942, she was bombed by German aircraft and set on fire in the Alexandria Channel. The ship was fully loaded with wounded from Tobruk. The fire could not be controlled and the ship had to be sunk by gunfire. Some 150 patients on board could not be taken off and were lost with the ship.

RAMILLES

British S.S. Co.; 1927; *W. Gray & Co.*; 4,553 tons; 398-8x53x24-7; 424 n.h.p.; triple-expansion engines. The British steamship *Ramilles*, on a voyage from the Tyne to Baltimore with coke, was torpedoed and sunk by a German submarine on May 8th, 1941, about 1,100 miles E. of Cape Race. Twenty-six of her crew and three gunners were lost.

RAMO

D/SA/SRamo; 1921; *Eltringhams*; 2,334 tons; 290-4x44x20-8; 203 n.h.p.; triple-expansion engines.

The Norwegian steamship *Ramo* was blown up by a mine while lying alongside the quay at Hehningsvaer, Lofoten Islands, on April 21st, 1946. Fourteen of her crew were killed and 15 injured.

RAMON DE LARRINAGA

Hijos de Jose Tava S. en C.; 1889; *C. Connell & Co.*; 3,058 tons; 350 x 40x25-4; 314 n.h.p.; triple-expansion engines. The Spanish steamship *Ramon de Larrinaga* was sunk by a German submarine in the Atlantic on July 13th, 1918.

RAMSAY

Bolton S.S. Co.; 1930; *R. Duncan & Co.*; 4,855 tons; 400x 53-4x25-7; 538 n.h.p.; triple-expansion engines. The British steamship *Ramsay*, on a voyage from the Tyne to New York in ballast, was torpedoed and sunk by a German submarine on June 9th, 1942, about 1,100 miles W. of the Fastnet. Thirty-five of her crew and five gunners were lost.

RAMSES

Hamburg-Amerika Linie; 1926; Flensburger Schiffsbau Ges.; 7,983 tons; 481-5x26-7x27; 1,587 n.h.p.; oilengines. The German motorship *Ramses* left Kobe early in November, 1942, in an endeavour to reach a German controlled port. On the 28th she was intercepted by a force of British and Dutch cruisers and sunk by gunfire, about 700 miles S. of Cocos Island.

RAMSEY

The Admiralty; 1895; Naval Constr. & Armaments Co.; 1,443 tons; 310x37-1x16-4; 348n.h.p.; 18 knots; triple-expansion engines. The steamship *Ramsey* was formerly *The Ramsey*, owned by the Isle of Man Steam Packet Co., Ltd., taken over by the Admiralty for use as an armed boarding ship. She was commanded by Lt. H. Raby, R.N.R., and carried a complement of 98.

At about midnight on August 7th, 1915, Lt. Raby received a message ordering him to keep a vigilant look-out to the westward. His ship was then in the Moray Firth and in accordance with his instructions he cruised about off the Firth and at dawn was some 70 miles E.N.E. of Kinnaird Head. At about 6 a.m., or a little before, he sighted a small steamship flying Russian colours and approached to within 80 yards of her and lowered a boat whereupon the stranger opened fire from 4 in. guns and machine-guns and also discharged a torpedo. Lt. Raby was killed instantly as well as several officers and ratings on the bridge with him. The after part of the ship was blown away by the torpedo and she began to sink, affording little time to launch the boats, though two got away in the brief five minutes that the *Ramsey* remained afloat.

The loss on board the *Ramsey* amounted to five officers and 50 ratings.

The enemy ship was later identified as the German auxiliary minelayer *Meteor*.

RAMSHOLM

Capel & Co.; 1889; W. Doxford & Sons; 2,172 tons; 280x38-2x18-3; 197 n.h.p.; triple-expansion engines. The British cargo ship *Ramsholm* sank after a collision four miles north of Dieppe on March 7th, 1918 while on a voyage in ballast from Rouen to the Tyne.

RAMSHOLM

Johan Henriksson; 1909; Short Bros.; 1,438 tons; 249-9x37-5x17-2; 156 n.h.p.; triple-expansion engines. The Norwegian ship *Ramsholm*, Capt. L. Hviding, was involved in a collision with the *Stancor* at 7 a.m., on February 17th, 1934 and sank about ten miles S.E. of Owers lightship.

RANALD

T. P. Purdie; 1878; A. McMillan & Son; 2,008 tons; 305 x 34-8x24-4; 247 n.h.p.; triple-expansion engines. The British cargo ship *Ranald* foundered off Atlantic City on June 4th, 1901, while on a voyage from Trinidad to New York. She was carrying a cargo which included asphalt and sugar.

RANDOLPH

East India trader; 1840 (circa); 500 tons (approx). The sailing vessel *Randolph* left Port Louis, Mauritius, in July 1851 for Calcutta. The ship carried as steerage passengers 250 Indian natives returning from a term of labour in the island, she also had a few other passengers of whom two were army officers, Lt. Holland and Ensign Scott of the 48th Foot. On the night of the 25th, when off the N.E. end of the island the *Randolph* approached too close to the shore and the lookout raised a cry of "breakers ahead". This proved to be a reef which ran out for some two miles and in the darkness the ship went heavily aground and became a total wreck. The masts were cut away but this did not prevent the ship from falling over onto her beam ends.

At daylight it was discovered that all the boats were serviceable and in these the survivors made for the shore.

The number lost included Ensign Scott, two members of the crew and from 20 to 30 Indians. All of these people were washed overboard during the night.

The first officer was despatched to Port Louis with the news of the wreck and the governor at once sent a steamship to bring the shipwrecked people back to the town.

RANSEFJORD

A/Sden Norske Amerikalinje; 1937; Eriksbergs Mek. Verksted; 3,999 tons; 407-1x55-3x22-6; 945 n.h.p.; oil engines. The Norwegian motorship *Randsfjord* was torpedoed and sunk by an Italian submarine on June 22nd, 1940, about 70 miles S. of the Fastnet on a voyage from New York to Liverpool.

RANEE

Asiatic Steam Nav. Co.; 1928; Lithgows; 5,060 tons; 400x52x27-5; 430 n.h.p.; triple-expansion engines. The British steamship *Ranee* struck a mine and sank on February 5th, 1941, in the Suez Canal. Nine of her crew were killed.

RANGATIRA

Shaw, Savill & Albion Co.; 1910; Workman, Clark & Co.; 7,469 tons; 478x61-1x31-3; 920 n.h.p.; triple-expansion engines.

The British cargo ship *Rangatira* was wrecked at Robben Island on March 30th, 1916, while on a voyage from London to Hobart carrying a general cargo.

RANGITANE

New Zealand Shipping Co.; 1929; John Brown & Co.; 16,712 tons; 531x70-2x38-1; 2,186 n.h.p.; 15 knots; oilengines. The liner *Rangitane*, Capt. H. L. Upton, was intercepted and sunk by a German commerce raider some 320 miles off East Cape, N.Z., on November 26th, 1940. The attack took place at 3.47 a.m. and the first intimation of the enemy's presence came when shells began to fall on the liner, blowing away her bridge and destroying communication with the engine room. This was followed by a torpedo which set the vessel on fire, despite which, good discipline was maintained although many persons had been killed or injured. In the meantime the wireless operator had succeeded in getting through a message giving the ship's position before the aerial was destroyed.

The abandonment of the liner was conducted in great haste as the Germans had become aware that aircraft from New Zealand were searching the area in response to the wireless messages. Finally everyone was taken on board the raider and she made off. The survivors spent several weeks on the German vessel before being landed on the small island of Emirau, whence they were rescued later. The total number killed was 16 of whom six were passengers.

RANJA

Rederi A/S Ruth; 1928; A/B Gotaverken; 6,355 tons; 408-3x55-3x32; 540 n.h.p.; oil engines. The Norwegian tanker *Ranja* was torpedoed and sunk by a German submarine on March 17th, 1942, about 450 miles E.S.E. of Philadelphia on a voyage from Houston to Halifax, loaded. All her crew of 32 and two gunners were lost.

RAPPAHANNOCK

Furness Withy & Co.; 1893; A. Stephen & Sons; 3,871 tons; 370x44x28-6; 485 n.h.p.; 12 knots; triple-expansion engines. The steamship *Rappahannock* left Halifax, N.S., for London on October 17th, 1916. When 70 miles from the Scilly Isles on the 26th she was torpedoed and sunk by a German submarine. There were no survivors from her crew of 37.

RANTAU PANDJANG

Koninkl. Paketvaart Maats.; 1921; Gebr. Pot; 2,542 tons; 300 x 46 • 3 x 20 • 6; 215 n.h.p.; triple-expansion engines. The Dutch steamship *Rantau Pandjang* left Durban on February 13th, 1941, for Sabang. On the 22nd she was intercepted by the German raider *Admiral Scheer* and sunk about midway between Madagascar and the Seychelles.

RAPEL

Compania Sud Americana de Vapores; 1888; Blyth S.B. Co.; 1,193 tons; 240 x 33 x 16; 110 h.p.; triple-expansion engines. The Chilean steamship *Rapel*, on a voyage from Valparaiso to Buenos Aires, struck on the rocks at Huamblin Island, in the Chonos Archipelago, on May 16th, 1944, and broke up in a few minutes. Eleven of her crew were lost.

RAPHAEL SEMMES

U.S. Maritime Commission; 1920; G. M. Standifer Construction Corp.; 6,027 tons; 401'4x53-2x31-9; 363 n.h.p.; triple-expansion engines.

The steamship *Raphael Semmes* was torpedoed and sunk by a German submarine on July 28th, 1942, on a voyage from Trinidad to New York. Nineteen of her crew of 37 were killed.

RAPIDO

A. Lauro; 1919; Canadian Vickers; 5,363 tons; 413-1x52-4x28-5; 520 n.h.p.; triple-expansion engines.

The Italian steamship *Rapido* was torpedoed and sunk by an Allied submarine on June 15th, 1944, S. of Grado.

RASHON MARU

Dairen Kisen K.K.; 1919; Canadian Vickers; 5,454 tons; 400-6x52-3x28-4; 520 n.h.p.; triple-expansion engines.

The steamship *Rashin Maru* was torpedoed and sunk by the U.S. submarine *Pargo* on August 8th, 1945, about 200 miles S.E. of Seishin, Manchuria.

RASK

S. Risanger; 1890; A. A. W. van Reede, Czn.; 632 tons; 167x27-2X16-6; 90 n.h.p.; triple-expansion engines. The Norwegian steamship *Rask* was bombed and sunk by German aircraft on October 19th, 1941, near the Tuskar Light. Seven of her crew and one gunner were lost.

RATTLER

British Navy, corvette; 952 tons; 200 n.h.p.; steam engines; 17 guns.

The corvette *Rattler*, Cdr. H. F. Stephenson, was wrecked when serving on the China Station on September 24th, 1868. The number lost is not known.

RAUENFELS

Deutsche Dampfs. Ges Hansa; 1928; Bremer Vulkan; 8,460 tons; 485-4x62-2x32-3; 785 n.h.p.; triple-expansion engines & L.P. turbine.

The German steamship *Rauenfels*, carrying munitions from Germany to Narvik, was destroyed by gunfire from British warships at Narvik on April 10th, 1940, during the invasion of Norway.

RAUENTHALER

German Government; 1942; Holland; 3,713 tons; oilengines. The motorship *Rauenthaler* was under construction for Dutch owners, under the name of *Peursum*, and was taken over by the Germans on completion. On September 8th, 1943, she was sunk by collision with an unidentified ship N. of Trondheim.

RAUMA

Andr. Olsen; 1895; Sir Raylton Dixon & Co.; 3,047 tons; 320x42-7x17-9; 268 n.h.p.; triple-expansion engines. The Norwegian steamship *Rauma* was shelled and sunk by a submarine in the Mediterranean on May 30th, 1916.

RAVENHILL

Thomas Turnbull & Son; 1877; Thomas Turnbull & Son; 1,454 tons; 254 x 33 • 5 x 19 -1; 130 h.p.; compound engines. The British cargo ship *Ravenhill* was wrecked about five miles E. of Vilano on July 11th, 1887, while on a voyage from Cardiff to Brindisi carrying a cargo of coal.

RAVENNA

Soc. di Navigazione a Vapor e It alia; 1901; N. Otero & Co.; 4,101 tons; 363-2x43-5x19-2; 325 n.h.p.; triple-expansion engines.

The Italian steamship *Ravenna* was torpedoed and sunk by a submarine in the Mediterranean on April 4th, 1917.

RAVENSHEUGH

Robertson, Mackie & Co.; 1881; Palmers' Co.; 1,781 tons; 263X35•2X22•4; 178n.h.p.; compound engines. The British cargo ship *Ravensheugh* struck a submerged rock and sank off Skerryvore on October 29th, 1911. She was on a voyage from the Clyde to Riga carrying a cargo of coal and herrings. Nine

of the crew got away from the ship in the starboard lifeboat and were picked up some hours later by the yacht *Sapphire*, but the port lifeboat could not be launched and the remainder of the crew were drowned.

RAVENSHOE

John Cory & Sons; 1880; C. Mitchell & Co.; 7,977 tons; 285-3x36-1x22-9; 235 h.p.; compound engines. The British cargo ship *Ravenshoe* foundered 200 miles from Odessa on January 7th, 1894, while on a voyage from Odessa to Antwerp carrying a cargo of grain.

RAVITAILLEUR

Cie. Française de Marine et de Commerce; 1901; A. Rodger & Co.; 2,813 tons; 320-2x46-1x21-2; 249 n.h.p.; triple-expansion engines.

The French steamship *Ravitailleur* was sunk by a submarine in the Mediterranean on September 17th, 1915.

RAVN

S. A. Brakhus; 1889; W. Dobson & Co.; 1,766 tons; 263-8x 37-2x19-1; 157 n.h.p.; triple-expansion engines. The Norwegian ship *Ravn* sprang a leak and foundered on December 20th, 1923, in the North Sea. She was carrying coal from Blyth to Bergen.

RAWALPINDI

Peninsular & Oriental Steam Navigation Co.; 1925; Hawthorn Leslie; 16,697 tons; 548x71x28-2; 2,500 n.h.p.; 17 knots; quadruple-expansion engines; eight 6 in. guns. The liner *Rawalpindi*, Capt. E. C. Kennedy, was taken over by the Admiralty for service as an auxiliary cruiser at the beginning of the Second World War. Her complement of 302 was provided by men drawn from the R.N.R., the R.N.V.R., and reservists of the Royal Navy. The ship was attached to the Northern Patrol and was S.E. of Iceland when at 3.30 on the afternoon of November 3rd, 1939, she sighted the battleship *Scharnhorst* which was returning from commerce raiding in the Atlantic in company with the *Gneisenau*.

The *Rawalpindi* was armed with eight 6 in. guns and was no match for the 11 in. guns of the *Scharnhorst* and *Gneisenau*. On recognising the battleships the *Rawalpindi* put up a smoke screen of smoke floats behind the cover of which she endeavoured to run for a fog bank on her port bow. She was intercepted by the *Scharnhorst* which signalled an order for her to stop and fired a shot across her bows, this was followed at 3.45 p.m. by a salvo from the 11 in. guns at a range of approximately 10,000 yards. The *Rawalpindi* replied with her starboard battery of four 6 in. guns, but the third salvo from the German's heavy guns broke the electric winches of the ammunition supply and put out all lights. The fourth salvo destroyed the bridge and the wireless room, killing nearly everyone stationed there. A salvo from the *Gneisenau* put No. 2 gun of the starboard battery out of action and the enemy ships, lying one on either side of her, had her at their mercy. The enemy ceased firing and three boats were lowered by the auxiliary cruiser which was now heavily on fire amidships. The action lasted approximately 40 minutes, all the *Rawalpindi's* guns being put out of action.

Two boats containing 26 men were picked up by the Germans, the third, containing 11 survivors was picked up by the auxiliary cruiser *Chitral*, also a P. and O. liner. The number lost on the *Rawalpindi* was 39 officers, including Capt. Kennedy, and 226 ratings.

RAWLEIGH WARNER

Sabine Transportation Co.; 1912; New York S.B. Co.; 3,663 tons; 321-7x46-2x27-5; 318 n.h.p.; triple-expansion engines.

The American tanker *Rawleigh Warner* was torpedoed and sunk by a German submarine on June 22nd, 1942, off the Louisiana coast.

RE D' ITALIA

Italian Navy, ironclad frigate; 186-; Italy; 5,700 tons; 800 n.h.p. 13 knots; compound engines; two 150 pdr. guns, sixteen 100pdr., fourteen 74 pdr. (allm.l.r.); four 50 pdr.s.b.

At the outbreak of the war between Austria and Italy on June 20th, 1866, the ironclad frigate *Re d' Italia* was the flagship of Admiral Count Persano, commander-in-chief of the Italian fleet.

He had under his command a fine ironclad fleet armed with heavy rifled guns and in addition outnumbered his adversary by 12 ships to seven. The men under his command were, however, poorly trained and his flag officers were of indifferent ability.

The Austrian fleet was composed of seven small ironclads with an extremely poor armament, but the deficiencies of the ships were more than compensated by the character of the commander. Admiral Wilhelm Tegethoff was a resolute seaman who intended to neglect nothing which would enable him to frustrate if not defeat, his enemy.

On July 20th the Italian and Austrian fleets met off the island of Lissa, on the Dalmatian coast. This island was held by an Austrian garrison of 1,800 men with 88 cannon, and the Italian fleet had a landing party of some thousands of troops for an assault on the island.

Admiral Persano decided to engage, using his ironclads only, and keeping his wooden vessels out of action. To this end he formed nine of his 12 ships into divisions of three ships each with the new ironclad turret-ram *Affondatore* to starboard of the line. At the last moment he decided to transfer his flag to this ship and did so without making his captains clearly aware of his intention. Throughout the ensuing engagement several of them were still under the impression that the *Re d'Italia* was flagship, and looked to her for orders. Another unfortunate circumstance was that one of his ironclads, the *Terribile*, was detained by Admiral Albini, commanding the division of wooden ships. The remaining two, the *Formidabile* and *Varese*, were not available. Thus the Italian force of 12 ironclads had been whittled down to nine before the action commenced. The ironclads of the rival squadrons were as follows:—

ITALIAN	tons	guns
<i>Affondatore</i> ...	4,000	295 1b. m.l.r. guns
(flagship)		
<i>Re d'Italia</i> ...	5,700	2 1501b., 16 100lb.
<i>Re diPortogallo</i> 3001b., 12 ..
<i>Pr. diCarignano</i> ...	4,000	2 ..
The three last ships were of wood, sheathed with iron, the others including the <i>Affondatore</i> , were iron throughout.		
<i>Ancona</i> ...	4,250	22 100lb.
<i>Maria Pia</i>	18 ..
<i>Castelfidardo</i>	22 ..
<i>San Martino</i>	16 ..
<i>Palestro</i> ...	2,000	2 1501b.
AUSTRIAN	tons	guns
<i>Ferdinand Max</i> ...	5,130	18 481b. s.b. guns
(flagship)		
<i>Hapsburg</i> 241b. "
<i>Kaiser Max</i> ...	3,588
<i>Prinz Eugen</i> ...	3,500
<i>Don Juan de Austria</i> ...	3,000	16 ..
<i>Drache</i>
<i>Salamander</i>

Admiral Tegethoff had exercised his men constantly at the guns, training them to concentrate their whole fire on given targets. He also practised evolutions at speed with the object of ramming, this being his best course with ships of such weak gun power as those under his command.

The Austrian admiral issued a fleet order that his ships were to 'ram everything grey', the colour of the Italian ships. His tactics were simple, and aimed at running through the Italian fleet and coming to anchor under the forts of Lissa. Flying his battle signal, 'Ironclads will ram and sink the enemy', Tegethoff proceeded to show the way. He rammed in turn the *Re d'Italia* and the *Palestro*, but without causing vital damage. His flag captain, von Sterneck, from the mizzen-rigging saw that the *Re d'Italia* was out of control from the effects of the shock and Tegethoff tried again. This time the *Ferdinand Max*, his flagship, struck the *Re d'Italia* full amidships, tearing a hole 300 feet square in her side. The *Re d'Italia* turned over and sank in 200 fathoms with nearly all her crew. The next ship to go was the damaged *Palestro* which caught fire and blew up.

The result of this melee was that the contending squadrons had completely changed positions and the Austrians were now under the guns of the Lissa forts. Tegethoff had preserved his ships intact, even the old wooden ones which had followed behind his ironclads.

He had gained his object, which was to afford succour to the garrison and had no need to pursue the battle further.

The Italian position was less favourable for, in addition to the loss of two ironclads they had been compelled to abandon their attack on Lissa. They lay off the island in some sort of formation for about an hour out of range, but made no attempt to recommence the fight. Later they steamed away.

The Italian loss was 631 drowned, five killed and 39 wounded. The Austrians lost 38 killed and 138 wounded. Their wooden battleship *Kaiser* had 99 killed and wounded.

REUMBERTO

Semidei & Ferrari; 1892; G. Ansaldo & Co.; 2,952 tons; 331-5x40-2x18-4; 250 n.h.p.; triple-expansion engines.

The Italian steamship *Re Umberto* struck a mine and sank in the Adriatic on December 4th, 1915.

READING

John Cory & Sons; 1883; Palmer's Co.; 2,043 tons; 286x36-2x22-4; 243 n.h.p.; compound engines.

The British cargo ship *Reading* was wrecked on the South Rock, off Coloughy, Co. Down, on November 5th, 1913. She was carrying a cargo of iron ore on a voyage from Seville to the Clyde.

REBECCA

British; 1840 (circa); 550 tons (approx.).

The sailing ship *Rebecca*, Capt. Sheppard, left Gravesend for Sydney, N.S.W., on December 2nd, 1852. The vessel carried 31 persons, including the captain's wife. The ship made an uneventful passage to Australia, but at 9-30 on the night of April 29th, 1853, when sailing at about eight knots, she struck on a reef between Sandy Cape and Arthur River, Tasmania. The force of the seas swung her broadside-on to the shore and hampered the launching of the boats, some of which were smashed. The masts were cut away but this failed to assist the vessel. The first boat to get away, containing Mrs. Sheppard, a young boy, the second officer and a few of the crew, capsized and drowned all its occupants. Shortly afterwards Capt. Sheppard was washed overboard and drowned, but 11 survivors swam or floated ashore.

The place where the *Rebecca* had gone ashore was desolate in the extreme and after suffering terrible privations the survivors fell in with a dog. They tied a message to the animal's neck and sent him off for aid. The dog took the message to his owner, Mr. Burgess, who organised a party and rescued the shipwrecked men when they were at the point of death from exhaustion.

REBIA

Cie. Cherifienne d'Armement; 1920; Akers Mek. Vcerks.; 563 tons; 161 x 28-6 XII-5; triple-expansion engines. The Moroccan ship *Rebia*, Capt. Reglain, left Algiers on May 10th, 1947, for Marseilles. She had a crew of 15 or 16. There was a gale off the Balearic Islands on May 11th/12th, and it is assumed that the ship foundered at this time because she was not seen again. Eleven bodies of the crew were washed up in the area.

RECINA

Prekomorska Plovidba D.D.; 1930; W. Gray & Co.; 4,732 tons; 400-8x54-2x25; 459 n.h.p.; triple-expansion engines. The Yugoslav steamship *Recina* was torpedoed and sunk by a Japanese submarine on April 11th, 1943, off the coast of New South Wales. Thirty-one of her crew of 41 were killed.

RECRUIT

British Navy, destroyer; 1898; J. Brown & Co.; 335 tons; 218 x 20x5-5; 5,700 i.h.p.; 30-3 knots; triple-expansion engines;

Thorny craft boilers; one 12 pdr. gun, five 6pr., 2 T.T. The destroyer *Recruit* and *Brazen* were patrolling off the Galloper on the morning of May 1st, 1915, when the former was attacked by the German submarine J7-5, Lt. Hacker. This submarine was one of the newly constituted 'Flanders Flotilla', using Zeebrugge as a base, and formed from torpedo boats and small submarines. The explosion of the torpedo cut the *Recruit* in two and she sank at about 11.20 a.m. Fortunately a Dutch steamship was close at hand and this vessel picked up four officers and 22 men out of the destroyer's complement of 60.

The *Brazen* endeavoured to sink the *U-6*, but without success.

RECRUIT

RECRUIT

British Navy destroyer; 1916; W. Doxford & Co.; 1,075 tons; 276x26-7x9; 27,000 s.h.p.; 36knots; turbine engines; Yarrow boilers; three 4 in. guns, one 2pdr., 1 m.g., 4 T.T. The destroyer *Recruit* was the second vessel of that name to be lost in the First World War. On August 9th, 1917, she struck a mine and sank in the North Sea. At the time of her loss she was carrying a complement of about 100.

RED JACKET

George Hallett; 1881; T. Royden & Sons; 2,249 tons; 320x35-8x24-4; 300 h.p.; compound engines. The British cargo ship *Red Jacket* sank after a collision with the British steamship *Bear Creek*, in dense fog off Cape Roca, Portugal, on February 1st, 1891. She was carrying a cargo of coal from Cardiff to Aden.

RED ROSE

Peter Rowe; 1880; Schlesinger, Davis & Co.; 1,257 tons; 240 x 32 -1 x 18 - 7; 130 h.p.; compound inverted engines. The British cargo ship *Red Rose* was wrecked near Armen Light on August 10th, 1884, while carrying a cargo of iron ore from Decido to Newport.

RED ROVER

David Robert Anderson; 1835 (circa); Waterford; 80 tons; 48x8-5x—; 7 n.h.p.; 8 knots. The small iron screw steamship *Red Rover* was originally employed as an Irish revenue boat, but in 1849 was acquired by Mr. D. R. Anderson for service as a passenger steamship on the Bristol Avon. At about 8*30 p.m. on Monday, July 22nd, 1850, she was lying at Hotwells Wharf, Bristol, embarking passengers, having at the time about 50 on board, when the boilers exploded. The engineer was killed instantly and the captain injured, the vessel being practically gutted amidships. The total loss was nine killed and 18 badly injured, of whom six died later. Fortunately there were a large number of river craft in the vicinity at the time and these promptly came to the rescue.

REDBROOK

John Cory & Sons; 1880; Palmer's Co.; 1,112 tons; 236x32-4x14-5; 130 h.p.; compound engines. The British cargo ship *Redbrook* sank after a collision off St. Nazaire on August 22nd, 1890, while on a voyage from Newport to St. Nazaire carrying a cargo of coal.

REDCAR

English & Co.; 1889; W. Gray & Co.; 1,757 tons; 260x36-6x18-2; 149 n.h.p.; triple-expansion engines. The British cargo ship *Redcar* was wrecked at Maldonado on March 12th, 1900, while on a voyage from the Clyde to Buenos Aires carrying a cargo of coal.

REDCAR

British Navy, minesweeper; 1916; Ayrshire Dockyard Co.; 810 tons; 245-7x29x6-7; 1,400i.h.p.; 15 knots; diagonal compound engines; one 3 in. gun, one 6pdr., two 2 pdr. The minesweeper *Redcar* was one of a flotilla of 32 such vessels laid down by the Admiralty in 1915. They were all paddle-steamships of shallow draught. On June 24th, 1917, *Redcar* and *Kempton* were in company off the Spindle Buoy, N. of Gravelines, when they struck mines and sank. The official complement of this class of vessel was 72.

REDESMERE

*Watson Steamship Co.; 1911; Sunderland Shipbuilding Co.; 2,123 tons; 290x42-7x19*5; 226 n.h.p.; 9 knots; triple-expansion engines.* The British steamship *Redesmere* was torpedoed and sunk by a German submarine six miles W.S.W. of St. Catherine's Point on October 28th, 1917. Nineteen men were killed. The captain was among the survivors.

REDLINE

British Mexican Petroleum Co.; 1924; Harland & Wolff; 271 tons; 120x23x10-5; 9-5 knots; triple-expansion engines. The British tanker *Redline No. 1*, Capt. A. M. Darroch, was 16 miles W.S.W. from Trevose Head on January 21st, 1925, when she encountered extremely bad weather and capsized. The s.s. *Therese* of Swansea was near by but dared not approach nearer than 100 yards. Here she remained for some hours, though the seas prevented her from launching a boat. Just before 11 p.m. Capt. Darroch gave orders to his crew to 'abandon ship' as her list was becoming more acute. Unable to launch the boats the crew jumped into the sea, but were all drowned before they could reach the *Therese*, except Mr. Darroch, the first officer and brother of the captain, who was the only survivor.

The number of drowned was nine, including a boy making his first voyage.

REDWOOD

John Ridley, Son & Tully; 1903; Blyth S.B. Co.; 1,197 tons; 230-8x33-5x14-9; 166n.h.p.; triple-expansion engines. The British cargo ship *Redwood* was wrecked near Amrum Light on December 29th, 1906, while on a voyage from Bo'ness to Bremen carrying a cargo of coal.

REDWOOD

John Ridley, Son & Tully; 1908; Blyth S.B. Co.; 1,228 tons; 235x33-5x15; 166n.h.p.; triple-expansion engines. The British cargo ship *Redwood* sank after a collision off Flushing on June 22nd, 1911, while on a voyage in ballast from Antwerp to the Tyne.

REEDPOOL

Sir R. Ropner & Co.; 1924; Ropner S.B. & R. Co.; 4,838 tons; 390 x55-5x26-4; 437 n.h.p.; 11 knots; triple-expansion engines. The steamship *Reedpool*, Capt. Downs, in ballast, was about 100 miles N. of Georgetown, British Guiana, on September 20th, 1942, when she was torpedoed and sunk by a German submarine. Two officers and four men were killed and seven officers and men wounded. Capt. Downs was taken prisoner by the submarine.

REET

A. Jurgenthal; 1904; Helsingborgs Varfs Aktieb.; 815 tons; 196x32x12-3; 51 n.h.p.; triple-expansion engines. The Esthonian ship *Reet* sailed from Methil Roads on January 31st, 1940, for Gothenburg with a cargo of coal, but was not seen again.

REFAH

Barzilay & Benjamin; 1901; R. Thompson & Sons; 3,805 tons; 335-3x46-2x17-8; 285 n.h.p.; triple-expansion engines. The Turkish steamship *Refah* was sunk by mine or torpedo during the night of June 23rd, 1941, about 45 miles from Mersin. Twenty-five of her crew of 28, 126 naval passengers and 16 air cadets were lost,

REFAST

Refast S.S. Co.; 1914; New York S.B. Corp.; 5J89 tons; 383 x 51 - 2 x 30 -1; 543 n.h.p.; triple-expansion engines. The British steamship *Refast* was torpedoed and sunk by a German submarine on January 26th, 1942, about 400 miles S.E. of Sable Island on a voyage from London to Baton Rouge. Ten of her crew were lost.

REGAL

R. Conaway & Co.; 1883; Campbell, Macintosh & Bowstead; 2,412 tons; 299-3x37-5x27-4; 300 h.p.; compound engines. The British cargo ship *Regal* was wrecked outside Alexandria Bar on February 16th, 1894, while on a voyage from Antwerp to Alexandria carrying a general cargo.

REGELE CAROL I

Roumanian State Maritime Service; 1898; Fairfield Co.; 2,369 tons; 350 x 42 x 18 - 5; 446 n.h.p.; triple-expansion engines. The Roumanian steamship *Regele Carol I* was torpedoed and sunk by a Russian submarine on October 10th, 1941, five miles E. of Varna.

REGENT

Freymann; 1903; Bar tram & Sons; 3,280 tons; 3 24 - 5x46-9 x 24-2; 294 n.h.p.; triple-expansion engines.

The Latvian steamship *Regent* was torpedoed and sunk by a German submarine on June 14th, 1942, in the Gulf of Mexico. The captain and ten of the crew were killed.

REGENT TIGER

Bowring S.S. Co.; 1938; Swan Hunter & Wigham Richardson; 10,176 tons; 505x68-3x35-7; 1,012n.h.p.; 11-5 knots; oil engines.

The tanker *Regent Tiger*, on a voyage from Trinidad to Avonmouth with 14,000 tons of gasoline and diesel fuel, was torpedoed and sunk by a German submarine on September 8th, 1939, about 400 miles W. of the Bishop Rock.

REGGIO

Orders & Handford; 1903; R. Thompson & Sons; 1,396 tons; 247 X 36-5 X16 -8; 164 n.h.p.; triple-expansion engines. The British cargo ship *Reggio* was wrecked on Bere Island, Bantry Bay on September 21st, 1908. She was on a voyage from Barry to Berehaven carrying a cargo of coal.

REGIAN

R. Conaway & Co.; 1883; R. Thompson & Sons; 3,288 tons; 340-5 X43-5x23-5; 425hp.; compound inverted engines. The British cargo ship *Regian* was wrecked in Druridge Bay on November 4th, 1884, while carrying a cargo of jute on a voyage from Calcutta to Dundee.

REGIN

E.Lund; 1913; Sorlandets Skibsbyggeri; 1,844 tons; 265'x — x —; 188 n.h.p.; triple-expansion engines.

The Norwegian steamship *Regin* struck a mine and sank in the North Sea on February 23rd, 1915.

REGIN

E. & N. Chr. Evensen; 1915; Sorlandets Skibsbyggeri; 1,846 tons; 265 x42x20; 150 n.h.p.; triple-expansion engines. The Norwegian steamship *Regin* was torpedoed and sunk by a submarine in the Mediterranean on December 20th, 1917.

REGINA

7575; Tusket.N.S.; 1,212 tons; 189x37-3x23-2. The Canadian sailing ship *Regina* left Philadelphia on November 16th, 1883, for London with a crew of 18 and a cargo of petroleum in barrels. On December 1st, about 800 miles out, she ran into very heavy weather, most of her sails were blown away and by midnight she had taken a bad list with her holds full of water. The main and mizzen masts were cut away to relieve the list and the ship righted herself. The crew left the ship in a boat and a raft but later re-boarded her. By the 4th the ship was listing badly again and most of the crew put off in a boat and a raft that they had built, five men electing to stay on board. One of these, the mate, was picked up by the barque *Boroma* on the 5th, clinging to some wreckage soon after the *Regina* sank. Six men in a boat were found by the barque *Helen Finlayson* on the 6th. These were the only survivors.

REGINA

Taylor & Sander son; 1881; Short Bros; 2,378 tons; 292x38x 21-5; 250 h.p.; compound engines.

The British cargo ship *Regina* was wrecked off the Norfolk coast on November 27th, 1888, while on a voyage from Sunderland to Constantinople carrying a cargo of coal.

REGINA

Canadian Navy, corvette; 1943; 925 tons; 205x33x14-5; 2,800 i.h.p.; 16 knots; triple-expansion engines; 3-drum boilers; one 4 in.A.A. gun., 1 pom-pom., two 20 mm.

The Canadian corvette *Regina* was torpedoed and sunk by a German submarine on August 8th, 1944, between Trevoise Head and Hart land Point. Sixty men were saved, her normal complement was 85.

REGINA ELENA

Navigazione Generale Italiana; 1907; Officine & Cantieri Liguri Anconetani; 7,940 tons; 476-6x53-5x38-2; 716 n.h.p.; quadruple expansion engines.

The Italian steamship *Regina Elena* was torpedoed and sunk by a submarine in the Mediterranean on January 4th, 1918.

REGINA MARGHERITA

Italian Navy, 1st class battleship; 1901; Spezia Dockyard; 13,427 tons; 455x78x27-2; 15,500 i.h.p.; 18 knots; triple-expansion engines; Niclausse boilers; four 12 in. guns, four 8 in., twelve 6 in., twenty 12pdr., two 1 pdr., 2 m.g., 4 T.T.

The Italian battleship *Regina Margherita* ran into a minefield off Valona on the night of December 11th-12th, 1916, and blew up. The ship struck on two mines in quick succession and remained afloat only for a few minutes, sinking by the head in rough weather which made the work of rescue extremely difficult. The loss of life amounted to 675, including the captain and 14 other officers. The survivors numbered 270.

The minefield into which the *Regina Margherita* steamed had been laid by the *U.C.-14*, one of the German submarines sent overland in sections from Kiel and assembled at Pola. These minelaying submarines were responsible for the loss of a large tonnage of Allied shipping in the Mediterranean.

REGINALDO GIULIANI

Lloyd Triestino; 1941; 6,837 tons; oilengines. The Italian motorship *Reginaldo Giuliani* was torpedoed and sunk by British aircraft on June 5th, 1942, 130 miles N.E. of Benghazi.

REGISTAN

F. C. Strick & Co.; 1930; J. Readhead & Sons; 6,008 tons; 426x55x28-5; 787n.h.p.; 13-5 knots; triple-expansion engines & L.P. turbine.

The liner *Registan*, Capt. C. S. Bartlett, was torpedoed and sunk by a German submarine on September 28th, 1942, about 200 miles E.N.E. of the island of Tobago on a voyage from Busreh to Philadelphia. One of the crew and five gunners were lost.

REGOLO

Trinacria, Soc. Siciliana di Nav. Mar. per Azioni; 1889; Flensburger Schiffsbau Ges.; 767 tons; 200-1x30-5x—; triple-expansion engines.

The Italian ship *Regolo* broke from her moorings during a gale on February 10th, 1956, while she was loading at Senj. She disappeared and the bodies of some of the crew were washed up on Krk Island. Thirteen lives were lost.

REGULUS

A. Harvey & Co.; 1878; Tyne Iron S.B. Co.; 1,367 tons; 258x 32x19-2; 157 n.h.p.; compound engines.

The Canadian cargo ship *Regulus* was wrecked in Shoal Bay, near Petty Harbour, N.F.L., on October 23rd, 1910. She was on a voyage in ballast from Wabana to Sydney, N.B.

All her crew of 19 were lost.

REGULUS

F.Pittaluga; 1884; S. P. Austin & Son; 1,085 tons; 232-7x 33-6x15-9; 134 n.h.p.; compound engines.

The Italian steamship *Regulus* was torpedoed and sunk by a British submarine on June 24th, 1942, off the Golfo Gran Sirte.

REGULUS

British Navy, fleet minesweeper; 1943; Toronto; 950 tons; 235x35-5x11-5; 2,000 h.p.; 16-5 knots; one 4 in.A.A. gun, four 20 mm.

The fleet minesweeper *Regulus*, Cdr. R. W. D. Thomson, struck a mine and sank off Corfu on January 12th, 1945. The vessel's normal complement was about 100.

REGULUS

Madrigal Shipping Co.; 1938; Gebr. van der Werf; 837 tons; 191-9x29-1x12; oil engines.

The Philippine motorship *Regulus*, Capt. Benjamin Militar, with a crew of 31 and four passengers, was last heard of on November 1st, 1949, when she was an estimated 20 miles W. of Negros Island. In

REIAN MARU

spite of an air and sea search no trace of her was found, but one survivor drifted ashore at Cagayancillo Island and said that the *Regulus* sank on November 2nd, during a typhoon.

REIAN MARU

Japanese Government; 1906; *Schiffswerft v. Henry Koch*; 1936; 265'7x37-8x18-4; 162n.h.p.; triple-expansion engines. The steamship *Reian Maru* was formerly the Philippine *Lepus*, seized by the Japanese at Cavite in March, 1942. On June 28th, 1945, she struck a mine and sank off Shimonoseki.

REIAS

Skibs A/S Birholt (B. Ekerholff); 1918; *Akers Mek. Vcerksted*; 1,128 tons; 226-5x36-5x15-8; 127n.h.p.; triple-expansion engines.

The Norwegian ship *Reias* was involved in a collision on June 13th, 1944, in the English Channel and sank.

REICHENFELS

Deutsche Dampfs. Ges. Hansa; 1936; *Deutsche Schiff- u. Maschinenbau A.G. Weser*; 7,744 tons; 485-4x61-9x31-1; 1,830 n.h.p.; oil engines.

The German motorship *Reichenfels* was bombed and sunk by British aircraft on June 21st, 1942, off the coast of Tunisia.

REID

United States Navy, destroyer; 1936; *Federal Shipbuilding Co.*; 1,430 tons; 341-3x34-7x9-7; 42,800s.h.p.; 36-5 knots; turbine engines; Express boilers; four 5 in. guns, several smaller, 12 T.T.

The destroyer *Reid* was attacked by Japanese aircraft off Mindanao in the Philippine Islands on December 11th, 1944. The vessel, which carried a complement of about 200, was hit and sunk.

REIDAR

The Shipping Controller (Whitfield, Kendrick & Co.); 1883; T. Turnbull & Son; 1,353 tons; 243x34x17-8; 155n.h.p.; compound engines.

The British cargo ship *Reidar* foundered in Mounts Bay on February 22nd, 1918, while on a voyage from Newport to St. Nazaire carrying a cargo of coal.

REIDAR

F. Friis & C. O. Lund; 1903; W. Doxford & Sons; 3,574 tons; 340x50'2x22-7; 300n.h.p.; triple-expansion engines. The Norwegian steamship *Reidar* was shelled and sunk by a German submarine in the Atlantic on March 17th, 1918.

REIGH COUNT

£7.5*. *Maritime Commission*; 1907; *Armstrong Whitworth & Co.*; 4,658 tons; 400 x 52-1 x 27; triple-expansion engines. The Panamanian ship *Reigh Count* was involved in a collision in dense fog on June 5th, 1943, and sank in 44° 8'N., 63° 13'W. Some 28 survivors were landed. The *Reigh Count* was on a voyage from New York and Halifax to the United Kingdom.

REIKAIMARU

Toa Kaiun K.K.; 2,812 tons. The steamship *Reikai Maru* was sunk by U.S. carrier-based aircraft on June 12th, 1944, about 150 miles W. of the Ladrone Islands.

REIM

R.Blakstad; 1901; *Akers Mek. Vcerksted*; 1126 tons; 227x 31'5x15-1; 155 n.h.p.; triple-expansion engines. The Norwegian steamship *Reim* was sunk by a German submarine off the S.W. coast of Spain on September 12th, 1917.

REINA CRISTINA

Spanish Navy, protected cruiser; 1886; Spain; 3,520 tons; 282-2x42-7x16'5; 3,970i.h.p.; triple-expansion engines; six 6-2 in. guns, two 2-7 in., three 2-2 in., two 1-5 in., six 3pdr., 2m.g., 5T.T.

The Spanish protected cruiser *Reina Cristina*, Capt. Don L. Cadarso, was the flagship of Rear-Admiral Montojo, commanding the Spanish Asiatic Squadron at the outbreak of the American-Spanish War in April 1898. The vessel was far short of her official

complement of 409. At the battle of Cavite, in Manila Bay, she had seen 12 years service and was no match for the ships opposed to her. The entire Spanish squadron was old, and of poor quality and weak armament, and several of the smaller units were unfit for sea. The squadron was composed as follows:—

	tons	knots	guns	
<i>Reina Cristina</i> (flagship)	3,520	17-5	six 6-2 in.	two 2-7 in.
<i>Castilla</i>	3,342	14	four 5-9 in.	two 4-7 in.
<i>Don Juan de Austria</i>	1,130	14-3		four 4 • 7 in.
<i>Don Antonio Ulloa</i>	1,130	14-3		four 4 • 7 in.
<i>IsladeCuba</i>	1,030	16		four 4-7 in.
<i>Made Luzon</i>	1,030	16		four 4-7 in.
<i>El Cano</i>	524	11-5		three 4 • 7 in.
<i>General Lezo</i>	524	11		three 4 • 7 in.
<i>Marques del Duero</i>	500	10	one 6 • 2 in.m.l.,	two 2 • 7 in.

The U.S. Asiatic Squadron was, comparatively, a far more formidable fighting force. On April 21st, the day from which Congress dated the commencement of hostilities, Commodore George Dewey was at Hong Kong with the following ships under his command:—

	tons	knots	guns	
<i>Olympia</i> (flagship)	5,800	21-7	four 8 in.,	ten Sin.
<i>Baltimore</i>	4,600	20-6	four Sin.	six 6 in.
<i>Boston</i>	3,189	15	two 8 in.,	six 6 in.
<i>Raleigh</i>	3,183	19	one 6 in.,	ten 5 in.
<i>Concord</i>	1,700	17-3	six 6 in.,	
<i>Petrel</i>	890	13-7	four 6 in.	

In addition to the above there were the *Hugh McCulloch*, 1280 tons, revenue cutter, *Manocari*, despatch vessel, *Nanshan* and *Zafiro*, all of no fighting value.

On April 27th the U.S. squadron sailed from Mirs Bay for Bolinao, Philippine Islands, leaving again on the 30th to search Subic Bay for any sign of the Spaniards. None was found and the squadron stood on for Manila Bay, which was entered by the South Channel before daybreak on May 1st the ships steaming between the fortified islets of Caballo and El Fraile without drawing the enemy's fire until the auxiliaries came through, when fire was opened on the *Hugh McCulloch*. The U.S. ships steamed down the bay in the following order, *Olympia*, *Baltimore*, *Petrel*, *Raleigh*, *Concord* and *Boston*.

Meanwhile the Spaniards were unaware of the close proximity of their foes, for the Philippine rebels had cut the telegraph cable and severed Manila from the outside world. The smaller units of the fleet were moored along the inner side of the stone and timber breakwaters, with their guns trained seawards. Mines had been placed in the channels, but were fixed at a depth far exceeding the draught of any normal warship. The *Reina Cristina* and some third-class cruisers took up a position along the water front, with the *Castilla* moored on the outside of the breakwater, as all her starboard guns had been sent ashore to strengthen the defences. On the heights above were the forts, one of which mounted 9 • 4 in. guns, to lend their support to the fleet below. At approximately 5.15 a.m. on May 1st the Spanish batteries opened fire at a range of five miles, but Commodore Dewey waited until he was within 4,000 yards before replying, his first shot being fired about 5 • 30 a.m.

The *Reina Cristina*, having raised steam, left her place in the line and turned toward the Americans, firing vigorously but inaccurately. She was met by the concentrated fire of all the U.S. ships, being raked fore and aft by the 8 in. shells of the *Olympia*, which caused her boilers to explode and set her on fire, when she ceased to be a fighting unit. Admiral Montojo thereupon transferred his flag to the *Castilla*, but this ship soon suffered the fate of her consort, both vessels burning furiously for two hours, after which time they sank.

At 7 -45 a.m. the Americans sounded the 'Cease fire' and steamed out of range as Commodore Dewey was anxious to ascertain the amount of ammunition expended by his ships, and to rest his crews. After a conference with his captains Dewey, having reassured himself as to his ammunition supply, resumed the attack at about 11 a.m., but met with only a feeble resistance. The Spanish admiral, who was wounded, escaped ashore and the white flag was hoisted over the Arsenal.

The remaining units of the Spanish fleet, *Don Juan de Austria*, *El Cano*, *General Lezo*, *Isla de Cuba* and *Isla de Luzon* were then

destroyed by the Americans, some were scuttled and the others burnt.

The *Reina Cristina* lost Capt. Cadarso, and three other officers killed, together with 126 of the crew, and 90 wounded, making a total of 220. The Spanish loss altogether totalled 167 killed and 214 wounded, of whom six were killed and four wounded on the batteries ashore. The number of officers and men carried on the Spanish ships was 1,134, which was much below the full complement of 1,965.

The U.S. squadron had seven men wounded and slight damage to the ships. President McKinley at once promoted Commodore Dewey to Rear-Admiral and Congress later raised his rank to that of Admiral.

REINA REGENTE

Spanish Navy, cruiser; 1887; Thompson & Co.; 5,000 tons; 318x50x20; 11,000i.h.p.; 20-7 knots; triple-expansion engines; four 8 in. guns, six 4-7 in., six 6pdr., four 3pdr., 5 m.g., 5T.T.

The Spanish cruiser *Reina Regente* was selected by the Spanish Government to carry the Embassy to Morocco early in March, 1895. The mission was duly accomplished and on Sunday afternoon, March 10th, the cruiser left Tangier for Cadiz. The weather was bad, developing later into a terrific storm, the full force of which struck the ship when crossing the Bay of Trafalgar. No news of her came to hand for several days, until a French vessel reported sighting a large ship apparently ashore near Bajo Aceitunos, which she had been unable to assist owing to the severity of the weather. Other evidence that all was not well was provided by pieces of the cruiser's boats and some semaphore flags which were washed ashore at Ceuta and Tarifa. Despite this there was still a hope that she had made for the open sea as the best means of weathering the storm.

On March 13th the cruiser *Isla de Luzon* left Algeciras to search the neighbouring seas. Meanwhile the continued absence of the *Reina Regente* attracted world-wide attention. In the Spanish Chamber of Deputies a sensation was caused when Senor Diaz Moreu, a naval officer, read a report from an officer who had served on the ship, declaring that she was not in a condition to weather heavy storms owing to increased weight of armament. From this report instructed opinion came to the conclusion that, over-weighted by armament and lightly laden with coal and stores the ship became top-heavy and capsized.

For one month no news of the ship came to hand, but on April 9th a brief note in a bottle was discovered. It ran as follows:—

"March 10th, 1895. No hope of being saved. Twelve miles from Bajos d'Aceitunos. Segond—Cruiser *Reina Regente*."

On the publication of this message the Spanish Government made a formal announcement that the *Reina Regente* must be regarded as lost, and that the question of assistance to the relatives of the crew would be considered forthwith. Meanwhile the search for the wreck was to continue.

On April 25th, the *Isla de Luzon* at last located the wreck S.W. of Cape Carminal, lying at a depth of 109 fathoms, midway between Cape Tarifa and Cape Trafalgar.

The total number of officers and men on board the *Reina Regente* was 402, all of whom were lost.

REKUM

ErnstGldssel; 1919; Lithgows; 5,540tons; 400-3x52-2x28-4; 517n.h.p.; triple-expansion engines.

The German tanker *Rekum* was sunk by gunfire from British coastal batteries on March 20th, 1944, off Boulogne.

REIZAN MARU

Japanese Government; 1918; Taikoo Dock & Engineering Co.; 3,426 tons; 320x46-2x22-3; 171 n.h.p.; triple-expansion engines.

The steamship *Reizan Mam* was formerly the British *Woosung*, seized by the Japanese. She struck a mine and sank on January 18th, 1945, in the Yangtze River.

REKIZAN MARU

Tatsuuma Kisen K.K.; 1918; Yoshiura Dockyard; 1,311 tons; 228 x 33 X18 - 7; 88 n.h.p.; triple-expansion engines. The steamship *Rekizan Maru* was torpedoed and sunk by the U.S. submarine *Raton* on May 12th, 1945, in the Yellow Sea.

REINBEK

Knohr&BurchardNfl., 1938; Lubecker Masch.Ges.; 2,804 tons; 325-7x48-2x19-1; 352n.h.p.; compound engines. The German ship *Reinbek* left Leningrad on December 9th, 1939, for Oskarshamn and passed Kronstadt on December 10th. She was not seen again but a lifeboat and some bodies were washed ashore at Nargo, near Tallinn.

REITO MARU

Kambara Kisen K.K.; 1944; Kawatniami Kogyo K.K.; 907 tons; 198-2x31-2x17-9; triple-expansion engines. The *Reito Maru* was driven ashore on February 5th, 1951, off Saga Prefecture during a typhoon and broke in two.

REIYO MARU

Toyo Kisen K.K.; 1920; Asano S.B. Co.; 5,445 tons; 400x 53-2x29-4; 513 n.h.p.; triple-expansion engines. The steamship *Reiyo Maru* was sunk by U.S. carrier-based aircraft on February 17th, 1944, in the Caroline Islands.

RELIANCE

Tomlin&Man; 1827; London; 1,515 tons.

The sailing ship *Reliance*, Capt. T. Green, an East Indiaman, left Canton for London on May 7th, 1842, with 122 persons and a cargo of 27,000 chests of tea. At 2 o'clock on the morning of November 12th, when coming up the Channel in a violent gale with bad visibility, the *Reliance* ran ashore off Merlement, near Boulogne. The boats were got out but the violence of the seas swamped the longboat as soon as she was launched and the others were overloaded and sank. Of those on board 115 including Capt. Green, were drowned.

REMEDIO

Orders & Handford; 1891; Craig, Taylor & Co.; 1,268 tons; 236x34x14-6; 110h.p.; triple-expansion engines. The British cargo ship *Remedio* was wrecked on Grundkallen, in the Baltic, on September 24th, 1894. She was on a voyage from Fano to Honfleur carrying a cargo of timber.

REMUERA

New Zealand Shipping Co.; 1911; W. Denny & Bros.; 11,445 tons; 485 x 62 - 3 x 41; 843 n.h.p.; 14 knots; triple-expansion engines. The liner *Remuera*, Capt. F. W. Robinson, was attacked by German torpedo-bombers about 12 miles N. of Peterhead on August 26th, 1940. The ship was sunk by a torpedo, but there was fortunately no loss of life.

REMUS

G. B. Wadsworth; 1908; J. Fuller ton & Co.; 1,079 tons; 22 lx 34-2x13-1; 163 n.h.p.; 9 knots; triple-expansion engines. The steamship *Rumus* was torpedoed and sunk by a German submarine six miles S.S.W. of Copinsay, Orkney Islands, on February 23rd, 1918. Five men were killed. The captain was among the survivors.

RENA—see YARROWDALE

RENATE

Johs.Thode; 1921; G. Seebeck Akt. Ges.; 894 tons; 204 -2 x 32-9x15-5; 64 n.h.p.; triple-expansion engines. The German ship *Renate* left Cuxhaven on November 22nd, 1928, for Velsen, but was not seen again.

RENAUDIN

French Navy, destroyer; 1913; France; 756 tons; 272-4x26X 10; 75,000 s.h.p.; 31 knots; turbine engines; du Temple-Guyot boilers; two 3-9 in. guns, four 9pdr., 4 T.T. The French destroyer *Renaudin* was torpedoed and sunk by the Austrian submarine *U-6* off Durazzo, on March 18th, 1916. The destroyer carried a complement of 83.

RENFREW

RENFREW

Irismere Steam Shipping Co.; 1907; W. Doxford & Sons; 3,830 tons; 350x50-1x22-4; 310 n.h.p.; 10 knots; triple-expansion engines.

The steamship *Renfrew* was torpedoed and sunk by a German submarine eight miles S.W. of St. Ann's Head on February 24th, 1918. The captain and 39 crew were killed.

RENO

Marittima Ravennate Soc. Anon.; 1904; A. Vuijk; 1,002 tons; 225 x 32 X14 - 6; 133 n.h.p.; triple-expansion engines. The Italian steamship *Reno* struck a mine and sank on June 18th, 1940, about 11 miles from Ancona.

RENPOR

R. Ropner & Co.; 1874; Short Bros.; 1,323 tons; 240x32x18; 120 h.p.; compound inverted engines. The British cargo ship *Renpor* was sunk by pack ice in lat. 45° N., long. 48° W., on April 13th, 1882. She was on a voyage from Hartlepool to Boston carrying a cargo of iron and potatoes.

RENPOR

R. Ropner & Co.; 1883; E. Withy & Co.; 1,917 tons; 274x 35-5x19-5; 200 h.p.; compound engines. The British cargo ship *Renpor* foundered when her engines broke down in heavy weather in lat. 35° N., long. 31° W., on September 24th, 1887. She was on a voyage from Porman to Philadelphia carrying a cargo of iron ore.

RENTERIA

Fearnley & Eger; 1913; Osbourne, Graham & Co.; 1,602 tons; 255 x 39 - 8 x 18 - 5; 150 n.h.p.; triple-expansion engines. The Norwegian steamship *Renteria* struck a mine and sank in the North Sea on August 26th, 1916.

RENZAN MARU

Japanese Government; 1917; Bethlehem S.B. Corp.; 4,999 tons; 379-5x52-4x26-4; 410 n.h.p.; triple-expansion engines. The steamship *Reman Maru* was formerly the British *Hatterlock*, seized by the Japanese. She was torpedoed and sunk by the U.S. submarine *Porpoise* on January 1st, 1943, off Kamaishi, Japan.

REPUBLIC

Oceanic Steam Nav. Co.; 1903; Harland & Wolff; 15,378 tons; 570 x 67-8x24; 1,180 n.h.p.; 15-5 knots; quadruple-expansion engines.

The liner *Republic*, Capt. Sealby, left New York for Genoa and Alexandria with 250 first-class passengers, 211 steerage and a crew of about 300. At about 5 • 30 on the morning of Saturday, January 23rd, 1909, when near Martha's Vineyard, some 20 miles S. of Nantucket, in dense fog, the *Republic* collided with the Italian emigrant steamship *Florida*, 5,018 tons, from Naples to New York with about 800 emigrants. The wireless system of signalling was then in its early days and this was one of the first important occasions when it proved its value. In response to the C.Q.D. message (popularly interpreted Come Quick—Danger), the White Star liner *Baltic*, Capt. Ransome, and the liner *Furnessia* came on the scene. The *Republic's* passengers, who had at first been transferred to the *Florida* were now taken on board the *Baltic*, while the French liner *Lorraine*, Capt. Tournier, came up in time to take off the emigrants from the *Florida*.

The *Republic* was taken in tow by the U.S. revenue tug *Gresham* and steered aft by the *Furnessia* but later her crew had to abandon her and she sank in 45 fathoms.

The loss of life was very small; two first-class passengers being killed and two injured on the *Republic* and four seamen being killed on the *Florida*.

The wireless operator of the *Republic*, Mr. J. Binns, was given a public reception by the Mayor and Corporation of Peterborough, his home, and presented with an illuminated address. His heroism in remaining at his post to the last was also recognised by the directors of the Marconi Wireless Telegraphy Co., who presented him with a gold watch.

586

REPUBLIC

American Republics Corp.; 1920; Bethlehem S.B. Corp.; 5,287 tons; 391-8x51-3x28-8; 512n.h.p.; triple-expansion engines.

The American steamship *Republic* was torpedoed and sunk by a German submarine on February 21st, 1942, between Philadelphia and Houston, with the loss of five lives.

REPULSE

British Navy, battle cruiser; 1916; J. Brown & Co.; 33,250 tons; 794-2x102-7x31-7; 112,000 s.h.p.; 30 knots; turbine engines; Babcock & Wilcox boilers; six 15 in. guns, twenty 4 in., four 3 pdr., 15m.g.; 8T.T.

In November, 1941, when it became clear that the tension between Japan and the United States might develop into war, *Repulse*, Capt. W. G. Tennant, in company with the new battleship *Prince of Wales*, was ordered to the Far East. The ships reached Singapore on December 1st and six days later the Japanese launched their surprise attack on the American fleet at Pearl Harbour and Britain became involved in war with Japan. On the 9th the squadron, consisting of the two capital ships and an escort of destroyers, left Singapore for the east coast of Malaya where the Japanese were engaged in landing an army.

The British were at a great disadvantage in that they had no aircraft carrier accompanying them, but despite this Admiral Sir Tom Phillips, commanding the squadron, decided to push on as fast as he could and if possible destroy the enemy transports and their escorts. At about 11-30 on the morning of the 10th, after having been shadowed by Japanese aircraft for some hours, there was an attack by 60 enemy bombers. The *Repulse* was struck by a bomb which penetrated to her engine room, but *Prince of Wales* was little damaged. Later there was a more formidable attack by 27 torpedo planes and both ships were hit and vitally injured. Up to a little before this time the squadron had preserved wireless silence, but on the appearance of the Japanese aircraft in force an appeal for air support from the shore was sent out. This appeal came too late and when the British fighters arrived both capital ships had sunk.

The full story is told under *Prince of Wales*, flagship of Admiral Sir Tom Phillips. The loss of life on *Repulse* was 27 officers and 407 ratings. Capt. Tennant was among the survivors.

RESOLUTE

Green & Co.; 1851; Green & Co.; 639 tons. The sailing ship *Resolute*, Capt. R. O. Lewis, had been engaged in the Australian trade, but on the outbreak of the Crimean War she was chartered by the government. In April, 1854, she was fitted out at the East India Docks as a powder ship and in the autumn of that year arrived off Balaclava with some 700 tons of gunpowder and a large amount of other war stores. She entered the harbour where she lay with the large fleet of supply ships and transports until the beginning of November, when most of the shipping was ordered out of harbour owing to fear of a Russian attack. The new anchorage was most unsafe and Capt. Lewis made a protest to the chief government agent on behalf of the 30 shipmasters who were compelled to lie there. The protest was not heeded and the captain was censured for making it.

On the next day, November 14th, a gale of extreme violence swept the coast, driving most of the ships ashore with terrible loss of life, to say nothing of war stores of the utmost importance to the army. The *Resolute* was lost with all on board, 28 of whom were crew, beside military officers and others.

A detailed account of the disaster will be found under the *Prince* which was among those lost.

RESOLUTE

Calcutta Port Commissioners; 1883; Day, Summers & Co.; 460 tons 175-1 x 28-1 x 12-7; 132 n.h.p.; compound engines. The steamship *Resolute* was sunk in a collision with the steamship *Scindia*, 2,729 tons, in the Hooghli. *Calcutta*, on August 14th, 1899. The *Resolute* was carrying a number of passengers at the time, and she sank with the loss of the captain and 53 others.

RESOLUTION

Marquand Shipping Co.; 1888; J. L. Thompson & Sons; 1,979 tons; 284 x 38-1 x 18 • 1; 202 n.h.p.; triple-expansion engines. The British cargo ship *Resolution* was wrecked two miles north-east of the He de Sein on May 20th, 1910. She was on a voyage from Bilbao to Cardiff carrying an ore cargo.

RETRIEVER

Clanrye Steamship Co.; 1906; Ailsa Shipbuilding Co.; 459 tons; 168 X 25 • 7 X 10; 72 r.h.p.; 9 - 5 knots; compound engines. The steamship *Retriever*, Capt. P. O'Neill, was in collision with the passenger steamship *Connemara* in a gale off Greenore on the evening of November 3rd, 1916. The *Retriever*, which was unmanageable owing to her cargo of coal having shifted, sank 15 minutes after the *Connemara* with the loss of eight of her crew, only one man surviving. The full story of the disaster is told under the *Connemara* which was lost with all on board.

RETRIEVER

Cable & Wireless; 1909; Goole S.B. & R. Co.; 674 tons; 190 • 2x28 • 2X15 • 5; 91 r.h.p.; compound engines. The cable ship *Retriever*, on a voyage from Lemnos to Piraeus, was bombed and sunk by German aircraft at midnight on April 11th, 1941, off Phelera. Eleven of her crew of 46 were lost.

RETVIZAN

Russian Navy, 1st class battleship; 1900; W. Cramp & Son; 12, 902 tons; 374x72-2x25; 16,121 i.h.p.; 18 - 8 knots; triple-expansion engines; four 12 in. guns, twelve 6 in., two 2% in., twenty 12 pdr. • twenty-four 3 pdr., 12 m.g., 6 T.T. The Russian battleship *Retvizan* was one of the Pacific Squadron based on Port Arthur at the commencement of the Russo-Japanese War. On the night of February 8th, 1904, the ship was lying in the outer anchorage with the other battleships and cruisers. It was known that the relationships of Russia and Japan were extremely delicate, but a request by Vice-Admiral Stark that he might have permission to place his fleet in a state of preparedness for war, was negated by the Viceroy, Admiral Alexieff, on the grounds that such action was premature.

At 10-50 p.m. the Japanese 1st, 2nd and 3rd Destroyer Flotillas were sighted by the Russian patrol, which reported their approach to Admiral Stark. There was small time in which to prepare and, as the Russians had no orders to fire, the enemy destroyers, guided by the lights of the cruiser *Pallada*, on searchlight duty, were enabled to come within torpedo range without opposition. Led by Capt. Asai in the *Shirakumo*, they steamed past the Russians in two groups of five and three ships, each destroyer discharging her torpedoes and turning sharply away at full speed. An hour later two more destroyers approached and discharged torpedoes, also escaping in the darkness. In all 18 torpedoes were fired, of which only three took effect.

The attack was a brilliant initial success for the Japanese, who suffered neither hits nor casualties. The cruiser *Pallada* was struck on the port side amidships, making a large hole in a coal bunker and setting the coal on fire. The *Retvizan* sustained a hit on the port side forward, a hole 220 feet square being torn in her side. She attempted to enter the harbour but grounded in the gullet, and lay there almost blocking the entrance. The battleship *Tsarvitch* was the third to be torpedoed, being struck abreast the aft magazine on the port side, shattering the bulkhead and armoured deck and flooding the steering-compartment. By 2 a.m. on the morning of the 9th all firing had ceased and the action was over.

The *Retvizan* was repaired and was operating with the squadron on June 23rd. She fought in the battle of the Yellow Sea on August 10th, after which she, with the remainder of the Russian fleet, was blockaded in Port Arthur. On December 6th, 1904, she was sunk by Japanese gunfire while lying at anchor.

REUBEN JAMES

United States Navy, destroyer; 1919; New York Shipbuilding Corpn.; 1,190 tons; 314x30x10; 26,000 s.h.p.; 35 knots; turbine engines; four 4 in. guns, one 3 in., 12 T.T. The old United States destroyer *Reuben James* was employed in convoy duties between the North American coast and Iceland during 1941. On July 7th of that year U.S. forces arrived in Iceland for the protection of that country for the duration of the Second World War, as agreed by President Roosevelt and the Prime Minister of Iceland.

A little more than three months later, on October 29th, the *Reuben James* was torpedoed W. of the island by a German submarine. She was struck amidships and broke in two, the forward portion sinking almost at once. The after portion, on which there

were 43 men, remained afloat long enough for these survivors to get away on life-rafts. Seven officers and 88 ratings were drowned.

REUBEN TIPTON

LykesBros. S.S. Inc.; 1940; Federal S.B. & D.D. Co.; 6,829 tons; 397x60-2x34-6; 666n.h.p.; turbine engines. The American steamship *Reuben Tipton* was torpedoed and sunk by a German submarine on October 23rd, 1942, 260 miles from Barbados.

REVENTAZON

Elders & Fyffes; 1906; Workman Clark & Co.; 4,050 tons; 374-3x47-8x29-5; 666 n.h.p.; 13-5 knots; triple-expansion engines.

The steamship *Reventazon* was torpedoed and sunk by a German submarine 14 miles W. by S. of Kassandra Point, Gulf of Salonica, on October 5th, 1918. The captain and 14 of the crew were killed.

REWA

British India Steam Navigation Co.; 1906; W. Denny & Bros.; 7,308 tons; 456x56-2x29-8; 850 r.h.p.; 17 knots; turbine engines.

The liner *Rewa*, Capt. J. E. Drake, was serving as an auxiliary hospital ship when she was torpedoed by a German submarine on January 4th, 1918. The ship, which was clearly marked with the Red Cross and fully illuminated, was steaming up the Bristol Channel at the end of her voyage from the Mediterranean. She carried 279 sick and wounded from Greece, Malta and Gibraltar, together with 80 medical staff and a crew of 207. At 11.15 p.m. she was torpedoed on the port side abreast the funnel by a submarine which had approached unseen, though lights, assumed to be those of a sailing vessel, may have been those of the enemy.

The discipline on board the *Rewa* was excellent and 14 boats were launched without mishap. Under the direction of Capt. Drake, these boats kept together and burned flares, attracting the attention of two trawlers and a tanker which picked up the shipwrecked people at about 3 o'clock on the morning of the 5th. All on board the *Rewa* were saved with the exception of three Lascar members of the crew.

REX

Societ di Navigazione Italia; 1932; Soc. Anon. Ansaldo; 51,062 tons; 879-9x97x30-7; 22082, n.h.p.; 28 knots; turbine engines.

The Italian liner *Rex* was built with the object of gaining for Italy the "Blue Riband" of the Atlantic, in which she was successful in 1933 with the fastest west bound passage of four days 13 hours and 58 minutes. Her speed on this run averaged 28-92 knots/She maintained her lead for two years, losing the honour to the French liner *Normandie* in 1935. During the Second World War the ship fell into German hands when Italy capitulated in September, 1943.

The size of the liner prevented her captors from employing her in Italian waters as she was an ideal target for allied planes. Finally they decided to use her as a blockship outside Trieste harbour. On September 7th, 1944, British aircraft sighted the *Rex* in tow. On the 8th she was attacked by Beaufighter rocket-firing planes which scored 59 hits; a second attack was made on the following day when a further 64 hits were scored. The *Rex* caught fire from stem to stern and eventually ran ashore completely wrecked.

REYNOLDS

Bolton S.S. Co.; 1,927 tons; R. Duncan & Co.; 5,113 tons; 407x53-5x26-7; 531 n.h.p.; triple-expansion engines. The British steamship *Reynolds*, on a voyage from New York to Karachi, was torpedoed and sunk by a German submarine on October 31st, 1942, about 250 miles E. of Durban. Nothing was ever heard of her crew of 40 and seven gunners.

RHAKOTIS

Hamburg-Amerika Lime; 1928; Deutsche Werft; 6,753 tons; 432-4x62-2x34-3; 533 n.h.p.; oilengines. The German motorship *Rhakotis* was shelled and sunk by British warships on January 1st, 1943, about 200 miles N.W. of Cape Finisterre. Seventy-five survivors in two boats were able to reach land but 90 of her complement were lost.

RHEINHAUSEN

RHEINHAUSEN

Fried. Krupp A.G.; 1912; *W. Doxford & Sons*; 6,298 tons; 439-1x57•9X25-4; 339n.h.p.; triple-expansion engines. The German steamship *Rheinhausen* was torpedoed and sunk by a British submarine on February 7th, 1944, about 20 miles N. of Stavanger.

RHEUBINA

John Cory & Sons; 1882; *Milford Haven S. & E. Co.*; 1,071 tons; 227x31-3x15-7; 121 n.h.p.; compound engines. The British cargo ship *Rheubina* sank after a collision with the Spanish steamship *Cartagena*, 1,138 tons, off Cape Villano on September 22nd, 1898, while on a voyage from Huelva to Swansea carrying a cargo of copper ore. Fifteen of the crew were drowned.

RHIN

Cie. Delmas Freres & Vieljeux; 1921; *Chantiers Navals Fran^{ca}is*; 2,922 tons; 313-6x45-9x20-5; 271 n.h.p.; triple-expansion engines. The French ship *Rhin* was on a voyage from Bona to Bordeaux. She was wrecked on October 8th, 1924, at Point de la Combres.

RHINELAND

Liverpool & Hamburg Steamship Co.; 1903; *Barclay Curie & Co.*; 1,501 tons; 254-6x35x13-6; 217 n.h.p.; 10 knots; triple-expansion engines. The steamship *Rhineland* struck a mine and sank six and half miles S.E.1S. of Southwold on November 11th, 1915. The captain and 19 crew were killed.

RHINELAND

James Currie & Co.; 1922; *A.G. Weser*; 1,381 tons; 242-3X 36-3x15-2; 167 n.h.p.; 9 knots; triple-expansion engines. The steamship *Rhineland*, Capt. J. G. Gilroy, left the Clyde on September 12th, 1941, for Gibraltar in convoy. She was last seen on the 21st and was considered to have been lost by enemy action. Nothing was ever heard of her crew of 23 and three gunners.

RHIO

Orders & Handford; 1891; *W. Gray & Co.*; 1,402 tons; 240X 36-1x16-6; 120 h.p.; triple-expansion engines. The British cargo ship *Rhio* was wrecked at Ushant on June 21st, 1894, while on a voyage from Newport to St. Nazaire carrying a cargo of coal.

RHIWABON

John Cory & Sons; 1879; *Palmers' Co.*; 1,364 tons; 241 x 33-2x18-1; 130 h.p.; compound-inverted engines. The British cargo ship *Rhiwabon* was wrecked off the Smalls on January 29th, 1884, while on a voyage in ballast from Fleetwood to Cardiff. Only seven of her crew survived.

RHIWDERIN

John Cory & Sons; 1883; *Milford Haven S. & E. Co.*; 1,156 tons; 226-9x31-2x15-8; 99 h.p.; compound engines. The British cargo ship *Rhiwderin* was wrecked at Cape Race on September 30th, 1893. She was on a voyage in ballast from New York to Tilt Cove, N.F.L.

RHODODENDRON

British Navy, sloop; twine's Shipbuilding Co.; 1,290 tons; < 252-2x35x72-5; 2,800 h.p.; 17 knots; triple-expansion engines; two 4 in. guns, one 12 pdr. The sloop *Rhododendron* was torpedoed and sunk by a German submarine in the North Sea on May 5th, 1819. Her official complement was 98.

RHODORA

Burr ell & Son; 1881; *J.Laing*; 2,625 tons; 303x38-8x29-4; 250n.h.p.; compound engines. The British cargo ship *Rhodora* was wrecked at Horn Head, 17 miles north of Cape Race, N.F.L. on September 17th, 1897, while on a voyage in ballast from Boston, Lines., to Philadelphia.

RHONE

Royal Mail Steam Packet Co.; 1865; *Millwall Ironworks*; 2,738 tons; 310x40x—; 500n.h.p.; 12 knots; compound engines.

The liner *Rhone*, Capt. F. Woolley, was a crack ship of her day, being the latest and finest addition to the Royal Mail fleet. At about 11 o'clock on the morning of October 29th, 1867, the vessel was lying at anchor off Peter Island, Virgin Islands, in company with the paddle steamship *Conway* of the same line. The barometer was falling alarmingly and the sky was very dark when a hurricane from the N.N.W. descended on the islands. The *Rhone* had on board 129 crew and 16 passengers. At the first sign of danger the engines were put at full speed and for an hour the ship steamed to her anchors in an endeavour to ride out the storm. During this time a spar from aloft fell on the first officer, Mr. Topper, and killed him instantly. Capt. Woolley then observed a lull in the hurricane and decided to weigh anchor and gain open sea. He navigated his ship through most of the dangerous channels and was nearing comparative safety when the hurricane again swept down and crashed the *Rhone* on to the rocks of Salt Island, where she broke in two and foundered.

Of the 145 persons on board 21 seamen and an Italian passenger were the only survivors.

The R.M.S.P.Co. were most unfortunate in this hurricane, besides the *Rhone* they lost the *Wye* (*which see*) which foundered with the loss of 41 officers and men. The *Solent* and the *Tyne* managed to keep afloat, but lost most of their upper masts and deck gear. The *Derwent*, a reserve ship of the company's fleet, was blown from her moorings and became a total wreck. No other shipping company has ever sustained such a loss of its ships in the course of a single day. Of the 60 vessels which had swung to anchor around St. Thomas and the neighbouring islands that morning, only two survived the hurricane.

RHONE

Det Forenede D/S; 1916; *Kjobenhavns Flydedok & Skibsværft*; 1,064 tons; 237-1 x 35 • 6 x 21 - 6; 132 n.h.p.; triple-expansion engines. The Danish steamship *Rhone* was torpedoed and sunk by a German submarine on February 15th, 1940, 50 miles W. of Rattray Head. Nine of her crew were killed.

RHUYS

Compagnie Nantaise des Chargeurs de VQuest; 1920; *Ateliers & Chantiers de la Loire*; 2,921 tons; 313-8x46-4x21; 265 n.h.p.; triple-expansion engines. The French steamship *Rhuys* struck a mine and sank on November 19th, 1939, near the Spurn lightship. Sixteen of her crew were killed.

RHYDWEN

W. & C. T. Jones Steamship Co.; 1914; *Richardson Duck & Co.*; 4,799 tons; 380-2x50-9x28; 385n.h.p.; triple-expansion engines. The steamship *Rhydwen* was torpedoed and sunk by a German submarine 170 miles N.W. by W. ^W. of Fastnet on April 18th, 1917. Six men were killed, The captain was among the survivors.

RHYL

John Cory & Sons; 1879; *Palmer's Co.*; 1,274 tons; 240X 33-2x18-1; 141 n.h.p.; compound engines. The British cargo ship *Rhyl* sank after a collision off Holyhead on July 24th, 1900, while on a voyage in ballast from Ardrossan to Newport.

RIALTO

Italia Soc. Anon. diNav.; 1927; *Stabilimento Tecnico*; 6,099 tons; 448-5x55-4x27-3; 1,328n.h.p.; oilengines. The Italian motorship *Rialto* was torpedoed and sunk by British aircraft on October 5th, 1941, about 80 miles N.N.E. of Misurata.

RIBSTON

Capricornus Steamship Co.; 1894; *W. Gray & Co.*; 3,372 tons; 330x43x18-7; 260 n.h.p.; 9 knots; triple-expansion engines. The steamship *Ribston* was torpedoed and sunk by a German submarine 85 miles W. of Fastnet on July 16th, 1917. The captain and 24 men were killed.

RICH

United States Navy, destroyer; 1943; U.S. Yards; 1,200 tons; 306X36-9X —; 6,000 s.h.p.; 21 knots; turbine engines; three 3 in. guns, four 20 mm.A.A., 3 T.T.

The United States destroyer *Rich* was engaged in operations off the coast of Normandy on June 8th, 1944, when she struck a mine and sank. The vessel carried a complement of 220.

RICHARDBLAND

U.S. Maritime Commission; 1942; Bethlehem Fair field Shipyard, Baltimore; 7,191 tons; 423-1x57-1x34-8; 339n.h.p.; 11 knots; triple-expansion engines.

The steamship *Richard Bland*, Capt. L. Dodcl, was in convoy off Norway on March 5th, 1943, when she was attacked by a German submarine. She was hit by two torpedoes and sank with the loss of 18 men. Capt. Dodd was among the survivors.

RICHARD BORCHARDT

Fairplay Schlepddampf. Reed. R. Borchardt; 1906; Schiffsw.v. Henry Koch; 1,555 tons; 245-8x36-2; 19-3; 152n.h.p.; triple-expansion engines.

The German ship *Richard Borchardt*, with a crew of 18, left Nordenham on January 28th, 1938, for Pasajes. She was seen 15 miles W. of Borkum on the following day but did not arrive at Dover where she was expected, and was not seen again.

RICHARD CASWELL

U.S. War Shipping Administration; 1942; North Carolina S.B. Corp.; 7,777 tons; 422-8x57x34-8; 339n.h.p.; triple-expansion engines.

The American steamship *Richard Caswell* was torpedoed and sunk by a German submarine on July 16th, 1943, between Buenos Aires and Rio de Janeiro. Nine of her crew were killed.

RICHARD D. SPAIGHT

U.S. War Shipping Administration; 1942; North Carolina S.B. Corp.; 7,777 tons; 422-8x57x34-8; 339n.h.p.; triple-expansion engines.

The steamship *Richard D. Spaight* was torpedoed, shelled and sunk by a German submarine on March 10th, 1943, 400 miles S.E. of Lourenço Marques on a voyage from Suez to Durban. Eight of her crew were lost.

RICHARD DELARRINAGA

Larrinaga & Co.; 1916; Russell & Co.; 5,591 tons; 439-8 x 56 x 26-3; 483n.h.p.; 10 knots; triple-expansion engines. The steamship *Richard de Larrinaga* was torpedoed and sunk by a German submarine 15 miles S.E. of Ballycptin Island on October 8th, 1917. The captain and 34 men were killed.

RICHARD HOVEY

U.S. War Shipping Administration; 1943; South Portland S.B. Corp.; 7,176 tons; 422-8x57x34-8; 339n.h.p.; triple-expansion engines.

The steamship *Richard Hovey* was torpedoed and sunk by a Japanese submarine on March 29th, 1944, about 500 miles W. of Mormugao on a voyage from Calcutta to the U.S.A. She had a complement of 41 crew, 28 gunners and two passengers, of whom 25 survivors were landed at Karachi. One of her boats was rammed by the submarine and the captain taken prisoner of war.

RICHARD WITH

Vesteraalens D/S; 1909; Trondhjems Mek. Verksted; 905 tons; 193-2x29-2x13; 138 n.h.p.; triple-expansion engines.

The Norwegian passenger steamship *Richard With*, under German control, was torpedoed and sunk by a British submarine on September 13th, 1941, near Rolfsøyhavn, Norway. Her crew of 28 and 65 passengers were lost.

RICHMOND CASTLE

Union-Castle Mail S.S. Co.; 1939; Harland & Wolff; 7,798 tons;

457-4x63-3x34-3; 1,643n.h.p.; 16 knots; oil engines. The motorship *Richmond Castle*, Capt. T. C. Goldstone, was torpedoed and sunk by a German submarine in the North Atlantic on August 4th, 1942. Fourteen of her crew were killed.

RIDING

I. Ridley, Son & Tully; 1912; W. Dobson & Co.; 1,287 tons; 240-1x33-5x15-4; 201 n.h.p.; triple-expansion engines. The British cargo ship *Riding* was wrecked on the S. coast of Iceland on January 8th, 1925. She was on a voyage from Hull to Reykjavik carrying coal and a general cargo.

RIGA

LiibeckLinie A.G.; 1920; Werft Nobiskrug G.m.b.H.; 655 tons; 180 • 4X29•6x10•8; 68n.h.p.; triple-expansion engines. The German ship *Riga* sank on February 29th, 1944, at Kirkenes.

RIGAULT DE GENOUILLY

French Navy, sloop; 1932; Chantiers Gironde, Bordeaux; 1,969 tons; 340x41-7x14-7; 3,200s.h.p.; 15-5 knots; diesel engines; three 5-5 in. guns, four 37 mm., 6 m.g., 50 mines, 1 seaplane.

The *Rigault de Genouilly* was torpedoed and sunk by a British submarine off Algiers on July 4th, 1940, during the British naval operations against the (Vichy) French Navy. The vessel's normal complement was 136.

For full story of the destruction of the French ships in North Africa, see the battleship *Bretagne*.

RIGEL

Finska Angf.-AjB; 1937; AjB Crichton-Vulcan OJY; 1,495 tons; 273-6x39-3x15-4; 189 n.h.p.; compound engines. The Finnish steamship *Rigel* struck a mine and sank on October 28th, 1944, in the Gulf of Finland. The ship was previously badly damaged by Russian bombers during the Russo-Finnish war.

RIGEL

Det. Bergenske D/S; 1924; Burneister & Wain; 3,828 tons; 367-5x51-5x22-6; 450 n.h.p.; oil engines. The Norwegian motorship *Rigel*, flying the German flag, was bombed and sunk by British aircraft on November 27th, 1944, at Rosaya, Norway.

RIGEL

Red. A/B Iris (C. H. Abrahamsen); 1905; Wm. Doxford & Sons; 3,823 tons; 362-8x48-2x29-6; triple-expansion engines. The Swedish ship *Rigel* was carrying iron ore from Oxelosund to Port Talbot. At 11.40p.m. on March 4th, 1953, she was involved in a collision with the *Senegal* and sank in 51° 41' N., 2° 16' E. There were 29 survivors.

RIGI

C.Eitzen & Co.; 1911; Nylands Vcerksted; 1,912 tons; 275-3 X 42-1x18-3; 188 n.h.p.; triple-expansion engines. The Norwegian steamship *Rigi* struck a mine and sank in the North Sea on December 24th, 1915.

RIJNSTROOM

N.V. Hollandsche Stoomb. Maats.; 1937; N.V. C. Van der Giessen & Zonen; 695 tons; 237x35-2x9-7; 160n.h.p. oil engines. The Dutch ship *Rijnstroom*, Capt. L. Verhoef, left London on March 2nd, 1940, for Amsterdam. Nothing more was heard of the ship or her crew of 12 until empty boats and rafts were found some days later. She was considered to have been lost probably by striking a mine.

RIJO MARU

Japanese Government; 1896; Nederlandsche Scheepsbouw Maats.; 1,543 tons; 278-5x36-5x19-2; 233 n.h.p.; triple-expansion engines. The steamship *Rijo Maru* was formerly the Panamanian *Santa Fe*, seized by the Japanese at Saigon in February, 1942. On July 15th, 1942, she was sunk, probably by striking a mine, off Aomori.

RIKARD NORDRAAK

V. Torkildsen; 1901; Hasseldalens Jernsk.; 1,123 tons; 231 x 34x13-5; 97 n.h.p.; triple-expansion engines. The Norwegian steamship *Rikard Nordraak* was torpedoed and sunk by a German submarine in the North Sea on May 2nd, 1917.

RIKKE SKOU

Oye Skou; 1907; Howaldtsverke; 1,489 tons; 241-2x36-1x16-5; triple-expansion engines.

The Danish ship *Rikke Skou* was on a voyage from Blyth to Aabenraa with coal. On October 6th, 1954, in approximately 54° 6' N., 4° 12' E., she encountered heavy weather, the cargo shifted and she capsized and sank. There were only eight survivors.

RIMAGE

German Government; 1914; *Fredrikstad Mek. Verksted*; 1,830 tons; 264-6x42-1x17-7; 188 n.h.p.; triple-expansion engines.

The steamship *Rimage* was formerly the Estonian *Hildur*, seized by the Germans. She was bombed and sunk by British aircraft on March 17th, 1945, at Aalesund.

RIMFAKSE

Schjelder up & Schjott; 1909; *Laxevaags Maskin & Jernskibs-byggeri*; 1,119 tons; 229x35-2x15-9; 101 n.h.p.; triple-expansion engines.

The Norwegian steamship *Rimfakse* was torpedoed and sunk by a German submarine on April 28th, 1918.

RIMFAKSE

D/SA/S Ringhorn; 1921; *Kockums Mek. Verkstad*; 1,334 tons; 235-5x37-7x16-5; 157 n.h.p.; triple-expansion engines. The Norwegian steamship *Rimfakse* was torpedoed and sunk by a German submarine on April 27th, 1941, E. of the Shetland Islands. Thirteen of her crew were killed.

RIMPHA

Gordon Steam Shipping Co.; 1882; *Sunderland S.B. Co.*; 2,220 tons; 277-5x38-7x19; 217 n.h.p.; triple-expansion engines.

The British cargo ship *Rimpha* was wrecked near Molos Burnu, in the Bosphorus, on April 23rd, 1899. She was on a voyage from Sulina to Gibraltar carrying a cargo of grain.

RINA CORRADO

Cormdo Soc. Anon. di Nav.; 1918; *Harland & Wolff*; 5,180 tons; 413-1x52-3x28-4; 517 n.h.p.; triple-expansion engines. The Italian steamship *Rina Corrado* was shelled and sunk by British warship on November 9th, 1941, about 120 miles S.E. of Punta Stilo.

RINDA

W. Wilhelmsen; 1917; *Sir J. Laing & Sons*; 6,029 tons; 405-3 x 53-5x33-5; 559 n.h.p.; triple-expansion engines. The Norwegian steamship *Rinda* was torpedoed and sunk by a German submarine on May 30th, 1941, off Sierra Leone on a voyage from Table Bay to Freetown. Thirteen of her crew were killed.

RINGBORG

H. M. Wrangell & Co.; 1903; *W. Gray & Co.*; 2,641 tons; 317-5x45x20-3; 245 n.h.p.; triple-expansion engines. The Norwegian ship *Ringborg* sprang a leak and sank on October 1st, 1924, in 34°N., 75° W., while she was carrying sugar from Santa Lucia, Cuba, to New York.

RINGHORN

Alb. Schjelderup; 1904; *Laxevaags Maskin. & Jernskibs.*; 1,790 tons; 268x38-8x17*5; 149 n.h.p.; triple-expansion engines.

The Norwegian ship *Ringhorn* was wrecked on August 7th, 1926, on Port Nova Rock near Scatari.

RINGHORN

A. Schjelderup; 1920; *Huiskens & van Dijk*; 1,298 tons; 237-9x37-2x16; 121 n.h.p.; triple-expansion engines. The Norwegian steamship *Ringhorn* was torpedoed and sunk by a German submarine on February 4th, 1941, on a voyage from Belfast to St. John, N.B. Fourteen of her crew were killed.

RINGSTAD

Skibs-A/S Gdynia; 1923; *Deutsche Werft A.G.*; 4,766 tons; 400-6x54-2x26-3; 717 n.h.p.; oil engines. The Norwegian motorship *Ringstad* was torpedoed and sunk by a German submarine on January 24th, 1942, on a voyage from Cardiff to St. John, N.B. Twenty-seven of her crew and three passengers were killed.

RINGULV

German Government; 1903; *Napier & Miller*; 5,153 tons; 390X52X26-9; 405 n.h.p.; triple-expansion engines. The steamship *Ringulv* was a Norwegian ship seized by the Vichy authorities and renamed *Ste. Marthe*. She was later taken over by the Germans who reverted to her original name. On June 14th, 1943, she was torpedoed and sunk by an Allied submarine one mile S. of Capo del Armi.

RINGS

M. A. Embiricos; 1919; *J. Pries tman & Co.*; 4,649 tons; 350 x 50 • 8 x 31 - 5; 384 n.h.p.; triple-expansion engines. The Greek steamship *Rinos* was torpedoed and sunk by a German submarine at 3.20 a.m. on November 2nd, 1942, on a voyage from Halifax to Hull. Eight of her crew were killed, and 23 survivors were landed in Iceland.

RIO AMAZONAS

G. Trucco; 1891; *G. Ansaldo & Co.*; 2,970 tons; 331-4X40-1x18-5; 248 n.h.p.; triple-expansion engines. The Italian steamship *Rio Amazonas* was torpedoed and sunk by a submarine in the Mediterranean on May 13th, 1917.

RIO AZUL

Thompson Steamshipping Co.; 1921; *Blyth S.B. & D.D. Co.*; 4,088 tons; 363-1x53-2x26-3; 474 n.h.p.; 11 knots; triple-expansion engines.

The steamship *Rio Azul*, Capt. T. V. Sutherland, was torpedoed and sunk by a German submarine on June 29th, 1941, about 200 miles S.E. of the Azores. Thirty-two men, including Capt. Sutherland, were killed. The vessel sank very quickly leaving two rafts lashed together on which there were 18 men, with one gallon flask and one glass jar of water. The rafts were adrift for 15 days during which time nine men died. The boatswain, Alfred Wyatt, though in an exhausted condition, instructed one of the survivors to lash a tobacco tin to a long handled scoop to form an improvised heliograph. Flashes from this were seen by a distant steamer and the men were rescued, the gallant boatswain who had done so much to cheer and encourage his messmates, dying soon afterwards. A posthumous award of Lloyd's Medal for bravery at sea was made to him at a later date.

RIOBLANCO

Thompson Steamshipping Co.; 1922; *Blyth S.B. & D.D. Co.*; 4,086 tons; 363-1x53-2x26-3; 474 n.h.p.; 11 knots; triple-expansion engines.

The steamship *Rio Blanco*, Capt. A. Blackett, was torpedoed and sunk by a German submarine 40 miles E. of Cape Hatteras on April 1st, 1942. Eighteen of her crew and one gunner were lost. Capt. Blackett was among the survivors.

RIO BRAVO

Ministry of War Transport (F. T. Everard & Sons); 1943; *Barnes Duluth S.B. Co.*; 1,141 tons; 209-7x37x13-2; 225 n.h.p.; oil engines.

The motorship *Rio Bravo* was torpedoed and sunk by a German motor torpedo boat at 12-20 a.m. on November 2nd, 1944, while anchored two miles N. of Ostend pier. Fourteen of her crew were lost.

RIO CLARO

Thompson S.S. Co.; 1922; *Blyth S.B. & D.D. Co.*; 4,086 tons; 363-1 x 53 • 2 x 26 • 3; 474 n.h.p.; triple-expansion engines. The British steamship *Rio Claro*, on a voyage from Sunderland to Montevideo, was torpedoed and sunk by a German submarine on September 6th, 1939, off Casablanca.

RIO COLORADO

London-American Maritime Trading Co.; 1903; W. Doxford & Sons; 3,565 tons; 340-1x50-2x22-6; 300 n.h.p.; 10 knots; triple-expansion engines.

The steamship *Rio Colorado* struck a mine and sank at the entrance to the Tyne on March 22nd, 1917. The captain and nine of the crew were killed.

The ship was inward bound from the River Plate with grain.

RIO DE JANEIRO

Hamburg-Sudamerika Linie; 1914; Bremer Vulkan; 5,261 tons; 401-9x55x27-8; 380 n.h.p.; 9 knots; triple-expansion engines.
The liner *Rio de Janeiro* was bound for Norway with troops and horses for the invasion of Norway when, at about 1 p.m. on April 8th, 1940, she was sighted by two British submarines which hailed her with the command to stop. The *Rio de Janeiro*, however, changed course and made for the coast near Lillesand, but she was soon overhauled and torpedoed. At the time of the attack the British were not aware that she was a transport and it was not until large numbers of bodies in military uniforms were washed ashore that her identity became known. Of those on board 150 soldiers and about 80 horses were drowned and 150 soldiers and crew reached the shore.

RIO DE JANEIRO MARU

Japanese Government; 1930; Mitsubishi Zosen Kaisha; 9,626 tons; 461-2x62x39-5; 1,503 n.h.p.; oil engines. The liner *Rio de Janeiro Maru* was taken over by the Japanese navy and converted into a submarine tender. On February 17th, 1944, she was sunk by U.S. carrier-based aircraft in the Caroline Islands.

RIO DORADO

Thompson Steamshipping Co.; 1924; Blyth S.B. & D.D. Co.; 4,507 tons; 390x55-3x25-5; 444 n.h.p.; 11 knots; triple-expansion engines.
The steamship *Rio Dorado*, Capt. A. J. Clare, was in convoy on March 15th, 1941, when there was an attack by the German battleships *Gneisenau* and *Scharnhorst*. The convoy was about midway between the United States and the United Kingdom and was harried by the enemy raiders throughout the 15th and part of the 16th. The *Rio Dorado* was sunk with the loss of all her crew of 39. Other vessels sunk in the same raid were the *British Strength*, 7,139 tons, *Simmia*, 6,197 tons, *San Casimiro*, 8,046 tons, *Royal Crown*, 4,388 tons, *Myson*, 4,564 tons, *Athelfoam*, 6,554 tons, *Sardinian Prince*, 3,491 tons, *Silverfir*, 4,347 tons, *Empire Industry*, 3,721 tons, *Demeterton*, 5,251 tons, and *Chilean Reefer*, 1,831 tons.

This was the German battleships' most successful attack during the time that they were operating from French harbours.

RIO GRANDE

Hamburg Sud-Amerika Linie; 1939; Howaldtswerke; 6,062 tons; 446-5x61-3x23-8; 909 n.h.p.; 13-5 knots; oil engines. The German motorship *Rio Grande* was engaged in blockade running during the Second World War. She carried cargoes of rubber, tin and wolfram from the Far East to Germany. On January 4th, 1944, when in the South Atlantic about 650 miles from Cape San Roque, she was intercepted by the U.S. light cruiser *Omaha* and the destroyer *Jouett* and compelled to stop. The Americans sank her by gunfire. Most of those on board were saved but there was some loss of life.

For further details see *Burgenland*.

RIO LOGE

Noakes & Spence; 1869; W. C. Miller & Sons; 241 tons; 122-3x24-7x12-8; auxiliary engine.

The auxiliary brigantine *Rio Loge*, Capt. W. S. Spence, left Kaipara, New Zealand, on January 6th, 1909, for Dunedin with a cargo of timber. On the 14th she was sighted by the schooner *War at ah* in a southerly gale. On the 19th the ketch *Isabella de Fraime* passed through a quantity of floating planks, believed to have been part of the brigantine's cargo.

Later a lifebuoy bearing her name was picked up outside Wellington Harbour. Nothing more was ever heard of her.

The *Rio Loge* carried a crew of 12 all told.

RIO PRETO

Samuel Lewis; 1901; Irvine's S.B. & D.D. Co.; 4,026 tons; 345x47-9x19-4; 306 n.h.p.; triple-expansion engines. The British steamship *Rio Preto* was wrecked at Pointe de St. Quentin, six miles N. of St. Valery-sur-Somme, on December 18th, 1922. She was on a voyage from Poti to Boulogne carrying a cargo of manganese ore.

RIO TERCERO

Argentine Government; 1912; Palmers^ Co.; 4,864 tons; 405-1x54-1x23-5; 366 n.h.p.; triple-expansion engines. The steamship *Rio Tercero* was torpedoed and sunk by a German submarine on June 22nd, 1942, 120 miles out of New York, bound to Buenos Aires.

RIO VERDE

London-American Maritime Trading Co.; 1901; Irvine's S.B. & D.D. Co.; 4,025 tons; 345x47-9x19-4; 306 n.h.p.; 9 knots; triple-expansion engines.

The steamship *Rio Verde* was torpedoed and sunk by a German submarine four miles W. of Crammock Head, Mull of Galloway, on February 21st, 1918. The captain and 19 of the crew were killed.

RIOJUN MARU

Harada Risen K.K.; 1892; Hawthorn, Leslie & Co.; 4,730 tons 360-4x48x26-2; 529 n.h.p.; triple-expansion engines. The *Riojun Maru* stranded on a reef and sank 45 miles N. of Caspar Strait on May 28th, 1921. She was on a voyage from Dairen to Java with coal.

RIPPLE

Richardson & Co.; 1905; Van Vliet; 413 tons; 141-7x24-1x11-3; 80 h.p.; compound engines.
The small coastal steamship *Ripple*, Capt. J. A. Norling, left Wellington for Napier, New Zealand, at 3 • 30 p.m. on August 6th, 1924. She was largely engaged in the wool trade and had on board 500 tons of wool and other cargo and two passengers. Her crew numbered 14 all told.

She proceeded on her course in face of an increasingly fierce south-easterly gale, and at about midnight the lighthouse keeper at Cape Palliser saw her about three miles off shore due S. of the lighthouse. Twenty minutes later she signalled for assistance, and the keeper went to telephone a message to Wellington. When he returned the *Ripple's* lights had disappeared and he never saw her again. Next day the coast was strewn with wreckage, some of it bearing the steamship's name.

RISEN MARU

6,436 tons.
The Japanese steamship *Risen Maru* was bombed and sunk by U.S. carrier-based aircraft on December 15th, 1944, in Manila Bay.

RISSHUN MARU

Kusakahe Risen K.K.; 1906; Russell & Co.; 4,414 tons; 370-3X49-8x19-2; 410 n.h.p.; triple-expansion engines.
The steamship *Risshun Maru* was sunk by U.S. carrier-based aircraft on September 21st, 1944, off Corregidor.

RISUI MARU

7,500 tons.
The Japanese ship *Risui Maru* was bombed by British aircraft and sunk by warships on March 26th, 1945, about 180 miles E. of Little Andaman, Andaman Islands.

RIV

Societ  Commerciale di Navigazione; 1921; Armstrong, Whit-worth & Co.; 6,630 tons; 425-6x55-8x34-7; 610 n.h.p.; oil engines.
The Italian motorship *Riv* was bombed and sunk by British aircraft on August 30th, 1941, at Tripoli.

RIVERAFTON

Ayrshire Navigation Co.; 1935; Lithgows; 5,479 tons; 433-2X 58-2x25-6; 415 n.h.p.; triple-expansion engines. The British steamship *River Afton*, on a voyage from Middlesbrough and Reykjavik for Archangel, was torpedoed twice by a

RIVER DARE

German submarine on July 5th, 1942, in the Barents Sea. The second torpedo detonated the ship's cargo of explosives and she broke in two and sank. Eleven of her crew, eight gunners, six of the Convoy Commodore's staff and one passenger were lost, 36 survivors were picked up by one of the convoy escorts.

RIVER DARE

D. R. Llewellyn, Merrett & Price; 1919; Grangemouth Dockyard Co.; 1,968 tons; 280-3x41-9x18-9; 230n.h.p.; triple-expansion engines.

The British steamship *River Dare* foundered 20 miles N. of Cape St. Vincent on March 22nd, 1924. She was on a voyage from Huelva to Garston carrying a cargo of copper pyrites.

RIVER CARRY

James Little & Co.; 1883; Workman, Clark & Co.; 1,294 tons; 240x33-2x18-2; 99h.p.; compound engines. The British cargo ship *River Carry* foundered in a severe gale off Dunbar on November 18th, 1893, while on a voyage from Leith to London carrying a cargo of coal. All on board were lost.

RIVER LUGAR

Ayrshire Navigation Co.; 1937; Lithgows; 5,423 tons; 441X 58-2x25-6; 392 n.h.p.; triple-expansion engines & L.P. turbine. The British steamship *River Lugar*, on a voyage from Pepel to Barry Roads with 9,250 tons of iron ore, was torpedoed and sunk by a German submarine on June 26th, 1941, 1100 miles W. of Freetown. Thirty-nine of her crew and two passengers were lost. Six survivors were picked up some time later.

RIVER MEANDER

S. & J. Thompson; 1906; Scotts S.B. & E. Co.; 3,888 tons; 306'1x50-2x16-8; 370 n.h.p.; triple-expansion engines.* The British cargo ship *River Meander* foundered in lat. 39° N., long. 63° W., in a heavy gale on November 30th, 1912. She was on a voyage from New York to Smyrna carrying a general cargo.

RIVER TYNE

Frutera Line; 1894; Naval Construction & Armaments Co.; 1,531 tons; 275x35-1x16-5; 283 n.h.p.; triple-expansion engines.

The British steamship *River Tyne* foundered about October 26th, 1916, 30 miles off Oporto. She was on a voyage from Lisbon to Hull.

RIVER WYE

D. R. Llewellyn, Merrett & Price; 1906; Craig, Taylor & Co.; 3,539 tons; 342x51x22-7; 307n.h.p.; triple-expansion engines. The British cargo ship *River Wye* was wrecked on Gaulway Rocks, Port Mouton, N.S., on November 24th, 1923. She was carrying a cargo of coal from Swansea to Boston.

RIVERINA

Wilhelm Lund; 1887; Wigham Richardson & Co.; 2,801 tons; 325x40x25-7; 400h.p.; triple-expansion engines. The British cargo ship *Riverina* was wrecked at Ram Head, Victoria, on January 28th, 1890, while on a voyage from London to Sydney, N.S.W., carrying a general cargo.

RIVOLI

Stephens & Mawson; 1882; Tyne Iron S.B. Co.; 1,272 tons; 250'x35x14-5; 98 h.p.; compound engines. The British cargo ship *Rivoli* was sunk by collision with the German steamship *Palermo* off Ushant on August 25th, 1883, while on a voyage from Bilbao to the Tees carrying a cargo of iron ore. Five of the crew were drowned.

RIVULET

Needham Bros.; 1906; W. Gray & Co.; 3,112 tons; 331X 47-6x22-4; 287n.h.p.; triple-expansion engines. The British cargo ship *Rivulet* was wrecked off Abaco, Bahamas, on December 14th, 1914, while on a voyage in ballast from Naples to New Orleans.

RIZAL

Tabacalera S.S. Co.; 1896; J. Blumer & Co.; 2,744 tons; 313 X 43x14; 266 n.h.p.; triple-expansion engines. The American steamship *Rizal* was torpedoed and sunk by a submarine in the Mediterranean on November 9th, 1917.

RIZAN MARU

Japanese Government; 1917; Newport News S.B. & D.D. Co.; 4,850 tons; 370-3x53-2x27; 471 n.h.p.; triple-expansion engines.

The steamship *Rizan Maru* was formerly the British *Munlock*, scuttled at Hong Kong in December, 1940, and raised and repaired by the Japanese. She was torpedoed and sunk by the U.S. submarine *Searaven* on September 21st, 1944, off the east coast of Sakhalin Island.

ROBERT

A/S Kjobenhavns Bunker-Kul-Depot; 1899; Oderwerke A.G.; 1,445 tons; 239-3x35-8x16-1; 105n.h.p.; triple-expansion engines.

The Danish steamship *Robert* was torpedoed and sunk by a German submarine in the North Sea on April 17th, 1917.

ROBERT BACON

U.S. War Shipping Administration; 1943; Delta S.B. Co.; 7,191 tons; 422-8x57x34-8; 339 n.h.p.; triple-expansion engines.

The steamship *Robert Bacon* was torpedoed and sunk by a submarine at 11.35 p.m. on July 13th, 1943, off Mozambique on a voyage from Suez to Bahia. Five of her crew were lost.

ROBERT BORNHOFEN

R. Bornhofen; 1919; W. Doxford & Sons; 6,643 tons; 414-3X 55-4x34-2; 596n.h.p.; triple-expansion engines. The German steamship *Robert Bornhofen* struck a mine and sank on September 13th, 1942, off Honningsvaag, Norway.

ROBERT BROWN

William D. C. Balls & Son; 1879; J. Readhead & Co.; 1,295 tons; 235'7x33-1x19-1; 135 n.h.p.; compound engines. The British cargo ship *Robert Brown* sank after a collision with the steamship *Marpessa*, 1,730 tons, off Dungeness on January 11th, 1896, while on a voyage from Bilbao to Calais carrying a cargo of iron ore. Thirteen of her crew were picked up by the *Marpessa*.

ROBERT E. LEE

Eastern S.S. Lines; 1925; Newport News S.B. & D.D. Co.; 5,184 tons; 375-5x54x29-7; turbine engines. The American steamship *Robert E. Lee* was torpedoed and sunk by a German submarine on July 30th, 1942, between Key West and New Orleans. Fifteen passengers were killed.

ROBERT ERSKINE

U.S. War Shipping Administration; 1943; Bethlehem Fairfield Shipyard; 7,176 tons; 422-8x57x34-8; 339 n.h.p.; triple-expansion engines.

The American ship *Robert Erskine* drove ashore on January 6th, 1944, during a gale and broke in two.

ROBERT GRAY

U.S. Maritime Commission; 1942; Oregon S.B. Corp.; 7,176 tons; 422-8x57x34-8; 339n.h.p.; triple-expansion engines. The American ship *Robert Gray* left New York on April 12th, 1943, for Loch Ewe and London. She straggled from convoy during the night of the 12th, and was never seen again.

ROBERT H. COLLEY

Atlantic Refining Co.; 1938; Sun S.B. & D.D. Co.; 11,651 tons; 523-5x70-2x39-8; turbo-electric engines.

The American tanker *Robert H. Colley* was torpedoed and sunk by a German submarine on October 4th, 1942, about 700 miles E. of Cape Farewell on a voyage from Curagao to the Clyde via New York. There were 33 survivors.

ROBERT HUGHES

Nigerian Government; 1932; W. Simons & Co.; 2,879 tons; 305 X 57 x 21; 425 n.h.p.; triple-expansion engines. The dredger *Robert Hughes* was sunk by mine or torpedo at the entrance to Lagos harbour on June 4th, 1941. Thirteen of her crew were killed on board and one man died later of injuries.

ROBERT J. WALKER

U.S. War Shipping Administration; 1943; Oregon S.B. Corp.; 7,180 tons; 422-8x57x34-8; 339n.h.p.; triple-expansion engines.

The American steamship *Robert J. Walker* was torpedoed by a submarine in 36° 35' S., 150° 43' E., on December 24th, 1944. The ship was severely damaged and sank on the following day.

ROBERT L. HOLT
