John Holt & Co.; 1926; Smith's Dock Co.; 2,918 tons; 310X 44-6x24-3; 256 n.h.p.; 10 knots; triple-expansion engines. The steamship *Robert L. Holt*, Capt. J. A. Kendall, left Liverpool on June 20th, 1941, for Warri, in ballast. She was never seen again. An unidentified ship was reported to have been sunk by gunfire from a submarine on July 3rd, 1941, E. of Maderia. This may have been the *Robert L. Holt*.

ROBERT LEY

German Government; 1938; Howaldtswerke; 27,288 tons; 635-5x79x45-1; 2,655 n.h.p.; diesel-electric engines. The Gentian liner *Robert Ley* was destroyed by fire during an air raid on Hamburg on March 8th, 1945. She had just arrived loaded to capacity with refugees from East Prussia, many of whom lost their lives.

ROBERT MOHRING

Norddeutscher Lloyd; 1927; Fried. Krupp A.G.; 3,344 tons; 319 -5x46-8x23; 266 n.h.p.; triple-expansion engines. The steamship *Robert Mohring* was bombed and sunk by Russian aircraft on March 7th, 1945, at Sassnitz.

ROBERT MULLER VII

Robert Müller; 1938; Ottensener Eisenwerk A.G.; 985 tons; 214-4x32-1x13-2; 210 n.h.p.; oil engines. The German motorship *Robert Müller VII* struck a mine and sank on March 22nd-23rd, 1945, in the Skagerrak. Nine of her crew of 24 were killed.

ROBERTO R.

Hijo de Ramon A. Ramos; 1901; Campbeltown S.B. Co.; 1,238 tons; 230X32-8x16-3; 120 n.h.p.; triple-expansion engines. The Spanish steamship *Roberto R.* was shelled and sunk by Government warships on August 28th, 1936, at the entrance to Huelva, during the Spanish Civil War.

ROBIN GOODFELLOW

Seas Shipping Co.; 1920; Skinner & Eddy Corp.; 6,885 tons; 424-8x55-2x33-4; 637n.h.p.; turbine engines. The American steamship *Robin Goodfellow* was torpedoed and sunk by a German submarine on July 15th, 1944, off the coast of S.W. Africa on a voyage from Table Bay to Bahia.

ROBIN HOOD

Seas Shipping Co.; 1919; Skinner & Eddy Corp.; 6,887 tons; 424-8x55-2x33-4; 637n.h.p.; turbine engines. The American steamship *Robin Hood* was torpedoed and sunk by a German submarine on April 15th, 1942, between Trinidad and Boston. Fourteen of her crew were killed.

ROBIN MOOR

Seas Shipping Co.; 1919; American International S.B. Corp.; 4,999 tons; 390x54-2x27-6; 600n.h.p.; turbine engines. The American steamship *Robin Moor* was torpedoed and sunk by a German submarine on May 21st, 1941, about 950 miles from Cape St. Roque, Brazil, on a voyage from New York to Lourenço Marques.

ROCHESTER

Ken S.S. Line; 1912; Great Lakes Eng. Works; 2,551 tons; 247x43-7x29-3; 303 n.h.p.; triple-expansion engines. The American steamship *Rochester* was torpedoed and sunk by a German submarine in the Atlantic on November 2nd, 1917.

ROCHESTER

Socony-Vacuum Oil Co.; 1920; Bethlehem S.B. Corp.; 6,836 tons; 435-6x56-2x31-7; 598n.h.p.; triple-expansion engines. The American tanker *Rochester* was torpedoed, shelled and sunk by a German submarine on January 30th, 1942, between New York and Beaumont, Texas.

ROCKINGHAM

British Navy., destroyer; 1919; Bethlehem Shipbuilding Corp.; 1,190 tons; 311x30x10; 27,000 s.h.p.; 35 knots; turbine engines; four 4 in. guns, 12 T.T. The destroyer *Rockingham*, Lt. Cdr. J. C. Cooper, R.N.V.R., was originally the U.S.S. *Swasey* and was acquired by the British Navy under the Lend-Lease Act. The vessel struck a mine and sank off Aberdeen on September 27th, 1944.

RODA

C. T. Bowring & Co.; 1897; A. McMillan & Son; 2,516 tons; 315 X 44x20- 7; 263 n.h.p.; triple-expansion engines. The British cargo ship *Roda* was wrecked at Long Island on February 13th, 1908, while on a voyage from Huelva to New York carrying an ore cargo.

RODA

Hamburg-Amerika Linie; 1928; Deutsche Werft; 6,780 tons; 432-4x59-1x27-9; 1,316n.h.p.; oilengines. The German motorship *Roda* was sunk by naval action on April 9th, 1940, at Stavanger, during the invasion of Norway.

RODDAM

Steel, Young & Co.; 1887; E. Withy & Co.; 2,378 tons; 289-6x38-1 x 19; 210 n.h.p.; triple-expansion engines. The British cargo ship *Roddam* was wrecked on Beroskoil Island on October 3rd, 1905, while on a voyage in ballast from the Yenisei River to Onega.

RODFJELL

H.Schmitler; 1908; Nordseewerke; 1,642 tons; 271-3x39-8x 15-5; 163 n.h.p.; triple-expansion engines. The Norwegian ship *Rodfjell* was wrecked on February 12th, 1923, at Kiberg, E. of Vardo. She was on a voyage from Kirkenes to the United Kingdom with iron ore.

RODINA

Societe Commerciale Bulgare de Nav. a Vap.; 1922; Vulcan-Werke A.G.; 4159 tons; 360-7x51x26; 260n.h.p.; triple-expansion engines. The Bulgarian steamship *Rodina* struck a mine and sank on September 19th, 1941, about 25 miles off Burghaz.

RODINA

U.S.S.R.; 1922; N.V. Lobithsche Scheepsbouw Maats.; 4,441 tons; 385x50-3x26-4; 439n.h.p.; turbine engines. The Russian steamship *Rodina* struck a mine and sank on July 5th, 1942, off Reykjavik. Twenty-four survivors, including some passengers, landed in Iceland.

RODNEY STAR

Blue Star Line; 1927; Lithgows; 11,803 tons; 476x67-3x45-2 ; 1,582 n.h.p.; 15 knots; turbine engines. The liner *Rodney Star*, Capt. S. J. C. Phillips, was torpedoed and sunk by a German submarine on May 16th, 1941, about 600 miles W. of Cape Palmas, West Africa. There were no casualties.

RODOSTO

Soc. di Nav. Roma; 1918; Cameron Genoa Mills; 2,350 tons; 249 -8x43-4x23; 322 n.h.p.; triple-expansion engines. The Italian ship *Rodosto* was wrecked on January 22nd, 1927, at Molara Island, Sardinia. She was carrying a cargo of salt from Cagliari to Genoa.

ROEBUCK

ROEBUCK

Jackson Bros. & Cory; 1883; Vulcan Iron Works Co.; 1,176 tons; 229-8x32-2x15-3; 107 h.p.; compound engines. The British cargo ship *Roebuck* sank after a collision 30 miles S.E. of Cape St. Vincent on February 17th, 1888. She was carrying a cargo of wine from Scoglitti to Rouen.

ROECLIFF

James Westoll; 1894; Short Bros.; 3,263 tons; 315-7x45-1 X 16-2; 286n.h.p.; triple-expansion engines. The British cargo ship *Roeliff* sank after a collision off Hastings on June 4th, 1897. She was carrying a cargo of grain from Odessa to Hamburg.

ROEDEAN

Great Western Railway Co.; 1897; Naval Construction & Armament Co.; 1,094 tons; 280x34-5x16-8; 643 n.h.p.; 18 knots; triple-expansion engines. The Great Western Railway Co.'s steamship *Roebuck* was taken over by the Admiralty in the First World War for service as a minesweeper. The vessel's name was changed to *Roedean* as her own name was already borne by another naval vessel. On January 13th, 1915, she was lost off Longhope. She carried a complement of about 70.

ROEDELHEIM

Unterweser Reederei Akt. Ges.; 1914; Rotterdam Droogdok Maats.; 3,306 tons; 328 -3x48-2x22-1; 274 n.h.p.; triple-expansion engines. The German ship *Roedelheim* sprang a leak and sank in heavy weather on January 6th, 1929, in 47° 30' N., 44° W., while on a voyage from Emden to Boston, Mass.

ROGER B. TANEY

U.S. Maritime Commission; 1942; Bethlehem Fairfield Shipyard; 7,191 tons; 423x57-1x34-8; 3 39 n.h.p.; triple-expansion engines. The American steamship *Roger B. Taney* was torpedoed and sunk by a German submarine on February 27th, 1943, on a voyage from Saldanha Bay to Bahia. Eighteen of her crew and 13 gunners were killed.

ROGN

Akties. Rederi Odjfell; 1901; Scott & Co.; 1,028 tons; 233-2x 31-5x12-1; 111 n.h.p.; triple-expansion engines. The Norwegian steamship *Rogn* was sunk by a German submarine in the Bay of Biscay on December 15th, 1916.

ROHILLA

British India Steam Navigation Co.; 1906; Harland & Wolff; 7,409 tons; 460x56x30-6; 1,484n.h.p.; 17 knots; triple-expansion engines. The liner *Rohilla*, Capt. Neilson, was taken over early in the First World War for service as a hospital ship. At 4 a.m. on October 30th, 1914, while on her way from Leith to Dunkirk to evacuate wounded she ran on the rocks half a mile S. of Whitby. There was a full gale blowing at the time and it was at first thought that the ship had struck a mine as she had been in the vicinity of a minefield a short time before. The Whitby, Redcar and Uppang lifeboats went to the rescue but it was some time before the seas permitted them to approach the wreck. The total number on board when the *Rohilla* left Leith was 229, of whom 83 were lost. Capt. Neilson and all the nurses were among the survivors.

ROHNA

British India Steam Navigation Co.; 1926; Hawthorn Leslie & Co.; 8,602 tons; 461-4x61-8x29-9; 934n.h.p.; 13 knots; quadruple-expansion engines. The liner *Rohna*, Capt. Murphy, left Oran for India in convoy on November 25th, 1943. She carried some 2,000 American troops and was loaded almost to capacity. On the 26th the convoy was subjected to persistent attacks by a formation of 30 German bombers. After some hours of these attacks a single aircraft carrying a glider bomb, at that time a new weapon, discharged its

missile off the port side of the *Rohna* and scored a hit above the water line immediately over the engine room. The destruction caused by the explosion was immense and the after portion of the vessel burst into flame, preventing all boats on the port side from being launched. Boats on the starboard side were got away but some were swamped by the large numbers of soldiers swimming around who tried to clamber into them despite their overloaded state. The ship meanwhile continued to float but after an hour and a half settled so far by the stern that the engines and boilers broke loose and fell through the hull.

Five officers and 115 Asiatic ratings of her crew were killed out of a total of 195. The American troops on board suffered very heavily, no fewer than 1,050 being killed. Capt. Murphy was among the survivors.

ROI ALBERT

Cie. Royale Belgo Argentine; 1911; Antwerp Eng. Co.; 2,853 tons; 329-3x45-6x22-3; 318n.h.p.; triple-expansion engines. The Belgian ship *Roi Albert* was wrecked on July 23rd, 1922, near Cape St. Vincent, when on a voyage from Antwerp to Alexandria.

ROI NE

IlmariTuuli; 1881; Palmers'Co.; 1,085 tons; 232x31-5x16; compound engines. The Finnish ship *Roine*, Capt. Heino, was involved in a collision with the *Briardene* in a fog on March 20th, 1953, and sank near Newarp lightship, Gorleston.

ROKEBY

John Cory & Sons; 1878; Palmers' Co.; 1,435 tons; 250X 33-2x21; 150 h.p.; compound engines. The British cargo ship *Rokey* was wrecked on Conil Reef, Spain, on January 25th, 1888. She was on a voyage from Newport to Savona carrying a cargo of coal.

ROKKO MARU

Yamazaki Risen K.K.; 1890; Tyne Iron S.B. Co.; 2,455 tons; 290 X38-1x19-9; 222 n.h.p.; triple-expansion engines. The *Rokko Maru* foundered on September 26th, 1921, near Hamashima. She was carrying coal.

ROKKO MARU

Toa Kaiun K.K.; 1912; J. Blumer & Co.; 3,038 tons; 315-5x 46x27; 284 n.h.p.; triple-expansion engines. The steamship *Rokko Maru* was bombed and sunk by U.S. land-based aircraft on October 5th, 1944, 20 miles N.W. of Kaohsiung, Formosa.

ROKKOSANMARU

Sugaya Risen K.K.; 1911; Sir R. Dixon & Co.; 2,174 tons; 275-5x42-3x18-1; 240 n.h.p.; triple-expansion engines. The steamship *Rokkosan Maru* was bombed and sunk by U.S. land-based aircraft on September 25th, 1944, about 200 miles S.W. of Kaohsiung, Formosa.

ROKOMARU

Dairen Risen K.K.; 1912; J. Blumer & Co.; 3,328 tons; 335X 48x22-4; 277n.h.p.; triple-expansion engines. The steamship *Roko Maru* was torpedoed and sunk by the U.S. submarine *Tang* on August 11th, 1944, off Nagashima, Japan.

ROKOS

Ionian S.S. Co.; 1918; Swan, Hunter & Wigham Richardson; 6,426 tons; 412-4x55-8x34-4; 517n.h.p.; triple-expansion engines. The Greek steamship *Rokos* was bombed by German aircraft on May 26th, 1941, drove ashore and was wrecked in Suda Bay, Crete, during the invasion of Greece.

ROLAND

NorddeutscherLloyd; 1927; J. C. Tecklenborg A.G.; 2,436 tons; 284-9x42-8x12-7; turbine engines. The German steamship *Roland* struck a mine and sank on April 21st, 1944, off Tallinn.

ROLANDSECK

Deutsche Dampfs. Ges. Hansa; 1937; Stettiner Oderwerke A.G.; 1,845 tons; 280-1x42-3x16-4; 254 n.h.p.; triple expansion engines & L.P. turbine.

The German steamship *Rolandseck* was bombed and sunk by British aircraft on March 12th-13th, 1945, in the Kattegat.

ROLLO

Hakon Thomsen; 1890; R. Thompson & Sons; 2,290 tons; 320 X 42x19- 7; 308 n.h.p.; triple-expansion engines. The Danish steamship *Rollo* was sunk by a German submarine in the English Channel on December 8th, 1916.

ROMA

Italian Navy, dreadnought-battleship; 1940; Cantieri Riuniti deirAdriatico; 35,000 tons; 775x106x30-5; 130,000 s.h.p.; 30 knots; turbine engines; nine 15 in. guns, twelve 6 in., twelve 3-5 in., 40 m.g., 3 aircraft.

The Italian battleship *Roma* left Spezia for Malta on September 8th, 1943, in company with her sister ships the *Italia* and *Vittorio Veneto* with several cruisers and destroyers on the occasion of the capitulation of Italy to the Allies. Shortly after leaving the port, and whilst the ships were out of range of Allied air cover, they were attacked by German Stuka formations and torpedo-bombers. Direct hits were scored on the *Roma* which broke in two and sank with heavy loss of life.

The Italian warships, flying their national colours, were directed to steam to Malta and to await the orders of the Allied naval authorities. A classified list of these is given below. Seven ships of the fleet steamed for the Balearic Islands where five of them were interned by the Spanish authorities, the other two being able to leave under their own steam before the expiry of the recognised period of 24 hours. A few other ships arrived at Bona, Algeria.

Including torpedo boats, submarines and other small craft the number of ships placed at the disposal of the Allies totalled over one hundred.

The ships interned by the Spaniards at Mahon, Minorca, were the cruiser, *Attilio Regolo*, 3,362 tons, the destroyers *Mitragliere*, *Fuciliere* and *Carabiniere*, 1,620 tons, and one other. The minelayer *Azio* was interned in Turkey and her sister ship, the *Lepanto*, was scuttled at Shanghai.

ROMAGNA

Successore Sansone Forli; 1910; Cantieri Navale Riuniti; 678 tons; 176-4x26-3x10; oil engines.

The Italian passenger motorship *Romagna* was overwhelmed by a gale off Rovigno on the night of November 23rd, 1911. At the time of her loss she was carrying about 70 persons, passengers and crew. Of this number only ten, all of whom were passengers, were saved, being picked up by the Austrian-Lloyd steamship *Tirol*.

ROMAGNA

Navigazione e Commercio Soc. Anon. Italiana; 1899; Grange-mouth Dockyard Co.; 1,416tons; 242-7x32-5x22-5; 165n.h.p.; triple-expansion engines.

The Italian tanker *Romagna* struck a mine and sank on August 2nd, 1943, about six miles from Cagliari, Sardinia.

ROMANA

Sumac, Soc. Anon.; 1943; Bethlehem Steel Co.; 2,888 tons; 316x50-1x27-7; oilengines.

The Honduran motorship *Romana*, a converted tank landing craft, sprang a leak and sank during heavy weather on June 24th, 1955, in 5°5'N., 50°25'W.

ROMANBY

Sir R. Ropner & Co.; 1908; Ropner & Sons; 3,835 tons; 350 x 50x23; 301 n.h.p.; triple-expansion engines. The British cargo ship *Romanby* sank after a collision in lat. 47°43'N., long. 10°33'W., on December 23rd, 1917. She had sailed from Cardiff carrying a cargo of coal.

ROMANCE

CharlesL. Ellis; 1898; Harlan & Hollingsworth Co.; 1,240 tons; 245x38x15-8; 222n.h.p.; triple-expansion engines. The American ship *Romance* was carrying passengers from Province-town to Boston when she was involved in a collision in fog and sank on September 9th, 1936, near Graves Buoy, Boston Harbour.

ROMANIA

Societd Italiana di Servizi Marittimi; 1898; G. Ansaldo & Co.; 2,562 tons; 321-2x39-2x22-5; 220n.h.p.; triple-expansion engines.

The Italian steamship *Romania* was torpedoed and sunk by a submarine in the Mediterranean on April 16th, 1918.

ROMANIA

German Navy; 1905; Ateliers & Chantiers de la Loire; 3,152 tons; 356'9x41-9x27-5; 524n.h.p.; triple-expansion engines. The steamship *Romania* was taken over from Roumania by the German Navy for use as an auxiliary cruiser. She was sunk by the Russians prior to May 15th, 1944, during operations off the Crimea.

ROMANO

T. Wilson, Sons & Co.; 1881; Earless Co.; 2,845 tons; 330-8x 39x27-6; 300 h.p.; compound inverted engines. The British cargo ship *Romano* was sunk in a collision with the steamship *Nevada*, 2,355 tons, in lat. 43° N., long. 47° W., on May 3rd, 1884, while on a voyage from Hull to New York carrying a general cargo.

ROMEO

C. T. Bowring & Co.; 1883; R. Dixon & Co.; 2,279 tons; 300 x 37 x 23; 300 h.p.; compound engines. The British cargo ship *Romeo* was capsized by a strong flood tide near Villequier, River Seine, on September 21st, 1887, while on a voyage from New Orleans to Rouen carrying a cargo of maize.

Seven of the crew were drowned.

ROMEO

T. Wilson, Sons & Co.; 1881; Earle's Co.; 1J30 tons; 275X 34- 6x19-9x 333 n.h.p.; 10 knots; compound engines. The steamship *Romeo* was torpedoed and sunk by a German submarine seven miles S. of the Mull of Galloway on March 3rd, 1918. The captain and 28 crew were killed.

ROMFORD

ROMFORD

Britain S.S. Co.; 1898; *Ropner & Son*; 3,035 tons; 325x48-1x 21-8; 273 n.h.p.; 9 knots; triple-expansion engines. The steamship *Romford* was torpedoed and sunk by a German submarine two-and-a-half miles E. of Cape Carthage on February 10th, 1918. The captain and 27 of the crew were killed.

ROMNY

Det Forenede D/S.; 1913; *Helsingors Jernskib. & Maskin.*; 1,024 tons; 235x35-5x—; 150n.h.p.; 8-5 knots; triple-expansion engines.

The Danish steamship *Romny* was torpedoed and sunk by a German submarine ten miles N.N.E. of Cape Barfleur on February 26th, 1918. Nine men were killed. The captain was among the survivors.

ROOSALKA

Russian Navy, ironclad monitor; 1867; *Russia*; 2,026 tons; 206'7x42-6x12-7; 786i.h.p.; 8 knots; compound engines; four 9 in. guns, 2 m.g.

The Russian monitor *Roosalka*, Capt. Yenish, was an old and unseaworthy vessel when she was ordered to proceed from Tallinn to Helsingfors, a distance of between 40 and 50 miles. The officers of the ship protested against the order, but the Russian Admiralty insisted and on September 19th, 1893, the vessel sailed in company with the gunboat *Tutchka*. The *Roosalka* had a freeboard of only three feet and was known to have sprung a leak earlier in the summer. She carried 12 officers and 166 ratings.

When halfway across the Gulf of Finland the ships were separated by a sudden storm and the *Roosalka* was never seen again. A message in a bottle was picked up on the shore at Riga by some fishermen. This stated that there was no hope for the vessel and gave the time as 9-45 p.m.

RONA

Union S.N. Co.; 1862; *Wm. Denny & Bros.*; 1,215 tons; 235 x 33-2x21-3; diagonal engines.

The iron paddle steamship *Rona* was on a voyage from Shanghai to Swatow on April 14th, 1872, when she sank after a collision with the Messageries Maritimes steamship *Ava* 20 miles from Turnabout. Sixty lives were lost.

RONALD

I. T. Farsjo & Co.; 1894; *Sir Raylton Dixon & Co.*; 3,021 tons; 310-1x40-5x17-5; 238n.h.p.; triple-expansion engines. The Norwegian steamship *Ronald* was sunk by a German submarine off Ushant on March 16th, 1917.

RONALDSHAY

Bengal Government; 1922; *W. Simons & Co.*; 1,023 tons; 258-2x45-2x9-4; 199n.h.p.; triple-expansion engines. The Indian dredger *Ronaldshay*, in service at Safaga Island, Red Sea, was torpedoed and sunk by a German aircraft on October 21st, 1942. The captain and about 52 crew were lost.

RONDA

A/S J. Ludwig MorvinckeVs Rederi; 1937; *A.G. Weser*; 2,136 tons; 435-2x55-8x25-2; 885n.h.p.; oilengines. The Norwegian motorship *Ronda* struck a mine and sank on September 13th, 1939, off Terschelling. Fourteen of her crew and three passengers were killed*.

RONSAN MARU

Dairen Risen KK; 1929; *Mitsui Bussan Kaisha*; 2,735 tons; 326-5x46*5x21-5; 271 n.h.p.; oilengines. The motor vessel *Ronsan Mam* was torpedoed and sunk by the U.S. submarine *Tambor* on February 12th, 1944, N. of Okinawa.

RONTEGUI

I. Rubiera; 1878; *E. Withy & Co.*; 1,340 tons; 243-7x 32x16-9; 156 n.h.p.; compound engines. The Spanish ship *Rontegui* sprang a leak and sank on April 1st, 1921, 35 miles off San Sebastian lighthouse, Cadiz. She was carrying coal and coke.

ROOSEBOOM

KoninklijkePaketaartMaats.; 1926; *Rijkee&Co.*; 1,035 tons; 230-1x38-2x10-5; 67n.h.p.; compound engines. The Dutch steamship *Rooseboom* left Batavia on March 22nd, 1942, and ~~Padang~~ on the 26th, bound for Colombo with 150 British troops as passengers. On March 1st, at 11.35p.m., she was torpedoed and sunk by a Japanese submarine. There were only six survivors; two were picked up by the Dutch steamship *Palopo*, the other four landed on Sipora Island after 26 days in a boat.

RORAIMA

Steel, Young & Co.; 1879; *E. Withy & Co.*; 1,178 tons; 225-6 x 31 x 17-2; 100 h.p.; compound engines. The British cargo ship *Roraima* was wrecked in a hurricane on September 5th, 1889, near St. Kitts. She was on a voyage from London, via Trinidad, to St. Kitts carrying a general cargo.

ROSAFRED

Verkebacks Angf.-AjB; 1922; *Scheepsbouw De Amer*; 1,348 tons; 236-3x36-8x15-6; 153n.h.p.; triple-expansion engines. The Swedish steamship *Rosafred* was torpedoed and sunk by Allied aircraft on September 6th, 1944, off Bremerhaven on a voyage from Emden to Sweden.

ROSALIA

N.V. Curafaosche Scheepvaart Maats.; 1938; *Furness S.B. Co.*; 3,177 tons; 336-5x56-1x15; 366n.h.p.; triple-expansion engines.

The Dutch tanker *Rosalia* was torpedoed by the German submarine *U-615* on July 28th, 1943, between Maracaibo and Curacao. Although broken in two by the explosion the tanker burned for two and a half hours before sinking. Twenty-four of her crew were killed.

ROSALIA L.

Michele Lauria; 1915; *Cantiere Navale Monfalcone*; 7,186 tons; 436-3x54x27-1; 520 n.h.p.; triple-expansion engines. The Italian steamship *Rosalia L.* was torpedoed and sunk by a submarine in the Mediterranean on January 7th, 1917.

ROSALIE

John Cory & Sons; 1900; *Northumberland S.B. Co.*; 4,303 tons; 360x48x20-3; 320 n.h.p.; triple-expansion engines. The British cargo ship *Rosalie* was wrecked off Corcubion on October 7th, 1905, while on a voyage from Odessa to Christiansund carrying a cargo of wheat.

ROSALIE

New Ruperra S.S. Co.; 1914; *W. Gray & Co.*; 4,243 tons; 376-2x52x24-7; 387n.h.p.; 9-5 knots; triple-expansion engines. The collier *Rosalie* was torpedoed and sunk by a German submarine eight miles E. of Jidjelli, Algeria, on February 20th, 1917. The captain and 20 of the crew were killed.

ROSA MARY

I. Coverdale & Son; 1875; *W. Gray & Co.*; 1,129 tons; 231x 30-3x16-8; 99 h.p.; compound engines. The British cargo ship *Rosa Mary* sank after a collision with the steamship *Manningham*, 1,924 tons, in the Gulf of Bothnia, on June 5th, 1894. She was on a voyage from Uleaborg to West Hartlepool carrying a cargo of deals.

ROSA VLASSI

G. Vlassis&Co.; 1946; *J. Crown & Sons*; 1,958 tons; 283-7x 41 x—; triple-expansion engines. The Greek ship *Rosa Vlasi* was on a voyage from Stratoni to Piraeus when the cargo shifted during a gale on December 25th, 1959, and she capsized and sank. Ten men were lost.

ROSANDRA

Lloyd Triestino; 1921; *Cantiere San Rocco*; 8,034 tons; 464-2 x 57-4x32-5; 680n.h.p.; triple-expansion engines. The Italian steamship *Rosandra* was torpedoed and sunk by a British submarine on June 15th, 1943, about 12 miles off the coast of Albania.

ROSARIO

Orders & Hanford Steamship Co.; 1900; Blyth Shipbuilding Co.; 1,821 tons; 274x40-7x18-2; 192 n.h.p.; 9 knots; triple-expansion engines.

The steamship *Rosario* was torpedoed and sunk by a German submarine in the Atlantic on August 18th, 1917. The captain and 19 of the crew were killed. One survivor, a fireman, was taken prisoner by the submarine.

ROSARIO

A. H. Bull S.S. Co.; 1920; Bethlehem S.B. Corp.; 4,659 tons; 376-4x52-3x27; 323 n.h.p.; 11-5 knots; triple-expansion engines.

The American steamship *Rosario*, Capt. G. Larsen, was in convoy in the North Atlantic on February 21st, 1943, when she was torpedoed and sunk by a German submarine. Fourteen of her crew, including Capt. Larsen, and 16 gunners were killed.

ROSARIO

*Soc. Anon. Cooperativa di Nav. Garibaldi; 1918; Swan, Hunter & Wigham Richardson; 5,468 tons; 413*1x52-2x28-4; 517 n.h.p.; triple-expansion engines.*

The Italian tanker *Rosario* was torpedoed and sunk by a British submarine on March 10th, 1943, about four miles off Punta Milazzo, Sicily.

ROSBORG

Dampskibsselsk. Dannebrog; 1907; Osbourne^ Graham & Co.; 1877; 279-3x40-1x18-1; 189 n.h.p.; triple-expansion engines.

The Danish steamship *Rosborg* was sunk by a German submarine in the North Sea on March 3rd, 1917.

ROSE

*Peter Rowe & Sons; 1879; Schlesinger, DAVIS & Co.; 1,198 tons; 239-9x32*3x18-4; 130h.p.; compound engines.* The British cargo ship *Rose* left Marseilles on February 16th, 1889, for Carthage in ballast. The ship struck the pier on leaving the port and was run on to the beach leaking badly. Temporary repairs were effected and the ship resumed her voyage on the following morning. Some few miles out, however, she suddenly foundered.

ROSE

Norwegian Navy, corvette; 1941; W. Simons & Co.; 925 tons; 193x32x16; 2,800 i.h.p.; 17 knots; quadruple expansion engines; 3-dmn boilers; one 4 in. A.A. gun, several smaller. The corvette *Rose* was lent to the Norwegian navy by the British Admiralty and was manned by a Norwegian crew. On October 10th, 1944, when in the North Atlantic she was sunk in a collision with one of the ships in company. She carried a complement of about 100.

ROSE CASTLE

Rose Castle S.S. Co.; 1915; Short Bros.; 7,803 tons; 455x58x31-1; 606n.h.p.; triple-expansion engines. The Canadian steamship *Rose Castle*, lying off Bell Island, N.F.L., with 10,000 tons of iron ore for Sydney, N.S., was torpedoed and sunk by a German submarine at 3.30 a.m. on November 2nd, 1942. Twenty-three of her crew and one gunner were lost.

ROSEMARIE

Rodney S.S. Co.; 1909; Craig, Taylor & Co.; 1,579 tons; 245 x 36 • 6 X17 • 1; 181 n.h.p.; triple expansion engines. The British steamship *Rose Marie* sank after a collision off Haisbro' lightship, on December 11th, 1923, while on a voyage from the Tyne to London carrying a cargo of coal.

ROSE SCHIAFFINO

Ministry of War Transport (Mark Whitmill & Son); 1920; Blyth S.B. & D.D. Co.; 3,349 tons; 331-3x46-7x23-2; 368 n.h.p.; triple-expansion engines. The British cargo ship *Rose Schiaffino* sailed from Wabana on October 26th, 1941, carrying a cargo of iron ore for Cardiff. She called at St. John's, N.F.L., and left there on October 31st to join her convoy. Nothing more was ever heard of the ship or her crew of 37 and four gunners.

ROSEDALE

North Coast S.N. Co.; 1877; W. B. Thompson; 274 tons; 140-1x26-1x8-5; 65 r.h.p.; compound engines. The Australian coasting steamship *Rosedale* left Nambucca River on September 15th, 1911, for Sydney, N.S.W. Nothing more was heard of the ship after she was reported passing Smoky Cape at 2.45 p.m. on that day, and she was considered to have been lost during a gale that developed on the night of the 15th.

ROSEDALE

Canada S.S. Lines; 1888; Sunderland S.B. Co.; 1,507 tons; 246-1x35x14-7; 116 n.h.p.; triple-expansion engines. The Canadian cargo ship *Rosedale* sank after a collision in the Bristol Channel on April 18th, 1919, while on a voyage from Cardiff to Bordeaux carrying a cargo of coal.

ROSELLA

Elvidge & Morgan; 1881; J. L. Thompson & Sons; 1,305 tons; 242-8x34'1x18'3; 163 n.h.p.; compound engines. The British cargo ship *Rosella* foundered on Roches Doutres rocks, Jersey, on September 14th, 1908. She was on a voyage from Penarth to Granville carrying a cargo of coal. The captain and four others were saved by the Jersey lifeboat. They were the only survivors.

ROSENBORG

Ministry of War Transport (J. S. Stranaghan & Co.); 1914, W. Gray & Co.; 1,997 tons; 280X40x19-1; 188 n.h.p.; triple-expansion engines. The British steamship *Rosenborg* on a voyage from Reykjavik to Swansea in ballast, was torpedoed and sunk by a German submarine on April 24th, 1943, about 400 miles W. of the Shetland Islands. Twenty-two of her crew and six gunners were lost. Two survivors were picked up later.

ROSEWOOD

Oil & Molasses Tankers; 1930; Armstrong, Whitworth & Co.; 5,989 tons; 396-1X55-1X32-1; 583 n.h.p.; 10'5 knots; oil engines. The British tanker *Rosewood*, Capt. R. Taylor, was in convoy in the North Atlantic on March 9th, 1943, when she was torpedoed and sunk by a German submarine. All her crew of 33 and nine gunners were lost.

ROSOLINO PILO

Garibaldi Soc. Anon di Nav.; 1942; Italy; 8,326 tons; oil engines. The Italian motorship *Rosolino Pilo* was torpedoed and disabled by a British submarine on August 18th, 1942, about 50 miles from Pantellaria. Shortly afterwards she was sunk by torpedoes from aircraft.

ROSS-SHIRE

W. S. Miller & Co.; 1881; E. Withy & Co.; 2,080 tons; 285X36 x22-8; 203 n.h.p.; compound engines. The British cargo ship *Ross-shire* sank after a collision with the French steamship *Duguesclin*, 1,764 tons, off Trevoise Head on January 4th, 1899, while on a voyage from Cardiff to St Nazaire carrying a cargo of coal. Both ships sank with the loss of 12 lives.

ROSSBACH

*German Government; 1917; Palmers'Co.; 5,894 tons; 407-5X 52*4 x 31 - 6; 498 n.h.p.; triple expansion engines.* The steamship *Rosbach* was formerly the Norwegian *Madrono*, captured by the Germans and taken to Japan. Early in 1943 she loaded a cargo of soya bean oil and sailed from Kobe in an attempt to reach a German controlled port in Europe. When off the coast of Brazil she was ordered to return to Japan as blockade running had become too dangerous. On May 7th, 1944, she was torpedoed and sunk by the U.S. submarine *Burrfish* E. of Kyushu Island, Japan.

ROSSGULL

Anglo French Steamship Co.; 1884; M Arthur & Co.; 238 tons; 130-1x22x10; 54 r.h.p.; compound engines.* The steamship *Rossgull*, Capt. Blamfield, was wrecked at Noirmont Point at the entrance to St. Helier, Jersey, on December 4th, 1900. The captain and nine of the crew were drowned. Three of the crew and all seven passengers were saved.

ROSSINI

ROSSINI

Gordon Steam Shipping Co.; 1878; *Bar tram, Haswell & Co.*; 1,321 tons; 245-5x33-7x18; 155 n.h.p.; triple-expansion engines.

The British cargo ship *Rossini* foundered off Spurn Head on July 13th, 1904. She was carrying a cargo of coal from South Shields to London.

ROSSLYN

John Warrack & Co.; 1882; *A. Stephen & Sons*; 1,615 tons; 270X34-2X21-9; 220 h.p.; compound inverted engines. The British cargo ship *Rosslyn* was wrecked off Cape Bake on January 18th, 1885, while on a voyage from Hong Kong to Saigon carrying a general cargo.

ROSSMORE

County of Cornwall Shipping Co.; 1907; *Murdoch & Murray*; 627 tons; 180-2x27-6x11; 80 n.h.p.; compound engines. The British steamship *Rossmore*, on a voyage from Hayle to Bary, was bombed and sunk by German aircraft on March 25th, 1941, 12 miles N.E. of Godrevy Light. Six of her crew of 10 were lost.

ROSSO

Rederi A/B Nord-Sverige; 1919; *A/B Oresundsvarvet*; 1,253 tons; 232x37-2x15; turbine engines. The Swedish ship *Rosso*, Capt. J. H. V. Nylen, sprang a leak on March 7th, 1952, when she was six and a half miles N.E. by E. of Eyemouth. She was on a voyage from Methil to Oaxen with a cargo of coal. In response to her S.O.S., surface craft searched the area but found no trace. She had a crew of 22 men.

ROSTEN

Tonsbergs Rederi-A/S; 1920; *A/B Ostersjovarfvet*; 737 tons; 187-8x30-1x12-7; 62 n.h.p.; triple-expansion engines. The Norwegian steamship *Rosten* was torpedoed and sunk by a German motor torpedo boat on July 9th, 1942, on a voyage from Barry to Shoreham. Six of her crew were killed.

ROTHA

Sharp & Co.; 1893; *J.Laing*; 1,008 tons; 220x31-2x15-5; 156 n.h.p.; triple-expansion engines. The British cargo ship *Rotha* sank after a collision with the Danish steamship *Skjold*, 1,548 tons, off Souter Point on February 23rd, 1902. She was on a voyage from the Tyne to Devonport carrying a cargo of coal.

ROTHESAY

Evan Thomas, Radcliffe & Co.; 1880; *Palmers' Co.*; 2,066 tons; 286X37-2x23-2; 250 h.p.; compound engines. The British cargo ship *Rothesay* was wrecked near Galle on October 31st, 1890, while on a voyage from Cardiff to Batavia carrying a cargo of coal.

ROSTOCK

German Navy, light cruiser; 1912; *Howaldt*; 4,900 tons; 456x45x17; 25,500 i.h.p.; 28 knots; turbine engines; Schulz-Thomycroft boilers; twelve 4-1 in. guns, 2 T.T. The light cruiser *Rostock*, Capt. O. Feldmann was a unit of the German Second Scouting Group at the battle of Jutland. In addition she was also the flagship of the destroyer flotillas, wearing the broad pennant of Cdre. Michelsen.

The ship, leading three and a half flotillas, was with the High Seas Fleet at 4.5p.m. on May 31st, 1916, and formed part of the protective screen during the day. At 11.30 p.m. the *Rostock* was in a position ahead of the German 1st Battle Squadron on the port side. An attack by British destroyers of the 4th Flotilla occurred about this time. In order not to mask the fire of the battleships the *Rostock* passed between the *Westfalen* and the *Rheinland* but in doing so intercepted a torpedo from one of the British destroyers. She was struck opposite the fourth boiler room, her stokeholds rapidly flooding, but managed to keep afloat and to make for port. Later she was taken in tow by the destroyer *S. 54*. At dawn came a warning from a Zeppelin that British ships were approaching and destroyers were called alongside and her crew transferred to them. The *Rostock* was then torpedoed and sunk.

598

The number lost was one officer and 13 men killed and six men wounded, a total of 20.

The full story of Jutland is told under the *Invincible*, flagship of Rear-Admiral Hood, which was lost.

ROTA

DanskRussiskeDjS; 1915; *Dunlop, Bremner & Co.*; 2,171 tons; 310-5x44-7x18-3; 262 n.h.p.; 9 knots; triple-expansion engines.

The steamship *Rota* was torpedoed and sunk by a German submarine S. of Berry Head on July 22nd, 1917. The captain and four of the crew were killed.

ROTHERMERE

Anglo-Newfoundland Steamship Co.; 1938; *Chas. Cornell & Co.*; 5,356 tons; 421-2x56-5x25-7; 489 n.h.p.; 10-5 knots; quadruple-expansion engines.

The steamship *Rothermere*, Capt. G. M. Sime, was torpedoed and sunk by a German submarine on May 20th, 1941, about 300 miles S. of Cape Farewell on a voyage from Botwood to London. Twenty-two persons, including Capt. Sime, were killed and one wounded. Capt. Sime was in command of the *Geraldine Mary* when she was torpedoed in August 1940.

ROTHSAY CASTLE

Liverpool & Beaumaris Packet; 1816; *A. M. MacLachlan & Co.*; 75 tons; 92-9x16-1x8-9; 34 n.h.p.; 10 knots; *D.Mac Arthur's* engines.

On August 17th, 1831, the wooden paddle steamer *Rothsay Castle*, Capt. Atkinson, at one time in the Clyde steam packet service, left Liverpool for Beaumaris. The ship was in the worst possible condition and her unseaworthiness was a matter of common knowledge. On the day in question the weather was bad with a stiff N.N.W. breeze which induced Capt. Atkinson to delay sailing, but by 10 a.m. the wind moderated and at about 11 a.m. the ship put off.

For a time everything went well, but with the turn of the tide a head wind came up and when about 15 miles out of Liverpool a gale was raging. The *Rothsay Castle* was blown inshore, her engines being insufficient to contend with the wind. The passengers became alarmed and they deputed one of their number to approach the captain and induce him to turn back to Liverpool.

The captain and mate were discovered to be drunk and quarrelsome and would listen to no arguments, and it soon became clear that both officers were incapable of navigating the ship. In addition the engines began to give trouble and the firemen were compelled to leave the stokehold as the fires were swamped.

The ship was badly found and carried no signal gun or rockets. The only boat had a hole in it and was not equipped with oars. The timbers of the ship were so rotten as to come apart with the swing of the seas. Most of the passengers were sea-sick, but those of the men who could do so manned the pumps until floating ashes from the fires below choked the suction and rendered them useless. The only light on board was that of the binnacle lantern.

At about midnight the *Rothsay Castle* drifted helplessly on to the sandbank at the entrance to the Menai Strait, known as Dutchman's Bank. Her poop deck was washed overboard and formed a raft for a few people, while others drifted ashore on wreckage. At daybreak about 50 people were still on the wreck but successive seas washed them away until there were only 23 survivors from a total company of about 150.

ROTORUA

New Zealand Shipping Co.; 1911; *John Brown & Co.*; 10,890 tons; 526-4x61-4x32-3; 1,264 n.h.p.; 14 knots; quadruple-expansion engines.

The liner *Rotorua*, Capt. E. R. Kemp, was torpedoed and sunk by a German submarine about 150 miles N.W. of the Hebrides on December 11th, 1940. Capt. Kemp, 15 of the crew, two gunners and three military passengers were lost.

ROTTERDAM

N.V. Petroleum Industrie Maats.; 1925; *Fried. Krupp A.G.*; 8,968 tons; 469-8x63-3x35-3; 763 n.h.p.; oilengines. The Dutch tanker *Rotterdam* was torpedoed and sunk by the

German submarine *U-511* on August 28th, 1942, 120 miles E. of Jamaica on a voyage from Curacao to the U.K. with 12,000 tons of refined spirit. Ten of her crew were killed.

ROTULA

N.V. Petroleum Maats. La Corona; 1935; N.V. Nederlandsche ScheepsbouwMaats.; 7,981 tons; 462-9x59-3x33-9; 502n.h.p.; oil engines.

The Dutch tanker *Rotula*, loaded with 10,700 tons of aviation spirit, was bombed and set on fire by German aircraft on March 1st, 1941, in the Irish Sea. Sixteen of her crew were killed.

ROUENNAIS

Union Maritime Soc. Anon.; 1911; W. Dobson & Co.; 3,777 tons; 354-2x47-8x25-9; 371 n.h.p.; triple-expansion engines. The French steamship *Rouennais* struck a mine and sank on April 25th, 1943, off Fedelah, with the loss of 16 lives.

ROUGEMONT

John Cory & Sons; 1882; E. Finch & Co.; 1,525 tons; 241-6x35-3x18-4; 130 h.p.; compound engines. The British cargo ship *Rougemont* sank after a collision with the steamship *John Readhead*, 1,622 tons, near Laesoe on June 10th, 1893, while on a voyage from Blyth to Stockholm carrying a cargo of coal.

ROULA

M. A. Karageorgis; 1899; Bergens Mek. Verksted; 1,044 tons; 223-2x32-3x13-9; 97 n.h.p.; triple-expansion engines. The Greek steamship *Roula* was torpedoed, shelled and sunk by two Italian submarines on August 1st, 1940, near Crete. There were 18 survivors.

ROUMANIA

W. Gray & Co.; 1879; W. Gray & Co.; 1,385 tons; 243-9x32-2x18-4; 120 h.p.; compound inverted engines. The British cargo ship *Roumania* was wrecked on Lemn Bank on September 22nd, 1881, while on a voyage from Cronstadt to Rouen carrying a cargo of oats.

ROUMANIA

Render son Bros.; 1880; D. & W. Render son; 3,387 tons; 364-3x38x28-6; 480 h.p.; 14 knots; compound engines. The steamship *Roumania*, on a voyage from Liverpool to Bombay with 55 passengers and a crew of 67, was wrecked in heavy weather on October 27th, 1892, near Peniche, Portugal. One hundred and thirteen persons were drowned. Two passengers and seven Lascar seamen were saved.

ROUMANIE

Compagnie Nationale Beige de Transports Maritimes; 1906; Flensburger Schiffsbau Ges.; 3,535 tons; 341-7x48-7x17-2; 236 n.h.p.; triple-expansion engines.

The Belgian steamship *Roumanie* was torpedoed and sunk by a German submarine on September 24th, 1942, near Iceland, on a voyage from Halifax to Loch Ewe. The Chief Engineer, taken prisoner of war, was the sole survivor of her complement of 37 crew and six gunners.

ROVERETO

** Italian Government; 1914; A. G. Weser; 8,564 tons; 477-9x58-4x28-3; quadruple-expansion engines & L.P. turbine.* The *Rovereto* was formerly the French liner *Yalou*, seized by the Italians. On April 6th, 1943, she was bombed and sunk by British aircraft at Bizerta.

ROWA

E. Morgan & Co.; 1895; Furness, Withy & Co.; 2,840 tons; 314-2x40-5x21-3; 236 n.h.p.; triple-expansion engines. The British cargo ship *Rowa* foundered off Cape St. Vincent on July 29th, 1910, while on a voyage from the Tyne to Genoa carrying a cargo of coal.

ROWAN

Laird Line; 1909; D. & W. Henderson & Co.; 1,493 tons; 280-8x38-1x16-5; 525 n.h.p.; triple-expansion engines. The steamship *Rowan*, on a voyage from Glasgow to Dublin with passengers, sank after collisions with two ships on October 9th, 1921, off Corsewall Point. She collided with the American steamship *West Camak*, 5,721 tons, and immediately afterwards with the steamship *Clan Malcolm*, 5,994 tons. Thirteen of the crew and three passengers were lost with the ship. The *Clan Malcolm* picked up the remainder but two of these died of their injuries.

ROWAN

United States Navy, destroyer; 1938; Norfolk Navy Yard; 1,500 tons; 341-7x34-7x9-9; 42,800 s.h.p.; 36-5 knots; turbine engines; Express boilers; four 5 in. guns, 5 m.g. The United States destroyer *Rowan* was part of the naval force supporting the Allied landing at Salerno. On September 11th, 1943, the destroyer was torpedoed and sunk by a German motor torpedo boat. She carried a complement of 200.

ROWANBANK

Sank Line; 1919; Taikoo Dockyard & Engineering Co.; 5,159 tons; 400-2x52-3x28-5; 517n.h.p.; 12 knots; triple-expansion engines. The steamship *Rowanbank* was bombed and sunk by German aircraft on January 31st, 1941, 300 miles N.W. of Ireland on a voyage from Lourenço Marques to Oban. All her crew of 68 were lost.

ROWENA

Maclay & McIntyre; 1883; Dobie & Co.; 1,353 tons; 260-8x37-1x14-7; 200 h.p.; compound engines. The British cargo ship *Rowena* was wrecked on the Smalls in dense fog on May 13th, 1893, while on a voyage from Bilbao to the Clyde carrying an ore cargo.

ROWTOR

Jenkins Bros.; 1891; E. Withy & Co.; 2,351 tons; 288x40x18-3; 201 n.h.p.; triple-expansion engines. The British cargo ship *Rowtor* was wrecked on Fratelli Rocks, near Bizerta, on January 3rd, 1906, while on a voyage from Barry to Port Said carrying a cargo of coal.

ROXBURGH

Sutherland Steamship Co.; 1906; W. Doxford & Sons; 4,630 tons; 380-8x51-2x25-4; 339 n.h.p.; 10 knots; triple-expansion engines. The steamship *Roxburgh*, was torpedoed and sunk by a German submarine 15 miles E. by N. % N. of Cape St. John, Crete, on March 4th, 1918. Six men were killed. The captain was among the survivors.

ROXBURGH CASTLE

Stephens & Mawson; 1880; Bartram, Haswell & Co.; 1,844 tons; 286-2x36x22-3; 200 h.p.; compound engines. The British cargo ship *Roxburgh Castle*, Capt. Tyser, sank after a collision with the sailing ship *British Peer*, 1,478 tons, 140 miles S.W. of the Scilly Isles on March 13th, 1891. She was on a voyage from Newport to Piraeus carrying a cargo of coal. Twenty-two of her crew were lost. Capt. Tyser and one other were saved.

ROXBY

R. Ropner & Co.; 1893; Ropner & Son; 3,043 tons; 315x40-5x20-3; 246 n.h.p.; triple-expansion engines. The British cargo ship *Roxby* sank after a collision with the steamship *Glasgow*, 1,068 tons, 30 miles off Rotterdam on September 3rd, 1904, while on a voyage from Taganrog to Hamburg carrying a cargo of grain.

ROXBY

Ropner Shipping Co.; 1923; Ropner S.B. & R. Co.; 4,252 tons; 378x53x24-6; 364 n.h.p.; 11 knots; triple-expansion engines. The steamship *Roxby*, Capt. G. Robison, was in the North Atlantic on November 7th, 1942, when she was torpedoed and sunk by a German submarine. Six officers and 28 men were killed. Capt. Robison was among the survivors, who were landed at St. John, N.B., after five days in the boats.

ROY

ROY

A/S D/S Ask (A. Kjerland); 1921; C. Rennoldson & Co.; 1,768 tons; 270-2x37-5x16-3; 244 n.h.p.; triple-expansion engines.

The Norwegian steamship *Roy* was torpedoed and sunk by a German submarine on October 12th, 1941, between London and Blyth,

ROYAL ADELAIDE

Dublin Steam Packet Co.; 184-; British Isles; 450 tons; 140n.h.p.; 11 knots; diagonal-compound engines. The paddle steamship *Royal Adelaide*, Capt. J. Batty, left Cork on Wednesday afternoon, March 27th, 1850, bound for London. She carried a crew of 24. The ship touched at Plymouth and landed horses and cattle, taking on board 12 passengers, which brought the number of those on board to 36. On Saturday evening, March 30th, the *Royal Adelaide* was observed steaming up the Channel in very heavy weather. At about 7 o'clock on the same evening she was sighted on the Tongue Sand, off Margate, firing signals of distress in rapid succession. The pilot who reported her, Charles Gillman, stated that he was bringing a barque into Gravesend and that the seas were so terrific that it was not possible for him to render any assistance. The barque sent up rockets in the hope of attracting attention from the shore, but the weather was thickening and these signals were not seen.

The gale continued with such violence that it was not until Monday afternoon that it was possible to put out from Margate, by which time the *Royal Adelaide* had broken in two and gone down with all on board.

ROYAL ADELAIDE

Gibbs, Bright & Co.; British Isles; 1,320 tons; 232-5x38x22-5 (approx.).

The iron sailing ship *Royal Adelaide*, Capt. J. Hunter, was bound from London to Sydney, N.S.W. with 35 passengers and a crew of 32. She carried a general cargo, some of which consisted of hundreds of cases of spirits. On the night of November 25th, 1872, in a heavy S.W. gale the ship drove ashore on Chesil Beach, Dorset, and broke up immediately. The wreck was watched by thousands of people, and when the cases of spirits were washed ashore many of the onlookers broke them open and drank the spirits until they became stupefied. By daylight it was found that 20 had died from excess of drinking. Six people on board the ship were drowned.

ROYAL CHARTER

Liverpool & Australian Steam Navigation Co.; 1854; Gibbs, Bright & Co.; 2,719 tons; 235x41-5x22-5; 200 n.h.p.; 9 knots; direct-acting trunk engines; two 24 pdr. guns, four 18pdr. The *Royal Charter*, Capt. Taylor, was one of the most successful of the early auxiliary sailing ships engaged in the Australian trade. On August 26th, 1859, she left Melbourne homeward bound with 388 passengers, 112 crew and a valuable cargo. It was the time of the Australian gold rush and 68,397 oz. of gold, valued at £273,000 and £48,000 in sovereigns was being conveyed to England. The run constituted a record, the ship taking 55 days to reach Queenstown. As a mark of their appreciation the passengers made a presentation to the captain while the vessel lay anchored off the Irish coast. A tragic circumstance was the despatch of a large number of letters and telegrams announcing to friends the safe arrival of the ship; the remaining portion of the voyage being insignificant as it was only the crossing of the Irish Channel to Liverpool.

At Queenstown 13 passengers disembarked and 11 riggers who had been assisting in working a ship to Cardiff came on board, thus making a total of 498 persons.

An innocent but fatal delay was occasioned by a request from the passengers that the captain should put into Holyhead in order to allow them to see the *Great Eastern*, then the largest ship in the world, which was lying there. The request was granted but the wind freshened considerably as the ship beat up the coast.

By the time the vessel was off Point Lynas in the Mersey estuary the seas were tempestuous. The captain ran inshore as far as he dared and sent up rockets for a pilot, hoping that his nearness to shore would assist the boat to reach the vessel. The weather was, however, too bad for any pilot to make the attempt.

At 10 p.m. both bower anchors were let go and the screw kept turning to assist the ship to keep to windward. The storm continued

with great violence, and at 2 a.m. both cables parted and the ship began to drift toward the shore.

Orders were given for the fore-mast and the main-mast to be cut away, but this did not avail to stop the drift landwards and eventually the ship swung broadside on to the sands of Moelfre Bay. The engines were kept running in the hope of driving her deeper onto the sands. This did not succeed, and just before dawn the *Royal Charter* struck the rocks; the cordage from the fallen masts having stopped the screw. As soon as daylight came Joseph Rodgers, a Maltese seaman, volunteered to carry a line ashore. In this he was successful, and a bo'sun's chair was rigged up in which several sailors and one or two passengers got safely ashore. At about 7 a.m. the ship was engulfed by a tremendous wave which broke her in two.

Of passengers and crew 459 were drowned, including Capt. Taylor and all his officers.

Salvage operations were put in hand and some boxes of gold and a great quantity of sovereigns and half sovereigns were subsequently recovered from the wreck.

ROYAL CROWN

Hall Bros.; 1874; Palmers'Co.; 1,844 tons; 282-4x33-3x24-2; 140 h.p.; compound engines.

The British cargo ship *Royal Crown* foundered after striking a wreck off Ushant on September 6th, 1890. She was on a voyage from Fiume to Leith carrying a cargo of wheat.

ROYAL CROWN

Hall Bros. Steamship Co.; 1927; W. Dobson & Co.; 4,364 tons; 400-4x53x25-3; 410 n.h.p.; 10-5 knots; triple-expansion engines.

The steamship *Royal Crown* was requisitioned by the Admiralty on January 5th, 1940, and on the 30th of the same month was bombed by German aircraft and forced to run ashore near Lowestoft. In this attack the chief engineer Mr. J. Davison and the second and fourth engineers were killed. Capt. H. H. Dawes and 18 officers and men were drowned in an endeavour to reach shore in a heavy sea. The vessel was subsequently refloated but on March 16th, 1941, when in the North Atlantic under the command of Capt. Potts, she was captured and sunk by the German battleship *Gneissau*. Capt. Potts with a crew of 38 were taken prisoner by the raider.

ROYAL EDWARD

Canadian Northern Steamship Co.; 1906; Fairfield Co.; 11,117 tons; 526-1x60-2x26-8; 19 knots; turbine engines. The liner *Royal Edward*, Cdr. P. M. Wotton, R.N.R., was employed in carrying troops to Gallipoli in 1915. During this campaign the Germans transported across Europe to the Adriatic a number of small submarines in sections. These vessels were destined to play an important part in the Mediterranean war and caused great havoc among allied shipping. On August 13th, 1915, the *U-15*, Lt. von Heimburg sighted the *Royal Edward*, six miles W. of Kandeliusa Island and at once attacked her, getting home a torpedo full on her stern.

The transport sank in a very short time with heavy loss of life. According to German accounts, which were fully borne out by the facts, no attempt was made to interfere with the hospital ship *Soudan* which arrived on the scene soon after, accompanied by two French destroyers and some trawlers. These ships picked up fewer than 500 survivors out of 1,366 troops and 220 crew. Cdr. Wotton went down with the vessel.

ROYAL OAK

British Navy; dreadnought battleship; 1914; Devonport Dockyard; 29,150 tons; 620x102-5x28-5; 40,000 i.h.p.; 22 knots; turbine engines; Yarrow boilers; eight 15 in. guns, twelve 6 in., eight 4 in., four 3pdr., 5 m.g., 4 T.T.

The battleship *Royal Oak* was completed during the First World War and took part in the battle of Jutland as a unit of the 4th Battle Squadron.

At the outbreak of the Second World War *Royal Oak* was with the Home Fleet at Scapa Flow, wearing the flag of Rear-Admiral H. E. C. Blagrove, and commanded by Capt. W. G. Benn. She carried a complement of 1,234. At about 1.30 on the morning of October 14th, 1939, the ship was lying at anchor at the extreme end of the harbour at Scapa, when she was struck in the bow by a

torpedo from a German submarine. There was a muffled explosion which those on board thought was internal and in the neighbourhood of the inflammable store, where there was a quantity of kerosene. This misapprehension accounted for the absence of immediate action against the submarine. About 20 minutes later *Royal Oak* was struck by a salvo of three or four torpedoes fired in quick succession. No vessel could be proof against such an attack and the battleship capsized and sank in a very short time. Owing to her distance from the other ships in the harbour prompt rescue was impossible.

The drowned numbered 24 officers, including Admiral Blagrove, and 786 ratings. Capt. Benn, was among the survivors.

The German Admiralty stated on October 17th that Capt. Prien who made the attack had brought his submarine back to a German port in safety.

ROYAL SCOT

New Medway Steam Packet Co.; 1937; W Denny & Bros.; 1,527 tons; 269-6x47x9-1; 840 n.h.p.; 22 knots; oilengines.* The motorship *Royal Scot* was much better known by her peacetime name of *Royal Sovereign* but as there was a battleship of that name it was not possible for her to retain it when she was taken over for service as a mercantile auxiliary during the Second World War. Her naval career was a very short one and on December 9th, 1940, under Capt. Aldis she was serving as a transport when she struck a mine off Barry Roads and sank with the loss of one rating killed and 25 wounded.

ROYAL SCOT

London & Edinburgh Shipping Co.; 1930; Caledon S.B. & E. Co.; 1,444 tons; 260-8x38-3x17-3; 356 n.h.p.; 12 knots; triple-expansion engines. The steamship *Royal Scot*, Capt. J. B. Watson, O.B.E., struck a mine and sank five cables from Buoy 62 at the entrance to the Humber on June 10th, 1941. Capt. Watson, nine of the crew and one gunner were lost.

ROYAL TAR

1836; St. John, N.B.; 164 x — x —; diagonal engines. The wooden paddle steamer *Royal Tar*, Capt. T. Reed, was named after William IV, and had not long left the New Brunswick builder's yard. In October, 1836, she was chartered to carry Dexter's Locomotive Museum and Burgess' Collection of Serpents and Birds from St. John, N.B. to Maine as well as an elephant, two lions, a tiger, two camels, several horses, and a large number of smaller animals. For the accommodation of these unusual travellers a huge Noah's Ark-like tent had been erected to cover the whole of the afterpart of the steamer.

In addition to the animals there were the circus personnel, which included a full brass band, as well as private passengers and crew, making 93 all told.

On the morning of Friday, October 21st, 1836, the steamer left St. John harbour in fair weather, but towards the end of the day a strong west wind forced her to anchor in Eastport Harbour, where she remained until Tuesday, 25th. Shortly after leaving this anchorage she was again forced by the high winds to seek shelter off Fox Island. Next day a fire was kindled under the boilers without previously ascertaining the depth of water in them, which was very little. The small amount of water soon evaporated and the boilers became red hot, setting fire to nearby woodwork. The vessel was still at anchor.

The wooden steamer blazed with fierce intensity, the two funnels falling overboard and causing much havoc. Soon there was terrible panic, in which human beings and animals struggled together to reach some place of safety. Meanwhile the captain had given orders to slip the cable to allow the vessel to drift landwards, as she was at the time anchored two miles offshore.

Many persons were drowned in getting away the boats, and the elephant jumped from the deck onto a raft, sinking it and drowning all its occupants. Of the 93 persons on board 32 lost their lives, as did a large number of the unfortunate animals.

Capt. Reed behaved with great presence of mind and it was due to his efforts that so many people were saved. In recognition of his devotion he was presented with a purse containing 700 dollars by the citizens of St. John, and some years later he became harbour-master of the port.

ROYSTON GRANGE

Houlder Line; 1918; Hawthorn, Leslie & Co.; 5,144 tons; 400-1x52-3x28-5; 518 n.h.p.; triple-expansion engines. The British steamship *Royston Grange*, on a voyage from Buenos Aires to Liverpool, was torpedoed and sunk by a German submarine on November 25th, 1939, about 50 miles S.W. of the Scilly Islands.

ROZAN MARU

Japanese Government; 1919; Federal Shipbuilding Co.; 6,638 tons; 396-6x55-2x31-3; turbine engines. The steamship *Rozan Maru* was formerly the British *Analock*, seized by the Japanese. She was sunk by U.S. carrier-based aircraft on September 21st, 1944, off Corregidor.

RUBINSTEIN

Jenssen, Taylor & Co.; 1889; Bartram, Haswell & Co.; 2,469 tons; 300X39x19-3; 238 n.h.p.; triple-expansion engines. The British cargo ship *Rubinstein* was wrecked on Molene Island, S.E. of Ushant, on April 5th, 1901. She was on a voyage from Novorossisk to Rotterdam carrying a general cargo.

RUBIO

Orders & Handford; 1890; Irvine & Co.; 1,518 tons; 250-2x34-1x15-7; 137 n.h.p.; triple-expansion engines. The British cargo ship *Rubio* was wrecked near Labervrach, Finisterre, on June 20th, 1898, while on a voyage from the Tyne to Lisbon carrying a cargo of coal.

RUBISLAW

Granite City S.S. Co.; 1905; Hall, Russell & Co.; 1,041 tons; 220-2x32-2x14-8; 178 n.h.p.; triple-expansion engines. The British steamship *Rubislaw*, on a voyage from London to Aberdeen, struck a mine and sank on November 28th, 1939, two miles E. of the Tongue lightship, with the loss of 13 lives.

RUBY

W. Cooper & Son; 1882; J. Fuller ton & Co.; 234 tons; 124 x 22-1x9-2; 50 r.h.p.; 9 knots; compound engines. The steamship *Ruby* struck a mine and sank two and a half miles from Aukerry, Orkney Islands, on March 28th, 1917. The captain and five of the crew were killed.

RUCKINGE

Constants (South Wales); 1939; W. Gray & Co.; 2,869 tons; 325 x 46 - 5 x 21 - 5; 255 n.h.p.; triple-expansion engines. The British steamship *Ruckinge* was torpedoed and sunk by a German submarine on December 19th, 1941, about 300 miles out of Lisbon bound to Oban. Six of her crew were killed.

RUDOLF

Rederi-AIBBifrost; 1922; Blyth S.B. & D.D. Co.; 2,119 tons; 289-7x42x17-7; 274 n.h.p.; triple-expansion engines. The Swedish steamship *Rudolfstmk* a mine and sank on December 2nd, 1939, outside the Firth of Forth. Nine of her crew were killed.

RUELLE

Dodero Fritires; 1901; W. Pickersgill & Sons; 3,583 tons; 361X46-2x25-3; triple-expansion engines. The French steamship *Ruelle* was torpedoed and sunk by a German submarine in the Atlantic on July 8th, 1917.

RUFFORD HALL

Ellerman Lines; 1914; Swan, Hunter & Wigham Richardson; 5,506 tons; 409-5 x53• 1X30; 390 n.h.p.; triple-expansion engines. The British cargo ship *Rufford Hall* was wrecked near Omazaki, Tsugaru Strait, on October 6th, 1915. She was on a voyage from New York, via Honolulu, to Vladivostok carrying a general cargo.

RUHR

Hamburg-Amerika Linie; 1925; Bremer Vulkan; 5,954 tons; 454x58-3x24-2; 763 n.h.p.; oilengines. The German motorship *Ruhr* was bombed and sunk by British aircraft on January 22nd, 1943, off Cap Bon,

RUHRORT

RUHRORT

Franz Haniel & Compagnie; 1937; Gute Hoffnungshutte A.G.; 1,080 tons; 229-2x34-8x13; 196n.h.p.; oilengines. The German motorship *Ruhrort* struck a mine and sank on January 31st, 1944, in Kiel Bay.

RUMINA

Rederi-A/B Concordia; 1883; Workman, Clark & Co.; 1,418 tons; 250x 35-2x18; 93 n.h.p.; compound engines. The Swedish steamship *Rumina* struck a mine and sank in the Baltic on October 24th, 1915.

RUNA

H. Waage; 1911; Nylands Vcerksted; 1,611 tons; 250 -1 x 34-7x22-1; 225 n.h.p.; triple-expansion engines. The Norwegian steamship *Runa* foundered in heavy weather on December 15th, 1923, off Frying Pan Shoals when on a voyage from Savannah to Liverpool. One of her boats containing four men was picked up by the tanker *W. W. Mills* a day or so later. These were the only survivors.

RUNA

Clydesdale Shipowners Co.; 1930; BurntislandS.B. Co.; 1,575 tons; 252 -3x40x16-5; 138 n.h.p.; triple-expansion engines. The British steamship *Runa*, on a voyage from Barry to Lisbon with coal, was torpedoed and sunk by a German submarine on September 21st, 1941, about 700 miles W. of Cape Finisterre. Twelve of her crew and two gunners were lost.

RUNHILD

Karl Archer; 1872; Denton, Gray & Co.; 1,170 tons; 224-7X 31-1x15; 160 n.h.p.; compound engines. The Swedish steamship *Runhild* struck a mine and sank in the Baltic on November 3rd, 1916.

RUNG

T. Wilson, Sons & Co.; 1902; Caledon S.B. & E. Co.; 1,679 tons; 280x37-2x17-4; 196 n.h.p.; 10 knots; triple-expansion engines.

The steamship *Runo*, bound from Hull to Archangel with a large number of passengers, many of whom were Russians, struck a mine and sank 22 miles E. by N. of the mouth of the Tyne at 4.35 p.m. on September 5th, 1914. Twenty-nine persons were drowned. It was afterwards proved that the ship had departed from the sailing instructions laid down by the Admiralty. Had she observed these orders she would have avoided a known minefield.

RUNG

Ellermarfs Wilson Line; 1920; Ramage & Ferguson; 1,858 tons; 262-7x39x16-2; 162 n.h.p.; triple-expansion engines. The British steamship *Runo*, on a voyage from Benghazi to Alexandria, was torpedoed and sunk by a German submarine on April 11th, 1943. Sixteen of her crew were lost.

RUPERRA

John Cory & Sons; 1877; Palmers' Co.; 1,285 tons; 240X 32-2x20; 120 h.p.; compound-inverted engines. The British cargo ship *Ruperra* was wrecked near Bolt Head on January 27th, 1881, while on a voyage from Alexandria to Hull carrying a cargo of cottonseed.

RUPERRA

John Cory & Sons; 1901; Northumberland S.B. Co.; 4,293 tons; 360 x 48x19- 7; 339 n.h.p.; triple-expansion engines. The British cargo ship *Ruperra* sank after a collision 14 miles south of Bishop Rock on July 29th, 1903. She was on a voyage from Barry to Port Said carrying a cargo of coal.

RUPERRA

British S.S. Co.; 1925; W. Gray & Co.; 4,548 tons; 397-1x 58 x 24 - 6; 423 n.h.p.; triple-expansion engines. The British steamship *Ruperra*, on a voyage from New York to Greenock, was torpedoed and sunk by a German submarine on October 19th, 1940, about 500 miles N.W. of Ireland. Twenty-eight of her crew, one gunner and one passenger were lost.

RURIK

Russian Navy, armoured cruiser; 1894; Baltic Works; 10,923 tons; 396-5x67x26; 13,250 i.h.p.; 18-8 knots; triple-expansion engines; four 8 in. guns, sixteen 6 in., six 4-7 in., two 2^{1/2} in., ten 3 pdr., 12 m.g., 4 T.T.

The Russian armoured cruiser *Rurik* was the first of that series of large, powerfully armed cruisers which distinguished the navies of the late 19th and early 20th centuries. At the time of her launch the ship was hailed as the last word in commerce destroyers, and her building spurred the British Admiralty to lay down *Powerful* and *Terrible* as a reply. This challenge was met by Russia with the *Rossia* and the *Gromboi*. In February 1904, at the outbreak of war with Japan, these three Russian ships were based upon Vladivostok, under command of Rear-Admiral Yessen, who also had a smaller protected cruiser, the *Bogatyr*, following his flag. Between February and August the squadron seldom put to sea and its most notable achievement was the sinking of three Japanese transports bound for Port Arthur, during an eight day cruise from the 17th to the 24th of June.

On August 10th the Port Arthur fleet made a sortie with the hope of reaching Vladivostok, a similar sortie being planned by the Vladivostok Squadron for August 12th, to intercept which Vice-Admiral Kamimura, a brave but cautious officer, had been despatched by Admiral Togo. The rival squadrons met off Ulsan at dawn on the morning of August 14th, their respective strengths being as follows:—

RUSSIAN	tons	knots	guns
<i>Rossia</i> (flagship)	12,130	20	4-8in., 22-6 in
<i>Gromboi</i>	12,336		
<i>Rurik</i>	10,923	"18	" " " 16 "

The *Bogatyr* was unready for sea and remained in harbour.

JAPANESE	tons	knots	guns
<i>Idzumo</i> (flagship)	9,750	20-75	4-8 in., 14-6 in.
<i>Iwate</i>	"	"	" " " " "
<i>Tokiwa</i>	9,700	21-5	" " " " "
<i>Adzuma</i>	9,436	20	" " " 12 "

In the Russian ships the 8 in. guns were placed at each end of the upper deck, one on either side, so that only two could bear on the broadside. The Japanese, however, had mounted theirs in pairs in turrets fore and aft, and were thus able to bring all four to bear on the broadside. The latter squadron therefore possessed a considerable advantage over its opponent when the two engaged.

At 5.20 a.m. there was an exchange of salvos at a range of about four and a half miles. This rapidly decreased and within half an hour the *Rurik* came under a heavy fire from both 8 in. and 6 in. guns which compelled her to drop out of the line. She nevertheless continued to reply with her diminishing armament. Admiral Yessen, with commendable loyalty, put about with his other two cruisers in the hope that the *Rurik* might once more take her place in the line. This she was far too damaged to do, and the admiral had no other option than to abandon her.

Meanwhile Admiral Uriu, with the Japanese 4th Division, consisting of four old cruisers, had joined the fight, and escape for the *Rurik* was impossible. At 8.30 a.m. the *Rossia* and the *Gromboi* fired their last salvos in the hope of saving their consort and then bore away for Vladivostok. At last, with her steam steering gear smashed, most of her officers killed or wounded, and heavy casualties among her men, the *Rurik* was scuttled by what remained of her crew.

On the day of the battle the *Rurik* was carrying about 100 men in excess of her proper complement, there being no fewer than 805 on board. The survivors numbered 13 officers and 612 men, of whom nine officers and 230 men were wounded. Of the other ships the *Rossia* had 47 killed and 153 wounded, and the *Gromboi* 93 killed and 166 wounded. The Japanese losses amounted to two officers and 42 men killed, and eight officers and 63 men wounded.

RUSS

Russian Danube Steam Nav. Co.; 1906; Bergsunds Mek. Verkstad; 1,078 tons; 217-5x32x14-1; 74 n.h.p.; triple-expansion engines.

The Russian passenger steamship *Russ* was a small but well appointed vessel plying in the Black Sea. In 1910 she was selected to convey

King Peter of Servia back to his own country at the conclusion of his visit to the Czar. On January 10th, 1912, the steamship left Galatz, for Odessa with 172 passengers and crew, among the former being the Russian Consul-General at Galatz. As soon as she emerged from the Danube the *Russ* ran into a terrific gale and was rendered unmanageable by stress of weather. She eventually sank with all on board.

RUSSELL

British Navy, 1st class battleship; 1901; Palmer & Co.; 14,000 tons; 429x75-5x27-2; 18,000 Lh.p.; 19 knots; triple-expansion engines; Belleville boilers; four 12 in. guns, twelve 6 in., twelve 12pdr., six 3pdr., 2 m.g., 4 T.T.

The battleship *Russell*, Capt. W. Bowden-Smith was one of the first victims of the German minelaying submarines, one of which, the *U-73*, had voyaged from Kiel to Malta under Cdr. Gustav Siess. On the night of April 25th, 1916, the *U-73* laid 36 mines at about 50 metres apart in front of the harbour at Malta, before proceeding to Cattaro. The following morning *Russell*, with Rear-Admiral S. R. Freemantle on board, struck one of these mines and sank with a loss of 124 officers and men.

Admiral Freemantle, Capt. Bowden-Smith and about 625 officers and men were saved.

RUSSELL H. CHITTENDEN

U.S. War Shipping Administration; 1944; California S.B. Corp.; 7,207 tons; 422-8x57x34-8; triple-expansion engines. The American steamship *Russell H. Chittenden* went ashore on May 13th, 1945, on a reef at the Trebriand Islands group, near New Guinea, and broke in two.

RUSSIA

Dampsk. Hafnia Akties.; 1889; Helsingors Jernskibs & Maskinbyggeri; 1,617 tons; 260-6x35-9x16-7; 159 n.h.p.; triple-expansion engines.

The Danish steamship *Russia* was torpedoed and sunk by a German submarine off Ushant on March 17th, 1917.

RUSSIAN

F. Leyland & Co.; 1895; Harland & Wolff; 8,825 tons; 512-Sx 59-2x35; 718 n.h.p.; triple-expansion engines. The British steamship *Russian* was torpedoed and sunk by a submarine 210 miles E. by S. of Malta on December 14th, 1916. Twenty-eight of the crew were killed.

RUTENFJELL

Olsen & Ugelstad; 1875; Palmers'Co.; 1,844 tons; 282-5x 33-3x23; 202 n.h.p.; compound engines.

The Norwegian steamship *Rutenfjell* struck a mine and sank in the Bay of Biscay on February 19th, 1917.

RUTH

Rederi-A/S Ruth; 1912; Sir J. Laing & Sons; 3,689 tons; 344-5x46-7x24-6; 275 n.h.p.; triple-expansion engines. The Swedish steamship *Ruth* was bombed and sunk by British aircraft on May 7th, 1942, off Den Helder, Holland.

RUTH

A. H. Bull S.S. Co.; 1919; Seattle Construction & Dry Dock Co.; 4,833 tons; 380-5x53-1x26-9; 339 n.h.p.; triple-expansion engines.

The American steamship *Ruth* was torpedoed and sunk by a German submarine at 3.55 a.m. on June 29th, 1942, N. of Hispaniola on a voyage from Trinidad to Baltimore. Thirty-five of her crew and four gunners were lost. Four survivors were picked up.

RUTH I

Brummences & Torgersen; 1900; C. S. Swan & Hunter; 3,531 tons; 330x48x24-6; 275 n.h.p.; triple-expansion engines. The Norwegian steamship *Ruth I* was torpedoed and sunk by a German submarine on April 6th, 1944, on a voyage from Halifax to Loch Ewe.

RUTHLYKES

Lykes Bros. S.S. Co.; 1919; Chicago S.B. Co.; 2,612 tons; 251 x 43 - 6 X 26 - 1; 352 n.h.p.; triple-expansion engines. The American steamship *Ruth Lykes* was torpedoed, shelled and sunk by a German submarine on May 16th, 1942, on a voyage from Barranquilla to Houston. Six of her crew were killed.

RUTLAND

Leith, Hull & Hamburg Steam Packet Co.; 1935; Caledon S.B. & E.Co.; 1,437 tons; 261-6x40-2x15-9; 97n.h.p.; 12 knots; triple-expansion engines.

The British steamship *Rutland*, Capt. R. Sinclair, left Bermuda on October 18th, 1940, for Larne, in convoy. On the night of the 22nd, in thick weather, she lost contact with the convoy and was never seen again.

RUYSDAEL

Bolton S.S. Co.; 1912; W. Gray & Co.; 3,478 tons; 342-8x 49x22-9; 298 n.h.p.; 10 knots; triple-expansion engines. The steamship *Ruysdael* was torpedoed and sunk by a German submarine 228 miles W. of Ushant on September 7th, 1918. The captain and 11 of the crew were killed.

RYDBOHOLM

A/B Svenska Amerika Mexiko Linjen; 1933; Gotaverken A/B; 3,197 tons; 368-2x49-2x20-4; 489 n.h.p.; oilengines. The Swedish motorship *Rydboholm* was torpedoed by a German submarine, and bombed and sunk by German aircraft on February 26th, 1941, about 500 miles W. of Ireland. Twenty-six of her crew and two passengers were eventually picked up but one boat was lost.

RYDAL HALL

HallLine; 1889; Caird & Co.; 3,314 tons; 349-5x42-1x26-7; 307 n.h.p.; 10 knots; triple-expansion engines. The steamship *Rydal Hall* was torpedoed and sunk by a German submarine 14 miles E. by S. of the Royal Sovereign lightship on December 1st, 1917. Twenty-three men were killed. The captain was among the survivors.

RYDALMERE

W. Lowden & Co.; 1875; Whitehaven Shipbuilding Co.; 1,270 tons; 224-4x36-1x22-1.

The barque *Rydalmere* was off Cape de Gata, on the Spanish Mediterranean coast, in a heavy gale on the evening of March 19th, 1901, when she was sighted just before darkness by the s.s. *Robert Harrowing* which stood by all night. She was lying on her beam ends with canvas blown away and boats smashed and in response the the steamship's signals asked to be taken in tow. This proved impossible owing to the gale and when daylight came the *Rydalmere* had disappeared. She carried a crew of 25, all of whom were lost.

RYE

London, Midland & Scottish Railway Co.; 1924; W. Beardmore & Co.; 1,048 tons; 240-3x34-2x15-4; 333 n.h.p.; 13 knots; triple-expansion engines.

The steamship *Rye*, Capt. W. H. Abbott, was in convoy in the North Sea on March 7th, 1941. When off Cromer the convoy was attacked by German motor torpedo boats and the *Rye* was torpedoed, going down with all hands, 24 officers and men.

RYFYLKE

Det Stavangerske D/S; 1917; Kjobenhavns Flydedok & Skibs.; 1,151 tons; 220-4x32-7x17-7; 166 n.h.p.; triple-expansion engines.

The Norwegian steamship *Ryfylke*, under German control, was torpedoed and sunk by a British submarine on February 5th, 1941, off Aalesund, Norway.

RYGJA

A/S J. Ludvig Morvinkels Rederi; 1920; J. Blumer & Co.; 4,001 tons; 356-3x48-7x23-9; 348 n.h.p.; triple-expansion engines.

The Norwegian steamship *Rygja*, under German control, struck a mine and sank on April 4th, 1943, near Skagen, Denmark.

RYM

*J. Lund & Co.; 1908; Fredrikstads Mek. Verksted; 1,073 tons; 228*2X35*1X14-5; 106 n.h.p.; triple-expansion engines.* The Norwegian steamship *Rym* was torpedoed and sunk by a German submarine in the North Sea on July 14th, 1915.

RYOCHI MARU

Japanese Government; 2,180 tons. The steamship *Ryoichi Mam* was sunk by U.S. carrier-based aircraft on October 21st, 1944, off Iloilo, Philippines.

RYOEI MARU

Nittoh Kisen K.K.; 10,016 tons. The steamship *Ryoei Maru* was torpedoed and sunk by the U.S. submarine *Bashaw* on March 5th, 1945, about 100 miles E. of Hue, Indo-China.

RYOGA MARU

Dairen Kisen K.K.; 1929; Manchu Dock K.K.; 1,268 tons; 230 x 34 x 18; triple-expansion engines. The steamship *Ryoga Maru* struck a mine and sank on October 26th, 1945, off Fushiki, with the loss of 19 lives.

RYOKA MARU

*Saka Kisen K.K.; 1903; Russell & Co.; 5,307 tons; 411-8 x 52*3x27-6; 418 n.h.p.; triple-expansion engines.* The steamship *Ryoka Maru* struck a mine and sank on February 15th, 1944, off Shanghai.

RYOKAI MARU

Nippon Suisan K.K.; 1911; Northumberland S.B. Co.; 4,655 tons; 380x49x26-4; 372 n.h.p.; triple-expansion engines. The steamship *Ryokai Maru* was torpedoed and sunk by the U.S. submarine *Plunger* on August 22nd, 1943, N. of Okujiri Island, Japan.

RYOKUSEI MARU

7,907 tons. The steamship *Ryokusei Maru* was bombed and sunk by U.S. land-based aircraft on November 27th, 1942, off Macao.

RYOTOKU MARU

Oya Shoji K.K.; 1938; Tama S.B. Co.; 3,483 tons; 347-1X 49-9x24-6; 266 n.h.p.; triple-expansion engines & L.P. turbine. The steamship *Ryotoku Maru* was torpedoed and sunk by the U.S. submarine *Trout* on September 23rd, 1943, 200 miles S. of Iwojima.

RYOYO MARU

Toyo Kisen K.K.; 1931; Kawasaki Dockyard Co.; 5,973 tons; 415x56x31-8; 1,175 n.h.p.; oilengines. The motorship *Ryoyo Maru* was torpedoed and sunk by the U.S. submarine *Tautog* on May 2nd, 1944, off the Kurile Islands.

RYTON

Stephens, Sutton & Stephens; 1913; Blyth S.B. Co.; 3,991 tons; 352-5x50-8x24-9; 356 n.h.p.; triple-expansion engines. The British cargo ship *Ryton* sank after striking a submerged object in lat. 35° 57' N., long. 7° 07' W., on August 5th, 1917. She was on a voyage from Aguilas to the Clyde carrying a cargo of iron

RYUA MARU

Uyeno Kisen Goshi Kaisha; 1940; Kawaminami Kogyo K.K.; 1,925 tons; 271-6x40-3x20-3; 150 n.h.p.; triple-expansion engines. The steamship *Ryua Maru* was torpedoed and sunk by the U.S. submarine *Tautog* on March 13th, 1944, N.E. of Simusir Island, Kurile Islands.

RYUEI MARU

Nittoh Kisen K.K.; 5,144 tons. The tanker *Ryuei Maru* was torpedoed and sunk by the U.S. submarine *Kingfish* on January 3rd, 1944, S.E. of Spratly Island, South China Sea.

RYUHO MARU No. 1

Kuribayashi Shosen K.K.; 1918; S. Ono; 2,241 tons; 270 x 39x23-9; 150 n.h.p.; triple-expansion engines. The steamship *Ryuho Maru No. 1* was bombed and sunk by U.S. land-based aircraft on June 30th, 1945, in the Grand Canal, China.

RYUHO MARU No. 2

Iino Kisen K.K.; 1917; S. Ono; 2,230 tons; 270x39x23-9; 150 n.h.p.; triple-expansion engines. The steamship *Ryuho Mam No. 2* was sunk by Russian action in the Sea of Okhotsk on August 10th, 1945.

RYUJO

Japanese Navy, light aircraft carrier; 1931; Yokohama Dock Co.; 7,100 tons; 548x60-5x15-3; 40,000 s.h.p.; 25 knots; turbine engines; Kanpon boilers; twelve 5 in.A.A. guns, 24 m.g., 24 aircraft.

On August 23rd, 1942, reconnaissance aircraft of the U.S. forces on Guadalcanal discovered a fleet of Japanese transports escorted by about ten warships some 250 miles northward. Prompt action was taken to intercept this force and an American squadron comprising the battleship *North Carolina*, 35,000 tons, nine 16 in. guns, the aircraft carriers *Saratoga*, 33,000 tons, and *Enterprise*, 19,800 tons, the heavy cruisers *Minneapolis*, *New Orleans* and *Portland*, all of about 9,900 tons, nine 8 in. guns, and the anti-aircraft cruiser *Atlanta*, 6,000 tons, 12 5 in. guns, with 11 destroyers steamed towards it. Aircraft from the *Saratoga* attacked one of the Japanese carriers, a cruiser and a destroyer on the 24th and damaged all three. In reply 75 planes from the Japanese attacked and damaged the *Enterprise* and other ships. On the 25th matters went heavily in favour of the Americans. The light aircraft carrier *Ryujo* was hit by bombs and aerial torpedoes and sunk N. of Malaita Island. The other carrier, a much larger vessel, suffered four direct bomb hits and a battleship was hit and set on fire.

In the face of these reverses the Japanese admiral turned about and broke off the action.

No American ship was lost.

RYUKO MARU

Osaka Shosen K.K.; 1935; Uraga Dock Co.; 2,962 tons; 297-9x45x23-7; 109 n.h.p.; compound engines & L.P. turbine. The steamship *Ryuko Maru* was torpedoed and sunk by a British submarine on January 15th, 1944, about 50 miles S.E. of Little Andaman Island, Andaman Islands.

RYUKO MARU

Taiyo Kogyo K.K.; 2,764 tons. On March 30th, 1944, the *Ryuko Maru* was sunk by U.S. carrier-based aircraft off Babelthup, Palau Islands.

RYUKO MARU

Dairen Kisen K.K.; 1936; Mitsubishi Jukogyo K.K.; 5,626 tons; 395-9x53-8x30-5; 580 n.h.p.; turbine engines. The steamship *Ryuko Maru* was sunk by U.S. carrier-based aircraft on July 4th, 1944, off the Bonin Islands.

RYUNAN MARU

Matsumoto Masaichi; 1911; J.L. Thompson & Sons; 5,106 tons; 400 x52x27-4; 440 n.h.p.; triple-expansion engines. The steamship *Ryunan Maru* was torpedoed and sunk by the U.S. submarine *Drum* on October 20th, 1942, N.E. of Katsuura, Japan.

RYUOSAN MARU

Tsurumaru Kisen K.K.; 1939; Naniwa Dock K.K.; 2,455 tons; 279-2x43x23; 210 n.h.p.; triple-expansion engines. The steamship *Ryuosan Maru* struck a mine and sank on November 4th, 1943, off New Ireland.

RYUSEI MARU

Matsumoto Masaichi; 1911; Tyne Iron S.B. Co.; 4,197 tons; 385 x51 x27-6; 349 n.h.p.; triple-expansion engines. The steamship *Ryusei Maru* was torpedoed and sunk by the U.S. submarine *Rasher* on February 25th, 1944, about 150 miles N.W. of Kudat, North Borneo.

RYUSHO MARU

2,863 tons.
The tanker *Ryusho Mam* was bombed and sunk by U.S. carrier-based aircraft on January 12th, 1945, 25 miles N.E. of Binhdinh, Indo-China.

RYUTOMARU

Philippine Mokusai Yosutu K.K.; 1912; *J. Blumer & Co.*; 3,311 tons; 332*5x48*7x21-9; 284 n.h.p.; triple-expansion engines.
The steamship *Ryuto Maru* was torpedoed and sunk by the U.S. submarine *Silversides* on December 29th, 1943, N.W. of the Palau Islands.

RYUWAMARU

Nitto Kogyo Risen K.K.; 1913; *Campbeltown S.B. Co.*; 1,244 tons; 229x35-7x17-6; 159 n.h.p.; triple-expansion engines. The steamship *Ryuwa Maru* was sunk by U.S. carrier-based aircraft on August 9th, 1945, off Rashin, Manchuria.

RYUYOMARU

Uyeno Kisen GoshiKaisha; 1920; *Uraga Dock Co.*; 6,707 tons; 400 X54x37-5; 540 n.h.p.; triple-expansion engines. The steamship *Ryuyo Maru* was torpedoed and sunk by the U.S.

submarine *Puffer* on January 1st, 1944, off the north west coast of Mindanao Island, Philippines.

RYUZAN MARU

Kokoku Kisen K.K.; 1920; *Standard S.B. Corp.*; 4,720 tons; 377x51-8x29; 339 n.h.p.; triple-expansion engines. The steamship *Ryuzan Maru* was torpedoed and sunk by the U.S. submarine *Finback* on July 30th, 1943, off Rembang, Java.

RYUZAN MARU

Japanese Government; 1922; *Taikoo Dockyard & Eng. Co.*; 2,482 tons; 290-1x46x17-3; 120 n.h.p.; triple-expansion engines.
The steamship *Ryuzan Maru* was formerly the British *Changsha* > seized by the Japanese. She struck a mine and sank on January 27th, 1945, in the Yangtze River.

RYUZIN MARU

Ryuoh Kisen K.K.; 1907; *W. Denny & Bros.*; 6,243 tons; 430-5x54-2x31 -9; 760 n.h.p.; triple-expansion engines. The steamship *Ryuzin Maru* was torpedoed and sunk by the U.S. submarine *Grayling* on April 13th, 1942, S. of Shikoku, Japan.

S 26

Imperial German Navy, torpedo boat; 1887; Germany; 85 tons; 128x16x6; 1,350Lh.p.; 20knots; one4pdr.gun, 2 T.T. The German torpedo boat *S 26*, Lt. Duke Frederick William of Mecklenburg-Schwerin, had been taking part in naval manoeuvres in the North Sea in September, 1897. On the 22nd she was returning from Wilhelmshaven to Kiel in company with the *S 27* in rough weather, when she became unmanageable owing to a heavy sea which swept over her, killing Duke Frederick and causing her to capsize. The *S 27*, which also had one man drowned, stood by and picked up nine survivors out of a complement of 17.

The disaster took place within sight of the first Elbe lightship, off Cuxhaven.

S 126

German Navy, torpedo boat; 1905; Elbing; 420 tons; 205 x 23x—; 6,000 i.h.p.; 30 knots; triple-expansion engines; three 6pdr. guns, 2 m.g., 3 T.T.

The torpedo boat *S 126*, rated as a destroyer by the Germans, but of moderate speed and weak armament, was sunk in a collision on November 17th, 1905. In company with other warships she was engaged in exercises off the German coast when the disaster occurred. Her complement consisted of 56 officers and ratings, of whom one officer and 32 men were drowned.

S 178

German Navy, destroyer; 1909; Schichau; 636 tons; 10 ft. draught; 10,250 i.h.p.; 32 knots; turbine engines; two 4-1 in. guns, 2 m.g., 3 T.T.

The German destroyer, *S 178*, Lt. Pies, was attached to the 11th Half-flotilla (reserve) and on the evening of Tuesday, March 4th, 1913, was engaged in exercises against the Battleship and Cruiser Squadrons of the High Seas Fleet. The attacks took place N. of Heligoland in rough weather and at 11 p.m. the ships were ordered back to their anchorages. The 11th Half-flotilla led the line back to Heligoland, running at half-speed owing to the storm. Some difficulty was experienced in keeping station and the *S 178* and *S 177* became separated from their consorts by several hundred yards. In getting into the anchorage, which was off Heligoland, east of the Dunes, the *S 178* crossed the bows of the armoured cruiser *Yorck*, 9,050 tons, and was struck abaft of her last funnel, her side being ripped open at the engine room. There was short time in which to alter course, though the *Yorck* turned to starboard and reversed her engines at full speed.

Of the 83 who formed the crew of the *S 178*, 68 officers and ratings were drowned.

S. L. TILLEY

*Canadian; 1856; St. John, N.B.; 787 tons; 160x32-9x20; . The Canadian wooden ship *S. L. Tilley* was overwhelmed by bad weather in the North Atlantic in August, 1867. The crew abandoned ship, seven men being drowned.*

S. MARCO

*German Government; 1931; Nakskov Skibsværft AS; 3,113 tons; 330-2x48-9x192; 449n.h.p.; oilengines. The motorship *S. Marco* was formerly the Danish *Muinam*, seized by the Italians and later taken over by the Germans. On November 9th, 1941, she was sunk by a combined submarine and surface craft attack 145 miles E. of Syracuse.*

S. N. A. 2

Soc. Nationale d'Affretements; 1911; Great Lakes Engineering Works; 2,294 tons; 247x43-7x28-4; 192n.h.p.; triple-expansion engines.

The French steamship *S. N. A. 2* was torpedoed and sunk by a German submarine in the North Sea on June 6th, 1917.

S. N. A. 3

Soc. Nationale d'Affretements; 1915; Great Lakes Engineering Works; 1,709 tons; 255-6x43x16-6; 160n.h.p.; triple-expansion engines.

The French steamship *S. N. A. 3* was torpedoed and sunk by a German submarine in the North Sea on September 26th, 1917.

S. N. A. 7

Soc. Nationale d'Affretements; 1922; Osbourne, Graham & Co.; 2,679 tons; 300x48x18-1; 316 n.h.p.; triple-expansion engines.

The French steamship *S. N. A. 7* struck a mine and sank on April 27th, 1941, off CapBon.

S. P. LEE

United States Navv, destroyer; 1919; Bethlehem Shipbuilding Corpn.; 1,215 tons; 310x30-9x9-3; 27,500 s.h.p.; 35 knots; turbine engines; Yarrow boilers; four 4 in. guns, one 3 in.A.A., 12 T.T.

The United States destroyer *S. P. Lee* was one of a flotilla of seven such vessels steaming through a dense fog at high speed near the island of Santa Barbara, off the coast of California, on September 8th, 1923. All the ships ran upon the rocks and became total wrecks, but most of the crews got away in safety. The full story of the disaster is told under the *Delphy*, leading ship of the flotilla.

SAALE

*Norddeutscher Lloyd; 1886; Fairfield S.B. Co.; 4,806 tons; 380x45x27; 8,200 i.h.p.; 18 knots; triple-expansion engines. On the afternoon of Saturday, June 30th, 1900, five liners belonging to Norddeutscher Lloyd were lying alongside the company's wharf at Hoboken, New York, when there was an outbreak of fire which involved all five ships. They were the *Saale*, *Bremen*, *Main*, *Phoenicia* and *Kaiser Wilhelm der Grosse*, and the fire started with a bale of cotton which at the time was being handled by some German stevedores. A high wind was blowing and within a short time a stack of whisky barrels was on fire, setting fire to the nearby warehouses, which were light wooden structures.*

Every effort was made to tow the liners into mid-stream, but the heat was so great that many men on the upper decks died from the effect of that alone. The *Saale* was cut adrift and grounded on Communipaw Flats. The *Main*, with about 150 men on board, was burned as she lay alongside the wharf. The *Bremen* was, at the time, entertaining a party of about 100 visitors, chiefly women and children. Sheets of flame fastened on the liner and within a short time she was in the same plight as her sister ships. In her case an explosion added to the terrors of the fire. She was eventually towed upstream, together with the *Main*, where after some hours the fires were extinguished. The *Kaiser Wilhelm der Grosse* managed to get free without the help of tugs.

So rapid was the conflagration that within nine minutes the whole frontage of the wharf, a quarter of a mile in length, was on fire. To prevent it spreading, the officials of the Hamburg-America company at the next wharf blew up their pier.

Many scores of people were trapped between decks and suffered an agonising death. On three ships, the *Saale*, *Main* and *Bremen*, there were 189 dead, while those on the other ships, and upon the wharf, added a considerable number to this total. The decks, piers and warehouses were burned out and damage estimated at over £2,000,000 was caused.

SABAC

Yugoslav Government (Kvarnerska Plovidbd); 1922; Stettiner Oderwerke; 2,811 tons; 342-5x46x20-3; 10 knots; triple-expansion reciprocating engines.

The Yugoslav steamship *Sabac*, Capt. Milo Catovic, on a voyage from Ploce to Rotterdam with bauxite, was in collision with the British motorship *Dorington Court*, 6,223 tons, at 10.55 p.m. on January 7th, 1962, about six miles S.E. of Dover, in dense fog. The *Sabac* was badly holed on the port side and sank within five minutes. The *Dorington Court* and three other ships in the vicinity put out boats to search for survivors, together with the *Dover* and *Walmer* lifeboats but most of those found were dead from exposure owing to the intense cold. Only five of her crew of 33, the captain, first officer and three others, survived.

SABANG MARU

*Mitsubishi Kisen K.K.; 10,241 tons. The tanker *Sabang Mam* was sunk by U.S. carrier-based aircraft on July 24th, 1945, off Kure, Japan.*

SABAUDIA

Dani & C.; 1911; *Swan, Hunter & Wigham Richardson*; 1,590 tons; 296-5x36-1x19-5; 254n.h.p.; triple-expansion engines. The Italian steamship *Sabaudia* was shelled and sunk by a British warship on April 16th, 1941, near the Kerkenna Islands.

SABAUDIA

Italia Soc. Anon. di Nav.; 1941; *Cantieri Riuniti DeW Adriatico*; 29,307 tons; 642-8x83-2x35-4; oil engines. The motor liner *Sabaudia* was built to the order of Swedish owners as the *Stockholm*, but was taken over by the Italians on completion. On July 6th, 1944, she was bombed by British aircraft at Trieste and set on fire. The fire could not be controlled and the ship went aground and became a total wreck.

SABIA

Fruument Steamship Co.; 1903; *R. Stephenson & Co.*; 2,807 tons; 314-6x46-8x13'7; 291 n.h.p.; 9-5 knots; triple-expansion engines.

The steamship *Sabia* was torpedoed and sunk by a German submarine six miles S.S.E. of the Lizard on November 24th, 1917. Eleven of the crew were killed. The captain was among the survivors.

SABINA

Compania Naviera Vascongada; 1920; *Fried. Krupp A.G.*; 2,421 tons; 288-2x44-2x20-3; 245 n.h.p.; triple-expansion engines.

The Spanish steamship *Sabina* struck a mine and sank on June 9th, 1941, about 40 miles out from Genoa bound for Spain.

SABINE HOWALDT

Bernhardt Howaldt; 1938; *Nordseewerke Emden*; 5,956 tons; 437-4x59x23-6; 306 n.h.p.; compound engines & L.P. turbine. The German steamship *Sabine Howaldt* struck a mine and sank on May 11th, 1944, off Borkum.

SABOR

Royal Mail Lines; 1920; *Earless Co.*; 5,212 tons; 400-5x 52-2x28-5; 369 n.h.p.; triple-expansion engines. The steamship *Sabor*, on a voyage from Port Said to Rio de Janeiro, was torpedoed and sunk by a German submarine on March 7th, 1943, about 200 miles E. of East London. Three of her crew and three gunners were lost.

SAC 5°

Soc. Anon. Cros; 1890; *Richardson, Duck & Co.*; 2,521 tons; 297 X 40x19; 245 n.h.p.; triple-expansion engines. The Spanish steamship *Sac 5°* was bombed and sunk by Insurgent aircraft on February 25th, 1938, at San Feliu de Guixols, during the Spanish Civil War.

SAC 6°

Soc. Anon. Cros; 1928; *Swan, Hunter & Wigham Richardson*; 2,498 tons; 297-2x43-1x23-5; 206n.h.p.; triple-expansion engines.

The Spanish steamship *Sac 6°* was bombarded by Insurgent warships off the south coast of Spain in December, 1938, during the Spanish Civil War. While trying to get to Marseilles for repair she went ashore on December 12th at St. Pierre near Narbonne, and broke in two.

SAC 7°

Soc. Anon. Cros; 1918; *Astilleros de Gijon*; 835 tons; 201-7X 28-9x13-9; 50 n.h.p.; triple-expansion engines. The Spanish steamship *Sac 7°* was bombed and sunk by Insurgent aircraft at Barcelona on April 30th, 1938, during the Spanish Civil War.

SACHI MARU

Kobe Sanbashi K.K.; 1944; *Tokyo Zosenho K.K.*; 934 tons; 198-7x31-2x—; oil engines.

The motorship *Sachi Maru* was carrying iron ore from Niigata to Yawata. When off Kanaiwa in 36° 36' N., 136° 34' E., on March 14th, 1959, the cargo shifted and she sank.

SACRO CUORE

Gennaro Montella; 1899; *W. Dobson & Co.*; 1,097 tons; 220-8x35x13-9; 148 n.h.p.; triple-expansion engines. The Italian steamship *Sacro Cuore* was shelled and sunk by a British submarine on December 2nd, 1942, outside Susa.

SADIKZADE

Turkish Government; 1902; *Rickmers Akt. Ges.*; 1,657 tons; 253x37-4x19-6; 135 n.h.p.; triple-expansion engines. The Turkish ship *Sadikzade* was wrecked on March 22nd, 1939, off Cape Adrasan, south of Antalya.

SADIKZADENAZIM

Sadikzade Nazim Ogullari; 1912; *Kjobenhavns Flydedok & Skibsværft*; 1,300 tons; 241 -3x36-2x 16-1; triple-expansion engines.

The Turkish ship *Sadikzadenazim* left Zonguldak on September 24th, 1954, bound for Istanbul. She was not seen again and is believed to have foundered in a violent storm which sprang up during the following night. The bodies of two of the crew were washed up on the 26th.

SADO

Luso S.S. Lines; 1895; *C. S. Swan & Hunter*; 3,033 tons; 326-7x41x24-5; 252 n.h.p.; triple-expansion engines. The Portuguese steamship *Sado* was torpedoed and sunk by a Japanese submarine in July, 1942, near Shanghai. Ten of her crew and 39 Chinese passengers were killed.

SADO MARU

Yamashita Kisen K.K.
The Japanese ship *Sado Maru* was torpedoed and sunk by the U.S. submarine *Thresher* on April 10th, 1942, off Shimizu, Japan.

SADO MARU

Nippon Yusen K.K.; 1939; *Mitsubishi Jukogyo K.K.*; 7,180 tons; 479-6x62-3x32-2; 1,960 n.h.p.; oil engines. The motorship *Sado Maru* was sunk by U.S. land and carrier-based aircraft on November 14th, 1942, in the Solomon Islands.

SAETIA

United States Shipping Board; 1918; *Bethlehem S.B. Corp.*; 2,873 tons; 309-2x48-2x21-5; 329 n.h.p.; triple-expansion engines.

The American steamship *Saetia* struck a mine and sank in the Western Atlantic on November 9th, 1918.

SAETTA

Italian Navy destroyer; 1932; *Tirreno*; 1,206 tons; 315x32x 9-5; 44,000 s.h.p.; 38 knots; turbine engines; 3-drum boilers; four 4-7 in. guns, four 37 mm.A.A., four 13 mm.A.A., 6 T.T. The Italian destroyer *Saetta* was mined and sunk in the Gulf of Tunis on February 3rd, 1943. The vessel carried a complement of over 150.

SAGALAND

Dampsk. A/S Vestland; 1921; *C. Hill & Sons*; 2,677 tons; 310-8x44-2x23-8; 242 n.h.p.; triple-expansion engines. The Norwegian ship *Sagaland* was involved in a collision and sank on July 15th, 1927, off Nantucket.

SAGAMIMARU

Nihon Yusen K.K.; 7,189 tons.
The steamship *Sagami Maru* was torpedoed and sunk by the U.S. submarine *Seawifon* November 3rd, 1942, off Mindanao Island, Philippines.

SAGAMIGAWA MARU

Toyo Kaiun K.K.; 6,880 tons.
The steamship *Sagamigawa Mam* struck a mine and sank on May 7th, 1945, N. of Karatsu, Japan.

SAGAMORE

SAGAMORE

White Diamond Steamship Co.; 1892; Harland & Wolff; 5,197 tons; 430-4x46-2x31; 592 n.hp.; 11 knots; triple-expansion engines.

The steamship *Sagamore* was torpedoed and sunk by a German submarine 150 miles W.N.W. of Fastnet on March 3rd, 1917. The captain was among the 52 men killed.

SAGANAGA

South Georgia Co.; 1935; D. & W. Henderson & Co.; 5,454 tons; 407x56x28; 256 n.h.p.; 11 knots; triple-expansion engines.

The British steamship *Saganaga*, Capt. A. Mackay, was torpedoed and sunk by a German submarine on September 5th, 1942, while at anchor off Bell Island, N.F.L. Twenty-nine men were killed and 13 survivors were picked up. Capt. Mackay was ashore at the time.

SAGARA MARU

Nippon Yusen K.K.; 1940; Mitsubishi Jukogyo K.K.; 7,189 tons; 479-7x62-3x32-2; oil engines.

The motorship *Sagara Mam* was taken over by the Japanese Navy and converted into a seaplane tender. On June 23rd, 1943, she was torpedoed and sunk by the U.S. submarine *Harder* about 100 miles S. of Shimizu, Japan.

SAGAWA MARU

Shimatani Kisen K.K.; 1918; Seikichi Ono; 1,186 tons; 220X32x18; 88 n.h.p.; triple-expansion engines.

The steamship *Sagawa Maru* was torpedoed and sunk by the U.S. submarine *Sea Dog* on June 9th, 1945, about 100 miles S. of Shimoda, Japan.

SAGIRI

Japanese Navy, destroyer; 1929; Uruga; 1,700 tons; 371-5x33-8x9-8; 40,000 s.h.p.; 34 knots; turbine engines; Kanpon boilers; six 5 in. guns, four A.A.m.g.

The Japanese destroyer *Sagiri* was engaged in the fighting around the coasts of Sarawak against a mixed force of British, American and Dutch ships. On December 24th, 1941, she was torpedoed and sunk off Kuching by the Dutch submarine *K-16*. The destroyer's normal complement was 197.

SAGITTA

Biagio Barriello; 1919; D. & W. Henderson & Co.; 5,153 tons; 413-2x52-2x28-4; 517 n.h.p.; triple-expansion engines.

The Italian steamship *Sagitta* was shelled and sunk by British warships on November 9th, 1941, about 120 miles S.E. of Punta Sfilo.

SAGOLAND

Madrigal & Co.; 1913; Earless Co.; 5,334 tons; 430-2x54-2x26-2; 534 n.h.p.; triple-expansion engines.

The Philippine steamship *Sagoland* was sunk by Japanese aircraft at Manila on December 10th, 1941.

SAGRES

Portuguese Government; 1911; Akt. Ges. Neptun; 2,986 tons; 338-2x48-2x21; 250 n.h.p.; triple-expansion engines.

German steamship *Taygetos* was requisitioned by the Portuguese Government and renamed *Sagres*. Subsequently she was torpedoed and sunk by a submarine in the Mediterranean on April 16th, 1917.

SAIDIEH

Khedivial Mail Steamship Co.; 1878; W. Denny & Bros.; 3,303 tons; 350x40-2x23-4; 543 n.h.p.; 11 knots; triple-expansion engines.

The British steamship *Saidieh* from Alexandria for Hull with a cargo of 8,000 tons of onions and cotton seed was torpedoed and sunk by a German submarine six miles N.E. of the Elbow Buoy, in the North Foreland area, on Tuesday, June 1st, 1915. The crew numbered 47, and of these a stewardess and seven men were drowned in getting into a boat. The survivors, including the captain, were picked up and taken to Chatham.

SAIFFEE

Turkish Navy, turret monitor; 1875; 400 tons; 145x31x5-5; 400Lh.p.; 7 knots; steam engines; two 80pdr. guns. The Turkish iron monitor *Saiffee* was one of the most modern ships of the Turkish fleet at the outbreak of the Russo-Turkish War, 1877-78. She formed one of a squadron lying off Braila near the Sulina mouth of the Danube. It was the Russian objective to disperse this squadron if possible, though there were scanty means available. On the night of May 26th, 1877, which was exceptionally dark, a small expedition consisting of four steam launches equipped with two spar torpedoes each, and manned by soldiers under command of Lts. Dubasoff and Shestakoff, made its way upstream.

The launches had almost reached the nearest monitor when they were discovered, but the Turkish fire was wild and ineffective. The *Saiffee* was hit by three torpedoes, the last of which caused a violent explosion on board and the monitor sank immediately. The greater part of her crew were either killed or wounded.

The action, which was wholly in the hands of the military, was a complete success, and Lts. Dubasoff and Shestakoff were each awarded the Cross of St. George.

SAIGON MARU

Osaka Shosen K.K.; 1937; Mitsubishi Jukogyo K.K.; 5,350 tons; 376-3x55-8x32-8; 488 n.h.p.; oil engines. The motorship *Saigon Maru* was taken over by the Japanese Navy for use as an auxiliary cruiser. On September 18th, 1944, she was torpedoed and sunk by the U.S. submarine *Flasher* about 100 miles S. of Olongapo, Philippines.

SAIHO MARU

Dairen Kisen K.K.; 1918; Russell & Co.; 4,639 tons; 385X52x26-5; 489 n.h.p.; triple-expansion engines. The steamship *Saiho Maru* was sunk by U.S. carrier-based aircraft on November 11th, 1944, off the west coast of Cebu Island, Philippines.

SAIKYO MARU

Hinode Kisen K.K.; 1936; Osaka Zosensho K.K.; 1,292 tons; 217-8x35-8x18-5; 144 n.h.p.; triple-expansion engines. The steamship *Saikyo Maru* was taken over by the Japanese Navy for service as an auxiliary gunboat. On June 28th, 1942, she was torpedoed and sunk by the U.S. submarine *Stingray* about 200 miles N.W. of Yap Island.

SAIMA

O. W. Bergmann; 1914; Laxevaags Maskin & Jernskibs.; 1,147 tons; 228-9x35-2x15-9; 106n.h.p.; 8 knots; triple-expansion engines.

The Norwegian steamship *Saima* was torpedoed and sunk by a German submarine ten miles W. of Trevoise Head on June 8th, 1918. The captain and 14 others were killed.

SAINAN MARU

Toa Kaiun K.K.; 3,232 tons. The steamship *Sainan Maru* struck a mine and sank on September 9th, 1944, off Shanghai.

SAINEI MARU

Dairen Kisen K.K.; 4,916 tons. The steamship *Sainei Maru* was torpedoed and sunk by the U.S. submarine *Thresher* on July 16th, 1944, off the north-west coast of Luzon Island, Philippines.

SAINT ANDRE

Soc. Navale de VQuest; 1907; Ateliers & Chantiers de France; 2,457 tons; 288-7x38-9x16-6; 156 n.h.p.; triple-expansion engines.

The French steamship *Saint Andre* was torpedoed and sunk by a German submarine in the English Channel on December 19th, 1917.

ST. ANSELM

The Saint Line; 1919; Northumberland S.B. Co.; 5,614 tons; 399-6x53x32-8; 517 n.h.p.; triple-expansion engines. The British steamship *St. Anselm*, on a voyage from Calcutta to

Hull, was torpedoed and sunk by a German submarine on June 30th, 1941, about 400 miles S.W. of Madeira. Thirty-four of her crew were lost.

SAINT BARCHAN

l. & A. Gardner & Co.; 1917; Scott & Sons; 362 tons; 141 -8X 23-8x10-1; 47 r.h.p.; 8 knots; triple-expansion engines.
The small British steamship *Saint Barchan* was torpedoed and sunk by a German submarine four miles from St. John's Point, Co. Down, on October 21st, 1918. The captain and seven crew were killed.

SAINT BARNABE

Soc. Navale de V Ouest; 1912; Ateliers & Chantiers de France; 5,184 tons; 352-3x52-5x28'; 339 n.h.p.; triple-expansion engines.
The French steamship *Saint Barnabe* was torpedoed and sunk by a submarine in the Mediterranean on October 7th, 1918.

ST. BASILE

Soc. Navale de V Ouest; 1920; Livingstone & Cooper; 2,775 tons; 323-8 x 44 -1 x22' 6; 234 n.h.p.; triple-expansion engines.
The French steamship *St. Basile* was torpedoed and sunk by a German submarine on June 14th, 1944, between Takoradi and Freetown. Six of her crew were killed.

ST. BERNARDS

W.D.Lovitt; 1875; W.D.Lovitt; 1,564 tons; 208x40-5x 24-5.
The Canadian sailing ship *St. Bernards*, Capt. M. Burns, was wrecked off Flushing, Holland, in July, 1879. The captain, his son and five of the crew were drowned.

ST. BLAIZE

French Government; 1906; Helsingors Jernskib & Maskin.; 1,970 tons; 281-7x42-1x 17-9; 192 n.h.p.; triple-expansion engines.
The steamship *St. Blaize* was formerly the Danish *Else*, seized by the Vichy French authorities. On November 8th, 1942, during the Allied landings at Casablanca she was sunk by gunfire.

ST. BRIAC

Southern Railway; 1924; W. Denny Bros.; 2,291 tons; 316X 41 X14; 20 knots; turbine engines.
The cross-channel packet *St. Briac* was taken over by the British Admiralty during the Second World War for service as a mercantile auxiliary. She struck a mine and sank off Aberdeen on March 12th, 1942, while serving as a Fleet Air Arm target vessel. Thirteen of her crew were lost.

SAINT BRIDE

A.Mackay & Co.; 1905; Russell & Co.; 3,934 tons; 344-5X 49-9x18; 338 n.h.p.; triple-expansion engines. The British steamship *Saint Bride* was wrecked on the Scharhorn, in the Elbe estuary, on November 6th, 1911. She was on a voyage from Hamburg to Norfolk, Va., carrying a cargo of kaintin.

ST. CAMILLE

Soc. Navale de V Ouest; 1920; W. Gray & Co.; 3,274 tons; 310-2x46-5X 23-7; 414 n.h.p.; triple-expansion engines. The French steamship *St. Camille* struck a mine and sank on May 26th, 1940, off Dunkirk.

ST. CATHERINE

Farrar, Groves & Co.; 1916; Richardson, Duck & Co.; 4,278 tons; 380 - 4 X 51 X 24 - 8; 395 n.h.p.; triple-expansion engines. The British cargo ship *St. Catherine* was wrecked near Asmara, Sardinia, on May 5th, 1916, while on a voyage from Baltimore to Naples carrying a cargo of grain.

ST. CATHERINE

North of Scotland & Orkney & Shetland S.N. Co.; 1916; Caledon S.B. & E. Co.; 1,216 tons; 243-3x34-9x15-2; 214 n.h.p.; triple-expansion engines. The steamship *St. Catherine*, on a voyage from Aberdeen to

Kirkwall, was torpedoed and sunk by a German aircraft on November 14th, 1940, outside Aberdeen. Fourteen of her crew and one passenger were lost.

ST. CHAMOND

Soc. Anon, des Chargeurs de V Ouest; 1913; W. Gray & Co.; 2,866 tons; 314-2x46-6x21^1; 250 n.h.p.; triple-expansion engines.
The French steamship *St. diamond* was torpedoed and sunk by a German submarine in the Bristol Channel on April 30th, 1918.

ST. CLAIR II

Ministry of Shipping (United Africa Co.); 1929; Swan, Hunter & Wigham Richardson; 3,753 tons; 347 -5x48-3x25-3; 434 n.h.p. triple-expansion engines & L.P. turbine.
The British steamship *St. Clair II*, on a voyage from Lagos to Liverpool, was torpedoed and sunk by a German submarine on September 23rd, 1941, about 400 miles S.W. of Madeira. Twelve of her crew and one gunner were lost.

ST. CROIX

Dampsk. A/S Otto Thoresens Linje; 1907; Burmeister & Wain; 2,530 tons; 310-7x40-7x18-8; 281 n.h.p.; triple-expansion engines.
The Norwegian steamship *St. Croix* was torpedoed and sunk by a German submarine in the Bristol Channel on December 12th, 1917.

ST. CROIX

Canadian Navy, destroyer; 1919; Bethlehem Shipbuilding Corpn.; 1,190 tons; 314x30x10; 27,000 s.h.p.; 35 knots; turbine engines; four 4 in. guns, one 3 in.A.A., 12 T.T. The Canadian destroyer *St. Croix*, Lt. Cdr. A. H. Dobson, D.S.C., was formerly the U.S.S. *McCook* and was transferred to Canada under the Lend-Lease agreement. On September 19th, 1943, she was escorting a westbound convoy in company with H.M. frigate *Itchen*, the corvette *Polyanthus* and the Canadian corvette *Morden*. An intensive attack by German submarines which lasted for four and a half days commenced on the night of the 20th, in the third assault of which the *St. Croix* was struck by a torpedo but did not sink. Later in the night the Germans scored another hit and the destroyer sank. Of those on board five officers and 75 other ratings were picked up by the *Itchen* (which see) which was sunk later with all but one of these survivors and 147 of her own crew. The *Polyanthus* (which see) was also sunk with 84 of her complement, together with six merchant ships.

SAINT CUTHBERT

Rankin, Gilmour & Co.; 1904; Armstrong, Whitworth & Co.; 4,954 tons; 410 x 51 - 5 X 28 • 1; 590 n.h.p.; triple-expansion engines.
The British steamship *Saint Cuthbert* was destroyed by fire off Cape Sable on February 4th, 1908, while carrying a general cargo from Antwerp to New York. Thirty-five of the crew were taken off by the steamship *Cymric* but 15 men who had put off in a boat were drowned when the boat capsized in heavy seas.

ST. DAVID

Fishguard & Rosslare Railways & Harbours Co.; 1932; Cammell Laird & Co.; 2,702 tons; 327'2x46'7x17-7; 1,590 n.h.p.; 21 knots; turbine engines.
The Great Western Railway packet *St. David*, Capt. E. W. Owen, was taken over for service as a hospital ship during the Second World War. On January 24th, 1944, when 25 miles S.W. of the Anzio beachhead the *St. David* was bombed and sunk by German aircraft. Capt. Owen and 56 others were killed.

ST. DENIS

French Government; 1929; Helsingors Jernskib & Maskin.; 1,595 tons; 253 • 5 X 39 -1 X15 - 4; 144 n.h.p.; compound engines. The steamship *St. Denis* was formerly the Danish *Viola*, seized by the Vichy French Government. On December 9th, 1941, she was torpedoed and sunk by a British submarine off the Balearic Islands.

ST. DIDIER

ST. DIDIER

French Navy; 1920; Livingstone & Cooper; 2,778 tons; 323-8x44-1x22-6; 234 n.h.p.; triple-expansion engines. The steamship *St. Didier* was taken over by the French Navy for use as a fleet auxiliary. On July 4th, 1941, she was bombed and sunk by British aircraft near Adalia, Turkey. The *St. Didier* was flying the Turkish flag.

ST. DUNSTAN

The Saint Line; 1919; Northumberland S.B. Co.; 5,681 tons; 400 X 53 x 32 - 8; 597 n.h.p.; triple-expansion engines. The British steamship *St. Dunstan*, on a voyage from Glasgow to Baltimore, was torpedoed by a German submarine on August 23rd, 1940. She was taken in tow on the 26th but sank during the next day between Pladda Point and Holy Island. Fourteen of her crew were lost.

ST. ELOI

Soc. Anon, des Hauts-Fourneaux Forges et Acieries de Denain & d'Anzin; 1909; Ateliers & Chantiers de France; 1,993 tons; 273 - 1 X 38 - 9 x 20 - 3; 156 n.h.p.; triple-expansion engines. The French steamship *St. Eloi* was sunk by a German submarine in the Bay of Biscay on June 6th, 1917.

ST. ELWYN

South American Saint Line; 1938; J. L. Thompson & Sons; 4,940 tons; 415-1x58-2x24-8; 320 n.h.p.; compound engines & L.P. turbine. The British steamship *St. Elwyn*, on a voyage from Hull to Santos with coal, was torpedoed and sunk by a German submarine on November 28th, 1940, about 500 miles E. of the Bishop Rock. Twenty-nine of her complement of 40 were lost.

SAINT EMILION

Worms & Cie.; 1917; Akers Mek. Vcerksted; 1,112 tons; 226-2x36-3x16-6; 127n.h.p.; triple-expansion engines. The French steamship *Saint Emilion* was lost in the English Channel on July 24th, 1917. It is probable that she sank after striking a mine.

ST. FRANCOIS XAVIER

Cie. Navale de VOceanie; 1910; Napier & Miller; 2,017 tons; 264-8x37x24-1; 205 n.h.p.; triple-expansion engines. On a voyage from Noumea to Saigon the French ship *St. Francois Xavier* was wrecked on June 30th, 1927, on Spratly Island.

ST. GENNY

British Navy, fleet tug; 1918; British Isles; 425 tons; 135x29x14-5; 1,250i.h.p.; 12 knots; triple-expansion engines; one 12 pdr. gun. The tugs *St. Cyrus* and *St. Genny*, Lt. C. F. Paul, with the sloop *Snapdragon* left Portland for Gibraltar on Saturday, January 11th, 1930. Next day they encountered very heavy weather, the seas being so tremendous that they hove to about 30 miles N.W. of Ushant in the hope that the gale would abate. At 8.20 p.m. on the 12th while lying in this position with a distance of half a mile between each of them they were struck almost simultaneously by huge waves. The *St. Cyrus* and *Snapdragon* survived the shock, though the former was badly damaged, but *St. Genny* disappeared in the darkness and was not seen again. Searchlights were switched on and several men were seen in the water. Five of these were picked up by *St. Cyrus* by means of lifelines, as no boat could be launched in such a storm. The *St. Cyrus* then proceeded on her way in a half sinking condition, her speed reduced to four knots.

The *St. Genny* carried a complement of 28, of whom only five ratings were saved.

ST. GEORGE

Murray Bros.; 1881; London & Glasgow S.B. Co.; 548 tons; 190-5x28-9x13; 90 h.p.; compound inverted engines. The steamship *St. George* foundered off Portreath, Cornwall, on November 29th, 1882. The captain, nine men and the engineer's wife were lost with the ship. Eight men got away in a boat which, however, capsized on landing and one of the occupants was drowned.*

610

ST. HELENS

Tiltro Limited Inc.; 1907; Harlan & Hollingsworth Co.; 1,497 tons; 224-3x41-2x20-6; 150 n.h.p.; triple-expansion engines. The American steamship *St. Helens* was torpedoed and sunk by a German submarine in the Atlantic on October 18th, 1917.

SAINT HUGO

Rankin, Gilmour & Co.; 1901; W. Pickersgill & Sons; 3,590 tons; 361x46-2x17-6; 375 n.h.p.; triple-expansion engines. The British steamship *Saint Hugo* was wrecked at Tanegashima on June 8th, 1911, in thick fog while on a voyage in ballast from Yokohama to Miike.

SAINT JACQUES

Societe Navale de VOuest; 1909; Ateliers & Chantiers de France; 2,459 tons; 288-8x38-9x16-6; 156 n.h.p.; triple-expansion engines. The French steamship *Saint Jacques* was torpedoed and sunk by a German submarine in the British Channel on September 15th, 1917.

SAINT JEAN

Societe Navale del' Quest; 1908; Ateliers & Chantiers de France; 2,457 tons; 288x38-9x16-6; 156 n.h.p.; triple-expansion engines. The French steamship *Saint Jean* was torpedoed and sunk by a submarine in the Mediterranean on March 22nd, 1918.

ST. JOHN

Emigrant ship; 1840 (circa); 400 tons (approx.). The emigrant ship, *St. John*, Capt. Oliver sailed from Galway for Boston, U.S.A., with 150 emigrants and 14 cabin passengers. On Saturday, October 6th, 1849, the ship was off Boston in very bad weather and at 6 o'clock on Sunday morning dropped anchor outside Minot's Ridge, intending to ride out the storm. Unfortunately the gale was so violent that the anchorage afforded little protection and at about 9 a.m. the *St. John* dragged her anchors and was flung on to the Grampus Rocks. Seeing that her position was hopeless the captain, officers and crew took to the boats, the first officer being the only one to stand by the hapless emigrants. In these circumstances it is not surprising that there was panic and confusion.

The number drowned was 99.

SAINT KILDA

Rankin, Gilmour & Co.; 1899; A. McMillan & Son; 3,518 tons; 340x45x17-9; 301 n.h.p.; triple-expansion engines. The British steamship *Saint Kilda* was sunk by Russian warships near Hong Kong on June 5th, 1905, while on a voyage from Hong Kong to Yokohama carrying a cargo of jute, rice and cotton. The Russians alleged that the ship was carrying contraband of war.

SAINT KILDA

Rankin, Gilmour & Co.; 1911; W. Hamilton & Co.; 3,947 tons; 352x50-1x25-6; 358n.h.p.; triple-expansion engines. The British steamship *Saint Kilda* was wrecked at Little Miquelon on December 9th, 1915, while carrying a cargo of coal from Sydney, N.S., to Liverpool.

ST LINDSAY

St. Quentin Shipping Co.; 1921; Wallace S.B. & D.D. Co.; 5,370 tons; 400x52-4x28-8; 540n.h.p.; triple-expansion engines. The British cargo ship *St. Lindsay* left the Clyde on June 5th, 1941, carrying a general cargo on a voyage to Trinidad and Buenos Aires, but was subsequently lost without trace. She carried a crew of 43.

ST. LO

United States Navy, escort aircraft carrier; 1943; United States; 6,730 tons; 498x80x19-7; 11,020i.h.p.; 18knots; oilengines; one 5 in. gun, twenty-four 20 mm.A.A. The United States escort aircraft carrier *St. Lo* formed one of a squadron of six such vessels under command of Rear-Admiral C. A. F. Sprague at the battle of Leyte Gulf, October 23rd-27th, 1944. On the 25th this squadron with its escorting destroyers met the Japanese Central Force off the east coast of Samar and a fierce engagement took place in which the slow and lightly armed

American ships suffered heavily from the guns of the enemy battleships and cruiser. The *St. Lo* was also attacked by shore-based dive-bombers and she sank during the morning.

For further particulars of the action see *Gambler Bay*.

The full story of the battle of Leyte Gulf is told under the battleship *Musashi*.

ST. LOUIS

Societe Navale deVQuest; 1913; Ateliers & Chantiers de France; 5,202 tons; 352-5x52-5x28-4; 340n.h.p.; triple-expansion engines.

The French steamship *St. Louis* was torpedoed and sunk by a German submarine on March 1st, 1944, on a voyage from Takoradi to Larne. The ship was struck by three torpedoes and sank very quickly, with the loss of 24 of her crew, 56 passengers and five gunners.

SAINT LUC

Societe Navale deV Quest; 1908; Ateliers & Chantiers de France; 2,456 tons; 288-8x38-9x16-6; 156n.h.p.; triple-expansion engines.

The French steamship *Saint Luc* was torpedoed and sunk by a submarine in the Mediterranean on October 3rd, 1918.

ST. MAGNUS

N. of Scotland & Orkney & Shetland S.N. Co.; 1912; Ramage & Ferguson; 809 tons; 215-1 x31 -1 x 15-3; 206 n.h.p.; triple-expansion engines.

The British ship *St. Magnus* was torpedoed and sunk by a German submarine on February 12th, 1918, three miles N.N.E. of Peterhead. Five lives were lost.

ST. MALO

Canadian Government; 1917; Kawasaki Dockyard Co.; 5,779 tons; 381 -9x50-9x25-2; 440n.h.p.; triple-expansion engines. The Canadian steamship *St. Malo*, on a voyage from St. John, N.B., to Liverpool, was torpedoed and sunk by a German submarine on October 12th, 1940, about 300 miles W. of the Hebrides. Twenty-eight of her crew of 44 were lost.

ST. MARC

Soc. Mar. Auxiliaire de Transports; 1913; Ateliers & Chantiers de Bretagne; 2,249 tons; 270-5x41-4x19-5; 144n.h.p.; triple-expansion engines.

The French ship *St. Marc* was carrying coal from Cardiff to Nantes. On August 14th, 1925, she struck Keleren Reef off Ushant and sank. Eleven of her crew were lost and 13 saved.

SAINT MARCOUF

Soc. des Forges et Acieries de la Marine et d'Homecourt; 1903; Blyth S.B. Co.; 1,117 tons; 225x33-2x14-4; 162n.h.p.; triple-expansion engines.

The French steamship *Saint Marcouf* was torpedoed and sunk by a German submarine in the Irish Channel on July 29th, 1917.

ST. MARGARET

JohannOrth; 1877; T. Royden & Sons; 1,428 tons; 233-lx 37-3x22-5.

The iron sailing ship *St. Margaret*, formerly belonging to Rankin, Gilmour & Co., was purchased a short time before her loss by Johann Orth, an Austrian, who was none other than the ex-Archduke Johann Salvator, a member of the Austrian Royal Family.

Having been relieved of his honorary rank of Field Marshal in the Austrian Army the Archduke, being a man of some capacity, occupied his time in the study of navigation, finally obtaining a master-mariner's certificate in the Austrian mercantile marine.

He was 37 years of age, and long been in love with Milli Stubel, an Austrian actress of good family. His request to be allowed to marry her was refused by the Emperor, whereupon he renounced his title took the name of Johann Orth from his castle of Orth and, having married Fraulein Stubel in the meantime, went to England.

Here he bought the *St. Margaret*, a fine three-masted iron sailing ship of 1,428 tons, and transferred her to the Austrian flag and engaged an experienced Dalmatian crew.

Financially the venture did not prosper, as shippers were loth to entrust goods to so inexperienced a captain, but he did obtain a cargo for La Plata and left London on March 26th, 1890. He returned from South America by passenger liner, leaving his ship behind, but was soon back again accompanied by his wife, and began preparations for a voyage around Cape Horn to Valparaiso. His Dalmatian crew doubted the wisdom of this, believing that rounding the Horn was beyond his seamanship. Finally they walked off the vessel and left him to recruit another crew.

On July 12th, 1890, Johann Orth and his wife left Ensenada on the *St. Margaret* on their last voyage. The ship was spoken by the Hamburg barque *Maria Mercedes* on the 31st, soon after which a terrific hurricane broke over the area and the Austrian ship vanished.

The Emperor Francis Joseph and the whole of his court were deeply disturbed by this tragedy, and a cruiser was ordered to South American waters to make an exhaustive search for the missing vessel. She returned after some months, having found no trace of the *St. Margaret*.

ST. MARGARET

North of Scotland & Orkney & Shetland S.N. Co.; 1913; Ramage & Ferguson; 943 tons; 215x31-1x15-3; 206n.h.p.; 10 knots; triple-expansion engines.

The steamship *St. Margaret* was torpedoed and sunk by a German submarine 30 miles S.E. of Lille Dimon, Faroe, Islands, on September 12th, 1917. Five of her crew were killed. The captain was among the survivors.

ST. NAZAIRE

Compagnie Delmas Vieljeux; 1919; Forth S.B. & E. Co.; 2,910 tons; 324-5x44-3x23-1; 234 n.h.p.; triple-expansion engines.

The French steamship *St. Nazaire* was torpedoed and sunk by a British submarine on September 23rd, 1943, soon after leaving Genoa for Leghorn.

SAINT NINIAN

A. Mackay & Co.; 1894; D. & W. Render son; 3,026 tons; 320x42x23-6; 258 n.h.p.; 9-5 knots; triple-expansion engines.

The steamship *Saint Ninian* was torpedoed and sunk by a German submarine three miles E. of Whitby on February 7th, 1917. Of those on board 15 men, including the captain, were killed.

ST. OLAF

A. Fraser; 1882; Murdoch & Murray; 305 tons; 151-4x 22-2x11-6; 95 r.h.p.; triple-expansion engines. The steamship *St. Ofa* was wrecked in a snowstorm on November 21st, 1900, near Seven Islands Bay, Labrador, with the loss of her entire complement of 26, passengers and crew.

SAINT OSWALD

Rankin, Gilmour & Co.; 1905; W. Pickersgill & Sons; 3,810 tons; 361 x46-3x17-6; 343 n.h.p.; triple-expansion engines. The British steamship *Saint Oswald* sank after a collision off Pelaho Point on December 31st, 1915. She was on a voyage in ballast from the Tyne to Helles, via Imbros.

SAINT PANCRAS

Rankin, Gilmour & Co.; 1890; Harland & Wolff; 4,283 tons; 400'6x45-2x28-2^; 390 n.h.p.; triple-expansion engines. The British cargo ship *Saint Pancras* was wrecked on Samarang Bank, near Labuan, on June 17th, 1895. She was on a voyage from Manila to Marseilles and Liverpool with a cargo of sugar, copra and hemp.

ST. PATRICK

Fishguard & Rosslare Railways & Harbours Co.; 1930; A. Stephen & Sons; 1,922 tons; 281-3x41-1x16-3; 887 n.h.p.; turbine engines.

The British steamship *St. Patrick*, on a voyage from Rosslare to Fishguard with 44 passengers, was bombed and sunk by German aircraft at 4.26 a.m. on June 13th, 1941. Seventeen of her crew, one gunner and 12 passengers were lost.

ST. PAUL

1845 (circa); 500 tons (approx.).

The emigrant ship *St. Paul* with 327 Chinese passengers on board was bound from Hong Kong to Sydney. On September 30th, 1858, she was wrecked on the island of Rossel. The captain and eight seamen left the ship to obtain assistance, being picked up by the schooner *Prince of Denmark* on October 15th and conveyed to New Caledonia. From there the French steamship *Styx* proceeded to Rossel to relieve the castaways. On her arrival she found a terrible state of affairs, the natives of the island having overwhelmed the remainder of the crew and the Chinese and killed and eaten them. Only one man, a Chinaman, survived the massacre.

SAINT PAUL

Cie. Navale de VOceanic; 1912; Campbeltown S.B. Co.; 1,633 tons; 229-9x35-8x22-5; 135n.h.p.; triple-expansion engines.

The French steamship *Saint Paul* was wrecked on Smith's Rock, Cape Moreton, Australia, on March 27th, 1914. She sank with the loss of 18 lives.

ST. PAUL

Th. Willerding; 1906; J. Blumer & Co.; 2,534 tons; 310x44x20-9; 271 n.h.p.; triple-expansion engines. The Swedish steamship *St. Paul* struck a mine and sank in the North Sea on September 2nd, 1914.

ST. PHILIBERT

Cie. Nantaise de Nav. a Vap; 1923; Soc. Anon. Anciens Chantiers Dubigeon; 189 tons; 105-5x21-1x8-6; 23 n.h.p.; triple-expansion engines.

On the morning of June 14th, 1931, the passenger steamer *St. Philibert* left Nantes for a day excursion to the island of Noirmontier, in the Loire estuary, with 467 persons on board, passengers and crew.

Soon after leaving the island on the return trip the ship was capsized by a sudden squall and sank with the loss of all on board, except eight men who managed to swim to land. The loss of life was estimated as 368, some of the passengers having stayed on the island.

ST. PHILIPPE

Soc. Navale de VOuest; 1912; Ateliers & Chantiers de France; 3,419 tons; 324-9x46x25-7; 225 n.h.p.; triple-expansion engines.

The French steamship *St. Philippe* was sunk by a German submarine in the English Channel on November 29th, 1916.

ST. PROSPER

Soc. Navale de VOuest; 1920; W. Gray & Co.; 4,330 tons; 351-2X52-5x26-7; 515n.h.p.; triple-expansion engines.

The French ship *St. Prosper* left Algiers on March 6th, 1939, for Marseilles. She was in wireless communication with the owners on March 8th, but was not heard of again.

ST. ROGATIEN

L. Bureau & Fils; 1901; A. Dubigeon; 1,581 tons; 245-9X36-8x21-5.

The French sailing ship *St. Rogatien* was sunk by a German submarine in the English Channel on November 17th, 1916.

SAINT RONALD

British & Foreign Steamship Co.; 1910; W. Hamilton & Co.; 4,387 tons; 380x50x26-5; 393 n.h.p.; 10 knots; triple-expansion engines.

The steamship *Saint Ronald* was torpedoed and sunk by a German submarine 95 miles N.N.W. of Tory Island on September 19th, 1917. Twenty-four of her crew were killed. The captain was among the survivors.

SAINT SIMON

Soc. Navale de VOuest; 1912; Ateliers & Chantiers de France; 3,419 tons; 324-9x46x25-9; 225 n.h.p.; triple-expansion engines.

The French steamship *Saint Simon* was sunk by a submarine in the Mediterranean on April 3rd, 1917.

ST. SUNNIVA

I. Lund & Co.; 1912; Laxevaags Maskin & Jernskibs.; 1,140 tons; 228-8 x 35 • 2 x 15 • 9; 106 n.h.p.; triple-expansion engines.

The Norwegian steamship *St. Sunniva* struck a mine and sank in the Bay of Biscay on June 2nd, 1917.

ST. SUNNIVA

North of Scotland & Orkney & Shetland S.N. Co.; 1931; Hall, Russell & Co.; 1,368 tons; 252-6x35-2x15-5; 255 n.h.p.; triple-expansion engines.

The British steamship *St. Sunniva* left Greenock on January 3rd, 1943, as one of the escorts to a convoy bound to Halifax. On the 21st a strong gale developed with freezing temperature and the *St. Sunniva* was last seen on that day in the region of Sable Island with a heavy accumulation of ice on deck. Conditions were so bad that naval ships in the same convoy had up to ten feet of ice forward on arrival at Halifax.

ST. VINCENT

Potter, Wilson & Co.; 1863; Sunder land; 834 tons. The sailing ship *St. Vincent*, Capt. J. Barron, left Wellington, New Zealand, in ballast, for Lyttelton on February 13th, 1869, to load with wool. Soon after leaving harbour she encountered a S.E. gale which blew her onto the Mokomoko Rocks, N. of Cape Turakirae.

The disaster occurred about 10.30 on the night of the 14th, when the vessel was attempting to ride out the storm with both anchors down. She swung broadside-on to the rocks; her cables parted and she was flung over to starboard on her beam ends. A huge wave swept her end to end and carried away masts, decks and all standing gear. The crew, who had taken refuge in the mizzen chains, managed to survive this avalanche, but died or were washed overboard during the night.

The mate, Mr. J. Stringer, and the sailmaker, were washed ashore, and were the only survivors out of a crew of 21 and one passenger.

STE. ANNE

Soc. Mar. Aux. de Transports; 1913; Ateliers & Chantiers de Bretagne; 2,247 tons; 269x41-4x!9-6; 143 n.h.p.; triple-expansion engines.

The French ship *Ste. Anne*, on a voyage from the Tyne to Bordeaux with coal, collided with the French steamship *Blois* on April 7th, 1924, in dense fog and sank about 20 miles off Brighton.

SAINTE ANNE

Soc. Navale Caennaise; 1941; Smith's Dock Co.; 497 tons; 153'2x27-6x14-1; triple-expansion engines.

The French ship *Sainte Anne*, with a crew of 15, left Algiers on March 14th, 1950, for Toulon. On March 15th, when off the Balearic Islands she was in wireless communication with the owners but there was no further news.

SAINTE HELENE

Daher & Cie.; 1893; W. Gray & Co.; 2,128 tons; 285x39-2x16-4; 219 n.h.p.; triple-expansion engines.

The French steamship *Sainte HeUne* struck a mine and sank in the Bay of Biscay on February 1st, 1917.

STIE MARCELLE

French Government; 1935; Ansaldo San Giorgio; 1,518 tons; 418-3x54-8x30-9; 399 n.h.p.; quadruple-expansion engines.

The steamship *Stie. Marcelle* was formerly the Norwegian *Vigor*, seized by the Vichy French authorities at Casablanca. On March 14th, 1942, she was torpedoed and sunk by a British submarine in the Western Mediterranean.

STIE MARGUERITE

Daher & Cie.; 1913; Ateliers & Chantiers de France; 2,780 tons; 298-3x43-2x26-8; 216n.h.p.; triple-expansion engines.

The French steamship *Stie. Marguerite* was sunk by a submarine in the Mediterranean on October 2nd, 1915.

STE. MARGUERITE II

Societe de Navigation a Vapeur; 1921; Dublin Dockyard Co.; 1854 tons; 265 x42-1x17-9; 188 n.h.p.; triple-expansion engines.
The French steamship *Ste. Marguerite II* was torpedoed and sunk by a British submarine on December 3rd, 1942, on a voyage from Marseilles to Genoa.

STE. MAXIME

Cie. Generate d'Armements Maritimes; 1911; Akt.Ges. Weser; 4,051 tons; 337-7x48-2x20-4; 248n.h.p.; triple-expansion engines.

The French ship *Ste. Maxime* was on a voyage from Naples to Philippeville. On January 13th-14th, 1944, she was involved in a collision with the *Wendell Phillips* off Cape Bon and sank.

SAIPAN MARU

Nippon Yusen K.K.; 1936; Mitsubishi Jukogyo Kaisha; 5,533 tons; 382X53-8 X33-3; 640 nh.p.; triple-expansion engines & L.P. turbine.

The steamship *Saipan Maru*, in service as a transport, was torpedoed and sunk by the U.S. submarine *Haddock* on July 21st, 1943, 800 miles E. of Casiguran, Philippines.

SAISHU MARU

Taiyo Risen K.K.; 1897; J. Priestman & Co.; 2,082 tons; 290 X 42 - 3 x 20 - 4; 220 n.h.p.; triple-expansion engines.
The steamship *Saishu (Saisyu) Mam* was torpedoed and sunk by the U.S. submarine *Tautog* on January 3rd, 1944, off Shingu, Japan.

SAITSU MARU

Dairen Risen K.K.; 1911; Osaka Iron Works; 1,045 tons; 225•9X32•8X16-1; 116n.h.p.; triple-expansion engines.
The steamship *Saitsu (Saitu) Maru* was torpedoed and sunk by the U.S. submarine *Tirante* on July 8th, 1945, off the Kwantung Peninsula.

SAIYEN

*Japanese Navy, 3rd class cruiser; 1883; Stettin; 2,440 tons; 263-2x33x15*7; 2,800i.h.p.; 15 knots; triple-expansion engines; two 21 cm. guns, one 77 mm., six 3 pdr, 5 T.T.*
The Japanese light cruiser *Saiyen* was an old ship used in coastal defence. During the Russo-Japanese War she was a unit of a composite squadron of light cruisers and gunboats. On November 30th, 1904, when leading the line in one of the frequent bombardments of Port Arthur, the *Saiyen* struck a floating mine. She sank with a loss of 38 officers and men, the remainder of her complement of 237 being picked up by the gunboat *Akagi* and other ships of the squadron.

The captain went down with the ship.

SAKAE MARU

Kawasaki Risen K.K.; 1902; J. Blumer & Co.; 2,878 tons; 319-7x46-1x21; 263n.h.p.; triple-expansion engines.
The steamship *Sakae Maru* was torpedoed and sunk by the U.S. submarine *Bang* on November 23rd, 1944, 75 miles S.E. of Ilan, Formosa.

SAKARYA

Sadikoglu Asian ve Mahdumu; 1888; Blohm & Voss; 2,612 tons; 334-3x40-2x22-1; 293 n.h.p.; triple-expansion engines.
The Turkish ship *Sakarya* struck a rock on May 19th, 1943, about 25 miles S.E. of Fethiye. She broke in two and foundered.

SAKISHIMA MARU

Osaka Shosen K.K.; 1918; Osaka Iron Works; 1,224 tons; 220x33-6x18-5; 79n.h.p.; triple-expansion engines.
The steamship *Sakishima (Sakisima) Maru* was torpedoed and sunk by the U.S. submarine *Sea Robin* on July 10th, 1945, S. of Cheju Do Island, Korea.

SAKITO MARU

Nippon Yusen K.K.; 1939; Mitsubishi Jukogyo K.K.; 7,126 tons; 479x62-3x32-2; 1,960n.h.p.; 17 knots; oilengines.
The Japanese motorship *Sakito Maru*, in service as a transport, with a crew of 105 and 4,124 troops was in a convoy from Korea to the Mariana Islands. On February 29th, 1944, when 300 miles S.S.E.

of Okinawa the transport was torpedoed and sunk by the U.S. submarine *Trout*, Lt. Cdr. A. H. Clark, U.S.N.

The *Trout* was sunk shortly afterwards by Japanese escorting ships.

SAKURA

Japanese Navy, destroyer; 1943; Japan; 1,000 tons; 300X — x—; 30 knots; turbine engines; four 4-7 in. guns, 4 T.T.
The Japanese destroyer *Sakura* struck a mine and sank near Osaka, July 11th, 1945. The vessel carried a complement of about 150.

SAKURAMARU

Nippon Yusen K.K.; 1939; Mitsubishi Jukogyo K.K.; 7,170 tons; 479-7x62-3x32; 1,960 n.h.p.; oil engines.
The motorship *Sakura Maru* was sunk by gunfire and bombs from Allied warships and aircraft on March 1st, 1942, in the Sunda Strait.

SALABANGKA

Nederland Stoomv. Maats.; 1920; W. Hamilton & Co.; 6,586 tons; 420-7x54-7x33-4; 823n.h.p.; 13 knots; triple-expansion engines.

The Dutch steamship *Salabangka* was a unit of Convoy CD 20 bound from Swansea to Suez, via Durban. At 8.5 a.m. on June 1st, 1943, she was badly damaged by a torpedo from the German submarine *U-178*.

The ship was taken in tow but was again torpedoed at 5 p.m. and sank very quickly. Ten of her crew of 85 were lost.

SALADO

A. Holland & Co.; 1890; R.Dixon & Co.; 2,188 tons; 277X 39x18-2; 202n.h.p.; triple-expansion engines.
The British steamship *Salado* was wrecked in fog at Lundy Island at 5 a.m. on March 25th, 1897, while on a voyage from Newport to Buenos Aires carrying a cargo of coal.

SALAMANCA

H. Scholefield & Son; 1895; Palmers' Co.; 1,840 tons; 266x 37-2x16-1; 159n.h.p.; triple-expansion engines.
The steamship *Salamanca*, on a voyage from the Tyne to Stettin with coal, was wrecked on November 5th, 1899, near Hanstholm, Jutland.

SALAMINIA

Hellenic Shipowning Co.; 1897; J. Readhead & Sons; 3,112 tons; 323 X 47 -1X 22 • 6; 278 n.h.p.; triple-expansion engines.
The Greek steamship *Salamina* was torpedoed and sunk by a German submarine in the Irish Sea on March 29th, 1918.

SALDANHA

Ellerman & Bucknall S.S. Co.; 1911; Swan, Hunter & Wigham Richardson; 4,594 tons; 385-9x48-8x29; 339n.h.p.; 10 knots; triple-expansion engines.
The steamship *Saldanha* was torpedoed and sunk by a German submarine 95 miles N. of Algiers on March 18th, 1918. Six of her crew were killed. The captain was among the survivors.

SALEIER

Stoomvaart Maats. Nederland; 1920; Lithgow's; 6,563 tons; 419-9x54-8x33-5; 822 n.h.p.; triple-expansion engines.
The Dutch steamship *Saleier*, on a voyage from the Tyne to Port Said with coal, was torpedoed and sunk by a German submarine on April 10th, 1941, about 500 miles E.S.E. of Cape Farewell.

SALEMI

Italian Government; 1912; Flensburger Schiffsbau Ges.; 1,176 tons; 226-7x33-2x14-8; 92 n.h.p.; triple-expansion engines.
The steamship *Salemi* was formerly the French *Pontet Canet*, seized by the Italians. On February 2nd, 1943, she was torpedoed and sunk by a British submarine S.E. of Capri.

SALENTO

G. Zaccaro; 1903; Sir Raylton Dixon & Co.; 3,846 tons; 357x46-3x26-9; 354 n.h.p.; triple-expansion engines.
The Italian ship *Salento* was wrecked on November 25th, 1928, near Zandvoort while on a voyage from Bona to Amsterdam.

SALERNO

O. Thoresen; 1914; *Wood, Skinner & Co.*; 2,431 tons; 325-1 X 44-2x19-6; 249 n.h.p.; triple-expansion engines.

The Norwegian steamship *Salerno* struck a mine and sank in the North Sea on October 18th, 1915.

SALFORDIA

Sivewright, Bacon & Co.; 1898; *J. L. Thompson & Sons*; 3,666 tons; 353-4x51 X24-9; 329 n.h.p.; triple-expansion engines. The British steamship *Salfordia* was wrecked on Alpheo Shoal, off Kalmunai, Ceylon, on January 10th, 1913, while on a voyage from Calcutta to Colombo carrying a cargo of coal.

SALIENT

James Westoll; 1879; *Bartram, Haswell & Co.*; 1,432 tons; 250-4x34x18-2; 140 h.p.; compound engines. The British steamship *Salient* was wrecked during a heavy snowstorm near Filey on March 9th, 1891, after her engines had broken down, while on a voyage in ballast from Rotterdam to Sunderland.

SALIER

Norddeutscher Lloyd; 1875; *Earle's Co.*; 3,214 tons; 354-4x 39-7x24; 337 n.h.p.*; triple-expansion engines. The German steamship *Salier*, Capt. Wempe, on a voyage from Bremen to La Plata with passengers, left Corunna on the afternoon of December 7th, 1896, in rough weather. In the early hours of the 8th, in very heavy seas, the ship ran on to the Corona Reefs, Arosa Bay, and was wrecked with the loss of 281 lives, including Capt. Wempe.

SALLAND

Koninklijke Hollandsche Lloyd; 1905; *Russell & Co.*; 3,657 tons; 339-3x48x18; 354 n.h.p.; triple-expansion engines. The Dutch steamship *Sallandwas* torpedoed and sunk by a German submarine in the English Channel on January 23rd, 1917.

SALONICA

AlsVeborg; 1912; *Wood, Skinner & Co.*; 2,694 tons; 324x 46-5x19-8; 236 n.h.p.; triple-expansion engines. The Norwegian steamship *Salonica* was torpedoed and sunk by a German submarine on November 23rd, 1940, off the north-west coast of Ireland. Nine of her crew were killed.

SALOPIAN

Bibby Line; 1926; *Fairfield Shipbuilding Co.*; 10,526 tons; 483x60x32; 2,200 n.h.p.; 15-5knots; oilengines. The auxiliary cruiser *Salopian*, Capt. Sir J. M. Alleyne, Bart, D.S.O., was formerly the *Shropshire* of the Bibby Line. As there was already a 10,000 ton cruiser named *Shropshire* in the navy it became necessary for the liner's name to be changed when she was taken over for service by the Admiralty. On May 13th, 1941, the vessel was torpedoed and sunk by a German submarine about 400 miles S.E. of Cape Farewell. Two hundred and seventy-eight survivors were picked up.

SALPI

Peninsulare Soc. di Nav.; 1920; *S.A. Bacini e Scali Napoletani*; 2,710 tons; 299-9x39-4x23-8; 209 n.h.p.; triple-expansion engines.

The Italian steamship *Salpi* was torpedoed and sunk by a British submarine on February 3rd, 1942, about three and a half miles from Mehedia, Tunisia.

SALSETTE

Peninsular & Oriental Steam Navigation Co.; 1908; *J. Caird & Co.*; 5,842 tons; 440x53*2x29-5; 1,535 n.h.p.; 20 knots; quadruple-expansion engines.

The P. & O. liner *Salsette*, Capt. A. B. Armitage, was built for the express mail service between Aden and Bombay and was a great favourite with travellers to and from India prior to the First World War. During the war the ship was placed on the London to Bombay run as her speed was considered an effective protection against submarine attack. At 10.30 p.m. on July 19th, 1917, she left the Downs for India and steamed down Channel until noon next day, when she was 15 miles S.W. of Portland Bill. At this position the

first officer, who was on the monkey-bridge, saw a torpedo approaching. He at once ordered the helm hard-a-starboard but before this order could be obeyed there was a tremendous explosion on the starboard side blowing boats into the air and admitting a vast volume of water into the lower part of the ship. The engines stopped and Capt. Armitage gave orders to abandon ship and the boats were lowered without mishap in the short space of five minutes.

Of those on board one European and 14 Indian members of the crew lost their lives, the Indians being killed in the engine room or its vicinity. No passengers were lost and the discipline of all concerned was admirable. The survivors were landed at Weymouth.

SALTA

British Admiralty; 1911; *Forg. et Ch. de la Mediterranee*; 7,284 tons; 452x53-3x31-5; 696 n.h.p.; 15 knots; triple-expansion engines.

The steamship *Salta* was a former French ship taken over by the British Admiralty for use as a hospital ship. She struck a mine and sank half a mile N. of the Whistle Buoy, Havre, on April 10th, 1917. Fortunately the vessel had no wounded on board at the time but 86 of the R.A.M.C. personnel and crew were drowned.

SALTBURN

British Navy, fleet minesweeper; 1918; *Murdoch & Murray*; 710 tons; 231x28-7x7-5; 2,200 i.h.p.; 16 knots; triple-expansion engines; *Yarrow boilers*; one 4 in.A.A. gun, 1 smaller. The fleet minesweeper *Saltburn* foundered in a gale at Spithead in October, 1945. The vessel carried a complement of 73.

SALVATORE

M.Scuderi; 1921; *Collingwood S.B. Co.*; 2,150 tons; 260-9X 43-7x22-3; 310 n.h.p.; triple-expansion engines. The Italian steamship *Salvatore* was bombed and sunk by British aircraft on June 1st, 1944, between Piraeus and Crete.

SALVESTRIA

South Georgia Co.; 1913; *Workman, Clark & Co.*; 11,938 tons; 500-3x62-4x34-6; 977 n.h.p.; 11 knots; triple-expansion engines.

The tanker *Salvestria*, Capt. J. C. Jamieson, was mined and sunk two and three-quarter miles from Inchkeith Lighthouse on July 27th, 1940. Ten men were killed. Capt. Jamieson was among the survivors.

SALVIA

British Navy, sloop; 1916; *Irvine's Shipbuilding Co.*; 7,250 tons; 267-7x33-5x11-7; 2,400 i.h.p.; 17 knots; triple-expansion engines; two 4* 7 in. guns, two 3pdr.

The sloop *Salvia*, Lt. Cdr. W. Olphert, D.S.O., D.S.C., R.N.R., was disguised as a gship when she was attacked by a German submarine off the west coast of Ireland on June 20th, 1917. The action took place at about 7 o'clock in the morning and *Salvia*, known as *Q-15*, was struck well aft on the starboard side by the enemy torpedo. The submarine had not been sighted by the sloop's lookout and there was no opportunity to fight as the 4 in. gun was blown overboard and the engines disabled by the explosion. The crew took to the boats but Cdr. Olphert was taken to Germany by the submarine as a prisoner of war.

SALVIA

British Navy, corvette; 1940; *W. Simons & Co.*; 925 tons; 193x32x16; 17 knots; quadruple-expansion engines; one 4 in.A.A. gun, several smaller.

The corvette *Salvia*, Lt. Cdr. J. I. Miller, D.S.O., D.S.C., R.D., R.N.R., was torpedoed by a German submarine off the coast of Egypt on December 24th, 1941. The vessel's official complement was 85.

SALVUS

W. H. Seager & Co. Ltd.; 1928; *Northumberland S.B. Co.*; 4,815 tons; 400x55x25; 430 n.h.p.; 10knots; triple-expansion engines.

The steamship *Salvus*, Capt. W. L. Brett, was bombed and sunk by a German aircraft on April 4th, 1941, between Sheringham and Wells on the coast of Norfolk. Of those on board four men were killed. Capt. Brett was among the survivors.

SALZBURG

Harald Schuldt & Co. K.G.; 1921; N.V. Scheepswerf v/h De Groot & Van Vliet; 1,742 tons; 279-2x32-2x17-8; 241n.h.p.; triple-expansion engines.

The German steamship *Salzburg* was sunk by the Russians on October 1st, 1942, on a voyage from Burghaz to Odessa.

SAM HOUSTON

U.S. War Shipping Administration; 1942; Houston S.B. Corp.; 7,176 tons; 422-8x57x34-8; 339n.h.p.; triple-expansion engines.

The steamship *Sam Houston* was torpedoed and sunk by a German submarine on June 28th, 1942, on a voyage from Houston to Table Bay. Eight of her crew were killed.

SAMA

Chr. Gundersen & Co.; 1937; A/B Lindholmens Varv.; 1799 tons; 306-7x40-4x15-6; 541 n.h.p.; oil engines. The Norwegian motorship *Sama* was torpedoed and sunk by a German submarine on February 22nd, 1942, on a voyage from Cardiff to St. John, N.B. Seventeen of her crew and three passengers were killed.

SAMALA

Elders & Fyffes Line; 1928; Cammell Laird & Co.; 5,390 tons; 400-4x51-4x30-4; 447n.h.p.; 13-5 knots; triple-expansion engines.

The steamship *Samala*, Capt. A. E. Harvey, left Kingston, Jamaica, on September 18th, 1940, for Garston with a crew of 65, one gunner and two passengers. Nothing more was ever heard of the ship and she was considered to have been lost by war causes.

SAMBO

Ministry of War Transport (Cunard-White Star); 1943; California S.B. Co.; 7,176 tons; 422-8x57x34-8; 339n.h.p.; triple-expansion engines.

The British steamship *Sambo*, on a voyage from Iquique and Wellington to Suez, was sunk by mine or torpedo on November 10th, 1943, ten miles S. of Perim. Three of her crew and nine gunners were lost.

SAMBUT

Ministry of War Transport (P. Render son & Co.); 1943; Oregon S.B. Corp.; 7,219 tons; 422-8x57x34-8; 339n.h.p.; triple-expansion engines.

The British steamship *Sambut*, on a voyage from the Thames to the Normandy beaches with 580 troops and army vehicles, was sunk by gunfire on June 6th, 1944, when passing Dover. About 80 lives were lost.

SAMIDARE

Japanese Navy, destroyer; 1935; Uruga; 1,368 tons; 335 -5x31-8 x 9 - 3; 38,000 s.h.p.; 34 knots; turbine engines; Kanpon boilers; five 5 in. guns, 2 m.g., 8T.T.

The Japanese destroyer *Samidare* fought an action off the Palau Islands with the U.S. aircraft carrier *San Jacinto* and the submarine *Bat fish* on August 26th, 1944. The destroyer was sunk by bombs and torpedoes. Her normal complement was 180.

SAMIR

V. Bassili; 1909; Ropner & Sons; 3,702 tons; 346-5x51x23-3; 301 n.h.p.; triple-expansion engines.

The Egyptian steamship *Samir* was torpedoed and sunk by a German submarine on August 17th, 1942, off the coast of Cuba on a voyage from Cristobal to Guantanamo Bay.

SAMKEY

Ministry of War Transport (New Zealand Shpg Co.); 1943; Bethlehem Shipyard; 7,219 tons; 422-8x57x34-8; 11 knots; triple-expansion engines.

On January 24th, 1948, the *Samkey* with a crew of 43 left London for Cuba, having taken on board 1,500 tons of Thames ballast—a mixture of small stones and sand.

On January 29th the s.s. *Innesmoor* reported sighting the *Samkey*, which was then steaming on her course without any sign of trouble. On the 31st she radioed to Horta in the Azores that she was in

lat. 41.48 N., long. 24 W., and that there was a strong S.W. wind. This was the last message received from her. No trace of her was found by vessels on roughly the same course on, or around the date on which the messages ceased.

It is possible that in worsening weather the *Samkey* was struck by heavy seas which caused the ballast to shift and give the vessel a list, which could increase in degree until finally she rolled over and sank.

SAMNANGER

Westfal, Larsen & Co. AJS; 1918; Canadian Vickers; 4,276 tons; 380-7x49-2x26-8; 333n.h.p.; triple-expansion engines. The Norwegian steamship *Samnanger* was torpedoed and sunk by a German submarine on December 21st, 1940, on a voyage from Oban to Pepel, with the loss of 30 lives.

SAMOA

Jacobsen & Than; 1886; Russell & Co.; 1,138 tons; 214-6x35-1x21-2.

The Norwegian sailing ship *Samoa* was sunk by a German submarine in the Western Atlantic on June 14th, 1918.

SAMOS

Deutsche Levante Linie; 1922; A& Neptun; 2,576 tons; 311 -1X 46 • 1 x 19 • 7; 200 n.h.p.; triple-expansion engines. The German steamship *Samos* struck a mine and sank on April 17th, 1941, one mile from Benghazi.

SAMOS

D. Inglessi Fils, Soc. Anon.; 1889; Earless Co.; 1,208 tons; 240x30x14-6; 210 n.h.p.; triple-expansion engines. The Greek steamship *Samos* was torpedoed and sunk by a German submarine on October 17th, 1941, between Alexandria and Tobruk. Twenty-four of her crew, three gunners and four passengers were killed.

SAMPA

Ministry of War Transport (Houlder Bros. & Co.); 1943; Bethlehem Fair field Shipyard; 7,219 tons; 422-8x57x34-8; 339 n.h.p.; 11 knots; triple-expansion engines. The steamship *Sampa*, Capt. H. Neale Sherwell, was about one and a half miles N. of the North Foreland No. 9 Buoy at 5.12 p.m. on February 27th, 1945, in convoy, when she struck a mine. The explosion broke the ship's back, blowing out part of the port side, destroying the saloon and other cabins and blowing the captain from the bridge into the sea. The *Sampa* carried a crew of 53 and nine passengers. Of these 12 were killed outright by the explosion and four died later. Capt. Sherwell was picked up and landed at Southend. Mr. J. Allerton, the first officer, took command of the ship and transferred the wounded to H.M. destroyer *Middleton* which conveyed them to Sheerness. The *Sampa* sank within 15 minutes of striking the mine.

For his gallantry on this occasion Mr. Allerton was later awarded the O.B.E.

SAMPHIRE

British Navy, corvette; 1940; W. Simons & Co.; 925 tons; 193x32x16; 2,750 i.h.p.; 17 knots; quadruple-expansion engines; one 4 in. gun, six 20 mm.

The corvette *Samphire*, Lt. Cdr. F. T. Renny, D.S.C., R.D., R.N.R., was torpedoed by an enemy submarine off Bougie on January 30th, 1943. Three officers, including Lt. Cdr. Renny, and 42 ratings were killed.

SAMSIP

Ministry of War Transport (New Zealand Shipping Co.); 1943; Bethlehem Fair field Shipyard; 7,219 tons; 422-8x57x34-8; 339 n.h.p.; 10 knots; triple-expansion engines. The steamship *Samsip*, Capt. E. A. Quick, struck a mine and sank on December 7th, 1944, at the entrance to the Scheldt. Seven persons were killed. Capt. Quick was among the survivors.

SAMSUVA

Ministry of War Transport (Sir R. Ropner & Co.); 1943; New England S.B. Corp.; 7,219 tons; 422-8x57x34-8; 339 n.h.p.; 10 knots; triple-expansion engines.

The steamship *Samsuva* with a cargo of timber was proceeding in

SAMTAMPA

convoy from North Russia on September 29th, 1944, when she was torpedoed and sunk by an enemy submarine, the *Samsuva* was about 150 miles off North Cape.

SAMTAMPA

Houlder Bros. & Co.; 1943; *New England S.B. Corp.*; 7,219 tons; 422-8x57x34-8; triple-expansion engines. The British steamship *Samtampa* was driven ashore and wrecked in very severe weather at Sker Point, Porthcawl, on April 23rd, 1947. She was on a voyage in ballast from Middlesbrough to Newport. All her crew of 39 were drowned. The Mumbles lifeboat put out to the ship but capsized in the heavy seas and all the crew were drowned.

SAMUEL B. ROBERTS

United States Navy, destroyer; 1943; *U.S. Yards*; 1,450 tons; 306x36-9x—; 12,000s.h.p.; 28 knots; turbine engines; two 5 in. guns, two 40 mm. A.A., six 20 mm. A.A., 3 T.T. The United States destroyer *Samuel B. Roberts* was sunk in action with Japanese warships off Samar in the battle of Leyte Gulf on October 25th, 1944. The vessel carried a complement of 220.

For full story of the action see under the Japanese battleship *Musashi*.

SAMUEL GOMPERS

U.S. War Shipping Administration; 1942; *California S.B. Corp.*; 7,176 tons; 423 x57x34-9; 339 n.h.p.; triple-expansion engines. The steamship *Samuel Gompers* was torpedoed and sunk by a Japanese submarine on January 30th, 1943, on a voyage from Noumea to Newcastle, N.S.W. Fifty-six survivors eventually landed at Noumea.

SAMUEL HEINTZELMAN

U.S. War Shipping Administration; 1942; *California S.B. Corp.*; 7,176 tons; 422-8x57x34-8; 339 n.h.p.; triple-expansion engines.

The American steamship *Samuel Heintzelman* left Fremantle on July 1st, 1943, bound for Colombo and Karachi. Nothing more was heard of the ship or her crew until wreckage bearing her name was washed ashore in September at Diego Garcia Island. She was considered to have been sunk by a raider in about latitude 28° 30' S., longitude 105° E.

SAMUEL HUNTINGTON

U.S. War Shipping Administration; 1942; *Richmond S.B. Corp.*; 7,181 tons; 422-8x57x34-8; 339 n.h.p.; triple-expansion engines.

The steamship *Samuel Huntington* was bombed by German aircraft on January 29th, 1944, off Anzio, during the Allied landings. She caught fire, blew up and sank.

SAMUEL J. TILDEN

U.S. War Shipping Administration; 1942; *Oregon S.B. Corp.*; 7,176 tons; 422-8x57x34-8; 339 n.h.p.; triple-expansion engines.

The American steamship *Samuel J. Tilden*, Capt. Joseph L. Blair, was bombed and sunk by German aircraft on December 2nd, 1943, off Bari. She was carrying 209 service passengers and a deck cargo of gasoline in drums, which was ignited by the bombs. Ten of her crew and an unspecified number of passengers were lost.

SAMUEL Q. BROWN

Tide Water Associated Oil Co.; 1921; *Merchant S.B. Corpn.*; 6,625 tons; 424-4x58-2x32-9; 584 n.h.p.; triple-expansion engines.

The American tanker *Samuel Q. Brown* was torpedoed and sunk by a German submarine on May 23rd, 1942, between New Orleans and Cristobal.

SAMUI

Japanese Government; 1936; *Hakodate Dock Co.*; 1,458 tons; 240 X39x16-3; 318 n.h.p.; oil engines.

The tanker *Samui* was formerly Siamese, seized by the Japanese. She was torpedoed and sunk by a U.S. submarine on March 17th, 1945, off Tringano, Malaya.

SAMVERN

Ministry of War Transport (Wm. Thomson & Co.); 1943; *Bethlehem Fair field Shipyard*; 7,219 tons; 422-8x57x34-8; 339 n.h.p.; 11-5 knots; triple-expansion engines. The steamship *Samvern*, Capt. Thomas Mcl. Blaikie, on a voyage from Antwerp to London in convoy, struck a mine and sank off the Belgian coast at about 7.30 p.m. on January 18th, 1945. The explosion occurred on the port side and both lifeboats there were smashed. The *Samvern* carried a crew of 63 together with a number of army personnel returning home. Immediately the full extent of the damage was ascertained and it was beyond doubt that the vessel could not be saved orders were given to abandon ship in the remaining boats. One of these, the after starboard lifeboat, capsized in the darkness and drifted away with a number of men clinging to her keel. She was never seen again. A few men swam to the captain's boat and were picked up.

The number lost was 16, of whom seven were crew. Capt. Blaikie was among the survivors who were landed at Tilbury on the following evening.

SAN ANDRES

O.Thoresen; 1911; *Wood, Skinner & Co.*; 1,656 tons; 270x40-8x18-3; 225 n.h.p.; triple-expansion engines. The Norwegian steamship *San Andres* was torpedoed and sunk by a German submarine in the Bristol Channel on May 11th, 1918.

SAN ANTONIO

German Government; 1930; *Harland & Wolff*; 6,013 tons; 431-5x57-3x26-7; 577 n.h.p.; triple-expansion engines. The steamship *San Antonio* was formerly French, taken over by the Germans. On May 5th, 1943, she was bombed and sunk by Allied aircraft off Cape St. Vito, near Taranto.

SAN ANTONIO

A. Magsaysay Inc.; 1932; *Swan, Hunter & Wigham Richardson*; 1,960 tons; 246-1 x37-7x19; triple-expansion engines. The Philippine steamship *San Antonio* on a voyage from Hong Kong to Shanghai, struck a mine and sank on July 24th, 1950, at Woosung, Yangtze River.

SAN ARCADIO

Eagle Oil & Shipping Co.; 1935; *Harland & Wolff*; 7,419 tons; 460x66x32; 3,500b.h.p.; 13-25knots; oilengines. The motor tanker *San Arcadio*, Capt. W. F. Fynn, was 150 miles E. of New York on January 31st, 1942, when she was torpedoed by a German submarine. Soon afterwards the submarine surfaced and completed the destruction of the tanker by gunfire and a second torpedo. Forty-two men, including Capt. Fynn, were killed. The *San Arcadio* was not in convoy.

SAN BLAS

Balboa Shipping Co.; 1920; *Workman, Clark & Co.*; 3,601 tons; 325x46-3x29-2; 330 n.h.p.; triple-expansion engines. The Panamanian steamship *San Blas* was torpedoed and sunk by a German submarine on June 17th, 1942, 200 miles out from Galveson bound to Puerto Barrios. The captain and 32 of the crew were lost, 14 were saved.

SAN BLAS

Argentine Government; 1915; *Maryland Steel Co.*; 10,825 tons; 514-7x65-2x36-5; 1,283 n.h.p.; triple-expansion engines. The tanker *San Blas* caught fire after an explosion on September 27th, 1944, while lying at Central Dock, La Plata, loaded with petroleum. The fire could not be controlled and the tanker was completely burnt out.

SAN CALISTO

Eagle Oil & Shipping Co.; 1937; *Lithgows*; 8,010 tons; 462-8X61-2x33-1; 503 n.h.p.; 13-25 knots; oilengines. The motor tanker *San Calisto*, Capt. A. R. Hicks, struck a mine and sank two and a half miles S.W. of the Tongue lightship on December 2nd, 1939. Six men were killed and seven wounded. Capt. Hicks was among the survivors.

SAN CLEMENTE MARU

Mitsubishi Shoji Kaisha; 1937; Mitsubishi Jukogyo K.K.; 7,354 tons; 431-8x57-4x35-7; 839 n.h.p.; oil engines. The tanker *San Clemente Maru* was torpedoed and sunk by the U.S. submarine *Seal* on May 4th, 1943, E. of Angaur, Caroline Islands.

SAN DELFINO

Eagle Oil & Shipping Co.; 1938; Furness S.B. Co.; 8,072 tons; 463x61-2x33-1; 502 n.h.p.; 13-25knots; oilengines. The motor tanker *San Delfino*, Capt. A. E. Gumbleton, was ten miles E. of Whimble Shoal Buoy, off Cape Hatteras, North Carolina, on April 10th, 1942, when she was torpedoed and sunk by a German submarine. Twenty-eight men were killed and four wounded. Capt. Gumbleton was among the survivors. The tanker was not in convoy.

SAN DEMETRIO

Eagle Oil & Shipping Co.; 1938; Blythswood S.B. Co.; 8,073 tons; 463-2x61-2x33-1; 502 n.h.p.; 13-25knots; oilengines. The motor tanker *San Demetrio*, Capt. C. Vidot, O.B.E., was 80 miles E. of Chesapeake Buoy on March 17th, 1942, when she was torpedoed and sunk by a German submarine. Nineteen men were killed and six wounded. Capt. Vidot was among the survivors.

The *San Demetrio* was a unit of the famous *Jervis Bay* convoy which was attacked by the German pocket battleship *Admiral Scheer* on November 5th, 1940, and was unfortunate enough to be caught by the raider some hours after the convoy had dispersed. She immediately became a target and was shelled and set on fire. As she was carrying 9,000 tons of highly inflammable spirit at the time it was decided to abandon her and the crew took to the boats. Two days later one of these boats with Second Officer Arthur G. Hawkins in charge, with two engineers and 14 men, sighted the still burning *San Demetrio* and decided to attempt to board her. In this they were successful and after a most desperate ordeal succeeded in getting the fire under control and in starting the engines. The tanker's bridge had been destroyed and there were no charts, radio or navigating instruments. Second Officer Hawkins by most skilful seamanship brought the damaged vessel into the Clyde under her own power, declining the services of a tug.

Second Officer Hawkins was awarded the O.B.E. in recognition of his gallantry. For full story of the action see *Jervis Bay*.

SAN DIEGO

United States Navy, armoured cruiser; 1904; United States; 13,680 tons; 502 x69x 26; 23,000 i.h.p.; 22 knots; triple-expansion engines; Babcock & Wilcox boilers; four 8 in. guns, four 6 in., ten 3 in., 2 T.T. The armoured cruiser *San Diego*, Capt. Christy, was some ten miles off Fire Island, 50 miles from New York, on July 19th, 1918, when she struck a mine. She immediately began to sink and her crew of 1,189 officers and ratings were taken off by two steamships, save for six ratings who were killed by the explosion.

For some weeks German submarines had been active off the coast, and the mines had no doubt been sown by them.

The *San Diego* was the only large warship lost by the United States during the time she was a belligerent in the First World War, from April, 1917, until November, 1918.

SAN DIEGO

Compagnie Generale Transatlantique; 1930; Harland & Wolff; 6,013 tons; 431'5x57-3x26-7; 557n.h.p.; triple-expansion engines.

The French steamship *San Diego* was bombed and sunk by British aircraft on April 6th, 1943, off Bizerta.

SAN DUNSTANO

Eagle Oil Transport Co.; 1912; Swan, Hunter & Wigham Richardson; 6,238 tons; 420-2x54-5x30-9; 486 n.h.p.; triple-expansion engines.

The British tanker *San Dunstano* was wrecked at the entrance to Tampico on October 13th, 1929. She had a cargo of crude oil.

SAN EMILIANO

Eagle Oil & Shipping Co.; 1939; Harland & Wolff; 8,071 tons; 463-2x61-2x33-1; 502n.h.p.; 13-25 knots; oilengines. The motor tanker *San Emiliano*, Capt. J. W. Tozer, was some

450 miles W. of Trinidad on August 9th, 1942, when she was torpedoed and sunk by a German submarine. Capt. Tozer and 39 of the crew were killed and six wounded. The tanker was not in convoy.

SAN FABIAN

Eagle Oil & Shipping Co.; 1922; Armstrong, Whitworth & Co.; 13,031 tons; 530-5x69-4x42-2; 978 n.h.p.; 10 knots; turbine engines.

The tanker *San Fabian*, Capt. L. G. Ernmott, on a voyage from Curasao to Key West with 18,000 tons of fuel oil, was some 25 miles S. of Navassa Island on August 28th, 1942, when she was torpedoed and sunk by an enemy submarine.

Twenty-six men were lost with the ship and 34 picked up, one of whom died from injuries.

SAN FERNANDO

Eagle Oil & Shipping Co.; 1919; Armstrong, Whitworth & Co.; 13,056 tons; 530-4x69-4x42-2; 958 n.h.p.; 10 knots; turbine engines.

The tanker *San Fernando*, Capt. A. R. Buckley, homeward bound from Curasao, was torpedoed and sunk by a German submarine on June 21st, 1940, about 240 miles S.W. of the Lizard. There were no casualties.

SAN FLORENTINO

Eagle Oil & Shipping Co.; 1919; Swan Hunter & Wigham Richardson; 12,842 tons; 530-4x68-6x42; 958 n.h.p.; 10 knots; turbine engines.

The tanker *San Florentino*, Capt. R. W. Davis, was some 1,200 miles E.N.E. of Newfoundland on October 1st, 1941, when she was torpedoed by a German submarine. She was torpedoed again the following day but remained afloat until sunk by gunfire from a U.S. warship. Capt. Davis and 21 of the crew were killed and three wounded.

SAN FRANCISCO

Aspinwall Line; 1853; W. H. Webb & Co., New York; 2,000 tons (approx.); side lever.

The paddle steamship *San Francisco*, Capt. J. T. Watkins, was a new vessel. She was chartered as a troopship by the U.S. government to carry eight companies of artillery to California. On December 21st, 1853, she left New York having on board 16 officers and 498 artillerymen, with their wives and children, in addition to the crew, making a total of 750. The ship was loaded to the limit, part of the steerage being filled with cargo. This last circumstance was particularly unfortunate as the soldiers were confined in such meagre and ill ventilated quarters that fever broke out before the ship was many days out. For the first two days of the voyage the weather was fine, but on the 23rd the ship met with a full gale during which the engines were disabled, all the boats washed away and the upper saloon and promenade deck carried overboard. The masts and both funnels soon followed and on the 26th, when only five days out, the *San Francisco* was sighted by the *Maria Freeman* with the decks swept bare and apparently helpless.

On the 28th the barque *Kilby* fell in with the troopship and took off about 100 passengers and a quantity of stores. For the next two days the *San Francisco* continued to drift in a derelict condition, but on the 30th was sighted by the ship *Three Bells*. This vessel was unable to render aid owing to the gale, but stood by until January 3rd, when the sailing ship *Antarctic* came up and both ships made an attempt to save the survivors. After great efforts the *Three Bells* took on board from 180 to 200 persons and the *Antarctic* 176 persons; the former ship then proceeded to New York and the latter to Liverpool. Soon after she was abandoned the *San Francisco* foundered. Capt. Watkins was among the survivors.

Three hundred persons were lost of whom 59 died from fever.

SAN FRANCISCO

Compagnie Generale Transatlantique; 1930; Harland & Wolff; 6,013 tons; 431'5x57-3x26-7; 557n.h.p.; triple-expansion engines.

The French steamship *San Francisco* was bombed and sunk by British aircraft on July 14th, 1943, 35 miles W. of Cape Corso, Corsica.

SAN FRANCISCO MARU

SAN FRANCISCO MARU

Yamashita Risen K.K.; 1919; *Kawasaki Dockyard Co.*; 5,831 tons; 385 x 51 x 36; 440 n.h.p.; triple-expansion engines. The steamship *San Francisco Mam* was sunk by U.S. carrier based aircraft on February 17th, 1944, in the Caroline Islands.

SANFRATERNO

Eagle Oil Transport Co.; 1913; *Swan, Hunter & Wigham Richardson*; 11,929 tons; 527-3x66-6x42-7; 787n.h.p.; quadruple-expansion engines.

The British tanker *San Fraterno* struck a rock and sank at Bonet Island, near Carlos Island, Strait of Magellan, on July 29th, 1927. She was on a voyage in ballast from Buenos Aires to Los Angeles.

SANGERARDO

Eagle Oil & Shipping Co.; 1922; *Palmers' Co.*; 12,915 tons; 530-2x68-5x42-1; 913n.h.p.; 10 knots; turbine engines. The tanker *San Gerardo*, Capt. S. Foley, was some 700 miles off Cape Hatteras, North Carolina, on March 31st, 1942, when she was torpedoed and sunk by a German submarine. Capt. Foley and 50 others were lost. The tanker was not in convoy.

SAN GIL

Balboa Shipping Co.; 1920; *Workman, Clark & Co.*; 3,598 tons; 325x46-3x29-2; 330 n.h.p.; triple-expansion engines. The Panamanian steamship *San Gil* was torpedoed, shelled and sunk by a German submarine on February 3rd, 1942, on a voyage from Santa Marta, Colombia, to Philadelphia.

SANGIORGIO

Italian Navy armoured cruiser; 1908; *CasteUammare Dockyard*; 9,232 tons; 462-2x69x22-7; 18,000 i.h.p.; 22 knots; triple-expansion engines; *Blechynden boilers*; four 10 in. guns, eight 7-5 in., sixteen 3 in., 6 m.g., 2 T.T.

On the entry of Italy into the Second World War the armoured cruiser *San Giorgio*, which had been relegated to the duties of a gunnery training ship, was sent to Tobruk to act as guard ship. She was moored in the harbour within a protected basin so that she would be impervious to torpedo attack. It was not, however, from this quarter that danger threatened, but from the air. After repeated attacks by R.A.F. bombers and naval aircraft she was set on fire. When the British forces entered the town for the first time on January 21st, 1941, they found that the *San Giorgio* had been destroyed.

SANGUGLIELMO

Transoceanica Soc. Italiana di Nav.; 1911; *D. & W. Henderson & Co.*; 8,145 tons; 470x56-2x33-5; 1,033n.h.p.; triple expansion engines.

The Italian steamship *San Guglielmo* was torpedoed and sunk by a submarine in the Mediterranean on January 8th, 1918.

SAN JACINTO

Agwilines Inc.; 1903; *Delaware River Co.*; 6,069 tons; 380x53 x 24 • 7; 564 n.h.p.; triple-expansion engines. The American steamship *San Jacinto* was torpedoed and sunk by a German submarine on April 22nd, 1942, 300 miles S.W. of the Bermudas on a voyage from New York to San Juan, Puerto Rico. Five of her crew and nine passengers were lost.

SAN JOSE

Pacific Mail S.S. Co.; 1882; *J. Roach & Son*; 2,135 tons; 283x37x21; 235 n.h.p.; compound engines. The American steamship *San Jose*, on a voyage from Balboa to San Francisco, was wrecked on Asuncion Island, Lower California, on August 9th, 1921.

SAN JOSE

United Fruit S.S. Corp.; 1904; *Workman, Clark & Co.*; 3,358 tons; 330 X 44 -6 x 31 -6; 320 n.h.p.; triple-expansion engines. The American steamship *San Jose* was sunk in a collision with the steamship *Santa Elisa*, 8,379 tons, on January 17th, 1942, off Atlantic City, on a voyage from Puerto Barrios to New York.

SAN JUAN

Los Angeles-San Francisco Nav. Co.; 1882; *J. Roach & Son*; 2,152 tons; 283x37x21; 235n.h.p.; .10 knots; compound engines.

The American steamship *San Juan*, Capt. A. Aslund, was on a voyage from San Francisco to Los Angeles with 55 passengers and 45 crew, when she ran into dense fog off Pigeon Point, California. At about midnight on August 29th, 1929, she was in collision with the Standard Oil Co.'s tanker *S. C. T. Dodd* and foundered in a very few minutes. The *S. C. T. Dodd* lowered her boats and made a search for survivors, in which she was assisted by the s.s. *Munami* and the motorship *Frank Lynch*.

After sweeping the area for some time the ships picked up a total of 35 persons between them. Capt. Aslund was among the drowned.

SAN LUIS MARU

Mitsubishi Shoji Kaisha; 1928; *Mitsubishi Zosen Kaisha*; 7,268 tons; 430-1x57x34-5; 582 n.h.p.; oilengines. The tanker *San Luis Maru* was bombed and sunk by U.S. carrier-based aircraft on January 12th, 1945, 25 miles N.E. of Binh Dinh, Indo-China.

SAN MARCO

Soc. Anon. Cooperativa di Nav. Garibaldi; 1919; *Wood, Skimmer & Co.*; 3,076 tons; 340-1x46-7x23-2; 310 n.h.p.; triple-expansion engines.

The Italian steamship *San Marco* was torpedoed and sunk by a British submarine on June 1st, 1941, five miles from Cape Bonara, Sardinia.

SAN MARTINO

Italian Navy, destroyer; 1920; *Orlando*; 862 tons; 256-5x24-7x8-5; 22,000 s.h.p.; 32 knots; turbine engines; *Thorny-craft boilers*; four 4 in. guns, two 3 in.A.A., 4 m.g. 4 T.T. The Italian destroyer *San Martino* was sunk by the Germans to prevent her escaping from Piraeus to Alexandria on September 8th, 1943, the date of Italy's surrender to the Allies. Later she was refloated and recommissioned by the Germans and was finally sunk by British aircraft at Piraeus on October 12th, 1944.

SAN MATTEO

M.Scuderi; 1904; *W. Doxford & Sons*; 3,757 tons; 349-4 x 46-6x24-3; 300 n.h.p.; triple-expansion engines. The Italian steamship *San Matteo*, on a voyage from Gdynia to Italy with coal, was wrecked on the Stolp Bank, 17 miles N. of Stolpmunde, on January 28th, 1937, in a heavy gale. All 40 of her crew were drowned.

SAN MIGUEL

O.Thoresen; 1908; *Wood, Skinner & Co.*; 1,659 tons; 251-5X 36-1x21-2; 195 n.h.p.; triple-expansion engines.

The Norwegian steamship *San Miguel* struck a mine and sank in the North Sea on November 18th, 1915.

SAN NICOLAS

Lago Shipping Co.; 1926; *Harland & Wolff*; 2,391 tons; 305-7x50-2x14-3; 196 n.h.p.; triple-expansion engines. The British tanker *San Nicolas*, on a voyage from Lake Maracaibo to Aruba, was torpedoed and sunk by a German submarine on February 16th, 1942, 25 miles S.W. of Punta Macolla. Seven of her crew of 26 were lost.

SAN PEDRO MARU

Mitsubishi Shoji Kaisha; 1927; *Mitsubishi Zosen Kaisha*; 7,268 tons; 430x57x34-5; 593 n.h.p.; oilengines. The tanker *San Pedro Maru* was torpedoed and sunk by the U.S. submarine *Jackon* on June 25th, 1944, off Masinlok, Philippines.

SAN RAMON MARU

Mitsubishi Shoji Kaisha; 1935; *Mitsubishi Jukogyo K.K.*; 7,309 tons; 431-5x57-4x35-8; 699 n.h.p.; oilengines. The tanker *San Ramon Maru* was torpedoed and sunk by the U.S. submarine *Seahorse* on November 27th, 1943, 75 miles N.W. of Nagasaki.

SAN SABA

Mallory S.S. Co.; 1879; J. Roach & Son; 2,458 tons; 306X 39-6x21 -6; 283 n.h.p.; compound engines. The American steamship *San Saba* struck a mine and sank in the Western Atlantic on October 4th, 1918.

SAN VICTORIO

Eagle Oil & Shipping Co.; 1942; Blythwood Shipbuilding Co.; 8,136 tons; 463-2x61-2x33-1; 502 n.h.p.; 12 knots; oil engines.

The motor tanker *San Victorio*, Capt. S. Perry, left Aruba on May 15th, 1942, for Freetown and the U.K. with 12,000 tons of benzine and paraffin. At 12.15 a.m. on the 17th she was torpedoed twice by a German submarine and caught fire. Only five men got away from the ship and of these one man was picked up after 16 hours in the water.

SANA MARU

Japanese Government; 1913; Fore River S.B. Co.; 3,365 tons; 348'7x45-1x25-4; 372 n.h.p.; triple-expansion engines. The steamship *Sana Maru* was formerly the Panamanian *Norse Carrier*, seized by the Japanese at Shanghai in December, 1941. She was torpedoed and sunk by the U.S. submarine *Kingfish* on October 20th, 1943, off the east coast of Indo-China.

SANAE

Japanese Navy, destroyer; 1923; Uraga; 820 tons; 275 x 26-5x8-3; 21,500 s.h.p.; 31-5 knots; turbine engines; Kanpon boilers; three 4 • 7 in. guns, 2 m.g.

The Japanese destroyer *Sanae* was torpedoed and sunk in the Celebes Sea by the U.S. submarine *Bluefish* on November 18th, 1943. The destroyer's normal complement was 110.

SANANDREA

Polena Societd di Navigazione; 1908; Armstrong, Whit worth & Co.; 5,077 tons; 400x50-7x30-4; 443 n.h.p.; triple-expansion engines.

The Italian tanker *Sanandrea* was bombed and sunk by British aircraft on August 30th, 1942, near Santa Maria de Leuca.

SANCHEZ BARCAISTEGUI

Spanish Navy, sloop; 1876; Spain; 935 tons; 203-5x29-5x12-1; 1,100i.h.p.; 13 knots; compound engines; three 6 in. guns, (all m./r.), 2 m.g.

The Spanish sloop-of-war, *Sanchez Barcaistegui*, Capt. Ibanez, was acting flagship of the Havana Station, Cuba, in September 1895. She was wearing the flag of Rear-Admiral Delgado Parejo, and carried a complement of 150. On the night of September 18th, the ship left Havana on a tour of inspection, her first call being the Roca Canal. At just after midnight on the morning of the 19th she was off Cape Mora when her green starboard light was sighted by the passenger steamship *Mortera*, then approaching the harbour entrance. The *Mortera* slowed down and the sloop gave two blasts on her siren, to which the passenger ship replied and proceeded on her course intending to pass green light to green light. It was while on this course that the *Sanchez Barcaistegui's* lights went out, leaving the captain of the *Mortera* in some uncertainty as to what were her intentions. When next he sighted the sloop she was athwart his bows, her engines reversed and no lights visible. There was no hope of avoiding a collision and the *Sanchez Barcaistegui* was struck heavily on the port bow, her boilers exploded from the force of the impact, and she began to sink.

The *Mortera* lowered her boats, and endeavoured to push the stricken warship ashore. This last operation was not successful and the *Mortera* backed away with fatal results, for the warship immediately sank.

Admiral Parejo, Capt. Ibanez and 27 others were drowned.

An inquiry revealed that the chief reason for the collision was that a sailor on board the warship had caught his arm in the generating machinery and that the engines had been stopped and the lights extinguished to enable him to be released.

SANCT SVITHUN

Det Stavangerske D/S; 1927; International S.B. & E. Co.; 1,376 tons; 225-9x35-2x21-3; 149 n.h.p.; compound engines. The Norwegian steamship *Sanct Svithun*, under German control,

was bombed by British aircraft and set on fire on September 30th, 1943, near Kobbholmen Island, Norway. The burning ship drifted ashore and was wrecked. Seventeen of her crew and 26 passengers were killed.

SANCT SVITHUN

Det Stavangerske D/S; 1950; Cantieri Navali Riuniti; 2,172 tons; 267-6x41x14-8; oilengines.

On the night of Sunday, October 21st, 1962, the Norwegian motor vessel *Sanct Svithun*, running from Bergen to Kirkenes, was putting into the small port of Rorvik in northern Norway to land a single passenger when she ran on one of the skerries outside the harbour. There was a strong wind and blinding rain. The ship came off the rocks but was badly holed and began to sink and had to be abandoned.

Sixteen crew and 14 passengers in two boats landed at Nordoyan Lighthouse, the remaining four boats and one raft were picked up by ships and fishing boats in the vicinity.

Altogether 48 persons were saved, 35 bodies recovered but four of the crew and two passengers were missing.

SANCTORIA

Bengal Coal Co.; 1904; W. Doxford & Sons; 3,709 tons; 342X46-6x24-7; 300 n.h.p.; triple-expansion engines. The British steamship *Sanctoria* was wrecked on James and Mary Shoal, River Hooghly, on March 22nd, 1919. She was on a voyage from Rangoon to Calcutta carrying a cargo of rice.

SANDANGER

Westfal-Larsen & Co. A/S; 1938; J. L. Thompson & Sons; 9,432 tons; 483-6x68-3x36-2; 980 n.h.p.; oil engines. The Norwegian motorship *Sandanger* was torpedoed and sunk by a German submarine on May 12th, 1943, on a voyage from New York to Swansea. Twenty of her crew were killed.

SANDHURST

Watts, Watts & Co.; 1897; Blyth Shipbuilding Co.; 3,034 tons; 324-7x47x22-4; 280 n.h.p.; 9-5 knots; triple-expansion engines.

The steamship *Sandhurst* was torpedoed and sunk by a German submarine six miles N.W. by W. i W. of Corsewall Point on May 6th, 1918. Twenty men were killed. The captain was among the survivors.

SANSEND

Rowland & Marwoods S.S. Co.; 1925; W. Pickersgill & Sons; 3,612 tons; 348x50x22-9; 315 n.h.p.; 10 knots; triple-expansion engines.

The steamship *Sansend*, Capt. W. Armstrong, was torpedoed and sunk by a German submarine in the North Atlantic about 300 miles W.N.W. of Rockall on October 18th, 1940. Five men were killed. Capt. Armstrong was among the survivors.

SANJU MARU

Yamashita Kisen K.K.; 4,642 tons.

The steamship *Sanju Maru* was torpedoed and sunk by the U.S. submarine *Bluegill* on August 7th, 1944, off the south coast of Mindanao, Philippines.

SANKA MARU

Oguri Kisen K.K.; 1918; Mitsui Bussan Kaisha; 2,495 tons; 284-5x42-5x23; 162n.h.p.; triple-expansion engines. The steamship *Sanka Maru* was torpedoed and sunk by the U.S. submarine *Kete* on March 10th, 1945, about 100 miles N.W. of Amami O., Ryukyu Islands.

SANKISAN MARU

Kaburagi Kisen K.K.; 4,776 tons.

The steamship *Sankisan Maru* was sunk by U.S. carrier-based aircraft on February 17th, 1944, in the Caroline Islands.

SANKO MARU

Dairen Kisen K.K.; 1939; Osaka Iron Works; 5,461 tons; 396-3x53-8x30-5; 550n.h.p.; turbine engines. The tanker *Sanko Maru* was bombed and sunk by U.S. land-based aircraft on February 16th, 1944, N.W. of Kavieng, New Ireland.

SANKO MARU

SANKO MARU

Yamashita Kisen K.K.; 5,948 tons.
The tanker *Sanko Maru* was sunk by U.S. carrier-based aircraft on January 16th, 1945, about 50 miles S. of Hong Kong.

SANRAKUMARU

Japanese Government; 3,000 tons.
The tanker *Sanraku Maru* was torpedoed and sunk by the U.S. submarine *Trout* on June 15th, 1943, off the north-east coast of Borneo.

SANSEI MARU

Dairen Kisen K.K.; 1931; *Mitsui Bussan Kaisha*; 3,267 tons; 336-2x48-5x24; 271 n.h.p.; oil engines.
The motorship *Sansei Maru* was torpedoed and sunk by the U.S. submarine *Sawfish* on December 8th, 1943, 50 miles N. of Iwojima, Japan.

SANSEI MARU

Yamashita Kisen K.K.; 1936; *Uraga Dock Co.*; 2,386 tons; 284-9x42-9x21-4; 400n.h.p.; compound engines & L.P. turbine.
The steamship *Sansei Maru* was torpedoed and sunk by the U.S. submarine *Sealion II* on June 28th, 1944, about 50 miles W. of Sasebo, Japan.

SANSHO MARU

Yamashita Kisen K.K.; 6,862 tons.
The steamship *Sansho Maru* was torpedoed and sunk by the U.S. submarine *Croaker* on August 24th, 1944, about 50 miles N.W. of Mokpo, Korea.

SANSU

Elder, Dempster & Co.; 1901; *Tyne Iron S.B. Co.*; 2,495 tons; 325 x 45 -1 x 19 • 6; 252 n.h.p.; triple-expansion engines. The British steamship *Sansu* sank after striking rocks at Cesstown, Kroo Coast, on January 9th, 1908. She was carrying a cargo which included palm kernels and cocoa from the west coast of Africa to Hamburg.

SANT ANNA

Cie. Frangaise de Navigation a Vapeur; 1910; *Forges & Chantiers de la Mediterranee*; 9,350 tons; 470x56-4x42-7; 900n.h.p.; triple-expansion engines.
The French steamship *Sant Anna* was torpedoed and sunk by a submarine in the Mediterranean on May 11th, 1918.

SANT' ANTIOCO

Azienda Carboni Italiani; 1919; *Bethlehem S.B. Corp.*; 5,048 tons; 393-7x52-3x27; 486n.h.p.; triple-expansion engines. The Italian steamship *Sant' Antioco* was torpedoed and sunk by a British submarine on December 15th, 1942, off Sicily.

SANT' ANTONIO

Italian Government; 1919; *Lloyd Royal Beige (Great Britain)*; 1,480 tons; 240-3x36-1 x 19-1; 172n.h.p.; triple-expansion engines.
The steamship *Sanf Antonio* was formerly the Yugoslav *Anton*, seized by the Italians. On June 23rd, 1942, she was torpedoed and sunk by a British submarine about 45 miles N. of Sirte, Libya.

SANTA AMALIA

Eagle Oil Transport Co.; 1906; *Russell & Co.*; 4,306 tons; 384-9x49-8x18-4; 400n.h.p.; 10 knots; triple-expansion engines.
The tanker *Santa Amalia* was torpedoed and sunk by a German submarine 30 miles N. by E. \ E. of Malin Head, Co. Donegal, on December 28th, 1917. Forty-three men, including the captain were lost.

SANTA CRUZ

Oldenburg-Portugiesische Dampfs. Rhederei; 1938; *Deutsche Werft A.G.*; 3,862 tons; 379-7x54-8x23-8; 918n.h.p.; turbine engines.
The German steamship *Santa Cruz* had been fitted out as an armed commerce raider, operating in the Far East. On November 30th, 1942, she caught fire in Yokohama Harbour and blew up and sank.

SANTA ELENA

Grace Line; 1933; *Federal S.B. & D.D. Co.*; 9,135 tons; 484-4x72-2x25-8; turbine engines.
The American steamship *Santa Elena*, on a voyage from Liverpool to Naples, was torpedoed and sunk by German aircraft on November 6th, 1943, off Bougie. She was carrying 1,849 Canadian troops and 99 nurses.

SANTA ELISA

Grace Line; 1941; *Federal S.B. & D.D. Co.*; 8,379 tons; 441 - 3 x 63 - 1x—; 1,000 n.h.p.; turbine engines. The American steamship *Santa Elisa*, on a voyage from the Clyde to Malta with munitions and 7,000 tons of petrol in drums, was torpedoed by a German motor torpedo boat and bombed and sunk by aircraft on August 13th, 1942, 20 miles S.E. of Cap Son.

SANTA FE

Hamburg-Sudamerikanische Dampfs. Ges.; 1921; *Deutsche Werft A.G.*; 4,627 tons; 414-4x50-4x26-9; 438n.h.p.; triple-expansion & L.P. turbine engines.
The German steamship *Santa Fe* was captured by the French on October 25th, 1939, taken to Dakar and renamed *St. Andre*. After the fall of France she was taken back by the Germans. On November 24th, 1943, she was sunk by mine or torpedo in the Black Sea, with the loss of 20 lives.

SANTA INEZ

China Trading Corp.; 1908; *Moran Co.*; 1,764 tons; 240-4x 41 x 16-5; 135 n.h.p.; triple-expansion engines. The Panamanian steamship *Santa Inez*, on a voyage from Shanghai to Manila, ran ashore on the north side of Button Island on November 19th, 1941, but slipped off and sank.

SANTA ISABEL

Compania Trasatlantica; 1916; *Sociedad Espanola de Construcción Naval*; 2,488 tons; 291 -2x40x26-5; 12-5 knots; turbine engines.
The Spanish steamship *Santa Isabel* arrived at Corunna from Asturian ports on January 1st, 1921, to embark passengers for Cadiz and left on the same day. The total on board when she left Corunna was 266, of whom 78 were crew.
On the next day the wireless station at Cape Finisterre received a S.O.S. call from the liner saying "We are sinking" but giving no details of her whereabouts.
From survivors it was learned that the *Santa Isabel* struck a rock off the island of Salvora in the Bay of Arosa and immediately heeled over and lay broadside on to the waves. The first boat to be launched was swept on to the rocks and smashed, all of the 15 occupants being drowned. Two others met with a similar fate, but the fourth boat reached Salvora in safety. Small boats put out from Villagarcia and saved many persons clinging to wreckage, but in all only 56 survived.

SANTA LUCIA

Cia. Primer a de Nav.; 1916; *Sir J. Laing & Sons*; 5,838 tons; 407 X 52 - 4 x 31 - 5; 498 n.h.p.; triple-expansion engines. The Panamanian tanker *Santa Lucia ex dairy* was on a voyage from New York to Dunkirk with a cargo of crude oil when she was attacked by German aircraft on May 21st, 1940, eight or nine miles off Boulogne. The master and 20 members of the crew arrived at Rouen, having abandoned the vessel, which was later seen on fire and sinking.

SANTA MADALENA

Companhiade Navegafao Santense; 1943; *American Bridge Co.*; 2,201 tons; 316x50-2x25-1; oil engines.
The Brazilian motorship *Santa Madalena* caught fire and sank on October 16th, 1953, 15 miles from Sao Joao Light, Maranhao.

SANTA MARGARITA

Compania Primera de Navegacion, 1928; *Cowpen D.D. & S.B. Co.*; 4,919 tons; 400-2x54-2x26-5; 507n.h.p.; triple-expansion engines.
The Panamanian steamship *Santa Margarita* was shelled and sunk by a German submarine on July 2nd, 1940, 450 miles W. of Ushant on a voyage from Barry to Hampton Roads. Five of her crew were killed and four taken prisoner.

SANTA MARIA

Sun Company; 1902; *American S.B. Co.*; 5318 tons; 430X 43-7x29-4; 477 n.h.p.; triple-expansion engines. The American tanker *Santa Maria* was torpedoed and sunk by a German submarine off the N.E. coast of Ireland on February 25th, 1918.

SANTA MARIA

Companhia de Nav. Carregadores Aporeanos; 1906; *Smith's Dock Co.*; 1,104 tons; 210-1x32-1 xll-1; 127n.h.p.; triple-expansion engines.

The Portuguese steamship *Santa Maria*, on a voyage from Antwerp to Oporto, was wrecked near Cabo Vilano on September 27th, 1923.

SANTA RITA

A.F. Mahoney; 1913; *Union Iron Works*; 1,600 tons; 234-5X 42-7x14-5; 158 n.h.p.; triple-expansion engines. The American steamship *Santa Rita*, on a voyage from San Pedro to Seattle, was wrecked three miles W. of Cape Carmanah, Vancouver Island, on February 15th, 1923.

SANTA RITA

Grace Line; 1941; *Federal S.B. & D.D. Co.*; 8,379 tons; 441 -3 x 63-1x37-4; 1,000 n.h.p.; triple-expansion engines. The American steamship *Santa Rita* was torpedoed, shelled and sunk by a German submarine on July 9th, 1942, 500 miles S. of the Bermudas on a voyage from Suez to Philadelphia. Six of her crew were killed, the captain was taken prisoner.

SANTA RITA

Ruggiero & Merega Soc. Anon. di Nav.; 1908; *Cantieri Navali Riuniti*; 5,191 tons; 382-1x50-7x23-4; 390 n.h.p.; triple-expansion engines.

The Italian steamship *Santa Rita* was bombed and sunk by British aircraft on May 13th, 1943, near Cagliari, Sardinia. After the war the wreck was raised and taken in tow for repairs, but on the way to Leghorn she struck a mine and sank in March, 1946, five miles E. of Pianosa Island.

SANTA THERESA

Thos. Roy den & Sons; 1914; *Dunlop, Bremner & Co.*; 2,016 tons; 290-7x42-2x19-4; 236 n.h.p.; triple-expansion engines. The British steamship *Santa Theresa* sprang a leak in the engine room and foundered 100 miles S.E. of Tybee, South Carolina, on September 28th, 1924. She was on a voyage from Cardenas to Boston carrying a cargo of sugar.

SANTAGATA

A. Lauro; 1905; *Tyne Iron S.B. Co.*; 4,299 tons; 367-3X 50 • 1 x 20; 344 n.h.p.; triple-expansion engines. The Italian steamship *Santagata* was bombed and sunk by Allied aircraft on August 4th, 1943, at Naples.

SANTANDERINO

M. M. de Arrotegui; 1890; *D. & W. Render son & Co.*; 3,346 tons; 335x40-1x18-8; 397 n.h.p.; triple-expansion engines. The Spanish steamship *Santanderino* was torpedoed and sunk by a German submarine off Ushant on April 8th, 1916.

SANTEN MARU

Toa Kaiun K.K.; 1918; *Mitsui Bussan K.K.*; 1,210 tons; 225-7X 33-5x18-5; 88 n.h.p.; triple-expansion engines.

The steamship *Santen Mam* struck a mine and sank on May 21st, 1945, in the Inland Sea of Japan.

SANTI

Compania Naviera Amaya, S.A.; 1900; *S. P. Austin & Son*; 1,783 tons; 268-4x37-7x16-9; 196 n.h.p.; triple-expansion engines.

The Spanish steamship *Santi*, on a voyage from Huelva to Alicante, was wrecked on Plana Island on November 18th, 1922.

SANTIAGO

T. Wilson, Sons & Co.; 1886; *R. Dixon & Co.*; 4J88 tons; 365x44-7x28-9; 400 h.p.; triple-expansion engines. The British steamship *Santiago* was destroyed by fire on November

19th, 1889, while on a voyage from New York to Hull carrying a cargo of cotton.

SANTIAGO

Pacific Steam Navigation Co.; 1889; *Naval Construction & Armaments Co.*; 2,953 tons; 350x45-2x22-5; 471 n.h.p.; triple-expansion engines.

The British steamship *Santiago* was wrecked in a heavy squall 50 miles N. of Corral, at 6.30 a.m. on June 18th, 1907, while on a voyage from Corral to Valparaiso carrying a general cargo. The captain, most of the crew and the only passenger got away in a boat which, unfortunately, capsized when nearing the shore, and only the passenger and the 4th officer reached land. These were the only survivors.

SANTIAGO

New York & Cuba Mail S.S. Co.; 1906; *W. Hamilton & Co.*; 3,325 tons; 358x44-9x16-3; 364 n.h.p.; triple-expansion engines.

The American steamship *Santiago*, on a voyage from Cienfuegos to New York with sugar, ran into bad weather on March 12th, 1924, about 60 miles S.E. of Cape Hatteras.

Heavy seas broached No. 2 hatch and some of the crew were washed overboard in a vain attempt to make secure. Soon afterwards the ship filled and sank.

Twenty-five of the crew were lost, ten men were picked up from a boat.

SANTIAGO DE CUBA

Empresa Naviera de Cuba; 1908; *A. G. Neptun*; 1,685 tons; 261 '4x40-1x17-3; 132 n.h.p.; triple-expansion engines.

The Cuban steamship *Santiago de Cuba* was torpedoed and sunk by a German submarine on August 12th, 1942, on a voyage from Port Everglades to Havana. Ten of her crew were killed.

SANTO MARU

Sakai Kisen K.K.; 1899; *Hall, Russell & Co.*; 1,890 tons; 260-3 x 37-2 X17-3; 257 n.h.p.; triple-expansion engines. The steamship *Santo Mam* struck a mine and sank on August 2nd, 1945, off Niigata, Japan.

SANTONI

Scopinich & Monta; 1909; *Swan, Hunter & Wigham Richardson*; 5,235 tons; 390-5x50-4x30-3; 444 n.h.p.; triple-expansion engines.

The Italian tanker *Santoni*, on a voyage from Batum to France with gas oil, ran aground during a gale on March 5th, 1934, five miles S. of Constantza, and broke in two.

A boat with 14 men was launched but capsized, drowning nine, the remaining five were washed ashore and survived. Later a tug from Constantza was able to get near enough to take off nine men from the wreck.

SANTORE

Ore S.S. Corporation; 1918; *Bethlehem Steel Corp.*; 7117 tons; 449-1x57-2x34-3; 559 n.h.p.; triple-expansion engines. The American steamship *Santore* was sunk by a mine or torpedo on June 17th, 1942, between Hampton Roads and Key West.

SANTOS

Rederi AIB. Nordstjerner; 1925; *Kockums Mek. Verkstad A/B*; 3,840 tons; 364-9x51-5x22-8; 364 n.h.p.; oilengines. The Swedish motorship *Santos* was torpedoed and sunk by a German submarine on February 24th, 1940, on a voyage from Kirkwall to Gothenburg. There were only 12 survivors of her complement of about 50.

SANTOS

A/S Ivararfs Rederi; 1928; *Burmeister & Wain*; 4,639 tons; 381-8x53-8x25-1; 534 n.h.p.; oilengines. The Norwegian motorship *Santos*, on a voyage from New York to London, was sunk in a collision with the steamship *Theodore Dwight Weld*, 7,176 tons, on August 18th, 1943, S. of Newfoundland in dense fog.

SANTOS

SANTOS

Hamburg-Sudamerikanische Dampfs. Ges.; 1923; *Fried. Krupp A.G.*; 5,943 tons; 393-5x54-3x31-4; 410n.h.p.; triple-expansion engines.

The German steamship *Santos* was bombed and sunk by British aircraft on August 10th, 1944, W. of Heligoland.

SANTOS MARU

Osaka Shosen K.K.; 7,266 tons.
The steamship *Santos Maru* was torpedoed and sunk by the U.S. submarine *Atule* on November 25th, 1944, 50 miles S.W. of Basco, Batan Islands.

SANUKI MARU

Nippon Yusen K.K.; 1939; *Mitsubishi Jukogyo K.K.*; 7,758 tons; 479-6x62-3x32-2; 1,958 n.h.p.; oilengines. The motorship *Sanuki Maru* was taken over by the Japanese Navy for use as a seaplane tender. On January 28th, 1945, she was torpedoed and sunk by the U.S. submarine *Spadefish* in the Yellow Sea.

SANYOMARU

Osaka Shosen K.K.; 8,360 tons.
The steamship *Sanyo Maru* was taken over by the Japanese Navy and converted into a seaplane tender. On May 26th, 1944, she was torpedoed and sunk by the U.S. submarine *Cabrilla* about 150 miles N.W. of Menado, Celebes.

SANYO MARU

Asano Bussan K.K.; 2,854 tons.
The tanker *Sanyo Maru* was torpedoed and sunk by the U.S. submarine *Barb* on January 8th, 1945, 20 miles N.W. of Hsinchu, Formosa.

SAG PAULO

Hamburg-Sudamerikanische Dampfs. Ges.; 1921; *F. Schichau*; 4,977 tons; 361-7x51-4x31-7; 347n.h.p.; triple-expansion engines.

The German steamship *Sao Paulo* struck a mine and sank on April 9th, 1940, off Bratholm, Norway.

SAO PAULO

Brazilian Navy, dreadnought-battleship; 1909; *Vickers Maxim*; 19,281 tons; 533x83x25; 30,000 s.h.p.; 21 -2 knots; *Thornycroft* boilers; twelve 12 in. guns, fourteen 4-7 in., four 3 in., four 40 mm.A.A., 8 m.g.

The battleship *Sao Paulo* was sold for scrap in 1951 to the British Iron and Steel Corporation and left Rio de Janeiro on September 20th, with a skeleton crew of eight men, towed by the tugs *Bustler* and *Dexterous*. On November 4th, when about 150 miles N.E. of the Azores, a fierce gale was encountered and both towlines parted during the night. The *Sao Paulo* drifted away in the darkness and was never seen again.

SAORAFEL

Portuguese Navy light cruiser; 1898; *Havre*; 1,800 tons; 246x35-3x16; 4,000i.h.p.; 17knots; triple-expansion engines; *Normand-Sigaudy* boilers; two 6 in. guns, four 4-7 in., eight 3pdr., 2 m.g., 1 T.T.

The Portuguese light cruiser *Sao Rafael* left Lisbon for Leixoes on Friday, October 20th, 1911. Shortly after sailing she ran into thick weather which later became very dense fog. By next day, the 21st, she had over-run her distance and struck on the rocks a quarter of a mile off Villa do Conde. The heavy seas battered the wreck so that the ship broke her back, but fortunately three lifeboats from shore managed to take off the whole of the ship's company, except one man who was drowned. In addition 12 of the crew were injured. The *Sao Rafael's* complement was 220.

SAPHIR

E.Lindoe; 1901; *Laxevaags Mas kin & Jernskibs.*; 1,406 tons; 245-3x36-3x16-9; 132 n.h.p.; triple-expansion engines. The Norwegian steamship *Saphir* was torpedoed and sunk by a German submarine in the Bristol Channel on May 25th, 1918.

SAPHIR

Edvin Endresen; 1905; *Swan, Hunter & Wigham Richardson*; 4,306 tons; 375-5x51x25-5; 373 n.h.p.; triple-expansion engines.

The Norwegian steamship *Saphir* was sunk by gunfire at Narvik on April 10th, 1940, during the German invasion of Norway.

SAPPHO

C. Hadjipateras & N. & D. Pater as; 1891; *Stabilimento Tecnico Triestino*; 2,087 tons; 261-2x34-8x18; 194n.h.p.; triple-expansion engines.

The Greek steamship *Sappho* was sunk by a German submarine off Ushant on December 30th, 1916.

SAPPORO MARU No. 11

Inukami Keigoro; 1903; *J. Blumer & Co.*; 2,820 tons; 319-7X 46-1 x 21; 263 n.h.p.; triple-expansion engines. The steamship *Sapporo Maru No. 11* was torpedoed and sunk by the U.S. submarine *Barb* on July 5th, 1945, in the La Perouse Strait.

SAPPORO MARU No. 12

Inukami Keigoro; 1903; *J. Blumer & Co.*; 2,865 tons; 320X 46x21-2; 256 n.h.p.; triple-expansion engines. The steamship *Sapporo Maru No. 12* was torpedoed and sunk by the U.S. submarine *Flying Fish* on April 12th, 1943, off Ominato, Honshu Island.

SARA

Soc. Anon, di Nav. Nettuno; 1889; *Palmers' Co.*; 1,837 tons; 260-2x37-3x16-5; 187n.h.p.; triple-expansion engines. The Italian steamship *Sara*, on a voyage from Split to Patras, was wrecked at Fano on February 2nd, 1925.

SARAHANDERSON

R. G. Sharp & Co.; 1865; *T. Royden & Sons*; 589 tons; 172-7X 27-8x17-8.

The barque *Sarah Anderson*, Capt. W. J. Puxley, on a voyage from Coquimbo to Fleetwood, foundered on October 17th, 1886, in heavy weather near Port Isaac, Cornwall, with the loss of all on board.

SARAH SANDS

British Government Transport; 1845; *Hodgson & Co.*; 1,300 tons; 220 x 32x20; 200 n.h.p.; 9 knots; oscillating engines. The Government transport, *Sarah Sands*, Capt. Castle, had at one time belonged to the Red Cross Line, but on the occasion of the fire which brought her name into prominence she was conveying 368 officers and men of the 54th Foot to India. In addition to the troops there were a number of women and children, making with the crew a total of some 500 persons. She had proved a most unlucky ship, for, when chartered to the Canadian Steam Navigation Co., she had run on the rocks in the Straits of Belleisle, and later had capsized after leaving dock owing to her ballast being out of trim. On the voyage to India her somewhat nondescript crew mutinied and several were put in irons, and a few days before the outbreak of fire she lost one seaman, who fell overboard when skylarking.

On November 11th, 1857, some days after leaving Cape Town, at about 2.30 p.m., one of the soldiers reported fire to the ship's carpenter. The *Sarah Sands* was constructed of iron, but there was also much inflammable woodwork and within a short time the whole of the after portion was on fire. Unfortunately the crew got out of hand and launched some of the boats without orders, but the soldiers succeeded in placing all the women and children in those that remained and got them clear of the ship. For 18 hours the troops and loyal members of the crew, fought the fire with admirable discipline. The two stores of powder were cleared and the casks thrown overboard, save for two or three which exploded and blew up most of the ship aft of the mainmast. The regimental colours, kept in the saloon, were saved by the bravery of half a dozen volunteers who reached them after repeated attempts.

Meanwhile the recalcitrant men in the boats refused to render

any aid, even declining to take the burning ship in tow. Fortunately during the whole of this time it had been possible to keep the ship's head to wind and thus confine the flames to the after part. The explosion of the powder, though it blew a great hole in the ship's port quarter down to the water line, also blew away the burning woodwork of the stern cabins and shortly afterwards the fire was got under control and eventually extinguished.

The plight of all on board was now miserable in the extreme. The uniforms of the soldiers had been almost scorched from their bodies, many had collapsed and others were terribly burned. Not one person lost his life in this disaster, even the mutineers in irons below were rescued by their comrades. The people from the boats were taken on board again and tents and awnings were rigged up over the burnt out decks to afford shelter against the heat of the tropic sun, and the ship set a course for Mauritius. On the evening of November 21st she reached Port Louis.

The *Sarah Sands* was converted to a sailing ship, but was wrecked on the Laccadive Islands, on April 7th, 1859.

SARANAC

Anglo-American Oil Co.; 1918; Palmers' Co.; 12,049 tons; 530-5x66-3x41-8; 793n.h.p.; 11 knots; quadruple-expansion engines.

The tanker *Saranac* was intercepted by a German submarine about 500 miles W. of Land's End on June 25th, 1940. The enemy opened fire from the surface and later discharged a torpedo which sank the vessel. Three of her crew were killed and a fourth died after being picked up.

SARATOFF

U.S.S.R.; 1888; Burmeister & Wain; 1,679 tons; 261X 34-1x23-7; 138 n.h.p.; triple-expansion engines. The Russian steamship *Saratoff*, on a voyage from Riga to South Alloa, was wrecked in heavy weather on January 14th, 1923, 20 miles N. of Libau.

SARAWAK MARU

Mitsubishi Risen K.K.; 5,135 tons.

The tanker *Sarawak Mam* struck a mine and sank on March 19th, 1945, off Bintan Island, Malaya.

SARDEGNA

Lloyd Triestino; 1923; Bremer Vulkan; 11,452 tons; 511-6X 61-8x34-3; 818 n.h.p.; triple-expansion engines.

The Italian liner *Sardegna*, carrying troops from Italy to Albania, was torpedoed and sunk by a British submarine on December 29th, 1940, off Valona.

SARDINERO

Cia. Vasco Cantabrica de Nav.; 1897; J. Blumer & Co.; 2,170 tons; 290 X 42 x 19 • 1; 220 n.h.p.; triple-expansion engines. The Spanish steamship *Sardinero* was torpedoed and sunk by a German submarine off the north-west coast of Africa on February 23rd, 1918.

SARDINIA

Ellerman Lines; 1888; Hawthorn, Leslie & Co.; 2,474 tons; 310 x 40 • 3 x 22 - 6; 361 n.h.p.; triple-expansion engines. The steamship *Sardinia*, Capt. Charles Littler, left Malta on November 25th, 1908, for Alexandria with 152 passengers, mostly pilgrims bound to Mecca travelling on deck. About one mile out from Malta fire broke out in nitrate cargo in No. 2 hold, and the helm was put over to return to port. The fire spread very quickly, no further orders came from the bridge and the engine room was abandoned leaving the ship steaming in circles at full speed. On deck all the boats were burned and many of the pilgrims and some of the crew jumped overboard, despite the rough sea. Eventually the ship ran on to the Ricasoli rocks and was wrecked. Capt. Littler, 15 of the crew, five European passengers and about 100 pilgrims were killed. The fire was believed to have been started by embers from the pilgrims' cooking braziers falling between the hatch cover into the hold.

SARDINIA

O.Thoresen; 1914; Wood, Skinner & Co.; 1,500 tons; 285-2X 38-7x16-4; 188 n.h.p.; triple-expansion engines. The Norwegian steamship *Sardinia* was sunk by a German submarine off Ushant on January 23rd, 1917.

SARDOMENE

G. Mortolafu G.B.; 1882; Oswald, Morduant & Co.; 2,000 tons; 269x39-6x24-1. The Italian sailing ship *Sardomene* was torpedoed and sunk by a German submarine off the south-west coast of Ireland on July 1st, 1915.

SARGASSO

M. Isaacs & Sons; 1883; J. & G. Thomson; 1,508 tons; 275 x 33 • 1X19; 164 n.h.p.; compound engines. The British steamship *Sargasso* sank after a collision with the steamship *Mary Ada Short*, 3,605 tons, at the mouth of the Tyne in fog on April 18th, 1912. She was on a voyage from the Tyne to Carthage carrying a cargo of coal.

SARNIA

London & South Western Railway Co.; 1910; Cammell Laird; 1,498 tons; 284-6x39-1x15-8; 20-5 knots; turbine engines. The cross-channel steamship *Sarnia* was taken over by the Admiralty early in the First World War for service as an armed boarding-steamship. In 1915 she was despatched to the Dardanelles and on October 29th of that year she collided with and sank the auxiliary minesweeper *Hythe* in the darkness off Cape Helles. The *Hythe* was carrying troops at the time and 155 sailors and soldiers were drowned.

On September 12th, 1918, the *Sarnia* was torpedoed and sunk by a German submarine in the Mediterranean.

SARNIADOC

Pater son Steamships; 1929; Barclay, Curie & Co.; 1,940 tons; 252-7x43-3x17-8; 93 r.h.p.; triple-expansion engines. The Canadian cargo ship *Sarniadoc* sailed from Demerara on March 9th, 1942, and Trinidad on the 12th, on a voyage to St. Thomas carrying a cargo of bauxite. Nothing more was ever heard of the ship and she was considered to have been lost by enemy action.

SARONIKOS

M. A. Embiricos; 1912; Craig, Taylor & Co.; 3,548 tons; 360-7x50x21-4; 376 n.h.p.; triple-expansion engines. The Greek steamship *Saronikos* was torpedoed and sunk by a German submarine on December 7th, 1942, on a voyage from Aden to Durban. Thirty of her crew and two passengers were killed. Two survivors reached Lourenço Marques on the 20th.

SAROS *see* BRADFORD CITY

SARPFOS

Thor Thoresen, Jr. A/S; 1910; Nylands Varksted; 1,458 tons; 254-5x39-2x16-5; 152 n.h.p.; triple-expansion engines. The Norwegian steamship *Sarpfos* was torpedoed and sunk by a German submarine in the Irish Channel on February 24th, 1918.

SARREBOURG

Soc. Anon. de Nav. Les Armateurs Français; 1919; Midland S.B.Co.; 2,004 tons; 254-2x43-7x20-4; 253 n.h.p.; triple-expansion engines. The French steamship *Sarrebourg*, on a voyage from Newcastle to Nantes with coal, struck a rock and sank on February 25th, 1927, off Brest.

SASAGO

Nippon Yusen Kaisha; 9,258 tons. The steamship *Sasago* was bombed and sunk by U.S. land- and carrier-based aircraft on October 16th, 1942, off the Solomon Islands.

SATA

Japanese Navy; 6,500 tons.

The tanker *Sata* was sunk by U.S. carrier-based aircraft on March 30th, 1944, off Babelthuap, Palau Islands.

SATARA

British India S.N. Co.; 1901; W. Denny & Bros.; 5,272 tons; 410-8x50-7x29-1; 383 n.h.p.; triple-expansion engines. The British cargo ship *Satara* was wrecked near Seal Rocks, N.S.W., on April 20th, 1910. She was carrying a cargo of coal from Newcastle, N.S.W., to Gladstone.

SATSUKI

Japanese Navy, destroyer; 1925; Hudinagata; 1,315 tons; 320x30x9-6; 38,500 s.h.p.; 34 knots; turbine engines; Kanpon boilers; four 4-7 in. guns, 2 A.A.m.g. The Japanese destroyer *Satsuki* was bombed and sunk in Manila Bay by carrier borne aircraft of the U.S. Third Fleet on September 21st, 1944. The destroyer's normal complement was 150.

SATSUMA MARU

Utsunomiya Kaisoten K.K.; 1918; Tyne Iron S.B. Co.; 3,091 tons; 331'4x46-8x23-1; 431 n.h.p.; triple-expansion engines. The steamship *Satsuma Maru* was bombed and sunk by Chinese aircraft on February 11th, 1944, off Wenchow.

SATURNO

Italian Government; 1914; Armstrong, Whitworth & Co.; 5,022 tons; 385-2x50-3x30-3; 425 n.h.p.; triple-expansion engines.

The steamship *Saturno* was formerly the French *Massis*, taken over by the Italians. On January 20th, 1943, she was bombed and sunk by Allied aircraft about nine miles from Plana Island.

SAUERLAND

Hamburg-Amerika Linie; 1929; F. Schichau; 7,087 tons; 462-8x61-1x25-9; 1,374 n.h.p.; oilengines. The German motorship *Sauerland* was sunk during combined air and sea operations on August 12th, 1944, W. of La Rochelle.

SAUGOR

James Nourse; 1928; Harland & Wolff; 6,303 tons; 424 x 56x28-8; 569 n.h.p.; 12 knots; triple-expansion engines. The steamship *Saugor*, Capt. J. A. A. Steel, bound for Calcutta via the Cape, was in the North Atlantic in convoy when she was torpedoed and sunk by a German submarine. The attack took place on August 27th, 1941, when the vessel was three days out from Oban. Capt. Steel and 58 others were lost.

SAUMUR

German Government; 1920; Forth S.B. & E. Co.; 2,955 tons; 324-4x44-3x23-1; 234 n.h.p.; triple-expansion engines. The steamship *Saumur* was formerly French, taken over by the Germans. She was torpedoed and sunk by a British submarine on May 21st, 1944, off Port Vendres.

SAUTERNES

Ministry of War Transport (O. Dorey & Sons); 1922; Ateliers & Chantiers de la Seine Maritime; 1,049 tons; 215-9x30-5x12-5; 144 n.h.p.; triple-expansion engines.

The British steamship *Sauternes* foundered during a gale near Svino, Faroe Islands, on December 7th, 1941, while carrying a general cargo from Leith to Thorshavn. She had a crew of 19, five gunners and one passenger. None survived.

SAVE

Companhia Nacional de Navegafao; 1951; Grangemouth Dockyard Co.; 2,037 tons; 258-7x41-5x14; 12 knots; oil engines.

The Portuguese motorship *Save* left Beira on July 6th, 1961, for Quelimane with general cargo including petrol, diesel fuel and explosives. She carried a crew of 54 and 495 passengers, of whom 200 were African troops and the remainder labourers. On July 7th, she anchored in the mouth of the River Linde in a heavy storm but broke loose and ran onto a sandbar. On the following day the ship freed herself but at 6.10 a.m. on the 9th fire broke out on

board and she was driven ashore again by the heavy seas. Shortly afterwards the ship was wrecked by a series of heavy explosions. Sixteen of her crew and 243 passengers were killed.

SAVIO

Cia. Italiana di Nav. S.A.; 1890; S. C. Farnham & Co.; 1,625 tons; 238x30-1x12; 72 n.h.p.; compound engines. The Italian steamship *Savio* was bombed and sunk by Japanese aircraft in 1938 near Ichang, Yangtze River.

SAVOIE

French Government; 1906; Workman, Clark & Co; 10,196 tons; 515-2x61-3x30-5; 1,514 n.h.p.; quadruple-expansion engines. The liner *Savoie* was sunk by gunfire on November 8th, 1942, at Casablanca, during the Allied landings in North Africa.

SAVONA

R. M. Sloman, Jr.; 1934; Pl. C. Stulcken Sohn; 2,120 tons; 305-6x43-6x16-2; 246 n.h.p.; triple-expansion engines. The German steamship *Savona* was bombed and sunk by British aircraft on June 29th, 1942, 17 miles E. of Tobruk.

SAVONMAA

FinskaAngf.-A/B; 1922; Eriksbergs Mek. Verkstad; 1,149 tons; 300x43-2x16-3; 275 n.h.p.; triple-expansion engines. The Finnish steamship *Savonmaa*, on a voyage from Viipuri to Manchester, ran ashore and was wrecked on January 20th, 1937, outside Lando, near Mandal.

SAVOYARD

H.Mignot; 1896; Gautier Fits.; 258 tons; 115-9x26-8x12-3. The French three-masted wooden barquentine *Savoyard* was wrecked off Ploven near Brest on October 26th, 1903. The captain, his wife and four of the crew were lost.

SAWA MARU

T. Osawa; 1890; F. W. Wheeler & Co.; 2,542 tons; 270-7X 41x26; 203 n.h.p.; triple-expansion engines. The Japanese steamship *Sawa Mam* was torpedoed and sunk by a German submarine off the south-west coast of Ireland on March 6th, 1917.

SAWA MARU

Kagoshima Yusen K.K.; 1903; AkersMek. Verksted; 1,264 tons; 227 X 31 - 6 x 22 -1; 155 n.h.p.; triple-expansion engines. The steamship *Sawa Maru* struck a mine and sank on June 4th, 1945, off Shimonoseki.

SAWAHLOENTO

Koninklijke Paketvaart Maats.; 1921; Gebr. Pot; 3,085 tons; 325-3x47-6x22; 282 n.h.p.; triple-expansion engines. The Dutch steamship *Sawahloento*, on a voyage from Port Sudan to South Africa, was torpedoed and sunk by the German submarine *U-177* on December 14th, 1942. Fifty-one lives were lost; 19 survivors landed at Durban.

SAWARABI

Japanese Navy, destroyer; 1921; Japan; 820 tons; 275X 26-5x8-2; 27,500 s.h.p.; 31-5 knots; turbine engines; Kanpon boilers; three 4-7 in. guns, 2 m.g., 4 T.T.

The Japanese destroyer *Sawarabi* was steaming with three other destroyers through a violent storm off Formosa on December 6th, 1932. The *Sawarabi* got into difficulties and lay disabled and stopped, her consorts being unable to assist her on account of the heavy seas. Later she was overwhelmed by the gale and sank with 106 officers and ratings out of her complement of 120.

SAWOKLA

U.S. War Shipping Administration; 1920; Oscar Daniels Co.; 5,882 tons; 401-9x54-2x31-3; 938 n.h.p.; oil engines. The motorship *Sawokla*, on a voyage from Calcutta to New York, was sunk by enemy action in the South Indian ocean between November 29th, and December 4th, 1942. Nothing was heard of her crew until one member was reported to be a prisoner of war in Japan.

SAXILBY

Ropner Shipping Co.; 1914; Ropner & Sons; 3,630 tons; 346>5X50-8x23-3; 322 n.h.p.; 8-5 knots; triple-expansion engines.

The steamship *Saxilby*, Capt. B. J. Samuel, was on a voyage from Newfoundland to Port Talbot with a cargo of iron ore and a crew of 27, when she foundered through stress of weather on November 15th, 1933. The first intimation that she was in difficulties came at 8.50 a.m. on the 15th when a wireless message was received at Valentia on the south coast of Ireland saying that she was in need of assistance and giving her position as roughly 400 miles distant. The U.S. steamship *Coelleda* sent out a message stating that the *Saxilby* had wireless that she was trying to get her boats away and giving the time as 8.23 a.m. During the day the Dutch steamship *Boschdijk*, the Cunard liner *Berengaria* and the *Manchester Regiment* went to the rescue in a heavy gale. Wireless messages from the *Saxilby* ceased, and after some hours the search for survivors was abandoned.

SAXMUNDHAM

Hunting & Pattison; 1883; North of England S.B. Co.; 2,486 tons; 300x39x25-5; 300 h.p.; compound engines. The steamship *Saxmundham*, Capt. Milne, left Newcastle for Ancona with a cargo of coal and coke, on November 2nd, 1888. She carried a crew of 29 all told. At about 2 a.m. on the 4th she was off St. Catherine's Point, Isle of Wight, in thick rainy weather, when she was struck on the starboard side amidships by the Norwegian barque *Nor*, Capt. Bjonness. She immediately began to sink and there was little time for launching the boats, most of the crew being asleep below. The starboard lifeboat got away with five men and the jollyboat with ten. Later the lifeboat picked up the captain and the second engineer.

The men in the boats hailed the *Nor* but received no reply to their shouts, and eventually the boats drifted apart. The jollyboat, which was in a sinking condition, was picked up by a passing barque and the occupants were taken to London. The lifeboat's party were picked up by the schooner *Waterblrd*, Capt. Williams, and landed at Weymouth.

Twelve men of the *Saxmundham**s crew were drowned.

All the crew of the *Nor* were taken off by the steamship *Shagbrook*, and the damaged barque drifted on to the Shingles and was wrecked.

SAXON

Entente S.S. Co.; 1881; T. Turnbull & Son; 1,595 tons; 264 x 34-6x18; 170 n.h.p.; 9 knots; compound engines. The steamship *Saxon* was torpedoed and sunk by a German submarine 83 miles E.S.E. of Fair Isle, Shetland Islands, on May 7th, 1918. Twenty-two men were killed, The captain was among the survivors.

SAYN

Fried. Krupp A.G.; 1898; W. Gray & Co.; 2,321 tons; 302x43x19-9; 223 n.h.p.; triple-expansion engines. The German steamship *Sayn* struck a mine and sank on April 24th, 1940, outside Delfzijl.

SAZANAMI

Japanese Navy; destroyer; 1931; Maizuru; 1,700 tons; 371 -5x33 - 8 x 9 - 8; 40,000 s.h.p.; 34 knots; turbine engines; Kanpon boilers; six 5 in. guns, 4 A.A.m.g., 9 T.T. The Japanese destroyer *Sazanami* was torpedoed and sunk S.E. of Yap in the Carolines Group by the U.S. submarine *Albacore* on January 14th, 1944. The destroyer's normal complement was 197.

SCALARIA

Anglo-Saxon Petroleum Co.; 1922; Swan, Hunter & Wigham Richardson; 5,683 tons; 411 -5x53-4x31; 555n.h.p.; 10 knots; triple-expansion engines. The tanker *Scalaria*, Capt. J. Waring, was attacked by enemy aircraft off Ras Gharib, Red Sea, on October 19th, 1942. The vessel was hit by bombs and aerial torpedoes and sank with the loss of 11 men. Capt. Waring was among the survivors.

SCAPA FLOW

U.S. Maritime Commission; 1914; Flensburger Schiffsbau Ges.; 4,827 tons; 412-2x54-8x26-2; 620n.h.p.; triple-expansion engines.

The Panamanian steamship *Scapa Flow* was torpedoed and sunk by a German submarine on November 14th, 1942, on a voyage from Freetown to St. Thomas, W.I. The ship had a complement of 60, of whom the captain, 25 of the crew and seven gunners were killed.

SCEBELI

Skibs A/S Thorsholm (A/S Thor Dahl); 1937; Burmeister & Wain; 3,025 tons; 324-3x45-8x26-1; 606n.h.p.; oilengines. The Norwegian motorship *Scebeli* was torpedoed and sunk by a German submarine on April 21st, 1943, on a voyage from Liverpool to New York.

SCEPTRE

Hall Bros.; 1921; Craig, Taylor & Co.; 5,280 tons; 370-3X51-4x32-4; 385 n.h.p.; triple-expansion engines. The British steamship *Sceptre* was wrecked near Cape Agulhas in fog on May 22nd, 1925, while carrying a cargo of coal from Cardiff to Mauritius.

SCHALDIS

VanHemelrijck&Geurts; 1878; T. Turnbull & Son; 1,241 tons; 238-1x32x18; 135 n.h.p.; compound engines. The Belgian steamship *Schaldis* was torpedoed and sunk in the North Sea by a German submarine on March 29th, 1917.

SCHARFSCHUTZE

Austrian Navy; destroyer; 1907; Austria; 390 tons; 6,000 i.h.p.; 28 knots; turbine engines; Yarrow boilers; six 12 pdr. guns, 2 T.T.

The Austrian destroyer *Scharfschutze* was endeavouring to escape from Durazzo on October 2nd, 1918, at the time that Austrian resistance was crumbling. The vessel was intercepted and sunk by two British destroyers not far from the harbour.

SCHARNHORST

German Navy; armoured cruiser; 1906; Blohm & Voss; 11,600 tons; 449-7x71x25; 26,000 i.h.p.; 23-2 knots; triply expansion engines; Schulz-Thornycroft boilers; eight 8-2 in. guns, six 5-9 in. eighteen 3-4 in., 4 m.g., 4 T.T. At the outbreak of the First World War the *Scharnhorst* was the flagship of the German East Asiatic Squadron, wearing the flag of Admiral Graf von Spee. The admiral was one of the best seamen in the German navy. He had brought the squadron under his command to a very high pitch of efficiency, and in 1914 it held the gunnery record of the German Navy.

The East Asiatic Squadron crossed the Pacific to Easter Island, where, on October 14th, it concentrated its scattered units. On November 1st off Coronel it engaged a British force under Rear-Admiral Sir Christopher Cradock, sinking two armoured cruisers *Good Hope* (flagship) and *Monmouth*. The light cruiser *Glasgow* and the auxiliary cruiser *Otranto* escaped. The German squadron sustained no losses. The full story of this battle is told under the *Good Hope*.

Early on the morning of December 8th Admiral von Spee approached the Falkland Islands under the impression that they were poorly defended. In this he was mistaken, for a few hours before Vice-Admiral Sir Doveton Sturdee had arrived with a large force direct from England. The British were engaged in coaling but immediately prepared for action when the German ships were sighted.

Before entering into the details of the battle it is necessary to account for the presence of the British. Immediately on receipt of the news of Coronel the The First Sea Lord, Admiral Sir John Fisher detached the battle cruisers *Invincible* (which see) and *Inflexible* from the Grand Fleet and ordered them to proceed to the Falkland Islands without loss of time. Such was the urgency of the matter that the *Invincible* left Devonport Dockyard, with dockyard workmen still on board. The ships in South American waters were ordered to concentrate at the Abrolhos Rocks, and when

SCHARNHORST

Admiral Sturdee arrived there he found awaiting him a squadron fully sufficient for the task in hand. The strength of the two squadrons was as follows:—

	tons	knots	guns	
BRITISH				
<i>Invincible</i> (flagship)	17,250	26-6	8-12 in.,	16-4 in.
<i>Inflexible</i>	"	26	" "	" "
<i>Carnarvon</i>	10,850	22	4-7-5 in.,	6-6 in.
<i>Cornwall</i>	9,800	23-6	14 "	" "
<i>Kent</i>	"	23-5	" "	" "
<i>Glasgow</i>	4,800	25-8	2-6 in.,	10-4 in.
GERMAN				
	tons	knots	guns	
<i>Scharnhorst</i>	11,600	23-2	8-8-2 in.,	6-5-9 in.
<i>Gneisenau</i>	11,420	23-5	" "	" "
<i>Leipzig</i>	3,250	22-4	10-4 in.	" "
<i>Nurnberg</i>	3,400	23-5	" "	" "
<i>Dresden</i>	3,592	24-5	" "	" "

In view of the heavy odds against him the German Admiral endeavoured to escape. The speed of the British ships made this impossible, and at 1.15 p.m. Spee signalled his slowest ship, the *Leipzig*, to proceed independently. Thereafter he sent similar instructions to his other light cruisers and turned to hold up the pursuit as best he might with the *Scharnhorst* and the *Gneisenau* (which see).

At a range of 15,000 yards the British battle cruisers commenced to hit, but the distance was too great for the German 8-2 in. guns to be effective. By 1.30 p.m. the range had fallen to 13,000 yards and both German cruisers concentrating on the British flagship began to score hits, but this did not last for long. Keeping at extreme range the British punished their antagonists very heavily until, at about 3 p.m., von Spee turned to close in order to bring his secondary armament of 5 • 9 in. guns to bear. He sustained a terrific fire from the 12 in. guns of the battle cruisers in doing so and within half an hour the *Scharnhorst* was a blazing wreck. She then turned to permit her undamaged broadside to bear, and for a time fought with renewed strength, but at about 4 p.m. she was brought to a dead stop. At 4.17 p.m. she slowly rolled over, and sank with colours flying. The vessel took with her Admiral von Spee and all his men, a very brave company.

Of the remainder of the German squadron the *Gneisenau* was sunk by the combined fire of the battle cruisers and the *Carnarvon*. The light cruiser *Leipzig* was sunk by the *Cornwall* and *Glasgow*, and the light cruiser *Nurnberg* was sunk by the *Kent*. The *Dresden* alone escaped and defied destruction for another four months.

The official complement of the *Scharnhorst* was 765.

During the four months of its existence the East Asiatic Squadron was responsible for the destruction of the following merchant ships.

s.s. <i>Evades</i>	...	3,352 tons	August 15th, 1914
s.s. <i>Holmwood</i>	...	4,223 "	" 26th, 1914

Barque <i>Conway Castle</i>	...	1,694 "	February 27th, 1915
			(sunk by <i>Dresden</i>)

The *Emden* also belonged to the Squadron but was raiding independently.

SCHARNHORST

German Navy, dreadnought battleship; 1936; Wilhelmshaven Dockyard; 26,000 tons; 741-5x98-5x24-7; 29knots; turbine-engines; nine 11 in. guns, twelve 5-9 in., fourteen 4 in., sixteen 37 mm., 4 aircraft.

The German battleship *Scharnhorst* carried a complement of 1,461 and in speed and armament she was capable of challenging any battleship afloat. Her chance came with the outbreak of the Second World War when she proved the most successful of any of Germany's large battle units. On November 23rd, 1939, in company with her sister ship the *Gneisenau*, she sank the British auxiliary cruiser *Rawalpindi* (which see) off Iceland. In April 1940 the *Scharnhorst* was engaged by the battle cruiser *Renown* in northern

waters, but managed to break off the action. In June of the same year, again in company with the *Gneisenau*, she sank the aircraft carrier *Glorious* (which see) and three other ships off Narvik. From January to March 1941 she was operating as a commerce destroyer. She and the *Gneisenau* claimed to have sunk 22 Allied merchantmen between them, but owing to the vigilance of the Allied cruisers most of the German supply ships sent to their assistance were intercepted, and in March both battleships put into Brest where they remained until February 1942.

During this period the *Scharnhorst* was subjected to repeated bombings by British aircraft and sustained heavy, but not vital damage. On May 27th, 1941, the 10,000 ton, 8 in. gun cruiser *Prinz Eugen* arrived at Brest, having escaped the fate of the battleship *Bismarck* with which she had been in company. This made the third large German unit sheltering in Brest and on February 12th, 1942, the big ships with an escort of destroyers, and other light craft and protected by many aircraft, came out of harbour and steamed toward the Straits of Dover. The *Scharnhorst* and her consorts gained German ports with very little difficulty.

On Sunday, December 26th, 1943, the *Scharnhorst* was at sea with the intention of intercepting a large convoy bound for Russia. This convoy was escorted by a strong British force in two formations, the first, under Admiral Sir Bruce Fraser, commander-in-chief, Home Fleet, comprised the battleship *Duke of York*, 35,000 tons, flagship, the cruiser *Jamaica*, and four destroyers; the second, under command of Vice-Admiral R. L. Burnett, C.B., D.S.O., O.B.E., comprised the cruisers *Belfast*, 10,000 tons, flagship, *Sheffield*, and *Norfolk*. This second formation was close to the convoy and constituted its actual escort. In addition there was a further division of four destroyers, making eight all told. Just before 11 a.m. somewhere S.E. of Bear Island the *Scharnhorst* was sighted steaming at 28 knots in the direction of the convoy. The escorting cruisers at once turned toward the raider, while the convoy was diverted to the northward. There was a brief exchange of salvos between the *Scharnhorst* and the British in which the *Norfolk* scored a hit with her 8 in. guns, whereupon the raider took evasive action and soon was lost to view to the N.E., steaming at top speed. Some hours later she again attempted to close the convoy and fire was opened by both sides, an 11 in. shell striking the *Norfolk*, killing several men. After this the *Scharnhorst* turned away on a southerly course, still at high speed and shadowed by the cruisers and destroyers under Admiral Burnett.

Meanwhile the *Duke of York* with the rest of Admiral Fraser's force had been working up from the S.W. and the flagship made contact with the *Scharnhorst* at 4.15 p.m., by which time darkness had closed in. Shortly afterwards the 14 in. guns of the *Duke of York* obtained a hit below the water-line and the *Scharnhorst* turned away to the northward and then eastward with a slight diminution of speed. Admiral Fraser ordered a torpedo attack by the destroyers *Savage*, Cdre. M. D. C. Meyrick, senior officer, *Sausmarez*, *Scorpion* and *Stor*. These ships steamed ahead of the raider beyond a point where they could expect any assistance from their heavy consorts, and then turned in and discharged their torpedoes, securing at least three hits. There was an immediate drop in the German battleship's speed and the *Duke of York* opened fire with her 14 in. guns until the *Scharnhorst* lay with her engines stopped and smoke and flames issuing from her decks.

At this juncture the cruisers *Jamaica* and *Belfast* were ordered to attack with torpedoes from one side and the destroyers *Matchless*, *Virago*, *Opportune* and *Musketeer* from the other. This concentrated volley exploded with tremendous force and at 7.45 p.m. the *Scharnhorst* sank at a spot about 60 miles N.E. of North Cape. It is presumed that she carried her full complement of 1,461, and of these only 36 were saved. Rear-Admiral Bay, in command of the German destroyers which set out at the same time, was on board the *Scharnhorst*.

British casualties were few and damage to ships very slight. There was no loss among the convoy.

SCHELDEPAS

Scheepv. Maats. Scheldestroom Soc. Anon.; 1897; *Earless Co.*; 5,092 tons; 420x48-2x28-8; 339 n.h.p.; triple-expansion engines.

The Belgian steamship *Scheldepas*, on a voyage from Antwerp to Shanghai, ran on to a sunken wreck and sank on March 14th, 1929, off Vesta Rock, Plane Island.

SCHELDT

Hooper, Campbell & Co.; 1884; C. Hill & Sons; 1,090 tons; 211-1x29-6x21-9; 96 h.p.; compound engines. The British steamship *Scheldt* was wrecked near Pendeen, Cornwall, on June 23rd, 1890. She was carrying a cargo of coal from Newport to Bordeaux.

SCHIAFFINO XXIV

Soc. Algerienne pour VAfrique du Nord; 1924; Fried. Krupp A.G.; 1,417 tons; 242-9x36-1x15-7; 224 n.h.p.; triple-expansion engines.

The French steamship *Schiaffino XXIV* left St. Louis, Rhone, on December 9th, 1934, for Sete and Algiers. Nothing more was heard of the ship or crew until April 7th, 1935, when the wreck was found near Pointe de l'Espiguette.

SCHIE

Naam. Venn. Houtvaart; 1922; A. Vuijk&Zonen; 1,967 tons; 281-5x40-3x19-2; 236 n.h.p.; triple-expansion engines. The Dutch steamship *Schie* left Aberdeen on June 14th, 1941, and Loch Ewe on the 18th for Curasao in convoy. She was last seen on the 21st and was thought to have been sunk on the 24th, about 400 miles S.S.E. of Cape Farewell.

SCHIELAND

Scheepvaart en Steenkolen Maats.; 1909; Werfvoorheen Rijkee & Co.; 1,106 tons; 221-3x33-6x12-9; 150 n.h.p.; triple-expansion engines.

The Dutch steamship *Schieland* struck a mine and sank in the North Sea on April 1st, 1915.

SCHIELAND

Scheepvaart en Steenkolen Maats.; 1916; A. F. Smulders; 2,249 tons; 272-7x40-2x18-2; 212 n.h.p.; triple-expansion engines.

The Dutch steamship *Schieland* was bound from Blyth to London when she was bombed and sunk by German aircraft. The attack took place near the Outer Dowsing lightship on June 20th, 1941. Fifteen of her crew were killed and the first mate, one of the nine survivors landed, died in hospital.

SCHIFFBEK

Knorr & Bur chard Nfl.; 1930; Lubecker Maschinbau Ges.; 2,158 tons; 281-8x44-2x16-9; 216 n.h.p.; compound engines. The German steamship *Schiffbek* struck a mine and sank on November 6th, 1944, near Pillau.

SCHILLER

German Transatlantic Steam Nav. Co.; 1873; R. Napier & Sons; 3,421 tons; 380-5x40-1x24-4; 600 h.p.; 13 knots; compound indirect engines.

The German liner *Schiller*, Capt. J. G. Thomas, left New York on March 27th, 1875, bound for Hamburg. She carried a crew of 101 and 254 passengers. She also carried the Australian and New Zealand mails and 300,000 dollars *in specie*. On nearing England the ship encountered thick fog which lasted for three days. The first officer, revealed later that the *Schiller* was out of her reckoning. They thought they were 25 miles from land. They had had fog for three days, had been unable to take observations and had not once taken soundings.

At about 10.30 on the night of May 7th the *Schiller*, running at half-speed, was close to the Scilly Isles and heading straight for the Retarrier Ledges. The ship was within half a mile of the Bishop Rock Lighthouse but failed to hear the fog bell, and in a few minutes struck the rocks. Many on board were at first unaware of their danger but the force of the sea swung the ship broadside-on to the shore and the breakers soon began to wash over her. Distress signals were sent up but could not be seen. An attempt was made to launch the boats but the first capsized and during the night the funnel fell and smashed two other boats and two more were washed away by the seas.

Nearly 200 people were gathered in the deckhouse for safety. At about 2 a.m. this was washed overboard with all those sheltering

within it. An hour or so after the captain and several officers were swept from the bridge and drowned.

The weather cleared during the night and at daybreak boats from the islands and the steamship *Lady of the Isles* came to the rescue, but by that time only 41 people were alive on the wreck.

SCHUYLKILL

N. A. Galanos; 1892; Globe Iron Works Co.; 2,206 tons; 274-8x40-4x13-3; 175 n.h.p.; triple-expansion engines. The American steamship *Schuyllkill* was torpedoed and sunk by a submarine in the Mediterranean on November 21st, 1917.

SCHWANECK

Deutsche Dampfs. Ges. Hansa; 1939; Deutsche Schiff- u. Maschinbau A.G. Seebeck; 2,194 tons; 305-2x44-8x16-7; 286 n.h.p.; triple-expansion engines & L.P. turbine.

The German steamship *Schwaneck* struck a mine and sank on November 16th, 1941, N.E. of Stettin.

SCHWANHEIM

Unterweser Reederei A.G.; 1936; Bremer Vulkan; 5,339 tons; 423-8x55-8x25; 793 n.h.p.; oil engines.

The German motorship *Schwanheim* was bombed and sunk by Allied aircraft on August 13th, 1944, off Royan, River Gironde.

SCIENCE

Westcott & Laurance; 1868; W. Pile & Co.; 1,299 tons; 249x30-1x17-3; 142 n.h.p.; compound engines.

The British steamship *Science* sank after a collision with the steamship *Daybreak*, 2,922 tons, at the mouth of the River Tagus, on March 26th, 1899. She was carrying a cargo which included grain and wool from Odessa to Antwerp.

SCIENTIST

Charente S.S. Co.; 1938; Lithgows, Ltd.; 6,199 tons; 438-7x56-4x29-6; 867 n.h.p.; 13 knots; triple-expansion engines & L.P. turbine.

The steamship *Scientist*, Capt. G. R. Windsor, was captured and sunk by a German raider disguised as a Japanese merchantman on May 3rd, 1940, about 600 miles S.E. of St. Helena. Five men were killed, but Capt. Windsor and 23 others were taken prisoner and later transferred to another ship which put them ashore at Massawa, Italian East Africa, where they were placed in a prisoner-of-war camp. Here they remained until British army entered the port some months later and set them free.

SCILLA

Soc. Nazionale di Servizi Marittimi; 1866; Macnab & Co.; 1,220 tons; 268-3x30-4x18-2; 228 n.h.p.; triple-expansion engines.

The Italian steamship *Scilla* was sunk by a submarine in the Mediterranean on October 18th, 1915.

SCILLIN

FratelliBianchiSoc.diNav.; 1903; Russell & Co.; 1,579 tons; 248x36-8x21-7; 196 n.h.p.; triple-expansion engines. The Italian steamship *Scillin* was shelled and sunk by a British submarine on November 13th, 1942, nine miles from Kuriat, Tunisia.

SCIROCCO

Italian Navy, destroyer; 1934; Tirreno; 1,449 tons; 350x33-5x10; 44,000 s.h.p.; 38 knots; turbine engines; 3-drum boilers; four 4-7 in. guns, four 37 mm.A.A., four 13 mm.A.A., 6 T.T.

The destroyer *Scirocco* foundered in a gale in the Ionian Sea on March 23rd, 1942. The vessel carried a complement of about 200.

SCORTON

Chapman & Miller; 1882; J. Readhead & Co.; 1,545 tons; 259-2x36-1x17-5; 150 h.p.; compound engines. The British cargo ship *Scorton* was wrecked at Punta Secca, near Tunis, on June 6th, 1883, while on a voyage from Sulina to Gibraltar carrying a cargo of maize.

SCOTIA

SCOTIA

M. Lennard & Sons; 1879; R. Dixon & Co.; 1,099 tons; 230x31-7x16; 99h.p.; compound engines. The British steamship *Scotia* sank after a collision with the steamship *Joshua Nicholson*, 1,853 tons, near Cape Matapan on June 20th, 1889, while on a voyage from Braila to Marseilles carrying a cargo of grain.

SCOTIA

G. G. Ward; 1862; R. Napier & Sons; 4,676 tons; 379x47-8x37-7; 487n.h.p.; compound engines. The British steamship *Scotia* was wrecked on Catalan Bank, near Guam, on March 11th, 1904, while on a voyage from Hong Kong to Guam carrying a cargo of cable fittings.

SCOTIA

A/SD/SD.F.K.; 1924; AjSkoge Vcerft; 2,400 tons; 290-8x43-2x19-3; 277n.h.p.; triple-expansion engines. The Danish steamship *Scotia* was torpedoed and sunk by a German submarine on December 7th, 1939, on a voyage from Copenhagen to England. Nineteen of her crew were killed.

SCOTIA

London, Midland & Scottish Railway Co.; 1921; W. Denny & Bros.; 3,454 tons; 380-5x45-2x17-2; 2,717n.h.p.; 25 knots; turbine engines. The steamship *Scotia*, Capt. W. H. Hughes, D.S.C., was serving as an auxiliary transport during the evacuation of the British Army from the Dunkirk beaches. Whilst engaged in this duty on June 1st, 1940, the vessel was bombed and sunk by German aircraft. Thirty-two of her crew and between 200 and 300 of the 2,000 French troops on board were lost. Capt. Hughes was among the survivors. The full story of the Dunkirk evacuation is told under the destroyer *Grafton*.

SCOTIA

Lorentzerfs Skibs-AJS.; 1939; Bremer Vulkan; 9,972 tons; 492'9x66'1x36-4; 1,163n.h.p.; oil engines. The Norwegian tanker *Scotia* was torpedoed and sunk by a submarine on November 27th, 1943, about 250 miles W. of the Attu Atoll, on a voyage from the Persian Gulf to Melbourne. Eight of her crew of 39 were killed.

SCOTIA

Pacific Lumber Co.; 1919; Manitowoc S.B. Co.; 2,649 tons; 253-5x43-9x25-9; 326n.h.p.; triple-expansion engines. The American steamship *Scotia* ran ashore during a storm and was wrecked off Alcan Cove, Aleutian Islands, on December 23rd, 1943.

SCOTLAND MARU

Ono Shoji G.K.; 1919; Kawasaki Dockyard Co.; 5,863 tons; 385x51x36; 437n.h.p.; triple-expansion engines. The steamship *Scotland Maru*, on a voyage from Port Sudan to Moji, ran ashore and sank on April 7th, 1936, on Juroshima Island, Satsuma Province, Japan.

SCOTSMAN

British & North Atlantic S.N. Co.; 1895; Harland & Wolff; 7,101 tons; 470-7x49-2x31-9; 499 n.h.p.; triple-expansion engines. The British steamship *Scotsman* was wrecked at Chateau Bay, Straits of Belle Isle, on September 28th, 1899. She was on a voyage from Liverpool to Montreal with general cargo and 200 passengers. Twelve passengers were drowned.

SCOTSTOUN

British Navy; 1925; A. Stephen & Sons; 17,046 tons; 553 x 70-4x38-7; 16 knots; turbine engines. The steamship *Scotstoun* was formerly the liner *Caledonia*, taken over by the Admiralty and fitted out as an auxiliary cruiser. On June 13th, 1940, she was torpedoed and sunk by a German submarine about 200 miles W. of Inishtrahull. Six of her complement of about 350 were lost.

628

SCOTT

British Navy, destroyer; 1917; Cammell Laird; 1,801 tons; 332x31x10-5; 40,000s.h.p.; 36-5 knots; turbine engines; Yarrow boilers; five 4-7 in. guns, one 3 in., two 2 pdr., 6T.T. The destroyer *Scott* was one of the newest and largest vessels of her class serving in the First World War. On August 15th, 1918, when patrolling off the coast of Holland, she was torpedoed and sunk by a German submarine. Her official complement was 164.

SCOTTISH CHIEF

Tankers Ltd.; 1928; Armstrong Whitworth & Co.; 7,006 tons; 441x57x33-8; 766n.h.p.; 11-5 knots; quadruple-expansion engines. The tanker *Scottish Chief*, Capt. T. Thorogood, was torpedoed and sunk by a submarine on November 19th, 1942, about 250 miles S.E. by S. of Durban. Capt. Thorogood and 35 others were lost.

SCOTTISH MAIDEN

Tankers Ltd.; 1921; Vickers Ltd.; 6,993 tons; 425-3x57x33-2; 446 n.h.p.; 10 knots; oil engines. The tanker *Scottish Maiden*, Capt. J. W. Gibson, was torpedoed and sunk by a German submarine in the North Atlantic on November 5th, 1940. Sixteen men were killed. Capt. Gibson was among the survivors.

SCOTTISH MINSTREL

Tankers Ltd.; 1922; Vickers Ltd.; 6,998 tons; 425-3x57x33-2; 698 n.h.p.; 10-5 knots; oil engines. The tanker *Scottish Minstrel*, Capt. P. Dunn, was torpedoed by a German submarine in the North Atlantic, about 170 miles W. of the island of Colonsay on the west coast of Scotland on July 16th, 1940. The vessel remained afloat for many hours but it proved impossible to save her and she sank on the 17th. Nine men were killed. Capt. Dunn was among the survivors.

SCOTTISH MONARCH

Monarch Steamship Co.; 1906; Russell & Co.; 5,043 tons; 400x52-2x27-4; 369 n.h.p.; 11 knots; triple-expansion engines. The steamship *Scottish Monarch* was intercepted by a German submarine 40 miles S. of Ballycotton Light on June 29th, 1915. The enemy opened fire from the surface and sank the *Scottish Monarch*, killing 15 men. The captain was among the survivors.

SCOTTISH STANDARD

Tankers Ltd.; 1921; Vickers Ltd.; 6,999 tons; 425-3x57x33-2; 10-5 knots; oil engines. The tanker *Scottish Standard*, Capt. J. Ward, was attacked by a German dive-bomber in the North Atlantic on February 21st, 1941, and set on fire. On the next day she was torpedoed and sunk by a German submarine. Five men were killed. Capt. Ward was among the survivors.

SCOTTISH TRADER

Trader Navigation Co.; 1938; J. L. Thompson & Sons; 4,016 tons; 390'1x54-7x22'5; 328 n.h.p.; triple-expansion engines. The British cargo ship *Scottish Trader* left Philadelphia on November 15th, 1941, on a voyage to Liverpool carrying a general cargo. She called at Sydney, N.S., and sailed from there on November 22nd, but no subsequent information was received. She carried a crew of 37 and six gunners.

SCOTTSBURG

Lykes Bros. S.S. Co.; 1919; New York S.B. Corp.; 8,001 tons; 419-4x56-5x30-2; 577n.h.p.; quadruple-expansion engines. The American steamship *Scottsburg* was torpedoed and sunk by a German submarine on June 14th, 1942, between Hampton Roads and Trinidad. Six of her crew were killed.

SCULPTOR

Charente S.S. Co.; 1912; A. McMillan & Son; 4,874 tons; 400-6x52-1x27-4; 458 n.h.p.; 11 knots; triple-expansion engines. The steamship *Sculptor* was torpedoed by a German submarine 60 miles N.W. by W. ±W. of Oran on May 17th, 1918. The captain and six men were killed. The ship was beached and became a total wreck.

SEA GLORY

Dover Navigation Co.; 1919; Swan, Hunter & Wigham Richardson; 1,964 tons; 290x42-5x18-9; 318 n.h.p.; triple-expansion engines.

The British cargo ship left Fowey on July 5th, 1940, carrying a cargo of china clay to Philadelphia but was subsequently lost without trace. She carried a crew of 30 and one gunner.

SEA GULL

Leach & Co.; 1899; Mackie & Thomson; 976 tons; 225x33x 14-3; 184n.h.p.; 9 knots; triple-expansion engines. The steamship *Sea Gull* was torpedoed and sunk by a German submarine seven miles N.E. of Lynas Point on March 17th, 1918. The captain and 19 men were killed.

SEA SERPENT

Leach & Co.; 1898; A. McMillan & Son; 902 tons; 225-5X 33x12-2; 78 r.h.p.; triple-expansion engines. The British ship *Sea Serpent* struck a mine and sank off Folkestone Pier on March 23rd, 1916. The captain and 13 of the crew were killed.

SEA VENTURE

Dover Navigation Co.; 1930; Swan, Hunter & Wigham Richardson; 2,327 tons; 294 • 1 x 43 • 1 X18 • 8; 206 n.h.p.; triple-expansion engines.

The British steamship *Sea Venture*, on a voyage from the Tyne to Tromso with coal, was torpedoed and sunk by a German submarine on October 20th, 1939, off the Shetland Islands.

SEACONNET

Shawmut S.S. Co.; 1911; Great Lakes Engineering Works; 2,294 tons; 247x43-7x28-4; 211 n.h.p.; triple-expansion engines.

The American steamship *Seacourt* struck a mine and sank in the North Sea on June 18th, 1916.

SEACONNET

C. H. Sprague & Sons; 1918; New York S.B. Corp.; 3,372 tons; 318-5x49-5x24-2; 318 n.h.p.; triple-expansion engines. The American steamship *Seaconnet*, on a voyage from Norfolk to Boston with coal, foundered in heavy weather on April 29th, 1923, off Vineyard Haven.

SEAFORTH

Elder Dempster Lines; 1939; Caledon S.B. & E. Co.; 5,459 tons; 378x52-7x21-3; 598n.h.p.; 12-5 knots; oilengines. The liner *Seaforth*, Capt. W. Minns, was torpedoed and sunk by a German submarine on February 18th, 1941, about 350 miles W. of the island of Lewis. All on board, ten passengers and 49 crew, were lost.

SEAKAY

Keystone Tankship Corp.; 1942; Sun S.B. & D.D. Co.; 10,342 tons; 503-9x68-3x36-9; 1,726n.h.p.; turbine engines. The American tanker *Seakay* was torpedoed and sunk by a German submarine on March 18th, 1944, on a voyage from Curacao to Avonmouth with 14,000 tons of vapour oil. One of her crew was killed.

SEANG CHOON

Lim Chin Tsong; 1891; Harland & Wolff; 5,807 tons; 445-5 x 49-1x29-7; 650 n.h.p.; 12 • 5 knots; triple-expansion engines. The steamship *Seang Choon* was torpedoed and sunk by a German submarine ten miles S.W. of Fastnet on July 10th, 1917. Nineteen men were killed. The captain was among the survivors.

SEATTLE

Hamburg-Amerika Linie; 1928; Deutsche Werft; 7,369 tons; 461-6x61-6x27-7; 1,845 n.h.p.; oil engines. The German motorship *Seattle* was bombed and sunk by British aircraft on April 9th, 1940, off Norway.

SEATTLE MARU

Osaka Shosen K.K.; 1909; Kawasaki Dockyard Co.; 5,773 tons; 419-7x49-5x30; 544n.h.p.; triple-expansion engines. The steamship *Seattle Maru* was torpedoed and sunk by the U.S. submarine *Piranha* on July 16th, 1944, about 100 miles N.W. of Luzon Island, Philippines.

SEATTLE SPIRIT

U.S. Maritime Commission; 1919; J. F. Duthie & Co.; 5,627 tons; 409-5x54-2x27-6; 359n.h.p.; triple-expansion engines. The American steamship *Seattle Spirit* was torpedoed and sunk by a German submarine on June 18th, 1942, on a voyage from Reykjavik to New York.

SEBASTIAN

Lane & Macandrew; 1914; Caledon S.B. & E. Co.; 3,110 tons; 310-2x45-2x24-7; oil engines. The British tanker *Sebastian* was destroyed by fire in lat. 40° 28' N., long. 70° 03' W., on May 10th, 1917. She was employed as an Admiralty oiler and was carrying petroleum from New York to Havre.

SEBASTIAN CERMENO

U.S. War Shipping Administration; 1943; Marinship Corp.; 7,194 tons; 422-8x57x34-8; 339 n.h.p.; triple-expansion engines. The steamship *Sebastian Cermeno* was torpedoed and sunk by a German submarine on June 27th, 1943, on a voyage from Mombasa to Bahia. Nine of her crew were killed.

SEBASTIANO

Fratelli Bianchi; 1897; Tyne Iron S.B. Co.; 3,995 tons; 365X 47x27; 329 n.h.p.; triple-expansion engines. The Italian steamship *Sebastiano* was sunk by a submarine in the Mediterranean on August 9th, 1916.

SEBASTIANO BIANCHI

Fratelli Bianchi Soc. di Nav.; 1920; Bremer Vulkan; 1,546 tons; 247-3x35-9x19-5; 130 n.h.p.; triple-expansion engines. The Italian steamship *Sebastiano Bianchi* struck a mine and sank on December 13th, 1940, E.N.E. of Cape Spartivento.

SEBASTIANO VENIERO

Sidarma; 1940; Italy; 6,310 tons; oilengines. The Italian motorship *Sebastiano Veniero* was torpedoed and sunk by a British submarine on December 9th, 1941, five miles S. of Navarino.

SECUNDR

British India S.N. Co.; 1883; A. & J. Inglis; 2,610 tons; 310X 39-2x25; 267 n.h.p.; compound engines. The British cargo ship *Secundra* struck a rock off Galle on December 9th, 1904, while on a voyage from Calcutta to Bombay carrying a general cargo. The ship sank in two minutes with the loss of seven lives.

SEADLER

German Navy, torpedo boat; 1926; Wilhelmshaven Yard; 800 tons; 277-7x27-5x9-2; 24,000 s.h.p.; 33 knots; turbine engines; Schulz-Thornycroft boilers; three 4-1 in. guns, two 1pdr. 6T.T.

The German torpedo boats *Iltis* and *Seeadler* were escorting a convoy in the English Channel in the early hours of May 13th, 1942, when they were attacked by British light forces near Boulogne. The night was rainy with a heavy sea and visibility was poor, enabling the British to discharge torpedoes at close range and to sink both torpedo boats.

The vessels carried a normal complement of 123. The number of casualties is not known.

SEEBURG

German Government; 1940; Burmeister & Wain; 12,181 tons; 528 x 70x43-4; oil engines. The motorship *Seeburg* was built to the order of British owners as the *Adelaide Star*, taken over by the Germans on completion. She struck a mine and sank on December 4th, 1944, in Puck Bay, Poland.

SEEFÄHRER

SEEFÄHRER

German Government; 1905; J. L. Thompson & Sons; 2,978 tons; 315-1 X 46-5 X 20-8; 264 n.h.p.; triple-expansion engines. The steamship *Seefahrer* was formerly the Norwegian *Anglo*, taken over by the Germans. She struck a mine and sank on April 18th, 1942, N.W. of Juist.

SEEVOGEL

Georg Freymann; 1924; Helsingors Jernskib & Maskin.; 1,404 tons; 249'5x38-1x16-9; triple-expansion engines. The German steamship *Seevogel*, on a voyage from Karlsvik to Amsterdam, ran aground off North Oland on December 6th, 1959. The ship got off and continued her voyage but the next day a severe gale developed and she was driven ashore near Brano, broke in two and sank.

SEEW0

Indo-China S.N. Co.; 1880; J. Duthie, Sons & Co.; 1,437 tons; 242-2x31x17-3; ISO.h.p.; compound engines. The British steamship *Seewo* was wrecked on Shang Rock, China, on March 18th, 1885. She was on a voyage from Shanghai to Amoy carrying a general cargo.

SEGOVIA

Den Norske Middelhavslinje A/S; 1922; Wood., Skinner & Co.; 1,387 tons; 260-5x37^-7x14-8; 282n.h.p.; oilengines. The Norwegian motorship *Segovia*, with a crew of 22, left Lisbon on January 7th, 1940, and Oporto on the 17th for Bergen and Oslo. She was last seen in the latitude of Land's End on the 23rd and was considered to have been sunk by a German submarine.

SEGUNDO

Skibs-A/S Awilco; 1925; Burmeister & Wain; 4,414 tons; 368-5x53-7x24-9; 450n.h.p.; oilengines. The Norwegian motorship *Segundo* was torpedoed and sunk by a German submarine on August 27th, 1941, on a voyage from Liverpool to St. Thomas. Seven of her crew were killed.

SEIA MARU

Osaka Shosen K.K.; 1939; Harima Zosen-sho K.K.; 6,659 tons; 438-8x58-6x32-8; turbine engines. The steamship *Seia Mam* was bombed and sunk by U.S. land-based aircraft on August 1st, 1944, off the Sula Islands.

SEIAN MARU

Soukamoto Shoji K.K.; 1911; Ramage & Ferguson; 1,990 tons; 272-1x41-2x17-9; 264 n.h.p.; triple-expansion engines. The steamship *Seian Maru* was torpedoed and sunk by the U.S. submarine *Snapper* on October 1st, 1944, 375 miles south of Yokosuka.

SEIAN MARU

Dairen Risen K.K.; 1938; Tarna S.B. Co.; 3,712 tons; 350-7x50-2x24-5; 453 n.h.p.; oilengines. The motor vessel *Seian Maru* was sunk by U.S. carrier-based aircraft on November 19th, 1944, in Manila Bay.

SEIFUKU MARU

Kokusai Kisen K.K.; 1918; Kawasaki Dockyard Co.; 5,557 tons; 385 x 51 x 36; 436 n.h.p.; triple-expansion engines. The steamship *Seifuku Maru*, on a voyage from Bombay to Osaka, was wrecked off Nagashima, Japan, on September 25th, 1921.

SEIKAI MARU

Kita Nippon Kisen K.K.; 1919; J. Priestman & Co.; 3,108 tons; 331-3x46-8x23-2; 429 n.h.p.; triple-expansion engines. The Japanese passenger cargo steamship *Seikai Maru* was torpedoed and sunk by the U.S. submarine *Guardfish*, Lt.Cdr. T. B. Klakring, U.S.N. The attack took place in the neighbourhood of Yokohama on August 24th, 1942. The steamship was just coming out of harbour when she was struck by two torpedoes.

SEIKAI MARU

Toa Kaiun K.K.; 1940; Uraga Dock Co.; 2,663 tons; 307-2x 45x24-9; turbine engines. The steamship *Seikai Maru* was taken over by the Japanese Navy

and converted into an auxiliary gunboat. On September 16th, 1943, she struck a mine and sank off New Ireland in the Bismarck Archipelago.

SEIKAI MARU

Osaka Shosen K.K.; 1920; Osaka Iron Works; 3,180 tons; 305x43-7x24-9; 288 n.h.p.; triple-expansion engines. The steamship *Seikai Maru* was bombed and sunk by U.S. land-based aircraft on January 23rd, 1944, off Mergui, Burma.

SEIKAN MARU No. 1

Japanese Government; 1926; Yokohama Dock Co.; 2,326 tons; 356 x 52x20; 367 n.h.p.; turbine engines. The train ferry *Seikan Maru No. 1* was sunk by U.S. carrier-based aircraft on July 14th, 1945, in the Tsugaru Strait.

SEIKAN MARU No. 2

Japanese Government; 1930; Kawasaki Dockyard Co.; 2,493 tons; 360 x 52x20; turbine engines. The train ferry *Seikan Maru No. 2* was sunk by U.S. carrier-based aircraft on July 14th, 1945, in Rikuoka Bay, Japan.

SEIKAN MARU No. 3

Japanese Government; 1939; Uraga Dock Co.; 2,787 tons; 360-9x52x21-6; 733 n.h.p.; turbine engines. The ferry *Seikan Maru No. 3* was sunk by U.S. carrier-based aircraft on July 14th, 1945, off Hakodate.

SEIKAN MARU No. 4

Japanese Government; 2,903 tons. The ferry *Seikan Maru No. 4* was sunk by U.S. carrier-based aircraft on July 14th, 1945, off Hakodate.

SEIKAN MARU No. 5

Japanese Government; 2,792 tons. The train ferry *Seikan Maru No. 5* was sunk in a collision on March 6th, 1945, off the north-west coast of Honshu Island, Japan.

SEIKAN MARU No. 10

Japanese Government; 2,900 tons. The ferry *Seikan Maru No. 10* was sunk by U.S. carrier-based aircraft on July 14th, 1945, off Hakodate.

SEIKAN MARU No. 11

Japanese Government; 1945; Uraga Dock K.K.; 3,142 tons; 371-3x52x22-3; turbine engines. The train ferry *Seikan Maru No. 11* sank during a typhoon on September 26th, 1954, in the vicinity of Hakodate, Japan. All on board were lost.

SEIKI MARU

Nichiro Gyogyo K.K.; 1919; Cholberg Shipyard; 1,036 tons; 199x40x16x7; 49 n.h.p.; oilengines. The auxiliary four-masted barquentine *Seiki Maru* was torpedoed and sunk by the U.S. submarine *S-41* on May 28th, 1943, off the Kurile Islands.

SEIKO MARU

Dairen Kisen K.K.; 5,385 tons. The steamship *Seiko Maru* was sunk by U.S. carrier-based aircraft on February 17th, 1944, in the Caroline Islands.

SEIKYO MARU

Chosen Yusen K.K.; 1934; Uraga Dock Co.; 2,608 tons; 298-3 x 45x23-8; 180 n.h.p.; triple-expansion engines & L.P. turbine. The steamship *Seikyo Maru* was taken over by the Japanese Navy and converted into an auxiliary gunboat. On October 23rd, 1942, she was torpedoed and sunk by the U.S. submarine *Kingfish* about 100 miles S. of Susami, Japan.

SEIKYO MARU

Toa Kaiun K.K.; 1921; Osaka Iron Works; 2,565 tons; 284-5 X 42-5x23; 288 n.h.p.; triple-expansion engines. The steamship *Seikyo Maru* was bombed and sunk by U.S. land-based aircraft on February 5th, 1944, about 125 miles E. of Hong Kong.

SELBO

SELBO

Skibs-AIS Selvik; 1921; Ouse S.B. Co.; 1,778 tons; 255-7x40-1x16-1; 169 n.h.p.; triple-expansion engines. The Norwegian steamship *Selbo* was bombed and sunk by German aircraft on November 28th, 1942, 15 miles off Cape Cavallo, Algeria. Eleven of her crew were killed.

SELFRIDGE

United States Navy, destroyer; 1937; New York S.B. Corp.; 1,850 tons; 381x36-5x10-5; 50,000 s.h.p.; 37 knots; turbine engines; six 5 in. guns, six 40 mm., 8 T.T.
The United States destroyer *Selfridge* was one of a small flotilla which took part in the battle of Vella Lavella, in the Aleutian Islands, on October 6th, 1943. There was a fierce action between the Japanese and American destroyers in which both sides suffered losses. The *Selfridge* was torpedoed forward and sustained vital damage. It was not possible to keep her afloat, and she was scuttled by her crew. There were some casualties.

SELJE

A/S Rederiet Odffjell; 1921; W. Doxford & Sons; 6,598 tons; 420-1x54x34-4; 577 n.h.p.; triple-expansion engines. The Norwegian steamship *Selje*, on a voyage from Melbourne to England with grain, was sunk in a collision with the steamship *Kaituna*, 2,042 tons, on March 29th, 1929, 120 miles off Port Phillip.

SELJE

Skibs-AIS Selje; 1930; Palmers' Co.; 6,698 tons; 448-3x59-2x27-7; 409 n.h.p.; triple-expansion engines. The Norwegian steamship *Selje*, under German control, was bombed and sunk by British aircraft on May 15th, 1942, off the coast of Holland.

SELLINGE

Constants (South Wales); 1919; C. Rennoldson & Co.; 1,710 tons; 265-1x36-7x16-1; 216 n.h.p.; triple-expansion engines. The British cargo ship *Sellinge* was wrecked on La Banche rock, in Lat. 47° 14' N., long. 2° 30' W., on November 30th, 1933. She was on a voyage from Port Talbot to Nantes carrying a cargo of coal.

SELMA

M. H. Horsley; 1896; W. Doxford & Sons; 3,480 tons; 340x45-5x24-5; 292 n.h.p.; triple-expansion engines. The British cargo ship *Selma* was wrecked near Cape Frio on September 17th, 1910, while on a voyage from San Nicolas to Venice carrying a cargo of maize.

SELMA

S. O. Stray & Co.; 1906; Nylands Vcerksted; 1,654 tons; 270-2x39-2x17-7; 188 n.h.p.; triple-expansion engines. The Norwegian steamship *Selma* struck a mine and sank in the North Sea on October 25th, 1915.

SELVISTAN

Hindustan S.S. Co.; 1924; Short Bros.; 5,136 tons; 390x53-5x28-6; 363 n.h.p.; 10 knots; triple-expansion engines. The steamship *Selvistan*, Capt. Miles, was in a convoy bound to Halifax, N.S., on May 5th, 1943, when she was torpedoed and sunk by a German submarine. Six men were killed. Capt. Miles was among the survivors.

SEMANTHA

C. A. Batho; 1899; S. P. Austin & Son; 2,847 tons; 323-6x46-9x21-4; 265 n.h.p.; 9 knots; triple-expansion engines. The steamship *Semantha* was torpedoed and sunk by a German submarine ten miles N.W. by W. of Cape St. John, Crete, on October 14th, 1917. The captain and 31 men were lost.

SEMBILAN

N.V. Stoomv. Maats. Nederland; 1922; Maats. Fyenoord; 6,566 tons; 419-8x54-7x33-6; 840 n.h.p.; triple-expansion engines. The Dutch steamship *Sembilan*, loaded with munitions, was

torpedoed and sunk by the Italian submarine *Leonardo da Vinci* on April 17th, 1943, S.E. of Durban. Only one of her crew of 86, a Lascar, survived.

SEMBILANGAN

N.V. Nederlandsch-Indische Maats. voor Zeevaart I; 1923; Deutsche Werft; 4,990 tons; 399-6x54x27-4; 345 n.h.p.; triple-expansion engines.
The Dutch steamship *Sembilangan* was torpedoed and sunk by a German submarine on March 13th, 1943, 300 miles W. of Cape Finisterre on a voyage from Liverpool to Walvis Bay. The fourth engineer was the only survivor of her crew of 76 and 11 gunners.

SENGANG

Teong Hwa Leon Tjoen & Co.; 1914; Hong Kong & Whampoa Dock Co.; 1,207 tons; 235x38x14-5; 162 n.h.p.; triple-expansion engines.
The Dutch steamship *Senang* struck a mine and sank on January 16th, 1942, in the Strait of Malacca. Fifty-four of her complement were lost and 39 saved.

SENATOR

Nicholson Universal S.S. Co.; 1896; Detroit Dry Dock Co.; 3,994 tons; 410x45-4x23-9; 223 n.h.p.; triple-expansion engines. The American steamship *Senator*, on a voyage from Milwaukee to Detroit, was sunk in a collision on October 31st, 1929, off Port Washington, Lake Michigan.

SENDAI

Japanese Navy, light cruiser; 1923; Mitsubishi; 5,195 tons; 535x46-7x15-9; 70,000 s.h.p.; 33 knots; turbine engines; Kanpon boilers; seven 5-5 in. guns, two 3 in. A.A., 6 m.g., 8 T.T., 1 aircraft.
The Japanese light cruiser *Sendai* was a unit of a squadron of four cruisers and eight destroyers engaged in the defence of the island of Bougainville in the Solomons Group when the American forces landed there on November 1st, 1943. An American squadron under Rear-Admiral A. S. Merrill endeavoured to bring the Japanese to action during the afternoon but they retired to the northward. In the early hours of the following morning, however, they ran into Empress Augusta Bay and were intercepted by the U.S. ships. Like all night actions the fighting was confused and the results uncertain, but it was ascertained later that the *Sendai* and the large destroyer *Hatsukaze*, 2,000 tons, had been sunk by gunfire. The *Sendai* carried a complement of about 500. No American ship was lost in the action.

SENEGAL

British & African S.N. Co.; 1872; Cunliffe & Dunlop; 1,793 tons; 312x34x22-6; 275 h.p.; compound engines. The British steamship *Senegal* was wrecked near Tabou Point, Guinea, on June 2nd, 1887. She was on a voyage from Grand Bareley to Liverpool carrying a cargo of African produce.

SENJU MARU

Tatsuuma Shokai Goshi Kaisha; 1900; Furness, Withy & Co.; 4,340 tons; 354-1x50-3x20-3; 380 n.h.p.; triple-expansion engines.
The Japanese steamship *Senju Maru* was sunk by a submarine in the Mediterranean in November, 1915.

SENKAI MARU

Shimatani Risen K.K.; 1926; Mitsui Bussan Kaisha; 2,095 tons; 275x40-7x21; 150 n.h.p.; triple-expansion engines. The steamship *Senkai Maru* was torpedoed and sunk by the U.S. submarine *Amber Jack* on October 7th, 1942, S. of the Caroline Islands.

SENSAN MARU

Dairen Kisen K.K.; 1929; Mitsui Bussan Kaisha; 2,775 tons; 326-5x46-5x21-5; 271 n.h.p.; oil engines. The motorship *Sensan Maru* was bombed and sunk by U.S. land-based aircraft on January 18th, 1943, in the Admiralty Islands.

SENTA

Rederiaktieb. Ovintu; 1887; Russell & Co.; 1,024 tons; 205X 33-5x19-8.

The Swedish sailing ship *Senta* was sunk by a German submarine in the Kattegat on December 4th, 1916.

SENTA

Rederi A/B. Frode; 1905; Scheepswerf v. Jan Smit, Czn.; 1,497 tons; 251-3x37-8x16-3; 175 n.h.p.; triple-expansion engines.

The Swedish steamship *Senta* was bombed and sunk by British aircraft on June 12th, 1942, off Borkum.

SENTA

OleLokke; 1917; Union Iron Works Co.; 3,785 tons; 340 x 48-2x26; 325n.h.p.; triple-expansion engines. The Norwegian steamship *Senta* left Halifax on October 6th, 1942, in convoy for Belfast. At 4.20 a.m. on the 13th the convoy was attacked by submarines. Gun flashes were observed in the direction of her convoy station but by daybreak the *Senta* had disappeared.

SENYO MARU

Toyo Risen K.K.; 1937; Mitsubishi Jukogyo K.K.; 2,904 tons; 305-4x45-3x26-2; 202n.h.p.; triple-expansion engines. The steamship *Senyo Mam* was taken over by the Japanese Navy and converted into an auxiliary gunboat. On August 25th, 1942, she was torpedoed and sunk by the U.S. submarine *Growler S.* of Kaohsiung, Formosa.

SENZAN MARU

OgawaGomeiKaisha; 1918; ChitoseK.K.; 1,151 tons; 224 -5 x 33x18-7; 80 n.h.p.; triple-expansion engines. The steamship *Senzan Maru* was sunk by U.S. carrier-based aircraft on July 14th, 1945, off the Tsugaru Strait.

SEQUANA

Cie. de Nav. Sud Atlantique; 1898; Workman, Clark & Co.; 5,557 tons; 430 x 50 • 2 x 28 • 5; 471 n.h.p.; triple-expansion engines.

The French steamship *Sequana* was torpedoed and sunk by a German submarine in the Bay of Biscay on June 8th, 1917.

SERAFIN BALLESTEROS

Soc. Anon. Fabrica de Mieres; 1891; Palmers' Co.; 2,942 tons; 313x41-2x20-6; 260n.h.p.; triple-expansion engines. The Spanish steamship *Serafin Ballesteros* was sunk in a collision on July 19th, 1928, off Cape Roca, Portugal.

SERAGLIO

Raeburn & Verel; 1882; R. Steele & Co.; 1,816 tons; 275-5x 35x23-4; 175 h.p.; compound-inverted engines. The British cargo ship *Seraglio* ran into a cyclone in the Arabian Sea on June 13th, 1885, and foundered after her steering gear was disabled. She was on a Voyage from Cardiff to Bombay with a cargo of coal and acids.

SERAPIS

J. Crass & Co.; 1877; R. Dixon & Co.; 1,932 tons; 286-2X34-8x23; 192 n.h.p.; 9 knots; compound engines. The steamship *Serapis* was torpedoed and sunk by a German submarine 106 miles N.N.W. of Tory Island on June 26th, 1917. Nineteen men were killed. The captain and chief officer were taken prisoner aboard the submarine.

SERBINO

EllermanLines; 1919; Ramage & Ferguson; 4,099 tons; 342-4 X 46x24-8; 388 n.h.p.; triple-expansion engines. The British steamship *Serbino*, on a voyage from Mombasa to Liverpool, was torpedoed and sunk by a German submarine on October 21st, 1941, about 400 miles W. of the Fastnet. Fourteen of her complement were lost.

SERDICA

A. Lauro; 1920; Bremer Vulkan; 1,533 tons; 247-5x35-9x 19-5; 103 n.h.p.; triple-expansion engines. The Italian steamship *Serdica* was bombed and sunk by British aircraft on May 1st, 1941, at Benghazi.

SERENTAS

Soc. Anon. Nova Genuensis; 1918; Sunder land S.B. Co.; 5,171 tons; 409-4x52-3x28-5; 320 n.h.p.; triple-expansion engines. The Italian steamship *Serentias* was bombed and sunk by British aircraft on July 5th, 1940, at Tobruk.

SERENO

P. Trucchi; 1918; Buffalo Dry Dock Co.; 1,409 tons; 261x 43-5x22-4; 330 n.h.p.; triple-expansion engines. The Italian steamship *Sereno* was torpedoed and sunk by British aircraft on July 20th, 1940, at Tobruk.

SERGEI KIROV

U.S.S.R.; 1925; Blyth S.B. & D.D. Co.; 4,146 tons; 370-2X 51-2x24-9; 351 n.h.p.; triple-expansion engines. The Russian steamship *Sergei Kirov* was torpedoed and sunk by a German submarine on October 5th, 1945, in the Kara Sea.

SERIA MARU

Mitsubishi Kisen K.K.; 10,238 tons. The tanker *Seria Maru* was sunk by unidentified aircraft on July 28th, 1945, off Yawata, Japan.

SERICA

Findlay; 1863; R. Steele, Greenock; 708 tons; 185-9x31-1x 19-6.

The China tea clipper *Serica*, Capt. Innes, left Hong Kong on 2nd November, 1872, homeward bound. Shortly afterwards she was wrecked on the Paracel Islands. She carried a company of 29, of whom 9, including the captain, got away on a raft, but perished from exposure and starvation.

Another raft with the remainder of the crew was smashed to pieces on the Triton Rocks, the boatswain being the sole survivor.

During her short career of just over nine years the *Serica* was one of the leading clippers in the China tea trade.

SERICA

R. Gordon & Co.; 1888; Sunderland S.B. Co.; 2,652 tons; 321 -5x40-2x19; 210h.p.; triple-expansion engines. The British steamship *Serica* was wrecked in St. Mary's Sound, Scilly Islands, on November 24th, 1893. She was carrying a cargo coal from Barry Dock to Port Said.

SEROOSKERK

Vereenigde Nederlandsche Scheepvaart Maats.; 1922; New Waterway S.B. Co.; 8,456 tons; 485-6x60-4x27-8; 1,000n.h.p.; turbine engines.

The Dutch steamship *Serooskerk*, in convoy from Loch Ewe to Durban, straggled from convoy on December 5th, 1942. She was torpedoed and sunk on the 7th by the German submarine *U-155*, with the loss of her entire complement of 90.

SERPENS

U.S. Navy; 1943; California S.B. Corp.; 7,176 tons; 422x 57x34-8; 339 n.h.p.; triple-expansion engines. The American steamship *Serpens*, loaded with munitions, was sunk by the Japanese on January 29th, 1945, off Tulagi, Solomon Islands. Her entire complement of about 200 were lost.

SERPENT

British Navy, 3rd class cruiser; 1888; Devonport Dockyard; 1,770 tons; 225x36x14-5; 4,500 i.h.p.; 17 knots; triple-expansion engines; six 6 in. guns, eight 3 pdr., 2 m.g. The light cruiser *Serpent*, Cdr. H. L. Ross, left Devonport on Saturday, November 8th, 1890, for the West African Station. She carried a complement of 176, and was a fairly new vessel. On the night of Monday the 10th the *Serpent* was off Punta del Buey and within sight of the light on Cape Villano. There was a heavy swell with a strong current setting into the bay, and it was raining. The cruiser was proceeding at half speed. Those on watch could not distinguish through the rain the light on Cape Villano and as a consequence they were dangerously near to shore, when, at about 10.30 they struck upon the Punta Buey Reef. The boats were ordered out but were instantly swept away by the violence of the seas and within a short time nearly everyone on board was drowned. Only three seamen managed to get ashore.

SERPHO

Neptune S.S. Co.; 1881; J.Laing; 1,620 tons; 254-5x34x17-3; 150h.p.; compound engines.

The British steamship *Serpho* ran into a heavy gale in lat. 45° N., long. 9° W., on November 24th, 1887. She was thrown on her beam ends, filled and sank. She was on a voyage from Nicolaieff to Sharpness carrying a cargo of barley.

SERRANA

Scrutton & Sons; 1905; J. Readhead & Sons; 3,677 tons; 353-4 X 47-6x15-3; 399 n.h.p.; 11 knots; triple-expansion engines. The steamship *Serrana* was torpedoed and sunk by a German submarine ten miles W. of St. Catherine's Point on January 22nd, 1918. Five men were killed. The captain was among the survivors.

SERULA

Cork Steamship Co.; 1905; Swan, Hunter & Wigham Richardson; 1,388 tons; 260x34-7x18-5; 210n.h.p.; 9 knots; triple-expansion engines.

The steamship *Serula* was torpedoed and sunk by a German submarine 13¹/₂ miles N.E. of Strumble Head on September 16th, 1918. The captain and 16 men were lost.

SESOSTRIS

A. & R. Klat; 1915; J. Blumer & Co.; 2,962 tons; 340x47-7X20-5; 363 n.h.p.; triple-expansion engines.

The Egyptian steamship *Sesostris*, in convoy from Halifax to Liverpool, was lost with all on board during a submarine attack on the convoy on January 30th, 1941.

SESSA

U.S. Maritime Commission; 1936; Helsingors Jernskib & Maskin; 1,700 tons; 292x41-7x16-4; 234 n.h.p.; compound engines & L.P. turbine.

The Panamanian steamship *Sessa* was torpedoed and sunk by a German submarine on August 17th, 1941, 300 miles S.W. of Iceland on a voyage from New York to Reykjavik. Twenty-four of her crew of 27 were lost.

SETESDAL

S. O. Stray & Co.; 1912; Fredrikstads Mek. Verksted; 1,476 tons; 243X39-3x17-3; 150 n.h.p.; triple-expansion engines.

The Norwegian steamship *Setesdal* sank after a collision in the English Channel on September 3rd, 1916.

SETSUYO MARU

Hokkaido Tanko K.K.; 1921; Nitta Shipyard; 4,147 tons; 340X46-5X32-7; 348n.h.p.; triple-expansion engines. The

steamship *Setsuyo (Setuyo) Maru* was torpedoed and sunk by the U.S. submarine *Greenling* on October 4th, 1942, off Kamaishi, Japan.

SETSUZAN MARU

Japanese Government; 1925; Fredrikstad Mek. Verksted; 1,922 tons; 280-3x42-1x18; 188 n.h.p.; triple-expansion engines.

The steamship *Setsuzan Maru* was formerly the Norwegian *Helios*, captured by the Japanese in December, 1941. On July 6th, 1944, she was torpedoed and sunk by the U.S. submarine *Sealion* //about 100 miles E. of Ningpo, China.

SETTER

British Navy, destroyer; 1916; J. Samuel White & Co.; 1,040 tons; 274x26x11; 27,000s.h.p.; 36 knots; turbine engines; Yarrow boilers; three 4 in. guns, 4 T.T.

The destroyer *Setter* came into collision with the destroyer *Sylph*, 1,065 tons, in dense fog off Harwich on May 17th, 1917. The damage was so extensive that the *Setter* afterwards foundered. She carried a complement of 82, among whom there were no casualties.

SETIER

G. & J. Buns; 1906; Scott's S.B. & E. Co.; 956 tons; 225x33-1x15-5; 247n.h.p.; 10 knots; triple-expansion engines. The steamship *Setier* was torpedoed and sunk by a German submarine six miles N.W. by N. of Corsewall Point on September 13th, 1918. The captain and eight men were killed.

SETTSU MARU

Nippon Suisan K.K.; 1944; Hitachi Zosen K.K.; 9,329 tons; 470X64x39-4; turbine engines.

The steamship *Settsu Maru*, carrying whale meat collected from the whaling fleet, suffered heavy weather damage in the Antarctic on March 7th, 1953. On the 11th the ship began to take water in great quantities in way of the engine room and sank. It was later suggested that the water entered the ship through a sea valve deranged by faulty handling of the valve by an apprentice.

SETUBAL

O. Thoresen; 1898; Nylands Vcerksted; 1,201 tons; 215-8 X 32-1x18-5; 106n.h.p.; triple-expansion engines.

The Norwegian steamship *Setubalwas* sunk by a German submarine in the English Channel on September 8th, 1917.

SEVASTOPOL

Russian Navy, 1st class battleship; 1895; Galerii Island; 11,842 tons; 367-5x69x26; 10,600 i.h.p.; 17 knots; triple-expansion engines; four 12 in. guns, twelve 6 in., two 2% in., twelve 3 pdr., 8 m.g., 6 T.T.

The Russian battleship, *Sevastopol* Capt. von Essen, was one of the Pacific Squadron based on Port Arthur at the beginning of the Russo-Japanese War. The ship carried a complement of 651 and was engaged in the fighting on the seas around the fortress until the end of the siege, being the last of her division to be destroyed. After the loss of Admiral Makharoff in the *Petropavlovsk* (which see), the squadron returned to the inner harbour where they were shelled by the Japanese battleships outside. In replying to this fire, with her 12 in. guns at extreme elevation, the *Sevastopol* had the misfortune to damage the mounting of one gun at the first salvo. She seems to have been an unlucky ship, for at the sortie of June 23rd she nearly collided with the *Peresvyet*, her next ahead, and in avoiding this ship ran into the Russian minefield guarding the channel at the entrance to Port Arthur. A mine exploded on her port side and flooded a coal bunker and her 6 in. magazine, but she managed to make harbour next day.

At the battle of the Yellow Sea, on August 10th, she was repeatedly struck and set on fire, but the damage was of a superficial nature and she was able to return with the remnants of the Pacific Squadron. On August 23rd, the ship ran out of harbour to engage the enemy land batteries and on her return again strayed into her own minefield. She was badly damaged and was in dockyard hands for six weeks.

On the morning of the 2nd January, 1905, the *Sevastopol* was scuttled by her crew after having fought against the Japanese shore batteries for many months.

The full story of the Russian fleet at Port Arthur is told under the *Peresvyet*, flagship of the Rear-Admiral, which was among those lost.

SEVEN SEAS

Leach & Co.; 1888; W.B. Thompson & Co.; 1,194 tons; 250 X 32-2x15-4; 201 n.h.p.; 9-5 knots; triple-expansion engines.

The steamship *Seven Seas*, Capt. Barnes, was torpedoed and sunk by a German submarine six miles S. of Beachy Head about 4 p.m. on April 1st, 1915. The look-out saw the submarine just before the torpedo struck but nothing could be done to save life. The boats were lowered but were dragged under by the suction when the vessel sank. Of the 17 men who formed the crew nine, including Capt. Barnes, were drowned. A boat containing the survivors was picked up by a destroyer and the occupants conveyed to Newhaven.

SEVERN LEIGH

Kelston S.S. Co.; 1919; Caird & Co.; 5,242 tons; 400X 52-3x28-5; 517n.h.p.; triple-expansion engines.

The British steamship *Severn Leigh*, on a voyage from Hull to St. John, N.B., was torpedoed and sunk by a German submarine on August 23rd, 1940, about 1,000 miles W. of Ireland. Thirty-two of her crew and the gunner were lost.

SEVILLA

O. Thoresen; 1913; Wood, Skinner & Co.; 1,318 tons; 260X 37-6x15-7; 156n.h.p.; triple-expansion engines. The Norwegian steamship *Sevilla* was torpedoed and sunk by a German submarine in the English Channel on April 25th, 1918.

SEVILLA

Den Norske Middelhavslinje; 1921; Wood, Skinner & Co.; 1,383 tons; 260-5x37-7x14-8; 282 n.h.p.; oil engines. The Norwegian motorship *Sevilla*, on a voyage from Bergen to Lisbon with dried fish, was sunk in a collision on March 29th, 1947 off Ryvarden.

SHADWAN

Nelson, Donkin & Co.; 1877; C. S. Swan & Co.; 1,538 tons; 256-3x33-3x23-3; 150h.p.; compound engines. The British steamship *Shadwan* foundered about four miles off Berwick on November 28th, 1888. She was on a voyage from Fiume to Leith and her cargo included wheat, barley and flour.

SHAGBROOK

Harris & Dixon; 1884; W. Gray & Co.; 1,296 tons; 246-6x35-2x13-8; 215n.h.p.; triple-expansion engines. The British cargo ship *Snagbrook* sank after a collision with the steamship *Stokesley*, 1,047 tons, off Havre on October 23rd, 1900, while carrying a cargo of coal from Barry to Havre.

SHAHRISTAN

F. C. Strick & Co.; 1938; J. Readhead & Sons; 6,935 tons; 454x58-5x29-5; 706n.h.p.; 13 knots; triple-expansion engines & L.P. turbine.

The steamship *Shahristan*, Capt. E. H. Wilson, was torpedoed and sunk by a German submarine on July 29th, 1941, about 400 miles W.N.W. of Madeira. Capt. Wilson and 48 men were lost.

SHAHZADA

Asiatic Steam Navigation Co.; 1904; C. Cornell & Co.; 2,246 tons; 300-3x40-6x22-4; 277n.h.p.; 12knots; triple-expansion engines. The steamship *Shahzada* left the Sandheads, Calcutta, at 11 p.m. on Wednesday, July 13th, 1927, bound for Akyab with a cargo of coal. At 5.15 on the morning of the 14th, when 50 miles distant from the Sandheads the steamship began to sink with surprising suddenness. Those of the crew who were below deck were mustered as quickly as possible but before the lifeboats could be got out the steamship foundered. Five boats, which were fastened by chains, burst from their fastenings and floated to the surface and to these some of the crew managed to swim, baling them out and picking up other men. Altogether 51 were saved, but seven Europeans and 14 Indians were drowned, chiefly through the suction caused by the vessel's sinking. The survivors were picked up later by the *Clintonia* and brought to Calcutta.

SHAHZADA

Asiatic Steam Nav. Co.; 1942; Lithgows; 5,454 tons; 409-5X54x28-7; 500 n.h.p.; triple-expansion engines. The British steamship *Shahzada*, on a voyage from Mormugao to Suez, was torpedoed and sunk by a submarine on July 9th, 1944, about 600 miles S.S.W. of the Chagos Archipelago. The captain, 36 of the crew and nine gunners were lost.

SHAKESPEAR

Glover Bros.; 1926; R. Duncan & Co.; 5,029 tons; 407X 53-5x26-7; 531 n.h.p.; 10 knots; triple-expansion engines. The steamship *Shakespear* fought a protracted duel with an Italian submarine off Senegal, West Africa, on Monday, January 5th, 1941. The vessel, which carried a crew of 40 and two gunners, was armed with one small gun aft. With this she contrived to keep the submarine at bay for over two hours, refusing to surrender until her gun had been knocked out and 18 of her crew and both gunners killed. The survivors, including the captain, took to the boats and the *Shakespear* was then sunk by gunfire.

The commander of the submarine, Lt.Cdr. Salvatore Todaro, took the boats in tow until they came in sight of land and treated the survivors in a most humane manner. The losses on the submarine were two killed and several wounded.

SHANGHAI

China Navigation Co.; 1873; A. & J. Inglis; 3,088 tons; 291 X 42-2x24-8; 300h.p.; lever engines. The British paddle steamship *Shanghai*, Capt. Martin, caught fire six miles below Mud Fort, River Yangtsze, on December 25th, 1890,

while carrying passengers and a general cargo from Shanghai to Hankow. About 200 lives were lost. Subsequently the ship was salvaged and re-registered as a sailing vessel at Shanghai in 1893.

SHANGHAIMARU

Yamashita Kisen K.K.; 1919; Kawasaki Dockyard Co.; 4,103 tons; 345x48x30; 356n.h.p.; triple-expansion engines. The steamship *Shanghai Maru* was torpedoed and sunk by the U.S. submarine *Grayling* on April 9th, 1943, off Mindoro Island, Philippines.

SHAOHSING

China Navigation Co.; 1901; Scott & Co.; 2,123 tons; 290X 40-2x20-6; 146n.h.p.; triple-expansion engines. The British steamship *Shaohsing* was wrecked on Ariadne Rocks on July 7th, 1917, while on a voyage from Swatow to Wei-hai-Wei carrying a general cargo.

SHARK

British Navy, destroyer; 1912; Swan Hunter; 950 tons; 266 X 27-9x9; 25,000 i.h.p.; 36 knots; turbine engines; Yarrow boilers; three 4 in. guns. 4 T.T.

The destroyer *Shark* Cdr. L. W. Jones, was a unit of the 4th Flotilla at the battle of Jutland. At about 5.30 p.m., when the *Shark* was leading her division to attack the German 2nd Scouting Group (light cruisers) under Rear-Admiral Boedicker, she came under a concentrated fire which put her out of action, but not before she got off a torpedo at one of the cruisers. The prompt action of the *Shark* and her consorts prevented an attack developing from the German light forces on Admiral Hood's 3rd Battle Cruiser Squadron which was pressing von Hipper's retiring battle cruisers.

The *Shark* was now a floating wreck, with only two guns in action. Cdr. Jones, though wounded in the leg, made his way aft to connect and man the after wheel, as the destroyer's bridge and steering-gear had been shot away. The after gun was still firing but was blown away shortly after the commander reached it. He then went to the remaining gun where he and two seamen kept it going until his leg was shot off at the knee. A stoker improvised a tourniquet round his thigh, and he still managed to carry on, ordering a fresh ensign to be hoisted and encouraging his men. At last, when the *Shark* had been torpedoed by a German destroyer he gave orders for the survivors to don lifebelts and take measures for their own safety.

During the height of the action the destroyer *Acasta*, Lt.Cdr. Barron, came up and offered to take the *Shark* in tow, but this was declined by Cdr. Jones as he was well aware that it might involve the loss of both ships, the *Acasta* being already damaged.

The *Shark* sank with a loss of seven officers and 79 ratings, there being only six survivors. A posthumous award of the Victoria Cross was made to Cdr. Loftus Jones.

SHAWINIGAN

Canadian Navy, corvette; 1941; 925 tons; 193x32x16; 17 knots; quadruple-expansion engines; one 4 in. A.A. gun, several smaller.

The Canadian corvette *Shawinigan* was torpedoed by a German submarine in the Cabot Strait on November 24th, 1944. The vessel sank with all hands, seven officers and 84 ratings.

SHCHORS

U.S.S.R.; 1921; Werf Gusto; 3,770 tons; 359-4x50-3x22; 340n.h.p.; triple-expansion engines.

The Russian steamship *Shchors* struck a mine and sank on October 14th, 1942, in the Barents Sea.

SHEAF DON

W.A.Souter; 1917; Blyth S.B. & D.D. Co.; 2,172 tons; 279X 40-3x22-9; 330 n.h.p.; triple-expansion engines. The British cargo ship *Sheaf Don* was wrecked on Finsboerne Rock, near Langesund, on February 25th, 1926, while carrying a cargo of coal from the Tyne to Skien.

SHEAF MEAD

Sheaf S.S. Co.; 1924; R. Duncan & Co.; 5,008 tons; 404-9X 53x27-6; 476 n.h.p.; 11 knots; triple-expansion engines. The steamship *Sheaf Mead*, Capt. A. Still, was in the North

SHEAF MOUNT

Atlantic in convoy when she was torpedoed and sunk by a German submarine. The attack took place on May 27th, 1940, some 180 miles off Cape Finisterre. Capt. Still, and 30 of the crew were lost; five were saved

SHEAF MOUNT

Sheaf S.S. Co.; 1924; *R. Duncan & Co.*; 5,017 tons; 404-9x53x27-6; 476n.h.p.; 11 knots; triple-expansion engines. The steamship *Sheaf Mount*, Capt. R. de Gruchy, was in the North Atlantic in convoy when she was torpedoed and sunk by a German submarine. The attack took place on August 24th, 1942, and of the 51 officers and men who formed the crew, 31, including Capt. de Gruchy, were lost.

SHEERNESS

Clyde Shipping Co.; 1903; *Caledon S.B. & E. Co.*; 1,274 tons; 250X35•2x16•6; 293n.h.p.; triple-expansion engines. The British cargo ship *Sheerness* was wrecked off Tuskar Light on February 3rd, 1927, while carrying a general cargo from Dublin to Waterford.

SHEHERAZADE

U.S. War Shipping Administration; 1935; *Ateliers & Chantiers de la Seine Maritime*; 13,467 tons; 549 x 71 -9 x 39 -6; 815 n.h.p.; *d* engines.

The Panamanian tanker *Sheherazade* was formerly French, taken over by the Americans. On June 11th, 1942, she was torpedoed shelled and sunk by a German submarine between Hampton Roads and Houston. Only one man was killed.

SHELBRI 1

British Tanker Co.; 1928; *Swan, Hunter & Wigham Richardson*; 1,025 tons; 230x32-7x13-8; 286n.h.p.; oil engines. The coastal tanker *Shelbrit 1*, on a voyage from Grangemouth to Inverness in ballast, blew up, caught fire and sank on September 19th, 1940, in the Moray Firth. All her crew of 20 and the gunner were lost.

SHELTON

United States Navy, destroyer; U.S.A.; 1,450 tons; 306x36-9X-; 12,000s.h.p.; 28 knots; turbine engines; two 5 in. guns, two 40 mm. A.A., six 20 mm. A.A., 3 T.T. The United States destroyer *Shelton* was torpedoed by a Japanese submarine off Morotai Island on October 3rd, 1944. The vessel carried a complement of 220.

SHEPHERDESS

Ohio River Steamboat. The Ohio river steamboat *Shepherdess* was bound from Cincinnati to St. Louis, at 11 p.m. on the night of January 3rd, 1844, when she struck a snag. The estimated number of passengers on board was 200, most of whom were asleep. The snag—probably a large submerged tree—tore open the side of the hull, causing the boilers to fall into the river, followed by the twin funnels. The hurricane deck then collapsed.

The *Shepherdess*, which disintegrated within a few minutes, was less than three miles from St. Louis when the disaster occurred. Over 60 persons lost their lives.

SHIBAURA MARU

Chosen Yusen K.K.; 1918; *Hara Zosen Tekkosho*; 1,250 tons; 220 X 33x18-7; 86 n.h.p.; triple-expansion engines. The steamship *Shibaura Maru*, on a voyage from Osaka to Korea, ran into fog off Mokpo, Korea, struck a rock and foundered on July 8th, 1933.

SHIBAZONO MARU

Nippon Yusen K.K.; 1903; *Mitsubishi Dockyard & Engineering Works*; 1,831 tons; 256x36-5x14-3; 248 n.h.p.; triple-expansion engines.

The steamship *Shibazono (Sibazono) Maru* was torpedoed and sunk by the U.S. submarine *Kingfish* on January 3rd, 1945, 400 miles S.E. of Nagoya.

SHICHISEI MARU

Koun Risen K.K.; 1938; *Kawamiuami Kogyo K.K.*; 1,911 tons; 271-6x40x20-3; 150n.h.p.; triple-expansion engines. The steamship *Shichisei (Sitisei) Maru* was torpedoed and sunk by the U.S. submarine *Silversides* on December 29th, 1943, N.W. of the Palau Islands.

SHIGANOURA MARU

Mitsubishi Shoji K.K.; 3,512 tons. The steamship *Shiganoura Maru* was torpedoed and sunk by the U.S. submarine *Snook* on November 29th, 1943, 400 miles W. of the Ladrone Islands.

SHIGIZAN MARU

Hashimoto Kisen Kabushiki Kaisha; 1892; *Koninklijke Maats. de Schelde*; 2,828 tons; 349-3x37-7x25-6; 365 n.h.p.; quadruple-expansion engines.

The Japanese steamship *Shigizan Maru* struck a mine and sank in the Mediterranean on July 7th, 1917.

SHIGURE

Japanese Navy, destroyer; 1935; *Uraga*; 1,368 tons; 335-Sx x31-7x9-2; 38,000s.h.p.; 34 knots; turbine engines; Kanpon boilers; five 5 in. guns, 2 m.g., 8 T.T.

The Japanese destroyer *Shigure* was torpedoed and sunk by the U.S. submarine *Blackfin*, N.W. of Borneo, January 24th, 1945. The vessel carried a complement of over 200.

SHIGURE MARU

2,445 tons. The *Shigure Maru* was torpedoed and sunk by the U.S. submarine *Seadragon* on October 10th, 1942, off Balikpapan, Borneo.

SHIKINAMI

Japanese Navy, destroyer; 1929; *Maizuru*; 1,700 tons; 371 -5 x 33-8x9-8; 40,000s.h.p.; 34 knots; turbine engines; Kanpon boilers; six 5 in. guns, 4 A.A., m.g., 9 T.T.

The Japanese destroyer *Shikinami* was torpedoed and sunk in the South China Sea by the U.S. submarine *Growler* on September 12th, 1944. The destroyer's normal complement was 197.

SHIKISAN MARU

Mitsui Bussan Kaisha; 1925; *D. & W. Render son & Co.*; 4,725 tons; 400-2x53-3x26-2; 489n.h.p.; oil engines. The motor vessel *Shikisan (Sikisan) Maru* was torpedoed and sunk by the U.S. submarine *Dnum* on October 24th, 1944, about 150 miles N.W. of Luzon Island, Philippines.

SHILLONG

Peninsular & Oriental S.N. Co.; 1939; *A. Stephen & Sons*; 5,529 tons; 442-2x57-9x25-7; 688 n.h.p.; 14 knots; oil engines. The motorship *Shillong*, Capt. J. H. Hollow, was homeward bound in convoy from New York when she was torpedoed and sunk by a German submarine in the North Atlantic. The attack took place at about 10.15 p.m. on April 4th, 1943, and the vessel sank later. Sixty-seven of her crew of 70 and four of the eight gunners were lost. Capt. Hollow was rescued from the water by a small party of men on a raft but died from exposure on the following day before the raft was picked up.

SHILLONG

Peninsular & Oriental S.N. Co.; 1949; *Vickers* Armstrongs*; 8,934 tons; 522 x 67 • 3 X 29 • 5; turbine engines. The British steamship *Shillong* sank with the loss of three of her crew after a collision with the *Purfina Congo* about 190 miles S. of Suez on October 22nd, 1957. She was carrying passengers and a general cargo from Hamburg, via London, to Tsingtao. Her crew numbered 87 and there were six passengers.

SHIMA MARU

Settsu Shosen K.K.; 1920; *Teikoku S.S. Co.*; 1,987 tons; 270x39x23-9; 249 n.h.p.; triple-expansion engines. The steamship *Shima (Simd) Maru* was sunk by U.S. carrier-based aircraft on July 4th, 1944, off the Bonin Islands.

SHIMAKAZE

Japanese Navy, destroyer; 1942; Japanese Yard; 2,200 tons; 415x35x—; 34 knots; turbine engines; six 5 in. guns, eight 25 mm. A.A., 15 T.T.

The Japanese destroyer *Shimakaze* with others was escorting a convoy of four troopships bound for Leyte, Philippine Islands, November 11th, 1944. When in Ormoc Bay the ships were attacked by aircraft from fast carriers of the U.S. Third Fleet and four destroyers as well as the four transports, were sent to the bottom.

The *Shimakaze* carried a complement of over 200.

For further details see the destroyer *Hamanami*.

SHIMOSA

*La Plata S.S. Co.; 1902; Short Bros.; 4,221 tons; 370-6x48-7x18-9; 375 n.h.p.; 11 knots; triple-expansion engines. The steamship *Shimosa* was torpedoed and sunk by a German submarine 220 miles N.W. of Eagle Island, off Co. Mayo, on July 30th, 1917. The captain and 16 of the crew were lost.*

SHIMOTSU MARU

Mitsubishi Risen K.K.; 2,854 tons.

The tanker *Shimotsu (Simotsu) Mam* was torpedoed and sunk by the U.S. submarine *Barbero* on November 8th, 1944, about 200 miles W.S.W. of Olongapo, Philippines.

SHIMOTSUKI

Japanese Navy, destroyer; 1942; Japanese Yard; 2,500 tons; 435x38x—; 34 knots; turbine engines; eight 5 in. guns, several A.A., 4 T.T.

The Japanese destroyer *Shimotsuki* was torpedoed and sunk W. of Borneo and N. of the Karimata Channel on November 25th, 1944, by the U.S. submarine *Cavalla*.

The destroyer carried a complement of over 200.

SHIMPO MARU

Iino Kaiun K.K.; 5,135 tons.

The tanker *Shimpo (Simpō) Mam* was torpedoed and sunk by the U.S. submarines *Puffer* and *Bluefish* on August 12th, 1944, off the west coast of Mindoro Island, Philippines.

SHINAI MARU

*Kishimoto Kisen K.K.; 1921; Fujinagata Zosenho; 3,793 tons; 345 X 50 X 29; 342 n.h.p.; triple-expansion engines. The steamship *Shinai (Sin-ai) Mam* was bombed and sunk by U.S. land-based aircraft on March 3rd, 1943, in the Straits of Macassar.*

SHINAI MARU

*Japanese Government; 1920; Collingwood S.B. Co.; 2,410 tons; 251 X 43 • 6 X 23 • 6; 150 n.h.p.; triple-expansion engines. The steamship *Shinai Maru* was formerly the Canadian *Shinai*, seized by the Japanese. She was bombed and sunk by U.S. land-based aircraft on September 16th, 1944, in the Gulf of Bone, Celebes.*

SHINAN MARU

*Settsu Shosen K.K.; 1918; Ishikawajima S.B. & E. Co.; 1,278 tons; 230x33x19-6; 88 n.h.p.; triple-expansion engines. The steamship *Shinan (Si-nan) Maru* was bombed and sunk by U.S. land-based aircraft on October 12th, 1944, off Tainan, Formosa.*

SHINANOGAWA MARU

*Toyo Kaiun K.K.; 1933; Mitsubishi Zosen Kaisha; 7,503 tons; 436-4x58-5x32-8; 830 n.h.p.; oil engines. The motorship *Shinanogawa (Sinanogawa) Mam* was sunk by U.S. land and carrier-based aircraft on November 14th, 1942, in the Solomon Islands.*

SHINCHIYOMARU

*Tatsuuma Risen K.K.; 6,872 tons. The steamship *Shinchiyo Mam* was bombed and sunk by U.S. land-based aircraft on May 6th, 1945, in the Inland Sea of Japan.*

SHINCHO MARU

*Towa Risen K.K.; 5,135 tons. The tanker *Shincho Mam* was sunk by U.S. carrier-based aircraft on January 21st, 1945, off Kaohsiung, Formosa.*

SHINEI MARU

*Nittoh Risen K.K.; 5,135 tons. The steamship *Shinei Mam* was torpedoed and sunk by the U.S. submarine *Guitarro* on August 10th, 1944, off Cape Bolinas, Luzon Island, Philippines.*

SHINEI MARU No. 3

*Buko Risen K.K.; 2,220 tons. The steamship *Shinei Mam No. 3* struck a mine and sank on August 3rd, 1945, off Seishin, Manchuria.*

SHINETSU MARU

*2272 tons. The *Shinetsu Maru* was bombed and sunk by U.S. land-based aircraft on November 29th, 1944, off Bogo, Cebu Island, Philippines.*

SHINFUKU MARU

*Kuribayashi Shosen K.K.; 2,204 tons. The steamship *Shinfuku Maru* was bombed and sunk by U.S. land-based aircraft on December 19th, 1944, 355 miles W. of Manila.*

SHINGI MARU

*Okada Shosen K.K.; 6,888 tons. The steamship *Shingi Maru* was bombed and sunk by U.S. carrier-based aircraft on January 12th, 1945, 50 miles S.E. of Gocong, Indo-China.*

SHINGO MARU

*Kuribayashi Shosen K.K.; 1917; Uruga Dock Co.; 4,740 tons; 360 X 51 X 28 • 4; 378 n.h.p.; triple-expansion engines. The steamship *Shingo (Singo) Maru* was torpedoed and sunk by the U.S. submarine *Halibut* on December 16th, 1942, off Aomori, Japan.*

SHINGU MARU

*Sanshin Risen K.K.; 1890; Scott & Co.; 2,745 tons; 344-7x37-7x26-3; 248 n.h.p.; compound engines. The steamship *Shingu (Singu) Maru* was bombed and sunk by U.S. land-based aircraft on May 3rd, 1944, about 150 miles W.S.W. of Kaohsiung, Formosa.*

SHIN-I MARU

*Marouni Kisen O.K.; 1883; R. Duncan & Co.; 2,240 tons; 292-9x37-7x23-3; 259 n.h.p.; compound engines. The steamship *Shin-i Maru*, on a voyage from Takao to Keelung and Yokohama, was wrecked on Steep Island on December 6th, 1919.*

SHINI MARU

*Kishimoto Kisen K.K.; 1920; Yokohama Dock Co.; 3,811 tons; 345x50x29-1; 343 n.h.p.; triple-expansion engines. The steamship *Shini (Sin-i) Mam* was torpedoed and sunk by the U.S. submarine *Tinosa* on November 26th, 1943, off the Palau Islands.*

SHINJU MARU

*Kuribayashi Shosen K.K.; 3,617 tons. The steamship *Shinju Mam* was torpedoed and sunk by the U.S. submarine *Sailfish* on June 15th, 1943, off Kamaishi, Japan.*

SHINKIMARU

*Kuribayashi Shosen K.K.; 2,211 tons. The steamship *Shinki Maru* was torpedoed and sunk by the U.S. submarine *Croaker* on October 9th, 1944, 50 miles S. of Nagasaki.*

SHINKO MARU

*Machida Shokai K.K.; 1899; Ropner & Son; 3,094 tons; 315 X 46-6x20-8; 256 n.h.p.; triple-expansion engines. The steamship *Shinko Mam*, on a voyage from Chinnampo River to Konan, Korea, with coal, was sunk in a collision with the *Yodo Mam*, 2,213 tons, on May 23rd, 1933, off the west coast of Korea, during fog.*

SHINKO MARU

SHINKO MARU

Daido Kaiun K.K.; 3,119 tons.
The steamship *Shinko Mam* was bombed and sunk by U.S. land-based aircraft on November 2nd, 1943, off New Ireland.

SHINKO MARU

Shinko Shosen K.K.; 1935; *Yokohama Dock Co.*; 6,479 tons; 436-2x58-2x31-9; 1,165 n.h.p.; oil engines. The motor vessel *Shinko (Sinko) Mam* was sunk by U.S. carrier-based aircraft on October 18th, 1944, off the north coast of Luzon Island, Philippines.

SHINKO MARU No. 1

1,200 tons.
The *Shinko Mam No. 1* was torpedoed and sunk by the U.S. submarine *Pampanito* on November 19th, 1944, 75 miles E. of Lokwei, Hainan Island.

SHINKOKUMARU

Tatsuuma Risen K.K.; 3,991 tons.
The steamship *Shinkoku Mam* was torpedoed and sunk by the U.S. submarine *Halibut* on February 20th, 1943, about 200 miles off Eniwetok.

SHINKOKUMARU

Kobe Sanbashi K.K.; 1939; *Kawasaki Dockyard Co.*; 10,020 tons; 503-3x65x37-1; 2,250 n.h.p.; oil engines. The tanker *Shinkoku (Sinkoku) Mam* was sunk by U.S. carrier-based aircraft on February 17th, 1944, in the Caroline Islands.

SHINKOKUMARU

Tatsuuma Risen K.K.; 2,746 tons.
The steamship *Shinkoku (Sinkoku) Mam* was sunk by U.S. carrier-based aircraft on November 13th, 1944, in Manila Bay.

SHINKYO MARU

Chosen Yusen K.K.; 1932; *Uraga Dock Co.*; 2,672 tons; 298-2x44-9x23-6; 171 n.h.p.; triple-expansion engines. The steamship *Shinkyo (Sinkyo) Mam* was taken over by the Japanese Navy for use as an auxiliary gunboat. On March 2nd, she was torpedoed and sunk by the U.S. submarine *Picuda S.* of the Caroline Islands.

SHINKYO MARU

Dairen Risen K.K.; 1918; *Richardson, Duck & Co.*; 5,139 tons; 400-1x52-4x28-5; 518 n.h.p.; triple-expansion engines. The steamship *Shinkyo (Sinkyo) Mam* was torpedoed and sunk by the U.S. submarine *Bowfin* on March 24th, 1944, off the Sarangani Islands.

SHINMEI MARU

Minamimanshu Shoko O.K.; 1894; *Richardson, Duck & Co.*; 2,478 tons; 290X42x27-4; 219 n.h.p.; triple-expansion engines. The steamship *Shinmei Mam* was sunk in a collision on October 31st, 1923, outside Shimonoseki on a voyage from Dairen to Yokohama.

SHINMEI MARU

Kuribayashi Shosen K.K.; 1902; *Ramage & Ferguson*; 2,577 tons; 290 X 40 • 2 X 18 • 7; 276 n.h.p.; triple-expansion engines. The steamship *Shinmei (Sinmei) Maru* was torpedoed and sunk by the U.S. submarine *Sunfish* on July 5th, 1944, off the south west coast of Kamchatka.

SHINNAN MARU

Japanese Government; 1,025 tons.
The steamship *Shinnan Maru* was torpedoed and sunk by the U.S. submarine *Cero* on May 13th, 1945, near Ofunato, Japan.

SHINONOME

Japanese Navy, destroyer; 1927; *Saseho*; 1,700 tons; 371-5X33-8x9-8; 40,000 s.h.p.; 34 knots; turbine engines; Kanpon boilers; six 5 in. guns, 4 A.A. m.g., 9 T.T.
The Japanese destroyer *Shinonome* was engaged in the fighting around the coasts of Sarawak against a mixed force of British,

American and Dutch ships. On December 18th, 1941, she struck a mine off Miri and sank. The destroyer's normal complement was 197.

SHINRA MARU

Japanese Government; 3,032 tons.
The steamship *Shinra Maru* struck a mine and sank on May 25th, 1945, off Shimonoseki.

SHINRYU MARU

Naiqai Kisen K.K.; 1937; *Osaka Iron Works*; 4,936 tons; 365-8x54-1x29-2; 433 n.h.p.; turbine engines. The steamship *Shinryu (Sinryu) Maru* was torpedoed and sunk by the U.S. submarine *Runner* on June 26th, 1943, off the Kurile Islands.

SHINRYU MARU

Nippon Yusen K.K.; 1918; *Ishikawajima S.B. & E. Co.*; 3,181 tons; 305 X 43 • 9 X 27 • 3; 279 n.h.p.; triple-expansion engines. The steamship *Shinryu (Sinryu) Maru* was torpedoed and sunk by the U.S. submarine *Puffer* on May 18th, 1944, off Sourabaya.

SHINSAN MARU

Shinsan Kisen Kaisha; 1898; *Russell & Co.*; 3,312 tons; 329-6 X 48x15-9; 291 n.h.p.; triple-expansion engines. The Japanese steamship *Shinsan Maru* was torpedoed and sunk by a submarine in the Mediterranean on July 2nd, 1917.

SHINSEI MARU

S.Hara; 1889; *Wigham Richardson & Co.*; 3,060 tons; 339-1x 40-2x25-8; 402 n.h.p.; triple-expansion engines. The Japanese steamship *Shinsei Maru* was torpedoed and sunk by a submarine in the Mediterranean on February 28th, 1917.

SHINSEI MARU

Nippon Suisan K.K.; 1917; *Uraga Dock Co.*; 4,747 tons; 360 x 51x28-4; 378 n.h.p.; triple-expansion engines. The steamship *Shinsei (Sinsei) Maru* was bombed and sunk by U.S. land-based aircraft on January 7th, 1945, 150 miles S.W. of Kaohsiung, Formosa.

SHINSEI MARU

Kuribayashi Shosen K.K.; 2,880 tons.
The steamship *Shinsei Maru* was bombed and sunk by U.S. carrier-based aircraft on January 12th, 1945, 50 miles E. of Gocong, Indo-China.

SHINSEI MARU No. 1

Ham Shoji K.K.; 1919; *Kawasaki Dockyard Co.*; 5,863 tons; 385 X 51 X 36; 440 n.h.p.; triple-expansion engines. The steamship *Shinsei (Sinsei) Mam No. 1* was torpedoed and sunk by the U.S. submarine *Snook* on October 23rd, 1944, about 250 miles N.W. of Negra Point, Luzon Island, Philippines.

SHINSEI MARU No. 5

Ham Shoji K.K.; 1919; *Manitowoc S.B. Co.*; 2,599 tons; 253-5x43-9x25-9; 326 n.h.p.; triple-expansion engines. The steamship *Shinsei (Sinsei) Maru No. 5* was bombed and sunk by U.S. land-based aircraft on December 7th, 1944, off the west coast of Leyte Island, Philippines.

SHINSEI MARU No. 6

Hara Shoji K.K.; 1938; *Osaka Iron Works*; 4,928 tons; 370-5 X 54-1x29-2; 500 n.h.p.; turbine engines.
The steamship *Shinsei (Sinsei) Maru No. 6* was torpedoed and sunk by the U.S. submarine *Tambor* on August 21st, 1942, W. of Ponape, Caroline Islands.

SHINSEI MARU No. 17

Hara Shoji K.K.; 1919; *Toledo S.B. Co.*; 2,556 tons; 251 X 43-5x28-2; 315 n.h.p.; triple-expansion engines.
The steamship *Shinsei (Sinsei) Maru No. 17* was bombed and sunk by U.S. carrier-based aircraft on January 12th, 1945, 15 miles E. of Gocong, Indo-China.

SHINSEI MARU No. 18

Ham Shoji K.K.; 2,711 tons.
On March 30th, 1944, the *Shinsei Mam No. 18* was sunk by U.S. carrier-based aircraft off Babelthup, Palau Islands.

SHINSHO MARU

Kuribayashi Syosen K.K.; 1936; *Mitsui Bussan Kaisha*; 4,836 tons; 373-1x50x29; 322n.h.p.; triple-expansion engines. The steamship *Shinsho (Sinsyo) Maru* was taken over by the Japanese Navy for use as an auxiliary torpedo boat tender. On July 9th, 1942, she was torpedoed and sunk by the U.S. submarine *Thresher W.* of Jaluit, Marshall Islands.

SHINSHO MARU

Kuribayashi Shosen K.K.; 2,880 tons.
The steamship *Shinsho Maru* was bombed and sunk by U.S. land-based aircraft on November 29th, 1944, off Bogo, Cebu Island, Philippines.

SHINSHU MARU

Azuma Kisen K.K.; 1933; *Mitsubishi Zosen Kaisha*; 4,182 tons; 360x50x29; 246n.h.p.; oilengines.
The motor vessel *Shinshu (Sinsyu) Maru* was torpedoed and sunk by the U.S. submarine *Bergall* on October 13th, 1944, off Cana, Indo-China.

SHINSHU MARU

Japanese Government; 8,170 tons.
The aircraft transporter *Shinshu Maru* was sunk by U.S. carrier-based aircraft and the submarine *Aspro* on January 3rd, 1945, about 100 miles S.S.W. of Formosa.

SHINSOKU MARU

Konan Kisen K.K.; 1916; *Osaka Iron Works*; 3,202 tons; 305 X 43 • 9 X 27 • 3; 288 n.h.p.; triple-expansion engines. The steamship *Shinsoku (Sinsoku) Maru* was bombed and sunk by U.S. land-based aircraft on February 18th, 1944, off Wenchow.

SHINTEN MARU

Settsu Shosen K.K.; 1917; *Yokohama Dock Co.*; 1,254 tons; 222-5x33-5x19-5; 97n.h.p.; triple-expansion engines. The steamship *Shinten (Sinten) Maru* was torpedoed and sunk by the U.S. submarine *Spadefish* on September 8th, 1944, about 100 miles E. of Hwalienkong, Formosa.

SHINTO MARU

Kuribayashi Shosen K.K.; 1919; *Fujinagata Zosensho*; 2,245 tons; 271-9x38-2x24-2; 189n.h.p.; triple-expansion engines. The steamship *Shinto (Sinto) Maru* was sunk by U.S. carrier-based aircraft on June 12th, 1944, about 150 miles W. of the Ladrone Islands.

SHINTO MARU

Sawayama Kisen K.K.; 1919; *Osaka Tekkosho*; 1,215 tons; 220 X 33 • 5 X 18 • 5; 79 n.h.p.; triple-expansion engines. The steamship *Shinto (Sinto) Maru* was bombed and sunk by U.S. aircraft on December 4th, 1944, about 50 miles S.W. of Formosa.

SHINTO MARU

Kuribayashi Shosen K.K.; 2,211 tons.
The steamship *Shinto Maru* struck a mine and sank on July 8th, 1945, off Kagoshima, Japan.

SHINTO MARU No. 1

Sawayama Kisen K.K.; 1939; *Kawaminani Kogyo K.K.*; 1,934 tons; 271-7x40x20-3; 150 n.h.p.; triple-expansion engines. The steamship *Shinto (Sinto) Maru No. 1* was bombed and sunk by U.S. land-based aircraft on February 19th, 1944, N. of New Hanover, Admiralty Islands.

SHINTON MARU

Toho Kaiun K.K.; 1927; *Manchuria Dock K.K.*; 1,577 tons; 249X37-5X21; triple-expansion engines.
On June 23rd, 1950, the *Shinton Maru* was helping to take cargo from the *Santo Maru*, which had run ashore at Miyako Jima, Ryukyu Islands. While so engaged she was herself driven ashore by a typhoon and capsized.

SHINWA MARU

Kuribayashi Shosen K.K.; 3,328 tons.
The steamship *Shinwa Maru* was bombed and sunk by U.S. land-based aircraft on November 21st, 1943, off Windehsi, Dutch New Guinea.

SHINYO MARU

Shinyo Kisen K.K.; 1938; *Harima S.B. & Eng. Co.*; 4,163 tons; 363-6X50x29; 467n.h.p.; turbine engines. The steamship *Shinyo (Sinyo) Maru* was torpedoed and sunk by the U.S. submarine *Seadragon* on July 13th, 1942, off Hone Cohe, Indo-China.

SHINYO MARU

Japanese Government; 2,634 tons.
The steamship *Shinyo Maru* was torpedoed and sunk by the U.S. submarine *Paddle* on September 7th, 1944, in the Sulu Sea.

SHINYO MARU

Nippon Suisan K.K.; 1918; *Uraga Dock Co.*; 4,658 tons; 360 x 51x28-3; 378 n.h.p.; triple-expansion engines. The steamship *Shinyo (Sinyo) Maru* was sunk by U.S. carrier-based aircraft on September 24th, 1944, off the south west coast of Masbate Island, Philippines.

SHINYO MARU

Tatsuma Ypshi Kaisha; 5,892 tons.
The steamship *Shinyo Maru* was torpedoed and sunk by the U.S. submarine *Barb* on January 8th, 1945, 30 miles N.W. of Taichung, Formosa.

SHINYO MARU No. 3

Okada Shinkichiro; 1917; *American S.B. Co.*; 1,898 tons; 251 X43 • 5X20; 272 n.h.p.; triple-expansion engines. The steamship *Shinyo (Sinyo) Mam No. 3* was torpedoed and sunk by the U.S. submarine *Bowfin* on June 11th, 1945, about 50 miles E. of Wonsan, Korea.

SHINYO MARU No. 5

Okada Kaiun K.K.; 1937; *Mukaishima Dockyard Co.*; 1,498 tons; 240x35x19; 110 n.h.p.; triple-expansion engines. The steamship *Shinyo (Sinyo) Maru No. 5* was torpedoed and sunk by the U.S. submarine *Triton* on February 17th, 1942, in the East China Sea.

SHINYO MARU No. 8

Daiko Shoji K.K.; 1,959 tons.
The steamship *Shinyo Maru No. 8* was torpedoed and sunk by the U.S. submarine *Cabrilla* on October 7th, 1944, 50 miles S.W. of Vigan, Philippines.

SHINYU MARU

Kuribayashi Shosen K.K.; 1919; *Uraga Dock Co.*; 4,621 tons; 360x51-2x25-4; 377n.h.p.; triple-expansion engines. The steamship *Shinyu (Sinyu) Maru* was torpedoed and sunk by the U.S. submarine *Redfin* on April 15th, 1944, in the Moro Gulf, 75 miles east of Zamboanga, Philippines.

SHINYUBARIMARU

Hokkaido Tanko K.K.; 1936; *Mitsui Bussan Kaisha*; 5,354 tons; 391-5x53-8x29-8; 407n.h.p.; triple-expansion engines. The steamship *Shinyubari (Sinyubari) Maru* was torpedoed and sunk by the U.S. submarine *Sunfish* on February 23rd, 1944, off Tenian Island, Ladrone Islands.

SHIOKUBIMARU

Nippon Seitetsu K.K.; 1898; *W. Hamilton & Co.*; 3,734 tons; 329-8x45-4x16-2; 301 n.h.p.; triple-expansion engines. The steamship *Shiokubi (Siokubi) Maru* struck a mine and sank on May 26th, 1945, off Ube, Japan.

SHIOYA

Japanese Navy; 4000 tons.
The tanker *Shioya* was torpedoed and sunk by the U.S. submarine *Rasher* on June 8th, 1944, about 100 miles N. of Menado, Celebes.

SHIRAHA MARU

SHIRAHA MARU

Tatsuuma Risen K.K.; 1918; *Russell & Co.*; 5,693 tons; 423-3 x 56x28-7; 574 n.h.p.; triple-expansion engines. The steamship *Shiraha (Sirahd) Mam* was torpedoed and sunk by the U.S. submarine *Seamven* on January 14th, 1943, about 200 miles E. of Mindanao Island, Philippines.

SHIRAHAMA MARU

Nippon Yusen K.K.; 2,812 tons. The steamship *Shirahama Mam* was bombed and sunk by U.S. land-based aircraft on August 5th, 1944, in the Tioro Strait, Celebes.

SHIRAHIMARU

Daido Kaiun K.K.; 6,872 tons. The steamship *Shirahi Mam* struck a mine and sank on June 13th, 1945, near Shimonoseki.

SHIRAKUMO

Japanese Navy, destroyer; 1927; *Fujinagata*; 1,700 tons; 371-5x33-8x9-8; 40,000s.h.p.; 34 knots; turbine engines; *Kanpon boilers*; six 5 in. guns, 4 A.A. m.g., 9 T.T. The Japanese destroyer *Shirakumo* was torpedoed and sunk S.E. of Hokkaido by the U.S. submarine *Tautog* on March 16th, 1944. The destroyer's normal complement was 197.

SHIRALA

British India S.N. Co.; 1901; *A.&J.Inglis*; 5,306 tons; 410 x 50-7x28-8; 387n.h.p.; 10-5 knots; triple-expansion engines. The British India liner *Shirala*, Capt. E. G. Murray Dickinson, left London for India on Sunday, June 30th, 1918, and proceeded first to Higham Bight and later to the Nore. Having loaded her cargo and embarked her passengers she set sail on July 2nd, but at 5.12 in the afternoon she was torpedoed and sunk by a German submarine. Eight of the crew were killed. An airship patrolling over the Channel wirelessed for help and several small naval craft came upon the scene and picked up the survivors.

The *Shirala* buckled amidships until bow and stern rose out of the water and she gradually sank, having been afloat for just under an hour after the attack.

SHIRANEMARU

Nippon Yusen K.K.; 2,825 tons. The steamship *Shirane Mam* was torpedoed and sunk by the U.S. submarine *Pogy* on May 5th, 1944, S. of Susami, Japan.

SHIRANESAN MARU

Mitsui Sempaku; 4,739 tons. The steamship *Shiranesan Mam* was torpedoed and sunk by the U.S. submarine *Raton* on October 18th, 1944, off the northern tip of Palawan Island, Philippines.

SHIRANUHI

Japanese Navy, destroyer; 1938; *Uruga*; 2,000 tons; 364x35x 11; 45,000s.h.p.; 36 knots; turbine engines; *Kanpon boilers*; six 5 in. guns, 2 m.g., 8 T.T.

The Japanese destroyer *Shiranuhi* was one of nine such vessels sunk at the battle of Leyte Gulf, October 23rd-27th, 1944. The *Shiranuhi* was bombed and sunk on the 27th when the entire Japanese fleet was retiring after disastrous losses. She carried a complement of over 200.

For full story of the battle of Leyte Gulf see the battleship *Musashi*.

SHIRATAKA

Japanese Navy, minelayer; 1929; *Ishikawazima*; 1,345 tons; 260x38x9; 2,200h.p.; 16 knots; triple-expansion engines; *Kanpon boilers*; three 4-7 in. A.A. guns, 1 m.g. The Japanese minelayer *Shirataka* was torpedoed and sunk in Luzon Strait, Philippine Islands, on August 31st, 1944, by the U.S. submarine *Sealion II*. The vessel carried a complement of over 200.

SHIRATSUYU

Japanese Navy, destroyer; 1935; *Sasebo*; 1,368 tons; 335-5 X 31-7x9-2; 38,000s.h.p.; 34 knots; turbine engines; *Kanpon boilers*; five 5 in. guns, 2 m.g., 8 T.T. The Japanese destroyer *Shiratsuyu* was bombed and sunk by U.S.

carrier-borne aircraft at the battle of the Philippine Sea, June 19th-20th, 1944. The engagement was fought out between ships and aircraft, the rival fleets never approaching nearer than 100 miles, and ended disastrously for the Japanese. Their losses amounted to three aircraft-carriers, one destroyer and 747 aircraft for the whole operation. The Americans suffered slight damage to their ships and the loss of 151 aircraft.

The *Shiratsuyu's* normal complement was 180.

For full story of the battle see the aircraft carrier *Hitaka*.

SHIRAYUKI

Japanese Navy, destroyer; 1928; *Yokohama*; 1,700 tons; 371-5x33-7x9-7; 40,000 s.h.p.; 34 knots; turbine engines; *Kanpon boilers*; six 5 in. guns, 4 A.A.m.g., 9 T.T. The Japanese destroyer *Shirayuki* was escorting a convoy carrying the 20th and 51st Divisions of the Japanese army from Rabaul to New Guinea. When crossing the Huon Gulf on March 2nd-3rd, 1943, an attack was made on the ships by 136 Allied aircraft of all classes. Nearly all the transports were sunk as well as four destroyers, including the *Shirayuki*. The Japanese loss in personnel approximated to 15,000 troops.

For full details, see the Japanese destroyer *Tokitsukaze*.

SHIRETOKO

Japanese Navy; 6,500 tons. The tanker *Shiretoko* was bombed and sunk by U.S. land-based aircraft on February 1st, 1945, off the west coast of Borneo.

SHIRETOKO MARU

Japanese Government; 1,799 tons. The steamship *Shiretoko Mam* was torpedoed and sunk by a British submarine on September 5th, 1944, about 200 miles E. of Kota Bahru, Malaya.

SHIRIYA

6,500 tons. The tanker *Shiriya* was torpedoed and sunk by the U.S. submarine *Trigger* on September 21st, 1943, 100 miles N.W. of Keelung, Formosa.

SHIROGANE MARU

Nippon Kaiun K.K.; 1938; *Harima S.B. & Eng. Co.*; 3,130 tons; 318-3x45-9x24-6; 200n.h.p.; triple-expansion engines. The steamship *Shirogane (Sirogane) Maru* was torpedoed and sunk by the U.S. submarine *Amberjack* on September 19th, 1942, S. of the Caroline Islands.

SHIROGANESAN MARU

Mitsui Sempaku; 4,739 tons. The steamship *Shiroganesan Maru* was torpedoed and sunk by the U.S. submarine *Rasher* on August 6th, 1944, 250 miles W. of Manila.

SHIROTAEMARU

Nippon Yusen K.K.; 2,812 tons. The steamship *Shirotae Maru* was sunk by U.S. carrier-based aircraft on October 12th, 1944, off Kaohsiung, Formosa.

SHIROTAYE

Japanese Navy, destroyer; 1906; *Japan*; 380 tons; 227 X 21-5x6; 6,000 h.p.; 29 knots; six 12 pdr. guns, 2 T.T. The Japanese destroyer *Shirotae* was wrecked in Kiao-Chau Bay during operations against the Germans in September 1914. The destroyer had a complement of 70.

SHIRVAN

Baltic Trading Co.; 1925; *Armstrong, Whitworth & Co.*; 6,017 tons; 411-8x53-4x31-6; 552n.h.p.; triple-expansion engines.

The British tanker *Shirvan*, on a voyage from Bowling to Reykjavik with 7,500 tons of motor spirit, was torpedoed and sunk by a German submarine on November 10th, 1944, about 150 miles S.W. of the Vestmann Islands. Sixteen of her crew and two gunners were lost.

SHISEN MARU

Tou Kaiun K.K.; 1918; *Ishikawajima S.B. Co.*; 2,201 tons; 268X40-7X23-5; 169n.h.p.; triple-expansion engines. The steamship *Shisen (Sisen) Mam* was torpedoed and sunk by the U.S. submarine *Guitarro* on May 30th, 1944, off the east coast of Formosa.

SHOAN MARU

Japanese Government; 2,900 tons. The ferry *Shoan Maru* was sunk by U.S. carrier-based aircraft on July 15th, 1945, in Rikuoka Bay, Japan.

SHOAN MARU

Matsuoka Risen K.K.; 1937; *Tama Zosensho K.K.*; 5,624 tons; 406-8x55-1x30-8; 306n.h.p.; triple-expansion engines & L.P. turbine. The steamship *Shoan (Syolari) Mam* was torpedoed and sunk by the U.S. submarine *Whale* on January 27th, 1943, between Guam and Eniwetok.

SHOBU MARU

Mitsui Sempaku; 2,005 tons. The steamship *Shobu Maru* was torpedoed and sunk by a U.S. submarine on March 8th, 1944, off Belawan, Sumatra.

SHOEI MARU

Matsuoka Risen K.K.; 1937; *Tama Zosensho K.K.*; 5,644 tons; 406-8x55-1x30-8; 306n.h.p.; triple-expansion engines & L.P. turbine. The steamship *Shoei (Syoei) Maru* was torpedoed and sunk by the U.S. submarine *S-44* on May 12th, 1942, off Rabaul. She had been converted into a salvage vessel and repair ship.

SHOEI MARU

Yamato Kisen K.K.; 1936; *Harima S.B. & Eng. Co.*; 3,580 tons; 335x48x26; 242 n.h.p.; triple-expansion engines. The steamship *Shoei (Syoei) Maru* was torpedoed and sunk by the U.S. submarine *Whale* on May 26th, 1943, off Rota Island, Ladrone Islands.

SHOEI MARU

Towa Kisen K.K.; 1919; *W. Gray & Co.*; 3,083 tons; 331-9x46-5x25-5; 358 n.h.p.; triple-expansion engines. The steamship *Shoei (Syoei) Maru* was bombed and sunk by U.S. land-based aircraft on December 20th, 1943, off Lae Island, Marshall Islands.

SHOEI MARU

Nittoh Kisen K.K.; 2,854 tons. The tanker *Shoei Maru* was torpedoed and sunk by the U.S. submarines *Paddle* and *Hammerhead* on December 8th, 1944, about 200 miles W.S.W. of Miri, Sarawak.

SHOEI MARU

Japanese Navy.; 1936; *Hakodate Dock Co.*; 1,986 tons; 272-3x40x20-9; 171 n.h.p.; triple-expansion engines. The steamship *Shoei (Syoei) Mam*, was taken over by the Japanese Navy and converted into an auxiliary gunboat. She was torpedoed and sunk by a British submarine on December 16th, 1944, 30 miles S.E. of Kota Agoeng, Sumatra.

SHOEIMARU

Osaka Shosen K.K.; 2,764 tons. The steamship *Shoei Maru* was bombed and sunk by U.S. carrier-based aircraft on January 12th, 1945, 25 miles N.E. of Binh Dinh, Indo-China.

SHOFUKU MARU

Kawasaki Kisen K.K.; 1918; *Kawasaki Dockyard Co.*; 1,768 tons; 249 X 37 • 5 X 21; 127 n.h.p.; triple-expansion engines. The steamship *Shofuku (Syohuku) Maru* struck a mine and sank on May 7th, 1945, off Karatsu, Japan.

SHOGEN MARU

Sakai Shoten K.K.; 1910; *J. Readhead & Sons*; 3,362 tons; 321-4x48x21-5; 308n.h.p.; triple-expansion engines. The steamship *Shogen (Syogen) Maru* was torpedoed and sunk by the U.S. submarine *Halibut* on September 6th, 1943, 100 miles N.E. of Hakodate.

SHOGEN MARU

Ishihara Sangyo Kaiun K.K.; 1917; *Uraga Dock Co.*; 4,739 tons; 360 x51x28-5; 378 n.h.p.; triple-expansion engines. The steamship *Shogen (Syogen) Maru* was bombed and sunk by U.S. carrier-based aircraft on August 4th, 1944, N. of the Bonin Islands.

SHOHEI MARU

Shimatani Kisen K.K.; 1931; *Mitsui Bussan Kaisha*; 7,256 tons; 437 X58x35; 489 n.h.p.; oil engines. The motor vessel *Shohei (Syoei) Maru* was torpedoed and sunk by the U.S. submarine *Cod* on May 10th, 1944, off Masinlok, Luzon Island, Philippines.

SHOHEI MARU

Matsuura Kisen K.K.; 1903; *Kawasaki Dockyard Co.*; 1,092 tons; 212X31-5x20; 123 n.h.p.; triple-expansion engines. The steamship *Shohei (Syoei) Maru* was torpedoed and sunk by the U.S. submarine *Spadefish* on February 6th, 1945, about 100 miles W. of Chinwangtao.

SHOHO

Japanese Navy, aircraft carrier; 1935; *Japan*; 12,000 tons; 690x59x17; 13,000 b.h.p.; 20 knots; turbine engines; four 5 in. guns, several 47 mm., 42 aircraft. The Japanese aircraft carrier *Shoho* was sunk on May 7th, 1942, in the operations known as the battle of the Coral Sea. The Americans, from the entry of Japan into the Second World War on December 7th, 1941, had been forced to fight on the defensive, and so far every naval engagement had gone in favour of the enemy. By May, 1942, Japan had occupied many of the Pacific islands and on the 3rd she took over Florida Island in the Solomons. Hitherto the actions between the Americans and the Japanese at sea had not been on a large scale, but by this date the Americans and Australians had built up a strong force of aircraft carriers and cruisers which was patrolling the Coral Sea under command of Rear-Admiral Frank J. Fletcher, U.S.N. This fleet was reinforced at the beginning of May by another squadron of U.S. ships, the whole consisting of the following heavy units.

AIRCRAFT CARRIERS	tons	gms
<i>Yorktown</i>	19,900	
<i>Lexington</i>	33,000	
AUSTRALIAN CRUISERS	tons	gms
<i>Australia</i>	10,000	8-8 in.
<i>Hobart</i>	7,105	8-6 in.
CRUISERS	tons	gms
<i>Astoria</i>	9,950	9-8 in.
<i>Minneapolis</i>	"	" "
<i>New Orleans</i>	"	" "
<i>Chester</i>	9,200	" "
<i>Chicago</i>	9,300	" "
<i>Portland</i>	9,800	" "

In addition to these vessels there were 13 destroyers.

Operations began on May 4th, when aircraft from the *Yorktown* attacked an enemy squadron lying in Tulagi harbour, in the southern Solomons, sinking the destroyer *Kikutsuki*, 1,315 tons, and some merchant ships. On the morning of the 7th the Japanese carrier *Shoho* was located and an attack was made upon her by aircraft from both U.S. carriers. She was hit repeatedly by bombs and torpedoes and sank off the island of Misima. In the meantime aircraft from the three Japanese carriers, attacked and sank the U.S. naval tanker *Neosho*, 6,534 tons, and the destroyer *Sims*, 1,570 tons. On the following morning contact was made with the two remaining Japanese carriers, which were escorted by four heavy cruisers and several destroyers. A sharp air battle took place between the planes

SHOHO MARU

of the rival fleets and both the *Yorktown* and *Lexington* were damaged. Fires broke out in the *Lexington* but the crew managed to extinguish these after some hours and to get the ship on her course again. Later there was a heavy explosion and she had to be abandoned and sunk. Of her crew of 1,899 about 150 were lost.

This battle was the first fought between squadrons of aircraft carriers and foreshadowed the form which future naval engagements would assume. Its results were favourable to the Americans, and Japanese overseas expansion received its first check.

In addition to their losses in ships the Americans lost 66 aircraft and 543 officers and ratings.

See also the U.S. aircraft carrier *Lexington*.

SHOHO MARU

Shimatani Kisen K.K.; 1937; *MitsuiBussan Kaisha*; 1,936 tons; 274-5x40x21; 179 n.h.p.; triple-expansion engines. The steamship *Shoho (Syoho) Mam* was torpedoed and sunk by the U.S. submarine *Greenling* on December 31st, 1943, about 300 miles E.S.E. of the Caroline Islands.

SHOHO MARU

Towa Kisen K.K.; 2,723 tons. The steamship *Shoho Mam* was torpedoed and sunk by the U.S. submarine *Balao* on February 28th, 1944, off the north west coast of Dutch New Guinea.

SHOHO MARU

1,356 tons. The steamship *Shoho (Syoho) Mam* was torpedoed and sunk by the U.S. submarine *Pomfret* on November 25th, 1944, west of the Batan Islands, Philippines.

SHOHO MARU

Japanese Government; 1923; *Uruga Dock K.K.*; 3,460 tons; 350 x 52x22; turbine engines. The ferry *Shoho (Syoho) Maru*, in service as a transport, was sunk by U.S. carrier-based aircraft on July 14th, 1945, in Rikuoka Bay, Japan.

SHOHO MARU

Nippon Yusen K.K.; 1918; *Fujima Kaichiro*; 1,327 tons; 220 X 32 • 5 x 21; 88 n.h.p.; triple-expansion engines. The steamship *Shoho (Syoho) Mam* was sunk by U.S. carrier-based aircraft on July 15th, 1945, off Noshiro, Japan.

SHOJIN MARU

Ishihara Sangyo Kaiun K.K.; 4,739 tons; The steamship *Shoj'in Maru* was torpedoed and sunk by the U.S. submarine *Seawolfon* June 20th, 1943, off the Pescadores Islands.

SHOJIN MARU

Matsuoka Risen K.K.; 1,942 tons. The steamship *Shojin Mam* was torpedoed and sunk by the U.S. submarine *Tautog* on March 13th, 1944, N.E. of Simusir Island, Kurile Islands.

SHOJU MARU

Kawasaki Kisen K.K.; 1920; *Mitsubishi Zosen Kaisha*; 2,022 250x37-8x27-8; 138 n.h.p.; triple-expansion engines. The steamship *Shoju (Syozyu) Maru* was torpedoed and sunk by the U.S. submarine *Pike* on August 5th, 1943, about 500 miles E. of the Kazan Islands.

SHOKAMARU

Osaka Shosen K.K.; 1935; *Mitsubishi Jukogyo K.K.*; 4,467 tons; 357x49-2x32-8; 500 n.h.p.; turbine engines. The steamship *Shoka (Syoka) Mam* was torpedoed and sunk by the U.S. submarine *Tautog* on May 25th, 1942, S. of the Caroline Islands.

SHOKAMARU

Shofuku Kisen K.K.; 1939; *Namura Shipyard Co.*; 1,381 tons; 226 -1x35-8x19; steam engines. The steamship *Shoka (Syoka) Mam* was bombed and sunk by U.S. land-based aircraft on February 13th, 1944, S.W. of Hainan Island.

SHOKAMARU

Towa Kisen K.K.; 1917; *Chicago S.B. Co.*; 1,931 tons; 251 X 43-6x18-2; 274 n.h.p.; triple-expansion engines. The steamship *Shoka (Syoka) Mam* was sunk by U.S. carrier-based aircraft on July 14th, 1945, off Otaru, Japan.

SHOKAIMARU

2,854 tons. The tanker *Shokai Maru* was sunk by U.S. aircraft on July 24th, 1945, about 800 miles N.E. of Midway Island.

SHOKAKU

Japanese Navy, aircraft carrier; 1939; *Yokosuka*; 29,800 tons; 800 X — X—; 30 knots; turbine engines; twelve 5 in.A.A. guns, many 47 mm., 60 aircraft.

The Japanese aircraft carriers *Shokaku* and *Taiho* were torpedoed and sunk by the U.S. submarines *Cavalla* and *Albacore* respectively at the battle of the Philippine Sea, June 19th, 1944. The *Shokaku* was hit by three torpedoes and went down at a position north of Yap Island. The battle ended disastrously for the Japanese who lost three large aircraft carriers and one destroyer, besides several battleships and cruisers heavily damaged.

The Americans lost no ships and only about one-fifth of the aircraft lost by the Japanese.

For full story of the battle of the Philippine Sea, see the aircraft carrier *Hitaka*.

SHOKEIMARU

Towa Kisen K.K.; 1938; *Kumagaigumi Iron Works*; 2,557 tons; 280 X 43x23; 212 n.h.p.; triple-expansion engines. The steamship *Shokei (Syokei) Maru* was torpedoed and sunk by the U.S. submarine *Spadefish* on September 8th, 1944, about 100 miles E. of Hwailienkong, Formosa.

SHOKEIMARU

Japanese Government; 1923; *Mitsubishi Zosen Kaisha*; 3,620 tons; 360 x 46x28; turbine engines. The ferry *Shokei (Syokei) Maru* struck a mine and sank on July 30th, 1945, in the Korea Strait.

SHOKENMARU

Towa Kisen K.K.; 1,949 tons. The steamship *Shoken Mam* was torpedoed and sunk by the U.S. submarine *Silver sides* on May 29th, 1944, about 50 miles N.W. of Saipan Island, Ladrone Islands.

SHOKOMARU

Hamaguchi Kisen G.K.; 1917; *Hara Shinichi*; 1,224 tons; 220 X 33 • 5 X18 • 5; 39 n.h.p.; triple-expansion engines. The steamship *Shoko Maru* foundered in a storm on January 26th, 1938, off Takashima, Otaru Bay, on a voyage from Otaru to Tsuruga with coal.

SHOKOMARU

Dairen Kisen K.K.; 5,385 tons. The steamship *Shoko Maru* was torpedoed and sunk by the U.S. submarine *Saury* on May 30th, 1943, about 150 miles E. of Ningpo.

SHOKOMARU

Towa Shosen K.K.; 1,933 tons. The steamship *Shoko Mam* was torpedoed and sunk by the U.S. submarine *Pargo* on November 30th, 1943, 300 miles W. of Guam.

SHOKOMARU

Showa Kisen K.K.; 1919; *McDougall-Duluth Co.*; 2,208 tons; 251 x43-5x22-2; 262 n.h.p.; triple-expansion engines. The steamship *Shoko (Syoko) Maru* struck a mine and sank on July 23rd, 1945, off Ebisu, Japan.

SHOKYUMARU

Towa Kisen K.K.; 1907; *R. Duncan & Co.*; 4,484 tons; 376x 52-3x17-6; 366 n.h.p.; triple-expansion engines. The steamship *Shokyu (Syokyu) Mam* was torpedoed and sunk by the U.S. submarine *Triton* on February 21st, 1942, in the East China Sea.

SHONAN MARU

Japanese Government; 5,356 tons.
The steamship *Shonan Mam* was torpedoed and sunk by the U.S. submarine *Drum* on May 13th, 1942, off Shimizu, Japan.

SHONAN MARU

Nippon Seitetsu K.K.; 5,401 tons.
The steamship *Shonan Mam* was torpedoed and sunk by the U.S. submarine *Pintado* on August 6th, 1944, off the north-west coast of Kuroshima Island, Japan.

SHONAN MARU

KobeKikyo; 5,859 tons.
The steamship *Shonan Mam* was torpedoed and sunk by the U.S. submarine *Seal* on September 9th, 1944, E. of Sakhalin.

SHONAN MARU

Minami Nippon Kisen; 1,120 tons.
The steamship *Shonan Maru* was bombed and sunk by U.S. land-based aircraft on December 11th, 1944, off the west coast of Leyte Island, Philippines.

SHONGA

African S.S. Co.; 1909; Irvine's S.B. & D.D. Co.; 3,044 tons; 340-1x46x23; 335 n.h.p.; triple-expansion engines. The British cargo ship *Shonga* was wrecked two miles N. of Ymuiden on February 17th, 1928. She was on a voyage from the W. coast of Africa to Amsterdam and Hamburg carrying a general cargo.

SHORIMARU

Japanese Government; 1907; Mackie & Thomson; 3,087 tons; 301 x42x2X18x6; 276n.h.p.; triple-expansion engines. The steamship *Short Mam* was formerly the Chinese *Sheng Lee*, seized by the Japanese at Hong Kong in December, 1941. She was torpedoed and sunk by the U.S. submarine *Segundo* on March 11th, 1945, in the Korea Strait.

SHORIMARU

Japanese Government, 3,080 tons.
The steamship *Short Mam* struck a mine and sank on July 6th, 1945, off Shimonoseki.

SHORYUMARU

Shoryu Kisen K.K.; 1919; Harland & Wolff; 6,475 tons; 412-3x55-5x33-8; 517n.h.p.; triple-expansion engines. The steamship *Shoryu (Syoryii) Maru* was torpedoed and sunk by the U.S. submarine *Parche* on May 4th, 1944, about 250 miles S.E. of Hong Kong.

SHORYUMARU

Kuribayashi Shosen K.K.; 1,916 tons.
The steamship *Shoryu Maru* was torpedoed and sunk by the U.S. submarine *Bang* on September 9th, 1944, about 200 miles N.W. of the Bonin Islands.

SHORYUMARU

Sanyo Kisen K.K.; 1917; Toba Zosensho; 1,257 tons; 229-1x33x18; 101 n.h.p.; triple-expansion engines. The steamship *Shoryu (Syoryu) Maru* was bombed and sunk by U.S. land-based aircraft on July 29th, 1945, off Pusan, Korea.

SHOSEIMARU

Japanese Navy; 1929; Amagasaki Zosensho; 998 tons; 210 x30-5x18-7; triple-expansion engines.
The steamship *Shosei Maru* was taken over by the Japanese Navy for use as an auxiliary gunboat. On May 20th, 1944, she was torpedoed and sunk by a U.S. submarine about 50 miles S.W. of Guam.

SHOSHUMARU

Osaka Shosen K.K.; 1891; W. Hamilton & Co.; 1,532 tons; 238'7x35-1x15-1; 198 n.h.p.; triple-expansion engines. The steamship *Shoshu Maru*, on a voyage from Keelung to Japan, was wrecked on August 11th, 1921, off Zamba Cape, Okinawa Island.

SHOTAN MARU

Kawasaki Risen K.K.; 1,999 tons.
The steamship *Shotan Maru* was sunk by U.S. carrier-based aircraft on February 17th, 1944, in the Caroline Islands.

SHOTO MARU

Matsuoka Kisen K.K.; 1919; Lloyd Royal Beige (Great Britain); 5,254 tons; 400-8x52-3x28-5; 517n.h.p.; triple-expansion engines.
The steamship *Shoto (Syoto) Maru* was torpedoed and sunk by the U.S. submarine *Seawolf* on August 31st, 1943, about 150 miles N.E. of Wenchow, China.

SHOTOKUMARU

Shimatani Kisen K.K.; 1938; Hakodate Dock Co.; 1,964 tons; 270-6x40x20-9; 203 n.h.p.; triple-expansion engines. The steamship *Shotoku (Syotoku) Maru* was taken over by the Japanese Navy and converted into an auxiliary gunboat. On June 28th, 1943, she was torpedoed and sunk by the U.S. submarine *Tunny N.* of Rota Island, Ladrone Islands.

SHOUN MARU

Matsuoka Kisen K.K.; 4,396 tons.
The steamship *Shoun Maru* was sunk by U.S. carrier-based aircraft on June 23rd, 1944, off Rota Island, Ladrone Islands.

SHOWAMARU

Nitto Kogyo K.K.; 1938; Namura Shipyard Co.; 1,349 tons; 216-1x35-8x19; triple-expansion engines.
The steamship *Showa (Syowa) Mam* was torpedoed and sunk by the U.S. submarine *Seawolf* on August 25th, 1942, off Port Elphinstone, North Borneo.

SHOWAMARU

Konan Kisen K.K.; 1920; American S.B. Co.; 2,212 tons; 251 x43-7x22-2; 267n.h.p.; triple-expansion engines. The steamship *Showa (Syowa) Maru* was torpedoed and sunk by the U.S. submarine *Permit* on July 7th, 1943, W. of Iwanai, Japan.

SHOYO MARU

Nippon Tanker K.K.; 1928; Yokohama Dock Co.; 7,498 tons; 430-6x57-7x34-5; 582n.h.p.; triple-expansion engines. The tanker *Shoyo (Syoyo) Mam* was torpedoed and sunk by the U.S. submarine *Trigger* on September 21st, 1943, 100 miles N.W. of Keelung, Formosa.

SHOYO MARU

2,211 tons.
The steamship *Shoyo Maru* was torpedoed and sunk by the U.S. submarine *Sea Dog* on June 9th, 1945, about 100 miles S. of Shimoda, Japan.

SHOYU MARU

Matsuoka Kisen K.K.; 4,408 tons.
The steamship *Shoyu Maru* was torpedoed and sunk by the U.S. submarine *Bow/in* on January 17th, 1944, in the Straits of Macassar.

SHOZAN MARU

Yamamoto Kisen K.K.; 5,859 tons.
The steamship *Shozan Mam* was torpedoed and sunk by the U.S. submarine *Jack* on June 26th, 1943, about 150 miles S. of Shimoda, Japan.

SHOZAN MARU

Kokoku Kisen K.K.; 1918; Harima Dockyard Co.; 2,937 tons; 305X43x7X27x2; 220 n.h.p.; triple-expansion engines. The steamship *Shozan (Syozan) Mam* struck a mine and sank on October 26th, 1943, off Haiphong.

SHOZAN MARU

Kokoku Kisen K.K.; 2,838 tons.
The steamship *Shozan Maru* was torpedoed and sunk by the U.S. submarine *Thresher* on July 17th, 1944, off the north west coast of Luzon Island, Philippines.

SHOZAN MARU

SHOZAN MARU

Japanese Government; 2,172 tons.
The steamship *Shozan Maru* was bombed and sunk by U.S. land-based aircraft on April 3rd, 1945, off Hong Kong.

SHOZAN MARU

Miyachi Risen K.K.; 6,890 tons.
The steamship *Shozan Maru* struck a mine and sank on May 26th, 1945, near Ube, Japan.

SHOZUI MARU

Towa Risen K.K.; 2,719 tons.
The steamship *Shozui Maru* was sunk by U.S. carrier-based aircraft on July 4th, 1944, off the Bonin Islands.

SHREWSBURY

Galbraith, Pembroke & Co.; 1898; W. Hamilton & Co.; 3,223 tons; 329-7x45-5x16-1; 301 n.h.p.; triple-expansion engines.
The British cargo ship *Shrewsbury* was wrecked on Bombay reef at midnight on November 17th, 1904. She was on a voyage from Penarth, via Singapore, to Hong Kong carrying a cargo of coal.

SHREWSBURY

Alexander Shipping Co.; 1924; Richardson, Duck & Co.; 4,542 tons; 399-5x53x24-9; 417 n.h.p.; 11 knots; triple-expansion engines.
The steamship *Shrewsbury*, Capt. A. Armstrong, was in convoy about 200 miles E. of the Azores on February 12th, 1941, when she was attacked by the German heavy cruiser *Admiral Hipper*.

Twenty of the crew were lost; 18 of these were in a boat that was hit by a shell. Capt. Armstrong was among the survivors. For further details see *Oswestry Grange*.

SHU KWANG

Asiatic Petroleum Co. (North China); 1924; Yarrow & Co.; 788 tons; 198-7x32-9x8-9; 397 n.h.p.; triple-expansion engines.
The British tanker *Shu Kwang*, carrying refugees from Singapore to Batavia, was bombed and sunk by Japanese aircraft on February 14th, 1942, S. of Bintan Island. About 20 lives were lost and 273 saved.

SHUKOMARU

Japanese Government; 1,282 tons.
The steamship *Shuko Maru* struck a mine and sank on May 11th, 1945, off Yawata, Japan.

SHUN YUAN

Japanese Government; 1896; J.L. Thompson & Sons.; 1,610 tons; 252 x 35x13-7; 241 n.h.p.; triple-expansion engines.
The steamship *Shun Yuan* was formerly Chinese, seized by the Japanese. She was torpedoed and sunk by the U.S. submarine *Lapon* on September 22nd, 1944, about 50 miles W. of Olongapo, Philippines.

SHUNA

Glen & Co.; 1909; A. Vuijk & Zosen; 1,426 tons; 240-9x35-2x16-5; 146 n.h.p.; triple-expansion engines.
The British steamship *Shuna* was wrecked at the entrance to the Sound of Mull on May 9th, 1913, while on a voyage from the Clyde to Gothenburg carrying a general cargo.

SHUNA

Clydesdale Shipowners Co.; 1915; J. Crown & Sons; 1,494 tons; 250x37-3x17-2; 165 n.h.p.; triple-expansion engines.
The British cargo ship *Shuna* was wrecked near Ardmore Point, Islay, on October 17th, 1936, while carrying coal and a general cargo from the Clyde to Gothenburg.

SHUNKA MARU

Yamamoto Shoji K.K.; 1899; Blackwood & Gordon; 2,839 tons; 326-2x40-2x23-5; 317 n.h.p.; triple-expansion engines.
The steamship *Shunka Maru*, on a voyage from Tsingtao to Chemulpo, Korea, struck a rock in fog and sank on July 19th, 1932.

SHUNKO MARU

Osaka Shosen K.K.; 1919; Teikoku S.S. Co.; 6,781 tons; 425x53-6x37-5; 575 n.h.p.; triple-expansion engines.
The steamship *Shunko (Syunko) Maru* was torpedoed and sunk by the U.S. submarine *Skipjack* on October 14th, 1942, S. of the Caroline Islands.

SHUNKO MARU

Yamamoto Shoji K.K.; 1936; Kawasaki Dkyd Co.; 4,027 tons; 552 x 50x27-5; turbine engines.
The steamship *Shunko (Syunko) Maru* was bombed and sunk by U.S. land-based aircraft on January 16th, 1944, off Queen Charlotte Island, Bismarck Archipelago.

SHUNSEI MARU

Yamamoto Shoji K.K.; 1911; Napier & Miller; 4,939 tons; 400-2x52-3x27-4; 369 n.h.p.; triple-expansion engines.
The steamship *Shunsei (Syunsei) Maru* was torpedoed and sunk by a British submarine on April 1st, 1942, in the Straits of Malacca.

SHUNTAI MARU

Yamamoto Shoji K.K.; 1920; Canadian Allis Chalmers; 2,253 tons; 252 X 43 • 6 X 20 • 5; 274 n.h.p.; triple-expansion engines.
The steamship *Shuntai (Syuntai) Maru* was torpedoed and sunk by the U.S. submarine *Tambor* on January 29th, 1944, 50 miles N.E. of Okinawa Island.

SHUNTEN MARU

Yamamoto Shoji K.K.; 1928; Mitsubishi Zosen Kaisha; 5,623 tons; 405x55x32; 582 n.h.p.; oil engines.
The motor vessel *Shunten (Syunten) Maru* was torpedoed and sunk by the U.S. submarine *Gunnell* on November 17th, 1944, about 150 miles E. of Hue, Indo-China.

SHUNTEN

China Nav. Co.; 1934; Taikoo Dock & Engineering Co.; 3,059 tons; 303-7x46-1x31-3; turbine engines.
The British steamship *Shuntien*, on a voyage from Tobruk to Alexandria with 800-1000 prisoners of war on board, was torpedoed and sunk by a submarine on December 23rd, 1941. The captain, four officers and the chief steward were killed on board. Many of the prisoners were picked up by a naval ship which was herself sunk shortly afterwards.

SHURI MARU

Osaka Shosen K.K.; 1928; Uraga Dock K.K.; 1,857 tons; 260 X 39x23; compound engines.
The steamship *Shuri (Syuri) Maru* was taken over by the Japanese Navy for use as a torpedo boat tender. On January 20th, 1945, she was torpedoed and sunk by the U.S. submarine *Tautog* near Sasebo, Japan.

SHUYO MARU

Toyo Kisen K.K.; 6,933 tons.
The steamship *Shuyo Maru* was torpedoed and sunk by the U.S. submarine *Picuda* on November 23rd, 1944, off the west coast of Tsushima Island, Japan.

SI KIANG

U.S. Maritime Commission; 1914; J. C. Tecklenborg A.G.; 7,014 tons; 473-9x59x28-3; triple-expansion engines & LP turbine.
The French steamship *Si Kiang* was confiscated by the Americans at Manila on the outbreak of war with Japan. On December 24th, 1941, she was bombed and set on fire by Japanese aircraft. The ship, which carried a cargo of petrol in cases in the afterhold, burned for two days and was completely destroyed. Ten of her crew were killed and eight seriously wounded.

SIAMESE PRINCE

Prince Line; 1929; Elythwood Shipbuilding Co.; 8,456 tons; 441-5x60-3x29-2; 1,350 n.h.p.; 15 knots; oil engines.
The motorship *Siamese Prince*, Capt. E. Litchfield, was some 200 miles S.W. of the Faroe Islands when she was torpedoed and sunk by a German submarine on February 17th, 1941. All on board were lost, 58 crew, one gunner and eight passengers.

SIANTAR

Rottet-damsche Lloyd; 1921; *W. Gray & Co.*; 8,667 tons; 471-3x57-4x30-2; 1,835 n.h.p.; oil engines. The Dutch motorship *Siantar* was torpedoed, shelled and sunk by a Japanese submarine on March 2nd, 1942, about 250 miles W. of North-West Cape, Western Australia. Twenty-one of her crew of 61 were killed.

SIAOE

Koninklijke Paketvaart Maats.; 1921; *N.V. Scheepswerf Dordrecht*; 1,573 tons; 250-1x40-3x17-7; 121 n.h.p.; triple-expansion engines.

The Dutch steamship *Siaoe* was sunk by gunfire from Japanese warships on March 1st, 1942, in the Bay of Bantan, on a voyage from Tandjong Priok to Bunbury.

SIBERIA MARU

Nipponkai Risen K.K.; 1909; *Harland & Wolff*; 3,461 tons; 350-5x44-3x23-3; 643 n.h.p.; quadruple-expansion engines. The steamship *Siberia Maru*, in service as a transport, was sunk by U.S. carrier-based aircraft on September 24th, 1944, off the southwest coast of Masbate Island, Philippines.

SIBERIER

Lloyd Royal Beige; 1907; *Irvine's S.B. & D.D. Co.*; 2,968 tons; 325 X 47 -1 X 22 • 4; 265 n.h.p.; triple-expansion engines. The Belgian steamship *Siberier* was torpedoed and sunk by a German submarine off the west coast of Ireland on April 5th, 1917.

SIBEROET

Koninklijke Paketvaart Maats.; 1927; *A. F. Smulders*; 1,799 tons; 267-5x42-2x17-7; 145n.h.p.; compound engines. The Dutch steamship *Siberoet* was sunk by Japanese naval action in early March, 1942, in the Java Sea, with the loss of all on board.

SIBIGO

Koninklijke Paketvaart Maats.; 1926; *Wilton's Engineering & Slipway Co.*; 1,594 tons; 264-9x37-3x16-5; 202n.h.p.; triple-expansion engines.

The Dutch steamship *Sibigo*, on a voyage from Brisbane to Finschaven, New Guinea, foundered in a cyclone on March 16th, 1945, off Port Douglas, Queensland.

SIBIR

U.S.S.R.; 1929; *Severney S.B. Yard*; 3,767 tons; 332-5 x 48x25-6; 692n.h.p.; oil engines.

The Russian motorship *Sibir* had been fitted out as a hospital ship. On August 19th, 1941, she was bombed and set on fire by German aircraft in the Gulf of Finland. The fire could not be controlled and the ship sank with the loss of some 400 of the 1,300 persons on board.

SICILIA

Lloyd Triestino; 1924; *A. G. Weser*; 9,646 tons; 479-7X 57-6x31-2; turbine engines.

The steamship *Sicilia*, in service as a hospital ship, was bombed and sunk by Allied aircraft on April 5th, 1943, at Naples.

SICILIEN

U.S. Maritime Commission; 1938; *Helsingors Jernskibs & Maskin*; 1,654 tons; 271-7x40-4x16-6; 338 n.h.p.; oil engines. The motorship *Sicilien* was torpedoed and sunk by a German submarine on June 7th, 1942, between Kingston, Jamaica, and San Juan, Puerto Rico. Forty-six of her complement of 77 were killed.

SIDAMO

Servizio Italo-Portoghese Soc. Anon, di Nav.; 1895; *Blohm & Voss*; 2,384 tons; 304-2x38-2x23-6; 157n.h.p.; triple-expansion engines.

The Italian steamship *Sidamo* was torpedoed and sunk by a British submarine on March 27th, 1943, off Milazzo.

SIDI-BEL-ABBES

Societe Generale de Transports Maritimes a Vapeur; 1929; *Swan, Hunter & Wigham Richardson*; 4,392 tons; 368x50-2x 23-2; turbine engines.

The French steamship *Sidi-Bel-Abbes* was torpedoed and sunk by a German submarine on April 20th, 1943, ten miles N. of the Habibas Islands, near Oran. She was carrying some 1,100 Senegalese troops from Casablanca to Oran. British naval escorts picked up 520 survivors but about 611 lives were lost.

SIDI FERRUCH

Cie. de Transports Maritimes; 1901; *D. J. Dunlop & Co.*; 2,797 tons; 294-8x40-8x15-3; 340n.h.p.; triple-expansion engines.

The French steamship *Sidi Ferruch* was sunk by a submarine in the Mediterranean on November 4th, 1915.

SIDON

Cunard S.S. Co.; 1861; *W. Demy & Bros.*; 1,853 tons; 275 -6 X 36-2x25-8; 212h.p.; compound engines.

The British steamship *Sidon* was wrecked near Malpica, Spain, on October 27th, 1885, while on a voyage from Liverpool to Constantinople carrying a general cargo.

SIENA

La Veloce Navigazione Italiana; 1905; *N. Odero fu A. & Co.*; 4,372 tons; 380-8x46-7x26-9; 381 n.h.p.; triple-expansion engines.

The Italian steamship *Siena* was shelled and sunk by a submarine in the Mediterranean on August 4th, 1916.

SIERRA LEONE

Elder, Dempster & Co.; 1907; *Harland & Wolff*; 3,730 tons; 370-6x49-3x21-8; 528 n.h.p.; triple-expansion engines. The British steamship *Sierra Leone* was wrecked at the entrance to Axim on July 1st, 1910. She was on a voyage from Liverpool to the west coast of Africa carrying a general cargo.

SIERRA NEVADA

Sierra Shpg Co.; 1877; *Oswald, Mordaunt & Co.*; 1,523 tons; 233X37-6X23-5.

The British sailing ship *Sierra Nevada* was wrecked off Port Phillip, Australia, on May 8th, 1900. The captain and 21 others were lost, and only five men survived.

SIF

Stockholms Rederi-A/B Svea; 1913; *Dundee S.B. Co.*; 1,365 tons; 235• 1x36-2x15; 132n.h.p.; triple-expansion engines. The Swedish steamship *Sz* was torpedoed and sunk by a British aircraft on July 8th, 1944, off the Bay of Heligoland.

SIFKA

I. T. Salvesen & Co.; 1898; *Ramage & Ferguson*; 1,103 tons; 224x33-1x 15; 99 n.h.p.; triple-expansion engines. The British steamship *Sifka* was wrecked at Kopparstenarna on December 22nd, 1910, while on a voyage from Gefle to Rotterdam carrying a cargo of iron ore.

SIFNOS

T. F. Stafilopatis; 1917; *Detroit S.B. Co.*; 2,290 tons; 247-9X 43-7x17-7; 274n.h.p.; triple-expansion engines. The Greek steamship *Sifnos* was bombed and sunk by German aircraft on April 5th, 1941, during the invasion of Greece.

SIG

AISDISAsk(A.Kjerland); 1924; *J. Lewis & Sons*; 1,342 tons; 234-6x35-6x16-5; 178 n.h.p.; triple-expansion engines. The Norwegian steamship *Sig* was sunk by mine or torpedo on November 4th, 1939, off the River Humber.

SIGNE

A. Abrahamsson; 1882; *W. Gray & Co.*; 1,540 tons; 257-5X 35-8x18-9; 170 n.h.p.; compound engines. The Finnish steamship *Signe* left Bergen on March 30th, 1940, in convoy for Burntisland. The convoy was scattered by a storm and

SIGRID

the *Signe* was last seen lying on her beam ends not making way. The rearmost ships of the convoy were then attacked by German bombers and the *Signe* might have been sunk by bombing. A raft with the body of one of her crew of 19 was picked up some days later.

SIGRID

Rederi-A/B Allan; 1900; Fevigs Jernskibsbyggeri; 1,091 tons; 230-3x34x13-4; 200 n.h.p.; triple-expansion engines. The Swedish steamship *Sigrid* struck a mine and sank on November 1st, 1941, on a voyage from Lulea to Emden.

SIGRID

D/S A/S Progress; 1917; Kjobenhavns Flydedok & Skibsværft; 1,196 tons; 239-9x35-7x14-5; 98n.h.p.; triple-expansion engines.

The Danish steamship *Sigrid*, under German control, struck a mine and sank on June 27th, 1943, on a voyage from Vejle to Copenhagen.

SIGRUN

Det Forenede D/S; 1904; Sunderland S.B. Co.; 1,337 tons; 240x36-5x16-8; 141 n.h.p.; triple-expansion engines. The Danish steamship *Sigrun*, under German control, was torpedoed and sunk by a British submarine on November 3rd, 1940, off Skien, Norway, with the loss of 19 lives.

SIGURD FAULBAUMS

German Government; 1913; J. Blumer & Co.; 3,256 tons; 331 x47-7x22-5; 303 n.h.p.; triple-expansion engines. The steamship *Sigurd Faulbaums* was formerly Latvian, seized by the Germans. She was torpedoed and sunk by a British submarine on May 29th, 1940, off Ostend.

SIGYN

Rederi-A/B Sigyn; 1921; A/B Lindholmen-Motala; 4,528 tons; 377-8x54-2x24-4; 455 n.h.p.; triple-expansion engines. The Swedish steamship *Sigyn* struck a mine and sank on August 9th, 1942, off the Dutch coast.

SIKH

Mogul S.S. Co.; 1880; Aitken & Mansel; 2,308 tons; 315x35-9x25-7; 300 h.p.; compound engines. The British steamship *Sikh* was wrecked on Whale Rock, Ceylon, on March 29th, 1888, while on a voyage from London to Penang carrying a general cargo.

SIKH

British Navy, destroyer; 1937; A. Stephen & Sons; 1,870 tons; 355-5x36-5x9; 44,000 s.h.p.; 36-5 knots; turbine engines; 3-drum boilers; eight 4-7 in. guns, 7 smaller, 4 T.T. The destroyer *Sikh*, Capt. St. J. A. Micklethwait, D.S.O., in company with her sister ship, the *Zulu*, Lt. A. R. Moore, took part in a combined raid on the Libyan port of Tobruk on the night of September 13th-14th, 1942. The landing was covered by a heavy bombing attack from the air, followed by a bombardment by the ships, which had on board the main body of the landing force. A delay of one hour and a half gave the enemy time to gather his troops together and when the two destroyers were about a mile from the shore they were illuminated by searchlights. There was no smoke screen available and the *Sikh* was hit repeatedly by the shore batteries and disabled. She was taken in tow by the *Zulu* but the cable was hit by a shell, causing her to drift into the line of fire once more. A second attempt was made to take her in tow, but as it was now daylight the task was too dangerous and the *Zulu* was compelled to retire, covered by the guns of the now sinking *Sikh*.

The time was 9 a.m. and the *Zulu* was making a successful withdrawal when she became the target for a group of seven German dive bombers. She was disabled and had to be abandoned, except for her gun crews, her company and the troops on board being transferred to other vessels. She was then taken in tow but sank on her way to port.

The loss of life on the *Sikh* amounted to 15 officers, including Capt. Micklethwait, and 260 ratings. A few survivors reached the shore and became prisoners of war.

SILESIA

Rederi-A/B Sylvia; 1923; J. Crown & Sons; 1,839 tons; 267-9x37-8x17-6; 200 n.h.p.; triple-expansion engines. The Swedish steamship *Silesia* was torpedoed and sunk by a German submarine on September 25th, 1939, off Stavanger.

SILIUS

S. O. Stray & Co.; 1895; Ateliers & Chantiers de la Loire; 1,551 tons; 237-3'X 36-7x22-2. The Norwegian sailing ship *Silius* was torpedoed and sunk in the English Channel on March 9th, 1916.

SILIVRI

Turkish Government; 1941; Swan, Hunter & Wigham Richardson; 692 tons; 180x40-2x10-9; 83 n.h.p.; triple-expansion engines. The Turkish coaster *Silivri*, on a voyage from Zonguldak to Fethiye with coal, struck a mine and sank on June 30th, 1947, opposite Budrum, Aegean Sea. Nineteen of her crew were killed.

SILJA

Rederi-A/S Kragero; 1919; P. T. Stukrs, Maskin & Skibsværft; 1,259 tons; 238-7x36-3x13-6; 83n.h.p.; triple-expansion engines.

The Norwegian steamship *Silja* left Trapani on January 26th, 1940, for Bergen. Nothing more was heard of the ship or her crew of 16 after sailing from Gibraltar on February 5th. She was thought to have been sunk by a submarine.

SILJAN

Rederi-A/B Sigyn; 1920; Tyne Iron S.B. Co.; 3,058 tons; 328x46-8x22-9; 358 n.h.p.; triple-expansion engines. The Swedish steamship *Siljan* was torpedoed and sunk by a German submarine on September 26th, 1940, 350 miles S.W. of Ireland, on a voyage from Cardiff to Lisbon. Nine of her crew were lost.

SILJESTAD

Skibs A/S Siljestad (A. F. Klaveness & Co.); 1927; Akt. Burmeister & Wain; 4,301 tons; 376-5x53-8x23-6; 489n.h.p.; oil engines.

The Norwegian motorship *Siljestad* was torpedoed and sunk by a German submarine on May 14th, 1942, E. of Newfoundland.

SILVER SWORD

Sword S.S. Line; 1919; Downey S.B. Co.; 4,937 tons; 386-8 x 52-2x27-4; 338n.h.p.; triple-expansion engines. The American steamship *Silver Sword* was torpedoed and sunk by a German submarine on September 20th, 1942, W. of Spitsbergen, on a voyage from Archangel to New York.

SILVER WINGS

N. Hallett & Co.; 1904; Furness, Withy & Co.; 2,822 tons; 325x47x22-3; 304 n.h.p.; triple-expansion engines. The British steamship *Silver Wings* was wrecked on Sable Island on August 17th, 1915, while on a voyage from New York to Archangel.

SILVERAY

Silver Line; 1925; J. L. Thompson & Sons; 4,535 tons; 395-7 X 57x23-4; 480 n.h.p.; 10-5 knots; oil engines. The motorship *Silveray*, was homeward bound from Halifax, N.S., on February 4th, 1942, when she was torpedoed and sunk by a German submarine. Eight men were killed. The captain was among the survivors.

SILVERBEECH

Silver Line; 1926; Sir J. Laing & Sons; 5,319 tons; 425-6X 58-3x24-7; 12 knots; oil engines. The motorship *Silverbeech*, Capt. T. G. Hyem, was in a convoy sailing from Liverpool to Lagos with munitions and explosives on March 28th, 1943, when she was torpedoed and sunk by a German submarine. The attack took place off Rio de Oro and the vessel blew up and sank. Fifty-one of her crew, five gunners and six passengers were lost. The only survivors were the third engineer and six gunners.

SILVERCEDAR

Silver Line; 1924; *W. Doxford & Sons*; 4,354 tons; 370 X 52-6x25-7; 417 n.h.p.; 10-5 knots; oilengines. The motorship *Silvercedar*, Capt. T. Keane, was torpedoed and sunk by a German submarine in the North Atlantic on October 15th, 1941. Capt. Keane and 20 of the crew were lost.

SILVERHAZEL

S. & J. Thompson; 1927; *J. L. Thompson & Sons*; 5,302 tons; 425-6x58-3x24-7; 882 n.h.p.; oil engines. The British cargo ship *Silverhazel* was wrecked at San Bernardino Island on November 9th, 1935. She was carrying a general cargo from American Pacific coast ports to the Philippine Islands, Java, Colombo and Bombay.

SILVERLIP

Shell Transport & Trading Co.; 1903; *Armstrong, Whitworth & Co.*; 7,492 tons; 470x55-2x33-1; 579 n.h.p.; 11 • 75 knots; triple-expansion engines.

The tanker *Silverlip*, Capt. N. Hocken, left Singapore for England on March 25th, 1907, with 8,368 tons of benzine and a crew of 53. She was to proceed to St. Catherine's Point, for orders. On April 30th, 240 miles N.E. of Finisterre she encountered a gale with a marked drop in temperature, but continued to steam at full speed. The following day it was discovered that the benzine in Nos. 3 and 4 holds had contracted and on the instructions of the captain the first officer arranged to pump salt water into these holds. At about 1.50 p.m. when the first officer had gone to his cabin leaving the carpenter and boatswain to carry on with the work, there was a terrific explosion from No. 4 hold followed by others of great violence which set the ship on fire. The carpenter, boatswain and two firemen were killed by the first explosion and the chief engineer was killed shortly afterwards.

The position of the *Silverlip* was hopeless from the start and Capt. Hocken could only order out the boats and abandon ship with the survivors, as the bridge and the whole midship portion of the vessel was heavily on fire. Later the survivors, 48 in all, were picked up by the steamship *Westgate* and taken to Plymouth.

SILVERMAPLE

Silver Line; 1927; *Sir J. Laing & Sons*; 5,313 tons; 425-6x58-3x24-7; 882 n.h.p.; 12 knots; oilengines. The motorship *Silvermaple*, Capt. W. Brydson, on a voyage from Bathurst, R.G., to Takoradi, was torpedoed and sunk by an enemy submarine not far from Cape Coast Castle on February 26th, 1944. Capt. Brydson, five of crew and one gunner were killed.

SILVERPALM

Silver Line; 1929; *J.L. Thompson & Sons*; 6,373 tons; 450-9 X 61-3x25-3; 1,387 n.h.p.; 13-5 knots; oilengines. The motorship *Silverpalm*, Capt. R. L. Pallett, left Calcutta on April 17th, 1941, and Freetown on May 31st for Glasgow. She was sighted by the steamship *Silver laurel* at 6.30 a.m. on June 1st. Nothing more was heard of the ship until, on July 17th, a ship's boat was found about 500 miles W. of the Hebrides containing eight bodies. Papers found on the bodies identified them as members of the crew of the *Silverpalm*. The ship carried a crew of 54, 11 gunners and three passengers.

SILVERPINE

Silver Line; 1924; *Swan, Hunter & Wigham Richardson*; 5,066 tons; 401x55-3x26-3; 1,052 n.h.p.; 14 knots; oil engines.

The motorship *Silverpine*, Capt. W. B. Bowyer, was torpedoed and sunk by a German submarine about 300 miles W. of Black Rock, Ireland, on December 5th, 1940. Capt. Bowyer, seven British officers and 25 Chinese seamen, were lost; 19 survivors were picked up and landed at Londonderry.

SILVERWILLOW

Silver Line; 1930; *J.L. Thompson & Sons*; 6,373 tons; 450-9 X 61-3x25-3; 1,387 n.h.p.; 13-5 knots; oilengines. The motorship *Silverwillow* was torpedoed by a German submarine on October 30th, 1942, about 400 miles W. of Rabat. She remained afloat for several days and by November 5th she had approached the coast of Portugal. Her condition grew steadily worse, however,

and on that day it was decided to abandon her. She was taken in tow on the 8th, but sank on the 11th about 100 miles W. of Sagres. Two of the crew, one gunner and two passengers were lost.

SILVIA

C. T. Bowring & Co.; 1885; *Wigham Richardson & Co.*; 1,708 tons; 255 X 35 -1 X17; 198 n.h.p.; triple-expansion engines. The British steamship *Silvia* was wrecked at the entrance to Vineyard Sound on March 15th, 1908. She was on a voyage from New York to Halifax, N.S., and St. John's, N.F.L., carrying passengers and a general cargo.

SILVIA

P. Viale G.B.; 1900; *J. Readhead & Sons*; 3,571 tons; 341 -6 X 46-7x26; 294 n.h.p.; triple-expansion engines. The Italian steamship *Silvia* was torpedoed and sunk by a German submarine W. of Gibraltar on July 9th, 1918.

SILVIA TRIPCovich

D. Tripicovich & Co.; 1925; *Cantiere Navale Triestino*; 2,365 tons; 303-5x41-7x20-6; 279 n.h.p.; triple-expansion engines.

The Italian steamship *Silvia Tripicovich* was sunk by mine or torpedo on February 22nd, 1941, between Trapani and Tripoli, with the loss of all on board.

SILVIO

Bristol S.N. Co.; 1899; *Campbeltown S.B. Co.*; 1,229 tons; 229 -8x32-8x15; 114 n.h.p.; triple-expansion engines. The British cargo ship *Stvio* sank after a collision with the steamship *Clan Menzies*, 2,669 tons, near Borsele on November 5th, 1902, while on a voyage from Antwerp to Bristol carrying a cargo which mainly consisted of sugar.

SILVIO SCARONI

Mario Zoboli; 1920; *L. Smit & Zoon*; 1,367 tons; 247-6x36-2x16-7; 127 n.h.p.; triple-expansion engines. The Italian steamship *Silvio Scaroni* was torpedoed and sunk by the British submarine *Taku* on June 12th, 1941, about 70 miles from Benghazi.

SILVONIA

Northwest Shipping Co.; 1930; *R. Williamson & Son*; 1,131 tons; 211 • 3x33 • 4 X13 • 1; 136 n.h.p.; triple-expansion engines. The British steamship *Silvonia* struck a rock and sank in St. Brelade's Bay, Jersey, on May 6th, 1935. She was on a voyage from Sunderland to St. Helier, C.I., carrying a cargo of coal.

SIMALOER

N.V. Stoomv. Maats. Nederland; 1920; *Nederlandsche Scheeps. Maats*; 6,533 tons; 420x54-7x33-3; 335 n.h.p.; triple-expansion engines.

The Dutch steamship *Simaloer* was bombed and sunk by German aircraft on March 2nd, 1941, N.W. of Ireland.

SIMLA

Devitt & Moore; 1854; *Tod & McGregor*; 2,288 tons; 330-2x39-8x26-7.

The four masted ship *Simla*, on a voyage from London to Australia, was sunk in a collision with the sailing ship *City of Lucknow*, 1,253 tons, at 8.15 p.m. on January 25th, 1884, off the Needles.

SIMLA

Peninsular & Oriental Steam Navigation Co.; 1894; *J. Caird & Co.*; 5,884 tons; 430x49-3x29-9; 662 n.h.p.; 15 knots; triple-expansion engines.

The liner *Simla* was 45 miles N.W. % W. of Gozo Island, near Malta, when she was torpedoed by a German submarine on April 2nd, 1916. Ten of the crew lost their lives.

SIMLA

W. Wilhelmsen; 1917; *Sir J. Laing & Sons*; 6,031 tons; 405-3X53-5x33-5; 559 n.h.p.; triple-expansion engines.

The Norwegian steamship *Simla* was torpedoed and sunk by a German submarine on September 22nd, 1940, about 600 miles W. of Inshtrahull on a voyage from Philadelphia to the River Tees. Five of her crew were lost.

SIMON BOLIVAR

SIMON BOLIVAR

Koninklijke Nederlandsche Stoomb. Maats.; 1927; Rotterdam DroogdokMaats.; 8,309 tons; 419-9x59-1x27-7; 856 n.h.p.; 14 knots; quadruple-expansion engines.

The liner *Simon Bolivar*, Capt. H. Voorspuuy, was on a voyage from Holland to Paramaribo. On November 18th, 1939, she struck a mine off Harwich. The liner carried 400 persons, passengers and crew. The explosion was of such violence that many persons on deck were killed, and Capt. Voorspuuy was mortally wounded and died very soon afterwards.

The *Simon Bolivar's* masts were blown down and she began to settle by the stern, there being considerable difficulty in getting out the boats. The ship's radio was damaged by the explosion and the S.O.S. could not be sent out, nevertheless other vessels were quickly on the spot. About 15 minutes after the first explosion there came a second one which hastened the end of the ship, and badly damaged some of the remaining lifeboats. The evidence of the ship's officers was that the vessel struck two mines, one on the port side and one on the starboard, there being an interval of about a quarter-of-an-hour between the strikings. Later the *Simon Bolivar* sank by the stern with the loss of 84 lives.

SIMONE SCHIAFFINO

Italian Navy, torpedo boat; 1914; Odero; 615 tons; 236-2x 24x8-8; 15,500s.h.p.; 32-5 knots; turbine engines; Thornycroft boilers; five 4 in. guns, two 40 mm.A.A., 4 m.g., 4 T.T. The Italian torpedo boat *Simone Schiaffino* struck a mine and sank off Cap Bon on April 24th, 1941. The vessel carried a complement of about 100.

SIMONSIDE

J. & E. Kish; 1896; W. Gray & Co.; 3,033 tons; 325x47-lx 23-8; 266n.h.p.; triple-expansion engines. The British steamship *Simonside* was wrecked on Southampton Reef, Conception Island, on November 22nd, 1912. She was on a voyage from Baltimore to Chiparra, Cuba, carrying a cargo of coal.

SIMOOM

British Navy, destroyer; 1916; J. Brown & Co.; 1,065 tons; 276x26-7x11-5; 27,000s.h.p.; 36 knots; turbine engines; Yarrow boilers; three 4 in. guns, one 12pdr., 5 m.g., 4 T.T. The destroyer *Simoom*, Cdr. Inman, was sunk in an engagement between British and German destroyers in the Flanders Fight on the night of January 22nd, 1917. The ship belonged to the Harwich Force under Cdre. R. Y. Tyrwhitt which had put to sea on the 22nd to intercept a German flotilla, under command of Cdr. Max Schultz, which was known to be making for Zeebrugge from German ports. This flotilla consisted of eleven V, S and G destroyers, 570-650 tons. The rival forces made contact between the North Hinder Light and the Maas at 2.45 a.m. on the 23rd. In the fight which ensued the *S 50*, which had lost touch at about 4 a.m. ran into a line of four British destroyers of which the *Simoom* was the leading ship. There was a sharp exchange of salvos and the *S 50* discharged a torpedo which struck the *Simoom* and exploded her magazine, causing heavy casualties. The *S 50* then escaped in the darkness.

The destroyer *Morris* took off all the *Simoom's* survivors and she was then torpedoed and sunk by the *Nimrod* on Cdre. Tyrwhitt's orders. The *Simoom* carried a complement of 90.

SIMS

United States Navy, destroyer; 1939; Bath Ironworks; 1,570 tons; 341x35x10; 44,000s.h.p.; 36-5 knots; turbine engines; Express boilers; five 5 in. guns, 12 T.T.

The United States destroyer *Sims* was escorting the tanker *Neosho*, 6,534 tons, in the Coral Sea, in the vicinity of the Louisiade Archipelago, on May 7th, 1942, when both ships were attacked by Japanese carrier borne aircraft. The *Sims*, which carried a complement of about 200, was sunk, and the *Neosho* suffered the same fate later on the same day. Fortunately there were very few casualties on either ship, most of the crews being picked up.

The full story of the battle of the Coral Sea is told under the Japanese aircraft carrier *Shoho*, and the U.S. aircraft carrier *Lexington*.

SINABANG

Koninklijke Paketyvaart Maats.; 1927; A. F. Smulders; 1,799 tons; 267-5x42-2x17-7; 150 n.h.p. compound engines. The Dutch steamship *Sinabang* was bombed and sunk by Japanese aircraft on March 2nd, 1942, about 150 miles N.E. of Djakarta.

SINAI

Messageries Maritimes; 1898; Forges & Chantiers de la Mediterranee; 4,624 tons; 393-7x43-6x33-5; 485n.h.p.; triple-expansion engines. The French steamship *Sinai* was torpedoed and sunk by a submarine in the Mediterranean on December 11th, 1916.

SINALOA

Servicios Maritimos de Mexico Soc. Anon.; 1943; Solvesborgs Varvs; 1,580 tons; 268-2x34-5x15; oilengines. The Mexican motorship *Sinaloa*, on a voyage from Manzanillo to Acapulco with passengers and a cargo of logs, sank during a storm on October 27th, 1959, off Manzanillo. Twenty-eight lives were lost, passengers and crew.

SINCERITA

C. Devotofu G.B.; 1877; Bartram, Haswell & Co.; 1,722 tons; 265-5x34x24-2; 133n.h.p.; triple-expansion engines. The Italian steamship *Sincerita* was torpedoed and sunk by a submarine in the Mediterranean on April 4th, 1918.

SINES

F. de Melo Rego; 1896; W. Hamilton & Co.; 2,975 tons; 310x42-6x19-3; 245n.h.p.; triple-expansion engines. The Portuguese steamship *Sines* was sunk by collision on March 20th, 1929, in the English Channel, on a voyage from Setubal to Hamburg.

SINFRA

Compagnie Generale de Nav. a Vap. Cyp. Fabre; 1929; Akers Mek Verksted; 4,470 tons; 385-3x54-8x24; 624n.h.p.; oilengines. The French motorship *Sinfra*, under German control, was bombed and sunk by British aircraft on October 9th, 1943, during the Allied operations against the Island of Kos. The ship was carrying German and Italian troops.

SINKIANG

China Nav. Co.; 1915; Scotts S.B. & E. Co.; 2,646 tons; 310-2x41-2x22-4; 196n.h.p.; triple-expansion engines. The British steamship *Sinkiang*, on a voyage from Calcutta to Colombo, was bombed, machine-gunned and sunk by Japanese aircraft on April 6th, 1942. Three European officers and a number of Chinese seamen were killed.

SINLOO

Pelton S.S. Co.; 1882; W. Hamilton & Co.; 1,133 tons; 241 x 33-4x13-9; 139 n.h.p.; compound engines. The British steamship *Sinloo* sank after a collision with the steamship *Douglas*, 741 tons, off Cross Sand on January 28th, 1905, while on a voyage from the Tyne to London carrying a cargo of coal.

SINOP

Mustafa Uman; 1913; J. Crown & Sons; 1,742 tons; 258 X 36-7x16-9; 197n.h.p.; triple-expansion engines. The Turkish steamship *Sinop*, on a voyage from Zonguldak to Istanbul with coal, was driven ashore in a storm and wrecked on Kefken Island on November 30th, 1948.

SIR FRANCIS

Cory Colliers; 1910; S. P. Austin & Son; 1,991 tons; 280-4X 40-5x18-5; 208n.h.p.; 9 knots; triple-expansion engines. The collier *Sir Francis* was torpedoed and sunk by a German submarine two miles N.E. of Scarborough on June 7th, 1917. The captain and nine of the crew were killed.

SIR GARNET WOLSELEY

W. Coupland & Co.; 1882; *Palmers' Co.*; 2,239 tons; 292X 37-7x23-5; 247n.h.p.; compound engines. The British steamship *Sir Garnet Wolseley* was wrecked near Tenes on December 25th, 1913, while on a voyage from Port Breira, Algeria, to the Tyne carrying a cargo of iron ore.

SIR HARVEY ADAMSON

British India S.N. Co.; 1914; *A. & J. Inglis*; 1,030 tons; 219-7X35-1x11-3; 155 n.h.p.; triple-expansion engines. The steamship *Sir Harvey Adamson*, Capt. Weaver, left Rangoon on April 17th, 1947, for Tavoy and Mergui with a crew of 64 and 205 passengers. She was due to arrive on the 18th, but ran into a south-easterly gale and wirelessly that she was unable to reach the port on that account. Nothing more was ever heard of the ship, no bodies or identifiable wreckage were washed up.

The ship was lost with a much higher number of people than any on a missing ship for a great number of years. Even the loss of the *Waratah* (which see) did not claim so many lives as did the *Sir Harvey Adamson*.

SIR JOHN JACKSON

Westminster Shipping Co.; 1905; *Northumberland S.B. Co.*; 4,231 tons; 360-4x47-9x20-2; 372 n.h.p.; triple-expansion engines.

The British steamship *Sir John Jackson* was wrecked on Brennus Shoal, Ceylon, on September 27th, 1908. She was on a voyage from Saigon to Bordeaux carrying a cargo of rice and maize.

SIR WALTER RALEIGH

D. Rose & Co.; 1876; *J. & G. Thompson*; 1,492 tons; 243-3X 38-7x21-7.

The sailing ship *Sir Walter Raleigh* left Sydney on November 10th, 1888, with a cargo of wool for London. In 1880 she had made the best outward run of the year in the Australian trade, and on the present occasion she was making her best homeward run, being only 80 days out, when she ran ashore near Boulogne and was completely wrecked. Five of the crew were lost.

SIRACUSA

R. M. Sloman & Co.; 1879; *Flensburg S.B. Co.*; 1,726 tons; 273-9x33-8x23-5; 208 n.h.p.; compound engines. The German steamship *Siracusa* was wrecked off Newquay, Cornwall, on March 3rd, 1897. All hands, 24, were lost.

SIRACUSA

Soc. Marittima Italiana; 1906; *Cantiere Navale Siciliani*; 3,187 tons; 333-1x42-8x17-8; 289 n.h.p.; triple-expansion engines.

The Italian steamship *Siracusa* struck a mine and sank in the Mediterranean on June 11th, 1917.

SIRDAR

Stephens, Sutton & Stephens; 1899; *Tyne Iron S.B. Co.*; 3,519 tons; 335X48-1X24* 8; 304 n.h.p.; triple-expansion engines. The British steamship *Sirdar* was wrecked on Melmeur Rock, W. of Molene Island, near Brest on November 23rd, 1910. She was on a voyage from Taganrog to Emden carrying a cargo of wheat.

SIRDHANA

British India Steam Navigation Co.; 1925; *Swan, Hunter & WighamRichardson*; 7,745 tons; 436-1x57-8x33-5; 801 n.h.p.; 13 knots; triple-expansion engines.

The steamship *Sirdhana*, Capt. P. Fairbairn, was leaving Singapore harbour on Monday, November 13th, 1939, with a large number of passengers on board, of whom 137 were Chinese deportees, when she struck a mine some three miles offshore and sank in 20 minutes. Twenty Asiatic deck passengers were killed.

SIREMALM

A/S Helgoy; 1906; *A. Rodger & Co.*; 2,468 tons; 313-6X 43-8x13-3; 248 n.h.p.; triple-expansion engines.

The Norwegian steamship *Sirealm* was torpedoed and sunk by a German submarine on September 27th, 1941, about 700 miles W. of the Bishop Rock. All her crew of 25 and two gunners were lost.

SIRENA

Navigazione Libera Triestina Soc. Anon.; 1911; *Stabilimento Tecnico*; 3,441 tons; 316-5x46x20-7; 269 n.h.p.; triple-expansion engines.

The Italian steamship *Sirena*, on a voyage from Genoa to Rotterdam in ballast, had her steering gear disabled in heavy weather on March 10th, 1926, and was wrecked at South Pier, Hook of Holland.

SIRENIA

RMcMillan; 1885; *C. Cornell & Co.*; 1,598 tons; 264-8x 38-1x22-6.

The sailing ship *Sirenica*, Capt. McIntyre, was bound from San Francisco to Dunkirk. She carried a crew of 26 and the captain's wife and three children. On the afternoon of March 9th, 1888, in dense fog and heavy sea she ran on the Atherfield Ledge, off Brighthstone, Isle of Wight. The ship was in full sail when she struck and lay dangerously exposed to the seas, making it difficult for the lifeboats from Brighthstone and Brook to approach.

The captain was reluctant to abandon his ship, but was compelled to do so when the seas showed no signs of moderating. The Brighthstone lifeboat, with 26 survivors and crew on board, capsized, drowning two of her crew and two from the ship. The Brook lifeboat was swamped by a huge wave and one of her crew was drowned. Those left on the *Sirenica* were taken off next morning.

SIRIKISHNA

South Georgia Co.; 1936; *Caledon S.B. & E. Co.*; 5,458 tons; 407X55-7x28; 256n.h.p.; 11 knots; triple-expansion engines. The steamship *Sirikishna* left the Clyde on February 19th, 1941, for Halifax with a crew of 35 and two gunners. She was last reported at 9 p.m. on the 23rd. It was considered probable that she had been sunk on the 24th about 500-600 miles W. of Rockall.

SIRIO

Navigazione Generate Italiana; 1883; *R. Napier & Co.*; 2,401 tons; 380x42x24-9; 850 n.h.p.; 10 knots; compound engines. The Italian liner *Sirio* was sailing from Genoa to Montevideo and Buenos Aires carrying no fewer than 695 passengers and a crew of 127. On August 4th, 1906, the ship was off the Spanish coast and about to enter Carthage. When close to Cape Palos the captain attempted to bring the ship inside the Hornigas Islands in order to shorten the run into the harbour. The usual, and safer, course was to pass on the outside of the islands. The vessel struck the rocks and began to settle, a panic broke out and amid scenes of the greatest violence and disorder the *Sirio* turned over to starboard and sank by the stern, taking with her 442 persons.

SIRIO

Societa Ligure di Armamento; 1921; *Cantiere Navale Riuniti*; 5,222 tons; 394-5x51-6x27-2; 335 n.h.p.; triple-expansion engines.

The Italian steamship *Sirio* was bombed and sunk by British aircraft on November 29th, 1942, at Tripoli.

SIRIUS

Cork Steamship Co.; 1837; *Menzies & Co.*; 703 tons; 178-4X 25-8x18-3; 320 i.h.p.; 9-5 knots; side-lever engines; paddles 24ft. diam.

The paddle steamship, *Sirius*, was one of the early steamships and was built for the St. George Steam Packet Co., Cork. This company was approached early in 1838 by the British American Steam Navigation Co., with a request to charter the *Sirius* for a voyage to New York, as the *British Queen*, which was advertised to sail within a few weeks, was not ready. The St. George Company agreed and on March 28th, the *Sirius* left London for New York, via Cork, which she left at 9 o'clock on the morning of April 4th, the first British steamship to attempt the crossing of the Atlantic. She arrived at New York on Monday, April 23rd, a few hours before the *Great Western*, a steamship of nearly twice her tonnage, which had sailed from Bristol on April 7th.

On her memorable voyage the *Sirius* was commanded by Lt. Richard Roberts, R.N., who displayed considerable firmness in dealing with an incipient mutiny, forcing the crew to work the ship at the muzzle of a revolver. Fortunately the weather improved and

the steamship accomplished her voyage in triumph, averaging 9 • 5 knots over part of the distance.

The *Sirius* was later transferred to the Cork Steamship Co. On January 15th, 1847, she left Dublin for Cork with 91 passengers and crew under Capt. Moffett, and a general cargo. The weather began to thicken and by 3 a.m. on the 16th there was a dense fog, the ship at that time being in Ballycotton Bay. At about 3-30 a.m. she struck on a reef and Capt. Moffett reversed his engines and succeeded in backing off from the rocks and running for the shore. The ship was making water fast but was still able to steam when she again crashed on a group known as Smith's Rocks, half a mile from Ballycotton. She was swept by heavy seas and the only boat was overloaded in panic and swamped, drowning 14 persons, of whom two were crew. Altogether 20 persons were lost, the remainder being rescued by a rope passed from the ship to the shore.

SIRIUS

Rederi-AIB Iris; 1889; J. Priestman; 1,870 tons; 280 • 5 X 39 • 2 X 18-8; 207n.h.p.; triple-expansion engines.

The Swedish steamship *Sirius*, on a voyage from Sundsvall to Mantyluoto with coal, was wrecked on December 16th, 1944, near Bjorneborg.

SIROCO

French Navy, destroyer; 1925; Ateliers et Chantiers de St. Nazaire; 1,458 tons; 347x33x13-7; 33,000 i.h.p.; 33 knots; turbine engines; four 5-1 in. guns, two 37 mm., 6 T.T. The French destroyer *Siroco*, Cdr. C. C. de Toulouse Lautrec Montfa, was engaged in operations connected with the evacuation of the French and British armies from Dunkirk, when she was torpedoed and sunk by a German motor torpedo boat. The attack took place on May 31st, 1940, and the destroyer sank with the loss of three officers and 53 ratings out of a complement of 159.

SISSOI VELIKI

Russian Navy, 1st class battleship; 1894; New Dockyard, Leningrad; 10,400 tons; 341x66x24; 8,494 i.h.p.; 15-7 knots; triple-expansion engines; four 12 in. guns, six 6 in., two 2 in., twelve 3pdr., 16 m.g., 6 T.T.

The Russian battleship *Sissoi Veliki* was a unit of the 2nd Division of the Baltic Fleet under Rear-Admiral Folkersham during the Russo-Japanese War.

At the battle of Tsu-Shima, on May 27th, 1905, the ship sustained very heavy damage. She was holed below the waterline, had her rudder and one propeller damaged and was, at one time, heavily on fire. By nightfall she was striving with what speed she had to get clear of her enemies and reach Vladivostok. During the night she was attacked by Japanese torpedo boats and was again hit and by dawn had very slender hopes of remaining afloat.

About 9 a.m. on the morning of the 28th she was sighted by the armoured cruiser *Vladimir Monomach* and the destroyer *Iromki*. The former of these ships was in a sinking condition and could afford no aid, that of the destroyer was declined, as the captain of the *Sissoi Veliki* realised that the crew of the *Vladimir Monomach* were looking to the *Iromki* for rescue. The ships then parted and about an hour later three Japanese armed merchantmen took off the battleship's crew just before she foundered.

The full story of the battle of Tsu-Shima is told under the *Kniaz Suvaroff*, flagship of Admiral Rojdestvensky.

SITHONIA

H. M. Thompson; 1919; J. L. Thompson & Sons; 6,723 tons; 412-5x55-5x34-4; 597 n.h.p.; triple-expansion engines. The British steamship *Sithonia*, on a voyage from Barry to Montevideo, was torpedoed and sunk by a German submarine on July 12th, 1942, about 400 miles W. of Teneriffe. Six of her crew and one gunner were lost.

SITOEBONDO

RotterdamseLloyd; 1916; Bonn&Mees; 7,049 tons; 445-7X 54-3x34-2; turbine engines.

The Dutch steamship *Sitoebondo* was torpedoed and sunk by a German submarine on July 30th, 1941, about 100 miles N.E. of the Azores on a voyage from London to Table Bay and Calcutta. There were 60 survivors, but one boat with 15 crew and two passengers was lost.

SIVOUTCH

Russian Navy, gunboat; 1907; Russia; 960 tons; 800 i.h.p.; 12 knots; triple-expansion engines; Belleville boilers; two 4-7 in. guns, four 12pdr., 3 m.g.

The Russian gunboat *Sivoutch* was one of a naval force guarding the sea approaches to Riga. On August 15th, 1915, the Germans sent an expedition to make a landing behind the city under cover of fog. The ensuing action, in which British submarines participated, was somewhat confused but after three days manoeuvring and fighting the Germans withdrew having lost the troops landed at Pernau. The battle cruiser *Moltke* was also a casualty, she having been torpedoed and badly damaged by the *E-1*, Cdr. N. F. Lawrence. The *Sivoutch* was sunk by gunfire after a very brave defence in which she lost many of her complement of 170.

The action was a decided reverse for the Germans who employed four battle cruisers besides large light forces.

SIXAOLA

United Fruit S.S. Corp.; 1911; Workman, Clark & Co.; 4,693 tons; 378-8x50-3x29-1; 413n.h.p.; triple-expansion engines. The American steamship *Sixaola*, on a voyage from Cristobal to New Orleans with passengers, was torpedoed and sunk by a German submarine on June 12th, 1942, 60 miles E.N.E. of Bocas del Toro. Twenty-nine of her crew were lost.

SIZERGH CASTLE

Plisson S.N. Co.; 1903; W. Pickett-sgill & Sons; 3,783 tons; 361X46-2X17-6; 349n.h.p.; triple-expansion engines. The British steamship *Sizergh Castle* sprang a leak and foundered in lat. 45° 15'N, long. 44° 06'W., on October 7th, 1919. She was on a voyage from Galveston to Antwerp carrying a cargo of wheat.

SIZILIEN

Rob. M. Sloman, Jr.; 1930; J. Readhead & Sons; 4,647 tons; 393-7x54-2x24-8; 436n.h.p.; triple-expansion engines. The German steamship *Sizilien* was bombed and sunk by British aircraft on May 4th, 1943, off Terschelling.

SKAALA

A. Halvorsen; 1906; Bergens Mek. Vcerksted; 1,129 tons; 229x35-2x15-9; 106n.h.p.; triple-expansion engines. The Norwegian steamship *Skaala* was torpedoed and sunk by a German submarine in the English Channel on December 26th, 1917.

SKAGERAK

Ministry of Shipping (Springwell Shipping Co.); 1921; F. Schichau; 1,283 tons; 224-3x33-6x13-5; 75 n.h.p.; triple-expansion engines.

The British steamship *Skagerak*, on a voyage from the Tyne to Ipswich with coke, struck a mine, broke in two and sank on August 24th, 1941. Seventeen of her crew and the pilot were lost.

SKAGERAK I

ChristiansandD/SA/S; 1939; Aalborg Vcerft A/S; 1,281 tons; 212x38x16-5; 657n.h.p.; oilengines.

The Norwegian ferry *Skagerak I*, flying the German flag, was torpedoed and sunk by a British submarine on January 20th, 1944, outside Egersund, Norway.

SKANE

RederiA/B Skane (H. Lundgren); 1921; Akt. Lindholmen-Motala; 4,528 tons; 377-8x54-2x24-4; 450 n.h.p.; triple-expansion engines.

The Swedish steamship *Skane* was shelled and sunk by two German submarines on March 6th, 1942, on a voyage from New York to Table Bay.

SKARAAS

The Shipping Controller (English & Co.); 1882; W. Gray & Co.; 1,625 tons; 259-6x34-7x19-5; 167n.h.p.; 8-5 knots; compound engines.

The steamship *Skaraas* was torpedoed and sunk by a German submarine one mile S.W. of Black Head, Co. Clare, on May 23rd, 1918. Nineteen men were killed. The captain was among the survivors.

SKARPSNO

Akties. Orsneces; 1889; Wood, Skinner & Co.; 1,766 tons; 281-2x37-1 X17-7; 205n.h.p.; triple-expansion engines. The Norwegian steamship *Skarpsno* struck a mine and sank in the Bay of Biscay on June 2nd, 1917.

SKEENA

Canadian Navy, destroyer; 1930; Thornycroft; 1,337 tons; 322x32-5x12; 34,000s.h.p.; 35 knots; turbine engines; Thornycroft boilers; four 4-7 in. guns, two 2 pdr. pom-poms, 5mg.8TT.

The Canadian destroyer *Skeena* was wrecked off Newfoundland on October 25th, 1944. Fifteen ratings were drowned. The official complement of the vessel was 138.

SKELDERGATE

Turnbull, Scott & Co.; 1930; Burntisland S.B. Co.; 4,251 tons; 372x52-4x25-2; 354n.h.p.; triple-expansion engines. The British steamship *Skeldergate* was driven ashore and wrecked during a cyclone at False Bay, 60 miles S.W. of Sandheads, on November 17th, 1950. She was on a voyage from Wallaroo to Calcutta carrying a cargo of wheat.

SKERRYVORE

Farrar, Groves & Co.; 1892; Richardson, Duck & Co.; 3,371 tons; 340•5x42•1 x 19•2; 300 n.h.p.; triple-expansion engines. The British cargo ship *Skerryvore* sank after a collision with the German barque *J. C. Vinnen*, 3,166 tons, off Hastings on May 15th, 1910. She was carrying an ore cargo from Villaricos to Rotterdam. Twenty-two of her crew were drowned. The only survivor was picked up by the *J. C. Vinnen*.

SKIDBY

R. Ropner & Co.; 1892; Ropner & Son; 3,703 tons; 343 X 45•1 X 20•1; 295 n.h.p.; triple-expansion engines. The British steamship *Skidby* was wrecked on Sable Island on January 31st, 1905, while on a voyage in ballast from the Tyne to Baltimore.

SKIPJACK

Witherington & Everett; 1905; J. Crown & Sons; 1,120 tons; 222x33-2x14-4; 145 n.h.p.; triple-expansion engines. The British steamship *Skipjack* was wrecked on Cowbar Steel Staithes, near Whitby, on November 13th, 1909, while on a voyage from Blyth to Portland, Dorset, carrying a cargo of coal.

SKIPJACK

British Navy, fleet minesweeper; 1934; John Brown & Co.; 815 tons; 230x33-5x7-9; 1,770i.h.p.; 16-5 knots; compound engines; 3-drum boilers; two 4 in. guns, 9 m.g. The fleet minesweeper *Skipjack*, Lt. Cdr. F. B. Proudfoot, was among the very large number of ships engaged in evacuating the British Army from Dunkirk. At about 8.30 on the morning of June 1st, 1940, when off La Panne in company with the destroyers *Basilisk* and *Keith* and the minesweeper *Salamander* the force was subjected to intensive bombing by about 40 German aircraft. The *Skipjack* was carrying from 250 to 300 troops at the time and she received a direct hit which sank her immediately. Most of the unfortunate soldiers and a number of the crew went down with the vessel.

The *Basilisk* was also hit, and foundered on her way home. The *Keith* was set on fire and had to be abandoned.

The full story of the Dunkirk Evacuation is told under the destroyer *Grafton*.

SKIPJACK

Hills.S.Co.; 1910; J. Crown & Sons; 1,167 tons; 222-5X 33-2x14-5; 148n.h.p.; triple-expansion engines. The British steamship *Skipjack* struck a mine and sank on August 19th, 1946, one mile out from Ravenna bound to Ancona. Eight of her crew were lost.

SKODSBORG

C.K.Hansen; 1902; Burmeister & Wain; 1,697 tons; 270-3 X 38x18-6; 181 n.h.p.; triple-expansion engines. The Danish steamship *Skodsborg* was torpedoed and sunk by a German submarine in the North Sea on March 20th, 1916.

SKOG

S. O. Stray & Co.; 1915; Trondhjems Mek. Vcerksted; 1,124 tons; 226-8x36-5x14-8; 116n.h.p.; triple-expansion engines. The Norwegian steamship *Skog* struck a mine and sank in the Bay of Biscay on October 26th, 1916.

SKOGHAUG

D/SA/SAIf; 1930; S. P. Austin & Son; 2,100 tons; 275-9 x 42-3x18-7; 224 n.h.p.; triple-expansion engines. The Norwegian steamship *Skoghaug* was sunk by an explosion, probably due to striking a mine, on the night of December 24th, 1947, N. of Ymuiden. There was only one survivor. Divers' examination of the wreck suggested that the ship might have been sunk by a boiler explosion.

SKOTTLAND

D/S A/S Skottland (F. N. Nordbo); 1920; J. Meyer's Schpsb. Maats.; 2,117 tons; 281x41-4x19-3; 170n.h.p.; triple-expansion engines.

The Norwegian steamship *Skottland* was torpedoed and sunk by a German submarine on May 17th, 1942, between Cape Cod and Sable Island.

SKRAMSTAD

A. F. Klaveness & Co.; 1925; Deutsche Werft A.G.; 5,472 tons; 382-7x53-4x24-9; 492n.h.p.; oilengines. The Norwegian motorship *Skramstad*, under German requisition, was bombed and set on fire by British aircraft on October 4th, 1943, off Bodo, Norway. The fire could not be controlled, and the ship ran ashore and was wrecked. She was carrying German troops at the time.

SKRIM

Einar Lange; 1917; Lindholmens Mek. Verkstad; 1,902 tons; 265•2x42•8X18•3; 214n.h.p.; triple-expansion engines. The Norwegian steamship *Skrim* left Aberdeen on November 25th, 1940, for Sydney, N.S. Nothing was heard of the ship after leaving Oban on December 1st, and she was considered to have been sunk by enemy action.

SKRYMER

B. A. Sanne; 1913; Fredrikstads Mek. Vcerksted; 1,476 tons; 243 X 39•3 x 17•3; 150n.h.p.; triple-expansion engines. The Norwegian steamship *Skrymer* was torpedoed and sunk by a German submarine in the Bristol Channel on March 10th, 1918.

SKULDA

J. T. Salvesen & Co.; 1882; S. & H. Morton & Co.; 1,177 tons; 227 X 33x14-8; 99 r.h.p.; compound engines. The British steamship *Skulda* sank after a collision with the Norwegian steamship *Tento*, 421 tons, in the Firth of Forth on October 9th, 1906, while carrying a general cargo on a voyage from Grangemouth to Stockholm.

SLAATERO

The Shipping Controller (Mordey, Jones & Co.) 1916; Akers Mek. Vcerksted; 1,117 tons; 226-5x36-5x15-7; 127n.h.p.; triple-expansion engines.

The British steamship *Slaattero* sank after a collision about three and a half miles E. of Runnelstone Buoy on June 25th, 1918. She was carrying a cargo of coal on a voyage from the Clyde to Nantes.

SLAMAT

Rotterdamische Lloyd; 1924; Koninklijke Maats. De Schelde; 11,636 tons; 510-1x62x35-2; 7,000s.h.p.; 17knots; turbine engines.

The Dutch liner *Slamat* was taken over for service as a transport after Holland became involved in the Second World War. She was engaged in the evacuation of troops from Crete to Nauplia when she was damaged by German aircraft on April 26th, 1941. On the 27th she was again attacked off Nauplia and sank with the loss of 193 men. The destroyers *Diamond* and *Wryneck* took off 700 survivors between them, but both were bombed and sunk later.

One officer, 41 seamen and eight soldiers survived this triple disaster.

SLANEY

SLANEY

British Navy, 2nd class gun vessel; 1857; Northfleet; 301 tons; 125-9x23x9-2; SOh.p.; steam engines; 1 gun, 2 howitzers. The gun vessel *Slaney*, Lt. W. F. L. Elwyn, had a complement of 53 officers and men. On May 9th, 1870, when off Drummond Island Reef, Paracels, China, she was overwhelmed by a typhoon and driven on to the reef. Forty-one of those on board were drowned.

SLAVA

Russian Navy, 1st class battleship; 1903; New Admiralty Yard; 15,000 tons; 397x76x26; 16,000 i.h.p.; 18 knots; triple-expansion engines; Belleville boilers; four 12 in. guns, twelve 6 in., twenty 12 pdr., four 3 pdr., 8 m.g., 4 T.T. In 1917 the battleship *Slava* was one of a small force under Vice-Admiral Bakhireff consisting, besides herself, of the old battleship *Grajdantin*—a veteran of the Russo-Japanese War, when she sailed under the name of *Tsarevitch*—the armoured cruiser *Bayan* and eight destroyers. It was the duty of this squadron to defend the Gulf of Riga, a task for which they were quite unequal, as the force opposed to them consisted of several German dreadnoughts of the *Heligoland* class, besides cruisers and destroyers. On October 18th, 1917, the Germans under Admiral Schmidt entered the Gulf and attacked the Russians off the southern entrance to Moon Sound. The *Slava* was badly battered and had to be abandoned, and was sunk across the channel in the hope of blocking it.

The official complement of the *Slava* was 750, a large proportion of whom were saved.

SLAVA

Atlantiska Plovidba d.d.; 1911; W. Doxford & Sons; 4,512 tons; 369-5x50x26-3; 404 n.h.p.; triple-expansion engines. The Yugoslav steamship *Slava* struck a mine and sank on March 16th, 1940, E. of the Bishop Rock when outward bound from Cardiff.

SLAVOL

British Admiralty; 1917; Greenock & Grangemouth Dockyard Co.; 2,623 tons; 320-1x41-6x23; 541 n.h.p.; triple-expansion engines.

The tanker *Slavol*, on a voyage from Alexandria to Tobruk with fuel oil, was sunk by enemy action on March 26th, 1942, off Sollum. About 40 of her complement of 56 were lost.

SLAVONIA

Cunard S.S. Co.; 1903; Sir J. Laing & Sons; 10,606 tons; 510x59-5x22-3; 929 n.h.p.; 14-5 knots; triple-expansion engines.

The liner *Slavonia*, Capt. A. G. Dunning, left New York on Thursday, June 3rd, 1909, for Gibraltar and Mediterranean ports with 100 cabin and 273 steerage passengers, and a crew of 225. At 2.30 a.m. on June 11th, 1909, the ship stranded near Velos, at the south-western end of the island of Flores, in the Azores. A wireless message for aid was at once sent out and was picked up by the *Princess Irene*, Capt. Peterson, 180 miles distant. This ship immediately put about and made for the *Slavonia* at full speed. The Hamburg-America liner *Batavia* also came on the scene, and between them these vessels took off all the passengers.

The *Slavonia* remained hard and fast ashore and soon became a total wreck.

SLAVONIC

Russian Government; 1905; W. Gray & Co.; 3,604 tons; 344-2x50x22-9; 303 n.h.p.; triple-expansion engines. The Russian steamship *Slavonic* was torpedoed and sunk by a German submarine in the North Sea on October 19th, 1917.

SLEMISH

Shamrock Shipping Co.; 1909; Ramage & Ferguson; 1,536 tons; 250-4x36-2x17-2; 178n.h.p.; triple-expansion engines. The British steamship *Slemish*, on a voyage from Hull to Cherbourg with coal, was sunk by mine or torpedo on December 23rd, 1944, about 40 miles N. of Cherbourg. Six of her crew and one gunner were lost.

652

SLIEDRECHT

Phs. Van Ommeren; 1924; Rotterdam Droogdok Maats.; 5,133 tons; 402-1x53-2x27-9; 489 n.h.p.; oil engines. The Dutch tanker *Sliedrecht*, with benzine and kerosene for Trondheim, was torpedoed and sunk by the German submarine *U-28* on November 16th, 1939, about 200 miles S. of Rockall, with the loss of 26 lives.

SLIEVE BLOOM

London & North Western Railway Co.; 1908; Vickers, Sons & Maxim; 1,071 tons; 299-5x37-2x14-1; 405n.h.p.; triple-expansion engines.

The British steamship *Slieve Bloom* sank after a collision four miles W.N.W. of South Stack on March 30th, 1918. She was on a voyage from Dublin to Holyhead carrying a general cargo.

SLOET van de BEELE

Koninklijke Paketvaart Maats.; 1914; Maats. Fyenoord; 2,977 tons; 325-5x44-1x22-7; 233 n.h.p.; triple-expansion engines.

The Dutch steamship *Sloet van de Beele* was transporting troops from Tandjong Pandan to Tandjong Priok when she was sunk by aircraft from the Japanese aircraft carrier *Ryujō*. The attack took place in the Java Sea off Banka on February 17th, 1942. Five lives were lost.

SMYRNA

G. Thompson & Co.; 1876; W. Hood & Co.; 1,305 tons; 232-3x38-5x22-2.

The clipper ship *Smyrna* was bound from the United Kingdom to Sydney, N.S.W. On April 28th, 1888, when off the Isle of Wight in dense fog she sank in a collision with the steamship *Moto*. The captain and 12 of the crew were drowned; the remaining 17 were taken off by the *Moto*.

SNABB

Rederi A/B Snabb (Algol Johansson); 1904; J. Readhead & Sons; 2,317 tons; 299-6x43-5x18-6; 239 n.h.p.; triple-expansion engines.

The Finnish steamship *Snabb* was torpedoed and sunk by a German submarine on June 3rd, 1940, off Cape Finisterre.

SNAPDRAGON

British Navy, corvette; 1941; W. Simons & Co.; 925 tons; 193x32x16; 2,750 i.h.p.; 17 knots; quadruple-expansion engines; one 4 in. gun, six 20 mm.

The corvette *Snapdragon*, Cdr. H. C. Sims, D.S.O., was bombed and sunk by enemy aircraft in the Central Mediterranean on December 19th, 1942. Cdr. Sims and 23 ratings were killed and one officer wounded.

SNARO

P. A. Musceus Rederi-A/S; 1885; J. Readhead & Co.; 1,272 tons; 234-9x34-2x16-9; 133 n.h.p.; compound engines. The Norwegian steamship *Snaro*, on a voyage from Skelleftea to Ghent, was wrecked on November 4th, 1929, about seven miles N. of Skalskar Light, Oland Island.

SNELAND I

D/S A/S Vestland; 1922; Ntiske & Co.; 1,791 tons; 268x42-3x18; 155 n.h.p.; triple-expansion engines. The Norwegian steamship *Sneland I* was torpedoed and sunk by a German submarine on May 7th, 1945, about 160 miles E. of the Firth of Forth. Seven of her crew were killed.

SNESTAD

Skibs AIS Snestad (A. F. Klaveness & Co. A/S); 1926; Kockums Mek. Vcerks; 4,114 tons; 377-6x54x22-9; 439 n.h.p.; oil engines. The Norwegian motorship *Snestad* was torpedoed and sunk by a German submarine on February 11th, 1940, about 100 miles W. of the Hebrides.

SNYG

D/S A/S Snyg; 1918; *Verschure & Co.*; 1,326 tons; 238-4X 36-7x15-8; 127n.h.p.; triple-expansion engines. The Norwegian steamship *Snyg*, under German control, was bombed and sunk by British aircraft on January 4th, 1941, near Haugesund.

SOBORG

Dampskibs Selsk. Dannebrog; 1899; *Short Bros.*; 2,108 tons; 286x43-1x19-8; 210n.h.p.; triple-expansion engines. The Danish steamship *Soborg* was torpedoed and sunk by a German submarine in the North Sea on May 30th, 1915.

SOBRAON

Peninsular & Oriental S.N. Co.; 1900; *Caird & Co.*; 7,382 tons; 450 x 54 - 2 X 31 • 6; 1,055 n.h.p.; triple-expansion engines. The British steamship *Sobraon* was wrecked on Tung Ying Island, off Foochow, at 3 a.m. on April 24th, 1901, in dense fog, while on a voyage from Shanghai to London carrying a general cargo.

SOCOA

Cie. des Chargeurs Franc. ais; 1913; *R. Thompson & Sons*; 2,772 tons; 299x46x22-5; 265 n.h.p.; triple-expansion engines. The French steamship *Socoa* was torpedoed and sunk by a submarine in the Mediterranean on August 25th, 1916.

SOCONY

So cony-Vacuum Transportation Co.; 1936; *Bremer Vulkan*; 4,404 tons; 349-7x52-3x29-6; 425 n.h.p.; compound engines. The British tanker *Socony* sank after a collision with the *Tongararo* on September 9th, 1941, in lat. 51° 03' N., long. 41° 32' W. She was carrying lubricating oil from Bay town, via Halifax, N.S., to the Thames.

SOCOTRA

British India S.N. Co.; 1872; *W. Richardson & Co.*; 1,947 tons; 292-3x36-2x17-4; 200 h.p.; compound inverted engines. The British cargo ship *Socotra* was wrecked near Maulmain on May 19th, 1882, while on a voyage from Calcutta to Maulmain carrying a cargo of turmeric.

SOCOTRA

Peninsular & Oriental S.N. Co.; 1897; *Palmers'Co.*; 6,009 tons; 450X52-2x30-5; 680 n.h.p.; triple-expansion engines. The British steamship *Socotra* was wrecked off Le Touquet on November 26th, 1915, while on a voyage from Brisbane to London carrying a general cargo.

SOEKABOEMI

Rotterdamsche Lloyd; 1923; *Bonn & Mees*; 7,051 tons; 445-8x54-3x34-2; turbine engines. The Dutch steamship *Soekaboemi* was torpedoed and sunk by a German submarine on December 28th, 1942, on a voyage from Glasgow to Bahia.

SOEMBA

N.V. Stoomv. Maats. Nederland; 1924; *N.V. Werf Conrad*; 6,718 tons; 423-9x54-7x33-5; turbine engines. The Dutch steamship *Soemba* left Halifax on January 3rd, 1941, for the Tees with a cargo of steel. On the 5th, about 300 miles S.E. of Cape Race, the cargo shifted and the ship capsized and sank. Thirty-four of her crew were lost; 24 survivors were picked up.

SOERABAJA

Netherlands Navy; 1909; *Amsterdam Dockyard*; 5,644 tons; 333x56x20-5; 8,000 h.p.; 16 knots; triple-expansion engines; *Yarrow boilers*; two 11 in. guns, two 3 in., six 40 mm.A.A., 6 m.g. The Dutch coastal defence ship *Soerabaja*, Cdr. J. C. Cornells, was launched as the *De Zeven Provinciën*, but was renamed in 1936. When Holland came into the Second World War in May, 1940, she was serving in the East Indies Squadron as a training ship. On February 18th, 1942, when lying at Sourabaya naval base she was bombed and sunk by Japanese aircraft, going down with the loss of 13 of her crew. More than two years later she was raised by the Japanese, but was wrecked five miles N. of Djamoengan Reef.

SOESTERBERG

N.V. Stoomv. Maats. Hillegersberg; 1927; *Antwerp Engineering Co.*; 1,904 tons; 278-5x40-2x18-4; 214 n.h.p.; triple-expansion engines.

The Dutch steamship *Soesterberg* was torpedoed and sunk by the German submarine *U-101* on October 18th, 1940, about 50 miles from Rockall on a voyage from Chatham, New Brunswick, to Hull. Six of her crew were killed.

SOFIA

John Toyia S.S. Co.; 1918; *W. Hamilton & Co.*; 1,722 tons; 254-7x35-1 x17-3; 326n.h.p.; triple-expansion engines. The Greek steamship *Sofia* was bombed and sunk by German aircraft on April 25th, 1941, at San Giorgio, during the invasion of Greece.

SOFIE

Stephenson Clarke & Co.; 1907; *Wood Skinner & Co.*; 354 tons; 135x24-2x10-6; 50 r.h.p.; 8 knots; triple-expansion engines. The steamship *Sofie* was sunk by a German submarine in the Bristol Channel on, or about February 3rd, 1918. The captain and seven of the crew were killed.

SOKA MARU

Dairen Risen K.K.; 2,813 tons. The steamship *Soka Maru* was sunk by U.S. carrier-based aircraft on March 24th, 1945, in the East China Sea.

SOKOTO

Sejlskibsselskabet Hippalos AIS; 1887; *Russell & Co.*; 2,259 tons; 278-5x41-9x24-5.

The Danish sailing ship *Sokoto* was shelled and sunk by a German submarine off the north coast of Scotland on April 25th, 1917.

SOKRATIS

S. Theofanides & Co.; 1904; *Cie. Francaise de Nav. & de Construction Navale*; 1,134 tons; 260-7x28-5x16-2; 305n.h.p.; triple-expansion engines.

The Greek steamship *Sokratis*, in service as a hospital ship, was bombed and sunk by German aircraft on April 22nd, 1941, in the Gulf of Corinth, during the invasion of Greece.

SOLAAS

John Wilson's Rederi A/S; 1917; *Frederikshavn Skibsværft & Flydedok*; 1,368 tons; 234-5x37-1x16; 120n.h.p.; triple-expansion engines.

The Norwegian steamship *Solaas*, on a voyage from Sundsvall to Antwerp, sprang a leak and sank on September 28th, 1939, in the Skagerrak.

SOLFERINO

Otto Thoresen; 1900; *Fevigs Jernskibs.*; 1,155 tons; 215-9X 32x21-2; 106n.h.p.; triple-expansion engines. The Norwegian steamship *Solferino* was sunk by a German submarine off Ushant on March 15th, 1917.

SOLFERINO

Den Norske Middelhavslinje; 1918; *Nylands Verks.*; 2,580 tons; 300 x40x 24; 225 n.h.p.; triple-expansion engines. The Norwegian steamship *Solferino* was bombed and sunk by German aircraft on February 26th, 1941, about 200 miles W. of Ireland, on a voyage from Manchester to Freetown.

SOLFERINO

Italian Navy, destroyer; 1920; *Orlando*; 862 tons; 256-5 X 24-7x8-5; 22,000s.h.p.; 32 knots; turbine engines; *Thorny-croft boilers*; four 4 in. guns, two 3 in., 4 m.g., 4 T.T., 10 mines. The small Italian destroyer *Solferino* fell into German hands at the time of the surrender of Italy on September 8th, 1943. On the night of October 19th, 1944, the vessel was intercepted by the British destroyers *Termagant* and *Tuscan*, both of 1,650 tons, west of the entrance to the Gulf of Salonika. There was a sharp engagement and the *Solferino* was badly damaged and driven ashore where she became a total wreck. She carried a complement of about 120.

SOLGLIMT

Jacobsen & Thon; 1883; Huygens & van Gelder; 1,037 tons; 187x36-1x21.

The Norwegian sailing ship *Solglimt* was sunk by a German submarine in the North Sea on August 10th, 1917.

SOLHEIM

Hvalfangerselsk. Norge; 1934; Nakskov Skibs. A/S; 8,070 tons; 461x59-7x34-5; 625 n.h.p.; oilengines.

The Norwegian motorship *Solheim* was bombed and sunk by German aircraft on March 23rd, 1941, S. of Crete.

SOLIMOEES

Brazilian Navy, ironclad monitor; 1875; Europe; 3,700 tons; 240x58x11-5; 2,200 i.h.p.; 11-2 knots; compound engines; four 10 in. m.l.r. guns, 5 m.g.

The Brazilian ironclad, *Solimoes*, Capt. Castro with a crew of 130 was despatched by the Brazilian Government to assist in suppressing an insurrection which had broken out in the province of Matto Grosso. On May 21st, 1892, when on her way up the coast the ship encountered a strong southerly gale which drove her ashore off Cape Polonio, Uruguay. This neighbourhood abounds in shoals and sand banks and possesses few landmarks. There are also many swift currents which are extremely variable. It is assumed that owing to a probable combination of these dangerous factors the *Solimoes* was overwhelmed. She sank with a loss of 125 officers and men, including Capt. Castro.

SOLON II

Ministry of War Transport (T.&J. Brocklebank); 1925; W. Gray & Co.; 4,561 tons; 400-3x53-2x25-1; 439n.h.p.; 10 knots; triple-expansion engines.

The steamship *Solon II*, Capt. J. Robinson, was torpedoed and sunk by a German submarine on December 2nd, 1942, some 150 miles N.E. of Georgetown, Demerara. Capt. Robinson, 68 of the crew and six gunners were lost. One boat containing the fourth engineer and six lascars was picked up by a fishing vessel, which brought them to Georgetown in an exhausted condition after 5 days adrift. One lascar was rescued from a raft after eight days adrift.

SOLON TURMAN

Lykes Bros. S.S. Co.; 1941; Bethlehem Steel Co.; 6,762 tons; 397 • 1 x 60 - 2 X 23 • 7; 666 n.h.p.; turbine engines. The American steamship *Solon Turman* was torpedoed and sunk by a German submarine on June 13th, 1942, about 150 miles N. of Cristobal.

SOLSTAD

A. F. Klaveness & Co.; 1916; Sunderlands B. Co.; 4,300 tons; 364 x 50 • 8 x 25 • 5; 310 n.h.p.; triple-expansion engines. The Norwegian steamship *Solstad* was torpedoed and sunk by a submarine in the Mediterranean on April 5th, 1917.

SOLSTAD

Rederi-A/B, Solstad; 1924; J. Lewis & Sons; 1,408 tons; 232-2x35-6x15-3; 155 n.h.p.; triple-expansion engines. The Swedish steamship *Solstad* was torpedoed and sunk by a German motor torpedo boat on January 6th, 1944, off Mounts Bay on a voyage from Swansea to London with coal. The ship sank in three minutes with the loss of five lives.

SOLVANG

I. A. Knudsen & C. Haaland; 1920; Eltringhams; 2,332 tons; 290-4x44x20-8; 203 n.h.p.; triple-expansion engines. The Norwegian steamship *Solvang*, on a voyage from Cienfuegos to Philadelphia with sugar, was sunk in a collision on January 24th, 1926, near Delaware Breakwater.

SOLVIKEN

Wallem & Co.; 1940; Fredrikstad Mek Verksted; 3,502 tons; 350x52-2x17-8; 372 n.h.p.; compound engines. The Norwegian steamship *Solviken*, under German control, was bombed and sunk by Russian aircraft on May 25th, 1944, in the Tanafjord, Norway.

SOLWAY

Royal Mail Steam Packet Co.; 1841; J. Macmillan & Co.; 1,700 tons; 220X — X-; 400 i.h.p.; 9 knots; side-lever engines; paddles.

The R.M.S.P. Co.'s steamship *Solway*, Capt. C. R. Duncan, was one of the early ships of the company, fourteen of which were laid down at shipyards throughout Britain in the year 1841. On April 7th, 1843, the vessel left Corunna for the West Indies, having on board 45 passengers and 88 crew. At midnight, or thereabouts, she ran on the Baldargo Reef, near the island of Sisargo. The captain reversed his engines, thus bringing his ship back into deep water, where she began to fill. The captain then made for land with the intention of beaching, instead of getting out his boats and transferring his passengers immediately. When he did give orders for the boats to be lowered several were swamped as they reached the water, because the ship was still moving.

The *Solway*, still under way, sank in shallow water, her masts and spars affording a refuge to many of those who remained on board. One boat managed to reach Corunna and to procure aid from the port. Rescuers at once went out and saved many people from the masts.

The number drowned was 35 including Capt. Duncan.

SOLWAY QUEEN

Kynoch-Arklow Ltd.; 1883; R. Smith; 307 tons; 145x23-lx I 10-2; 67 n.h.p.; 8 knots; compound engines. The steamship *Solway Queen* was torpedoed and sunk by a German submarine seven miles W. of Black Head, Wigtownshire, on April 2nd, 1918. The captain and ten men were killed.

SOMALI

British Navy, destroyer; 1937; Swan Hunter & Wigham Richardson; 1,870 tons; 355x36-5x9; 44,000 s.h.p.; 36-5 knots; turbine engines; 3-drum boilers; eight 4-7 in. guns, 7 smaller; 4 T.T.

The destroyer *Somali*, Lt.Cdr. C. D. Maud, D.S.C. was escorting a convoy to Murmansk in September, 1942. The convoy was under command of Rear-Admiral E. K. Boddam-Whetham, D.S.O., the escort being commanded by Rear-Admiral R. L. Burnett, O.B.E. It was known that the German battleship *Tirpitz* with the pocket battleship *Admiral Scheer* and the heavy cruiser *Hipper* were in northern Norwegian waters and there was a probability that these ships would endeavour to intercept the convoy. As a consequence it became necessary to dispose a large naval force, approximating to about 70 vessels of all kinds, to ensure the safe passage of the large fleet of merchantmen proceeding to Murmansk. The attack by the heavy enemy units did not develop, however, but on September 9th the Germans commenced hostilities with submarine packs followed by intensive bombing by large squadrons of aircraft. The battle continued until the 15th and cost the enemy two submarines and upwards of 40 bombers. About 70 per cent of the convoy reached its destination in safety, delivering the largest amount of munitions and supplies to Russia up to that date.

The *Somali* was torpedoed by a submarine on the 20th. She was taken in tow but on the 24th she broke in two owing to the heavy weather and sank. Seven officers and 74 ratings were killed.

SOMEDONO MARU

Tatsuuma Kisen K.K.; 1917; Mitsubishi Dockyard & Engineering Works; 5,154 tons; 400x54-5x30; 495 n.h.p.; triple-expansion engines.

The steamship *Somedono Mam* was torpedoed and sunk by the U.S. submarine *Silversides* on January 20th, 1943, N. of the Admiralty Islands.

SOMERSBY

Ropner Shipping Co.; 1913; Ropner & Sons; 3,647 tons; 346-5x50-8x23-3; 322 n.h.p.; triple-expansion engines. The British cargo ship *Somersby* was wrecked on Baldayo Bank on December 8th, 1923, while carrying a cargo of coal from Cardiff to Civitavecchia.

SOMERSET COAST

Powell, Bacon & Hough Lines; 1911; Sir Raylton Dixon & Co. ; 1,149 tons; 250-5x36x14-5; 178n.h.p.; triple-expansion engines. The British steamship *Somerset Coast* sank after a collision

one and a half miles S.W. by W. of Bardsey Light on April 21st, 1917, while on a voyage from Bristol to Liverpool.

SOMME

Normanby Shipping Co.; 1916; S. P. Austin & Son; 1,828 tons; 260 X37-5x17-5; 201 n.h.p.; 9 knots; triple-expansion engines.
The steamship *Somme* was torpedoed and sunk by a German submarine 20 miles E. by N. of Cape Barfleur on March 30th, 1917. Five men were killed. The captain was among the survivors.

SOMME

Royal Mail Lines ; 1919; Short Bros.; 5,265 tons; 400 X 52-4 x 28-5; 517n.h.p.; triple-expansion engines.
The steamship *Somme* left Loch Ewe on February 1st, 1942, in convoy for Bermuda and Curacao. The convoy dispersed on the 16th, and on the 18th, the *Somme* was torpedoed and sunk by a German submarine about 250 miles N.E. of the Bermudas, with the loss of all on board.

SOMMERSTAD

A. F. Klaveness & Co. Akties.; 1906; R. Stephenson & Co.; 3,875 tons; 340x47-1x27-3; 301 n.h.p.; triple-expansion engines.
The Norwegian steamship *Sommerstad* was sunk by a German submarine in the Western Atlantic on August 12th, 1918.

SONA

Margit.S.S.Co.; 1910; Earle'sCo.; 1,105tons; 256x36-2x15; 373n.h.p. triple-expansion engines.
The Panamanian steamship *Sona* was bombed and sunk by German aircraft in early April, 1941, in Adamas Bay, Milos Island, during the invasion of Greece.

SONG GIANG MARU

Japanese Government; 1922; Soc. Anon, des Anciens Etablissements Henri Satre; 1,065 tons; 216-5x34-2x —; 81 n.h.p.; triple-expansion engines.
The steamship *Song Giang Mam* was formerly the French *Song Giang*, seized by the Japanese in Indo-China. She was torpedoed and sunk by the U.S. submarine *Flasher* on April 29th, 1944, off j Hone Cohe, Indo-China.

SONIA

German Government; 1928; J. Crown & Sons; 2,719 tons; 305-3x45-2x21; 260n.h.p.; triple-expansion engines. The steamship *Sonia* was formerly the French *S.N.A. 9*, taken over by the Germans. On December 9th, 1943, she was torpedoed and sunk by a British submarine S. of Lemnos Island, Greece.

SONJA

AID Transmarin; 1923; Helsingborgs Varfs A/B; 1,828 tons; 277• 6x40-2x17-1; 206n.h.p.; triple-expansion engines. The Swedish steamship *Son/a* struck a mine and sank on June 10th, 1940, off Floro, Norway, with the loss of 12 lives.

SONNIE

Harries Bros. & Co.; 1917; Osbourne, Graham & Co.; 2,642 tons; 300x46x18-1; 272 n.h.p.; 9-5 knots; triple-expansion engines.
The steamship *Sonnie* was torpedoed and sunk by a German submarine five miles N.W. of Le Four Lighthouse on August 11th, 1917. Eleven men were killed. The captain was among the survivors.

SONTAY

Messageries Maritimes; 1907; Messageries Maritimes; 7,247 tons; 447-2x52-6x32-7; 548n.h.p.; 12knots; triple-expansion engines.
The liner *Sontay* was on a voyage from Salonika to Marseilles with 344 passengers and a crew of 81, commanded by Lt. Mage. On April 16th, 1917, she was torpedoed by a German submarine. She sank very rapidly but her boats were lowered with great promptitude and good discipline was maintained
There were 45 passengers among the drowned as well as Lt. Mage.

SORELDOC

U.S. War Shipping Administration; 1928; Swan, Hunter & Wigham Richardson; 1,926 tons; 253x43-3x17-8; 92n.h.p.; triple-expansion engines.
The American steamship *Soreldoc* was torpedoed by a German submarine on February 28th, 1945, and broke in two and sank in four minutes, on a voyage from Liverpool to Swansea. Fifteen of her crew were killed.

SORHOLT

Skibs-A/S Igadi; 1939; Kockums Mek. Verkstad; 4,801 tons; 409-8x55-7x25-5; 1,163 n.h.p.; oil engines. The Norwegian motorship *Sorholt* was torpedoed and sunk by a German submarine on September 15th, 1942, 100 miles from Trinidad on a voyage from Buenos Aires to Trinidad and New York. Seven of her crew were lost.

SORYU

Japanese Navy, aircraft carrier; 1935; Kure Dockyard; 10,050 tons; 688'5x68-5x16-5; 60,000s.h.p.; 30 knots; turbine engines; Kampon boilers; twelve 5 in. guns, 40 aircraft. The Japanese aircraft carrier *Soryu* took part in the battle of Midway Island, June 3rd-6th, 1942, as one of a squadron of four carriers escorting a large convoy destined for the occupation of the island. The attempt failed with disastrous losses to the Japanese who were compelled to turn their large fleet about and break up into small groups. The *Soryu* was attacked on the second day of the battle by naval dive bombers from U.S. aircraft carriers which caught her with a number of planes on her flight deck. These were set on fire and the conflagration got beyond the control of the crew. The vessel was burned out and abandoned, save for a few men, and taken in tow. While this operation was in progress the U.S. submarine *Nautilus* hit her with three torpedoes in quick succession and she sank during the night of the 4th June.

The Japanese losses were four aircraft carriers with 275 planes and one heavy cruiser. The Americans lost one aircraft carrier and one destroyer.

The full story of the battle of Midway Island is told under the U.S.S. *Yorktown*.

SOSHU MARU

Hinode Kisen K.K.; 1918; Asano S.B. Co.; 1,219 tons; 217x 34x18-5; 125 n.h.p.; triple-expansion engines. The steamship *Soshu (Sosyu) Maru* struck a mine and sank on June 29th, 1945, off Tsuruga, Japan.

SOTE

H.Metcalf; 1883; Kish, Boolds & Co.; 1,353 tons; 248-6X 34-1x18- 7; 192 n.h.p.; compound engines. The Swedish steamship *Sote* was torpedoed and sunk by a German submarine in the North Sea on April 25th, 1918.

SOTOLONGO

Cia. General de Tabacos de Filipinas; 1892; Sir Raylton Dixon & Co.; 3,009 tons; 315x41-2x18-5; 266n.h.p.; triple-expansion engines.
The Spanish steamship *Sotolongo* was sunk by a submarine in the Mediterranean on June 27th, 1918.

SOTON

Soc. Metalurgica Duro-Felguero; 1919; Soc. Espanola de Constr. Metalicas; 1,373 tons; 218-8x32-5x20-5; 75 n.h.p.; triple-expansion engines.
In January, 1937, during the Spanish Civil War the steamship *Soton* was shelled by the German cruiser *Konigsberg* off Santona, Spain. Later while in port at Gijon on August 29th, 1937, she was bombed and sunk by Insurgent aircraft.

SOUDAN

African S.S. Co.; 1889; Naval Construction & Armaments Co.; 2,689 tons; 311-6x39-2x24-7; 240h.p.; triple-expansion engines.
The British steamship *Soudan* sank after striking rocks off the coast of Guinea on July 16th, 1891. She was carrying a cargo o^ produce from Axim to Liverpool.

SOUDAN

SOUDAN

P. & O. Steam Navigation Co.; 1931; Barclay, Curie & Co.; 6,677 tons; 459x60-7x29-8; 1,320 n.h.p.; quadruple expansion & L.P. turbine.

The British steamship *Soudan* struck a mine and sank on May 16th, 1942, off Cape Town. The mine was probably one of many laid by the *Speybank* which was masquerading as a British ship but in reality had been captured by the Germans and used as a minelayer.

SOURABAYA

South Georgia Co.; 1915; Workman, Clark & Co.; 10,107 tons; 470-2x58-3x39-8; 735n.h.p.; 12 knots; quadruple expansion engines.

The tanker *Sourabaya*, Capt. W. Dawson, was torpedoed and sunk by a German submarine on October 27th, 1942, about 700 miles S.E. of Cape Farewell on a voyage from New York to Liverpool with 7,800 tons of fuel oil. Thirty of her crew and 49 passengers were lost. Capt. Dawson was among the survivors.

SOUTH AFRICA

Skibs-A/S Noruega; 1930; Swan, Hunter & Wigham Richardson; 9,234 tons; 484-1x65-4x36-8; 1,000n.h.p.; oil engines. The Norwegian motorship *South Africa* was torpedoed and sunk by a German submarine on June 8th, 1942, on a voyage from Curacao to Freetown. Six of her crew were lost.

SOUTH AMERICA

Lawther, Latta & Co.; 1900; Short Bros.; 4,197 tons; 370-3x48-7x18-9; 389n.h.p.; triple-expansion engines. The British steamship *South America* was wrecked at St. Loy Cove, Mount's Bay, on March 13th, 1912, while on a voyage in ballast from Hamburg to Cardiff.

SOUTH ATLANTIC

Pacific Shipping; 1909; J. L. Thompson & Sons; 3,581 tons; 346-5x50-8x23-4; 316n.h.p.; triple-expansion engines. The British steamship *South Atlantic* was wrecked off Brava Island, Cape Verde Islands, on December 9th, 1912. She was carrying a cargo of coal on a voyage from Barry to Buenos Aires.

SOUTH BRITON

Gibbs & Lee; 1888; Schlesinger, Davis & Co.; 1,543 tons; 260x37-2x16-6; 150h.p.; triple-expansion engines. The British steamship *South Briton* foundered in a hurricane in lat. 46° N., long. 9° W., on November 11th, 1891, while on a voyage from Cardiff to Malta carrying a cargo of coal.

SOUTH WALES

Gibbs & Co.; 1929; Bartram & Sons; 5,619 tons; 431-1x58-2x26-2; 513n.h.p.; triple-expansion engines. The British cargo ship *South Wales* was wrecked six miles W. of Point Amour, Belle Isle Strait, on September 26th, 1941. She was on a voyage from Bahía Blanca, via Sydney, N.S. to Belfast, carrying a cargo of grain.

SOUTH WESTERN

London & South Western Railway Co.; 1874; J. & W. Dudgeon; 674 tons; 222-3x27-1x13-5; 225n.h.p.; 13 knots; triple-expansion engines.

The steamship *South Western* was torpedoed and sunk by a German submarine nine miles S.W. by S. of St. Catherine's Point on March 16th, 1918. Twenty-four persons were killed. The captain was among the survivors.

SOUTHAMPTON

British Navy, cruiser; 1936; John Brown & Co.; 9,100 tons; 591-5x61-7x20; 75,000 s.h.p.; 32 knots; turbine engines; 3-drum boilers; twelve 6 in. guns, eight 4 in., one 3-7 in., four 3 pdr., 18 smaller, 6 T.T., 2 aircraft.

The cruiser *Southampton*, Capt. B. C. Brooke, formed part of a strong force escorting a convoy to Greece in January, 1941. The ships were attacked by two Italian destroyers in the early morning of January 11th and one the *Vega*, 642 tons, was sunk by the

Southampton and the other, the *Cigno*, 652 tons, was damaged and forced to run aground to prevent sinking. This action took place off the island of Pantellaria and was followed by an attack from two Italian torpedo bombers which was unsuccessful. Later about 40 German Ju87 dive bombers made a most determined attack, badly damaging the aircraft carrier *Illustrious*. In this attack the *Southampton* was struck by a heavy bomb which started a fire which defied all efforts to bring it under control and caused the ship to be abandoned some hours afterwards. An attempt was made to tow her but proved impossible and she was sunk by the British forces. The ships of the convoy suffered no damage.

Of the *Southampton's* complement 22 officers and 59 ratings were killed and one officer wounded. Capt. Brooke was among the survivors.

SOUTHBOROUGH

Hazlewood Shipping Co.; 1910; Sunderland Shipbuilding Co.; 3,709 tons; 346-5x50-8x23; 314 n.h.p.; 10 knots; triple-expansion engines. The steamship *Southborough* was torpedoed and sunk by a German submarine five miles N. by E. of Scarborough on July 16th, 1918. The captain and 29 men were lost.

SOUTHERN CROSS

Houlder Bros. & Co.; 1892; Workman, Clark & Co.; 5,252 tons; 400-4x48-1x29-6; 511n.h.p.; triple-expansion engines. The British steamship *Southern Cross* was wrecked at Vigo on December 24th, 1909. She was on a voyage from Antwerp, via London to Buenos Aires carrying a general cargo.

SOUTHERN CROSS

Murray & Crawford; 1886; Arendal; 537 tons; 146-5x20-7x17-6; 90 r.h.p.; triple-expansion engines.

The Newfoundland sealer *Southern Cross*, Capt. Clarke, with other vessels of the sealing fleet, had completed her season's catch. The ships were about to set out for St. John's, Newfoundland, when they were overwhelmed by a blizzard of extreme violence. The *Southern Cross* was sighted for the last time by the s.s. *Portia* on March 31st, 1914. Shortly afterwards she encountered the full force of the blizzard, and was believed to have been wrecked in the neighbourhood of Cape Race, going down with all on board, a total of 173.

The Newfoundland government ship *Fiona* was despatched immediately to make a search for the *Southern Cross* but returned after some days without discovering any trace of the missing vessel. In the meantime the s.s. *Bloodhound*, whose captain was unaware of the disaster, reported on her arrival in port that she had sighted quantities of wreckage near Cape Race, as well as a number of seal pelts. The *Southern Cross* was believed to have had 20,000 pelts on board when she was lost.

SOUTHERN DISTRICTS

Philadelphia & Norfolk S.S. Co.; 1944; Levenworth, U.S.A.; 3,338 tons; 328x50x24-1; 900 h.p.; oil engines. The motor vessel *Southern Districts* was originally a tank landing ship, converted into a cargo carrier. In 1954 the vessel ran aground in the Gulf of Mexico when carrying a cargo of sulphur, but was towed off. She then loaded a cargo of phosphate rock at Tampa for New Orleans, but on arrival was found to have sprung a leak, 400 tons of her cargo suffering water damage.

Her last voyage was from Port Sulphur to Bucksport, Maine, with a cargo of sulphur, and she left on December 2nd, 1954. She sent a radio message to her owners on the 5th, when off the coast of South Carolina, stating that all was well. This was the last heard of her; but for some days no anxiety was felt for her safety as she was not required to radio again until within 48 hours of her destination. It was therefore not until the 11th that the U.S. Coastguard was informed that the vessel was overdue.

A search lasting for about a fortnight, and covering nearly 262,000 square miles of sea, was carried out by sea and air, but brought no result. An Inquiry held at New Orleans found that the wind in the Gulf of Mexico had changed to N.N.E. shortly after the *Southern Districts* left port. This wind was notoriously bad for vessels in the Gulf, and created violent seas. Her crew numbered 23.

SOUTHERN EMPRESS

Chr. Salvesen & Co.; 1914; W. Doxford & Sons; 12,398 tons; 525 • 5 X 66 • 5 X 33 • 9; 925 n.h.p.; 11 knots; quadruple-expansion engines.

The whale oil refinery *Southern Empress*, Capt. Hansen, was torpedoed and sunk by an enemy submarine on October 13th, 1942, about 400 miles S. of Cape Farewell on a voyage from New York to the Clyde. She was carrying fuel oil. Twenty-four of her crew, four gunners, and 20 passengers were lost. Capt. Hansen was among the survivors.

SOUTHERN ISLES

Philadelphia & Norfolk S.S. Co.; 1943; Jeffersonville Boat & Machine Co.; 3,325 tons; 314-3x50x24-1; oil engines. The American motorship *Southern Isles*, on a voyage from San Juan, Puerto Rico, to Chester, Pa., with iron ore, broke in two and sank on October 5th, 1951, about 250 miles S.S.W. of Cape Hatteras. Eighteen of her crew were lost; seven survivors were picked up.

SOUTHERN PRINCESS

Chr. Salvesen & Co.; 1915; Armstrong, Whitworth & Co.; 12,156 tons; 530X66-6X41-4; 947 n.h.p.; 11 knots; quadruple-expansion engines.

The whale oil refinery *Southern Princess*, Capt. H. Nillsen, was torpedoed and sunk by an enemy submarine on March 17th, 1943, about 1,000 miles E. of Newfoundland on a voyage from New York to the Clyde with 10,053 tons of heavy fuel oil. Two of her crew and two passengers were lost.

SOUTHERN QUEEN

Thor Thoresen; 1902; C. Cornell & Co.; 5,648 tons; 410-3x49-3x29-5; 500 n.h.p.; triple-expansion engines. The Norwegian tanker *Southern Queen* was sunk by ice on February 24th, 1928, near the South Orkneys, while collecting whale oil from the Antarctic whaling fleet.

SOUTHLANDS

Jones, Hallett & Co.; 1901; W. Gray & Co.; 2,985 tons; 324-5 x 47 • 1 x 22 • 5; 269 n.h.p.; triple-expansion engines. The British steamship *Southlands* was wrecked near Cape Goro-detsky, at the entrance to the White Sea on October 7th, 1912. She was on a voyage from Archangel to London carrying a cargo of pulpwood.

SOUTHSEA

Southern Railway; 1930; Fairfield Co.; 825 tons; 244x30-1x10-5; 213 n.h.p.; 16 knots; compound engines. The paddle steamer *Southsea* was taken over by the Admiralty during the Second World War for service as a minesweeper. On February 16th, 1941, when off S. Shields she struck a mine and had to be beached and abandoned. Seven of her crew were lost.

SOUTHWOLD

British Navy, destroyer; 194-; A. Stephen & Sons; 1,050 tons; 280x29x7-7; 19,000 s.h.p.; 27-5 knots; turbine engines; 3-drum boilers; four 4 in.A.A. guns, 8 smaller. The destroyer *Southwold*, Cdr. C. T. Jellicoe, D.S.C., struck a mine off Malta on March 24th, 1942, when engaged in screening H.M. auxiliary *Breconshire* which had been damaged in convoy. The destroyer remained afloat for some time and great efforts were made to save her, but she eventually sank with one officer and four ratings.

The full story of the battle of Sirte is told under the destroyer *Heythrop*.

SOVEREIGN

Hunter River Steam Navigation Co.; 1839; Pyrmont, Sydney; 214 tons; 122x18x5-5; 8 knots; side-lever engines. The Australian paddle steamer *Sovereign* was one of the pioneer coastal steamships on that continent, and was employed between Manning River and Moreton Bay. Her engines had been salvaged from the wreck of the *King William IV*, lost on Oyster Bank in 1839. On March 17th, 1847, when coming out of the south passage, Moreton Bay, the *Sovereign* foundered with a loss of 44 persons.

SOVEREIGN

MLelan & Blackie; 1879; J.Geddes; 1,224 tons; 201-6x39x22-2.

The Canadian wooden sailing ship *Sovereign* collided with the steamship *Highgate*, 1,395 tons, off Lundy Island on February 19th, 1890. Eight of her crew were lost; three survivors landed in company with survivors from the *Highgate*. The captain and eight others were picked up by the steamship *Bay Fisher* off the Bishop's Rock after 30 hours in a boat.

SOVINTO

Sovinto; 1878; Barclay, Curie & Co.; 1,718 tons; 266-2x38-8x23-6.

The Russian barque *Sovinto* was bound from Dalhousie, N.B. to Melbourne. She was wrecked on the north coast of Prince Edward Island on November 7th, 1906, with the loss of ten of her crew.

SOWERBY

R. Ropner & Co.; 1878; W. Gray & Co.; 1,189 tons; 240X31-7x17-2; 134 n.h.p.; compound engines. The British steamship *Sowerby* was wrecked near Understen Lighthouse in the Gulf of Bothnia, on October 29th, 1897. She was carrying a cargo of wood from Hernosand to Paimbceuf.

SOWWELL

Sowell Steamship Co.; 1900; W. Gray & Co.; 3,781 tons; 340-3x49-6x25-6; 297 n.h.p.; 9-5 knots; triple-expansion engines.

The steamship *Sowell* was torpedoed and sunk by a German submarine 170 miles W. i S. of Gibraltar on April 19th, 1917. The captain and 20 men were lost.

SOYO MARU

Toyo Risen K.K.; 1931; Asano S.B. Co.; 6,081 tons; 415X56x31-8; 747 n.h.p.; oil engines.

The motorship *Soyo Mam* was taken over by the Japanese Navy and converted into a submarine tender. On December 7th, 1943, she was torpedoed and sunk by the U.S. submarine *Pogy* about 550 miles E. of Guam.

SPAARDAM

Nederlandsche-Amerikaansche Stoomv. Maats.; 1922; New Waterway S.B. Co.; 8,857 tons; 450-3x58-2x37-2; 880 n.h.p.; 13 knots; turbine engines.

The liner *Spaardam*, on a voyage from Tampico to Antwerp, struck a mine off the Thames Estuary at 9.45 a.m. on November 27th, 1939. The vessel was ripped open as far as her upper deck and sank in shallow water, being only partly submerged. At just before midnight the wreck caught fire and continued to burn throughout the night. Seven lives were lost.

SPADA

Italian Navy, torpedo boat; 194-; Italy; 706 tons; 265-7X27-2x9; 22,000 s.h.p.; 31-5 knots; turbine engines; 3-drum boilers; two 3-9 in. guns, six 20 mm.A.A., 6 T.T. The Italian torpedo boat *Spada* was torpedoed and sunk by a British motor torpedo boat off the west coast of Istria on February 8th, 1945. The vessel carried a complement of over 100.

SPAR

Hudig & Pieters Algemeene Scheepv. Maats.; 1924; C. van der Giessen & Zonen; 3,616 tons; 361x50-3x22-1; 322 n.h.p.; triple-expansion engines.

The Dutch steamship *Spar* was torpedoed and sunk by a German submarine on August 5th, 1942, 400 miles E. of Belle Isle Strait on a voyage from Sydney, Nova Scotia, to London.

SPARROWHAWK

British Navy, destroyer; 1897; Laird Bros.; 355 tons; 213X21-5X-; 6,000 h.p.; 30 knots; triple-expansion engines; one 12pd. gun, five 6pdrs., 2 T.T.

The destroyer *Sparrowhawk*, Lt. G. G. Codrington, was serving on the China station when she ran on an uncharted rock off Chesney Island, China, on June 17th, 1904, and was wrecked. There was no loss of life.

SPARROWHAWK

SPARROWHAWK

British Navy, destroyer; 1912; Swan Hunter; 950 tons; 266 X 27x9; 25,000 i.h.p.; 32 knots; turbine engines; Yarrow boilers; three 4 in. guns, 4 T.T.

The destroyer *Sparrowhawk*, Lt. Cdr. S. Hopkins, was a unit of the 4th Flotilla at the battle of Jutland. Just after 11.30 on the night of May 31st the flotilla was steaming line ahead when it encountered a force of enemy battleships. The flotilla leader *Broke* swung to port to enable her torpedo tubes to bear, *Sparrowhawk* conforming to this movement, but at that moment the flotilla leader was struck by an enemy salvo and had her steering gear put out of control. As a result she continued to circle to port till she crashed into *Sparrowhawk* just forward of the bridge. The *Garland*, next in line, narrowly avoided a collision, but *Contest*, having no warning of the mishap, tore off *Sparrowhawk*'s stern.

The *Sparrowhawk* managed to keep afloat until 8.45 on the next morning, when her crew were taken off by the destroyer *Marksman*, and Admiral Burney gave orders to sink her by gunfire. Six ratings were killed.

SPARTA

Bennett S.S. Co.; 1900; Taylor & Mitchell; 708 tons; 185-4x 29-2x11-8; 82 r.h.p.; triple-expansion engines. The British steamship *Sparta*, on a voyage from Blyth to Southampton with coal, struck a mine and sank on March 10th, 1941, ten miles off Dungeness. Nine of her crew were lost.

SPARTAN

CarlBech&Co.; 1891; Russell & Co.; 2,287 tons; 277-9x 42-1x24-2.

The Norwegian sailing ship *Spartan* was torpedoed and sunk by a German submarine off the S.W. coast of Ireland on March 9th, 1917.

SPARTAN

British Navy, light cruiser; 1942; 5,450 tons; 506x51-5x14; 62,000 s.h.p.; 33 knots; turbine engines; 3-drum boilers; ten 5-25 guns, 16 smaller, 6 T.T.

The cruiser *Spartan*, Capt. P. V. McLaughlin, was sunk off the Nettuno beach-head when supporting the advance of the American Fifth Army. The weather had been extremely rough and the landing of reinforcements and supplies for the army had been held up for some days. This produced a serious situation for the military on shore and support by the guns of the fleet was essential as the Germans were known to be mounting an offensive. On January 29th, 1944, *Spartan* fell victim to a bomb from a German glider aircraft which exploded near one of her magazines. She caught fire and blazed for some hours but sank before nightfall. Destroyers took off a large proportion of her complement of between 450 and 500. Five officers and 59 ratings were killed.

The full story of the Anzio landing is told under the light cruiser *Penelope* which was torpedoed and sunk.

SPARIVENTO

M.Querci; 1907; W. Pickersgill & Sons; 3,694 tons; 372 x 49x25-1; 343 n.h.p.; triple-expansion engines. The Italian steamship *Spartivento* was bombed and sunk by German aircraft on September 13th, 1943, in Kalamata Roads.

SPEC

AIS Skibsfart; 1918; Great Lakes Engineering Works; 2,053 tons; 254-2x43-7x20-3; 184 n.h.p.; triple-expansion engines. The Norwegian steamship *Spec* left Glasgow on February 14th, 1935, for Boston with coal. A wireless message to Sable Island wireless station reported the ship to be in thick ice and a severe storm off the coast of Newfoundland. Nothing more was ever heard of her.

SPEEDY

British Navy, torpedo gunboat; 1893; Thornycroft; 810 tons; 230x27x12-5; 3,500 i.h.p.; 20 knots; triple-expansion engines; Thornycroft boilers; two 4-7 in. guns, four 3 pdr., 3 T. T. The torpedo gunboat *Speedy* was one of a class which had a very short life as units of the Royal Navy. They achieved no useful purpose and soon became obsolete. The *Speedy*, however, created a record in another direction as she was the largest and heaviest

ship to be launched on the Thames as high as Chiswick, taking the water with her engines on board and her funnels in place.

At the outbreak of the First World War the ship was engaged in minesweeping. On August 26th the German light cruisers *Mainz* (which see) and *Stuttgart*, and the minelayer *Albatros*, laid minefields off the Humber and the Tyne. On September 3rd, 1914, *Speedy*, which was helping to clear the field, had her bottom blown out and sank almost immediately.

SPENCE

United States Navy, destroyer; 1942; Bath Ironworks; 2,050 tons; 376-5x39-5; 60,000 s.h.p.; 35-5 knots; turbine engines; five 5 in. guns, four 40 mm., four 20 mm., 10 T.T. The United States destroyers *Spence*, *Hull* and *Monaghan* were returning from patrol with their fuel tanks almost empty when they were overwhelmed by a typhoon E. of Samar in the Philippines on December 17th, 1944. The steering gear of the *Spence* was badly damaged soon after the storm broke, and she foundered at about noon with nearly all her complement of 341 officers and ratings.

The full story of the disaster is told under the destroyer *Hull*.

SPENNYMOOR

Walter Runciman & Co.; 1899; J. Blumer & Co.; 2,748 tons; 319-5x46-1x20-9; 263 n.h.p.; triple-expansion engines. The British steamship *Spenny Moor* foundered during a heavy gale in lat. 36° N., long. 1° E., on December 7th, 1903. She was on a voyage from Smyrna to London carrying a general cargo.

SPENNYMOOR

W. Runciman & Co.; 1905; J. Blumer & Co.; 2,733 tons; 314X46-5x20-6; 257 n.h.p.; 9 knots; triple-expansion engines. The steamship *Spenny Moor* was torpedoed and sunk by a German submarine 50 miles S.W. of Start Point on May 28th, 1915. The captain and four of the crew were lost.

SPERO

Pelton S.S. Co.; 1899; S. P. Austin & Son; 1,199 tons; 235X 34-3x14-5; 156 n.h.p.; triple-expansion engines. The British steamship *Spero* was wrecked at Blyrev, near Larvik, on December 24th, 1917. She was carrying a cargo of wood pulp.

SPEZAI

Coutzis Bros.; 1891; W. Gray & Co.; 1,904 tons; 277-1x 38-1x17-6; 176 n.h.p.; triple-expansion engines. The Greek steamship *Spezai* was sunk by a submarine in the Mediterranean on September 8th, 1916.

SPEYBANK

Bank Line; 1926; Harland & Wolff; 5,154 tons; 420-3X 53-9x26-5; 717n.h.p.; oilengines. Captured by a German battleship about February 1st, 1941, soon after leaving Cochin for Port Elizabeth and sailing at various times under the names *Leverbank*, *Interbank* or *Doggerbank*, the m.s. *Speybank*, under the command of a German merchant navy officer, Capt. Paul Schneidewind, played great havoc among British shipping by laying mines at the approaches to Cape Town. After two successful missions in this area she was sent to Yokohama to bring home a valuable cargo to Bordeaux/Sailing as *Doggerbank*, she left at the end of December, 1942. The German Admiralty set a detailed course for her and warned its submarines on the route about the bogus British ship. But Capt. Schneidewind raced home ahead of his timetable and on March 3rd, 1943, when only 2,000 miles from Bordeaux his ship was torpedoed by the German submarine *U-43*. Nearly 150 men went down with the ship. Fifteen managed to clamber aboard a small flat-bottomed boat, but only one was still alive when it was sighted by the Spanish tanker *Campoamor* on March 29th.

SPEZIA

R. M. Sloman, Jr.; 1924; A. G. Neptun; 1,825 tons; 287-1x 41-3x16-7; 192 n.h.p.; triple-expansion engines. The German steamship *Spezia* was torpedoed and sunk by a British submarine on December 22nd, 1941, ten miles W. of Cape Misurata.

SPHINX

British Navy, fleet minesweeper; 1939; W. Hamilton & Co.; 875 tons; 230x33-5x7-9; 1,750i.h.p.; 17 knots; triple-expansion engines; 3-drum boilers; two 4 in.A.A. guns, 5 smaller. The fleet minesweeper Sphinx, Cdr. J. R. Taylor, was attacked by German aircraft on the night of February 3rd, 1940. The vessel was hit and badly damaged and capsized in rough weather off the N.E. coast of Scotland. Cdr. Taylor, four other officers and 49 ratings were killed.

SPICA

Italian Navy, torpedo boat; 1943; Italy; 706 tons; 265-7X 27-2x9; 22,000 s.h.p.; 31-5 knots; turbine engines; 3-drum boilers; two 3-9 in. guns, six 20 mm.A.A., 6 T.T. The Italian torpedo boat Spica fell into the hands of the Germans at the capitulation of Italy in September, 1943. She was renamed the TA-45 and recommissioned, but was torpedoed and sunk by a British motor torpedo boat in the Planuski Channel on the night of April 12th, 1945.

SPIKENARD

Canadian Navy, corvette; 1940; 925 tons; 205x33x14-5; 2,800i.h.p.; 16 knots; triple-expansion engines; 3-drum boilers; one 4 in.A.A. gun, 1 pom-pom, two 20 mm.
The corvette *Spikenard* was lent to the Canadian Government by the Admiralty. On February 11th, 1942, when in the West Atlantic, she was torpedoed and sunk by a German submarine. Her normal complement was 85.

SPINGARNA

Italian Navy, corvette; 194-; Italy; 565 tons; 220x27x7-7; 3,400b.h.p.; 19 knots; Diesel engines; two 3-9 in. guns, five 20 mm.A.A.
The Italian corvettes *Melpomene* and *Springarna* with the torpedo boat *Audace* were manned by German crews and on the night of November 1st-2nd, 1944, were patrolling off Pag Island, between Fiume and Zara, when they were brought to action by the British destroyers *Wheatland* and *Avon Vale*, both of 1,025 tons, six 4 in. guns. The fight was very brief, both corvettes being disabled in the first ten minutes and sinking later. The *Audace* was then engaged and sank after about half an hour. A large number of survivors was picked up from the three ships.

The full story of the action is told under the *Audace*.

SPIRIT OF THE DAWN

J. Bell & Son; 1869; T. R. Oswald & Co.; 716 tons; 175-kx 30-7x19-7.
The iron barque *Spirit of the Dawn*, Capt. R. T. Millington, with a cargo of rice from Rangoon to Talcahuano, Chile, ran on a reef off Antipodes Island on the 4th September, 1893, and became a total wreck. Of her crew of 16 the captain and four others were drowned. The vessel had been running through thick weather for three days, and on the day that she struck the fog was very dense.
The 11 survivors lived on the island for 87 days, subsisting on birds, mussels and roots. They mended their clothes with sail canvas, using albatross bones for needles. They also made a flag put of sailcloth and erected a flagstaff on the highest point of the island. This was seen on or just after 1st December by the Government steamship *Hinemoa* on one of her regular trips to the island, and the almost dying men were taken off and brought to New Zealand.

SPIRIT OF THE OCEAN

C. Walton; 1863; Jones & Co.; 578 tons; 159-5x32-5x18-7;
The barque *Spirit of the Ocean* struck a rock off Dartmouth on March 23rd, 1866, and sank. Only four of those on board were saved.

SPITFIRE

British Navy, gun vessel; 1834; Woolwich Dockyard; 553 tons; 155X27-8X16-9; 140h.p.; 10 knots; steam engines, paddles; two 9 pdr. guns.
The gun vessel *Spitfire*, Lt. Cdr. H. E. S. Winthrop, carried a complement of 50 officers and men. On September 16th, 1842, she was wrecked off Half Moon Cay, British Honduras. No lives were lost.

SPOLETO

Italian Government; 1939; Soc. Provencale de Construccions Navales; 7,960 tons; 469-3x61-6x38-8; 1,310n.h.p.; oil engines.
The motorship *Spoletto* was formerly the French *Caledonien*, seized by the Italians. On January 31st, 1945, she was bombed and sunk by Allied aircraft at Bizerta

SPONDILUS

M. Samuel & Co.; 1893; J. Laing; 4,129 tons; 347-5x45-7x 27-3; 341n.h.p.; triple-expansion engines.
The British steamship *Spondilus* was wrecked at Cape Varela, Cochin China, on March 6th, 1896. She was carrying a general cargo from Japan and China to London and Hamburg.

SPORTIVO

A. Lauro; 1900; Rickmers A.G.; 1,598 tons; 259-1X 37-2X 19-2; ISON.h.p.; triple-expansion engines.
The Italian steamship ~ *Sportivo* was torpedoed and sunk by a British submarine on January 18th, 1943, off Zuara, Libya.

SPREWALD

Hamburg-Amerika Linie; 1922; Deutsche Werft; 5,083 tons; 399-6x54-2x27-4; 714n.h.p.; oil engines.
The motorship *Spreewald* left Yokohama about November, 1941, in an attempt to reach a German controlled port. She was torpedoed and sunk by a British submarine on January 31st, 1942, 450 miles N. of the Azores.

SPRINGBANK

Bank Line; 1926; Harland & Wolff; 5,155 tons; 420-3x 53-9x26-5; 717 n.h.p.; 11 knots; oil engines.
The motorship *Springbank*, Capt. C. H. Godwin, D.S.O., serving as an armed auxiliary aircraft catapult ship in the Second World War was torpedoed and sunk by a German submarine on September 27th, 1941, in the North Atlantic. One officer and 31 ratings were killed.

SPRINGDALE

Springwell Shipping Co.; 1937; Short Bros.; 1,636 tons; 259-9x40-3x17-6; triple-expansion engines.
The British cargo ship *Springdale* capsized and sank on June 18th, 1959, after her cargo had shifted, about 17 miles off Cape Skag, Gulf of Bothnia, in lat. 63° 02' N., long. 19° 39' E. She was carrying a cargo of timber from Munksgaard to London.

SPRINGHILL

Fisher, Renwick & Co.; 1904; J. Crown & Sons; 1,507 tons; 253-2x36-6x17-5; 166 n.h.p.; 9 knots; triple-expansion engines.
The steamship *Springhill* struck a mine and sank four miles N. by E. | E. of Scarborough on August 24th, 1917. Five men were killed. The captain was among the survivors.

SPRO

A/S Frogner; 1882; W. Doxford & Sons; 1,507 tons; 250 X 36-1x17-2; 156 n.h.p.; compound engines.
The Norwegian steamship *Spro* was torpedoed and sunk by a German submarine in the Bay of Biscay on December 21st, 1917.

SPYRIDON

N.G. Livanos; 1898; Russell & Co.; 3,548 tons; 239-4X 45-9x17-8; 298 n.h.p.; triple-expansion engines.
The Greek steamship *Spyridon*, on a voyage from Seriphos to Rotterdam, was wrecked on Biduido Rocks, near Vigo, on June 18th, 1922.

SPYROS

S. P. Antipapas; 1904; Schomer & Jensen; 2,108 tons; 274 X 39-8x20; 169 n.h.p.; triple-expansion engines.
The Greek steamship *Spyros*, on a voyage from Istanbul to Hamburg, was wrecked on January 24th, 1937, two miles W. of Portimao, Portugal.

SPYROS

Aegean S.S. Co.; 1918; W. Doxford & Sons; 6,629 tons; 420 x54x34-4; 567 n.h.p.; triple-expansion engines. The Greek steamship *Spyros*, on a voyage from St. John, N.B., to Liverpool with wheat, struck a rock, broke in two and sank on February 17th, 1942, about 20 miles from Halifax.

SQUIRREL

British Navy, fleet minesweeper; 1944; Harland & Wolff; 950 tons; 235x35-5x11-5; 2,000 h.p.; 16-5 knots; one 4 in. A.A. gun, four 20 mm.
The fleet minesweeper *Squirrel* was operating off Pucket, Siam, on July 24th, 1945, when she struck a mine. She remained afloat for some time but it proved impossible to tow her and she was sunk by ships in company.

SREBRENO

Dubrovačka Plovidba A.D.; 1901; J. Readhead & Sons; 3,304 tons; 331x47-1x25; 278 n.h.p.; triple-expansion engines. The Yugoslav steamship *Srebreno*, on a voyage from Dubrovnik 2 to Mersin, was driven ashore in a gale on December 17th, 1940. She broke in two and sank.

STAD ALKMAAR

Halcyon Lijn N.V.; 1940; N. V. Wilton Fyenoord; 5,750 tons; triple-expansion engines.
The Dutch steamship *Stad Alkmaar* was torpedoed and sunk by a German motor torpedo boat on September 7th, 1940, in the North Sea, on a voyage from Santa Cruz to London with 9,000 tons of sugar. Fourteen survivors were picked up.

STAD AMSTERDAM

N. V. Stoomb. Maats. "Stad Amsterdam" (Halcyon Lijn); 1920; N. V. Scheepw. Dordrecht; 3,780 tons; 341-9x50x25-5; 300 n.h.p.; triple-expansion engines.
The Dutch steamship *Stad Amsterdam* was torpedoed and sunk by a German submarine on August 25th, 1942, between Key West and Trinidad.

STAD DORDRECHT

Halcyon Lijn N.V.; 1920; Harland & Wolff; 3,781 tons; 341-9x50x25-5; 301 n.h.p.; triple-expansion engines. The Dutch steamship *Stad Dordrecht*, flying the German flag, struck a mine and sank on November 13th, 1944, in Kiel Bay.

STAD SCHIEDAM

Halcyon Lijn; 1911; Craig, Taylor & Co.; 5,918 tons; 415 x 55-5x26-6; 470 n.h.p.; triple-expansion engines. The Dutch steamship *Stad Schiedam* was bound from Port Sulphur to Sydney, N.S., with sulphur. On September 16th, 1940, when two days out from Bermuda, the ship was sunk by an internal explosion. Twelve survivors were picked up after being afloat for five days on a raft. The explosion was considered to have been caused by a bomb placed in the cargo.

STADT EMDEN

Kauffahrtrei Seereederei A. Wiards & Co.; 1901; Howaldtswerke; 5,180 tons; 406-2x52-5x23-1; 312 n.h.p.; triple-expansion engines.
The German steamship *Stadt Emden* was bombed and sunk by British aircraft on June 13th, 1943, S. of Den Helder.

STADT RIGA

German Government; 1907; Clyde S.B. & E. Co.; 3,002 tons; 315-3x47x21; 269 n.h.p.; triple-expansion engines. The steamship *Stadt Riga* was formerly the Latvian *Andrejs Kalnins*, seized by the Germans. On July 6th, 1944, she was bombed and sunk by British aircraft W. of Norderney.

STAFFA

Hershind & Co.; 1889; E. Withy & Co.; 2,146 tons; 281-6x 37-1x19-5; 224 n.h.p.; triple-expansion engines. The British steamship *Staffa* was wrecked near False Cape, North Carolina, on January 16th, 1897, while on a voyage from New Orleans to Lynn carrying a cargo of maize.

STAFFORDSHIRE

Liverpool & Boston packet; 1851; Donald McKay, Boston; 1,817 tons.
On December 9th, 1853, the sailing vessel *Staffordshire*, Capt. Richardson, left Liverpool for Boston carrying 225 persons of whom 198 were passengers, mostly emigrants. Until December 24th the *Staffordshire* experienced fair weather, but on that date she met with a full gale which carried away her bowsprit, foretopmast rigging and rudder. In going aloft to examine the damage to the foretopmast the captain was blown down, breaking his ankle and injuring his spine. The command of the ship then devolved on the first officer, Mr. Joseph Alden, who managed to work the vessel until January 2nd, 1854, when the wind moderated.

On this night she ran into a snowstorm, visibility being reduced to about two cables length. At 11.40 p.m., the second officer being in charge, the *Staffordshire* struck on the Blonde Rock, Cape Sable, Two of the four boats broke adrift and the remaining two, being smaller than the others, could only accommodate a few persons. They were got away without mishap and shortly afterwards the ship foundered. Capt. Richardson gave his orders from his cabin and refused to be saved.

Altogether 175 persons lost their lives.

STAG

Joseph Robinson & Sons; 1874; Bartram; 1,558 tons; 259-4X 33-5x24-3; 150 h.p.; compound inverted engines. The British cargo ship *Stag* was wrecked at Punta Delgada on October 2nd, 1880, while on a voyage from New Orleans to Marseilles carrying a cargo of wheat.

STAINSACRE

Thomas Turnbull & Son; 1876; Thomas Turnbull & Son; 1,108 tons; 222-9x30-1x17-6; 99 h.p.; compound inverted engines.
The British steamship *Stainsacre* sank after a collision near the mouth of the Tyne on November 30th, 1885. She was on a voyage from the Tyne to Copenhagen carrying a cargo of coal.

STALHEIM

A/S Standard; 1936; Fredrikstad Mek. Verksted; 1,298 tons; 251-1x42-3x14; 96 n.h.p.; compound engines. The Norwegian steamship *Stalheim* struck a mine and sank on July 31st, 1940, in the Bristol Channel. Five of her crew were lost.

STALINGRAD

U.S.S.R.; 1931; Baltic S.B. & E. Works; 3,559 tons; 314-7X 46 • 1 X 26 • 1; 220 n.h.p.; triple-expansion engines.
The Russian steamship *Stalingrad* was torpedoed and sunk by a German submarine on September 13th, 1942, about 700 miles S.W. of Bear Island on a voyage from Reykjavik to North Russia.

STAMATIOS G. EMBIRICOS

S. G. Embiricos; 1936; Short Bros.; 3,941 tons; 400x53x 23 • 1; 330 n.h.p.; triple-expansion engines.
The Greek steamship *Stamatios G. Embiricos*, on a voyage from Mombasa to Calcutta, was intercepted by the German raider *Steiermark* at 1.10 a.m. on September 24th, 1941, about 450 miles N.E. of the Seychelles and sunk by gunfire. Five of her crew were killed and 25 taken prisoner of war.

STAMPALIA

La Veloce Nav. Italiana; 1909; Cantieri Navali Riuniti; 9,000 tons; 476-6x55-8x29; 813 n.h.p.; triple-expansion engines. The Italian steamship *Stampalia* was torpedoed and sunk by a submarine in the Mediterranean on August 18th, 1916.

STAMPALIA

Adriatica Soc. Anon, di Nav.; 1907; Fredrikstad Mek. Verksted; 1,228 tons; 232-6x32-6x19-7; 132 n.h.p.; triple-expansion engines.
The Italian steamship *Stampalia* was torpedoed and sunk by British aircraft on April 15th, 1941, at Valona.

STANBANK

Starhope Steamship Co.; 1942; W. Pickersgill & Sons; 5,966 tons; 401x54x33-2; 415 n.h.p.; 10 knots. The steamship *Stanbank*, Capt. Niddrie, was torpedoed and sunk

by a German submarine in the North Atlantic, between 500 and 600 miles S.E. of New York on May 5th, 1942. The vessel carried a crew of 49, of whom nine were killed. Capt. Niddrie was among the survivors. The *Stanbank* was not in convoy at the time of the sinking.

STANBROOK

Stanhope Steamship Co.; 1909; *Tyne Iron Shipbuilding Co.*; 1,383 tons; 230-1x34x21-8; 163n.h.p.; 9 knots; triple-expansion engines.

The steamship *Stanbrook*, Capt. Dickson, left Antwerp on November 18th, 1939, for the Tyne in ballast. Nothing more was heard of the ship or her crew of 21, and she was considered to have been sunk by enemy action.

STANBURN

Stanhope Steamship Co.; 1924; *Wood, Skinner & Co.*; 2,881 tons; 333-8x44-6x21-6; 359n.h.p.; 10 knots; triple-expansion engines.

The steamship *Stanburn*, Capt. Lewis, was bombed and sunk by German aircraft off Flamborough Head on January 29th, 1940. Of those on board 25 men, including Capt. Lewis, were killed. There were only three survivors. The vessel was not in convoy at the time of the sinking.

STANBURN

Stanhope Steamship Co.; 1919; *Great Lakes Eng. Works*; 2,768 tons; 253-4x43-7x24-5; 211 n.h.p.; triple-expansion engines.

The British cargo ship *Stanburn* foundered after striking a submerged object N. of Kerkenna Bank, off the Tunisian coast in lat. 35° 15' N., long. 11° 55' E. on October 27th, 1946. She was on a voyage in ballast from Algiers to Sfax.

STANCLIFFE

Stanhope Steamship Co.; 1936; *Lithgows Ltd.*; 4,511 tons; 385x53-5x25-2; 451 n.h.p.; 11 knots; turbine engines. The steamship *Stancliffe*, Capt. H. Sudbury, was torpedoed and sunk 45 miles N.E. of Uist Island, the Shetlands, on Friday, April 12th, 1940. Four days later a lifeboat containing 16 survivors in a very exhausted condition and six dead bodies reached a northern port. One Arab seaman died after landing. The survivors stated that another boat containing 15 persons was wrecked, making a total loss of 22 men, including Capt. Sudbury. The *Stancliffe* was not in convoy at the time of the sinking.

STANDARD

AIS Standard; 1930; *Smith's Dock Co.*; 1,286 tons; 242-9X 37 X16; 127 n.h.p.; triple-expansion engines. The Norwegian steamship *Standard*, under German control, was torpedoed and sunk by a British submarine on October 14th, 1944, in the Salten Fjord. Eleven of her crew were lost.

STANFORTH

Stanhope Steamship Co.; 1915; *Jan Smit Czn.*; 1,817 tons; 262-2x38-2x17-4; 203n.h.p.; triple-expansion engines. The British cargo ship *Stanforth* was wrecked at Grundkallegrund on August 17th, 1945, while on a voyage from Kalix to London carrying a cargo of wood.

STANGARTH

Stanhope Steamship Co.; 1942; *W. Pickersgill & Sons*; 5,966 tons; 401x54x33-2; 415n.h.p.; 10 knots. The steamship *Stangarth*, Capt. Herbert, left New York on March 11th, 1942, for Table Bay and India. Nothing more was ever heard of the ship or her crew of 40 and six gunners. She was considered to have been sunk by enemy action on about the 16th.

STANGATE

Stanhope Steamship Co.; 1912; *W. Dobson & Co.*; 1,289 tons; 240 x 33 • 5 X15 • 4; 201 n.h.p.; triple-expansion engines. The British cargo ship *Stangate* sank in approx. lat. 54° 36' N., long. 1° 45' W., after a collision with the *Agios Georgios* on December 7th, 1942. She was on a voyage from the Tyne to Portsmouth carrying a cargo of coal.

STANGRANT

Stanhope Steamship Co.; 1912; *Hawthorn Leslie*; 5,804 tons; 426x54-1x29-3; 777 n.h.p.; 13 knots; triple-expansion engines. The steamship *Stangrant*, Capt. Rowlands, was sailing in a convoy 200 miles W. of Scotland on October 13th, 1940, when she was torpedoed and sunk by a German submarine. Eight of her crew were killed. Capt. Rowlands was among the survivors.

STANHOLME

Stanhope Steamship Co.; 1927; *Burntisland Shipbuilding Co.*; 2,473 tons; 298-5x43-9x21-2; 259n.h.p.; 9-5 knots; triple-expansion engines.

The steamship *Stanholme*, Capt. Hook, struck a mine and sank in the Bristol Channel on December 25th, 1939. Thirteen men were killed, Capt. Hook and 12 others were rescued.

STANHOPE

English & Co.; 1882; *Irvine & Co.*; 1,367 tons; 244x33-1x 15-8; 156 n.h.p.; compound engines.

The British steamship *Stanhope* sank after a collision with an unknown schooner off Beachy Head at 3 a.m. on March 16th, 1900, while on a voyage from Bilbao to Middlesbrough carrying a cargo of iron ore.

STANHOPE

English Steamship Co.; 1900; *Ropner & Sons*; 2,854 tons; 333x46x22-2; 275 n.h.p.; 9-5 knots; triple-expansion engines.

The steamship *Stanhope* was torpedoed and sunk by a German submarine seven miles S.W. by W. of Start Point on June 17th, 1917. Twenty-two men were killed. The captain was among the survivors.

STANLEIGH

Stanhope Steamship Co.; 1912; *G. Seebeck, Germany*; 1,802 tons; 259-7x38-1x17-9; 186n.h.p.; 9 knots; triple-expansion engines.

The steamship *Stanleigh*, Capt. Bibbings, was in a convoy in the Irish Sea on March 14th, 1941, when she was bombed and sunk by German aircraft. Seventeen men, including Capt. Bibbings, were killed. The survivors numbered six.

STANLEY

B. Moir & Co.; 1858; *West Hartlepool*; 552 tons; 190x 26-1x14-2; 9 knots; compound engines.

The steamship *Stanley*, Capt. Howling, left London for Aberdeen on November 23rd, 1864, with 30 passengers, 26 crew and 40 head of cattle besides many sheep and pigs. At 5 o'clock on the afternoon of the 24th she ran into the mouth of the Tyne for shelter, because of a violent storm accompanied by heavy rain squalls. It was very dark, the Low-Level lights at North Shields were not burning, and as a result of this the ship mistook the position of the channel and ran on the Black Middens shortly after making the estuary.

A rocket was fired and a hawser and cradle rigged, but the female passengers were too timid to avail themselves of this means of rescue. A boat was then lowered but the davits broke and three of the occupants were drowned. Then the schooner *Friendship*, also seeking shelter in the Tyne, drove ashore close to the *Stanley*. Attempts by the Shields and Tynemouth lifeboats to save those on board both vessels were unsuccessful. The Tynemouth lifeboat *Constance* was flung against the schooner and stove in; two of her crew were drowned. At about 10.30 p.m. the schooner sank with her crew of six men. At 1 a.m. the *Stanley* broke in two, the forward portion being completely turned about by the seas. No further attempts at rescue could be made during the night, but at daybreak nine passengers and 20 seamen were taken off by the Cullercoats rocket-brigade.

Thirty-four lives were lost in all.

STANLEY

George Pyman & Co.; 1871; *Denton, Gray & Co.*; 1,023 tons; 230 x30-1x16-7; 99 r.h.p.; compound engines. The British cargo ship *Stanley* was wrecked at Finngrundet on October 26th, 1895, while on a voyage from Skelleftea to London carrying a cargo of wood.

STANLEY

Pyman Steamship Co.; 1914; Irvine's S.B. & D.D. Co.; 3,987 tons; 380-8x51-2x24-3; 435n.h.p.; 11 knots; triple-expansion engines.

The steamship *Stanley* was torpedoed and sunk by a German submarine 230 miles W. by N. of Fastnet on March 21st, 1917. Eight of her crew were killed. The captain was among the survivors.

STANLEY

British Navy, destroyer; 1919; Bethlehem Shipbuilding Corp.; 1,190 tons; 311x35x9-2; 25,000s.h.p.; 35 knots; turbine engines; four 5 in. guns, 12 T.T.

The destroyer *Stanley*, Lt.Cdr. D. B. Shaw, O.B.E., was formerly the U.S.S. *McCalla* and was transferred to Britain in 1940 under the Lease-Lend Agreement. In December 1941 she was escorting a convoy of some 30 merchantmen across the Atlantic when the Germans initiated a determined attack by Focke-Wulf bombers and submarine packs. The battle lasted for five days, from December 17th to the 21st, during which time three submarines and two bombers were destroyed, the British losing the auxiliary aircraft carrier *Audacity*, 5,537 tons, (which see) and two merchantmen, as well as the *Stanley*.

During the action the destroyer sank the *U-434* after she had been forced to the surface and been abandoned by her crew. The following morning (the 19th) the *Stanley* herself was torpedoed and sunk by the submarine *U-574*, which was sunk in her turn by the sloop *Stork*.

The number lost with the *Stanley* was 11 officers, including Lt.Cdr. Shaw, and 125 ratings. The full story of the attack on the convoy is told under the *Audacity*.

STANVAC CALCUTTA

Petroleum Shipping Co.; 1941; Bethlehem Steel Co.; 10,169 tons; 488-3x68-3x36-9; 769n.h.p.; turbine engines. The Panamanian tanker *Stanvac Calcutta* was intercepted by a German raider and sunk by gunfire on January 6th, 1942, about 250 miles off the Brazilian coast on a voyage from Montevideo to Caripito. Fourteen of her crew were killed.

STANVAC MANILA

Petroleum Shipping Co.; 1941; Bethlehem Steel Co.; 10,169 tons; 488-3x68-3x36-9; 769n.h.p.; turbine engines. The Panamanian tanker *Stanvac Manila* on a voyage from Curacao to Noumea with refined oil and a deck cargo of motor torpedo boats, was torpedoed and sunk by a Japanese submarine on May 23rd, 1943, off Noumea. Eight of her crew and three gunners were lost.

STANVAC MELBOURNE

Petroleum Shipping Co.; 1941; Sun S.B. & D.D. Co.; 10,013 tons; 503-9x68-3x36-9; 1,006 n.h.p.; turbine engines. The Panamanian tanker *Stanvac Melbourne* was torpedoed and sunk by a German submarine on September 12th, 1942, S. of Barbados on a voyage from Pernambuco to Aruba.

STANVAC PALEMBANG

Petroleum Shipping Co.; 1941; Sun S.B. & D.D. Co.; 10,013 tons; 503-9x68-3x36-9; 1,006 n.h.p.; turbine engines.

The Panamanian tanker *Stanvac Palembang* was torpedoed and sunk by a German submarine on July 10th, 1942, S. of Barbados on a voyage from Santos to Trinidad. Five of her crew were killed.

STANWOLD

Stanhope Steamship Co.; 1909; Osbourne, Graham & Co.; 1,020 tons; 210-5x33-2x13-6; 106 n.h.p.; 8-5 knots; triple-expansion engines.

The steamship *Stanwold*, Capt. MacCready, left the Tyne on February 23rd, 1941, and Southend on the 26th for Cowes, in convoy. She was seen to have a list to port and at 10.30 p.m. on the 26th reported that she was steering badly. She was last sighted at 4.20 a.m. on the 27th, listing to starboard. Nothing more was heard of the ship and her crew of 19 and two gunners until the bodies of some of the crew were washed up in Pevensy Bay.

STAR OF BENGAL

Alaska Packers Association; 1874; Harland & Wolff; 1,877 tons; 262-8x40-2x23-5.

The American barque *Star of Bengal*, Capt. N. Wagner, left Fort Wrangel, Alaska, on September 19th, 1908, with 50,000 cases of salmon, a crew of 36 and 110 Chinese cannery hands. The voyage commenced at 8.20 a.m. with fair weather, the vessel being in tow of two small tugs. By 2 o'clock on the morning of the 20th the wind had risen to a gale and it was impossible to hail either of the tugs. At 3.50 a.m. the vessel lowered her sails and dropped two anchors, being close to the rocks of Coronation Island, and shortly afterwards the tugs cut their hawsers and steamed away.

The *Star of Bengal* was in a dangerous plight, and at daylight there was no sign of the tugs. The anchors began to drag and the captain called for volunteers to carry a line to the rocks. Four men got ashore and managed to secure a line. At 9.32 a.m. the vessel struck, and heavy seas caused the hull to pound upon the rocks so that the masts fell overside.

When the mizzen mast, the last to fall, had gone, the seas had a clear sweep of the decks and within a few minutes everyone was flung overboard.

Nine Europeans and 101 Chinese were drowned. Capt. Wagner was among the survivors.

STAR OF CANADA

I. P. Corry & Co.; 1909; Workman, Clark & Co.; 7,280 tons; 470-3x58-4x31-6; 749 n.h.p.; triple-expansion engines. The British steamship *Star of Canada* dragged anchors during a gale and was wrecked on Kaiti Beach, Gisborne, on June 23rd, 1912. She was carrying a general cargo from New Zealand ports to London.

STAR OF GREECE

I. P. Corry & Co.; 1868; Harland & Wolff; 1,289 tons; 227x35x22-2.

The British sailing ship *Star of Greece*, Capt. Harrower, left Adelaide homeward bound on July 12th, 1888. The following day she ran into a violent gale. The ship, which carried a crew of 27, struck on a reef off Willanga, South Australia, and was quickly broken up by the seas. Capt. Harrower, the second officer and 15 men were drowned. Mr. Hayland, the first officer, with six apprentices and two seamen were saved.

STAR OF JAPAN

I. P. Corry & Co.; 1906; Workman, Clark & Co.; 6,236 tons; 440-3x55-3x30-3; 601 n.h.p.; triple-expansion engines. The British cargo ship *Star of Japan* was wrecked at Pedro de Galle, on the West coast of Africa, on April 8th, 1908. She was on a voyage from London to Hawke's Bay carrying a general cargo.

STAR OF LUXOR

Alexandria Nav. Co. S.A.E.; 1918; W. Gray & Co.; 5,298 tons; 400 x 52 • 3 X 28 • 4; 517 n.h.p.; triple-expansion engines. The Egyptian steamship *Star of Luxor* was torpedoed and sunk by a German submarine on December 10th, 1941, on a voyage from Philadelphia to Liverpool.

STAR OF NEW ZEALAND

I. P. Corry & Co.; 1895; Workman, Clark & Co.; 4,417 tons; 393-5x46-8x28; 457 n.h.p.; triple-expansion engines. The British steamship *Star of New Zealand* was wrecked off Molene, near Brest, on November 28th, 1915, while carrying a cargo of frozen meat from Montevideo to Havre.

STAR OF OREGON

United States Maritime Commission; 1941; Oregon S.B. Corp.; 7,176 tons; 416x56-9x37-3; 339 n.h.p.; triple-expansion engines.

The American steamship *Star of Oregon* was torpedoed, shelled and sunk by a German submarine on August 30th, 1942, on a voyage from Durban to Trinidad.

STAR OF SCOTIA

I. P. Corry & Co.; 1864; Harland & Wolff; 999 tons; 212X 32-Ix21-8. The British sailing ship *Star of Scotia* left San Francisco on April

27th, 1887, for Queenstown. On June 27th she was wrecked off Bull Point, Falkland Islands. The first officer and seven men were lost.

STAR OF SUEZ

Alexandria Nav. Co. S.A.E.; 1926; D. & W. Render son & Co.; 4,999 tons; 403x52-2x27-3; 449 n.h.p.; triple-expansion engines.

The Egyptian steamship *Star of Suez* was torpedoed and sunk by a German submarine on December 15th, 1942, off the coast of Brazil.

STAR OF THE EVENING

R.Macintyre; 1863; J. W. Richardson & Co.; 220 tons; 130-4X 21-5x9-3; 9 knots; compound engines.

The New Zealand coastal steamship *Star of the Evening*, Capt. A. G. Turner, left Napier at noon on the February 12th, 1867. She was a small vessel rigged as a three-masted schooner and had 1,300 sheep on board as well as general cargo. Her crew numbered 14 and she also carried three passengers. By midnight her captain assumed that he was somewhere between the Ariel Rocks and Gable End Foreland; actually he was 12 miles northward of Gisborne, Poverty Bay. The ship was proceeding under sail at a speed of nine knots in thick weather, with squalls of rain. At 2.15 a.m. a heavier squall than usual reduced visibility almost to zero, and the vessel ran aground.

The wind had now increased until a strong S.E. gale was blowing; the seas battering the wreck until it broke in two near the engine room, the fore part being carried nearer the shore. Under these conditions it was not possible to launch the boats, and a seaman swam ashore with a line which parted before it could be of service. Finally Capt. Turner gave orders for all on board to swim shorewards or cling to floating wreckage.

Ultimately the captain and ten of the crew managed to land safely, but the three passengers and three seamen were drowned.

After 53 hours of exposure to the seas and the gale the survivors were rescued by the schooner *Donald McLean* and taken back to Napier.

STARCARRIER

P. V. Waaler; 1948; Bar tram & Sons; 5,561 tons; 450-1x 58-9x26-1; oil engines.

The Norwegian motorship *Starcarrrier*, on a voyage from Dunkirk to Tamatave with general cargo including ten tons of dynamite, caught fire on September 29th, 1961, while lying in Diego Suarez harbour. The burning ship was towed from her berth by a French naval fire fighting tug. The fire, however, could not be controlled and at 8 p.m. the dynamite in No. 2 hold exploded, killing many of the crew and all the crew of the tug. Eventually the ship broke in two and sank. Twenty-seven lives were lost.

STARO

A/S Standard; 1915; A/S Sorlandets Skibs.; 1,805 tons; 265 X 42-1x17-9; 150 n.h.p.; triple-expansion engines. The Norwegian steamship *Staro* was sunk by a German submarine off the north-west coast of Spain on October 18th, 1917.

STARR KING

U.S. War Shipping Administration; 1942; California S.B. Corpn.; 7,176 tons; 422-8x57x34-8; 339 n.h.p.; triple-expansion engines.

The American steamship *Starr King* was torpedoed by a submarine in lat. 34° 15' S., long. 154° 20' E., on February 9th, 1943. She sank on the next day.

START

A. T. Simonsen; 1909; AkersMek. Verksted; 701 tons; 181-5 x 30-2x12-8; 56 n.h.p.; triple-expansion engines. The Norwegian steamship *Start*, on a voyage from Requejada to Dunkirk with zinc ore, founded in the Bay of Biscay in heavy weather on December 16th, 1922.

START

E. Mortensen; 1923; A/S Skiens Verksteder; 1,168 tons; 226-4x36-6x15-7; 97 n.h.p.; triple-expansion engines. The Norwegian steamship *Start* left Sunderland on January 29th, 1940, for Oslo with coal. Nothing more was heard of the ship or

her crew of 16 and she was considered to have been sunk by enemy action.

STATE OF FLORIDA

State Steamship Co.; 1875; London & Glasgow Co.; 3,138 tons; 371-7x38-5x28-8; 450n.h.p.; 13 knots; compound inverted engines.

The steamship *State of Florida*, Capt. J. M. Sadler, was on her homeward voyage from New York to Glasgow, when she collided with the barque *Ponema*, of Chatham, New Brunswick, in lat. 47N. long. 34W. The *State of Florida* carried 167 persons, 78 of whom were crew.

The disaster occurred at about 11.30 on the night of April 18th, 1884, the ship running at 11[^] knots, with moderate wind and a slight sea. It was very dark but not thick and this circumstance made it all the more surprising that neither the steamship nor the barque discerned one another's lights until a few minutes before the collision. The *Ponema* struck the *State of Florida* almost at right angles on the starboard side abaft the engine room bulkhead. Of the eight boats carried, two were smashed by the collision and two were washed away; the remaining four were lowered safely. Later one of these capsized and many of its occupants were drowned. Capt. Sadler went down with his ship.

Meanwhile the *Ponema* had foundered, only Capt. R. Hayburn, who was below deck at the time of the disaster, and two men being saved. A contributory factor to the loss of life on the barque was the method of carrying the boats on deck, bottom upwards, an arrangement which had been condemned by the Board of Trade after the burning of the *Cospatrick* in 1874. The *Ponema* carried 15 men all told.

So far as can be ascertained the position of the ships when the collision occurred was roughly 1,200 miles from the coast of Ireland.

The survivors were picked up by the Norwegian barque *Theresa*. The double disaster accounted for the loss of 123 persons on the *State of Florida* and 12 on the *Ponema*.

STATE OF VIRGINIA

State Line; 1873; London & Glasgow S.B. Co.; 2,473 tons;

331'2x36-4x21-1; 400 h.p.; 12 knots; compound engines. The *State of Virginia* was a unit of the unfortunate State Line, a small company operating in the trans-Atlantic passenger trade which met with a succession of misfortunes. It had a short life of 18 years (1872-1890), when it went into liquidation, having lost three ships of its small fleet.

The *State of Virginia* was wrecked off Sable Island on July 15th, 1879, going down with the loss of nine lives.

STATENDAM

Nederlandsch. Amerikaansche Stoomv. Maats.; 1929; Harland & Wolff; 28,291 tons; 674-2x81-3x49-4; 4,644 n.h.p.; triple-expansion engines.

The liner *Statendam* was bombed by German aircraft on May 11th, 1940, at Rotterdam, during the invasion of Holland. The ship caught fire and was completely wrecked.

STATESMAN

Charente S.S. Co.; 1895; Workman, Clark & Co.; 6,153 tons; 450x52-5x30'6; 582 n.h.p.; 12knots; triple-expansion engines.

The steamship *Statesman* was torpedoed and sunk by a German submarine 200 miles E. of Malta on November 3rd, 1916. Six of her crew were killed. The captain was among the survivors.

STAUNCH

British Navy, destroyer; 1910; W. Denny & Bros.; 750 tons; 246-5x25-3x8-7; 13,500i.h.p.; 27 knots; turbine engines; Yarrow boilers; two 4 in. guns, two 12 pdr., one 3 pdr. A.A., 1m.g.2T.T.

On the night of November 11th, 1917, the destroyer *Staunch* was torpedoed and sunk by the German submarine *UC-38*, Lt. Hans Wendlandt, which evaded the trawler patrol guarding the net defences at Deirel-Belah, near Gaza, and attacked the shipping. The submarine, which escaped without loss or damage, also sank the monitor *MIS* (which see).

STAXTON WYKE

West Dock Steam Fishing Co.; 1937; Cook, Welton & Gemmell; 472 tons; 163-5x27-2x—; triple-expansion engines. The British trawler *Staxton Wyke* was returning to Hull from the Icelandic fishing grounds when she was in collision with the *Dalhanna* during foggy weather 16 miles off Fiamborough Head on August 23rd, 1959. The *Staxton Wyke* sank with the loss of five of her crew of 16.

STEEL AGE

Isthmian S.S. Co.; 1920; Federal S.B. Co.; 6,194 tons; 395-5x55x31-4; 596 n.h.p.; turbine engines. The American steamship *Steel Age* was torpedoed and sunk by a German submarine on March 6th, 1942, about 600 miles from Trinidad. There was only one survivor, who was taken prisoner.

STEEL NAVIGATOR

Isthmian S.S. Co.; 1921; Federal S.B. Co.; 5,718 tons; 424-2X56-2x26-5; turbine engines. The American steamship *Steel Navigator* was torpedoed and sunk by a German submarine on October 19th, 1942, on a voyage from Liverpool to New York. Thirty-six of her crew of 52 were lost.

STEEL SCIENTIST

Isthmian S.S. Co.; 1921; Federal S.B. Co.; 5,688 tons; 424-2X56-2x26-5; turbine engines. The American steamship *Steel Scientist* was torpedoed and sunk by a German submarine on October 11th, 1942, on a voyage from Table Bay to Paramaribo.

STEEL TRAVELER

Isthmian S.S. Co.; 1922; Federal S.B. Co.; 7,056 tons; 424-2x56-2x26-5; turbine engines. The American steamship *Steel Traveler* struck a mine and sank on December 18th, 1944, off Flushing, soon after leaving Antwerp for New York.

STEELMAKER

Isthmian S.S. Co.; 1920; Federal S.B. Co.; 6,176 tons; 395-5 x55x31-4; 596 n.h.p.; turbine engines. The American steamship *Steelmaker* was torpedoed and sunk by a German submarine on April 19th, 1942, on a voyage from New York to Table Bay. Twenty-six of her crew of 44 were lost.

STEINBEK

Knorr & Bur chard Nfl.; 1936; Lubecker Maschinbau Ges.; 2,185 tons; 281-8x44-1x16-8; 221 n.h.p.; compound engines. The German steamship *Steinbek* was torpedoed and sunk by a British submarine on December 9th, 1941, in the Tanafjord, Norway.

STEINBURG

Robert Bornhofen; 1923; Nuscke & Co.; 1,319 tons; 242-1X37-1x14; 109 n.h.p.; triple-expansion engines. The German steamship *Steinburg* was bombed and sunk by Russian aircraft on January 17th, 1945, at Liepaja.

STEINSTAD

A. F. Klaveness & Co.; 1912; R. Thompson & Sons; 2,477 tons; 300-5x44-5x19-9; 217 n.h.p.; triple-expansion engines. The Norwegian steamship *Steinstad* was torpedoed and sunk by a German submarine on February 15th, 1940, 50 miles W. of Ireland. Thirteen of her crew were lost.

STELLA

London & South Western Railway Co.; 1890; J. & G. Thomson; 1,059 tons; 253x35-lx—; 19-5 knots; triple-expansion engines. The Channel steamship *Stella*, Capt. W. Reeks, left Southampton for Guernsey on Thursday, March 30th, 1899. It was the first run of the season and the ship was full of Easter holiday-makers, as it was the day before Good Friday, there being in all 174 passengers and 43 crew. Soon after leaving England the weather thickened and most of the run was continued in fog. This circumstance did not prevent the *Stella* from proceeding at full speed, as Capt. Reeks

desired to reach Guernsey before nightfall. The siren was blown at the usual intervals, but otherwise no precautions were taken, the captain being apparently easy in mind as to his course.

At about 4 p.m. the lookout sighted rocks ahead and heard the sound of the foghorn on the Casquets lighthouse. The ship at once went hard-a-port and continued on a fresh course for a little distance when she struck on the Black Rock, one of the Casquets group, eight miles from Alderney. She recoiled from the first impact and struck again, being holed amidships on both occasions. The discipline on board was good and much heroism was shown by crew and passengers, but little time was available for the saving of life. Within eight minutes of striking the *Stella* foundered.

The *Stella* carried five lifeboats and two collapsible Berthon boats. One lifeboat, overcrowded with people, capsized as soon as launched. Four others got away in safety. Two of these boats were picked up at about 8 o'clock next morning by the steamship *Vera* of the same company, and two by the Great Western Railway Co.'s steamship *Lynx*. The port lifeboat, which had floated away keel upward, was sighted by the Cherbourg tug *Marsouin*. The seas had righted her and eight persons had managed to clamber into her.

A feature of the disaster was that the lighthouse keepers on the Casquets were unaware of the wreck until the steamship *Honfleur* arrived in search of survivors, though some inhabitants of Sark, 17 miles away, heard the muffled explosion of the *Stella's* boilers when she sank.

The number drowned was 112 including Capt. Reeks.

STELLA

Ernst Bergmann; 1897; Pickersgill & Sons; 3,159 tons; 324 x43x19-2; 254 n.h.p.; triple-expansion engines. The Estonian steamship *Stella*, on a voyage from Antwerp to Spezia with coal, was sunk in a collision with the Finnish steamship *Bomarsund*, 4,337 tons, N. of the Casquets, in fog, on March 25th, 1934.

STELLA

Koninklijke Nederlandsche Stoomb. Maats.; 1909; W. Hamilton & Co.; 2,818 tons; 327x44-2x18-5; 203 n.h.p.; triple-expansion engines. The Dutch steamship *Stella* was bombed and sunk by German aircraft on May 11th, 1940, in Flushing Roads on a voyage from Antwerp to Mediterranean ports.

STELLA LYKES

Lykes Bros. S.S. Co.; 1941; Bethlehem Steel Co.; 6,801 tons; 399-7x60-1x35; 666 n.h.p.; turbine engines. The American steamship *Stella Lykes* was torpedoed, shelled and sunk by a German submarine on July 27th, 1942, on a voyage from Table Bay to Paramaribo.

STEN

Dampsk.-A/S Kistransport (Thv. Halvorsen); 1879; M. Pearse & Co.; 1045 tons; 215x32x16-3; 93 n.h.p.; 8 knots; triple-expansion engines. The Norwegian steamship *Sten* was torpedoed and sunk by a German submarine five miles N. of Godrevy lighthouse, Cornwall, on October 17th, 1916. The captain and eight men were lost.

STENIES

L. Boyazides; 1921; Antwerp Engineering Co.; 2,079 tons; 278-2x40-2x18-1; 213 n.h.p.; triple-expansion engines. The Greek steamship *Stenies*, on a voyage from Cardiff to Volvo with coal, was sunk in a collision with the Swedish steamship *Lovisa*, 970 tons, in the early hours of February 25th, 1927, off Land's End.

STENSAAS

John Norwigen's Red.-A/S; 1918; Fredrikshavn Skibs. & Flydedok; 1,359 tons; 234-2x37-2x16; 120 n.h.p.; triple-expansion engines. The Norwegian steamship *Stensaas*, under German control, was torpedoed and sunk by a British submarine on April 23rd, 1942, near Sletnes, Norway.

STENTOR

China Mutual Steam Nav. Co.; 1926; Caledon S.B. & E. Co.; 6,148 tons; 430-8x55-8x29-1; 1,230 n.h.p.; 14-5 knots; oil engines.

The liner *Stentor*, Capt. W. Williams, left Freetown for the United Kingdom in October 1942, as the leading ship of a convoy of some 40 vessels. On the 27th, when about 200 miles W. of the Canary Islands, the vessel was torpedoed and sunk by a German submarine. Twenty-one of her crew, including Capt. Williams, and 23 passengers were lost.

STEPHANOTIS

Robson, Brown & Sons; 1871; Iliff, Mounsey & Co.; 1,045 tons; 220-5x30-6x19-2; 98 r.h.p.; compound engines. The British steamship *Stephanotis* sank after a collision in fog with the steamship *Guyers*, 522 tons, off Whitby on April 30th, 1901, while on a voyage from Bilbao to Middlesbrough carrying a cargo of iron ore.

STEPHEN FURNESS

Tyne-Tees Steamship Co.; 1910; Irvine's S.B. & D.D. Co.; 1,712 tons; 290-3x37-3x16-4; 359 n.h.p.; 16 knots; triple-expansion engines.

The armed boarding steamship *Stephen Furness*, Lt. Cdr. T. M. Winslow, R.N.R., was torpedoed by a German submarine in the Irish Channel on December 21st, 1917. The ship sank with the loss of six officers and 95 ratings.

STEPHEN HOPKINS

U.S. War Shipping Administration; 1942; Richmond S.B. Corp.; 7,181 tons; 422-8x57x34-8; 339 n.h.p.; triple-expansion engines; one 4 in. gun.

The American Liberty ship *Stephen Hopkins* was in the South Atlantic in misty weather on September 27th, 1942, when she sighted the German commerce raider *Stier* and the blockade runner *Tannenfels*. The Germans had chosen this lonely part of the ocean to effect some superficial repairs and to repaint their ships, which were lying stopped. Immediately the American was reported the *Stier* cleared for action. She was a vessel of 4,778 tons, with a speed of 18 knots and armed with six 5-9 in. guns, two torpedo tubes and carried two aircraft. The *Stephen Hopkins* carried one 4 in. gun manned by a crew of U.S. naval reservists.

In face of such a disparity in armament, as well as the fact that the German possessed a highly trained and veteran crew, the Americans appeared to have no chance whatsoever. Only one factor was in their favour; the ships were at close range owing to the mist, and the 4 in. gun might score some hits. It did.

The first shells from the *Stephen Hopkins* wrecked the raider's steering gear, severed the oil supply to the engines and cut off the electric power which operated the torpedo tubes. Under these conditions chances were a little more even, though the German still had six 5-9 in. guns to one 4 in. The action, which was fiercely contested, fell into two parts, there being an interval during which the combatants lost sight of each other owing to a thickening of the mist.

Finally the *Stephen Hopkins* sank, taking with her 42 of her crew, while 15 survivors in one boat managed to reach Brazil after a voyage of 31 days. The *Stier* was heavily on fire and had to be abandoned about four hours after the action terminated. She lost three men killed and 33 wounded; her survivors being picked up by the *Tannenfels*. The Americans had made a splendid fight against great odds, and maintained the best traditions of their mercantile marine.

For story of the raider see *Stier*.

STEREGUSHCHI

Russian Navy, destroyer; 1903; Nevski Works; 240 tons; 190-3x18-9x11-5; 3,800 i.h.p.; 26-5 knots; triple-expansion engines; one 12 pdr. gun, three 3 pdr., 2 T.T. The Russian destroyer *Steregushchi* was one of a number of ships of the same design sent out in sections and assembled at the dockyard at Port Arthur. During the Russo-Japanese War the ship was engaged in patrolling off the fortress and on the morning of March 10th, 1904, when returning from patrol in company with the destroyer *Ryeshitelni*, she was attacked by the Japanese 3rd Flotilla. Her consort escaped, but the *Steregushchi* was struck in the engine

room and disabled when only a short distance from harbour. In face of the heavy odds against her the ship surrendered. She was taken in tow but sank later with the loss of 47 of her crew.

STERLING

A/S Ganger Rolf; 1907; FredrikstadMek. Verksted; 1,329 tons; 231-3x34-1x22-2; 175 n.h.p.; triple-expansion engines. The Norwegian steamship *Sterling*, on a voyage from Christiania to Newcastle with passengers and general cargo, was wrecked on March 25th, 1922, off Sandoya, near Tvedestrand.

STEUBEN

Norddeutscher Lloyd; 1923; Vulkan Werke; 14,660 tons; 526-9x65x43-7; 1,622 n.h.p.; triple-expansion engines & L.P. turbine.

The German liner *Steuben* was torpedoed and sunk by a Russian submarine on February 10th, 1945, between Stolpe Bank and the Pomeranian coast. The ship was carrying troops and some 1,000 civilian evacuees from East Prussia. The loss of life is believed to have been in the region of 3,000.

STEWART

United States Navy, destroyer; 1920; W. Cramp & Sons, Philadelphia; 1,190 tons; 314x30x10; 26,000 s.h.p.; 35 knots; turbine engines; four 4 in. guns, one 3 in.A.A., 12 T.T. The United States destroyer *Stewart* took part in the night action in the Bandoeng Strait on February 19th-20th, 1942. The Allied force was under command of Rear-Admiral K. Doorman of the Netherlands Navy, and in the engagement much damage was inflicted on the Japanese. The losses on the Allied side amounted to two destroyers, one of which, the *Piet Hein* of the Netherlands Navy, was sunk, and the other, the *Stewart*, was so badly damaged that she had to be sunk on her return to Surabaya on March 2nd, 194-2. She was reported to have been refitted by the Japanese after their capture of the port.

The full story of the action is told under the Dutch destroyer *Piet Hein*.

STIER

Deutsche Levante Linie; 1936; Fried Krupp A.G.; 4,778 tons; 408-5x56-6x21-4; 18 knots; oil engines; six 5-9 in. guns, 2 T.T., 2 aircraft.

The commerce raider *Stier*, Capt. Gerlach, was the last of such vessels that Germany sent to sea in the Second World War. She was formerly the cargo liner *Cairo*, and was a very speedy vessel. She was known to the British Admiralty as "Raider J". On May 12th, 1942, she left Rotterdam with an escort of four seagoing torpedo boats, the *Kondor*, *Falke*, *Illis* and *Seeadler*, each of 800 tons and armed with 4-1 in. guns. In addition there was a flotilla of 16 minesweepers disposed in lines at distances of from one mile to 600 yards from the raider. The convoy was sighted by the British just before it reached the Straits of Dover, and it came under fire of the 14 in. guns mounted there, but sustained no damage. At about 3.30 a.m. when abreast of Cap Gris Nez it was attacked on both sides by a force of British motor torpedo boats, which sank the *Illis* and *Seeadler* with torpedoes, the British losing the *M.T.B. 220*.

The *Stier* managed to reach Boulogne without damage, escorted by the two remaining torpedo boats which proceeded to sea again to pick up survivors. In all they rescued 88 Germans and three British. The total German loss was about 200.

Toward the end of May the *Stier* put to sea again and reached her operational area off Fernando da Noronha at the beginning of June and captured her first prize on June 4th.

At 8.56 a.m. on September 27th, when the *Stier* and the *Tannenfels*, a blockade runner plying between Japan and Vichy France, were lying stopped and repainting, a ship was sighted which later proved to be the American merchantman *Stephen Hopkins*. She was armed with one 4 in. gun, manned by a crew of U.S. naval reservists.

Owing to the mist prevailing at the time the ships engaged at close range, and the American gunners succeeded in hitting with two shells at the outset, one of which wrecked the *Stier's* fuel supply to the engines, and caused her to stop, and the other damaged her steering gear. The raider's electric power was also cut off and she could not fire her torpedoes. Nevertheless a ding-dong battle

proceeded; both combatants hitting repeatedly.

There was a lull half-way through the action when a rain squall caused the ships to lose sight of each other for some time. Finally the *Stephen Hopkins* sank, but not before setting the raider heavily on fire, so that she had to be abandoned four hours later.

In this spirited action the Germans lost three men killed and 33 wounded. Capt. Gerlach was among the survivors. The Americans lost 42 killed, and 15 men in one boat made a perilous voyage to Brazil, which they reached after 31 days at sea. The *Tannenfels*, which was not armed, took no part in the action, except to jam the merchantman's wireless, and to pick up survivors from the *Stier*. During her cruise, which lasted for four months, the *Stier* took only three prizes and sank the *Stephen Hopkins*. As the last of the raiders her career was unfortunate. Two torpedo boats had been sunk in getting her to sea; she fell in with very few prizes, and she was destroyed by a merchantman armed with only one 4 in. gun. Her captures were as follows:—

<i>Gemstone</i> ...	4,986 tons	British	4.6.1942
<i>Stanvac Calcutta</i> ...	10,170 „	Panamanian	6.6.1942
<i>Dalhousie</i> ...	7,250 „*	British	9.8.1942
<i>Stephen Hopkins</i> ...	7,818 „	U.S.A.	27.9.1942

(sunk in action)

STIGSTAD

Skibs-A/S Solstad (A. F. Klaveness & Co.); 1927; *Kockums M. V.*; 5,964 tons; 386-3x55-2x32-3; 436 n.h.p.; oil engines.

The motor tanker *Stigstad* was torpedoed and sunk by a German submarine on February 21st, 1934, on a voyage from Manchester to New York.

STIRLING CASTLE

Southampton, Isle of Wight & S. of England Royal Mail Steam Packet Co.; 1899; *J. Scott & Co.*; 271 tons; 170x24-2x7-6 141 n.h.p.; 15 knots; compound diagonal engines. The paddle steamship *Stirling Castle* was taken over by the Admiralty during the First World War for service as an auxiliary patrol vessel. On September 26th, 1916, when off the west coast of Malta she struck a mine and sank.

STJERNEBORG

D/S Dannebrog; 1903; *Craig, Taylor & Co.*; 1,592 tons; 260 X 38 • 2 x 18 • 1; 167 n.h.p.; triple-expansion engines. The Danish steamship *Stjerneborg* was torpedoed and sunk by a submarine in the Mediterranean on April 6th, 1916

STJERNVIK

Norrkopings Rederi-A/B; 1883; *Barrow S.B. Co.*; 1,202 tons; 240 X 34 - 2 X 14 • 1; 171 n.h.p.; compound engines. The Swedish steamship *Stjernvik*, on a voyage from Ridham Dock to Burntisland in ballast, was sunk in a collision on April 12th, 1928, off Fidra, Firth of Forth.

STOCKPORT

London & North Eastern Railway; 1911; *Earless Co.*; 1,683 tons; 265 x 36 x 17-4; 309 n.h.p.; triple-expansion engines. The British steamship *Stockport* left Glasgow on February 8th, 1943, and sailed from the Clyde anchorage on February 11th for St. John's, N.F.L., carrying a crew of 51 together with nine gunners and four naval personnel. No further news was received although a German submarine reported that she had sunk a ship in lat. 47° 22' N., long. 34° 10' W. on February 23rd, and it is likely that this ship was the *Stockport*.

STOKE

British Navy, fleet minesweeper; 1918; *Chas. Rennoldson*; 710 tons; 231x28-3x7-5; 2,200i.h.p.; 16 knots; triple-expansion engines; *Yarrow boilers*; one 4 in. gun, 1 smaller. The fleet minesweeper *Stoke* was bombed and sunk by enemy aircraft off Tobruk on May 7th, 1941. The vessel's normal complement was 73.

STOKESLEY

Frances Duncan S.S. Co.; 1922; *Verschure & Co.*; 1,149 tons; 231 x 34 - 2x13-2; 120n.h.p.; triple-expansion engines. The British steamship *Stokesley*, on a voyage from Antwerp to London, struck a mine and sank on April 24th, 1940, off the Thames estuary. Fourteen of her crew of 18 and the pilot were lost.

STOLWIJK

N.V. Stoomv. Maats. Wijklijn; 1920; *N.V. Werf de Noord*; 2,489 tons; 285-8x45-2x21-7; 263n.h.p.; triple-expansion engines.

The Dutch steamship *Stolwijk*, on a voyage from Corner Brook, N.F.L., to Glasgow, ran ashore on Irishdovey Island, Donegal, on December 7th, 1940, and was wrecked. Ten of her crew of 28 were lost.

STOLZENFELS

Deutsche Dampfs. Ges. Hansa; 1916; *J. C. Tecklenborg A.G.*; 7,512 tons; 468-5x58-5x32-4; 692n.h.p.; triple-expansion engines & L.P. turbine.

The German steamship *Stolzenfels* struck a mine and sank on March 21st, 1941, off the Friesian Islands.

STONE STREET

United States Maritime Commission; 1922; *Cantiere Navale Triestino*; 6,074 tons; 401x54-2x30-2; 483 n.h.p.; triple-expansion engines.

The steamship *Stone Street*, on a voyage from Liverpool to New York, straggled from convoy owing to boiler trouble. On September 13th, 1942, she was torpedoed and sunk by a German submarine with the loss of 13 lives.

STONEGATE

Turnbull, Scott Shipping Co.; 1928; *W. Doxford & Sons*; 5,044 tons; 410 X 55 • 5 x 26; 602 n.h.p.; triple-expansion engines.

The British steamship *Stonegate*, on a voyage from Antofagasta to Alexandria with nitrate, was sunk by a German raider on October 5th, 1939, out 400 miles E.S.E. of the Bermudas.

STONEPOOL

Pool Shipping Co.; 1928; *Smith's Dock Co.*; 4,803 tons; 405 X 53-5x26-4; 507 n.h.p.; 11 knots; triple-expansion engines. The steamship *Stonepool*, Capt. Nicholson, with a cargo of grain was in the North Atlantic on September 11th, 1941, when she was torpedoed and sunk by a German submarine. Capt. Nicholson, ten other officers and 30 men were killed.

STONY POINT

A. S. Onassis Corporation; 1943; *Kaiser Co.*; 10,506 tons; 523-6x68-2x—; turbo-electric engines.

The Liberian tanker *Stony Point*, on a voyage from Sidon to Antwerp loaded with oil, collided in dense fog with the Greek motorship *Ioannis*, with a cargo of potash, at 11 p.m. on June 18th, 1957, off Ushant. Both ships caught fire. The crew of the tanker took to the boats and many of them were burned, some fatally, by the burning oil on the water. The survivors from both ships were picked up by various ships answering the calls for assistance, including the British frigate *Ulster*, whose boats were charred by the burning oil. Altogether 14 men from the two ships were killed and many more injured, some seriously. The *Ioannis* was towed into Brest on the 19th, but the *Stony Point*, burning from stem to stern and leaking oil, could not be taken in until the fire had burned out, by which time the tanker, while still afloat, was beyond repair.

STORAA

Ministry of War Transport (W. T. Gould); 1918; *Greenock & Grangemouth Dockyard Co.*; 1,967 tons; 281-6x41-9x18-6; 228 n.h.p.; triple-expansion engines.

The *Storaa* was a former Danish ship taken over by the British on the occupation of Denmark by the Germans in 1940. In July, 1940, she was seized by the Vichy authorities at Port Lyautey and scuttled when that port was threatened by the Allied landings in November, 1942. She was raised and repaired in January, 1943. On November 3rd, 1943, she was torpedoed and sunk by a German motor torpedo boat off Hastings. Seventeen of her crew, three gunners and the pilot were lost.

STORAAS

AfS Nanset (Iver Bugge); 1929; *A/B Gotaverken*; 7,886 tons; 441-2x59-2x35-3; 634 n.h.p.; oilengines. The motor tanker *Storaas* was torpedoed and sunk by a German submarine on May 28th, 1943, off Saldanha Bay.

STORK

General Steam Navigation Co.; 1937; Ailsa Shipbuilding Co.; 787 tons; 214-3x35-6x11-5; 218n.h.p.; 10-5 knots; oil engines.

The motorship *Stork*, Capt. Williams, was off Portugal in convoy when she was torpedoed and sunk by a German submarine on August 23rd, 1941. Capt. Williams and 18 men were killed and one wounded.

STORMQUEEN

John Ridley, Son & Tully; 1880; C. S. Swan & Hunter; 2,129 tons; 280-5x36x20; 225 h.p.; compound engines.

The British steamship *Storm Queen* foundered, after her cargo shifted, 150 miles N.E. of Cape Finisterre on December 22nd, 1888. She was carrying a cargo of rye and linseed from Sebastopol to Rotterdam.

STORMARN

Nord-Ostsee Rhederei; 1880; G.Howaldt; 588 tons; 175-7x25-4x15-8; 61 n.h.p.; compound engines.

The Hamburg steamship *Stormarn* collided with the Glasgow steamship *Gordon Castle*, 2,045 tons, in fog in Cardigan Bay on September 10th, 1900. Both vessels sank with the loss of 20 lives. Nineteen survivors were picked up by the Norwegian steamship *Borregaard*.

STORMOUNT

Montreal Transportation Co.; 1907; A. McMillan & Son; 1,955 tons; 249-1x42-6x20-6; 202 n.h.p.; triple-expansion engines.

The Canadian steamship *Stormount* was wrecked on Gull Ledge, off Marie Joseph, N.S., on June 20th, 1916. She was on a voyage in ballast from Philadelphia to Sydney, N.S.

STORNEST

C. Strubin & Co.; 1921; J. Priestman & Co.; 4,265 tons; 365x51-5x25-2; 330 n.h.p.; triple-expansion engines. The British steamship *Stornest*, on a voyage from Swansea to Boston, was torpedoed by a German submarine at 2.33 a.m. on October 13th, 1942. Badly holed and listing heavily, with her boats gone in the strong westerly gale she called for assistance. The Irish steamship *Irish Oak* stood by on the 14th until the *Stornest* sank, but was unable to save any lives because of the heavy seas. The *Stornest* carried a crew of 29 and ten gunners.

STORSTAD

A. F. Klaveness & Co.; 1910; Armstrong, Whitworth & Co.; 6,028 tons; 440x58-1 X24-6; 447n.h.p.; triple-expansion engines.

The Norwegian steamship *Storstad* was torpedoed and sunk by a German submarine off the south-west coast of Ireland on March 8th, 1917.

STORSTEN

Tonsberg Rederi-A/S; 1926; Barclay, Curie & Co.; 5,343 tons; 388-1x52-7x29; 482 n.h.p.; oilengines.

The Norwegian motorship *Storsten*, under German control, was sunk in an attempt to escape to England. On April 1st, 1943, the Germans became aware of this intention, and sent aircraft to bomb her just outside territorial waters off Gothenburg. Shortly afterwards a German patrol ship opened fire on her whereupon the crew opened the seacocks and took to the boats. A party from the patrol ship boarded her and she was taken in tow but sank before reaching port. Seventeen of her crew were killed by the bombing and gunfire.

STORVIKEN

Wallem & Co.A/S; 1917; Seattle Construction & Dry Dock Co.; 4,836 tons; 380x53-2x27; 472 n.h.p.; triple-expansion engines.

The Norwegian steamship *Storviken* was torpedoed and sunk by a German submarine on October 1st, 1943, in the Gulf of Aden on a voyage from Mombasa to Aden. Thirty-seven of her crew were lost.

STRALE

Italian Navy, destroyer; 1931; Odero; 1,206 tons; 315x32x9-6; 44,000 s.h.p.; 38 knots; turbine engines; 3-drum boilers; four 4-7 in. guns, four 37 mm.A.A., four 13 mm.A.A., 6 T.T. The Italian destroyer *Strale* was torpedoed and sunk in the Central Mediterranean by the British submarine *Turbulent* on August 6th, 1942. She carried a complement of over 150.

STRANDHILL

Strandhiitt S.S. Co.; 1920; Peninsula S.B. Co.; 2,907 tons; 270-3x49-8x25-4; 188 n.h.p.; triple-expansion engines. The Canadian steamship *Strandhill* was wrecked at Port au Port Bay, N.F.L., on July 20th, 1928, while on a voyage in ballast from Comer Brook, N.F.L., to Port au Port.

STRANTON

Angus Shipping Co.; 1880; W. Gray & Co.; 1,678 tons; 256-5X34-6x19-7; 187 n.h.p.; triple-expansion engines. The British steamship *Stranton* sank on the North Goodwin sands after a collision on December 30th, 1914. She was on a voyage from the Tyne to Rouen carrying a cargo of coal.

STRASHNI

Russian Navy, destroyer; 1903; Nevski Works; 240 tons; 190-3x18-9x11-5; 3,800 i.h.p.; 26-5 knots; triple-expansion engines; one 12pdr.gun, three 3pdr., 2 T.T. The Russian destroyer *Strashni* was engaged single handed with the Japanese 2nd Destroyer Flotilla off Port Arthur on April 13th, 1904. For 15 minutes the ship put up a remarkably stout fight, but at the end of that time a shell struck one of her torpedoes as it was about to be fired. The explosion did vital damage to the destroyer and she sank.

The Russian cruiser *Bayan* drove off the Japanese and picked up five of the *StrashnVs* crew, the remaining 46 being drowned.

STRASSBURG

German Government; 1930; Maats. Fyenoord; 17,001 tons; 551 x70-4x41-6; 3,115 n.h.p.; oil engines. The motorship *Strassburg* was formerly the Dutch liner *Baloeran*, seized by the Germans. On September 1st, 1943, she struck a mine 10-15 miles N. of Ymuiden. She was taken in tow but ran ashore and eventually became a total wreck. The German claim that she was used as a hospital ship would seem to have been disproved when British aircraft making a bombing attack on October 19th, were beaten off by the ship's anti-aircraft guns.

STRATHAIRLY

Macintyre Bros. & Co.; 1876; R. Dixon & Co.; 1,919 tons; 282-6x34-8x23-8; 160 h.p.; compound engines. The British steamship *Strathairly* was wrecked on the coast of North Carolina on March 26th, 1891. She was on a voyage from St. Jago de Cuba to Baltimore carrying a cargo of iron ore. Nineteen of her crew were drowned.

STRATHALLAN

Peninsular & Oriental Steam Navigation Co.; 1938; Vickers Armstrong; 23,722 tons; 639-5x82-2x33-6; 4,912 n.h.p.; 21 knots; turbine engines.

The liner *Strathallan*, Capt. J. H. Biggs, C.B.E., left the Clyde on December 11th, 1942, for Algiers with 4,408 troops and 248 nurses on board. At 2.30 a.m. on the 21st she was torpedoed by a German submarine about 40 miles N. of pran. Fire broke out in the engine room and spread to a hold containing ammunition. Six of the crew and a few passengers were killed; the remainder were taken off and a salvage tug took the ship in tow, but she sank 12 miles from Oran at 4.20 a.m. on the 22nd.

STRATHBLANE

Burr ell & Son; 1888; Russell & Co.; 2,341 tons; 293-1X40-1x18-3; 220h.p.; triple-expansion engines. The British cargo ship *Strathblane* was wrecked near Cape Recife on January 23rd, 1890, while on a voyage from London to Natal carrying a general cargo.

STRATHCLYDE

STRATHCLYDE

Burrell & Son; 1871; Blackwood; 1,255 tons; 290x35-2x25-3; 180 n. h.p.; 10 knots; compound engines.

The steamship *Strathclyde*, Capt. J. D. Eaton, bound from London to Bombay, left Dover on Thursday, February 17th, 1876, having on board a crew of 47 and 23 first class passengers. The ship was about two and a half miles from Dover proceeding at nine knots when she met the German steamship *Franconia*. It was between four and five in the afternoon and the weather quite clear. Capt. Eaton turned his ship to starboard but at the same time the *Franconia* turned to port and a collision became inevitable.

The *Strathclyde* was struck twice on the port side amidships and sank very quickly by the stern. The first of her boats to be launched was swamped by the swell and sank. A second was launched without mishap and managed to save some of the drowning people. By this time the seas were breaking over the vessel as high as the bridge and washing overboard many of those on deck.

Of those on board 38 were drowned, Capt. Eaton was among the survivors.

STRATHCONA

Canada Steamship Lines; 1900; Caledon S.B. & E. Co.; 1,881 tons; 249x41-9x21; 150 n.h.p.; 9 knots; triple-expansion engines.

The steamship *Strathcona* was intercepted by a German submarine 145 miles W.N.W. of Ronaldshay on April 13th, 1917. The submarine opened fire from the surface and later sent a party on board to sink the vessel with time bombs. Nine of the crew were killed. The captain, chief engineer and third engineer were taken prisoner aboard the submarine.

STRATHEARN

Corporation of the Trinity House; 1935; Cammell, Laird & Co.; 683 tons; 176x33-1x13-8; 250 n.h.p.; oil engines.

The lighthouse tender *Strathearn* struck a mine and sank on January 8th, 1940, off the River Blackwater. Fifteen of her crew and one passenger were lost.

STRATHENDRICK

Burrell & Son; 1889; Russell & Co.; 2,336 tons; 293-7x40-2X 18-3; 220 h.p.; triple-expansion engines.

The British cargo ship *Strathendrick* sank after a collision in the Straits of Madura on March 9th, 1891. She was on a voyage from Penarth to Sourabaya carrying a cargo of coal.

STRATHMORE

*D. Bruce & Co.; 1875; Brown; 1,472 tons; 243-3x37-4x23-3; The sailing ship *Strathmore*, Capt. MacDonald, engaged in the conveying of emigrants to New Zealand. At the time of the disaster she had only 51 passengers, her crew numbering 38. She left Gravesend on April 19th, 1875, bound for New Zealand via the Cape with a cargo of railway iron and gunpowder. For two months the voyage was uneventful but on July 1st she sailed into a thick fog in the neighbourhood of the Crozet Islands in the South Indian Ocean. In the early morning when under full sail the *Strathmore* ran heavily on to the Twelve Apostles Rocks. Her bow appears to have been carried clean over the rocks and the worst damage occurred aft.*

The ship immediately began to settle down by the stern. Capt. MacDonald and the first officer, Mr. Ramsay, were washed overboard by a huge wave which at the same time floated the starboard lifeboat well clear of the wreck with 18 occupants. Those of the passengers and crew who could do so took refuge in the rigging. The bows of the ship meanwhile became jammed in the rocks, thus preventing her sinking.

It was now daylight and by great exertions on the part of the second officer and crew two boats were launched and the survivors taken ashore. Eventually 49 persons reached the islands in safety, but once landed they had to endure the greatest privation and hardship. For seven months, till January 21st, 1876, the party dragged out a wretched existence, during which time five died. The survivors were rescued by the American whaler *Young Phoenix*, Capt. D. L. Gifford. By this time of the 89 persons who left England in April 1875, 45 had been drowned or had died from privation.

STRATHNAIRN

Strathnairn Steamship Co.; 1906; A. Rodger & Co.; 4,336 tons; 370x52-2x17-6; 354 n.h.p.; 10 knots; triple-expansion engines.

The steamship *Strathnairn* was torpedoed and sunk by a German submarine 25 miles N. by E. of Bishop Rock on June 15th, 1915. The captain and 20 of the crew were lost.

STRATHSPEY

Burrell & Son; 1883; Burrell & Son; 1,549 tons; 240x34-1x 22-6; 110 h.p.; compound engines.

The British cargo ship *Strathspey* was wrecked N. of Portpatrick on December 3rd, 1894. She was on a voyage in ballast from Ghent to the Clyde.

STRATHYRE

Burrell & Son; 1884; Burrell & Son; 1,706 tons; 250x34-2x 17-6; 130 h.p.; compound engines.

The British steamship *Strathyre* was wrecked at Antigua on December 1st, 1891, while on a voyage from Barry to Jamaica carrying a general cargo.

STRATIS

M. Kydoniefs; 1905; R. Stephenson & Co.; 3,893 tons; 340-2X 47-1x20; 312 n.h.p.; triple-expansion engines. The Greek steamship *Stratis*, on a voyage from Danzig to Genoa with coal, ran on to the Munij Shoal, Finisterre, at 12.15 a.m. on January 8th, 1933. At 4.50 a.m. she slipped off and sank.

STREONSHALH

Rowland & Marwood's S.S. Co.; 1928; W. Pickersgill & Sons; 3,895 tons; 349-4x50-1x23-8; 315 n.h.p.; triple-expansion engines.

The British steamship *Streonshalh* was sunk by a German raider on December 7th, 1939, about 1,000 miles E. of Sao Francisco, Brazil, on a voyage from Rosario to the U.K. with grain.

STROIINI

Russian Navy, destroyer; 1903; Nevski Works; 240 tons; 190-3x18-9x11-5; 3,800 i.h.p.; 26-5 knots; triple-expansion engines; one 12pdr. gun, three 3 pdr., 2 T.T. The Russian destroyer *Stroiini* was lying at anchor under Golden Hill, Port Arthur, on November 13th, 1904, when she was struck by a floating mine. The ship sank in a very short time, two of her crew being killed by the explosion. The survivors were taken off by the destroyer *Silni*, but this ship had not gone far when she also struck a mine and was badly damaged in the stern. She managed to gain the harbour without loss of life.

It was subsequently established that the mines were not due to Japanese action, but had broken from their moorings and drifted into the anchorage.

STROMBO

Polena Società di Navigazione; 1923; Fredrikstad Mek. Verksted; 5,232 tons; 393-2x51-8x28-5; 779 n.h.p.; oil engines. The Italian motorship *Strombo* was torpedoed and sunk by the British submarine *Parthian* on August 22nd, 1941, in Skaramanga Bay, Greece.

STROMBOLI

Nav. Gen. Italiana; 1911; A. Rodger & Co.; 5,779 tons; 410-3X 54x27-1; 433 n.h.p.; triple-expansion engines. The Italian steamship *Stromboli* was torpedoed and sunk by a submarine in the Mediterranean on December 21st, 1917.

STRONG

United States Navy, destroyer; 1942; United States; 2,050 tons; 376-5x39-5x—; 60,000 s.h.p.; 35-5 knots; turbine engines; five 5 in. guns, four 40 mm., four 20 mm., 10 T.T. On the night of July 4th, 1943, a United States task force of three cruisers and five destroyers bombarded Japanese batteries on the islands of Kolombangara and New Georgia. The destroyer *Strong* was hit several times by enemy shells and was eventually torpedoed and sunk by a Japanese submarine. Shortly after this the U.S. force turned about for Tulagi, its base, but on the way was ordered to

intercept a southward run of the "Tokio Express". For details of this action, which followed some hours after the loss of the *Strong*, see the U.S. cruiser *Helena*.

STRONGBOW

British Navy, destroyer; 1916; Yarrow; 923 tons; 271 -5 x 25-7x10-5; 23,000 s.h.p.; 36 knots; turbine engines; Yarrow boilers; three 4 in. guns, one 2pdr., 5 m.g., 4 T.T.

The destroyer *Strongbow*, Lt. Cdr. E. Brooke was sunk by the German minelaying cruisers *Drummer* and *Bremse* when escorting the Scandinavian convoy on October 17th, 1917. The action, which took place some 75 miles east of Lerwick in the Shetlands, was very brief, *Strongbow* sinking with the loss of 47 officers and ratings out of her complement of 88. Lt. Cdr. Brooke was saved by his men and placed on a raft from which he was picked up some hours later.

The full story of the Scandinavian convoy is told under the *Mary Rose*.

STRONGHOLD

British Navy, destroyer; 1919; Scott's Shipbuilding Co.; 905 tons; 276x26-7x10-9; 27,000 s.h.p.; 31 knots; turbine engines; Yarrow boilers; three 4 in. guns, 5 smaller, 4 T.T.

The destroyer *Stronghold*, Lt. Cdr. G. R. Pretor-Pinney, took part in the disastrous battle of the Java Sea, February 28th-March 1st, 1942. She escaped destruction on that occasion, but next day she was sunk by a superior Japanese force when making for Australia. Nine officers and 61 ratings were killed in the action. A number of survivors were picked up by the Japanese, and five ratings died in captivity.

For full story of the battle of the Java Sea, see the Dutch cruiser *De Ruyter*, flagship of Rear-Admiral Doorman.

STRYN

The Shipping Controller (Constantine & Donking); 1901; Bom & Mees; 2,143 tons; 281-3x40-3x19-8; 214n.h.p.; 9 knots; triple-expansion engines.

The steamship *Stryn* was torpedoed and sunk by a German submarine on June 10th, 1918, five miles E. of Berry Head, Devon. Eight men were killed. The captain was among the survivors.

STUART HAHNEMANN

Stuart Douglas & Co.; 1874; MacMillan & Co.; 1,997 tons; 273-7x43-1x23-6.

The sailing ship *Stuart Hahnemann*, Capt. van Norden, left Bombay for Liverpool on Saturday, April 4th, 1875, with a crew of 45 and the captain's wife. She carried a cargo of 13,637 bales of cotton, besides a large quantity of linseed and yam. The ship had favourable weather until the 14th, when she encountered violent squalls and heavy rain. One of these squalls caused her to lay over until she was nearly on her beam ends. The captain came on deck and gave orders to lighten the press of sail, but nothing could be done to prevent the gradual capsizing of the vessel, which turned over with all masts and rigging standing at about 10 p.m.

So rapid was the sinking that the watch below had no time to come on deck, and only eight seamen were able to save themselves by swimming to an overturned lifeboat which had floated clear as the vessel sank. These men had been adrift for nearly a fortnight when they were picked up by the Austrian barque *Blandina P*.

STUART PRINCE

Prince Line; 1899; T. Turnbull & Son; 3,597 tons; 351-4x 43x20-6; 281 n.h.p.; 10 knots; triple-expansion engines. The steamship *Stuart Prince* was torpedoed and sunk by a German submarine 85 miles N. by W. of Broad Haven, Ireland, on March 22nd, 1917. The captain and 19 of the crew were lost.

STUART STAR

Blue Star Line; 1926; Palmers' Co.; 11,928 tons; 475-8x 67-3x45-2; 1,581 n.h.p.; turbine engines. The British steamship *Stuart Star* was wrecked off Hood Point Light, East London, on December 17th, 1937. She was carrying passengers and a general cargo from the Clyde, via Liverpool to Lourenco Marques and Melbourne.

STUARTSTAR

Union Cold Storage Co.; 1899; Hawthorn, Leslie & Co.; 5,736 tons; 420 X54x28-6; 542 n.h.p.; triple-expansion engines. The British steamship *Stuartstar* was wrecked in the Nieuwe Waterweg on October 4th, 1923, while carrying a cargo of frozen meat from Zarate, Argentine, to Antwerp.

STURDY

British Navy, destroyer; 1918; Scotts S.B. & E. Co.; 905 tons; 276x26-7x10-9; 27,000 s.h.p.; 36 knots; turbine engines; Yarrow boilers; three 4 in. guns, one 2pdr., 5 m.g., 4 T.T. The destroyer *Sturdy*, Lt. Cdr. G. T. Cooper, ran aground on Tiree Island on the west coast of Scotland in thick weather on October 30th, 1940. The Admiralty announced later that the ship had become a total wreck, with the loss of five ratings drowned.

STUREBORG

J. Leonard; 1883; J. L. Thompson & Sons; 1,584 tons; 260x 36x18-6; 180 n.h.p.; compound engines.

The Swedish steamship *Stureborg* was bombed and sunk by aircraft on June 9th, 1942, on a voyage from Piraeus to Haifa. The ship had been chartered by the Swedish Red Cross to carry food supplies to Greece. Nineteen of her crew were lost; one survivor on a raft landed near Gaza 19 days later.

STUREHOLM

A/B Svenska Amerika-Mexiko Linien; 1919; A/B Gotaverken; 4,575 tons; 408-7 x54 x23-4; 629 n.h.p.; oil engines. The Swedish motorship *Stureholm* left Boston on October 24th, 1940, and Haifax on the 29th, for Grangemouth with a cargo of steel. She became detached from the convoy on December 11th, about 300 miles W. of the Orkney Islands and was never seen again. She was considered to have been sunk by a submarine.

STURLA

I. Messina & C.; 1884; A. Hall & Co.; 1,195 tons; 228-5x 33-1x16-2; 142 n.h.p.; compound engines. The Italian steamship *Sturla* was shelled and sunk by a British submarine on June 8th, 1941, in the Gulf of Policastro.

STURLA

Italian Government; 1933; Helsingors Jernskib & Maskin.; 1,397 tons; 262-3 x39-7x15-5; 192 n.h.p.; compound engines. The steamship *Sturla* was formerly the Danish *Estrid*, seized by the French and renamed *St. Guillaume* and later taken over by the Italians. On July 12th, 1942, she was bombed by British aircraft and torpedoed and sunk by a motor torpedo boat off Mersa Matruh.

STURTEVANT

United States Navy, destroyer; 1920; New York Shipbuilding Corp.; 1,190 tons; 314x30x10; 26,000 s.h.p.; 35 knots; turbine engines; four 4 in. guns, one 3 in.A.A., 12 T.T. The United States destroyer *Sturtevant* struck a mine and sank off Key West on April 26th, 1942. The destroyer carried a complement of 122.

STUTTGART

Norddeutscher Lloyd; 1924; Vulcan-Werke A.G.; 13,387 tons; 527x65x34-7; 517 n.h.p.; triple-expansion engines. The liner *Stuttgart*, in service as a hospital ship, was bombed and set on fire by American aircraft on October 9th, 1943, at Gdynia. The fire could not be controlled and the ship was completely burnt out.

STYLIANI

Pithis Bros. & Co.; 1893; R. Thompson & Sons; 1,828 tons; 263-2x36x18-8; 182n.h.p.; triple-expansion engines. The Greek steamship *Styliani*, on a voyage from Suez to Massowah with a cargo of petrol in drums, caught fire, exploded and sank on March 14th, 1936, about 200 miles N. of Massowah.

STYLIANI

A. Pittas & C. Scrivanos; 1896; R. Thompson & Sons; 3,256 tons; 328-1x47-1x15-9; 275 n.h.p.; triple-expansion engines. The Greek steamship *Styliani* was bombed and sunk by German aircraft on April 7th, 1941, during the invasion of Greece.

SUBADAR

SUBADAR

Asiatic Steam Navigation Co.; 1929; Lithgows Ltd.; 5,424 tons; 405 x 54x28-8; 446 n.h.p.; triple-expansion engines. The British steamship *Subadar*, on a voyage from Palembang to Batavia, was bombed, set on fire and sunk by Japanese aircraft on February 13th, 1942, at the southern entrance to the Banka Strait. Five of her crew were killed.

SUCCESS

British Navy, destroyer; 1901; W. Doxford & Sons; 385 tons; 210x20x5; 6,300i.h.p.; 30 knots; triple-expansion engines; one 12 pdr. gun, five 6 pdr., 2 T.T.
The destroyer *Success* was wrecked off Fifeness on December 27th, 1914. Her official complement was 60.

SUCCESSOR

J. Young; 1849; The Tyne; 423 tons.
The British barque *Successor* was chartered by the Indian Government to convey troops, camp-followers, horses and cattle from Madras to Rangoon. Besides the men and animals the ship carried a cargo of supplies for the British army engaged in the Burmese War. On October 8th, 1852, she was lying in harbour with 284 persons on board, mostly native troops under British officers. The captain and the second officer were ashore for the purpose of giving evidence against some European members of the crew who had created considerable trouble on board on the previous day. The monsoon was expected in about six days time and arrangements had been made for a steamship to tow the *Successor* 60 miles to sea in order that she might be well on her way before it broke. At about two in the afternoon the monsoon descended upon the town without warning and an hour afterwards the *Successor* dragged her anchors and went ashore. The first officer with a crew of 43, did his best under hopeless conditions. Of those on board 220 were able to reach the shore in safety, but the first officer, three apprentices and 60 natives were drowned.

SUCEAVA

Roumanian Government; 1923; Marinewerft; 6,876 tons; 409-8x53-9x23-7; 308 n.h.p.; triple-expansion engines & L.P. turbine.
The Roumanian steamship *Suceava* was torpedoed and sunk by a Russian submarine on April 20th, 1943, about 50 miles S. of Cape Tarkan, Crimea. About 20 of her crew were lost.

SUDETENLAND

German Government; 1926; Fried. Krupp A.G.; 11,309 tons; 510-9x68-2x37-9; 905n.h.p.; oilengines. The tanker *Sudetenland* was formerly the Canadian *Canadolite*, captured by a German raider in the North Atlantic on March 25th, 1941, and taken to Bordeaux. She was bombed and sunk by Allied aircraft on August 14th, 1944, at Brest.

SUDMEER

Deutsche Olmuhlen-Rohstoffe Gmb.H.; 1902; Wigham, Richardson & Co.; 8,133 tons; 487-3x56-1x27-6; 846n.h.p.; triple-expansion engines. The whale oil refinery *Sildmeer* was torpedoed and sunk by Russian aircraft on October 14th, 1944, off Honningsvaag, North Norway.

SUEZ MARU

Kuribayashi Shosen K.K.; 1919; Uraga Dock Co.; 4,646 tons; 360X51-2x26-1; 377n.h.p.; triple-expansion engines. The steamship *Suez Maru* was torpedoed and sunk by the U.S. submarine *Bonefish* on November 29th, 1943, N.E. of the Kangean Islands, Java.

SUFFOLK

Birt, Trinder & Bethell; 1899; Sunderland S.B. Co.; 5,364 tons; 420-7x54-1x29-1; 505 n.h.p.; triple-expansion engines. The British steamship *Suffolk* was wrecked on Klippin Point, 20 miles W. of Cape St. Francis, Cape Colony, on September 24th, 1900. She was on a voyage from Fiume to Cape Colony carrying a cargo of horses.

SUFFOLK

Sprague S.S. Co.; 1911; New York S.B. Co.; 4,607 tons; 365 • 7 X 50 • 1 X 28 • 1; 301 n.h.p.; triple-expansion engines. The American steamship *Suffolk* left Norfolk, Virginia, on December 9th, 1943, for Boston with coal. On the 11th a wireless message—"We are foundering in a gale"—was picked up, giving the ship's position some 300 miles E. of Philadelphia. Nothing more was ever heard of the ship or her crew.

SUFFREN

French Navy, 1st class battleship; 1899; Brest Dockyard; 12,750 tons; 422x70x28-2; 16,200 i.h.p.; triple-expansion engines; Niclausse boilers; ten 6-4 in.guns, eight 4 in., twenty-two 3pdr., 4 T.T.
The French battleship *Suffren*, Capt. Guepin, rendered very great service in the Dardanelles campaign. She was an old ship and was badly in need of repair. Her engines were unable to work up to any speed beyond ten knots and she suffered considerably in the bombardments, as well as having been in collision. The French Admiralty decided upon her withdrawal and ordered her to Lorient dockyard for a thorough overhaul.

On the night of November 25th, 1916, the *Suffren* was 90 miles W. of the Burlings, proceeding at a speed of nine knots through a stiff wind and a heavy sea. She was without a destroyer escort, and was an easy prey for a submarine. It was under these conditions that the *Suffren* was sighted by the German submarine *U-52*, Lt.Cdr. Walther Hans, which torpedoed the battleship with ease. She sank with the loss of all her company, 648 officers and men.

SUGI MARU No. 5

Japanese Government; 1919; Teikoku S.S. Co.; 1,983 tons; 270X39x23-9; 254 n.h.p.; triple-expansion engines. The steamship *Sugi Maru No. 5* was formerly the Panamanian *Gran*, seized by the Japanese at Bangkok in December, 1941. On August 22nd, 1944, she was torpedoed and sunk by a British submarine W. of the Andaman Islands.

SUGIYAMA MARU

Yamashita Risen K.K.; 1914; Northumberland S.B. Co.; 4,379 tons; 405x53-4x25-5; 559 n.h.p.; triple-expansion engines.
The steamship *Sugiyama Maru* was torpedoed and sunk by the U.S. submarine *Barbel* on November 14th, 1944, about 150 miles E. of Quangngai, Indo-China.

SUI WO

Indo-China Steam Nav. Co.; 1896; London & Glasgow Co.; 2,672 tons; 290x43-1x11-8; 221 n.h.p.; triple-expansion engines.
The British steamship *Sui Wo* was bombed and sunk by Japanese aircraft on February 13th, 1942, at Singapore.

SUITEN MARU

Japanese Government; 1912; Maats. Fyenoord; 2,500 tons; 270-3x40-2x17; 165 n.h.p.; triple-expansion engines. The steamship *Suiten Maru* was formerly the Dutch *Schouten*, seized by the Japanese at Sourabaya in March, 1942. She was torpedoed and sunk by the U.S. submarine *Sea Robin* on March 3rd, 1945, 50 miles S.E. of Malang, Java.

SUKHONA

U.S.S.R.; 1918; Craig, Taylor & Co.; 3,124 tons; 325-1X48-1x22-2; 294n.h.p.; triple-expansion engines. The Russian steamship *Sukhona* was torpedoed and sunk by German aircraft on September 13th, 1942, N.W. of Bear Island on a voyage from Reykjavik to North Russia.

SULACO

Elders & Fyffes; 1926; Cammell Laird & Co.; 5,389 tons; 400-5x51-4x30-4; 447n.h.p.; 13-5 knots; triple-expansion engines.
The Elders & Fyffes liner *Sulaco*, Capt. H. C. Bower, was torpedoed and sunk by a German submarine in the North Atlantic on October 19th, 1940. Sixty-six persons were killed; one survivor was later picked up.

SULINA

Turkish Navy gunboat; 186-; 200 tons; 111x19x9-2; 60Lh.p. 9 knots; steam engines; 4 guns.

The wooden Turkish gunboat *Sulina* was one of a small squadron lying off Sulina, Rumania. The Russo-Turkish War, 1877-78, had broken out some months previously and the Russians were anxious to disperse the blockading ships. To this end they sent a flotilla of launches and minelaying lighters up the Sulina River, which is one of the mouths of the Danube. On the morning of October 9th, 1877, the *Sulina* passed through the protective chains which had been stretched across the river to go to the aid of the tug *Cartal* which had got into difficulties. The tug was of light draught and did not strike the mines, but the heavier gunboat ran into them and blew up with the loss of nearly all her crew.

SULINA

W. S. Bailey; 1884; A. Leslie & Co.; 2,379 tons; 301-4X 38 x 24 • 7; 240 h.p.; compound inverted engines. The British cargo ship *Sulina* was wrecked off Cape Sable on November 23rd, 1886, while on a voyage from Antwerp to Boston carrying a cargo of steel bars.

SULLBERG

Ang. Bolten; 1912; Bremer Vulkan; 1,551 tons; 260-5x37' - 1x 19-5; 246 n.h.p.; triple-expansion engines.

The German steamship *Sullberg* was torpedoed and sunk by a British submarine on December 9th, 1942, two miles from Hammat, Algeria.

SULLY

Alexander & Arthurs; 1874; Forges & Chantiers de la Meditteranee; 1,326 tons; 247x30-7x21-5; 155 n.h.p.; compound engines.

The British cargo ship *Sully* was wrecked on April 4th, 1900, on Horns Reef, Jutland, while on a voyage from Ghent to Neufahrwasser with a cargo of phosphate.

SULLY

French Navy, armoured cruiser; 1901; La Seyne; 9,856 tons; 453x63-7x24-5; 20,000 i.h.p.; 21 knots; triple-expansion engines; two 7-6 in. guns, eight 6-4 in., six 3-9 in., sixteen 1-8 in., six 1-4 in., 5 T.T.

The French armoured cruiser *Sully* was wrecked on the Canot Rock in Along Bay, Tongking, on February 8th, 1905. The ship at first remained firmly fixed on the rock and there was thought to be some chance of refloating her, but a few days later she slipped off into deep water. Her crew was taken off by the cruisers *Gueydon* and *D'Assas* and there was no loss of life.

SULLY

Soc. Generate d'Armement; 1902; Ateliers & Chantiers de la Loire; 2,649 tons; 277x40-4x22-5.

The French sailing ship *Sully* was sunk by a German submarine off Ushant on March 16th, 1917.

SULTAN STAR

F. Leyland & Co.; 1930; Cammell Laird & Co.; 12,306 tons; 486-1x70-2x36-4; 1,870 n.h.p.; 16 knots; turbine engines.

The liner *Sultan Star*, Capt. W. H. Bevan, with a crew of 73 but no passengers, was homeward bound with 8,000 tons of frozen meat, 1,000 tons of butter and other items of general cargo when she was torpedoed and sunk by a German submarine at 4.42 p.m. on Wednesday, February 14th, 1940, some 200 miles W.S.W. of Land's End. The crew got away in the boats. Later they were picked up by a British warship which chased the submarine and dropped depth charges. The submarine eventually came to the surface, turned turtle and sank.

One man from the crew of the *Sultan Star* was lost.

SULTANA

1863; Cincinnati; 1,719 tons; 10 knots.

The American paddle steamer *Sultana*, Capt. J. C. Mason, was employed on the Mississippi, between New Orleans and St. Louis. On April 21st, 1865, at the end of the Civil War, the steamship left Vicksburg grossly overloaded. She was licensed for 276 passengers, but the military authorities at Vicksburg had thousands of released

Northern prisoners on their hands whom they desired to return to their homes. These men were mostly in a poor state of health owing to long imprisonment in camps where the food was bad and inadequate.

Estimates of the number on board the vessel when she left Vicksburg vary, but the most reliable gives 85 crew, 70 passengers and 2,239 soldiers, among whom were two companies of regular infantry, thus making 2,394. This tremendous load was further increased when the vessel called at Memphis where she took on board 50 pigs and 100 barrels of sugar.

The boilers of the *Sultana* were of a new type. Unfortunately the muddy water of the river caused frequent clogging and halts had to be made to clean the boilers. This was done at Vicksburg and again at Helena on the following morning.

At 2.40 a.m. on the 23rd, when off Tagleman's Landing, eight miles above Memphis, there was a boiler explosion which was afterwards described as not loud, but like a violent rush of air. It was sufficient in intensity, however, to blow the steamship's two funnels over the side and to kill a number of people. The explosion was followed by an outbreak of fire which spread with great rapidity as the hull was largely constructed of wood. The weight of thousands of bodies on the decks of the already shattered ship caused them to collapse, and the helpless soldiers were flung into the holds in a struggling mass.

The number saved was 741, leaving 1,653 unaccounted for.

SUMA MARU

Shimatani Kisen K.K.; 1919; Ropner & Sons; 3,108 tons;

331X46-7X23-2; 310nhp.; triple-expansion engines. The steamship *Suma Maru*, on a voyage from Dairen to Otaru, drove ashore and broke in two on January 8th, 1932, at Fuku-yama, Hokkaido.

SUMANOURA MARU

Mitsubishi Shoji Kaisha; 1939; Mitsubishi Jokogvu K.K.; 3,519 tons; 343-9x48-2x27-9; steam engines.

The steamship *Sumanoura Maru* was sunk by gunfire from U.S. warships on January 24th, 1942, S. of Gorontalo, Celebes.

SUMATRA

Administration of New Guinea; 1889; G.Howaldt; 584 tons;

171-4X27-7x12-1; 61 n.h.p.; triple-expansion engines. The steamship *Sumatra* carried 44 persons, passengers and crew, and was bound from Sydney, N.S.W. to Rabaul. When off Port Macquarie on June 26th, 1923, she ran into a S.E. gale and foundered with all on board.

SUMATRA

AjBSvenskaOstasiatiskaKomp.; 1914; Earle'sCo.; 5,352 tons;

425 X 53 • 8 X 26 • 7; 512 n.h.p.; triple-expansion engines. The Swedish steamship *Sumatra*, on a voyage from Calcutta to Manila, ran aground and sank on November 12th, 1939, near Moyapore Bar, 30 miles from Calcutta.

SUMATRA MARU

Osaka ShosenK.K.; 1917; Kawasaki Dockyard Co.; 5,862 tons;

385 • 1 X 51 X 36; 440 n.h.p.; triple-expansion engines. The steamship *Sumatra Maru* was torpedoed and sunk by the U.S. submarine *Gudgeon* on May 12th, 1943, W. of Masbate Island, Philippines.

SUMIDA MARU

Fukuyo Kisen K.K.; 1919; Manitowoc S.B. Co.; 2,022 tons;

250-5x43-7x20-1; 269 n.h.p.; triple-expansion engines. The steamship *Sumida Maru* was sunk by a Japanese mine on April 15th, 1944, 75 miles south-east of Muroran.

SUMIYOSHI MARU

Hinode Kisen K.K.; 1936; Asano S.B. Co.; 1,921 tons; 271 -6X 40x20-3; 156 n.h.p.; triple-expansion engines.

The steamship *Sumiyoshi (Sumiyosi) Maru* was torpedoed and sunk by the U.S. submarine *Sculpin* on October 14th, 1942, off the west coast of New Ireland.

SUMNER I. KIMBALL

SUMNER I. KIMBALL

U.S. War Shipping Administration; 1943; New England S.B. Corp.; 7,176 tons; 422-8x57x34-8; 339 n.h.p.; 11-5 knots; triple-expansion engines.

The steamship *Sumner I. Kimball* left the Tyne on January 5th, 1944, and Loch Ewe on the 8th for New York. Early on the 16th, about 900 miles E. of Belle Isle Strait, she was seen to be straggling from convoy and at 10.50 p.m. on that day a distress call bearing her convoy code number was picked up. Nothing more was heard of the ship or her crew, one of the convoy escorts sighted a water-logged derelict but could not investigate further. The ship was commanded by Capt. Harry G. Atkins and had a crew of 40.

SUNG KIANG

China Navigation Co.; 1888; Scott & Co.; 1,622 tons; 256-3X36-3x21-6; 150 n.h.p.; triple-expansion engines. The British cargo ship *Sung Kiang* was wrecked on Boat Rock, Lamock Islands, on August 21st, 1918, while on a voyage from Hong Kong to Shanghai carrying a cargo of sugar.

SUNIK

Soc. Anon. les Pdroles d'Outre-Mer; 1915; Armstrong, Whitworth & Co.; 5,009 tons; 385x50-3x30-3; 425n.h.p.; triple-expansion engines.

The French tanker *Sunik*, on a voyage from Constantza and Stockholm for Liverpool, with a cargo of benzine, collided with the Swedish steamship *Grangesberg*, 4,575 tons, on July 27th, 1939, about 25 miles S. of Fowey. The tanker caught fire and sank some time later. The captain and nine men died on board, 24 survivors were picked up by the British steamship *Dartford*.

SUNION

African & Continental S.S. Co.; 1918; W. Gray & Co.; 3,110 tons; 331-1x46-8x23-2; 358n.h.p.; triple-expansion engines.

The British steamship *Sunion* was bombed and set on fire by Insurgent aircraft at 5.30 a.m. on June 22nd, 1938, during the Spanish Civil War, outside Valencia harbour, and sank at 9.0 a.m.

SUNNING

China Navigation Co.; 1916; Taikoo Dockyard & Eng. Co.; 2,555 tons; 310-3x41-2x22-4; 189n.h.p.; triple-expansion engines.

The British steamship *Sunning* was driven ashore and wrecked by a typhoon at Junk Bay on August 17th, 1936. She was carrying 40 passengers and a general cargo from Hong Kong to Ningpo.

SUNOIL

Sun Oil Co.; 1927; Sun S.B. & D.D. Co.; 9,005 tons; 480-6x66x36-8; 688n.h.p.; 11 knots; oil engines. The American tanker *Sunoil*, Capt. S. B. Heggund, was torpedoed and sunk by a German submarine on April 5th, 1943, about 500 miles S.E. of Cape Farewell on a voyage from Halifax to the Clyde. There were no survivors of the crew of 43.

SUNRISE

John Wood & Co.; 1883; R. Craggs & Sons; 1,169 tons; 230X32x15-4; 98 r.h.p.; compound engines.

The British steamship *Sunrise* was wrecked at St. Shott's Cove, near Cape Race, on July 18th, 1895. She was on a voyage from Sydney, N.S., to St. John's, N.F.L., carrying a cargo of coal.

SUNSHINE

John Wood & Co.; 1883; Kish, Boulds & Co.; 1,204 tons; 240x34-2x14-1; 150 h.p.; compound engines. The British steamship *Sunshine*, on a voyage from the Tyne to Genoa with coal, went to the assistance of the steamship *Wellfield*, 1,197 tons, on January 3rd, 1890. The *Wellfield* had broken her propeller shaft and the *Sunshine* took her in tow for Barcelona. Soon afterwards, however, a heavy sea threw the *Wellfield* on to the *Sunshine* and sank her. The *Wellfield* was subsequently towed in by another ship.

SUPERGA

Navigazione Alta Italia Soc. Anon.; 1923; Societa Esercizio Bacini; 6,154 tons; 397-7x51-6x34-6; 456n.h.p.; triple-expansion engines.

The Italian steamship *Superga* was torpedoed and sunk by a Russian submarine on September 29th, 1941, near Varna, Bulgaria.

SURABAYA MARU

Osaka Shosen K.K.; 1919; Osaka Iron Works; 4,391 tons; 345X49•8X28•1; 390n.h.p.; triple-expansion engines. The steamship *Surabaya Maru* was torpedoed and sunk by the U.S. submarine *Silver sides* on January 20th, 1943, N. of the Admiralty Islands.

SURAKARUTA MARU

Nanyo Risen K.K.; 6,886 tons. The steamship *Surakaruta Maru* was sunk by U.S. carrier-based aircraft on September 21st, 1944, off the west coast of Luzon Island, Philippines.

SURINAME

Netherlands West Indies Government; 1930; Deschimag A.G.; 7,915 tons; 495-7x63-9x28-9; 1,250n.h.p.; triple-expansion engines & L.P. turbine.

The Dutch steamship *Suriname* was torpedoed and sunk by a German submarine on September 13th, 1942, on a voyage from Trinidad to New York. Twelve of her crew and one gunner were lost.

SURPRISE

French Navy, gunboat; 1895; 680 tons; 900h.p.; 13-4 knots; triple-expansion engines; two 3-9 in. guns, four 9pdr, four 1 pdr. The French gunboat *Surprise* was off Funchal, Madeira, on December 3rd, 1916, when she was torpedoed and sunk by the German submarine *U-38*. The gunboat's normal complement was 93.

SURPRISE

British Navy, destroyer; 1916; Great Britain; 910 tons; 27 lx 25-7x10-5; 23,000s.h.p.; 36 knots; turbine engines; Yarrow boilers; three 4 in. guns, one 2pdr., 1 m.g., 4 T.T. The destroyer *Surprise* was torpedoed and sunk by a German submarine off the Maas lightship on December 23rd, 1917. She was carrying a complement of about 100.

SURREY

W.S. Bailey; 1873; Humphrey s& Pear son; 1,308 tons; 253-8 x 30X23; 90h.p.; compound inverted engines. The British cargo ship *Surrey* was wrecked off Vlie on December 20th, 1884, while on a voyage from Reval to London carrying a cargo of oats.

SURREY

Federal Steam Navigation Co.; 1919; Palmer's Co.; 8,581 tons; 460-4x62-8x34-9; 1,084n.h.p.; 14 knots; turbine engines. The liner *Surrey*, Capt. F. Loughed, was torpedoed and sunk by an enemy submarine about 150 miles N. of Cristobal on June 10th, 1942. Ten of her crew and two gunners were killed. Capt. Loughed, who was among the survivors, was in command of the *Norfolk* when she was torpedoed in June 1941.

SURVILLE

Compagnie Nantaise des Chargeurs de VQuest; 1919; J. T. Eltringham & Co.; 2,318 tons; 290-2x44x20-8; 245n.h.p.; triple-expansion engines. The French steamship *Survive* struck a mine on November 6th, 1943, ran ashore and was wrecked, about three miles S.E. of Cap Bon.

SUSAK

Yugoslav Government; 1927; J. Readhead & Sons; 3,889 tons; 388-8x52-5x22-1; 334n.h.p.; triple-expansion engines. The steamship *Susak* was torpedoed, shelled and sunk by a German submarine on June 6th, 1942, on a voyage from Aden to Lourenco Marques. Six of her crew were killed by gunfire and one died of wounds later.

SUSAN B. ANTHONY

Grace Line; 1930; New York S.B. Co.; 8,101 tons; 483-3X 63 -9 X25-5; 2,660 n.h.p.; turbo-electric engines. The American steamship *Susan B. Anthony* struck a mine and sank on June 7th, 1944, during the landings in Normandy. The loss of life was slight, most of the troops on board being taken off by landing craft.

SUSAN MCERSK

Ministry of War Transport (Thompson S.S. Co.); 1923; Odense Staalskibsværft; 2,355 tons; 299-8x42-4x19-9; 191 n.h.p.; 10 knots; triple-expansion engines.

The former Danish steamship *Susan Mcersk*, Capt. Kai Bjorn Thomsen, with a crew of 23 left Newport on June 1st, 1941, and sailed in ballast from Milford Haven two days later for Curacao. She was lost without trace, and was probably sunk by enemy action.

SUSANA

Madriral & Co.; 1914; Cantiere Navale Triestino; 5,929 tons; 401-4x51-8x22-9; 520 n.h.p.; triple-expansion engines. The Philippine steamship *Susana* was torpedoed and sunk by a German submarine on October 13th, 1942, on a voyage from New York to Cardiff. The captain, 27 crew and ten gunners were lost.

SUTLEJ

J.Nourse; 1940; C. Cornell & Co.; 5,189 tons; 415-6x55-2x 25-6; 387n.h.p.; oilengines.

The British motorship *Sutlej*, on a voyage from Kosseir to Fremantle with 7,000 tons of phosphate, was torpedoed and sunk by a Japanese submarine on February 26th, 1944, about 150 miles S.E. of the Chagos Archipelago. The submarine shelled the sinking ship and the boats in the water. Forty-two of the crew and seven gunners were lost. Five survivors were picked up from a boat after 42 days and 18 others on two rafts after 49 days.

SUTTON

Over ton Steamship Co.; 1920; Cochrane & Sons; 485 tons; 152x25-2x10-8; 85 n.h.p.; 9-5 knots; triple-expansion engines.

The steamship *Sutton*, Capt. W. H. Terretta, left Aberystwyth for Antwerp at 5.10 p.m. on November 27th, 1925, with 239 tons of zinc and lead concentrates, being about half the ship's cargo capacity. Her crew numbered ten, in addition to whom the captain's wife and daughter were on board. On December 1st the bodies of a seaman and the captain's wife, with the wreckage of a small boat and a lifebuoy inscribed s.s. *Sutton*, were washed up along the Cardiganshire coast. This was the only intimation of the fate of the vessel.

SUWA MARU

Nippon Yusen K.K.; 1914; Mitsubishi Dockyard & Engineering Works; 10,672 tons; 504-9x63-3x37-4; 1,337 n.h.p.; triple-expansion engines.

The liner *Suwa Mam*, in service as a transport, was torpedoed and sunk by the U.S. submarines *Tunny*, *Finback* and *Seadragon* on March 28th, 1943, S.W. of Wake Island.

SUWIED

Hedger S.S. Corp.; 1920; Submarine Boat Corp.; 3,249 tons; 324x46-2x25; 386 n.h.p.; turbine engines. The American steamship *Suwied* was torpedoed and sunk by a German submarine on June 7th, 1942, on a voyage from Demerara to Mobile.

SUZAN MARU

Toa Risen K.K.; 2,539 tons.

The steamship *Suzan Mam* was bombed and sunk by U.S. land-based aircraft on February 5th, 1944, about 125 miles E. of Hong Kong.

SUZANAMI

Japanese Navy, destroyer; 1941; Japanese Yards; 2,200 tons; 415x35x—; 34 knots; turbine engines; six 5 in. guns, eight 25mm.A.A., 15 T.T. The Japanese destroyer *Suzanami* was lying in Rabaul Harbour,

on November 11th, 1943, when the anchorage was attacked by aircraft from a squadron of U.S. carriers. Air fighting of a very determined character took place over the port and 63 Japanese planes were brought down for a loss of seven American. The *Suzanami* was hit and sunk and a cruiser and several destroyers were damaged. The destroyer carried a complement of over 200.

SUZETTE FRAISSINET

Fraissinet & Cie.; 1892; J. L. Thompson & Sons; 2,288 tons; 302 X 40 • 6 X 22 • 1; 264 n.h.p.; triple-expansion engines. The French steamship *Suzette Fraissinet* was torpedoed and sunk by a submarine in the Mediterranean on May 11th, 1918.

SUZUKAZE

Japanese Navy, destroyer; 1937; Uraga; 1,368 tons; 335-5X 31-7x9-2; 38,000 s.h.p.; 34 knots; turbine engines; Kanpon boilers; five 5 in. guns, 2 m.g., 8 T.T.

The Japanese destroyer *Suzukaze* was torpedoed and sunk N.W. of Ponape in the Carolines Group by the U.S. submarine *Skipjack* on January 26th, 1944. The destroyer's normal complement was 180.

SUZUYA

Japanese Navy, heavy cruiser; 1934; Yokosuka; 14,000 tons; 640x63x14-7; 90,000 s.h.p.; 33 knots; turbine engines; Kanpon boilers; eight 8 in. guns, eight 5 in., many 47mm., 12 T.T., 6 aircraft.

The Japanese heavy cruiser *Suzuya* was a unit of the Northern Force in the action in the Sibuyan Sea and San Bernardino Strait, which was part of the battle of Leyte Gulf, October 23rd-27th, 1944. At the outset of the action the Northern Force comprised five battleships, ten heavy cruisers, two light cruisers and 15 destroyers. At its conclusion the Japanese were left with only four battleships (all damaged), five heavy and one light cruisers and 13 destroyers, a loss of nine ships.

The *Suzuya* was sunk off Samar by bombs from U.S. naval aircraft on the 25th. Her normal complement was 850.

For full story of the battle of Leyte Gulf see the battleship *Musashi*.

SVANHOLM

L.H.Carl; 1905; Wood, Skinner & Co.; 1,400 tons; 252 x 38-2x16-2; 168 n.h.p.; triple-expansion engines. The Danish steamship *Svanholm* was torpedoed and sunk by a German submarine in the North Sea on August 16th, 1917.

SVARTON

Trafik A/B Grøngesberg-Oxelosund; 1906; R. Thompson & Sons; 2,475 tons; 296-1x44-5x19-7; 229n.h.p.; triple-expansion engines.

The Swedish steamship *Svarton* was torpedoed and sunk by a German submarine on January 3rd, 1940, 12 miles N.E. of Kinnaird Head. Seven of her crew were killed.

SVAVA

Ministry of War Transport (S. Marshall & Co.); 1904; KjøbenhavnsFlydedok&Skibsværft; 1,216 tons; 233-4x34-4x16-4; 131 n.h.p.; triple-expansion engines.

The British cargo ship *Svava* sank after a collision with the *Fort Beausejour* on March 10th, 1944, when off Blyth. She was carrying a cargo of coal from Warkworth to the Thames.

SVEAJARL

Stockholms Rederi-AjB. Svea; 1941; Kockums M.V.; 10,382 tons; 525-3x63-1x38-9; 1,556n.h.p.; oilengines. The Swedish tanker *Sveajarl* struck a mine and sank on January 9th, 1943, about 75 miles W. of Haugesund, with the loss of 38 lives.

SVEIN JARL

Nordenfjeldske Dampskibsselskab; 1909; Trondhjems Mek. Verksted; 1,135 tons; 231-1x34-2x14; 106n.h.p.; triple-expansion engines.

The Norwegian steamship *Svein Jarl* was torpedoed and sunk by a German submarine in the North Sea on June 9th, 1915.

SVEIN JARL

SVEIN JARL

Det Nordenfjeldske D/S; 1919; Trondhjems Mek. Verksted; 1,908 tons; 265X42-1X17-8; 188 n.h.p.; triple-expansion engines.

The Norwegian steamship *Svein Jar I* left Oban on February 19th, 1941, for Halifax. She became detached from her convoy on the 24th and was never seen again. She was probably sunk by a submarine on the 25th, about 1,000 miles E. of Cape Farewell.

SVEIN JARL

Det Nordenfjeldske D/S; 1943; Trondhjems Mek. Verksted; 2,056 tons; 286-2x44-1X18-3; triple-expansion engines. The Norwegian steamship *Svein Jarl* struck a mine and sank on January 16th, 1948, in the Gulf of Corinth. Eight of her crew were killed.

SVEND FOYN

St. Helier Shipowners; 1931; Furness S.B. Co.; 14,795 tons; 538-1X74•3X33•3; 997 n.h.p.; quadruple-expansion engines. The British tanker *Svend Foyn* sank after striking an iceberg 70 miles S. of Cape Farewell in lat. 58° 05' N., long. 44° 15' W., on March 19th, 1943. She was carrying fuel oil from New York to Liverpool.

SVENNER

Norwegian Navy, destroyer; 1943; Scoffs Shipbuilding Co.; 7,770 tons; 360x33x10; 40,000 s.h.p.; 34 knots; turbine engines; 3-drum boilers; four 4-7 in. guns, four 40 mm.A.A., four 20 mm.A.A., 8 T.T.

The Norwegian destroyer *Svenner* took part in the operations off the coast of Normandy on "D Day", June 6th, 1944. The vessel, which carried a complement of about 200, was torpedoed and sunk.

SVENOR

S. Ugelstacs Rederi A/S; 1931; Swan, Hunter & Wigham Richardson; 7,616 tons; 460-5x59-5x34-1; 1,010 n.h.p.; oil engines.

The Norwegian tanker *Svenor*, on a voyage from Curacao to Halifax with 11,400 tons of fuel oil, was torpedoed by a German submarine on March 27th, 1942, about 300 miles E. of Cape Hatteras. As the ship did not sink the submarine sank her by gunfire, killing eight of her crew, including the captain.

SVENT ISTVAN

Austrian Navy, dreadnought battleship; 1914; Danubius Yard; 22,000 tons; 525x89-5x27; 25,000 i.h.p.; 21 knots; turbine engines; Babcock boilers; twelve 12 in. guns, twelve 6 in., eighteen 12pr., 4 T.T.

On June 9th, 1918, two Austrian dreadnoughts, the *Svent Istvan* and the *Tegethoff*, with a screen of ten destroyers, left Pola with the intention of raiding Allied light forces in the southern Adriatic. By dawn on the 10th the ships were off Premuda, on the coast of Dalmatia, when they were spotted by two Italian motor torpedo boats. These boats, commanded by Cdr. Luigi Rizzo and Midshipman Giuseppe Aonzo, respectively, had been on minesweeping duties and were making for their base. Rizzo, a daring and confident officer, decided to attack. He was followed by Midshipman Aonzo and both craft eluded the destroyer screen and discharged two torpedoes apiece at the battleships. Those fired by Rizzo struck the *Svent Istvan* and sank her, but the torpedoes from Aonzo's craft missed the *Tegethoff* by a narrow margin.

The *Svent Istvan* carried a crew of 1,000, a large proportion of whom were picked up by the escorting destroyers.

SVERIGE

E. Brodin; 1882; J. Blumer & Co.; 1,602 tons; 260-1x38x17-2; 177 n.h.p.; compound engines.

The Swedish steamship *Sverige* struck a mine and sank in the North Sea on August 13th, 1915.

SVERRESBORG

A. Halvorsen; 1914; Laxevaags Mask. & Jernskibs.; 1,144 tons; 228-6x35-1x15-8; 103 n.h.p.; triple-expansion engines. The Norwegian steamship *Sverresborg* was sunk by a German submarine in the Bristol Channel on August 18th, 1915.

SVIETLANA

Russian Navy, 2nd class cruiser; 1896; Forges et Chantiers, Havre; 3,727 tons; 331-2x42-7x18-7; 10,000 i.h.p.; 20-2 knots; triple-expansion engines; six 6 in. guns, ten 3pr., 2 m.g., 2 T.T.

The Russian light cruiser *Svietlana* was the flagship of the Scouting Division of the Baltic Fleet at the battle of Tsushima, wearing the broad pennant of Capt. Schein. During the battle on May 27th, 1905, the light cruiser helped to protect the group of transports and repair ships which accompanied the fleet. While on this duty she was struck by a large calibre shell which entered below the waterline flooding her magazines and her dynamo engines. At 10.40 p.m. she could no longer maintain her place in the line and was compelled to haul out, setting a northerly course for Vladivostok.

The *Svietlana* was now down by the head with a heavy list to port, much of her ammunition supply being cut off by the water. Twice during the night she sighted destroyer flotillas, but managed to avoid action. Just before morning on the 28th she was joined by the destroyer *Buistri* and the two ships kept company until dawn, when the Japanese cruisers *Otawa* and *Nikata* proceeded in chase of them. The *Svietlana* increased speed to 16 knots, but this was not sufficient to shake off her pursuers.

Capt. Schein assembled his officers, explained the plight of the ship and took their views. It was decided to fight until all the available ammunition was expended and then to sink the vessel. From just after 8 a.m. to 10.45 a.m. there was a running fight, the *Svietlana* sustaining fatal damage to her engines. Fire broke out in several places. The sea valves were therefore opened and the vessel sank with colours flying.

Of her complement of 402 about one half of the officers and two thirds of the men were saved by the Japanese auxiliary cruiser *America Maru*.

The full story of the battle of Tsushima is told under the *Knaiz Suvaroff*, flagship of the Baltic Fleet, which was among those lost.

SWAINBY

R. Ropner & Co.; 1904; R. Ropner & Son; 3,653 tons; 325x48x26; 322 n.h.p.; triple-expansion engines. The British steamship *Swainby* sank after a collision with the steamship *Hillbrook*, 3,896 tons, off Hartland Point on November 29th, 1906, while on a voyage from Newport to Mauritius carrying a cargo of coal.

SWANHILDA

W. Lewis & Co.; 1890; A. McMillan & Son; 2,150 tons; 273x42-3x24.

The British four masted barque *Swanhilda*, Capt. A. G. Payne, left Cardiff for Antofagasta on March 15th, 1910. She carried a crew of 28 and the captain's wife. On May 6th, when off Cape St. Anthony, in thick weather, she ran ashore. The sea was very rough and the captain ordered out the boats.

The captain's boat with 16 persons, including the captain's wife, capsized on launching and only five men reached the shore. The first officer's boat with 13 managed to get clear and reached New Year's Island after 30 hours adrift.

Later an Argentine gunboat found the bodies of four men who had landed from the captain's boat. One man survived.

SWANMORE

Johns ton Line; 1913; J. L. Thompson & Sons; 6,373 tons; 405'8x53-5x34-5; 623n.h.p.; 12 knots; triple-expansion engines.

The steamship *Swanmore* was torpedoed and sunk by a German submarine 230 miles W.N.W. of Fastnet on April 25th, 1917. Eleven men were killed. The captain was among the survivors.

SWANSEA VALE

South Metropolitan Gas Co.; 1909; Clyde S.B. & E. Co.; 1,310 tons; 235-1x36x15-1; 162n.h.p.; triple-expansion engines.

The British steamship *Swansea Vale* foundered after striking a submerged wreck outside the entrance to Brest on August 8th, 1918. She was on a voyage from Bayonne to Dunkirk carrying a cargo of wood.

SWATOW

China Navigation Co.; 1873; *Scott & Co.*; 1,084 tons; 235-4x 26-3x17-2; 98 h.p.; compound engines. The British steamship *Swatow* struck a rock and sank off Namoa Island on February 22nd, 1888, while on a voyage from Swatow to Shanghai carrying a general cargo.

SWEDRU

Elder Dempster Lines; 1937; *Scotts S.B. & E. Co.*; 5,379 ton*; 379x52-7x30-1; 598n.h.p.; 12-5 knots; oilengines. The motorship *Swedru*, Capt. P. Little, was bombed and set on fire by German aircraft on April 16th, 1941, about 150 miles W. of Bloody Foreland, Co. Donegal. The burning hull was torpedoed and sunk by a British warship. Capt. Little, 16 of the crew and seven passengers were lost.

SWIFT

British Navy, destroyer; 1942; *J. S. White & Co.*; 1,650 tons; 360x33x10; 40,000 s.h.p.; 34 knots; turbine engines; 3-drum boilers; four 4-7 in. guns, six 40 mm. A.A., 8 T.T. The destroyer *Swift*, Lt. Cdr. J. R. Gower, took part in the landing of the British and American armies in France on 'D' Day, June 6th, 1944. She struck a mine and sank off the coast of Normandy on the 24th, with the loss of one officer and 16 ratings. Two officers were wounded.

SWIFTPOOL

Pool Shipping Co.; 1929; *W. Gray & Co.*; 5,205 tons; 421-2 x 54-2x27-1; 528 n.h.p.; 11 knots; triple-expansion engines. The steamship *Swiftpool*, Capt. Clark, with a cargo of ore was in the North Atlantic on August 5th, 1941, when she was torpedoed and sunk by a German submarine. Capt. Clark, nine officers and 32 men were lost.

SWORD DANCE

British Navy, minesweeper; 1918; *British Isles*; 290 tons; 130 x 27 X 3 - 5; 450 i.h.p.; 10 knots; compound engines; one 3 pdr. gun. The minesweeper *Sword Dance* struck a mine and sank in the Dvina River, North Russia, on June 24th, 1919, when engaged in operations against the Bolsheviks. The vessel carried a complement of about 50.

SYBILLE

British Navy, 2nd class cruiser; 1890; *R. Stephenson & Co.*; 3,400 tons; 300x42x16-5; 9,496i.h.p.; 20 knots; triple-expansion engines; two 6 in. guns, six 4-7 in., eight 6pdr., one 3pdr. The light cruiser *Sybille* served on the South African Station during the Boer War. In January, 1901, she was off Saldanha Bay, where she had landed her captain and a number of ratings to help in the organisation of the colonists, as the Boers had invaded the Cape. The weather was very rough and the ship made for the open sea, but was driven ashore in Lambert's Bay, north of Saldanha Bay, at about 4.30 on the morning of January 16th. Fortunately only one seaman was drowned, everyone else being taken off by the supply ship *City of Cambridge*.

The *Sybille* struck about 300 yards from the shore and with the pounding of the heavy seas soon became a total wreck. Some of her guns and stores were subsequently recovered.

SYCAMORE

Johnston Line; 1917; *R. Duncan & Co.*; 6,550 tons; 445x 58-2x31-2; 700 n.h.p.; 12 knots; triple-expansion engines. The steamship *Sycamore* was torpedoed and sunk by a German submarine 125 miles N.W. of Tory Island on August 25th, 1917. Eleven men were killed. The captain was among the survivors.

SYDFOLD

Dampsk.-A/S Fold; 1918; *P. Smit, Jr.*; 2,434 tons; 287-1X45-2x20-6; 300 n.h.p.; triple-expansion engines. The Norwegian steamship *Sydfold* was torpedoed and sunk by a German submarine on January 22nd, 1940, off the east coast of Scotland. Five of her crew were killed.

SYDHAV

Skibs-A/S Sydhav; 1929; *Swan, Hunter & Wigham Richardson*; 7,587 tons; 450-8x61x33-2; 1,010 n.h.p.; oilengines. The Norwegian motorship *Sydhav* was torpedoed and sunk by an Italian submarine on March 6th, 1942, on a voyage from Curasao to Freetown. Twelve of her crew were lost.

SYDNEY

J. Lasry; 1903; *Soc. Esercizio Bacini*; 2,695 tons; 312-lx 41-9x20-5; 232 n.h.p.; triple-expansion engines. The French steamship *Sydney* was sunk by a German submarine in the Bay of Biscay on January 14th, 1917.

SYDNEY

Australian Navy, cruiser; 1934; *Swan, Hunter & Wigham Richardson*; 6,830 tons; 555x56-8x15-7; 72,000 s.h.p.; 32-5 knots; turbine engines; 3-drum boilers; eight 6 in. guns, eight 4 in., four 3 pdr., 10 smaller, 8 T.T., 1 aircraft. The Australian cruiser *Sydney*, Capt. J. Burnett, R.A.N., distinguished herself in the Second World War by sinking the Italian light cruiser *Bartolomeo Colleoni*, 5,069 tons, in the Mediterranean on July 19th, 1940, and an Italian destroyer some months later. On November 19th, 1941, the ship was in the Indian Ocean when she fell in with the German raider *Kormoran* (ex *Steiermark*), six 5-9 in. guns, some 300 miles from Carnarvon, Western Australia. The engagement which followed was of a most resolute order, both ships being destroyed.

The *Kormoran* was the first to sink, 330 of her crew of about 400 escaping in her boats and eventually landing in Australia. These men reported that the *Sydney* had been torpedoed during the engagement and her fire control destroyed, besides being set on fire. When last seen she was steaming slowly out of sight with her hull still blazing. The most reasonable conjecture is that the flames reached her magazine and she blew up. None of her complement of 42 officers and 603 ratings was saved and no traces of her, except two empty lifeboats and a Carley raft were ever discovered.

SYDNEY MARU

Kokusai Kisen K.K.; 1919; *Kawasaki Dockyard Co.*; 4,105 tons; 345 x 48x30; 356 n.h.p.; triple-expansion engines. The steamship *Sydney Maru* was bombed and sunk by U.S. land-based aircraft on April 14th, 1943, off the east coast of New Guinea.

SYDNEY MARU

Osaka Shosen K.K.; 1929; *Yokohama Dock Co.*; 5,425 tons; 380x54-5x34-2; 489 n.h.p.; oilengines. The motorship *Sydney Maru* was torpedoed and sunk by the U.S. submarine *Bowfin* on November 28th, 1943, off the east coast of Indo-China.

SYLVAN

C.E. De Wolf & Co.; 1879; *A. McDougall*; 1,074 tons; 186-6X 35-9x22. The Canadian barque *Sylvan*, on a voyage from Barbados to St. John, N.B., in ballast, stranded on Trinity Ledge, near Yarmouth, N.S., on March 20th, 1892. Five of her crew were drowned. The wreck was subsequently towed off and sold for scrap.

SYLVIE

Soc. les Affreteurs Reunis; 1904; *Sir Raylton Dixon & Co.*; 2,591 tons; 300 x 43-2x15-5; 271 n.h.p.; triple-expansion engines. The French steamship *Sylvie* was torpedoed and sunk by a submarine in the Mediterranean on January 25th, 1917.

SYMRA

Ivar An Christensen; 1898; *Ropner & Son*; 3,005 tons; 315 X 44-5x21-6; 246 n.h.p.; triple-expansion engines. The Norwegian steamship *Symra* was sunk by a German submarine off the coast of Portugal on or about June 12th, 1917.

SYRIA

J. Nourse; 1868; *W. Pile & Co.*; 1,010 tons; 207-7x34-lx 20-8. The sailing ship *Syria* was bound from Calcutta to Fiji with 494 Chinese coolies, besides crew and other passengers. On May 11th, 1884, in a S.E. gale the ship was wrecked on Nasilai Reef in the Fiji Islands, with the loss of 59 lives.

SYRIE

SYRIE

Compagnie Navale Afrique du Nord; 1909; Ateliers & Chantiers de France; 2,460 tons; 288-8x38-9x16-6; 156n.h.p.; triple-expansion engines.

The French steamship *Syrie* struck a mine and sank on June 11th, 1940, at Havre.

SYROS

Lykes Bros. S.S. Co.; 1920; George A. Fuller Co.; 6,191 tons; 395 • 3 X 55 -1 X 31 • 4; 359 n.h.p.; triple-expansion engines. The

American steamship *Syros* was torpedoed and sunk by a German submarine on May 27th, 1942, between Reykjavik and North Russia, with the loss of ten lives.

676

SZECHUEN

China Navigation Co.; 1895; Scott & Co.; 1,862 tons; 260-7x38-1x21-3; 169 n.h.p.; 8-5 knots; triple-expansion engines.

The steamship *Szechuen* was torpedoed and sunk by a German submarine 60 miles N. by E. i E. of Port Said on May 10th, 1918. Nine men were killed. The captain was among the survivors.

SZECHUEN

China Navigation Co.; 1920; Taikoo Dockyard & Eng. Co.; 2,604 tons; 310-3x41-2x22-4; 196 n.h.p.; triple-expansion engines.

The British steamship *Szechuen* sank after an explosion off Port Said on November 27th, 1942, while carrying petrol from Haifa to Port Said.

T-25 (and T-26)

German Navy, destroyer; 1942; Elbing; 1,100 tons; 313 x 31 x 9; 28,000 s.h.p.; 33 knots; turbine engines; Schulz boilers; four 4 • 1 in. guns, four 37 mm., eight 20 mm., 6 T.T. The German destroyers T-25 and T-26, with four others of the same class, were sighted by British reconnaissance aircraft in the Bay of Biscay, at dawn on December 28th, 1943. Another flotilla of five Narvik destroyers, vessels of 2,400 tons armed with 5-9 in. guns, was in company making 11 destroyers in all. It was assumed that this force was at sea for the purpose of escorting a blockade-runner into port. This vessel had been attacked and sunk by British aircraft on the previous day, but this was apparently unknown to the Germans. As a result of aircraft messages the cruisers *Enterprise* 7,580 tons, seven 6 in. guns, Capt. H. T. W. Grant, and *Glasgow*, 9,100 tons, twelve 6 in. guns, Capt. C. P. Clarke, overhauled the destroyers during early afternoon. There was a heavy sea running which seriously reduced the speed of the Germans who divided into small groups. One group consisting of four of the lighter class came under heavy fire from the British cruisers, as a result of which the T-25 and T-26 went to the bottom. A third destroyer, the *Adler*, 1,200 tons, was heavily damaged and ultimately sank. One of the large Narviks, the Z-27, escaped in a damaged condition and sank later.

The *Glasgow* was hit by a shell which caused a few casualties and some superficial damage. The *Enterprise* suffered neither loss or damage, 1

T-27

German Navy, destroyer; 1942; Elbing; 1,100 tons; 313 x 31 x 9; 28,000 s.h.p.; 33 knots; turbine engines; Schulz boilers; four 4-1 in. guns, four 37mm., eight 20 mm., 6 T.T. The German destroyer T-27 in company with another vessel of the same class was engaged by the Canadian destroyers *Athabaskan* and *Haida* N.W. of Brest on April 29th, 1944. The fight was of a very determined character and resulted in the T-27 being driven ashore on fire and the *Athabaskan* being sunk by gunfire and torpedo. The destruction of the T-27 was finally completed by British aircraft on May 7th.

See also *Athabaskan*.

T-29

German Navy, destroyer; 1942; Elbing; 1,100 tons; 313 x 31 x 9; 28,000 s.h.p.; 33 knots; turbine engines; Schulz boilers; four 4-1 in. guns, four 37mm., eight 20 mm., 6 T.T. The German destroyer T-29 in company with two others of the same class was engaged N.W. of Brest in the early hours of April 26th, 1944 by a British force consisting of the cruiser *Black Prince*, 5,770 tons, Capt. D. M. Lees, D.S.O., commanding the Canadian destroyers *Athabaskan*, *Haida*, *Huron* and *Ashanti*, all Tribal class vessels of 1,870 tons. The Germans endeavoured to lay a smoke screen and take avoiding action, but this was effectively countered by star shells fired by *Black Prince* which revealed their whereabouts to the British destroyers. The T-29 was sunk by gunfire from *Athabaskan*, but the two others managed to escape.

T. C. McCOBB

Standard Oil Co. of New Jersey; 1936; Federal S.B. & D.D. Co.; 7,452 tons; 435x66-8x34-2; 593 n.h.p.; turbine engines. The American steamship T. C. McCobb was torpedoed and sunk by a German submarine on March 31st, 1942, on a voyage from Buenos Aires to Caripito.

T. J. WILLIAMS

Panama Transport Co.; 1921; Oscar Daniels Co.; 8,212 tons; 465-4x60-2x36; 595 n.h.p.; 10 knots; quadruple-expansion, engines.

The British tanker T. J. Williams, Capt. R. T. C. Wright, left Sydney, Nova Scotia, with an eastbound convoy on September 11th, 1941. On the 19th, when in the vicinity of Iceland, at about 11.45 p.m., she was struck on the starboard side near the engine room by a torpedo from a U-boat. She began to settle by the head and after half an hour it was evident that she could not be saved. Capt. Wright therefore gave the order to abandon ship. The T. J. Williams carried a crew of 39 all told, of whom 17 were lost. Two lifeboats were picked up by a British corvette which landed the survivors at Reykjavik, Iceland.

T. H. SKOGLAND

T. H. Skogland & Son A/S; 1915; Blohm & Voss; 4,198 tons; 361-1x50-5x25-6; 367 n.h.p.; triple-expansion engines. The Norwegian steamship T. H. Skogland, on a voyage from Christiania to Buenos Aires, was wrecked on the Farallones Rocks on February 21st, 1923.

T. R. THOMPSON

/ Westoll; 1897; Short Bros.; 3,538 tons; 360x47-2x24-6; 301 n.h.p.; 9 knots; triple-expansion engines. The steamship T. R. Thompson was torpedoed and sunk by a German submarine seven miles S. of Newhaven on March 29th, 1918. The captain and 32 others were lost.

TABARISTAN

Strick Line (1923); 1914; A.G. Weser; 6,251 tons; 422-4 X 56-2x29-7; 520 n.h.p.; 10-5 knots; triple-expansion engines. The steamship *Tabaristan*, Capt. T. Dunn, was torpedoed and sunk by a German submarine on May 29th, 1941, about 250 miles W.S.W. of Freetown. Twenty-one of her crew were lost. Capt. Dunn was among the survivors.

TABER PARK

Park S. Co.; 1944; Foundation Maritime; 2,878 tons; 315-5 x 46-5x22-9; 269 n.h.p.; triple-expansion engines. The Canadian steamship *Taber Park*, on a voyage from the Tyne to London with coal, was sunk by mine or torpedo on March 13th, 1945, off Aldeburgh. Twenty-four of her crew and four gunners were lost, the captain and three others were saved.

TABERG

Angf.-A/B Halfdan; 1920; Limhamns Skeppsvarf A/B; 1,392 tons; 239-9x38-1x16-7; 130 n.h.p.; triple-expansion engines. The Swedish steamship *Taberg* was torpedoed and sunk by a German submarine on June 6th, 1941, on a voyage from Glasgow to Gibraltar. Fifteen of her crew were lost.

TABOGA

National Steamship Co.; 1898; Wigham Richardson; 649 tons; 185 x31'1x12-6; 90 r.h.p.; 12 knots; compound engines. The small passenger steamship *Taboga*, which plied along the coast of South and Central America, was carrying about one hundred persons when she struck on a rock off Punta Mala, Panama, on May 23rd, 1911. She foundered soon afterwards with a loss of 60 lives. The U.S. gunboat, *Yorktown*, which was cruising in those waters, was immediately ordered to Punta Mala to render assistance.

TABOR

W. Wilhelmsen; 1936; A/S Akers Mek. Verksted; 4,768 tons; 408-6x55-3x25-2; 748 n.h.p.; oilengines. The Norwegian motorship *Tabor* was torpedoed and sunk by a German submarine on March 7th, 1943, about 250 miles S. of Port Elizabeth. Twelve of her crew were lost.

TABORFJELL

A/S Rudolf; 1938; Nylands Verksted; 1,339 tons; 250-9X 41-3x14-8; 107 n.h.p.; compound & L.P. turbine engines. The Norwegian steamship *Taborfjell* was torpedoed and sunk by a German submarine on April 30th, 1942, on a voyage from New York to Montreal. Seventeen of her crew were lost.

TACHIBANA

Japanese Navy, destroyer; 1943; Japan; 1,000 tons; 300 X — X —; 30 knots; turbine engines; four 4-7 in. guns, 4 T.T. The Japanese destroyer *Tachibana* was bombed and sunk by aircraft from U.S. aircraft carriers at Ominato, on July 15th, 1945. The vessel carried a complement of about 150.

TACHIBANA MARU

Nippon Yusosen K.K.; 6,521 tons. The tanker *Tachibana Maru* was torpedoed and sunk by the U.S. submarine *Sawfish* on October 9th, 1944, 200 miles south-east of Hong Kong.

TACHIKAZE

Japanese Navy, destroyer; 1921; Maiduru; 1,215 tons; 336-5x29-2x9-5; 55,500 s.h.p.; 34 knots; turbine engines; Kanpon boilers; four 4 7 in. guns, 2 A.A.m.g., 6 T.T. The Japanese destroyer *Tachikaze* was one of the vessels lost in the defence of the naval base of Truk in the Carolines Group. The fighting extended over the three days February 16th-18th, 1944, and resulted in a Japanese loss of three cruisers and four destroyers. The *Tachikaze* was sunk by U.S. carrier-borne aircraft on the 17th. Her normal complement was 148.

No American ship was lost.

For further details see the light cruiser *Agano*.

TACHIRA

Grace Line; 1920; McDougall Duluth S.B. Co.; 2,325 tons; 251 x 43 - 7 x 22 • 2; 262 n.h.p.; triple-expansion engines. The American steamship *Tachira* was torpedoed and sunk by a German submarine on July 12th, 1942, on a voyage from Maracaibo to New Orleans. Five of her crew were lost.

TACNA

Pacific Steam Navigation Co.; 1873; Laird's; 612 tons; 219x26x13; 180 n.h.p.; 11 knots; compound engines. The steamship *Tacna*, Capt. Hyde, was a new vessel plying along the Chilean coast between Valparaiso and Pan de Azucar. On March 7th, 1874, she left the former port with a general cargo, ten head of cattle and 250 bundles of hay. Her first place of call was Los Vilos and when approaching land she was caught by a gust of wind on the starboard quarter, which caused her to heel over to an alarming degree. The captain endeavoured to trim the ship by throwing over his deck cargo of hay and cutting away the foremast, but before this could be done she foundered amid scenes of frightful confusion. The gig was launched but capsized, drowning some of its occupants. The other boats could not be got out and an explosion wrecked the saloon deck.

The loss of life amounted to 19 persons. Many of the survivors owed their safety to the floating bundles of hay.

TACOMA MARU

Osaka Shosen K.K.; 1909; Kawasaki Dockyard Co.; 5,172 tons; 419-7x49-5x29-9; 544 n.h.p.; triple-expansion engines. The steamship *Tacoma Maru* was torpedoed and sunk by the U.S. submarine *Hake* on February 1st, 1944, off Cape Gamtjaka, Moluccas.

TACOMA STAR

F. Leyland & Co.; 1919; Workman Clark & Co.; 7,924 tons; 450x58-5x37-1; 1,138 n.h.p.; 13 knots; triple-expansion engines.

The liner *Tacoma Star*, Capt. R. G. Whitehead, was torpedoed and sunk by a German submarine on February 1st, 1942, 500 miles E. of Hampton Roads. Capt. Whitehead and 84 others were lost.

TADORNA

Cork S.S. Co.; 1910; Swan, Hunter & Wigham Richardson; 1,643 tons; 275x36x19-5; 242 n.h.p.; triple-expansion engines. The British cargo ship *Tadorna* was wrecked in Ballycotton Bay on November 15th, 1911, while carrying a general cargo from Rotterdam to Cork.

TAGA MARU

Hinode Risen K.K.; 1939; Tsurumi Seitetsu Zosen K.K.; 2,868 tons; 322-4x45-1x24-6; 267 n.h.p.; turbine engines.

The steamship *Taga Maru* was torpedoed and sunk by the U.S. submarine *Sargo* on November 9th, 1943, about 500 miles N.E. of Luzon Island, Philippines.

TAGA MARU

Hinode Risen K.K.; 2,220 tons.

The steamship *Taga Maru* was torpedoed and sunk by the U.S. submarine *Flying Fish* on June 10th, 1945, about 50 miles S.E. of Seishin, Manchuria.

TAGLIAMENTO

LloydTrientino; 1922; CantieriSanRocco; 5,448 tons; 404-2 x 54x29; 465 n.h.p.; triple-expansion engines. The Italian steamship *Tagliamento* was torpedoed and sunk by a British submarine on April 22nd, 1943, 35 miles from Pianosa Island.

TAGONOURA MARU

Mitsubishi Shoji K.K.; 3,521 tons.

The steamship *Tagonoura Maru* was torpedoed and sunk by the U.S. submarine *Pollack* on September 3rd, 1943, 100 miles S.E. of Yokohama.

TAKER

Hajee Cassum Joosub; 1879; Caird & Co.; 3,142 tons; 380-9 X 38-3x26; 570 n.h.p.; compound engines.

The Indian steamship *Taher*, on a voyage from Aden to Mauritius, was wrecked off Port Louis, Mauritius, on March 22nd, 1901. Twenty of those on board were drowned.

TAGONA

Canada Steamship Lines; 1908; A. McMillan & Son; 2,004 tons; 249'6x42-6x21-1; 122 n.h.p.; 8-5 knots; triple-expansion engines.

The Canadian steamship *Tagona* was torpedoed and sunk by a German submarine five miles W.S.W. of Trevoise Head on May 16th, 1918. The captain and seven of the crew were lost.

TAI PING

China Pacific Shipping & Trading Co.; 1921; Newburgh Shipyard; 2,493 tons; 301-3x42-3x22-6; triple-expansion engines. The Chinese steamship *Tai Ping*, on a voyage from Shanghai to Keelung with about 1,500 passengers and a large consignment of Nationalist Government securities and currency, collided with the Chinese steamship *Kien Yuan*, 2,160 tons, on January 27th, 1949, in fog in Bonham Strait, N. of Chusan Island. The latter ship sank almost immediately and the *Tai Ping* 15 minutes afterwards. The Australian destroyer *Warramunga* went to assist but was able to save only 35 persons.

TAI SANG

Indo-China Steam Navigation Co.; 1938; Hong Kong & Whampoa Dock Co.; 3,555 tons; 314-9x48-1x25-2; 549 n.h.p.; 10 knots; triple-expansion engines.

The steamship *Tai Sang*, Capt. R. J. T. Hopkins, was in the Durian Strait, Sumatra, on January 24th, 1942, in convoy when she ran into an Allied minefield. She struck a mine and sank with the loss of 30 of her crew including Capt. Hopkins, and four passengers. Two members of the crew became prisoners of war.

TAI WO

Indo-China S.N. Co.; 1881; Boyd & Co.; 1,324 tons; 239-6x 27 X11 • 3; 93 h.p.; compound engines.

The British steamship *Tai Wo* was wrecked on Centaur Shoal, Yangtze-Kiang, on January 14th, 1895. She was on a voyage from Shanghai to Hankow carrying a general cargo.

TAIAN MARU

Nippon Yusen K.K.; 1917; Kawasaki Dockyard Co.; 3,158 tons; 315 x45x 26; 285 n.h.p.; triple-expansion engines. The steamship *Taian Maru* was torpedoed and sunk by the U.S. submarine *Gudgeon* on September 28th, 1943, off Saipan Island, Ladrone Islands.

TAIAN MARU

Shimomura Kisen K.K.; 1916; Skinner & Eddy Corp.; 5,655 tons; 409-6x54x27-1; 477 n.h.p.; turbine engines.

The steamship *Taian Maru* was torpedoed and sunk by the U.S. submarine *Gurnard* on October 8th, 1943, off the north-west coast of Luzon Island, Philippines.

TAIANMARU

Dairen Risen K.K.; 1936; *Mitsubishi Jukogyo K.K.*; 3,670 tons; 345 X 50 X 23 • 6; 323 n.h.p.; triple-expansion engines. The steamship *Taian Mam* was torpedoed and sunk by the U.S. submarine *Gar* on January 23rd, 1944, S.S.E. of Angaur, Caroline Islands.

TAIAN MARU No. 2

Shofuku Risen K.K.; 1,034 tons. The steamship *Taian Mam No. 2* was torpedoed and sunk by the U.S. submarine *Sealion II* on July 11th, 1944, about 150 miles W. of Inchon, Korea.

TAIAROA

Union Steamship Co. of New Zealand; 1875; *A. & J. Inglis*; 438 tons; 189-3x23'2x12-6; *HO h.p.*; 9-5 knots; compound engines. The steamship *Taiaroa*, Capt. G. U. Thomson, left Wellington, New Zealand, at 11.30 a.m. on April 11th, 1886, for her usual run to Lyttelton, Akaroa and Dunedin. She carried a general cargo and a number of passengers, among whom were some New Zealand naval reservists. Before finally leaving the quay she put back three times to embark late comers; having a total of 48 persons on board when she at last put to sea.

This delay in starting probably contributed in some measure to the disaster which overtook her. Owing to a strong N.W. breeze she was compelled to alter course, and as the day wore on it became thick with rain with a heavy sea. At just after 7 p.m., when the mate was in charge, the steamship ran heavily aground at the mouth of the Clarence river.

The four*boats carried by the steamship were put out; the captain's boat being stove in during launching, and the other three being secured to a line dropped over the stern. The captain's boat was then patched up with pieces of blanket and managed to float with three passengers, seven crew and the captain. In this condition she drifted throughout the night and the next forenoon, finally arriving at Blenheim on the afternoon of the 11th without the loss of any of her people.

The other three boats containing 37 passengers and crew between them, each met with disaster, only three of their occupants coming safely to shore.

TAIBINMARU

6,886 tons. The steamship *Taibin Mam* was torpedoed and sunk by the U.S. submarine *Flasher* on October 4th, 1944, off Iba, Philippines.

TAIBUMARU

Osaka Shosen K.K.; 6,440 tons. The steamship *Taibu Mam* was torpedoed and sunk by the U.S. submarine *Tinosa* on May 4th, 1944, about 250 miles S.E. of Hong Kong.

TAIBUNMARU

Shimomura Risen K.K.; 1920; *Osaka Iron Works*; 6,581 tons; 415 x 55 • 5 X 34 - 6; 552 n.h.p.; triple-expansion engines. The steamship *Taibun Mam* was torpedoed and sunk by the U.S. submarine *Halibut* on August 30th, 1943, in the Tsugaru Strait, Japan.

TAICHUMARU

Osaka Shosen K.K.; 1,906 tons. The steamship *Taichu Mam* was torpedoed and sunk by the U.S. submarine *Lapon* on October 18th, 1943, off Kagashima, Japan.

TAICHUMARU

Osaka Shosen K.K.; 1897; *Sir J. Laing*; 3,213 tons; 330x 44x16-9; 589 n.h.p.; triple-expansion engines. The steamship *Taichu (Taityii) Mam* was torpedoed and sunk by the U.S. submarine *Halibut* on April 12th, 1944, 50 miles north of Amami O Island, Ryukyu Islands.

TAIGETOS

A. M. Coulouthros; 1903; *W. Gray & Co.*; 2,961 tons; 270n.h.p.; triple-expansion engines. The Greek steamship *Taigetos* was torpedoed and sunk by a German submarine in the Bay of Biscay on June 24th, 1917.

TAIEMARU

Towa Kisen K.K.; 1918; *Uchida S.B. & E. Co.*; 2,209 tons; 270 x 39 x 23 -1; 169 n.h.p.; triple-expansion engines. The steamship *Taiei Mam* was torpedoed and sunk by the U.S. submarine *Triton* on May 6th, 1942, in the East China Sea.

TAIEMARU

Kuribayashi Shosen K.K.; 1926; *Mitsui Bussan S.B.*; 3,221 tons; 325-7x46-7x24-8; 241 n.h.p.; triple-expansion engines. The steamship *Taiei Maru* was bombed and sunk by U.S. land-based aircraft on March 19th, 1944, north of the Schouten Islands, New Guinea.

TAIEMARU

Nittoh Kisen K.K.; 10,045 tons. The tanker *Taiei Maru* was sunk by U.S. carrier-based aircraft on September 24th, 1944, off the Calamian Group, Philippines.

TAIEMARU

Osaka Shosen K.K.; 6,923 tons. The steamship *Taiei Maru* struck a mine and sank on June 3rd, 1945, off Shimonoseki.

TAIETSUMARU

Osaka Shosen K.K.; 6,890 tons. The steamship *Taietsu Maru* was torpedoed by the U.S. submarine *Boarfish*, bombed and sunk by land-based aircraft on January 31st, 1945, off Quangngai, Indo-China.

TAIFUKUMARU

Nippon Yusen K.K.; 1939; *Mitsubishi Jukogyo K.K.*; 3,520 tons; 343-9x48-2x27-9; 294 n.h.p.; triple-expansion engines. The steamship *Taifuku (Taihuku) Maru* was torpedoed and sunk by the U.S. submarine *Pollack* on August 27th, 1943, in the Bungo Channel, Japan.

TAIGENMARU

Shimomura Kisen K.K.; 1917; *Skinner & Eddy Corp.*; 5,660 tons; 409-6x54x27-1; 507 n.h.p.; turbine engines. The steamship *Taigen Maru* was torpedoed and sunk by the U.S. submarine *Triton* on May 6th, 1942, in the East China Sea.

TAIGYOMARU

Osaka Shosen K.K.; 6,892 tons. The steamship *Taigyō Maru* was torpedoed and sunk by the U.S. submarine *Guavina* on February 7th, 1945, about 150 miles N.E. of Dungun, Malaya.

TAIHA MARU No. 1

Osaka Shosen K.K.; 6,889 tons. The steamship *Taiha Maru No. 1* struck a mine and sank on July 23rd, 1945, off Karatsu, Japan.

TAIHAKUMARU

Osaka Shosen K.K.; 6,886 tons. The steamship *Taihaku Maru* was torpedoed and sunk by the U.S. submarine *Drum* on October 26th, 1944, about 50 miles N. of Luzon Island, Philippines.

TAIHEIMARU

Daido Kaiun K.K.; 1928; *Mitsui Bussan Kaisha*; 6,284 tons; 413-4x55-5x32; 473 n.h.p.; oil engines. The motor vessel *Taihei Maru* was torpedoed and sunk by the U.S. submarine *Sunfish* on July 9th, 1944, about 150 miles E. of Sakhalin.

TAIHO

TAIHO

Japanese Navy, aircraft carrier; 1941; Japan; 30,000 tons; 750 x — x —; 30 knots; turbine engines; twelve 5 in.A.A. guns, many 47 mm., 100 aircraft.

The Japanese aircraft carriers *Taiho* and *Shokaku* were torpedoed and sunk by the U.S. submarines *Albacore* and *Cavalla* respectively in the battle of the Philippine Sea, June 19th, 1944. The *Taiho* was sunk at a position to the N. of Yap. The battle ended disastrously for the Japanese who lost three large aircraft carriers and one destroyer, besides several battleships and cruisers heavily damaged.

The Americans lost no ships and only about one fifth of the aircraft lost by the Japanese.

For the full story of the battle of the Philippine Sea, see the aircraft carrier *Hitaka*.

TAIHO MARU

Osaka Sho sen R.R.; 2,700 tons.

The steamship *Taiho Maru* was sunk by U.S. carrier-based aircraft on February 17th, 1944, in the Caroline Islands.

TAIHO MARU

Toyo Salvage K.K.; 2,720 tons.

The steamship *Taiho Maru* was sunk by U.S. carrier-based aircraft on October 18th, 1944, about 40 miles N. of Luzon Island, Philippines.

TAIHOSAN MARU

Mitsui Bussan Kaisha; 1937; Tama Zosensho; 1,805 tons; 264-5x38-1x20-0; 110 n.h.p.; triple-expansion & L.P. turbine engines.

The cargo steamship *Taihosan Maru*, adapted for use as a water carrier, was torpedoed and sunk by the U.S. submarine *Plunger* on March 12th, 1943, about 100 miles S. of Guadalcanal.

TAIJIMA MARU

Osaka Shosen R.R.; 6,995 tons.

The steamship *Taijima Maru* was torpedoed and sunk by the U.S. submarine *Gurnard* on May 6th, 1944, about 50 miles N. of Menado, Celebes.

TAIJIN MARU

*Shimomura Risen K.K.; 1922; Werf. voorh. Rijkee & Co.; 5,154 tons; 375x51-2x34-1; 563 n.h.p.; oilengines. The motor vessel *Taijin (Taizih) Maru* was torpedoed and sunk by the U.S. submarine *Pogy* on February 20th, 1944, about 100 miles E. of Formosa.*

TAIJIN MARU

*Morihei Risen R.R.; 1916; American S.B. Co.; 1,937 tons; 251-2x43-6x18-2; 274 n.h.p.; triple-expansion engines. The steamship *Taijin (Taizin) Maru* was torpedoed and sunk by the U.S. submarine *Flying Fish* on March 12th, 1944, about 150 miles E. of Okinawa Island.*

TAIJO MARU

Osaka Shosen R.R.; 6,866 tons.

The steamship *Taijo Maru* was torpedoed and sunk by the U.S. submarine *Sea Devil* on April 2nd, 1945, about 120 miles S.W. of Mokpo, Korea.

TAIJUN MARU

*Hachiuma Risen R.R.; 1918; Uchida S.B. & E. Co.; 1,274 tons; 228 x 33 x 18 - 7; 88 n.h.p.; triple-expansion engines. The steamship *Taijun (Taizyun) Maru* was bombed and sunk by U.S. land-based aircraft on April 11th, 1942, off Salamaua, New Guinea.*

TAIJUN MARU

Osaka Shosen R.R.; 2,825 tons.

The steamship *Taijun Maru* was torpedoed and sunk by the U.S. submarine *Cero* on May 23rd, 1944, about 100 miles N. of Morotai Island, Celebes.

TAIKA MARU

*Toa Raiun R.R.; 1921; Uruga Dock Co.; 2,204 tons; 280X 43-2x21; 156 n.h.p.; triple-expansion engines. The steamship *Taika Maru* was torpedoed and sunk by the U.S. submarine *Growler* on September 7th, 1942, off Keelung, Formosa.*

TAIKAI MARU

*Shirasaka Risen Kaisha; 1919; Forth S.B. & Eng. Co.; 2,478 tons; 303-3x42-7x23; 217n.h.p.; triple-expansion engines. The steamship *Taikai Maru* was sunk by U.S. carrier-based aircraft on October 10th, 1944, off the Ryukyu Islands.*

TAIKAI MARU

*Meiji Raiun R.R.; 1917; Mitsubishi Zosen Kaisha; 3,812 tons; 345 x 50 x 29; 339 n.h.p.; triple-expansion engines. The steamship *Taikai Maru* was torpedoed and sunk by the U.S. submarine *Raton* on October 18th, 1944, 150 miles W. of Busuanya Island, Philippines.*

TAIKEI MARU

*Oginuno Raisho R.R.; 1897; W. Dobson & Co.; 2,792 tons; 325-5x45-1x21; 251 n.h.p.; triple-expansion engines. The steamship *Taiki Maru* left Vladivostok on February 15th, 1932, for Aomori, with a crew of 38. On the following day the ship reported that she had run into a severe storm and was surrounded by pack ice. Nothing more was heard of the ship or her crew after a final wireless message at 8 p.m. on that day.*

TAIKEI MARU

Osaka Shosen R.R.; 4,500 tons.
The steamship *Taiki Maru* was torpedoed and sunk by the U.S. submarine *Gray back* on February 19th, 1944, about 100 miles W. of Panay Island, Philippines.

TAIKEN MARU

Taiyo Raiun R.R.; 2,220 tons.

The steamship *Taiken Maru* was bombed and sunk by U.S. carrier-based aircraft on March 1st, 1945, about 200 miles W. of Formosa.

TAIKO MARU

*Taiko Risen R.R.; 1938; Matsuo Zosensho; 1,925 tons; 270 x 40x20-3; 150 n.h.p.; triple-expansion engines. The steamship *Taiko Maru* was torpedoed and sunk by the U.S. submarine *Gurnard* on July 11th, 1943, 500 miles E. of Samar Island, Philippines.*

TAIKO MARU

*Chosen Yusen R.R.; 1937; Mitsubishi Jukogyo R.R.; 2,958 tons; 305-4x45-3x26-2; 214 n.h.p.; triple-expansion engines. The steamship *Taiko Maru* was torpedoed and sunk by the U.S. submarine *Pompano* on September 25th, 1943, in the western approach to the Tsugaru Strait, Japan.*

TAIKO MARU

*Japanese Navy; 1937; Mitsubishi Jukogyo R.R.; 2,984 tons; 305-4x45-3x26-2; 214 n.h.p.; triple-expansion engines. The steamship *Taiko Maru* was taken over by the Japanese Navy for use as an auxiliary gunboat. On July 14th, 1944, she was torpedoed and sunk by the U.S. submarine *Sandlance* off Jolo Island, Philippines.*

TAIKOKU MARU

Chosen Yusen R.R.; 2,633 tons.
The steamship *Taikoku Maru* was torpedoed and sunk by the U.S. submarine *Sandlance* on May 17th, 1944, off Tenian Island, Ladrone Islands.

TAIKYO MARU

Osaka Shosen R.R.; 5,244 tons.
The steamship *Taikyo Maru* was torpedoed and sunk by the U.S. submarine *Barb* on January 23rd, 1945, off Santuao, China.

TAIKYUMARU

Taikyū Risen K.K.; 1906; *J. Priestman & Co.*; 2,138 tons; 290 x 42 • 2 x 20 - 4; 256 n.h.p.; triple-expansion engines. The steamship *Taikyū Mam* struck a mine and sank on June 16th, 1945, off Karatsu, Japan.

TAIMAN MARU No. 1

Osaka Shosen K.K.; 6,888 tons. The steamship *Taiman Mam No. 1* was torpedoed and sunk by the U.S. submarine *Atule* on January 24th, 1945, in the Yellow Sea.

TAIMEIMARU

Nippon Yusen K.K.; 1936; *Mitsubishi Jukogyo K.K.*; 2,883 tons; 326 - 2x44 - 2x24; 284 n.h.p.; triple-expansion engines. The steamship *Taimei Mam* was bombed and sunk by U.S. land-based aircraft on March 3rd, 1943, in the Straits of Macassar.

TAIMEIMARU

Osaka Shosen K.K.; 6,923 tons. The steamship *Taimei Mam* was torpedoed and sunk by the U.S. submarine *Gurnard* on November 3rd, 1944, about 200 miles N.W. of Miri, Sarawak.

TAINAN MARU

Taiko Kisen K.K.; 1,989 tons. The steamship *Tainan Mam* was torpedoed and sunk by the U.S. submarine *Pogy* on May 26th, 1943, off Onahama, Honshu Island, Japan.

TAINAN MARU

Nippon Seitetsu K.K.; 5,407 tons. The steamship *Tainan Mam* was torpedoed and sunk by the U.S. submarine *Bow fin* on November 26th, 1943, off the east coast of Indo-China.

TAINAN MARU

Osaka Shosen K.K.; 1897; *J.L. Thompson & Sons*; 3,775 tons; 330 X 43 x 21 • 1; 589 n.h.p.; triple-expansion engines. The steamship *Tainan Mam* was torpedoed and sunk by the U.S. submarine *Tang* on June 24th, 1944, about 100 miles W. of Kago-shima, Japan.

TAINUI

New Zealand Refrigerating Co.; 1903; *Auckland*; 128 tons; 92-3x19-2x6-7; 24 h.p.; compound engines. The small wooden steamship *Tainui*, Capt. J. C. Cowan, left Lyttelton, New Zealand, on September 16th, 1919, for Wanganui with 1,808 cases of petroleum. Some of the cases were leaky and at about 3 a.m. on the 17th, when the steamship was off Gore Bay, a violent explosion occurred which blew off part of the fore hatch; wrecking the ship and setting her on fire.

To add to the danger there was a heavy sea which made the launching of the boats extremely hazardous. The *Tainui* carried a crew of nine, and they all managed to get into one lifeboat. In putting off the boat capsized and only one man, the cook, managed to reach shore.

Meanwhile the shattered vessel was rapidly breaking up. What remained of her drifted ashore near Shag Rock, Gore Bay.

TAIPOSEK

Japanese Government; 1,960 tons. The Japanese steamship *TaiPOSEK* was bombed and sunk by U.S. carrier-based aircraft on January 12th, 1945, 15 miles E. of Gocong, Indo-China.

TAIRAI MARU

Dairin Kisen K.K.; 1925; *Osaka Iron Works*; 4,273 tons; 345x49-8x28-1; 562 n.h.p.; turbo-electric engines. The steamship *Tairai Mam* was torpedoed and sunk by the U.S. submarine *Spadefish* on February 4th, 1945, about 100 miles S.W. of Inchon, Korea.

TAIREIMARU

Kita Nippon Kisen K.K.; 1904; *Mitsubishi Goshi Kaisha*; 1,240 tons; 235-5x31-5x21; 121 n.h.p.; triple-expansion engines.

The steamship *Tairei Mam*, on a voyage from Otomari to Otaru, was sunk by collision on July 27th, 1924, three miles from Nishinotoro, Karafuto.

TAIRI GO

Japanese Government; 1919; *Kisugawa S.B. Yard*; 1,832 tons; 260 x 37-8 X19 - 8; 138 n.h.p.; triple-expansion engines. The transport *Tairi Go* was formerly the Chinese *Tai Lee*, seized by the Japanese. She struck a mine and sank on July 7th, 1945, off Fukuoka, Japan.

TAIRIKUMARU

Japanese Government; 1913; *J. Crown & Sons*; 2,325 tons; 290 x 40-8x17-8; 222 n.h.p.; triple-expansion engines. The steamship *Tairiku Maru* was formerly the Greek *Kararados*, seized by the Japanese in December, 1941. She was torpedoed and sunk by the U.S. submarine *Gato* on February 21st, 1945, about 50 miles N.W. of Mokpo, Korea.

TAIRIN MARU

Taiyo Kaiun K.K.; 1,915 tons. The steamship *Tairin Maru* was torpedoed and sunk by the U.S. submarine *Silversides* 300 miles N. of Wewak, New Guinea, on October 18th, 1943.

TAIRIN MARU

Osaka Shosen K.K.; 6,862 tons. The steamship *Tairin Maru* was torpedoed and sunk by the U.S. submarine *Sturgeon* on July 3rd, 1944, about 50 miles off Wonsan, Korea.

TAIROA

Norfolk & North American S.S. Co.; 1920; *Armstrong, Whitworth & Co.*; 7,983 tons; 478x63-2x31-2; 1,011 n.h.p.; quadruple-expansion engines.

The British steamship *Tairoa*, on a voyage from Brisbane to London was sunk by a German raider on December 3rd, 1939, off the coast of S.W. Africa.

TAIRYOMARU

Japanese Government; 1919; *Kisugawa S.B. Yard*; 1,423 tons; 208-9x38-1x11-3; 155 n.h.p.; triple-expansion engines. The steamship *Tairyo Maru* was formerly the British *Tai Lee*, scuttled at Hong Kong in December, 1941, raised and repaired by the Japanese. She was bombed and sunk by U.S. land-based aircraft on July 12th, 1943, off Haiphong, Gulf of Tonkin.

TAIRYU MARU

Kuribayashi Shosen K.K.; 1907; *Swan, Hunter & Wigham Richardson*; 4,994 tons; 384-1x51'5x29-2; 339nhp.; triple-expansion engines. The steamship *Tairyu Maru* was bombed and sunk by U.S. land-based aircraft on February 19th, 1944, S.E. of Foochow.

TAIRYUMARU

Taiko Kisen K.K.; 1940; *Kawaminami Kogyo K.K.*; 1,912 tons; 271 - 6x40x20-3; 150 n.h.p.; triple-expansion engines. The steamship *Tairyu Maru* struck a mine and sank on May 17th, 1945, off Kobe.

TAISEI MARU

Osaka Shosen K.K.; 1,957 tons. The steamship *Taisei Maru* was bombed and sunk by U.S. land-based aircraft on September 27th, 1943, off the Schouten Islands, New Guinea.

TAISEI MARU

Osaka Shosen K.K.; 1,948 tons. The steamship *Taisei Maru* was torpedoed and sunk by the U.S. submarine *Sunfish* on April 19th, 1945, S.E. of Muroan, Japan.

TAISHAN

TAISHAN

T. W. Richardson; 1888; *J. Jones & Sons*; 1,805 tons; 274-8 X 37-2x18-8; 199 n.h.p.; triple-expansion engines. The British cargo ship *Taishan* was wrecked on Sul Rock, South Namoa, on March 22nd, 1910. She was on a voyage from Hongay to Swatow carrying a cargo of coal.

TAISHAN

San Peh Steam Nav. Co.; 1906; *J. Crown & Sons*; 2,187 tons; 290 x 42 • 2 x 20 • 5; 233 n.h.p.; triple-expansion engines. The Chinese steamship *Taishan* left Tsingtao on November 26th, 1934, for Shanghai with coal. Nothing was heard of the ship or her crew after a routine wireless message on the 27th until December 2nd, when the bodies of some of her crew were found about 100 miles S. of Tsingtao.

TAISHI MARU

Osaka Shosen K.K.; 2,800 tons. The steamship *Taishi Maru* was torpedoed and sunk by the U.S. submarine *Cobia* on July 13th, 1944, about 100 miles W. of the Bonin Islands.

TAISHIN MARU

Tatsuuma Kisen K.K.; 1918; *Mitsubishi Zosensho*; 1,723 tons; 250 x 37 - 7 x 20 • 5; 138 n.h.p.; triple-expansion engines. The steamship *Taishin (Taisin) Maru* was torpedoed and sunk by the U.S. submarine *Flasher* on February 5th, 1944, off W. coast of Mindoro, Philippines.

TAISHO MARU

Osaka Shosen K.K.; 6,886 tons. The steamship *Taisho Maru* was torpedoed and sunk by the U.S. submarine *Drum* on October 26th, 1944, about 50 miles N. of Luzon Island, Philippines.

TAISHO MARU

Taisho Kisen K.K.; 1938; *Kawasaki Dkyd. Co.*; 4,815 tons; 384-4x52-5x29-4; 450 n.h.p.; turbine engines. The steamship *Taisho (Taisyo) Maru* was sunk by U.S. carrier-based aircraft on January 24th, 1944, off Rabaul, New Guinea.

TAISHO MARU

Chosen Yusosen; 1,122 tons. The steamship *Taisho Maru* struck a mine and sank on June 5th, 1945, off Shimonoseki.

TAISHU MARU

Osaka Shosen K.K.; 6,806 tons. The steamship *Taishu Maru* was torpedoed and sunk by the U.S. submarine *Cero* on April 29th, 1945, off Kamaishi, Japan.

TAISHUN MARU

Taiyo Kaiun K.K.; 2,857 tons. The steamship *Taishun Maru* struck a mine and sank on August 10th, 1945, off Seishin, Manchuria.

TAISOKU MARU

KaiMidori; 1918; *Asahi S.B. Co.*; 2,473 tons; 281x41x24-5; 175 n.h.p.; triple-expansion engines. The steamship *Taisoku Maru* was torpedoed and sunk by the U.S. submarine *Cod* on February 27th, 1944, about 80 miles W. of Halmahera, Celebes.

TAITEN MARU

Osaka Shosen K.K.; 6,442 tons. The steamship *Taiten Maru* was torpedoed and sunk by the U.S. submarine *Seadragon* on October 24th, 1944, about 150 miles N.W. of Luzon Island, Philippines.

TAITO MARU

Osaka Shosen K.K.; 1935; *Mitsubishi Jukogyo K.K.*; 4,466 tons; 357x49-2x32-8; 500 n.h.p.; turbine engines. The steamship *Taito Maru* was torpedoed and sunk by the U.S.

submarine *Flying Fish* on May 25th, 1944, about 100 miles N. of the Caroline Islands.

TAITO MARU

Taito Kisen K.K.; 1917; *Harima Dockyard Co.*; 2,726 tons; 284x44-8x24; 281 n.h.p.; triple-expansion engines. The steamship *Taito Maru* was torpedoed and sunk by the U.S. submarine *Tinosa* on June 20th, 1945, off Pohang, Korea.

TAITO MARU

Osaka Shosen K.K.; 6,850 tons. The tanker *Taito Maru* was torpedoed and sunk by U.S. carrier-based aircraft on August 9th, 1945, off Rashin, Manchuria.

TAIU MARU

Dairen Kisen K.K.; 2,220 tons. The steamship *Taiu Maru* was torpedoed and sunk by the U.S. submarine *Billfish* on June 4th, 1945, about 40 miles S.W. of Chinampo, Korea.

TAIUN MARU No. 1

Osaka Shosen K.K.; 2,220 tons. The steamship *Taiun Maru No. 1* was torpedoed and sunk by the U.S. submarine *Haddo* on July 1st, 1945, about 100 miles S.W. of Chinampo, Korea.

TAIUN MARU No. 9

Houn Kisen K.K.; 1915; *Aizawa Iwakichi*; 1,004 tons; 210 X 30 x 20; 67 n.h.p.; triple-expansion engines. The steamship *Taiun Maru No. 9* was bombed and sunk by U.S. land-based aircraft on May 5th, 1945, N.W. of Fukuoka, Japan.

TAIYABI

Allibhoy M. Jeevanjee & Co.; 1889; *Harland & Wolff*; 3,157 tons; 345-6x42-2x24-5; 271 n.h.p.; triple-expansion engines. The Indian steamship *Taiyabi* foundered in lat. 49° 50' N., long. 8° 30' W., on January 9th, 1918, while employed as an Admiralty collier. She was on a voyage from Cardiff to Malta carrying coal and a general cargo.

TAIYO MARU

Nippon Yusen K.K.; 1911; *Blohm & Voss*; 14,457 tons; 560 x 65-3x31-2; 1,180 n.h.p.; 19 knots; quadruple-expansion engines. The liner *Taiyo Mam*, was carrying 700 persons belonging to the Mitsui industrial organisation who were to undertake the industrial reorganisation of the countries of S.E. Asia seized by Japan, after her entry into the Second World War in December 1941. The ship was escorted by naval vessels. On May 8th, 1942, she was torpedoed and sunk with heavy loss of life by the U.S. submarine *Grenadier* about 200 miles S.S.W. of Nagasaki. The *Taiyo Maru* carried a crew of about 200.

TAIYO MARU

Kaoru Kikyo; 1913; *Craig, Taylor & Co.*; 4,168 tons; 370x 51 - 4x24-1; 371 n.h.p.; triple-expansion engines. The steamship *Taiyo Maru* was torpedoed and sunk by the U.S. submarine *Icefish* on October 26th, 1944, about 100 miles N.W. of Luzon Island, Philippines.

TAIYOKU MARU

Osaka Shosen K.K.; 5,244 tons. The steamship *Taiyoku Maru* was torpedoed and sunk by the U.S. submarine *Parche* on May 4th, 1944, about 250 miles S.E. of Hong Kong.

TAIYU MARU

Ube Tisso Kogyo K.K.; 1938; *Osaka Zosensho*; 1,873 tons; 271 - 7x40x20-3; 156 n.h.p.; triple-expansion engines. The steamship *Taiyu Maru* was sunk by U.S. carrier-based aircraft on September 9th, 1944, in the Sulu Sea.

TAIYU MARU

1,942 tons.

The *Taiyu Maru* was sunk by U.S. carrier-based aircraft on September 22nd, 1944, off Olongapo, Philippines.

TAIZAN MARU

Miyaji Risen K.K.; 3,528 tons.

The steamship *Taizan Mam* was sunk by U.S. carrier-based aircraft on November 11th, 1944, off the west coast of Cebu Island, Philippines.

TAJANDOEN

Stoomvaart Maats. Nederland; 1931; Nederlandsche Scheeps-bouw Maats.; 8,159 tons; 469x62-2x32-6; 2,122 n.h.p.; oil engines. The Dutch motorship *Tajandoen* was torpedoed and sunk by the German submarine *U 47* on December 7th, 1939, about 40 miles N. of Ouessant on a voyage from Amsterdam to Batavia. Six of her crew were lost.

TAKACHIHO

Japanese Navy, light cruiser; 1885; Armstrong; 3,700 tons; 300x46x20; 7,000i.h.p.; 18-5 knots; triple-expansion engines; eight 6 in. guns, two 6 pdr., 14 m.g., 4 T.T.

The Japanese light cruiser, *Takachiho*, although an old ship at the time of her loss, was the sensation of her day. She was sister ship to the *Naniwa* in which Admiral Togo made his name in the Sino-Japanese War of 1894. The two ships were of nearly the same design as the Chilean cruiser *Esmeralda*, which had been built at Elswick in 1884. The remarkable performance of this cruiser, of 18-5 knots, drew the interest of all naval men, and so impressed were the Japanese that they ordered two similar ships from Elswick in the following year. These were the *Naniwa* and the *Takachiho*.

At the outbreak of the First World War the *Takachiho* was with the Japanese forces off Tsing-Tau, the German naval base in the Far East. On August 23rd, 1914, Japan declared war against Germany and four days later the fortress was invested. When patrolling the coast on October 19th, the *Takachiho* struck a mine and blew up and sank with the loss of 243 officers and men, there being only ten survivors.

TAKACHIHO MARU

Osaka Shosen K.K.; 1934; MitsubishiZosenKaisha; 8,154 tons; 453-3x59x37; 1,430 n.h.p.; turbine engines. The steamship *Takachiho (Takatiho) Maru* was torpedoed and sunk by the U.S. submarine *Kingfish* on March 19th, 1943, about 150 miles E. of Foochow.

TAKAMISAN MARU

Mitsui Bussan Kaisha; 1928; Mitsui Bussan Kaisha; 7,992 tons; 276-5x40-7x21; 224 n.h.p.; oilengines.

The steamship *Takamisan Maru* was torpedoed and sunk by the U.S. submarine *Saury* on May 30th, 1943, about 150 miles E. of Ningho.

TAKANAMI

Japanese Navy, destroyer; 1941; Japan; 2,000 tons; 364 X 35x11; 45,000 s.h.p.; 36 knots; turbine engines; Kanpon boilers; six 5 in. guns, 2 m.g., 8 T.T.

The Japanese destroyer *Takanami* was one of a squadron of seven ships escorting transports to Guadalcanal on the night of November 30th, 1942. The squadron was intercepted in Savo Sound by a U.S. force comprising five large cruisers and six destroyers under Rear-Admiral C. H. Wright. Visibility was poor, favouring the Japanese destroyers which made an attack, scoring hits on the *Minneapolis*, *New Orleans*, *Pensacola* and *Northampton*. The first three were able to keep afloat but the *Northampton* had to be sunk by ships in company. The *Takanami* came under heavy fire from the *Minneapolis* and *New Orleans* and she blew up.

For further details see the U.S.S. *Northampton*.

TAKANE MARU

Nippon Kaiun K.K.; 10,021 tons.

The tanker *Takane Maru* was torpedoed and sunk by the U.S. submarines *Trigger*, *Salmon* and *Sterlet* on October 30th, 1944, about 100 miles S.E. of the Shichi-to Islands, Japan.

TAKAO MARU

Osaka Shosen K.K.; 1927; Uraga Dock Co.; 4,282 tons; 355-6x48-5x32-5; 732 n.h.p.; turbine engines. The steamship *Takao Maru*, in service as a transport, was one of a convoy of six vessels carrying 4,400 troops to make a landing at Padan in the Philippine Islands. The convoy was bombed by aircraft of the U.S. Army Air Force on December 10th, 1941, and the *Takao Maru* was set on fire and was run ashore. The sea was rough and the invading force was compelled to make a temporary withdrawal.

TAKAO MARU

Kawasaki Kisen K.K.; 1920; J. Priestman & Co.; 3,204 tons; 331-3x46-8x23-2; 358 n.h.p.; triple-expansion engines. The steamship *Takao Maru* was torpedoed and sunk by the U.S. submarine *Wahoo* on May 9th, 1943, off Ofunato, Honshu Island, Japan.

TAKAOKA MARU

Nippon Yusen K.K.; 1920; Yokohama Dock Co.; 7,006 tons; 445 X 58x34; 632 n.h.p.; triple-expansion engines. The steamship *Takaoka Maru* was torpedoed and sunk by the U.S. submarine *Shark* on June 5th, 1944, about 300 miles W. of the Ladrone Islands.

TAKAOSAN MARU

Mitsui Bussan Kaisha; 1911; J. Priestman & Co.; 2,076 tons; 275 x 42 x 18-1; 240 n.h.p.; triple-expansion engines. The steamship *Takaosan Maru* was torpedoed and sunk by the U.S. submarine *Wahoo* on March 24th, 1943, N.W. of Dairen.

TAKASAGO

Japanese Navy, protected cruiser; 1897; Vickers, Armstrong; 4,160 tons; 360x46-5 x 17; 15,967 i.h.p.; 23 knots; triple-expansion engines.

The Japanese cruiser *Takasago* was a unit of the fast cruiser squadron under command of Admiral Dewa during the Russo-Japanese War. On the night of December 12th, 1904, the *Takasago*, in company with the *Otawa*, was patrolling between Port Arthur and Chefoo when she struck a floating mine. The explosion occurred amidships and within a few minutes the vessel sank, her crew coming on deck to find themselves plunged into the bitterly cold waters of the Yellow Sea. Many died from exposure before they could be picked up by the *Otawa*. Of the 425 officers and men who formed her complement, four officers, including the captain, and 158 men were rescued.

The loss of this ship was a severe blow to the Japanese, as they possessed only three cruisers with a speed of 23 knots.

TAKASAGO MARU

*Sanpo Kisen Goshi Kaisha; 1907; Osbourne, Graham & Co.; 1,989 tons; 279x40*1 x1S-1; 175 n.h.p.; triple-expansion engines.*

The steamship *Takasago Maru*, on a voyage from Miike to Kunsan, ran into fog on March 6th, 1932, struck a rock and foundered off Kotori Island, near Mokpo, Korea.

TAKASAGO MARU

Horai Tanker K.K.; 1,116 tons.

The tanker *Takasago Maru* was torpedoed and sunk by a British submarine on April 28th, 1945, off Rakil Island, Malaya.

TAKASAKI MARU

Japanese Government; 1904; Ramage & Ferguson; 1,460 tons; 230 x 34 -1 x 14 • 8; 159 n.h.p.; triple-expansion engines. The tanker *Takasaki Maru* was formerly the British *Shinhwa*, seized by the Japanese at Kuching in January, 1942. She was torpedoed and sunk by the U.S. submarine *Puffer* on June 5th, 1944, about 300 miles S.E. of Iwojima Island.

TAKASAN MARU

1,428 tons.

The *Takasan Maru* struck a mine and sank on July 23rd, 1944, in the Tioro Strait, Celebes.

TAKASHIMA MARU

Nihon Yusen K.K.; 5,633 tons.
The steamship *Takashima Maru* was torpedoed and sunk by the U.S. submarine *Barb* on June 13th, 1944, between Sakhalin and Kamchatka.

TAKATSU MARU

Yamashita Kisen K.K.; 5,350 tons.
The steamship *Takatsu Maru* was bombed and sunk by U.S. land-based aircraft on November 10th, 1944, off the west coast of Cebu Island, Philippines.

TAKEGAWA MARU

Kawasaki Kisen K.K.; 1938; *Tsurumi Seitetsu Zosen K.K.*; 1,930 tons; 271-6x40x20-3; 228 n.h.p.; triple-expansion engines.
The steamship *Takegawa Maru* was torpedoed and sunk by the U.S. submarine *Bang* on April 29th, 1944, about 100 miles N.W. of Luzon island, Philippines.

TAKEKUN MARU

Japanese Government; 3,029 tons.
The tanker *Takekun Maru* struck a mine and sank on September 10th, 1944, off Belawan, Sumatra.

TAKETOYO MARU

Nippon Yusen K.K.; 1920; *Yokohama Dock Co.*; 6,965 tons; 445 x58x34; 632 n.h.p.; triple-expansion engines. The steamship *Taketojo Maru* was torpedoed and sunk by the U.S. submarine *Ray* on August 21st, 1944, in the Mindoro Straits, Philippines.

TAKI MARU

Iino Kisen K.K.; 1916; *Osaka Iron Works*; 1,244 tons; 220 X 33-5x18-5; 79 n.h.p.; triple-expansion engines.
The steamship *Taki Maru* was torpedoed and sunk by the U.S. submarine *Narwhal* on March 4th, 1942, off the Ryukyu Islands.

TAKSANG

Indo-China Steam Navigation Co.; 1935; *Lithgows*; 3,471 tons; 314-7x48-1x25-2; 530 n.h.p.; 10 knots; triple-expansion engines.
The steamship *Taksang*, Capt. M. Costello, was in the Bay of Bengal on April 6th, 1942, in convoy when she was shelled and sunk by a Japanese aircraft carrier. Fifteen of the crew were lost, Capt. Costello was among the survivors.

TAKUSEI MARU

Okada Gumi K.K.; 1919; *Submarine Boat Corp.*; 3,515 tons; 324x46-2x25; turbine engines.
The steamship *Takusei Maru* was torpedoed and sunk by the U.S. submarine *Greenling* on October 14th, 1942, off Kamaishi, Japan.

TALAMBA

British India Steam Nav. Co.; 1924; *Hawthorn, Leslie & Co.*; 8,018 tons; 450-8x60-3x29-7; 1,376 n.h.p.; triple-expansion engines.
The British steamship *Talamba*, in service as a hospital ship and fully illuminated at the time, was bombed and sunk by a German aircraft at 10 p.m. on July 10th, 1943, three miles off Avola anchorage, Sicily. The 400 wounded on board were taken off by other ships and only five of the crew of 168 were killed.

TALAVERA

H.Scholefield&Son; 1886; *J. L. Thompson & Sons*; 1,628 tons; 260 X 37-1x16-4; 150 h.p.; triple-expansion engines. The British steamship *Talavera* was wrecked near Cape Finisterre on October 20th, 1888, while on a voyage from Braila to Antwerp carrying a cargo of grain.

TALCA

Pacific Steam Navigation Co.; 1900; *W. Beardmore & Co.*; 1,018 tons; 209-9x35-1x15-6; 100 r.h.p.; triple-expansion engines.
The British steamship *Talca* was wrecked on Puchoco Reef, near Coronel, on July 13th, 1901. She was on a voyage from Corral to Valparaiso.

TAKU

German Navy, destroyer; 1899; *Germany*; 280 tons; 8 ft. draught; 6,000 i.h.p.; 30 knots; triple-expansion engines; two 4pr., 2 T.T.
The German destroyer *Taku* was one of a flotilla of vessels blown up and abandoned by the Germans on the fall of the fortress of Tsingtau on November 7th, 1914. The ship carried a complement of 50 and was of little fighting value. A full account of the ships lost at Tsingtau will be found under the light cruiser *Cormoran*, which was also destroyed by the Germans before surrendering.

TALISMAN

Mississippi River steamboat.
The Mississippi river steamboat *Talisman* was sunk by collision with another steamboat on the night of November 19th, 1847. The collision took place on the lower Mississippi when the *Talisman* was crossing the stream. She sank with the loss of over 50 lives.

TALLEYRAND

W. Wilhelmsen; 1927; *Deutsche Werke A.G.*; 6,732 tons; 461-4x60-6x29; 1,352 n.h.p.; oilengines. The Norwegian motorship *Talleyrand* was intercepted by a German raider on August 1st, 1940, about 800 miles S.E. of Mauritius on a voyage from Sydney, N.S.W., to Table Bay.
The crew were taken aboard the motorship *Tirranna*, a supply ship accompanying the raider, and the *Talleyrand* sunk by explosive charges.

On September 22nd the *Tirranna* was torpedoed and sunk by a British submarine ten miles S. of Bordeaux, three of the crew of the *Talleyrand*, together with men taken off other captured ships, were killed.

Oddly enough the *Tirranna* was owned by the same owners as the *Talleyrand*.

TALLINN

U.S.S.R.; 1918; *Skinner & Eddy Corp.*; 5,996 tons; 409-6X 54-2x27-1; turbine engines.
The steamship *Tallinn* was formerly the *West Cressey*, one of the many ships lent by the American Government to Russia in the Second World War. She foundered during a severe storm in September, 1946, near Cape Kamtschatsky.

TALOOKDAR

T. & J. Brocklebank; 1885; *Harland & Wolff*; 2,120 tons; 292-6x39-7x23-5.
The sailing ship *Talookdar*, on a voyage from Calcutta to London, was sunk by collision with the German steamship *Libussa*, 1,781 tons, outward bound to South America, on December 13th, 1890. Twenty-two lives were lost, eight survivors were landed at Pernambuco by the *Libussa* ten days later.

TALTAL

R. Torres y Cia.; 1889; *W. B. Thompson & Co.*; 1,196 tons; 243x33-7x15-9; 258 n.h.p.; triple-expansion engines. The Chilean steamship *Taltal*, on a voyage from Puerto Bonio to Corral, foundered in heavy weather on July 13th, 1942, near Huafo Island, South Chile. All on board were lost, 40 crew and seven passengers.

TAMA

Japanese Navy, light cruiser; 1920; *Mitsubishi*; 5,100 tons; 535x46-7x15-7; 70,000s.h.p.; 33 knots; turbine engines; Kanpon boilers; seven 5-5 in. guns, two 3 in., 2 m.g., 8 T.T. 80 mines, 1 aircraft.
The light cruiser *Tama* was a unit of the Japanese Northern Force in the action off Cape Engano which was part of the battle of Leyte Gulf, October 23rd-26th, 1944. The Northern Force comprised two battleships, four aircraft carriers, five cruisers and six destroyers. In the action, which was mainly fought out between ships and aircraft, the four aircraft carriers were sunk as well as the *Tama*. The light cruiser was sunk by torpedoes from the U.S. submarine *Jallao*, the other vessels sunk were lost by bombing.

The normal complement of the *Tama* was 439.
For further details of the Cape Engano action, see the aircraft carrier *Zuikaku*. The full story of the battle of Leyte Gulf is told under the battleship *Musashi*.

TAMA MARU

Nippon Yusen K.K.; 1918; Matsuo Iron Works & Dockyard; 3,052 tons; 311 x 44 - 2 X 27; 262 n.h.p.; triple-expansion engines. The steamship *Tama Maru* was torpedoed and sunk by the U.S. submarine *Guavina* on July 4th, 1944, off Angaur Island, Caroline Islands.

TAMAGAWA MARU

Toyo Kaiun K.K.; 1938; Mitsubishi Jukogyo K.K.; 6,441 tons; 439-4x58-3x32; 1,167n.h.p.; oilengines. The steamship *Tamagawa Maru* was torpedoed and sunk by the U.S. submarine *Seadragon* on February 2nd, 1942, W. of Luzon Island,

TAMAHIME MARU

Hamane Shoten K.K.; 1918; R. Thompson & Sons; 3,080 tons; 331 - 3X46 - 8X23 - 2; 429n.h.p.; triple-expansion engines. The steamship *Tamahime Maru* was torpedoed and sunk by the U.S. submarine *Shark* on June 5th, 1944, about 300 miles W. of the Ladrone Islands.

TAMAHOKO MARU

Kaiyo Risen K.K.; 1919; Harima Dockyard Co.; 6,780 tons; 425x53-6x37-5; 555 n.h.p.; triple-expansion engines. The steamship *Tamahoko Maru* was torpedoed and sunk by the U.S. submarine *Tang* on June 24th, 1944, off Shimodo, Japan.

TAMANAMI

Japanese Navy, destroyer; 1942; Japan; 2,200 tons; 415 x 35X—; 34 knots; turbine engines; six 5 in. guns, eight 25mmAA, 15 T.T.

The Japanese destroyer *Tamanami* was torpedoed and sunk off the island of Mindoro in the Philippines by the U.S. submarine *Mingo* on July 7th, 1944. The destroyer carried a complement of over 200.

TAMANDARE

Lloyd Brasileiro; 1919; American International S.B. Corp.; 4,942 tons; 390x54-2x27-6; turbine engines. The Brazilian steamship *Tamandare* was torpedoed and sunk by a German submarine on July 26th, 1942, on a voyage from Pernambuco to La Guaira.

TAMASHIMA MARU

Iino Risen K.K.; 1940; Mitsubishi Jukogyo K.K.; 3,560 tons; 343-9x48-2x27-9; steam engines. The steamship *Tamashima (Tamasimd) Maru* was torpedoed and sunk by the U.S. submarine *Spearfish* on January 30th, 1944, about 200 miles N.E. of the Ladrone Islands.

TAMATSUMARU

Osaka Shosen K.K.; 9,589 tons. The steamship *Tamatsu Maru* was torpedoed and sunk by the U.S. submarine *Spadefish* on August 19th, 1944, about 150 miles W. of Negra Point, Luzon Island, Philippines.

TAMAULIPAS

Mexico Shipping & Trading Co.; 1919; Bethlehem S.B. Corp.; 6,943 tons; 434'8x56-2x31-7; 422 n.h.p.; triple-expansion engines.

The American tanker *Tamaulipas* was torpedoed and sunk by a German submarine at 12.29 a.m. on April 10th, 1942, on a voyage from Tampico to New York with 10,000 tons of gas oil.

TAMBOUR

U.S. Maritime Commission; 1918; Fredrikstad Mek. Verksted; 1,811 tons; 264-6x42-1x17-7; 150 n.h.p.; triple-expansion engines.

The Panamanian steamship *Tambour* was torpedoed and sunk by a German submarine on September 26th, 1942, between Paramaribo and Trinidad. The captain and seven others were lost.

TAMISHIMA MARU

Iino Kisen K.K.; 1939; Tsurumi Seitetsu Zosen; 1,931 tons; 269x40x20-3; 228 n.h.p.; triple-expansion engines. The steamship *Tamishima (Tamisima) Maru* was bombed and sunk by U.S. land-based aircraft on July 28th, 1943, 50 miles N.W. of Tavoy Island, Burma.

TAMON MARU

Hachiuma Kisen K.K.; 1919; Asano S.B. Co.; 8,156 tons; 445 x 58x40; 703 n.h.p.; triple-expansion engines. The steamship *Tamon Maru* was torpedoed and sunk by the U.S. submarine *Stingray* on May 2nd, 1943, about 100 miles off Santua, China.

TAMON MARU No. 5

Hachiuma Kisen K.K.; 1911; Mitsubishi Dockyard & Engineering Works; 5,260 tons; 400 X51x32-4; 578 n.h.p.; triple-expansion engines. The steamship *Tamon Maru No. 5* was torpedoed and sunk by the U.S. submarine *Wahoo* on May 7th, 1943, off Tamagawa, Japan.

TAMON MARU No. 6

Hachiuma Kisen K.K.; 4,994 tons. The steamship *Tamon Maru No. 6* was torpedoed and sunk by the U.S. submarine *Nautilus* on September 28th, 1942, off the north east coast of Honshu Island, Japan.

TAMON MARU No. 8

Hachiuma Kisen K.K.; 2,705 tons. The steamship *Tamon Maru No. 8* was torpedoed and sunk by the U.S. submarine *Cabrilla* on January 4th, 1944, off Cap Padaran, Indo-China.

TAMON MARU No. 12

Hachiuma Kisen K.K.; 2,220 tons. The steamship *Tamon Maru No. 12* struck a mine and sank on April 8th, 1945, off Shanghai.

TAMON MARU No. 15

Hachiuma Kisen K.K.; 6,925 tons. The steamship *Tamon Maru No. 15* struck a mine and sank on January 26th, 1945, off Hone Cape, Indo-China.

TAMON MARU No. 16

Hachiuma Kisen K.K.; 6,886 tons. The steamship *Tamon Maru No. 16* struck a mine and sank on August 12th, 1945, about 100 miles N.W. of Iki Retto Island, Japan.

TAMPA

United States Navy, revenue cutter; 1912; United States; 1,181 tons; 190x32x13; 13 knots; single screw engines; three 6 pdr. guns. The United States coastguard cruising cutter *Tampa* was engaged in convoy duty in the English Channel on September 26th, 1918, when she was torpedoed and sunk by a German submarine.

TAMSUI

China Navigation Co.; 1880; Scott & Co.; 1,424 tons; 250-2 x 31 - 3x23 - 1; 169 n.h.p.; compound engines. The British steamship *Tamsui* was wrecked in Huknang Channel, Yangtze River, on August 24th, 1919, while carrying a cargo of beancake from Hankow to Swatow.

TANDA

Eastern & Australian S.S. Co.; 1914; A. Stephen & Sons; 7,174 tons; 430-5x58-2x28-6; 843 n.h.p.; triple-expansion engines.

The British steamship *Tanda*, on a voyage from Melbourne to Bombay, was torpedoed and sunk by a Japanese submarine on July 15th, 1944, E. of the Laccadive Islands. Eighteen of the crew and one passenger were lost.

TANDA MARU

Tanda Shokai K.K.; 1941; Osaka Zosenho; 1,339 tons; 226 - 8x35 - 9x11 - 8; triple-expansion engines. The steamship *Tanda Maru*, on a voyage from Hokkaido Island to Tokyo, was driven ashore and sunk in a gale on December 27th, 1955, off Hachinoe, near Otaru. Ten of her crew of 31 were lost.

TANGIER

Sir T. V. S. Angler; 1888; W. Doxford & Sons; 1,863 tons; 265 x 37 x 17-4; 171 n.h.p.; triple-expansion engines. The British steamship *Tangier* was wrecked on September 11th, 1904, near Bayonne while on a voyage from the Tyne to Boucau with a cargo of coal.

TANGISTAN

S trick Line; 1906; W. Gray & Co.; 3,738 tons; 350x49-2x 16-3; 341 n.h.p.; 12 knots; triple-expansion engines. The steamship *Tang is tan* was torpedoed by a German submarine nine miles N. of Flamborough Head at just after midnight on March 9th, 1915. The ship carried a crew of 38, of whom only one survivor was picked up.

TANGO MARU

2,046 tons.

The tanker *Tango Mam* was torpedoed and sunk by the U.S. submarine *Rasher* on November 8th, 1943, in the Straits of Macassar.

TANGO MARU

Nippon Yusen K.K.; 1905; Mitsubishi Dockyard & Engineering Works; 6,893 tons; 445-9x51-8x33-5; 789 n.h.p.; triple-expansion engines.

The steamship *Tango Maru* was sunk by war causes on November 13th, 1943, in the East China Sea.

TANGO MARU

Japanese Government; 6,200 tons.

The steamship *Tango Maru* was torpedoed and sunk by the U.S. submarine *Rasher* on February 25th, 1944, about 150 miles N.W. of Kudat, North Borneo.

TANGYANG MARU

Toa Kaiun K.K.; 1,573 tons.

The steamship *Tangyang Maru* was bombed and sunk by U.S. land-based aircraft on March 8th, 1945, in the Yangtze River.

TANIMBAR

Stoomvaart Maats. Nederland; 1930; Caledon S.B. & E. Co.; 8,169 tons; 468-7x62-2x32-5; 1,450 n.h.p.; oilengines. The Dutch motorship *Tanimbar* was torpedoed, bombed and sunk by German aircraft on June 14th, 1942, S. of Sardinia on a voyage from the Clyde to Malta. Twenty-three of her crew were lost.

TANIKAZE

Japanese Navy, destroyer; 1940; Fujinagata; 2,000 tons; 364 x 35 x 11; 45,000 s.h.p.; 34 knots; turbine engines; Kanpon boilers; six 5 in. guns, 2 m.g.; 8 T.T.

The Japanese destroyer *Tanikaze* was patrolling in the Sibutu Passage, Philippine Islands, on June 9th, 1944, when she was attacked and sunk by the U.S. submarine *Harder*. The destroyer carried a complement of over 200.

TANKEXPRESS

S. Herlofson & Co.; 1937; Gotaverken A/B; 10,095 tons; 496-1x64-4x38-7; 1,025 n.h.p.; oilengines. The Norwegian motorship *Tankeexpress* was torpedoed and sunk by a German submarine on July 25th, 1942, about 600 miles W. of Sierra Leone.

TANNENBERG

German Government; 1935; Stettiner Oderwerke A.G.; 5,504 tons; 398x51x24-2; 2,000 n.h.p.; turbine engines. The steamship *Tannenberg* was in a convoy attacked by Russian warships on July 11th, 1941. In taking evasive action the convoy ran into a minefield off the south east coast of Sweden and the *Tannenberg* struck a mine and sank.

TANNHAUSER

H. Vogemann; 1944; 1,923 tons.

The German *Tannhauser* was bombed and sunk by British aircraft on July 8th, 1944, S.W. of Heligoland.

TANTALLON CASTLE

Union-Castle Mail S.S. Co.; 1894; Fair field Co.; 5,636 tons; 440'3x50-5x23-9; 1,129 n.h.p.; quadruple-expansion engines. The British steamship *Tantallon Castle* was wrecked in fog on Robben Island, at the entrance to Table Bay, on May 7th, 1901. She was on a voyage from Southampton to Table Bay carrying a general cargo.

TAORMINA

Navigazione Generale Italiana; 1873; Gour lay Bros.; 1,594 tons; 264-4x32-7x24-1; 412 h.p.; compound engines. The Italian steamship *Taormina* on a voyage from Constantinople to Italy, was sunk by collision with the Greek steamship *Thessalia*, 2,400 tons, off Cape Sunion, Greece, at 2 a.m. on September 12th, 1891. Thirteen of the crew and 27 passengers were lost.

TARA

The Admiralty; 1900; W. Denny & Bros.; 1,862 tons; 329 x 39x15; 21 knots; triple-expansion engines; three 6 pdr. guns. The armed boarding ship *Tara*, Capt. R. S. Gwatkin-Williams, was formerly the *Hibernia* of the London & North Western Railway Co., taken over by the Admiralty in 1914. After serving at home for some months she was sent to the Mediterranean where she was attached to the Western Section of the Egyptian Coast Patrol.

On November 5th, 1915, when making for Soilum she was torpedoed and sunk by the German submarine *U 35*, Lt. Cdr. W. Kophamel. Of her complement of 109, a party of 95, including Capt. Gwatkin-Williams, took to the boats and was towed to Bardia by the *U 35*, where they became prisoners of the Turks. Ten of the crew were lost.

TARAKAN MARU

Mitsubishi Kisen K.K.; 5,135 tons.

The tanker *Tarakan Maru* was torpedoed and sunk by the U.S. submarine *Sea Robin* on January 6th, 1945, 75 miles N.E. of Lokwei, Hainan Island.

TARAMUNG

J. Pater son & Co.; 1880; Russell & Co.; 1,281 tons; 246-5 x 33-6x16-5; 130 n.h.p.; compound engines. The Australian steamship *Taramung* left Newcastle, N.S.W., on May 30th, 1891, for Melbourne. Nothing more was ever heard of the ship or her crew of 23 and she was considered to have been lost, probably off Cape Gabo, in a gale which developed on the 31st.

TARANGER

Westfall Larsen & Co.; 1930; Burmeister & Wain; 4,873 tons; 398-1x54-8x26-1; 624 n.h.p.; oilengines. The Norwegian motorship *Taranger* was torpedoed and sunk by a German submarine on May 2nd, 1941, about 800 miles E. of Cape Farewell on a voyage from Liverpool to Los Angeles.

TARAPACA

Ant. Dom. Bordes & Fils; 1886; W.S. Thompson; 2,506 tons; 305x44-6x23-3.

The French sailing ship *Tarapaca* was sunk by a German submarine in the Bay of Biscay on September 1st, 1917.

TARARUA

Union Steamship Co. of New Zealand; 1864; Gour lay Bros.; 828 tons; 222-6x28x16-2; 155 n.h.p.; 11 knots; compound engines.

On April 29th, 1881, the steamship *Tararua* was wrecked on the Waipapapa Reef, between Dunedin and the Bluff, at the southern extremity of South Island. The ship carried 122 persons, of whom only 20 were saved, being 11 crew and nine steerage passengers. The breakers on the Reef had scarcely been seen before the vessel struck, her bow protruding high out of the water and her stern submerged. The seas were very heavy and many people were washed overboard soon after the wreck. The steamship *Kakanui* appeared at about seven in the evening, but although she stood by she could do nothing and eventually steamed off to bring help.

In the middle of the night those on shore heard the cracking of the *Tararua's* structure and by daybreak the ship had disappeared.

TARIFA

W. Wilhelmsen; 1936; F. Schichau G.m.b.H.; 7,229 tons; 493-6x63-3x29; 1,827 n.h.p.; oilengines.

The Norwegian motorship *Tarifa* was torpedoed and sunk by a submarine on March 7th, 1944, about 500 miles E. of Cape Gardafui.

TARRAGONA

Naviara delNalon, Soc. Anon.; 1920; V. de Kuy & V. de Rees; 825 tons; 180-9x28-4x14-6; triple-expansion engines. The Spanish steamship *Tarragona*, on a voyage from Gijon to Bordeaux with pyrites, sank after an explosion in the engine room on September 6th, 1959, near Royan in the Gironde Estuary. Thirteen of her crew of 20 were lost.

TARSUS

Turkish Government; 1931; New York S.B. Co.; 9,451 tons; 475-4x61-8x27-9; turbine engines.

On December 14th, 1960, the tanker *World Harmony* collided with the tanker *Petar Zoranic* in the Bosphorus. Both ships, locked together and burning fiercely, drifted onto the passenger steamship *Tarsus*, lying at anchor near Istinye, and set her on fire. The ship burned for most of the day, and smoldered for some days afterwards, by which time she was completely burnt out. Altogether 52 lives were lost from the three ships, including some Customs officials on board the *Tarsus*, and many persons badly burned.

TARTAR PRINCE

Prince Line; 1895; Short Bros.; 3,272 tons; 342-7x43-2x18-8; 376 n.h.p.; triple-expansion engines.

The British steamship *Tartar Prince* was destroyed by fire on November 25th, 1902, two days out from St. Vincent, C.V., on a voyage from New York to East London carrying cattle and a general cargo.

TARUSHIMA MARU

Hamane Shoten K.K.; 1938; Osaka Iron Works; 4,865 tons; 369-8x54-1x29-2; turbine engines.

The steamship *Tarushima (Tarusim) Maru* was torpedoed and sunk by the U.S. submarines *Whale* and *Seawolf* January 17th, 1944, about 400 miles S.W. of Iwojima Island.

TARUYASU MARU

Japanese Government; 1912; Scot ts'S.B. &E. Co.; 10,254 tons; 506x60-3x39-5; 586 n.h.p.; triple-expansion engines. The steamship *Taruyasu Maru* was formerly the British *Talhybius*, captured by the Japanese at Singapore. She struck a mine and sank on July 30th, 1945, off Toyama, Japan.

TASKER H. BLISS

U.S. Navy; 1921; Newport News S.B. &D.D. Co.; 12,568 tons; 517x72-2x27-8; 3,105 n.h.p.; turbine engines. The United States steamship *Tasker H. Bliss* was formerly the liner *President Cleveland*, taken over by the U.S. Navy for use as a transport. She was torpedoed and sunk by the German submarine *U-130* on November 12th, 1942. The attack took place in the Fedhala Roads, Casablanca, where several other American vessels were sunk at, or about, the same time.

For full story see *Joseph Hewes*.

TASMAN

The Shipping Controller (Federal Steam Navigation Co.); 1912; Earless Co.; 5,023 tons; 392x49x26; 470 n.h.p.; 12 knots; triple-expansion engines.

The steamship *Tasman* was torpedoed and sunk by a German submarine on September 16th, 1918, when 220 miles N. by W. of Cape Villano. The captain and 13 of the crew were lost.

TASMANIA

Peninsular & Oriental Steam Navigation Co.; 1884; J. Caird & Co.; 4,488 tons; 400-3x45-2x28-9; 4J95 i.h.p.; 14-5 knots; inverted compound engines.

The P. & O. liner *Tasmania*, Capt. Perrin, was on her homeward voyage from Bombay to London with 120 passengers and a crew of 161. On March 12th, 1887, the ship left Port Said for Marseilles, and on Sunday the 17th was off the coast of Corsica. At about

4 a.m., when steaming at 13 knots, she struck with terrific force on a group of rocks known as Les Moines off Point Roccapina. The fore part of the vessel up to within a few yards of the mizzen mast plunged under water and the passengers and crew were forced to seek refuge right aft. There was a heavy sea running and four of the eight boats were stove in but between six o'clock and 9.30 most of the women and children were got away. During this time the captain and the first officer, Mr. Newman, were washed overboard and drowned. The remaining passengers, some 80 in number, took refuge in the smoking room, which was only 18 feet square.

At daybreak on the morning of the 18th the steam yacht *Norseman* and the French ship *Perseverant* came to the rescue. These vessels managed to get most of the survivors ashore in safety. The total number lost was 34, including Capt. Perrin.

TASMANIA

Huddart, Parker & Co.; 1892; C. S. Swan & Hunter; 2,252 tons; 286x38-5x20-9; 362 n.h.p.; 14 knots; triple-expansion engines.

The Australian steamship *Tasmania*, Capt. T. McGee, was one of the finest vessels engaged in the Australia—New Zealand east coast trade. She was, for those waters, a fast vessel, and contemporary opinion judged the accommodation for her 200 passengers to be on a handsome scale. All this drew much attention to the ship.

Her usual run was from Sydney to Auckland, Gisborne, Napier, Wellington, Lyttelton and Dunedin. On the afternoon of July 29th, 1897, she arrived in Gisborne roadstead, having experienced a southerly gale all the way from Australia, despite which she had made a fast run. High seas in Poverty Bay made it impossible to call at Gisborne and she continued to Napier, attended by thick weather. The captain, who had been on the bridge all day, had gone below leaving the third officer in charge, and no misgiving was felt as to the ship's position and she continued on her course at full speed.

At just before 11 p.m. the third officer notified the captain that land was in sight, and the captain coming on to the bridge ordered the ship's course to be changed to seaward. This order came too late and she grounded, but without any great force.

The boats were at once lowered, those on the weather side being difficult to launch as the ship lay broadside on to the sea. In all six boats were got out and pulled away from the wreck without incident, but the two small boats, one in charge of the carpenter and one in charge of the quartermaster, capsized in the surf when attempting a landing. The remaining four, which were large lifeboats, came ashore safely along the coast near Gisborne.

In all 12 members of the crew and one passenger were drowned.

TASMANIA

Soc. Anon. Ilva; 1900; W. Doxford & Sons; 3,662 tons; 342-3X46-7x25; 286 n.h.p.; triple-expansion engines. The Italian steamship *Tasmania* was torpedoed and sunk by a German submarine in the English Channel on October 3rd, 1917.

TASMANIA MARU

Okada Gumi K.K.; 1919; Kawasaki Dockyard Co.; 4,106 tons; 345 x48x 30; 356 n.h.p.; triple-expansion engines. The steamship *Tasmania Maru* was bombed and sunk by U.S. land-based aircraft on December 11th, 1944, off the west coast of Leyte Island, Philippines.

TASSO

R. MacAndrew & Co.; 1874; J. Readhead & Co.; 1,669 tons; 260 x 33 - 9 x 22 • 6; 140 h.p.; compound-inverted engines. The British steamship *Tasso* was wrecked on the He de Sein, near Brest, on March 5th, 1886, while on a voyage from Antwerp to the River Plate carrying a cargo of sugar and iron.

TASSO

Bolivian General Enterprise; 1904; Campbeltown S.B. Co.; 1,859 tons; 272x40x19-3; 264 n.h.p.; 10 knots; triple-expansion engines. The British steamship *Tasso* was torpedoed and sunk by a German submarine five miles S. from Groix Island on March 17th, 1917, on a voyage from Manchester to La Pallice with munitions. The captain and 18 men were lost.

TASSO

Ellermari's Wilson Line; 1938; Swan, Hunter & Wigham Richardson; 1,586 tons; 283-9x40-2x15-8; 335 n.h.p.; triple-expansion engines & L.P. turbine.

The British steamship *Tasso*, on a voyage from Demerara to Oban with greenheart logs, was torpedoed and sunk by a German submarine on December 2nd, 1940, about 450 miles W. of Inish-trahull. Five of the crew were lost.

TATARRAX

Standard Transportation Co.; 1914; Scotts S.B. & E. Co.; 6,216 tons; 420x55-2x33; 570 n.h.p.; quadruple-expansion engines.*

The British tanker *Tatarrax* sank after an explosion in lat. 32° N., long. 30° 45' E., on August 11th, 1918. She was on a voyage from Port Said to Alexandria carrying a cargo of benzole.

TATEBE MARU

Japanese Government; 1911; Nederlandsche Scheepsbouw. Maats.; 4,519 tons; 383-6x48-6x26-8; 436 n.h.p.; triple-expansion engines.

The steamship *Tatebe Mam* was formerly the Dutch *Van Cloon*, seized by the Japanese. She was bombed and sunk by U.S. carrier-based aircraft on January 12th, 1945, 25 miles N.E. of Binh-Dinh, Indo-China.

TATEBU MARU

Japanese Government; 6,816 tons.

The steamship *Tatebu Maru* was bombed and sunk by U.S. carrier-based aircraft on December 5th, 1943, off Lae Island, Marshall Islands.

TATEISHI MARU

Ukon Shoji K.K.; 1922; Yokohama Dock Co.; 3,801 tons; 345 x 50x29; 351 n.h.p.; triple-expansion engines. The steamship *Tateishi (Tateisi) Maru* was bombed and sunk by U.S. land-based aircraft on October 3rd, 1944, 25 miles N.W. of Jolo Island, Philippines.

TATEKAWA MARU

Kawasaki Risen K.K.; 1935; Kawasaki Dkyd. Co.; 10,090 tons; 503x65x37-1; 2,115 n.h.p.; oilengines.

The tanker *Tatekawa Maru* was torpedoed and sunk by the U.S. submarine *Gurnard* on May 24th, 1944, off the southern extremity of Mindanao Island, Philippines.

TATEKAWA MARU No. 2

Kawasaki Risen K.K.; 10,045 tons.

The tanker *Tatekawa Maru No. 2* was bombed and sunk by U.S. land-based aircraft on February 22nd, 1945, about 80 miles S.E. of Cana, Indo-China.

TATEYAMA MARU

Kita Nippon Kisen K.K.; 1937; Hakodate Dock Co.; 1,990 tons; 272 -3x40-0x21-0; compound engines & L.P. turbine.

The steamship *Tateyama Maru* was torpedoed and sunk by the U.S. submarine *Pickrel* on February 15th, 1943, off Ofunato, Japan.

TATEYAMA MARU

Baba Shoji K.K.; 1937; Mitsui Bussan Kaisha; 3,787 tons; 340-4x48-2x26-2; triple-expansion engines.

The steamship *Tateyama Maru* was bombed and sunk by U.S. carrier-based aircraft on December 5th, 1943, off Lae Island, Marshall Islands.

TATEYAMA MARU

Nishi Nippon Kisen; 1,148 tons.

The steamship *Tateyama Maru* was torpedoed and sunk by the U.S. submarine *Sterlet* on March 1st, 1945, 25 miles S.W. of Yokosuka.

TATHRA

Illawarra & South Coast S.N. Co.; 1907; Scott of Kinghorn; 483 tons; 170-3x27-1x9-4; 90r.h.p.; triple-expansion engines.

The Australian steamship *Tathra* was bound from Sydney, N.S.W. to the New Hebrides. During the voyage she encountered extremely rough weather and became unmanageable. On January 4th, 1912, when off Ambryn Island, New Hebrides, she foundered with the loss of 24 persons.

TATSUTA

*Japanese Navy, light cruiser; 1918; Sasebo; 3,230 tons; 468 X 40-7x13; 51,000 s.h.p.; 31 knots; turbine engines; Kanpon boilers; four 5-5 in. guns, one 3 in.A.A., 2 m.g., 6 T.T. The light cruiser *Tatsuta* was torpedoed and sunk S.W. of Haehijo by the U.S. submarine *Sandlance* on March 13th, 1944. The normal complement of the *Tatsuta* was 332.*

TATSUAKIMARU

Tatsuuma Kisen K.K.; 2,766 tons.

The steamship *Tatsuaki Maru* was torpedoed and sunk by the U.S. submarine *Peto* on November 12th, 1944, about 200 miles E. of Shanghai.

TATSUBATOMARU

Tatsuuma Kisen K.K.; 5,396 tons.

The steamship *Tatsubato Maru* was bombed and sunk by U.S. carrier-based aircraft on January 12th, 1945, 25 miles N.E. of Binh-Dinh, Indo-China.

TATSUCHIYOMARU

Tatsuuma Kisen K.K.; 6,873 tons.

The steamship *Tatsuchiyo Maru* was bombed and sunk by U.S. land-based aircraft on May 6th, 1945, S.W. of Mokpo, Korea.

TATSUEIMARU

Tatsuuma Kisen K.K.; 1,942 tons.

The steamship *Tatsuei Maru* was sunk by U.S. carrier-based aircraft on July 4th, 1944, off the Bonin Islands.

TATSUFUKUMARU

Tatsuuma Kisen K.K.; 1939; Kawaminami Kogyo K.K.; 1,946 tons; 271-7x40x20-3; 150 n.h.p.; triple-expansion engines. The steamship *Tatsufuku (Tatuhuku) Maru* was torpedoed and sunk by the U.S. submarine *Seal* on May 28th, 1942, off Kudat, North Borneo.

TATSUHA MARU

Tatsuuma Kisen K.K.; 1918; Russell & Co.; 5,784 tons; 423 -3 x 56x28-7; 550 n.h.p.; triple-expansion engines. The steamship *Tatsuha (Tatuha) Maru* was sunk by U.S. carrier-based aircraft on February 17th, 1944, in the Caroline Islands.

TATSUJU MARU

Tatsuuma Kisen K.K.; 1,944 tons.

The steamship *Tatsuju Maru* was torpedoed and sunk by the U.S. submarine *Tang* on October 23rd, 1944, about 80 miles W. of Hsinchu, Formosa.

TATSUKAMIMARU

Tatsuuma Kisen K.K.; 1939; Mitsubishi Jukogyo K.K.; 7,064 tons; 441 -5x58-5x32-8; turbine engines. The Japanese transport *Tatsukami Maru* was torpedoed and sunk by U.S. destroyers in the action off Balikpapan on January 24th, 1942. She blew up and sank immediately. The story of the action is told under the *Kuretake Maru*.

TATSUMIYA MARU

Tatsuuma Kisen K.K.; 1938; Mitsubishi Jukogyo K.K.; 6,343 tons; 410-9x56-1x30-7; 750 n.h.p.; turbine engines. The steamship *Tatsumiya (Tatumiyd) Maru* was sunk by U.S. carrier-based aircraft on July 30th, 1945, in the Korea Strait.

TATSUNAN MARU

Tatsuuma Risen K.K.; 6,417 tons.
The steamship *Tatsunan Maru* struck a mine and sank on April 17th, 1943, S.W. of Bougainville Island, Solomon Islands.

TATSUNO MARU

Nippon Yusen K.K.; 1916; *Kawasaki Dockyard Co.*; 6,960 tons; 445 X 55 x 34; 628 n.h.p.; triple-expansion engines. The steamship *Tatsuno (Tatuno) Maru* was torpedoed and sunk by the U.S. submarine *Thresher* on January 15th, 1944, about 50 miles N. of Luzon Island, Philippines.

TATSUSHIRO MARU

Tatsuuma Risen K.K.; 6,886 tons.
The steamship *Tatsushiro Maru* was torpedoed and sunk by the U.S. submarine *Cod* on October 5th, 1944, in the Mindoro Strait, 30 miles N. of Busuanga Island, Philippines.

TATSUTA MARU

Nippon Yusen K.K.; 1930; *Mitsubishi Zosen Kaisha*; 16,975 tons; 560 x 72x42 -5; 4,008 n.h.p.; oil engines. The liner *Tatsuta (Tatutd) Maru*, serving as a transport, was torpedoed and sunk by the U.S. submarine *Tarpon* on February 8th, 1943, about 200 miles S. of Yokohama.

TATSUTAGAWA MARU

Toyo Kaiun K.K.; 1,923 tons.
The steamship *Tatsutagawa Maru* was bombed by U.S. carrier-based aircraft and sunk by gunfire on June 12th, 1944, about 200 miles E. of Iwojima Island.

TATSUTAKE MARU

Tatsuuma Goshi Kaisya; 1939; *Mitsubishi Jukogyo K.K.*; 7,068 tons; 441 -5x58-5x32-8; 600 n.h.p.; turbine engines. The steamship *Tatsutake (Tatutake) Maru* was torpedoed and sunk by the U.S. submarine *Plunger* on May 10th, 1943, N.E. of Guam Island.

TATSUTSUYUMARU

Naigai Kisen K.K.; 2,220 tons.
The steamship *Tatsutsuyu Maru* struck a mine and sank on June 28th, 1945, off Shimonoseki.

TATSUURA MARU

Tatsuuma Kisen K.K.; 6,420 tons.
The steamship *Tatsuura Maru* was sunk by U.S. carrier-based aircraft on November 13th, 1944, in Manila Bay.

TATSUWA MARU

Shimihon Kisen K.K.; 1937; *Mitsubishi Jukogyo K.K.*; 6,313 tons; 410-8x56x30-7; turbine engines.
The steamship *Tatsuwa Maru* left Maulmain on May 2nd, 1954, for Kobe with a cargo of rice. On the 10th she sent a distress signal stating that her hatches had been stove in during a typhoon and that she was waterlogged, giving a position near Parcel Island. A widespread search by ships and U.S. naval aircraft failed to find any trace of the ship or her crew.

TATSUWA MARU

Tatsuuma Goshi Kaisha; 1937; *Mitsubishi Jukogyo K.K.*; 6,335 tons; 410-9x56x30-7; 750 n.h.p.; turbine engines. The steamship *Tatsuwa (Tatuwa) Maru* struck a mine and sank on May 10th, 1945, in the Inland Sea of Japan.

TAURANGA

7567; *H.Niccol*; 95tons; 116x17-1x7-6; 75 h.p.; 9-5 knots; compound engines.
The New Zealand steamship *Tauranga*, Capt. Colger, was in the Hauraki Gulf, between Point Rodney and Sail Rock on the night of July 23rd, 1870, when she was sunk by collision with the schooner *Enterprise*, Mr. Willis, with a cargo of coal.

The schooner struck the steamship near the engine room and sank her immediately. The violence of the collision so damaged the

schooner that she also sank within a short time. Her crew escaped in the boat, which was without rowlocks; this hampered them in their search for survivors but they eventually reached land.

No news of either vessel came to hand for many days, but eventually the ship *Kenilworth* took off a dog from Sail Rock and identified it as having come from the steamship. From this it was concluded that she had foundered.

TAURUS

Bergenske Dampskibsselskab; 1902; *Campbeltown S.B. Co.*; 1,238 tons; 230-1x32-8x16-3; 120 n.h.p.; triple-expansion engines.

The Norwegian steamship *Taurus* was torpedoed and sunk by a German submarine in the North Sea on September 8th, 1918.

TAURUS

W. Wilhelmsen; 1935; *Akers Mek. Verksted*; 4,767 tons; 408-6x55-3x25-2; 748 n.h.p.; oilengines. The Norwegian motorship *Taurus* was bombed and sunk by German aircraft on June 6th, 1941, in the Firth of Forth.

TAY

Antwerp Steamship Co.; 1875; *Barclay, Curie & Co.*; 656 tons; 194-3x28-1x16-1; 127 n.h.p.; compound engines. The steamship *Tay*, Capt. Fegan, left Antwerp on March 19th, 1901, for London, and put into Flushing to shelter from heavy weather. On the 21st, while at anchor, she was sunk by collision with the German steamship *Chemnitz*, 2,758 tons. Capt. Fegan and most of the crew were lost, two survivors were picked up by a pilot boat.

TAYLEUR

Pilkington & Wilson's White Star Line; 1853; *Bank-quay Foundry Co.*; 1,977 tons; 250x40x21.
The sailing vessel *Tayleur*, Capt. Noble, sailed from Liverpool for Melbourne on her maiden voyage with a company of 652 persons, of whom 71 were crew. Many of the passengers were bound for the goldfields of Australia.

The vessel was the largest sailing ship ever built in Britain up to that time. She left port on Thursday, January 19th, 1854, and encountered rough weather as soon as she emerged into the Irish Sea. The weather grew worse during the night and on Friday it was too thick for observations to be taken; it was also discovered that the compasses were inaccurate and the steering gear defective. Added to these troubles was the fact that the crew was largely composed of Chinese and Lascar seamen who were far from satisfactory.

The captain failed to exercise sufficient care in working the vessel down the Irish Sea and by Saturday morning at about 11.30 in thick weather she was on a dead lee shore. With visibility reduced to a few yards the *Tayleur* dropped two anchors and attempted to ride out the gale. Both cables snapped almost immediately, and no other anchors being available the ship drifted onto the rocks. The difficulties of the situation were now increased by the panic of the Chinese and Lascar members of the crew. The boats could not be launched owing to the broken water, but one passenger managed to swim to the shore with a line. By clinging to this a number of people were saved, but many were drowned in the attempt. Finally the *Tayleur* was washed back by a heavy sea and sank in deep water, taking with her 380 persons.

TAZAN MARU

Kokoku Kisen K.K.; 1919; *Columbia River S.B. Corp.*; 5,478 tons; 410-5x54x30-2; 579 n.h.p.; turbine engines.
The steamship *Tazan Maru* was torpedoed and sunk by the U.S. submarine *Skipjack* on May 17th, 1942, in Camranh Bay, Indo-China.

TEA

Soc. Commerciale Italiana; 1914; *Cantieri Navali Riuniti*; 5,395 tons; 394-7x51-7x27-4; 336n.h.p.; triple-expansion engines.
The Italian steamship *Tea* was torpedoed and sunk by a German submarine off the N.W. coast of Africa on February 16th, 1918.

TEANE

Turner Edwards & Co.; 1911; Sunderland Shipbuilding Co.; 884 tons; 205x30-5x12-8; 129 n.h.p.; 9-5 knots; tricompound inverted direct-acting engines.

The steamship *Teane*, Capt. A. F. Newbury, left Swansea for Oporto on January 25th, 1928, with a cargo of 999 tons of coal. She carried a crew of 15. On the same afternoon as she left port the *Teane* passed Lundy Island and that was the last seen of her. No information of any kind came to hand regarding her and she was eventually posted as missing.

TEDDINGTON

William Milburn & Co.; 1880; Swan & Hunter; 2,017 tons; 287x36-1x23-9; 235 h.p.; compound engines. The British cargo ship *Teddington* struck a rock and sank on June 9th, 1887, near Avocet Rock, Aden. She was on a voyage from Bombay to the U.K. carrying a cargo of wheat.

TEELIN HEAD

Ulster Steamship Co.; 1883; Workman, Clark & Co.; 1,718 tons; 275-4x35-3x18-1; 187 n.h.p.; 8-5 knots; compound engines. The steamship *Teelin Head* was torpedoed and sunk by a German submarine 12 miles SSW. of the Owers Light vessel on January 21st, 1918. The captain and 12 of the crew were lost.

TEESBRIDGE

North of England Steamship Co.; 1905; R. Stephenson & Co.; 3,898 tons; 340-6x47-2x20; 291 n.h.p.; 9 knots; triple-expansion engines.

The steamship *Teesbridge* sailed from South Shields on December 20th, 1928, and loaded china clay at Fowey for Philadelphia. She was under command of Capt. R. E. Laws and carried a crew of 30. Nothing of note was heard of her after leaving England until January 20th, 1929, when she sent out an S.O.S. call from a position some 300 miles E. of Cape Race. The call was picked up by the British steamship *Maine*, Capt. Hutchinson, which at once went to her assistance. The position given was lat. 48°31' N., long. 48°W., but after cruising in this area for some time Capt. Hutchinson decided that the *Teesbridge* must have foundered, and he continued on his course.

TEESDALE

Sir R. Ropner & Co.; 1904; Ropner & Son; 2,470 tons; 310x44-2x20-4; 258 n.h.p.; triple-expansion engines. The British steamship *Teesdale* foundered three miles N. of Salt-burn pier on August 2nd, 1917. She had previously arrived at Plymouth on a voyage from the Tyne to Gibraltar, but was proceeding to the Tees for repairs. She was carrying a cargo of coal.

TEIA MARU

Japanese Government; 1932; Forges et Chantiers de la Mediterranee; 17,537 tons; 543-5x69-6x33-6; 2,490 n.h.p.; oil engines. The motorship *Teia Maru* was formerly the French liner *Aramis*, taken over by the Japanese for use as a transport. She was torpedoed and sunk by the U.S. submarine *Rasher* on August 19th, 1944, about 150 miles W. of Negra Point, Luzon Island, Philippines.

TEIAN MARU

Japanese Government; 1928; R. Duncan & Co.; 5,387 tons; 403 x 52 • 4 x 27 • 5; 512 n.h.p.; triple-expansion engines. The steamship *Teian Maru* was formerly the Yugoslav *Tomislav*, seized by the Italians and renamed *Venezia Giulia*, later taken over by the Japanese. She was torpedoed and sunk by the U.S. submarine *Pollack* on January 9th, 1942, off Tateyama, Japan.

TEIBI MARU

Japanese Government; 1926; J. C. Tecklenborg A.G.; 10,086 tons; 455-8x60-8x41; turbine engines. The steamship *Teibi Maru* was formerly the French liner *Bernardin de St. Pierre*, taken over by the Japanese for use as a transport. She was torpedoed and sunk by the U.S. submarine *Bonfish* on October 10th, 1943, off the coast of Indo-China.

TEIBO MARU

Japanese Government; 1923; Burmeister & Wain; 4,472 tons; 380x53-9x25-3; 629 n.h.p.; oil engines.

The motor vessel *Teibo Maru* was formerly the Danish *Nordbo*, taken over by the Japanese at Kobe on July 13th, 1942. She was torpedoed and sunk by the U.S. submarine *Sargo* on September 25th, 1942, about 100 miles off Cap St Jacques, Indo-China.

TEIFU MARU

Japanese Government; 1913; Forges et Chantiers de la Mediterranee; 7,110 tons; 414x53-8x34-8; 416 n.h.p.; triple-expansion engines.

The steamship *Teifu Maru* was formerly the French *Bougainville* taken over by the Japanese. She was sunk by U.S. carrier-based aircraft on January 21st, 1945, off Kaohsiung, Formosa.

TEIFUKU MARU

Japanese Government; 1921; Norddeutscher Werft; 5,198 tons; 401-5x53-2x27-5; 400 n.h.p.; triple-expansion engines. The steamship *Teifuku Maru* was formerly the German *R. C. Rickmers*, chartered by the Japanese. She was torpedoed and sunk by the U.S. submarine *Trigger* on December 22nd, 1942, off Tateyama, Japan.

TEIHOKU MARU

Japanese Government; 1935; Ateliers & Chantiers de France; 5,795 tons; 446-9 x 57-1x25-7; 793 n.h.p.; oil engines. The motorship *Teihoku Maru* was formerly the French *Persee*, taken over by the Japanese. She was torpedoed and sunk by the U.S. submarine *Jallao* on August 11th, 1945, in the Sea of Japan.

TEIKA MARU

Japanese Government; 8,009 tons. The steamship *Teika Maru* was formerly the French *Cap Varella*, taken over by the Japanese. On May 7th, 1945, she struck a mine and sank off Karatsu, Japan.

TEIKAI MARU

Japanese Government; 1924; A.G. Weser; 7,691 tons; 458-8 x 57-6x31-3; 1,493 n.h.p.; oil engines. The *Teikai Maru* was formerly the German *Fulda*, taken over by the Japanese. She was bombed and sunk by U.S. land-based aircraft on December 30th, 1944, 50 miles S.W. of Cape Bolinao, Philippines.

TEIKIN MARU

Japanese Government; 1919; Napier & Miller; 1,972 tons; 270-1x37-8x15-9; 196 n.h.p.; triple-expansion engines. The steamship *Teikin Maru* was formerly the French *Kindia*, chartered by the Japanese. On July 27th, 1943, she struck a mine and sank off the north west coast of Hainan.

TEIKO MARU

Japanese Government; 1924; Chantiers & Ateliers de la Gironde; 15,105 tons; 543-5x65x41-4; 1,044 n.h.p.; triple-expansion engines.

The steamship *Teiko Maru* was formerly the French liner *D'Artagnan*, chartered by the Japanese for use as a transport. She was torpedoed and sunk by the U.S. submarine *Puffer* on February 22nd, 1944, off the Natuna Islands.

TEIKON MARU

Japanese Government; 1913; Howaldtswerke A.G.; 5,113 tons; 385-9x52-4x28-5; 331 n.h.p.; quadruple-expansion engines. The tanker *Teikon Maru* was formerly the German *Winnnetou*, taken over by the Japanese. She was torpedoed and sunk by the U.S. submarine *Puffer* on August 12th, 1944, off the west coast of Mindoro Island, Philippines.

TEIKYU MARU

Japanese Government; 1930; Howaldtswerke A.G.; 2,332 tons; 281-2x41-9x21-9; 227 n.h.p.; triple-expansion engines. The steamship *Teikyu Maru* was formerly the Danish *Gustav*

Diederichsen, seized by the Japanese. She was torpedoed and sunk by the U.S. submarine *Guardfish* on September 2nd, 1942, off Hakodate, Japan.

TEIREN MARU

Japanese Government; 1909; Nederlandsche Scheepsbouw Maats.; 3,044 tons; 328-5x43-9x22-6; 233 n.h.p.; triple-expansion engines.

The *Teiren Maru* was formerly the French *Gouverneur General A. Varenne*, chartered by the Japanese Government on May 16th, 1942. She was bombed and sunk by U.S. land-based aircraft on December 1st, 1943, off Hong Kong.

TEIRITSU MARU

Japanese Government; 1922; Soc. Provengale de Constructions Navales; 9,877 tons; 454-7x61x37-4; 596 n.h.p.; triple-expansion engines.

The steamship *Teiritsu Maru* was formerly the French liner *Leconte de Lisle*, taken over by the Japanese for use as a transport. She struck a mine and sank on July 28th, 1945, off Maizuru, Japan.

TEIRYU MARU

Japanese Government; 1915; Northumberland S.B. Co.; 6,512 tons; 419-8x53-4x36-1; 682 n.h.p.; triple-expansion engines. The steamship *Teiryu Maru* was formerly the German *Augsburg*, taken over by the Japanese. She was torpedoed and sunk by the U.S. submarine *Guardfish* on July 19th, 1944, about 200 miles off the north-west coast of Luzon Island, Philippines.

TEISEN MARU

Japanese Government; 1917; Irvine's S.B. & D.D. Co.; 5,050 tons; 418-7x53-4x27-7; 686 n.h.p.; triple-expansion engines. The steamship *Teisen Maru* was formerly the German *Ursula Rickmers*, taken over by the Japanese. She was torpedoed and sunk by the U.S. submarine *Flasher* on May 3rd, 1944, about 200 miles E. of Hone Cohe, Indo-China.

TEISHO MARU

Hamburg Amerika Linie; 1921; Flensburger Schiffsbau. Ges.; 7,974 tons; 471-2x58-2x32-4; 558 n.h.p.; triple-expansion engines.

The steamship *Teisho Maru* was formerly the German *Havenstein*, chartered by the Japanese. On October 12th, 1944, she was sunk by U.S. carrier-based aircraft off Kaohsiung, Formosa.

TEISHU MARU

Japanese Government; 1938; Schiffsbau Ges. Unterweser; 1,230 tons; 249 x 34-7x14; 322 n.h.p.; oil engines. The motorship *Teishu Maru* was formerly the German *Quito*, taken over by the Japanese Navy for use as a submarine tender. On April 29th, 1945, she was torpedoed and sunk by the U.S. submarine *Bream* in the Java Sea.

TEISHUN MARU

Japanese Government; 1902; Schiffswerft v. Henry Koch; 2,251 tons; 297-6x39-5x20; 167 n.h.p.; triple-expansion engines.

The steamship *Teishun Maru* was formerly the French *Tai Seun Hong*, chartered by the Japanese. She was torpedoed and sunk by the U.S. submarine *Haddock* on August 26th, 1942, about 100 miles from Foochow.

TEISON MARU

Teikoku Sempaku; 7,007 tons. The transport *Teison Maru* was torpedoed and sunk by the U.S. submarine *Finback* on October 14th, 1942, about 100 miles W. of Keelung, Formosa.

TEIUN MARU

Teikoku Kisen K.K.; 1920; Bremer Vulkan; 1,615 tons; 237-8 x 35-9x19-5; 106 n.h.p.; triple-expansion engines. The steamship *Teiun Maru* struck a mine and sank on January 1st, 1942, off the west coast of Luzon Island, Philippines.

TEIYO MARU

Teikoku Sempaku K.K.; 1924; Blohm & Voss; 6,869 tons; 449-1x58-3x26-8; turbine engines.

The steamship *Teiyo Maru* was bombed and sunk by U.S. and Australian land-based aircraft on March 3rd, 1943, in the Straits of Macassar.

TEIYO MARU

Nippon Tanker K.K.; 1931; Yokohama Dock Co.; 9,849 tons; 492-2x64x 39-2; 2,340 n.h.p.; oil engines. The tanker *Teiyo Maru* was torpedoed and sunk by the U.S. submarine *Rasher* on August 18th, 1944, about 150 miles W. of Negra Point, Luzon Island, Philippines.

TEIYU MARU

Japanese Government; 1918; Ropner & Sons; 5,753 tons; 395-5x52-2x27-8; 490 n.h.p.; triple-expansion engines. The steamship *Teiyu Maru* was formerly the Italian *Carignano*, taken over by the Japanese. She was sunk by U.S. carrier-based aircraft on November 13th, 1944, in Manila Bay.

TEIZUI MARU

Japanese Government; 1927; A.G. Weser; 5,428 tons; 508-5 x 63-7x30-2; 7,000 n.h.p.; triple-expansion engines & L.P. turbine.

The steamship *Teizui Maru* was formerly the German *Mosel*, taken over by the Japanese on November 2nd, 1942. She struck a mine and sank on April 18th, 1945, off Yawata, Japan.

TEJA

A.Haverbeck; 1877; Palmers'Co.; 1,249 tons; 220-6x31-1x 17; 119 n.h.p.; triple-expansion engines.

The Chilean steamship *Teja*, on a voyage from Tocopilla to Punta de Lobos, struck a rock and sank on April 25th, 1923, 50 miles S. of Iquique.

TEKAPO

Union S.S. Co. of New Zealand; 1881; R. Steele & Co.; 2,439 tons; 291-5x38-1x26-2; 283 n.h.p.; compound engines. The New Zealand steamship *Tekapo* was wrecked at Maroubra Bay, N.S.W., on May 16th, 1899. She was on a voyage in ballast from Sydney to Port Kembla, N.S.W.

TEKKAI MARU

Harada Kisen K.K.; 1939; Kawaminami Kogyo K.K.; 1,925 tons; 271-7x40-0x20-3; 150 n.h.p.; triple-expansion engines. The steamship *Tekkai Maru* was torpedoed and sunk by the U.S. submarine *Haddock* on November 3rd, 1942, about 200 miles off Nagasaki.

TEKLA

Dampsk. Torm A/S; 1920; Helsingors Jernkib & Maskin.; 1,469 tons; 249-5x38-1x15; 158 n.h.p.; triple-expansion engines.

The Danish steamship *Tekla* was torpedoed and sunk by a German submarine on January 21st, 1940, on a voyage from Burntisland to Aarhus. Nine of the crew were lost and nine saved.

TELA

Empresa Hondurena de Nav. 1927; Workman, Clark & Co.; 3,882 tons; 342 x48x28-2; 406 n.h.p.; triple-expansion engines. The Honduran steamship *Tela* was torpedoed and sunk by a German submarine on June 8th, 1942, between New Orleans and Port Limon. Eleven of the crew were lost.

TELAMON

Koninklijke Nederlandsche Stoomb. Maats. 1928; A. G. Neptun; 2,078 tons; 285-7x44-7x17-7; 156 n.h.p.; triple-expansion engines.

The Dutch steamship *Telamon* was torpedoed and sunk by the German submarine *U-160* on July 24th, 1942, between Demerara and Trinidad. The captain and 22 others were lost.

TELEGRAPH

McIndoe & Co.; 1841; Hedderwick & Ransome; 100 tons; 118-6x14-9x4-6; 15 knots; compound engines. The passenger steamship *Telegraph* was a new and very fast vessel

TELESILLA

built at a time when rivalry between steamboat owners was very keen. She was equipped with a high pressure engine and was advertised to run between Glasgow and Greenock in record time. On March 21st, 1842, three months after coming into service, she was casting off from the quay at Helensburgh when her boiler exploded. The boiler and engine were hurled bodily out of the hull. The hull itself disintegrated so that there was scarcely a plank of more than a few feet remaining. Eighteen of the crew and passengers were killed outright, including the captain and Mr. Hedderwick, whose firm constructed the vessel. Seven other people died later from their injuries and there were a number of minor casualties.

TELESILLA

R. Gordon & Co.; 1877; E. Withy & Co.; 1,174 tons; 230X 31-6x17-3; 145 n.h.p.; compound engines.

The British cargo ship *Telesilla* was wrecked near North Queensferry at 10 p.m. on September 14th, 1896, while on a voyage from Grangemouth to Hamburg carrying a cargo of coal.

TELL

Cie. de Nav. Mixte; 1938; Kaldnes Mek. Verksted; 1,349 tons; 294-4x42-2x15-7; compound engines & LP. turbine. The

Norwegian steamship *Tell* was torpedoed and sunk by a German submarine on July 11th, 1943, S.E. of Corsica.

TELMA

Abo Shipping A/B; 1883; Short Bros.; 1,865 tons; 275x38-6X—; 224 n.h.p.; compound engines. The Finnish steamship *Telma* was sunk by ice on December 30th, 1939, outside Oulu.

TELNES

D/S A/S Nor; 1936; Rosenbergs Mek. Verksted; 1,694 tons; 260-8x41-2x17-4; 145 n.h.p.; compound engines & L.P. turbine. The Norwegian steamship *Telnes* left New York on January 9th,

1940, for Antwerp and Rotterdam. Nothing more was heard of the ship or her crew of 18 and she was considered to have probably been lost by war causes.

TEMBIEN

I. Messina & C.; 1914; Rickmers Werft; 5,584 tons; 417x53-2x27-5; 500 n.h.p.; triple-expansion engines. The Italian steamship *Tembien* was torpedoed and sunk by a German submarine on February 27th, 1942, 24 miles from Tripoli.

TEMBIEN I

Chinese Italian Nav. Co.; 1913; Hong Kong & Whampoa Dock Co.; 3,439 tons; 291-6x53-1x10; 424 n.h.p.; triple-expansion engines.

The Italian steamship *Tembien I* was bombed and sunk on June 30th, 1945, near Tatung, Yangtze River.

TEMPLE BAR

Lambert Bros.; 1928; W. Hamilton & Co.; 4,291 tons; 390X 52x24-6; 436 n.h.p.; triple-expansion engines. The British cargo ship *Temple Bar* struck a rock and sank off Carroll Island, 20 miles S. of Cape Flattery, on April 8th, 1939, while carrying a cargo of scrap iron from Miami to Yokohama.

TEMPLE MEAD

Temple S.S. Co.; 1928; W. Pickersgill & Sons; 4,427 tons; 391-2x53x24-8; 445 n.h.p.; triple-expansion engines. The British steamship *Temple Mead*, on a voyage from Rosario to the U.K. with grain, was bombed and sunk by German aircraft on January 21st, 1941, about 300 miles W. of Inishtrahull. Fourteen of the crew were lost.

TEMPLE MOAT

Temple S.S. Co.; 1928; W. Pickersgill & Sons; 4,427 tons; 391-2x53x24-8; 445 n.h.p.; triple-expansion engines. The British cargo ship *Temple Moat*, carrying a crew of 42 and a cargo of coal, sailed from Blyth on December 24th, 1940, on a voyage to Buenos Aires. She was damaged in an attack by a German aircraft on January 5th, 1941, which killed one of the

crew, and she put in to the Gareloch on January 9th. After repairs the *Temple Moat* resumed her voyage from the Clyde on February 19th, but four days later she reported that she had sighted a German submarine in lat. 59° IT N., long. 20° 20' W. Nothing more was ever heard of the ship.

TENACE

I. Messina & C.; 1881; J. Laing; 1,142 tons; 239-8x32-6x 14-3; 161 n.h.p.; compound engines.

The Italian steamship *Tenace* was shelled and sunk by British warships on May 8th, 1941, three and a half miles off Benghazi.

TENBY

R. Ropner & Co.; 1898; Ropner & Son; 3,969 tons; 336-5X 46-5x25-6; 319 n.h.p.; triple-expansion engines.

The British steamship *Tenby* was wrecked off Emmahaven, Sumatra, on August 14th, 1904, while on a voyage from Cheribon to Port Said carrying a cargo of sugar.

TENEDOS

British Navy, destroyer; 1918; Hawthorn Leslie; 905 tons; 276x26-7x10-9; 27,000 s.h.p.; 36 knots; turbine engines;

Yarrow boilers; three 4 in. guns, 6 m.g., 4 T.T. The destroyer *Tenedos* was lying off Colombo on April 5th, 1942, when she was bombed and sunk by Japanese dive-bombers. She carried a complement of about 100.

TENEI MARU

Nitto Risen K.K.; 10,241 tons.

The tanker *Tenet Maru* was sunk by U.S. carrier-based aircraft on January 16th, 1945, about 50 miles S. of Hong Kong.

TENKAI MARU

Shimatani Kisen K.K.; 1917; Mitsubishi Dockyard & E. Works; 3,203 tons; 305x43-7x27-2; 261 n.h.p.; triple-expansion engines.

The steamship *Tenkai Maru* was torpedoed and sunk by the U.S. submarine *Swordfish* on September 5th, 1943, 300 miles off the north coast of New Guinea.

TENMEI MARU

Hakuyo Kisen Kabushiki Kaisha; 1889; Harland & Wolff; 3,360 tons; 345-6x42-2x24-5; 271 n.h.p.; triple-expansion engines.

The Japanese steamship *Tenmei Maru* was shelled and sunk by a submarine in the Mediterranean on August 10th, 1916.

TENNAN MARU

Nippon Seitetsu K.K.; 5,407 tons.

The steamship *Tennan Maru* was torpedoed and sunk by the U.S. submarine *Silver sides* on October 24th, 1943, 400 miles N. of the Schouten Islands, New Guinea.

TENNESSEE

Ministry of War Transport (Common Bros.); 1921; A/S Baitica Vcerft; 2,342 tons; 302x44-2x20-3; 212 n.h.p.; triple-expansion engines.

The British steamship *Tennessee*, on a voyage from the St. Lawrence to the Tyne with wheat, was torpedoed and sunk by a German submarine on September 22nd, 1942, about 500 miles E.S.E. of Cape Farewell. Ten of the crew and five gunners were lost.

TENPEI MARU

Hakuyo Kisen K.K.; 1918; Osaka Iron Works; 6,094 tons; 407-2x50-8x32-5; 553 n.h.p.; triple-expansion engines. The steamship *Tenpei (Tempei) Maru* was torpedoed and sunk by the U.S. submarine *Ray* on May 22nd, 1944, S.W. of Basilan Island, Philippines.

TENPOSAN MARU

Sngaya Shoji K.K.; 1,970 tons.

The steamship *Tenposan Maru* was torpedoed and sunk by the U.S. submarine *Silver sides* on December 29th, 1943, N.W. of the Palau Islands.

TENRYOMARU

Tatsunami Shosen K.K.; 1938; *Kawaminami Kogyo K.K.*; 2,231 tons; 257-1x40-4x23; 294n.h.p.; triple-expansion engines.

The steamship *Tenryo Mam* was torpedoed and sunk by the U.S. submarine *Sterlet* on May 29th, 1945, in the La Perouse Strait, Japan.

TENRYU

Japanese Navy, light cruiser; 1918; *Yokosuka*; 3,230 tons; 468x40-7x13; 51,000 s.h.p.; 31 knots; turbine engines; *Kanpon boilers*; four 5-5 in. guns, one 3 in., 2 m.g., 6 T.T. The old Japanese light cruiser *Tenryu* was torpedoed and sunk in the Bismarck Sea by the U.S. submarine *Albacore* on December 18th, 1942. The cruiser's normal complement was 332.

TENRYUMARU

Naigai Risen K.K.; 1936; *Osaka Iron Works*; 4,861 tons; 365-8x54-1x29-2; 433 n.h.p.; turbine engines. The steamship *Tenryu Maru* was bombed and sunk by U.S. carrier-based aircraft on December 25th, 1943, off the north west coast of New Ireland.

TENRYUGAWA MARU

Toyokaiun K.K.; 3,883 tons. The steamship *Tenryugawa Mam* was sunk by U.S. carrier-based aircraft on June 12th, 1944, about 150 miles W. of the Ladrone Islands.

TENSHA MARU No. 11

Kambara Risen R.R.; 1958; *Tsuneishi Zosen*; 499 tons; 161-6x27-3x12-9; oilengines. The motorship *Tensha Maru No. 11* capsized and sank during a storm on December 27th, 1958, off Shiraishi, Aichi Prefecture, Japan. Twelve of the crew of 13 were lost.

TENSHIN MARU

7,500 tons. The *Tenshin Maru* was bombed and sunk by U.S. land-based aircraft on January 17th, 1944, off the north west coast of New Guinea.

TENSHIN MARU

Nippon Yusosen R.R.; 5,061 tons. The tanker *Tenshin Maru* was torpedoed and sunk by the U.S. submarine *Lapon* on July 31st, 1944, off the south west coast of Palawan Island, Philippines.

TENSHINMARU

Zuiko Shosen R.R.; 1918; *Canadian Vickers*; 4,236 tons; 380-5x48-6x29-7; 474 n.h.p.; triple-expansion engines. The steamship *Tenshin (Tensin) Maru* was torpedoed and sunk by the U.S. submarine *Icefish* on October 24th, 1944, about 150 miles N.W. of Luzon Island, Philippines.

TENSHINZAN MARU

Mitsui Sempaku R.R.; 6,886 tons. The steamship *Tenshinzan Maru* was torpedoed and sunk by the U.S. submarine *Gurnard* on May 6th, 1944, 50 miles N.W. of Menado, Celebes.

TENSHOMARU

Shako Shosen R.R.; 1914; *D. & W. Render son & Co.*; 5,013 tons; 402-3x52x29-8; 435 n.h.p.; triple-expansion engines. The steamship *Tensho (Tensyo) Maru* was sunk by U.S. carrier-based aircraft on November 11th, 1944, off the west coast of Cebu Island, Philippines.

TENSHOMARU

Sugaya R.R.; 1910; *Blyth S.B. & D.D. Co.*; 3,035 tons; 314-0x 45-7x21-1; 272n.h.p.; triple-expansion engines. The steamship *Tensho Maru* was sunk by U.S. carrier-based aircraft on August 9th, 1945, about 50 miles S. of Seishin, Manchuria.

TENTERDEN

Australasian United S.N. Co.; 1883; *Campbell, Macintosh & JBowstead*; 1,339 tons; 246-5x33-5x19-9; 140 h.p.; compound engines.

The Australian steamship *Tenterden* was wrecked on December 23rd, 1893, at MacDonnell Bay, S. Australia.

TENYO MARU

Toyo Kisen K.K.; 1935; *Mitsubishi Jukogyo K.K.*; 6,843 tons; 435x58-5x32-8; 839 n.h.p.; oilengines. The motorship *Tenyo Maru* was taken over by the Japanese Navy for use as a minesweeper. On March 10th, 1942, she was destroyed by U.S. carrier-based aircraft off Lae, New Guinea.

TENYU MARU

Dairen Sugaya Keitei Shokai; 1905; *R. Stephenson & Co.*; 3,738 tons; 340-1x47-1x20; 340 n.h.p.; triple-expansion engines.

The steamship *Tenyu Maru* was torpedoed and sunk by the U.S. submarine *Guardfish* on September 4th, 1942, off Tamagawa, Japan.

TENZAN MARU

Dairen Kisen K.K.; 2,776 tons. The steamship *Tenzan Maru* was torpedoed and sunk by the U.S. submarine *S 37* on July 8th, 1942, off Rabaul.

TENZAN MARU

Nippon Yusen K.K.; 1920; *Burntisland S.B. Co.*; 3,142 tons; 331-6x46-7x24-8; 433 n.h.p.; triple-expansion engines. The steamship *Tenzan Maru* was sunk by collision with the steamship *Kobe Maru*, 7,938 tons, on November 11th, 1942, 90 miles E. of the Yangtze estuary.

TERAMO

Italian Government; 1920; *Grangemouth Dockyard Co.*; 1,599 tons; 253-3x37-4x18-4; 192 n.h.p.; triple-expansion engines. The steamship *Teramo* was formerly the French *Marie Therese le Borgne*, taken over by the Italians. On April 28th, 1943, she was bombed and sunk by British aircraft off Cap Bon.

TERGESTEA

G. L. Premuda Soc. Anon, di Nav.; 1926; *Cantiere Navale Triestino*; 5,890 tons; 416-7x53-1x24-7; 369 n.h.p.; triple-expansion engines. The Italian steamship *Tergeste* was torpedoed and sunk by a British submarine on October 26th, 1942, near Tobruk.

TERJE VIKEN

W. Wilhelmsen; 1902; *Tyne Iron S.B. Co.*; 3,579 tons; 335x 48x25-4; 292 n.h.p.; triple-expansion engines. The Norwegian steamship *Terje Viken* struck a mine and sank off the coast of Portugal on April 17th, 1916.

TERJE VIKEN

United Whalers; 1936; *Deutsche Schiff-u. Maschinenbau A.G.*; 20,638 tons; 607-3x80-2x40-4; 1,248 n.h.p.; triple-expansion engines & L.P. turbine. The British whale oil refinery tanker *Terje Viken*, on a voyage from Glasgow to Curacao in ballast, was torpedoed by a German submarine at 4.5 a.m. on March 7th, 1941, and again at 4.50 a.m., about 400 miles W. of the Shetland Islands. The ship turned turtle and remained afloat for some days before sinking. No lives were lost.

TERKOELEI

Nederlandsch-Indische Maats. voor Zeevaart I; 1923; *Blohm & Voss*; 5,158 tons; 407x56x25-9; 634 n.h.p.; turbine engines. The Dutch steamship *Terkoelei* was torpedoed and sunk by a German submarine on March 17th, 1943, on a voyage from New York to Swansea. Thirty-four of the crew and two gunners were lost.

TERLINGS

Lambert Bros.; 1937; *Lithgows*; 2,318 tons; 283-5x44-4x21-6; 179 n.h.p.; triple-expansion engines. The British steamship *Terlings*, on a voyage from London to

TERMINI

Sydney, N.S., in ballast, was bombed and sunk by German aircraft on July 21st, 1940, ten miles S.W. of St. Catherine's Point. Ten of the crew were lost.

TERMINI

Italian Government; 1906; Scheepswerfvoorheen Jan Smit, Czn.; 1,523 tons; 265-9x36x18-3; 169n.h.p.; triple-expansion engines.

The German steamship *Termini*, which had been requisitioned by the Italian Government, struck a mine and sank in the Mediterranean on March 21st, 1918.

TERM

Italian Government; 1931; Ateliers & Chantiers de Bretagne; 2,998 tons; 330'6x43-1x23-4; turbine engines. The steamship *Termi* was formerly the French *Azrou*, taken over by the Italians. On June 16th, 1943, she was torpedoed and sunk by an Allied submarine off Augusta.

TERRA

Vulcan Shipping Co.; 1888; Ropner & Son; 2,801 tons; 314x40-5x20-1; 303 n.h.p.; triple-expansion engines. The British cargo ship *Terra* was wrecked at Chateau Letoc, Alderney on June 11th, 1910, while on a voyage from the Tyne to Genoa carrying a cargo of coal.

TERROR

British Navy, survey vessel; 1813; Topsham; 326 tons; 102-3x27-2x12-9; 20 n.h.p.; 6 knots; steam engines. The *Terror* was one of two ships comprising Sir John Franklin's expedition to the Arctic in 1845, the other being *Erebus*.

In 1838 *Terror*, then commanded by Capt. George Back, was badly crushed in the ice in Hudson's Bay and made a remarkable passage home in a badly damaged condition. She was thoroughly overhauled and sent to sea again with the Antarctic Expedition of Sir James Ross, 1839-43.

The *Terror* was commanded by Capt. Francis R. M. Crozier, who was second in command to Franklin, and assumed the leadership after the death of the latter in 1847. Her crew comprised 67 officers and men and she left Greenhithe in company with her consort on May 19th, 1845.

The ships were last sighted by the whaler *Prince of Wales* on July 26th, 1845, in about lat. 74° 48' N, long. 66° 13' W. It became known later that they were caught in the ice in September, 1846, and were abandoned in April, 1848. Not one man of the whole expedition survived.

For the full account of this expedition see *Erebus*.

TERROR

Spanish Navy, destroyer; 1896; Clydebank; 300 tons; 220 x 22x5-6; 6,000 i.h.p.; 28 knots; two 12 pdr. guns, two 6 pdr., two 1 pdr., 2 T.T.

The Spanish destroyer *Terror* was a unit of the Spanish Atlantic Squadron under Admiral Cervera in the Spanish-American War of 1898. She developed engine trouble on the voyage across the Atlantic to Cuba, and left the squadron for Martinique, where she effected repairs. Later, on June 22nd, 1898, in company with the light cruiser *Infanta Isabel*, she was off San Juan, Puerto Rico, when she fell in with the U.S. auxiliary cruiser *St. Paul*, 11,629 tons, 5 in. guns, and a sharp action developed. The Spanish ships were forced to run for harbour, and the *Terror* was hit in the engine room, severely damaging the engines and killing the Engineer-Lt. and many men. She ran aground under the guns of the shore batteries, where she became a total wreck.

TERROR

British Navy, monitor; 1916; Harland & Wolff; 7,200 tons; 405 x 88 x 11; 6,000 i.h.p.; 12 knots; triple-expansion engines; Babcock boilers; two 15 in. guns, eight 4 in., two 3 in., 10 smaller. The monitor *Terror*, Cdr. H. J. Haynes, D.S.C., was a veteran of the First World War. She was sent to the Mediterranean during the Second World War to operate off the coast of Libya, where her two 15 in. guns were of great service in supporting the right flank of the

British army against the Italian forces. On February 22nd, 1941, she was attacked off Derna by German dive-bombers and badly damaged, sinking on the following day.

TERUKAWA MARU

Kawasaki Risen K.K.; 1934; Odense Staalskibsverft A. P. Moller; 6,429 tons; 458-2x58x29-9; 1,026 n.h.p.; oil engines. The motorship *Terukawa Maru* was torpedoed and sunk by the U.S. submarine *Skate* on December 21st, 1943, N. of Hall Island, Caroline Islands.

TERUKUNIMARU

Nippon Yusen K.K.; 1930; Mitsubishi Zosei Kaisha; 11,930 tons; 507x64x37; 2,492 n.h.p.; 16 knots; oil engines. The liner *Terukuni Maru*, Capt. Matsukura, with 28 passengers and a crew of 177 struck a mine one and a half miles off the Sunk Lightship on Tuesday, November 21st, 1939. The explosion occurred in Nos. 2 and 3 holds and the vessel began to sink. Eight boats were lowered and 206 persons, including the pilot, were safely landed. The *Terukuni Maru* sank in 45 minutes.

TERUKUNIMARU

Harada Risen K.K.; 1899; R. Napier & Sons; 3,588 tons; 352x42-2x19-8; 469 n.h.p.; triple-expansion engines. The steamship *Terukuni Maru* was sunk by U.S. carrier-based aircraft on October 18th, 1944, about 40 miles N. of Luzon Island, Philippines.

TERUSHIMAMARU

Iino Risen R.R.; 1937; Harima S.B. & Eng. Co.; 3,110 tons; 323-4x46x25; turbine engines. The steamship *Terushima (Terusima) Maru* was taken over by the Japanese Navy and converted into an auxiliary gunboat. On May 18th, 1943, she was torpedoed and sunk by the U.S. submarine *Pollack*.

TERUTSUKI

Japanese Navy, destroyer; 1941; Japan; 2,500 tons; 435 x 38 x—; 34 knots; turbine engines; eight 5 in. guns, 4 T.T. The Japanese destroyer *Terutsuki* was one of a flotilla of 11 destroyers steaming toward Guadalcanal on the night of December 11th, 1942. The flotilla was dive-bombed by U.S. planes and five destroyers were hit, the remainder held on their course. Shortly after midnight American light naval craft, including motor torpedo boats attacked the flotilla and the *Terutsuki* was torpedoed and sunk off New Georgia. Two other destroyers were damaged. The Americans lost one motor torpedo boat. The *Terutsuki* carried a complement of over 200.

TESHIO MARU

Ohi Sempaku; 2,840 tons. On March 30th, 1944, the steamship *Teshio Maru* was attacked by U.S. carrier-based aircraft and sunk off Babelthua, Palau Islands.

TESTBANK

Bank Line; 1937; J. Readhead & Sons; 5,083 tons; 423-7x56-7x24-8; 524 n.h.p.; triple-expansion engines. The British steamship *Testbank* was lying alongside the mole at Bari when, on December 2nd, 1943, the port was attacked by German aircraft. Another ship lying close by was hit and blew up, this explosion destroyed the *Testbank*. Seventy of her crew of 75 were lost.

TETI

SocietdltalianadiNav.Lucania; 1921; Bacini & Scali Napoletani; 5,396 tons; 385-1x51-7x27-2; turbine engines. The Italian steamship *Teti*, on a voyage from Huelva to Baltimore with iron ore, foundered in heavy weather on October 31st, 1922, 14 miles S. of Ponta Delgado.

TETI NOMICOU

Loucas Nomicos; 1902; Schiffswerftv. Henry Koch; 1,882 tons; 281 x 40 • 4 X18 • 1; 180 n.h.p.; triple-expansion engines. The Greek steamship *Teti Nomicou* was bombed and sunk by German aircraft on April 19th, 1941, at Chalkis, during the invasion of Greece.

TETSUWA MARU

Nitto Risen K.K.; 1,951 tons.
The steamship *Tetsuwa Maru* was bombed and sunk by U.S. land-based aircraft on November 16th, 1943, off Canton.

TETSUZAN MARU

Osaka Shosen K.K.; 1939; *Kawaminami Kogyo K.K.*; 1,922 tons; 271-7x40x20-3; 150n.h.p.; triple-expansion engines. The steamship *Tetsuzan (Tetzuzan) Maru* was bombed and sunk by U.S. land-based aircraft on January 22nd, 1943, off Rabaul.

TETSUZAN MARU

Hashimoto Risen K.K.; 1919; *Hashimoto Shipyard*; 2,018 tons; 285x38x22; 150 n.h.p.; triple-expansion engines. The steamship *Tetsuzan (Tetzuzari) Maru* was sunk by U.S. carrier-based aircraft on October 10th, 1944, off the Ryukyu Islands.

TEUCER

Ocean S.S. Co.; 1877; *Scott & Co.*; 2,057 tons; 316-1x35-2x26; 300 h.p.; compound-inverted engines.
The British steamship *Teucer*, Capt. Power, was wrecked off Ushant on May 31st, 1885, while on a voyage from Singapore to Amsterdam carrying a general cargo.

TEUTON

Union Line; 1869; *W. Denny & Bros.*; 2,313 tons; 332-9x34-3x25; 300 h.p.; 10 knots; compound engines. The *Teuton* Capt. Manning, left Cape Town at 10 a.m. on August 30th, 1881, on her voyage from England to Algoa Bay with 272 persons on board. At 7 p.m. on the same day she was four miles off Quoin Point, near Cape Agulhas. Twenty minutes later in a calm sea the *Teuton* struck on a rock quite clearly charted and known to all navigators.

An examination of the ship's hull showed that although a considerable amount of water was flowing in, the situation was not desperate. The vessel was divided into six watertight compartments and this was held to render her sufficiently seaworthy to reach Simons town. Passengers were assembled aft and volunteers were called for from among the men to work the pumps, and the boats were swung out and lowered to the rail and provisioned. Meanwhile the ship continued slowly under steam, but settling by the head till, by 10 p.m., she could make no further progress as her propeller was out of the water. Steam was therefore shut off and passengers and crew ordered to the boats.

At 10.30 p.m. the first boat, filled with women and children was ready to go away and the second boat was nearly ready. There was no hurry and no apparent cause for undue alarm when, with terrible suddenness the bulkheads burst causing the *Teuton* to fling her stern wildly in the air and then plunge beneath the sea. So rapid was the sinking that the boat which had just been lowered was dragged down in the vortex.

In all 236 persons were drowned, including Capt. Manning.

TEVIOTDALE

J. & A. Roxburg; 1882; *A. Stephen & Sons*; 1,623 tons; 266*3 x 38-6x22-7.

The British sailing ship *Teviotdale*, Capt. Smith, on a voyage from Cardiff to Bombay, was wrecked in heavy weather on October 15th, 1886, off the coast of Carmarthen. Capt. Smith and most of the crew were drowned, a few survivors were picked up by the Ferryside lifeboat.

TEWFIKIEH

Khedivial Mail Steamship Co.; 1893; *R. Napier & Sons*; 2,490 tons; 320-5x38-2x23-1; 307 n.h.p.; 11 knots; triple-expansion engines.

The steamship *Tewfikieh* was torpedoed and sunk by a German submarine 115 miles WNW. of Alexandria on June 9th, 1918. Five men were killed. The captain was among the survivors.

TEWKESBURY

Capper, Alexander & Co.; 1907; *J. L. Thompson & Sons*; 4,260 tons; 370-8x49-5x25-3; 343 n.h.p.; triple-expansion engines. The British steamship *Tewkesbury* was wrecked seven miles W. of

Cape Pine, St. Mary's Bay, N.F.L., on March 17th, 1920. She was on a voyage from Antofagasta, via Louisburg, to Liverpool, and Hamburg carrying a cargo of nitrate.

TEXAS

Mississippi & Dominion S.S. Co.; 1872; *A. McMillan & Son*; 2,853 tons; 325-5x36-3x25-4; 320 h.p.; triple-expansion engines.

The British steamship *Texas* was wrecked at St. Shotts, near Cape Race, on June 4th, 1894. She was on a voyage from Montreal to Avonmouth carrying cattle and a general cargo.

TEXAN

American-Hawaiian Steamship Co.; 1902; *New York S.B. Co.*; 7,005 tons; 471x57-2x31-8; 615 n.h.p.; 12knots; quadruple-expansion engines.

The American liner *Texan*, Capt. R. H. Murphy, on a voyage from New York to Trinidad, was torpedoed and sunk by a German submarine 40 miles E. of Nuevitas, Cuba, at 12.37 a.m. on March 12th, 1942. Nine men were killed and one wounded, Capt. Murphy, was among the survivors.

TEXELSTROOM

N.V. Hollandsche Stoomb. Maats.; 1914; *Maats. Fyenoord*; 1,601 tons; 273-6x40-2x16-8; 162 n.h.p.; triple-expansion engines.

The Dutch steamship *Texelstroom* struck a mine and sank in the North Sea on October 6th, 1915.

TEXELSTROOM

N.V. Hollandsche Stoomb. Maats.; 1918; *Maats. Fyenoord*; 1,617 tons; 273-6x40-2x16-8; 162 n.h.p.; triple-expansion engines.

The Dutch steamship *Texelstroom* left Reykjavik on February 22nd, 1941, for Grimsby with a crew of 25 and two passengers. Nothing more was ever heard of her. A German submarine reported having sunk a ship of comparable size on the 22nd, 200 miles SSW. of the Vestmann Islands.

THALA

F. C. Strick & Co.; 1928; *J. Readhead & Sons*; 4,399 tons; 370 x 52 • 3 x 25 • 9; 341 n.h.p.; triple-expansion engines. The British cargo ship *Thala* was wrecked at Hartmeal, South Uist, Outer Hebrides, on February 8th, 1941, while on a voyage from Peipel to the Tees carrying a general cargo.

THALIA

Xilas Bros. & A. Constantinidis; 1917; *Kawasaki Dockyard Co.*; 5,875 tons; 385-3x51-2x25-5; 440 n.h.p.; triple-expansion engines.

The Greek steamship *Thalia* was torpedoed and sunk by a German submarine on September 16th, 1940, on a voyage from Montreal to Garston.

THALIA

Panama Transport Co.; 1926; *Howaldtswerke*; 8,329 tons; 470-1x63-2x35-3; 776 n.h.p.; oilengines. The Panamanian tanker *Thalia* was torpedoed and sunk by a German submarine on February 23rd, 1942, 50 miles N.W. of Aruba on a voyage from New York to Aruba.

THAMES

City of Dublin Steam Packet Co.; 500 tons.

The steamship *Thames*, on a voyage from Dublin to London with passengers, was wrecked in a gale on January 4th, 1841, on the Brow of Ponds Reef, Scilly Isles. Only four persons of the 66 on board were saved.

THAMES MARU

Kawasaki Kisen K.K.; 1920; *Kawasaki Dockyard Co.*; 5,871 tons; 385x51x36; 440 n.h.p.; triple-expansion engines.

The steamship *Thames Maru* was torpedoed and sunk by the U.S. submarine *Pompon* on July 25th, 1943, S. of the Caroline Islands.

THANEMORE

THANEMORE

W. Johnston & Co.; 1867; Tod & McGregor; 3,032 tons; 332 x 39 - 4 x 25 - 9; 270 n.h.p.; 12 knots; compound engines. The Johnston liner *Thanemore*, Capt. G. F. Butcher, left Baltimore on November 28th, 1890, for London with 38 crew, ten cattlemen and 430 head of cattle and 1,692 tons of general cargo, chiefly cotton.

On December 1st the British steamship *Nero*, Capt. Chisholm, sighted a large vessel on fire from stem to stern at a position near Flemish Gap. There was a terrific storm raging and although the *Nero* lay-to for 24 hours it was impossible for a small boat to live in the sea during that time. The captain reported the happening upon his arrival at Philadelphia and as time passed with no news of the *Thanemore* it was at last assumed that she was the vessel that the *Nero* had sighted.

THANET

British Navy, destroyer; 1918; Hawthorn, Leslie & Co.; 905 tons; 276x26-7x10-9; 27,000 s.h.p.; 31 knots; turbine engines;

Yarrow boilers; three 4 in. guns, 5 smaller, 4 T.T. The destroyer *Thanet*, Cdr. B. S. Davies, in company with the Australian destroyer *Vampire*, supported by shore-based bombers of the R.A.F., opposed a Japanese landing at Endau on the east coast of Malaya, 80 miles from Singapore. The enemy force consisted of a cruiser and three destroyers. The *Thanet* was sunk in the action, which took place on January 27th, 1942, but the *Vampire* suffered neither damage nor casualties.

THANN

German Government; 1926; Nederlandsche Scheepsbouw Maats.; 7,412 tons; 440-4x59-4x32-7; 602 n.h.p.; oil engines. The motorship *Thann* was formerly the Dutch *Phobos*, taken over by the Germans. She struck a mine and sank on December 29th, 1944, in the Baltic.

THASSOS

Th. L. Teryazos; 1919; TheNittaCo.; 1,565 tons; 240x36x21; 109 n.h.p.; triple-expansion engines.

The Greek steamship *Thassos* was bombed and sunk by German aircraft on April 22nd, 1941, at Megara, during the invasion of Greece.

THE MONARCH

J. Hay & Sons; 1930; Ailsa S.B. Co.; 824 tons; 195-1 x30-3 x 12-1; 137 n.h.p.; triple-expansion engines.

The British steamship *The Monarch* was torpedoed and sunk by a German submarine on the night of June 19th, 1940, soon after leaving Tonny Charente Roads for Falmouth. All her crew of 12 were lost.

THEANO

German Government; 1920; N.V. Boele's Scheepswerven & Maschinfabriek; 1,059 tons; 231-9x36-2x13-2; 138 n.h.p.; triple-expansion engines.

The steamship *Theano* was formerly Dutch, taken over by the Germans. She was bombed and sunk by British aircraft on December 13th, 1942, off Stavanger.

THEDOL 2

T. N. Epiphaniades; 1910; Howaldtswerke; 657 tons; 188x 31-2x10-5; 44 n.h.p.; triple-expansion engines. The Greek coastal tanker *Thedol 2*, loaded with petrol, was bombed and set on fire by German aircraft on April 22nd, 1941, at Antikyra, Gulf of Corinth. The tanker eventually exploded and sank. *See also Theodora.*

THELMA

W. Wilhelmsen; 1906; Laxevaags Maskin & Jernskibs.; 1,350 tons; 260 X 38 -1 x 16 • 7; 156 n.h.p.; triple-expansion engines. The Norwegian steamship *Thelma* struck a mine and sank in the English Channel on April 6th, 1917.

THEMIS

Koninklijke Nederlandsehe Stoomb. Maats.; 1903; Rijkee & Co.; 897 tons; 213 x30-6x13-3; 96 n.h.p.; triple-expansion engines. The Dutch steamship *Themis* left Newcastle for Amsterdam on

December 21st, 1916, with a crew of 19. She was never heard of again, and is listed by the Dutch authorities as a probable war casualty.

THEMIS

W. Wilhelmsen; 1911; W. Doxford & Sons; 7,402 tons; 445X 60x29-2; 412 n.h.p.; triple-expansion engines. The Norwegian steamship *Themis* was torpedoed and sunk by a submarine in the Mediterranean on October 12th, 1917.

THEMISTOCLIS

S.Spiridonou&Co.; 1880; T. & W. Smith; 1,895 tons; 285X 35x23-1; 250 n.h.p.; compound engines.

The Greek steamship *Themistoclis* was sunk by a German submarine in the Bay of Biscay on April 9th, 1917.

THEMONI

Kassos Steam Nav. Co.; 1938; W. Doxford & Sons; 5,719 tons; 431-9x57-5x26-7; 474 n.h.p.; triple-expansion engines. The Greek steamship *Themoni* was bombed by German aircraft on May 17th, 1941, caught fire and sank, in Suda Bay, during the invasion of Greece.

THEODORA

Theodora E. Pappa; 1917; Government Dockyard, Nicolaeff; 1,054 tons; 240-6x33-3x13-2; 38 n.h.p.; triple-expansion engines.

The Greek tanker *Theodora*, loaded with petrol, was bombed by German aircraft on April 22nd, 1941, at Antikyra, Gulf of Corinth. The captain and 12 of the crew were killed. Soon afterwards the tanker *Thedol 2*, lying nearby, was bombed and set on fire, whereupon the remaining crew of the *Theodora* tried to move their ship away. Unfortunately the ship went aground and her cargo of petrol began to leak away. Soon petrol on the sea caught fire from the burning *Thedol 2* and the *Theodora* was completely burnt out.

THEODORE DWIGHT WELD

U.S. War Shipping Administration; 1943; California S.B. Corp.; 7,176 tons; 422-8x57x34-8; 339 n.h.p.; triple-expansion engines.

The tanker *Theodore Dwight Weld* was torpedoed and sunk by a German submarine on September 20th, 1943, on a voyage from Manchester to New York. Twenty of the crew and 13 gunners were lost.

THEOFANO

N. G. Livanos; 1929; W. Gray & Co.; 4,720 tons; 405-5X 54-2x24-9; 438 n.h.p.; triple-expansion engines. The Greek steamship *Theofano*, on a voyage from Montevideo to Cruz Grande, in ballast, was wrecked on Huamblin Island, off the mouth of the River Plate, on December 31st, 1929.

THEOPHILE GAUTIER

Soc. Anon. Services Contractuels des Messageries Maritimes; 1926; Chantiers & Ateliers de France; 8,195 tons; 426-7x 56-3x22-5; 1,164 n.h.p.; oilengines.

The French liner *Theophile Gautier* was torpedoed and sunk by a British submarine on October 4th, 1941, off the island of Euboea, Aegean.

THEOSKEPASTI

A. M. Coulouthros & J. M. Kessarlis; 1889; Bar tram, Haswell & Co.; 2,461 tons; 300x38-6x19-5; 238 n.h.p.; triple-expansion engines.

The Greek steamship *Theoskepasti* was sunk by a submarine in the Black Sea on February 5th, 1916.

THEOTOKOS

S.Polemis; 1898; C. Cornell & Co.; 4,018 tons; 365x47-lx 26-6; 430 n.h.p.; triple-expansion engines.

The Greek steamship *Theotokos*, on a voyage from Cardiff to Salamis with 5,000 tons of coal, was sunk by collision with the French steamship *P. L. M. 14*, 3,754 tons, on February 18th, 1931, ten miles W. of the Longships Light.

THERAPIA

Hall Bros.; 1900; *Richardson, Duck & Co.*; 3,12 3 tons; 325-5x45-5x23-6; 256 n.h.p.; triple-expansion engines. The British cargo ship *Therapia* was wrecked in the Gulf of Bothnia on September 25th, 1913, while on a voyage from Rahja to Cardiff carrying a cargo of pit props.

THERESE ET MARIE

Worms & Cie.; 1893; *A. McMillan & Son*; 1,615 tons; 255 X 35-5x22; 189 n.h.p.; triple-expansion engines. The French steamship *Therese et Marie* was torpedoed and sunk by a German submarine in the Bay of Biscay on August 19th, 1917.

THERMOPYLAE

W. Wilhelmsen; 1930; *Burmeister & Wain*; 6,655 tons; 461 -4 x 60-6x29; 979 n.h.p.; oilengines. The Norwegian motorship *Thermopylce* was bombed and sunk by German aircraft on January 19th, 1942, S.W. of Crete. The ship was carrying 336 troops, 30 of whom were killed together with three of the crew.

THESSALIA

G. Bock & Co.; 1921; *Schiffs. u. Dockbauwerft Flender*; 2,875 tons; 3377x48-5x19-9; 262 n.h.p.; triple-expansion engines. The German steamship *Thessalia* was bombed and sunk by British aircraft on November 11th, 1942, 20 miles S.W. of Benghazi.

THESSALY

Birkenhead Shipping Co.; 1877; *Laird Bros.*; 1,925 tons; 291 -1 x 34 - 3 x 24 - 6; 220 h.p.; compound engines. The British steamship *Thessaly* was destroyed by fire off Borkum on December 29th, 1890, while on a voyage from New Orleans to Hamburg carrying a cargo of cotton.

THETFORD

R. Gordon & Co.; 1881; *R. Thompson & Sons*; 1,301 tons; 240 x34x 17; 140 h.p.; compound engines. The British cargo ship *Thetford* sank after a collision with the Dutch steamship *Dordrecht*, 1,798 tons, in Kjoeg Bay on October 17th, 1892, while on a voyage from the Tyne to Stettin carrying a cargo of coal.

THETIS

British Navy, light cruiser; 1891; *British Isles*; 3,440 tons; 300x43-7x18; 7,000 h.p.; 18-5 knots; triple-expansion engines; two 6 in. guns, six 4 - 7 in., eight 6 pdr., 4 T.T. The old light cruiser *Thetis*, Cdr. R. S. Sneyd, had been turned over to minelaying duties prior to the outbreak of the First World War. In 1918 she was taken over for refitting in order to make an attack upon the German submarine bases at Zeebrugge and Ostend. The menace of these bases to Allied communications in the narrow seas moved the Admiralty to action and Vice-Admiral Sir Roger Keyes, commanding the Dover Patrol, was entrusted with the task of blocking the entrances to both ports.

The force employed consisted mainly of six old light cruisers, for use as assault craft and block ships, 28 British and three French destroyers, with seven monitors and a number of British and French torpedo boats and motor launches, with the Liverpool-Birkenhead passenger steamships, *Daffodil* and *Iris*.

The attack upon Zeebrugge took place in the early hours of April 23rd, 1918. The cruiser *Vindictive* ran alongside the Mole, over one and a half miles in length, and lowered her gangways. Meanwhile the submarine *C 3*, loaded with explosives, came down the Mole nearer the shore where there was an iron railway viaduct. The submarine was in all probability mistaken for a U-boat by the enemy in the darkness and confusion and her approach was not seriously challenged. At a speed of ten knots she drove into the piles of the viaduct as far as her conning-tower. The time-fuse was fired and the crew, Lt. Cdr. R. D. Sandford and five others abandoned ship in a motor-skiff. Shortly afterwards the submarine blew up and effectively wrecked the viaduct.

The main object of the expedition was the blocking of the canal connecting the port with the city of Bruges about eight miles inland. Here an artificial harbour of locks, basins and waterways provided extensive accommodation for submarines, while huge concrete shelters, built during the German occupation, gave protection from

aerial attack. At 12.20 a.m. *Thetis*, *Intrepid* and *Iphigenia* sighted the Mole, round which they steered to the mouth of the canal. Guns from a shore battery opened out and the ship replied. All was going according to plan when *Thetis* was caught by an easterly current which swept her on to the entanglement nets of the defensive boom. Her propellers were fouled by the nets and she drifted until within 300 yards of the canal entrance where she grounded. By great efforts her engineers managed to get her under way again and she moved nearer to her objective but grounded for the second time. She was therefore abandoned and her bottom blown out so that she might sink at once. Her consorts which had passed her while aground were now within the canal where they were scuttled to block the channel. The whole operation was conducted under heavy enemy shell and machine-gun fire but there were no fatal casualties.

The British loss in the whole operation consisted of the destroyer *North Star* and two motor launches. Of the personnel 170 officers and men were killed, 400 wounded and 45 missing, some of whom became prisoners of war.

THETIS A.

G. F. Andreadis; 1910; *Northumberland S.B. Co.*; 4,111 tons; 365 X 51 - 4 X 25 - 9; 335 n.h.p.; triple-expansion engines. The Greek steamship *Thetis A.* was torpedoed and sunk by a German submarine on July 14th, 1940, off the Bay of Biscay, on a voyage from Rosario to Limerick. Nine of the crew were killed.

THIARA

Anglo-Saxon Petroleum Co.; 1939; *Swan, Hunter & Wigham Richardson*; 10,364 tons; 505-8x64-6x36-9; 628 n.h.p.; 12 knots; oil engines.

The motor tanker *Thiara*, Capt. R. W. Thompson, was torpedoed and sunk by a German submarine on July 27th, 1940, about 150 miles W. by S. of Rockall. Twenty-five of the crew were killed. Capt. Thompson was among the survivors.

THISBE

Soc. Navale Caennaise; 1910; *Sunderland S.B. Co.*; 1,091 tons; 223 x 33x13-7; 127 n.h.p.; triple-expansion engines. The French steamship *Thisbe* was torpedoed and sunk by a German submarine in the English Channel on September 6th, 1917.

THISBE

German Government; 1925; *Blyth S.B. & D.D. Co.*; 1,782 tons; 260 -1 X 37 - 7 X16 - 4; 244 n.h.p.; triple-expansion engines. The steamship *Thisbe* was a former French ship taken over by the Germans. She was torpedoed and sunk by a Russian submarine on August 30th, 1943, soon after entering the Black Sea. Her entire complement of 40 were lost.

THISTLEBEN

Allan, Black & Co.; 1924; *W. Pickersgill & Sons*; 4,589 tons; 401 x53-6x23-8; 430 n.h.p.; triple-expansion engines. The British steamship *Thistleben* sank after a collision with the American steamship *Hanley*, 7,583 tons, off the coast of Florida, 150 miles E.N.E. of Abaco Lighthouse, on October 4th, 1928. She was on a voyage in ballast from Sunderland to Galveston.

THISTLEGARTH

Albyn Line; 1929; *Sir J. Laing & Sons*; 4,747 tons; 405-8 X 56x23-1; 430 n.h.p.; triple-expansion engines. The British steamship *Thistlegarth*, on a voyage from Scapa Flow to the St. Lawrence, was torpedoed and sunk by a German submarine on October 15th, 1940, 250 miles W. of the Butt of Lewis. Twenty-nine of her crew and one gunner were lost.

THISTLEGORM

Albyn Line; 1940; *J. L. Thompson & Sons*; 4,898 tons; 415 -1X58-2x24-8; 365 n.h.p.; triple-expansion engines. The British steamship *Thistlegorm*, on a voyage from Glasgow to Suez, was bombed and sunk by German aircraft at 1.30 a.m. on October 6th, 1941, while at anchor in the Strait of Jubal, Gulf of Suez. Four of the crew and five gunners were lost.

THISTLEMOR

THISTLEMOR

Allan, Black & Co.; 1906; Craig, Taylor & Co.; 4,008 tons; 350 x 51 x 25 • 5; 316 n.h.p.; triple-expansion engines. The British cargo ship *Thistlemor* foundered in a gale on December 2nd, 1909, off Clovelly in the Bristol Channel. She had left Cardiff with a cargo of coal for Table Bay. The chief officer and eight men were picked up by the steamship *Arndale*. These were the only survivors.

THISTLEROY

Allan, Black & Co.; 1902; Irvine's S.B. & D.D. Co.; 4,027 tons; 345 • 2X47 • 8X19 • 4; 314 n.h.p.; triple-expansion engines. The British steamship *Thistleroy* was wrecked on December 28th, 1911, at Cape Lookout, N. Carolina, while on a voyage from Galveston to Cork and Liverpool with a cargo of cotton and phosphate.

THODE FAGELLUND

W. Wilhelmsen; 1904; J. Priestman & Co.; 4,352 tons; 355 x 50x20; 344 n.h.p.; triple-expansion engines. The Norwegian steamship *Thode Fagellund* was torpedoed and sunk by a German submarine in the North Sea on March 11th, 1917.

THOMAS MCKEAN

U.S. War Shipping Administration; 1942; Bethlehem Fairfield Shipyard; 7,191 tons; 423x57-1x34-8; 339 n.h.p.; triple-expansion engines. The steamship *Thomas McKean* was torpedoed and sunk by a German submarine on June 29th, 1942, about 350 miles N.W. of Puerto Rico. Three gunners were killed on board, one gunner and one member of the crew died in the boats.

THOMAS W. LAWSON

Coastwise Transportation Co.; 1902; Fore River Ship & Engineering Co.; 5,218 tons; 375-6x50x22-9. The American schooner *Thomas W. Lawson* had seven masts and 43,000 square feet of canvas when all sail was set. She was rigged as a schooner in order to economise in crew, as it required only 19 men to sail her, the running gear being worked by steam winches. On the afternoon of December 13th, 1907, the vessel arrived off St. Mary's Island, Scilly Isles, on her voyage from Philadelphia to London. The weather was rough, but the captain thought to ride out the storm at anchor between St. Mary's and the Bishop Light-house.

Shortly after dark the St. Agnes lifeboat came alongside and put Mr. Hicks, a channel pilot, on board. During the night the storm increased in violence and the *Thomas W. Lawson* was driven on to the Westward Rocks, where she capsized.

The drowned numbered 17, including Pilot Hicks, and one of the three survivors died shortly after reaching shore.

THOMAS WALTON

Coronation S.S. Co.; 1917; W. Gray & Co.; 4,460 tons; 380-3X52x26; 434 n.h.p.; 10 • 5 knots; triple-expansion engines. The steamship *Thomas Walt on*, Capt. P. D. Townsend, was torpedoed and sunk by a German submarine off the Lofoten Islands, Norway, on December 7th, 1939. Thirteen men were killed. Capt. Townsend was among the survivors.

THOR

German Navy; 1938; Deutsche Werft; 3,862 tons; 379-7x54-8x23-8; 18 knots; turbine engines; six 5-9 in. guns, 7 smaller, 4 T.T., 1 aircraft, 60 mines.

The German commerce raider *Thor*, Capt. O. Kahler, was formerly the *Santa Cruz*. At the outbreak of the Second World War she was taken over by the German Admiralty and fitted out as an auxiliary cruiser.

On June 6th, 1940, she left Kiel and passed through European waters without incident, aided by almost continuous fog, and with a powerful escort of destroyers, minesweepers and aircraft. By July 1st she had reached her operational area in the South Atlantic and captured a Dutch vessel on that day. Her cruise was marked by three engagements with British auxiliary cruisers. The first took place on July 28th, when she met the *Alcantara*, 22,209 tons, 6 in. guns. The fight lasted for just over half an hour, and the raider, thanks to a lucky shot which reduced her antagonist's speed, was

able to take advantage of the strong sun which hampered the British gunners while their target was left hidden in mist. The *Alcantara* received damage to her machinery and the *Thor*, which wished to avoid damage which might destroy her usefulness as a raider, steamed away.

Her next encounter took place on December 5th when she met the *Carnarvon Castle*, 20,100 tons, 6 in. guns. The British ship, which received heavy punishment, was compelled to break off the action.

In her third and final engagement with a British auxiliary cruiser she was the victor. On April 4th, 1941, she met the *Voltaire* (which see) 13,245 tons, 6 in. guns of old pattern. She out-steamed and out-gunned her antagonist and sank her in 55 minutes, receiving only one hit throughout the action.

The *Thors* first cruise lasted for 329 days, and she put into Hamburg on April 30th, 1941. After a general overhaul and refit the raider left the Gironde on her second cruise on January 14th, 1942. This time she was commanded by Capt. Gumprich, who later commanded the *Michel* (which see) for a time, and again she got safely into open sea aided by bad weather. Her second cruise was much less sensational than her first, and after ten months at sea she was lying in Yokohama harbour alongside the German tanker *Uckermark*, when, on November 30th, the latter blew up and sank owing to a spark igniting the petrol tanks. The *Thor* was wrecked by the explosion and sank shortly afterwards with the loss of 13 men. Thus ended a career in which she destroyed 152,443 tons of Allied shipping (including the auxiliary cruiser *Voltaire*).

The vessels captured by the *Thor* were as follows:—

FIRST VOYAGE			
<i>Kertosono</i>	9,289 tons	Dutch	1. 7.40
<i>Delambre</i>	7,032	British	8. 7.40
<i>Bruzes</i>	4,983	Belgian	9. 7.40
<i>Gracefield</i>	4,631	British	14. 7.40
<i>Wendover</i>	5,489	British	16. 7.40
<i>Tela</i>	3,777	Dutch	17. 7.40
<i>Kosmos</i>	17,662	Norwegian	12. 9.40
<i>Natia</i>	8,715	British	8 10.40
<i>Britannia</i>	8,799	British	25. 3.41
<i>Trolleholm</i>	5,047	Norwegian	25. 3.41
<i>Voltaire</i>	13,245	British	4. 4.41
<i>Sir Ernest Cassel</i>	7,739	Swedish	16. 4.41
..			
sunk in action			
sunk in action			
SECOND VOYAGE			
<i>Pagasitikos</i>	3,942 tons	Greek	23. 3.42
<i>Wellpark</i>	4,649	British	25. 3.42
<i>Willesden</i>	4,563	British	1. 4.42
<i>Aust</i>	5,630	Norwegian	3. 4.42
<i>Kirkpool</i>	4,842	British	10. 4.42
<i>Nankin</i>	7,131	British	10. 5.42

THOR

Seerederei Frigga A.G.; 1922; Deutsche Werft; 2,526 tons; 291 • 8 x 44 - 3 x 22 • 7; 162 n.h.p.; triple-expansion engines. The German steamship *Thor* was torpedoed and sunk by a British submarine on March 2nd, 1944, off Stadlandet, Norway.

THORN

German Government; 1932; A/B Gotaverken; 5,486 tons; 381x55-2x30-1; 543 n.h.p.; oilengines.

The motorship *Thorn* was formerly the Norwegian *Ruth*, taken over by the Germans. On April 2nd, 1941, she was torpedoed and sunk by a British submarine 100 miles W. of St. Nazaire.

THORNABY

Ropner Shipping Co.; 1889; Ropner & Son; 1,782 tons; 258X36x17; 152 n.h.p.; 9 knots; compound engines. The steamship *Thornaby* struck a mine and sank two miles N.E. of the Shipwash Light vessel on February 28th, 1916. The captain and 18 others were killed.

THORNHILL

Taylor & Sanderson S.S. Co.; 1897; Short Bros.; 3,231 tons; 351 x 45 x 16-2; 307 n.h.p.; triple-expansion engines. The British steamship *Thornhill* was destroyed by fire 800 miles off Barbados on April 16th, 1907. She was on a voyage from New York to Pernambuco carrying a general cargo.

THORNLIBANK

Andrew Weir & Co.; 1939; J. Readhead & Sons; 5,569 tons; 435-2x56-7x26; 524 n.h.p.; 11 knots; triple-expansion engines.
The steamship *Thornlibank* was on a voyage from Barry to the Middle East on November 29th, 1941, when she was torpedoed by a German submarine, blew up and sank. The vessel carried a crew of 66 and nine gunners, all of whom were lost.

THOROLD

R. S. Dalgliesh; 1922; Swan Hunter, Wigham Richardson; 1,689 tons; 250x43-1x16-9; 106 n.h.p.; 9 knots; triple-expansion engines.
The steamship *Thorold*, Capt. H. Jackson, on a voyage from Cardiff to London with coal, was two and a half miles S. of the Smalls on August 22nd, 1940, when she was bombed and sunk by German aircraft. Ten men, including Capt. Jackson, were lost, and five were wounded.

THORPEHALL

Westdiff Shipping Co.; 1910; Sunderland S.B. Co.; 1,251 tons; 245 X36x15-9; 170 n.h.p.; triple-expansion engines. The British steamship *Thorpehall* was bombed and sunk by insurgent aircraft one mile off Valencia on May 25th, 1938, during the Spanish Civil War. She was on a voyage from Marseilles to Valencia carrying a cargo of wheat.

THORPENESS

Westdiff Shipping Co.; 1914; Bartram & Sons; 4,798 tons; 405x51-5x26-9; 435 n.h.p.; triple-expansion engines. The British steamship *Thorpeness* was bombed and sunk by insurgent aircraft one mile off Valencia on June 21st, 1938, during the Spanish Civil War. She was on a voyage from Marseilles to Valencia carrying a cargo of wheat. The ship had been damaged during an air raid on Tarragona on January 20th, some of the crew being killed.

THORSDAL

J. Johanson & Co.; 1890; R. Thompson & Sons; 2,200 tons; 280-1x38-8x18-3; 203 n.h.p.; triple-expansion engines. The Norwegian steamship *Thorsdal* was torpedoed and sunk by a German submarine off the W. coast of Scotland on July 24th, 1917.

THORSHAVET

A/S Thor Dahl; 1938; Deutsche Werft A.G.; 11,015 tons; 508-1x69-2x36-5; 1,362 n.h.p.; oil engines. The Norwegian tanker *Thorshavet* was torpedoed and sunk by a German submarine on November 3rd, 1942, N. of Margarita Island, Caribbean, on a voyage from Trinidad to New York. Three of her crew were killed.

THORSHEIMER

German Government; 1935; Deutsche Werft A.G.; 9,955 tons; 492-9x66-1x36-4; 1,163 n.h.p.; oil engines. The tanker *Thorsheimer* was a former Norwegian ship, seized by the Italians in June, 1940, and later taken over by the Germans. On February 21st, 1943, she was bombed and sunk by British aircraft 50 miles S.W. of Marsala.

THORSTRAND

A/S Thor Dahl; 1938; Framnes Mek. Verksted; 3,041 tons; 321-6x46-2x26-1; 775 n.h.p.; oil engines. The Norwegian motorship *Thor strand* was torpedoed and sunk by a German submarine on March 6th, 1943, about 500 miles S.E. of Cape Race on a voyage from Liverpool to St. John, N.B. Four of the crew and one passenger were lost.

THORVALDSEN

Brix-Hansen & Co.; 1871; Burmeister & Wain; 1,220 tons; 220-7x30-1x16-2; 177 n.h.p.; compound engines. The Danish steamship *Thorvaldsen* was sunk by a German submarine in the North Sea on September 20th, 1915.

THRACIA

International S.S. Co.; 1892; J. L. Thompson & Sons; 3,015 tons; 322 x 41 • 5 x 21 - 5; 250 h.p.; triple-expansion engines. The British steamship *Thracia* was wrecked at Rabbit Islands, Tenedos Channel, Turkey, on January 19th, 1893. She was carrying petroleum from Batoum to Calcutta.

THRACIA

Cunard Line; 1898; Sir R. Dixon & Co.; 2,891 tons; 310x44-1x15-7; 258 n.h.p.; 9-5 knots; triple-expansion engines. The cargo steamship *Thracia* was torpedoed and sunk by a German submarine 12 miles N. of Belle Isle on March 27th, 1917. Thirty-six men, including the captain, were lost.

THRACIAN

William Thompson & Co.; 1892; Clyde; 2,000 tons. The *Thracian*, Capt. H. Brown, was a new four-masted barque being towed by the tug *Sarah Jolliffe* to Liverpool to finish fitting out and load her first cargo.

She carried a party of Liverpool riggers in addition to a few sailors. On gaining open water she met a stiff gale and became unhandy. At about 11 p.m. on August 14th, 1892, when about three miles off Port Erin, Isle of Man, those on board the tug saw the *Thracian* heel over to a squall. The ship did not recover and the crew of the tug cut the tow rope to prevent their being drawn down as the ship capsized.

The tug steamed back across the intervening space, but saw nothing except a momentary glimpse of the barque, keel upward. Another squall of wind and rain came down and when it passed there was no sign of the *Thracian*. After cruising about until 6 a.m. on the 15th without sighting any survivors the *Sarah Jolliffe* made for Douglas.

The ship sank with Capt. Brown, his wife and 17 men, mostly ship riggers.

THRAKI

Hellenic Mediterranean Lines Co.; 1913; W. Dobson & Co.; 1,532 tons; 212 n.h.p.; triple-expansion engines. The Greek steamship *Thraki* was bombed and sunk by German or Italian aircraft on April 22nd, 1941, near Dombraina, Gulf of Corinth.

THRASYVOULOS

T. L. Boyatzides & Co.; 1912; Tyne Iron S.B. Co.; 3,693 tons; 348-5x50-1x23-5; 307 n.h.p.; triple-expansion engines. The Greek steamship *Thrasylvoulos* was torpedoed and sunk by a German submarine on October 30th, 1939, 160 miles W. of Ireland, with the loss of 23 lives.

THRUNSCOE

Bennetts & Co.; 1896; Furness, Withy & Co.; 3,345 tons; 330 x 43 • 1 X19 • 7; 263 n.h.p.; triple-expansion engines. The British cargo ship *Thrunscoe* was wrecked on Minicoy Island on April 18th, 1899, while carrying a cargo of rice from Akyab to Port Said.

THULE

Stockholms Rederi-AfB Svea; 1930; Fredrikstad Mek. Verksted; 2,533 tons; 269-2x42-1x17-6; 173 n.h.p.; compound engines. The Swedish steamship *Thule* was torpedoed and sunk by a British motor torpedo boat on September 30th, 1942, off the Dutch coast on a voyage from Lulea to Rotterdam. Nine of her crew were lost.

THURSO

Ellerman's Wilson Line; 1919; S. P. Austin & Sons; 2,436 tons; 303-2x43x20-8; 266 n.h.p.; triple-expansion engines. The British steamship *Thurso*, on a voyage from Lisbon to Liverpool was torpedoed and sunk by a German submarine at 4.20 a.m. on June 15th, 1942, about 350 miles W.S.W. of Cape Finisterre. Thirteen of the crew were lost.

THURSOBANK

THURSOBANK

Bank Line; 1940; J. Readhead & Sons; 5,575 tons; 435-2 x 56-7x26; 542 n.h.p.; triple-expansion engines. The British steamship *Thursobank*, on a voyage from New York to Alexandria via the Cape, was torpedoed and sunk by a German submarine at 2.40 a.m. on March 22nd, 1942. Twenty-three of her crew and seven gunners were lost.

THURSTON

Murrell S.S. Co.; 1918; J. Blumer & Co.; 3,072 tons; 331-3 x 46-8x23-2; 429 n.h.p.; triple-expansion engines. The British steamship *Thurston*, on a voyage from Takoradi to Workington, struck a mine and sank on March 4th, 1940, 19 miles from the Longships. Thirty-four of the crew were lost.

THYRA

B. Ingelsson; 1917; Sorlands Skibsbyggeri; 2,635 tons; 300-4 x 47-1x20-9; 225 n.h.p.; triple-expansion engines. The Swedish steamship *Thyra*, on a voyage from Caibarien to New York with sugar, was sunk by collision on March 19th, 1925, 125 miles S. of Sandy Hook.

TIA JUANA

Lago Shipping Co.; 1928; Harland & Wolff; 2,395 tons; 305-7x 50-2x14-3; 196 n.h.p.; triple-expansion engines. The British tanker *Tia Juana* was torpedoed and sunk by a German submarine on February 16th, 1942, about 25 miles S.W. of Punta Macolla on a voyage from Lake Maracaibo to Aruba. Seventeen of the crew of 26 were lost.

TIBER

Royal Mail Steam Packet Co.; 1866; C. Lungley; 1,591 tons; 272-4x34-1x25-2; 350 h.p.; compound engines. The British steamship *Tiber* was wrecked at Haiti on February 10th, 1882, while on a voyage from Havana to Southampton carrying a general cargo.

TIBER

Tiber Steamship Co.; 1870; London & Glasgow Shipbuilding Co.; 1,736 tons; 253-6x33x17-4; 140 n.h.p.; compound engines. The steamship *Tiber*, Capt. Belanger, on a voyage from Louisburg, C.B., to Halifax, N.S., with coal, was wrecked about 80 miles E. of Halifax on or before March 4th, 1902. Capt. Belanger and his crew of 20 were lost.

TIBERMEDE

D. & T. G. Adams; 1918; Ropner & Sons; 3,119 tons; 331-2 x 46-8x23-2; 433 n.h.p.; triple-expansion engines. The British steamship *Tibermede* was wrecked on May 10th, 1920, near Cape Carvoeiro lighthouse while on a voyage from the Tees to Savona.

TIBERTON

R. Chapman & Son; 1920; Richardson, Duck & Co.; 5,225 tons; 400-1x52-4x28-4; 397 n.h.p.; triple-expansion engines. The British cargo ship *Tiberton* was lost without trace after sailing from Narvik on February 14th, 1940, for Middlesbrough. She carried a crew of 32 and 2 gunners, and a cargo of iron ore.

TICINO

Cambiaghi, Rossi & Ci.; 1902; Officine e Cantieri Liguri Anconitani; 3,897 tons; 335x44-5x26-7; 321 n.h.p.; triple-expansion engines.

The Italian steamship *Ticino* was sunk by a submarine in the Mediterranean on November 6th, 1915.

TICINO

Italian Navy; 1924; A. G. Vulcan; 1,470 tons; 243-3x36-1 x 14-9; 222 n.h.p.; oil engines.
The tanker *Ticino* was torpedoed and sunk by a British submarine on March 26th, 1941, N. of Trapani.

TIDE

United States Navy, minesweeper; 1943; Savannah Machine & Foundry Co.; 890 tons; 221-5x32x10-5; 2,976 h.p.; 18 knots; oil engines; one 3 in. gun, four 40 mm. A.A. The United States minesweeper *Tide* was one of a flotilla engaged

in clearing a German minefield off Utah Beach during the Normandy landings in June, 1944. On the 7th, when working off the Cardonnet Bank, she ran into a mine which exploded and caused vital damage. The *Tide* was taken in tow, but sank a few hours later. Her normal complement was 105.

TIEN LEE

Ching Kee S.N. Co.; 1919; Uchida S.B. & E. Co.; 2,184 tons; 270x39-1x21-6; 168 n.h.p.; triple-expansion engines. The former Chinese steamship *Tien Lee*, seized by the Japanese, struck a mine and sank on February 12th, 1943, off the north east coast of Honshu Island.

TIENTSIN

China Navigation Co.; 1876; Scott & Co.; 1,087 tons; 233-6x 27-3x22-1; 98 h.p.; compound engines.
The British cargo ship *Tientsin* was wrecked on Rees Island on August 25th, 1887, while on a voyage from Swatow to Shanghai carrying a general cargo.

TIENTSIN MARU

Dairen Risen K.K.; 1927; Mitsubishi Zosen Kaisha; 2,349 tons; 275 x 42 • 5 x 21; 197 n.h.p.; triple-expansion engines. The steamship *Tientsin Maru* struck a mine and sank on August 29th, 1944, off Hangchow.

TIEIE

Companhia Comer do e Navegacao; 1918; Detroit S.B. Co.; 2,025 tons; 251 X43-8x18-5; triple-expansion engines. The Brazilian steamship *Tiete*, on a voyage from Imbituba to Rio de Janeiro with coal, was sunk by collision with the motorship *Chuiloido*, 1,659 tons, off Santa Catharina Island on August 7th, 1944.

TIGER

British Navy, steam frigate; 1849; Chatham Dockyard; 1,221 tons; 200x36x24; 400 i.h.p.; 12 knots; 16 guns. The paddle frigate *Tiger* was one of a small blockading force keeping watch over the port of Odessa during the Crimean War. The ship was under command of Capt. H. W. Giffard and carried a complement of 226. On May 12th, 1854, in thick weather, *Tiger* was steaming in chase of a Russian schooner when she ran heavily aground on the rocks off a point of land about four and a half miles from Odessa. During the chase the fog had increased in density. She grounded at about 6 a.m. and began to fire signals of distress which were heard by H.M. ships *Vesuvius* and *Niger*, both of which set course by the sound of the guns.

Later in the morning the fog cleared sufficiently to allow the Russians to obtain a good view of *Tiger* and they brought up two field guns and opened fire on her at a fairly easy range. To this bombardment the ship, from her awkward position on the rocks, could make no effective reply from the one gun which it was possible to bring into action. Capt. Giffard had one leg smashed by a shell. The first lieutenant, upon whom the command now devolved seeing the hopelessness of the situation and not expecting any assistance from *Vesuvius* and *Niger*, hauled down his flag and surrendered the ship which by this time was heavily on fire.

The Russians treated the captured sailors with great kindness. Of the wounded men a midshipman, one seaman and a ship's boy died of wounds. The *Tiger's* ensign was presented to the Czar and some of her guns were carried in triumph to Odessa as trophies of war.

TIGER

British Navy, destroyer; 1901; Glasgow; 300 tons; 210x21x 5-5; 6,000 i.h.p.; 30 knots; triple-expansion engines; one!2pdr. gun, five 6pdr., 2 T.T.

The destroyer *Tiger*, Lt. Cdr. W. E. Middleton, was a unit of the Portsmouth flotilla and on Thursday, April 2nd, 1908, she left Spithead with the rest of the Home Fleet to carry out night exercises off St. Catherine's Point. Her complement was 57. At 8.5 p.m. there was an attack by destroyers on the squadron commanded by Rear-Admiral Farquhar, who was in charge of the operations. The ships were then 18¹ miles S. of St. Catherine's Point and steaming at ten

knots with lights screened. It was dark but clear when *Tiger*, following her next ahead, altered course to port and steamed across the bows of the armoured cruiser *Berwick*, 9,800 tons, Capt. W. C. M. Nicholson. The *Tiger* was struck amidships on the starboard side and sank almost at once, but the after part remained afloat long enough for 13 men to be rescued.

The survivors totalled 22, Lt. Cdr. Middleton was among those lost.

TIGER

German Navy, gunboat; 1899; Danzig Dockyard; 900 tons; 203'5x30x11; 1,350 i.h.p.; 14knots; triple-expansion engines; Thorny croft boilers; two 4-1 in. guns, six 1 pdr., 2 m.g. The gunboat *Tiger* was one of a flotilla of four such vessels blown up and abandoned by the Germans on the fall of the fortress of Tsingtau on November 7th, 1914. The ship carried a complement of 121 and was of little fighting value. A full account of the ships lost at Tsingtau will be found under the light cruiser *Cormoran*, which was also destroyed by the Germans before surrendering.

TIGRE

Italian Navy, destroyer; 1923; Ansaldo; 1,526 tons; 372 x 34x11-5; 40,000 s.h.p.; 34 knots; turbine engines; Yarrow boilers; eight 4-7 in. guns, two 40 mm., 4 m.g., 4 T.T., 100 mines. The destroyer *Tigre*, with her sister ship the *Pant era*, left Massawa, Eritrea, on the approach of the British army on April 1st, 1941, and crossed the Red Sea to the coast of Saudi Arabia. Here the ships were no safer from British aircraft than they had been in their former anchorage and on April 4th it was decided to scuttle them and put the crews ashore.

For full details see under the destroyer *Leone*.

TIJUCA

Cia. Comercio e Navegacao; 1883; A. Leslie & Co.; 2,304 tons; 302 x37-3x24-5; 251 n.h.p.; compound engines. The Brazilian steamship *Tijuca* was sunk by a German submarine off Ushant on May 20th, 1917.

TILAWA

British India Steam Navigation Co.; 1924; Hawthorn Leslie & Co.; 10,006 tons; 451x59-3x36-8; 900 n.h.p.; 12 knots; quadruple-expansion engines.

The liner *Tilawa*, Capt. F. Robinson, left Bombay on November 20th, 1942, for Mombasa and Durban with 6,472 tons of cargo. On the morning of the 23rd, in bright moonlight, the liner was hit by a torpedo. The damage was not vital but the noise of the explosion created panic among the native passengers who rushed the boats and thereby caused a wholly unnecessary loss of life. About an hour later, when the remaining boats and rafts were assembling around the vessel to return on board, a second torpedo exploded on the port side and the *Tilawa* heeled over and sank.

The ship carried a crew of 222, four gunners and 732 passengers. Twenty-eight of the crew and 252 passengers were lost.

TILIA GORTHON

Red.-A/B. Activ; 1930; FredrikstadMek. Verksted; 1,776 tons; 269-1x42-2x17-6; 188 n.h.p.; triple-expansion engines. The Swedish steamship *Tilia Gorthon* was torpedoed and sunk by a German submarine on June 20th, 1940, 80 miles S. of the Scilly Islands on a voyage from Garston to Nantes. Ten of the crew were lost.

TILLIE LYKES

Lykes Bros. S.S. Co.; 1920; McDougall Duluth & Co.; 2,572 tons; 251 X 43 • 7 X 25 • 8; 352 n.h.p.; triple-expansion engines. The American steamship *Tillie Lykes* left Galveston on June 13th, 1942, for San Juan, Puerto Rico. She was never seen again and it was considered probable that she was sunk by a German submarine on or about the 18th E. of the Cayman Islands.

TIMARU

Turnbull & Co.; 1887; Borsius & v. d. Leije; 407 tons; 131-7X 30x14-4. The iron barque *Timaru*, Capt. A. Johansen, left Lyttelton, New Zealand, for *Kaipara* on August 16th, 1902. She was sighted by the

schooner *Morning Light* off Kaikoura, in Cook Strait, on the 24th. This was the last that was seen of her. She carried a crew of 11.

TIME

Howard Smith & Co.; 1890; Tyne Iron S.B. Co.; 2,575 tons; 300 x 41 x 19 • 6; 251 n.h.p.; triple-expansion engines. The Australian steamship *Time* was wrecked 40 miles N.W. by W. of Cape Martin, South Australia, on January 13th, 1911. She was on a voyage from Port Pirie to Melbourne carrying a general cargo.

TIMIOS STAVROS

N.Pappas; 1880; T. Turnbull & Son; 1,368 tons; 240x34x 17-9; 156 n.h.p.; compound engines. The Greek steamship *Timios Stavros*, on a voyage from Huelva to Lisahally with ore, foundered during heavy weather on February 1st, 1921, between Cape Roca and the Burlings.

TIMIRIAZEV

U.S.S.R.; 1931; States S.B. Yard "61 Communar"; 2,151 tons; 270-4x39-8x22-5; 358 n.h.p.; oilengines. The Russian motorship *Timiriazev* was torpedoed and sunk by an Insurgent submarine on August 30th, 1937, in the Mediterranean, during the Spanish Civil War.

TIMLAT

U.S.S.R.; 1921; C. Hill & Sons; 2,699 tons; 310x44x21-5; triple-expansion engines. The steamship *Timlat*, on a voyage from Vladivostock to Portland, Oregon, ran into heavy pack ice in bad weather on January 11th, 1944, and sank near Cape Shipunski. There were 14 survivors.

TIMOTHY BICKERING

U.S. War Shipping Administration; 1942; Richmond S.B. Corp.; 7,181 tons; 422-8x57x34-8; 339 n.h.p.; triple-expansion engines.

The steamship *Timothy Pickering* was lying at anchor off Avola, Sicily, on July 13th, 1943, when she was bombed and set on fire by German aircraft. Shortly afterwards she was blown up by an internal explosion. There were only 23 survivors out of the 192 on board, crew and military personnel.

TINDEFJELL

German Government; 1936; Nylands Verksted; 1,337 tons; 250-9x41-3x14-8; 107n.h.p.; compound engines & L.P. turbine.

The steamship *Tindeffjell* was a former Norwegian ship taken over by the Germans. On May 28th, 1942, she struck a mine and sank off Dunkirk.

TING CHU

China Merchants Steam Nav. Co.; 1943; Walter Butler Ship-builders; 1,873 tons; 250-6x42-1x18-4; triple-expansion engines. The Chinese steamship *Ting Chu*, on a voyage from Kaohsiung to Inemoy with rice, was shelled and sunk by Communist shore batteries near Chienchow on November 13th, 1950.

TING SANG

Indo-China S.N. Co.; 1900; Craig, Taylor & Co.; 1,650 tons; 265-3x35-2x13-5; 225 n.h.p.; triple-expansion engines. The British steamship *Ting Sang* was wrecked off South Kerr Island, Haitan Straits, on November 7th, 1913. She was on a voyage from Hong Kong to Shanghai carrying wood, sugar and a general cargo.

TING-YUEN

Chinese Navy, battleship; 1881; Stettin; 7,280 tons; 308 X 59x20; 6,200 i.h.p.; 14-5 knots; triple-expansion engines; four 12 in. guns, four 6 in., several smaller.

The Chinese battleship *Ting-Yuen* was the flagship of Admiral Ting at the battle of the Yalu against the Japanese on September 17th, 1894. This ended in a heavy defeat for the Chinese with the loss of three cruisers sunk and two by desertion from the line (one of which was wrecked later).

TINHOW

For full story of the battle of the Yalu, see *Chi-Yuen*.

The remainder of the fleet, consisting of two battleships, five cruisers and 12 torpedo boats with a few gunboats, retired to the fortified base of Wei-hai-wei where it was blockaded for some months by the Japanese fleet under Vice-Admiral Ito. On February 5th and 6th, 1895, the Japanese sent in several flotillas of torpedo boats which torpedoed the *Ting-Yuen*, forcing her to run ashore, and sank the cruiser *Lai-Yuen*, 2,850 tons, with very many of her complement (which see). From the 7th to the 11th the Japanese main fleet bombarded the Chinese ships and forts, causing the destruction of all but one vessel and silencing the forts. On the 12th, Admiral Ting surrendered.

At the conclusion of the fighting Admiral Ting committed suicide. He had been badly served by the Chinese Admiralty, in which there was much corruption, and the supply of ammunition for his guns had been inadequate and of unsuitable type, he was short of high-explosive shells, which were the most needed.

Thus ended the Chinese fleet which at the commencement of hostilities seemed to be a most formidable force, until its deficiencies became apparent. The contest at sea also demonstrated for the first time the tremendous power of the quick-firing gun, with which most of the Japanese cruisers were equipped.

After the conclusion of the war several of the Chinese warships were refloated and repaired by the Japanese and added to their navy. One of such vessels was the battleship *Chen-Yuen*, sister ship of the *Ting-Yuen*, which served under the Rising Sun flag for another 20 years.

TINHOW

Andrew Weir & Co.; 1913; A.G. Neptun; 5,232 tons; 356-5 x 50-9 x 29-7; 516 n.h.p.; 10 knots; triple-expansion engines. The British steamship *Tinhow*, on a voyage from Durban to Calcutta, was torpedoed and sunk by a submarine on May 11th, 1943, about 25 miles from the Limpopo Light, River Limpopo. Twenty-five of the crew and 50 passengers were lost.

TINOMBO

Koninklijke Paketvaart Maats.; 1930; Burgerhouts Maschinefabriek; 872 tons; 188-9 x 34-2 x 12-6; 164 n.h.p.; 9-5 knots; oil engines.

The Dutch motor vessel *Tinombo* was lying in Bombay harbour on April 14th, 1944, not far from the British ammunition ship *Fort Stikine* when the latter caught fire and blew up. The *Tinombo* was heavily damaged by the explosion and sank later with the loss of eight of the crew.

TINOS

G. Bock & Co.; 1914; J. Blumer & Co.; 2,826 tons; 332-5 x 48-7 x 19-7; 282 n.h.p.; triple-expansion engines.

The German steamship *Tinos* was bombed and sunk by British aircraft on November 26th, 1941, at Benghazi.

TIPPECANOE

United States Government; 1914; A. McMillan & Son; 5,649 tons; 415-3 x 56 x 28-1; 597 n.h.p.; triple-expansion engines. The German steamship *Holsatia* was requisitioned by the American Government and renamed *Tippecanoe*. Subsequently she was torpedoed and sunk by a German submarine in the Atlantic on July 25th, 1918.

TIPPERARY

British Navy, destroyer; 1913; J. S. White & Co.; 1,737 tons; 331 x 33 x 11-6; 30,000 s.h.p.; 32 knots; turbine engines; White-Foster boilers; two 4-7 in. guns, two 4 in., two 2 pdr., 4 T.T.

The flotilla leader *Tipperary*, Capt. C. J. Wintour, was one of four destroyers built for the Chilean Navy. At the beginning of the First World War the Admiralty purchased these vessels from Chile and changed their names, the *Almirante Riveros* becoming the *Tipperary*.

At the battle of Jutland the ship led the 1st division of the 4th Flotilla which was destined to play a great part in the destroyer actions of the battle, in which it lost five out of its 15 units. During the day it occupied a somewhat detached position, but with the

coming of darkness its opportunity arrived. The German High Seas Fleet was by that time running for the Horns Reef and was preoccupied with making its escape. At 11.20 p.m. *Tipperary* ran into a line of enemy ships on her starboard bow. The distance between the opposing forces was 1,000 yards, or thereabouts, when the *Tipperary* flashed her challenge which immediately brought a storm of shell upon her, destroying the bridge and killing Capt. Wintour and putting her completely out of action. Amid this devastation she fired two torpedoes. Four destroyers following also fired and between them got home several hits on the *Elbing* which attempted to avoid the attack by running through the battleship line. In this she was not successful and was rammed by the battleship *Posen*. She sank some hours later.

The *Tipperary* sank almost at once with the loss of 11 officers and 174 ratings killed, two ratings wounded and eight taken prisoners of war.

TIRO

Christensen & Paulsen; 1910; Sunderland S.B. Co.; 1,442 tons; 234-9 x 37-5 x 15-6; 138 n.h.p.; triple-expansion engines. The Norwegian steamship *Tiro* was torpedoed and sunk by a German submarine in the English Channel on December 29th, 1917.

TIRPITZ

Hamburg-Amerika Linie; 1921; Flensburger Schiffsbau Ges.; 7,970 tons; 471-2 x 58-2 x 32-2; 558 n.h.p.; triple-expansion engines.

The steamship *Tirpitz* struck a mine and sank on July 23rd, 1941, off San Remo.

TIRPITZ

German Navy, dreadnought battleship; 1940; Wilhelmshaven; 42,500 tons; 792-5 x 118 x 26; 30 knots; turbine engines; water tube boilers; eight 15 in. guns, twelve 5-9 in., six 4-1 in., four aircraft.

The German battleship *Tirpitz* was completed in the autumn of 1941, and from that time constituted a grave menace to Allied convoys. Her influence upon the movements of the British Home Fleet was also profound, as at that moment Britain's strength in battleships was very low indeed. It was therefore essential to destroy the *Tirpitz* as soon as possible.

To this end she was repeatedly bombed when lying at Trondheim, Norway, but with little effect. The raid on St. Nazaire (see *Campbeltown*) was partly to destroy the dock there, which was the only one in which the *Tirpitz* could berth.

On September 6th, 1943, she was at sea in company with the *Scharnhorst*, and escorted by ten destroyers. Nothing of consequence happened and after bombarding the Allied installations on the island of Spitzbergen the force returned to Norway. This was the only occasion that the *Tirpitz* fired her heavy guns in action.

On September 20th, four midget submarines carrying crews of four men each, and escorted by the submarine *Stubbhorn*, entered Soroy Sound, Altenfjord. The large submarine remained outside the sound. These vessels were the *X5*, Lt. H. Henty-Creer, *X6*, Lt. D. Cameron, *X7*, Lt. B. C. G. Place and *X10*, Lt. K. R. Hudspeth. Their attack was only partially successful. Explosive charges fixed by the *X6* and *X7* exploded and did much damage, but not sufficient to sink the *Tirpitz*. All the midget submarines were lost from one cause or another, the *X5* with all her crew and the *X7* with two of hers. The *Tirpitz* was immobilised for six months.

In February, 1944, Russian bombers attacked the battleship, causing little damage. On April 3rd a much heavier assault was made by bombers of the Fleet Air Arm which caused severe, but not vital damage. In this attack the *Tirpitz* lost 122 killed and 316 wounded.

From July onwards there was a series of air attacks terminating on November 12th, 1944, with a raid by 32 bombers of the Royal Air Force. These Lancasters carried bombs of 12,000 lb. weight, which penetrated the battleship's armoured deck; tore a hole 100 feet long in her side and exploded the after magazine. The *Tirpitz* then capsized, going down with about 1,000 of her crew. Eighty-five survivors escaped next day through a hole cut in that part of the hull which still remained above water.

TIRRANNA

W. Withelmsen; 1938; F. Schichau; 7,230 tons; 493 -6x63 -3 x 29-9; 1,819 n.h.p.; oilengines.

The Norwegian motorship *Tirranna*, on a voyage from Sydney, N.S.W., to England, was captured by a German raider on June 9th, 1940, about 400 miles W.S.W. of the Chagos Archipelago. The raider put a prize crew on board and from time to time returned to her with prisoners taken from ships she had sunk. On August 4th the *Tirranna* was sent off in an attempt to reach a German controlled port, with 293 prisoners on board. On September 22nd, when only ten miles from Bordeaux, she was torpedoed by the British submarine *Tuna* and sank in two minutes, with the loss of 87 lives.

TITAN

Ocean S.S. Co.; 1906; D. & W. Render son & Co.; 9,035 tons; 485-8x58-3x39-3; 585 n.h.p.; triple-expansion engines. The British steamship *Titan*, on a voyage from London to Sydney, was torpedoed and sunk by a German submarine at midnight on September 3rd, 1940, about 300 miles W. of the Hebrides. Six of the crew were lost.

TITANIA

Soc. Anon. di Nov. Cooperativa Garibaldi; 1918; Bar tram & Sons; 5,397 tons; 414-2x52-3x28-5; 369 n.h.p.; triple-expansion engines. The Italian steamship *Titania* was torpedoed and sunk by a British submarine on October 20th, 1942, about 50 miles S. of Lampedusa.

TITANIC

White Star Line; 1912; Harland & Wolff; 46,329 tons; 852-5 x 92-5x59-5; 6,906 r.h.p.; 22 knots; triple-expansion engines & L.P. turbine.

The loss of the *Titanic*, Capt. E. C. Smith, is, from all the circumstances surrounding it, as well as from the vast number whom it involved, the outstanding disaster in the whole chronicle of maritime happenings. The ship had been hailed by the press of the world as a wonderful achievement in size, power and luxury. Her maiden voyage provided an attractive feature for the press of Britain and America.

The vessel had eight steel decks, with watertight bulkheads, and had a double bottom, which, if the outer skin were ripped away, was calculated to be of sufficient stability to keep her afloat. In the popular press she was described as unsinkable, and this illusion persisted in the minds of many of her unfortunate passengers until within a short time of her foundering. She was provided with 14 lifeboats, each 30 feet long, on Welin double-acting davits, two cutters and four collapsible boats. These provided accommodation for 1,178 persons, or about one third of those on board when the ship was full to capacity.

At a little after midday on Wednesday, April 10th, 1912, the *Titanic* left Southampton for New York, via Cherbourg and Queenstown. When she left the last named port for her run across the Atlantic she had on board 1,348 passengers and 860 crew.

The voyage was uneventful and the weather was cold but fine, the cold intensifying on Sunday, April 14th, when wireless messages reporting the presence of icebergs began to come in. The receipt of this information did not cause Capt. Smith to reduce speed, though by nightfall it was well established that there was ice in the vicinity. It was, however, assumed that there were only a few bergs which could be detected by the lookout long before they were near enough to constitute a danger. What was not suspected by the captain and officers was that a huge field of broken ice, some 70 miles long by 12 miles broad, was drifting across the *Titanic's* course.

Soon after 11.30 p.m., when about 400 miles S.S.W. of Cape Race, the lookout in the crow's nest signalled to the bridge that ice lay ahead, and Mr. Murdoch, the first officer, who was on watch, ordered the quartermaster to starboard his helm. The time necessary to swing a vessel of the *Titanic's* proportions off her course was considerably more than that required in the case of a ship of ordinary size, and she was not sufficiently quick in answering to her helm to prevent striking a glancing blow on a large iceberg drifting by.

The shock was not severe, the ship having been struck on the starboard bow, about 20 feet from the stem, causing a rent which ran along the bilge and tore open the double bottom so badly as to send a torrent of water in upon the stokers as they toiled at the fires. The seriousness of the position was at once obvious to the officers, and wireless calls for aid were sent out. Meanwhile the passengers were, for the greater part, unaware of the collision. The engines were reversed, all watertight doors were closed and an examination of the full extent of the damage was undertaken. The steerage compartments, the mail room, containing 3,418 bags of mail, and the boiler rooms were all flooded and the ship was slowly beginning to sink. Mr. Andrews, one of the designers of the vessel, was on board and helped to make the survey, at the end of which it became clear that the vital question was how long the *Titanic* would remain afloat. No indications of the seriousness of the damage were permitted to filter through to the passengers and, even when they were ordered to come on deck with lifebelts on and the boats were got ready, most of them accepted the affair as an exciting incident. Many were so assured that they neglected to observe the most elementary precautions, and some went back to their berths. The boats were swung out and lowered to the level of the decks and the order, "Women and children only", was passed to the waiting passengers. The dynamos were still running and the ship's lights were all on, which greatly facilitated the ordered business of filling the boats. The matter was treated calmly and with no urgency, for in the minds of the captain and officers was the knowledge that out of all their charges only little more than half, at best could hope to be saved.

Many of the lifeboats left the side only half filled, partly due to the prevailing opinion that the ship would not sink, or that help would arrive soon enough to avoid the necessity of having to suffer exposure in open boats.

At 2.15 a.m. the vast bulk of the liner heaved itself upright, the after portion standing starkly out of the water like a huge pillar. The lights, brightly burning, went out, flashed on for a moment, and were then finally extinguished. With a tremendous roar as engines and other heavy standing gear broke loose from their fixings, the *Titanic* slid rather than plunged beneath the calm and oily sea, taking with her 1,503 persons.

That excellent discipline obtained to the very last is borne out by an analysis of the figures given above. Of the crew 688 members perished, showing that a great number were at their posts when the ship sank. Of passengers 815 were drowned. The saved numbered 711, of whom 189 were crew. Capt. Smith, Mr. Murdoch, the first officer, and all the engineers went down with the ship.

During the long hours before the *Titanic* sank there had been a constant succession of wireless messages to ships within call. Replies were received from the *Frankfurt*, a German ship 140 miles distant; the *Carpathia*, a Cunard liner 58 miles distant; the *Olympic*, a White Star liner 560 miles distant, and the *Virginian*, 170 miles distant. Of these the *Carpathia*, 13,603 tons, Capt. Arthur Rostron, a ship of 14 knots, managed by hard steaming to cover the distance in four hours and a half, at an average speed of 16 knots, despite the ice. She reached the scene at about 3.30 a.m., one hour and a quarter after the *Titanic* had sunk. This ship collected all boats and within four hours was carrying the survivors to New York.

One circumstance which added poignancy to the tragedy was the presence only ten miles away, of the Leyland liner, *Californian*; 6,223 tons. This ship remained hove-to for the greater part of the night owing to the presence of ice. Her wireless operator had gone to his berth after 16 hours of duty, and the wireless cabin was closed down. The watch saw the rockets sent up by the *Titanic* from time to time, but these were assumed to be signals from fishing smacks on the Newfoundland Banks. No action was taken, and the only ship near enough to have rescued the whole of the *Titanic's* company eventually steamed away unaware of the tragedy.

TITO SPERI

Italian Government; 1910; W. Doxford & Sons; 3,892 tons; 360 X 50 - 3 x 25 • 6; 300 n.h.p.; triple-expansion engines. The Austrian steamship *Izabran* was requisitioned by the Italian Government and renamed *Tito Spери*. Subsequently she was torpedoed and sunk by a submarine in the Mediterranean on August 10th, 1917.

TIZIANO

Tirrenia Soc. Anon. di Nav.; 1903; *Grangemouth & Greenock Dockyard Co.*; 1,333 tons; 267-4x36-2x22-3; 208 n.h.p.; triple-expansion engines.

The Italian steamship *Tiziano* was bombed and sunk by Allied aircraft on May 28th, 1943, at Leghorn.

TJILEBOET

Java-China-Japan Lijn; 1918; *Maats. Fyenoord*; 5,760 tons; 420 -3x54-3x27-5; 544 n.h.p.; triple-expansion engines.

The Dutch steamship *Tjileboet* left Swansea on November 7th, 1942, for Bahia and the Middle East. She was last seen by other ships in the convoy on the 28th, about 600 miles W.S.W. of Freetown. A German broadcast some weeks later claimed that she had been sunk by a submarine.

TJISALAK

Java-China-Japan Lijn; 1917; *Nederlandsche Scheepsbouw Maats.*; 5,787 tons; 419-9x54-2x27-3; 536 n.h.p.; triple-expansion engines.

The Dutch steamship *Tjisalak* was torpedoed and sunk by a Japanese submarine on March 26th, 1944, about 600 miles S. of Ceylon, on a voyage from Melbourne to Colombo. There were 103 persons on board including 22 Lascar survivors from another ship. The Japanese opened fire on the boats after taking five prisoners of war and there were only five other survivors picked up some days later.

TJOMO

Samuelsen-Olserfs Rederi; 1892; *Wood, Skinner & Co.*; 1,453 tons; 250x35x15-4; 138 n.h.p.; triple-expansion engines.

The Norwegian steamship *Tjomo* was sunk by a submarine in the Mediterranean on May 21st, 1916.

TOA MARU

Osaka Shosen K.K.; 1939; *KawaminamiKogyo K.K.*; 6,732 tons; 446-2x58-1x32-8; 982 n.h.p.; oilengines. The motorship *To a Maru* was sunk by U.S. land-based aircraft on January 31st, 1943, S. of Bougainville.

TOA MARU

Iino ShojiK.K.; 1934; *Kawasaki Dockyard Co.*; 10,052 tons; 502-3x65x37; 2,115 n.h.p.; oilengines.

The tanker *Toa Maru* was torpedoed and sunk by the U.S. submarine *Searaven* on November 25th, 1943, about 100 miles N. of Seniavina Island.

TOAN MARU

Chosen Yusen K.K.; 2,110 tons.

The steamship *Toan Maru* was torpedoed and sunk by the U.S. submarine *Sailfish* on August 24th, 1944, about 50 miles S. of Formosa.

TOBOL

Russian Volunteer Fleet Association; 1901; *W. Doxford & Sons*; 3,741 tons; 342-4x46-6x24-9; 301 n.h.p.; triple-expansion engines.

The Russian steamship *Tobol* was torpedoed and sunk by a German submarine in the North Sea on September 11th, 1917.

TOCANTINS

LloydBrasileiro; 1901; *J. Blumer & Co.*; 4,113 tons; 350x46-5x18-8; 350 n.h.p.; triple-expansion engines.

The Brazilian steamship *Tocantins*, on a voyage from Sao Francisco to Santos with timber, struck a rock and sank in fog on August 30th, 1933, at Queimada Grande.

TOCKWITH

William S. Maclean; 1887; *J. Readhead & Co.*; 2,051 tons; 280x38-7x17-5; 215 n.h.p.; triple-expansion engines.

The British steamship *Tockwith* was wrecked near Jaffa on February 23rd, 1911, while carrying oil from Philadelphia to the Levant.

TOEI MARU

Nitto Kogyo Kisen K.K.; 1938; *Kawasaki Dockyard Co.*; 10,023 tons; 503-3x65x37-1; 2,250 n.h.p.; oilengines. The tanker *Toei Maru* was torpedoed and sunk by the U.S. submarine *Silversides* on January 18th, 1943, S. of the Marshall Islands.

TOEI MARU

Yamamoto Kisen K.K.; 1937; *KawasakiDkyd. Co.*; 4,004 tons; 353-6x50x27-6; turbine engines.

The steamship *Toei Maru* was torpedoed and sunk by the U.S. submarine *Seahorse* on February 1st, 1944, 500 miles N. of the Schouten Islands.

TOEI MARU

Ogino Kaisho K.K.; 1901; *W. Denny & Bros.*; 2,323 tons; 301-0x42-2x13-2; 224 n.h.p.; triple-expansion engines.

The steamship *Toei Maru* was torpedoed and sunk by the U.S. submarine *Tambor* on August 13th, 1944, about 200 miles E. of Sakhalin.

TOEN MARU

Okada Gumi K.K.; 1917; *Palmers* Co.*; 5,232 tons; 350-4x 50-1x34-5; 446 n.h.p.; triple-expansion engines.

The tanker *Toen Maru* was torpedoed and sunk by the U.S. submarine *Thresher* on March 2nd, 1943, in the Straits of Macassar.

TOFUKU MARU

Daiko Shosen K.K.; 1919; *Kawasaki Dockyard Co.*; 5,857 tons; 385 x 57 x 36; 436 n.h.p.; triple-expansion engines.

The steamship *Tofuku (Tohuku) Maru* was torpedoed and sunk by the U.S. submarine *Gurnard* on December 24th, 1943, 20 miles S. of Nagashima, Japan.

TOGIAN

Koninklijke Paketvaart Maats.; 1930; *N.V. Werf Gusto*; 979 tons; 203 -2x34-1x11-5; 144 n.h.p.; oil engines. The Dutch motorship *Togian* was sunk by the Japanese on February 4th, 1942, in the Sulu Sea, with the loss of all on board.

TOGO

Soc. Anon. Ilva; 1882; *R. Thompson & Sons*; 1,484 tons; 258 -2x34-7x17-1; 208 n.h.p.; compound engines.

The Italian steamship *Togo* was torpedoed and sunk by a submarine in the Mediterranean on May 12th, 1918.

TOGO MARU

Toko ShojiK.K.; 1920; *Toledo S.B. Co.*; 2,514 tons; 251-1 x 43-8x26; 315 n.h.p.; triple-expansion engines.

The steamship *Togo Maru* was torn from her moorings during a typhoon on September 14th, 1940, and wrecked at Tinian, Mariana Islands.

TOGSTON

South Metropolitan Gas Co.; 1909; *Osbourne, Graham & Co.*; 1,057 tons; 210-5x33-2x13-6; 106 n.h.p.; 8 knots; triple-expansion engines.

The steamship *Togston* was torpedoed and sunk by a German submarine 20 miles S. by E. -J- E. of Flamborough Head on October 18th, 1917. Five men were killed. The captain was among the survivors.

TOGSTON

Broomhill Steamships; 1924; *Furness S.B. Co.*; 1,547 tons; 245-4x38-6x15-5; 166 n.h.p.; triple-expansion engines.

The British steamship *Togston*, on a voyage from Blyth to London with coal, was torpedoed and sunk by a German motor torpedo boat on March 8th, 1941, two miles from Smith's Knoll. Eight of the crew of 19 were lost.

TOHO MARU

Iino Shoji K.K.; 1936; *Kawasaki Dockyard Co.*; 9,987 tons; 500x65x37; 2,115 n.h.p.; oilengines.

The tanker *Toho Maru* was torpedoed and sunk by the U.S. submarine *Gudgeon* on March 29th, 1943, off Samarinda, Borneo.

TOHO MARU

Dairen Kisen K.K.; 1918; *Russell & Co.*; 4,716 tons; 385X 52x26-5; 500 n.h.p.; triple-expansion engines. The steamship *Toho Maru* was torpedoed and sunk by the U.S. submarine *Pintado* on June 1st, 1944, about 250 miles W. of the Ladrone Islands.

TOHO MARU

Toho Kisen K.K.; 1938; *Kawasaki Dockyard Co.*; 4,092 tons; 354-4x50x27-6; 500 n.h.p.; turbine engines. The steamship *Toho Maru* was torpedoed and sunk by the U.S. submarine *Thresher* on January 15th, 1944, about 50 miles N. of Luzon Island, Philippines.

TOHO MARU

Iino Kaiun K.K.; 10,238 tons. The tanker *Toho Maru* (or *Shitoho Maru*) was bombed and sunk by U.S. land-based aircraft on June 15th, 1945, S. of Ko Samui, Malay Peninsula.

TOKACHIMARU

Hokkaido Tanko Kisen K.K.; 1939; *Tsurumi Seitetsu Zosen K.K.*; 1,932 tons; 278-2x40x21-3; 263n.h.p.; triple-expansion engines.

The steamship *Tokachi (Tokati) Maru* struck a mine and sank on January 18th, 1943, off Semarang, Java.

TOKAI MARU

Nippon Yusen K.K.; 1868; *J.G. Lawrie*; 1J 21 tons; 242 -5 X 26-8x16-8; 150 n.h.p.; compound engines. The Japanese steamship *Tokai Maru* was sunk by collision with the Russian steamship *Progress*, 1,214 tons, on October 29th, 1903. Forty-eight of those on board were drowned.

TOKAI MARU

Osaka Shosen K.K.; 1930; *Mitsubishi Zosen Kaisha*; 8,358 tons; 446x60-5x40-7; 1,495 n.h.p.; oil engines.

The motorship *Tokai Maru* was torpedoed and sunk by the U.S. submarines *Snapper* and *Flying Fish* on January 26th, 1943, S. of Guam.

TOKAI MARU

Taito Kisen Goshi Kaisha; 1905; *Grangemouth & Greenock Dockyard Co.*; 3,099 tons; 330-6x48x22; 283 n.h.p.; triple-expansion engines.

The steamship *Tokai Maru* was sunk by U.S. carrier-based aircraft on July 15th, 1945, off Iwanai, Japan.

TOKITSUKAZE

Japanese Navy, destroyer; 1939; *Uruga*; 2,000 tons; 364 x 35x11; 45,000 s.h.p.; 36 knots; turbine engines; *Kanpon boilers*; six 5 in. guns, 2 m.g., 8 T.T.

The Japanese destroyers *Arashio* and *Asashio*, both of 1,500 tons, with the *Shirayuki*, 1,700 tons, and *Tokitsukaze* were sunk in the Huon Gulf while on convoy duty. The convoy, which was a very large one carrying the Japanese 20th and 51st Divisions, left Rabaul, New Britain, on February 28th, 1943, for New Guinea. It proceeded in small groups by devious routes in order to reduce the likelihood of discovery by aircraft reconnaissance. The first group was sighted by U.S. planes on the evening of March 1st, and consisted of seven transports escorted by seven warships. The group was then off the Willaumez Peninsula, steering west, and during the hours of darkness it was reinforced by five transports and three warships, making 22 in all. An Allied air force began an attack shortly after daylight on the 2nd and continued all day until nearly all the transports and the four destroyers were sunk. By the 3rd the Japanese had scuttled the remainder of their transports and were making for shore in boats and rafts, but most of these were destroyed by Allied bombers.

The number of troops carried by the convoy approximated to 15,000, of whom only 92 landed on New Guinea, but a number of rafts and boats reached neighbouring islands without further loss.

All the lost destroyers carried complements of over 200.

The number of aircraft of all classes employed by the Allies was 136, of which only three were lost. The Japanese lost 63 aircraft.

TOKIWA MARU

Shimatani Kisen K.K.; 1918; *OnoSeikichi*; 1,203 tons; 220 -1 x 32x18; 88 n.h.p.; triple-expansion engines. The steamship *Tokiwa Maru* was bombed and sunk by U.S. land-based aircraft on December 13th, 1943, off New Ireland.

TOKIWA MARU

Kaburagi Kisen K.K.; 1916; *Mitsubishi Dockyard & E. Works*; 6,971 tons; 445x58x34; 816 n.h.p.; turbine engines. The steamship *Tokiwa Maru* was torpedoed and sunk by the U.S. submarine *Gunnel* on June 19th, 1943, in the East China Sea.

TOKIWASAN MARU

Mitsui Bussan Kaisha; 1937; *Tama Zosensho*; 1,804 tons; 264-5x38x20; 110 n.h.p.; triple-expansion engines. The steamship *Tokiwasan Maru* was torpedoed and sunk by the U.S. submarine *Bang* on September 9th, 1944, about 200 miles N.W. of the Bonin Islands.

TOKO MARU

Okada Gumi K.K.; 1940; *Osaka Iron Works*; 2,747 tons; 307-9x45x24-9; steam engines.

The steamship *Toko Maru* was torpedoed and sunk by the U.S. submarine *Seahorse* on January 30th, 1944, about 350 miles E. of the Palau Islands.

TOKOMARU

Dairen Kisen K.K.; 1908; *Rickmers Akt. Ges.*; 4,180 tons; 367-2x47-5x30; 253 n.h.p.; triple-expansion engines. The steamship *Toko Maru* was torpedoed and sunk by the U.S. submarine *Ray* on October 12th, 1944, 25 miles S. of Lubang Island.

TOKUHEIMARU

Japanese Government; 3,439 tons.

The steamship *Tokuhei Maru* was bombed and sunk by U.S. land-based aircraft on August 31st, 1944, near Kiukiang, Yangtze River.

TOKUSHIMAMARU

Nippon Yusen K.K.; 1913; *Russell & Co.*; 5,975 tons; 423X 56x28-7; 555 n.h.p.; triple-expansion engines. The steamship *Tokushima Maru* was torpedoed and sunk by the U.S. submarine *Piluda* on September 16th, 1944, about 100 miles S. of Formosa.

TOKUWA MARU

Nitto Kisen K.K.; 1,943 tons.

The steamship *Tokuwa Maru* was torpedoed and sunk by the U.S. submarines *Hawkbill* and *Becuna* on October 9th, 1944, 80 miles W. of Busuanga Island, Philippines.

TOKUYAMA MARU

Nippon Yusen K.K.; 1915; *Kawasaki Dockyard Co.*; 7,029 tons; 445 x 58 x 34; 628 n.h.p.; triple-expansion engines. The Japanese steamship *Tokuyama Maru* was torpedoed and sunk by a German submarine in the Western Atlantic on August 1st, 1918.

TOKUZANMARU

Tomoe Gumi K.K.; 1899; *A. & J. Inglis*; 5,449 tons; 410x 50-7x28-8; 387n.h.p.; triple-expansion engines. The steamship *Tokuzan Maru* was sunk by collision with the steamship *Koki Maru*, 5,291 tons, on September 4th, 1941, off Soya Kaikyo, La Perouse Strait. Seventeen of the crew were lost.

TOKWA MARU

Kawasaki Kisen K.K.; 1918; *Mitsui Bussan K.K.*; 2,503 tons; 284-5x42-5x23; 74 n.h.p.; triple-expansion engines. The steamship *Tokwa Maru*, on a voyage from Otomari to Otaru, was wrecked on December 23rd, 1928, 14 miles N. of Teshuwo, Hokkaido.

TOKYO MARU

TOKYO MARU

Settsu Shosen K.K.; 1936; *Mitsui Bussan Kaisha*; 6,486 tons; 424-7x57-4x36-1; 1,231 n.h.p.; oilengines. The steamship *Tokyo Mam* was torpedoed and sunk by the U.S. submarine *Scamp* on November 10th, 1943, N. of the Admiralty Islands.

TOLEDO

John Tully; 1882; *J. L. Thompson & Sons*; 2,843 tons; 301 x 42-1x28-9; 283 n.h.p.; compound engines. The British steamship *Toledo* was wrecked on the Crim rock, Scilly Isles, on August 20th, 1898, in fog, while on a voyage from Galveston to Rotterdam carrying a general cargo.

TOLESBY

R. Ropner & Co.; 1901; *Ropner & Son*; 3,967 tons; 336-3x 46-6x25-5; 300 n.h.p.; triple-expansion engines. The British steamship *Tolesby* was wrecked at Freshwater Point, Cape Race, on January 14th, 1908, while carrying a cargo of cotton on a voyage from Galveston to Havre.

TOLOSA

Fearnley & Eger; 1915; *Fredrikstads Mek. Verksted*; 1,833 tons; 265x42-1x17-9; 216 n.h.p.; triple-expansion engines. The Norwegian steamship *Tolosa* was sunk by a German submarine in the English Channel on September 13th, 1916.

TOLOSA

Fearnley & Eger; 1930; *Smith's Dock Co.*; 1,974 tons; 270-7 x 43 X18 • 7; 182 n.h.p.; triple-expansion engines. The Norwegian steamship *Tolosa* was torpedoed and sunk by a German submarine on February 9th, 1942, about 400 miles W. of the Bermudas. Twenty-two of the crew were lost.

TOLTEN

Chilean Government; 1938; *Aalborg Veer ft A/S*; 1,858 tons; 280-7x43-6x17-5; 231 n.h.p.; compound engines & L.P. turbine.

The steamship *Tolten* was formerly the Danish *Lotta*, taken over by the Chilean Government after the German invasion of Denmark. She was torpedoed and sunk by a German submarine on March 13th, 1942, off Barnegat on a voyage from Baltimore to New York. Twenty-four of the crew of 27 were lost.

TOM

Cia. Nav. Bachi; 1896; *W. Gray & Co.*; 2,413 tons; 290x 42-1x17-4; 224 n.h.p.; triple-expansion engines. The Spanish steamship *Tom* was torpedoed and sunk by a German submarine in the Bay of Biscay on April 14th, 1917.

TOMI MARU

Nippon Kaiun K.K.; 1949; *Sanko Zosensho K.K.*; 725 tons; 194-5x31-5x15-1; oilengines.

The motorship *Tomi Maru*, on a voyage from Nagasaki to Tokyo with sheet iron, foundered in heavy weather on December 10th, 1950, off the north west coast of Kyushu, with the loss of 26 lives.

TOMITSU MARU

Japanese Navy; 1937; *Mitsubishi Jukogyo K.K.*; 2,933 tons; 305-2x45-3x26-2; 233 n.h.p.; turbine engines. The steamship *Tomitsu Maru* was taken over by the Japanese Navy for use as an auxiliary gunboat. She was torpedoed and sunk by the U.S. submarine *Sea Dog* on October 22nd, 1944, N. of the Ryukyu Islands.

TOMIURA MARU

Nippon Yusen K.K.; 1918; *Mitsubishi Zosen Kaisha*; 3,821 tons; 345x50x29; 342 n.h.p.; triple-expansion engines. The steamship *Tomamura Maru* was bombed and sunk by U.S. land-based aircraft on December 20th, 1942, off Rabaul.

TOMODURU

Japanese Navy, torpedo boat; 1933; *Maizuru*; 527 tons; 254 x 24x6; 7,000 h.p.; 26knots; turbine engines; three 4-7 in. guns, 1 m.g. & 2 T.T. The Japanese torpedo boat *Tomoduru*, Lt. Cdr. Iwase, was rated as

a second class destroyer by the Japanese Admiralty. On March 6th, 1934, the vessel left Sasebo to take part in manoeuvres with the 21st Flotilla and the cruiser *Tatsuta*. The exercises lasted until the 11th when a gale sprang up and the force became separated in thick fog. At 2 a.m. on the 12th the fog lifted and it was then discovered that the *Tomoduru* was missing. A search was carried out over a wide area and 12 hours later she was found floating capsized. The hull, from the interior of which faint hammerings could be heard, was taken in tow by the *Tatsuta* and brought to Sasebo. Here rescuers were able to bore a hole in the side and to pump in fresh air and milk and also to pass waterproof electric lights for the assistance of those within. By the afternoon of the 13th it was known that of the 113 officers and ratings on board only 13 were alive and were brought out through the hole. One officer and two ratings had been picked up by the vessels engaged in the search, leaving 97 as the number lost.

TONAN MARU

Nippon Suisan K.K.; 1906; *Denny & Bros.*; 9,866 tons; 460-4X 60-2x31-2; 943 n.h.p.; triple-expansion engines.

The tanker *Tonan Maru* was torpedoed and sunk by the U.S. submarine *Bowfin* on November 28th, 1943, off the east coast of Indo-China.

TONAN MARU No. 2

Nippon Suisan K.K.; 1937; *Osaka Iron Works*; 19,262 tons; 534-8x74x56-8; triple-expansion engines & L.P. turbines. The tanker *To nan Maru No. 2* was torpedoed and sunk by the U.S. submarine *Pintado* on August 22nd, 1944, about 200 miles E. of Ningpo.

TONAN MARU No. 3

Nippon Suisan K.K.; 1938; *Osaka Iron Works*; 19,209 tons; 534-8x74x56-8; triple-expansion engines & L.P. turbines. The tanker *Tonan Maru No. 3* was sunk by U.S. carrier-based aircraft on February 17th, 1944, in the Caroline Islands.

TONBRIDGE

Southern Railway; 1924; *D. & W. Henderson*; 683 tons; 220-4x33-6x14-1; 166 n.h.p.; 15 knots; triple-expansion engines.

The cross-channel steamship *Tonbridge* was taken over by the Admiralty during the Second World War for service as an auxiliary netlayer. The vessel was bombed and sunk off Great Yarmouth by German aircraft on August 22nd, 1941. She carried a complement of about 40.

STONE

Japanese Navy, heavy cruiser; 1937; *Mitsubishi*; 14,000 tons; 640x63x14-7; 90,000 s.h.p.; 33 knots; turbine engines; Kanponboilers; eight 8 in. guns, eight 5 in., many 47mm., 12 T.T., 6 aircraft.

The Japanese heavy cruiser *Tone* was one of a group comprising three battleships, two heavy cruisers and one light cruiser, lying in Kure harbour on July 24th, 1945, when a concentrated attack was made upon shipping by British and American naval aircraft. Every ship was sent to the bottom, the *Tone* being reduced to a complete wreck and sinking in flames. This was the last large scale air attack prior to the cessation of hostilities between Japan and the Allies on August 15th, 1945.

The full story of the attack is told under the battleship *Haruna*.

STONE MARU

Tamai Shosen K.K.; 1920; *Mitsui Bussan Kaisha*; 4,070 tons; 345 x50x26-6; 350 n.h.p.; triple-expansion engines. The steamship *Stone Maru* was torpedoed and sunk by the U.S. submarine *Grouper* on September 21st, 1942, about 100 miles from Shanghai.

STONEGAWA MARU

Matsuoka Kisen K.K.; 1913; *A. McMillan & Son*; 4,996 tons; 400-8x52-1x27-3; 458 n.h.p.; triple-expansion engines. The steamship *Stonegawa Mam* was bombed by U.S. carrier-based aircraft and sunk by gunfire on August 4th, 1944, N. of the Bonin Islands.

TONEI MARU

Dairen Risen K.K.; 4,930 tons.
The steamship *Tonei Mam* was torpedoed and sunk by the U.S. submarine *Peto* on October 1st, 1943, S. of the Caroline Islands.

TONGAN

Shawhsing S.S. Co.; 1891; *Fleming & Ferguson*; 1,141 tons; 220 X 30 -1 X15 - 5; 123 n.h.p.; quadruple-expansion engines. The Chinese steamship *Tongan*, on a voyage from Tsingtao to Newchwang with coal, was sunk by collision with the Chinese steamship *Lienhsing*, 1,562 tons, on August 12th, 1930, off the Shantung Promontory. Seven of the crew and about 70 passengers were lost.

TONGARIRO

New Zealand Shipping Co.; 1901; *Hawthorn, Leslie & Co.*; 8,895 tons; 457X 58x38-4; 883 n.h.p.; triple-expansion engines. The British steamship *Tongariro* was wrecked on Bull Rocks, off Portland Island, N.Z., on August 30th, 1916. She was on a voyage from London, via Newport News, to Wellington, N.Z., carrying a general cargo.

TONGSHAN

T.W. Richardson; 1890; *Harvey & Co.*; 1,750 tons; 266x 36-8x13-6; 156 h.p.; triple-expansion engines. The British cargo ship *Tongshan* was wrecked at Swatow on December 17th, 1891, while on a voyage from Sourabaya to Swatow carrying a general cargo.

TOONAN

China Merchants Steam Nav. Co.; 1881; *Palmers' Co.*; 1,482 tons; 253-2x36-1x27-3; 172 n.h.p.; triple-expansion engines. The Chinese steamship *Toonan*, on a voyage from Newchwang to Shanghai with passengers and a consignment of silver valued at \$1,500,000, was sunk by collision with the Japanese steamship *Choshun Mam*, 4,026 tons, at 3 a.m. on July 10th, 1933, in fog 13-J- miles off the South East Promontory, Shantung. One hundred and sixty-eight passengers and crew were lost and 89 saved.

TOPA TOPA

Waterman S.S. Corp.; 1920; *Los Angeles S.B. & D.D. Corp.*; 5,356 tons; 410x54-4x27-2; 421 n.h.p.; triple-expansion engines. The American steamship *Topa Topa* was torpedoed and set on fire by a German submarine at 1 a.m. on August 29th, 1942, on a voyage from New York to Takoradi. The ship burned for 90 minutes and sank. The captain, 18 of the crew and seven gunners were lost.

TORCELLO

Soc. Italiana Petroliere d'Oriente; 1892; *Palmers' Co.*; 3,336 tons; 338-8x42-1x28-7; 265 n.h.p.; triple-expansion engines. The Italian tanker *Torcello* was torpedoed and sunk by a Russian submarine on November 5th, 1941, 18 miles from Liman Burnu, Black Sea.

TORDENSKJOLD

Norwegian Navy, coastal defence ship; 1897; *Armstrong*; 3,858 tons; 304x48-5x17-7; 4,500 h.p.; 16-9 knots; triple-expansion engines; two 8-2 in. guns, six 4-7 in., eight 3 in., two 1 pdr. The coastal defence ship *Tordenskjold* fell into the hands of the Germans when they invaded Norway in April, 1940. She proved a most useful prize to her captors who manned her with a German crew and rearmed her as an anti-aircraft ship, giving her the name of *Nymphe*. In the Spring of 1945 she was bombed and sunk by British aircraft.

TORDENVORE

Lundegaard & Stray; 1884; *J. Readhead & Co.*; 1,565 tons; 259 x36-1x17-6; 161 n.h.p.; compound engines. The Norwegian steamship *Tordenvore* was sunk by a German submarine off the north-west coast of Spain on June 9th, 1917.

TORE JARL

Nordenfjeldske Dampskibsselskab; 1903; *Irvine S.B. & E. Co.*; 1,256 tons; 230-1x34-2x14-6; 209 n.h.p.; triple-expansion engines. The Norwegian steamship *Tore Jarl* was torpedoed and sunk by a German submarine in the North Sea on May 7th, 1917.

TOREFJELL

A/SLukseffjell; 1902; *Grangemouth & Greenock Dockyard Co.*; 2,483 tons; 299-8x44-6x20; 228 n.h.p.; triple-expansion engines. The Norwegian steamship *Torefjell* left Gdynia on December 24th, 1930, for Harstad with coal. Nothing was heard of the ship after passing Elsinore on the 26th. until bodies of some of the crew and wreckage were washed up some days later. She was assumed to have been wrecked in a storm off Egersund on the 27th.

TORHAMVAN

Wilson & Reid; 1921; *Midland S.B. Co.*; 2,429 tons; 251 x43-6x23-5; 184 n.h.p.; triple-expansion engines. The Canadian cargo ship *Torhamvan* was wrecked at Ferryland, N.F.L., on October 29th, 1926, while on a voyage from St. John's, N.F.L., to Halifax, N.S.

TORINIA

Anglo-Saxon Petroleum Co.; 1939; *Swan, Hunter & Wigham Richardson*; 10,364 tons; 505-8x64-6x36-9; 628 n.h.p. 12 knots; oil engines. The motor tanker *Torinia*, Capt. H. Jackson, on a voyage from Curasao to the Clyde with 13,815 tons of fuel oil, was torpedoed and sunk by a German submarine on September 21st, 1940, about 400 miles W.N.W. of Inishtrahull. Five of the crew were lost.

TORINO

Soc. Italiana di Servizi Marittimi; 1913; *Soc. Esercizio Bacini*; 4,159 tons; 360-6x44-8x24-4; 454 n.h.p.; triple-expansion engines. The Italian steamship *Torino* was torpedoed and sunk by a submarine in the Mediterranean on February 14th, 1917.

TORMES

P. M. Tintore & Co.; 1877; *W. Gray & Co.*; 1,644 tons; 261 x 33-6x23-4; 170 h.p.; compound engines. The Spanish steamship *Tormes* was on a voyage from Malaga to Liverpool when she was wrecked off the Crow Rock, near Pembroke, on October 30th, 1894, with the loss of 21 lives. Seven survivors reached land.

TORNADE

French Navy, destroyer; 1925; *Dyle & Bacalan*; 1,319 tons; 347x33x13-7; 33,000 s.h.p.; 33 knots; turbine engines; four 5-1 in. guns, two 37 mm.A.A., 6 T.T. The French destroyers *Tornade*, *Tramontane* and *Typhon*, all of 1,319 tons, and the *Epervier*, 2,441 tons, were lying at Oran when the Allies made their landing on November 8th-9th, 1942. The destroyers, assisted by the shore batteries, sank the British cutters *Hart land* and *Walney*, which had forced the entrance to the harbour, with heavy loss of life. They then sallied out against the British cruisers supporting the landing. Here they were not so successful and all of them were sunk or forced ashore. The *Tornade*, badly damaged and on fire, was beached outside the harbour. For full story of the landing at Oran see under the cutter *Hartland*.

TORNADO

British Navy, destroyer; 1917; *A. Stephen & Son*; 1,091 tons; 276x26x11; 27,000 s.h.p.; 36 knots; turbine engines; Yarrow boilers; three 4 in. guns, 4 T.T. On the night of December 22nd, 1917, the destroyers *Tornado* and *Torrent* were patrolling in company in the North Sea. When off the Maas light-vessel they were attacked by enemy submarines and both were sunk. The destroyers were sister ships and each carried an official complement of 82.

TORNE

Trafik-AjB. Grangesberg-Oxelosund; 1913; Lindholmens Varv; 3,792 tons; 359-5x50-2x23-7; 292 n.h.p.; triple-expansion engines.

The Swedish steamship *Tome* was sunk in a naval action at Narvik on April 14th, 1940, during the German invasion of Norway.

TORO

Wilson Line; 1904; Earless Shipbuilding Co.; 3,066 tons; 330 x 48 - 3 X 22 - 5; 265 n.h.p.; 9 knots; triple-expansion engines.

The steamship *Toro* was torpedoed and sunk by a German submarine 200 miles W.N.W. of Ushant on April 12th, 1917. Fourteen persons were killed. The captain and the ship's gunner were taken prisoner by the submarine.

TORO

Rederi-A/B. Rex; 1924; Kockums Mek. Verkstad; 1,467 tons; 254 3x38-3x16-5; 156 n.h.p.; triple-expansion engines.

The Swedish steamship *Toro* struck a mine and sank on December 12th, 1939, near Falsterbo on a voyage from Malmo to Ronnskar.

TORO

Compania Argentina de Nav. Dodero; 1922; Werft Nobiskrug G.m.b.H.; 1,405 tons; 250x37-5x12-8; 110 n.h.p.; triple-expansion engines.

The Argentine steamship *Toro*, on a voyage from San Francisco to Buenos Aires, was sunk by collision with the American steamship *Atlanta City*, 5,686 tons, at midnight on October 3rd, 1945, 40 miles off Albardao.

TORO MARU

Kita Nippon Kisen K.K.; 1939; Kawaminami Kogyo K.K.; 1,939 tons; 271-6x40x20-3; 150 n.h.p.; triple-expansion engines.

The steamship *Toro Mam* was torpedoed and sunk by the Dutch submarine *K. 12* on December 12th, 1941, off Cape Beroe, Malaya.

TOROA

T.M.Lane; 1898; Lane & Brown; 164 tons; 110x24-4x8; auxiliary engines.

The three masted auxiliary schooner *Toroa*, Capt. O. Jarman, left Grey-mouth, New Zealand, on August 10th, 1903, for Wanganui. She carried a cargo of 205 tons of coal and several tons of bricks. She encountered very bad weather in Cook Strait and was believed to have foundered in the neighbourhood of Cape Farewell. Her crew numbered seven.

TORONDOC

Pater son Steamships; 1927; Swan, Hunter & Wigham Richardson; 1,927 tons; 252-9x43-4x17-8; 92 n.h.p.; triple-expansion engines.

The Canadian steamship *Torondoc* left St. Thomas, Virgin Islands, for Trinidad on May 18th, 1942. Nothing more was heard of the ship or her crew of 21 until a German broadcast in October, 1942, claimed that she had been sunk by a submarine.

TORONTO CITY

Chas. Hill & Sons; 1925; Barclay, Curie & Co.; 2,486 tons; 321-8x46-2x19-7; 279 n.h.p.; 10-5 knots; triple-expansion engines.

The steamship *Toronto City*, Capt. E. J. Garlick, was taken over by the Admiralty in September 1940 for meteorological service. The vessel operated in the North Atlantic and on July 1st, 1941, reported herself in a position about 1000 miles E. of Cape Race bound for St. John's, N.F. Nothing more was heard of the ship until a German broadcast on August 29th, claimed that she had been sunk by a submarine.

TORPEDO BOAT No. 11

British Navy, torpedo boat; 1907; Yarrow; 225 tons; 172 x 18x5-5; 3,750 i.h.p.; 26 knots; turbine engines; two 12 pdr. > guns, 3 T.T.

The *Torpedo Boat No. 11*, Lt. J. A. P. Legh, was patrolling in the North Sea on March 10th, 1916, when she struck a mine. She sank very rapidly taking with her three officers and 20 ratings of her

complement of 35. Lt. Legh was among the survivors. At the same time the destroyer *Coquette* (which see) struck a mine not far away and sank with the loss of many lives.

TORPEDO BOAT No. 48

Japanese Navy, torpedo boat; 1900; Schichau; 82 tons; 1,200 i.h.p.; 24 knots; triple-expansion engines; one 3 pdr. gun, 2 T.T.

The Japanese *Torpedo Boat No. 48*, was one of a flotilla blockading Port Arthur during the Russo-Japanese War. On May 12th, 1904, the flotilla was engaged in minesweeping operations in Kerr Bay. In the course of this duty the *No. 48* struck a mine and was blown up with a loss of 14 men killed and wounded.

TORPEDO BOAT No. 53

Japanese Navy, torpedo boat; 1900; Kure Dockyard; 53 tons; 700 i.h.p.; 20 knots; triple-expansion engines; one 3 pdr. gun, 2 T.T.

The Japanese *Torpedo Boat No. 53*, under command of Lt. Nagata, was one of a flotilla which attacked the Russian battleship *Sevastopol* in a snowstorm off Port Arthur, on December 14th, 1904. The night was very dark and the boats had great difficulty in locating the battleship. Two torpedoes were discharged without doing much damage. On the return to her base *No. 53* struck a floating mine and foundered with all hands, 16 in number.

TORPEDO BOAT No. 56

British Navy, torpedo boat; 1886; Thorny croft; 60 tons; 127-Sx 12-5 x 6 - 2; 700 i.h.p.; 21 knots; triple-expansion engines; two 3 pdr. guns, 4 T. T.

Torpedo Boat No. 56 was one of a small flotilla engaged on patrol duty in and around the Mediterranean entrance to the Suez Canal during the Turkish crisis of 1906. At the termination of the crisis the boats were withdrawn, the *No. 56* being taken in tow by the cruiser *Arrogant*. The weather was rough and when off Damietta, on Friday, May 18th, 1906, the torpedo boat suddenly capsized, going down with the loss of seven of her complement of 15.

TORPEDO BOAT No. 84

British Navy, torpedo boat; 1889; Yarrow; 85 tons; 130x 13-5 x 5 - 5; 1,100 i.h.p.; 23 knots; triple-expansion engines; three 3pdr. guns, 3 T.T.

Torpedo Boat No. 84 was engaged in manoeuvres, which included a night attack on Malta. On April 18th, 1906, the destroyer *Ardent* ran down the torpedo boat, which sank immediately. Of her complement of 19 no lives were lost at the time, but Gunner T. Courtis died subsequently from injuries received when the ships collided.

The *Ardent* was badly damaged, but was towed into Malta and docked.

TORQUATO GENNARI

U.Gennarifu.T.; 1890; W. Dobson & Co.; 1,012 tons; 247x 28 - 4 x 12 - 7; 98 n.h.p.; triple-expansion engines.

The Italian steamship *Torquato Gennari* was torpedoed and sunk by a British submarine on December 29th, 1942, about 16 miles from the Kerkenna Islands.

TORRE DEL ORO

Hijos de Jose Taya; 1888; Craig, Taylor & Co.; 1,321 tons; 243-8x31 '3x17-2; 138 n.h.p.; triple-expansion engines.

The Spanish steamship *Tone del Oro*, on a voyage from Barcelona to Marseilles, was wrecked on October 27th, 1921, at Gala Morell on the north coast of Minorca. Only two of her crew were saved.

TORRENT

British Navy, destroyer; 1916; Swan Hunter, Wigham Richardson; 1,069 tons; 274x26x11; 27,000 s.h.p.; 36knots; turbine engines; Yarrow boilers; three 4 in. guns, 4 T.T. On the night of December 22nd, 1917, the destroyers *Tornado* and *Torrent* were patrolling in company in the North Sea. When off the Maas light-vessel they were attacked by enemy submarines and both were sunk. The destroyers were sister ships and each carried an official complement of 82.

TORRIDAL

I. Bjorneboe's Rederi-A/S; 1930; Langesunds Mek. Verksted; 1,501 tons; 249-1x38-1x15-2; 152 n.h.p.; compound engines. The Norwegian steamship *Torridal*, under German control, was torpedoed and sunk by a Norwegian submarine on April 5th, 1945, off Folia, on a voyage from Bodo to Trondheim. Fifteen of the crew were lost.

TORRIDGE

Tatem S.N. Co.; 1902; Richardson, Duck & Co.; 3,838 tons; 340 x 48 • 1 X 25 - 9; 349 n.h.p.; triple-expansion engines. The British steamship *Torridge* was wrecked on Farquhar Island on April 18th, 1910, while on a voyage in ballast from Natal to Galle, Ceylon.

TORRINGTON

Tatem Steam Nav. Co.; 1905; W. Doxford & Sons; 5,597 tons; 390-3x55-2x27-2; 359 n.h.p.; 10 knots; triple-expansion engines. The steamship *Torrington* was torpedoed and sunk by a German submarine on April 8th, 1917. Thirty-four men were killed. The captain was taken prisoner.

TORTUGUERO

Elders & Fyffes; 1909; A. Stephen & Sons; 4,175 tons; 374-7X 47-7x29-8; 413 n.h.p.; 13-5 knots; triple-expansion engines. The steamship *Tortuguero* was torpedoed and sunk by a German submarine 205 miles N.W. i N. of Eagle Island, off Co. Mayo, on June 26th, 1918. Twelve men were killed. The captain was among the survivors.

TORUNGEN

Skibs-Ajs. Remonstrant; 1931; Trondhjenfs Mek. Verksted; 1,948 tons; 276-3x43-1x18-1; 188 n.h.p.; triple-expansion engines. The Norwegian steamship *Torungen* was torpedoed and sunk by a German submarine on February 22nd, 1942, on a voyage from Halifax to Charleston. A lifeboat with the body of the chief engineer was picked up off Nova Scotia on March 2nd, but nothing more was heard of her crew.

TORVANGER

Westfal-Larsen & Co. AIS; 1920; W. Doxford & Sons; 6,568 tons; 420 • 1x54x34-4; 582 n.h.p.; triple-expansion engines. The Norwegian steamship *Torvanger* was torpedoed and sunk by a German submarine on June 23rd, 1942, about 700 miles E.N.E. of the Azores, on a voyage from New York to Alexandria.

TORYU MARU

Yamamoto Shoten GoshiKaisha; 1889; W. B. Thompson & Co.; 1,992 tons; 275x37-2x15-8; 182 n.h.p.; triple-expansion engines. The steamship *Toryu Mam* was torpedoed and sunk by the U.S. submarine *Raton* on May 2nd, 1945, in the Yellow Sea.

TOSAN MARU

Settsu Shosen K.K.; 1938; Mitsubishi Jukogyo K.K.; 8,666 tons; 465-9x62-3x41; 1,960 n.h.p.; oilengines. The motorship *Tosan Maru* was torpedoed and sunk by the U.S. submarines *Crevalle* and *Flasher* on July 26th, 1944, about 175 miles W. of Negra Point, Luzon Island, Philippines.

TOSEI MARU

Okada Gumi K.K.; 1920; Collingwood S.B. Co.; 2,432 tons; 251 x 43- 6x23- 6; 150 n.h.p.; triple-expansion engines. The steamship *Tosei Maru* was torpedoed and sunk by the U.S. submarine *Nautilus* on October 1st, 1942, in the Tsugaru Straits.

TOSEI MARU

Kihara Shosen K.K.; 1919; Osaka Iron Works; 4,363 tons; 345x49'8x28-2; 382 n.h.p.; triple-expansion engines. The steamship *Tosei Maru* was torpedoed and sunk by the U.S. submarine *Snook* on May 7th, 1943, in the Yellow Sea.

TOSEI MARU

Yamashita Risen K.K.; 1926; Uruga Dock Co.; 5,484 tons; 400 x 53x32; turbine engines. The steamship *Tosei Maru* was torpedoed and sunk by the U.S. submarine *Tuna* on December 12th, 1943, E. of Sangi Island, Celebes.

TOSEI MARU

Osaka Shosen K.K.; 2,814 tons. The steamship *Tosei Maru* was torpedoed and sunk by the U.S. submarine *Pollack* on April 3rd, 1944, about 475 miles S. of Yokohama.

TOSHIN MARU

Osaka Shosen K.K.; 1,917 tons. The steamship *Toshin Maru* was torpedoed and sunk by the U.S. submarine *Gray back* on February 19th, 1944, about 100 miles W. of Batan Islands, Philippines.

TOSHO MARU

Tanaka Goshi Kaisha; 1894; Ropner&Son; 3,038 tons; 315 x 40-5x20-2; 236 n.h.p.; triple-expansion engines. The Japanese steamship *Tosho Maru* was torpedoed and sunk by a submarine in the Mediterranean on January 29th, 1918.

TOSHO MARU

Kita Kyushu Shosen K.K.; 1918; 1,236 tons; 225x33x18-7; triple-expansion engines. The steamship *Tosho (Tosyo) Maru* was bombed and sunk by U.S. land-based aircraft on August 14th, 1944, about 100 miles S.W. of Buru Island, Celebes.

TOSHO MARU

KonanKisen K.K.; 1937; Namura Zosensho K.K.; 1,289 tons; 219-3x35-8x18-5; steam engines. The steamship *Tosho (Tosyo) Maru* was bombed and sunk by U.S. land-based aircraft on September 23rd, 1944, in the Gulf of Bone, Celebes.

TOSTO

B. Stolt-Nielsen; 1904; J. Priestman & Co.; 1,234 tons; 240x 35-5x17-9; 147 n.h.p.; triple-expansion engines. The Norwegian steamship *Tosto* struck a mine and sank off the north coast of Scotland on June 16th, 1917.

TOTAI MARU

ToaKaiunK.K.; 1918; Osaka Iron Works; 3,195 tons; 305 x 43-7x27-2; 288 n.h.p.; triple-expansion engines. The steamship *Total Maru* was torpedoed and sunk by the U.S. submarine *Sailfish* on December 13th, 1943, 100 miles S.E. of Shibushi, Japan.

TOTEN MARU

Nippon Suisan K.K.; 1900; Sunder land S.B. Co.; 3,823 tons; 356 x 45 - 2 x 18 • 7; 288 n.h.p.; triple-expansion engines. The steamship *Toten Maru* was torpedoed and sunk by the U.S. submarine *Barb* on June 11th, 1944, off Sakhalin.

TOTTENHAM

Watts, Watts & Co.; 1901; Ropner&Son; 4,494 tons; 370 x 50-5x19-2; 429 n.h.p.; triple-expansion engines. The British steamship *Tottenham* was wrecked on Juan de Nova, Mozambique Channel, on February 2nd, 1911. She was on a voyage in ballast from Delagoa Bay to Calcutta.

TOTTENHAM

Watts, Watts & Co.; 1940; Caledon S.B. & E. Co.; 4J62 tons; 417-6x56-8x25; 393 n.h.p.; 9-5 knots; triple-expansion engines. The steamship *Tottenham*, Capt. A. E. Woodcock, was intercepted and sunk by the German raider *Tamesis* about 300 miles N.W. of Ascension Island on June 17th, 1941. Seventeen of the crew were picked up by the British steamship *Mahronda* on the 24th; the remainder were taken prisoners of war.

TOTTORIMARU

TOTTORIMARU

Nippon Yusen K.K.; 1913; *Russell & Co.*; 5,973 tons; 423 -4 x 56x28-7; 556 n.h.p.; triple-expansion engines. The steamship *Tottori Mam* was torpedoed and sunk by the U.S. submarine *Hammerhead* on May 15th, 1945, in the Gulf of Siam.

TOUCHET

U.S. War Shipping Administration; 1943; *Alabama D.D. & S.B. Co.*; 10,172 tons; 504x68-2x39-2; turbo-electric engines. The American tanker *Touchet*, bound from Baytown to New York with 16,500 tons of heating oil, was torpedoed, set on fire and sunk by a German submarine on December 3rd, 1943. Ten of the gunners were lost.

TOUN MARU

7,975 tons.
The steamship *Toun Mam* was torpedoed and sunk by the U.S. submarine *Tang* on October 23rd, 1944, about 80 miles W. of Hsinchu, Formosa.

TOURCOING

W. Wilhelmsen; 1924; *Odense Staalskibsværft*; 5,798 tons; 435-9x56-2x27-8; 951 n.h.p.; oilengines. The Norwegian motorship *Tourcoing*, under German control, struck a mine and sank on August 24th, 1942, off Swinemunde.

TOURNY

Etablissements Maurel & Prom; 1920; *The Pusey & Jones Co.*; 2,769 tons; 300x44-1x22-9; 305 n.h.p.; triple-expansion engines.
The French steamship *Tourny* was torpedoed and sunk by a German submarine on January 25th, 1940, off the Bay of Biscay, on a voyage from Zighinkor to Bordeaux.

TOWA

Maats. N.V. Vrachtvaart; 1930; *P. Smit Jr.*; 5,419 tons; 420-3x55-2x26-5; 500 n.h.p.; triple-expansion engines. The Dutch steamship *Towa* was torpedoed, shelled and sunk by the German submarine *U-96* on December 11th, 1940, about 100 miles S. of Rockall, on a voyage from Montreal to Oban. Eighteen of her crew of 35 were lost.

TOWA MARU

Towa Kisen K.K.; 1949; *Mitsubishi Jukogyo K.K.*; 2,768 tons; 308-4x44-9x24-9; compound engines.
The steamship *Towa Mam*, on a voyage from Mindanao to Osaka with a cargo of logs, sprang a leak in heavy weather early in the morning of November 27th, 1956, about 340 miles S.S.E. of Okinawa. The ship became waterlogged and called for assistance, stating that the crew were taking to the boats. Aircraft from Manila sighted these boats but ships answering the S.O.S. calls could not find them in the heavy rainstorms. Wreckage of boats was found later but none of the crew of 42 was ever seen again.

TOWARD

Clyde Shipping Co.; 1923; *A. Stephen & Sons*; 7,577 tons; 270-2x37-2x17-2; 196n.h.p.; 12-5 knots; triple-expansion engines.
The steamship *Toward*, Capt. George K. Hudson, was acting as rescue ship to a convoy when, on February 7th, 1943, she was torpedoed and sunk by a German submarine about 700 miles W. of Ireland. Capt. Hudson and 26 of the crew, 11 gunners, a surgeon, a sick-bay attendant, a signalman and two men transferred from other ships were lost.

TOWER GRANGE

Tower S.S. Co.; 1940; *W. Doxford & Sons*; 5,226 tons; 427-6X 56-5x26-5; 516 n.h.p.; oilengines.
The British motorship *Tower Grange*, on a voyage from Calcutta to Trinidad, was torpedoed and sunk by a German submarine on November 18th, 1942, about 200 miles E. of Cayenne. Four of her crew and two gunners were lost.

TOWNELEY

Burnett Steamship Co.; 1910; *Wood Skinner & Co.*; 2,476 tons; 305-5x42-2x18-6; 254 n.h.p.; 10-5 knots; triple-expansion engines.
The steamship *Towneley* was torpedoed and sunk by a German submarine 18 miles N.E. of Trevoise Head on January 31st, 1918. The captain and five of the crew were killed.

TOYA MARU

Japanese Government; 1947; *Mitsubishi Jukogyo K.K.*; 4,337 tons; 372-9x52x22-3; turbine engines.
The train ferry *Toya Maru*, on a voyage from Aomori to Hokkaido with passengers and freight cars, dragged her anchors during a typhoon on September 26th, 1954, in the Tsugaru Strait. The ferry capsized and was driven ashore and wrecked outside Hakodate. Seven hundred and ninety-four persons were lost and 196 saved.

TOYAMA MARU

Ono Shoji Gomei Kaisha; 1915; *Mitsubishi Dockyard & E. Works*; 7,089 tons; 445x58x34; 922 n.h.p.; turbine engines. The steamship *Toyama Maru* was torpedoed and sunk by the U.S. submarine *Sturgeon* on June 29th, 1944, off Okinawa Island.

TOYO MARU

Kusaba Senpakuha O.K.; 1892; *Furness, Withy & Co.*; 3,019 tons; 314x40-5x21-2; 259 n.h.p.; triple-expansion engines.
The steamship *Toyo Maru*, on a voyage from Fusan to Sakito in ballast, was wrecked on December 28th, 1927, at Kotsuki, Tsushima Island.

TOYO MARU

Osaka Shosen K.K.; 1,916 tons.
The steamship *Toyo Maru* was torpedoed and sunk by the U.S. submarine *Haddock* on April 8th, 1943, N. of the Caroline Islands.

TOYO MARU

Sawayama Kisen K.K.; 1937; *Harima S.B. & Eng. Co.*; 4,163 tons; 360 x 50 x29; 450 n.h.p.; turbine engines.
The steamship *Toyo Maru* was torpedoed and sunk by the U.S. submarine *Jack* on June 26th, 1943, about 150 miles S. of Shimoda, Japan.

TOYO MARU

Japanese Government; 1937; *Kawasaki Dockyard Co.*; 3,718 tons; 335-4x46-2x28-7; 500 n.h.p.; turbine engines.
The cable ship *Toyo Mam* struck a mine and sank on July 6th, 1945, off Shimonoseki.

TOYO MARU No. 2

Sawayama Kisen K.K.; 1937; *Harima S.B. & Eng. Co.*; 4J63 tons; 363 -6x50x29; 383 n.h.p.; turbine engines. The steamship *Toyo Maru No. 2* was torpedoed and sunk by the U.S. submarine *Tunny* on April 2nd, 1943, S. of Arawe, New Britain.

TOYO MARU No. 5

Sawayama Kisen K.K.; 1918; *Poison Iron Works Co.*; 2J93 tons; 251 -4x43-5x21; 175 n.h.p.; triple-expansion engines. The steamship *Toyo Maru No. 5* was torpedoed and sunk by the U.S. submarine *Plunger* on February 2nd, 1944, ten miles S. of Shingu, Japan.

TOYO MARU No. 8

Sawayama Kisen K.K.; 1918; *Globe S.B. Co.*; 2,797 tons; 251 x 43 - 7 X 21 • 5; 274 n.h.p.; triple-expansion engines. The steamship *Toyo Maru No. 8* was torpedoed and sunk by the U.S. submarine *Plunger* on February 2nd, 1944, ten miles S. of Shingu, Japan.

TOYOHASHI MARU

Nippon Yusen K.K.; 1915; *Kawasaki Dockyard Co.*; 7,031 tons; 445 x 58 x 34; 628 n.h.p.; triple-expansion engines. The steamship *Toyohashi (Toyohasi) Maru* was torpedoed and sunk by a British submarine on June 4th, 1942, at the northern end of the Straits of Malacca.

TOYOHIMARU

Daido Kaiun K.K.; 6,436 tons.
The steamship *Toyohi Mam* was torpedoed and sunk by the U.S. submarine *Tinosa* on May 4th, 1944, about 250 miles S.E. of Hong Kong.

TOYOHIMEMARU

Hamane Shoten K.K.; 1919; *Detroit S.B. Co.*; 2,549 tons; 251 x43-5x28-2; 352 n.h.p.; triple-expansion engines. The steamship *Toyohime Maru* was sunk by collision with the steamship *Ryutoh Mam*, 3,305 tons, on July 3rd, 1933, off Tadosaki, Rikuchu Province. She was on a voyage from Saghalien to Yokohama with lumber.

TOYOKAWA MARU

Matsuoka Kisen K.K.; 1911; *Wood Skinner & Co.*; 5,123 tons; 385 x 54x27-8; 516 n.h.p.; triple-expansion engines. The steamship *Toyokawa Maru* struck a mine and sank on July 5th, 1945, off Shimonoseki.

TOYOKUNIMARU

Nippon Seitetsu K.K.; 5,792 tons.
The steamship *Toyokuni Maru* was torpedoed and sunk by the U.S. submarine *Lapon* on March 8th, 1944, about 200 miles S.E. of Hong Kong.

TOYOOKA MARU

Kaburagi Kisen K.K.; 1915; *Mitsubishi Dockyard & Eng. Works*; 7,097 tons; 445x58x34; 922 n.h.p.; turbine engines. The steamship *Toyooka Maru* was torpedoed and sunk by the U.S. submarine *Queenfish* on September 9th, 1944, about 100 miles N. of Luzon Island, Philippines.

TOYOSAKA MARU

Hamane Shoten K.K.; 1940; *Mukaishima Dock K.K.*; 1,966 tons; 278-8x39-4x21-1; triple-expansion engines. The steamship *Toyosaka Maru* was sunk by U.S. carrier-based aircraft on March 1st, 1945, off the south Ryukyu Islands.

TOYOTSUMARU

Settsu Shosen K.K.; 1937; *Mitsubishi Jukogyo K.K.*; 2,930 tons; 305-2x45-3x26-2; turbine engines.
The steamship *Toyotsu (Toyotu) Maru* was taken over by the Japanese Navy for use as an auxiliary gunboat. On February 1st, 1942, she was sunk by gunfire from U.S. warships in the Marshall Islands.

TOYOURA MARU

Nippon Yusen K.K.; 1913; *Napier & Miller*; 2,510 tons; 302-3 x 46-3x20-4; 278 n.h.p.; triple-expansion engines.
The steamship *Toyoura Maru* was torpedoed and sunk by the U.S. submarine *Spearfish* on May 6th, 1944, in the East China Sea.

TOYU MARU

Okada Shosen; 4,532 tons.
The steamship *Toyu Maru* was bombed and sunk by U.S. carrier-based aircraft on January 12th, 1945, 25 miles S.E. of Phanrang, Indo-China.

TOYU MARU

Iino Kisen K.K.; 1918; *Osaka Iron Works*; 1,256 tons; 225 x 33x18-7; 97 n.h.p.; triple-expansion engines. The steamship *Toyu Maru* was sunk by U.S. carrier-based aircraft on July 14th, 1945, off Nemuro, Japan.

TRADE WIND

W. Plan & Son; 1851; *Jacob Bell, New York*; 2,018 tons. The American ship *Trade Wind*, Capt. Smith, left Mobile for Liverpool with 62 persons, 34 of whom were crew, and a cargo of 4,657 bales of cotton, together with other goods. On the night of June 20th, 1854, it being very dark with a fresh S.W. by S. wind and somewhat squally, the *Trade Wind* sighted a large sailing ship on an opposite course under press of sail. Shortly afterwards the lights of this ship were lost to sight and did not reappear until both vessels

were in close proximity to each other. The *Trade Wind*, which was sailing at great speed, struck the stranger, which afterwards proved to be the sailing ship *Olympus*, between the main and foremast, cutting her down to the water's edge. Both ships sustained vital damage and a number of persons from the *Olympus* jumped on to the deck of the *Trade Wind*. One of these was Capt. Wallace who, at daybreak, put off in the *Trade Wind's* gig with a few of his own crew to try and save any who might still be on board his ship. He found the *Olympus* about five miles to the eastward in a sinking condition, and managed to board her and get away his boats with most of the passengers and crew. The *Olympus* then foundered at about 6 a.m., some 250 miles S.E. of Sable Island.

Meanwhile the *Trade Wind* was kept afloat by her cargo of cotton and began to get out her boats, one of which was swamped by three or four panic-stricken passengers who jumped into her from the deck as she was being lowered. The cotton in the hold now began to swell and so great was the pressure that the vessel burst asunder and sank. Boats and rafts from both vessels were sighted ten hours later by the Belgian barque *Stadt Antwerpen*, Capt. Wyterhoven, and were picked up without further loss.

Eighteen persons from the *Trade Wind* were drowned and six from the *Olympus*.

TRAFALGAR

D.Dunbar; 1845; *Sunderland*; 717 tons; 133x31-5x21-2. The wooden barque *Trafalgar* was bound from Australia to London in May, 1860. When in the Atlantic, just N. of the Tropic of Cancer, she sprang a leak. The pumps failed to keep the water under control and the ship foundered. One boat with a few men was picked up, but nothing was ever heard of the others.

TRAFALGAR

Nelson, Donkin & Co.; 1871; *Mitchell*; 1,514 tons; 248-3X32-3x17-7; 120 h.p.; compound-inverted engines. The British steamship *Trafalgar* was wrecked on Haisborough Sand on January 14th, 1881, while on a voyage from the Tyne to Bombay carrying a cargo of coal.

TRAFALGAR

Glasgow Shipowners Co.; 1924; *Lithgows*; 4,530 tons; 385X 52x26-8; 488 n.h.p.; triple-expansion engines. The British steamship *Trafalgar*, on a voyage from Newport to Alexandria via the Cape, with coal, was shelled and sunk by a German raider on May 24th, 1941, about 650 miles W. of Luderitz Bay. Twelve of the crew were killed, the remaining 32 were taken prisoner aboard the raider. These men, among others, were rescued from the German motorship *Alstertor* when that ship was intercepted by British warships off Cape Finisterre on June 23rd. The *Alstertor* had been serving as supply and prison ship to the raider, and was scuttled by her crew when intercepted.

TRAFARIA

Portuguese Government; 1904; *Bremer Vulkan*; 1,144 tons; 247-7x35-6x21-9; 139 n.h.p.; triple-expansion engines. The German steamship *Mazagan* was requisitioned by the Portuguese Government and renamed *Trafaria*. Subsequently she was sunk by a German submarine in the Atlantic on October 2nd, 1917.

TRAIN FERRY No. 2

London & North Eastern Railway; 1917; *Armstrong, Whitworth & Co.*; 2,678 tons; 350-5x58-7x15-5; 403 n.h.p.; triple-expansion engines.
The steamship *Train Ferry No. 2* was destroyed by gunfire from shore batteries at Havre on June 12th-13th, 1940, during the evacuation of British forces from France. Fourteen of the crew were lost.

TRAK

Turkish Government; 1938; *Fried. Krupp Germaniawerft*; 1,414 tons; 249-1x36-1x13; 695 n.h.p.; turbine engines. The steamship *Trak*, on a voyage from Gelibolu to Bandirma in ballast, ran ashore during a snowstorm on January 18th, 1944, on the Mola Islands, eight miles from Bandirma. The ship capsized and sank.

TRAMONTANE

TRAMONTANE

French Navy, destroyer; 1924; Chantiers de la Gironde; 1,319 tons; 347x33x13-7; 33,000 s.h.p.; 33knots; turbine engines; four 5-1 in. guns, two 37 mm.A.A., 6 T.T.

The French destroyer *Tramontane*, with others, was lying at Oran when the Allies made their landing on November 8th-9th, 1942. At 3 a.m. on the morning of the 8th the British cutters *Hartland* and *Walney* forced an entrance to the harbour and the latter vessel was engaged by the *Tramontane* and the *Epervier* lying alongside the mole. Both French ships fired into the *Walney* at point blank range and disabled her, killing and wounding three-quarters of the seamen and troops on board. The *Walney* finally capsized.

Later the two destroyers, accompanied by the *Typhon*, *Tornado* and the minesweeper *La Surprise* made sorties from the harbour, but in the ensuing fighting with British cruisers, notably the *Aurora*, 5,270 tons, six 6 in. guns, and *Jamaica*, 8,000 tons, twelve 6 in. guns, they were sunk or forced ashore.

For full story of the landing at Oran see under the cutter *Hartland*.

TRANNNINH

*Compagnie Cdtidre deVAnnam; 1928; P. Smit, Jr.; 1,463 tons; 265-7x38-6x16-1; 258 n.h.p.; triple-expansion engines. The French steamship *Tranninh* was sunk by collision with a Japanese warship on August 18th, 1943, in Cap St. Jacques Roads, Indo-China.*

TRANSBALT

*U.S.S.R.; 1899; Blohm&Voss; 11,439 tons; 501-1x62-2X 45-3; 612 n.h.p.; quadruple-expansion engines. The Russian steamship *Transbalt*, on a voyage from Seattle to Vladivostok, was torpedoed and sunk by an unidentified submarine on June 13th, 1945, at the western end of La Perouse Strait. The crew were picked up by Japanese ships.*

TRANSPORTEUR

Cie. Fran^aaise de Marine & de Commerce; 1904; Schiffswerft von Henry Koch; 1,812 tons; 250-2x37-2x21-9; 152 n.h.p.; triple-expansion engines.

The French steamship *Transporter* was torpedoed and sunk by a submarine in the Mediterranean on October 11th, 1917.

TRANSYLVANIA

*Anchor Line; 1914; Scotfs Shipbuilding Co.; 14,348 tons; 548 -3x66-5x42; 17-5 knots; turbine engines. The liner *Transylvania*, Lt. S. Brennell, R.N.R., completed just before the outbreak of the First World War, was taken over for service as a transport on completion. She was designed to accommodate 1,379 passengers but the Admiralty fixed her capacity at 200 officers and 2,860 men, besides crew. She was carrying nearly this number when she left Marseilles for Alexandria on May 3rd, 1917, with an escort of two Japanese destroyers, the *Matsu* and the *Sakaki*. At 10 a.m. on the 4th the *Transylvania* was struck in the port engine room by a torpedo from a submarine.*

At the time the ship was on a zig-zag course at a speed of 14 knots, being two and a half miles S. of Cape Vado, Gulf of Genoa. She at once headed for the land two miles distant, while the *Matsu* came alongside to take off the troops, the *Sakaki* meanwhile steaming around to keep the submarine submerged. Twenty minutes later a torpedo was seen coming straight for the destroyer alongside, which saved herself by going astern at full speed. The torpedo then struck the *Transylvania* and she sank very quickly, less than an hour having elapsed since she was first hit.

Lt. Brennell, one other officer and ten men of the crew, 29 military officers and 373 other ranks were killed.

TRANSYLVANIA

Anchor Line; 1925; The Fair field Co.; 16,923 tons; 552-4 X 70-3x38-8; 17knots; turbine engines.

The liner *Transylvania* was taken over by the Admiralty early in the Second World War for service as an auxiliary cruiser. On August 10th, 1940, the ship was attacked by an enemy submarine off Malin Head. She was damaged by a torpedo and was taken in tow but foundered before she reached harbour. Some 300 of her complement were taken off by trawlers, the task of launching the boats being extremely hazardous owing to the rough seas.

Two officers and 20 ratings were killed.

712

TRAPANI

*Rob.M.Sloman, Jr.; 1926; A.G.Neptun; 1,855 tons; 287-5X 41-2x16-7; 191 n.h.p.; triple-expansion engines. The German steamship *Trapani* was sunk by British warships on November 10th, 1943, at Kalymnos Island, Greece.*

TRAUTENFELS

Deutsche Dampfs. Ges. Hansa; 1921; Flensburger Schiffsbau. Ges.; 6,418 tons; 430>5x56-5x30>5; 608 n.h.p.; triple-expansion engines & L.P. turbine.

The German steamship *Trautenfels* struck a mine and sank on December 11th, 1942, off Terschelling.

TRAVANCORE

*Peninsular & Oriental S.N. Co.; 1867; 1,903 tons; 281-6x 35-5x27-8; 350 h.p.; compound-inverted engines. The British steamship *Travancore* was wrecked off Cape Otranto on March 8th, 1880, in fog, while carrying a general cargo on a voyage from Bombay to London.*

TRAVELLER

*CharenteS.S.Co.; 1922; C. Cornell & Co.; 3,963 tons; 365 x 46-9x27-7; 390 n.h.p.; 11 knots; triple-expansion engines. The steamship *Traveller*, Capt. H. M. Fitzsimons, left Hampton Roads for Halifax and Liverpool on January 23rd, 1942, with general cargo including 600 tons of explosives. Nothing more was heard of the ship or her crew of 56 until a German broadcast on September 30th, claimed that she had been torpedoed and sunk on January 26th, about 500 miles E. of Philadelphia.*

TRECARRELL

*Hain Steamship Co.; 1907; J. Readhead & Sons; 3,875 tons; 346 X 49 - 6 X 26 - 5; 328 n.h.p.; triple-expansion engines. The British steamship *Trecarrell* was wrecked on Black Fish Shoal, Virginia, on February 24th, 1916. She was carrying a cargo of pyrites from Huelva to Philadelphia.*

TREDINNICK

Hain Steamship Co.; 1921; J. Readhead & Sons; 4,589 tons; 400'lx52-1x25'9; 425 n.h.p.; 11 knots; triple-expansion engines.

The steamship *Tredinnick*, Capt. G. G. Barrett, left New York on March 18th, 1942, for Table Bay and Bombay with Government stores. Nothing more was ever heard of the ship or her crew of 40 and six gunners. She was considered to have been probably lost by enemy action on about March 25th.

TREGARTHEN

Hain Steamship Co.; 1936; Lithgows; 5,201 tons; 432-3x 56-2x24-8; 469 n.h.p.; 11 knots; triple-expansion engines & L.P. turbine.

The steamship *Tregarthen*, Capt. L. Daniel, was torpedoed and sunk by a German submarine on June 6th, 1941, about 900 miles E. of Cape Race. All the crew of 45 were lost. Capt* Daniel commanded the *Trewellard* at the time of her destruction by the *Admiral Scheer* in November 1940.

TREGASTEL

*Compagnie France-Navigation Soc. Anon.; 1901; W. Dobson & Co.; 966 tons; 209-8x29-8x15-4; 100 n.h.p.; compound engines. The French steamship *Tregastel*, on a voyage from Valencia to Marseilles in ballast, was wrecked on September 28th, 1938, on Massina Island, off Cadaques.*

TREGENNA

*Hain Steamship Co.; 1919; W. Gray & Co.; 5,242 tons; 400-1x 52-3x28-4; 517 n.h.p.; 11 knots; triple-expansion engines. The steamship *Tregenna*, Capt. W. T. Care, was in convoy about 300 miles N.W. of the island of Lewis in the Hebrides on September 17th, 1940, when she was torpedoed and sunk by a German submarine. Capt. Care and 32 men were lost, four survivors were picked up.*

TREHATA

Hain Steamship Co.; 1928; *W. Gray & Co.*; 4,817 tons; 413-2x54-2x25-1; 494 n.h.p.; 12 knots; triple-expansion engines. The steamship *Trehata*, Capt. J. Lawrie, was torpedoed and sunk by a German submarine on August 8th, 1942, about 900 miles W. of Ireland. Capt. Lawrie and 21 of the crew were lost.

TREKIEVE

Edward Hain & Son; 1883; *J. Readhead & Co.*; 1,489 tons; 259 x 36 -1 x 17 - 6; 161 n.h.p.; compound engines. The British steamship *Trekieve* was wrecked in Mostyn Gut on July 31st, 1897. She was on a voyage from Carthagen to Mostyn carrying a cargo of iron ore.

TRELAWNY

Hain Steamship Co.; 1907; *J. Readhead & Sons*; 3,877 tons; 346 X 49 - 6 x 26 - 5; 328 n.h.p.; triple-expansion engines. The steamship *Tretawny*, on a voyage from Rotterdam to Hampton Roads in ballast, was sunk by collision with the steamship *Gaelic Prince*, 8,634 tons, at 2 a.m. in hazy weather on July 15th, 1926, about 400 miles W. of the Bishop Rock.

TREMODA

Hain Steamship Co.; 1928; *Harland & Wolff*; 4,736 tons; 409 x 55 • 8 x 25; 495 n.h.p.; 12 knots; triple-expansion engines. The steamship *Tremoda*, Capt. J. S. Bastian, was torpedoed and sunk by a German submarine about 200 miles W. of Ireland. Capt. Bastian, 25 of the crew and six gunners were lost, 20 crew and one gunner were picked up later.

TRENEGLOS

Edward Hain & Son; 1882; *J. Readhead & Co.*; 1,513 tons; 249 X 36 -1 x 17 • 5; 125 h.p.; compound-inverted engines. The British steamship *Treneglos* was wrecked on Bridge Rock, Limerick, on July 30th, 1883, while on a voyage from Galatz to Limerick.

TRENT

Fisher, Renwick & Co.; 1870; *London & Glasgow Co.*; 1,734 tons; 253 -4x33x17-4; 150 h.p.; compound engines. The British steamship *Trent* was wrecked near Otrantp on January 27th, 1891, while on a voyage from Cardiff to Brindisi carrying a cargo of coal.

TRENTHAMHALL

EllermanLines; 1897; *Palmers' Co.*; 4,173 tons; 380x45-2x29-2; 402 n.h.p.; triple-expansion engines. The British steamship *Trentham Hall* was wrecked on Pluckington Bank on May 26th, 1917, while on a voyage from Bombay to Liverpool carrying a cargo of grain.

TRENTON

United States Navy, wooden corvette; 1873; *New York Navy Yard*; 3,900 tons; 252-6x49-2x20-3; 2,414 i.h.p.; 12-6 knots; compound engines; ten 8 in. m.l.r. guns, 6 smaller. In March 1889 there were lying in the harbour of Apia Upolu, Samoa Islands, seven ships of war and several merchant vessels. A dispute involving the possession of the islands had arisen between the United States and Germany and these powers were represented by the U.S. ships *Trenton*, flagship of Rear-Admiral Kimberley, *Nipsic*, 1,375 tons, Cdr. D. W. Mullen, and *Vandalia*, 981 tons, Capt. C. M. Schoonmaker, and the German ships *Olga*, 2,169 tons, Capt. von Ehrhardt, *Adler*, 884 tons, Capt. Fritze, and *Eber*, 570 tons, Capt. Lt. Wallis, together with H.M.S. *Calliope*, 2,770 tons, Capt. Kane, which had been sent there to watch over British interests. On Friday, March 15th, the glass fell alarmingly and all the ships prepared to weather a hurricane. Unfortunately mutual distrust prevented the Germans and Americans from putting to sea, though the harbour of Apia was a most unsafe place in which to ride out a storm*

At about 5 a.m. on the 16th the German gunboat *Eber* was thrown broadside-on to a reef with such force that her side was opened up and she sank immediately, taking with her 76 of her crew of 80. It was now breaking daylight and the U.S.S. *Nipsic*, which was in a bad way, was drifting toward the reef at the upper end of the harbour. In order to save life Cdr. D. W. Mullen ran her onto the beach, losing only seven men in one of the ship's boats. At 8 a.m. the steering gear of the other German gunboat, the *Adler*, broke down and she was lifted by a gigantic sea on to the ridge of the reef where she lay on her beam ends. The *Olga*, senior German ship, the U.S.S. *Vandalia* and H.M.S. *Calliope* were now dangerously close. The *Calliope* had previously sent down all her topmasts and yards, her foreyard being lashed athwartships to act as a fender. The *Olga* drifted down on the British ship but was warded off by the foreyard. The *Calliope* then came into collision with the *Vandalia*, losing her bowsprit, but suffering no other damage. Having raised steam in all six boilers the previous evening Capt. Kane decided to steam out of harbour. He passed between the narrow waterway separating the helpless *Vandalia* from the reef, scraped by the U.S. flagship *Trenton* at the harbour mouth and gained the open sea. Some idea of the violence of the hurricane may be realised from the fact that it took the ship an hour to travel half a mile. Once in open water, with six of his boats smashed and his ship crippled Capt. Kane rode out the storm.

As the *Calliope* passed the doomed *Trenton* the American seamen, led by their Admiral, crowded the bulwarks and gave her three cheers.

The *Vandalia* foundered with a loss of 43 officers and men, the *Trenton* followed, but lost only one man of a complement of 450. The Americans mustered the ship's band and played the "Star-spangled Banner". The last ship to go was the *Olga* which, after twice ramming the *Trenton*, ran ashore without loss of life. The disaster cost the United States and German navies six ships of war and 147 lives all told, being distributed as follows:—

Trenton 1 *Nipsic* 1 *Vandalia* 43 *Eber* 76 and *Adler* 20.

TRENTONIAN

Canadian Navy, corvette; 1943; *Canada*; 925 tons; 193x32x 16; 17knots; quadruple-expansion engines; one 4 in. gun, several smaller.

The corvette *Trentonian*, Lt. Colin Glassco, was torpedoed by a German submarine off Falmouth on February 22nd, 1945. One officer and six ratings were killed. Naval motor launches picked up 95 officers and ratings.

TRESILLIAN

Edward Hain & Son; 1890; *J. Readhead & Sons*; 2,429 tons; 290-5x40x19-8; 234 n.h.p.; triple-expansion engines. The British steamship *Tresillian* was wrecked near Otrantp on January 23rd, 1896, while on a voyage from Cardiff to Brindisi carrying a cargo of coal.

TRESILLIAN

Peninsular & Oriental Steam Nav. Co.; 1944; *W. Doxford & Sons*; 7,373 tons; 431x56-5x35-5; oilengines. The motorship *Tresillian*, on a voyage from Montreal to Avon-mouth with grain, took a heavy list to port on November 30th, 1954, when her cargo shifted in heavy weather, about 150 miles N.W. of the Bishop Rock. Her call for help was answered by the tanker *Liparus* which, however, could not get near enough to take off her crew, but put out oil to reduce the heavy seas. The crew of the *Tresillian* abandoned her in a sinking condition and the *Liparus* launched a motor lifeboat to pick up the survivors on rafts and in a boat. Thirteen men were saved, one of whom died afterwards from swallowing oil. Another four men were picked up by the motorship *Ardglen*, making a total of 16 survivors from the *Tresillian*'s crew of 40.

TREVANION

Hain Steamship Co.; 1937; *Lithgows*; 5,299 tons; 432-3x56-2x24-8; 449 n.h.p.; oil engines. The British motorship *Trevanion*, on a voyage from Port Pirie to Swansea, was sunk by the German raider *Graf Spec* on October 22nd, 1939, about 600 miles W. of Luderitz Bay.

TREVARRACK

TREVARRACK

Hain Steamship Co.; 1919; D. & W. Render son & Co.; 5,270 tons; 400x52-3x28-4; 517n.h.p.; 11 knots; triple-expansion engines.
The steamship *Trevarrack*, Capt. W. H. Freeman, left the Clyde on June 1st, 1941, for Montreal in ballast. Nothing more was heard of the ship or the crew of 37 and seven passengers. She was considered to have been lost by enemy action on about June 8th.

TREVEAL

Hain Steamship Co.; 1909; J. Readhead & Sons; 4,160 tons; 363-4x51x26-1; 374 n.h.p.; 10 knots; triple-expansion engines.
The steamship *Treveal*, from Algiers to Glasgow with ore, was torpedoed and sunk off the Skerries on February 4th, 1918. Thirty-three men, including the captain, lost their lives, the *Treveal* sinking so rapidly that there was no opportunity to launch the boats. Three men managed to cling to a raft, from which they were rescued eight hours afterwards by the steamship *Agnes Ellen* which brought them to Newry.

TREVEAL

Hain Steamship Co.; 1918; J. Readhead & Sons; 5,200 tons; 400-7x52-3x28-5; 517 n.h.p.; 11 knots; triple-expansion engines.
The steamship *Treveal*, Capt. C. Paynter, was bound for Dundee from Calcutta with a cargo of jute and manganese ore. She carried a crew of 43 all told. On January 9th, 1920, she called at Portland for a pilot but none was available and the captain was instructed by the agents to proceed without one. Leaving again in heavy weather the *Treveal* was driven off her course when off St. Alban's Head. At about 9 p.m. she struck the Kimmeridge Ledge, off Weymouth, and lay helpless to the seas which broke over her with terrific force. The Weymouth lifeboat put out and stood by all night but could not approach the wreck owing to the seas.

At 9 a.m. on the 10th Capt. Paynter signalled the lifeboat that he was abandoning ship. Two boats were launched containing all the crew and an attempt was made to reach the shore which hereabouts was very rocky. Both boats were swamped before they got very far and most of the occupants were drowned. In all 36 men, including the captain, lost their lives.

TREVEAN

Edward Hain & Son; 1885; J. Readhead & Co.; 1,567 tons; 259 x 36 -1 x 17 - 8; 160 n.h.p.; compound engines. The British cargo ship *Trevean* was wrecked near St. Nazaire on November 14th, 1899. She was carrying a cargo of coal from Cardiff to St. Nazaire.

TREVERBYN

Hain Steamship Co.; 1910; J. Readhead & Sons; 4J63 tons; 363-2x51x26-1; 374 n.h.p.; 10 knots; triple-expansion engines.
The steamship *Treverbyn*, from North Russia to Manchester with ore, struck a mine two miles E.S.E. of Ushinish Lighthouse on the night of September 3rd, 1917, and sank in a few minutes. The explosion was witnessed by the Ushinish lighthouse keeper who sent a messenger to summon help. A fishing boat went to the scene and picked up seven survivors. Twenty-seven men, including the captain, were killed.

TREVERBYN

Hain Steamship Co.; 1920; Harland & Wolff; 5,281 tons; 400-7x52-3x28-5; 517 n.h.p.; triple-expansion engines. The steamship *Treverbyn*, on a voyage from Pepel to Cardiff with iron ore, left Freetown on October 15th, 1941. Nothing more was heard of the ship or the crew of 38 and ten gunners until a German broadcast in December, 1942, claimed that she had been sunk by a submarine.

TREVESSA

Hain Steamship Co.; 1909; Flensburg; 5,004 tons; 401 x 52-5x28-2; 2,400 i.h.p.; 11-5 knots; triple-expansion engines. The steamship *Trevessa*, Capt. C. Foster, had been built at Flensburg as the *Imkenturm*, and was taken over from Germany at the close of the First World War. On June 4th, 1923, when eleven days out from Fremantle, Australia, loaded with a cargo of zinc

concentrates for Antwerp she foundered in a heavy S.S.W. gale. The first news of her plight came in wireless messages picked up by the s.s. *Tregenna*, another Hain steamship, 350 miles E., and the s.s. *Trevean*, also of the Hain Line, 272 miles S. Both steamships proceeded to the spot given in the messages as lat, 28 45' S., long. 85 42' E. Before they reached the area the *Trevessa* had foundered and all that could be ascertained regarding her fate was an empty boat, the discovery of which two days later gave reason to believe that she had been lost with all hands.

Meanwhile the crew of the *Trevessa* had abandoned ship at the orders of Capt. Foster. The crew numbered 43 all told, of whom the captain and 16 crew went into one boat and the first officer and 25 others in the second boat. Despite the violence of the gale the boats managed to remain together until the 10th, when it was decided that the captain's boat, which was less deeply loaded and could proceed faster, should make for the nearest land and send on assistance to the first officer's boat. The spot where the *Trevessa* had foundered was roughly 1,728 miles from Mauritius. Before parting the officers decided to make for the island of Rodriguez, which was somewhat nearer, being 344 miles W. of Mauritius. On June 26th, after a voyage of twenty-two days in an open boat, Capt. Foster sighted Rodriguez. Of those who left the *Trevessa* on the 4th two had died on the voyage, the remainder, who had subsisted on a ration of a third of a cigarette tin of water and one biscuit per day, and a tablespoonful of condensed milk twice a day, although very weak from their privations managed to recover.

The second boat under Mr. J. C. Stewart Smith, performed an equally brilliant feat of navigation and arrived at Mauritius on the 29th. Her voyage had, however, been accompanied by greater tragedy, for nine of the occupants had either died or been drowned. Of this number several Indian members of the crew, unable to endure the agonies of thirst, had given way to drinking sea water, as a result of which they died. The second engineer, Mr. David Mordecai, fell overboard in rough weather and was drowned. The ship's cook died shortly after reaching the island.

The Board of Trade made presentations to the captain and officers. The Hain Steamship Co. presented pieces of plate to Capt. Foster, Mr. Stewart Smith and Mr. N. V. Robson, chief engineer. Lloyd's awarded the Silver Medal for saving life at sea to the captain and first officer.

TREVIDER

Hain Steamship Co.; 1902; J. Readhead & Sons; 3,082 tons; 323x47x23-6; 281 n.h.p.; triple-expansion engines. The British cargo ship *Trevider* was wrecked near Cape Villano on April 29th, 1911. She was on a voyage from Newport to Palermo carrying a cargo of coal.

TREVIER

Lloyd Royal Beige; 1907; Irvine's S.B. & D.D. Co.; 3,006 tons; 325 x47x13-8; 287 n.h.p.; triple-expansion engines. The Belgian steamship *Trevier* was sunk by a German submarine in the North Sea on April 4th, 1917.

TREVISIA

Canadian Lake Carriers; 1915; North of Ireland S.B. Co.; 1,813 tons; 250x42-5x17-4; 153 n.h.p.; triple-expansion engines.
The Canadian steamship *Trevisia*, on a voyage from Parrsboro, N.S., to Aberdeen with lumber, was torpedoed and sunk by a German submarine on October 16th, 1940, about 500 miles W. of the Hebrides. Seven of the crew were lost.

TREVORIAN

Hain Steamship Co.; 1889; J. Readhead & Co.; 2,270 tons; 290 x 39 x 18 - 8; 234 n.h.p.; triple-expansion engines. The British steamship *Trevorian* foundered in heavy weather in the Bay of Biscay on January 25th, 1910, while on a voyage from Barry to Taranto carrying a cargo of coal.

TREVOSE

Hain Steamship Co.; 1896; J. Readhead & Sons; 3J12 tons; 323 x47x 25; 1,200 i.h.p.; 10 knots; triple-expansion engines. The steamship *Trevose* was torpedoed and sunk by a German submarine 230 miles W. by N. of Ushant on March 18th, 1917. Two firemen were killed by the explosion but the remainder of the

crew got away without loss and were picked up the same night by the Union-Castle liner *Alnwick Castle* (which see) outward bound from London to Table Bay. At about 6.10 on the following morning the *Castle* liner was torpedoed and sank in 30 minutes. The boats were launched without mishap but the weather changed for the worse and two of them were never seen again.

In this second disaster three more of the crew of the *Trevoise* lost their lives.

TREWELLARD

Hain Steamship Co.; 1936; *Lithgows*; 5,201 tons; 432-3x56 - 2 x 24 - 8; 469 n.h.p.; 11 knots; triple-expansion engines & L.P. turbine.

The steamship *Trewellard*, Capt. L. Daniel, was a unit of the famous *Jervis Bay* convoy which was attacked in mid-Atlantic on November 5th, 1940, by the German pocket battleship *Admiral Scheer*. The convoy was ordered to scatter under cover of a smokescreen while the raider was engaged by the *Jervis Bay*. The *Trewellard* was overhauled and sunk by the enemy some hours later, going down with the loss of 14 men. Capt. Daniel was among the survivors, of whom 25 in three boats were picked up by the steamship *Gloucester City*, Capt. Smith, O.B.E.

For full story of the action, see the *Jervis Bay*.

TREWORLAS

Hain Steamship Co.; 1922; *J. Readhead & Sons*; 4,692 tons; 400-4x53-1x26-3; 457 n.h.p.; 11 knots; triple-expansion engines.

The steamship *Treworlas*, Capt. T. H. Stanbury, was about 50 miles E. of Port of Spain, Trinidad, on December 28th, 1942, when she was torpedoed and sunk by a German submarine. Capt. Stanbury, 33 of the crew and five gunners were lost. Nine survivors were picked up from rafts.

TREWYN

Hain Steamship Co.; 1903; *J. Readhead & Sons*; 3,084 tons; 323x47x25; 1,200i.h.p.; 10 knots; triple-expansion engines. The steamship *Trewyn*, with a cargo of ore from Algiers for Middlesbrough, passed Gibraltar on March 25th, 1916, and was never heard of again. The steamship *Governor* sighted some wreckage and a lifebuoy bearing the names *Trewyn*—St. Ives about a week later, from which it was assumed that the ship had probably been sunk by a German submarine.

TRIADIC

The British Phosphate Commissioners; 1938; *Lithgows*; 6,378 tons; 442-3x60x25; 653 n.h.p.; oilengines. The British motorship *Triadic* was shelled and set on fire by a German raider on December 8th, 1940, while lying off Nauru. The ship sank some time later.

TRIASTER

The British Phosphate Commissioners; 1935; *Lithgows*; 6,032 tons; 423-2x58-2x25-7; 653 n.h.p.; oilengines. The British motorship *Triaster* was shelled and sunk by a German raider on December 8th, 1940, while lying off Nauru.

TRIBESMAN

Charente S.S. Co.; 1937; *Lithgows*; 6,242 tons, 437-3x56x29-4; 582 n.h.p.; triple-expansion engines.

The British steamship *Tribesman*, on a voyage from Liverpool to Durban and Calcutta, was intercepted by the German battleship *Admiral Scheer* at 9 p.m. on December 1st, 1940, about 200 miles S.W. of the Cape Verde Islands. The crew and passengers took to the boats, two of which reached the raider and the occupants were taken aboard. The other two boats, with the majority of the ships' officers and crew, escaped in the darkness and were never seen again. After taking what stores she needed the raider sank the *Tribesman* by gunfire.

TRICOLOR

W. Wilhelmsen; 1925; *Deutsche Werft A.G.*; 6,119 tons; 442-6x58-2x27-6; 988 n.h.p.; oilengines. The Norwegian motorship *Tricolor*, on a voyage from Oslo and Hamburg to Yokohama with general cargo including large consignments of chemical products, was sunk by internal explosions on

January 5th, 1931. The ship had just left Colombo and was four miles out when a tremendous explosion occurred in a hold amidships, followed by other smaller explosions. The ship was enveloped in flames and sank within five minutes. Thirty-six of the 42 persons on board were picked up by the French liner *Porthos*, some from the two boats that had been launched and some from floating wreckage. The captain, 3rd officer, wireless operator, two of the crew and one passenger were lost.

TRICULA

Anglo-Saxon Petroleum Co.; 1936; *Howaldtswerke*; 6,221 tons; 430-1x54-5x30-7; 377 n.h.p.; 11-5 knots; oilengines. The tanker *Tricula*, Capt. O. E. Sparrow, was torpedoed and sunk by a German submarine on August 3rd, 1942, about 250 miles N.N.E. of Trinidad. Capt. Sparrow, 42 of the crew, three gunners and one passenger were lost.

TRIESTE

James Mitchell & Sons; 1883; *Whitehaven S.B. Co.*; 1,505 tons; 255-7x34-3x20-7; 178 n.h.p.; compound engines. The British steamship *Trieste* was wrecked half a mile N. of Peterhead on July 16th, 1918. She was on a voyage from Swansea to Sarpborg carrying a cargo of coal.

TRIESTE

Italian Navy, heavy cruiser; 1926; *Stabilimento Tecnico*; 10,000 tons; 645x67-5x19; 150,000 s.h.p.; 35 knots; turbine engines; 3-drum boilers; eight 8 in. guns, twelve 3-9 in., four 40 mm., eight 13 mm., 8 T.T., 2 aircraft.

The heavy cruisers *Trieste* and *Gorizia* were lying in the harbour of Maddalena, near the straits of Bonifacio, when they were attacked by a force of U.S. bombers on April 10th, 1943. The *Trieste* was hit and sunk, but the *Gorizia*, though badly damaged, escaped for a time, but was scuttled by the Germans in the following year. The normal complement of the *Trieste* was 723, but it is not known how many were on board at the time.

TRIFELS

Deutsche Dampfs. Ges. Hansa; 1922; *J. C. Tecklenborg A.G.*; 6,198 tons; 430-3x56-5x30-2; 608 n.h.p.; triple-expansion engines & L.P. turbine.

The German steamship *Trifels* was captured by the French on November 16th, 1939, and renamed *Sainte Louise*. She was re-possessed by the Germans after the fall of France. On the night of September 8th, 1941, she was sunk by British motor torpedo boats off Calais.

TRIFOLIUM

I. E. Olserfs Rederi-AjB.; 1857; *A. Stephen & Sons*; 593 tons; 173-4x28x17-6.

The Swedish barque *Trifolium* was wrecked off Sennen Cove, Cornwall, on March 15th, 1914. The captain and four others were drowned, five men were saved.

TRIGLAV

Austrian Navy, destroyer; 1913; *Austria*; 800 tons; 265-7x25-7x8-2; 17,000 i.h.p.; 32 knots; turbine engines; Yarrow boilers; two 4 in. guns, six 12 pdr., 4 T.T.

The destroyer *Triglav* took part in the raid on the Albanian port of Durazzo on December 29th, 1915. When leaving the harbour after the bombardment the *Triglav* struck a mine and was disabled. An attempt was made to tow her but this had to be abandoned when Allied forces intercepted and chased the raiders. The *Triglav*, which had suffered a few casualties, was abandoned and sunk by her crew.

The full story of the raid is told under the *Lika*, a sister ship to the *Triglav*, which was blown up in the same minefield.

TRIGLAV

Jugoslavenski Lloyd; 1929; *W. Doxford & Sons*; 6,363 tons; 425x58-2x28-6; 573 n.h.p.; triple-expansion engines. The Yugoslav steamship *Triglav* was torpedoed and sunk by a German submarine on July 9th, 1942, about 800 miles E.S.E. of the Bermudas. Twenty-three of the crew and one gunner were lost

TRIGNAC

Soc. Anon. des Chargeurs de VOuest; 1903; Chantiers Nantais de Constructions Maritimes; 2,375 tons; 282-6x40-6x19-6; 228 n.h.p.; triple-expansion engines.

The French steamship *Trignac* struck a mine and sank in the North Sea on February 24th, 1916.

TRINACRIA

Anchor Line; 1871; R. Duncan & Co.; 2,107 tons; 306 x 34-4 x 22; 424i.h.p.; 12 knots; compound engines. The Anchor liner, *Trinacria*, Capt. S. Murray, left Greenock on February 2nd, 1893, for Mediterranean ports with four passengers and 37 crew. The weather was very bad and the ship experienced heavy seas down the Irish Sea and across to the Bay of Biscay. By the morning of the 8th the *Trinacria* had reached Cape Vilano on the coast of Spain, with a lessening wind and poor visibility. At about 6 a.m. the vessel struck on the rocks off Cape Vilano with great force, and so heavy were the seas that she began to break up. The disaster was so sudden and so overwhelming that very few on board had any opportunity to save themselves. The passengers, three of whom were women missionaries bound for Gibraltar to work among the garrison there, and one young girl, were put into a boat which capsized shortly after leaving the ship. Shortly after striking the *Trinacria* was swept by a huge wave which burst her asunder, the funnel and the ventilators falling inside the ship.

Capt. Murray, 29 of the crew and the four passengers were drowned. Mr. John Rust, chief engineer, two seamen and four stokers managed to swim to the shore; these were the only survivors.

TRINCULO

British Navy, gunboat; 273 tons; 60 n.h.p.; steam engines; one 68 pdr. gun, one 32 pdr.

The gunboat *Trinculo*, Lt. The Hon. F. G. Crofton, was wrecked off Gibraltar on September 5th, 1870. Two of the crew were drowned.

TRINGA

British & Continental Steamship Co.; 1925; Van der Giessen & Zonen; 1,930 tons; 290-5x43-1x19-1; 335 n.h.p.; 11 knots; triple-expansion engines.

The steamship *Tringa*, Capt. Hugh Conway, on a voyage from Antwerp to Glasgow, struck a mine and sank on May 11th, 1940, one and a half miles from the West Hinder buoy at the mouth of the Scheldt. Capt. Conway, 15 of the crew and the pilot were lost.

TRINIDAD

A. W. Duckett & Co.; 1884; Sir J. Laing & Sons; 2,592 tons; 310x37'1x19-8; 583 n.h.p.; 12 knots; compound engines. The steamship *Trinidad*, on a voyage from Havre to Liverpool, was torpedoed and sunk by a German submarine 12 miles E of Codling Light vessel on March 22nd, 1918. The captain and 38 others were killed.

TRINIDAD

British Navy, cruiser; 1939; Devonport Dockyard; 8,000 tons; 549x62x16-5; 72,500 s.h.p.; 33 knots; turbine engines; 3-drum boilers; twelve 6 in. guns, eight 4 in., 16 smaller, 3 aircraft.

The cruiser *Trinidad*, Capt. L. S. Saunders, D.S.O., escorting a convoy to North Russia, was torpedoed by a German aircraft in the Barents Sea on March 29th, 1942. She effected temporary repairs and put about for home but was attacked by over 20 German Ju 88's which scored several hits and set her on fire. It proved impossible to get the fire under control and she became unmanageable. Her crew were taken off by British destroyers which then sunk her with torpedoes on May 15th, 1942.

One officer and 59 ratings were killed, as well as 20 merchant seamen. Two officers were wounded.

TRIONA

The British Phosphate Commissioners; 1931; Harland & Wolff; 4,413 tons; 389-5x54-1x24-5; 534 n.h.p.; triple-expansion engines.

The British steamship *Triona*, on a voyage from Melbourne to Ocean Island, was sunk by a German raider on December 8th, 1940, 220 miles S. of Nauru.

TRIPOLI

Soc. Italiana di Servizi Marittimi; 1912; Cantieri Navail Riuniti; 1,743 tons; 277-2x36-4x18-2; 191 n.h.p.; triple-expansion engines.

The Italian steamship *Tripoli* was torpedoed and sunk by a submarine in the Mediterranean on March 17th, 1918*

TRIPOLI

Italian Navy; 1921; N. Odero & Co.; 1,166 tons; 207-2x 32x19-5; 78 n.h.p.; triple-expansion engines. The steamship *Tripoli* was torpedoed and sunk by a submarine on July 6th, 1943, S. of Capraia.

TRIPOLINO

D. Tripicovich & Ci.; 1912; Ramage & Ferguson; 1,071 tons; 249-9x34-1 X16; 175 n.h.p.; triple-expansion engines. The Italian steamship *Tripolino* was torpedoed and sunk by British aircraft on November 1st, 1942, in the Gulf of Bomba.

TRITO

N.V. Maats. Zeevaart; 1921; N.V. Soele's Scheepswerven & Machinefabriek; 7,057 tons; 231-1x36-2x13-3; 138 n.h.p.; triple-expansion engines.

The British steamship *Trito* was bombed and sunk by German aircraft on the night of September 20th, 1940, on a voyage from Port Talbot to Shoreham. There were only two survivors of her crew of 23.

TRITON

Koninklijke Nederlandsche Stoomb. Maats.; 1913; Dunlop, Bremner & Co.; 1,883 tons; 295x43-2x15-4; 217 n.h.p.; triple-expansion engines.

The Dutch steamship *Triton*, on a voyage from Hamburg to West African ports, was wrecked on April 20th, 1923, off Addah.

TRITON

Koninklijke Nederlandsche Stoomb. Maats.; 1928; A.G. Neptun; 2,078 tons; 285-7x44-7x17-7; 155 n.h.p.; triple-expansion engines.

The Dutch steamship *Triton* was torpedoed, shelled and sunk by the German submarine *U-558* on June 1st, 1942, on a voyage from Demerara to Chesapeake Bay for orders. Six of the crew were lost.

TRITON

W. Wilhelmsen; 1930; Kockums Mek. Verkstad; 6,607 tons; 461-9x60-6x28-9; 1J69 n.h.p.; oilengines. The Norwegian steamship *Triton* was torpedoed and sunk by a German submarine on August 17th, 1942, off the Azores, on a voyage from Sydney, N.S.W., to Avonmouth.

TRITONICA

Dingwall Shipping Co.; 1956; Sir J. Laing & Sons; 12,863 tons; 527-9x70-9x31-9; oilengines.

The steamship *Tritonica*, Capt. J. G. Swanson, with a cargo of ore and a crew of 49, was sunk by collision with the steamship *Roonagh Head*, 6,100 tons, on July 20th, 1963. The collision took place on the St. Lawrence about 20 miles from Quebec in dense fog, the *Tritonica* sinking very quickly.

The steamship *Irish Willow* picked up ten survivors and the *Roonagh Head* another six. Small numbers of men were also picked up by other vessels. Upwards of 22 members of the crew were drowned.

TRIMPH

*British Navy, 1st class battleship; 1903; Vickers; 11,985 tons; 470x71x24*7; 14,000 i.h.p.; 20-1 knots; triple-expansion engines; Yarrow boilers; four 10 in. guns, fourteen 7-5 in., fourteen 14pdr., 4 m.g., 2 T.T.*

The battleship *Triumph* was present at the fall of the German Far Eastern base of Tsingtau on November 7th, 1914, after which she proceeded to the Mediterranean, joining the fleet under Admiral Garden off the Dardanelles in February, 1915. During that month she took part in the preliminary shelling of the forts by the British and French squadrons and was also present at the landing on Gallipoli on April 25th.

On May 25th, shortly after taking up her firing position off Gaba Tepe, the battleship was attacked by a German submarine. At the time she had her torpedo nets spread and all watertight doors closed, being guarded by the destroyer *Chelmer*, which was steaming around her at a mean speed of 15 knots. At 12.25 p.m. the destroyer saw the wash of a periscope some 500 yards on the *Triumph's* starboard beam, and at once steamed toward it, the battleship opening fire at the same time. The torpedo had been discharged, however, and struck the ship fairly, throwing up a column of water mixed with coal from the bunkers. Within ten minutes the *Triumph* had capsized and sunk, going down by the bows with her stern high in the air. Of her ship's company over 500 were rescued by the *Chelmer* and other vessels, but three officers and 70 men lost their lives.

TROCAS

Anglo-Saxon Petroleum Co.; 1893; *J. Laing*; 4,129 tons; 347'5x45-7x27-3; 341 n.h.p.; 9-5 knots; triple-expansion engines.

The tanker *Trocas* was torpedoed and sunk by a German submarine ten miles N.E. of Skyros Lighthouse, Greece, on January 19th, 1918. Twenty-four men were killed, the captain was among the survivors.

TROILUS

China Mutual Steam Nav. Co.; 1921; *Scaffs S.B. & E. Co.*; 7,423 tons; 459-1x56-2x32-5; turbine engines. The British steamship *Troilus*, on a voyage from Colombo to Aden and Liverpool, was torpedoed and sunk by a submarine on August 31st, 1944, about 250 miles E. of Socotra Island. Four of her crew and two passengers were lost.

TROLLA

Karl Torkildsen; 1923; *Laxevaags Maskin & Jernskib.*; 1,598 tons; 245'9x37-9x15-7; 138 n.h.p.; triple-expansion engines. The Norwegian steamship *Trolla* was torpedoed and sunk by a German submarine on August 24th, 1942, about 800 miles E.N.E. of Cape Race on a voyage from Garston to Sydney, N.S. Six of the crew were lost.

TROMOSUND

A/S Arendals D/S; 1928; *Nylands Verksted*; 732 tons; 172-9 x 28-9 X 18-9; 67 n.h.p.; compound engines. On the night of February 28th, 1943, while anchored in a Norwegian fjord, the Norwegian steamship *Tromosund*, Capt. Ramund Jakobson, was boarded by 12 British agents who overpowered the German armed guards. The ship then sailed in an attempt to escape to England. On the following day, however, she was bombed and sunk by German aircraft, with the loss of 28 lives.

TROMP

C. K. Christoffersen; 1898; *Craig, Taylor & Co.*; 2,751 tons; 320 x 46-2 x 21-1; 259 n.h.p.; triple-expansion engines. The Norwegian steamship *Tromp* was sunk by a German submarine off the north-west coast of Spain on May 4th, 1917.

TRONDHIEMSFJORD

A/S den Norske Amerika Linje; 1922; *Napier & Miller*; 6,753 tons; 421-7x55-8x26-5; turbine engines. The Norwegian steamship *Trondhjemsfjord*, under German control, was bombed and sunk by a British aircraft on April 27th, 1943, off Ryvingen. The crew were saved but some of the German armed guard were lost.

TRONOH

Straits S.S. Co.; 1926; *Straits S.S. Co.*; 208 tons; 125-7X 23x8-2; 40 r.h.p.; triple-expansion engines. The British steamship *Tronoh* foundered during a storm off Singapore in the early hours of October 22nd, 1933, with the loss of nine lives. She was carrying a cargo of rubber and copra from Muar to Singapore.

TROPIC SEA

Rederiet Vindeggen A/S; 1920; *A/S Nakskov Skibsvterf*; 5J81 tons; 390-8x53-3x34-3; 717n.h.p.; oilengines. The motorship *Tropic Sea*, Sydney, N.S.W., to Philadelphia with wheat, was captured by the German raider *Orion* on June 18th, 1940, in lat. 28° 48' S., long 160° 38' W.

A prize crew was put on board and the survivors from the *Haxby* (which see) transferred to her.

On September 3rd, she was intercepted by the British submarine *Truant* about 500 miles W. of Bordeaux, whereupon she was scuttled by the prize crew.

The captain of *Tropic Sea*, his wife, together with the captain of *Haxby* and 23 of her crew were taken on board the submarine. Ten others were taken off by flying boat and the remaining 21 in the boats were picked up by a fishing vessel and landed at Corunna.

TROSTBURG

The Admiralty; 1914; *Howaldtswerke*; 6,342 tons; 469-6x 62-1x25-3; 732 n.h.p.; quadruple-expansion engines. The steamship *Trostburg* was formerly German, captured early in the First World War. On March 26th, 1915, she was wrecked in heavy weather six miles S. of Cape Spartel, on a voyage from Cardiff to Gibraltar with coal.

TROUTPOOL

Sir R. Ropner & Co.; 1903; *Ropner & Son*; 3,281 tons; 325X 48x22-9; 302 n.h.p.; triple-expansion engines. The British cargo ship *Troutpool* was wrecked on September 30th, 1923, S. of St. Pierre, Miquelon, while on a voyage in ballast from Las Palmas to St. John's, N.F.L.

TROUTPOOL

The Pool Shipping Co.; 1927; *W. Gray & Co.*; 4,886 tons; 390 x55x26-4; 439 n.h.p.; 11 knots; triple-expansion engines. The steamship *Troutpool*, on a voyage from Rosario to Glasgow with grain, left Belfast Lough on July 20th, 1940. She had just cleared the anchorage when she struck a mine and sank off Bangor Pier Light, with the loss of 11 lives.

TROYBURG

Flensburger Dampfercomp. H. Schuldt & Co.; 1923; *J. Frerichs & Co.*; 2,288 tons; 290-2x42-8x19-6; 180 n.h.p.; triple-expansion engines. The German steamship *Troyburg* was wrecked on August 25th, 1941, off Farsund, Norway.

TRUWOR

G. W. Schroder; 1889; *E. Withy & Co.*; 2,462 tons; 290x 40-1x19-3; 220 n.h.p.; triple-expansion engines. The Russian steamship *Truwor* was torpedoed and sunk by a German submarine in the Arctic on May 3rd, 1917.

TRUXTON

United States Navy, destroyer; 1920; *W. Cramp & Sons*; 1,193 tons; 314-3x30-7x13-5; 26,000 s.h.p.; 35 knots; turbine engines; four 4 in. guns, 12 T T.

The U.S. destroyer *Truxton* ran aground off St. Lawrence, Newfoundland, on February 23rd, 1942, in a violent gale. The crew of the ship made several attempts to swim through icy seas to shore with lines. In some cases the attempts succeeded but the lines were soaked with oil from the wrecked destroyer and could not be handled. A breeches buoy was rigged at sea level but when survivors landed on the rocks they were swept away by the seas before they could scale the cliffs.

Nearly 100 officers and ratings were lost.

TRYM

H. Roed & Co.; 1906; *Osbourne, Graham & Co.*; 1,801 tons; 279 x 40-1 x 18-1; 182 n.h.p.; triple-expansion engines. The Norwegian steamship *Trym* was sunk by a German submarine off Ushant on November 22nd, 1916.

TSIEH FA

Chi Yuang S.S. Co.; 1894; *R. Thompson & Sons*; 2,914 tons; 309-1x42-5x19; 249 n.h.p.; triple-expansion engines. The Chinese steamship *Tsieh Fa*, on a voyage from Shanghai to

TSINGTAO MARU

Lungkow, ran on to an uncharted rock about 22 miles N.E. of Lungkow Lighthouse on April 13th, 1932. Fire broke out in one of the holds containing 10,000 small drums of petrol and the ship was completely destroyed.

TSINGTAO MARU

Dairen Kisen K.K.; 1930; *Mitsubishi Zosen Kaisha*; 4,017 tons; 360x46x28-5; turbine engines. The steamship *Tsingtao Maru* was sunk by U.S. carrier-based aircraft on October 18th, 1944, about 40 miles N. of Luzon Island, Philippines.

TSIOLKOVSKY

U.S.S.R.; 1935; *N.V. Nederlandsche Scheepsbouw Maats.*; 2,847 tons; 285-1x49x20-5; 472n.h.p.; oilengines. The motorship *Tsiolkovsky* was torpedoed and sunk by German surface craft on May 1st, 1942, off the North Cape on a voyage from Murmansk to England. Twenty-seven lives were lost.

TSIROPINAS

C. A. Tsiropinas & Sons; 1905; *Richardson, Duck & Co.*; 3,015 tons; 325 x47x22-4; 280 n.h.p.; triple-expansion engines. The Greek steamship *Tsiropinas* was sunk by a German submarine off the north-west coast of Spain on January 1st, 1917.

TSUGA

Japanese Navy, destroyer; 1920; *Ishikawajima*; 770 tons; 275x26x8; 17,500 s.h.p.; 31-5 knots; turbine engines; *Kanpon boilers*; three 4-7 in. guns, 2 m.g., 4 T.T. The Japanese destroyer *Tsuga* was bombed and sunk by U.S. naval aircraft off the Pescadores on January 15th, 1945. Her normal complement was 110.

TSUGARU MARU

Japanese Government; 1924; *Mitsubishi Zosen K.K.*; 3,484 tons; 350 X 52x22; turbine engines. The ferry *Tsugaru (Tugarii) Maru* was sunk by U.S. carrier-based aircraft on July 14th, 1945, off the Tsugaru Strait.

TSUKIKAWA MARU

Kawasaki Kisen K.K.; 4,673 tons. The steamship *Tsukikawa Maru* was torpedoed and sunk by the U.S. submarine *Bowfin* on March 10th, 1944, off the southern tip of Halmahera Island, Celebes.

TSUKUBA

Japanese Navy, 1st class battleship; 1905; *Kure Dockyard*; 13,750 tons; 475x75x26; 20,000 i.h.p.; 20-5 knots; triple-expansion engines; *Miyabara boilers*; four 12 in. guns, twelve 6 in., twelve 4-7 in., two 14pdr., three 3 pdr., 6 m.g., 3 T.T. The Japanese battleship *Tsukuba* was lying at anchor in Yokosuka Harbour on January 14th, 1917, when her fore magazine exploded, killing about 200 of those on board and setting the ship on fire. Efforts to extinguish the flames proved unavailing and the *Tsukuba* sank in twenty minutes. The loss of life was much less than would have been the case had all the crew been on board, as nearly one half were on leave ashore. The *Tsukuba* carried a complement of 817 officers and men.

TSUKUBA MARU

Toa Kaiun K.K.; 1923; *Yokohama Dock Co.*; 3,172 tons; 315 x46x27; 284 n.h.p.; triple-expansion engines. The steamship *Tsukuba (Tukuba) Maru* was torpedoed by the U.S. submarine *Picuda* and bombed and sunk by land-based aircraft on May 22nd, 1944, about 200 miles S.E. of Hong Kong.

TSUKUBASAN MARU

Mitsui Sempaku K.K.; 1,937 tons. The steamship *Tsukubasan Maru* was sunk by U.S. carrier-based aircraft on September 21st, 1944, off Corregidor.

TSUKUSHI MARU

Mitsui Sempaku K.K.; 8,135 tons. The transport *Tsukushi Maru* was torpedoed and sunk by the U.S. submarine *Tang* on August 23rd, 1944, about 100 miles S. of Shimizu, Japan.

TSUKUSHI MARU No. 2

Kaijima Tanko K.K.; 1926; *Uraga Dock Co.*; 2,417 tons; 300-4x43-5x22-2; 264 n.h.p.; triple-expansion engines. The steamship *Tsukushi (Tukusi) Maru No. 2* was torpedoed and sunk by the U.S. submarine *Sealion II* on July 11th, 1944, about 150 miles W. of Inchon, Korea.

TSUKUSHI MARU No. 3

Kaijima Tanko K.K.; 1927; *Kobe Steel Works*; 1,012 tons; 225-3x33-5x16-7; 88 n.h.p.; triple-expansion engines. The steamship *Tsukushi (Tukusi) Maru No. 3* was torpedoed and sunk by the U.S. submarine *Trigger* on March 18th, 1945, W. of the Ryukyu Islands.

TSUNESHIMA MARU

Iino Kaiun K.K.; 2,926 tons. The steamship *Tsuneshima Maru* was torpedoed and sunk by the U.S. submarine *Gato* on December 20th, 1943, 350 miles N.E. of Manus Island.

TSURUGA MARU

Nippon Yusen K.K.; 1916; *Mitsubishi Dockyard & E. Works*; 6,988 tons; 445x58x34; 620 n.h.p.; triple-expansion engines. The steamship *Tsuruga (Turugd) Maru* was sunk by gunfire from U.S. warships on January 24th, 1942, S. of Gorontalo, Celebes.

TSURUGISAN MARU

Awanokuni Kyodo Kisen K.K.; 1905; *Irvine's S.B. & D.D. Co.*; 3,108 tons; 325x47-1x13-8; 275 n.h.p.; triple-expansion engines. The steamship *Tsurugisan (Turugisari) Maru* was bombed and sunk by U.S. land-based aircraft on December 27th, 1942, E. of New Ireland.

TSURUMI

Japanese Government; 6,500 tons (approx.). The tanker *Tsurumi* was torpedoed and sunk by the U.S. submarine *Cero* on August 5th, 1944, off the south coast of Mindanao Island, Philippines.

TSURUSHIMA MARU

Uwajima Unyu K.K.; 1919; *Uraga Dock Co.*; 4,645 tons; 600 x 51 - 2 x 26 -1; 377 n.h.p.; triple-expansion engines. The steamship *Tsurushima (Turusima) Maru* was torpedoed and sunk by the U.S. submarine *Jack* on June 30th, 1944, about 50 miles W. of Batangan, Philippines.

TSUSHIMA MARU

Nippon Yusen K.K.; 1914; *Russell & Co.*; 6,754 tons; 444-4 x 58-2x31-3; 619 n.h.p.; triple-expansion engines. The steamship *Tsushima (Tusimd) Maru* was torpedoed and sunk by the U.S. submarine *Bowfin* on August 22nd, 1944, about 100 miles S.W. of Shichi-to Islands, Japan.

TSUYAMA MARU

Nippon Yusen K.K.; 1916; *Mitsubishi Dockyard & E. Works*; 6,962 tons; 445x58x34; 620 n.h.p.; triple-expansion engines. The steamship *Tsuyama (Tuyamd) Maru* was torpedoed and sunk by the U.S. submarine *Pomfret* on October 2nd, 1944, 85 miles W. of Basco, Batan Islands.

TUAPSE

U.S.S.R.; 1931; *Swan, Hunter & Wigham Richardson*; 6,320 tons; 420-5x57-3x32-3; 687n.h.p.; oilengines. The motorship *Tuapse* was torpedoed and sunk by a German submarine on July 4th, 1942, N.W. of Havana on a voyage from Durban to New Orleans, in ballast. Eight of the crew were lost.

TUBANTIA

Koninklijke Hollandsche Lloyd; 1913; *A. Stephen & Sons*; 13,911 tons; 540-4x65-8x35-3; 1,725 n.h.p.; 17-5 knots; quadruple-expansion engines. The Dutch liner *Tubantia* bound from Amsterdam to Buenos Aires with a company of 376 persons, of whom 82 were passengers. On March 16th, 1916, when four miles E.N.E. of the North Hinder

Lightship the liner was about to anchor owing to fog coming up when she was torpedoed by a German submarine.

The torpedo blew a large hole amidships and wrecked the engine room. Fortunately the ship did not sink at once and Dutch torpedo boats came on the scene and took of all on board, several of whom had been badly injured.

TUBINGEN

German Government; 1922; Forges et Chan tiers de la Mediterranee; 3,509 tons; 346'4x44-6x21-8; 486 n.h.p.; triple-expansion engines.

The steamship *Tubingen* was formerly the French *Gouverneur General Tirman*, taken over by the Germans for use as a hospital ship. On November 18th, 1944, she was bombed and sunk by Allied aircraft off Pola.

TUBINGEN

Hamburg-Bremer-Afrika Linie; 1929; Furness S.B. Co.; 5,453 tons; 401-5x52-2x31; 538 n.h.p.; triple-expansion engines.

The German steamship *Tubingen* was bombed and sunk by British aircraft on April 23rd, 1945, in the Kattegat.

TUCAPEL

Compania Sud Americana de Vapores; 1900; J. Reid & Co.; 2,967 tons; 380-5x44-2x19-9; 596 nh.p.; 12 knots; triple-expansion engines.

The Chilean steamship *Tucapel*, Capt. Collins, was wrecked on September 4th, 1911, at Camana Beach, N. of Quiloa, near Mollendo, Capt. Collins and about 30 others were lost but the majority of passengers and crew were saved.

TUCKWO

Indo-China Steam Nav. Co.; 1904; London & Glasgow Eng. & Iron S.B. Co.; 3,770 tons; 330x46-1x14-2; 228 n.h.p.; triple-expansion engines.

The British steamship *Tuck-Wo* was bombed and set on fire by Japanese aircraft on December 5th, 1937, at Wuhu, during the Sino-Japanese hostilities. The ship was completely gutted.

TUCKER

United States Navy, destroyer; 1937; Norfolk Navy Yard; 1,500 tons; 341-3x34-7x9-7; 42,800 s.h.p.; 36-5 knots; turbine engines; Express boilers; four 5 in. guns, several smaller, 12 T.T.

The United States destroyer *Tucker* struck a mine and sank off Espiritu Santo Island, New Hebrides, on August 4th, 1942. The vessel's normal complement was 200.

TUCUMAN

Hamburg-Sudamerikanische Dampfs. Ges.; 1918; Russell & Co.; 4,621 tons; 384-1 x 51-8 x 26-3; 488 n.h.p.; triple-expansion engines.

The German steamship *Tucuman* was bombed and sunk by British aircraft on April 19th, 1945, in the Kattegat.

TUDDAL

W. Wilhelmsen; 1895; Ropner & Son; 3,510 tons; 330x45x 18-6; 289 n.h.p.; triple-expansion engines.

The Norwegian steamship *Tuddal* was sunk by a German submarine off Ushant on August 14th, 1917.

TUGGERAH

Wallarah Coal Co.; 1912; Clyde S.B. & E. Co.; 749 tons; 186'3x28-9x12-6; 93 r.h.p.; triple-expansion engines.

The Australian steamship *Tuggerah*, on a voyage from Bulli to Sydney, foundered off Port Hacking, Australia, in a southerly gale on May 17th, 1919. The captain and five others were lost, 11 men were saved.

TULAGI

Burns, Philp & Co.; 1939; Hong Kong & Whampoa Dock Co.; 2,281 tons; 241-8x44-2x24-8; 396 n.h.p.; oil engines.

The Australian motorship *Tulagi*, on a voyage from Sydney, N.S.W., to Colombo with flour, was torpedoed and sunk by a

Japanese submarine on March 27th, 1944, about 400 miles E. of Diego Garcia Island. Nothing was heard of the crew until seven men on a raft landed on a small island in the Seychelles on May 25th, having drifted some 1,500 miles in 59 days.

TULIP

British Navy, sloop; 1916; Richardson, Duck & Co.; 1,250 tons; 267-7x33-5x11'7; 2,400 i.h.p.; 17 knots; triple-expansion engines; two 4-7 in. guns, two 3 pdr.

The sloop *Tulip* was disguised as a Q-ship and was operating in the Atlantic when she was torpedoed and sunk by the German submarine *U-62*. The attack took place on April 30th, 1917, and 80 of those on board took to the boats, being picked up by the British destroyer *Mary Rose* and landed at Queenstown. The commander was taken to Germany by the submarine as a prisoner of war.

TUMMEL

E. P. Hutchinson; 1912; Goole S.B. & R. Co.; 531 tons; 165-2x 26-1 x 10-5; 78 r.h.p.; triple-expansion engines. The British ship *Tummel* struck a mine and sank seven miles S. of Kentish Knock on February 24th, 1916. Nine men were killed.

TUNEHICO MARU

Ishizaki Hikogoro; 1900; Maryland Steel Co.; 3,973 tons;

331-5x47x25; 203 n.h.p.; triple-expansion engines. The Japanese steamship *Tinehiko Mam*, on a voyage from Moji to Kawasaki with iron ore, was sunk by collision with the steamship *Kankyo Mam*, 3,204 tons, on May 21st, 1939, off Shimonoseki.

TUNG FOO

TungAnS.S.Co.; 1911; G. Seebeck A.G.; 1,783 tons; 250-1 x 38-

1x17-9; 179 n.h.p.; triple-expansion engines. The Chinese steamship *Tung Foo*, on a voyage from Hokkaido to China, foundered during a typhoon on November 2nd, 1934, near Mokpo, Korea. All on board were lost.

TUNG NAN

Tung Nan S.S. Co.; 1906; Caledon S.B. & E. Co.; 1,613 tons;

246'4x36-6x21-7; triple-expansion engines. The Chinese steamship *Tung Nan* was bombed and sunk by Chinese Nationalist aircraft on July 14th, 1949, at Wenchow.

TUNG SHAN

HoongOnCo.; 1919; C. Hill & Sons; 2,787 tons; 303x43x

20-8; 270 n.h.p.; triple-expansion engines.

The Chinese steamship *Tung Shan* was bombed and sunk by Chinese Nationalist aircraft on August 15th, 1949, in the Yangtze River about 60 miles from Shanghai.

TUNG SHUN

Ta Tung Hsing S.S. Co.; 1896; Sir R. Dixon & Co.; 2,346 tons;

290 x 40 - 3 x 24; 203 n.h.p.; triple-expansion engines. The Chinese

steamship *Tung Shun*, on a voyage from Foochow to Haiphong, was wrecked on February 8th, 1936, three miles S. of Mofu Point, on the north-east coast of Hainan Island.

TUNGUE

Portuguese Government; 1902; F. Schichau; 8,021 tons;

449-2x55-4x35-8; 690 n.h.p.; triple-expansion engines. The

German steamship *Zieten* was requisitioned by the Portuguese Government and renamed *Tungue*. Subsequently she was torpedoed and sunk by a submarine in the Mediterranean on November 27th, 1917.

TUNISIA

La Tunisienne Steam Nav. Co.; 1927; J. Readhead & Sons;

4,337 tons; 370-2x52-3x25-9; 341 n.h.p.; 10-5 knots;

triple-expansion engines.

The steamship *Tunisia*, Capt. W. A. Shute, O.B.E., was bombed and sunk by German aircraft about 350 miles due W. of Achill Head, Co. Mayo, on August 4th, 1941. The crew took to the boats but 38 of them were lost. Capt. Shute was among the five survivors.

TUNISIE

TUNISIE

Cie. des Bateaux a Vapeur du Nord; 1907; Ateliers & Chantiers de France; 3246 tons; 319-8x42-4x17-5; 261 n.h.p.; triple-expansion engines.

The French steamship *Tunisie* was lost off the west coast of Ireland on or about June 19th, 1917. It is probable that she was sunk by a German submarine.

TUNSBURG CASTLE

*Norwegian Navy, corvette; 1943; British Isles; 1,010 tons; 252x36-6x15-7; 2,880 i.h.p.; 16-5 knots; triple-expansion engines; 3-drum boilers; one 4 in. gun, six 20 mm. The corvette *Tunbsberg Castle* was formerly the *Shrewsbury Castle*, lent to the Norwegian navy by the Admiralty. On December 12th, 1944 when off the coast of north Russia she struck a mine and sank. She carried a complement of about 120.*

TURAKINA

*New Zealand Shipping Co.; 1923; W. Hamilton & Co.; 9,691 tons; 460-5x62-7x35-2; 1,194 n.h.p.; turbine engines. The steamship *Turakina*, Capt. J. B. Laird, was bound from Sydney to Wellington where she was to complete her cargo with a shipment of frozen meat for England. On the evening of August 20th, 1940, when in the Tasman Sea about 260 miles N. by W. of Cape Egmont and 400 miles from Wellington, she was intercepted by the German raider *Orion*; six 5-9 in. guns, one 3 in., 6 AA. and 6 T.T. Against this formidable armament the New Zealand vessel could only oppose one 4 • 7 in. gun mounted, aft.*

Nevertheless she put up a most spirited fight against her antagonist, who opened fire at two and a half miles. In about 20 minutes about half the *Turakina's* crew of 56 were killed or wounded, and the ship herself heavily on fire and badly battered.

Early in the action the merchant ship's range-finder was smashed but her gun continued to fire until the last, and scored some hits.

The *Orion* approached to within one mile and discharged two torpedoes, both of which hit; the second causing such vital damage that the *Turakina* sank within two minutes. Twenty-one survivors, one of whom died later, were picked up by the enemy.

Capt. Laird and 33 officers and men went down with the ship, having fought a very gallant action and maintained the highest traditions of the Merchant Navy.

The New Zealand cruiser *Achilles* from Wellington, and a flying boat from Auckland made an exhaustive search of the area, but failed to find any wreckage or make contact with the raider.

TURBINE

Italian Navy, destroyer; 1901; Pattison; 330 tons; 6,000 i.h.p.; 30 knots; turbine engines; Thornycroft boilers; five 6 pdr. guns, 4 T.T.

The Italian destroyer *Turbine*, Cdr. Bianchi, cruising in the Adriatic in company with other units on May 24th, 1915, when an Austrian destroyer was sighted. The *Turbine* at once went in chase and after half an hour ran into an enemy raiding force consisting of the Austrian light cruiser *Helgoland* and several destroyers. As she was now some distance away from her consorts she turned to rejoin them, but came under a heavy fire which exploded her boilers and set her on fire. After an hour's fighting in which the whole of her ammunition was expended Cdr. Bianchi ordered the ship to be scuttled. Nine of the crew of 53, including the commander, were picked up by the Austrians. The near approach of the Italian forces prevented any further saving of life and the Austrians recalled their boats and steamed away.

TURBINE

Italian Navy, destroyer; 1927; Odero; 1,092 tons; 307-5x 30-5x10-7; 40,000 s.h.p.; 36 knots; turbine engines; Express boilers; four 4-7 in. guns, four 37 mm.A.A., two 13 mm.A.A., 6 T.T.

The Italian destroyer *Turbine* fell into the hands of the Germans at the capitulation of Italy in September 1943, and was recommissioned by them as the *TA-14*. On September 15th, 1944, when lying off Salamina she was bombed and set on fire by aircraft of the R.A.F. and became a total loss. She carried a complement of over 150.

TURBO

*Lane & Macandrew; 1892; J. Laing; 4,134 tons; 347-5X 45-7x27-3; 341 n.h.p.; triple-expansion engines. The British tanker *Turbo* was wrecked at Nieuwe Diep on January 7th, 1908, while carrying petroleum from Batum to Hamburg.*

TURBULENT

British Navy, destroyer; 1916; Hawthorn, Leslie & Co.; 1,080 tons; 309x28-5x9-5; 25,000 s.h.p.; 32knots; turbine engines; Yarrow boilers; five 4 in. guns, 4 T.T.

The destroyer *Turbulent*, Lt. Cdr. D. Stuart, was under construction for the Turkish navy at the outbreak of the First World War. She was taken over by the Admiralty as soon as completed and saw service with the Grand Fleet. She took part in the battle of Jutland as a unit of the 10th Flotilla. On the night of May 31st, 1916, she was with a destroyer force made up of units from several flotillas which had lost touch or had been separated in the course of the day's fighting. At 12.30 on the morning of June 1st *Turbulent* was the last in line of 12 ships following the light cruiser *Champion*, Capt. J. U. Farie, when they encountered four German battleships in line ahead. The British force was drawing clear across the bows of the Germans when the leading battleship rammed *Turbulent* and cut her in two.

Five officers and 85 ratings of the destroyer's complement were drowned and 13 ratings were picked up by the Germans and became prisoners of war.

TURID

*Bachke & Co.; 1904; Trondhjems Mek. Vcerksted; 1,148 tons; 230-6x35-2x15-8; 132 n.h.p.; triple-expansion engines. The Norwegian steamship *Turid* struck a mine and sank in the North Sea on May 28th, 1917.*

TURKHEIM

*German Government; 1901; Osbourne, Graham & Co.; 1,912 tons; 275 x 40 - 2 x 17 • 8; 180 n.h.p.; triple-expansion engines. The steamship *Turkheim* was formerly the Swedish *Fagervik*, taken over by the Germans. On January 14th, 1942, she was torpedoed and sunk by a Russian submarine off North Norway.*

TURKISH PRINCE

Prince S.S. Co.; 1879; C. Mitchell & Co.; 1,931 tons; 286x 35-1x24-2; 197 n.h.p.; compound engines.

The British steamship *Turkish Prince* was wrecked on Contoy Island, Yucatan Channel, on September 15th, 1897, while on a voyage from Genoa to New Orleans carrying a general cargo.

TURKSIB

U.S.S.R.; 1922; A. Vuijk & Zonen; 3,160 tons; 325-9x 48-4x23; 356 n.h.p.; turbine engines.

The Russian steamship *Turksib*, on a voyage from Portland, Oregon, to Vladivostock, was wrecked on November 21st, 1942, at Scotch Cap, Unimak Island.

TURNER

United States Navy, destroyer; 1943; United States; 1,700 tons; 348-5 x 3 6 x —; 50,000 s.h.p.; 36-5 knots; turbine engines;

*four 5 in. guns, four 40 mm., four 20 mm., 5 T.T. The United States destroyer *Turner* carrying a complement of over 200 blew up and sank off Sandy Hook on January 3rd, 1944. One hundred and sixty-three survivors, many of whom were injured, were picked up. The commander was among the missing.*

TURRET

Peter sen, Tate & Co.; 1892; W. Doxford & Sons; 1,970 tons; 280-2x38x20-3; 203 n.h.p.; triple-expansion engines. The

*British steamship *Turret* was wrecked eight miles from Cape Villano Lighthouse, off the north-west coast of Spain, on January 27th, 1900. She was on a voyage from the Tyne to Leghorn carrying a cargo of coal.*

TURRET BAY

Canadian Ocean & Inland Nav. Co.; 1894; W. Doxford & Sons; 2,211 tons; 297x40x21-7; 233 n.h.p.; triple-expansion engines.

The British steamship *Turret Bay* ran on to a submerged rock off

St. Paul's Island, in the River St. Lawrence, backed off and sank in deep water on May 21st, 1904. She was on a voyage from the Tyne to Montreal carrying a cargo of coal. The captain and 11 others were drowned.

TUSCAN PRINCE

Prince Line; 1913; W. Doxford & Sons; 5,275 tons; 420 X 54-1x26-3; 577 n.h.p.; triple-expansion engines.

The British cargo ship *Tuscan Prince* was wrecked on Village Island, Barclay Sound, on February 15th, 1923, while on a voyage from the Tyne, via Antwerp, to Vancouver carrying a general cargo.

TUSCAN STAR

F. Leyland & Co.; 1930; Palmers' Co.; 11,449 tons; 47lx68-3x35-1; 1,994 n.h.p.; 15knots; oilengines. The liner *Tuscan Star*, Capt. E. N. Rhodes, was torpedoed and sunk by a German submarine on September 6th, 1942, about 300 miles S.W. of Cape Palmas. Forty-one of the crew, eight gunners and three passengers were lost. Capt. Rhodes was among the survivors.

TUSCANIA

Anchor Line; 1914; A. Stephen & Sons; 14,348 tons; 549 -3 X 66-5x41-7; 17-5 knots; turbine engines.

The Anchor liner *Tuscania*, Capt. P. McLean, O.B.E., was taken over as a government transport in the First World War. At the time of her loss she was carrying 2,235 persons, of whom 113 officers and 1917 other ranks belonged to the United States Army, the remainder consisting of six passengers and two naval ratings, besides crew. On the night of February 5th, 1918, when seven miles north of Rathlin Island the *Tuscania* was torpedoed by a German submarine and sank with the loss of 166 lives.

TUSKAR

Farrar, Groves & Co.; 1889; Richardson, Duck & Co.; 2,390 tons; 297X 40 -1 x 19; 200 h.p.; triple-expansion engines. The British steamship *Tuskar* was wrecked near Nieuwe Diep on December 30th, 1891, while on a voyage from Savannah to Bremen carrying a cargo of cotton.

TUSKAR

Clyde Shipping Co.; 1890; W. B. Thompson & Co.; 1,159 tons; 243x33-7x15-9; 253 n.h.p.; 9-5 knots; triple-expansion engines.

The steamship *Tuskar* struck a mine and sank three miles W. of Eagle Island, off Co. Mayo, on September 6th, 1917. Ten men were killed, the captain was among the survivors.

TUSNASTABB

Kristiansunds Dampskibs. Rederi Akties.; 1916; Fredrikstads Mek Vaerksted; 1,140 tons; 230x36x16-7; 106 n.h.p.; triple-expansion engines.

The Norwegian steamship *Tusnastabb* struck a mine and sank in the North Sea on March 5th, 1918.

TUTOYA

LloydBrasileiro; 1913; W. Dobson & Co.; 1,125 tons; 220-4x 35x13-6; 187 n.h.p.; triple-expansion engines.

The steamship *Tutoya* was torpedoed and sunk by a German submarine at 1 a.m. on July 1st, 1943, between Paranagua and Santos. The captain and six others were killed.

TUVA

O.Banck; 1889; Schlesinger, Davis & Co.; 2,270 tons; 282 -2 x 39-1x19-7; 195 n.h.p.; triple-expansion engines.

The Swedish steamship *Tuva* was sunk by a German submarine in the North Sea on October 6th, 1916.

TUXPAM

Petroleos Mexicanos; 1903; Palmers' Co.; 7,008 tons; 435-lx 54-6x30-3; 564 n.h.p.; triple-expansion engines. The Mexican tanker *Tuxpam* was torpedoed and sunk by a German submarine on the night of June 26th, 1942, between Tampico and Veracruz, with the loss of eight lives.

TWEED

Royal Mail Steam Packet Co.; 1841; Thompson & Spiers; 1,800 tons; 230x — x—; 450 h.p.; 9 knots; side-lever engines. The paddle steamer *Tweed*, Capt. Parsons, was one of the fine ships with which the Royal Mail Steam Packet Co. carried out its con tract with the Admiralty for the delivery of mails to the West Indies and the Gulf of Mexico in the 1840's. No fewer than six of these ships were lost in the first eight years, a most unfortunate record for any company.

The vessel left Southampton on December 17th, 1846, for the West Indies and on February 9th, 1847, left Havana for Vera Cruz, Mexico, with 62 passengers and 89 crew. The weather was bad with a northerly wind and heavy rain, and the vessel's position could not be checked owing to the cloudy sky. The captain therefore proceeded by dead reckoning and set a course which he believed would take him between the coast of Yucatan and the Alecrane Reef—a cluster of coral rocks some 14 miles long by eight wide—68 miles from shore.

On the morning of February 12th at about half-past three, when making seven knots under steam and sail, the *Tweed* struck on the Alecranes. The damage was fatal; the ship's bottom was badly holed, her main steampipe broken and her bunkers brought down upon the engines. Orders were given for the masts and funnel to be cut away and for the port boats to be got out, those on the starboard side having been smashed. The boats capsized on launching and their occupants were drowned. The force of the seas was tremendous and the ship broke up very rapidly.

Capt. Parsons and a number of others managed to reach the reef on floating wreckage and once ashore they made every effort to rescue the others. In all 79 persons were saved.

The place on which the shipwrecked people found themselves was a barren and desolate reef of rocks offering nothing but bare security from the violence of the seas. A raft was constructed to accommodate all the survivors and moored to the rocks, so that when the tide rose everyone was assured of safety. A certain amount of the ship's stores was salvaged and provided sufficient food for the time being. Later one of the boats was patched with canvas and in it Mr. Ellison, the first officer, together with the Naval Agent and seven men set out for the Campeachy coast. Fortunately they fell in with the Mexican brig *Emilio* which took everyone safely off the raft and brought them to the port of Sisal.

TWEED

W. Sloan & Co.; 1892; D. J. Dunlop & Co.; 1,025 tons; 230x 32-1x15-5 ; 224 n.h.p.; 10 knots; triple-expansion engines. The steamship *Tweed* was torpedoed and sunk by a German submarine ten miles S. by W. i W. of St. Catherine's Point on March 13th, 1918. Seven men were killed, the captain was among the survivors.

TWEED

British Navy, frigate; 1942; A. & J. Inglis; 1,445 tons; 306x 37-5 x—; 21 knots; turbine engines; 3-drum boilers; two 4 in. A.A. guns, several smaller.

The frigate *Tweed*, Lt. Cdr. R. S. Miller, D.S.C., R.D., R.N.R., was torpedoed and sunk by a German submarine in mid-Atlantic on January 7th, 1944. The vessel carried a complement of about 150.

TWI APRILE

Soc. Anon. Cooperativa di Nav. Garibaldi; 1919; Standard S.B. Corp.; 4,787 tons; 395-7x52-2x27-4; 339 n.h.p.; triple-expansion engines.

The Italian steamship *Twi Aprile* was torpedoed and sunk by a submarine on February 17th, 1943, about three miles N.E. of Cape San Vito, Sicily.

TWIGGS

United States Navy, destroyer; 1943; Charleston Navy Yard; 2,050 tons; 376-5x39-5x—; 60,000 s.h.p.; 35-5 knots; turbine engines; five 5 in. guns, four 40 mm., four 20 mm., 10 T.T. The United States destroyer *Twiggs* was attacked by Japanese aircraft off Okinawa on June 16th, 1945. The vessel, which carried a complement of over 250 was hit and sunk with heavy loss of life.

TWILIGHT

TWILIGHT

John Wood & Co.; 1889; *Grangemouth Dockyard Co.*; 1,506 tons; 250 x 35 - 2 x 16 - 8; 120 h.p.; triple-expansion engines. The British steamship *Twilight* sank after a collision with the steamship *Ada*, 876 tons, near Corton Lightship on February 1st, 1893, while on a voyage from Blyth to Genoa carrying a cargo of coal.

TWIZELL

I. Fenwick & Son; 1901; *S. P. Austin & Son*; 1,717 tons; 268 x 37 - 7 x 17; 194 n.h.p.; triple-expansion engines. The British steamship *Twizell* was wrecked on the Robbenplatte, near Cuxhaven, on November 21st, 1903. She was on a voyage from South Shields to Hamburg carrying a cargo of coal.

TYCHO

Ellermarfs Wilson Line; 1904; *Earless S.B. & E. Co.*; 3,216 tons; 335x47x22-9; 189 n.h.p.; 9 knots; triple-expansion engines. The steamship *Tycho* was torpedoed and sunk by a German submarine 16 miles W. i S. of Beachy Head on May 20th, 1917. The captain and 14 others were killed.

TYLER

Old Dominion S.S. Co.; 1913; *New York S.B. Co.*; 3,928 tons; 322-2x47-2x15-5; 218 n.h.p.; triple-expansion engines. The American steamship *Tyler* was torpedoed and sunk by a submarine in the Mediterranean on May 2nd, 1918.

TYMERIC

Bank Line; 1919; *Hawthorn, Leslie & Co.*; 5,228 tons; 400-1 x 52-3x28-5; 517 n.h.p.; 11 knots; triple-expansion engines. The steamship *Tymeric*, on a voyage from Hull to Buenos Aires, was torpedoed and sunk by a German submarine on November 23rd, 1940, about 600 miles W. of the Hebrides. Seventy-two of her complement were lost, three survivors were picked up some time later.

TYNE MARU

Kawasaki Risen K.K.; 1920; *Kawasaki Dockyard Co.*; 5,873 tons; 385 x 51 x 36; 440 n.h.p.; triple-expansion engines. The steamship *Tyne Maru*, on a voyage from Dairen to Yokohama with cereals and pig iron, collided with the steamship *Kirin Maru No. 1* on May 2nd, 1932, in dense fog off Cape Shantung, near Dairen. The *Tyne Maru* sank in five minutes with the loss of five lives. The *Kirin Maru*, although badly damaged, was able to reach port.

TYNE DALE

British Navy, destroyer; 1940; *A. Stephen & Sons*; 904 tons; 272-5x28-2x7-7; 19,000 s.h.p.; 27-5 knots; turbine engines; 3-drum boilers; four 4 in. A.A. guns, 8 smaller. The destroyer *Tynedale*, Lt. Cdr. J. J. S. Yorke, D.S.C., was torpedoed and sunk by the German submarine *U-593* off Bougie on December 12th, 1943. Seven officers and 66 ratings were killed.

TYNEFIELD

Hunting S.S. Co.; 1926; *Sir J. Laing & Sons*; 5,856 tons; 395 x 54-5x32; 640 n.h.p.; 11 knots; oil engines. The tanker *Tynefield*, Capt. L. B. Carr, struck a mine and sank in the Suez Canal on October 5th, 1941. Eight men were killed, Capt. Carr was among the survivors.

TYNWALD

Isle of Man Steam Packet Co.; 1937; *Vickers Armstrongs*; 2,376 tons; 314-6x46-1x17-1; 1,379 n.h.p.; 21 knots; turbine engines.

The steamship *Tynwald* was taken over by the Admiralty during the Second World War in which she served as an anti-aircraft escort ship. During the Allied landings in North Africa she struck a mine and sank near Bougie Bay, Algeria, on November 12th, 1942.

TYPHON

French Navy, destroyer; 1924; *Chantiers de la Gironde*; 1,319 tons; 347x33x13-7; 33,000 s.h.p.; 33 knots; turbine engines; four 5-1 in. guns, two 37 mm.A.A., 6 T.T.

The French destroyers *Tornado*, *Tramontane* and *Typhon*, all of 1,319 tons, and the *Epervier*, 2,441 tons, were lying at Oran when the Allies made their landing on November 8th-9th, 1942. The destroyers, assisted by the shore batteries, sank the British cutters *Hartland* and *Walney*, which had forced the entrance to the harbour, with heavy loss of life. The *Typhon*, moored to the mole, fired at the *Hartland* at little over 100 yards range and created dreadful havoc on that ship. Later, in company with the *Epervier*, she made a sortie against the British cruisers covering the landing and came under a hot fire from the *Jamaica*, 8,000 tons, 12 6in. guns, and *Aurora*, 5,270 tons, six 6 in. guns. The *Typhon* returned to port in a sinking condition and was scuttled across the mouth of the harbour.

For full story of the landing at Oran see under the cutter *Hartland*.

TYR

D/S AJSBjdrn; 1927; *A/B Gotaverken*; 4,265 tons; 357 x 51-3x25-4; 355 n.h.p.; oil engines.

The Norwegian motorship *Tyr* was torpedoed and sunk by a German submarine on March 9th, 1942, about 100 miles from Halifax on a voyage from Hull to Halifax. The captain and 12 of the crew were lost.

TYRONE

New Zealand Shipping Co.; 1901; *Workman, Clark & Co.*; 6,664 tons; 450-5x55-2x30-6; 662 n.h.p.; triple-expansion engines.

The British steamship *Tyrone* was wrecked in fog one mile S. of Otago Head on September 27th, 1913. She was on a voyage from Avonmouth, the Clyde and Manchester to New Zealand carrying a general cargo.

TYSLA

W. Wilhelmsen & Fearnley & Eger; 1911; *W. Doxford & Sons*; 4,676 tons; 390x53-5x26-1; 436 n.h.p.; triple-expansion engines.

The Norwegian steamship *Tysla* struck a mine and sank in the North Sea on August 7th, 1914.

TZAR FERDINAND

Societe Commerciale Bulgare de Nav. a Vap.; 1913; *Fratelli Orlando & Co.*; 1,994 tons; 262-1x37-9x20-3; 293 n.h.p.; triple-expansion engines.

The Bulgarian steamship *Tzar Ferdinand*, bound from Piraeus to the Black Sea, was torpedoed and sunk by a French submarine on October 2nd, 1944, off Skiathos, Greece.

UCHIDE MARU

TaiheiKisen K.K.; 1919; *J. Brown & Co.*; 5,275 tons; 400-8 x 52-3 x 28-5; 517 n.h.p.; triple-expansion engines. The steamship *Uchide (Utide) Mam* was torpedoed and sunk by the U.S. submarine *Sargo* on February 29th, 1944, W. of the Caroline Islands.

UCKERMARK

German Navy; *abt. 12,000 tons.*

The tanker *Uckermark* was sent out to Japan in 1942 to act as supply ship to German armed commerce raiders operating in the Indian Ocean. She arrived at Yokohama on November 25th and was berthed near the former British steamship *Nankin*, which had been captured by the Germans and renamed *Leuthen*. On the 30th the *Uckermark* blew up and sank; the explosion completely wrecking the *Leuthen* (which see).

UDO MARU

Nippon Seitetsu K.K.; 3,936 tons.

The steamship *Udo Maru* was torpedoed and sunk by the U.S. submarine *Harder* on November 19th, 1943, about 200 miles N. of the Ladrone Islands.

UFA

U.S.S.R.; 1917; *Superior S.B. Co.*; 1,892 tons; 251 - 1 x 43-6 x 18-3; triple-expansion engines.

The Russian steamship *Ufa* left the Kola Inlet on January 23rd, 1943, for Iceland and the U.S.A. Nothing more was heard of the ship until a German broadcast claimed that a Russian ship of about 2,300 tons had been sunk on January 29th 500 miles N.W. of the North Cape. This was probably the *Ufa*.

UGA MARU

Matsuoka Risen K.K.; 1909; *Greenock & Grangemouth Dockyard Co.*; 4,433 tons; 375-5 x 52-2 x 25-5; 320 n.h.p.; triple-expansion engines.

The steamship *Uga Maru* was torpedoed and sunk by the U.S. submarine *Guitarro* on August 21st, 1944, in the Mindoro Straits, Philippines.

UGO BASSI

Tirrenia Soc. Anon, di Nav.; 1902; *W. Dobson & Co.*; 2,900 tons; 337-6 x 45 x 14-4; 294 n.h.p.; triple-expansion engines. The Italian steamship *Ugo Bassi* was torpedoed and sunk by a British submarine on June 28th, 1941, five miles off Cape Monte Santo, Sardinia.

UGO MARU

Kita Nippon Risen K.K.; 1920; *Uraga Dock Co.*; -3,684 tons; 330 x 46 X 27-7; 390 n.h.p.; triple-expansion engines. The steamship *Ugo Maru* was torpedoed and sunk by the U.S. submarine *Hammerhead* on October 20th, 1944, about 100 miles W. of Brunei, North Borneo.

UGOLINO VIVALDI

Italian Navy, destroyer; 1929; *Odero*; 1,628 tons; 352 X 33-5 x 16-7; 50,000 s.h.p.; 38 knots; turbine engines; *Odero boilers*; six 4-7 in. guns, four 37 mm.A.A., eight 13 mm.A.A., 4 T.T. The Italian destroyer *Ugolino Vivaldi* was proceeding through the strait of Bonifacio on her way to surrender to the Allies on September 9th, 1943, the day after her country had capitulated, when she was bombed and disabled by German aircraft. The damage was so extensive that she had to be abandoned and sunk by her crew.

UJINA MARU

2,275 tons.

The steamship *Ujina Maru* struck a mine and sank on July 6th, 1945, off the west coast of Honshu Island, Japan.

ULABRAND

Hjalmar Roed & Co.; 1899; *Burmeister & Wain*; 2,011 tons; 286'5 x 40-2 x 19-2; 203 n.h.p.; triple-expansion engines. The Norwegian steamship *Ulabrand* was torpedoed and sunk by a German submarine in the Irish Channel on February 22nd, 1918.

ULEA

Scottish Navigation Co.; 1936; *Burntisland S.B. Co.*; 1,574 tons; 265 x 40'5 x 16-3; 111 n.h.p.; triple-expansion engines. The British steamship *Ulea*, on a voyage from Huelva to Oban with copper pyrites, was torpedoed and sunk by a German submarine on October 28th, 1941, about 200 miles N.E. of the Azores. Thirteen of her crew of 21, four gunners and three passengers were lost.

ULF

Det Forenede D/S; 1905; *Sunderland S.B. Co.*; 1,344 tons; 240 x 36-5 x 16-7; 145 n.h.p.; triple-expansion engines. The Danish steamship *Ulf*, on a voyage from Bordeaux to Copenhagen, was sunk by collision on March 2nd, 1930, near Norderney Lightship.

ULF JARL

Det Nordenfjeldske D/S; 1907; *Grangemouth & Greenock Dockyard Co.*; 1,266 tons; 230-8 x 33-1 x 13-3; 200 n.h.p.; triple-expansion engines.

The Norwegian steamship *Ulf Jar I*, on a voyage from Mantyluoto to Glasgow with plywood, struck a mine and sank on September 21st, 1924, ten miles W. of Kallbadgrund Lightship.

ULFSBORG

C.K.Hansen; 1894; *Irvine & Co.*; 2,040 tons; 275 X 38-5 X 19; 192 n.h.p.; triple-expansion engines.

The Danish steamship *Ulfsborg* struck a mine and sank in the North Sea on October 24th, 1917.

ULLA

Rederi-AjB.Tertia; 1899; *Howaldtswerke*; 1,254 tons; 243-4 X 35-3 x 14-8; 98 n.h.p.; triple-expansion engines. The Swedish steamship *Vila*, on a voyage from Elsinore to Methil, struck a mine and sank about 150 miles W. of Hanstbolm on November 9th, 1920.

ULLAPOOL

Pool Shipping Co.; 1927; *W. Gray & Co.*; 4,891 tons; 405-lx 53-5 x 26-5; 505 n.h.p.; 11 knots; triple-expansion engines. The steamship *Ullapool*, Capt. Thwaites, was lying off Princes Stage in the Mersey on March 13th, 1941, when she was struck by a parachute mine dropped from a German aircraft. The vessel broke in two and sank with the loss of 16 lives, including Capt. Thwaites.

ULLESWATER

British Navy, destroyer; 1917; *Yarrow*; 923 tons; 271-5 x 25-7 x 10-5; 23,000 s.h.p.; 36 knots; turbine engines; *Yarrow boilers*; three 4 in. guns, one 2 pdr., 1 m.g., 4 T.T. The destroyer *Ulleswater* was torpedoed and sunk by a German submarine off the coast of Holland on August 15th, 1918. Her official complement was 80.

ULM

German Navy; 1938; *International S.B. & E. Co.*; 3,071 tons; 321-4 x 45-7 x 26-6; 1,170 n.h.p.; oil engines. The German mptorship *Ulm* was taken over by the German Navy for use as a minelayer. On August 25th, 1942, she was sunk by British warships 210 miles N. of the North Cape.

ULPIO TRAIANO

Italian Navy, light cruiser; 1939; *Cantieri Navali Riuniti*; 3,362 tons; 444-2 x 44-7 x 13; 120,000 s.h.p.; 41 knots; turbine engines; 3-drum boilers; eight 5-3 in. guns, six 65 mm., 14 m.g., 8 T.T.

On the night of January 2nd, 1943, the *Ulpio Traiano* was completing for sea at Palermo, Sicily, when she was attacked by a form of submarine recently introduced into the British Navy and known as the "human torpedo". Most of the first-class naval powers had been experimenting with midget submarines of various kinds for several years. The idea was not new, for it was a reversion to the tiny submarines used by the Confederates in the American Civil War with, of course, the tremendous advantage which the internal combustion engine and the electric motor conferred over the earlier types. The attack on Palermo was carried out by several of these craft which had a crew of two men apiece clad in diving suits

ULRIKEN

equipped with oxygen breathing apparatus and sitting astride the tiny vessel. The speed was very low and to be successful darkness and secrecy were prime essentials. Arrived at the target the explosive charge was detached from the nose of the craft and fixed to the bottom of the ship, time fuses were set and the "human torpedo" went about and made for the parent-ship* In the case of the *Ulpio Traiano* all these operations were carried out and the ensuing explosion sank the vessel. At the same time the Lloyd Triestino liner *Viminale*, 8,700 tons, acting as an auxiliary transport, was badly damaged by a second of the "human torpedoes".

For this exploit Lt. R. T. G. Greenland, R.N.V.R., and Sub-Lt. R. G. Dove, R.N.V.R., were each awarded the D.S.O. and two ratings received the Conspicuous Gallantry Medal, and two others were mentioned in despatches. The crews of the "human torpedoes" were forced to land in Sicily where they became prisoners of war.

ULRIKEN

Andr. Olsen; 1891; *R. Thompson & Sons*; 2,379 tons; 290 X 38-6x19-7; 209 n.h.p.; triple-expansion engines. The Norwegian steamship *Ulriken* struck a mine and sank in the North Sea on November 17th, 1915.

ULSTERMORE

Wm. Johnston & Co.; 1894; *Harland & Wolff*; 6,411 tons; 451 X 48-3x27-3; 627 n.h.p.; triple-expansion engines. The British steamship *Ulstermore* was wrecked on Taylor's Bank Revetment, Crosby Channel, on January 22nd, 1913. She was on a voyage from Baltimore to Liverpool carrying a general cargo.

ULYSSES

Ocean S.S. Co.; 1871; *A. Leslie & Co.*; 1,992 tons; 312X 33-6x25-5; 225 h.p.; compound engines. The British steamship *Ulysses* was wrecked on Jubal Island, Gulf of Suez, on August 17th, 1887. She was carrying a general cargo from London to Penang.

ULYSSES

Ocean S.S. Co.; 1888; *Scott & Co.*; 2,353 tons; 320-8x36-3x25-8; 450 h.p.; triple-expansion engines. The British steamship *Ulysses* was wrecked near Tanabe, Japan, on April 23rd, 1890, while on a voyage from Liverpool to Kobe carrying a general cargo.

ULYSSES

British Navy destroyer; 1917; *W. Doxford & Sons*; 1,090 tons; 276x26x11; 27,000 s.h.p.; 36 knots; turbine engines; Yarrow boilers; three 4 in. guns, 4 T.T. The *Ulysses*, one of the new and fast destroyers of the First World War, was sunk by collision with a merchantman in the Clyde on October 29th, 1918. Her official complement was 82.

ULYSSES

China Mutual Steam Nav. Co.; 1913; *Workman Clark & Co.*; 14,647 tons; 563-2x68-4x40-2; 782 n.h.p.; 13-5 knots; triple-expansion engines. The liner *Ulysses*, Capt. J. A. Russell, on a voyage from Sydney, N.S.W., to Halifax and Liverpool, was torpedoed and sunk by a German submarine on April 11th, 1942, off Cape Lookout, North Carolina. There were no casualties among the passengers and crew.

UMARIA

British India Steam Nav. Co.; 1914; *A. Stephen & Sons*; 5,317 tons; 410x52-2x28; 468 n.h.p.; triple-expansion engines. The British ship *Umaria* was torpedoed and sunk by a submarine 20 miles S.W. by S. from Policastro, Italy, on May 26th, 1917. The chief engineer, second officer and one cadet were taken prisoner. Five members of the crew were killed.

UMBA

The Shipping Controller (Ellermarfs Wilson Line); 1903; *A. G. Neptun*; 2,042 tons; 291-2x41-2x18-8; 180 n.h.p.; 9 knots; triple-expansion engines. The steamship *Umba* was formerly the German *Utgard*, taken as a prize of war. On April 30th, 1918, when one mile S. of the Royal Sovereign Light vessel she was torpedoed and sunk by a German submarine. Twenty men, including the captain, were killed.

UMBALLA

British India Steam Navigation Co.; 1898; *W. Denny & Bros.*; 5,310 tons; 410 x 50-7x29; 390 n.h.p.; 10-5 knots; triple-expansion engines. The British India liner *Umballa* was torpedoed eight miles S.W. by W. of Cape Scalea, Gulf of Policastro by an enemy submarine on December 25th, 1917. Fifteen men were killed, the captain was among the survivors.

UMBERTO I

G. Orlando; 1878; *A. McMillan & Sons*; 2,766 tons; 359-7X 37-9x23; 692 n.h.p.; triple-expansion engines. The Italian steamship *Umberto I* was torpedoed by a submarine in the Mediterranean on August 14th, 1917.

UME

Japanese Navy, destroyer; 1943; *Japan*; 2,100 tons; 415x 35 X—; 34 knots; turbine engines; six 5 in. guns, eight 25 mm. A A 15 T.T. The Japanese destroyer *Ume* was bombed and sunk by U.S. army aircraft, S.W. of Takao, Formosa, July 31st, 1945. The vessel carried a complement of over 200.

UME MARU

TochigiShojiK.K.; 1919; *Kawasaki Dockyard Co.*; 5,859 tons; 385 X 51 X 36; 437 n.h.p.; triple-expansion engines. The steamship *Ume Mam* was torpedoed and sunk by the U.S. submarine *Seahorse* on November 2nd, 1943, about 300 miles E. of the Ryukyu Islands.

UMGENI

Bullard, King & Co.; 1898; *Sir J. Laing & Sons*; 2,662 tons; 330'2x41'2x14-9; 1,900 i.h.p.; 12 knots; triple-expansion engines.

At the outbreak of the First World War the *Umgeni* was taken over by the Admiralty for service as a supply ship. On November 7th, 1917, she left the Clyde in convoy for Lagos. Two days later the convoy ran into foul weather and became dispersed. The *Umgeni* was never seen again, but bodies and wreckage from her were washed up along the west coast of Ireland.

UMHLALI

Bullard, King & Co.; 1904; *Sir J. Laing & Sons*; 3,388 tons; 348 x 43'3x17-2; 444 n.h.p.; triple-expansion engines. The British steamship *Umhlali* was wrecked in fog near Cape Point on September 16th, 1909, while on a voyage from London to Natal carrying a general cargo.

UMIKAZE

Japanese Navy, destroyer; 1936; *Maizuru*; 1,368 tons; 335 -5 X 31 - 8 X 9 • 3; 38,000 s.h.p.; 34 knots; turbine engines; Kanpon boilers; five 5 in. guns, 2 m.g.

The Japanese destroyer *Umikaze* was torpedoed and sunk S.E. of Truk in the Carolines Group, by the U.S. submarine *Guardfish* on February 1st, 1944. The destroyer's normal complement was 180.

UMONA

Bullard, King & Co.; 1890; *J. Laing*; 2,031 tons; 281-5X 38-9x 16-3; 215 n.h.p.; triple-expansion engines. The British steamship *Umona* was wrecked at Suadiva Atoll, Maldive Islands, on May 15th, 1903. She was on a voyage from Calcutta to Natal with a cargo of jute and rice.

UMONA

Bullard, King & Co.; 1910; *Sir J. Laing & Sons*; 3,767 tons; 356x44-3x26; 497 n.h.p.; 12 knots; triple-expansion engines. The liner *Umona*, Capt. F. A. Peckham, on a voyage from Durban to London, was about 90 miles S.W. of Freetown, West Africa, on March 30th, 1941, when she was torpedoed and sunk by a German submarine. Capt. Peckham and 82 of the crew, two gunners and 15 passengers were lost, three survivors were picked up.

UMTATA

Bullard, King & Co.; 1883; *W. Doxford & Sons*; 1,789 tons; 260 X 36x23-2; 180 h.p.; compound engines. The British steamship *Umtata* was wrecked near Madras on December 23rd, 1891, while on a voyage from Calcutta to Natal.

UMVOLOSI

Bullard, King & Co.; 1889; *J. Laing*; 1,775 tons; 260 X 36-6 X 16-2; 250 h.p.; triple-expansion engines.

The British cargo ship *Umvolosi* was wrecked near Grahamstown on April 12th, 1890, while on a voyage from London to Port Natal carrying a general cargo.

UMVUMA

Bullard, King & Co.; 1914; *Sir J. Laing & Sons*; 4,419 tons; 365 X 49 - 2 x 28 • 1; 504 n.h.p.; 13 knots; triple-expansion engines.

The liner *Umvuma*, Capt. J. N. Gibson, on a voyage from London to Mauritius, was torpedoed and sunk by a German submarine on August 8th, 1943, ten miles S. of Mauritius. Seventeen of the crew, one gunner and four passengers were lost.

UNA

Italian Government; 1904; *Sir R. Dixon & Co.*; 1,397 tons; 238x35-7x12-2; 165 n.h.p.; triple-expansion engines. The steamship *Una* was a former Yugoslav ship seized by the Italians. On October 11th, 1942, she was torpedoed and sunk by a British submarine five miles S. of Capri.

UNDERHILL

United States Navy, destroyer; 1944; U.S.A.; 1,400 tons; 306x36-9x~; 12,000 s.h.p.; 28 knots; turbine engines; three 3 in. guns, two 40 mm.A.A., six 40 mm.A.A., 3 T.T. The United States destroyer *Underhill* was torpedoed by a Japanese submarine E. of Cape Engano on July 24th, 1945. The vessel carried a complement of 220.

UNDERWOOD

Ministry of War Transport (Union S.S. Co. of New Zealand); 1941; *Henry Robb*; 1,990 tons; 263x45-2x19-1; 250 n.h.p.; 9 - 5 knots; oil engines.

The motorship *Underwood*, Capt. McNeil, on a voyage from Liverpool to Portsmouth, was torpedoed and sunk by a German motor torpedo boat on January 6th, 1944, off the Scilly Isles, Capt. McNeil, 14 of the crew and three gunners were lost.

UNDINE

German Navy, light cruiser; 1902; *Howaldt*; 2,715 tons; 328 X 40x17-2; 8,500 i.h.p.; 21-5 knots; triple-expansion engines; Schulz-Thorny craft boilers; ten 4-1 in. guns, ten 1 pdr., 4 m.g. 2 T.T.

The German light cruiser, *Undine*, was torpedoed and sunk by the submarine *E-19*, Lt. Cdr. F. N. Cromie, which was one of the British submarines despatched to the Baltic in October, 1915. At 1.45 a.m. on November 7th, in foggy weather, the *Undine*, in company with two destroyers on convoy duty, was struck on the starboard side by a torpedo from the *E-19* fired at a range of a little over 1,000 yards. This was followed some time later by a second torpedo from port which exploded the fore magazine and blew up the ship.

The *Undine* carried a complement of 264, most of whom were killed by the explosion, a few survivors being picked up by the two destroyers.

UNEBI

Japanese Navy, protected cruiser; 1886; *Havre*; 3,650 tons; 321 x43x18-5; 7,000 i.h.p.; 18•5 knots; triple-expansion engines; four 9-25 in. guns, four 6 in., 12 m.g., 4 T.T. The Japanese protected cruiser *Unebi* was one of the finest vessels of her class when she left the builder's yard at Havre in 1886. On her steam trials she attained a speed of 18-5 knots; her engines working up to 7,000 indicated horse power, which was greater than originally designed.

As a type the protected cruiser was being widely developed by all the naval powers in the 1880's. The ships were not intended to carry a heavy armament; speed being more important than gun power. The Japanese, however, aimed at both; and the *Unebi* carried a heavy main and secondary armament, together with powerful engines.

The cruiser left France in the autumn of 1886 with a navigating crew, as she would not be fully commissioned until after arrival in

Japan. She reached Singapore without incident, and left that port for Yokohama on December 3rd, 1886.

From that date the *Unebi* was never heard of again. What happened to her will never be known. Two other protected cruisers of the Japanese navy which were of similar tonnage, but not so heavily armed, did service for 30 years without mishap. It can be assumed, therefore, that the four heavy 9-25 in. guns carried on a ship of only moderate tonnage contributed to the disaster. The Japanese Admiralty did not attempt to place such large guns on protected cruisers in any subsequent designs.

UNGVAR

Hungarian Navy; 1941; *Budapester Werf Ganz Danubius*; 1,031 tons; oilengines.

The Hungarian motorship *Ungvar* was taken over for use as an auxiliary cruiser during the Second World War. On November 1941, she struck a mine and sank in the Black Sea. Twelve of the crew were killed.

UNION RELIANCE

China Union Lines; 1940; *Sun S.B. & D.D. Co.*; 7,638 tons; 492x69-8x29-1; oilengines.

The Chinese motorship *Union Reliance*, on a voyage from Los Angeles to New Orleans with general cargo including vegetable oil in barrels, collided with the Norwegian tanker *Berean*, 9,003 tons, on the night of November 7th, 1961, in the Houston Ship Channel. Explosive chemicals in the fore part of the tanker burst into flames and, as the ships were locked bow to bow, the fire spread to the oil barrels on the deck of the *Union Reliance*. The fire on the tanker was extinguished and she made port under her own power but the *Union Reliance* continued to burn and had to be abandoned. Ten of the crew and the pilot were killed. Not until the 10th could the burning ship be towed out of the fairway and she continued to burn until the 20th, by which time she was completely gutted.

UNIONE

Flli. Sanguinetifu G.; 1895; *Irvine & Co.*; 2,367 tons; 296x39-1x19-2; 217 n.h.p.; triple-expansion engines. The Italian steamship *Unione* was torpedoed and sunk by a German submarine in the English Channel on April 10th, 1916.

UNITY

Lancashire & Yorkshire Railway Co.; 1902; *Murdoch & Murray*; 1,091 tons; 246-8x36-3x13-5; 302 n.h.p.; 12 knots; triple-expansion engines.

The steamship *Unity* was torpedoed and sunk by a German submarine three miles W.S.W. of the Varne Light vessel on May 2nd, 1918. Twelve men were killed, the captain was among the survivors.

UNIWALECO

Union Whaling Co.; 1905; *Harland & Wolff*; 9,755 tons; 470-3x58-4x31-3; 658 n.h.p.; quadruple-expansion engines. The South African whale oil refinery tanker *Uniwaleco*, on a voyage from Curacao to Freetown with fuel oil, was torpedoed and sunk by a German submarine on March 7th, 1942, about 20 miles E. of St. Vincent, W.I. Thirteen of the crew of 51 were lost.

UNKAI MARU No. 1

Nakamura Risen K.K.; 1932; *Mitsui Bussan Kaisha*; 2,225 tons; 275x40-7x23; 168 n.h.p.; triple-expansion engines. The steamship *Unkai Maru No. 1* was torpedoed and sunk by the U.S. submarine *Pollack* on January 7th, 1942, S. of Shimizu.

UNKAI MARU No. 5

Sato Kuni Risen K.K.; 1900; *Russell & Co.*; 3,282 tons; 330-5 x 48-1x15-9; 290 n.h.p.; triple-expansion engines. The steamship *Unkai Maru No. 5* was torpedoed and sunk by the U.S. submarine *Plunger* on June 30th, 1942, off Ningpo.

UNKAI MARU No. 5

Nakamura Kisen K.K.; 2,841 tons. The tanker *Unkai Maru No. 5* was torpedoed and sunk by the U.S. submarine *Rat* on November 14th, 1944, about 150 miles W. of Negra Point, Luzon Island, Philippines.

UNKAI MARU No. 6

Nakamura Kisen K.K.; 1905; *W. Gray & Co.*; 3,220 tons; 331 x 49 - 2 x 21 - 8; 288 n.h.p.; triple-expansion engines. The steamship *Unkai Maru No. 6* was sunk by U.S. carrier-based aircraft on February 17th, 1944, in the Caroline Islands.

UNKAI MARU No. 7

S. Nakamura; 1916; *Uraga Dock Co.*; 2,143 tons; 268x40-7x23-6; 169 n.h.p.; triple-expansion engines. The Japanese steamship *Unkai Maru No. 7* struck a mine and sank in the Persian Gulf on June 16th, 1917.

UNKAI MARU No. 7

Nakamura Kisen K.K.; 1919; *Osaka Yogyo K.K.*; 2J82 tons; 268-7x40x23-2; 205 n.h.p.; triple-expansion engines. The steamship *Unkai Maru No. 7* was bombed and sunk by U.S. carrier-based aircraft on August 4th, 1944, N. of the Bonin Islands.

UNKAI MARU No. 8

Nakamura Kisen K.K.; 1924; *Aizawa Zosen Tekko K.K.*; 1,293 tons; 218x32x19; triple-expansion engines. The steamship *Unkai Maru No. 8* was torpedoed and sunk by the U.S. submarine *Spadefish* on June 10th, 1945, off Yoichi, Japan.

UNKAI MARU No. 12

Nakamura Kisen K.K.; 2J45 tons. The steamship *Unkai Maru No. 12* was torpedoed and sunk by the U.S. submarine *Blackfin* on November 1st, 1944, off the north-west coast of Mindoro Island, Philippines.

UNKAI MARU No. 15

Nakamura Kisen K.K.; 1,208 tons. The steamship *Unkai Maru No. 15* was torpedoed and sunk by the U.S. submarine *Sennet* on July 28th, 1945, off Funakawa, Japan.

UNNAN MARU

Osaka Shosen K.K.; 1917; *Ishikawajima S.B. Co.*; 2,201 tons; 268 x 40 - 7 x 23 • 5; 169 n.h.p.; triple-expansion engines. The steamship *Unnan Maru* left Dairen on January 31st, 1936, for Yokohama with a cargo of soya beans and beancake. On February 5th she sent distress calls giving a position off Oshima Island and reporting that she was in danger of sinking with holds flooded in heavy weather. Nothing more was heard of the ship until one of her boats, empty, was sighted on the 20th and later the body of one of the crew was washed ashore.

UNRYU

Japanese Navy, aircraft carrier; 1943; *Japan*; 22,500 tons; 745 x88x —; 28 knots; turbine engines; sixteen 5 in.A.A. guns, many 47 mm., 60 aircraft. The Japanese aircraft carrier *Unryu* was torpedoed and sunk by the U.S. submarine *Redfish* on December 19th, 1944, about 100 miles E. of Ningpo. The normal complement of the *Unryu* was 1,600.

UNRYU MARU

Japanese Government; 1935; *Taikoo Dock & Engineering Co.*; 2,515 tons; 249x50x9-4; 349 n.h.p.; oilengines. The motorship *Unryu Maru* was formerly the British *Wulin*, bombed and sunk off Muar Island in January, 1942, raised and repaired by the Japanese. She was torpedoed and sunk by a British submarine on December 31st, 1944, 80 miles E. of Port Blair, Andaman Islands.

UNTEN MARU

Osaka Shosen K.K.; 1,025 tons. The steamship *Unten Maru* struck a mine and sank on July 27th, 1945, off Yawata, Japan.

UNYO

Japanese Navy, escort carrier; 1939; *Japan*; 16,500 tons; 590x73x28-5; 21,000 i.h.p.; 22 knots; turbine engines; twelve 5 in. A.A. guns, many 47 mm., 30 aircraft. The Japanese escort carrier *Unyo* was completing as the Nippon Yusen liner *Yawata Maru* when Japan entered the Second World War on December 7th, 1941. She was taken over by the Japanese

Admiralty and converted into an escort carrier. She was torpedoed and sunk in the South China Sea by the U.S. submarine *Barb* on September 16th, 1944. See also the escort carrier *Chuyo*.

UNYO MARU

Toa Kaiun K.K.; 1,037 tons. The steamship *Unyo Maru* was bombed and sunk by U.S. land-based aircraft on December 28th, 1943, near Anking, Yangtze River.

UNYO MARU No. 1

Nakamura Kisen K.K.; 2,039 tons. The steamship *Unyo Maru No. 1* was sunk by U.S. carrier-based aircraft on July 14th, 1945, off Hakodate. V

UNYO MARU No. 2

Nakamura Kisen K.K.; 1937; *Mitsui Bussan Kaisha*; 2,827 tons; 309-9x44-9x23-6; 240 n.h.p.; triple-expansion engines. The steamship *Unyo Maru No. 2* was taken over by the Japanese Navy and converted into a salvage vessel. On December 26th, 1941, she was bombed and sunk by Dutch aircraft off Kuching, Sarawak.

UNYO MARU No. 3

Sankyu Unyu K.K.; 1918; *Yokohama Dock Co.*; 2,997 tons; 310 x43x26; 241 n.h.p.; triple-expansion engines. The steamship *Unyo Maru No. 3* was torpedoed and sunk by the U.S. submarine *Plunger* on July 2nd, 1942, off Hangchow.

UNYO MARU No. 8

Nakamura Kisen K.K.; 1,942 tons. The steamship *Unyo Maru No. 8* was sunk by U.S. carrier-based aircraft on July 4th, 1944, off the Bonin Islands.

UPCERNE

Mint erne Steamship Co.; 1906; *Ropner & Son*; 2,984 tons; 331 x47x22-2; 284 n.h.p.; 9 knots; triple-expansion engines. The steamship *Upcerne* was torpedoed and sunk by a German submarine four miles S.E. by S. of Coquet Island, off Northumberland, on April 28th, 1918. Sixteen men were killed, the captain was among the survivors.

UPMINSTER

Hudson S.S. Co.; 1917; *Osbourne, Graham & Co.*; 2J76 tons; 280 X 40 - 5 X18 - 5; 215 n.h.p.; triple-expansion engines. The British cargo ship *Upminster* sank after a collision with the steamship *Lanrick*, 1,283 tons, off Flamborough Head on May 2nd, 1928, while on a voyage in ballast from London to Methil.

UPPINGHAM

Galbraith, Pembroke & Co.; 1881; *R. Dixon & Co.*; 2,203 tons; 290 -4x38-2x25-8; 250 h.p.; compound engines. The British cargo ship *Uppingham* was wrecked near Hartland Quay on November 23rd, 1890, while on a voyage from Cardiff to Port Said carrying a cargo of coal. Six of the crew were lost.

UPPLAND

Angf.-A/B. Tirfing; 1919; *Eriksbergs Mek. Verkstad*; 2,287 tons; 283- 1x41-3x23-2; 274 n.h.p.; triple-expansion engines. The Swedish steamship *Uppland*, on a voyage from Constantza to Gothenburg, was sunk by collision on September 25th, 1926, ten miles S.E. of Europa Point.

UPWEY GRANGE

Houlder Line; 1925; *Fairfield S.B. & E. Co.*; 9J30 tons; 431x62-5x35-3; 1,648 n.h.p.; 15 knots; oilengines. The motorship *Upwey Grange*, Capt. W. E. Williams, on a voyage from Buenos Aires to London, was approximately 200 miles W. of Achill Head, Co. Mayo, on August 8th, 1940, when she was attacked by a German submarine. At about 9.50 a.m. she was struck by two torpedoes in quick succession, both on the port side, the first exploding in the engine room and the second in way of No. 6 hatch. The vessel settled by the stern with a list to port and orders were given to abandon ship. The boats were got away with some difficulty, the submarine surfacing and a member of her crew taking photographs. The weather was bad with a rough sea, the

boats became separated and the captain's boat was never seen again. The boat under charge of Mr. Ellis, the first officer, after sailing about 150 miles in three days, was picked up by the trawler *Naniwa*, Skpr. J. Nightingale, about 50 miles from Achill Head. Capt. Williams, 33 of the crew and three passengers were lost.

URAGANO

Italian Navy, torpedo boat; 1941; Italy; 860 tons; 274-5 x 31 x 8; 16,000 s.h.p.; 28 knots; turbine engines; 3-drum boilers; three 3-9 in. guns, six 20 mm. A. A., 2 T.T.

The Italian torpedo boat *Uragano* struck a mine and sank off Cap Bon on February 3rd, 1943. The vessel carried a complement of about 140.

URAJIO MARU

Kawasaki Risen K.K.; 1919; Sir Ray It on Dixon & Co.; 3,110 tons; 331 x 46 • 5 x 25 -5; 310 n.h.p.; triple-expansion engines.

The steamship *Urajio (Urazio) Mam* was bombed and sunk by U.S. land-based aircraft on December 30th, 1942, S.W. of the Aleutian Islands.

URAKAMI MARU

Fukuyo Risen K.K.; 4,317 tons.

The steamship *Urakami Maru* was taken over by the Japanese Navy for use as a submarine tender. On March 30th, 1944, she was sunk by U.S. carrier-based aircraft off Babelthuap, Palau Islands.

URAKAZE

Japanese Navy, destroyer; 1940; Fujinagata S.B. Co.; 2,000 tons; 364 X 35 X 11; 45,000 s.h.p.; 34 knots; turbine engines; Kanpon boilers; six 5 in. guns, 2 m.g., 8 T.T. The Japanese destroyer *Urakaze* was at the northern end of the Formosa Strait on November 21st, 1944, when she was torpedoed and sunk by the U.S. submarine *Sealion II*. The destroyer carried a complement of over 200.

URAL

Russian Navy, auxiliary cruiser; 1890; Stettin; 13,600 tons; 560 X — X —; 17,300 i.h.p.; 20 knots; triple-expansion engines; 16 light q.f. and m. guns.

The Russian auxiliary cruiser *Ural* was originally the North German Lloyd liner, *Konigin Maria Theresa*. She had been purchased from the Germans with a view to her serving as a fast scout and was equipped with a very powerful wireless installation.

During the battle of Tsu-Shima, May 27th, 1905, the *Ural* was ordered to escort the transports, repair ships and tugs, which were making their way to Vladivostock. Unfortunately these and their escorts, about 20 vessels in all, were involved in the main action when the Russian battle division circled round them between 4 and 5 o'clock in the afternoon. For a time the utmost confusion prevailed and the *Ural*, coming under fire of the big Japanese ships, was hit below the waterline and badly damaged. She remained afloat until about 5.30 p.m., by which time she had been abandoned by her crew, when she was sunk by Admiral Togo's battle division.

The ship might well have played a much more important part in the battle, had she been permitted to make full use of her powerful wireless for the interception and jamming of Japanese messages. The importance of wireless was not, however, fully appreciated by the Russians, and on the night of the 25th a request from *Ural* for permission to interfere with the Japanese transmission was promptly refused.

Of the *Ural's* complement of 490 officers and men, ten officers and 326 men were taken to Diego Suarez, Madagascar, on board the *Anaduir* where they were interned.

See *Kniaz Suvaroff*, Russian flagship, which was among those lost.

URAL MARU

Osaka Shosen K.K.; 1929; Mitsubishi Zosen Kaisha; 6,374 tons; 405-2 x 55 x 33; 1,158 n.h.p.; turbine engines. The transport *Ural Maru* was torpedoed and sunk by the U.S. submarine *Flasher* on September 27th, 1944, about 150 miles W. of Masinlok, Philippines.

URANAMI

Japanese Navy, destroyer; 1928; Sasebo; 1,700 tons; 371-5 x 33-8 x 9-8; 40,000 s.h.p.; 34 knots; turbine engines; Kanpon boilers; six 5 in. guns, 4 A.A.m.g., 9 T.T.

The Japanese destroyer *Uranami* was one of nine such vessels sunk at the battle of Leyte Gulf, October 23rd-27th, 1944. The *Uranami* was bombed and sunk S.W. of Masbate on the 26th, by U.S. carrier-borne aircraft, when the Japanese fleet was retiring after disastrous losses. Her normal complement was 197.

For full story of the battle of Leyte Gulf see the battleship *Musashi*.

URANIA

L.Krogius; 1897; Sunderland S.B. Co.; 1,934 tons; 281-5x 37x25-7; 377 n.h.p.; triple-expansion engines. The Finnish steamship *Urania* struck a mine and sank in the Arctic on July 25th, 1915.

URANIA

S.Leovold; 1891; A. Stephen & Sons; 1,688 tons; 255x39-1x 22-3.

The Norwegian sailing ship *Urania* struck a mine and sank in the North Sea on March 28th, 1917.

URANUS

Dampfs. Ges. Neptun; 1939; Schiffbau Ges. Unterweser; 1,127 tons; 229-6x34-4x15-3; 157n.h.p.; oilengines. The German motorship *Uranus* was bombed and sunk by British aircraft on July 30th, 1942, ten miles N.E. of Tie de Batz.

URATO MARU

Japanese Government; 1918; Napier & Miller; 6,042 tons; 419-6x54-5x29; 381 n.h.p.; triple-expansion engines. The steamship *Urato Maru* was formerly the Greek *Erato* seized by the Japanese at Hong Kong. She was sunk by U.S. carrier-based aircraft on October 18th, 1944, off Manila.

URSA

B. Ingelsson; 1902; Grangemouth & Greenock Dockyard Co.; 1,740 tons; 270-3x37x18-5; 234 n.h.p.; triple-expansion engines.

The Swedish steamship *Ursa* was torpedoed and sunk by a German submarine in the English Channel on September 17th, 1918.

URSUS

Rederi A/B. Ursus; 1902; A. G. Neptun; 1,499 tons; 260-6X 37-2x17-1; 136 n.h.p.; triple-expansion engines. The Swedish steamship *Ursus* struck a mine and sank on December 15th, 1939, about seven miles off the Thames estuary on a voyage from Uddevalla to Rochester. Nine of the crew were killed.

URUGUAY

Compania Trasatlantica; 1913; W. Denny & Bros.; 10,348 tons; 481-9x61-3x32-7; 1,570 n.h.p.; triple-expansion engines & L.P. turbine.

The Spanish liner *Uruguay* was used as a prison-ship at Barcelona during the Spanish Civil War. She was bombed and sunk by the insurgents in January, 1939, shortly before their capture of Barcelona.

URUGUAY

Compania Argentina de Nav. Mihanovich; 1921; N. V. Scheepsbouwerf De Maas; 3,425 tons; 359-4x50-2x30; 388 n.h.p.; triple-expansion engines.

The Argentine steamship *Uruguay* was sunk by a German submarine on May 27th, 1940, about 160 miles off Cape Villano on a voyage from Rosario to Limerick. Fifteen of the crew were lost.

URUMEA

Compania Naviera Bidassoa; 1892; Osbourne, Graham & Co.; 2,500 tons; 290-4x38-1x20; 217 n.h.p.; triple-expansion engines.

The Spanish steamship *Urumea*, on a voyage from Huelva to Bordeaux with copper pyrites, was sunk by collision on August 12th, 1924, off Cabo Roca.

USA MARU

USA MARU

Nippon Seitetsu K.K.; 3,943 tons.

The steamship *Usa Mam* was torpedoed and sunk by the U.S. submarine *Tautog* on January 4th, 1944, E. of Katsuura, Japan.

USAMBARA

Deutsche Ost-Afrika Linie; 1922; *Blohm & Voss*; 8,690 tons; 433-5x58-2x37-4; turbine engines.

The liner *Usambara* was bombed and sunk by Allied aircraft on March 20th, 1945, at Stettin. The ship was being used as a military barracks at the time.

USHER

A. W. Bruton; 1901; *Russell & Co.*; 3,594 tons; 340x46x18; 304 n.h.p.; triple-expansion engines.

The British steamship *Usher* sank after a collision in lat. 47° 07' N., long. 10° 59' W., on October 27th, 1917. She was on a voyage from Algiers to Cardiff carrying a cargo of iron ore.

USKUDAR

Denizcilik Bankasi; 1927; *F. Schichau*; 148 tons; 100 x 21 -6x7-6; triple-expansion engines.

The Turkish ferry *Uskudar* left Izmit just before noon on March 1st, 1958, for Karamursel with some 400 passengers. Soon after she left port a sudden violent westerly gale overwhelmed her and she rolled over and sank in Izmit Bay at 12.20 p.m. Warships and other vessels rescued 40 persons but 300-400 lives were lost. The ferry was subsequently raised but was found to be only fit for scrap.

USSURI MARU

Osaka Shosen K.K.; 1932; *Mitsubishi Zosen Kaisha*; 6,386 tons; 406-6x55x33; 1,157 n.h.p.; turbine engines. The steamship *Ussuri Maru* was bombed and sunk by U.S. land-based aircraft on June 28th, 1944, about 50 miles W. of Tainan, Formosa.

USUGUMO

Japanese Navy, destroyer; 1927; *Ishikawajima*; 1,700 tons; 371-5x33-8x9-8; 40,000 s.h.p.; 34 knots; turbine engines; *Kanpon boilers*; six 5 in. guns, 4 A.A.m.g., 9 T.T. The Japanese destroyer *Usugumo* was torpedoed and sunk in the Sea of Okhotsk by the U.S. submarine *Skate* on July 7th, 1944. The destroyer's normal complement was 197.

USWORTH

Dagliesh S.S. Co.; 1926; *J. Blumer & Co.*; 3,535 tons; 356-3 X 48-7x23-9; 301 n.h.p.; 11 knots; triple-expansion engines. The steamship *Usworth*, Capt. J. J. Reed, left Sydney, Nova Scotia, for Queenstown on December 6th, 1934, with a full cargo of wheat. She encountered rough weather from the outset and on the night of the 10th, when some 1,000 miles from Newfoundland, a wave of exceptional magnitude broke over the ship and smashed her steering gear causing much havoc in addition. The captain sent out an S.O.S. which brought the Belgian steamship *Jean Jadot* to the spot by 9 a.m. on the 11th. At daybreak on the 12th a line was passed to the *Usworth* and a hawser made fast. The two ships then got under way, the *Usworth* being able to steam but not to steer. About three hours later the tow rope parted and the *Usworth*, which had effected temporary repairs to her steering gear, set course for Queenstown. She managed to achieve eight knots for some hours but the gale again attained hurricane force and at 6 p.m. on the 13th another gigantic wave broke over her causing her cargo of wheat to shift so that she developed a list of 25 degrees. Water from successive seas commenced to come below and 24 hours later her fires were put out.

During the night the Cunard liner *Ascania*, Capt. J. G. Bisset, arrived, and the *Jean Jadot* which had been forced to part company with the derelict owing to the gale, also returned. A boat from the *Jean Jadot* took off 14 of the crew, but capsized drowning two of the rescuers and 12 from the *Usworth*.

By this time the *Usworth* was in immediate danger of sinking and on the 14th a 30 foot lifeboat from the *Ascania* made the hazardous journey of a few hundred yards without mishap. Capt. Reed, the Chief Engineer who had carried on with his duties despite several

broken ribs, the third engineer and six others were taken off. These nine, together with the two on board the *Jean Jadot*, were the sole survivors of a crew of 26 and to the 15 lost must be added two of the *Jean Jadot's* crew making a total of 17.

UTAH

United States Navy, ex-battleship; 1909; *New York Shipbuilding Corp.*; 19,800 tons; 512x106x22-5; 21 knots; turbine engines. The old U.S. demilitarised battleship *Utah* was serving as a gunnery training ship at the naval base at Pearl Harbour when the Japanese aircraft made their surprise attack on the morning of December 7th, 1941. She was hit and sunk close by one of the quays, the Japanese pressing home their attacks on her under the impression that she was a modern battleship. A certain amount of her gear, machinery and armament was afterwards salvaged.

The full story of the attack on Pearl Harbour is told under the U.S. battleship *Arizona*.

UTILITAS

Soc. Anon. Industria Armamento; 1918; *G. Ansaldo & Co.*; 5,342 tons; 393-2x51-6x28-4; turbine engines. The Italian steamship *Utilitas* was torpedoed and sunk by an Allied submarine on February 5th, 1943, outside Palermo.

UTKLIPPAN

Carlbon & Co.; 1883; *Palmers' Co.*; 1,599 tons; 260x 36-2x17; 99 n.h.p.; compound engines.

The Swedish steamship *Utklippan*, on a voyage from Vesteras to Lubeck with iron ore, was sunk by collision with the German steamship *Oldenburg* on December 13th, 1942, off the Gedders Lightship, near Kiel.

UTOPIA

Anchor Line; 1874; *R. Duncan & Co.*; 2,731 tons; 350-2X 35-2x29-5; 250 h.p.; 12-5 knots; triple-expansion engines. The Anchor liner, *Utopia*, Capt. J. M'Keague, left Naples on March 12th, 1891, bound for New York with three saloon passengers, 815 Italian emigrants, of whom 661 were men, 85 women and 67 children, together with a crew of 59 and three stowaways, making 880 persons all told. At about 7 o'clock on the evening of March 17th, it being very dark with a full gale blowing and a strong current setting, the ship was in the Bay of Gibraltar close to the Mediterranean Fleet which was riding at anchor. By a grave error of judgment, the captain brought his vessel across the bows of the battleship *Anson*, making no allowance for the warship's underwater ram. This tore a hole 26 feet long by 15 feet wide in her side close to the stern. Bulkheads and engines were torn away and the vessel began to settle by the stern. The terrified emigrants rushed to the bows and began to jump, or were thrown, into the sea. The ships of the fleet sent their boats with all speed, but the night was pitch black and there was stark terror on board the liner. Many acts of heroism were performed by the naval men, two of whom were drowned when the pinnacle of the *Immortalite* was smashed. The liner sank in a very short time with the loss of 520 emigrants, one saloon passenger and 12 of the crew.

The *Anson* received only trifling damage, her ram showing no signs of injury.

The *Utopia* had sunk in about nine fathoms and her masts and funnel were showing above water. Divers were sent down and reported the ship to be in 43 feet of water forward and 56 feet aft. Her position constituted a hindrance and a possible danger to navigation and the question of raising her was considered at once. Mr. Thomas Napier Armit, a Scottish engineer, undertook the task and built a cofferdam, then an unusual form of salvage engineering, and managed to bring the ship to the surface within the short period of 17 weeks from the date of the disaster. On July 8th, 1891, the *Utopia* was once more afloat.

UTRECHT

Rotterdamsche Lloyd; 1880; *R. Dixon & Co.*; 2,174 tons; 300x36-2x25-5; 245 n.h.p.; compound engines. The Dutch steamship *Utrecht* was bound from Rotterdam to Java when she struck the rocks off Ushant on the night of March 4th, 1897. She sank with the loss of all on board.

UYO MARU

Toyo Risen K.K.; 6,376 tons.

The steamship *Uyo Maru* was torpedoed and sunk by the U.S. submarine *Sailfish* on December 21st, 1943, in the Bungo Channel, Japan.

UZAN MARU

Japanese Government; 1909; Northumberland S.B. Co.; 5,014 tons; 380x52-3x25; 427 n.h.p.; triple-expansion engines. The steamship *Uzan Maru* was formerly the British *Deslock*, seized

by the Japanese. She was torpedoed and sunk by the U.S. submarine *Trout* on May 2nd, 1942, off Tokushima, Japan.

UZUKI

Japanese Navy, destroyer; 1925; Isikawajima; 1,315 tons; 320x30-8x9-9; 38,500 s.h.p.; 34 knots; turbine engines; Kanpon boilers; four 4-7 in. guns, 2 A.A.m.g., 6 T.T. The Japanese destroyer *Uzuki* was torpedoed and sunk off Leyte Island, Philippines, by a U.S. motor torpedo boat on December 12th, 1944. The destroyer's normal complement was 150.

V 187

German Navy, destroyer; 1911; Vulkan Co.; 650 tons; 16,000 i.h.p.; 32-5 knots; turbine engines; Schulz-Thomycroft boilers; two 24pdr. guns, 2 m.g., 3 T.T.

The destroyer, V187, was the leader of the German 1st Flotilla at the battle of Heligoland Bight on August 28th, 1914. She carried the officer in charge of the flotilla, Cdr. Wallis, and was steaming for Heligoland, totally unaware that a strong British force was in her vicinity, although the news should have been wirelessly to her by her flagship, the *Koln*.

At 8.20 a.m. the British light cruisers *Fearless*, *Nottingham* and *Lowestoft* hove in sight from different points of the compass. The unfortunate destroyer found herself in a desperate position with no opportunity of reply to the concentrated fire which opened upon her. Orders were therefore given to sink her with explosive charges and for the crew to save themselves as best they could.

Of the 85 officers and men on board the V187 only Cdr. Wallis and 32 others survived, all of whom were picked up by the boats of the British ships and taken to England.

V AALAREN

Rederi-A/B. Transatlantic; 1936; Eriksbergs Mek. Verkstad; 3,406 tons; 367-9x51-7x20-3; 810 n.h.p.; oilengines. The Swedish motorship *Vaalaren* left New York on March 25th, 1943, in convoy for Belfast Lough. On April 4th the convoy was heavily attacked by submarines and when darkness fell the *Vaalaren* and two other ships broke from convoy. The other two ships rejoined the convoy on the following day but the *Vaalaren* was never seen again.

V AAREN

Carl Traae A/S; 1914; Bergens Mek. Vcerksted; 1,090 tons; 226-3 x 36-5 x 15-8; 116 n.h.p.; triple-expansion engines. The Norwegian steamship *Vaaren* struck a mine and sank in the North Sea on December 16th, 1914.

V AARLI

E. Lindoe; 1882; Strand Slipway Co.; 1,312 tons; 244x33-8x17-2; 146 n.h.p.; compound engines. The Norwegian steamship *Vaarli* struck a mine and sank in the North Sea on February 9th, 1915.

V ACUUM

Vacuum Oil Co.; 1912; Great Lakes Engineering Works; 2,551 tons; 247x43-7x29-3; 303 n.h.p.; triple-expansion engines. The American steamship *Vacuum* was torpedoed and sunk by a German submarine off the N.W. coast of Ireland on April 28th, 1917.

V AERING

Det Helsingorske Dmpsk. Selsk.; 1888; Murdoch & Murray; 2,157 tons; 279x37-7x19-1; 218 n.h.p.; triple-expansion engines.

The Danish steamship *Veering* was torpedoed and sunk by a German submarine off Ushant on June 18th, 1917.

V AFOS

Thor Thoresen, Jr. Akties.; 1906; Fredrikstads Mek. Vcerksted; 1,322 tons; 246-6x36-6x16-8; 132 n.h.p.; triple-expansion engines.

The Norwegian steamship *Vafos* was torpedoed and sunk by a German submarine in the North Sea on March 30th, 1918.

V AGA

Det Bergenske D/S; 1924; Laxevaags Maskin & Jernskibs.; 1,615 tons; 246-2x37-9x15-6; 133 n.h.p.; triple-expansion engines.

The Norwegian steamship *Vaga*, under German control, was torpedoed and sunk by British aircraft on January 13th, 1945, outside Homborsund, with the loss of five lives.

V ALA

O. Hillerstrom; 1901; Grangemouth & Greenock Dockyard Co.; 2,129 tons; 285-5 x 43-1 x 19-1; 222 n.h.p.; triple-expansion engines.

The Swedish steamship *Vala* struck a mine and sank in the Kattegat on December 13th, 1916.

730**VALDES**

R. Mac Andrew & Co.; 1914; Craig, Taylor & Co.; 2,233 tons; 265 x 40 X16-7; 232 n.h.p.; 10-5 knots; triple-expansion engines.

The steamship *Valdes* was torpedoed and sunk by a German submarine seven miles S. of Portland Bill on February 17th, 1917. Eleven men were killed, the captain was among the survivors.

VALDIERI

Lloyd Sabaudo Soc. Anon, per Azioni; 1906; Officine e Cantieri Liguri Anconitani; 4,637 tons; 355-2x44-1x25-8; 381 n.h.p.; triple-expansion engines.

The Italian steamship *Valdieri* was torpedoed and sunk by a German submarine W. of Gibraltar on June 8th, 1917.

VALDIVAGNA

Azienda Italiani Carboni; 1913; Cantiere San Rocco; 5,400 tons; 404-1x54x28-8; 499 n.h.p.; triple-expansion engines. The Italian steamship *Valdivagna* was torpedoed and sunk by a British submarine on January 9th, 1941, off Cape Carbonara, Sardinia.

VALDIVIA

Pacific Steam Navigation Co.; 1870; 1,861 tons; 287x38-3x22-8; 300 h.p.; compound inverted engines.

The British steamship *Valdivia* was wrecked near Huacho on July 6th, 1884, while on a voyage from Callao to Huacho carrying a general cargo.

VALDIVIA

7905; W. Harkess & Son; 1,794 tons; 280x36x19-8; 260 n.h.p.; triple-expansion engines.

The French steamship *Valdivia* was torpedoed and sunk by a German submarine W. of Gibraltar on May 2nd, 1918.

VALDIVIA

Braun y Blanchard; 1890; Reiherstieg Schiffswerft; 3,278 tons; 327-3x41-6x29-2; 302 n.h.p.; triple-expansion engines. The Chilean steamship *Valdivia*, on a voyage from Antofagasta to Taltal, struck a rock in fog and foundered on October 4th, 1933, about 20 miles N. of Taltal.

VALE OF PICKERING

Vale Shipping Co.; 1924; Furness S.B.Co.; 1,551 tons; 245-4 X38-6x15-5; 176 n.h.p.; triple-expansion engines.

The British cargo ship *Vale of Pickering* sank after a collision with the steamship *Rotha*, 1,699 tons, off Dieppe on July 24th, 1929. She was on a voyage from Rotterdam to Caen carrying a cargo of coal.

VALENTINE

British Navy, destroyer; 1917; Cammell Laird & Co.; 1,090 tons; 312x29-5x10-8; 27,000 s.h.p.; 34 knots; turbine engines;

Yarrow boilers; four 4 in. guns, one 2pdr., 5 m.g., 5 T.T. The destroyer *Valentine*, Cdr. H. J. Buchanan, R.A.N., was engaged in supporting the left flank of the Allied armies in Holland by anti-aircraft gunfire when she was attacked by German dive-bombers and severely damaged. The ship began to sink and was beached in the river Scheldt and abandoned on May 15th, 1940. Of her complement of about 150 nearly all were saved.

The full story of the invasion of the Low Countries and the Dunkirk evacuation is told under H.M. destroyer *Grafton*.

VALENTINO CODA

Corrado Soc. Anon, di Nav.; 1924; Lithgows; 4,486 tons; 397-5x52x26-6; 437 n.h.p.; triple-expansion engines. The Italian steamship *Valentino Coda* was torpedoed and sunk by a British submarine on June 14th, 1943, about 30 miles N. of Messina.

VALERIA

Reederei A. Kirsten; 1937; Lubecker Maschinenbau Ges.; 1,450 tons; 268-9x39-4x14-6; 200 n.h.p.; compound engines.

The German steamship *Valeria* was bombed and sunk by British aircraft on August 29th, 1944, S.W. of Heligoland.

VALERIAN

British Navy, sloop; 1916; C. Rennoldson & Sons; 1,250 tons; 257'7x33-5x11-7; 2,000 i.h.p.; 16-5 knots; triple-expansion engines; two 4 - 7 in. guns, two 3 pdr.

The sloop *Valerian*, Cdr. W. A. Usher, was on her way from Nassau, Bahamas, to Bermuda after having taken the Acting Governor of the Bahamas on a round of visits to the outlying islands of the group. The sloop had left Nassau, where there was a shortage of coal, with just sufficient to bring her to her destination at an economical speed. On Thursday, October 21st, 1926, she was some 200 miles from Bermuda steaming at 9 • 5 knots on one boiler. At midnight steam was raised in the second boiler and speed was increased to 11 • 5 knots. At 8 a.m. on Friday, the 22nd, the *Valerian* was five miles from Gibbs Hill, Bermuda, with no indication of stormy weather. Shortly after this a hurricane of an estimated force of 136 miles per hour swept over the area and the engines of the sloop proved altogether too feeble to maintain her steerage way. Her engines stopped and a succession of squalls laid her over until her funnels became submerged, the water flooding down and exploding the boilers, after which she sank.

Cdr. Usher went down on the bridge, receiving a blow on the head, but eventually coming to the surface near one of the rafts was pulled on board and saved. The number drowned was four officers and 82 ratings.

VALERIE

Thomas Berg; 1887; Russell & Co.; 2,140 tons; 283-5x40-5x24-5.

The Norwegian sailing ship *Valerie* was sunk by a German submarine in the Bay of Biscay on April 22nd, 1917.

VALETTA

Sir William Gray; 1875; W. Gray & Co.; 1,382 tons; 247-6x32-5x18-5; 120 h.p.; compound engines.

The British cargo ship *Valetta* foundered after being damaged by ice 50 miles from St. John's, N.F.L., on April 18th, 1894. She was on a voyage from Penarth to St. John's carrying a cargo of coal.

VALFIORITA

Industrie Navali Soc. Anon.; 1942; Italy; 6,200 tons; oil engines.

The Italian motorship *Valfiorita* was torpedoed and sunk by a British submarine on July 8th, 1943, near Rasocolmo, Sicily.

VALHALLA

F. Baudoin; 1892; Ramage & Ferguson; 1,170 tons; 239-6x37-2x20-7; 146 n.h.p.; triple-expansion engines. The French auxiliary full rigged ship *Valhalla*, on a voyage from Valencia to Dunkirk, foundered in heavy weather, after her stokehold had been flooded, on December 2nd, 1921, off Cape St. Vincent.

VALLE

Cia. Cantabrica de Nav.; 1888; E. Withy & Co.; 2,365 tons; 290 X 38 -1 x 19 - 2; 212 n.h.p.; triple-expansion engines.

The Spanish steamship *Valle* was sunk by a German submarine off Ushant on January 17th, 1917.

VALLE DE MENA

Vasco Madrilena de Navegacion; 1957; Astilleros de T. Ruiz de Velasco; 999 tons; 221-5x32-4x15-9; oil engines. The Spanish motorship *Valle de Mena*, on a voyage from Bilbao to Emden with 800 tons of steel, reported herself in a position about 100 miles from Bordeaux with engine breakdown and in need of assistance on April 3rd, 1962. Nothing more was heard of the ship or her crew of 18 until the following day when wreckage was sighted and one survivor picked up from a boat.

VALLEYFIELD

Canadian Navy, frigate; 1943; Quebec; 1,445 tons; 303 x 37-5x—; 21 knots; turbine engines; 3-drum boilers; two 4 in. guns, several smaller.

The Canadian frigate *Valleyfield*, Lt. Cdr. D. T. English, was on escort duty off Cape Race on May 7th, 1944, when she was torpedoed and sunk by a German submarine. The *Valleyfield* carried a complement of 164 of whom 126, including Cdr. English, were lost.

VALPARAISO

Pacific Steam Navigation Co.; 1873; J. Elder & Co.; 3,575 tons; 379'2x41-8x33-2; 550 h.p.; compound inverted engines. ~ The British steamship *Valparaiso* was wrecked in Vigo Bay at 9.50 p.m. on February 28th, 1887, while on a voyage from Liverpool to Valparaiso carrying a general cargo.

VALPARAISO

Soc. Anon. Lloyd del Pacifico; 1890; Fair field Co.; 4,930 tons; 430-1x47-9x21; 506 n.h.p.; triple-expansion engines. The Italian steamship *Valparaiso* was torpedoed by a submarine in the Mediterranean on October 14th, 1917.

VALPARAISO

Rederi-AjB Nordstjernen; 1917; Burmeister & Wain; 4,979 tons; 364 -5x51-4x22-1; 629 n.h.p.; oil engines. The Swedish motorship *Valparaiso*, with a crew of 35 and an unknown number of passengers, left Montreal on December 3rd, 1940, for Glasgow. Nothing was ever heard of the ship after she sailed from Halifax on the 18th, and she was considered to have been probably lost by war causes.

VALSAVOIA

Industrie Navali Soc. Anon.; 1919; Societa Esercizio Bacini; 5,733 tons; 385'9x51-5x27-4; 336 n.h.p.; triple-expansion engines.

The Italian steamship *Valsavoia* was torpedoed and sunk by a British submarine on February 2nd, 1943, eight miles from Capri.

VALVERDE

Industrie Navali Soc. Anon.; 1910; W. Doxford & Sons; 4,463 tons; 378-9x50-1 x26-1; 310 n.h.p.; triple-expansion engines.

The Italian steamship *Valverde* was bombed and sunk by German aircraft on September 9th, 1943, at Loughorn.

VAMPIRE

Australian Navy, destroyer; 1917; J.S. White & Co.; 1,090 tons; 312x29-5x10-9; 27,000 s.h.p.; 34 knots; turbine engines; White-Forster boilers; four 4 in. guns, one 2 pdr., 3 m.g., 5 T.T. The Australian destroyer *Vampire*, Cdr. W. T. A. Moran, left Trincomalee in company with the aircraft carrier *Hermes* on April 8th, 1942. On the following day both ships were located by Japanese carrier-borne aircraft some 80 miles S. of Trincomalee and attacked by 70 dive-bombers. Both ships were sunk in a very short time. Of the *Vampire's* complement eight were killed, including Cdr. Moran, and one died of wounds.

For fuller details see *Hermes*.

VAN DER WIJK

Koninklijke Paketvaart Maats.; 1921; Maats. Fyenoord; 2,633 tons; 320x44x27-7; 362 n.h.p.; triple-expansion engines. The Dutch steamship *Van der Wijk*, on a voyage from Sourabaya to Tandjong Priok with passengers and general cargo, capsized and sank in heavy weather on October 20th, 1936, near Tandjong Pakis, between Sourabaya and Samarang. Flying boats and naval craft, summoned by her S.O.S. call, picked up 167 survivors from boats and floating wreckage but 34 lives were lost, passengers and crew.

VAN GHENT

Netherlands Navy, destroyer; 1926; Koninklijke Maats. de Schelde; 1,310 tons; 322x31-2x10-5; 31,000 s.h.p.; 36 knots; turbine engines; Yarrow boilers; four 4 - 7 in. guns, two 3 in.A.A., four 12-7 mm., 6 T.T., 24 mines.

The Dutch destroyer *Van Ghent* was wrecked on Lima Island in the Java Sea between Banka and Billiton on February 15th, 1942. The vessel was a unit of the ill-fated Allied East Indies Squadron which was almost entirely destroyed by the Japanese in February and the early days of March 1942. Her normal complement was 129.

VAN LANSBERGE

Koninklijke Paketvaart Maats.; 1913; Maats. Fyenoord; 1,937 tons; 278-4x41-2x16-8; 166 n.h.p.; 10 knots; triple-expansion engines. The Dutch steamship *Van Lansberge* was bound from Sourabaya to Macassar when she was bombed by Japanese aircraft and heavily

damaged. Later she was torpedoed and sunk by the Japanese submarine /-55. The attack took place near Briibank in the Java Sea on February 4th, 1942, the steamship sinking with 20 of the crew.

VAN NES

Netherlands Navy, destroyer; 1930; Burgerhouts; 1,316 tons; 322 x 31 - 2 x 10; 31,000 s.h.p.; 36 knots; turbine engines; Yarrow boilers; four 4 - 7 in. guns, one 3 in.A.A., four 40 mm.A.A., four 12-7 mm., 6 T.T.

The Dutch destroyer *Van Nes* was bombed and sunk by Japanese aircraft off Banka Island, Sumatra, on February 17th, 1942. She was a unit of the ill-fated Allied East Indies Squadron which was almost entirely destroyed by the Japanese in February and the early days of March 1942. Her normal complement was 120.

VAN OVERSTRATEN

Koninklijke Paketvaart Maats.; 1912; Maats. Fyenoord; 4,482 tons; 383 - 2x48-3x27-3; 436 n.h.p.; triple-expansion engines. The Dutch steamship Van Overstraten was shelled and sunk by a Japanese submarine on January 22nd, 1942, 600-700 miles W. of Sumatra on a voyage from Bombay to Telok Betong. There were no survivors.

VAN REES

Koninklijke Paketvaart Maats.; 1913; Rijkee & Co.; 3,000 tons; 325-6x43-1x22-7; 233 n.h.p.; triple-expansion engines. The Dutch steamship Van Rees was bound from Tjilatjap to Emmahaven when she was torpedoed and sunk by the Japanese submarine I-56, 80 miles S. of Tjilatjap, on January 9th, 1942, the steamship sinking with six of the crew.

VAN RENNELAER

KoninklijkeNederlandscheStoomb.Maats.; 1920; Nederlandsche Scheepsbouw Maats.; 4,241 tons; 342x47-7x24-3; 330 n.h.p.; triple-expansion engines. The Dutch steamship Van Rensselaer, outward bound from Amsterdam with 150 passengers, struck a mine outside Ymuiden on May 12th, 1940, two days after the commencement of the German invasion. The ship ran ashore and was wrecked. The captain and five passengers were killed, 43 of the survivors in boats made for England and eventually landed at Ramsgate.

VAN RIEBEECK

Koninklijke Paketvaart Maats.; 1902; Nederlandsche Scheep- bouw Maats.; 2,263 tons; 316-9x41 - 7x19-4; 249 n.h.p.; 12 knots; triple-expansion engines. The Dutch steamship Van Riebeeck was bound from Pasaroean to Singapore when she was intercepted by the Japanese submarine I-56 which sank her by gunfire. The attack took place in the Java Sea on January 8th, 1942, the steamship sinking with 12 of the crew.

VAN STABEL

Societe des Voiliers Dunckerquois; 1901; Ateliers & Chantiers de laLoire; 2,349 tons; 276-7x40-3x22-5. The French barque Van Stabel, on a voyage from Glasgow to San Francisco, was wrecked off Monarch Island, Hebrides, prior to February 3rd, 1903. Twenty-seven of the crew were drowned.

VANCOUVER

Gow Harrison & Co.; 1928; Greenock Dockyard Co.; 5,729 tons; 410-3x54-5x30-1; 565 n.h.p.; 11 knots; triple-expansion engines. The tanker Vancouver, Capt. H. Farquhar, on a voyage from Halifax to Shell Haven with 7,500 tons of gasoline, struck a mine, broke in two and caught fire two miles from the Sunk Lightship, Thames Estuary, on September 21st, 1941. The ship burned for several days and could not be approached because of the burning petrol on the water. Thirty-four of the crew of 36 and five of the six gunners were lost.

VANCOUVER ISLAND

Canadian Government; 1929-34; Deutsche Werke; 9,472 tons; 487-3x60-6x39'5; 2,775 n.h.p.; oil engines. The Canadian motorship Vancouver Island, on a voyage from Montreal to Cardiff, was torpedoed and sunk by a German submarine on October 15th, 1941, about 750 miles W. of the Fastnet.

All on board were lost, 65 crew, eight gunners and 32 passengers. The *Vancouver Island* was formerly the German *Weser*, captured by the Canadian auxiliary cruiser *Prince Robert* on September 26th, 1940, soon after leaving Manzanillo, Mexico.

VANDA

H. Uner, Aktieb.; 1882; Palmers" Co.; 1,646 tons; 250X 36-2x20; 157 n.h.p.; compound engines. The Swedish steamship Vanda was torpedoed and sunk by a German submarine in the North Sea on July 11th, 1917.

VANDALIA

*United States Navy, wooden steam frigate; 1874; Boston Navy Yard; 2,100 tons; 216-5x39-3x17-3; 1,176 i.h.p.; 12 knots; compound engines; six 9 in. m.l.r. guns, one 60 pdr., 3 smaller, 3 m.g. The Vandalia, Capt. C. M. Schoonmaker, was one of a squadron of three ships under command of Rear-Admiral Kimberley, lying in the harbour of Apia, Samoan Islands, on the night of the hurricane of March 15th-16th, 1889. The other nations whose ships were present were Britain, one ship, the *Calliope*, and Germany three ships. The full story of the hurricane is told under the name of the U.S. flagship, the *Trenton*.*

The harbour of Apia was far too small for the purpose of riding out a storm and the ships would have been safer at sea. The acute tension existing at that time between the U.S. and German prevented this sensible course being followed, and the two squadrons remained in harbour, the *Calliope* being the only vessel to seek open sea.

The *Vandalia* was flung ashore by the hurricane and became a total wreck. Four officers, including the captain, and 39 ratings lost their lives.

VANDIEMAN

G.H.Lovitt; 1878; Groscoques, N.S.; 1,347 tons; 200x38x 23 (approx.). The Canadian sailing ship Vandiemman was on passage from Liverpool to Sandy Hook in ballast in February, 1879, when she was sunk by collision with a barque off Cape Clear, Ireland. Seventeen members of the crew were drowned, as were the crew of the barque.

VANDYCK

*Lamport & Holt; 1911; Workman, Clark & Co.; 10,328 tons; 495 - 5x60-8x28-7; 614 n.h.p.; 15 knots; quadruple-expansion engines. The liner Vandyck was one of the largest and best appointed vessels in the Lamport & Holt fleet and on October 26th, 1914, was on a voyage from Buenos Aires to New York. The vessel was carrying over 200 passengers, chiefly U.S. citizens, and a large and valuable cargo. On the morning of the 26th she had the misfortune to be sighted by the German light cruiser *Karlsruhe* which chased and captured her just before noon. The passengers and crew were placed on the steamship *Asuncion*, previously captured, with many other prisoners, and sent to Para, which they reached on November 1st. The *Karlsruhe* sank the liner next day off Maranhao, Brazil, after taking all that she required from the cargo. She was particularly fortunate in this capture as the *Vandyck* was carrying, among other items, 1,000 tons of frozen meat.*

For full story of the raider, see *Karlsruhe*.

VANDYCK

Lamport & Holt Line; 1921; Workman, Clark & Co.; 13,241 tons; 510'6x64-3x39-3; 800 n.h.p.; 15 knots; turbine engines. The liner Vandyck was taken over by the Admiralty early in the Second World War. She took part in the operations off Norway and on June 10th, 1940, in convoy₅ was attacked by German dive-bombers and sunk. Two officers and five ratings were killed and 29 officers and 132 ratings were taken prisoner by the Germans.

VANGUARD

British Navy, ironclad; 1870; Laird's; 6,034 tons; 280x54x 23-5; 5,812 ih.p.; 14 knots; compound engines; ten 9 in. m.l.r. guns, four 40 pdr., 20 smaller, 4 T. T. The ironclad Vanguard, Capt. R. Dawkins, was a unit of the Reserve Squadron of the Channel Fleet, under command of Vice-Admiral Sir W. Tarleton, which left Kingstown on September 1st,

1875, for Cork. When off the Kish Lightship, six miles from Kingstown, the squadron encountered fog and by 12.30 p.m. visibility was reduced to a bare 50 yards. Speed was reduced from 14 knots to seven, but even this was too great for such thick weather. At about 12.50 p.m. *Vanguard*, which was next ahead to *Iron Duke*, 6,024 tons, put her helm hard a port to avoid a large sailing vessel which had suddenly loomed up out of the fog. This caused her to swing out of line and immediately across the bows of *Iron Duke*. Capt. H. D. Hickley of the latter vessel reversed his engines, but not in time to prevent his ship from striking *Vanguard* a frightful blow with her ram on the port quarter between the main and mizzen-masts, some four feet below the armour belt and just abaft the engine room. The *Vanguard* began to sink by the stern, but very slowly.

Owing to the preoccupation of Capt. Dawkins and his officers with the problem of saving the crew certain measures for saving, or attempting to save, the vessel were not put in hand. As a result of this the ship's engine room became flooded and the engines ceased to work. Good discipline was maintained and everyone on board was saved, either by the boats of *Vanguard* herself or those of *Iron Duke*.

After remaining afloat for exactly 59 minutes from the moment of the collision *Vanguard* sank by the stern, her position at the time being eight miles E.S.E. of the Kish Lightship, and 14 miles from Kingstown.

The *Vanguard's* full complement was 450, but at the time she carried only 300.

BRITISH

British Navy, dreadnought battleship; 1909; Vickers; 19,250 tons; 536 x84x 27; 24,500 i.h.p.; 22 knots; turbine engines; Babcock boilers; ten 12 in. guns, eighteen 4 in., four 3pdr., 3 T.T. The battleship *Vanguard*, Capt. J. D. Dick, served with the Grand Fleet during the First World War until the time of her destruction. She was present at the battle of Jutland as a unit of the 4th Battle Squadron. On July 9th, 1917, *Vanguard* was lying in Scapa Flow when she blew up with the loss of nearly every man on board. The ship's normal complement was 670, of which number one officer and two seamen were saved. The officer died later of his wounds* Thirty-seven officers, including Capt. Dick, were lost in the disaster.

During the First World War battleships, and large cruisers were destroyed by internal explosion when lying in harbour with alarming frequency, the following vessels being lost in this manner.

BRITISH

Bulwark, pre-dreadnought *Vanguard*, dreadnought *Natal*, armoured cruiser *Princess Irene*, auxiliary minelayer

JAPANESE

Kawachi, dreadnought *Tsukuba*, battle cruiser.

ITALIAN

Benedetto Brin, pre-dreadnought *Leonardo da Vinci*, dreadnought *Basilicata*, cruiser *Etruria*, cruiser

RUSSIAN

Imperatzia Maria, dreadnought

Such disasters served to emphasise for naval officers and designers the dangers arising from deterioration of the stocks of high explosives carried on board modern men-of-war.

VANLAND

H.Metcalfe; 1893; Campbeltown S.B. Co.; 1,285 tons; 227 x 32-7x16-3; 112 n.h.p.; triple-expansion engines. The Swedish steamship *Vanland* was shelled and sunk by a German submarine in the North Sea on July 24th, 1917.

VARANGBERG

A/S. Malmfart; 1915; Great Lakes Engineering Works; 2,842 tons; 282-8x46-3x25-2; 284 n.h.p.; triple-expansion engines. The Norwegian steamship *Varangberg* was torpedoed and sunk on

September 25th, 1941, about 900 miles W. of Vigo on a voyage from Melilla to Belfast with 4,100 tons of iron ore. Twenty-one of the crew were lost.

VARDULIA

Donaldson Line; 1917; Russell & Co.; 5,735 tons; 423-3x 56x28- 7; 564 n.h.p.; triple-expansion engines. The steamship *Vardulia* left Hartlepool on October 12th, 1935, for Botwood, N.F.L., with coal and general cargo. On the 18th a distress call was received from the ship, asking for assistance in a heavy gale, giving a position about 700 miles W. of Malm Head. A second call on the following morning announced that the ship was to be abandoned. Nothing more was ever heard of the *Vardulia* or the crew of 37.

VARIA

Rederi-AjB Svenska Lloyd; 1908; Helsingborgs Varfs A/JB; 929 tons; 197-4x33-1x13-8; 101 n.h.p.; triple-expansion engines.

The Swedish steamship *Varia*, on a voyage from Falmouth to Belfast in ballast, was bombed and sunk by a German aircraft on August 10th, 1940, 60 miles S.E. of the Fastnet. Seven of the crew of 19 were lost.

VARIAG

Russian Navy, protected cruiser; 1899; W. Cramp & Son; 6,500 tons; 420x52x20-7; 19,185 i.h.p.; 23 knots; triple-expansion engines; twelve 6 in. guns, twelve 12 pdr., eight 3 pdr., two 2pdr., 6 T.T.

At the commencement of the Russo-Japanese War in February, 1904, the Russian protected cruiser *Variag*, Capt. Roudneff, with the gunboat *Korietz*, was lying in the harbour at Chemulpo, Korea. The international situation was extremely delicate for, although the Russian expected hostilities to break out at any moment, they were deprived of authentic news by the action of the Japanese, who had held up all cables at Nagasaki.

At midnight on February 7th the Japanese light cruiser *Chiyoda*, Capt. Murakami, weighed anchor and left the harbour to join the squadron under Admiral Uriu, which was convoying transports from Sasebo. On the previous day Capt. Roudneff had ordered the *Korietz* to proceed to Port Arthur with mails and dispatches from the Russian minister at Seoul, but she was fired on by the Japanese ships as she was leaving harbour and forced to turn back. These two events should have been sufficient to warn the Russians yet they suffered the Japanese to enter the harbour on the 8th and land their troops and supplies without interference, and then to withdraw. The *Chiyoda* was sent in next day with a letter from Admiral Uriu informing the neutral men-of-war that hostilities had commenced and, in the case of the Russians, demanding that they quit the harbour by noon. To this Capt. L. Bayly of H.M.S. *Talbot*, senior naval officer, replied with a vigorous protest against Japan's violation of a neutral port, a strong and perfectly correct action, all the more commendable when we reflect that at that time Britain and Japan were allies.

Capt. Roudneff asked the advice of Capt. Bayly, who suggested that the 23 knot *Variag* should make a dash for Port Arthur, leaving the *Korietz* to be scuttled. After several hours the *Variag* and the *Korietz* weighed anchor and proceeded to sea, the cruiser's band playing and her men standing to the guns.

There was a great disparity in favour of the Japanese, as the list of ships engaged reveals:—

RUSSIAN

	tons	knots	guns
<i>Variag</i>	6,500	23	12-6 in.
<i>Korietz</i>	1,270	13-5	2-8 in., 1-6 in.

JAPANESE

<i>Naniwa</i> (flagship)	3,650	18	2-12 in., 6-5-9 in.
<i>Takachiho</i>	3,709
<i>Asama</i>	9,750	22	4-8 in., 14-6 in.
<i>Niitaka</i>	3,420	20	6-6 in.
<i>Akashi</i>	2,700	..	2 .. 6-4-7 in.
<i>Chiyoda</i>	2,439	19	10 ..

VARILD

At 11.45 a.m. the Japanese opened fire at a range of about 7,500 yards, using shrapnel as well as high explosive. The reason for the former being that the *Variag's* 6 in. guns were not protected by shields and her gunners were dangerously exposed. In the first 15 minutes the *Variag* had half her guns put out of action, her own fire being rapid but inaccurate. By noon her steering gear was no longer functioning, she was on fire in several places, had been holed below the waterline and had a heavy list. In this parlous state she returned to harbour with only two of her 12 6 in. guns in action. The Japanese now ceased firing and remained at a distance of some three and a half miles outside the harbour. The foreign warships at once lowered boats and began the work of rescue, taking off the wounded first and then embarking the rest of the crew before the ship foundered, the Russians opening her sea cocks before the last party left.

One officer and 30 men of the *Variag's* complement of 553 were killed and six officers and 185 men wounded.

The gunboat *Korietz* had conformed to her consort's movements and, as her fire was ineffectual owing to the range at which the action was fought, she returned to harbour and was blown up by her crew.

VARILD

E. Ncesheim A/S; 1910; Bergens Mek. Verksted; 1,086 tons; 223'9x33-2x15-2; 116 n.h.p.; triple-expansion engines. The Norwegian steamship *Varild* left Horten on January 22nd, 1940, for Sunderland in ballast. She was never seen again and was considered to have been sunk by mine or torpedo.

VARMDO

Rederi-AIB.Rex; 1901; A. Rodger & Co.; 2,956 tons; 318-6x 46 -1 x 21 - 3; 254 n.h.p.; triple-expansion engines. The Swedish steamship *Varmdo* was bombed and sunk by British aircraft on the night of May 30th, 1942, off Terschelling, with the loss of five lives.

VARNA

Soc. Commerciale Bulgare de Nav. a Vap.; 1902; Wood, Skinner & Co.; 1,820 tons; 270x39-5x18-6; 206 n.h.p.; triple-expansion engines.

The Bulgarian steamship *Varna*, on a voyage from Varna to Piraeus with general cargo, was sunk by collision on December 25th, 1929, in the Sea of Marmara. Twenty-two of the crew and five passengers were drowned, five of the crew were saved.

VARNA

Soc. Commerciale Bulgare de Nav. a Vap.; 1937; Neptunwerft; 2,143 tons; 303x43-6x 16-3; 307n.h.p.; compound engines & L.P. turbine.

The Bulgarian steamship *Varna* was torpedoed and sunk by a Russian submarine on August 24th, 194?, in the Black Sea, with the loss of the crew of 32.

VARVARA

D. Pavlatos & Co.; 1872; Barclay, Curie & Co.; 1,316 tons; 250 - 3x30x21-7; 130 n.h.p.; compound engines. The Greek steamship *Varvara* was shelled and sunk by a submarine in the Mediterranean on July 19th, 1917.

VASCO

T. Wilson, Sons & Co.; 1895; Furness, Withy & Co.; 1,914 tons; 280x40x19-2; 188 n.h.p.; 9-5 knots; triple-expansion engines. The steamship *Vasco* struck a mine and sank ten miles W. by S. of Beachy Head on November 16th, 1916. The captain and 16 others were killed.

VASCONIA

O.Berg; 1899; Russell & Co.; 3,052 tons; 325-3x45-3x15-4; 289 n.h.p.; triple-expansion engines. The Norwegian steamship *Vasconia* struck a mine and sank in the Mediterranean on April 9th, 1918.

VASILEFS CONSTANTINOS

S.G.Embiricos; 1913; Short Bros.; 4,070 tons; 374x52x22-1; 353 n.h.p.; triple-expansion engines. The Greek steamship *Vasilefs Constantinos* was torpedoed and sunk by a submarine in the Mediterranean on April 3rd, 1917.

VASILEFS GEORGIOS

O. Tetenes; 1904; R. Craggs & Sons; 3,651 tons; 340x47-1x 24-9; 342 n.h.p.; triple-expansion engines. The Greek steamship *Vasilefs Georgios* was torpedoed and sunk by a German submarine in the Bristol Channel on May 3rd, 1918.

VASILISSA OLGA

Greek Navy .destroyer; 1938; Yarrow; 1,3 50 tons; 320x33x 8-5; 34,000 s.h.p.; 36 knots; turbine engines; Yarrow boilers; four 5 in. guns, four 37 mm., 3 m.g., 8 T.T. The Greek destroyer *Vasilissa Olga* was torpedoed and sunk in the Mediterranean in September 1943. The vessel carried a complement of about 160.

VASSILIOS A. POLEMIS

I. G. Goumas; 1907; Chantiers Navals Anversois; 3,425 tons; 347-2x48-3x23; 320 n.h.p.; triple-expansion engines. The Greek steamship *Vassilios A. Polemis* was torpedoed and sunk by a German submarine on January 22nd, 1942, on a voyage from Cardiff to St. John, N.B. Twenty-one of the crew were lost.

VASSILIOS T.

E. M. Tricoglu; 1920; Nitta Shipyard; 3,673 tons; 315-9X 45-8x26-3; 400 n.h.p.; triple-expansion engines. The Greek steamship *Vassilios T.*, on a voyage from Swansea to Venice with coal, struck a rock and foundered on March 19th, 1939, near Point Stupisce, Vis Island, Adriatic.

VAV

Dampsk. Akties. Vestheim; 1916; Fredrikstads Mek. Verksted; 1,255 tons; 235x33-5x21-2; 188 n.h.p.; triple-expansion engines. The Norwegian steamship *Vav* was torpedoed and sunk by a German submarine in the English Channel on December 4th, 1917.

VECHT

Naam. Venn. Houtvaart; 1917; A. Vuijk & Zonen; 7,965 tons; 281 - 3x40-2x19-2; 225 n.h.p.; triple-expansion engines. The Dutch steamship *Vecht* left Rotterdam on March 6th, 1940, for Lobito in ballast, and was never seen again. Wreckage was found the next day near the Schouwenbank and it was considered probable that the ship had been sunk by striking a mine.

VEDAMORE

Johnston Line; 1896; Harland & Wolff; 6,330 tons; 451x 48-3x27-3; 627 n.h.p.; 13-5knots; triple-expansion engines. The steamship *Vedamore* was torpedoed and sunk by a German submarine 20 miles W. of the Fastnet on February 7th, 1917. Thirty-nine of the crew of 63 managed to get away in the boats in bitterly cold weather. Two men died from exposure before the boats were picked up ten hours later.

VEDRA

Associated Oil Carriers; 1893; J. Laing; 4,057 tons; 345 X 44-7x22; 362 n.h.p.; 9-5 knots; triple-expansion engines. The tanker *Vedra* was bound from Sabine, Texas, to Barrow with 6,000 tons of benzine. She was commanded by Capt. Brewster and carried a crew of 36. On December 7th, 1914, she was approaching Barrow in a wild gale and making signals for a pilot. Before one could reach her she stranded on Walney Island, off Barrow, at 8.30 p.m., and began to bump heavily on the rocks. The guardship *Furness*, Capt. Hill, put out to her assistance and passed two hawsers in succession but both parted. Two tugs and the Piel Island and Fleetwood lifeboats came on the scene, but the efforts of the tugs failed to move the tanker as her engines were disabled and the lifeboats could not approach because of the gale. At 3 a.m. on the 8th, after continuous pounding by the seas, there was an explosion and the ship burst into flames. Only two men, the second and fourth engineers, both badly burned, were rescued. The remaining 34 of the crew being either burned or drowned.

VEGA

Italian Navy, torpedo boat; 1936; Quarnaro; 642 tons; 269 x 27x7; 19,000 s.h.p.; 34knots; turbine engines; 3-drum boilers; three 3 - 9 in. guns, six 37 mm., 4 T. T. On January 11th, 1941, a British convoy with supplies for Greece

was running through the Sicilian Channel when it sighted the Italian torpedo boats *Vega* and *Cigno*, both small ships of 642 tons. Action was at once joined and the *Vega* put up a very gallant fight in the face of overwhelming fire from British cruisers and destroyers. The cruiser *Southampton*, 9,100 tons, Capt. B. C. Brooke, scored hits on her and she finally sank with most of her complement of about 100. The *Cigno*, which tried to escape, was badly damaged and had to be beached. For full story of the convoy see under the cruiser *Southampton*.

VEGHTSTROOM

Hollandsche Stoomboot Maats.; 1901; *Rijkee & Co.*; 1,339 tons; 230 x 33 x 17 - 6; 122 n.h.p.; triple-expansion engines. The Dutch steamship *Veghtstroom*, was seven miles N.W. of Godrevy Lighthouse, Cornwall, on August 23rd, 1917, when she was torpedoed and sunk by the German submarine *UC-47*. At the time of the attack the steamship was sailing under the British flag. She sank with the loss of five lives.

VEHEMENT

British Navy, destroyer; 1917; *W. Denny & Bros.*; 1,367 tons; 312 x 29 x 11; 27,000 s.h.p.; 34 knots; turbine engines; *Yarrow boilers*; four 4 in. guns, one 3 in., 4 T.T.

The destroyer *Vehement* struck a mine and sank in the North Sea on August 2nd, 1918. Her official complement was 110.

VELASQUEZ

Lampart & Holt; 1906; *Sir Raylton Dixon & Co.*; 7,542 tons; 465-5 x 59-3 x 29-9; 458 n.h.p.; triple-expansion engines. The British steamship *Velasquez* was wrecked at Sao Sebastiao on October 17th, 1908, while on a voyage from Buenos Aires to New York. She was carrying passengers and a general cargo.

VELEBIT

Jugoslavenska Oceanska Plovidba; 1911; *Armstrong, Whitworth & Co.*; 4,195 tons; 378-2 x 52-3 x 23-9; 391 n.h.p.; triple-expansion engines.

The Yugoslav steamship *Velebit* was shelled and sunk by the German raider *Kormoran* on the night of June 25th, 1941, in the Bay of Bengal on a voyage from Bombay to Maulmain. Twenty-eight of the crew were killed.

VELMA LYKES

Lykes Bros. S.S. Co.; 1920; *McDougall Duluth Co.*; 2,572 tons; 251 x 43 • 7 x 26 - 2; 352 n.h.p.; triple-expansion engines. The American steamship *Velma Lykes* was torpedoed and sunk by a German submarine on June 4th, 1942, about 80 miles S. of the western tip of Cuba on a voyage from Galveston to Cristobal. Fifteen of the crew were lost.

VELOCE

A. Lauro; 1911; *A. Stephen & Sons*; 5,464 tons; 424-4 x 53-2 x 30; 424 n.h.p.; triple-expansion engines.

The Italian steamship *VeLoce* was torpedoed by a British aircraft and sunk by gunfire from warships on December 2nd, 1942, 20 miles S. of the Kerkenna Islands.

VENBORG

Brummences & Torgersen; 1904; *Fevigs Jernskibsbyggeri*; 1,065 tons; 200-5 x 32 x 14-6; 111 n.h.p.; triple-expansion engines.

The Norwegian steamship *Venborg* was torpedoed and sunk by a German submarine off Ushant on March 23rd, 1918.

VENDIA

Det Forenede Kulimporterer; 1924; *Howaldtswerke*; 1,150 tons; 226 x 36-1 x 10-6; 113 n.h.p.; triple-expansion engines. The Danish steamship *Vendia* was torpedoed and sunk by a German submarine on September 30th, 1939, about 35 miles N.W. of Hanstholmen, on a voyage from Faaborg to the Clyde. Eleven of the crew were lost.

VENERSBORG

Stockholms Rederi-A/B Svea; 1914; *Trondhjems Mek. Verksted*; 1,044 tons; 226-2 x 35 x 13-5; 139 n.h.p.; triple-expansion engines.

The Swedish steamship *Venersborg* sank after an explosion on December 29th, 1944, about 20 miles S.W. of Utklippan. There was only one survivor of the crew of 20.

VENETIA

British Navy, destroyer; 1918; *Fairfield Shipbuilding Co.*; 1,090 tons; 312 x 29-5 x 10-9; 27,000 s.h.p.; 34 knots; turbine engines; *Yarrow boilers*; four 4 in. guns, 6 smaller, 6 T.T. The destroyer *Venetia*, Lt. Cdr. D. L. C. Craig, struck a mine and sank on October 19th, 1940, in the Thames estuary. Cdr. Craig, four other officers and 30 ratings were killed.

VENETIAN

F. Leyland & Co.; 1882; *Palmers' Co.*; 4,055 tons; 423-6 x 41 x 29; 450 h.p.; compound engines.

The British steamship *Venetian* was wrecked on State Ledge, Boston Bay, on March 3rd, 1895, in fog, while on a voyage from Boston to London carrying a general cargo.

VENEZIA

Italian Government; 1914; *J. Readhead & Sons*; 4,207 tons; 369-9 x 51-1 x 25 • 3; 386 n.h.p.; triple-expansion engines. The steamship *Venezia* was formerly the Greek *Mount Ithome*, seized by the French and renamed *Monrovia*, later taken over by the Italians. On July 14th, 1943, she was bombed and sunk by British aircraft at Messina.

VENEZUELA

Rederi-A/B. Nordstjeman; 1939; *A/B Gotaverken*; 6,991 tons; 420-8 x 55-9 x 24; 945 n.h.p.; oil engines.

The Swedish motorship *Venezuela* was torpedoed and sunk by a German submarine on April 17th, 1941, about 300 miles W. of the Fastnet on a voyage from Gothenburg to Rio de Janeiro. There were no survivors.

VENICE MARU

Kawasaki Kisen K.K.; 1921; *Kawasaki Dockyard Co.*; 6,571 tons; 405-0 x 53-0 x 37-0; 578 n.h.p.; triple-expansion engines.

The steamship *Venice Maru* was torpedoed and sunk by the U.S. submarine *Haddock* on November 11th, 1942, in the Yellow Sea.

VENORE

Ore S.S. Corp.; 1921; *Bethlehem S.B. Corp.*; 8,017 tons; 550-3 x 72-2 x 43-7; 928 n.h.p.; triple-expansion engines.

The American steamship *Venore*, Capt. Fritz Duurloo, was torpedoed and sunk by a German submarine on January 23rd, 1942, off Cape Hatteras, on a voyage from Cruz Grande to Baltimore with iron ore. Capt. Duurloo and 21 of the crew were lost.

VENTMOOR

W. Runciman & Co.; 1900; *Ropner & Son*; 3,456 tons; 330-5 x 46-6 x 24-4; 281 n.h.p.; 8-5 knots; triple-expansion engines.

The steamship *Ventmoor* was torpedoed and sunk by a German submarine eight miles S.W. by W. of Skyros Lighthouse, Greece, on February 14th, 1918. The captain and 20 others were killed.

VENTNOR

Gow, Harrison & Co.; 1901; *Russell & Co.*; 3,961 tons; 344-7 x 49-8 x 18; 346 n.h.p.; 10 knots; triple-expansion engines. The steamship *Ventnor*, Capt. H. G. Ferry, left Wellington on October 26th, 1902, for Hong Kong with a most unusual cargo, having on board 499 coffins containing the bodies of Chinamen who had died in New Zealand. The Chong Shing Tong Society of China was responsible for collecting the bodies, some of which had rested in New Zealand for 20 years, and arranging their conveyance to China. Nine aged Chinese were carried to act as "body attendants". The ship also carried 5,357 tons of coal. Her crew numbered 31.

At 12.40 a.m. on the 27th in fine weather and a smooth sea with her engines running at full speed the *Ventnor* ran on a reef to the southward of Cape Egmont. The engines were at once reversed and

she backed off the rocks and away, but with increasing difficulty. Eventually the pumps gave out and she filled and sank by the bows at 9 p.m. on the 28th.

The boats, of which there were four, were launched without mishap and pulled away, taking the light on Hokianga Heads, ten miles distant, as their guide. Two of them reached Omapere Beach, and one was picked up by a passing ship. The fourth boat containing the captain, two officers and 13 men was washed up in a smashed condition to the N. of Hukatere on November 11th, its occupants having perished.

VENUS

A/S D/S Orion; 1920; Wood, Skinner & Co.; 2,456 tons; 303 x 43 X 20 - 8; 265 n.h.p.; triple-expansion engines. The Danish steamship *Venus*, under German control, struck a mine and sank on August 7th, 1941, off Schleimunde.

VERA

W. S. Bailey; 1881; Blumer & Co.; 2,019 tons; 280-2x37-2 x 24 - 2; 200 h.p.; compound engines. The British cargo ship *Vera* was wrecked ten miles W. of Portland on March 8th, 1889, while on a voyage from Venice to London carrying a general cargo.

VERA

J. P. Jonsson; 1897; Ropner & Son; 2,308 tons; 300x43x 19-5; 226n.h.p.; triple-expansion engines. The Swedish steamship *Vera* was sunk by a submarine in the Mediterranean on October 5th, 1916.

VERACE

J. Messina & C.; 1884; L.Smit & Zpon; 1,219 tons; 257-5 x 33x15-2; 151 n.h.p.; compound engines. The Italian steamship *Verace* struck a mine and sank on October 16th, 1940, off Benghazi.

VERCELLI

Italian Government; 1919; R. Thompson & Sons; 3,094 tons; 331 -3x46-8x23-2; 358 n.h.p.; triple-expansion engines. The steamship *Vercelli* was formerly the French *Brestois*, seized by the Italians. On January 29th, 1943, she was bombed and sunk by British aircraft 50 miles N.E. of Bizerta.

VERDI

Liverpool, Brazil & River Plate S.N. Co.; 1907; Workman Clark & Co.; 7,120 tons; 430-4x53-3x28-8; 460 n.h.p.; 10-5 knots; triple-expansion engines. The steamship *Verdi* was torpedoed and sunk by a German submarine 115 miles N.W. by N. from Eagle Island, off Co. Mayo, on August 22nd, 1917. Six men were killed, the captain was among the survivors.

VERDUN

7902; J. Blumer & Co.; 2,769 tons; 319-6x46x21 -2; 263 n.h.p. triple-expansion engines. The French steamship *Verdun* was torpedoed and sunk by a submarine in the Mediterranean on April 28th, 1918.

VERJO

Jacob Rabes Dampsk.; 1903; Stavanger Stoberi & Dok; 1,002 tons; 221 -6x32-1 x 12-1; 103 n.h.p.; triple-expansion engines. The Norwegian steamship *Verjo* was torpedoed and sunk by a German submarine off Ushant on April 27th, 1917.

VERONA

Leith, Hull & Hamburg Steam Packet Co.; 1865; R. Napier & Sons; 1,016 tons; 253-6x31-5x16; 150 h.p.; compound inverted engines. The British cargo ship *Verona* was wrecked off Wangeroog on December 12th, 1883, while on a voyage from Leith to Bremerhaven carrying a general cargo.

VERONA

Gow, Harrison & Co.; 1897; Short Bros.; 3,463 tons; 352x45-2x25-1; 292 n.h.p.; triple-expansion engines. The British cargo ship *Verona* sank after a collision with the

steamship *Dunstaffnage*, 1,393 tons, in lat. 2° N., long. 29° W., on March 6th, 1900. She was carrying a cargo of produce from Buenos Aires to Hamburg. All the crew were saved but some Italian cattlemen were drowned.

VERONA

Navigazione Generale Italiana; 1908; Workman, Clark & Co.; 8,261 tons; 482-3x58-3x26-2; 1,221 n.h.p.; triple-expansion engines.

The Italian steamship *Verona* was torpedoed and sunk by a submarine in the Mediterranean on May 11th, 1918.

VERONA

Italian Government; 1920; Napier & Miller; 4,459 tons; 364-6x49-1x24-1; 330 n.h.p.; triple-expansion engines. The steamship *Verona* was formerly the French *Carimare*, seized by the Italians. On January 23rd, 1943, she was torpedoed and sunk by British aircraft N.N.W. of Ustica.

VERONESE

Liverpool, Brazil & River Plate S.N. Co.; 1906; Workman, Clark & Co.; 7,877 tons; 465x59-2x29-9; 458 n.h.p.; 13 knots, triple-expansion engines.

The steamship *Veronese*, Capt. Charles Turner, left Liverpool on January 12th, 1913, for Buenos Aires with 20 passengers and 97 crew, and 5,288 tons of cargo. On arrival at Vigo the *Veronese* embarked 97 emigrants, leaving that port on the 15th with 234 persons all told. In the early morning of January 16th, in hazy weather with occasional rain squalls, the liner stranded on the Boa Nova rocks, off Leixoes, Portugal. The enormous seas running at the time prevented any aid from the local lifeboat, but rocket lines were thrown over the ship and at 7 p.m. the sea abated sufficiently for the breeches-buoy to be used, and by this means most of the passengers were hauled ashore. Meanwhile the Portuguese government despatched gunboats to the wreck and did all in its power to assist. At 2.40 p.m. on the 18th, when everyone had been removed, Capt. Turner left the wreck.

Six of the crew and 21 passengers lost their lives.

VERONICA

Rederi-A/B. Activ; 1918; Limhamn's Skeppsvarv A/B.; 1,316 tons; 238x37-6x16-2; 129 n.h.p.; triple-expansion engines. The Swedish steamship *Veronica* was torpedoed and sunk by a German submarine on November 17th, 1940, 35 miles N.N.W. of Tory Island on a voyage from Aguilas to Barrow with iron ore. Seventeen of the crew of 20 were lost.

VERULAM

British Navy, destroyer; 1917; Hawthorn, Leslie & Co.; 1,367 tons; 312x29x11; 27,000 s.h.p.; 34 knots; turbine engines; Yarrow boilers; four 4 in. guns, one 3 in., 4 T.T. The *Verulam* was a unit of a flotilla of destroyers operating against the Russian Bolsheviks in the Baltic in 1919. On the night of September 3rd, when off Seskaer Island in the Gulf of Finland, the ship struck a mine and sank. Her official complement was 110.

VERVAIN

British Navy, corvette; 1942; Harland & Wolff; 925 tons; 193x32x16; 2,750 i.h.p.; 17 knots; quadruple-expansion engines; one 4 in. gun, six 20 mm.

The corvette *Vervain*, Lt. Cdr. R. A. Howell, R.N.V.R., was torpedoed and sunk by a German submarine on February 20th, 1945, off South Ireland. Four officers, including Lt. Cdr. Howell, and 45 ratings were lost.

VESPASIAN

H. Reksten; 1935; Porsgrund Mek. Verksted; 1,570 tons; 246-6x37-9x18-2; 63 n.h.p.; compound engines & L.P. turbine.

The Norwegian steamship *Vespasian* left the Tyne on January 9th, 1941, and Oban on the 21st for Demerara in ballast. Nothing more was ever heard of the ship or the crew of 18 and it was considered probable that she was sunk by German aircraft on about the 23rd, off the west coast of Ireland.

VESTA

T. & J. Harrison; 1881; Scott & Co.; 3,055 tons; 367-8x 39-3x27-4; 354 n.h.p.; compound engines. The British cargo ship *Vesta* was wrecked on Catalinita Island, San Domingo, on September 26th, 1898. She was on a voyage from Liverpool to Colon and Vera Cruz carrying coal and a general cargo.

VESTA

Det Forende Dampskibs Selsk.; 1879; Palmers'Co.; 1,122 tons; 223 4x29-6x15-2; 192 n.h.p.; compound engines. The Danish steamship *Vesta* was torpedoed and sunk by a German submarine off the north coast of Scotland on July 16th, 1917.

VESTA

Koninklijke Nederlandsche Stoomb. Maats.; 1907; Rotterdam DrvogdokMaats.; 1,854 tons; 270-3x38-1x18-8; 156 n.h.p.; triple-expansion engines. The German steamship *Vesta* was bombed and sunk by Allied aircraft on May 14th, 1944, off Ameland, Holland.

VESTA

Finska Angf.-A/B.; 1889; Tyne Iron S.B. Co.; 1,015 tons; 218 x 31 - 5 x 12 - 9; triple-expansion engines. The Finnish steamship *Vesta*, on a voyage from Norrköping to Finland with grain, ran into a heavy gale on January 15th, 1945. Her cargo shifted and she capsized and sank.

VESTAL

British Navy, fleet minesweeper; 1943; Harland & Wolff; 950 tons; 235x35-5x11-5; 2,000h.p.; 16-5 knots; one 4 in.A.A. gun, four 20 mm. The fleet minesweeper *Vestal* was operating off Pucket, Siam, on July 26th, 1945, when she was sunk by a Japanese bomber crashing on to the deck. The vessel carried a complement of about 120.

VESTERLAND

AxelBrostrom & Son; 1907; W. Doxford & Sons; 3,832 tons; 347x50x22-2; 310 n.h.p.; triple-expansion engines. The Swedish steamship *Vesterland* was torpedoed and sunk by a German submarine in the North Sea on May 17th, 1917.

VESTFOLD

Vest/old Corp.; 1931; Furness S.B. Co.; 14,547 tons; 538-lx 74-3x33-3; 997nhp. The Panamanian tanker *Vestfold*, loaded with 17,000 tons of fuel oil, was torpedoed and sunk by a German submarine on January 17th, 1943, about 800 miles E. of Cape Farewell. Nineteen of the crew were lost.

VESTFOSS

Skibs-AT'S. Thor Thoresen's Linje; 1909; Nylands Verksted; 1,388 tons; 254 x 38x16-4; 152 n.h.p.; triple-expansion engines. The Norwegian steamship *Vestfoss* was bombed and sunk by German aircraft on March 1st, 1940, 12 miles S.E. of Copinsay on a voyage from Partington to Oslo with coal. A few survivors landed at Oslo five days later.

VESTRIS

Liverpool, Brazil & River Plate S.N. Co.; 1912; Workman, Clark & Co.; 10,494 tons; 495-5x60-8x28-7; 1,243 n.h.p.; 15 knots; quadruple-expansion engines. On November 10th, 1928, the steamship *Vestris*, Capt. W. J. Carey, with 128 passengers and 197 crew, left New York for Barbados and Buenos Aires. Some 24 hours after sailing the ship encountered heavy weather, and at 7.30 p.m. on the 11th, two waves of exceptional size struck the vessel with terrific force, flooding the boat deck, washing two boats from their chocks and causing other damage. Some of the cargo and bunker coal shifted to starboard and the ship took a heavy list from which she did not recover, taking water beyond the capacity of the pumps.

By the following morning Capt. Carey was in a grave dilemma. His ship was in a bad way, but in his opinion scarcely bad enough to warrant his sending out an S.O.S. On the other hand he had to consider the safety of his passengers. At 9.45 a.m. he saw that his chances of safety would be gravely prejudiced if he delayed longer

and the S.O.S. was sent out. Shortly afterwards the coloured firemen, who had been working under great difficulties, came on deck and refused to return. The performance of their duties fell upon the engineers, but about an hour later they also had to give up as the ship had a list of 32°. Capt. Carey decided to abandon the ship and soon after the last serviceable boat got away the *Vestris* sank, at 2 p.m., about 300 miles from Hampton Roads. Ships coming to the rescue had great difficulty in finding the boats because of the bad weather conditions but eventually the s.s. *American Shipper*, 7,430 tons, picked up three boats, the s.s. *Miriam*, 1,237 tons, two, and the s.s. *Berlin*, 15,286 tons, and the U.S. battleship *Wyoming* rescued others. Capt. Carey, 43 of the crew and 68 passengers were drowned.

VESUVIO

General Steam Nav. Co.; 1879; J.Laing; 1,391 tons; 243x 32-5 x 17-8; 145 n.h.p.; compound engines. The British ship *Vesuvio* struck a mine and sank six miles E. of the Owers lightship on April 6th, 1916. The captain and six of his crew were killed.

VETERAN

J. Wilson; 1856; Quebec; 1,104 tons; 176x36-9x22-6. The sailing ship *Veteran* of South Shields struck on the pier at Balaclava Harbour, Fraserburgh, on November 29th, 1874. The vessel became a total wreck and 11 of the crew of 21 were drowned.

VETERAN

British Navy, destroyer; 1919; John Brown & Co.; 1,120 tons; 312x29x10; 27,000 s.h.p.; 34 knots; turbine engines; Yarrow boilers; four 4-7 in. guns, two 2pdr., 5 rn.g., 6 T.T. The destroyer *Veteran*, Lt. Cdr. T. H. Garwood, was torpedoed and sunk by a German submarine in the North Atlantic on September 26th, 1942. Nine officers, including Lt. Cdr. Garwood, and 150 ratings were killed.

VETURIA

Gow, Harrison & Co.; 1912; Russell & Co.; 5,554 tons; 424x 56x28-1; 391 n.h.p.; triple-expansion engines. The British cargo ship *Veturia* was wrecked on Diamond Shoal, Cape Hatteras, on February 20th, 1918, while carrying a cargo of nitrate from Colon to Hampton Roads.

VIBRAN

Skibs-AJS Ogeka; 1935; Helsingors Jemskib & Maskin.; 2,993 tons; 322-5x45-8x26-7; 606 n.h.p.; oil engines. The Norwegian motorship *Vibrant* left Cardiff on September 18th, 1942, for Halifax. Nothing was heard of the ship after she passed Barry Island. A German news agency report stated that she was sunk by a submarine on the 24th.

VICENTE LA RODA

Compania Trasmediterranea; 1899; J. Scott & Co.; 1,508 tons; 237-2x34-2x16'6; 274 n.h.p.; triple-expansion engines. The Spanish steamship *Vicente la Roda* was bombed and sunk by insurgent aircraft during the Spanish Civil War.

VICENZA

Italian Government; 1909; A.G.Neptun; 1,833 tons; 273-2x 39-1 x 19-9; 192 n.h.p.; triple-expansion engines. The German steamship *Tunis* was requisitioned by the Italian Government and renamed *Vicenza*. Subsequently she was torpedoed and sunk by a submarine in the Mediterranean on September 7th, 1918.

VICEROY

Gow, Harrison & Co.; 1887; W. Doxford & Sons; 2,138 tons; 275 X 39 - 4 x 18 - 6; 205 n.h.p.; triple-expansion engines. The British cargo ship *Viceroy* was wrecked at Abacop, Bahamas, on September 17th, 1896, while on a voyage from Philadelphia to Havana carrying a cargo of coal.

VICEROY OF INDIA

Peninsular & Oriental Steam Navigation Co.; 1929; A. Stephen & Sons; 19,627 tons; 586-1x76-2x41-5; 3,565nhp.; 20knots; turbo-electric engines. The liner *Viceroy of India*, Capt. S. H. French, was serving as an

auxiliary transport during the Allied landings in French North Africa in November, 1942. At 4.15 a.m. on the 11th, after having disembarked her troops at Algiers, the vessel was returning with only 22 passengers on board when she was torpedoed and sunk by a submarine 34 miles off Oran. Four persons were killed.

VICKSBURG

Dominion Line; 1872; Macmillan & Co.; 2,484 tons; 326 -9 x 38-3x25-4; 300 n.h.p.; 12 knots; compound engines. The Dominion liner *Vicksburg* left Quebec for Liverpool on May 27th, 1875, with seven saloon and 25 steerage passengers and a crew of 59, making 91 persons all told. On May 30th the ship encountered masses of floating ice and lay-to all night. On the following morning she endeavoured to get away as the icefloes had increased in number and size and she was in imminent peri). Between 11 and 12 on the night of the 31st her sides were crushed, a large hole being knocked through her plates on the port quarter, and in backing away her propeller blades were broken by floating ice. The steam pumps were set going, but the water in the hold continued to gain and by 6 a.m. on June 1st the engine room was flooded.

All hope of saving the ship was now abandoned and the captain ordered out the boats, of which the *Vicksburg* carried seven, four being lifeboats. They were well provisioned, and five of them got away in safety, but shortly afterwards the first officer's boat capsized and all its occupants were drowned. The position of the ship when she sank was 120 miles S.E. of Cape Race.

One boat, with five of the crew, was picked up by the liner *State of Georgia* which took them to New York. A fishing smack picked up another boat and ultimately 44 persons were saved. The number drowned was 47, including the captain.

VICKY

Compania Naviera Lanena; 1930; J. Lewis & Sons; 760 tons; 171-5x36-7x12; triple-expansion engines. The Panamanian steamship *Vicky* left Sydney, N.S.W., on June 21st, 1956, for Melbourne with coal. On the evening of the 24th her engines were stopped to allow boiler repairs to be effected, but these proved to be beyond repair and the *Vicky* called for assistance as the weather was deteriorating. The British motorship *King David* arrived some four hours later and tried to take the *Vicky* in tow but the sea was too rough. By 5 a.m. on the 25th the *Vicky* was waterlogged and rolling badly, her lifeboat was smashed as soon as it was launched, as was a motor boat launched by the *King David*. Eventually 15 of the crew of 23 were saved by the use of lines just before she foundered about 60 miles from Wilson's Promontory.

VICTOLITE

Imperial Oil; 1928; A. Stephen & Sons; 11,410 tons; 510 -2 x 68-2x38; 995 n.h.p.; 11 knots; oil engines. The Canadian tanker *Victolite*, on a voyage from Halifax to Las Piedras, in ballast, was torpedoed and sunk by a German submarine on February 10th, 1942, about 400 miles W. of Hampton Roads. All the crew of 45 and both gunners were lost.

VICTOR DE CHAVARRI

Altos Homos de Vizcaya; 1891; E. Withy & Co.; 2,957 tons; 314-3x40-6x21 -1; 270 n.h.p.; triple-expansion engines. The Spanish steamship *Victor de Chavarri* was torpedoed and sunk by a German submarine in the English Channel on January 22nd, 1918.

VICTOR ROSS

British Mexican Petroleum Co.; 1933; Bremer Vulkan; 12,247 tons; 522x70-3x38-7; 1,560 n.h.p.; 12 knots; oilengines. The British tanker *Victor Ross*, on a voyage from Liverpool to New York, in ballast, was torpedoed and sunk by a German submarine on December 2nd, 1940, about 250 miles S.W. of Rockall. All the crew of 43 and the gunner were lost.

VICTORIA

London, Brighton & South Coast Railway Co.; 1878; John Elder & Co.; 534 tons; 221 •3x27-7x10-~6; 300 h.p.; 16 knots; compound inverted engines.

The paddle steamer *Victoria*, Capt. J. S. Clark, was employed on the run between Newhaven and Dieppe. On April 12th, 1887, she

left Newhaven with 94 passengers and a crew of 30 and on approaching the French coast ran into thick fog. From the distance he had travelled Capt. Clark was aware that he must be in the neighbourhood of the dangerous Pointe d'Ailly. He listened for the fog siren which he knew was on the lighthouse, but no sound reached him. He then checked his position as best he could be ascertaining from the engine room the number of revolutions the engines had made since entering the fog belt. The result convinced him that he was perilously close to shore, and he decided that he must be east of Dieppe. On that assumption he put about, but had scarcely proceeded on his fresh course when the vessel crashed on the rocks.

There was a certain amount of panic at first but the captain and ship's officers managed to restore order and to save most of the passengers on board. The total number of lives lost was 19.

It was revealed that the assistant lighthouse keeper at Pointe d'Ailly had neglected to light the boiler fires at the first approach of fog in order to provide steam for the fog siren. An hour was thus lost and it was during this time that the *Victoria* struck.

VICTORIA

Taylor & Sander son; 1882; Short Bros.; 2 J 28 tons; 290 -6X 40-1x20-2; 200 h.p.; compound engines.

The British steamship *Victoria* was wrecked at Scarfsferry, Pentland Firth, on March 4th, 1891, while on a voyage from Hamburg to New York carrying sugar and a general cargo.

VICTORIA

British Navy, 1st class battleship; 1887; Armstrong, Mitchell & Co.; 10,470 tons; 340x70x27-7; 14,244 i.h.p.; 17-2 knots; triple-expansion engines; two 16-25 in. guns, one 10 in., twelve 6 in., nine 6pdr., twelve 3 pdr., 6 m.g.

The *Victoria* was first laid down as the *Renown*, this name being later changed to *Victoria*. In June, 1893, she became the flagship of the Commander-in-Chief of the Mediterranean Fleet, Vice-Admiral Sir George Tryon, K.C.B. Tryon was an energetic and extremely scientific officer, who by reason of his resolute character, ability and tact in delicate situations had come to be looked upon as the outstanding British naval officer of his day.

At 10 a.m. on the morning of June 22nd the fleet left Beyrout for Tripoli. At 3.27 p.m., the fleet being disposed in two divisions line ahead, with six cables distance between the two columns, the Commander-in-Chief made the signal to invert the course of the columns by altering course 16 points inwards. The evolution was to be carried out by the leaders together, *Victoria* and *Camperdown*, flagship of Rear-Admiral Sir Albert Hastings Markham, followed by the rest in succession. The known distance at which it was possible for ships steaming in columns to execute this evolution was eight cables. The probability of disaster was therefore present in the minds of all the officers commanding ships. At the same time the frequent practices under what was known as the T.A. system had the effect of inducing the belief that Tryon's masterly seamanship would unfold to them some hitherto unpractised evolution.

Prior to this, at 2 p.m., the Admiral had sent for the Staff-Commander to bring the chart to his cabin, the Flag-Captain also being present. A short discussion on the course the ships were then steering took place, during which, on the Admiral's stating his intention to invert the columns at six cables distance, it was pointed out to him that this evolution should be carried out at eight cables. He accepted the correction, replying, "Yes, it shall be eight cables".

At 2.45 p.m. the Staff-Commander noticed that a signal had been made for the fleet to proceed with columns at six cables apart. Thinking that the Admiral had forgotten the previous decision he questioned the Flag-Lieutenant who showed him the order in the Admiral's writing. The Staff-Commander then asked the Flag-Lieutenant to seek further confirmation from the Admiral, which was done immediately, the reply being, "Keep the six cables up".

As previously stated the exact time when the fatal turn was ordered was 3.27 p.m. Rear-Admiral Markham leading the second division received the signal with deep misgiving, instructing his Flag-Lieutenant to delay acknowledgement. A further signal was then flown from the flagship, enquiring somewhat peremptorily, "What are you waiting for?". The reception of this on board *Camperdown* decided for Rear-Admiral Markham his course of action and he at once acknowledged both signals and prepared to obey.

The other ships in the fleet made a cautious attempt to follow the dangerous course of their leaders, but keeping instantly ready to avoid collision. In the meantime *Victoria* and *Camperdown* steaming at 8-8 knots endeavoured to carry out the evolution, *Victoria* turning in a slightly smaller circle than her opposite number. Both ships were of much the same tonnage and dimensions, *Camperdown* being 10,000 tons, with four heavy guns mounted in barbets, two fore and two aft.

At about 3.34 p.m. *Camperdown* struck *Victoria* on the starboard bow, about ten feet abaft the anchor, the angle between the lines of keel of the two ships being about 68°. The order to close watertight doors and to make ready the collision mat was given when collision was seen to be inevitable, but the volume of water rushing into *Victoria* was too great to be stemmed. The ship filled rapidly forward and refused to answer to her helm, though she managed to turn toward the shore and to proceed for a few minutes at a speed of seven knots.

The total length of time that the vessel remained afloat after the fatal collision was ten and a half minutes, and she sank in approximately 70 fathoms, being then about five miles from the shore. The weight of water, together with her heavy forward turret and guns caused her to sink rapidly by the head with a heavy list to starboard. She then turned completely over and went down, her propellers still revolving in the air.

The Admiral, 22 officers and 336 men were drowned and 25 officers and 259 men were saved, among the latter officers being Lt. Cdr. John Jellicoe afterwards commander-in-chief of the Grand Fleet at Jutland. Capt. the Hon. Maurice Archibald Bourke, R.N., in command, and Staff-Commander Hawkins-Smith were also saved. Before *Victoria* sank Admiral Tryon stated in the presence of the Staff-Commander and the Flag-Lieutenant that he accepted all blame for the disaster.

VICTORIA

G. Angelidis; 1881; M. Pearse & Co.; 1,388 tons; 250x34x19-5; 145 n.h.p.; compound engines.
The Greek steamship *Victoria* was sunk by a submarine in the Mediterranean on February 26th, 1917.

VICTORIA

Ch. N. Pateras & Co.; 1914; J. Readhead & Sons; 4,202 tons; 370-2x51-6x25; 386 n.h.p.; triple-expansion engines. The Greek steamship *Victoria* was bombed and sunk by German aircraft on October 30th, 1940, about 100 miles W. of the Fastnet on a voyage from Durban to Belfast.

VICTORIA

Lloyd Triestino Soc. Anon. di Nav.; 1931; Cantieri Riuniti DelVAdriatico; 13,098 tons; 540-6x69-9x30-9; 4,025 n.h.p.; oil engines.
The Italian liner *Victoria* was torpedoed and sunk by British aircraft on January 24th, 1942, off the Gulf of Sirte, Libya.

VICTORIA CITY

Reardon Smith Line; 1929; W. Gray & Co.; 4,739 tons; 400-4x54-2x25-6; 258 n.h.p.; quadruple-expansion engines. The British cargo ship *Victoria City* sailed from New York on November 17th, 1940, with a crew of 43 and a cargo of steel on a voyage to London. She called at Halifax, N.S., and left there on November 21st. The *Victoria City* was sighted N. of Ireland on December 2nd, but nothing more was heard of the ship until wreckage identified with her was found on December 8th off Portstewart.

VICTORIA DE LARRINAGA

Larrinaga & Co.; 1909; Russell & Co.; 4,648 tons; 405-1x52x25-6; 470 n.h.p.; triple-expansion engines. The British cargo ship *Victoria de Larrinaga* was wrecked on Mouchoir Bank, Turk's Island, on April 30th, 1922, while on a voyage from Cienfuegos to the United Kingdom carrying a cargo of sugar.

VIDAR

Det Forenede D/S; 1915; Burmeister & Wain; 1,353 tons; 252-7x37x16-9; 233 n.h.p.; triple-expansion engines. The Danish steamship *Vidar* was bombed and sunk by German

aircraft on January 31st, 1940, about 100 miles E. of the Moray Firth on a voyage from Grimsby to Esbjerg. Sixteen of the crew were lost.

VIENNA

Gow, Harrison & Co.; 1899; Barclay, Curie & Co.; 4,170 tons; 376-2x48x26-2; 311 n.h.p.; 9-5 knots; triple-expansion engines.
The steamship *Vienna* was torpedoed and sunk by a German submarine 340 miles W. i N. of Ushant on September 11th, 1917. Twenty-five men were killed. The captain was taken prisoner.

VIGILANCIA

Gas ton, Williams & Wigmore Inc.; 1890; Delaware River Co.; 4,115 tons; 321-8x45-2x26-5; 339 n.h.p.; triple-expansion engines.
The American steamship *Vigilancia* was torpedoed and sunk by a German submarine off Ushant on March 16th, 1917.

VIGO

Hamburg Sud-Amerika Linie; 1922; Howaldtswerke; 7,358 tons; 413-3x60x36-1; 585 n.h.p.; triple-expansion engines & L.P. turbine.
The German steamship *Vigo* struck a mine and sank on March 6th, 1944, in the River Weser.

VIGRID

A. van der Lippe; 1915; Bergens Mek. Vcerksted; 1,617 tons; 244'5x37-6x15-8; 116 n.h.p.; triple-expansion engines. The Norwegian steamship *Vigrad* was torpedoed and sunk by a German submarine in the English Channel on December 31st, 1917.

VIGRID

Skibs-A/S Gdynia; 1923; Deutsche Werft A.G.; 4,765 tons; 400-6x54-2x26-3; 717 n.h.p.; oil engines. The Norwegian motorship *Vigrad* was torpedoed and sunk by a German submarine on June 24th, 1941, about 400 miles S.E. of Cape Farewell on a voyage from New Orleans to Belfast. Twenty-two of the crew and four passengers were lost.

VIIU

A. Inkapool and others; 1917; Wood, Skinner & Co.; 1,908 tons; 270-6x38-2x14-5; 202 n.h.p.; triple-expansion engines. The Estonian steamship *Viiu* struck a mine and sank on May 11th, 1940, near the West Hinder Buoy soon after leaving Antwerp for Miami. Five survivors landed in Holland.

VIKEN

J.M. Dannberg; 1916; Lindholmens Mek. Verkstad; 1,825 tons; 262 x 42 - 7 x 18 -1; 214 n.h.p.; triple-expansion engines. The Swedish steamship *Viken* was torpedoed and sunk by a German submarine off the N. coast of Scotland on May 17th, 1917.

VIKING

British Navy, destroyer; 1909; Hawthorn Leslie & Co.; 1,000 tons; 15,500 i.h.p.; 33 knots; turbine engines; Yarrow boilers; two 4 in. guns, 2 T. T.
The destroyer *Viking*, Cdr. T. C. H. Williams, was convoying troops to France on January 29th, 1916, when she struck a mine and sank with many of her complement of about 90, including Cdr. Williams.

VIKING

Inter-Island S.S. Co.; 1920; Rolph S.B. Co.; 1,210 tons; 214x 44-9x17-1; 106 n.h.p.; triple-expansion engines. The American wooden steamship *Viking*, Capt. Charles Ohlsen, on a voyage from Manila to Davao with a cargo of petrol in drums, caught fire and was completely destroyed on April 28th, 1929, between Masbate and Cebu. Capt. Ohlsen and 16 of the crew were killed, 12 survivors, some badly burned, were picked up some time later.

VIKING

Bowring Bros.; 1881; Arendal; 586 tons; 154-3x31-8x17-7; 86 r.h.p.; compound engines.
The Canadian wooden barquentine *Viking*, Capt. Abram Kean, was on a sealing expedition off the north coast of Newfoundland,

with a crew of 138, two stowaways and a film unit with an unspecified number of technicians. At 9 p.m. on March 15th, 1931, the after part of the ship was wrecked by the explosion of gunpowder carried in the after hold, and she began to sink. Boats could not be used as the ship was surrounded by ice floes and a storm was in progress, so the crew disembarked on to the ice. Some made their way to Horse Island, ten miles away in White Bay, which, however, offered scarcely more shelter than the ice. During the next three days the steamships *Prospero* and *Sagona* forced a passage through the ice and took off 126 survivors, many of them suffering from frostbite.

VIKING

Aabenraa Rederi-A/S.; 1893; *Flensburger Schiffsbau Ges.*; 1,153 tons; 231-3x34-3x13*7; 106 n.h.p.; triple-expansion engines.

The Danish steamship *Viking* was torpedoed and sunk by a German submarine on March 20th, 1940, about 28 miles from Wick on a voyage from Frederikshavn to Blyth. Fifteen of the crew of 17 were lost.

VIKING STAR

Blue Star Line; 1920; *Napier & Miller*; 6,445 tons; 400-3x 52-3x28-5; 517 n.h.p.; 13 knots; triple-expansion engines. The steamship *Viking Star*, Capt. J. E. Mills, on a voyage from Buenos Aires to the U.K., was torpedoed and sunk by a German submarine on August 25th, 1942, 160 miles S.S.W. of Freetown. Capt. Mills and 32 of the crew were lost.

VIKNOR

The Admiralty; 1888; *Napier & Miller*; 5,386 tons; 421-2 X 50x25; 647 n.h.p.; 14 knots; triple-expansion engines. The auxiliary cruiser *Viknor* was formerly *The Viking*, owned by the Viking Cruising Co., and in January 1915 was a unit of the 10th Cruiser Squadron. The ship carried a complement of 22 officers and 273 ratings and was commanded by Cdr. E. p. Ballantyne. She was lost off Tory Island on January 13th, 1915, in very rough weather, all those on board being drowned. Large quantities of wreckage and many dead bodies were washed ashore along the North coast of Ireland. No details of the disaster could be obtained by the Admiralty, although it was known that the *Viknor* was in the vicinity of a freshly sown German minefield.

VILJA

H. Ditlev-Simonsen & Co.; 1915; *Stavanger Stoberi & Dok*; 1,149 tons; 237x33-2x14-5; 127 n.h.p.; triple-expansion engines.

The Norwegian steamship *Vilja* was torpedoed and sunk by a German submarine off the south west coast of Ireland on April 5th, 1917.

VILLAREAL

McNabb, Rougier & Co.; 1903; *Schiffswerft von Henry Koch*; 2,110 tons; 261-6x38-7x17-2; 151 n.h.p.; triple-expansion engines.

The British cargo ship *Villareal* suddenly capsized and sank eight miles E. of Norderney on July 26th, 1923, while on a voyage from Trangsund to London carrying a cargo of timber. The ship had run ashore on the previous day and was towed off by two tugs.

VILLE D'ARLON

Societe Maritime Anversoise; 1920; *American International Shipbuilding Corp.*; 7,555 tons; 436-9x58-2x26-4; 6,000s.h.p.; 13-5 knots; turbine engines.

The Belgian steamship *Ville d'Arlon*, Capt. Albert Wilding, left New York on November 15th, 1940, and Halifax on the 21st for Liverpool. At 1.30 a.m. on December 2nd, she was observed showing "not under control" lights and dropped astern of the convoy. Nothing more was ever heard of the ship or her crew of 52.

VILLE DE BORDEAUX

Cie. Havraise Peninsulaire de Nav. a Vapeur; 1911; *Forges & Chantiers de la Mediterranee*; 4,857 tons; 351-5x46-6x24-9; 331 n.h.p.; triple-expansion engines.

The French steamship *Ville de Bordeaux* was torpedoed and sunk by a submarine in the Mediterranean on January 18th, 1918.

VILLE DE BRUGES

Societe Maritime Anversoise; 1921; *New York S.B. Corp.*; 13,869 tons; 516-5x72*2x27-8; turbine engines. The Belgian liner *Ville de Bruges* was bombed and set on fire by German aircraft on May 14th, 1940, in the Scheldt, during the German invasion of the Netherlands. The ship was bound for New York with a large number of refugees on board, many of whom were killed. One member of the crew was shot by the Germans as a spy.

VILLE DE CALAIS

P.Paix & Co.; 1887; *W.G.Armstrong*; 1,221 tons; 260x 37x20-5; 160 n.h.p. The steamship *Ville de Calais*, with a cargo of petroleum from America, blew up at 7 p.m. on Tuesday, October 16th, 1888, in the dock basin at Calais. Four men were killed and many injured. Capt. Blondel was in his cabin at the time and was unhurt.

VILLE DE DIEPPE

Acties. Union; 1888; *Oswald, Mordaunt & Co.*; 1,254 tons; 217-2x36-4x21.

The Norwegian sailing ship *Ville de Dieppe* was sunk by a German submarine off Ushant on April 21st, 1917.

VILLE DE DJIBOUTI

Compagnie Havraise Peninsulaire de Nav. a Vap.; 1914; *Russell & Co.*; 4,377 tons; 387-9x54x25-9; 428 n.h.p.; triple-expansion engines.

The French steamship *Ville de Djibouti*, on a voyage from Havre to Tamatave, was wrecked on April 19th, 1928, at Mananjary, Madagascar.

VILLE DE GAND

Societe Maritime Anversoise; 1920; *American International S.B. Corp.*; 7,590 tons; 436-9x58-2x26-4; 1,259 n.h.p.; turbine engines.

The Belgian steamship *Ville de Gand*, Capt. Raoul Carlier, was torpedoed and sunk by a German submarine on August 18th, 1940, about 200 miles W. of Ireland on a voyage from Liverpool to New York. Capt. Carlier and 14 others were lost.

VILLE DE LA CIOTAT

Messageries Maritimes; 1892; *Messageries Maritimes*; 6,431 tons; 485-8x49-9x36-8; 819 n.h.p.; 13knots; triple-expansion engines.

The liner *Ville de la Ciotat* was built in 1892 for the Australian trade in which her three sister ships, the *Armand JBehic*, *Australien* (which see) and *Polynesian* had already established a reputation. During the First World War the vessel went on the Far Eastern run and on December 24th, 1915, was returning from Japan to Marseilles when she was torpedoed by an Austrian submarine off Crete. The attack took place at about 10 a.m. and the liner sank very rapidly. She had 135 passengers on board with a crew of 181. Thirty-five passengers, 22 European members of the crew and 23 lascars, a total of 80, were either killed by the explosion or drowned.

Most of the survivors were picked up by the British steamship *Meroe* which cruised around for about an hour and a half, finally landing 208 persons at Malta. The remainder were rescued by other vessels.

VILLE DE LIEGE

Societe Maritime Anversoise; 1920; *American International Shipbuilding Corp.*; 7,430 tons; 436-9x58-2x35-9; 1,295 n.h.p.; 13-5 knots; turbine engines.

The Belgian steamship *Ville de Liege*, Capt. C. P. Peterson, was torpedoed and sunk by a German submarine on April 13th, 1941, about 700 miles E. of Cape Farewell on a voyage from New York to Liverpool. Capt. Peterson and ten of the crew were the only survivors.

VILLE DE MALAGA

E.Hulin; 1882; *Blumer & Co.*; 1,464 tons; 240x34-1x15-1; 175 n.h.p.; compound engines.

The French steamship *Ville de Malaga* was wrecked on the Casquets, Channel Islands, on August 14th, 1897. Seven of the crew were drowned.

VILLE DE NAMUR

Societe Maritime Anversoise; 1921; American International S.B. Corp.; 7,463 tons; 436-9x58-2x35-9; 1,290 n.h.p.; turbine engines.

The Belgian steamship *Ville de Namur* was torpedoed and sunk by a German submarine on June 19th, 1940, on a voyage from New York to Bordeaux. Twenty-five of the crew were lost.

VILLE DE ROUEN

Soc. Anon. de Vapeur Longs Courriers; 1903; Forges & Chantiers de la Mediterranee; 4,721 tons; 354-4x47-6x27-3; 348 n.h.p.; triple-expansion engines.

The French steamship *Ville de Rouen* was torpedoed and sunk by a submarine in the Mediterranean on July 18th, 1916.

VILLE DE ST. NAZAIRE

Compagnie Generale Transatlantique; 1870; Chantiers de VOcean; 2,640 tons; 285-4x41-6x19-9; SOOn.h.p.; 11-5 knots; compound engines.

The French liner *Ville de St. Nazaire*, Capt. Jaqueneau, left New York on March 6th, 1897, for the West Indies with nine passengers and 74 crew. On the first day out the vessel sprang a small leak but it was not considered sufficiently serious to warrant a return to port and the voyage was continued. The following day the water increased in volume and at nightfall on the 8th the liner encountered a hurricane off Cape Hatteras. After some hours the captain gave orders to abandon ship and several boats got away. One of these, containing the third engineer, the doctor, Inspector Barri of the Transatlantique company and one passenger, was picked up seven days later by the American schooner *Hilda*, which brought them to New York. Thirty-four other occupants of the boat had died from thirst and exposure. At about the same time the steamship *Yanariva* picked up another boat containing 14 people.

VILLE DE STRASBOURG

Cie. des Bateaux a Vapeur du Nord; 1889; J. de Decker Cz.; 2,167 tons; 247-5x32x22-5; 142 n.h.p.; triple-expansion engines.

The French steamship *Ville de Strasbourg* was torpedoed and sunk by a submarine in the Mediterranean on September 6th, 1917.

VILLE DE TAMATAVE

Ministry of War Transport (A. Holt & Co.); 1931; Ateliers et Chantiers de la Seine; 6,276 tons; 392 - 9 x 53 - 6 x 27 - 6; 370 n.h.p. 11 knots; triple-expansion engines.

The French liner *Ville de Tamatave*, Capt. G. Dault, was taken over by the Ministry of War Transport in June, 1940, after the capitulation of France. She left Cardiff in ballast on January 7th, 1943, for New York but early on January 24th reported from lat. 50° 17' N., long. 40° 55' W. that her rudder had broken during a gale and that she was sinking. She carried a crew of 71 and 17 passengers.

VILLE DE THANN

Groupement Industrie! de Charbons & de Transports; 1880; R. Duncan & Co.; 1,416 tons; 244-6x34-1x 15-7; 153 n.h.p.; compound engines.

The French steamship *Ville de Thann* struck a mine and sank in the English Channel on November 27th, 1917.

VILLE DE VALENCIENNES

Cie. des Bateaux a Vapeur du Nord; 1897; J. Readhead & Sons; 1,734 tons; 274 X 35 -1 x 16-1; 234 n.h.p.; triple-expansion engines.

The French steamship *Ville de Valenciennes* was torpedoed and sunk by a German submarine in the North Sea on September 22nd, 1917.

VILLE DE VERDUN

Cie. Havraise Peninsulaire de Nav. a Vapeur; 1917; North of Ireland S.B. Co.; 4,576 tons; 350-4x51-3x25-8; 462 n.h.p.; triple-expansion engines.

The French steamship *Ville de Verdun* was torpedoed and sunk by a submarine in the Mediterranean on February 6th, 1918.

VILLE DE VICTORIA

Chargeurs Reunis; 1883; Ateliers & Chantiers de la Loire; 2,548 tons; 310x37-3x27; 1,400h.p.; compound engines. The French liner *Ville de Victoria*, with passengers, was lying at anchor off Lisbon on the night of December 23rd, 1886. At 5 a.m. on the 24th the British ironclad warship *Sultan*, moored nearby, parted from her anchors and was carried by the ebb tide on to the *Ville de Victoria*. The liner sank with the loss of 32 lives, the ironclad suffered no appreciable damage.

VILLE DU HAVRE

Compagnie Generale Transatlantique; 1866; Thames Ironworks; 3,950 tons; 363-4x46x32-7; 3,570 i.h.p.; 13-12 knots; side-lever engines (as paddle steamer); 5,100 tons; 413 X — X —;(as screw steamer).

The French liner *Ville du Havre*, Capt. M. Surmonte, was built as the *Napoleon III*, a paddle steamer. In 1872 she was rebuilt as a screw steamship by Andrew Leslie & Co., Tyne, and her length was increased by 50 feet. She sailed from New York on November 15th, 1873, with 313 persons on board. After a week's steaming, when well across the Atlantic, she collided with the iron clipper *Loch Earn*, 1,200 tons, Capt. Robertson, at about 2 o'clock on the morning of the 22nd, it being dark but clear. At the time the French vessel was proceeding under steam and canvas at about 12 knots. The steamship's main and mizzen masts snapped off smashing two of the liner's boats and killing several people. There was a considerable amount of panic on board as the passengers, suddenly roused from sleep, rushed on deck. The time for saving life was very short as the ship was in a bad way. Capt. Robertson did all he possibly could to rescue the drowning and eventually 61 passengers and 26 of the crew were taken on board the *Loch Earn*.

The *Ville du Havre* sank some 12 minutes after the collision, taking with her 226 persons.

The *Loch Earn* was badly damaged and next day the survivors were transferred to the American vessel, *Tremontain*, Capt. Urquhart, and taken to Cardiff. The *Loch Earn* continued her voyage but on November 28th she was in a sinking condition and was abandoned by her crew. Her boats were later picked up by the *British Queen* with no loss of life.

VIMEIRA

Gow, Harrison & Co.; 1927; R. Duncan & Co.; 5,728 tons; 410-1x54 -5x30-1; 567 n.h.p.; 11 knots; triple-expansion engines.

The tanker *Vimeira*, Capt. N. R. Caird, was torpedoed by a German submarine on August 11th, 1942, approximately 500 miles S.W. of the Cape Verde Islands, and then sunk by gunfire. One lifeboat under charge of the second officer, Mr. Duncan Campbell, containing 16 men was picked up by the British steamship *Sylvia de Larrinaga* two days later, but this vessel was torpedoed shortly afterwards and the *Vimeira's* men got away in the same lifeboat. After a voyage of 29 days, during which time they suffered great hardship from exposure and lack of drinking water, they were picked up by the Norwegian motorship *Stranger* and landed at Takoradi without loss. A further four survivors landed at Takoradi, but 19 of the crew and four gunners were lost.

Mr. Campbell was awarded the M.B.E. for his fine seamanship while in charge of the boat and Apprentice Ian MacKinnon was commended for his cheerfulness and unselfish example during the 29 days adrift.

Capt. Caird, who commanded the *Virgilia* when she was torpedoed by a motor torpedo boat in November, 1941, was taken prisoner and spent 52 days on board the submarine before reaching Germany.

VIMIERA

British Navy, destroyer; 1917; Swan, Hunter & Wigham Richardson; 900 tons; 312x29-5x10-9; 27,000 s.h.p.; 34 knots; turbine engines; Yarrow boilers; four 4 in. guns, one 2pdr., 5 m.g. The destroyer *Vimiera*, Lt. Cdr. Mackenzie, R.N.R., struck a mine and sank off the Nore on January 9th, 1942. One officer and 90 ratings were killed and one officer wounded.

VINAES

S. & J. Lothe; 1916; Helsingors Jernskibs & Maskin.; 1107 tons; 230 x 35-5 x—; 83n.h.p.; triple-expansion engines. The Norwegian steamship *Viruses* was torpedoed and sunk by a German submarine in the English Channel on June 8th, 1917.

VINCENNES

United States Navy, heavy cruiser; 1936; Bethlehem Steel Co., Quincy; 9,400 tons; 588x61-9x18-7; 107,000 s.h.p.; 32 knots-turbine engines; Babcock & Wilcox boilers; nine 8 in. guns, eight 5 in., two 3 pdr., 10 smaller, 4 aircraft.

The U.S. heavy cruiser *Vincennes* was one of a group of three such warships covering the transports disembarking troops on the island of Guadalcanal, in the Solomons, on August 7th-9th, 1942. In the early morning of the 9th Japanese naval forces from the vicinity of Savo Island made a determined attack on the transports, assisted by flares dropped from aircraft. The attack upon the first Allied group was repelled, although the Australian heavy cruiser *Canberra* was sunk. The Japanese then took avoiding action, making for the N.E. passage past Savo Island. Here they met the U.S. heavy cruisers *Astoria*, *Quincy* and *Vincennes* and a brisk action at torpedo range and a little beyond took place. The Japanese were again driven off but the three American cruisers were so badly damaged that they sank during the night or the next morning.

The *Vincennes* carried a complement of about 700, most of whom were saved. The transports suffered neither damage or casualties.

The full story of the action, which was known as the battle of Savo Island, is told under the U.S. heavy cruiser *Astoria*.

VINCENT

New England Ship Co.; 1894; A. McMillan & Son; 1,904 tons; 267x40-1x23-6.

The American sailing ship *Vincent* struck a mine and sank in the Arctic on September 27th, 1915.

VINCENT

U.S. Maritime Commission; 1919; Federal S.B. Co.; 6,210 tons; 395-5x55x31-4; 619 n.h.p.; turbine engines. The American steamship *Vincent* was sunk by two Japanese raiders in 25° 41' S., 118° 19' W., on December 12th, 1941.

VINCENZO GIOBERTI

Italian Navy, destroyer; 1936; Odero-Temi-Orlando; 1,729 tons; 350-5x33-5x12; 48,000 s.h.p.; 39 knots; turbine engines; 3-drum boilers; four 4-7 in. guns, four 37 mm.A.A., four 13 mm.A.A., 6 T.T.

The destroyer *Vincenzo Gioberti* was off Spezia on August 9th, 1943, when she was torpedoed and sunk by the British submarine *Simoon*. The vessel carried a complement of about 200.

VINCENZO ORSINI

Italian Navy, torpedo boat; 1916; Odero; 669 tons; 238x24x 9-2; 15,500 s.h.p.; 30 knots; turbine engines; Thornycroft boilers; six 4 in. guns, two 40 mm.A.A., 4 m.g., 4 T.T., 10 mines.

The torpedo boat *Vincenzo Orsini* was a unit of the flotilla of destroyers and torpedo boats which Italy maintained to defend her East African colony of Eritrea. When the British army marched into the colony and occupied the capital the flotilla scattered but was eventually located by air reconnaissance and destroyed ship by ship. The *Vincenzo Orsini* was scuttled by her crew off Massawa on April 10th, 1941. She carried a complement of just over 100.

VINDEGGEN

Jens Folkman; 1895; Tyne Iron S.B. Co.; 2,610 tons; 306x 42x18-8; 257 n.h.p.; triple-expansion engines. The Norwegian steamship *Vindeggen* was sunk by a submarine in the Mediterranean on September 27th, 1916.

VINDOMORA

William Monroe; 1873; J. L. Thompson & Sons; 1,054 tons; 219'8x30'4x16-8; 99 r.h.p.; compound engines. The British steamship *Vindomora* sank after a collision with the steamship *St. Simon*, whose rudder had jammed, near Rouen on November 27th, 1899, while on a voyage from Swansea to Rouen carrying a cargo of coal.

742

VINE BRANCH

Nautilus Steam Shipping Co.; 1896; W. Doxford & Sons; 3,442 tons; 340-2x45-6x24-5; 300 n.h.p.; 9-5 knots; triple-expansion engines.

The steamship *Vine Branch* was torpedoed and sunk by a German submarine on, or about, April 11th, 1917. All the crew, numbering 44, were lost with the vessel.

VINGALAND

Angf./A/BTirfing; 1935; Eriksbergs Mek. Verkstad; 2,734 tons; 339-1x48-6x19-6; 644 n.h.p.; oilengines. The Swedish motorship *Vingaland* was bombed, set on fire and sunk by a German aircraft on November 8th, 1940, about 400 miles N.W. of Ireland, with the loss of six lives.

VINGORLA

British India Steam Navigation Co.; 1875; Caird; 578 tons; 201 X 25 -1 X14 - 3; 120 h.p.; 10 knots; compound inverted engines.

The British India steamship *Vingorla* was employed in the Indian coastal trade. At about noon on February 28th, 1879, she left Bombay for Karachi with some 190 persons on board under Capt. Stewart. When 70 miles N. of Bombay she sprang a leak in the main hold, the sea being calm. After remaining afloat for two hours, during which time the water continued to gain despite the pumps, the *Vingorla* sank in 20 fathoms. The time was 9.30 p.m. and prior to the foundering of the ship the native crew showed signs of panic and some of them rushed the boats.

The loss of life amounted to 68 persons, including the captain, deck officers and all the engineers. One boat was lost in launching but others, containing first and second class passengers for the most part, got away in safety.

VINIFREDA

"LaFlecha"; 1889; J. Blumer & Co.; 1,441 tons; 250x32-2x 13; 163 n.h.p.; triple-expansion engines.

The Spanish steamship *Vinifreda* was torpedoed and sunk by a German submarine in the Bay of Biscay on April 30th, 1916.

VINLAND

O. & A. Irgens; 1906; Bergens Mek. Vcerksted; 1,143 tons; 228'8x35-2x15-1; 144 n.h.p.; triple-expansion engines.

The Norwegian steamship *Vinland* was sunk by a German submarine in the Western Atlantic on June 7th, 1918. *

VINOVI

Cunard S.S. Co.; 1906; Short Bros.; 7,046 tons; 418-2X 54-4x37-2; 539 n.h.p.; 12 knots; quadruple-expansion engines.

The steamship *Vinovia* was torpedoed and sunk by a German submarine eight miles S. of the Wolf Rock on December 19th, 1917. Nine men were killed, the captain was among the survivors.

VIOLA

W. Coupland & Co.; 1879; Tyne Iron S.B. Co.; 1,900 tons; 280 x 35x24- 7; 185 n.h.p.; compound engines. The British steamship *Viola* was wrecked at Kettleless Point, near Whitby, on September 19th, 1903, in thick fog. She was carrying a cargo of iron ore on a voyage from Carthage to the Tees.

VIOLANDO N. GOULANDRIS

Goulandris Bros.; 1919; Rotterdam Droogdok Maats.; 3,598 tons; 361-4x49-8x22; 310 n.h.p.; triple-expansion engines. The Greek steamship *Violando N. Goulandris* was torpedoed and sunk by a German submarine on June 10th, 1940, off Cape Finisterre on a voyage from Rosario to Waterford, with wheat. Six of the crew were killed.

VIOLET

Royal Dover Steam Packet Co.; 1843; British Isles; 292 tons; 139 x 21x11; 128 h.p.; 12 - 75 knots; oscillating engines. The cross-channel paddle steamer *Violet*, Capt. Lynes, left Ostend in a gale on Monday, January 5th, 1857. She carried the mail and one passenger, the others leaving the ship before she started owing to the rough weather. All told she had 19 persons on board, all of whom were drowned when the *Violet* struck on the Goodwin Sands

and was pounded to pieces. The mail was thrown overboard and was recovered later.

The next day a passing ship descried the wreck almost buried in the sands, only her paddle boxes showing at low water.

VIPER

British Navy, destroyer; Hawthorn Leslie & Co.; 350 tons; 210X21x12-5; 10,000 i.h.p.; 36-58 knots; turbine engines; one 12 pdr. gun, five 6 pdr., 2 T. T.

The destroyer *Viper*, under command of Lt. Cdr. Speke, was engaged in scouting off Alderney during naval manoeuvres. On Saturday, August 3rd, 1901, she ran into thick fog and reduced speed, but did not stop. Shortly afterwards she struck on the Renoquet Rock, Alderney, and broke in two amidships, the bow portion swinging round at right angles to the stern, and the stern portion rolling over from the force of the impact. The crew had a miraculous escape, no lives being lost.

VIRENT

James Westoll; 1880; Short Bros.; 1,676 tons; 260x36-1x19; 160 h.p.; compound engines.

The British steamship *Virent* left Sulina on March 6th, 1890, for Liverpool, with a crew of 24 and a cargo of wheat. On the 20th her propeller shaft broke during a heavy gale in the Bay of Biscay. The British steamship *Trekieve*, which happened to be near by, took her in tow and made for Ferrol. When nearing that port on the 22nd, however, the towing hawser parted, and the *Virent* sank soon afterwards. The crew put off in two boats, the captain and eight men in one boat landed safely but the other boat with the mate and 14 men capsized on landing and nine men were drowned.

VIRGILIA

Gow, Harrison & Co.; 1927; Greenock Dockyard Co.; 5,723 tons; 410-3x54-5x30-1; 565 n.h.p.; 11 knots; triple-expansion engines.

The tanker *Virgilia*, Capt. N. R. Caird, was torpedoed, set on fire and sunk by a German motor torpedo boat three miles N.E. of Hearty Knoll Buoy on November 24th, 1941. Twenty-three of the crew were killed. The survivors numbered 22, including Capt. Caird.

VIRGINIA

F. Hoods; 1888; Russell & Co.; 2,314 tons; 289-8x38-1 x 19-4; 228 n.h.p.; triple-expansion engines.

The British steamship *Virginia* was wrecked on Diamond Shoals, Cape Hatteras, on May 2nd, 1900, while on a voyage from Santiago, Cuba, to Baltimore carrying a cargo of iron ore. The crew put off in two boats, one of which was swamped and six men drowned, the remaining five men managed to get back on to the wreck and were eventually rescued by breeches buoy. The other boat with 15 men was picked up a day or so later.

VIRGINIA

A. Fokias; 1874; M. Pearse & Co.; 1,159 tons; 235x31-1x 17-5; 124 n.h.p.; triple-expansion engines.

The Greek steamship *Virginia* struck a mine and sank in the Mediterranean in June, 1915.

VIRGINIA

National Bulk Carriers; 1941; Welding Shipyards Inc.; 10,731 tons; 501-2x70x38-5; turbine engines.

The American tanker *Virginia*, bound from Baytown for Baton Rouge with 180,000 barrels of gasoline, was torpedoed and sunk by a German submarine on May 12th, 1942. Fourteen of the crew were lost.

VIRGINIA S.

German Government; 1905; W. Pickersgill & Sons; 3,885 tons; 392 X 47 - 4 X 23 - 5; 423 n.h.p.; triple-expansion engines.

The steamship *Virginia S.* was formerly Greek, seized by the Italians and later taken over by the Germans. On October 23rd, 1941, she was torpedoed and sunk by a British submarine N. of Corfu.

VIRGINIA SINCLAIR

Sinclair Refining Co.; 1930; Bethlehem S.B. Corp.; 6,151 tons; 416-5x57-1x31-9; 996 n.h.p.; turbine engines. The American tanker *Virginia Sinclair*, outward bound from Galveston with 66,000 barrels of gasoline, was torpedoed and sunk by a German submarine on March 10th, 1943. Seven of the crew were lost.

VIRIBUS UNITIS

Austrian Navy, dreadnought battleship; 1911, Stabilimento Tecnico; 20,000 tons; 500x89-5x27; 25,000 i.h.p.; 21 knots; turbine engines; Yarrow boilers; twelve 12 in. guns, twelve 6 in., eighteen 12pdr., 4 T.T.

The Austrian dreadnought *Viribus Unitis* was lying off Pola on the night of October 31st, 1918. The Austrian High Command had petitioned the Italians for an armistice and there was every sign that constituted authority within the Austrian Empire was dissolving. Under these conditions the Italians assumed that discipline in the Austrian navy would be relaxed, if not entirely non-existent. Two Italian naval officers therefore made an entry into Pola harbour on a strange craft. This was nothing less than a torpedo, contrived so that it would carry two men in inflated rubber suits. The officers were favoured by the weather which was very dark with frequent heavy rain, and they reached the battleship *Viribus Unitis* without discovery. Here they attached a large bomb to the hull of the ship, but were discovered and captured. Their captors informed them that the Austrian navy had been transferred to Jugo-Slavia and that for them the war was over. The Italians in turn divulged the presence of the bomb, which was timed to explode before morning. The battleship was hurriedly abandoned and soon after she blew up and sank, but without loss of life.

VIS

Brodarsko Akcionarsko Društvo Oceania; 1921; Dunlop, Bremner & Co.; 1,772 tons; 260-4x41-2x18-5; 182 n.h.p.; triple-expansion engines. The Yugoslav steamship *Vis* struck a mine and sank on February 13th, 1946, off the coast of Yugoslavia.

VISCAYA

Spanish Navy, armoured cruiser; 1891; Bilbao Dockyard; 6,889 tons; 340 x65x21-5; 13,000 i.h.p.; 21 knots; triple-expansion engines; two 11 in. guns, ten 5-5 in., two 2-7 in., eight 2-2 in., four 1-4 in., 2 m.g., 6 T.T.

The armoured cruiser *Viscaya*, Capt. A. Eulate, was a unit of the Spanish Atlantic Squadron, under Admiral Cervera, during the American-Spanish War. The ship had a complement of 491. In April 1898 she accompanied the squadron, which consisted of four armoured cruisers and two destroyers, to Santiago, Cuba. Here the ships lay inactive for a period of six weeks while a very powerful American fleet waited outside. By July 3rd the Spaniards could no longer count their anchorage secure owing to the approach of enemy troops, and a sortie was made at 9.30 on the morning of that day in the hope of reaching Havana.

In the fight which ensued the *Viscaya* came under the heavy fire of the U.S. battleship *Iowa* and the armoured cruiser *Brooklyn*. Her coal bunkers were set on fire and she was badly knocked about, but turned to torpedo the *Brooklyn*, the fastest American ship, in the hope of holding up the pursuit and enabling her consort, the *Cristobal Colon*, to escape. The attempt ended in disaster, for a shell struck the torpedo tube as the torpedo was about to be discharged, blowing up the whole of the fore part of the ship. Capt. Eulate was compelled to run his blazing ship, ashore having sustained a loss of life approximating to 200 officers and men. The position of the ship when she struck was off Aserradores, 15 miles from Santiago, and her destruction had been completed in one hour and forty-five minutes from the commencement of the action. The full story of the battle is told under the *Infanta Maria Teresa*, the flagship, which was destroyed with the rest of the Atlantic Squadron.

VISTULA

Rederi-A/B Sylvia; 1919; De Haan & Oerlemans; 1,018 tons; 214 x34-8x13-1; 90 n.h.p.; triple-expansion engines. The Swedish steamship *Vistula* was torpedoed and sunk by a German submarine on October 8th, 1939, 45 miles from Muckle

Flugga on a voyage from Gothenburg to Hull. Nine of the crew were lost.

VISURGIS

ArgoReederei; 1926; *G. Seebeck A.G.*; 1,306 tons; 231 -2 x 37-8x15; 115 n.h.p.; triple-expansion engines. The German steamship *Visurgis*, on a voyage from Rotterdam to Riga, was sunk by collision with the Italian steamship *Siena*, 3,222 tons, on May 20th, 1937, off Terschelling

VITAL DE OLIVEIRA

Brazilian Government, survey vessel; 1910; *Ailsa Shipbuilding Co*; 1,300 tons; 270 x 42x14; 540 h.p.; 9 knots; triple-expansion engines; two 4 in. guns, two 6pdr. The survey vessel *Vital de Oliveira* was employed as a naval auxiliary in the Second World War. On July 20th, 1944, she was torpedoed and sunk by a German submarine off Cabo Frio. Some 70 men, the greater part of the complement, were saved.

VITTORIA

British Navy, destroyer; 1917; *Swan, Hunter & Wigham Richardson*; 1,367 tons; 312x29x11; 27,000 s.h.p.; 34 knots; turbine engines; *Yarrow* boilers; four 4 in. guns, one 3 in., 4 T.T. The *Vittoria* was a unit of a destroyer flotilla operating against the Russian Bolsheviks in the Baltic in 1919. On September 1st the ship was torpedoed and sunk by a Russian submarine in the Gulf of Finland. Her official complement was 110.

VITTORIA CLAUDIA

Januense Societa di Navigazione; 1905; *A. G. Neptun*; 2,745 tons; 292 -1 x 41 - 3 X18 - 5; triple-expansion engines. The Italian steamship *Vittoria Claudia*, on a voyage from Bourgas to Hamburg with 4,000 tons of ore, was sunk by collision with the French motorship *Perou*, 7,264 tons, at 3.12 a.m. on November 16th, 1953, two miles S.E. of Dungeness. Five survivors were picked up by the pilot cutter *Pelorus* three hours later but the remaining 20 of the crew were lost.

VITTORIO ALFIERI

Italian Navy, destroyer; 1936; *Odero-Terni-Orlando*; 1,729 tons; 350-3x33-3x12; 48,000 s.h.p.; 39 knots; turbine engines; 3-drum boilers; four 4-7 in. guns, four 13 mm., 6 T.T. The Italian destroyer *Vittorio Alfieri* was lost in a night action which concluded the operations known as the battle of Cape Matapan. In the early hours of March 29th, 1941, an Italian force of cruisers and destroyers was discovered running across the bows of the British battleship line at a distance of 4,000 yards. Searchlights were turned upon these vessels and the battleships reduced two 10,000 tons cruisers to wreckage in four minutes. The Italian destroyers made a torpedo attack which completely failed. They were engaged by British destroyers as they turned away and the *Vittorio Alfieri* and her sister ship, the *Giosue Carducci*, were sunk by gunfire. The full story of the battle is told under the cruiser *Fiume*.

VITTORIO LOCCHI

4,573 tons; oil engines. The motorship *Vittorio Locchi* was taken over by the Italian Navy for use as a minelayer. On February 24th, 1945, she was bombed and sunk at Fiume.

VIVINA

Linea de Vapores Serra; 1885; *M. Pearse & Co.*; 3,034 tons; 325-5x40x27-5; 308 n.h.p.; triple-expansion engines. The Spanish steamship *Vivina* was torpedoed and sunk by a German submarine in the Bay of Biscay on March 13th, 1917.

VIZCAYA

Compania Trasatlantica; 1872; *J. & W. Dudgeon*; 2,458 tons; 287 -5x38x27; 350 h.p.; compound engines. The Spanish steamship *Vizcaya*, with 73 persons on board, passengers and crew, was sunk by collision with the American schooner *Cornelius Hargreaves*, 1,332 tons, on October 30th, 1890, off New Jersey. Twelve of the crew were rescued from the rigging by the steamship *Humboldt* early on the following day, these were the only survivors. The *Cornelius Hargreaves* also sank but without loss of life.

VLADIMIR

Russian Steam Nav. & Trading Co.; 1858; *R. Napier & Sons*; 1,600 tons; 243 x 31x21; compound engines. The Russian steamship *Vladimir*, on a voyage from Sevastopol to Odessa with passengers, was sunk by collision with the Italian steamship *Columbia*, 2,079 tons, on July 9th, 1894. About 100 lives were lost.

VLADIMIR MONOMACH

Russian Navy, armoured cruiser; 1882; *Baltic Works*; 5,796 tons; 296-5x52x24-9; 7,044 i.h.p.; 17-5 knots; triple-expansion engines; five 6 in. guns, six 4-7 in., two 2 in., sixteen 3pdr., 8m.g., 3 T.T.

The Russian armoured cruiser *Vladimir Monomach*, was one of the old ships included in the Baltic Fleet, which was despatched to join the remnants of the Pacific Squadron at Port Arthur, during the Russo-Japanese War. At that time the vessel had seen 20 years service and, although she was reconstructed and re-armed in 1898, her speed was very poor. The squadron of which she was a unit was composed of three coastal defence ships with an ancient battleship as flagship. On February 15th, 1905, the ships sailed from Libau for the Far East, joining the rest of the fleet off Cochin China in the following May, about a fortnight before the battle of Tsushima. On joining the Baltic Fleet the *Vladimir Monomach* was transferred to the cruiser force, commanded by Rear-Admiral Enquist. Here she was assigned the duty of escorting the fleet transports, her speed precluding her from anything more useful. On the day of the battle the ship appears to have received little damage and at night was steaming on a course for Vladivostok. At about 2 a.m. a flotilla of Japanese destroyers, led by Cdr. Suzuki, attacked four of these old warships, sinking one, the *Navarin* (which see) and damaging the *Vladimir Monomach* and two others. During the night the destroyer *Iromki* stood by in order to take off the crew, if necessary, and at dawn the stricken cruiser was labouring along with small hope of survival.

Meanwhile the Japanese were sweeping the seas with a view to making an end of these sorely damaged ships. Just about 10 a.m. one of their auxiliary cruisers, the *Sadu Maru*, accompanied by the destroyer *Shiranui*, sighted the *Vladimir Monomach* and the *Admiral Nakhimoff*. Both the Russian warships were rapidly sinking, the Japanese being in time to pick up the crews.

The full story of the battle of Tsushima is told under the *Kniaz Suvaroff*, flagship of the Baltic Fleet.

VOGESEN

H. Vogemann; 1904; *Furness, Withy & Co.*; 4,240 tons; 359-7x 47-9x27-8; 400 n.h.p.; triple-expansion engines. The German steamship *Vogesen* struck a mine and sank on May 6th or 7th, 1940, off Vinga lighthouse, near the entrance to the Kattegat.

VOJVODA PUTNIK

Jugoslavenki Lloyd; 1916; *Northumberland S.B. Co.*; 5,879 tons; 400x52x35-4; 535 n.h.p.; triple-expansion engines. The Yugoslav steamship *Vojvoda Putnik* left Bahia Blanca on December 13th, 1942, and New York on February 23rd, 1943, for Loch Ewe with a crew of 38 and six gunners, and 7,900 tons of wheat. On March 8th a wireless message from the ship stated that she was sinking, giving a position about 600 miles E.S.E. of Cape Farewell. Nothing more was ever heard of the ship or the crew.

VOLGA

Danubio Soc. Anon, di Nav.; 1901; *Maryland Steel Co.*; 3,542 tons; 293 x 52 - 5 x 21 • 1; 222 n.h.p.; triple-expansion engines. The Italian tanker *Volga*, on a voyage from Abadan to Italy, was destroyed by fire on January 12th, 1926, about 100 miles N.N.E. of Masirah Island.

VOLO

Strong, Reid & Page; 1880; *R. Duncan & Co.*; 1,371 tons; 250-4x33-3x16-5; 170 h.p.; compound engines. The British cargo ship *Volo* was wrecked outside Huelva on January 5th, 1894, while carrying an ore cargo from Huelva to Liverpool.

VOLO

Ellermarks Wilson Line; 1938; Swan, Hunter & Wigham Richardson; 1,587 tons; 283-9x40-2x15-8; 335n.h.p.; triple-expansion engines & L.P. turbine.

The British steamship *Volo*, on a voyage from Tobruk to Alexandria was torpedoed and sunk by a submarine at 2.50 a.m. on December 28th, 1941, about 45 miles N.W. of Mersa Matruh. Twenty-one of the crew and three gunners were lost.

VOLODIA

Cunard S.S. Co.; 1913; Russell & Co.; 5,689 tons; 423-5 x 56x28-7; 585 n.h.p.; 11 knots; triple-expansion engines. The steamship *Vplodia* was torpedoed and sunk by a German submarine 285 miles W. i S. of Ushant on August 21st, 1917. Ten men were killed, the captain was among the survivors.

VOLTA

Eastern Telegraph Co.; 1882; London & Glasgow Ship Building Co.; 844 tons; 200-2x29x20-3; 95 h.p.; compound inverted engines.

The British steamship *Volt a*, Capt. Richardson, was wrecked on April 18th, 1887 on Mykoni Island, Grecian Archipelago, while carrying telegraph cables and stores from London to Syra. Eleven of the crew were drowned, Capt. Richardson and 12 others were saved.

VOLTA

Merluzzo Italiano Soc. Anon.; 1919; A/S Kjobenhavns Flydedok & Skibsværft; 1,191 tons; 235-4x36-2x13-7; 83 n.h.p.; triple-expansion engines.

The Italian steamship *Volta* was bombed and sunk by Allied aircraft on March 22nd, 1943, at Palermo.

VOLTAIRE

Delmas Freres; 1896; J. Readhead & Sons; 2,651 tons; 304 X 44-1 x 21 - 9; 240 n.h.p.; triple-expansion engines. The French steamship *Voltaire* was torpedoed and sunk by a German submarine in the Bay of Biscay on January 11th, 1918.

VOLTAIRE

Lamport & Holt Line, auxiliary cruiser; 1923; Workman, Clark & Co.; 13,301 tons; 510-5x64-3x39-3; 806 n.h.p.; 15 knots; quadruple-expansion engines; 6 in. guns.

The auxiliary cruiser *Voltaire*, Capt. J. A. P. Blackburn, was on passage from Trinidad to Freetown when she encountered the German commerce raider *Thor*, known to the British Admiralty as "Raider E". about 700 miles W.S.W. of the Cape Verde Islands, on April 4th, 1941. The British ship was three knots slower than her adversary and her guns were not equal in range or power. She put up a most determined resistance, however, and it was not until two hours after the action commenced that she sank.

Thirteen officers and 62 ratings were killed, Capt. Blackburn, 21 officers and 173 ratings were taken prisoners of war.

VOLTURNO

Canadian Northern Steamships; 1906; Fair field Co.; 3,602 tons; 340 x 43x20- 7; 324 n.h.p.; 12 knots; triple-expansion engines. The steamship *Volturno*, Capt. G. D. Inch, was proceeding from Rotterdam to New York with a company of 654 persons, of whom 561 were passengers, being for the most part Polish, Rumanian and Serbian emigrants. Among her cargo was a quantity of barium oxide and various other chemicals, together with peat moss, rags and straw bottle covers, the whole making a dangerous collection of inflammable goods in the event of fire. The voyage across the Atlantic was uneventful until the early morning of October 9th, 1913, when smoke was seen coming out of No. 1 hatch. The *Volturno* at once reduced speed and the crew went to fire stations, investigation revealing that the forecandle was on fire and that four of the crew were already dead. Not long after this came a violent explosion which wrecked part of the forward portion of the ship and jammed the steering gear and engine room telegraph.

Meanwhile a S.O.S. had been sent out saying that the ship was on fire and giving her position as lat. 48° 25' N., long. 34° 33' W. In response to this the Cunard liner *Car mania*, 19,524 tons, Capt. Barr, at once proceeded to the rescue, working up to about two knots above designed speed. She also sent out wireless calls which were answered by various ships so that within a few hours a total

of eight large steamships had arrived. This fleet of rescue ships was compelled to lie idly round the burning *Volturno* in almost complete impotence, the wind and the seas making the launching of lifeboats a hazardous business, although the *Carmania* and the *Minneapolis* both attempted it, but failed to take off any people. The arrival of the tanker *Narragansett* after some hours helped the situation to a certain degree, as she was able to pour a quantity of oil on the sea.

Prior to the arrival of the *Carmania*, Capt. Inch had ordered out his boats, of which six were launched out of 19. Of these four were capsized, and the remaining two were lost to sight and never heard of again. In the circumstances the order to take to the boats was reasonable as both captain and officers fully expected another explosion, probably destroying the ship. Nevertheless had it not been for this order the lives of nearly all on board might have been saved. Next day the women and children were taken off by the surrounding ships, the men following.

The loss of life amounted to 103 passengers and 30 crew. Capt. Inch was among the survivors.

The burning hull of the *Volturno* continued to float for six days when a boat's crew from the Dutch steamship *Charlois* boarded her and opened her sea cocks and she filled and sank on October 80th.

VOLTURNO

Transoceanica Soc. Italiana di Nav.; 1916; Soc. Fiat San Giorgio; 11,496 tons; 492-7x65-6x33-8; 458 n.h.p.; quadruple expansion engines.

The Italian tanker *Volturno* was torpedoed and sunk by a submarine in the Mediterranean on March 26th, 1918.

VOORWAARTS

G. B. Lararello; 1874; J. Elder & Co.; 2,801 tons; 368x 37-2x25-5; 315 n.h.p.; compound engines. The Italian steamship *Voorwaarts*, recently bought from Dutch owners, left Cardiff on January 1st, 1899, for Genoa with coal. Soon after leaving port, in bad weather, she sprang a leak. By the next day she had six feet of water in the stokehold and the captain and 12 men left the ship in two boats, which were soon swamped and the occupants drowned. Nine men elected to stay on board the ship, which was then at anchor, and were taken off on the 3rd by the Newquay lifeboat. On the 4th the ship was still afloat and the nine men asked to be put aboard and the ship was taken in tow. When about 15 miles S.W. of Lundy Island, however, the waterlogged ship became unmanageable. The nine men were taken off again and the tow was cast off. The *Voorwaarts* then drove ashore and broke in two.

VORDINGBORG

C. K. Hansen; 1908; Fevigs Jernskibsbygeri; 2,157 tons; 290x42x19-6; 234 n.h.p.; triple-expansion engines. The Danish steamship *Vordingborg* was sunk by a German submarine off Ushant on July 11th, 1917.

VORMA

Ingvar Jansen; 1918; Toba Shipyard; 1,192 tons; 228-1 x 33-3x16-6; 102 n.h.p.; triple-expansion engines. The Norwegian steamship *Vorma* left Goole on December 12th, 1936, for Sundsvall with coal. Nothing more was ever heard of the ship until wreckage, including the ship's bell, was found some time later. The situation of the wreckage suggested that the ship was probably lost near Raaspe, near Stromstad, Sweden.

VORTIGERN

British Navy, destroyer; 1917; J. S. White & Co.; 1,090 tons; 312 x 29 • 5 x 10 - 9; 27,000 s.h.p.; 34 knots; turbine engines; White-Forster boilers; four 4 in. guns, one 2 pdr., 3 m.g., 5 T.T. On the night of March 14th, 1942, German motor torpedo boats attacked a British convoy in the North Sea. No ships of the convoy suffered loss or damage, but one of the escorting vessels, the destroyer *Vortigern*, Lt. Cdr. R. S. Howlett, was hit by two torpedoes and sunk. Seven officers, including Cdr. Howlett, and 140 ratings were killed and two officers wounded.

VOSTOK

U.S.S.R.; 1901; J. Blumer & Co.; 2,787 tons; 319-6x46-1x 21-2; 262 n.h.p.; triple-expansion engines. The Russian steamship *Vostok* was torpedoed and sunk by German aircraft about January 15th, 1943, near Theodosia, Crimea.

VOYAGER

Australian Navy, destroyer; 1918; Palmer & Co.; 1,100 tons; 312x29-5x10-9; 27,000 s.h.p.; 34 knots; turbine engines; Yarrow boilers; four 4 in. guns, two 2pdr., 5 m.g., 6 T.T. The Australian destroyer *Voyager*, Lt. Cdr. R. C. Robinson, R.A.N., ran aground off the south coast of Timor on September 25th, 1942, when carrying troops and stores for the combined Australian-Dutch force operating on the island. All on board were taken off in safety after which the *Voyager* was destroyed by ships in company.

VOYAGER

Australian Navy, destroyer; 1958; Cockatoo Island Dockyard; 2,800 tons; 388-5x43x12-25; 54,000 s.h.p.; 30-5 knots; turbine engines; six 4-5 in. guns, six 40 mm.A.A., 5 T.T. The destroyer *Voyager*, Capt. D. H. Stevens, was engaged in a training exercise some miles S. of Sydney on the night of February 10th, 1964, when she was struck on the port side amidships by the aircraft carrier *Melbourne*, 16,000 tons, Capt. R. J. Robertson. The exercise group consisted of an aircraft carrier, a destroyer and three minesweepers, all belonging to the Australian navy. The destroyer had the duty of rescue ship in case any of the aircraft practising night landings on the *Melbourne* dropped into the sea.

The night was dark but clear and calm, and the ships were blacked out save for port and starboard lights, and were proceeding at almost full speed. Capt. Robertson was on the bridge of the *Melbourne* at the moment that his ship struck the *Voyager* and there was no warning of the collision. About 80 men of the watch below on the destroyer were in the canteen, situated in the forward portion of the ship, playing bingo, and it was among these that the heaviest casualties occurred.

The impact was so violent that the destroyer was cut completely in half, her forward portion drifting past the aircraft carrier's port side and the after portion drifting past to starboard. The forward portion remained afloat for ten minutes and the after portion for three hours, and then sank in 80 fathoms.

The *Voyager* carried a complement of 319, of whom 79 were missing, presumed drowned, and three were killed, Capt. Stevens was among the survivors. It was the greatest peacetime disaster ever sustained by the Australian Navy.

VRONTADOS

G.F. Andreadis; 1891; Tyne Iron S.B. Co.; 2,598 tons; 300-5 x 38-6x20-6; 246 n.h.p.; triple-expansion engines. The Greek steamship *Vrontados* was torpedoed and sunk by a submarine in the Mediterranean on June 30th, 1917.

VSADNIK

Russian Navy, torpedo gunboat; 1893; W. Crichton & Co.; 432 tons; 192x24x7-5; 3,300 i.h.p.; 20 knots; triple-expansion engines; six 3pdr. guns, 3 m.g., 2 T.T. The Russian torpedo gunboat *Vsadnik* was attached to the Pacific Squadron at Port Arthur. The vessel, which carried a complement of 65 officers and men, served throughout the siege of the fortress,

and was useful in operations necessitating light draught craft for inshore work. Towards the end of the siege the *Vsadnik* was badly damaged by the heavy shells of the Japanese investing army. On December 15th, 1904, she suffered a number of vital hits and sank at her moorings.

VUINOSLIVI

Russian Navy, destroyer; 1901; Chantiers Normand; 312 tons; 186x20-8x10-3; 4,750 i.h.p.; 27 knots; triple-expansion engines; one 12pdr. gun, five 3pdr., 2 T.T. The Russian destroyer *Vuinoslivi*, in company with the destroyer *Razyashchi*, was engaged in minesweeping operations outside Port Arthur on the night of August 24th, 1904. The *Razyashchi* struck a mine soon after her arrival. The *Vuinoslivi* proceeded to the assistance of her consort and took off some of the crew, leaving the remainder to work the ship into harbour, which they eventually did. Shortly afterwards the *Vuinoslivi* herself struck a mine and foundered, with her captain, one officer and several men of the crew of 57.

VULCANO

G. Ravano; 1913; Cantieri Navali Riuniti; 5,398 tons; 394-4 x 51-8x27-4; 335 n.h.p.; triple-expansion engines. The Italian steamship *Vulcano*, on a voyage from Quebec to Italy with grain, was sunk by collision on October 18th, 1927, off Father Point, River St. Lawrence.

VULCANUS

Ch. Schiaffino, A. Jouvet & Co.; 1883; Palmers' Co.; 1,450 tons; 251x35-2x17-8; 173 n.h.p.; compound engines. The French steamship *Vulcanus* was torpedoed and sunk by a submarine in the Mediterranean on June 3rd, 1917.

VULCAIN

E. R. Management Co.; 1911; Ateliers et Chantiers de France; 4,362 tons; 362x49x25; 383 n.h.p.; 11 knots; triple-expansion engines. The steamship *Vulcain*, Capt. J. R. Lewis, was taken over from the Cargo Algeriens company at the capitulation of France in June, 1940. On May 23rd, 1941, 160 miles N.W. of Freetown she was torpedoed and sunk by a German submarine. Seven men were killed, Capt. Lewis was among the survivors.

VYNER BROOKE

Sarawak S.S. Co.; 1928; Ramage & Ferguson; 1,670 tons; 240-7x41'3x16-1; 297 n.h.p.; triple-expansion engines. The steamship *Vyner Brooke* left Singapore for Australia on February 12th, 1942, with a crew of 47 and some 200 passengers, mostly women and children. On the following day she was bombed and sunk by Japanese aircraft 15 miles N. of Muntok, Banka Island. Some survivors, including 35 nurses landed on Banka Island and were interned by the Japanese, but 125 persons were not accounted for.

W. A. SCHOLTEN

Nederlandsch-Amerikaansche Stoomv. Maats.; 1874; R. Napier & Sons; 2,589 tons; 351x38-2x19-4; 360 h.p.; 10 knots; compound inverted engines.

The Dutch liner *W. A. Scholten*, Capt. J. H. Taat, was bound from Rotterdam to New York with 156 passengers, mostly Dutch and German emigrants and a crew of 54. On the night of November 19th, 1887, the weather being hazy at the time, the ship was some four miles E. of the Admiralty Pier, Dover, when she collided with the collier *Rosa Mary* of West Hartlepool. The collier was lying at anchor waiting for better visibility and the first intimation she had of her danger was the appearance of the *W. A. Scholterfs* light on her starboard bow. There was little time in which to take action and the Dutch liner crashed into the bows of the collier with terrific force. The *Rosa Mary* was badly damaged but managed to keep afloat until daybreak when she made for Dover Harbour where she docked.

The plight of the *W. A. Scholten* was far worse. A hole eight feet wide had been torn in her port bow and she was making water rapidly. Twenty minutes after the collision she foundered, going down by the head with a heavy list to port which made it impossible to launch all her boats. Two of them got clear, however, and many passengers were provided with lifebelts so that it was possible for them to be rescued from the water by lines thrown overboard from the Sunderland steamship *Ebro*. A longshoreman named Ball also took his boat to the rescue and by these various means 78 persons were saved. The drowned numbered 132, including Capt. Taat and the first officer.

The collision occurred between 10.20 and 10.30p.m., just as the haze was beginning to lift.

W. B. WALKER

Oriental Tankers; 1935; Fried. Krupp Germaniawerft; D,468 tons; 490-2x68-2x37; 912n.h.p.; 12knots; oilengines. The tanker *W. B. Walker*, on a voyage from Aruba and Halifax to Avonmouth with 13,000 tons of petrol, was torpedoed by a German submarine on January 29th, 1941, about 150 miles S.W. of Rockall. Four of her crew of 47 were killed. The tanker broke in two and both parts remained afloat. The fore part was sunk by gunfire on February 6th. Attempts were made to take the after part in tow but weather conditions would not permit and the derelict sank some time after February 13th.

W. C. FRANZ

Algoma Central & Hudson Bay R.R. Co.; 1901; Detroit S.B. Co.; 3,429 tons; 346 X 48 X 24 -1; 218 n.h.p.; triple-expansion engines. The Canadian steamship *W. C. Franz* sank after a collision with the *Edward E. Loomis* 30 miles S.E. of Thunderbay Island, Lake Huron, on November 21st, 1934.

W. C. TEAGLE

Panama Transport Co.; 1917; Bethlehem Steel Co.; 9,552 tons; 499 • 1 x 68 - 2 X 35 - 9; 652 n.h.p.; triple-expansion engines. The Panamanian tanker *W. C. Teagle*, flying the British flag on a voyage from Aruba and Sydney, N.S., to Swansea with 15,000 tons of fuel oil, was torpedoed and sunk by a German submarine on October 16th, 1941, about 900 miles E. of the Hebrides. Nine survivors of her crew of 40 and one gunner were picked up by the British destroyer *Broadwater*. All but one of these, the first wireless operator, were lost when the destroyer was sunk soon afterwards.

W. D. ANDERSON

Atlantic Refining Co.; 1921; W. Cramp & Sons; 10,227 tons; 500 x 71 - 2 x 31 - 2; 544 n.h.p.; quadruple-expansion engines. The American tanker *W. D. Anderson* was torpedoed and sunk by a German submarine on February 22nd, 1942, 15 miles E. of Stewart Florida. There was only one survivor of her crew of 35*

W. D. C. BALLS

William D.C. Balls & Son; 1879; J.Readhead&Co.; 1,251 tons; 225X33-1 X19-3; 125h.p.; compound-inverted engines. The British cargo ship *W. D. C. Balls* was wrecked off Cabo de Gata on June 11th, 1882, while on a voyage from the Tyne to Leghorn carrying a cargo of coal.

W. E. MUTTON

Pure Oil Co.; 1920; Bethlehem S.B. Corp.; 7,076 tons; 435x56 x 32; 422 n.h.p.; triple-expansion engines. The American tanker *W. E. Hutton*, bound from Beaumont to Philadelphia with 65,000 barrels of fuel oil, was torpedoed and sunk by a German submarine on March 18th, 1942, about 100 miles S. of Cape Lookout, with the loss of 13 lives.

W. HENDRIK

Euxine Shipping Co.; 1925; Furness S.B. Co.; 4,360 tons; 360'5x52-2x27-6; 376 n.h.p.; triple-expansion engines. The British steamship *W. Hendrik*, on a voyage from Halifax to the Tyne, was bombed and sunk by German aircraft on December 3rd, 1940, about 200 miles W. of the Hebrides. Five of her crew of 35 were lost.

W. L. STEED

Standard Oil Co. of New Jersey; 1918; Bethlehem Shipbuilding Corp.; 6,182 tons; 416-8x56-1x32-7; 642 n.h.p.; 10-2knots; triple-expansion engines.

The American tanker *W. L. Steed*, Capt. H. G. McAvenia, left Cartagena, Colombia, on January 23rd, 1942, with a cargo of 63,936 barrels of crude oil. On February 2nd at about 12.45 p.m., when 80 miles off the Delaware Capes, the vessel was struck by a torpedo on the starboard side forward of the bridge. She remained afloat for some time and all the crew, numbering 38, got away in the boats. The submarine then surfaced and sank the tanker by gunfire.

The weather was bad with heavy snow squalls and many of the men in the boats died during the next few days. Lifeboat No. 2 with the chief officer, Mr. E. A. Nilsson, and the second officer, Mr. Sydney Wayland, was picked up by the s.s. *Hartlepool* on the morning of the 6th, all the other occupants of the boat having perished. Mr. Nilsson died in hospital a few days later. Three other men were rescued from various boats, a total of four survivors.

W. M. TUPPER

M.Nemazee; 1917; Merrill-Stevens Co.; 1,756 tons; 217-6x38x25; 93 n.h.p.; triple-expansion engines. The Panamanian steamship *W. M. Tupper* was bombed and sunk by Japanese aircraft on March 1st, 1942, at Sourabaya.

WAAHAVEN

Gebr.vanUden; 1916; RotterdamDroogdokMaats.; 3,551 tons; 361 -4x49-9x22-1; 301 n.h.p.; triple-expansion engines. The Dutch steamship *Waalhaven* on a voyage from Lulea to Germany with iron ore, was wrecked on Pinggrund, off Ronnskar, about September 16th, 1942.

WAAALSTROOM

Hollandsche Stoomb. Maats.; 1913; A. Vuijk & Zonen; 1,441 tons; 266-9x37-2x17-5; 162 n.h.p.; triple-expansion engines. The Dutch steamship *Waalstroom* struck a mine and sank in the North Sea on June 27th, 1916.

WACHTFELS

Deutsche Dampfs. Ges. Hansa; 1928; J. C. Tecklenborg A.G.; 8,467 tons; 490-7x62-2x32-3; 785n.h.p.; triple-expansion engines & L.P. turbine. The German steamship *Wachtfels* was torpedoed and sunk by a British submarine on August 7th, 1942, ten miles N.W. of Milo, Greece.

WACOUSTA

Waterman S.S. Corp.; 1920; Merchant S.B. Corp.; 5,432 tons; 400-7x54-2x30-2; 785 n.h.p.; triple-expansion engines & L.P. turbine.

The American steamship *Wacosta* was torpedoed and sunk by German aircraft on September 13th, 1942, S. of Spitsbergen on a voyage from the Clyde to North Russia.

WACOUSTA

Christensen & S' tenseth; 1908; A. McMillan & Son; 3,521 tons; 340-4x46x24-8; 310 n.h.p.; triple-expansion engines. The Norwegian steamship *Wacosta* was sunk by a submarine in the Mediterranean on November 8th, 1915.

WADE HAMPTON

U.S. War Shipping Administration; 1942; Delta S.B. Co.; 7,176 tons; 422 -8x57x34-8; 339 n.h.p.; triple-expansion engines. The steamship *Wade Hampton*, on a voyage from New York to North Russia, straggled from convoy and was torpedoed and sunk by a German submarine on February 28th, 1943, about 400 miles E. of Cape Farewell. Thirty of the complement of 71 were picked up by the British steamship *Bayano* and on March 3rd one other survivor was picked up from a raft.

WAIKARE

Union S.S. Co. of New Zealand; 1897; W. Denny & Bros.; 3,071 tons; 310 -1 x 41 • 1 x 21 - 5; 306 n.h.p.; triple-expansion engines. The New Zealand steamship *Waikare* was wrecked in Dusky Sound, N.Z., on January 4th, 1910. She was on a voyage in ballast but was carrying passengers from Milford, N.Z., to Dunedin.

WAIMARAMA

Shaw Savill & Albion Co.; 1938; Harland & Wolff; 12,843 tons; 516-9x70-4x32-3; 2,463 n.h.p.; 17 knots; oilengines. The liner *Waimarama*, Capt. R. S. Pearce, was a unit of the famous convoy which fought its way to Malta in the first weeks of August, 1942. The ships, which were escorted by a powerful squadron under Vice-Admiral Syfret in the battleship *Nelson* passed Gibraltar on the night of the 9th and continued unmolested until the 11th when the aircraft carrier *Eagle* was hit by several torpedoes from a submarine and sunk. From that time forward a continuous and savage action was maintained in which, besides two cruisers and one destroyer, two other ships of the Shaw Savill line, the *Wairangi* and the *Empire Hope* were sunk.

The *Waimarama* survived the fighting until the day that the convoy reached Malta, the 13th, when she was hit by three or four bombs which fell near the bridge in quick succession and killed everyone on duty there. The explosion set fire to the part cargo of petrol in drums and soon the ship was in flames from end to end. Within four minutes she had vanished from sight.

Eighty-seven of her crew were lost, including all the officers; 12 of the crew, two gunners and four naval ratings were saved.

WAIMATE

F. Gregorini; 1896; Hawthorn, Leslie & Co.; 5,817 tons; 420x 54x28-6; 491 n.h.p.; triple-expansion engines. The Italian steamship *Waimate*, on a voyage from the Clyde to Genoa with coal, was wrecked on June 18th, 1925, five miles from Cape St. Vincent.

WAIOTIRA

Shaw Savill & Albion Co.; 1939; Harland & Wolff; 12,823 tons; 516-9x70'4x32'3; 2,463 n.h.p.; 17 knots; oilengines. The liner *Waiotira*, Capt. A. V. Richardson, on a voyage from Sydney, N.S.W., to the U.K., was torpedoed and sunk by a German submarine on December 26th, 1940, about 150 miles N. by W. of Rockall. She was abandoned but did not sink until 5.30 a.m. on the 27th. One member of the crew was killed.

WAIKARE

Shaw, Savill & Albion Co.; 1935; Harland & Wolff; 12,436 tons; 516-3x70'4x32-4; 1,631 n.h.p.; 17 knots; oilengines. The liner *Wairangi*, Capt. H. Gordon, was one of the vessels comprising the famous Malta convoy of August 1942. At 12.15 a.m. on the 13th, when about one-and-a-half miles off Cap Bon, she was hit by a torpedo from a motor torpedo boat which flooded the engine room. As it was not possible to take her in tow in face of the fierce and sustained attacks of the enemy her crew was transferred without loss of life to the destroyer *Eskimo* and she was scuttled.

In recognition of their efforts to save the vessel, Capt. Gordon and Mr. A. Chalmers, the Chief Engineer, were each awarded the D.S.C. At a later date a knighthood was conferred on Capt. Gordon.

The full story of the Malta convoy is told under the aircraft carrier *Eagle*.

WAIKARE

Union Steamship Co. of New Zealand; 1882; W. Denny & Bros.; 1,786 tons; 285-2x36-3x23-7; 292h.p.; 10 knots; compound engines. The *Wairarapa* left Sydney for Auckland on October 24th, 1894. At

about midnight on October 28th, in thick fog, the captain being on the bridge, the *Wairarapa* crashed into the cliffs of Great Barrier Island. The ship heeled over to an angle of 45° and many of those on the deck were flung into the sea and drowned. The engines were kept running to thrust the ship further on to the rocks and attempts were made to save the passengers. All of these were in their berths below when the ship struck and hastened on deck half clothed; many of them were swept overboard by the seas. The bridge with about 40 persons on it was washed away, and a large party huddled on deck suffered the same fate. Sixteen horses were being transported and the presence of these added greatly to the confusion and loss of life.

At daybreak an attempt was made to reach land and a line was eventually run ashore from the ship, about 50 persons escaping by this means. Two of the port lifeboats were smashed, but two rafts were successful in reaching the shore. After some 36 hours the survivors, 119 in all, were rescued and taken to Auckland.

Capt. Mackintosh, 20 crew and 58 passengers were drowned.

WAITARA

New Zealand Shipping Co.; 1863; J. Reid & Co.; 883 tons; 191-3x31-4x20-9.

The sailing ship *Waitara*, Capt. K. Webster, left Gravesend on June 19th, 1883, for Wellington with 16 passengers and a crew of 25. At 10 p.m. on the 22nd, when abeam of Portland, she collided with the sailing ship *Hirunui*, 1,054 tons, owned by the same company and which had left Gravesend on the same day as the *Waitara*. The *Waitara* sank before any boats could be lowered, some passengers and crew were able to scramble over the bows and jump on to the *Hirunui*, which lowered boats and picked up other survivors from the water. Capt. Webster, ten crew and four passengers were saved.

WAIWERA

Shaw, Savill & Albion Co.; 1934; Harland & Wolff; 12,435 tons; 516-2x70-4x32-4; 1,631 n.h.p.; 17 knots; oilengines. The liner *Waiwera*, Capt. C. M. Andrews, was torpedoed and sunk by a German submarine 450 miles N. of the Azores on June 29th, 1942. Eight persons were killed, Capt. Andrews was among the 97 survivors.

WAKABA

Japanese Navy, destroyer; 1934; Sasebo; 1,368 tons; 337-7X 32-5x8-7; 37,000 s.h.p.; 34 knots; turbine engines; Kanpon boilers; five 5 in. guns, 2 m.g., 6 T.T.

The destroyer *Wakaba* was one of nine such vessels sunk at the battle of Leyte Gulf, October 23rd-27th, 1944. The *Wakaba* was attached to the Central Force which was heavily engaged in a night action in the San Bernardino Strait on the 24th-25th. The *Wakaba* was bombed and sunk S. of Mindoro on the 24th. Her normal complement was 180.

For full story of the battle of Leyte Gulf see the battleship *Musashi*.

WAKAMATSU MARU

Toyo Risen K.K.; 2,722 tons. The steamship *Wakamatsa Maru* struck a mine and sank on June 24th, 1945, off Shimonoseki.

WAKAMIYA MARU

Shimatani Kisen K.K.; 1919; Ono S.B. Yard; 2,217 tons; 270 x39x23-9; 144 n.h.p.; triple-expansion engines. The steamship *Wakamiya Mam*, on a voyage from Otaru to Osaka with timber, was wrecked on March 20th, 1927, at Yatabe, outside Tokyo Bay.

WAKAMIYASANMARU

Kaburagi Kisen K.K.; 2,211 tons. The steamship *Wakamiyasan Mam* was torpedoed and sunk by the U.S. submarine *Sea Devil* on June 14th, 1945, E. of the Shantung Peninsula.

WAKANOURA MARU

Nippon Suisan K.K.; 1885; R. Dixon & Co.; 2,411 tons; 320x38x25-7; 282n.h.p.; triple-expansion engines. The steamship *Wakanoura Maru* was torpedoed and sunk by the U.S. submarine *Salmon* on August 10th, 1943, off the south-east coast of Sakhalin.

WAKATAKE

Japanese Navy, destroyer; 1922; Kawasaki; 820 tons; 275 x 26-5 X8 -2; 21,000 s.h.p.; 31-5 knots; turbine engines; Kanpon boilers; three 4 - 7 in. guns, 2 m.g., 4 T. T.

The destroyer *Wakatake* was bombed and sunk off the Palau Islands on March 30th, 1944, in an attack by battleships and aircraft carriers of the U.S. Fifth Fleet under Admiral R. A. Spruance. The Japanese loss in merchant ships and aircraft was also very heavy, 27 vessels and 114 planes being destroyed.

The normal complement of the *Wakatake* was 110.

WAKATAKE MARU

Nippon Yusen K.K.; 1938; Kawaminami Kogyo K.K.; 1920; 271 -7x40x20-3; 150 n.h.p.; triple-expansion engines. The steamship *Wakatake Maru* was torpedoed and sunk by the U.S. submarine *Tang* on October 23rd, 1944, about 80 miles W. of Hsinchu, Formosa.

WAKATAMA MARU

Tamami Shosen K.K.; 2,211 tons. The steamship *Wakatama Maru* was torpedoed and sunk by the U.S. submarine *Tinosa* on June 9th, 1945, off the east coast of Korea.

WAKATSU MARU

Shimatani Risen K.K.; 1917; C. Cornell & Co. Ltd.; 5,123 tons; 400-3x52x27-3; 510n.h.p.; triple-expansion engines. The steamship *Wakatsu Maru* was bombed and sunk by a Dutch aircraft on December 16th, 1943, off the north coast of Timor Island.

WAKATSUKI

Japanese Navy, destroyer; 1942; Japan; 2,500 tons; 435 x38x —; 34 knots; turbine engines; eight 5 in. guns, several A.A., 4 T.T. The destroyer *Wakatsuki* with others was escorting a convoy of four troopships bound for Leyte, Philippine Islands, on November 11th, 1944. When in Ormoc Bay the ships were attacked by aircraft from fast carriers of the U.S. Third Fleet and *Wakatsuki*, three other destroyers and the four transports were sent to the bottom.

The *Wakatsuki* carried a complement of over 200.

For further details see the destroyer *Hamanami*.

WAKEFUL

British Navy, destroyer; 1915; John Brown & Co.; 1,100 tons; 312x29-5x10-9; 27,000s.h.p.; 34 knots; turbine engines; Yarrow boilers; four 4 in. guns, two 2 pdr., 5 m.g., 6 T.T. The destroyer *Wakeful*, Cdr. R. L. Fisher, took part in the operations off the Flanders coast terminating in the evacuation of the British Army from Dunkirk. At about 11 p.m. on May 28th, 1940, *Wakeful* in company with the destroyer *Grafton*, the danlayer *Comfort* and the minesweeper *Lydd* left for Dover crowded with troops, of whom *Wakeful* carried over 600. At 12.45 a.m. on the 29th, the vessels were attacked by German motor torpedo boats which torpedoed *Wakeful* amidships, breaking her in two and causing her to sink in 15 seconds with most of the 600 troops. The *Grafton* stopped and was torpedoed as she was lowering her boats. The *Comfort* was lifted into the air by the force of the explosion and Cdr. Fisher who was on board her was thrown overboard. Later *Comfort* approached the sinking *Grafton* at high speed, but was mistaken for an enemy by the destroyer which opened fire on her and killed all but one of her crew.

The full story of the Dunkirk Evacuation is told under the *Grafton*.

WAKIVA

United States Navy, armed yacht; 1907; Ramage & Ferguson; 853 tons; 239 x 30 -5 x 18; 230 n.h.p.; triple-expansion engines; several small guns.

The United States armed yacht *Wakiva* was lost by collision in the Bay of Biscay, on May 22nd, 1918.

WALES MARU

Kawasaki Kisen K.K.; 1921; Kawasaki Dockyard Co.; 6,586 tons; 405 x53x 37; 578 n.h.p.; triple-expansion engines. The steamship *Wales Maru* was torpedoed and sunk by the U.S.

submarine *Lapon* on May 24th, 1944, about 200 miles S.S.E. of Cap St. Jacques, Indo-China.

WALKE

United States Navy, destroyer; 1939; Boston Navy Yard; 1,570 tons; 341x35x10; 44,000s.h.p.; 36-5 knots; turbine engines; Express boilers; four 5 in. guns; 8 T.T.

The destroyer *Walke* was torpedoed in action against the Japanese at the battle of Guadalcanal on November 15th, 1942. The ship was one of a division of four destroyers, three of which were lost in a torpedo attack.

The full story of the battle is told under the *Atlanta* and the Japanese battleship *Kirishima*. The details of the operation in which the *Walke* was lost are given under the *Preston*.

WALLA WALLA

Pacific Coast Co.; 1881; J. Roach & Son; 3,070 tons; 310x 40-6x22; 336 n.h.p.; compound engines.

The American steamship *Walla Walla*, on a voyage from San Francisco to Puget Sound with 142 on board, passengers and crew, was in collision with the French barque *Max*, 2,075 tons, at 2.4 a.m. on January 2nd, 1902, 11 miles N. of Mendocino. She sank in 15 minutes with the loss of 42 lives.

WALLARAH

WilhelmLund; 1891; Sunderland S.B. Co.; 3,505 tons; 360x 43-5x26-1; 500 h.p.; triple-expansion engines. The British steamship *Wallarah* was wrecked on Dassen Island, Cape of Good Hope, on August 1st, 1891. She was on a voyage from London to Sydney, N.S.W., carrying a general cargo.

WALLAROO

Australian Navy, fleet minesweeper; 1940; Australia; 733 tons; 186x31x8-5; 1,800i.h.p.; 16 knots; triple-expansion engines; one 3 in. gun, one 20 m.m., 4 m.g.

The fleet minesweeper *Wallaroo*, Lt. E. S. Ross, R.A.N.R.(S.), was sunk by collision with the U.S. merchantman *N. G. Costin* off Fremantle, Western Australia, on June 11th, 1943. Fifteen of the crew were injured. The vessel's normal complement was 70.

WALMER CASTLE

Union-Castle Mail S.S. Co.; 1936; Harland & Wolff; 906 tons; 236-2x39-3x12-5; 539n.h.p.; oilengines. The motorship *Walmer Castle*, Capt. G. L. Clarke, was serving as a rescue ship in a convoy from Glasgow to Gibraltar. On September 21st, 1941, she was bombed and set on fire by German aircraft about 750 miles W.N. W. of Cape Finisterre. The derelict had to be sunk by gunfire. The captain and ten of the crew were killed. The ship had on board 81 survivors from other ships sunk, 29 of these were lost. The wireless officer was awarded the George Medal for rescuing three men trapped in a cabin.

WALNEY

British Navy, cutter; 1930; General Engineering Co.; 1,975 tons; 250x42x16; 3,220s.h.p.; 16 knots; turbo-electric engines; one 5 in. gun, one 3 in.A.A., two 6 pdr.

The cutter *Walney*, Lt. Cdr. P. C. Meyrick, was formerly the U.S.S. *Sebago* and was acquired by the Royal Navy under the Lend-Lease agreement. On the morning of November 8th, 1942, *Walney* in company with *Hartland*, another ex-U.S. cutter, was conveying a mixed force of British and American troops into the North African harbour of Oran under cover of a smoke screen laid by both vessels.

The *Walney*'s objective was the far end of the harbour where she was to land the troops who were to seize the French Naval Headquarters. At the outset the vessels came under heavy fire and *Hartland* was sunk after ramming the boom defence. The *Walney*, though damaged, continued on her course down the harbour but was overwhelmed by the fire of the shore batteries and the destroyers *Epervier* and *Tramontane*.

The number of crew killed was five officers, including Lt. Cdr. Meyrick, and 75 ratings. Two officers were wounded. The losses among the troops were extremely heavy, only a small number actually making a landing.

For full story of the attack see under *Hartland*.

WALTER HOOD

WALTER HOOD

Aberdeen White Star Line (G. Thompson & Co.); 1852; W. Hood; 937 tons; 172-2x30-2x20-9.

The sailing ship *Walter Hood* left London for Sydney early in 1870 with a general cargo. On April 27th, when near Jervis Bay lighthouse, New South Wales, she struck the rocks and sank in a very short time. The captain and 12 men were drowned.

WALTER OHLROGGE

German Government; 1914; Ateliers & Chantiers de la Loire; 1,912 tons; 280-3x38-1 x21-4; 224n.h.p.; triple-expansion engines.

The steamship *Walter Ohlrogge* was formerly the French *Chateau Palmer*, taken over by the Germans. She was sunk by mine or torpedo on February 1st, 1942, off the west coast of Norway.

WALTER Q. GRESHAM

U.S. War Shipping Administration; 1943; Delta S.B. Corp.; 7,191 tons; 422-8x57x34-8; 339n.h.p.; triple-expansion engines.

The American steamship *Walter Q. Ores ham* was torpedoed and sunk by a German submarine on March 18th, 1943, on a voyage from New York to the Clyde. Six of the crew were lost.

WALTER THOMAS

Evan Thomas Raddiffe & Co.; 1884; Palmers' Co.; 2,213 tons; 287x37-4x24-6; 225 n.h.p.; compound engines. The British steamship *Walter Thomas* sank after a collision off Europa Point, Gibraltar, on July 12th, 1901. She was on a voyage from Penarth to Derindje carrying a cargo of coal.

WAN LEE

Foo Ming S.S. Co.; 1944; Blyth D.D. & S.B. Co.; 1,305 tons; 235-9x36-6x14-9; triple-expansion engines. The Chinese steamship *Wan Lee*, on a voyage from Tientsin to Shanghai with some 400 passengers and general cargo, was wrecked on April 12th, 1945, off the Shantung Peninsula.

WANDLE

Steel, Young & Co.; 1883; E. Withy & Co.; 1,783 tons; 258-5x34-5x19-5; 150 h.p.; compound engines. The British steamship *Wandle* was wrecked on North Haaks, Holland, on December 7th, 1893, while on a voyage from Tampa to Stettin carrying a cargo of phosphate.

WANDSWORTH

Watts, Watts & Co.; 1888; W. Gray & Co.; 1,754 tons; 261 x 36-6x17-2; 152 n.h.p.; triple-expansion engines. The British steamship *Wandsworth* was wrecked on Battery Rocks, Tynemouth, on January 7th, 1897. She was carrying a cargo of iron ore from Benisaf to Jarrow.

WANETA

Tank Storage & Carriage Co.; 1910; Greenock & Grangemouth Dockyard Co.; 1,683 tons; 242x40-1x18-8; 223n.h.p.; 9 knots triple-expansion engines.

The tanker *Waneta* was torpedoed and sunk by a German submarine 42 miles S.S.E. of Kinsale Head on May 30th, 1918. Eight were killed, the captain was among the survivors.

WANGEROOGE

Norddeutscher Lloyd; 1944; 2,819 tons.

The German ship *Wangerooge* struck a mine and sank on October 25th, 1944, off Stadlant, Norway.

WANLI

Toong Yue, Liangkee & Co.; 1883; Ramage & Ferguson; 1,082 tons; 209-4x31-6x20-7; 175n.h.p.; triple-expansion engines. The Chinese steamship *Wanli*, on a voyage from Dairen to Shanghai with beans and cereals, was sunk by collision on May 21st, 1923, at Tsin Shan Tei, Shantung Peninsula, with the loss of 16 lives, passengers and crew.

WAR BALLOON

The Shipping Controller (John Glynn & Son); 1918; Wood, Skinner & Co.; 2,341 tons; 285x42-1x18-9; 410 n.h.p.; triple-expansion engines.

The British cargo ship *War Balloon* was wrecked near Pointe de St. Mathieu on September 16th, 1918. She was carrying a cargo of iron ore from Bilbao to Newport.

WAR CAPTAIN

The Shipping Controller (Rankin & Gilmour & Co.); 1917; States Island S.B. Co.; 2,385 tons; 264x42-2x21-9; 160n.h.p.; triple-expansion engines.

The British steamship *War Captain* was wrecked on the lies de Gienan on September 9th, 1917, while carrying a cargo of coal from the Clyde, via Brest, to Biaye.

WAR CLOVER

The Shipping Controller (T. Dixon & Sons); 1917; Harland & Wolff; 5,174 tons; 400-4x52-3x28-4; 490n.h.p.; 10 knots; triple-expansion engines.

The steamship *War Clover* was torpedoed and sunk by a German submarine on October 19th, 1917, 25 miles E. by N.f.N. of Pantelaria. Fourteen men were killed, the captain was among the survivors.

WAR EDENSAW

The Shipping Controller (John Cook & Son); 1918; New Westminster Construction Co.; 2,336 tons; 249-6x43-5x22-8; 322 n.h.p.; triple-expansion engines.

The British steamship *War Edensaw* was destroyed by fire 94 miles E. of the St. Elmo lighthouse, Malta, on June 25th, 1919.

She was carrying Admiralty stores from Constantinople to Malta.

WAR FIRTH

The Shipping Controller (J. Chadwick & Sons); 1918; J. L. Thompson & Sons; 3,112 tons; 331x46-8x23-2; 298 n.h.p.; 10 knots; triple-expansion engines.

The steamship *War Firth* was torpedoed and sunk by a German submarine on September 4th, 1918, 33 miles S.f.W. of the Lizard. Eleven men were killed, the captain was among the survivors.

WAR PATROL

The Shipping Controller (J. Chambers & Co.); 1917; Detroit Shipbuilding Co.; 1,884 tons; 251x43-8x18-2; 274 n.h.p.; 9-5 knots; triple-expansion engines.

The steamship *War Patrol* struck a mine and sank one mile W. of Penmarch on August 10th, 1917. The captain and 12 others were killed.

WAR PUFFIN

The Shipping Controller (Turner, Brightman & Co.); 1918; W. Picker sgirl & Sons; 5,205 tons; 400-2x52-3x28-4; 517 n.h.p.; triple-expansion engines.

The British steamship *War Puffin* was wrecked on Longstones Reef, Amherst Roads, at the mouth of the Maulmain River, on June 30th, 1919. She was on a voyage from Maulmain to Calcutta carrying a cargo of rice.

WAR ROMAN

The Shipping Controller (John L Jacobs & Co.); 1919; D. & W. Render son & Co. 5,240 tons; 400-6x52-3x28-5; 517 n.h.p.; triple-expansion engines.

The British steamship *War Roman* was wrecked six miles S.W. of Ras Hafun, Somalia, on July 14th, 1919. She was on a voyage from Batavia to Falmouth carrying a cargo of sugar.

WAR SEPOY

The Admiralty; 1919; W.Gray&Co.; 5,575 tons; 400x52-3x28-4; 517 n.h.p.; 10 knots; triple-expansion engines.

The British naval tanker *War Sepoy* was attacked by German bombers in Dover Harbour on July 19th, 1940. She was damaged beyond repair and was sunk as a blockship outside Dover Harbour.

WAR SONG

The Shipping Controller (W. France, Fenwick & Co.); 1917; Detroit Shipbuilding Co.; 2,535 tons; 251x43-8x26-3; 278 n.h.p.; 9 knots; triple-expansion engines.

The steamship *War Song* was shelled and sunk by a German submarine on January 15th, 1918, 12 miles W. of He de Sein. The captain and 15 others were killed.

WAR SWALLOW

The Shipping Controller (Charlton McAllum & Co.); 1918; J. Readhead & Sons; 5,216 tons; 400-2x52-4x28-5; 517 n.h.p.; 10 knots; triple-expansion engines.

The steamship *War Swallow* was torpedoed and sunk by a German submarine on July 16th, 1918, 72 miles S.W. by S. AS. of Malta. Seven men were killed, the captain was among the survivors.

WAR VALLEY

The Shipping Controller (W. H. Cocker line & Co.); 1918; W. Gray & Co.; 3,104 tons; 331x46-7x23-1; 430 n.h.p.; triple-expansion engines.

The British steamship *War Valley* was wrecked on North Scroby Sands on February 16th, 1919. She was on a voyage from Leith to Savona carrying a cargo of coal.

WARABI

Japanese Navy, destroyer; 1921; Japan; 770 tons; 275x26x8; 17,500 s.h.p.; 31-5 knots; turbine engines; Kanpon boilers; three 4-1 in. guns, 2 m.g.A.A., 4 T.T.

The destroyer *Warabi* was a unit of a flotilla operating with a fleet commanded by Admiral Kanji Kato, which had been carrying out exercises in the Bungo Channel. On the night of August 24th, 1927, when on the way back to its base the fleet practised a night destroyer attack, during which the cruiser *Zintu* rammed the *Warabi* which was crossing her bows in the darkness at over 30 knots. At the same time the cruiser *Naka* rammed the destroyer *Asi* but did not sink her. The *Warabi* remained afloat for 15 minutes before she sank in 60 fathoms with the loss of 12 officers and 90 ratings.

The *Asi*, which lost 18 all told, was towed back to dock.

WARATAH

*Volum & Co.; 1846; Dundee; 438 tons; 150 (approx.) x — x —. The barque *War at ah* was bound from England to Sydney, N.S.W. When off Ushant on February 16th, 1848, she was wrecked with the loss of 13 lives.*

WARATAH

Blue Anchor Line; 1908; Barclay, Curie & Co.; 9,339 tons; 465x59-4x27; 1,003 n.h.p.; 13 knots; quadruple-expansion engines.

The loss of the *Waratah*, Capt. J. F. Ilbery, is accounted one of the great mysteries of the sea. The ship was employed on Messrs Lund's service running between England and Australia by way of the Cape, and she was bound from Sydney to London on her second voyage when the disaster occurred. From his experiences on the first voyage, Capt. Ilbery had formed the opinion that she was not so "stiff" in standing up to the sea as he would have wished; he did not, however, make a report on the matter. It was known that it was inadvisable to move the vessel in dock without ballast, and this, though it caused the captain some concern, was also not thought sufficient to call for an examination.

On Sunday, July 25th, 1909, the *Waratah* put in at Durban, leaving again on the 26th. While at this port Mr. Claud Sawyer, a first-class passenger from Australia to England, relinquished his claim to be carried further on the *Waratah* and booked a passage on another vessel. The reason he gave for this action was that he considered the ship unseaworthy, as she took a long time to recover when rolling, there being a distinct 'hang' after every roll.

At Durban the ship coaled and took on board cargo and passengers, having on board a total of 211 persons, of whom 119 were crew. At 6 a.m. on the 27th the *Waratah* exchanged signals with the *Clan Machtyre*, also bound for England, the ships remaining in sight of each other for about three hours. At 9.30 a.m. the *Waratah*, being the faster ship, was lost to view by the *Clan Machtyre*; this was the last seen of her.

Preparations were made at Cape Town for the arrival of the ship, it being assumed that she would arrive during the forenoon of July

29th. This day was Thursday and no anxiety was felt for a few days as bad weather was held to be responsible for the ship's non-appearance. Vessels entering Cape Town and Durban reported a violent gale, the steamship *flovo* entering Cape Town 24 hours late and the Norwegian steamship *Solveig* entering Durban in a damaged condition. The *Clan Machtyre*, which was following the same course as the *Waratah*, reported very heavy weather off the Cape on July 28th, with squalls of hurricane force. None of the ships above, including the *Waratah*, was equipped with wireless.

On July 31st the tug *T. E. Fuller* and on August 1st the tug *Harry Escombe* and the cruisers *Forte* and *Pandora* left Durban to search for the missing steamship, followed later by the cruiser *Hermes*. The search proved unsuccessful and by the end of the week very little hope remained.

In order that the loss should be proved beyond a doubt the owners, in conjunction with the Australian government and the underwriters, chartered the Union-Castle cargo steamship *Sabine* to make a careful search of the southern ocean. She left Cape Town on September 11th having on board searchlights, towing apparatus, stores and an officer and 75 ratings of the Royal Navy. On December 7th she returned without news of the missing liner, having covered 14,000 miles of sea.

On December 15th, 1909, the *Waratah* was Posted Missing at Lloyds.

In February 1910, as a result of a public meeting at Melbourne, the steamship *Wakefield* was sent out on a systematic search lasting three months, but failed to make any discovery.

WARD

United States Navy, destroyer; 1919; Navy Yard, Mare Island; 1,060 tons; 314-5x30-5x8-5; 25,000 h.p.; 35 knots; six 3 in. guns, 2 m.g.A.A., 12 T.T.

The United States destroyer transport *Ward*, Lt. R. E. Farwell, was engaged in the operations in Ormoc Bay on December 7th, 1944, during the American landing on Leyte, Philippine Islands. The destroyer was attacked by three Japanese bombers which hit her just above the waterline on the port side. The explosion which followed completely wrecked the ship, but there was no loss of life, though several of the crew were badly burned. Later the *Ward* was sunk by gunfire of ships in company.

WARILDA

Adelaide Steamship Co.; 1912; W. Beardmore & Co.; 7,713 tons; 411-6x56-7x34-1; 762 n.h.p.; 16 knots; quadruple-expansion engines.

The *Warilda* was taken over for government service as a troopship during the First World War. After several voyages she was fitted out as a hospital ship and engaged upon the Southampton-Havre run. On August 3rd, 1918, when returning from France with about 700 wounded she was torpedoed and sunk with a very heavy loss of life. The weather was thick but the white hull and red crosses of the ship were fairly discernable.

The *Warilda* remained afloat for about two hours and then sank, taking with her 123 persons. The number saved was 678, including the commander, Capt. Sim, who was later decorated with the O.B.E. by King George V.

Up to the time of her sinking the vessel had carried over 70,000 troops and wounded.

WARKWORTH

Dagleish S.S. Co.; 1924; Blythswood Shipbuilding Co.; 4,941 tons; 401-4x53-2x26-9; 425 n.h.p.; 11 knots; triple-expansion engines.

The steamship *Warkworth*, Capt. T. Wilson, in convoy from the Tyne to Halifax, was sunk by collision with the British steamship *Selvestan* about 500 miles S.S.W. of the Vestmann Islands on October 10th, 1941. Thirteen men lost their lives, Capt. Wilson was among the survivors.

WARLABY

Ropner Shipping Co.; 1927; W. Gray & Co.; 4,876 tons; 390-1x55x26-5; 439 n.h.p.; 11 knots; triple-expansion engines.

The steamship *Warlabby*, Capt. S. H. Murray, in convoy from Alexandra to Oban with cottonseed, was shelled and sunk by a German cruiser of the *Bliicher* class on February 12th, 1941, about

WARNOW

200 miles S.E. of St. Michaels, Azores. Capt. Murray, eight officers and 27 men were lost.

WARNOW

J. Mitchell & Sons; 1883; J. Readhead & Co.; 1,593 tons; 257 x 34-7x19-6; 173 n.h.p.; 9 knots; compound engines.
The steamship *Warnow* was torpedoed and sunk by a German submarine six miles W. of Trevoise Head on May 2nd, 1917. The captain and 13 others were killed.

WAROONGA

British India Steam Nav. Co.; 1914; W. Denny & Bros.; 9,365 tons; 511-1x64-2x32; 800n.h.p.; quadruple-expansion engines.
The British steamship *Waroonga*, in convoy from New York to Liverpool, was torpedoed by a German submarine at 1.3 a.m. on April 5th, 1943, about 500 miles S.E. of Cape Farewell. The ship sank at 8 a.m. on the 6th. Eleven of the crew and six passengers were lost, 113 survivors were landed.

WARRIAN

United Africa Co.; 1929; Porsgrund Mek. Vcerks; 1,057 tons; 210-2x34-2x15-5; 66 n.h.p.; compound engines. The British cargo ship *Warrian* sank after a collision with the *Pierre Loti* off the entrance to the Bonny River on December 20th, 1941. She was on a voyage from Lagos to Port Harcourt carrying a general cargo.

WARRIMOO

Tan Kah Kee; 1892; C. S. Swan & Hunter; 3,528; 345 x42-2 x 25-1; 722 n.h.p.; triple-expansion engines. The British steamship *Warrimoo* sank after a collision off Bona on May 17th, 1918, while carrying troops from Bizerta to Marseilles.

WARRINGTON

United States Navy, destroyer; 1937; Federal Shipbuilding Co.; 1,850 tons; 371x36-2x10-2; 52,000s.h.p.; 37-5 knots; turbine engines; Babcock & Wilcox boilers; eight 5 in. guns, 10 smaller, 12 T.T.
The destroyer *Warrington* was off the Bahamas on September 13th, 1944, in company with four small U.S. vessels, when she was overwhelmed by a hurricane. All the ships were sunk, with the loss of 344 officers and ratings.

WARRIOR

British Navy, armoured cruiser; 1905; Pembroke Dockyard; 13,550 tons; 480x73-5x27-5; 23,500 i.h.p.; 22-9 knots; triple-expansion engines; Yarrow boilers; six 9-2 in. guns, four 7-5 in., twenty-four 3 pdr., 4m.g.; 3 T.T.
The powerful armoured cruiser *Warrior*, Capt. V. B. Molteno, was a unit of the 1st Cruiser Squadron at the battle of Jutland, May 31st, 1916, and carried a complement of 850. At 5.30 on the afternoon of the battle the squadron consisting of *Defence* (which see), flagship of Rear-Admiral Sir R. Arbuthnot, *Warrior*, *Duke of Edinburgh* and *Black Prince* (which see) was rapidly approaching the German battle cruisers of Admiral Hipper's Scouting Force. Twenty minutes later two of the ships, *Defence* and *Warrior*, saw the Germans ahead of them, with Admiral Beatty in *Lion* coming up from westward. A race ensued, with the two cruisers in the most advantageous position for ranging on the target. The first German ship to be sighted was the light cruiser *Wiesbaden* (which see), which was already in flames. Bearing down on this ship Admiral Arbuthnot poured in his salvoes despite the heavy fire of the German battle cruisers. The *Defence* was then hit by two salvoes in quick succession and blew up with the loss of all on board.
In this brief action *Warrior's* engines were badly damaged and but for the timely arrival of the battleship *War spite* she would no doubt have been sunk. Later she fell in with the seaplane carrier *Engadine*, which towed her more than 100 miles toward Cromarty, but early on the morning of June 1st she was in a sinking condition. Capt. Molteno ordered the ship's company to transfer to *Engadine* and *Warrior* was left to sink. Her casualties amounted to one officer and 70 ratings killed and two officers and 25 ratings wounded.

WARRIOR

Waterman S.S. Corp.; 1920; Pusey & Jones Co.; 7,551 tons; 439'6x60-2x33-7; 492n.h.p.; triple-expansion engines. The American steamship *Warrior* was torpedoed and sunk by a German submarine on July 1st, 1942, N. of Trinidad, with the loss of seven lives.

WARSAW

*Leith, Hull & Hamburg Steam Packet Co.; 1864; McNab & Co.; 608 tons; 2Q9-8x25*3x14'4; 90r.h.p.; 8 knots; compound engines.*
The steamship *Warsaw* was torpedoed and sunk by a German submarine four miles S.E. by E. of Start Point on December 20th, 1917. The captain and 16 others were killed.

WARZAWA

Polish-British S.S. Co.; 1916; W. Doxford & Sons; 2,487 tons; 286-7x40-6x26; 233 n.h.p.; triple-expansion engines. The Polish steamship *Warszawa*, with a crew of 47, five gunners and about 416 passengers, was torpedoed and sunk by a submarine on December 26th, 1941, on a voyage from Alexandria to Tobruk. Three of her crew and about 20 passengers were killed.

WARWICK

Donaldson Bros.; 1882; Wigham Richardson & Co.; 2,527 tons; 316x41-2x24-4; 313n.h.p.; compound engines. The British cargo ship *Warwick* was wrecked on Grand Manan Island, Bay of Fundy, on December 31st, 1896. She was on a voyage from the Clyde to St. John, N.B., carrying coal and a general cargo.

WARWICK

British Navy, destroyer; 1917; Hawthorn Leslie; 900 tons; 312x20-5x10-9; 27,000 s.h.p.; 34 knots; turbine engines; Yarrow boilers; four 4 in. guns, one 2pdr., 5 m.g. The destroyer *Warwick*, Cdr. D. A. Rayner, D.S.C., V.D., R.N.R., was torpedoed and sunk by a German submarine off Trevoise Head on February 20th, 1944. Three officers and 64 ratings were killed.

WARWICK CASTLE

Union-Castle Mail S.S. Co.; 1930; Harland & Wolff; 20,107 tons; 651'5x76'5x37-4; 4,100n.h.p.; 11knots; oilengines. The liner *Warwick Castle*, Capt. H. L. Shaw, was torpedoed and sunk by a German submarine about 200 miles off the coast of Portugal on November 14th, 1942. The vessel was serving as a troopship and was homeward bound after landing her troops to take part in the North African campaign. Capt. Shaw and 62 officers and men were killed.

WASHIN MARU

Morihei Kisen K.K.; 1918; Mitsubishi Zosen Kaisha; 1,870 tons; 250-0x37-7x20-5; 138 n.h.p.; triple-expansion engines. The steamship *Washin Mam* (*Wasin Maru*) struck a mine and sank on May 26th, 1945, off Shimonoseki.

WASHINGTONIAN

American-Hawaiian S.S. Co.; 1919; Osaka Iron Works; 6,617 tons; 415-1x55-7x32; 553 n.h.p.; triple-expansion engines. The American steamship *Washingtonian* was torpedoed and sunk by a submarine on April 6th, 1942, about 200 miles W. of Cape Comorin.

WASP

British Navy, gunboat; 1881; British Isles; 465 tons; 125x23x 10; 360 i.h.p.; 9-5 knots; compound engines; two 64pdr. guns, two 20 pdr. (all ml.r.), 2 m.g.
The gunboat *Wasp*, Lt. J. D. Nicholls, with a crew of 58 officers and men was employed to convey the Irish Harbours and Fisheries Commissioners on their various occasions around the Irish coast. On the morning of September 22nd, 1884, she was on her way from Westport, Co. Mayo, to Moville in Lough Foyle, where she was to embark the Commissioners. The *Wasp* was proceeding under sail only when at about 3.30 a.m., off Tory Island, in clear weather, she struck on an isolated rock north of the extreme west of the island.
Lt. Nicholls ordered full steam as it was impossible to get away from the coast under sail but the order could not be obeyed as the

fires were banked and there was not sufficient steam. Seeing the position to be hopeless Lt. Nicholls then ordered out the boats, of which there were four, but the seas were pounding the sinking vessel with such violence that they were smashed as they hung from the davits. A heavy sea then struck the bridge and washed Lt. Nicholls and two other officers overboard, while at the same time the ship slipped off the rocks into deep water and foundered.

Those lost numbered 52, including all the officers, the saved being four seamen and two marines.

WASP

British Navy, gunboat; 1887; Armstrong & Co.; 715 tons; 165x29x11-9; 1,000 i.h.p.; 13 knots; triple-expansion engines; six 4 in. guns, 4 m.g.

The gunboat *Wasp*, Lt. Cdr. B. J. H. Adamson, was the second vessel of the same name and type to be lost by the Royal Navy within three years. She carried a complement of 73 officers and men and left Sheerness on May 21st, 1887, for Shanghai to serve on the China Station. On September 10th she left Singapore on the final run of her voyage, her expected date of arrival at Shanghai being September 26th, or thereabouts. She was never heard of again and in October the Admiralty announced her as having been lost.

WASP

United States Navy, aircraft carrier; 1939; Bethlehem Steel Co.; Quincy; 14,700 tons; 739X — X-; 55,000s.h.p.; 30 knots; turbine engines; Yarrow boilers; eight 5 in. guns, eighteen 1-1 in.; 77 aircraft.

Soon after the entry of the United States into the Second World War in December, 1941, the American aircraft carrier *Wasp* joined forces with the British Mediterranean Fleet and assisted in escorting convoys to Malta. Reinforcements of fighter aircraft for the island were flown off from her decks. On the commencement of the American offensive in Far Eastern waters the *Wasp*, then commanded by Capt. Forrest P. Sherman, was transferred there and took part in the operations which led to the occupation of Guadalcanal in the Solomon Islands. On the afternoon of September 15th, 1942, when south of the islands, the aircraft carrier was attacked by a Japanese submarine which scored three hits with torpedoes. She took a heavy list to starboard, caught fire and sank.

The *Wasp* carried a complement of about 2,000 of whom 193 went down with the vessel.

WATERHEN

Australian Navy, destroyer; 1918; Palmer & Co.; 1,090 tons; 312x29-5x10-9; 27,000s.h.p.; 34 knots; turbine engines; Yarrow boilers; four 4 in. guns, two 2pdr., 5 m.g., 6 T.T. The destroyer *Waterhen*, Lt. Cdr. J. H. Swain, R.A.N., was attacked and disabled by German bombers off Sidi Barani on June 30th, 1941. She was taken in tow but foundered on the way to port. The normal complement of the *Waterhen* was 134.

At the time of the attack the vessel was engaged in ferrying troops and supplies to Tobruk. There were no casualties among those on board.

WATERLAND

Shipping & Coal Co.; 1915; Rijke Co.; 1,107 tons; 225-2x33-1 x14-1; 164 n.h.p.; triple-expansion engines. The British steamship *Waterland*, on a voyage from Sunderland to Cowes with coal, struck a mine and sank on March 10th, 1941, off Dungeness. Five of her crew and two gunners were lost.

WATERLOO

Convict ship; 1815; Bristol; 414 tons.

The convict ship *Waterloo*, Capt. Agar, was built at Bristol in the year of the famous battle from which she took her name. In June 1842 the *Waterloo* left England for Sydney having on board 219 male convicts, Lt. Hext of the 4th Regt. and Ensign Leigh of the 99th, with 49 men from both regiments as guard, five women, 22 children and 33 crew, making 330 persons all told. The ship arrived at Simon's Bay, the Cape, late in August and lay at anchor for some days taking in provisions. On the 27th there was a gale which was of no particular violence, but from her position off shore the *Waterloo* showed sufficient distress to attract a large crowd along the beach who watched her during the hours of daylight. At about 10 p.m. the

convict ship parted from her anchors and drifted ashore, breaking in two within half an hour of stranding. On striking she commenced to roll violently and after this had happened three or four times her masts went by the board.

There was no chance for the boats, either from the ship or from the shore, and the only hope for those on board was to swim, or drift, the short distance which separated the ship from the beach. The hatches were thrown open and the unfortunate convicts were allowed to avail themselves of whatever chances there were of saving themselves. Immediately they mustered on deck, however, a huge wave swept many of them overboard. So heavy were the breakers that in 90 minutes few vestiges of her remained.

The number drowned was 190. Capt. Agar was among the survivors.

WATERVILLE

R. Mackie & Co.; 1891; J. Readhead & Sons; 1,968 tons; 271-2x38x17-5; 181 n.h.p.; triple-expansion engines. The British steamship *Waterville* was wrecked off Lerwick on November 26th, 1918, while on a voyage from Archangel to Aberdeen.

WATHFIELD

Doughty Shipping Co.; 1905; J. Readhead & Sons; 3,012 tons; 322x47-6x23-5; 293 n.h.p.; 10 knots; triple-expansion engines.

The steamship *Wathfield* was torpedoed and sunk by a German submarine 15 miles N. of Cape Carbon on February 21st, 1917. The captain and 17 others were killed.

WAVELET

Chr. Salvesen & Co.; 1905; W. Gray & Co.; 2,992 tons; 330-7 x 46-1x21-9; 280 n.h.p.; triple-expansion engines.

The British steamship *Wavelet* was wrecked near Bjugna Rock, Norway, on August 27th, 1916, while on a voyage from Narvik! to the Tees carrying a cargo of iron ore.

WAVERLEY

Pymon Steamship Co.; 1901; Bar tram & Sons; 3,853 tons; 365x46x17-9; 313 n.h.p.; 9-5 knots; triple-expansion engines.

The steamship *Waverley* was torpedoed and sunk by a German submarine 33 miles N.E.-J-N. of Cape Ivi on December 20th, 1917. Twenty-two men were killed, the captain was among the survivors.

WAVERLEY

London, Midland & Scottish Railway Co.; 1899; A. & J. Inglis; 537 tons; 235x26x8-5; 304n.h.p.; 19-75 knots; compound engines.

The paddle steamship *Waverley* was taken over by the Admiralty at the beginning of the Second World War for service as a minesweeper. On May 29th, 1940, when assisting in the evacuation of the British Army from the Dunkirk beaches, she was hit by a bomb and rendered unmanageable. She was carrying approximately 600 troops and orders were given to abandon ship, as she was sinking rapidly. It was not possible for many of those on board to be saved and she went down with about 350 officers and men.

The full story of the Dunkirk Evacuation is told under the destroyer *Grafton*.

WAYFARER

Charente S.S. Co.; 1925; C. Cornell & Co.; 5,068 tons; 395-5x52-5x28; 464n.h.p.; 12 knots; triple-expansion engines.

The steamship *Wayfarer*, Capt. J. Wales, was torpedoed and sunk by submarine on August 19th, 1944, about 150 miles E. of Mozambique. The vessel carried a crew of 53, seven gunners and one passenger. Capt. Wales, 44 of the crew, five gunners and the passenger were lost.

WAYO MARU

Toyo Risen K.K.; 2,762 tons.

The steamship *Wayo Maru* was bombed and sunk by U.S. land-based aircraft on March 11th, 1945, about 150 miles E. of the Batan Islands, Philippines.

WAZAN MARU

WAZAN MARU

Japanese Government; 1918; Seattle Construction & Dry dock Co.; 4,851 tons; 380-6x53-2x27; 472 n.h.p.; triple-expansion engines.

The steamship *Wazan Maru* was formerly the British *Vitorlock*, captured by the Japanese in December, 1941. She was torpedoed and sunk by the U.S. submarine *Sargo* on April 26th, 1944, S. of Katsuura, Japan.

WAZIRISTAN

Hindustan S.S. Co.; 1924; Short Bros.; 5,135 tons; 390 x 53-5 x 28-6; 363 n.h.p.; triple-expansion engines.

The British steamship *Waziristan* left New York on November 23rd, 1941, and Reykjavik on December 26th, for Murmansk, in convoy. She was last seen at 4p.m. on January 1st by the Panamanian steamship *Cold Harbor*, about 300 miles N.W. of Jan Mayen Island. The captain of the *Cold Harbor* reported strong easterly gales and thick ice and considered it possible that the *Waziristan* may have been crushed in the ice. Nothing more was heard of the ship or her crew of 37 and ten gunners.

WEAR

Witherington & Everett; 1905; S. P. Austin & Son; 1,076 tons; 222'2x33-2x14-3; 145 n.h.p.; triple-expansion engines.

The British steamship *Wear* sank after striking a rock off the west coast of Guernsey on May 15th, 1910. She was on a voyage from the Tyne to St. Servan carrying a cargo of coal.

WEAR

James Pater son & Co. Pty.; 1911JL; J. Crown & Sons; 1,892 tons; 268x37-9 x 17-6; 205 n.h.p.; triple-expansion engines. The Australian cargo ship *Wear* sank after a collision with the Norwegian motorship *Anatina*, 4,986 tons, ten miles S. of Montagu Island, N.S.W., on September 8th, 1944, while on a voyage in ballast from Melbourne to Newcastle, N.S.W.

WEGA

The Admiralty (Everett & Newbiggin); 1885; Flensburger Schiffsbau-Ges.; 839 tons; 200-4x30x14; 100n.h.p.; 10-5 knots; compound engines.

The steamship *Wega* was a German ship taken prize. On June 14th, 1917, she was torpedoed and sunk by a German submarine 20 miles W. by S. of the Royal Sovereign Light-vessel. Five men were killed, the captain was among the survivors.

WEICHELLELAND

German Government; 1906; Tyne Iron S.B. Co.; 3,583 tons; 348-8x50x23-2; 311 n.h.p.; triple-expansion engines. The steamship *Weichselland* was formerly the Latvian *Gundega*, seized by the Germans. On December 21st, 1944, she struck a mine and sank W. of Christiansand.

WEILBURG

Fried. Krupp A.G.; 1944; 1,923 tons.

The German ship *Weilburg* struck a mine and sank on September 2nd, 1944, in Kiel Bay.

WEISSENBURG

German Government; 1940; Odense Staalskibsverft; 6,316 tons; 431-5x54-6x30-8; oil engines.

The tanker *Weissenburg* was under construction in Denmark as the *Ovatella*, for British owners, and was taken over by the Germans on completion. On November 23rd, 1943, she was bombed and sunk by British aircraft off Texel.

WELBURY

E.R. Care; 1882; W. Gray & Co.; 1,847 tons; 262-1x35-6x20; 198 n.h.p.; compound engines.

The British cargo ship *Welbury* was wrecked at Hartland Point on April 30th, 1900, while on a voyage from Bilbao to Cardiff carrying a cargo of iron ore.

WELCOMBE

W. R. Corfield & E. B. Robson; 1883; R. Dixon & Co.; 2,166 tons; 275 x 38x22-6; 170 h.p.; compound inverted engines. The British cargo ship *Welcombe* was wrecked near Great Fish

River on November 17th, 1885, while on a voyage from East London to Port Elizabeth carrying a cargo of wool and hides.

WELCOMBE

Stanhope Steamship Co.; 1930; W. Gray & Co.; 5,122 tons; 421-8x55x25-5; 421 n.h.p.; 10 knots; quadruple-expansion engines.

The steamship *Welcombe*, Capt. Johnson, was in convoy in the North Atlantic on April 4th, 1941, when she was torpedoed and sunk by an enemy submarine. Fifteen of her crew of 41 were lost, 26 survivors, including Capt. Johnson, were landed at Liverpool.

WELHEIM

Hugo Stinnes G.m.b.H.; 1939; Flensburger Schiffsbau. Ges.; 5,455 tons; 415-8x60-2x21-6; 1180 n.h.p.; oil engines.

The German motorship *Welheim* was torpedoed and sunk by British motor torpedo boats on November 28th, 1944, off Bergen.

WELLAMO

L. Krogius; 1898; Gourlay Bros. & Co.; 1,050 tons; 200x31-2x13-6; 280 n.h.p.; triple-expansion engines.

The Finnish steamship *Wellamo* was sunk by a German submarine in the Baltic on August 30th, 1916.

WELLINGTON

Atlantic Shipping & Trading Co.; 1905; W. Doxford & Sons; 5,600 tons; 390-3x55-2x27-2; 359 n.h.p.; 10 knots; triple-expansion engines.

The steamship *Wellington* was torpedoed and sunk by a German submarine 175 miles N. by W. of Cape Villano on September 16th, 1918. The captain and four others were killed.

WELLINGTON STAR

Union Cold Storage Co.; 1939; Harland & Wolff; 13,212 tons; 535-5x70-4x32'1; 2,463n.h.p.; 16knots; oil engines.

The liner *Wellington Star*, Capt. T. Williams, was torpedoed, shelled and sunk by a German submarine on June 16th, 1940, some 400 miles W. of Vigo. The crew took to the boats and after eight days adrift, during which time they suffered considerably, Capt. Williams and 51 men reached Casablanca on the 24th and a boat containing the remaining 17 reached Figuera da Foz on the same day.

WELLPARK

Denholm Line Steamers; 1938; C. Connell & Co.; 4,649 tons; 407-4X54-7x24-5; 431 n.h.p.; triple-expansion engines.

The British steamship *Wellpark*, on a voyage from St. John, N.B., to Alexandria via the Cape, was sunk by the German raider *Santa Cruz* on March 30th, 1942, about 500 miles S.S.W. of St. Helena. Seven of the crew of 48 were killed, the remainder were taken prisoner.

WELSHMAN

British Navy, minelayer; 1940; British Isles; 2,650 tons; 410x39x11; 72,000s.h.p.; 40 knots; turbine engines; 3-dmm boilers; six 4-7 in. guns, several smaller, 100 mines. The minelayer *Welshman*, Capt. William H. D. Friedberger, D.S.O., with her sister ship, *Manxman*, was employed in minelaying off Brest and the neighbourhood in February 1942, as the German battleships *Gneisenau* and *Scharnhorst* were sheltering in that port. Their effort to mine the enemy ships proved unsuccessful, however, and in the spring they were ordered to the Mediterranean. On February 1st, 1943, *Welshman* was off Tobruk when she was torpedoed and sunk by a German submarine. Nine officers and 139 ratings were killed.

WELSFORD

1856; McMorran & Dunn; 1,292 tons; 193x38-2x22-7. The Canadian sailing ship *Welsford*, left St. John, N.B., for Liverpool in December 1856, with a cargo of deals. She was on her maiden voyage and carried a crew of 23. On the 25th, in bad weather, the vessel drove ashore on Cape Race, the captain and crew being drowned.

WENDOUREE

Huddart, Parker & Co. Pty.; 1882; S. & H. Morton & Co.; 1,640 tons; 273-8x36-3x19-3; 251 n.h.p.; compound engines.
The Australian steamship *Wendouree* was wrecked on Oyster Bank, Newcastle, N.S.W., on July 20th, 1898. She was carrying a cargo of coal from Newcastle, N.S.W., to Port Adelaide.

WENTWORTH

Dalgliesh S.S. Co.; 1919; Richardson, Duck & Co.; 5,213 tons; 400-6x52-4x28-4; 517 n.h.p.; 11 knots; triple-expansion engines.

The steamship *Wentworth*, Capt. R. G. Phillips, was about 500 miles E. of Domino, Labrador, in convoy on May 5th, 1943, when she was torpedoed and sunk by a German submarine. Five men were killed, Capt. Phillips was among the survivors.

WESERGAU

Norddeutscher Lloyd; 1943; 1,923.
The German *Wesergau* was torpedoed and sunk by a Norwegian submarine on April 6th, 1944, off Stadlandet, Norway.

WESERLAND

Hamburg-Amerika Linie; 1922; Blohm & Voss; 6,528 tons; 449-1x58-4x25-6; 935n.h.p.; oil engines. The German motorship *Weserland*, on a voyage from Japan to a German controlled port, was intercepted by U.S. warships and sunk by gunfire on January 2nd, 1944, about 900 miles W. of St. Helena. One hundred and thirty-four survivors were picked up by the Americans.

WESSEX

British Navy, destroyer; 1918; Hawthorn, Leslie & Co.; 1,100 tons; 312x29-5x10-9; 27,000s.h.p.; 34 knots; turbine engines; Yarrow boilers; four 4 in. guns, one 2pdr., 3 m.g., 5T.T.
The destroyer *Wessex*, Lt. Cdr. W. A. R. Cartwright, was bombed and sunk off Calais by German aircraft on May 25th, 1940, during the retreat of the British Army to Dunkirk. The destroyer carried a complement of 134, of whom six ratings were killed and 15 wounded.

WEST CELINA

U.S. Maritime Commission; 1919; Northwest Steel Co.; 5,722 tons; 409-8x54-2x27-2; 583 n.h.p.; turbine engines.
The steamship *West Celina* was torpedoed and sunk by a German submarine on August 19th, 1942, on a voyage from Trinidad to Boston. The ship sank in three minutes.

WEST CHETAC

U.S. Maritime Commission; 1919; South Western S.B. Co.; 5,627 tons; 410-5x54-3x27-2; 359 n.h.p.; triple-expansion engines.
The steamship *West Chelae* was torpedoed and sunk by a German submarine on September 24th, 1942, about 300 miles E. of Trinidad on a voyage from New York to the Persian Gulf. The captain and 30 of the crew were lost.

WEST CUMBERLAND

Nine Bros.; 1879; J. L. Thompson & Sons; 1,387 tons; 240-5 X 34x18-3; 150 h.p.; compound engines.
The British steamship *West Cumberland* sank after a collision with the British barque *Minero*, 478 tons, 60 miles N. of Cape Finisterre at midnight on June 10th, 1890, while on a voyage from Carthage to Mostyn carrying a cargo of ore.

WEST IVIS

Pope & Talbot; 1919; Ames S.B. & D.D. Co.; 5,666 tons; 410-5x54-2x29-2; 369 n.h.p.; triple-expansion engines. The American steamship *West Ivis* left New York on January 24th, 1942, for Buenos Aires. Nothing more was ever heard of the ship and she was considered to have been lost, probably by war causes, on February 16th about 150 miles S. of Barahona, Dominica.

WEST KEBAR

American West Africa Line; 1920; Long Beach S.B. Co.; 5,620 tons; 410-5x54-2x27-2; 359n.h.p.; triple-expansion engines.
The steamship *West Kebar* was torpedoed and sunk by a German

submarine on October 29th, 1942, about 500 miles E. of Martinique on a voyage from Freetown to St. Thomas and New York. Fourteen lives were lost.

WEST LASHAWAY

American West Africa Line; 1918; Skinner & Eddy Corp.; 5,637 tons; 409-6x54-2x27-1; turbine engines. The steamship *West Lashaway*, with a complement of 56 including some passengers, was torpedoed and sunk by a German submarine on August 30th, 1942, about 350 miles E. of Trinidad on a voyage from Takoradi to Trinidad. The ship sank in two minutes, and 17 survivors were later picked up from a raft.

WEST MAXIMUS

U.S. Maritime Commission; 1919; Skinner & Eddy Corp.; 5,561 tons; 409-6x54-2x27-2; turbine engines. The steamship *West Maximus* was torpedoed and sunk by a German submarine on May 5th, 1943, on a voyage from Newport to Boston. Five of the crew were killed.

WEST NOTUS

Pope & Talbot; 1920; South Western S.B. Co.; 5,492 tons; 410-5x54-3x27-2; 359n.h.p.; triple-expansion engines. The American steamship *West Notus* was torpedoed, shelled and sunk by a German submarine on June 1st, 1942, about 300 miles N.W. of the Bermudas, on a voyage from Buenos Aires to New York. The captain and four of the crew were killed.

WEST POINT

Norfolk & North American Steamship Co.; 1912; Irvine's S.B. & D.D. Co.; 3,847 tons; 375 X50x24-6; 340 n.h.p.; 10-5 knots; triple-expansion engines.
The steamship *West Point* was one of five ships sunk off Newport, Rhode Island, by the German submarine *U-53* on October 8th, 1916.

On the afternoon of October 7th, the *U-53*, Lt. Cdr. Rose, entered the harbour at Newport, Rhode Island, and made enquiries about the German commercial submarine *Bremen* which had left Germany for the United States some weeks previously, but was never heard of again. The commander then paid a visit to Admiral Knight, U.S.N., in accordance with naval etiquette, after which he interviewed newspaper correspondents and left after a stay of some three hours.

During the night the weather thickened and early on the morning of the 8th, having taken up a position off the Nantucket Lightship, the *U-53* stopped the American-Hawaiian liner *Kansas*. The liner sent out a S.O.S. at 5.30 a.m., but she was allowed to proceed on her way without molestation. At 1 p.m. a second S.O.S. came from the *West Point* and Admiral Cleaves, commanding U.S. destroyer flotillas in the neighbourhood, sent out 17 destroyers, despite the fog. Meanwhile the *West Point* had been sunk and her crew set adrift in the boats. Previously, at about 6 a.m., the s.s. *Strathdene*, 4,321 tons, had been sent to the bottom. Two American destroyers, the *Benham* and the *McDougall*, came on the scene and witnessed the destruction of the hospital ship *Stephano*. Later the *Benham* in her search for the boats made contact with the *U-53* again as she was about to sink the Holland-Amerika liner *Blommersdijk*, 4,850 tons, with time-bombs.

Finally the Norwegian steamship *Christian Knudsen* was destroyed, but thanks to the American navy which did its job in the fog with great skill, all the people adrift were found and safely landed.

These attacks, carried out not far beyond the three mile limit, caused intense feeling in the United States.

WEST PORTAL

Pope & Talbot; 1920; Merchant S.B. Corp.; 5,376 tons; 400-7x54-2x30-2; 645 n.h.p.; turbine engines. The American steamship *West Portal* was torpedoed and sunk by a German submarine on February 5th, 1943, on a voyage from New York to Liverpool.

WEST WALES

West Wales S.S. Co.; 1925; W. Dobson & Co.; 4,354 tons; 400x53X25-3; 490 n.h.p.; triple-expansion engines. The British steamship *West Wales*, on a voyage from New York and Halifax to Newport, was torpedoed and sunk by a German

WESTBOURNE

submarine on January 29th, 1941, about 350 miles W. of the Hebrides. Sixteen of the crew of 37 were lost.

WESTBOURNE

Cammell, Woolf & Haigh; 1879; R. Thompson, Jnr.; 1,886 tons; 275-8x34-1 X24-1; 160n.h.p.; compound engines. The British steamship *Westbourne* left Theodosia, Crimea, on November 24th, 1890, for Dunkirk, in bitterly cold and stormy weather. That same night the ship got into difficulties and foundered. The crew took to the boats but only one of these, with the captain and eight men, reached land and four of the eight men died soon afterwards from exposure.

WESTBURY

Capper, Alexander & Co.; 1901; Gourlay Bros. & Co.; 4,202 tons; 377 x 47 -1 x 26 - 5; 417 n.h.p.; triple-expansion engines. The British steamship *Westbury* was driven ashore during a hurricane and wrecked 22 miles W. of Quequen on April 1st, 1924, while on a voyage from Rio Grande to Bahia Blanca.

WESTBURY

Alexander Shipping Co.; 1928; Burntisland S.B.Co.; 4,712 tons; tons; 405x54-3x25-3; 493 n.h.p.; 11 knots; triple-expansion engines.

The steamship *Westbury*, Capt. W. Embleton, was in convoy about 200 miles E. of the Azores on February 12th, 1941, when she was attacked by the German heavy cruiser *Admiral Nipper*. The vessel was sunk with the loss of five of her crew, including Capt. Embleton. For further details see *Oswestry Grange*.

WESTERGATE

Franco-British S.S. Co.; 1881; Short Bros.; 1,760 tons; 260 x 36-1x20; 198 n.h.p.; 9-5 knots, compound engines.

The steamship *Westergate* was torpedoed and sunk by a German submarine 22 miles E.[^]S. of Start Point on April 21st, 1918. The captain and 23 others were lost.

WESTERN CHIEF

Douglas & Ramsey; 1918; Northwest Steel Co.; 5,760 tons; 409-8x54-2x27-7; 508 n.h.p.; turbine engines. The British steamship *Western Chief*, on a voyage from New York Halifax to Newport, was torpedoed and sunk by a German submarine on March 14th, 1941, about 500 miles S.S.W. of the Vest-mann Islands. Only one of the ship's four boats was floated and 22 of the crew were drowned.

WESTERN COAST

Coast Lines; 1916; Dublin Dockyard Co.; 1,394 tons; 240 - 3 X 36-1x18-3; 172 n.h.p.; 8-5 knots; triple-expansion engines. The steamship *Western Coast* was torpedoed and sunk by a German submarine ten miles W.S.W. of the Eddystone on November 17th, 1917. Seventeen men were killed, the captain was among the survivors.

WESTERN EMPIRE

G. Cairns; 1862; Baldwin, Quebec; 1,245 tons; 190-8x38-lx 22-9.

The sailing ship *Western Empire* sprang a leak in the Gulf of Mexico. Despite the efforts of the crew the vessel became water-logged, and had to be abandoned on September 18th, 1876. Ten persons were drowned.

WESTERN HEAD

Maritime Navigation Co.; 1919; American S.B. Co.; 2,599 tons; 251 X 43 -6 x 26-1; 352 n.h.p.; triple-expansion engines. The British steamship *Western Head*, on a voyage from Jamaica to Sydney, N.S., with sugar, was torpedoed and sunk by a German submarine on May 28th, 1942, in the Windward Passage. Twenty-four of her crew of 30 were lost.

WESTERN KNIGHT

American South African Line; 1919; Ames S.B. & D.D. Co.; 5,779 tons; 409-8x54-2x29-2; 714n.h.p.; triple-expansion engines. The American steamship *Western Knight*, on a voyage from New

York to Delagoa Bay, was wrecked on April 8th, 1929, at Chelsea Point, three miles from Cape Recife, South Africa.

WESTERN PRINCE

Prince Line; 1929; Napier & Miller; 10,926 tons; 496-2x64-8x 35-4; 2,200n.h.p.; oilengines.

The British motorship *Western Prince*, Capt. Reid, on a voyage from New York to Liverpool, was torpedoed and sunk by a German submarine at 8.5 a.m. on December 14th, 1940, about 500 miles W. of the Orkney Islands. Capt. Reid, eight of the crew and six passengers were lost, 99 crew and 55 passengers were saved.

WESTFALEN

Deutsche Lufthansa A.G.; 1906; / C. Tecklenborg; 5,367 tons; 409-4x52-8x28; 386n.h.p.; quadruples-expansion engines. The steamship *Westfalen* struck a mine and sank on September 8th, 1944, off Stora Polsan, Gothenburg, on a voyage from Norway to Germany. She was carrying some 200 German military personnel and 50 Norwegian prisoners. There were only 78 survivors, including five of the prisoners.

WESTFALIA

Hugh Hogarth; 1882; W. Hamilton & Co.; 1J35 tons; 241 x 33-4x13-9; 130h.p.; compound engines.

The British steamship *West/alia* was wrecked near Santander on February 5th, 1889, while on a voyage from Huelva to Liverpool carrying a cargo of esparto grass.

WESTFALIA

Kolner Reederei A.G.; 1911; A.G.Neptun; 945 tons; 220-8 x 33-6x12-2; 57n.h.p.; triple-expansion engines. The German steamship *WestfaUa*, on a voyage from Rotterdam to Kolberg with grain, was sunk by collision with the steamship *Schwalbe*, 842 tons, on October 20th, 1937, off Ymuiden.

WESTLAND

Scheepvaart & Steenkolen Maats; 1906; Werf. voorheen Rijkee & Co.; 1,283 tons; 231-2x34-4x14-8; 146n.h.p.; triple-expansion engines. The Dutch steamship *Westland* was torpedoed and sunk by a German submarine in the North Sea on May 25th, 1917.

WESTLAND

German Government; 1926; Jan Smit. Czn.; 1,259 tons; 250-2X36-2x16; 304n.h.p.; triple-expansion engines.

The steamship *Westland* was a former Dutch ship taken over by the Germans. On May 23rd, 1943, she struck a mine and sank N. of Terschelling.

WESTMINSTER

Westminster Shipping Co.; 1905; Swan, Hunter & Wigham Richardson; 4,342 tons; 375-5x47-3x18-9; 397n.h.p.; 10-5 knots; triple-expansion engines.

The steamship *Westminster* was proceeding in ballast from Torre Annunziata to Port Said when she was attacked by a German submarine 196 miles E. by S. of Malta on December 14th, 1916. The vessel sank in very few minutes. There was just enough time to launch the boats but these were shelled by the submarine at a range of 3,000 yards. The captain and chief engineer were killed and two engineers and three seamen drowned when one boat sank* In addition to these four men had been killed by the explosion of the torpedoes. Altogether 15 men lost their lives.

WESTOVER

*United States Shipping Board; 1918; J. F. Duthie & Co.; 5,770 tons; 409-5x54*2x27-6; turbine engines.* The American steamship *Westover* was torpedoed and sunk by a German submarine in the Atlantic on July 11th, 1918.

WESTPOLDER

Naam. Venn. Westpolder; 1917; J. & A. Van der Schuyt; 749 tons; 181 x28-3x12-3; 83 n.h.p.; triple-expansion engines.

The Dutch steamship *Westpolder* was bound from Rotterdam to Methil on January 15th, 1918, when she struck a mine and sank some 60 miles W.N.W. of the Hook of Holland. Six of the crew were lost.

WESTPOOL

Ministry of Shipping (N. Campbell & Co.); 1918; J. F. Duthie & Co.; 5,724 tons; 409'5x54'2x27-6; 601 n.h.p.; triple-expansion engines.

The British steamship *Westpool*, on a voyage from Baltimore and Halifax to Leith, was torpedoed and sunk by a German submarine on April 3rd, 1941, about 650 miles E.S.E. of Cape Farewell. The ship sank in less than a minute with the loss of 35 of the crew of 43,

WESTSEE

W. Schuchmann; 1914; A.G. Weser; 5,911 tons; 421-6x56-2x29-6; 420 n.h.p.; triple-expansion engines.

The German steamship *Westsee* was disabled by striking a mine on November 30th, 1942, off the entrance to Petsamo, and was destroyed by gunfire from Russian shore batteries.

WESTSEE II

W. Schuchmann; 1893; Sir R. Dixon & Co.; 2,935 tons; 315X41-8x26; 273 n.h.p.; triple-expansion engines. The German steamship *Westsee II*, on a voyage from Narvik to Rotterdam with iron ore, was wrecked on January 6th, 1927, at Arnoy, Norway,

WETHERBY

Furness, Withy & Co.; 1883; W. Gray & Co.; 2,129 tons; 285-5X36-1x24-2; 220 h.p.; compound engines. The British steamship *Wetherby* was wrecked off Cape Hatteras on December 3rd, 1893, bound for Newport News to coal, on a voyage from Fernandina to Rotterdam carrying a cargo of phosphate.

WEXFORD

Western S.S. Co.; 1883; W. Doxford & Sons; 2,104 tons; 250 x 40 • 1 x 16 - 7; 210 n.h.p.; triple-expansion engines. The Canadian steamship *Wexford* foundered in Lake Huron on November 9th, 1913, while on a voyage from Fort William to Goderick carrying a cargo of grain.

WEYBURN

Canadian Navy, corvette; 1941; Canada; 925 tons; 193x32x16; 17 knots; quadruple-expansion engines; one 4 in. A.A. gun, several smaller.

The Canadian corvette *Weyburn*, Lt Cdr. T. M. W. Goldby, was returning to Britain from the Mediterranean where she had been participating in the North African fighting from the beginning when she struck a mine and sank in the straits of Gibraltar. The disaster took place on February 22nd, 1943, the force of the explosion severing the steam pipes and rendering the vessel helpless. Lt. Cdr. Goldby was knocked unconscious and an attempt to rescue him was made by Sub. Lt. Bark, but before that officer could accomplish his purpose the corvette sank by the stern. In addition to the two officers already mentioned five ratings lost their lives and five ratings were wounded. British destroyers picked up the survivors and took them to Gibraltar.

WHIRLWIND

British Navy, destroyer; 1917; Swan, Hunter, Wigham Richardson; 1,100 tons; 312x29-5x10-8; 27,000s.h.p.; 34 knots; turbine engines; Yarrow Boilers; four 4 in. guns, two 2pdr., 5m.g.; 6T.T. The destroyer *Whirlwind*, Lt. Cdr. J. M. Rodgers, built in 1917, had been converted into an escort vessel, her torpedo tubes and some of her lighter guns being removed. On July 5th, 1940, the vessel was escorting a convoy off S.W. Ireland when she was torpedoed and sunk by a German submarine. Lt. Cdr. Rodgers, another officer and 57 ratings were killed.

WHITBURN

Macintyre Bros. & Co.; 1872; Palmer's Co.; 1,270 tons; 241 X32 • 1 x 18-2; 120 h.p.; compound inverted engines. The British steamship *Whitburn* was wrecked near Cape Cavallo on November 21st, 1886, while on a voyage in ballast from Naples to Barletta.

WHITE CREST

Hall Bros. S.S. Co.; 1928; W. Dobson & Co.; 4,365 tons; 400-4x53x25-3; 410 n.h.p.; triple-expansion engines. The British steamship *White Crest* left Cardiff on February 12th, 1942, and Belfast Lough on the 15th for Buenos Aires with coal. On the 19th she lost contact with her convoy during a heavy gale about 900 miles W. of Inishtrahull and was never seen again. The ship carried a crew of 47.

WHITE HEAD

Ulster Steamship Co.; 1880; Harland & Wolff; 1,172 tons; 249-7x31-2x15-5; 140 n.h.p.; 9-5 knots; compound engines. The steamship *White Head* was torpedoed and sunk by a German submarine 40 miles N.N.E. of Suda Bay, Crete, on October 15th, 1917. Twenty-three men were killed, the captain was among the survivors.

WHITE SEA

Sea Transport Co.; 1904; Craig, Taylor & Co.; 1,923 tons; 280 x 42 - 4 x 19 • 5; 210 n.h.p.; triple-expansion engines. The British steamship *White Sea* was wrecked on Shag Rock, St. Mary's Bay, N.F.L., on August 29th, 1916. She was carrying a cargo of matchlogs from Montreal to Sharpness.

WHITE SWAN

Dixon, Sample & Co.; 1903; Blyth S.B. Co.; 2,173 tons; 287-3x43-2x19-5; 219 n.h.p.; triple-expansion engines. The British cargo ship *White Swan* was wrecked near Yarmouth on November 17th, 1916.

WHITEMANTLE

Gas, Light & Coke Co.; 1920; Wood, Skinner Co.; 1,692 tons; 260'1x37-7x16-4; 208 n.h.p.; triple-expansion engines. The British steamship *Whitemantle*, on a voyage from the Tyne to London with coal, struck a mine and sank on October 22nd, 1939, about 50 miles S.S.E. of Flamborough Head, with the loss of 14 lives.

WHITFORD POINT

Gowan Shipping Co.; 1928; R. Duncan & Co.; 5,026 tons; 407x53-5x26-7; 545 n.h.p.; triple-expansion engines. The British steamship *Whitford Point*, on a voyage from Baltimore and Halifax to London with 7,840 tons of steel, was torpedoed and sunk on October 19th, 1940, about 400 miles W. of the Hebrides. Thirty-six of her crew and a gunner were lost, three survivors were landed.

WHITGIFT

Westminster Shipping Co.; 1901; Northumberland Shipbuilding Co.; 4,397 tons; 381-5x48x28-1; 376n.h.p.; 11 knots; triple-expansion engines. The steamship *Whitgift* was torpedoed and sunk by a German submarine off Ushant on April 20th, 1916. The captain and 31 others were killed.

WHITLEY

British Navy, destroyer; 1918; W. Doxford & Sons; 1,100 tons; 312x29-5x10-9; 27,000s.h.p.; 34 knots; turbine engines; Yarrow boilers; four 4 in. guns, two 2pdr., 5 m.g., 6 T.T. The destroyer *Whitley*, Lt. Cdr. G. N. Rolfe, acting as an anti-aircraft ship, was bombed and badly damaged off the Dutch coast on May 19th, 1940. The ship began to sink and had to be beached and abandoned. There were four casualties among her complement of 98. At the time of her loss *Whitley* was supporting the left flank of the Allied armies by anti-aircraft gunfire from the sea. The full story of the invasion of the Low Countries and the Dunkirk evacuation is told under H.M. destroyer *Grafton*.

WICKER

Polish Navy, destroyer; 1927; Chantiers Navals Français; 1,540 tons; 351x29x9-9; 35,000i.h.p.; 33 knots; turbine engines; four 5 • 1 in. guns, two 47 m.m., 4 m.g., 6 T.T. The Polish destroyer *Wicher* was sunk in the first fighting of the Second World War. The vessel was attacked by German destroyers and aircraft off Hel on September 3rd, 1939. She carried a complement of about 160.

WICHITA

U.S. Maritime Commission; 1921; Doullut & Williams S.B. Co.; 6,174 tons; 395-5x55x31-4; 934 n.h.p.; oilengines. The motorship Wichita left Takoradi on September 1st, 1942, for Trinidad. Nothing more was ever heard of the ship and she was considered to have been sunk by a submarine on the 19th about 100 miles N.E. of Barbados.

WICKLOW

R.M.Hudson; 1882; R. Thompson & Sons; 2,967 tons; 330-2x 40-1x29-6; triple-expansion engines. The British steamship Wicklow was wrecked near Calais on January 7th, 1893, while on a voyage from Buenos Aires to Dunkirk carrying a cargo of wool and maize.

WIDAR

SeeredereiFriggaA.G.; 1935; Nordseewerke Emden; 5,972 tons; 437-1x58-9x23-6; 313 n.h.p.; compound engines & L.P. turbine. The German steamship Widar was torpedoed and sunk by British aircraft on March 18th, 1941, in Borkum Roads.

WIDESTONE

A. E. Furst & F. G. Browne; 1920; Tidewater Shipbuilders; 3J92 tons; 331-2x46-8x23-3; 470 n.h.p.; triple-expansion engines. The British steamship Widestone, on a voyage from Cardiff to St. John, N.B., with coal, was torpedoed and sunk by a German submarine on November 17th, 1942, about 500 miles S.E. of Cape Farewell. All on board were lost, 35 crew and seven gunners.

WIDNES

British Navy fleet minesweeper; 1918; Napier & Miller; 710 tons; 231 x 28 x 7 - 5; 2,200 i.h.p.; 16 knots; triple-expansion engines; Yarrow boilers; one 4 in. gun, 1 smaller. The fleet minesweeper Widnes was bombed and sunk by enemy aircraft in Suda Bay, Crete, on May 20th, 1941. The vessel's normal complement was 73.

WIEN

Austrian Navy, 2nd class battleship; 1895; Stabilimento Tecnico; 5,600tons; 323x56x21; 8,500i.h.p.; 17knots; triple-expansion engines; cylindrical boilers; four 9-4 in. guns, six 6 in., fourteen 3pdr.,2T.T. The Austrian battleship Wien was a unit of the squadron of old battleships commanded by Vice-Admiral Fielder. She was long past her prime as a fighting unit and for that reason saw very little of the spasmodic fighting in the Adriatic during the First World War. On the night of December 9th, 1917, the ship was lying off the port of Muggia, near Trieste, when she was attacked by an Italian motor torpedo boat under command of Cdr. Luigi Rizzo. This officer had previously cut through the wire obstructions to the harbour and up to the big ship unobserved, followed by a second torpedo boat commanded by Lt. Ferrarini. The small craft carried two torpedoes each and these they discharged at close range, those fired by Cdr. Rizzo striking the Wien and sinking her. The torpedoes fired by Lt. Ferrarini struck another large man-of-war lying astern of the Wien but did not sink her. There was much confusion among the Austrians accompanied by wild and ineffective firing, under cover of which the two Italian craft got away in safety.

The official complement of the *Wien* was 400, most of whom were saved.

WIESBADEN

German Navy, light cruiser; 1913; Kiel Dockyard; 4,900 tons; 456x45x17; 25,500i.h.p.; 27-5 knots; turbine engines; Schulz-Thornycroft boilers; seven 5-9 in. guns, 2 T.T. The light cruiser Wiesbaden, Capt. Reiss, with a complement of 27 officers and 544 men, served as a unit of the German 2nd Scouting Group in the Battle of Jutland.

At 5.27p.m. on May 31st, 1916, the 2nd Scouting Group was sighted by the British cruiser *Chester* steering N.N.W. The leading ship, *Frankfurt*, flagship of Rear-Admiral Boedicker, knew the British challenge signal and by promptly replying to *Chester* was able to approach to within 6,000 yards before opening fire. *Chester* was badly damaged but was able to gain the protection of the 3rd Battle cruiser Squadron.

The pursuit of *Chester* brought the Germans to within 8,000 yards of the British battle cruisers and *Frankfurt*, *Wiesbaden* and *Pillau* received an avalanche of 12 in. shells. The *Wiesbaden* suffered most, being hit by full salvos which put both main engines out of action and reduced her to a wreck. She remained afloat, however, and during the course of the day and night came under fire successively from the 1st Cruiser Squadron, the Battle Fleet and the destroyer *Onslow*, which hit her with a torpedo. Despite all this she did not sink until three o'clock on the morning of June 1st.

The only survivor was a stoker petty officer. He stated that the *Wiesbaden* was on fire in several places, her decks were a shambles and piled with twisted ironwork. No other vessels were at hand and she sank with the loss of 570 officers and men.

WIGBERT

*Hamburg-Bremer Afrika Linie; 1921; J. Frericks & Co.; 3,648 tons; 361x49-9x22-5; 320 n.h.p.; triple-expansion engines. The German steamship Wigbert was torpedoed and sunk by the British submarine *Triton* on April 10th, 1940, in the Skagerrak.*

WIGRY

Polish Government; 1912; Sir R. Dixon & Co.; 1,859 tons; 265 x 38 - 7 x 17 - 6; 228 n.h.p.; triple-expansion engines. The Polish steamship Wigry, on a voyage from Reykjavik to New York, was wrecked in heavy weather on January 15th, 1942, on the S.W. coast of Iceland. Only two of her crew of 27 were saved.

WILD SWAN

*British Navy, destroyer; 1919; Swan, Hunter & Wigham Richardson; 1,120 tons; 312x29-5x10-9; 27,000s.h.p.; 34 knots; turbine engines; Yarrow boilers; four 4-7in. guns, two 2pdr., 5m.g.,6T.T. The destroyer Wild Swan, Lt. Cdr. C. E. L. Sclater, was attacked by a force of 12 German Ju 88 bombers on June 17th, 1942, some 100 miles W. of the coast of Brittany. The ship put up a vigorous defence and brought down four of the bombers, and two others damaged by her fire collided in mid-air and fell into the sea. A fleet of Spanish trawlers was fishing in the vicinity and three of them were sunk by German bombs and a fourth badly damaged. The *Wild Swan* received a hit which rendered her unmanageable and she collided with the damaged trawler, sinking her immediately. The skipper and ten men of the trawler's crew were picked up by the destroyer, which was then in a parlous condition. The arrival of another British destroyer enabled the survivors of the action to be taken off before *Wild Swan* sank. Thirty-one ratings were killed or drowned.*

WILDFANG

Austrian Navy, destroyer; 1906; Austria; 390 tons; 6,000 i.h.p.; 28 knots; turbine engines; Yarrow boilers; six 12pdr. guns, 2 T.T. The Austrian destroyer Wildfang struck a mine and sank in the Upper Adriatic about the middle of June, 1917.

WILFORD

Borge's Rederi A/S; 1921; Nylands Verksted; 2,158 tons; 289-5x44-1x19-3; 225 n.h.p.; triple-expansion engines. The Norwegian steamship Wilford was torpedoed, shelled and sunk by a Japanese submarine on June 7th, 1942, in the Mozambique Channel, with the loss of nine lives.

WILFRED

A/S Det. Selmerske Rederi; 1905; Trondhjems Mek. Verksted; 1,121 tons; 231-2x34-3x13-6; 106 n.h.p.; triple-expansion engines. The Norwegian steamship Wilfred was sunk by a German submarine off Ushant on March 15th, 1917.

WILHELM GUSTLOFF

Deutsche Arbeitsfront; 1937; Blohm & Voss; 25,484 tons; 650-4x77-4x26-5; 2,360n.h.p.; oilengines. The Wilhelm Gustloff was one of several ships built under the auspices of the German National Socialist Government to provide cheap cruising holidays for the workers.

Towards the end of January, 1945, she embarked some 5,000 refugees, mostly women and children, together with 3,700 submarine personnel, at Danzig, then threatened by the advance of the Russian army, and sailed from that port on the 30th.

At about 9 p.m. on the same day she was torpedoed by a Russian submarine and sank within 40 minutes.

There were about 1,000 survivors.

WILHELM HEIDKAMP

German Navy, destroyer; 1937; Deschimag A.G.; 1,811 tons; 384x38-3x9-5; 55,000s.h.p.; 36 knots; turbine engines; five 5 in. guns, four 37 nun., 8 T.T.

The *Wilhelm Heidkamp* was one of the flotilla of German destroyers sunk in the first battle of Narvik on April 10th, 1940. A full account of both battles is given under the British flotilla leader *Hardy*, which was sunk in the first action. There is also a short account under the Norwegian coastal defence ship *Norge*.

WILHELMINA

Ministry of Shipping (Douglas & Ramsey); 1909; Newport News S.B.&D.D. Co.; 7,135 tons; 426-1 X54-1 x33-5; 976n.h.p.; triple-expansion engines. The British steamship *Wilhelmina*, on a voyage from New Westminster, B.C., to Liverpool, was torpedoed and sunk by a German submarine on December 2nd, 1940, about 350 miles W. of the Hebrides. Four of her crew and one gunner were lost.

WILHEMSBURG

German Government; 1914; Sir J. Laing & Sons; 7,020 tons; 425-1x57x33-1; 592n.h.p.; triple-expansion engines. The tanker *Wilhelmsburg* was formerly the Greek *Petrakis Nomikos*, badly damaged by bombing and beached near Piraeus in April, 1941, during the invasion of Greece. On July 7th, 1943, she was torpedoed and sunk by a British submarine five miles W. of Tenedos on a voyage from the Black Sea to Greece, with 8,000 tons of oil.

WILL O' THE WISP

Cookson; 1854; Newcastle; 384 tons; 70h.p.; 9 knots; compound engines.

The auxiliary schooner *Will o' the Wisp* was on a voyage from Newcastle to Dublin with a cargo of coal and a few passengers, all of whom were ship masters whose vessels were discharging at Dublin. At about 3 o'clock on the morning of February 9th, 1855, the *Will o' the Wisp* ran onto the Burn Rock, 300 yards off Lambay Island. The sea was very rough and although there seems to have been an attempt to launch the boats, only one, carrying a canister containing the ship's papers, drifted ashore at Portrane, all its occupants having apparently been swept overboard.

At daybreak coastguards from Portrane Station located the wreck but were unable to render assistance owing to the fury of the seas. All the 18 persons on board were lost.

WILLAMETTE VALLEY

Reardon Smith Line Ltd.; 1928; Napier & Miller; 4,724 tons; 401-1x54-2x25-8; 488 n.h.p.; 12-5 knots; oilengines. The steamship *Willamette Valley* was requisitioned by the Admiralty early in the Second World War for the conveyance of naval stores. On June 29th, 1940, when in the S.W. Approaches she was torpedoed and sunk by a German submarine.

WILLEDEN

Watt Shipping Co.; 1925; Workman, Clark & Co.; 4,562 tons; 401'6x54-3x25-3; 423 n.h.p.; triple-expansion engines. The British steamship *Willessden*, on a voyage from New York to Alexandria via the Cape, was sunk by the German raider *Santa Cruz* on April 1st, 1942, about 400 miles S. of St. Helena Island. Five of her crew were killed, the remainder were taken prisoner.

WILLIAM ACKERS

1836; Cumberland; 299 tons; 101-7x25x17-3. The wooden barque *William Ackers*, Capt. D. Lindsay, was on a voyage to Lyttleton, New Zealand, with a cargo of 185,000 feet of sawn timber. She carried 11 persons, one of whom was a passenger. Early on the morning of December 12th, 1876, when off Waipapa Point, she touched on a reef, but managed to regain deep water.

Later in trying to come about she missed stays and drifted on to the reef where she broke into two parts. Her heavy deck cargo of planks impeded the crew in their efforts to launch the lifeboat, but eventually they succeeded, only to see the boat smashed by the seas.

The wreck lay within 200 yards of the shore, and the mate, a seaman and the passenger managed to swim to safety. Others tried to reach land on floating planks, but were either swept out to sea and drowned or were washed off the planks.

In all eight persons, including the captain, lost their lives.

WILLIAM AND MARY

J. Herring & Co.; 1849; Sunderland; 257 tons. The emigrant ship *William and Mary*, Capt. Stinson, left Liverpool for New Orleans on March 24th, 1853, with 208 emigrants, chiefly Irish, Scottish and German. The voyage was uneventful until May 3rd when she arrived off the island of Abaco in the Bahamas. From this place the captain set a course which would take him near to Stirrup Key some 12 miles away. Just before sunset he lost sight of the Key and changed his course W. by S. which brought him into a dangerous rock-strewn area where his ship struck at about 8.30 p.m. Fifteen minutes later she struck again and the water gained so fast that the pumps had to be abandoned. The emigrants gave way to panic and three out of the five boats were overcrowded and swamped. Two boats were at last got clear with about 30 persons, including the captain. The *William and Mary* then foundered, the loss of life being about 170 persons.

One boat containing Capt. Stinson, the first and second officers and six seamen was picked up by the brig *Rueben Carver*, Capt. E. S. Cobb, bound for New York. The other boat was picked up by a British ship.

WILLIAM R. DAVOCK

Inter lake S.S. Co.; 1907; Great Lakes Engineering Works; 4,220 tons; 420x52x23; 211 n.h.p.; triple-expansion engines. The American steamship *William B. Davock* was wrecked during a storm on November 12th, 1940, off Pentwater, Lake Michigan. Twenty-two of the crew were drowned.

WILLIAM B. WOODS

U.S. War Shipping Administration; 1943; J. A. Jones Construction Co.; 7,176 tons; 422-8x57x34-8; 339n.h.p.; triple-expansion engines. The American steamship *William B. Woods*, carrying 400 U.S. Army and Navy personnel as passengers, was torpedoed and sunk by a German submarine on March 10th, 1944, 35 miles out on a voyage from Palermo to Naples. Fifty-seven lives were lost.

WILLIAM BALLS

William D.C. Balls & Son; 1883; J. Readhead & Co.; 1,612 tons; 259x37x17-8; ISO h.p.; compound engines. The British cargo ship *William Balls* sank after a collision off the Humber on July 5th, 1893. She was on a voyage from the Tyne to Smyrna carrying a cargo of coal.

WILLIAM BROWN

American emigrant ship; 1830 (circa); 300 tons (circa). The American sailing ship *William Brown*, Capt. G. L. Harris, left Liverpool on March 13th, 1841, for Philadelphia with a crew of 18 and 65 passengers, nearly all Irish emigrants. The ship met with rough and squally weather which carried away several of her sails. On the evening of April 19th, when sailing at ten knots, she struck an iceberg and sustained severe damage. Shortly after 9 o'clock she struck another berg and this time the damage was fatal. Capt. Harris ordered out the boats, one of which, the long boat, was crowded to capacity, having no fewer than 42 persons in her. The jolly-boat, in which were the captain, two passengers and five seamen, was much better off for room, although a smaller boat. No other boats could be got away in time and the *William Brown* sank at about midnight with 33 persons, 30 of whom were passengers. The two boats which survived remained tied together until 5 a.m., when the captain decided to make for Newfoundland with his boat.

The captain's boat was picked up six days later off Cape Breton by a French lugger, all eight occupants surviving.

The overcrowded first officer's boat, however, was less fortunate, having been continually swamped in heavy weather. By the time the boat was picked up by the sailing ship *Crescent* it had been necessary

WILLIAM C. GORGAS

to put overboard 16 persons dead or dying from exposure, in order that the remainder might have some chance of survival.

WILLIAM C. GORGAS

U.S. War Shipping Administration; 1943; Alabama D.D. & S.B. Co.; 7,197 tons; 422-8x57x34-8; 339 n.h.p.; triple-expansion engines.

The steamship *William C. Gorgas* was torpedoed and sunk by a German submarine on March 11th, 1943, about 1,200 miles W. of Lands End on a voyage from Mobile to Swansea. Seven of the crew were lost.

WILLIAM CLARK

U.S. Maritime Commission; 1942; Oregon S.B. Corp.; 7,176 tons; 422-8x57x34-8; 339 n.h.p.; triple-expansion engines. The steamship *William Clark* was torpedoed and sunk by a German submarine on November 4th, 1942, off Jan Mayen Island on a voyage from Iceland to North Russia. Thirty of her complement of 71 were killed.

WM. CORY

William Cory & Son; 1909; S. P. Austin & Son; 2,660 tons; 314x45-2x20-7; 264 n.h.p.; triple-expansion engines. The British cargo ship *Wm. Cory* was wrecked at Pendeen, Cornwall, on September 5th, 1910. She was on a voyage from Uleaborg to Newport carrying a cargo of timber.

WILLIAM D. BURNHAM

U.S. War Shipping Administration; 1943; Permanente Metals Corp.; 7,176 tons; 422-8x57x34-8; 339 n.h.p.; triple-expansion engines. The steamship *William D. Burnham*, on a voyage from St. Helen's Roads to Cherbourg with military stores and vehicles, was sunk by mine or torpedo on November 23rd, 1944, off Cherbourg. Twelve of her crew were lost.

WILLIAM D. PORTER

United States Navy; destroyer; 1942; Consolidated Steel Corp., 2,050 tons; 376-5x39-5x—; 60,000s.h.p.; 35-5 knots; turbine engines; five 5 in. guns, four 40 m.m., four 20 m.m., 10T.T. The United States destroyer *William D. Porter* was bombed and sunk by Japanese aircraft off Okinawa on June 10th, 1945. The vessel carried a complement of over 250.

WILLIAM DAWES

U.S. Maritime Commission; 1942; Oregon S.B. Corp.; 7,176 tons; 422-8x57x34-8; 339n.h.p.; triple-expansion engines. The steamship *William Dawes* was torpedoed and sunk by a Japanese submarine on July 20th, 1942, off the coast of New South Wales on a voyage from San Francisco to Brisbane. Five of the crew were killed.

WILLIAM F. HUMPHREY

Tide Water Associated Oil Co.; 1921; Bethlehem S.B. Corp.; 7,983 tons; 468-3x62-7x32; 636 n.h.p.; quadruple-expansion engines. The American steamship *William F. Humphrey* was sunk by a German raider accompanied by two motor torpedo boats on July 16th, 1943, about 500 miles E. of Pointe Noire, West Africa, on a voyage from Table Bay to Trinidad. Some 19 or 20 of her crew of 46 were taken prisoner, the captain and ten men were landed at Freetown after five days in a boat. The remainder of the crew were lost.

WM. H. CLIFFORD

Percy & Small; 1895; Percy & Small; 1,594 tons; 221-6x43-5X 19-6. The American sailing ship *Wm. H. Clifford* was sunk by a German submarine in the Atlantic on September 8th, 1917.

WILLIAM H. MACHEN

Pocahontas S.S. Co.; 1916; New York S.B. Co.; 3,922 tons; 359-5x49-2x25-6; 390n.h.p.; triple-expansion engines. The American steamship *William H. Machen* was sunk by collision

with the steamship *Maid of Stirling*, 1,247 tons, on July 7th, 1942, about 50 miles E. of Boston, Mass.

WILLIAM H. WELCH

U.S. War Shipping Administration; 1943; Bethlehem Fairfield Shipyard; 7,200 tons; 423x57-1x34-8; 339n.h.p.; triple-expansion engines. The American steamship *William H. Welch*, on a voyage from London to New York in ballast, ran aground in Black Bay, Loch Ewe, on February 26th, 1944, broke in two and sank. Sixty-two of her complement of 74 were lost.

WILLIAM HANSEN

AskelMolvig'sRederiA/S.; 1939; Nylands Verksted; 1,344 tons; 250-9x41-3x14-8; 54 n.h.p.; compound engines & L.P. turbine. The Norwegian steamship *William Hansen* was torpedoed and sunk by a German submarine on January 21st, 1942, off Newfoundland, with the loss of 14 lives.

WILLIAM J. SALMAN

Canadian Gulf Line; 1919; American S.B. Co.; 2,616 tons; 251 x43-6x26-1; 230 n.h.p.; triple-expansion engines. The American steamship *William J. Salman* was torpedoed and sunk by a German submarine on May 18th, 1942, about 200 miles S.W. of Cienfuegos, Cuba, on a voyage from New Orleans to Antigua. Six of the crew were killed.

WILLIAM KING

U.S. War Shipping Administration; 1942; South Portland S.B. Corp.; 7,176 tons; 422-8x57x34-8; 339n.h.p.; triple-expansion engines. The steamship *William King* was torpedoed and sunk by a submarine on June 6th, 1943, on a voyage from Busreh to Bombay. Six of the crew were killed, the captain was taken prisoner.

WILLIAM PIERCE FRYE

U.S. War Shipping Administration; 1943; South Portland Shipbuilding Corp.; 7,176 tons; 422-8x57x34-8; 339n.h.p.; 11-5 knots; triple-expansion engines. The American steamship *William Pierce Frye*, Capt. Meinhard Scherf, on a voyage from New York to Barry, straggled from convoy and was torpedoed and sunk by a German submarine about 600 miles S.S.W. of the Vestmann Islands. Capt. Scherf, 34 of the crew and 22 gunners were lost.

WILLIAM ROCKEFELLER

Standard Oil Co. (New Jersey); 1916; Wm. Cramp & Sons Ship & Eng. Bldg. Co.; 7,157 tons; 430x58-2x33-3; 565n.h.p.; triple-expansion engines. The American tanker *William Rockefeller* was torpedoed and sunk by a German submarine in the North Sea on May 18th, 1918.

WM. ROCKEFELLER

Standard Oil Co. of New Jersey; 1921; Newport News S.B. & D.D. Co.; 14,055 tons; 554-9x75-3x43; 621 n.h.p.; triple-expansion engines. The American tanker *Wm. Rockefeller* was torpedoed, set on fire and sunk by a German submarine on June 28th, 1942, on a voyage from Aruba to New York with 135,000 barrels of fuel oil. There were no casualties.

WILLIAM RUSHTON

Worrall & Co.; 1832; Liverpool; 214 tons. The brig *William Rushton*, Capt. G. Foster, bound from Laguira to Liverpool, was sunk by collision with the steamship *Minerva* off Orme's Head at about one o'clock on the morning of Tuesday, August 20th, 1850. The captain and three men of the crew of 11 were saved.

WILLIAM S. THAYER

U.S. War Shipping Administration; 1943; Bethlehem Fairfield Shipyard; 7,176 tons; 422-8x57x34-8; 339n.h.p.; triple-expansion engines. The American steamship *William S. Thayer*, with a crew of 41, eight gunners and 165 Russian naval personnel as passengers, was torpedoed and sunk by a German submarine on April 30th, 1944,

S. of Bear Island on a voyage from Murmansk to Loch Ewe. Thirty of the crew were killed and 13 passengers died of exposure after being picked up.

WILLIMANTIC

Ministry of War Transport (Lamport & Holt Line); 1918; Todd Dry Dock and Construction Co.; 4,858 tons; 379-4x53x27'; 339 n.h.p.; triple-expansion engines. The British steamship *Willimantic*, on a voyage from Durban to Baltimore, was shelled and sunk by a German submarine at 3.50 a.m. on June 24th, 1942, about 700 miles S.E. of the Bermudas. Six of the crew were killed, the captain was taken prisoner.

WILLODALE

Bromage Shipping Co.; 1909; R. Thompson & Sons; 7,777 tons; 268x38-5x17'; 218n.h.p.; triple-expansion engines. The British steamship *Willodale* left Bordeaux on April 3rd, 1947, for Cardiff with a cargo of pit props. The weather was bad and soon developed into a full gale and the ship put into Verdon Roads for shelter. At 9.30p.m. the ship wirelessed for help, stating that her steering gear had broken, bulwarks washed away and that she was making water in No. 2 hold. A French pilot boat went to her assistance and was able to save ten of her crew before the ship foundered at about 5 a.m. on the 4th, but six men went down with the ship and six more were drowned during the rescue operations.

WILLOWPOOL

Pool Shipping Co.; 1925; Ropner S.B. & R. Co.; 4,815 tons; 390x55-5x26'4"; 437n.h.p.; triple-expansion engines. The British steamship *Willowpool*, on a voyage from Bona to the Tees with iron ore, struck a mine and sank on December 10th, 1939, three miles E. of Newark Lightship.

WILLYAMA

Adelaide S.S. Co.; 1897; W. Dobson & Co.; 2,705 tons; 325-5x45-1x21'; 251 n.h.p.; triple-expansion engines. The Australian cargo ship *Willyama* was wrecked on April 13th, 1907, off Rhino Head, Marion Bay, Queensland, while on a voyage from Newcastle, N.S.W., to Port Pirie with a cargo of coal.

WILMORE

Berwind-White Coal Co.; 1914; Fore River S.B. Corp.; 5,399 tons; 387-7x54-3x27-7'; 448 n.h.p.; triple-expansion engines. The American steamship *Wilmore* was torpedoed and sunk by a submarine in the Mediterranean on September 12th, 1917.

WILSON B. KEENE

U.S. War Shipping Administration; 1944; New England S.B. Corp.; 7,176 tons; 422-8x57x34-8'; triple-expansion engines. The steamship *Wilson B. Keene*, lying at her berth in Texas City, was completely destroyed when the steamship *Highflyer*, lying alongside, blew up on April 16th, 1947. For the full story see *Grandcamp*.

WILSTON

W. S. Miller & Co.; 1909; R. Duncan & Co.; 2,611 tons; 310 x 46 -1 x 20 - 4; 253 n.h.p.; 10 knots; triple-expansion engines. The steamship *Wilston* struck a mine and sank 20 miles E.N.E. of Wick on February 15th, 1916. The captain and seven others were killed.

WILTSHIRE

Federal S.N. Co.; 1912; John Brown & Co.; 12,160 tons; 526-5x61-4x33-3'; 1,264n.h.p.; triple-expansion engines. The liner *Wiltshire*, Capt. G. B. Hayward, on a voyage from Liverpool to Auckland, ran on to the rocks at Rosalie Bay, Great Barrier Island, on the night of May 31st, 1922, in a violent storm, and broke her back.

Several ships and tugs put out from Auckland but were not able to get near enough to take off the crew. Fortunately the wreck was held fast on the rocks and on June 2nd the ship managed to get a line to the shore whereby the crew of 104 were rescued by breeches buoy.

WIMBORNE

Evan Thomas Radcliffe & Co.; 1898; Richardson, Duck & Co.; 3,466 tons; 339 x 46x24- 6; 281 n.h.p.; triple-expansion engines. The British steamship *Wimborne* was wrecked at Tolpedu, Cornwall, on November 7th, 1910. She was on a voyage in ballast from Rotterdam to Barry.

WIMMERA

Huddart, Parker, Ltd.; 1904; Caird & Co.; 3,022 tons; 335-3x43'2x20-6; 522n.h.p.; 14 knots; triple-expansion engines. The *Wimmera*, Capt. Kell, left Auckland at 10 a.m. on June 25th, 1918, bound for Sydney with 152 persons on board, of whom 76 were passengers. Early the following morning while still in sight of the coast the ship struck two mines at intervals of a few seconds. The ship's saloon was wrecked, the mainmast broken and the wireless apparatus smashed. The passengers were asleep in their cabins and woke to find the ship in complete darkness owing to the failure of the electric light. Heavy seas began to wash over the *Wimmera's* decks and she was helpless and sinking. Five lifeboats were lowered, one being smashed in the process, and the greater part of passengers and crew got away in safety. Twenty-six lives were lost, the captain, the first officer and the chief steward being among the drowned. The wireless operator managed to repair the damage to his apparatus and send put a S.O.S. at the sacrifice of his life.

The mines had been laid by the German raider *Wolf*, and instructions had been given not to navigate in that vicinity as another vessel, the *Port Kembla*, had been a victim some months previously.

WINAMAC

Socony-Vacuum Transportation Co.; 1926; Lithgows Ltd.; 8,621 tons; 460x62-8x36-4; 666 n.h.p.; 11 knots; triple-expansion engines. The tanker *Winamac*, Capt. Edgar Harrison, left Trinidad for the Azores on August 28th, 1942, with 12,500 tons of fuel oil. On the 31st she was torpedoed and sunk by a German submarine. Capt. Harrison, 26 of the crew and three gunners were lost.

WINCHESTER

Liverpool & Boston Packet; 1845 (circa); 600 tons (circa). The Liverpool and Boston sailing packet *Winchester* left the former port for Boston on April 9th, 1854, with 447 passengers and crew. When eight days out on the 17th she was dismasted and three days later fell in with the *Edward* of Liverpool which took off 50 passengers. For 12 more days she was tossed about in a derelict condition, many of those on board dying from hardship and lack of food. On May 3rd the steamship *Washington* sighted her when she was almost sinking. The *Washington* by good seamanship managed to take off every living member of her company without mishap. So timely was the rescue that only a bare 20 minutes later the *Winchester* sank, taking with her the bodies of 25 persons who had died during the last stages of the voyage.

WINDERMERE

Cardiff Steamship Co.; 1904; Irvine S.B. & D.D.; 2,292 tons; 300x44x19-7; 244n.h.p.; 10 knots; triple-expansion engines. The steamship *Windermere* was intercepted by a submarine 58 miles S.S.E. of Port Mahon, Minorca, on June 27th, 1916. The vessel was shelled from the surface and 12 men, including the captain, were killed. The submarine then sent a party to the *Windermere* and scuttled her.

WINDFLOWER

Canadian Navy, corvette; 1940; British Isles; 925 tons; 205 x 33x14-5; 2,800 i.h.p.; 16 knots; triple-expansion engines; 3-drum boilers; one 4 in.A.A. guns, several smaller. The Canadian corvette *Windflower* was escorting a convoy in the West Atlantic when she was sunk by collision with one of the ships in company in a dense fog on December 7th, 1941. Twenty-three officers and ratings were drowned.

The *Windflower* was lent to the Canadian government by the Admiralty.

WINDSOR

WINDSOR

Watts, Watts & Co.; 1890; W. Gray & Co.; 2,892 tons; 314-6X 40-6 x20-5; 235 n.h.p.; triple-expansion engines. The British steamship *Windsor* was wrecked on Abruholos Island, Western Australia, on February 2nd, 1908, while carrying a cargo of sandalwood from Fremantle to Hong Kong.

WINDSOR CASTLE

Union-Castle Mail S.S. Co.; 1922; John Brown & Co.; 19,141 tons; 661-3x72'5x41-6; 14,500s.h.p.; 18 knots; turbine engines. The liner *Windsor Castle*, Capt. J. C. Brown, was torpedoed by German aircraft about 110 miles N.W. of Algiers on March 23rd, 1943, and sank 13 hours later. The vessel was carrying troops at the time but the only casualty was one member of the crew killed.

WINDSOR HALL

Hansen Bros.; 1910; W. Doxford & Sons; 3,693 tons; 345 x 48-2x24-6; 277 n.h.p.; 9 knots; triple-expansion engines. The steamship *Windsor Hall* was torpedoed and sunk by a German submarine 45 miles N.W. of Alexandria on January 17th, 1918.

Twenty-seven men were killed, the captain was taken prisoner on the submarine.

WING SHING

Man Chuen S.S. Co.; 1890; W. Denny & Bros.; 5,206 tons; 410-5x48-2x30-5; 666 n.h.p.; quadruple-expansion engines. The Chinese steamship *Wing Shing* was driven ashore and wrecked off Hong Kong on August 18th, 1923, during a typhoon.

WINGA

Corten & Co.; 1906; W. Hamilton & Co.; 1,174 tons; 239-9x 33x15-6; 139 n.h.p.; triple-expansion engines. The British steamship *Winga* sank after a collision six miles N.E. of Spurn Point on January 29th, 1918. She was on a voyage in ballast from Hull to Sunderland.

WINGA

Clydesdale Shipowners Co.; 1924; New Waterway S.B. Co.; 1,478 tons; 250 X37-1x16-3; 144 n.h.p.; triple-expansion engines.

The British cargo ship *Winga* sank with the loss of 14 lives after a collision with the Norwegian steamship *Jernland*, 1,289 tons, five miles E. of West Hartlepool on June 2nd, 1940. She was on a voyage from Santander to the Tyne carrying a cargo of iron ore.

WINKFIELD

British India Steam Nav. Co.; 1919; W. Picker sgill & Sons; 5,279 tons; 400x52-2x28-5; 517 n.h.p.; triple-expansion engines.

The British steamship *Winkfield*, on a voyage from Bombay to London, struck a mine and sank on May 19th, 1941, in the Thames estuary. Ten of the crew were lost.

WINKLEIGH

Tatem Steam Nav. Co.; 1927; W. Picker sgill & Sons; 5,055 tons; 403X55-4x25-8; 402 n.h.p.; triple-expansion engines. The British steamship *Winkleigh*, on a voyage from Vancouver to Manchester with grain and lumber, was torpedoed and sunk by a German submarine on September 8th, 1939, about 500 miles W. of the Bishop Rock.

WINKLER

Atlantic Refining Co.; 1930; Scott's S.B. & E. Co.; 6,907 tons; 421'2x58-3x34-9; 888 n.h.p.; diesel-electric engines. The Panamanian tanker *Winkler* was torpedoed and sunk by a German submarine on February 23rd, 1943, on a voyage from Avonmouth to New York. Fifteen of her crew and five gunners were lost.

WINNEBA

Elder, Dempster & Co.; 1909; Irvine's S.B. & D.D. Co.; 3,040 tons; 340-1x46x23; 335 n.h.p.; triple-expansion engines. The British steamship *Winneba* was wrecked on Basha Point Rock, Ivory Coast, on July 26th, 1913. She was carrying a cargo of palm kernels and oil from West African ports to Hamburg.

WINNIE

Ferguson & Reid; 1896; J. Blumer & Co.; 2,532 tons; 304x44x 20-6; 245 n.h.p.; triple-expansion engines.

The British steamship *Winnie* was wrecked in Busso Sound, Vardo, on November 10th, 1917. She was on a voyage from Archangel to Lerwick carrying a cargo of pit props.

WINTERSWIJK

N. V. Stoomv. Maats. Wijklijn; 1914; Jan Smit, Czn.; 3,205 tons; 320x47-5x22-9; 282 n.h.p.; triple-expansion engines. The Dutch steamship *Winterswijk* was torpedoed and sunk by the German submarine *U-432* at 2.30 a.m. on September 10th, 1941, off Cape Farewell on a voyage from Tampa and Sydney, N.S., to Methil. The ship sank in two minutes, with the loss of 20 lives.

WINTHORPE

Thos. Appleby & Co.; 1876; W. Gray & Co.; 1,307 tons; 247-6x32-2x18-4; 134 n.h.p.; compound engines. The British steamship *Winthorpe* was wrecked on August 5th, 1899, near Corunna while carrying a cargo of ore from Huelva to Antwerp.

WINTON

Chapman & Miller; 1880; A. Leslie & Co.; 1913; 271x35-8x 23-5; 200 h.p.; compound-inverted engines.

The British cargo ship *Winton* foundered after her cargo shifted 30 miles N.W. of Ushant on November 16th, 1882, while on a voyage from Odessa to Rotterdam carrying a cargo of grain. Twenty-four of the crew were drowned, only one man survived.

WISCONSIN

Goodrich Transit Co.; 1881; Detroit Dry Dock Co.; 1,921 tons; 209 x 40x20-7; 104 n.h.p.; compound engines. The American steamship *Wisconsin*, on a voyage from Chicago to Milwaukee, foundered during a storm on October 29th, 1929, four miles from Kenosha, Wisconsin. The captain and eight others were lost.

WISTOW HALL

Hall Line; 1890; Caird & Co.; 3,314 tons; 349-5x42-1x26-7; 307 n.h.p.; 10 knots; triple-expansion engines. The steamship *Wistow Hall*, Capt. W. H. Stoddart, left Jarrow on Monday, January 15th, 1912, with 500 tons of cargo to take on a further consignment at Glasgow and finally to complete loading at Birkenhead. The weather was very bad and on Wednesday, the 17th, the steamship's funnel was washed away, two of the crew were killed by falling gear and the first officer injured. This was followed by an accident to the captain who received injuries to his spine and had his right arm broken and was rendered unconscious. To add to these misfortunes the boiler room was flooded and the fires extinguished. It was decided to drop anchor somewhere off Bucha Ness but the cable parted and the steamship drifted ashore.

She was seen by the coastguards at Port Errol who followed her along the coast. At 8 a.m. on the 18th she struck on the Tampion Rock, North Haven, close to some stone quarries, the quarrymen from which came to the shore in the hope of assisting in the rescue. Unfortunately the place where the *Wistow Hall* had gone ashore was at the foot of some high and inaccessible cliffs where it was impossible for the lifeboats to approach. As the steamship's boats had been smashed in the gale the crew were without means of escape and could only cling to the rigging from which they were swept away by successive seas in full view of the impotent coastguards and quarrymen.

The crew numbered 14 Europeans and 43 Lascars, of whom Capt. Stoddart and three Lascars were saved.

WITTEKIND

Ender Dampfercompagnie A.G.; 1906; Tyne Iron S.B. Co.; 4,029 tons; 351 X 50 x 25 - 7; 368 n.h.p.; triple-expansion engines. The German steamship *Wittekind* was bombed and sunk by British aircraft on January 14th, 1944, off Lister on a voyage from Narvik to Germany, with the loss of 29 lives.

WIZARD

British Navy, sloop; 231 tons; 6 guns. The brig-rigged sloop *Wizard*, Lt. A. P. Helby, was wrecked on the

Seal Rock, Berehaven, on February 8th, 1859. There was no loss of life.

WLADIMIR REITZ

Dansk-Russiske Dampskibsselskab; 1905; Clyde S.B. & E. Co.; 2,128 tons; 295 x 42x19-5; 225 n.h.p.; triple-expansion engines. The Danish steamship *Wladimir Reitz* was torpedoed and sunk by a German submarine in the North Sea on April 4th, 1917.

WO KWANG

1927; 350 tons. The British tug *Wo Kwang* was taken over for service as a mine-sweeper on the entry of Japan into the Second World War. On February 25th, 1942, she was sunk by Japanese destroyers soon after leaving Batavia for Tjilatjap. Two survivors were later picked up from a boat.

WOLF

German Navy, torpedo boat; 1927; Wilhelmshaven Yard; 800 tons; 304x28x9; 25,000s.h.p.; 34 knots; turbine engines; Schulz-Thornycroft boilers; three 4-1 in. guns, two 1 pdr., 6 T.T. The German torpedo boat *Wo If* struck a mine and sank off Dunkirk on January 8th, 1941. The vessel's normal complement was 123.

WOLFGANG L.-M. RUSS

Ernst Russ; 1939; Lubecker Flenderwerke A.G.; 5,750 tons; 341'2x52'5x18-2; 482n.h.p.; oilengines. The German motorship *Wolfgang L.-M. Russ* was bombed and sunk by Allied aircraft on May 4th, 1945, S.E. of Aarhus on a voyage from Norway to Germany.

WOLFGANG ZENKER

German Navy, destroyer; 1936; Germania Werft; 1,625 tons; 374x37x9-3; 40,000s.h.p.; 36 knots; turbine engines; five 5 in. guns; four 37 mm., 8 T.T. The *Wolfgang Zenker* was one of the flotilla of German destroyers sunk in the second battle of Narvik on April 13th, 1940. A full account of both battles is given under the British flotilla leader *Hardy*, which was sunk in the first action on April 10th. There is also a short account under the Norwegian coastal defence ship, *Norge*.

WOLFRAM

Hamburg-Bremer-Afrika Linie; 1921; J. Frerichs & Co.; 3,648 tons; 362-7x50-3x22-2; 318n.h.p.; triple-expansion engines. The German steamship *Wolfram* struck a mine and sank on November 9th, 1942, N. of Vlieland.

WOLLONGBAR

North Coast Steam Nav. Co.; 1922; Lithgows, Ltd.; 2,240 tons; 285 • 1 x 42 -1 x 23 • 9; 218 n.h.p.; triple-expansion engines. The Australian steamship *Wollongbar*, on a voyage from Byron Bay to Newcastle, N.S.W., was torpedoed and sunk by a Japanese submarine on April 29th, 1943, near Coff's Harbour, N.S.W. Thirty-two of her crew of 37 were lost.

WOLSUM

German Government; 1921; A. Vuijk & Zonen; 3,668 tons; 359-9x48-3x23; 443 n.h.p.; triple-expansion engines. The steamship *Wolsum* was a former Dutch ship seized by the Germans in May, 1940. On September 16th, 1944, she was bombed and sunk by Russian aircraft off Kirkenes, Norway.

WOLVERINE

British Navy, destroyer; 1910; Cammell, Laird & Co.; 986 tons; 274 X 28x10; 12,500 i.h.p.; 27 knots; turbine engines; Yarrow boilers; one 4 in. gun, three 12 pdr., one 3pdr. A. A., 1 m.g., 2 T.T. The destroyer *Wolverine* was sunk in collision off the N.W. coast of Ireland on December 12th, 1917. Her official complement was 80.

WOLVISTON

West Hartlepool Steam Nav. Co.; 1879; W. Gray & Co.; 1,670 tons; 256-5x34-6x19-7; 150h.p.; compound engines. The steamship *Wolviston* left Bristol on September 11th, 1891, for New York in ballast. On the 22nd, about 700 miles E. of Cape Race, in very bad weather, she sprang a leak in way of her bunkers.

The pumps became choked with coal dust and the ship was abandoned in a sinking condition. One of the boats with nine men eventually landed at Harbour Grace, N.F.L., but the other with the captain and 11 men was never seen again.

WOODBIDGE

Malford Shipping Co.; 1900; Irvine's S.B. & D.D. Co.; 3,605 tons; 340x48-lx25; 308 n.h.p.; triple-expansion engines. The British steamship *Woodbridge* was wrecked near Christians-sand on December 10th, 1917, while carrying a cargo of timber from Archangel to Sharpness.

WOODBURN

Macintyre Bros. & Co.; 1874; Palmer's Co.; 1,788 tons; 280'2x33-5x24-9; 140 h.p.; compound-inverted engines. The British steamship *Woodburn*, Capt. Hull, on a voyage from Madras to London, broke her propeller shaft on August 1st, 1883, 12 miles off Cape St. Vincent and was towed into Lisbon by a passing ship. It was decided to tow her to England for repairs. At 3 a.m. on the 26th, 45 miles S.W. of the Eddystone Lighthouse in tow of the tug *Recovery*, she came into collision with the French liner *St. Germain*, 3,659 tons. The *Woodburn* sank within five minutes, Capt. Hull, 16 of the crew and one passenger were drowned, 11 persons were rescued by the *Recovery*.

WOODBURY

United States Navy, destroyer; 1919; Bethlehem Shipbuilding Corp.; 1,215 tons; 310x30-9x9-3; 27,500s.h.p.; 35 knots; turbine engines; Yarrow boilers; four 4 in. guns, one 3 in.A.A., 12 T.T. The United States destroyer *Woodbury* was one of a flotilla of seven such vessels steaming through a dense fog at high speed near the island of Santa Barbara, off the coast of California, on September 8th, 1923. All the ships ran upon the rocks and became total wrecks, but most of the crews got away in safety. The full story of the disaster is told under the *Delphy*, leading ship of the flotilla.

WOODFIELD

Woods, Tylor & Brown; 1905; J. Priestman & Co.; 3,584 tons; 350x49x25-3; 387n.h.p.; 11 knots; triple-expansion engines. The steamship *Woodfield* was intercepted, shelled and sunk by a German submarine 40 miles E.S.E. of Ceuta on November 3rd, 1915. Eight men were killed, the captain was among the survivors.

WOODFORD

Finchley S.S. Co.; 1913; Sir J. Laing & Sons Ltd.; 6,987 tons; 425 - 5 x 57 -1 x 33 • 1; 555 n.h.p.; triple-expansion engines. The British tanker *Woodford* was torpedoed and sunk by a submarine during the Spanish Civil War on September 1st, 1937, when 24 miles off Benicarlo, Spain. She was carrying petroleum from Constantza to Barcelona and Valencia.

WOODLEIGH

Fisher, Renwick & Co.; 1894; J. L. Thompson & Sons; 2,664 tons; 300 X 41 - 3 x 19 • 3; 222 n.h.p.; triple-expansion engines. The British cargo ship *Woodleigh* was wrecked at Tregardock on August 28th, 1917. She was on a voyage from Boulogne to Barry carrying a cargo of stone.

WOODPECKER

British Navy, sloop; 1942; W. Denny & Bros.; 1,250 tons; 229-5x38x8-7; 4,300 s.h.p.; 20 knots; turbine engines; 3-drum boilers; six 4 in. guns, 2pom-poms. The sloop *Woodpecker*, Cdr. H. L. Pryse, R.D., R.N.R., was on anti-submarine duty in the North Atlantic. On February 20th, 1944, she was hit by a torpedo from a German submarine which blew off her stern. The *Woodpecker* was taken in tow but capsized and sank on the 27th. There was no loss of life.

WOODTOWN

Woodtown Shipping Co.; 1915; R. Williamson & Son; 794 tons; 186'3x29'4x12-4; 95n.h.p.; triple-expansion engines. The British steamship *Woodtown*, on a voyage from Newlyn to London, struck a mine and sank on November 15th, 1939, near Margate. Eight of her crew were lost.

WOOLER

WOOLER

Steel, Young & Co.; 1891; E. Withy & Co.; 2,403 tons; 290 x 38 - 1X 20; 221 n.h.p.; triple-expansion engines. The British steamship *Wooler* foundered off Ushant in a gale on January 2nd, 1899, while on a voyage from Cardiff to Las Palmas carrying a cargo of coal. Nineteen of the crew were drowned, four survivors in a boat were picked up by the steamship *Loch Etive* on the 4th.

WOOLGAR

Borge's RederiAJS; 1914; Swan, Hunter & Wigham Richardson; 3,060 tons; 350x47-1x12-1; 385 n.h.p.; triple-expansion engines.

The Norwegian steamship *Woolgar* was bombed and sunk by Japanese aircraft on March 7th, 1942, 150 miles S.W. of Tjilatjap. Thirty-eight of her crew were killed or lost at sea. The captain was taken prisoner and four officers and two men reached Port Blair, Andaman Islands, after 88 days in a boat; one of these died after landing.

WOOLSTON

5. Instone & Co.; 1900; J. Blumer & Co.; 2,986 tons; 325-4x 46-5x22-6; 292 n.h.p.; 9knots; triple-expansion engines. The steamship *Woolston* was torpedoed and sunk by a German submarine one and a half miles from Syracuse harbour on May 14th, 1918. The captain and 18 of the crew were killed.

WORDEN

United States Navy, destroyer; 1934; Puget Sound Navy Yard; 1,500 tons; 341-2x34-7x9-7; 42,800s.h.p.; 36-5 knots; turbine engines; Express boilers; four 5 in. guns, several smaller, 12T.

The United States destroyer *Warden* was a unit of the American force operating around the Aleutian Islands against the Japanese, who had occupied Kiska and Attu in June, 1942. The islands are mountainous, with rock-strewn foreshores, and are cloaked in fog for a great part of the year. On January 12th, 1943, the Americans were carrying out a landing on Amchitka when the *Worden* ran heavily ashore and became a total loss.

WORDSWORTH

Soc. Anon, de Nav. Royale Beige Sud-Americaine; 1882; A. Leslie & Co.; 3,339 tons; 367x39-1x19-4; 441 n.h.p.; compound engines.

The Belgian steamship *Wordsworth* was wrecked at Assu Torre, 45 miles N. of Bahia, on August 5th, 1902. She was carrying a general cargo from New York to Bahia.

WORDSWORTH

Shakespeare Shipping Co.; 1915; W. Gray & Co.; 3,509 tons; 343 x49x22-9; 299 n.h.p.; 9-5 knots; triple-expansion engines.

The steamship *Wordsworth* was captured by the German commerce-destroyer *Wolf west of* the Chagos Archipelago on March 11th, 1917. The vessel carried a cargo of rice which was a welcome find to the raider. After stripping the prize she was sunk on the 16th. The *Wolf* (ex- *Wachfels*) left Germany toward the end of November 1916. She was a ship of 5,809 tons and carried an armament of two 5-9 in. and four 4-1 in. guns, with two quick-firers and two machine guns. She was also equipped with two torpedo tubes and a small aeroplane and carried 500 mines. Her commander was Capt. Karl Nerger and he managed to keep at sea for 14 months without being caught by Allied warships, returning to Germany on February 19th, 1918.

During that time he laid minefields off Dassen Island; Cape Agulhas; Colombo; Bombay; Three Kings Island; Wellington, N.Z.; Gabo Island and off Singapore.

The ships lost through the activities of this raider were:—

January	26th, 1917	s.s. <i>Matheran</i> , 7,654, mined
February	17th ..	s.s. <i>Worcestershire</i> , 7,175, mined
..	21st ..	s.s. <i>Perseus</i> , 6,728 tons, mined
..	27th ..	s.s. <i>Turritella</i> , 5,528 tons, scuttled by German crew, March 5th
March	1st ..	s.s. <i>Jumna</i> , 4,152 tons, sunk March 4th

March	11th ..	s.s. <i>Wordsworth</i> , 3,509 tons, sunk March 16th
	31st	<i>Dee</i> , barque, 1,169 tons, sunk
May	26th	s.s. <i>C. de Eizaguirre</i> , Spanish, 4,367 tons, mined
June	2 nd	s.s. <i>Wairuna</i> , 3,947 tons, sunk June, 17th
..	16 th	<i>Winslow</i> , U.S. schooner, burned June 22nd
July	6th	s.s. <i>Cumberland</i> , 9,471 tons, mined
..	9th	<i>Belunga</i> , U.S. barque, sunk July 11th
..	13th	<i>Encore</i> , sailing ship, burned
August	6th	s.s. <i>Matunga</i> , 1,608 tons, sunk August 26th
..	10th	s.s. <i>City of Athens</i> , 5,604 tons, mined
..	..	s.s. <i>Bahamo</i> , mined
September	26th	s.s. <i>Hitachi Mam</i> , 6,716 tons, retained as supply ship, (sunk Nov. 7th)
November	10th	s.s. <i>Igotz Mendi</i> , Spanish, wrecked (Feb. 24th, 1918)
..	..	<i>John H. Kirby</i> , U.S. barque, sunk
December	..	<i>Marechal Davout</i> , French barque, sunk
January	4th, 1918	<i>Storebror</i> , Norwegian barque, sunk

WORKFIELD

W.R.Rea; 1901; Craig, Taylor & Co.; 4,257tons; 360x48>5x 20 - 3; 350 n.h.p.; triple-expansion engines.

The British steamship *Workfield* struck an unchartered rock and foundered off Turtle Rock, Sarawak, on December 24th, 1904. She was on a voyage from Cardiff, via the Cape of Good Hope, to Sasebo, Japan, carrying a cargo of coal.

WORKMAN

T. & J. Harrison; 1898; Workman, Clark & Co.; 6,116 tons; 450x52-5x30-6; 585n.h.p.; triple-expansion engines. The British steamship *Workman* was wrecked off Lago Mapudy, 15 miles from Rio de Janeiro, on December 26th, 1912. She was on a voyage from Vancouver, via Sars Francisco to London carrying a general cargo.

WORLD HARMONY

World Tankers Corp.; 1954; Vickers Armstrongs; 20,992 tons; 663 x 86 • 4 x 34 - 6; turbine engines.

The Greek tanker *World Harmony*, bound for Novorossisk in ballast, collided with the Yugoslav tanker *Petar Zoranic*, loaded with benzine and petrol, in the Bosphorus on December 14th, 1960. Both ships caught fire and drifted on to the Turkish steamship *Tarsus*, anchored near Istinye. All three ships were eventually destroyed by fire, with the total loss of 52 lives. Many of the survivors were badly burned.

WORLD SKY

S. S. Niarchos; 1953; Kockums Mek. Verkstad; 12,862 tons; 556-5x72-2x30-8; turbine engines.

The Liberian tanker *World Sky*, on a voyage from Port Sudan to Mena al Ahmadi, struck a reef in the Kuria Muria Islands off the coast of Oman on August 2nd, 1960, and sank. Sixteen of her crew were lost and 19, including the captain, saved.

WORLD SPLENDOUR

Merchant Tanker Corp.; 1957; Kockums Mek. Verkstad; 25,583 tons; 699-6x97-3x36-3; turbine engines. The Liberian tanker *World Splendour*, on a voyage from Fawley to Mena al Ahmadi, caught fire following two internal explosions on August 20th, 1957, 40-50 miles E. of Gibraltar. Sixty-one of the crew were taken off by other ships but the captain and eight men remained on board. The fire was eventually extinguished and on the 21st the tanker was taken in tow by two tugs, but sank before reaching port. Seven of her crew were lost.

WORON

West Russian S.S. Co.; 1906; Irvine's S'B. & D.D. Co.; 3,342 tons; 325x47-1x13-8; 275n.h.p.; triple-expansion engines.

The Russian steamship *Woron* was torpedoed and sunk by a German submarine in the North Sea on October 24th, 1917.

WREN

British Navy, destroyer; 1919; Yarrow & Co.; 1,9120 tons; 312x29-5x10-9; 27,000s.h.p.; 34 knots; turbine engines; Yarrow boilers; four 4-7 in. guns, two 2 pdr., 5 m.g., 6 T.T. The destroyers *Wren* and *Montrose* were in the North Sea on July 27th, 1941, when they were attacked by German bombers. The *Wren*, under command of Lt. Cdr. F. W. G. Marker, was hit and sunk off Aldeburgh, Suffolk. Four officers and 31 ratings were killed and two officers and six ratings wounded. Lt. Cdr. Harker was among the survivors.

The *Montrose* was more fortunate and succeeded in bringing down two of the bombers.

WREXHAM

Great Central Railway Co.; 1902; Sir Raylton Dixon & Co.; 1,414 tons; 239-9x35-3x20-8; 217n.h.p.; triple-expansion engines.

The British steamship *Wrexham*, from Murmansk with general cargo, was wrecked at the entrance to the Gulf of Archangel on June 19th, 1918.

WRYNECK

British Navy, destroyer; 1918; Palmer & Co.; 900 tons; 312x29-5x10; 18,000s.h.p.; 28 knots; turbine engines; Yarrow boilers; four 4 in. guns, 2 m.g.

The destroyer *Wryneck*, Cdr. R. H. D. Lane, in company with the destroyer *Diamond* took off 700 soldiers from the transport *Slamat* which had been bombed and set on fire in the Gulf of Nauplia on April 26th, 1941, during the evacuation of the British army from Greece. Next day both destroyers were bombed and sunk by German dive-bombers, with heavy loss of life. The *Wryneck* carried a complement of about 120, of whom seven officers, including Cdr. Lane, and 98 ratings were lost in addition to the soldiers, bringing the total to approximately 950 for both ships. Only about 50 of all services were saved.

For further particulars see *Diamond*.

WUHU

China Navigation Co.; 1879; 3,051 tons; 289-4x50-3x12; 300 h.p.; compound-inverted engines.

The British cargo ship *Wuhu* was wrecked in the Yangtze River on January 6th, 1883, while carrying a general cargo from Shanghai to Hankow.

WUHU MARU

Toa Kaiun K.K.; 3,222 tons.

The steamship *Wuhu Maru* was torpedoed and sunk by the U.S. submarine *Seawolf* on October 29th, 1943, about 100 miles S.E. of Hong Kong.

WYE

Royal Mail Steam Packet Co.; 1853; J. Caird & Co.; 819 tons; 210x—x—; 10 knots; compound engines. The small R.M.S.P.Co's steamship *Wye* was lying in the harbour of St. Thomas, Virgin Islands, on the morning of the great hurricane of October 29th, 1867. The story of the catastrophe, and of the loss of many of the R.M.S.P.Co's fleet, is told under the *Rhone*. At the moment when the hurricane descended upon the islands the *Wye* was without her captain, he being on a visit to the captain of the *Tyne*. The vessel, under charge of Mr. Hodgson, the first officer, slipped her anchor at the first sign of danger and got away westward out of the crowded harbour. She experienced fearful seas which washed away her binnacle, one of her masts went by the board and she became unmanageable. In this state she was flung broadside-on to the rocks of Buck Island and became a total wreck.

Of the 69 officers and men on the *Wye*—she was fortunately without passengers—41 were drowned. Among the survivors was Mr. Hodgson who, despite a broken arm, had made valiant efforts to save the ship.

WYKEHAM

Robinson & Rowland; 1882; T. Turnbull & Son; 1,474 tons; 243 x34x17-9; 130 h.p.; compound-inverted engines. The steamship *Wykeham* left Cardiff on March 25th, 1883, for Port Said. At some time prior to April 8th she foundered in a severe gale, probably in the neighbourhood of the River Tagus, with the loss of all on board.

WYNDHURST

Cleves Western Valleys Anthracite Collieries; 1917; J. Lewis & Sons; 570 tons; 165-1x27x11!'; 96r.h.p.; 8-5 knots; triple-expansion engines.

The collier *Wyndhurst* was torpedoed and sunk by a German submarine 30 miles S. of St. Catherine's Point on December 6th, 1917. The captain and ten of the crew were killed.

WYNNSTAY

County Shipping Co.; 1884; Russell & Co.; 1,674 tons; 258-8x38-2x23-1.

The British sailing ship *Wynnstay*, Capt. W. Thomas, on a voyage from Swansea to Iquique, was wrecked on the island of Serrana, Iquique, on July 30th, 1910. Five of the crew were drowned.

WYTHBURN

Walton S.S. Co.; 1911; R. Williamson & Son; 420 tons; 141-6x24-3x11; 83 r.h.p.; compound engines. The British steamship *Wythburn*, on a voyage from Bucarra to Bristol, struck a mine and sank on October 28th, 1940, in the Bristol Channel. Five of her crew of eight were lost.

XALAPA

XALAPA

Transportes Maritimos Mexicanos; 1945; *Chicago Bridge & Iron Co.*; 3,989 tons; 328x50-9x16-6; oil engines. The Mexican motorship *Xalapa* was driven ashore and wrecked off Manzanillo on October 27th, 1959, during a hurricane.

XANTHO

T. Wilson, Sons & Co.; 1871; *C. & W. Earle*; 1,826 tons; 282x34-8x19-6; 250h.p.; compound-inverted engines. The British steamship *Xantho*, on a voyage from Cronstadt to Hull with grain, was sunk by collision with the German steamship *Valuta*, 1,034 tons, on June 24th, 1884, near Faro Light, Gotland Island.

YAE MARU

Kokusai Kisen K.K.; 1919; *Harima Dockyard Co.*; 6,781 tons; 425 x 53 - 6 x 37 - 5; 556 n.h.p.; triple-expansion engines. The steamship *Yae Maru* was torpedoed and sunk by a British submarine on April 1st, 1942, in the Straits of Malacca.

YAEI MARU

Nihonkai Kisen K.K.; 1941. The steamship *Yaei Maru* was torpedoed and sunk by the U.S. submarine *Kingfish* on January 3rd, 1945, 400 miles S.E. of Nagoya.

YAGI MARU

NanyoKaiunK.K.; 1937. The steamship *Yagi Maru* was torpedoed and sunk by the U.S. submarine *Barbel* on August 9th, 1944, off the west coast of Tokunoshima, Ryukyu Islands,

YAHAGI

Japanese Navy, light cruiser; 1942; *Japan*; 6,000 tons; 560 X 49-5x—; 34 knots; turbine engines; six 6-1 in. guns, many 47 mm., 2 aircraft.

The light cruiser *Yahagi* was one of a squadron in the East China Sea, cruising about 50 miles S.W. of Kyushu. On April 7th, 1945, this force was attacked by U.S. naval aircraft from the Fifth Fleet carriers and was severely handled. The *Yahagi* was bombed and sunk as well as the battleship *Yamato* and four destroyers.

The full story of the fighting around Okinawa is told under the battleship *Yamato*.

YAHIKO MARU

Kobe Kisen Shintaku K.K.; 1888; *C. Cornell & Co.*; 2,653 tons; 305-6x39x24; 251 n.h.p.; triple-expansion engines. The steamship *Yahiko Maru*, on a voyage from Haiphong to Hong Kong, with limestone, was wrecked about ten miles S.E. of Hainan Head, during a storm on June 6th, 1924. About 32 lives were lost, three survivors were picked up by a Japanese naval vessel.

YAHIKO MARU

ItayaMiyakichi; 1926; *Kobe Steel Works*; 5,747 tons; 417-2 x 54-5x31-5; 776 n.h.p.; oil engines. The motor vessel *Yahiko Maru* was torpedoed and sunk by the U.S. submarine *Seawolf* on January 11th, 1944, about 50 miles W. of Oki no Erabu, Ryukyu Islands.

YAKUMO MARU

Osaka Shosen K.K.; 1919; *Ishikawajima S.B. & E. Co.*; 3,198 tons; 305x43-9x27-3; 279n.h.p.; triple-expansion engines. The steamship *Yakumo Maru* was bombed and sunk by U.S. land-based aircraft on March 19th, 1944, N. of the Schouten Islands, off north east New Guinea.

YALOVA

Deutsche Levante Linie; 1920; *Frerichs & Co.*; 3,750 tons; 362-7x50-3x22-2; 316n.h.p.; triple-expansion engines. The German steamship *Yalova* was torpedoed and sunk by a British submarine on September 28th, 1941, S. of San Giorgio Island, Italy.

YALTA

AzoffS.N.Co.; 1896; *J.Laing*; 1,361 tons; 235-8x34-2x9; 182n.h.p.; triple-expansion engines. The Russian steamship *Yalta* struck a mine and sank in the Black Sea on October 29th, 1914.

YAMABATO MARU

Yamashita Kisen K.K.; 1937; *Uraga Dock Co.*; 2,556 tons; 297-9x45x23-8; 165 n.h.p.; compound engines & L.P. turbine. The steamship *Yamabato Maru* was torpedoed and sunk by the U.S. submarine *Wahoo* on March 29th, 1943, W. of Shichi-to Island, South Japan.

YAMABIKO MARU

Yamashita Kisen K.K.; 1937; *Uraga Dock Co.*; 6,795 tons; 441-7x59x33-7; 833 n.h.p.; turbine engines. The steamship *Yamabiko Maru* was taken over by the Japanese Navy for service as a salvage vessel. On January 10th, 1944, she was

torpedoed and sunk by the U.S. submarine *Steelhead* about 150 miles E. of Kyushu Island, Japan.

YAMABUKI MARU

Yamashita Kisen K.K.; 1930; *W. Doxford & Sons*; 5,081 tons; 404 - 5x55-2x27-7; 441 n.h.p.; triple-expansion engines. The steamship *Yamabuki Maru* was sunk by U.S. carrier-based aircraft on September 21st, 1944, about 100 miles S. of Olongapo, Philippines.

YAMAFUJI MARU

Yamashita Kisen K.K.; 1920; *J. Coughlan & Sons*; 5,359 tons; 400x52-4x28-8; 520 n.h.p.; triple-expansion engines. The steamship *Yamafuji (Yamahuzi) Maru* was torpedoed and sunk by the U.S. submarine *Finback* on October 20th, 1942, off the west coast of Formosa.

YAMAFUKU MARU

Yamashita Kisen K.K.; 1940; *Osaka Iron Works*; 4,928 tons; 365-7x54-1x29-1; 436n.h.p.; turbine engines. The steamship *Yamafuku Maru* was torpedoed and sunk by the U.S. submarine *Snook* on November 29th, 1943, 400 miles W. of the Ladrone Islands.

YAMAGATA MARU

Nippon YusenK.K.; 1916; *Mitsubishi Dockyard & Eng. Works*; 3,807 tons; 345x50x29-1; 342n.h.p.; triple-expansion engines. The steamship *Yamagata Maru* was torpedoed and sunk by the U.S. submarine *Redfin* on April 16th, 1944, in the Moro Gulf, 70 miles east of Zamboanga, Philippines.

YAMAGIKU MARU

Yamashita Kisen K.K.; 1920; *Irvine's S.B. & D.D. Co.*; 5,236 tons; 400 x 52x31; 517 n.h.p.; triple-expansion engines. The steamship *Yamagiku Maru* was torpedoed and sunk by the U.S. submarine *Par go* on June 28th, 1944, about 50 miles N. of Zamboanga, Philippines.

YAMAGIRI MARU

Yamashita Kisen K.K.; 1938; *MitsubishiJukogyo K.K.*; 6,438 tons; 439-4x58-3x32; 1,166n.h.p.; oilengines. The motor vessel *Yamagiri Maru* was sunk by U.S. carrier-based aircraft on February 17th, 1944, in the Caroline Islands.

YAMAGUMO

Japanese Navy, destroyer; 1937; *Fujinagata*; 1,500 tons; 356x33-3x9; 39,000s.h.p.; 34 knots; turbine engines; Kanpon boilers; six 5 in. guns, 2 m.g.; 8 T.T. The destroyer *Yamagumo* was one of nine such vessels sunk at the battle of Leyte Gulf, October 23rd-27th, 1944. The particular action in which the *Yamagumo* was sunk was that fought in the Surigao Strait on the night of the 25th. An advance group of the Japanese Southern Force, consisting of two battleships, one heavy cruiser and four destroyers encountered an American fleet of five battleships and many cruisers and destroyers. All the Japanese ships, except one solitary destroyer, were sunk without the loss of any American vessel.

The *Yamagumo* was sunk in action with American destroyers. She carried a complement of over 200.

For details of the Surigao Strait action, see the battleship *Yamashiro*. For Leyte Gulf action see, the battleship *Musashi*.

YAMAHAGI MARU

Yamashita Kisen K.K.; 1919; *Sunder land S.B. Co.*; 5,246 tons; 400X52-4x28-4; 517n.h.p.; triple-expansion engines. The steamship *Yamahagi Maru* was sunk by U.S. carrier-based aircraft on October 12th, 1944, off Kaohsiung, Formosa.

YAMAKAZE

Japanese Navy, destroyer; 1936; *Uraga*; 1,368 tons; 335-5 x 31-7x9-2; 37,000s.h.p.; 34 knots; turbine engines; Kanpon boilers; five 5 in. guns, 2m.g.; 8 T.T. The destroyer *Yamakaze* was torpedoed and sunk off Yokosuka by the U.S. submarine *Nautilus* on June 25th, 1942. The normal complement of the destroyer was 180.

YAMAKUNI MARU

YAMAKUNI MARU

Yamashita Kisen K.K.; 6,921 tons.
The steamship *Yamakuni Maru* was torpedoed and sunk by the U.S. submarine *Swordfish* on January 14th, 1944, about 125 miles S. of Yokohama.

YAMAMICHI MARU

Yamashita Kisen K.K.; 6,850 tons.
The steamship *Yamamichi Maru* struck a mine and sank on July 1st, 1945, off Kobe.

YAMAMIYA MARU

Yamashita Kisen K.K.; 6,440 tons.
The steamship *Yamamiya Maru* was torpedoed and sunk by the U.S. submarine *Bashaw* on June 25th, 1944, off the Sangihe Islands, Celebes.

YAMAMIZU MARU

Yamashita Kisen K.K.; 5,174 tons.
The tanker *Yamamizu Maru* was torpedoed and sunk by the U.S. submarine *Hake* on March 27th, 1944, 235 miles N.E. of Djakarta.

YAMAMIZU MARU No. 2

Yamashita Kisen K.K.; 5,154 tons.
The tanker *Yamamizu Maru No. 2* was torpedoed and sunk by the U.S. submarine *Cabrilla* on October 6th, 1944, about 50 miles W. of Luzon Island, Philippines.

YAMAMIZU MARU No. 3

Yamashita Kisen K.K.; 5,244 tons.
The tanker *Yamamizu Maru No. 3* was bombed and sunk by U.S. land-based aircraft on April 22nd, 1944, 60 miles E. of Gocong, Indo-China.

YAMAOKA MARU

Yamashita Kisen K.K.; 6,932 tons.
The steamship *Yamaoka Maru* was torpedoed and sunk by the U.S. submarine *Tang* on July 4th, 1944, about 100 miles N. of Mokpo, Korea.

YAMASHIMO MARU

Yamashita Kisen K.K.; 1938; *Tsurumi Seitetsu Zosen K.K.*; 6,776 tons; 446 - 5 x 59 - 1 x 33 • 8; 398 n.h.p.; turbine-engines. The steamship *Yamashimo (Yamasimo) Maru* was torpedoed and sunk by the U.S. submarine *Tang* on February 23rd, 1944, about 50 miles W. of Rota Island, Ladrone Islands.

YAMASHIRO

Japanese Navy, dreadnought battleship; 1915; Yokosuka; 29,330 tons; 673x94x28-5; 40,000 i.h.p.; 22-5 knots; turbine engines; Kanpon boilers; twelve 14 in. guns, twelve 6 in., eight 5 in., 26 m.g., 2 T.T., 1 aircraft.

The Japanese battleship *Yamashiro* was a unit of the 'Southern Force' in action with the U.S. Seventh Fleet in the Surigao Strait in the early hours of October 25th, 1944. The whole engagement, known as the battle of Leyte Gulf, took place on the eastern coasts of the Philippines, ranging from Surigao Strait in the centre to Cape Engano in the north-east. It lasted more than four days, 23rd-27th, and embraced three separate actions fought simultaneously.

The advance portion of the 'Southern Force' which ran into the Surigao Strait comprised the following ships:—

BATTLESHIPS

<i>Yamashiro</i>	29,330 tons, twelve 14 in. guns
<i>Fuso</i>	" " " " " "

HEAVY CRUISER

<i>Mogami</i>	14,000 tons, eight 8 in. guns
---------------	-------------------------------

With four medium-sized destroyers.

Its objective was Leyte Gulf where the American army was disembarking, and which was covered on the eastern side by the U.S. Seventh and Third Fleets. A force of battleships, cruisers and destroyers under Rear-Admiral Jesse B. Oldendorf had already taken up positions in the strait unknown to the Japanese. The American destroyers and torpedo boats were deployed on either side, while the eastern end of the strait was sealed off by the heavy

ships. These included a battle-squadron consisting of the following:—

<i>Pennsylvania</i>	33,100 tons, twelve 14 in. guns
<i>California</i>	32,600 " " " "
<i>Tennessee</i>	" " " "
<i>West Virginia</i>	31,800 " eight 16 in. guns
<i>Maryland</i>	31,500 " " "

In the intense darkness of the early morning the 'Southern Force' steamed into this trap and was annihilated within a very few minutes. A stream of torpedoes fired at close range, mingled with salvos from the big guns of the heavy ships struck the Japanese squadron before it had any opportunity to make effective reply. The measure of this sudden onslaught may be gauged from the fact that the *Yamashiro* and her sister ship, the *Fuso*, with the destroyers *Asagumo*, *Michishio* and *Yamagumo*, all of 1,500 tons, went to the bottom and the heavy cruiser *Mogami* was disabled by gunfire and was sunk by aircraft on the following day.

The full story of the battle of Leyte Gulf is told under the battleship *Musashi*.

YAMASHIRO MARU

Nippon Yusen K.K.; 1912; *Kawasaki Dockyard Co.*; 3,429 tons; 352x44-7x25 • 9; 400 n.h.p.; triple-expansion engines. The steamship *Yamashiro (Yamasiro) Maru* was torpedoed and sunk by the U.S. submarine *Trout* on September 23rd, 1943, 200 miles S. of Iwojima.

YAMASHITA MARU

Yamashita Kisen K.K.; 10,605 tons.
The steamship *Yamashita Maru* was sunk by U.S. carrier-based aircraft on February 17th, 1945, off Tateyama, Japan.

YAMATO

Japanese Navy, dreadnought battleship; 1940; Japan; 42,500 tons; 870x139x—; 160,000 s.h.p.; 30 knots; turbine engines; nine 16 in. guns, six 6-1 in., twelve 5 in.A.A., many 47 mm. On April 7th, 1945, a fast aircraft carrier force of the U.S. navy, under command of Vice-Admiral M. A. Mitscher, located a Japanese heavy squadron in the East China Sea, about 50 miles S.W. of Kyushu* Visibility was poor but in spite of this American airmen scored vital hits on the battleship *Yamato*, the latest and newest of her class in the Japanese navy. After sustaining many hits from bombs, aerial torpedoes and rockets the battleship sank, together with the light cruiser *Yahagi*, 6,000 tons, and the destroyers *Asashimo*, *Hamakaze* and *Isokaze* of 2,000 tons each, and the *Kasumi*, 1,500 tons.

The fighting was occasioned by the American landing on the island of Okinawa on April 1st. Although no large American unit was lost the casualties of personnel were severe.

In destroyers the loss was heavy as shown below:—

<i>Bush</i>	2,100 tons	<i>Morrison</i>	2,050 tons
<i>Colhoun</i>	2,050	<i>Oberrender</i>	1,275 "
<i>Drexler</i>	2,200	<i>Pringle</i>	2,050 "
<i>Halligan</i>	2,050	<i>Twiggs</i>	1,700 "
<i>Little</i>	2,050	<i>William D.</i>	"
<i>Luce</i>	2,100	<i>Porter</i>	1,700 "
<i>MannertL.</i>	"		
<i>Abele</i>	2,200		

All the above ships were lost between March 26th and June 16th.

YAMATO MARU

Nippon Yusen K.K.; 1915; *Soc. Esercizio Bacini*; 9,656 tons; 505 - 1 x 59 - 6 x 25 • 5; 1,512 n.h.p.; quadruple-expansion engines. The steamship *Yamato Maru*, serving as a transport, was torpedoed and sunk by the U.S. submarine *Snook* on September 13th, 1943, 200 miles S.E. of Shanghai.

YAMATO MARU

Hakuyo Kisen K.K.; 1917; *Osaka Iron Works*; 4,379 tons; 345 x 49 - 8 x 28 - 1; 390 n.h.p.; triple-expansion engines. The steamship *Yamato Maru* was torpedoed and sunk by the U.S. submarine *Tinosa* on November 22nd, 1943, off the Palau Islands.

YAMATSURUMARU

Yamashita Kisen K.K.; 2,651 tons.

The steamship *Yamatsuru Mam* was torpedoed and sunk by the U.S. submarine *Seawolf* on January 14th, 1944, about 350 miles S. of Shikoku, Japan.

YAMAURAMARU

Yamashita Kisen K.K.; 1937; *Uraga Dock Co.*; 6,798 tons; 441-7x59-1x32-7; 833n.h.p.; turbine engines. The steamship *Yamaura Mam* was sunk by U.S. land and carrier-based aircraft and gunfire from warships on November 15th, 1942, in the Solomon Islands.

YAMAYURIMARU

Yamashita Kisen K.K.; 1913; *A. McMillan & Son*; 5,028 tons; 400 • 8 x 52 • 1 x 27 • 3; 458 n.h.p.; triple-expansion engines. The steamship *Yamayuri Maru* was sunk by U.S. carrier-based aircraft on January 24th, 1944, off Rabaul.

YAMAZATOMARU

Fuso Kaiun K.K.; 1937; *Mitsui Bussan Kaisha*; 6,925 tons; 443 x 60 x 34 • 1; 962 n.h.p.; oil engines.

The motorship *Yamazato Maru* was torpedoed and sunk by a Dutch submarine on April 22nd, 1943, in the Straits of Malacca.

YAMAZAWAMARU

Yamashita Kisen K.K.; 6,889 tons. The steamship *Yamazawa Maru* was sunk by U.S. carrier-based aircraft on January 21st, 1945, off Kaohsiung, Formosa.

YAMAZUKIMARU

Yamashita Kisen K.K.; 1937; *Mitsubishi Jukogyo K.K.*; 6,439 tons; 436-4x58-3x32; 1,167h.p.; oil engines. The motorship *Yamazuki Maru* was sunk by U.S. land and carrier-based aircraft on November 15th, 1942, in the Solomon Islands.

YANAGIGAWAMARU

Dairen Kisen K.K.; 2,813 tons. The steamship *Yanagigawa Maru* was torpedoed and sunk by the U.S. submarine *Bashaw* on September 8th, 1944, in the Sulu Sea.

YANG TSZE

Lemn & Co.; 1863; *A. Hall*; 688 tons; 179-5x31x18-3. The famous China tea clipper *Yang Tsze*, Capt. W. Smith, left China for New York with a cargo of tea. On October 2nd, 1871, she was wrecked on the Paracel Islands, South China Sea. Capt. Smith and six men were lost.

YANG WEI

Imperial Chinese Navy, light cruiser; 1881; *L. Walker & Co.*; 1,350 tons; 210x32x15-8; 2,580i.h.p.; 16 knots; two 10 in. guns, four 4-7 in., 7m.g.

The small Chinese light cruiser *Yang Wei* was heavily armed for her size, and also carried many unnecessary wooden fittings and decorations. At the battle of the Yalu on September 17th, 1894, she and her sister ship, the *Chao Yung*, were outclassed by the new and fast Japanese cruisers armed with quick-firing guns. Both ships were soon in flames and were forced to haul out of the line.

The *Yang Wei*, heavily on fire, turned shorewards and ran aground. The *Chao Yung*, also in flames, rolled over and sank.

The full story of the battle of the Yalu is told under the *Chi-Yuen*.

YAR HISSAR

Turkish Navy, destroyer; 1907; *Chantiers de la Loire*; 305 tons; — x — X12-5; 6,000i.h.p.; 28 knots; turbine engines; one 12 pdr. gun, six 3 pdr., 2 T.T.

The destroyer *Yar Hissar* was a victim of the famous British submarine *E-11* in the Dardanelles campaign during the First World War. The destroyer was patrolling the waters of the Gulf of Ismid, at the eastern end of the Sea of Marmara when, on December 3rd, 1915, she was torpedoed and sunk by the *E-11*. Of her complement of 70 Turks and 15 Germans, three officers, including the commander, and 40 ratings, of whom five were German, were rescued by the *E-11*. The total number lost was 42.

Cdr. M. E. Nasmith was awarded the V.C. in recognition of his successful operations in the Sea of Marmara and the Dardanelles.

YARMOUTH

Great Eastern Railway Co.; 1903; *Gourlay Bros. & Co.*; 806 tons; 245 • 3 x 31 -1 x 15 • 3; 202 n.h.p.; 14 knots; triple-expansion engines.

The steamship *Yarmouth*, Capt. Avis left Rotterdam for Harwich at 10.30 a.m. on April 27th, 1908, with a crew of 20 and 443 tons of cargo, of which 192 tons was meat. Her deck cargo was said to be very heavy and among other items were three 3 ton pantehnicon vans filled with furniture. At about 5 p.m. on the same day observers on the Gabbard Lightship saw the *Yarmouth* rolling heavily. Witnesses from this ship stated that she rolled two or three times and was then lost to sight.

Immediately on receipt of the news the Great Eastern company sent out the steamship *Vienna* to make a search but beyond floating cases of meat she saw nothing of the missing ship. The cruiser *Blake* reported picking up the dead body of a man in a lifebuoy marked "Yarmouth, Harwich". She also sighted one of the pantehnicon vans.

From this meagre news and the evidence of those on the lightship it was assumed that the unfortunate steamship must have capsized and gone down with all hands.

YARRA

Messageries Maritimes; 1883; *Messageries Maritimes*; 4,163 tons; 416-7x41-6x30-7; 586n.h.p.; 10knots; triple-expansion engines. The liner *Yarra* was proceeding from Egypt to France with the Egyptian mail and 690 persons, of whom a large number were native passengers from Madagascar. On May 29th, 1917, the liner was torpedoed by a German submarine when passing through the Eastern Mediterranean. Eight Arab stokers and a number of Madagascar natives were killed by the explosion. The total number lost from all causes was 56.

YARRA

Australian Navy, sloop; 1935; *Cockatoo Dockyard, Sydney*; 1,060 tons; 266x36x7-5; 2,000 s.h.p.; 16-5 knots; turbine engines; 3-drum boilers; three 4 in. guns, four 3pdr., 6 m.g. The Australian sloop *Yarra*, Lt. Cdr. R. W. Rankin, R.A.N., was sunk a few days after the disastrous battle of the Java Sea. On March 4th, 1942, the sloop was convoying a number of Allied merchantmen which had sailed from Tjilatjap on the 2nd, when they were surprised by a Japanese force of three cruisers and two destroyers. The *Yarra*, which carried a complement of 152, was sunk in an attempt to ram one of the cruisers. The whole of the convoy was destroyed. Casualties on board the *Yarra* amounted to 139 killed, including Cdr. Rankin.

On February 5th the *Yarra* had rendered splendid service to the liner *Empress of Asia* which had been bombed and set on fire by Japanese aircraft off Singapore. The liner was carrying troops at the time and the *Yarra* came alongside and saved many hundreds. The sloop also drove off the raiders with her anti-aircraft guns.

For the full story of the battle of the Java Sea see under Dutch cruiser *De Ruyter*, flagship of Rear-Admiral K. Doorman.

YARRAVILLE

Standard Transportation Co.; 1928; *Lithgows Ltd.*; 8,627 tons; 460 x 62 - 8 X 36 - 4; 666 n.h.p.; 11 knots; triple-expansion engines.

The tanker *Yarraville*, Capt. W. A. Beveridge, was torpedoed and sunk by a German submarine off Gibraltar on June 21st, 1940. Five men were killed and seven were wounded, Capt. Beveridge was among the survivors. The vessel was not in convoy at the time.

YARROWDALE

Mackill Steamship Co.; 1912; *W. Dobson & Co.*; 4,652 tons; 390-2x52x26-6; 429n.h.p.; 13 knots; triple-expansion engines; (armed as *Rend*) five 5 • 9 in. guns, four 3-4 in., 2 T.T. The steamship *Yarrowdale* was captured by the German commerce-destroyer *Moewe* on December 11th, 1916, about 540 miles E.S.E. of Cape Race and taken to Germany. She was renamed *Leopard* and fitted out as a commerce raider armed with five 5-9 in. and four 3-4 in. guns and two torpedo tubes. Her appearance was altered by rigging her masts with derricks and painting her black with white upperworks, her sides carrying the Norwegian flag and the name *Rena—Norge*, on large boards. Thus disguised she left Germany

YASAKA MARU

about the middle of March, 1917, and by the 16th was 200 miles N.E. of the Faroes making for the Atlantic.

The position of the *Rena* was athwart the British patrol line running between the Shetlands and Iceland and just before noon she was sighted by the cruiser *Achilles*, 13,550 tons, six 9-2 in guns, and the armed boarding steamship *Dundee*, 2,187 tons, two 4 in. guns. The cruiser directed the *Dundee* to overhaul the stranger and carry out the usual routine enquiries, and at 2 p.m. she was signalled to stop which she did, and then to steer W. by S. and finally at 2.35 p.m. she was again ordered to stop and *Dundee* lowered a boat with a boarding party of five seamen under Lt. F. H. Lawson, R.N.R. By this time the British ships were highly suspicious of her character and Cdr. S. M. Day, R.N.R., in command of *Dundee* maneuvered his vessel to bring her on the stranger's weather quarter in order that he might rake her with his 4 in. guns. At 3.40 p.m. the *Rena* dropped her painted board from her port side and fired two torpedoes which ran to within 20 yards of *Dundee's* stern. The *Dundee* replied with her 4 in. guns causing an explosion followed by clouds of smoke from the German vessel. The engagement was fought out at close range, the enemy being slow to bring his guns into action, probably owing to the damage caused by *Dundee's* first salvo. After some 30 minutes *Achilles* came within range and completed the destruction of the raider with a torpedo which struck her in the bows. At 4.35 p.m. the *Rena* sank, being heavily on fire with her forward portion red hot. There were no survivors and Lt. Lawson and the five men of the boarding party perished as well.

YASAKA MARU

Nippon Yusen; 1914; *Kawasaki Dockyard Co.*; 10,932 tons; 516-7x61-8x34-6; 1,300 n.h.p.; triple-expansion engines. The Japanese steamship *Yasaka Maru* was torpedoed and sunk by a submarine in the Mediterranean on December 21st, 1915.

YASHIMA

Japanese Navy. 1st class battleship; 1896; *Vickers Son & Maxim*; 12,320 tons; 374x73x26-5; 13,500 i.h.p.; 18 knots; triple-expansion engines; four 12 in. guns, ten 6 in., sixteen 12 pdr., four 3pdr., four 2pdr., 5 T.T. The Japanese battleship *Yashima* was a unit of the 2nd subdivision of the 1st Battle Division during the Russo-Japanese War. On the morning of May 15th, 1904, in company with the battleships *Hatsuse* (which see), flagship of Rear-Admiral Nashiba, and the *Shikishima*, the ship was engaged in patrol duties off the fortress of Port Arthur. The Russians had observed the limits of the patrol and had plotted it with great care. As it was carried out at regular intervals they dispatched the minelayer *Amur*, Capt. Ivanov, to lay mines in the course of the squadron. The minefield was sown on the night of the 14th May, and was a violation of international law as it lay across the open sea in the course of all shipping, neutral as well as belligerent. At about 10 a.m. the flagship *Hatsuse* struck one of these mines, and some time later, when in tow, struck another and blew up with great loss of life. Shortly afterwards the *Yashima* struck one, or perhaps two mines and was badly holed. Her watertight bulkheads, however, kept her afloat and she was taken in tow for shallow water, where she might be beached and patched up sufficiently to proceed to a dockyard.

The ship was towed for many hours but the water gained on her and she gradually sank. The crew had ample time to take to the boats and were picked up by ships in company.

YASUKAWA MARU

Kawasaki Kisen K.K.; 1930; *Harland & Wolff*; 6,710 tons; 455-3x61-7x30-5; 979 n.h.p.; oilengines. The motorship *Yasukawa Maru* was bombed and sunk by U.S. land-based aircraft on November 2nd, 1942, off Buna, New Guinea.

YASUKUNI MARU

Minamimanshu Kisen K.K.; 1893; *A. Stephen & Sons*; 5,118 tons; 400x48x19-7; 362 n.h.p.; triple-expansion engines. The Japanese steamship *Yasukuni Maru* was sunk by a submarine in the Mediterranean on November 3rd, 1915.

YASUKUNI MARU

Hamane Shoten K.K.; 1920; *N. of Ireland S.B. Co. Ltd.*; 3,025 tons; 331-1 X 46-7 x 23-1; 433 n.h.p.; triple-expansion engines. The steamship *Yasukuni Maru* was torpedoed and sunk by the U.S.

submarine *Seahorse* on January 21st, 1944, about 200 miles N. of New Guinea.

YASUKUNI MARU

Nippon Yusen K.K.; 1930; *Mitsubishi Zosen Kaisha*; 11,933 tons; 507-5x64x36-8; 2,492 n.h.p.; oilengines. The motorship *Yasukuni Maru* was taken over by the Japanese Navy and converted into an auxiliary submarine tender. On January 31st, 1944, she was torpedoed and sunk by the U.S. submarine *Trigger* N.W. of Truk Island.

YASUKUNI MARU

Nippon Seitetsu K.K.; 5,794 tons. The steamship *Yasukuni Maru* was torpedoed by the U.S. submarine *Segundo* and bombed and sunk by carrier-based aircraft on December 6th, 1944, off the north coast of Luzon Island, Philippines.

YASUSHIMA MARU

Iino Kisen K.K.; 1939; *Kawaminami Kogyo K.K.*; 1,911 tons; 272-7x40x20-3; 150 n.h.p.; triple-expansion engines. The steamship *Yasushima (Yasusima) Maru* was torpedoed and sunk by a British submarine on March 28th, 1944, in the Straits of Malacca.

YATAGAN

French Navy, destroyer; 1900; *France*; 310 tons; 185-5 X 20-6x9; 5,600h.p.; 26 knots; turbine engines; Normand boilers; one 9pdr. gun, six 3 pdr., 2 T.T.

The small French destroyer *Yatagan* was lost by collision with the British steamship *Teviot*, off Dieppe on December 3rd, 1916. The destroyer carried a complement of 62.

YAWATA MARU

Hinode Kisen K.K.; 1935; *Asano S.B. Co.*; 1,852 tons; 270X 40x20-3; 156n.h.p.; triple-expansion engines.

The steamship *Yawata Maru* was torpedoed and sunk by the U.S. submarine *Trigger* on November 2nd, 1943, about 300 miles E. of the Ryukyu Islands.

YAYOI

Japanese Navy, destroyer; 1925; *Uraga Dock Co.*; 1,315 tons; 320x30x9-9; 38,500 s.h.p.; 34 knots; turbine engines; *Kanpon boilers*; four 4-7 in. guns, 2 m.g., 6 T.T. The destroyer *Yayoi* was bombed and sunk by British and American aircraft off Normanby Island, New Guinea, on September 11th, 1942. The destroyer's normal complement was 100.

YDRA

Greek Navy, destroyer; 1931; *OdeTo-Terni-Orlando*; 1,389 tons; 303 X32x12-5; 40,000 s.h.p.; 39-5 knots; turbine engines; *Express boilers*; four 4-7 in. guns, three 40 mm., 6 T.T., 40 mines.

The destroyer *Ydra*, Cdr. Pezopoulos, was escorting a convoy of ships leaving the Piraeus on the evening of April 22nd, 1941, when she was attacked by 35 German Stuka bombers. Within three minutes the ship's guns had been put out of action and one third of her complement of 156 killed, including Cdr. Pezopoulos, the first and second lieutenants and the surgeon. Capt. Mezevisis, commanding the flotilla, who had escaped from the *Psara* on the previous day, was wounded. He gave the order to abandon ship and was later taken off a rock to which he and many of the survivors had swum, by a torpedo boat.

Such of the Greek naval and military forces as could get away were making for Alexandria to join the Allies. A more detailed account of events is given under the *Psara*.

YEIRYO MARU

Tanaka Kisen G.K.; 1905; *Irvine's S.B. & D.D. Co.*; 3,439 tons; 342-4x49-5x22-8; 312 n.h.p.; triple-expansion engines. The steamship *Yeiryo Maru* left Kushiro on October 29th, 1934, for Dairen with a cargo of railway sleepers. At 7.30 a.m. on November 2nd a distress call from the ship was picked up, giving a position off Oki Island, but nothing other than floating wreckage was ever found.

YEITOKU MARU

Nippon Godo Kosen K.K.; 1888; *London & Glasgow Eng. & Iron S.B. Co.*; 2,951 tons; 344x40x27-7; 380n.h.p.; triple-expansion engines. The steamship *Yeitoku Mam*, on a voyage from Hokkaido to Konan, Korea, with ore, sprang a leak and sank off the east coast of Korea at midnight on October 26th, 1935. There were no survivors.

YENISEI

Russian Navy, minelayer; 1900; *Baltic Works*; 3,000 tons; 4,958 i.h.p.; 18 knots; triple-expansion engines; five 12pdr. guns, seven Spdr., 1 T.T., 500 mines.

At the commencement of the Russo-Japanese War the minelayer *Yenisei* was lying at Port Arthur with the Russian Pacific Squadron. On February 10th, 1904, two days after hostilities had begun, the ship, escorted by the cruiser *Boyarin*, proceeded to lay mines at the entrance to Ta-lien Bay. On the morning following it was found that one of these mines had come adrift, and the *Yenisei* attempted to destroy it by gunfire. While engaged on this task the ship hit on another of the mines and was blown up, sinking within 20 minutes.

Of her complement of 317 officers and men, four officers, including Cdr. Stepanoff, and 89 ratings were lost.

YEOMAN

T. & J. Harrison; 1901; *C. Connell & Co.*; 7,379 tons; 470-3 x 56 - 2 X 31 • 8; 576 n.h.p.; triple-expansion engines. The British steamship *Yeoman* was wrecked at Camelle, near Cape Villano, on February 10th, 1904, while on a voyage from Liverpool to Calcutta carrying a general cargo. Five Lascars were drowned.

YESSO

W. & T. W. Pinkney; 1880; *J. Laing*; 2,104 tons; 288-8x 35 x 20; 200 h.p.; triple-expansion engines.

The British steamship *Yesso* sank after a collision with the barque *Lizzie R. Wilce*, 162 tons, seven miles N.N.E. of Ilfracombe at 3 a.m. on March 28th, 1894, while on a voyage in ballast from Newport to Baltimore.

YEWFOREST

I. Stewart & Co. Shipping; 1910; *Greenock & Grangemouth Dockyard Co.*; 815 tons; 199-3x30-1 X12-1; 99 r.h.p.; triple-expansion engines.

The British steamship *Yewforest* was sunk at 3.10 a.m. on November 19th, 1942, during an attack on the convoy by German motor torpedo boats and aircraft. Nine of the crew and two gunners were lost.

YIK SANG

Indo-China S.N. Co.; 1902; *Campbeltown S.B. Co.*; 7,967 tons; 282 x 40 X 20 - 4; 208 n.h.p.; triple-expansion engines. The British steamship *Yik Sang* was wrecked on Brothers Island, near Swatow, on January 15th, 1908, in fog, while on a voyage from Wakamatsu to Hong Kong carrying a cargo of coal. The chief engineer and five Chinese were drowned.

YIZUKI

Japanese Navy, destroyer; 1927; *Fujinagata*; 1,315 tons; 320x30x9-9; 38,500 s.h.p.; 34 knots; turbine engines; *Kanpon boilers*; four 4-7 in. guns, 2 m.g., 6 T.T. The Japanese destroyer *Yizuki* was bombed and sunk off Leyte Island, Philippines, by U.S. army and Marine Corps aircraft on December 12th, 1944. The destroyer's normal complement was 150.

YMER

I. Lund & Co.; 1910; *Lakevaags Maskin & Jernskibs.*; 1,123 tons; 228 ^5x35-2x15-9; 106 n.h.p.; triple-expansion engines.

The Norwegian steamship *Ymer* was sunk by a German submarine in the Bay of Biscay on January 23rd, 1917.

YNGAREN

Rederi-AjB Transatlantic; 1921; *W. Doxford & Sons*; 5,246 tons; 420x54x25; 640 n.h.p.; oilengines. The Swedish motorship *Yngaren* left Halifax on January 2nd, 1942, in convoy for Hull, with a crew of 34 and six passengers. The convoy became scattered in bad weather and at 4 a.m. on the 12th the

Yngaren was torpedoed and sunk by a German submarine about 600 miles W. of Ireland. Only two survivors were found.

YOCHOW

China Navigation Co.; 1901; *Scott & Co.*; 2,127 tons; 290x 40-2x20-6; 146 n.h.p.; 8• 5 knots; triple-expansion engines. The steamship *Yochow* was torpedoed and sunk by a German submarine 54 miles N. |E. of Port Said on March 20th, 1918. The captain and 49 others were killed.

YODOGAWA MARU

Toyo Kaiun K.K.; 1939; *Mitsubishi Jukogyo K.K.*; 6,441 tons; 439-4x58-3x32; 1,163 n.h.p.; oilengines.

The motorship *Yodogawa Maru* was torpedoed and sunk by the U.S. submarine *Grayback* on May 11th, 1943, N. of Manus Island.

YOJO MARU

Toa Kaiun K.K.; 2,220 tons.

The steamship *Yojo Maru* struck a mine and sank on August 14th, 1945, off Kobe.

YOKO MARU

Sanko Risen K.K.; 1938; *Nakata Zosensho*; 1,050 tons; 197-9X 32x18-3; 158 n.h.p.; oilengines.

The motorship *Yoko Maru* was torpedoed and sunk by the U.S. submarine *Harder* on September 11th, 1943, 100 miles S. of Yokohama.

YOKOHAMA MARU

Nippon Yusen K.K.; 1912; *Mitsubishi Dockyard & Eng. Works*; 6,143 tons; 399-9x49-9x37-7; 632 n.h.p.; triple-expansion engines.

The steamship *Yokohama Maru* was bombed and sunk by U.S. land-based and carrier-based aircraft on March 10th, 1942, off Lae, New Guinea.

YOLANDE

R. Gardella; 1891; *J. Laing*; 1,733 tons; 244-9x36-1x14; 149 n.h.p.; triple-expansion engines.

The French steamship *Yolande* was bombed and sunk by Insurgent aircraft on January 23rd, 1939, at Barcelona, during the Spanish Civil War.

YOMA

British & Burmese Steam Nav. Co.; 1928; *W. Denny & Bros.*; 8,131 tons; 460-3x61-2x31; 14 knots; quadruple-expansion engines & L.P. turbine.

The liner *Yoma*, Capt. George Patterson, was serving in the Mediterranean as an auxiliary transport. On June 17th, 1943, when in convoy off Benghazi she was torpedoed and sunk by a German submarine. Capt. Patterson, 29 of the crew, three gunners and 451 military personnel were lost.

YOMEI MARU

Nippon Kyodo K.K.K.; 1919; *Osaka Iron Works*; 7,151 tons; 415X55-5x34-7; 551 n.h.p.; quadruple-expansion engines.

The steamship *Yomei Maru*, on a voyage from Yokohama to Otaru in ballast, ran ashore in fog and broke in two on July 4th, 1929, at Cape Kobe, Iwate prefecture.

YOMEI MARU

Nippon Yusen K.K.; 1936; *Mitsubishi Jukogyo K.K.*; 2,860 tons; 326-2x44-3x24; 284 n.h.p.; triple-expansion engines.

The steamship *Yomei Maru* was torpedoed and sunk by the U.S. submarine *Kingfish* on October 1st, 1942, about 100 miles S. of Susami, Japan.

YONAN MARU

Nippon Kyodo K.K.K.; 1919; *Osaka Iron Works*; 7,154 tons; 415x55-5x34-7; 551 n.h.p.; quadruple-expansion engines. The steamship *Yonan Maru*, on a voyage from Portland, Oregon, to Shanghai with wheat and timber, ran into heavy weather near Sitka Island, Aleutian Islands, on October 16th, 1931. Distress calls were picked up saying that the ship was making water in the engine room and needed assistance, the last of these calls was received at 11.40 p.m. Seven ships which answered the calls for help searched

YONEYAMA MARU

in the position given but found no trace of the *Yonan Mam* other than logs from her deck cargo.

YONEYAMA MARU

Itaya Shosen K.K.; 1919; *Mitsubishi Zosen Kaisha*; 5,274 tons; 400 x 54 • 5 x 30; 490 n.h.p.; triple-expansion engines. The steamship *Yoneyama Mam* was torpedoed and sunk by the U.S. submarine *Thresher* on July 1st, 1943, in the Macassar Strait.

YONGALA

Adelaide Steamship Co.; 1903; *Armstrong, Whitworth & Co.*; 3,664 tons; 350x45-2x27-2; 690 n.h.p.; 15 knots; triple-expansion engines.

The steamship *Yongala* left Mackay, Queensland, for Townsville on the afternoon of March 23rd, 1911, having on board 142 people all told, of whom 72 were crew. At 6 o'clock on the same evening she was sighted by the lighthouse keeper at Dent Island at the entrance to the Whitsunday Passage. She was not seen again, and it can only be concluded that she encountered a hurricane, many other ships reporting severe weather on their reaching port.

A search was instituted which resulted in the finding of a mail bag and some cargo belonging to the *Yongala*, which v/as sufficient to establish her fate.

YORCK

German Navy, armoured cruiser; 1906; *Blohm & Voss*; 9,050 tons; 403-2x65-5x25-7; 19,000 i.h.p.; 21-4 knots; triple-expansion engines; *Dtirn* boilers; four 8-2 in. guns, ten 6 in., fourteen 2pdr., 4 m.g., 4 T.T.

The German armoured cruiser *Yorck* took part in the first North Sea raid upon Gorleston and Yarmouth in November 1914. At about 7 a.m. on the 3rd the British minesweeping gunboat, *Halcyon*, sent out a signal that she was engaged with heavy enemy ships which had emerged out of the mist. Eight ships were counted, of which the *Seydlitz*, *Moltke* and *Von der Tann*, were battle cruisers. The others were light cruisers with the *Yorck*, which appears to have been the mystery ship of the squadron, as the German Admiralty later endeavoured to make out that she had not been present. The results of the raid were more startling than effective, for, beyond laying a line of mines five miles long in the Smith's Knoll Passage, and dropping a number of shells along the foreshore, the squadron accomplished very little. The *Halcyon* was hit several times, but escaped without casualties.

The German ships returned as far as their bases without loss, but on the morning of November 4th, when entering Jade Bay, the *Yorck* ran into a minefield and was blown up. About 300 of her complement of 557 officers and men were drowned.

YORK

British Navy, heavy cruiser; 1928; *Palmer & Co.*; 8,250 tons; 575x57x17; 80,000 i.h.p.; 32-25 knots; turbine engines; 3-drum boilers; six 8 in. guns, eight 4 in., four 3 pdr., 14 smaller, 6 T.T., 1 aircraft.

The heavy cruiser *York*, Capt. R. H. Portal, had been badly damaged by dive-bombing attacks when serving in Cretan waters in April and May 1941. The vessel was sent to Suda Bay, the only suitable harbour in the island of Crete, to make temporary repairs, but before these had advanced sufficiently for her to proceed to sea the British forces were compelled to withdraw. This necessitated the destruction of *York* to prevent her from falling into enemy hands and this was carried out on May 29th, 1941.

Losses among her complement of over 600 amounted to two killed and five wounded.

YORKMAR

Calmar S.S. Corp.; 1919; *Ames S.B. & D.D. Co.*; 5,612 tons; 409-8x54'2x29'2; 359 n.h.p.; triple-expansion engines. The American steamship *Yorkmar*, Capt. W. A. De Puey, was torpedoed and sunk by a German submarine on October 9th, 1943, about 500 miles W. of Ireland on a voyage from Boston to Cardiff. Thirteen of the complement of 67 were lost, Capt. De Puey was among the survivors.

YORKMOOR

Walter Runciman & Co.; 1912; *J. Readhead & Sons*; 4,253 tons; 369 - 7 x 51 • / x 26 -1; 385 n.h.p.; triple-expansion engines. The British steamship *Yorkmoor* was wrecked on Lobos Island, River Plate, on July 16th, 1918. She was carrying a cargo of wheat.

YORKSHIRE

BibbyLine; 1920; *Harland & Wolff*; 10,183 tons; 482-4x 58-3 x40-4; 946 n.h.p.; 15 knots; turbine engines. The liner *Yorkshire*, Capt. V. C. P. Smalley, with 278 persons on board, of whom 160 were crew, was torpedoed by a German submarine 700 miles W. of Bordeaux on October 17th, 1939. The ship sent out a wireless call for help and the steamship *Independence Hall*, 5,753 tons, came to the rescue, but too late to save many of those on board. Fifty-eight persons lost their lives, of whom 33 were passengers and 25 crew, including Capt. Smalley.

The 220 survivors were landed at Bordeaux on the night of October 20th, together with those from the *City of Mandalay* (which see) whom the *Independence Hall* rescued at the same time, not far from the position of the *Yorkshire*.

YORKTOWN

United States Navy, aircraft carrier; 1936; *Newport Nevess Shipbuilding Co.*; 19,900 tons; 809-5x83-2x21-7; 120,000 s.h.p.; 34 knots; turbine engines; *Babcock & Wilcox* boilers; eight 5 in. guns, sixteen 1-1 in., 85 aircraft.

Early in June 1942 the U.S. Pacific Fleet was disposed between Midway Island and the Aleutians with the object of countering any forward movement upon which the Japanese Admiralty might embark. At about 9 o'clock on the morning of the 3rd American naval aircraft sighted a convoy of transports, escorted by aircraft carriers, cruisers and smaller craft, some 700 miles distant from Midway. Bombers of the U.S. army based upon Midway made an attack on the same day, scoring hits on a cruiser and several transports. At daylight on the 4th more American planes joined in the attack and made contact with a battleship and several aircraft carriers. The attacks were pressed home though at severe loss to the Americans. The Japanese had brought up the carriers *Akagi* and *Kaga*, both 26,900 tons, 60 aircraft apiece, and the *Hiryu* and *Soryu*, both 10,050 tons, 40 aircraft apiece. A large American naval force, including the aircraft carriers *Hornet*, 19,800 tons, and *York town*, 85 aircraft apiece, with one other, with Admiral Chester W. Nimitz in supreme command was known to be in the vicinity.

The fighting extended from the 3rd to the 6th, but warships of the opposing squadrons did not make contact with each other at any time, except for one U.S. submarine which torpedoed *Soryu* after she had been disabled by bombs, and two Japanese submarines which torpedoed *Yorktown* and the destroyer *Hammann*. The whole action was fought out between ships and aircraft, the rival fleets being more than 100 miles apart.

After sustaining many hits the Japanese admiral decided to withdraw from the area before his losses became severe. He therefore altered course to the north-west on the afternoon of the 4th, at which time his force was intact though damaged. The ship which had suffered most was *Soryu* and it became necessary to take her in tow. It was while this operation was in hand that the U.S. submarine *Nautilus* approached unnoticed and hit her with three torpedoes. The aircraft carrier sank during the night.

The next ships to go were *Akagi* and *Kaga*, both of which were bombed with their aircraft on the flight decks. Petrol from the planes ignited and the carriers caught fire and burned out, sinking during the night. These losses left the Japanese with only one carrier, *Hiryu*, which sent up 36 planes to attack *Yorktown*. Fourteen of these were destroyed but four came through the defences and scored hits on the American ship. A second attack made by torpedo-bombers, was more successful as the ship was hit by a torpedo and took so heavy a list that it was impossible to use her flight deck for landing or taking off. She was abandoned save for a few men and taken in tow, but on the 6th she was torpedoed again, this time by a Japanese submarine, and sank shortly afterwards.

The *Hiryu* was bombed so badly that she caught fire and sank next morning.

The weather took a turn for the worse, and the Japanese split into groups making it more difficult to maintain contact. One of these groups comprising the cruisers *Mikuma* and *Mogami*, and three destroyers was located at about 9.30 on the morning of the

6th. Constant attacks from the air sank *Mikumaju* after noon.

This concluded the battle in which the Japanese lost four aircraft carriers and one heavy cruiser, besides suffering much damage to three of their battleships. In addition it is estimated that they lost 275 aircraft and that approximately 4,800 officers and ratings were either killed or drowned.

The American losses were one aircraft carrier and one destroyer, together with 92 officers and 215 ratings.

YORKTOWN

Ministry of War Transport (Coast Lines Ltd.); 1918; Newport News S.B. & D.D. Co.; 1,547 tons; 267x46x18; 279 n.h.p.; 9 knots; triple-expansion engines.

The steamship *Yorktown*, Capt. W. P. Boylan, was torpedoed and sunk by a German submarine on September 26th, 1942, when in convoy in the North Atlantic. Sixteen of the crew and two gunners were killed and 44 wounded, Captain Boylan was among the survivors.

YORO MARU No. 2

Nippon Yusen K.K.; 1918; Fujinagata Dockyard Co.; 2,231 tons; 272 X 40 X 24 - 1; 189 n.h.p.; triple-expansion engines.

The steamship *Yoro Maru No. 2* struck a mine and sank on May 31st, 1945, off Shimonoseki.

YORUBA

Elder, Dempster & Co.; 1895; Barclay, Curie & Co.; 3,000 tons; 322x42-3x16-8; 277 n.h.p.; triple-expansion engines. The British steamship *Yoruba* was wrecked on Turtle Island, near Sierra Leone, on August 17th, 1911, while on a voyage from Libreville to Continental ports carrying a general cargo.

YOSEI MARU

Japanese Government; 1928; Nederlandsche Scheepsbouw Maats.; 2,594 tons; 305x50-1x15-1; 236 n.h.p.; triple-expansion engines.

The tanker *Yosei Maru* was formerly the Dutch *Josefina*, seized by the Japanese at Surabaya. On May 13th, 1945, she was torpedoed and sunk by the U.S. submarine *Baya* off Jesselton, North Borneo.

YOSHIDA MARU

Nippon Yusen K.K.; 2,926 tons.

The steamship *Yoshida Maru* was taken over by the Japanese Navy and converted into an auxiliary gunboat. On January 18th, 1944, she was torpedoed and sunk by the U.S. submarine *Flasher* about 500 miles E. of the Kazan Islands.

YOSHIDA MARU No. 1

Yamashita Risen K.K.; 1919; Asano S.B. Co.; 5,425 tons; 400 x 53 - 2 x 29 - 4; 513 n.h.p.; triple-expansion engines. The steamship *Yoshida (Yosidd) Maru No. 1* was torpedoed and sunk by the U.S. submarine *Jack* on April 26th, 1944, off the west coast of Luzon Island, Philippines.

YOSHIDA MARU No. 3

Yamashita Risen K.K.; 1918; Uraga Dock Co.; 4,646 tons; 360 x 51 x 28 • 4; 378 n.h.p.; triple-expansion engines. The steamship *Yoshida (Yosidd) Maru No. 3* was torpedoed and sunk by the U.S. submarine *Ronquil* on August 24th, 1944, off Keelung, Formosa.

YOSHIN MARU

Nippon Yusosen K.K.; 2,820 tons.

The steamship *Yoshin Maru* struck a mine and sank on May 26th, 1945, in the Inland Sea of Japan.

YOSHINO

*Japanese Navy, protected cruiser; 1892; Vickers Son & Co. Maxim; 4,160 tons; 350x46-5*17; 15,500 i.h.p.; 23 knots; triple-expansion engines; four 6 in. guns, eight 4 - 7 in., twenty-two 3pdr., two 2% pdr., 5 T.T.*

In May, 1904, the Japanese light cruiser *Yoshino* formed one of a squadron under command of Rear-Admiral Dewa. This squadron was engaged in the blockade of Port Arthur, and on the morning of the 15th was to the southward of the Liao-Tung peninsula. The ships were turning in thick fog at about 1.40 a.m., when the

armoured cruiser *Kasuga* struck *Yoshino* from astern, making a large hole in her port quarter just abaft the engine room. The light cruiser began to settle by the stern with a list to starboard, and within a very short time she foundered.

The fact that *Yoshino* rolled over to starboard and went down in that fashion is very remarkable, as her injuries were on the port side. Only some 90 of her complement of 419 officers and men were saved.

YOSHINO MARU

Nippon Yusen K.K.; 1906; F. Schichau; 8,990 tons; 463 - 5 x 57 - 5 x 38 - 9; 820 n.h.p.; quadruple-expansion engines.

The steamship *Yoshino (Yosind) Maru*, serving as a transport, was torpedoed and sunk by the U.S. submarines *Steelhead* and *Parche* on July 31st, 1944, off the west coast of Dalupiri Island, Philippines.

YOSHINO GAWA MARU

Toyo Kaiun K.K.; 1,430 tons.

The steamship *Yoshinogawa Maru* was torpedoed and sunk by the U.S. submarine *Nautilus* on January 9th, 1943, off Bougainville Island.

YOSHU MARU

Uwajima Unyu K.K.; 1916; Skinner & Eddy Corp.; 5,711 tons; 411' 6 x 54 - 2 x 27 - 1; 476 n.h.p.; turbine engines. The steamship *Yoshu Maru* was bombed and sunk by U.S. carrier-based aircraft on January 12th, 1945, 25 miles N.E. of Binh Dinh, Indo-China.

YOUNG

United States Navy, destroyer; 1919; Bethlehem Shipbuilding Corp.; 1,215 tons; 310x30-9x9-3; 27,500 s.h.p.; 35 knots; turbine engines; Yarrow boilers; four 4 in. guns, one 3 in. A.A., 12 T.T.

The destroyer *Young* was one of a flotilla of seven such vessels steaming through a dense fog at high speed near the island of Santa Barbara, off the coast of California, on September 8th, 1923. All the ships ran upon the rocks and became total wrecks, but most of the crews got away in safety. The full story of the disaster is told under the *Delphy*, leading ship of the flotilla.

YOWA MARU

Nittoh Kogyo K.K.; 6,435 tons.

The steamship *Yowa Maru* was torpedoed and sunk by the U.S. submarine *Trigger* on September 14th, 1943, W. of Toku no Shima, Ryukyu Island.

YOXFORD

Hunting & Son; 1880; Tyne Iron S.B. Co.; 1,878 tons; 270 x 35 - 2 x 24 - 5; 187 n.h.p.; compound engines. The British steamship *Yoxford* was wrecked on the Alacranes reefs on January 8th, 1896, while on a voyage from Genoa and Port Limon to Vera Cruz. Her cargo included wine and marble.

YOZAN MARU

Kokoku Risen K.K.; 6,487 tons.

The steamship *Yozan Maru* was sunk by U.S. carrier-based aircraft on September 21st, 1944, off Corregidor, Philippines.

YOZAN MARU

Yamamoto Risen K.K.; 1918; Teikoku Kisen; 1,227 tons;

228 x 33 x 18 - 7; 101 n.h.p.; triple-expansion engines. The steamship *Yozan Maru* was torpedoed and sunk by the U.S. submarine *Skate* on June 12th, 1945, near Kanazawa, Japan.

YRURAC BAT

Olana, Larrinaga & Co.; 1871; T. R. Oswald & Co.; 2,197 tons;

301 - 7 x 35 - 3 x 23 - 8; 280 h.p.; compound-inverted engines. The Spanish steamship *Yrurac Bat* was sunk by collision with the British steamship *Douro*, 2,846 tons, on April 1st, 1882, about 45 miles N. of Cape Finisterre. Thirty-six lives were lost, the 32 survivors were picked up by the steamship *Hidalgo*.

YSELHAVEN

YSELHAVEN

United States Shipping Board; 1916; Rotterdam Dry Dock; 3,558 tons; 361 - 4 x 49 - 9 x 22 • 1; 301 n.h.p.; triple-expansion engines.

The American steamship *Yselhaven* struck a mine on March 3rd, 1919, 20 miles from Coquet Island off the coast of Northumberland. She sank with the loss of ten of the crew.

YSELHAVEN

Gebr. van Uden; 1921; W. Dobson & Co.; 4,802 tons; 360 x 52 x 31 - 5; 401 n.h.p.; triple-expansion engines. The Dutch steamship *Yselhaven* was torpedoed and sunk by a German submarine on June 6th, 1941, on a voyage from Liverpool to the St. Lawrence River. The captain and eight others were killed on board and 15 men in a boat were lost.

YSER

Societe Generate cPArnement; 1919; Ateliers & Chantiers de Bretagne; 2,486 tons; 290x43-3x20-2; turbine engines. The French steamship *Yser*, on a voyage from Port Talbot to Nantes with coal, was wrecked on October 18th, 1928, on Point de l'Echelle, Belle lie.

YTERROY

Dampsk. Akties. Oy; 1914; Helsingors Jernsk. & Maskin.; 1,112 tons; 230-7x35-6x13-3; 101 n.h.p.; triple-expansion engines.

The Norwegian steamship *Ytteroy* was sunk by a German submarine off Ushant on August 19th, 1917.

YU SANG

Indo-China Steam Nav. Co.; 1934; Swan, Hunter & Wigham Richardson; 3,357 tons; 328-7x47-2x23-2; 383 n.h.p.; triple-expansion engines.

The British steamship *Yu Sang* was taken over by the U.S. Navy at Marivales Harbour, Philippines, on February 26th, 1942. On April 9th that port was attacked by Japanese aircraft. The *Yu Sang*, which was partly loaded with munitions, was hit by a bomb and blew up.

YUAN SHUN

Ta Tung Hsing S.S. Co.; 1903; C. S. Swan & Hunter; 1,759 tons; 265 X 37- 1 x 17-9; 199 n.h.p.; triple-expansion engines. The Chinese steamship *Yuan Shun* foundered at 12.45 a.m. on April 7th, 1934, 40 miles outside Woosung, with the loss of 29 lives.

YUBAE MARU

Kuribayashi Shosen K.K.; 1919; Ishikawajima S.B. Co.; 3,217 tons; 305x43-9x27-3; 279 n.h.p.; triple-expansion engines.

The steamship *Yubae Mam* was sunk by U.S. carrier-based aircraft on February 17th, 1944, in the Caroline Islands.

YUBARI

Japanese Navy, light cruiser; 1923; Sasebo; 2,890 tons; 435 X 39-5x11-7; 5,700 s.h.p.; 33 knots; turbine engines; Kanpon boilers; six 5-5 in. guns, one 3 in.A.A., 2 m.g., 4 T.T., 34 mines. The Japanese light cruiser *Yubari* was torpedoed and sunk S. of Palan by the U.S. submarine *Bluegill* on April 27th, 1944. The cruiser's normal complement was 328.

YUBARI MARU

Hokkaido Tanko Kisen K.K.; 1930; Mitsubishi Kaisha; 4,109 tons; 351 - 5x49x27-7; 241 n.h.p.; triple-expansion engines. The steamship *Yubari Maru* was bombed and sunk by Dutch aircraft on March 17th, 1942, off Bandjermasin, Borneo.

YUDACHI

Japanese Navy, destroyer; 1936; Sasebo; 1,368 tons; 335-5 x 31-7x9-3; 38,000 s.h.p.; 34 knots; turbine engines; Kanpon boilers; five 5 in. guns, 2 m.g., 8 T.T.

The destroyer *Yudachi* was sunk in the first phase of the battle of Guadalcanal which covered the three days November 13th-15th, 1942. On the night of the 13th a Japanese squadron steaming through the Lengo Channel, off Savo Island, ran into a squadron of U.S. cruisers and destroyers returning from escort of a convoy of transports which had disembarked their troops on Guadalcanal.

The fighting which ensued was of a very determined character and salvos were exchanged at close range. The *Yudachi* was sunk in the first 15 minutes, blown up by a salvo probably from the U.S. heavy cruiser *San Francisco*.

The destroyer's normal complement was 180.

For full story of the battle see the battleship *Kirishima* and the cruiser *Atlanta*.

YUEN WO

Indo-China S.N. Co.; 1883; S. C. Farnham & Co.; 2,522 tons; 273 - 5x40-5x13-1; 250 n.h.p.; compound engines. The British steamship *Yuen Wo* was destroyed by fire at Tungchow, Yangtze River, on April 27th, 1905, at the commencement of a voyage from Tungchow to Shanghai carrying a general cargo. Thirty Chinese were drowned.

YUENLEE

Ching Kee Steam Nav. Co.; 1906; Trondhjems Mek. Verksted; 1,216 tons; 225-4x33-5x18-6; 116 n.h.p.; triple-expansion engines.

The Chinese steamship *Yuenlee*, on a voyage from Fuchow to Shanghai with coal, was sunk by collision with the Japanese steamship *Taian Maru*, 5,650 tons, on October 20th, 1929, off Shanghai.

YUET ON

Hoong Tak S.S. Co.; 1926; Ching Ngai & Co.; 1,130 tons; 185 X 32 - 1 x 10 • 1; 86 n.h.p.; triple-expansion engines. The Chinese steamship *Yuet On*, lying in Tsun Wan Bay, Hong Kong, with a part cargo of rice, was sunk by collision with the steamship *Tin Sang*, 398 tons, during a typhoon on September 2nd, 1937.

YUGIRI

Japanese Navy, destroyer; 1930; Maizuru; 1,700 tons; 371-5 x 33-8x9-8; 40,000 s.h.p.; 34 knots; turbine engines; Kanpon boilers; six 5 in. guns, 4 A.A.m.g., 9 T.T.

The destroyers *Makinami* and *Onami*, both of 2,200 tons, and *Yugiri*, with several others, were patrolling the waters S. of New Ireland on the night of November 25th, 1943, when they ran into four U.S. destroyers engaged upon the same duty. Both sides attacked with determination but the Japanese, though in superior force, were badly mauled. The three Japanese destroyers were sent to the bottom and the remainder retired from the action. The locality in which the fight took place was between Buka and Cape St. George. No American ship was lost or damaged.

The *Makinami* and *Onami* carried complements of over 200 apiece and the normal complement of *Yugiri* was 197.

YUGUMO

Japanese Navy, destroyer; 1941; Japan; 2,200 tons; 415 x 35 X—; 34 knots; turbine engines; six 5 in. guns, eight 25 m.m. A.A., 15 T.T.

The destroyer *Yugumo* was sunk in a night action S. of Choiseul Island, Solomons Group, on October 6th, 1943. A force of eight Japanese destroyers and one cruiser encountered three American destroyers and a sharp engagement ensued in which one destroyer was sunk on each side. The Japanese force, although the stronger, was eventually compelled to retire.

The *Yuguma* carried a complement of over 200.

For further details of the action, see the U.S. destroyer *Chevalier*.

YUGURE

Japanese Navy, destroyer; 1934; Maizuru; 1,368 tons; 337-8 x 32 • 5 X 8 - 8; 37,000 s.h.p.; 34 knots; turbine engines; Kanpon boilers; five 5 in. guns, 2 m.g., 6 T.T.

The Japanese destroyers *Yugure* and *Kiyonami* were a part of a force escorting a convoy in a last desperate attempt to reinforce their troops on the island of New Georgia. The convoy took the route through the Vella Gulf on the night of July 20th, 1943, but was located by U.S. aircraft and compelled to disperse. The two destroyers were sunk and several transports were damaged.

The complement of the *Kiyonami* was over 200 and the normal complement of the *Yugure* was 180.

YUHO MARU

Kaiun K.K.; 5,226 tons.
The tanker *Yuho Maru* was torpedoed and sunk by the U.S. submarine *Pargo* on November 26th, 1944, about 50 miles W. of Brunei, North Borneo.

YUKI MARU

Dairen Risen K.K.; 1919; *Northumberland S.B. Co.*; 5,704 tons; 400x53x32-8; 619 n.h.p.; triple-expansion engines. The steamship *Yuki Maru* was torpedoed and sunk by the U.S. submarine *Bream* on June 16th, 1944, off Halmahera Island, Celebes.

YUKI MARU

Tatsuma Kisen K.K.; 1916; *Osaka Iron Works*; 3,168 tons; 305x43-7x27-2; 288 n.h.p.; triple-expansion engines. The steamship *Yuki Maru* was sunk by U.S. carrier-based aircraft on September 21st, 1944, off the west coast of Luzon Island, Philippines.

YUKON

Alaska S.S. Co.; 1899; *W. Cramp & Sons*; 5,747 tons; 360x50x32-2; triple-expansion engines.
The American steamship *Yukon*, on a voyage from Seward to Seattle, ran ashore and was wrecked on February 4th, 1946, in Johnston Bay, Prince William Sound. Thirty-two lives were lost.

YUMIHARI MARU No. 2

Marusho Kaiun K.K.; 1,186 tons.
The steamship *Yumihari Maru No. 2* struck a mine and sank on May 7th, 1945, off the north west coast of Kyushu Island, Japan.

YUMIHARI MARU No. 3

Marusho Kaiun K.K.; 1,154 tons.
The steamship *Yumihari Maru No. 3* struck a mine and sank on May 31st, 1945, off Karatsu, Japan.

YUNAGI

Japanese Navy, destroyer; 1924; *Sasebo*; 1,270 tons; 320x30x9; 38,500 s.h.p.; 34 knots; turbine engines; Kanpon boilers; four 4-7 in. guns, 2 m.g., 6 T.T.
The Japanese destroyer *Yunagi* was torpedoed and sunk N.W. of Luzon Island, Philippines, by the U.S. submarine *Picuda* on August 25th, 1944. The destroyer's normal complement was 148.

YUNGSHIN

Ningpo Shaohsing S.N. Co.; 1886; *Scott & Co.*; 1,585 tons; 256-3x34-2x20-4; 247 n.h.p.; compound engines. The Chinese steamship *Yungshin*, on a voyage from Foochow to Shanghai with passengers, struck a reef at the western end of Chusu Island on May 1st, 1933. The ship took a heavy list and, as a precaution, the 300 Chinese passengers were put ashore on Chusu Island in fog and driving rain. While on the island they were attacked by pirates who seized 13 of them for ransom and then boarded the ship to loot the passenger accommodation. The timely arrival of an armed Customs cruiser put the pirates to flight and the remaining passengers and the crew were taken off before the ship broke up. One woman passenger died of exposure.

YUNNAN

China Navigation Co.; 1890; *Scott & Co.*; 1,663 tons; 256x36-2x21-5; 200 h.p.; triple-expansion engines.
The British steamship *Yunnan* was wrecked 12 miles from Swatow on December 17th, 1891, while on a voyage from Amoy to Swatow carrying a general cargo.

YUNNAN

Messageries Maritimes; 1903; *Forges & Chantiers de la Mediterranee*; 6,474 tons; 414-4x50-6x29-5; 322 n.h.p.; triple-expansion engines.
The French steamship *Yunnan* was torpedoed and sunk by a submarine in the Mediterranean on October 11th, 1915.

YUNO MARU

Japanese Government; 1912; *Nederlandsche Scheepsbouw Maats.*; 2,345 tons; 257-6x43-1x18-6; 280 n.h.p.; oil engines.

The tanker *Yuno Maru* was formerly the Dutch *Juno*, seized by the Japanese at Sourabaya in March, 1942. She struck a mine and sank on April 30th, 1945, off Kemaman, Malaya.

YURA

Japanese Navy, light cruiser; 1922; *Sasebo*; 5,170 tons; 535x46-6x15-9; 70,000 s.h.p.; 33 knots; turbine engines; Kanpon boilers; seven 5-5 in. guns, two 3 in.A.A., 2 m.g., 8 T.T. The Japanese light cruiser *Yura* was attacked and badly damaged by U.S. navy and army aircraft, as a result of which she sank off Santa Isabel on October 25th, 1942. The normal complement of the *Yuru* was 438.

YURI MARU

Kokusai Kisen K.K.; 1919; *Harima Dockyard Co.*; 6,187 tons; 425x53-6x37-5; 557 n.h.p.; triple-expansion engines. The steamship *Yuri Maru* was torpedoed and sunk by the U.S. submarine *Raton* on November 28th, 1943, 350 miles N. of Vanimo, New Guinea.

YUTAKA MARU

Nakagawa Kisen K.K.; 2,704 tons.
The steamship *Yutaka Maru* was torpedoed by the U.S. submarine *Guavina* and sunk by carrier-based aircraft on November 14th, 1944, off the west coast of Mindoro Island, Philippines.

YUYO MARU

Morita Kisen K.K.; 10,045 tons.
The tanker *Yuyo Maru* struck a mine and sank on July 22nd, 1945, off Shikoku, Japan.

YUZAN MARU

Kokoku Kisen K.K.; 6,380 tons.
The steamship *Yuzan Maru* was torpedoed and sunk by the U.S. submarine *Scorpion* on April 27th, 1943, about 100 miles E. of Onogawa, Honshu Island, Japan.

YUZAN MARU

Kokoku Kisen K.K.; 6,039 tons.
The steamship *Yuzan Maru* was torpedoed and sunk by the U.S. submarine *Sennet* on July 30th, 1945, off Suttu, Japan.

YUZAN MARU No. 2

6,859 tons.
The steamship *Yuzan Maru No. 2* was torpedoed and sunk by the U.S. submarine *Jack* on November 15th, 1944, about 40 miles S.W. of Cana, Indo-China.

YVONNE

Armement L. Hermans S.A.; 1899; *W. Harkess & Son*; 668 tons; 184-3 X28-5x13-9; 80 n.h.p.; triple-expansion engines. The Belgian steamship *Yvonne* struck a mine and sank on June 12th, 1940, on a voyage from London to Cardiff. Ten of the crew of 12 were lost.

Z-24

German Navy, destroyer; 1941; Bremen; 2,400 tons; 385-5X38-5x9-5; 55,000 s.h.p.; 36 knots; turbine engines; five 5-9 in. guns, four 37 mm., four 20 mm., 8 T.T.

The destroyer Z-24 was attacked by rocket-firing aircraft of Coastal Command at the mouth of the Gironde on the night of August 24th, 1944. The vessel was hit and badly damaged and was compelled to run ashore, becoming a total wreck.

Z-26

German Navy, destroyer; 1941; Bremen; 2,400 tons; 385-5X55-5x9-5; 55,000 s.h.p.; 36 knots; turbine engines; five 5-9 in. guns, four 37 mm., four 20 mm., 8 T.T.

The destroyer Z-26 was part of a force which attacked a North Russian convoy on March 29th, 1942. The destroyer was sunk by the British cruiser *Trinidad* and other ships of the escort. She carried a complement of about 300.

Z-27

German Navy, destroyer; 1941; Bremen; 2,400 tons; 385-5X38-5x9-5; 55,000 s.h.p.; 36 knots; turbine engines; five 5-9 in. guns, four 37 mm., four 20 mm., 8 T.T.

The destroyer Z-27 in company with four others of the same class and six *Elbing* destroyers of 1,100 tons apiece, was engaged by the British cruisers *Enterprise* and *Glasgow* in the Bay of Biscay on the afternoon of December 28th, 1943. The Z-27 together with three of the *Elbing* boats was sent to the bottom. The *Glasgow* had a few casualties and suffered some superficial damage. The *Enterprise* was unscathed.

The full story of the action is told under the destroyer T-25.

Z-28

German Navy, destroyer; 1940; Bremen; 2,400 tons; 385-5x35-5x9-5; 55,000 s.h.p.; 36 knots; turbine engines; five 5-9 in. guns, four 37 mm., four 20 mm., 8 T.T.

The destroyer Z-28 was bombed and sunk off Sassnitz on March 6th, 1945.

Z-32

German Navy, destroyer; 1941; Bremen; 2,400 tons; 385-5X38-5x9-5; 55,000 s.h.p.; 36 knots; turbine engines; five 5-9 in. guns, four 37 mm., four 20 mm., 8 T.T.

The destroyer Z-32 was at sea off Ushant with a number of vessels of the same class at just before dawn on June 9th, 1944, on the look out for Allied transports proceeding to Normandy. The German flotilla was discovered and engaged by a similar British force on patrol comprising the destroyers *Tartar*, *Ashanti*, *Eskimo*, the Canadian destroyers *Haida* and *Huron*, all Tribal class vessels of 1,870 tons, with *Javelin*, 1,760 tons, and the Polish *Blyskawicza*, 2,145 tons, and *Piorun*, 1,690 tons. The larger number of Allied ships was counterbalanced by the heavier armament of the Germans, each of which carried 5-9 in. guns as against the 4-7 in. weapons of their opponents. In the ensuing action, which was at times fought at point-blank range, the Z-32 was sunk by the guns of *Tartar*, which ran through the German lines.

Z-35 (and Z-36)

German Navy, destroyer; 1940; Bremen; 2,400 tons; 385-5x38-5X9-5; 55,000 s.h.p.; 36 knots; turbine engines; five 5-9 in. guns, four 37 mm., four 20 mm., 8 T.T.

The destroyers Z-35 and Z-36 struck mines and sank in the Gulf of Finland on December 12th, 1944.

ZAAN

Naam Venn Houtvaart; 1918; Jonker & Stans.; 1,402 tons; 237-2x38-4x16-2; 172n.h.p.; triple-expansion engines.

The Dutch steamship *Zaan* struck a mine and sank on November 9th, 1919. She was on passage from Rotterdam to Reval. The steamship sank 25 miles E.N.E. of Terschelling, with 22 of the crew.

ZAANDAM

Nederlandsch-Amerikaansche Stoomv. Maats.; 1939; N.V. Wilton-Fyenoord; 10,909 tons; 480-7x64-4x36-2; 3,359n.h.p.; oil engines.

The Dutch liner *Zaandam*, on a voyage from Beira to New York with a total of 299 passengers and crew, was torpedoed and sunk by

a German submarine on November 2nd, 1942, about 300 miles N. of Cape Sao Roque, Brazil. Sixty-six of the crew and 69 passengers were lost.

ZAGLOBA

A. Falter; 1938; Burntisland S.B. Co.; 2,864 tons; 313-7X44-5x19-7; 244 n.h.p.; triple-expansion engines. The Polish steamship *Zagloba* left New York on January 12th, 1943, and St. John's, N.F., on the 30th for Manchester with general cargo. She straggled from convoy on the afternoon of February 5th, about 400 miles W. of Inishtrahull and was never seen again.

ZAMORA

James Currie & Co.; 1889; Ramage & Ferguson; 1,245 tons; 248-9x33-2x17; 134 n.h.p.; triple-expansion engines. The steamship *Zamora*, on a voyage from Barry to Den Helder, with coal, ran ashore off Nieuwe Diep on the evening of December 27th, 1897.

The captain, mate, engineer and a steward stayed on board to try to get the ship off, the remainder of the crew being sent ashore as a precaution. The *Zamora* was last seen from the Haaks Lightship moving in a westerly direction in darkness firing distress rockets.

ZANETTA

J. Fenwick & Son; 1878; Palmers'Co.; 1,334 tons; 242-8x33-2x20; 155 n.h.p.; compound engines.

The British cargo ship *Zanetta* dragged her anchors during a heavy N.E. gale and was wrecked in Robin Hood Bay on November 13th, 1901, while on a voyage in ballast from London to the Tyne.

ZAOSAN MARU

Kawasaki Kisen K.K.; 2,361 tons.

The steamship *Zaosan Mam* was torpedoed and sunk by the U.S. submarine *Cabezon* on June 18th, 1945, in the northern Kurile Islands.

ZARA

T. Wilson, Sons & Co.; 1897; W. Hamilton & Co.; 1,331 tons; 257x35-2x16-5; 232n.h.p.; 10 knots; triple-expansion engines.

The steamship *Zara* was torpedoed and sunk by a German submarine 90 miles W. of Helliso Island on April 13th, 1917. Twenty-seven men were killed, the captain was among the survivors.

ZARA

Italian Navy, heavy cruiser; 1930; Odero-Terni-Orlando; 10,000 tons; 599-5x67-7x19-5; 95,000s.h.p.; 32 knots; turbine engines; 3-drum boilers; eight 8 in. guns, twelve 3-9 in. eight 37 mm., eight 13 mm., 2 aircraft.

The heavy cruiser *Zara* was a unit of the Italian cruiser squadron under Admiral Cantoni which encountered British battleships off Cape Matapan in the early morning of March 29th, 1941. The ships were revealed by the searchlight of the destroyer *Greyhound*, the battleships being some 4,000 yards distant and about to change course to attack the heavy cruiser *Pola*, lying disabled about three miles away. In the short space of four minutes salvos from the battleships had reduced the *Zara*, and her sister ship the *Fiume*, to masses of blazing wreckage. Later both were torpedoed and sunk by British destroyers. The *Pola* was also sunk.

Of the *Zara's* complement of more than 700 a large proportion was lost.

For full details of the battle see *Fiume*.

ZARA

Adriatica Soc. Anon, di Nav.; 1931; Cantieri Riuniti delV Adriatico; 1,976 tons; 267-4x40-2x22-6; 654n.h.p.; oil engines. The Italian motorship *Zara* was torpedoed and sunk by British aircraft on November 2nd, 1942, N. of Tobrak.

ZARIFIS

L.Zarifi; 1901; W. Picker sg ill & Sons; 2,904 tons; 324x47-1x21-7; 282 n.h.p.; triple-expansion engines. The Greek steamship *Zarifis* was sunk by a submarine in the Mediterranean on November 29th, 1915.

ZEALAND

CurrieLine; 1936; *Barclay, Curie & Co.*; 1,433 tons; 262-2x 40-2x15-9; 97 n.h.p.; 12 knots; triple-expansion engines. The steamship *Zealand*, Capt. L. J. Branagan, in convoy from Port Said to Famagusta with aviation spirit in drums, was torpedoed and sunk by a German submarine on June 28th, 1942, S.S.W. of Haifa. Ten of the crew and four gunners were lost, Capt. Branagan was among the survivors.

ZEALANDIC

Shaw Savill & Albion Co.; 1929; *Swan, Hunter & Wigham Richardson*; 10,578 tons; 482-6x64-2x30-8; 2,020 n.h.p.; 15 knots; oil engines. The liner *Zealandic*, Capt. F. J. Ogilvie, was torpedoed and sunk by a German submarine on January 16th, 1941, 450 miles S. of the Vestmann Islands. All on board were lost, 65 crew, two gunners and six passengers.

ZEFFIRO

Corrado Soc. Anon. di Nav.; 1918; *Caledon S.B. & E. Co.*; 5,165 tons; 413-2x52-3x28-4; 369 n.h.p.; triple-expansion engines. The Italian steamship *Zeffiro* was torpedoed and sunk by the British submarine *Urge* on May 20th, 1941, about six miles from Cape Bon.

ZEFFIRO

Italian Navy, destroyer; 1927; *Ansaldo*; 1,073 tons; 307-5x 30-5x10'7; 40,000 s.h.p.; 36 knots; turbine engines; Express boilers; four 4 - 7 in. guns., four 37 mm.A.A., 6 T.T. The destroyer *Zeffiro* was torpedoed and sunk by the British submarine *Ultimatum* off Crete on June 24th, 1942. The vessel carried a complement of over 150.

ZEILA

Nafta Soc. Ital. pel Petroleo ed affini; 1898; *Armstrong Co.*; 1,834 tons; 248 • 6 X 40 - 2 x 19 - 3; 217 n.h.p.; compound engines. The Italian tanker *Zeila* was torpedoed and sunk by a British submarine on March 23rd, 1943, four miles from Cape Spartivento.

ZELEE

French Navy, gunboat; 1900; *France*; 680 tons; 900 i.h.p.; 13-4 knots; triple-expansion engines; Niclausse boilers; two 4 in. guns; four 9 pdr., four 1 pdr. The gunboat *Zelee* was lying in the harbour of Papeete, Tahiti, in September 1914. It was known that the German East Asiatic Squadron was at sea somewhere in the neighbourhood of the Society Islands. On the 22nd the armoured cruisers *Scharnhorst* and *Gneisenau* of this squadron approached the port and opened fire. They did some damage and sank the *Zelee*, but did not attempt a landing. The gunboat carried a complement of 93.

ZENA

UgoMusso; 1914; *Caledon S.B. & E. Co.*; 5,219 tons; 392-9x 51-7x29-7; 466 n.h.p.; triple-expansion engines. The Italian steamship *Zena* was torpedoed and sunk by a British submarine on October 11th, 1941, about 42 miles S. of Lampedusa.

ZENOBIA MARTINI

P. & M. Martini; 1911; *Stettiner Oderwerke*; 1,479 tons; 231 - 7x36-4x14-7'; 105 n.h.p.; triple-expansion engines. The Italian steamship *Zenobia Martini* was torpedoed and sunk by a British submarine on January 17th, 1943, off Djerba Island.

ZENT

Elders & Fyffes; 1905; *Workman Clark*; 3,890 tons; 367-3 x 46-8x29-3; 577 n.h.p.; 12-5 knots; triple-expansion engines. The steamship *Zent*, Capt. Martin, on a voyage from Garston to Santa Marta, was torpedoed and sunk by a German submarine on April 5th, 1916, 28 miles W. by S.i-S. of Fastnet. The vessel was struck twice on the starboard side, the first torpedo tearing away part of her hull and the second exploding in the engine room, killing two engineers. The number on board was 58, of whom 49 lost their lives either by the explosion of the torpedoes or by the

capsizing of the boats. The nine survivors included Capt. Martin, no other officer being saved.

Great devotion to duty was exhibited by the wireless officer, Mr. Proughton, who remained at his post sending out S.O.S. calls and went down with the ship.

ZENTA

Austrian Navy, light cruiser; 1898; *Pola Dockyard*; 2,300 tons; 303-5x39-5x17; 17,200 i.h.p.; 20-9 knots; triple-expansion engines; Yarrow boilers; eight 4 - 7 in. guns, ten 3 pdr., 2 T.T. On August 15th, 1914, the Austrian light cruiser *Zenta* was engaged in the blockade of the Montenegrin coast. The weather was foggy and the Austrian forces, which the French Admiral, de Lapeyriere, estimated to be large, were in fact very small, consisting of a few torpedo craft besides the *Zenta*. The French fleet, which was overwhelmingly strong, achieved a surprise, but even so the Austrian torpedo boats escaped, though the light cruiser was not so fortunate. Her way of retreat was cut off and she was brought to bay by the French flagship the *Courbet*, a dreadnought battleship of nearly ten times her tonnage. After the first few salvos the *Zenta* was a shambles, but gallantly refused to surrender. Within ten minutes she blew up and sank, most of her crew of 300 taking to the boats and escaping to the shore.

ZENYO MARU

Toyo Kisen K.K.; 1937; *Mitsubishi Jukogyo K.K.*; 6,441 tons; 439-4x58-3x32; 1,167 n.h.p.; oil engines. The motorship *Zenyo Maru* was torpedoed and sunk by a Dutch submarine on August 2nd, 1942, off Penang.

ZERO

Turner, B right man & Co.; 1896; *J. L. Thompson & Sons*; 3,045 tons; 320 x 42 x 21 -1; 343 n.h.p.; triple-expansion engines. The British steamship *Zero* sank after a collision with the American liner *Aeolus*, 12,642 tons, on April 20th, 1922, off Cape Polonio, Uruguay, while on a voyage from the River Plate to Liverpool carrying a cargo of frozen meat.

ZETA

Vrachtvaart Maats Bothnia; 1913; *Irvine's S.B. & D.D. Co.*; 3,053 tons; 331x48x22-1; 290 n.h.p.; triple-expansion engines. The Dutch steamship *Zeta* was torpedoed and sunk by a German submarine in the English Channel on January 22nd, 1917.

ZEUS

E. E. Hadjilias & others; 1920; *Richardson, Duck & Co.*; 5,961 tons; 400-6x52-9x33-2; 349 n.h.p.; triple-expansion engines. The Greek steamship *Zeus* left Loch Ewe on February 2nd, 1942, for Halifax in ballast. She straggled from convoy in bad weather on the 20th, and was never seen again.

ZEUS

German Government; 1928; *Stabilimento Tecnico Tries tino*; 2,423 tons; 292 -1 x 41 - 5 x 17 • 1; 880 n.h.p.; oil engines. The motorship *Zeus* was formerly the Italian *Francesco Morosini*, taken over by the Germans for service as a minelayer. On October 30th, 1944, she was bombed and sunk by British aircraft off Thessaloniki.

ZILLAH

Turner, Brightman & Co.; 1900; *Bar tram & Sons*; 3,789 tons; 340-2x48x17-9; 314 n.h.p.; 10 knots; triple-expansion engines. The steamship *Zillah* was torpedoed and sunk by a German submarine 25 miles N.E. of Kildin Island, near Murmansk, on October 22nd, 1917. Eighteen men were killed, the captain was among the survivors.

ZINNIA

Joseph Robinson & Sons; 1900; *Tyne Iron S.B. Co.*; 3,642 tons; 345x46-1x16-9; 287 n.h.p.; triple-expansion engines. The British steamship *Zinnia* was destroyed by fire off Cape Comorin on March 29th, 1912, while on a voyage from Calcutta to Karachi carrying a cargo of coal.

ZINNIA

British Navy, corvette; 1940; British Isles; 925 tons; 193x32x16; 2,750 i.h.p.; 17 knots; quadruple-expansion engines; one 4 in. gun, six 20 mm.

The corvette *Zinnia*, Lt. Cdr. C. G. Cuthbertson, was torpedoed and sunk by a German submarine in the North Atlantic on August 23rd, 1941. Three officers and 46 ratings were killed.

ZOE

Burdick & Cook; 1879; Palmer's Co.; 1,199 tons; 234x31-2x16-8; 130 b.h.p.; compound inverted engines. The British cargo ship *Zoe* sank after a collision with the barque *Dannebrog*, 248 tons, 20 miles E. of Gibraltar on February 10th, 1885. She was carrying a general cargo from London to Odessa. Six of her crew were drowned, the remainder were picked up by the steamship *City of Malaga*, together with the crew of the barque, which sank soon afterwards while in tow.

ZOE

Turner, Brightman & Co.; 1878; T. Turnbull & Son; 1,509 tons; 251 x 33 x 23; 140 h.p.; compound engines. The British steamship *Zoe* was wrecked at Posto de Fosa, Brazil, on August 26th, 1887, while on a voyage from London to Buenos Aires carrying a general cargo.

ZOGEN MARU

Japanese Government; 1896; Howaldtswerke; 1,428 tons; 238-5x32-4x20-7; 94n.h.p.; triple-expansion engines. The steamship *Zogen Maru* was formerly the Chinese *Tseng Yuan*, seized by the Japanese. She was torpedoed and sunk by the U.S. submarine *Wahoo* on March 19th, 1943, S. of Dairen.

ZONNEWIJK

German Government; 1928; Clyde S.B. & E. Co.; 4,499 tons; 383-9x52-9x25-2; 403n.h.p.; triple-expansion engines. The steamship *Zonnewijk* was formerly Dutch, seized by the Germans. She was torpedoed and sunk by a Russian submarine on October 8th, 1944, near Libau.

ZOROASTRIAN

A. & D. Bomanjee Dubash; 1899; Russell & Co.; 3,994 tons; 345x49-8x17-9; 364 n.h.p.; triple-expansion engines. The Indian steamship *Zoroastrian* was wrecked at Cape Negrais on September 26th, 1916, while on a voyage from Calcutta to Rangoon carrying a cargo of coal.

ZOUAVE

Zinal S.S. Co.; 1930, Burntisland S.B. Co.; 4,256 tons; 370-9X 51-4x25-1; 351 n.h.p.; triple-expansion engines. The British steamship *Zouave*, on a voyage from Pelpel to the Tees with 7,100 tons of iron ore, was torpedoed and sunk by a German submarine on March 17th, 1943, about 900 miles W. of the Fastnet. Twelve of the crew and one gunner were lost.

ZOVETTO

Soc. Anon. Angela Parodi fu B.; 1919; A. Stephen & Sons; 5,107 tons; 399-6x52-4x28-5; 369n.h.p.; triple-expansion engines.

The Italian steamship *Zovetto*, on a voyage from Poti to Baltimore, was wrecked off St. David's lighthouse, Bermuda, on February 12th, 1924.

ZUIHO

Japanese Navy, aircraft carrier; 1935; Japan; 12,000 tons; 690x59x17; 13,000b.h.p.; 20 knots; turbine engines; four 5 in. guns, many 47 mm., 42 aircraft.

The aircraft carrier *Zuiho* was a unit of the Northern Force of two battleships, four aircraft carriers, five cruisers and six destroyers steaming southward from Cape Engano, Luzon Island, to attack the American invasion force in Leyte Gulf. The force was intercepted by the U.S. Third Fleet and a determined air-sea action was fought on October 25th, 1944, in which the Japanese aircraft carrier squadron was completely destroyed, together with one light cruiser. By nightfall the remnants of the Northern Force, of which the larger units were all badly damaged, gave up the action and retired.

For further details of the Cape Engano action see the aircraft carrier *Zuikaku*. The full story of the battle of Leyte Gulf is told under the battleship *Musashi*.

ZUIHO MARU

Iino Kaiun K.K.; 5,135 tons.
The tanker *Zuiho Maru* was torpedoed and sunk by the U.S. submarine *Pampanito* on September 12th, 1944, about 50 miles E. of Hainan Island.

ZUIKAI MARU

Toa Kaiun K.K.; 2,872 tons.
The steamship *Zuikai Maru* was sunk by U.S. carrier-based aircraft on February 17th, 1944, in the Caroline Islands.

ZUIKAKU

Japanese Navy, aircraft carrier; 1939; Kawasaki; 29,800 tons; 800 x — x —; 30 knots; turbine engines; twelve 5 in. guns, 100 aircraft.

The Japanese aircraft carrier *Zuikaku* was the largest of a squadron of four such vessels destroyed by the Americans at the battle of Leyte Gulf, October 23rd-26th, 1944. The Northern Force, to which the *Zuikaku* belonged, comprised two battleships, the *Ise* and *Hyuga*, carrying 14 in. guns and fitted with flight-decks, one large and three medium aircraft carriers, five cruisers and six destroyers. It was sighted first of all about 200 miles off Cape Engano, at the north eastern tip of Luzon Island, Philippines, on the afternoon of the 24th by naval planes of the U.S. Third Fleet under Admiral W. F. Halsey. A fierce sea-air engagement took place, the Americans having brought a powerful aircraft carrier squadron northward on the night of the 24th. This squadron, under Vice-Admiral M. A. Mitscher, attacked with its aircraft before dawn and continued throughout the 25th with devastating effect.

At the commencement of the action the Northern Force was steaming southward with the intention of attacking the U.S. transports disembarking the American army in Leyte Gulf. It did not approach within hundreds of miles of this objective, however, and was eventually obliged to retire after losing nearly 50 per cent of its heavy units.

The aircraft carriers *Zuikaku*, 29,800 tons, *Zuiho*, 12,000 tons, *Chitose* and *Chiyoda*, both of 9,000 tons, and the light cruiser *Tama*, 5,100 tons, were sunk, and great damage was inflicted on the two battleships and the larger cruisers.

The full story of the battle of Leyte Gulf is told under the battleship *Musashi*.

ZUISHO MARU

Kyodo Kaiun K.K.; 1912; C. Connell & Co.; 5,289 tons; 408-5 x 52 • 1 x 31; 536 n.h.p.; triple-expansion engines. The steamship *Zuisho Maru* was torpedoed and sunk by the U.S. submarine *Ray* on August 14th, 1944, about 100 miles W. of Miri, Sarawak.

ZUIYO MARU

Nippon Tanker K.K.; 1917; Barclay, Curie & Co.; 7,385 tons; 450x58x35-5; 900 n.h.p.; triple-expansion engines. The tanker *Zuiyo Maru* was torpedoed and sunk by the U.S. submarine *Cabrilla* on October 1st, 1944, off Olongapo, Philippines.

ZULEIKA

T. Law & Co.; 1875; Aitken & Mansell; 1,144 tons; 211-5X 32-5x21-1.

The iron full-rigged ship *Zuleika*, Capt. J. R. Bremner, was chartered by an American firm to carry 2,000 tons of cargo from the United States to Dunedin and Wellington, New Zealand. One half of the cargo to be discharged at each port.

On the night of Friday, 16th April, 1897, having discharged the first part of her cargo at Dunedin, the ship ran into a violent gale about four miles W. of Cape Palliser. At just before 11 p.m. land was sighted on the port bow and an attempt was made to wear the ship, but she ran bow on to the rocks. The seas swept away all standing gear and smashed the boats, and the crew took refuge in the rigging. The mizzen mast went by the board during the night, and round about 3.30 a.m. the *Zuleika* rolled over into the breakers, throwing every man into the sea.

Of a crew of 21 only nine men, including the captain and second mate, were saved.

ZULU

British Navy, destroyer; 1937; A. Stephen & Sons; 1,870 tons; 35.5-5x36-5x9; 44,000s.h.p.; 36-5 knots; turbine engines; 3-drum boilers; eight 4 - 7 in. guns, 7 smaller; 4 T.T. The destroyer *Zulu*, Lt. A. R. Moore, in company with her sister ship, *Sikh*, took part in combined operations against the Libyan port of Tobruk on the night of September 13th, 1942. There were many unfortunate delays, as a result of which the enemy was enabled to muster his forces in time to repel the landing party and the attack failed in its purpose. Both destroyers came under a hot fire from the shore batteries and *Sikh* was disabled. The *Zulu* attempted to take her in tow but the enemy shot the cable away. A second attempt was made but as it was now daylight it was too dangerous for *Zulu* to remain. She was obliged, therefore, to leave *Sikh*, which sank shortly afterwards.

At about 9 o'clock in the morning of the 14th, an attack by seven German bombers disabled *Zulu*, causing her to be abandoned by her company and the troops on board, save for the guns' crews. She was then taken in tow but sank on her way to port.

The loss of life amounted to four officers, including Lt. Moore, and 35 ratings. See also *Sikh*.

ZURICH

Turner, Brightman & Co.; 1883; T. Turnbull & Son; 1,327 tons; 245 x 34x17; 152 n.h.p.; compound engines. The British steamship *Zurich*, on a voyage from Archangel to London with timber, encountered a violent storm in the early hours of October 20th, 1899, off Vigten Island, Norway. The ship's boats were stove in or washed away by the heavy seas and the crew were forced to abandon her on two improvised rafts made from timbers

of her deck cargo. One of these rafts was picked up on the 24th, its only occupant was the captain, suffering from exposure. The other raft was washed ashore on the 25th with only a dead negro on board.

ZURICHMOOR

Moor Line; 1925; J. Readhead & Sons; 4,455 tons; 371 -8x55-3x26-3; 460 n.h.p.; triple-expansion engines. The British steamship *Zurichmoor* was lost without trace on a voyage in ballast from *Halifax*, N.S., to St. Thomas. She sailed on May 21st, 1942, carrying a crew of 39 and six gunners.

ZVIR

*Prekomorska Plovidba d.d.; 1926; Clyde S.B. & E. Co.; 5,607 tons; 390 * 1 x 54 x 29 • 6; 468 n.h.p.; triple-expansion engines.* The Yugoslav steamship *Zvir*, on a voyage from Whyalla to Newcastle, N.S.W., with iron ore, was sunk by collision with the motorship *Skagerak*, 4,244 tons, on November 15th, 1942, about 100 miles S. of Port Kembla.

ZWEENA

Heap Eng. Moh S.S. Co.; 1889; J. Blumer & Co.; 1,470 tons; 242-5x34x18-3; 180 n.h.p.; triple-expansion engines. The British steamship *Zweena* was wrecked in the Madoera Straits on June 8th, 1915, while on a voyage from Bali to Sourabaya carrying a general cargo.

ZWULON

A. Rappoport; 1909; Bremer Vulkan; 2,839 tons; 3 28-9 x 4 5 - 2 x 19 - 7; 270 n.h.p.; triple-expansion engines. The British cargo ship *Zwulon* sank after a collision with the Italian warship *Roma* in lat. 36° 22' N., long. 22° 54' E., on October 15th, 1921. She was on a voyage from Braila to Antwerp carrying a cargo of grain.
