

DICTIONARY OF DISASTERS AT SEA

DURING THE AGE OF STEAM

Including sailing ships and ships of war lost in action

1824 - 1962

by

CHARLES HOCKING, F.L.A.

DICTIONARY OF DISASTERS AT SEA

DURING THE AGE OF STEAM

A. A. RAVEN

American Transportation Co.; 1912; Gréât Lakes Engineering Works; 2,459 tons; 247x43-7x29-3; 303 n.h.p.; triple-expansion engines.

The American steamship *A. A. Raven* was torpedoed and sunk by a German submarine on March 14th, 1918, off the Scilly Islands.

A. C. DODGE

Ira S. Sushey & Sons; 1942; R. T. C. Shipbuilding Corpn.; 1,147 tons; 243'7x37-1x14'1; 241 n.h.p.; oilengines. The

American tanker *A. C. Dodge* was in collision on May 25th, 1952. She caught fire, broke in two and sank on May 27th. Eight of the crew were lost.

A. D. MACTIER

Geo. Hall Corporation; 1913; Détroit S.B. Co.; 1,899 tons; 244X43x21-8; 146n.h.p.; triple-expansion engines. The American cargo ship *A. D. MacTier* was wrecked on October 21st, 1926, at Cap d'Espoir, Gaspe County.

A. W. PERRY

Canada Atlantic & Plant S.S. Co.; 1897; Workman, Clark & Co.; 1,601 tons; 255x34x22; 291 n.h.p.; triple-expansion engines. The Canadian freighter *A. W. Perry* was wrecked on June 8th, 1915, at Chebucto Head while on a voyage from Boston to Halifax with a général cargo.

AAGTEKERK

Vereenigde Nederl.; 1934; NederlandSchpv. Maats.; 6,811 tons; 460'1x60-2x27-3; 2,325 n.h.p.; Uknots; oil engines. The Dutch motor vessel *Aagtekerk* was one of Convoy WM 11 proceeding from Alexandria to Malta on June 14th, 1942. When N. of Tobruk the convoy was attacked by German dive bombers which sank the *Aagtekerk* with the loss of rive lives.

AAMOT

German Government; 1907; Akers Mek. Værks; 1,373 tons; 240-3x35'2x16-8; 132n.h.p.; triple-expansion engines. The *Aamot* was sunk in a collision on January 8th, 1922, off Cronstadt.

AARON WARD

United States Navy, destroyer; 1941; Féderal Shipbuilding Co.; 1,700 tons; 348x36x—; 50,000 s.h.p.; 36-5 knots; turbine engines; four 5 in. guns, four 40 mm. ; four 20 mm., 5 T.T. The United States destroyer *Aaron Ward* was badly damaged by Japanese bombers on the night of April 7th-8th, 1943. The battle, which was largely aerial, commenced on the 6th with a heavy air attack on the Japanese station at Vila in the New Georgia Islands. The Japanese retaliated on the night of the 7th with an attack in which they employed 50 bombers and 48 fighters. The target was the large concentration of shipping at Guadalcanal. The New Zealand corvette *Moa* and the U.S. fleet tanker *Kanawha*, 4,990 tons, were

sunk and the *Aaron Ward* damaged. The destroyer was taken in tow but sank shortly afterwards.

AASE

Knôhr & Burchard, Nfl.; 1925; F.Schichau; 952 tons; 222-4 X 32-5x11-3; 75 n.h.p.; triple-expansion engines.

The German cargo ship *Aase* was wrecked on March 16th, 1928, at Brims Ness.

AASE

DIS Torm A/S; 1924; Kjobnhavns Flydk. & Skibs.; 1,206 tons; 235'4x36-2x13-7; 83 n.h.p.; triple-expansion engines. The Danish steamship *Aase* was torpedoed and sunk by a submarine on February 17th, 1940, off the N.W. coast of France. Ail of the crew were killed.

ABBAS COMBE

Aid Shipping Co.; 1920; J. Lewis & Sons; 489 tons; 160-1x 25-2x9-7; 64 r.h.p.; triple-expansion engines. The British cargo ship *Abbas Combe* was sunk by German aircraft off Bardsey Island on September 5th, 1941.

ABBEKERK

Vereenigde Nederlandsche Scheep. Maats.; 1939; F. Schichau G.m.b.H.; 7,906 tons; 493-6x63-2x31-2; 2,274 n.h.p.; oil engines. The Dutch motorship *Abbekerk* was torpedoed and sunk on August 24th, 1942.

ABBOTSFORD

George Gibson & Co. ; 1924; Goole S.B. & R. Co.; 1,585 tons; 250-8x38x14-5; 240 n.h.p.; 10-5 knots; triple-expansion engines.

The steamship *Abbotsford*, Capt. A. Watson, was homeward bound from Ghent when she was sunk on, or about, March 11th, 1940, by a German submarine. The vessel sank with ail hands, some 24 officers and men.

ABDIËL

British Navy, minelayer; 1940; British Isles; 2,650 tons; 410 X 39x11; 72,000 s.h.p.; 40 knots; turbine engines ; 3-drum boilers ; six 4 • 7 in. guns, several smaller, 100 mines.

The minelayer *Abdiel*, Capt. D. Orr-Ewing, D.S.O., was mined and sunk off Tarante on September 10th, 1943, two days after the Italian capitulation. Six officers and 42 ratings were killed. The *Abdiel* and her sister ships *Latona* and *Welshman* were all lost in the Mediterranean fighting between October 1941 and September 1943.

ABEL TASMAN

H.C.S.CoastersProprietaryLtd.; 1916; Jonker & Stans ; 2,047 tons ; 274 '9x40-2x16-8 ; 209 n.h.p. ; triple-expansion engines.

The Australian cargo ship *Abel Tasman* was wrecked on July 18th, 1936, at the mouth of Grey River, New Zealand.

ABEOKUTA

ABEOKUTA

Elder Dempster; 1901; R. Duncan & Co.; 1,817 tons; 280-2 x 40 • 1 x 18 • 2; 199 n.h.p.; triple-expansion engines. Sailing from Liverpool to W. Africa with a général cargo, the British steamship *Abeokuta* foundered in the Bay of Biscay on February 14th, 1915.

ABERDEEN

Canadian Government; 1894; Fleming & Ferguson; 674 tons; 180X 31-1x16-9; 196n.h.p.; quadruple-expansion engines. The *Aberdeen* was employed as a lighthouse supply ship. She was wrecked on Black Ledge, Seal Island on October 13th, 1923.

ABERHILL

M. Taylor; 1915; A. Vuijk&Zonen; 1,516 tons; 246-8X38-2 x 16-3; 180 n.h.p.; triple-expansion engines. The British cargo ship *Aberhill* went aground on August 6th, 1941, on Haisbro' Sand and broke her back.

ABERTAY

Soc. Bois et Charbons F. Le Brise; 1888; W. Simons & Co.; 1,088 tons; 221x33-1x12-9; 106 n.h.p.; triple-expansion engines. The French cargo ship *Abertay* was wrecked on October 14th, 1912, in Boskenna Bay near Penzance.

ABESSINIA

Hamburg-AmerikaPacketf.A.G.; 1900; Palmer's Co.; 5,753 tons; 451-3x51-9x28; 642 n.h.p.; triple-expansion engines. The German steamship *Abessinia* was wrecked on September 3rd, 1921, on Knavestone Rock, Farne Islands.

ABGARA

Latvian Shipping Co.; 1911; W. Gray & Co.; 4,422 tons; 374'7x51-3x26; 345n.h.p.; triple-expansion engines. The Latvian steamship *Abgara* was torpedoed and sunk on May 6th, 1942, 15 miles south-east of Gréât Inagua Island while on a voyage from Kingston, Jamaica, to Montréal.

ABHONA

British India S team Navigation Co.; 1910; A. Stephen & Sons; 4,066 tons; 390x50x22; 1,317n.h.p.; 14 knots; quadruple-expansion engines.

The British India liner, *Abhona*, was a new ship, having just completed her steam trials on the Clyde before proceeding to Plymouth, whence she sailed for Rangoon on November 4th, 1910. The ship was intended for service in eastern waters and did not carry any passengers on her voyage out from England. Her crew numbered 90 all told, of whom 13 were Europeans, and she was commanded by Capt. T. B. Tilling, an officer of long and proved service with the British India Line. On November 7th, when in lat. 44 N., long. 90 W., the *Abhona* was sighted by the Danish steamship, *Boscia*, which took her to be in difficulties as she had a heavy list to port. The Danish vessel was unable to render any assistance as the weather was very rough and she was some distance away. Shortly after sighting the liner sank, but a black ship's boat with a brown sail was seen for a time but eventually disappeared. Those on board the *Boscia* were not aware of the identity of the liner, but saw that she had a black funnel with a white ring. This circumstance and the black ship's boat led the British India Company to believe that this was the *Abhona*.

No tidings of the ship ever came to hand, but on November 27th a Spanish steam-trawler picked up flotsam from the *Abhona* off Gijon, Spain.

ABINGDON

British Navy, fleet-minesweeper; 1918; A Usa Shipbuilding Co.; 710 tons; 231x28-7x7-5; 2,200 i.h.p.; 16 knots; triple-expansion engines; Yarrow boilers; one 4 in. gun, 1 smaller. The fleet-minesweeper *Abingdon* was bombed and sunk at Malta on April 5th, 1941. The vessel's normal complement was 73.

ABISKO

Grängesberg-OxelosundTrafikA/B; 1913; Goteborgs M. V. A/B; 3,088 tons; 336-8x46-9x21; 220 n.h.p.; triple-expansion engines. The Swedish steamship *Abisko* struck a mine and sank on April 11th, 1943, near Borkum.

ABNER READ

United States Navy, destroyer; 1942; Bethlehem Co., San Francisco; 2,050 tons; 376-5x39-3x12-2; 60,000s.h.p.; 36-5 knots; turbine engines; Babcock & Wilcox boilers; five 5 in. guns, six 40 mm., ten 20 mm, 10 T.T.

The United States destroyer *Abner Read* was attacked by Japanese aircraft off Samar, in the Philippines, on November 1st, 1944. The vessel, which carried a complement of over 250, was hit and sunk.

ABOSSO

Elder Dempster Line; 1912; Harland & Wolff; 7,782 tons; 425-6x57-3x31-4; 516n.h.p.; 13 knots; triple-expansion engines.

The Elder Dempster liner *Abosso* was torpedoed and sunk by a German submarine 180 miles W. by N. of Fastnet on April 24th, 1917. Sixty-five persons lost their lives. The captain was among the survivors.

ABOSSO

Elder Dempster Lines; 1935; Cammell Laird; 11,330 tons; 457 X65x 32; 7,200 b.h.p. ; 15 knots; oil engines. The liner *Abosso*, Capt. R. W. Tate, was torpedoed and sunk by a submarine on October 29th, 1942, in the North Atlantic. Of those on board 168 crew, including Capt. Tate, were killed. The number of passengers killed is not known.

ABOUKIR

Clydesdale Shipowners' Co.; 1896; Short Bros.; 3,317 tons; 364 • 5 X 43 • 1 x 26 • 3; 416 n.h.p.; triple-expansion engines. The British steamship *Aboukir* was sunk in a collision in September, 1905, 25 miles off Polonio, River Plate, while on a voyage from Calcutta to Buenos Aires.

ABOUKIR

British Navy, armoured cruiser; 1900; FairfieldCo.; 12,000 tons; 454x69-5x28; 21,000i.h.p.; 21-6 knots; triple-expansion engines, Belleville boilers; two 9-2 in. guns, twelve 6 in., twelve 12pdr., three 3pdr., 2 T. T.

At the outbreak of the First World War the 7th Cruiser Squadron comprised the armoured cruisers *Bacchante*, flagship of Rear-Admiral Henry H. Campbell, *Aboukir*, *Cressy* and *Hogue*. The ships were all about 12 years old and their complements were drawn almost wholly from the Royal Naval Reserve. The group to which the squadron was attached was known as the "Southern Force", whose duty it was to protect the Belgian coast and to keep command of English East Coast waters. The patrol of the area was entrusted to the 1st and 3rd Destroyer Flotillas, which watched the Dogger Bank and the Broad Fourteens, the armoured ships, which were based on the Nore, being in support.

On September 19th, 1914, the 7th Cruiser Squadron was short of its flagship, which had gone into dock, Capt. Drummond of the *Aboukir* being left in command. The weather on that date was so bad that the destroyer flotillas were recalled to harbour and the cruisers were withdrawn from the Dogger Bank and confined to the Broad Fourteens. The gale continued throughout the 20th and 21st, so that the big ships were compelled to maintain their watch without a destroyer screen. It was imperative to keep at sea, however, for on the night of the 19th-20th the Marines, who were to figure later in the fighting around Antwerp, were being conveyed from Dover to Dunkirk. During this time the ships, acting upon the orders of Rear-Admiral Arthur H. Christian, commanding the "Southern Force", pursued a zig-zag course and kept a sharp look-out for submarines, although the weather was held to be too rough for such craft.

By the 22nd the sea had abated and the squadron, steaming at about ten knots, and no longer zig-zagging, was some 30 miles W. by S. of Ymuiden. At 6.30 a.m. came the first intimation of danger when a torpedo exploded under the *Aboukir*'s starboard side, causing that ship to take a list of 20 degrees. The order to "abandon ship" was given after a very short time, but only one boat, the cutter, was got away, and those in the water had to avail themselves of anything which would float. The first idea in the mind of Capt. Drummond was that his ship had struck a mine as no submarine was

visible. The *Aboukir* remained afloat for some 25 minutes, after which she capsized and lay for a time with her keel above water.

Meantime the other ships had stopped and lowered their boats, the *Hogue* also throwing overboard mess tables and stools to assist the drowning men. It was while this work of rescue was in progress that the *Hogue* was struck by two torpedoes in rapid succession, the submarine surfacing on the cruiser's port side a few minutes afterwards. For a short time the *Hogue's* guns kept up a hot fire, but gradually she began to turn over and sink.

The last of the trio, the *Cressy*, Capt. R. W. Johnson, still remained, her engines stopped and every one of her boats in the water. It was while in this helpless position that she was hit by a torpedo, which, at the time was, supposed to have come from a second submarine. The *Cressy* sank with frightful rapidity and within 15 minutes she was under the waves.

The *Cressy's* was the worst case of the three, for she had all her boats away and mostly filled with survivors, so that she had no means of safety for her own crew. The total loss of life in this triple disaster was over 1,400 officers and men, the saved numbering 60 officers and 777 men, among whom was Capt. Wilmot Nicholson of the *Hogue*.

Two Dutch steamships, the *Flora*, and the *Titan*, and two Lowestoft sailing-tracters, the *Coriander* and the *J. G. C.* rescued many hundreds of lives between them.

ABSIRTEA

Soc. Anon. di Nav. G. L. Premuda; 1913; Craig Taylor & Co.; 4,170 tons; 385-4x51-5x24-1; 361 n.h.p.; triple-expansion engines.*

The Italian steamship *Absirtea* was torpedoed and sunk by a British submarine on February 1st, 1942, six miles off Cephalonia.

ABUKIR

Ministry of Shipping (General Stm. Nav. Co.); 1920; Swan, Hunter & Wigham Richardson; 694 tons; 173-5x28-1x12-9; 97 n.h.p.; triple-expansion engines.

The Egyptian ship *Abukir* came under the British flag early in the Second World War and was managed for the Ministry of Shipping by the General Steam Navigation Co. She was torpedoed and sunk by a German motor torpedo boat on May 28th, 1940, in the North Sea.

ABUKUMA

Japanese Navy, light cruiser; 1923; Uraga Dock Co.; 5,170 tons; 535x46-7x15-9; 70,000 h.p.; 33 knots; turbine engines; Kanpon boilers; seven 5-5 in. guns, two 3 in. 2 m.g., 8 T.T., 1 aircraft.

The Japanese light cruiser *Abukuma* was a unit of the "Southern Force" which met the U.S. Seventh Fleet in the Surigao Strait during the battle of Leyte Gulf in October, 1944. The action commenced in the early hours of the 25th, when the Americans discovered a Japanese squadron of two battleships, one heavy cruiser and four destroyers entering the Strait without air cover. The northern exit from the strait, towards which the Japanese were steaming was sealed off by a formidable concentration of U.S. heavy ships while light forces were disposed on either flank of the approaching vessels so that, in the darkness, they ran into a trap from which there was no escape. A torpedo attack by destroyers and torpedo-boats severely damaged the battleships and before they had time to make adequate reply they were sunk by the gunfire of the U.S. heavy ships together with three of their escorting destroyers. On the following day the *Abukuma* was located S.W. of Negros Island by U.S. Army bombers from a newly established airfield. She was at once attacked and sunk by bombs.

The Japanese loss in the Surigao Strait action was overwhelming and included the battleships *Fuso* and *Yamashiro*, the heavy cruiser *Mogami* and the destroyers *Asagumo*, *Michishio* and *Yamagumo*. Other vessels belonging to the "Southern Force" which did not enter the strait, of which the *Abukuma* was one, were sunk or damaged by aircraft on the following day.

The Americans did not suffer the loss of any ship in this action, but the destroyer *Albert W. Grant* was badly damaged.

For the full story of the battle of Leyte Gulf see the Japanese battleship *Musashi*. For further particulars of the Surigao action see under *Yamashiro*.

ABUKUMAGAWA MARU

ToyoKaiunK.K.; 6,887 tons.

The steamship *Abukumagawa Mam* struck a mine and sank on June 1st, 1945, off Tokushima, Japan.

ABURI

Elder Dempster Line; 1906; Harland & Wolff; 3,730 tons; 370-6x49-3x21-8; 528 n.h.p.; 14 knots; triple-expansion engines.

The Elder Dempster liner *Aburi* was torpedoed and sunk by a German submarine 125 miles N.W. of Tory Island on April 17th, 1917. Twenty-five persons were killed. The captain was among the survivors.

ABYDOS

Raeburn & Verel; 1871; London & Glasgow S.B. Co.; 1,339 tons; 260x31-4x21-8; 150 h.p.; compound engines. The steamer *Abydos* of Glasgow was lost off the Isle of Man on December 22nd, 1894. Nineteen of the crew were drowned.

ABYSSINIA

British India S.N. Co.; 1868; Dumbarton; 1,126 tons; 249-8x30-2x18-8; 135 n.h.p.; compound inclined engines. The British steamship *Abyssinia* was wrecked near Mozambique on March 31st, 1886, while on a voyage from Bombay to Mozambique.

ACACIA

R.R.Rex; 1871; Ross & Co.; 225 tons; 118x24x12. The Australian barque *Acacia* with a general cargo left Port Esperance for Adelaide on June 20th, 1904. Soon after leaving port she encountered a succession of violent gales. Nothing was heard of her for nine months when the wreck was found near Mainwaring, Tasmania, together with the bodies of several of the crew.

ACACIA

Rederi A/B Svenska Lloyd; 1946; Eriksbergs M.V. A/B; 2,078 tons; 328x44-6x15-9; oil engines.

The Swedish ship *Acacia* struck a mine and sank on April 12th, 1947, off Falsterbo.

ACADIAN

Canada Steamship Lines; 1908; Clyde Shipbuilding Co.; 2,305 tons; 248-5x43x14; 162 n.h.p.; 8 knots; triple-expansion engines. The steamship *Acadian* was torpedoed and sunk by a German submarine 11 miles S.W. by W. of Trevoise Head on September 16th, 1918. Twenty-five men, including the captain, were killed.

ACARY

Government of Brazil; 1905; Flensburger Schiffsbau Ges.; 4,275 tons; 387-5x51-5x17; 447 n.h.p.; quadruple-expansion engines.

The Brazilian steamship *Acary* was torpedoed and sunk by a German submarine on November 2nd, 1917, near St. Vincent, C.V.

ACASTA

British Navy, destroyer; 1927; John Brown & Co.; 1,350 tons; 323x32-2x12; 34,000 i.h.p.; 35 knots; turbine engines; 3-drum boilers; four 4-7 in. guns, two 2 pdr., 5 m.g., 8 T.T. The destroyer *Acasta*, Cdr. C. E. Glassford, together with the destroyer *Ardent*, was escorting the aircraft-carrier *Glorious* off Narvik when a German force consisting of the battleships *Gneisenau* and *Scharnhorst* surprised the British ships and sank all three. Some days later the German Admiralty announced that a very large number of survivors had been picked up. A statement in Parliament gave the number of survivors in British hands as 39, of whom 36 officers and ratings from the *Acasta* and *Glorious* were taken off a raft by a Norwegian vessel and brought to England. The action took place on June 8th, 1940.

Two merchantmen, the transport *Orama* and the tanker *Oil Pioneer*, were sunk at the same time.

The full story of the action is told under the aircraft-carrier *Glorious*.

ACCRA

Elder Dempster Line; 1926; Harland & Wolff; 9,337 tons; 451 x 62x31; 1,700 n.h.p.; 14-5 knots; oil engines. The Elder Dempster ship *Accra* was bound for West Africa in convoy when she was torpedoed by a German submarine off the

ACHAIA

W. coast of Ireland on July 26th, 1940. The disaster occurred at mid-day when the passengers were at luncheon and the vessel sank in half an hour. There was a choppy sea which made it difficult for the ship's lifeboats to get away and one, a motor boat, capsized, drowning 19 persons of whom 11 were passengers. The *Accra* was commanded by Capt. John J. Smith and carried 469 persons, passengers and crew. One of the vessels in company, a Norwegian, stood by at great risk to herself and picked up 137 survivors. There were no casualties other than those in the motor boat.

ACHAIA

Atlas Levante-Linte, A.G.; 1921; Nordd. Unionwerke A.G.; 1,778 tons; 283-2x39-8x17-8; 137n.h.p.; triple-expansion engines.

The German steamship *Achaia* was bombed by British carrier-based aircraft on March 17th, 1942, and while taking evasive action ran into a minefield and sank about 25 miles east of Tripoli, Libya.

ACHATES

British Navy, destroyer; 1929; John Brown & Co.; 1,350 tons; 323x32-2x12; 34,000 s.h.p.; 35knots; turbine engines; 3-drum boilers; four 4-7 in. guns, two 2pdr., 5m.g., 8 T.T. The destroyer *Achates*, Lt.-Cdr. A. H. Tyndall Johns, was part of a destroyer force under Capt. Robert StV. Sherbrooke, D.S.C., escorting a convoy to North Russian ports on December 31st, 1942. At about 9.30 a.m. when off Bear Island the *Achates* was fired on from astern by the German heavy cruiser *Hipper* and this was followed by salvos from the pocket battleship *Lutzw* (*ex-Deutschland*) and several destroyers. Capt. Sherbrooke in the *Onslow*, 1,550 tons, four 4-7 in. guns, at once turned his small force against the raiders and a sharp action commenced in the semi-darkness of the Arctic Circle and amid frequent snow squalls.

The *Achates* was hit forward by 8 in. shells early in the action, followed by a direct hit on the bridge which killed Lt.-Cdr. Johns and everyone stationed there, except a signalman and another rating, both of whom were wounded. The next hit was in the boiler room and the vessel could no longer maintain steam. She was then hit repeatedly, the firing having commenced at approximately 6,000 yards range and decreased gradually. The *Achates* finally turned over and sank in the short space of three minutes, taking with her seven officers and 106 ratings. There were only 80 survivors, who were picked up by the trawler *Northern Gem*, Lt. H. C. Aisthorpe.

The action, meanwhile, was continuing, the British ships laying a smoke-screen under cover of which the convoy turned away, and driving off four determined attacks by the enemy. During this phase of the action the German destroyer *Hermann Schoemann*, 1,625 tons, was sunk by gunfire. After two hours the cruisers *Sheffield*, 9,100 tons, twelve 6 in. guns, Capt. C. T. Addis, flagship of Vice-Admiral R. L. Burnett, and *Jamaica*, 8,000 tons, twelve 6 in. guns, Capt. J. Hughes-Hallet, D.S.O., came on the scene. The cruisers hit and damaged the *Hipper*, causing her to lose speed, and the *Sheffield* hit the destroyer *Friedrich Eckoldt*, 1,625 tons, with a salvo, causing her to catch fire and sink by the stern. The German force then broke off the action and retired. The convoy reached its destination without loss or damage to a single ship.

Capt. Sherbrooke was wounded during the action, losing the sight of one eye. In recognition of the bold and seamanlike manner in which he had handled his small force he was awarded the Victoria Cross.

ACHERON

British Navy, destroyer; 1927; Thornycroft & Co.; 1,350 tons; 323x32-2x12; 34,000s.h.p.; 35knois; turbine engines; 3-drum boilers; four 4-7 in. guns, two 2pdr., 5 m.g., 8 T.T. The destroyer *Acheron*, Lt. R. J. Wilson, hit a mine and sank off the Isle of Wight on December 17th, 1940, with the loss of six officers, including Lt. Wilson, and 145 ratings. Two officers and 13 ratings were wounded.

ACHILLE

M. Scuderi; 1890; Ropner & Son; 2,415 tons; 299-3x39-1 x 18-6; 217 n.h.p.; triple-expansion engines.
The Italian steamship *Achille* was bombed and sunk by British aircraft on October 23rd, 1941, N.W. of Ustia,

ACHILLE ADAM

South Eastern and Chatham Railway Co.; 1887; Samuda Bros.; 460tons; 190x27x11-8; 107n.h.p.; 10knots; triple-expansion engines.

The channel steamship *Achille Adam* was intercepted and sunk by a German submarine 31 miles S.E. by S. of Beachy Head on March 23rd, 1917. Six of the crew were killed.

ACHILLES

Alfred Holt & Co.; 1900; Scotfs Shipbuilding Co.; 7,043 tons; 442-5x52-8x32-1; 521 n.h.p.; 13 knots; triple-expansion engines.

The steamship *Achilles* was torpedoed and sunk by a German submarine 90 miles W.N.W. of Ushant on March 31st, 1916. Five men were killed. The captain was among the survivors.

ACHILLES

Koninklijke Nederlandsche Stoomboot Maats. N.V.; 1906; Nederlandsche Schps. Maats.; 1,815 tons; 286-9x40-2x18-8; 180 n.h.p.; triple-expansion engines.

The Dutch cargo ship *Achilles* was torpedoed and sunk on October 1st, 1942, on a voyage from Demerara to Trinidad.

ACROPOLIS

Antoniou & Katramados; 1917; Lobnitz & Co.; 1,393 tons; 255-9x35x15-4; 219 n.h.p.; triple-expansion engines. The Greek steamship *Acropolis* was destroyed by aircraft on April 6th, 1941, while lying at Piraeus.

ACTAEON

United States Government; 1909; J. C. Tecklenborg A.G.; 5,000 tons; 401-1x52-4x28-2; 474 n.h.p.; quadruple-expansion engines.

The American steamer *Act aeon* was torpedoed and sunk by a German submarine on November 24th, 1917, in the Bay of Biscay.

ACTON

Watts, Ward & Co.; 1874; C.Mitchell&Co.; 1,646 tons; 279-9 x33-3x24-6; 200 n.h.p.; compound engines. While on a voyage from Montreal to London with a cargo of timber and copper phosphate, the *Acton* was wrecked three miles W. of Cape Pine, NfL, on August 12th, 1886.

ACTON

Acton Steamship Co.; 1917; W. I. Yarwood & Sons; 207 tons; 99-9x22x9-9; 30 r.h.p.; 8-5 knots; triple-expansion engines. The small steamship *Acton* was torpedoed and sunk by a German submarine in the English Channel about the end of March, 1917* Six men, including the captain, were killed.

ADA

Rederi-A/B Amie; 1881; N. Pearse & Co.; 2,245 tons; 300-9x 36-1x25-5; 210 n.h.p.; compound engines. The Swedish steamship *Ada* was torpedoed and sunk by a German submarine on June 9th, 1917, in the North Sea.

ADA MELMORE

W. Porter & Sons; 1877; W. Hamilton & Co.; 591 tons; 175-7x 28-7x17-3.

The barque *Ada Melmore*, Capt. W. Millikan, was on voyage from Coquimbo to England with manganese ore when, at 3.25a.m. on January 20th, 1887, she ran into the ship *Kapunda*, south of Maceio in lat. 13° 45' S., long. 27° 20' W. She carried no lights at the time.

The *Kapunda* was badly damaged and sank within five minutes with the loss of 303 lives.

Sixteen survivors were taken aboard the *Ada Melmore* which, with bows stove in down to the forefoot, set course for Pernambuco.

On January 25th, 14 of these survivors were transfered to the French barque *Ulysse* and subsequently landed at Bahia.

The *Ada Melmore*, however, was making water and was abandoned on January 28th, her crew took to the boats and reached Maceio with the loss of two lives.

See also *Kapunda*.

ADALIA

Hamburg-Amerika Packet/ A.G.; 1921; Akt. Ges. "Neptun"; 3,199 tons; 337-6x48-2x20-9; 300n.h.p.; triple-expansion engines.

The German steamship *Adalia* was sunk in a collision with the *Mendoza* on December 7th, 1940, in Flushing Roads.

ADAMANDIOS GEORGANDIS

GeorgandisBros.; 1916; J. Blumer & Co.; 3,443 tons; 348-5 X 48-7x23-3; 313 n.h.p.; triple-expansion engines. The Greek cargo ship *Adamandios Georgandis* was sunk by a German submarine on June 19th, 1940, in the Atlantic.

ADAMANTIOS J. PITTHIS

Pithis Bros. & Co.; 1908; Napier & Miller, Ltd.; 4,537 tons; 385-2x51-2x26-4; 320 n.h.p.; triple-expansion engines. The Greek steamship *Adamantios J. Pithis*, Capt. Glykas, was wrecked on January 27th, 1940, near St. Ann's Head, Milford Haven. She was on a voyage from Rosario to Sharpness with grain.

ADAMAS

Adamas S.S. Co. (Lyras & LemosBros.); 1918; Craig, Taylor & Co.; 4,144tons; 370-1x51-4x24; 361 n.h.p.; triple-expansion engines.

The Greek steamship *Adamas* was involved in a collision in the N. Atlantic on February 8th, 1943, and was so badly damaged that she was sunk by gunfire.

ADAMASTOS

C.M.Lemos; 1919; Sun S.B. Co.; 5,889 tons; 434-3x57-7x27-2; 612 n.h.p.; triple-expansion engines. The Greek ship *Adamastos* was torpedoed and sunk by a German submarine on July 1st, 1940, in the Atlantic.

ADAM'S BECK

Gas, Light & Coke Co.; 1941; BurntislandS.B.Co.; 2,816 tons; 315x44-5x19-9; 240n.h.p.; triple-expansion engines. The *Adam's Beck* was bombed and sunk by German aircraft on July 30th, 1941.

ADANA

Deutsche Levante-Linie Hamburg, A.G.; 1922; Vulcan-Werke, A.G.; 4,205 tons; 360-7xSix26; 260n.h.p.; triple-expansion engines.

The German steamship *Adana* was shelled and sunk by British warships on April 16th, 1941, north of Tripoli.

ADANA

SadikogluFehmi; 1870; Laird Bros.; 1,158 tons; 258-2x29-7 x 20; 158 n.h.p.; compound engines.

The steering gear of the Turkish steamship *Adana* broke on January 27th, 1943, about 25 miles N.E. of the entrance to the Bosphorus. She foundered on the following day.

ADATO

Ocean Navigation Co.; 1899; W. Hamilton & Co.; 3,347 tons; 330-7x45-7x16-2; 299 n.h.p.; triple-expansion engines. Sailing from Seattle to Hong Kong in January, 1909, with a cargo of cotton, flour, etc., the *Adato* went aground at Oshima, Japan, and sank.

ADDA

Elder Dempster Lines; 1922; Norland & Wolff; 7,816 tons; 435x57x31; 1,300n.h.p.; 14knots; oilengines. The liner *Adda*, Capt. J. T. Marshall, was torpedoed and sunk by a submarine on June 8th, 1941, about 100 miles W. of Freetown. Two passengers and seven crew were killed. Capt. Marshall was among the survivors.

ADDAH

Elder Dempster Line; 1905; Palmer & Co.; 4,397 tons; 350x 48-3x20-7; 478 n.h.p.; 11-5 knots; triple-expansion engines. The *Elder Dempster liner Addah* was torpedoed and sunk by a submarine 35 miles S.W. of Penmarch on June 15th, 1917. The liner was struck on the port side and the captain immediately gave orders to "abandon ship". Ten minutes later the submarine surfaced and

began a systematic shelling of the two boats which had got afloat. The captain's boat was hit repeatedly, eight men being killed, the boat then sank. The captain and a few survivors were picked up by the first officer's boat which had escaped any fatal casualties, but had several men wounded. Shortly afterwards the submarine ceased fire and disappeared.

The *Addah* remained afloat for about ten minutes after being abandoned. The total number killed was nine men.

ADDER

Netherlands Navy, monitor-ram; 1871; Holland; 1,566 tons; 210 X 42 (approx.) x—; 9 knots; one 11 in. gun, several smaller. The Dutch monitor-ram *Adder*, Lt.-Cdr. E. S. van der Aa, foundered in a gale in the North Sea off Scheveningen on July 7th, 1882. The vessel probably capsized, as she was of low freeboard with a heavy gun turret of 9 in. thickness of iron forward. Her complement was about 150 officers and men, of whom 65 were drowned.

ADELA

TedcastleMcCormick&Co.; 1878; H. Murray & Co.; 685 tons; 199-8x32-2x14-5; 181 n.h.p.; 8 knots; compound engines. The steamship *Adela* was torpedoed and sunk by a German submarine 12 miles N.W. of the Skerries on December 27th, 1917. Twenty-four men were killed. The captain was among the survivors.

ADELE ANDALO

CalabroSicilianadiNav.S.p.a.; 1921; D. W.Kremer Sohn; 836 tons; 204-4x31-3x—; oilengines. This Italian ship foundered during a storm on January 27th-28th, 1959, about 45 miles S. of Malta. Six survivors and one body were picked up. Four of the crew were missing.

ADELE OHLROGGE

Karl Gross; 1894; Flensburger Schiffsb. Ges.; 1,371 tons; 231-6x33-4x13-8; 106 n.h.p.; triple-expansion engines. The German steamship *Adele Ohlrogge* struck a mine and sank on February 27th, 1941, 10 miles north of Wangerooze.

ADELFOUIS

M. J. Carras; 1917; Northumberland S.B. Co.; 5,838 tons; 400 x53x32-8; 465 n.h.p.; triple-expansion engines. The Greek ship *Adelfouis* was torpedoed, shelled and sunk on May 1st, 1943, about 500 miles south-east of St. Paul Rocks.

ADELFOUIS

Agelef Shipping Co. S.A.; 1925; New Waterway S.B. Co.; 2,310 tons; 290-8x44-9x19-4; 250n.h.p.; triple-expansion engines. The Costa Rican steamship *Adelfouis*, Capt. Hocken, went ashore during a fog on December 30th, 1956, near Quoin Point, S. Africa, and broke her back.

ADELLEN

John I. Jacobs & Co.; 1930; Blythswood S.B. Co.; 7,984 tons; 459-7x60-0x34-5; 653 n.h.p.; 11 knots; oilengines. The tanker *Adellen*, Capt. J. Brown, was torpedoed and sunk by a submarine in the North Atlantic on February 22nd, 1942. Twenty-nine men were killed. Capt. Brown was among the survivors.

ADEN

Peninsular & Oriental S.N. Co.; 1892; R. Dixon & Co.; 3,925 tons; 366x46-1x27-6; 471 n.h.p.; 14 knots; triple-expansion engines.

The P. and O. liner *Aden*, was a schooner-rigged screw steamship with a cargo capacity of 6,324 tons. She left Yokohama in May 1897 homeward-bound with a general cargo. She touched at Colombo and from there proceeded through the Indian Ocean on her way to Suez. The vessel carried a crew of 86 and 34 passengers under command of Capt. Hill. The voyage across the Indian Ocean was extremely bad, the *Aden* encountering continuous squalls and rainstorms and shipping a good deal of water, so that some passengers were driven from their cabins. The approach of land under such circumstances was fraught with great danger for, in addition to being a treacherous coast, it was not provided with lighthouses and at night was the dread of all ship masters. On June 8th Capt. Hill knew his ship was within a few hours steaming of the island of Socotra at the southern entrance to the Red Sea. It was his hope to

ADEN

find calmer waters once he had passed the island, but in the vile state of the weather he apprehended a period of some danger before his hope could be fulfilled.

On the night of the 8th-9th, in black darkness, the *Aden* neared the island, the local currents, strengthened by the gale, having swept her well out of her course. At about three o'clock in the morning the vessel struck three or four times on the rocks with great violence and then remained fast, the seas continually breaking over her. The electric light failed immediately and in the darkness the passengers were mustered on deck where they remained until daylight. There was an absence of panic and the Lascar crew behaved well. As soon as the dawn came attempts were made to launch the three starboard boats, those on the port side having been carried away. The first was swept out of reach before anyone could get into her, Mr. Garden, the first officer, losing his life in an attempt to reach her with a line. The second boat was driven away after launching, being only half full, and could not approach the ship again. The third was filled with women and children and managed to clear in safety, but was blown out of sight and lost.

In these efforts the four ship's officers were drowned, leaving only Capt. Hill, who shortly afterwards had both legs broken by a wave and was then washed overboard and not seen again.

There now remained a small company of survivors, consisting of nine passengers and 36 crew. After spending 17 days on the wreck, during which time they subsisted partly on Barcelona nuts and suffered great hardships, the party were rescued by the s.s. *Mayo*, of the Royal Indian Marine, and conveyed to Aden.

ADEN

Chargeurs Reunis; 1918; *Asano S.B. Co.*; 8,033 tons; 445X 58x40; 703 n.h.p.; triple-expansion engines. The French steamship *Aden Mam* was torpedoed and sunk by German aircraft on May 27th, 1940, during the operations at Dunkirk.

ADEN MARU

Ono Shoji Gomei Kaisha; 1919; *Kawasaki Dockyard Co.*; 5,824 tons; 385 X 51X 36; 437 n.h.p.; triple-expansion engines. The steamship *Aden Mam* was torpedoed and sunk by the U.S. submarine *Gurnard* on May 6th, 1944, in the Celebes Sea.

ADENWEN

W. & C. T. Jones Steamship Co.; 1913; *Bartram & Sons*; 3,798 tons; 350x50x23-7; 320n.h.p.; 10 knots; triple-expansion engines.

The steamship *Adenwen* was torpedoed and sunk by a submarine six miles S.E. by E. of the North Arklow Light-vessel on March 25th, 1917, and ten men were killed. The captain was among the survivors.

ADERNO

Italian Government; 1912; *Caledon S.B. & E. Co.*; 2,609 tons; 310• 2x44-2x18-5; 345 n.h.p. - triple-expansion engines. The British ship *Ardeola* (Yeoward Line) was picked out by a searchlight at Bizerta on November 9th, 1942, and ordered to stop. She was boarded by a French naval party and taken into Bizerta. The crew were sent to a camp at Sfax, but left there with other ships' crews on November 24th for Algiers. The ship's name was changed to *Aderno* and she left Bizerta in January, 1943, with an Italian crew. She was torpedoed and sunk by a British submarine on the 23rd July, 1943, about 2 miles from Civitavecchia.

ADBSE

Dampsk. A/S Lloyd I; 1890; *J. Priestman & Co.*; 2,235 tons; 290-4x39-1x19-7; 217n.h.p.; triple-expansion engines. The Norwegian steamship *Adine* was torpedoed and sunk by a German submarine on March 13th, 1918, in the North Sea.

ADJUTANT

Seater White & Co.; 1880; *Barclay Curie*; 2,275 tons; 285X — X—; 230 n.h.p.; 10 knots; compound engines. The steamship, *Adjutant*, was bound from Calcutta to London with a general cargo. On the morning of January 4th, 1884, when off Fort Pigne, Malta, she was driven ashore in a gale and became a total wreck. The tug *Escort* endeavoured to render assistance but without avail. Of the *Adjutant's* crew five men were drowned, the captain and all the officers being among the survivors.

Men from the Malta garrison and seamen from the fleet rendered great assistance, both with the rocket apparatus and individually.

ADLER

German Navy, gunboat; 1883; *Germany*; 884 tons; 177-2X 32-9x11-5; 724i.h.p.; 11 knots; compound engines; two 5-9 in. guns, two 4-7 in.

The German gunboat *Adler* was a unit of a small squadron lying in the harbour of Apia, during the crisis between the United States and Germany over the Samoan Islands in the early months of 1889. On March 15th-16th three American and three German men-of-war, together with all the merchant shipping in the harbour were destroyed by a hurricane which trapped them in their narrow and insecure anchorage. The *Adler*, which was commanded by Capt. Fritze, received serious damage to her steering gear and was flung bodily on to the top of a reef by a gigantic wave, which deposited her on her beam ends, where she lay safe from further disaster. Twenty men were drowned.

The full story of the hurricane is told under the *Trenton*, flagship of the U.S. squadron, which was lost.

ADLER

German Navy, destroyer; 1942; *Germany*; 1,200 tons; 313 X 31x9; 28,000s.h.p.; 33 knots; turbine engines; four 4-1 in. guns, four 37 mm., eight 20 mm., 6 T.T.

The German destroyer *Adler* was sunk in the Bay of Biscay on the afternoon of December 28th, 1943, by the British cruisers *Enterprise* and *Glasgow*. The full story of the action is told under the T-25 which together with the T-26 was also sunk in the same engagement.

ADMELLA

The Australian passenger steamship *Admella* was bound from Adelaide to Melbourne with 107 passengers and crew and a general cargo. No details of the vessel herself seem to be known, but her loss was one of the most tragic occurring on the Australian coast in the 19th century. On August 4th, 1859, when off Cape Northumberland, South Australia, she was wrecked with the loss of 83 of those on board.

ADMIRAL GRAF SPEE

German Navy, armoured ship (pocket-battleship); 1934; *Wilhelmshaven Dockyard*; 10,000 tons; 609-2x70-7x21-7; 50,000i.h.p.; 26 knots; diesel engines; electrically welded hull; six 11 in. guns, eight 5•9 in., six 4•1 in., eight 3pdr., 8 T.T., 2 aircraft. The German pocket-battleship, *Admiral Graf Spee*, was one of a group of three ships laid down by the German Government during the years 1929-32. Actually she was the last of the trio, being laid down in 1932. The design of the ships was influenced by the terms of the peace treaty of Versailles, which forbade the building by Germany of any warship exceeding 10,000 tons displacement. In order, therefore, to give the ships the maximum of fighting power it was decided to adopt a method of electrically welded hulls, thereby saving some hundreds of tons in rivets. This experiment turned out to be highly successful and as the ships were to carry as many heavy guns as possible the new design enabled six large 11 in. guns to be mounted in triple turrets fore and aft, in addition to which eight 5-9 in. guns, mounted singly, were carried. The ships had engines of 54,000 horsepower, which drove them at a speed of 26 knots, their radius of action being 10,000 miles at a speed of ten knots.

The armour protection of this class of ship was, however, weak, relying mainly upon a 4 in. belt extending roughly from the fore to the after 11 in. gun-turret and leaving bow and stern only lightly protected. Their speed of 26 knots meant that they could out-steam any battleship afloat, excepting the three British battle cruisers, while they had no reason to fear any ordinary cruiser, which they could easily sink with their superior weight of metal. That the German Admiralty hoped a great deal from them there is no gain-saying, and under favourable circumstances it was expected that they might hold their own with older and slower, but heavier, battleships.

The test was not long in coming. Three years after she was commissioned in 1936, the *Admiral Graf Spee* was at sea fully equipped for war and ready to engage her enemies.

On August 21st, 1939, the vessel left Wilhelmshaven, having on board a complement of 1,153 officers and men, being 227 more than she was intended to carry. The reason for this lay in the fact that if war broke out she could pursue a career as a commerce raider and

her extra hands could find employment as prize crews. Her commander was Capt. Hans Langsdorff, an officer of mark and ability in the new German navy. Lastly the German Admiralty had seen fit to include many hundreds of young sailors in the crew. It was probably intended that these youths should gain experience of actual war conditions while on the cruise and that the ship would not need to engage in any fighting of a nature that would demand a more seasoned type of seaman. Alternatively, it might be that the outbreak of hostilities was not regarded as likely and that after a short cruise the ship would return to home waters. As matters turned out war was declared between Britain and Germany on Sunday, September 3rd, 1939, and the *Admiral Graf Spee* continued on her course.

For several months no certain news of the raider's doings reached the British Admiralty, but the sinking of the small tanker *Africa Shell* was later reported in London, together with definite information that a pocket-battleship was at large on the high seas. Altogether the raider sank the following ships before she was brought to action:

September 30th	s.s. <i>Clement</i>	5,051 tons	off Pernambuco
October 5th	„ <i>Newton Beech</i>	4,651 „	700 miles off Africa
	7th „ <i>Ashlea</i>	4,222 „	700 miles off Africa
	„ 10th „ <i>Huntsman</i>	8,196 „	off Cape of Good Hope
	22nd „ <i>Trevannion</i>	5,350 „	off Cape of Good Hope
November 15th	„ <i>Africa Shell</i>	706 „	Mozambique Channel
December 2nd	„ <i>Doric Star</i>	10,093 „	off Africa, S. Atlantic
	3rd „ <i>Tairoa</i>	7,983 „	off Africa, S. Atlantic
	7th „ <i>Streonshal</i>	3,895 „	S. Atlantic

On December 13th the *Admiral Graf Spee*, having crossed the Atlantic to the coast of South America once again, was in the neighbourhood of the River Plate. At about 6 o'clock in the morning she sighted a French liner, the *Formose*, and bore up to capture her. It was while steaming in chase of this vessel that the raider's lookout aloft sighted the mastheads of the British 8 in.-gun cruiser, *Exeter*, Capt. F. S. Bell. Some few miles below the horizon were two other British men-of-war, the *Ajax*, Capt. C. H. L. Woodhouse, and the New Zealand cruiser *Achilles*, Capt. W. E. Parry, this squadron being under command of Cdre. H. Harwood, who flew his flag in the *Ajax*.

The fighting strength of the forces now rapidly closing each other was as follows:—

BRITISH			
<i>Ajax</i> (flagship)	6,985 tons	32-5 knots	8-6 in. guns, 8-4 in.
<i>Exeter</i>	8,390 „	32 „	6-8 in. „
<i>Achilles</i>	7,030 „	32-5 „	8-6 in. „
Combined weight of broadside 3,136 lb.			

GERMAN			
<i>Admiral Graf Spee</i>	10,000 tons	26 knots	6-11 in. guns
		8-5-9 in., 6-4 in.	Weight of broadside 4,700 lb.

From the above it will clearly be seen that the six 11 in. guns of the German vessel greatly outweighed and outranged anything which the much lighter British ships could bring against her. Nor was the armour of the cruisers comparable with that of their powerful adversary. There was one factor in favour of the British, however, as events were soon to show, and that was the long experience, discipline and training of the seamen.

At the time of the action the *Admiral Graf Spee* was presumed to be her sister-ship, the *Admiral Scheer*, and it was not until afterwards that her identity was established.

The raider had approached the mouth of the River Plate because she was in need of oil fuel. A German merchantman, the s.s. *Tacoma*, lay in Montevideo harbour, ostensibly taking refuge from the British cruisers until such time as it would be convenient to slip out, but actually loaded with a full supply of oil and stores for the *Graf*

Spee. It was to afford an opportunity for the supply ship to reach her with ease that the pocket-battleship ventured into the busy waters of the Plate.

At 6.18 a.m., four minutes after sighting, the German ship opened fire on the *Exeter* at a range of 25,000 yards, and for a time what was nothing less than a duel between the two ships took place. The raider scored hits with her fifth and seventh salvos and swept the *Exeter's* bridge and badly damaged the forward 8 in. gun-turret, killing eight marine gunners. In the next 45 minutes the British cruiser had her heavy guns put out of action one by one until only two of the six were fit for service. Despite this punishment she continued to close the enemy, having her sides and upperworks riddled with shells, her steering-gear damaged so that she had to be steered by hand, all orders being sent by a chain of seamen to the helmsman right aft, the same method having to be employed to convey orders to the engine room. Her casualties were high, there being five officers and 56 men killed and three officers and 20 men wounded, a total of 84 all told.

Meanwhile the *Ajax* and *Achilles* by skilful use of smoke screens steamed at times to within four miles of the enemy, their 6 in. guns inflicting great damage on her and driving her into shallow water, compelling Capt. Langsdorff to fight in a triangle. The *Ajax* managed to get between the German ship and the coast for a time and, with the *Achilles*, to get home a broadside. These two broadsides damaged the *Graf Spee's* stern and did much execution in the control-tower. Abandoning hope of shaking off her determined antagonists, the pocket-battleship turned toward Montevideo. She had received 27 hits, of which 15 were on the starboard side and 12 on the port side, the most vital damage of all being that wrought upon the control tower.

The action had fallen into two parts. In the first part the *Exeter* had taken the lion's share, whilst her consorts had come up and manoeuvred for position. In the second the badly damaged *Exeter* had remained to seaward, firing from her solitary 8 in. gun-turret at intervals, and the two light cruisers had fought out the battle at 6 in. gun range. In order to confuse the *Graf Spee's* gunnery officers the British ships adopted a ruse whereby, on the flash of the enemy's guns, they exploded a depth charge which threw up a column of water similar to that of a bursting shell. This would be observed from the control-tower of the German and the supposed range corrected accordingly, thereby creating a wide margin of error. The expert use of torpedoes also compelled the enemy to change course at vital moments, frustrating her attempts to break through.

At 7.40 a.m. the *Exeter's* remaining 8 in. gun-turret flooded, and the guns could no longer be fired. She therefore drew out of the fight and commenced very necessary repairs. In the meantime it had been reported to Cdre. Harwood that the two light cruisers were in danger of running short of ammunition, should the action become too prolonged. The commodore, therefore, decided that he would not seek a decision until nightfall, when it might be possible to close the range sufficiently to permit the use of torpedoes as well as his 6 in. guns. The position at 8 a.m. was that the *Graf Spee* was in flight to westward, with the *Ajax* on her port quarter and the *Achilles* on her starboard quarter, both British ships being about 15 miles distant from their quarry. The shadowing continued all day, the only incidents being at 10.5 a.m., when the raider fired two three-gun salvos from her after 11 in. turret at the *Achilles*, but without hitting, and at about 11 a.m. when a British merchant ship the s.s. *Shakespeare*, appeared to have been stopped by the raider. A decoy-message "*Ajax* and *Achilles* from *Admiral Graf Spee*—Please pick up lifeboats of English steamer", failed of its purpose, the *Ajax* observing that the *Shakespeare's* lifeboats were hoisted. On being asked by the cruiser if she was in need of assistance the merchantman replied that she was quite all right.

At 8.48 p.m. the *Graf Spee* was clearly silhouetted against the afterglow, and was closed by the *Achilles* both ships exchanging salvos. All three were now nearing Montevideo, and at intervals the raider fired her 11 in. guns with the object of keeping her pursuers at a distance.

At ten minutes past midnight the *Graf Spee* anchored in Montevideo roads.

The losses sustained were 84 on board the *Exeter* as already stated, the ship being hit nearly 50 times. Of the light cruisers the *Ajax* lost five marines and two seamen killed, and 13 others wounded, besides having two of her four 6 in. gun-turrets knocked out and

ADMIRAL HIPPER

other damage. The *Achilles* had four seamen killed and two seamen and one marine wounded, being the luckiest of all four combatants. The total British losses were 111 officers and men, of whom 72 were killed and 39 wounded. The Germans lost 36 killed and 40 wounded, all of whom were ratings.

The next phase of the struggle was in the diplomatic field. The *Graf Spee* having dropped anchor in the neutral Uruguayan port of Montevideo, her captain asked to be allowed to effect the necessary repairs. A request was forwarded to the Uruguayan Minister of Foreign Affairs from the German minister, Herr Otto Langmann, requesting that the ship be allowed 15 days for this purpose. The British minister, Mr. Eugen Millington Drake, requested that the ship be required to leave after a stay of 24 hours, while the French minister, Monsieur F. Gentil, requested on the following day that she be interned until the end of the war. In reply to these divergent notes the Uruguayan government appointed a small committee of experts to examine the damaged warship. The report of this committee was to the effect that the ship's injuries were not of a character to impair her seaworthiness, and that a long stay would be employed solely for the purpose of increasing the ship's fighting efficiency, which was in no way related to her fitness for sea. The Uruguayan government thereupon notified the German authorities that it would consent to a stay of 72 hours, which it considered to be ample time, in view of all the circumstances.

Meanwhile great activity had been noticeable on the pocket-battleship. She had been repairing at top speed and it was anticipated that she would leave on the night of Saturday, December 16th, or on the Sunday morning. On Saturday afternoon, however, there were indications that there was some disturbance on board, and later, after many appeals to them by their officers, it became known that the crew refused to put to sea. At about 7.30 p.m. Capt. Langsdorff made a final appeal to the men but they were very rowdy and the parade was dismissed, the captain going ashore to consult the German minister.

On the following Sunday goods which had been taken on board from the German merchantman *Tacoma* were transferred back again together with 900 of the crew of the pocket-battleship. Unknown to everyone except a few senior officers, Capt. Langsdorff, who had cabled the state of affairs to Herr Hitler, had received orders to scuttle the vessel rather than allow her to be interned. At 6.15 p.m. the *Graf Spee* left Montevideo harbour, having first put her wounded ashore. She was followed about half-an-hour later by the *Tacoma*, to which the remainder of the crew were transferred, leaving only a few men on board. At 8 p.m., the *Admiral Graf Spee* being then at anchor about four miles S. of Punta Yeguas, there was a terrific explosion and the ship gradually sank in a great cloud of smoke and flame.

There yet remains to be recounted the final act of Capt. Langsdorff. This officer felt the ignominy of his position very keenly. Having seen to the proper disposal of his officers and men, and to the destruction of his ship, he retired to his hotel and, wrapped in the Imperial Naval ensign, committed suicide by shooting himself. The manner of his end was deeply significant, as was also his avoidance of giving the Nazi salute, he being always careful to give the naval salute. Whatever may be said of others in this sorry affair, there is no doubt but that he endeavoured to uphold the same high naval traditions so jealously guarded by the famous admiral after whom his ill-fated vessel was named.

ADMIRAL HIPPER

German Navy, heavy cruiser; 1939; Blohm & Voss; 14,475 tons; 639-5 x 69-5 x 75-5; 32 knots; turbine engines; eight 8 in. guns, twelve 4-1 in., twelve 37 mm. A.A., 12 T.T., 3 aircraft. The German heavy cruiser *Admiral Hipper*, though classed as a "Washington Treaty", 10,000 ton cruiser, was considerably heavier than those in other navies, and carried a larger small-gun and torpedo-tube armament. When fully loaded the vessel displaced 18,500 tons, and was faster and more stoutly protected than foreign ships of the same class.

Before the outbreak of the Second World War the German Admiralty had made careful and extensive preparations for war against Allied shipping on the high seas by surface raiders. These raiders were pocket-battleships, battle-cruisers, heavy cruisers and a number of fast merchantmen armed with 5 • 9 in. guns and torpedo tubes, and acting as auxiliary cruisers. It was intended that these vessels should operate on the distant oceans beyond the scope of the

U-boats, which would cruise nearer to land and at distances which would enable them to return to port for repairs or to replenish their quota of torpedoes without too much difficulty. For the surface raiders a world-wide system of supply-ships was organised, and ports of call in friendly neutral countries were designated.

As a commerce-raider the *Hipper* met with only moderate success. She broke out from the North Sea and cruised in the Atlantic for four weeks, returning to Brest on December 27th, 1940, having captured one ship of 6,078 tons. Her next cruise was shorter but more profitable. Leaving Brest on February 1st, 1941, she took up a position between the Azores and the coast of Portugal, where she might hope to intercept some lightly-escorted convoys. On February 11th she captured one merchantman, but the next day had the good fortune to meet Convoy S.L.S. 64, which consisted of 19 vessels proceeding without a naval escort. Of these she sank seven, totalling 32,806 tons. Her outstanding defect, however, was her low fuel endurance and after her chase of the convoy she was obliged to put back to Brest, which she reached on the 14th, having been at sea for just a fortnight.

This raid was the *Nipper's* peak achievement. Aided by thick weather she left Brest and reached Kiel on March 28th. The German Admiralty did not use her as a commerce-raider again, and she served for the rest of the war in or around her home waters. On April 9th, 1945, when lying in Kiel harbour, she was attacked by British bombers and was so badly damaged that she had to be scuttled.

ADMIRAL KARPFANGER

Hamburg-Amerika Line; 1908; Rickmers; 2,85'3 tons; 278-2 x 44-8 x 26-5.

The training-ship *Admiral Karpfanger*, Capt. Walker, commenced her career in 1908 as the Belgian training-ship *U'Avenir*, a duty which she performed for over 20 years. She was a handsome four-masted steel barque, and her tall and graceful masts and sails attracted the attention of shiplovers wherever she went. In the 1930s she was sold to Gustaf Erikson, the Finnish shipowner who possessed a small fleet of sailing ships. Later, when the Hamburg-Amerika Co. was seeking a suitable vessel in which to train officer-cadets, she was acquired by that Line and reconditioned throughout, and in 1937 she put to sea under the German flag as the *Admiral Karpfanger*.

Her first voyage under her new name was to Australia, which she reached without incident. On February 8th, 1938, she left Port Germein, South Australia, on her homeward voyage with a cargo of 42,549 bags of wheat. She carried a crew of 27 with 33 cadets. So far as is known she was a fine well-found ship, with up-to-date equipment and fresh from dockyard hands. She had radio and was required by her owners to send fortnightly reports on her voyage home. Everything was as it should be, except that the radio generator was known to be faulty, and this was reported to Hamburg before the vessel sailed.

On March 12th, when 32 days out, she acknowledged a radio signal, but after that date nothing was ever heard from her. No signals of distress were picked up at sea or by shore stations. Around this time the m.y. *Durham* reported much ice in the Cape Horn area where the training-ship might be reckoned to be, yet of the several vessels in the vicinity none sighted her.

At the request of the owners the Argentine survey ship *Bahia Blanca* searched the adjacent coast and islands, but with no result. Some considerable time after the search ended wreckage which undoubtedly came from the *Admiral Karpfanger* was discovered on the shore at Windbound Bay, Navarin Island, near Cape Horn.

It is not possible to give any definite opinion as to the cause of the loss, but the most reasonable assumption is that the vessel struck an iceberg, probably at night, and foundered very suddenly.

ADMIRAL MOORSOM

London & North Western Railway Co.; 1860; Randolph Elder & Co.; 800 tons; 219x30-1x15; 400n.h.p.; 13 knots; engines, 2 cylinders 73 in. by 6 ft. stroke.

The L. and N.W. Railway Co.'s steamship, *Admiral Moorsom*, left Holyhead for Dublin on January 15th, 1885, with 35 passengers and crew all told under Capt. Weeks. The vessel was carrying as cargo a quantity of livestock. In the Irish Sea shortly after 8 p.m. she met another vessel and altered course to keep clear, but on passing the stern of this steamship was run down by the American

ship, *Santa Clara*. The port paddle-box, masts and funnel of the *Admiral Moorsom* were carried away and the ship completely disabled, having been struck on the port fore sponson and all port boats smashed. In the confusion the captain either fell or jumped overboard and was lost. The *Santa Clara* picked up one boat containing 14 men and conveyed them to Holyhead. Another boat with 11 persons was picked up by the Norwegian ship *Stanley*.

The *Admiral Moorsom* was subsequently discovered off the coast of Arklow with five people on board. These were taken off in safety, but the ship could not be saved and a short while afterwards she foundered.

The total number drowned was five, including Capt. Weeks.

ADMIRAL NAKHIMOFF

Russian Navy, armoured cruiser; 1888; Baltic Works; 8,524 tons; 330x61x25-7; 7,768 i.h.p.; 16-6 knots; triple-expansion engines; eight 8 in. guns, ten 6 in., two 2 in., twelve 3 pdr., 5 T.T. The Russian armoured cruiser, *Admiral Nakhimoff*, built in 1888 was a unit of the 2nd Division of the Baltic Fleet, under Rear-Admiral Folkersham. The other vessels of the division were the battleships *Ossliabya*, flagship, *Sissoi Veliki* and *Navarin*. The flagship was quite modern, but the two latter ships had each seen ten years' service. It was, however, next to the 1st Division, the best which the Russian navy could produce at that time, and in the battle of Tsu-Shima, which took place on May 27th, 1905, it was totally destroyed.

Throughout the fighting on the 27th the *Admiral Nakhimoff* maintained her position in the line and at nightfall was in company with the 3rd Division, under Rear-Admiral Nebogatoff, which was still intact. The ship was badly damaged and her speed greatly impaired, so that when the admiral signalled for 12 knots she could not comply and, with the *Sissoi Veliki* and *Navarin*, fell out of station and steered her own course. During the night she encountered a destroyer which, in the darkness, she assumed to be Russian. It was not until a torpedo had been discharged and had found its mark, that the mistake was discovered. The torpedo blew a large hole in the *Admiral Nakhimoff's* starboard side forward, causing her to be down by the bows. Three large collision mats were placed over the hole and the ship proceeded on her way. Several other attacks were made upon her but they were beaten off.

At daybreak the vessel was close to the island of Tsu-Shima, for which she steamed in the hope of running aground. Later in the morning she began to sink, two Japanese ships, the destroyer *Shiranui* and the auxiliary cruiser *Sado Maru*, arriving in time to rescue the crew.

The captain of the *Admiral Nakhimoff*, after ordering the sea-valves to be opened to hasten the end, went down with her, but was picked up unconscious some seven hours later by Japanese fishermen.

The full story of the battle of Tsu-Shima is told under the *Kniaz Suvaroff*, fleet flagship, which was among those lost.

ADMIRAL SCHEER

German Navy, pocket-battleship; 1934; Wilhelmshaven; 10,000 tons; 609x67-5x21; 54,000h.p.; 26 knots; diesel engines; six 11 in. guns, eight 5-9 in., six 4•1 in., eight 3pdr. A.A., 10 m.g., 8 T.T., 2 aircraft.

The German pocket-battleship *Admiral Scheer* acted as a commerce raider at the beginning of the Second World War. She left Germany on October 23rd, 1940, and cruised in the N. and S. Atlantic and the Indian Ocean. On November 5th she intercepted Convoy HX 84 homeward-bound from Halifax, N.S. The British Admiralty was extremely short of vessels suitable for escorting duties at the time and could only provide one, the *Jervis Bay* (which see) for a convoy of 37 merchantmen. The escorting ship put up a most gallant resistance and only five ships of the convoy were sunk.

On April 1st, 1941, the *Scheer* reached Kiel, having destroyed 16 Allied ships of 99,059 tons in a little over five months. She did not repeat this performance, and was held in hand by the German Admiralty as a threat to Allied commerce, but was never used effectively after her first cruise.

In the last weeks of the war, April-May, 1945, the *Scheer*, lying in Kiel harbour, became a target for heavy bombing attacks, and was ultimately sunk.

For a fuller description of a pocket-battleship, see *Admiral Graf Spee*.

ADMIRAL USHAKOFF

Russian Navy, coast defence battleship; 1894; Baltic Works; 4,126 tons; 265x52-5x17; 5,769i.h.p.; 16-1 knots; triple-expansion engines; four 9-4 in. guns, four 4-7 in., two 2 in., six 3pdr., 4 T.T.

The old coast defence battleship, *Admiral Ushakoff*, was one of a trio under Rear-Admiral Nebogatoff which had been sent to the Far East to reinforce the Baltic Fleet. The ships were totally unsuited to the task assigned to them, the squadron being fitted out against the wishes of Admiral Rojdestvensky, the commander-in-chief. At the battle of Tsu-Shima, on May 27th, 1905, the vessels escaped serious damage. At nightfall the *Admiral Ushakoff* was in position with the remnants of the Russian heavy ships, but was not capable of more than nine knots, consequently when the admiral signalled to increase speed to 12 knots she failed to keep station. Throughout the night, and until the afternoon of the 28th, she managed to avoid contact with enemy units and to make her way toward Vladivostok. At about 3 p.m. the *Admiral Ushakoff* was sighted by the Japanese cruisers *Iwate* and *Yakumo*, the former approaching her and signalling an invitation to surrender. Capt. Miklukha, her commander, now became aware that four of the ships under Rear-Admiral Nebogatoff had surrendered. These were the *Imperator Nikolai I* (flagship), the battleship *Orel* and the two coast defence vessels, *Apraxin* and *Senyavin*. In face of this stunning news Capt. Miklukha called a council of war of his officers at which it was decided to fight and sink the ship, sooner than surrender. The *Admiral Ushakoff* therefore replied to the summons by a shell from one of her 9-4 in. guns and the fight began.

The old guns of the coast defence ship's main armament were slow in loading, while the 4•7 in. guns were easily outranged by the Japanese. In less than an hour the ship was a battered wreck, with a heavy list to starboard and her guns no longer able to train on the target. She had been hit below the waterline several times and some of her ammunition had exploded. Despite these calamities there was no thought of surrender. The Japanese fire continued with great intensity and it was decided that the time had come to open the sea-valves and sink the ship. At about 6 p.m. the *Admiral Ushakoff* turned keel upwards and went down, taking with her the gallant Capt. Miklukha and 82 officers and men. The Japanese treated the survivors with marked respect in recognition of their devoted bravery. Considering the terrible battering their ship had received the number of the saved was remarkably high, being 339 all told.

The full story of the battle of Tsu-Shima is told under the *Kniaz Suvaroff*, fleet flagship, which was among those lost.

ADMIRAL WILEY

American Trading & Shipping Co. (John N. Raymond); 1920; Submarine Boat Corp.; 3,514 tons; 324x46-2x25; 386 n.h.p.; turbine engines.

The American steamship *Admiral Wiley* was wrecked on June 13th, 1940, on Kitava Island between Port Moresby and Salamaua.

ADOLF BRATT

Angfartygs A/B Adolf; 1924; Howaldtswerke; 1,323 tons; 263-1x37-1x14; 128 n.h.p.; triple-expansion engines. The Swedish steamship *Adolf Bratt* struck a mine and sank on

December 20th, 1939, off Terschelling.

ADOLPH WOERMANN

Woermann Linie, A.G.; 1922; Blohm & Voss; 8,577 tons; 433-5x58-2x37-4; turbine engines.

The German passenger ship *Adolph Woermann* was scuttled to avoid capture on November 22nd, 1939, in the S. Atlantic. She was trying to return to Hamburg from Mombasa where she had taken on a number of passengers.

ADONIS

Koninkl. Nederl. Stoomb. Maats.; 1905; Rijkee & Co.; 1,704 tons; 251-1x34-6x18-2; 156 n.h.p.; triple-expansion engines.

The Dutch steamship *Adonis* capsized and sank on August 3rd, 1929, about eight miles off Cap Ferrat. The loss was attributed to the grain cargo shifting.

ADOUR

ADOUR

Dampsk.-AISAda; 1904; *Short Bros.*; 1940 tons; 280-2x41-1 X18-3; 175 n.h.p.; triple-expansion engines. The Norwegian steamship *Adour* was torpedoed and sunk by a German submarine on December 9th, 1917, in the Mediterranean.

ADOUR

Cie. Nationale Beige de Transports Maritime; 1898; *Akt. Ges. "Neptun"*; 1,105 tons; 233-6x35-1x14-2; 92n.h.p.; triple-expansion engines.

The Belgian ship *Adour* struck on some rocks and sank at lies de Glenan near Brest on December 8th, 1939.

ADRIA I

Sicilia Societa di Nav.; 1877; *Fratelli Orlando*; 1,809 tons; 300-2x33-1x25-7; 317n.h.p.; triple-expansion engines. The Italian steamship *Adrialw&s* torpedoed and sunk by a German submarine on July 19th, 1918, in the Mediterranean.

ADRIANA

1909; *FlensburgerSchiffsb.Ges.*; 997tons; 226-3x33-3x15-2; 111 n.h.p.; triple-expansion engines.

The German steamship *Adriana* ex *Hermia* struck a mine and sank on December 29th, 1940, in the River Elbe.

ADRIAS

Epirotiki Steamship Nav. Co.; 1893; *Harland & Wolff*; 2,082 tons; 311-3x38-3x15-1; triple-expansion engines. The Greek steamship *Adrias*, carrying 700 passengers, was wrecked in heavy weather on October 6th, 1951, on the E. end of Falconera Island.

ADRIATIC

W. H. Cockerline & Co.; 1904; *Irvine's S.B. & D.D. Co.*; 3,028 tons; 325x47-1x13-7; 227 n.h.p.; triple-expansion engines.

Employed as an Admiralty collier the *Adriatic* left Newport, Mon. on October 21st, 1916, for Marseilles with a cargo of coal, but was not seen again.

ADRIATICO

Adriatico Societa Anonima di Navigazione; 1931; *Cantieri RiunitidelV Adriatico*; 1 £76 tons; 267x40x15-5; 3,300i.h.p.; 14 knots; oil engines.

The Italian passenger and cargo vessel *Adriatico* was carrying artillery, stores and ammunition to the Italian forces in Libya when she was sunk by a British squadron led by Capt W. G. Agnew in the light cruiser *Aurora* on December 1st, 1941. A few survivors were picked up by the British. For further details see *Alvise da Mosto*.

ADUATIEK

Antwerpsche Zeevaart Maats.; 1890; *S. P. Austin & Sons*; 2,221 tons; 284x39-1x18-2; 208n.h.p.; triple-expansion engines.

The Belgian steamship *Aduatiek* struck a mine and sank on February 12th, 1916, in the North Sea.

AEAS

Pateras Bros.; 1915; *Irvine's S.B. & D.D. Co.*; 4,729 tons; 385-1x52x27; 320 n.h.p.; triple-expansion engines. The Greek steamship *Aeas* was torpedoed and sunk by a submarine on September 7th, 1942, in the mouth of the River St. Lawrence.

AEGEON

AegeonS.S.Co.; 1919; *Napier & Miller*; 5,285 tons; 400-1x 52-3x28-5; 360n.h.p.; triple-expansion engines. The Greek ship *Aegeon* was torpedoed and sunk in April, 1941, S. of Freetown. She was on a voyage from Buenos Aires. Thirty-three survivors were landed.

AEGER

Norwegian Navy, destroyer; 1936; *Horten Dockyard*; 550 tons; 243-7x25-5x9; 12,500 Lh.p.; 30 knots; turbine engines; three 4 in. guns, one 40 mm., 2 m.g., 4 D.C.T., 4 T.T. The small

Norwegian destroyer *Aeger* was the sole unit of her country's navy available for the defence of Stavanger when the German invasion forces attacked the port on April 9th, 1940. The

little vessel put up a strenuous resistance and sank one large German supply ship loaded with anti-aircraft guns. She then engaged a force of enemy bombers but was unable to beat them off and they ultimately sank her. The *Aeger's* normal complement was 72.

AEGEUS

Pateras Bros.; 1917; *J. Priestman & Co.*; 3,792 tons; 350X 50-9x23-5; 351 n.h.p.; triple-expansion engines. The Greek ship *Aegeus* was in collision with the *Nashaba* and sank on May 9th, 1937, about 32 miles S.E. of Bornholm.

AEGEUS

Pateras Bros.; 1920; *A. McMillan & Son*; 4,538 tons; 400-4 X 52-5x24-7; 517n.h.p.; triple-expansion engines. The Greek steamship *Aegeus*, left Trinidad on October 9th, 1942, for Saldanha Bay and Durban, and was never heard of again.

AEGESIA

Norddeutscher Lloyd; 1922; *Akt. Ges. "Weser"*; 2,447 tons; 315'8x46-1x18-8; 228 n.h.p.; triple-expansion engines. The German steamship *Aegina* was sunk by British warships on April 16th, 1941, off the Kerkenna Islands, Tunisia.

AEGIR

Seereederi"Friggera" A.G.; 1923; *Reiherst.Schiffsw.*; 4,500 tons; 351-8x50-3x27-7; 334 n.h.p.; quadruple-expansion engines. The German ship *Aegir* struck a mine and sank on May 4th, 1943, off Juist.

AELYBRYN

Ambrose, Davies & Matthews; 1938; *Sir J. Laing & Sons*; 4,986 tons; 412-5x57-2x24; 353 n.h.p.; 10 knots; triple-expansion engines.

The steamship *Aelybryn*, Capt. H. W. Brockwell, was off Natal, South Africa, on March 11th, 1943, when she was torpedoed and sunk by a submarine. Six men were killed. Capt. Brockwell was among the survivors. The *Aelybryn* was not in convoy at the time of the attack.

AENEAS

Alfred Holt & Co.; 1910; *Workman Clark*; 10,058 tons; 493 X 60x29; 640 n.h.p.; 14 knots; triple-expansion engines. The liner *Aeneas*, Capt. D. L. C. Evans, was in convoy 21 miles S.E. of Start Point on July 2nd, 1940, when she was attacked by German bombers and finally sank on July 4th. As the vessel was the largest in the convoy she received particular attention from the enemy, one bomb passing through the port side and another going down the after cross-bunker trunkway and blowing out the starboard side. This bomb, which exploded deep within the ship, is assumed to have killed nearly all of the engineers and stokers on duty. The number who lost their lives was 19, all crew. Capt. Evans was among the survivors.

AENOS

"Zephyros"S.S. Co.; 1910; *Bartram & Sons*; 3,554 tons; 390-5 X51x21-3; 434n.h.p.; triple-expansion engines. The Greek steamship *Aenos* was sunk by gunfire from a submarine on October 17th, 1940, in the N. Atlantic.

AEON

Howard Smith Co.; 1905; *Northumberland S.B. Co.*; 4,221 tons; 360-4x48x20-2; 373 n.h.p.; triple-expansion engines. The Australian steamship *Aeon* was wrecked on July 18th, 1908, on Christmas Island, Oceania, while on a voyage from San Francisco to Sydney.

AFFONSO PENNA

Lloyd Brasileiro; 1910; *Workman, Clark & Co.*; 3,540 tons; 340-3x45-1x24-8; 534n.h.p.; triple-expansion engines. In June, 1942, the German Admiralty decided to launch a U-boat campaign against Brazilian shipping, though Brazil was then still neutral. In July a flotilla of ten submarines left Vichy French ports for the Brazilian coast. These ten boats sank thousands of tons of

shipping during the ensuing months, and their depredations eventually brought Brazil into the Second World War on the side of the Allies. One of the more tragic disasters of the German campaign was the loss of the *Affonso Penna*.

This old passenger and cargo ship was off the coast of Bahia on March 2nd, 1943, when she was torpedoed by a U-boat. She sank quite quickly, taking with her 131 passengers and crew.

AFGHANISTAN

Strick Line Ltd.; 1897; *W. Gray & Co. Ltd.*; 2,753 tons; 306-3X 43-2x18-3; 240n.h.p.; triple-expansion engines. The British steamship *Afghanistan* went aground 40 miles N. of Suakim in January, 1904, and was totally wrecked. She was on a voyage from the Clyde to Karachi.

AFGHANISTAN

British & Eastern Shipping Co.; 1888; *Richardson, Duck & Co.*; 2,286 tons; 291-2x42-1x24-3.

The iron four-masted barque, *Afghanistan*, with a crew of 32 all told under Capt. J. Craigie, was bound from Hamburg to San Diego. On the night of June 3rd, 1905, the ship encountered dense fog when off Dungeness and dropped anchor and sounded her fog-bell. At about the same time the Channel Fleet, steaming at 12 knots in two columns six cables apart, ran into the fog. Before speed could be reduced with safety the battleship *Caesar*, flagship of the second-in-command, collided with the *Afghanistan* as she lay at anchor and sank her immediately. There was just time for the battleship to reverse her engines and to alter course, so that she struck the sailing ship a glancing blow. She also signalled to the fleet on her siren and searchlights were turned on and boats lowered.

The loss of life amounted to 18, including Capt. Craigie. The survivors were picked up by the *Caesar* and *Dido* and numbered 14 persons, including the first officer. The position of the ships when the collision occurred was 121 miles S. by E. of Dungeness. The crew of the *Afghanistan* was chiefly composed of Dutch and Scandinavian seamen.

At the same time the battleship *Hannibal* fouled the German schooner *Emma Louise*, and the battleships *Triumph* and *Swiftsure* came into collision, the latter sustaining slight damage. This was the worst series of accidents to a British squadron for many years.

AFON DULAIS

AfonLliediS.S.Co.; 1919; *Dundee S.B. Co.*; 988 tons; 208 X 33-1x13-1; 152n.h.p.; triple-expansion engines. The British coaster *Afon Dulais* struck a mine and sank on June 20th, 1942, while on a voyage from Seaham to Poole.

AFON TOWY

AfonLliediS.S.Co.; 1919; *DiblesLtd.*; 684 tons; 178x29x 11-3; 82rh.p.; triple-expansion engines. The British ship *Afon Towy* went ashore on Haisbro' Sand on August 6th, 1941, and broke her back.

AFOUNDRIA

Waterman S.S. Corpn.; 1919; *American International S.B. Corpn.*; 5,010 tons; 390x54-2x27-8; turbine engines. The American ship *Afoundria* was torpedoed and sunk by a German submarine on May 5th, 1942, in the Gulf of Mexico.

AFRIC

White Star Line; 1899; *Harland & Wolff*; 11,999 tons; 550 -2 X 63-3x39-9; 4,800i.h.p.; 13-5 knots; quadruple-expansion engines. The liner *Afric* was torpedoed and sunk by a submarine in the English Channel, 12 miles S.S.W. of the Eddystone, on February 12th, 1917. Five were killed by the explosion and 17 were drowned. There were 145 survivors, including the captain.

AFRIC STAR

Blue Star Line; 1926; *W. Palmer & Co.*; 11,900 tons; 475-8 X 67-3 x45-2; 1,581 n.h.p.; 15 knots; turbine engines. The liner *Afric Star*, Capt. C. R. Cooper, was intercepted and sunk by an enemy raider on January 29th, 1941, about 1,000 miles due W. of Monrovia, Liberia. One member of the crew was killed.

AFRICA MARU

Osaka ShosenK.K.; 1918; *Mitsubishi Zosen K.K.*; 9,476 tons; 475 X 61x40-7; 993 n.h.p.; triple-expansion engines. The steamship *Africa Mam* was torpedoed and sunk by the U.S. submarine *Finback* on October 20th, 1942, in the Formosa Strait.

AFRICA SHELL

Shell Co. of East Africa; 1939; *G. Brown & Co.*; 706 tons; 184-8x29-6x11-5; 162n.h.p.; oil engines. The British tanker *Africa Shell* was sunk by the *Admiral Graf Spee* on November 15th, 1939, six miles off Zabora Point.

AFRICAN STAR

American South African Line Inc.; 1942; *Federal S.B. & D.D. Co.*; 6,507 tons; 439x63-1x27-5; turbine engines. The American steamship *African Star* was torpedoed and sunk in July, 1943, between Rio de Janeiro and New York. A lifeboat was recovered.

AFRICANDER

United States Maritime Commission; 1921; *Cantiere San Rocco*; 5,441 tons; 404-1x53-9x29-5; 465 n.h.p.; triple-expansion engines.

The Panamanian steamship *Africander* was sunk by a torpedo from an aircraft off the Lofoten Islands on the 13th September, 1942.

AFRICANIC

Rederiaktieb. Transatlantic; 1913; *J. Priestman & Co.*; 3,921 tons; 346-5x50-8x24-4; 319n.h.p.; triple-expansion engines. The Swedish steamship *Africanic* was sunk in a collision on June 5th, 1925, near Cape Torinana.

AFRIDI

British Navy, destroyer; 1937; *Vickers-Armstrong*; 1,870 tons; 355-5x36-5x9; 44,000s.h.p.; 36-5 knots; turbine engines; 3-drum boilers; eight 4• 7 in. guns, 8 smaller, 4 T.T. The destroyer *Afridi*, Capt. P. L. Vian, D.S.O., together with many other Allied cruisers and destroyers was engaged in escorting convoys of troops withdrawn from Norway on May 1st, 1940. The Germans made the most persistent attacks on the ships with dive-bombers, the escort suffering severely. The *Afridi* sank on the 3rd as a result of bomb hits.

The French destroyer *Bison*, 2,436 tons, and the Polish destroyer *Grom*, 2,144 tons were also sunk in the fighting in these waters.

AFRIKA

"Atlas" Reederei Akt. Ges.; 1915; *Akt. Ges. "Weser"*; 8,285 tons; 479x62-2x33; 750 n.h.p.; quadruple-expansion engines. The German steamship *Afrika* sprang a leak during heavy weather on December 21st, 1936, and sank off Halten Banks.

AFRIKA

East Asiatic Co.; 1920; *Burmeister & Wain*; 8,597 tons; 446X 60x39; 990n.h.p.; 12knots; oilengines.

The Danish liner *Afrika*, Capt. E. Broholm Jensen, was formerly of the East Asiatic Company's fleet. After the German occupation of Denmark in April, 1940, the vessel sailed under the British flag. On February 7th, 1943, when in convoy in the North Atlantic she was torpedoed and sunk by a German submarine. Of those on board 24 men, including Capt. Jensen, were killed.

AFRIQUE

Cie. des Bateaux a Vap. du Nord; 1911; *Ateliers et Chantiers de France*; 2,457tons; 295-1x41-4x20; 223n.h.p.; triple-expansion engines.

The French steamship *Afrique* was torpedoed and sunk by a German submarine on June 12th, 1918, in the North Sea.

AFRIQUE

Chargeurs Reunis; 1907; *Swan, Hunter & Wigham Richardson*; 5,404 tons; 408-5x48-3x27-7; 3,000i.h.p.; 11 knots; triple-expansion engines. The French liner *Afrique* was bound for West Africa when she

AGAMEMNON

developed engine trouble in the Bay of Biscay on the night of Saturday, January 10th, 1920. Wireless calls were sent out in response to which the *Ceylan*, also of the Chargeurs-Reunis, came to the rescue. There was a strong northerly wind and a boisterous sea which swept the *Afrique* toward the shallow water covering the Roche-Bonne Reefs about 50 miles from La Rochelle. Unfortunately the seas would not permit of the *Ceylon* taking the disabled steamship in tow and she could only stand by in the hope of rendering assistance when the weather moderated.

On Sunday evening, the 11th, the steamship *Lapland* came on the scene, as did the Belgian liner *Anversville*. None of these vessels could give any aid and at about 3 o'clock on the morning of the 12th the wireless messages from the *Afrique* ceased and after striking on the reef she gradually filled and sank.

The total number on board the liner, which was commanded by Capt. Le Du, was 585, of whom 105 were first-class passengers, 69 second-class, 70 third-class, 214 steerage (of whom 192 were Senegalese Tirailleurs returning to West Africa) and 127 crew. The survivors totalled 32, of whom three were third-class passengers and the remainder soldiers and crew, the number lost, therefore, amounted to 553, the largest in any French maritime disaster since the loss of *La Bourgoigne* in 1898.

AGAMEMNON

Koninkl. Nederl. Stoomb. Maats. N.V.; 1914; Dunlop, Bremner & Co.; 1,930 tons; 295-6x43-2x17-2; 218n.h.p.; triple-expansion engines.

The Dutch ship *Agamemnon* was bombed and sunk by German aircraft on November 8th, 1940, in the North Sea.

AGANO

Japanese Navy, cruiser; 1941; Japan; 6,000 tons; 560 X49-5 x —; 34 knots; turbine engines; six 6-1 in. guns, several 47 mm., 2 aircraft.

The new Japanese cruiser *Agano* was engaged in the defence of the island of Truk in the Carolines Group when the U.S. forces under Vice-Admiral R. A. Spruance delivered an attack on it in mid-February, 1944. The *Agano* was torpedoed and sunk by the U.S. submarine *Skate* north of Truk on February 16th. Other Japanese ships sunk in this operation were the cruiser *Naka*, 5,195 tons, the training cruiser *Katori*, 5,800 tons, and the destroyers *Fumitsuki*, 1,315 tons, *Maikaze*, 2,200 tons, *Oite*, 1,270 tons, and *Tachikaze*, 1,215 tons. All of these were sunk by bombs from carrier-borne aircraft, with the exception of the *Katori* which was disabled by bombing and was subsequently sunk by gunfire of a U.S. cruiser squadron.

The air fighting was exceedingly heavy, planes from the carriers destroying 127 Japanese aircraft in the air and 74 on the ground. In addition to the warships about 12 supply and auxiliary ships were sunk by bombing.

AGAPENOR

Alfred Holt & Co.; 1914; Scotts' Shipbuilding Co.; 6,148 tons; 455 x 56 X 33; 13-5 knots; triple-expansion engines. The liner *Agapenor*, Capt. P. W. Savery, was torpedoed and sunk by a submarine on October 10th, 1942, about 200 miles S.W. of Freetown. Seven members of the crew were killed. Capt. Savery, who commanded the *Helenus* when she was torpedoed in March of the same year, was among the survivors.

AGATA

AlfioNapoli; 1901; Craig, Taylor & Co.; 2,282 tons; 299x43-3 X18 • 7; 216 n.h.p.; triple-expansion engines. The Italian ship *Agata* was bombed and sunk by Allied aircraft on May 14th, 1943, off Olbia.

AGATE

W.Robertson; 1917; Scott & Sons; 824 tons; 199 > 4x30-1x 11-9; 139 n.h.p.; triple-expansion engines. The British steamship *Agate* was wrecked on December 30th, 1940, four miles N. of Oversay Lighthouse, Islay.

AGATHE

German Government; 1907; Wood, Skinner & Co.; 1,259 tons; 234'4x34-1x14-3; 141 n.h.p.; triple-expansion engines. The German steamship *Agathe*, formerly the Italian *Aprilia*, was bombed and sunk by British aircraft on July 2nd, 1944, W. of Rhodes.

AGATOCLE

Soc. di Nav. a Vap. Agatocle; 1888; Richardson Duck & Co.; 2,245 tons; 277x37-4x18-6; 202n.h.p.; triple-expansion engines.

The Italian ship *Agatocle* struck a mine and sank on October 19th, 1923, near Kara Burnu in the Gulf of Ismidt.

AGHIA PARASKEVI

S. Contsondantis & Papanastassopulo; 1890; J. L. Thompson & Sons; 2,795 tons; 316x40-5x20-8; 265n.h.p.; triple-expansion engines.

The Greek steamship *Aghia Paraskevi* was torpedoed and sunk by a German submarine on June 24th, 1917, in the Bay of Biscay.

AGHIA VARVARA

L. M. Logothetis & M. Fakis; 1913; Russell & Co.; 4,572 tons; 385x52x26-5; 361 n.h.p.; triple-expansion engines. The Greek steamship *Aghia Varvara* was wrecked on June 22nd, 1938, off Ushant.

AGHIOS GEORGIOS

A. G. Vlassopoulos; 1912; Earless Co.; 3,283 tons; 352x49-6 x22; 307 n.h.p.; triple-expansion engines. The Greek steamship *Aghios Georgios* struck a mine and sank on February 4th, 1941, in the Suez Canal.

AGHIOS MARKOS

G. Trilivas; 1919; W. Gray & Co.; 4,514 tons; 376x51-9X 26-5; 517 n.h.p.; triple-expansion engines.

The Greek ship *Aghios Markos* was bombed and sunk on April 25th, 1941, in the port of Piraeus.

AGHIOS SPYRIDON

J.Roussos&Sons; 1878; W. Gray & Co.; 1,618 tons; 258-6 X 34-7x19-3; 175 n.h.p.; compound engines. The Greek steamship *Aghios Spyridon* was torpedoed and sunk by a German submarine on February 12th, 1917, in the Bristol Channel.

AGINCOURT

Agincourt S.S. Co.; 1904; Northumberland S.B. Co.; 4,232 tons; 360-0x48-0x20-2; 372n.h.p.; triple-expansion engines.

The British steamship *Agincourt* was wrecked near Pelew Island in March, 1906, while on a voyage from Newcastle, N.S.W., to Hong Kong with a cargo of coal.

AGIOS GEORGIOS IV

N. G. Nicolaou; 1938; Bar tram & Sons; 4,847 tons; 417-9 X 56-6x24-8; 365 n.h.p.; compound engines and L.P. turbine. The Greek ship *Agios Georgios IV* was sunk by gunfire from a submarine between Aden and Table Bay on June 8th, 1942.

AGNE

Angf. A/B Svithiod; 1894; A. McMillan & Sons; 1,010 tons; 222x31-8x14-4; 127n.h.p.; triple-expansion engines. The Swedish steamship *Agne* was torpedoed and sunk by a German submarine on August 9th, 1918, in the North Sea.

AGNES

Rederi-AjB Agnes; 1883; E. Withy & Co.; 1,334 tons; 245-5x 34x17-3; 156 n.h.p.; compound engines.

The Swedish steamship *Agnes* was torpedoed and sunk by a German submarine on June 13th, 1918, in the North Sea.

AGNES

A/S Agnes; 1919; Wed.A.vanDuyvendijk; 1,311 tons; 239 -8 X 36-6x15-8; 127n.h.p.; triple-expansion engines.

The Norwegian ship *Agnes* struck a mine and sank on July 2nd, 1946, off Haiphong.

IAGNES ELLEN

John S. Monks Ltd.; 1908; Scott & Sons; 293 tons; 130-4x23' 1x10-1; 77r.h.p.; compound engines.

The British coaster *Agnes Ellen*, Capt. G. Robertson, left Holyhead on February 9th, 1940, for Workington. She was not seen again. The *Agnes Ellen* had a crew of seven.

AGNETE

The Shipping Controller (R. S. Dalgliesh); 1894; Howaldts-werke; 1,127 tons; 214-7x30-9x18-4; 66 n.h.p.; 8 knots; triple-expansion engines.

The steamship *Agnete* was torpedoed and sunk by a German submarine four miles S. by W. of Start Point on April 24th, 1918. Twelve men, including the captain, were killed.

AGNETE

Dampskolsk. Torm A/S; 1921; Helsingors Jernsk. & Msk.; 1,458 tons; 249-5x38-1x15; 150 n.h.p.; triple-expansion engines.

The Danish ship *Agnete*, under German control, was bombed and sunk by British aircraft on March 16th, 1942, eight miles N.E. of Terschelling.

AGNETE M^RSK

Ministry of Shipping (Mark Whitwill & Son, Mgrs.); 1921; Yarrow & Co.; 2,104 tons; 286x43-4x18-7; 208n.h.p.; triple-expansion engines.

The Danish ship *Agnete Mcersk*, sailing under the British flag, was sunk by gunfire from a German submarine on March 24th, 1941, in mid-North Atlantic while on a voyage from Ardrossan to St. John, N.B. All the crew, numbering 28, were lost.

AGNITA

Anglo-Saxon Petroleum Co.; 1931; Hawthorn, Leslie & Co.; 3,552 tons; 306-3x50-4x26-2; 476n.h.p.; oilengines. The British tanker *Agnita* was sunk by a raider after leaving Freetown on March 19th, 1941, for Caripito. All of the crew were made prisoners of war.

AGRA

British India S.N. Co.; 1872; W. Denny & Bros.; 1,907 tons; 298x33-6x25-7; 180 n.h.p.; compound inclined engines. The steamship *Agra* was wrecked on January 29th, 1887, near Vizagapatam on a voyage from Calcutta to Bimlipatam.

AGRA

Aktieb. Svenska Ostasiatiska Komp.; 1925; A.B. Gotaverken; 4,569 tons; 391-7x52-6x25; 623n.h.p.; oilengines. The Swedish ship *Agra* was torpedoed and sunk on April 20th, 1942, on a voyage from Philadelphia to Table Bay. The captain and 5 of the crew were killed.

AGU

Ed. Lass; 1885; W. Gray & Co.; 1,575 tons; 261-5x36-8x18-2; 173 n.h.p.; compound engines.

The Estonian steamer *Agu* left the Tyne on December 5th, 1939, for Gothenburg under Capt. J. Lambert and a crew of 18, and was never heard of again.

AGUILA

YeowardBros.; 1909; Caledon Shipbuilding Co.; 2,114 tons; 275-4 x 38 x 17; 278 n.h.p.; 14 knots; triple-expansion engines. The steamship *Aguila*, Capt. Bannerman, was bound for Lisbon and the Canary Islands with 46 persons, of whom three were passengers. At 6 p.m. on March 27th, 1915, the *Aguila* was sighted and chased by the German submarine U-28, Cdr. Baron von Forstner, some miles off Pembroke. The ship at once increased to full speed, but as she was not capable of more than 14 knots, she was soon overhauled by her pursuer which was of the latest type, mounted two 22 pdr. guns and had a surface speed of 16 knots. The *Aguila* was compelled to stop after a shot had been fired across her bows. She lowered her boats, the first of which capsized on launching drowning one woman passenger and a stewardess. Only four minutes elapsed between the launching of the boats and the submarine's shelling of the vessel. The chief engineer and two men were killed by the firing and altogether 20 shells struck the ship before she was

sent to the bottom by a torpedo which split her in two. At the time of the sinking she was 47 miles S.W. of the Smalls Light.

Eight lives were lost, the survivors, including Capt. Bannerman, were picked up shortly afterwards by the s.s. *St. Stephen* and the steam trawler *Ottillie*.

AGUILA

YeowardLine; 1917; Caledon S.B. & E. Co.; 3,255 tons; 315-3X 44-2x18-5; 395n.h.p.; triple-expansion engines. The British ship *Aguila* was torpedoed and sunk on August 19th, 1941, on a voyage from Liverpool to Gibraltar. The heavy loss of life included 65 of the crew, 5 gunners, the commodore and 4 of his staff and 89 passengers.

AGWIMONTE

New York & Cuba Mail S.S. Co.; 1941; Consolidated Steel Corp.; 6,679 tons; 396-5x60-1x25-8; turbine engines.

The American ship *Agwimonte* was torpedoed and sunk on May 25th, 1943, off Cape Agulhas. Eight lives were lost.

AHAMO

Standard Transportation Co.; 1926; Lithgows; 8,621 tons; 460x62-8x36-4; 666 n.h.p.; 11 knots; triple-expansion engines.

The tanker *Ahamo*, Capt. T. Potts, was in convoy off Wells, Norfolk, on April 8th, 1941, when she struck a mine and sank. Thirteen men were killed and seven were wounded. Capt. Potts was among the survivors.

AHMADI

Bombay & Persia Steam Navigation Co.; 1888; R. Stephenson & Co.; 2,519 tons; 290x40-2x18; 251 n.h.p.; triple-expansion engines.

The British steamship *Ahmadi* was wrecked on November 16th, 1909, at Ras Serani Point, Mombasa, while on a voyage from Zanzibar to Bombay with general cargo and carrying passengers.

AIAX

A/S D/S Bris; 1904; Framnes Mek. Verksted; 1,468 tons; 231-8x35-2x20-5; 111 n.h.p.; triple-expansion engines. The Norwegian steamship *Aiax* was sunk by a German submarine on February 22nd, 1917, in the Bay of Biscay.

AIDA LAURO

A. Lauro; 1923; Richardson, Duck & Co.; 4,538 tons; 412-7X 52x24-3; 425 n.h.p.; triple-expansion engines. The Italian steamship *Aida Lauro* was wrecked on July 1st, 1937, at Castle Point, St. Just, Cornwall.

AIGBURTH

A. Rowland & Co.; 1917; J. Fuller ton & Co.; 824 tons; 195 X 31 x2; 9 knots; triple-expansion engines.

The steamship *Aigburth* was torpedoed and sunk by a German submarine two miles N.E. by E. of South Cheek, Robin Hood Bay, on December 5th, 1917. Eleven men, including the captain, were killed.

AIKATERINI

Georgandis Bros.; 1913; Ropner & Sons; 4,929 tons; 390X 55-5x26-3; 450n.h.p.; triple-expansion engines. The Greek ship *Aikaterini* was sunk by a submarine on January 29th, 1941, on a voyage from Halifax to Dublin. There were 30 survivors.

AIKATERINI T.

Th.L. Teryazos; 1917; Forth S.B. & E. Co.; 2,560 tons; 305-3x 42-7x21-5; 226n.h.p.; triple-expansion engines. This Greek ship left Louisburg, Cape Breton, about January 23rd, 1944, for St. John, N.B., and was never heard of again. Bodies of the crew were washed ashore.

AIKOKU MARU

Oiye Shoji K.K.; 1920; Blyth S.B. & D.D. Co.; 3,212 tons; 331-3x46-7x23-2; 368n.h.p.; triple-expansion engines. The Japanese *Aikoku Mam* went ashore on January 12th, 1937, off Cape Shakotan, Hokkaido. She broke in two and sank.

AIKOKU MARU

AIKOKU MARU

Osaka Shosen K.K.; 1940; *Tama S.B. Co.*; 10,437 tons; 492 • 1 x 66-3x40-7; 2,490 n.h.p.; oil engines.
The liner *Aikoku Mam* was taken over for service as an auxiliary cruiser. On February 17th, 1944, she was sunk by U.S. carrier-based aircraft in harbour in the island of Truk.

AIN-EL-TURK

Cie. France-Navigation S.A.; 1925; *Swan, Hunter & Wigham Richardson*; 2,508 tons; 315-8x45-1x20-6; 28 3 n.h.p.; triple-expansion engines.

The French ship *Ain-el-Turk* was bombed and sunk by German aircraft on May 31st, 1940, during the evacuation of Dunkirk.

AINDERBY

Ropner Shipping Co.; 1925; *W. Gray & Co.*; 4,860 tons; 390 X 55x26-5; 4 39 n.h.p.; 11 knots; triple-expansion engines. The steamship *Ainderby* with a cargo of iron ore was in the North Atlantic on June 10th, 1941, when she was torpedoed and sunk by a submarine. Twelve men were killed.

AIREDALE

British Navy, destroyer; 1940; *John Brown & Co.*; 904 tons; 272-7x28-3x7-7; 19,000 s.h.p.; 27 knots; turbine engines; 3-drum boilers; four 4 in. guns, 8 smaller.

The escort-destroyer *Airedale*, Lt.Cdr. A. G. Forman, D.S.C., was a unit of the Eastern Convoy from Alexandria to Malta under Rear-Admiral P. J. Yian in mid-June, 1942. The convoy was sighted by enemy aircraft when some days out and an intensive and persistent attack by bombers, E-boats and U-boats developed, supported by Italian heavy units. On the 15th the *Airedale* sank as a result of enemy air attacks. One officer and 43 ratings lost their lives. The convoy was able to send a few ships into Tobruk, but was finally compelled to put about for Alexandria.

For full story of the convoy see under the light cruiser *Hermione* which was lost in the action.

AIRONE

Italian Navy, torpedo boat; 1937; *Ansaldo*; 679 tons; 276x26x 7-7; 19,000 s.h.p.; 34 knots; turbine engines; three 3-9 in. guns, four 37 mm., two 13 mm., 4 T.T.

The Italian seagoing torpedo boats *Airone* and *Ariel*, in company with another of the same class were surprised E. of Malta at 2.30 a.m. on October 11th, 1940, by the British cruiser *Ajax*. The torpedo boats put up a very resolute fight, one of them hitting the cruiser's bridge with two shells in quick succession, killing the plotting officer and several ratings. Later other hits were scored setting the cruiser on fire and causing more casualties. The *Airone* and the *Ariel* were then sunk by gunfire, the third torpedo boat escaping. Soon afterwards a heavy cruiser and four destroyers came into view for a short time and one destroyer, the *Artigliere*, 1,620 tons, was damaged but retired. Later she was overhauled by the heavy cruiser *York*, 8,250 tons, in the Sicilian Channel and was sunk by gunfire after having been abandoned by her crew.

In these two actions the *Ajax* lost 13 killed and 22 wounded. There were no casualties on board the *York*.

For full story of the action see under the *Artigliere*.

AIRY

Charles Turnbull & Co.; 1877; *Bartram, Haswell & Co.*; 1,813 tons; 275x35-4x24-2; 170 h.p.; compound inverted engines. The British steamship *Airy* was wrecked at Neshto, Arabia, on August 16th, 1883, while on a voyage from Bombay to Port Said with a cargo of wheat.

AISAKASAN MARU

Mitsui Sempaku; 6,923 tons.
The steamship *Aisakasan Mam* was torpedoed and sunk by the U.S. submarine *Peto* on November 18th, 1944, about 100 miles S.W. of Korea.

AITOKU MARU

Kita Nippon K.K.; 1924; *Harada Zosen K.K.*; 1,328 tons; 225 X 33x20-2; 138 n.h.p.; triple-expansion engines. The steamship *Aitoku Maru* was bombed and sunk by U.S. aircraft on May 11th, 1945, near the Kurile Islands.

AIYO MARU

Toyo Kisen K.K.; 2,746 tons.
The steamship *Aiyo Maru* was bombed and sunk by U.S. aircraft on March 3rd, 1943, off Lae, New Guinea.

AIZAN MARU

Miyachi Kisen K.K.; 2,221 tons.
The steamship *Aizan Maru* struck a mine and sank on June 12th, 1945, off Nagasaki.

AIZAWA MARU No. 20

Aizawalwakichi; 1919; *Aizawalwakichi*; 1,218 tons; 218x32-1 X19; 79 n.h.p.; triple-expansion engines.
The Japanese steamship *Aizawa Maru No. 20* sank on February 28th, 1922, in 124° 43' E., in 37° 45' N., while on a voyage from Moji to Dairen.

AIZAWA MARU No. 23

Aizawalwakichi; 1919; *Aizawalwakichi*; 677 tons; 178-7X 25-2x15-7; 42 n.h.p.; triple-expansion engines. This Japanese ship foundered on September 17th, 1926, near Omayezaki Lighthouse.

AJAX

F.Dultz; 1867; *J.Laing*; 882 tons; 206-3x32-1x18-4; 124 n.h.p.; compound engines.
The German steamer *Ajax* was sunk in a collision on August 9th, 1892, with the steamer *Rundeberg*. Of those on board the *Ajax* 35 were drowned.

AJAX

Dampskibsselskabet Ajax; 1889; *W. Dobson & Co.*; 1,018 tons; 210 X 30-1 x 16-3; 111 n.h.p.; triple-expansion engines. The Danish steamship *Ajax* was torpedoed and sunk by a German submarine on December 25th, 1917, in the Bay of Biscay.

AJAX

Koninkl. Nederl. Stoomb. Maats N.V.; 1923; *Hamburger-Elbe Schiffsw.*; 942 tons; 221-1x34-5x13-4; 126 n.h.p.; triple-expansion engines.

The Dutch ship *Ajax* was bombed and sunk by German aircraft on August 8th, 1940, between Southampton and Falmouth. Four of the crew were killed.

AJAX

Dampfschiffahrts Ges. "Neptun"; 1927; *Akt. Ges. "Weser"*; 2,297 tons; 287x46x23-2; 180 n.h.p.; triple-expansion & L.P. turbine engines.
The German ship *Ajax* was sunk in March, 1943, in operations off the Norwegian Coast.

AJIKAWA MARU

Osaka Shosen K.K.; 1944; *Kawaminami Kayo K.K.*; 780 tons; 178x31-2x17-9; 9 knots; oil engines.
The Japanese ship *Ajikawa Maru* ran aground in heavy weather on May 6th, 1954, off Goto Island, W. Japan and sank. One of the crew was killed, 14 were missing, and there were 13 survivors.

AJIRO

Japanese Navy; 1942; 720 tons; 239x25-5x8-5; 3,600 h.p.; 20 knots; diesel engines; three 4-7 in. guns. The minelayer *Ajiro* was sunk by a U.S. submarine on October 1st, 1944, about 150 miles N.W. of the Bonin Islands.

AKAGANE MARU

Nippon Kaiun K.K.; 1940; *Harima S.B. & E. Co.*; 3,121 tons; 318-4x45-9x24-6; triple-expansion engines. The steamship *Akagane Maru* was sunk by a U.S. warship on February 19th, 1943, off the Aleutian Islands.

AKAGI

Japanese Navy, aircraft carrier; 1925; *Kure Dockyard*; 26,900 tons; 763x92x21-2'; 131,200 s.h.p.; 28-5 knots; turbine engines; Kampon boilers; ten 8 in. guns; twelve 4-7 in.A.A., 22 m.g., 60 aircraft. The Japanese aircraft carrier *Akagi* was a unit of a carrier squadron

of four ships supported by battleships, cruisers and destroyers, engaged in convoying a large fleet of troop and supply ships for an intended landing on the island of Midway. The number of Japanese vessels was estimated at 80 and when first sighted by U.S. reconnaissance aircraft on June 3rd, 1942, the fleet was steaming in five columns in an eastward direction. Its position was about 700 miles distant from Midway.

In the ensuing action, in which the ships of both sides were, at the nearest, 100 miles apart, a number of fierce battles were fought between the ships and aircraft of the opposing fleets. The Americans pressed home their air attacks and the *Akagi* was hit with her aircraft on her flight deck. The petrol from these caught fire and later the ship became unmanageable. She sank before dawn on the 4th.

The Japanese losses were four aircraft carriers with 275 planes and one heavy cruiser. The Americans lost one aircraft carrier and one destroyer.

The full story of the battle of Midway Island is told under *Yorktown*.

AKAGI MARU

Nippon Yusen K.K.; 1940; *Harima S.B. & E. Co.*; 7,390 tons; 462-7x62-3x34-4; 2,248 n.h.p.; oilengines. The liner *Akagi Mam* was taken over for service as an auxiliary cruiser. On February 17th, 1944, she was sunk by U.S. carrier-based aircraft in the Caroline Islands area.

AKAGISAN MARU

MitsuiBussanKaisha; 1924; *MitsuiBussan Kaisha*; 4,634 tons; 375x50x30; 489 n.h.p.; oilengines. The motor vessel *Akagisan Mam* was bombed and sunk by U.S. land-based aircraft on December 7th, 1944, W. of Leyte, Philippines.

AKAMA MARU

Sangyo Setsubi Eidan; 5,600 tons. The steamship *Akama Mam* was sunk by the U.S. submarine *Pompano* on September 3rd, 1943, in the Tsugaru Strait.

AKANE MARU

Ishihara Risen K.K.; 10,241 tons. The tanker *Akane Mam* was torpedoed and sunk by the U.S. submarine *Whale* on October 6th, 1944, W. of Luzon Island.

AKAROA

D/S A/S Adine; 1881; *Osbourne, Graham & Co.*; 1,348 tons; 221x36-5x22-7. The Norwegian barque *Akaroa* was sunk by a German submarine on September 1st, 1917, in the English Channel.

AKASHI MARU

Shimatani Risen K.K.; 1918; *Irvine's S.B. & D.D. Co.*; 3,228 tons; 331-2x46-8x23-2; 429 n.h.p.; triple-expansion engines. The steamship *Akashi Mam* (or *Akasi Mam*) was torpedoed and sunk by the U.S. submarine *Bluefish* on September 28th, 1943, in the Banda Sea.

AKASHI MARU

Nishi Taiyo Gyogyo; 10,045 tons. The tanker *Akashi Mam* was torpedoed and sunk on January 12th, 1945, off Cap St. Jacques, Indo-China.

AKASHISAN MARU

Mitsui Bussan Kaisha; 1935; *Mitsui Bussan Kaisha*; 4,541 tons; 362-2x50x29-1; 453 n.h.p.; oilengines. The motor vessel *Akashisan Mam* (or *Akashisan Maru*) was torpedoed and sunk by the U.S. submarine *Sandlance* on March 3rd, 1944, N.E. of Hokkaido.

AKASI

Japanese Navy; 1938; *Sasebo*; 9,000 tons; 500x67-5x18-5; 10,000s.h.p.; 19 knots; turbine engines; four 5 in. A.A. guns, twelve m.g. The repair ship *Akasi* was sunk by U.S. carrier-borne aircraft on March 30th, 1944, off the Palau Islands.

AKASSA

Elder Dempster Line; 1910; *Irvine's Shipbuilding Co.*; 3,919 tons; 360-2x50-1x22-7; 370n.h.p.; 10• 25 knots; triple-expansion engines. The Elder Dempster ship *Akassa* was torpedoed and sunk by a German submarine eight miles S.E. of Galley Head, Co. Cork, on August 13th, 1917. Seven persons lost their lives. The captain was among the survivors.

AKATSUKI

Japanese Navy, destroyer; 1901; *Yarrow*; 363 tons; 220-3x 20-6x9; 6,000 i.h.p.; 31 - 3 knots; triple-expansion engines; two 12pdr. guns, four 6pdr., 2 T.T. The Japanese destroyer *Akatsuki* was one of a flotilla of four ships which fought a spirited action with a like number of Russian destroyers on the night of March 9th, 1904. The opposing vessels at one time came to within 50 yards of each other, but no ships were lost, the Russians eventually making for Port Arthur after Captain Matusevich, the commander of their flotilla, was killed.

The *Akatsuki* was constantly on patrol off the fortress, and on the night of May 17th she struck a mine and sank immediately. Her complement numbered 58, and all the officers and 16 of the men were drowned.

AKATSUKI

Japanese Navy, destroyer; 1932; *Sasebo*; 1,700 tons; 371-5x 33-7x9-7; 40,000 s.h.p.; 34 knots; turbine engines; Kanpon boilers; six 5 in. guns, 4 A.A.m.g., 9 T.T. The Japanese destroyer *Akatsuki* was sunk in the first phase of the battle of Guadalcanal which covered the three days November | 13th-15th, 1942. On the night of the 13th a Japanese squadron steaming through the Lengo Channel, off Savo Island, ran into a squadron of U.S. cruisers and destroyers returning from escort of a convoy of transports which had disembarked their troops on Guadalcanal. The fighting which ensued was of a very determined character and salvos were exchanged at close range. The *Akatsuki* was disabled in the first 15 minutes and at daybreak was sighted by the U.S. heavy cruiser *Portland*, 9,800 tons, nine 8 in. guns, which sank her by gunfire.

The destroyer's normal complement was 197. The Japanese loss totalled two battleships, one heavy cruiser and three destroyers. The American loss was two cruisers and seven destroyers.

For full story of the battle see the battleship *Kirishima* and the U.S. cruiser *Atlanta*.

AKATSUKI MARU

Nippon Kaiun K.K.; 1938; *Harima S.B. & E. Co.*; 10,216 tons; 504-6x64-9x37-4; 2,497n.h.p.; oilengines. The motor tanker *Akatsuki Maru* (or *Akatuki Maru*) was torpedoed and sunk by the U.S. submarine *Saury* on May 28th, 1943, in the East China Sea.

AKEBONO

Japanese Navy, destroyer; 1930; *Hudinagata*; 1,700 tons; 371-5x33-7x9-7; 40,000 s.h.p.; 34 knots; turbine engines; Kanpon boilers; six 5 in. guns, 4 A.A.m.g., 9 T.T. The Japanese destroyers *Akebono*, *Hatsuharu*, 1,368 tons, *Okinami* and *Akishimo*, 2,200 tons each, were lying in Manila Bay, Philippine Islands, when aircraft from a squadron of fast carriers of the U.S. Third Fleet, commanded by Vice-Admiral J. S. McCain, attacked the anchorage on November 13th, 1944. The raid created great havoc among the shipping, the four above-mentioned destroyers being sunk as well as the following merchantmen:—

<i>Aoki Maru</i> ...	3,710 tons	<i>Seiwa Maru</i> ...	7,210 tons
<i>Daitoku Maru</i> ...	6,923 tons	<i>Sekiho Maru</i> ...	5,402 tons
<i>Eikyu Maru</i> ...	6,862 tons	<i>Muro Maru</i> ...	1,606 tons
<i>Eiwa Maru</i> ...	6,968 tons	<i>Myogi Maru</i> ...	4,020 tons
<i>Hatsu Maru</i> ...	4,260 tons	<i>Nishi Maru</i> ...	2,655 tons
<i>Heian Maru</i> ...	5,346 tons	<i>Tatsura Maru</i>	6,420 tons
<i>Kakogawa Maru</i>	6,886 tons	<i>Teiyu Maru</i> ...	5,753 tons
<i>Kinka Maru</i> ...	9,305 tons	<i>Shinkoku Maru</i>	2,746 tons
<i>Ondo Maru</i> ...	6,500 tons		

The Japanese also lost 84 aircraft.

AKEBONO MARU

This was one of the most successful air raids in which carrier-borne aircraft were employed by the Americans. At one blow it deprived the Japanese of 17 merchantmen which they could ill spare.

AKEBONO MARU

Nippon Kaiun K.K.; 1939; *Harima S.B. & E. Co.*; 10,182 tons; 504-6x65x37-5; 2,497 n.h.p.; oil engines. The motor tanker *Akebono Mam* was sunk by U.S. carrier-based aircraft on March 30th, 1944, off Bahelthuap, Palan Islands.

AKEBONO MARU No. 6

Nichiro Gyogyo K.K.; 1947; *Mitsubishi Jukogyo K.K.*; 342 tons; 145-3x24-3x13-4; oil engines. The Japanese trawler *Akebono Maru No. 6* was in collision with the South Korean Frigate *No. 61* on February 14th, 1955, and sank eight miles N.E. of Ukushima. Twenty-two lives were lost.

AKELD

Tyne-Tees Steam Shipping Co.; 1922; *Yarrow & Co.*; 643 tons; 175-1x28-1x11-2; 120 n.h.p.; triple-expansion engines. The British steamship *Akeld* left Rotterdam on March 9th, 1940, for the Tyne. She is believed to have been sunk by an explosion and wreckage was found. There was no other trace.

AKI MARU

Nippon Yusen K.K.; 11,409 tons. The steamship *Aki Maru* was torpedoed and sunk by the U.S. I submarine *Creville* on July 26th, 1944, W. of Luzon Island, Philippines.

I

AKIBASAN MARU

Mitsui Bussan Kaisha; 1924; *Mitsui Bussan Kaisha*; 4,607 tons; 375 X 50 x 30; 496 n.h.p.; triple-expansion engines. The steamship *Akibasasan Maru* was sunk by U.S. carrier-based aircraft on January 30th, 1944, off Kwajalein in the Marshall Islands.

AKIGAWA MARU

Kawasaki Kisen K.K.; 5,244 tons. The steamer *Akigawa Maru* was torpedoed and sunk by the U.S. submarine *Seahorse* on April 27th, 1944, about 200 miles W. of Saipan Island.

AKIGAWA MARU

Kawasaki Kisen K.K.; 6,859 tons. The steamship *Akigawa Maru* was torpedoed and sunk by the U.S. submarine *Sea Devil* on December 2nd, 1944, E. of the Shichi-to Islands, Japan.

AKIGUMO

Japanese Navy, destroyer; 1941; *Japan*; 2,200 tons; 415 X 35 x—; 34 knots; turbine engines; six 5 in. guns, eight 25 mm. A.A., 15 T.T. The Japanese destroyer *Akigumo* was torpedoed and sunk off Zamboanga, Mindanao, Philippine Islands, by the U.S. submarine *Redfin* on April 11th, 1944. The destroyer carried a complement of over 200.

AKIKAZE

Japanese Navy, destroyer; 1920; *Mitsubishi*; 1,215 tons; 336-5x29-2x9-5; 38,500 s.h.p.; 34 knots; turbine engines; *Kanpon boilers*; four 4-7 in. guns, 2 A.A.m.g., 6 T.T. The Japanese destroyer *Akikaze* was torpedoed and sunk in the South China Sea by the U.S. submarine *Pintado* on November 3rd, 1944. The destroyer's normal complement was 148.

AKISHIMA MARU

Iino Kaiun K.K.; 1,993 tons. The steamship *Akishima Maru* struck a mine and sank on May 26th, 1944, off Kagoshima, Japan.

AKISHIMO

Japanese Navy, destroyer; 1942; *Japan*; 2,200 tons; 415 X 35 x—; 34 knots; turbine engines; six 5 in. guns, eight 25 mm. A.A., 15 T.T. The Japanese destroyer *Akishimo* was bombed and sunk in Manila

Bay, Philippine Islands, by aircraft from fast carriers of the U.S. Third Fleet on November 13th, 1944. Three other destroyers as well as several merchantmen were sunk in the same attack. The *Akishimo* carried a complement of over 200. For further details see the destroyer *Akebono*.

AKITA MARU

Nippon Yusen K.K.; 1916; *Mitsubishi Dockyard*; 3,817 tons; 345 x 50 x 29 -1; 342 n.h.p.; triple-expansion engines. The steamship *Akita Maru* was torpedoed and sunk by a Dutch submarine on January 10th, 1942, off Malaya.

AKITSU MARU

Nippon Kaiun K.K.; 9,186 tons. The steamship *Akitsu Maru* was torpedoed and sunk by the U.S. submarine *Queenfish* on November 15th, 1944, off the Goto Islands, Japan, while serving as an aircraft ferry.

AKITSUKI

Japanese Navy, destroyer; 1942; *Japan*; 2,500 tons; 435 x 38 X—; 34 knots; turbine engines; eight 5 in. guns, several A.A., 4 T.T. The Japanese destroyer *Akitsuiki* was torpedoed and sunk by the U.S. submarine *Halibut* about 300 miles E.N.E. of the island of Luzon in the Philippines on October 25th, 1944. The destroyer carried a complement of over 200.

AKITSUSHIMA

Japanese Navy; 1942; 9,000 tons; 577-5x61-5X19; 15,000 h.p.; 20 knots; turbine engines; six 5 in. A.A. guns, 20 A.A.m.g. The seaplane tender *Akitsuishima* was sunk by carrier-based aircraft of the U.S. Navy on September 24th, 1944, off Busuanga, Philippines.

AKIURA MARU

Mitsubishi Shoji Kaisha; 1938; *Mitsubishi Jukogyo K.K.*; 6,304 tons; 437-4x58-5x32-8; 840n.h.p.; oilengines. The motor vessel *Akiura Maru* was torpedoed and sunk by the U.S. submarine *Balao* on February 28th, 1944, about 200 miles E. of Mindanao, Philippines.

AKIZUKI

Japanese Navy, destroyer; 1943 (circa); *Japan*; 2,700 tons. The Japanese destroyer *Akizuki* was bombed and sunk by American aircraft on October 25th, 1944. The attack took place 250 miles E. of Luzon Strait.

AKKA

Trafikaktieb Grdngesberg Oxelosund; 1942; *A/B Gotaverken*; 5,409 tons; 434-5x56-7x24-3; 12-5 knots; oil engines. The Swedish ship *Akka* ran ashore on April 9th, 1956, at the Gantocks, off Dunoon, and sank in a few minutes. Six were killed and there were 27 survivors.

AKTI

Kassos Stm. Nav. Co.; 1920; *Northumberland S.B. Co.*; 4,261 tons; 399-5x53x32-8; 517 n.h.p.; triple-expansion engines. The Greek ship *Akti* was in collision with the *La Plata* on December 4th, 1938, and sank off Ushant.

ALA

E.B. Aabys Rederi A/S; 1916; *Akt. Jarlso Vaerft.*; 933 tons; 200-4x31-9x12-7; 83 n.h.p.; triple-expansion engines. The Norwegian ship *Ala* was bombed by German aircraft on May 17th, 1941, and abandoned. She was later taken in tow, and while being taken to Southampton for repairs she struck a mine and sank on June 13th.

ALABAMA

Confederate States Navy, cruiser; 1862; *Laird*; 1,040 tons; 235x32x15; 300 n.h.p.; 13-6 knots; steam engines; one 100 pdr. Blakely m.l.r. gun, one 68 pdr. pivot gun, six 32 pdr. The famous Confederate cruiser *Alabama* was built at Laird's yard, Birkenhead, in 1862 as the "290", that being her number on the stocks. She was a wooden auxiliary steamship, barquentine-rigged and of 1,040 tons. Much latitude was allowed to the firm in the course of her construction, and the presence of Capt. James D.

Bulloch of the Confederate Navy, superintending her equipment, was known to the authorities. In order to avoid a definite charge that she was a warship, and thus liable to detention by the British government, no guns were mounted and she did not fly the Confederate flag. Nevertheless the United States ambassador, Charles Francis Adams, protested to Lord John Russell, Foreign Secretary, against the ship leaving port. After much pressure Russell was at last moved to consult the Law Officers of the Crown, but action was so tardy that the "290" was permitted to gain the high seas without hindrance, the writ for her detention arriving a few hours after she had sailed.

The date of her escape was July 28th, 1862, when she proceeded down the Mersey under command of Capt. M. J. Butcher, late of the Cunard Line, with her flags flying and a large company of guests on board to witness her steam-trials. Capt. Bulloch appears to have preserved a very proper circumspection in his difficult situation, for he gave his guests an excellent lunch and then to the surprise of those among them who were still unsuspecting, transferred them to a waiting tug and made for open sea.

Before finally leaving British waters the "290" picked up 30 men from another tug in Moelfre Bay, Anglesey, whence she proceeded to the Azores, still flying the British flag. Here she met two supply ships bringing guns, ammunition, coal and food, also a full complement of naval officers, including her commander, Capt. Semmes. Both steamships came from England, one from London and the other from Liverpool.

On August 24th Capt. Semmes hauled down the British flag and hoisted that of the Confederacy, read his commission to the assembled ship's company, announced that the number "290" was changed to the name *Alabama*, and sailed forth on his career of commerce-raiding. He first set a course for the West Indies, capturing 20 United States merchantmen on the way. Arrived in American waters he encountered the U.S. gunboat *Hatteras*, an old ship which he sent to the bottom with a few broadsides. Thereafter, for a period of nearly two years, the *Alabama* kept the seas, sinking a total of 68 merchant vessels, of which only one was a steamship.

Throughout his operations Capt. Semmes followed a policy of taking up a position on one of the main trade routes for two months at a time. Having sunk many ships, and allowed the news to be carried to the U.S. Navy Department, he would change his position before their cruisers arrived. Nearly all the captures were made between the Azores and the easternmost point of South America, the *Alabama* being able to coal freely in neutral ports as at that time there were no precedents to regulate this practice.

On June 11th, 1864, the raider put into Cherbourg, as she was badly in need of a refit. A few days later the United States sloop-of-war *Kearsage* entered the harbour without suspecting the presence of the *Alabama*, which she discovered as she steamed past the waterfront. The *Kearsage* thereupon continued her course without stopping to anchor and lay to beyond the three mile limit. The *Alabama* meanwhile proceeded with her repairs and came out to meet her antagonist on Sunday, June 19th, weighing anchor at about 10.30a.m. She was under surveillance of the French ironclad *Couronne*, which guarded the three mile limit throughout the action. At the same time the English steam yacht *Deerhound* came out with the intention of witnessing the action, and of affording any assistance which the course of events might make necessary. The contending vessels were both built of wood, but Capt. Winslow of the *Kearsage* conceived the happy idea of running his spare cable around the sides of his ship to break the impact of any shot. In armament and complement there was little to choose between them, the details being as follows:—

Kearsage 1 guns, 366 lb. broadside, 163 crew

Alabama 8 guns, 305 lb. broadside, 148 crew

At the commencement of the action the *Kearsage* was between seven and eight miles off shore. The fight was waged with great vigour by both parties, but it was not long before the *Alabama* found that the quality of her powder had deteriorated owing to her long period at sea, and that her shot could not penetrate her adversary. Fifteen minutes after opening fire this was proved when a large 100 lb. shell struck the *Kearsage* on her quarter near the screw, but failed to explode. This was the only hit which might have proved favourable to the Confederates throughout the action. They possessed a slight advantage in the range of their guns, which was, however, negated by the superior speed of the United States vessel, which avoided close action.

After 70 minutes fighting the *Alabama* was in a sinking condition, with her engines stopped and her fires out. Capt. Semmes thereupon hauled down his colours and passed the word to all hands to save themselves, the *Alabama* going down by the stern soon afterwards. The losses were as follows:—

Alabama 9 killed, 12 drowned, 20 wounded
Kearsage 3 men wounded, 1 fatally

Of the survivors 42 were picked up by the yacht *Deerhound*, among them being Capt. Semmes, who was wounded. The remaining 85 were rescued by the *Kearsage*. The assistant surgeon of the *Alabama*, a young Welshman named D. Herbert Llewellyn, stood by the wounded until all were got off in safety. He then went down with the ship as he could not swim. A memorial to his self-sacrifice has been placed in Charing Cross Hospital.

At the conclusion of the Civil War the United States government presented Britain with a claim for damages inflicted upon shipping by the *Alabama*. The British government admitted its liability in allowing her to leave Birkenhead, and after several years of negotiation a tribunal was convened, consisting of five persons nominated severally by Queen Victoria, President Grant, the King of Italy, the President of Switzerland and the Emperor of Brazil.

The Tribunal sat in 1871 and assessed the damages at £3,229,166 13s. 4d., being 15,500,000 United States dollars. The award was accepted by both parties and an acrimonious dispute was finally settled.

ALABAMA MARU

Osaka Shosen K.K.; 1920; *Mitsubishi Zosen Kaisha*; 9,617 tons; 475 X 61x40-7; 993 n.h.p.; triple-expansion engines. The Japanese ship *Alabama Maru* went ashore on February 22nd, 1930, near Cape Inuboye and broke into three.

ALACRITY

Harries Bros. & Co.; 1883; *Castle Steel & Iron Works*; 1,080 tons; 225-2x32-3x13-3; 99r.h.p.; compound engines. The British steamship *Alacrity* struck a mine and sank in March 1916, in the North Sea. The captain and 13 others were lost.

ALAMANCE

Garland S.S. Co.; 1902; *New York S.B. Co.*; 4,455 tons; 360•8x46-2x24-6; 465 n.h.p.; triple-expansion engines. The American steamship *Alamance* was torpedoed and sunk by a German submarine on February 5th, 1918, off north-east Ireland.

ALAMAR

Calmar Steamship Corpn.; 1916; *Union Iron Works*; 5,689 tons; 399-7x56-2x30-5; 2,500 s.h.p.; 9 knots; turbine engines. The American steamship *Alamar*, Capt. R. E. Nystrom, was 100 miles E. of Bear Island in convoy on May 27th, 1942, when she was bombed and sunk by German aircraft. Capt. Nystrom and 22 men were killed and two were wounded.

ALASKA

Alaska S.S. Co.; 1889; *Delaware River Co.*; 3,709 tons; 327X 45x18-8; 543 n.h.p.; triple-expansion engines. The American ship *Alaska* struck on Blunts Reef 40 miles south of Eureka, Calif. on August 6th, 1921, and sank. She was carrying passengers and general cargo.

ALASKA

Cie. Generate Transatlantique; 1922; *Sunderland S.B.Co.*; 5,399 tons; 425X55X26-6; 629 n.h.p.; triple-expansion engines. The French ship *Alaska* was in collision with the *Dotterel* on November 15th, 1939, and sank about 12 miles S.E. of Owers lightship. A ship's boat was washed ashore.

ALASKA MARU

Osaka Shosen K.K.; 1919; *Mitsubishi Zosen Kaisha*; 7,379 tons; 420x56x38-5; 574 n.h.p.; triple-expansion engines. The steamship *Alaska Maru* was sunk by U.S. aircraft on December 19th, 1943, off Rabaul.

ALASKAN

ALASKAN

American-Hawaiian Steamship Co.; 1918; Bethlehem S.B. Corpn.; 5,364 tons; 415x53-7x36-3; 2,500 Lh.p.; 10-5 knots; triple-expansion engines.

The American liner *Alaskan*, Capt. E. E. Greenlaw, was torpedoed and sunk by a German submarine 800 miles N.E. of Natal, Brazil, on November 28th, 1942. Six persons were killed. Capt. Greenlaw was among the survivors. The vessel was not in convoy at the time of the sinking.

ALASTAIR

Duncan & Leith; 1902; J. Duthie, Sons & Co.; 366 tons; 145-2x 24-3x11-3; 71 r.h.p.; triple-expansion engines. The British steamship *Alastair* struck a mine and sank on November 6th, 1915, 4 miles E. of Southwold. The captain and 6 others were lost.

ALAUNIA

CunardLine; 1913; Scotts'S.B.&E. Co.; 13,405tons; 520-3x 64x43-1; 14 knots; quadruple-expansion engines. The Cunard liner *Alaunia* carrying 180 passengers and 166 crew struck a mine and sank on October 19th, 1916, 2 miles S. of the Royal Sovereign lightship. Two members of the crew were missing, and their bodies were later washed ashore on the South Coast. The remainder came to land without further casualties.

ALAVI

Bombay & Persia Steam Navigation Co.; 1893; Tyne Iron Shipbuilding Co.; 3,627 tons; 335x43x27-6; 280n.h.p.; 8-5 knots; triple-expansion engines.

The steamship *Alavi* was intercepted by a German submarine six miles N.E. of Cape Palos, near Cartagena, on October 13th, 1917. The submarine opened fire from the surface and sank the vessel with shells. Thirteen men were killed. The captain was among the survivors.

ALBACHIARA

Renato Durante; 1904; Schiffsw. v. Henry Koch; 1,245 tons; 246-3x35-7x21-9; 140 n.h.p.; triple-expansion engines. The Italian ship *Albachiara* was torpedoed and sunk by a British submarine on September 5th, 1942, 25 miles from Ras el Tin.

ALBANIA

Rederiaktieb. Svenska Lloyd; 1903; Schomer & Jensen; 1,241 tons; 237-7x35-2x15-4; 186 n.h.p.; triple-expansion engines.

The Swedish ship *Albania* was sunk, probably by a mine, on October 23rd, 1939, in the North Sea.

ALBANO

Ellermarks Wilson Line; 1912; Earless Co.; 1,176 tons; 250-2 x 37-2x14-7; 168 n.h.p.; triple-expansion engines. The British ship *Albano*, Capt. Mutton, struck a mine and sank on March 2nd, 1940, four miles E. of Hartlepool. Nine lives were lost.

ALBANO

"Adriatica" Soc. Anon. di Nav.; 1918; S. P. Austin & Son; 2,364 tons; 293-5x42-1x19; 266n.h.p.; triple-expansion engines.

The Italian ship *Albano* struck a mine and sank on January 2nd, 1941, one mile W. of Cape Larghi, Albania.

ALBANY

John Warrack & Co.; 1882; A. Stephen & Sons; 2,276 tons; 310-9x38-1x25-3; 300 n.h.p.; compound engines. The British steamship *Albany* foundered in May, 1891, in the Inland Sea, when sailing from Yokohama to New York.

ALBATROS

German Navy, destroyer; 1926; Wilhelmshaven Dockyard; 800 tons; 277-7x27-5x9-2; 24,000 s.h.p.; 33 knots; turbine engines; Schulz-Thornycroft boilers; three 4-1 in. guns, two 1 pdr., 6T.T.

The German destroyers *Albatros* and *Kondor* in company with the cruisers *Blucher* and *Emden* and the gunnery training ship *Brummer*

accompanied by transports steamed into Oslo Fjord in the early hours of April 9th, 1940, to carry out the invasion of Norway. The force met with a stubborn resistance from the few Norwegian ships on guard and from the forts ashore. The *Blucher* was sunk early in the action and the *Albatros* and *Kondor* attempting to run down the fjord and through the narrows were driven back by the minelayer *Olav Tryggvason* which succeeded in sinking the *Albatros*. The vessel's normal complement was 121. For full story of the action, see the heavy cruiser *Blucher*.

ALBATROS

Italian Navy, torpedo boat; 1934; Cantieri Riuniti; 340 tons; 231-3x22-5x6; 4,000s.h.p.; 24-5 knots; turbine engines; two 3-9 in. guns, four 37 mm.A.A., 2 T.T.

The Italian torpedo boat *Albatros* was torpedoed and sunk by a British submarine S.E. of Messina on September 27th, 1941. The vessel carried a complement of about 80.

ALBATROS

French Navy, destroyer; 1930; Ch. Loire; 2,441 tons; 423-2 X 40x16; 64,000 s.h.p.; 36 knots; turbine engines; five 5-5 in. guns, four 37 mm.A.A., 6 T.T.

The French destroyer *Albatros*, Capt. de Frig. Peries, was stationed at Casablanca and participated in the defence of that port when the American forces made their landing on November 8th, 1942. The fighting was bitter and the French naval losses were extremely heavy. At about 8.20 a.m. in company with five other destroyers the *Albatros* made a sortie from the harbour to attack American landing-craft going in W. of Cape Fedhala. The attempt failed and most of the destroyers were sunk by the guns of the American heavy ships.

The *Albatros* was hit in quick succession by the guns of the U.S. cruisers *Augusta*, *Tuscaloosa* and *Wichita*, followed by bombs amidships from aircraft of the U.S. carrier *Ranger*. She was finally run ashore in a sinking condition outside the harbour. Of her complement often officers and 230 ratings 25 were killed and 80 were wounded.

The full story of the action is told under the cruiser *Primauguet* which was sunk on the same occasion.

ALBATROSS

German Navy, minelayer; 1907; Weser, Bremen; 2,165 tons; 262x39-5x16-5; 5,500i.h.p.; 21 knots; triple-expansion engines; eight 3-5 in. guns, 400 mines.

The German minelayer *Albatross* was very active in the first few weeks of the First World War when she laid minefields off the Tyne. She proved a most useful vessel to the Germans in operations both in the North Sea and the Baltic. On July 2nd, 1915, the ship formed one of a small squadron consisting of the armoured cruiser *Roon*, and the light cruisers *Augsberg* and *Bremen*. The ships were steaming through a dense fog off the island of Gothland in the Baltic when they suddenly fell in with a superior Russian squadron consisting of the cruisers *Admiral Makharoff*, *Bayan*, *Bogatyr* and *Oleg*. There was a brief engagement which, owing to the fog, did not produce any great results for the Russians. They did, however, cut off the *Albatross* from her consorts and drove her ashore badly damaged near the little village of Ostergard. She received 25 hits in her hull, her foremast was shot away and both funnels riddled. Her casualties amounted to 27 killed and 33 wounded out of a complement of 189.

The island of Gothland, being Swedish territory, the crew were taken off and interned. A statement by the Germans that the Russians continued to fire after the ship had surrendered may be true as the density of the fog and the damage to the *Albatross*'s wireless made the reception of signals difficult. The Swedish government protested to Russia and received a satisfactory explanation in return.

ALBAY

V. T. Navarro; 1916; Kruse & Banks; 1,129 tons; 206x42x—; triple-expansion engines.

The wooden Philippine steamer *Albay* was destroyed by fire on December 6th, 1951, at Adlay, Surigao.

ALBERICO DA BARBIANO

Italian Navy, light cruiser; 1930; Ansaldo; 5,069 tons; 555 -5 x 50-9x14-2; 95,000 i.h.p.; 37 knots; turbine engines; 3-drum boilers; eight 6 in. guns, six 3 • 9 in., eight 37 mm., eight 13 mm., 4 T.T.

At dawn on December 14th, 1941, a British destroyer division consisting of the *Sikh*, 1,870 tons, Cdr. G. H. Stokes, senior naval officer, *Maori*, 1,870 tons, *Legion*, 1,935 tons, and the Dutch destroyer *Isaac Sweers*, 1,628 tons, was cruising in the Central Mediterranean, off Cape Bon, when it surprised an Italian force consisting of the light cruisers *Alberico da Barbiano* and *Alberto di Giussano*, both of 5,069 tons, a torpedo boat and an E-boat. The British attacked immediately with guns and torpedoes blowing up one cruiser and damaging the other so severely that she sank later. The torpedo boat was badly damaged but escaped, and the E-boat was sunk.

The *Alberico da Barbiano* was credited with having achieved a speed of 42 knots, but on this occasion failed to out-steam the the 36 • 5 knot destroyers.

ALBERNI

*Canadian Navy, corvette; 1940; Canada; 925 tons; 193 x 32x16; 2,800 i.h.p.; 17 knots; quadruple-expansion engines; 3-drum boilers; one 4 in.A.A. gun, several smaller. The Canadian corvette *Alberni*, Lt.Cdr. Ian H. Bell, was mined and sunk in the English Channel on August 21st, 1944. Four officers and 55 ratings were killed.*

ALBERONI

*R.Turchi; 1920; Scheepswerf & Mchfbrk. de Liesbosch; 1,160 tons; 230 • 4 X 34 • 3 X 13 • 1; 120 n.h.p.; triple-expansion engines. The Italian ship *Alberoni* left Derna for Massowah with a cargo of munitions. She caught fire on April 23rd, 1937, blew up and sank.*

ALBERT C. FIELD

Upper Lakes & St. Lawrence Transportation Co.; 1923; Furness S.B.Co.; 1,764 tons; 252-5x43-3x17-8; 111 n.h.p.; triple-expansion engines.

The Canadian ship *Albert C. Field* was torpedoed by a German aircraft on June 18th, 1944, off St. Catherine's Point. She sank in 3 minutes. Four of the crew and some other personnel were lost.

ALBERT JENSEN

1922; Flensburger Schiffsb. Ges.; 5,290 tons; 454-9x60-1 X27-8; 1,178 n.h.p.; oil engines.

The German ship *Albert Jensen* ex *Flensburg* was sunk by Russian action off Hela, Poland, on April 9th, 1945.

ALBERT L. ELLSWORTH

RederiA/SAlse; 1937; Gotaverken A/B; 8,309 tons; 463-7X 59-2x35-9; 653 n.h.p.; oilengines.

The Norwegian ship *Albert L. Ellsworth* was torpedoed, set on fire and sunk on January 8th, 1943, in the Atlantic. She was on a voyage from Curacao to Gibraltar with 11,473 tons of fuel oil.

ALBERT WATTS

Sinclair Nav. Co.; 1917; Baltimore S.B.&D.D. Co.; 3,302 tons; 292-3x47-2x26-9; turbine engines.

The American steamship *Albert Watts* was torpedoed and sunk by a German submarine on November 28th, 1917, in the Mediterranean.

ALBERTA

*D. InglessiFils S.A. Nav de Samos; 1900; J. Brown & Co.; 1,193 tons; 270 x 35 • 6 X 14 • 6; 292 n.h.p.; triple-expansion engines. The Greek ship *Alberta* was bombed and sunk by German aircraft on April 23rd, 1941, at Salamis, during the invasion of Greece.*

ALBERTO

SocietaLigureComm.diNav.; 1884; Tyne Iron S.B.Co.; 2,011 tons; 291x37x21; compound engines.

The Italian steamship *Alberto* struck a mine and sank on October 6th, 1916, in the Mediterranean.

ALBERTO DI GIUSSANO

Italian Navy, light cruiser; 1930; Ansaldo; 5,069 tons; 555 -5 X 50-9x14-2; 95,000 i.h.p.; 37 knots; turbine engines; 3-drum boilers; eight 6 in. guns, six 3-9 in., eight 37 mm., eight 13 mm., 4 T.T.

At dawn on December 14th, 1941, a British destroyer division consisting of the *Sikh*, 1,870 tons, Cdr. G. H. Stokes, senior naval officer, *Maori*, 1,870 tons, *Legion*, 1,935 tons and the Dutch destroyer *Isaac Sweers*, 1,628 tons, was cruising in the Central Mediterranean, off Cape Bon, when it surprised an Italian force consisting of the light cruisers *Alberico da Barbiano* and *Alberto di Giussano*, both of 5,069 tons, a torpedo boat and an E-boat. The British attacked immediately with guns and torpedoes blowing up one cruiser and damaging the other so severely that she sank later. The torpedo boat was badly damaged but escaped, and the E-boat was sunk.

ALBERTO FASSIO

Villain & Fassio Soc. Anon. Italiana di Nav. Mercantile; 1914; Harlan & Hollingsworth Corp.; 2,289 tons; 295-9x45-1x18-6; 203 n.h.p.; triple-expansion engines.

The Italian tanker *Alberto Fassio* struck a mine and sank on July 26th, 1943, in the Gulf of Patras.

ALBERTO TREVES

*Societa VenezianadiNav. a Vap.; 1900; N. Otero & Co.; 3,838 tons; 340-5x45x19-8; 323n.h.p.; triple-expansion engines. The Italian steamship *Alberto Treves* was torpedoed and sunk by a German submarine on October 3rd, 1918, in the Western Atlantic.*

ALBERTVILLE

Cie. Maritime Beige (Lloyd Royal) S.A.; 1928; Atel. & Ch. de la Loire; 11,047 tons; 521-8x62x24; 1,556 n.h.p.; quadruple-expansion engines.

The Belgian steamship *Albertville* was bombed and sunk by German aircraft off Havre on June 11th, 1940.

ALBIA

*Cia. de Nav. Vizcaya; 1890; Tyne Iron S.B. Co.; 1,806 tons; 260 X36-7x16-8; 184 n.h.p.; triple-expansion engines. The Spanish ship *Albia* ran on to Alien Rock, Co. Antrim, on September 28th, 1929, and became a total wreck.*

ALBION

*Duffryn Shipping Co.; 1892; Ropner&Son; 3,650 tons; 343x45 X20-1; 266n.h.p.; triple-expansion engines. The British steamship *Albion* was wrecked in May, 1908, on Carromeiro Chico rock, at the entrance to Corcubion, on a voyage from Bahia Blanca to Rotterdam with a cargo of grain.*

ALBIONIC

W. H. Cockerline & Co.; 1924; G. Brown & Co.; 2,468 tons; 290-2x44-1x20-9; 265 n.h.p.; 10-5 knots; triple-expansion engines.

The steamship *Albionic*, Capt. Thompson, left Wabana, N.F.L. on August 31st, 1940, for Liverpool with a cargo of iron ore. Nothing more was heard of the ship or her crew of 25.

ALBIS

"Albis" Allgemeine Verkehrs-u. Handelsges. m.b.H.; 1898; Schiffsw.v. Henry Koch; 993 tons; 224-6x33-2x15-2; 102 n.h.p.; triple-expansion engines.

The German steamship *Albis* ran aground on November 25th, 1922, on Amrun Island, and broke in two.

ALBUERA

Chr. Salvesen & Co.; 1921; Burnt island S.B. Co.; 3,477 tons; 331-3x48-6x25-1; 316n.h.p.; 9 knots; triple-expansion engines.

The steamship *Albuera*, Capt. A. Hood, was torpedoed and sunk by a German E-boat two miles S.W. of Lydd Light Float on June 24th, 1940, and seven men were killed. Capt. Hood was among the survivors.

ALCA

ALCA

RederiA/BVarma; 1919; A/B Ostersjovarvet; 439tons; 156-5X 28-9x11; 112n.h.p.; oil engines.
The Finnish motorship *Alca* was sunk by an explosion at 11 p.m. on August 26th, 1951, four miles outside Sodershav lighthouse.

ALCAMO

1916; Short Bros.; 9,036 tons; 470-5x58-3x37-8; 633 n.h.p.; quadruple-expansion engines.
The British ship *Hermes* was at Algiers in June, 1940, when she was taken over by the French Vichy authorities and renamed *St. Francois*. She later became *Alcamo* under the Italian flag and was bombed and sunk by British aircraft on February 25th, 1943, 62 miles N.N.E. of Marittimo.

ALCANTARA

Royal Mail Steam Packet Co.; 1914; Harland & Wolff; 15,831 tons; 570x67-2x33-2; 17 knots; triple-expansion & turbine engines; eight 6 in. guns, two 6pdr., 1 m.g. The R.M.S.P. Co.'s liner, *Alcantara*, was taken over by the Admiralty at the beginning of the First World War and converted into an auxiliary cruiser. The ship formed one of the 10th Cruiser Squadron and was commanded by Capt. T. E. Wardle, her chief duty being the maintenance of the patrol between Scapa Flow and the coast of Norway. At about mid-day on February 28th, 1916, the position of the *Alcantara* was 60 miles E. of the north of the Shet-lands, where she was to contact her relief ship, the *Andes*, also an ex R.M.S.P. liner, when a wireless message instructed her to remain thereabouts and keep a sharp look-out for a suspicious steamship coming out of the Skagerrak. At about 8.45 on the following morning Capt. Wardle descried smoke on the horizon on his port beam. He bore up for the steamship, receiving at the same time a wireless warning from the *Andes* that this was in all probability the ship he was seeking. The *Alcantara* signalled to the vessel to stop, and fired two rounds of blank ammunition.

The ships had approached to within 1,000 yards of each other, the *Alcantara* coming up astern and lowering a boarding boat, when the stranger, which had Norwegian colours painted on her side and her name, *Rena*—Tonsberg, distinctly visible, dropped her bulwarks and ran out her guns. The British ship was at a disadvantage, though all her guns were manned, and she sustained a tremendous salvo which destroyed her telemotor steering gear, engine-room telegraph and telephones, as well as killing many men, but her guns replied at a range at which it was almost impossible to miss. The action was short but intense, and after some 15 to 20 minutes both ships were in a bad way. The German, which proved to be the raider *Greif*, was on fire and sinking, while the *Alcantara* had a heavy list to port and was making water so rapidly that Capt. Wardle gave orders to "abandon ship". She had been hit by a torpedo and gradually capsized, lying keel uppermost for a time, thus affording her crew an opportunity to secure rafts and pieces of wreckage.

The *Andes*, followed by the cruiser *Comus* and the destroyer *Munster*, now came upon the scene and picked up the survivors. Meanwhile the *Greif* had also been abandoned and the cruisers sank her by gunfire. Thus ended one of the most fiercely-fought actions between merchant ships in the First World War.

The *Alcantara* lost two officers and 67 men, Capt. Wardle being among the survivors. The total rescued from the *Greif* was 220 out of a complement of about 300.

ALCEDO

United States Maritime Commission; 1937; Fredrikstad Mek. VerkstedA/S; 1,349 tons; 265x42-1x13-9; 130 n.h.p.; compound engines.
The *Alcedo*, registered under the Panamanian flag, was torpedoed and sunk on February 28th, 1945, off Reykjavik. Three lives were lost.

ALCHIBA

N.V. Van Nievelt, Goudriaan & Co.; 1920; New Waterway Ship Bldg. Co.; 4,427tons; 385-5x50-3x26-5; 459n.h.p.; 11knots; triple-expansion engines.
The Dutch steamer *Alchiba* was one of Convoy WM 11 sailing from Alexandria to Malta. On June 14th, 1942, when N. of Tobruk the convoy was attacked by German dive bombers. The *Alchiba* was sunk with the loss of five lives.

ALCIDES

D/S AJS Eikland; 1930; Barclay, Curie & Co.; 7,634 tons; 460-5x59-5x34-1; 687n.h.p.; oilengines. The Norwegian tanker *Alcides* left Bandar Abbas on July 14th, 1943, for Fremantle, and was torpedoed and sunk on July 23rd. Forty-nine of her crew were lost. The master, chief officer and wireless operator were later reported to be prisoners of war in Japan.

ALCIONE

Italian Navy, torpedo boat; 1937; Ansaldo; 679 tons; 254-7x 26x7-7; 19,000 s.h.p.; 34 knots; turbine engines; 3-drum boilers; three 3-9 in. guns, four 37 mm.A.A., two 13 mm.A.A., 4T.T.
The Italian seagoing torpedo boat *Alcione* was torpedoed and sunk by a British submarine off Suda Bay, Crete, on December 11th, 1941. The vessel carried a complement of about 100.

ALCIONE C.

Cisterne Italiane Soliani & Saltamerenda; 1915; W. Gray & Co.; 521 tons; 178-1x31-2x10-8; 383 n.h.p.; oil engines. The Italian tanker *Alcione C.* was shelled and sunk by an Allied submarine on April 14th, 1943, two miles N. of Corsica.

ALCIRA

MossgielS.S. Co.; 1923; L.Smit&Zoon; 1,387 tons; 239-2x36-2x16-7; 185 n.h.p.; triple-expansion engines. The British ship *Alcira*, Capt. Hugh McCracken, was sunk by bombs from seaplanes 20 miles S. of Badalona on February 4th, 1938, during the Spanish Civil War. She carried a crew of 20 and was on a voyage from Immingham to Gibraltar and Barcelona.

ALCOA CADET

Alcoa S.S. Co. Inc.; 1919; Downey S.B. Corp.; 4,823 tons; 386-8x52-2x27-4; 339 n.h.p.; triple-expansion engines. The American ship *Alcoa Cadet* was sunk by an explosion, probably a mine, at Murmansk on June 21st, 1942.

ALCOA CARRIER

5,588 tons;
Alcoa S.S. Co. Inc.; 1919; Newburgh Shipyards Inc.; 5,400-5x54-2x30; 645 n.h.p.; steam turbine engines. The American ship *Alcoa Carrier* was torpedoed and sunk on May 25th, 1942, in the Gulf of Mexico, while on a voyage from Mobile to Kingston, Jamaica.

ALCOA GUIDE

Alcoa S.S. Co. Inc.; 1919; Downey S.B. Corp.; 4,834 tons; 386-8x52-2x27-4; 339 n.h.p.; triple-expansion engines. The American ship *Alcoa Guide* was torpedoed and sunk on April 16th, 1942, while on a voyage from New York to Trinidad. Seven lives were lost.

ALCOA PARTNER

Alcoa S.S. Co. Inc.; 1919; Merchant S.B. Corp.; 5,513 tons; 400-7x54-2x30-4; turbine engines.
Ten lives were lost when the American ship *Alcoa Partner* was torpedoed and sunk on April 26th, 1942, in the Gulf of Mexico.

ALCOA PATHFINDER

Alcoa S.S. Co. Inc.; 1941; Bethlehem Steel Co.; 6,797 tons; 397X60-2X34•6; 666 n.h.p.; turbine engines. The *Alcoa Pathfinder*, American flag, was torpedoed and sunk on November 22nd, 1942, off Punta de Oro, S. Africa. Five of the crew were lost. The ship was sailing from Port Said and Beira to Port Elizabeth.

ALCOA PILGRIM

Alcoa S.S. Co. Inc.; 1941; Bethlehem Steel Co.; 6,759 tons; 397-2x60-1x34-9; 666 n.h.p.; turbine engines. The American ship *Alcoa Pilgrim* was torpedoed and sunk on May 27th, 1942, in the Gulf of Mexico. Three rafts got away, but one was lost.

ALCOA PURITAN

Alcoa S.S. Co. Inc.; 1941; Bethlehem Steel Co.; 6,759 tons; 397-2x60-1x34-9; 666n.h.p.; turbine engines. The American ship *Alcoa Puritan* was torpedoed and sunk on April 30th, 1942, in the Gulf of Mexico.

ALCOA RAMBLER

Alcoa S.S. Co. Inc.; 1919; *Merchant S.B. Corp.*; 5,500 tons; 400'7 x 54'2 x 30'4; 645 n.h.p.; turbine engines. The American ship *Alcoa Rambler* was torpedoed and sunk on December 15th, 1942, on a voyage from Trinidad to Santos.

ALCOA SHIPPER

Alcoa S.S. Co. Inc.; 1920; *Merchant S.B. Corp.*; 5,491 tons; 400'7 x 54'2 x 30'4; 645 n.h.p.; turbine engines. Seven of the crew were lost when the American ship *Alcoa Shipper* was torpedoed and sunk on May 30th, 1942, on a voyage from Trinidad to New York.

ALCOA TRANSPORT

Alcoa S.S. Co. Inc.; 1918; *Globe S.B. Co.*; 2,084 tons; 251 x 43-7 x 19-2; 276 n.h.p.; triple-expansion engines. The American ship *Alcoa Transport* was torpedoed and sunk on October 10th, 1942, in the Gulf of Mexico, between Trinidad and Demerara. Six lives were lost.

ALCYONE

Van Nievelt Goudriaan & Go's. Stoomv. Maats.; 1921; *Kuy & Ree's Mch. & Schpsw.*; 4,534 tons; 375x52-1x25-8; 484 n.h.p.; triple-expansion engines. The Dutch ship *Alcyone* was sunk off Cape Town on March 16th, 1942, by a mine laid by the *Speybank*, which had been captured by the Germans and used as a minelayer while masquerading as a British ship.

ALDBOROUGH

Woodfield S.S. Co.; 1888; *Russell & Co.*; 2,314 tons; 289-5x 38-1x19-4; 220n.h.p.; triple-expansion engines. The British steamer *Aldbrough* was wrecked on Acklin Island near Cuba in July, 1904, while on a voyage from Daiquiri to Baltimore with a cargo of iron ore.

ALDEBARAN

Italian Navy, torpedo boat; 1936; *Ansaldo*; 642 tons; 267 x 27x7; 19,000s.h.p.; 34knots; turbine engines; 3-drum boilers; three 3-9 in. guns, four 37 mm.A.A., two 13 mm.A.A., 4 T.T. The Italian seagoing torpedo boats *Aldebaran* and *Altair* were together off Keos, in the approaches to the Gulf of Athens, on October 20th, 1941, when they ran into a minefield. Both struck mines and sank. The vessels carried complements of about 100.

ALDEN GIFFORD

Carrie Line; 1942; *Leathern D. Smith S.B. Co.*; 1,793 tons; 250-4x42-1x18-4; 242 n.h.p.; compound engines. The British ship *Alden Gifford* foundered during a gale on September 2nd, 1944, four miles N.N.W. of Longships. Four lives were lost.

ALDENHAM

British Navy, destroyer; 1941; *Cammell Laird*; 1,000 tons; 280x29x7-7; 19,000s.h.p.; 27-5 knots; turbine engines; 3-drum boilers; four 4 in. A.A., two 20 mm. A.A. The destroyer *Aldenhams*, Cdr. J. G. Farrant, was mined and sunk in the N.E. Adriatic on December 14th, 1944. Five officers and 116 ratings were killed. The ship was commissioned early in 1942 and escorted several of the Malta convoys.

ALDERAMESF

N.V. Van Nievelt Goudriaan & Co.; 1920; *Bremer Vulkan*; 7,886 tons; 475x60-7x32-8; 556 n.h.p.; 11 knots; triple-expansion engines. The Dutch steamship *Alderamin* was one of Convoy SC 122 from New York to Loch Ewe. On March 17th, 1943, when about 1,000 miles W. of the Fastnet the convoy was attacked by the German submarine U-221, which torpedoed and sank the *Alder amin* with the loss of 15 lives.

ALDINGTON COURT

Court Line; 1929; *W. Pickersgill & Sons*; 4,900 tons; 405-6 x 55-5x25-1; 482n.h.p.; 13-5knots; oilengines. The cargo liner *Aldington Court*, Capt. Stuart, was torpedoed and sunk by submarine in the South Atlantic about 900 miles W. of

Cape Town on October 31st, 1942. Capt. Stuart and 31 others were killed. The *Aldington Court* was not in convoy at the time of the attack.

ALECOS

N. A. Cottakis; 1906; *Richardson, Duck & Co.*; 4,395 tons; 355-2x51-1x26-8; 355 n.h.p.; triple-expansion engines. The Greek ship *Alecos* was wrecked on June 22nd, 1935. She broke in two and sank half a mile N. of Cape Veo in 20 fathoms.

ALECTO

Bristol Steam Nav. Co.; 1913; *G. Brown & Co.*; 919 tons; 210-2x33-2x13-3; 96r.h.p.; triple-expansion engines. The British steamship *Alecto* sank after a collision with the *Plavnik* on May 2nd, 1937, during a fog, about 16 miles off the Belgian coast.

ALERT

Huddart, Parker & Co.; 1877; *Glasgow*; 243 tons. The *Alert* was a small coasting steamer engaged in the Melbourne—Geelong trade. The ship was designed for short runs and not for heavy seas. When returning from Port Albert to Melbourne on December 28th, 1893, with a crew of 14 and 2 passengers, she experienced very rough weather. The seas flooded the engine room and extinguished the fires, the vessel soon becoming water-logged. Shortly after this the *Alert* sank by the stern, there being no time to take to the boats.

There was only one survivor, who was washed ashore unconscious and was revived by the local residents.

ALERT

Trinity House; 1911; *Ramage & Ferguson*; 777 tons; 198x 32-1x12-5; 98 r.h.p.; 10 knots; triple-expansion engines. The *Trinity House* yacht *Alert* was mined and sunk off Dover on April 15th, 1917. Eleven men were killed. The captain was among the survivors.

ALESSANDRIA

Italian Government; 1911; *Harland & Wolff*; 8,006 tons; 470 x 58-2x32-4; 697 n.h.p.; quadruple-expansion engines. The Italian steamship *Alessandria* was torpedoed and sunk by a submarine on May 4th, 1917, in the Mediterranean.

ALESSANDRO PODESTA

A. Lauro; 1897; *J. C. Tecklenborg A.G.*; 633 tons; 194-5X 26-1x13-3; 59 n.h.p.; compound engines. The Italian ship *Alessandro Podesta* struck a mine and sank on June 28th, 1940, in the Gulf of Asmara, Sardinia.

ALEUTIAN

Alaska S.S. Co.; 1898; *W. Cramp & Sons S. & E.B. Co.*; 5,708 tons; 360x50x32-2; 600 n.h.p.; triple-expansion engines. The American ship *Aleutian* struck a rock and sank on May 26th, 1929, in Uyak Bay, Amook Island, when on a voyage from Seattle to Alaska.

ALEX VAN OPSTAL

Cie. Maritime Beige (Lloyd Royal) Soc. Anon.; 1937; *Naksov Skibs. Ajs*; 5,965 tons; 420x57-1x26-4; 1,026n.h.p.; oil engines. The Belgian passenger ship *Alex van Opstal* struck a mine and sank on September 15th, 1939, five miles E. of the Shambles lightship. Capt. Delgoffe was the master and the ship was sailing from New York to Antwerp.

ALEXANDER

E.J. Odenius; 1882; *Goteborgs Mek. Verks.*; 432 tons; 149-6X 24-3x15-2; 29 n.h.p.; compound engines. The Swedish steamer *Alexander* was run down by the steamer *Goole* on October 8th, 1896. The collision took place in the Humber, the *Goole* being inward bound from Rotterdam. Ten of the *Alexander's* crew were drowned.

ALEXANDER MACOMB

ALEXANDER MACOMB

United States War Shipping Administration; 1942; Bethlehem Fairfield Shipyard Inc.; 7,191 tons; 423-1x57-1x34-8; 339 n.h.p.; triple-expansion engines.

The American cargo ship *Alexander Macomb* was torpedoed and sunk on July 3rd, 1942, on a voyage from New York to Archangel. Fifteen lives were lost.

ALEXANDER SHUKOFF

Dansk Russisk A/S; 1881; E. Withy & Co.; 1,652 tons; 257•5X34•6X17•9; 178 n.h.p.; compound engines. The Danish steamship *Alexander Shukoff* was torpedoed and sunk by a German submarine on August 22nd, 1917, in the North Sea.

ALEXANDER WENTZEL

Northern S.S. Co.; 1899; Irvine's S.B. & D.D. Co.; 2,838 tons; 320•5X45•9X20•4; 278 n.h.p.; triple-expansion engines. The Russian steamship *Alexander Wentzel* was sunk by a German submarine on February 29th, 1916, in the Mediterranean.

ALEXANDRA

C. Nielsen & Sons; 1906; W. Gray & Co.; 3,001 tons; 331 X 46-1x21-9; 280 n.h.p.; triple-expansion engines. The British steamship *Alexandra* was wrecked on January 21st, 1914, three miles N.E. of Sagres, while on a voyage from Odessa to Antwerp.

ALEXANDROS

M. A. Tachmindji; 1906; R. Stephenson & Co.; 4,343 tons; 355-2x50-1x27-5; 356n.h.p.; triple-expansion engines. The Greek cargo ship *Alexandros* was torpedoed and sunk by a German submarine on September 15th, 1940, about 320 miles N.W. of the Irish coast. Five of her crew were killed.

ALFA

J. Lauritzen; 1921; N.V. Werf "Zeeland"; 844 tons; 212-9x 31-4x13-2; 85 n.h.p.; triple-expansion engines. The small Danish ship *Alfa* was torpedoed and sunk on June 21st, 1940, off Helder.

ALFALFA

Buenos Ayres Great Southern Railway Co.; 1898; J. Blumer & Co.; 2,993 tons; 328x47-7x21-1; 300n.h.p.; 10 knots; triple-expansion engines. The steamship *Alfalpa* was torpedoed and sunk by the German submarine U.B. 2 on April 27th, 1917, off the Bay of Biscay. There were no survivors.

ALFHILD

Rederiaktieb Holland; 1876; A. McMillan & Son; 1,445 tons; 229-2x38-3x22-5.

The Swedish barque *Alfhild* was bound from Rio de Janeiro to Hobart with a general cargo. She carried a crew of 18. On October 10th, 1909, she was wrecked on the western coast of Tasmania. Of those on board five were drowned and seven perished from exposure after reaching shore.

ALFONSO

Strong, Reid & Page; 1878; Oswald, Mordaunt & Co.; 1,325 tons; 246-5x31-9x17-4; 163 n.h.p.; 9 knots; compound engines.

The steamship *Alfonso*, Capt. John Burnett, with a crew of 19 all told, was carrying a cargo of ore from Cartagena to Maryport when she collided with the Spanish collier *Hullera Espanola*, 943 tons, Aviles to Barcelona. The disaster took place in thick fog on the night of January 4th, 1902, the Spanish steamship sinking the British ship with every man on board save Capt. Burnett. The plight of the Spaniard was very serious and shortly afterwards she also sank with the loss of one man from her crew of 25. The survivors, including Capt. Burnett, were picked up by the Portuguese brigantine *Rodolphe* and brought to Oporto.

The ships were about 25 miles distant from the small Portuguese town of Aveiro when the collision occurred.

ALFRED D. SNOW

S. Watts; 1877; S. Watts; 1,987 tons; 232-7x42-3x29-1. The American wood sailing ship *Alfred D. Snow* was wrecked off Waterford, Ireland, on January 4th, 1888. Of those on board 28 were drowned.

ALFRED H. READ

Mersey Docks & Harbour Board; 1913; Murdoch & Murray; 457 tons; 140-1x27-6x12-7; 102n.h.p.; 8-5 knots; triple-expansion engines.

The steamship *Alfred H. Read* was mined and sunk at the entrance to the Mersey on December 28th, 1917. The captain and 38 members of the crew were killed.

ALFREDO

Hijos de Jose Tayd S. en C.; 1882; Birrell Stenhouse & Co.; 1,089 tons; 217x34-2x20.

The Spanish barque *Alfredo* sank during a gale on December 29th, 1924, off Ushant.

ALFREDO ORIANI

"Tirrenia" Soc. Anon di Nav.; 1918; Lloyd Royal Beige (Gt. Britain)Ltd.; 3,059 tons; 342x46-7x23-2; 433n.h.p.; triple-expansion engines.

The Italian ship *Alfredo Oriani* was bombed by British aircraft on September 11th, 1941, about 180 miles N. of Benghazi. Although badly damaged the ship drifted for two days and sank on the 13th.

ALGA

A. Lauro; 1917; Toledo S.B. Co.; 1,851 tons; 260-9x43-6x18-8; 260 n.h.p.; triple-expansion engines.

The Italian cargo ship *Alga* was torpedoed and sunk by a British submarine on October 10th, 1942, 12 miles from Djerba Island, Tunisia.

ALGARVE

Det Forenede Dampskibs Selskab.; 1899; Lobnitz & Co.; 1,274 tons; 229-4x33-9x15-1; 203n.h.p.; 9knots; triple-expansion engines.

The steamship *Algarve* was torpedoed and sunk by a German submarine 15 miles W.S.W. of Portland Bill on October 20th, 1917. The captain and 20 men were killed.

ALGARVE

Det Forenede Dampskibs Selskab.; 1921; Frederikshavns Vcerff & Flydedok; 1,355tons; 254-6x37-2x16; SOOih.p.; 10knots; triple-expansion & turbine engines.

The Danish steamship *Algarve*, Capt. J. Mikkelsen, was taken over by the Ministry of War Transport after the German occupation of Denmark in April, 1940. The vessel was managed for the Ministry by the firm of Chr. Salvesen and on February 19th, 1941, she was torpedoed and sunk by a German E-boat near Sheringham Light float. All hands, about 25 officers and men, were lost.

ALGERIA

Rederiaktieb Svenska Lloyd; 1921; OskarshamnMek.Verktsted; 1,619 tons; 270-9x41-2x22-6; 271 n.h.p.; triple-expansion engines.

The Swedish ship *Algeria* was bombed by German aircraft on January 18th, 1943, in the North Sea. She was taken in tow but broke in two and sank.

ALGERIE

Societe Generate de Trans. Mar. d Vap.; 1901; Forges et Chantiers de la Mediterranee; 4,035 tons; 331x46-5x22-5; 473 n.h.p.; triple-expansion engines.

The French steamship *Algerie* was torpedoed and sunk by a submarine on December 4th, 1916, in the Mediterranean.

ALGERIEN

Cie. de Navigation Mixte; 1881; A. McMillan & Son; 1,703 tons; 259-2x37x22-7; 232 n.h.p.; 11 knots; compound engines. The French steamship *Algerien* was torpedoed by a German submarine in the Mediterranean on, or about, November 29th, 1915. One boat containing eight persons came safely to land, one of the party having died when adrift. Twenty-nine persons were missing.

ALGERINE

British Navy, fleet minesweeper; 1942; Harland & Wolff; 950 tons; 235x35-5x10-5; 2,000h.p.; 16-5 knots; turbine engines; 3-drum boilers; one 4 in. A.A. gun, four 20 mm. The fleet minesweeper *Algerine* was torpedoed and sunk by a German submarine off the coast of Algeria on November 15th, 1942, during the North African landing operations.

ALGEROIS

Schiaffino, Nyer & Sitges; 1867; Palmers'Co.; 830 tons; 211-6 x 28x17-5; 110 n.h.p.; compound engines. The iron schooner rigged French steamer *Algerois* was lost near Bona, Algeria, on December 5th, 1898. Eleven of the crew were drowned.

ALGIER

Det Forenede Dampskibs Selskab; 1938; Helsingors Jernsk. & Msk.; 1,654 tons; 217-7x40-4x16-6; 338 n.h.p.; oilengines. The Danish motorship *Algier* was sunk by a German submarine on March 20th, 1940. A lifeboat containing 20 of the crew was picked up 15 miles N.N.W. of Foula, Shetlands, on March 21st. Five lives were lost.

ALGIERS

Franco-British Steamship Co.; 1882; Wigham Richardson; 2,361 tons; 300-2x37-2x26-8; 220n.h.p.; 9-5 knots; compound engines. The steamship *Algiers* was torpedoed and sunk by a German submarine three miles S. of the Owers Light vessel on February 26th, 1917. Eight were killed. The captain was among the survivors.

ALGOMA

Canadian Pad fie Railway Co.; 1883; Aitken & Mansell; 1,773 tons; 262-1x38-2x23-2; 300 h.p.; compound engines. The Canadian steamer *Algoma* was lost on Lake Superior on November 7th, 1885. Forty-five passengers and crew were drowned.

ALGORTA

Compania Naviera Sota y Aznar; 1898; W. Gray & Co.; 2,117 tons; 275x41-7x17-8; 208 n.h.p.; triple-expansion engines. The Spanish steamship *Algorta* was sunk by a German submarine on January 29th, 1917, off Ushant.

ALHAMA

Mossgiel S.S. Co.; 1938; Nylands Verksted; 1,352 tons; 250-7 x 41'2 x 14'8; 107 n.h.p.; compound engines. The British steamship *Alhama* was torpedoed and sunk on October 24th, 1941, about 300 miles W. of Gibraltar.

ALHAMBRA

The American sailing ship *Alhambra* came into collision with the London & North Western Railway's cattle steamer *Holyhead* at midnight on October 31st, 1883. The vessels met on the Holyhead—Dublin route, and both sank. The total number drowned was 15.

ALIAKMON

Theofano Maritime Co.; 1913; Northumberland S.B. Co.; 4,521 tons; 385-1x52x27-1; 320n.h.p.; triple-expansion engines. The Greek ship *Aliakmon* left Loch Ewe on November 11th, 1941, for Sydney, N.S., in convoy. She was last seen on November 20th, when the convoy dispersed in thick fog.

ALICANTE

R. M. Sloman, Jr.; 1934; Deutsche Werft A.G. Bet. Finkenwerder; 2,140 tons; 306-4x43-6x16-2; 309 n.h.p.; compound engines. The German steamship *Alicante* was sunk in Piraeus harbour on May 30th, 1941, by the explosion of the munitions ship *Knyaguinya Maria Luisa* (which see).

ALICE

Angf.A/BJernbarden; 1883; R.Dixon&Co.; 1,461 tons; 250 x 36x17-5; 145 n.h.p.; compound engines. The Swedish steamship *Alice* struck a mine and sank on October 22nd, 1914, in the North Sea.

ALICE DAVIES

D. W. Davies & Co.; 1868; R. & J. Evans & Co.; 590 tons; 172x28-5x18; The barque *Alice Davies* was leaving the Mersey for Adelaide on November 21st, 1878, with a general cargo, when she was run down by the steamship *Cherbourg*. She sank with the loss of five lives.

ALICE F. PALMER

U.S. War Shipping Administration; 1943; California S.B. Corpn.; 7,176 tons; 422-8x57x34-8; 339n.h.p.; triple-expansion engines. The American steamship *Alice F. Palmer* was torpedoed and shelled by a submarine on July 10th, 1943, and sank in 26° 30' S., 44° 10'E. She was on a voyage from Colombo to Durban.

ALICE H.

Stoomv. Maats. Sophie H.; 1911; Rotterdam Droogdok Moats.; 3,052 tons; 325-3x47-3x21-8; 249n.h.p.; triple-expansion engines. The Dutch steamship *Alice H.* struck a mine and sank on August 20th, 1914, in the Baltic.

ALIDA GORTON

Rederiaktieb Activ; 1902; W. Gray & Co.; 2,373 tons; 302-4 x 43-2x19-8; 221 n.h.p.; triple-expansion engines. The Swedish ship *Alida Gorton* was torpedoed and sunk in August 1940. Fourteen of the crew were picked up. She was on a voyage from London to St. John's, Nfl.

ALINE MONTREUIL

Montreuil & Co.; 1900; Strand Slipway Co.; 1,624 tons; 258-9 X36-8X16-7; 159n.h.p.; triple-expansion engines. The French steamship *Aline Montreuil* was torpedoed and sunk by a German submarine on September 21st, 1917, in the English Channel.

ALIPORE

Peninsular & Oriental Steam Navigation Co.; 1920; Palmers' Co.; 5,273 tons; 400-1x52-3x28-5; 3,000i.h.p.; 11-5 knots; triple-expansion engines. The P. & O. cargo liner *Alipore*, Capt. E. Lee, was torpedoed, shelled and sunk by a German submarine at 2.30 a.m. on September 30th, 1942, off Demerara. Ten persons were killed and ten were wounded. Capt. Lee was among the survivors.

ALIX

AjSAlix; 1889; Gourlay Bros. & Co.; 1,584 tons; 257-5 x 36 x 16-9; 157n.h.p.; triple-expansion engines. The Norwegian steamship *Alix* was sunk by a German submarine on October 22nd, 1916, in the English Channel.

ALL SERENE

The Australian ship *All Serene* was bound from Puget Sound, U.S.A., to Sydney, N.S.W. with a general cargo and about 40 passengers and crew. In January 1864 in heavy weather the ship capsized. Her position at the time was about 50 miles S. of Tonga. Thirty-one persons took to the boats, of whom 17 eventually reached Fiji.

ALLAN

Harry Persson; 1903; G. Brown & Co.; 640 tons; 180-6x29-2x 11-1; triple-expansion engines. The Swedish steamship *Allan* struck a mine and sank on January 3rd, 1948, about 30 miles off Swinoujscie. Nine of the crew were saved.

ALLAN JACKSON

Standard Oil Co. of New Jersey; 1921; Bethlehem Shipbuilding Co.; 6,635 tons; 435x56x33-6; 2,800i.h.p.; 10-2 knots; triple-expansion engines. The American tanker *Allan Jackson*, Capt. Felix W. Kretchmer, left Cartagena, Colombia, for New York on January 11th, 1942, with 72,870 barrels of crude oil. In the early hours of Sunday, the 18th, when off Cape Hatteras, the vessel was struck on the starboard side by two torpedoes which exploded in quick succession. She caught fire immediately and then broke in two, going down with

ALLEGRA

a loss of 22 men out of a crew of 35. Capt. Kretchmer was adrift on some planks for seven hours before he was picked up by the U.S. destroyer *Roe*, which also rescued the men in the boats.

ALLEGRA

Cia. Armatoriale Italiana; 1928; *Furness S.B. Co.*; 4,350 tons; 374-3x52-2x27-6; triple-expansion engines. The Panamanian ship *Allegra* sprang a leak and was abandoned in a sinking condition on July 21st, 1958, in lat. 16° 43' N., long. 60° 16' E. Twenty-three of the crew were saved.

ALLENDE

Nolissement S.S. Co.; 1928; *Northumberland S.B. Co.*; 5,081 tons; 412-6x55-3x26-1; 442 n.h.p.; quadruple-expansion engines. The British ship *Allende* was torpedoed and sunk by a German submarine on March 17th, 1942, off the W. coast of Africa between Table Bay and Freetown.

ALLISTER

J. S. Webster & Sons; 1903; *Swan Hunter & Wigham Richardson*; 1,597 tons; 270-4x36x19-3; 238n.h.p.; triple-expansion engines. The British steamship *Allister* was torpedoed and sunk on May 29th, 1942, while on a voyage from Kingston, Jamaica, to Tampa, Fla.

ALLONBY

Allonby Steamship Co.; 1883; *Kish, Boolds & Co.*; 1,212 tons; 240x34-1x15-4; 140 h.p.; compound engines. The British steamer *Allonby* was lost in the Bay of Biscay on January 14th, 1894. Many of the crew were drowned.

ALMA DAWSON

Jubilee Steam Nav. Co.; 1917; *Tyne I.S.B. Co.*; 3,985 tons; 360-1x51-1x24-3; 348 n.h.p.; triple-expansion engines. The British ship *Alma Dawson* struck a mine and sank on November 24th, 1940, while on a voyage from Montreal to Ipswich.

ALMEDA STAR

Blue Star Line; 1926; *Cammell Laird*; 14,935 tons; 578-9X 68-3x42-7; 1,909 n.h.p.; 16 knots; turbine engines. The liner *Almeda Star*, Capt. H. C. Howard, was torpedoed and sunk by a German submarine about 350 miles W. of the island of Lewis in the Hebrides on January 17th, 1941. All on board, 194 passengers and 166 crew, were killed.

ALMENARA

Mossgiel S.S. Co.; 1922; *Osbourne, Graham & Co.*; 1,851 tons; 260-1x41-2x18-5; 195n.h.p.; triple-expansion engines. The British ship *Almenara* sank after striking a mine on September 20th, 1943. She was 20-25 miles S.S.E. of Taranto.

ALMERIA LYKES

U.S. Maritime Commission; 1940; *Federal S.B. & D.D. Co.*; 7,773 tons; 469x69-6x29-2; 1,417n.h.p.; turbine engines. Following an attack from the air on August 13th, 1942, the American steamship *Almeria Lykes* had to be abandoned near Pantellaria Island in the Mediterranean. She was later sunk by a torpedo fired from a German motor torpedo boat.

ALMIRANTE OQUENDO

Spanish Navy, armoured cruiser; 1891; *Bilbao Dockyard*; 6,889 tons; 340x65x21-5; 13,000 i.h.p.; 20 knots; triple-expansion engines; two 11 in. guns, ten 5-5 in., eight 2-2 in., eight 1-4 in., 2 m.g., 6 T.T.

The *Almirante Oquendo* was a unit of the Spanish Atlantic Squadron under Admiral Cervera which, during the American-Spanish War, left Santiago on the morning of July 3rd, 1898, in an attempt to run the gauntlet of the powerful U.S. blockading fleet and reach Havana. The ship had a complement of 487 and was commanded by Capt. Juan Lazaga. The squadron consisted of four armoured cruisers and two destroyers, the *Almirante Oquendo* being the last ship in the cruiser line. She thus became the target for the pursuing ships as they drew within range, and was hit repeatedly. Her forward 11 in. turret was destroyed and all the gun-crew killed and wounded. Two of her 5 • 5 in., guns were disabled and she was set on

fire in several places. Capt. Lazaga was killed by a shell and soon afterwards all further resistance became useless. The ship was turned shorewards and run aground, where her magazines exploded and she became a total wreck, having lasted through barely one hour of the action.

The whole of the Spanish Atlantic Squadron was destroyed. A full account of the battle will be found under the name of the flagship, the *Infanta Maria Teresa*.

The number killed on board the *Almirante Oquendo* approximated to 65 officers and men.

ALMKERK

Vereenigde Nederlandsche Scheepv. Maats.; 1934; *Nederlandsche Maats.*; 6,810 tons; 460-1x60-2x27-3; 2,325 n.h.p.; oil engines.

The Dutch motorship *Almkerk* was torpedoed and sunk on March 16th, 1941. She was on a voyage from Table Bay to Avonmouth.

ALMORA

Erling Mortensen A/S; 1905; *Murdoch & Murray*; 2,433 tons; 299-3x44-5x19-9; 238n.h.p.; triple-expansion engines. The Norwegian cargo ship *Almora* struck a mine and sank on May 6th, 1944, off Hustadvikja.

ALMSFORD

John Wood & Co.; 1883; *R. Thompson & Sons*; 1,449 tons; 240x36-2x15-4; 99 n.h.p.; compound inclined engines. The British steamship *Almsford* was sunk by collision in January, 1891, near Cape Cornwall while on a voyage from Swansea to Sables d'Olonne with a cargo of coal.

ALNE HOLME

Hine Brothers (Holme Line); 1876; *J. L. Thompson & Sons*; 1,036 tons; 220-3x31x16-9; 98 n.h.p.; compound engines. The British steamship *Alne Holme* was wrecked in May, 1895, off Burriana while sailing from Carthagen to Liverpool with ore and fruit cargo.

ALNMERE

Irismerie S.S. Co.; 1897; *J. Readhead & Sons*; 3,252 tons; 322X46-6X24-3; 283 n.h.p.; triple-expansion engines. The British steamship *Alnmere* was wrecked in January, 1909, at Abaco while sailing from Baltimore to Vera Cruz with a cargo of coal and coke.

ALNMOOR

Runciman Shipping Co.; 1922; *W. Doxford & Sons*; 6,573 tons; 420x54x34-3; 577n.h.p.; triple-expansion engines. The British steamship *Alnmoor* was on a voyage from New York and Halifax for Glasgow. She left Halifax in convoy on January 31st, 1941, but fell back during a gale on February 10th, and was not seen again.

ALNWICK CASTLE

Union-Castle Line; 1901; *W. Beardmore & Co.*; 5,900 tons; 400-4x50-2x26-8; 650n.h.p.; 14 knots; triple-expansion engines.

The liner *Alnwick Castle*, Capt. B. Chave, was an intermediate steamer of the Union-Castle Line. In 1914 she was taken over by the government as a troopship and in 1915 was at the Dardanelles. Later she returned to the company and continued to sail between Southampton and the Cape as a passenger vessel.

On March 17th, 1917, she left Plymouth for South Africa having on board 14 passengers and 100 crew. Next day she picked up 25 survivors from the Ham steamship *Trevoise*, which had just been torpedoed by a submarine.

At 6.10 on the morning of the 19th, when 310 miles W.£S. of the Bishop Rock, Scilly Isles, the *Alnwick Castle* was torpedoed without warning and sank within half-an-hour. The lifeboats, of which there were six, got away without mishap, but the weather worsened and the boats were separated. Two of them were never heard of again but the Chief Officer's boat, containing 31 persons, drifted about for nine days before being rescued by Spanish fishing boats and taken into Carino, near Cape Ortegal. Ten persons had died, some had lost their reason, and all were suffering from intense thirst, the water having given out some days before.

The captain's boat had fared little better. She was five days adrift and was picked up by the French Fabre liner *Venezia*. Four persons had died from exposure.

When a final muster of the survivors was made some weeks later it was found that out of 139 persons on board the *Almwick Castle* when she was torpedoed, 40, including three of the crew of the *Trevose*, had been drowned or had died.

ALOE

Union Govt. of S. Africa (Railways & Harbours Administration); 1925; R. Duncan & Co.; 5,047 tons; 404-9x53x27-6; 477 n.h.p.; triple-expansion engines.

The South African steamship *Aloe* was on a voyage from Bunbury to Durban on the 5th April, 1943, when she was torpedoed and sunk by a submarine.

ALOHA

International Union Maritime Corp.; 1920; Pacific Coast S.B. Co.; 6,063 tons; 402-5x53x —; triple-expansion engines. The Panamanian steamship *Aloha* was on a voyage from Mormugao to Murooran when she sprang a leak and sank on January 5th, 1958, off the N. coast of Luzon.

ALONDRA

Yeoward Bros.; 1899; D. J. Dunlop & Co.; 2,244 tons; 298-7x38-3x18; 380 n.h.p.; triple-expansion engines. The British steamship *Alondra* was wrecked on Kedge Rocks, near Baltimore, Ireland, on December 29th, 1916, while on a voyage from Las Palmas to Liverpool.

ALPHACCA

N.V. Van Nievelt Goudriaan & Go's Stoomv. Maats.; 1928; W. Gray & Co.; 5,759 tons; 409-9x56-2x27; 592 n.h.p.; 12 knots; triple-expansion engines.

The Dutch steamship *Alphacca* was on a voyage from Table Bay to Freetown when she was torpedoed and sunk by the German submarine U-505 in 1° 50' N., 7° 40' W. on the 4th April, 1942. Fifteen were killed.

ALPHARD

Van Nievelt Goudriaan & Co.'s. Stoomv. Maats.; 1915; Rotterdam Droogd. Maats.; 3,551 tons; 361-4x49-6x22-1; 301 n.h.p.; triple-expansion engines.

The Dutch ship *Alphard* was in collision with the *New York* and sank on May 7th, 1936, on a voyage from Rotterdam to Melilla.

ALPHERAT

Van Nievelt Goudriaan & Co.; 1928; W. Gray & Co.; 5,759 tons; 409-8x56-2x27; 592 n.h.p.; triple-expansion engines. The Dutch steamship *Alpherat* was bombed and sunk in the Mediterranean on December 21st, 1943, when returning from Port Said to the United Kingdom.

ALPHONSE CONSEIL

Societe les Affreteurs Reunis; 1884; Palmers'Co.; 1,591 tons; 241 x 34-3 x 17-1; 196 n.h.p.; compound engines. The French steamship *Alphonse Conseil* was torpedoed and sunk by a German submarine on January 6th, 1917, in the Bay of Biscay.

ALPINO

Italian Navy, destroyer; 1938; Riuniti (Ancond); 1,620 tons; 339x38-5x10-7; 48,000s.h.p.; 39 knots; turbine engines; 3-drum boilers; four 4-7 in. guns, six 37 mm. A.A., four 13 mm. A.A., 6T.T.

The Italian destroyer *Alpino* was bombed and sunk in shallow water at Spezia during an Allied air attack on April 19th, 1943. The vessel carried a complement of about 200.

ALSACE

Valoussiere, Brignaudy & Lieutaud; 1917; Howland & Nelson; 1,090 tons; 192-3x40-3x20-3; oil engines. The French motorship *Alsace* caught fire and sank on January 21st, 1924, 45 miles off the Balearic Islands.

ALSACIEN

Cie. des Bateaux a Vapeur du Nord; 1923; Furness S.B. Co.; 3,819 tons; 363-3x52x23-4; 538 n.h.p.; triple-expansion engines. The French cargo ship *Alsacien* was sunk by a German submarine on January 24th, 1940, on a voyage from Tunis to Rouen.

ALSTERUFER

Rob. M. Sloman, Jr.; 1939; Eriksbergs M.V. Aktieb.; 2,729 tons; 314-4x50-3x23-3; 608n.h.p.; oilengines. The German motor vessel *Alsterufer*, homeward-bound from the Far East with survivors from three German destroyers sunk in action, was bombed and sunk by British aircraft on December 27th, 1943, W. of Cape Finisterre.

ALTAIR

A/SAltair; 1884; T. Turnbutt & Son; 1,674 tons; 260x37-1 X 18-5; 170 n.h.p.; compound engines. The Norwegian steamer *Altair* was torpedoed and sunk by a German submarine on October 18th, 1917, in the Bristol Channel.

ALTAIR

Italian Navy, torpedo boat; 1936; Ansaldo; 642 tons; 269x27x 7; 19,000s.h.p.; 34 knots; turbine engines; 3-drum boilers; three 3-9 in. guns, four 37 mm., two 13 mm., 4 T.T. The Italian seagoing torpedo boats, *Aldebaran* and *Altair* were together off Keos, in the approaches to the Gulf of Athens, on October 20th, 1941, when they ran into a minefield. Both struck mines and sank. The vessels carried complements of about 100.

ALTENFELS

Deutsche Dampfs. Ges. "Hansa"; 1925; Vulcan Werke A.G.; 8,132 tons; 469-1x60-4x32-5; 996n.h.p.; oilengines. The motor vessel *Altenfels* was shelled and sunk by Norwegian warships on June 4th, 1943, south of Bergen.

ALTMORE

Thorn & Cameron; 1887; R. Duncan & Co.; 1,772 tons; 265-2 X 39x23-2. The four masted steel sailing ship *Altmore* was lost off the Fiji Islands on April 22nd, 1889. Twelve of the crew were drowned.

ALUDRA

U.S. War Shipping Administration; 1942; Permanente Metals Corp.; 7,181 tons; 422-8x57x34-8; 339 n.h.p.; triple-expansion engines.

The steamship *Aludra*, built as the *Robert T. Lincoln*, was taken over by the U.S. Navy on completion. On June 23rd, 1943, she was torpedoed and sunk by Japanese aircraft off the Solomon Islands.

ALUM CHINE

Alum Chine S.S. Co.; 1905; A. Rodger & Co.; 1,767 tons; 268-9x40-5x18-1; 189 n.h.p.; triple-expansion engines. The British steamship *Alum Chine* was blown up on March 7th, 1913, at Baltimore while loading a cargo of dynamite.

ALVA

Glen & Co.; 1934; Burntisland S.B. Co.; 1,584 tons; 265X 40-5x16-3; 127n.h.p.; triple-expansion engines. The British cargo ship *Alva* was torpedoed and sunk on August 19th, 1941, about 300 miles W. of Ushant.

ALVI

CompaniadeNav.Tulev.S.A.; 1913; W. Harkess & Son; 1,500 tons; 247x38x14-6; 175 n.h.p.; triple-expansion engines. The Panamanian cargo ship *Alvi* struck a mine and sank on January 7th, 1956, on a voyage from Soderhamn to Velsen.

ALVISE DA MOSTO

Italian Navy, destroyer; 1929; Quarnaro; 1,628 tons; 352 x 33-5x16-7; 71,000 s.h.p.; 44 knots; turbine engines; 3-drum boilers; six 4-7in. guns, four 37mm.A.A., six 13mm.A.A., 4 T.T. On December 1st, 1941, a British light force from Malta, known as Force K, led by Capt. W. G. Agnew in the light cruiser *Aurora*, 5,270 tons, with her sister-ship the *Penelope*, was sweeping the Central Mediterranean in the hope of intercepting Italian convoys

ALWAKI

to or from Libya. The force was successful in sinking the supply ship *Adriatico*, 1,976 tons, carrying artillery, stores and ammunition. Later on the same day the tanker *Iridio Mantovani* and the destroyer *Alvise da Mas to*, acting as escort, were attacked and sunk.

The destroyer defended its charge with great bravery, but was hit and blown up with great loss of life. The *Iridio Mantovani*, which was carrying 10,000 tons of oil fuel, also lost many of her crew. A number of survivors was picked up by the British, who suffered neither damage nor casualties.

ALWAKI

VanNieveltGoudriaan&Co.; 1922; *Werf "Maasdijk"*; 4,533 tons; 375x52-2x25-8; 497 n.h.p.; triple-expansion engines. The Dutch steamship *Alwaki* sank after an explosion in the engine room on July 10th, 1940, when ten miles N.E. of Cape Wrath.

ALYSSE

Free French Navy, corvette; 1942; *British Isles*; 925 tons; 193 x 32x16; 2,800 i.h.p.; 15-5 knots; triple-expansion engines; one 4 in.A.A. gun, one 40 mm.A.A., two 20 mm.A.A. The French corvette *Alysse* was originally the British *Alyssum*. On February 10th, 1942, the vessel was escorting a convoy in the West Atlantic when she was torpedoed and sunk by a submarine. Her normal complement was 85.

ALYSSUM

British Navy, sloop; 1915; *Earle's Shipbuilding Co.*; 1,250 tons; 267-7x33-5x11-7; 2,400 i.h.p.; 17 knots; triple-expansion engines; two 4-7 in. guns, two 3 pdr.

The sloop *Alyssum* was mined and sunk off the S.W. coast of Ireland on March 18th, 1917. At the time of her loss she was one of the vessels based on Queenstown under command of Admiral Sir Lewis Bayly for service as a convoy escort.

AMAGI

Japanese Navy; 1942; 18,500 tons; 800 (approx)x—X—; 30 knots; turbine engines; twelve 5 in.A.A. guns, 45 aircraft. The aircraft carrier *Amagi* was bombed and sunk by carrier-based aircraft of the U.S. Navy on July 24th, 1945, off Yawata, Japan.

AMAGIMARU

Nippon Yusen K.K.; 1924; *Yokohama Dock Co.*; 3,165 tons; 315-5x46x27; 284 n.h.p.; triple-expansion engines. The steamship *Amagi Maru* was torpedoed and sunk by a British submarine on May 3rd, 1944, N. of the Nicobar Islands.

AMAGIRI

Japanese Navy, destroyer; 1930; *Isikawaitima*; 1,700 tons; 371-5x33-7x9-7; 40,000s.h.p.; 34 knots; turbine engines; six 5 in. guns, 4 A.A.m.g., 9 T.T.

The Japanese destroyer *Amagiri* was sunk in a minefield sown by U.S. Army aircraft in the Macassar Strait on April 23rd, 1944. The destroyer's normal complement was 197.

AMAGISAN MARU

MitsuiBussanKaisha; 1933; *MitsuiBussan Kaisha*; 7,620 tons; 454x60x37; 1,230 n.h.p.; oilengines.

The motor vessel *Amagisan Maru* was sunk by U.S. carrier-based aircraft on February 17th, 1944, in the Caroline Islands area.

AMAHO MARU

Azuma Risen K.K.; 1898; *A. Rodger & Co.*; 2,769 tons; 314-4X44x20-7; 250 n.h.p.; triple-expansion engines.

The steamship *Amaho Maru* was torpedoed and sunk by the U.S. submarine *Flying Fish* on April 17th, 1943, S.E. of Hokkaido.

AMAKASU MARU No. 1

Amakasu Sangyo Kisen K.K.; 1939; *Kawaminami Kogyo K.K.*; 1,913 tons; 271-6x40x20-3; 150n.h.p.; triple-expansion engines.

The steamship *Amakasu Maru No. 1* was torpedoed and sunk by the U.S. submarine *Triton* on December 24th, 1942, off Wake Island.

AMAKURA

BookerBros.McConnell&Co.; 1924; *Caledon Shipbuilding Co.*; 1,987 tons; 280-1x42-2x18-7; 250n.h.p.; 10-5 knots; triple-expansion engines.

The steamer *Amakura*, Capt. Thomas Orford, was in the Caribbean Sea some 90 miles S.E. of Morant Point, Jamaica, on August 25th, 1942, when she was torpedoed and sunk by a submarine. Fourteen men were killed and three were wounded. Capt. Orford was among the survivors. The *Amakura* was not in convoy at the time of the attack.

AMAKUSA MARU

Kita Nippon Kisen K.K.; 1901; *Akt. Ges. Neptun*; 2,345 tons; 279-3x40-6x14-4; 426n.h.p.; triple-expansion engines. The steamship *Amakusa Maru* was sunk by the U.S. submarine *Bang* on November 23rd, 1944, E. of Formosa.

AMALFI

Italian Navy, second class battleship; 1908; *Odero*; 10,118 tons; 461x69x24-3; 19,000 i.h.p.; 22-5 knots; triple-expansion engines; Belleville boilers; four 10 in. guns, eight 7-5 in., sixteen 14 pdr., two 12 pdr., 3 T.T.

The Italian battleship *Amalfi* has been described in various quarters as an armoured cruiser, a battle cruiser and a battleship. Probably the best definition is that of a lightly armed, lightly armoured second class battleship of the pre-dreadnought era. On July 7th, 1915, the ship was returning to Venice after a bombardment of the Austrian coastal defences near Trieste, under escort of two light cruisers and several destroyers. At dawn, when about 15 miles from Venice, the ship was attacked by a submarine, the U.B. 15, Cdr. H. von Heimburg. Only one torpedo was fired and this struck the *Amalfi* a mortal blow, and in a very short time she sank with about 150 of her complement of 550. The remaining 400 were taken off by the escorting vessels.

One remarkable incident which is probably unique in maritime annals occurred in this disaster. The engineer-commander of the *Amalfi* when swimming close to the sinking ship was drawn under and his arm severed by one of the screws. He came to the surface and was assisted by the ship's surgeon who was swimming nearby. The surgeon managed to make a tourniquet of his belt and affixed it to the wounded man's arm while still in the water. Later both were picked up by a boat from one of the other ships.

The U.B. 15 was a small-type submarine with a crew of 14, and had been sent overland in sections to Pola.

AMAMI MARU

Oshima Kisen K.K.; 1908; *Osaka Iron Works*; 747 tons; 180x27-2x18-1; 67n.h.p.; triple-expansion engines. The steamship *Amami Maru* left Kwannon on April 8th, 1941, for Korea and was never seen again.

AMANDA

P. Pedersen & Son; 1906; *Akers Mek. Vaerks.*; 1,170 tons; 225-3x33-7x19-1; 111 n.h.p.; triple-expansion engines. The Norwegian steamship *Amanda* was wrecked on March 4th, 1927, at Tamatave during a cyclone.

AMAPALA

Standard Fruit & S.S. Co.; 1924; *Swan Hunter & Wigham Richardson*; 4,148 tons; 350x50-2x29-3; 668n.h.p.; triple-expansion engines.

The Honduran steamship *Amapala* was on a voyage from New Orleans to La Ceiba on May 15th, 1942, when she was shelled by a German submarine and sank on the following day.

AMARYLIS

Amaryllis S.S. Co.; 1918; *North of Ireland S.B. Co.*; 4,328 tons; 370-4x51-2x25-8; 403 n.h.p.; triple-expansion engines. The Panamanian steamship *Amaryllis* was on a voyage from Kossair to Durban on December 2nd, 1942, when she was torpedoed and sunk by a submarine.

AMARYLLIS

Joseph Robinson & Sons; 1904; *Tyne I.S.B. Co.*; 4,064 tons; 350x48x17-9; 372 n.h.p.; triple-expansion engines. The British steamship *Amaryllis* was wrecked in February, 1908, at

Kalkudah, Ceylon, while on a voyage from Calcutta to Bombay with a cargo of coal.

AMATLAN

Petroleos Mexicanos S.A.; 1923; *Ansaldo S.A.*; 6,511 tons; 418 • 3 X 54 • 8 X 30 • 9; 399 n.h.p.; quadruple-expansion engines. The Mexican tanker *Amatlan* was torpedoed and sunk on September 4th, 1942, 60 miles off Tampico.

AMATO MARU

Ishihara Risen K.K.; 10,238 tons. The tanker *Amato Mam* was torpedoed and sunk by the U.S. submarine *Blenny* on February 26th, 1945, off Cana, Indo-China.

AMATSU MARU

Nippon Kaiun K.K.; 10,567 tons. The tanker *Amatsu Maru* was sunk by U.S. carrier-based aircraft on March 30th, 1944, off Babelthuap, Palau Islands.

AMATSUKAZE

Japanese Navy, destroyer; 1939; *Maizuru*; 2,000 tons; 364 x 35x11; 45,000 s.h.p.; 36 knots; turbine engines; six 5 in. guns, 2 m.g., 8 T.T.

The Japanese destroyer *Amatsukaze* was bombed and sunk off Amoy by U.S. Army bombers on April 6th, 1945. The destroyer carried a complement of over 200.

AMAZON

Royal Mail Steam Packet Co.; 1851; *R. & H. Green*; 2,256 tons; 300x41x32; *SOO* i.h.p.; 12 knots; engines, cylinders 96 in. diam. by 9 ft. stroke, paddles 41 ft. diam.

The R.M.S.P.Co.'s liner *Amazon* was a new ship sailing on her maiden voyage to the West Indies. She was a paddle-steamer, built entirely of wood and fully rigged.

The *Amazon* left Southampton on Friday, January 2nd, 1852, with 161 persons on board, of whom 110 were crew. A strong head-wind was blowing and in order to make a quick passage across the Bay of Biscay to pick up fine weather beyond, the master, Capt. Symons, drove his small 800 horse-power engines at full speed. As a result the bearings became overheated and there was considerable difficulty in the engine room.

On Sunday morning, January 4th, when about 110 miles W.S.W. of Scilly, Mr. Treweek, the second officer, observed flames coming from the direction of the engine room. He gave the alarm and the watch went to fire stations, an examination revealing that the outbreak had occurred in the ship's store, where a quantity of oil and tallow was kept. Despite every attempt to conceal the news from the passengers it leaked out, and on the orders of Capt. Symons they were confined to the saloon below, an action which had the effect of engendering such panic among them that they burst open the door^s swept aside the stewards, and rushed on deck.

The state of affairs was now very grave. The fire having started near the engine room it was found impossible to stay there, though the fourth engineer made an heroic attempt to stop the engines. From this moment until the end, the engines, quite out of control, continued to force the vessel through the water.

The hose-pipes were burned through and buckets proved useless. In the end the captain ordered the boats, of which there were nine, but two of these were found to be on fire. Panic had now descended upon crew as well as passengers, and with the ship running before the wind, her sails set and her engines going, she became nothing less than a raging furnace. Finally her small magazine of powder, kept for the guns in case of piracy, exploded, and she went to the bottom.

A large barque hove in sight just before the end, but probably from fear of approaching too near and becoming involved in the fire, rendered no assistance and sailed away into the darkness. Twenty-one persons were saved in one boat. Thirteen in another boat under the guidance of Lt. Grylls, R.N., a passenger, were picked up by a Dutch galliot in the Bay of Biscay after an adventurous voyage. The rest of the survivors were rescued by another Dutch vessel and taken to Brest.

In all 59 persons were saved and 102 drowned. Capt. Symons went down with his ship.

AMAZON

British Navy, screw sloop; 1865; *Pembroke Dockyard*; 1,081 tons; 187x36x9-2; 300 n.h.p.; 12 -4 knots; compound engines; 4 guns.

The sloop *Amazon*, Cdr. J. E. Hunter, was on her way from Spithead to Halifax, Nova Scotia. She was a new vessel just commissioned and was constructed of wood. Early on the morning of Tuesday, July 10th, 1866, the sloop was off Portland when she ran into the s.s. *Osprey*, Capt. Burtridge, of the Cork Steam Navigation Co., cutting her in two and causing her to sink in a few minutes with the loss of ten lives. The *Amazon* sustained vital damage and her crew, after picking up 22 survivors from the *Osprey*, were ordered to take to the boats. Fortunately there was sufficient room for all on board and there were no casualties among the sloop's complement.

A court-martial was held on board H.M.S. *Victory* at Portsmouth under presidency of Rear Admiral George C. Wellesley, C.B. Evidence was placed before the Court to the effect that the sloop was under command of Sub. Lt. Alfred C. Loveridge at the time of the collision which took place about 1 a.m., the *Amazon* striking the *Osprey* on the port quarter about one third of her length from the stern. The navigation lights on both vessels were burning brightly and the night was clear and calm. The steamship, which was under command of the first mate, sank within five minutes and the *Amazon* sank at about 3.30 a.m., just as the weather was beginning to thicken.

Sub. Lt. Loveridge was dismissed from the service, but recommended to the favourable consideration of the Lords Commissioners of the Admiralty "... on account of the high character given him for zeal in the service".

AMAZON

R. Hill; 1886; *Barclay, Curie & Co.*; 2,062 tons; 286-7x42-5 x 24-1.

The British four masted barque *Amazon*, Capt. A. Garrick, left Port Talbot on August 31st, 1908, for Chile with a cargo of coal. A heavy gale sprang up overnight and the ship anchored in Mumbles Roads. In the morning of September 1st, the anchor cables parted and the ship drove ashore on Port Talbot beach. The masts went by the board and the ship broke up amidships and settled into the sand. Seven of her crew of 25 were saved, 6 bodies were washed up at Port Talbot and the bodies of Capt. Garrick and 8 others were found at Porthcawl on the 9th.

AMAZONE

Koninkl. Nederlandsche Stoomboot Maats.; 1922; *J. Meyer's S.B.Co.*; 1,294 tons; 255-1x36-8x13-3; 138n.h.p.; 8-5 knots; triple-expansion engines.

The Dutch steamer *Amazone* was on passage from Curacao to New York on May 6th, 1942, when she was torpedoed by the German submarine U-333. The attack took place N.E. of Miami, and the *Amazone* sank with the loss of 14 lives.

AMBACA

Emp. Nacional de Nav. a Vap. para a Africa Portuguesa; 1889; *Earle's Co. Ltd.*; 2,868 tons; 340-8x41-1x18-7; 447n.h.p.; triple-expansion engines.

The Portuguese steamship *Ambaca* was torpedoed and sunk by a German submarine on December 23rd, 1917, off the coast of Portugal.

AMBASSADOR

T. & J. Harrison; 1872; *J. Laing*; 1,951 tons; 300-9x34-1x X23-6; 250 h.p.; compound engines.

The British steamer *Ambassador* with a crew of 43 was run down by the American ship *George Manson*, homeward-bound from Calcutta. The collision took place in the North Atlantic on December 25th, 1876, the steamer sinking with 23 of her crew.

AMBROSE FLEMING

Stephenson Clarke & Co.; 1941; *Burntisland S.B. Co.*; 1,555 tons; 247 x 39-6 x 16 • 6; 184n.h.p.; 9-5 knots; triple-expansion engines.

The collier *Ambrose Fleming*, Capt. M. Mackenzie, was managed for the London Power Company by the firm of Stephenson Clarke. On April 28th, 1941, the vessel was torpedoed and sunk by a German E-boat near the Dudgeon light vessel. Eleven men were killed. Capt. Mackenzie was among the survivors.

AMELIA

AMELIA

Mackintyre Bros. & Co.; 1873; *Softley*; 1,690 tons; 257x32-1 X19-8; 120 n.h.p.; compound inverted engines. The British steamship *Amelia* was wrecked on April 4th, 1880, on the Laccadive Islands, on a voyage from Cochin to London.

AMELIE

Armement Adolf Deppe; 1883; *G.Howaldt*; 1,135 tons; 226 x 32-8x14-9; 140 n.h.p.; compound engines. The Belgian steamship *Amelie* was torpedoed and sunk by a German submarine on November 13th, 1917, in the English Channel.

AMERICA

Pacific Mail Steamship Co.; 1869; *New York*; 4,560 tons; 400 x — x—; 1,000 h.p.; 11 knots.

The Pacific Mail paddle steamship *America* was lying at anchor in the harbour of Yokohama on the night of August 24th, 1872, when she caught fire. She had on board many hundreds of passengers, chiefly Chinese returning from California, and a valuable cargo, part of which was 1,600,000 Mexican dollars. The fire spread with terrible swiftness and within a few hours the vessel was burned to the water's edge. Boats from ships in the harbour rendered prompt assistance but between 60 and 70 persons lost their lives. Many of the unfortunate Chinese were drowned owing to their persistence in clinging to the wooden boxes containing the money they had saved while in California.

AMERICA

A/S Norge Mexico GulfLinjen; 1914; *Sorlandets Skibsbyggeri*; 3,706 tons; 357-5x48x27-2; 310n.h.p.; triple-expansion engines.

The Norwegian steamship *America* was torpedoed and sunk by a German submarine on May 2nd, 1915, in the North Sea.

AMERICA MARU

Osaka Shosen K.K.; 1898; *C. S. Swan & Hunter*; 6,070 tons; 423x51-1x29-5; 1,080n.h.p.; triple-expansion engines. The steamship *America Maru* was torpedoed and sunk by the U.S. submarine *Nautilus* on March 6th, 1944, midway between Iwojima and the Ladrone Islands, while in service as a transport.

AMERICAN

Union S.S. Co.; 1873; *Stephen*; 2,485 tons; 320x34-2x25¹; 320 h.p.; compound inverted engines.

The British steamship *American* foundered on April 23rd, 1880, in lat. 2° N. long. 10° W. while on a voyage from Southampton to Table Bay.

AMERICAN

American-Hawaiian S.S. Co.; 1916; *W. Cramp & Sons S. & E.B. Co.*; 4,846 tons; 404-6x53-9x26-2; 611 n.h.p.; quadruple-expansion engines.

Sailing from Santos to New Orleans, the American cargo ship *American* was torpedoed and sunk by a German submarine on June 11th, 1942.

AMERICAN LEADER

United States Lines; 1941; *Western Pipe & Steel Co.*; 6,778 tons; 395x60x37-7; 4,170 b.h.p.; 14 knots; turbine engines. The American steamship *American Leader*, Capt. H. A. Petersen, was shelled and sunk by a German raider about 800 miles W. of the Cape of Good Hope on September 10th, 1942. Twenty-three men were killed. The captain and 16 survivors were taken prisoners of war.

AMERIKA

"Atlas" Reederei A.G.; 1911; *Swan, Hunter & Wigham Richardson*; 7,463 tons; 467-9x58-3x32; 606 n.h.p.; quadruple-expansion engines.

The German steamer *Amerika* struck a mine and sank on February 21st, 1942, off Terschelling.

AMERIKA

East Asiatic Co.; 1930; *Burmeister & Wain*; 10,218 tons; 465 X 62x37; 1,200n.h.p.; 14 knots; oil engines. The Danish liner *Amerika*, Capt. Chr. Nielsen, was formerly of the East Asiatic Company's fleet. After the German occupation of Denmark in April, 1940, the vessel sailed under the British flag. On April 21st, 1943, when in the North Atlantic sailing in convoy she was torpedoed and sunk by a submarine. Capt. Nielsen and 85 others were killed.

AMERIKALAND

T. E. J. son Brostrom; 1925; *Deutsche Werft*; 15,355 tons; 561-3x72-2x44-1; 1,313 n.h.p.; 11 knots; oil engines. The Swedish motorship *Amerikaland* was, with her sister ship the *Svealand*, one of the largest cargo vessels afloat. She was built for the purpose of transporting ore from Chile to Maryland, U.S.A. On Monday, February 2nd, 1942, when off the Atlantic coast of the United States she was attacked by two German submarines which torpedoed her, with the loss of 28 of her crew. One boat with 12 survivors, including the captain, got away, and after drifting for four days, during which time one man died from exposure, was picked up by a passing vessel and the occupants landed at a U.S. port.

AMERSKERK

Vereenigde Nederl. Stoomv. Maats.; 1941; 7,900 tons; oil engines.

The motor vessel *Amerskerk*, under German control, was torpedoed and sunk by British aircraft on June 15th, 1944, N. of Schiemonnikoog.

AMICITIA

A/S D/S Amicitia; 1904; *Bergens Mek. Vcerks.*; 1,111 tons; 228-8x35-3x15-9; 106n.h.p.; triple-expansion engines. The Norwegian steamship *Amicitia* was sunk by a German submarine on December 6th, 1916, in the Bay of Biscay.

AMICUS

W. H. Seager & Co.; 1925; *Northumberland Shipbuilding Co.*; 3,660 tons; 362-5x50-9x22-5; 369 n.h.p.; 11 knots; triple-expansion engines.

The steamship *Amicus*, Capt. T. Harries, was torpedoed and sunk by an enemy submarine on December 19th, 1940, about 240 miles W. of Blackspd Bay, Co. Mayo. Capt. Harries and 33 men were killed, in addition to 2 gunners.

AMIENOIS

Compagnie des Bateaux a Vapeur du Nord; 1932; *Furness S.B. Co.*; 3,713 tons; 331-7x53-2x25; 225 n.h.p.; triple-expansion engines.

The steamship *Amienois* was bombed and sunk by German aircraft on June 22nd, 1940, when leaving Bordeaux.

AMIENS

Harries Bros. & Co.; 1918; *Dublin Dockyard Co.*; 1,548 tons; 240-2x36-3x18-4; 167 n.h.p.; triple-expansion engines. The British cargo ship *Amiens* was bombed and sunk on April 16th, 1941, 15 miles off St. Ives Bay.

AMIRAL CHARNER

French Navy, cruiser; 1893; *France*; 4,750 tons; 8,700i.h.p.; 18-5 knots; triple-expansion engines; Belleville boilers; two 7-6 in. guns, six 5-5 in., 4 T.T.

On February 7th, 1916, the *Amiral Charner*, which had been patrolling off the coast of Syria, left for Port Said but failed to arrive. No answers to wireless signals came through and the patrol vessel *Laborieux* was sent in search of her. On the 13th a raft containing the dead bodies of 13 French ratings and one living man was picked up. From this solitary survivor it was learned that the cruiser had sunk within two minutes of being torpedoed by a submarine on the 8th, when 15 miles off the Syrian coast. No others were saved from her total complement of 375.

AMIRAL CHARNER

Char gems Reunis; 1902; Napier & Miller; 4,604 tons; 38 5 X 50x25-7; 446 n.h.p.; triple-expansion engines. The French steamship *Amiral Charner* was torpedoed and sunk by a submarine on September 13th, 1918, in the Mediterranean.

AMIRAL DE KERSAINT

Chargeurs Reunis; 1903; Atel. & Ch. Loire; 5,570 tons; 389-5 x 49-8x26-3; 2,900 i.h.p.; 12 knots; triple-expansion engines. The French merchant steamship *Amiral de Kersaint* was bound from Oran to Marseilles with a cargo of oats, wine and general merchandise, when she encountered the U-64, Cdr. Robert Wilhelm Moraht, off the coast of Spain, on September 14th, 1917. She did not wait to be attacked but seeing the submarine on the surface opened fire with her gun. As a fleet of Spanish fishing boats lay between her and her enemy she was greatly hampered in firing but nevertheless managed to put the submarine's gun out of action. This advantage did not last long for the Germans got the gun working again and managed to get in 15 direct hits on the plucky Frenchman. The colours were shot away but fresh ones were lashed to her rails and the fight proceeded. Finally, after eight men had been killed and the steamship was in flames and sinking, the order was given to abandon ship. The captain of the *Amiral de Kersaint* was taken prisoner but some of the crew escaped. Of these the first officer and a ship's boy died of wounds. The ship sank about five miles off shore.

AMIRAL GANTEAUME

Chargeurs Reunis; 1902; Napier & Miller; 4,590 tons; 385 X 50x25-7; 2,200 i.h.p.; 10 knots; triple-expansion engines. The French liner *Amiral Ganteaume* left Ostend for Havre with 2,000 Belgian refugees. On October 26th, 1914, she called at Calais and on the same day, when off Cap Gris Nez, was torpedoed without warning by the submarine U-24, Lt.Cdr. Schneider. Fortunately the liner did not sink and most of her 2,000 passengers were transferred to the South Eastern & Chatham Railway Co.'s steamship *Queen*, 1,650 tons. The *Amiral Ganteaume* was then taken in tow and brought safely to Boulogne.

Thirty of the refugees, who were mostly women and children, lost their lives.

AMIRAL MAGON

Chargeurs Reunis; 1904; Atel. & Ch. Loire; 5,566 tons; 389-5 X 49-8x26-3; 2,900 i.h.p.; 12 knots; triple-expansion engines. The liner *Amiral Magon* was carrying 900 French troops to Salonika when, on January 25th, 1917, she was torpedoed by a German submarine. The liner remained afloat for only ten minutes, going down with most of those on board.

AMIRAL OLRY

Chargeurs Reunis; 1904; Ateliers et Chantiers de la Loire; 5,567 tons; 389-5x49-8x26-3; 337n.h.p.; triple-expansion engines.

The French steamship *Amiral Olry* was torpedoed and sunk by a German submarine on September 1st, 1917, in the Mediterranean.

AMIRAL ZEDE

Chargeurs Reunis; 1912; Chantiers et Ateliers de St. Nazaire; 5,980 tons; 406-1x52-3x27-8; 359n.h.p.; triple-expansion engines.

The French steamship *Amiral Zede* was torpedoed and sunk by a German submarine on November 19th, 1917, in the Bristol Channel.

AMMERLAND

Frachtschiffahrt G.m.b.H.; 1923; Irvine's S.B. & D.D. Co.; 5,381 tons; 374-3x51-2x32-8; 412 n.h.p.; triple-expansion engines.

The steamship *Ammerland* was torpedoed and sunk by a British submarine on October 12th, 1943, in the North Sea.

AMOR

Becchi & Calcagno; 1902; Short Bros.; 3,472 tons; 352-1 X 45-1x18-7; 325 n.h.p.; triple-expansion engines.

The Italian steamship *Amor* was torpedoed and sunk by a German submarine on June 5th, 1917, off W. Ireland.

AMPHION

British Navy, light cruiser; 1911; Pembroke Dockyard; 3,440 tons; 385x41-5x14; 18,000 i.h.p.; 25-4 knots; turbine engines; Yarrow boilers; ten 4 in. guns, four 3 pdr., 2 T.T. The light cruiser *Amphion*, under command of Capt. C. H. Fox, carried a complement of 290 officers and men. At the outbreak of the First World War the ship was engaged in sweeping operations along the Dutch coast, being in company with the Second Destroyer Flotilla. On the morning of August 5th, 1914, at 10.40 the British ships sighted the German steamship, *Konigin Luise* (which see), engaged in minelaying about 30 miles E. of the Suffolk coast. The *Amphion* and the destroyers *Lance* and *Landrail* immediately brought the *Konigin Luise* to action and sank her at 12.20 p.m. without loss to themselves. Prior to this the German ship had laid her mines, 200 in number, being of the heavy variety anchored at 11 feet below the surface. The position of these mines was not known accurately to the British and in the course of the day two destroyers, steaming at 30 knots, passed over the minefield in safety.

The flotilla continued its operations for the rest of the day without incident and in the small hours of August 6th turned about for home. The course set led the *Amphion* immediately over the mines laid by the *Konigin Luise* and at about 6.30 a.m., when all on board thought themselves clear of the danger, the ship struck a mine which exploded below her fore-bridge. The fore part of the cruiser was wrecked and nearly all those in it were killed, including 18 prisoners from the German vessel. Capt. Fox was stunned by the explosion, but recovered consciousness in time to order "Abandon ship". While the boats were being lowered another explosion, caused either by the flames reaching the magazine or by a second mine, completed the *Amphion's* destruction.

The loss of life was one officer and 150 men, and 18 German prisoners. Capt. Fox was among the survivors, who numbered 139 officers and men.

AMPHITRITE

Hunter & Co.; British Isles; 200 tons.

The chartered convict ship *Amphitrite*, Capt. Hunter, left Woolwich for New South Wales on August 25th, 1833, with 108 female convicts and 12 children together with a surgeon, Dr. Forrester, his wife and a crew of 14, making 136 persons all told. The vessel, which was very small for the task laid upon her, was both overcrowded and undermanned. Off Dungeness she ran into a violent gale which carried her in a more or less helpless condition to the French coast near Boulogne. Here at about 4.30 on the afternoon of the 31st she was run aground by the deliberate act of her captain on a spit of sand some three-quarters of a mile from shore. The captain had hopes of getting his vessel off at the next high tide, but his subsequent conduct proved him to be a man of obstinate temper and indifferent ability. A crowd of onlookers lining the pier and shore made no attempt to give assistance and the local authorities, who should have taken a hand in the work of rescue, did not visit the scene until too late. Thus a disaster which, in its initial stages, was easily preventable was allowed to develop by all the parties concerned—a foolhardy and obstinate captain on the one hand and an apathetic, if not callous, crowd on the other.

One man, a pilot named Francois Heuret, ran his boat close to the doomed vessel and offered assistance which was declined by Capt. Hunter, who was concerned to keep his convict charges below deck at every cost least any of them should escape to the French shore. In this perverse resolution he was supported by the doctor and his wife. Heuret, therefore, returned to the shore and there was no further attempt to get into touch with the vessel until 6.30 when Pierre Henin, a French seaman and a strong swimmer, took a line from shore and succeeded in getting one from the *Amphitrite*, but such was the obstinacy of Capt. Hunter that he refused to allow this to be used and Henin, who was becoming exhausted, had to return to the shore.

Meanwhile matters on the convict ship had become desperate. The female convicts had broken the hatches and come on deck where they gathered in a helpless group. The seamen, believing there was no hope for the ship, took to the rigging. Even in this extremity the captain refused to allow the boats to put off. Finally, at just after seven in the evening, when she had been ashore less than three hours, the *Amphitrite* broke in two and all on board, with the exception of three seamen, were drowned.

The conduct of the onlookers was most discreditable as they

AMPLEFORTH

evinced no interest in resuscitating the still warm bodies of the shipwrecked but gave themselves up entirely to plunder. A French guard seems to have done little more than allow parties of stretcher-bearers and carts to convey the bodies to the local hospital.

The total loss of life in this disaster was 133.

At a later date the Royal Humane Society suitably recognised the heroism of the French seaman, Pierre Henin, whose brave action was one of the few bright spots in this sordid affair.

AMPLEFORTH

Charles Cravos & Co.; 1929; *Craig, Taylor & Co.*; 4,576 tons; 400-5x53-5x25; 417n.h.p.; triple-expansion engines. The British steamship *Ampleforth* was on a voyage from Hull to Jacksonville when she was torpedoed and sunk on August 18th, 1940.

AMSTEL

N.V. Houtvaart; 1925; *A. Vuijk & Zonen*; 2,115 tons; 281 -3 X 42-7x19-3; 248n.h.p.; triple-expansion engines. The Dutch ship *Amstel* struck a mine and sank on November 17th, 1945, in lat. 54° 36' N., long. 10° 49' E.

AMSTELLAND

Koninklijken Hollandschen Lloyd'; 1920; *Swan, Hunter & Wigham Richardson*; 8,156 tons; 470-1x61-5x32-1; 1,066 n.h.p.; turbine engines.

While on a voyage from the Clyde to Buenos Aires, the Dutch ship *Amstelland* was bombed by German aircraft on February 26th, 1941, and severely damaged. She was taken in tow on February 28th, but had to be abandoned and was presumed sunk.

AMSTERDAM

N.V. Petroleum Industrie Maats.; 1922; *Armstrong Whitworth & Co.*; 7,329 tons; 440x57-5x34-1; 627n.h.p.; triple-expansion engines.

On a voyage from Beaumont, Texas, to Freetown, the Dutch tanker *Amsterdam* was torpedoed and sunk by the German submarine U-66 on April 16th, 1942. The attack took place 100 miles S.W. of Port of Spain, and five of the crew were killed.

AMSTERDAM

Fratelli Rizzuto; 1921; *Lithgows*; 8,673 tons; 492-4x65-5x 31 • 7; 1,105 n.h.p.; turbine engines.

The Italian steamship *Amsterdam* was bombed by British aircraft on October 16th, 1942, N. of Misurata. The damaged hull was taken in tow but was torpedoed and sunk by a British submarine on the 23rd.

AMSTERDAM

London & North Eastern Railway Co.; 1930; *John Brown & Co.*; 4,220 tons; 350-8x50-1x26; 1,520 n.h.p.; 21 knots; turbine engines

The L. & N. E. Railway packet *Amsterdam*, Capt. H. Pickering, was taken over for service as an auxiliary hospital ship during the Second World War. On August 7th, 1944, the vessel was in Seine Bay, Normandy, when she struck a mine and sank. The dead numbered 33 and 26 persons were wounded. Capt. Pickering was among the survivors.

AMUR

Russian Navy, minelayer; 1898; *Baltic Works*; 3,017 tons; 300 x — X—; 4,890 i.h.p.; 17-4 knots; triple-expansion engines; five 12pdr. guns, seven 3pdr., 1 T.T.; 500 mines. The Russian minelayer, *Amur*, was attached to the Pacific Squadron at Port Arthur, at the beginning of the Russo-Japanese War.

As the war proceeded the investment of Port Arthur, both by sea and land, greatly restricted the work of the *Amur*, as she came constantly under fire from Japanese land batteries as well as from ships. On December 9th she was so badly damaged that she had to go into dock, where she was still under shell-fire. In all she was hit more than 30 times, being blown to pieces and sinking within the dock on December 18th, 1904.

The full story of the Pacific Squadron at Port Arthur is told under the *Peresvyet*, flagship of the rear-admiral, which was among those lost.

AMY DORA

Joseph Robinson & Sons; 1875; *Cole Bros.*; 1,708 tons; 265x34 x 24 • 4; 150 h.p.; compound inverted engines. The British steamship *Amy Dora* went aground on the coast of Virginia in October, 1889, and was totally wrecked, while on a voyage from Savannah to Genoa with a cargo of cotton.

AMY TURNER

L. J. D. Schutt; 1877; *Smith & Townsend*; 991 tons; 174 x 35-4x21-6.

The Australian wooden barque *Amy Turner* was bound from Newcastle, N.S.W., to Manila. She carried a crew of 15. On March 27th, 1923, she foundered in heavy weather off the island of Guam. Eleven of the crew were drowned.

ANADARA

Anglo-Saxon Petroleum Co.; 1935; *Harland & Wolff*; 8,009 tons; 465-1x59-4x33-9; 4,000 i.h.p.; 12-5 knots; oil engine. The motor tanker *Anadara*, Capt. W. T. Waimsley, strayed from her convoy while on voyage from Heysham to Curacao on February 26th, 1942, about 200 miles S.S.E. of Cape Race. She was never heard of again. There were 62 men in the crew.

ANADYR

Ministry of War Transport; 1930; *Northumberland S.B. Co.*; 5,321 tons; 412-8x55-3x26; quadruple-expansion engines. The British ship *Anadyr*, on a voyage from New York and Trinidad to Table Bay, was torpedoed and sunk on May 6th, 1944, in 10° 55'S., 27° 30'W.

ANASTASSIA

C. Choremis; 1905; *Bartram & Sons*; 2,883 tons; 331x48x 21-5; 291 n.h.p.; triple-expansion engines. The Greek ship *Anastassia* was sighted drifting and derelict in the N. Atlantic on December 20th, 1940. It was later learned that she had been torpedoed by a submarine, and that eight members of the crew were prisoners of war in Italy.

ANASTASSIOS PATERAS

Anastassios Pateras & Sons; 1914; *J. Blumer & Co.*; 3,382 tons; 348-5x48-7x22-9; 301 n.h.p.; triple-expansion engines. The Greek cargo ship *Anastassios Pateras* was sunk by a submarine on July 6th, 1942, soon after leaving the River St. Lawrence.

ANATOLI SEROV

U.S.S.R.; 1926; *Smiths Dock Co.*; 2,922 tons; 310x44-6x 24-3; triple-expansion engines.

The Soviet cargo ship *Anatoli Serov* was sunk by a mine in the Black Sea in 1949.

ANATOLIA

William Gray & Co.; 1878; *W. Gray & Co.*; 1,662 tons; 260-9 x 34-2x19-7; 150 n.h.p.; compound inverted engines. The British steamer *Anatolia* was sunk in a collision on November 4th, 1885, in lat. 42° T N., long. 9° 35' W., while on a voyage from Bussorah to London with a cargo of dates and barley.

ANATOLIAN

F. Leyland & Co.; 1877; *Leyland*; 1,763 tons; 312x31-3x 23-9; 220 h.p.; compound inverted engines.

The British steamship *Anatolian* was wrecked on February 12th, 1880, on Burbo Bank while on a voyage from Liverpool to the Mediterranean.

ANBO MARU

Osaka Shosen K.K.; 4,523 tons.

The steamship *Anbo Maru* was torpedoed and sunk on May 13th, 1944, by the U.S. submarine *Pogy*, E. of Kyushu, Japan.

ANBOTO MENDI

Compania Naviera Sota y Aznar; 1907; *Compania Euskalduna*; 2,114 tons; 275-2x41-5x17-5; 220 n.h.p.; triple-expansion engines.

The Spanish steamship *Anboto Mendi* was torpedoed and sunk by a German submarine on May 10th, 1918, in the North Sea.

ANCHISES

Alfred Holt & Co.; 1911; Workman Clark & Co.; 10,000 tons; 493x60-4x37-1; 640n.h.p.; 14 knots; triple-expansion engines.

The liner *Anchises*, Capt. D. W. James, was bombed and sunk by German aircraft on February 27th, 1941, about 180 miles W.N.W. of North Aran Island, Co., Donegal. Capt. James, 12 members of the crew and three passengers were killed. One hundred and fifty-six survivors were landed.

ANCHUSA

British Navy, sloop; 1917; Armstrong Whitworth; 1,290 tons; 262-2x35x12-5; 2,800i.h.p.; 17 knots; triple-expansion engines; two 4 in. guns, one 12 pdr.

The sloop *Anchusa* was torpedoed and sunk by a submarine off the north coast of Ireland on July 16th, 1918. The vessel carried a complement of about 100.

ANCONA

Italia Steamship Co.; 1908; Workman, Clark & Co.; 8,210 tons; 482-3x58-3x26-2; 1,221 n.h.p.; 15 knots; triple-expansion engines.

The Italian liner *Ancona* left Naples for New York at 11.45 p.m. on Saturday, November 6th, 1915, under command of Capt. Massardo. The liner called at Messina on Sunday and embarked 130 more passengers, leaving again at 5 p.m. with a total of 446 on board of whom 163 were crew. On Monday, November 8th, when the *Ancona* was off Cap Carbonara she was sighted by a submarine flying the Austrian flag which gave chase and fired about 100 rounds at the liner. Later, at about 1 p.m., the liner was torpedoed. The boats were then hurriedly launched, but as the *Ancona* was still steaming slowly they capsized as soon as they reached the water.

The death-roll was very heavy. One hundred and ninety-four persons, of whom 11 were American citizens, lost their lives and the U.S. government at once demanded satisfaction from Austria. After some delay the Austrians admitted that their submarine commander exceeded his instructions, but stated in extenuation of his action that he believed the *Ancona* to have been a transport. The shelling was admitted, but it was contended that only 16 rounds, and not 100 as stated by the Italians, were fired. The loss of life owing to the capsizing of the boats was due, not to any Austrian action, but to a foolhardy attempt to launch them whilst the liner was under way.

Several of the *Ancona's* boats were picked up by the French cruiser *Pluton*, which put out from Bizerta in the hope of rendering assistance.

A new light on the whole incident came later when it was discovered that the torpedoing was the work of the U-38, a German submarine flying the Austrian flag and commanded by Lt.Cdr. Max Valentiner, an exceptionally able, but very callous officer. At the time of the sinking Italy was not at war with Germany.

ANCUD

Tyrer & Co.; 1891; Southampton Naval Works; 489 tons; 387-5 X 55 X 20; 981 n.h.p.; turbine engines. The Chilean ship *Ancud* caught fire after an explosion on June 26th, 1926, at Valparaiso and was completely destroyed.

ANDALUCIA STAR

Blue Star Line; 1927; Cammell Laird & Co.; 14,943 tons; 578-9x68-3x42-7; 1,909 n.h.p.; 16 knots; turbine engines. The liner *Andalucia Star*, Capt. J. Hall, was torpedoed and sunk by a submarine on October 6th, 1942, about 400 miles W. by S. of Monrovia, Liberia. Three members of the crew and one passenger were killed.

ANDALUSIA

Rederiakt. Svenska Lloyd; 1916; Oskarshamns M.V. Aktieb.; 1,284 tons; 236-1 x 45-2 X 24-2; 204 n.h.p.; triple-expansion engines.

The Swedish ship *Andalusia* with a crew of 21 left Verdon on January 17th, 1940, for Gothenburg. She reported by wireless on January 21st, but was never heard of again.

ANDAMAN

A/B Svenska Ostasiatiska Kompaniet; 1947; A/B Gotaverken; 4,765 tons; 439x58-6x21-2; 1,260 n.h.p.; oil engines. The Swedish motorship *Andaman* collided with the *Fortune* in a fog on May 24th, 1953, near the South Goodwin lightship and sank in 25 fathoms. She was on a voyage from Gothenburg to Calcutta.

ANDANIA

Cunard Line; 1913; Scott's Shipbuilding Co.; 13,405 tons; 520-3x64x43-1; 1,324n.h.p.; 14 knots; triple-expansion engines.

The Cunard liner *Andania* was torpedoed and sunk by a German submarine two miles N.N.E. of Rathlin Island lighthouse on January 27th, 1918. Seven persons were killed. The captain was among the survivors.

ANDANIA

Cunard White Star Line; 1922; Hawthorn Leslie; 13,950 tons; 520-2x65-3x39-2; 1,660 n.h.p.; 15 knots; turbine engines. The Cunard White Star liner *Andania*, Capt. D. K. Bain, was taken over by the Admiralty early in the second World War for service as an auxiliary cruiser. On June 16th, 1940, when S.E. of Iceland she was torpedoed by a German submarine. She did not sink immediately and her crew were taken off in safety with only two men injured.

ANDELANA

E. F. & W. Roberts; 1889; R. Williamson & Son; 2,395 tons; 303-7x42-2x24-6.

The four masted sailing ship *Andelana*, Capt. Stalling, sailed from Shanghai for Tacoma in ballast in January, 1899. At Tacoma she discharged her ballast preparatory to taking on board a cargo of grain for England. Having been relieved of her ballast and being extremely high out of the water the ship was secured to huge luo-booms by chains. These booms lying on either side of her served to keep the ship upright pending the loading of her cargo.

On the following morning, the 15th, persons in the harbour noticed that the *Andelana* was not lying at her moorings. A tug went out to investigate and found the chains of the booms broken, and later the ship's gig with her stern torn out was found on the shore.

Two tugs were employed to drag the harbour and found the *Andelana's* hull in about 30 fathoms of water. A diver went down and at first reported that the vessel could be raised. At his second attempt his diving dress proved faulty and he lost his life. Altogether 20 men, including Capt. Stalling and the diver, were drowned. The *Andelana* was not raised.

ANDRA

"Socdeco" Soc. Anon.; 1922; Deutsche Werft A.G.; 1,385 tons; 234-5x36-8x17-9; 105n.h.p.; triple-expansion engines. The Panamanian steamship *Andra* was sunk by the insurgent cruiser *Almirante Cervera* during the Spanish Civil War on April 4th, 1937, off Castro Urdiales.

ANDREA

Angf. AfBLibra; 1883; J. Readhead & Co.; 1,412 tons; 249x36x17-5; 139 n.h.p.; compound engines. The Swedish steamship *Andrea* struck a mine and sank on November 16th, 1914, in the North Sea.

ANDREA BROVIG

Partrederiet "Brovigtank"; 1940; A/B Gotaverken; 10,173 tons; 496-1x64-4x38-7; 1,030n.h.p.; oilengines. The Norwegian tanker *Andrea Brovig* was torpedoed and sunk on June 19th, 1942, in lat. 12° 10'N., long. 59° 10'W.

ANDREA COSTA

Officina Comunale del Gas di Bologna; 1899; N. Otero & Co.; 3,991 tons; 342-7x45x19-7; 280 n.h.p.; triple-expansion engines.

The Italian steamship *Andrea Costa* was torpedoed and sunk by a German submarine on January 22nd, 1918, in the Mediterranean.

ANDREA DORIA

ANDREA DORIA

"ta/a" Soc. per Azioni di Nav.; 1953; Ansaldo; 29,083 tons; 656-5x90-2x45-4; 23 knots; turbine engines. The *Andrea Doria*, Capt. P. Calamai, was a new ship, completed in 1953. She was fitted with the most modern life-saving devices, as well as navigational aids, such as radar. Her hull was divided into eleven water-tight compartments and it was claimed that any two of these might be flooded without affecting her stability.

At just before midnight on July 25th, 1956, when steaming through dense fog some 45 miles S.E. of Nantucket Island, near New York, she was struck below the navigating bridge amidships by the Swedish-American liner *Stockholm*, 12,644 tons. At the moment of the collision the *Andrea Doria* was inward bound for New York from Genoa with 1,706 passengers and crew. The *Stockholm*, with about 750 passengers and crew, had shortly before left New York for Gothenburg.

Only one of the Italian liner's water-tight compartments was flooded but, contrary to the predictions of her designers, she at once took a heavy list which gradually increased until water was pouring in through some of her cabin port-holes.

Despite the gravity of the damage the *Andrea Doria* remained afloat for ten hours after the collision. She sank at about 10 a.m. on July 26th, being about 200 miles distant from New York at the time.

The heavy list greatly impeded the launch of the ship's lifeboats, though some managed to get away. Assistance came from the *Stockholm* which, though badly damaged, managed to take off 533 people before putting back to New York. Other ships contacted by radio were the French liner *He de France*, which took off 760, the U.S. transports *Cape Ann* and *Private William H. Thomas* which took off 129 and 156 respectively, and the U.S. destroyer *Edward H. Allen* which took off 76.

The loss of life amounted to 47 passengers and crew of the *Andrea Doria*, and five of the crew of the *Stockholm*.

Capt. Calamai, of the *Andrea Doria*, was among the survivors.

ANDREA F. LUCKENBACH

Luckenbach S.S. Co. Inc.; 1919; Bethlehem S.B. Corp.; 6,565 tons; 496x68-2x23-3; turbine engines. The American cargo ship *Andrea F. Luckenbach* was torpedoed and sunk by a submarine on March 10th, 1943, while on a voyage from New York to Belfast Lough.

ANDREAS

Ionian S.S. Co.; 1919; Harland & Wolff; 6,566 tons; 412-6 x 55-8x34-4; 517 n.h.p.; triple-expansion engines. The Greek ship *Andreas* was off the coast of Pernambuco on November 4th, 1942, when she was shelled by a German submarine and sunk.

ANDREW G. CURTIN

United States War Shipping Administration; 1943; Bethlehem Fairfield Shipyard Inc.; 7,200 tons; 423-1 X 57-1 X 34-8; 339 n.h.p.; triple-expansion engines. The American cargo ship *Andrew G. Curtin* was torpedoed and sunk by a German submarine on January 25th, 1944, in lat. 73° 25' N., long. 25° 16'E.

ANDREW JACKSON

Waterman S.S. Corp.; 1920; Merchant S.B. Corp.; 5,991 tons; 400 • 7 x 54 • 2 x 30 - 4; 645 n.h.p.; turbine engines. The American cargo ship *Andrew Jackson* was torpedoed and sunk by a German submarine in the Gulf of Mexico on July 12th, 1942.

ANDRIOS

I. N. Goulandris Bros. & Z. A. Vrondisis; 1901; Napier & Miller; 4,434 tons; 385-4x49-1x26-8; 415 n.h.p.; triple-expansion engines. On a voyage from Novorossisk to Falmouth the Greek ship *Andrios* was wrecked on the Burlings (Berlenga Island) on November 20th, 1926.

ANDROMEDA

Italian Navy, torpedo boat; 1936; Ansaldo; 642 tons; 267x27 x 7; 19,000 s.h.p.; 34 knots; turbine engines; 3-drum boilers; three 3-9 in. guns, four 37 mm.A.A., two 13 mm.A.A., 4 T.T. The Italian torpedo boat *Andromeda* was bombed and sunk by British aircraft at Valona on March 17th, 1941. The vessel carried a complement of about 100.

ANDROS

Hellenic Mediterranean Lines Co.; 1915; Sir Raylton Dixon & Co.; 2,068 tons; 260 x 40 • 2 x 29; 240 n.h.p.; triple-expansion engines. The Greek passenger ship *Andros* was being used as a hospital ship when she was bombed and sunk by German aircraft on April 23rd, 1941, at Loutraki.

ANDROS

Deutsche Levante-Linie Hamburg A.G.; 1910; Akt. Ges. "Neptun"; 2,995 tons; 320-9x46-2x24-1; 238 n.h.p.; triple-expansion engines. The steamship *Andros* was bombed and sunk by Allied aircraft on March, 12th, 1945, at Swinemunde.

ANERLEY

Britain S.S. Co.; 1881; Blumer & Co.; 1,887 tons; 270 X 37-2 X 24-2; 250 n.h.p.; compound inverted engines. Sailing in August, 1904, from Japan to Fusan with a cargo of railway sleepers, the *Anerley* went aground 25 miles from Fusan and was totally wrecked.

ANEROID

United States Maritime Commission; 1917; Harland & Wolff; 4,976 tons; 413-2x52-3x28-4; triple-expansion engines. The *Aneroid*, under Panamanian flag, was torpedoed and sunk by a German submarine on October 2nd, 1942, in the Gulf of Mexico.

ANGAMOS

Chilean Navy, transport; 1890; Swan Hunter, Wigham Richardson; 5,975 tons; 377x44-2x23-2; 3,350 i.h.p.; 14-5 knots; triple-expansion engines. The Chilean government transport *Angamos* was originally the Italian steamship *Citta di Venezia*. She was rebuilt in Chile some time after purchase and was refitted in 1925-26. On Friday, July 6th, 1928, the vessel left Punta Arenas under command of Capt. Izmael Suarez of the Chilean Navy. She carried a crew of 215 and 76 passengers, the latter comprising labourers and their families travelling at government expense, and a small number of conscripts. Her cargo consisted of coal for the Chilean fleet in North Chilean waters. Late on the same day the transport ran into a gale with dense fog. She was badly battered for some hours receiving such damage to her rudder that she became helpless. At about 10 p.m. she struck the rocks off Punta Morguillas, S. of Lebu, and was pounded to pieces. Efforts to launch the lifeboats proved fruitless as they were swamped by the seas as soon as they reached the water. The last message from the *Angamos* was picked up by the s.s. *Tarapaca* and was very faint. Apparently the transport was fast on the rocks about 300 yards from shore and at about one a.m. on the 7th broke up completely. Of the 291 persons on board eight were eventually rescued, four of them being conscripts.

ANGANTYR

A/S DfS Gefion; 1906; Howaldtswerke; 1,359 tons; 231-7 x 36-1 x 16-5; 96 n.h.p.; triple-expansion engines. The Danish steamship *Angantyr* was torpedoed and sunk by a German submarine on June 14th, 1917, in the North Sea.

ANGARSTROI

U.S.S.R.; 1927; Harland & Wolff; 4,761 tons; 412-1x55-1x 25; 452 n.h.p.; triple-expansion engines. The Russian cargo ship *Angarstroi* was stopped by a Japanese warship on April 24th, 1942, about 130 miles off the coast of Japan, and ordered to go to a Japanese port for examination. She was released some days later and on May 1st, some 32 miles out, was torpedoed and sunk by a submarine. The Japanese afterwards denied that the submarine belonged to them.

Shortly after the sinking two Japanese submarines surfaced and escorted the survivors in the boats until they were picked up by a Russian ship.

ANGELA MADRE

A. Donnamma & Co.; 1904; G. Irrera; 122 tons; 91-6X 22-6x10-7.

The sailing vessel *Angela Madre* was mined and sunk three miles S.E. of the Tyne on May 5th, 1917. Five men were killed. The captain was among the survivors.

ANGELE MABRO

G.&T.Mabro; 1898; W. Gray & Co.; 3,154 tons; 330-lx 48-5x21-6; 292n.h.p.; triple-expansion engines. The Egyptian ship *Angele Mabro*, Capt. Alexander Kilikas, left Bilbao on July 3rd, 1940, bound for Cardiff with a cargo of iron ore, and was not heard of again.

ANGELINA

S.Mangeri; 1870; W. Pile & Co.; 1,260 tons; 230-7x30-9x 23-6; 116n.h.p.; triple-expansion engines. The Italian steamship *Angelina* was torpedoed and sunk by a German submarine on June 1st, 1918, in the Mediterranean.

ANGELINA

A. H. Bull & Co.; 1934; Newport News Shipbuilding Corpn.; 4,772 tons; 390x55x30-6; 3,150s.h.p.; 13-5 knots; turbine engines.

The American steamship *Angelina*, Capt. William Goodman, was in convoy in the North Atlantic on October 17th, 1942, when she was torpedoed and sunk by a submarine. Capt. Goodman and 45 men were killed. Eight survivors were landed.

ANGELO BASSINI

Italian Navy, torpedo boat; 1916; Odero; 635 tons; 238 x 24x9-2; 15,500 s.h.p.; 32 knots; turbine engines; Thorny croft boilers; four 4 in. guns, two 3 in.A.A., 4 m.g., 4 T.T. The Italian sea-going torpedo boats *Angela Bassini* and *Antares* were lying in Leghorn harbour on May 28th, 1943, when they were bombed and sunk by British aircraft. Both vessels carried complements of about 100.

ANGLIA

Anchor Line (Henderson Bros.); 1869; Stephen Works; 2,253 tons; 325-3x35x29-4; 470 h.p.; compound inverted engines. The British steamship *Anglia* was sunk in a collision on September 6th, 1880, in lat. 46° N., long. 48° W., while on a voyage from Boston to London with cattle and general cargo.

ANGLIA

Anchor Line; 1888; D. & W. Henderson & Co.; 3,287 tons; 340X43x27-8; 300 h.p.; 11 knots; triple-expansion engines. The Anchor liner *Anglia* with 47 persons on board left Calcutta on August 24th, 1892, homeward-bound. The ship was anchoring in the Jellingham Channel, at the mouth of the Hooghly, between Mud Point and Sangor, when she swung round and hit a sandbank which caused her to heel over to such a degree that she capsized. She lay for a short while on her beam-ends and then went down.

Fortunately she had only two passengers on board or the loss of life might have been much heavier. In all 15 persons were drowned, the survivors being picked up by the boats of the British India steamship *Goa*. Two members of the crew got away in one of the lifeboats, but several men were trapped within the ship and could not escape as the portholes were too small. An attempt was made to enlarge these and cut away part of the side, but the vessel sank so quickly that this was not completed in time to save the men.

Mr. J. Gourlay, the second engineer, was the only officer lost.

ANGLIA

London & North Western Railway Co.; 1900; W. Denny & Bros.; 1,862 tons; 329x39-1x15-7; 424 n.h.p.; 21 knots; triple-expansion engines.

The auxiliary hospital ship *Anglia*, Capt. L. J. Manning, was crossing the Channel from France on November 17th, 1915, with a large number of wounded, when she was mined and sunk one mile E. of

Folkstone Gate. The steamship was struck on the port side, forward of the bridge, the violence of the explosion blowing Capt. Manning from his position on the bridge to the deck below. Fortunately he remained in possession of his faculties and at once ordered out the boats, the first of which, with about 50 occupants, got away safely. After this the ship took a heavy list and within ten minutes she sank, taking with her four military officers, one nurse and 129 soldiers and crew. The total number of wounded on board was 13 officers and 372 other ranks, in addition to whom were the usual medical staff and crew.

The disaster occurred about 12.30 p.m. and was observed by the collier *Lusitania*, 1,834 tons, London to Lisbon, which steamed to the *Anglia's* assistance and lowered two boats. These had scarcely left the side when the *Lusitania* herself struck a mine and began to sink, her boats therefore returned and took off the remainder of her company, there being no loss of life.

Capt. Manning of the *Anglia* was among the survivors.

ANGLIA

Rederiaktieb Svenska Lloyd; 1914; Lindholmens V.A.; 1,750 tons; 283 X 43x16-4; 254 n.h.p.; triple-expansion engines. The Swedish ship *Anglia* collided with the Spanish cargo ship *Agire-Mendi* on June 18th, 1931, and sank off San Nicolas near Buenos Aires.

ANGLO AFRICAN

Nitrate Producers' S.S. Co.; 1900; Short Bros.; 4,186 tons, 370-2x48-7x19-0; 418 n.h.p.; triple-expansion engines. The British steamship *Anglo African* was wrecked in January, 1909, four miles S. of Cape Charles while on a voyage from Tocopilla to Baltimore with a cargo of nitrate.

ANGLO AUSTRALIAN

Nitrate Producers' S.S. Co.; 1927; Short Bros.; 5,456 tons; 426 x 58 x 26 • 1; 453 n.h.p.; 10-5 knots; quadruple-expansion engines.

The steamship *Anglo Australian* left Cardiff in ballast just after noon on March 8th, 1938, for British Columbia, via the Panama Canal, to load a cargo of lumber. The vessel carried a crew of 38 all told. On the 14th a wireless message was received by the owners as follows:—

"Passed Fayal this afternoon nine knots. Twenty-six tons bunker consumption. Rough weather. All well."

Later it was known that gale conditions prevailed, but no more was heard of the *Anglo Australian* and it can only be assumed that she foundered somewhere 60 miles northward and westward of Fayal. The captain was Frederick Parslow.

Shi's in the vicinity of the vessel at 6 p.m. on the 14th were the *Athelfoam*, 90 miles distant, and the *Scottish Heather*, *Cerinthusand San Amado* about 170 miles distant. None of these received any message from the *Anglo Australian*.

ANGLO CANADIAN

Nitrate Producers' S.S. Co.; 1928; Short Bros.; 5,268 tons; 426x58x24-7; 598 n.h.p.; oilengines.

The British motorship *Anglo Canadian*, Capt. D. J. Williams, was torpedoed and sunk on June 25th, 1942, while on a voyage from Ascension Island to Baltimore.

ANGLO

A. P. Moller; 1949; Eriksbergs Ml V; 11,647 tons; 557 x 69-8x —; oilengines.

The Danish tanker *Anglo Mcersk* was about 170 miles N.W. of Barbados on April 23rd, 1962, when there was an explosion in the engine room, and the ship caught fire. The fire was extinguished on April 26th, but the ship sank two days later.

ANGLO PERUVIAN

Nitrate Producers' S.S. Co.; 1905; Short Bros.; 5,494 tons; 418-2x54-4x29-3; 544 n.h.p.; quadruple-expansion engines. The British steamship *Anglo Peruvian* foundered after striking an iceberg in April, 1906, in the N. Atlantic while sailing from the Tyne to Philadelphia in ballast.

ANGLO PERUVIAN

ANGLOPERUVIAN

Nitrate Producers' S.S. Co.; 1926; Short Bros.; 5,457 tons; 426 x 58 x 26 • 1; 453 n.h.p.; quadruple-expansion engines. The British ship *Anglo Peruvian*, on a voyage from the Tyne to Boston, Mass., was torpedoed and sunk on February 23rd, 1941. There were only 17 survivors.

ANGLO SAXON

Allan Line; 1856; W. Denny & Bros.; 1,700 tons; 283x35-2x16-2; 250 h.p.; 13-5 knots; compound engines. The *Anglo Saxon* was one of the early Allan liners, and as a transatlantic passenger ship was both speedy and popular, achieving a record passage of nine days, five hours, in 1859.

On April 16th, 1863, she left Liverpool under Captain Burgess, bound for Quebec via Londonderry with a total number of 445 persons on board. Most of the passengers were emigrants bound for the Canadian West. The *Anglo Saxon* was to rendezvous off Cape Race, N.F.L., with the Associated Press News boat in order to hand over mails and despatches, but on the morning of the 27th April in a thick fog she struck on the rocks at Clam Cove, 4 miles N. of Cape Race. Some of the crew got ashore by dropping from the jibboom on to the rocks below and fixed a hawser. A basket was rigged in which 130 of the passengers were carried ashore. Four boats also succeeded in getting away. Within less than an hour the ship slipped off the rocks into deep water and all those left on board were drowned.

Lloyd's Agents at Quebec reported that 227 persons were lost. Later it was learned that some of the cargo had been recovered by means of a diving bell.

ANGLO SAXON

Nitrate Producers' S.S. Co.; 1929; Short Bros.; 5,596 tons; 426 X 55 X 26; 453 n.h.p.; quadruple-expansion engines. The British ship *Anglo Saxon* was sunk by a German raider on August 21st, 1940, while on a voyage from Newport, Mon., to Bahia Blanca. Two survivors landed on Eleuthera Island.

ANGLOMAN

British & N. Atlantic S.N. Co. (Dominion Line); 1892; Laird Bros.; 4,892 tons; 403-5x45-6x25; 524n.h.p.; triple-expansion engines.

The British steamship *Angloman* was wrecked on the Skerries Rocks, Anglesey, in February, 1897, while on a voyage from Boston to Liverpool carrying cattle, grain and provisions.

ANGOLA

W.H.Mosher; 1890; W.H.Mosher; 1,672 tons; 219-2x41x23-9.

The Canadian barque *Angola* ran on a reef in the Pacific in October, 1900. Only two of the crew were saved.

ANGOLA

Elder Dempster Shipping; 1891; R. Dixon & Co.; 2,831 tons; 312x39-2x24-6; 257n.h.p.; triple-expansion engines. While on a voyage from Vera Cruz to Montreal the steamship *Angola* was wrecked in July, 1906, near Louisburg, C.B.

ANGOLA

Emp. Nacional de Nov. a Vap. para a Africa Portuguesa; 1906; Russell & Co.; 4,297 tons; 385x49-8x18-4; 435 n.h.p.; triple-expansion engines.

The Portuguese steamship *Angola* was torpedoed and sunk by a German submarine on March 10th, 1917, off Ushant.

ANGULARITY

F. T. Everard & Sons; 1934; G. Brown & Co.; 501 tons; 160-5x26-7x9-4; 72n.h.p.; oilengines.

The British motorship *Angularity* was intercepted by a German torpedo boat and sunk on February 6th, 1941. Eight lives were lost. One member of the crew was reported to be a prisoner of war.

ANGY

Monrovia Shipping Co.; 1937; Deutsche Werft; 9,937 tons; 492-9x66-1x36-4; 11 knots; oilengines.

The Liberian ship *Angy* caught fire, exploded and broke in two on March 10th, 1953, about 1,000 miles E. of New York. The afterpart was taken in tow on March 12th but sank on the next day.

Twenty-eight survivors were picked up by the s.s. *Claiborne*.

ANHALT

Norddeutscher Lloyd; 1921; Frd. Krupp A.G.; 5,870 tons; 393-2x54-3x23-3; 410n.h.p.; triple-expansion engines. The steamship *Anhalt* was sunk during a British naval raid at Vaagso, Norway, on December 27th, 1941. She had previously struck a mine prior to May 13th, 1940, and was beached on the Swedish coast, but was later refloated and repaired.

ANINE

Dampsksselsk.Heimdal; 1907; Wood Skinner & Co.; 1,299 tons; 234 -5x35-7x16-3; 141 n.h.p.; triple-expansion engines. The Danish ship *Anine* left Newcastle on March 3rd, 1925, bound for Civitavecchia with coal, and was not heard of after passing Gibraltar.

ANITA

German Government; 1899; Rykee & Co.; 1,165 tons; 228x32 X18 • 5; triple-expansion engines.

The steamship *Anita* was formerly the Greek *Maria Nomicou*, seized by the Italians and renamed *Arezzo*, later taken over by the Germans. On July 10th, 1944, she was torpedoed and sunk by a British submarine near Andros Island.

ANJO MARU

Japanese Government; 1931; Nederlandsche Dok Maats.; 2,086 tons; 260-2x48-1x14-9; 286n.h.p.; oilengines. The tanker *Anjo Mam* was formerly the Dutch *Angelina*. She was scuttled at Sourabaya in February, 1942, and raised and repaired by the Japanese. She was torpedoed and sunk by the U.S. submarine *Bonefish* on September 28th, 1944, W. of Mindoro Island, Philippines.

ANKARA

Atlas Levante-Linie A.G.; 1937; Nordseewerke Emden G.m.b.H.; 4,768 tons; 408-5x56-7x21-4; 797n.h.p.; oil engines. The motorship *Ankara* struck a mine and sank on January 18th, 1943, near Bizerta.

ANKE

German Government; 1912; R. Duncan & Co.; 3,811 tons; 354 -3x51-1x23-8; 338 n.h.p.; triple-expansion engines. The steamship *Anke* was formerly the Latvian *Dole*, seized by the Germans. On September 11th, 1943, she was torpedoed and sunk by Norwegian motor torpedo boats off Christiansund.

ANKING

China Nav. Co.; 1925; Scotts S.B. & E. Co.; 3,472 tons; 338-4x49-2x24-1; turbine engines.*

The British ship *Anking*, on British Admiralty service, left Batavia on February 27th, 1942, for Fremantle. On March 3rd, she was intercepted by Japanese cruisers and sunk by gunfire about 200 miles E. of Christmas Island. Sixteen survivors were picked up 4 days later.

ANKO MARU

2,821 tons.

The steamship *Anko Mam* struck a mine and sank on May 15th, 1945, off Tokushima, Japan.

ANNA

D/S Vesterhavet; 1914; Kjobenhavns Flydedok & Skibsværft; 1,211 tons; 239-9x35-7x14-5; 98 n.h.p.; triple-expansion engines.

The Danish steamship *Anna* was torpedoed and sunk by a German submarine on August 27th, 1917, in the North Sea.

ANNA BULGARI

C. Th. Bulgaris; 1912; Richardson, Duck & Co.; 4,603 tons; 390x52-5x25-6; 409 n.h.p.; triple-expansion engines. The Greek ship *Anna Bulgari* left Milford Haven on June 13th, 1941, for Montreal and was sunk by a German submarine on or about June 24th. None of the crew survived.

ANNA C. MINCH

Western Nav. Co.; 1903; American S.B. Co.; 4,139 tons; 387-1x50-2x23-9; 213 n.h.p.; triple-expansion engines. The Canadian ship *Anna C. Minch* foundered on November 11-12th,

1940, 1½ miles S.S.W. of Pentwater Pier, Lake Michigan, during a gale

ANNA FOSTENES

A/S Fostenes D/S; 1902; *Scheepsw. v. Jan Smit, Czrn.*; 2,577 tons; 320-2x44x20-7; 236 n.h.p.; triple-expansion engines. The Norwegian steamship *Anna Fostenes* was torpedoed and sunk by a German submarine on April 2nd, 1917, in the North Sea.

ANNA MARIA GUALDI

S.A.L.P. Soc. Anon Industria Pesca; 1908; *Workman, Clark & Co.*; 3, 289 tons; 339-5x42-6x15-9; 486n.h.p.; triple-expansion engines. The Italian ship *Anna Maria Gualdi* was destroyed by an internal explosion on December 1st, 1942, at Palermo.

ANNAGHER

I. Kelly, Ltd.; 1923; *J. Lewis & Sons*; 586 tons; 165-2x27x 11-2; 83r.h.p.; 10 knots; triple-expansion engines. The small cargo steamship *Annagher* left the Abercorn Basin, Belfast, at five p.m. on Saturday, December 1 1th, 1937, for Llanelly, South Wales, with 619 tons of mixed scrap iron and steel, including 16 tons of lead. The vessel carried a crew of nine all told and was under command of Capt. James McCalmont. The weather was fresh with a N.E. wind and a rough sea. Soon after passing the Pile Light at 6 p.m. the ship developed a list to starboard, to counteract which the captain instructed the engineer to put pumps on to the tanks and bilges, but it was immediately ascertained that the ship was dry. Nevertheless the list increased and it was decided to bring the vessel round so that the strong wind might bear on the other side and correct the list, but this manoeuvre met with no success. As a last resort an attempt was made to beach her, but she foundered before reaching shallow water. No steps appear to have been taken to make use of the ship's lifesaving appliances, particularly the lifeboat. The captain and eight members of the crew were drowned when the vessel sank.

ANNAM

Messageries Maritimes; 1899; *Burmeister & Wain*; 6,075 tons; 408-4x55-2x35-4; 572 n.h.p.; triple-expansion engines. The French steamer *Annam* was torpedoed and sunk by a submarine on June 10th, 1917, in the Mediterranean.

ANNAN MARU

Kita Nippon Risen K.K.; 1911; *Armstrong, Whitworth & Co.*; 2,940 tons; 305-2x44-1x24-9; 279 nh.p.; triple-expansion engines. The steamship *Annan Mam* was bombed and sunk by U.S. aircraft on September 6th, 1943, off Rangoon.

ANNAVORE

A/S Vore; 1921; *Murdoch & Murray*; 3,324 tons; 333-1 x 49x22-4; 287 n.h.p.; triple-expansion engines. The Norwegian ship *Annavore* was torpedoed and sunk on December 21st, 1941, in 43° 55' N., 19° 50' W. Twenty-nine of her crew were killed.

ANNE HUTCHINSON

United States War Shipping Administration; 1942; *Oregon S.B. Corp.*; 7,176 tons; 422-8x57x34-8; triple-expansion engines. The American ship *Anne Hutchinson* was torpedoed and shelled on October 26th, 1942, by a submarine. Her stern portion up to No. 4 hatch was blown off. The forepart was towed into Algoa Bay on October 31st. Three lives were lost.

ANNELIESE ESSBERGER

John T. Essberger; 1935; *Deutsche Werft A.G.*; 5,173 tons; 418-5x57-2x25-3; 885 n.h.p.; oil engines. The German motorship *Anneliese Essberger* left Bordeaux on November 4th, 1942, bound for Japan. At daybreak on November 21st, she was intercepted by British warships and sunk by gunfire about 400 miles E. of St. Paul Rocks.

ANNETTE FRITZEN

I. Fritzen & Sohn; 1903; *J. Blumer & Co.*; 2,774 tons; 314X 46-5x20-7; 272 n.h.p.; triple-expansion engines. The German steamship *Annette Fritzen* was chartered by the Japanese during the Second World War. On July 26th, 1945, she struck a mine and sank off Pusan, Korea.

ANNIBAL BENEVOLO

Lloyd Brasileiro; 1905; *Reiherstieg Schiffswerf & Maschfbk.*; 1,905 tons; 269 x37-8x11-5; 156 n.h.p.; triple-expansion engines. This Brazilian passenger ship was sunk by a German submarine off the coast of Brazil on August 16th, 1942. Only four out of a total of 136 persons were saved.

ANNIE

R. Gordon & Co.; 1877; *J. L. Thompson & Sons*; 1,177 tons; 230-4x31-8x17-5; 110 n.h.p.; compound engines. While on a voyage from Ursviken to Sutton Bridge with a cargo of timber, the *Annie* was wrecked near Umea in July, 1891.

ANNIE HUGO STINNES 6

Hugo Stinnes G.m.b.H.; 1910; *Flensburger Schiffsb. Ges.*; 1,486 tons; 243-6x37-6x17-6; 135 n.h.p.; triple-expansion engines. The steamship *Annie Hugo Stinnes 6* struck a mine and sank on November 14th, 1942, between Hamburg and Emden.

ANNIE JANE

Holderness; 1853; *Quebec*; 1,294 tons; 240X — X. The emigrant ship *Annie Jane*, Capt. W. Mason, left Liverpool for Canada with over 500 persons on board. For three weeks she battled with violent gales and eventually put back to port with the loss of her mizzen-mast and several spars. About 100 of the emigrants left her as soon as she reached Liverpool. Having completed her repairs she again proceeded to sea with a total of 450 passengers and crew. The emigrants were chiefly Scots, with a number of Irish, French and Germans.

The ship again encountered rough weather and on the night of September 28th, 1853, when off Barra Island, in the Hebrides, she was struck by a huge wave. The poop-deck collapsed immediately, crushing 200 people to death, and in ten minutes more the ship went to pieces. A portion of the deck remained afloat and on this nearly 100 survivors were safely washed ashore.

At daybreak a roll-call was taken when it was found that 102 persons were saved and that 348 had lost their lives during the brief 15 minutes that the ship remained afloat after the disaster.

ANNIE OGLE

T. Rountree; 1874; *Rountree*; 210 tons; 116-4x25-4x10-9. The brig *Annie Ogle* engaged in the Australian coasting trade was wrecked near Smoky Cape, N.S.W. The brig drove ashore in heavy weather in March, 1875. Nine persons were drowned.

ANNITSA

I. G. P. Livanos; 1918; *J. Readhead & Sons*; 4,324 tons; 400-2 x52-1x25-2; 425 n.h.p.; triple-expansion engines. The Greek ship *Annitsa* was torpedoed and sunk on January 15th, 1943, by a submarine off Tobruk.

ANNOULA

G. P. Cicellis & G. A. Kambitsis; 1908; *Russell & Co.*; 4,853 tons; 400 X 52 • 1 x 27 • 3; 502 n.h.p.; triple-expansion engines. The Greek ship *Annoula* foundered during a cyclone on October 7th, 1933, off Cape Lookout. Some survivors were landed at Philadelphia.

ANRI GO No. 2

Japanese Government; 1,026 tons. *Ami Go No. 2* was the name given by the Japanese to a captured ship. She was sunk by U.S. carrier-based aircraft on January 16th, 1945, about 100 miles S.E. of Macao.

ANRIMARU

Japanese Government; 1905; *Schiffsw. v. Henry Koch*; 1,668 tons; 265-7x37-8x18-3; 164n.h.p.; triple-expansion engines. The steamship *Ami Maru* was formerly the Chinese *An Lee*, seized by the Japanese. She struck a mine and sank on June 25th, 1945, off Shimonoseki.

ANSELM

ANSELM

Booth Line; 1935; W. Denny & Bros.; 5,954 tons; 412 -3 x 55-7x25-8; 696n.h.p.; 14 knots; turbine engines. The Booth liner *Anselm*, Capt. A. Elliott, O.B.E., serving as an auxiliary transport was in convoy some 300 miles N. of the Azores when she was torpedoed and sunk by a submarine. The attack took place on July 5th, 1941, and four members of the crew were killed and two wounded, besides casualties among the troops on board.

ANSHIN MARU

Kusakabe Kisen Kabushiki Kaisha; 1892; *Nederlandsche Stoomb. Maats*; 1,567 tons; 254-7x33x16-7; 197n.h.p.; triple-expansion engines.

The *Anshin Mam* was wrecked on August 18th, 1925, during a typhoon off East Kamchatka.

ANSHU MARU

Chosen YwenK.K.; 1937; *Uraga Dock Co.*; 2,601 tons; 295x45 X23-8; 223 n.h.p.; compound engines and L.P. turbines. The steamship *Anshu* (or *Ansyu Mam*) was taken over for service as an auxiliary gunboat. On May 29th, 1944, she was torpedoed and sunk by the U.S. submarine *Rasher S.W.* of Burn Island, Celebes.

ANTARES

Argo Reederei Richard Adler & Co.; 1937; *Lubecker Maschb. Ges.*; 2,593 tons; 319-7x47x18-5; 342n.h.p.; compound engines.

The German ship *Antares* was carrying troops for the invasion of Norway on April 10th, 1940, when she struck a mine and sank off Lysekil.

ANTARES

Italian Navy, torpedo boat; 1936; *Ansaldo*; 642 tons; 267x27x7; 19,000 s.h.p.; 34 knots; turbine engines; 3-drum boilers; three 3-9 in. guns, four 37 mm.A.A., two 13 mm.A.A., 4 T.T. The Italian torpedo boats *Angela Bassini* and *Antares* were lying in Leghorn harbour on May 28th, 1943, when they were bombed and sunk by British aircraft. Both vessels carried complements of about 100.

ANTARTICO

Soc. Anon. Ganadera y Comercial Menendez Behetv; 1911; *Van Vliet & Co.*; 605 tons; 169-5x28-1x11-6; 86n.h.p.; triple-expansion engines.

The Chilean ship *Antartico* had gone to assist the *Yero Carras*, which had drifted from her moorings during a heavy gale on February 4th, 1932, off Magallanes. She collided with the *Yero Carras* and sank in 100 fathoms.

ANTE MATKOVIC

Eugen Matkovic; 1920; *Atel. & Ch. de Bretagne*; 2,710 tons; 290x43-3x20-2; turbine engines.

The Yugoslav cargo ship *Ante Matkovic*, Capt. Niko Ivanovic, was shelled and sunk by a German submarine on June 19th, 1942, in the Gulf of Mexico. Six lives were lost.

ANTEO

A. & G. Fratelli Sturlese; 1890; *Strand Slipway Co.*; 2,774 tons; 302-3x40-7x18-5; 272n.h.p.; triple-expansion engines.

The Italian steamship *Anteo* struck a mine and sank on November 12th, 1917, in the Mediterranean.

ANTHIPHI

M. Michalos; 1872; *Palmers'Co.*; 1,166 tons; 256-8x30x17-2; 154 n.h.p.; compound engines.

The Greek steamship *Anthipi* was torpedoed and sunk by a submarine on December 29th, 1915, in the Adriatic.

ANTIIGONE

New Egypt & Levant Shipping Co.; 1928; *Napier & Miller*; 4,545 tons; 401-4x54-2x25-3; 418 n.h.p.; triple-expansion engines.

The British ship *Antigone* was torpedoed and sunk on May 11th, 1943, while on a voyage from Halifax to Avonmouth. Three lives were lost.

ANTILLES

Southern Pacific Co.; 1907; *W. Cramp & Sons*; 6,878 tons; 410x53-2x25-6; 860n.h.p.; 16 knots; triple-expansion engines.

The liner *Antilles*, acting in the capacity of a United States auxiliary transport, was returning from Europe when she was torpedoed on October 17th, 1917. The submarine was not seen by those on the transport and their first knowledge of its presence came when a torpedo struck the vessel amidships, near the engine-room. Many of the engine-room staff and a number of men asleep below were killed by the explosion.

The *Antilles* was carrying 167 persons, including some soldiers returning to the United States. Of these 16 soldiers, three ship's officers and 48 of the crew were either killed or drowned. The survivors were picked up and landed in France. The gun crewing on to the last in the hope of hitting the submarine, and were too late to escape when the transport foundered.

ANTINOE

Egypt & Levant Steamship Co.; 1907; *Craig Taylor & Co.*; 2,396 tons; 306x44-4x20-1; 239n.h.p.; 9-5 knots; triple-expansion engines.

The steamship *Antinoe* was torpedoed and sunk by a submarine 150 miles W.S.W. of Bishop Rock, Scilly Isles, on May 28th, 1917. The captain and 20 men were killed.

ANTINOE

New Egypt & Levant Steamship Co.; 1902; *Bartram & Sons*; 3,747 tons; 382-5x46-1x26-2; 352n.h.p.; 10-5 knots; triple-expansion engines.

On January 14th, 1926, the *Antinoe* left New York for Queenstown for orders under command of Capt. Harry Tose. Her crew numbered 25 all told and her cargo consisted of 5,127 tons of grain. The weather was fine until January 23rd when she ran into a W.S.W. gale with a heavy sea. On this date at 6.20 a.m. an extremely large wave was sighted approaching from S.S.W. by Mr. J. Price, the second officer, who immediately ordered the helm to be put hard-a-starboard. Before this order could be executed the wave burst upon the *Antinoe* with terrific violence, carrying away a dinghy, ice-chest and teak bulwarks around the captain's bridge. The ice-chest was hurled against the connecting-rod of the steering gear, which it put out of commission for a time, and also damaged the engine-room telegraph. The latter damage made it necessary for messages to the engine-room to be taken by messenger.

The gale continued without abatement and the *Antinoe* gradually became more and more unmanageable. She developed a list of six degrees to starboard immediately after the tidal-wave and on the 24th her No. 3 hatchway covers were washed away. This occurred about 3 a.m., but the heroic exertions of the crew repaired the damage and things were improving when at 4 a.m. the starboard after bunker hatchway was stove-in by the weight of the seas.

An hour later Capt. Tose decided to send out an S.O.S. call which was received by the Newfoundland shore-station and relayed, being picked up by the R.M.S. *Aquitania* which passed it on to the *President Roosevelt* of the United States Line. At 12.30 p.m. on the 24th the latter vessel made contact with the *Antinoe* and after pumping much oil into the sea attempted to launch a boat. This ended in tragedy for no sooner did the boat get away from the side than it was hurled back by the waves and smashed, two of the crew being drowned. At 9 p.m. on the same evening the area was swept by violent snowsqualls and the two vessels lost touch for 184-hours, but at 3.40 p.m. on the 25th the good reckoning of Capt. Fried of the *President Roosevelt* brought him back to the derelict once more.

In the meantime the situation had grown steadily worse. A 45-ton derrick on the forward deck of the *Antinoe* had broken loose and was causing vital damage. The ship's engines had stopped and Capt. Tose, after a magnificent struggle against dreadful odds, decided to "abandon ship". Five successive attempts were made by the *President Roosevelt* to drift lifeboats down upon the *Antinoe* attached to a line. The Lyle rocket-gun on board the liner also fired lines to the derelict, but they either snapped or fell short, only one reaching its target and parting soon after.

On the 27th, the weather having improved, a boat from the *President Roosevelt* took off a party from the *Antinoe* without loss, and just after midnight another successful trip brought away the gallant Capt. Tose and the remaining members of his crew. At

1.35a.m. on the 28th the *President Roosevelt* left the sinking *Antinoe*, having rescued every man on board, and proceeded on her way to Plymouth.

The captain and crew of the *President Roosevelt* were the recipients of the thanks of the British government and the congratulations of the Admiralty. The occasion was also marked by a letter of thanks from King George V to President Coolidge to which the President replied. The owners of the *Antinoe* made a presentation to Capt. Fried and his officers.

ANTIOCO ACCAME

Fratelli S. & E, Accame; 1895; London & Glasgow Co.; 4,439 tons; 391-8x46-6x27-9; 350 n.h.p.; triple-expansion engines. The Italian steamship *Antioco Accame* was torpedoed and sunk by a German submarine on March 4th, 1918, W. of Gibraltar.

ANTIOPE

New Egypt & Levant Shipping Co.; 1930; Napier & Miller; 4,545 tons; 400-8x54-2x25-3; 418 n.h.p.; triple-expansion engines. The British ship *Antiope* was bombed and sunk on October 27th, 1941, when on a voyage from London to New York. A lifeboat was washed ashore.

ANTIJE FRITZEN

Johs.Fritzen&Sohn; 1916; W. Pickersgill & Sons; 4,330 tons; 365 X51 X25-9; 361 n.h.p.; triple-expansion engines. The steamship *Antje Fritzen* was torpedoed and sunk by a British submarine on September 21st, 1943, off North Norway.

ANTOLIN DEL COLLADO

Empresa Naviera de Cuba, S.A.; 1881; Scott & Co.; 995 tons; 210-4x32-4x14-3; 235 n.h.p.; compound engines. The Cuban ship *Antolin del Collado* sank after colliding with the *Hallmoor* on October 15th, 1930, 2 miles off Mariel, Cuba.

ANTON

A/B Skagerack; 1882; Oswald, Mordaunt & Co.; 1,568 tons; 258-9x36x18; 173 n.h.p.; compound engines. The Swedish steamship *Anton* was torpedoed and sunk by a German submarine on June 6th, 1917, in the North Sea.

ANTON SCHMITT

German Navy, destroyer; 1937; Deschimag; 1,811 tons; 384 x 38x9-5; 55,000s.h.p.; 36knots; turbine engines; five 5 in. guns, four 37 mm., 8 T.T.

The *Anton Schmitt* was one of the flotilla of German destroyers sunk in the first battle of Narvik on April 10th, 1940. A full account of both battles is given under the flotilla leader, *Hardy*, which was sunk in the first action. There is also a short account under the Norwegian coast defence ship, *Norge*.

ANTONICO

Manoel Leonidas de Albuquerque; 1919; Ch. & At el. de St. Nazaire; 1,223 tons; 218-6x34-2x13-2; 81 n.h.p.; compound engines.

The Brazilian ship *Antonico* was shelled and sunk by a German submarine on September 28th, 1942, at the entrance to the Maro- wyne River, Brazil. Sixteen of the crew of 40 were killed.

ANTONIETTA

G. Bozzo fu L.; 1895; Russell & Co.; 4,434 tons; 388-5X 47-1x21-7; 350 n.h.p.; triple-expansion engines.

The Italian ship *Antonietta* was wrecked on December 8th, 1928, on the Susan Rock, Morocco.

ANTONIETTA LAURO

A.Lauro; 1928; P.Smit, Jr.; 5,428 tons; 435-5x55-2x26-5; 500n.h.p.; triple-expansion engines.

The Italian steamship *Antonietta Lauro* was torpedoed and sunk by the British submarine *Upholder* on April 25th, 1941, off the Kerkenna Islands, Tunisia.

ANTONIO

Egypt & Levant Steamship Co.; 1905; J. Blumer & Co.; 2,652 tons; 314x46-5x20-6; 287n.h.p.; 95knots; triple-expansion engines.

The steamship *Antonio* was mined and sunk seven miles off Dartmouth on March 7th, 1917. The captain and ten men were killed.

ANTONIO

Maritime Shipping & Trading Co.; 1918; J. L. Thompson & Sons; 5,225 tons; 400-3x52-3x28-4; 517n.h.p.; triple-expansion engines.

The *Antonio* was damaged in a collision with the *Fort Moose* on March 28th, 1945, off Milford Haven. She capsized and sank on March 31st, about five miles off St. Ann's Head.

ANTONIO DA NOLI

Italian Navy, destroyer; 1929; Tirreno; 1,628 tons; 352 X 33-5x16-7; 50,000s.h.p.; 38 knots; turbine engines; Odero boilers; six 4 • 7 in. guns, four 37 mm., 4 T. T., 50 mines.

The Italian destroyer *Antonio da Noli* was mined and sunk off Maddalena on September 9th, 1943. The vessel's normal complement was 185.

ANTONIO GARCIA

F. Gar da; 1883; Short Bros; 2,051 tons; 275x38-6x20-6; 211 n.h.p.; compound engines.

The Spanish ship *Antonio Garcia* was sunk in a collision off Vigo on December 14th, 1929.

ANTONIO LOCATELLI

Soc. Anon. Cooperativa diNav. "Garibaldi"; 1920; Western Pipe & Steel Co.; 5,691 tons; 427x54-3x27-1; 359n.h.p.; triple-expansion engines.

The Italian ship *Antonio Locatelli* was intercepted by a British warship and sunk by gunfire on November 12th, 1940, 12 miles from Valona. The body of one of the crew was found; there were no survivors.

ANTONIO PIGAFETTA

Italian Navy, destroyer; 1929; Quarnaro; 1,628 tons; 352 X 33-5x16-7; 50,000s.h.p.; 38 knots; turbine engines; Yarrow boilers; six 4 • 7 in. guns, four 37 mm., 4 T.T., 50 mines.

The Italian destroyer *Antonio Pigafetta* was bombed by Allied aircraft at Trieste on February 17th, 1945. The vessel was among those which had fallen into German hands at the time of the Italian surrender in September 1943. Her normal complement was 185.

ANTONIOS

D.Lemos; 1896; Richardson, Duck & Co.; 2,720 tons; 300X 42-1x17-2; 246n.h.p.; triple-expansion engines.

On September 15th, 1923, there was an explosion in the hold of the Greek ship *Antonios*. She caught fire and sank in 49° 36' N., 6° 08' W.

ANTONIOS CHANDRIS

J. D. Chandris; 1918; Kawasaki Dkyd. Co.; 5,867 tons; 385 x51x 36; 440 n.h.p.; triple-expansion engines.

The Greek ship *Antonios Chandris* was intercepted and sunk by a German raider on September 8th, 1940, in 12° N., 35° W. The chief officer and nine men reached shore.

ANTONIOS J. DRACOULIS

G. A. Dracoulis; 1906; Swan, Hunter & Wigham Richardson; 3,301 tons; 331-3x49x22-7; 295 n.h.p.; triple-expansion engines.

The Greek steamship *Antonios J. Dracoulis* was torpedoed and sunk by a submarine on January 24th, 1918, in the Mediterranean.

ANTONIOS M. MAVROGORDATOS

A.M.Mavrogordatos; 1901; Ropner&Son; 3,771 tons; 340 X 49-6x25-6; 332n.h.p.; triple-expansion engines.

The Greek steamship *Antonios M. Mavrogordatos* was torpedoed and sunk by a German submarine on June 17th, 1917, off the Scilly Islands.

ANTONIOS N. THEOPHILATOS

ANTONIOS N. THEOPHILATOS

C. A. Theophilatos; 1889; *Palmers' Co.*; 2,282 tons; 290x40-2x21-2; 289n.h.p.; triple-expansion engines. The Greek steamship *Antonios N. Theophilatos* was torpedoed and sunk by a submarine on March 20th, 1918, in the Mediterranean.

ANTONIOSSTATHATOS

C. Stathatos; 1901; *J. Blumer & Co.*; 2,743 tons; 319-6x46-1x21; 261 n.h.p.; triple-expansion engines. The Greek steamship *Antonios Stathatos* struck a mine and sank on December 1st, 1917, in the Bay of Biscay.

ANTONIOTTO USODIMARE

Italian Navy, destroyer; 1929; *Odero*; 1,628 tons; 352x33-5x16-7; 50,000s.h.p.; 38 knots; turbine engines; *Odero boilers*; six 4" 7 in. guns, four 37 mm.A.A., eight 13 mm.A.A., 4 T.T. The Italian destroyer *Antoniotto Usodimare* was mined and sunk about 80 miles N. of Cape Bon on August 8th, 1942. The vessel carried a complement of about 200.

ANTONIS

Antonis G. Lemos' Sons; 1915; *R. Thompson & Sons*; 3,729 tons; 350x50-5x22-8; 346 n.h.p.; triple-expansion engines. The Greek ship *Antonis* left St. Vincent, C.V., on January 4th, 1941, bound for Rosario. She was intercepted and sunk by a German raider on January 7th. It was afterwards learned that the crew were prisoners of war in Germany.

ANTONIS G. LEMOS

S. A. Lemos & P. A. Lemos; 1911; *Bar tram & Sons*; 4,410 tons; 385x52x25-1; 401 n.h.p.; triple-expansion engines. The Greek steamship *Antonis G. Lemos* was on a voyage from Danzig to Buenos Aires when, on August 24th, 1936, she collided in a fog with the British warship *Keith* in lat. 49° 56' N., long. 2° 17' W., and sank on the same afternoon.

ANTONIS GEORGANDIS

Georgandis Bros.; 1915; *Rotterdam Droogd. Maats.*; 3,557 tons; 345-6x48-8x23-2; 361 n.h.p.; triple-expansion engines. The Greek ship *Antonis Georgandis* left St. Vincent, C.V., on June 5th, 1940, for Limerick with a grain cargo. On June 14th, she was shelled and sunk by a German submarine. No lives were lost.

ANTONY

Booth Line; 1907; *Hawthorn Leslie & Co.*; 6,446 tons; 418-5X52-3x27-2; 850 n.h.p.; 14 knots; triple-expansion engines. The Booth liner *Antony* was torpedoed and sunk by a German U-boat 19 miles W. by N. of Coningbeg lightship on March 17th, 1917. Fifty-five persons lost their lives. The captain was among the survivors.

ANTUNG

China Nav. Co.; 1926; *Taikoo Dkyd. & Eng. Co.*; 3,509 tons; 338-5x49-3x24" 1; 12 knots; turbine engines. The British ship *Antung*, Capt. Ashby, went ashore in a fog on March 6th, 1933, about 3½ miles S. of Mofu Point, Hainan Island. There were 420 passengers and 111 crew on board, and altogether 70 lost their lives.

ANIVERPIA

Cia. de Nav. Sud-Atlantique Beige; 1908; *Swan, Hunter & WighamRichardson*; 4,933 tons; 401-2x52-5x20-2; 470n.h.p.; quadruple-expansion engines. The Belgian steamship *Aniverpia* was bombed by German aircraft in Boulogne harbour on May 23rd, 1940. She was beached and burned out.

ANU

A. Saarna & G. H. Dalgren; 1883; *J. Readhead & Co.*; 1,421 tons; 250x36-2x17-6; 135 n.h.p.; compound engines. The Estonian steamship *Anu* struck a mine and sank on February 6th, 1944, off the River Tay. Six of her crew were killed,

ANUBIS

James Moss & Co.; 1890; *Aitken & Mansel*; 2,300 tons; 320x39x20; 290 n.h.p.; triple-expansion engines. The British steamship *Anubis* was wrecked in November, 1900, at Cape Torinana on the N.W. coast of Spain while sailing from Alexandria to Liverpool with a cargo of cotton.

ANVERS

Cie. Royale Belgo-Argentine; 1908; *Flensburger Schiffsb. Ges.*; 4,398 tons; 383-3x52-1x25-3; 306n.h.p.; triple-expansion engines. The Belgian ship *Anvers* was bombed and sunk by German aircraft in the N. Atlantic on November 13th, 1940. One man was killed.

ANYO MARU

Inui Gomet Kaisha; 1888; *Palmers'Co.*; 2,147 tons; 275-3X37-6x21-4; 225n.h.p.; triple-expansion engines. The Japanese ship *Anyo Mam* left Keelung on August 27th, 1922, for Yokohama with a cargo of rice and was never heard of again.

ANYO MARU

Nippon Yitsen K.K.; 1913; *Mitsubishi Dockyard*; 9,257 tons; 460X59-7X32-5; 1,157 n.h.p.; turbine engines. The steamship *Anyo Mam* was torpedoed and sunk by the U.S. submarine *Barb* on January 8th, 1945, near the Pescadores Islands.

ANZAN MARU

Dairen Risen K.K.; 1915; *Irvine's S.B. & D.D. Co.*; 3,890 tons; 350-2x51-1x24; 302 n.h.p.; triple-expansion engines. The steamship *Anzan Mam* was torpedoed and sunk by the U.S. submarine *Scorpion* on July 3rd, 1943, in the Yellow Sea.

ANZAN MARU

Kokoku Risen K.K.; 1919; *Columbia River S.B. Corp.*; 5,493 tons; 410x54-2x27-6; turbine engines. The steamship *Anzan Maru* was torpedoed and sunk by the U.S. submarine *Flying Fish* on March 16th, 1944, off Okinawa Island.

AOBA

Japanese Navy, heavy cruiser; 1926; *Mitsubishi*; 7,100 tons; 580x50-7x14-7; 95,000 s.h.p.; 33 knots; turbine engines; *Kanpon boilers*; six 8 in. guns, four 4-7in., 10m.g., 12 T.T., 3 aircraft.

The Japanese heavy cruiser *Aoba* was one of a group of vessels of war, comprising three battleships, two heavy cruisers and one light cruiser lying in Kure harbour on July 28th, 1945, when a concentrated attack was made upon shipping by British and American naval aircraft. Every ship was sent to the bottom, the *Aoba* and the battleship *Hyuga* sinking in shallow water. This was the last large-scale air attack prior to the cessation of hostilities between Japan and the Allies on August 15th, 1945.

The full story of the attack is told under the battleship *Haruna*.

AOBA MARU

Kawasaki Risen K.K.; 1948; *Kawasaki Jukogyo K.K.*; 599 tons; 157-6x26-2x11-8; triple-expansion engines. The Japanese ferry *Aoba Maru* sank during a typhoon on June 21st, 1949, about ten miles off Himeshima, Kuyushu.

AOBASAN MARU

Sato Shoten; 1917; *Ishikawajima S.B. Co.*; 2,181 tons; 268X40-7x23-5; 169n.h.p.; triple-expansion engines. The *Aobasan Maru* was wrecked on May 7th, 1924, at Cape Ashizuri.

AOBASAN MARU

Mitsui Bussan K.K.; 1935; *Mitsui Bussan K.K.*; 8,812 tons; 450x62x39-2; 1,230n.h.p.; oilengines. The motor vessel *Aobasan Maru* was bombed and sunk by U.S. aircraft on December 30th, 1944, W. of Luzon Island.

AOKIMARU

Teikoku Sempaku; 3,710 tons. The steamer *Aoki Maru* was sunk by U.S. carrier-based aircraft on November 13th, 1944, off Manila.

AOTAKA

Japanese Navy, minelayer; 1940; Harima; 2,000 tons; 320 x — X —; 20 knots.
The Japanese minelayer *Aotaka* was torpedoed and sunk off North Borneo by the U.S. submarine *Pargo* on September 26th, 1944. The vessel carried a complement of over 200.

APALOIDE

LloydBrasileiro; 1917; Helsingors Jernsk. & Msk.; 5,766 tons; 361 • 9 X 50 • 2 X 23 • 7; 237 n.h.p.; triple-expansion engines.
The Brazilian ship *Apaloide* was torpedoed and sunk by a submarine on November 22nd, 1942. She was on a voyage from Pernambuco to New York. Five lives were lost.

APAPA

Elder Dempster & Co.; 1914; Harland & Wolff; 7,832 tons; 425-7x57-3x31-3; 516n.h.p.; 14 knots; quadruple-expansion engines.
The Elder Dempster liner *Apapa*, Capt. Toft, one of the largest in the company's fleet at that time, was returning home from West Africa when she was torpedoed by a German submarine. The vessel had reached a position three miles N. by E. of Lynas Point, near Liverpool, when she was attacked at 4.10 a.m. on Wednesday, November 28th, 1917, when steaming at 13 knots. No sign of the submarine was visible to those on board. The torpedo exploded on the starboard side nearly amidships, extinguishing the electric light and making the work of mustering the passengers much more difficult, but fortunately the sea was calm, with brilliant moonlight. Capt. Toft managed to launch a number of boats without mishap, but ten minutes after the first attack a second torpedo struck one of the boats containing from 20 to 30 people and killed or drowned the majority.
There were 249 persons on board the *Apapa*, of whom 129 were passengers, and 40 passengers and 37 crew were lost. Capt. Toft went down with the ship, but came to the surface and was rescued.

APAPA

Elder Dempster Lines; 1927; Harland & Wolff; 9,333 tons; 451x62x31; 1,651 n.h.p.; 14-5 knots; oilengines.
The liner *Apapa*, Capt. Vaughan Davies, was bombed and sunk by German aircraft on November 15th, 1940, at a position about 200 miles W. of Achill Head, Co. Mayo, five passengers and 18 crew being killed. Capt. Davies was among the survivors.

APARIMA

Union Steamship Co. of New Zealand; 1902; W. Denny & Bros; 5,704 tons; 430-5x54-3x28-5; 389n.h.p.; 12 knots; triple-expansion engines.
The liner *Aparima*, Capt. Doorly, was bound from London to Barry, in ballast, and carried a party of cadets training for the New Zealand mercantile marine. The vessel left the Downs on the night of November 18th, 1917, having on board 24 European crew, 62 native crew, 29 cadets and the pilot. At about 50 minutes past midnight on the 19th, when six miles S.W.f.W. of Anvil Point the liner was torpedoed aft by an unseen submarine. The night was very dark with a slight sea and the ship at once settled by the stern, the wireless cabin being flooded so that all messages ceased. In from six to eight minutes of being torpedoed the *Aparima* had sunk with her stern on the seabed and her bow in the air, remaining thus for a time and then rolling over with flames pouring from her funnel.
The loss of life was very heavy, totalling 56 persons, of whom 17 were cadets, nine European members of the crew and 30 native seamen. The pilot was among the survivors. Capt. Doorly, who dived overboard at the last moment was rescued by one of the boats. One boat containing 26 men was picked up by the Norwegian steamship *Gulhang*.

APOLLON

Soc. Anon. "Les Affreteurs Reunis"; 1912; Dundee S.B. Co.; 1,129 tons; 200-2x35-1x12-2; 159n.h.p.; triple-expansion engines.
The French ship *Apollon* caught fire on October 26th, 1925, in Beirut harbour. She had a cargo of dynamite and benzine, and to prevent the fire from spreading, she was sunk by gunfire.

APOLLONIA

Sicilia Societa di Nav.; 1891; Reiherstieg Schiffswerft; 2,861 tons; 334-3x40x23-6; 276n.h.p.; triple-expansion engines.
The Italian steamship *Apollonia* struck a mine and sank on March 1st, 1917, in the North Sea.

APOLLONIA

Nederl. Indische Tankstoomboot Moats.; 1931; Rijkee & Co.; 2,086 tons; 260-5x48-1x15; 286n.h.p.; oilengines. The Dutch tanker *Apollonia* was attacked by the German destroyers *Hans Lody*, *Karl Galster* and *Richard Beitzen* and sunk by shell fire and torpedoes on November 25th, 1940, between the Lizard and Wolf Rock. Fourteen of the crew were killed.

APPALACHEE

Anglo-American Oil Co.; 1930; Palmers'Co.; 8,826 tons; 477X 63-8x34-8; 785 n.h.p.; oilengines.
The British oil tanker *Appalachee* was torpedoed and sunk by a submarine in 54° 30' N., 20° W. on December 1st, 1940. Thirty-two of the crew were saved.

APSCHERON

Soc. Anon. a"Arm. a"Industrie et de Commerce; 1887; Palmers" Co.; 1,850 tons; 271x37-2x15-2; 203 n.h.p.; triple-expansion engines.
The Belgian steamship *Apscheron* struck a mine and sank on October 15th, 1915, in the Black Sea.

AQUEITY

F. T. Everard & Sons; 1945; A. & J Inglis; 890 tons; 193 X 32x14-5; 125n.h.p.; oilengines.
The British ship *Aqueity* struck a mine and sank on November 11th, 1947, near Terschelling.

AQUIDABAN

Brazilian Navy, turret ironclad; 1885; Thames Ironworks; 4,950 tons; 280 x 52x18-6; 6,200 i.h.p.; 15 knots; triple-expansion engines; four 9 • 4 in. guns, four 5 • 5 in., 13 m.g., 5 T.T.
The Brazilian ironclad *Aquidaban* first came into prominence when she bombed and silenced the forts at Santa Cruz in 1892. In the rebellion of September, 1893, she was torpedoed and sunk in shallow water by the *Sampaio*, but was afterwards raised and refitted. Owing to her activities in these revolutions she became one of the best-known fighting ships of her time. After over 20 years' service she was still accounted one of the most formidable units in the navies of South America.
On Sunday, January 21st, 1906, she was lying off Jacarapagua, a little port some miles S. of Rio de Janeiro. She was at the time accompanying the cruiser *Barroso*, which had the Minister of Marine on board, the object of the cruise being the selection of a suitable site for a naval dockyard. The *Aquidaban* had an official complement of 350, to which must be added a commission consisting of three rear-admirals and several lesser officers, and she was crowded beyond her normal sleeping capacity.
At 11.15 a.m. the ship blew up and sank in three minutes, 212 being drowned, 36 injured and 98 rescued. Rear-Admirals Rodrigo Darocha, Calheiros de Graca and Candido Brasil, with the commander, Capt. Alvas del Arros, were among the drowned.

AQUILA

T.B. Heistein & Sonner AIS; 1888; R. Dixon & Co.; 2,191 tons; 288-7x38-4x19-1; 217n.h.p.; triple-expansion engines. The Norwegian steamship *Aquila* was sunk by a German submarine on June 18th, 1916, in the Mediterranean.

AQUILA

German Government; 1908; Chantiers Navales Anversois; 3,495 tons; 346-8x48-1x23-1; 317n.h.p.; triple-expansion engines. The steamship *Aquila* was formerly the Panamanian *Alba*, seized by the Germans. On November 8th, 1944, she was bombed and sunk by British aircraft off North Norway.

AQUILONE

AQUILONE

Italian Navy, destroyer; 1927; Odero; 1,092 tons; 307-5 x 30-5 x 10-7; 40,000s.h.p.; 36 knots; turbine engines; Express boilers; four 4-7 in. guns, four 37 mm., two 13 mm., 6 T.T.
The Italian destroyer *Aquilone* was mined and sunk in Benghazi harbour on September 17th, 1940. The normal complement of the vessel was 142.

AQUINO

Italian Government; 1932; Swan, Hunter & Wigham Richardson; 5,079 tons; 381-7x53-8x23-4; turbine engines. The steamship *Aquino* was formerly the French *El Kantara*, taken over by the Italians. She was bombed and sunk on April 23rd/24th, 1943, N.W. of Marittimo.

AQUITANIA

Ditta Luigi Pittaluga Vapori; 1924; Blythsw'd S.B. Co.; 4,971 tons; 414-6x53-2x26-9; 425n.h.p.; triple-expansion engines.
The Italian steamship *Aquitania* was torpedoed, bombed and sunk by British aircraft on July 15th, 1943, 60 miles S.W. of Civitavecchia.

ARAB

A.R. BurkhW&Sons; 1890; Palmer & Co.; 4,191 tons; 375'X 46-3x20-4; 434 n.h.p.; 11 knots; triple-expansion engines.
The steamship *Arab* was torpedoed and sunk by a German U-boat 18 miles N. by E. of Cape Serrat on January 7th, 1918. Twenty-one men were killed. The captain was among the survivors.

ARABIA

Peninsular & Oriental Steam Navigation Co.; 1898; J. Caird & Co.; 7,933 tons; 499-7x54-3x24-5; 11,000 i.h.p.; 18 knots; triple-expansion engines.
The P. & O. liner *Arabia*, under command of Capt. Palmer, left Sydney for England on September 30th, 1916, calling at various ports en route. At about noon on November 6th she was in the Mediterranean, 112 miles W. by S. of Cape Matapan, with 723 persons on board when she was torpedoed by a German submarine. The *Arabia* sank in 20 minutes but so good was the discipline on board that 721 persons were transferred to the boats and got away in safety. The only loss was that of two members of the crew who were killed by the explosion.

The *Arabia* was carrying a very large mail from Australia, all of which was lost.

ARABIA MARU

Osaka ShosenK.K.; 1936; W. Hamilton & Co.; 9,480 tons; 475 X 61 X 40 • 7; 319 n.h.p.; triple-expansion engines.
The liner *Arabia Maru* was torpedoed and sunk by the U.S. submarine *Bluegitt* on October 18th, 1944, about 100 miles E. of Manila, while serving as a transport.

ARABIC

White Star Line; 1903; Harland & Wolff; 15,801 tons; 600-7X 65-5x47-1; 1,228 n.h.p.; 16 knots; triple-expansion engines.
The White Star liner *Arabic* with 434 passengers and crew under Capt. W. Finch was approaching the dangerous submarine area off the Old Head of Kinsale on the morning of August 19th, 1915, when she was torpedoed by the submarine U-24 at close range. She was struck on the starboard side about 100 feet from the stern and sank in about ten minutes, but thanks to the good discipline and seamanship of the officers and crew 390 persons were saved. Nevertheless there was a death-roll of 44, of whom several were United States citizens.

In the exchange of notes between the U.S. and Germany the Germans maintained that the *Arabic* attempted to ram the submarine and that the torpedo was fired in self-defence. The commander of the U-24, Lt. Cdr. Schneider, had received orders not to sink passenger liners without warning, but he mistook the zig-zag course of the *Arabic* for a deliberate attempt to confuse him and then run him down. He therefore felt justified in using his torpedo armament. Ultimately the Germans dropped their contention that the torpedoing was necessary and on October 5th Count Bernstorff, German ambassador, addressed a letter to Mr. Lansing, American Secretary of State, announcing that orders to submarine com-

manders to avoid passenger ships "... had been made so stringent that a recurrence of incidents similar to the *Arabic* case is considered out of the question".

This statement had the effect of allaying public alarm in America and diplomatic relations between the two countries were precariously maintained for another year.

ARABIS

British Navy, sloop; 1915; Great Britain; 1,175 tons; 267-7X 33-5x11; 2,000 i.h.p.; 16-5 knots; triple-expansion engines; cylindrical boilers; two 4 in. guns, two 12pr.

The British mine-sweeping sloop *Arabis* was a unit of the 10th Sloop Flotilla engaged in the work of keeping the North Sea channels free during the First World War. Her captain was Lt.Cdr. Hallowell-Carew and she carried a complement of 98 officers and men. On February 10th, 1916, the flotilla was engaged in sweeping operations in the North Sea preparatory to a concentration of the British Grand Fleet, as there were signs that the German High Seas Fleet might come out at any moment. So likely was the possibility that the Admiralty closed down all wireless communication and, although the flotilla was unaware of enemy activity, it was thought inadvisable to warn it. Just before midnight the little ships were attacked by destroyers, but, with the exception of the *Arabis* managed to escape.

The action that ensued commenced with an attack by three of the enemy on the British ship, which had her steam-pipe cut and her wireless disabled. So well did she fight, however, that her attackers were driven off for the time. Later another attack was made, this time by six destroyers, and the *Arabis*, still fighting gallantly, was sunk by torpedoes.

The only survivors were Lt.Cdr. Hallowell-Carew and another officer. They were treated with great courtesy by the Germans who were deeply impressed by the stout-hearted resistance of all on board the *Arabis*.

ARABIS

Flower Motor Ship Co.; 1914; Swan, Hunter & Wigham Richardson; 3,928 tons; 350x47-1x24-6; 302n.h.p.; 10 knots; oil engines.
The motor vessel *Arabis* was torpedoed and sunk by a German U-boat 210 miles W. by S. of Ushant on September 16th, 1917. The captain and 19 men were killed.

ARABISTAN

F. C. S. trick & Co.; 1929; J. Readhead & Sons; 5,874 tons; 425-7x55x28-5; 787n.h.p.; 13-5 knots; reciprocating and turbine engines.
The liner *Arabistan*, Capt. E. R. Barrett, was sunk by a German raider on, or about, August 18th, 1942, approximately 500 miles due E. of Aracaju, Northern Brazil. She carried a crew of 57 and 10 gunners. The chief officer was later reported to be a prisoner of war in Japan.

ARABUTAN

PedroBrando; 1917; Union Iron Works Co.; 7,874 tons; 410 X 56x38; 609n.h.p.; triple-expansion engines.
The Brazilian ship *Arabutan* was torpedoed and sunk by a German submarine on March 7th, 1942, when she was 70 miles from Newport News.

ARACATACA

Elders&Fyffes; 1911; Workman Clark & Co.; 4,154 tons; 376-3X 48 • 5 X 29 • 1; 413 n.p.h.; triple-expansion engines.
While on a voyage from Liverpool to Dunkirk with a cargo of frozen meat, the *Aracataca* sank in a collision off Beachy Head on April 18th, 1917.

ARACATACA

Elders&Fyffes Line; 1924; Cammell Laird; 5,378 tons; 400 -5 x 51-4x30-4; 447 n.h.p.; 13 • 5 knots; triple-expansion engines.
The Elders and Fyffes ship *Aracataca*, Capt. S. Browne, was torpedoed and sunk by a submarine in the North Atlantic on November 29th, 1940. Eight persons were killed. Capt. Browne was among the survivors.

ARAGON

Royal Mail Steam Packet Co.; 1905; *Borland & Wolff*; 9,588 tons; 513-2x60-4x30-8; 827n.h.p.; 15 knots; quadruple-expansion engines.

The liner *Aragon*, Capt. F. Bateman, was taken over by the British government from the R.M.S.P. Co. during the First World War. She was employed as an auxiliary transport and in December, 1917, was bringing reinforcements to the army operating in Palestine under General Allenby. The ship was full to capacity, having no less than 2,700 persons on board, of which number about 2,500 were troops.

On her arrival at Alexandria on December 30th, 1917, the ship was permitted to enter the harbour, but later was ordered out again. She anchored outside without any protection from submarine attack, for which she was an easy target. This piece of indiscretion on the part of the authorities did not remain long unpunished, for the *Aragon* was torpedoed and sunk by a submarine with a total loss of 610 persons, of whom 19 were crew, including Capt. Bateman.

ARAKAKA

Booker Bros., McConnell & Co.; 1933; *Lithgows*; 2,379 tons; 322•5x43•5X18•5; 221n.h.p.; 10•5 knots; triple-expansion engines.

The steamer *Arakaka*, Capt. William Walker, was on service in the North Atlantic carrying out meteorological duties for the Admiralty. She was last heard of on June 23rd, 1941, and it is assumed that she was the victim of a submarine attack. The vessel carried a crew of 45 including Admiralty personnel.

ARAMIS

Skibs A/S "Aramis"; 1931; *Burmeister & Wain*; 7,984 tons; 457-2x59-7x34-9; 624n.h.p.; oil engines.

The Norwegian tanker *Aramis* was intercepted in the South Atlantic by a German raider with attendant motor torpedo boats on July 16th, 1942. She was torpedoed by a torpedo boat but was able to continue on her course. For some hours she was shelled by the torpedo boat until, early on the 17th, the latter was able to board her. She was then sunk with explosive charges. Nineteen of her crew were killed.

ARANDA

A/S Aranda; 1890; *Richardson, Duck & Co.*; 1,838 tons; 270x36-6x16-5; 193 n.h.p.; triple-expansion engines. The Norwegian steamship *Aranda* struck a mine and sank on August 5th, 1916, off the west coast of Scotland.

ARANDORA STAR

Blue Star Line; 1927; *Cammell Laird*; 15,501 tons; 512-8 X 68-3x42-5; 2,080 n.h.p.; 16 knots; turbine engines.

The Blue Star liner *A random Star* was torpedoed and sunk by a German U-boat about 75 miles W. of Bloody Foreland, Ireland, at about 6 o'clock on the morning of Tuesday, July 2nd, 1940. The liner was under command of Capt. Moulton and carried 1,178 German and Italian internees proceeding to Canada, the remainder consisting of 176 crew and 254 troops charged with the duty of guarding the prisoners. Immediately the torpedo exploded there was panic among the Germans and Italians, who fought each other with ferocious savagery. In attempting to rush the boats scores were forced overboard and drowned.

The number of internees who lost their lives was 613, of whom 143 were German and 470 Italian. In addition 57 of the crew and 91 soldiers were lost.

ARASAN MARU

Mitsui Sempaku; 6,886 tons.

The steamship *Araosan Mam* was torpedoed and sunk by the U.S. submarine *Hardhead* on April 6th, 1945, in the Gulf of Siam.

ARARA

Cia. "Serras" de Navegacao o Comercio; 1907; *Hawthorn Leslie & Co.*; 1,075 tons; 240•2X35X12-8; 143 n.h.p.; triple-expansion engines.

The Brazilian ship *Arara* was sunk by a German submarine on August 16th, 1942, off the coast of Brazil. Twenty of the crew of 35 were lost.

ARARAQUARA

Lloyd Nacional S.A.; 1927; *Cant. Nav. Triestino*; 4,872 tons; 378x53-7x24-4; 1,008n.h.p.; oil engines.

On a voyage between Bahia and Pernambuco, the Brazilian passenger liner *Araraquara* was torpedoed and sunk by a submarine on the 16th August, 1942. Twelve persons were missing.

ARARE

Japanese Navy, destroyer; 1937; *Maiduru*; 1,500 tons; 356 X 33-3x9; 39,000 s.h.p.; 34 knots; turbine engines; Kanpon boilers; six 5 in. guns, 2 m.g., 8 T.T.

The Japanese destroyer *Arare* was engaged in operations around the Aleutian Islands following upon a Japanese landing early in June, 1942. An American task force under Rear-Admiral R. A. Theobald was constantly attacking Japanese shore establishments and intercepting sea-borne supplies. The fighting was carried on amid almost continuous fog and bad weather, and on July 5th, when the *Arare* was off Kiska, she was torpedoed and sunk by the U.S. submarine *Growler*.

The destroyer's normal complement was 180.

ARASHI

Japanese Navy, destroyer; 1940; *Maiduru*; 2,000 tons; 364 X 35x11; 45,000s.h.p.; 36 knots; turbine engines; Kanpon boilers; six 5 in. guns, 2 m.g., 8 T.T.

The Japanese destroyers *Arashi* and *Hagizake* both of 2,000 tons, and *Kawakaze*, 1,368 tons, in company with a cruiser were escorting a convoy of troops and supplies into Vella Gulf, between Kolombangara and Vella Lavella islands, Solomons Group, on the night of August 6th, 1943. An American destroyer flotilla under command of Cdr. Frederick Moosbrugger surprised the convoy shortly before midnight and after a sharp engagement lasting about 45 minutes all three Japanese destroyers were sunk. One destroyer lay burning for a considerable time before she sank and by the light of the blaze the Americans were enabled to rescue many survivors from the transports, nevertheless the Japanese loss amounted to some thousands.

The *Arashi* and *Higizake* carried complements of over 200 apiece. The normal complement of the *Kawazake* was 180, but it was probably in excess of this figure at the time of the action. The American flotilla sustained no loss or casualties.

The action was known as the battle of Vella Gulf.

ARASHIO

Japanese Navy, destroyer; 1939; *Kawasaki*; 1,500 tons; 356x33-3x9; 39,000s.h.p.; 34 knots; turbine engines; Kanpon boilers; six 5 in. guns, 2 m.g., 8 T.T.

The Japanese destroyer *Arashio* was escorting a convoy carrying the 20th and 51st Divisions of the Japanese Army from Rabaul to New Guinea. When crossing the Huon Gulf on March 2nd-3rd, 1943, an attack was made on the ships by 136 Allied aircraft of all classes. Nearly all the transports were sunk as well as four destroyers, including the *Arashio*. The Japanese loss in personnel approximated to 15,000 troops.

For full details, see the Japanese destroyer *Tokitsukaze*.

ARATAMA MARU

Tamai Shosen K.K.; 1938; *Tsurumi Seitetsu Zosen K.K.*; 6,784 tons; 446-5x59-1x33-8; 398n.h.p.; turbine engines.

The steamship *Aratama Mam* was taken over by the Japanese Navy for service as a submarine tender. She was torpedoed and sunk by the U.S. submarine *Seahorse* on April 8th, 1944, between Guam and Yap Island.

ARAYAT

Philippine Government; 1931; 903 tons.

The revenue cutter *Arayat* was bombed and sunk by Japanese aircraft on December 27th, 1941.

ARBEECO

T. M. Kirkwood; 1894; *S. McKnight & Co.*; 745 tons; 190X 27-1x13-2; 99 n.h.p.; triple-expansion engines.

The small British ship *Arbeeco* was wrecked on May 10th, 1922, on Renew's Rock, near Cape Race, N.F.L., while on a voyage from Liverpool to Quebec.

ARBOREA

ARBOREA

"Tirrenia" Soc. Anon. diNav.; 1929; Soc. Odero-Terni; 4,959 tons; 377-1x50x24-5; 1,511 n.h.p.; oil engines.

The Italian motorship *Arborea* was bombed and sunk by Allied aircraft on January 17th, 1944, at Sibenik.

ARBUTUS

British Navy, sloop; 1917; Armstrong Whitworth; 1,290 tons; 262 x 35x13-7; 2,500 i.h.p.; 17 knots; triple-expansion engines; cylindrical boilers; two 4 in. guns, two 12 pdr.

The sloop *Arbutus*, acting as a special service vessel, was torpedoed by a German submarine in St. George's Channel in very rough weather on December 16th, 1917. The sloop, which was under command of Cdr. Charles H. Oxlade, R.D., R.N.R., carried a complement of 93. Had the weather moderated it is possible that the vessel might have been saved. She foundered with the loss of Cdr. Oxlade and another officer and seven ratings.

ARBUTUS

British Navy, corvette; 1940; W. Simons & Co.; 925 tons; 193x32x16; 17 knots; quadruple-expansion engines; one 4 in. gun, several smaller.

The corvette *Arbutus*, Lt. A. L. W. Warren, D.S.C., was torpedoed and sunk by a German submarine in the North Atlantic on February 5th, 1942. Lt. Warren and three other officers as well as 39 ratings were killed.

ARCA

Anglo-Saxon Petroleum Co.; 1912; Palmers"Co.; 4,839 tons; 374-6x50-8x27-4; 453 n.h.p.; 11 knots; triple-expansion engines.

The tanker *Area* was torpedoed and sunk by a German submarine 40 miles N.W. by W. of Tory Island on October 2nd, 1918. The captain and 51 men were killed.

ARCA

Leonardo Arrivabene Soc. Anon.; 1885; Oswald Mordaunt & Co.; 2,222 tons; 284-9x40-4x22-9; 281 n.h.p.; oil engines.

The Italian motorship *Area* was sunk by a submarine on October 26th, 1942, in the Aegean Sea.

ARCADIAN

Ellerman Lines; 1891; Short Bros.; 2,855 tons; 320x42x17-8; 266 n.h.p.; 10 knots; triple-expansion engines.

The Ellerman ship *Arcadian* was bound from London to Glasgow to complete her cargo before proceeding to the Persian Gulf. She carried a crew of 51 all told. At 12.51 a.m. on January 2nd, 1910, when in St. George's Channel some 40 miles N. of the Smalls, in thick fog, she was run down by the liner *Ayrshire*, 7,749 tons, Liverpool for Australia. The *Arcadian* was struck on the starboard side abaft the bridge and sank very rapidly. Of her crew 12 Lascars were drowned.

ARCADIAN

Royal Mail Steam Packet Co.; 1899; Vickers, Sons & Maxim; 8,939 tons; 500x55-3x33-7; 506n.h.p.; 15 knots; triple-expansion engines.

The liner *Arcadian*, Capt. C. L. Willats, was taken over from the R.M.S.P. Co. during the First World War and converted into a transport. On April 15th, 1917, the ship with a company of 1,335 troops and crew was proceeding from Salonika to Alexandria, and was in the southern Aegean, 26 miles N.E. of Milo. The troops had just completed boat-drill when a submarine approached unseen and discharged a torpedo which inflicted such extensive damage that the vessel sank in six minutes. Fortunately the men's recent exercise at the boats imparted steadiness and confidence and 1,058 were rescued, either through their own efforts or by the escorting destroyer.

The number drowned was 277 and, had it not been for the sudden capsizing of the vessel, many more would have been saved. Those lost included 19 army officers and 214 other ranks, as well as ten naval ratings and 34 members of the crew. A considerable amount of wreckage and spars was sucked down and this, coming to the surface with great force, killed many who were swimming in the water.

ARCATA

HammondLumber Co.; 1919; Albina Eng. & Machine Works; 2,722 tons; 289x44-1x19-2; 233 n.h.p.; triple-expansion engines.

The American steamship *Arcata* was shelled by a Japanese submarine off Kamchatka on July 15th, 1942. Two of her crew died of injuries and six from exposure.

ARCHANGEL

London & North Eastern Railway Co.; 1910; John Brown & Co.; 2,448 tons; 330-8x43-2x17-8; 10,692 s.h.p.; 21 knots; turbine engines.

The L. & N.E. Railway steamship *Archangel*, Capt. A. P. Sutton, was taken over for service as an auxiliary transport during the Second World War. On the night of May 16th/17th, 1941, the vessel was off the coast of Aberdeenshire when she was attacked by German bombers which scored several hits. The ship was beached. Capt. Sutton was among the survivors but 17 of the crew were killed and 15 wounded.

ARCHANGELSK

U.S.S.R.; 1929; BurntislandS.B. Co.; 2,480 tons; 300 x43-9x21-3; 259n.h.p.; triple-expansion engines.

The Soviet steamship *Archangelsk* was torpedoed and sunk by a German submarine on October 5th, 1943, in the Kara Sea, while in a westbound convoy.

ARCHON

R. Yiadikiaroglou, B. Kalogheras & Th. Vranas; 1921; N.V. Schipsw. de Merwede; 1,364 tons; 238•6X36•6X15•6; 127nhp.; triple-expansion engines.

The Greek ship *Archon* was bombed and sunk by German aircraft on April 21st, 1941, at Euboea, Greece.

ARCOLA

William Thomson & Co.; 1897; W. Gray & Co.; 2,599 tons; 314 X 44 • 1 x 20 - 7; 244 n.h.p.; triple-expansion engines.

The British steamship *Arcola* was wrecked on July 9th, 1908, in Hay Cove, St. Paul's Island, C.B., when sailing in ballast from Preston to Chatham, N.B.

ARCOT

British India S.N. Co.; 1871; W. Denny & Bros.; 1,782 tons; 298 X33-2x25-4; 200 h.p.; compound inverted engines.

The steamship *Arcot* was wrecked in the River Hooghly on October 22nd, 1887, on a voyage from Bombay to Calcutta.

ARCTIC

Collins Line; 1849; William Brown; 2,850 tons; 282 x 45 x 31[• 5 ; 800 i.h.p.; 12-5 knots; side-lever engines; paddles 35-5 ft. diam.

The *Arctic* was a wooden paddle steamship, one of a group of four all of which were identical in design and belonged to the same owner, Mr. E. K. Collins, an enterprising American who desired to found in the United States a steamship line which would be a worthy rival of the Cunard Line of the United Kingdom. The three other ships were the *Baltic*, *Atlantic* and *Pacific* (which see).

These four were the transatlantic marvels of their day. They were installed with a steam heating system, which included the steerage, and were equipped with bath rooms, smoking rooms and barbers' shops. Their speed in fine weather was 12-5 knots and they carried the U.S. mails.

On September 21st, 1854, the ship left the Mersey bound for New York with 246 passengers and 135 crew under Capt. Luce. On the 27th at just after noon, the vessel was 65 miles S.W. by W. of Cape Race, steaming through a dense fog, when she collided with the small French steamship *Vesta*, Capt. Duchesne. The given speed of the *Arctic* was 12 knots and that of the *Vesta* eight knots. Both ships were damaged by the impact but the Frenchman appeared to be the worse. Her passengers were in a panic and the *Arctic* lowered a boat to effect a rescue, but the bulkhead of the *Vesta*, reinforced by the passengers' mattresses and other goods, stood up to the seas and she was able to proceed to St. John's.

The *Arctic* had been struck on the starboard side about 60 feet from the bow and was holed in three places and making water fast. It was therefore decided to set a course for Cape Race, a matter of five hours steaming but already the water was rising in the furnaces

and after 30 minutes the fires were swamped. There was a heavy sea running and the boats, which might have been launched earlier without mishap, were now either carried away or smashed, only two being fortunate enough to reach the shore.

A raft, hurriedly constructed by the sailors, was pushed off with 72 men and four women on it or clinging to its sides. Two days later one man, the sole survivor of the party, was picked up by a passing ship.

The number drowned was 322, including the wife, son and daughter of Mr. E. K. Collins, the head of the line. The saved numbered 59, including Capt. Luce, who went down with the ship with his young son. He came to the surface and clung to some wreckage, but his son died from exposure. The second officer was also among the saved.

The *Vesta* had one man killed by the collision, and 12 persons lost when two of her boats were launched in panic. One was swamped and the other went adrift and was never heard of again.

ARCTIC VIKING

Boyd Line; 1937; *Cochrane & Sons*; 533 tons; 166 • 7 x 27 • 6 X —; triple-expansion engines.

The Hull trawler *Arctic Viking*, Skipper P. Garner, was returning from a 22-day trip to the White Sea with 1,400 kits of fish on Wednesday, 18th October, 1961. At 8.30 a.m. when about 20 miles N.E. of Flamborough Head, with a 50-mile gale blowing from astern, she was struck aft of the bridge by two huge waves in succession. She keeled over and capsized within two minutes, floating bottom upwards for nearly four hours and then sinking by the stem.

Of the crew of 19 men a number were on deck at the time and managed to avail themselves of rafts, but two men were washed overboard and three were drowned below deck when the vessel capsized.

Rockets were fired from the rafts and were seen by the Polish trawler *Derkacz*, 158 tons, which picked up the survivors about an hour later, and brought them to Hull on October 20th.

ARCTURUS

Det Bergenske D/S; 1910; *Bergens M/V*; 1,277 tons; 229-9X 35-2x16; 132n.h.p.; triple-expansion engines.

The Norwegian ship *Arcturus* struck a mine and sank on December 1st, 1939, off the E. Coast of Scotland. Nine of her crew were killed.

ARCTURUS

Argo Reederei, Richard Adler & Co.; 1937; *LUbecker Maschb. Ges.*; 2,596 tons; 319-7x47x18-5; 342n.h.p.; compound engines.

The German steamship *Arcturus* was sunk by a mine or torpedo on May 1st, 1941, two miles E. of the Kerkenna Islands, Tunisia.

ARCTURUS

1892; *Wood, Skinner & Co.*; 1,682 tons; 250-5x36-1x16-8; 156 n.h.p.; triple-expansion engines.

The Norwegian steamship *Arcturus*, which had been taken over by the German authorities, was bombed and sunk by British aircraft on November 22nd, 1943, at Stadthavet. Five of her crew were killed.

ARCTURUS

Luria Bros.; 1906; *West Bay City S.B. Co.*; 6,490 tons; 520 -5 X 54 x—; triple-expansion engines.

This American ship was bought by Luria Bros, of New York for re-sale to Norwegian shipbreakers. She sailed from Quebec to Oslo in tow with a cargo of scrap iron, but broke away from the tow on January 11th, 1962, and sank in lat. 46° 10' N., long. 8° 50' W. An empty lifeboat was picked up.

ARDANBHAN

Ardan S.S. Co.; 1929; *D. & W. Henderson & Co.*; 4,980 tons; 402 • 9X 52 • 2X 27 • 3; 249 n.h.p.; triple-expansion engines.

The British ship *Ardanbhan* was torpedoed by a German submarine and sunk on December 27th, 1940, in the Atlantic. Forty lives were lost.

ARDENA

Navigation Const. Toyias; 1915; *A. McMillan & Son*; 1,092 tons; 250-1x33-1x17-3; 350 n.h.p.; triple-expansion engines.

The Greek steamship *Ardena* was bombed and sunk in June, 1941,

during the German invasion of Greece. She was raised and repaired by the Germans. On September 27th, 1943, she struck a mine and sank off Argostoli with 1,000 Italians on board, 700 of whom were drowned.

ARDENT

British Navy, destroyer; 1912; *Denny Bros*; 950 tons; 266X 27x9; 25,000 i.h.p.; 32 knots; turbine engines; three 4 in. guns, 4 T.T.

The destroyer *Ardent*, Lt.Cdr. A. Marsden, was a unit of the 4th Flotilla at Jutland on May 31st, 1916. The flotilla was badly mauled, losing one of its leaders and four of its destroyers. During the day the ships managed to escape with the loss of one of their number, the *Shark*, but between 11 p.m. and 12 midnight the flotilla, proceeding in line ahead, ran into a squadron of German dreadnoughts and came under a devastating fire. The *Sparrowhawk* was run down and sunk by the *Broke* (out of control) and the *Fortune* was blown to pieces by gunfire. The flotilla leader *Tipperary* had been sunk just previously, and so great was the general damage to the flotilla that the *Ardent* was the only ship which could be said to be battle-worthy.

At 12.19 a.m., when steaming alone, the *Ardent* saw the smoke caused by the blowing up of the *Black Prince* and, thinking it betokened the presence of the rest of the flotilla, made towards it. Actually she ran into the German battle-squadron which had sunk the *Black Prince* and within a few seconds she was the centre of a blaze of searchlights and a target for every gun which the enemy could bring to bear. Nevertheless she got off two torpedoes before she went down with all her crew, save Lt.Cdr. Marsden and one man, both of whom were wounded.

Four officers and 74 ratings were lost.

ARDENT

British Navy, destroyer; 1927; *Scott's Shipbuilding Co.*; 1,350 tons; 323x32-2x12; 34,000 s.h.p.; 35 knots; turbine engines; 3-drum boilers; four 4-7 in. guns, two 2pdr., 5 m.g., 8 T.T.

The destroyer *Ardent*, Lt.Cdr. J. F. Barker, D.S.C., together with the destroyer *Acasta*, was escorting the aircraft carrier *Glorious* off Narvik on June 8th, 1940. A German force consisting of the battleships *Gneisenau* and *Scharnhorst* surprised the British ships and sank all three, as well as the troopship *Orama* and the tanker *Oil Pioneer*. Later the German Admiralty stated that a very large number of survivors had been picked up.

The full story of the action is told under the aircraft carrier *Glorious*.

ARDENTE

Italian Navy, torpedo boat; 1942; *Italy*; 860 tons, 274-2X 31x8; 16,000 s.h.p.; 28 knots; turbine engines; 3-drum boilers; three 3-9 in. guns, six 20 mm. A.A., 2 T.T.

The Italian seagoing torpedo boat *Ardente* was sunk in collision with the destroyer *Grecale*, 1,449 tons, off Punta Barone on January 12th, 1943. The number lost, if any, is not known.

ARDENVOHR

Australind Steam Shipping Co.; 1940; *Win Denny & Bros.*; 5,025 tons; 414-8x56-2x26; 688n.h.p.; oilengines.

The British motorship *Ardenvohr* was torpedoed and sunk on the 10th June, 1942, while on a voyage from New York to Melbourne via Panama.

ARDEOLA

Yeoward Bros.; 1888; *Caledon S.B.*; 1,204 tons; 260x34-2X 15 • 7; 234 n.h.p.; triple-expansion engines.

The British steamship *Ardeola* was sunk in collision in December, 1903, in the Bay of Biscay while on a voyage from Las Palmas to Liverpool with a cargo of fruit.

ARDGLASS

Ardgarry Steamship Co.; 1918; *Russell & Co.*; 4,617 tons; 385x52x26-5; 474n.h.p.; 10-5 knots; triple-expansion engines.

The steamship *Ardglass* was torpedoed and sunk by a German submarine six miles E. of the Maidens on April 1st, 1918. Six men were killed. The captain was among the survivors.

ARDINGTON

ARDINGTON

Lee, Finch & Co.; 1879; *Palmer*; 1,253 tons; 235x32-2x17-8; 120 n.h.p.; compound inverted engines.

On a voyage from Carthage to Porman with a cargo of iron ore the *Ardington* was wrecked near Carthage on February 14th, 1880.

ARDITO

Italian Navy, destroyer; 1942; *Italy*; 860 tons; 293x31x11-5; 16,000 s.h.p.; 28 knots; turbine engines; 3-drum boilers; three 3-9 in. guns, six 20 mm., 2 T.T.

The small Italian destroyer *Ardito* was bombed and sunk by German aircraft off Bastia on September 9th, 1943, the day after Italy's surrender to the Allies. All ships of the Italian fleet had been ordered to place themselves under Allied control and it was whilst on her way to comply with this order that the *Ardito* was sunk.

The *Ardito* was afterwards raised by the Germans and re-commissioned as the TA-25, and was finally sunk at Rapallo in June or July 1944.

ARDMORE

City of Cork Steam Packet Co.; 1909; *Caledon Shipbuilding Co.*; 1,304 tons; 260-1x36x17-2; 226n.h.p.; 9 knots; triple-expansion engines.

The steamship *Ardmore* was torpedoed and sunk by a German submarine 13 miles W.S.W. of Coningbeg lightship, off Co. Wexford, on November 13th, 1917. Nineteen persons were killed. The captain was among the survivors.

ARDMORE

British & Irish Steam Packet Co.; 1918; *Caledon Shipbuilding Co.*; 1,023 tons; 254-5x36-1 16; 347n.h.p.; 14 knots triple-expansion engines.

The Irish Channel cargo steamship *Ardmore*, Capt. T. Ford, left Cork for Fishguard on November 11th, 1940. Nothing more was heard of the ship or her crew of 18 until the body of the captain was washed up some days later.

ARDOR

"L# Columbia"¹¹ *Soc. Marit. per Trasporto di Petrolio e Denvati*; 1927; *Ansaldo*; 8,960 tons; 489-6x63x34-6; 1,000 n.h.p.; oil engines.

The motor tanker *Ardor* was bombed and sunk by British aircraft on September 12th, 1943, five miles N. of the Gulf of Kotor.

AREQUIPA

Pacific Steam Navigation Co.; 1889; *Barrow*; 2,953 tons; 350x45-2x22-5; 610n.h.p.; 14 knots; triple-expansion engines.

The P. S. N. Cp's ship *Arequipa* was lying moored to buoys off Valparaiso loading cargo on June 2nd, 1903. During the day the weather worsened to such a degree as to stop all work and the hands were turned to in order that the ship might be prepared to meet the gale. The violence of the seas increased with every hour and at one o'clock on the morning of the 3rd the captain gave orders to raise steam and put to sea, but the ship was now almost helpless, being swept by tremendous waves at frequent intervals.

The head moorings parted and the ship was driven on to her stern buoy. The buoy holed her plates and the cable fouled the propeller. It was impossible to keep the water under control and only 15 minutes after striking the buoy the *Arequipa* sank.

It was at first feared that there had been a very heavy loss of life but, contrary to early reports, the owners stated that there were no passengers on board at the time. Nevertheless, the captain and ten of the crew were lost, the third officer and 31 others being saved by the s.s. *Laurel Branch* while 13 persons were picked up by an unnamed sailing vessel.

ARES

Koninkl Nederl. Stoombs. Maats. N.V.; 1921; *N.V. Werf Conrad*; 3,981 tons; 340x48x28-5; turbine engines.

The Dutch ship *Ares* caught fire on April 28th, 1931, at Lisbon. She was beached and scuttled to extinguish the fire and became a total loss.

ARETE

Rederi A/B Unda; 1928; *A/B Lodose Varf*; 569 tons; 166-9 X 28-1x11-4; 50 n.h.p.; compound engines.

The Swedish steamship *Arete* struck a mine and sank on April 20th, 1942, off Langeland. Four of her crew were killed.

ARETHUSA

British Navy, light cruiser; 1913; *Chatham Dockyard*; 3,520 tons; 450 x — x —; 30,000 i.h.p.; 30 knots; turbine engines; Yarrow boilers; two 6 in. guns, six 4 in., 4 T.T.

The light cruiser *Arethusa* was the flagship of Cdre. R. Y. Tyrwhitt, commanding the Harwich Force of light cruisers and destroyers during the First World War. She was officially flagship of the 5th light cruiser squadron and in this capacity made a name for herself in the first half of the war. In February, 1916, there were signs of great activity in the German High Seas Fleet and Cdre. Tyrwhitt was ordered to maintain a watch at the mouth of the Texel. Within a few days the German activity died away and on the 11th the light forces were returning to Harwich when the *Arethusa* ran upon a mine in the Sledway channel, which had been regarded as clear. There was a heavy sea at the time and the force of the explosion stopped the ship's engines, rendering her helpless. Her position when she struck was near the North Cutler buoy, and after vain attempts by the destroyers *Loyal* and *Lightfoot* to tow her to port, she ran on the Cutler shoal and became a total loss.

All the crew, with the exception of some ten men, were taken off in safety.

ARGENTINA

Det Forenede Djs; 1921; *Kjøbenhavns Flydk & Skbs*; 5,375 tons; 378x52-2x32-6; 629n.h.p.; oil engines.

The Danish ship *Argentina* left Copenhagen on March 13th, 1940, for S. America, with a crew of 33. She last reported on March 17th, and was never heard of again.

ARGENTINA

Rederi A/B Nordstjernen; 1935; *Gotaverken A/B*; 5,277 tons; 420-7x55-9x23-9; 945 n.h.p.; oil engines.

The Swedish motorship *Argentina* struck a mine and sank on July 6th, 1942, about 30 miles S.W. of Christiansand.

ARGO

H.M. Wrangell & Co. AIS; 1883; *Martens, Olsen & Co.*; 1,261 tons; 234-9x34-1 X16-8; 142 n.h.p.; compound engines.

The Norwegian steamship *Argo* struck a mine and sank on January 28th, 1917, in the North Sea.

ARGO

Rederi A/B Ponape; 1898; *R. Napier & Sons*; 2,513 tons; 311-6x44-2x20-4; 245 n.h.p.; triple-expansion engines.

The Finnish ship *Argo* was torpedoed and sunk on June 16th, 1942, between Bogskar and Uto. Nine of the crew were lost.

ARGO

Argonauts Shipping Co.; 1920; *Wood, Skinner & Co.*; 1,995 tons; 302-6x42-2x17-9; 225 n.h.p.; triple-expansion engines. The Greek ship *Argo* was torpedoed and sunk by a German submarine on November 29th, 1942, off the Cape of Good Hope. Twelve of her crew and six passengers were lost.

ARGO

D/S A/S Anglo; 1942; *G. T. Davie & Sons*; 507 tons; 153-6X 27-6x14; oil engines.

The Norwegian motorship *Argo* struck a mine and sank on January 27th, 1948, in the Kvarner Channel in the Adriatic. Only one survived of her crew of 12.

ARGONAUT

Jason Nav. Corp.; 1893; *Harland & Wolff*; 4,826 tons; 397-7X 47-6x27-4; 483 n.h.p.; triple-expansion engines.

The American steamship *Argonaut* was torpedoed and sunk by a German submarine on June 5th, 1918, in the English Channel.

ARGONAUT

Friedr. Krupp; 1921; *N.V. Lobithsche Scheepsb. Maats. Gebr. Bodewes*; 4,575 tons; 385-2x50-1x25-9; 518 n.h.p.; triple-expansion engines & L.P. turbine.

The Swedish ship *Grangesberg* became German property during the Second World War and was later reported to be sailing as the *Argonaut*. She collided with the *Ceuta* on December 29th, 1942, off Kirkenes and sank.

ARGUN

U.S.S.R.; 1917; *R. Thompson & Sons*; 3,487 tons; 330-5x48x21-9; 293 n.h.p.; triple-expansion engines.

The Soviet ship *Argun* was torpedoed and sunk on October 18th, 1941, five miles from Gorodetske.

ARGUN MARU

Osaka Shosen K.K.; 1920; *Osaka Iron Works*; 6,662 tons; 415 X 55 • 5 X 34 • 6; 552 n.h.p.; triple-expansion engines.

The steamship *Argun Mam* was torpedoed and sunk by the U.S. submarine *Trigger* on September 21st, 1943, 100 miles N.W. of Formosa.

ARGUS

Corporation of Trinity House; 1909; *Ramage & Ferguson*; 661 tons; 171 X 30 • 1 x 12 • 9; 93 n.h.p.; triple-expansion engines.

The Trinity House lighthouse tender *Argus* struck a mine and sank on November 12th, 1940. The crew of 33 and 1 gunner were lost.

ARGUS

Argo Reederei Richard Adler & Co.; 1939; *Nordseewerke Emden G.m.b.H.*; 3,360 tons; 339-5x50x18-8; 223 n.h.p.; quadruple-expansion engines.

The German ship *Argus* was lying in Hambakkt, near Porsanger, with a cargo of war supplies from Bremen, when fire broke out on board on August 13th, 1943. Shortly afterwards the ship was wrecked by a violent explosion and sank.

ARGYLL

British Navy, armoured cruiser; 1905; *Greenock Foundry Co.*; 10,850 tons; 450x68-5x25-5; 21,000 i.h.p.; 22-2 knots; triple-expansion engines; *Babcock boilers*; four 7-5 in. guns, six 6 in., two 12pdr., twenty 3pdr., 2 m.g., 2 T.T.

The armoured cruiser *Argyll* was a unit of the 3rd cruiser squadron during the First World War. She had an official complement of 655 officers and men and was under command of Capt. J. C. Tancred.

The ship became a total loss on October 28th, 1915, when she ran on the Bell Rock, near Dundee, in thick weather. In spite of the heavy sea running at the time the whole of the crew was rescued by destroyers. The *Argyll* had just undergone a refit at Devonport and was making her way to Scapa to rejoin her squadron.

ARGYLL

Sutherland Steamship Co.; 1901; *W. Doxford & Sons*; 3,547 tons; 340-3x45-6x24-6; 300n.h.p.; 9-5 knots; triple-expansion engines.

The steamship *Argyll* was torpedoed and sunk by a German submarine 110 miles W. of Bishop Rock on April 13th, 1917. Twenty-two men were killed. The captain was among the survivors.

ARGYLLSHIRE

Hull Northern Fishing Co.; 1938; *Smith's Dock Co.*; 540 tons; 175-8x28-6x15; 99n.h.p.; triple-expansion engines.

The British trawler *Argyllshire* was sunk in June, 1940, during the evacuation from Dunkirk.

ARIADNE

German Navv, light cruiser; 1900; *Weser, Bremen*; 2,660 tons; 328x40-5x17-2; 8,500 i.h.p.; 21-1 knots; triple-expansion engines; *Schulz-Thornycroft boilers*; ten 4-1 in. guns, fourteen 1 pdr., 2 m.g., 2 T.T.

The light cruiser *Ariadne* was one of the older German ships which took part in the battle of the Heligoland Bight on August 28th, 1914. The cruiser was under command of Capt. Seebohm and carried a complement of 275 officers and men. She came into the battle just after midday when she was sighted by the British submarine E 4 and was again sighted by the same submarine shortly before 1 p.m. when she was steering eastward, probably on learning from her flagship, the *Ko'ln*, of the presence of British battle cruisers. The warning came too late as the *Ariadne* appeared out of the mist at the moment that the *Lion* was destroying the *Ko'ln*. She was well within range but, according to German accounts, she was not hit for the first ten minutes of the chase, after which the *Lion* got home two salvos which commenced her destruction and reduced her speed to .15 knots. Other ships of the British battle cruiser squadron joined in the fighting which terminated as suddenly as it commenced. The *Ariadne*, on fire and sinking, was left to her fate while the British returned to the destruction of the *Ko'ln*.

Capt. Seebohm managed to transfer what was left of his ship's company to the cruisers *Danzig* and *Stralsund*, which arrived at an opportune moment. His losses were 76 killed and 76 wounded.

ARIADNE

British Navy, protected cruiser; 1898; *J. Brown & Co.*; 11,000 tons; 462-5x69x27-5; 18,000 i.h.p.; 20-75 knots; triple-expansion engines; *Belleville boilers*; sixteen 6 in. guns, twelve 12pdr., 2 T.T.

The old protected cruiser *Ariadne* was built at a period when Russia was placing in service a number of large, fast and (for those days) heavily-armed cruisers to act as commerce destroyers. The Admiralty's answer to this was the building of the 14,000 ton cruisers *Powerful* and *Terrible*, followed by lighter ships of the *Ariadne* class. Long before the outbreak of the First World War the causes for their design had ceased to operate and a new class of cruiser much lighter and faster, such as the *Emden*, had been developed by Germany. The *Ariadne* and her sisters were therefore relegated to odd jobs in the fleet. Owing to their size and armament they made good minelayers and it was in this capacity that the *Ariadne* was serving when she was torpedoed and sunk by a German submarine off Beachy Head on July 26th, 1917.

The ship was not carrying so large a complement as she did when serving as a cruiser. The number drowned totalled 38 officers and ratings.

ARIADNE

Del Bergenske D/S; 1930; *Nylands Vcerksted*; 2,029 tons; 271-3x38-2x19-4; 234 n.h.p.; triple-expansion engines.

The Norwegian ship *Ariadne* was bombed and sunk by German aircraft on June 9th, 1940, 70-80 miles E. of Rost Island. Nine of her crew were killed.

ARIAKE

Japanese Navy, destroyer; 1934; *Kawasaki*; 1,368 tons; 337-7x32-5x8-7; 37,000s.h.p.; 34 knots; turbine engines; *Kanpon boilers*; five 5 in. guns, 2 m.g., 6 T.T.

The Japanese destroyers *Ariake* and *Mikatsuki* were off Cape Gloucester, New Britain, July 28th, 1943, when they were attacked and sunk by U.S. Army bombers. The destroyers carried normal complements of 180 and 150 respectively.

ARIAKE MARU

Nippon Kaiun K.K.; 5,000 tons.

The steamship *Ariake Mam* was torpedoed and sunk by the U.S. submarine *Tambor* on February 3rd, 1944, off Formosa.

ARICA

Ministry of War Transport (T. & I. Harrison); 1921; *Sunderland S.B.Co.*; 5,431 tons; 425x55x26-6; 627n.h.p.; 13 knots; triple-expansion engines.

The steamship *Arica*, Capt. B. Worthington, was torpedoed and sunk by a submarine off Trinidad on November 6th, 1942. Twelve

men were killed and one was wounded. Capt. Worthington was among the survivors.

ARIEL

British Navy, destroyer; 1911; Thorny croft; 773 tons; 252 -2 X 26-3x9-2; 15,500 i.h.p.; 29 knots; turbine engines; Yarrow boilers; two 4 in. guns, two 12 pdr., one 3 pdr.A.A., 1 m.g., 2 T.T. The destroyer *Ariel* was mined and sunk in the North Sea on August 2nd, 1918. Her official complement was 72, but she was probably carrying more than this number at the time of her loss.

ARIEL

Italian Navy, torpedo boat; 1938; Ansaldo; 679 tons; 267X26x7-7; 19,000 s.h.p.; 34 knots; turbine engines; 3-drum boilers; three 3-9 in. guns, four 37 m.m., two 13 mm., 4 T.T. The Italian seagoing torpedo boats *Air one* and *Ariel* in company with another of the same class were surprised E. of Malta at 2.30 a.m. on October 11th, 1940, by the British cruiser *Ajax*, 6,985 tons. Both torpedo boats were sunk by gunfire, the third escaping. Later the *Ajax* and the *York* sank the destroyer *Artigliere* in the Sicilian Channel. For full story of the action see *Artigliere*.

ARIJON

Cie. de Navigation d'Orbigny; 1938; W. Gray & Co.; 4,374 tons; 410-8x55x22-7; 553 n.h.p.; triple-expansion engines. The French steamship *Arijon* was torpedoed and sunk by a German submarine on November 22nd, 1939, in the Bay of Biscay.

ARIMA MARU

Nippon Yusen K.K.; 1936; Mitsubishi Jukogyo K.K.; 7,390 tons; 462-7x62-3x34-4; 2,248 n.h.p.; oil engines. The motor vessel *Arima Maru* was torpedoed and sunk by the U.S. submarine *Haddock* on April 3rd, 1943, N. of the Caroline Islands.

ARINIA

Anglo-Saxon Petroleum Co.; 1936; Lithgows; 8,024 tons; 465 x 59-2x33-8; 4,000 i.h.p.; 12-5 knots; oil engines. The motor tanker *Arinia*, Capt. B. J. Bannister, was mined and sunk eight miles E.S.E. of Southend Pier on December 19th, 1940. Capt. Bannister, 53 of the crew, the pilot and five gunners were lost. Only one man survived.

ARIO

Socony-Vacuum Oil Co.; 1920; Bethlehem S.B. Corp.; 6,952 tons; 435-6x56-2x31-7; 2,600 i.h.p.; 10-5 knots; triple expansion engines. The American tanker *Ario*, Capt. Thorolf R. Hannevig, was torpedoed and sunk by a submarine about 100 miles off Cape Fear, South Carolina, on March 15th, 1942. Capt. Hannevig was among the survivors, but eight men were killed and seven wounded.

ARIOSTO

R. Mc Andrew & Co.; 1887; Russell & Co.; 2,920 tons; 320 -3 X 40-2x19-4; 291 n.h.p.; triple-expansion engines. The steamship *Ariosto* was lost off the coast of North Carolina on December 24th, 1899. Twenty-one of the crew were drowned.

ARIOSTO

Ellerman's Wilson Line; 1940; Swan, Hunter & Wigham Richardson; 2,176 tons; 295-2x44-2x17-9; triple-expansion engines & L.P. turbine. The British cargo ship *Ariosto* was torpedoed and sunk on October 24th, 1941, while on a voyage from Lisbon to Liverpool. Five of the crew and a gunner were killed.

ARIOSTO

"Tirrenia" Soc. Anon, di Nav.; 1902; Wigham Richardson & Co.; 4,116 tons; 365-3x48-2x17-8; 361 n.h.p.; triple-expansion engines. The Italian steamship *Ariosto* was torpedoed and sunk by a British submarine on February 15th, 1942, 12 miles off the coast of Tunisia.

ARIS

Michael M. Xylas; 1914; Richardson Duck & Co.; 4,810 tons; 380-2x50-9x28; 385 n.h.p.; triple-expansion engines. The Greek steamship *Arts* was shelled and sunk by a German submarine on October 12th, 1939, in the N. Atlantic.

ARISAN MARU

Mitsui Sempaku; 6,886 tons. The steamship *Arisan Maru* was sunk by the U.S. submarine *Snook* on October 24th, 1944, about 200 miles N.W. of Luzon Island, Philippines.

ARISTIDES

Aberdeen White Star Line (G. Thompson & Co.); 1876; W. Hood; 1,661 tons; 260x39-4x24-4. The clipper ship *Aristides*, Capt. Poppy, was at the time of her going into service in 1876, the flagship of the Aberdeen White Star fleet. She had a famous career as a fast clipper on the Australian run, and in addition to cargo she also carried some hundreds of passengers. Her maiden voyage was notable for the fact that she ran from London to Port Phillip, Australia, in 74 days; the fastest run she ever made. On a subsequent occasion she ran 320 miles in 24 hours.

On 28th May, 1903, she left Caleta Buena, Chile, for San Francisco with a cargo of nitrate of soda. She became overdue and search was made by the British light cruiser *Amphion* and the naval sloop *Shearwater*, but without success, and she was posted missing.

ARITA MARU

Ishihara Risen K.K.; 10,238 tons. The tanker *Arita Maru* was torpedoed and sunk by the U.S. submarine *Flasher* on December 22nd, 1944, off the coast of Indo-China.

ARIZONA

E. Smid; 1939; van Diepen; 398 tons; 143-4x26-2x8-9; 70 n.h.p.; oil engines. The small Dutch coaster *Arizona* was bound from Methil to Holland on September 29th, 1940, when she struck a mine near Elie Point and sank with five of her crew.

ARIZONA

United States Navv, dreadnought battleship; 1915; New York Navy Yard; 32,600 tons; 608x106x33-5; 32,000 i.h.p.; 21 knots; turbine engines; Bureau-Express boilers; twelve 14 in. guns, twelve 5 in., eight 5 in.A.A., four 3 pdr., 3 aircraft. On the morning of December 7th, 1941, the U.S. Pacific Fleet, comprising 86 warships of all types, excluding small craft, was moored in Pearl Harbour. The chief units of this force were eight battleships, seven cruisers, 28 destroyers and five submarines, all of which were ready for action. It was known that diplomatic relations between Japan and the United States were strained, but there was no reason to assume any sudden outbreak of hostilities, though Japan's surprise attack on the Russians at Port Arthur in February, 1904, provided an example of her methods when engaging a stronger power. Nevertheless, assuming that thought to be in the minds of those responsible for the conduct of American naval affairs, it was highly improbable that Japan could achieve any large measure of surprise across so great a distance as the 3,370 miles which lay between her own coasts and Pearl Harbour. One factor appears to have been overlooked, or if not overlooked then at least discounted, and this was the striking power of aircraft borne across the ocean by large and speedy aircraft carriers. At 7.55 a.m. 51 Japanese aircraft (30 dive-bombers and 21 torpedo-bombers) swept down upon the army air base at Hickham Field, the naval air station at Ford Island, the naval air station at Kaneohe Bay and the lines of warships moored in Pearl Harbour. The suddenness of the attack gave the Japanese a tremendous advantage and it was while the anti-aircraft fire was developing that they scored their most vital hits. There was a lull of about a quarter-of-an-hour until 8.40 a.m. when a second attack by horizontal bombers commenced and lasted until 9.45 a.m. when the Japanese finally withdrew.

The U.S. reports showed that there were 105 aircraft employed in the attack (21 torpedo-bombers, 48 dive-bombers and 36 horizontal bombers) with deadly effect. Their losses amounted to 28 shot down by the navy and more than 20 shot down by the army air force. The U.S. losses in ships amounted to one battleship, the *Arizona*,

bombed and sunk with no hope of salvage; one battleship the *Oklahoma*, capsized but possible to raise and re-commission; three battleships, the *California*, *Nevada* and *West Virginia* severely damaged; three battleships, the *Pennsylvania*, *Maryland* and *Tennessee* and three cruisers, the *Helena*, *Honolulu* and *Raleigh*, damaged. Besides these three destroyers, the *Cassin*, *Downes* and *Shaw* were bombed and sunk, as well as the old target-ship *Utah*, and the seaplane tender *Curtis* and the repair ship *Vestal* damaged.

The Japanese loss in ships was limited to three midget submarines of 45 tons apiece.

The Americans had 157 aeroplanes lost or damaged out of a total of 273. Their losses in personnel amounted to 2,117 officers and men of the navy and marine corps killed, 960 missing, believed drowned and 876 wounded. The army had 226 officers and men killed and 396 wounded, making a total of 4,575 casualties all told.

ARIZONA MARU

Osaka Shosen K.K.; 1920; *Mitsubishi Zosen Kaisha*; 9,684 tons; 475 x 61x40-7; 993 n.h.p.; triple-expansion engines.

The steamship *Arizona Maru* was sunk by U.S. land and carrier-based aircraft on November 14th, 1942, off the Solomon Islands.

ARK ROYAL

British Navy, air craft carrier; 1938; *Cammell Laird*; 22,000 tons; 800x94-7x22-8; 103,000 s.h.p.; 31 • 75 knots; turbine engines; 3-drum boilers; sixteen 4-5 in. guns, four 3pdr., 14 A.A.m.g., 60 aircraft.

The aircraft carrier *Ark Royal*, Capt. L. E. H. Maund, achieved much fame in the Second World War before her loss in 1941. She participated in the chase of the German battleship *Bismark*, which her aircraft attacked and torpedoed, and she served with the well-known "Force H" under Vice-Admiral Somerville, steaming 205,000 miles on war operations. On several occasions her loss was falsely announced in enemy newspapers and broadcasts. The ship bore a complement of 1,600, the largest carried by any British man-of-war up to that time, her complement of 60 aircraft was also the largest among British carriers.

On November 13th, 1941, at about 4.30 p.m. when returning to Gibraltar after a cruise in the Mediterranean the ship was attacked by a German submarine. She was struck by a torpedo on the starboard side below the water-line and immediately developed a heavy list, but was taken in tow for 12 hours until 4.30 a.m. on the 14th when she turned over and sank. At the time of her loss she was 25 miles E. of Gibraltar.

Of the *Ark Royal's* very large complement one man was lost and one was seriously injured, all the crew being transferred to the escorting destroyers when it was realised that there was no chance of saving her.

ARKADIA

Atlas Levante Linie A.G.; 1927; *Akt. Ges. "Neptun"*; 1,756 tons; 276 • 1X 42 • 2 X 15 • 9; 247 n.h.p.; triple-expansion engines. The German ship *Arkadia* struck a mine and sank on April 29th, 1943, in the Black Sea.

ARKLESIDE

Smith Hogg & Co.; 1924; *Osbourne Graham & Co.*; 1,567 tons; 258X38-2X17-4; 202 n.h.p.; triple-expansion engines.

The *Arkleside* was shelled and sunk by a German submarine on September 16th, 1939, on a voyage from the Tyne to Gibraltar.

ARLETTA

Arlon S.S. Co.; 1925; *R. Duncan & Co.*; 4,870 tons; 375-1 x 51-7x29; 470 n.h.p.; triple-expansion engines.

On a voyage from Grangemouth to Halifax the oil tanker *Arietta* was torpedoed and sunk on August 5th, 1942. Six gunners and 28 crew were lost.

ARLINGTON COURT

Court Line; 1924; *Workman Clark & Co.*; 4,915 tons; 396-6 x 53-1x26-5; 414 n.h.p.; 11 knots; triple-expansion engines.

The steamship *Arlington Court*, Capt. Hurst, was torpedoed by a German submarine in the Atlantic 320 miles S. W. of Start Point on November 16th, 1939. The vessel was struck by two torpedoes, the first of which wrecked the wireless. The second was not discharged

until after the crew had taken to the boats. The vessel sank in 30 minutes. Of the 34 men who had formed the crew 22 were picked up by the Dutch steamship *Alengib* and landed at an Irish port. The chief engineer, Mr. H. Pearson, died from exposure during the time that the boats were adrift, and three others were lost from various causes. Another boat was piloted by an 18 year-old apprentice, Malcolm Morrison, for six days until close to land where she was picked up by a Norwegian vessel. Morrison worked out his course with a small compass and steered the boat himself, though suffering severely from frostbite. There were five men in the boat beside Morrison and all survived.

ARLITA

J. Marr & Son; 1916; *Cochrane & Sons*; 326 tons; 138-5X 23-7x12-8; 87n.h.p.; triple-expansion engines.

The steam trawler *Arlita* was shelled and sunk by a German submarine off St. Kilda on September 18th, 1939.

ARLON

Arlon S.S. Co. (J. German & Co.); 1925; *Greenock Dockyard Co.*; 4,903 tons; 375 x 51 • 7 x 29; 461 n.h.p.; triple-expansion engines.

The British tanker *Arlon* was bombed and set on fire at Valencia by insurgent aircraft on June 27th, 1938, during the Spanish Civil War. She was so badly damaged that she had to be towed out to sea and sunk.

ARLYN

A.H. Bull & Co.; 1919; *Pusey & Jones*; 3,304 tons; 321 -6x 49-10x24-9; 1,650 i.h.p.; 9 • 5 knots; triple-expansion engines.

The American steamship *Arlyn*, Capt. Eylof Wennesland, was in convoy off Sydney, Nova Scotia, on August 27th, 1942, when she was torpedoed and sunk by a submarine. Twelve men were killed. Capt. Wennesland was among the survivors.

ARMADALE

Australind Steamship Co.; 1909; *Chas. Cornell & Co.*; 6,153 tons; 395-5x51-9x27; 495 n.h.p.; 12 knots; triple-expansion engines.

The liner *Armada*, serving as an auxiliary transport in the First World War, was torpedoed and sunk by a German submarine 160 miles N.W. of Tory Island on June 27th, 1917. Eleven persons were lost, of whom five were crew. The captain was among the survivors.

ARMAGH

Union Steamship Co. of New Zealand; 1917; *Swan, Hunter & WighamRichardson*; 12,269 tons; 530-5x63x39-9; 14 • 5 knots; turbine engines.

The New Zealand ship *Armagh* belonging to the Union Steamship Co. left Liverpool on the afternoon of Saturday, December 15th, 1923, with a heavy cargo for Adelaide. The number on board was 99 crew and three passengers, in addition to whom four stowaways were discovered when the ship grounded. The weather was clear but very dark and about 5.10 p.m. the ship ran over the revetment, on which she lodged for part of her length. This revetment was a submerged wall running alongside the Mersey channel for the purpose of regulating the flow of the tide and preventing silting. It had been constructed by order of the Mersey Docks and Harbour Board and was well-known to navigators. The *Armagh* at once sent up signals of distress, in response to which the New Brighton lifeboat put out and took off all on board by 1.30 a.m. on Sunday. The liner did not sink but on the fall of the tide her heavy cargo caused her to break and she became a total loss.

ARMANDO DIAZ

Italian Navy, light cruiser; 1932; *Odero-Terni-Orlando*; 5,008 tons; 554 -5x50-7x14; 95,000 s.h.p.; 37 knots; turbine engines; 3-drum boilers; eight 6 in. guns, six 3-9 in., eight 37 mm., eight 13 mm., 4 T.T., 2 aircraft.

The Italian light cruiser *Armando Diaz* was torpedoed and sunk by the British submarine *Upright* off the coast of Tripoli on February 25th, 1941. The vessel was reported to have reached a speed of 39-78 knots when on trial. It is not known how many of her complement of about 550 were lost when she sank.

ARMENIAN

ARMENIAN

African Steamship Co.; 1855; Glasgow; 763 tons; 239-2X 29-3x20-2; 300 n.h.p.; 10 knots; steam engines.

The steam barque *Armenian* with the monthly mails for West Africa left Liverpool on the morning of Tuesday, January 24th, 1865. She was under command of Capt. Thomas Leamon and carried 28 first-class passengers, two second-class passengers and eight deck passengers with a crew of 40. The weather was foggy and in the course of the afternoon the ship stopped twice to take soundings. At midnight, when under full steam and canvas, the *Armenian* ran on the Arklow Bank off the coast of Wicklow. Shortly afterwards she caught fire in the after deckhouse, but this was soon extinguished by the heavy seas. The boats were got out, one of which was stove-in, but the others were launched without mishap. During the night the foremast and the main-topmast carried away and the ship broke in two, the remaining passengers and crew taking to the main and mizzen rigging. The steamship *Montague* now came to the rescue and picked up two of the *Armenian's* boats. The lightship also sent a boat manned by four men, but this unfortunately capsized and the men were drowned.

By good seamanship the crew of the *Montague* managed to take off all those clinging to the masts by means of a line and lifebuoys.

The total loss of life was eight persons, including the rescue party from the lightship.

ARMENIAN

L. T. Morrow; 1871; R. Thompson, Jnr.; 1,123 tons; 230-4x 30-2x16-6; 100 h.p.; compound engines.

The Liverpool steamship *Armenian* was lost in the Baltic on August 23rd, 1882. Twenty-three of the crew were drowned.

ARMENIAN

Leyland Line; 1895; Harland & Wolff; 8,825 tons; 512-5X 59-2x35; 718 n.h.p.; 14 knots; quadruple-expansion engines.
The Leyland ship *Armenian*, Capt. Trickery, was transporting 1,414 mules from Newport News to Liverpool when at shortly after 7 p.m. on Tuesday, June 28th, 1915, she was attacked off Trevoise Head, Cornwall, by the German submarine U-38, Lt.Cdr. Max Valentiner. The *Armenian* endeavoured to escape and a chase of about an hour ensued. Finally at 8.6 p.m. the liner was hit by a torpedo and sank very rapidly, taking with her 29 men, of whom 12 were negro muleteers—all United States subjects. Capt. Trickery was among the survivors.

ARMIDALE

Australian Navy, fleet minesweeper; 1940; Australia; 733 tons; 186 X 31 X 8 - 5; 1,800 i.h.p.; 16 knots; triple-expansion engines; one 3 in. gun, one 20 mm., 4 m.g.

The Australian fleet minesweeper *Armidade*, Lt.Cdr. D. H. Richards, R.A.N.R.(S), was bombed and sunk by Japanese aircraft off Timor on December 1st, 1942. Of the 83 officers and ratings who composed her crew two officers and 38 ratings were killed. At the time of the attack the *Armidade* was carrying Dutch troops to Timor and of these 60 soldiers were killed. The survivors were picked up from lifeboats and taken to Australia suffering from exposure.

Before she sank the *Armidade* shot down one bomber and one fighter. The Japanese airmen machine-gunned the men swimming in the water.

ARMONIA

R. Lawrence Smith; 1891; Fairfield Shipbuilding Co.; 5,226 tons; 415-3x48-2x29-5; 593 n.h.p.; 12 knots; triple-expansion engines.

The steamship *Armonia* was torpedoed and sunk by a German submarine 38 miles S.E. by S.A.S. of He de Porquerolles in the Mediterranean on March 15th, 1918. Seven men were killed. The captain was among the survivors.

ARNA

A. Zdenkovic; 1905; Northumberland S.B. Co.; 3,049 tons; 325X48x21-8; 279 n.h.p.; triple-expansion engines.

The Czechoslovak steamship *Arna* struck on some rocks off Cabo de Gata on February 16th, 1928, and sank.

ARNABAL-MENDI

Cia. Nav. Sota y Aznar; 1906; Cia. Euskalduna de Const, de Buques; 1,735 tons; 250-1x37-2x16-9; 158 n.h.p.; triple-expansion engines.

The propeller of the Spanish steamship *Arnabal-Mendi* broke on November 26th, 1928. She drifted and was wrecked on Les Briguettes.

ARNDALE

T. Smailes & Son; 1906; R. Thompson & Sons; 3,583 tons; 340x48-5x23-2; 321 n.h.p.; triple-expansion engines.

The steamship *Arndale* struck a mine on June 11th, 1915, while on a voyage from Cardiff to Archangel with a cargo of coal, and later went aground 12 miles S. of Cape Orloff and was totally wrecked.

ARNE KJODE

A/Singer; 1938; Deutsche Werft A.G.; 11,019 tons; 508-1 X 69-2x36-5; 1,360 n.h.p.; oil engines.

The Norwegian motor tanker *Arne Kjode* was badly damaged by a torpedo from a German submarine on November 12th, 1939, on a voyage from Aruba to Nybprg. Five of her crew were lost. The tanker was later sunk by British naval ships.

ARNEL

Empresa Insulana de Navegacao; 1955; Est. Nav. de Viana do Castelo; 1,026 tons; 195-9x33x —; oil engines.

The Portuguese ship *Arnel* was wrecked on September 19th, 1958, about 1 mile off Santa Maria Island, Azores. There were passengers on board and more than 20 people were drowned.

ARNO

J. Westoll; 1871; J. Laing; 1,089 tons; 232-1x30-1x17-1; 98 h.p.; compound engines.

The steam collier *Arno* was lost near Selsey Bill on February 11th, 1899. Thirteen of the crew were drowned.

ARNO

Det Forenede D/S; 1898; Helsingors Jernskib & Maskinbyggeri; 1,386 tons; 229-2x33-9x14-3; 169 n.h.p.; triple-expansion engines.

The Danish steamship *Arno* was torpedoed and sunk by a German submarine on December 19th, 1917, in the North Sea.

ARNO

British Navy, destroyer; 1914; Great Britain; 550 tons; 225 x 23-5x12; 27 knots; turbine engines; four 12 pdr. guns, 3 T.T.

The destroyer *Arno* was sunk in collision off the Dardanelles on March 23rd, 1918. Her official complement was 70, but it is probable that a larger number than this was on board at the time of her loss.

ARNO

Lloyd Triestino Soc. Anon, di Nav.; 1912; W. Beardmore & Co.; 8,024 tons; 428-5x56-7x34-1; 1,374 n.h.p.; quadruple-expansion engines.

The Italian ship *Arno* was torpedoed and sunk by Allied aircraft on September 10th, 1942, 40 miles from Tobruk.

ARNO-MENDI

Campania Naviera Sota y Aznar; 1897; C. S. Swan & Hunter; 2,827 tons; 312-5x41x20-4; 244 n.h.p.; triple-expansion engines.

The Spanish steamship *Arno-Mendi* was torpedoed and sunk by a German submarine on March 12th, 1918, in the Irish Channel.

ARNOLD MAERSK

D/S aff 912 (A. P. Moller); 1914; W. Gray & Co.; 1,966 tons; 280 X 40 X 19 • 1; 188 n.h.p.; triple-expansion engines.

The Danish ship *Arnold Maersk* came under the control of the German authorities after the occupation of Denmark. She was wrecked on Grune aux Dardes, Jersey, on May 22nd, 1943.

ARNUS

Cia. Nav. Martiartu; 1898; R. Thompson & Sons; 3,383 tons; 340-2x45x15-3; 286 n.h.p.; triple-expansion engines.

The Spanish ship *Arnus* sprang a leak and sank on April 27th, 1921, 50 miles off Penmarc'h.

ARRILUZE

Catalana Maritima S.A.; 1892; *Wood, Skinner & Co.*; 2,127 tons; 275x37-5x18-1; 179n.h.p.; triple-expansion engines. The Spanish ship *Arriluze* was destroyed by gunfire from an insurgent warship during the Spanish Civil War on August 16th, 1936, near Aviles.

ARROGANTE

French Navy, ironclad; 1864; *Nantes*; 1,000 tons (circa); 118x38x8; 120n.h.p.; 7 knots; compound engines; three 9-4 in. guns, four 4-7 in.

The French warship *Arrogante* was one of the early ironclads, having been built in 1864 at a cost of 1,352,000 francs. On March 19th, 1879, in company with a small squadron consisting of the *Implacable*, *Fanus* and *Flore*, she was engaged in gunnery practice off the island of Hyeres, near Toulon. While this was in progress there was a sudden squall which sent very heavy waves over the low freeboard of the ship, sweeping four officers from the bridge and sending a cascade of water into her hold. A lieutenant attempted to turn the *Arrogante* shorewards and run for the beach, but she was too badly swamped to answer to her helm and foundered in six fathoms, taking with her 47 officers and men. Her full complement was 122, but of this number Capt. Artiguenave was on board the *Implacable*, and there were probably others absent with him. The ship's surgeon and four other officers escaped by swimming.

The other ships of the squadron weathered the storm in safety, but were unable to afford the *Arrogante* any assistance.

ARSTERTURM

Deutsche Dampfs. Ges. Hansa; 1944; 1,923 tons.

The German steamship *Arsterturm*, carrying munitions, was bombed by British aircraft and sunk by torpedo on February 26th, 1945, off Ballaatskaeja, Norway. Thirty-six of her crew were killed.

ARTA

Atlas Levante Linie A.G.; 1922; *Akt. Ges. "Weser"*; 2,452 tons; 315-8x46x18-8; 228n.h.p.; triple-expansion engines.

The German steamship *Ana* was carrying military stores to Tunisia when, on April 16th, 1941, she was attacked by British warships and sunk by gunfire.

ARTEMIS PITTA

Y. N. Pittas Bros. & Co.; 1906; *Stettiner Oderwerke*; 1,433 tons; 240-9x36x16-2; 128 n.h.p.; triple-expansion engines.

The Greek steamship *Artemis Pitta* was bombed and sunk during the German invasion of Greece, and afterwards raised and repaired by the Germans. On February 21st, 1943, loaded with petrol and explosives, she was torpedoed by British aircraft in Milos harbour and blew up. Sixteen of her crew were killed.

ARTEMISIA

H. M. Thomson; 1920; *W. Doxford & Sons*; 6,507 tons; 420 x 54x34-3; 565 n.h.p.; triple-expansion engines.

The British ship *Artemisia* was bombed and set on fire by German aircraft on March 14th, 1941. She sank in shallow water two miles off Haisboro', Norfolk, England.

ARTESIEN

Cie. des Bat. a Vap. du Nord; 1921; *J. Readhead & Sons*; 3,152 tons; 331-2x47-2x22-1; 307n.h.p.; triple-expansion engines.

The French steamship *Artesien* was torpedoed and sunk by an Allied submarine on February 29th, 1944, off Toulon.

ARTHUR

Charlton S.S. Co.; 1872; *Readhead, Soffley & Co.*; 1,228 tons; 242X31-2x17-3; 110n.h.p.; compound engines.

The British steamship *Arthur* was wrecked in the Kara Sea in September, 1899, on a voyage from London (via the Tyne) to the Obi River with a cargo of tea.

ARTHUR F. CORWIN

Oriental Tankers; 1938; *Blohm & Voss*; 10,516 tons; 490-3x70x37; 912n.h.p.; 12 knots; oil engines.

The tanker *Arthur F. Corwin* was in the North Atlantic, about 200 miles due N. of Rockall, on February 13th, 1941, when she was

torpedoed and sunk by a German submarine. There were no survivors.

ARTHUR MIDDLETON

United States War Shipping Administration; 1942; *Alabama D.D. & S.B.Co.*; 7,176 tons; 422-8x57x34-5; 339n.h.p.; triple-expansion engines.

The American steamship *Arthur Middleton* was carrying explosives and war materials from New York to North Africa when, on January 1st, 1943, she was blown up by an explosion and sank three miles outside Oran. About 42 of the crew and 24 armed guards were killed.

ARTHUR W. SEWALL

Skibs A/S Garm; 1926; *Armstrong Whitworth & Co.*; 6,030 tons; 352-1x60x33; 626n.h.p.; triple-expansion engines.

The Norwegian oil tanker *Arthur W. Sewall* was torpedoed and shelled on August 7th, 1942. She was again attacked on the following day and sank in 8° 28' N., 34° 2' W.

ARTIGLIERE

Italian Navy, destroyer; 1937; *Odero-Terni-Orlando*; 1,620 tons; 350x38x10-7; 48,000 s.h.p.; 39 knots; turbine engines; 3-drum boilers; four 4-7 in. guns, six 37 mm., four 13 mm., 6 T.T.

On October 11th, 1940, at 2.30 a.m. the British cruiser *Ajax*, 6,985 tons, Capt. E. D. B. McCarthy, sighted three small Italian torpedo-boats E. of Malta and sank two of them—the *Airone* and *Ariel*, both of 679 tons. Before daylight she ran into a heavy cruiser escorted by four destroyers and engaged them, damaging one destroyer, the *Artigliere*. At daybreak the *Ajax* was joined by the heavy cruiser *York*, 8,250 tons, six 8 in. guns, Capt. R. H. Portal, and both ships proceeded in search of the enemy. Later British reconnaissance aircraft signalled the whereabouts of the *Artigliere*, which was in the Sicilian Channel in tow of another destroyer. The latter vessel slipped away on the near approach of the *York* and the crew of the *Artigliere* were ordered by Capt. Portal to "abandon ship", which they did, the *York* dropping Carley rafts to assist men in the water. The destroyer was then sunk by gunfire.

A message to the Italian Admiralty gave the whereabouts of the *Artigliere*'s company and a British naval plane guided an Italian hospital ship to the spot.

The *Ajax* had 13 killed and 22 wounded in both actions. There were no casualties aboard the *York*.

ARTIST

T. & J. Harrison & Co.; 1909; *Chas. Cornell & Co.*; 3,570 tons; 350-1x46x27-3; 300 n.h.p.; 12 knots; triple-expansion engines.

The steamship *Artist* was torpedoed and sunk by a German U-boat 58 miles W. of the Smalls on January 27th, 1917. The captain and 34 men were killed.

ARTURO

Italian Navy, torpedo boat; 194-; *Italy*; 706 tons; 265-7x27-2x9; 22,000 s.h.p.; 31-5 knots; turbine engines; 3-drum boilers; two 3-9 in. guns, six 20mm. AA., 6 T.T.

The Italian seagoing torpedo boat *Arturo* fell into the hands of the Germans upon the capitulation of Italy on September 8th, 1943. The vessel had been sunk in shallow water at that time, but was raised and repaired. She was commissioned with a German crew under the name TA-24. On the night of March 17th-18th, 1945, when patrolling off Genoa in company with the *Eridano*, 706 tons, commissioned by the Germans as the TA-29, both ships were brought to action by the British destroyers *Lookout* and *Meteor*, both of 1,920 tons, six 4-7 in. guns. The fighting was brief, the *Arturo* being sunk by gunfire and the *Eridano* so badly damaged that she had to be scuttled by her crew. The number lost is not known.

ARUNDO

N.V. Maats. Zeevaart; 1930; *Northumberland S.B. Co.*; 5,163 tons; 412x55-3x26; 442n.h.p.; quadruple-expansion engines. The Dutch steamer *Arundo* was on passage from New York to Alexandria on April 28th, 1942, when she was torpedoed by the German submarine U-136. The attack took place off the New Jersey coast, near the Ambrose lightship. The *Arundo* sank with the loss of six lives.

ARY

J.E. Van Castricum; 1904; Nederl. Schps. Maats.; 642 tons; 180x28-9x13-1; 97h.p.; triple-expansion engines.
The Panamanian ship *Ary*, Capt. Edward Kelk, foundered on February 8th, 1947, off Waterford. Somebodies were washed ashore. The captain was among the survivors.

ASABA

Elder Dempster Line; 1900; Caledon Shipbuilding Co.; 972 tons; 220x36-2x13-2; 114n.h.p.; 8-5 knots; triple-expansion engines.
The steamship *Asaba* was torpedoed and sunk by a German submarine two miles W.S.W. of the Lizard on December 6th, 1917. The captain was killed together with 15 of the crew.

ASAGIRI

Japanese Navy, destroyer; 1929; Sasebo; 1,700 tons; 371 -5 x 33-7x9-7; 40,000 s.h.p.; 34 knots; turbine engines; Kanpon boilers; six 5 in. guns, 4 A.A.m.g., 9 T.T.
The Japanese destroyer *Asagiri* was engaged in the operations known as the battle of the Eastern Solomons. On August 28th, 1942, when off the island of Santa Isabel she was bombed and sunk by dive bombers of the U.S. Marine Corps.
The destroyer's normal complement was 197.

ASAGUMO

Japanese Navy, destroyer; 1937; Kawasaki; 1,500 tons; 356 x 33-3x9; 39,000s.h.p.; 34 knots; turbine engines; Kanpon boilers; six 5 in. guns, 2 m.g., 8 T.T.
The Japanese destroyer *Asagumo* was one of nine such vessels sunk at the battle of Leyte Gulf, October 23rd-27th, 1944. The particular action in which the *Asagumo* was sunk was that fought in the Surigao Strait on the night of the 25th. An advance group of the Japanese Southern Force, consisting of two battleships, one heavy cruiser and four destroyers encountered an American fleet of five battleships and many cruisers and destroyers. All the Japanese ships, except one solitary destroyer, were sunk without the loss of any American vessel.

The *Asagumo* carried a complement of over 200.
For details of the Surigao Strait action, see the battleship *Yamashiro*. For Leyte Gulf action, see the battleship *Musashi*.

ASAHI

Japanese Navy; 1899; 11,441 tons; 425-5x75-5x27-5; 18 knots; triple-expansion engines.
The repair ship *Asahi* was formerly a battleship. On May 25th, 1942, she was torpedoed and sunk by the American submarine *Salmon* about 150 miles S.E. of Cana, Indo-China.

ASAHI MARU

Shimatani Kisen Kabushiki Kaisha; 1917; Ono Shipyard; 2,205 tons; 270x39x20-9; 150n.h.p.; triple-expansion engines.
The Japanese steamship *Asahi Mam* left Karafuto for Wakayama, and was last reported passing the Kinkwazan lighthouse on August 22nd, 1922. She is supposed to have foundered on August 24th.

ASAHI MARU No. 2

Hokkaido Tanko K.K.; 1919; Nitta Zosenshp; 1,323 tons; 220 X 35x18-5; 117n.h.p.; triple-expansion engines.
The steamship *Asahi Mam No. 2* was bombed and sunk by U*S. aircraft on August 13th, 1944, S.E. of Hongkong.

ASAHISAN MARU

Mitsui Bussan Kaisha; 1935; Mitsui Bussan Kaisha; 4,551 tons; 360x50x29; 453n.h.p.; oilengines.
The motor vessel *Asahisan Mam* was bombed and sunk by U.S. army aircraft on July 24th, 1944, off Halmahera Island, Celebes.

ASAKA MARU

Nippon Yusen K.K.; 1937; Mitsubishi; 7,399 tons; 462-7x62-3x34-4; 8,000b.h.p.; 19knots; oilengines.
The liner *Asaka Mam* was taken over by the Japanese Admiralty during the Second World War for service as an auxiliary cruiser. On October 12th, 1944, when in the Formosa Strait, she was bombed and sunk by U.S. carrier-borne aircraft. The number of officers and ratings killed was not disclosed.

ASAKA MARU

Hamane Shoten K.K.; 1909; W. Hamilton & Co.; 4,681 tons; 376-8x52-3x25-5; 320 n.h.p.; triple-expansion engines.
The steamship *Asaka Maru* was sunk by U.S. carrier-based aircraft on October 12th, 1944, S.E. of Formosa.

ASAKASAN MARU

Mitsui Bussan Kaisha; 1937; Mitsui Bussan Kaisha; 8,702 tons, 455-1x62x39-4; 1,230 n.h.p.; oilengines.
The motor vessel *Asakasan Maru* was bombed and sunk by U.S. aircraft on February 27th, 1943, off the coast of Burma.

ASAKAZE

Japanese Navy, destroyer; 1922; Mitsubishi; 1,270 tons; 320 X 30x9-6; 38,500s.h.p.; 34 knots; turbine engines; Kanpon boilers; four 4-7 in. guns, 2 A.A.m.g., 6 T.T.
The Japanese destroyer *Asakaze* was torpedoed and sunk off Cape Bolinao, Luzon, Philippine Islands, by the U.S. submarine *Haddo* on August 23rd, 1944. The destroyer's normal complement was 148.

ASAKAZEMARU

Todai Kissen K.K.; 1938; Osaka Iron Works; 6,517 tons; 424-1x57-4x34-4; 500n.h.p.; turbine engines.
The Japanese transport *Asakaze Maru* with troops and a cargo of ammunition was lying in the Kwajalein lagoon, Marshall Islands, when she was bombed by aircraft from the American aircraft carriers *Essex* and *Lexington*. The attack took place on December 5th, 1943, the transport blowing up with the loss of nearly everyone on board.

ASAMA MARU

Nippon Yusen K.K.; 1929; Mitsubishi Zosen; 16,975 tons; 560x72x42-5; 4,008n.h.p.; 21 knots; oilengines.
The liner *Asama Maru* was taken over by the Japanese government during the Second World War for service as a transport. On November 1st, 1944, when about 100 miles S. of the island of Pratas in the South China Sea, she was torpedoed and sunk by the I U.S. submarine *Atule*.

ASANAGI

Japanese Navy, destroyer; 1924; Hudonagata; 1,270 tons; 320x30x9-6; 38,500s.h.p.; 34 knots; turbine engines; Kanpon boilers; four 4-7 in. guns, 2 A.A.m.g., 6 T.T.
The Japanese destroyer *Asanagi* was torpedoed and sunk N.W. of the Bonin Islands by the U.S. submarine *Pollack* on May 22nd, 1944. The destroyer's normal complement was 148.

ASANAGI MARU

Nippon Kaiun K.K.; 5,142 tons.
The steamship *Asanagi Maru* was torpedoed and sunk by the U.S. submarine *Redfin* on June 11th, 1944, E. of North Borneo.

ASASHIMO

Japanese Navy, destroyer; 1940; Japan; 2,000 tons; 364x35x 11; 45,000s.h.p.; 36 knots; turbine engines; six 5in. guns, 2m.g., 8T.T.
The Japanese destroyers *Asashimo*, *Hamakaze* and *Isokaze* of 2,000 tons each, and the *Kasumi* of 1,500 tons, were all sunk in a sea-air action which took place S.W. of Kyushu on April 7th, 1945. The squadron to which the destroyers were attached consisted of several heavy units of the Japanese fleet. It was located by aircraft from a fast carrier squadron of the U.S. Fifth Fleet under command of Vice-Admiral M. A. Mitscher, which was cruising in the East China Sea as part of the operations connected with the American landing on Okinawa on April 1st. A determined attack was made upon the Japanese ships and in addition to the above-mentioned destroyers the battleship *Yamato*, 42,500 tons, and the cruiser *Yahagi*, 6,000 tons, were sent to the bottom by bombing.
The Americans sustained some damage and casualties on board the aircraft-carrier *Hancock*.
The three large destroyers carried complements of over 200 apiece, and the normal complement of the *Kasumi* was 190.
The full story of the battle is told under the battleship *Yamato**

ASASHIO

Japanese Navy, destroyer; 1936; Sasebo; 1,500 tons; 356 X 33-3x9; 39,000 s.h.p.; 34 knots; turbine engines; six 5 in. guns, 2m.g., 8T.T.

The Japanese destroyer *Asashio* was escorting a convoy carrying the 20th and 51st Divisions of the Japanese Army from Rabaul to New Guinea. When crossing the Huon Gulf on March 2nd-3rd, 1943, an attack was made on the ships by 136 Allied aircraft of all classes. Nearly all the transports were sunk as well as four destroyers including the *Asashio*. The Japanese loss in personnel approximated to 15,000 troops.

For full details, see the Japanese destroyer *Tokitsukaze*.

ASASHIO MARU

Nippon Kaiun K.K.; 5,111 tons.

The steamship *Asashio Maru* was sunk by U.S. carrier-based aircraft on March 30th, 1944, off Babelthup, Palau Islands.

ASAYAMA MARU

1,917 tons.

The steamship *Asayama Maru* was bombed and sunk by U.S. aircraft on November 6th, 1943, off Bougainville.

ASBJORN

A/STo; 1899; W. Gray & Co.; 3,459 tons; 330x47x24-8; 276n.h.p.; triple-expansion engines.

The Norwegian steamship *Asbjorn* was torpedoed and sunk by a German submarine on March 10th, 1917, off Ushant.

ASBORG

A/S To; 1896; Short Bros.; 2,750 tons; 321x43-1x21-9; 252 n.h.p.; triple-expansion engines.

The Norwegian steamship *Asborg* was torpedoed and sunk by a German submarine on January 3rd, 1918, in the English Channel.

ASCAIN

Plissonet Cie.; 1913; Wood, Skinner & Co.; 1,686 tons; 260-3 x37-7x16-4; 207n.h.p.; triple-expansion engines.

The French steamship *Ascain* was torpedoed and sunk by a German submarine on July 13th, 1917, off Ushant.

ASCALON

William Milburn & Co.; 1882; Campbell, Macintosh & Bowsted; 2,351 tons; 290 x 37-2 x 27-4; 300 h.p.; compound inverted engines.

The British steamship *Ascalon* was wrecked on October 13th, 1887, 14 miles N. of Galle on a voyage from Aden to Calcutta with a cargo of salt.

ASCANIA

Cunard S.S. Co.; 1911; Swan, Hunter & Wigham Richardson; 9,121 tons; 466x56-1x29-4; 976 n.h.p.; triple-expansion engines.

The liner *Ascania* was wrecked on June 13th, 1918, 20 miles E. of Cape Ray while on a voyage from Liverpool to Montreal in ballast.

ASCARI

Italian Navy, destroyer; 1938; Odero-Terni-Orlando; 1,620 tons; 350x38-5x10-7; 48,000s.h.p.; 39 knots; turbine engines; 3-drum boilers; four 4 - 7 in. guns, six 37 mm., four 13 mm., 6 T.T.

The Italian destroyer *Ascari* was torpedoed by the Polish submarine *Sokolin* in Navarino Bay on November 19th, 1941. She was refloated and repaired and on April 25th, 1943, when 25 miles N.W. of Zembetta Island, Tunisia, was mined and sunk. The destroyer carried a normal complement of 165.

ASCARO

E. Mazza; 1891; Short Bros.; 3,245 tons; 339x42x17-7; 281 n.h.p.; triple-expansion engines.

The Italian steamship *Ascaro* was torpedoed and sunk by a German submarine on April 30th, 1917, off S.W. Ireland.

ASCOT

British Navy, minesweeper (paddle); 1916; Ailsa Shipbuilding Co.; 810 tons; 245-7x29x6-7; 1,400i.h.p.; 15 knots; diagonal compound engines; one 3 in. gun, one 6pdr., two 2pdr.

The minesweeper *Ascot* was one of a flotilla of such vessels laid

down by the Admiralty in 1915. They were all paddle steamers of shallow draught which enabled them to perform their duties close inshore or wherever there was little depth of water. In all 32 of them were built and named after racecourses within the United Kingdom. They served a useful purpose, but owing to the danger of mines getting under the paddles no new units were added and those of the class which survived the war were sold out of the service. On November 10th, 1918, when off the Farn Islands the *Ascot* was torpedoed and sunk by a German submarine.

ASCOT

Britain S.S. Co.; 1942; Caledon S.B. & E. Co.; 7,005 tons; 419-2x56-8x34-4; 453 n.h.p.; triple-expansion engines.

The British cargo ship *Ascot*, on a voyage from Colombo to Diego Suarez, was torpedoed by a Japanese submarine on February 29th, 1944. The crew took to the boats and the ship was sunk by gunfire. The captain was taken aboard the submarine for interrogation and then thrown overboard. The submarine then rammed and machine-gunned the boats and rafts. Eight survivors were eventually picked up by the Dutch ship *Straat Soenda*.

ASDRUBAL

Hall Brothers; 1877; Palmers'Co.; 1,844 tons; 264-5x34-2x24-2; 140 h.p.; compound inverted engines.

The British steamship *Asdrubal* was wrecked on June 21st, 1882, off Cape Race, while sailing from St. John, N.B., to Bristol with a timber cargo.

ASGERD

D/S A/S Asgerd; 1924; Stavanger Stoberi & Dok; 1,308 tons; 243-4x37-2x16; 144n.h.p.; triple-expansion engines.

The Norwegian ship *Asgerd* was torpedoed and sunk on September 27th, 1940, 350 miles W. of the Hebrides. Seventeen of her crew were lost.

ASHANTI

T. E. Evans & Co.; 1936; Goole S.B. & Repg. Co.; 534 tons; 183-6x27-1x8; 102n.h.p.; oil engine.

The motorship *Ashanti* was torpedoed and sunk by a German motor torpedo boat on June 10th, 1944, off St. Catherine's Point, Isle of Wight. All 10 crew and 7 gunners were lost.

ASHANTIAN

United Africa Co.; 1935; W. Hamilton & Co.; 4,917 tons; 404-1x56-7x23; 397n.h.p.; 10 knots; triple-expansion engines.

The steamship *Ashantian*, Capt. C. Cartmer Taylor, was in convoy in mid-Atlantic on April 21st, 1943, when she was torpedoed and sunk by a German submarine. Capt. Taylor and 15 others were killed.

ASHBURY

Alexander Shpg. Co.; 1924; W. Gray & Co.; 3,901 tons; 356-5x50x24-7; 415n.h.p.; triple-expansion engines.

The British steamship *Ashbury* was wrecked on January 8th, 1945, at the entrance to the Kyle of Tongue. All of the crew were lost.

ASHBY

Ropner Shipping Co.; 1927; Cowpen Shipbuilding Co.; 4,868 tons; 405-1x53-6x26-4; 349n.h.p.; 11 knots; triple-expansion engines.

The steamship *Ashby*, Capt. T. V. Frank, outward bound in ballast was in the North Atlantic on November 30th, 1941, when she was torpedoed and sunk by a submarine. Capt. Frank, 11 crew and 5 gunners were lost.

ASHCREST

Crest Shipping Co.; 1920; Northumberland S.B.; Co.; 5,652 tons; 399-6x53x32-8; 517n.h.p.; triple-expansion engines.

On December 7th, 1940, the British ship *Ashcrest* reported that she was in distress and her rudder broken in 54° 35' N., 9° 20' W., but aircraft were unable to find her. She had left Sydney, N.S., on November 22nd, for the Tees.

ASHEVILLE

United States Navy, gunboat; 1918; Charleston Navy Yard; J,270 tons; 241 -2x41 -2x11 -3; 800 n.h.p.; 12 knots; turbine engines; Bureau boilers; three 4 in. guns, two 3 pdr., three 1 pdr.

The U.S. gunboat *Asheville* was one of the vessels forming the Allied East Indies Squadron which met with total destruction at the battle of the Java Sea on February 27th/28th, 1942. The *Asheville* did not take part in the battle but at its conclusion was ordered to make for Australia independently. She was intercepted and sunk by the Japanese on March 3rd. Her normal complement was 185, but it is probable that a larger number was on board at the time of her loss.

The full story of the battle of the Java Sea is told under the Dutch cruiser *De Ruyter*, flagship of Rear-Admiral K. Doorman.

ASHIGARA

Japanese Navy, heavy cruiser; 1928; Kawasaki; 10,000 tons; 640x62-3x16-5; 100,000s.h.p.; 33 knots; turbine engines; Kanpon boilers; ten 8 in. guns, eight 4 • 7 in., eight 47 mm., 2 m.g., 8 T.T., 4 aircraft.

The Japanese heavy cruiser *Ashigara* was torpedoed and sunk by the British submarine *Trenchant* north of Banka Strait on June 8th, 1945. She was one of the very few Japanese warships sunk by the British in the Pacific operations. Her normal complement was 692.

ASHIHARU MARU

Azuma Risen Goshi Kaisha; 1899; W. Gray & Co.; 3,122 tons; 325x47-1x22-4; 264n.h.p.; triple-expansion.

The *Ashiharu Maru* was wrecked on January 28th, 1929, at Mo-Fu Point, Hainan Strait.

ASHIZURI MARU

2,166 tons (approx.).

The tanker *Ashizuri Maru* was torpedoed and sunk on June 5th, 1944, by the U.S. submarine *Puffer*, E. of North Borneo.

ASHKHABAD

U.S.S.R.; 1917; Harland&Wolff; 5,284 tons; 400-7x52-3x28-5; 489 n.h.p.; triple-expansion engines.

The Soviet ship *Ashkhabad* was torpedoed by a German submarine on April 30th, 1942, about 100 miles off North Carolina. The ship remained afloat in a waterlogged condition and was sunk by gunfire on May 3rd.

ASHLEA

Cliff side Shipping Co.; 1929; Sir J. Priestman & Co.; 4,222 tons; 367-4x51-5x25-1; 375 n.h.p.; triple-expansion engines.

The British cargo ship *Ashlea* was intercepted and sunk by the armed raider *GrafSpee* on October 7th, 1939, between Cape Town and Freetown.

ASHLEY

North of Ireland S.S. Co.; 1891; Craig, Taylor & Co.; 2,297 tons; 289x37-9x19-3; 197n.h.p.; triple-expansion engines.

The British steamship *Ashley* was wrecked near Galle in September, 1904, while sailing from Sourabaya to Suez with a cargo of sugar.

ASHMOUNT

Ashmount S.S. Co.; 1904; A. Rodger & Co.; 3,109 tons; 319-6x46-5x23; 275 n.h.p.; triple-expansion engines.

Sailing from Adelaide via Natal to Liverpool with a cargo of sugar the *Ashmount* was wrecked in April, 1905, on Stalwart Point near East London.

ASHMUN J. CLOUGH

Stephenson Clarke & Assoc. Cos.; 1943; W. Butler Shipbuilders Inc.; 250-6x41-3x18-4; 188n.h.p.; 9knots; triple-expansion engines.

The collier *Ashmun J. Clough*, Capt. E. Hodge, was managed for the Ministry of War Transport by the firm of Stephenson Clarke. On August 26th, 1944, when some miles E.N.E. of Cherbourg, the vessel was torpedoed and sunk by a submarine. Ten men were killed. Capt. Hodge was among the survivors.

ASHTON

W. & E. S. Lamplough; 1898; J. L. Thompson & Sons; 3,196 tons; 325x44-5x19-7; 280 n.h.p.; triple-expansion engines.

Sailing with a cargo of coal from Muroran to Hong, the *Ashton* was wrecked in February, 1901, at Oma, Tsugaru Straits.

ASHWORTH

R.S.Dalgliesh; 1920; W. Pickersgill & Sons; 5,227 tons; 400 x 53x29; 425 n.h.p.; 11 knots; triple-expansion engines.

The steamship *Ashworth*, Capt. W. Mouat, was sailing in convoy in the North Atlantic on October 13th, 1942, when she was torpedoed and sunk by a German submarine. Capt. Mouat, 41 crew and 7 gunners were lost.

ASIA

J.Ellis; 1872; J. & R. Swan; 662 tons; 210-7x25-1x15-5; 90hp; compoundinvertedengines.

The steamer *Asia* was employed in the Canadian N.W. transit service. On September 14th, 1882, under Capt. W. Turnbull, she was wrecked near Lonely Island, Georgian Bay, about 20 miles from Point au Barrie. Of those on board about 98 passengers and crew were drowned.

ASIA

Taylor Bros.; 1883; Pittfield; 1,398 tons; 201-3x38-8x24.

The *Asia* was one of the famous sailing ships belonging to St. John, New Brunswick. In September 1897 the vessel left Manila for Boston with a cargo of hemp. The voyage was a long one and at its close, when 167 days out, on February 20th, 1898, she took soundings off Cape Cod and found herself in 40 fathoms. The weather was bad in a heavy snowstorm and a rough sea. This prevented an accurate placing of her whereabouts and her officers did not realise that she was so far south of her destination.

During the afternoon when upon a northerly course the *Asia*, running under shortened sail, struck on the dreaded Nantucket Shoal. Orders were immediately given to set more sail and if possible force through the sand-bank and gain the open sea. This effort succeeded but shortly afterward with a gale blowing at full blast and under press of sail the ship struck another shoal.

It was now dark and no friendly vessel within hearing of the *Asia's* minute-gun. The seas were breaking over her and tearing away deckhouses, standing-gear and eventually destroying the ship herself. Capt. George Dakin, in command, was flung on the deck by a huge wave and killed instantly. The first officer ordered all hands below in order to avoid the seas but in a short time the wreck went to pieces.

Only three seamen were picked up out of a company of 25 persons, including the captain's wife and little girl. So furious were the seas that on the next day no remains of the *Asia* were visible.

ASIA

Asia S.S. Co.; 1883; Harland&Wolff; 4,680 tons; 440-9X44-2x29-2; 471 n.h.p.; triple-expansion engines. On a voyage from Hong Kong to San Francisco the British steamship *Asia* struck the Finger Rock at Taichow Island on April 23rd, 1911, and sank.

ASIA

Cie. Francaise de Nav. a Vap.; 1907; Russell & Co.; 5,890 tons; 415-3x49-6x25-1; 757n.h.p.; triple-expansion engines.

The French ship *Asia* was bound from Jeddah to Djibouti with 1,500 pilgrims. She caught fire and burned out on May 21st, 1930, in Jeddah outer harbour.

ASIAN

F.Leyland&Co.; 1898; Caird & Co.; 5,514 tons; 420-6X49-1x21-9; 555n.h.p.; triple-expansion engines.

The British steamship *Asian* was wrecked on September 17th, 1924, on Stag Rocks, Galley Head. She was on a voyage from New Orleans to Liverpool.

ASIATIC PRINCE

Rio Cape Line; 1926; Deutsche Werft A.G.; 6,734 tons; 441-7x60x29-1; 1,313 n.h.p.; oil engines. ^

The British motorship *Asiatic Prince* left Los Angeles on March 16th, 1928, for Yokohama but was not seen again.

ASIEN

"Atlas" *Reederei A.G.*; 1905; *J. L. Thompson & Son*; 3,894 tons; 344-7x49-3x26-8; 329 n.h.p.; triple-expansion engines. The German ship *Asien* was torpedoed and sunk by an Allied submarine on April 7th, 1944, off Lister.

ASIMINA

S. G. Embiricos; 1894; *C. S. Swan & Hunter*; 2,878 tons; 312-5x41x20-6; 250 n.h.p.; triple-expansion engines. The Greek steamship *Asimina* was torpedoed and sunk by a submarine on January 26th, 1918, in the Mediterranean.

ASKA

British India Steam Navigation Co.; 1939; *Swan Hunter*; 8,323 tons; 444-6x61-2x25-2; 2,155 n.h.p.; 19 knots; turbine engines. The liner *A ska* left Bathurst, West Africa, for Liverpool on September 7th, 1940, with 350 French troops on board, some of whom were to land in France and others to join the Free French forces then forming in Britain. The vessel was not in convoy as she was capable of maintaining a speed of 17 knots. At 2.30 a.m. on Monday, the 16th, when between Rathlin Island and Maiden's Rock the liner was attacked by a German bomber which scored two hits with heavy bombs in, or near, the engine-room. A third bomb hit the fore-castle, after which orders were given to "abandon ship" and the boats were got away. The ship drifted ashore. Six officers and six lascars were killed. The survivors were picked up by trawlers and transferred to a naval ship, which took them to Greenock.

ASKILD

A/S Vesterhav; 1892; *R. Thompson & Sons*; 2,540 tons; 295x41x18-5; 238 n.h.p.; triple-expansion engines. The Norwegian steamship *Askild* was torpedoed and sunk by German submarine on May 19th, 1917, off Ushant.

ASLACOE

Bennetts & Co.; 1889; *R. Dixon & Co.*; 2,524 tons; 295-5x42-2x18-7; 220 h.p.; triple-expansion engines. The British steamship *Aslaco*e was wrecked in August, 1890, in Trepassy Bay (Nfld.) while on a voyage from Montreal to Grimsby with a cargo of timber.

ASLAN

Turkish Transport; 1872; *Barclay, Curie & Co.*; 2,541 tons; 350-4x36-9x27-5; 427 n.h.p.; 9-5 knots; compound engines. The Turkish transport *Asian*, carrying troops through the Red Sea, was wrecked near Yembo on April 1st, 1901, 180 troops and crew losing their lives.

ASMARA

Operated by *Garibaldi S.A. Co-op. di Nav. for Italian Navy*; 1915; *Russell & Co.*; 7,192 tons; 454-8x56-2x35-6; 887 n.h.p.; quadruple-expansion engines. The steamship *Asmara* was torpedoed and sunk by an Allied submarine on August 10th, 1943, off Brindisi.

ASOMARU

Toa Kaiun K.K.; 1923; *Mitsubishi Zosen Kaisha*; 3,028 tons; 315-5x46x27; 284 n.h.p.; triple-expansion engines. The steamship *Aso Maru* was torpedoed and sunk by the U.S. submarine *Redfin* on June 24th, 1944, in the Surigao Strait.

ASOKAWA MARU

Kawasaki Kisen K.K.; 6,925 tons. The steamship *Asokawa Maru* was bombed and sunk by U.S. Army aircraft on March 28th, 1945, near Camranh Bay, Indo-China.

ASOSANMARU

Mitsui Bussan K.K.; 1935; *Mitsui Bussan Kaisha*; 8812 tons; 453x62x30-5; 1,230 n.h.p.; oil engines. The motor vessel *Asosan Maru* was torpedoed and sunk by the U.S. submarine *Bluegill* on May 1st, 1944, about 100 miles E. of Mindanao Island, Philippines.

ASPASIA

J. Th. Galakis; 1914; *Sunderland S.B. Co.*; 4,211 tons; 370X53-5x24-5; 363 n.h.p.; triple-expansion engines. The Greek ship *Aspasia* left Takoradi on July 14th, 1940, for St. Vincent, C.V. She left St. Vincent on August 5th for Workington and was not seen again. It was thought that she had been torpedoed by a German submarine in the N. Atlantic about the 12th August.

ASPASIA STAVRONDIS

E. Stavrondis; 1885; *Ramage & Ferguson*; 1,323 tons; 210-2X31-2x12; 106 n.h.p.; compound engines. The Greek cargo ship *Aspasia Stavrondis*, with a cargo of petroleum, caught fire on January 12th, 1921, and sank on the following day 8 miles E. of Carpathos Island.

ASPEN

O. F. Ahlmark & Co. Efr. A/B; 1918; *Stavanger Stoberi & Dok.*; 1,305 tons; 239-9x37-1x15-5; 132 n.h.p.; triple-expansion engines. The Swedish cargo ship *Aspen* was sunk by aircraft on July 16th, 1941, outside Rotterdam.

ASPHODEL

British Navy, corvette; 1941; *W. Simons & Co.*; 925 tons; 193x32x16; 17 knots; quadruple-expansion engines; one 4 in. A.A. gun, several smaller. The corvette *Asphodel*, Lt. A. M. Halliday, R.N.Z.N., was torpedoed and sunk by a German submarine off Cape Finisterre on March 9th, 1944. Five officers, including Lt. Halliday, and 87 ratings were killed.

ASPS

Rederi A/BRex; 1920; *Kockums M/V A/B*; 1,331 tons; 235-5X37-7x16-5; triple-expansion engines. The Swedish ship *Aspo* left Kalmar on January 26th, 1953, for Hartlepool. She was reported by wireless to be in distress on February 1st and nothing more was heard of ship or crew until the wreck was located several miles W. of Jutland.

ASPROMONTE

Italian State Railways; 1921; *Government Dockyard, Castellamare*; 976 tons; 271-6x34-8x12-7; 159 n.h.p.; triple-expansion engines. The ferry *Aspromonte* was sunk by gunfire from a British warship on December 2nd, 1942, in the Straits of Messina.

ASSAM

1,668 tons. The Japanese steamship *Assam* was bombed and sunk by U.S. aircraft on December 3rd, 1943, off the coast of Burma.

ASSAR-I-TIEWFIK

Turkish Navy, ironclad; 1867; *La Seyne*; 5,000 tons; 272 X52x25; 3,560 i.h.p.; 13 knots; horizontal engines; cylindrical boilers; three 6 in. guns, seven 4-7 in., six 6 pdr. The old Turkish ironclad, *Assar-I-Tewfik*, had been overhauled and reamed at Krupp's Germania Yard during 1903-7. She proved most useful to the Turks in landing operations and coastal fighting during the Balkan War of 1913. In this capacity she covered the landing of some Turkish irregulars at Tcherkess on February 11th, 1913, but stood in too close to shore when firing at the Bulgarian batteries and ran on a submerged rock. Unfortunately the weather was stormy and hope of getting the ship off in a short time had to be abandoned. As she was well within range of the Bulgarian artillery her ship's company of 30 was transferred to the escorting torpedo boats and the Turkish force withdrew. There was no loss of life.

ASSAYE

Elder, Dempster & Co.; 1891; *Harland & Wolff*; 5,129 tons; 401x45-3x28-1; 390 n.h.p.; triple-expansion engines. The steamship *Assaye* was wrecked in April, 1897, on Blonde Rock, S. of Seal Island at the entrance to the Bay of Fundy while on a voyage from Liverpool to St. John, N.B.

ASSIMACOS

ASSIMACOS

M. D. Assimacos; 1907; *Rickmers Akt. Ges.*; 4,175 tons; 367-2x47-7x27-4; 261 n.h.p.; triple-expansion engines.
The Greek ship *Assimacos* was wrecked on September 2nd, 1930, at Vilasasu, three miles S. of Silleiro Light.

ASSIMESFA BAIKA

P. E. Baikas; 1895; *Wigham Richardson & Co.*; 1,334 tons; 254-1x33-5x17-1; 195 n.h.p.; triple-expansion engines.
The Greek ship *Assimina Baika* was sunk by aircraft on April 20th, 1941, at Politika, N. of Chalkis.

ASSUNTA DE GREGORI

Soc. Anon di Nav. "Assunta di Gregori"; 1914; *Northumberland S.B. Co.*; 4,219 tons; 400x53x23-8; 433 n.h.p.; triple-expansion engines.
The Italian steamship *Assunta de Gregori* was torpedoed and sunk by a British submarine on April 19th, 1942, off the Kerkenna Islands, Tunisia.

ASSUNZIONE

T. Gazzolofu A.; 1889; *Schlesinger, Davis & Co.*; 3,770 tons; 370-5x44-2x27-2; 413 n.h.p.; triple-expansion engines.
The Italian steamship *Assunzione* was torpedoed and sunk by a submarine on June 15th, 1917, in the Mediterranean.

ASSYRIAN

F. Leyland & Co.; 1897; *Furness Withy & Co.*; 2,890 tons; 350 x 42x23-2; 288 n.h.p.; triple-expansion engines.
Sailing from Antwerp to Montreal with a mixed cargo, the *Assyrian* went aground in June, 1901, at Cape Race, NFL, and was totally wrecked.

ASSYRIAN

Ellerman Lines; 1914; *Blohm & Voss*; 2,962 tons; 332 x 44-8 x 23-1; 280 n.h.p.; triple-expansion engines.
The British cargo ship *Assyrian* was torpedoed by a German submarine on October 19th, 1940, in 57° 12' N., 10° 43' W., and sank on the following day. Seventeen lives were lost.

ASTA

A/B Maritime; 1883; *Palmers' Co.*; 1,623 tons; 257-2x36-2x 17-5; 143 n.h.p.; compound engines.
The Swedish ship *Asta* was sunk in a collision on December 15th, 1927, eight miles E. of May Island.

ASTER

British Navy, sloop; 1916; *Earless Shipbuilding Co.*; 1,250 tons; 267-7x33-5x11-7; 2,000 i.h.p.; 16-5 knots; triple-expansion engines; cylindrical boilers; two 4-7 in. guns.
The sloop *Aster*, Lt. Cdr. Hodson, in company with her sister ship the *Azalea*, was escorting a hospital ship through the Central Mediterranean. On July 4th, 1917, when approaching Malta, the hospital ship took a wrong course which led her over a known enemy minefield. She got through unscathed, however, but her two escorts were not so fortunate. The *Aster* was sunk and the *Azalea* badly damaged.

Of the *Aster's* complement of 93 officers and ratings, ten lost their lives as a result of the explosion.

ASTERIA

/A. Jachmindji; 1904; *J. Priestman & Co.*; 3,313 tons; 336-5x46-5x23-9; 325 n.h.p.; triple-expansion engines.
The Greek ship *Asteria* struck a mine and sank on January 17th, 1940, 9½ miles from Haisbro' light. Thirteen of the crew were lost.

ASTI

Italian Government; 1896; *J. L. Thompson & Sons*; 5,642 tons; 409x50-5x27-1; 393 n.h.p.; triple-expansion engines.
The Italian steamship *Asti* was torpedoed and sunk by a German submarine on August 13th, 1917, in the North Atlantic.

ASTIR

Th. F. Stafilopatis; 1896; *Helsingors Jernsk. & Msk.*; 1,335 tons; 240-6x34-2x14-1; 124 n.h.p.; triple-expansion engines.
The Greek ship *Astir* was bombed and sunk by German aircraft on April 27th, 1941, at Kapsalion.

ASTORIA

Beaver Shipping Co.; 1901; *Craig Taylor & Co.*; 4,262 tons; 360x48-3x20-3; 348 n.h.p.; 11 knots; triple-expansion engines.
The steamship *Astoria* was torpedoed and sunk by a German submarine 120 miles N.W. by W. of Vardo, Norway, on October 9th, 1916. Seventeen men were killed. The captain was among the survivors.

ASTORIA

United States Navy, heavy cruiser; 1933; *Puget Sound Navy Yard*; 9,950 tons; 588x61-7x23-5; 107,000 s.h.p.; 32-7 knots; turbine engines; Babcock & Wilcox boilers; nine 8 in. guns, eight 5 in., two 3 pdr., 10 smaller, 4 aircraft.
On August 7th, 1942, the Americans commenced their offensive for the recapture of the Solomon Islands from the Japanese. Very large naval forces, accompanied by a great fleet of transports, arrived off the island of Guadalcanal during the night of the 6th/7th. The weather on the preceding days had been overcast, effectively preventing air reconnaissance by the Japanese, as a result of which the first landing took them completely by surprise. There was some bombing by Japanese aircraft later in the day and on the following day, but large naval forces did not meet until early in the morning of August 9th.

At about 1.45 a.m. Japanese aircraft located the position of the U.S. transports by means of flares, while at the same time a force of cruisers and destroyers from the shelter of Savo Island made a high-speed sortie. This was met by the U.S. heavy cruisers *Astoria*, *Quincy* and *Vincennes* and the Australian heavy cruiser *Canberra* all over 9,000 tons, 8 in. guns, with other cruisers and destroyers. The Allied ships were in two groups. The first group which included the *Canberra* compelled the Japanese to alter course to proceed through the N.E. channel past Savo. In doing so they ran into the American heavy units and there was a stiff engagement within torpedo-range. The *Astoria* was set on fire and otherwise damaged so that by morning it was impossible to save her and she sank with the loss of some, but not many, of her complement of about 700.

The *Canberra*, *Quincy* and *Vincennes* were also lost, but it proved possible to save most of the crews from them. The Japanese did not press home their attack upon the transports which suffered no damage or casualties.

ASTRA II

Ministry of Shipping; 1920; *Clyde S.B. & Eng. Co.*; 2,393 tons; 296-1x44-3x20-3; 250 n.h.p.; triple-expansion engines.
The cargo ship *Astra II* was torpedoed and sunk by a submarine on August 29th, 1940, in 56° 09' N., 12° 14' W. Five lives were lost.

ASTRAL

Socony-Vacuum Oil Co.; 1916; *United States*; 7,524 tons; 439-5x58x33; 3,300 i.h.p.; 11 knots; quadruple-expansion engines.
The American tanker *Astral*, Capt. Chris. Alsager, was lost with all hands, 37 officers and men. The vessel left the Dutch island of Aruba, off the coast of Venezuela, for Lisbon in November, 1941, and was sunk by a submarine on December 2nd, 1941, S.W. of the Azores.

ASTRID

Rederi A/B Nanna; 1901; *J. Hauge*; 603 tons; 171x27-9x15-3; 52 n.h.p.; triple-expansion engines.
The Finnish ship *Astrid* struck a mine and sank on October 21st/22nd, 1940, at the E. end of the Gulf of Finland. Ten lives were lost.

ASTRIDA

Cie. Maritime Beige (Lloyd Royal) Soc. Anon.; 1929; *Rotterdam Droogd. Maats.*; 3,310 tons; 399-9x48-5x23; triple-expansion engines.
The Belgian steamship *Astrida* reported on March 19th, 1945, that she was in distress in heavy weather 75 miles S.E. of Port Elizabeth. She was carrying passengers. Twenty-nine survivors were eventually landed.

ASTROLOGER

G. Gibson & Co.; 1890; *W. Dobson & Co.*; 912 tons; 210 X 30-1 X 17-2; 127 n.h.p.; triple-expansion engines.
The British steamship *Astrologer*, Capt. J. G. Wood, struck a mine

and sank 5 miles S.S.E. from Lowestoft on June 26th, 1916. The captain and 10 of the crew were killed.

ASTRONOMER

T. & J. Harrison; 1917; D. & W. Henderson; 8,401 tons; 483 x 58 X 33; 700 n.h.p.; 13-5 knots; quadruple-expansion engines.
The Harrison liner *Astronomer* was taken over by the Admiralty during the Second World War for service as an auxiliary. The special duty of the ship was that of a boom-carrier, and on June 1st, 1940, she was sunk by a submarine about 75 miles due N. of Kinnaird Head. Four of the crew and a number of naval ratings lost their lives.

ASTURIAS

Royal Mail Steam Packet Co.; 1908; Harland & Wolff; 12,002 tons; 520x62-3x31-8; 924n.h.p.; 16-5 knots; quadruple-expansion engines.
The R.M.S.P.Co.'s liner *Asturias* was taken over by the Admiralty during the First World War for service as a hospital ship. In March, 1917, she returned with wounded from Salonika, and disembarked them safely at Avonmouth. On the night of the 20th, when continuing her voyage up Channel with all lights burning and the red crosses on her sides clearly visible, she was torpedoed by a German submarine 6 miles off Start Point. The number of persons on board at the time was 206, of whom 49 were nurses. The explosion killed several men outright and there were subsequent deaths amounting to 45, of which number 29 were crew.
The *Asturias* was eventually run ashore at Bolt Head and was refloated some time afterwards and again placed in service.

ASUKAMARU

Nippon Yusen K.K.; 1924; D. & W. Henderson & Co.; 7,523 tons; 440-4x57x38-5; 1,111 n.h.p.; oilengines.
The motor vessel *Asuka Mam* was torpedoed and sunk by the U.S. submarine *Seawolf* on January 10th, 1944, E. of Formosa.

ASUKAZAN MARU

Mitsui Sempaku; 6,886 tons.
The steamship *Asukazan Mam* was torpedoed and sunk by the U.S. submarine *Tang* on July 4th, 1944, W. of Mokpo, Korea.

ASUNCION

Hamburg-Sud-Amerik. Dampfschiffahrts Ges.; 1921; Deutsche Werft A.G.; 4,626 tons; 414-4x50-3x26-9; 438 n.h.p.; triple-expansion & L.P. turbine engines.
The German ship *Asuncion* struck a mine and sank on May 23rd, 1942, N. of Tromso.

ATACAMA

Pacific Steam Nav. Co.; 1870; J. Elder & Co.; 1,822 tons; 290 x 38-3x22-8; 300 h.p.; compound inverted engines. The steamship *Atacama* was lost 22 miles S. of Caldera, Chile, about the end of November, 1877. Of those on board it was estimated that 104 were drowned.

ATACAMA

S. Wakeham & Son; 1890; R. & J. Evans & Co.; 1,147 tons; 224x34-5x20-1.
The Liverpool barque *Atacama* was bound from Newcastle, N.S.W., to San Francisco with a general cargo and a crew of 18. On February 9th, 1898, in very rough weather she foundered in the Tasman Sea. The crew took to the boats, one of which with 5 men was picked up. The rest of the crew were never heard of again.

ATAGO

Japanese Navy, heavy cruiser; 1930; Kure; 9,850 tons; 650 x 62-3x16-5; 100,000 s.h.p.; 33 knots; turbine engines; Kanpon boilers; ten 8 in. guns, four 4-7 in., eight 47 mm., 4 m.g. 8 T.T.
The Japanese heavy cruisers *Atago* and *Maya*, sister ships of 9,850 tons, formed part of the Japanese "Central Force" at the battle of Leyte Gulf, October 23rd-26th, 1944, consisting of five battleships, 11 cruisers of various types and 15 destroyers. In the early hours of the 23rd, the day prior to the main action, when steaming through the Palawan Passage in the Philippines both ships

were torpedoed and sunk by U.S. submarines. The *Atago* was sunk by the *Darter* and the *Maya* by the *Dace*, four torpedo hits being scored on each ship. A third heavy cruiser was disabled by torpedo hits. For full story of the battle see under the battleship *Musashi*.

ATAGO MARU

Nippon Yusen K.K.; 1924; Lithgows; 7,543 tons; 440x57-2x 35-8; 997 n.h.p.; oilengines.
The motor vessel *Atago Mam* was bombed and sunk by U.S. land-based aircraft on November 28th, 1944, off Miri, Sarawak.

ATAKA MARU

Teikoku Sempaku; 5,248 tons.
The steamship *Ataka Mam* was torpedoed and sunk by the U.S. submarine *Paddle* on August 23rd, 1943, off Katsuura, Japan.

ATALAIA

LloydBrasileiro; 1910; Bremer Vulkan; 5,555 tons; 419-7x 54-5x28; 388n.h.p.; quadruple-expansion engines.
On a voyage from Lourenco Marques to Buenos Aires the *Atalaia* radioed on May 25th, 1941, that she had lost a rudder and was in distress in a storm in 39° 55' N., 2° W. The last S.O.S. was received at 3.34 p.m.

ATALANTA

British Navy, training frigate (sail); 1844; British Isles; 923 tons; 131x40-2x10-8; 26guns.
The sailing frigate *Atalanta* was converted into a training ship for young seamen after the loss of the *Eurydice* (which see) and like that ill-fated vessel was sunk on the return voyage from the West Indies. On November 7th, 1879, she left Portsmouth under command of Capt. Francis Stirling, having a complement of 15 officers and 265 men and boys. It was the *Atalanta's* third voyage in the capacity of a training ship and early in the cruise yellow fever broke out and the captain decided to run for Bermuda, where he arrived on January 29th, 1880. Two days later the ship sailed for home, having considerably shortened her timetable which originally provided for her arrival on, or about, April 4th, 1880.

From the date of her leaving Bermuda, January 31st, 1880, the *Atalanta* was never heard of again. A terrific gale raged from the 12th to the 16th of February and it is possible that the vessel was overwhelmed by this. The Channel Squadron under Admiral Hood made an exhaustive search over a wide area but without result, and in May the Admiralty was compelled to conclude that the *Atalanta* was lost.

The *Atalanta* belonged to a class of frigates which were the broadest ships, in proportion to their length, ever built for the navy. They were considered by expert naval opinion to be very safe vessels, which made the loss of the *Atalanta* all the more inexplicable.

ATALANTA

N.Hill; 1885; R. Duncan & Co.; 1,753 tons; 265-1x39-7x 23-4.
The iron sailing ship *Atalanta* was wrecked off Newport, Oregon, on November 18th, 1898. Twenty-eight of the crew were drowned.

ATHABASKAN

Canadian Navy, destroyer; 1941; Halifax, N.S.; 2,000 tons; 355-5x37-5x9-5; 44,000s.h.p.; 36-5 knots; turbine engines; 3-drum boilers; six 4• 7 in. guns, two 4 in.A.A., ten 20 mm., 4 T.T.
The Canadian destroyers *Athabaskan* and *Haida* encountered a German force of two destroyers N.W. of Brest on April 29th, 1944. A sharp engagement ensued during which one German destroyer, the T-26, was set on fire and forced to run ashore. The *Athabaskan* was hit by gunfire and also torpedoed. She sank with about half her complement of 240. Most of the survivors were picked up by the Germans and became prisoners of war.

ATHELBEACH

United Molasses Co.; 1931; Cammell, Laird & Co.; 6,568 tons; 426-1x55-9x32-2; 489n.h.p.; 11 knots; oilengines. The tanker *Athelbeach*, Capt. M. McIntyre, was torpedoed and sunk by a German submarine on March 7th, 1941, about 200 miles S.W. of the Faroe Islands. Capt. McIntyre and six men were killed.

ATHELCREST

ATHELCREST

United Molasses Co.; 1940; Sir J. Laing & Sons; 6,825 tons; 426-3x59-3x34-3; 256 n.h.p.; 11 knots; oilengines.
The tanker *Athelcrest*, Capt. V. J. Evans, was torpedoed by a German submarine on August 25th, 1940, at a position about 170 miles W. of the island of Lewis in the Hebrides. Thirty men were killed. Capt. Evans was among the survivors. The ship was later sunk by gunfire.

ATHELCROWN

United Molasses Co.; 1929; Furness Shipbuilding Co.; 11,999 tons; 526-2x68-8x38-9; 945 n.h.p.; 12 knots; oilengines.
The tanker *Athelcrown*, Capt. I. Burkill, was torpedoed and sunk by a submarine in the North Atlantic on January 22nd, 1942. Six men were killed. Capt. Burkill was among the survivors.

ATHELDUCHESS

United Molasses Co.; 1929; W. Hamilton & Co.; 8,940 tons; 475x63-3x35; 709 n.h.p.; oilengines.
The tanker *Athelduchess* was wrecked on August 20th, 1943, on Southern Rocks, The Smalls. She broke in two. The after part was salvaged and joined to a new fore-part in December, 1947.

ATHELEMPRESS

AthelLine; 1930; W. Hamilton & Co.; 8,941 tons; 475 x63-3 x 35; 709 n.h.p.; oilengines.
The motor tanker *Athelempress* was torpedoed and shelled on April 29th, 1942. She sank in 13° 21' N., 56° 15' W.

ATHELFOAM

AthelLine; 1931; Cammell Laird & Co.; 6,554 tons; 426-lx 55-9x32-2; 476n.h.p.; oilengines.
The tanker *Athelfoam*, on a voyage from Liverpool to Pastelillo, in ballast, was intercepted by the German raider *Scharnhorst* on March 15th, 1941, and sunk by gunfire about 500 miles S.E. of Cape Race.

ATHELKING

AthelLine; 1926; Swan, Hunter & Wigham Richardson; 9,557 tons; 474-9x64-4x36-5; 709n.h.p.; oilengines.
The motor tanker *Athelking* was intercepted by a German raider on September 9th, 1940, and sunk by gunfire. Four were killed.

ATHELNIGHT

AthelLine; 1930; R. Duncan & Co.; 8,940 tons; 475x63-9x35; 709n.h.p.; oilengines.
The motor tanker *Athelknight*, Capt. Roberts, was torpedoed and shelled by a German submarine on May 26th, 1942, in 26° N., 46° W., and sank on the following day. Five gunners were killed.

ATHELSULTAN

United Molasses Co.; 1929; W. Hamilton & Co.; 8,882 tons; 475x63-3x35; 710 n.h.p.; 11 knots; oilengines.
The tanker *Athelsultan*, Capt. J. D. Donovan, was torpedoed and sunk by a submarine in the North Atlantic on September 22nd, 1942. Thirty-seven crew, 7 gunners, the convoy commodore and 5 of his staff were lost. Capt. Donovan, who later in the war was awarded the O.B.E. and the Lloyd's Medal, was among the survivors.

ATHELEMPLAR

AthelLine; 1930; Lithgows; 8,992 tons; 475x63-3x35; 709 n.h.p.; oilengines.
The motor tanker *Atheltemplar* on a voyage from Reykjavik to North Russia with 9,400 tons of fuel oil was torpedoed and set on fire by a German submarine on September 14th, 1942, N.W. of Jan Mayen Island, and sank some time later, still burning. Three lives were lost.

ATHELVIKING

AthelLine; 1926; Furness S.B. Co.; 8,779 tons; 471-2x62-4x 35-3; 709n.h.p.; oilengines.
The motor tanker *Athelviking* was torpedoed and sunk by a submarine on January 14th, 1945, between Boston and Halifax. Four lives were lost.

ATHENA

W. Lowden & Co.; 1899; Short Bros.; 3,427 tons; 352- 6x45-1 x 18 • 7; 313 n.h.p.; triple-expansion engines.
The steamship *Athena*, Capt. Jones, was wrecked off Campana Island, Patagonia, on, or about, March 22nd, 1902. Of those on board Capt. Jones and 16 others were drowned.

ATHENE

A/S Athene (Jorgen Bang); 1928; Armstrong Whitworth & Co.; 4,681 tons; 345-6x53-5x27-8; 580 n.h.p.; oil engines.
The motor vessel *Athene* was torpedoed and sunk by a German submarine on June 10th, 1942, off Alexandria. Twelve crew and a gunner were killed.

ATHENIA

Donaldson Line; 1904; Vickers Sons & Maxim; 8,668 tons; 478x56x32-5; 855n.h.p.; 12-5 knots; triple-expansion engines.
The Donaldson liner *Athenia* was torpedoed and sunk by a German submarine seven miles N. of Inishtrahull Island, off Co. Donegal, on August 16th, 1917. Fifteen persons lost their lives. The captain was among the survivors.

ATHENIA

Donaldson Atlantic Line; 1923; Fair field Co.; 13,581 tons; 526-3x66-4x38-1; 15-5 knots; turbine engines.
The liner *Athenia* left Glasgow on Friday, September 1st, 1939, at about noon, for Montreal. The ship called at Liverpool and Belfast to embark passengers and on the evening of the 3rd was some 250 miles W. of Inishtrahull, Donegal, when she was torpedoed by a German submarine. War with Germany had broken out only a few hours before.

The number of persons on board the *Athenia* was 1,418, of whom 1,103 were passengers, 311 of this number being American citizens. The ship, which was under command of Capt. James Cook, was torpedoed at 7.45 p.m., being struck on the port side abaft the engine-room. Shortly after the explosion of the torpedo the submarine broke surface at from 800 to 1,000 yards distance and fired two shells at the ship's wireless gear. Many people had been killed by the explosion of the torpedo and it was at once realised that the ship would sink. The boat accommodation was for 1,830 persons, and was ample for those on board at the time, but the ship began to list, making the task of launching extremely difficult. One boat, crowded with people, fell from the davits and threw all its occupants into the sea. Another capsized some time later and a third ran foul of the screw of a Norwegian steamship when coming alongside. These accidents considerably increased the death-roll and when, after some days, all the survivors had been landed it was announced by the Donaldson Line that 128 persons had lost their lives.

In reply to the German Government's propaganda about the sinking, and denial of responsibility, the British Government announced that certain assurances, including the following, had been conveyed to the United States Government:—

1. The s.s. *Athenia* carried no bullion or securities, and no guns, munitions of war, or explosives, either as cargo or stores.
2. She was not sunk either by contact with a British mine, by a British submarine, by gunfire of British destroyers, or by an internal explosion, but, in accordance with the evidence in the possession of H.M. Government, by a submarine.
3. She was neither armed nor stiffened to receive armament of any kind.
4. It was not intended to use the vessel as an armed raider, armed merchant cruiser, or in any other offensive capacity at the end of the voyage on which she was sunk.

ATHENIC

Sir Walter H. Cockerline; 1937; W. Gray & Co.; 5,351 tons; 413-3x57x27; 400n.h.p.; triple-expansion engines.
The cargo ship *Athenic* was torpedoed and sunk by a submarine on April 4th, 1941, in the North Atlantic.

ATHENS

Union Line; 1856; W. Denny & Bros.; 739 tons; 224-6x30-lx 16-5; 130h.p.; 11 knots; steam engines.
The *Athens* was purchased by the Union S.S. Co. from the Liverpool firm of Schillizzi in 1858. For six years she ran regularly as a mail

steamship between Southampton and the Cape. On Tuesday, May 16th, 1865, the vessel was lying in the roadstead at Table Bay. The weather was terrible and several sailing ships had already been blown ashore. During the day the gale increased and towards the evening the *Athens*, which could be plainly discerned by those on shore, was observed to have parted her cables and was endeavouring to make open sea.

The vessel managed to round Mouille Point, but was repeatedly swept by mountainous waves which eventually extinguished her boiler fires. She now became helpless and was driven on to the rocks between Mouille Point and Green Point. Although she was only a short distance from those who lined the shore it was not possible to render any aid, except to light flares for the guidance of any boats or swimmers, but none came. By morning it was apparent that the *Athens* had foundered with every person on board. The total number lost was 29, including her commander, Capt. Smith.

It was established that there was no rocket-apparatus at the lighthouse at Mouille Point, nor were there such necessary things as ropes and lanterns. Except for the flares all efforts at rescue had to be carried out in pitch darkness.

ATHINALWANOS

N.G.Livanos; 1936; *W. Gray & Co.*; 4,824 tons; 419-2x 56-7x25-3; 460 n.h.p.; triple-expansion engines. The Greek cargo ship *Athina Livanos* was torpedoed and sunk by a German submarine on November 29th, 1943, in the Gulf of Aden. Nine of her crew and two passengers were lost.

ATHOS

Messageries Maritimes; 1914; *Ateliers & Chantiers de France*; 12,644 tons; 513-4x61-8x41-8; 904 n.h.p.; triple-expansion engines.

The French liner *Athos* was torpedoed and sunk by a German submarine on February 17th, 1917, in the Mediterranean.

ATHOS

A/S Martens & Co.; 1913; *Nylands Vcerksted*; 1,708 tons; 264-9x40-2x18-6; 236 n.h.p.; triple-expansion engines. The Norwegian steamship *Athos* was torpedoed and sunk by a German submarine on January 26th, 1918, in the North Sea.

ATIET ROHOMAN

Bebee of Cannanore; 1840 (circa); 500 tons (approx.). The Indian sailing ship *Atiet Rohoman*, owned by the Bebee of Cannanore, was officered and manned by a crew of 75 Lascars. In June, 1851, she was bringing between three and four hundred pilgrims from Jeddah to Bombay, together with a cargo of coffee, salt and treasure. On the night of the 10th, she was off the island of Kenery, near Bombay, and sighted the lighthouse just before sunset. She made signals to the shore which were answered by the outer lightship, but when darkness fell she was overtaken by a succession of squalls, and being in shallow water the captain let go his anchors. During the night the ship lost her rudder and later her cables parted and she drove ashore on the island. Her bottom fell out and all her boats were smashed.

At daylight the wreck was seen to be lying close alongside the wall of the fort to which many of the passengers managed to scramble, though many lost their lives in the attempt. Later the steamer *Medusa*, Lt. King, towing two pilot boats, came on the scene and rescued the survivors. The total number drowned was 175, chiefly pilgrims. Half a lakh of rupees was recovered from the wreck.

ATLAND

Angfartygs Ajb Tirfing; 1910; *W. Doxford & Sons*; 5,203 tons; 388-9x52-4x26-1; 320 n.h.p.; triple-expansion engines.

The Swedish ship *Atland* collided with the s.s. *Carso* on March 25th, 1943, and sank off Peterhead. Nineteen lives were lost.

ATLANTA

United States Navy; anti-aircraft cruiser; 1941; *Federal Ship-building Co.*; 6,000 tons; 541X 52 X —; 38 knots; turbine engines; twelve 5 in. guns, 12 smaller; 6 T.T., 2 aircraft.

On the morning of November 12th, 1942, U.S. reconnaissance aeroplanes off the island of Guadalcanal in the Solomons Group reported a strong Japanese naval force approaching. To meet this

threat the Americans had the following vessels under command of Rear-Admiral D. J. Callaghan in the *San Francisco*. Cruisers:—

San Francisco (flagship) 9,050 tons 9—8 in. guns

Portland 9,800 " " " " " "

Helena 10,000 " " 15—6 in. "

Atlanta (flagship) 6,000 " 12—5 in. "

Juneau 6,000 " " " " "

Destroyers:—

Fletcher 2,100 tons 8—5 in guns

O'Bannon " " " " " "

Aaron Ward 1,700 " " 4 " " 10 T.T

Barton " " " " " "

Laffey " " " " " "

Monssen 1,630 " 5 " " " "

Sterrett 1,500 " 4 " " " 16 "

Cushing 1,465 " 5 " " " 12 "

The object of this force was to cover the withdrawal of the transports and merchantmen landing troops and supplies, and to fight a delaying action in order to afford time for Rear-Admiral W. A. Lee to intercept the Japanese with his heavy squadron, consisting of the battleships *Washington* and *South Dakota*, 35,000 tons, nine 16 in. guns apiece, and the aircraft carrier *Enterprise*, 19,900 tons. The transports and merchantmen were convoyed by three destroyers and covered by the squadron under Rear-Admiral Callaghan and got clear of the area without loss. The squadron then put about and steamed in single column with four destroyers leading, followed by the five cruisers with the remaining four destroyers in the rear. When steaming in this formation through the Lengo Channel at just before midnight, it being very dark, the squadron ran into the Japanese. The rival forces were very close and for 25 minutes there was a terrific exchange of salvos and ships on both sides were destroyed very quickly. The *San Francisco* sank a destroyer within a few minutes of making contact. The *Atlanta* kept up a punishing fire but was hit by a torpedo which jammed the rudder and caused her to circle helplessly under a hail of shell which killed Admiral Scott and many others. The ship then caught fire and burned until morning when she was sunk by ships in company, as she was still out of control.

The Japanese squadron, part of a much larger force employed, consisted of the battleships *Hiei* and *Kirishima*, both of 29,330 tons, eight 14 in. guns, six cruisers and about a dozen destroyers. The *San Francisco* engaged one of the battleships but was hit by a salvo which smashed her bridge, killing Admiral Callaghan and Capt. C. Young, her commander, and many officers and ratings. The destroyers *Barton* and *Laffey* were sunk and every American cruiser was more or less badly damaged. Only two destroyers came through the first action unscathed.

The Japanese losses amounted to two destroyers, the *Akatsuki*, 1,700 tons, and the *Yudachi*, 1,368 tons. The action was continued next day but was of a more desultory nature, both sides having been too badly knocked about to sustain such intensive fighting. On this day, the 13th, the destroyers *Monssen* and *Gushing* could no longer be kept afloat and sank in the forenoon. The anti-aircraft cruiser *Juneau* was torpedoed by a submarine and also sank during the morning. The Japanese battleship *Hiei* had been torpedoed in the night fighting and was located by aircraft from the *Enterprise* in a disabled state and steaming at about five knots. She was hit many times by bombs and aerial torpedoes and eventually sank.

Meanwhile the second force under Admiral Lee was making every effort to reach the scene of the action, but it was not until the evening of the 14th that it managed to do so, though aircraft from the *Enterprise* had already been active. In addition to the Japanese warships a fleet of transports, convoyed for the purpose of reinforcing Guadalcanal, was located by American planes during daylight on the 14th. It was subjected to heavy bombing and six of the transports were sunk. This fleet now became the object of Admiral Lee's squadron, which was escorted by the destroyers *Benham*, *Gwin*, *Preston* and *Walke*.

Contact with the covering Japanese warships was made early on the morning of the 15th, N. of Savo Island. The big American battleships immediately opened fire and the battleship *Kirishima* was hit and blown up, but not before she had inflicted some damage on the *South Dakota*. The American destroyers then attacked a mixed force of cruisers and destroyers, but with unfortunate results. The

ATLANTIC

Preston was sunk by gunfire and the *Benham* and *Walke* were both sunk by torpedoes, though they remained afloat in a helpless state for some time. The Japanese destroyer *Ayanami*, 1,700 tons, was their only loss in this sharp action between the light forces.

The Japanese heavy cruiser *Kinugasa*, 7,100 tons, six 8 in. guns, came out of the action with little damage but was sunk by bombs and aerial torpedoes from aircraft from the *Enterprise*, thus bringing the total Japanese loss to two battleships, one cruiser and three destroyers. The American loss was two cruisers and seven destroyers.

See also under the Japanese battleship *Kirishima*.

ATLANTIC

White Star Line; 1871; *Harland & Wolff*; 3,707 tons; 420 X 41x32; 600n.h.p.; 14 knots; compound engines.

The *Atlantic* and her sister ships the *Adriatic*, *Baltic*, *Celtic* and *Republic*, were the vessels with which the famous White Star Line began its career. The *Atlantic* was a ship of 3,707 tons, with a speed of 14 knots, and in the 1870's she was regarded as a crack liner. On March 20th, 1873, she left Liverpool with 931 persons all told, most of the passengers being of the emigrant class. She was an extremely full ship, and being very narrow, although fast for those days, she was liable to roll badly in rough weather, as her hundreds of passengers were soon to discover.

From the commencement of the voyage the vessel met a head gale, which continued all the way across the Atlantic. So bad did it become that ultimately the commander, Capt. J. A. Williams, decided to alter course for Halifax, N.S. The ship was now many days out and on her altered course was approaching a very dangerous coast. What was not realised by the captain and officers was that they were considerably out in their reckoning.

At about 3 o'clock on the morning of April 1st, in pitch darkness, the vessel running at the full power of her engines crashed upon the rocks off Meagher Island, near Halifax, N.S. The position in which the *Atlantic* had been wrecked exposed her to the fury of the seas on both port and starboard sides and her boats were torn from their lashings and smashed to pieces. She had a list to starboard, and as the seas pounded her the plates along that side burst open. The fore-boom broke loose and swung to and fro across the deck, striking down all within reach.

With all her boats smashed, her standing gear everywhere breaking loose, and swept by enormous seas the plight of the *Atlantic* was almost beyond hope. Capt. Williams, who maintained great calm and presence of mind, instructed the passengers to climb the rigging out of reach of the waves. Once there, it became a question of holding on or succumbing to the intense cold.

The third officer, Mr. Brady, and two seamen swam to a rock about 150 yards distant with a line, which they managed to secure. Eventually five lines in all were connected with the rock, and a succession of people were hauled to safety. The cold and exhausted condition of the others made the journey too difficult and they were swept away.

At daybreak the islanders, with the few boats they could muster, came to the rescue and brought the survivors to shore. In all 560 persons lost their lives, and there were 371 saved, including Capt. Williams.

ATLANTIC GULF

Wallem & Co.; 1919; *American S.B. Co.*; 2,639 tons; 251 x 43-6x26-1; 352 n.h.p.; triple-expansion engines.

The Panamanian ship *Atlantic Gulf*, Capt. Sverre Urvik, was torpedoed and sunk by a submarine on June 5th, 1942, in Mozambique Channel. Survivors were landed at Lourenço Marques.

ATLANTIC MARU

Kokusai Kisen K.K.; 1920; *Kawasaki Dockyard Co.*; 5,873 tons; 385 X 51 X 36; 440 n.h.p.; triple-expansion engines.

The steamship *Atlantic Maru* was torpedoed and sunk by the U.S. submarine *Picuda* on March 30th, 1944, off the Ladrone Islands.

ATLANTIC SUN

Sun Oil Co.; 1941; *Sun S.B. & D.D. Co.*; 11,355 tons; 524-6X 70-2x39-7; 1,590n.h.p.; 11 knots; oil engines.

The motor tanker *Atlantic Sun*, Capt. William B. Longtin, was sailing in convoy in the Atlantic on February 17th, 1943, when she was torpedoed and sunk by an enemy submarine. One man was

taken prisoner by the submarine. He was the only survivor of the crew of 46,19 gunners and one passenger.

ATLANTICOS

Kulukundis Shipping Co. S.A.; 1919; *J. Coughlan & Sons*; 5,446 tons; 410-5x54-1x27-5; 510 n.h.p.; triple-expansion engines.

The Greek steamship *Atlanticos* struck a mine in Barrow Deep on February 21st, 1942, broke in two and sank.

ATLANIS

A/S Svolder; 1906; *Nylands Varksted*; 1,171 tons; 225 -1 x 33-7x19; 121 n.h.p.; triple-expansion engines. The Norwegian steamship *Atlantis* was torpedoed and sunk by a German submarine on October 3rd, 1918, in the English Channel.

ATLANIS

German Navy, auxiliary cruiser; 1937; *Bremer Vulkan*; 7,862 tons; 486x61x31; 1,830 n.h.p.; 18 knots; diesel engines; six

5-9 in. guns, 7 smaller; 4 T.T., 93 mines, 2 aircraft. The German commerce raider *Atlantis*, Capt. B. Rogge, was formerly the *Goldenfels* of the Hansa Line. She was a fast cargo ship, admirably suited for the purpose to which she was converted. On March 31st, 1940, she left Germany with a complement of 347 officers and ratings, many of whom were to serve as prize crews on the vessels she expected to capture. For a year and nine months she preyed on Allied shipping, sinking 22 merchantmen totalling 135,697 tons. Her operations extended over the Atlantic, Indian and Pacific Oceans and she was, for a time, a supply-ship to U-boats.

It was on the morning of November 22nd, 1941, when engaged in re-fuelling the U-126, about 500 miles S.E. of the St. Paul Rocks, that she was sighted by an aircraft from the heavy cruiser *Devonshire*, 9,850 tons, eight 8 in. guns, Capt. R. D. Oliver. The Germans signalled to the aircraft that their ship was the British s.s. *Polyphemus*. Meanwhile the submarine had cut the fuelling-hose and had dived immediately, leaving her captain and a few others on board the *Atlantis*.

Capt. Oliver was suspicious of the ship's identity, but forbore to fire until he was reassured by Admiral Willis, C.-in-C., South Atlantic, at Freetown, that she was not what she claimed to be. On receipt of this information he opened fire, sending several salvos into the raider, which tried to take avoiding action but failed. Finally she was hit in the magazine and blew up, but not before her crew had taken to the boats.

The *Devonshire's* aircraft had discovered the presence of the submarine, hence Capt. Oliver took his ship away as soon as the action, which was very short, terminated. The U-126 arrived in time to take the boats in tow, and also to take about 100 officers and men on board. The German Admiralty also radioed to the supply ship *Python* and to three submarines in the area, and so well was the rescue operation organised that only seven men were missing.

The *Atlantis* had been known to the British Admiralty as "Raider C.". During her lengthy cruise she captured the following vessels:—

<i>Scientist</i> ...	6,200 tons	British	3 May '40
<i>Tirrana</i> ...	7,230	Norwegian	10 June '40
(which see)			
<i>City of Bagdad</i> ...	7,506	British	11 July '40
<i>Kenmendale</i>	7,769	British	13 July '40
<i>Tallyrand</i>	6,731	Norwegian	13 July '40
<i>King City</i>	4,744	British	25 Aug. '40

<i>Tottenham</i>	4,650	British	17 June '41
<i>Balzac</i>	5,372	British	22 June '41
<i>Silvaplana</i>	4,793	Norwegian	10 Sept. '41

ATLAS

Soc. Anon. Hellenique Maritime "Transpetrol"; 1909; R. Craggs & Sons; 4,009 tons; 345x48x28-5; 326n.h.p.; triple-expansion engines.

The Greek tanker *Atlas* was torpedoed and sunk by an enemy submarine on September 6th, 1940, in the Red Sea. She had a full cargo of oil.

ATLAS

Socony-Vacuum Oil Co. Inc.; 1916; W. Cramp & Sons S. & E.B. Co.; 7,137 tons; 430x58-2x33-3; 565n.h.p.; triple-expansion engines.

The American tanker *Atlas* was torpedoed and sunk on April 9th, 1942, on a voyage from Houston to New York.

ATLAS

DampfschiffahrtsGes. Neptun; 1927; Act. Ges. "Weser"; 2,297 tons; 287x46x23-2; ISON.h.p.; triple-expansion engines.

The German steamship *Atlas* was torpedoed and sunk by a British submarine on April 13th, 1942, in the Gulf of Sidra, Libya

ATLAS

J. Beck; 1938; Sanders; 335 tons; 130-4x24-1x8-3; oil engines.

The small Dutch coaster *Atlas* was bound from Hayle to Newport on October 10th, 1942. When in the Bristol Channel she struck the rocks off Lundy Island and sank with eight of her crew.

ATLASMARU

Osaka Shosen K.K.; 1920; Mitsubishi Zosen Kaisha; 1,347 tons; 420X56x38-5; 574 n.h.p.; triple-expansion engines.
The steamship *Atlas Mam* was torpedoed and sunk by the U.S. submarine *Pomfret* on November 2nd, 1944, about 100 miles N. of Luzon Island.

ATLE

Angf.AIBThule; 1901; W. Harkess & Son; 1,183 tons; 225 x 34-2x17-7; 131 n.h.p.; triple-expansion engines.

The Swedish steamship *Atle* struck a mine and sank on November 8th, 1914, in the North Sea.

ATOS

A. Borjesson; 1902; Helsingors Jernsk. & Msk.; 2,161 tons; 291-6x42-6x19-1; 270n.h.p.; triple-expansion engines.

The Swedish steamship *Atos* was torpedoed by a German submarine on August 3rd, 1940, and sank some time afterwards, in the North Sea.

ATSUTA MARU

Nippon Yusen K.K.; 1909; Mitsubishi; 7,983 tons; 459-9x 55-8x34-5; 973 n.h.p.; 16 knots; triple-expansion engines.

The Japanese transport *Atsuta* (or *Atutd*) *Mam* was torpedoed and sunk by the U.S. submarine *Pompano*. The attack took place in the East China Sea on May 30th, 1942.

ATSUTAMARU

Nipponkai Risen K.K.; 2,750 tons.

The steamship *Atsuta Maru* was bombed and sunk by U.S. land-based aircraft on November 12th, 1944, off Palawan Island, Philippines.

ATSUTASAN MARU

Mitsui Bussan Kaisha; 1937; Tama Zosenho K.K.; 8,663 tons; 451-1x62x39-5; 1,230 n.h.p.; oil engines.

The motor vessel *Atsutasan* (or *Autasari*) *Maru* was sunk by the U.S. submarine *Swordfish* on December 16th, 1941, south of Hainan.

ATTACK

British Navy, destroyer; Yarrow; 785 tons; 252-2x26-3x9-2; 15,500i.h.p.; 29 knots; turbine engines; Yarrow boilers; two 4in. guns, two 12pdr., one 3pdr. A.A., 1 m.g., 2 T.T.

The destroyer *Attack* was torpedoed and sunk by a German submarine off Alexandria on December 30th, 1917. Her official complement was 72, but it is probable that a larger number than this was on board at the time of her loss.

ATTIKI

Hellenic Mediterranean Lines Co.; 1896; A. Stephen & Sons; 2,561 tons; 281-5x39x14-7; 345 n.h.p.; triple-expansion engines.

The Greek passenger ship *Attiki* was being used as a hospital ship when she was bombed by German aircraft and sunk on April 11th 1941, off Karystos. Twenty-eight lives were lost.

ATTILIO DEFFENU

"Tirrenia" Soc. Anon. di Nav.; 1929; Soc. Anon. Ansaldo; 3,510 tons; 324x43-8x21-4; 1,170n.h.p.; oil engines.

The motor vessel *Attilio Deffenu* was torpedoed and sunk by a British submarine on November 25th, 1941, near Brindisi.

ATTUALITA

Soc. Anon. Lloyd del Pacifico; 1900; J. L. Thompson & Sons; 4,791 tons; 390x49-9x20; 431 n.h.p.; triple-expansion engines.

The Italian steamship *Attualita* was torpedoed and sunk by a submarine on December 20th, 1917, in the Mediterranean.

ATXERI-MENDI

Compania Naviera Sola y Aznar; 1899; W. Gray & Co.; 2,424 tons; 290-5x42-2x18; 246 n.h.p.; triple-expansion engines.

The Spanish steamship *Atxeri-Mendi* was torpedoed and sunk by a German submarine on August 29th, 1918, in the St. Georges Channel.

AUCKLAND

British Navy, sloop; 1938; W. Denny & Bros.; 1,200 tons; 276 x 27-5x8-3; 3,600s.h.p.; 19-25 knots; turbine engines; 3-drum boilers; eight 4 in. guns, 5 smaller.

The sloop *Auckland*, Cdr. M. S. Thomas, D.S.O., was engaged in the operations of the Eastern Mediterranean Fleet along the coast of Libya. On June 24th, 1941, the vessel was attacked by aircraft when off Tobruk. The *Auckland* sank with the loss of one officer and 36 ratings killed or drowned.

AUCKLAND CASTLE

Auckland Castle Steamship Co. (Mordev, Jones & Co.); 1883; S. P. Austin & Son; 1,084 tons; 225x32-1x16; 99r.h.p.; 9 knots; compound engines.

The steamship *Auckland Castle* was torpedoed and sunk by a German submarine five miles E. by S.£ S. of the Farn Islands on August 24th, 1918. The captain and 11 men were killed.

AUCKLAND STAR

Blue Star Line; 1939; Harland & Wolff; 13,212 tons; 535-Sx 70-4x32-1; 2,463 n.h.p.; 16 knots; oil engines.

The liner *Auckland Star*, Capt. D. R. Macfarlane, was torpedoed and sunk by a German submarine on July 28th, 1940, about 100 miles due W. of Dunmore Head, Co. Kerry. There were no casualties among passengers or crew.

AUDACE

Italian Navy, torpedo boat; 1915; Yarrow; 629 tons; 283 X 27-5x9-5; 22,000s.h.p.; 31 knots; turbine engines; Yarrow boilers; seven 4 in. guns, two 40 mm., 4 m.g., 4 T.T.

The Italian torpedo boat *Audace* was originally the Japanese *Kawaze* and was purchased from Japan after the First World War. On the night of November 1st/2nd, 1944, when off Pag Island, between Fiume and Zara, she was on patrol accompanied by the corvettes *Melpomene* and *Spingarna*, both of 565 tons, armed with two 3-9 in. guns apiece. All were manned by German crews and the two latter vessels were at first mistaken for destroyers. They were sighted at a range of two miles by the British destroyers *Wheatland* and *Avon Vale*, both of 1,025 tons, six 4 in. guns, which engaged the two corvettes with a rapid and well-directed fire which overwhelmed them in the first ten minutes. The British destroyers then turned in chase of the *Audace*, which the Germans had renamed the TA-20. She endeavoured to escape under the cover of a smoke-screen, but this proved ineffective and she was overhauled and sunk within half-an-hour. Shortly afterwards both corvettes sank.

A number of survivors was picked up from the three vessels, whose normal complement ran to about 100 apiece. On the British side there were no casualties and only superficial damage to the ships.

AUDACIOUS

AUDACIOUS

British Navy, dreadnought battleship; 1913; Cammell, Laird; 23,000 tons; 596x89x27-5; 31,000 i.h.p.; 22-4 knots; turbine engines; Yarrow boilers; ten 13-5 in. guns, sixteen 4 in., four 3pdr., 3 T.T.

The battleship *Audacious* was the first capital ship of any nation to become a casualty in the First World War. She was a unit of the 2nd Battle Squadron and was commanded by Capt. C. F. Dampier. On the morning of October 27th, 1914, when steaming in line ahead some 20 miles N. E. from Tory Island, Northern Ireland, preparatory to engaging in squadron target practice, the *Audacious* struck a mine. The damaged battleship, which had been struck on the port side aft, managed to keep afloat and made for Lough Swilly under her own steam. The sea was very rough and later the *Audacious* became quite unmanageable. In this plight she was approached by the White Star liner, *Olympic*, 46,359 tons, and taken in tow. The towline parted and another attempt was made, this time by the collier, *Thornhill*, but with the same result. Later the battleship *Exmouth* arrived on the scene, but too late to be of any assistance as the stem of the *Audacious* was awash and her crew were being taken off by the *Olympic*. At 9 p.m., after 12 hours of buffeting by the seas the battleship blew up and sank. Everyone of her complement of 900 officers and men was taken off in safety.

It was afterwards discovered that the mines had been laid by the Norddeutscher Lloyd liner *Berlin*, which had been fitted out as an auxiliary cruiser and minelayer early in August.

AUDACITY

British Navy, auxiliary aircraft carrier; 1936; Bremer Vulkan; 5,537 tons; 428x56x23; 5,200 h.p.; 15 knots; oil engines.

The auxiliary aircraft carrier *Audacity*, Cdr. D. W. Mackendrick, was formerly the Norddeutscher Lloyd liner *Hannover* which had been captured in March, 1940. The vessel carried a number of Hurricane fighters which were flown off the deck by means of a catapult. In December, 1941, the ship was escorting a convoy of over 30 merchantmen across the Atlantic, the commodore being Vice-Admiral Raymond Fitzmaurice, D.S.C. On the 17th, when nearing British waters, the convoy was attacked by a German submarine pack, three of which were afterwards identified as the U-131, U-434 and U-574. The escort at once went into action and the U-131 was disabled to such an extent that she was compelled to surface in order to permit her company to escape. She was sunk by gunfire and a number of survivors were picked up. This attack was followed by a raid by two Focke-Wulf bombers which were driven off. On the 18th there was a fresh attack by the U-boats which was again frustrated, the U-434 being forced to the surface and her crew of 44 officers and ratings taken prisoner. She was then sunk by the destroyer *Stanley*. The following morning a combined attack by bombers and U-boats was made, again with disastrous results for the Germans. Two of the three bombers were shot down by the Hurricanes and the U-574 was depth-charged and damaged by the sloop *Stork*, though not before she had sent a torpedo into the *Stanley*, which sank shortly afterwards. The U-574 was compelled to surface and was rammed by the *Stork* after the crew had abandoned ship. Of the submarine's complement four officers and 12 ratings were picked up. The battle was by no means at an end, however, for on the two succeeding days most determined attacks were pressed home by the U-boats, though the bombers failed to put in an appearance. On the 21st, when on the last lap of the voyage, the *Audacity* was torpedoed and sunk.

The number lost on the *Audacity* was ten officers, including Cdr. Mackendrick, and 62 ratings.

AUGUSTBOLTEN

Aug. Bolten Wm. Millers Nachf.; 1936; Neptunwerft Rostock G.m.b.H.; 3,665 tons; 363-1x51-7x22-1; triple-expansion engines & L.P. turbine.

The German ship *August Bolten* was engaged by British motor torpedo boats off Korsfjord on November 20th, 1944. In the course of the action the *August Bolten* ran ashore out of control and sank.

AUGUSTLEONHARDT

Leonhardt & Blumberg; 1922; Stettiner Oderwerke; 2,593 tons; 329 X 46 • 1 X 18 • 7; 210 n.h.p.; triple-expansion engines. The German ship *August Leonhardt* was torpedoed and sunk by the British submarine *Sealion* on April 11th, 1940, in the Kattegat.

AUGUSTINA

Nederl. Indische Tankstoomboot Maats.; 1927; Swan, Hunter & Wigham Richardson; 3,110 tons; 305 • 1 x 50 • 2 x 19 - 3; 379 n.h.p.; oil engines.

The Dutch tanker *Augustina* left Batavia on February 27th, 1942, for Fremantle. On March 1st she was intercepted by a Japanese destroyer. The crew opened the sea cocks to scuttle the ship and took to the boats, but they were ordered by the Japanese to return to their ship. While they were doing this the destroyer fired on the lifeboats. Some survivors were picked up by another Japanese destroyer on the night of March 3rd. Thirty-nine of the crew were killed.

AUGVALD

Skibs A/S Corona; 1920; A. McMillan & Sons; 4,811 tons; 400 - 4x52-6x25-7; 444 n.h.p.; triple-expansion engines.

The Norwegian cargo ship *Augvald* was torpedoed and sunk on March 2nd, of Loch Ewe. Twenty-nine 1941, 150-200 miles N.W. -- -- lives were lost.

AUK

Cork Steamship Co.; 1871; T. Roy den & Sons; 920 tons; 229-2 X 29x17-4; 120 h.p.; compound inverted engines. The steamship *Auk* left Liverpool on December 8th, 1883, for Rotterdam. She was found burned and wrecked on the morning of the 13th on the inner edge of the Hinder Bank, River Maas. All the crew were lost.

AUNG TEZA

Union of Burma Shipping Board; 1960; Ujina Zosensho; 999 tons; 200 x 32x --; oil engines.

The Burmese ship *Aung Teza* capsized and sank in heavy seas on June 7th, 1961, 80 miles S. of Moulmein. Sixty-seven were drowned, mostly passengers.

AURANIA

Cunard Line; 1917; Swan, Hunter & Wigham Richardson; 13,936 tons; 520-5x65-3x42-6; 15-5 knots; turbine engines. The Cunard liner *Aurania* was torpedoed and sunk by a German submarine 15 miles N. W. of Inishtrahull, off Donegal, on February 4th, 1918. Eight persons were killed. The captain was among the survivors.

AURICULA

British Navy, corvette; 1940; W. Simons & Co.; 925 tons; 193 X 32x16; 2,750 i.h.p.; 17 knots; quadruple-expansion engines; one 4 in. A.A. gun, several smaller.

The corvette *Auricula*, Lt. Cdr. S. L. B. Maybury, was part of a force under Rear-Admiral E. N. Syfret engaged in covering the British landing at Courier Bay, near Diego Suarez, the French naval base in Madagascar, on May 5th, 1942. The object of the expedition was to forestall any attempt on the part of the Japanese naval forces to seize the island as a base of operations on the African coast and for possible control of the Persian Gulf and the Indian Ocean. The British force comprised the battleship *Ramillies*, 29,150 tons, eight 15 in. guns (flagship), the aircraft carrier *Illustrious*, 23,000 tons, the light cruiser *Hermione*, 5,450 tons, ten 5.25 in. guns, and six destroyers. In addition, there was a convoy escort consisting of the heavy cruiser *Devonshire*, 9,850 tons, eight 8 in. guns, and two destroyers. This powerful concentration was further increased by the arrival of the aircraft carrier *Indomitable*, 23,000 tons, flagship of Rear-Admiral D. W. Boyd, and two destroyers, two days before the time fixed for the landing.

The fighting, which was not sustained with any vigour by the Vichy French troops, ended on the 7th with the occupation of the town of Antsirane and the naval dockyard. The assault force totalled just over 5,000 officers and men and consisted of Royal Marines with battalions of the Royal Scots Fusiliers, Royal Welch Fusiliers, East Lancashire Regiment and some batteries of artillery. The British casualties amounted to 105 killed or died of wounds, 284 wounded and four missing. The official surrender by the French took place at the Residency at 11 a.m. on the 8th.

The *Auricula* was engaged on minesweeping operations and struck a mine at 11.38 a.m. which broke her back, but she continued to float and remained anchored to her sweep. Several members of her ship's company were wounded but none was killed. Later she was taken in tow by the corvette *Freesia* but broke in two and sank at

8.23 a.m. on the 6th. She was the sole naval loss on the British side during the operation. The French submarine *Le Heros* was sunk by an aerial torpedo and the auxiliary cruiser *Bougainville*, 4,200 tons, was sunk by torpedoes from aircraft of the *Illustrious*. The submarine *Monge* made an unsuccessful attack on the *Indomitable* but was driven off and sunk by the destroyer *Active*. In addition the sloop *D'Entrecasteaux* was bombed by aeroplanes from the *Indomitable*, which set her on fire and she was finally put out of action by gunfire from the destroyers.

AURIGA

Italian Navy, torpedo boat; 1943; Italy; 706 tons; 265-7x27-2x9; 22,000 s.h.p.; 31-5 knots; turbine engines; 3-drum boilers; two 3-9 in. guns, six 20 mm.A.A., 6 T.T.
The Italian seagoing torpedo boat *Auriga* was bombed and sunk by British aircraft at Elba sometime between May 15th and June 10th, 1944. The vessel carried a complement of about 100.

AURIS

Anglo-Saxon Petroleum Co.; 1935; Cantieri Riuniti de W Adriatico; 8,030 tons; 460x59x34; 4,000i.h.p.; oilengines.
The motor tanker *Amis*, Capt. N. R. Reed, was torpedoed and sunk by a submarine on June 28th, 1941, about 200 miles due W. of Rabat, Morocco. Thirty-four men were killed. Capt. Reed was among the survivors.

AURORA

Emigrant ship; 1845 (circa); about 400 tons.
The sailing ship, *Aurora*, Capt. Joshua Cherry, left Hull for New York on April 26th, 1853, with a crew of 18 and 24 passengers. When well out into the Atlantic the ship encountered bad weather and on May 17th she sprang a leak. Crew and passengers manned the pumps continuously until the 20th, when the ship was in a sinking condition. Nearly all the boats were stove-in but the long boat got away and rode off the ship at the end of a line. Later the line parted and the long boat, though she made repeated efforts, could not approach the ship. The jolly boat with a few persons also got away. The *Aurora* then sank, taking with her 26 of the passengers and crew, the time being about 8 a.m. and her position lat. 46° N., long. 38° W.

The survivors, including the captain, were picked up by the *Volusia* of Belfast.

AUSONIA

Medici Lucotti Cerrano; 1883; R. & J. Evans & Co.; 1,438 tons; 256-2x33x15-7; 125 n.h.p.; compound engines.
The Italian steamship *Ausonia* was torpedoed and sunk by a submarine on September 14th, 1917, in the Mediterranean.

AUSONIA

Cunard Line; 1909; Swan, Hunter & Wigham Richardson; 8,153 tons; 450-6x54-2x29-2; 888n.h.p.; 15 knots; triple-expansion engines.
During the First World War the *Ausonia* was torpedoed and sunk by a German submarine with the loss of 44 lives. The attack took place on May 30th, 1918, when she was 620 miles W. by S.f.S. of Fastnet.

AUST

D/S A/S Carolvore; 1920; Ropner S.B. & Repairing Co.; 5,630 tons; 390x52-5x32-6; 475 n.h.p.; triple-expansion engines.
The Norwegian ship *Aust* left Pemambuco on March 28th, 1942, for Bombay, but she was intercepted by a German raider and sunk in the S. Atlantic on April 3rd, 1942.

AUSTRALDALE

Commonwealth Govt. Line; 1907; Napier & Miller; 4,379 tons; 376-3x52-2x17-5; 366n.h.p.; 10 knots; triple-expansion engines.
The Australian government steamship *Australdale* with a cargo of coal from Wales to Gibraltar was sailing in convoy when she was torpedoed and sunk by a German submarine. The attack occurred off the N.W. coast of Spain on October 19th, 1917. Three boats got away, of which the lifeboat with 27 men was never heard of again. The other boats managed to make a landing in France, but two men died while the boats were adrift.

AUSTRALIA

Peninsular & Oriental S.N. Co.; 1892; Laird & Co.; 6,901 tons; 465-6x52-2x26-4; 1,356n.h.p.; triple-expansion engines.
Sailing from London to Sydney, N.S.W., the *Australia* was wrecked in June, 1904, at Point Nepean, near Melbourne.

AUSTRALIA

The Texas Company; 1928; Sun S.B. & D.D. Co.; 11,628 tons; 509-7x70-3x39-9; 1,110n.h.p.; oilengines.
The American tanker *Australia* was on a voyage from Port Arthur to New Haven (Conn.). She was torpedoed by a submarine on March 16th, 1942, and sank after an internal explosion.

AUSTRALIAN

Eastern & Australian S.S. Co.; 1896; R. Napier & Sons; 2,838 tons; 341-7x42-2x22-5; 400n.h.p.; triple-expansion engines.
The British steamship *Australian* was wrecked on November 17th, 1906, on Vashon Head, N. Australia, while sailing from Melbourne to Kobe.

AUSTRALIAN

Messageries Maritimes; 1889; Messageries Maritimes; 6,377 tons; 482-3x49-2x24-1; 818n.h.p.; 12 knots; triple-expansion engines.
The French liner *Australien* was one of a quartet of vessels with which the Messageries Maritimes developed its Australian trade in 1889-1891. For 25 years the ship was a regular caller at Australian ports and despite the rivalry of newer vessels kept up her popularity over this long stretch of time. On July 19th, 1918, the *Australien* was passing through the Mediterranean when she was torpedoed by a German submarine. At the time of the disaster she had the large total of 951 passengers on board, besides crew. Fortunately it was possible to get nearly everyone off in safety before she sank. The total number lost was 20, of whom three were passengers.

AUSTRALIER

Lloyd Royal Beige; 1906; Bartram & Sons; 3,687 tons; 346 x 50-8x22-9; 315 n.h.p.; 10 knots; triple-expansion engines.
The Belgian steamship *Australier* was torpedoed and sunk by a German submarine six miles S.W. by S. of Dungeness on April 29th, 1918. Five men were killed. The captain was among the survivors.

AUSTRALIND

Australind Stm. Shipping Co.; 1929; W. Denny & Bros.; 5,020 tons; 410-5x54-2x25-7; 582n.h.p.; oilengines.
The British motorship *Australind* left Adelaide on July 8th, 1941, for Balboa and the United Kingdom. She was intercepted by the German auxiliary cruiser *Komet* on August 14th, 200 miles W. of the Galapagos Islands and sunk by gunfire.

AUSTRIA

Hamburg-Amerika Line; 1857; Caird & Co.; 2,383 tons; 320 X 40x17-5; SOO i.h.p.; 12 knots; steam engines.
The *Austria* was one of the early Hamburg-Amerika liners and in a very brief career proved a most unlucky ship. She was first chartered for the Indian Mutiny, but broke down twice, having to return to port for the repair of her engines on each occasion. In 1858 the *Austria* went into service on the North Atlantic run as a passenger and emigrant ship. She sailed from Hamburg on September 2nd, 1858, calling at Southampton on the 4th, where she made up her total of passengers and crew to 538 persons. The bulk of the former were poor German emigrants, with some Hungarians.

On September 13th, the ship's surgeon, with the consent of the captain, gave instructions for the steerage to be fumigated. At about 2 p.m. the fourth officer and a seaman with a bucket of tar and a red-hot chain went below, the intention being to place the end of the chain into the tar in order to cause smoke. Unfortunately the tar caught fire and the seaman dropped the chain owing to the heat and upset the bucket. Within a short time the flaming tar had set mattresses and berths alight and the whole of the steerage was ablaze. There was instant panic among the hundreds of emigrants, scores throwing themselves overboard in their hysteria. A passenger, in the absence of officers, suggested to the helmsman that the ship should be turned broadside-on to the wind in order that the flames should be blown clear of the deck. The man hesitated to obey but eventually did so, but then became aware that no officers were

AUSTVARD

present and abandoned the wheel and allowed the vessel to go before the wind without control or guidance. The engines, which had been put at half-speed as soon as the fire was discovered, continued to run and the ship swept on, a mass of flames, the engineers having been suffocated by the smoke. Efforts to get the fire hose to function failed owing to the fire having melted the lead pipes which ran down to the water.

Meanwhile a crowd of people were gradually driven along the quarterdeck until, with the explosion of the magazine, they fell into the sea in a body.

Capt. Heydtmann, in command of the *Austria*, fell overboard and was drowned when superintending the launching of the boats. A pitiful few got away in one of these and only 67 survived. The French barque *Maurice*, Capt. Ernest Renaud, picked up nearly 60, the remainder being rescued by a Norwegian vessel. The number of persons drowned or burned was 471.

AUSTVARD

Kloster's Rederi A/S; 1925; Akt. Burmeister & Wain; 3,677 tons; 368x51-5x21-7; 540 n.h.p.; oil engines.

The Norwegian motorship *Austvard* was bombed and sunk by German aircraft on January 30th, 1941, about 130 miles W. of Iceland. Twenty-three of her crew were killed.

AUTOCRAT

Mississippi River steamboat.

The Mississippi River steamboat *Autocrat* was run down by another steamboat on, or about, February 10th, 1851. Of those on board 30 were drowned.

AUTOLYCUS

Alfred Holt & Co.; 1922; Hawthorn, Leslie & Co.; 7,621 tons; 459-7x58-3x32-6; 14-5 knots; turbine engines.

The liner *Autolycus*, Capt. R. C. G. Neville, was intercepted and sunk by a Japanese warship in the Bay of Bengal on April 6th, 1942. The attack took place about 50 miles due S.E. of Puri. Eighteen members of the crew were killed. Capt. Neville was among the survivors.

AUTOMEDON

Alfred Holt & Co.; 1922; Palmers' Co.; 7,528 tons; 459-4x58-4x32-6; 6,000 s.h.p.; 14-5 knots; turbine engines.

The liner *Automedon*, Capt. W. B. Ewan, was intercepted and sunk by an enemy raider in the Indian Ocean, midway between Ceylon and the Nicobar Islands, on November 11th, 1940. Capt. Ewan, six of the crew and one gunner were killed.

AVA

British India Steam Navigation Co.; 1873; W. Denny & Bros.; 2,600 tons; 350x36-4x28; 300 n.h.p.; 12 knots; compound engines.

The British India liner *Ava* left Calcutta on May 22nd, 1879, for Madras, Colombo and London, via Suez, with about 123 persons on board under command of Capt. Dickinson. She carried a general cargo of an estimated value of £100,000. At about 2 o'clock on the morning of May 24th the ship was some 70 miles from Sandheads at the mouth of the Hooghly and had just parted with her pilot, when she was run down by the sailing ship *Brenhilda*, 1,393 tons, Capt. J. Scurr. The *Ava* was struck amidships and almost cut in two. Of her five boats, one was smashed by the collision, one was stove in when launching and the remaining three got away in safety with 53 persons. The night was clear and fine, with no moon, but there was a heavy swell. Unfortunately the *Brenhilda* drifted away from the stricken liner and it was two hours before the boats containing the survivors reached her.

The drowned numbered 70, including Captain Dickinson, Dr. E. W. Deare, the purser, and the fourth engineer, with the majority of the deck passengers and crew.

AVA

British & Burmese S.N. Co.; 1895; W. Denny & Bros.; 3,895 tons; 360x43-1x27-3; 316 n.h.p.; triple-expansion engines.

The steamship *Ava* was wrecked in January, 1905, nine miles below Maulmain, while on a voyage from Barrow to Maulmain.

AVA

British & Burmese S.N. Co. & Burmah S.S. Co.; 1906; W. Denny & Bros.; 5,076 tons; 411-4x52-2x28-1; 424 n.h.p.; triple-expansion engines.

The steamship *Ava* left Liverpool for Dakar and Rangoon on January 26th, 1917, with coal and general cargo, but was not seen again. She was presumed to have been sunk by a submarine. She had a crew of 92 including the captain.

AVALANCHE

Shaw, Savill & Co.; 1874; A. Hall & Co.; 1,210 tons; 214-6x36x21-1.

The iron sailing ship *Avalanche* left London in September, 1877, for Wellington, New Zealand, under command of Capt. E. Williams. She carried 63 passengers, with a crew of 34. At about 9.30 on the evening of Tuesday, the 11th, the ship being in charge of a pilot, she was run down by the sailing ship *Forest*, 1,488 tons, of Windsor, N.S., in ballast for Sandy Hook, New York. The position of the ships at the time was about 15 miles S. by W. of Portland. Of those on board only three, John Sherrington, the third officer, and two seamen, managed to save themselves by clambering on to the other ship.

The impact was of such violence that the *Forest* was unable to keep the water under control and about an hour after the sinking of the *Avalanche* she also foundered. At the time the sea was very high with violent squalls of wind and three boats were swamped so that out of 24 on board, including the three from the *Avalanche*, only 12 got ashore. Capt. Ephraim Lockhart and eight of the crew of the *Forest* were among the survivors with the three men from the *Avalanche*.

AVANCE

Rederi A/B Urania; 1883; J. L. Thompson & Sons; 1,585 tons; 256-4x35-9x16-9; 200 n.h.p.; compound engines.

The Swedish steamship *Avance* was torpedoed and sunk by a German submarine on June 22nd, 1918, in the North Sea.

AVANTI

Det Forenede Dampskibsselsk.; 1912; Burmeister & Wain; 2,128 tons; 272-7x40x21-1; 181 n.h.p.; 8-5 knots; triple-expansion engines.

The steamship *Avanti* was torpedoed and sunk by a German submarine four miles S.E. by E. of St. Alban's Head on February 2nd, 1918. The captain and 21 men were killed.

AVANTI

Rederi A/B Praternitas; 1946; Oresundsvarvet A/B; 10,034 tons; 504-3x65-9x37-2; 1,079 n.h.p.; oil engines.

The Swedish motor tanker *Avanti* was on a voyage from Sorong to Iwakuni with a cargo of fuel oil when she broke in two on January 7th, 1953, off Yokushima Island. Eight lives were lost. The after part of the ship was subsequently taken in tow.

AVEIRO

Portuguese Government; 1894; Flensburger Schiffsbau Ges.; 2,209 tons; 279-4x39-9x14-6; 251 n.h.p.; triple-expansion engines.

The Portuguese steamship *Aveiro* was torpedoed and sunk by a German submarine on April 10th, 1918, in the Mediterranean.

AVELONA STAR

Blue Star Line; 1927; J. Brown & Co.; 13,376 tons; 510-2x68-2x42-6; 1,842 n.h.p.; 16 knots; turbine engines.

The liner *Avelona Star*, Capt. G. E. Hopper, was torpedoed by a submarine on June 30th, 1940, in the North Atlantic. The vessel did not sink until the following day. Four men were killed.

AVENGER

British Navy, steam frigate; 1845; Devonport Dockyard; 1,445 tons; 236-7x39x25-6; 650 i.h.p.; 11 knots; steam engines; two 68 pdr. m.l. guns, four 56 pdr., four 32 pdr.

The steam frigate *Avenger* was a unit of the Mediterranean Fleet, having only joined about a month before her loss. On the afternoon of December 17th, 1847, she left Gibraltar for Malta, being sighted on the 20th at about 2 p.m. by the mail steamship *Pasha*. During the night the mail steamship was carried off her course in a southerly

direction and at daybreak found herself close inshore. This experience was probably that of the *Avenger* which crashed on the Sorelli Rocks off the Island of Galita on the night of December 20th. It was proved later that for three days there had been a set of the sea to the southward varying from 17 to 34 miles daily.

The ship broke up soon after striking, the mainmast, funnel and mizzen-topmast going over the side and killing a number of men as they were endeavouring to launch the boats. The foremast and bowsprit followed immediately and within 20 minutes the ship was a complete wreck.

The number on board was 256, of whom only four officers and five men were saved. Capt. C. E. Napier, stepson of Admiral Napier, was in command of the *Avenger* and went down with the ship as did Lt. Marryat, son of Capt. F. Marryat, the famous novelist.

AVENGER

Union Steamship Co. of New Zealand; 1915; Fairfield Co.; 14,744 tons; 548x68-2x34; 20 knots; turbine engines. This ship was built for the Union Steamship Co. of New Zealand as the *Aotea-Roa*, but on her completion in 1915 she was taken over by the Admiralty for service as an auxiliary cruiser. Her name was changed to *Avenger* and she was placed in the 9th Cruiser Squadron.

On the night of June 13th/14th, 1917, the *Avenger* was in the North Atlantic when she was torpedoed by a German submarine. One man was killed by the explosion, but with this exception all the crew were taken off in safety.

The ship, which had a speed of 20 knots, would have been one of the fastest employed in Australian waters. She was designed with a view to service on the Australian-Canadian route.

AVENGER

British Navy, escort aircraft carrier; 1940; United States; 13,785 tons; 496x69-5x28-5; 8,500b.h.p.; 16-5knots; diesel engines; one 4 in. A.A. gun, four 40 mm., eight 20 mm.; 20 aircraft. The escort aircraft carrier *Avenger*, Cdr. A. P. Colthurst, was constructed in the United States as the liner *Rio Hudson*, but was converted to the purpose of an aircraft carrier before completion. She was lent to the British Navy with others of the same class and took part in the North African landings in November, 1942. On the 15th, when W. of the Straits of Gibraltar, she was torpedoed and sunk by a submarine. Sixty-seven officers, including Cdr. Colthurst, and 438 ratings were killed. This was the heaviest British naval loss connected with the North African landings.

The following units of the Royal Navy were lost in these operations:—

<i>Avenger</i> , escort-carrier	...	13,785 tons
<i>Hecla</i> , depot ship	10,850
<i>Broke</i> , destroyer	1,480
<i>Martin</i> , "	1,920
<i>Hartland</i> , sloop	1,546
<i>Walney</i> , "	1,546
<i>Ibis</i> , "	1,250
<i>Tynwald</i> , escort ship	2,376
<i>Algerine</i> , fleet-minesweeper	940	

For details of the landings at Algiers, see under the destroyer *Broke*; for details of the landing at Oran, see under the sloop *Hartland*.

AVENTINO

"Tirrenia" Soc. Anon. di Nav.; 1907; Lloyd Austriaco; 3,794 tons; 368-4x44-2x23-3; 243n.h.p.; triple-expansion engines. The steamship *Aventino* was sunk by gunfire from a British warship on December 2nd, 1942, in the Straits of Messina.

AVERILL

Christopher Furness; 1878; W. Gray & Co.; 1,690 tons; 260x34x23-1; 160 n.h.p.; compound inverted engines. The British steamship *Averill* was wrecked on June 21st, 1883, at Ingonish, C.B., while on a voyage from Barrow to Montreal with a cargo of steel rails.

AVERSA

1933; Ch. & Atel. de Provence S.A.; 3,723 tons; 324-8x48-6x 30-4; 294 n.h.p.; triple-expansion engines. The Italian steamship *Aversa* was previously the *Kakoulima*, owned

by the Chargeurs R6unis. She was torpedoed and sunk by a British submarine on October 19th, 1943, off Rapallo.

AVIEMORE

Johnston Warren Lines; 1920; Irvines S.B. & D.D. Co.; 4,060 tons; 360x52x24-5; 370 n.h.p.; triple-expansion engines. The British cargo ship *Aviemore*, Capt. H. Forsyth, was torpedoed and sunk by a German submarine on September 16th, 1939, about 250 miles W. of Ushant. Twenty-three were lost.

AVIERE

Italian Navy, destroyer; 1937; Odero-Terni-Orlando; 1,620 tons; 350x38-5x10-7; 48,000s.h.p.; 39 knots; turbine engines; 3-drum boilers; four 4-7 in. guns, six 37 mm. A.A., four 13 mm. A.A. 6T.T.

The Italian destroyer *Aviere* was torpedoed and sunk by a British submarine in the Central Mediterranean on December 17th, 1942. The vessel carried a complement of about 200.

AVBLA STAR

Blue Star Line; 1927; John Brown & Co.; 14,443 tons; 598 x 68x28; 1,840 n.h.p.; 16 knots; turbine engines. The Blue Star liner *Avila Star* left Buenos Aires early in July, 1942, for England with 196 persons on board, including British men and women volunteers who were coming home to join the forces. On July 12th the wireless station at Lisbon received news that a British liner had been torpedoed and sunk some 500 miles to the westward. Five naval aircraft and a destroyer were despatched by the Portuguese Government to search for the ship. In addition, military aircraft from the Azores were sent out to search. As a result the destroyer managed to pick up many survivors. It was learned that on July 5th the *Avila Star* had been torpedoed by two submarines, and sank in about 20 minutes. The ship had taken a heavy list, making it difficult to launch the lifeboats, one of which capsized. Fortunately the sea was calm and the remaining six boats got away in safety, but three were still unaccounted for.

A further search was undertaken by the Portuguese air and sea forces and on July 23rd, one boat was sighted by a seaplane which dropped food and water. This boat, which had drifted to within 350 miles of the coast, was picked up by the sloop *Pedro Nunes*, and was found to contain 28 persons out of an original company of 39, the others having died from exposure. Later another person died on the sloop. Out of a total of 171 crew and 25 passengers on board, 126 of the crew and 8 passengers were saved by the Portuguese navy and air force.

AVILIMAH

Turkish Navy, frigate; 36 guns. On the morning of November 30th, 1853, in thick fog, a Russian squadron under Vice-Admiral Nakhimoff forced the entrance to the harbour of Sinope in the Black Sea. War between Russia and Turkey, which later developed into the Crimean War had begun in July. The Turkish ships were lying at anchor and the Russian attack came as a complete surprise. The Turkish commander was Admiral Osman Pasha.

The strength of the rival squadrons was as follows:—

TURKISH		RUSSIAN	
<i>Avilimah</i> (flagship)	36 guns	<i>Grossfurst Constantin</i> (flagship)	120 guns
<i>Navik</i> ...	52	<i>Tri Sviatitela</i> ...	120
<i>Nessim</i> ...	52	<i>Paris</i> ...	120
<i>FaisliHah</i>	38	<i>ZvolfApostel</i> ...	120
<i>GulSefit</i>	24	<i>Rostislau</i> ...	84
<i>Dimiat</i> , Egyptian	56	<i>Sviatoslan</i> ...	84
<i>Nedge Jesan</i>	24		
<i>Kaid</i> ...	50		
<i>Nagaimiah</i>	60		
<i>Fairi Marbout</i> ...	22		

In addition the Turks had two steamers, the *Taif* and the *Kegli*; and the Russians two steamers, the *Vladimir* and the *Odessa*. After an action of little over an hour the much heavier Russian squadron sank all the Turkish ships except one, the steamer *Taif* which escaped to Constantinople. The Turkish loss amounted to 2,841, killed and missing. The Russian loss was also very heavy in personnel, but they managed to save their badly damaged ships.

AVNILLAH

Turkish Navy, ironclad; 1869; Blackball; 2,400 tons; 236-5 x 35x16-5; 2,400i.h.p.; 12 knots; compound engines; four 6 in. guns, six 3 in., ten 6 pdr., two 1 pdr., 1 T.T.
 The old Turkish ironclad *Avnillah* was built on the Thames in 1869 and was reconstructed by Ansaldo of Genoa in 1904. The ship was of little fighting value when the Turco-Italian War broke out in 1911. On February 25th, 1912, the *Avnillah* in company with a small torpedo boat of the *Antalia* class, 165 tons, was lying in the harbour of Beirut, in Syria. The Turkish Government at that date was evacuating all Italian residents from Syria and the war which had been confined to Libya, had not spread into Asia Minor. At dawn an Italian squadron of armoured cruisers under command of Rear-Admiral Direvel, consisting of the *Giuseppe Garibaldi*, *Francesco Ferruccio* and *Volturmo* arrived off the port and demanded the surrender of the Turkish ships, giving them until 9 a.m. to haul down their flags. The Turks did not comply with this demand and the Italians opened fire, silencing the guns of both Turkish ships and setting the *Avnillah* on fire within twenty minutes.

The *Garibaldi* then steamed into the harbour and torpedoed the torpedo boat but did not sink her, and she was finally sent to the bottom by gunfire from the *Ferruccio* on the afternoon of the same day.

The complement of the *Avnillah* was 220, and that of the torpedo boat about 40. Of this number the Turks announced that over 200 had become casualties, but it is thought that this included soldiers on shore and civilians killed or wounded when the Ottoman Bank and the Bank of Salonica were damaged by shells.

AVOCETA

YeowardLine; 1923; Caledon S.B. & E. Co.; 3,442 tons; 319X 44' 2 X 26 • 5; 395 n.h.p.; triple-expansion engines.
 Sailing from Gibraltar for Liverpool, the British cargo-passenger ship *Avoceta* was torpedoed and sunk on September 25th, 1941. Casualties included 43 of the crew, 4 gunners and 76 passengers killed.

AVON RIVER

Avon S.S. Co.; 1918; W. Doxford & Sons; 5,286 tons; 400-3x 52-4x28-5; 517n.h.p.; triple-expansion engines.
 The British ship *Avon River* was wrecked on September 16th, 1936, on the W. coast of Mansel Island, in the Hudson Bay. She was on a voyage from Montreal to Churchill.

AVONDALE

Macintyre Bros. & Co.; 1875; Dixon; 1,862 tons; 280-2x 33-8x24-1; 150 n.h.p.; compound inverted engines.
 The British steamship *Avondale* was wrecked on August 5th, 1882, off Nova Scotia while sailing from Coosaw to London with a cargo of phosphate.

AVONDALE PARK

Canadian Government; 1944; Foundation Maritime; 2,878 tons; 315 • 5 X 46 • 5 X 22 - 9; 269n.h.p.; triple-expansion engines.
 The Canadian ship *Avondale Park* was torpedoed and sunk by a German submarine one mile S.E. of May Island, Firth of Forth, on May 7th, 1945.

AVONWOOD

Joseph Constantine; 1934; Burntisland Shipbuilding Co.; 1,056 tons; 199-8x33-2x13-6; 105i.h.p.; 9-25knots; triple-expansion engines.
 The steamship *Avonwood*, Capt. Wood, was lying with a convoy off Lowestoft on December 12th, 1942, when she was torpedoed and sunk by a German E-boat. Thirteen men were killed. Capt. Wood was among the survivors.

AVRA

Ellingsen & Johannesen; 1892; J. Priestman & Co.; 2,133 tons; 206-6x39-2x18-2; 256n.h.p.; triple-expansion engines. The Norwegian steamship *Avra* struck a mine and sank on March 19th, 1917, in the Bay of Biscay.

AWA MARU

11,600 tons.
 The steamship *Awa Mam* was torpedoed and sunk by the U.S. submarine *Queenfish* on April 1st, 1945, in the Formosa Strait.

AWA MARU

1925; Swan, Hunter & Wigham Richardson; 1,960 tons; 255-2X 38-2x18-9; 263 n.h.p.; triple-expansion engines.
 The steamship *Awa Mam* was formerly the Panamanian *Wawa*, scuttled at Hong Kong and raised and repaired by the Japanese. She was sunk by U.S. carrier-based aircraft on July 14th, 1945, off the N.E. coast of Honshu, Japan.

AWAJIMARU

Nippon Yusen K.K.; 1906; Grangemouth & Greenock Dockyard Co.; 1,948 tons; 285-3x38-2x13-8; 214n.h.p.; triple-expansion engines.
 The steamship *Awaji* (or *Awazi*) *Mam* was torpedoed and sunk by the U.S. submarine *Picuda* on September 21st, 1944, N. of Luzon Island.

AWAJISANMARU

Mitsui Bussan Kaisha; 1939; Tama S.B. Co.; 9,794 tons; 482-9 X 64x40-7; 1,646 n.h.p.; oil engines.
 The liner *Awajisan* (or *Awazisan*) *Mam* was sunk by Australian aircraft on December 8th, 1941, off the east coast of Malaya.

AWATA MARU

Nippon Yusen K.K.; 1937; Mitsubishi Jukogyo K.K.; 7,398 tons; 462-7x62-3x34-4; 2,248 n.h.p.; oil engines.
 The liner *Awata Mam* was taken over for service as an auxiliary cruiser. On October 22nd, 1943, she was torpedoed and sunk by the U.S. submarine *Grayback* off Keelung.

AWATEA

Union Steamship Co. of New Zealand; 1936; Vickers Armstrong; 13,482 tons; 538x74x36; 22,500s.h.p.; 23 knots; turbine engines.
 The *Awatea* was assigned to the task of transporting commando troops to Algiers to take part in the North African landing in November, 1942. This task was accomplished on the 8th and on the 11th she was at Bougie under orders for Gibraltar. At 4.50 p.m. soon after leaving Bougie the *Awatea* became the target for an attack by six large bombers of which she shot down two, before being badly damaged and set on fire, after which she was abandoned. Despite the intensity of the bombing only four men were wounded. For their service in North African waters the crew of the *Awatea* who were mainly New Zealanders, received the following awards. Capt. Morgan, the D.S.O., Mr. Harold Simmonds, chief engineer, Mr. William McGarry, chief officer, Mr. William S. Muir, third officer, the D.S.C. There were also four D.S.M.s awarded to members of the crew.

AXEL

1878; W. Gray & Co.; 1,587 tons; 260-8x34-2x19-6; 178n.h.p.; compound engines.
 The German steamship *Axel*, formerly the Swedish *Edda*, was bombed and sunk by British aircraft on July 24th, 1944, at Kiel.

AXPE-MENDI

Compania Naviera Sota y Aznar; 1897; Ropner & Son; 2,873 tons; 320X46x21-2; 246 n.h.p.; triple-expansion engines.
 The Spanish steamship *Axpe-Mendi* was torpedoed and sunk by a German submarine on June 7th, 1918, in the English Channel.

AYAGIRI MARU

Ishihara Kisen K.K.; 2,854 tons.
 The tanker *Ayagiri Mam* was sunk by U.S. carrier-based aircraft on November 14th, 1944, N. of Palawan Island, Philippines.

AYANAMI

Japanese Navy, destroyer; 1929; Hudinagata; 1,700 tons; 35-5X 33-7x9-7; 40,000s.h.p.; 34 knots; turbine engines; Kanpon boilers; six 5 in. guns, 4 A.A.m.g., 9 T.T.
 The Japanese destroyer *Ayanami* was sunk in the second phase of the battle of Guadalcanal which covered the three days November 13th-15th, 1942. The first phase of the battle began on the night of the 13th when a Japanese squadron steaming through the Lengo Channel, off Savo Island, ran into a squadron of U.S. cruisers and destroyers. Two short but distinct actions fought with great determination by both sides ensued and several ships were sunk or disabled. On the 15th, after a certain amount of bombing by U.S.

carrier planes, the main fleets met again, the Americans having been reinforced by two new battleships and an aircraft carrier. The Japanese were intercepted on the night of the 14th/15th N. of Savo Island and a second action took place. In this the battleship *Kirishima* and the *Ayanami* were both sunk.

The latter's normal complement was 197.

The Japanese loss totalled two battleships, one heavy cruiser and three destroyers. The American loss was two cruisers and seven destroyers.

For full story of the battle see the battleship *Kirishima* and the U.S. cruiser *Atlanta*.

AYANAMI MARU

Ishihara Kisen K.K.; 2,864 tons.

The tanker *Ayanami Mam* was sunk by U.S. carrier-based aircraft on January 12th, 1945, off Cap St. Jacques, Indo-China.

AYATOSAN MARU

Mitsui Bussan Kaisha; 1939; *Tama S.B. Co.*; 9,788 tons; 476-2 X 64x40-7; 1,646 n.h.p.; oil engines.

The motor vessel *Ayatosan Mam* was bombed and sunk by U.S. aircraft on July 22nd, 1942, S.E. of Guam, while in service as a transport.

AYAYUKI MARU

Ishihara Kisen K.K.; 2,854 tons.

The tanker *Ayayuki Mam* was sunk by U.S. carrier-based aircraft on January 12th, 1945, S. of Kana, Indo-China.

AYAZONO MARU

Ishihara Kisen K.K.; 2,854 tons.

The tanker *Ayazono Mam* was sunk by U.S. carrier-based aircraft on September 12th, 1944, off Cebu.

AYLEVARROO

Limerick Steamship Co.; 1903; *Swan, Hunter*; 908 tons; 227-5 X 31-8x13-8; 245 n.h.p.; 10 knots; triple-expansion engines. The steamship *Aylevarroo* was torpedoed and sunk by a German submarine off Southern Ireland on, or about, October 7th, 1917. Twenty men, including the captain, were killed.

AYMERIC

Andrew Weir & Co.; 1919; *R. Thompson & Sons*; 5,196 tons; 400x52x29; 520 n.h.p.; 11 knots; triple-expansion engines.

The steamship *Aymeric* was in the North Atlantic on May 17th, 1943, when she was torpedoed and sunk by a submarine. She carried a crew of 78, of whom 53 were killed.

AZALEA CITY

Waterman Steamship Corp.; 1920; *Merchant S.B. Corp.*; 5,976 tons; 400-7x54-2x30-4; 3,000 s.h.p.; 10 knots; turbine engines.

The American cargo liner *Azalea City*, Capt. George R. Self, left

Trinidad for Philadelphia on February 13th, 1942. She was not in convoy and was never seen again. The *Azalea City* carried a crew of 38 all told.

AZTEC

Pacific Mail S.S. Co.; 1894; *Edwards S.B. Co.*; 3,727 tons; 349-2x43x26-6; 299 n.h.p.; triple-expansion engines.

The American steamship *Aztec* was torpedoed and sunk by a German submarine on April 1st, 1917, off Ushant.

AZUCHISAN MARU

Mitsu Sempaku; 6,888 tons.

The steamship *Azuchisan Mam* was torpedoed and sunk by the U.S. submarine *Aspro* on October 2nd, 1944, W. of Luzon Island, Philippines.

AZUL

Buenos Avres Great Southern Railway Co.; 1898; *W. Gray & Co.*; 3,074 tons; 324-5x48-7x21-6; 296 n.h.p.; 11 knots; triple-expansion engines.

The steamer *Azul* was torpedoed and sunk by a German submarine 180 miles W. EN. of Fastnet on February 5th, 1917. Eleven men were killed. The captain was among the survivors.

AZUMA MARU

Nippon Yusen K.K.; 1938; *Mitsubishi Jukogyo K.K.*; 6,646 tons; 461-6x62-3x31-5; 2,248 n.h.p.; oil engines.

The motor vessel *Azuma Mam* was torpedoed and sunk by the U.S. submarine *Tinosa* on December 3rd, 1943, S.W. of the Caroline Islands.

AZUMASAN MARU

Mitsui Bussan Kaisha; 1933; *Mitsui Bussan Kaisha*; 7,623 tons; 454 X 60x 37; 1,230 n.h.p.; oil engines.

The motor vessel *Azumasan Mam* was bombed and sunk by U.S. aircraft on October 15th, 1942, W. of Eniwetok.

AZUSA MARU

Ishihara Kisen K.K.; 11,177 tons.

The tanker *Azusa Mam* was torpedoed and sunk by the U.S. submarine *Barb* on September 16th, 1944, about 300 miles E. of Hainan.

AZUSA MARU

Nittiei Kisen K.K.; 1939; *Urabe Zosen Tekkosho K.K.*; 1,370 tons; 227-9x34x19-5; triple-expansion engines.

The steamship *Azusa Mam* was torpedoed and sunk by the U.S. submarine *Shad* on June 7th, 1945, off Mokpo, Korea.

B.F.

C. N., G. E. & R. Bernier; 1915; Canada; 592 tons; oilengines.
The Canadian motorship *B.F.*, left Ste. Anne des Monies, Quebec, on May 13th, 1952 with a crew of ten including the three brothers who owned the ship, and a cargo of pulpwood. The *B.F.* was reported to have foundered on the south shore of the lower River St. Lawrence and wreckage was found.

B. O. BORJESON

*Rederi A/B Gefjon; 1907; Akt. Ges. "Neptun"; 1,585 tons; 261*4X38*1X16*5; 132n.h.p.; triple-expansion engines.*
The Swedish steamship *B. O. Borjeson* struck a mine and sank on November 19th, 1939, 4½ miles off Spurn Head. Six lives were lost.

B. P. NEWTON

SkibsA/SNavales; 1940; Kockums Mek. Verks.; 10,324 tons; 512-3x63-2x39-0; 1551 n.h.p.; oil engines.
The Norwegian tanker *B. P. Newton*, on a voyage from Curacao to Table Bay with aviation spirit, was torpedoed by a German submarine on July 8th, 1943, off the coast of French Guiana. The tanker caught fire and eventually sank. Twenty-two of her crew died on board and one man died of injuries soon after being picked up.

BAALBECK

Soc. de Nav. a Vap. Daher; 1923; Schiffsw. v. H. Koch A.G.; 2,115 tons; 281-9x45x21-1; 212 n.h.p.; triple-expansion engines.

The French steamship *Baalbeck* was torpedoed and sunk by a submarine on February 21st, 1943, off the Kerkenna Islands, Tunisia.

BABIN CHEVAYE

Bureau Freres & Baillergeau; 1901; Chant. Nantais de Const. Mar.; 2,174 tons; 277x40-4x22-5.

The French sailing ship *Babin Chevaye* was sunk by a German submarine in the Bay of Biscay on January 14th, 1918.

BACCHUS

Soc. les Affreteurs Reunis; 1917; Detroit S.B. Co.; 2,045 tons; 251 x43-8x18-2; 274n.h.p.; triple-expansion engines.

The French steamship *Bacchus* was torpedoed and sunk by a submarine in the Mediterranean on July 11th, 1918.

BACHI

Hijos de Astigarraga; 1893; Elyth S.B. Co.; 2,184 tons; 283X 39x17-1; 207 n.h.p.; triple-expansion engines.

The Spanish steamship *Bachi* was torpedoed and sunk by a German submarine in the Bay of Biscay or* July 1st, 1917.

BADALONA

Cia. Arrendataria del Monopolio de Petroleos; 1922; Swan, Hunter & Wigham Richardson; 4,202 tons; 365x49x28-7; 600 n.h.p.; oilengines.

The Spanish tanker *Badalona* was torpedoed and sunk by a German submarine on December 13th, 1941, 15 miles S. of Almeria, on a voyage from Valencia to Aruba.

BADORA

Rivers S.N. Co.; 1914; W. Denny & Bros.; 279 tons; 150x 25-6x8-8; compound engines.

The Indian river steamship *Badora*, carrying over 200 passengers and a general cargo from Chittagong to Sandwip, was sunk by heavy seas on June 2nd, 1956, in the River Meghna off Sandwip Island. There were only six survivors.

BAEPENDY

LloydBrasileiro; 1899; Blohm&Voss; 4,801 tons; 375-6x 46-3x27-5; 2,200 i.h.p.; 12knots; quadruple-expansion engines.

The Brazilian liner *Baependy*, serving as a transport, was between Rio de Janeiro and Manaus on August 15th, 1942, when she was torpedoed and sunk by a submarine. The number of troops on board was estimated at over 700, of whom nearly 300 were drowned. Three other Brazilian vessels, the *Araraquara*, 4,872 tons, the *Annibal Benevolo*, 1,905 tons and the *Arara*, 1,075 tons, were torpedoed about the same time, bringing the total loss of life to over 400.

Brazil had previously severed diplomatic relations with the Axis powers, but was not at war with them. These sinkings precipitated matters, however, and war was declared on August 22nd, attended by angry demonstrations on the part of the Brazilian people.

BAGDALE

T. Smalles & Sons; 1904; R. Thompson & Sons; 3,045 tons; 325x48-5x12-5; 298n.p.h.; 10knots; triple-expansion engines.
The steamer *Bagdale* was torpedoed and sunk by a submarine 13 miles N. by E. of Creach Point, Ushant, on May 1st, 1917. The captain and 22 men were killed.

BAGE

Lloyd Brasileiro; 1912; Akt. Ges. "Vulcan"; 8,235 tons; 439-2 x 56x35-1; 600 n.h.p.; triple-expansion engines.

The Brazilian steamship *Bage* was torpedoed, shelled and sunk by a German submarine on July 31st, 1943, off the Brazilian coast. There were 87 survivors of the crew of 107 and 28 passengers.

BAGHDAD

FredOlsen&Co.; 1936; AIS Akers Mek.Vcerks.; 2,161 tons; 315-2x44-3x16-7; 471 n.h.p.; oil engines.

The Norwegian motorship *Baghdad* was torpedoed and sunk by a German submarine on May 30th, 1942, about 400 miles W. of Barbados, on a voyage from New York to Pernambuco. Nine of her crew of 30 were lost.

BAHIA

Hamburg-Sudamerikanische Dampfschiffahrts Ges.; 1927; Kockums M.V. Atieb.; 4,117tons; 376-2x54-2x23-2; 438n.h.p.; oil engines.

The motorship *Bahia* was torpedoed and sunk by a British submarine on April 22nd, 1942, north of the Naze, Norway.

BAHIA

Brazilian Navy, light cruiser; 1909; Armstrong, Elswick; 3,150 tons; 401x39x13-6; 23,000 s.h.p.; 28-5 knots; turbine engines; Thorny croft boilers; ten 4-7 in. guns, four 3 in. A.A., four 3 pdr., 4 T.T.

The old Brazilian light cruiser *Bahia* was torpedoed by a submarine off the N.E. coast of Brazil on July 4th, 1945. The vessel carried a complement of 368, of whom 333 were reported as missing.

BAHIA CAMARONES

Hamburg-Sudamerikanische Dampfschiffahrts Ges.; 1918; Palmers'Co.; 8,551 tons; 448-1x57-2x39-2; 667 n.h.p.; quadruple-expansion engines.

The German steamship *Bahia Camarones* was shelled and sunk by British warships on January 12th, 1945, off Egersund.

BAHIA CASTILLO

Hamburg-Sudamerikanische Dampfschiffahrts Ges.; 1918; Short Bros.; 8,580 tons; 449-2x57-2x39-3; 663 n.h.p.; quadruple-expansion engines.

The German steamship *Bahia Castillo* was torpedoed and sunk by a British submarine on May 1st, 1940, S.E. of Skagen.

BAHIA LAURA

Hamburg-Sudamerikanische Dampfschiffahrts Ges.; 1918; Palmers' Co.; 8,561 tons; 447-9x57-2x39-2; 667 n.h.p.; quadruple-expansion engines.

The German steamship *Bahia Laura* was torpedoed and sunk by a British submarine on August 30th, 1941, W. of Seloen Island, Norway. She was a unit of a troop-carrying convoy which included, among others, the steamship *Donau*, 2,931 tons, which was also sunk. Some 1,700 German troops were lost on the two ships.

BAIDAR

Samuel Hough; 1871; Humphry s & Co.; 1,010 tons; 232x28x 15-6; 95 r.h.p.; compound engines.

The British cargo ship *Baidar* was wrecked in November, 1897, off Schouwen Island, Holland, while on a voyage from Rotterdam to Dunkirk in ballast.

BAIEI MARU

Nitto Risen K.K.; 2,858 tons.
The tanker *Baiei Mam* struck a mine and sank on October 27th, 1944, off Brunei, North Borneo.

BAIGORRY

Cie. des Chargeurs Francais; 1889; *W. Doxford & Sons*; 2,161 tons; 280x38-3x18-3; 197n.h.p.; triple-expansion engines.
The French steamship *Baigorry* was sunk by a German submarine in the Bay of Biscay on April 25th, 1917.

BAIKAL

U.S.S.R.; 1919; *Dunlop Bremner & Co.*; 2,554 tons; 302-9X 42-9x20-7; 175 n.h.p.; triple-expansion engines.
The steamship *Baikal* struck a rock and sank on November 15th, 1939, near Spitsbergen.

BAINSIZZA

Soc. Anon. E. V. Parodi; 1930; *Stabilimento Tecnico*; 7,933 tons; 446-8x58-4x29-3; 407n.h.p.; compound engines.
The Italian steamer *Bainsizza* was torpedoed and bombed by British aircraft on October 15th, 1941, and sank the next day about 100 miles N.N.W. of Tripoli.

BAJA CALIFORNIA

Mayan S.S. Corp.; 1914; *R. Thompson & Sons*; 1,648 tons; 265-6x38-5x18; 175n.h.p.; triple-expansion engines.
The Honduran steamship *Baja California* was torpedoed and sunk by a German submarine on July 19th, 1942, in the Gulf of Mexico.

BAKANA

British & African S.N. Co.; 1894; *Naval Constr. & Arm. Co.*; 2,802 tons; 336x39-3x22-3; 265 n.h.p.; triple-expansion engines.
The British cargo ship *Bakana* was carrying a cargo of wood from the W. coast of Africa to Liverpool. She was wrecked on August 27th, 1913, at Half Assinie.

BAKUSTANDARD

Associated Oil Carriers; 1903; *Armstrong Mitchell & Co.*; 3,708 tons; 330-6x43x32; 293 n.h.p.; 9-5 knots; triple-expansion engines.
The tanker *Baku Standard* was torpedoed and sunk by a submarine 5 miles S. by W. i. W. of Tod Head, Kincardineshire, on February 11th, 1918. Twenty-four men were killed. The captain was among the survivors.

BAKUIN

William Keswick; 1886; *W. Gray & Co.*; 1,669 tons; 260-4X 36x17-5; 203 n.h.p.; triple-expansion engines.
The British oil tanker *Bakuin* was burned in September, 1902, in Callao Bay where she had arrived from Talara with a cargo of petroleum.

BALAGUIER

Soc. Charbons Agglomerés Littoral Méditerranien; 1904; *Rop-ner & Son*; 2,293 tons; 300x43-1x19-5; 233 n.h.p.; triple-expansion engines.
The French steamship *Balaguier* was torpedoed and sunk by a German submarine off S. Ireland on March 15th, 1917.

BALAKANI

Petroleum Steamship Co.; 1899; *Sir J. Laing & Sons*; 3,696 tons; 335 x 45x28; 326 n.h.p.; 10 knots; triple-expansion engines.
The tanker *Balakani* was mined and sunk half-a-mile S.W. of the South Longsand Buoy on September 9th, 1915. Six men were killed; The captain was among the survivors.

BALCLUTHA

1860; *Greenock*; 456 tons; 145x26x9-5 (approx.); steam engines.
The Australian steamship *Balclutha* was one of four small vessels which inaugurated a steamer service between Australia and San Francisco in the early 1860's. Later she was taken over by the Australian Steam Navigation Co., and ran under that company's

flag for many years. She was sold shortly before her loss, which occurred in October 1881.

The *Balclutha* left Melbourne for Sydney with a crew of 22, and a very heavy cargo of blue stone. Shortly after leaving port she encountered a violent S.W. gale, and was last seen off Gabo Island, N.S.W., swept by tremendous seas. She foundered with all hands.

BALDUR

German Government; 1920; *J. Blumer & Co.*; 3,594 tons; 356-3x48-7x23-9; triple-expansion engines.
The German steamship *Baldur*, formerly the Norwegian *Jacob Christensen*, was torpedoed and sunk by a British submarine on May 23rd, 1944, off Castro Urdiales.

BALEARES

Spanish Nationalist Navy, heavy cruiser; 1931; *Ferrol Dockyard*; 10,000 tons; 636x64x17-3; 90,000 i.h.p.; 33 knots; turbine engines; Yarrow boilers; eight 8 in. guns, eight 4 • 7 in., eight 2pdr., 12 T.T.; 2 aircraft.

The *Baleares* was one of two 10,000 ton, 8 in.-gun cruisers, possessed by Spain at the outbreak of the Civil War, 1936-39. They were built at Ferrol Dockyard to the designs of Sir Philip Watts, and carried an official complement of 765 officers and men. The *Baleares* and her sister ship, the *Canarias*, fell into the hands of the Nationalists. A battleship, the *Espana* (which see) and two medium cruisers formed the bulk of this fleet, the Government having one cruiser less, but many more destroyers and submarines.

On March 6th, 1938, when 70 miles off Cape Palos, the *Baleares* was engaged with several Government cruisers and destroyers. One of the latter hit the *Baleares* with a torpedo, causing her to sink with about 300 of her crew. The British destroyers *Boreas* and *Kempenfelt*, on patrol duty, saved about 400 officers and men, in the course of which they lost one of their own men who was killed and four wounded. This was due to the Government bombers attacking the sinking cruiser after their ships which failed to press home their advantage had steamed away.

A more detailed account of the fighting at sea is given under the *Jaime Primo*, the Government battleship which blew up in Cartagena harbour.

BALENO

Italian Navy, destroyer; 1931; *Quarnaro*; 1,220 tons; 315-5X 30-5x10-2; 44,000 s.h.p.; 38 knots; turbine engines; 3-drum boilers; four 4-7 in. guns, four 37 mm., four 13 mm., 6 T.T.
On April 16th, 1941, an Italian convoy of five merchantmen escorted by destroyers *Luca Tarigo* and *Baleno* was proceeding from Sicily to Tripoli when it was intercepted by the British 14th Flotilla comprising the destroyers *Jervis*, *Janus*, *Mohawk* and *Nubian*. All the merchant ships as well as the escorting destroyers were sunk with a heavy loss of life.
The only British loss was the *Mohawk* which was torpedoed and sank later. I The full story of the action is told under the *Luca Tarigo*.

BALHOLM

J. M. Johannessen; 1917; *J. Meyer's S.B. Co.*; 1,044 tons; 214-9x33-3x14-2; 116n.h.p.; triple-expansion engines.
The Norwegian steamship *Balholm* was wrecked at Akra, Faxø Bay, Iceland, on the night of December 6th, 1926, in a severe storm. There were no survivors.

BALKAN

Cie. Marseillaise de Nav. a Vap.; 1882; *A. M. Millan & Son*; 1,709 tons; 260 x 37-1x23; 231 n.h.p.; compound engines.
The French steamship *Balkan* was torpedoed and sunk by a submarine in the Mediterranean on August 16th, 1918.

BALKAN

Soc. Commercial Bulgare de Nav. a Vap.; 1914; *Ch. & Atel. de Provence*; 3,838 tons; 353-5x46-6x23-1; 295 n.h.p.; triple-expansion engines.
The Bulgarian steamship *Balkan* was torpedoed and sunk by a British submarine on December 23rd, 1943, S. of Lemnos.

BALKIS

BALKIS

Den Nor she Middelhavslinje A/S; 1939; A/S Akers Mek. Verks.; 2,161 tons; 315-2x44-3x16-7; 472 n.h.p.; oil engines.
The Norwegian motorship *Balkis* was torpedoed and sunk by a German submarine on April 10th, 1942, off the north-east coast of Brazil. Seven of her crew were killed.

BALLADIER

U.S. War Shipping Administration; 1919; Submarine Boat Corp.; 5,279 tons; 324X46' • 2X25; 386 n.h.p.; turbine engines.
The steamship *Balladier* was torpedoed and sunk by a German submarine on August 15th, 1942, on a voyage from New York to Reykjavik. Eleven of her crew of 35 were lost.

BALLARAT

Peninsular & Oriental Steam Navigation Co.; 1911; Caird & Co.; 11,120 tons; 500-1x62-8x37-8; 9,000 i.h.p.; 14 knots; quadruple-expansion engines; 6 in. guns.
The troopship *Ballarat*, taken over from the P. & O. company, was approaching the entrance to the Channel on April 25th, 1917, when she was torpedoed by a German submarine. Including troops, who were all reinforcements from Victoria for the 2nd and 4th Australian Brigades, there were some 1,750 persons on board at the time. The day being Anzac Day the men were parading for a memorial service on board when, at 2.5 p.m., the torpedo struck the ship. One propeller was smashed, a 6 in. gun destroyed, the main steam pipe fractured and the after watertight bulkhead blown in. The *Ballarat* at once began to settle in the water but admirable discipline was maintained and the men, who had been exercised at boat drill repeatedly by the colonel of the Victorian Scottish who was in command of the draft, went to their places in splendid order.

There was no loss of life, all the troops and crew being taken off by their own boats or by escorting destroyers. The captain of the *Ballarat*, Cdr. G. W. Cockman, R.N.R., D.S.O., received the congratulations of the Admiralty on this splendid feat, and the Australian troops were congratulated by King George V.

BALLOGIE

J. & A. Davidson; 1889; Short Bros.; 1,207 tons; 240x33-2x14-5; 202 n.h.p.; 8 knots; triple-expansion engines.
The steamship *Ballogie* was torpedoed and sunk by a German submarine 1¹ miles N.E. of Filey, Yorkshire, on November 9th, 1917. The captain and twelve men were killed.

BALMORE

John Bruce & Co.; 1920; Grangemouth Dockyard Co.; 1,925 tons; 280-2x41-9x19; 230 n.h.p.; triple-expansion engines.
The British steamship *Balmore* was bombed and sunk by German aircraft on November 11th, 1940, about 300 miles S.W. of Ireland. All of the crew of 27 were lost.

BALNACRAIG

Grampian S.S. Co.; 1882; Hall, Russell & Co.; 1,629 tons; 250-1x34-2x18-2; 150 n.h.p.; compound inverted engines.
The British cargo ship *Balnacraig* foundered on December 10th, 1886, off the North Foreland while on a voyage from Antwerp to Odessa.

BALTALINN

United Baltic Corporation; 1920; Ailsa Shipbuilding Co.; 1,303 tons; 245x39x15; 292 n.h.p.; 13 knots; triple-expansion engines.
The steamship *Baltalinn*, Capt. C. W. Brown, was torpedoed and sunk by a submarine on September 20th, 1941, when in convoy in the North Atlantic. Eighteen men were killed. Capt. Brown was among the survivors.

BALTARA

United Baltic Corporation; 1909; Harland & Wolff; 2,379 tons; 300-7x38-2x22-9; 240 n.h.p.; quadruple-expansion engines.
The British ship *Sahara* was wrecked on January 11th, 1929, at the mouth of the River Vistula while on a voyage from Libau to London.

BALTENLAND

German Government; 1904; Bar tram & Sons; 3,042 tons; 339X48 • 1X22; triple-expansion engines.
The German steamship *Baltenland*, formerly the Latvian *Valdona*, was torpedoed and sunk by a Russian submarine on December 27th, 1944, in the Eastern Baltic.

BALTIMORE CITY

Furness, Withy & Co.; 1888; A. Stephen & Sons; 2,334 tons; 290X39-1x22-8; 189 n.h.p.; triple-expansion engines.
The cargo ship *Baltimore City* was wrecked in July, 1897, in the Straits of Belle Isle. She was on a voyage from Montreal to Manchester.

BALTISTAN

F. C. Strick & Co.; 1937; J. Readhead & Sons; 6,803 tons; 453-9x58-5x29-6; 914 n.h.p.; 13 knots; triple-expansion engines & L.P. turbine.
The steamship *Baltistan*, Capt. J. H. Hedley, was torpedoed and sunk by a submarine on February 27th, 1941, about 400 miles W. of Valentia Island, Ireland. Capt. Hedley, 46 of her crew and four passengers were killed.

BALTONIA

United Baltic Corporation; 1925; Akers Mek. Verks.; 2,013 tons; 303x42-2x17-1; 317 n.h.p.; 12 knots; triple-expansion engines.
The steamship *Baltonia*, Capt. J. Prosser, was mined and sunk on February 7th, 1943, in the neighbourhood of Tangier. Capt. Prosser and ten of the crew were killed.

BALUCHISTAN

Strick Line; 1940; J. Readhead & Sons; 6,992 tons; 454x58-5X29 • 5; 706 n.h.p.; triple-expansion engines & L.P. turbine.
The British steamship *Baluchistan* was torpedoed, shelled and sunk by a German submarine on March 26th, 1942, on a voyage from Table Bay to Freetown.

BALZAC

Akties. Bonheur; 1913; Nylands Vcerksted; 1,720 tons; 264-9X 40-2x18-6; 153 n.h.p.; triple-expansion engines.
The Norwegian steamship *Balzac* was torpedoed and sunk by a German submarine in the North Sea on July 12, 1917.

BALZAC

Lampart & Holt Line; 1920; D. & W. Render son & Co.; 5,372 tons; 400-3x52-3x28-4; 517 n.h.p.; triple-expansion engines.
The British steamship *Balzac* was intercepted and sunk by a German raider on June 22nd, 1941, about 400 miles E. of Maceio, Brazil. Three lives were lost.

BALZAC

Italian Government; 1928; Burntisland S.B. Co.; 1,947 tons; 291-7x43-2x19-1; 217 n.h.p.; triple-expansion engines.
The Italian steamship *Balzac*, formerly the British *Tadorna*, was bombed and sunk by U.S. aircraft on March 7th, 1943, 20 miles N.N.E. of Zembra Island.

BAMAKO

Cie. de Nav. Paquet; 1930; Akt. Burmeister & Wain; 2,357 tons; 281-9x45-1x21-1; 271 n.h.p.; oil engines.
The French motorship *Bamako* was torpedoed and sunk by a submarine on April 9th, 1943, soon after leaving Dakar. Seventeen of her crew were killed.

BAMBORO

J. E. Bowser & Son; 1890; Palmers' Co.; 2,016 tons; 265-5x39-7x15-9; 200 n.h.p.; triple-expansion engines.
The British steamship *Bamboro* was wrecked in April, 1894, near Barrington, N.S. She was on a voyage from Palermo to Boston.

BAMSE

Blow Richards & Co.; 1881; Strand Slipway Co.; 1,001 tons; 226-3x32x16-1; 125 n.h.p.; 8 knots; compound engines.
The Norwegian steamship *Bamse* was managed for the British Shipping Controller by the firm of Blow Richards & Co. On

October 2nd, 1918, when 5½ miles E.N. of the Lizard the vessel was torpedoed and sunk by a submarine. Eleven men were killed. The captain was among the survivors.

BAN HO GUAN

N.V. Handel Maats. Tjin Liong; 1908; Maats. Fyenoord; 1,693 tons; 270-3x40-2x16-9; 66 n.h.p.; triple-expansion engines.

The Dutch steamship *Ban Ho Guan* was sunk by the Japanese on March 1st, 1942, shortly after leaving Padang, Sumatra, for Australia.

BANDAR SHAHPOUR

StrickLine; 1927; W. Gray & Co.; 5,236 tons; 400X53-5x27-2; 590n.h.p.; triple-expansion engines.

The British steamship *Bandar Shahpour* was torpedoed and sunk by a German submarine on April 30th, 1943, between Takoradi and Freetown.

BANDERAS

Compañia Naviera Vascongada; 1899; W. Pickersgill & Sons; 2,140 tons; 286x42-9x18-7; 950i.h.p.; 9-5 knots; triple-expansion engines.

On February 18th, 1940, when 6 miles off Cape Villano the *Banderas* was torpedoed by a German submarine and sank with 22 out of her crew of 29. A Corunna fishing smack picked up the seven survivors, of whom the second officer and one seaman were badly injured. Spain was not at war with Germany.

BANDOENG MARU

Nanyo Kaiun K.K.; 1920; Yokohama Dock Co.; 4,003 tons; 345x50x29; 327 n.h.p.; triple-expansion engines.

The steamship *Bandoeng Maru* was torpedoed and sunk by the U.S. submarine *Grouper* on December 17th, 1942, W. of Bougainville Island.

BANDON

City of Cork Steam Packet Co.; 1910; Swan Hunter; 1,456 tons; 266x37-2x17-4; 394n.h.p.; 14-5 knots; triple-expansion engines.

The Irish packet *Bandon* was torpedoed and sunk by a German submarine 2½ miles S.W. of Mine Head, Waterford, on April 13th, 1917. Twenty-eight persons were killed. The captain was among the survivors.

BANEI MARU No. 2

Hokkaido Tanko K.K.; 1917; Nitta Co.; 1,186 tons; 220x33-5x18-5; 88 n.h.p.; triple-expansion engines.

The steamship *Banei Maru No. 2* was torpedoed and sunk by the U.S. submarine *Tautog* on May 12th, 1944, off Tamagawa, Japan.

BANEI MARU No. 3

Hokkaido Tanko K.K.; 1919; Nitta Co.; 1,778 tons; 265x36x20-9; triple-expansion engines.

The Japanese steamship *Banei Maru No. 3* struck a mine and sank on July 22nd, 1945, off Funakawa, Japan.

BANEI MARU No. 6

Hokkaido Tanko K.K.; 1917; Nitta Co.; 1,191 tons; 220x33-5x18-5; 88n.h.p.; triple-expansion engines.

The steamship *Banei Maru No. 6* was sunk by a U.S. carrier-based aircraft on November 25th, 1944, in the Lingayen Gulf.

BANFFSHIRE

British & South American S.S. Co.; 1912; W. Doxford & Sons; 6,479 tons; 430x53-5x34-6; 575n.h.p.; triple-expansion engines & L.P. turbine.

The British steamship *Banffshire* was torpedoed and sunk by a German submarine on September 30th, 1943, on a voyage from Colombo to Aden.

BANGKOK MARU

Osaka Shosen K.K.; 1937; Mitsubishi Jukogyo; 5,351 tons; 376-3x55-8x32-8; 488 n.h.p.; oil engines.

The *Bangkok Maru*, serving as an auxiliary cruiser of the Japanese Navy, was carrying 1,200 troops to Tarawa, Gilbert Islands, when

she was torpedoed and sunk by the U.S. submarine *Pollack*, Cdr. B. E. Lewellen, U.S.N. The attack took place off the island of Jaiuit on May 20th, 1943. About one third of those on board the auxiliary cruiser were drowned. The survivors landed on Jaiuit, where they were marooned for the rest of the war.

BANJOEWANGI

Koninkl. Paketv. Maats.; 1938; N.V. Boele's Scheepsw.; 1,279 tons; 215x39-7x15-8; 168n.h.p.; oil engines.

The Dutch motor vessel *Banjoewangi* was on passage from Calcutta to Karachi on April 6th, 1942. She was intercepted by a Japanese cruiser near Vizagapatam and sunk by gunfire, with the loss of 13 lives.

BANSEI MARU

Kusakabe Kisen K.K.; 1900; W. Gray & Co.; 3,120 tons; 324-5x47-1x22-4; triple-expansion engines.

The steamship *Bansei Maru* struck a mine and sank on March 17th, 1945, off Shanghai.

BANSEI MARU No. 6

Nakamura Mannosuke; 1918; 1,269 tons; 220-8x34x19-4.

The wooden schooner *Bansei Maru No. 6* foundered in heavy weather on December 23rd, 1921, on a voyage from Wakamatsu to Nanao, with coal.

BANSEI MARU No. 10

Nakamura Mannosuke; 1918; 1,039 tons; 223-2x34-5x19.

The wooden schooner *Bansei Maru No. 10* left Kushiro on November 23rd, 1921, for Tshihama, with coal and was never heard of again.

BANSHU MARU No. 2

Nishi Taiyo Gyogyo K.K.; 1,000 tons.

The *Banshu Maru No. 2* was torpedoed and sunk by the U.S. submarine *Tautog* on December 25th, 1942, off the west coast of Timor.

BANSHU MARU No. 7

1920; Harbour Marine; 5,430 tons; 399-8x52-2x28-5; 839 n.h.p.; oil engines.

The motor vessel *Banshu Maru No. 7* was torpedoed and sunk by the U.S. submarine *S 35* on July 2nd, 1943, 150 miles N.W. of Alaid, Kurile Islands.

BANTRY

J. Kelly, W. Clint & Sir Samuel Kelly; 1904; Murdoch & Murray; 602 tons; 180-3x27x10-7; 80 n.p.h.; compound engines.

The British ship *Bantry*, Capt. Henry C. Ryding, was carrying cement from London to Poole. On March 25th, 1934, she was in collision with the *Cardito* and sank about 3½ miles W. of Owers lightship. Six lives were lost.

BANYEI MARU

Sugaya Kisen Kaisha; 1891; R. Dixon & Co.; 2,779 tons; 312x39-2x24-6; 258 n.h.p.; triple-expansion engines.

The steamship *Banyei Maru*, on voyage from Muroran to Saikoshin with coal, ran into heavy weather. S.O.S. calls were picked up on February 19th, 1934, but these ceased at noon and nothing more was ever heard of the ship.

BAOULE

Chargeurs Reunis; 1921; Atel. & Ch. de la Loire; 5,874 tons; 393-6x55-9x29; 325n.h.p.; triple-expansion engines.

The French steamship *Baoule* was torpedoed and sunk by a German submarine on October 31st, 1939, about 45 miles W.N.W. of Corunna. Thirteen of her crew were killed.

BARBACENA

Lloyd Brasileiro; 1909; J. C. Tecklenborg A.G.; 4,772 tons; 392-5x51-9x27-3; 639 n.h.p.; quadruple-expansion engines.

The Brazilian steamship *Barbacena* was torpedoed and sunk by a German submarine on July 28th, 1942, on a voyage from Santos to Trinidad. Six of her crew were killed.

BARBARA

BARBARA

A.H. Bull & Co.; 1913; W. Cramp & Sons; 4,637 tons; 384X 50-2x26-6; 2,650 i.h.p.; 10 knots; triple-expansion engines.

The American steamship *Barbara*, Capt. Walter Hudgins, was torpedoed and sunk by a submarine off Santo Domingo, Dominican Republic, on March 7th, 1942. Nineteen men were killed. Capt. Hudgins was among the survivors. The vessel was not in convoy at the time of the sinking.

BARBARA MARIE

I. Morrison & Son; 1928; Sir John Priestman & Co.; 4,223 tons; 365x52x25; 375 n.h.p.; 10 knots; triple-expansion engines.

The steamship *Barbara Marie*, Capt. A. S. Smith, was torpedoed and sunk by a submarine on June 12th, 1940, about 225 miles W.N.W. of Cape Finisterre. Capt. Smith and 30 of his crew were killed.

BARBARIGO

"to/w" Soc. Anon, di Nov.; 1930; Cant. Nav. Triestino; 5,293 tons; 440-7x56-2x23-5; 1,219 n.h.p.; oilengines.

The motor vessel *Barbarigo* was torpedoed and sunk by a British submarine on July 15th, 1941, 8 miles S. of Pantelleria.

BARBERRYS

Runciman; 1920; Uchida S.B. & Eng. Co.; 5,170 tons; 399-9 X 54-7x27-6; 513 n.h.p.; triple-expansion engines.

The British steamship *Barberrys* was torpedoed and sunk by a German submarine on November 26th, 1942, on a voyage from New York to Glasgow. The Commodore, five of his staff, 22 crew and four gunners were lost.

BARBRO

Dmpsk. Akties. Segelfoss; 1891; E. Withy & Co.; 2,356 tons; 288-6x38x19-8; 217 n.h.p.; triple-expansion engines.

The Norwegian steamship *Barbro* was torpedoed and sunk by a German submarine in the English Channel on October 14th, 1917.

BARBRO

Rederi A/S Mascot; 1934; Gotaverken A/B; 6,325 tons; 408-1x55-2x33-9; 489 n.h.p.; oilengines.

The Norwegian tanker *Barbro* was torpedoed and sunk by a German submarine on September 20th, 1941, on a voyage from New York to Stanlow with 9,000 tons of petrol. All 34 men of her crew were lost.

BARCELONA

Westcott & LauranceLine; 1882; J.Laing; 2,232 tons; 295-7X 37-9x20; 261 n.h.p.; compound engines.

The British freighter *Barcelona* foundered on November 28th, 1912, in the Bay of Biscay. She was carrying a cargo of barley from Braila to Leith.

BARENFELS

Deutsche Dampfschiff. Ges. Hansa; 1921; J.C. Tecklenborg A.G; 7,569 tons; 468-5x58-6x32-5; 692 n.h.p.; triple-expansion engines & L.P. turbine.

The German steamship *Barenfels* was torpedoed and sunk by a British submarine on April 14th, 1944, at Takseraag, Norway.

BARFONN

SigvalBergesen; 1931; Gotaverken A/B; 9,739 tons; 475-6X 64-2x37-8; 724 n.h.p.; oil engines.

The Norwegian motor tanker *Barfonn*, sailing from New York to Stanlow with 13,000 tons of gas oil, was torpedoed and sunk by a German submarine on October 17th, 1941. Sixteen of her crew of 38 were killed.

BARHAM

British Navy, dreadnought-battleship; 1914; John Brown & Co.; 31,000 tons; 643-7x104x33-5; 75,000 s.h.p.; 25 knots; turbine engines; 3-drum boilers; eight 15 in. guns, twelve 6 in., eight 4 in., four 3pdr., 15 m.g., 2 T.T., 1 aircraft.

In 1941 the battleship *Barham*, Capt. G. C. Cooke, was the flagship of Vice-Admiral H. O. Pridham-Whippell, commanding in the Eastern Mediterranean.

On November 25th, 1941, at about 4.25 p.m. the battle-squadron consisting of the *Barham*, *Queen Elizabeth* and *Valiant* was carrying out exercises off the Egyptian coast. The vessels were in the act of altering course together, the speed being 17 knots, when a submarine was sighted from the *Valiant* at a distance of 700 yards. Four torpedoes were discharged at the *Barham*, all of which appeared to strike. The battleship rolled over on her side and sank in five minutes, her magazines exploding as she went down.

Only about 300 were saved, including Admiral Pridham-Whippell. Those lost numbered 56 officers, including Capt. Cooke, 658 ratings and 134 marines, a total of 848. The *Valiant* made an unsuccessful attempt to ram the submarine.

BARITA

Porteous & Senior; 1873; J.Laing & Co.; 1,178 tons; 233-5 X 30-5x17-8; 120 h.p.; compound engines.

The steamship *Barita* was sunk in a collision with an Australian mail steamship on April 9th, 1880. The collision took place near Galatz, the *Barita* sinking with the loss of 16 lives.

BARNBY

James Westoll; 1906; J. Priestman & Co.; 3,868 tons; 350X 49x19-1; 357 n.h.p.; triple-expansion engines.

The British steamship *Barnby* was wrecked on May 11th, 1911, at East Point, Maldonado, while on a voyage from Cardiff to Buenos Aires with a cargo of coal.

BARNBY

Rowland and Marwood'sS.S. Co.; 1940; Short Bros.; 4,813 tons; 427 X 54x23-7; 359 n.h.p.; triple-expansion engines.

The British steamship *Barnby* was torpedoed and sunk by a German submarine on May 22nd, 1941, on a voyage from Halifax to Hull.

BARNTON

Barnton Steamship Co. (Gillespie & Nicol); 1904; Mackie & Thomson; 1,858 tons; 280-3x40-1x18-3; 192 n.h.p.; 9 knots; triple-expansion engines.

The steamship *Barnton* was torpedoed and sunk by a submarine 40 miles W. by S. of the Chassiron Light on April 24th, 1917. Fourteen men were killed. The captain was among the survivors.

BARON AILSA

Kelvin Shipping Co. (H. Hogarth & Sons); 1912; Greenock & Grangemouth Dockyard Co.; 1,836 tons; 279-2x40-1x18-8; 175 n.h.p.; 8-5 knots; triple-expansion engines.

The steamship *Baron Ailsa* was torpedoed and sunk by a submarine 18 miles W.N.W. of the Smalls, off Pembrokeshire, on May 9th, 1918. Ten men were killed. The captain was among the survivors.

BARON ARDROSSAN

Peter Rowe & Sons; 1881; T. Turnbull & Son; 1,376 tons; 243-5x34x17-9; 168 n.h.p.; compound engines.

The British collier *Baron Ardrossan* was wrecked in August, 1898, on rocks off Porthgain, Pembrokeshire, while on a voyage from the Clyde to St. Malo.

BARON ARDROSSAN

H. Hogarth & Sons; 1932; D. & W. Render son & Co.; 3,896 tons; 360-9x51-7x23-4; 249 n.h.p.; triple-expansion engines.

The *Baron Ardrossan* was on a voyage from Calcutta and Table Bay to Hull when, on December 30th, 1940, she went aground at Sandray Island and broke her back.

BARON BLYTHSWOOD

Kelvin Shipping Co. (H. Hogarth & Sons); 1929; Lithgows; 3,668 tons; 350-7x50-2x23-3; 249 n.h.p.; 11 knots; triple-expansion engines.

The cargo ship *Baron Blythswood*, Capt. J. M. Davies, was in the North Atlantic in convoy when she was torpedoed and sunk by a German submarine on September 20th, 1940. Thirty-four, including Capt. Davies, were killed.

BARON CARNEGIE

Kelvin Shipping Co. (H. Hogarth & Sons); 1925; DunlopBrenner & Co.; 3,178 tons; 336-3x48-5x22-2; 225 n.h.p.; 11 knots; triple-expansion engines.

The cargo ship *Baron Carnegie*, Capt. G. S. Gumming, was in

convoy off the Mumbles on June 11th, 1941, when she was bombed by German aircraft. Twenty-five men were killed. Capt. Cumming was among the survivors. The ship was taken in tow but sank before reaching port.

BARON COCHRANE

Hogarth Shipping Co.; 1927; Ayrshire Dockyard Co.; 3,385 tons; 341-8x48-6x22-7; 240 n.h.p.; triple-expansion engines. The British steamship *Baron Cochrane*, Capt. Anderson, was torpedoed and sunk by a German submarine on December 28th, 1942, about 300 miles N. of the Azores.

BARON DE CATELIN

Christos M. Vlassis; 1872; Schlesinger Davis & Co.; 1,278 tons; 234 • 3 x 30 • 5 x 21 • 6; 167 n.h.p.; compound engines. The Greek steamship *Baron de Catelin* dragged her anchors during a heavy storm on January 18th, 1931, and was wrecked against the breakwater at Zonguldak.

BARON DECHMONT

Hogarth Shipping Co.; 1929; Ardrossan D.D. & S.B. Co.; 3,675 tons; 350-6x50-2x23-2; 249 n.h.p.; 11 knots; triple-expansion engines. The cargo ship *Baron Dechmont*, Capt. D. MacCallum, was off the north coast of Brazil on January 3rd, 1943, when she was torpedoed and sunk by a submarine. The vessel was not in convoy at the time. Seven of her crew were killed; the captain was taken prisoner. Thirty-six survivors landed N.W. of Ceara the next day.

BARON ERSKINE

Kelvin Shipping Co. (H. Hogarth & Sons); 1930; D. & W. Henderson & Co.; 3,657 tons; 350x50-2x23-2; 249 n.h.p.; 10 knots; triple-expansion engines. The cargo ship *Baron Erskine*, Capt. G.S. Cumming, in convoy in the North Atlantic, was unable to maintain her speed owing to bad coal and fell out of convoy on January 1st, 1942. She was never seen again and was assumed to have been sunk by a submarine on or about the 10th. Capt. Cumming commanded the *Baron Carnegie* when she was bombed and sunk off the Mumbles in June, 1941.

BARON GAUTSCH

Lloyd Austriaco; 1908; Gourlay Bros.; 2,069 tons; 270x39-lx 17-1; 565 n.h.p.; 16 knots; triple-expansion engines. The *Baron Gautsch* left Lussinpiccolo, S. of the Gulf of Quarnero, for Trieste on Thursday, August 11th, 1914. The ship was carrying a little over 300 persons and on the 13th struck a mine which exploded and killed 20 men and damaged the ship to such an extent that she sank soon after. About 150 were drowned.

BARON GLAMIS

Hogarth Shipping Co.; 1894; A. Rodger & Co.; 2,432 tons; 301-2x40-6x16-7; 206 n.h.p.; triple-expansion engines. The British cargo ship *Baron Glamis* was wrecked in January, 1903, at Corsewall Point, Wigtown, while on a voyage from the Clyde to Buenos Aires.

BARON GORDON

Hogarth Shipping Co.; 1903; C. Cornell & Co.; 4,236 tons; 375x49-5x26-5; 320 n.h.p.; triple-expansion engines. The British cargo ship *Baron Gordon* was wrecked in August, 1904, on Bombay Reef. She was on a voyage from Hong Kong to Sourabaya in ballast.

BARON HUNTLY

Kelvin Shipping Co.; 1894; A. Rodger & Co.; 1,398 tons; 235-9x33-4x15; 144 n.h.p.; triple-expansion engines. The British cargo ship *Baron Huntly* foundered in October, 1906, near Cascaes. She was carrying a cargo of pyrites from Huelva to Dublin.

BARON INNERDALE

Hogarth Shipping Co.; 1896; A. Rodger & Co.; 3,344 tons; 335x43-5x27-2; 292 n.h.p.; triple-expansion engines. The *Baron Innerdale* sank in a collision on October 27th, 1914, 100 miles N. of Gebelteir. She was on a voyage from Port Said to Calcutta with a cargo of salt.

BARON JEDBURGH

Hogarth Shipping Co.; 1936; Lithgows; 3,656 tons; 386-4x 53-2x22-5; 250 n.h.p.; triple-expansion engines. The British steamship *Baron Jedburgh* was torpedoed and sunk by a German submarine on March 10th, 1945, on a voyage from Trinidad to Table Bay.

BARON KELVIN

Kelvin Shipping Co. (H. Hogarth & Sons); 1924; Chas. Cornell & Co.; 3,081 tons; 332-2x48-2x22-1; 225 n.h.p.; 10 knots; triple-expansion engines. The cargo ship *Baron Kelvin*, Capt. W. Ewing, was in convoy near Gibraltar on October 19th, 1941, when she was torpedoed and sunk by a submarine. Twenty-six men were killed. Capt. Ewing was among the survivors.

BARON KINNAIRD

Hogarth Shipping Co.; 1927; Napier & Miller; 3,355 tons; 340-1x48-7x22-7; 225 n.h.p.; 10 knots; triple-expansion engines. The cargo ship *Baron Kinnaird*, Capt. L. Anderson, on a voyage from Loch Ewe to Macoris with a crew of 36 and six gunners, straggled from convoy on March 6th, 1943, about 700 miles E. of Newfoundland. On the 12th, when she was about 300 miles N.W. of her last sighted position, she was torpedoed and sunk by a German submarine with the loss of all on board. Capt. Anderson was in command of the *Baron Cochrane* when she was torpedoed some months previously.

BARON LOUDOUN

Kelvin Shipping Co.; 1925; Lithgows; 3,164 tons; 336-1x 48-5x22-4; 225 n.h.p.; triple-expansion engines. The British steamship *Baron Loudoun* was torpedoed and sunk by a German submarine on June 19th, 1940, on a voyage from Bona to Barrow.

BARON LOVAT

Hogarth Shipping Co.; 1926; Ayrshire Dockyard Co.; 3,395 tons; 342-1x48-6x22-7; 225 n.h.p.; triple-expansion engines. The British steamship *Baron Lovat* was torpedoed and sunk by a German submarine on June 6th, 1941, on a voyage from the Tyne to Huelva.

BARON NAIRN

Kelvin Shipping Co.; 1925; Lithgows; 3,164 tons; 336-lx 48-5x22-4; 225 n.h.p.; triple-expansion engines. The British steamship *Baron Nairn* was torpedoed and sunk by a German submarine on June 7th, 1941, on a voyage from the Clyde to Nuevitas.

BARON NEWLANDS

Hogarth Shipping Co.; 1928; Ayrshire Dockyard Co.; 3,386 tons; 341-8x48-6x22-7; 240 n.h.p.; 10 knots; triple-expansion engines. The cargo ship *Baron Newlands* was off the coast of Liberia, West Africa, on March 16th, 1942, when she was torpedoed and sunk by a submarine. Eighteen men were killed.

BARON OGILVY

Hogarth Shipping Co.; 1926; Ayrshire Dockyard Co.; 3,391 tons; 342x48-6x22-7; 225 n.h.p.; 10 knots; triple-expansion engines. The cargo ship *Baron Ogilvy*, Capt. H. Steven, was some distance S. of Cape Palmas, Liberia, on September 29th, 1942, when she was torpedoed and sunk by a submarine. Eight men were killed and three wounded. Capt. Steven was among the survivors. The *Baron Ogilvy* was not in convoy at the time.

BARON POLWARTH

H. Hogarth & Sons; 1929; Napier & Miller; 3,661 tons; 350-9x50-1x23-2; 249 n.h.p.; triple-expansion engines. The British ship *Baron Polwarth*, Capt. G. S. B. Moore, was carrying ore from Vizagapatam to Wokington when, on January 29th, 1937, she went ashore on Juan de Nova Reef, Mozambique, and broke her back.

BARON SEMPLE

BARON SEMPLE

Kelvin Shipping Co. (H. Hogarth & Sons); 1939; Chas. Cornell & Co.; 4,573 tons; 416-1x58-2x24-6; 250n.h.p.; 10 knots; triple-expansion engines.

The cargo ship *Baron Semple*, Capt. P. J. Carnie, left Rio de Janeiro for Freetown and the United Kingdom on 25th October, 1943. She was not heard of again and it is assumed that she was torpedoed and sunk by a submarine. The *Baron Semple* carried a crew of 52 and ten gunners.

BARON VERNON

Kelvin Shipping Co.; 1929; D. & W. Henderson & Co.; 3,642 tons; 350-1x50-2x23-2; 249 n.h.p.; triple-expansion engines.
The British steamship *Baron Vernon* was torpedoed and sunk by a German submarine on October 30th, 1942, on a voyage from Free-town to Belfast Lough.

BARRDALE

Reardon Smith Line; 1925; Greenock Dockyard Co.; 5,072 tons; 400-3x54-4x26-3; 475n.h.p.; triple-expansion engines.
The British steamship *Barrdale* was torpedoed and sunk by a German submarine on May 17th, 1942, on a voyage from New York to Table Bay.

BARREIRO

Portuguese Government; 1911; Schiffsw. V. Henry Koch; 1,738 tons; 277.7x39.2x17.9; 181 n.h.p. Triple expansion engines.
The Portuguese steamship *Barreiro* was sunk in the Bay of Biscay by a German submarine on May 1st, 1917.

BARRHILL

Barr Shipping Co.; 1912; R. Duncan & Co.; 4,972 tons; 405X 53x27-2; 415 n.h.p.; triple-expansion engines. The British steamship *Barrhill* was bombed and sunk by German aircraft on June 27th, 1941, off Great Yarmouth Roads.

BARRISTER

Charente S.S. Co. (T. & J. Harrisori); 1915; Chas. Cornell & Co.; 3,679 tons; 253-2x47-7x26-9; 367n.h.p.; triple-expansion engines.
The *Barrister* was torpedoed and sunk by a submarine on May 11th, 1917, seven miles S.W. of Mine Head, Waterford, while on a voyage from Pernambuco to Liverpool.

BARRISTER

Charente S.S. Co. (T. & J. Harrisori); 1916; Russell & Co.; 4,952 tons; 404-8x52-2x27-4; 474 n.h.p.; 13 knots; triple-expansion engines.
The steamship *Barrister* was torpedoed and sunk by a submarine 9 miles W. i N. of Chicken Rock, off the Isle of Man, on September 19th, 1918. Thirty men were killed. The captain was among the survivors.

BARRISTER

Charente S.S. Co. (T. & J. Harrisori); 1939; Lithgows; 6,348 tons; 445-5x56-5x29-6; 867n.h.p.; triple-expansion engines.
The British ship *Barrister* went ashore on January 4th, 1943, on Inishark Island, Co. Galway, and broke in two. Wreckage was sighted seven miles E. of the stranding.

BARROWMORE

Johnston Line; 1911; Richardson, Duck & Co.; 3,832 tons; 360-4x50x24-2; 302n.h.p.; 9-5 knots; triple-expansion engines.
The steamship *Barrowmore* was torpedoed and sunk by a German submarine 53 miles N.W. by W. i W. of Bishop Rock, on February 19th, 1918. The captain and 24 of his crew were killed.

BARRWHIN

Barr, Crombie & Co.; 1929; Greenock Dockyard Co.; 4,998 tons; 405-5x55-7x25-4; 473n.h.p.; 10-5 knots; triple-expansion engines & L.P. turbine.
The steamship *Barrwhin*, Capt. T. S. Dixon, was in the North Atlantic on October 29th, 1942, when she was torpedoed and sunk by a German submarine. Twelve men were killed. Capt. Dixon was among the survivors.

BARRY

United States Navy, destroyer; 1920; New York S.B. Corp.; 1,190 tons; 314x30x9-5; 26J)OOh.p.; 35 knots; turbine engines; four 4 in. guns, one 3 in., 12 T.T.
The United States destroyer *Barry* was badly bombed by the Japanese in operations off Okinawa on May 25th, 1945. Thirty of the crew were wounded and the destroyer so damaged as to be of no further use as a fighting unit. She was patched up and sent out with a skeleton crew to act as a decoy for Japanese bombers. On June 21st she was on her way to her decoy station in tow of the *LSM 59*, when a flight of Japanese aircraft bombed and sunk both ships. Fortunately there was little loss of life.

BARSAC

Worms & Cie.; 1902; Chant. Nav. Anversois; 1,806 tons; 260X38-1x20-2; 196 n.h.p.; triple-expansion engines.
The French steamship *Bar sac* was torpedoed and sunk by a German submarine in the English Channel on January 11th, 1918.

BARSAC

Worms & Cie.; 1923; Atel. & Ch. de la Seine Maritime; 1,049 tons; 215-9x30-6x12-6; 143 n.h.p.; triple-expansion engines.
The French steamship *Barsac* was taken over by the French Navy for use as an armed patrol ship. On January 6th, 1940, she ran ashore and was wrecked near Vigo, with the loss of 18 lives.

BARTOLOMEO COLLEONI

Italian Navy, light cruiser; 1930; Ansaldo; 5,069 tons; 555 -5 X 50-1x14-2; 95,000 i.h.p.; 40-9 knots; turbine engines; 3-drum boilers; eight 6 in. guns, six 3-9 in., eight 37 mm., eight 13 mm., 4 T.T.

On July 19th, 1940, two British destroyers, the *Hyper ion*, Cdr. H. St. L. Nicolson, and *Ilex* of 1,340 and 1,370 tons respectively, were cruising in the Mediterranean N.W. of Crete, when they sighted the fast Italian light cruisers *Bartolomeo Colleoni* and *Giovanni delle Bande Nere*, sister ships of 5,069 tons. The Italian vessels turned S.W. at a high speed, keeping out of range of the 4-7 in. guns of their enemy. Cdr. Nicolson was aware that the Australian cruiser *Sydney*, 6,830 tons, eight 6 in. guns, Capt. J. A. Collins, was about 40 miles distant and he at once called her up. About an hour later the *Sydney* put in an appearance and brought the *Bartolomeo Colleoni* under fire, compelling her to slow down so that she was overhauled by the two destroyers which found her badly damaged and in flames. They took off 545 survivors of the action and then sank her with torpedoes. Her commander, Capt. Umberto Novaro, died of his wounds on board a British hospital ship a short time afterwards.

Meanwhile the *Sydney* continued in chase of the *Giovanni delle Bande Nere* which she hit several times but failed to disable. Eventually the Italian cruiser made good her escape.

BARTON

United States Navy, destroyer; 1941; Bethlehem Steel Co., Quincy; 1,700 tons; 348-5x36x—; 50,000 s.h.p.; 36-5 knots; turbine engines; four 5 in. guns, four 40 mm., four 20 mm., 5 T.T.
The destroyer *Barton* of the United States Navy took part in the first phase of the battle of Guadalcanal, fought off that island on the night of November 12-13th, 1942. The Japanese were encountered in the Lengo Channel shortly before midnight and were engaged at close range. Early in the action the *Barton* was torpedoed and sunk.

The full story of the battle is told under the U.S. cruiser *Atlanta* and the Japanese battleship *Kirishima*.

BASIL

Booth S.S. Co.; 1895; Workman, Clark & Co.; 3,223 tons; 338 x 43 • 7 X 26 • 1; 334 n.h.p.; triple-expansion engines. The British steamship *Basil* was sunk in a collision on November 11th, 1917, S.E. of the Owen Light. She was carrying ammunition from Southampton to Boulogne.

BASILAN

Cia. Maritima; 1902; Gourlay Bros. & Co.; 2,969 tons; 335 X 43-2x20-6; 521 n.h.p.; triple-expansion engines. The Philippine steamship *Basilan* was sunk by Japanese action during the invasion of the Philippine Islands, December, 1941, to February, 1942.

BASILICATA

Italian Navy, light cruiser; 1914; Castellamare Dockyard; 2,480 tons; 272x41-7x16-7; 5,000i.h.p.; 16-5 knots; triple-expansion engines; cylindrical boilers; six 6 in. guns, five 14 pdr., 2 T.T.

The Italian light cruiser *Basilicata* was blown up at the entrance to the Suez Canal in Port Said harbour on August 13th, 1919. The canal was blocked but prompt measures were taken to ensure its clearance and after about three days the wreck was removed from the path of shipping. The *Basilicata* carried a crew of 250 among whom there were many casualties.

BASILISK

British Navy, destroyer; 1930; John Brown & Co.; 1,360 tons; 323x32-2x12; 34,000s.h.p.; 35 knots; turbine engines; 3-drum boilers; four 4-7 in. guns, two 2pdr., 5 m.g., 8 T.T.

The destroyer *Basilisk*, Cdr. M. Richmond, was among the very large number of ships engaged in evacuating the British Army from Dunkirk. At about 8.30 on the morning of June 1st, 1940, when off La Panne in company with the destroyer *Keith* and the minesweepers *Salamander* and *Skipjack*, the force was subjected to intensive bombing by about 40 German aircraft. The *Keith* and *Skipjack* were sunk, the latter with very heavy loss of life, and the *Basilisk* was badly damaged. She made for Dover, but sank on the way.

The exact number of troops and crew on board the *Basilisk* at the time of her loss is not known.

The full story of the Dunkirk Evacuation is told under the destroyer *Grafton*.

BASSA

Elder Dempster Lines; 1918; Armstrong Whitworth & Co.; 5,267 tons; 400-1X52-3X28-4; 2,800 i.h.p.; 11 knots; triple-expansion engines.

The cargo liner *Bassa*, Capt. G. E. Anderson, was torpedoed and sunk by a submarine on September 29th, 1940, in the North Atlantic about 500 miles W. of Achill Head, Co. Mayo. Capt. Anderson and 49 men were killed.

BASSANO

Ellemarfs Wilson Line; 1937; Swan, Hunter & Wigham Richardson; 2,687 tons; 401-5x55-8x25-7; 786n.h.p.; triple-expansion engines & LP turbine.

The British steamship *Bassano* was torpedoed and sunk by a German submarine on January 9th, 1941, on a voyage from New York to Glasgow.

BASSE INDRE

Soc. Anon. Chargeurs de VQuest; 1915; Campbelltown S.B. Co.; 1,329 tons; 230-8x35-8x15-6; 139n.h.p.; triple-expansion engines.

The French steamship *Basse Indre*, on a voyage from Cardiff to Corunna with coal, was sunk by an internal explosion on November 15th, 1927, in the Bay of Biscay.

BATAVIA

Koninkl. Paketv. Maats.; 1938; N.V. Scheepsw. Gebr. Pot; 1,279 tons; 215x39-7x15-8; 167n.h.p.; oilengines.

The Dutch motor vessel *Batavia* was bound from Calcutta to Karachi on April 6th, 1942, when she was intercepted and sunk by a Japanese cruiser 14 miles E. of Calingapatam.

BATAVIAMARU

Osaka Shosen K.K.; 1919; Osaka Iron Works; 4,392 tons; 345x49-8x28-1; 390n.h.p.; triple-expansion engines.

The steamship *Batavia Mam* was sunk by U.S. carrier-based aircraft on June 12th, 1944, about 150 miles W. of the Ladrone Islands.

BATAVIER V

Wm. H. Muller & Co.'s. Algemeene Scheepv. Maats.; 1902; Gourlay Bros. & Co.; 1,569 tons; 260-2x35-1x15-6; 231 n.h.p.; triple-expansion engines.

The Dutch steamship *Batavier V* struck a mine and sank in the North Sea on May 16th, 1916.

BATAVIER V

Wm. H. Muller & Co. N.V.; 1921; Wilton's E. & Slpwy. Co.; 1,573 tons; 260-1x35x15-5; 231 n.h.p.; triple-expansion engines.

The Dutch steamship *Batavier V*, under German control, was torpedoed and sunk by a British motor torpedo boat on November 3rd, 1941, off Cap Gris Nez.

BATEAU

U.S. Maritime Commission; 1926; Cant. Nav. Riuniti; 4,687 tons; 406-4x51-7x34-6; 335n.h.p.; triple-expansion engines.

The Panamanian steamship *Bateau* was torpedoed and sunk by gunfire from three German destroyers on March 29th, 1942, on a voyage from Iceland to Murmansk. Forty of her crew were killed. Six survivors were picked up by the destroyers.

BATH

Norwegian Navy, destroyer; 1918; Newport News Shipbuilding Co.; 1,060 tons; 314-3x30-5x8-5; 25,000s.h.p.; 35 knots; turbine engines; four 4 in. guns, one 3 in., 12 T.T.

The Norwegian destroyer *Bath* was originally the U.S.S. *Hopewell*, one of the 50 destroyers handed over to Britain under the Lease-Lend agreement. The vessel was lent to the Norwegian navy by the British Admiralty. On August 28th, 1941, she was escorting a convoy bound to North Russia when she was torpedoed and sunk by a submarine. The normal complement of the *Bath* was 122.

BATH CITY

Chas. Hill & Sons; 1880; Richardson, Duck & Co.; 1,724 tons; 260X34•5X22•5; 180hp.; compoundinvertedengines.

The British freighter *Bath City* foundered on December 3rd, 1881, 180 miles S.E. of St. John's, N.F.L. She was carrying a general cargo from Bristol to New York. Eleven persons were drowned.

BATH CITY

Chas. Hill & Sons; 1899; J. L. Thompson & Sons; 2,431 tons; 310x40-5x22-8; 312 n.h.p.; triple-expansion engines.

Charles Hill's second *Bath City* sank in March, 1900, after striking the Needle Rock, Lundy Island, while carrying grain and general cargo from New York to Bristol.

BATHAMPTON

Christie & Co.; 1896; J. L. Thompson & Sons; 3,090 tons; 325 X 44 • 5 X 19 • 7; 271 n.h.p.; triple-expansion engines.

The British steamship *Bathampton* was wrecked on February 27th, 1916, one mile from Hambantota. She was carrying a cargo of salt from Torreejeja to Calcutta.

BATNA

Cory & S'trick Steamers; 1928; J. Readhead & Sons; 4,399 tons; 370x52-3x25-9; 341 n.h.p.; triple-expansion engines.

The British steamship *Batna* was torpedoed and sunk by a German submarine on May 12th, 1942, on a voyage from Newport to Halifax.

BATOPAHA MARU

Nippon Kaiun K.K.; 5,953 tons.

The *Batopaha Mam* was torpedoed and sunk by the U.S. submarine *Redfish* on August 25th, 1944, Philippines.

BAUS

Dampskibs. Akties Baus; 1901; Nylands Vcerksted; 1,287 tons; 219-8x32-9x21-6; 101 n.h.p.; triple-expansion engines.

The Norwegian steamship *Baus* was torpedoed and sunk by a submarine in the English Channel on April 5th, 1916.

BAVARIA

W. Kunstmann; 1888; R. Duncan & Co.; 1,795 tons; 259-8X 37-2x15-5; 147n.h.p.; triple-expansion engines.

The German steamship *Bavaria* left Oxelosund on March 14th, 1915, for Stettin with ore. She was assumed to have been lost with all hands during a violent snowstorm.

BAY STATE

BAY STATE

White Diamond S.S. Co. (G. Warren & Co.); 1898; Harland & Wolff; 6,824 tons; 490-3x52-2x32-2; 755n.h.p.; triple-expansion engines.

The British freighter *Bay State* was wrecked in October, 1899, at Cape Ballard, N.F.L. She was on a voyage from Liverpool to Boston.

BAY OF PANAMA

J.Bulloch; 1883; Harland & Wolff, Belfast; 2,365 tons; 294 x 42-3x24-3.

The *Bay of Panama*, Capt. D. Wright, was one of the largest steel sailing ships of her day. She left Calcutta on or about November 20th, 1890, for Dundee with 17,000 bales of jute. For the first ten weeks of her voyage everything was normal, but after that period she experienced bad weather for 42 days in succession. On March 10th, 1891, when 111 days out of Calcutta, she was approaching the Lizard in one of the worst snowstorms ever known on the coast of Cornwall. The sea was rough and it was bitterly cold.

The vessel rounded the Lizard safely but was off course, and shortly afterwards drove ashore at Nare Point slightly W. of the mouth of Helford River, where she lay exposed to the full fury of the seas. Capt. Wright, his wife and 16 others were lost from the 40 on board.

Six men who took refuge in the rigging were frozen to death though close to the shore, it being impossible for the lifeboats to reach them.

BAYAN

Russian Navy, armoured cruiser; 1900; Forges et Chantiers, Toulon; 7,726 tons; 443x55-7x22; 16,500 i.h.p.; 21 knots; triple-expansion engines; two 8 in. guns, eight 6 in., two 2 in., twenty 12 pdr., eight 3 pdr., 2 m.g., 2 T.T.

The Russian armoured cruiser *Bayan* was based on Port Arthur at the beginning of the Russo-Japanese War in February, 1904. The arrival of Admiral Makharoff in March to take over command at Port Arthur caused great activity in the cruiser division. The *Bayan* frequently went to sea at the orders of this energetic officer, and, with the possible exception of the *Novik*, had more encounters with the enemy than any other Russian ship. She was engaged on the 10th and 22nd March and again on April 13th, when Admiral Makharoff was lost in the blowing up of the *Petropavlosk* (which see), and the fleet sortie of June 23rd.

On July 27th, when bombarding the Japanese infantry advancing to attack the defences, the *Bayan* struck a floating mine, which exploded under her bow. Her bulkheads held, however, and she was able to make harbour and go into dock. In consequence of this the ship did not take part in the battle of the Yellow Sea on August 10th.

As the siege lengthened the ship lent more and more of her armament to strengthen the shore defences until, by mid-September, she had landed one 8 in., eight 6 in., eight 12 pdr. and 10 smaller guns. The *Bayan* was now almost impotent, save for her solitary 8 in. gun, and was repeatedly struck as she lay in dock. On October 16th she moved to an anchorage under cover of Golden Hill, but this proved no safer than her former position, and she was hit five times by 11 in. howitzer shells.

On December 8th she was damaged beyond repair and sank at her moorings.

The full story of the Pacific Squadron at Port Arthur is told under the *Peresvyet*, flagship of the Rear-Admiral, which was among those lost.

BAYANO

Elders & Fyffes; 1913; A. Stephen & Sons; 5,948 tons; 416-6 X 53-2x30-1; 584 n.h.p.; 14 knots; triple-expansion engines.

The liner *Bayano* was taken over early in the First World War for service as an auxiliary cruiser. On March 11th, 1915, the vessel, under the command of Cdr. H. C. Carr, was on her way to Liverpool to coal when she was intercepted ten miles N.W. by W. of Corsewall Point by the submarine *U-27*, Lt.Cdr. Wegener. The attack took place at 5.15 a.m. The *Bayano* sank very rapidly and only four officers and 22 ratings were saved. Fourteen officers, including Cdr. Carr, and 181 ratings were killed. The s.s. *Castlereagh*, Capt. McGarrick, arrived on the scene

shortly after, but although she saw much wreckage and many dead bodies she was chased away by the submarine and prevented from making a search.

BAYARD

DeniNorskeMiddelhavslinjeAIS; 1936; A/S Akers Mek. Vcerks; 2,160 tons; 315-2x44-3x16-7; 471 n.h.p.; oil engines.

The steamship *Bayard* was torpedoed and sunk by a German submarine on July 6th, 1942, in the Gulf of Mexico. Eleven of her crew were killed.

BAYNAEN

Bay Steamship Co.; 1904; W. Doxford & Sons; 3,227 tons; 332-1x46-6x22; 265 n.h.p.; 9-5 knots; triple-expansion engines.

The steamship *Baynaen* was torpedoed and sunk by a German submarine 20 miles N.W. by W. of Belle He on March 25th, 1917. Five men were killed. The captain was among the survivors.

BAYNESK

The Bay S.S. Co.; 1906; W. Doxford & Sons; 3,286 tons; 322X46-6X22-1; 265 n.h.p.; triple-expansion engines.

The British steamship *Baynesk* was torpedoed and sunk by a submarine on January 9th, 1917, 130 miles N. by W. from Alexandria. Seven of the crew lost their lives.

BAYNYASSA

Sale & Co. (Bay S.S. Co.); 1915; Bar tram & Sons; 4,937 tons; 400X52-4x28; 476n.h.p.; triple-expansion engines.

The British cargo ship *Baynyassa* on a voyage from Santos to Gibraltar was wrecked on September 15th, 1918, ten miles S. of Agadir.

BAYO

LaMaritimaEsperanza; 1892; T. Turnbull & Son; 2,776 tons; 312-4x40-7x21-9; 255 n.h.p.; triple-expansion engines.

The Spanish steamship *Bayo* struck a mine and sank in the Bay of Biscay on January 13th, 1916.

BAYOU

Sud-Americano de Vapores S.A.; 1919; American S.B. Co.; 2,606 tons; 251x43-6x26-1; 225n.h.p.; triple-expansion engines.

The Panamanian steamship *Bayou* was torpedoed and sunk by a German submarine on February 28th, 1942, about 300 miles S. of Trinidad. There was only one survivor, who was picked up from a raft five days later.

BAYRONTO

Sale & Co. (Bay S.S. Co.); 1905; Armstrong, Whitworth & Co.; 4,756 tons; 400x52x27; 495 n.h.p.; triple-expansion engines.

The British cargo ship *Bayronto* foundered on September 13th, 1919, in 26°45'N., 83°W., while on a voyage from Galveston to Marseilles with a cargo of wheat.

BAYROPEA

Sale & Co. (Bay S.S. Co.); 1905; Armstrong, Whitworth & Co.; 4,671 tons; 400x52x27; 494 n.h.p.; triple-expansion engines.

The British cargo ship *Bayropea* sailed from Cardiff to Archangel with a cargo of munitions. She caught fire at Archangel and burned out on January 26th, 1917.

BEACHY

Clyde Shipping Co.; 1936; A. Stephen & Sons; 1,600 tons; 272-5x38-4x17-2; 196n.h.p.; 12-5 knots; triple-expansion engines.

The steamship *Beachy*, Capt. Augustus Banning, D.S.O., was acting as rescue ship to a convoy in the North Atlantic, on January 11th, 1941, when, about 500 miles W. of Ireland, the ships were attacked by German aircraft and the *Beachy* was hit and sunk. Five men were killed and six, including Capt. Banning, wounded.

BEACON GRANGE

Houlder Bros.; 1938; Hawthorn Leslie & Co.; 10,119 tons; 447-5x65-5x35-3; 1,006n.h.p.; 15 knots; oil engines.

The liner *Beacon Grange*, Capt. A. B. Friend, left Loch Ewe on the north-west coast of Scotland on April 26th, 1941. At about 2.20

on the following morning she was attacked by enemy aircraft which presumably radioed her position to a submarine as she was intercepted at 2.30 on the following afternoon (27th) and hit with three torpedoes. The submarine then surfaced at a distance of approximately 500 yards and members of her crew took photographs. Meanwhile those on board the liner went to the boats as she was sinking rapidly. The *Beacon Grange* was finally sunk by gunfire.

Two boats got away. The captain's, containing 41 all told, was picked up by the British corvette *Gladiolus* two days later. The second boat with the first officer and 38 others was picked up six days later by the Belgian steam trawler *Edward Anseele*. Two engineers were killed by the explosion of the torpedoes and several men were wounded, but there were no fatalities during the time that the boats were adrift.

BEACONLIGHT

Bear Creek Oil & Shipping Co. (C. T. Bowing & Co.); 1890; Armstrong Mitchell & Co.; 2,763 tons; 311x40-2x28-2; 225 n.h.p.; 9 knots; triple-expansion engines.

The tanker *Beacon Light* was torpedoed and sunk by a submarine 15 miles S.E. of the Butt of Lewis on February 19th, 1918. The captain and 32 men were killed.

BEACONLIGHT

Panama Transport Co.; 1920; Bethlehem S.B. Corp.; 6,926 tons; 435x56x32; 421 n.h.p.; triple-expansion engines.

The Panamanian steamship *Beaconlight* was torpedoed and sunk by a German submarine on July 16th, 1942, in the South Atlantic.

BEAR

J. Watson & Co.; 1877; R.Dixon & Co.; 596 tons; 174-4X 25-6x14-3; SOh.p.; compound engines.

The steamer *Bear* was sunk in collision off St. Abb's Head, Berwickshire, on January 11th, 1891. Thirteen of the crew were lost.

BEARN

Deves, Chaumet & Co.; 1894; Sir Raylton Dixon & Co.; 1,288 tons; 232-7x34-5x16-8; 133 n.h.p.; triple-expansion engines.

The French steamship *Beam* was torpedoed and sunk by a German submarine in the Bay of Biscay on June 19th, 1917.

BEATRICE

Thomas Turnbull & Son; 1879; T. Turnbull & Son; 1,385 tons; 240-3x34-1x17-9; 140 n.h.p.; compound inverted engines.

The British iron steamship *Beatrice* foundered on December 18th, 1883, near Tunis. She was on a voyage from Cardiff to Odessa with a cargo of patent fuel.

BEATRICE

Cleeve's Western Valleys Anthracite Collieries; 1890; Richardson Duck & Co.; 712 tons; 208x29-1x13-4; 99r.h.p.; 9 knots; triple-expansion engines.

The steamship *Beatrice* was torpedoed and sunk by a submarine ten miles E. by S. of the Lizard on July 20th, 1917. Eleven men were killed. The captain was among the survivors.

BEATRICE

A. H. Bull Steamship Co.; 1917; Bethlehem Steel Co.; 3,451 tons; 327-2x46-2x22-9; 293 n.h.p.; triple-expansion engines.

The American steamship *Beatrice* was sunk by gunfire from a German submarine on May 24th, 1942, in the Gulf of Mexico.

BEATRICE C.

G. Costa fu Andrea; 1920; Stabilimento Tecnico Triestino; 6,132 tons; 451-6x54-2x27-6; 529 n.h.p.; triple-expansion engines.

The Italian steamer *Beatrice C.* was bombed and sunk by British aircraft on June 4th, 1941, about 20 miles N.E. of the Kerkenna Islands, Tunisia.

BEATTY

United States Navy, destroyer; 1941; Philadelphia Navy Yard; 1,700 tons; 348-5x36x10; 50,000 s.h.p.; 36-5 knots; turbine engines; Babcock & Wilcox boilers; four 5 in. guns, four 40 mm., seven 20 mm., 5 T.T.

The United States destroyer *Beatty* was attacked by German dive-bombers when off the coast of Algeria on November 6th, 1943. The

destroyer was hit and sank shortly afterwards. She carried a normal complement of 210.

BEATTY ROSE

R. Hughes & Co.; 1920; J. Fullerton & Co.; 1,119 tons; 220-2X34-2x13-1; 96r.h.p.; triple-expansion engines.

The *Beatty Rose* foundered on April 1st, 1927, about 17 miles off the Casquets. She was carrying coal from Swansea to Rouen.

BEATUS

Tempus Shipping Co.; 1925; Ropner S.B. & R. Co.; 4,885 tons; 390X55•5X26•4; 436 n.h.p.; triple-expansion engines.

The British steamship *Beatus* was torpedoed and sunk by a German submarine on October 18th, 1940, on a voyage from Three Rivers to the Tyne.

BEAULIEU

Bidrnbjornstad; 1930; Armstrong Whitworth & Co.; 6,114 tons; 396-2x55-1x32-3; 583 n.h.p.; oilengines.

The Norwegian tanker *Beaulieu* was shelled and sunk by a German raider on August 4th, 1940, between the Azores and Aruba.

BEAVERDALE

Canadian Pacific Railway Co.; 1928; Armstrong Whitworth & Co.; 9,957 tons; 502-5x61-9x37-5; 1,578 n.h.p.; 15-5 knots; turbine engines.

The liner *Beaverdale*, Capt. Charles Draper, was crossing the Atlantic in convoy when she was torpedoed and sunk by a submarine. The attack took place on April 1st, 1941. Twenty-one persons were killed, and 37 wounded. Capt. Draper was among the survivors.

BEAVERFORD

Canadian Pacific Railway Co.; 1928; Barclay, Curie & Co.; 10,042 tons; 503x61-8x37-5; 1,574 n.h.p.; 15-5 knots; turbine engines.

The liner *Beaverford*, Capt. E. Pettigrew, was crossing the Atlantic in a homeward-bound convoy when the ships were attacked by the German pocket battleship *Admiral Scheer* on November 5th, 1940. The auxiliary cruiser *Jervis Bay* (which see) immediately engaged the raider in order to afford time for the convoy to scatter. This was carried out with success, most of the 37 ships escaping, but the *Beaverford* was overhauled and although she made the best defence possible with her meagre armament she was sent to the bottom with 77 of her crew. Capt. Pettigrew was among the killed.

BECKTON

Gordon S.S. Co.; 1880; J. L. Thompson & Sons; 1,448 tons; 248x35-3x17-6; 203 n.h.p.; triple-expansion engines.

The British iron steamship *Beckton* was wrecked in January, 1904, on Kratzsand, near Cuxhaven. She was carrying a cargo of coal from the Tyne to Hamburg.

BEDFORD

British Navy, armoured cruiser; 1901; Fairfield Shipbuilding Co.; 9,800 tons; 448x66x24-5; 22,000 i.h.p.; 23 knots; triple-expansion engines; Belleville boilers; fourteen 6 in. guns, nine 12 pdr, three 3 pdr.; 2 T. T.

The armoured cruiser *Bedford* was a unit of the China squadron. The ship was commanded by Capt. E. S. Fitzherbert and carried a complement of 537. She was carrying out full speed trials in the Straits of Korea on August 21st, 1910, when she stranded on the Samarang Rocks, off the island of Quelpart. The weather was very rough. The ship was steaming at 19 knots at the time and so great was the impact that the water flooded the stokeholds in one tremendous rush, drowning 18 petty officers and men instantly. This was the only loss of life, but the ship's position was precarious as she was afloat for part of her length and was swung and pounded to and fro by the seas. The Japanese government dispatched salvage vessels to the scene, but these were unable to approach the wreck and it was apparent that the ship would be a total loss.

BEDOUIN

British Navy, destroyer; 1939; Denny Bros.; 1,870 tons; 355-5X36-5x9; 44,000 s.h.p., 36-5 knots; turbine engines; eight 4-7 in. guns, eight smaller; 4 T.T.

The destroyer *Bedouin*, Cdr. B. G. Scurfield, was leader of a small

BEECHGROVE

flotilla which formed part of a force escorting a convoy to Malta in June, 1942. The force, which had left Britain on the 5th, was known as the 'Harpoon Convoy'. On the 15th, when about 30 miles S. of Pantelleria, British aircraft reported the presence of two Italian cruisers and five destroyers some 15 miles to the northward. The *Bedouin* and her flotilla were despatched to engage this force which was superior to them, both in number and gun power.

The action began at about 6.45 a.m., the 6in. guns of the Italian cruisers outranging the lighter weapons of the British destroyers. The *Bedouin* and the *Partridge* were hit and badly damaged, but the three remaining destroyers managed to get within range and scored hits on an Italian destroyer. Meanwhile the light cruiser *Cairo* 4,200 tons, five 6in. guns, with four 'Hunt-class' destroyers had joined in the action and forced the Italians to turn away.

This engagement, though very brief, deprived the convoy of its naval escort, and during this time it suffered a succession of bombing attacks in which two merchantmen were sunk.

The *Bedouin* was taken in tow by the *Partridge*, but, as both ships were disabled, their progress was slow. Later the Italian squadron returned and the *Partridge* was compelled to cast off the tow and the *Bedouin* was left to face both warships and torpedo bombers. She was hit by an aerial torpedo and sank at 2.45 p.m.

Cdr. Scurfield and 208 survivors were picked up by the Italians, and eventually reached a prisoner of war camp in Germany. In 1945, shortly before the termination of hostilities, the camp was evacuated, and the prisoners were machine gunned by British aircraft in mistake for German troops as they marched along the road. Cdr. Scurfield was hit and killed.

BEECHGROVE

Alexander & Mair; 1880; J. Readhead & Sons; 1,221 tons; 250x32-7X17-8; 123 n.h.p.; compound engines.

The British iron steamship *Beechgrove* was wrecked in January, 1905, off Newcastle, Co. Down, while on a voyage from Ardrossan to Barry.

BEECHGROVE

Alexander & Mair; 1880; R. Irvine & Co.; 1,602 tons; 257-4 X 34-6x17-9; 170 n.h.p.; compound engines.

The British freighter *Beechgrove* was carrying a cargo of iron ore from Musel Harbour to Ardrossan in May, 1907, when she was wrecked at Gijon. This was the second ship of this name to be lost by the owners Alexander & Mair.

BEECHWOOD

J. Jacobs & Co.; 1940; Sir J. Laing & Sons; 4,897 tons; 415-1x58-2x24-8; 365 n.h.p.; triple-expansion engines.

The British steamship *Beechwood* was torpedoed and sunk by a German submarine on August 26th, 1942, about 200 miles S. of Freetown.

BEEMSTERDIJK

Nederlandsch-Amerikaansche Stoomb. Maats.; 1922; Fyenoord; 6,869 tons; 400-6x54-3x36-6; 648 n.h.p.; 12 knots; turbine engines.

The Dutch steamship *Beemsterdijk* struck a mine in the Bristol Channel, 12 miles W.N.W. of the Smalls, on January 26th, 1941. She sank on the 27th, with a loss of 39 lives. Three survivors were rescued from a raft.

BEGONA No. 3

Cia. de Nav. Begona; 1884; A. Stephen & Sons; 2,699 tons; 300-3x42-1x25-3; 269 n.h.p.; compound engines.

The Spanish steamship *Begona No. 3* was torpedoed and sunk by a German submarine in the English Channel on May 23rd, 1917.

BEGONIA

British Navy, sloop; 1915; Barclay Curie; 1,250 tons; 267-7X 33-5x11-7; 2,400 i.h.p.; 17 knots; triple-expansion engines; two 4-7in. guns, two 3pdr.

The sloop *Begonia*, Lt.Cdr. Basil S. Noake, was one of a class of vessel built during the First World War to serve two purposes as need might arise. The first purpose was that of a convoy escort; the second and more adventurous service was that of a Q-ship, the vessels having been built upon lines which permitted of their rapid and easy conversion into semblance of an ordinary merchantman.

In October, 1917, the *Begonia* set forth on a cruise in merchantman's guise from which she never returned. Her crew numbered about 100 officers and men.

BEGUM

Asiatic Steam Navigation Co.; 1907; Chas. Connell & Co.; 4,646 tons; 400x52x17-4; 427n.h.p.; 11 knots; triple-expansion engines.

The steamer *Begum* was torpedoed and sunk by a German submarine 270 miles W. by S. of Bishop Rock, Scilly Isles, on May 29th, 1918. Fifteen men were killed. The captain was among the survivors.

BEHAR

Hain S.S. Co.; 1928; Harland & Wolff; 6,100 tons; 436x57-6 X29-6; 1,245 n.h.p.; 15 knots; turbine engines.

At the beginning of March, 1944, the Japanese sent out a small squadron of three cruisers from Singapore to raid shipping in the Indian Ocean. Vice-Admiral Takasu was in over-all command, and his orders to his captains were that they take no prisoners. On March 9th one of the cruisers, the *Tone*, sank the Hain Line steamship *Behar*. Eighty survivors were picked up and taken to the cruiser. Here, in accordance with orders, 65 of them were killed.

The remainder of the prisoners escaped with their lives, and at the conclusion of the war with Japan information was given to the Allied authorities. Investigations were made and, as a result, the captain of the *Tone* was tried and sentenced to a long term of imprisonment.

The *Behar* was the last Allied merchantman to be sunk by a surface raider in the Second World War.

BEHERA

Maclay & McIntyre; 1864; Mar shall Bros.; 1,384 tons; 239-5 X 32-7x17; 127 h.p.; compound engines.

The British iron steamship *Behera* was wrecked at Alderney in March, 1895. She was carrying a cargo of coal from Sunderland to St. Nazaire.

BEIGNON

Morel Ltd.; 1880; Richardson, Duck & Co.; 1,332 tons; 250 X 35x15-2; 99 n.h.p.; compound engines.

The British iron steamship *Beignon* was sunk in a collision in March, 1899, at Villez Martin, three miles from St. Nazaire. She was on a voyage from Nantes to Bilbao.

BEIGNON

Nolissement S.S. Co.; 1939; W. Doxford & Sons; 5,218 tons; 427-6x56-5x26-5; 516n.h.p.; oil engines.

The British motorship *Beignon* was torpedoed and sunk by a German submarine on June 30th, 1940, on a voyage from Freetown to the Tyne. ^

BELCREST

Crest Shipping Co.; 1925; Northumberland S.B. Co.; 4,517 tons; 399-7x52-9x24-8; 427 n.h.p.; triple-expansion engines.

The British ship *Belcrest*, Capt. Brockwell, left Halifax in a convoy on January 31st, 1941, but was lost from the convoy during a gale on February 10th. She was not seen again.

BELFAST

T. Dixon & Sons; 1870; Palmers' Co.; 1,638 tons; 265-6X 33-2x24-3; 120 h.p.; compound engines.

The British iron steamship *Belfast* was wrecked in March, 1895, at the Island of Iona. She was carrying timber from Sapele to Belfast.

BELFORD

Christie & Co.; 1901; J. Priestman & Co.; 3,216 tons; 325 X 47x25-6; 272n.h.p.; triple-expansion engines.

The British steamship *Belford* was wrecked on February 9th, 1916, at Smaul, Islay. She was on a voyage from Barry to New York in ballast.

BELGIAN AIRMAN

Belgian Government; 1942; Harland & Wolff; 6,959 tons; 432-7x56-3x34-3; 490 n.h.p.; oil engines.

The motorship *Belgian Airman* was torpedoed and sunk by a German submarine on April 14th, 1945, in the North Atlantic.

BELGIAN FIGHTER

Belgian Government; 1921; Merchant S.B. Corp.; 5,403 tons; 401-6x54-2x30-2; 661 n.h.p.; turbine engines.
The steamship *Belgian Fighter* was torpedoed and sunk by a German submarine on October 9th, 1942, in the South Atlantic. Five of her crew were lost.

BELGIAN KING

G. B. Hunter & C. S. Swan; 1881; Sunderland S.B. Co.; 3,393 tons; 350-5x41x19-5; 303 n.h.p.; triple-expansion engines.
The British iron steamship *Belgian King* foundered on September 20th/21st, 1914, near Cape Kureli. She was sailing from Trebizonde to Constantinople with passengers and a cargo of sheep and

BELGIAN PRINCE

Prince Line; 1901; Sir J. Laing & Sons; 4,765 tons; 391-1x51-2x28-5; 492n.h.p.; 10-5 knots; triple-expansion engines.
The *Belgian Prince* was torpedoed and sunk by a submarine 175 miles N.W. by W. of Tory Island on July 31st, 1917. Thirty-nine persons were killed. The captain was taken prisoner.

BELGICA

Sola y Aznar; 1891; Richardson, Duck & Co.; 2,068 tons; 282x37-6x16-8; 201 n.h.p.; triple-expansion engines.
The Spanish steamship *Belgica* struck a mine and sank on the 15th January, 1916, in the Bay of Biscay.

BELGIUM MARU

Kokusai Risen K.K.; 1920; Kawasaki Dockyard Co.; 5,838 tons; 385 X 51X 36; 437 n.h.p.; triple-expansion engines.
The steamship *Belgium Maru* was sunk by U.S. carrier-based aircraft on October 18th, 1944, off Manila.

BELGRAVIA

Anchor Line (Henderson Bros.); 1881; D. & W. Render son & Co.; 4,977 tons; 400x44-8x33; 495 h.p.; compound engines.
The British iron steamship *Belgravian* was wrecked in May, 1896, at Mispeck Point near St. John, N.B. She was on her way to Liverpool with a cargo of timber.

BELGRAVIAN

Ellerman Lines; 1937; W. Gray & Co.; 3,136 tons; 345-6X50-1x20-7; 606 n.h.p.; triple-expansion engines & L.P. turbine.
The British steamship *Belgravian* was torpedoed and sunk by a German submarine on August 5th, 1941, on a voyage from Port Harcourt to Hull.

BELITA

Skibs A/S Oiltank HI; 1933; Gotaverken A/B; 6,323 tons; 408-1x55-2x33-9; 489 n.h.p.; oilengines.
The Norwegian tanker *Belita* was torpedoed and shelled by a German submarine, caught fire and sank on December 3rd, 1942, about 400 miles E. of Trinidad.

BELIZE

Rederi A/S Nidaros; 1919; Manitowoc S.B. Co.; 2,153 tons; 250-5x43-7x20-1; 269n.h.p.; triple-expansion engines.
The Norwegian steamship *Belize* left New York on January 15th, 1942, for St. John, New Brunswick. Nothing more was heard of the ship until one of her boats, containing four bodies, was picked up on January 24th.

BELL

Akties Bell; 1901; Russell & Co.; 3,765 tons; 352-5x49-1x28-2.
The Norwegian sailing ship *Bell* was sunk by a German submarine off Ushant on March 30th, 1916.

BELLATRIX

A/S Klosters Rederi; 1907; Howaldtswerke; 2,568 tons; 285-9X43-2X24-5; 175 n.h.p.; triple-expansion engines.
The Norwegian steamship *Bellatrix* was sunk by a submarine in the Mediterranean on March 23rd, 1917.

BELLCAIRN

Jackson Bros. & Cory; 1883; Irvine & Co.; 1,315 tons; 244-6x33-3x15-8; 130 h.p.; compound engines.
The British cargo ship *Bellcairn* sank in a collision in October, 1894, at Kingsdown, near Deal. She was on a voyage from Sfax to West Hartlepool with a cargo of barley.

BELLE OF CLARKSVILLE

Mississippi River steamboat.
The Mississippi River steamboat *Belle of Clarksville* was in collision with another steamboat on the night of December 14th, 1844. The collision took place on the lower Mississippi, both vessels being in their proper navigational positions. Just before the impact the *Belle of Clarksville* ran into shallow water, and in endeavouring to avoid this she steered across the bows of the oncoming steamboat and was badly holed. She sank with the loss of 36 lives.

BELLE OF FRANCE

Belle of France Steamship Co.; 1905; W. Doxford & Sons; 3,876 tons; 352x48.1x23.4; 313 n.h.p.; 10 Knots; triple expansion engines.
The British steamship *Belle of France* was torpedoed and sunk by a submarine 126 miles N.W. by W. of Alexandria on February 1st, 1916. Nineteen men were killed. The captain was among the survivors.

BELLEROCK

Verano S.S. Co.; 1909; Ailsa S.B. Co.; 1,199 tons; 240-2X34-1x14-7; 251 n.h.p.; triple-expansion engines.
The British steamship *Bellerock* struck a mine and sank on July 15th, 1940, off Porlock, Bristol Channel, with the loss of 17 lives.

BELLINGHAM

Waterman S.S. Corp.; 1920; Los Angeles S.B. & D.D. Co.; 5,345 tons; 410x54-4x27-2; 422n.h.p.; triple-expansion engines.
The American steamship *Bellingham* was torpedoed and sunk by a German submarine on September 22nd, 1942, between North Russia and Iceland.

BELLO

Skibs. A/S Oiltank; 1930; Swan Hunter & Wigham Richardson; 6,125 tons; 420-8x58-5x31-2; 1,010n.h.p.; oil engines.
The Norwegian tanker *Bello*, on a voyage from the Clyde to New York, was torpedoed and sunk by a German submarine on December 16th, 1942. Thirty-three of her crew of 41 were lost.

BELLOVA

Bell Bros. & Co.; 1889; D. & W. Render son & Co.; 2,671 tons; 310x39-2x23-8; 225n.h.p.; triple-expansion engines.
In February, 1899, the British steamship *Bellova* was wrecked near Maldonado. She was on a voyage from New York to the River Plate.

BELLUCIA

Bell Bros. & McLelland; 1888; D. & W. Henderson & Co.; 2,728 tons; 310x39-2x23-8; 253 n.h.p.; triple-expansion engines.
The British freighter *Belinda* was wrecked in February, 1903, on the Guarapary Rocks. She was on a voyage from Santos to New Orleans, with a cargo of coffee, etc. A later ship of this name owned by Bell Bros, was torpedoed and sunk in July, 1917, with the loss of four lives.

BELMONT

British Navy, destroyer; 1919; Bethlehem Shipbuilding Co.; 1,190 tons; 314x30x10; 26,000s.h.p.; 35 knots; turbine engines; four 4in. guns, one 3in.A.A.; 12 T.T.
The destroyer *Belmont*, Lt.Cdr. G. B. O'B. Harding, was the ex-U.S.S. *Satterlee*, transferred to the Admiralty under the Lend-Lease agreement. The vessel was engaged in convoy duties when she was torpedoed and sunk by a German submarine in the West Atlantic on January 31st, 1942. Lt.Cdr. Harding, seven officers and 130 ratings were killed.

BELVIDERE

R. & C. Allan; 1896; Workman, Clark & Co.; 1,517 tons; 255 X 34x22; triple-expansion engines.
The British cargo ship *Belvidere* was wrecked in May, 1898, five miles south of Cape Maysi, Cuba. She was carrying a cargo of fruit from Port Antonio, Jamaica, to Boston.

BEMPTON

W. & E. S. Lamplough; 1885; E. Withy & Co.; 2,013 tons; 272 - 7 x 36 -1 x 20; 170 h.p.; compound engines.
The British cargo ship *Bempton* was wrecked in August, 1889, near Guia. She was on a voyage from Ibrail to Antwerp with a cargo of grain.

BEN CRUACHAN

John Morrison & Son; 1879; J. Laing; 1,366 tons; 237x31 -7X 19 • 7; 99 h.p.; compound inverted engines.
The British steamship *Ben Cruachan* was sunk in a collision on October 23rd, 1885, off Wolf Rock, Cornwall. She was on a voyage from Swansea to Savona with a cargo of patent fuel.

BEN EARN

Straightback S.S. Co.; 1909; A. McMillan & Son; 3,911 tons; 318-4x49-3x21 -7; 274 n.h.p.; triple-expansion engines.
The British cargo ship *Ben Earn* was wrecked on June 16th, 1911, near Bacarro Point, N.S., while on a voyage from Sydney, C.B., to St. John, N.B., with a cargo of coal.

BEN LOMOND

Morrison Shipping Co.; 1906; W. Gray & Co.; 2,814 tons; 320X46 -8x21; 287 n.h.p.; 9 knots; triple-expansion engines.
The steamship *Ben Lomond* was torpedoed and sunk by a submarine 30 miles S.E. of Daunt's Rock, off Co. Cork, on July 7th, 1918. The captain and 22 men were killed.

BEN-MY-CHREE

Isle of Man Steam Packet Co.; 1908; Vickers Sons & Maxim; 2,550 tons; 375x46-2x17-5; 2,000 r.h.p.; 24 knots; turbine engines.
The popular Isle of Man steamship *Ben-My-Chree* served in the Dardanelles campaign as a seaplane carrier. The ship, which at the time of her loss was under command of Wg. Cdr. C. R. Samson, D.S.O., of the Royal Naval Air Service, was taking part in operations on the coast of Asia Minor. On January 11th, 1917, when in Kastelorgio Harbour she was shelled by the shore batteries and sunk. There was no loss of life, but one officer and four ratings were wounded.

BEN SHERROD

Mississippi River steamboat; 400 tons.
The Mississippi River steamboat *Ben Sherrod* was coming up river to Louisville in early May, 1837, with a very large number of passengers. The captain was competing in a race with another steamboat, and the firemen were encouraged by lavish supplies of whisky, of which there was an open barrel in the stokehold. In some fashion the stack of wood fuel near the furnaces became ignited and this, together with the whisky, set the steamboat on fire.
The disaster which took place on, or about, May 9th, was one of the most dreadful of all the tragedies on the Mississippi. A committee appointed to investigate after the fire estimated that not less than 150 persons lost their lives.

The steamboat *Columbus* saved many people, but another, the *Alton*, steamed past without stopping to render assistance. The captains of the *Ben Sherrod* and the *Alton* were severely censured by the authorities.

BEN VENUE

Watson Bros.; 1884; Birrell, Stenhouse & Co.; 2,033 tons; 289-2x42-4x24-1.
In November, 1891, the British sailing ship *Ben Venue* was being towed from London to begin a voyage to Sydney, N.S.W. When off Sandgate, Kent, she drifted ashore and became a total wreck. Many of her crew were drowned.

BENAKAT

N.V. Nederlandsche Koloniale Tankvaart Maats.; 1935; N.V. Rotterdam Droogd. Maats.; 4,763 tons; 365 • 7 X 64 -2 X18; 400 n.h.p.; triple-expansion engines.
The Dutch tanker *Benakat* was torpedoed and sunk by a German submarine on May 20th, 1943, N.E. of Ascension Island.

BENALBANACH

Ben Line; 1940; Chas. Cornell & Co.; 7,153 tons; 436-3X 56-7x35-3; 700 n.h.p.; 13-5 knots; triple-expansion engines.
The Ben liner *Benalbanach*, Capt. D. K. C. Macgregor, was taken over for service as an auxiliary transport late in 1941 and in November, 1942, she took part in the landing at Oran in the North African campaign.
The ship's second journey to North Africa ended in tragedy. On Christmas Eve, 1942, she left the Clyde with a crew of 74 and 389 officers and men of the Motor Transport, as well as a cargo of tanks, motor vehicles, ammunition, petrol and general military stores. At just after six o'clock on the evening of January 6th, 1943, the *Benalbanach*, which was in convoy, was attacked E. of Algiers by a German aircraft with two torpedoes, which hit the ship in No. 3 and No. 5 holds. She sank almost immediately with 57 crew and 340 troops, Capt. Macgregor dying from exhaustion after three hours in the water and just as he was about to be rescued by a destroyer.

BENARES

Ganges River steamer; 1847; 400 tons; 12 knots.
On March 20th, 1848, the paddle steamer *Benares*, under command of Capt. Townsend, with over 150 persons on board together with a number of horses and various conveyances, was returning from Calcutta when she caught fire. The limits of the vessel's run were Benares and Calcutta and she was from three to four miles below Rajmahal when the outbreak occurred. From subsequent investigation it was established that the fire originated aft where the carriages and horses were stowed, and was attributable to the native syces who were smoking among the straw. The ship was in shallow water, and this induced many persons to jump overboard, but the strength of the current swept most of them away and they were drowned. Capt. Townsend did his utmost to allay the panic, but in spite of his efforts there was a heavy loss of life.
The after portion of the *Benares* up to the engine room was burned out, and had the passengers remained calm and gathered forward they would have been in no danger and it is probable that there would have been no fatalities.

Later, the *Benares* was run on a sandbank and the survivors were taken off without further mishap. Between 20 and 30 persons lost their lives.

BENAVON

Ben Line; 1930; Lithgows; 5,872 tons; 425x56x29; 576 n.h.p.; 12 knots; triple-expansion engines.
The cargo ship *Benavon*, Capt. A. Thomson, was homeward bound from Hongkong via South Africa when she was intercepted by the German raider *Pinguin* in the Indian Ocean. A determined action ensued, the British ship replying with great spirit to the salvos from the raider's 5 • 9 in. guns. The ships met at about 6.45 on the morning of September 12th, 1940, and the firing continued for more than an hour, after which time the *Benavon*, with her captain and many men dead and the ship herself a blazing wreck, was obliged to surrender.

The survivors took to the only remaining lifeboat and a few rafts and were ultimately picked up by the Germans. Out of a crew of 48 only seven British and 18 Chinese men were saved.

BENBRACK

Joseph Hoult & Co.; 1862; Smith & Rodger; 1,944 tons; 300-3 x34 -2x24-3; 220 h.p.; compound engines.
The British steamship *Benbrack* was wrecked in January, 1889, at Texel. She was on a voyage from Savannah to Bremen, carrying a cargo of cotton.

BENCOOLEN

E. Bates; 1855; St. John, N.B.; 1,415 tons; 235 (approx).
The wooden sailing ship *Bencoolen*, Capt. W. Chambers, was bound from Liverpool to India when she was wrecked in Boda Bay. The disaster occurred on October 10th, 1862. Of those on board 26 were lost.

BENDIGO

Joseph Hoult & Co.; 1877; *Barrow S.B. Co.*; 1,414 tons; 250 X 32 X 20; 150 h.p.; compound inverted engines.

The British cargo ship *Bendigo* foundered on October 1st, 1882, 140 miles S.W. of Tuskar. She was on a voyage from Liverpool to Demerara.

BENEDETTO BRIN

Italian Navy, 1st class battleship; 1901; *Castellamare*; 13,427 tons; 455x78x27-2; 19,000 i.h.p.; 20 knots; triple-expansion engines; *Belleville boilers*; four 12 in. guns, eight 8 in., twelve 6 in., twenty 12pr., 4 T.T.

The Italian battleship *Benedetto Brin*, flagship of Rear-Admiral Rubin de Cervin, was lying in Brindisi Harbour on September 28th, 1915, when fire suddenly broke out near the after magazine. Within a very short space of time the magazine exploded and the battleship sank. She carried a complement of 720, but it is not likely that this number was on board at the time of the disaster. The survivors numbered eight officers and 379 ratings. Rear-Admiral de Cervin went down with the vessel.

Although the *Benedetto Brin* became a total loss it was possible to salvage most of her heavy guns.

BENEFICIENT

Westoll Steamships; 1931; *W. Pickersgill & Sons*; 2,944 tons; 316'5x45-2x20-3; 277n.h.p.; triple-expansion engines.

On December 17th, 1940, the steamship *Beneficient*, Capt. P. Kirkaldy, was in convoy off Southend when she struck a mine and sank. Six men were killed by the explosion. Capt. Kirkaldy was among the survivors.

BENEVENTO

Italian Government; 1918; *Craig, Taylor & Co.*; 5,229 tons; 400x52-2x28-5; 517 n.h.p.; triple-expansion engines.

The Italian steamship *Benevento*, formerly the French *Fort de Souville*, was sunk by gunfire from Allied warships on April 1st, 1943, south of Cani Rocks, off Bizerta.

BENEVOLENCE

United States War Dept.; 1944; 11,800 tons.

The American steamship *Benevolence* had been fitted out as a hospital ship and was running trials in San Francisco Bay when, on August 25th, 1950, she collided with the steamship *Mary Luckenbach* during a fog. The *Benevolence* sank with the loss of 23 lives.

BENGAL

Gellatly Hankey & Co.; 1853; *Tod & McGregor*; 2,103 tons; 310 X39• 2 X25• 4; 275 h.p.; compound inverted engines.

The British iron steamship *Bengal* was on a voyage from Saigon to Java, with a cargo of rice, when she was wrecked on Bawean Island, off Java, on March 2nd, 1885.

BENGAL

Glover Brothers; 1874; *R. Dixon & Co.*; 1,673 tons; 270x33x 24-4; 140 h.p.; compound inverted engines.

On January 1st, 1888, the British freighter *Bengal* was carrying coal from Cardiff to Port Said, when she foundered off Cape Finisterre.

BENGAL MARU

Nippon Yusen K.K.; 1921; *Mitsubishi Zosen Kaisha*; 5,399 tons; 400X54-5x30; 490 n.h.p.; triple-expansion engines.

The steamship *Bengal Maru* was torpedoed and sunk by the U.S. submarine *Bowfin* on March 24th, 1944, off the Sarangani Islands.

BENGAR

Steam Transport Co.; 1890; *E. Withy & Co.*; 2,531 tons; 290x40• 1X19• 3; 219 n.h.p.; triple-expansion engines.

The British cargo ship *Bengar* was wrecked in January, 1909, at the entrance to Garston Dock. She had just arrived from Huelva with a cargo of bar copper and ore.

BENGASI

"*Tirrenia*" *Soc. Anon. di Nov.*; 1912; *Cant. Nav. Riuniti*; 1116 tons; 277-2x36-4x18-2; 191 n.h.p.; triple-expansion engines.

The Italian passenger ship *Bengasi* was torpedoed and sunk by British aircraft on May 6th, 1941, three miles from Caroli Island, Sardinia.

BENGASI

German Government; 1933; *Naksov Skibs A/S*; 1,554 tons; 270-7x41-2x15-7; 271 n.h.p.; oilengines.

This ship was originally the Danish *Almena*, taken over by the Vichy Government and renamed *St. Philippe*. She was later seized by the Germans and renamed *Bengasi*. On November 11th, 1942, she was torpedoed and sunk by a British submarine off Cape Carbonara, Sardinia.

BENGE0

Joseph Hoult & Co.; 1882; *Whitehaven S.B. Co.*; 1,217 tons; 220•5x33•3x15•8; 120n.h.p.; compound engines.

The British iron steamship *Bengeo* was wrecked on August 24th, 1884, at Trinidad. She was on a voyage from Demerara to Puerto Cabello.

BENGL0E

W. Thomson & Co.; 1895; *Barclay, Curie & Co.*; 3,006 tons; 341 X41•8X24•3; 293n.h.p.; triple-expansion engines.

The British cargo ship *Bengloe* was wrecked on September 21st, 1914, on Balabac Island, in the Philippines. She was on a voyage from Cebu to London with a cargo of hemp and copra.

BENGORE HEAD

Ulster S.S. Co.; 1922; *Irvine's S.B. & D.D. Co.*; 2,609 tons; 310-2x45x20-7; 292 n.h.p.; triple-expansion engines.

The British steamship *Bengore Head* was torpedoed and sunk by a German submarine on May 8th, 1941, on a voyage from the Clyde to Montreal.

BENGT STURE

Rederi A/B Eruths; 1917; *Schiffb. Ges. Unterweser*; 872 tons; 212-3x31-6x13-2; 62 n.h.p.; triple-expansion engines.

The Swedish steamship *Bengt Sture* left Danzig on October 28th, 1942, for Oxelosund with coal. She was never heard of again.

BENGUELA

British and African S.N. Co.; 1874; *J. Elder & Co.*; 1,796 tons; 302-6x33-9x23-9; 186n.h.p.; triple-expansion engines.

The British iron steamship *Benguela* was wrecked in May, 1905, at Nanna Kroo, on the west coast of Africa. She was on a voyage to Hamburg with palm kernels and oil.

BENHAM

United States Navy, destroyer; 1938; *Federal Shipbuilding Co.*; 1,500 tons; 341-7x34-7x9-9; 42,800s.h.p.; 36-5 knots; turbine engines; *Express boilers*; four 5 in. guns; 4 m.g.; 16 T.T.

The United States destroyer, *Benham*, was lost in action against the Japanese at the battle of Guadalcanal on November 15th, 1942. The ship was one of a division of four destroyers, three of which were lost in a torpedo attack.

The details of the operation in which the *Benham* was lost are given under the *Preston*. The full story of the battle is told under the *Atlanta* and the *Kirishima*.

BENHOLM

Joseph Hoult & Co.; 1887; *Craig, Taylor & Co.*; 1,438 tons; 236x33-6x16-7; 120h.p.; triple-expansion engines.

The British steamship *Benholm* was sunk in a collision with the s.s. *Klondyke* off Point Lynas on May 14th, 1898. She was sailing from Liverpool to Cardiff in ballast. Ten of her crew were drowned.

BENHOPE

Joseph Hoult & Co.; 1882; *Caird & Purdie*; 1,601 tons; 246-3 X 34-2x17; 160 h.p.; compound inverted engines.

The British steamship *Benhope* was burned on April 28th, 1887, in 31° N., 81° W., while on a voyage from New York to Vera Cruz. She was carrying a cargo of petroleum.

BENIN

African S.S. Co.; 1869; *Glasgow*; 1,530 tons; 284-3x33-lx 23-6; 200 h.p.; compound inverted engines.

The British freighter *Benin* was sunk in a collision on March 12th, 1881, in 50° N., 3° W. She was on a voyage from the west coast of Africa to Liverpool.

BENISAF

English & American Shipping Co.; 1889; W. Doxford & Sons; 1,934 tons; 269-5x37x17-4; 160 h.p.; triple-expansion engines.
The British steamship *Benisaf* was wrecked in December, 1894, near Cape Bonavista, N.F.L. She was carrying iron pyrites from Pilley's Island to New York.

BENJAMIN BREWSTER

Standard Oil Co. of New Jersey; 1917; Harlan & Hollingsworth Corpn.; 5,950 tons; 411-6x53-4x29-8; 2,500 i.h.p.; 10-2 knots; triple-expansion engines.
The American tanker *Benjamin Brewster*, Capt. Peter G. J. Hammel, was proceeding from Baytown to Port Tampa on July 9th, 1942, with a cargo of 70,578 barrels of various grades of oil. The vessel anchored for the night about two-and-a-half miles off Grand Isle beach on the coast of Louisiana. At about 11.30p.m. she was struck on the port side forward by two torpedoes, the explosion of which set her on fire and caused her to sink within three minutes. There was no time to launch the lifeboats, some of which floated free of the tanker when she sank owing to the falls having burned through. A number of the crew swam to these boats and managed to make a search for other survivors. The *Benjamin Brewster* carried 35 mercantile crew and five naval gunners, of whom 15 were saved. Capt. Hammel and all the officers, with the exception of two engineers, went down with the vessel.

BENJAMIN FRANKLIN

A/S Ganger Rolf; 1927; Ch. & Atel de St. Nazaire; 7,034 tons; 452-0x59-5x27-9; 948 n.h.p.; oil engines.
The Norwegian motor vessel *Benjamin Franklin* was torpedoed and sunk on February 19th, 1941, in the North Atlantic. Twenty-nine survivors were picked up by the Egyptian steamship *Memphis* which, unfortunately, foundered some days later with the loss of all on board.

BENJAMIN HARRISON

U.S. Maritime Commission; 1942; Bethlehem Fair field Shipyard; 7,191 tons; 423-1x57-1 X34-8; 339 n.h.p.; triple-expansion engines
The American steamship *Benjamin Harrison* was torpedoed and sunk by a German submarine on March 16th, 1943, on a voyage from New York to North Africa.

BENJAMIN SMITH

U.S. War Shipping Administration; 1942; North Carolina S.B. Co.; 7,177 tons; 422-8x57x34-8; 339 n.h.p.; triple-expansion engines.
The American steamship *Benjamin Smith* was torpedoed and sunk by a German submarine on January 23rd, 1943, off Cape Palmas, Liberia.

BENKOELEN

Koninkl. Paketv. Maats.; 1921; H. Bernard Nzn. Scheeps. Het Jacht; 1,003 tons; 229-3x38-2x13-5; 96 n.h.p.; triple-expansion engines.
The Dutch steamship *Benkoelen* was torpedoed and sunk by a Japanese submarine on January 9th, 1942, in the Java Sea.

BENLAWERS

Petrograd Steamers (W. Thomson & Co.); 1930; Chas. Cornell & Co.; 5,943 tons; 429x53-9x30; 675 n.h.p.; 12 knots; quadruple-expansion engines.
The cargo ship *Benlawers*, Capt. W. S. Campbell, acted as an auxiliary transport during the first months of the Second World War. She helped to evacuate the British army from Calais, leaving that port under heavy fire with 700 wounded on board. Later she returned to her normal duties and on Sunday, October 6th, 1940, was in the North Atlantic when she was torpedoed by a German submarine. She sank in 17 minutes but the crew got away in the boats with the exception of a Chinese fireman who was drowned. One boat was picked up by the s.s. *Bengore Head* and later two other boats were sighted by the motor vessel *Forest*. In getting alongside the *Forest* a tragedy occurred, one of the boats being swamped by the heavy swell with the loss of 23 lives. Capt. Campbell was among the survivors.

Prior to the submarine attack the *Benlawers* had been in a convoy, but bad weather had compelled the ships to separate.

BENLEDI

W. Thomson & Co.; 1871; Barclay, Curie & Co.; 1,557 tons; 274-7x32-3x24-3; 160h.p.; compound inverted engines.
The British cargo ship *Benledi* was wrecked on June 18th, 1887, 47 miles from Swatow, while on a voyage from Swatow to Chefoo with a cargo of sugar and paper.

BENLOMOND

Ben Line; 1922; Irvine's S.B. & D.D. Co.; 6,630 tons; 420 X55 X36-3; 705 n.h.p.; 12 knots; triple-expansion engines.
The cargo ship *Benlomon*, Capt. J. Maul, left Cape Town for Paramaribo, in Dutch Guiana, on November 10th, 1942. On the 23rd she was within six days of her destination when, at 11.45 in the morning, she was torpedoed by a submarine. She was struck in the engine room and as she carried no cargo the water flooded her below decks very quickly and she sank in a few minutes. Of the 24 British and 23 Chinese who formed her crew only one man, a Chinese steward named Poon Lim, survived the disaster. This man swam to a raft on which he existed for 133 days, living partly upon the provisions stowed on the raft and partly on fish and seagulls which he occasionally caught. He was eventually picked up by a Brazilian negro fisherman after having been about four months adrift. He was in the last stages of exhaustion and was taken to the Beneficiencia Portuguese Hospital at Belem where he reported the loss of the *Benlomon* with all her crew save himself. The experience of the Chinese sailor is one of the most remarkable in the records of survival after shipwreck. He said that he passed close to the submarine after the torpedoing and by his description of the colours painted on her she was identified as Italian. He also stated that shortly after the sinking of the *Benlomon* he saw five men on a raft whom he recognised as the gun's crew. He was swept out of sight of these men and never saw them again.

BENMACDHUI

Ben Line; 1911; Russell & Co.; 6,869 tons; 420 X 55x36-3; 603 n.h.p.; triple-expansion engines.
The British steamship *Benmacdhui* struck a mine and sank on December 21st, 1941, at the entrance to the River Tees.

BENNEKOM

Koninkl. Nederl. Stoomb. Maats.; 1917; Flensburger Schiffsb. Ges.; 5,998 tons; 449-7x58-1x26-9; 791 n.h.p.; triple-expansion engines.
The Dutch steamship *Bennekomp* was in Convoy OS 10 bound from Liverpool to the United States. On October 31st, 1941, the convoy was attacked by the German submarine *U-96* 560 miles W. of Fastnet. The *Bennekomp* was hit by a torpedo and sank with the loss of nine of her crew.

BENNESTVET

Th. Brovig; 1937; Moss Vcerft & Dokk A/S.; 2,438 tons; 304-7x47-7x18-5; 228 n.h.p.; compound engines & L.P. turbine.
The Norwegian steamship *Bennestvet* was torpedoed and sunk by a German submarine on June 15th, 1942, in the Gulf of Mexico. Twelve of her crew were lost.

BENNINGTON

United States Navy, gunboat; 1890; Chester, U.S.A.; 1,710 tons; 230x36x16-5; 3,392 i.h.p.; 17-5 knots; triple-expansion engines; six 6in. guns, two 6pdr., two 1 pdr., 2 m.g.
The United States gunboat *Bennington* was lying in the harbour of San Diego on July 21st, 1905, when the top of the lower furnace of one of the boilers exploded, forcing the boiler astern into another boiler, which was also driven astern and exploded. The vessel's machinery was destroyed and she blew up. The explosion occurred at about 10.30 in the morning. Small boats were quickly on the scene and saved many lives. Captain Lucien Young, the *Bennington's* commander, was ashore at the time of the explosion.
The vessel carried a complement of 195, of whom Ensign Perry and 29 ratings were killed and about 80 injured.

BENNO

German Government; 1939; A/B Gotaverken; 8,306 tons; 465-1x59-4x35-9; 653n.h.p.; oilengines.

The tanker *Benno* was formerly the Norwegian *Ole Jacob*, captured in the Indian Ocean on November 10th, 1940, by a German auxiliary cruiser using P. & O. markings and taken to Kobe. She left Kobe on December 6th, and eventually reached Bordeaux.

On December 24th, 1941, she was bombed and sunk by British aircraft off Puerto Carina, near Ferrol.

BENONA

Joseph Hoult & Co.; 1879; Whitehaven S.B. Co.; 1,357 tons; 240-2x33-2x17-3; 120h.p.; compound inverted engines.

The British freighter *Benona*, carrying coal from North Sydney, C.B., to Montreal, was wrecked on July 11th, 1886, one mile S. of Cape North light, Cape Breton.

BENSHAW

Town Line; 1895; J. Scott & Co.; 1,724 tons; 250-0x38-1x19-5; 189n.h.p.; triple-expansion engines.

The British steamship *Benshaw* was wrecked on December 18th, 1916, on South Rock, Co. Down. She was carrying a cargo of iron ore from Bilbao to Ayr.

BENVENUE

Ben Line; 1927; C. Connell & Co.; 5,920 tons; 429 x 53 -9 x 30; 675 n.h.p.; quadruple-expansion engines.

The British steamship *Benvenue* was torpedoed and sunk by a German submarine on May 15th, 1941, on a voyage from London to Gibraltar and Table Bay.

BENVORLICH

Ben Line; 1919; Chas. Connell & Co.; 5,193 tons; 400-6X52-2x28-5; 517n.h.p.; 12 knots; triple-expansion engines.

The *Benvorlich*, Capt. E. D. Copeman, left Middlesbrough on March 10th, 1941, with a cargo of munitions, to join a convoy for the Far East. At 7.55 on the morning of the 19th, two days out from Oban, she was attacked by a four-engined Condor bomber which scored a direct hit on No. 1 hatch setting light to some cordite and blowing lifeboats and other gear overboard. Capt. Copeman gave orders to abandon ship in the two after lifeboats which were still seaworthy as an explosion might take place at any moment.

A second explosion occurred at about 8.5. This rendered Capt. Copeman insensible and he was picked up about an hour and a half later having been sent afloat on some wreckage by an able seaman. At 8.20 a.m. the *Benvorlich* sank.

The survivors were picked up by the rescue ship *Zamalek*, which was quite close at the time of the bombing, and by the naval escort ship *Hesperus*. Of the 24 men rescued by the *Zamalek*, four died of wounds. The *Hesperus* rescued 12. The total killed was 19, with several of the survivors wounded.

BENVRACKIE

Ben Line; 1922; D. & W. Render son & Co.; 6,434 tons; 400-4 x 52-5x35; 626 n.h.p.; 12 knots; quadruple expansion engines.

The *Benvrackie*, Capt. W. E. R. Eyton-Jones, left the Tyne for Cape Town and Beira in convoy on April 15th, 1941. The convoy dispersed in mid-Atlantic, the *Benvrackie* thereafter sailing alone. On the afternoon of May 9th, when some 200 miles S.W. of the Cape Verde Islands, the vessel picked up the lifeboat of the *Lassell* which had been torpedoed nine days previously. The boat contained 25 persons four of whom, including one woman, were passengers. Reports by wireless of the torpedoing of other vessels in the vicinity came in on the 9th and 10th and survivors of the *Lassell* were posted to increase the number of lookouts for submarines. Despite the utmost vigilance, however, the *Benvrackie* was torpedoed at about 6.30 on the morning of the 13th. There were two explosions and the vessel sank in just under three minutes.

The number on board including the people from the *Lassell* was 85, of whom 58 managed to get away in the boats, or on pieces of wreckage. A roll-call in the boats established that 15 men of the *LasseWs* company and 12 from the *Benvrackie* were lost.

The 58 survivors were crowded into one lifeboat which was much overloaded, nevertheless although 13 days at sea and sailing 520 miles no further casualties occurred. On the morning of May 26th

the boat was picked up by the hospital ship *Oxfordshire* and the survivors brought into Freetown. One other man, a steward, was taken off a raft by a Blue Star liner.

BENWYVIS

Ben Line; 1929; Chas. Connell & Co.; 5,920 tons; 429 X 53-9 X 30; 675 n.h.p.; 12 knots; quadruple expansion engines.

The cargo ship *Benwyvis*, Capt. H. J. Small, was with a homeward-bound convoy on the night of March 20th, 1941, when she was torpedoed and sunk by a submarine. The attack took place at about 10.35 p.m., the vessel being 160 miles due N. of the island of St. Vincent. She did not remain long afloat and within 10 minutes had vanished from sight, leaving behind two lifeboats and a raft crammed with survivors. One lifeboat capsized in the wave caused by the sinking vessel as she plunged under and five men were drowned. The remaining lifeboat with the survivors from the first now took the raft, on which there were eight men, in tow.

The next morning two lifeboats from the s.s. *Clan Ogilvy* were sighted. This ship had also been torpedoed. The overcrowded lifeboat of the *Benwyvis* transferred some of her occupants to one of the *Clan* lifeboats and the men on the raft were taken off by the other. The boats then agreed to separate, all steering due east as it was decided that they had missed the Cape Verde Islands.

The first *Clan* boat was picked up on April 1st by the Spanish steamer *Cabo Villano*, Capt. Sagardui, bound for Santos, Brazil. The second *Clan* boat was picked up on the same day by the motor vessel *King Edgar* bound for Freetown, where the survivors were landed. The *Ben* boat under Capt. Small with 33 British and Chinese seamen was adrift for 27 days during which time all the occupants, save one cadet, John Ross, died from privation or exposure. On April 17th this boat was picked up by the French steamer *Ville de Rouen* which put young Ross ashore at Tamatave, Madagascar.

BEPPE

G. & F. Fratelli Bozzo; 1912; A. McMillan & Son; 4,859 tons; 414-2x52-1x27-3; 458n.h.p.; triple-expansion engines.

The Italian steamship *Beppe* was torpedoed and sunk by a British submarine on October 19th, 1942, 300 miles from Lampedusa.

BERAKIT

N.V. Nederlandsch-Indische Maats voor Zeevaart. I; 1924; Blohm & Voss; 6,608 tons; 449x58-1x27-2; 590 n.h.p.; diesel-electric engines.

The Dutch ship *Berakit* was torpedoed and sunk by a German submarine on May 7th, 1943, on a voyage from Colombo to Durban.

BERENGARIA

Hendry, Ferguson & Co.; 1874; Barclay & Co.; 1,318 tons; 239-9x36-9x22-2.

The sailing ship *Berengaria* was bound from Melbourne to Sunderland with a cargo of wheat. She made a good passage but on December 1st, 1884, she struck on the Galloper Sand, off the Nore and became a total wreck. Twelve of her crew were drowned.

BERENICE

Koninkl. Nederl. Stoomb. Maats.; 1919; Lobithsche Scheepsb.; 1,177 tons; 256-4x37x13-5; 138 n.h.p.; 8-5 knots; triple-expansion engines.

The Dutch steamship *Berenice* was on voyage from Bordeaux to Falmouth on June 21st, 1940, when she was torpedoed and sunk by the German submarine *U 25*, 40 miles from the French coast. Eighteen of her crew and 21 passengers were lost.

BERGAMOT

British Navy, sloop; 1917; Armstrong Whitworth; 1,290 tons; 262-2x35x12-5; 2,800 i.h.p.; 17 knots; triple-expansion engines; two 4in. guns, one 12pr.

The sloop *Bergamot* was disguised as a merchant ship (Q-ship) and was torpedoed and sunk by a submarine in the Atlantic on August 13th, 1917. Her official complement was 98.

BERGANGER

Westfal-Larsen & Co. AJS; 1932; Nederl. Schps. Maats.; 6,826 tons; 464-4x61-2x27-4; 1,842h.p.; oilengines.

The Norwegian motorship *Berganger* was torpedoed and sunk by a

BERGENHUS

German submarine on June 2nd, 1942, on a voyage from Buenos Aires to Boston.

BERGENHUS

Det Forenede Dampskibsselskab; 1912; Helsingors Jernsk. & Msk.; 1,017 tons; 226-2x35-1 X21-1; 150 n.h.p.; triple-expansion engines.

The Danish steamship *Bergenhuss* was sunk by a German submarine in the North Sea on April 2nd, 1917.

BERGENSGUT

F.Zetterstrom; 1916; Chicago S. B. Co.; 2,029 tons; 251x43-8 X18; 274 n.h.p.; triple-expansion engines.

The Norwegian steamship *Bergensgut* was torpedoed and sunk by a German submarine in the North Sea on April 18th, 1917.

BERGSDALEN

T.L.Ravn; 1900; Tyne Iron S.B. Co.; 2,555 tons; 290x43x19-5; 226 n.h.p.; triple-expansion engines. The Norwegian steamship *Bergsdalen* was torpedoed and sunk by a German submarine in the W. Atlantic on August 27th, 1918.

BERHALA

Netherlands Government; 1927; Deutsche Werft A.G.; 6,622 tons; 452-3x59-3x26-9; 1,640 n.h.p.; oil engines.

The motorship *Berhala* was formerly the German *Rheinland*, captured by the Dutch. On May 23rd, 1941, she was torpedoed and sunk by a German submarine off Sierra Leone. Eleven of her crew were lost.

BERKELEY

British Navy, destroyer; 1939; Cammett Laird; 904 tons; 272-3 x 28 • 2 x 7 • 7; 19,000 s.h.p.; 27-5 knots; turbine engines; 3-drum boilers; four 4 in. guns, eight smaller.

The destroyer *Berkeley*, Lt. J. J. S. Yorke, took part in the Dieppe Raid on August 19th, 1942. At about 4.50 a.m. the landing on six beaches at or near Dieppe began, the Navy covering the troops with gun fire, and the Air Force providing air cover. The raid had for its objects:—

- 1 The testing on a larger scale than hitherto of what was known to be a heavily defended section of the coast.
- 2 The destruction of German batteries and an important radio-location station.
- 3 The destruction of German military personnel and equipment and the capture of prisoners for interrogation.

The troops employed were almost entirely Canadian, and the fighting was extremely fierce, the Canadians running their tanks ashore from landing craft and forcing their way into the centre of the town, followed by their infantry. A British force destroyed a 6 in. howitzer battery 4¹/₂ miles W. of Dieppe, but a second force was driven back by German E-boats.

At approximately 12.50 p.m. *Berkeley* received a direct hit by a heavy bomb which broke her back and flooded her engine room. She sank with the loss of 15 ratings.

The Canadian losses amounted to 170 killed, 633 wounded and 2,547 missing, from a military force of about 5,000.

BERLENGA

Portuguese Government; 1901; Rickmers Akt. Ges.; 3,548 tons; 353-2x45-1x26-2; 265 n.h.p.; triple-expansion engines.

The Portuguese steamship *Berlenga* was torpedoed and sunk by a German submarine in the Bay of Biscay on August 8th, 1917.

BERLIN

Great Eastern Railway Co.; 1894; Earle's Co.; 1,775 tons; 302-4x36x16-2; 5,800 i.h.p.; 18 knots; triple-expansion engines.

The G. E. R. steamship *Berlin* left Harwich for the Hook of Holland at 10 o'clock on Wednesday night, February 20th, 1907. The vessel encountered a violent north-westerly gale immediately on leaving Harwich, but on arriving off the Hook in the early morning all on board imagined that their troubles were over.

The lighthouse-keeper at the Hook of Holland stated that the

vessel was running well for mid-channel under proper control when she suddenly swerved out of course and struck. Seaman W. Fisher, one of the survivors, stated that the ship was struck on the port quarter by a heavy sea. The captain gave orders to the engine room: "Stop starboard", "Full speed astern starboard engine" and "Full speed ahead port engine". The ship's head began to come round to her former course but another heavy sea caught her and she was swept with terrific force across the projecting undersea breakwater, almost at its extremity. Had the *Berlin* been a few yards further out she would have undoubtedly escaped without damage.

The seas now began to sweep over the ship bumping her with such force that at about 6 a.m. she broke in two amidships at the engine room and abaft the funnels. The fore-part slid down the breakwater on the inner side drifting some 80 yards before sinking with all those within it. The after part remained firmly embedded on the piles and stones which formed the undersea breakwater.

Capt. Parkinson, a passenger, related that he proceeded to the bridge with the intention of offering what help and advice he could to the *Berlin's* commander, Capt. Precious, but as he reached the bridge-ladder he saw both Capt. Precious and the pilot swept overboard by a tremendous sea.

Shortly after, another wave swept over the wreck and carried away the bridge, the captain's house, the boats and more than half the unfortunate people on deck. Meanwhile a vast crowd of spectators packed the pier and the shore impotently watching the tragedy. One pathetic incident was the washing up of a piece of plank-wood with an appeal for help scribbled upon it from 15 survivors. It was headed "Smoking-room, s.s. *Berlin*". In response to this an attempt was made by the Hook of Holland steam lifeboat *President van Heel*.

During the day repeated efforts at rescue were made, the lifeboat on one occasion coming within 10 yards of the wreck. The whole of the 21st February passed, however, with only a single person being rescued; this was Capt. Parkinson who managed to swim to the lifeboat. On the following day the lifeboat again went out in company with the pilot boat *Helvoetsluis*, the latter having Prince Henry of the Netherlands among its crew. Six men from the pilot boat managed to land at the end of the North Pier and ascend the iron beacon fixed there. From this point of vantage they succeeded in throwing a rope to the deck of the wreck. As a result of their efforts 11 persons were saved. Capt. Martin Sperling then ran a flat alongside at considerable risk and removed the remaining three survivors.

The Queen of the Netherlands presented gold medals to Captains Sperling, Jansen and Berckhout, who commanded the rescue boats, and they and certain members of their crews were also decorated by the Royal National Lifeboat Institution. King Edward VII presented Prince Henry with the Grand Cross of the Order of the Bath.

BERNARDO

G.B. Degregorifu B.; 1876; A. Bollo; 701 tons; 152-8x30-5X The Italian barque *Bernardo*, on a voyage from Alicante to Cardiff in ballast, was wrecked on the Back of Annet, Scilly Isles, on March 11th, 1888. There was a big sea running, but it was possible to launch one of the ship's lifeboats, into which all the crew managed to clamber. A huge wave swamped the boat as she was putting off and drowned every man save the captain. He swam to the Old Woman Rock, to which he was taken off by a boat from St. Agnes. Eleven of the crew were lost.

BERND VON ARNIM

German Navy, destroyer; 1936; Deschimag, Bremen; 1,625 tons; 374x37x9-3; 50,000 s.h.p.; 36 knots; turbine engines; five 5 in. guns, four 37 mm.; 8 T.T.

The *Bernd von Arnim* was one of the flotilla of German destroyers sunk in the second battle of Narvik on April 13th, 1940. A full account of both battles is given under the flotilla leader *Hardy*, which was sunk in the first action on April 10th. There is also a short account under the Norwegian coast-defence ship *Norge*.

BERNICIA

J. E. Bowser & Son; 1883; Palmers' Co.; 2,619 tons; 300-8X 39-3x25-2; 300 h.p.; compound engines.

The British steamship *Bernicia* was wrecked in May, 1898, near Cape Race. She was sailing in ballast from the Tyne to Montreal.

BERNISSE

P. A. van Es & Co.; 1915; *Maats. Fyenoord*; 951 tons; 222 x 34-4x15; 132 n.h.p.; triple-expansion engines.
The Dutch steamship *Bernisse* struck a mine and sank in the Baltic on November 6th, 1918.

BERNLEF

Ender Dampferkompagnie A.G.; 1919; *Ardrossan D.D. & S.B. Co.*; 2,482 tons; 302-1x43x20-6; triple-expansion engines.
The German steamship *Bernlef*, outward-bound from Copenhagen with a cargo of munitions, blew up and sank on August 14th, 1945, near Gilleloje, North Zealand.

BERSAGLIERE

Italian Navy, destroyer; 1938; *Cant. Navali Riuniti*; 1,620 tons; 339x38-5x10-7; 48,000 s.h.p.; 39 knots; turbine engines; 3-drum boilers; four 4-7 in. guns, six 37mm A.A., four 13mm A.A. 6 T.T.
The Italian destroyer *Bersagliere* was bombed and sunk by Allied aircraft at Palermo on January 7th, 1943. The vessel carried a complement of about 200.

BERTHA

Jervelund & Clephan; 1873; *Backhouse & Dixon*; 639 tons; 195x27x14-9; 90 r.h.p.; compound engines.
The steamship *Bertha* was in a collision with the steamship *Claverley*, 2,837 tons, off Southwold, on June 14th, 1896. The *Bertha* sank with the loss of six of her crew.

BERTHA

German Government; 1922; *P. Smit, Jnr.*; 1,810 tons; 274-2X 36-9x17-5; 239 n.h.p.; triple-expansion engines.
The steamship *Bertha* was formerly the French *Bacchus*, taken over by the Germans. She was torpedoed and sunk by an Allied submarine on October 3rd, 1944, about 40 miles N. of Skiathos, Northern Sporades.

BERWICKSHIRE

Scottish Shire Line; 1912; *Armstrong Whitworth & Co.*; 7,464 tons; 450-1x57-1x26-8; 4,500 i.h.p.; 14 knots; triple-expansion engines & L.P. turbine.
On August 20th, 1944, the *Berwickshire*, Capt. J. McCrone, was some hundreds of miles E. of Durban when she was torpedoed and sunk by a submarine. Seven persons were killed. Capt. McCrone was among the survivors.

BERWEND

New York & Porto Rico S.S. Co.; 1893; *J. Blumer & Co.*; 2,589 tons; 288-9x39-3x22-5; 273 n.h.p.; triple-expansion engines.
The American steamship *Berwend* was torpedoed and sunk by a German submarine off Ushant on August 3rd, 1918.

BESHOLT

A/S Besco; 1936; *Kockums Mek. Verks.*; 4,977 tons; 401-4 x 54-8x25-1; 972 n.h.p.; oil engines.
The Norwegian motorship *Besholt* was torpedoed and sunk by a German submarine on December 2nd, 1942, on a voyage from Matadito Trinidad. Fourteen of her crew were killed.

BESS

A/S Ganger Rolf; 1939; *A/S Akers Mek. Verks.*; 1,116 tons; 244-2x38-2x13-7; oil engines.
The Norwegian motorship *Bess*, on a voyage from Antwerp to Oslo, took a list, capsized and sank on August 13th, 1951. Twenty-two of her crew and eight passengers were drowned. There were nine survivors.

BESSELL

Liverpool, Brazil & River Plate S.N. Co.; 1878; *A. Leslie & Co.*; 1,901 tons; 306-9x33-7x24-4; 180 h.p.; compound engines.
The British freighter *Bessell*, carrying a general cargo, sank in a collision in June, 1895, W. of the Royal Sovereign lightship. She was on a voyage from London to Santos.

BESSHEIM

A/S Ganger Rolf; 1912; *Nylands Varksted*; 1,774 tons; 256x 36-1x22-8; 225 n.h.p.; triple-expansion engines.
The Norwegian steamship *Bessheim*, under German control, was torpedoed and sunk by a British submarine on November 21st, 1941, near Hammerfest, with the loss of five lives.

BESSIE MORRIS

B.C. Thin; 1880; *W. Hamilton & Co.*; 1,729 tons; 280-2x34x 21-9; 200 h.p.; compound engines.
The British freighter *Bessie Morris* was wrecked in June, 1889, at White Point, C.B., while on a voyage from Montreal to Sydney, C.B., in ballast.

BESTEVAER

Maats. Stoomschip Bestevaer; 1879; *J. Laing*; 1,044 tons; 224-5x32x16-3; 114 n.h.p.; compound engines.
The Dutch steamship *Bestevaer* was sunk by the German submarine *UC-21* in the North Sea on July 4th, 1917. Eight of the crew were lost.

BESTWOOD

W. France, Fenwick & Co.; 1913; *S. P. Austin & Son*; 2,248 tons; 280X 40-5X 18-5; 221 n.h.p.; triple-expansion engines.
The *Bestwood* was employed as an Admiralty collier in the First World War. On May 29th, 1917, when 12 miles N.W. of S. Bishop Light, she was involved in a collision and sank.

BETA

Halifax & West India S.S. Co.; 1873; *Aitken & Mansel*; 1,087 tons; 235-1x28-5x14-7; 226 n.h.p.; triple-expansion engines.
The British cargo ship *Beta* was wrecked in February, 1908, at Grand Turk. She was on a voyage from Halifax to the West Indies.

BETH

A/S Bill; 1930; *W. Doxford & Sons*; 6,852 tons; 416-2x58x 32-8; 598 n.h.p.; oil engines.
The Norwegian tanker *Beth*, from Trinidad to Freetown with 10,000 tons of fuel oil, was torpedoed and sunk by a German submarine on May 17th, 1942, about 135 miles E.S.E. of Barbados.

BETIS

Jose Morey; 1879; *A. Leslie & Co.*; 1,011 tons; 210-6x29-6x 15; 140 n.h.p.; compound engines.
The Spanish steamship *Betis* was bombed and sunk by Insurgent aircraft in July, 1938, off Calafell, during the Spanish Civil War.

BETTY

DisHeimdal; 1912; *Wood, Skinner & Co.*; 2,109 tons; 281-4X 43-1x19; 219 n.h.p.; triple-expansion engines.
The Danish ship *Betty* was torpedoed and sunk by a German submarine in the North Sea on May 26th, 1915.

BETTY

Bowaters Newfoundland Pulp & Paper Mills; 1918; *Superior S.B. Co.*; 2,239 tons; 251x43-7x22-2; 330 n.h.p.; triple-expansion engines.
The British steamship *Betty* was torpedoed and sunk by a German submarine on August 14th, 1940, about 35 miles off Tory Island, Ireland. Thirty of her crew of 34 were lost.

BETTY HINDLEY

Stephenson Clarke & Assoc. Cos.; 1941; *S. P. Austin & Son*; 1,738 tons; 255-9x38-3x18-8; 194 n.h.p.; triple-expansion engines.
Carrying coal from the Tyne to London, the *Betty Hindley* went aground on August 6th, 1941, on Haisbro Sand and broke her back.

BETTY HINDLEY

Stephenson Clarke; 1943; *S. P. Austin & Son*; 1,771 tons; 258X 38-3x16-6; triple-expansion engines.
The British steamship *Betty Hindley* struck a mine and sank on October 7th, 1947, off Scarborough.

BEURSPLEIN

N.V. Scheepv. Moats. Millingen; 1920; Deutsche Werft; 4,368 tons; 389-9x50-1x26-9; 345 n.h.p.; triple-expansion engines.
The Dutch steamer *Beursplein*, bound from Gourock to the United States, was attacked by German dive bombers on February 26th, 1941, S.W. of Ireland. The vessel was badly damaged and sank with the loss of 22 of her crew.

BEVERLEY

British Navy, destroyer; 1919; Newport News Shipbuilding Co.; 1,190 tons; 314x30x10; 26,000 s.h.p.; 35 knots; turbine engines; four 4in. guns, one Bin.A.A.; 12 T.T.
The destroyer *Beverley*, Lt. Cdr. Rodney A. Price, was the ex-U.S.S. *Branch*, transferred to the British Admiralty under the Lend-Lease agreement. On April 11th, 1943, when in the North Atlantic the vessel was torpedoed and sunk by a German submarine. Nine officers, including Cdr. Price, and 139 ratings were killed.

BEWICK

W.H. Wise; 1872; W. Doxford & Sons; 1,401 tons; 253-3 x 32-4x24; 191 n.h.p.; compound engines.
The steamship *Bewick* was lost in a gale in the North Sea on September 12th, 1902. Eleven of the crew were drowned.

BEZUPRECHNI

Russian Navy, destroyer; 1902; Nevski Works; 350 tons; 196-7x18-3x11-5; 5,700 i.h.p.; 26 knots; triple-expansion engines; one 12 pdr. gun, five 3 pdr.; 3 T. T.
The Russian destroyer *Bezuprechni* was a unit of the 2nd Destroyer Flotilla of the Baltic Fleet at the battle of Tsu-Shima on May 27th, 1905. The ship came through the action without serious damage, but on the morning of the 28th she was sighted by the Japanese cruiser *Chitose* and the destroyer *Ariake*. She was chased by these vessels and sunk with all hands, 62 officers and men. No details of her part in the battle, or of her final destruction, have been recorded, and beyond the announcement of her sinking by the Japanese there is little known of her career.

BHIMA

Bombay Steamship Co.; 1864; Earle's S.B. Co.; 1,194 tons; 256x32x20-3; 100 h.p.; steam engines.
The auxiliary brig *Bhima* was on a voyage from Bombay to Suez when she was run down by the steamer *Nor ma* on September 11th, 1866. Of those on board *the Bhima* 19 were drowned.

BHUTAN

Hain S.S. Co.; 1929; Harland & Wolff; 6,104 tons; 436x57-6x 29 • 6; 1,245 n.h.p.; quadruple-expansion engines & L.P turbine.
The British steamship *Bhutan* left Alexandria on June 11th, 1940, for Malta in convoy. The convoy was under continuous air attack for the next three days, *the Bhutan* being sunk on the 14th. Only six lives were lost of her complement of 180.

BIANCA C.

Giacomo Costa fu Andrea; 1949; LaCiotat; 18,427 tons; 593-8 X 75-6 X —; 20 knots; oil engines.
On Sunday, October 22nd, 1961, *the Bianca C.* arrived at St. George, Grenada, British West Indies, from La Guaira, Venezuela, where she embarked 15 West Indian passengers for Britain. At 9.30 a.m. when at anchor in the outer harbour loud explosions were heard coming from her engine room. These were followed by an outbreak of fire, and by further explosions. Her lifeboats were lowered, while about 30 large and small craft from shore went to her assistance. Between them they brought the liner's 362 passengers and 311 crew safely to land. One man was killed and one was missing. Twelve were taken to hospital badly burned, one of whom died soon afterwards.

The vessel was taken in tow, still burning, with the intention of beaching her outside the harbour but she sank on the 24th, before this could be accomplished.

BIARRITZ

Cie. des Chargeurs Francais; 1914; R. Thompson & Sons; 2,452 tons; 299-4x44-5x19-9; 256 n.h.p.; triple-expansion engines.
The French steamship *Biarritz* was sunk by a German submarine in the Mediterranean on May 24th, 1917.

BIARRITZ

A/S Ganger Rolf; 1922; Akers Mek. Vcerks; 1,752 tons; 255-7 x 39 • 7 x 16 • 9; 169 n.h.p.; triple-expansion engines.
The Norwegian steamship *Biarritz* struck a mine and sank on January 25th, 1940, off Land's End with the loss of all on board, 25 crew and 11 passengers.

BIBURY

Capper, Alexander & Co.; 1929; R. Duncan & Co.; 4,616 tons; 408x55x25-9; 489 n.h.p.; 11 knots; triple-expansion engines.
The steamer *Bibury*, Capt. L. Hunter, was sunk by a German raider on September 16th, 1940, some hundreds of miles W. of Bissao, West Africa. Capt. Hunter and 38 men were killed.

BIC ISLAND

Canadian Government; 1917; Workman, Clark & Co.; 4,000 tons; 370x50-3x25-3; 350 n.h.p.; triple-expansion engines.
The Canadian steamship *Bic Island* was torpedoed and sunk by a German submarine on October 29th, 1942, on a voyage from Halifax to Liverpool. Among those lost were 48 survivors from the American tanker *Gurney E. Newlin*, which had been sunk on October 27th.

BICHU MARU

Nippon Yusen Kaisha; 4,667 tons.
This Bichu Maru was bombed and sunk on December 29th, 1943, off New Guinea.

BICKERTON

British Navy, frigate; 1943; United States; 1,300 tons; 300x35 X—; 5,500 h.p.; 20 knots; turbine engines; three 3 in. guns, two 40 mm., two 20 mm.
The frigate *Bickerton*, Cdr. D. G. F. W. MacIntyre, D.S.O., participated in the attack on the German battleship *Tirpitz*. The British force which was under command of Admiral Sir Henry R. Moore, K.C.B., M.V.O., consisted of a squadron of aircraft carriers with smaller ships as escort. The *Bickerton* had just arrived from the Channel where she had sunk a German submarine and taken 42 prisoners.

The *Tirpitz*, which was lying in Alten Fjord, was hit with large and medium bombs by aircraft from the carriers. An A.A. vessel was blown up, four destroyers were hit, and a tanker, a supply ship and many other vessels damaged. The operation lasted from August 22nd to the 29th, but on the first day the *Bickerton* was torpedoed and disabled by a submarine. She was later sunk by the British destroyer *Vigilant*, which rescued the survivors. One officer and 37 ratings lost their lives.

BIDEVIND

A/S Borgestad; 1938; Flensburger Schiffsb. Ges.; 4,956 tons; 414-3x55-7x25; 969n.h.p.; oilengines.
The Norwegian motor vessel *Bidevind* was torpedoed and sunk on April 30th, 1942, about 70 miles off New York.

BDELA

Liverpool, Brazil & River Plate S.N. Co. (Lampert & Holt); 1870; A. Leslie & Co.; 2,182 tons; 316x34-9x29-4; 267 n.h.p.; compound engines.
The British freighter *Biela* sank in a collision in October, 1900, off Nantucket Shoals. She was on a voyage from New York to Manchester with a general cargo.

BIELA

Lampert & Holt; 1918; Short Bros.; 5,298 tons; 400-3x52-4 X 28-5; 517 n.h.p.; 10-5 knots; triple-expansion engines.
The steamship *Biela*, Capt. D. Anderson, left Liverpool on January 31st, 1942, for Buenos Aires. On February 14th, the s.s. *Start Point* picked up a distress call indicating a submarine attack about 400 miles S.W. of Cape Race. Nothing more was heard of the *Biela* or her crew of 49.

BIENMLLE

Waterman S.S. Corpn.; 1921; Merchant S.B. Corpn.; 5,491 tons; 400-7x54-2x30-4; 645 n.h.p.; 10 knots; turbine engines.
The American steamship *Bienville* was bombed and set on fire by a Japanese carrier-based aircraft on April 6th, 1942, in the Bay of

Bengal; then sunk by gunfire from a heavy cruiser. Nineteen of her crew of 42 were killed.

BIFUKU MARU

Nippon Suisan K.K.; 1899; *Lobnitz & Co.*; 2,559 tons; 312 x 39-2 x 18-7; 377 n.h.p.; triple-expansion engines. The steamer *Bifuku (Bihuku) Mam* was torpedoed and sunk by the U.S. submarine *Narwhal* on August 8th, 1942, off the north east coast of Honshu Island.

BIHARA

British India S.N. Co.; 1903; *A. & J. Inglis*; 3,943 tons; 373-4 X 45-2 x 26-6; 899 n.h.p.; triple-expansion engines. The British cargo ship *Bihara* was wrecked in August, 1905, on Alguada Reef in the Bay of Bengal. She was carrying a general cargo from Cocanada to Rangoon and Calcutta.

BILBSTER

A. H. & E. Gunn; 1908; *Richardson, Duck & Co.*; 4,478 tons; 355 • 4 X 51 • 1 X 26 • 8; 355 n.h.p.; triple-expansion engines. The British freighter *Bilbster* sank in a collision on November 21st, 1917, in 43° 20' N., 13° 20' W. She was employed as an Admiralty collier and was on a voyage from Newport to Gibraltar.

BILDERDIJK

Holland-AmerikaLijn; 1922; *C. van der Giessen & Zonen*; 6,856 tons; 400 x 54 • 3 x 36 • 6; 648 n.h.p.; turbine engines. The Dutch steamer *Bilderdijk* was torpedoed and sunk by a German submarine on October 19th, 1940, on a voyage from Halifax to Liverpool.

BILL

A/S Bill; 1939; *Moss Vcerft & Dokk A/S*; 2,445 tons; 304-7 x 47-7 x 18-5; 228 n.h.p.; compound engines & L.P. turbine. The Norwegian steamship *Bill* was torpedoed and sunk on July 29th, 1942, near Trinidad.

BILLOW

Jackson Bros. & Cory; 1881; *E. Withy & Co.*; 1,608 tons; 257-1 x 34-4 x 18-1; 160 n.h.p.; compound engines. The British freighter *Billow* was sunk in a collision in October, 1893, at Bilbao. She was leaving for Cardiff with a cargo of iron ore.

BBSNENDIJK

Holland-AmerikaLijn; 1921; *N.V. WerfdeNoord*; 6,875 tons; 400-4 x 54-3 x 36-6; 648 n.h.p.; turbine engines. The Dutch steamship *Binnendijk* struck a mine and sank on October 8th, 1939, three miles S.E. of the Shambles light.

BINTANG

Det Ostasiatiske Kompagni; 1922; *Nakskov Skibsvcerft*; 2,779 tons; 284-8 x 44-2 x 25-4; 453 n.h.p.; 11 knots; oil engines. The Danish motorship *Bintang*, Capt. H. H. Larsen, was formerly of the Ostasiatiske Kompagni's fleet, which was associated with the United Baltic Corporation. After the German occupation of Denmark in April, 1940, the vessel sailed under the British flag. On February 22nd, 1942, when in convoy in the Gulf of Sollum, Libya, she was bombed and sunk by aircraft. Capt. Larsen and 14 others were killed.

BINTANG

N.V. Stoomv. Maats. Nederland; 1916; *Fyenoord*; 6,481 tons; 420 x 54-7 x 33-6; 940 n.h.p.; oil engines. The Dutch motor vessel *Bintang* was bound from Cape Town to the United States. On November 21st, 1942, 650 miles E. of Trinidad, she was torpedoed by the German submarine *U-160*, with the loss of 21 of her crew.

BINTOEHAN

Koninkl. Paketvaart Maats.; 1921; *N.V. Werf Hubertina*; 1,021 tons; 229-6 x 38-4 x 12-8; 96 n.h.p.; triple-expansion engines. The steamer *Bintoehan* sailed from Tjilatjap on February 24th, 1942, bound for Bunbury, Western Australia. Nothing more was ever heard of the ship, which was probably sunk by Japanese action.

BIRCHBANK

Bank Line; 1924; *Harland & Wolff*; 5,151 tons; 420-4 x 53 > 9 x 26-5; 717 n.h.p.; oil engines. The British motorship *Birchbank* was bombed and set on fire by German aircraft on November 11th, 1943, and blew up and sank off Mostaganem, Algeria.

BIRCHGROVE PARK

R. W. Miller & Co. Pty.; 1930; *J. Lewis & Sons*; 640 tons; 153-4 x 34-1 x 10-7; 93 n.h.p.; triple-expansion engines. The Australian ship *Birchgrove Park* was carrying coal from Newcastle, N.S.W. to Sydney. On August 2nd, 1956, when she was six miles N. of Sydney Heads the cargo shifted during a gale and she sank. There were four survivors from her crew of 14.

BIRGIT

Bloms Rederi Aktieb.; 1882; *R. Irvine & Co.*; 1,117 tons; 230 X 32-2 x 13-8; 103 n.h.p.; compound engines. The Swedish steamship *Birgit* struck a mine and sank in the North Sea on February 26th, 1916.

BIRK

D/S A/S Storli; 1920; *R. Duncan & Co.*; 3,664 tons; 359-8 X 52-1 x 23-6; 320 n.h.p.; triple-expansion engines. The Norwegian steamer *Birk* struck a mine and sank on February 18th, 1942, near Kirkenes, with the loss of 26 lives.

BIRKDALE

C. Radcliffe & Co.; 1896; *Short Bros.*; 2,828 tons; 316-2 X 42-1 x 17-1; 258 n.h.p.; triple-expansion engines. The British steamship *Birkdale* was wrecked in December, 1902, at Isola Correnti near Catania. She was carrying a cargo of coal from Newport to Syra.

BIRKENFELS

Deutsche Dampfs. Ges. "Hansa"; 1922; *Act. Ges. Weser*; 6,322 tons; 431-6 x 56-5 x 30-3; 430 n.h.p.; triple-expansion engines & L.P. turbine. The steamer *Birkenfels* was torpedoed and sunk by a British submarine on December 18th, 1940, off the mouth of the Scheldt.

BIRKENHEAD

British Government transport, paddle; 1845; *Laird's*; 1,400 tons; 210 x 37-5 x —; 556 i.h.p.; 11 knots. The *Birkenhead* was originally intended for service as an auxiliary steam frigate, but was converted during building to the purposes of a troopship. On January 7th, 1852, she left Cork for Cape Town and Algoa Bay carrying 12 officers, three surgeons, and 479 non-commissioned officers and men. In addition there were 25 women, 31 children and a crew of 130.

The Eighth Kaffir War was then in progress and the drafts were reinforcements for the army at the front, most of the men being young soldiers.

The *Birkenhead* reached Cape Town in February and disembarked sick men and passengers, taking on board stores and horses. On the evening of Wednesday, February 25th, she left again for Port Elizabeth having on board 638 persons in all. It was South African summer and the sea was calm and the sky clear. At 1.50 a.m. on the 26th, when all except the watch on deck were asleep the vessel struck on an uncharted rock off Danger Point, in False Bay, about 50 miles from Cape Town. The speed of the ship at the time was eight knots, and soundings had just been taken giving a depth of 12 fathoms. This was sufficient to alarm the officer of the watch who ordered soundings to be taken again, but before this could be done the vessel struck. Capt. Robert Salmond, in command, ordered the second bower anchor to be dropped in the hope that this would prevent the ship from slipping off the rocks into deep water. He then ordered the boats to be lowered, and stopped the engines. The vessel struck again, this time under the engine room, which quickly flooded, driving the engineers and stokers on deck.

Meanwhile the inrush of water from the first hole just abaft the foremast had flooded the lower troop-decks. All the men sleeping in this overcrowded space were drowned instantly, there being no warning and no possible means of escape. The remainder of the men paraded on deck under the senior officer, Col. Alexander Seton of the 74th Highlanders. Under his orders squads were told off to man

BIRMANIA

the pumps and assist in launching the eight boats, a number lamentably insufficient for her hundreds of passengers.

Ten minutes after striking the ship broke in two at the bows, the foremast and funnel falling upon the men, killing a large number who were endeavouring to launch the boats, and smashing the pinnace. The ship again broke, this time at the stern. The presence of the horses added greatly to the difficulties, and an attempt was made to set them free so that they might swim ashore, but this only brought fresh horror to the scene as the unfortunate animals were at once attacked by sharks.

Eventually three boats crowded with people were successfully launched, the remaining troops lining up on deck in military formation. An unfortunate order given by the captain, "Every man for himself" was now passed along. With great promptitude the officers in command of the troops called upon their men to ignore this and to stand fast, otherwise the already overcrowded boats would be swamped. The men obeyed, only three breaking ranks, and with their officers at their head went down in perfect order.

From the time of the *Birkenhead's* striking the rock to the time of sinking was twenty-five minutes. Many of the men left behind were attacked by sharks and only 68 came ashore on floating wreckage. Another 40 men were rescued from the remaining mast by the schooner *Lioness*, which arrived during the next afternoon.

Capt. Salmond of the *Birkenhead* and the gallant Col. Seton, senior military officer, were among the drowned who numbered 445, there being 193 persons saved, including all the women and children. A sum of £240,000 in gold, destined for the army in the field, went down with the vessel.

A mural tablet and brass plates bearing the names of those lost were placed in the collonade of Chelsea Hospital by command of Queen Victoria, "to record heroic constancy and unbroken discipline". The King of Prussia, Frederick William IVth, was so impressed by the heroism displayed that he caused the story to be read at the head of all his regiments.

BIRMANIA

Italia Soc. Anon. di Nav.; 1930; Cantieri Riuniti dell'Adriatico; 5,305 tons; 440-7x56-2x23-6; 1,219 n.h.p.; oil engines.

The Italian motor vessel *Birmania*, lying in Tripoli harbour with a full cargo of munitions, blew up and sank on May 3rd, 1941.

BIRMINGHAM CITY

Isthmian S.S. Co.; 1920; Chickasaw S.B. & Car Co.; 6,194 tons; 395'5x55-6x31-4; 587n.h.p.; triple-expansion engines.

The American steamship *Birmingham City* was torpedoed and sunk by a German submarine on January 9th, 1943, between Trinidad and Pernambuco.

BIRTLEY

Burnett S.S. Co.; 1900; Wood, Skinner & Co.; 1,029 tons; 220X33-2X14* 3; 133n.h.p.; triple-expansion engines.

The British freighter *Birtley* was wrecked in November, 1905, near Flamborough Head. She was carrying coal from the Tyne to London.

BIRTLEY

Burnett S.S. Co.; 1906; Wood, Skinner & Co.; 1,438 tons; 245-3x36-7x15-9; 167n.h.p.; 8-5 knots; triple-expansion engines.

The steamship *Birtley* was presumed sunk by a German submarine off Flamborough Head on January 4th, 1918. The ship had a crew of 18 men.

BIRTLEY

Burnett S.S. Co.; 1923; Wood, Skinner & Co.; 2,873 tons; 334-3x44-6x21-6; 337 n.h.p.; triple-expansion engines.

The British steamship *Birtley* struck a mine and sank on September 15th, 1941, on a voyage from London to the Tyne.

BIRUTA

Ellerman's Wilson Line; 1889; Palmers' Co.; 1,732 tons; 260-3x37-2x16-7; 218n.h.p.; 9 knots; triple-expansion engines.

The steamship *Biruta* was torpedoed and sunk by a German submarine eight miles N.W.f.W. of Calais on August 6th, 1918.

Twelve men, including the captain, were killed. The vessel was managed for the Shipping Controller by the Ellerman's Wilson Line.

BISAKUMARU

Nippon Yusen Kaisha; 4,467 tons.

The *Bisaku Mam* was torpedoed and sunk by the U.S. submarine *Seahorse* on April 9th, 1944, west of Saipan Island, Ladrone Islands.

BISAN MARU

Nippon Yusen Kaisha; 4,500 tons.

The *Bisan Mam* was torpedoed and sunk by the U.S. submarines *Bowfin* and *Aspro* on May 14th, 1944, about 100 miles west of the Caroline Islands.

BISAN MARU

Japanese Government; 1934; Swan, Hunter & Wigham Richardson; 3,420 tons; 328-7x47-2x23-2; 383n.h.p.; triple-expansion engines.

The steamship *Bisan Mam* was formerly the British *Ming Sang*, scuttled at Hong Kong in December, 1941, and raised and repaired by the Japanese. She struck a mine and sank on June 18th, 1945, off Karatsu, Japan.

BISLEY

Mitre Shipping Co.; 1907; C. Cornell & Co.; 4,929 tons; 400-2x52-2x28-8; 558 n.h.p.; triple-expansion engines.

The British cargo ship *Bisley* was wrecked on October 19th, 1911, on Castillos Island, seven miles N.E. of Cape Polonis. She was on a voyage from New York to Buenos Aires with a general cargo.

BISMARCK

German Navy, dreadnought-battleship; 1939; Blohm & Voss; 35,000 tons; 792-5x118x26; 30 knots; turbine engines; eight 15 in. guns, twelve 5-9 in., six 4-1 in.; 4 aircraft.

On May 22nd, 1941, British reconnaissance aircraft reported that a battleship and a cruiser had left Bergen harbour. The British Admiralty thereupon made dispositions to prevent the ships getting through to the Atlantic convoy routes. The heavy cruisers *Norfolk*, Capt. A. J. L. Phillips, wearing the flag of Rear-Admiral W. F. Wake-Walker, C.B., and *Suffolk*, Capt. R. M. Ellis, were ordered to take up a position in the Denmark Strait. A sharp look-out was kept for the enemy ships, now known to be *the Bismarck*, the newest and most powerful warship in the German Navy and the heavy cruiser *Prinz Eugen*, 10,000 tons, and on the evening of May 23rd they were sighted proceeding at high speed on a south-westerly course. Visibility was good up to six miles, but snow squalls and mist constantly recurred, reducing it mostly to one mile, nevertheless the two British cruisers kept in touch throughout the night. On the following morning the battle cruiser *Hood*, Capt. R. Kerr, C.B.E., flagship of Vice-Admiral L. E. Holland, C.B., and the new battleship *Prince of Wales*, Capt. J. C. Leach, M.V.O., took up the chase and began firing with such good effect that the *Bismarck* was seen to be in flames. At this juncture, when everything seemed to be going well for the British, *Hood* was hit at extreme range (approximately 23,000 yards) and immediately blew up. Only one officer and two men survived from her total complement of 1,341.

The chase continued, still on the same south-westerly course, with the *Bismarck* losing speed and leaving a wake of oil. On the evening of this day, the 24th, there was another exchange of salvos between *Prince of Wales* and the *Bismarck*, causing both German ships to turn away to the westward and later to come on to a southerly course. At nightfall torpedo-bombers from the aircraft carrier *Victorious*, Capt. H. C. Bovell, successfully attacked, hitting the *Bismarck* with one torpedo. At 3 a.m. on the 25th, when approximately 350 miles S.S.E. of Greenland, the pursuing forces lost touch.

An intensive search by aircraft was now instituted, and at 10.30 a.m. on the 26th the *Bismarck* was sighted by a Coastal Command aircraft in a position about 550 miles W. of Land's End. This aircraft was attacked and lost touch with her quarry, but at 11.15 a.m. naval aircraft from the aircraft carrier *Ark Royal* made contact, reporting the *Bismarck* as steering on an easterly course. The *Prinz Eugen* was no longer in company.

In the meantime, units of the Home Fleet under Admiral J. C. Tovey, had been gathering around the unlucky battleship, so that it was almost impossible for her to make a break-through. At 5.30 p.m. another blow was struck by a second group of naval aircraft from the *Ark Royal*, which hit the battleship twice, striking her amidships and on the starboard quarter, and causing her to make two complete circles before her steering-gear could be brought to function.

The *Bismarck* had suffered another reduction in speed and at nightfall she became a target for "Tribal" destroyers, two of which, *Cossack* and *Maori*, hit her with one torpedo apiece. At about 2.50 a.m., one hour after the destroyer attacks ceased, the *Bismarck* was reported as stopped, her position being about 400 miles due W. of Brest. Later she got under way, but her speed was so reduced that it was reported to be little faster than eight knots.

At daybreak on May 27th, five days after she had left the shelter of her Norwegian harbour, the *Bismarck*, her heavy guns still replying to the fire of the British battle units, was in a sinking condition. By 10 a.m. *King George V* and *Rodney* had silenced her guns and Vice-Admiral Leutjens, commanding the German ships, had radioed to Berlin from his stricken flagship "Bismarck unable to manoeuvre; we will fight to the last shell. Long live the Führer!". Soon after this Admiral Tovey ordered the heavy cruiser *Dorsetshire*, Capt. B. C. S. Martin, to sink the *Bismarck* with torpedoes, and after three torpedoes had struck her the *Bismarck* sank at 11.1 a.m.

The complement of the *Bismarck* was unknown but was assumed to be in the neighbourhood of 2,000. Over 100 were saved by British warships.

The distance traversed in the chase was over 1,750 miles.

BISMARCKSEA

United States Navy, escort-carrier; 1944; United States; 6,730 tons; 498x80x19-7; 11,200 i.h.p.; 18knots; Skinner-Unaflo steam engines; one 5 in. gun, twenty-four 20 m.m.; aircraft. The United States escort-carrier *Bismarck Sea* was bombed and sunk off Iwojima on February 21st, 1945, when in action against Japanese forces. The vessel carried a complement of 1,500.

BISON

French Navy, destroyer; 1928; Lorient Dockyard; 2,436 tons; 427X38-7X15-7; 64,000 s.h.p.; turbine engines; five 5 • 5 in. guns, four 37 mm., 6 T.T.

The French destroyer *Bison*, Capt. de Vaiss. Bouan, together with many other Allied cruisers and destroyers, was engaged in escorting convoys of troops withdrawn from Norway on May 1st, 1940. The Germans made the most persistent attacks on the ships by dive-bombers, the escort suffering severely. On the 3rd the *Bison* was hit by bombs and set on fire, all efforts by the crew to subdue the flames proving useless, and she was abandoned and sunk by torpedoes from the Allied ships. She carried a complement of 229, of whom five officers and 131 ratings were drowned.

The British destroyer *Afridi*, 1,870 tons, and the Polish destroyer *Grom*, 2,144 tons, were also sunk in the fighting in these waters.

BISP

O. Kvilhaug; 1889; Sunderland S.B. Co.; 1,000 tons; 209-2x 30-1x13-6; 87 n.h.p.; triple-expansion engines.

The Norwegian steamship *Bisp* left Sunderland on January 20th, 1940, for Andalsnaes. Nothing more was ever heard of the ship or her crew of 16.

BISTRITZA

Romania Prima Societate Nationala de Nav. Maritima; 1915; J. Priestman & Co.; 3,688 tons; 365x51-5x22-1; 321 n.h.p.; triple-expansion engines.

The Roumanian steamship *Bistrizza* was torpedoed and sunk by a German submarine on October 11th, 1916, in the Arctic.

BITTERN

British Navy, destroyer; 1897; Vickers; 360 tons; 5,700 Lh.p.; 30 knots; triple-expansion engines; Thornycroft boilers; one 12 pdr. gun, five 6 pdr.; 2 T. T.

The destroyer *Bittern* collided with the s.s. *Kenilworth* off Portland Bill on April 4th, 1918. The destroyer's official complement was 60.

BITTERN

British Navy, sloop; 1937; J. S. White & Co.; 1,190 tons; 266 x 37x8-5; 3,300 s.h.p.; 18-75 knots; turbine engines; 3-drum boilers; six 4 in. guns, five smaller.

The sloop *Bittern*, Lt. Cdr. R. H. Mills, was lying in Namsos Fjord engaged in protecting a large number of merchantmen against German aircraft. For this purpose she was equipped with six 4in.A.A. guns which proved very effective in foiling repeated attacks on the ships. On May 1st, 1940, at about 10 a.m., three Heinkel aircraft attacked from a height of 10,000 feet, followed by another wave soon afterwards. The sloop was hit aft by a heavy bomb which caused an explosion among her depth charges, putting her after gun out of action and setting her on fire. Despite this damage she still continued to fight until the fire spread to the forward guns and she had to be torpedoed by the British after her crew had been taken off.

The *Bittern* carried a complement of 125 officers and ratings, of whom eight were wounded, a very slight loss in the circumstances.

BIVONA

Italian Government; 1930; Rotterdam Droogdok Maats.; 1,646 tons; 234 • 3 x 40 • 1 x 19 • 1; 234 n.h.p.; triple-expansion engines. The tanker *Bivona* was formerly the French *Socombel*, seized by the Italians. On April 19th, 1943, she was torpedoed by a British submarine 22 miles N. of Taranto.

BIZEN MARU

Nippon Yusen Kaisha; 4,667 tons.

The *Bizen Maru* was torpedoed and sunk by the U.S. submarine *Lapon* on May 24th, 1944, about 200 miles S.S.E. of Cap St. Jacques, Indo-China.

BJERKO

Dampskibs. Akties. "Danto"; 1912; Sir Raylton Dixon & Co.; 1,871 tons; 276-6x40-9x18-5; 204 n.h.p.; triple-expansion engines.

The Norwegian steamship *Bjerko* was torpedoed and sunk by a German submarine in the English Channel on July 5th, 1917.

BJONN

Rederi AISHemeseid; 1921; F.Schichau; 5,509 tons; 398-9X 55-9x29-3; triple-expansion engines & L.P. turbine.

The Norwegian steamship *Bjonn* was bombed and sunk on December 9th, 1941, at Hustadrika, Norway.

BJOR

Akties. Christoffersens Dampsk. Red.; 1885; Tyne I. S.B. Co.; 1,090 tons; 215-9x30x21-6; 168 n.h.p.; compound engines. The Norwegian steamship *Bjor* was sunk by a German submarine in the North Sea on December 11th, 1916.

BJORKHAUG

Rederi AISBjorkhaug; 1919; J. Meyer's Scheepsb. Mij.; 2,094 tons; 280-7x41-3x19-2; 170 n.h.p.; triple-expansion engines.

The Norwegian steamship *Bjorkhaug* was loading explosives at Algiers on July 16th, 1943, when she was broken in two by an internal explosion and sank. Nine of her crew were killed.

BJORKO

Rederi Afb Rex; 1924; New Waterway S.B. Co.; 2,258 tons; 293-4x45x19-5; triple-expansion engines.

The Swedish steamship *Bjorko*, on a voyage from Vesteras to Ymuiden, was in collision with the steamship *Sea Wind*, 7,176 tons, on November 6th, 1953, and sank three miles N. of the Weser light-ship. Seven of her crew of 25 were lost.

BJORNVIK

A. F. Bjornstads Rederi A/S; 1918; Cochrane & Sons; 812 tons; 213-1x30-0x15-2; 132 n.h.p.; triple-expansion engines.

The Norwegian steamship *Bjornvik* was bombed and sunk by German aircraft on January 28th, 1942, near the Lizard. Seventeen of her crew were killed.

BLAAFJELD I

Harold Grieg Martens; 1918; Trondhjems Mek. Vcerks.; 1,146 tons; 226-3x36-5x15-7; 116 n.h.p.; triple-expansion engines.

The Norwegian steamship *Blaafjeld I* was bombed and sunk by German aircraft on May 5th, 1940, off Namsos.

BLAATIND

Akties. Vestland; 1883; W. Gray & Co.; 1,641 tons; 264-2x 35-6x19-9; 181 n.h.p.; compound engines. The Norwegian steamship *Blaatind* was torpedoed by a submarine in the Mediterranean on April 22nd, 1917.

BLACK HEAD

Ulster S.S. Co.; 1881; Harland & Wolff; 1,173 tons; 249-7X 31-2x15-5; 140 n.h.p.; compound engines. The British cargo ship *Black Head* was wrecked on January 26th, 1912, on Tein Reef, Bornholm Island. She was on a voyage from Riga to Belfast.

BLACK OSPREY

Ministry of Shipping (Cairn Line of Steamships); 1918; Skinner & Eddy Corp.; 5,589 tons; 409-6x54-1x27-1; 508 n.h.p.; 10-5 knots; turbine engines. The British steamship *Black Osprey*, in convoy from Halifax to Newport, straggled from convoy because of engine trouble. Near midnight on February 17th, 1941, her funnel caught fire and she was torpedoed and sunk by a German submarine, with the loss of 25 of her crew of 36.

BLACK POINT

Sprague S.S. Co.; 1918; New York S.B. Co.; 5,353 tons; 368-6X 55-2X30-5; 462 n.h.p.; triple-expansion engines. The American steamship *Black Point* was bound for Boston when she was torpedoed and sunk by the German submarine *U-853* off Narragansett Bay on May 5th, 1945, the ship sinking with 12 of her crew. The *U-853* was destroyed by U.S. frigates later in the same day.

BLACK PRINCE

British Navy, armoured cruiser; 1904; Thames Ironworks; 13,550 tons; 480x73-5x27-5; 23,500 i.h.p.; 23-6 knots; triple-expansion engines; Babcock boilers; six 9-2 in. guns, ten 6 in., twenty 3 pdr.; 3 T.T.

The armoured cruiser *Black Prince* was a unit of the 1st Cruiser Squadron at the battle of Jutland on May 31st, 1916. She was commanded by Capt. T. P. Bonham and carried 37 officers and 815 men, in addition to whom there were five civilians on the day of the battle. The squadron, consisting of *Defence*, flagship of Rear-Admiral Sir R. Arbuthnot, *Warrior*, *Duke of Edinburgh* and *Black Prince*, met with disaster early in the action, *Duke of Edinburgh* being the only ship to survive.

In the first contact with the enemy, which occurred between 5.30 and 6.20 in the afternoon, *Black Prince* was outsteamed by her consorts. As a result she escaped the destruction which befell *Defence* and *Warrior* at the hands of Admiral von Hipper's battle cruisers. As the evening advanced the ship lost touch with the British fleet and turned south in an attempt to rejoin. At about 12.15 a.m. she was still on the same course when she encountered the German High Seas Fleet steaming toward the Horn Reefs.

The position of *Black Prince* was hopeless from the start, for she was at once the centre of the German searchlights. She was swept from end to end for two or three minutes by salvos from heavy guns. She then caught fire and blew up with the whole of her ship's company, there being no survivors.

BLACK WATCH

German Government; 1939; A/Sakers Mek. Verks.; 5,035 tons; 365-1x53-3x26-5; 1,215 n.h.p.; oil engines. The motorship *Black Watch* was bombed and sunk by Allied carrier-based aircraft on May 5th, 1945, N. of Narvik.

BLACKBURN

Great Central Railway Co.; 1910; Earless Co.; 1,634 tons; 265 X 36x17-4; 309 n.h.p.; triple-expansion engines. The British steamship *Blackburn* sank in a collision on December 8th, 1910, off Sheringham. She was on a voyage from Grimsby to Antwerp with a general cargo.

BLACKHALLS

Sir R. Ropner & Co.; 1880; W. Gray & Co.; 1,142 tons; 235X 31-6x15; 99 h.p.; compound engines. The British freighter *Blackhalls* was wrecked on October 12th, 1888, on Schiermonnikoog while on a voyage from Archangel to Amsterdam.

BLACKHEATH

William Gray & Co.; 1871; Denton, Gray & Co.; 1,243 tons; 233-8x32x17-8; 120 h.p.; compound inverted engines. The British iron steamship *Blackheath* was wrecked on February 6th, 1885, off Gothland. She was sailing from Swinemunde to Reval in ballast.

BLACKMOREVALE

British Navy, minesweeper; 1916; Ardrossan Dry Dock Co.; 750 tons; 231 X28x7; 1,800 i.h.p.; 16 knots; triple-expansion engines; Yarrow boilers; two 12 pdr. guns, two 2 pdr. The minesweeper *Blackmorevale* struck a mine and sank off Montrose on May 1st, 1918. She carried a complement of 72.

BLACKWOOD

British Navy, frigate; 1943; United States; 1,300 tons; 300x35 x—; 5,500 h.p.; 20 knots; turbine engines; three 3 in. guns, two 40 mm., four 20 mm.

The frigate *Blackwood*, Lt. Cdr. L. T. Sly, R.D., R.N.R., took part in the landing of the British and American armies in France on June 6th, 1944. The *Blackwood* was sunk by a submarine off Portland on June 15th, with the loss of five officers and 53 ratings. Four officers, including Cdr. Sly, were wounded.

BLAGDON

London & Northern Steamship Co.; 1893; W. Gray & Co.; 1,996 tons; 276-5x38-1x17-6; 176 n.h.p.; 9 knots; triple-expansion engines. The steamer *Blagdon* was torpedoed and sunk by a submarine 75 miles E. by S. of Muckle Flugga on August 9th, 1917. Twelve men, including the captain, were killed.

BLAGOEV

U.S.S.R.; 1921; Armstrong, Whitworth & Co.; 3,100 tons; 320-5x45-2x25-3; 365 n.h.p.; triple-expansion engines. The Russian steamship *Blagoev* was torpedoed and sunk by an unidentified submarine in September, 1937, in the Aegean Sea, during the Spanish Civil War.

BLAIRANGUS

Clydesdale Navigation Co. (George Nisbet & Co.); 1930; Craig Taylor & Co.; 4,409 tons; 380-3x52x25-3; 375 n.h.p.; 10-5 knots; triple-expansion engines.

The steamer *Blairangus*, Capt. Hugh Mackinnon, was torpedoed and sunk by a submarine in the North Atlantic about 350 miles W. by N. of Rockall on September 21st, 1940. Seven men were killed. Capt. Mackinnon was among the survivors.

BLAIRGOWRIE

Clydesdale Navigation Co. (George Nisbet & Co.); 1924; Napier & Miller; 3,259 tons; 338-4x48-7x22-6; 225 n.h.p.; 10 knots; triple-expansion engines.

The cargo steamer *Blairgowrie*, Capt. H. A. Preston, was on a voyage from Swansea to Boston, U.S.A. At 6.34 p.m. on February 26th, 1935, the shore station at Valentia, Ireland, picked up a message from the s.s. *Beaverdale* stating, "Correct position *Blairgowrie* 48°20' N., 27°01' W. Steering-gear gone. Numbers 1 and 2 hatches stove in". This was the first intimation that there was anything wrong with the *Blairgowrie* and it was followed by messages picked up at New York from the North German Lloyd liner *Europa*, 51,000 tons, stating that she was proceeding to the scene in the face of a violent westerly gale. Another message came through from the *Blairgowrie* saying, "Situation desperate. No steering-gear. Hold full of water."

A search of the area through mountainous seas was conducted by the *Europa*, *American Banker* and the Dutch steamer *Blommersdijk* but without discovering any trace of the *Blairgowrie* which foundered with her crew of 26 officers and men.

BLAIRLOGIE

Clydesdale Nav. Co.; 1929; Craig, Taylor & Co.; 4,425 tons; 380-3x52x25-3; 373 n.h.p.; triple-expansion engines. The British steamship *Blairlogie* was torpedoed and sunk by a German submarine on September 11th, 1939, W. of the Bishop Rock.

BLAIRMORE

Clydesdale Nav. Co.; 1928; Ayrshire Dockyard Co.; 4,141 tons; 371-7x51-2X24-3; 257n.h.p.; triple-expansion engines. The British steamship *Blairmore* was torpedoed and sunk by a German submarine on August 24th, 1940, about 700 miles W. of Ireland.

BLAKE

Zodiac Shipping Co. (Moller & Co.); 1906; W. Doxford & Sons; 3,740 tons; 342-1x46-6x24-8; 300n.h.p.; triple-expansion engines. The British steamship *Blake* was torpedoed and sunk by a German submarine 30 miles N. by W. from Cape Wrath on July 24th, 1917. Five of the crew were killed.

BLANCHE

British Navy, destroyer; 1928; Hawthorn Leslie & Co.; 1,360 tons; 323x32-2x12; 34,000 s.h.p.; 35 knots; turbine engines; 3-drumboilers; four 4-7in.guns, two 2 pdr., 5 m.g., 8 T.T. The destroyer *Blanche* was mined and sunk in the Thames Estuary on November 13th, 1939. The vessel sank with the loss of one rating killed and three officers and 12 ratings wounded.

BLANCO ENCALADA

Chilean Navy, ironclad; 1874; Earle's Shipbuilding Co.; 3,500 tons; 210x45-7x19-7; 2,920 i.h.p.; 13 knots; compound engines; six 8 in. guns, four 6pdr., four 3pdr., seven m.g., 3 T.T. The Chilean ironclad *Blanco Encalada* was among the most famous warships of her day, her exploits in South American waters receiving great public attention. She carried a powerful armament and was strongly armoured, her hull being protected by 9in. armour-plates, with an 8 in. teak backing. During the war between Chile and Peru (1879-82) the *Blanco Encalada* and her sister ship the *Almirante Cochrane* brought the Peruvian ironclad *Huascar* to action off Augamos on October 8th, 1879. After a very hard-fought engagement the *Huascar* surrendered. The *Blanco Encalada* next came into prominence at the outbreak of the Chilean Civil War, January 7th, 1891. A dispute had arisen between the President of the Republic, Don Jose Balmaceda, and Congress in which the bulk of the navy sided with the latter.

President Balmaceda had, however, managed to retain two small ships which had recently been delivered by English yards. These were the *Almirante Condell* and the *Almirante Lynch*, both torpedo vessels of 750 tons with a speed of 20 • 3 knots and armed with three 14 pdr. and four smaller guns, all Hotchkiss, two Gatlings and five 14 in. torpedo-tubes. These ships, which were the precursors of the modern destroyer, were built at Laird's, Birkenhead.

On April 16th the Congressional troops captured the town of Caldera except for a small portion which was held by the Balmacedists. The cruiser *Esmeralda* entered the port and bombarded this position and was joined later by the *Blanco Encalada*, which was in need of coal, the cruiser *O'Higgins* and the corvette *Aconagua*. Having gathered this fleet together Congress decided to order the bombardment of Panta, south of Caldera, by the *Blanco Encalada* and the *Aconagua*. On the morning of April 23rd the officer of the watch on the *Blanco Encalada*, Lt. Marquiz, saw a warship's searchlight to seaward about 3.30 a.m., and at 4 a.m. discerned the *Almirante Condell* and the *Almirante Lynch* bearing down on the ironclad at full speed. The big warship lay at anchor with fires banked, a small look-out and no men at the guns. Both the attacking ships fired a torpedo each, but missed, then the *Almirante Condell* fired two and the *Almirante Lynch* three, but again missed. By this time the whole squadron was firing heavily but with little accuracy. Shortly afterwards the *Almirante Lynch* fired her fifth torpedo which cut through the torpedo-nets of the *Blanco Encalada* and blew a huge hole in her starboard side abaft the foremast. The stricken ship at once began to sink, while the torpedo-craft poured in a deadly fire from their Hotchkiss guns on the crew as they were endeavouring to escape. They then turned and attacked the *Aconagua*, but after a brief exchange of shots this ship outsteamed them.

Of the *Blanco Encalada's* complement of 288, no fewer than 182 were killed.

BLANKAHOLM

A/B Svenska Amerika Mexiko Linien; 1930; Eriksbergs M.V. Aktieb.; 2,845 tons; 334-2x46-9x20-2; 473n.h.p.; oilengines. The Swedish motorship *Blankaholm* was torpedoed and sunk by a German submarine on August 18th, 1942, in the West Indies. Five of her crew were killed.

BLANKENESE

German Government; 1929; Howaldtswerke A. G.; 3,236 tons; 330'6x48-1x23-7; 227n.h.p.; triple-expansion engines. The steamer *Blankenese* was formerly the French *Ange Schiaffino*, taken over by the Germans. She was torpedoed and sunk by a submarine on April 22nd, 1942, in the Barents Sea.

BLAS DE LEZO

Spanish Navy, light cruiser; 1923; Ferrol Dockyard; 4,650 tons; 462x46x19; 45,000 h.p.; 29 knots; turbine engines; Yarrow boilers; six 6 in. guns, four 3pdr., four m.g., 12 T.T. The Spanish light cruiser *Bias de Lezo* was engaged in manoeuvres off Cape Finisterre on July 11th, 1932, when she ran on to the Centolla Reef. At the time the vessel was following a destroyer flotilla through the 200 yard channel which separated the reef from the shore. She backed away from the rocks but immediately developed a heavy list and had to be taken in tow by the tug *Argos*. After two hours she was so low in the water that it was deemed prudent to take off the crew of 346 officers and ratings. Shortly afterwards the *Bias de Lezo* sank, but without loss of life. Her position at the time was seven miles off Finisterre Lighthouse.

BLEAMOR

Moor Line (W. Runciman & Co.); 1902; W. Doxford & Sons; 3,745 tons; 342-3x46-6x24-8; 300 n.h.p.; 9 knots; triple-expansion engines. The steamer *Bleamor* was torpedoed and sunk by a German submarine four miles S.S.E. of Berry Head on November 27th, 1917. Eight men were killed. The captain was among the survivors.

BLEAN

British Navy, destroyer; 1940; Hawthorn Leslie & Co.; 1,025 tons; 272-3x28-2x7-7; 19,000 s.h.p.; 27-5 knots; turbine engines; 3-drum boilers; four 4 in.A.A., eight smaller. The destroyer *Blean*, Lt. M. J. Parker, was torpedoed by a submarine W. of Oran on December 11th, 1942. She sank with the loss of 89 ratings.

BLEND A

Angf. Aktieb. Margit; 1874; M. Pearse & Co.; 1,026 tons; 231-6x31-3x15-7; 142 n.h.p.; compound engines. The Swedish steamship *Blend a* struck a mine and sank on November 21st, 1920, three miles S.E. of Oleg-grundet, near Hangö.

BLENGFELL

J. Edgar & Co.; 1876; Whitehaven S.B. Co.; 1,210 tons; 232 • 4x35-2x21-1. The iron sailing ship *Blengfell*, Capt. J. Johnston, was on passage from New York to London with a cargo of petrol. On October 17th, 1898, when off North Foreland the petrol exploded and the vessel caught fire and sank. Capt. Johnston and eight of the crew were drowned.

BLenheim

Steel, Young & Co.; 1877; Withy; 1,163 tons; 225x31x16-9; 99 h.p.; compound inverted engines. The British freighter *Blenheim* was wrecked on August 11th, 1882, on Bahamas. She was on a voyage from London to Nassau.

BLenheim

A/S Ganger Rolf; 1923; Nylands Vcerksted; 1,807 tons; 255-4x36-2x23; 225 n.h.p.; triple-expansion engines. The Norwegian steamer *Blenheim* was taken over by the Germans and used as a troopship. On April 20th, 1941, while lying in the Porsangerfjord, she caught fire and blew up, with the loss of 138 men, mostly German troops.

BLESTYASHCHI

BLESTYASHCHI

Russian Navy, destroyer; 1901; Nevski Works; 350 tons; 196-7 x18-4x11-5; 5,700 Lh.p.; 26knots; triple-expansion engines; one 12 pdr. gun, five 3 pdr.; 3 T. T.

The Russian destroyer *Blestyashchi* was one of the 2nd Destroyer Flotilla attached to the Baltic Fleet when it sailed from Libau for the Far East in September, 1904. The ship bore her part in the battle of Tsu-Shima, May 27th, 1905, when she saved many of the crew of the battleship *Ossliabya* (which see) when that vessel was sunk by Japanese gunfire. In the course of the fighting she was badly damaged, and on the morning of the 28th was following in the wake of the cruiser division under Rear-Admiral Enquist. She could not maintain her place in the line and at about 5 a.m. it was decided that she should be abandoned. The survivors of her crew were taken off by the destroyer *Bodri* and she sank soon afterwards.

The full story of the battle of Tsu-Shima is told under the *Kniaz Suvaroff*, flagship of the C.-in-C, which was among those lost.

BLINK

SkibsAJSManitowoc; 1920; C. Hill & Sons; 2,701 tons; 310-8 X 44 • 3 X 21' 6"; 242 n.h.p.; triple-expansion engines.

The Norwegian steamer *Blink* was torpedoed and sunk by a German submarine on February 11th, 1942, about 300 miles E. of Hampton Roads, with the loss of 24 lives.

BLITAR

Rotterdamische Lloyd; 1923; Fyenoord; 7,065 tons; 446-2 x 54-3x34-2; 436 n.h.p.; triple-expansion engines.

The Dutch steamer *Blitar* was one of Convoy HX 231 crossing the Atlantic from New York to the United Kingdom. The steamer failed to keep station and finally fell out of the convoy. On April 5th, 1943, she was torpedoed and sunk by the German submarine *U-632*, with the loss of 26 of her crew.

BLOCK ISLAND

United States Navy, escort aircraft carrier; 1942; Seattle-Tacoma S.B. Corp.; 7,800 tons; 492X70X25-5; 8,500 b.h.p.; 16-5 knots; two 5 in. guns, sixteen 40 m.m.A.A., twenty 20 m.m. A.A., 21/30 aircraft.

The United States escort aircraft carrier *Block Island*, Capt. F. M. Hughes, left Casablanca on May 23rd, 1944, to patrol in the Madeira—Cape Verde area. She was escorted by four destroyers and on the 29th at 8.13 a.m. in a calm sea she was hit three times by torpedoes from the German submarine *U-549*, and began to sink. The submarine meanwhile turned her attention to the destroyers, hitting the *Barr* in the stern, but failing to sink her. Her third attack was not so successful, for she missed the *Eugene E. Elmore* and was chased by that destroyer, which sank her with depth charges about an hour later.

The *Block Island*, which was the only U.S. carrier lost in the Atlantic during the Second World War, transferred 951 survivors to the destroyers *Ahrens* and *Robert I. Paine* before she sank. There was a small loss of life.

BLOODY MARSH

U.S. War Shipping Administration; 1943; Sun S.B. & D.D. Co.; 10,195 tons; 503X68X39-3; turbo-electric engines.

The American tanker *Bloody Marsh*, on a voyage from Houston to New York with fuel oil, was torpedoed and sunk by a German submarine on July 2nd, 1943.

BLUCHER

German Navy, armoured cruiser; 1908; Kiel; 15,500 tons; 489 x 80x27; 32,000 i.h.p.; 26-4 knots; triple-expansion engines; Schulz-Thornycroft boilers; twelve 8-2 in. guns, eight 6 in., sixteen 24 pdr.; 3 T.T.

The *Blucher* was one of the German Battle Cruiser Squadron employed in the raids on the British N.E. coast in December, 1914, and January, 1915. The ship, although termed a battle cruiser by the Germans, was according to British standards nothing more than a large, heavily armed armoured cruiser. At 5.45 p.m. on January

23rd Rear-Admiral von Hipper left Jade Bay with a force consisting of the following ships:—

	tons	guns
<i>Seydlitz</i> (flagship)	24,640	ten 11 in., twelve 5 • 9 in., twelve 3 • 4 in.
<i>Derfflinger</i>	28,000	eight 12 in., twelve 5-9 in., twelve 3.4 in.
<i>Moltke</i>	22,640	ten 11 in., twelve 5-9 in., twelve 3-4 in.
<i>Blucher</i>	15,550	twelve 8-2 in., eight 5-9 in., sixteen 3-4 in.

In addition to these big ships there were four light cruisers, the *Graudenz*, *Rostock*, *Stralsund* and *Kolberg*, with two destroyer flotillas of 11 ships, making in all 19 vessels. This light squadron did not play a very serious part in the actual action.

The object of the cruise was to "reconnoitre the Dogger Bank" and if possible attack and destroy British light forces. The German plans had been carefully laid and Admiral Hipper's biographer has stated that at the time both the C.-in-C. of the High Seas Fleet and von Hipper were not aware that the Admiralty had knowledge of their operations. Shortly after the Germans had left Jade, Vice-Admiral Sir David Beatty was also heading for the Dogger Bank with a force of five battle cruisers, seven light cruisers and a large number of destroyers. As the ensuing action was fought out by the battle cruisers on both sides it is not necessary to give more than the details of the British Battle Cruiser Squadron.

	Tons	guns
<i>Lion</i> (flagship)	26,350	eight 13-5 in., sixteen 4 in.
<i>Tiger</i>	28,000	eight 13-5 in., twelve 6 in.
<i>Princess Royal</i>	26,350	eight 13-5 in., sixteen 4 in.
<i>New Zealand</i>	28,880	eight twelve in., sixteen 4 in.
<i>Indimitable</i>	17,250	eight twelve in., sixteen 4 in.

On the morning of January 24th, 1915, at about 7.30 the rival squadrons made contact, the German vessels being then 14 miles distant, steering S.E. The rear ship of the German line was the *Blucher* and fire was opened on her at 20,000 yards by the *Lion* at 8.52. Seventeen minutes later the first hit was scored on the *Blucher* which came successively under fire from the *Tiger*, *Princess Royal* and *New Zealand*. At about 11.25 a salvo struck her causing a serious fire amidships, soon after which she reported to her flagship "all engines out of action". This report has never been explained but it was an obvious error as the vessel continued to steam at a reduced speed until the moment of foundering. At 11.58 the ship, then lagging badly though continuing to fire with vigour, caused the German admiral to alter course to S.S.E. with a view to closing the British line and making a destroyer attack. The British, however, turned away, making use of their superior speed, and von Hipper was reluctantly compelled to turn back to S.W. and consider the safety of the remainder of his squadron. In the meantime the *Lion*, flagship of Admiral Beatty, had been hit and forced to haul out of the line, but not before the admiral had directed the *Indomitable* to close the *Blucher* which was attempting to break away to the north.

At 12.10 p.m. the *Blucher* slowly turned over and sank.

The number saved was 260, and many more might have been rescued from the water had not a Zeppelin and a seaplane endeavoured to drop bombs on the vessels standing by. The German airmen were not aware at the time that they were bombing their own men, being under the impression that it was a British ship which had sunk. The *Blucher* carried a normal crew of 880, but prior to the raid she was reinforced with 250 more men, making 1,130 all told. Those lost numbered 29 officers and 841 ratings.

The *Seydlitz* had both after turrets wrecked and set on fire by direct hits. She arrived at Wilhelmshaven with 260 wounded, besides many dead. The *Derfflinger* and *Moltke* were not badly damaged.

The British losses were, *Lion*, 11 wounded, *Tiger*, Capt. C. G. Taylor, Squadron Engineer and nine men killed, eight wounded, destroyer *Meteor*, four killed, two wounded.

BLUCHER

German Navy, heavy cruiser; 1937; Deutsche Werke, Kiel; 10,000 tons; 639-7x69-7x15-5; 80,000s.h.p.; 32 knots; turbine engines; eight 8 in. guns, twelve 4-1 in., twelve 37 m.m.; 12 T.T.; 3 aircraft.

In the early hours of April 9th, 1940, a German naval force steamed into Oslo Fjord. The force comprised the pocket battleship *Lutzow* (ex *Deutschland*), the heavy cruiser *Blucher*, the light cruiser *Emden*,

the gunnery training ship *Brummer* and the torpedo boats *Albatros* and *Kondor*, with several motor minesweepers filled with troops. To oppose this formidable collection of vessels the Norwegians had the minelayer *Olav Tryggvason*, 1,596 tons, four 4-7 in. guns and the minesweepers *Otra* and *Rauma* of 350 tons, one 37 m.m. gun each, besides which there were batteries on the islands of Bolaerne, Rauer and Oscarsborg. The action commenced with an attempted landing by the men from the German minesweepers, but this was frustrated by the *Olav Tryggvason* which sank one vessel. Later the torpedo boats *Albatros* and *Kondor* ran down the fjord but were driven back by the *Olav Tryggvason*, which sank the *Albatros*. The *Emden* then became engaged but she also was forced to retire. Meanwhile the *Blucher*, Capt. Kurt Zoepffel, in company with the *Brummer*, was approaching the island of Oscarsborg which guarded the narrows. At 5.17 a.m., before daylight, the guns on both sides of the narrows opened up and a torpedo battery, built into the cliffs, discharged two torpedoes and blew up the ship with a fearful loss of life. The *Blucher* turned completely over before going down, her propellers revolving in the air.

In addition to her crew, normally 830, the cruiser carried a number of troops and Gestapo personnel as well as senior staff officers. Many of these were burned to death in a great sheet of blazing oil which floated on the water for several hours after the vessel sank. Capt. Zoepffel was among the survivors.

The *Brummer* was badly damaged and set on fire and compelled to retire.

After this reverse the German Admiral made no further attempt to force the narrows and withdrew his ships. The fortress of Oscarsborg surrendered later after an intensive air bombardment.

For further details of the fighting around the coast of Norway see the destroyer *Hardy*.

BLUE

United States Navy, destroyer; 1937; Norfolk Navy Yard; 1,500 tons; 341-7x34-7x9-8; 42,800 s.hp.; 36-5 knots; turbine engines; Express boilers; four 5 in. guns, four 40mm.A.A., eight 20m.m.A.A.; 8 T.T.

The United States destroyer *Blue* was engaged upon the guarding of American supply lines during the first phase of the landing on Guadalcanal. On August 22nd, 1942, the destroyer was torpedoed and sunk. Her normal complement was 172.

BLUE CROSS

Robert Taylor & Sons; 1869; T. & W. Smith; 1,075 tons; 219-5 X30-4X18-2; 100 h.p.; compound engines.

The British cargo ship *Blue Cross* was wrecked in January, 1889, at Gotthland while on a voyage from Reval to London with a cargo of oats.

BLUE JACKET

J.J.Frost; 1854; R.E.Jackson; 1,790 tons; 235x41-6x24.

The famous clipper ship *Blue Jacket* was one of the fastest sailers of the mid 19th century. On her maiden voyage she crossed the Atlantic from Boston to the Mersey in 12 days, 10 hours. She was bought by J. J. Frost and put on the Australian run and maintained a passenger cargo service for the next 15 years.

In 1869 she left Lyttelton, New Zealand, for Liverpool with 71 passengers and crew. When some distance from the Falkland Islands she caught fire and had to be abandoned on the 9th March. Thirty-six survivors in one boat were picked up after being adrift for a week. Three others in another boat were picked up after three weeks. The number lost was 32.

The figure head of the *Blue Jacket* drifted ashore on Rottneast Island, West Australia, on December 8th, 1871.

BLUE JACKET

GeorgeHallett; 1883; J.L. Thompson & Sons; 2,090 tons; 282-7 x36-6x23-9; 221 n.h.p.; compound engines.

The British iron steamship *Blue Jacket* was wrecked in November, 1898, on the Longships rocks.

BLUEBELL

British Navy, corvette; Fleming & Ferguson; 925 tons; 193x32 X16; 17 knots; quadruple-expansion engines; one 4 in.A.A. gun, one pom-pom, several smaller.

The corvette *Bluebell*, Lt. G. H. Walker, D.S.C., R.N.V.R., was a

unit of a squadron of the Home Fleet under Rear-Admiral R. R. McGrigor, C.B., D.S.O., in the escort carrier *Campania* escorting a convoy to Murmansk. The ships reached their destination without loss but on the homeward voyage they were shadowed for several days by German aircraft and submarines. On February 17th, 1944, in the Kola Inlet, the *Bluebell* was torpedoed by a submarine, going down with a loss of six officers, including Lt. Walker, and 84 ratings.

BLUEFEELDS

A Garcia & Cia; 1917; Manitowoc S.B.Co.; 2,063 tons; 250-5 x43-5x20-4; 246n.h.p.; oilengines.

The Nicaraguan motorship *Bluefields* was torpedoed and sunk on July 15th, 1942, on a voyage from New York to Havana.

BLYTHVILLE

Zapata S.S.Co.; 1877; W. Gray & Co.; 1,325 tons; 248x32-1 X18-4; 150nhp.; compound engines.

The British iron cargo ship *Blythville* was wrecked in June, 1908, near Rhinns of Islay Light. She was on a voyage from Stornoway to Swansea.

BOA VISTA

Portuguese Government; 1901; T. Turnbull & Son; 3,667 tons; 351-5x44x20-6; 268 n.h.p.; triple-expansion engines.

The Portuguese steamship *Boa Vista* was torpedoed and sunk by a German submarine in the Bay of Biscay on December 21st, 1917.

BOADICEA

British Navy, destroyer; 1930; Hawthorn Leslie & Co.; 1,360 tons; 323x32-2x12; 34,000s.h.p.; 35 knots; turbine engines;

3-drum boilers; three 4-7in. guns, one 3 in.A.A., six smaller, 4 T.T. The destroyer *Boadicea*, Lt.Cdr. F. W. Hawkins, was torpedoed and sunk by a submarine off Portland, on June 13th, 1944.

Nine officers, including Lt.Cdr. Hawkins, and 166 ratings were killed and one officer wounded.

BOARDALE

Admiralty, fleet oiler; 1937; Harland & Wolff; 8,406 tons; 481-5x62x27-5; 4,000b.h.p.; 11-5knots; dieseleengines.

The British naval tanker *Boardale* ran ashore near Narvik on April 30th, 1940, during the Norwegian campaign. Later the vessel was swept from the rocks and sank. Her nominal complement was 40 officers and men.

BOBR

Russian Navy, gunboat; 1885; Crichtorfs Works, Abo; 1,230 tons; 187x35-2x10-9; 1,140 i.h.p.; 11-2 knots; triple-expansion engines; one 9in. gun, one 6in., one 2½in., six 9pdr., two 3pdr. 4mg.

The Russian gunboat *Bohr* was one of the small craft attached to the Pacific Squadron at Port Arthur at the beginning of the Russo-Japanese War. The vessel did good work during the siege of the fortress, as, owing to her light draught, she was useful for inshore bombardments. The manner in which she was handled drew forth a commendation from Admiral Vitgeft in his fleet order of May 20th, 1904.

Toward the end of the siege the ship landed all her guns to strengthen the shore defences. She was subjected to continuous and heavy shelling from the Japanese batteries, and was sunk by enemy gunfire on December 26th, 1904.

BOCCACCIO

"Tirrenia" Soc. Anon di Nav.; 1919; Lloyd Royal Beige; 3,027 tons; 342 X 46 • 7 X 23 • 2; 359 n.h.p.; triple-expansion engines.

The Italian steamship *Boccaccio*, on a voyage from Antwerp to Genoa, was sunk by an internal explosion on November 18th, 1937, off Ushant.

BODEGRAVEN

Koninkl. Nederl. Stoomv. Maats.; 1929; Van der Giessen; 5,593 tons; 401-lx58-3x26-3; 384 n.h.p.; triple-expansion engines.

The Dutch steamer *Bodegraven* was on passage from Durban to the United Kingdom on July 2nd, 1944, when she was torpedoed and sunk by the German submarine *U-547*, about 200 miles S. of Monrovia. She sank with the loss of nine lives.

BODIL

BODIL

J. Lauritzen; 1922; N.V. WerfZeeland; 844 tons; 212-9x31-4 X13-2; 85 n.h.p.; triple-expansion engines.

The Danish steamship *Bodil* was bombed and sunk on July 22nd, 1938, by unknown aircraft off the Balearic Islands, during the Spanish Civil War.

BOEKELO

N.V. Stoomv. Maats. "Noordzee"; 1930; A. Vuijk & Zonen; 2,118 tons; 281-2x42-7x19; 208 n.h.p.; triple-expansion engines.

The Dutch steamer *Boekelo* was torpedoed and sunk by a German submarine on October 18th, 1940, about 200 miles W. of Ireland.

BOERO

Netherlands Government; 1914; Atel & Ch. de la Loire; 7,135 tons; 417-9x54x37-6; 416 n.h.p.; triple-expansion engines.

The Dutch steamer *Boero* was torpedoed and sunk by a Japanese submarine on February 25th, 1942, in the Sunda Strait.

BOGATYR

A/S D/S Gefion; 1906; Howaldtswerke; 1,360 tons; 231-7x X 36 • 1 x 16 • 5; 96 n.h.p.; triple-expansion engines.

The Danish steamship *Bogatyr* was torpedoed and sunk by a German submarine in the North Sea on August 12th, 1917.

BOGO

Dampsktsk. Baltic A/S; 1920; Lloyd Royal Beige (Gt. Britain); 1,214 tons; 240-3x35-7x15-1; triple-expansion engines.

The Danish steamship *Bogo* struck a mine and sank on December 17th, 1939, 75 miles E. of May Island. Seventeen of her crew were lost.

BOGOR

Rotterdamsche Lloyd; 1898; Blohm & Voss; 3,621 tons; 330-1x 44-6x28-4; 275 n.h.p.; triple-expansion engines.

The Dutch steamship *Bogor* was under charter to the Koninklijke Hollandsche Lloyd, and was on passage from Amsterdam to Bahia, Brazil. On December 12th, 1914, she struck a reef near Leixoes and sank with the loss of 33 lives.

BOHEMIAN

Allan Line; 1859; W. Denny & Bros.; 2,190 tons; 298-3x38-5x 17; 400 n.h.p.; 13 knots; direct-acting engines.

The Allan liner *Bohemian* left Liverpool on February 4th, 1864, carrying 19 cabin passengers, 199 steerage and crew of about 100, besides mails and cargo, under command of Capt. Borland. The vessel was bound for Portland, Maine, and was some days overdue when she arrived off the harbour on February 22nd. It was about 8 in the evening and foggy, the speed of the ship being not more than 2½ knots. The captain misjudged the distance of the lights dimly visible on Cape Elizabeth and the vessel struck and passed over the rocks before he was aware of his danger. There was a large hole in the hull below water, and the ship was headed for shore. The engine room and furnaces flooded rapidly and when near the land the vessel sank in an upright position in 4 fathoms.

The weather, though thick, was mild and calm with a heavy ground swell, the position of the *Bohemian* being one eighth of a mile from shore with her deck above water at low tide. The boats were launched, the second capsizing and drowning 20 persons, all Irish emigrants, the others reaching land in safety. Capt. Borland and his officers remained on board until the following morning and managed to save all the mails.

BOHEMIAN

F. Leyland & Co.; 1870; Harland; 3,052 tons; 400x37x28; 350 n.h.p.; 12 knots; compound inverted engines.

The British steamship *Bohemian* left Boston for Liverpool on January 27th, 1881, with a cargo of cotton and bacon, but no passengers. The ship was commanded by Capt. W. M. Grundy, and carried a crew of 57, all told. When approaching the coast of Ireland in a calm sea on the night of Sunday, February 6th, the *Bohemian* ran into thick weather. At 8 p.m. on the 6th she passed the Calf Light, which was clearly visible. Between midnight and 1 a.m. on the 7th, then very foggy, the ship struck on a reef of rocks running out from Caher Island, off Mizen Head, Cork. The breakers appeared so

suddenly that there was little opportunity to change course, though the helm was put hard-a-port and the engines reversed. With great difficulty the port lifeboat was launched and attached to a line, but while the crew were still clambering into it the line broke and the boat was swept some distance away. Before the men could pull back to the ship she sank in deep water, only her topmasts being visible. The number drowned was 35, including Capt. Grundy and all the officers and engineers, excepting the second officer.

BOHEMIAN

F. Leyland & Co.; 1900; A. Stephen & Sons; 8,555 tons; 512X 58-2x34-3; 807 n.h.p.; triple-expansion engines.

The second *Bohemian* owned by F. Leyland & Co. was wrecked on March 1st, 1920, at Sambro, Nova Scotia. She was carrying a general cargo from Boston to Liverpool.

BOHOL

Cia. Maritima; 1906; Workman, Clark & Co.; 2,126 tons; 300-3X 41 • 1X11 - 8; 414 n.h.p.; triple-expansion engines.

The Philippine steamer *Bohol* was sunk by Japanese action in the Philippines on April 16th, 1942.

BOKA

Cia. Centroamericanade Nav.; 1920; Canadian Vickers; 5,560 tons; 400-3x52-4x28-6; 520 n.h.p.; triple-expansion engines.

The Panamanian steamship *Boka* was torpedoed and sunk by a German submarine on September 21st, 1940, on a voyage from Bary to Sierra Leone. Eight of her crew were killed.

BOKHARA

Peninsular & Oriental S. N. Co.; 1873; J. Caird & Co.; 2,944 tons; 361x39x29; 2,037 i.h.p.; 13 knots; compound engines.

The P. and O. liner *Bokhara* left Shanghai for Hong Kong on October 8th, 1892, with 148 persons on board under command of Capt. C. D. Sams, R.N.R. She also carried the mails and a valuable cargo of silk and specie. The voyage was only of three days duration, after which she should have sailed to Colombo and Bombay. The weather was very bad and no news of the *Bokhara* came to hand for nine days, after which time it was learned at Hong Kong that the ship had struck on the Pescadores Islands, W. of Formosa.

The violence of the seas swamped the boiler fires and the ship became unmanageable and was driven far out of her course. On October 10th, two days after leaving Shanghai, she struck on the Pescadores and became a total wreck. Among her passengers was a party of Englishmen going to play a return cricket match at Hong Kong; two of the team were the only European passengers to survive.

The total number drowned was 125, including Capt. Sams, Mr. Inglis, second officer, four engineers and most of the crew. The survivors numbered 23, of whom only seven were Europeans, two passengers and five ship's officers.

BOKO MARU

Japanese Government; 1904; C. Cornell & Co.; 2,333 tons; 300X40-6X22-4; 277 n.h.p.; triple-expansion engines.

The *Boko Mam* was formerly the British *Sagres*, seized by the Japanese at Chuan Bay in April, 1939. She was torpedoed and sunk by the U.S. submarine *Barbel* on August 9th, 1944, off the west coast of Tokunoshima, Ryukyo Islands.

BOKUEIMARU

Nitto Risen K.K.; 5,135 tons.

The tanker *Bokuei Mam* was torpedoed and sunk by the U.S. submarine *Kingfish* on January 3rd, 1944, S.W. of Amboy Cay, South China Sea.

BOLD VENTURE

U.S. Maritime Commission; 1920; N.V. Schpw. v. J. Smit; 3,222 tons; 332-1x48-7x21-8; 282 n.h.p.; triple-expansion engines.

The Panamanian steamship *Bold Venture* was torpedoed and sunk by a German submarine on October 16th, 1941, on a voyage from Sydned, N.S., to Liverpool, with the loss of 17 lives.

BOLETTE

Akties. Ganger Rolf; 1910; Fredrikstads Mek. Vcerks; 1,431 tons; 24-3x38-4x17-1; 150 n.h.p.; triple-expansion engines.
The Norwegian steamship *Bolette* was torpedoed and sunk by a German submarine in the North Sea on June 22nd, 1917.

BOLETTE

A/S Ganger Rolf; 1920; Akers Mek. Verksted; 1,167 tons; 226-5x36-6x14-7; 127n.h.p.; triple-expansion engines.
The Norwegian steamship *Bolette* was bombed and sunk by German aircraft on April 16th, 1941, in the English Channel. Eight of her crew were killed.

BOLHEIM

Aug. Bolten, Wm. Miller's Nachf.; 1913; Rotterdam Droogd. Maats.; 3,324 tons; 305-3x50-2x16-3; 210 n.h.p.; triple-expansion engines.
The German steamship *Bolheim* was torpedoed and sunk by a Russian submarine on December 11th, 1939, off Mantyluoto.

BOLOGNA

Italian Government; 1917; Cammell Laird & Co.; 5,140 tons; 400X52-4X28-4; 490 n.h.p.; triple-expansion engines.
The steamship *Bologna* was formerly the Greek *Aliki*, seized by the Italians. On May 21st, 1943, she was torpedoed and sunk by a British submarine 25 miles N. of Messina.

BOLSENA

"Adriatica" Soc. Anon, di Nav.; 1918; Osbourne, Graham & Co.; 2,384 tons; 297-5x42x19; 420 n.h.p.; triple-expansion engines.
The Italian steamship *Bolsena* was torpedoed and sunk by a British submarine on May 18th, 1942, N. of Benghazi.

BOLTENHAGEN

Aug. Bolten, Wm. Miller's Nachfolger; 1912; Rotterdam Droogd. Maats.; 3,335 tons; 331 -9x48-2x22-1; 249 n.h.p.; triple-expansion engines.
The German steamship *Boltenhagen* was torpedoed and sunk by a British submarine on August 12th, 1942, off the south west coast of Norway.

BOLTON CASTLE

Lancashire Shipping Co.; 1939; Sir J.Laing & Sons; 5,203 tons; 438 -5x57-1x24-3; 466 n.h.p.; triple-expansion engines.
The British steamship *Bolton Castle* was bombed and sunk by German aircraft on July 5th, 1942, on a voyage from Reykjavik to North Russia.

BOLTONHALL

West Hartlepool Steam Navigation Co.; 1900; Irvine's S.B. & D.D.CO.; 3,595 tons; 341-2x48-2x25; 308 n.h.p.; triple-expansion engines.
The steamship *Boltonhall* was torpedoed and sunk by a submarine 34 miles S.W. by W. i W. of Bardsey Island on August 20th, 1918. Five men were killed. The captain was among the survivors.

BOLZANETO

Soc. Anon. Ilva; 1918; N.Odero & Co.; 2,220 tons; 297-8x 41-2x20-8; 114 n.h.p.; triple-expansion engines.
The Italian steamship *Bolzaneto* was torpedoed and sunk by a British submarine on June 29th, 1943, about three miles from Spezia.

BOLZANO

Italian Navy, heavy cruiser; 1932; Ansaldo, Sestri-Ponente; 10,000 tons; 646x68x18-7; 150,000 s.h.p.; 36 knots; turbine engines; Ansaldo 3-drum boilers; eight 8 in. guns, twelve 3-9 in., eight 37 m.m., eight 13 m.m., 8 T.T.
The Italian heavy cruiser *Bolzano* was one of that country's fleet which fell into German hands after the Italian surrender in September, 1943. She was taken to Spezia where she remained until the night of June 21st-22nd, 1944, when she was sunk by a "human torpedo" piloted by Sub Lt. Malcolm Causer, R.N.V.R., and Seaman Harry Smith. Sub Lt. Causer, who was later awarded the

D.S.O., was taken prisoner, but Seaman Smith, who was posthumously awarded the C.G.M., lost his life.

The *Bolzano* was the last of the seven 10,000 ton cruisers possessed by Italy to be sunk or damaged beyond repair. All the vessels of this class had an unfortunate career and contributed very little to Italy's campaign at sea. Three of the class, the *Fiume*, *Pola* and *Zara* were sunk in one night by the British Mediterranean Fleet off Cape Matapan.

The *Bolzano*, *Gorizia* and *Trieste* (all 10,000 tons, 8 in. guns) with the light cruiser *Bari*, 3,248 tons, *Taranto*, 3,184 tons, and the incomplete cruisers *Caio Mario*, *Claudio Druso*, *Claudio Tiberio*, *Cornello Silla*, *Giulio Germanico*, *Ottaviano Augusto* and *Vipsanio Agrippa*, all of 3,362 tons, together with 32 destroyers and torpedo-boats (many incomplete) fell into German hands at the surrender.

For names of Italian warships surrendered to the Allies see the battleship *Roma*.

BOMBARDIERE

Italian Navy, destroyer; 194-; Italy; 1,620 tons; 339x38-5x 10-7; 48,000 s.h.p.; 39 knots; turbine engines; 3-drum boilers; four 4-7 in. guns, six 37m.m.A.A., four 13 m.m.A.A., 6 T.T.
The Italian destroyer *Bombardiere* was torpedoed and sunk by a British submarine 26 miles N.W. of Marittimo on January 17th, 1943. The vessel carried a complement of about 200.

BOMBAY

British Navy, line-of-battleship; 1827; Bombay; 2,782 tons; 233-7x52-3x23; 400i.h.p.; 8knots; steam engines; sixty-four guns.

The line-of-battleship *Bombay*, Capt. Colin Campbell, was the flagship of Rear-Admiral Charles Elliot, C.B., commanding the South American Station. The ship was constructed of teak, and in 1860 had been cut in two, lengthened and converted into a screw steamship. On the afternoon of December 22nd, 1864, she was off Montevideo preparing for target practice. She was some 14 miles outside the harbour and all was ready to commence when a seaman in the shell room saw signs of fire and immediately gave the alarm. The time was between 2 and 3 o'clock and in a very short while the ship was in flames from end to end despite the good discipline of her crew and the rapidity with which the pumps were manned.

To add to the difficulties the method of ventilation ensured that a strong current of air was always circulating through the hold by means of gratings in the partitions, and through the ports between decks. This had the effect of fanning the flames until the lower part of the ship became a furnace. Another misfortune was the bursting of the casks in the spirit room, their flaming contents being spilt all over the decks and driving back the men who were fighting the fire. The shells stowed in the lockers by the guns also began to explode and to spread destruction on the gun decks. Three-quarters of an hour after the first alarm the mainmast went by the board and by 5 o'clock the ship was abandoned. Two hours later the fire reached the magazine and the *Bombay* blew up and sank, taking with her two officers and 90 men, the greater part of whom could not swim and feared to trust themselves to the chance of being picked up by the boats. A quantity of molten lead poured from the bows and compelled many taking refuge there to jump overboard.

At the time of the disaster the *Bombay* had a complement of 616. The admiral was away, having left the ship temporarily with his staff to go on board the *Stromboli* a few miles off.

BOMBO

Quarries Pty.; 1930; H. Robb; 540 tons; 154-3x30-1x12; 100 n.h.p.; triple-expansion engines.

The Australian ship *Bombo*, Capt. A. R. Bell, was sailing from Kiaina to Sydney, and when she was about three miles off Wollongong, N.S.W., on February 22nd, 1949, the cargo shifted owing to the heavy seas and she capsized and sank. Twelve of the crew were lost.

BON PREMIER

Soc. Gen. de Transports Marit. a Vap.; 1891; Act. Ges "Neptun"; 1,352 tons; 228-4x36-4x20-3.

The French sailing ship *Son Premier* was sunk by a German submarine in the Atlantic on September 29th, 1917.

BONAVENTURE

BONAVENTURE

British Navy, light cruiser; 1939; Scott's Shipbuilding Co.; 5,450 tons; 506x51-5x14; 62,000 s.h.p.; 33 knots; turbine engines; 3-drum boilers; ten 5 • 25 in. guns, sixteen smaller; 6 T. T.; 1 aircraft.

The light cruiser *Bonaventure*, Capt. H. J. Egerton, was escorting a convoy S. of Crete on March 31st, 1941, when she was torpedoed by a submarine. She remained afloat for some time but eventually sank. The dead numbered 139, of whom 23 were officers and 116 ratings. Capt. Egerton was among the survivors.

BONAVISTA

Dominion Coal Co.; 1884; Wigham Richardson & Co.; 1,306 tons; 240-4x33-5x18-3; 187 n.h.p.; compound engines.

The British iron cargo ship *Bonavista* was wrecked on March 16th, 1912, at Bear Cove, Brier Island. She was on a voyage from St. John, N.B. to Louisburg, C.B. in ballast.

BONHEUR

A/S Bonheur; 1898; Nylands Vcerksted; 1,158 tons; 219-9x33 X13-1; 106 n.h.p.; triple-expansion engines.

The Norwegian steamship *Bonheur* struck a mine and sank off N.W. Scotland on January 7th, 1916.

BONHEUR

Lampart & Holt Line; 1920; Harland & Wolff; 5,327 tons; 400-4x52-4x28-4; turbine engines.

The British steamship *Bonheur* was torpedoed and sunk by a German submarine on October 15th, 1940, on a voyage from Liverpool to Rosario.

BONITAS

Soc. per Azioni per Vlnustria edil Cornmercio Marittimo "Nova Genuensis"; 1929; W. Gray & Co.; 5,636 tons; 447-5x55-5x — ; triple-expansion engines.

The Italian steamship *Bonitas* sprang a leak and sank on February 19th, 1958, about 120 miles off Cape Lookout. There were only five survivors of her crew of 27.

BONNEVILLE

Skibs A/S Sjostad; 1929; Odense Staalskibsv.; 4,665 tons; 386-3x54-2x25-7; 490 n.h.p.; oil engines.

The Norwegian motorship *Bonneville* was torpedoed and sunk by a German submarine on March 9th, 1943, in the North Atlantic, with the loss of 36 lives.

BONNIE DUNDEE

1877; 193 tons; compound engines.

The small Australian coasting steamship *Bonnie Dundee* was run down by the steamer *Barrabool*, 942 tons, eight miles south of Newcastle, N.S.W. on March 10th, 1879. Five persons were drowned.

BONNINGTON COURT

Court Line; 1929; R. Duncan & Co.; 4,909 tons; 405-5x55-5x 25-8; 490 n.h.p.; oilengines.

The British motorship *Bonnington Court* was bombed, set on fire and sunk by German aircraft on January 19th, 1941, between Harwich and the Tyne.

BONZO

A. Zanchi; 1931; Cantieri Riuniti DelVAdriatico; 8,177 tons; 483-8x60-2x34-6; 1000 n.h.p.; oil engines. The Italian motor tanker *Bonzo* was torpedoed and sunk by a British submarine on December 16th, 1940, off Punta Stilo.

BOR

Akties. Bonheur; 1914; Nylands Vcerksted; 1,149 tons; 228-9X 36-2x15-8; 116 n.h.p.; triple-expansion engines.

The Norwegian steamship *Bor* was torpedoed and sunk by a German submarine in the North Sea on February 21st, 1918.

BORBECK

Fried. Krupp A.G.; 1923; Workman, Clark & Co.; 6,002 tons; 419x56-3x27-6; triple-expansion engines.

The German steamship *Borbeck* was torpedoed and sunk by a Russian submarine on March 12th, 1945, in the East Baltic.

BORDEAUX

Cie. Generate Transatlantique; 1891; R. Stephenson & Co.; 4,530 tons; 370-2x46-6x27-6; 563 n.h.p.; triple-expansion engines.

The French steamship *Bordeaux* was torpedoed and sunk by a submarine in the Bay of Biscay on September 7th, 1915.

BORDEAUXMARU

Kawasaki Kisen K.K.; 1923; Kawasaki Zosensho K.K.; 6,566 tons; 405x53x37; 746 n.h.p.; turbine engines.

The steamship *Bordeaux Maru* was sunk by gunfire from U.S. warships on February 1st, 1942, in the Marshall Islands.

BORDER CHIEFTAIN

Clapham S.S.Co.; 1873; W. Pile & Co.; 1,519 tons; 261x31-4 X23-8; 160 n.h.p.; compound engines.

The British cargo ship *Border Chieftain* was wrecked in March, 1889, near Honfleur, while on a voyage from Huelva to Rouen with a cargo of wine.

BOREA

Italian Navy, destroyer; 1927; Ansaldo; 1,073 tons; 307-5 x 30-5x10-7; 40,000 s.h.p.; 36 knots; turbine engines; Express boilers; four 4-7 in. guns, four 37 m.m.A.A., two 13 m.m.A.A.; 6 T.T.

The Italian destroyer *Borea* was bombed and sunk off Benghazi on September 17th, 1940, by Swordfish aircraft from the aircraft carrier *Illustrious*. The vessel carried a complement of about 160.

BORG

Cairns, Noble & Co.; 1888; J. Blumer & Co.; 2,111 tons; 279x 38-2x19; 216 n.h.p.; 9 knots; compound engines.

The ex-Swedish steamship *Borg* was managed for the Shipping Controller by the firm of Cairns, Noble & Co. On June 10th, 1918, when 20 miles S.W. by S. of the Lizard the vessel was torpedoed and sunk by a submarine. The captain and 23 men were killed.

BORGA

Akties. Borgia (P. Olseri); 1907; Nylands Vcerksted; 1,046 tons; 227-7x35x16-8; 110n.h.p.; 8-5knots; triple-expansion engine.

The steamship *Borga* was torpedoed and sunk by a German submarine 9 miles S.E. by S. of Beer Head on March 1st, 1918. Five men were killed. The captain was among the survivors.

BORGA

A/S Borgia; 1923; Akers Mek. Vcerks; 4,821 tons; 362-4x51-4 x22-5; 625 n.h.p.; oilengines.

The Norwegian steamship *Borga* was bombed and sunk by British aircraft on April 15th, 1943, 25 miles E. of Borkum.

BORGESTAD

AISBorgestad; 1924; Burmeister & Wain; 3,924 tons; 351-3x 51-4x24-2; 449 n.h.p.; oilengines.

The Norwegian motorship *Borgestad* was shelled and sunk by a German raider on February 12th, 1941, about 150 miles E. of the Azores. Her entire company of 31 were killed.

BORGNY

Akties. Borgia; 1909; Akers Mek. Vcerks.; 1,149 tons; 228-5X 36-2x15-8; 111 n.h.p.; triple-expansion engines.

The Norwegian steamship *Borgny* was torpedoed and sunk by a German submarine in the English Channel on February 26th, 1918.

BORGNY

A/S Borgia; 1929; A/S Aalborg Skibsbyggeri; 3,015 tons; 305-4 X50-2x18-8; 222 n.h.p.; oil engines.

The motor vessel *Borgny* was torpedoed and sunk by a British submarine on October 4th, 1941, at Korsfjord, near Bergen, with the loss of 14 lives.

BORGSTEN

Akties. Borgia; 1913; Nylands Vcerksted; 1,718 tons; 264-9x 40-2x18-6; 152 n.h.p.; triple-expansion engines.

The Norwegian steamship *Borgsten* was torpedoed and sunk by a German submarine in the English Channel on December 19th, 1917.

BORIE

United States Navy, destroyer; 1919; W. Cramp & Sons; 1,190 tons; 314x30x10; 25,000 s.h.p.; 35 knots; turbine engines; four 4 in. guns, one 3 in.A.A.; 12 T.T.

The United States destroyer *Borie* was engaged in escort and patrol duties in the Atlantic in 1943. On November 1st of that year she rammed and sank a German submarine N. of the Azores, but was so badly damaged by the impact that she had to be abandoned. She was then sunk by American naval aircraft. Her normal complement was 122.

BORINGIA

Det Ostasiatiske Kompagni; 1930; Burmeister & Wain; 5,821 tons; 425'5x57-1x25-3; 827 n.h.p.; 15 knots; oil engines.

After the German occupation of Denmark in April, 1940, the Danish ship *Boringia*, Capt. S. Kolls, sailed under the British flag. On October 7th, 1942, when about 200 miles S.W. of Cape Town, she was torpedoed and sunk by a submarine. Sixteen of her crew were killed; this includes seven of a boatload picked up by the *Clan MacTavish* who were killed when that ship was sunk. Capt. Kolls was among the survivors.

BORIS

Soc. Commercial et d'Armement S.A.; 1917; D. & W. Henderson & Co.; 5,166 tons; 400-5x52-3x28-5; 490nh.p.; triple-expansion engines.

The Greek steamship *Boris* was torpedoed and sunk by a German submarine on June 3rd, 1943, on a voyage from Santos to Freetown.

BORIS SHEBOLDAEV

Sovtorgflot; 1928; Chant. Nav. Francais; 8,228 tons; 457-5x57 X 36 • 1; 776 n.h.p.; oil engines.

The motorship *Boris Sheboldaev*, on a voyage from Leningrad to Datum, ran on to the Camelle Rocks, six miles E. of Cape Villano, on August 20th, 1934, broke in two and sank.

BORNEO MARU

Osaka Shosen K.K.; 1917; Kawasaki Dkyd. Co.; 5,863 tons; 385 X 51X 36; 440 n.h.p.; triple-expansion engines.

The steamship *Borneo Maru* was bombed and sunk by U.S. land-based aircraft on October 8th, 1942, off the Aleutian Islands.

BORNU

British & African S. N. Co.; 1899; Vickers Sons & Maxim; 3,529 tons; 345x42-2x23; 296n.h.p.; triple-expansion engines.

The British freighter *Bornu* foundered on October 28th, 1916, 25 miles W. of Ushant, while on a voyage from Rotterdam to the W. coast of Africa.

BORODINO

Russian-Navy, 1st class battleship; 1904; New Dockyard; Lenin-grad; 13,516 tons; 367-5x76x26; 16,300 i.h.p.; 17-8 knots; triple-expansion engines; four 12 in. guns, twelve 6 in., two 2% pdr., twenty 12pdr., twenty 3pdr.; 4 T.T.

On the afternoon of May 27th, 1905, the Baltic Fleet, under command of Admiral Rojdestvensky, was steaming through the Straits of Tsu-Shima, between Japan and Korea, when it made contact with the Japanese Fleet under Admiral Togo. The battle which ensued was, from the beginning, a demonstration of the superiority of high professional skill and training, over dogged courage with no other quality to assist it. By nightfall all the new Russian battleships, save one, had been sunk with appalling loss of life.

The end of the *Borodino* provides an instance of that capricious-ness of fate which, at times, seems to distinguish sea disasters. The ship received a bad mauling during the action, but was able to maintain her place in the line, in company with the *Orel*, being all that was left of the five modern battleships. At about 7.30 p.m., when the sun was setting and visibility becoming poor, Admiral Togo drew off his main forces, deciding to make a wide sweep for the scattered Russian ships at daybreak. As the Japanese squadron was turning away, the battleship *Fuji* fired a salvo from her after 12 in. turret. One of the shells struck the *Borodino* in what must have been her magazine, the ship blowing up instantly. Of her ship's company of 830 officers and men only one survivor, an officer, was picked up. The full story of the battle of Tsu-Shima is told under the *Kniaz Suvaroff*, flagship of Admiral Rojdestvensky, which was among those lost.

BORUSSIA

Dominion Line; 1854; J. Caird & Co.; 2,075 tons; 292x38-5 x 25; 300 n.h.p.; 12 knots; compound inverted engines. The Dominion liner *Borussia*, Capt. Roberts, was an old ship, having been built in 1854, but was re-engined and boilered in 1871. She first served as a transport to bring troops home from the Crimea before engaging in the trans-Atlantic passenger service of the Hamburg-America Co. Later she was purchased by the Dominion Line for employment as an emigrant ship. On November 20th, 1879, she left Liverpool for New Orleans, by way of Corunna and Havana, with 66 passengers and 54 crew. Her passengers were Lancashire, Yorkshire and Durham farmers who proposed to settle with their families in Texas. There were also a few of the Scottish and Irish agricultural classes. All these emigrants were of the better sort and nearly all were possessed of a small amount of capital.

The ship reached Corunna on November 23rd and embarked a further 64 Spanish emigrants for Havana, Cuba, leaving for her run across the Atlantic with a total of 184 persons. She carried a cargo of heavy goods, among which was a quantity of tin plate. When four days out from Corunna the *Borussia* encountered a S.S.E. gale which continued till December 1st when the wind changed to N.N.W., still with a heavy sea. On the night of the 1st the ship sprang a leak and by morning there was 11 feet of water in the hold, despite the efforts of the steam-pumps, and the engine room was flooded. The boats, of which there were seven, were provisioned and launched, the first under the first officer with 13 passengers and some of the crew getting away in safety. The next, with 20 Spaniards and some more of the crew also got clear without mishap, but the third boat drifted away with two men before it could be filled and an attempt by the third officer to recover it ended in disaster, both boat and men being lost. The third officer then returned to find the *Borussia* sinking. A large number of people still remained on the ship and went down with her.

The sailing ship *Mallowdale* picked up one boat containing the doctor and nine of the crew and took them to Queenstown. The German barque, *Fulda* picked up another party of five. These 15 persons represented the sole survivors from the vessel, the other boats being lost. The total number of persons drowned was 169, including Capt. Roberts and nearly all the officers.

BOSCASTLE

Hatfield Steamship Co.; 1912; W. Gray & Co.; 2,346 tons; 298x44-7x19-9; 260 n.h.p.; 8-5 knots; triple-expansion engines.

The steamship *Boscastle* was torpedoed and sunk by a submarine 14 miles N.N.W. of Strumble Head on April 7th, 1918. The captain and 17 men were killed.

BOSFORO

Societd Italiana di Servizi Marittimi; 1878; C. Connell & Co.; 2,723 tons; 360-5x37-1x26-4; 393 n.h.p.; triple-expansion engines.

The Italian steamship *Bosforo* was torpedoed and sunk by an enemy submarine in the Mediterranean on January 12th, 1918.

BOSFORO

"Adriatica" Soc. Anon. diNav.; 1929; Antwerp Eng. Co.; 3,648 tons; 359-2x49-3x23-6; 440 n.h.p.; triple-expansion engines.

The Italian steamship *Bosforo* was torpedoed and sunk by a British submarine on March 31st, 1942, 24 miles from Sapienza.

BOSNIA

Societd Italiana di Servizi Marittimi; 1898; G. Ansaldo & Co.; 2,561 tons; 321-3x39-2x22-5; 220 n.h.p.; triple-expansion engines.

The Italian steamship *Bosnia* was sunk by an enemy submarine in the Mediterranean on November 10th, 1915.

BOSNIA

Cunard S.S. Co.; 1928; J. L. Thompson & Sons; 2,407 tons; 292-3x45x20-3; 403 n.h.p.; triple-expansion engines.

The British steamship *Bosnia* was torpedoed and sunk by a German submarine on September 5th, 1939, N.W. of Ferrol.

BOSPHORUS

BOSPHORUS

Hall Brothers; 1883; W. Dobson & Co.; 2,490 tons; 295x37-2 X25-2; 212 h.p.; compound engines.

The British freighter *Bosphorus* sank in a collision on August 12th, 1888, about 25 miles S.S.W. of the Eddystone Light. She was on a voyage from Alexandria to London with a cargo of grain and cotton seed.

BOSTON

A/S D/S *Boston*; 1905; Nylands Vcerksted; 1,168 tons; 225 X 33-7x12-7; 119 n.h.p.; triple-expansion engines.

The Norwegian steamship *Boston* struck a mine and sank in the North Sea on December 22nd, 1914.

BOSTON

Ministry of War Transport (Coast Lines); 1924; Bethlehem S.B. Corp.; 4,989 tons; 385-3x72-5x20-9; 11 knots; turbine engines.

The British steamship *Boston*, Capt. R. S. C. Young, was torpedoed and sunk by a German submarine on September 25th, 1942, on a voyage in convoy from St. John's, N.F.L., to England. There were only two survivors of her complement of 54 crew and 10 gunners.

BOSTON MARU

Ishihara Sangyo K.K.; 1919; Asano S.B. Co.; 5,477 tons; 400X 53-2x29-4; 513 n.h.p.; triple-expansion engines.

The transport *Boston Mam* was torpedoed and sunk by the U.S. submarine *Seal* on November 16th, 1942, S. of the Caroline Islands.

BOTANIST

Charente S.S. Co. (T. & J. Harrison); 1911; D. & W. Henderson & Co.; 7,688 tons; 469-5x58x32-1; 604 n.h.p.; quadruple-expansion engines.

The British cargo ship *Botanist* was wrecked on March 24th, 1920, on Komuriya Reef while on a voyage from Calcutta to London with a general cargo.

BOTAVON

Ministry of War Transport (Sir Wm. Reardon Smith & Sons); 1912; Chas. Cornell & Co.; 5,848 tons; 430x54x30-5; 687 n.h.p.; 12 knots; triple-expansion engines.

The steamship *Botavon*, Capt. J. H. Smith, formed part of a convoy to North Russia. At 12.3 a.m. on May 3rd, 1942, when lying off Murmansk she was torpedoed and sunk by German aircraft. Twenty of her crew and one gunner were killed, Capt. Smith was among the survivors.

BOTHAL

Det Danske Kulkompagni; 1920; Ferguson Bros.; 2,109 tons; 275-4x41-1x18-1; 213 n.h.p.; triple-expansion engines.

The Danish steamship *Bothal* was torpedoed and sunk by a German submarine on March 20th, 1940, about 28 miles from Wick. Fifteen of her crew of 20 were killed.

BOTNIA

AlSDampsk. Bosnia; 1901; Hasseldars Jernskibsb.; 1,149 tons; 231-3x34x13-7; 97 n.h.p.; triple-expansion engines.

The Norwegian steamship *Botnia* struck a mine and sank in the Arctic on October 17th, 1916.

BOTUSK

Ministry of Shipping (Sir W. R. Smith & Sons); 1919; Ropner S.B. & Rpg. Co.; 3,091 tons; 331-5x46-7x23-2; 359 n.h.p.; triple-expansion engines.

The British steamship *Botusk* struck a mine and sank on January 31st, 1944, off North Rona, Scotland.

BOTWEY

Ministry of Shipping (P. Henderson & Co); 1916; Sir J. Laing & Sons; 5,106 tons; 420-3x53-5x27-8; 682 n.h.p.; triple-expansion engines.

The British steamship *Botwey* was torpedoed and sunk by a German submarine on July 26th, 1941, on a voyage from the Mersey to Port Sulphur.

BOUGAINVILLE

French Navy, escort vessel; 1931; Chantiers Gironde, Bordeaux; 1,961 tons; 340x41⁷x14-7; 3,200 s.h.p.; 15-5 knots; diesel engines; three 5-5 in. guns, four 37 m.m., six m.g.; 50 mines; 1 seaplane.

In September, 1940, a small force of the Free French navy, comprising the sloops *Savorgnan de Brazza*, 1,969 tons, *Commandant Duboc* and *Commandant Domine*, 640 tons each, with several other small craft set sail for Dakar in French West Africa. General de Gaulle accompanied the expedition, the object of which was to induce the colonists to join the Free French movement. Some encouragement had been given to General de Gaulle, and the Governor of the colony was believed to be sympathetic. Unfortunately news of the expedition reached the Vichy government which on September 11th, 1940, dispatched three cruisers, the *Georges Leygues*, *Gloire* and *Montcalm* all of 7,600 tons and 9•6 in. guns together with the destroyers *LAudacieux*, *Le Fantasque* and *Le Malin* all of 2,569 tons. A British force sailed with the Free French. The Vichy squadron was the first to arrive at Dakar, the ships having been allowed to pass Gibraltar on their way from Toulon without hindrance by the British Navy. As a consequence General de Gaulle found on his arrival that the former governor had been superseded by one of pro-German sympathies and that the officers commanding the men-of-war were all anti-British. Nevertheless on the 23rd, he sent a launch with a flag of truce under Capt. D'Argenlieu of the French navy. The launch was fired on and Capt. D'Argenlieu was severely wounded. The shore batteries and the battleship *Richelieu*, lying partially disabled in the harbour, opened fire, to which the Free French, and later the British replied.

The Vichy squadron possessed three submarines and in defiance of the British admiral's warning that they would be sunk if they left harbour they attempted to do so. Two of them, the *Ajax* and the *Persee*, were sunk by gunfire and depth charges. All the crew of the *Persee* were rescued. The destroyer *L'Audacieux* was hit and sunk by the British.

Eventually General de Gaulle decided to withdraw the expedition as he wished to avoid bloodshed between Frenchmen, and the ships returned to British ports, with the exception of the *Savorgnan de Brazza* which remained on the West African coast.

On November 9th, the *Savorgnan de Brazza* met her sister ship the *Bougainville* flying Vichy colours. There was a sharp engagement and the *Bougainville* was sunk. The vessel's normal complement was 136.

BOUGAINVILLE

Chargeurs Reunis (French auxiliary cruiser); 1913; Forg. et Chant, de la Medit.; 7,200 tons; 415x54x37-6; 416 n.h.p.; 12 knots; triple-expansion engines; 5 in. guns and smaller.

The old French cargo liner *Bougainville* served as an auxiliary cruiser with the Vichy French naval force at Diego Suarez in Northern Madagascar. When the British invasion of the island took place in May 1942, she was attacked by torpedo bombers and sunk on May 5th-6th. For further details of the landing at Diego Suarez Bay see *Duchess of Atholl*.

BOULONNAIS

French Navy, destroyer; 1927; Ch. Navals Francais, Blainville; 1,378 tons; 330-9x32-2x9-5; 33,000 s.h.p.; 32-5 knots; turbine engines; four 5-1 in. guns, two 37 m.m.A.A.; 6 T.T.

The French destroyer *Boulonnais*, Capt. de Corv. Martinaut de Preneuf, was stationed at Casablanca and participated in the defence of that port when the American forces made their landing on November 8th, 1942. The fighting was bitter and the French naval losses were extremely heavy. The *Boulonnais* was hit and sunk by a salvo from the U.S. battleship *Massachusetts* at about 10.35 a.m. when returning from a sortie against American landing craft W. of Cape Fedhala. The destroyer sank with the loss of two officers and eight ratings out of a complement of 159. There was also a large number of wounded.

The full story of the action is told under the cruiser *Primauguet*, which was sunk on the same occasion.

BOURNEUF

Spurr & Co.; 1852; Nova Scotia; 1,415 tons; 240X — X.

The sailing ship *Bourneuf* was chartered by the British government for the conveyance of emigrants to Australia. On July 15th, 1853,

she left Hobson's Bay for England under command of Capt. Bibby, with cargo but no passengers. The number of persons on board was 39, including the captain's wife and her sister. All went well until August 3rd when the *Bourneuf* struck a reef in Torres Straits. The seas were extremely heavy and one boat, containing the two women and some seamen, was hit by a wave when it was half lowered and all the occupants were drowned. Shortly after this Capt. Bibby and others of the crew were washed overboard. Altogether eight lives were lost, the remaining 31 persons being picked up by the ship *Everdina Elizabeth* and conveyed to shore.

BOURRASQUE

French Navy, destroyer; 1925; Chantiers de France, Dunkirk; 1,458 tons; 347x33x13-7; 33,000 i.h.p.; 33 knots; turbine engines; four 5-1 in. guns, two 37 m.m.; 6 T.T.
The French destroyer *Bourrasque*, Cdr. C. F. Fouque, was engaged in the operations connected with the evacuation of the French and British armies from Dunkirk, when she struck a mine and foundered. The vessel was lost on May 30th, 1940, going down with 56 ratings out of a complement of 159.

BOUVET

French Navy, 1st class battleship; 1898; UOrient; 12,205 tons; 401-3x70-2x28-3; 14,000i.h.p.; 18-6knots; triple-expansion engines; Belleville boilers; two 12 in. guns, two 10-8 in., eight 5-5 in., eight 4 in., ten 3pdr., twenty 1 pdr.; 4 T.T.
In February of 1915, when the British and French Admiralties were contemplating a naval attack upon the Dardanelles, the French decided to contribute a squadron of four old battleships, among them being *the Bouvet*. She had a complement of 630 and was commanded by Capt. Rageout de la Touche. In the subsequent bombardments she proved an excellent vessel for the task in hand, and as both fleets were composed of old ships her age was no disadvantage. On March 18th the French squadron, under Admiral Guepratte, was engaged with the forts on both sides of the Narrows, the *Bouvet* and the *Suffren* taking the Asiatic side and concentrating on Fort Namazich. The fighting was very hot and the *Bouvet* had two of her casemates put out of action and her bridge and steering-gear compartment set on fire by the guns of Fort Messudieh. Others of the French squadron had been more severely damaged and the admiral thought it advisable to signal the recall of his forces.

It was at this moment, when the *Bouvet* was following the *Suffren* through the British line, that there was a loud explosion from under her, accompanied by a cloud of reddish smoke. This was followed after a few seconds by another, which appeared to come from her magazine. She at once capsized and went down, the whole tragedy being over in two minutes.

Of her complement little more than 20 persons were saved.

BOVEY TRACEY

Shamrock Shipping Co.; 1930; J. Crown & Sons; 1,212 tons; 222X35-2X14-6; 158 n.h.p.; triple-expansion engines.
The British steamship *Bovey Tracey* was bombed and sunk by German aircraft on November 17th, 1941, in the English Channel.

BOX HELL

Surrey S.S. Co.; 1920; Hawthorn, Leslie & Co.; 5,677 tons; 450x55x26-4; 548 nh.p.; triple-expansion engines.
The British steamship *Box Hill* struck a mine and sank on December 31st, 1939, off the Humber Lightship, with the loss of 22 lives.

BOXER

British Navy, destroyer; 1894; Thornycroft; 280 tons; 200x19x9; 4,000 i.h.p.; 27 knots; triple-expansion engines; Thornycroft boilers; one 12pdr. gun, five 6pdr.; 2 T.T.
The destroyer *Boxer* was sunk in collision in the English Channel on February 8th, 1918. Her official complement was about 55, but it is probable that there was a larger number than this on board at the time of her loss.

BOY FEDERSEN

German Government; 1914; Bremer Vulkan; 6,689 tons; 472-1 x 59 • 1 x 28 • 9; 736 n.h.p.; triple-expansion engines.
The German steamer *Boy Federsen*, formerly the Russian *Kharkov* seized by the Germans, was torpedoed and sunk by Russian aircraft on August 10th, 1943, off the Crimea.

BOYARIN

Russian Navy, 3rd class cruiser; 1901; Burmeister & Wain; 3,200 tons; 347-7x41-5x16-2; 11,500i.h.p.; 22knots; triple-expansion engines; six 4-7 in. guns, eight 3pdr., one 2% in., three m.g.; 5 T.T.

The Russian light cruiser *Boyarin* was a unit of the Pacific Squadron based on Port Arthur. On February 12th, 1904, a few days after the outbreak of the Russo-Japanese War, she was sent with four destroyers to Ta-lien Bay where the minelayer *Yenisei* had been blown up on the 11th. The Russians had no accurate information about the loss of this ship and attributed it to Japanese destroyers, while in fact their own mines had been responsible for the disaster. The *Boyarin* and the destroyers, therefore, with uncertain information about the extent or exact location of the minefield just laid by the *Yenisei*, proceeded to the spot expecting to encounter the Japanese.

Capt. Saruichev, in command of the flotilla, kept well out to sea, but when turning shorewards encountered the minefield. The *Boyarin* struck a mine and settled down but did not sink. Captain Saruichev thereupon gave orders to "abandon ship" and later ordered one of the destroyers, the *Storozhevoi*, to torpedo her. The commander of this vessel questioned the order, but finally obeyed, the torpedo failing to hit the mark. The flotilla then returned to Port Arthur till next day when another visit was paid to the derelict, all her valuables being removed. During the night of the 13th-14th a violent storm caused the *Boyarin* to sink.

There was no loss of life, the ship's company of 266 officers and men getting away in safety, but Capt. Saruichev was court-martialled and deprived of his command for a year.

BOYNE

W.H.Tindall; 1865; Harland & Wolff; 615 tons; 185-7x 28-1x16-9.

The wooden barque *Boyne*, Capt. Wheelan, was wrecked in Mullion Cove, Cornwall, on March 1st, 1873. Fifteen of the crew were drowned.

BOYNE

Royal Mail Steam Packet Co.; 1871; W. Denny & Bros.; 3,318 tons; 372x40-6x33-4; 500 n.h.p.; 14 knots; compound engines.
The liner *Boyne*, from Brazil, left Lisbon for Southampton on August 11th, 1875, with 108 passengers and 113 crew, under command of Capt. R. H. Macaulay. She carried a cargo of coffee, tapioca and hides, besides which she had £20,682 in specie in her strong-room. On the 14th the ship ran into thick weather, but did not reduce speed although she was in the dangerous Ushant area. Between 7 and 8 p.m. she struck the rocks off the island of Molene and became a total wreck. Fortunately everyone was put ashore in safety with the exception of two persons who were drowned.

BOYNTON

W. & E. S. Lamplough; 1892; J. L. Thompson & Sons; 2,578 tons; 300x40x19-6; 245 n.h.p.; 9 knots; triple-expansion engines.

The steamship *Boynton* was torpedoed and sunk by a German submarine five miles W.N.W. of Cape Cornwall on September 24th, 1917. The captain and 22 of his crew were killed.

BRAATT H

Skibsakties. Braatt; 1914; Fredriksstad Mek. Varks; 1,834 tons; 265 x 42x20; 188 n.h.p.; triple-expansion engines.
The Norwegian steamship *Braatt II* was torpedoed and sunk by a German submarine in the English Channel on March 7th, 1918.

BRABANT

A/S Ganger Rolf; 1907; Fredriksstad Mek. Vcerks; 1,492 tons; 241-5x35-1x20-5; 150 n.h.p.; triple-expansion engines.
The Norwegian steamship *Brabant* struck a mine and sank in the North Sea on January 15th, 1917.

BRABANT

Cie. Nationale Beige de Transp. Mar.; 1938; Soc. Anon. John Cockerill; 2,483 tons; 307-6x45-2x27-7; 337 n.h.p.; oil engines.
The Belgian motorship *Brabant* was torpedoed and sunk by a German submarine at 2 a.m. on May 14th, 1942, off Trinidad.

BRACONDALE

BRACONDALE

British Navy, Q-ship; 1903; W. Gray & Co.; 2,095 tons; 290X 42-1x19-3; 218 n.h.p.; 10 knots; triple-expansion engines; one 4 in. gun, two 12 pdr., two m.g.; 2 T.T.

The Admiralty collier *Bracondale* was converted to service as a Q-ship early in 1915, and commissioned as the s.s. *Chagford* under command of Lt. Douglas G. Jeffrey, R.N.R. Early on the morning of August 5th, 1917, when about 120 miles W.N.W. of Tory Island patrolling for submarines of which two were known to be in the vicinity she was hit by a torpedo. The attack was made at 4.10 a.m. and the explosion blew away the Q-ship's canvas screens and revealed her 4 in. gun and torpedo-tubes. This gave away her identity and for the rest of the time the U-boat kept at a respectable distance, firing two more torpedoes during the course of the morning and scoring hits with each. Finally after having tried to entice the enemy by a false "abandon ship" Lt. Jeffrey was compelled to leave his vessel as she was sinking under him and he and his crew were later picked up by the trawler *Saxon*. One man was killed by the first torpedo.

BRADFORD CITY

British Navy, Q-ship; 1910; Ropner & Sons; 3,683 tons; 346-5X 51Y.23-2; 292 n.h.p.; 11 knots; triple-expansion engines; one 4 in. gun, one 12 pdr.

The Qship *Bradford City* was commissioned in 1915 and given the name of *Saros*. As many of these ships went under several names during their careers, the original name is the one by which each is designated. The *Bradford City* was commanded by Lt. Cdr. R. C. C. Smart and on August 16th, 1917, was about eight miles off San Remo in the Straits of Messina when she was torpedoed and sunk by a submarine. There were no casualties, the crew being picked up by a French trawler.

BRADFORD CITY

Reardon Smith Line; 1936; Furness S.B.Co.; 4,953 tons; 426-5 X56-2X25-3; 687 n.h.p.; oilengines.

The British motorship *Bradford City* was torpedoed and sunk by a German submarine on November 1st, 1941, on a voyage from Table Bay to Freetown.

BRADFYNE

Leeds Shipping Co. (Sir W. Reardon Smith & Sons); 1928; W. Gray & Co.; 4,740 tons; 400-2x54-2x25-6; 339 n.h.p.; 11 knots; triple-expansion engines.

The steamship *Bradfyne*, Capt. R. G. Vanner, was some 170 miles off the north Irish coast on November 22nd, 1940, when she was torpedoed and sunk by a submarine. Capt. Vanner and 38 men were killed. The *Bradfyne* was not in convoy at the time.

BRADGLEN

Leeds Shipping Co. (Sir W. Reardon Smith & Sons); 1930; W. Gray & Co.; 4,741 tons; 400-4x54-2x25-6; 258 n.h.p.; 11 knots; quadruple-expansion engines.

The steamship *Bradglen*, Capt. W. Lawday, was mined and sunk in the Thames on September 19th, 1941. Nine men were killed. Capt. Lawday was among the survivors.

BRAGANZA

A/S Braganza; 1924; W. Doxford & Sons; 6,327 tons; 420x58 X28-1; 640 n.h.p.; oilengines.

The Norwegian motor vessel *Braganza* caught fire after an explosion in the engine room on October 12th, 1944, about 150 miles off the coast of Uruguay. The fire could not be controlled and the ship was abandoned in a sinking condition. One boat containing nine men landed 40 miles S. of Rio Grande, the rest of the crew in two other boats were lost.

BRAGE

Seereederi "Frigga" A.G.; 1937; Nordseewerke Emden G.m.b.H.; 5,954 tons; 437-1x59x23-6; 313 n.h.p.; compound engines.

The German steamship *Brage* struck a mine and sank on May 6th, 1940, in Kiel Bay.

BRAGELAND

Angf. A/B Tirfing; 1937; Eriksbergs M. V. Aktieb.; 2,608 tons; 353-6x50-2x19-4; 644 n.h.p.; oilengines.

The Swedish motorship *Brageland* was torpedoed and sunk by a German submarine on January 1st, 1943, on a voyage from Buenos Aires to Philadelphia.

BRAHMANI

Bombay S.N. Co.; 1891; Ailsa S.B. Co.; 1,015 tons; 210x31x 13; 154 n.h.p.; triple-expansion engines.

The Indian ship *Brahmani* was sunk in a collision on April 4th, 1900, near Karwar. She was on a voyage from Mangalore to Bombay.

BRAKE

Jurgens Van Den Burgh; 1937; Bremer Vulkan A.G.; 9,925 tons; 489-3x66x36-4; 1,167 n.h.p.; oilengines.

The German tanker *Brake* was shelled and sunk by British warships on March 12th, 1944, in the Indian Ocean.

BRAMBLE

British Navy, minesweeper; 1938; Devonport Dockyard; 875 tons; 230x33-5x7-9; 1,750 i.h.p.; 17 knots; turbine engines; 3-drum boilers; two 4 in. A.A. guns, five smaller.

The minesweeper *Bramble*, Cdr. H. T. Rust, D.S.O., was sunk in action whilst escorting a convoy to North Russia on December 31st, 1942. Eight officers, including Cdr. Rust, and 113 ratings were killed.

For full story of the action see the destroyer *Achates*.

BRAMORA

A/S Bramora; 1928; Eriksbergs M.V. Aktieb.; 6,361 tons; 408-3x55-3x32; 543 n.h.p.; oilengines.

The Norwegian tanker *Bramora* left Bandar Abbas on September 6th, 1943, for Melbourne, loaded. She straggled from convoy and was believed to have been torpedoed and sunk with all hands on September 19th.

BRAND

A/S Borgestad; 1927; A/B Gotaverken; 4,819 tons; 380-5x 54-7x25-7; 543 n.h.p.; oilengines.

The Norwegian motorship *Brand* was torpedoed and sunk by a German submarine on May 12th, 1943, on a voyage from Halifax to Liverpool.

BRANDENBURG

James Currie & Co.; 1910; Greenock & Grangemouth Dockyard Co.; 1,473 tons; 234-6x36x16-4; 143 n.h.p.; 9-5 knots; triple-expansion engines.

The steamship *Brandenburg*, Capt. W. Henderson, was in convoy in the North Atlantic, some hundreds of miles W. of Portugal on February 10th, 1941, when she was torpedoed and sunk by a submarine. Capt. Henderson and all 23 of the crew were killed, together with 30 survivors from the steamship *Courland*, sunk the previous day.

BRANDENBURG

German Government; 1936; Forg. & Ch. de la Medit. S.A.; 3,894 tons; 333-7x49-2x22-6; turbine engines.

The steamship *Brandenburg* was formerly the French *Kita*, taken over by the Germans. On September 21st, 1943, she was torpedoed and sunk by an Allied submarine S.W. of Lethom.

BRANDON

J. Herron & Co.; 1882; W. Charland, Quebec; 1,270 tons; 197-5x38-5x23-4.

The wooden barque *Brandon* was lost on the Caicos Reef, West Indies, on September 26th, 1894. The captain and 13 of the crew were drowned.

BRANDON

South Georgia Co. (Chr. Salvesen & Co.); 1917; J. L. Thompson & Sons; 6,668 tons; 412-3x55-5x34-4; 600 n.h.p.; triple-expansion engines.

The steamship *Brandon*, Capt. R. Chisholm, was torpedoed and sunk by a submarine on December 8th, 1939, about 120 miles due W. of Land's End. Nine men were killed. Capt. Chisholm was among the survivors.

BRANDYWINE

Mississippi River steamboat.
The Mississippi river steamboat *Brandywine* was bound from New Orleans to Louisville when she caught fire a short distance above Memphis. The outbreak was caused by sparks from the funnels igniting some straw packing, and as there was a high wind the flames spread rapidly.

It was estimated that the steamboat was carrying from 200 to 230 passengers and crew, and of these about 75 were saved. The disaster occurred on, or about, April 12th, 1832.

BRANLEBAS

French Navy, torpedo boat; 1937; Augustin Normand; 610 tons; 264-7x26x9-2; 22,000 s.h.p.; 34-5 knots; turbine engines; two 3-9 in. guns, two 37 m.m., two m.g.; 2 T.T.

The French torpedo boat *Branlebas* was one of the units of the French Navy which adhered to General de Gaulle's Free French force after the capitulation in June 1940. The vessel was manned by a mixed French and British crew and came under the orders of the British Navy. On December 14th, 1940, when in the English Channel she was lost through stress of weather and three French seamen were drowned. The vessel's normal complement was 92.

BRANT COUNTY

Del Bergenske D/S; 1915; Akt. Ges. "Neptun"; 5,001 tons; 419-4 X 54-1 X 26-3; 684 n.h.p.; triple-expansion engines.

The Norwegian steamship *Brant County* was torpedoed and sunk by a German submarine on March 11th, 1943, in the North Atlantic. Twenty-eight of her crew and eight passengers were killed.

BRANTFORD CITY

Christopher Furness; 1880; W. Gray & Co.; 2,371 tons; 280 X 39-1 x 23; 200 h.p.; compound inverted engines.

The British cargo ship *Brantford City* was wrecked on August 10th, 1883, near Little Harbour, N.S. She was on a voyage from London to Halifax and Boston.

BRANTINGHAM

J. Cormack & Co.; 1897; R. Thompson & Sons; 2,617 tons; 313 x 44-2 x 20-6; 251 n.h.p.; 10 knots; triple-expansion engines.

The steamship *Brantingham* was torpedoed and sunk by a submarine in the Arctic Ocean on October 4th, 1916. The captain and 23 others were killed.

BRARENA

Italian Government; 1923; W. Denny & Bros.; 6,996 tons; 426-5 x 56-9 x 33-4; 769 n.h.p.; oil engines.

The motor vessel *Brarena* was a Norwegian ship seized by the Italians on June 10th, 1940. She was bombed and sunk by British aircraft on July 22nd, 1941, S. of Lampedusa.

BRAS

H. Hanssen; 1889; W. Gray & Co.; 1,851 tons; 270 x 37 x 18-6; 169 n.h.p.; triple-expansion engines.

The Norwegian steamship *Bras* was sunk by a German submarine in the North Sea on August 19th, 1915.

BRASIL

Rederiaktieb. Nordstjernen; 1935; Gotaverken A/B; 5,294 tons; 420-7 x 55-9 x 24; 945 n.h.p.; oil engines.

The Swedish motorship *Brasil* struck a mine and sank on January 9th, 1943, about 60 miles W. of Stavanger.

BRASIL MARU

Osaka Shosen K.K.; 1939; Mitsubishi Jukogyo; 12,752 tons; 544-6 x 68-9 x 41-3; 3,076 n.h.p.; oil engines.

The Japanese liner *Brasil Maru* with 400 soldiers, 200 passengers and a large crew was bound for Guadalcanal when she was torpedoed and sunk by the U.S. submarine *Greenling* on August 5th, 1942, midway between Guam and Truk.

BRASILOIDE

Lloyd Brasileiro; 1936; Howaldtswerke A.G.; 6,075 tons; 446-4 x 61-3 x 23-8; 906 n.h.p.; oil engines.

The Brazilian motorship *Brasiloide* was torpedoed by a German submarine on February 18th, 1943, and broke in two and sank, on a voyage from Maceio to Bahia.

BRASK

A/S Brask (Nilssen & Sonner); 1911; W. Doxford & Sons; 4,079 tons; 350-8 x 51-1 x 24; 310 n.h.p.; triple-expansion engines.
The Norwegian steamship *Brask* was torpedoed and sunk by a German submarine on January 15th, 1941, in the North Atlantic. Twelve of her crew were lost.

BRATOR

John Holman & Sons; 1896; W. Hamilton & Co.; 2,900 tons; 310-2 x 42-7 x 25-5; 241 n.h.p.; triple-expansion engines.

The British cargo ship *Brator* was wrecked in January, 1904, at Tyesteen, near Laurvig. She was on a voyage from Sulina to Moss with a cargo of grain.

BRAVA

Portuguese Government; 1893; Blohm & Voss; 3,184 tons; 315-8 x 40-2 x 19-1; 250 n.h.p.; triple-expansion engines.

The Portuguese steamship *Brava* was torpedoed and sunk by a German submarine in the Bristol Channel on September 3rd, 1918.

BRAVO

Italian Government; 1921; J. S. White & Co.; 1,571 tons; 240-3 x 36-2 x 18-2; 172 n.h.p.; triple-expansion engines.

The steamship *Bravo* was formerly the Yugoslav *Junak*, seized by the Italians. On May 30th, 1942, she was torpedoed and sunk by a British submarine in the Gulf of Sidra.

BRAVORE

AjSVore; 1916; Kockums M/V.; 1,458 tons; 235 x 37-7 x 16-3; 156 n.h.p.; triple-expansion engines.

The Norwegian steamship *Bravore* struck a mine and sank on April 24th, 1940, in the Downs. Fifteen of her crew were lost.

BRAY HEAD

Ulster Steamship Co. (G. Heyn & Sons); 1894; C. S. Swan & Hunter; 3,077 tons; 330 x 41-5 x 25-1; 264 n.h.p.; 10-5 knots; triple-expansion engines.

The steamship *Bray Head* was intercepted by a submarine 375 miles N.W. by W. of Fastnet on March 14th, 1917. The submarine opened fire from the surface and sank the vessel with the loss of 21 persons, including the captain.

BRAZEN

British Navy, destroyer; 1928; Palmer & Co.; 1,360 tons; 323 x 32-5 x 12; 34,000 s.h.p.; 35 knots; turbine engines; 3-drum boilers; four 4-7 in. guns, two 2 pdr., five m.g.; 8 T.T.

The destroyer *Brazen* was engaged in convoy work in the North Sea when she was attacked by German bombers on July 21st, 1940. She shot down three aircraft before she was hit and badly damaged. An attempt was made to tow her but this proved impossible and she was abandoned and sank some hours after the attack.

The *Brazen* was commanded by Lt. Cdr. Sir Michael Culme-Seymour and carried a complement of 138, of whom one stoker petty-officer died of wounds and four stokers were wounded.

BRAZIL MARU

Ono Shoji Gomei Kaisha; 1919; Kawasaki Dockyard Co.; 5,859 tons; 385 x 51 x 36; triple-expansion engines.

The *Brazil Maru* struck a mine and sank on May 12th, 1945, in the Inland Sea of Japan.

BRAZZA

Chargeurs Reunis; 1923; Atel. & Ch. de la Loire; 10,387 tons; 474-4 x 59-1 x 29-1; 1,816 n.h.p.; oil engines.

The French motorship *Brazza* was torpedoed and sunk by a German submarine on May 28th, 1940, about 100 miles W. of Oporto.

BRECONSHIRE

Glen Line; 1939; Taikoo D. & E. Co. of Hong Kong; 9,776 tons; 482 x 66-2 x 35; 2,469 n.h.p.; 14 knots; oil engines.

The liner *Breconshire*, Capt. C. A. G. Hutchison, was taken over by the British Admiralty in the Second World War for service as a naval store carrier. On March 23rd, 1942, the vessel was in convoy approaching Malta when she was hit and stopped by enemy bombers. She was taken in tow by the British naval tug *Ancient* and anchored at Marsaxlokk, but on the 26th was again attacked by aircraft. Fire broke out and she sank on the morning of the 27th.

BREEDLIJK

BREEDLIJK

Nederl Amerik. Stoomv. Maats.; 1922; *N.V. Socle's Scheepsw.*; 6,861 tons; 400-9x54-3x36-6; 648 n.h.p.; turbine engines. The Dutch steamship *Breedijk* was torpedoed and sunk by a German submarine on September 14th, 1942, about 830 miles from Freetown.

BREED

Akties. Borgestad; 1879; *Nylands Vcerksted*; 1,062 tons; 229 x 35-1x14-5; 101 n.h.p.; triple-expansion engines. The Norwegian steamship *Breid* was torpedoed and sunk by a German submarine in the North Sea on June 11th, 1917.

BREIVIKEN

Wallem&Co.AIS; 1911; *W.Dobson&Co.*; 2,669 tons; 313 x 46-5x20-6; 249 n.h.p.; triple-expansion engines. The Norwegian steamship *Breiviken* was torpedoed and sunk by a German submarine on July 4th, 1943, in the Mozambique Channel.

BREMEN

German Navy, light cruiser; 1903; *Weser, Bremen*; 3,250 tons; 341x43-5x17-5; 11,000 i.h.p.; 23 knots; triple-expansion engines; Schulz-Thornycroft boilers; ten 4-1 in. guns, ten 1 pdr., four m.g.; 2 T.T.

The German light cruiser *Bremen* was employed with the force operating in the Baltic, chiefly in the Gulf of Riga, during the Great War of 1914-18. The Germans suffered a heavy and steady loss in these waters almost entirely due to the activities of the British E class submarines, a flotilla of which had got into the Baltic and were under the orders of the Russian admiral.

On December 17th, 1915, one of these boats torpedoed the *Bremen* in the Eastern Baltic and sent her to the bottom. Most of her complement of 286 were rescued by the other ships present.

BREMEN

NorddeutscherLloyd; 1929; *A.G. Weser*; 51,731 tons; 898-7x101-9x48-2; turbine engines.

The German steamship *Bremen* was bombed and set on fire by British aircraft on March 16th, 1941, at Bremerhaven. She became a total loss.

BREMERHAVEN

"Union" Handels-u. Schiff.G.m.b.H.; 1921; *Workman Clark & Co.*; 5,355 tons; 399-5x51-3x30; 447n.h.p.; triple-expansion engines.

The German steamship *Bremerhaven* was bombed and sunk by Russian aircraft on October 31st, 1944, in Danzig Bay.

BREMSE

German Navy, gunnery ship; 1934; *Wilhelmshaven Yard*; 1,460 tons; 339-5x31x9-5; 25,000 i.h.p.; 27 knots; diesel engines; four 5 in. guns, two 20 mm.

The German gunnery training ship *Bremse*, accompanied by a torpedo boat and an armed trawler, was engaged in convoying a number of merchantmen loaded with supplies for German troops on the Murmansk front. On the night of the 8th-9th September, 1941, a British force consisting of the cruisers *Aurora*, 5,270 tons, and *Nigeria*, 8,000 tons, with two destroyers under Rear-Admiral P. Vian, located the Germans in foggy weather and brought the escort to action, but was unable to contact the convoy which escaped.

The *Bremse* was sunk by gunfire as well as the torpedo boat and the trawler. It is not known how many of the gunnery ship's complement of about 200 became casualties.

BRENAS

AIS Ganger Rolf; 1933; *A/S Akers M/V*; 2,687 tons; 341-6X48-7x18-8; 808 n.h.p.; oilengines.

The Norwegian motor vessel *Brenas* was torpedoed and sunk by a German submarine on August 6th, 1942, on a voyage from Maranham to Trinidad.

BRENTFORD

Britain S.S. Co.; 1885; *W. Gray & Co.*; 2,143 tons; 275-6x37-2x20; 200 h.p.; compound inverted engines.

The British cargo ship *Brentford* was wrecked on January 20th, 1887, near Peniche, while on a voyage from Newport to Malta.

BRENTTOR

Thompson S.S. Co.; 1890; *J. Blumer & Co.*; 1,951 tons; 270x37-1x17-1; 170 n.h.p.; triple-expansion engines.

The British freighter *Brent tor* was wrecked in October, 1900, at Signilskar, Aland Islands, while on a voyage from Blyth to Lulea with a cargo of coal.

BRESLAU

German Navy, light cruiser; 1911; *VulkanCo.*; 4,550 tons; 446 X43X16-5; 22,300 i.h.p.; 25-5 knots; turbine engines; Schulz-Thornycroft boilers; twelve 4•1 in. guns; 2 T.T.

The German battle cruiser *Goeben*, flagship of Rear-Admiral Spuchon, and the light cruiser *Breslau* were sighted by the battle cruiser *Indomitable* at 10.30 on the morning of August 4th, 1914, but as Britain had not yet declared war it was only possible to shadow them at a distance. The German admiral decided to run into Messina, in Sicily, where he coaled from colliers, coming out again at 5 p.m. on August 6th. In the meantime he had received instructions to make for the Dardanelles, where he was to remain until further orders. The two ships were seen by the light cruiser *Gloucester* and an exciting chase began. Throughout the night of the 6th-7th August the small British ship shadowed her powerful enemies, at one time engaging the *Breslau* at long range in order to force the *Goeben* to turn back to the assistance of her consort. Fortune was on the side of the Germans, however, and at 4.40 a.m. on the 7th, the *Gloucester* was compelled to break off the chase, as she had been ordered not to pursue the enemy beyond a given point.

The escape of the two German ships caused bitter disappointment in Britain and France, but the allied admirals were unaware of the secret agreement between Germany and Turkey, and the proper action was taken in the light of the scanty information then in possession of those in command.

The arrival of the *Goeben* and *Breslau* at Constantinople had the effect of establishing a strong driving force behind the weak Turkish navy.

The German admiral employed his ships in raids and forays of a minor character on the Russian transports in the Black Sea. He was not favoured by much good fortune, however, and the Turkish cruiser *Medjidieh*, was mined and sunk when returning from one of these expeditions. The same fate befell the *Breslau* on July 25th, 1915, but she managed to get into dock without further mishap.

On January 19th, 1916, the *Goeben* and *Breslau*, with an escort of four Turkish destroyers came out of the Dardanelles and early on the next morning made an attack on the small British ships lying in Kusu Bay. They surprised and sank the monitors *Raglan* and *M 28* and destroyed the lookout station at Cape Kephalo. At the commencement of the action the *Goeben* struck a mine, but was not seriously damaged, but the *Breslau* ran into the middle of a thickly-sown minefield and at 8.30 a.m. she was badly holed. In attempting to take her in tow the *Goeben* was again mined and the *Breslau* struck four mines in quick succession and began to sink. The *Goeben* was therefore compelled to abandon her and to concentrate on the hazardous task of getting out of the minefield without further disaster. She eventually got free and steamed back to the Dardanelles, but again ran foul of another minefield and was struck for the third time. Later, she ran aground near Nagara Point, but although she was repeatedly bombed she was towed off by the Turkish battleship *TurgudReis* on January 26th, after being five days aground and taken to Constantinople, where she was patched up in harbour, there being no docks large enough to accommodate her.

The *Breslau* sank very rapidly and of her complement of 370 only 14 officers and 148 men were picked up by the boats of the British destroyers which arrived during the latter part of the action.

BRESTOIS

French Navy, destroyer; 1927; *Ch. Navals Francais,Blainville*; 1,378 tons; 330-9x32-2x9-5; 35,000 s.h.p.; 34-5 knots;

turbine engines; four 5-1 in. guns, two 37 mm. A.A.; 6 T.T. The French destroyer *Brestois*, Capt. de Frig. Mariani, was stationed at Casablanca and participated in the defence of that port when the American forces made their landing on November 8th, 1942. The vessel, in company with five other destroyers, made a sortie from the port at about 8.20 a.m. against American landing craft going in W. of Cape Fedhala. The French flotilla was heavily engaged by the cruisers *Augusta* and *Brooklyn* and at 10 a.m. the French cruiser *Primauguet* came out to their assistance. The *Brestois*

was hit and disabled by shells from the *Augusta* and a destroyer and ran for harbour where she was attacked by planes from the U.S. carrier *Ranger*. She capsized and sank during the night. Of those on board 11 ratings were killed out of a complement of 159. There was also a considerable number wounded.

The full story of the action is told under the cruiser *Primauguet* which was sunk on the same occasion.

BRETAGNE

Shipping Controller (Capper, Alexander & Co.); 1903; Nylands Varksted; 1,439 tons; 231-6x35-2x14-7; 106n.h.p.; triple-expansion engines.

The *Bretagne* was sailing under the British flag when she was involved in a collision and sank on August 10th, 1918, in 50° 30' N., 3° 2' W. She was carrying coal from Bary to Rouen.

BRETAGNE

Compagnie Generale Transatlantique; 1922; Barclay Curie; 10,108 tons; 450-4x59-2x41-7; 1,292 n.h.p.; 14-5 knots; turbine engines.

The French liner *Bretagne* of the Cie. Transatlantique was formerly the *Flandria* of the Royal Holland Line. On October 14th, 1939, she was torpedoed by a German submarine some distance S.W. of Fastnet. The attack took place about dawn, the submarine surfacing and firing two shells at the ship's wireless aerial which missed their mark and fell among the women and children getting into the boats. The falls of one boat parted and its occupants were flung into the sea. From all causes two passengers and five crew lost their lives. A wireless call was sent out, in response to which a British warship came on the scene and picked up 123 of the vessel's 125 passengers, as well as the crew. Many of the survivors were seriously injured. The warship then turned back to pick up the boats of the Royal Mail liner *Lochavon* which she had passed on her way to the *Bretagne*.

BRETAGNE

French Navy, dreadnought battleship; 1913; Brest Dockyard; 22,189 tons; 544-5x88-5x32; 29,000 i.h.p.; 20 knots; turbine engines; Indret boilers; ten 13-4 in. guns, fourteen 5-5 in., eight 3 in., five 47 mm.; 4 T.T.

The distribution of the French fleet outside French European harbours at the time of the surrender of France on June 22nd, 1940, was as follows:—

IN BRITISH PORTS

Battleships	
<i>Courbet</i>	22,189 tons
<i>Paris</i>	" "
Light Cruisers (rated as destroyers by the French)	
<i>Le Triomphant</i>	2,569 tons
<i>Leopard</i>	2,126 "
Destroyers	
<i>Mistral</i>	1,319 tons
<i>Ourogon</i>	" "
<i>Boucher</i>	610 " (rated as torpedo boat)
<i>La Cordeliere</i>	" " " "
<i>La Flore</i>	" " " "
<i>Ulncomprise</i>	" " " "
<i>La Melpomene</i>	" " " "
Sloop	
<i>Savorgnan de Brazza</i>	1,969 tons
Submarines	
<i>Surcouf</i>	2,880 tons
<i>Nautilus</i>	669
<i>Rubis</i>	"
<i>Turquoise</i>	"
<i>Juron</i>	597
<i>Minerve</i>	"

In addition there were also a number of miscellaneous small craft such as mine-sweepers, patrol vessels and training ships, which together with the ships listed above amounted to about 100 naval ships of all types.

AT ALEXANDRIA

Battleship	
<i>Lorraine</i>	22,189 tons
Heavy Cruisers	
<i>Suffren</i>	9,938
<i>Duquesne</i>	10,000
<i>Tourville</i>	"
Cruiser	
<i>Duguay-Trouin</i>	7,249
Destroyers	
<i>Basque</i>	1,378
<i>Forbin</i>	"
<i>Le Fortune</i>	"

These ships were demilitarised and the crews reduced by agreement between the British and Admiral Godefroy, the French commander at Alexandria.

IN THE WEST INDIES

Aircraft carrier	
<i>Beam</i>	22,146 tons
Cruisers	
<i>Emile Berlin</i>	5,886
<i>Jeanne d'Arc</i>	6,496

There were also a number of sloops and other small craft scattered about the French empire, besides the large force at Oran which will be dealt with in this narrative. Before passing on to this, however, it should be said that the French government of collaboration established under Marshal Petain at Vichy decided later to send a force of three cruisers to the West African port of Dakar. These ships were the *Georges Leygues*, *Gloire* and *Montcalm*, all of 7,600 tons, eight 6•1 in. guns. The cruiser *Lamotte-Picquet*, 7,249 tons, eight 6•1 in. guns, was sent to the Far East. The unfinished battleships *Richelieu* and *Jean Bart*, both of 35,000 tons, eight 15 in. guns, were sent to Dakar and Casablanca respectively.

There now remained a large force under an admiral hostile to the British lying at Mers-el-Kebir, the naval harbour of Oran. The ships were the battleships *Dunkerque* and *Strasbourg*, both of 26,500 tons, and the *Bretagne* and *Provence*, both of 22,189 tons, with the seaplane carrier *Commandant Teste*, 10,000 tons, the destroyer *Mogador* 2,884 tons, and several smaller vessels. On the morning of July 3rd a message from Vice-Admiral Sir James Somerville, commanding the British squadron (battle cruiser *Hood*, flagship) was delivered to Admiral Gensoul by Capt. Cedric Holland, who had been naval attach^ at the British Embassy in Paris. The message was frank and reasonable; briefly, it gave the French commander a wide choice of action.

- He could steam to a British port and continue in alliance with Britain.
- He could leave the ships in a British port, demilitarised and with nucleus crews.
- He could steam to an anchorage in the French West Indies and lay-up his ships there.
- He could intern the ships in the United States (at that time a neutral power) until the end of the war.

In the event of his adopting any of the above means the ships would be handed over intact to the French government at the end of the war. Only if he refused all four solutions was he to be required to sink his ships within six hours. If he declined to accept any of the means suggested to him, then the British admiral would be compelled to sink the French ships.

Admiral Gensoul adopted an unfriendly attitude from the outset and after waiting for a period beyond the stipulated six hours Admiral Somerville had no option but to attack the ships of his former ally. The French did not put up a very determined resistance and the British did not continue their gunfire beyond a period of 10 minutes. After that time a squadron of aircraft of the Fleet Air Arm from the aircraft carrier *Ark Royal* made an attack which resulted in the *Bretagne* blowing up and capsizing and the *Dunkerque*, *Provence* and *Mogador* running ashore in a damaged condition and the *Commandant Teste* catching fire. The *Strasbourg* was hit by an aerial torpedo but managed to escape escorted by five destroyers and to reach Toulon.

The *Bretagne* was commanded by Capt. Le Pivain and carried a

BRETON

complement of 41 officers and 1,150 ratings. The loss of life when she blew up was very heavy, no less than 37 officers and 933 ratings perishing in the explosion. Nearly all the French ships, other than *this Bretagne*, which was a total loss, were re-floated, patched up and brought to Toulon, but in such a state as to be unfit for battle for a long period. Nearly all of them were scuttled by the French seamen when the Germans invaded unoccupied France in November 1942.

On the night of July 8th an attack was made on the battleship *Richelieu* at Dakar by a motor boat under command of Lt. Cdr. R. H. Bristowe, when depth-charges were dropped around her stern, damaging her propellers and rudder. Five torpedoes from British torpedo-bombers hit the ship almost at the same time, causing her to settle on the bottom of the shallow harbour. This damage finally removed any possibility of the *Richelieu* being completed for active service at that time, although she was later repaired in the United States by the Allies.

The *Jean Bart* was taken over by the Americans when their forces captured Casablanca in November 1942. Later she was handed back to the French government in her uncompleted state and was taken in hand at a French yard. The circumstances of her capture are related under the cruiser *Primauguet*, sunk at Casablanca.

BRETON

Gordon S.S. Co.; 1878; Schlesinger, Davis & Co.; 1,266 tons; 243x32-2x18-6; 151 n.h.p.; compound engines.
The British steamship *Breton* was wrecked in November, 1899, on Seaton Sea Rocks, near Blyth. She was on a voyage from Hamburg to the Tyne in ballast.

BRETON

Messageries Maritimes; 1886; Harland & Wolff; 3,739 tons; 380-3x43x27-4; 391 n.h.p.; triple-expansion engines.
The French steamship *Breton* was sunk by an enemy submarine in the Mediterranean on August 8th, 1917.

BRETWALDA

Hall Brothers; 1881; Palmers^o Co.; 2,908 tons; 320x39-2x20-5; 300 h.p.; compound engines.
The British steamship *Bretwalda* was wrecked in August, 1897, three miles N. of Cape St. Vincent. She was sailing from Blyth to Alexandria with a cargo of coal and coke.

BRETWALDA

Hall Bros. S.S. Co.; 1939; J.L. Thompson & Sons; 4,906 tons; 415-1x58-2x24-8; 365 n.h.p.; triple-expansion engines.
The British steamship *Bretwalda* was torpedoed and sunk by a German submarine on December 18th, 1942, when she had dropped about 10 miles astern of her convoy sailing from North Africa to Belfast. The sinking occurred in approximately 44° N., 16° W.

BRIER HOLME

Nine Bros.; 1876; J. L. Thompson & Son; 921 tons; 206-1x33-6x19.
The iron barque *Brier Holme* was bound from London to Hobart, with a general cargo, part of which was dynamite. She carried a crew of 21. On November 5th, 1904, the barque was wrecked off Elliott Cove, S.W. Tasmania. Soon after striking the reef there was a heavy explosion, probably due to the dynamite, and the vessel sank. There was one survivor.

BRIER ROSE

Richard Hughes & Co.; 1892; J. Shearer & Son; 503 tons; 165 x25-1x10-3; 8-5 knots; compound engines.
The steamship *Brier Rose*, Capt. W. G. Williams, was lost in the Irish Sea on March 26th, 1941. It is assumed that she was sunk by enemy action. Capt. Williams and nine others were killed.

BRIGHT FAN

W. T. & H. A. Williams; 1917; J. Priestman & Co.; 3,791 tons; 350x50-9x28-5; 301 n.h.p.; triple-expansion engines.
The *Bright Fan* left Churchill, Hudson Bay, on September 25th, 1932, for London with a cargo of grain. At 5 a.m. on October 1st she struck an iceberg and sank near Wakeham Bay in Hudson Strait.

BRIGHTON

Southern Railway; 1933; W. Denny & Bros.; 2,391 tons; 298-1x38•6x22•7; turbine engines.
The passenger steamship *Brighton* was taken over by the Admiralty for use as a hospital ship. On May 24th, 1940, she was bombed and sunk by German aircraft at Dieppe.

BRIGHTON BELLE

P. & A. Campbell; 1900; J. Scott & Co.; 396 tons; 200x24-1x8-2; 141 n.h.p.; 17 knots; compound engines.
The well-known paddle steamship *Brighton Belle* was built as the *Lady Evelyn*. In 1922 she was acquired by Messrs. P. & A. Campbell under whose direction she ran until 1939 as the *Brighton Belle*. At the outbreak of the Second World War she was taken over by the Admiralty for service as a minesweeper. She was engaged in the withdrawal of the British Army from the Dunkirk beaches and during the operation collided with a submerged wreck in the Downs on May 28th, 1940, and sank.

The full story of the Dunkirk Evacuation is told under the destroyer *Grafton*.

BRIGHTON QUEEN

P. & A. Campbell; 1897; Clydebank E. & S.B. Co.; 553 tons; 240-5x28-1x9-4; 273 n.h.p.; 18-3 knots; compound engines.
The paddle steamship *Brighton Queen* was taken over by the Admiralty early in the First World War for service as a minesweeper. On October 6th, 1915, she was mined and sunk off Nieuport. Her complement as a minesweeper was about 60 officers and men.

BRIGHTON QUEEN

P. & A. Campbell; 1905; John Brown & Co.; 807 tons; 245 x29x9-7; 325 n.h.p.; 20-5 knots; diagonal compound engines.
In 1939 the paddle steamer *Brighton Queen* was taken over by the Admiralty for service as a minesweeper. Her naval career did not last long for she was sunk by German gunfire on June 1st, 1940, during the evacuation of the British Army from the Dunkirk beaches.

The full story of the Dunkirk Evacuation is told under the destroyer *Grafton*.

BRILLIANT

Socony-Vacuum Oil Co.; 1930; Sun Shipbuilding Co.; 9,132 tons; 480-5x66x36-8; 2,800i.h.p.; 10-5 knots; oil engines.
The American tanker *Brilliant*, outward bound from St. John's, N.F.L., was torpedoed amidships by a German submarine on November 19th, 1942, and set on fire. The fire was extinguished and the tanker returned to St. John's where emergency repairs were effected. She sailed on December 18th, but suffered heavy weather damage and had to put back on the following day. After further stiffening repairs she left St. John's on January 18th for Halifax, in tow, but on the 19th she broke in two and sank. Capt. Lagnan and six of the crew were killed and two injured.

BRINK

Netherlands Navy, gunboat; 1912; Amsterdam Dockyard; 540 tons; 172x28x9; 1,500b.h.p.; 14 knots; oil engines; four 41 in. guns, two m.g.
The Dutch gunboats *Frisio*, *Brinio* and *Gruno* were engaged in resisting the German invasion of Holland which commenced on May 10th, 1940. After putting up a stout defence in the Zuider Zee the *Frisio* and *Brinio* were sunk by dive-bombers, but the *Gruno* managed to reach an English port.

All three ships were of the same tonnage and dimensions and each carried a complement of 63.

BRINKBURN

Century Shipping Co.; 1894; Richardson, Duck & Co.; 3,222 tons; 330x43-1x18; 273 n.h.p.; triple-expansion engines.
The British steamship *Brinkburn* was wrecked in December, 1898, on Maiden Bower rocks, Scilly. She was on a voyage from Galveston to Havre with a cargo of cotton and cottonseed.

BRINKBURN

S. Marshall & Co.; 1924; Sir J. Priestman & Co.; 1,598 tons; 245-2x37-1x18-2; 186 n.h.p.; triple-expansion engines.
The British steamship *Brinkburn* was torpedoed and sunk by a

German submarine on June 21st, 1943, 50 miles W. of Algiers. There were only two survivors, 22 of the crew and five gunners being lost.

BRIONI

"*Adriatica*" Soc. Anon di Nov.; 1931; Cantieri Riuniti delV Adriatico; 1,987 tons; 267-3x40-2x22-6; 654 n.h.p.; oil engines. The Italian motorship *Brioni* was bombed and sunk by British aircraft on November 2nd, 1942, at Tobruk.

BRIS

Dampsk. A/S Truls; 1938; Trondhjeims M/V; 2,027 tons; 289-3x44-1x18-3; 188 n.h.p.; triple-expansion engines. The Norwegian steamship *Bris* was torpedoed and sunk by a German submarine on May 20th, 1942, W. of the Bermudas.

BRISBANE

Eastern & Australian S.S. Co.; 1874; Inglis; 1,503 tons; 281-3x32-2x17-6; 250 h.p.; compound inverted engines. The British iron steamship *Brisbane* was wrecked on October 10th, 1881, off Point Charles. She was carrying a general cargo from Hong Kong to Port Darwin.

BRISBANE MARU

Osaka Shosen K.K.; 1930; Yokohama Dock Co.; 5,425 tons; 380x54-5x34-2; 489 n.h.p.; oil engines. The motor vessel *Brisbane Maru* was sunk by U.S. land and carrier-based aircraft on November 14th, 1942, in the Solomon Islands.

BRISK

Acties. Bonheur; 1906; Bergens Mek. Vcerks.; 1,662 tons; 268x38-7x17-5; 144 n.h.p.; triple-expansion engines. The Norwegian steamship *Brisk* was torpedoed and sunk by a German submarine in the Bristol Channel on June 7th, 1918.

BRISTOL

United States Navy, destroyer; 1941; Federal Shipbuilding Co.; 1,700 tons; 348-5x36x10; 50,000 s.h.p.; 36-5 knots; turbine engines; Babcock & Wilcox boilers; four 5 in. guns, four 40 m.m., seven 20 mm.; 5 T.T. The United States destroyer *Bristol* was torpedoed by a submarine off the Algerian coast on October 13th, 1943. The vessel's normal complement was 210.

BRISTOL CITY

C. Hill & Sons; 1899; C. Hill & Sons; 2,511 tons; 309-7x40-7 X22-3; 312 n.h.p.; 10 knots; triple-expansion engines. The steamship *Bristol City* was torpedoed and sunk by a German submarine in the Atlantic on December 16th, 1917. The captain and 29 others were killed.

BRISTOL CITY

Bristol City Line of Steamships; 1920; C. Hill & Sons; 2,864 tons; 316-5x43-8x23-6; 1,500i.h.p.; 10 knots; triple-expansion engines. The steamship *Bristol City*, Capt. A. L. Webb, O.B.E., was bound for Halifax, N.S., in convoy on the night of May 5th, 1943, when she was attacked by a German submarine. The vessel was struck by two torpedoes in No. 2 and No. 4 holds and sank in nine minutes. Capt. Webb and 18 men took to the only two serviceable boats remaining and managed to rescue nine other men from the water. Fifteen men were killed. The survivors were picked up later by the corvette *Loosestrife* and landed at St. John's, Newfoundland.

The *Bristol City* had been bombed and partially wrecked when in dry dock at Bristol on the night of November 24th, 1940, but had returned to service in 1941.

BRITANNIA

Leith Hull & Hamburg Steam Packet Co.; 1885; S. & H. Morton & Co.; 740 tons; 210-4x27-1x14-5; 122 n.h.p.; 8-5 knots; compound engines. The steamship *Britannia* is believed to have been torpedoed and sunk by a German submarine in the English Channel on, or about, October 19th, 1917. The captain and 21 men were lost.

BRITANNIA

British Navy, 1st class battleship; 1904; Portsmouth Dockyard; 16,350 tons; 453-7x78x26-7; 18,000 i.h.p.; 18-9 knots; triple-expansion engines; Babcock boilers; four 12 in. guns, four 9-2 in., ten 6 in., twelve 12 pdr., fourteen 3 pdr., two m.g.; 4 T.T. The old battleship *Britannia* had the melancholy distinction of being the last British warship to be lost in the First World War. She was steaming toward Gibraltar from westward in company with two destroyers when, on the morning of November 9th, 1918, at about a quarter-past seven she was attacked by a submarine. Two torpedoes were fired, both of which missed the target, but a third struck her amidships and exploded a quantity of cordite within the ship. She sank some three hours later, with a loss of 40 of her complement.

The submarine which sank *Britannia*, the *UB-50*, Cdr. Kukut, was escaping from the Mediterranean with other submarines which had been operating there since the Dardanelles campaign.

BRITANNIA

Anchor Line; 1926; A. Stephen & Sons; 8,799 tons; 460x59x29-4; 558 n.h.p.; 13-5 knots; quadruple-expansion engines; one light gun.

The liner *Britannia* was bound from the United Kingdom to India when she was intercepted by the German raider *Thor*, 3,862 tons, six 5 • 9 in. guns, 720 miles W. of Freetown. There was an unequal action for over an hour, the liner putting up a stout fight with her single gun. At the end of this time she was compelled to stop and lower her boats. The *Thor* then sank her by gunfire, but made no attempt to help the survivors. The action took place on March 25th, 1941.

Later one boat containing 63 persons was picked up by the Spanish steamer *Bachi*, 3,077 tons. Another with 38 persons reached Brazil after a voyage of 23 days. Of the 203 crew and 281 passengers, 122 of the crew and 127 passengers lost their lives.

The *Thor* (which see) was destroyed later in the war.

BRITANNIC

White Star Line; 1914; Harland & Wolff; 48,158 tons; 852-5x94x59-5; 22-5 knots; triple-expansion engines & L.P. turbine. The White Star liner *Britannic* was built for the company's trans-Atlantic service and was launched in February 1914. Before she was completed she was taken over by the Admiralty for use as a hospital ship and was never employed for her original purpose. On November 21st, 1916, she was sailing to Salonika to take on board wounded when she struck a mine in the Zea Channel in the Aegean Sea. She sank in a very short time, taking with her 21 members of the crew and medical staff. At the time of the disaster she had on board 1,125 persons, of whom 625 were crew and 500 medical officers, nurses and Royal Army Medical Corps personnel. In addition to those drowned 28 were injured.

The mines had been laid in the channel only an hour previously by the *U-73*, Lt.Cdr. Siehs, who had brought his submarine from Cuxhaven to the Mediterranean.

BRITANNIC

W. H. Cocker line & Co.; 1918; C. Hill & Sons; 2,490 tons; 303 X 43x20-7; 331 n.h.p.; triple-expansion engines. The British steamship *Britannic* was bombed and sunk by German aircraft on February 9th, 1941, on a voyage from Almeria to Barrow.

BRITANNIC

German Government; 1899; Wood, Skinner & Co.; 2,242 tons; 300-5x42x19-2; 215 n.h.p.; triple-expansion engines. The steamship *Britannic* was a Finnish ship seized by the Germans. On September 6th, 1942, she struck a mine and sank in Aalborg Bay.

BRITISH ADMIRAL

British Shipowners' Co.; 1873; Royden & Sons; 1,808 tons; 275 x 49x23.

On her first voyage the *British Admiral*, Capt. J. R. Taylor, was derailed in the Bay of Biscay and had to return to Liverpool for a refit. She left Liverpool again on February 24th, 1874, bound for Melbourne with 87 persons on board of whom 49 were passengers, mostly emigrants. The ship had been chartered to the White Star Line, and on the night of May 23rd was near the rocks of King's Island, Bass Strait, her officers being unaware of their dangerous

BRITISH ARDOUR

position. She struck with terrific violence and in a few minutes the mizzen-mast, with many people in the rigging, went by the board. The main-mast soon followed, bursting the decks, after which the ship slipped off the rocks and sank in deep water, taking with her 78 persons who were below.

The only survivors were the third officer, four seamen and four male passengers. They were taken on to Melbourne by a passing vessel, and the Victorian Government at once despatched a steamer to King's Island, but no more survivors were found.

BRITISH ARDOUR

British Tanker Co.; 1928; *Palmers' Co.*; 7,124 tons; 440-6x57-1x33-9; 553 n.h.p.; quadruple-expansion engines.

The tanker *British Ardour* was torpedoed and sunk by a German submarine on April 5th, 1943, in 58° 08' N., 33° 04' W. She was sailing from New York to Londonderry with a cargo of 10,000 tons of fuel oil.

BRITISH CHIVALRY

British Tanker Co.; 1929; *Palmers' Co.*; 7,118 tons; 440-8x57-1x33-9; 553 n.h.p.; 10 knots; quadruple-expansion engines.

The tanker *British Chivalry*, Capt. W. Hill, was in the Indian Ocean on February 22nd, 1944, when she was torpedoed and sunk by a submarine. Twenty men were killed. Capt. Hill was among the survivors, who were 37 days in the boats before being picked up. The tanker was not in convoy at the time.

BRITISH COLONY

British Tanker Co.; 1927; *Swan, Hunter & Wigham Richardson*; 6,917 tons; 440-2x57x33-7; 584 n.h.p.; triple-expansion engines.

The tanker *British Colony* was torpedoed and sunk by a German submarine on May 13th, 1942, in 13° 12' N., 58° 10' W. She was carrying 9,800 tons of fuel oil from Trinidad to Gibraltar.

BRITISH COMMANDER

British Tanker Co.; 1922; *Caledon S.B. & E. Co.*; 6,901 tons; 440x57x33•8; 643 n.h.p.; turbine engines.

The tanker *British Commander*, in ballast, was intercepted by the German raider *Pinguin* and sunk by gunfire on August 27th, 1940, S. of Madagascar.

BRITISH COMMERCE

British Shipowners' Co.; 1874; *Dobie & Co.*; 1,417 tons; 246-2x37-2x21-4.

The sailing ship *British Commerce* bound from London to Melbourne with a general cargo collided with the ship *County of Aberdeen*. The collision occurred in the English Channel on April 24th, 1883, the *British Commerce* sinking with many of her crew.

BRITISH COUNCILLOR

British Tanker Co.; 1922; *Sir J. Laing & Son*; 7,048 tons; 440-3 X 57-1 X 33-9; 642 n.h.p.; turbine engines.

The tanker *British Councillor* was torpedoed and sunk by a German submarine on February 2nd, 1940, off the River Humber.

BRITISH DOMINION

British Tanker Co.; 1928; *Swan, Hunter & Wigham Richardson*; 6,983 tons; 440x57x33-9; 640 n.h.p.; 10 knots; oil engines.

The motor tanker *British Dominion*, Capt. J. D. Miller, was in convoy in the Atlantic mid-way between Madeira and the Canary Islands, on January 10th, 1943, when she was torpedoed and sunk by a submarine. Thirty-eight men were killed. Capt. Miller was among the survivors.

BRITISH EMPEROR

British Tanker Co.; 1916; *Armstrong Whitworth & Co.*; 3,663 tons; 345x49-1x25-6; 380 n.h.p.; 10 knots; triple-expansion engines.

The tanker *British Emperor*, Capt. A. I. Henderson, was intercepted and sunk in the Indian Ocean on May 7th, 1941, by the German raider *Pinguin*. The crew of nine Europeans and 36 Indians were taken on board the raider as prisoners of war. A few days later the *Pinguin* was brought to action by the British heavy cruiser *Cornwall* and sunk. Unfortunately the destruction of the *Pinguin* involved the loss of many of the prisoners from the tanker.

BRITISH EMPIRE

Hughes & Co.; 1863; *Baldwin, Quebec*; 1,414 tons; 198-4x34-3x24-5.

The iron sailing ship *British Empire* caught fire and sank off Aleppo on January 5th, 1883. A number of those on board were burned or drowned.

BRITISH ENDEAVOUR

British Tanker Co.; 1927; *Armstrong Whitworth & Co.*; 4,580 tons; 381-2x50-4x27-6; 422 n.h.p.; 10 knots; triple-expansion engines.

The tanker *British Endeavour*, Capt. T. Weatherhead, was in convoy in the North Atlantic on February 22nd, 1940, when she was torpedoed and sunk by a submarine. Five men were killed.

BRITISH FORTUNE

British Tanker Co.; 1930; *Lithgows*; 4,696 tons; 384-6 X 50-2 X 27-7; 430 n.h.p.; 10 knots; triple-expansion engines.

The tanker *British Fortune*, Capt. J. H. Sloan, was in convoy one mile from Aldeburgh Light Buoy on the East Coast, on October 31st, 1941, when she was bombed and sunk by German aircraft. Eight men were killed.

BRITISH FREEDOM

British Tanker Co.; 1928; *Palmers' Co.*; 6,985 tons; 440-1x57-1x33-9; 654 n.h.p.; oil engines.

The motor tanker *British Freedom* was torpedoed and sunk by a German submarine on January 14th, 1945. She was on a voyage from Halifax to the United Kingdom with 9,700 tons of fuel oil.

BRITISH GENERAL

British Tanker Co.; 1922; *Palmers' Co.*; 6,989 tons; 440x57x34; 640 n.h.p.; 10 knots; turbine engines.

The tanker *British General*, Capt. F. O. Armstrong, was in the North Atlantic on October 6th, 1940, when she was torpedoed and sunk by a submarine. The tanker did not sink until the next day. Capt. Armstrong and 46 men were killed. The *British General* was not in convoy at the time of the attack.

BRITISH GRENADIER

British Tanker Co.; 1922; *Swan, Hunter & Wigham Richardson*; 6,857 tons; 440x57x33-7; 642 n.h.p.; turbine engines.

The tanker *British Grenadier* was torpedoed and sunk by a German submarine on May 22nd, 1941, in approximately 6° N., 13° W. She was on a voyage from Freetown to Curacao.

BRITISH GUNNER

British Tanker Co.; 1922; *Swan, Hunter & Wigham Richardson*; 6,894 tons; 440 X 57x33-7; 642 n.h.p.; turbine engines.

The tanker *British Gunner* was torpedoed and sunk by a German submarine on February 24th, 1941, on a voyage from Swansea to Aruba.

BRITISH INFLUENCE

British Tanker Co.; 1939; *Swan, Hunter & Wigham Richardson*; 8,431 tons; 466-3x61-9x33-9; 687 n.h.p.; oil engines.

The tanker *British Influence* was torpedoed and sunk by a German submarine on September 14th, 1939, W. of Ushant, on a voyage from Abadan to Hull with fuel oil.

BRITISH KING

British Shipowners' Co.; 1891; *Palmers' Co.*; 4,717 tons; 405 X 47-9x27-9; 446 n.h.p.; triple-expansion engines.

The British cargo ship *British King* foundered in March, 1906, about 500 miles off the American coast. She was on a voyage from New York to Antwerp.

BRITISH LIBERTY

British Tanker Co.; 1939; *Furness S.B. Co.*; 8,485 tons; 466-8X 62x33-9; 687 n.h.p.; 11-5 knots; oil engines.

The motor tanker *British Liberty*, Capt. T. Templeton, ran into an Allied minefield about four miles N.E. of Dyck lightship on January 6th, 1940. She fouled one of the mines and sank with the loss of 25 men including Capt. Templeton.

BRITISH MONARCH

Raeburn & Verel; 1923; *Napier & Miller*; 5,661 tons; 420-6x54-2x29-1; 269 n.h.p.; 12 knots; triple-expansion engines. The steamship *British Monarch*, Capt. F. J. Scott, was torpedoed and sunk by a submarine on June 19th, 1940, about 200 miles N.N.W. of Corunna. Capt. Scott and 39 men were killed.

BRITISH NAVY

J. Bounphrey & Co.; 1869; *Liverpool Ship Bldg. Co.*; 1,216 tons; 216X35-5X23-2.

The sailing ship *British Navy*, bound from London to Sydney, N.S. W. was riding out a severe gale in the Downs on November 27th, 1881. The cables of both anchors parted and the ship drifted on to the *Lanarca*, anchored near by. As a result of the collision the *British Navy* sank in a very few minutes with nearly all of those on board.

BRITISH OFFICER

British Tanker Co.; 1922; *Palmers' Co.*; 6,990 tons; 440-2x57-1x33-8; 654 n.h.p.; 10 knots; turbine engines. The tanker *British Officer*, Capt. W. H. Sharp, was entering the Tyne on December 1st, 1940, when she struck a mine. She was taken in tow and beached and was eventually broken up. Fifteen of her crew of 47 were killed by the explosion.

BRITISH PREMIER

British Tanker Co.; 1922; *Palmers' Co.*; 5,872 tons; 400-6X53-7x32-7; 523 n.h.p.; 10 knots; turbine engines. The tanker *British Premier*, Capt. F. Dalziel, was some 200 miles off Freetown, Sierra Leone, on December 24th, 1940, when she was torpedoed and sunk by a submarine. Capt. Dalziel and 31 men were killed.

BRITISH PRINCE

Prince Line; 1914; *Short Bros.*; 5,936 tons; 425x56-4x29-3; 610 n.h.p.; quadruple-expansion engines. The cargo ship *British Prince* was wrecked on November 1st, 1915, on Possession Island. She was on a voyage from Table Bay to Ludentz Bay with a general cargo.

BRITISH PRINCE

Rio Cape Line; 1935; *W. Doxford & Sons*; 4,979 tons; 412-2X54-2x26-1; 388 n.h.p.; oilengines. The British steamship *British Prince* was bombed and sunk by German aircraft on September 26th, 1941, off Spum Head.

BRITISH PRUDENCE

British Tanker Co.; 1939; *Sir J. Laing & Sons*; 8,620 tons; 474-6x62x33-9; 687n.h.p.; oilengines. The tanker *British Prudence* was torpedoed and sunk by a German submarine on March 23rd, 1942, S.E. of Cape Race, on a voyage from Halifax to the Clyde with 12,000 tons of fuel oil.

BRITISH RESOURCE

British Tanker Co.; 1931; *Greenock Dockyard Co.*; 7,209 tons; 440-6x59-4x32-9; 653n.h.p.; 11 knots; oilengines. The motor tanker *British Resource*, Capt. J. Kennedy, was in the North Atlantic on March 14th, 1942, when she was torpedoed by a German submarine. She caught fire and sank. Forty-six men were killed. Capt. Kennedy was among the survivors. The tanker was not in convoy at the time of the attack.

BRITISH SCIENCE

British Tanker Co.; 1931; *Palmers' Co.*; 7,138 tons; 441-2x59-7x33; 687n.h.p.; oilengines. The motor tanker *British Science* was torpedoed and sunk by German aircraft on April 18th, 1941, on a voyage from Haifa to Piraeus.

BRITISH SECURITY

British Tanker Co.; 1937; *Harland & Wolff*; 8,470 tons; 467-8X61-7x33-8; 490n.h.p.; 11 knots; oilengines. The tanker *British Security*, Capt. A. J. Akers, was in the North Atlantic in convoy on May 20th, 1941, when she was torpedoed and sunk by a submarine. Capt. Akers and 52 men were killed.

BRITISH SPLENDOUR

British Tanker Co.; 1931; *Palmers' Co.*; 7,138 tons; 441-2x59-7x33-0; 687n.h.p.; 11 knots; oilengines. The motor tanker *British Splendour*, Capt. J. Hall, was near Cape Hatteras, North Carolina, in company with an escort on April 7th, 1942, when she was torpedoed and sunk by a submarine. Twelve men were killed. Capt. Hall was among the survivors.

BRITISH STANDARD

Frederick Brown; 1910; *W. Pickersgill & Sons*; 3,458 tons; 334-5x49-7x22-6; 318 n.h.p.; triple-expansion engines. The British cargo ship *British Standard* founded on May 25th, 1910, off Cape Frio. She was carrying coal from Cardiff to Rio de Janeiro.

BRITISH TRIUMPH

British Tanker Co.; 1936; *Lithgows*; 4,987 tons; 467-6x61-7'X33-9; 490 n.h.p.; oil engines. The motor tanker *British Triumph*, outward bound from Hull to Aruba, struck a mine and sank on February 12th, 1940, off the Wash.

BRITISH TRUST

British Tanker Co.; 1939; *Harland & Wolff*; 8,466 tons; 467-6x61-7x33-8; 490n.h.p.; 11-5knots; oilengines. The tanker *British Trust*, Capt. J. Hall, was in convoy near Benghazi on May 1st, 1943, when she was bombed and sunk by enemy aircraft. Two European and eight Indian members of the crew were killed. Capt. Hall was among the survivors.

BRITISH UNION

British Tanker Co.; 1927; *Swan, Hunter & Wigham Richardson*; 6,987 tons; 440-1x57x33-9; 749n.h.p.; 11 knots; oilengines. The tanker *British Union*, Capt. L. Athhill, was about 250 miles N.W. of the island of St. Vincent on January 18th, 1941, when she was shelled, torpedoed and sunk by the German raider *Steiermark*. Forty-three of her crew and two gunners were killed, one of the nine survivors picked up dying shortly afterwards. Capt. Athhill was among the survivors. The tanker was not in convoy at the time.

BRITISH VENTURE

British Tanker Co.; 1930; *Lithgows*; 4,696 tons; 384-6x50-2X27-7; 430 n.h.p.; 10 knots; triple-expansion engines. The tanker *British Venture*, Capt. D. C. Barton, was in the Indian Ocean about 300 miles S. of Reunion Island on June 24th, 1943, when she was torpedoed and sunk by a submarine. Twelve Europeans, including Capt. Barton, and 30 Indians were killed. The tanker was not in convoy at the time.

BRITISH VIGILANCE

British Tanker Co.; 1942; *Harland & Wolff, Glasgow*; 8,093 tons; 463-2x61-2x33-1; 490 n.h.p.; 11-5 knots; oilengines. The new motor tanker *British Vigilance*, Capt. E. O. Evans, was in the Atlantic mid-way between the Azores and the West Indies in convoy on January 3rd, 1943, when she was torpedoed and sunk by a German submarine. Twenty-seven men were killed. Capt. Evans was among the survivors.

BRITISH VISCOUNT

Petroleum Steamship Co.; 1889; *Oswald, Mordaunt & Co.*; 3,287 tons; 312x40-4x21-1; 271 n.h.p.; 9 knots; triple-expansion engines. The tanker *British Viscount* was torpedoed and sunk by a submarine 12 miles N. by W. % W. of the Skermes on February 23rd, 1918. Six men were killed. The captain was among the survivors.

BRITISH VISCOUNT

British Tanker Co.; 1921; *Swan, Hunter & Wigham Richardson*; 6,895 tons; 440x57x33-7; 644 n.h.p.; 10 knots; turbine engines. The tanker *British Viscount*, Capt. W. C. Baikie, was in convoy about 350 miles S. of Iceland on April 3rd, 1941, when she was torpedoed and sunk by a submarine. Capt. Baikie and 27 others were killed.

BRITISH WORKMAN

BRITISH WORKMAN

British Tanker Co.; 1922; *Workman Clark & Co.*; 6,994 tons; 440-4x57x33-9; 605 n.h.p.; 11-5 knots; turbine engines. The tanker *British Workman*, Capt. A. W. Wilson, was in the North Atlantic on May 3rd, 1942, when she was torpedoed and sunk by a German submarine. Seven men were killed. Capt. Wilson was among the survivors. The tanker had straggled from her convoy.

BRITISH YEOMAN

British Tanker Co.; 1923; *Palmers'Co.*; 6,990 tons; 440x57-1 X33-8; 654 n.h.p.; 10 knots; turbine engines. The tanker *British Yeoman*, Capt. E. P. S. Attewill, was in the Atlantic some hundreds of miles off Rio de Oro, N.W. Africa, on July 14th, 1942, when she was torpedoed and sunk by a submarine. Capt. Attewill and 42 of the crew were killed. Ten survivors were landed. The tanker was not in convoy at the time.

BRITOMART

British Navy, fleet-minesweeper; 1938; *Devonport Dockyard*; 875 tons; 230x33-5x7-9; 1,750 i.h.p.; 17 knots; turbine engines; 3-drum boilers; two 4 in. A.A. guns, 5 smaller. The fleet-minesweepers *Britomart* and *Hussar* were the victims of an attack by Allied aircraft off Cap d'Antifer on August 27th, 1944. Both ships were mistaken for enemy light craft and were bombed and sunk. *Britomart*, which was commanded by Lt. Cdr. J. A. Galvin, D.S.C., R.D., R.N.R., went down with Cdr. Galvin and another officer and 20 ratings.

BRITSUM

Stoomv. Maats. Oostzee; 1929; *Van der Giessen*; 5,255 tons; 421-2x56-2x26-4; 549 n.h.p.; quadruple-expansion engines. The Dutch steamship *Britsum*, bound from Hull to Fowey, was bombed by German aircraft and set on fire off Selsey. The attack took place on July 4th, 1940, and the steamship was beached near Selsey Bill on the following day and became a total wreck. Nine of her crew were lost.

BRITTA

Dampsk. Akties. Bestum; 1889; *J. L. Thompson & Sons*; 2,061 tons; 284X 38-1x18-2; 209 n.h.p.; triple-expansion engines. The Norwegian steamship *Britta* was torpedoed and sunk by a German submarine in the Bay of Biscay on March 30th, 1917.

BRITTA

RederiA/MScot; 1928; *HelsingorsJernsk&Msk.*; 6,214 tons; 407-8x54-7x32-5; 542 n.h.p.; oil engines. The Norwegian motorship *Britta* was torpedoed and sunk by a German submarine on December 6th, 1939, 50 miles S.W. of Lands End. Six of her crew were killed.

BRITTA

J.Lauritzen; 1921; *Schiffb. Ges. Unterweser*; 1,146 tons; 231-5 x 34 • 6 x 14' 1; 141 n.h.p.; compound engines. The Danish steamship *Britta* was torpedoed and sunk by a German submarine on March 25th, 1940, 45 miles N. of Sule Skeny.

BRITTANY

D. MacIver & Co.; 1898; *Richardson, Duck & Co.*; 2,926 tons; 330-3x43x16-6; 307 n.h.p.; triple-expansion engines. The British freighter *Brittany* was sunk in a collision on February 5th, 1918, in 55° 50' N., 8° 3' W. She was sailing from the Clyde to Buenos Aires with a general cargo.

BRITTANY

Royal Mail S.P. Co.; 1928; *A. McMillan & Son*; 4,772 tons; 400-4x55-2x25-7; 646 n.h.p.; oil engines. The motorship *Brittany* was torpedoed and sunk by a German submarine on October 29th, 1942, on a voyage from Freetown to Liverpool. Fifteen of her crew were killed.

BROAD ARROW

Socoy-Vacuum Oil Co.; 1918; *New York S.B. Corp.*; 7,718 tons; 467-6x62-7x32; 3,200 i.h.p.; 11 knots; quadruple-expansion engines. The American tanker *Broad Arrow*, Capt. Percy L. Mounter, was

in convoy 80 miles E. of Dutch Guiana on January 8th, 1943, when she was torpedoed and sunk by a submarine. Capt. Mounter and 15 men were killed and two were wounded.

BROADWATER

British Navy, destroyer; 1919; *Bethlehem Shipbuilding Corp.*; 1,190 tons; 311x30-7x9-2; 27,000s.h.p.; 35 knots; turbine engines; four 4 in. guns, one 3 in. A.A.; 12 T.T. The destroyer *Broadwater* was formerly the U.S.S. *Mason* and was transferred to the British Navy under the Lease-Lend agreement in September 1940. On October 18th, 1941, when under command of Lt. Cdr. W. A. L. Astwood, the vessel was torpedoed and sunk by a submarine in the North Western Approaches whilst performing escort duties. She sank with the loss of four officers and 41 ratings.

BROCKLEY HILL

Counties Ship Management Co.; 1919; *Laird & Co.*; 5,297 tons; 400-1x52-3x28-5; 517 n.h.p.; triple-expansion engines. The British steamship *Brockley Hill* was torpedoed and sunk by a German submarine on June 24th, 1941, S.W. of Iceland, on a voyage from Montreal to London.

BRODE

Rederi Akties. Damp.; 1905; *Craig, Taylor & Co.*; 2,363 tons; 306X 44-2X 20-1; 242 n.h.p.; triple-expansion engines. The Norwegian steamship *Erode* was sunk by a German submarine in the Bay of Biscay on March 19th, 1917.

BRODFIELD

Blue Star Line; 1899; *Hawthorn Leslie & Co.*; 5,685 tons; 420-4x54x28-6; 569 n.h.p.; triple-expansion engines. The British steamship *Brodfield* was wrecked on November 13th, 1916, near Church Point, Scilly.

BRODLAND

Blue Star Line; 1891; *Craig, Taylor & Co.*; 2,989 tons; 310X 41-2x17-8; 272 h.p.; triple-expansion engines. The British cargo ship *Brodlan* was wrecked on January 20th, 1913, on Aberavon Beach. She was on a voyage from Port Talbot to Punta Arenas with a cargo of coal.

BRODSTONE

Brodstone Steamship Co. (Blue Star Line); 1896; *Chas. Cornell & Co.*; 4,927 tons; 400-4x48-2x29; 485 n.h.p.; 11 knots; triple-expansion engines. The steamship *Brodstone* was torpedoed and sunk by a submarine 95 miles W. i S. of Ushant on August 15th, 1917. Five men were killed. The captain was among the survivors.

BROKE

British Navy, destroyer; 1920; *Thornycroft & Co.*; 1,480 tons; 329x31-7x14-7; 40,000 s.h.p.; 36 knots; turbine engines; Thornycroft boilers; five 4 • 7 in. guns, one 3 in. A.A., two 2 pdr.; 5m.g.; 6 T.T.

The destroyer *Broke*, Capt. Fancourt, and *Malcolm*, 1,530 tons, participated in the landing at Algiers on November 8th, 1942. The vessels had embarked a combat team of the U.S. 135th Regiment at Gibraltar and at 2.20 a.m. on the 8th were off Algiers with the intention of breaking the defence-boom at the entrance to the harbour. At their first attempt both ships missed the boom and their presence was discovered by French searchlights. They were immediately subjected to heavy fire from the French shore batteries and *Malcolm* suffered severe casualties and was disabled. *Broke* then made another attempt upon the boom, but this also failed. At her third attempt she got through and ran down the harbour to the Quai de Falaise, on the Mole Louis Billiard, where she landed her troops.

The French fire was intense and the troops could not move beyond the quay and most of them became prisoners. *Broke* was compelled to retire, covered by a smoke-screen laid by the destroyer *Zetland*, which later took her in tow. The damage was too extensive for *Broke* to be saved, however, and she sank on the 10th. Of those on board two officers were wounded and nine ratings were killed.

BRONXVILLE

Skibs A/S Sjostad; 1929; *Odense Staalskibs.*; 4,663 tons; 386-3x54-2x25-7; 487 n.h.p.; oil engines.
The Norwegian motorship *Bronxville* was torpedoed and sunk by a German submarine on August 31st, 1942, in the North Atlantic.

BROOK

Stephenson, Clarke & Co.; 1906; *S. P. Austin & Son*; 1,436 tons; 248x36'3x15-9; 160 n.h.p.; triple-expansion engines.
On February 10th, 1924 the collier *Brook* was in collision and sank 2 1/2 miles from Shipwash lightship.

BROOKLANDS

R. Hardy & Co.; 1882; *W. Gray & Co.*; 1,096 tons; 234-1x31•6x14•9; 99 h.p.; compound engines.
In December, 1893, the British collier *Brooklands* was on a voyage from Bo'ness to Copenhagen with a cargo of coal when she went aground and was wrecked W. of the Scaw.

BROOKLYN

Mississippi & Dominion S.S. Co.; 1869; *Glasgow*; 4,215 tons; 354'4x42-5x33-1; 480 h.p.; compound inverted engines.
The British cargo ship *Brooklyn* was wrecked on November 8th, 1885, on Anticosti Island while on a voyage from Liverpool to Quebec.

BROOMFLEET

Ebor S.S. Co.; 1915; *W. Harkess & Son*; 854 tons; 198-1x30-7x12-4; 97 r.h.p.; triple-expansion engines.
The *Broomfleet*, Capt. Hutchinson, was carrying coal from Goole to Ipswich. She left Goole on December 13th, 1933, but was not seen again. Several bodies were washed ashore.

BROOMHAUGH

Dunford & Elliott; 1881; *C. S. Swan & Hunter*; 1,997 tons; 286-4x36-1x24-4; 221 n.h.p.; compound engines.
The British iron cargo ship *Broomhaugh* was wrecked in January, 1903, at Vinga near Gothenburg. She was on a voyage from Stettin to the Tyne.

BROWNING

Lampert & Holt Line; 1919; *A. McMillan & Son*; 5,332 tons; 400-8x52-2x28-5; 517 n.h.p.; triple-expansion engines.
The British steamship *Browning* was torpedoed and sunk by a German submarine on November 12th, 1942, off Oran. She blew up when the torpedo struck.

BROWNSON

United States Navy, destroyer; 1942; *Bethlehem Co., Staten Island*; 2,050 tons; 376-5x39-5x12-2; 60,000 s.h.p.; 36-5 knots; turbine engines; five 5 in. guns, four 40 mm., four 20 mm.; 10 T.T.
The destroyer *Brownson* was commissioned in February, 1942, and was a unit of the American force operating in the South-West Pacific. On December 26th, 1943 the Americans subjected the Japanese positions at Cape Gloucester, New Britain, to a heavy naval bombardment followed by an air bombardment of great intensity. The attack from the sea commenced at 6 a.m. and after the warships and aircraft had performed their allotted tasks U.S. marines made landings on either side of Cape Gloucester and overcame all Japanese resistance in the immediate vicinity. During the fighting the *Brownson* was hit and sunk by Japanese bombers. She was the only American ship lost. Survivors numbered 208.

Thirty-six Japanese bombers and 25 fighters were shot down for a loss of seven American aircraft.

BRUGES

Armement Deppe; 1904; *J. C. Tecklenborg A.G.*; 4,984 tons; 400-9x52-2x20-2; 500 n.h.p.; quadruple-expansion engines.
The Belgian steamship *Bruges*, on a voyage from Montevideo to Hull, was intercepted by the German raider *Veracruz* on July 10th, 1940, and sunk by gunfire. The survivors picked up by the raider were taken to Germany as prisoners of war.

BRUISER

General Steam Navigation Co.; 1857; *British Isles*; 506 tons; 189-3x25-5x—; 80 n.h.p.; 11 knots; compound engines.
The steamship *Bruiser*, Capt. Hartly, was bound from Hull to London having on board a crew of 19 and 109 passengers. At about half-past two on the morning of Sunday, August 19th, 1866, the ship was run down by the steam-collier *Haswell*, Capt. Chase. The night was calm and clear and the lights of both ships were distinctly visible. The *Bruiser* was struck on the starboard side, abreast her engine-room, the impact being so terrific that for a short time there was a danger that both ships would founder. The *Haswell* then backed away, having taken 99 of the *Bruiser's* people on board and the latter ship sank by the stern. The collier lowered her boats and remained about the spot for some three hours, after which she proceeded to London.

In addition to those saved by the *Haswell* a number were picked up by the schooner *Perseverance*, among them Capt. Hartly who was the last to leave the ship. The number of persons drowned was 15.

BRUMAIRE

Societe des Transp. Mar. Petroliers; 1930; *Ch. et Atel. de St. Nazaire (Penhoet)*; 7,638 tons; 427-3x58-7x33-8; 206 n.h.p.; compound engines.
The French tanker *Brumaire* was bombed and sunk by German aircraft on June 20th, 1940, off Belle He, outward bound from Brest.

BRUNO HEINEMANN

German Navy, destroyer; 1936; *Germania Yard*; 1,625 tons; 374x37x9-3; 50,000 s.h.p.; 36 knots; turbine engines; five 5 in. guns, four 37 mm.; 8 T.T.
The German destroyer *Bruno Heinemann* was bombed and sunk by aircraft from a British aircraft carrier off Narvik in April, 1940. The vessel carried a complement of 283.

BRUNSWICK

Crosby, Magee & Co.; 1881; *W. Pickersgill & Sons*; 1,389 tons; 246x33x18; 130 h.p.; compound engines.
The British freighter *Brunswick* was wrecked in October, 1895, at Bilbao. She was starting a voyage to Middlesbrough with a cargo of ore.

BRUXELLES

Armement Deppe; 1919; *Bartram & Sons*; 5,085 tons; 400-3x52-3x28-5; 369 n.h.p.; triple-expansion engines.
The Belgian steamship *Bruxelles* was torpedoed and sunk by a German submarine on June 8th, 1942, in the Gulf of Mexico.

BRUYERE

Lampert & Holt Line; 1919; *A. McMillan & Son*; 5,335 tons; 400-9x52-3x28-5; 517 n.h.p.; triple-expansion engines.
The British steamship *Bruyere* was torpedoed and sunk by a German submarine on September 23rd, 1942, on a voyage from Buenos Aires to Freetown.

BUARQUE

Lloyd Brasileiro; 1919; *American International S.B. Corp.*; 5,152 tons; 390x54-2x28; turbine engines.
The Brazilian steamship *Buarque* was torpedoed and sunk by a German submarine on February 15th, 1942, off the U.S. Atlantic Coast.

BUCCARI

"Corrado" Soc. Anon. di Nav.; 1925; *Lithgows*; 4,543 tons; 397-5x52x26-6; 437 n.h.p.; triple-expansion engines.
The Italian steamship *Buccari* was sunk by torpedo or mine on June 20th, 1941, off Taranto.

BUCHANAN

U.S. Maritime Commission; 1939; *Odense Staalskibsvft. ved A.P. Moller*; 5,614 tons; 439x57-7x24-4; 731 n.h.p.; oil engines.
The motorship *Buchanan* was torpedoed and sunk by a German submarine on November 12th, 1942, on a voyage from New York to Liverpool.

BUCK

United States Navy, destroyer; 1939; Philadelphia Navy Yard; 1,630 tons; 348x35-3x10-2; 44,000 s.h.p.; 36-5 knots; turbine engines; Express boilers; four 5 in. guns, ten smaller; 5 T.T. The United States destroyer *Buck* was operating with the British and American forces covering the landing at Salerno in September and October, 1943. On October 9th the destroyer was torpedoed and sunk by a submarine. Her normal complement was 210.

BUCKEYE

Mississippi River steamboat.
The Mississippi River steamboat *Buckeye* was run down by another steamboat on the night of March 1st, 1844. Owing to the fact that no exact roll of passengers was kept it was extremely difficult to account for all on board at the time. It was variously estimated that from 50 to 80 lives were lost.

BUCKINGHAM

Raeburn & Verel; 1891; W. Gray & Co.; 2,879 tons; 314-3x40-5x20-6; 258 n.h.p.; triple-expansion engines.
The British cargo ship *Buckingham* was wrecked in December, 1904, on Roncador Reef while on a voyage from Baltimore to Boca del toro.

BUCKINGHAMSHIRE

Thacker & Mangell; 1816; Bombay; 1,369 tons; 240x—X—. The Indianman *Buckinghamshire* was originally one of the East India Company's fleet, but when a large number of the ships were sold out of the service between 1831 and 1834 she was disposed of to Messrs. Thacker & Mangell for £10,500. On Thursday, March 1st, 1851, the ship left Calcutta for England under Capt. McGregor, with a crew of 100, of whom 30 were Europeans and 70 Lascars. The passengers were made up of 70 soldiers of the 80th Foot and their families, many of the men being invalids, and 33 cabin passengers. The run down the Hooghly was accomplished in fair weather and on Monday, the 4th, the ship lay to for the night off Canterbury Point and dropped the pilot. The passengers and soldiers were singing and dancing when at about 10 p.m. a fire was discovered amongst the cargo of jute, and the pumps were at once manned.

Unfortunately there was some panic among the soldiers and passengers, but the captain managed to persuade the soldiers to fight the fire, though not before seven of them had been drowned through jumping overboard. The *Buckinghamshire* continued to fire a signal gun and attracted a steamer which took off most of the passengers. The fire had by now taken firm hold on the fore part of the ship up to the mainmast, the wreck ultimately drifting ashore where the remainder of those on board were taken off.

The only persons lost were the seven soldiers previously mentioned.

BUENAVENTURA

United States Steel Products Co.; 1913; Northumberland S.B. Co.; 4,881 tons; 405x52-4x27-4; 531 n.h.p.; triple-expansion engines.
The American steamship *Buenaventura* was torpedoed and sunk by a German submarine in the Atlantic on September 16th, 1918.

BUENOS AIRES

Hamburg-Süd-Amerikanische Dampfschiff. Ges.; 1912; Flensburg Schiffsb. Ges.; 6,097 tons; 449-2x58-2x26-8; 751 n.h.p.; triple-expansion engines.
The steamship *Buenos Aires* was torpedoed and sunk by the submarine *Narwhal* on May 1st, 1940, off Laeso Sandbank, Denmark.

BUENOS AIRES MARU

Osaka Shosen K.K.; 1929; Mitsubishi Zosen Kaisha; 9,625 tons; 461-3x62x39-5; 1,503 n.h.p.; oil engines.
The motor vessel *Buenos Aires Maru* was bombed and sunk by a U.S. aircraft on November 27th, 1943, off St. Matthias Island.

BUESTEN

Tonsbergs Rederi A/S; 1927; Barclay, Curie & Co.; 5,187 tons; 388-1x52-7x29; 482 n.h.p.; oil engines.
The Norwegian tanker *Buesten*, loaded with benzine, was bombed by German aircraft, set on fire and sunk on April 9th, 1941, four miles from Bery Head. Twenty-eight of her crew lost their lives.

BUFFALO

British Navy, convict ship; 1813; Calcutta; 589 tons; 135x33-9x15-8; six 18 pdr. guns, two 6 pdr.
The sailing ship *Buffalo* was employed to carry convicts and cargo from England to Australia, Tasmania and New Zealand. On July 25th, 1840, the vessel, under command of Mr. James Wood, sailed from Mercury Bay, North Island, New Zealand, with a detachment of the 80th Foot Regiment, and a cargo of kauri wood. The weather was bad and by the 28th *Buffalo* was experiencing the full force of the gale and was blown ashore near Whitianga, North Island.
Of her crew of 93, two seamen were drowned, but all the soldiers and other passengers were saved.
The wreck subsided off shore until it was eventually buried, but in May 1960, following upon tidal waves set up by earthquakes in Chili, the hull of the ship was washed to the surface and some of her fittings were salvaged after being submerged for 120 years.

BUFFALO

J. Little & Sons; 1866; Thames Ironworks; 286 tons; 157-2x21-7x11-9; S.O.r.h.p.; 8-5 knots; compound engines.
The small steamship *Buffalo* was torpedoed and sunk by a submarine off Corsewall Point on September 13th, 1918. The captain and nine men were killed.

BUJO MARU

Toa Kaiun K.K.; 2,270 tons.
The *Bujo Mam* was sunk by U.S. carrier-based aircraft on October 12th, 1944, off Kaohsiung, Formosa.

BUJUN MARU

Dairen Kisen K.K.; 1929; Osaka Iron Works; 4,804 tons; 371x51x29; 346 n.h.p.; triple-expansion engines.
The steamship *Bujun (Buzyun) Maru* was torpedoed and sunk by the U.S. submarine *Skipjack* on May 8th, 1942, off Camranh Bay, Indo-China.

BULGARIAN

Ellerman Lines; 1891; W. Doxford & Sons; 2,515 tons; 312x39x23-5; 305 n.h.p.; 11 knots; triple-expansion engines.
The steamship *Bulgarian* was torpedoed and sunk by a submarine in the Atlantic on January 20th, 1917. The captain and 13 others were killed. Nine of the crew were taken prisoner.

BULLDOG

British Navy, steam sloop; 1,124 tons; 500 n.h.p.; steam engines; six guns.
The paddle sloop *Bulldog*, Capt. Charles Wake, was a unit of the North American and West Indies Squadron in 1865. A revolution in the republic of Hayti was in progress, and the sloop was keeping watch over British interests in those waters. On October 22nd, 1865, the steamship *Valorogue* belonging to the rebels fired into a British Jamaica Packet within sight of *Bulldog*. The captain of the Haytian ship was warned that, unless he ceased firing, he would be sunk. He thereupon turned away for Cape Haytien.

The leader of the rebellion, Sylvestre Salnave, retaliated by ordering the arrest of several fugitives in the British Consulate at Cape Haytien. On the morning of the 23rd Capt. Wake demanded satisfaction for this high handed action. His demand was refused and he opened fire on the shore batteries. Later he attempted to ram the *Valorogue*, but failed to do so and the sloop ran aground. Nevertheless she was able to maintain her fire and at 9.45 a.m. sank the rebel steamer. At the same time she continued to engage the batteries.

An attempt by the U.S. warship *De Soto* to tow the sloop off having failed, Wake gave orders to abandon ship as nearly all his ammunition had been expended. *Bulldog* was set on fire and shortly afterwards blew up. Of her ship's company of 175 there were three killed and ten wounded. The survivors were taken off by the American and other ships standing by.

Wake and his navigating officer were tried by court martial and severely reprimanded for running the sloop aground. This sentence was considered unduly harsh by public opinion, as Wake had acted in defence of British interests. He was re-employed later, and rose to the rank of vice-admiral.

BULLEN

British Navy frigate; 1943; United States; 1,500 tons; 306 x 36x—; 12,000 s.h.p.; 23 knots; turbine engines; three 3 in. guns, two 40 mm., four 20 mm.

The frigate *Sullen*, Lt. Cdr. A. H. Parish, was torpedoed and sunk by a submarine off Cape Wrath on December 6th, 1945. Six officers, including Lt. Cdr. Parish, and 65 ratings were killed.

BULLMOUTH

Anglo-Saxon Petroleum Co.; 1927; Hawthorn, Leslie & Co.; 7,519 tons; 440-3x59-5x32-7; 4,000 b.h.p.; 11-5 knots; oil engines.

The tanker *Bullmouth*, Capt. J. W. Brougham, was torpedoed and sunk by a German submarine on October 29th, 1942, about 100 miles N.W. of Madeira. Forty-seven of her crew of 54, including the captain, were killed.

BULWARK

British Navy, 1st class battleship; 1902; Devonport Dockyard; 15,000 tons; 430x75x29; 15,000 i.h.p.; 18-5 knots; triple-expansion engines; Belleville boilers; four 12 in. guns, twelve 6 in., sixteen 12 pdr., six 3 pdr., 2 m.g.; 4 T. T.

The battleship, *Bulwark*, Capt. G. L. Sclater, was a unit of the 5th Battle Squadron, which formed part of the Channel Fleet during the First World War. The ship had a complement of 750 officers and men. On November 15th, 1914, the squadron arrived at Sheerness and on the 26th *Bulwark* was engaged in taking ammunition on board, when she blew up. Only 12 were saved.

An Admiralty Court endeavoured to ascertain the cause of the disaster from the meagre evidence placed before it, but was finally compelled to state that it could not account for the explosion.

BULYSESSES

Anglo-Saxon Petroleum Co.; 1927; Hawthorn, Leslie & Co.; 7,519 tons; 440-3x59-5x32-7; 602 n.h.p.; oil engines.

The motor tanker *Bulysses* was torpedoed and sunk by a German submarine on September 10th, 1941, on a voyage from New York to Manchester with gas oil.

BUNGESBERG

Aug. Bolten, Wm. Millers Nachfolger; 1924; Howaldtswerke; 1,504 tons; 250-8x38-5x15-9; 143 n.h.p.; triple-expansion engines.

The German steamship *Bungesberg* struck a mine and sank on March 25th, 1943, W. of Tallinn.

BUNZAN MARU

Miyachi Kisen K.K.; 1,990 tons.

The *Bunzan Maru* was sunk by U.S. land-based aircraft on October 16th, 1944, 50 miles S.E. of Hong Kong.

BUR

Rederiaktieb. "Bur"; 1901; Grangemouth & Greenock Dockyard Co.; 1,806 tons; 270-1x40-6x18-3; 181 n.h.p.; triple-expansion engines.

The Swedish steamship *Bur* was torpedoed and sunk by a German submarine in the North Sea on November 2nd, 1917.

BURBRIDGE

Burdick & Cook; 1912; Richardson, Duck & Co.; 3,505 tons; 360x50x21-3; 321 h.p.; triple-expansion engines.

The British cargo ship *Burbridge* was wrecked on December 29th, 1914, on Almadí Reef. She was on a voyage from Beira to London.

BURDWAN

Ham S.S. Co.; 1928; Barclay, Curie & Co.; 6,069 tons; 436x 57-5x29-8; 1,237h.p.; quadruple-expansion engines & L.P. turbine.

The British steamship *Burdwan* was bombed by German aircraft on June 15th, 1942, and severely damaged 35 miles south of Pantelaria Island. She was afterwards sunk by British naval ships.

BURE

Akties. Ganger Rolf; 1914; Nylands Vcerksted; 1,151 tons; 228-9X36-2X15-8; 107n.h.p.; triple-expansion engines.

The Norwegian steamship *Bure* was torpedoed and sunk by a German submarine in the North Sea on June 9th, 1916.

BURGENLAND

Hamburg-AmerikaLine; 1928; Flensburg S.B. Co.; 7,320 tons; 462-6x61-2x25-3; 790n.h.p.; 13 knots; oilengines.

The German blockade runner *Burgenland* was engaged in carrying cargoes of rubber, tin and wolfram from the Far East to Germany. The United States Fourth Fleet under command of Vice-Admiral J. H. Ingram, was largely concerned in the capture of these ships in the Atlantic Narrows between Ascension Islands and Caravellas in Brazil. This was an enormous area of sea, nevertheless the Americans were most successful in their search.

The *Burgenland* was intercepted on January 5th, 1944, by the U.S. light cruiser *Omaha*, 7,050 tons, ten 6 in. guns. The German steamship attempted to escape, but was shelled by the cruiser and compelled to stop. She was then scuttled by her crew. The cruiser took off 150 passengers and crew. One man was killed.

The *Weserland* was captured and sunk by the U.S. destroyer *Somers* on January 3rd. The *Rio Grande* was captured and sunk by the *Omaha* and the U.S. destroyer *Jouett* on January 4th. This disposed of the blockade running fleet. There was some small loss of life on the German side when these captures were effected.

BURMA

Bennett S.S. Co.; 1891; S. P. Austin & Son; 706 tons; 203-3X 30-1x13-5; 153n.h.p.; triple-expansion engines.

The British steamship *Burma* struck a mine and sank on June 23rd, 1916, five miles N. by E. E. from the Shipwash lightship. Seven of the crew were killed.

BURMA MARU

Nanyo Kaiun K.K.; 1917; Kawasaki Dockyard Co.; 4,584 tons; 385x51x28; 391 n.h.p.; triple-expansion engines.

The steamship *Burma Maru* was torpedoed and sunk by the U.S. submarine *Swordfish* on June 12th, 1942, off Cap St. Jacques, Indo-China.

BURNS

Glover Brothers; 1882; E. Withy & Co.; 2,193 tons; 285x36 X24•1; 240h.p.; compound inverted engines.

The British freighter *Burns* was wrecked on October 7th, 1883, near Suakim. She was on a voyage from Bussorah to London.

BURNSTONE

Alexander Bros.; 1903; Craig, Taylor & Co.; 2,340 tons; 305-8 X44-2x20; 243 n.h.p.; 9-5 knots; triple-expansion engines.

The steamship *Burnstone* was torpedoed and sunk by a submarine 44 miles N. of the Fam Islands on March 19th, 1918. Five men were killed. The captain was among the survivors.

BURUTU

British & African S.N. Co.; 1902; A. Stephen & Sons; 3,902 tons; 360x44-2x14-3; 525 n.h.p.; triple-expansion engines.

The British steamship *Burutu* was sunk in a collision on October 3rd, 1918, north of Padstow. She was on a voyage from the W. coast of Africa to Liverpool.

BUSBY

Sir R. Ropner & Co.; 1894; Ropner & Son; 3,276 tons; 329-6x 43x18-5; 300 h.p.; triple-expansion engines.

The British steamship *Busby* foundered in July, 1894, off Pendeen, Cornwall, while carrying coal from Newport to Civita Vecchia.

BUSH

United States Navy, destroyer; 1942; Bethlehem Steel Co., San Francisco; 2,050 tons; 376-5x39-3x12-2; 60,000s.h.p.; 36-5 knots; turbine engines; Babcock & Wilcox boilers; five 5 in. guns, four 40 mm., four 20 mm.; 10 T.T.

The United States destroyer *Bush* was attacked by Japanese aircraft off Okinawa on April 6th, 1945. The vessel, which carried a complement of over 250, was hit and sunk.

BUSHO MARU

Osaka Shosen K.K.; 1921; Osaka Iron Works; 2,552 tons; 284-5x42-5x23; 288 n.h.p.; triple-expansion engines.

The steamship *Busho* (*Busyd*) *Maru* was taken over by the Japanese Navy and converted into an auxiliary gunboat. On January 26th, 1944, she was torpedoed and sunk by the U.S. submarine *Crevall* about 250 miles S.E. of Saigon.

BUSHRANGER

BUSHRANGER

U.S. Maritime Commission; 1922; F. L. Thompson & Sons; 4,536 tons; 376-8x52-8x24-3; 357 n.h.p.; triple-expansion engines.

The Panamanian steamship *Bushranger* was torpedoed and sunk by a German submarine on May 31st, 1942, on a voyage from St. Thomas, W.I. to New York. The captain and 16 of her crew were killed.

BUSHROD WASHINGTON

U.S. War Shipping Administration; 1943; Bethlehem-Fairfield Shipyard, Baltimore; 7,191 tons; 423x57-1x34-8; 339n.h.p.; 11 knots; triple-expansion engines.

The American cargo ship *Bushrod Washington*, Capt. J.M. Wainwright, served as a transport during the Salerno campaign. On September 15th, 1943, she was lying in Salerno Bay when she was attacked by bombers. She was hit and sunk, with a loss of 18 men killed and 12 wounded. Capt. Wainwright was among the survivors.

BUSHU MARU

Takasaga Shoji Kabushiki Kaisha; 1895; Blyth S.B. Co.; 2,656 tons; 314x40-1x17-9; 246 n.h.p.; triple-expansion engines.

The steamship *Bushu Mam* left Dairen on December 24th, 1921, for Takao. She was never seen again and is believed to have been lost in a storm near the Pescadores Islands.

BUSHU MARU

Hinode Risen K.K.; 1918; Asano Zosensho; 1,222 tons; 217 x34x!8-5; 114 n.h.p.; triple-expansion engines.

The steamship *Bushu (Busyu) Mam* was torpedoed and sunk by the U.S. submarine *Barbel* on September 25th, 1944, at the northern extremity of the Ryukyu Islands.

BUSSORAH

J. & P. Hutchinson; 1881; Sunderland S.B. Co.; 1,926 tons; 268-2x35'2x20-5; 176n.h.p.; compound engines.

The British cargo ship *Bussorah* was wrecked in May, 1903, near Sarlskar, N. of Åland. She was carrying a cargo of wood from Sundsvall to Manchester.

BUSSUM

Stoomv. Moats. "Oostzee"; 1917; L. Vuijk&Zonen; 3,636 tons; 360x48-2x22-8; 342n.h.p.; triple-expansion engines.

The Dutch steamship *Bussum* was torpedoed and sunk by a German submarine on November 23rd, 1940, in the North Atlantic.

BUTESHIRE

Moor Line; 1877; W. Hamilton & Co.; 1,368 tons; 260-3x32-3x22-7; 140 h.p.; compound engines.

The British freighter *Buteshire* was wrecked in November, 1897, E. of Hafringe lighthouse, Sweden, while on a voyage from Swine-munde to Oxelosund.

BUTETOWN

Town Line (London) Ltd.; 1890; J. R. Oswald & Co.; 1,594 tons; 249-9x32-3x17-9; 191 n.h.p.; triple-expansion engines.

The *Butetown* was wrecked on December 4th, 1917, at Cullercoats. She was on a voyage from Blyth to Fredriksstad with a cargo of coal.

BUTTERFLY

Industrie Navali Soc. Anon.; 1920; Bartram & Sons; 5,127 tons; 412-9x52-3x28-5; 476n.h.p.; triple-expansion engines.

The Italian steamer *Butterfly* was intercepted by Allied warships and sunk by gunfire on April 28th, 1943, off St. Nazaire.

BUXTON

Deddington S.S. Co.; 1906; W. Gray & Co.; 3,142 tons; 331-2x47-6x22-4; 277 n.h.p.; triple-expansion engines.

The British cargo ship *Buxton* was wrecked on October 12th, 1916, on Bear Island. She was carrying a cargo of timber from Archangel to Rouen.

BUYO MARU

Tamai Shosen K.K.; 1919; Asano S.B. Co.; 5,447 tons; 400 X53'2x29-4; 513 n.h.p.; triple-expansion engines.

The steamship *Buyo Mam* was torpedoed and sunk by the U.S. submarine *Wahoo* on January 26th, 1943, about 300 miles N. of New Guinea.

BYGDO

Akties. Ronald; 1887; E. Withy & Co.; 2,345 tons; 289-8x38-1x19; 210 n.h.p.; triple-expansion engines.

The Norwegian steamship *Bygdo* struck a mine and sank in the North Sea on October 27th, 1916.

BYRON D. BENSON

Tide Water Associated Oil Co.; 1922; Oscar Daniels Co.; 7,953 tons; 465-4x60-2x36; 596n.h.p.; quadruple-expansion engines.

The American steamship *Byron D. Benson* was torpedoed and set on fire by a German submarine on April 4th, 1942, on a voyage from Port Arthur to New York. The ship sank some days later. Nine of her crew were killed.

BYZANTIN

Fraissinet Co.; 1854; La Seyne; 906 tons; 177x35x21; 140 n.h.p.; 10 knots; steam engines.

The French passenger steamship *Byzantin* was bound from Marseilles to Constantinople with some 260 persons on board. When approaching Gallipoli she ran into a storm which had been raging for several days. At about one o'clock on the afternoon of December 18th, 1878, when off Lampsaki, the *Byzantin* endeavoured to come to anchor near the British steamship *Rinaldo*, 1,660 tons, which was lying with two anchors down awaiting her bill of health from shore. The violence of the gale swept the French ship across the bows of the *Rinaldo*, with which she collided.

Meanwhile a large number of passengers had assembled on deck, many of them rendered helpless by fear. The captain of the *Rinaldo* called upon these people to jump on to his ship, and this a number of them did. The vessels then separated and within five minutes the *Byzantin* foundered, taking with her about 150 persons.

The *Rinaldo* lowered her boats, but they were blown out to sea without being able to render any aid to the drowning. The number saved by the *Rinaldo* was 94. Later H.M.S. *Flamingo* went in search of the missing boats, which she recovered. The steamship *Vindomara* picked up five survivors in the Dardanelles, and a boat containing three officers and 11 of the crew was also picked up.

The *Rinaldo* was able to reach Constantinople, where she landed the survivors, and underwent repairs.

C. DE EIZAGUIRRE

Cia. Trasatlantica; 1904; Sir R. Dixon & Co.; 4,376 tons; 375-3x47x23-2; 589 n.h.p.; 12-5 knots; triple-expansion engines.

The *C. de Eizaguirre* left Barcelona on April 23rd, 1917, for Manila by way of the Cape. She carried just over 150 passengers and crew. Her voyage as far as the Cape was uneventful and on the night of May 25th she was steaming at reduced speed for Table Bay. The weather was bad with torrents of rain and a heavy sea. At about 3 a.m. on the next day when off Robben Island there was a terrific explosion. The passengers were asleep below and there was hardly time for them to hurry on deck before the vessel broke her back, and with bow and stern pointing into the air plunged beneath the waves.

The whole disaster occupied only five minutes, during which time frantic efforts were made to launch the boats. Only one, in which there were 23 persons, got away; later the chief engineer was picked up on a raft. These 24 were all that remained of the liner's company.

The cause of the disaster was found to be a mine sown by the German raider *WolfsonG* weeks previously.

C. F. LILJEVALCH

Trafikaktieb. Grängesberg-Oxelosund; 1920; Gotaverken; 5,492 tons; 394-4x52-2x30-8; 430 n.h.p.; triple-expansion engines.
The Swedish steamship *C. F. Liljevalch* was torpedoed and sunk by a Russian submarine on August 17th, 1942, one mile S. of Kungsgrund, Sweden.

C. J. BARKDULL

Standard Oil Co. of New Jersey; 1917; Union Iron Works Co.; 6,773 tons; 435x56x32; 3,140 s.h.p.; 11-2 knots; turbine engines.

The American tanker *C. J. Barkdull*, Capt. Chester S. Swanner, sailing under the Panamanian flag, left New York in a convoy of 45 vessels on December 12th, 1942, for Casablanca. She carried a mercantile crew of 38 officers and men with 20 U.S. naval gunners. The ship was never heard of again after the 13th, when she was seen to lose headway and dropped out of the convoy. She was thought to have been lost by marine causes on about the 14th December.

C. M. PALMER

Tyne Steamship Co.; 1870; Palmers' Co.; 1,011 tons; 239-1x29'2x15-6; 180 h.p.; compound inverted engines.
The steamship *C. M. Palmer* collided with the steamship *Ludworth*, 448 tons, in dense fog at about ten on the morning of February 17th, 1878. The position of the vessels at the time was not far from Harwich. The *C. M. Palmer* sank with about 14 of those on board.

C. O. STILLMAN

Panama Transport Co.; 1928; Bremer Vulkan; 13,006 tons; 564-9x75-3x44-5; 1,595 n.h.p.; oil engines.
The Panamanian tanker *C. O. Stillman* was torpedoed and sunk by a German submarine on June 5th, 1942, on a voyage from Aruba to New York. There were only 13 survivors of her crew of 43.

C. SUNDT

Akities. Dampsk. C. Sundt; 1901; Bergen Mek. Vcerks.; 1,105 tons; 228-5x35-3x15-9; 101 n.h.p.; triple-expansion engines.
The Norwegian steamship *C. Sundt* was sunk by a German submarine in the North Sea on March 25th, 1917.

CABEDELLO

LloydBrasileiro; 1912; Flensburger Schiffsb. Ges.; 3,557 tons; 364-3x51x22; 318 n.h.p.; triple-expansion engines.
The Brazilian steamship *Cabedello* left Philadelphia on February 14th, 1942, bound for Rio de Janeiro. She was presumed to have been lost with all hands on February 26th, in lat. 16° N., long. 42° 30' W. approximately.

CABO

Bjellard&Hansen; 1894; J.Scott&Co.; 1,254 tons; 211x32-1 X15-9; 127 n.h.p.; triple-expansion engines.
The Norwegian steamship *Cabo* was sunk by a German submarine on February 17th, 1917, in the Bay of Biscay.

CABOPALOS

Ybarra&Co.; 1927; Compania Euskalduna; 6,342 tons; 397 X53-2X31-5; 438 n.h.p.; oilengines.

The Spanish motorship *Cabo Pahs* was torpedoed and sunk by an unidentified submarine on June 26th, 1937, off Alicante, during the Spanish Civil War. She was carrying supplies from Odessa at the time.

CABO SAN ANTONIO

Ybarra&Co.; 1930; Soc. Espanola de Const. Naval; 12,275 tons; 482-5x63-4x33-4; 1,392 n.h.p.; oilengines.

The motor vessel *Cabo San Antonio* was on a voyage from Buenos Aires to Genoa with passengers and general cargo when, on December 29th, 1939, some 400 miles from Conakry, fire broke out in the galley and quickly spread through the vessel.

The fire could not be controlled and passengers and crew were taken off by a French vessel, except for five passengers reported missing.

On the 31st, the *Cabo San Antonio* was shelled and sunk by a French destroyer, as she was a danger to navigation.

CABO SANTO TOME

Ybarra & Co.; 1931; Soc. Espanola de Const. Naval; 12,589 tons; 482-5x63-3x34-3; 2,731 n.h.p.; oilengines.

The Spanish motor vessel *Cabo Santo Tome* left Odessa on October 5th, 1937, under the assumed name *Corfu*, with a cargo of aeroplanes and munitions for the Spanish Government in the Civil War. On October 10th, she was intercepted by two insurgent destroyers off Bona, bombarded and set on fire. She failed to reach port and anchored 400 yards off shore, where the crew took to the boats. The vessel sank soon afterwards following an internal explosion. One member of the crew was killed by gunfire and six wounded.

CABO VERDE

Empresa Nacional de Nav. a Vapor para a Africa; 1883; Earless Co.; 2,220 tons; 310x37-1x26; 296 n.h.p.; compound engines.

The Portuguese ship *Cabo Verde* was sunk by a German submarine on June 24th, 1917, off the north west coast of Spain.

CABOVILLANO

Ybarra & Co.; 1920; Echevarrieta y Larrinaga; 3,755 tons; 330-4x47-9x31; 417 n.h.p.; triple-expansion engines.

The steamship *Cabo Villano* left Montevideo on June 11th, 1942, for Barcelona via Las Palmas. Nothing more was heard of her after a wireless report on the 15th, giving her position as lat. 31° IT'S., long. 48° 43' W., and reporting heavy weather.

CABOTIA

Donaldson Line; 1900; R. Duncan & Co.; 4,309 tons; 385-2 x48-8x26-9; 359 n.h.p.; 10-5 knots; triple-expansion engines.

The *Cabotia* was intercepted by a submarine 120 miles W.N.W. of Tory Island on October 20th, 1916, and sunk by gunfire. Two boats, containing altogether 32 persons, were never seen again.

CABOTO

Soc. Veneziana di Nav. a Vap.; 1905; Cant. Nav. di Muggiano; 4,418 tons; 341-2x48-7x19-6; 388 n.h.p.; triple-expansion engines.

The Italian ship *Caboto* was torpedoed and sunk by a submarine on December 22nd, 1917, in the Mediterranean.

CABOURG

Soc. Maritime Nationale; 1918; S. P. Austin & Son; 2,423 tons; 285-9x41-9x18-9; 410 n.h.p.; triple-expansion engines.

The French steamship *Cabourg* left Ghent on January 20th, 1939, for Nantes with coal. Nothing was heard of the ship after she reported passing Ushant on the 22nd. The bodies of two of the crew were later washed ashore.

CABRAL

Egypt & Levant S.S. Co.; 1894; R. Thompson & Sons; 2,718 tons; 306-4x40x20-6; 252 n.h.p.; triple-expansion engines.

The British cargo ship *Cabral* was wrecked in January, 1907, near Agger, Denmark, while on a voyage from Novorossisk to Nyborg with a cargo of grain and oilcake.

CACIQUE

CACIQUE

New York & Pacific S.S. Co.; 1894; *J. L. Thompson & Sons*; 3,052 tons; 322x42-7x18-6; 299 n.h.p.; triple-expansion engines.

The British cargo ship *Cacique* caught fire and sank in April, 1908, near Santa Elena on the Ecuador coast. She was on a voyage from Mollendo to San Francisco.

CACIQUE

Cie. Generale Transatlantique; 1908; *Swan, Hunter & Wigham Richardson*; 2,917 tons; 325x43-7x23-3; 233 n.h.p.; triple-expansion engines.

The French ship *Cacique* was torpedoed and sunk by a submarine in the Bay of Biscay on February 20th, 1917.

CACOUNA

Dominion Coal Co.; 1883; *Wigham Richardson & Co.*; 1,451 tons; 250x35-4x16-4; 158 n.h.p.; compound engines.

The Canadian ship *Cacouna* was wrecked on September 26th, 1914, at Ferryland Head, N.F.L., while on a voyage from St. John's to Sydney, C.B.

CADAMOSTO

Salvagno Anon. Nav.; 1905; *Stavanger*; 1,010 tons; 242-1 x 33 • 1 x 15 -1; 127 n.h.p.; triple-expansion engines.

The Italian steamship *Cadamosto* was torpedoed and sunk by a British submarine on December 22nd, 1941, about 14 miles N.W. of Misurata, Libya.

CADDO

Socony-Vacuum Oil Co.; 1942; *Sun S.B. & D.D. Co.*; 10,172 tons; 503x68x39-3; 7,240 s.h.p.; 16-5 knots; turbo-electric engines.

The American tanker *Caddo*, Capt. Paul B. Muller, was torpedoed and sunk by a German submarine in the North Atlantic on November 23rd, 1942. Thirty-eight men were killed and two were wounded. Capt. Muller was taken prisoner and died in Germany whilst in captivity. The vessel was not in convoy at the time of the sinking.

CADILLAC

Anglo-American Oil Co.; 1917; *Palmers' Co.*; 530-2x66-3 X33-8; 793 n.h.p.; 11 knots; quadruple-expansion engines. The tanker *Cadillac* was in the North Atlantic about 200 miles W.S.W. of the Faroes on March 1st, 1941, when she was torpedoed and sunk by a submarine.

CADIZ

John Hall & Co.; 1858; *North Shields*; 945 tons; 9 knots; compound engines.

The passenger steamship *Cadiz* was built in 1858, but was lengthened and re-engined in 1873. On April 30th, 1875, she left Cadiz homeward bound and finally cleared Spain after touching at Vigo on May 5th. She carried 35 passengers and a crew of 31, and had a general cargo consisting chiefly of lead and wine. Among her passengers was a party of Portuguese sailors who were to join their ship in London.

On the night of May 7th-8th the *Cadiz* ran into a thick fog and soundings were taken at intervals, the last, which was \ hours before she struck, giving a depth of 65 fathoms. At about three o'clock on the morning of Saturday the 8th the vessel crashed on the Wizard Rock, off Brest. The captain was below at the time and the second officer, Mr. Atkins, was in charge of the ship. There was very little time for launching the boats before she heeled over and sank. Of the six boats one got away with 14 men under the second officer, but was swamped when the ship foundered.

One British and three Portuguese seamen managed to swim to the rocks, from which they were taken off next morning. The total number lost was 62, including the captain.

CADMUS

D/SA/SBananfart; 1926; *Kjobenhavns Flydk. & Skibsv.*; 1,855 tons; 267-3x39-2x22; 232 n.h.p.; triple-expansion engines. The Norwegian steamship *Cadmus* was torpedoed and sunk by a German submarine on July 1st, 1942, in the Gulf of Mexico.

CADMON

E. Jenkins & Co.; 1877; *T. Turnbull & Son*; 1,225 tons; 236-2 X 32 • 1 x 17 • 1; 115 n.h.p.; compound engines.

The British collier *Ccedmon* was wrecked in February, 1900, at Oleron. She was carrying a cargo of coal from Cardiff to Rochelle.

CAENWOOD

William Cory & Son; 1902; *S. P. Austin & Son*; 1,191 tons; 225x36-7x13-4; 170 n.h.p.; triple-expansion engines.

The British collier *Caenwood* was wrecked in November, 1905, near Flamborough Head. She was carrying a cargo of coal from the Tyne to Devonport.

CAFFARO

Lloyd Triestino; 1924; *S.A. Ansaldo*; 6,476 tons; 408-8x53-7x 28-2; turbine engines.

The Italian steamship *Caffaro* was bombed and sunk by British aircraft on September 12th, 1941, about 105 miles N.W. of Tripoli.

CAGLIARI

"Tirrenia" Soc. Anon. di Nav.; 1907; *N. Odero fu A. & Co.*; 2,322 tons; 300-5x38-5x17-2; 190 n.h.p.; triple-expansion engines.

The Italian steamship *Cagliari* was torpedoed and sunk by a British submarine on May 6th, 1941, three miles off the coast of Calabria.

CAGOU

Soc. Anon. "Le Nickel"; 1930; *S. P. Austin & Son*; 2,795 tons; 308x44-5x19-6; 261 n.h.p.; triple-expansion engines.

The French steamship *Cagou* left Sydney on July 23rd, 1942, for Noumea, and was never seen again. She was considered to have been sunk by the Japanese.

CAIRNAVON

Cairns, Young & Noble; 1892; *Wood, Skimmer & Co.*; 1,562 tons; 250-6x36-1 X16-8; 156n.h.p.; triple-expansion engines.

The British cargo ship *Cairnavon* was sunk in a collision in November, 1904, off Austruweel in the River Scheldt. She was on a voyage from Tunis to Antwerp with a cargo of zinc ore.

CAIRNAVON

Cairn Line; 1920; *W. Gray & Co.*; 5,245 tons; 400x52-3x 28-5; 513 n.h.p.; triple-expansion engines.

The British cargo ship *Cairnavon* went ashore on November 1st, 1925, half-a-mile south of Buchan Ness. She was on a voyage from Leith to Montreal with coal and a general cargo.

CAIRNCRAG

Cairns, Noble & Co.; 1892; *Hawthorn, Leslie & Co.*; 3,013 tons; 322x41-7x21-6; 281 n.h.p.; triple-expansion engines.

The British cargo ship *Cairncrag* was wrecked in July, 1909, on Dover Island near Cape Canso, N.S., while on a voyage from Boston to Bathurst, N.B., in ballast.

CAIRNDALE

British Admiralty; 1939; *Harland & Wolff*; 8,129 tons; 465-6x 59-5x33-9; 502 n.h.p.; oil engines.

The motor tanker *Cairndale* was torpedoed and sunk by a German submarine on May 30th, 1941, about 100 miles N.W. of Casablanca.

CAIRNDHU

Cairns, Noble & Co.; 1911; *W. Doxford & Sons*; 4,019 tons; 370x51x24-6; 292 n.h.p.; 10 knots; triple-expansion engines.

The steamship *Cairndhu* was torpedoed and sunk by a submarine 25 miles W. of Beachy Head on April 15th, 1917. Eleven men were killed. The captain was among the survivors.

CAIRNESK

Cairns, Young & Noble; 1888; *C. S. Swan & Hunter*; 2,128 tons; 279-5x37-5x19-2; 226 n.h.p.; triple-expansion engines.

The British cargo ship *Cairnesk* was wrecked in July, 1899, on Snippan Rocks at North Quarren, Gulf of Bothnia, and afterwards sank. She was on a voyage from Cronstadt to Pitea.

CAIRNMONA

Cairn Line of Steamships; 1918; Sunderland S.B. Co.; 4,666 tons; 390-2x53-1 x33-7; 550 n.h.p.; triple-expansion engines.
The British steamship *Cairnmona* was torpedoed and sunk by a German submarine on October 30th, 1939, off Rattray Head.

CAIRNROSS

Cairns, Noble & Co.; 1894; J.Laing; 1,509 tons; 255 x36-7'x 18 • 1; 159 n.h.p.; triple-expansion engines.
The British cargo ship *Cairnross* was wrecked on December 5th, 1910, about seven miles east of Malabat Point, while on a voyage from Toulon to Seville in ballast.

CAIRNSTRATH

Cairns, Noble & Co.; 1888; C. S. Swan & Hunter; 2,128 tons; 280x37-5x19-3; 223 n.h.p.; 11 knots; triple-expansion engines.
The steamship *Cairnstrath* was torpedoed and sunk by a submarine six miles S.S.W. of He du Pilier on August 4th, 1917. The captain and 21 of the crew were killed.

CAIRNTORR

Cairn Line; 1922; Sunderland S.B. Co.; 5,387 tons; 425x55x 22-6; 623 n.h.p.; triple-expansion engines.
The British cargo ship *Cairntorr* was wrecked on October 22nd, 1928, on Island Rock, Coacocho Bay, while on a voyage from Montreal to Newcastle with grain and a general cargo.

CAIRO

British Navy, anti-aircraft cruiser; 1919; Cammell Laird; 4,200 tons; 450x43-5x16-2; 40,000 s.h.p.; 29 knots; turbine engines; Yarrow boilers; eight 4 in.A.A. guns, several smaller.
The anti-aircraft cruiser *Cairo*, Capt. C. C. Hardy, D.S.O., was built in 1919 as a light cruiser armed with five 6in. guns. In 1939 she was re-equipped with eight 4 in.A.A. guns for service as an anti-aircraft ship. She was particularly useful in escorting convoys through the Mediterranean during the Second World War, and it was while engaged upon this duty that she was sunk. From the 10th to the 14th of August, 1942, a convoy for Malta, escorted by strong British forces was passing through the Mediterranean, and on the 11th and 12th it became a target for German dive-bombers, torpedo-bombers, submarines and E-boats in a concerted attack. On the 12th *Cairo* was torpedoed by a submarine, damaging her rudders and propellers and causing her to become unmanageable. It was not possible to take her in tow in view of the intensity of the aerial attack and at nightfall she was abandoned and sunk by torpedoes from British warships.

Cairo carried a complement of 400, of whom one officer and 23 ratings were killed.

The full story of the Malta convoy is told under the aircraft carrier *Eagle* and the cruiser *Manchester*, both lost in the action.

CAIRO

Atlas-Levante Linie A.G.; 1936; Fr. Krupp A.G.; 4,778 tons; 408-5x56-6x21-4; 796 n.h.p.; oil engines.
The motorship *Cairo* was taken over by the German Navy and fitted out as an auxiliary cruiser. On September 27th, 1942, in company with another raider, she intercepted the American steamship *Stephen Hopkins*, 7,181 tons gross, about 700 miles N.N.W. of Tristan da Cunha. In the ensuing engagement the *Stephen Hopkins* was sunk by gunfire but not before she herself sank the *Cairo*.

CAITHNESS

Sutherland Steamship Co.; 1898; IV. Doxford & Sons; 3,503 tons; 340-5x45-5x24-6; 300 n.h.p.; 10 knots; triple-expansion engines.
The steamship *Caithness* was torpedoed and sunk by a submarine 130 miles N.W. by N. of Cape Prtegal on April 19th, 1917. The vessel sank in a very short time with most of her crew. One lifeboat capsized but was righted and 20 men got into her and drifted about without food for 16 days, during which time all but two died from privation. The total number lost was 47, including the captain.

CALABAR

British & African S.N. Co. (Elder, Dempster & Co.); 1883; J. Elder & Co.; 1,756 tons; 300-3x36-2x20-4; 214 n.h.p.; compound engines.

The British ship *Calabar* was wrecked at Great Bassa, Liberia, in October, 1898, on a voyage from the west coast of Africa to Liverpool.

CALABRIA

Ministry of Shipping (British India S.N. Co.); 1922; Akt. Ges. Weser; 9,515 tons; 479-7x57-6x31-2; 604 n.h.p.; triple-expansion engines.
The steamship *Calabria* was formerly Italian, captured by the British. She was torpedoed and sunk by a German submarine on December 8th, 1940, on a voyage from Freetown to the Clyde. Her entire company of 130 crew and 230 Indian passengers were lost.

CALABRIA

Rederiaktiebt. Svenska Lloyd; 1916; Oskarshamns M/V A/B; 1,277 tons; 236-2x37-7x24; 204 n.h.p.; triple-expansion engines.
The Swedish steamship *Calabria* was torpedoed and sunk by a German submarine on June 22nd, 1941, about 100 miles from Inshtrahull.

CALAFATIS

Exors. of the late C. D. Calafatis; 1917; Uraga Dock Co.; 4,443 tons; 360 X 51 X 24 • 6; 378 n.h.p.; triple-expansion engines.
The Greek steamship *Calafatis* was bombed and sunk by German aircraft on February 4th, 1941, in the North Atlantic. Eighteen of her crew were last seen in a boat in lat. 55° 40' N., long. 14° 35' W.

CALATAFIMI

Italian Navy, destroyer; 1923; Orlando; 966 tons; 262-5x24-7 x8-5; 20,000 s.h.p.; 32 knots; turbine engines; Thornycroft boilers; four 4 in. guns, two 3 in.; 6 T.T., 10 mines.
The Italian destroyer *Calatafimi* was torpedoed by the Greek submarine *Pipinos* outside Karlovassi harbour, Samos, on August 9th, 1944. The *Calatafimi* was one of the units of the Italian fleet which fell into German hands at the surrender in September, 1943. Her normal complement was 105.

CALCHAS

Ocean S.S. Co. (Alfred Holt & Co.); 1921; Workman, Clark & Co.; 10,305 tons; 490-8x62-4x39-6; 6,500 s.h.p.; 14 knots; turbine engines.
The liner *Calchas*, Capt. W. R. Holden, was torpedoed and sunk by a submarine on April 21st, 1941, about 400 miles W. of Rio de Oro, West Africa. Thirty-one members of the crew, including Capt. Holden, were killed.

CALCUTTA

W. R. Price; 1864; Labbie; 1,372 tons; 204-8x39-7x23-9.
The sailing ship *Calcutta* was on a voyage from Shields to Aden when she caught fire. The disaster occurred on September 11th, 1874, the vessel being completely destroyed with nearly everyone on board.

CALCUTTA

British Navy, anti-aircraft cruiser; 1918; Vickers Armstrong; 4,200 tons; 450 x43-5x 14; 40,000 s.h.p.; 29 knots; turbine engines; Yarrow boilers; eight 4 in.A.A. guns, several smaller.
The anti-aircraft cruiser *Calcutta*, Capt. D. M. Lees, D.S.O., took part in the operations connected with the withdrawal of the British and Greek forces from Crete in May, 1941. The evacuation commenced on the night of the 29th and on the two following nights and was carried out by the British Navy, with very little loss considering the strength of the enemy air forces engaged. The distance between the Egyptian ports to which the troops were taken and Crete was 360 miles, and the number of troops evacuated was over 17,000. An Admiralty statement was issued later to the effect that the withdrawal and transport of the troops was accomplished at the cost of one anti-aircraft cruiser and two destroyers, *Hereward*, 1,340 tons, and *Imperial*, 1,370 tons.
Calcutta, which carried a complement of 400, was bombed and sunk on the 29th, with the loss of two officers and 114 ratings, and two officers wounded.

CALCUTTA MARU

Other British warships lost in the whole Cretan campaign were as follows:—

CRUISERS		DESTROYERS	
<i>York</i>	8,250 tons	<i>Greyhound</i>	1,335 tons
<i>Gloucester</i>	9,600 tons	<i>Juno</i>	1,690 tons
<i>Fiji</i>	8,000 tons	<i>Kashmir</i>	1,690 tons
		<i>Kelly</i>	1,695 tons

CALCUTTA MARU

Nippon Yusen K.K.; 1917; Mitsubishi Dockyard & Eng. Wks.; 5,339 tons; 400x54-5x30; 490 n.h.p.; triple-expansion engines.
The steamship *Calcutta Maru* was torpedoed and sunk by the U.S. submarine *Triton* on May 1st, 1942, off Wenchow.

CALDEA

"Adriatica" Soc. Anon. di Nav.; 1927; Cant. San Rocco S.A.; 2,703 tons; 308-2x41-8x20-2; 357 n.h.p.; oil engines.
The Italian motor vessel *Caldea* was torpedoed and sunk by a British submarine on July 13th, 1941, 10 miles off Benghazi.

CALDER

London Midland & Scottish Railway Co.; 1930; Cammell Laird & Co.; 1,107 tons; 240-6x34-1x15-4; 352 n.h.p.; 13-5 knots; triple-expansion engines.
The steamship *Colder*, Capt. T. W. Sutherby, left Hamburg for Hull and Goole at 9.55 p.m. on April 17th, 1931, with 960 tons of general cargo, of which 200 tons was stowed on deck. She carried a crew of 18. The German pilot quitted the steamship off the Elbe No. 3 Lightship at 3.30 a.m. on the 18th and this was the last ever seen of her. The weather was boisterous with a heavy swell and next morning two steamships in the North Sea, the *Nottingham* and the *Hodder*, picked up floating wreckage which was identified as coming from the *Colder*. Later other wreckage from the same source was washed up along the Lincolnshire coast. From this it was concluded that the steamship must have foundered with all hands.

CALDERGROVE

Clutha Shipping Co.; 1909; W. Hamilton & Co.; 4,327 tons; 376-8x52-3x25-5; 320 n.h.p.; 10 knots; triple-expansion engines.
The steamship *Caldergrove* was torpedoed and sunk by a submarine 200 miles W.N.W. of Fastnet on March 6th, 1917. Nineteen men, including the captain, were killed.

CALEB GRIMSHAW

Emigrant ship; 1840 (circa); 800 tons (approximate).
The emigrant ship *Caleb Grimshaw* left Liverpool for America on October 23rd, 1849. She carried 429 passengers, most of whom were emigrants, and a crew of 28. The voyage was normal until Sunday, November 11th, at about 9 p.m., when a passenger noticed smoke coming from the fore hatch. The weather was beginning to change for the worse and an attempt to confine the fire below deck and prevent its being fanned by the rising wind was partially successful. The *Caleb Grimshaw* continued on her voyage until the 16th, when she sighted the timber ship *Sarah*, sailing from London for Yarmouth, N.S. This ship took off one boat with a few people but three other boats were lost in the gale. The *Sarah* stood by throughout the night and on the following afternoon, the sea having abated, took off a further 133 persons. The ships then made for the Azores, the *Sarah* keeping close to the burning vessel. On Saturday, November 24th, the *Caleb Grimshaw* reached Fayal after a dreadful voyage in which 92 persons lost their lives either by suffocation, drowning or through intense thirst, there being no means of supplying fresh water to the burning ship.

The conduct of the master, Capt. Cook, and the crew of the *Sarah* received great public commendation. During the latter part of the time the navigational instruments of the *Caleb Grimshaw* were either destroyed or beyond the reach of the officers, and at night she was navigated by following the lights of the *Sarah*.

CALEB SPRAGUE

Ministry of War Transport (Whimster & Co.); 1943; Pacific Bridge Co.; 1,813 tons; 250x42-1x18-3; 188 n.h.p.; triple-expansion engines.
The British steamship *Caleb Sprague* was torpedoed and sunk by

German motor torpedo boats on January 31st, 1944, S.E. of Beachy Head on a voyage from London to Newport. Twenty-two of her crew of 27 and three of her four gunners were lost.

CALEDONIA

Macbeth, Blackwood & Laurie; 1870; J. Laing; 1,507 tons; 270x32•1x25; 200 h.p.; compound inverted engines.
The British ship *Caledonia* with a cargo of petroleum caught fire and sank on February 13th, 1886, in 49° N., 4° W., while on a voyage from Batoum to Dunkirk.

CALEDONIA

Dampsk.HafniaAkties.; 1898; Burmeister & Wain; 1,815 tons; 278-6x40-4x17-3; 203 n.h.p.; triple-expansion engines.
The Danish steamship *Caledonia* was sunk by a submarine in the Mediterranean on April 9th, 1916.

CALEDONIA

Anchor Line (Henderson Bros.); 1904; D. & W. Henderson & Co.; 9,223 tons; 500x58-2x33-4; 1,060 n.h.p.; 16-5 knots; triple-expansion engines.

The *Caledonia* was requisitioned by the British Government upon the outbreak of war in 1914. Her passenger accommodation in peace-time was for 1,450 persons, but her carrying capacity for war purposes was assessed at 3,074 troops and 212 horses. For more than two years she served in various parts of the world but met her fate in the Mediterranean on December 5th, 1916. When 125 miles E. of Malta she encountered the German submarine *U-65*, which torpedoed her without warning. The captain, Capt. James Blaikie, attempted to sink the submarine by ramming and actually succeeded in striking her.

Capt. Blaikie was taken prisoner by the Germans, and his fate would have undoubtedly been that of Capt. Fryatt of the *City of Brussels* had not the British Government let it be known to the German authorities, through the U.S. Ambassador at Berlin, that a German officer prisoner would be shot in retribution should Capt. Blaikie be executed. This firm attitude impressed the Germans and Blaikie was sent to an officers' prison camp at Friedberg.

CALEDONIA

Lorentzen's Skibs.A/S; 1936; Deutsche Werft A.G.; 9,892 tons; 492-9x66-1x36-4; 1,165 n.h.p.; oil engines.
The Norwegian motor vessel *Caledonia* was torpedoed and sunk by a German submarine on April 28th, 1941, about 500 miles N.W. of the Hebrides. Twelve of her crew were killed.

CALEDONIAN MONARCH

Raeburn & Verel; 1928; Napier & Miller; 5,851 tons; 430-6X 56-2x28; 370 n.h.p.; 12 knots; quadruple-expansion engines.
The steamship *Caledonian Monarch*, Capt. J. V. Stewart, sailed from Sydney, N.S., on January 3rd, 1942, for London. She was not seen again and it is presumed that she was sunk by a submarine. She carried a crew of 48.

CALEDONIEN

Messageries Maritimes; 1882; Messageries Maritimes; 4,140 tons; 413-9x41-3x32-8; 586 n.h.p.; triple-expansion engines.
The French steamship *Caledonien* hit a mine and sank in the Mediterranean on June 30th, 1917.

CALGARIAN

Allan Line S.S. Co.; 1914; Fairfield Co.; 17,515 tons; 568-8x 70-3x41-6; 21,000 s.h.p.; 20 knots; turbine engines.
The *Calgarian* was taken over by the Admiralty in 1914 and assigned to the 9th Cruiser Squadron, which was composed of three cruisers of the Royal Navy and five auxiliary cruisers. The prime duty of this squadron was the patrol of the mid-Atlantic. In company with H.M.S. *Vindictive* the *Calgarian* blockaded the mouth of the Tagus to prevent the escape of the German liners lying there, and later was employed in guarding trans-Atlantic convoys.

On March 1st, 1918, under command of Capt. R. A. Newton, R.N., the ship was engaged in convoying 30 merchantmen off the N. coast of Ireland. In addition to her convoy duties she was carrying a number of naval ratings who were being transferred to other

stations or were going on leave. The German Admiralty had just initiated an intensive submarine campaign against Allied shipping passing through the North Channel between Ireland and Scotland, and the *Calgarian* was the first victim of this concentration, receiving four hits in succession from submarine torpedoes. She sank in a very short time taking with her two officers and 47 ratings.

CALGAROLITE

Imperial Oil Shipping Co.; 1929; Furness S.B. Co.; 11,941 tons; 521-5x70-4x38-7; 1,496 n.h.p.; 11 knots; oil engines.
The Canadian tanker *Calgarolite* was about 50 miles S.W. of the island of Great Cayman in the British West Indies on May 9th, 1942, when she was intercepted by a German submarine. The latter opened fire from the surface and finally sank the tanker with a torpedo.

CALIFORNIA

Anchor Line; 1907; D. & W. Henderson & Co.; 8,662 tons; 470x58-3x34; 827 n.h.p.; 15 knots; triple-expansion engines.
The Anchor liner *California* left New York for Glasgow on January 29th, 1917, with 205 persons on board. On February 7th, when she was 38 miles W. by S. of Fastnet she was torpedoed by a submarine and sank in seven minutes. The attack occurred at 9.10 a.m. on February 7th, the liner being struck aft and many of those on board were killed by the explosion. The boats were hurriedly launched, one capsizing and drowning several people. The captain went down with the ship but managed to gain the surface and was picked up. The total number killed was 43.

CALIFORNIA

Lloyd Triestino; 1920; Scotts' S.B. & Eng. Co.; 13,060 tons; 539X64x43-9; 1,458 n.h.p.; turbine engines.
The Italian liner *California* was torpedoed and sunk by British aircraft on August 11th, 1941, at Syracuse, Sicily.

CALIFORNIA

States Steamship Co.; 1920; Los Angeles S.B. & D.D. Co.; 5,441 tons; 410x54-4x27-2; 422 n.h.p.; triple-expansion engines.
The American steamship *California* was torpedoed, shelled and sunk on August 13th, 1942, on a voyage from Table Bay to Trinidad. There were 18 survivors.

CALIFORNIA

Anchor Line; 1923; A. Stephen & Sons; 16,792 tons; 553 X 70-4x38-8; 17 knots; turbine engines.
The Anchor liner *California*, Capt. R. Smart, acting as an auxiliary troopship, was bombed and sunk by German aircraft. The attack took place off the coast of Portugal on July 11th, 1943, the vessel being in convoy at the time. Three officers and 43 ratings were killed. Capt. Smart was among the survivors.

CALIFORNIA STAR

Frederick Leyland & Co.; 1939; Burnmeister & Wain; 8,300 tons; 447-2x60-2x36; 1,236 n.h.p.; 14 knots; oil engines.
The *California Star*, Capt. S. Foulkes, was torpedoed and sunk by a German submarine in the North Atlantic on March 4th, 1943. Six passengers and 46 crew were killed. Capt. Foulkes was among the survivors.

CALIFORNIAN

American Hawaiian S.S. Co.; 1900; Union Iron Works; 5,658 tons; 413x51x22; 483 n.h.p.; triple-expansion engines.
The American steamship *Californian* hit a mine and sank on June 22nd, 1918, in the Bay of Biscay.

CALINO

"Adriatica" Soc. Anon di Nav.; 1939; Cantieri Riuniti delV Adriatico; 5,000 tons; 373-2x52-6x19-8; 1,360 n.h.p.; oil engines
The Kalian motor vessel *Calino* struck a mine and sank on January 10th, 1943, at Punta Campanella.

CALIPH

Hector & Co.; 1869; Hall; 914 tons; 215-1x36-1x20-3.
The tea clipper *Caliph* was designed as a challenger to the famous clipper *Thermopylae* on the China run. She was especially fast in light winds, and carried a small 8 h.p. engine which drove two small screws which could be lowered overboard to drive her at 21 knots in a calm.

In October, 1869, she sailed for China on her maiden voyage. Early in 1870 she left Foochow for New York, being one of the last of the tea fleet to sail. Her captain was reported to have been a man who had little experience of Chinese waters, a fact which may have had something to do with her loss. The weather was fine when she sailed and there were no reports of storms during the time she would be crossing the China Sea, nevertheless she was never heard of again.

CALIPSO

Italian Navy, torpedo boat; 1938; Ansaldo; 679 tons; 267x26x7-7; 19,000 s.h.p.; 34 knots; turbine engines; 3-drum boilers; three 3-9 in. guns, four 37 mm.A.A., two 13 mm.A.A.; 4 T.T.
The torpedo boat *Calipso* struck a mine and sank off Misurata, Libya, on December 5th, 1940. The vessel carried a complement of about 100.

CALITEA

"Adriatica" Soc. Anon di Nav.; 1933; Cantieri Riuniti delV Adriatico; 4,013 tons; 334-1x49-8x31-5; 1,024 n.h.p.; oil engines.
The Italian motor vessel *Calitea* was torpedoed and sunk by a British submarine on December 11th, 1941, 90 miles S. of Cape Matapan.

CALITRO

Neptune S.N. Co.; 1892; J.Laing; 2,969 tons; 320x41-8x18-2; 350 h.p.; triple-expansion engines.
The British cargo ship *Calitro* was wrecked in May, 1894, near Grates Cove, 40 miles north of St. John's, N.F.L. She was on a voyage from Rotterdam to Baltimore.

CALLAGHAN

United States Navy, destroyer; 1943; Bethlehem Steel Co., San Pedro; 2,050 tons; 376-5x39-3x12-2; 60,000 s.h.p.; 36-5 knots; turbine engines; Babcock & Wilcox boilers; five 5 in. guns, four 40 mm., four 20 mm.; 10 T.T.
The United States destroyer *Callaghan* was attacked by Japanese aircraft N.E. of Formosa on July 28th, 1945. The vessel, which carried a complement of over 250, was hit and sunk.

CALLIOPE

Gladstone & Co.; 1889; W. Gray & Co.; 2,934 tons; 314-5X 40-6x22; 240 n.h.p.; triple-expansion engines.
The British cargo ship *Calliope* was wrecked in November, 1900, at Peniche while on a voyage from Newport to Marseilles with a cargo of coal.

CALLIOPE

Gladstone & Co.; 1901; R. Craggs & Sons; 3,829 tons; 350X 46-6x19-2; 358 n.h.p.; 10 knots; triple-expansion engines.
The steamship *Calliope* was torpedoed and sunk by a submarine 35 miles S.W. of Ustica Island, near Sicily, on April 5th, 1917. The captain and five men were killed. The first and second officers and the third engineer were taken prisoner by the submarine.

CALLIOPE

Calliope Steamship Co.; 1900; W. Pickersgill & Sons; 2,883 tons; 324X47-1X21-7; 282 n.h.p.; 9-5 knots; triple-expansion engines.
The steamship *Calliope* was torpedoed and sunk by the German submarine *U-155* in 35° K, 17° W., on July 12th, 1917. All of the crew, numbering 27, were lost.

CALYPSO

T. Wilson, Sons & Co; 1904; Earle's Co.; 2,876 tons; 309-6X 42-7x23-9; 283 n.h.p.; 10 knots; triple-expansion engines.
The steamship *Calypso* was torpedoed and sunk by a submarine in

CALYPSO

the North Sea on July 10th, 1916. Thirty men, including the captain, were killed.

CALYPSO

British Navy, cruiser; 1917; Hawthorn Leslie; 4,180 tons; 450x42-7x16-2; 43,312 s.h.p.; 29 knots; turbine engines; Yarrow boilers; five 6 in. guns, two 3 in., four 3 pdr., two 2 pdr., 10 m.g.

The old cruiser *Calypso*, veteran of the First World War, was torpedoed and sunk by an Italian submarine S. of Crete on June 12th, 1940. One officer and 38 ratings were killed.

CAMBERWELL

Well Line; 1903; J. L. Thompson & Sons; 4,078 tons; 368x49-6x19; 409 n.h.p.; 10 knots; triple-expansion engines.

The steamship *Camberwell* struck a mine and sank six miles S.E. by E. off Dunnose Head, Isle of Wight, on May 18th, 1917. Seven men were killed. The captain was among the survivors.

CAMBRAI

Cie. des Bateaux a Vap. du Nord; 1875; Schlesinger Davis; 963 tons; 219-1x30-2x18-4; 139 n.h.p.; compound engines.

The French steamship *Cambrai* was torpedoed and sunk by a German submarine in the North Sea on August 3rd, 1918.

CAMBRIA

Anchor Line; 1869; R. Duncan & Co.; 1,997 tons; 324-5x35-2x22-5; 400 h.p.; 13 knots; compound engines.

The iron steamship *Cambria* was on a voyage from New York to Glasgow with 170 passengers and crew, and was commanded by Capt. George Carnahan. On approaching the coast of Ireland the vessel ran into foul weather. About 11 o'clock on the night of Wednesday, October 19th, 1870, she was sailing under steam and canvas at a high speed dangerously near to Inishtrahull Island, 10 miles from the coast of Donegal. The light there was not visible owing to the spray flung up by the storm and the *Cambria* struck on the rocks. A large hole was made in the hull and the intruding water quickly swamped the boiler fires. Four boats were lowered, one of which, containing 16 persons, capsized, only one man managing to get back into it when it righted. The other boats drifted away in the darkness.

During the night this man, a passenger named M'Gartland, was picked up by the steamship *Enterprise*, Capt. Gillespie. The vessel cruised about for a considerable time in the hope of finding the other boats, but without success. With the exception of this one passenger the whole of the *Cambria's* company had perished.

CAMBRIAN PRINCESS

W. Thomas & Co.; 1877; T. R. Oswald; 1,394 tons; 224-7x37-1x22-6.

The iron sailing ship *Cambrian Princess* was sunk in a collision with the Channel steamship *Alma*, 1,145 tons, in a fog toward the end of March, 1902. Eleven of the crew were drowned.

CAMBRIC

W.H. Cockerline & Co.; 1906; Sunder land S.B. Co.; 3,403 tons; 342-4x49-5x22-8; 308 n.h.p.; 9 knots; triple-expansion engines.

The steamship *Cambric* was torpedoed and sunk by a submarine 14 miles W. of Cape Shershel, Algeria, on October 31st, 1917. The captain and 23 of the crew were killed. Four men were taken prisoner by the submarine.

CAMBRIDGE

Federal Steam Navigation Co.; 1916; J. C. Tecklenborg A.G.; 10,846 tons; 524-5x65-7x37-3; 1,106 n.h.p.; 14 knots; triple-expansion engines.

The steamship *Cambridge*, Capt. A. J. Angell, struck a mine and sank on November 7th, 1940, about six miles E. of Wilson's Promontory, Victoria, Australia. One member of the crew was killed.

CAMBRO

Empire Shipping Co.; 1906; Campbeltown S.B. Co.; 1,918 tons; 282-3x40x19-3; 192 n.h.p.; triple-expansion engines.

The British cargo ship *Cambro* was wrecked on May 24th, 1913, on the Smalls while carrying a cargo of ore from Huelva to Garston.

CAMBUSWALLACE

Cambuswallace Sailing Ship Co.; 1894; Russell & Co.; 1,651 tons; 245x37-5x22-6.

The barque *Cambuswallace* was wrecked on Stradbroke Island, off Brisbane, on September 4th, 1894. She sank with the loss of five lives.

CAMDALÉ

Marevale Shipping Co.; 1895; T. Turnbull & Son; 2,746 tons; 312-6x40-7x20-4; 236 n.h.p.; triple-expansion engines.

The British collier *Camdale* was sunk in a collision on November 5th, 1912, in the Bay of Biscay. She was on a voyage from Cardiff to Civitavecchia with a cargo of coal.

CAMDEN

Watts, Watts & Co.; 1878; C. Mitchell & Co.; 1,449 tons; 252 X 33x22-3; 155 n.h.p.; compound engines.

The British ship *Camden* was wrecked on February 19th, 1901, 12 miles south of Cape Spartel. She was on a voyage from Cardiff to Malta with a cargo of coal.

CAMERON

British Navy, destroyer; 1919; Bethlehem Shipbuilding Corpn.; 1,190 tons; 311x30x9-3; 27,000 s.h.p.; 35 knots; turbine engines; four 4 in. guns, one 3 in. A.A.; 12 T.T.

The destroyer *Cameron* was originally the U.S.S. *Welles* and was transferred to the British Navy under the Lease-Lend agreement. The vessel was lost owing to marine cause on December 15th, 1940. Her normal complement was 122.

CAMERONIA

Anchor Line; 1911; D. & W. Henderson & Co.; 10,963 tons; 515x62-2x25-7; 1,164 n.h.p.; 17 knots; triple-expansion engines.

The *Cameronia*, Capt. D. W. Bone, was one of the finest ships in the Anchor Line's fleet. She had accommodation for 1,560 passengers and before the First World War was employed in the trans-Atlantic service. On Sunday, April 15th, 1917, she was 150 miles E. of Malta when she was torpedoed by a submarine. The attack occurred at 5.20 p.m., the sea being calm and the weather fine.

The *Cameronia* was carrying 2,630 officers and men from Marseilles to Egypt. She sank in 40 minutes, taking with her one officer and 128 other ranks of the troops and two officers and nine men of her crew. The first boat to be launched capsized and drowned many of its occupants.

Mr. Robert McBurnie, the first officer, was drowned in saving the life of a soldier. Capt. Bone was among the survivors.

CAMERONIAN

Leyland Line; 1913; J. Frerichs & Co.; 5,861 tons; 428-4x55-x29; 415 n.h.p.; 10-5 knots; quadruple-expansion engines.

The *Cameronian* was originally the Hamburg-Amerika liner *Kamerun*. She was found derelict in the Kamerun River, West Africa, by the British naval ship *Cumberland* which placed a prize crew on board her and sent her to England. She arrived safely at Liverpool on February 1st, 1915, and a prize court turned her over to the Leyland Line.

In the early morning of June 2nd, 1917, the *Cameronian*, Capt. R. Roberts, carrying a large number of mules, with a few soldiers to look after them, was torpedoed by a submarine when 50 miles N.W. by N. i N. of Alexandria, her destination. Unfortunately a number of men were asleep in hammocks on the lower deck. The explosion flooded this deck and all the men were drowned, the ship sinking in five minutes.

Those lost included Capt. Roberts, two army officers and 30 other ranks, and one officer and nine men of the crew.

CAMILLA

King & Co.; 1824; Rotherhithe; 132 tons; 10 knots. The cross-channel steamship *Camilla* was one of the very early steam packets. She was owned by Messrs. King & Co. of Southampton, who commenced the first regular all-year-round service to Havre. She was the forerunner of the London & South Western Railway packets which began in 1845 as a private company, railways not possessing the legal right to run passenger steamships.

at that date. The *Camilla* also ran to St. Malo and Granville during the latter part of her career.

In January, 1842, she struck on the Casquets, and foundered with all on board, save the first mate.

CAMILLA

British Navy, sloop; 1847; Pembroke Dockyard; 549 tons; 125 X 34-9x15; sixteen guns.

The sloop *Camilla*, Capt. G. T. Colville, left Hakodate, Japan, for Kanagawa on September 1st, 1860. She was never heard of again.

In his report to the Admiralty the Commander-in-Chief, China Station, expressed it as his opinion that the sloop was overwhelmed in a typhoon which swept the coast of Japan on September 9th.

The *Camilla* carried a complement of 121.

CAMILLE

Alien Adams & Co.; 1903; Craig, Taylor & Co.; 1,111 tons; 230x32 • 7 X13 • 8; 150 n.h.p.; triple-expansion engines.

The British cargo ship *Camille* was wrecked on January 6th, 1916, while on a voyage from Sunderland to Havre with a cargo of coal.

CAMIOLA

Chapman & Miller; 1889; J. Readhead & Sons; 2,226 tons; 290-4x39x18-9; 250 h.p.; triple-expansion engines.

The British cargo ship *Camiola* was wrecked in October, 1892, on Seven Stones Rocks. She was on a voyage from Barry to Malta with a cargo of coal.

CAMITO

Elders & Fyffes; 1915; A. Stephen & Sons; 6,611 tons; 426-3x54 • 2x30 • 4; 622 n.h.p.; 14 knots; triple-expansion engines.

The *Camito* was taken over by the British Admiralty during the Second World War. On May 6th, 1941, she was torpedoed and sunk by a submarine in the North Atlantic. Six officers and 22 ratings were killed.

CAMORTA

British India S.N. Co.; 1880; A. & J. Inglis; 2,119 tons; 285-2 X 35-2 X 24-1; 201 n.h.p.; compound engines.

The British steamship *Camorta* left Madras in April, 1902, with 89 crew and 650 passengers for Rangoon, where she was due on May 5th. The ship was overwhelmed by a cyclone on May 6th, and all on board were lost.

CAMPANIA

Cunard Line; 1893; Fairfield Co.; 12,884 tons; 601x65-2x37-8; 30,000 i.h.p.; 22 knots; triple-expansion engines.

The Cunard liner *Campania* was one of the most famous ships of her day on the Atlantic run. With her sister ship, the *Lucania*, she held the "Blue Riband" of the Atlantic for over four years, making her best passage in August, 1894, when she crossed from Queens-town to Sandy Hook in five days nine hours and twenty-one minutes at an average speed of 21.59 knots. Her passenger accommodation was stupendous for those days, amounting to 1,400 with 400 crew in addition.

During the First World War the *Campania's* impressive length of deck, together with her high speed, influenced the Admiralty in turning her into an auxiliary aircraft carrier. It was while she was engaged in this service that she collided with the battle cruiser (afterwards aircraft carrier) *Glorious* (which see) in the Firth of Forth in very bad weather on November 5th, 1918. The *Campania* was sunk but all of her crew were saved.

CAMPANIA

Ditto Luigi Pittaluga Vapori; 1918; Caird & Co.; 5,247 tons; 409x52-3x28-5; 490 n.h.p.; triple-expansion engines.

The Italian steamship *Campania* was bombed and sunk by Allied aircraft on June 28th, 1942, at Leghorn.

CAMPBELTOWN

British Navy, destroyer; 1919; Bath Ironworks, U.S.A.; 1,090 tons; 314-5x30-5x8-7; 27,000 s.h.p.; 35 knots; turbine engines; four 4 in. guns, one 3 in. A.A.; 12 T.T.

The destroyer *Campbeltown* was originally the U.S.S. *Buchanan* and was transferred to the British Navy under the Lease-Lend agreement. In the early hours of Saturday, March 28th, 1942, the des-

trooper, carrying commando troops and with her bows strengthened for ramming and packed with five tons of explosive, entered the estuary of the Loire. She had left Falmouth on the 26th escorted by the destroyers *Atherstone* and *Tynedale*, and steamed to her destination at an easy speed of 13 knots so as to be outside St. Nazaire early on the 28th. The *Campbeltown* moved slowly toward the port, her objective being the large dock built to accommodate the liner *Normandie*, which was the only one of its kind outside Germany capable of berthing the battleship *Tirpitz*. Its destruction, therefore, had become a cardinal objective in British sea operations, for it was known on March 9th that the big German battleship was off the coast of Norway. The *Campbeltown's* advance was covered to some extent by an attack on the town by British aircraft, and she approached without drawing fire until it was too late to check her. She then increased speed; cut through the torpedo-nets; rammed the dock gates and was finally scuttled by her crew partially inside the dock. The commandos landed and commenced the destruction of all dock and harbour machinery wherever found, while the delayed action fuses were fired on board the ship. These exploded three hours later, wrecking the dock gates and destroying part of the dock. Meanwhile the gates of smaller docks were blown in by torpedoes from motor torpedo-boats.

Casualties among the commando troops were 34 officers and 178 other ranks out of a force of 44 officers and 224 other ranks sailing from Falmouth. Of these a high proportion were prisoners of war. The naval casualties amounted to 34 officers and 157 ratings out of a total of 62 officers and 291 ratings sailing from Falmouth. Of these four officers and 28 ratings were killed on board the *Campbeltown*.

The raid was successful in preventing the Germans from employing the *Tirpitz* on the open seas and she never quitted northern waters throughout her two years and six months of commissioned service.

CAMPEADOR

Cie. Arrendataria del Monopolio de Petroleos; 1932; Cia. Euskalduna; 7,932 tons; 455x59x34; 755 n.h.p.; oil engines.

The tanker *Campeador*, with a cargo of benzine, was shelled and sunk by Spanish Insurgent or Italian destroyers on August 11th, 1937, 13 miles E. of Kelibia, during the Spanish Civil War.

CAMPBILL

Macbeth & Co.; 1906; Ropner & Son; 3,988 tons; 360x50x17-9; 354 n.h.p.; triple-expansion engines.

The British cargo ship *Campbill* was wrecked on March 27th, 1913, near Cape Agulhas. She was on a voyage from Bassein to Buenos Aires with a cargo of rice.

CAMPHUIJS

Koninklijke Paketvaart Maats.; 1903; Nederlandsche Schps. Maats.; 2,380 tons; 315-3x41-4x21-8; 261 n.h.p.; triple-expansion engines.

The Dutch steamship *Camphuijs* was torpedoed and sunk by a Japanese submarine on January 9th, 1942, on a voyage from Samarang to Singapore.

CAMPO BASSO

Italian Government; 1918; J. Blumer & Co.; 3,566 tons; 356-3x48-7x23-9; 249 n.h.p.; triple-expansion engines.

The steamship *Campo Basso* was formerly the French *Bonifacio*, taken over by the Italians. On May 5th, 1943, she was shelled and sunk by British warships about eight miles E. of Kelibia.

CAMPOS

Lloyd Brasileiro; 1894; Blohm & Voss; 4,663 tons; 376-1x46-1 X 27-2; 302 n.h.p.; quadruple-expansion engines.

The Brazilian steamship *Campos* was torpedoed and sunk by a German submarine on October 23rd, 1943, off the island of Alcatrazes, near Santos. Sixteen of her crew were lost.

CAMROSE

Merevale Shipping Co.; 1892; J. L. Thompson & Sons; 2,565 tons; 300 x 40x19-2; 232 n.h.p.; triple-expansion engines.

The British cargo ship *Camrose* was wrecked on July 18th, 1914, on the Burlings. She was carrying a cargo of copper ore from Huelva to Antwerp.

CAMSWAN

Osborne S.S. Co.; 1917; Blyth S.B. & D.D. Co.; 3,426 tons; 335-2 x 50-7 x 22-9; 298 n.h.p.; triple-expansion engines.

The British ship *Camswan* was sunk in a collision on October 19th, 1917, eight miles west by south of St. Catherine's Point. She was on a voyage from Blyth to Naples with a cargo of coal.

CANADA

A/S Det Ostasiatiske Kompagni; 1935; Naskov Skibs. A/S; 11,78 tons; 468-8x64-3x36-3; 1,236 n.h.p.; oil engines.

The Danish motorship *Canada* struck a mine on November 3rd, 1939, two miles E. of Holmpton, near Spurn Head, and sank on the next day.

CANADA VICTORY

U.S. War Shipping Administration; 1944; Oregon S.B. Corpn.; 7,608 tons; 439-1x62-1x34-5; turbine engines.

A Japanese aeroplane crash-dived and sank the American steamship *Canada Victory* at Okinawa Island on April 27th, 1945, with the loss of 43 lives. This is the last recorded sinking of an American merchant ship in the Pacific during the Second World War.

Thirteen years later salvage operations on the wreck resulted in a second disaster. On April 17th, 1958, an explosive charge intended to open an entrance into the side of the hull detonated the ship's cargo of ammunition and 30 men were killed.

CANADIAN

Allan Line; 1860; Greenock; 1,926 tons; 285x34x—; 12 knots; compound engines.

The *Canadian* was returning to Liverpool with passengers and mails under command of Capt. Graham. On June 4th, 1861, when in the Straits of Belle Isle, the vessel ran into ice and was holed about 10 miles from shore. The damage was fatal and half-an-hour later the *Canadian* sank. Most of the passengers were taken off in safety by the ship's boats, but one of these capsized, drowning 35 people.

The first *Canadian* belonging to the same company was wrecked in the St. Lawrence on June 1st, 1857, but there was no loss of life.

CANADIAN CRUISER

Canadian Tramp Shipping Co.; 1921; Halifax Shipyards; 7,178 tons; 430x56-2x34-8; 705 n.h.p.; triple-expansion engines.

The Canadian steamship *Canadian Cruiser* was intercepted by the German cruiser *Scheer* on February 21st, 1941, and sunk by gunfire about 500 miles E. of Zanzibar.

CANADIAN RECRUIT

Canadian Government; 1919; Collingwood S.B. Co.; 2,409 tons; 251 x 43-6x23-6; 150 n.h.p.; triple-expansion engines.

The Canadian steamship *Canadian Recruit* was sunk in a collision on August 18th, 1921, 45 miles east of Quebec.

CANADIAN STAR

Union Cold Storage Co. (Blue Star Line); 1939; Burmeister & Wain; 8,293 tons; 447-2x60-2x36; 14 knots; oil engines.

The *Canadian Star*, Capt. R. D. Miller, was torpedoed and sunk by a submarine in the North Atlantic on March 18th, 1943. Nine passengers and 25 crew, including Capt. Miller, were killed.

CANATCO

Canada Atlantic Transit Co.; 1919; Collingwood S.B. Co.; 2,415 tons; 251 x 43 x 23-6; 150 n.h.p.; triple-expansion engines.

The Canadian cargo ship *Canatco* went ashore on October 24th, 1942, in the vicinity of 54° N., 56° 30' W., and sank on the following day at Gannet Rock. The crew stated that the casualty was due to an explosion, the origin of which was unknown.

CANBERRA

Australian Navy, heavy cruiser; 1927; John Brown & Co.; 10,000 tons; 630x68-3x16-2; 80,000 s.h.p.; 31-5 knots; turbine engines; 3-drum boilers; eight 8 in. guns, eight 4 in., four 3 pdr., four 2 pdr., 12 m.g.; 8 T.T.

On August 7th, 1942, a force of U.S. marines landed on the island of Guadalcanal, in the Solomons Group, and initiated the first of the American offensives designed to drive the Japanese from the chain of Pacific Islands which had been seized by them at the com-

mencement of the war. The Japanese made a counter-attack with large numbers of ships and aircraft on the night of August 8th-9th on a small Allied force protecting the American landing. At 1.45 a.m. on the 9th there was a brisk action off the island of Savo, when the Australian heavy cruiser *Canberra* was badly damaged and set on fire. All efforts to save the ship were unavailing and she sank some hours later. Three U.S. heavy cruisers, the *Astoria*, *Quincy* and *Vincennes* were lost in the same action.

The *Canberra*, which carried a complement of 816, was commanded by Capt. F. E. Getting. The number of survivors rescued was 732, of whom 109 were wounded. The number killed was 84, including Capt. Getting who died from his wounds.

CANBERRA MARU

Osaka Shosen K.K.; 1936; Mitsui Bussan Kaisha; 6,477 tons; 424-7 x 57-4 x 36-1; 1,231 n.h.p.; oil engines.

The Japanese motor vessel *Canberra Maru* was sunk by U.S. land and carrier-based aircraft on November 14th, 1942, in the Solomon Islands.

CANDIA

Sicilia Societa di Navigazione; 1862; Palmer Bros. & Co.; 1,045 tons; 248 x 27-9 x 20-1; 231 n.h.p.; triple-expansion engines.

The Italian steamship *Candia* was torpedoed and sunk by a submarine in the Mediterranean on April 11th, 1917.

CANDYTUFF

British Navy, sloop; Armstrong Whitworth; 1,290 tons; 262-2 x 35x12-5; 2,800 i.h.p.; 17 knots; triple-expansion engines; two 4 in. guns, one 12 pdr.

The sloop *Candytuff*, Cdr. W. O. G. Cochrane, disguised as a Q-ship, was escorting the s.s. *Tremayne* from Gibraltar to Malta on November 18th, 1917, when both vessels were attacked by a submarine. A torpedo fired at the *Tremayne* missed that ship but struck the *Candytuff* on the starboard quarter, blowing off her stern and killing or wounding all the officers save Cdr. Cochrane and Lt. Phillips. A second torpedo, fired about 30 minutes later, struck the sloop as she was slowly heading for the beach near Bougie and blew a hole just forward of the bridge, causing her to break in two, the bow portion sinking immediately. The remnant of the ship then grounded.

CANFORD CHINE

Chine Shipping Co.; 1917; Richardson, Duck & Co.; 3,364 tons; 345-1 x 47-8 x 22-3; 308 n.h.p.; triple-expansion engines.

The British cargo ship *Canford Chine* sailed from the Clyde on February 6th, 1941, for Buenos Aires. She was reported on the following day but was not seen again. She carried a crew of 33 and two gunners.

CANONBURY

Watts, Ward & Co.; 1880; Blumer & Co.; 1,676 tons; 258x35 x 21-3; 150 h.p.; compound inverted engines.

The British cargo ship *Canonbury* was wrecked on March 28th, 1888, on Nantucket Shoal. She was on a voyage from Matanzas to Boston with a cargo of sugar.

CANONESA

Furness-Houlder Argentine Lines; 1920; Workman, Clark & Co.; 8,286 tons; 450-2x58-3x37-1; turbine engines.

The British steamship *Canonesa* was torpedoed and sunk by a German submarine on September 21st, 1940, on a voyage from Montreal to Liverpool.

CANOPO

Italian Navy, torpedo boat; 1936; Tirreno; 652 tons; 267x27x 7-5; 19,000 s.h.p.; 34 knots; turbine engines; 3-drum boilers; three 3-9 in. guns, four 37 mm.A.A., two 13 mm.A.A.; 4 T.T.

The Italian torpedo boat *Canopo* was bombed and sunk by British aircraft when lying off Tripoli on May 3rd, 1941. The vessel carried a complement of about 100.

CANOVA

Liverpool, Brazil & River Plate S.N. Co. (Lampton & Holt); 1895; D. & W. Henderson & Co.; 4,637 tons; 410x48-1x26-2; 564 n.h.p.; 14 knots; triple-expansion engines.

The steamship *Canova* was torpedoed and sunk by a submarine 15 miles S. of Mine Head, Co. Waterford, on December 24th, 1917. Seven men were killed. The captain was among the survivors.

CANTABRIA

A. F. Perez; 1919; J. Coughlan & Sons; 5,649 tons; 410-5x54-1x27-5; 532 n.h.p.; triple-expansion engines.
The Spanish steamship *Cantabria* was sunk by gunfire from the insurgent warship *Nadir* about eight miles E.N.E. of Cromer on November 2nd, 1938, during the Spanish Civil War.

CANTERBURY

H.W. Dillon & Sons; 1907; Northumberland S.B. Co.; 4,209 tons; 360-2x48x28; 365 n.h.p.; triple-expansion engines.
The British cargo ship *Canterbury* was wrecked on the night of February 3rd/4th, 1913, off Kagara Shima while on a voyage from Vladivostok to Copenhagen with a cargo of beans.

CANTON

W. R. Corfield & Co.; 1869; C. Mitchell & Co.; 1,823 tons; 280x33-9x25-1; 150 h.p.; compound engines.
The British cargo ship *Canton* was wrecked in October, 1894, in the Straits of Magellan while on a voyage from Maryport to Corral with a cargo of rails.

CANTON

A/B Svenska Ostasiatiska Kompaniet; 1922; A/B Oresundsvarvet; 5,779 tons; 436x56-2x27; 988 n.h.p.; oil engines.
The Swedish motorship *Canton* was torpedoed and sunk by a German submarine on August 9th, 1940, 70 miles off Tory Island, Ireland. Sixteen lives were lost.

CANTON

Cie. Asiatique de Nav.; 1915; G. Seebeck A/G; 1,581 tons; 241-6x36-1x19-3; 218 n.h.p.; triple-expansion engines.
The French steamship *Canton* struck a mine and sank in November, 1942, off the coast of Cochin China.

CANTON MARU

Toa Kaiun K.K.; 1928; Uruga Dock Co.; 2,820 tons; 300 X45x24-7; 435 n.h.p.; triple-expansion engines.
The steamship *Canton Maru* was torpedoed and sunk by the U.S. submarine *Flying Fish* on July 2nd, 1943, S. of Haitan Island, Formosa Strait.

CAP ARCONA

Hamburg-Sud-Amerikanische Dampfsch. Ges.; 1927; Blohm & Voss; 27,561 tons; 643-6x84-6x41-9; turbine engines.
The German steamship *Cap Arcona* was bombed by Allied aircraft, caught fire and capsized on May 4th, 1945, in Neustadt Bay. The ship drifted ashore and became a total wreck.

CAP PADARAN

Minister of War Transport (Ellerman Lines); 1922; Ateliers et Chantiers de la Loire; 8,009 tons; 417-7x55-1x34-4; turbine engines.
The British steamship *Cap Padaran* was torpedoed and sunk by a German submarine on December 9th, 1943, 20 miles off Crotona, Italy.

CAP TRAFALGAR

Hamburg-Sudamerikanische Dampfsch. Ges.; 1913; Akt. Ges. "Vulcan"; 18,710 tons; 590-4x72-2x39-6; 18 knots; triple-expansion engines & L.P. turbine; two 4.1 in. guns, six pom-poms.
At the outbreak of the First World War the *Cap Trafalgar* was lying in the River Plate awaiting an opportunity to slip out and meet the German gunboat *Eber*. The liner was a most suitable ship for commerce-raiding and on September 1st, somewhere off Bahia Blanca, she took on board from the gunboat a number of naval ratings and two 4.1 in. guns and six pom-poms. On the morning of September 14th, 1914, off the western end of the island of Tinidad, she was surprised in the act of coaling by the British auxiliary cruiser *Carmania*, 19,524 tons, Capt. N. Grant, R.N. At first she made off at high speed, but later turned about and prepared to engage. Both ships began firing at 7,500 yards, the 4-7 in. guns of the *Carmania* doing great damage to the hull of the enemy. The fire

from the *Cap Trafalgar* was at first too high, but as the ships closed she began to score, setting the *Carmania* on fire under the fore-bridge and cutting her main water pipe so that the fire could not be got under control.

After an engagement lasting one hour and forty minutes the *Cap Trafalgar* was heavily on fire and sinking. Towards the end of the action she had attempted to escape but her engines were not equal to the strain and she finally capsized to port and sank by the head. Five boats crowded with survivors were picked up by the German colliers, the *Carmania* being still on fire and too badly mauled to render assistance.

The fierceness of the fight may be judged from the fact that the *Carmania* was hit by 79 projectiles. All her navigational instruments and communicating gear were destroyed and she was escorted to port in a very battered condition by the cruiser *Cornwall*.

The casualties were nine killed and 26 wounded on the *Carmania*, while only 279 of the *Cap Trafalgar's* company reached Buenos Aires, where they were interned.

CAPACITAS

Soc. Anon. diNav. "Mare Nostrum"; 1920; Ansaldo San Giorgio; 5,371 tons; 393-2x51-5x28-1; turbine engines.
The Italian steamship *Capacitas* was torpedoed and sunk by a British submarine on June 30th, 1941, seven miles from San Vincenzo, S. of Leghorn.

CAPBRETON

Cie. des Chargeurs Francais; 1912; Smith's Dock Co.; 1,464 tons; 247-6x38-1x17-4; 162 n.h.p.; triple-expansion engines.
The French steamship *Capbreton* was torpedoed and sunk by a German submarine in the Bay of Biscay on July 14th, 1918.

CAPE ANTIBES

Lyle Shipping Co.; 1903; W. Dobson & Co.; 2,549 tons; 325-7 X45-3x20-3; 261 n.h.p.; triple-expansion engines.
The British ship *Cape Antibes* hit a mine and sank at the entrance to the White Sea on October 21st, 1915. Six lives were lost.

CAPE BRETON

Dominion Coal Co. (S.S. Carbon Co.); 1890; Osbourne, Graham & Co.; 1,764 tons; 258x37x16-8; 175 n.h.p.; triple-expansion engines.
The Canadian ship *Cape Breton* was wrecked on March 7th, 1920, on the south-east point of Scatari Island, C.B. She was on a voyage from Halifax to Louisburg, C.B.

CAPE CLEAR

Lyle Shipping Co.; 1939; Lithgows; 5,085 tons; 431-8x56-2 X24-8; 599 n.h.p.; oil engines.
On a voyage from Busreh to Suez and Hampton Roads the British motorship *Cape Clear* was sunk in a collision with the *Henry Dear* born on August 21st, 1944, in the Gulf of Suez.

CAPE CORSO

Lyle Shipping Co.; 1929; Lithgows; 3,807 tons; 352-5x50-5x25; 389 n.h.p.; 10-5 knots; triple-expansion engines.
The steamship *Cape Corso*, Capt. W. C. Montgomery, was steaming in convoy to Russia on May 2nd, 1942, when she was attacked by German torpedo-bombers and sunk. Of her crew of 56 there were only six survivors, and three of these were wounded. Capt. Montgomery went down with the vessel.

CAPE DECISION

U.S. War Shipping Administration; 1942; Pennsylvania Ship-yards Inc.; 5,106 tons; 393-2x60-1x24-9; oil engines.
The American motorship *Cape Decision* was torpedoed, shelled and sunk by a German submarine on January 27th, 1943, on a voyage from Charleston to Dakar.

CAPE FINISTERRE

Cape Finisterre S.S. Co. (Lyle Shipping Co.); 1907; Russell & Co.; 4,380 tons; 385x49-8x18-4; 410 n.h.p.; 10 knots; triple-expansion engines.
The steamship *Cape Finisterre* was torpedoed and sunk by a German submarine one mile S.S.E. of the Manacles Buoy, Cornwall, on November 2nd, 1917. The captain and 34 of the crew were killed.

CAPE HOWE

CAPE HOWE

Lyle Shipping Co.; 1930; Lithgows; 4,443 tons; 375x53x25-6; 413 n.h.p.; triple-expansion engines.

The British steamship *Cape Howe*, on Admiralty service, was sunk by enemy action on June 21st, 1940. Thirteen men on a raft, picked up about 150 miles off Ushant on the 27th, were the only survivors.

CAPE NELSON

Lyle Shipping Co.; 1929; Lithgows; 3,807 tons; 325-5x50-5x25; 389 n.h.p.; triple-expansion engines.

The British steamship *Cape Nelson* was torpedoed and sunk by a German submarine on February 23rd, 1941, on a voyage from Hull to New York.

CAPE RECIFE

Mitchell Com & Co.; 1898; Wigham Richardson & Co.; 5,394 tons; 418x54x20-1; 494n.h.p.; quadruple-expansion engines.
The British steamship *Cape Recife* went ashore and broke up on February 20th, 1929, at Seal Point, Cape St. Francis, Cape Colony, while on a voyage from Table Bay to Port Natal.

CAPE SAN JUAN

U.S. War Shipping Administration; 1943; Consolidated Steel Corp.; 6,711 tons; 396-5x60-1x25-8; turbine engines.
The American steamship *Cape San Juan*, Captain Walter M. Strong, was torpedoed and sunk by a Japanese submarine on November 11th, 1943. She was bound from Honolulu to Midway Island with some 1,400 troops on board, 70 of whom were killed.

CAPE VERDE

Lyle Shipping Co.; 1941; Lithgows; 6,914 tons; 432-7x56-2x34-3; 490 n.h.p.; oil engines.
The British motorship *Cape Verde* was torpedoed and sunk by a German submarine on July 9th, 1942, about 150 miles E. of Trinidad, on a voyage from Suez to New York.

CAPE OF GOOD HOPE

Lyle Shipping Co.; 1925; Lithgows; 4,963 tons; 405x52-2x27-5; 490n.h.p.; oilengines.
The British motorship *Cape of Good Hope* was torpedoed and sunk by a German submarine on May 11th, 1942, on a voyage from New York to Table Bay.

CAPEL

British Navy, frigate; 1943; United States; 1,085 tons; 289 X 35 X—; 6,000s.h.p.; 20 knots; diesel engines; three 3 in. guns, four 20 mm.
The frigate *Capel*, Lt. B. G. Heslop, D.S.C., was torpedoed and sunk by a submarine off Cherbourg on December 26th, 1944. Nine officers, including Lt. Heslop, and 68 ratings were killed.

CAPELLA

Bans H. Pettersen; 1875; H. F. Ulrichs; 948 tons; 185-7x32-4x19-3.
The Norwegian iron barque *Capella* was bound for Table Bay with timber when she was wrecked off Bovbjerg, Jutland, on November 22nd, 1903. Fifteen of the crew were drowned.

CAPILLO

U.S. Maritime Commission; 1920; American International S.B. Corpn.; 5,135 tons; 390x54-2x27-8; turbine engines.
The American steamship *Capillo* was bombed, set on fire and sunk by Japanese aircraft at Manila on December 31st, 1941.

CAPIRA

North Atlantic Transport Co. Inc.; 1920; J. F. Duthie & Co.; 5,625 tons; 410-3x54-2x27-7; 359n.h.p.; triple-expansion engines.
The Panamanian steamship *Capira* was torpedoed and sunk by a German submarine on August 31st, 1942, on a voyage from New York to Glasgow. Five of her crew were killed.

CAPITAINE EDMOND LABORIE

Ets. Odon de Lubersac; 1923; Atel. & Ch. de la Seine Marit.; 3,087 tons; 313-6x46-4x20-1; 149n.h.p.; triple-expansion engines.

The French steamship *Capitaine Edmond Laborie* struck a mine and sank on October 24th, 1939, about two miles N. of the Inner Dowsing lightship.

CAPITAINE LEDIABAT

Union Industrielle & Mar. Soc. Francaise d'Arm.; 1922; Atel. & Ch. de la Seine Marit.; 3,107 tons; 311-8x45-9x23-6; 226n.h.p.; triple-expansion engines.
The French steamship *Capitaine Le Diabat* was bombed and sunk by Allied aircraft on July 14th, 1943, N.E. of Sardinia.

CAPITAINE LUIGI

Soc. Mar. de Transp. & d'Affret.; 1922; Chant. Nav. Francais; 3,176 tons; 313-6x45-9x20-5; 235n.h.p.; triple-expansion engines.
The French steamship *Capitaine Luigi* struck a mine and sank on January 12th, 1944, off Marseilles.

CAPITANO A. CECCHI

Italian Government; 1934; Eriksbergs M/V A/B; 2,321 tons; 312-8x40-7x24-6; 543 n.h.p.; oilengines.
The Italian motor vessel *Capitano A. Cecchi* was intercepted by British warships and sunk by gunfire on May 8th, 1941, about 2¹/₂ miles off Benghazi.

CAPO ARMA

Cia. Genovese di Nav. a Vap. S.A.; 1905; Palmers' Co.; 3,175 tons; 363-3x48-3x20-8; 478 n.p.h.; triple-expansion engines.
The Italian steamship *Capo Arma* was torpedoed and sunk by a British submarine on May 29th, 1942, about 70 miles N.N.W. of Benghazi.

CAPO DI MONTE

Lloyd Sabauda Soc. Anon. per Azioni; 1917; Kawasaki Dockyard Co.; 5,870 tons; 385x51x36; 440 n.h.p.; triple-expansion engines.
The Italian steamship *Capo di Monte* was torpedoed and sunk by a submarine on October 23rd, 1917, in the Mediterranean.

CAPO FARO

Cia. Genovese di Nav. a Vap. S.A.; 1905; Workman Clark & Co.; 3,476 tons; 384-7x49-3x21-8; 379n.h.p.; triple-expansion engines.
The Italian steamship *Capo Faro* was bombed and sunk by British aircraft on November 30th, 1941, in the Ionian Sea.

CAPO ORSO

Cia. Genovese di Nav. a Vap. S.A.; 1916; Maryland Steel Co.; 3,149 tons; 327-2x46-2x22-9; 449n.h.p.; triple-expansion engines.
The Italian steamship *Capo Orso* was bombed and sunk by British aircraft on February 16th, 1943, S.W. of Sicily.

CAPO PINO

Italian Government; 1923; Atel. & Ch. de Gironde; 4,785 tons; 362⁹/₁₆x49-2x24-5; triple-expansion engines.
The Italian steamship *Capo Pino* was formerly the French *Aveyron*, taken over by the Italians. She was torpedoed and sunk on February 8th, 1944, in the vicinity of Suda.

CAPO VADO

Cia. Genovese di Nav. a Vap. S.A.; 1906; Swan, Hunter & Wigham Richardson; 4,391 tons; 376-7x51x17-7; 378n.h.p.; triple-expansion engines.
The Italian steamship *Capo Vado* was intercepted by British warships and sunk by gunfire on November 12th, 1940, 12 miles off Saseno.

CAPO VITA

Cia. Genovese di Nav. a Vap. S.A.; 1916; Northumberland S.B. Co.; 5,683 tons; 400x53x32-3; 532n.h.p.; triple-expansion engines.
The Italian steamship *Capo Vita* was torpedoed and sunk by a British submarine on March 9th, 1941, in the vicinity of Capo dell'Armi.

CAPRELLA

Anglo-Saxon Petroleum Co.; 1931; Hawthorn, Leslie & Co.; 8,230 tons; 451-3x62x34-1; 714 n.h.p.; oil engines.

The motor tanker *Caprella* was torpedoed and sunk by a German submarine on October 19th, 1940, on a voyage from Curacao to the River Mersey.

CAPRERA

Ferrovie dello Stato (Italian State Railways); 1910; Fratelli Orlando & Co.; 1,875 tons; 305-3x36-3x20-2; 393 n.h.p.; quadruple-expansion engines.

The Italian steamship *Caprera* was torpedoed and sunk by a submarine on February 5th, 1918, in the Mediterranean.

CAPRI

R. Nicholson & Sons; 1879; Palmers'Co.; 1,530 tons; 255 X 32-2x20-4; 160n.h.p.; compound engines.

The British cargo ship *Capri* was wrecked on December 2nd, 1887, on Kentish Knock, Essex. She was carrying a cargo of barley from Gheish, Russia, to Boston, Lincolnshire.

CAPRIVI

Aktieselsk. Caprivi; 1892; Ropner & Son; 2,932 tons; 315 x 40-5x20-3; 256n.h.p.; triple-expansion engines.

The Norwegian steamship *Caprivi* hit a mine and sank off the north coast of Ireland on April 23rd, 1915.

CAPTAIN

British Navy, turret-ironclad; 1870; Lairds; 4,272 tons; 335 x 53-2x23-5; 900 n.h.p.; 14 knots; twin-screw, two pairs double trunk engines, one pair to each screw; four 25-ton, 600pdr. m.l.r. guns, two 6%-ton, 100 pdr.

The turret ironclad *Captain*, Capt. Hugh Talbot Burgoyne, was designed by Capt. Cowper Phipps Coles, R.N., who had experimented with an elementary type of ironclad when serving in the Crimean War. At the end of the war he retired to continue his experiments, finally devising a ship of low freeboard, carrying two revolving turrets each mounting two heavy guns. The success of *Monitor* in the American Civil War had created great interest in naval circles and it was felt that the time had come for a radical change in the design of large warships. Outside these professional circles a great controversy was occupying the public mind regarding the merits of the broadside ship against the turret ship, the balance of opinion being on the side of Coles.

In 1866 Coles prevailed upon the Admiralty to authorise the building of a turret ironclad. A sum of £440,000 was voted by Parliament and the vessel was laid down at Laird's Yard. She was commissioned early in 1870, being accepted with some misgiving by certain naval officers. The Controller of the Navy was one of the foremost critics, and the Admiralty made the unprecedented stipulation that Coles and Lairds would be held responsible for any untoward developments.

The *Captain* was heavily masted, with raised fore-castle and quarter deck connected by a light hurricane deck. Her freeboard was to be eight feet, but owing to an error which made the ship 800 tons heavier than designed this freeboard was reduced to six feet. Her main armament consisted of four 25-ton guns mounted in twin turrets and placed on the centre line. Masts and spars weighed 125 tons.

For the first few months of her career the behaviour of the ship at sea was excellent, though her low freeboard was still a cause of concern to many experienced naval officers. Capt. Burgoyne was advised to proceed under steam in rough weather and not to rely on sail.

On September 6th, 1870, when one of a squadron crossing the Bay of Biscay, the ship heeled over to an alarming extent during sailing exercises. The wind, which had been moderate at first increased to a full gale by 11 p.m., and the rolling of the vessel became much more pronounced. She was immediately astern of *Lord Warden*, flagship of Admiral Sir A. Milne, and this officer and his staff watched her during the intervals in the rain squalls.

At daylight the ironclad was not in sight, and a subsequent search by the squadron failed to find her. The gunner, Mr. James May, and 17 ratings were the sole survivors. The number lost was 483, including Capt. Coles who was on board as a passenger, and Capt. Burgoyne.

The survivors stated that the *Captain* capsized in a squall at about 12.20 on the morning of the 7th while endeavouring to take in sail. She gradually rolled to starboard and then turned completely over, floating for a few minutes bottom upwards and went down by the stern. Capt. Burgoyne was on deck when the vessel capsized. He was washed overboard and was last seen clinging to the steam pinnace.

A Court Martial concluded its findings as follows "... the Court find it their duty to record the conviction they entertain that the *Captain* was built in deference to public opinion as expressed in Parliament and other channels, and in opposition to the views and opinions of the Controller of the Navy ...".

CAPTAIN GEORGE

Valeria Compania Naviera Soc. Anon.; 1943; Oregon S.B. Corp., 7,187 tons; 441-6x57x27-8; triple-expansion engines.

The Greek steamship *Captain George*, Capt. G. Karamezis, left New Orleans on November 3rd, 1962, for Umm Said with a cargo of sulphur, oil and nitrate. She called at Houston to load 400 tons of mining explosives for Tripoli, Libya. At 10.34 p.m. on the 14th, the ship reported that she was on fire following an explosion in the hold containing the sulphur, in rough weather with waves 30-40 feet in height, giving a position about 300 miles N.E. of Bermuda. The fire could not be controlled and some of the explosives were jettisoned. At about 7 p.m. on the 15th, the Liberian tanker *Virginia* arrived on the scene but was unable to approach closely because of the heavy seas. She was joined soon afterwards by the Liberian tanker *Trinity Navigator*. At about 9 p.m. patrolling aircraft reported that the crew of the *Captain George* had left the ship in two boats, one with five men and the other with 20. This second boat capsized and the aircraft dropped rafts to help the 20 men in the water. The five men in the first boat were picked up by the *Trinity Navigator* but only two of the remaining 20 were saved and taken aboard the *Virginia*. The *Captain George* eventually sank on the 18th.

CAPULET

Bear Creek Oil & Shipping Co.; 1932; Swan, Hunter & Wigham Richardson; 8,190 tons; 460-4x59-5x34-1; 653 n.h.p.; oil engines.

The British tanker *Capulet*, from Curacao to Scapa Flow with 11,200 tons of fuel oil, was torpedoed and sunk by a German submarine on April 28th, 1941, with the loss of nine lives.

CARAIBE

Compagnie Generale d'Armements Maritimes; 1932; Atel. & Ch. de France; 4,048 tons; 325-5x52-5x28-7; 667 n.h.p.; turbine engines.

The French steamship *Caraibe* was sunk by Allied carrier-based aircraft on March 14th, 1943, 10 miles N.W. of Marittima.

CARAQUET

Royal Mail Steam Packet Co.; 1894; Harland & Wolff; 4,890 tons; 400-5x47-3x26-9; 324 n.h.p.; triple-expansion engines.

The British cargo ship *Caraquet* went ashore on June 25th, 1923, on Northern Reef, 12 miles north of Bermuda, while on a voyage from Halifax, N.S., to the West Indies.

CARARE

Elders & Fyffes; 1925; Cammett Laird & Co.; 6,878 tons; 425-2 X55-1X29-9; 622 n.h.p.; 14 knots; triple-expansion engines.

The liner *Carare*, Capt. D. A. Jack, struck a mine and sank in the Bristol Channel on May 28th, 1940. Seven of her crew and three passengers were killed. Capt. Jack was among the survivors.

CARASA

Cia. Naviera Vascongada; 1911; W. Pickersgill & Sons; 2,099 tons; 284x43'2x18-8; 214 n.h.p.; triple-expansion engines.

The Spanish steamship *Carasa* was torpedoed and sunk by a German submarine on August 25th, 1918, in the Bristol Channel.

CARAWA

Australian Government; 1907; R. Craggs & Sons; 3,530 tons; 350X49-8X23-4; 322 n.h.p.; triple-expansion engines.

The Australian cargo ship *Carawa* was wrecked on March 27th,

CARBINEER

1920, on San Cristobal Island, Galapagos Islands, while on a voyage from Port Arthur, Texas, to Australia with a cargo of gasoline.

CARBINEER

Fisher-Renwick Manchester-London Steamers; 1907; Tyne L.S.B.Co.; 1,266 tons; 220x33-1x14-8; 144 n.h.p.; triple-expansion engines.

The British cargo ship *Carbineer* was sunk in a collision on April 22nd, 1914, off the Owers light on a voyage from London to Manchester.

CARDENAL CISNEROS

Spanish Navy, armoured cruiser; 1897; Ferrol Dockyard; 6,889 tons; 347-7x60-2x25; 15,000 i.h.p.; 20-7 knots; triple-expansion engines; two 11 in. guns, eight 5 • 5 in., two 2 • 7 in., four 2-2 in., four 1-4 in., 2 m.g.; 5 T.T.

The *Cardenal Cisneros* had a complement of 497 officers and men. She struck on a submerged rock in the Bay of Muros on Saturday, October 28th, 1905, and foundered in 40 minutes, but without loss of life, all her crew taking to the boats and reaching the shore in safety.

CARDIFF HALL

E. Nicholl & Co.; 1895; J. Blumer & Co.; 2,605 tons; 300x41 x1S-5; 224 n.h.p.; triple-expansion engines.

The British cargo ship *Cardiff Hall* was wrecked on March 19th, 1911, at Mishkak Point near the entrance to Novorossisk Bay. She was on a voyage from Novorossisk to Antwerp with a cargo of grain.

CARDIFF HALL

W. A. Young & Co.; 1912; W. Doxford & Sons; 3,994 tons; 350x50-8x25-6; 241 n.h.p.; 9 knots; triple-expansion engines.

The steamship *Cardiff Hall* left Buenos Aires on December 7th, 1924, under Capt. D. T. Bowen, for Cork with a cargo of maize valued at £60,000. The ship sailed from St. Vincent, C.V., on the 31st when all was well, but on the night of Tuesday, January 13th, 1925, she ran on the Seven Head rocks in Clonakilty Bay, Co. Cork, and foundered very shortly afterwards. There were no survivors but one witness; at an inquest on two bodies washed ashore stated that he heard a ship's siren at about 8.30 p.m. With two other men with lanterns he went to the edge of the cliffs but could not see any survivors though he heard whistles and cries.

CARDINA

Cardina Steamship Co. Inc.; 1919; J. F. Duthie & Co.; 5,586 tons; 410-3x54-2x27-7; 359 n.h.p.; triple-expansion engines.

The Panamanian steamship *Cardina* was torpedoed and sunk by a German submarine on June 15th, 1943, on a voyage from Buenos Aires to Trinidad.

CARDITA

Anglo-Saxon Petroleum Co.; 1931; Swan, Hunter & Wigham Richardson; 8,237 tons; 451-3x62x34; 4,000 i.h.p.; 12-5 knots; oil engines.

The motor tanker *Cardita*, Capt. J. O. Evans, was torpedoed by a German submarine on December 31st, 1941, about 250 miles NW. of the Butt of Lewis in the Hebrides. The vessel remained afloat for three days, but by January 3rd, 1942, it was no longer possible to navigate her and Capt. Evans abandoned ship. Two men were killed on board, 15 were drowned and ten died in the boats.

CARDONIA

Lykes Bros. Steamship Co.; 1920; American International S.B. Corp.; 5,104 tons; 390x54-2x27-8; turbine engines.

The American steamship *Cardonia* was shelled and sunk by a German submarine on March 7th, 1942, off St. Nicholas Mole, Windward Passage.

CARDROSS

James Patrick & Co. Pty.; 1919; Swan, Hunter & Wigham Richardson; 1,896 tons; 290-3x42-5x18-9; 318 n.h.p.; triple-expansion engines.

The British cargo ship *Cardross* was sunk in collision with the *Fiona* on December 14th, 1940, in 34° 07' S. 151° 32' E., while on a voyage from Sydney to Melbourne.

CARIB

Clyde S.S. Co.; 1882; W. Hamilton & Co.; 2,087 tons; 288-4X 36-2x22-4; 241 n.h.p.; compound engines.

The American steamship *Carib* struck a mine and sank in the North Sea on February 23rd, 1915.

CARIBBEAN

Royal Mail Steam Packet Co.; 1890; Fairfield Co.; 5,824 tons; 420 X 4 9 - 8 X 25; 1,000 n.h.p.; 16 knots; triple-expansion engines.
The liner *Caribbean*, purchased from the Union-Castle Line in 1913 by the R.M.S.P. Co., was well known on the Southampton-Cape run for nearly 15 years under her former name of *Dumottar Castle*. In 1899 she carried General Sir Redvers Buller to take up supreme command in the South African War. She also conveyed Lord Roberts and Lord Kitchener to the war a few months later. Yet another distinction awaited her for she was chosen to be the ship on which the reception to mark the amalgamation of the Union and Castle Lines was held. Here, in the presence of Sir Donald Currie and Sir Francis Evans supported by a great number of distinguished guests, the flag of the new line was run up. This was the final big event in her career and soon afterwards she was relegated to the secondary service of the new line and finally became a luxury-cruise liner under the management of Sir Henry Lunn. In 1913 she was sold by the Union-Castle Line to the R.M.S.P. Co., and her name was changed to *Caribbean*. At the outbreak of the First World War she served as a transport and then an auxiliary cruiser.

On September 26th, 1915, when on her way to Scapa she encountered very heavy weather off Cape Wrath which disabled her to such an extent that all attempts by the cruiser *Birkenhead* and several tugs to take her in tow had to be abandoned. She foundered at 7.30 on the morning of the 27th, taking with her 15 of her crew who could not be got off in time.

CARIBBEE

W. H. A. Walker; 1878; London & Glasgow Co.; 1,944 tons; 301-5x34-2x24; 194 n.h.p.; compound engines.

The British ship *Caribbee* foundered in June, 1908, in 31° N., 78° W., on a voyage from Matanzas to New York with a cargo of molasses.

CARISE

Servicios Maritimos del Pacifico; 1917; Stavanger Stob. & Dok.; 1,068 tons; 225 • 1 X 33 • 1 X 13 • 2; triple-expansion engines.

The Mexican steamship *Caribe* foundered during a storm on October 27th, 1959, off Manzanillo.

CARIBOO

Elder, Dempster & Co.; 1924; John Brown & Co.; 7,275 tons; 440-4x59-2x31-1; 667 n.h.p.; turbine engines.

On November 24th, 1928, the British cargo ship *Cariboo* struck a rock and sank at Keis Kamma, 40 miles south of East London while on a voyage from Beira to New York.

CARIBOU

Newfoundland Government; 1925; New Waterway S.B. Co.; 2,223 tons; 266x41-3x23-4; 456 n.h.p.; triple-expansion engines.

The Newfoundland railway steamship *Caribou*, Capt. Benjamin Tavernes, was torpedoed and sunk by a German submarine on October 14th, 1942, in the Cabot Strait, on a voyage from Sydney, Nova Scotia, to Port aux Basques. Thirty-one of her crew and 105 passengers were lost.

CARIBSEA

Stockard S.S. Corp.; 1919; McDougall Duluth Co.; 2,609 tons; 251x43-7x25-8; 352 n.h.p.; triple-expansion engines.

The American steamship *Caribsea* was torpedoed and sunk by a German submarine at 2 a.m. on March 11th, 1942, in the Gulf of Mexico, on a voyage from Santiago to Norfolk, Va. The ship sank in three minutes and there were only seven survivors.

CARIBSTAR

Stockard S.S. Corp.; 1919; American S.B. Co.; 2,592 tons; 251x43 • 6x26 • 1; 352 n.h.p.; triple-expansion engines.

The American steamship *Caribstar* was torpedoed and sunk by a German submarine on October 4th, 1942, in the Gulf of Mexico. Five of her crew were killed.

CARIGNANO

Maritima Italiana Soc. Anon.; 1899; *N. Oderofu A.*; 2,688 tons; 299 • 9 x 40 • 1 x 18 • 2; 224 n.h.p.; triple-expansion engines.

The Italian steamship *Carignano* was torpedoed and sunk by a submarine on January 25th, 1918, in the Mediterranean.

CARINTHIA

Cunard S.S. Co.; 1895; *London & Glasgow S.B. & E. Co.*; 5,598 tons; 445x49x31-9; 766 n.h.p.; triple-expansion engines.

The British cargo ship *Carinthia* was wrecked in May, 1900, at Gravois Point, Hayti, while on a voyage from New Orleans to Table Bay with a cargo of mules.

CARINTHIA

Cunard White Star Line; 1925; *Vickers*; 20,277 tons; 600-7x 73-8x40-7; 2,437 n.h.p.; 16-5 knots; turbine engines. The *Carinthia*, Capt. J. F. B. Barrett, was taken over by the Admiralty early in the Second World War for service as an auxiliary cruiser. On June 7th, 1940, when W. of Ireland the *Carinthia* was torpedoed and sunk by a German submarine. She remained afloat for some time and all her crew were taken off in safety except for two officers and two ratings who were killed by the explosion.

CARL D. BRADLEY

United States Steel Corporation; 1927; *American S.B. Co.*; 10,028 tons; 623-2x65-2x30-2; turbo-electric engines. The steamship *Carl D. Bradley* foundered during a gale off Gull Island, Lake Michigan, on November 18th, 1958. There were only four survivors; 18 bodies were later washed ashore.

CARL FRITZEN

Johs. Fritzen & Sohn vorm. Lexzau Scharbau & Co.; 1920; *Monmouth S.B. Co.*; 6,594 tons; 412-4x55-8x34-5; turbine engines. The German steamship *Carl Fritzen* was intercepted by a British warship on September 4th, 1939, and sunk by gunfire off the River Plate.

CARL HENCKEL

RederiA/BHenal; 1882; *T. Turnbutt & Son*; 1,352 tons; 242-5 x 34 • 1 x 18 • 1; 143 n.h.p.; compound engines. The Swedish steamship *Carl Henckel* struck a mine and sank on December 21st, 1939, about 90 miles E. of Aberdeen on a voyage from Leith to Stockholm with coal. Ten of her crew were lost.

CARL RAHTKENS

Franz Rahtkens & Co.; 1885; *J. Readhead & Co.*; 1,616 tons; 259x37x17-8; 168 n.h.p.; compound engines. The British cargo ship *Carl Rahtkens* was wrecked when leaving Poti in January, 1901, at the beginning of a voyage to Liverpool with a cargo of manganese ore.

CARLIER

Cie. Maritime Beige (Lloyd Royal) S.A.; 1915; *Flensburger Schiffsb. Ges.*; 7,217 tons; 471-1x60-9x28-6; 518 n.h.p.; triple-expansion engines. The Belgian steamship *Carlier* was bombed and sunk by German aircraft on November 11th, 1943, off the coast of Algeria. Sixty-seven crew and passengers were lost.

CARLISLE

British Navy, anti-aircraft cruiser; 1918; *Fairfield Co.*; 4,200 tons; 425X43-5X16-5; 40,930 s.h.p.; 29 knots; turbine engines; ten 4 in. A.A. guns, 14 smaller.

The anti-aircraft cruiser *Carlisle* had been converted from a light cruiser carrying 6 in. guns to anti-aircraft purposes about a year before the outbreak of the Second World War. In the Norwegian campaign (April 1940) she was used to carry troops to Molde and Aandalsnes. Here, in company with her sister ship, the *Curacoa*, she was subjected to intense bombardment, but managed to escape with little damage. A few weeks later she was ordered to the Mediterranean, where she took part in the battle for Crete, and also acted as an escort for convoys.

On October 9th, 1943, a few weeks after the Italian surrender, *Carlisle* and four destroyers were making a sweep in the Scarpanto Strait, as the Germans were attempting to reinforce their troops on the Greek islands. They became a target for a large force of German

dive-bombers and the anti-aircraft cruiser was hit and disabled. Attempts to take her in tow failed and she sank later in the day.

CARLISLE CASTLE

J. Robertson; 1868; *R. & H. Green*; 1,484 tons; 229-8x37-8 X22-8

The clipper ship *Carlisle Castle* with 26 persons on board was off the coast of Western Australia on July 12th, 1899. There was a heavy gale and thick weather and the ship was wrecked near Rockingham, with the loss of 11 lives.

CARLO

Soc. Commerciale Italiana di Nav.; 1912; *Cant. Nav. Riuniti*; 5,572 tons; 396-3x51-6x28; 335 n.h.p.; triple-expansion engines.

The Italian steamship *Carlo* was torpedoed and sunk by a German submarine west of Gibraltar on July 30th, 1917.

CARLO DEL GRECO

Soc. Anon. di Nav. Oriens; 1941; 6,837 tons; oilengines.

The Italian motorship *Carlo del Greco* was torpedoed and sunk by a British submarine on December 13th, 1941, 15 miles S. of Taranto.

CARLO MARTINOLICH

Nav. Carlo Martinolich; 1928; *Swan, Hunter & Wigham Richardson*; 4,208 tons; 385-3x52x24-9; 331 n.h.p.; triple-expansion engines.

The Italian steamship *Carlo Martinolich* was torpedoed and sunk by a British submarine on January 9th, 1941, off Cape Spartivento.

CARLO MIRABELLO

Italian Navy, destroyer; 1914; *Ansaldo*; 1,383 tons; 331-4x32 x10-6; 35,000 s.h.p.; 35 knots; turbine engines; *Yarrow boilers*; eight 4 in. guns, two 40 mm. A.A., 2 m.g.; 4 T.T. The Italian destroyer *Carlo Mirabello* struck a mine and sank two miles S. of Cape Dukato Light on May 21st, 1941. The vessel carried a complement of about 150.

CARLOS HAVERBECK

Cia. Naviera Haverbeck & Skalweit S.A.; 1930; *Helsingors Jernsk. & Msk.*; 2,872 tons; 326-8x48-3x19-8; compound engines.

The Chilean steamship *Carlos Haverbeck* was driven ashore and wrecked by the tidal wave caused by an earthquake on May 22nd, 1960, in Corral Bay, Chile.

CARLTON

R. Chapman & Son; 1924; *Short Bros.*; 5,162 tons; 390x53-5 X28-6; 363 n.h.p.; triple-expansion engines.

The British steamship *Carlton* was torpedoed and sunk by an Italian submarine on December 20th, 1940, on a voyage from Newport to Buenos Aires. Thirty-one of her crew of 35 were lost.

CARLTON

Tampa Inter ocean S.S. Co.; 1920; *American International S.B. Corp.*; 5,127 tons; 390x54-2x27-8; turbine engines.

The American steamship *Carlton*, in convoy from Philadelphia to North Russia, was bombed and disabled by German aircraft on May 25th, 1942, 240 miles E.N.E. of Jan Mayen Island. She was taken in tow and after effecting temporary repairs returned to Reykjavik under her own steam on the 29th.

After further repairs she resumed her voyage on June 27th, but was torpedoed and sunk on July 5th about 400 miles N.N.E. of the North Cape.

Two of the crew were killed by the torpedo, 17 others with nine gunners were picked up by German aircraft on July 5th/6th. The remaining 18, less one man who died in the boat, reached a Norwegian port on the 24th.

CARLY

Woolston S.S. Co.; 1892; *W. Gray & Co.*; 3,358 tons; 330-5X43-2x21-6; 279 n.h.p.; triple-expansion engines.

The British cargo ship *Carly* was wrecked on August 23rd, 1916, near La Banche Reef in the Bay of Biscay. She was on a voyage from Villaricos to St. Nazaire with a cargo of iron ore.

CARMEN

CARMEN

Soc. Commerciale di Navigazione; 1914; Cant. Offic. Savoia; 5,479 tons; 389-7x51-5x27-6; 337n.h.p.; triple-expansion engines.

The Italian steamship *Carmen* was torpedoed and sunk by a submarine on December 3rd, 1917, in the Mediterranean.

CARMEN

Costa & Aste; 1925; Cant. Nav. Scoglio Olivi; 1,434 tons; 228-8x38-2x17-7; 77s.h.p.; triple-expansion engines.

The Italian steamship *Carmen* was sunk by a mine or torpedo on September 29th, 1940, W.S.W. of Durazzo.

CARMENSYLVA

Capato & Maori; 1903; Bergens Mek. Varks; 1,601 tons; 245-1x36x15-5; 144n.h.p.; triple-expansion engines.

The Roumanian steamship *Carmen Sylva* was sunk off Crete in May, 1941, in the confused fighting following the German invasion of Greece.

CARMONA

Carmona Steamship Co. Inc.; 1919; Long Beach S.B. Co.; 5,496 tons; 410-5x54-3x27-2; 359n.h.p.; triple-expansion engines.

The Panamanian steamship *Carmona* was torpedoed and sunk by a German submarine on July 18th, 1942, on a voyage from Buenos Aires to Trinidad.

CARNMARTH

E. Handcock & Co.; 1884; Tyne I.S.B. Co.; 1,687 tons; 265 x 36-1x19; 208 n.h.p.; compound engines.

The British collier *Cam Marth* was wrecked in May, 1909, off Cap la Hogue while on a voyage from Barry to Havre.

CARNARO

Lloyd Triestino Soc. Anon. di Nav.; 1913; Clyde S.B. & Eng. Co.; 3,802 tons; 347-4x46-4x22-8; 492 n.h.p.; quadruple-expansion engines.

The Italian steamship *Carnaro* was driven ashore and sank in heavy weather on April 3rd, 1938, off Masamarhu Light, 100 miles S. of Port Sudan.

CARNAL

Peninsular & Oriental Steam Navigation Co.; 1862; Samuda Bros.; 1,776 tons; 294x28-6x17-5; 1,870 i.h.p.; 12 knots; inverted tandem compound engines.

The P. and O. mail steamship *Carnatic* left Suez on her way to Bombay on Sunday, September 12th, 1869, with 230 passengers and crew on board. She was under command of Capt. P. B. Jones, R.N.R. At one o'clock on the morning of the 13th, the ship struck on a coral reef off the island of Shadwan at the mouth of the Gulf of Suez.

At daybreak it was seen that the ship was about three miles from the island and the reef on which she lay was about four feet under water at high tide. There was no panic among the passengers and during the day meals were served as usual. In the evening a committee of the passengers interviewed the captain and came to the fatal decision to spend a second night on board the wreck.

The next morning the boats were provisioned and some of the women and children had been helped into them when at 10.50 a.m. the ship suddenly broke in two. There was at once a scene of confusion and a large number of people were overwhelmed by the wreckage and drowned. Eventually the survivors dragged the ship's boats across the reef and made for the island. Here they lit fires from bales of cotton washed ashore and discharged a rocket. Fortunately this was seen by another P. and O. liner, the *Sumatra*, which took the survivors on board.

The number drowned was 27 of whom 15 were Europeans.

The *Carnatic* was carrying a large consignment of specie of £40,000 value most of which was brought to the surface by divers. In March, 1870, the ship was washed off the reef into deep water, by which time all but £8,000 of the specie had been salvaged.

CARNIA

Lloyd Triestino Soc. Anon. di Nav.; 1923; Cant. San Rocco; 5,451 tons; 404-2x54x29-6; 465 n.h.p.; triple-expansion engines.

The Italian steamship *Carnia* was torpedoed and sunk by a British submarine on March 23rd, 1941, 30 miles N.E. of Brindisi.

CAROLINE MARU

Kokusai Risen Kabushiki Kaisha; 1919; Kawasaki Dkyd. Co.; 4,105 tons; 345 X 48 x 30; 356 n.h.p.; triple-expansion engines.

The Japanese steamship *Caroline Maru* was wrecked on October 7th, 1923, near Ko Notoro, on the west coast of Saghalien.

CAROLUS

Dampskibsacties. Carolus; 1900; Laxevaags Msk. & Jernskb., 1,041 tons; 225-8x32-2x13-3; 97 n.h.p.; triple-expansion engines.

The Norwegian steamship *Carolus* was torpedoed and sunk by a German submarine on January 27th, 1918, in the English Channel.

CAROLUS

Canadian National Steamships; 1919; Osbourne, Graham & Co.; 2,375 tons; 285x43-5x19; 210n.h.p.; triple-expansion engines.

The Canadian steamship *Carolus* was torpedoed and sunk by a German submarine on October 9th, 1942, in the Gulf of St. Lawrence. Eleven of her crew of 30 were lost.

CAROLYN

A. H. Bull Steamship Co. Inc.; 1912; Newport News S.B. & D.D. Co.; 3,209 tons; 313-5x46x22-7; 279n.h.p.; triple-expansion engines.

The American steamship *Carolyn* was torpedoed by a German submarine on March 26th, 1942, caught fire and sank W. of the Bermudas.

CARPATHIA

Cunard S.S. Co.; 1903; C. S. Swan & Hunter; 13,603 tons; 540x64-5x37-4; 1,341 n.h.p.; 15 knots; quadruple-expansion engines.

The Cunard liner *Carpathia* was bound from Liverpool to the United States when she was attacked by a German submarine W. of Ireland on July 17th, 1918. Two torpedoes were fired, the first striking the liner just forward of the engine-room and the second exploding in the engine-room itself. Five men of the engine-room staff were killed by the explosion. The survivors numbered 215, of whom 57 were passengers. The ship sank at 9.15 a.m.

The *Carpathia* was the ship which had rendered great service in picking up the survivors of the *Titanic* (which see).

CARPERBY

Ropner Shipping Co.; 1928; W. Gray & Co.; 4,890 tons; 405 X 53-5x26-5; 505 n.h.p.; 10 knots; triple-expansion engines.

The steamer *Carperby*, Capt. F. Gardiner, with a cargo of coal and coke was in the North Atlantic on March 1st, 1942, when she was torpedoed and sunk by a submarine. All on board, 41 crew and six gunners, were lost.

CARPO

N.V. Maats. Zeevaart; 1949; N.V. Schpsw. "Vooruitgang"; 494 tons; 161-4x28-4x9-5; oilengines.

The Dutch motorship *Carpo*, Swansea for Amsterdam with anthracite, foundered during heavy weather on November 27th, 1954, about 17 miles S.W. of the Lizard. There were no survivors. Two bodies were later washed ashore.

CARRABULLE

Cuba Distilling Co. Inc.; 1920; American International S.B. Corp.; 5,030 tons; 390X54-2X27-8; turbine engines.

The American tanker *Carrabulle*, from New Orleans to San Juan, Puerto Rico, with a cargo of liquid asphalt, was torpedoed and shelled by a German submarine at 4 a.m. on May 26th, 1942. The tanker caught fire and sank with the loss of 22 lives.

CARRICK

Emigrant ship; 1840 (*circa*); 275 tons.
The brig *Carrick* had been chartered as an emigrant ship and left Sligo for Quebec late in April, 1847. She was under command of Capt. Thompson and the voyage across the Atlantic was not exceptional for that time of the year. On entering the St. Lawrence, however, the ship encountered a terrific gale and at 2 o'clock on the morning of May 20th, drove ashore on a shoal 60 miles E. of Cape Rosares. The number of emigrants on board was 200, besides the crew, and of these only 22 persons were saved.

The fury of the seas soon broke the ship into pieces and very little aid could be obtained from the shore.

CARSBRECK

Carslogie S.S. Co.; 1936; *Ayrshire Dockyard Co.*; 3,670 tons; 352•6X50•2X23•8; 346 n.h.p.; triple-expansion engines.
The British steamship *Carsbreck* was torpedoed and sunk by a German submarine on October 24th, 1941, on a voyage from Almeria to Barrow.

CARTAGENA

Maclay & McIntyre; 1879; *Bartram, Haswell & Co.*; 2,241 tons; 301X36•2X25•5; 250 h.p.; triple-expansion engines.
The British ship *Cartagena* was wrecked in November, 1893, near Barfleure on a voyage from Bremen to Cardiff.

CARTHAGE

Compagnie Generale Transatlantique; 1910; *Swan, Hunter & Wigham Richardson*; 5,601 tons; 403x51-3x20-4; 800 n.h.p.; 18.5 knots; triple-expansion engines.
The French transport *Carthage* with a cargo of munitions arrived off Cape Helles, Gallipoli, on July 1st, 1915, and began discharging. The authorities were not sufficiently impressed by the danger of submarine attack and the transport continued to discharge for four days without any precautions being taken. On July 4th, at about 1 p.m. when most of the cargo had been unloaded, the *Carthage* was attacked by the submarine *U-21*, Lt. Com. Otto Hering, and split in two by a torpedo.

CASABLANCA

Oldenburg-Portugiesische Dampfschiffs-Rhederei; 1936; *Deutsche Werft A.G. Bet.*; 2,313 tons; 287-9x45-8x18-1; 304 n.h.p.; compound engines & L.P. turbine.
The German steamship *Casablanca* sank during heavy weather in the North Baltic on November 25th, 1943. There were only two survivors.

CASABLANCA LANDING *see* PRIMAUGUET**CASANARE**

Elders & Fyffes; 1924; *Cammell Laird & Co.*; 5,376 tons; 400-3x51-4x30-4; 447 n.h.p.; 13.5 knots; triple-expansion engines.
The *Casanare*, Capt. J. A. Moore, was torpedoed and sunk by a German submarine on November 3rd, 1940, about 200 miles W. of Ireland. Eight persons were killed. Capt. Moore was among the survivors.

CASCAPEDIA

R. M. Hudson & Sons; 1881; *Sunderland S.B. Co.*; 2,860 tons; 322-5x40x21-8; 300 h.p.; compound engines.
The British cargo ship *Cascapedia* was wrecked in November, 1896, in Crosby Channel. She was on a voyage from Buenos Aires to Liverpool with a cargo of grain and cattle.

CASHIER

T.A. Wilson; 1888; *J.N. Rafuse*; 122 tons; 88-5x24x9-4.
The wooden schooner *Cashier* was run down by an unknown ship on September 20th, 1892. The collision took place off the Grand Banks, Newfoundland, the schooner sinking with 19 of her crew.

CASHMERE

British India Steam Nav. Co.; 1864; *W. Denny & Bros.*; 1,083 tons; 239-1x30-2x19; 200 h.p.; compound inverted engines.
The British India steamship *Cashmere* was lost off Cape Guardafui on July 12th, 1877. Seven men were drowned.

CASPER

American Scantic Line Inc.; 1919; *American International S.B. Corp.*; 4,975 tons; 390x54-2x27-6; turbine engines.
The American steamship *Casper*, on a voyage from New York to Helsingfors, was wrecked on December 14th, 1928, at Point Norra, Grinsoerna, at the entrance to the Gulf of Finland.

CASPIA

Overseas Oil & Transport Co.; 1928; *Armstrong, Whitworth & Co.*; 6,018 tons; 412x53-4x31-6; 533 n.h.p.; triple-expansion engines.
The British tanker *Caspia*, from Haifa to Tripoli, Syria, with 7,000 tons of benzine, was torpedoed and sunk by a submarine on April 16th, 1942, off Beirut. The captain, 23 crew and two gunners were lost.

CASPIAN

Nelson Donkin & Co.; 1894; *Edwards' S.B. Co.*; 3,606 tons; 350x43x26-6; 301 n.h.p.; triple-expansion engines.
The steamship *Caspian* was torpedoed and sunk by a submarine 3 1/2 miles E. of Cape Cervera, Spain, on May 20th, 1917. The captain and 24 men were killed. The chief engineer, the second officer and the ship's gunner were taken prisoner by the submarine.

CASSANDRA

British Navy, light cruiser; 1916; *Vickers*; 4,120 tons; 450 x 42x16; 40,000s.h.p.; 29 knots; turbine engines; Yarrow boilers; five 6 in. guns, two 3 in.; 8 T.T.
The light cruiser *Cassandra*, Capt. E. C. Kennedy, struck a mine just before midnight on December 4th, 1918, when in the Baltic. The *Cassandra* kept afloat for a little over an hour, sinking just after 1 a.m. on December 5th. Of her complement of 344 all except 11 ratings, who had been killed by the explosion, were transferred safely to the accompanying destroyers.

CASSIDAIGNE

Cie. France-Navigation S.A.; 1923; *Fried. Krupp A.G.*; 1,417 tons; 242-9x36-1x15-7; 224 n.h.p.; triple-expansion engines.
The French steamship *Cassidaigne* struck a mine and sank on September 13th, 1940, W. of Sardinia. The ship was carrying demobilized troops from North Africa to Marseilles.

CASTALIA

Anchor Line (Henderson Bros.); 1873; *C. Cornell & Co.*; 2,201 tons; 306-6x34-6x29-2; 424 h.p.; compound inverted engines.
The British iron cargo ship *Castalia* was wrecked on May 20th, 1884, off Denia. She was on a voyage from Valencia to New York with passengers, and a cargo of marble and fruit.

CASTANOS

Morel; 1893; *W. Gray & Co.*; 2,958 tons; 325x42-5x25-8; 258 n.h.p.; triple-expansion engines.
The British cargo ship *Castanos* was wrecked on February 2nd, 1905, on the Hook of Holland. She was on a voyage from Rosario to Rotterdam with a cargo of maize and linseed.

CASTELFIDARO

Italian Navy, destroyer; 1923; *Orlando*; 966 tons; 262-5X 24-8x8-5; 27,000s.h.p.; 34 knots; turbine engines; Thornycroft boilers; four 4 in. guns, two 3 in. A.A., 6 T.T., 10 mines.
The Italian destroyer *Castelfidaro* was lying at Pirasus at the time of the capitulation of Italy on September 8th, 1943. She was seized by the Germans and sunk in shallow water to prevent her sailing to Alexandria to surrender to the Allies. Later she was raised and re-commissioned by the Germans, but was bombed and sunk by Allied aircraft off Crete on June 2nd, 1944. The vessel carried a complement of about 120.

CASTILIAN

Allan Line S.S. Co.; 1898; *Workman Clark & Co.*; 7,441 tons; 470x53-7x25-2; triple-expansion engines.
The British cargo ship *Castilian* foundered in March, 1899, on Gannet Rock Ledge about 10 miles S. by W. of Yarmouth, N.S., while on a voyage from Portland, Me., to Liverpool.

CASTILIAN

CASTILIAN

EllermanLines; 1890; W. Gray & Co.; 1,923 tons; 270-4x37-5 X16-2; 232 n.h.p.; 10 knots; triple-expansion engines.

The steamship *Castilian* was torpedoed and sunk by a submarine 110 miles N.W. by N. of Tory Island on April 18th, 1917. Ten men were killed. The captain was among the survivors.

CASTILLA

Spanish Navy, cruiser; 1881; Spain; 3,342 tons; 246 x45-9'X 20-9; 4,000 h.p.; 14 knots; compound engines; four 5-9 in. guns, two 3-4 in., two 2-7 in., 2 m.g.; 2 T.T.

The cruiser *Castilla*, Capt. A. Algado, was a unit of the Spanish Asiatic Squadron, under Admiral Montojo, lying in Manila Bay at the outbreak of the American-Spanish War, in April, 1898. On the early morning of Sunday, May 1st, the U.S. Squadron, under command of Commodore Dewey, steamed into Manila Bay under cover of darkness and took the Spaniards by surprise.

The *Castilla* as the second ship of any size on the Spanish side, the other being the flagship, the *Reina Cristina*, and both vessels bore the full onslaught of the enemy. The starboard guns of the *Castilla* had been taken ashore to strengthen the land defences, and she was moored so that her port guns were facing the American ships; but all but one were put out of action and her moorings were severed by shell-fire so that she swung round and was rendered helpless. She caught fire, and sank two hours later. Twenty-three men were killed and 80 wounded.

For full story of the action see *Reina Cristina*.

CASTILLA

Empresa Hondurena de Vapores; 1927; Workman, Clark & Co.; 3,910 tons; 341-9x48x28-2; 406 n.h.p.; triple-expansion engines.

The Honduran steamship *Castilla* was torpedoed and sunk by a German submarine on June 6th, 1942, on a voyage from Mobile to Jamaica. Twenty-four of her crew were killed.

CASTILLO COCA

Empresa Nacional "Elcano" S.A.; 1919; Kjobenhavns Flydedok & Skibsv. 1,739 tons; 261 -1 x 40-1 x 16-9; triple-expansion engines.

The Spanish steamship *Castillo Coca* ran on to the rocks at Segano Point, at the entrance to Ferrol, on December 2nd, 1947, and sank. Twenty-six lives were lost and four were saved.

CASTILLO MONTEALEGRE

Spanish Government; 1930; Severney S.B. Yard; 3,972 tons; 347-4x48-8x27-2; 500 n.h.p.; oil engines.

The Spanish motorship *Castillo Monteleagre*, on a voyage from Fernando Po to Valencia, was torpedoed and sunk by a German submarine on April 8th, 1943, off the coast of Senegal. Twelve of her crew, last seen on a raft, were lost.

CASTILLO OROPESA

Spanish Government; 1917; W. Doxford & Sons; 5,177 tons; 420X54x26-4; 572 n.h.p.; triple-expansion engines.

The steamship *Castillo Oropesa* was torpedoed and sunk by a German submarine on November 8th, 1941, off Melilla.

CASTLE RISING

W.F. Beaumont; 1884; R. Craggs & Sons; 1,233 tons; 230 -2 x 32x15-4; 99 h.p.; compound inverted engines.

The British cargo ship *Castle Rising* was wrecked in October, 1890, on Svenska Bjorn, while on a voyage from Stockholm to Lynn with a cargo of deals.

CASTLEFORD

James Little & Co.; 1883; Sunderland S.B. Co.; 3,044 tons; 321 X40-2X29-4; 350 h.p.; compound inverted engines.

The British cargo ship *Castleford* was wrecked on June 8th, 1887, on Crebawethan Rocks, Scilly Isles. She was on a voyage from Montreal to London.

CASTLEHILL

John Kelly; 1920; Scott & Sons; 690 tons; 187-4x28-7x11; 85 r.h.p.; triple-expansion engines.

The Belfast ship *Castlehill* was bombed and sunk by German aircraft on May 2nd, 1941, off Wexford. There was only one survivor.

CASTLEMOOR

Runciman Shipping Co.; 1922; William Doxford & Sons; 6,574 tons; 420x54x34-3; 577 n.h.p.; triple-expansion engines.

The British cargo ship *Castlemoor*, Capt. R. Lisle, left Halifax, N.S., on February 16th, 1940, for the Tees. She was last seen by the steamship *Merchant Royal* on February 25th about 800 miles west of Ushant, and it was assumed that she had been lost by marine causes.

CASTOR

Det Bergenske Dampskibs.; 1909; Fevigs Jernskibsbyg; 1,313 tons; 235 X 34 • 1 X14 • 4; 151 n.h.p.; triple-expansion engines.

The Norwegian steamship *Castor* hit a mine and sank in the North Sea on January 1st, 1915.

CASTOR

Trelleborgs Angf. Nya Aktieb.; 1928; Kockums M.V. Aktieb.; 8,714 tons; 482-3x61-8x36-1; 584 n.h.p.; oil engines.

The Swedish tanker *Castor* was torpedoed and sunk by a German submarine on March 31st, 1941, on a voyage from New Orleans to Gothenburg with 12,000 tons of oil.

The captain and 14 of her crew were killed.

CASTORE

Italian Navy, torpedo boat; 1936; Cant. Nav. Riuniti (Ancona); 652 tons; 267x27x7-5; 19,000 s.h.p.; 34 knots; turbine engines; 3-drum boilers; three 3-9 in. guns, four 37 mm.A.A., two 13 mm.A.A.; 4 T.T.

The *Castore* was patrolling off Cape Spartivento on June 2nd, 1943, when she was brought to action by the British destroyer *Jervis*, 1,695 tons, and the Greek destroyer *Vasilissa Olga*, 1,350 tons. The *Castore* was sunk by gunfire. She carried a complement of about 100.

CASTRO

G. H. Wills & Co.; 1876; R. Dixon & Co.; 1,129 tons; 240 X30-3 X20-2; 99 h.p.; compound engines.

The British cargo ship *Castro* was wrecked in August, 1893, at Cape Finisterre. She was on a voyage from Elba to Stockton with a cargo of ore.

CASTRO

P. D. Coruissiano; 1897; R. Napier & Sons; 1,994 tons; 280 x 40-2x19-1; 168 n.h.p.; triple-expansion engines.

The Greek steamship *Castro* was torpedoed and sunk by a German submarine in the English Channel on October 14th, 1917.

CATAHOULA

Cuba Distilling Co. Inc.; 1920; American International S.B. Corp.; 5,030 tons; 390X54-2X27-8; turbine engines.

The American tanker *Catahpula* was torpedoed and sunk by a German submarine on April 5th, 1942, on a voyage from La Romana, Hispaniola, to Wilmington. Seven of her crew were killed.

CATALINA S.

J. M. O'Sullivan & Associates; 1928; J. L. Thompson & Sons; 2,407 tons; 292 -3x45x19-7; triple-expansion engines.

The British cargo ship *Catalina S.* ran aground on rocks on December 21st, 1962, two miles west of San Juan, P.R. She was on a voyage from San Juan to West Indian ports with a lumber cargo.

CATALUNA

Islena Maritima Cia. Mallorquina de Vapores; 1880; Hodgson & Soulsby; 1,099 tons; 221-6x31-1x18-5; 151 h.p.; compound engines.

The Spanish steamship *Cataluna* was wrecked off Salvora Island, Spain, on November 17th, 1922.

CATALUNA

Cia. Trasatlantica; 1883; W. Denny & Bros.; 3,665 tons; 384-2x42-2x27-5; 654 n.h.p.; compound engines.

The Spanish steamship *Cataluna* was wrecked at Rio de Oro, west coast of Africa on March 27th, 1923.

CATANIA

Società Marittima Italiana; 1906; Cant. Nav. Bacini e Stab. Mec. Siciliani; 3,188 tons; 333 • 1 x 42 • 8 x 17 • 9; 288 n.h.p.; triple-expansion engines.

The Italian cargo ship *Catania* was torpedoed and sunk by a submarine in the Mediterranean on March 16th, 1917.

CATARAQUI

Emigrant ship; 1840 (circa); 400 tons (approx.).

The *Cataraqui*, under command of Capt. C. W. Finlay, left Liverpool for Australia on April 20th, 1846. The vessel carried 369 emigrants, 73 of them children. The crew numbered 46 and there were eight private passengers, making 423 all told. The voyage out was uneventful until August 4th when off the west coast of King's Island, Bass Strait, the ship was driven ashore by a gale. The disaster occurred about three o'clock in the morning and many of the emigrants were drowned below deck as the ship rilled. From two to three hundred persons were brought on deck by the exertions of the crew but once there they were swept away in small groups by successive heavy seas. During the afternoon the ship broke in two, and about an hour afterwards what remained of the wreck again broke in two, taking 70 more to their death.

Those left were Mr. Thomas Guthrie, first officer, one apprentice, six seamen and one emigrant, only nine persons out of a total of 423.

The survivors lived with a party of sealers on King's Island for five weeks, after which time they were taken to Hobson's Bay.

CATERINA

Nav. Carlo Martinolich; 1920; Todd D.D. & Const. Co.; 4,786 tons; 396-4x53-1x27; 352 n.h.p.; triple-expansion engines.

The Italian steamship *Caterina* was torpedoed by British aircraft on October 18th, 1941, 62 miles N. of Tripoli. The ship was taken in tow but sank on the following day.

CATERINA COSTA

G. CostafuA.; 1942; Italy; 8,060 tons; oil engines.

The Italian motorship *Caterina Costa* was blown up by an internal explosion on March 28th, 1943, while lying at Naples with a full cargo of munitions.

CATERINA MADRE

"Corrado" Soc. Anon. di Nav.; 1904; Richardson, Duck & Co.; 4,019 tons; 362-5x48-7x25-9; 349 n.h.p.; triple-expansion engines.

The Italian steamship *Caterina Madre* struck a mine and sank on September 13th, 1943, 10 miles off the island of S. Andrea, near Gallipoli, Italy.

CATFORD

South Metropolitan Gas Co.; 1919; Dublin Dockyard Co.; 1,568 tons; 240-2x36-3x19-1; 172 n.h.p.; 10 knots; triple-expansion engines.

The collier *Catford*, Capt. D. D. Halcrow, struck a mine and sank at the mouth of the Humber on May 31st, 1943. Five men, including Capt. Halcrow, were killed.

CATHAY

Akties. Det Ostasiatiske Kompagni; 1898; Ramage & Ferguson; 4,076 tons; 369-3x46-8x18-5; 327 n.h.p.; triple-expansion engines.

The Danish steamship *Cathay* was sunk by a mine or torpedo on May 5th, 1915, in the North Sea.

CATHAY

Peninsular & Oriental Steam Navigation Co.; 1925; Barclay, Curie & Co.; 15,225 tons; 523-5x70-2x42-3; 1,905 n.h.p.; 17 knots; quadruple-expansion engines.

The liner *Cathay*, Capt. D. M. Stuart, D.S.C., was lying off Bougie, Algeria, disembarking troops on November 11th, 1942, when she was attacked by German aircraft. The vessel was hit by bombs but remained afloat until the next day when she sank off the port. One naval gunner was killed.

CATHERINE

Canadian; 1840; J. Briggs; 754 tons; 146x29x22.

The Canadian wood ship *Catherine* was wrecked in the St. Lawrence not far from Quebec in October, 1845. Thirteen persons were drowned.

CATHERINE ADAMSON

H. Adamson; 1855; Aberdeen; 768 tons; 180 (approx.) X — X —.

The clipper ship *Catherine Adamson* was bound from Aberdeen to Sydney, N.S.W., with a general cargo. On October 24th, 1857, in rough weather she took shelter off the Inner North Head, Sydney, but dragged her anchors and drifted ashore and sank. Twenty-one persons were drowned. The ship was in the care of a pilot at the time.

CATHRINE

A. Inkapool, E. Jakobson & others; 1904; Osbourne, Graham & Co.; 1,885 tons; 275-1x40-1x18-1; 359 n.h.p.; triple-expansion engines.

The Panamanian steamship *Cathrine* was torpedoed, shelled and sunk on June 24th, 1940, on a voyage from Jacksonville to London. There were 19 survivors.

CATHRINE

Ministry of War Transport (G. Gibson & Co.); 1919; Great Lakes Eng. Works; 2,727 tons; 253-4x43-7x24-5; 283 n.h.p.; oil engines.

The British motorship *Cathrine* was torpedoed and sunk by a German submarine on June 17th, 1941, on a voyage from Peipel to Barrow. The wireless operator and two members of the crew, subsequently picked up, were the only survivors.

CATINAT

Soc. Gen. d'Armement; 1913; J. C. Tecklenborg A. G.; 7,113 tons; 472x61x28-5; 482 n.h.p.; triple-expansion engines.

The French steamship *Catinat* ran ashore after a collision on March 3rd, 1927, at Tamatave, and was completely wrecked.

CATO

Bristol S.N. Co.; 1899; Campbelltown S.B. Co.; 1,269 tons; 229-8X32-8X15; 98 r.h.p.; triple-expansion engines.

The British cargo ship *Cato* foundered in April, 1899, 16 miles north of the Longships. She was on a voyage from Cardiff to Hamburg with coal and a general cargo.

CATO

Bristol S.N. Co.; 1914; Campbelltown S.B. Co.; 710 tons; 231x30-9x19; 85 r.h.p.; triple-expansion engines.

The British steamship *Cato* struck a mine and sank on March 3rd, 1940, 21 miles from Nash Point, on a voyage from Dublin to Bristol. Thirteen of her crew of 15 were lost.

CATO

British Navy, fleet-minesweeper; 1942; United States; 890 tons; 220x32x—; 2,400 b.h.p.; 18 knots; diesel engines; two 3 in. guns, several smaller.

The fleet-minesweeper *Cato*, Lt. R. W. E. Harris, was sunk by a "human torpedo" off the coast of Normandy on July 6th, 1944. One officer and 24 ratings were killed.

CATTERTHUN

Eastern & Australian Steamship Co.; 1881; W. Doxford & Sons; 2,179 tons; 302-3x36-5x23-7; 271 n.h.p.; 12 knots; compound engines.

The liner *Catterthun*, Capt. Shannon, left Sydney for Hong Kong on the night of August 7th, 1895, with 87 persons on board. At 11 p.m. the ship passed the Nobbys, a group of rocks off Newcastle, N.S.W., the wind by that time having developed gale force. About two hours later when off Sugarloaf Point and in the neighbourhood of the Seal Rocks, the ship struck on the smaller of the two rocks. The shock was not great, and passengers in their cabins were unaware of the danger until warned by the stewards.

The *Catterthun* carried a Chinese crew, and some of these rushed the boats, causing much confusion. The waves were now sweeping over the vessel, which had a heavy list to starboard. The captain and first officer were washed off the bridge and boats were swamped as

CAVARNA

soon as launched. One lifeboat survived, and in this 22 people reached the shore. The number drowned was 65.

A sum of £11,000 in sovereigns had been placed in the ship's specie-chamber under the bridge. The wreck lay at 30 fathoms, too great a depth for local divers, but special gear was sent from England and equipped with this two divers went down and recovered £9,000, the remaining £2,000 being buried when the wreck went to pieces.

CAVARNA

Roumanian State Maritime Service; 1939; Cant. Nav. Riuniti; 3,495 tons; 360-9x50-8x31-5; 583 n.h.p.; oil engines.

The Roumanian motorship *Cavarna* struck a mine and sank on December 2nd, 1941, 15 miles E. of Burghaz.

CAVEHILL

John Kelly; 1911; Flensburger Schiffsb. Ges.; 1,556 tons; 243-6x37-8x17-5; 186 n.h.p.; triple-expansion engines.

The British collier *Cavehill* sprang a leak and foundered on October 23rd, 1921, about 27 miles east of the Spurn lightship whilst on a voyage from Newcastle to Amsterdam.

CAVOUR

DaWorso & Co.; 1891; Edwards'S.B. Co.; 1,929 tons; 266X 36-7x16-6; 187 n.h.p.; triple-expansion engines.

The Italian steamship *Cavour* was torpedoed and sunk by a German submarine off southern Ireland on March 9th, 1917.

CAWDOR CASTLE

Union Castle Mail S.S. Co.; 1902; Barclay, Curie & Co.; 6,243 tons; 414-7x51-2x28; 650 n.h.p.; triple-expansion engines.

The British cargo ship *Cawdor Castle* was wrecked on July 30th, 1926, in Conception Bay, S.W. Africa, while on a voyage from London to Mauritius. She was carrying a general cargo.

CAYOBONITO

Cuban Steamship Co.; 1901; J. Readhead & Sons; 3,427 tons; 346-2x45-2x17; 320 n.h.p.; 10 knots; triple-expansion engines.

The steamship *Cayo Bonito* was torpedoed and sunk by a submarine four miles E.N.E. of Savona, in the Gulf of Genoa, on October 11th, 1917. Six men were killed. The captain was among the survivors.

CAYRU

Lloyd Brasileiro; 1919; American International S.B. Corp.; 5,152 tons; 390x54-2x28; turbine engines.

The Brazilian steamship *Cayru* was torpedoed and sunk by a German submarine on March 8th, 1942, 130 miles off the U.S. Atlantic coast on a voyage from Rio de Janeiro to New York.

CAZADOR

Chilean Government transport; 1850 (circa); 350 tons (approx.), steam engines.

The paddle-steamship *Cazador* left Talcahuano, Chile, on the morning of March 30th, 1856, with a number of civilian passengers and a company of the 2nd Regiment of the Line under Capt. V. Rodriguez. The military numbered four officers and 86 men with 50 women and children, besides whom there were 218 others, including crew. There was a smooth sea and a south wind and the vessel proceeded under steam and sail at nine knots. At eight in the evening she ran on the Carranza Rocks, 18 miles S.W. of Constitution, where she became a total wreck. The boats were lowered and filled without mishap only to capsize in the breakers when attempting to land.

Of the 358 persons carried only 43 were saved, among them one woman of the 148 who had been on board.

CAZENGO

Cia. Nacional de Navegacao; 1889; Earle's S.B. & E. Co.; 3,009 tons; 340-9x41-1x18-7; 480 n.h.p.; triple-expansion engines.

The Portuguese steamship *Cazengo* was torpedoed and sunk by a German submarine on October 8th, 1918, in the Bay of Biscay.

CEARENSE

J. F. O'Meara; 1891; Naval Construction & Armament Co.; 2,769 tons; 318x40-4x25-8; 283 n.h.p.; triple-expansion engines.

The British ship *Cearense* was wrecked on September 13th, 1913, at Marsh Point, Nelson River, Hudson Bay. She was carrying a cargo of coal and lumber from Halifax to Port Nelson.

CEDARBANK

Bank Line (A. Weir & Co.); 1924; Harland & Wolff; 5,159 tons; 420-4x53-9x26-5; 717 n.h.p.; 11 knots; oil engines.

The *Cedarbank*, with a crew of 42, was proceeding to Norway on April 21st, 1940, when she was attacked by German bombers and sunk. Fifteen men were killed.

CEDARDENE

Westcott & Laurance Line; 1881; Bar tram, Haswell & Co.; 2,108 tons; 285-5x37-2x24-4; 256 n.h.p.; quadruple-expansion engines.

The British ship *Cedardene*, with a cargo of coal, was wrecked in February, 1903, at North Arzila, Morocco, while on a voyage from the Clyde to Alexandria.

CEDARWOOD

Meteor S.S. Co.; 1907; W.Harkess & Son; 654 tons; 176x29-8X10-8; 96 n.h.p.; triple-expansion engines.

The *Cedarwood* struck a mine and sank 2½ miles east of Aldborough Napes on February 12th, 1916. Six lives were lost.

CEDERIC

Akties. Det Selmerske Rederi; 1905; Short Bros.; 2,344 tons; 295x45x19-6; 241 n.h.p.; triple-expansion engines. The Norwegian steamship *Cederic* was torpedoed and sunk by a German submarine off the north-west coast of Ireland on June 13th, 1917.

CEIBA

Seaboard S.S. Corp.; 1911; Swan, Hunter & Wigham Richardson; 1,698 tons; 309-6x39-2x16-6; 347 n.h.p.; triple-expansion engines.

The Honduran steamship *Ceiba* was torpedoed and sunk by a German submarine on March 16th, 1942, on a voyage from Jamaica to New York. Thirty-two crew and 12 passengers were lost.

CELEBES MARU

Osaka Shosen K.K.; 1917; Kawasaki Dockyard Co.; 5,863 tons; 385x51x36; 440 n.h.p.; triple-expansion engines.

The steamship *Celebes Mam* was bombed and sunk by U.S. land-based aircraft on November 15th, 1944, off Mindoro Island, Philippines.

CELTIC STAR

Union Cold Storage Co.; 1918; Dunlop, Bremner & Co.; 5,575 tons; 390-7x53-2x32-9; 552 n.h.p.; triple-expansion engines.

The British steamship *Celtic Star* was torpedoed and sunk by a German submarine on March 29th, 1943, on a voyage from Manchester to Montevideo.

CENTAUR

Ocean S.S. Co. (Alfred Holt & Co.); 1924; Scotts' S.B. & E. Co.; 3,222 tons; 315-7x48-2x21-5; 355 n.h.p.; 14 knots; oil engines.

The *Centaur* was lent to the Australian Government in the Second World War for use as a hospital ship. In the early hours of Friday, May 14th, 1943, when on a voyage from Sydney to New Guinea, she was torpedoed and sunk by a Japanese submarine 43 miles E of Brisbane. At the time of the attack the *Centaur* was brilliantly lighted and clearly marked with the red cross, so that no mistake on the part of the submarine commander was possible. Of the 363 persons on board only 64 survived. Those lost included the matron and 11 nurses, 18 army doctors, besides medical orderlies and the crew. There was only one woman survivor.

The Japanese submarine surfaced immediately after the attack and watched the ship sink. There was no time to launch boats and in the short space of three minutes the *Centaur* had foundered.

CENTAURO

Italian Navy, torpedo-boat; 1936; Riuniti; 652 tons; 267x27 | X7-5; 19,000 s.h.p.; 34 knots; turbine engines; 3-drum boilers: three 3-9 in. guns, four 37 mm. A.A., two 13 mm. A.A.; 4 T.T.

The *Centaur* was bombed and sunk by British aircraft at Benghazi on November 4th, 1942. The vessel carried a complement of about 100.

CENTRAL AMERICA

G. Law & Co.; 1852; New York; 1,200 tons (approx.); 14ft draught; 12 knots; inclined engines.

The United States mail steamship *Central America*, with a company of 587 persons, passengers and crew, on board, left Havana for New York on September 8th, 1857, under command of Capt. Herndon. The ship carried the Pacific mails and among her passengers were many successful gold miners from California. The weather, which was fine at first, later developed into a gale and by the morning of the 11th it had reached hurricane force. It was while steaming through this that the *Central America* sprang a leak. The water gained fast and within a short time the boiler fires were swamped.

On the afternoon of the next day the brig *Marine* of Boston, U.S.A., took off all the women and children. Another ship came in sight and promised to stand by and to send boats, but later she sailed away without rendering any assistance.

Soon after 7 p.m. the *Central America* was struck by a tremendous sea which caused her to heel over and founder with 427 people. A strange feature of the disaster was the amount of gold flung about the decks prior to the ship sinking, owing to the miners discarding their heavy gold belts and whatever gold they carried on their persons.

The number saved was 160, including the women and children taken on board the *Marine*, the remainder being picked up by the barque *Ellen*, and other ships.

CENTRIC

Rederiaktieb. Karnan; 1903; *R. Duncan & Co.*; 1,612 tons; 260-3x37-2x18-1; 172 n.h.p.; triple-expansion engines.

The Swedish cargo ship *Centric* hit a mine and sank in the Baltic on April 27th, 1915.

CERAM MARU

Mitsubishi Risen K.K.; 2,858 tons

The Japanese tanker *Ceram Mam* was sunk by U.S. carrier-based aircraft on September 22nd, 1944, off Corregidor, Philippines.

CERAMIC

Shaw Savill & Albion Co.; 1913; *Harland & Wolff*; 18,713 tons; 655-1x69-4x43-8; 7,750 i.h.p.; 15 knots; triple-expansion engines & L.P. turbine.

The *Ceramic*, Capt. H. C. Elford, with 378 passengers and a crew of 278 was torpedoed and sunk by the German submarine *U-515*, Capt. Lt. W. Henke, W. of the Azores on the night of December 6th, 1942. Rescue ships at St. Michael's were unable to put to sea because of the heavy weather. Only one man survived, Sapper A. E. Munday of the Royal Engineers, who was picked up by a German submarine on the following day.

Some months later the *U-515* was sunk by U.S. destroyers, which captured the commander and 43 of his crew. Capt. Lt. Henke was killed when endeavouring to escape from a prisoner-of-war camp.

CERERA

Russian Steam Nav. & Trading Co.; 1898; *W. Dobson & Co.*; 3,512 tons; 345-6x46-2x15-5; 255 n.h.p.; triple-expansion engines.

The Russian steamship *Cerera* was sunk by a German submarine on February 4th, 1917, in the Bay of Biscay.

CERES

The steamship *Ceres*, Capt. Pascoe, was bound from London to Dublin. On November 10th, 1866, she ran ashore at Carnshore Point, Wexford, and sank with the loss of 38 passengers and crew.

CERES

Det Forenede Dampsbibs. Selsk.; 1882; *Kockums M/V.*; 1,166 tons; 229-6x30-6x14-6; 207 n.h.p.; compound engines.

The Danish steamship *Ceres* was torpedoed and sunk by a German submarine off N.W. Ireland on July 13th, 1917.

CERES

Cie. des Affreteurs Francais; 1918; *Jos. T. Eltringham & Co.*; **3,075 tons; 330-6x47-7x22-7; 289 n.h.p.; triple-expansion engines.

The French steamship *Ceres* was bombed and sunk by German aircraft on May 17th, 1940, at Dunkirk during the evacuation of British forces from France. A few survivors were picked up and taken to Sheerness.

CERIGO

R. Nicholson & Sons; 1881; *T. Royden & Sons*; 1,547 tons; 259-5x34x18; 140 h.p.; triple-expansion engines. \ The British cargo ship *Cerigo* was sunk in a collision in March, 1895, 20 miles from Para, on a voyage from Manaos to Para.

CERINTHUS

IHadley Shipping Co.; 1930; *Hawthorn, Leslie & Co.*; 3,878 tons; 336x48-8x25-6; 385 n.h.p.; triple-expansion engines. The British steamship *Cerintus* was torpedoed, shelled and sunk by a German submarine at 11.50 p.m. on November 9th, 1942, on a voyage from London to Freetown. Seventeen of her crew and three gunners were lost.

CERTO

Dampsk. Akties. Certo; 1910; *Short Bros.*; 1,629 tons; 259X 37-9x18-2; 162 n.h.p.; triple-expansion engines. The Norwegian steamship *Certo* was torpedoed and sunk by a German submarine on May 2nd, 1917, in the English Channel.

CERVANTES

MacAndrews & Co.; 1919; *FT. & C. Grayson*; 1,810 tons; 265X \ 41-2x18-8; 271 n.h.p.; 10-5 knots; triple-expansion engines. The steamship *Cervantes*, Capt. H. A. Fraser, was in a homeward bound convoy from Gibraltar on September 27th, 1941, when she was torpedoed and sunk by a submarine. Six men were killed. Capt. Fraser was among the survivors.

CERVONA

Cairns, Noble & Co.; 1896; *C. Connell & Co.*; 3,779 tons; 368X 45x18-8; 396 n.h.p.; triple-expansion engines.

The British cargo ship *Cervona* was wrecked on December 12th, 1913, one mile south of Fermeuze, N.F.L. She was on a voyage from the Tyne to Portland, Me., with coal and a general cargo.

CESARE BATTISTI

Italian Navy, destroyer; 1926; *Odero*; 1,058 tons; 295-7x30-5x10-5; 30,000 s.h.p.; 35 knots; turbine engines; Express boilers; four 4-7 in. guns, four 37 mm., two 13 mm.; 4 T.T. The *Cesare Battisti* was sunk by British destroyers in the Red Sea off Massawa on April 4th, 1941. Her normal complement was 142.

CESARE ROSSAROL

Italian Navy, destroyer; 1915; *Ansaldo*; 1,030 tons; 272-6x26-3x9-3; 20,000 s.h.p.; 32 knots; turbine engines; Yarrow boilers; five 4 in. guns, two 2pdr.A.A., 4 T.T. The Italian destroyer *Cesare Rossarol* was mined near Pola on November 18th, 1918. The destroyer's normal complement was 99.

CESAREWITSCH ALEXEJ

Helmsing & Grimm; 1903; *Caledon S.B. & E. Co.*; 2,387 tons; 290x40x25-6; 258 n.h.p.; triple-expansion engines. The Russian steamship *Cesarewitsch Alexej* was torpedoed and sunk by a German submarine on July 29th, 1917, in the North Sea.

CETUS

Madrigal Shipping Co.; 1943; *Odenbach S.B. Corp.*; 738 tons; 175-3x30x13-5; oil engines.

The Philippine motorship *Cetus* capsized and sank in heavy seas on November 26th, 1955, at the mouth of the Cagayan River, Philippines. Twenty-one of her crew of thirty were lost.

CEYLON MARU

Nippon Yusen K.K.; 1904; *Mitsubishi Dockyard*; 4,905 tons; 385X48-6x27; 442 n.h.p.; triple-expansion engines.

The steamship *Ceylon Mam* was torpedoed and sunk by the U.S. submarine *Gray back* on February 27th, 1944, about 100 miles S. W. of Nagasaki.

CHACABUCO

Balfour & Co.; 1869; *Gourlay Bros.*; 999 tons; 204x34-lx21-4.

The iron sailing ship *Chacabuco* was sunk in a collision with the steamship *Torch*, 274 tons, on March 1st, 1873, 15 miles from Orme's Head, North Wales, the sailing ship sinking with the loss of 24 men.

CHACAL

CHACAL

French Navy, destroyer; 1926; Penhoet Dockyard; 2,126 tons; 416x37-5x17-5; 52,000 i.h.p.; 36 knots; turbine engines; Du Temple boilers; five 5•1 in. guns, eight 13 mm.; 6 T.T.

The *Chacal*, Cdr. C. F. Estienne, was engaged in operations connected with the evacuation of the French and British armies from Dunkirk, when she was bombed by German aircraft. The attack took place on May 24th, 1940, and the destroyer was so severely damaged that she sank.

The *Chacal* carried a complement of 240, of whom three officers and 28 ratings were killed.

CHADWICK

R. B. Avery; 1882; C. S. Swan & Hunter; 1,463 tons; 250 X 35 X 18; 150 h.p.; compound engines.

The British cargo ship *Chadwick* was wrecked in July, 1892, at Clanneache, West Skye. She was carrying a cargo of coal from the Clyde to St. Petersburg.

CHAGFORD (see BRACONDALE)

CHAK SANG

Indo-China Steam Navigation Co.; 1917; Hong Kong & Whampoa Dock Co.; 2,358 tons; 290-6x42-1x22-7; 1,400 i.h.p.; 11 knots; triple-expansion engines.

The steamship *Chak Sang*, Capt. G. W. F. Edwards, was just W. of the Gulf of Martaban, Burma, on January 22nd, 1942, when she was intercepted by a Japanese submarine. The latter opened fire from the surface and sank the steamship with a loss of five men killed and three wounded. Capt. Edwards was among the survivors.

CHAKDINA

British India Steam Navigation Co.; 1914; Ramage & Ferguson; 3,033 tons; 330-7x46-1x22-1; 668 n.h.p.; 14 knots; triple-expansion engines.

The *Chakdina*, Lt. Cdr. W. R. Hickey, R.N.R., had been taken over by the Admiralty. On December 5th, 1941, she was torpedoed and sunk by aircraft between Tobruk and Alexandria.

CHAKLA

British India Steam Navigation Co.; 1914; A. Stephen & Sons; 3,081 tons; 330-5x46-2x22-3; 653 n.h.p.; 14 knots; triple-expansion engines.

The British India liner *Chakla* was taken over by the Admiralty during the Second World War. On April 29th, 1941, whilst lying in Tobruk harbour, she was bombed and sunk by aircraft.

CHALLENGER

American South African Line, Inc.; 1918; Bethlehem S.B. Corp.; 7,667 tons; 410x56x29; 640 n.h.p.; oil engines.

The American motorship *Challenger* was torpedoed and sunk by a German submarine on May 17th, 1942, on a voyage from New York to Table Bay. Five of her crew, two armed guards and one passenger were killed.

CHAMA

Anglo-Saxon Petroleum Co.; 1938; Rotterdamsche Droogdok Maats.; 8,028 tons; 463x59-3x33-9; 502 n.h.p.; 12-5 knots; oil engines.

On March 23rd, 1941, the tanker *Chama*, Capt. H. S. Sivell, was torpedoed and sunk by a submarine in the North Atlantic. Capt. Sivell and 57 others were killed.

CHAMAREL

Colonial Steamships Co.; 1917; Rotterdam Droogdok Maats.; 1,352 tons; 243-2x37-2x17-3; triple-expansion engines.

The British steamship *Chamarel* caught fire and sank following an internal explosion on March 2nd, 1949, at Pointe des Galets, Reunion. She was carrying cases of petroleum products.

CHAMOIS

Jackson Bros. & Cory; 1878; E. Wither & Co.; 1,382 tons; 243-7 x32x18-3; 130 h.p.; compound inverted engines.

The British cargo ship *Chamois* was wrecked on May 23rd, 1885, near Cape Villano, Spain. She was on a voyage from Newport to Savona with a cargo of coal.

CHAMOIS

Jackson Bros. & Cory; 1890; J. Priestman & Co.; 2,100 tons; 275x39-2x19-9; 185 n.h.p.; triple-expansion engines.

The second *Chamois* owned by this company was wrecked in January, 1903, at Whitburn near Sunderland. She was returning to the Tyne from Rotterdam in ballast.

CHAMOIS

British Navy, destroyer; 1897; Palmers'Co.; 360 tons; 215 x 20-7X—; 6,000 i.h.p.; 30 knots; triple-expansion engines; one 12pdr. gun, five 6pdr.; 2 T.T.

The destroyer *Chamois*, Lt. S. H. Tennyson, was lost off the west coast of Greece on September 26th, 1904. It was assumed that an 'A' bracket broke and damaged the ship's side, but complete details are lacking. There was no loss of life.

CHAMPAGNE

Pacific Steam Navigation Co.; 1895; Harland & Wolff; 5,360 tons; 421x48-8x33; 568 n.h.p.; 14 knots; triple-expansion engines; six 6 in. guns, two 6pdrs.

The *Oropesa*, Capt. Percy G. Brown, was taken over by the Admiralty in November, 1914, for service in the First World War as an auxiliary cruiser. The ship was a unit of the 10th Cruiser Squadron under Rear-Admiral Sir Dudley de Chair, and while patrolling between Scotland and Norway sank a German submarine off Skerryvore Lighthouse in March, 1915. In 1917 she was lent to the French navy, and her name changed to *Champagne*, but she retained her British crew.

On October 15th, 1917, the *Champagne* was in the Irish Sea when she was torpedoed and sunk by a submarine. Five officers and 51 ratings were killed.

CHAMPION

Helpman & Co.; 1854; Shields; 249 tons; 140 (approx.) X — X —; 60 h.p.; compound engines.

The passenger cargo steamship *Champion* was bound from Portland to Melbourne in August, 1857, when she was sunk in a collision with the steamship *Lady Bird* off Cape Otway. The *Champion* sank within five minutes with the loss of 32 lives.

CHAMPION

Canadian; 1871; Nova Scotia; 799 tons; 160x32-9x20-8.

The Canadian wood barque *Champion* was overwhelmed by bad weather when in the North Atlantic in 1884. The crew abandoned ship. One boat with eight men was picked up.

CHAMPLAIN

Chargeurs Reunis; 1913; Atel. & Ch. de la Loire; 7,418 tons; 415x53-8x37-6; 416 n.h.p.; triple-expansion engines.

The French steamship *Champlain* was sunk by a German submarine off Portugal on August 21st, 1918.

CHAMPLAIN

Compagnie Generale Transatlantique; 1932; Chantier et Ateliers de St. Nazaire; 28,124 tons; 606-5x83x46; 25,000 s.h.p.; 19 knots; turbine engines.

The liner *Champlain* struck a mine and sank off La Pallice on June 17th, 1940. Eleven of the crew were lost but 370 crew and passengers were saved.

CHAMPOLLION

Messageries Maritimes; 1924; LaCiotat; 12,546 tons; 531 -3 X 62-7x40-5; 17-5 knots; triple-expansion engines & L.P. turbine.

The French liner *Champollion* was on a voyage from Marseilles to Beirut, Lebanon, with 108 passengers and a crew of 250. A large proportion of the passengers were priests and pilgrims travelling to the Holy Land for Christmas.

On December 22nd, 1952, in very heavy weather, she ran on a sandbank off Beirut. So violent were the seas that the vessel began to break up immediately, and appeals for assistance were radioed to all ships in the vicinity. In response to these the British cruiser *Kenya*, 8,000 tons, lying at Port Said, steamed to her assistance, together with several cargo vessels and tugs which were nearer to the spot.

The violence of the gale made rescue work impossible, however, and the rescue ships could do no more than ride out the storm and

look on. This state of affairs, which lasted until well into the following day, ended when fishing vessels and other small craft from Beirut, which could approach the sandbank without fear of grounding, began to take people off. Meanwhile in the *Champollion* there was growing anxiety as to how long she would withstand the battering of the seas; and in a desperate endeavour to reach the shore some 40 to 50 persons attempted to swim. Of this number only little more than half were successful, the remaining 17 being drowned in the attempt. Had it not been for this near-panic venture it is probable that the small craft would have taken everyone, or nearly everyone, off in safety.

CHANARAL

A. D. Bordes & Co.; 1875; J. E. Scott; 1,420 tons; 249-4x 38-3x21-4.

The French iron sailing ship *Chanaral* capsized in heavy weather off Ushant on January 31st, 1902, going down with 21 of her crew.

CHANG HO

Tan Shien Ho; 1919; Detroit S.B. Co.; 2,639 tons; 251x43-6x 26-1; 352 n.h.p.; triple-expansion engines.

The Chinese steamship *Chang Ho* ran ashore on January 30th, 1936, near Kamaishi, Japan, broke in two and sank.

CHANG HSING

SanPehSteamNav. Co.; 1890; Ramage&Ferguson; 3,412 tons; 290x54x10; triple-expansion engines.

The Chinese steamship *Chang Hsing* ran ashore and sank on May 9th, 1948, at Tungchow, 40 miles from Woosung. The ship was carrying passengers, Chinese soldiers, and horses.

CHANG KIANG

Soc. Anon. Pannier; 1907; Burmeister & Wain; 2,902 tons; 310 X44 • 2 X17 • 5; 252 n.h.p.; triple-expansion engines.

The French steamship *Chang Kiang* struck a rock and was wrecked on Heihang Islands on March 16th, 1931. The ship was carrying passengers from Hong Kong to Shanghai.

CHANGCHOW

China Navigation Co.; 1882; Scott & Co.; 1,734 tons; 271 -3x 34-4x23-6; 185 h.p.; compound inverted engines.

The British cargo ship *Changchow* was wrecked on October 24th, 1884, on Sandy Cape Shoal, Queensland, while on a voyage from Newcastle, N.S.W., to Hong Kong. Six lives were lost.

CHANNEL QUEEN

Plymouth, Channel Islands & Brittany Co.; 1895; R. Craggs & Sons; 385 tons; 177x24x10; 80 r.h.p.; triple-expansion engines.

The steamship *Channel Queen* running from Plymouth to the Channel Islands was wrecked on the Black Rock, Guernsey, on February 1st, 1898. Twelve passengers and several of the crew were drowned.

CHANTALA

British India Steam Navigation Co.; 1913; Richardson Duck & Co.; 4,951 tons; 405x52-5x27-5; 530 n.h.p.; 11 knots; triple-expansion engines.

The liner *Chantala*, Capt. E. Hamlyn, was torpedoed by a submarine on April 5th, 1916, 15 miles N. of Cape Bengut. The torpedo exploded in or near the engine room, killing the fourth engineer and eight native fireman. Capt. Hamlyn sent out a wireless call for assistance and ordered the crew to the boats, there being no passengers on board. As the ship did not sink, though down by the head, the captain ordered his boat back, whereupon the submarine surfaced and opened fire from her gun. She then drew abreast of the boat and ordered the captain and gunners aboard, but the commander changed his mind and they were allowed to return. The submarine then completed the destruction of the *Chantala* by time-bombs and departed.

CHANTALA

British India Steam Navigation Co.; 1920; Barclay, Curie & Co.; 3,129 tons; 330-2x46x22-2; 678 n.h.p.; 14 knots; triple-expansion engines.

The British India liner *Chantala* was taken over by the Admiralty

during the second World War. On December 7th, 1941, she struck a mine and sank off Tobruk.

CHANTREY

Liverpool, Brazil & River Plate S.N. Co. (Lampport & Holt); 1890; R. & W. Hawthorn Leslie & Co.; 2,791 tons; 324-3x42-2x23-4; 228h.p.; triple-expansion engines.

The British cargo ship *Chantrey* was wrecked in October, 1896, at Quinteros, at the entrance to Valparaiso Bay. She was on a voyage from Guayaquil to Havre.

CHAO YUNG

Chinese Navy, light cruiser; 1881; L. Walker & Co.; 1,350 tons; 210 X32x15-8; 2,677 i.h.p.; 16-8 knots; two 10 in. guns, four 4-7 in., 7m.g.

The Chinese light cruiser *Chao Yung* was a small ship for her class and carried the very heavy armament of two 10 in. guns mounted singly in barbettes fore and aft and four lighter guns, two on each broadside. A raised superstructure of wooden cabins with a connecting deck above ran between the two barbettes. The light cruiser with her sister ship, the *Yang Wei*, was present at Jjae[^] battle of the Yalu on September 17th, 1894.

The Chinese Admiral Ting and his American and European advisers did not appreciate the terrible handicap their wood-encumbered ships would suffer when they went into action. Consequently they took no steps to clear away all superfluous woodwork, and within a short time the concentrated fire of the new quick-firing guns mounted on the fast Japanese cruisers set the thickly painted and highly decorated superstructures ablaze.

The intensity of the fire on board the two Chinese cruisers severed communication with the fore and aft barbettes, so that the guns could not be loaded. The *Chao Yung* was forced out of the line heavily on fire, and soon rolled over and sank. The *Yang Wei* in a similar plight, turned toward shore and ran aground. There was no return of losses for these ships, but they must have been very high.

The full story of the battle of the Yalu is told under the *Chi-Yuen*.

CHAPARRA

Soc. Anon. Empresa Nav. de Cuba; 1906; Russell & Co.; 1,510 tons; 249 -5x38x17; 211 n.h.p.; triple-expansion engines.

The Cuban steamship *Chaparra* hit a mine and sank in the west Atlantic on October 27th, 1918.

CHARILAOS TRICOUPIS

EmbiricosBros.; 1892; W. Doxford & Sons; 2,475 tons; 300 x 40-7x16; 253 n.h.p.; triple-expansion engines

The Greek steamship *Charilaos Tricoupis* was torpedoed and sunk by a German submarine off western Ireland on July 13th, 1917.

CHARKIEH

Khedivial Mail S.S. & Graving Dock Co.; 1865; Thames Ironworks; 1,533 tons; 276-7x35-8x16-8; 283 n.h.p.; 11 knots; compound engines.

The *Charkieh* was on a voyage from Piraeus to Constantinople with a cargo of rice, wood and provisions, together with a number of passengers. Early on the evening of September 18th, 1900, her propeller shaft broke. As the vessel was at the time off Andros Island, in the Aegean Sea, in a strong wind and a heavy sea, her position was very precarious. An attempt was made to clear the land under sail, but this failed and the vessel was driven on the rocks near the entrance to the Doro Channel. Prior to striking she sent up signals of distress which were seen and answered by the battleship *Empress of India*, which turned on her searchlight and sent a boat. The *Charkieh's* captain sent back a message requesting the warship to take him in tow, but his ship was drifting shorewards so fast that she struck before this could be done.

The *Charkieh*, which had 98 persons on board, sank immediately. Two boats filled with women and children got away before she struck and reached shore in safety. The *Empress of India* stood by during the night and at daybreak tried to rescue those clinging to the masts by means of rockets and lines but failed. After 14 hours exposure the survivors were taken off in the warship's boats.

Survivors included 33 crew and 27 passengers. Twenty-one of the crew and 17 passengers were lost.

Lt. Lowry, R.N., showed great gallantry in swimming to the wreck with a line.

CHARKOW

CHARKOW

Det Forenede Dampskibs. Selsk.; 1913; Helsingors Jernsk. & Msk.; 1,026 tons; 236 • 1 X 35 • 6 X 21 - 2; 161 n.h.p.; triple-expansion engines.

The Danish steamship *Charkow* was torpedoed and sunk by a German submarine on March 19th, 1940, soon after leaving Kirkwall. All her crew were lost.

CHARLBURY

Alexander Shipping Co.; 1940; Burntisland S.B. Co.; 4,836 tons; 416x57x25-3; 458 n.h.p.; triple-expansion engines.

The British steamship *Charlbury* was torpedoed, shelled and sunk by a German submarine on May 29th, 1942, on a voyage from Cardiff to Buenos Aires.

CHARLES BARTLETT

Emigrant ship; 1840 (circa); 400 tons (approx.).

The American brig *Charles Bartlett* left the Downs for America on June 14th, 1849, with 162 emigrants, one cabin passenger and a crew of 14 under Capt. Bartlett. She carried a general cargo of about 450 tons. On June 27th when in lat. 50° 49', long. 29° 3(X the vessel ran into thick fog. At 3.30 in the afternoon, there being nearly 100 persons on deck at the time, the British & North American Royal Mail Steam Packet Co's ship *Europa* suddenly appeared out of the fog and struck the *Charles Bartlett* on her port side between fore and mainmasts. There was little time for either captain to do anything to avert the disaster as the *Europa* was steaming at about 12 knots, although she stopped her engines immediately.

Many of the unfortunate emigrants were killed instantly and in four minutes the ship had foundered taking with her 135 persons. Capt. Bartlett saved himself by jumping for the bows of the *Europa* as she struck his ship.

Every effort was made by Capt. Lott and the officers of the *Europa* to save life and 42 persons were rescued. The *Europa* sustained little damage and there were no injuries to any of those on board.

CHARLES C. RANDLEMAN

U.S. War Shipping Administration; 1945; J. A. Jones Const. Co.; 7,198 tons; 422-8x57x34-8; triple-expansion engines.

The American steamship *Charles C. Randleman* was wrecked on Apo Reef, Philippine Islands, on August 31st, 1945.

CHARLES D. McIVER

U.S. War Shipping Administration; 1943; North Carolina S.B. Co.; 7,176 tons; 422-8x57x34-8; triple-expansion engines.

The American steamship *Charles D. McIver* was sunk by a mine or torpedo on March 22nd, 1945, 10 miles N. of Ostend outward bound from Antwerp. Nineteen survivors were landed.

CHARLES GOODANEW

Plymouth Mutual Co-operative & Industrial Society; 1911; W. Harkess & Son; 791 tons; 195X30x11-6; 131 n.h.p.; 8-5 knots; triple-expansion engines.

The steamship *Charles Goodanew* struck a mine and sank 3 ½ miles E.N.E. of Rattray Head on April 17th, 1917. The captain and twelve of the crew were killed.

CHARLES H. SALTER

Stephenson Clarke; 1942; Pacific Bridge Co.; 1,814 tons; 250 X 42-1x18-3; triple-expansion engines.

The British steamship *Charles H. Salter* was wrecked at Landeyjarsandur on the south coast of Iceland on February 13th, 1946. She was on a voyage from Hull to Reykjavik with a cargo of coal.

CHARLES L. D.

Ministry of War Transport (Union Castle Mail S.S. Co.); 1934; Gotaverken A/B; 5,273 tons; 428-2x56-6x25-7; 653 n.h.p.; oil engines.

The motorship *Charles L. D.* was torpedoed and sunk by a German submarine on December 9th, 1942, about 500 miles E. of Cape Farewell. Thirty-six of her crew of 48 were lost.

CHARLES LE COUR

Soc. Anon. des Chargeurs de VQuest; 1903; Ch. Nantais de Const. Mar.; 2,352 tons; 282-6x40-6x19-6; 228 n.h.p.; triple-expansion engines.

The French steamship *Charles Le Cour* was torpedoed and sunk by a German submarine on March 11th, 1917, in the Bristol Channel.

CHARLES MORGAN

U.S. War Shipping Administration; 1943; Houston S.B. Corp.; 7,244 tons; 422-8x57x34-8; triple-expansion engines.

The steamship *Charles Morgan* was bombed and sunk on June 10th, 1944, off the Normandy coast. One of her crew and seven U.S. Army personnel were killed.

CHARLES PRATT

Panama Transport Co.; 1916; Newport News S.B. & D.D. Co.; 8,982 tons; 500x68x35-5; 628 n.h.p.; triple-expansion engines.

The Panamanian tanker *Charles Pratt* was torpedoed and sunk by a German submarine on December 21st, 1940, off the west coast of Africa, on a voyage from Aruba to Freetown with 14,500 tons of fuel oil.

CHARLES S. HAIGHT

U.S. War Shipping Administration; 1944; J. A. Jones Construction Co.; 7,198 tons; 422-8x57x34-8; triple-expansion engines.

The steamship *Charles S. Haight* was wrecked on Avery Ledge, off Rockfort, Mass., on April 2nd, 1946.

CHARLES SCHIAFFINO

Soc. Algerienne de Nav. pour VAfrique du Nord; 1914; Sir R. Dixon & Co.; 3,089 tons; 300-9x45-8x22-7; 306 n.h.p.; triple-expansion engines.

The French steamship *Charles Schiaffino* struck a rock and sank on February 1st, 1929, off Cape Villano, on a voyage from Dunkirk to Algiers.

CHARLES TELLIER

Lambert Brothers; 1915; Wood, Skinner & Co.; 1,366 tons; 238-2x36-2x14-2; 178 n.h.p.; triple-expansion engines.

The British steamship *Charles Tellier* was wrecked at Ras Al Khebbra on June 28th, 1919, while on a voyage from Port Said to the Persian Gulf with a cargo of frozen meat.

CHARLOIS

American Petroleum Co.; 1888; Russell & Co.; 2,786 tons; 310-3x39-2x25-2; 254 n.h.p.; triple-expansion engines.

The Dutch tanker *Charlois* was bound from New York, via Halifax, N.S., to Rotterdam on March 19th, 1917, when she was torpedoed and sunk by the German submarine *U-59*. The attack took place in the North Atlantic, the tanker sinking with the loss of 33 lives.

CHARLOTTE

J.Mews; 1844; Liverpool; 535 tons; 170x — x—.

On September 19th, 1854, the hired transport *Charlotte*, with a detachment of the 27th Regiment on board, bound for Calcutta, put into Port Elizabeth for water. The ship was under command of Capt. Affleck and had left Queenstown with five officers and 163 men of the 27th Foot, 14 women and 26 children and a crew of 24. On the day following her arrival a heavy storm blew up and at 5 o'clock the *Charlotte* signalled that her cables had parted; by 8 p.m. she had drifted ashore. During the night the wreck was pounded to pieces and at 1 a.m. on the 21st it broke in two, while thousands of onlookers lined the water's edge unable to render any assistance.

The Port Elizabeth lifeboat made three journeys to the ship, which proved out of reach of the rocket apparatus, but on the fourth journey it was wrecked, all the crew escaping.

By daybreak little of the *Charlotte* remained, and 18 of the crew, 62 soldiers, 11 women and 26 children were drowned. The survivors numbered 115, including Capt. Affleck who was saved by his son.

CHARLOTTE

German Government; 1908; Russell & Co.; 4,404 tons; 399-5 X 49-8x18-4; triple-expansion engines.

The steamship *Charlotte* was formerly the Italian *Atlanta*, taken over by the Germans. On January 12th, 1945, she was sunk by British light naval craft off Egersund, Norway.

CHARLOTTETOWN

Canadian Navy, corvette; 1941; Canada; 925 tons; 193x32x 16; 2,800 i.h.p.; 17 knots; quadruple-expansion engines; 3-drum boilers; one 4 in.A.A. gun, several smaller.

The Canadian corvette *Charlottetown* was torpedoed and sunk by a German submarine in the Gulf of St. Lawrence on September 18th, 1942. The commander and eight ratings lost their lives, and one officer and 12 ratings were wounded.

CHARLWOOD

G. H. Fletcher & Co.; 1877; W. Doxford & Sons; 867 tons; 197-7x32-2x19-6.

The iron barque *Charlwood* was sunk in a collision with the *Boston* at about 4 a.m. on October 26th, 1891, near the Eddystone Lighthouse. Fifteen lives were lost.

CHARLWOOD

Laverton Steamship Co.; 1914; Dublin Dockyard Co.; 1,207 tons; 226-2x35-5x14-4; 138 n.h.p.; triple-expansion engines.

The British steamship *Charlwood* sank after a collision with the *Lyng* on January 18th, 1942, in the Hearty Knoll Channel. She was on a voyage from Blyth to Dover with a cargo of coal.

CHARTERHOUSE

LimHoPuah; 1875; Scott & Co.; 2,025 tons; 314-1x35-2x 26; 265 n.h.p.; compound engines.

The British steamship *Charterhouse*, on a voyage from Hoihow to Hong Kong with passengers, foundered during a storm on September 30th, 1845, off Hainan Head. The captain and 65 others were lost. Twenty-six survivors, including two women, were picked up by the German steamship *Koh-si-Chang* after 43 hours on a raft.

CHARYBDIS

British Navy, cruiser; 1940; Cammett Laird; 5,450 tons; 506X 51-5x14; 62,000 s.h.p.; 33 knots; turbine engines; 3-drum boilers; ten 5-25 in. guns, 16 smaller; 6 T.T.

The cruiser *Charybdis*, Capt. G. A. W. Voelcker, accompanied by the destroyer *Limboume*, Cdr. W. J. Phipps, O.B.E., and five other vessels, was engaged in an offensive sweep off the French coast between Ushant and the Channel Islands on the night of Saturday, October 23rd, 1943. Visibility was poor and the vessels ran into an enemy light force which managed to avoid their fire and to discharge a salvo of torpedoes with disastrous effect. The *Charybdis* was struck on the port side by a torpedo followed at an interval of about five minutes by another. She turned over to port and sank by the stern. Thirty officers, including Capt. Voelcker, and 432 ratings were killed. Four officers and 103 ratings were saved.

The *Limboume* was torpedoed and badly damaged, having one officer and 41 ratings killed. She was sunk by ships in company as it was not possible to take her in tow.

CHASEHILL

Essex Chase S.S. Co.; 1891; W. Doxford & Sons; 4,583 tons; 383-1x48x22-2; 495 n.h.p.; triple-expansion engines.

The British cargo ship *Chasehill* foundered on January 18th, 1916, in 40° N., 63° W., while on a voyage from New York to Havre.

CHASSIE MAERSK

Dampsk. Svendborg; 1910; A. Vuijk&Zonen; 1,307tons;240-9X 36-6x17-2; 154 n.h.p.; triple-expansion engines.

The Danish steamship *Chassie Mcersk* was sunk by a submarine on December 16th, 1916, off N.W. Spain.

CHATEAU LAFITE

Worms & Cie.; 1914; Atel. & Ch. de la Loire; 1,913 tons; 274 X 38x23; 224 n.h.p.; triple-expansion engines.

The French steamship *Chateau Lafite* was torpedoed and sunk by a German submarine in the Bay of Biscay on January 12th, 1918.

CHATEAU YQUEM

Worms & Cie.; 1914; Atel. & Ch. de la Loire; 1,913 tons; 280 -3X 38-1x21-4; 224 n.h.p.; triple-expansion engines.

The French steamship *Chateau Yquem* hit a mine and sank on June 30th, 1917, in the English Channel.

CHATEAURENAULT

French Navy, cruiser; 1898; LaSeyne; 8,018 tons; 457x56x 22'5; 23,000 i.h.p.; 23 knots; triple-expansion engines; Nor-mand-Sigaudy boilers; two 6• 4 in. guns, six5-5 in., ten 3pdr.

The French cruiser *Chateaurenault* with an escort of destroyers was in the Ionian Sea on December 14th, 1917, when she was torpedoed by the German submarine *UC-38*, Lt. Cdr. Wendlandt. The cruiser did not sink at the first explosion and opened a brisk fire on the submarine which surfaced for a time, but was driven down by the shelling. Despite the vigorous attacks of the destroyers the submarine managed to discharge a second torpedo which hit the *Chateaurenault* again and caused her to sink. Shortly afterwards the destroyers forced the submarine to surface and sank her by gunfire, three officers and 19 men being picked up.

A large proportion of those on board the *Chateaurenault* was taken off by the destroyers. The total number at the time was 1,432, of whom 985 were troops bound for Salonika.

CHATAHOOCHEE

U.S. Government; 1911; Harland & Wolff; 8,007 tons; 470 X 58-2x32-4; 697 n.h.p.; quadruple-expansion engines.

The American steamship *Chattahoochee* was torpedoed and sunk by a German submarine on March 23rd, 1918, in the English Channel.

CHAUNCEY

United States Navy, destroyer; 1901; United States; 420 tons; 245x23x6-5; 8,000 h.p.; 29 knots; 4 Thorny croft boilers; two 14pdr. guns, five 6pdr., 2 T.T.

The United States destroyer *Chauncey* was passing through the Straits of Gibraltar on November 19th, 1917, when she was run down and sunk by the U.S.S. *Cay a*. The destroyer carried a complement of 91.

CHAUNCEY

United States Navy, destroyer; 1918; Union Ironworks; 1,215 tons; 310 x30-9x9-3; 27,500 s.h.p.; 35 knots; turbine engines; White-Forster boilers; four 4 in. guns, one 3in.A.A.; 12 T.T.

The United States destroyer *Chauncey* was one of a flotilla of seven steaming through a dense fog at high speed near the island of Santa Barbara, off the coast of California, on September 8th, 1923. All the ships ran upon the rocks and became total wrecks but most of the crews got away in safety. The full story of the disaster is told under the *Delphy*, leading ship of the flotilla.

CHEANG CHEW

NahKimSeng; 1870; G. R. Clover & Co.; 1,862 tons; 301-3X 35x17-2; 197 n.h.p.; compound engines.

The British cargo ship *Cheang Chew* was wrecked on August 7th, 1911, about 7 miles south of Ampanan, Lombok Island. She was on a voyage from Singapore to Sourabaya.

CHEAPSIDE

F.S.Holland; 1901; Mackie & Thomson; 1,218 tons; 227-9 X 34-5x14-4; 135 n.h.p.; triple-expansion engines.

The British collier *Cheapside* was sunk in a collision on June 18th, 1910, near Start Point. She was on a voyage from the Tyne to Waterford with a cargo of coal.

CHEBOGUE

Canadian Navy, frigate; 1943; Canada; 1,445 tons; 303 X36-5X 12; 6,500 s.h.p.; 21 knots; triple-expansion engines; 3-drum boilers; two 4 in.A.A. guns, ten 20 mm. A.A.

The Canadian frigate *Chebogue* was torpedoed by a German submarine in mid-Atlantic. She was taken in tow by the frigate *Chambly* but broke from tow and foundered in heavy weather off Swansea in December, 1944. Seven of her crew were lost.

CHEDABUCTO

Canadian Navy, fleet-minesweeper; 1940; Canada; 672 tons; 180X28x8-3; 2,400 i.h.p.; 16knots; triple-expansion engines; 3-drum boilers; one 4 in.A.A. gun, two 20 mm., 4 m.g.

The Canadian fleet-minesweeper *Chedabucto* was sunk in collision in the St. Lawrence in February 1944. The vessel's normal complement was 70.

CHEERFUL

CHEERFUL

/. EIKs; 1874; Hylton, Osbourne, Graham & Co.; 1,014 tons; 226•1x30•1x16; compound engines.

The Liverpool steamship *Cheerful* was sunk in a collision with the British ironclad *Hecla*, 6,400 tons, in the Bristol Channel on July 21st, 1885. The collision occurred at 4 a.m. in thick fog, and the steamship sank with the loss of 13 of her crew.

CHEERFUL

British Navy, destroyer; 1897; Hawthorn Leslie & Co.; 370 tons; 5,700 i.h.p.; 30 knots; triple-expansion engines; Thorny craft boilers; one 12pdr. gun, five 6pdr.; 2 T.T.

The destroyer *Cheerful* struck a mine and sank off the Shetland Islands on June 30th, 1917. Her official complement was 60.

CHEFU MARU

Toa Kaiun K.K.; 3,218 tons.

The Japanese ship *Chefu Mam* was bombed and sunk by U.S. carrier-based aircraft on January 12th, 1945, fifteen miles E. of Gocong, Indo-China.

CHEIK

Cie.NouvelledeNav.Busck; 1920; Niiscke&Co.; 1,058 tons; 225-8x32-8x13-9; 110 n.h.p.; triple-expansion engines.

The French steamship *Cheik* was torpedoed and sunk by an Italian submarine on July 10th, 1940, in the Mediterranean.

CHELDALE

Morrison Steamship Co.; 1925; Sir J. Priestman & Co.; 4,218 tons; 365x51-5x25-1; 318 n.h.p.; 10 knots; triple-expansion engines.

The British steamship *Cheldale*, Capt. W. N. Thompson, sank after a collision with the *Greystoke Castle* on February 17th, 1940. She was 24 miles off Durban, carrying a cargo of rice. Sixteen of her crew were lost.

CHELIUSKIN

Sovtorgflot; 1933; Burmeister & Wain; 3,607 tons; 310-2x54-5x22; 419 n.h.p.; compound engines.

The Russian icebreaker *Cheliuskin* left Murmansk on August 8th, 1933, for Wrangell Island with a Soviet scientific expedition on board. From the end of September onwards she was several times caught in the ice, and was finally crushed and sank on February 13th, 1934, 44 miles from the Bay of Wellen. The crew took to the ice and were eventually rescued by aeroplane.

CHELSEA

The River Steam Colliers Co.; 1884; Palmers' Co.; 1,171 tons; 230 x33-2x14-9; 136 n.h.p.; compound engines.

The British collier *Chelsea* was sunk in a collision with the steamship *Kirkcaldy* on May 10th, 1903, near the Dudgeon. She was returning to the Tyne from London. Seven lives were lost.

CHELSEA

Sea S.S. Co.; 1925; Northumberland S.B. Co.; 4,804 tons; 396-1x52-8x27-2; 390 n.h.p.; triple-expansion engines.

The British steamship *Chelsea* was torpedoed and sunk by a German submarine on August 30th, 1940, about 50 miles W. of the Orkney Islands on a voyage from Montreal to Methil. Twenty-four of her crew of 35 were lost.

CHELSTON

Waverley Shipping Co.; 1904; A. Rodger & Co.; 3,687 tons; 347-4x51x24-2; 343 n.h.p.; triple-expansion engines.

The British cargo ship *Chelston* was wrecked on September 12th, 1919, near St. Paul's Island. She was on a voyage to the United Kingdom with a cargo of lumber.

CHEPO

North Atlantic Transport Co.; 1919; Northwest Steel Co.; 5,582 tons; 409-8x54-2x27-7; 2,800 s.h.p.; 9-5 knots; turbine engines.

The Panamanian steamship *Chepo*, Capt. H. Spurrell, was torpedoed and sunk by a German submarine on January 14th, 1942, on a voyage from Glasgow to New York. Seventeen men were killed.

CHERIBON MARU

Nanyo Kaiun K.K.; 1921; Mitsubishi Zosen Kaisha; 4,016 tons; 345 x 50x26- 7; 342 n.h.p.; triple-expansion engines.

The steamship *Cheribon Mam* was bombed and sunk by U.S. land-based aircraft on November 26th, 1942, S.W. of the Aleutian Islands.

CHEROKEE

Agwilines, Inc.; 1925; Newport News S.B. & D.D. Co.; 5,896 tons; 387-5x54-3x20; 981 n.h.p.; turbine engines.

The American steamship *Cherokee* was torpedoed and sunk by a German submarine at 10.30 p.m. on June 15th, 1942, between Halifax, N.S., and New York. Eighty-six lives were lost of a total of 169 crew and passengers.

CHESTER

John Ridley, Son & Tully; 1871; Withy, Alexander & Co.; 1,099 tons; 228-3x30-9x16-5; 134 n.h.p.; compound engines.

The British collier *Chester* was sunk in a collision in December, 1898, off Orfordness while on a voyage from the Tyne to London.

CHEVALIER

United States Navy, destroyer; 1941; Bath Ironworks Corporation; 2,050 tons; 376-5x39-3x12-2; 60,000 s.h.p.; 36-5 knots; turbine engines; Babcock & Wilcox boilers; five 5 in. guns, six 40 mm., ten 20 mm., 10 T.T.

On the night of October 6th, 1943, a division of American destroyers comprising the *Chevalier*, *O'Bannon* and *Selfridge*, under command of Capt. F. R. Walker, encountered a Japanese force, steaming in two groups S. of Choiseul Island. The first group consisted of one light cruiser and four destroyers and the second group of four destroyers only. Despite the odds against them the Americans at once attacked with gunfire and torpedoes compelling the Japanese to turn about and retire.

During the action, which did not last long, the *Chevalier* was hit by a torpedo and damaged, later she came into collision with another destroyer and sustained further damage which caused her to sink. The Japanese lost the destroyer *Yugumo*, 2,200 tons. The *Chevalier* carried a complement of 353.

CHEVINGTON

Broomhill Steamships; 1923; Furness S.B. Co.; 1,537 tons; 244-8x38x17-5; 150 n.h.p.; triple-expansion engines.

The British steamship *Chevington* was torpedoed and sunk by a German submarine on October 12th, 1941, on a voyage from London to Grangemouth. Seven of her crew and two gunners were killed.

CHEVIOT

W. H. Smith & Sons; 1870; C. Mitchell & Co.; 1,226 tons; 230-2x32-2x17-5; 120 h.p.; 9 knots; compound inverted engines.

On the afternoon of October 19th, 1887, the iron steamship *Cheviot* engaged in the Australian coastal trade, left Melbourne for Sydney. The weather was rough and as soon as the steamship had cleared the Heads at Melbourne she encountered the full force of the gale. Shortly after 8 p.m. her propeller came off and she was rendered helpless, it being of little avail to set sail. Eventually she struck the rocks on the Back Beach, Portsea. The weather was too bad to permit of the Queenscliff lifeboat rendering assistance, and during the night the ship broke in two. At daylight a line was thrown to the vessel and the survivors were brought ashore.

The *Cheviot* was carrying 48 persons, passengers and crew, and of these 25 were drowned.

CHEVIOT RANGE

Neptune Steam Navigation Co. (Furness, Withy & Co.); 1914; Irvine's S.B. & D.D. Co.; 3,691 tons; 350-3x51-1x23-8; 341 n.h.p.; 10 knots; triple-expansion engines.

The steamship *Cheviot Range* was intercepted by a German submarine 25 miles S. of the Lizard on February 21st, 1918. The submarine opened fire from the surface and sank the vessel with shells. The captain and 26 men were killed.

CHEYENNE

Anglo-American Oil Co.; 1930; Palmers'Co.; 8,825 tons; 477X 63-8x34-8; 785 n.h.p.; oilengines.

The British tanker *Cheyenne*, Capt. Hugo Kerr, on a voyage from Aruba to Swansea with benzine, was torpedoed and sunk by a German submarine on September 15th, 1939, 150 miles S.W. of the Fastnet.

CHI YUEN

Chinese Navy, light cruiser; 1887; *Armstrong Mitchell*; 2,300 tons; 268 X 38x21; 5,500 i.h.p.; 18-5 knots; triple-expansion engines; three 8 in. guns, two 6 in., eight 6 pdr., two 3 pdr., six 1 pdr., 2 m.g.

The *Chi Yuen* was one of a small fleet of battleships and cruisers belonging to China at the commencement of the Sino-Japanese War, which broke out on August 1st, 1894. The cause of the dispute was the Kingdom of Korea, and on September 15th, the Chinese fleet under Admiral Ting was directed to sail to the River Yalu, between Korea and Manchuria, convoying six transports carrying 4,500 troops and 80 guns. At the same time Admiral Ito of the Japanese navy was engaged upon a similar task, disembarking troops about 100 miles southward along the coast. The Japanese then sailed toward the Yalu River, making contact with the Chinese squadron at about 11 a.m. on the morning of the 17th September.

The forces engaged are listed below. The Japanese ships were newer and faster than the Chinese, and were armed with quick-firing guns. The former were all cruisers, against which the Chinese could place two small but efficient battleships, with a number of cruisers of indifferent gun-power. On board the Chinese ships there were a number of able British, American and German officers.

CHINESE	tons	knots	guns			
<i>Ting Yuen</i> (flagship)	7,430	14	four 12 in.	four 6 in.		
<i>Chen Yuen</i>	7,430	14	four 12 in.	four 6 in.		
<i>King Yuen</i>	2,850	16-5	four 8 in.	two 6 in.		
<i>Lai Yuen</i>	2,850	16-5	two Sin.	two 6 in.		
<i>Ping Yuen</i>	2,850	16-5	one 10-2 in.	two 6 in.		
<i>Tsi Yuen</i>	2,355	14-5	two 8-2 in.	one 5-9 in.		
<i>Chi Yuen</i>	2,300	18-5	three 8 in.	two 6 in.		
<i>Yang Wei</i>	1,350	16	two 10 in.	four 4-7 in.		
<i>Chao Yung</i>	1,350	16-8	two 10 in.	four 4-7 in.		
<i>Kwang Chia</i>	1,300	15	two 15cm.	five 12cm.		
<i>Kwang Ping</i>	1,030	16-5	three 12 cm.			

In addition to the above there were four gunboats and six torpedo boats. JAPANESE

<i>Matsushima</i> (flagship)	4,277	17-5	one 12-5 in.	eleven 4-7 in.		
<i>Itsukushima</i>	4,277	17-5	one 12-5 in.	eleven 4-7 in.		
<i>Hasidate</i>	4,277	17-5	one 12-5 in.	eleven 4-7 in.		
<i>Yoshino</i>	4,180	23	four 6 in.	eight 4-7 in.		
<i>Fuse</i>	3,718	18	two 10-2 in.	six 5-9 in.		
<i>Takachico</i>	3,650	18-7	two 10-2 in.	six 5-9 in.		
<i>NaniwaKan</i>	3,650	18-7	two 10-2 in.	six 5-9 in.		
<i>Atkitsushima</i>	3,150	19	four 6in.	six 4-7 in.		
<i>Chiyoda</i>	2,450	17-5		ten 4-7 in.		
<i>Hiyei</i>	2,200	11	one 10-2 in.	two 5-9 in.		

Also the *Saikio* and the *Akagi*, two gunboats of some 600 tons.

The Chinese squadron was disposed in line abreast, the two battleships being in the middle with three of the lighter ships to port and the other seven to starboard. They were steaming at about six knots, but even at that easy speed those on the flanks could not keep station and lagged astern of the centre. The Japanese were in two divisions, line ahead.

Early in the action the *Tsi Yuen*, a cruiser of 2,355 tons, was hit by Japanese shells and her captain at once turned tail for Port Arthur. The next ship, the *Kwang Chia* of 1,300 tons, followed her example and thus Admiral Ting was deprived by this cowardice of two ships at the outset of the battle. The conduct of the remainder of the squadron was creditable, though instances of individual cowardice were afterwards reported.

The rapidity of the Japanese quick-firers soon set fire to the useless wooden ornamentation with which the Chinese ships were decorated. Two ships, the *Chao Yung* and *Yang Wei*, carried two 10 in. guns apiece, these being mounted in barbettes fore and aft,

with a raised superstructure between, in which were wooden cabins. Once this was set ablaze no ammunition could reach the big guns and as fighting units the two ships were finished. They both drove ashore in sheets of flame.

The next ship to go was the *Chi Yuen* which was commanded by an able Chinese officer, Capt. Tang, with Chief Engineer Purvis, a Scot, to look after the engine room. The vessel was the fastest unit of the squadron. She sustained a terrible battering and began to leak badly, in which situation Capt. Tang resolved to ram while capable of some degree of speed. His choice of ship was unfortunate, however, as the *Yoshino*, which was nearest, was the fastest vessel of the Japanese, having a speed of 23 knots. She avoided the *Chi Yuen* with ease and concentrating all her fire on her, with the rest of the division behind, literally blew her to pieces. The *Chi Yuen* plunged down bow foremost, taking with her most of her crew.

The battle was now fast drawing to a close, another Chinese cruiser, the *Lai Yuen*, was badly on fire but her engine room staff stuck to their posts and brought her safely out of the fight.

The two Chinese battleships fought well and inflicted great damage on their foes, though hampered by the slowness of their guns and the lack and bad quality of their ammunition. Admiral Ting succeeded in bringing six of his squadron out of the fight having lost three cruisers by enemy action, and the services of two others by defection.

Losses of Chinese personnel are not known. The Japanese lost 90 killed and 204 wounded, and several of their ships were badly knocked about.

The hesitancy of Admiral Ito to pursue his advantage and destroy the whole of the enemy squadron has never been fully explained.

CHIBURI MARU

Nihonkai Kisen K.K.; 1,943 tons.

The *Chiburi Mam* was bombed and sunk by U.S. land-based aircraft on January 17th, 1944, off the Admiralty Islands.

CHIC

Preston Steam Navigation Co.; 1914; *Russell & Co.*; 3,037 tons; 331 x49x21-9; 241 n.h.p.; 9-5 knots; triple-expansion engines.

The steamship *Chic*, Capt. Murchie, left the United States for Manchester with a crew of 25 and a cargo of paper pulp. On April 13th, 1916, when 45 miles S.W. of the Fastnet, the vessel was intercepted by a German submarine which opened fire from the surface. The crew took to the boats, the first one of which capsized. Capt. Murchie and eight men were killed.

CHICAGO

Nepiune S.N. Co.; 1890; *Short Bros.*; 2,381 tons; 293-5x39x 18-4; 260 h.p.; triple-expansion engines.

The British cargo ship *Chicago* was wrecked on October 10th, 1894, south of Peterhead while on a voyage from Rotterdam to Baltimore.

CHICAGO

United States Navy, heavy cruiser; 1930; *Mare Island Navy Yard*; 9,300 tons; 600-2x66x23; 107,000 s.h.p.; 32-7 knots; turbine engines; White-Forster boilers; nine 8 in. guns, eight 5 in., two 3 pdr., 8 m.g.

The *Chicago*, Capt. Davis, formed part of a force of cruisers and destroyers covering the passage of transports to the island of Guadalcanal. On the night of January 29th, 1943, when 70 miles S. of the island the force was attacked by Japanese torpedo-bombers. The *Chicago* was hit by more than one torpedo and was disabled. She was taken in tow, first by a cruiser and then by a tug. On the following day the ship was again a target for the Japanese bombers, 13 of which made a most determined attack upon her and although U.S. fighters shot down 12 of the Japanese aircraft they were unable to prevent further damage to the cruiser which sank shortly afterwards.

The *Chicago* carried a complement of about 800, of whom six officers and 56 ratings were killed. Capt. Davis was among the survivors.

CHICAGO MARU

Osaka Shosen K.K.; 1910; *Kawasaki Dockyard Co.*; 5,866 tons; 409-8x51-2x32-5; 544 n.h.p.; triple-expansion engines.

The steamship *Chicago Maru* was torpedoed and sunk by the U.S. submarine *Tullibee* on October 15th, 1943, off the west coast of Formosa.

CHICHESTER

CHICHESTER

W.R.Rea; 1890; Workman, Clark & Co.; 2,083 tons; 285-3x38-2x19-2; 200 h.p.; triple-expansion engines.
The British cargo ship *Chichester* was wrecked on August 18th, 1891, in the Straits of Magellan. She was on a voyage from Iquique to St. Vincent, C.V., with a cargo of nitrate.

CHICHIBU MARU

NichiroGyogyoK.K.; 1923; Yokohama Dock Co.; 1,525 tons; 300 X 43x25; 126 n.h.p.; triple-expansion engines.
The steamship *Chichibu (Titibu) Mam* was torpedoed and sunk by the U.S. submarine *Gar* on March 13th, 1942, S. of Shimizu, Japan.

CHICKASAW CITY

IsthmianS.S. Co.; 1920; ChickasawS.B. & Car. Co.; 6,196 tons; 395-5x55x31-4; 587 n.h.p.; triple-expansion engines.
The American steamship *Chickasaw City* was torpedoed and sunk on October 7th, 1942, on a voyage from Table Bay to Trinidad. Five of her crew, one gunner and one passenger were killed.

CHIERI

La Meridionale di Nav. S.A.; 1920; Ansaldo San Giorgio; 5,334 tons; 383-2x51-7x27-9; turbine engines.
The Italian steamship *Chieri* foundered in heavy weather on December 7th, 1929, in the Gulf of Gascoyne.

CHIFUKU MARU

Kaiyo KisenK.K.; 1919; Kawasaki Dockyard Co.; 5,857 tons; 385 x51x 36; 436 n.h.p.; triple-expansion engines.
The steamship *Chifuku (Tihuku) Maru* was torpedoed and sunk by the U.S. submarine *Growler* on January 16th, 1943, off Rabaul.

CHIH HSIN

China Merchants S.N. Co.; 1944; Avondale Marine Ways; 1,873 tons; 250 x41-7x18-2; compound engines.
The Chinese steamship *Chih Hsin* was driven ashore and wrecked during a typhoon on the night of September 29th, 1955, at Ariake Wan, Kyushu Island.

CHIHAYA MARU

Japanese Government; 7,089 tons.
The steamship *Chihaya Maru* was formerly the Dutch *Tjisaroea*, captured by the Japanese in the Indian Ocean in March, 1942. She was torpedoed and sunk by the U.S. submarine *Seahorse* on November 2nd, 1943, about 300 miles E. of the Ryukyu Islands.

CHIHAYA MARU

OgawaGomeiKaisha; 1918; Chitose Risen K.K.; 1,161 tons; 224-5x33x18-7; 81 n.h.p.; triple-expansion engines.
The steamship *Chihaya (Tihayd) Maru* was torpedoed and sunk by the U.S. submarine *Barb* on June 11th, 1944, off Sakhalin.

CHIHAYA MARU

Nippon YusenKaisha; 4,701 tons.
The *Chihaya Maru* was torpedoed and sunk by the U.S. submarine *Sunfish* on September 10th, 1944, about 60 miles W. of Karatsu, Japan.

CHIKA MARU

TochikiShojiK.K.; 1919; TochigiShipyard; 1,146 tons; 209-7x31x19-2; triple-expansion engines.
The steamship *Chika (Tika) Maru* was sunk by U.S. carrier-based aircraft on August 9th, 1945, off Seishin, Manchuria.

CHIKUGO MARU

ToaKaiunK.K.; 1907; D. & W. Henderson & Co.; 2,461 tons; 310X40x16-5; 386 n.h.p.; triple-expansion engines.
The steamship *Chikugo (Tikugo) Maru* was torpedoed and sunk by the U.S. submarine *Tambor* on November 3rd, 1942, N.E. of Hainan Island.

CHIKUMA

Japanese Navy, heavy cruiser; 1938; Nagasaki; 14,000 tons; 614-3x63x14-5; 90,000 s.h.p.; 33 knots; turbine engines; Kanpon boilers; eight 8 in. guns, eight 5 in., four 3 in., 6 m.g.; 12 T.T., 4 aircraft.

The *Chikuma* was a unit of the Central Force in the battle of Leyte Gulf, October 23rd-26th, 1944. On the night of the 23rd-24th and on the following day the Japanese suffered heavy losses, but on the 25th they made contact E. of Samar with a weaker American force consisting of six escort carriers, three destroyers and four destroyer escorts, under Rear-Admiral C. A. F. Sprague, U.S.N.

The *Chikuma*, which had already been torpedoed by U.S. destroyers when passing through the San Bernardino Strait, was bombed by aircraft from the carriers and sunk.

For full story of the battle see under the battleship *Musashi*.

CHIKUMA MARU

Nippon Yusen Kaisha; 9,951 tons.
The steamship *Chikuma Maru* struck a mine and sank on July 10th, 1945, off Shimonoseki.

CHIKUZAN MARU

Japanese Government; 1,840 tons.
The *Chikuzan Maru* was bombed and sunk by U.S. land-based aircraft on July 12th, 1943, off Haiphong, Indochina.

CHIKUZEN MARU

ToaKaiun; 1907; D. & W. Render son & Co.; 2,448 tons; 310-3 X40-2X16.5; triple-expansion engines.
The steamship *Chikuzen (Tikuzen) Maru* was torpedoed and sunk by the U.S. submarine *Pogy* on July 27th, 1945, about 150 miles N.W. of Maizuru, Japan.

CHILDWALL

John Edgar & Co.; 1868; G. R. Clover & Co.; 1,334 tons; 213 X 37-1x23-3.

The iron barque *Childwall* was bound from Iquique to Antwerp with a cargo of nitrate, and was under command of Capt. Richardson, having a crew of 22 and a Dutch pilot on board. On January 1st, 1892, the vessel lay-to in the Downs as the weather was bad, but at 4 a.m. on the 2nd it had cleared sufficiently for her to weigh anchor. She had a fairly good run across the North Sea and at about 7 p.m. was half-a-mile from the Wielingen lightship, 13 miles from Flushing. The night was dark but clear and suddenly a green light was seen and a large steamship came into sight dangerously near the barque. At the last moment the oncoming vessel, which turned out to be the Belgian Red Star liner *Noordland*, altered course and endeavoured to cross the *Childwall's* bows. There was not sufficient sea-room to enable her to do this and she struck the barque on the port side, between the fore and mainmasts, cutting through her to within six feet of her starboard side. The *Noordland* then reversed her engines, backing away with the sailing ship's two masts entangled in her gear.

The *Childwall* sank in two minutes, taking 15 of her crew with her. The survivors clung to the mizzen-rigging as the barque had sunk in shallow water with bowsprit and mizzen-topmast clear. The *Noordland* stood by and lowered two boats, but failed to find the shipwrecked men. Of those in the rescue boats one man was drowned. The *Noordland*, which was leaking badly and had over 500 persons on board, then put about for Flushing.

At 11 p.m. the s.s. *Ipswich* heard the cries of the men in the mizzen mast and took them off without further accident. The survivors numbered nine, and included Capt. Richardson.

CHILE

Soc. Anon. Maritima Chilena; 1907; W. Beardmore & Co.; 3,951 tons; 361-4x46-2x22-2; 550 n.h.p.; triple-expansion engines.
The Chilean steamship *Chile* was in a floating dock at Valparaiso when, on May 22nd, 1940, the floating dock capsized in a gale and sank in 30 fathoms, taking the *Chile* with it.

CHILE

Det Ostasiatiske Kompagni; 1915; Burmeister & Wain; 6,956 tons; 425-3x55-2x27-5; 717 n.h.p.; 12 knots; oilengines.

After the German occupation of Denmark in April 1940 the *Chile*, Capt. N. E. Bom, sailed under the British flag. On June 7th, 1942, she was torpedoed and sunk by a submarine about 350 miles S.W. of Monrovia, Liberia. Five men were killed. Capt. Bom was among the survivors.

CHILE MARU

Yamashita Kisen K.K.; 1919; Kawasaki Dockyard Co.; 5,859 tons; 385x51x36; triple-expansion engines.

The steamship *Chile Maru* was bombed and sunk by U.S. land-based aircraft on May 12th, 1945, off Karatsu, Japan.

CHILEAN REEFER

/. Lauritzen; 1936; Nakskov Skibsv.; 1,831 tons; 292 -8x44-7 X16-7; 405 n.h.p.; 14 knots; oilengines.

The *Chilean Reefer*, Capt. T. Bell, was taken over by the Ministry of War Transport at the time of the German occupation of Denmark and managed for the Ministry by Alfred Holt & Co. On March 16th, 1941, she was about 200 miles S.E. of Cape Race when she was intercepted and sunk by the German battleship *Gneisenau*. Nine men were killed and three others died soon after being picked up. Capt. Bell was among the survivors.

See also *Rio Dorado*.

CHILKA

British India S.N. Co.; 1910; Barclay, Curie & Co.; 3,952 tons; 390-3x50-2x21-7; 573 n.h.p.; triple-expansion engines.

The British ship *Chilka* was carrying 15 European and 1,600 native passengers from Madras to Rangoon. On July 1st, 1917, she was off Baruva when she caught fire. The ship was beached and became a total wreck.

An unspecified number of deck passengers jumped overboard and were drowned, but the majority were saved.

CHILKA

British India Steam Navigation Co.; 1922; W. Denny & Bros.; 4,360 tons; 390x52-7x23-2; 762 n.h.p.; 13-5 knots; turbine engines.

The liner *Chilka*, Capt. W. Bird, was employed as a troopship soon after the outbreak of war with Japan in December, 1941. On March 11th, 1942, when sailing to Padang in Sumatra, she was intercepted by a Japanese submarine of the largest and newest type. When sighted the submarine was on the port quarter aft at a distance of about 2,000 yards. She at once opened fire from the surface with two guns, exploding both of the *Chilka's* ammunition lockers and mortally wounding one of the naval gun crew. Fire then broke out and Cadet Shahabuddin, an Indian, gallantly fought the flames although he had previously been wounded by shell fire.

After about 25 minutes action, during which the *Chilka's* gun was knocked out, Capt. Bird hove-to and lowered his boats, at the same time signalling to the submarine which ceased fire. Three officers, three lascar members of the crew and the naval gunner lost their lives, and three officers were wounded.

Capt. Bird directed his boats to steer for the Mentawai Islands, which were reached without mishap on March 16th. Later it became known that the Japanese were approaching and the captain decided to attempt to reach Ceylon. He obtained a steel lifeboat from the District Officer of the islands and in company with the ship's surgeon, some of the engineers and a naval gunner he set sail on the 31st. On May 4th, after 35 days at sea, the boat was picked up by a Greek vessel and the occupants landed at Karachi.

Capt. Bird was later awarded the O.B.E. and Cadet Shahabuddin the B.E.M. and Lloyd's War Medal.

CHELOE

Pacific Steam Navigation Co.; 1881; J. Elder & Co.; 2,309 tons; 321 X 37-2x24-7; 400 h.p.; compound engines.

The British cargo ship *Chiloe* was wrecked in July, 1892, at Talcahuano. She was on a voyage from Valparaiso to Puerto Montt.

CHILOE

Cia. Chilena de Nav. Interoceanica; 1909; A. Rodger & Co.; 1,941 tons; 270x37-4x18-7; 236 n.h.p.; triple-expansion engines.

The Chilean steamship *Chiloe* was wrecked at Puchoco Point, Chile, on April 29th, 1942.

CHILORE

OreS.S. Corp.; 1923; Bethlehem S.B. Corp.; 8,310 tons; 549-6 X72-2X40-5; turbine engines.

The American steamship *Chilore*, on a voyage from Baltimore to Trinidad, was torpedoed by a German submarine on July 15th, 1942. She was taken in tow but when approaching the anchorage at Cape Hatteras she struck a mine and sank.

CHILTON

Thos. Appleby & Co.; 1879; W. Gray & Co.; 1,118 tons; 228X 30-2x16-8; 99 h.p.; compound inverted engines.

The British iron cargo ship *Chilton* was wrecked on May 30th, 1888, on Marseilles breakwater when arriving from Taganrog with a cargo of wheat.

CHIN KIANG

William Milburn & Co.; 1872; C. Mitchell & Co.; 1,249 tons; 243 -5x31-2x22-3; 160 h.p.; compound engines.

The British cargo ship *Chin Kiang* was wrecked on January 29th, 1884, in Huitan Bay while on a voyage from Hong Kong to Shanghai.

CHINA

Bailey & Leatham; 1869; Wigham Richardson & Co.; 1,731 tons; 290-3x35-3x20-9; 203 n.h.p.; triple-expansion engines.

The British cargo ship *China* ran ashore on January 3rd, 1901, near Uto lighthouse, Finland, on a voyage from the Tyne to Reval. Fire broke out on board on the 10th. This was extinguished but the ship slipped off and sank on the 24th.

CHINA MARU

Kawasaki Kisen K.K.; 1920; Kawasaki Dockyard Co.; 5,869 tons; 385x51x36; 437 n.h.p.; triple-expansion engines.

The steamship *China Maru* was sunk by U.S. carrier-based aircraft on September 21st, 1944, off Corregidor, Philippines.

CHINA VICTOR

China Coastal Lines; 1919; Submarine Boat Corp.; 3,283 tons; 324x46-2x35; turbine engines.

The Chinese steamship *China Victor* was at Kaohsiung, Formosa, on August 23rd, 1949, unloading her cargo of ammunition, when fire broke out on board. The fire became uncontrollable and shortly afterwards the ship blew up and sank. The explosion caused extensive damage in the port area and some 500 people were killed or injured.

CHINESE PRINCE

Rio Cape Line (Furness, Withy & Co.); 1926; Deutsche Werft; 8,593 tons; 441-6x60-3x29-2; 4,850 b.h.p.; 15 knots; oil engines.

The *Chinese Prince*, Capt. W. Finch, was in the North Atlantic on June 12th, 1941, when she was torpedoed and sunk by a German submarine. Capt. Finch and 43 others were killed and one was injured.

CHING-PING

Chinese Engineering & Mining Co.; 1890; Blyth S.B. Co.; 1,385 tons; 250 x 32 • IX13 • 2; 99 n.h.p.; triple-expansion engines.

The British cargo ship *Ching-Ping*, registered at Shanghai, was wrecked on February 27th, 1908, in Shitau Bay, Shantung, while on a voyage from Shanghai to Chinwangtao.

CHINGFORD

James Mitchell & Sons; 1889; 1,517 tons; 264-5x37x17-8; 168 n.h.p.; triple-expansion engines.

The British steamship *Chingford* was wrecked on December 23rd, 1924, on the Kilminnings Sands, Crail, Fifeshire, while on a voyage from Trangsund to Grangemouth with a cargo of timber.

CHINKAI MARU

CHINKAI MARU

ToaKaiunK.K.; 2,827 tons.
The *Chinkai Mam* was torpedoed and sunk by the U.S. submarine *Peto* on November 18th, 1944, about 150 miles E. of Hue, Indo-China.

CHINKO MARU

ToaKaiunK.K.; 3,222 tons.
The steamship *Chinko Mam* was bombed and sunk by U.S. land-based aircraft on November 4th, 1943, about 100 miles E. of Bias Bay, China.

CHINSURA

British India S.N. Co.; 1877; *W. Denny & Bros.*; 2,033 tons; 316 • 1 x 33 - 2 x 25 - 8; 220 h.p.; compound inverted engines.
The British cargo ship *Chinsura* was wrecked on May 13th, 1883, near False Point. She was on Indian coasting service from Calcutta.

CHINTO MARU

T. Suda; 1886; *Barrow S.B. Co.*; 2,592 tons; 310-3x38-1x25-2; 254 n.h.p.; triple-expansion engines.
The Japanese steamship *Chinto Mam* was sunk by a German submarine on January 4th, 1917, off south-west Spain.

CHINZEI MARU

Hokkai Sempaku; 1,999 tons.
The *Chinzei Mam* was torpedoed and sunk by the U.S. submarine *Bluegill* on October 18th, 1944, about 100 miles W. of Bataan, Philippines.

CHIOS

Hellenic Coast Lines Co.; 1892; *Ailsa S.B. Co.*; 1,121 tons; 244x31-8x15-5; 332 n.h.p.; triple-expansion engines.
The Greek steamship *Chios* was bombed and sunk by German aircraft on April 18th, 1941, at Eretria, near Chalkis, during the invasion of Greece.

CHIOS

G. Bock & Co.; 1912; *Schiffswerfv. Henry Koch*; 1,731 tons; 277'7x39-2x17-9; 210 n.h.p.; triple-expansion engines.
The German steamship *Chios* struck a mine and sank on September 24th, 1944, near Brunsbuttel.

CHISHIMA

Japanese Navy, torpedo gunboat; 1890; *St. Nazaire*; 753 tons; 230x27x8-2; 5,000 h.p.; 22 knots; triple-expansion engines; two 4 • 7 in. guns, four 3 pdr.; 3 T. T.
The new torpedo gunboat *Chishima* was on a voyage from St. Nazaire to Japan when she collided with the P. and Q ship *Ravenna*, 3,372 tons, off Iyo, in the Inland Sea of Japan, on November 25th, 1892. The latter ship had her bows damaged and was no longer capable of continuing her voyage. The *Chishima*, which was the more damaged of the two, sank very rapidly, taking with her 75 officers and ratings. The *Ravenna* stood by and lowered her boats which picked up the Japanese captain, the engineer and 14 ratings. This was the second warship built in France which the Japanese had lost on the voyage out, the *Unebi* having been lost with all hands shortly after leaving Singapore on December 3rd, 1886.

CHISHIMA MARU

Fujima Yoshio; 1891; *W. Gray & Co.*; 1,368 tons; 245-1x34-6x17-5; compound engines.
The steamship *Chishima (Tisimd) Mam* was sunk by U.S. carrier-based aircraft on July 18th, 1945, about 100 miles S.W. of Mokpo, Korea.

CHISWICK

Watts, Ward & Co.; 1871; *C. Mitchell & Co.*; 1,261 tons; 239-5X32-1x17-6; 130 h.p.; compound engines.
The British ship *Chiswick*, Capt. Hughes, was carrying a cargo of coal from Cardiff to St. Nazaire on February 5th, 1891, when she struck the Seven Stones rocks near Scilly and sank. Eleven of her crew of 19 were drowned.

CHISWICK

Britain S.S. Co.; 1904; *D. & W. Henderson & Co.*; 3,246 tons; 331-5x50x21-9; 308 n.h.p.; triple-expansion engines.
The British ship *Chiswick* was wrecked on January 2nd, 1919, on the north-west point of Kildin Island. She was carrying a cargo of coal from Cardiff to Murmansk.

CHITA MARU

TochikiShojiK.K.; 1923; *Tochigi Shoji K.K.*; 2,276 tons; 270 x 40x24; triple-expansion engines.
The steamship *Chita (Tita) Maru* was torpedoed and sunk by the U.S. submarine *Guardfish* on September 4th, 1942, off Tamagawa, Japan.

CHITOSE

Japanese Navy, light aircraft carrier; 1936; *Kure*; 9,000 tons; 577-5x61-7x19; 15,000 b.h.p.; 20 knots; turbine engines; six 5 in. guns, several smaller; 30 aircraft.
The Japanese light aircraft carrier *Chitose* was a unit of the Northern Force of two battleships, four aircraft carriers, five cruisers and six destroyers steaming southward from Cape Engano, Luzon, to take part in the battle of Leyte Gulf, October 23rd-26th, 1944. The force was intercepted by the U.S. Third Fleet and a determined air-sea action was fought throughout the 25th in which the Japanese aircraft carrier squadron was completely destroyed, together with one light cruiser. By nightfall the remnants of the Northern Force, of which the larger units were all badly damaged, broke off the action and retired.

For further details of the action off Cape Engano, see the aircraft carrier *Zuikaku*. The full story of the battle of Leyte Gulf is told under the battleship *Musashi*.

CHIYO MARU

Tochigi Risen K.K.; 4,700 tons.
The *Chiyo Mam* was torpedoed and sunk by the U.S. submarine *Shark* on June 2nd, 1944, about 300 miles W.N.W. of the Ladrone Islands.

CHIYODA

Japanese Navy, light aircraft carrier; 1937; *Kure*; 9,000 tons; 577-5x61-7x19; 15,000 b.h.p.; 20 knots; turbine engines; six 5 in. guns, several smaller; 30 aircraft.
The Japanese light aircraft carrier *Chiyoda* was a unit of the Northern Force of two battleships, four aircraft carriers, five cruisers and six destroyers steaming southward from Cape Engano, Luzon, to take part in the battle of Leyte Gulf, October 23rd-26th, 1944. The force was intercepted by the U.S. Third Fleet and a determined air-sea action was fought throughout the 25th in which the Japanese aircraft carrier squadron was completely destroyed, together with one light cruiser. By nightfall the remnants of the Northern Force, of which the larger units were all badly damaged, broke off the action and retired.

The *Chiyoda* was sunk by gunfire of U.S. ships after she had been disabled by bombing.

For further details of the action off Cape Engano see the aircraft carrier *Zuikaku*. The full story of the battle of Leyte Gulf is told under the battleship *Musashi*.

CHIYODA MARU

Nippon Yusen Kaisha; 4,700 tons.
The *Chiyoda Mam* was torpedoed and sunk by the U.S. submarine *Queenfish* on August 31st, 1944, about 100 miles S. of Formosa.

CHIZU MARU

TochikiShojiK.K.; 1920; *Tochigi Shipyard*; 2,304 tons; 270 X 40 X 24; triple-expansion engines.
The steamship *Chizu (Tizu) Maru* struck a mine and sank on July 14th, 1945, off Yawata, Japan.

CHLOE

E. Sturlese & Co.; 1899; *Reiherstieg Schiffsw.*; 5,730 tons; 431-2x54-5x27-9; 360 n.h.p.; quadruple expansion engines.
The former Greek steamship *Chloe* had been sold to Italian ship-breakers and left Sunderland for Savona in early September, 1932, on her last voyage. On September 13th, she was sunk by an internal explosion N.W. of Ushant.

CHLOE

N. D. Lykiardopulo; 1928; *W. Gray & Co.*; 4,641 tons; 400x 56-2x24-9; 394 n.h.p.; quadruple-expansion engines.
The Greek steamship *Chloe* was torpedoed, shelled and sunk by a Japanese submarine on May 7th, 1942, while on a voyage from Newcastle, N.S.W., to Noumea.

CHOAN MARU

ToaKaiunK.K.; 1927; *Kobe Steel Works*; 2,631 tons; 284-8x 45-5x23; 582 n.h.p.; oilengines.
The motor vessel *Choan (Tyoan) Mam* was taken over by the Japanese Navy for use as an auxiliary gunboat. On May 10th, 1944, she was torpedoed and sunk by the U.S. submarine *Silversides*.

CHOHAKUSAN MARU

Chosen YusenK.K.; 1928; *Uraga Dock Co.*; 2,132 tons; 280X 41x23-5; triple-expansion engines.
The steamship *Chohakusan (Tyohakusari) Maru* was taken over by the Japanese Navy for use as an auxiliary gunboat. On March 1st, 1945, she was sunk by U.S. carrier-based aircraft off the Ryukyus Islands^

CHOI MARU

Daiko Kisen K.K.; 1,074 tons.
The *Choi Maru* was torpedoed and sunk by the U.S. submarine *Rasher* on May 11th, 1944, off Burn Island, Celebes.

CHOJO MARU

ToaKaiunK.K.; 1927; *Mitsubishi Zosen Kaisha*; 2,610 tons; 284-5x45-5x23; 582 n.h.p.; oilengines.
The transport *Chojo (Tyozyo) Maru* was torpedoed and sunk by the U.S. submarine *Tinosa* on February 16th, 1944, N.E. of Mindanao Island, Philippines.

CHOJUSAN MARU

Chosen YusenK.K.; 1928; *Uraga Dock Co.*; 2,131 tons; 280 X 41x23-5; 156 n.h.p.; triple-expansion engines.
The steamship *Chojusan (Tyozoyusan) Maru* was taken over by the Japanese Navy for use as an auxiliary gunboat. On November 9th, 1944, she was torpedoed and sunk by the U.S. submarine *Queenfish* about 150 miles W. of the Shichi-to Islands, Japan.

CHOKAI

Japanese Navy, heavy cruiser; 1930; *Mitsubishi*; 9,850 tons; 650x62-3x16-5; 100,000 s.h.p.; 33 knots; turbine engines; Kanpon boilers; ten 8 in. guns, four 4• 7 in., eight 47 mm., 4 m.g.; 8 T.T.; 4 aircraft.
The Japanese heavy cruiser *Chokai* was a unit of the Central Force taking part in the battle of Leyte Gulf, October 23rd-26th, 1944. The cruiser was attacked by carrier-borne aircraft of the U.S. Third Fleet when the squadron was passing through the Sibuyan Sea on the 25th. She was hit by aerial torpedoes and sunk, together with the new battleship *Musashi*, 42,500 tons, and a destroyer.
The full story of the battle is told under the *Musashi*.

CHOKAI MARU

Settu Syosen K.K.; 1919; *Ishikawajima S.B. & E. Co.*; 1,284 tons; 230X33x19-5; triple-expansion engines.
The steamship *Chokai (Tyokai) Mam* was sunk by U.S. carrier-based aircraft on March 24th, 1945, about 40 miles S.W. of Okinawa Island.

CHOKAI MARU No. 2

Settu Syosen K.K.; *Ishikawajima S.B. & E. Co.*; 1,287 tons; 230 X 33x19-5; 88 n.h.p.; triple-expansion engines.
The steamship *Chokai (Tyokai) Maru No. 2* struck a mine and sank on August 6th, 1945, off Sado Island, Japan.

CHOKO MARU

Yamashita Kisen K.K.; 1920; *Teikoku S.S. Co.*; 6,783 tons; 425X53-6X34-9; 584 n.h.p.; triple-expansion engines.
The steamship *Choko (Tyoko) Maru* was torpedoed and sunk by the U.S. submarine *Gudgeon* on October 21st, 1942, W. of New Ireland.

CHOKO MARU

TaiyoKogyoK.K.; 1939; *Tama S.B. Co.*; 3,515 tons; 340-Sx 48-2x26-2; 232 n.h.p.; triple-expansion engines & L.P. turbine.
The steamship *Choko (Tyoko) Maru* was bombed and sunk by U.S. carrier-based aircraft on December 5th, 1943, off Lae Island.

CHOKO MARU

ToaKaiunK.K.; 1927; *Osaka Iron Works*; 2,629 tons; 284-5 X 45-6x23; 582 n.h.p.; oil engines.
The motor vessel *Choko Mam* was taken over by the Japanese Navy and converted into an auxiliary gunboat. On January 12th, 1944, she was torpedoed and sunk by the U.S. submarine *Albacore* about 400 miles N. of the Admiralty Islands.

CHOKO MARU

Nichiro Gyogyo K.K.; 1923; *Mitsubishi Zosen Kaisha*; 1,794 tons; 250x39x19; 138 n.h.p.; triple-expansion engines.
The steamship *Choko (Tyoko) Maru* was torpedoed and sunk by the U.S. submarine *Tang* on February 25th, 1944, about 100 miles N.W. of Saipan Island, Ladrone Islands.

CHOKYU MARU No. 5

Tanaka Kosan KabushikiKaisha; 1914; *Uraga Dock Co.*; 2,138 tons; 268x40-9x23-6; 169 n.h.p.; triple-expansion engines.
The Japanese steamship *Chokyu Maru No. 5* was wrecked at Kobe-saki, Rikuzen, Japan, on February 24th, 1922.

CHOSA MARU

ToaKaiunK.K.; 1921; *Osaka Iron Works*; 2,538 tons; 284 -5 X 42-5x23; 288 n.h.p.; triple-expansion engines.
The steamship *Chosa (Tyosa) Maru* was taken over by the Japanese Navy and converted into an auxiliary gunboat. On August 20th, 1943, she was torpedoed and sunk by a Dutch submarine S.W. of Penang.

CHOSAN MARU

Dairen Kisen K.K.; 1940; *Tama S.B. Co.*; 3,939 tons; 354-5 X 50-5x24-5; triple expansion engines & exh. turbine.
The steamship *Chosan (Tyosan) Maru* was torpedoed and sunk by the U.S. submarine *Shad* on May 17th, 1945, N.W. of Mokpo, Korea.

CHOSEN MARU

Kita Nippon K.K.K.; 1911; *Armstrong, Whitworth & Co.*; 3,110 tons; 305-1x44-1x24-9; 279 n.h.p.; triple-expansion engines.
The steamship *Chosen (Tyosen) Maru* was torpedoed and sunk by the U.S. submarine *Sturgeon* on January 24th, 1944, about 150 miles S. of Kochi, Japan.

CHOSHUN MARU

Osaka Shosen K.K.; 1907; *Osaka Iron Works*; 1,728 tons; 262 X35-2X19-9; 138 n.h.p.; triple-expansion engines.
The Japanese steamship *Choshun Maru* was wrecked near Kashoto, E. of Formosa, on November 1st, 1930. She had on board a large number of passengers and troops.

CHOWA MARU

NittoKogyo Kisen K.K.; 1940; *Osaka Iron Works*; 2,719 tons; 307-9x45x24-9; triple-expansion engines. The steamship *Chowa (Tyowa) Mam* was torpedoed and sunk by the U.S. submarine *Bowfin* on May 1st, 1945, about 150 miles S.E. of Hakodate.

CHOY-SANG

Indo-ChinaS.N.Co.; 1902; *Wigham Richardson & Co.*; 2,284 tons; 290x42-1x15-2; 212 n.h.p.; triple-expansion engines.
The British steamship *Choy-Sang* was wrecked during a typhoon at Fort Island, 14 miles north of Swatow on August 2nd, 1922. She was on a voyage from Hong Kong to Shanghai with a general cargo.

CHOYO MARU

Dairen Kisen K.K.; 1920; *Halifax Shipyards*; 5,388 tons; 399-3 x52-3x28-4; 555 n.h.p.; triple-expansion engines.
The steamship *Choyo (Tyoyo) Maru* was torpedoed and sunk by the U.S. submarine *Kingfish* on December 28th, 1942, W. of Formosa.

CHOYO MARU

CHOYO MARU

OnoShoji GomeiKaisha; 1919; Dominion S.B. Co.; 2,225 tons; 251-1x43-6x21-2; triple-expansion engines.

The steamship *Choyo (Tyoyo) Maru* struck a mine and sank on July 22nd, 1945, off Rashin, Manchuria.

CHR. BROBERG

Det Forenede Dampskibs. Selsk.; 1889; Burmeister & Wain; 1,225 tons; 218-8x31-1x12-8; 116n.h.p.; triple-expansion engines.

The Danish cargo ship *Chr. Broberg* struck a mine and sank in the North Sea on August 22nd, 1914.

CHR. J. KAMPMANN

Canadian Government Merchant Marine; 1924; Kjobenhavns Flydedok; 2,260 tons; 305-6x45-4x18-6; 206 n.h.p.; triple-expansion engines.

The Canadian steamship *Chr. J. Kampmann* was torpedoed and sunk by a German submarine on November 3rd, 1942, off Trinidad, with the loss of 19 lives.

CHRISTEL VINNEN

F.A. Vinnen; 1922; Fr.Kmpp; 1,874 tons; 256-3x44-4x19; 190n.h.p.; oil engines.

The German motorship *Christel Vinnen* was bombed and sunk by British aircraft on March 29th, 1944, N. of the East Frisian Islands.

CHRISTER SALEN

Rederi A/B Pulp; 1945; Eriksbergs M.V. Aktieb; 4,928 tons; 418-1x56-6x25-1; oil engines.

The Swedish motor tanker *Christer Salen* struck a submerged rock in heavy weather about 200 miles from Tokyo on February 15th, 1951, and broke in two. The fore part of the ship, 285 feet in length, was swept away by the heavy seas, but the after part, with 47 persons, passengers and crew, was able to keep afloat and eventually reached Yokohama on the 18th, under her own power.

CHRISTIAAN HUYGENS

N.V. Stoomv. Maats. Nederland; 1927; Nederland Scheeps. Maats.; 16,287 tons; 551-4x68-8x36-2; 2,490n.h.p.; 17knots; oil engines.

The Dutch motor vessel *Christiaan Huygens* survived the Second World War, but was wrecked shortly after. On August 26th, 1945, when in the Scheldt estuary, 10 miles W.N.W. of Westkapelle, she struck a mine and began to sink. She was beached on the Southern Steenbank, but on September 5th, broke in two and became a total loss. One person was killed.

CHRISTIAN VIII

Danish Navy, line-of-battleship; 86 guns.

During the war between the Germanic Confederation and Denmark the latter country sustained a severe naval defeat at Eckernforde. The Danish wooden line-of-battleship, *Christian VIII*, 86 guns, in company with the frigate, *Gefion*, 46 guns, two steamers and a brig entered the harbour of Eckernforde on the western coast of Schleswig on April 5th, 1849, with the intention of destroying the shore batteries. After a fierce bombardment the *Christian VIII* had her rudder destroyed and ran aground. She then caught fire and was compelled to surrender. After burning furiously for about 10 hours she blew up with a frightful loss of life, there being nearly 1,100 men on board, of whom about 400 were saved and 700 killed or drowned. The *Gefion* was so badly damaged as to be compelled to surrender also, she having lost about 150 from a crew of 400.

Both the steamships were disabled, which prevented them from towing the sailing ships away from the shore batteries.

CHRISTIAN KROGH

Orvigs Dampskibsslsk. A/S; 1917; A. F. Smulders; 1,992 tons; 269 • 2 X 42- 2 X 18; 169 n.h.p.; triple-expansion engines.

The Norwegian steamship *Christian Krogh* was torpedoed and sunk by a German submarine on June 10th, 1941, in the North Atlantic, with the loss of all on board.

CHRISTIAN MICHELSEN

Norwegian Government; 1943; Bethlehem Fairfield Shipyard; 7,176 tons; 422-8x57x34-8; 339 n.h.p.; triple-expansion engines.

The Norwegian steamship *Christian Michelsen* on a voyage from

New York to Bizerta with oil and munitions, was torpedoed by a German submarine on September 26th, 1943, 30 miles E. of Bona, and sank immediately after an internal explosion. Thirty-seven of her crew and one passenger were killed.

CHRISTIANSUND

Det Forenede Dampskibs. Selsk.; 1912; Helsingors Jernsk. & Msk.; 1,017 tons; 226-2x35-1x21-1; 150 n.h.p.; triple-expansion engines.

The Danish steamship *Christiansund* hit a mine and sank in the English Channel on March 24th, 1916.

CHRISTO MARCHETTO

Italian State Railways; 1892; Ropner & Son; 3,084 tons; 322 X 41-5x20-6; 273 n.h.p.; triple-expansion engines.

The Italian steamship *Christo Marchetto* was torpedoed and sunk by a German submarine on January 2nd, 1918, in the Bristol Channel.

CHRISTOPHER NEWPORT

U.S. Maritime Commission; 1942; Bethlehem Fairfield Shipyard; 7,191 tons; 423-1x57-1x34-8; 339 n.h.p.; triple-expansion engines.

The steamship *Christopher Newport* was torpedoed and sunk by German aircraft on July 4th, 1942, 200 miles N.E. of Bear Island on a voyage from Reykjavik to North Russia.

CHRISTOS MARKETTOS

Markettos S.S. Co.; 1919; Taikoo Dockyard & E. Co.; 5,209 tons; 400-2x52-3x28-5; 517 n.h.p.; triple-expansion engines.

The Greek steamship *Christos Markettos* on a voyage from Durban to Aden with coal, was torpedoed and sunk by a German submarine on June 8th, 1942, off Mombasa.

CHROBRY

Gdynia-America Shipping Lines; 1939; Nakskov Skibs. A/S; 11,442 tons; 477-9x66-7x32-8; 1,716 n.h.p.; oil engines. The Polish liner *Chrobry* was engaged in carrying troops and supplies from England to Norway during the German invasion. On May 14th, 1940, when approaching Bodo in North Norway, she was bombed and set on fire by German aircraft and subsequently sank. Eleven of her crew and an unspecified number of troops were killed.

CHRYSOLITE

The ship *Chrysolite* from Madagascar with a consignment of bullocks was wrecked at Mauritius on March 28th, 1874. Eleven of the crew were drowned.

CHUKA MARU

Toa Kaiun K.K.; 1920; Uraga Dock Co.; 2,189 tons; 280x43-2 X 21; 156 n.h.p.; triple-expansion engines.

The steamship *Chuka (Tyuka) Mam* was sunk by U.S. carrier-based aircraft on September 24th, 1944, off the south-east coast of Panay Island, Philippines.

CHUKOMARU

Japanese Government; 1927; Kwong Tak Cheong S.B. Co.; 1,068 tons; 178x32-1x10-1; 96 n.h.p.; triple-expansion engines.

The *Chuko Maru* was formerly the British *Tai Hing*, seized by the Japanese. She was bombed and sunk by U.S. land-based aircraft on August 20th, 1944, about 100 miles S.E. of Hong Kong.

CHUKY

Chile S.S. Co.; 1922; Bfythswood S.B. Co.; 6,920 tons; 440-8X 56-1x34-6; 616 n.h.p.; triple-expansion engines.

The American tanker *Chuky* was on a voyage from San Pedro, Cal., to Yokohama with oil when, on February 15th, 1928, she was sunk by an internal explosion about 200 miles from Yokohama.

CHULMLEIGH

Atlantic Shipping & Trading Co.; 1938; W. Pickersgill & Sons; 5,445 tons; 430-1x56-2x26-8; 502 n.h.p.; triple-expansion engines.

The British steamship *Chulmeigh* struck a reef and capsized on November 5th, 1942 off South Cape, Spitzbergen. The master and eight of the crew managed to reach shore. She was on a voyage from the United Kingdom to Archangel.

CHUNG 112

China Merchants S.N. Co.; 1944; 3,327 tons; 316x50-1x17-3; oil engines.

The Chinese motor vessel *Chung 112*, a converted tank landing ship, on a voyage from Hainan to Takao, was wrecked on April 30th, 1950, at Yulin, Hainan Island.

CHUNG CHENG

Chinese Government; 1943; Permanente Metals Corp.; 7,176 tons; 422-8x57x34-8; triple-expansion engines.

The steamship *Chung Cheng*, on a voyage from Calcutta to the U.S.A., was torpedoed and sunk by a German submarine on February 4th, 1944, off the Gulf of Aden. Seventeen of her crew, one gunner and two passengers were killed.

CHUSAN

Shanghai Steam Navigation Co.; 1874; John Elder & Co.; 3,590 tons; 300x50x13; 300n.h.p.; 12 knots; vertical beam engine.

The paddle steamer *Chusan*, Capt. G. C. Johnson, was intended for the China trade. She was of peculiar construction having a large beam engine set high upon the deck and in appearance resembled the river steamers of America. She left Glasgow for Shanghai on her first voyage on October 10th, 1874, carrying 51 persons all told. When off Waterford the ship developed defects and she immediately put about for the Clyde for repairs. On her return journey the *Chusan* was overtaken by a gale of great violence and ran for shelter to Ardrossan. At about 5 o'clock on the morning of Wednesday the 21st when just outside the harbour, the ship was swung broadside-on to the seas and her engines failed to reverse. Her bows could not be brought round to the harbour mouth and she struck on the Crinan Rock, about 50 yards from the pierhead. The high superstructure and big paddle-boxes of the ship were a great handicap as they caught the full force of the wind like a vast sail. Under this pressure the vessel broke in two, the forward portion being swept off the rock into the harbour and the after portion sinking after about 20-30 minutes.

The harbour tug rescued nine persons from the after part and then returned with the lifeboat in tow to take off six more. Three of the crew were washed overboard and Capt. Johnson was drowned in saving his wife and child. Other members of the crew were lost when trying to swim ashore. Seventeen lives were lost, all crew.

CHUWA MARU

Nitto Kyogyo Risen K.K.; 1939; Osaka Iron Works; 2,719 tons; 307-9x44-9x24-9; 150 n.h.p.; triple-expansion engines.

The steamship *Chuwa (Tyuwa) Mam* was torpedoed and sunk by the U.S. submarine *Trout* on February 10th, 1942, off Formosa.

CHUYO

Japanese Navy, aircraft carrier; 1939; Mitsubishi Jukogyo K.K.; 17,150 tons; 557-8x73-8x40-7; 21,000 i.h.p.; 22 knots; turbine engines; twelve 5 in. guns, many 47 mm.; 30 aircraft.

The four Nippon Yusen passenger liners *Nitta Maru*, *Argentina Mam*, *Kasuga Maru* and *Yawata Maru* were all completing in Japanese yards when Japan entered the Second World War on December 7th, 1941. The liners were taken over by the Japanese Admiralty and converted into aircraft carriers. A Norddeutscher Lloyd liner, the *Schamhorst*, 18,184 tons, was also taken over for the same purpose. The *Nitta Maru* was renamed *Chuyo* and commissioned late in 1942. She was torpedoed and sunk by the U.S. submarine *Sailfish* some 275 miles S.E. of Honshu on December 4th, 1943.

All five of the converted liners were sunk, four by submarines and one by aircraft.

CHUYO MARU

Toyo Kisen K.K.; 1,900 tons.

On March 30th, 1944, the *Chuyo Maru* was attacked by U.S. carrier-based aircraft and sunk off Babelthup, Palau Islands.

CHWNSHAN

T. W. Richardson; 1888; C. S. Swan & Hunter; 1,999 tons; 285 X 36x24; 235 n.h.p.; triple-expansion engines.

The British ship *Chwnshan* was wrecked in November, 1904, near Painan Head. She was on a voyage from Hong Kong to Swatow with a cargo of coal.

CIBOURE

Cie. des Chargeurs Francais; 1911; Craig, Taylor & Co.; 2,388 tons; 295X45x20-4; 243 n.h.p.; triple-expansion engines.

The French steamship *Ciboure* was torpedoed and sunk in the Mediterranean on July 5th, 1917.

CICALA

British Navy, gunboat; 1915; Barclay Curie & Co.; 625 tons; 237-5x36x4; 2,000 h.p.; 14 knots; triple-expansion engines; Yarrow boilers; two 6 in. guns. one 3 in.A.A., 10 smaller.

The *Cicala* was sunk by Japanese aircraft at Hong Kong on December 21st, 1941. The vessel carried a complement of 65.

CICLONE

Italian Navy, torpedo boat; 1942; Italy; 860 tons; 274-5X31X8; 16,000 s.h.p.; 28 knots; turbine engines; 3-drum boilers; three 3-9 in. guns, six 20mm. A.A.; 2 T.T.

The *Ciclone* struck a mine and sank off Punta Libeccio, Sicilian Channel, on March 8th, 1943. The number lost, if any, is not known.

CIGNO

Italian Navy, torpedo boat; 1936; Riuniti (Ancona); 652 tons; 267x27x7-5; 19,000 s.h.p.; 34 knots; turbine engines; 3-drum boilers; three 3 • 9 in. guns, four 37 mm., two 13 mm.; 4 T.T.
The *Cigno* was in the Central Mediterranean on April 16th, 1943, when she was attacked by the British destroyers *Pakenham* and *Paladin*, each of 1,540 tons. The *Cigno*, which carried a complement of about 100, was sunk after a very brief action.

CILICIA

"Adriatica" Soc. Anon, di Nav.; 1928; Cant. Nav. Scoglio Olivi; 2,747 tons; 308-1x41-8x20-1; 356 n.h.p.; oil engines.

The Italian motorship *Cilicia* was torpedoed and sunk by a British submarine on August 28th, 1941, about 45 miles S.S.W. of Capo Galbo, Morea.

CILTVAIRA

Latvian Shipping Co.; 1905; J. L. Thompson & Sons; 3,779 tons; 346-7x50-8x23; 317 n.h.p.; triple-expansion engines.

The Latvian steamship *Ciltvaira* was torpedoed, broke in two and sank on January 19th, 1942, off Carolina.

CIMBRIA

Hamburg-Amerika Line; 1867; J. Caird & Co.; 3,037 tons; 329 x 39x33; 1,300 i.h.p.; 12-5 knots; compound engines.

The liner *Cimbria*, Capt. Hansen, left Hamburg on Thursday, January 18th, 1883, with 402 passengers—mostly emigrants from Russia, Prussia, Austria and Hungary—and a crew of 120. There were also a number of French sailors on board, bound for Havre, and a party of Chippewa Indians returning to the U.S.A. after performing at an exhibition. Early on the morning of the 19th the weather thickened, and later on became dense. Off the Island of Borkum the siren of an approaching steamship was heard, but her location was in doubt until the very moment that she loomed into sight, barely 150 feet away. She proved to be the *Sultan*, of the Hull and Hamburg Line, Capt. Cuttill, and she crashed into the *Cimbria's* port side immediately in front of the foremast, cutting a hole which extended to below the water-line. She then backed away, finding her own plight extremely bad, as she had a 7-foot hole in the bows and was making water fast. In these circumstances she did not lower her boats or make any effort to get into touch with the vessel she had rammed, believing that her own case was the more serious. Shortly afterwards the two ships drifted out of sight of each other.

Conditions on the *Cimbria* were very serious, the startled passengers, who were asleep below, came on deck to find the ship heeling over to starboard and rapidly settling down. The seven boats were got away as quickly as possible, one capsizing on launching. In general there was good order and every means of saving life was adopted, even to cutting loose the ship's spars to provide assistance for the unfortunate people when they were flung into the water.

Two of the boats were picked up by the British barque *Theta*, on Sunday the 21st, with 39 survivors. A third boat containing 17 was picked up by the British ship *Diamant* off the Weser Lighthouse, while a fourth boat with nine people arrived at Borkum, thus

CINGALESE PRINCE

making 65 all told. Among the saved were the second, third and fourth officers and the second engineer. Nearly all of the 72 women and 87 children on board were lost.

At an official inquiry at Hamburg, Capt. Cuttill stated that he considered his ship the more damaged at the time, and that he did not lower his boats for fear of losing them in the fog. He affirmed that he was not aware of the disaster to the *Cimbria*, from which he had drifted away. It was proved that if the *Sultan* had shipped a foot more water in her hold she would have foundered.

CINGALESE PRINCE

Rio Cape Line (Furness, Withy & Co.); 1929; Blythswood Ship-building Co.; 8,474 tons; 441-5x60-3x28-2; 4,850 b.h.p.; 15 knots; oilengines.

The *Cingalese Prince*, Capt. J. Smith, was in the South Atlantic, some hundreds of miles off Northern Brazil, when she was torpedoed and sunk by a German submarine at 4.30 a.m. on September 20th, 1941, and 57 persons, including Capt. Smith, were killed. The vessel was not in convoy at the time.

CINTRA

J. H. Welsford & Co.; 1854; Blackwood & Gordon; 482 tons; 178-8x24-2x14-8; 80 h.p.; compound engines.

The steamship *Cintra*, Capt. Green, was bound from Newport to Dartmouth with a cargo of coal when she was wrecked in St. Ives Bay on November 18th, 1893. Capt. Green and five others were saved but 12 men were drowned.

CIRCE

Donaldson Bros.; 1874; Aitken & Mansel; 2,313 tons; 331-9 X 35-7x26-4; 300 h.p.; triple-expansion engines.

The British ship *Circe* was wrecked in July, 1891, on East Cape, Anticosti, on a voyage from the Clyde to Montreal.

CIRCE

Cie. Francaise des Chemins de Per de Paris-Orleans; 1910; Atel. & Ch.de France; 4,133 tons; 350-1x48-9x24-8; 332 n.h.p.; triple-expansion engines.

The French steamship *Circe* was torpedoed and sunk by a German submarine off southern Ireland on March 15th, 1917.

CIRCE

Italian Navy, torpedo boat; 1938; Ansaldo; 679 tons; 267x26 X7-7; 19,000 s.h.p.; 34 knots; turbine engines; 3-drum boilers; three 3-9 in. guns, four 37mm.A.A., two 13 mm.A.A.; 4 T.T.

The *Circe* was sunk in collision with the s.s. *Citta di Tunisi*, 5,400 tons, off Castellamare on November 27th, 1942. The vessel carried a complement of about 100.

CIRCE SHELL

Anglo-Saxon Petroleum Co.; 1931; Howaldtswerke A.G.; 8,207 tons; 451-2x62-1x34-1; 713 n.h.p.; oil engines.

The motor tanker *Circe Shell* was torpedoed, shelled and sunk by a German submarine on February 21st, 1942, on a voyage from the Clyde to Curacao.

CIRENE

D. & E. Fratelli Bozzo; 1895; W. Doxford & Sons; 3,236 tons; 349-4x45-1x22-3; 300 n.h.p.; triple-expansion engines.

The Italian steamship *Cirene* was sunk by a submarine in the Mediterranean on September 30th, 1915.

CISCAR

MacAndrews & Co.; 1919; H. & C. Grayson; 1,809 tons; 265X 41-2x18-9; 271 n.h.p.; 10-5 knots; triple-expansion engines.

The steamship *Ciscar*, Capt. E. L. Hughes, was sailing to Gibraltar with an outward-bound convoy on August 19th, 1941, when she was torpedoed and sunk by a submarine. At the time of the attack she was 600 miles W. of Ushant. Thirteen men were killed. Capt. Hughes was among the survivors.

CISIL

Rederi A/B Steam; 1889; W. Pickersgill & Sons; 1,848 tons; 280-4x37-1x17-1; 198 n.h.p.; triple-expansion engines.

The Finnish steamship *Os* struck a mine and sank on August 23rd, 1941, in the Baltic. The ship was carrying ore from Oxelosund to Germany.

CISSY

Torp & Wiese; 1891; J.L. Thompson & Sons; 3,030 tons; 322 X 41-5x21-5; 253 n.h.p.; triple-expansion engines.

The Norwegian steamship *Cissy* hit a mine and sank off Ushant on June 16th, 1917.

CITIES SERVICE DENVER

Cities Service Oil Co.; 1921; Bethlehem S.B. Corp.; 9,316 tons; 468-3x62-7x32; 402 n.h.p.; quadruple-expansion engines.

The American tanker *Cities Service Denver* caught fire after an internal explosion on March 25th, 1941, off Morehead City, N. Carolina, and sank on the next day.

CITIES SERVICE EMPIRE

Cities Service Oil Co.; 1918; Bethlehem S.B. Corp.; 8,103 tons; 464-7x60-2x33-3; 560 n.h.p.; 8-5 knots; quadruple-expansion engines.

The American tanker *Cities Service Empire*, Capt. William F. Jerman, Junr., was torpedoed and sunk by a submarine off Fort Pierce, Florida, on February 22nd, 1942. Capt. Jerman and ten others were killed. The vessel was not in convoy at the time of the sinking.

CITIES SERVICE PETROL

Cities Service Transportation Co.; 1920; Bethlehem S.B. Corp.; 9,343 tons; 468-3x62-7x32; 402 n.h.p.; quadruple-expansion engines.

The American tanker *Cities Service Petrol*, Captain Sears, caught fire after an internal explosion on July 14th, 1933, and sank about 95 miles off Cape Lookout. Capt. Sears and two of the crew were drowned.

CITIES SERVICE TOLEDO

Cities Service Oil Co.; 1918; Bethlehem S.B. Corp.; 8,192 tons; 465-2x60x26-4; 557 n.h.p.; 10-5 knots; quadruple-expansion engines.

The American tanker *Cities Service Toledo*, Capt. K. Toivola, was torpedoed and sunk by a submarine in the Gulf of Mexico, between Calcasieu Pass and Mississippi River, on June 12th, 1942. Fourteen men were killed. Capt. Toivola was among the survivors. The vessel was not in convoy at the time of the sinking. She was carrying 83,000 barrels of crude oil.

CITIZEN

Australian; 1843; 146 tons; steam engines.

The small Australian wooden paddle steamship *Citizen* was formerly in the Melbourne—Gee! ong trade. In October, 1862, she left Melbourne for Dunedin. She was crowded with gold diggers, the exact number of whom is not known, and was never heard of again.

CITO

Wilsons & North Eastern Railway Shipping Co.; 1899; Earle's Co.; 819 tons; 219-1x30-1x16-5; 144 n.h.p.; 9-5 knots; triple-expansion engines.

The steamship *Cito* was intercepted by a German torpedo boat destroyer 20 miles E. of the North Hinder lightship on May 17th, 1917. The destroyer sank the steamship with gunfire. The captain and ten of the crew were killed.

CITTA DI BARI

Italian Government; 1913; Ansaldo, Armstrong & Co.; 1,489 tons; 252-9x33-9x20-3; 167 n.h.p.; triple-expansion engines.

The Italian steamship *Citta di Bari* was torpedoed and sunk by a submarine on October 6th, 1917, in the Mediterranean.

CITTA DI BARI

"Adriatica" Soc. Anon. di Nav.; 1927; Stabilimento Tecnico; 3,339 tons; 331-9x44-7x21-8; 1,103 n.h.p.; oil engines.

The Italian motor vessel *Citta di Bari* was sunk in Tripoli harbour on May 3rd, 1941, by the explosion of the munitions ship *Bimariano*, which see.

CITTA DI BASTIA

"Tirrenia" Soc. Anon. di Nav.; 1930; Cant. Nav. Franco Tosi; 2,499 tons; 303-1x40-1x18-8; 348 n.h.p.; oil engines.

The Italian motor vessel *Citta di Bastia* was torpedoed and sunk by a British submarine on September 27th, 1941, about 15 miles S. of Milos Island.

CITTA DI CATANIA

"*Tirrenia*" Soc. Anon. di Nav.; 1910; Ansaldo Armstrong & Co.; 3,355 tons; 363 • 5 X 42 • 1 X 19 • 1; turbine engines.

The Italian steamship *Città di Catania* was torpedoed and sunk by a British submarine on August 3rd, 1943, eight miles off Brindisi.

CITTA DI GENOVA

"*Tirrenia*" Soc. Anon. di Nav.; 1930; Cant. Nav. Riuniti; 5,413 tons; 409-1x51x21-9; 1,815 n.h.p.; oil engines.

The Italian motor vessel *Città di Genova* was torpedoed and sunk by a British submarine on January 21st, 1943, 25 miles W. of Saseno Island.

CITTA DI LIVORNO

"*Tirrenia*" Soc. Anon. di Nav.; 1929; Cant. ed Officine Meridionali; 2,471 tons; 304 - 2 X 40 • 1 X 18 • 9; 348 n.h.p.; oil engines.

The Italian motor vessel *Città di Livorno* was torpedoed and sunk by a British submarine on January 18th, 1942, off Crete.

CITTA DI NAPOLI

"*Tirrenia*" Soc. Anon. di Nav.; 1930; Cant. del Tirreno; 5,418 tons; 410-6x50-9x21-9; 1,820 n.h.p.; oil engines.

The Italian motor vessel *Città di Napoli* struck a mine and sank on November 28th, 1942, W. of the Aeolian Islands.

CITTA DI PALERMO

Ferrovie dello Stato (Italian State Railways); 1910; Cant. Nav. Riuniti; 3,415 tons; 363-6x42-1x18-9; 20 knots; turbine engines.

The *Città di Palermo* left Brindisi on the morning of January 8th, 1916, with a number of troops for Durazzo, including a British contingent of four officers and 139 other ranks. At 8.30 a.m., when six miles N.E. of Brindisi, the vessel ran into a small minefield. She struck one of the mines and foundered almost at once. Fortunately a number of minesweepers were in the vicinity and they came to the rescue with great promptitude.

The number on board the *Città di Palermo* was just over 200, of whom about half were saved including 84 British.

CITTA DI PALERMO

"*Tirrenia*" Soc. Anon. di Nav.; 1930; Cant. Nav. Riuniti; 5,413 tons; 411-7x51-1x21-9; 1,816 n.h.p.; oil engines.

The Italian motor vessel *Città di Palermo* was torpedoed and sunk by a British submarine on January 5th, 1942, three miles W. of Cephalonia.

CITTA DI SASSARI

Ferrovie dello Stato; 1910; Soc. Esercizio Bacini; 2,167 tons; 282 • 3 X 36 • 9 x 28 • 1; 437 n.h.p.; triple-expansion engines.

The Italian steamship *Città di Sassari* was torpedoed and sunk by a submarine on December 1st, 1917, in the Mediterranean.

CITTA DI SPEZIA

"*Tirrenia*" Soc. Anon. di Nav.; 1929; Cant. ed Officine Meridionali; 2,474 tons; 304-3x40-1 X 18-8; 348 n.h.p.; oil engines.

The Italian motor vessel *Città di Spezia* was torpedoed and sunk by a British submarine on August 27th, 1943, 40 miles from Brindisi.

CITTA DI TRIPOLI

"*Tirrenia*" Soc. Anon. di Nav.; 1915; Cantieri Nav. Riuniti; 2,933 tons; 316-6x41-5x21-3; 378 n.h.p.; triple-expansion engines.

The Italian steamship *Città di Tripoli* was torpedoed and sunk by a British submarine on July 2nd, 1941, near Zea Island in the Aegean.

CITY OF AGRA

G. Smith & Sons; 1879; C. Cornell & Co.; 3,274 tons; 385-4 X 38-7x28-6; 358 n.h.p.; triple-expansion engines.

The British steamship *City of Agra*, Capt. Frame, on a voyage from Liverpool to Calcutta with 75 persons on board, was wrecked in a severe N.W. gale at midnight on February 3rd, 1897, in Aron Bay, six miles E. of Cape Villano. Thirty-two of the crew and two stowaways were saved.

CITY OF ALMA

Waterman S.S. Corp.; 1920; Merchant S.B. Corp.; 5,446 tons; 400-7x54-2x30-4; turbine engines.

The American steamship *City of Alma* was torpedoed and sunk by a German submarine on June 2nd, 1942, between Trinidad and Baltimore. Only ten of her crew of 39 survived.

CITY OF AMIENS

G. M. Chrussachi; 1893; J. L. Thompson & Sons; 2,806 tons; 316 X 42 X 17 • 1; 248 n.h.p.; triple-expansion engines.

The British steamship *City of Amiens* was wrecked on September 22nd, 1922, at Bintra Point, near Camarinas, while on a voyage from Barry to Algiers with a cargo of coal.

CITY OF ANNAPOLIS

Chesapeake S.S. Co.; 1913; Maryland Steel Co.; 1,924 tons; 261 • 6 X 53 • 1 X 14 • 1; 365 n.h.p.; triple-expansion engines.

The American steamship *City of Annapolis* was sunk in a collision on February 24th, 1927, two miles S. of Smiths Point, Chesapeake Bay.

CITY OF ANTWERP

Palgrave, Murphy & Co.; 1881; J. Blumer & Co.; 731 tons; 200 x 30x13; 120 h.p.; compound inverted engines.

The steamship *City of Antwerp*, on a voyage from Workington to Antwerp with pig iron, collided with the steamship *Constantia* off the Eddystone Lighthouse on October 16th, 1882. Only the captain and three of the crew were saved. The *Constantia* sank with no loss of life.

CITY OF ATHENS

City Line (Ellerman Lines); 1901; Workman, Clark & Co.; 5,604 tons; 430x50-2x28-5; 471 n.h.p.; 12 knots; triple-expansion engines.

The *City of Athens* left New York for India, via Cape Town, on July 12th, 1917, with 97 passengers and 115 crew. The ship had completed the first part of her voyage and on August 10th was 20 miles N.W. of Cape Town, when she struck mines sown months previously by the German raider *Wolf*. There were two loud explosions which brought down the foremast and the wireless aerial and set the ship on fire. The lifeboats were got away very promptly and within 12 minutes seven of them had cleared the ship's side. The destruction of the wireless aerial prevented the sending out of an S.O.S. call, but the fire was observed from Signal Hill and the tug *Ludwig Wiener* was sent to render assistance. She picked up six of the boats and landed the survivors at Cape Town the same night. The seventh boat capsized, drowning 15 passengers and four of the crew; these were the only fatalities.

CITY OF ATHENS

Ellerman Lines; 1923; W. Gray & Co.; 6,558 tons; 433 X 57-4 X 30-2; 778 n.h.p.; triple-expansion engines & L.P. turbine.

The British steamship *City of Athens* was torpedoed and sunk by a German submarine on October 8th, 1942, on a voyage from Takoradi to Table Bay.

CITY OF ATLANTA

Ocean Steamship Co. of Savannah; 1904; Delaware River Co.; 5,269 tons; 377-5x49x15-8; 390 n.h.p.; 11-5 knots; triple-expansion engines.

The American ship *City of Atlanta* with a crew of 46 was torpedoed by a German submarine off Cape Hatteras on Monday, January 19th, 1942. The attack took place during the hours of darkness and the submarine surfaced within 50 yards of the drowning men and illuminated the scene with their searchlight. After waiting for some time, but making no attempt to rescue any of its victims, the submarine left. Three men, the sole survivors of the crew, were picked up later by a passing vessel.

CITY OF BAGDAD

Ellerman Lines; 1919; J. C. Tecklenborg; 7,506 tons; 470 - 3 X 58-2x32-3; 819 n.h.p.; triple-expansion engines & L.P. turbine. The British steamship *City of Bagdad* was intercepted by a German raider and sunk by gunfire on July 11th, 1940, about 400 miles W. of the Addu Atoll, Indian Ocean.

CITY OF BARODA

CITY OF BARODA

Ellerman Lines; 1911; Barclay, Curie & Co.; 5,054 tons; 401-7X 50-8x29-7; 504 n.h.p.; 11 knots; triple-expansion engines.

The steamship *City of Baroda* was torpedoed and sunk by a submarine 90 miles N.W. of Tory Island on June 4th, 1917. Six men were killed. The captain was among the survivors.

CITY OF BARODA

Hall Line; 1918; Barclay, Curie & Co.; 7,129 tons; 433-4X 57-2x30-6; 447 n.h.p.; triple-expansion engines.

The British steamship *City of Baroda* was torpedoed and sunk by a German submarine on April 2nd, 1943, near Luderitz, South Africa. One of her crew and 13 passengers were lost.

CITY OF BATH

Ellerman Lines; 1926; W. Gray & Co.; 5,079 tons; 393-2X 52-2x28-2; 532 n.h.p.; quadruple-expansion engines.

The British steamship *City of Bath* was torpedoed and sunk by a German submarine on December 2nd, 1942, on a voyage from Mombasa to Trinidad. Six of her crew were killed.

CITY OF BEDFORD

Ellerman Lines; 1924; W. Gray & Co.; 6,402 tons; 430X 5 5-1X 31-1; 728 n.h.p.; quadruple-expansion engines.

The British steamship *City of Bedford* was in collision with the *Bodnant* on December 30th, 1940, and sank in 60° 03' N., 23° 01' E. She was on a voyage from Halifax, N.S., to Liverpool with a general cargo. Forty-eight lives were lost.

CITY OF BENARES

Ellerman Lines; 1936; Barclay, Curie & Co.; 11,081 tons; 486-1 X 62-7X 30-8; 1,450 n.h.p.; 14 knots; turbine engines.

The *City of Benares*, carrying 406 persons of whom 215 were crew, left England for Canada during the second week in September 1940. Among her passengers were 90 children who were being evacuated under the auspices of the Children's Overseas Reception Board, and who were under the charge of nine persons acting as escorts. On the night of September 17th at about 10 o'clock, when the liner was 600 miles out, she was torpedoed by a German submarine and sank very rapidly. The weather was rough and great difficulty was experienced in launching the ship's boats, several of which capsized in the heavy sea. In the bitter cold of the north Atlantic with the boats at times half full of water, many persons died from exposure during the night. Of those on board 248 lost their lives, including the captain, 77 of the children and five of the escorts. It was at first thought that the death roll was much heavier, but ten days after the sinking a Sun-derland flying boat of Coastal Command sighted a ship's lifeboat, which on closer inspection proved to be one belonging to the *City of Benares*. A British warship was called to the scene by the aircraft and took on board 46 survivors, six of whom were child evacuees, with two escorts.

CITY OF BIRMINGHAM

Ellerman Lines; 1911; Palmers' Co.; 7,498 tons; 452x55-7X 31-5; 756 n.h.p.; 14 knots; quadruple-expansion engines.

The *City of Birmingham* was under command of Capt. W. J. Haughton, and carried a crew of 145 and 170 passengers, about 90 of the latter being women and children. On November 27th, 1916, when well out in the Atlantic and 126 miles from the nearest land, the ship was struck abreast the after hold by a torpedo from a submarine. She immediately began to sink by the stern and the captain ordered out the boats. Discipline was excellent and within ten minutes most of the passengers and crew were in the boats, despite the difficulties caused by a heavy swell. The captain went down with the ship but managed to swim to the surface and was picked up half-an-hour later. The loss of life was small amounting to four members of the crew, including the ship's surgeon. About three hours after the attack the boats were picked up by a British steamship.

CITY OF BIRMINGHAM

Ocean S.S. Co. of Savannah; 1923; Newport News S.B. & D.D. Co.; 5,861 tons; 381-8x52-1x27; 398 n.h.p.; triple-expansion engines.

The British steamship *City of Birmingham*, on a voyage from Norfolk to Bermuda, was torpedoed and sunk by a German submarine on June 30th, 1942. Five of her crew and eight passengers were killed.

CITY OF BOMBAY

Ellerman Lines; 1937; Barclay, Curie & Co.; 7,140 tons; 464-3 X 59-2x31-2; 750 n.h.p.; turbine engines.

The British steamship *City of Bombay* was torpedoed, shelled and sunk by a German submarine on December 13th, 1942, about 200 miles N.E. of Fernando de Noronha Island, with the loss of 20 lives.

CITY OF BOSTON

Inman Line; 1864; Tod & MacGregor; 2,278 tons; 332x39x 27-5; 600 n.h.p.; 12 knots; direct-acting trunk engines.

The Inman liner *City of Boston*, Capt. Halcrow, left New York for Liverpool on January 28th, 1870, with 177 persons on board, of whom 55 were cabin passengers, including officers of the Royal Artillery and other regiments returning from service in Canada, and 52 steerage passengers. Nothing was ever heard of the ship again, save that a boat, which may have belonged to her, was found on the coast of Cornwall. A brief message was cut upon a board to the effect that the *City of Boston* was sinking.

She was the second Inman liner to be lost without trace, the first being the *City of Glasgow* (which see), which disappeared in March, 1854.

CITY OF BRISBANE

Ellerman Lines; 1920; Swan, Hunter & Wigham Richardson; 8,006 tons; 463-6x58-8x30-9; 885 n.h.p.; turbine engines.

The British steamship *City of Brisbane* was bombed and set on fire by German aircraft on August 2nd, 1940, in the Thames Estuary. The fire could not be controlled and the ship settled on South Long Sand and broke in two. Eight of her crew were killed.

CITY OF BRUNSWICK

U.S. Shipping Board; 1921; O. Daniels Co.; 7,225 tons; 402-1 X 54x34-4; 359 n.h.p.; triple-expansion engines.

The American steamship *City of Brunswick*, on a voyage from New Orleans to Antwerp with grain and lumber, was wrecked off Sambro Island, Nova Scotia, on August 26th, 1921.

CITY OF BRUSSELS

Inman Line; 1869; Tod & MacGregor; 3,747 tons; 390 X 40-2X 27-1; 3,000 i.h.p.; 14-5 knots; horizontal direct-acting engines.

On her first voyage late in 1869, the *City of Brussels* made the fastest transatlantic crossing to that date, taking 7 days, 22 hours, 3 minutes between New York and Queenstown, her average speed being 14-66 knots. She and another Inman liner, the *City of Paris*, held both eastward and westward records for about three years. On January 7th, 1883, the *City of Brussels* was inward bound from New York with a company of 167 persons, of whom 20 were cabin passengers, 50 steerage and 97 crew. Capt. Land being in command. When abreast Orme's Head the weather began to thicken and speed was reduced to half and then to dead slow, finally the ship stopped. Her position was 2½ miles N.E. of the N.W. lightship, about 20 miles outside Liverpool. At 5.30 a.m., or thereabouts, another steamship's siren was heard through the fog, which was now very dense. According to the statements of her officers the ship had been stationary for 41 minutes and before she could make her presence known the bows of a large steamship struck her on the starboard bow, cutting through to the waterline. There was, fortunately, a marked absence of panic, although most of the passengers were awakened from sleep, and the boats were lowered with all dispatch.

Meanwhile the vessel which had caused the damage, the *Kirby Hall*, on her maiden voyage to India, stopped and lowered her boats. The work of transferring the shipwrecked people proceeded smoothly and finally all were taken on board the *Kirby Hall*, with the exception of ten men, who were drowned. Two were Italian steerage passengers and eight were crew, including the second officer, Mr. Young, and the carpenter, Mr. Woods.

CITY OF CAIRO

Ellerman Lines; 1915; Earless Co.; 8,034 tons; 449-9 X 55-7X 31-3; 774 n.h.p.; quadruple-expansion engines.

The British steamship *City of Cairo* was torpedoed and sunk by a German submarine on November 6th, 1942, on a voyage from Table Bay to Pernambuco, with the loss of 104 lives; 82 crew and 22 passengers.

CITY OF CANTERBURY

G. Smith & Sons; 1875; Barclay, Curie & Co.; 3,416 tons; 379•7X38•2X29•2; 350hp.; triple-expansion engines.

The British ship *City of Canterbury* was wrecked on January 17th, 1897, in the Hoochly. She was on a voyage from the Clyde and Liverpool to Calcutta.

CITY OF CANTON

EHerman Lines; 1916; Swan, Hunter & Wigham Richardson; 6,692 tons; 450•7X56•9X31-1; 751 n.h.p.; turbine engines.

The British steamship *City of Canton* was torpedoed and sunk by a German submarine on July 17th, 1943, between Beira and Mom-basa, with the loss of seven lives.

CITY OF CARDIFF

Instow S.S. Co.; 1906; Ropner & Son; 3,089 tons; 330-5x48x21-7; 288 n.h.p.; triple-expansion engines.

The British cargo ship *City of Cardiff* was wrecked on March 21st, 1912, at Millbay, Cornwall. She was on a voyage from Havre to Cardiff.

CITY OF CARDIFF

EllermanLines; 1918; Craig, Taylor & Co.; 5,661 tons; 403-5X54-4x29-8; 552 n.h.p.; triple-expansion engines.

The British steamship *City of Cardiff* was torpedoed and sunk by a German submarine on August 28th, 1942, on a voyage from Free-town to Manchester.

CITY OF CARTHAGE

Ellerman Lines; 1906; Barclay, Curie & Co.; 5,524 tons; 411-2X52•7x30•3; 369 n.h.p.; triple-expansion engines.

The British ship *City of Carthage* was wrecked on August 10th, 1907, at Kamodasaki. She was on a voyage from Philadelphia to Hio-go with a cargo of case oil.

CITY OF COLUMBUS

Ocean Steamship Co.; 1878; J. Roach & Sons; 3,000 tons; 254x38-7x24-5; 12 knots; compound engines.

The *City of Columbus*, Capt. Wright, left Boston on Thursday afternoon, January 17th, 1884, with 81 passengers and 45 crew. The passengers, of whom 35 were women and children, were mainly New Englanders going south for the winter season. In addition to the captain the ship also had a pilot on board.

About 4 o'clock on the morning of Friday, when off Gay Head, Vineyard Sound, a promontory of Martha's Vineyard Island, the ship struck on an isolated rock. The second officer was in charge, but was relieved by the captain, who was below when she struck. The engines were reversed and the ship backed to about twice her length, when she listed to port and sank with her stern under water and her upper deck awash. The saloon was flooded and many of the women and children gathered there were drowned. The weather was icy cold and the sea very rough, so that the boats capsized immediately they were launched. The unfortunate people then took to the rigging, but so intense was the cold that by daylight fewer than 50 of them remained.

At 10 a.m. the Gay Head lifeboat approached and took off seven persons, while another seven got away on a raft. The U.S. revenue steamship *Dexter* then took off a further 21, chiefly through the heroic efforts of Lts. Rhodes and Kennedy. Several of these people died later from the results of exposure and ultimately only 12 passengers and 17 crew survived, Capt. Wright being the last to be rescued.

The total lost was 97, including all the women and children.

CITY OF CORINTH

Ellerman Lines; 1918; W. Gray & Co.; 5,318 tons; 391x54-2x28-9; 581 n.h.p.; triple-expansion engines.

The British steamship *City of Corinth* was torpedoed and sunk by a German submarine on November 17th, 1942, between Pernambuco and Trinidad. Eleven of her crew were lost.

CITY OF DRESDEN

Palgrave, Murphy & Co.; 1876; Bowdler, Chaffer & Co.; 1,170 tons; 246-5x31-3x17-7; 164 n.h.p.; compound engines.

The Irish cargo ship *City of Dresden* sank in a collision on January 19th, 1907, off Dungeness. She was on a voyage from Swansea to Hamburg with copper and a general cargo.

CITY OF DUBLIN

Palgrave, Murphy & Co.; 1879; Withy; 1,146 tons; 230-6x31X16•1; 150 h.p.; compound inverted engines.

The Irish cargo ship *City of Dublin* sank in a collision on February 4th, 1881, in the Elbe. She was on a voyage from Hamburg to Bristol.

CITY OF DUNDEE

Ellerman Lines; 1890; Workman, Clark & Co.; 3,427 tons; 361-7x42-7x26-4; 344 n.h.p.; triple-expansion engines.

The British cargo ship *City of Dundee*, which was managed by G. Smith & Sons, was sunk in a collision with the s.s. *Matina* on October 4th, 1908, in a fog in St. George's Channel on a voyage from Liverpool to Algiers and Alexandria. The captain and two of the crew were lost.

CITY OF DUNEDIN

Jones & Cat-gill, Dunedin; 1863; A.Denny; 463 tons; 167-3x22-2x15-8; 100 h.p.; 10 knots; diagonal engines.

The schooner-rigged paddle steamer *City of Dunedin*, Capt. Boyd, left Wellington, New Zealand, on May 20th, 1865, with approximately 40 persons on board. She was a fairly new vessel and was engaged in the New Zealand coastal trade. Her next port of call was Nelson, South Island, on the other side of Cook Strait. A heavy south easterly swell was running at the time and it was supposed that, in keeping close to shore, the vessel struck somewhere in the vicinity of the Seal Rock.

The *City of Dunedin* does not appear to have been sighted by any other vessel, and there was no clue as to how she met her end. A quantity of wreckage washed up along the coast was identified as belonging to her.

CITY OF EXETER

John Hohncm & Sons; 1870; Stockton; 1,054 tons; 228-2x29-2x17-1; 110 h.p.; compound inverted engines.

The British cargo ship *City of Exeter* foundered on March 11th, 1887, about four miles south-west of Lundy Island. She was on a voyage from Cardiff to St. Nazaire with a cargo of coal.

CITY OF FLINT

U.S. Maritime Commission; 1920; American International S.B. Corp.; 4,963 tons; 390x54-2x27-8; turbine engines.

The American steamship *City of Flint*, on a voyage from New York to North Africa with petrol and army stores, was torpedoed and sunk by a German submarine on January 25th, 1943, with the loss of seven lives.

CITY OF GLASGOW

Inman Line; 1850; Tod & MacGregor; 1,610 tons; 237x34-5X25; 350 n.h.p.; 12 knots; side-lever engines, cylinders on one side drove large wheel geared to propeller shaft pinion on the other.

The *City of Glasgow* was first employed by her builders, Messrs. Tod and MacGregor of Glasgow, on a series of trial trips across the Atlantic. She was an experimental ship having two engines geared to her single propeller shaft. In the same year as her completion, 1850, she was acquired by the Liverpool, New York and Philadelphia Steamship Co. (Richardson Bros.) which was to be better known to the world as the Inman Line.

The *City of Glasgow* began her career under the Inman flag on December 17th, 1850, and for four years ran steadily to and fro and established the ability of the screw steamship to hold more than its own with the paddle steamers which preceded it.

On March 1st, 1854, the *City of Glasgow* left Liverpool for Philadelphia with a total of 480 persons, including crew, on board. She was never heard of again.

A sister ship, the *City of Manchester*, which arrived at Liverpool on March 17th brought the intelligence that there was a large field of broken ice drifting athwart the course taken by the mail steamships.

CITY OF GLASGOW

Ellerman Lines; 1906; Workman, Clark & Co.; 6,545 tons; 443X53-6x30-3; 481 n.h.p.; 11 knots; quadruple-expansion engines.

The *City of Glasgow* was torpedoed and sunk by a submarine 21 miles E. i N. of Tuskar Rock on September 1st, 1918. Twelve persons were killed. The captain was among the survivors.

CITY OF GOLCONDA

CITY OF GOLCONDA

Ohio river steamboat.
The Ohio river steamboat *City of Golconda* capsized in a squall on the Ohio on August 19th, 1901. About 40 of those on board were drowned.

CITY OF GUBLDFORD

Ellerman Lines; 1919; W. Gray & Co.; 5,157 tons; 400x52-3x28-5; 517 n.h.p.; triple-expansion engines.
The British steamship *City of Guildford*, carrying aviation spirit and munitions from Alexandria to Tripoli, Lebanon, was torpedoed, set on fire and sunk by a German submarine on March 27th, 1943. Sixty-eight of her crew, 11 gunners and 46 passengers were killed; two more passengers died after being picked up. There were only 13 survivors, all injured.

CITY OF HONOLULU

U.S. Shipping Board; 1896; Akt. Ges. Vulkan; 10,688 tons; 523X60-1x34-8; 845 n.h.p.; quadruple-expansion engines.
The American liner *City of Honolulu*, on a voyage from Honolulu to San Pedro, caught fire and was burnt out on October 12th, 1922, about 400 miles from San Pedro, Cal. She was carrying passengers at the time.

CITY OF JOHANNESBURG

Ellerman Lines; 1920; Barclay, Curie & Co.; 5,669 tons; 417-2X54-8x29; turbine engines.
The steamship *City of Johannesburg* was torpedoed and sunk by a German submarine on October 23rd, 1942, on a voyage from Colombo to Table Bay, with the loss of 12 lives.

CITY OF KOBE

Ellerman Lines; 1924; Ramage & Ferguson; 4,373 tons; 367-1x49-7x27-4; 310 n.h.p.; triple-expansion engines.
The British steamship *City of Kobe* struck a mine and sank on December 19th, 1939, near Cross Sand lightship, off the River Humber.

CITY OF MANCHESTER

G. Smith & Sons; 1873; Barclay, Curie & Co.; 3,126 tons; 374-5X38-5x29-4; 400 h.p.; compound inverted engines.
The British cargo ship *City of Manchester* was wrecked on November 23rd, 1885, off Ushant while on a voyage from Calcutta to London.

CITY OF MANCHESTER

Ellerman Lines; 1935; Cammell, Laird & Co.; 8,917 tons; 498-5x64-3x29-9; 1,625 n.h.p.; turbine engines.
The British steamship *City of Manchester* was torpedoed, shelled and sunk by a Japanese submarine on February 28th, 1942, some 35 miles out of Tjitatjap.

CITY OF MANDALAY

Ellerman Lines; 1925; Swan, Hunter & Wigham Richardson; 7,028 tons; 443-2x57-9x31-9; 751 n.h.p.; triple-expansion engines & L.P. turbine.
The British steamship *City of Mandalay* was torpedoed and sunk by a German submarine on October 17th, 1939, off the Bay of Biscay. Seven of her crew were lost.

CITY OF MANILA

Ellerman Lines; 1916; W. Gray & Co.; 7,452 tons; 475x58-2x31-8; 859 n.h.p.; quadruple-expansion engines & L.P. turbine.
The British steamship *City of Manila* was torpedoed and sunk by a German submarine on August 19th, 1942, on a voyage from Free-town to the Clyde.

CITY OF MEMPHIS

Ocean S.S. Co. of Savannah; 1902; Delaware River Co.; 5,252 tons; 377-5x49x15-8; 390 n.h.p.; 12-5 knots; triple-expansion engines.
The *City of Memphis* was torpedoed without warning by a German submarine whilst crossing the Atlantic on March 17th, 1917. The outbreak of war between the United States and Germany was regarded as a certainty by the German naval authorities and their submarine commanders no longer respected the American flag. The

announcement of the loss of the *City of Memphis* also included that of two other American ships, the *Illinois* and the *Vigilancia*, both sunk about the same date. There was a considerable loss of life on these three ships.

CITY OF MEXICO

Harloff & Rodseth; 1905; Laxevaags Msk. & Jernskb.; 1,511 tons; 256X36-7x16-7; 149 n.h.p.; triple-expansion engines.
The Norwegian steamship *City of Mexico* was sunk by a German submarine on November 22nd, 1916, in the English Channel.

CITY OF MYSORE

Ellerman Lines; 1914; Palmers' Co.; 5,294 tons; 401-1x51-3x29-7; 534 n.h.p.; triple-expansion engines.
The British ship *City of Mysore* with a cargo of jute, tea, etc., was wrecked on February 23rd, 1915, on Komuriya Ridge, Ceylon. She had left Calcutta for London and Dunkirk.

CITY OF NAGPUR

Ellerman Lines; 1914; Workman, Clark & Co.; 8,331 tons; 465-3x58-3x31-6; 492 n.h.p.; quadruple-expansion engines.
The British cargo ship *City of Nagpur* was wrecked on August 23rd, 1917, on Danae Shoal on a voyage to Bombay.

CITY OF NAGPUR

Ellerman Lines; 1922; Workman, Clark & Co.; 10,146 tons; 469-9x59-3x40; 1,038 n.h.p.; 14 knots; quadruple-expansion engines.
The *City of Nagpur* was in the North Atlantic about 700 miles W. of Ireland, on April 29th, 1941, when she was torpedoed and sunk by a German submarine. Two gunners, 13 lascars and one passenger were killed.

CITY OF NAPLES

Ellerman Lines; 1908; Swan, Hunter & Wigham Richardson; 5,739 tons; 418-3x53-3x30-4; 369 n.h.p.; triple-expansion engines.
The British steamship *City of Naples* was wrecked on Zenisu Reef, Miyaki Island, Japan, on June 15th, 1926, while on a voyage from Dunkirk to Yokohama with a general cargo.

CITY OF NEW YORK

American South African Line; 1930; Sun S.B. & D.D. Co.; 8,272 tons; 450-9x61-8x24; 5,000 h.h.p.; 14 knots; oil engines.
The *City of New York*, Capt. G. T. Sullivan, was 30 miles E. of Cape Hatteras on March 29th, 1942, when she was attacked by a submarine. She was hit by two torpedoes and sank with a loss of 16 men. Capt. Sullivan was among the survivors. The vessel was not in convoy at the time of the sinking.

CITY OF OXFORD

Ellerman Lines; 1926; Swan, Hunter & Wigham Richardson; 2,759 tons; 326-7x46-4x20-9; 306 n.h.p.; triple-expansion engines.
The steamship *City of Oxford* was torpedoed and sunk by a German submarine on June 15th, 1942, on a voyage from Huelva to Garston.

CITY OF PADUCAH

Mississippi river steamboat.
The Mississippi river steamboat *City of Paducah* sank off Grand Tower on May 13th, 1900. Of those on board 23 were drowned.

CITY OF PARIS

Ellerman Lines; 1907; Barclay, Curie & Co.; 9,239 tons; 493-2X57-7x32-6; 670 n.h.p.; 15 knots; quadruple-expansion engines.
The *City of Paris* was on her way from India to Marseilles with a general cargo and 13 passengers. She had received several code warnings that submarines were about, and therefore pursued an erratic course hoping to avoid an encounter, but without success for she was torpedoed by the submarine *U-52* shortly before midnight on April 4th, 1917, 46 miles S. by E. of Cap d'Antibes. The liner's people were in the act of boarding the boats when the submarine surfaced and called for the captain but was unable to find him. She then opened fire on the liner before sinking her with a

second torpedo. Later, French warships on patrol picked up three boats containing the dead bodies of 29 lascar members of the crew. Another boat containing 12 dead was also picked up and two other boats were never found. The number of persons killed was 122.

CITY OF PEKIN

EHerman Lines; 1920; Palmers' Co.; 6,960 tons; 442-8x58-7x31-6; 746n.h.p.; turbine engines.

The British steamship *City of Peking* struck a rock and sank at Brook Island, off the south coast of Korea, on April 10th, 1930. She was on a voyage from Vladivostock to Dairen and carried passengers and a general cargo.

CITY OF PERTH

G. Smith & Sons; 1890; Workman, Clark & Co.; 3,427 tons; 361-7x42-7x26-4; 354 n.h.p.; 11 knots; triple-expansion engines.

The steamship *City of Perth* was torpedoed and sunk by a submarine 195 miles S.S.W. of Fastnet on June 11th, 1917. Eight men were killed. The captain was among the survivors.

CITY OF PRETORIA

Ellerman & Bucknall S.S. Co.; 1937; Cammell Laird & Co.; 8,049 tons; 496-7x62-4x31-3; 1,867 n.h.p.; turbine engines.

The British steamship *City of Pretoria* sailed from New York on February 27th, 1943, for Holyhead and Liverpool, carrying a general cargo. In mid-Atlantic on March 4th, she was hit by two torpedoes from the German submarine *U-172* and blew up immediately. There were no survivors.

CITY OF RIO DE JANEIRO

Pacific Mail S.S. Co.; 1878; J. Roach & Son; 3,548 tons; 345x38-6x28-9; 339 n.h.p.; 13-5 knots; triple-expansion engines.

The loss of the *City of Rio de Janeiro* was one of the outstanding disasters on the western seaboard of the United States. On February 2nd, 1901, the vessel with 201 persons on board under command of Capt. Ward left Yokohama for San Francisco. She reached her destination on the early morning of the 22nd in a dense fog, and was taken over by a pilot. The captain was warned by the pilot that there was some danger if he persisted in attempting the passage of the Golden Gate in the thick state of the weather, nevertheless he decided to proceed. The ship had not gone far when she struck, sustaining serious injury below the waterline but being able to steam for a further 15 minutes. After a little more than a quarter of an hour, at 5 a.m., the ship pitched forward and went down by the head, taking with her 72 passengers and 32 of the crew, including the captain. Of 18 women on board only three were saved. Mr. Wildman, the U.S. Consul-General at Hong Kong, and his wife and children were drowned.

At the time of the disaster the vessel was carrying a cargo valued at £100,000. A search was made for the hull of the wreck and a reward offered to any who might find it, but it was never found, and it can only be concluded that it was swept away by the force of the tide.

CITY OF RIPON

Ellerman's Wilson Line; 1915; Russell & Co.; 6,368 tons; 410-2x53-5x33-8; 495 n.h.p.; triple-expansion engines.

The British steamship *City of Ripon* was torpedoed, shelled and sunk by a German submarine on November 11th, 1942, N.W. of Demerara, on a voyage from Table Bay to Trinidad. Fifty-two crew and four gunners were lost.

CITY OF ROCHESTER

William A. Watson; 1879; Osbourne, Graham & Co.; 1,335 tons; 240x33x18-9; 172 n.h.p.; compound engines.

The British ship *City of Rochester* was sunk in a collision on September 29th, 1909, in the North Sea on a voyage from Hamburg to Seaham Harbour.

CITY OF SHANGHAI

Ellerman Lines; 1917; Earless Co.; 5,828 tons; 418-5x55x29-4; 565 n.h.p.; triple-expansion engines.

The steamship *City of Shanghai* was torpedoed, shelled and sunk by a German submarine on May 6th, 1941, on a voyage from the Tyne to Table Bay, with the loss of eight lives.

CITY OF SIMLA

Ellerman Lines; 1921; W. Gray & Co.; 10,138 tons; 476-7x58-2x39-8; 1,243 n.h.p.; 13-5 knots; turbine engines.

The *City of Simla* was about 50 miles N.W. of Malin Head on September 21st, 1940, when she was torpedoed and sunk by a German submarine.

CITY OF STOCKHOLM

John Slater; 1882; Caird & Purdie; 1,336 tons; 246-3x34-2x17; 157 n.h.p.; compound engines.

The British ship *City of Stockholm* foundered on August 10th, 1918, near Ulvesund. She was on a voyage from Aalesund to Hull with a cargo of pyrites.

CITY OF SYDNEY

St. Lawrence Shipping Co.; 1890; C. S. Swan & Hunter; 2,568 tons; 300-4x41-1x21-6; 319 n.h.p.; triple-expansion engines.

The Canadian ship *City of Sydney* was wrecked on March 17th, 1914, at Sambro Island, Halifax. She was on a voyage from New York to St. John's, N.F.L.

CITY OF TAMPICO

Harloff & Rodseth; 1905; Bergens Mek. Verks.; 1,513 tons; 256-1x36-8x16-6; 149 n.h.p.; triple-expansion engines.

The Norwegian steamship *City of Tampico* was sunk by a German submarine in the Bay of Biscay on January 16th, 1917.

CITY OF VENICE

Ellerman Lines; 1924; Workman, Clark & Co.; 8,762 tons; 455-2x58-1x31-3; 972 n.h.p.; quadruple-expansion engines & L.P. turbine.

The British steamship *City of Venice*, bound for Sicily with military personnel and munitions, was torpedoed, set on fire and sunk by a German submarine on July 4th, 1943, in the Central Mediterranean. Eleven of her crew and an unspecified number of military passengers were lost.

CITY OF VIENNA

Palgrave, Murphy & Co.; 1885; W.B. Thompson & Co.; 1,080 tons; 249-6x32-2x15-4; 173 n.h.p.; compound engines.

The Irish cargo ship *City of Vienna* sank in a collision on November 14th, 1900, in the Bristol Channel. She was on a voyage from Swansea to Rotterdam with a cargo of coal. Only one of the crew was saved from her complement of 21.

CITY OF VIENNA

Ellerman Lines; 1914; Workman, Clark & Co.; 6,111 tons; 420-3x55-7x30-9; 424 n.h.p.; triple-expansion engines.

The British cargo ship *City of Vienna* was wrecked on July 2nd, 1918, off Ketch Harbour, N.S., while on a voyage from Montreal to Halifax.

CITY OF WELLINGTON

Ellerman Lines; 1925; Barclay, Curie & Co.; 5,733 tons; 411-3x55x29-7; 647 n.h.p.; triple-expansion engines & L.P. turbine.

The British steamship *City of Wellington* was torpedoed and sunk by a German submarine on August 21st, 1942, on a voyage from Mossel Bay to Freetown. Seven of her crew were lost.

CITY OF WESTMINSTER

City of Oran S.S. Co. (Hall Line); 1916; Flensburger Schiffsb. Ges.; 6,094 tons; 470-5x62-1x25-3; 701 n.h.p.; triple-expansion engines.

The British steamship *City of Westminster* was wrecked on Runnelstone, nine miles west of Penzance, on October 8th, 1923, while on a voyage from Belfast to Rotterdam with a general cargo.

CITY OF WINCHESTER

CITY OF WINCHESTER

Ellerman Lines; 1917; Palmers' Co.; 7,120 tons; 456-1x57-9 X31-3; 736 n.h.p.; triple-expansion engines.

The British steamship *City of Winchester* was torpedoed and sunk by a German submarine on May 9th, 1941, on a voyage from London to Table Bay. Six of her crew were lost.

CITY OF WORCESTER

R. Livings ton & Co.; 1891; Osbourne, Graham & Co.; 2,404 tons; 290x38-1x20-1; 208 n.h.p.; triple-expansion engines.

The British cargo ship *City of Worcester* was wrecked on December 4th, 1899, near Craster, Northumberland. She was on a voyage from Nykjöbing to the Tyne.

CITY OF YORK

G. Smith & Sons; 1869; J. Elder & Co.; 1,218 tons; 222-7x35-8x21-7.

The sailing ship *City of York* was off the coast of Western Australia in a gale and thick weather on July 12th, 1899, when she ran on the rocks off Rottneest Island. Eleven of the crew were drowned.

CIUDAD DE BARCELONA

Cia. Trasmediterranea; 1929; Cantieri Navali Triestino; 3,946 tons; 332-2x49x25-5; 722 n.h.p.; oil engines.

The Spanish motorship *Ciudad de Barcelona* was torpedoed and sunk on May 30th, 1937, during the Spanish Civil War.

CIUDAD DE BUENOS AIRES

Cia. de Navegacion Fluvial Argentina; 1914; 3,754 tons; 364-6x44-2x—; turbine engines.

The Argentine ferry *Ciudad de Buenos Aires* was in collision with the steamship *Mormacsurf*, 7,980 tons, in the vicinity of Km. 123, Martin Garcia Channel, River Plate, on August 28th, 1957. The ferry sank in 18 minutes and 94 passengers and crew, including the captain, were drowned.

CIUDAD DE CADIZ

Cia. Trasatlantica; 1878; Lobnitz Coulborn & Co.; 3,202 tons; 363-6x38-2x24-2; 394 n.h.p.; triple-expansion engines.

The Spanish steamship *Ciudad de Cadiz* foundered during heavy weather off Fernando Po on October 10th, 1924, on a voyage from Barcelona to Fernando Po.

CLACTON

British Navy, fleet minesweeper; 1940; Blyth Shipbuilding Co.; 672 tons; 174x28-5x9-5; 2,400 i.h.p.; 16 knots; turbine engines; one 3 in. A.A. gun, two 20 mm., 4 m.g.

The fleet minesweeper *Clacton*, Lt. Cdr. L. S. Shaw, D.S.C., R.D., R.N.R., struck a mine and sank E. of Corsica on December 31st, 1943. Three officers and 29 ratings were killed. Cdr. Shaw was among the survivors, but was wounded.

CLAIRE

Soc. Anon. Beige d'Armements et de Nav. a Vap. "La Phocene"; 1871; J.G. Lawrie; 1,157 tons; 249-3x30-4x18-3; 344 n.h.p.; triple-expansion engines.

The Belgian steamship *Claire* was torpedoed and sunk by a submarine in the Mediterranean on July 12th, 1917.

CLAM

Anglo-Saxon Petroleum Co.; 1927; Nederlandsche Scheepsb. Maats.; 7,404 tons; 440-4x59-5x32-7; oil engines.

The British motor tanker *Clam* was being towed by the tug *Englishman* from Reykjavik to Cardiff when she broke adrift during a storm off the south-west coast of Iceland on February 28th, 1950. She was driven ashore and wrecked at Reykjanes and 27 of her crew of 50 were lost.

CLAN ALPINE

Cayzer, Irvine & Co. (Clan Line); 1899; W. Doxford & Sons; 3,587 tons; 355x45-6x24-7; 330n.h.p.; 11 knots; triple-expansion engines.

The *Clan Alpine*, Capt. N. Leslie, was on a voyage to Archangel when she was torpedoed and sunk by a German submarine. The attack took place 40 miles N. by E. of Muckle Flugga on June 9th, 1917, the vessel sinking with the loss of four officers and four lascar seamen.

CLAN ALPINE

Clan Line; 1918; Greenock & Grangemouth Dockyard Co.; 5,442 tons; 410-2x53-5x28-4; 627n.h.p.; 11 knots; triple-expansion engines

The *Clan Alpine*, Capt. J. H. Crellin, was in convoy about 150 miles W. of Galicia, Spain, on March 13th, 1943, when she was torpedoed by a submarine. After survivors were taken off, the ship was sunk by one of the convoy escorts with depth charges. Twenty-six persons were killed. Capt. Crellin was among the survivors, this being his second ship to be lost by enemy action.

CLAN BUCHANAN

Clan Line; 1938; Greenock & Grangemouth Dockyard Co.; 7,266 tons; 463-7x63x29-9; 1,370 n.h.p.; 17-5 knots; triple-expansion engines & L.P. turbine.

The *Clan Buchanan*, Capt. D. Davenport Jones, was intercepted by the German raider *Pinguin* on April 28th, 1941, in the Indian Ocean, and sunk after the crew had been taken prisoners of war aboard the raider.

The *Pinguin* was sunk by the cruiser *Cornwall* on May 8th, when Captain Jones and 106 of the crew of *Clan Buchanan* were killed.

CLAN CAMPBELL

Cayzer, Irvine & Co.; 1882; A. Stephen & Sons; 2,434 tons; 324-5X38-1X23-8; 300h.p.; compound inverted engines.

The British cargo ship *Clan Campbell* was wrecked on September 22nd, 1882, on the south coast of Mauritius. She was carrying a general cargo from Table Bay to Mauritius.

CLAN CAMPBELL

Clan Line; 1937; Greenock Dockyard Co.; 7,255 tons; 463-7X63x29-9; 1,043 n.h.p.; 17-5 knots; triple-expansion engines & L.P. turbine.

The *Clan Campbell*, Capt. J. F. Vooght, formed part of a convoy which left Alexandria for Malta on March 20th, 1942. The merchantmen were protected by a force of cruisers and destroyers under command of Rear-Admiral Sir P. Vian. The weather on leaving port was thick and stormy but it cleared while the ships were still off Cyrenaica and they were sighted by enemy aircraft. These summoned a squadron of four Italian cruisers to the scene, but after a brisk engagement Admiral Vian drove them off. On the afternoon of the same day (22nd) the battleship *Littorio* and two 10,000 ton cruisers put in an appearance. The British again attacked despite heavy odds and a torpedo hit was scored on the *Littorio*. The Italians then broke off the action and retired.

On the 23rd the *Clan Campbell* was hit by bombs and also torpedoed, and had to be abandoned. Six persons, including Capt. Vooght, were killed and one was wounded.

CLAN CHISHOLM

Clan Line Steamers; 1937; Greenock Dockyard Co.; 7,256 tons; 463-7x63x29-9; 1,362 n.h.p.; triple-expansion engines & L.P. turbine.

The steamship *Clan Chisholm* was torpedoed and sunk by a German submarine on October 17th, 1939, off the Bay of Biscay on a voyage from Calcutta to Liverpool.

CLAN DAVIDSON

T. Dunlop & Sons; 1883; A. Stephen & Sons; 1,326 tons; 240-6x34-1x17-3; 140 h.p.; compound inverted engines.

The British cargo ship *Clan Davidson* was wrecked on September 22nd, 1885, near Umea. She was on a voyage from Finland to London with a cargo of wood.

CLAN DAVIDSON

Cayzer, Irvine & Co. (Clan Line); 1912; W. Doxford & Sons; 5,058 tons; 430x53-5x26-6; 496 n.h.p.; 13 knots; triple-expansion engines.

The *Clan Davidson*, Capt. R. K. Cowie, was on a voyage from Australia to London with a cargo of frozen meat, wool and general merchandise when she was torpedoed by a German submarine. The attack took place in the early morning of June 24th, 1917, some 130 miles S.W. by W.i.W. of the Scilly Isles. The captain ordered out the boats as there was no chance of saving the vessel. The submarine surfaced as soon as the boats were afloat and took

Capt. Cowie on board, but allowed him to return to his boat a short time afterwards.

The crew were picked up five hours later by the s.s. *Crown of Arragon* but they had not been long on board when this ship was also torpedoed and they had to take to the boats once more. Finally they were rescued by the British destroyer *Lyra* and landed at Plymouth.

Twelve members of the crew lost their lives.

CLAN DRUMMOND

Cayzer, Irvine & Co.; 1882; A. McMillan & Son; 2,908 tons; 330-3x40-1x26-3; 358 n.h.p.; triple-expansion engines.

The steamship *Clan Drummond*, Capt. Crockett, on a voyage from the Clyde and Liverpool to Algoa Bay, ran into heavy weather in the Bay of Biscay on November 28th, 1898. One huge wave struck the ship and carried away the entire bridge structure. Only one boat, with 27 men, could be launched before the ship sank. This boat was picked up by the steamship *Holbein* three days later. The captain and 36 others were drowned. ^

CLAN FARQUHAR

Cayzer, Irvine & Co. (Clan Line); 1899; W. Doxford & Sons; 5,858 tons; 439x51-6x28-9; 436n.h.p.; 13 knots; triple-expansion engines.

The *Clan Farquhar*, Capt. Hayward, left Port Said on February 23rd, 1917, on her homeward voyage to London. At about 2.40 p.m. on the 26th when zig-zagging at 10 knots, 80 miles N. of Benghazi the vessel was struck on the starboard side by a torpedo. The explosion was terrific and the *Clan Farquhar* foundered in five minutes. Only two boats got away, it being impracticable to launch the others owing to the list. Capt. Hayward and six officers, as well as 42 lascar seamen, lost their lives.

The submarine, which appeared to be an Austrian, took the second engineer on board as a prisoner. The first officer, Mr. C. C. Parfitt, and the remainder of the crew were picked up by the British naval ship *Verbena* and landed at Malta.

CLAN FERGUSON

Cayzer, Irvine & Co. (Clan Line); 1898; Vickers, Sons & Maxim; 4,808 tons; 400-6x50-2x27-5; 413 n.h.p.; 12 knots; triple-expansion engines.

The *Clan Ferguson*, Capt. Charles Laird, was in convoy with 28 other vessels escorted by two American destroyers and several trawlers. When crossing the Bay of Biscay the convoy separated and the *Clan Ferguson* set course for Gibraltar. At 11.45 on the night of September 6th, 1917, when 15 miles N.W. of Cape Spartel, the vessel was torpedoed by a submarine and sank in seven minutes. The port boat got away with the majority of the crew of 73, but ten men, including the third engineer, Mr. M. Macaskill, lost their lives.

Capt. Laird was drawn down with the ship but came to the surface and was picked up later. The survivors were rescued by a British torpedo boat and landed at Gibraltar.

CLAN FERGUSON

Clan Line; 1938; Greenock Dockyard Co.; 7,347 tons; 463-7 X 63x29-9; 878 n.h.p.; 17-5 knots; triple-expansion engines & L.P. turbine.

The *Clan Ferguson*, Capt. A. R. Cossar, was acting as an auxiliary transport in the Mediterranean in August, 1942. On the 12th, when 20 miles N. of Zembra Island in convoy, she was attacked by aircraft and sunk by aerial torpedo. Eleven of the crew, one gunner and six passengers were lost. Capt. Cossar was among the survivors.

CLAN FRASER

Clan Line; 1939; Greenock Dockyard Co.; 7,529 tons; 463-7 X 63x29-9; 1,370 n.h.p.; 17-5 knots; triple-expansion engines & L.P. turbine.

The *Clan Fraser*, Capt. J. H. Giles, was acting as an auxiliary transport during the Greek campaign in 1941. On April 6th when lying in Piraeus harbour, the vessel was bombed and sunk by aircraft. Six persons were killed and nine wounded. Capt. Giles was among the survivors.

CLAN GORDON

Cayzer, Irvine & Co.; 1879; A. Stephen & Sons; 2,117 tons; 305-6x34-8x24-2; 210 n.h.p.; triple-expansion engines.

The British cargo ship *Clan Gordon* was wrecked on October 19th, 1897, at Umlalazi River, Zululand, on a voyage from the Clyde to Delagoa Bay.

CLAN GORDON

Cayzer, Irvine & Co.; 1900; W. Doxford & Sons; 3,610 tons; 355X45-6X24-7; 330n.h.p.; triple-expansion engines.

The steamship *Clan Gordon* capsized and sank on July 30th, 1919, 140 miles south-east of Cape Hatteras while on a voyage from New York to Dairen with a cargo of case oil and wax.

CLAN KEITH

Clan Line Steamers; 1942; Todd California S.B. Co.; 7,129 tons; 441-5x57X-; 11 knots; triple-expansion engines.

The steamship *Clan Keith*, Captain L. G. W. Pitts, left Middlesbrough on October 14th, 1961, for Malta and Indian ports with general cargo.

On November 5th, at 7.10 p.m., in a strong N.E. gale, she struck on the Ecueils des Sorelles Rocks, off Cap Bon, Tunisia, and broke in two. The forward part sank at about 8 a.m. on the 6th, and the after part at 11 p.m. No wireless signals were sent by the ship as the radio room was wrecked, nor were any rockets used. The first news of the disaster was a call from the motorship *Durham Trader* at 8 a.m. on the 6th, reporting having picked up Captain Pitts, the second officer, two engineer officers and a seaman. The Finnish tanker *Nunnalahtipicked* up two seamen clinging to a capsized boat; one of these died soon afterwards. A widespread search by ships and aircraft failed to reveal any other survivors of the ship's complement of 68.

The ship was at first believed to have been sunk by an internal explosion; this was disproved by the findings of a Court of Inquiry held in May, 1962.

CLAN LAMONT

Cayzer, Irvine & Co.; 1879; A. Stephen & Sons; 2,048 tons; 305-6x34-8x24-2; 250 h.p.; triple-expansion engines.

The British cargo ship *Clan Lamont* was wrecked on May 3rd, 1891, near Batticaloa, Ceylon, on a voyage from Madras to London.

CLAN LINDSAY

Cayzer, Irvine & Co.; 1896; Naval Construction & Armament Co.; 2,668 tons; 312-3x40-2x23-5; 317 n.h.p.; triple-expansion engines.

The British cargo ship *Clan Lindsay* was wrecked on March 21st, 1898, at Mazeppa Bay, north of the Great Kei River, Cape Colony. She was on a voyage from the Clyde, via Liverpool, to Mauritius.

CLAN MACALISTER

Clan Line; 1930; Greenock Dockyard Co.; 6,787 tons; 453-8 X 62-3x28-9; 7 19 n.h.p.; 13 knots; triple-expansion engines & L.P. turbine.

The *Clan Macalister*, Capt. R. W. Mackie, was acting as an auxiliary transport during the evacuation of the British army from France in May, 1940. On the 29th the vessel was lying in Dunkirk harbour when she was attacked by German bombers and sunk. Eighteen persons were killed and 14 wounded. Capt. Mackie was among the survivors.

CLAN MACARTHUR

Clan Line; 1936; Greenock Dockyard Co.; 10,528 tons; 477-1x 66-2x40-2; 1,552 n.h.p.; 17 knots; triple-expansion engines & two L.P. turbines.

The *Clan Macarthur*, Capt. J. D. Matthews, O.B.E., was one of the largest and fastest vessels of the company's fleet. On August 11th, 1943, she was about halfway between the islands of Reunion and Madagascar in the Indian Ocean, when she was torpedoed and sunk by a submarine. There were 99 survivors of her complement of 151, including Capt. Matthews.

CLAN MACDOUGALL

CLANMACDOUGALL

Cayzer, Irvine & Co. (Clan Line); 1904; W. Doxford & Sons; 4,710 tons; 385-2x50-1X26-3; 413 n.h.p.; 10-5 knots; triple-expansion engines.

The *Clan Macdougall* was homeward bound, having left Naples on the afternoon of March 14th, 1918, in convoy. She was commanded by Capt. Harry S. Southward who had been in command of the *Clan Macleod* (which see) when that vessel was shelled and sunk. At about 7 o'clock on the morning of the 15th she was torpedoed on the port side by an enemy submarine 60 miles S.E. by E. of Cape Carbonara, Sardinia, and had to be abandoned about an hour later. Capt. Southward and 32 others were lost.

CLANMACDOUGALL

Clan Line Steamers; 1929; Greenock Dockyard Co.; 6,843 tons; 454x62-3x28-9; 1,100 n.h.p.; oil engines.

The motorship *Clan Macdougall* was torpedoed and sunk by a German submarine on May 31st, 1941, between St. Vincent, C.V., and Table Bay.

CLANMACDUFF

Cayzer, Irvine & Co. (Clan Line); 1870; Barclay Curie; 2,328 tons; 326-1x36-1x27-7; 220 n.h.p.; 11 knots; compound engines.

The *Clan Macduff*, Capt. W. Webster, was formerly known as the *City of Oxford*, but had been renamed when taken over by the Clan Line. On Tuesday, October 18th, 1881, the vessel left Liverpool for Bombay with 19 passengers and 46 crew. When off Holyhead the weather became cloudy and by the 19th there was a high sea and a rising wind and the vessel had sprung a leak. On the same evening the steam pumps choked and passengers and crew were employed in the task of bailing out. At 10 p.m. the ship was swept by tremendous waves and bailing had to be abandoned. By the next day the boiler fires were out and just after mid-day the captain decided that she must be abandoned. Orders were given to launch the six boats carried, those on the lee side being got ready first. The large lifeboat was smashed in lowering, but the gig got into the water without mishap and eight people were taken off. The cutter followed but two other boats were smashed by the seas, leaving only one which could hold 30 at the utmost, there still being 45 persons on the liner. Eventually 28, including the captain who jumped overboard, were taken off leaving the first officer and 16 of the crew on board. During the night these men made desperate efforts to keep the ship afloat and at 4 p.m. on the 21st, they were rescued in the nick of time by the steamship *Upupa* of the City of Cork Steam Packet Co.

The boat into which the captain had been taken capsized and only five of its occupants were saved, being picked up by a passing vessel. Another, with seven passengers and four crew, was sighted by the steamship *Palestine*, which took them aboard, and one, containing the body of a young lady, drifted ashore at Clonkilty, Ireland.

The number of persons drowned was 32, of whom 12 were passengers and 20 crew. The *Clan Macduff* was last seen at 9 p.m. on the 21st with her decks awash, about 40 miles S. of Roche Point.

CLANMACFADYEN

Clan Line; 1923; Ayrshire Dockyard Co.; 6,191 tons; 418-2x53-4x33-6; 743 n.h.p.; 13 knots; triple-expansion engines & L.P. turbine.

The *Clan Macfadyen*, Capt. P. Williams, was torpedoed and sunk by a submarine about 100 miles from the mouth of the Orinoco on November 26th, 1942. Capt. Williams and 81 others were killed. The ship was not in convoy at the time.

CLANMACFARLANE

Cayzer, Irvine & Co. (Clan Line); 1898; W. Doxford & Sons; 4,823 tons; 400-5x50-2x27-6; 413 n.h.p.; 12 knots; triple-expansion engines.

The *Clan Macfarlane*, Capt. Swanston, was bound from Liverpool to Bombay when she was torpedoed and sunk by a submarine 66 miles S.E. by S. of Cape Martello, Crete. The attack took place at about 3.45 p.m. on December 30th, 1915, the crew abandoning the ship in six boats which were tied together for security, but two boats broke loose on the second day and the captain's boat two days later; none of these was ever seen again. They contained, beside the captain, third officer and third engineer, all the English seamen. The

three boats which survived carried 37 persons, of whom six were British officers, the remainder being lascars. On January 7th, 1916, these boats were sighted by the s.s. *Crown of Aragon* after having been adrift for nine days. Thirteen of the lascars had died, leaving only 24 survivors from the 75 persons who had formed the crew.

CLANMACFARLANE

Clan Line; 1922; Ayrshire Dockyard Co.; 6,193 tons; 418-1x53-4x33-6; 743 n.h.p.; 13 knots; triple-expansion engines & L.P. turbine.

The *Clan Macfarlane*, Capt. F. J. Houghton, was sunk in a collision with the British steamship *Ganges* on July 17th, 1940, about 250 miles S.E. of Cape Gardafui. Forty-one persons lost their lives. Capt. Houghton was among the 47 survivors.

CLANMACGREGOR

Cayzer, Irvine & Co.; 1882; Ramage & Ferguson; 3,003 tons; 329-6x40-3x26-4; 362 n.h.p.; triple-expansion engines.

The British cargo ship *Clan Macgregor* was sunk in a collision on September 4th, 1899, near Cape St. Vincent, on a voyage from Madras to London.

CLANMACGREGOR

Cayzer, Irvine & Co.; 1902; A. McMittan & Son; 4,511 tons; 395-7x48-2x27; 398 n.h.p.; triple-expansion engines.

Another *Clan Macgregor* was wrecked on June 1st, 1902, on Atlas Reef, Cape Colony, on a voyage from Natal to New York.

CLANMACKAY

Cayzer, Irvine & Co.; 1882; Bartram, Haswell & Co.; 2,171 tons; 285-7x37-2x24-4; 300 h.p.; compound inverted engines.

The British cargo ship *Clan Mackay* was wrecked near Galle on March 9th, 1891, on a voyage from Cocanada to London.

CLANMACKAY

Cayzer, Irvine & Co.; 1917; Northumberland S.B. Co.; 6,580 tons; 420x53-4x36-3; 662 n.h.p.; triple-expansion engines.

The British cargo ship *Clan Mackay* was sunk in a collision in the Atlantic on May 10th, 1918. She was on a voyage from Liverpool to Calcutta with a general cargo and coal.

CLANMACKENZIE

Cayzer, Irvine & Co.; 1911; W. Doxford & Sons; 5,018 tons; 430x53-6x26-6; 497 n.h.p.; triple-expansion engines.

The British cargo ship *Clan Mackenzie* was wrecked on December 31st, 1912, at Torre Nueva near Cadiz. She was on a voyage from the Clyde, via Liverpool, to Calcutta.

CLANMACKINLAY

Clan Line Steamers; 1918; W. Hamilton & Co.; 6,365 tons; 420x54-5x34; 781 n.h.p.; triple-expansion engines & L.P. turbine.

The steamship *Clan Mackinlay* was bombed and sunk by German aircraft on November 6th, 1940, near Noss Head. Five of her crew were lost.

CLANMACLACHLAN

Cayzer, Irvine & Co. (Clan Line); 1900; A. Stephen & Sons; 4,729 tons; 395-3x48x27-1; 400 n.h.p.; 10-75 knots; triple-expansion engines.

The *Clan Maclachlan*, Capt. J. E. McLean, was run down and sunk by the Italian steamship *Europa* near Gibraltar on the night of July 19th, 1917. Both vessels were sailing without lights owing to war conditions. On board the *Clan Maclachlan* the third engineer, Mr. N. Peacock, was killed by the collision and five lascars were drowned.

CLAN MACLEAN

Cayzer, Irvine & Co.; 1870; Barclay, Curie & Co.; 2,336 tons; 326-5x36-1x27-7; 277 n.h.p.; triple-expansion engines.

The British cargo ship *Clan Maclean* was wrecked on August 13th, 1903, six miles north of Cape St. Vincent, while on a voyage from the Clyde to Bombay.

CLAN MACLEAN

Cayzer, Irvine & Co.; 1905; W. Doxford & Sons; 4,676 tons; 385-2x50-1x26-3; 413 n.h.p.; triple-expansion engines.
The British cargo ship *Clan Maclean* struck a rock and sank two miles off Mafamede Island in the Mozambique Channel on November 23rd, 1919.

CLAN MACLEOD

Cayzer, Irvine & Co. (Clan Line); 1903; Furness Withy & Co.; 4,796 tons; 395-5x51-1x27-1; 452n.h.p.; 12 knots; triple-expansion engines.
The *Clan Macleod*, Capt. H. S. Southward, was attacked by the submarine *U-33*, Lt.Cdr. Gansser, on the morning of December 1st, 1915. At the time the steamship was 100 miles E.S.E. of Malta and she first sighted the German U-boat at 7.45 a.m. After trying to escape for about an hour Capt. Southward saw that there was no chance of succeeding and rounded-to, stopping his engines and sending out a wireless signal that he had surrendered. While waiting on the bridge for a reply he was astonished to find that the Germans were deliberately shelling his stationary ship. One shell hit the bridge and Capt. Southward was wounded. The boats were got put, but instantly became a target for the enemy gunners, who killed nine men outright and wounded six others, of whom three afterwards died—making 12 killed and four wounded. All the boats on the starboard side were smashed by shell fire.

The lifeboat and cutter managed to get away and Capt. Southward was summoned aboard the submarine where Lt.Cdr. Gansser was awaiting him in a state of fury. After much threatening Gansser allowed the lifeboat, containing 51 persons, to depart without molestation and it was picked up next morning. The cutter, with the first officer and 19 men, was picked up on December 4th. After some four months in hospital, Capt. Southward reached England in safety.

CLAN MACMASTER

Cayzer, Irvine & Co.; 1917; W. Doxford & Sons; 6,563 tons; 420X54x34-4; 568 n.h.p.; triple-expansion engines.
The British steamship *Clan Macmaster* was wrecked on Thousla Rock, Calf of Man, on September 30th, 1923. She was on a voyage from the Clyde to Liverpool, carrying a general cargo.

CLAN MACMELLAN

Cayzer, Irvine & Co.; 1918; W. Doxford & Sons; 6,608 tons; 420 X 54x34-4; 567 n.h.p.; triple-expansion engines.
The British steamship *Clan Macmillan* struck a reef and was wrecked on Preparis Island in the Bay of Bengal on June 20th, 1924. She was on a voyage from Calcutta to Nukualofa, Tonga Islands, carrying a general cargo.

CLAN MACNAB

Cayzer, Irvine & Co. (Clan Line); 1905; W. Doxford & Sons; 4,675 tons; 385 • 1x50x26- 3; 413 n.h.p.; 10-5 knots; triple-expansion engines.
The *Clan Macnab*, Capt. D. S. Smith, was sailing in convoy from Plymouth to Glasgow when she was torpedoed by a German submarine when rounding Land's End. The attack took place at daybreak on August 4th, 1918, two torpedoes striking the vessel in quick succession. The first exploded in No. 2 hold and the second in No. 3 hold carrying away the stokehold bulkhead, and causing a tremendous inrush of water which sank the *Clan Macnab* in two and a half minutes. Capt. Smith, six other officers and 16 native crew lost their lives. The survivors were picked up by the Belgian steamship *Kasbek*, also in convoy, despite the heavy sea. They were then transferred to the destroyer *Owl* and landed at Milford Haven. At a later date the British government presented Capt. Sytor of the *Kasbek* with a silver cup and he was also the recipient of a gift from the Clan Line.

CLAN MACNAB

Cayzer, Irvine & Co. (Clan Line); 1920; Ayrshire Dockyard Co.; 6,076tons; 410-6x53-3x33-4; 692n.h.p.; 13 knots; triple-expansion engines & L.P. turbine.
The *Clan Macnab*, Capt. P. G. de Gruchy, was sailing in convoy when she was sunk in a collision with the Norwegian motorship *Strix*. The collision took place in the neighbourhood of the Cape

Verde Islands on March 17th, 1941, and the *Clan Macnab* sank on the following day. Fourteen persons lost their lives and one was injured. Capt. de Gruchy was among the survivors.

CLAN MACNAUGHTON

Cayzer, Irvine & Co. (Clan Line); 1911; A. Stephen & Sons; 4,985 tons; 429-8x53-7x34-6; 497n.h.p.; 14 knots; triple-expansion engines.
The *Clan Macnaughton* was taken over by the Admiralty at the beginning of the First World War and commissioned as an auxiliary cruiser in December 1914, being commanded by Com. Robert Jeffreys. In the early days of February 1915 she was on patrol duty and was last heard of on February 3rd. There was bad weather prevailing at the time and a search of the area where the *Clan Macnaughton* had been cruising revealed a quantity of wreckage but no signs of the ship. Her ship's company numbered 20 officers and 261 ratings.

CLAN MACNAUGHTON

Clan Line; 1921; Ayrshire Dockyard Co; 6,088 tons; 410-5 X 53-3x33-4; 639 n.h.p.; 13 knots; triple-expansion engines & L.P. turbine.
The *Clan Macnaughton*, Capt. R. J. W. Bennet, was on a voyage from Freetown to Trinidad when she was torpedoed by a German submarine about 400 miles E. of Trinidad on August 1st, 1942. Five persons were killed. Capt. Bennet was among the survivors.

CLAN MACPHEE

Clan Line; 1911; Irvine's S.B. & D.D.Co.; 6,628 tons; 430 X 53-5x26-4; 3,600 i.h.p.; 11 knots; triple-expansion engines.
The *Clan Macphee*, Capt. T. P. Granwell, was in convoy when she was torpedoed and sunk by a German submarine in the North Atlantic on August 16th, 1940. Capt. Granwell and 66 others were killed.

CLAN MACPHERSON

Cayzer, Irvine & Co. (Clan Line); 1905; Furness, Withy & Co.; 4,779 tons; 400x51x27-2; 448n.h.p.; 10-75 knots; triple-expansion engines.
The *Clan Macpherson* left Bizerta in convoy on March 4th, 1918. At about 10 o'clock on the same evening she was struck by a torpedo from a submarine. Capt. Mee, in command, immediately ordered out the boats, an order difficult of execution owing to the heavy seas. One boat was smashed by the fall of the foremast and 18 men were killed. Later the fourth officer and third engineer were drowned. Capt. Mee was picked up after swimming around for nearly two hours.

CLAN MACPHERSON

Clan Line Steamers; 1929; Greenock Dockyard Co.; 6,940 tons; 454x62-3x28-9; 973 n.h.p.; triple-expansion engines & L.P. turbine.
The steamship *Clan Macpherson* was torpedoed and sunk by a German submarine on May 1st, 1943, between Takoradi and Freetown.

CLAN MACQUARRIE

Clan Line Steamers; 1913; A. Stephen & Sons; 6,471 tons; 429x53-7x26-6; 496n.h.p.; triple-expansion engines.
The steamship *Clan Macquarrie* was torpedoed and sunk by a German submarine on June 13th, 1942, on a voyage from Durban to New York.

CLAN MACTAGGART

Scottish Shire Line; 1920; Ayrshire Dockyard Co.; 7,622 tons; 452-7x57-7x35-2; 905 n.h.p.; triple-expansion engines
The steamship *Clan Mactaggart* was torpedoed and sunk by a German submarine on November 16th, 1942, about 250 miles south of the Azores.

CLAN MACTAVISH

Cayzer, Irvine & Co. (Clan Line); 1913; Armstrong Whitworth & Co.; 7,385 tons; 450-1x57-1x26-8; 571 n.h.p.; 13 knots; triple-expansion engines.
The *Clan Mactavish*, Capt. Oliver, was a victim of the German raider *Moewe* which sank her 120 miles S. by W. of Funchal on

CLAN MACTAVISH

January 16th, 1916. The ship was on her homeward voyage from Australia to London and was armed with a 2 pdr. quick-firing gun as a protection against submarines. On being summoned by the raider to stop the *Clan Mactavish* refused, whereupon the enemy ship dropped her canvas screens and opened fire from guns far heavier than that of the liner. Capt. Oliver sent out a wireless call for help and then replied with his tiny gun. The action did not last long and when 17 men had been killed and five wounded the *Clan Mactavish* was compelled to haul down her colours and surrender. Her crew was taken off as prisoners and later transferred to the Elder Dempster liner *Appam* which landed them, with prisoners from other ships, at Norfolk, Virginia, on January 31st. Capt. Oliver and the two gunners were kept on board the *Moewe* and taken to Germany.

For full story of the raider see *Georgic*.

CLAN MACTAVISH

Clan Line; 1921; Ayrshire Dockyard Co.; 7,631 tons; 452-6X 57-7x29-6; 905 n.h.p.; 14 knots; turbine engines.

The *Clan Mactavish*, Capt. E. E. Arthur, was about 100 miles off the Cape of Good Hope when she was torpedoed and sunk by a German submarine on October 8th, 1942. Fifty-four persons, including Capt. Arthur and seven survivors from the Danish motorship *Boringia*, were killed. The ship was not in convoy.

CLAN MACVEY

Cayzer, Irvine & Co. (Clan Line); 1918; Northumberland Ship-building Co.; 5,818 tons; 400-1x53x32-8; 569 n.h.p.; 10 knots; triple-expansion engines.

The steamship *Clan Macvey* was torpedoed and sunk by a submarine 7 miles S.E. of Anvil Point on August 8th, 1918. Seven men were killed. The captain was among the survivors.

CLAN MACWHIRTER

Clan Line; 1918; Lloyd Royal Beige; 5,941 tons; 424-4X 55-8x28-8; 549 n.h.p.; 12 knots; triple-expansion engines.

The *Clan Macwhirter*, Capt. R. S. Masters, was crossing the North Atlantic some hundreds of miles W. of Portugal when she was torpedoed and sunk by a German submarine. The attack took place on August 26th, 1942, and ten persons, including Capt. Masters, were killed and two were wounded. The ship was not in convoy.

CLAN MATHESON

Cayzer, Irvine & Co.; 1917; Sir J. Laing & Sons; 5,960 tons; 405x53-5x33-5; 401 n.h.p.; triple-expansion engines.

The British cargo ship *Clan Matheson* was sunk in a collision on May 22nd, 1918, in 40° 32' N., 49° 10' W., while on a voyage from New Orleans and New York to Nantes. She was carrying barley, oats and steel.

CLAN MENZIES

Clan Line; 1938; Greenock Dockyard Co.; 7,336 tons; 463-7x 63x29-9; 1,370 n.h.p.; 17-5 knots; triple-expansion engines & L.P. turbine.

The *Clan Menzies*, Capt. W. J. Hughes, was off the west coast of Ireland when she was torpedoed and sunk by a German submarine. The attack took place on July 29th, 1940, and six persons were killed and two wounded. Capt. Hughes was among the survivors.

CLAN MONROE

Cayzer, Irvine & Co.; 1897; W. Doxford & Sons; 4,853 tons; 400-1x50-2x27-8; 413 n.h.p.; triple-expansion engines

The British cargo ship *Clan Monroe* was wrecked on July 2nd, 1905, off Slangkop Point, Cape of Good Hope, on a voyage from Liverpool to Delagoa Bay.

CLAN MONROE

Clan Line; 1918; Ayrshire Dockyard Co.; 5,952 tons; 409-6x 53-4x33-5; 413 n.h.p.; 12 knots; triple-expansion engines.

The *Clan Monroe*, Capt. C. W. Banbury, was acting as an auxiliary transport when she struck a mine off Harwich on July 29th, 1940. The ship was taken in tow and beached in Hollesley Bay in a depth of 27 feet at low water. Thirteen persons were killed and three were wounded. Capt. Banbury was among the survivors.

CLAN MORRISON

Clan Line Steamers; 1918; Ayrshire Dockyard Co.; 5,936 tons; 409-6x53-4x33-5; 413 n.h.p.; triple-expansion engines.

The steamship *Clan Morrison* struck a mine and sank on February 24th, 1940, about 50 miles N.E. of Great Yarmouth.

CLAN MURRAY

Clan Line; 1897; W. Doxford & Sons; 4,835 tons; 400 X 50-2X 27-8; 413 n.h.p.; 11 knots; triple-expansion engines.

The *Clan Murray*, Capt. John E. Woodall, was homeward bound with a cargo of wheat from Australia when she was torpedoed by a submarine 40 miles W. by S. of Fastnet. The attack took place at 4 a.m. on May 29th, 1917. Capt. Woodall and the third officer, Mr. A. G. Macpherson, were blown off the bridge by the force of the explosion. The captain recovered sufficiently to stop the engines and then went below to destroy the code books—he was never seen again. Nearly all on board were lost when the *Clan Murray* foundered, a total of 11 Europeans and 53 lascars.

Mr. Macpherson was picked up by the submarine and taken to Germany as a prisoner.

The *Clan Murray* had only recently been armed, having had a 4 • 7 in. gun fitted aft at Sierra Leone on her homeward voyage.

CLAN OGILVIE

Cayzer, Irvine & Co.; 1882; A. Stephen & Sons; 2,425 tons; 324 • 5X38 • 1X23 • 8; 300 h.p.; compound inverted engines.

The British cargo ship *Clan Ogilvie* was wrecked on January 8th, 1888, in the Strait of Bonifacio while on a voyage from Bombay to Marseilles.

CLAN OGILVY

British & South American Steam Navigation Co.; 1914; W. Doxford & Sons; 5,802 tons; 430x54-2x29-4; 413 n.h.p.; 12 knots; triple-expansion engines.

The *Clan Ogilvy*, Capt. E. Gough, O.B.E., was off the Cape Verde Islands, in convoy, when she was torpedoed and sunk by a submarine. The attack took place on March 20th, 1941, and 23 crew and two gunners were killed and three wounded. Capt. Gough was among the survivors.

CLAN RANALD

Cayzer, Irvine & Co. (Clan Line); 1900; W. Doxford & Sons; 3,596 tons; 355x45-6x24-7; 330 n.h.p.; 10-5 knots; triple-expansion engines.

The *Clan Ranald*, Capt. Gladstone, was a turret deck steamship. She left Port Adelaide for South Africa on January 31st, 1909, with cargo and the South African mail, and had a crew of 64 all told. The weather was rough and at about 2 p.m. when crossing the Gulf of St. Vincent the ship was struck by a heavy sea which caused her to heel over to starboard with that side of her deck under water. She did not recover from this position and by 6 p.m. was quite unmanageable. During this time the captain was unwell and the first officer, Mr. Rose, was in charge. At 10 p.m., or thereabouts the *Clan Ranald* turned turtle and foundered, her position at the time being off Edithburg, at the entrance to the Gulf of St. Vincent. Among the 40 men drowned were the captain, the second officer and the chief, third and fourth engineers.

CLAN ROSS

Clan Line; 1914; Swan, Hunter & Wigham Richardson; 5,897 tons; 430x54-3x29-4; 413 n.h.p.; 12 knots; triple-expansion engines.

The *Clan Ross*, Capt. G. McColl, bound to Bombay, was torpedoed and sunk by a submarine 300 miles N.N.W. of Socotra Island. The attack took place on April 2nd, 1942, and 12 persons were killed and three wounded. Capt. McColl was among the survivors.

CLAN SKENE

Clan Line; 1919; Chas. Cornell & Co.; 5,214 tons; 401X 52-3 X 28-5; 599 n.h.p.; 12 knots; triple-expansion engines & L.P. turbine.

The *Clan Skene*, Capt. E. Gough, O.B.E., was crossing the Atlantic in convoy when she was torpedoed and sunk by a submarine between Bermuda and Charleston. The attack took place on May 10th, 1942, and nine persons were killed. Capt. Gough was among the survivors.

CLAN STUART

Cayzer, Irvine & Co.; 1900; W. Doxford & Sons; 3,594 tons; 355x45-6x24-7; 330n.h.p.; triple-expansion engines.

The British cargo ship *Clan Stuart* was wrecked on November 21st, 1914, in Simon's Bay, while on Government service. She was carrying a cargo of coal from Walfisch Bay to Simonstown.

CLANGULA

Cork Steamship Co.; 1917; Swan, Hunter & Wigham Richardson; 1,755 tons; 285x40x19-4; 318n.h.p.; 11 knots; triple-expansion engines.

The steamship *Clangula* was torpedoed and sunk by a submarine four miles S.W. of Hartland Point on November 19th, 1917, only one month after completion. The captain and 14 others were killed.

CLARE HUGO STINNES 1

Hugo Stinnes, G.m.b.H.; 1936; Flensburger Schiffsb. Ges.; 5,295 tons; 415-8x60-2x21; 1,180n.h.p.; oilengines.

The German motorship *Clare Hugo Stinnes 1* was captured by the Norwegians on April 9th, 1940, taken to Ulvik and afterwards sunk. After the occupation of Norway the Germans raised and repaired the ship. She was bombed and sunk by British aircraft on September 29th, 1944, on a voyage from Narvik to Germany.

CLAREMONT

Fisher, Renwick & Co.; 1871; Backhouse; 1,129 tons; 226x30-2x17-1; 99 h.p.; compound engines.

The British ship *Claremont* was wrecked on January 27th, 1881, on Atherfield Point, Isle of Wight. She was on a voyage from Garrucha to the Tees,

CLARENDON

Manning & Henderson; British Isles; 345 tons; 131-5x21-5x14 (approx.).

The sailing ship *Clarendon*, with about 40 passengers and crew, drove ashore in a gale at Blackgang Chine, Isle of Wight, on the night of October 11th, 1836. The wreck was not sighted until daylight, and the work of rescue was rendered almost impossible by the violence of the seas. Only three persons were saved.

In view of the many wrecks which had occurred along that portion of the Isle of Wight coast strong demands for a lighthouse had been made from time to time. In 1837 Trinity House began work on a lighthouse at St. Catherine's Point, and the light was first shown on March 25th, 1840.

CLARISSA RADCLIFFE

Evan Thomas Radcliffe & Co.; 1889; Palmers' Co.; 2,544 tons; 296x40-2x20-6; 256n.h.p.; triple-expansion engines.

The steamship *Clarissa Radcliffe*, on a voyage from Odessa to Rotterdam, encountered a strong gale off Cape St. Vincent on the night of December 30th, 1897. A particularly heavy sea washed away all her lifeboats but one and put the ship on her beam ends, her cargo shifted and she took a bad list. On the morning of January 1st, when the ship was obviously sinking, the remaining boat was put into the water but drifted away. The cook jumped overboard and swam to it. He was joined soon after by the captain and two others. The boat was waterlogged and without oars or sail but fortunately it was picked up six hours later by the schooner *Charles James*. The remaining 16 of the crew were drowned.

CLARISSA RADCLIFFE

Evan Thomas Radcliffe & Co.; 1915; Craig, Taylor & Co.; 5,754 tons; 415x55-5x26-7; 470 n.h.p.; 10 knots; triple-expansion engines.

The steamship *Clarissa Radcliffe*, Capt. S. G. Finnes, left New York on March 5th, 1943, for Barrow, with a crew of 41, 10 gunners and one sick British seaman. She was never heard of again and was considered to have been sunk by a submarine on or about March 9th, in approximate latitude 42° N., longitude 62° W.

CLARKSDALE VICTORY

U.S. Maritime Commission; 1945; California S.B. Corp.; 7,607 tons; 439-1x62-1x34-5; turbine engines.

The steamship *Clarksdale Victory* was wrecked in heavy seas on Hippa Reef, 140 miles S.W. of Ketchikan, Alaska, on November 24th, 1947. There were only four survivors of her crew of 53.

CLAUS BOGE

I. M. K. Blumenthal; 1936; Neptunwerft Rostock G.m.b.H.; 2,340 tons; 288-9x45-1x17-7; 142 n.h.p.; compound engines & L.P. turbine.

The steamship *ClausBoge* was on voyage from Oslo to Flushing with a cargo of ammunition when, on March 19th, 1938, she was sunk by an internal explosion 15 miles W. of Horns Reef.

CLAVERLEY

Sutherland Steamship Co.; 1907; W. Doxford & Sons; 3,829 tons; 350-1x50-1x22-4; 310 n.h.p.; 10 knots; triple-expansion engines.

The steamship *Claverley* was torpedoed and sunk by a German submarine four miles S.E. of the Eddystone on August 20th, 1917. Ten men were killed. The captain was among the survivors.

CLAYOQUOT

Canadian Navy, fleet minesweeper; 1942; Canada; 672 tons; 180x28x8-3; 2,400 i.h.p.; 16 knots; triple-expansion engines; 3-drum boilers; one 4 in. A.A. gun, two 20 mm., four m.g.

The *Clayoquot* was torpedoed and sunk by a submarine off Halifax, N.S., on December 24th, 1944. The vessel's normal complement was 70

CLEA

Anglo-Saxon Petroleum Co.; 1938; N.V. Rotterdamsche Droogdok Maats.; 7,987 tons; 463x59-3x33-9; 502n.h.p.; 12-5 knots; oilengines.

The tanker *Clea* was torpedoed and sunk by a German submarine on, or about, February 13th, 1941, in the North Western Approaches. Capt. Boyd and 58 others were killed. She had sailed from Bermuda for the United Kingdom on January 28th.

CLEANTHIS

Pindos S.S. Co.; 1911; Hawthorn Leslie & Co.; 4,153 tons; 375-7x51-3x24-3; 385n.h.p.; triple-expansion engines.

The Greek steamship *Cleanthis* was shelled and sunk by a German submarine on November 30th, 1942, 193 miles N. of Lourenco Marques on a voyage from Aden to Durban. The captain and 11 others were killed.

CLEARTON

R. Chapman & Son; 1919; Richardson, Duck & Co.; 5,219 tons; 400-2x52-4x28-4; 397n.h.p.; triple-expansion engines.

The steamship *Clearton* was torpedoed and sunk by a German submarine on July 18th, 1940, on a voyage from Rosario to Liverpool. Eight of her crew were lost.

CLEDDY

Marychurch & Co.; 1883; J. L. Thompson & Son; 2,130 tons; 282-5x36-6x23-8; 250 h.p.; compound engines.

The steamship *Cleddy* was sunk in a collision with the steamship *Isle of Cyprus*, 1,117 tons, off St. Catherine's Point, Isle of Wight, on December 20th, 1889. About 13 of the crew were drowned.

CLEMENT

Booth S.S. Co.; 1934; Cammell Laird & Co.; 5,051 tons; 412-2x55-7x26; 652 n.h.p.; 13 knots; triple-expansion engines & L.P. turbine.

The *Clement*, Capt. F. C. P. Harris, O.B.E., was one of the many victims of the German pocket battleship *Admiral Graf Spee* (which see). The vessel was intercepted by the raider some 50 miles S.E. of Pernambuco on September 30th, 1939, and her passengers and crew were taken off as prisoners, after which she was sunk by gunfire.

CLEVELAND

Stocksfield S.S. Co.; 1872; Cole Bros.; 1,210 tons; 255-Sx29-5x16-4; 98 h.p.; compound engines.

The British cargo ship *Cleveland* was sunk in a collision on July 27th, 1895, off Dover with the loss of seven lives. She was sailing from London to Cardiff in ballast.

CLIFTON

Progress S.S. Co.; 1892; American Steel Barge Co.; 1,713 tons; 308 x38x 24; 189 n.h.p.; triple-expansion engines.

The American steamship *Clifton* was wrecked during a gale on Lake Huron on September 21st, 1924. Most of the crew were drowned.

CLIMENE

CLIMENE

Italian Navy, torpedo boat; 1936; Riuniti (Ancond); 652 tons; 267x27x7-5; 19,000 s.h.p.; 34 knots; turbine engines; 3-dmm boilers; three 3-9 in. guns, four 37 mm. A.A., two 13 m.m. A.A.; 4 T.T.

The *Climene* was torpedoed and sunk off Punta Libeccio, Sicilian Channel, by the British submarine *Unshaken* on April 28th, 1943. The vessel carried a complement of about 100.

CLINTONIA

Stag Line; 1907; W. Doxford & Sons; 3,830 tons; 350-1x 50-1x22-4; 292 n.h.p.; 10 knots; triple-expansion engines.

The steamship *Clintonia* was torpedoed and sunk by a submarine 30 miles S.W. by W. of Ushant on August 1st, 1915. The vessel carried a crew of 64, of whom ten were killed. The survivors, including the captain, were picked up by French vessels.

CLINTONIA

Stag Line; 1917; W. Dobson & Co.; 3,106 tons; 331x48x22-2; 249 n.h.p.; triple-expansion engines.

The steamship *Clintonia* was torpedoed and sunk by a German submarine on October 19th, 1940, west of Ireland.

CLIPPER

Ohio river steamboat; 1843; Cincinnati; 174 tons; horizontal tandem engines.

The Ohio river steamboat *Clipper* was a new vessel when her boilers exploded on the lower Mississippi at the beginning of October, 1843. The boilers burst simultaneously while the steamboat was alongside a river landing stage. Bodies of those on board were hurled hundreds of feet into the air and into buildings and streets. Parts of the boilers and machinery crashed through roofs 200 yards distant. The steamboat sank, the loss of life being estimated at over 50 persons.

CLITUNNO

Janua Soc. Anon. Maritt. Industrial; 1894; David J. Dunlop & Co.; 3,844 tons; 332-2x43-1x21-6; 351 n.h.p.; triple-expansion engines.

The Italian tanker *Clitunno* was wrecked on December 30th, 1927, between Cape Shableh and Kaliakra, Black Sea.

CLONLARA

Limerick Steamship Co.; 1926; Caledon S.B. & E. Co.; 1,203 tons; 253-1x37-2x16-6; 239 n.h.p.; 10-5 knots; triple-expansion engines.

The steamship *Clonlara*, Capt. J. Reynolds, was torpedoed and sunk by a submarine about 100 miles W.S.W. of Oporto on August 22nd, 1941. Capt. Reynolds and ten of the crew were killed.

CLYDE

J.C. Ellis; 1874; Macpherson; 562 tons; 152-8x29-2x16-8.

The barque *Clyde*, Capt. E. S. Culmer, was off Snuffle Nose, Horseshoe Bay, near Akaroa, New Zealand, on the night of November 6th, 1884. The weather was thick and there was a heavy sea when, at about 4 a.m., the look-out sighted land on the lee bow. The captain at once tried to go about, but the ship missed stays. Her position now became critical and shortly afterwards she struck the rocks, the seas sweeping her with great violence. Under these conditions she went to pieces rapidly, the mainmast falling soon after she struck.

The *Clyde* carried 19 persons, including the captain's wife and three children. The sole survivor was a young apprentice named Gibson who, after a gallant attempt to save the captain's wife and children, was washed overboard and managed to cling to a deck-house which eventually floated ashore.

CLYDEMARU

Nanyo Kaiun K.K.; 1920; Asano S.B. Co.; 5,497 tons; 400x 53-2x29-4; triple-expansion engines.

The Japanese steamship *Clyde Maru* was torpedoed and sunk by the U.S. submarine *Picuda* on January 29th, 1945, about 50 miles W. of Keelung, Formosa.

COANZA

British & African S.N. Co.; 1880; J. Elder & Co.; 1,518 tons; 290-4x36-2x18; 175 n.h.p.; compound engines.

The British cargo ship *Coanza* was wrecked on February 22nd, 1893, near Sinou on the west coast of Africa. She was on a voyage from Hamburg with a general cargo.

COATH

G. Bazeley & Sons; 1882; Workman, Clark & Co.; 975 tons; 225-6x31x15-6; 188 n.h.p.; compound engines.

The British ship *Coath* sank in the English Channel on December 12th, 1916, with her crew of 16. She is believed to have struck a mine.

COATHAM

English & Co.; 1890; W. Gray & Co.; 1,771 tons; 260-8x36-5x18-2; 148 n.h.p.; triple-expansion engines.

The British cargo ship *Coatham* was sunk in a collision on March 16th, 1898, in 35° S., 55° W., while on a voyage from Colastine to Las Palmas with a cargo of wheat.

COBAN

Black Diamond S.S. Co. of Montreal; 1882; W. Doxford & Sons; 1,063 tons; 230x33-1x16; 141 n.h.p.; compound engines.

The Canadian steamship *Coban* was wrecked on June 19th, 1927, on Partridge Island, Bay of Fundy. She was on a voyage from Sydney, N.S., to St. John, N.B., with a cargo of coal.

COBEQUID

Royal Mail Steam Packet Co.; 1893; Harland & Wolff; 4,791 tons; 400-5x47-2x26-8; 324 n.h.p.; triple-expansion engines.

The British liner *Cobequidwas* wrecked on January 13th, 1914, on Trinity Ledge Rocks, Bay of Fundy. She was on a voyage from Demerara to St. John, N.B., with passengers and a cargo of sugar.

COBRA

British Navy, destroyer; 1901; Armstrong Whitworth & Co.; 350 tons; 210x21x7; 10,000 i.h.p.; 36 knots; turbine engines; one 12 pdr., five 6 pdr.; 2 T.T.

On Tuesday evening, September 17th, 1901, the newly-built destroyer *Cobra*, Lieut. Bosworth Smith, R.N., left Newcastle. She carried a naval navigation party of 54 officers and men and a number of contractor's men, including Mr. Barnard, manager of the Parsons Turbine Co., having in all 79 persons on board. Steam turbines were then in their infancy and everyone on board was interested in the performance of the new vessel. At 4 a.m. on Wednesday the weather had worsened to a full gale, and the ship was beginning to show signs of strain and was rolling heavily.

The destroyers of the *Cobra* class were distinguished by their shallow draught which did not exceed seven feet, they were also very long for such a draught, being 210 feet overall. As a result of this there was a tendency in rough weather for the ship to ride upon bow and stern waves, with the centre almost out of the water, imposing an immense strain upon the midship section. Something of this nature happened to the *Cobra*, for at 7.30 a.m., when off the Outer Dowling Shoal, the destroyer broke in two. From the evidence of survivors it was ascertained that very little shock was felt but the fact that she was breaking amidships was apparent to most of the men as they rushed up from below. They stated that immediately before the disaster the ship was struck by a very heavy sea.

All the boats were swamped with the exception of a small dinghy in which were 12 men. These were picked up later on the morning of September 18th by the P. and O. liner, *Harlington*.

The drowned numbered 67, including Lieut. Bosworth Smith and Messrs. R. Barnard and M. Sandison of the contractor's party. The 12 men in the dinghy were the only survivors.

The *Cobra* was a sister ship to the destroyer *Viper* (which see), also quite new, which broke in two on the Renouquet Rock, off Alderney, on August 3rd, 1901.

COBRA

Hamburg-Amerika Linie; 1926; Vulcan Werke A.G.; 2,132 tons; 270-3x40-1x20-6; turbine engines.

The steamship *Cobra* was taken over by the German navy for use as a minelayer. On August 27th, 1942, she was bombed and sunk by British aircraft at Rotterdam.

COBURG

Norddeutscher Lloyd; 1928; F. Schichau; 7,400 tons; 504 x 61-2x28-7; 2,440n.h.p.; oil engines.

The motorship *Coburg* was acting as supply ship to a German raider in the Indian Ocean. On March 4th, 1941, she was sunk by the British cruiser *Canberra* about 250 miles S.E. of the Seychelles. A considerable number of Norwegians and Chinese, taken from ships sunk by the raider, were rescued by the *Canberra*.

COCHRANE

British Navy, armoured cruiser; 1905; Fairfield Co.; 13,550 tons; 480x73-5x27-5; 23,500 i.h.p.; 23 knots; triple-expansion engines; six 9-2 in. guns, four 7-5 in., twenty four 3 pdr., 4 m.g.

The armoured cruiser *Cochrane*, Capt. James U. Farie, was steaming up the Mersey on November 14th, 1918, in thick weather. She was in charge of a pilot and continued on her course without reducing speed despite the fact that the fog was becoming thicker. The *Cochrane* ran heavily aground and a short while afterwards broke in two. The Admiralty decided that she was not worth the expense of salvage and she was abandoned as a total wreck.

There was no loss of life on board the *Cochrane* which carried a complement of 704.

COCLE

North Atlantic Transport Co.; 1920; Western Pipe & Steel Co.; 5,645 tons; 410-5x54x27-1; 359n.h.p.; triple-expansion engines.

The Panamanian steamship *Code*, on a voyage from the Tyne to New York, was torpedoed and sunk by a German submarine on May 12th, 1942.

CODRINGTON

British Navy, destroyer; 1929; Swan, Hunter & Wigham Richardson; 1,540 tons; 332x33-7x12-2; 39,000s.h.p.; 35 knots; turbine engines; 3-drum boilers; five 4-7 in. guns, two 2 pdr. pom-pom, 5 m.g.; 8 T.T.

The destroyer *Codrington* was bombed and sunk by German aircraft during an attack on Dover on July 27th, 1940. The vessel's normal complement was 185, but it is probable that she was carrying a larger number than this at the time of her loss.

COIMBRA

Standard Transportation Co.; 1937; Howaldtswerke A.G.; 6,768 tons; 422-8x60-4x32-8; 550 n.h.p.; 10-5 knots; compound engines.

The tanker *Coimbra*, Capt. J. P. Barnard, was torpedoed and sunk by a German submarine 100 miles E. of Ambrose lightship on January 15th, 1942. Capt. Barnard and 35 others were killed and six were wounded. The vessel was not in convoy.

COL DI LANA

Nav. Gen. Gerolimich & Co. Soc in Azioni; 1926; Cant. Nav. Triestino; 5,891 tons; 416-8x53-2x24-7; 489 n.h.p.; oil engines.

The Italian motor vessel *Col di Lana* was torpedoed and sunk by British aircraft on February 18th, 1943, 18 miles N.E. of Capo S. Vito, Sicily.

COLAC

Adelaide S.S. Co.; 1884; E. Withy & Co.; 1,480 tons; 245-2X 34-2x17-2; 156 n.h.p.; compound engines.

The Australian cargo ship *Colac* was wrecked on September 17th, 1910, at King Sound, W. Australia. She was carrying a cargo of livestock from Derby, W.A., to Fremantle.

COLBERT

E. Grosos & Fils; 1908; Forg. & Ch. de la Mediterranee; 5,394 tons; 380-3x47-7x15-7; 478n.h.p.; triple-expansion engines.
The French steamship *Colbert* was torpedoed and sunk by a submarine on April 30th, 1917, in the Mediterranean.

COLD HARBOR

U.S. Maritime Commission; 1920; American International S.B. Corp.; 5,010 tons; 390x54-2x27-8; turbine engines.

The steamship *Cold Harbor* was torpedoed and sunk by a German submarine on June 15th, 1942, between Hampton Roads and Trinidad. Nine of her crew were lost.

COLHOUN

United States Navy, destroyer; 1943; United States; 2,050 tons; 376-5x39-3x12-2; 60,000 s.h.p.; 36-5 knots; turbine engines, Babcock & Wilcox boilers; five 5 in. guns, four 40 mm., four 20mm., 10 T.T.

The destroyer *Colhoun* was attacked by Japanese aircraft off Okinawa on April 6th, 1945. The vessel, which carried a complement of over 250, was hit and sunk.

COLIMA

Pacific Mail S.S. Co.; 1873; J. Roach & Son; 2,906 tons; 299-7x40x20-3; 450 h.p.; 10 knots; compound engines.

The *Colima* left San Francisco on May 18th, 1895, for Panama, with 134 persons on board. At about a quarter past eleven on the night of the 27th, when the ship was 50 miles S. of the Mexican port of Manzanillo, the boilers exploded. The ship at once put about and made for the nearest port, but it soon became evident that she was in a sinking condition. The desperate situation was aggravated by a terrible panic among the passengers who had been awakened by the explosion, and by the death of the captain, the chief engineer and the pilot who were killed by a falling mast. A ghastly fight for the boats ensued and in the end only a very few persons managed to escape.

Only 19 persons were saved of her total complement of 192 passengers and crew.

COLLAMER

U.S. Maritime Commission; 1920; American International S.B. Corp.; 5,112 tons; 390x54-2x27-8; turbine engines.

The steamship *Collamer*, on a voyage from Halifax to the Clyde, was torpedoed and sunk by a German submarine on March 5th, 1942, with the loss of seven lives.

COLLINGHAM

E. Morgan & Co.; 1889; R. Dixon & Co.; 2,405 tons; 295x 38-2x20-1; 237n.h.p.; triple-expansion engines.

The British cargo ship *Collingham* foundered on January 24th, 1906, near Vigo. She was sailing from Alexandria to Sharpness with a cargo of cotton seed.

COLLINGSWORTH

U.S. Maritime Commission; 1920; American International S.B. Corp.; 5,101 tons; 390x54-2x27-8; turbine engines.

The steamship *Collingsworth*, on a voyage from Trinidad to Rio de Janeiro, was torpedoed and sunk by a German submarine on January 9th, 1943. The captain and ten others were lost.

COLMAR

German Government; 1932; States S.B. Yard "Marti"; 3,946 tons; 347-6x51-6x24-9; oil engines.

The motorship *Co/mar* was formerly the Russian *Volgoles*, seized by the Germans. On August 19th, 1944, she was sunk off North Norway with the loss of all on board.

COLOMBIA

Pacific Steam Navigation Co.; 1899; Caird & Co.; 3,335 tons; 359-5x43-2x19-5; 324n.h.p.; triple-expansion engines.

The British ship *Colombia* was wrecked on August 9th, 1907, on Saenze Point, Lobos Island. She was on a voyage from Payta to Eten with a general cargo and specie.

COLOMBIA

Koninkl. Nederlandsche Stoomb. Maats.; 1930; Van Smit; 10,782 tons; 429-5x61-7x36; 1,456n.h.p.; 15-5 knots; oil engines.

The Dutch motor vessel *Colombia* was taken over by the Dutch Admiralty in the Second World War for service as a submarine depot ship. On February 27th, 1942, when on passage from East London to Simonstown she was torpedoed off the latter port by the German submarine *U-516*, and sank with the loss of eight lives.

COLOMBO

Watts, Ward & Co.; 1,871; C. Mitchell & Co.; 1,902 tons; 280-3x35x25-6; 200 h.p.; compound inverted engines.

The British cargo ship *Colombo* was wrecked on July 9th, 1885, on Scatterie Island, C.B. She was on a voyage from Bull River, S.Ca. to Dublin with a cargo of phosphate rock.

COL. BOWIE

COL. BOWIE

Gulf Export & Transportation Co.; 1918; Clooney Construction & Towing Co.; 1,363 tons; 196-5x42-1x17-2; 66n.h.p.; compound engines.

The American steamship *Col. Bowie* foundered during heavy weather on April 11th, 1921, near Tampico. Nineteen of her crew of 22 were lost.

COLONIAN

F. Leyland & Co.; 1901; Hawthorn, Leslie & Co.; 6,440 tons; 450-5x54-2x30-6; 552 n.h.p.; triple-expansion engines.

The British cargo ship *Colonian* was wrecked on May 21st, 1917, on the North Bishop Rocks. She was on a voyage from Boston to London.

COLORADAN

American-Hawaiian Steamship Co.; 1920; Osaka Iron Works; 6,557 tons; 414-7X 55-7X 31-9; 4,000 i.h.p.; 12 knots; triple-expansion engines.

The *Coloradan*, Capt. R. H. Murphy, was torpedoed and sunk by a submarine about 250 miles W. of the Cape of Good Hope on October 9th, 1942. The vessel was not in convoy at the time of the sinking. Six men were lost with the ship. The remainder were picked up by the Dutch liner *Zaandam* and 11 of them died when that ship was sunk.

COLORADO

Guion; 1868; Palmer & Co.; 2,927 tons; 330x43x—; 10 knots; inverted engine.

The liner *Colorado* belonged to that most unfortunate of transatlantic shipping companies, the Guion Line, so many of whose ships came to grief during the latter half of the 19th century.

The ship was employed on the run from Liverpool to New York and her career was very short. On February 2nd, 1872, four years after coming into service, she was in collision with the steamship *Arabian* in the River Mersey and sank with the loss of six lives.

COLUMBIA

Cunard Line; 1840; Robert Steele; 1,138 tons; 207x34-2x 22-5; 425 n.h.p.; 8-5 knots; side-lever engines; paddles 28-5 ft. diam.

The *Columbia* was one of the four original ships with which Samuel Cunard commenced his famous line in 1840, the others being the *Acadia*, *Britannia* and *Caledonia*. In company with Mr. George Burns of Glasgow and Mr. David MacIver of Liverpool, Mr. Cunard entered into an agreement with the British government to run a mail steamship service between Liverpool, Halifax and Boston in return for an annual subsidy of £81,000. The service was to be fortnightly in summer and monthly in winter. This line was at first known as the British and North American Royal Mail Steam Packet Co., a cumbersome title which was soon dropped in favour of the more simple Cunard Steamship Co. With the signing of this contract the actual beginning of a regular transatlantic service, carried on by many companies on both continents, and which came to be known as the 'Atlantic Ferry', may be held to have commenced.

The first casualty suffered by the new line was the *Columbia*, which was wrecked in a fog off Cape Sable on July 1st, 1843. There was no loss of life and all the mails and a large part of the passengers' personal luggage was brought to shore.

COLUMBIA MARU

Mitsubishi Shoji Kaisha; 1927; Mitsubishi Zosen Kaisha; 5,618 tons; 405x55x32; 582n.h.p.; oilengines

The Japanese motor vessel *Columbia Mam* was torpedoed and sunk by the U.S. submarine *Gato* on November 30th, 1943, 250 miles N. of the Admiralty Islands.

COLUMBIAN

F. Leyland & Co.; 1890; Harland & Wolff; 5,088 tons; 442-6x 45-2x31; 433 n.h.p.; 11-5 knots; triple-expansion engines.

The *Columbian* left Antwerp on April 23rd, 1914, with a crew of 49, the ship being under the command of Capt. John Macdonald. She was chartered to the Atlantic Transport Co. who had lent her to the Phoenix Line for the voyage. Her cargo was a highly inflammable

one, consigned by Steinmann & Co., of Antwerp, to Boston, U.S.A., and consisted, among other things, of barium peroxide, matches, carbolic acid and naphthaline oil. At just before midnight on May 3rd, the ship being 150 miles S. of Sable Island, smoke was seen coming from No. 1 hatch. The weather, which had been worsening for the past 24 hours, had now risen to gale force with some snow.

The ship rolling heavily was put before the wind, an S.O.S. sent out immediately, and the crew ordered to fire-stations. The Leyland ship *Winifredian* which was known to be within a few hours steaming was also asked to stand by. Shortly afterwards there was an explosion, the deck blew up, two boats and the wireless cabin and aerial were destroyed, and the ship enveloped in dense smoke and flame. Five men were killed outright and all the lights were extinguished. Under these conditions there was no other course for Capt. Macdonald than to order 'abandon ship'. This was done with the loss of only one man who was washed overboard. The boats were ordered to keep in sight of the burning *Columbian* for as long as possible.

The message sent to the *Winifredian* was never received by that vessel, but the *Seydlitz*, picked up the S.O.S. and radioed it to the steamers *Sachem*, *Franconia*, *Manhattan*, *Olympic* and *Brandenburg*, all of which hurried to the rescue. Meanwhile the lifeboats had become separated. Two were picked up, but the third under the first officer, Mr. Robert Tjere, drifted for 14 days before it was sighted. During this time its occupants died one by one from exposure and starvation, until only the first officer and three men survived out of the original 14 who had left the *Columbian*. This party, when almost at their last gasp, were picked up by the U.S. revenue-cutter *Seneca*. The total number killed, died or drowned was 18.

At the Board of Trade Inquiry the Court expressed the opinion that the outbreak was probably due to an escape of barium peroxide.

COLUMBINE

Union Government of South Africa; 1921; Submarine Boat Corp.; 3,268 tons; 324X46-2x25; 386n.h.p.; turbine engines.

The steamship *Columbine* was torpedoed and sunk by a German submarine on June 16th, 1944, off Saldanha Bay. Twenty-three persons were killed on board, and an army officer and his wife died in one of the ship's boats.

COLUMBUS

Norddeutscher Lloyd; 1923; J. Schichau; 32,581 tons; 749-6X 83-1x49-1; turbine engines.

This German liner was scuttled to avoid capture on December 19th, 1939, 420 miles S.E. of New York, having left Vera Cruz for Oslo.

COMANCHE

Clyde Steamship Co.; 1895; W. Cramp & Sons; 3,856 tons; 348-5x46x18-9; 3,100 i.h.p.; 13 knots; quadruple-expansion engines.

The *Comanche*, running on the Florida—New York service, caught fire and was destroyed late on October 17th, 1925. The ship had a total of 166 persons on board, of whom 66 were passengers, and carried a cargo of resin. She had not long left Jacksonville when the fire was discovered, and the prevalence of rough weather made the task of fighting it extremely difficult. After about three hours the vessel was burned out and had to be abandoned. Fortunately the oil tanker *Reaper* and the pilot boat *Mota* came on the scene in time to rescue most of the passengers, but one lifeboat capsized in the heavy seas and seven men and three women—all passengers—were drowned.

The position of the liner at the time of the disaster was six miles off Mayport, to which place all the survivors were taken. It was established later that the cause of the fire was the spontaneous combustion of the resin in the fore hold.

COMANDANTE BAFILE

Peninsulare Soc. Italiana di Cabotaggio; 1921; G. Ansaldo & Co. S.A.; 1,790 tons; 273-6x43-5x18; 81 n.h.p.; triple-expansion engines.

The Italian steamship *Comandante Bafile* was wrecked in a storm near Cape Comino, Sardinia, on September 3rd, 1941.

COMAYAGUA

Empresa Hondurena de Vapores; 1921; Newburgh Shipyard Inc.; 2,494 tons; 301-3x42-3x22-7; 492n.h.p.; triple-expansion engines.

The Honduran steamship *Comayagua*, on a voyage from Mobile to Puerto Barrios, was torpedoed and sunk by a German submarine on May 14th, 1942, 14 miles W. of Grand Cayman. Six of her crew were killed.

COMBINED I

Combined Nav. Co. (Panama); 1948; Ardrossan Dockyard; 1,722 tons; 279-4x43-2x —; oil engines.

The Panamanian motorship *Combined I* sprang a leak and sank during a storm on December 7th, 1961, near Ladd Reef, 650 miles S.W. of Manila. Twenty-eight of her crew of 34 were lost.

COMET

Henry Bell; 1812; John Wood, Port Glasgow; 25 tons; 43 -5 X 11-4x5-7; 4 n.h.p.; 6 knots; single upright cylinder engine, half side levers.

The steamship *Comet* was the invention of Henry Bell, a Scotsman, who had, in common with William Symington and Patrick Miller in Scotland and Robert Fulton in the United States, foreseen the importance and commercial value of the steam-driven vessel. In 1812 Bell placed his invention in service on the Clyde as a passenger-carrying steamship with a speed of six knots under favourable circumstances. In 1819 the *Comet* was lengthened by 20 feet and fitted with more powerful engines. She had by that time seen service on the Clyde, the west coast of Scotland as far as Oban; the Crinan Canal and the Firth of Forth. In her reconstructed state she was intended to ply once more on the Forth and ultimately to try her fortune on the Thames. Before this came about, however, she was wrecked on the west coast between Fort William and Glasgow. On December 13th, 1820, she was swept by the tide-race, against which her feeble engines were of no avail, on to the Doris-Mhor where she broke in two at the place where she had been lengthened. The after portion was swept away but the forward portion on which the passengers and crew, including Henry Bell, had gathered remained firm on the rocks and everyone was able to reach the shore without difficulty.

Thus ended the career of the first passenger steamship.

In appearance the *Comet* differed from any other steamship in that she had a yard across the funnel (which was thin and tall) from which depended a large square sail intended to supplement her engine-power. This idea was not developed in succeeding steamcraft.

COMET

Henry Bell; 1821; James Lang, Dumbarton; 94 tons; 105 X — X —; 25 n.h.p.; 12 knots; D. Me Arthur's engines.

The small passenger steamship *Comet* was owned by Henry Bell, one of the pioneers of the steam-driven vessel, and was the second of that name to be owned by him. At 6 a.m. on October 18th, 1825, under command of Capt. MacInnes, the steamship left Inverness for Glasgow via the Caledonian Canal. She carried about 60 passengers besides crew, and on the first day proceeded to Fort William, where those on board disembarked for the night. On the following day she terminated her run at Crinan, leaving at six on the next morning, the 20th, for the last lap of her voyage to Glasgow. Unfortunately she lost the tide at Lochgilphead and had to wait until 6 p.m. to cross the bar, which meant a night trip to Greenock. Another delay was occasioned by the request of some English passengers to be put ashore at Rothesay. The captain acceded to this request, but with some reluctance, and the steamer then proceeded. At 2 a.m. when off Kempoch Point, steaming without lights and with jib-sail set in such a manner as to obscure the view of the one man on lookout, the *Comet* suddenly descried the steamship *Ayr* dead ahead. Both vessels met bow to bow and the *Comet* was heavily damaged and received another blow on the port paddle box when the vessels came together a second time.

The passengers, most of whom were asleep below, came on deck to find their vessel sinking beneath them. Great confusion prevailed on both steamers and the *Ayr* did not launch her boat immediately. When she did her engines started at the same moment and nearly swamped the boat. Capt. McClelland of the *Ayr* was over-anxious about the safety of his own ship and in the excitement of the moment, steamed over the spot where the *Comet* had foundered and

then turned about for Greenock, leaving the unfortunate people in the water to drown.

The *Comet* sank by the head in 18 fathoms at a distance of 165 yards from the shore. Capt. MacInnes launched the yawl but the tackle fouled and 26 persons were thrown into the sea. Later, boats from Gourrock came on the scene, but too late to rescue more than a few survivors.

The disaster involved the loss of some 70 lives.

It was established upon inquiry that the *Ayr*, which was a cargo steamship, had lights burning and was maintaining a good lookout.

COMET

British Navy, destroyer; 1910; Fair field Co.; 747 tons; 246-5 X 25-3x8-7; 13,500 i.h.p.; 27 knots; turbine engines; Yarrow boilers; two 4 in. guns, two 12pdr., one 3 pdr. A.A., 1 m.g., 2 T.T. The destroyer *Comet* was torpedoed and sunk by a submarine in the Mediterranean on August 6th, 1918. Her official complement was 72.

COMETA

Del Bergenske Dampskibsselskab; 1921; Burmeister & Wain; 3,794 tons; 367-3x51-5x22-3; 629 n.h.p.; oil engines. The Norwegian motor vessel *Cometa* was torpedoed and sunk by a German submarine on March 26th, 1940, outside Kirkwall.

COMMANDER

T. & J. Harrison; 1877; Barrow S.B. Co.; 1,580 tons; 265-1 x 32x23-8; 150 h.p.; compound inverted engines. The British cargo ship *Commander* was wrecked on June 15th, 1884, at San Antonio, Brazil. She was on a voyage from Maceio to Liverpool with a cargo of sugar and cotton.

COMMERCE

Emigrant ship; 1840 (circa); 300 tons (approx.). The emigrant ship *Commerce* left Galway in the spring of 1848 for St. John, New Brunswick, with about 70 Irish families on board, the whole totalling some 180 persons including crew. The ship crossed the Atlantic under normal conditions for those times but when off the coast of Nova Scotia met with foul weather. On May 24th she was driven ashore but remained upright with her deck beyond the reach of the seas for about an hour. During this time the boats were launched and parties of people were ferried to land in safety, but the rising tide brought the seas across the deck with such violence that the ship slipped off the rocks and sank, while several of the boats were smashed.

The drowned numbered over 100, there being between 70 and 80 people saved by the boats.

COMMERCIAL TRADER

Moore-McCormack Lines; 1920; Detroit S.B. Co.; 2,606 tons; 251 -0x43-6x26-1; 352 n.h.p.; triple-expansion engines. The American steamship *Commercial Trader*, on a voyage from Ceara to Trinidad, was torpedoed and sunk by a German submarine on September 16th, 1942, about 100 miles E. of Trinidad. Nine of her crew were killed.

COMMISSAIRE RAMEL

Messageries Maritimes; 1920; Societe Provencale de Construction Navale; 10,061 tons; 478-8x59-2x33-4; 5,000 i.h.p.; 12 • 5 knots; triple-expansion engines & L.P. turbine. The French liner *Commissaire Ramel* came under the British flag after the capitulation of France in June, 1940. On September 19th, 1940, she was intercepted and sunk by a German raider about 900 miles S.E. of Mauritius.

COMMONWEALTH

Commonwealth Steamship Co.; 1896; Furness, Withy & Co.; 3,353 tons; 330x45-1x18-7; 260 n.h.p.; 8-5 knots; triple-expansion engines. The steamship *Commonwealth* was torpedoed and sunk by a submarine five miles N.E. of Flamborough Head on February 19th, 1918. Fourteen men were killed. The captain was among the survivors.

COMORIN

Peninsular & Oriental Steam Navigation Co.; 1925; Barclay, Curie & Co.; 15,116 tons; 523-5x70-2x42-3; 13,000 i.h.p.; 17 knots; quadruple-expansion engines & L.P. turbine.

The *Comorin* was serving as an auxiliary cruiser when she caught fire in mid-Atlantic on April 6th, 1941. Help was immediately forthcoming from several British destroyers in the vicinity, one of which, the *Lincoln*, drifted rafts and floats down to the blazing vessel.

COMPTON

William Milburn & Co.; 1878; W. Richardson & Co.; 1,804 tons; 280x34-7x24-4; 200 h.p.; compound inverted engines.

The British cargo ship *Compton* foundered on June 11th, 1886, in Balabao Straits, Borneo. She was on a voyage from Singapore to Yloilo.

COMTE DE SMET DE NAEYER

Association Maritime Beige S.A.; 1904; Grangemouth & Greenock Dockyard Co.; 1,863 tons net; 267 x41-1x23-6.

During the fitting out of the *Comte de Smet de Naeyer* in the James Watt Dock she gradually slipped over on to her beam ends and sank. Before her departure from Belgium, experts in that country expressed grave doubts as to her seaworthiness, an opinion in which the captain was said to have concurred.

She left Antwerp on April 11th, 1906, for Port Natal. The ship carried nine officers and instructors, 30 cadets and 15 crew. Capt. A. Fourcault, a former master in the Dover-Ostend service, was in command and his first officer was Baron Van Zuylen. On April 18th the vessel was off Ushant in very bad weather when she sprang a leak. After labouring heavily for some hours the ship foundered at 7.30 a.m. on the 19th. Only one boat got away with 26 survivors and this was picked up by the French barque *Dunkerque*.

The number drowned was 34, including Capt. Fourcault and 18 cadets.

COMTESSE DE FLANDRE

Belgian Government; 1870; John Cockerill & Co.; Antwerp; 419 tons; 200x24-8x7-3; 1,550i.h.p.; 16 knots; oscillating engines.

The iron paddle steamship *Comtesse de Flandre* left Ostend at 10.15 on the morning of Friday, March 29th, 1889, with 23 passengers and 24 crew, bound for Dover. There was no wind and the sea was calm but there was a dense fog, and the steamship with lights burning was sounding her siren at regular periods. At 1.20 p.m. the ship was between Ruytingen and Dunkirk when she encountered the Grave-lines smack *No. 267*. In endeavouring to clear this boat she came into collision with the mail steamship *Princesse Henriette*, which was coming from Dover and had also altered course to avoid the fishing smack. The *Comtesse de Flandre* was struck obliquely on the starboard side, immediately abaft the paddle-box, and cut almost in two. The inrush of water caused the boilers to explode, and within a few minutes the forepart of the vessel with the heavy engines sank, taking down the captain and many of the crew. In addition the first officer, M. Vermeulen, and those of the crew below were also drowned, while several were killed by the explosion.

Prince Jerome Bonaparte, who was among the passengers, was saved with his aide-de-camp. The *Comtesse de Flandre* managed to lower one of her four boats and the *Princesse Henriette* lowered hers and between them 32 persons were saved.

The drowned numbered 15, of whom 11 were crew, and there were many injured by the explosion.

The *Princesse Henriette* endeavoured to tow the after part of the *Comtesse de Flandre* to Ostend, being relieved later by the Ostend tug-boat. When some few hundred yards outside the harbour the wreck sank in deep water, but without further loss of life.

CONARGO

Commonwealth of Australia; 1902; Flensburger Schiffsb. Ges.; 4,312 tons; 375x47-9x17-1; 471 n.h.p.; 10 knots; triple-expansion engines.

The steamship *Conargo* was an ex-German vessel taken over by the Commonwealth of Australia during the First World War. On March 31st, 1918, when 12 miles W. by N. of the Calf of Man she was torpedoed and sunk by a German submarine. Nine men were killed. The captain was among the survivors.

CONCETTINA

A.Zapald; 1888; J. Readhead & Co.; 1,271 tons; 230x33-5X 16-5; 124 n.h.p.; triple-expansion engines.

The Italian steamship *Concettina* hit a mine and sank in the Mediterranean on June 8th, 1918.

CONCH

Shell Transport & Trading Co.; 1892; W. Gray & Co.; 3,555 tons; 338-4x43x26-4; 324 n.h.p.; triple-expansion engines.

The British tanker *Conch* was wrecked on June 3rd, 1903, on Akarata Rock, Ceylon. She was on a voyage from Novorossisk and Colombo to the Madras coast.

CONCH

Anglo-Saxon Petroleum Co.; 1909; Swan, Hunter & Wigham Richardson; 5,620 tons; 400x51-3x29-5; 448n.h.p.; 11 knots; triple-expansion engines.

The tanker *Conch* was torpedoed and sunk by a submarine 12 miles S. by W. of Anvil Point on December 7th, 1916. The captain and 27 others were killed.

CONCORDIA

Donaldson Bros.; 1917; Greenock & Grangemouth Dockyard Co.; 5,391 tons; 410-2x53-5x28-4; 485 n.h.p.; triple-expansion engines.

The British steamer *Concordia* collided with the *Black Eagle* during foggy weather and sank on March 5th, 1934. She was about 40 miles south-east of Sable Island on a voyage from St. John, N.B. to the Clyde, carrying a cargo of grain and a small consignment of cattle.

CONDE DE ABASOLO

Compania Naviera Vascongada; 1918; Tyne Iron S.B. Co.; 3,122 tons; 331-4x46-8x23-1; 430 n.h.p.; triple-expansion engines.

The Spanish steamer *Conde de Abasolo* was torpedoed and sunk by an Italian submarine on August 13th, 1937, off Malta, during the Spanish Civil War.

CONDOR

Cork S.S.Co.; 1881; Dobie & Co.; 1,105 tons; 230x31x16-5; 136 h.p.; compound inverted engines.

The Irish cargo ship *Condor* was wrecked on November 18th, 1883, near Ymuiden while on a voyage from Liverpool to Amsterdam.

CONDOR

British Navy, sloop; 1898; Sheerness Dockyard; 980 tons; 180x32-5x11-5; 1,400 i.h.p.; 13-2 knots; triple-expansion engines; Belleville boilers; four 4 in. guns, four 3pr.

The *Condor*, Cdr. Clifton Sclater, was a sloop-of-war, rigged as a three-masted topsail schooner, employed as a cruising vessel along the western coast of Canada and part of the Southern Pacific. On December 2nd, 1901, she left Esquimalt Harbour, Vancouver Island, bound for Honolulu, which was 2,339 miles distant, and thence to cruise among the South Sea Islands. From the day of leaving port no news of the vessel was ever received. It was assumed that when about 50 to 100 miles out *Condor* encountered a hurricane and foundered with all hands. The somewhat antiquated design of the ship, with heavy bulwarks, masts and spars reduced her seaworthiness; a further handicap being the lack of a full complement. This should have been 130, but at the time of the disaster *Condor* carried 103, of whom three were officers, one officer having been put ashore sick.

A search conducted by H.M.S. *Phaeton* along the course *Condor* should have followed, failed to reveal any traces of the missing vessel. U.S. revenue cutters also searched, but without success beyond a few pieces of wreckage identified as belonging to the ship.

CONDOR

West Russian S.S. Co.; 1904; Swan, Hunter & Wigham Richardson; 3,562 tons; 340-5x47x24-6; 314 n.h.p.; triple-expansion engines.

The Russian steamship *Condor* was sunk by a German submarine in the Atlantic on April 28th, 1917.

CONDOR

India General Navigation & Railway Co.; 1897; 423 tons. The British river steamer *Condor* capsized and sank during a storm one mile from Nagorbari on the river Jamuna, Eastern Bengal, on April 27th, 1930. She had left Benanai for Nagorbari earlier that day. Approximately 100 lives were lost.

CONDYLIS

G. N. Condylis; 1914; *Antwerp Eng. Co.*; 4,439 tons; 400X 51-8x24-7; 480 n.h.p.; triple-expansion engines. The Greek steamship *Condylis*, on a voyage from Sydney, N.S., to London, was torpedoed and sunk by a German submarine on August 10th, 1942, with the loss of nine lives.

CONEHATTA

American Scantic Line; 1920; *American International Corp.*; 4,974 tons; 390x54-2x27-8; turbine engines. The steamer *Conehatta*, on a voyage from Leningrad to Hornefors, ran ashore at Storbadan, near Holmsund, on November 7th, 1929. She subsequently slipped off and sank in deep water.

CONFENZA

Italian Navy, destroyer; 1920; *Orlando*; 862 tons; 256-5x 24-7x8-5; 22,000s.h.p.; 32knots; turbine engines; Thornv-croft boilers; four 4 in. guns, two 3 in. A.A.; 4 T.T. The Italian destroyer *Confenza* was sunk in collision with the naval auxiliary vessel *Capitano Cecchi* off Capo Gallo, Brindisi, on November 20th, 1940. The vessel carried a complement of about 120.

CONGELLA

Bank Line (Andrew Weir & Co.); 1914; *Blohm & Voss*; 4,533 tons; 399-3x52-8x24-3; 545n.h.p.; 12 knots; oilengines. The motorship *Congella* was torpedoed by a German submarine on October 24th, 1943, and sunk by gunfire, near the Addu Atoll.

CONGO

G. H. Wills & Co.; 1881; *J.Laing*; 2,120 tons; 289-5x36x20; 160hp; compound engines. The British ship *Congo* was wrecked on July 31st, 1895, at Teriberka in the White Sea. She was on a voyage from Antwerp to Archangel.

CONGONIAN

United Africa Co.; 1936; *Howaldtswerke A.G.*; 5,065 tons; 399-8x55-2x26-8; 321 n.h.p.; oil engines. The motorship *Congonian* was torpedoed and sunk by a German submarine on November 18th, 1940, on a voyage from Liverpool to Freetown.

CONGRESS

United States Navy, frigate, sail; 1841; *U.S. Navy Dept.*, *Kittery, Me.*; 1,869 tons; 179x47-9x22-9; ten 8 in. m.l guns, forty 32 pdr. The United States frigate *Congress* was a unit of a squadron blockading Hampton Roads during the American Civil War. The vessel was a wooden sailing frigate of 50 guns, and on March 8th, 1862, she was lying at anchor off Newport News in company with the sloop-of-war *Cumberland* of 24 guns. The crews of both ships were standing easy just after dinner, no action by the enemy being anticipated, when the Confederate ironclad ram *Merrimac* steamed down upon them. There was scarcely time for the Federal ships to clear for action before the battle commenced, and there was no time to weigh anchor.

It was the first occasion that an ironclad had fought in battle, and it gave a terrible demonstration of its power to overcome wooden warships, however well manned and armed. The only hope for the Federals would have been to have hoisted sail and got under way as the *Merrimac* was slow and unhandy and drew 22 feet of water, but the suddenness of the attack prevented this course from being followed.

After exchanging one or two broadsides with the *Congress*, the *Merrimac* turned her attention to the *Cumberland*, which she rammed and sank. Meanwhile the tug *Zouave* took the *Congress* in tow for shallow water. Unfortunately the frigate grounded, lying in such a position that only a few of her guns could be brought to bear. In this

hapless plight she continued the action for nearly an hour, by which time her commander, Lt. Smith, and a large number of her crew had been wounded, and many killed. The situation growing worse with every minute, there was nothing left but to haul down her colours and hoist a flag of truce.

Capt. Franklin Buchanan, commander of the ironclad, now sent in his gun-boats to take off the prisoners, but these were fired on by the Federal shore batteries and they withdrew. Capt. Buchanan then commenced to fire with red-hot shot, which set the *Congress* on fire. She continued to burn until between one and two on the morning of March 9th, when she blew up.

The losses to the Federals were two ships and 257 officers and men killed and wounded. The Confederate ship lost 21 officers and men, chiefly due to a shot from the *Cumberland* entering one of her gun ports; she sustained little material damage.

The *Congress* was raised, repaired and sold out of the navy after the war.

The full story of the battle is told under the U.S.S. *Cumberland*.

CONINGBEG

Clyde Shipping Co.; 1904; *Ailsa Shipbuilding Co.*; 1,279 tons; 270-6x36-1x16-6; 469n.h.p.; 14 knots; triple-expansion engines. The steamer *Coningbegsank* in the Irish Sea on, or about, December 18th, 1917. The captain and 14 men were lost. The cause of the sinking is unknown, but it is possible that the ship was torpedoed by a German submarine.

CONINGSBY

Gladstone & Cornforth; 1881; *W. Gray & Co.*; 1,685 tons; 258-1x34-6x19-5; 150 h.p.; compound engines. The British ship *Coningsby* was wrecked on July 7th, 1891, near Cheduba, Aracan, on a voyage from Marseilles to Akyab,

CONISCLIFFE

James Westoll; 1901; *Short Bros.*; 3,924 tons; 355x48-1x25-8; 365 n.h.p.; triple-expansion engines. The British cargo ship *Coniscliffe* was wrecked on March 21st, 1912, at Serpent Island near Sulina. She was on a voyage from Port Said to Odessa.

CONNAUGHT

Galway Line; 1860; *Palmer*; 2,800 tons; 360x40x32; 2,300 i.h.p.; 13 knots; oscillating engines. The paddle steamer *Connaught* was the first ship of the Galway Line. On her second voyage she left Galway on September 25th, 1860, and called at St. John's, N.F.L., on October 3rd, leaving again for Boston with a total of 591 persons on board under command of Capt. Leitch. When two days out the ship sprang a leak and developed a heavy list to port. Various expedients were tried to right her, including blowing off one boiler and filling her starboard lifeboats with water, but this only caused the list to change from port to starboard. On the morning of Sunday, the 7th, the ship caught fire owing to the funnel becoming overheated and igniting the lagging over the boiler. At about the same time as this occurred the water entered the engine room and she became helpless. The saloons were soon enveloped in flame and had it not been for the timely arrival of the American brigantine *Minnie Schiffer*, 198 tons, there must have been a dreadful death-roll.

The brigantine managed to take off every person in safety and with 602 persons on board, including her own crew of 11, she reached Scituate. The *Connaught* was abandoned 16 hours after the first discovery of the fire and when last seen was ablaze from stem to stern. Two mail bags, 40 tons of cargo and £10,000 in specie went down with the ship. Her position when the fire was discovered was 170 miles from Boston.

CONNECTICUT

The Texas Co.; 1938; *Bethlehem S.B. Corp.*; 8,684 tons; 468-1x65-3x34-1; 880 n.h.p.; turbine engines. The American tanker *Connecticut*, on a voyage from Port Arthur to Table Bay, was sunk by a German raider on April 22nd, 1942, in mid-South Atlantic. An unspecified number of survivors were picked up by the raider and taken to France.

CONNEMARA

London & North Western Railway Co.; 1897; W. Denny & Bros.; 833 tons; 272-5x35-1x14-2; 212n.h.p.; 16 knots; triple-expansion engines.

The *Connemara*, Capt. G. H. Doeg, was employed on the run between Holyhead and Greenore. On the evening of November 3rd, 1916, in the teeth of a fierce gale the steamer left Greenore with 55 passengers and 31 crew. In crossing Carlingford Bar she ran into heavy seas flowing on a strong ebb tide and was swept across the bows of the s.s. *Retriever*, 459 tons, Capt. P. O'Neill. This ship, which belonged to the Clanrye S.S. Co. of Newry, was already in difficulties as her cargo of coal had shifted soon after she left Garston and had made her almost unmanageable. There was no time in which to take avoiding action and the *Connemara's* port side crashed on to the bows of the *Retriever* and then tore away. In five minutes the *Connemara* had sunk with all on board.

The *Retriever* managed to keep afloat for about a quarter-of-an-hour, after which she also sank with all her crew save one man. This man, James Boyle, was an eye-witness of the collision and testified to the helplessness of both captains to avoid it. The state of the sea prevented the launching of any boats and he had been saved when the boat which he, with other members of the crew, was trying to launch was swept overboard with himself as the only occupant.

The total loss of life was 94 persons, of whom eight were the crew of the *Retriever*.

CONQUEROR

Wigram, Green & Co.; 1835 (circa); 800 tons (approx.).

The East Indiaman *Conqueror* left India in the autumn of 1842, under command of Capt. Duggan. She reached Cape Town in November and sailed from Table Bay on the 13th of that month. The ship had a most unlucky voyage, two young men being drowned at Calcutta before she sailed and four other men dying at sea. At the time of her loss the ship carried 17 passengers, nine soldiers of the 91st Regt. invalided home from St. Helena and a crew of 52. She experienced fair weather in the English Channel and passed a letter to another ship on January 12th, 1843. This letter afterwards provided the details of the loss of the passengers and crew during the homeward voyage.

On the 13th the weather changed for the worse and the *Conqueror* got into difficulties when off the French coast near Boulogne. At about 10.30 p.m. she ran aground at a spot not far from where the East Indiaman *Reliance* (which see) had been wrecked the previous year. The gale was of extreme violence and the ship went to pieces immediately and sank with the loss of 77 lives, only one member of the crew, a ship's boy, being saved.

CONQUEROR

British Navy, Hne-of-battleship; 1855; Devonport Dockyard; 3,265 tons; 240x55-5x24-5; 800 h.p.; 10 knots; steam engines; 99 guns.

The screw line-of-hattleship *Conqueror*, Capt. E. S. Sotheby, C.B., was steaming from Port Royal, Jamaica, to Bermuda, when she was stranded on Rum Cay, the Bahamas, on December 12th, 1861, and became a total wreck. Fortunately there was no loss of life and officers and crew went ashore and set up canvas shelters in which they lived until they were taken off by a rescue ship.

CONSETT

William Milburn & Co.; 1872; Mitchell; 1,727 tons; 259-5X 34x18-8; 170 h.p.; compound inverted engines.

The British cargo ship *Consett* was wrecked on May 7th, 1880, on the Maldiv Islands. She was sailing from Bassein to Port Said with a cargo of rice.

CONSTANCE

George Pyman & Co.; 1874; Turnbull; 1,010 tons; 224x30x17; 99 h.p.; compound inverted engines.

The British ship *Constance* foundered on February 9th, 1880, in 49° N., 6° W. She was on a voyage from Cardiff to Malta with a cargo of coal.

CONSTANCE

Cie. Auxiliaire de Navigation; 1912; At el. & Ch. de la Loire; 2,468 tons; 285-5x43-3x20-2; 148n.h.p.; triple-expansion engines.

The French steamship *Constance* was torpedoed and sunk by a submarine in the Mediterranean on August 23rd, 1917.

CONSTANCE CRAIG

Ship Constance Craig Co.; 1893; W. Pickersgill & Sons; 527 tons; 172x30-1x13-5.

The steel barque *Constance Craig*, Capt. F. Morrison, left Gisborne, New Zealand, for Hokianga with sand ballast on 15th July, 1907. She was sighted on the 27th about ten miles from Hokianga Heads in a south-easterly gale. This was the last occasion on which she was seen.

In the middle of August reports from ships and shore stations began to come in, stating that wreckage bearing her name had been found. Her crew numbered 12 all told.

CONSTANTINOS EMBIRICOS

A.Embiricos; 1903; Short Bros.; 2,611 tons; 320-4x44-9x 20-9; 278n.h.p.; triple-expansion engines.

The Greek steamship *Constantinos Embiricos* was torpedoed and sunk by a submarine in the Mediterranean on October 4th, 1917.

CONSTANTINOS PATERAS

C. Pateras & Sons & C. Lemos; 1899; A. Rodger & Co.; 2,730 tons; 320-2x46-1x21-2; 251 n.h.p.; triple-expansion engines.

The steamship *Constantinos Pateras*, on a voyage from Sfax to Antwerp with phosphate, was wrecked in heavy weather at Carrumiro Chico, near Corcubion, on May 9th, 1922.

CONSUL

R. Gordon & Co.; 1878; J. L. Thompson & Sons; 1,306 tons; 239-5 X 32-4 X 17-8; 130h.p.; compound inverted engines.

The British cargo ship *Consul* was wrecked on November 17th, 1887, in the Sea of Marmora while on a voyage from Braila to Gibraltar with a cargo of rye.

CONSUL HORN

H.C.Horn; 1904; Harland & Wolff; 8,384 tons; 453-8x56-4x 30-5; 808 n.h.p.; quadruple-expansion engines.

The German steamship *Consul Horn* struck a mine and sank on July 20th, 1942, N.E. of Borkum.

CONSUL POPPE

J.M.K.Blumenthal; 1904; Nuscke & Co.; 1,412 tons; 239 X 36-8x16-1; 104n.h.p.; triple-expansion engines.

The German steamship *Consul Poppe* was bombed and sunk by Allied aircraft on December 25th, 1943, in Boulogne Roads.

CONTE DI CAVOUR

Italian Navy, dreadnought-battleship; 1911; Spezia; 23,622 tons; 611-5x92x30; 75,000 s.h.p.; 27knots; turbine engines; 3-drum boilers; ten 12-6in. guns, twelve 4-7in., eight 3-9 in., 36m.g.; 4 aircraft.

The entry of Italy into the Second World War on the side of Germany in June, 1940, confronted the British in the Mediterranean with an exceedingly serious problem. The Italian navy consisted of two new battleships of 35,000 tons, nine 15 in. guns; four old, but reconstructed, battleships of 23,622 tons, ten 12-6 in. guns; nine heavy cruisers of 10,000 tons, eight 8 in. guns; six medium cruisers of from 6,941 tons to 7,874 tons, with from eight to ten 6 in. guns; six very fast light cruisers with eight 6 in. guns each; 62 destroyers of from 935 tons to 1,729 tons; 64 torpedo-boats of from 340 tons to 855 tons, and 106 submarines, besides a large fleet of auxiliary craft. This navy under resolute and enterprising leadership was capable of achieving a great deal for the Axis powers. In any event it was a tremendous threat to Britain's communications in the Mediterranean, for not only did it equal the number of capital ships in the British Mediterranean Fleet but it vastly outnumbered it in cruisers, destroyers and submarines.

The supreme task facing Admiral Sir Andrew Cunningham, Commander-in-Chief in the Mediterranean, was that of reducing the enemy's battle-fleet without losing any of his own in the process. It was known that three heavy Italian units were lying at the naval

base of Taranto, as well as a number of cruisers and it was decided to attack these from the air. Two aircraft-carriers, *Illustrious*, 23,000 tons, and *Eagle*, 22,600 tons, were selected for the task. At the last moment, however, *Eagle* developed defects in her petrol system and had to be left behind. *Illustrious* then took on board five of *Eagle's* aircraft, complete with crews, and set out protected by the 3rd Cruiser Squadron, comprising *Gloucester*, flagship, *Berwick*, *Glasgow* and *York*, with the destroyers *Hyperion*, *Ilex*, *Hasty* and *Havock*.

Illustrious wore the flag of Rear-Admiral A. L. Lyster, commanding Mediterranean aircraft carriers, and was commanded by Capt. D. W. Boyd. With her escort she took up a position some distance off Kabbo Point (Cephalonia) at 8 o'clock on the night of November 11th, 1940. The first flight of six torpedo planes, four dive bombers and two flare droppers took off between 8.35 and 8.40. The torpedo planes swept in at a height of 5,000 feet and dived to within a few feet of the water and attacked the battleships. The bombers then went on to attack the cruisers in the inner harbour. The second flight of five torpedo planes, two flare droppers and one dive bomber took off at 9.45. One other plane developed a defect and had to turn back. This comprised the full force attacking Taranto harbour on the night of November 11th.

The results of this offensive were startling in the extreme and set an example for friend and foe alike. One battleship, the *Conte di Cavour*, was sunk in shallow water, her stem and after turret being completely submerged. Another battleship of the same class, the *Caiò Duilio*, was forced to run aground and a new battleship of 35,000 tons, the *Italia*, had a heavy list to starboard and her bows under water. The cruiser *Trento* was left listing badly to starboard surrounded by oil fuel, and two destroyers, the *Libeccio* and the *Pessagno*, were also damaged. This victory was achieved at a cost of only two British aircraft, some of the crews of which were taken prisoner by the Italians. At one stroke the battleship strength of the Italian navy was halved, the balance in capital ships coming down heavily in favour of the British, and the likelihood of an Italian attack greatly reduced.

The *Conte di Cavour* was raised and taken to Trieste where she remained in dockyard hands until the end of the war. Frequent bombings damaged her again and again and she at last capsized on February 20th, 1945. The two other battleships were repaired and came under Allied control at the capitulation of Italy on September 8th, 1943.

CONTE DI MISURATA

I.N.C.S.A.; 1908; *Sir J. Laing & Sons*; 5,014 tons; 397-1x51x27-7; 436n.h.p.; triple-expansion engines.

The Italian tanker *Conte di Misurata* was intercepted by a British warship and sunk by gunfire on November 9th, 1941, about 120 miles S.E. of Punta Stilo.

CONTE ROSSO

Lloyd Triestino Soc. Anon, di Nav.; 1922; *W. Beardmore & Co.*; 17,879 tons; 588-2x74-2x35-9; 6,000n.h.p.; turbine engines.

The Italian liner *Conte Rosso* was taken over for service as a transport early in 1941. She was torpedoed and sunk by the submarine *Upholder*, Lt. Cdr. M. D. Wanklyn, near Syracuse on May 24th, 1941. This submarine under the same commander sank the *Nepuntia* and *Oceania* in September. Lt. Cdr. Wanklyn was later awarded the Victoria Cross.

CONTEST

British Navy, destroyer; 1913; *Hawthorn Leslie*; 957 tons; 267-5x27x10-5; 24,000 i.h.p.; 29 knots; turbine engines; *Yarrow boilers*; three 4 in. guns; 2 T.T.

The destroyer *Contest* was torpedoed and sunk by a German submarine in the approaches to the English Channel on September 19th, 1917. She carried a complement of 77, of whom 50 survivors were picked up.

CONTRACTOR

Charente S.S. Co. (T. & J. Harrison); 1930; *Cammell Laird & Co.*; 6,004 tons; 420-3x54-6x30-4; 524n.h.p.; 13 knots; triple-expansion engines.

The steamer *Contractor*, Capt. A. Brims, was torpedoed and sunk by a submarine on August 7th, 1943, at a position about 75 miles S.W. of southern Sardinia. Five men, including Capt. Brims, were killed, and two others died of wounds.

CONUS

Anglo-Saxon Petroleum Co.; 1931; *Workman Clark*; 8,132 tons; 452-4x62-1x33-9; 714n.h.p.; 12-5 knots; oil engines.

The motor tanker *Conus*, Capt. C. Asquith, was torpedoed and sunk by a German submarine on April 4th, 1941, in the North Atlantic. Capt. Asquith and 58 of the crew were killed.

CONWAY CASTLE

D. Currie & Co.; 1877; *R. Napier & Sons*; 3,056 tons; 349-2x39-3x28-9; 400h.p.; triple-expansion engines.

The British cargo ship *Conway Castle* was wrecked on May 11th, 1893, near Vatoumandry, Madagascar, on a voyage from London to Mauritius.

COONAGH

Limerick Steamship Co.; 1904; *Sir R. Dixon & Co.*; 1,412 tons; 238x35-7x12-2; 165n.h.p.; 8-5 knots; triple-expansion engines.

The *Coonagh* left Middlesbrough on March 10th, 1917, bound for Rouen. She was off the Thames estuary on March 13th, and was torpedoed and sunk by a German submarine on that day or the next in the English Channel. All of the crew of ten were lost.

COOPER

United States Navy, destroyer; 1944; *Federal Shipbuilding Co.*; 2,200 tons; 376-5x40-9x12-5; 60,000s.h.p.; 36-5 knots; turbine engines; six 5 in. guns, twelve 40mm AA, eleven 20mm A.A.; 10 T.T.

The *Cooper* was sunk in a night action with a number of Japanese destroyers in Ormoc Bay, Leyte Island, Philippines, on December 3rd, 1944. The vessel carried a complement of over 250.

COPELAND

Clyde Shipping Co.; 1894; *W. B. Thompson & Co.*; 1,184 tons; 246-5x33-7x16-2; 258n.h.p.; 10 knots; triple-expansion engines.

The iron steamer *Copeland* was torpedoed and sunk by a submarine 15 miles S.S.W. of the Tuskar on December 2nd, 1917. Twelve men were killed. The captain was among the survivors.

COPENHAGEN

Glasgow Shipowners' Co.; 1898; *J. Priestman & Co.*; 3,297 tons; 325 X 47 X 25 • 6; 312 n.h.p.; triple-expansion engines.

The British cargo ship *Copenhagen*, carrying a cargo of coal from Philadelphia to Havana, was wrecked on May 27th, 1900, near Cape Florida.

COPENHAGEN

Great Eastern Railway Co.; 1907; *J. Brown & Co.*; 2,570 tons; 331-2x43-2x17-8; 12,000 s.h.p.; 22 knots; turbine engines.

The triple-screw passenger steamer *Copenhagen* was torpedoed and sunk by a submarine eight miles E. ½ N. of the North Hinder lightship on March 5th, 1917. Fortunately only six persons were killed. The captain was among the survivors.

COQUET

Mercantile Steamship Co.; 1904; *Sir Raylton Dixon & Co.*; 4,396 tons; 360-1x50-2x17-9; 344n.h.p.; 11 knots; triple-expansion engines.

The steamship *Coquet*, Capt. Arnold C. B. Groom, was bound from Torrevegia to Rangoon with a cargo of salt when she was intercepted by a Austrian submarine 200 miles E. of Malta on January 4th, 1916. The attack took place at 10.45 a.m., the submarine opening fire from the surface. Eight shells were fired after which the Austrians boarded the ship and sank her with time-bombs. The *Coquet* carried 31 persons all told. Two boats were launched in a heavy sea and one, under the first officer, was swept away and lost with 16 lives. The captain's boat fared a little better, the occupants landing on the Libyan coast six days later. Here they were attacked by Bedouin Arabs and three were killed and the captain, who feigned death, wounded. Ten men were taken prisoner, the captain escaping to an Italian settlement after the others had been marched away.

COQUETTE

British Navy., destroyer; 1903; Thornycroft; 335 tons; 5,700i.h.p.; 30 knots; Thornycroft boilers; one 12pdr. gun, five 6pdr., 2 T.T.

The destroyer *Coquette*, Lt. Vere Seymour, was patrolling in the North Sea on March 10th, 1916, when she struck a mine. She sank very rapidly taking with her Lt. Seymour and 21 ratings. At the same time *Torpedo Boat No. 11* struck another mine not far away and sank with three officers and 20 ratings.

COQUIMBO

Ant. Dom. Bordes & Fits; 1890; Russell & Co.; 7,759 tons; 259x38-1x23.

The French sailing ship *Coquimbo* struck a mine and sank on July 13th, 1917, in the Bay of Biscay.

CORABELLA

Saugenay Terminals; 1937; J. L. Thompson & Sons; 5,682 tons; 409'3x57-6x29-1; 395n.h.p.; triple-expansion engines.

The steamship *Corabella* was torpedoed and sunk by a German submarine on April 30th, 1943, between Takoradi and Freetown. Nine of her crew were lost.

CORACERO

Donaldson South American Line; 1923; Lithgows; 7,252 tons; 423-6x56x36-7; 831 n.h.p.; 13knots; triple-expansion engines & exhaust turbine.

The *Coracero*, Capt. E. C. Young, was in convoy in mid-Atlantic on March 17th, 1943, when she was torpedoed and sunk by a submarine. Five men were killed. Capt. Young was among the survivors.

CORAL SEA, Battle of, *see* **LEXINGTON** and **SHOHO**

CORALIE

W. H. Cockerline & Co.; 1892; Richardson, Duck & Co.; 2,920 tons; 312X41X20-6; 256n.h.p.; triple-expansion engines.

The British cargo ship *Coralie* foundered on February 23rd, 1907, off Heligoland while on a voyage from Rosario to Hamburg.

CORBIS

Anglo-Saxon Petroleum Co.; 1931; Workman, Clark; 8,132 tons; 452-4x62-1x33-9; 714n.h.p.; 12-5 knots; oil engines.

The motor tanker *Corbis*, Capt. S. W. Appleton, was torpedoed and sunk on April 18th, 1943, about 500 miles due E. of Port Elizabeth. Capt. Appleton and 50 others were killed.

CORBURN

Cory Colliers; 1936; Burntisland S.B. Co.; 1,786 tons; 257x39-5x16-7; 171 n.h.p.; triple-expansion engines.

The steamship *Corburn*, on Admiralty service, struck a mine and sank on May 22nd, 1940, off Havre.

CORCHESTER

Wm. Cory & Son; 1927; S. P. Austin & Son; 2,374 tons; 285x41-7x19; triple-expansion engines.

The British steamship *Corchester* sank after a collision with the *City of Sydney* off the Norfolk coast on February 19th, 1956, and eight lives were lost. She was on a voyage in ballast from London to Hartlepool.

CORDELIA

A. Kirsten; 1921; Hamburger Elbe Schiffsw.; 1,357 tons; 244-5x36-2x16-1; 126n.h.p.; triple-expansion engines.

The German steamship *Cordelia* struck a mine and sank on December 2nd, 1941, fifteen miles E. of Burgaz, Bulgaria.

CORDELIA

Oil Tank S.S. Co.; 1931; Swan, Hunter & Wigham Richardson; 8,190 tons; 460-4x59-5x34-1; 652n.h.p.; oil engines.

The tanker *Cordelia*, on a voyage from Curacao and New York for the Clyde, straggled from her convoy in bad weather on February 23rd, 1943, and was torpedoed and sunk by the German submarine *U-632*. The chief engineer was taken off a raft by the submarine but the remaining 38 of her crew and eight gunners were lost.

CORDILLERA

Pacific Steam Navigation Co.; 1869; Glasgow; 2,860 tons; 353-2x41x26; 500h.p.; compound inverted engines.

The British cargo ship *Cordillera* was wrecked on September 20th, 1884, in the Straits of Magellan. She was on a voyage from Liverpool to Valparaiso.

CORDILLERA

G. W. Phillips; 1866; T. Vernon & Son; 883 tons; 186-4x30-3x20-5.

The barque *Cordillera*, Capt. Everitt, was wrecked shortly after leaving Valparaiso on November 7th, 1897. The captain and 16 others were drowned.

CORDOBA

Hamburg-Sudamerikanische Dampfschiffahrts Ges.; 1919; Lithgows; 4,611 tons; 384-6x52x26-5; 517n.h.p.; triple-expansion engines.

The German steamship *Cordoba* struck a mine and sank on September 11th, 1940, at Havre.

CORDOVA

JohnTully; 1880; TyneI.S.B. Co.; 1,730 tons; 275-4x37-5x18-8; 180 h.p.; compound engines.

The British ship *Cordova* foundered on December 27th, 1893, near Cape Palos. She was on a voyage from the Tyne to Barcelona with a cargo of coal. A second ship of this name owned by John Tully & Sons, of 2,284 tons, was sunk on December 12th, 1917, by a German torpedo boat destroyer in the North Sea.

CORDOVA

Soc.diNav.LloydItaliano; 1905; London & Glasgow Co.; 4,933 tons; 411-4x47-2x18-8; 531 n.h.p.; triple-expansion engines.

The Italian steamship *Cordova* was torpedoed and sunk by a submarine on July 4th, 1918, in the Mediterranean.

CORDUFF

Cory Colliers; 1923; Swan, Hunter & Wigham Richardson; 2,345 tons; 284-5x42x19-6; 247n.h.p.; triple-expansion engines.

The collier *Corduff*, Capt. D. Rees, was torpedoed and sunk off No. 8 Buoy, near Cromer, by a German motor torpedo boat on March 7th, 1941. Seven men were killed and two taken prisoner of war. Capt. Rees was among the 14 survivors landed.

CORFIELD

Cory Colliers; 1937; Burntisland S.B. Co.; 1,791 tons; 257X39-5x16-7; 176n.h.p.; 10 knots; triple-expansion engines.

The collier *Cprfield*, Lt. Cdr. W. J. Tucker, R.N.V.R., was taken over by the Admiralty during the Second World War for service as a mine-destroyer vessel. On September 8th, 1941, when off the mouth of the Humber she struck a mine and sank. The crew were picked up and there was no loss of life.

CORINALDO

Donaldson South American Line; 1921; Scotts S.B. & E. Co.; 7,131 tons; 414-5x55-6x36-7; 810 n.h.p.; 12 knots; turbine engines.*

The *Corinaldo*, Capt. W. Anderson, was in convoy on October 29th, 1942, when she was torpedoed and sunk by a submarine. The attack took place between the Canary Islands and Gibraltar. Eight of the crew were killed and one was wounded. Capt. Anderson was among the survivors.

CORINIA

Northwest Shipping Co.; 1928; R. Williamson & Son; 870 tons; 188-3x30-2x12-4; 99r.h.p.; triple-expansion engines.

The British steamship *Corinia* struck a mine and sank on March 10th, 1941, in the English Channel, with the loss of 14 lives.

CORINTH

Nelson, Donkin & Co.; 1880; C. Mitchell & Co.; 2,568 tons; 317x37-8x26-9; 300 h.p.; compound inverted engines.

The British cargo ship *Corinth* was sunk in a collision on January 22nd, 1886, in 25° N., 119° E., on a voyage from Hiogo, Japan, to Singapore.

CORINTHIAKOS

M. A. Embiricos; 1910; Craig, Taylor & Co.; 3,562 tons; 362-3x51x21; 310 n.h.p.; triple-expansion engines.
The Greek steamship *Corinthiakos* was torpedoed and sunk by a German submarine on November 20th, 1942, thirty miles N. of Inhaca Island, while on a voyage from Lourenso Marques to Aden. The captain and ten others were killed.

CORISCO

British & African S.N. Co.; 1876; J. Elder & Co.; 1,856 tons; 300-9x34-5x23-6; 280 h.p.; compound inverted engines.
The British ship *Corisco* was wrecked on July 23rd, 1885, off the River Cess, Liberia. She was on a voyage from Liverpool to Bonny.

CORK

City of Dublin Steam Packet Co.; 1899; Blackwood & Gordon; 1,232 tons; 260-3x34-1x15-7; 330n.h.p.; 10-5 knots; triple-expansion engines.
The steamship *Cork* was torpedoed and sunk by a submarine nine miles N.E. of Lynas Point on January 26th, 1918. Twelve men were killed. The captain was among the survivors.

CORMORAN

German Navy, unprotected cruiser; 1892; Germany; 1,630 tons; 246 x 33 • 5 x 15; 1,600 i.h.p.; 16 knots; triple-expansion engines; eight 4 • 1 in. guns, five 1 pdr., 2 T.T.

The old German light cruiser *Cormoran* was left behind at Tsingtau (Tsingtao) when the Asiatic Squadron left for the coast of South America at the outbreak of the First World War. The ship was of little fighting value with a low speed. As Japan had not entered the war at that date it was assumed that it might be some time before Tsingtau would be invested by an Allied army, therefore she would be comparatively safe. On August 15th, however, Japan presented an ultimatum to Germany demanding that Tsingtau should be handed over to her and requiring a reply within seven days. This changed the position of the German ships within the harbour in a most radical fashion, for Japan would be able to land an investing army as soon as her ultimatum expired.

The vessels lying at Tsingtau were all old, and with the exception of the Austrian cruiser *Kaiserin-Elisabeth*, 4,060 tons (which see), were also small and weakly-armed. There were, in addition to the *Cormoran* and the *Kaiserin-Elisabeth*, the gunboats *Illis*, *Jaguar*, *Luchs* and *Tiger*, all of 900 tons, the minelayer *Ruchin* and the destroyer, *Taku*, 280 tons. These ships were found to have been sunk when the Allies entered the fortress on November 7th, 1914. Some of them had been destroyed or damaged by gunfire and others had been blown up by their crews.

CORMORANT

British Navy, gunboat; 675 tons; 200 h.p.; steam engines; two 68 pdr. guns, two 32 pdr., 2 howitzers.
The gunboat *Cormorant*, Cdr. A. Wodehouse, was one of a flotilla engaged in the bombardment of the Pei-ho Forts in the China War of 1856-59. The action lasted from June 25th to 28th, 1859, the *Cormorant* sinking on the 28th.

The flotilla lost 25 officers and men killed, and 93 wounded. For full story of the action see *Plover*.

CORNELIS

A.C.Lensen; 1914; Craig, Taylor & Co.; 2,434 tons; 295x45x20-3; 226 n.h.p.; triple-expansion engines.
The Dutch steamship *Cornells* was wrecked in heavy weather on October 15th, 1922, at Grundekallen, Sweden.

CORNHILL

Chapman & Miller; 1892; J. Blumer & Co.; 2,053 tons; 270 -3X38-1x16-2; 150h.p.; triple-expansion engines.
The British cargo ship *Cornhill* was sunk in a collision on December 28th, 1893, off Cape Trafalgar. She was on a voyage from Barry to Malta with a cargo of coal.

CORNISH CITY

Leeds Shipping Co. (Sir W. Reardon Smith & Sons); 1936; Furness Shipbuilding Co.; 4,952 tons; 426-5x56-2x25-3; 687 n.h.p.; 12 • 5 knots; oil engines.
The *Cornish City*, Capt. H. T. Isaac, first attracted public notice as the flagship of what came to be known as the *Jervis Bay* convoy. On

November 5th, 1940, the vessel wearing the flag of Rear-Admiral H. B. Maltby, commodore of the convoy, was in mid-Atlantic when the ships were attacked by the German pocket battleship *Admiral Scheer*. The *Cornish City* though shelled by the enemy managed to escape on that occasion and continued in service for more than two years before she was torpedoed and sunk by an enemy submarine off Madagascar on July 29th, 1943. Capt. Isaac and 36 others were killed. The story of the famous convoy action is told under the *Jervis Bay*.

CORNWALL

British Navy, heavy cruiser; 1926; Devonport Dockyard; 10,000 tons; 630x68-5x16-2; 80,000 s.h.p.; 31-5 knots; turbine engines; 3-drum boilers; eight 8 in. guns, eight 4 in., 20 smaller, 3 aircraft.

The British 8 in-gun cruisers *Cornwall*, Capt. P. C. Manwaring, and *Dorsetshire*, Capt. A. W. S. Agar, v.c., D.S.O., were among the very heavy losses which marked the commencement of the war with Japan. The two ships left Colombo on April 4th, 1942, and on the same day reports reached the British authorities ashore that a strong Japanese force consisting of three battleships, five aircraft carriers, a number of cruisers and several destroyer flotillas had entered the Bay of Bengal. The object of this raid was to attack shipping and dislocate services at the naval base of Trincomalee. About 20 merchant ships were sunk and carrier-borne aircraft attacked Cocanada and Vizagapatam. On April 9th Trincomalee was also bombed.

The two cruisers were without air protection and on the day after leaving port, April 5th, they were attacked by waves of Japanese dive-bombers and sunk. Over 1,100 survivors were picked up next day by British destroyers. The loss on board *Cornwall* amounted to ten officers, 149 British, 16 Maltese and 23 South African ratings killed and one officer wounded. The captains of both ships were among the survivors.

Cornwall's chief exploit in the war had been the sinking of the German raider *Pinguin* in the Indian Ocean early in 1941.

CORNWALLIS

British Navy, 1st class battleship; 1901; Thames Ironworks; 14,000 tons; 429x75-5x27-3; 18,000 i.h.p.; 19 knots; triple-expansion engines; Belleville boilers; four 12 in. guns, twelve 6 in.; twelve 12pdr., six 3pdr., 2 m.g., 4 T.T.

Cornwallis was one of the pre-dreadnought battleships that survived the Dardanelles campaign, which had proved fatal to so many of her contemporaries. In January, 1917, the ship was under orders for England and on the 9th of the month she was due at Malta, on her way home. Her commander, Capt. A. P. Davidson, D.S.O., was aware that there was a submarine in the vicinity and he had under his orders a small force of two sloops and eight trawlers, which he sent in search of the enemy. Meanwhile *Cornwallis* escorted by the destroyer *Beagle* continued on her way, zig-zagging according to custom. At 7.55 a.m. she was struck on the starboard side, abreast the boiler room by a torpedo from the submarine *U-32*, Cdr. Kurt Hartwig. Both British ships were taken by surprise, and although the destroyer dropped depth-charges she neither hit the submarine nor scared it away.

Cornwallis immediately listed ten degrees and it became necessary to flood her boiler and engine rooms to bring her on to an even keel. This meant that the steam hoisting gear for the boats was put out of action, and they had to be manhandled. Despite this handicap they were got out, the ship's company mustered and everything made ready to 'abandon ship'. The complement of *Cornwallis* was 670 and all of this number, except 15 men killed when the torpedo exploded, came off safely and boarded *Beagle* which ran alongside as the battleship was sinking. A second torpedo now hit *Cornwallis* on the port side amidships just after *Beagle* had sheered off. This was the *U-32's* final shot before leaving the scene. Had it come five minutes before it would undoubtedly have sent *Beagle* to the bottom with hundreds of men.

CORNWALLIS

Canadian National Steamships; 1921; J. Coughlan & Sons; 5,458 tons; 400x52-4x28-7; 370n.h.p.; 10 knots; triple-expansion engines.
The *Cornwallis*, Capt. Emerson Robinson, was off the coast of Maine on December 3rd, 1944, when she was torpedoed and sunk

COROCORO

by the German submarine *U-1230*. Captain Robinson, 35 of the crew and seven gunners were killed. The *Cornwallis* was not in convoy at the time of the sinking.

COROCORO

New York & Pacific S.S. Co.; 1896; Wigham, Richardson & Co.; 4,006 tons; 365x48x18-7; 363n.h.p.; triple-expansion engines.
The British cargo ship *Corocoro* was wrecked on August 26th, 1897, on Baxa Point, Straits of Magellan. She was on a voyage from the west coast of South America to New York.

CORONDA

Chr. Salvesen & Co.; 1892; W. Gray & Co.; 2,733 tons; 310-3X 41-2x17; 279n.h.p.; 9-5 knots; triple-expansion engines.
The steamship *Coronda* was torpedoed and sunk by a submarine 180 miles N.W. of Tory Island on March 13th, 1917. Nine men were killed. The captain was among the survivors.

CORONEL, Battle of, see GOOD HOPE

CORREGIDOR

Fernandez Hermanos Inc.; 1911; W. Denny & Bros.; 1,881 tons; 316X41 • 1X15 • 8; turbine engines.
The Philippine steamship *Corregidor* struck a mine and sank near Manila Bay on December 17th, 1941. The ship was crowded with passengers and about 500 lives were lost.

CORRIENTES

Argentine Navy, destroyer; 1937; Vickers Armstrong; 1,375 tons; 323x33x8-5; 34,000s.h.p.; 35-5 knots; turbine engines; 3-drum boilers; four 4-7 in. guns, 8 smaller, 8 T.T.
The *Corrientes* was run down by the cruiser *Almirante Brown*, 6800 tons, during manoeuvres on October 3rd, 1941. The disaster took place at nightfall in a thick fog at a position 54 miles N.E. of Mar del Plata. Of the destroyer's complement of 160 officers and ratings two were killed by the collision, eight were missing and 150 were picked up by the *Almirante Brown* and the destroyer *Entre Rios*.

CORRY

United States Navy, destroyer; 1941; Charleston Navv Yard; 1,700 tons; 348-5x36x10; 50,000s.h.p.; 36-5 knots; turbine engines; Babcock & Wilcox boilers; four 5 in. guns, four 40 mm., seven 20 mm., 5 T.T.
The *Carry* was engaged in the operations consequent upon the landing of the Allied army in France on 'D Day', June 6th, 1944. The vessel struck a mine and sank when off the coast of Normandy. Her normal complement was 210. Two other U.S. destroyers, the *Glennon* and the *Meredith*, were sunk by mines in the same area on the same day.

CORSHAM

Cory Colliers; 1918; S. P. Austin & Son; 2,797 tons; 312-5X 45-3x20-8; 270n.h.p.; 10 knots; triple-expansion engines.
The collier *Corsham* was torpedoed and sunk by a submarine six miles E.S.E. of the mouth of the Tees on March 8th, 1918. Nine men were killed. The captain was among the survivors.

CORSICA

Bristol General S.N. Co.; 1863; J. & G. Thomson; 1,581 tons; 272-7x32-7x23-8; 160 h.p.; compound inverted engines.
The British cargo ship *Corsica* was wrecked on October 11th, 1881, off Cape Roca while on a voyage from London to Bombay. Twenty-one lives were lost.

CORTES

MacAndrews & Co.; 1884; J. Laing; 1,275 tons; 228x32-4x 13-9; 123n.h.p.; compound engines.
The British cargo ship *Cortes* was sunk in a collision on April 26th, 1917, five miles east of Cape Machichaco while on a voyage from Liverpool to Santander and Seville.

CORTES

MacAndrews & Co.; 1919; Caledon S.B. & E. Co.; 1,374 tons; 270-6x38-1x16-2; 196n.h.p.; 12 knots; triple-expansion engines.

The steamship *Cortes*, Capt. D. McRae, was sailing from Gibraltar with a homeward-bound convoy on September 26th, 1941, when she was torpedoed and sunk by a German submarine.

All the crew, save one, were lost. Some were picked up by the steamer *Lapwing* but lost their lives when that ship was sunk later in the day.

CORTONA

Donaldson South American Line; 1921; Vickers; 7,093 tons; 414-4x55-7x36-8; 804n.h.p.; 12 knots; turbine engines.
The *Cortona*, Capt. M. McK. Brown, was in convoy on July 11th, 1942, when she was torpedoed and sunk by a submarine. The attack took place about midway between the Canary Islands and Gibraltar. Thirty of the crew were killed and one was wounded. Capt. Brown, who had been in command of the *Corrientes* when she was torpedoed in 1940, was again one of the survivors.

CORUNDUM

John Stewart & Co.; 1899; Scott & Sons; 1,203 tons; 230X 35-1x13-9; 96 r.h.p.; triple-expansion engines.
The British ship *Corundum*, carrying a cargo of coal from Bunrypprtto Rouen, was sunk in a collision six miles south-west of Helwick Light on October 17th, 1914.

CORVUS

Det Bergenske Dampskibsselskab; 1921; Kjøbenhavns Flydedok & Skibsv.; 1,317 tons; 241-4x36-2x16-2; 106n.h.p.; triple-expansion engines.
The Norwegian steamship *Corvus* was torpedoed and sunk by a German submarine on February 27th, 1945, in the English Channel, while sailing from Garston to Plymouth. Eight of her crew were killed.

COSALA

Italian Government; 1913; J. Readhead & Sons; 4,259 tons; 369-9x51-1x26-1; 385n.h.p.; triple-expansion engines.
The steamship *Cosala* was formerly the Yugoslav *Serajfin Topic*, seized by the Italians. On February 10th, 1942, she was torpedoed and sunk by a British submarine near Cape Stilo, on a voyage from Messina to Taranto.

COSENZA

Italian Government; 1918; T. Van Duijvendijk; 1,471 tons; 238-8x36-6x16-5; 128n.h.p.; triple-expansion engines.
The steamship *Cosenza* was formerly the French *lie Rousse*, taken over by the Italians. On March 14th, 1943, she was torpedoed and sunk by an Allied submarine off Cape Spartivento.

COSPATRICK

Shaw, Savill & Co.; 1856; Duncan Dunbar; 1,220 tons; 190x 34x24.
The emigrant ship *Cospatrick*, Capt. Elmslie, a fine teak clipper, left London on September 11th, 1874, for Auckland, New Zealand. She was crowded with people, for those were the days of the regular emigrant service between English ports and those of New Zealand and Australia. There were on board 475 persons, of whom 42 were crew.

The voyage was uneventful for the first two months. The *Cospatrick* was equipped with a fixed fire engine in her fore-castle, and several lengths of new canvas hose; fire being always in the minds of those who owned wooden emigrant ships. So far as can be ascertained every precaution was taken to ensure the safety of the ship against this danger. Locked lanterns were used below deck and smoking was strictly forbidden. A fire patrol was formed from among the male passengers, and before leaving Gravesend she passed the somewhat ineffectual tests then required by the authorities.

On the night of November 17th there was a concert on board after which the passengers and crew turned in without thought of trouble. At about 1 a.m. the watch on deck raised the cry of 'Fire'. Dense clouds of smoke were rising from a shaft running from the forepeak to the fore-castle-head, where a quantity of inflammable material was stored. In a short time the flames drove crew and passengers aft and

gained a fatal hold on the ship. The fire engine failed to function as there was a heavy swell, and the roll of the ship constantly took the suction-pipe out of the water. The alternative of fighting the fire with buckets passed from hand to hand was futile from the outset, as the bulwarks were very high and the task of filling the buckets slow and difficult. Another handicap was the impossibility of keeping the ship before the wind in order to blow the flames away from the after part.

Capt. Elmslie in his anxiety to keep every available man at work fighting the flames neglected, until it was too late, to order away the boats. Ultimately the passengers were seized with terrible panic, boats caught fire and those available proved unseaworthy and devoid of hoisting tackle. Amid scenes of the utmost terror and confusion the *Cospatrick* was burned out, being at the time in lat. 37° 15' S., long. 12° 25' E., about 300 miles S.W. of the Cape of Good Hope.

Two small boats, packed with about 60 people between them, eventually got away. They had neither food, drink nor equipment, and were a stark revelation of the badly-found condition of the ship. The boats kept together for two days and were then separated by bad weather. One was never seen again and the other, after drifting for ten days, during which time all but five had died, was picked up by the sailing ship *British Sceptre*, Capt. Jahnke, Liverpool. Of the five rescued only three survived to tell a dreadful story of how they had subsisted for days on the bodies of those who had died. The saved were Mr. Henry Macdonald, the second officer, and two seamen.

Those lost numbered 472, of whom 177 were men, 125 women, 58 boys, 53 girls and 16 infants under twelve months, these being emigrants. There were also four private passengers and 39 of the crew.

COSSACK

British Navy, destroyer; 1938; Vickers Armstrong; 1,870 tons; 355-5x36-5x9; 44,000 s.h.p.; 36-5 knots; turbine engines; 3-drum boilers; eight 4-7 in. guns, 7 smaller, 4 T.T.

The destroyer *Cossack* played a distinguished part in the Second World War. Her greatest exploit was the release of the British merchant seamen held prisoner on board the German supply ship *Altmark*. This ship was commissioned to supply the pocket battleship *Admiral Graf Spee* (which see) on her commerce raiding in the South Atlantic. The battleship captured and sank many British merchantmen, placing the bulk of their crews on board the *Altmark* as prisoners of war. Soon the number so captured began to strain the ship's limited accommodation and also her stores. The number gradually increased until over 300 officers and men lay within her holds; the meagre rations, close confinement and vermin-infested bedding imposing a dreadful strain on the prisoners. In addition to these hardships was the fact that all unknown to them the *Admiral Graf Spee* had been sunk and the *Altmark* was making her way back to Germany by a lengthy and roundabout route through the Arctic to Northern Norway and thence down the Norwegian coast. The only mitigation for the men, and that a very slight one, was an opportunity to take exercise on deck for an hour and a quarter each day when the weather was fine.

The *Altmark's* voyage to Norway occupied nine weeks from December 13th, 1939, to February 15th, 1940, when she was sighted by an aircraft of British Coastal Command. During that time she underwent two changes of name, first calling herself the *Hangsund* and later the *Chirqueue*, and receiving different coatings of paint. This failed to deceive the Norwegian authorities who were very unhappy about her presence in their waters, as unpleasant diplomatic incidents were bound to occur with the Allies on the one side and the Germans on the other. Moreover the *Altmark* was rated as a naval auxiliary and though unarmed claimed the same privileges as those accorded to a warship. On the 14th, the day before she was sighted by the British, she was stopped and questioned by a Norwegian torpedo boat off Trondheim Fjord, but was allowed to proceed on her claiming to be regarded as a ship of war. She was stopped for a second time lower down the coast and again managed to evade search by a boarding party. By this time the Admiralty were reasonably sure of her identity and a small destroyer force was detailed to shadow her down the Norwegian coast beyond the limit of the neutral zone. This action by the British forced Capt. Dall of the *Altmark* to abandon his attempt to reach Germany and he put

into losing Fjord, followed by two Norwegian torpedo boats, the *Skarv* and the *Kjell*.

The British destroyer force was under command of Capt. Vian of *Cossack*, who received orders from the Admiralty to secure the release of the imprisoned seamen who were clearly held in duress in defiance of international law, seeing that the *Altmark* was now lying in neutral Norwegian waters. An offer was made by Capt. Vian to the Norwegian senior naval officer to make a joint search of the *Altmark* but this was declined, whereupon a party from *Cossack* was despatched to perform this duty. A Norwegian officer came on board the British destroyer to witness that the operation did not go beyond the strict limits of international law, but left sometime later when fighting took place between the British and Germans. In all four Germans were killed and five wounded, while the gunner of *Cossack*, Mr. Smith, was the only casualty on the British side, he being wounded by a rifle bullet. The fighting was not of long duration, however, for the *Altmark* was rapidly secured, an attempt by her captain to ram *Cossack* being frustrated in the nick of time. A search was at once begun, the bluejackets shouting "Are there any British below?" An answering shout from the prisoners revealed their whereabouts and a phrase which has become historic for its brevity and implication came from the navy men "The navy is here!". In a short time the whole of the imprisoned party was transferred to *Cossack* which lay alongside the *Altmark* and the German ship was abandoned. Most of the German crew escaped over the ice from whence they sniped at the British.

Cossack's next action was that of the second battle of Narvik (fully described under the destroyer *Hardy*) on April 13th, 1940, when she was severely damaged in an engagement with a German destroyer lying alongside the jetty in Narvik harbour. She became unmanageable and drifted ashore where she effected temporary repairs and was refloated during the night of the 14th. During the period in which she was ashore she came under fire from an enemy howitzer which she silenced, driving away the gunners. On this occasion she was commanded by Cdr. R. StV. Sherbrooke.

On October 13th of the same year *Cossack*, once more under Capt. Vian, was leading a division of four destroyers in the Mediterranean between Sicily and Libya when she surprised and totally destroyed an Italian convoy of three supply ships and two sloops.

In May, 1941, *Cossack* was part of a destroyer force under Admiral Sir J. Tovey, commanding the Home Fleet, when the *Bismarck* and *Prince Eugen* attempted to break out into the open ocean. From May 23rd to 26th *Cossack* took part in the chase and destruction of the *Bismarck* (which see), and it was one of the destroyers in the flotilla which she led that torpedoed the German battleship and caused her to reduce speed.

On November 6th, 1941, *Cossack*, then commanded by Capt. E. L. Berthon, was torpedoed and sunk in the Atlantic by a German submarine. Of her complement of 219, Capt. Berthon, three officers and 154 ratings were killed and five officers and 23 ratings were wounded.

COSTANTE

DaWOrso & Co.; 1899; Palmers' Co.; 3,479 tons; 349-8X 45-2x26-9; 307 n.h.p.; triple-expansion engines.

The Italian steamship *Costante* was torpedoed and sunk by a submarine in the Mediterranean on April 17th, 1917.

COSTANZA

Soc. Anon Maritt. "La Platense"; 1883; Oswald, Mordaunt & Co.; 2,545 tons; 310-6x38-8x26-7; 316 n.h.p.; compound engines.

The Italian steamship *Costanza* was torpedoed and sunk by a German submarine on August 14th, 1917, in the North Sea.

COSTAS

A. A. Embiricos; 1896; R. Thompson & Sons; 3,278 tons; 328-1x47-1x15-9; 277 n.h.p.; triple-expansion engines.

The Greek steamship *Costas* was torpedoed and sunk by a submarine in the Mediterranean on December 9th, 1917.

COTOPAXI

Pacific Steam Navigation Co.; 1873; J. Elder & Co.; 4,045 tons; 402-2x42-8x34'3; 600 h.p.; compound inverted engines.

The British cargo ship *Cotopaxi* struck a rock and sank on April 15th, 1889, in Smyth Channel while on a voyage from Liverpool to Valparaiso.

COTTINGHAM

COTTINGHAM

Jas. Little & Co.; 1907; Goole S.B. & Rep. Co.; 513 tons; 165 X 26x12-5; 79 r.h.p.; 9-5 knots; triple-expansion engines.

The small coasting steamship *Cottingham*, coming from Calais to Leith, collided with the German mine laying submarine *U.C.-2* on July 2nd, 1915. The submarine was submerged at the time. Capt. Colin Mitchell, of the *Cottingham*, reported the matter to the naval authorities who sent minesweepers to the spot. The submarine was located, but blew up at about 9.40 on the same evening, probably owing to damage to her mines.

The crew of the *Cottingham* received a grant of £200 from the Admiralty.

On her second encounter with submarines the steamship did not fare so well, for she ran into two on their way to the Mediterranean. One of the submarines ordered the crew to take to the boats and then sank the *Cottingham* by gunfire. The attack took place on December 26th, 1915, about 16 miles S.W. i W. of Lundy Island. Seven men lost their lives.

COULOURAS XENOS

Ath. Coulouras; 1915; Ropner & Sons; 4,914 tons; 384-9x 53x27; 349 n.h.p.; triple-expansion engines.

The Greek steamship *Coulouras Xenos* was bombed and sunk by German aircraft on April 2nd, 1941, off Gavao, on a voyage from Pirasus to Port Said.

COUMOUNDOUROS

Cardiff S.S. Co.; 1865; Richardson, Duck & Co.; 1,334 tons; 258-6x31-4x18-1; 160 h.p.; compound inverted engines.

The British cargo ship *Coumoundouros* was wrecked on February 11th, 1887, near Escala, Spain, while on a voyage from Genoa to Carthage on ballast.

COUNTESS EVELYNE

Countess Evelyn Co.; 1882; Caird & Purdie; 1,354 tons; 245-6x34-1x15-5; 140 h.p.; compound engines.

The steamship *Countess Evelyn* was bound from Cardiff to Bilbao with 26 persons on board, of whom eight were passengers. On the afternoon of Saturday, May 13th, 1893, the ship ran into patches of dense fog off the coast of Cornwall. She at once put her engines into dead slow and sounded her siren. At about 11.20 p.m. she collided with the Dublin steamship *City of Hamburg*, 1,219 tons, Capt. Kehoe, from Swansea for Hamburg. The impact was slight and the people on board the *City of Hamburg* were unaware of the extent of the damage they had caused. The captain of the *Countess Evelyn* ran forward to see what had happened, but so quickly did his ship sink beneath him that he was only just in time to spring for the bows of the *City of Hamburg* before she went down. The first officer, who was asleep below, came on deck as the vessel sank and he also jumped on board the *City of Hamburg*. With the exception of these two all the people remaining on the *Countess Evelyn*, 24 persons, were drowned.

COUNTESS OF MAR

Gascony Steamship Co.; 1916; Forth S.B. & E. Co.; 2,234 tons; 285-3x42-7x20-3; 207 n.h.p.; 9-5 knots; triple-expansion engines.

The steamship *Countess of Mar* was torpedoed and sunk by a submarine 55 miles N. E. of Bayonne on August 4th, 1917. The captain and 19 others were killed.

COUNTY OF CARDIGAN

D. Owen & Sons; 1903; Ropner & Son; 2,826 tons; 320 x 46x21-3; 256 n.h.p.; triple-expansion engines.

The British steamship *County of Cardigan* was wrecked on May 20th, 1925, off the Cape Cee, Corcubion, while on a voyage from Braila to Esbjerg with a cargo of grain.

COUNTY OF CARMARTHEN

D. Owen & Sons; 1917; Ropner & Sons; 3,654 tons; 346-5x 50-8x23-2; 322 n.h.p.; triple-expansion engines.

The British steamship *County of Carmarthen* was wrecked on July 29th, 1922, on North Reef, Mayo Island, while on a voyage from Dakar to Key West.

COUNTY OF ROXBURG

R. & J. Craig; 1886; Barclay, Curie & Co.; 2,209 tons; 285-6x 43-5x24.

The four-masted barque *County of Roxburg* was bound from Chile to Sydney, N.S.W. in ballast. On February 8th, 1906, she was overwhelmed by a cyclone and was wrecked on Tararua Island in the Paumotu group. Ten were drowned.

COURAGEOUS

British Navy, aircraft carrier; 1916; Armstrong; 22,500 tons; 786•2 X100X28-3; 90,000 s.h.p.; 30 knots; turbine engines; Yarrow boilers; sixteen 4-7 in. guns, four 3 pdr., 17 smaller, 48 aircraft.

Courageous was constructed as a battle-cruiser under the Emergency War Programme during the Great War of 1914-18. She was a conception of Lord Fisher, and was intended for service in the Baltic. She was originally of 18,600 tons and carried a main armament of four 15 in. guns.

In 1924 the ship was taken in hand at Devonport Dockyard and reconstructed as an aircraft-carrier, the work occupying about four years and costing £2,025,800. After serving in this capacity for about eight years she was again refitted in 1936.

Courageous was commissioned with the Reserve Fleet in August, 1939, just prior to the war with Germany, and carried a reduced number of aircraft with a smaller complement than formerly. She was under command of Capt. N. A. Makeig-Jones, with a company of 1,202 officers and men. On Saturday, September 16th, she left Devonport accompanied by a screen of four destroyers on an offensive patrol, the weather being good with a moderate sea. Sometime during the evening of the 17th a German submarine was reported and two destroyers were detached to search for her. At about 8 o'clock, *Courageous* turned head to wind to recover her aircraft, which were on patrol. The submarine had now manoeuvred to within striking distance of the aircraft carrier without being observed. Two torpedoes were discharged and the ship was hit amidships on the port side. It soon became clear that it was impossible to save her and about five minutes after she was struck the captain gave orders to abandon ship. She remained afloat from 15 to 20 minutes, going down by the bows with a heavy list to port, still having a large number of her company below.

Altogether 515 officers and men, including Capt. Makeig-Jones, were drowned. Only a few boats were launched, as the ship was heeling over at too great an angle. The escorting destroyers and an American and Dutch steamer picked up some hundreds of men from the water, while many others were saved by the ship's rafts and floating pieces of wreckage.

COURLAND

Leith, Hull & Hamburg S.P. Co. (James Currie & Co.); 1932; Barclay, Curie & Co.; 1,325 tons; 251-2x38-2x15-9; 196 n.h.p.; 12•5 knots; triple-expansion engines.

The steamship *Courland*, Capt. R. C. Smith, was in convoy in the North Atlantic, some hundreds of miles off the coast of Portugal on February 9th, 1941, when she was torpedoed and sunk by a German submarine. The vessel carried a crew of 30, three of whom were lost when the ship sank. The remaining 27 were picked up by the steamship *Brandenburg* but lost their lives when that ship was sunk on the following day. The sole survivor, a passenger, was eventually landed at Gibraltar.

COURTOWN

Harrison, Sons & Co.; 1909; J. Readhead & Sons; 4,419 tons; 375x51-5x25-6; 399 n.h.p.; triple-expansion engines.

The British steamship *Courtown* was in collision and sank three miles north of Pendeen on September 28th, 1924, while on a voyage from Cardiff to Montevideo with a cargo of coal.

COVENTRY

E. Jenkins & Co.; 1883; E. Witty & Co.; 1,678 tons; 257-6X 34-6x19-4; 178 n.h.p.; compound engines.

The British collier *Coventry* was wrecked on October 1st, 1908, at the entrance to Oporto. She was on a voyage from Newport to Oporto with a cargo of coal.

COVENTRY

British Navy, anti-aircraft cruiser; 1917; Swan, Hunter; 4,290 tons; 450x43-5x16-2; 40,000 s.h.p.; 29knots; turbine engines; Yarrow boilers; ten 4 in. guns, 14 m.g.

The anti-aircraft cruiser *Coventry*, Capt. R. J. R. Dendy, was attacked by aircraft off Tobruk on September 14th, 1942, and sunk. The vessel's official complement was 400.

COVINGTON

United States Government; 1908; F. Schichau; 16,339 tons; 582-3x65-4x46-5; 1,104n.h.p.; 15-5 knots; quadruple-expansion engines.

The United States transport *Covington* was the former Hamburg-America liner *Cincinnati*, which had been taken over by the Americans when their country entered the First World War in April, 1917. On the night of July 1st, 1918, the transport was homebound and not carrying troops when she was torpedoed by a German submarine. The *Covington* was in convoy and the submarine discharged her torpedo without being sighted, or any warning of her presence coming to the ship or to the destroyer escort. Six seamen lost their lives.

COWARRA

Australian Steam Nav. Co.; 1860; United Kingdom; 439 tons; 160X — X-; 170 h.p.

The Australian steamship *Cowarra*, approaching the port of Newcastle, N.S.W., in a strong easterly gale, was driven on to Oyster Bank and wrecked on July 12th, 1866. Only one man of the 61 passengers and crew was saved.

COWSLIP

British Navy, sloop; 1917; Barclay, Curie & Co.; 1,290 tons; 262-2x35x12-5; 2,800i.h.p.; 17 knots; triple-expansion engines; two 4 in. guns, one 12pdr.

The sloop *Cowslip* was torpedoed and sunk by a submarine off Cape Spartel on April 25th, 1918. Her official complement was 98.

COYLET

T. Dunlop & Sons; 1918; Sir J. Laing & Sons; 5,522 tons; 400x52-4x28-5; 517n.h.p.; triple-expansion engines.

The British oil carrier *Coylet* caught fire and sank on February 8th, 1922, approximately 12 miles south-west of Sand Key, while on a voyage from New Orleans to Dunkirk with a cargo of benzene.

CRAFTSMAN

Charente S.S. Co. (T. & J. Harrison); 1922; Furness Shipbuilding Co.; 8,022 tons; 450-5x58x38-4; 1,004n.h.p.; 14-5 knots; turbine engines.

The steamship *Craftsman*, Capt. W. F. Hallaway, was sunk by a German raider on April 9th, 1941, about 300 miles E. of St. Paul Rocks. There was a brief action before the vessel surrendered and Capt. Hallaway was blinded by an explosion. Six men were killed. The survivors were taken prisoner.

CRAGNESS

Sir W. R. Smith & Sons; 1906; Bremer Vulkan; 5,045 tons; 410-4x52-7x28; 528 n.h.p.; quadruple-expansion engines. The British steamship *Cragness* was wrecked at Barracouta Point, 40 miles south of Mozambique on April 30th, 1924. She was carrying a cargo of coal on a voyage from Port Natal to Perim.

CRAIGELLACHIE

Maclay & McIntyre (GlasgowNav. Co.); 1899; A. Rodger & Co.; 3,271 tons; 326-6x48x23-5; 281 n.h.p.; triple-expansion engines.

The British cargo ship *Craigellachie* was wrecked on May 11th, 1900, on Reit Point near Port Alfred. She was on a voyage from Hull to Natal with a cargo of Government stores.

CRAIGLANDS

R. Hardy & Co.; 1897; W. Gray & Co.; 1,114 tons; 228x30-1x16-8; 99 h.p.; compound inverted engines.

The British cargo ship *Craiglands* was wrecked on September 29th, 1882, at Bjoroklubb. She was sailing from Simo to London with a cargo of deals.

CRAIGLEE

Snowdon S.S. Co. (C. Radcliffe & Co.); 1889; Campbeltown S.B. Co.; 1,921 tons; 285x39-1x18-5; 177n.h.p.; triple-expansion engines.

The British ship *Craiglee* foundered on September 25th, 1904, off Sicily while on a voyage from Achary to Manchester with a cargo of wheat.

CRAMLINGTON

Furness, Withy & Co.; 1907; Grangemouth & Greenock Dockyard Co.; 1,824 tons; 275-1x40-6x18-6; 175 n.h.p.; triple-expansion engines.

The British ship *Cramlington* with a cargo of coal and coke was sunk in a collision at midnight on October 21st, 1908, on Haile Sand at the mouth of the Humber. She was on a voyage from the Tyne to Seville.

CRANE

Dent & Co.; 1879, J. L. Thompson & Sons; 1,860 tons; 275-5x35x24; 180 n.h.p.; compound engines.

The British cargo ship *Crane* foundered near Ceuta on July 17th, 1896. She was carrying a cargo of ore from Benisaf to Middlesbrough.

CRANE

Kellsall Bros. & Seeching; 1903; Goole S.B. Co.; 168 tons; 110-3x20-9x11; 45 r.h.p.; triple-expansion engines.

The steam trawler *Crane* was engaged upon her lawful occasions off the Dogger Bank on the night of October 21st, 1904, when she and her consorts were fired on by the Russian Baltic Fleet on its way to the Far East. The incident caused a great sensation throughout Europe, producing reactions far more intense than its importance merited. Before the furore had died down the British Home, Channel and Mediterranean squadrons were warned for action and the verge of a European war had been reached.

The Russo-Japanese War was then in its ninth month, by which time the Russian Pacific Squadron at Port Arthur had been almost annihilated by the Japanese. In order to bolster up their damaged naval prestige the Russians despatched their Baltic Fleet to the Far East. From the outset the cruise was dogged by misfortune, for, on emerging from the Skagerrack on Friday, October 21st, the transport *Kamschatka*, which had lost touch, fired on the Swedish vessel *Aldebaran*, mistaking her for a Japanese warship. A succession of signals sent out by the transport to the effect that she was attacked by enemy torpedo boats, produced an unfortunate state of nerves among the Russian commanders. That same night the fleet encountered what it conceived to be a flotilla of hostile torpedo boats, which were, in fact, nothing more than British fishing trawlers. The Russians opened up a devastating fire from their nearest ships. The steam trawler *Crane*, Skipper George Smith, was sunk in a few minutes, Smith and the third hand, Leggott, being killed and six others wounded. In addition the trawlers *Moulmein* and *Mino* were hit repeatedly, but suffered no casualties. The squadron then passed on, leaving one ship to watch the trawlers, but offering no assistance and sending no boats.

After public excitement had died down both governments agreed to an impartial examination of the incident by an International Commission to sit in Paris.

After careful and searching examination the commission reported at the beginning of March 1905. It expressed the opinion that the Russian commanders were sincere in their belief that they could discern hostile torpedo boats among the fishing fleet. It censured Admiral Rojdestvensky, commanding the Baltic Fleet, for his omission to report the affair when passing Dover, and stated that in its view the firing was unduly prolonged. Finally,

"..... the majority of the Commissioners declare that they lack precise elements to identify on what objects the ships fired, but the Commission unanimously recognised that the boats of the flotilla committed no hostile act, and the majority of the Commissioners, being of the opinion that there was no torpedo boat either among the trawlers or on the spot, the fire opened by Admiral Rojdestvensky was not justifiable." Both governments accepted the report and Russia agreed to indemnify the relatives of the victims and all others concerned.

CRANFIELD

CRANFIELD

British India Steam Navigation Co.; 1919; W. Pickersgill & Sons; 5,332 tons; 400x52-3x28-5; 517n.h.p.; 10-5 knots; triple-expansion engines.

The steamship *Cranfield* was off the west coast of India on November 23rd, 1942, when she was torpedoed by a submarine. Two torpedoes were discharged, both hitting the target and the second one causing vital damage to the engine room. Nine Indian seamen were killed. The survivors took to the boats and landed on the coast of Travancore without further incident.

CRANFORD

London & Northern Steamship Co.; 1888; W. Gray & Co.; 2,293 tons; 293x38-2x18-7; 240n.h.p.; 9 knots; triple-expansion engines.

The steamship *Cranford* left the Tyne on Wednesday, October 12th, 1910, for Italy with a cargo of gun mountings and machinery. The ship was commanded by Capt. Fettes and carried a crew of 23 all told. The weather was very bad and on the night of the 12th-13th it was blowing a hurricane. Signals of distress were sent up by the ship and were seen at Hartlepool, but soon afterwards they ceased. On the following days quantities of wreckage, identified as coming from the *Cranford*, were washed up along the coast. There were no survivors and the steamship was ultimately posted as missing.

CRANFORD

Lykes Bros. Steamship Co.; 1920; Geo. A. Fuller Co.; 6,096 tons; 393-7x55-1x31-4; 363 n.h.p.; triple-expansion engines.

The American steamship *Cranford*, on a voyage from Table Bay to Trinidad, was torpedoed and sunk by a German submarine on July 30th, 1942, with the loss of 11 lives.

CRATHORNE

Akties. Crathorne (O.A.T. Skjelbred); 1888; W. Gray & Co.; 2,619 tons; 300x40-7x21; 236 n.h.p.; triple-expansion engines.

The Norwegian steamship *Crathorne* was sunk by a submarine on December 10th, 1917, in the Mediterranean.

CREE

Muir Young; 1920; Commonwealth Naval Dockyard; 4,791 tons; 372x54-3x25-6; 311 n.h.p.; triple-expansion engines.

The steamship *Cree* was torpedoed and sunk by a German submarine on November 21st, 1940, about 400 miles W. of Ireland, with the loss of all on board, 41 crew and two gunners.

CREEKIRK

Muir Young; 1912; R. Duncan & Co.; 3,917 tons; 353-3X 51-1x23-8; 338 n.h.p.; triple-expansion engines.

The steamship *Creekirk* left Sydney, N.S., on October 5th, 1940, for Workington in convoy. She straggled from convoy and was torpedoed and sunk by a German submarine on the 18th, with the loss of her entire crew of 35 and a gunner.

CREEMUIR

Muir Young; 1924; Palmers'Co.; 3,997 tons; 360-2x51x24-7; 352 n.h.p.; triple-expansion engines.

The steamship *Creemuir* was bombed and sunk by German aircraft on November 11th, 1940, between Stonehaven and Aberdeen. Twenty-six of her crew and one gunner were lost.

CREMA

Italian Government; 1920; Blyth S.B. & D.D. Co.; 1,684 tons; 260-3x37-3x16-4; 244n.h.p.; triple-expansion engines.

The steamship *Crema* was formerly the French *Hebe*, taken over by the Italians. On April 1st, 1943, she was torpedoed and sunk by a British motor torpedo boat five miles E. of Cape Farina.

CREOFIELD

Field Tank S.S. Co. (Hunting & Son); 1928; Goole S.B. & Rep. Co.; 838 tons; 185-2x31-4x14; 166n.h.p.; 10 knots; triple-expansion engines.

The small tanker *Creofield*, Capt. C. F. Carlin, left London for Middlesbrough on January 30th, 1940. She was never heard of again and was presumed to have been sunk by enemy action on or about February 1st, 1940. The *Creofield* carried a crew of 17.

CREOLE PRINCE

Prince Line; 1893; Short Bros.; 1,988 tons; 282x37-7x14-9; 219 n.h.p.; triple-expansion engines.

The British cargo ship *Creole Prince* was sunk in a collision on October 22nd, 1916, about six miles north-west of Cape Sparte. She was on a voyage from Manchester to Famagusta.

CRESSINGTON COURT

Court Line; 1929; Northumberland Shipbuilding Co.; 4,971 tons; 405-5x55-5x25-1; 482n.h.p.; 13-5 knots; oil engines.

The *Cressington Court*, Capt. Pace, was running under government charter when she was torpedoed and sunk by a submarine in the South Atlantic, N. of Paramaribo, on August 19th, 1942. Capt. Pace and eight others were killed. The *Cressington Court* was not in convoy at the time of the sinking.

CRESSY

British Navy, armoured cruiser; 1899; Fairfield Co.; 12,000 tons; 454x69-5x28; 21,000i.h.p.; 20-7 knots; triple-expansion engines; Belleville boilers; two 9-2 in. guns, twelve 6 in., twelve 12 pdr., three 3 pdr., 2 T.T.

Cressy, Capt. R. W. Johnson, was one of the three ships of the 7th Cruiser Squadron which met with disaster at the hands of the German submarine *U-9* on September 22nd, 1914. The squadron, consisting of the acting flagship *Aboukir*, *Cressy* and *Hogue*, was cruising off Ymuiden after a heavy gale. The ships were without a destroyer screen and they were too far north for safety. Attack by submarine was not anticipated owing to the seas, and the ships were proceeding at an easy ten knots without zig-zagging.

At 6.30 a.m. *Aboukir* was torpedoed and began to sink. Her consorts at once stopped and lowered their boats and it was while engaged in the work of rescue that they were torpedoed, *Hogue* being hit soon after *Aboukir*. *Cressy* was the last to be attacked, and, as she had every boat away and mostly filled with survivors, she possessed little means for saving her own crew. The loss of life on this ship was therefore very heavy.

Within three-quarters of an hour three big cruisers and over 1,400 officers and men were lost. The survivors numbered 60 officers and 777 men.

The full story of the disaster is related under *Aboukir*.

CREST

Dent & Co.; 1877; J.L. Thompson & Sons; 1,696 tons; 260-2 x 34x23-8; 180 h.p.; compound inverted engines.

The British cargo ship *Crest* was wrecked on December 15th, 1882, at San Sebastian, Brazil, while on a voyage from Santos to New York with a cargo of coffee.

CRESTED EAGLE

General Steam Navigation Co.; 1925; J. Samuel White & Co.; 1,110 tons; 299-7x34-6x11-1; 538n.h.p.; 18-8 knots; triple-expansion diagonal engines.

The well-known Thames paddle steamer *Crested Eagle* was taken over by the Admiralty during the Second World War to be used as a minesweeper. On May 29th, 1940, when assisting in the evacuation of the British Army from the Dunkirk beaches, she was bombed by German aircraft. At the time of the attack the *Crested Eagle* was carrying about 600 troops in addition to crew. She was set on fire and was run ashore, over 300 of those on board being either killed or drowned.

The full story of the Dunkirk Evacuation is told under the destroyer *Grafton*.

CREWE

Dent & Co.; 1899; Wood, Skinner & Co.; 3,139 tons; 325-5X 48-2x21-8; 269n.h.p.; triple-expansion engines.

The British cargo ship *Crewe* was sailing in ballast on May 16th, 1901, from Sydney, C.B., to Wabana, N.F.L., when she was wrecked at St. Shotts Bay, N.F.L.

CRICCIETH CASTLE

M. Owen & Co.; 1876; Owen & Co.; 234 tons; 102-2x24-6X 13-7.

The brig *Criccieth Castle* struck on the rocks below Peninnis Head, St. Mary's, Scilly Isles, one night in 1883. There was a violent gale

raging at the time and little could be done to save the crew. By daylight it was found that all on board, including the Falmouth pilot, had been drowned.

CRICHTOUN

George Gibson & Co.; 1920; John Cran & Somerville; 1,097 tons; 235-2x34x17-7; 1,200 i.h.p.; 10-5 knots; triple-expansion engines.

The steamship *Crichtoun*, Capt. Malcolmson, was torpedoed and sunk by a German motor torpedo boat off Lowestoft at midnight on March 19th, 1945. Twenty of her crew of 21 and two of her four gunners were lost.

CRICKET

Penny Steamboat Co.; 1846; W. Joyce & Co.; 12-25 knots; double cylinder compound oscillating engines.

The Thames steamship *Cricket*, Capt. Carter, was a small vessel belonging to the Penny Steamboat Co., which also owned two other steamships similar in design, the *Ant* and the *Bee*. This tiny fleet was employed in carrying passengers between the City and the West End of London, at fares of one-halfpenny upwards. The ship's engines had been condemned in a book, the "Steam Engine", written about six months previously by a Mr. Pertwine, an engineering expert, who pointed out that serious accidents were bound to occur if steamships like the *Cricket* were allowed to ply on the Thames without examination by the authorities. On Friday morning August 27th, 1847, at 9.30, she was lying at the landing stage at London Bridge, having taken on board about 150 passengers, when there was a terrible explosion and the boiler of the *Cricket* was hurled 100 feet along the river, and six persons were killed and 11 seriously injured. The explosion completely destroyed the after portion of the steamship. Fortunately a large number of the passengers were seated forward and these escaped unhurt, though nearly all were stunned or shaken. The large number of small boats in the vicinity and the steamship's proximity to the landing stage enabled everybody to get ashore without further mishap. Shortly after the explosion the *Cricket* sank.

At the inquest it was stated that Capt. Carter had just left the engine room, and that the engineer and stoker were on deck when the disaster occurred. It was also revealed that it was not unusual to leave the boiler and engines unattended when the steamships were lying at landing stages. A verdict of "Manslaughter" against Heasman, the engineer, was returned by the jury.

An inquiry established that the engines ran well for several months when under the care of an engineer named Kent. When Kent left another engineer, by name Clark, was engaged. It was this man's practice to tie down the safety-valve with spun-yarn, by which means he was able to force up the pressure. Complaints from the captain and superintendent that he failed to obtain the same results from the engine as Kent had done, made him resort to this dangerous expedient.

It was stated that the pressure could be forced up to 60lb. immediately by this means and that after five minutes it became 90lb., after ten minutes 140lb., and after 15 minutes 180lb. Clark was later dismissed for his mishandling of the boiler and a third engineer, named Heasman, was engaged. Unfortunately this man resorted to the same practices as his predecessor.

Both engines and boilers had been made and fitted by Mr. W. Joyce, who was present at the inquiry, and who stated that they were constructed on a combination of the low and high pressure principles, with oscillating cylinders.

At a later date Heasman was tried and found guilty, but received a light sentence of two months imprisonment, probably on account of the lack of supervision exercised by the company over its steamboats, which was a contributory factor in these malpractices.

CRINNSSEN

Koninkl. Nederlandsche Stoomboot Maats.; 1919; Maats. Fyenoord; 4,282 tons; 342-8x47-7x24-5; 311 n.h.p.; triple-expansion engines.

The steamship *Crijnsen* was torpedoed and sunk on June 10th, 1942, on a voyage from Curacao to New Orleans. One of her crew and 18 passengers were lost. The American steamship *Lebore* picked up 49 survivors on June 11th, but many of these were lost when the *Lebore* was sunk on the 16th.

CRBMDON

Erik Brodirfs Rederiaktieb.; 1878; W. Gray & Co.; 1,599 tons; 261-8x34-7x19-3; 167 n.h.p.; compound engines.

The Swedish steamship *Crimdon* was torpedoed and sunk by a submarine in the North Sea on July 27th, 1918.

CRISPIN

Booth S.S. Co.; 1907; Sir Raylton Dixon & Co.; 3,965 tons; 355-1x49-3x24-1; 408 n.h.p.; 12-5 knots; triple-expansion engines.

The *Crispin* was torpedoed and sunk by a submarine 14 miles from Hook Point, Waterford, on March 29th, 1917. Eight persons were killed. The captain was among the survivors.

CRISPIN

Booth S.S. Co.; 1935; Cammell, Laird & Co.; 5,051 tons; 412-2x55-7x26; 603 n.h.p.; 13 knots; triple-expansion engines & L.P. turbine.

The *Crispin*, Lt. Cdr. B. Moloney, D.S.O., was taken over by the Admiralty early in the Second World War. On February 3rd, 1941, she was torpedoed by a German submarine about 500 miles W. of Ireland. She sank on the following day. Cdr. Moloney, seven officers and 12 ratings were killed and three officers were wounded.

CRISTINA

Cia. Naviera Vascongada; 1903; Const. Nav. Espanola; 2,083 tons; 281-7x40x19-2; 184 n.h.p.; triple-expansion engines.

The Spanish steamship *Cristina* was torpedoed and sunk by a German submarine on March 10th, 1918, in the Bristol Channel.

CRISTINA RUEDA

A. Menchaca; 1872; A. Leslie & Co.; 1,353 tons; 240-4X 30-8x17-6; 134 n.h.p.; compound engines.

The Spanish steamship *Cristina Rueda* was wrecked during a storm on February 24th, 1925, on the He de Re, Bay of Biscay.

CRISTOBAL COLON

Spanish Navy, armoured cruiser; 1896; Sestri Ponente; 6,840 tons; 328x59-7x24; 14,000 i.h.p.; 23 knots; triple-expansion engines; two 10 in. guns, ten 6 in., six 4-7 in., ten 2-2 in., ten 1-4 in., 2 m.g., 4 T.T.

The *Cristobal Colon* was originally built for the Italian navy as the *Giuseppe Garibaldi*, but was purchased by the Spanish government in 1897 and renamed. The ship had turrets fore and aft carrying Armstrong guns; these were removed at Cadiz in order that Spanish Hontoria guns might be mounted in their places. This work was never carried out and when the American-Spanish War was declared the ship was obliged to join the Spanish Atlantic Squadron under Admiral Cervera without them. Her secondary armament was, however, intact. She was very speedy, having achieved 23 knots on her trials, though only designed for 20. The *Cristobal Colon* was commanded by Capt. Moreau, and also wore the flag of Cdre. de Paredes. She carried a complement of 567.

On the morning of July 3rd, 1898, the squadron left Santiago de Cuba in an attempt to run the gauntlet of the powerful U.S. blockading fleet and reach Havana. After an action lasting three hours and fifty minutes the four armoured cruisers and two destroyers which composed the squadron were totally destroyed.

As the newest and fastest unit of the fleet the *Cristobal Colon* managed for a time to avoid the terrible punishment which fell to the lot of her consorts. At one time she was six miles ahead of the American ships and bade fair to make good her escape, being covered by the delaying action of the *Viscaya*. This favourable condition of affairs terminated with startling suddenness when her supply of best steam coal became exhausted. She was compelled to fall back upon coal of an inferior quality and her steam pressure at once decreased. Without her heavy guns, and relying solely upon her secondary batteries, she was soon outmatched by the heavy U.S. battleships. Nevertheless she suffered surprisingly little damage, and was never set on fire.

After a long chase the *Cristobal Colon* entered the mouth of the Tarquino River. Capt. Moreau then hauled down his flag and prepared to surrender. At the same time the engineers below opened the valves and flooded the lower decks, so that on the arrival of the

CRISTOBAL COLON

Americans the ship was sinking. Thus ended the last of the Spanish Atlantic Squadron.

The full story of the battle is told under the name of the flagship, the *Infanta Maria Teresa*.

CRISTOBAL COLON

Cia. Trasatlantica; 1923; Soc. EspaHOLA Constr. Naval; 10,833 tons; 480-6x61-2x32-7; 7,775 n.h.p.; turbine engines.
The Spanish liner *Cristobal Coldn*, Capt. Crescencia Navaro, on a voyage from Cardiff to Veracruz, was wrecked on October 25th, 1936, near North Rock, N.E. reefs, Bermuda.

CRITON

Ministry of War Transport (Sir R. Ropner & Co.); 1927; W. Gray & Co.; 4,564 tons; 400x53x25-1; 439 n.h.p.; triple-expansion engines.

The former French steamship *Criton* left Peper in mid-June, 1941, under command of a naval lieutenant, bound to Belfast where she was to be entered into British registry. She straggled from convoy and was intercepted by a French (Vichy) cruiser on June 20th. Disregarding orders to maintain wireless silence and to proceed to Konakry the commander of the *Criton* reported his arrest by wireless, whereupon the cruiser opened fire and sank the ship. Ten of her crew were killed on board and four more died after being landed.

CROMA

Dent & Co.; 1883; J.L. Thompson & Sons; 3,187 tons; 330-3 x 43-7x27-3; 269 n.h.p.; compound engines.

The British cargo ship *Croma* was wrecked on August 20th, 1899, on Swona Island, Pentland Firth. She was on a voyage from Dundee to New York with a general cargo.

CROMARTY

John Warrack & Co.; 1892; A. Stephen & Sons; 2,881 tons; 319-5x42-1x17-2; 279 n.h.p.; triple-expansion engines.

The British cargo ship *Cromarty* was wrecked on January 23rd, 1898, on San Pedro Shoal, St. Michaels. She was on a voyage from Shanghai to New York.

CROMARTY

British Navy, fleet-minesweeper; 1940; Blyth Shipbuilding Co.; 672 tons; 174x28-5x9-5; 2,400 s.h.p.; 16 knots; turbine engines; 3-drum boilers; one 3 in.A.A. gun, two 20mm., 4 m.g. Cromarty,
Lt. Cdr. C. G. Palmer, D.S.C., R.N.Z.N., struck a mine and sank at the approaches to the straits of Bonifacio on October 23rd, 1943. Five officers and 15 ratings were killed. Cdr. Palmer was among the survivors but was wounded.

CROMER

British Navy, fleet-minesweeper; 1940; Lobnitz & Co.; 672 tons; 180x28x9-5; 2,400 i.h.p.; 16 knots; triple-expansion engines; 3-drum boilers; one 4 in.A.A. gun, two 20mm., 4 m.g. Cromer,
Cdr. R. H. Stephenson, D.S.O., struck a mine and sank off the coast of Libya on November 9th, 1942. Three officers including Cdr. Stephenson and 43 ratings were killed.

CRONSHAGEN

Heinrich F. C. Arp; 1904; A. G. "Neptun"; 1,787 tons; 261-1 x38-1x17-5; 149 n.h.p.; triple-expansion engines.
The German steamship *Cronshagen* struck a mine and sank on April 24th, 1940, near Drogden.

CROWN

Dent & Co.; 1878; J.L. Thompson & Sons; 1,512 tons; 251-1x 33-6x22-3; 150 h.p.; compound inverted engines.
The British cargo ship *Crown* was wrecked on November 15th, 1881, at Harbore, near Jutland, while on a voyage from the Tyne to Copenhagen with a cargo of coal. Seven of the crew were drowned.

CROWN POINT

Norfolk & North American Steamshipping Co.; 1900; J. L. Thompson & Sons; 5,218 tons; 390x51x27-6; 450 n.h.p.; 10 • 5 knots; triple-expansion engines.
The steamship *Crown Point* was torpedoed and sunk by a submarine 55 miles W, of the Scilly Isles on February 6th, 1917. Seven men were killed.

CROWN PRINCE

Prince Line; 1904; W. Dobson & Co.; 2,539 tons; 325x45-3x 20-2; 262 n.h.p.; triple-expansion engines.

The British cargo ship *Crown Prince* was wrecked on October 16th, 1910, at Halandes Point, Cuba. She was carrying a cargo of coffee from Santos to New Orleans.

CROXTETH HALL

Barcelona S.S. Co. (Hall Line); 1917; Palmers' Co.; 5,872 tons; 414-2x52-4x29-3; 556 n.h.p.; 12 knots; triple-expansion engines.

The steamship *Croxteth Hall* struck a mine and sank 25 miles W. of Bombay on November 17th, 1917. Nine men were killed. The captain was among the survivors.

CROXTETH HALL

Ellerman Lines; 1909; Rickmers A.G.; 4,243 tons; 367x47-7x 27-3; 327 n.h.p.; triple-expansion engines.

The British steamship *Croxteth Hall* struck a sandbank and sank off Wandelaar lightship on February 27th, 1929. She was on a voyage from Port Sudan to Antwerp carrying a general cargo.

CROYDON

Andrew Weir & Co. (S.S. Homeric Co.); 1898; J. L. Thompson & Sons; 3,757 tons; 345x48x25-7; 323 n.h.p.; triple-expansion engines.

The British ship *Croydon* was wrecked on April 6th, 1914, at Barbuda while on a voyage from Philadelphia to Barbados with a cargo of coal.

CRUSADER

Eskside S.S. Co.; 1901; Sunderland S.B. Co.; 4,249 tons; 360X 48-2x20-5; 350 n.h.p.; triple-expansion engines.

The British ship *Crusader* was wrecked on February 25th, 1910, on Bird Island, near Port Elizabeth. She was on a voyage from New York to Manila with a cargo of coal.

CRYSTAL

Dent & Co.; 1881; J. L. Thompson & Sons; 2,613 tons; 330x 39x18-9; 300 h.p.; compound engines.

The British cargo ship *Crystal* was sunk in a collision in the Tyne on January 7th, 1892, when setting out on a voyage to New York via Dundee.

CUBA

Pacific Mail S.S. Co.; 1897; Blohm & Voss; 3,168 tons; 307-7X 42-2x24-7; 281 n.h.p.; triple-expansion engines.

The American steamship *Cuba*, sailing with passengers and general cargo from Panama to San Francisco, was wrecked on September 8th, 1923, on San Miguel Island, Santa Barbara.

CUBA

Ministry of War Transport; 1923; Swan, Hunter & Wigham Richardson; 11,420 tons; 476x62-3x35-1; 10,300 s.h.p.; 15-5 knots; turbine engines.

The *Cuba* was a French passenger liner, owned by the Cie. Generate Transatlantique. She left Martinique on October 24th, 1940, for Casablanca and was intercepted by a British warship on the 31st. Thereafter she sailed under the British flag and was managed by Cunard White Star for the Ministry of War Transport. She was in the English Channel, about 50 miles S.S.E. of St. Catherine's Point, on April 6th, 1945, when she was torpedoed and sunk by a German submarine.

CUBA MARU

Kawasaki Dockyard Co.; 1926; Kawasaki Risen K.K.; 5,950 tons; 405x53x34; 902 n.h.p.; oil engines.

The motorship *Cuba Mam* capsized and sank on August 24th, 1942, off Sakhalin Island.

CUBANO

Wilh. Wilhelmsen; 1921; J. L. Thompson & Sons; 5,810 tons; 395-1x53-3x24-7; 603 n.h.p.; triple-expansion engines & L.P. turbine.

The Norwegian tanker *Cubano* was torpedoed and sunk by a German submarine on October 19th, 1940, in the North Atlantic, on a voyage from Melbourne to Montreal, in ballast.

CUBORE

Ore Steamship Corporation; 1917; Bethlehem Steel Co.; 7,777 tons; 449•1x57-2x34-3; turbine engines.

The American steamship *Cubore* was torpedoed and sunk by a German submarine on August 16th, 1918, in the Bay of Biscay.

CULEBRA

Royal Mail Lines; 1919; Irvine's S.B. & D.D. Co.; 3,044 tons; 331 x 46 • 8 x 23 • 1; 310 n.h.p.; triple-expansion engines.

The British steamship *Culebra* sailed from Loch Ewe on January 5th, 1942, for Bermuda in convoy. The convoy was scattered during a heavy gale on the 12th, and *Culebra* never regained contact. On the 17th, she was intercepted by a German submarine and sunk by gunfire, with the loss of all on board, 39 crew and six gunners.

CULMORE

Culmore Ship Co.; 1890; Russell & Co.; 1,720 tons; 260-5x38-2X23-L

The sailing ship *Culmore* was bound from Hamburg to Barry when she was wrecked off Spurn Head, Yorkshire, on November 14th, 1894. Twenty-two of the crew were drowned.

CULVER

British Navy, cutter; 1929; Bethlehem Shipbuilding Corp'n.; 1,983 tons; 250x42x16; 3,220 h.p.; 16 knots; turbo-electric engines; one 5 in. gun, one 3 in.A.A., two 6pdrs. Culver.

Lt. Cdr. R. T. Gordon-Duff, was the ex-U.S. cutter *Mendota* which had been transferred to the Royal Navy under the Lend-Lease agreement. On January 31st, 1942 the vessel was in mid-Atlantic when she was torpedoed and sunk by a German submarine. Eight officers, including Cdr. Gordon-Duff, and 118 ratings were killed.

CULZEAN

J.Kerr&Co.; 1871; J. Reid & Co.; 1,633 tons; 254x40x23-9

The sailing ship *Culzean*, Capt. Pirnie, was wrecked in the Sound of Java on November 22nd, 1881. A gale was blowing at the time and the ship, which had been damaged, was being towed into port for repairs. Seventeen of the crew were drowned.

CUMA

A.Lauro; 1920; Workman, Clark & Co.; 8,260 tons; 462-4X58-3x37-1; turbine engines.

The Italian steamship *Cuma* was torpedoed and sunk by a British submarine on October 18th, 1940, about seven miles E. of Licata.

CUMBERLAND

United States Navy, sloop; 1852; U.S. Navy Dept.; 1,726 tons; 175x45x21; twenty-two 9 in. m.l guns, one 10 in., one 70 pdr. rifled gun.

In March 1862, during the American Civil War, the *Cumberland* was one of a squadron blockading Hampton Roads. The units composing the squadron were wood sailing ships and steamships of no great fighting value, but efficient for the task assigned to them. In addition to the *Cumberland*, which was a three-masted, full-rigged ship of 24 guns, there were the sailing frigate *Congress*, of 50 guns, and the steam frigates *Minnesota* and *Roanoke*, together with some smaller ships. It was known to the Federal government at Washington that the Confederates were making every effort to construct an ironclad ram from the hull of the U.S. steam frigate *Merrimac*. The ship had been cut down to her berth deck, on which was erected a wooden rectangular casemate with sloping sides, 170 feet in length, sheathed with rolled railway iron laid crosswise in two layers and bolted to the wooden backing. The thickness was four inches of iron and 24 inches of wood, making an impenetrable surface to round shot from smooth-bore cannon. To afford protection to the hull the sloping sides of the casemate extended for two feet below the level of the water on either side. Within the casemate were housed six smooth-bore and four rifled guns, and on its roof, at the extreme fore-edge, was a triangular, armoured conning tower. The ship carried no masts, only two flagstuffs, one at either end of the casemate and one funnel. A heavy ram, four feet in length, and made of cast iron was clamped to the bow. This formidable craft was not, however, free from defects, for she drew 22 feet of water and could not steam faster than five knots. Her steering gear did

not function promptly and it took her from 30 to 40 minutes to make a complete turn. Lt. John M. Broke, of the Confederate States Navy, was the genius who had achieved so much out of such unpromising material. The ship was renamed *Virginia* by the Confederates, but her former name of *Merrimac* is the one by which she is best known.

The Federal government appears to have been quite unaware that the ship was in such an advanced state of completion, and her appearance on the afternoon of March 8th, 1862, took the blockading squadron completely by surprise. So great was the anxiety of the Confederates to forestall the ironclad which the Federals were known to be building, that they sent out their ship as soon as it could move.

The Federal ships were lying quietly at anchor when the *Merrimac*, under command of Capt. Franklin Buchanan, came in sight escorted by a few gunboats. The *Cumberland* and the *Congress* immediately cleared for action, but both remained at their moorings. At 500 yards the ironclad fired her first shot, hitting the *Cumberland* and smashing one of the latter's pivot-guns. In reply the wooden ship sent a shot through one of the *Merrimac's* gun ports, damaging two guns and killing and wounding 19 men. The ironclad now ran past the *Congress*, receiving the frigate's broadside of 25 guns without anything more than superficial damage, and replying with her starboard broadside of four guns, which wrought tremendous havoc. For a time she was under fire from both vessels, but turned toward the *Cumberland* and rammed her at almost right-angles, the blow being struck on the starboard side under the fore-rigging. The *Merrimac* then reversed her engines and withdrew, losing her iron ram in the process. The *Cumberland* immediately began to sink, though Lt. Morris, her commander, stoutly refused a summons to surrender, his crew fighting their guns to the last, the vessel sinking with her colours flying. This action was brief and decisive, and the *Merrimac* steamed away toward her next victim, the *Congress*, and left the survivors to swim ashore or be picked up by small boats.

The destruction of the *Congress* is described under that ship's own story.

In the meantime the frigates *Minnesota* and *Roanoke* had come up the river with the intention of helping their unfortunate consorts. The *Minnesota* ran aground about one and a half miles distant from the scene of the fighting and fired some shots at long range during the engagement between the *Congress* and the *Merrimac*, but without effect. The *Roanoke* broke her propeller shaft and was taken in tow, but she, too, grounded and took no part in the action. As it was now sunset, with the tide running out, Capt. Buchanan decided not to risk the *Merrimac* further. He therefore left the *Minnesota* firmly aground, to be dealt with in the morning and, calling off his gunboats, steamed for the Confederate shore where he remained at anchor during the night.

The day's fighting had cost the Federals two useful ships and a loss of 257 officers and men, out of nearly 800 who formed the crews. The casualties on the Confederate ship amounted only to 21, in addition to which she received some superficial damage and had lost her ram.

At about 7 o'clock the next morning the *Merrimac* bore down on the *Minnesota* only to be met by the Federal turret ironclad *Monitor*, Capt. John L. Worden. This vessel had been designed by John Ericsson, a Swedish engineer, and carried a turret containing two smooth-bore guns, the idea being that the turret could be turned in any direction without turning the ship; a simple operation which revolutionised naval architecture. The ship had a hull constructed on the barge principle, being 122 feet long by 34 feet beam, on which was placed a flat upper hull, 172 feet long by 41 feet beam. This upper hull carried the turret, which was placed amidships, with a square armoured conning-tower forward, and two funnels and cowls aft, these being removed when she went into action. She drew only 10 feet of water, her deck being protected by two half-inch thicknesses of iron, bolted to her deck timbers. Her sides had five one-inch thicknesses of iron, two feet wide, running the whole length of the ship above the water-line. The turret was a cylinder nine feet high revolved by steam and containing two 11 in. Dahlgren guns of smooth-bore. This cylinder was composed of eight thicknesses of one-inch wrought iron, bolted together, its roof being protected by railway iron.

Like the *Merrimac*, the *Monitor* had many defects. Her conning-tower had no means of communication with the turret, save by speaking-tube; the speed was very low, being only six knots; the

CUMBERLAND

freeboard was only two feet and the ship was very unsafe at sea; the steam-turret did not function accurately and sometimes swung the guns beyond the target. The vessel, in common with her antagonist, had been completed in a hurry, and left the dockyard as soon as she could possibly be deemed ready for sea.

Both ironclads bombarded one another with great fury but to little effect except that part of the conning tower of the *Monitor* was blown off and Capt. Worden wounded. No lives were lost in either ship. (See also *Monitor*.)

CUMBERLAND

Federal Steam Navigation Co.; 1919; Bremer Vulkan; 10,939 tons; 520x64-2x37-6; 1,270n.h.p.; 14knots; triple-expansion engines & L.P. turbine.

The *Cumberland*, Capt. E. A. J. Williams, was torpedoed and sunk by a submarine on August 23rd, 1940, about 25 miles N. by E. of Malin Head, Co. Donegal. Four of her crew of 58 were killed. Capt. Williams was among the survivors.

CUMBRIAN

. Denholm & Co.; 1882; Whitehaven S.B. Co.; 1,167 tons; 240x33-2x16-1; 99 r.h.p.; compound engines.

The British iron steamship *Cumbrian* was sunk in a collision on July 7th, 1906, off Stockholm on a voyage from Bo'ness to Jacobstad.

CUPAR

British Navy, minesweeper (paddle); 1918; A. MacMillan & Sons; 800tons; 231x28-5x7-5; 2,200i.h.p.; 16knots; triple-expansion engines; Yarrow boilers; one 4 in. gun, one 12pd.
The minesweeper *Cupar* was originally *Rosslare*. She survived the First World War but unfortunately struck a mine off the Tyne on May 5th, 1919, and sank. Other minesweepers blown up in the course of mine clearance after the First World War were *Kinross*, *Erin's Isle*, *Penarth* and *Princess Mary II*.

CURACOA

British Navy, anti-aircraft cruiser; 1917; Pembroke Dockyard; 4,290 tons; 450x43-5x16-2; 40,000 s.h.p.; 29 knots; turbine engines; Yarrow boilers; eight 4 in.A.A. guns, several smaller.

The light cruiser *Curacoa*, Capt. John W. Boutwood, D.S.O., saw service in the First World War when, as a 6 in. gun cruiser, she formed one of a squadron operating under the orders of Rear-Admiral Sir R. Tyrwhitt during the summer of 1918. Early in 1939 the ship was refitted as an anti-aircraft cruiser, her 6 in. guns being replaced by eight 4 in.A.A. guns. During the Second World War she was engaged in convoying duties and it was whilst escorting the Cunard White Star liner *Queen Mary* across the Atlantic that she met with disaster. The liner, which was carrying 15,000 United States troops, was bound for the Clyde when, on October 2nd, 1942, in thick weather, the lookout reported what appeared to be a submarine on the port bow. The *Queen Mary* turned to starboard, *Curacoa*—in pursuit of the submarine and steaming at full speed—crossing her bows with insufficient distance for clearance. A terrific collision ensued, the 80,000 tons of the *Queen Mary* travelling at high speed cutting the cruiser almost in two and carrying her impaled upon her bows for a considerable way. *Curacoa* then broke in two portions which floated by the liner on either side and sank. The whole tragedy did not last more than five minutes, *Curacoa*, which was struck on the port side aft, sinking with the loss of 25 officers and 313 ratings. Twenty-six officers and men, including Capt. Boutwood, were saved.

The disaster occurred at a position some 20 miles N.W. of Bloody Foreland on the coast of Donegal.

The *Queen Mary* sustained considerable, though not vital, damage to her bows. Temporary repairs were effected at Greenock and the ship was enabled to make the return voyage across the Atlantic with very little loss of time.

CURITYBA

Hamburg-SüdamerikanischeDampfschiffahrtsGes.; 1911; FlensburgerSchiffsb.Ges.; 4,969 tons; 402-3x54x26-5; 447 n.h.p.; triple-expansion engines.

The German steamship *Curityba* was sunk by gunfire in the Oslo Fjord on April 10th, 1940, during the German invasion of Norway.

She was later raised and repaired by the Germans. On April 29th, 1942, she was torpedoed and sunk by a British submarine near Kirkenes, Norway.

CURLEW

British Navy, anti-aircraft cruiser; 1917; Vickers; 4,290 tons; 450x43-5x16-2; 40,000 s.h.p.; 29 knots; turbine engines; Yarrow boilers; ten 4 in.A.A. guns, 14 m.g.

The old cruiser *Curlew*, Capt. B. C. B. Brooke, which had been converted into an anti-aircraft ship was attacked by German dive bombers off the coast of Northern Norway on May 26th, 1940, and sunk with a loss of four officers and five ratings killed. The loss of *Curlew* did much to clarify ideas upon the whole question of ships versus aircraft.

CURTATONE

Italian Navy, destroyer; 1922; Orlando; 966 tons; 262-5 x 24-7x8-5; 27,500 s.h.p.; 34 knots; turbine engines; Thorny-croft boilers; four 4 in. guns, two 3 in.A.A., 6 T.T.

The Italian destroyer *Curtatone* struck a mine and sank in the Gulf of Athens on, or about, May 20th, 1941. The vessel carried a complement of about 120.

CUSHING

United States Navy, destroyer; 1935; Puget Sound Navy Yard; 1,465 tons; 344x34-7x9-9; 42,800 s.h.p.; 36-5 knots; turbine engines; Express boilers; five 5 in. guns, 4 m.g., 12 T.T.

The destroyer *Gushing* of the United States Navy took part in the battle of Guadalcanal, fought off that island on the night of November 12th-13th, 1942. The Japanese were encountered in the Lengo Channel shortly before midnight and were engaged at close quarters. The *Gushing* came under heavy fire and was put out of action and set adrift in flames. She remained afloat, however, until the forenoon of the 13th when she foundered.

The losses on both sides were severe.

The full story of the battle is told under the U.S. cruiser *Atlanta* and the Japanese battleship *Kirishima*.

CUVFER

J. Render son; 1883; A. Leslie & Co.; 2, 299 tons; 302 'x 37- 2 X 24-6; 251 n.h.p.; compound engines.

The British steamship *Cuvier* sank after a collision on March 9th, 1900, off the East Goodwin lighthouse with the loss of 26 lives.

CYANUS

Ferguson & Reid; 1880; E. Withy & Co.; 1,635 tons; 265 X 34-4x16-6; ISO.h.p.; compound engines.

The British ship *Cyanus* struck on some rocks and foundered at 10 p.m. on February 9th, 1897, near lie de Sein, Ushant, while on a voyage from Bilbao to the Clyde. She was carrying a cargo of iron ore. Twenty of the crew were drowned. Only one survivor was, clinging to an upturned boat.

CYBELE

DonaldsonBros.; 1874; Stephen; 1,980 tons; 319-6x34-6x 25-5; 300 h.p.; compound inverted engines.

The British cargo ship *Cybele* was wrecked on August 15th, 1880, off Heath Point, Anticosti, on a voyage from the Clyde to Montreal.

CYCLOPS

United States Navy, fleet collier; 1910; United States; 19,360 tons; 542 x65x 27; 14 knots; four 4 in. guns.

The United States fleet collier *Cyclops* was crossing the West Atlantic in March, 1918. The weather at the time was very bad, and the collier was never heard of again.

CYCLOPS

Ocean S.S. Co. (Alfred Holt & Co.); 1906; D. & W. Henderson & Co.; 9,076 tons; 485x58-2x39-5; 585 n.h.p.; 13-5 knots; triple-expansion engines.

The liner *Cyclops*, Capt. L. W. Kersley, was torpedoed and sunk by a German submarine on January 11th, 1942, about 200 miles S.S.E. of Cape Sable. Forty-six passengers and 41 crew were killed. Capt. Kersley was among the survivors.

CYDONIA

Stag Line; 1910; W. Dobson & Co.; 3,085 tons; 331-5x48x22-2; 249 n.h.p.; triple-expansion engines.

The *Cydonia* was wrecked on September 28th, 1916, on Castle Rocks, Holy Island, while employed as a collier for the British Admiralty. She was on a voyage from Methil to Brest.

CYGNET

General S.N. Co.; 1883; Gourlay Bros. & Co.; 2,012 tons; 286x37-2x15-7; 202 h.p.; compound engines.

The British cargo ship *Cygnnet* caught fire and became a total loss on December 29th, 1903, sixty miles south of Vigo while on a voyage from London to Leghorn.

CYGNET

Halcyon Steamship Co.; 1917; Rotterdam Droogd. Maats; 3,628 tons; 361-4x49-9x22-1; 310 n.h.p.; triple-expansion engines.

The Panamanian steamship *Cygnnet* was torpedoed, shelled and sunk by a German submarine on March 12th, 1942, five miles from the Bahamas on a voyage from Demerara to Boston.

CYMBELINE

Bear Creek Oil & Shipping Co.; 1902; Armstrong, Whitworth & Co.; 4,505 tons; 370x48-5x28-7; 412 n.h.p.; 9-5 knots; triple-expansion engines.

The tanker *Cymbeline* was sunk by the submarine *U-33*, Lt. Cdr. Gansser, 29 miles W. by S. of Fastnet on September 4th, 1915. The Germans opened fire from the surface and killed six and wounded six of the crew of 31. The survivors, including the wounded men and the captain, came safely to port.

CYMBELINE

Oil Tank S.S. Co.; 1927; W. Hamilton & Co.; 6,317 tons; 420x54-4x32-5; 572 n.h.p.; triple-expansion engines.

The British tanker *Cymbeline*, on a voyage from Gibraltar to Trinidad, was intercepted by a German raider on September 2nd, 1940, about 1,000 miles W. of the Canary Islands. The raider opened fire, killing seven of her crew, and finally sank the *Cymbeline* with a torpedo.

CYMRIAN

Golden Cross Line; 1905; A. Vuijk; 1,014 tons; 215-6X32-1X15-3; 133 n.h.p.; 8-5 knots; triple-expansion engines.

The steamship *Cymrian* was torpedoed and sunk by a submarine 13 miles S.E. by S. of Tuskar Rock on August 25th, 1917. Ten men were killed. The captain was among the survivors.

CYMRIC

Oceanic Steam Nav. Co. (White Star Line); 1898; Harland & Wolff; 13,370 tons; 585-5x64-3x37-9; 838 n.h.p.; 15 knots; quadruple-expansion engines.

The White Star liner *Cymric* was a victim of the notorious submarine raider *U-20*, Cdr. W. von Schwieger. On April 29th, 1916, she left New York for Liverpool with cargo but no passengers, having a crew of 110. At about 4 p.m. on May 8th, when 140 miles W.N.W. of Fastnet, she was attacked by the submarine. She sustained hits from three torpedoes.

The *Cymric* remained afloat until 3 a.m. on the 9th, when she sank, the survivors getting away in the boats. Four men were killed by the explosion and a steward was drowned when leaving the ship.

Twelve months previously the *U-20* had sunk the *Lusitania*.

CYMRIC PRINCE

Anglo-Belgique Shipping Co.; 1901; Short Bros.; 3,444 tons; 340-3x47-2x26-1; 313 n.h.p.; triple-expansion engines.

The British cargo ship *Cymric Prince* was wrecked on February 23rd, 1917, on the North Bishop rocks. She was on a voyage from Melilla to Hartlepool with a cargo of iron ore.

CYNTHIA

Donaldson Bros.; 1880; D. & W. Render son; 2,152 tons; 329-7x36-8x25-1; 460 h.p.; 10 knots; compound inverted engines.

The British ship *Cynthia* was sunk in a collision with the Allan liner *Polynesian*, 3,983 tons, on May 20th, 1889, in the River St. Lawrence. Eight persons lost their lives.

CYNTHIA OLSON

Oliver J. Olson & Co.; 1919; Manitowoc S.B. Co.; 2,140 tons; 250-5x43-7x20-1; 269 n.h.p.; triple-expansion engines.

The American steamship *Cynthia Olson*, on a voyage from Tacoma to Honolulu with lumber, was torpedoed and sunk by a Japanese submarine on December 7th, 1941, about 1,200 miles W. of Seattle. The crew of 33 and two military passengers were all lost. This was the first American merchant ship to be sunk by the Japanese in the Second World War.

CYPHRENES

C. W. Kellock & Co.; 1872; A. Stephen & Sons; 1,994 tons; 300X34-1X25-5; 250 h.p.; compound engines.

The British cargo ship *Cyphrenes* was sunk in a collision on December 30th, 1893, near Newfoundland. She was on a voyage from Savannah to Liverpool with a cargo of cotton.

CYPRIAN

F. Leyland & Co.; 1874; Bowdler, Chaffer & Co.; 1,433 tons; 292-2x30-1x22-2; 170 h.p.; compound engines.

The British cargo ship *Cyprian* was wrecked on October 14th, 1881, two miles from Nevin, Caernarvonshire, while on a voyage from Liverpool to Genoa. Only eight of the crew survived.

CYPRIAN PRINCE

Prince Line; 1878; Short Bros.; 1,888 tons; 274-5x36x23-8; 203 n.h.p.; compound engines.

The British cargo ship *Cyprian Prince* was wrecked on July 30th, 1908, on the Farillhoes, Portugal. She was on a voyage from Manchester to Alexandria.

CYPRIAN PRINCE

Prince Line; 1937; Furness S.B. Co.; 1,988 tons; 296-5x44-2x16-4; 315 n.h.p.; triple-expansion engines.

The British steamship *Cyprian Prince* was bombed and sunk by German aircraft on April 6th, 1941, at Piraeus, during the invasion of Greece.

CYRENE

W. Coupland & Co.; 1888; Short Bros.; 2,904 tons; 302x42x19-4; 233 n.h.p.; 8-5 knots; triple-expansion engines.

The steamship *Cyrene* was torpedoed and sunk by a submarine 15 miles N. of Bardsey Island on April 5th, 1918. The captain and 23 others were killed.

CYRIL

Booth S.S. Co.; 1883; J. Elder & Co.; 4,380 tons; 380-6X48-2x31-4; 831 n.h.p.; triple-expansion engines.

The British cargo ship *Cyril* was sunk in a collision on September 16th, 1905, near Curralinho on the River Amazon. She was on a voyage from Manaos to Liverpool.

CYRIL

Turnbull Bros.; 1888; T. Turnbull & Son; 2,294 tons; 289>2x38-3x20-7; 219 n.h.p.; triple-expansion engines.

The British cargo ship *Cyril* was wrecked on July 31st, 1906, at Trepassy Bay, N.F.L., while on a voyage from St. John, N.B., to Swansea with a cargo of lumber.

CYRUS

Akt. Dampsk. Cyrus; 1910; Helsingors Jernsk. & Msk.; 1,669 tons; 249-5x38-1x14-9; 150 n.h.p.; triple-expansion engines.

The Danish steamship *Cyrus* was torpedoed and sunk by a German submarine in the North Sea on June 3rd, 1915.

CYRUS H. McCORMICK

U.S. War Shipping Administration; 1942; Permanente Metals; 7,181 tons; 422-8x57x34-8; 339 n.h.p.; triple-expansion engines.

The steamship *Cyrus H. McCormick*, on a voyage from New York to Antwerp, was torpedoed and sunk by a German submarine on April 18th, 1945, off Ushant. Six of her crew were killed.

CZAR

CZAR

Samuelson & Co.; 1858; Hull; 937 tons; 180 h.p.
The steamship *Czar*, Capt. Jackson, left London on January 17th, 1859, for Malta, Corfu, Patras and Alexandria with a cargo of ammunition. She struck on the Vroge Rock, near the Lizard, in the afternoon of January 22nd, 1859, in a strong westerly gale due to the boilers being out of action. The ship sank immediately with the loss of the master, his wife and child, and ten men. About 20 persons were saved.

CZARINA

Southern Pacific Co.; 1883; J. Blunter & Co.; 1,046 tons; 220-3 x 31-6 x 13'3"; 120 n.h.p.; compound engines.
The American steamship *Czarina* was driven on to the jetty at Coos Bay, Oregon, on the night of Wednesday, January 12th, 1910. There were no passengers on the vessel, which was manned by a crew of

31. The *Czarina* was refloated during the night but the force of the seas caused her to drag her anchors and she stranded quite close to shore. Hundreds of spectators lined the beach but were unable to render any assistance and so fierce was the gale that for two days it was impossible to launch a boat. During this time the crew were washed overboard or died from exposure lashed to the rigging. At last, when only nine men remained visible, a tremendous sea swept six of them from the masts, while the other three jumped overboard in the faint hope of reaching the shore. Only one man survived.

CZESTOCHOWA

A. Falter; 1930; Akt.LindholmenMotala; 1,971 tons; 257-3 x 41 • IX18-8; 145 n.h.p.; compound engines.
The Polish steamship *Czestochowa*, on a voyage from the Tyne to Reykjavik, was torpedoed and sunk by a German motor torpedo boat on August 20th, 1941.

D.N.LUCKENBACH

E. F. Luckenbach; 1883; Wigham, Richardson & Co.; 2,929 tons; 330-2x38-3x20•2; 316 n.h.p.; compound engines.
The American steamship *D. N. Luckenbach* was torpedoed and sunk by a German submarine in the Bay of Biscay on October 27th, 1917.

D'ANNUNZIO

Tirrenia Soc. Anon, di Nav.; 1942; 4,537 tons; oil engines.
The Italian motorship *D'Annunzio* was sunk by gunfire from Allied warships on January 16th, 1943, 60 miles S. of Lampedusa. Twenty-five survivors were picked up.

D'ENTRECASTEAUX

Ministry of War Transport (City Line); 1922; *Forges et Chantiers de la Mediterranee*; 7,291 tons; 417-8x55-3x34-5; 416 n.h.p.; triple-expansion engines.
The steamship *D'Entrecasteaux* was torpedoed and sunk by a German submarine on November 7th, 1942, about 300 miles E. of Martinique on a voyage from Pernambuco to England.

DACIA

C. Marwood; 1892; *Tyne Iron S.B. Co.*; 2,958 tons; 315x40-5x21; 265 n.h.p.; triple-expansion engines.
The British cargo ship *Dacia* was wrecked on June 27th, 1892, near Cape St. Vincent, while on a voyage from Barry to Port Said carrying a cargo of coal.

DACRE CASTLE

James Chambers & Co.; 1908; *R. Craggs & Sons*; 4,261 tons; 380x50-5x25-4; 459 n.h.p.; triple-expansion engines.
The British cargo ship *Dacre Castle* was wrecked at Keelung on September 17th, 1912, while on a voyage from Yokohama to New York with a general cargo.

DAFILA

British & Continental Steamship Co.; 1927; *D. & W. Henderson*; 1,940 tons; 291x43x19; 320 n.h.p.; 11 knots; triple-expansion engines.
The steamship *Dafila*, Capt. George F. C. Mugford, was in convoy in the Mediterranean off Derna, Libya, on March 18th, 1943, when she was torpedoed and sunk by an enemy submarine. Twenty-one of her crew were killed and three wounded. Capt. Mugford was among the survivors.

DAFNI

Pandelis Bros.; 1881; *W.B. Thompson*; 1,190 tons; 234 X 32-2x15-3; 157 n.h.p.; compound engines.
The Greek steamship *Dafni* was torpedoed and sunk by a German submarine in the North Sea on December 15th, 1917.

DAGENHAM

Furness, Withy & Co.; 1907; *J. Crown & Sons*; 1,466 tons; 239-3x36x15-5; 179 n.h.p.; triple-expansion engines.
The British cargo ship *Dagenham* was wrecked on April 8th, 1909, on north-west Grunes, Cobo Bay, Guernsey, while on a voyage from the Tyne to St. Malo with a cargo of coal.

DAGFRED

A/S Ocean; 1930; *Akers Mek. Verksted*; 4,434 tons; 385-2 x 54-8x24-4; 626 n.h.p.; oil engines.
The Norwegian motor vessel *Dagfred* was intercepted by a Japanese cruiser and sunk by gunfire on April 6th, 1942, 60 miles E. of Masulipatam on a voyage from Calcutta to Madras.

DAGHESTAN

Common Bros.; 1900; *Short Bros.*; 3,466 tons; 353-1x45-1x18•7; 315 n.h.p.; triple-expansion engines.
The British cargo ship *Daghestan* sank after a collision on December 18th, 1908, off Sandy Hook while on a voyage from New-York to Marseilles with a cargo of grain.

DAGHESTAN

Belgian Government; 1898; *Armstrong, Whitworth & Co.*; 2,817 tons; 304X40x25-4; 265 n.h.p.; triple-expansion engines.
The Belgian tanker *Daghestan* was sunk by a German submarine off Ushant on August 20th, 1915.

DAGHILD

A/S Ocean; 1927; *Burmester & Wain*; 9,272 tons; 471 -8 x 64-2x35; 543 n.h.p.; oil engines.
The Norwegian tanker *Daghild* was torpedoed and sunk by a German submarine on February 7th, 1943, on a voyage from New York to Liverpool.

DAGMAR

Rederi-A/B "Union"; 1908; *Akers Mek. Verksted*; 1,142 tons; 228-6x36-2x15-8; 111 n.h.p.; triple-expansion engines.
The Swedish steamship *Dagmar* foundered on September 17th, 1926, 45 miles from Oland on a voyage from Danzig (Gdansk) to Sundsvall with a cargo of coal.

DAGMAR I

Ministry of War Transport (George Nisbet & Co.); 1903; *Stephenson & Co.*; 2,471 tons; 291x40x26; 265 n.h.p.; 12-5 knots; triple-expansion engines.
The steamship *Dagmar I*, Capt. A. D. Holburn, was bombed and sunk by German aircraft on February 9th, 1941, about 200 miles W. by S. of Cape St. Vincent. Five men were killed. Capt. Holburn was among the survivors.

DAGNY

M. Carl; 1901; *W. Gray & Co.*; 1,220 tons; 232x34x16-7; 125 n.h.p.; triple-expansion engines.
The Danish steamship *Dagny* was torpedoed and sunk by a German submarine in the Bay of Biscay on January 6th, 1918.

DAGNY I

D/S A/S Dagny I; 1916; *L. Smit & Zoon*; 1,392 tons; 239-5 x 36-2x16-7; 127 n.h.p.; triple-expansion engines.
The Norwegian steamship *Dagny I* was bombed and sunk by German aircraft on August 9th, 1941, off the north coast of Norway. Four of her crew and two passengers were killed.

DAGOMBA

Elder Dempster Lines; 1928; *A. McMillan & Son*; 3,845 tons; 360 x51x 20; 650 n.h.p.; 12-5 knots; oil engines.
The motorship *Dagomba*, Capt. J. T. Marshall, was torpedoed and sunk by a German submarine on November 3rd, 1942, about 500 miles S.W. of Freetown. Of her complement of 56 crew, six gunners and one passenger, 23 were picked up by a French warship and interned, 21 including the captain were landed at Luanda by a Portuguese ship.

DAGUE

French Navy, destroyer; 1911; *France*; 7 14 tons; 10-7 draught; 14,000 i.h.p.; 31 knots; turbine engines; Normand boilers; two 4 in. guns, four 6pdr.; 3 T.T.
The *Dague* was escorting a supply convoy to Montenegro on February 24th, 1915. On entering Antivari Harbour she struck a mine and blew up, sinking with 38 out of her complement of 62.

DAH CHONG

Zing Zoon Wah (Dah-Wah S.S. Co.); 1883; *Osbourne, Graham & Co.*; 1,187 tons; 230-5x34-1x16-2; 135 n.h.p.; compound engines.
The Chinese steamship *Dah Chong (Tah Chong)* sank in a collision with the Chinese steamship *Tah Wah* on April 14th, 1931, near Woosung.

DAH PU

Wallem & Co. AIS; 1922; *Howaldtswerke*; 1,974 tons; 270-7x 38-9x21; 160 n.h.p.; triple-expansion engines.
The Norwegian steamship *Dah Pu* was torpedoed and sunk by a submarine on June 28th, 1943, at Muscat. Fifteen of her crew were killed.

DAHRA

DAHRA

Delmas Freres; 1891; J. L. Thompson & Sons; 2,127 tons; 284 x38x18-2; 208 n.h.p.; triple-expansion engines. The French steamship *Dahra* was sunk by a submarine in the Mediterranean on November 4th, 1915.

DAIA MARU

Osaka Shosen R.R.; 1,942 tons. The Japanese cargo ship *Daia Mam* was sunk by U.S. carrier-based aircraft on March 26th, 1945, off Amami O, Ryukyu Islands.

DAIAKITA MARU

Nakagawa Risen K.K.; 2,704 tons. The steamship *Daiakita Maru* was sunk by U.S. carrier-based aircraft on September 12th, 1944, W. of Leyte Island, Philippines.

DAIAN MARU

Fujita Shinzo; 1895; *Nylands Verksted*; 1,249 tons; 229-3x32x19-3; 90 n.h.p.; triple-expansion engines. The steamship *Daian Maru* caught fire after an explosion on November 25th, 1937, off Lui Kui, and later foundered. She was on a voyage from Itozaki to Keelung with a cargo of gasoline in cases.

DAIBOSHI MARU No. 6

Hashiya K.K.; 1902; *Palmers' Co.*; 3,925 tons; 360 • 7 x 48 • 8 x 24-6; 483 n.h.p.; triple-expansion engines. The steamship *Daiboshi (Daibosi) Maru No. 6* was torpedoed and sunk by the U.S. submarine *Spadefish* on November 29th, 1944, about 150 miles S.W. of Inchon, Korea.

DAICHI MARU

Osaka Shosen K.K.; 1905; *Osaka Iron Works*; 1,280 tons; 228X34x19-5; 99 n.h.p.; triple-expansion engines. The steamship *Daichi (Daiti) Maru* was sunk by U.S. land-based aircraft on November 20th, 1944, at the mouth of the Yangtze River.

DAIDO MARU

Osaka Shosen K.K.; 1935; *Uraga Dock Co.*; 2,962 tons; 297-7x45x23-8; 109 n.h.p.; compound engines & L.P. turbine. The steamship *Daido Maru* was taken over by the Japanese Navy and converted into an auxiliary gunboat. On December 4th, 1943, she was torpedoed and sunk by the U.S. submarine *Apogon*, N.E. of Pouape, Caroline Islands.

DAIFUKU MARU

Daifuku Risen K.K.; 1907; *Clyde S.B. & E. Co.*; 3,194 tons; 315-1x46-5x21; 269n.h.p.; triple-expansion engines. The steamship *Daifuku (Daihuku) Maru* was torpedoed and sunk by the U.S. submarine *Snook* on May 5th, 1943, about 100 miles S. of Dairen.

DAIGEN MARU

7,577 tons. The Japanese ship *Daigen Maru* was bombed and sunk by U.S. land-based aircraft on November 19th, 1943, off the north coast of Hainan Islands.

DAIGEN MARU No. 2

Yamato Risen K.K.; 1917; *Ft. Arthur S.B. Co.*; 1,999 tons; 251X43-8X21-6; triple-expansion engines. The Japanese steamship *Daigen Maru No. 2* was torpedoed and sunk by the U.S. submarine *Spadefish* on June 10th, 1945, off Yoichi, Japan.

DAIGEN MARU No. 3

Namura Risen G.R.; 1908; *Russell & Co.*; 5,256 tons; 400 X 52x18-9; 502n.h.p.; triple-expansion engines. The steamship *Daigen Maru No. 3* was torpedoed and sunk by the U.S. submarine *Gato* on February 26th, 1944, about 200 miles N. of Kaap d'Urville, Dutch New Guinea.

DAIGEN MARU No. 7

Namura Risen G.R.; 1937; *Namura Shipyard Co.*; 1,289 tons; 219-3x35-8x18-5; 130 n.h.p.; triple-expansion engines. The steamship *Daigen Maru No. 7* was taken over by the Japanese Navy for use as an auxiliary gunboat. On August 14th, 1944, she was torpedoed and sunk by the U.S. submarine *Croaker* about 100 miles W.S.W. of Inchon, Korea.

DAIGEN MARU No. 8

Nitto Rogyo Risen R.R.; 1938; *Namura Shipyard Co.*; 1,365 tons; 224-4x35-8x19; 126n.h.p.; triple-expansion engines. The steamship *Daigen Maru No. 8* was bombed and sunk by U.S. aircraft on October 13th, 1943, off Amoy.

DAIGO MARU

Osaka Shosen R.R.; 5,244 tons. The Japanese cargo ship *Daigo Maru* was torpedoed and sunk by the U.S. submarine *Balao* on January 8th, 1945, 200 miles W. of Chindo, Korea.

DAIJU MARU

Oiye Zenroku; 1918; *Yamaguchi Shinichi*; 1,279 tons; 217'X 32x18-9; 75 n.h.p.; triple-expansion engines. The steamship *Daiju (Daizyu) Maru* was torpedoed and sunk by the U.S. submarine *Seadragon* on April 23rd, 1944, S. of Katsuura, Japan.

DAIKI MARU

Dairen Risen K.K.; 2,217 tons. The Japanese cargo ship *Daiki Maru* was torpedoed and sunk by the U.S. submarine *Crevalle* on June 10th, 1945, about 50 miles N.W. of Noshiro, Japan.

DAIKYU MARU

Too. Raiun R.R.; 1920; *Nagata Sanjuro*; 1,517 tons; 250x35x 21; triple-expansion engines. The Japanese cargo ship *Daikyu Maru* was bombed and sunk by U.S. carrier-based aircraft on January 12th, 1945, 25 miles N.E. of Binh Dinh, Indo-China.

DAINICHI MARU

Itaya Shosen R.R.; 1922; *Mitsui Bussan Raisha*; 5,813 tons; 385 X 51X 36; 488 n.h.p.; triple-expansion engines. The steamship *Dainichi (Dainiti) Maru* was torpedoed and sunk by the U.S. submarine *Gurnard* on October 8th, 1943, off the north west coast of Luzon, Philippines.

DAINTY

British Navy, destroyer; 1932; *Fairfield S.B. & E. Co.*; 1,375 tons; 326x33x8-5; 36,000 s.h.p.; 35-5 knots; turbine engines; 3-drum boilers; four 4-7 in. guns, 7 smaller, 8 T.T. The destroyer *Dainty*, Cdr. M. S. Thomas, was bombed and sunk by German dive-bombers off Tobruk on February 24th, 1941. Two officers and 13 ratings were killed and one officer wounded. Cdr. Thomas was among the survivors.

DAIREN MARU

Dairen Risen K.K.; 1925; *Mitsubishi Zosen Raisha*; 3,748 tons; 360x46x29-5; turbine engines. The transport *Dairen Maru* was torpedoed and sunk by the U.S. submarine *Sunfish* on November 30th, 1944, about 100 miles S.W. of Chinampo, Korea.

DAISHIN MARU

Oiwa Tokuziro; 1919; *Sir J. Laing & Sons*; 5,878 tons; 400 x 52-4x28-5; 517n.h.p.; triple-expansion engines. The tanker *Daishin (Daisin) Maru* was torpedoed and sunk by the U.S. submarine *Harder* on September 23rd, 1943, off Oshima, Japan.

DAISHIN MARU

Osaka Shosen R.R.; 1905; *Mitsubishi Dkyd. & E. Works*; 1,306 tons; 228x33x18-7; triple-expansion engines. The steamship *Daishin (Daisin) Maru* was bombed and sunk by U.S. carrier-based aircraft on March 1st, 1945, 354 miles E. of Naha, Okinawa Island.

DAISHIN MARU No. 2

Daisin Risen K.K.; 1918; *Chitose Shipyard*; 1,153 tons; 224-5X 33x17-6; triple-expansion engines.

The steamship *Daishin (Daisin) Maru No. 2* struck a mine and sank on July 23rd, 1945, off Yawata, Japan.

DAISHUMARU

Daihuku Risen K.K.; 1919; *Burntisland S.B. Co.*; 3,322 tons; 331-6x46-7x24-8; 398 n.h.p.; triple-expansion engines.

The steamship *Daishu (Daisyii) Maru* was torpedoed and sunk by the U.S. submarine *Seahorse* on November 22nd, 1943, 100 miles N.W. of Nagasaki, Japan.

DAISY MOLLER

Moller Line; 1911; *Bremer Vulkan*; 4,087 tons; 337-6x48-2x 29-2; 245n.p.h.; triple-expansion engines.

The steamship *Daisy Moller* was torpedoed and sunk by a Japanese submarine on December 13th, 1943, off Cocanada on a voyage from Bombay to Chittagong. Forty-nine of her crew, four gunners and two passengers were lost.

DAITEI MARU

Toa Kaiun K.K.; 2,421 tons.

The Japanese ship *Daitei Maru* was bombed and sunk by U.S. land-based aircraft on December 29th, 1943, near Anking, Yangtze River.

DAITEN MARU

Shosho Risen K.K.; 1889; *Harland & Wolff*; 4,555 tons; 400-7X 45-2x28-1; 526 n.h.p.; triple-expansion engines.

The Japanese steamship *Daiten Maru* was torpedoed and sunk by a submarine in the Mediterranean on March 6th, 1918.

DAITOKU MARU

Osaka Shosen K.K.; 6,923 tons.

The steamship *Daitoku Maru* was sunk by U.S. carrier-based aircraft on November 13th, 1944, in Manila Bay.

DAIUN MARU No. 6

Kyowa Risen K.K.; 1913; *Osaka Iron Works*; 601 tons; 163-4X 27x15-5; triple-expansion engines.

The steamship *Daiun Maru No. 6* sank in a heavy sea on February 12th, 1954, five miles off the mouth of the River Tenryu. Sixteen of the crew of 25 were lost. The ship was carrying iron ore.

DAIYA MARU

Showa Kogyo K.K.; 1902; *Mitsubishi Dockyard & Eng. Wks.*; 2,759 tons; 332-1X41-3X22-2; quadruple-expansion engines.

The steamship *Daiya Maru* was wrecked on November 12th, 1945, off Iwanai during a storm.

DAIYETSU MARU

Chuyetsu Risen K.K.; 1891; *Ropner & Son*; 3,092 tons; 324-Sx 41-5x20-2; 235n.h.p.; triple-expansion engines.

The Japanese steamship *Daiyetsu Maru* was sunk by gunfire from a submarine in the Mediterranean on June 24th, 1916.

DAIZEN MARU

Osaka Shosen K.K.; 5,396 tons.

The *Daizen Maru* was torpedoed and sunk by the U.S. submarine *Hawkbill* on February 20th, 1945, about 100 miles S.E. of Bantan Island, Malaya.

DAKAR EPISODE, see BOUGAINVILLE**DAKAR MARU**

Nippon Yusen K.K.; 1920; *Mitsubishi Zosen K.K.*; 7,169 tons; 420X56x38-5; 574 n.h.p.; triple-expansion engines.

The steamship *Dakar Maru* was torpedoed and sunk by the U.S. submarine *Steelhead* on July 31st, 1944, off the north coast of Luzon Island, Philippines.

DAKOTA

Liverpool & Great Western S.N. Co. (Guion Line); 1874; *Palmer's Co.*; 4,332 tons; 400-6x43-4x32-7; 900 r.h.p.; 14 knots; compound engines.

The *Dakota*, and her sister ship the *Montana*, were experimental vessels built with a view to securing for her owners the Blue Riband of the Atlantic. The engines were of an unusual design and the hulls were constructed with a "tumble-home" similar to that which distinguished the old wooden line-of-battleship. The vessels failed to achieve success either as record breakers or as good passenger ships, and their ultimate loss was a benefit rather than a disaster for their owners.

The *Dakota* was wrecked off Anglesey on May 9th, 1877. By a strange coincidence the ship struck at a point not many miles from where the *Montana* was to founder three years later. The vessel left Liverpool for America on the evening of the 9th under Captain Price with 218 passengers and 109 crew, and 1,800 tons of general cargo. At 9.30 p.m., when abreast of Port Lynas Light, the captain gave the order to port the helm. This order was misunderstood and the helm was put over to starboard, thus throwing the vessel off her course. The mistake was noticed too late and although the engines were reversed the *Dakota* stranded at the East Mouse, near Amlwch and not far from Anglesey. All those on board got off in safety, but the ship broke in two the next day and became a total wreck.

DAKSA

Dubrovačka Parobrodskaja; 1911; *J. Readhead & Sons*; 4,260 tons; 372X51-5x25-1; 398 n.h.p.; triple-expansion engines.

On a voyage from La Goulette to Rotterdam with a cargo of iron ore, the Yugoslav steamship *Daksa* was reported to be in distress on January 26th, 1930. Wreckage and bodies were washed ashore on the Portuguese coast.

DALAND

Angf. A/B Tirfing; 1918; *Oskarshamn's M/V A/B*; 2,252 tons; 269-7x41-1x24-1; 270 n.h.p.; triple-expansion engines.

The Swedish steamship *Daland* went ashore outside Ago (Hudiksvall district) on November 8th, 1931. She filled with water and broke in two.

DALEBY

R. Ropner & Co.; 1900; *Ropner & Son*; 3,628 tons; 330-5 X 46-6x24-4; 251 n.h.p.; 9-5 knots; triple-expansion engines.

The steamship *Daleby* was torpedoed and sunk by a German submarine N.W. of Fastnet on April 29th, 1917, while on a voyage from Halifax to London. Twenty-five of her crew, including the captain, were killed.

DALEGARTH FORCE

West Coast Shipping Co.; 1914; *Dundee S.B. Co.*; 684 tons; 175-1x28x11-3; 81 r.h.p.; 9 knots; triple-expansion engines.

The steamship *Dalegarth Force* was torpedoed and sunk by a German submarine 12 miles S.W. of Hartland Point on April 18th, 1918. Five of her crew were killed. The captain was among the survivors.

DALEWOOD

W. Runciman & Co.; 1909; *W. Doxford & Sons*; 2,420 tons; 350 X 51 • 1 X 24; 310 n.h.p.; 10-5 knots; triple-expansion engines.

The steamship *Dalewood* was torpedoed and sunk by a German submarine 10 miles S.W. of the Isle of Man on February 26th, 1918. Nineteen of her crew, including the captain, were killed.

DALHOUSIE

J. Allan; 1848; *Moulmein*; 754 tons.

The wooden ship *Dalhousie* left the Downs on October 18th, 1853, under command of Capt. John Butterworth, bound for Sydney. She had a crew of 48 and 12 passengers and was to embark a further seven at Plymouth. Her cargo was valued at £100,000.

The ship left the Downs with a fresh breeze from the N.W. at 7 a.m. and continued down Channel with the wind growing stronger and the sea rising. During the night the weather became considerably worse until by 4 a.m. there was a full gale with the ship rolling badly. At half-past five she rolled over on her starboard beam ends and lay with her mast head in the water, the seas washing over her. The captain and the first and second officers, with some of the crew

DALILA

and passengers, managed to gain the vessel's weather quarter. The seas washed most of these people away, but a few clung to spars and floating wreckage. After about ten minutes in this position the *Dalhousie* went down by the head, about 16 miles W.S.W. of Beachy Head light.

Only one man, a seaman named Joseph Reed, survived to give an account of the disaster.

In all 59 persons were drowned, including Capt. Butterworth and his wife and son.

DALILA

Union Industrielle & Maritime; 1923; Chantiers Navals Français; 3,176 tons; 313-6x45-9x20-5; 235 n.h.p.; triple-expansion engines.

The French steamship *Dalila* was sunk by British light naval craft on March 12th, 1943, off Gravelines.

DALMATIAL

Lloyd Triestino Soc. Anon. di Nav.; 1903; Lloyd Austriaco; 3,252 tons; 345-2x42-5x14-8; 394 n.h.p.; triple-expansion engines.

The Italian steamship *Dalmatia L.* was torpedoed by a British submarine on January 25th, 1942, and sank on the following day, one mile from San Ranieri, Messina.

DALNY

Chargeurs Reunis; 1914; Bremer Vulkan; 6,673 tons; 472 -3 X 58-9x28-7; 556 n.h.p.; triple-expansion engines.

The French steamship *Dalny* was torpedoed and sunk by a British submarine on June 4th, 1943, near San Remo.

DALRIADA

Clyde & Campbeltown Shipping Co.; 1926; R. Duncan & Co.; 758 tons; 230x34-5x12-7; 348 r.h.p.; 17knots; triple expansion engines.

The passenger steamship *Dalriada* was taken over by the Admiralty during the Second World War for service as a mercantile auxiliary. She was sunk by a mine in the Edinburgh Channel, Thames Estuary, on June 19th, 1942.

DALSERF

James Campbell; 1909; Richardson, Duck & Co.; 1,849 tons; 260-2x40x17-7; 209 n.h.p.; triple-expansion engines.

The British cargo ship *Dalserf* was wrecked on July 10th, 1910, on Grassholm Island while on a voyage from Penarth to Oban with a cargo of coal.

DALTON

Lampart & Holt; 1881; A. Leslie & Co.; 2,030 tons; 315-4X 34-9x24-9; 201 n.h.p.; compound engines.

The British cargo ship *Dalton* was wrecked on September 28th, 1895, at Islay while on a voyage from New York to the Clyde. She was carrying a cargo of grain, oil and wood.

DALTON

Ergasteria S.S. Co.; 1877; M. Pearse & Co.; 1,275 tons; 235 x 32-5x17-9; 136 n.h.p.; compound engines.

The British cargo ship *Dalton* was wrecked on February 19th, 1928, at Planier Lighthouse while on a voyage from Ergasteria to Marseilles with an ore cargo.

DALVEEN

United Steam Nav. Co.; 1927; Scott's S.B. & E. Co.; 5,193 tons; 406-9x52-3x28-3; 449 n.h.p.; triple-expansion engines.

The steamship *Dalveen* was bombed and sunk by German aircraft on September 28th, 1940, on a voyage from Montreal to Hull. Eleven of her crew of 43 were killed.

DAMAO

Portuguese Government; 1911; Swan, Hunter & Wigham Richardson; 5,668 tons; 442-9x57-4x26-7; 701 n.h.p.; triple-expansion engines.

The German steamship *Brisbane* was requisitioned by the Portuguese Government and renamed *Damao*. On April 28th, 1918, she was torpedoed and sunk by a German submarine in the Irish Sea.

DAMARA

Furness, Withy & Co.; 1885; A. Stephen & Sons; 1,179 tons; 275x35x15-4; 206 n.h.p.; compound engines.

The British cargo ship *Damara* was wrecked off Musquodoboit on February 7th, 1905, while on a voyage from Liverpool to Halifax, N.S., with a general cargo.

DAMASKINI

P. G. Anghelatos; 1903; Soc. Anon. John Cockerill; 1,013 tons; 221-8x37x13-5; 93 n.h.p.; triple-expansion engines.

The Greek steamship *Damaskini* was bombed and sunk by German aircraft on April 20th, 1941, in the Oreos Channel, N. of Euboea Island.

DAMMTOR

German; 1944; 2,834 tons.

The German ship *Dammtor* was bombed and sunk by British aircraft on April 19th, 1945, off Pagensand, River Elbe.

DAMPTO

A. H. Mathiesen; 1922; Forth S.B. & E. Co.; 2,494 tons; 295-7x43-6x20-6; 182 n.h.p.; triple-expansion engines.

On a voyage from Chinwangtao to Shanghai with a cargo of coal, the Norwegian steamship *Dampto* was sunk in a collision with the *Ho ten Maru* on July 7th, 1930. The disaster occurred in a fog off Shantung Promontory.

DAN

D/S "Dania" (Chr. Andresen); 1925; Lubecker Maschb. Ges.; 2,116 tons; 280-7x41-7x19; 181 n.h.p.; triple-expansion engines.

The Danish steamship *Dan* foundered on September 8th, 1929, 40 miles N.W. of Brustu Ort on a voyage from Danzig (Gdansk) to Helsingfors with coal.

DANBEARD

U.S. War Shipping Administration; 1943; Permanente Metals Corp.; 7,176 tons; 422-8x57x34-8; 339 n.h.p.; triple-expansion engines.

The American steamship *Dan Beard* was broken in two by an underwater explosion, mine or torpedo, on December 10th, 1944, off Strumble Head, near Fishguard. The after part of the vessel sank but the bow section eventually drifted ashore. Twenty-nine lives were lost.

DANA

Det Danske Kulkompagni; 1905; Burmeister & Wain; 1,590 tons; 255x27-2x17-1; 144 n.h.p.; triple-expansion engines.

The Danish steamship *Dana* was torpedoed and sunk by a German submarine off the north coast of Scotland on June 9th, 1917.

DANA

R. Gohle; 1883; J. Blumer & Co.; 1,620 tons; 258x36x16-5; 178 n.h.p.; compound engines.

The Swedish steamship *Dana* was torpedoed and sunk by a German submarine in the North Sea on November 11th, 1917.

DANDENONG

Howard Smith Line; 1865; Palmer & Co.; 575 tons; 180 x — x —; 9 knots; compound engines.

The steamship *Dandenong* was engaged in the Australian coastal trade between Melbourne and Sydney, having made the trip between the two places no fewer than 205 times. She enjoyed a reputation as a staunch, seaworthy little ship, but shortly after leaving Melbourne on September 8th, 1876, with a full complement of passengers, she had the misfortune to break her main shaft. There was a very heavy sea running and it was discovered that, in breaking, the shaft had started a serious leak. An effort to stop it by using bedding proved futile and it was then decided to jettison some of the cargo, but this was also ineffective.

By the morning of the 11th the storm had grown much worse and the *Dandenong* was in a sinking condition. Soon after daylight the barque *Albert William* bore down to offer assistance, and three boats were launched from the steamship. One of these was smashed in coming alongside the barque and all the occupants drowned; several more lives were lost in transshipment, and darkness fell with

a large number of people still on board the *Dandenong*. The steamship had now lost her steering gear, and her after hold was full of water. The *Albert William* continued to stand by, but between 8 and 9 p.m. the lights of the *Dandenong* vanished, the position of both ships at the time being broad off Jervis Bay.

The total number drowned was 40, including the captain and all the officers.

DANDOLO

Lloyd Triestino Soc. Anon di Nav.; 1921; Swan, Hunter & WighamRichardson; 4,964tons; 413-7x53-2x26-3; 540n.h.p.; triple-expansion engines.

The Italian steamship *Dandolo* was torpedoed by British aircraft on October 8th, 1942, about 60 miles from Ras el Tin.

DANEVBRKE

Suenson & Jespersen; 1907; Howaldtswerke; 1,433 tons; 241•2X36•1x16•5; 96n.h.p.; triple-expansion engines.

The Danish steamship *Danevirke* was torpedoed and sunk in the English Channel on January 5th, 1917.

DANIA

Northern S.S. Co.; 1905; *Sunderland S.B. Co.*; 2,648 tons; 314 X 46 • 5 X 20 • 6; 272 n.h.p.; triple-expansion engines.

The Russian steamship *Dania* was torpedoed and sunk by a German submarine off the north-west coast of Scotland on June 10th, 1915.

DANIEL CHESTER FRENCH

U.S. War Shipping Administration; 1942; *Bethlehem Fairfield Shipyard*; 7,200 tons; 423x57-1x34-9; 339n.h.p.; triple-expansion engines.

The steamship *Daniel Chester French* struck a mine and sank on March 6th, 1944, 18 miles E. of Bizerta. Nine of her crew and 28 army and navy personnel were lost.

DANIEL STEINMANN

White Cross Line; 1875; *Societe Cockerill*; 1,790 tons; 277 -5 x 34-5x25-4; 183 h.p.; 10 knots; compound inverted engines.

The *Daniel Steinmann* with 90 passengers and a crew of 40 under Capt. Van Schoonhoven was on a voyage from Antwerp to Halifax, Nova Scotia, and New York. The ship was carrying some 2,000 tons of cargo in addition to her passengers, mostly German emigrants. On the night of April 3rd, 1884, she had nearly completed her voyage across the Atlantic and was steaming slowly through a dense fog towards Halifax Harbour. For two days it had not been possible to take observations, but Capt. Van Schoonhoven was confident of his whereabouts and continued on his course. At about 10 p.m. the ship struck on the Madrock Shoal, 200 yards from the Sambro' Light which the captain had been assuming was the Chebucto Head Light. The *Daniel Steinmann* bumped over the shoal and dropped her anchors immediately. These were insufficient to hold her and within a few minutes she struck the Gardner Shoal and foundered.

Most of the passengers were in their berths, which accounted for the very heavy loss of life. Those on deck were swept away by an immense wave which swamped the ship and sent her, stern first, to the bottom, only her topsail yards remaining above water. One lifeboat got away with two passengers and five crew and was guided to the shore by lights shown by the lighthouse keepers. Capt. Van Schoonhoven and a boy passenger took to the rigging, from which they were rescued at daylight. Of the 130 persons who were on the ship only three passengers and six crew, including the captain, were saved.

DANIELE MANIN

Italian Navy, destroyer; 1925; *Quarnaro*; 1,058 tons; 295-7X 30-5x10-5; 36,000s.h.p.; 35 knots; turbine engines; Express boilers; four 4•7 in. guns, four 37 mm., two 13 mm., 4 T.T.

The destroyer *Daniele Manin* was a unit of the flotilla which Italy maintained at Massawa, Eritrea. On April 1st, 1941, Swordfish aircraft from the British aircraft carrier *Eagle* began a search of the waters around Massawa for any signs of enemy warships. The *Daniele Manin* was located and driven ashore off Port Sudan on the 2nd, and her destruction was completed by the destroyer *Kingston* a few days later. The *Daniele Manin* carried a complement of about 150.

DANISH PRINCE

Prince S.S. Co.; 1884; *J. Readhead & Co.*; 1,541 tons; 259X 36-1x17-5; 176 n.h.p.; compound engines.

The British cargo ship *Danish Prince* was wrecked on January 30th, 1897, on Cani Rocks, Tunis, while on a voyage from Alexandretta to Liverpool carrying a general cargo.

DANMARK

L. H. Carl; 1893; *Burmeister & Wain*; 1,875 tons; 283-4X 38-2x17-3; 198n.h.p.; triple-expansion engines.

The Danish steamship *Danmark* was sunk by a German submarine off the north-west coast of Spain on December 30th, 1916.

DANMARK

Det Danske Petroleum AS; 1931; *Burmeister & Wain*; 10,517 tons; 490-8x67-8x35-8; 709 n.h.p.; oilengines.

The Danish motor tanker *Danmark* was torpedoed by a German submarine on January 12th, 1940, in Inganness Bay, Kirkwall. The vessel's back was broken by the explosion and she sank on January 21st.

DANOS

R. Gordon & Co.; 1882; *J. L. Thompson & Sons*; 2,003 tons; 275 x37-5x19-5; 200 h.p.; compound engines.

The British cargo ship *Danos* was wrecked on Lea Island on January 20th, 1888, while on a voyage from Odessa to London with a cargo of grain.

DANTE

The Italian sailing ship *Dante* was wrecked in a gale in Cardigan Bay on October 14th, 1870. The Channel pilot and seven of the crew were drowned.

DANTE

Glover Bros.; 1874; *Sofitley & Co.*; 1,743 tons; 275-8 X33-6X 24-4; 160 h.p.; compound inverted engines.

The steamship *Dante* was run down by a Norwegian barque in St. George's Channel on December 29th, 1875. Of those on board 22 were drowned. The captain and first officer were among the survivors.

DANTON

French Navy, 1st class battleship; 1911; *Brest*; 18,400 tons; 480x84-7x27-5; 22,500 i.h.p.; 20-6 knots; turbine engines; Belleville boilers; four 12 in. guns, twelve 9-4 in., sixteen 12pdr., ten 3pdr., 2 T.T.

The battleship *Danton* belonged to a group of capital ships built by the French government before all the details of the dreadnought design were fully appreciated by foreign admiralities. As a result she and her sisters were only the equivalent of the *Lord Nelson* class of the British Navy. The ship carried an official complement of 681 and at the time of her loss was serving with the French Mediterranean Fleet.

On March 19th, 1917, the *Danton* was on her way from Toulon to Corfu, where the French were blockading the Straits of Otranto. The number on board was much in excess of her complement, there being no fewer than 1,102 officers and men. She was escorted by one destroyer. When off the S.W. coast of Sardinia she was sighted by the *U-64*, a submarine with many victims to her credit, her commander being Capt. R. W. Morath. Both Frenchmen were zig-zagging but the *U-64* got home two torpedoes on the battleship. The destroyer at once gave chase and dropped depth charges, but the submarine escaped unscathed.

The *Danton* foundered in three-quarters of an hour, taking with her 296 officers and men. The survivors, most of whom were picked up by the destroyer, numbered 806.

U-64, after several more sinkings, was destroyed by H.M.S. *Partridge* which was convoying off the coast of Sicily. Capt. Morath was saved, but 38 of the crew were lost.

DAPHNE

Glasgow & Londonderry Steam Packet Co.; 1883; *A. Stephen & Sons*.

The small coasting steamship *Daphne*, built for the Glasgow & Londonderry Steam Packet Co., was launched from the yard of Messrs. Stephen & Sons, Linthouse, Govan, just before noon on Tuesday, July 3rd, 1883. The ship had on board nearly 200 men and

DAPHNE

boys who were to carry on with their work as soon as she was properly afloat. As was usual in the launching of ships two anchors and cables were employed to check the way on the vessel after she had entered the water. On this occasion the checking apparatus failed to function. The starboard anchor moved some six or seven yards, but the port anchor dragged for about sixty yards and the current of the river catching the ship at a critical moment turned her over on her port side. The *Daphne* sank immediately in deep water, being completely submerged at high tide.

The disaster was witnessed by a large number of people, many of whom had relatives on board. The death roll amounted to 124 workmen and boys.

DAPHNE

Soc. Navale Caennaise (G. Lamy & Cie.); 1911; Sunderland S.B.Co.; 1,467 tons; 257x35x14-5; 169 n.h.p.; triple-expansion engines.

On a voyage from Caen to Ghent with a cargo of iron ore, the *Daphne* was in collision with another ship and sank off Dungeness on August 25th, 1928.

DAPHNE

LFagreus; 1890; Edwards S.B. Co.; 1,513 tons; 260x36-2x 16-8; 174 n.h.p.; triple-expansion engines.

The Swedish steamship *Daphne* was torpedoed and sunk by a German submarine on December 3rd, 1940, off the coast of Spain. Eighteen of her crew were lost.

DAPHNE

Rederi A/B Daphne; 1920; "De Klop" N. V. Schpsb. en Machfab.; 1,939 tons; 278 • 7X 42 • 1X18 • 3; 238 n.h.p.; triple-expansion engines.

The Finnish steamship *Daphne* was torpedoed and sunk by the German submarine *U-76* on April 3rd, 1941, about 400 miles S. of Iceland on a voyage from Newport News to Petsamo. A few survivors were taken on board the submarine.

DARA

British India Steam Navigation Co.; 1948; Barclay, Curie & Co.; 5,030 tons; 398-7x54-8x—; 14 knots; oil engines.

The British India liner *Dara*, Capt. C. Elson, with a total of 819 passengers and crew, was in the Persian Gulf at the port of Dubai on April 7th, 1961. The vessel was unloading cargo and embarking and disembarking passengers when a violent storm of wind and rain made further work impossible. Capt. Elson decided to take his ship out of harbour and ride out the gale off shore. This was accomplished without further mishap, but while returning to Dubai at about 4.40 on the morning of the 8th there was a very heavy explosion between decks and the ship caught fire.

There was a certain amount of panic among the crew and passengers and many jumped into the sea or overcrowded the lifeboats, several of which capsized. Fortunately there were ships close at hand and help was rendered by British, German, Japanese and Norwegian vessels.

Three British frigates and a U.S. destroyer, sent parties on board and were able to get the fire under control. The *Dara* was then taken in tow by the Glasgow salvage vessel *Ocean Salvor*, but sank three miles off Dubai at 9.20 a.m. on April 10th.

The loss of life was very heavy, 238 being burned or drowned. The remainder, many of whom were suffering from burns and other injuries, were landed at Bahrain a few days later.

Capt. Elson was among the survivors.

DARCOILA

Douglas & Ramsey; 1928; Lithgows; 4,084 tons; 370x50-6x 24-9; 424 n.h.p.; triple-expansion engines.

The British cargo ship *Darcoila* left Milford Haven on September 20th, 1940, on a voyage in ballast to Philadelphia and was never seen again. She was thought to have been sunk by a submarine on September 28th or 29th.

DARDANELLES, see MAJESTIC

DARGAI

Gordon S.S. Co.; 1895; W. Dobson & Co.; 3,555 tons; 346X 44x18-3; 289 n.h.p.; triple-expansion engines.

The British cargo ship *Dargai* was wrecked on English Bank,

Montevideo, on August 28th, 1914, while on a voyage from London to Buenos Aires carrying a general cargo.

DARIEN

F. Leyland & Co.; 1888; Barclay, Curie & Co.; 3,362 tons; 370X 41-2 X 27; 391 n.h.p.; triple-expansion engines.

The British cargo ship *Darien* was wrecked on January 22nd, 1907, near Barranquilla while on a voyage from Liverpool to Savanilla carrying a general cargo.

DARINA

Anglo-Saxon Petroleum Co.; 1939; Blythwood Shipbuilding Co.; 8,113 tons; 465-3x59-3x33-8; 502 n.h.p.; 12-5 knots; oil engines.

The motor tanker *Darina*, Capt. J. M. Cuthill, was torpedoed, shelled and sunk by a German submarine on May 20th, 1942, on a voyage from Stanlow to Texas City. Seven of her crew were killed. Capt. Cuthill was among the survivors.

DARING

British Navy, destroyer; 1932; Thornycroft & Co.; 1,375 tons; 326x33x8-5; 36,000 i.h.p.; 35-5 knots; turbine engines; 3-drum boilers; four 4 • 7 in. guns, 7 smaller, 8 T.T.

The destroyer *Daring*, Cdr. S. A. Cooper, was torpedoed by a German submarine off Duncansby Head, North Scotland, on February 18th, 1940. The *Daring* carried a complement of 162, of whom nine officers, including Cdr. Cooper, and 148 ratings were killed. One officer and four ratings were saved.

DARING

Ellerman Lines; 1917; Ramage & Ferguson; 1,351 tons; 236-3X 36-5x17-1; 203 n.h.p.; triple-expansion engines.

The steamship *Darino* was torpedoed and sunk by a German submarine on November 19th, 1939, off Cape Finisterre on a voyage from Oporto to Liverpool. Sixteen of her crew were killed.

DARIUS

Tempus Shipping Co.; 1903; J.L. Thompson & Sons; 3,426 tons; 345x47-1x24-9; 316 n.h.p.; 10-5 knots; triple-expansion engines.

The steamship *Darius* was torpedoed and sunk by a German submarine 210 miles S.W. of Fastnet on June 13th, 1917. Fifteen of her crew were killed. The captain was among the survivors.

DARKDALE

The Admiralty; 1940; Blythwood S.B. Co.; 8,145 tons; 463-2x 61-2x33-1; 490 n.h.p.; oil engines.

The British naval tanker *Darkdale* was torpedoed and sunk by a German submarine at 12.15 a.m. on October 22nd, 1941, at St. Helena. Thirty-nine of the crew on board and two passengers were killed and only two were saved. The captain and six men were ashore at the time.

DARLINGTON

William Milburn & Co.; 1881; Swan & Hunter; 1,990 tons; 285-8x36x24; 250 h.p.; compound inverted engines.

The British cargo ship *Darlington* was wrecked on Western Reefs, Bermuda, on February 22nd, 1886, while on a voyage from New Orleans to Bremen carrying a cargo of cotton and grain.

DARLINGTON COURT

Court Line; 1936; Lithgows Ltd; 4,974 tons; 414-5x56-2x 25-6; 490 n.h.p.; 13-5 knots; oil engines.

The *Darlington Court*, Capt. Hurst, was torpedoed and sunk by a German submarine on May 20th, 1941, in convoy from New York to Liverpool. Twenty-five men were killed. This was the second occasion on which Capt. Hurst lost his ship by enemy action, he having been in command of the *Arlington Court* when she was torpedoed in 1939.

DARMAS

G. N. Pittas Bros. & Co.; 1883; Palmers' Co.; 1,593 tons; 258-3x36-2x17-3; 155 n.h.p.; compound engines.

The Greek steamship *Darmas* was bombed and sunk by German aircraft in April, 1941, in the Gulf of Patras, during the German invasion of Greece.

DART

Royal Mail Steam Packet Co.; 1882; *R. Dixon & Co.*; 2,641 tons; 320x38-3x26; 350 h.p.; compound inverted engines. The British cargo ship *Dart* was wrecked at San Sebastian, Brazil, on September 11th, 1884, while on a voyage from Santos to New York carrying a cargo of coffee.

DARTFORD

Watts, Watts & Co.; 1930; *Smith's Dock Co.*; 4,093 tons; 366-4x52x24-7; 10-5 knots; triple-expansion engines. The steamship *Dartford*, Capt. S. Bulmer, was in convoy in the North Atlantic on June 12th, 1942, when she was torpedoed and sunk by a German submarine. Twenty-five men were killed on board and two more died after being picked up.

DARTMOOR

I. & P. Hutchison; 1892; *J. Readhead & Sons*; 2,870 tons; 306x41-7x21-2; 246 n.h.p.; triple-expansion engines. The British ship *Dartmoor* was torpedoed and sunk by a German submarine on May 27th, 1917, when she was 35 miles south-east of Fastnet. The captain and 24 of the crew were lost.

DARTMORE

James Cormack & Co.; 1881; *Richardson, Duck & Co.*; 1,579 tons; 260x36x18-2; 187 n.h.p.; compound engines. The British cargo ship *Dartmore* was wrecked on February 15th, 1917, near Cap Gris Nez. She was on a voyage from London to Dunkirk with a cargo of military stores.

DASHER

British Navy, escort aircraft carrier; 1940; 12,000 tons; 496 X 69-5x28-5; 8,500 b.h.p.; 16-5 knots; diesel engines; one 4 in.A.A. gun, four 40 mm.A.A., eight 20 mm.A.A., 20 aircraft. The escort aircraft carrier *Dasher* was destroyed by internal explosion S. of Cumbrae Island, Firth of Clyde, on March 27th, 1943. The vessel's normal complement was 520.

DATEGROVE

R. T. Arthurs & Co.; 1879; *J. Readhead & Co.*; 1,213 tons; 243x32-9x17-5; 123 n.h.p.; compound engines. The British steamship *Dategrove* was wrecked on September 16th, 1911, at Three Islands near Cape Orloff. She was on a voyage from Archangel to Rochefort with a cargo of wood.

DATETREE

Howard Jones & King; 1914; *Antwerp Eng. Co.*; 1,995 tons; 270-6x40-2x19-5; 220 n.h.p.; triple-expansion engines. The British cargo ship *Datetree* was wrecked on June 25th, 1914, on Brisons, Cape Cornwall, while on a voyage from Barry to Brest carrying a cargo of coal.

DAUNTLESS

Bolivian General Enterprise; 1897; *Blyth Shipbuilding Co.*; 2,157 tons; 287-5x43x18-8; 218 n.h.p.; 9 knots; triple-expansion engines. The steamship *Dauntless* was sunk by a German submarine 10 miles from Pointe La Coubre on February 4th, 1917. Fifteen of her crew were killed. The captain was among the survivors.

DAVANGER

Westfal Larsen; 1916; *Union Iron Works Co.*; 5,876 tons; 399-7x56-2x29-5; turbine engines. The Norwegian steamship *Davanger* was sunk by a German submarine in the North Sea on March 14th, 1917.

DAVANGER

H. Westfal-Larsen & Co. AIS; 1922; *W. Hamilton & Co.*; 7,102 tons; 425x56-8x33; 567 n.h.p.; triple-expansion engines. The Norwegian tanker *Davanger* was torpedoed and sunk by a German submarine on October 11th, 1940, 300 miles W. of Broadhaven. Seventeen of her crew were lost.

DAVID C. REID

John Jay Shipping Corp.; 1919; *Chester S.B. Co.*; 5,674 tons; 400-8x54-3x30; 628 n.h.p.; turbine engines. The American tanker *David C. Reid* left Samarang on September 1st, 1928, with a cargo of molasses bound for Philadelphia. She passed Gibraltar on October 6th, and sent put an S.O.S. on October 14th. That was the last heard from the ship.

DAVID CALDWELL

U.S. War Shipping Administration; 1943; *N. Carolina S.B. Co.*; 7,176 tons; 422-8x57x34-8; triple-expansion engines. On a voyage from Hampton Roads to Pauillac, the *David Caldwell* went aground and broke in two on September 4th, 1946, five miles off Pointe La Coubre, near Bordeaux.

DAVID H. ATWATER

Atwacoa Transportation Co.; 1919; *Great Lakes Eng. Works*; 2,438 tons; 253-8x43-6x24-9; 211 n.h.p.; triple-expansion engines. The American steamship *David H. Atwater* was torpedoed and sunk by a German submarine at 1.20 a.m. on April 3rd, 1942, on a voyage from Lambert Point, Virginia, to Fall River. Twenty-four of her crew of 27 were lost.

DAVIDE BIANCHI

Fratelli Bianchi Soc. di Nav.; 1906; *Rijkee & Co.*; 1,477 tons; 264-1x34-6x18-5; 156 n.h.p.; triple-expansion engines. The Italian steamship *David Bianchi* was bombed and sunk by British aircraft on September 4th, 1942, about 50 miles N.N.W. of Tobruk.

DAWDON

J.M. Thorman & Co.; 1878; *Short Bros.*; 1,310 tons; 240-4 x 34x18; 152 n.h.p.; 9 knots; compound engines. The steamship *Dawdon* struck a mine and sank ten miles N.W. by W. of the Wandelaar lightship on October 3rd, 1914. Ten of her crew were killed. The captain was among the survivors.

DAYBREAK

Scarlsbrick Steamship Co.; 1911; *W. Gray & Co.*; 3,238 tons; 340x48-5x22-6; 330 n.h.p.; 10 knots; triple-expansion engines. The steamship *Daybreak* was torpedoed and sunk by a German submarine one mile E. of South Rock lightship, Co. Down, on December 24th, 1917. Twenty-one of her crew, including the captain, were killed.

DAYLESFORD

R. Mackie & Co.; 1882; *R. Thompson & Sons*; 1,406 tons; 240-7x34-1x17; 175 n.h.p.; compound engines. The British cargo ship *Daylesford* sank after a collision off the Isle of Wight on April 1st, 1911, while on a voyage from Blyth to Torre del Mar carrying a cargo of coal.

DAYLIGHT

John Wood & Co.; 1889; *R. Dixon & Co.*; 2,387 tons; 295-1x 38-2x20-1; 220 n.h.p.; triple-expansion engines. The British cargo ship *Daylight* was wrecked four miles east of Cape Villano on February 11th, 1897, while on a voyage from Barry to Buenos Aires carrying a cargo of coal.

DAYROSE

Claymore Shipping Co.; 1928; *R. Thompson & Sons*; 4,113 tons; 380-2x53-1x24-1; 376 n.h.p.; triple-expansion engines. The steamship *Dayrose* was torpedoed and sunk by a German submarine on January 14th, 1942, near Cape Race on a voyage from St. John's, N.F.L., to Portland, Maine. Three of her crew and six gunners were lost.

DAYTONA

Volusia S.S. Co.; 1945; *Bethlehem-Hingham Shipyard*; 3,344 tons; 322-7x50x20-7; oil engines. Sailing from Little Narrows, N.S., to Philadelphia with a cargo of gypsum, the Liberian motorship *Daytona* signalled that she was in distress on November 20th, 1955, about 75 miles from Gloucester, Mass. She was not seen again.

DE HAVEN

DE HAVEN

United States Navy, destroyer; 1942; United States; 2,050 tons; 376-5x39-3x12-2; 60,000 s.h.p.; 36-5 knots; turbine engines; Babcock & Wilcox boilers; five 5 in. guns, six 40mm, ten 20mm, 10 T.T.

The United States destroyer *De Haven* was operating with the American naval forces S. of Savo Island when she was hit and sunk by Japanese bombers. The attack took place on February 1st, 1943.

DE LA SALLE

Cie. Generate Transatlantique; 1921; Barclay, Curie & Co.; 8,400 tons; 440x56-7x34-6; 568n.h.p.; triple-expansion engines.

The French steamship *De La Salle* was torpedoed and sunk by a German submarine at 1 a.m. on July 9th, 1943, between Freetown and Walvis Bay on a voyage from Liverpool to Walvis Bay. Eight of her crew and two passengers were killed.

DE RUYTER

Netherlands Navy, cruiser; 1935; Wilton-Fijenoord, Rotterdam; 6,450 tons; 557-7x51-3x19-3; 66,000s.h.p.; 32 knots; turbine engines; Yarrow boilers; seven 5-9 in. guns, ten 40 mm., eight 12-7 mm., 8 m.g., 2 aircraft.

The cruiser *De Ruyter* was the flagship of Rear-Admiral Karel Doorman, commanding the Dutch East Indies Squadron, which, on the outbreak of the war with Japan on December 7th, 1941, joined up with several British and American units and became an Allied squadron. On February 20th, 1942, the Japanese landed in Bali and Portuguese Timor and it became a matter of necessity for the Allies to stop, or at least interrupt, the enemy's expansion of these bases. There had been heavy casualties among the Japanese transport fleet but not sufficiently severe to halt the invasion plan, which still carried on. It was decided, therefore, to make a strong attack with all available surface ships on the main Japanese expedition then near to Sourabaya, Java. On the 27th, Admiral Doorman's force encountered a Japanese squadron comprising two heavy cruisers *Haguro* and *Nati*, 10,000 tons, ten 8 in. guns each, several light cruisers and at least 12 destroyers. The Allied force was as follows:—

Dutch	... <i>De Ruyter</i>	cruiser	6,450 tons, seven 5•9 in. guns		
	<i>Java</i>		6,670	ten	5 -9 in. ..
British	... <i>Exeter</i>	...	8,390	six	8 in. ..
Australian	<i>Perth</i>		6,980	six	8 in.
American	<i>Houston</i>	...	9,050	nine	8 in.
Dutch	<i>Kortenaer</i>	destroyer	1,310		
British	... <i>Electra</i>	...	1,375		
...	<i>Firecracker</i>				
	<i>Jupiter</i>	...	1,690		

In addition there were three old U.S. destroyers of the flush-deck type which participated in the final phase of the battle. These vessels were the *Edsall*, *Pillsbury* and *Pope*, all of 1,190 tons.

The rival fleets made contact at about 4 p.m. on the 27th. The Japanese cruisers turned away and their destroyers, operating as two flotillas, made torpedo attacks, one flotilla being repulsed by gunfire, but the other coming to within torpedo range and hitting and sinking the Dutch destroyer *Kortenaer*. Shortly afterwards the *Exeter* was hit in one of her boiler rooms by an 8 in. shell which reduced her speed and compelled her to haul out of the line and steer for Sourabaya.

On turning away after their attack the Japanese destroyers laid a smoke screen into which the three British destroyers steamed with the intention of torpedoing the enemy cruisers. This attempt was frustrated by the Japanese destroyers which were in overwhelming strength and sank the *Electra* and drove back the *Encounter* and *Jupiter*. This ended the first phase of the action, save for a brief exchange of salvos between the cruisers in the fading light.

During darkness the Allied squadron continued its search for the Japanese transports and engaged the enemy escort briefly on two occasions. In one of these combats the *Jupiter* was hit by a torpedo and sank four hours later. There was another engagement about midnight off Rembang, the *De Ruyter* and the *Java* being hit by torpedoes or enemy mines. Both ships sank very quickly, and

Admiral Doorman went down with his ship. Thus ended the fighting on the 27th.

Meanwhile the three American destroyers, which had expended their torpedoes, had returned to port to refuel. One of these, the *Pope*, lay at Sourabaya where she was joined by the *Exeter* and the *Encounter*. The three vessels left in company on the night of February 28th, the *Exeter* not being able to proceed at more than half speed. She had also expended much of her ammunition and was in no state to fight a prolonged action. On the following morning the ships were intercepted by two Japanese cruisers and six destroyers. The *Exeter* maintained the fight until every round of ammunition had been fired, after which the captain gave orders to scuttle the ship. The survivors were taken prisoner, as well as those from the destroyers, both of which had been sunk.

There now remained the *Houston* and *Perth* which had made for Tandjong Priok where they refuelled and were joined by the Dutch destroyer *Evertsen*. They left on the evening of the 28th with the intention of running through the Sunda Strait and making for Australia. Unfortunately it was bright moonlight and the ships were sighted by the Japanese at about 11.30 p.m. A very determined action ensued and all three vessels were sunk.

Other units of the doomed squadron to be sunk were the two old U.S. destroyers *Edsall* and *Pillsbury* and the British destroyer *Stronghold* which were also intercepted when on their way to Australia. Previous to the battle of the Java Sea the Dutch destroyers *Piet Hein* and *Van Nes* had been sunk and the *Banckert* and the U.S. destroyer *Stewart* badly damaged (both fell into Japanese hands in Sourabaya dock). The *Van Ghent* had also been wrecked on Lima Island. The Australian sloop *Yarra*, escorting a number of merchant ships, left Tjilatjap on March 1st, and on the 4th the whole convoy, including the *Yarra*, was sunk. The U.S. gunboat *Ashville* proceeding independently to Australia was also intercepted and sunk. Thus the whole of the Allied East Indies Squadron was obliterated without the loss to the Japanese of a single warship.

This disaster, following swiftly upon the attack on Pearl Harbour and the bombing of the *Prince of Wales* and the *Repulse*, delayed the Allied naval offensive in Pacific waters for fully nine months, and afforded the Japanese a period of comparative quiet in which to consolidate their gains.

DE WEERT

Koninkl. Paketv. Maats.; 1919; Moats. Fyenoord; 1,805 tons; 270-3x40-2x17; 165 n.h.p.; 10 knots; triple-expansion engines. The Dutch steamship *De Weert* was bound from Mombasa to Durban on July 1st, 1942, when she was attacked from the surface by the Japanese submarine *I-18* about 150 miles from Lourenco Marques. The Japanese gunfire was devastating and a large number of those on board the *De Weert* were killed. The vessel remained afloat for two days and sank on July 3rd, with the loss of 69 lives. Some of the survivors who were picked up by the British s.s. *Mundra* were lost when that ship was sunk nine days later.

DEA MAZZELLA

Pasquale Mazzella; 1919; J. L. Thompson & Sons; 3,082 tons; 342-5x46-8x23-2; 358n.h.p.; triple-expansion engines. The Italian steamship *Dea Mazzella* was sunk by Yugoslav partisans on September 30th, 1943, S. of Sibenik.

DECOY

British Navy, destroyer; 1895; J. Thornycroft & Co.; 260 tons; 185X19X—; 4,500 i.h.p.; 27 knots; triple-expansion engines; one 12pdr. gun, three 6pdrs., 1 T.T. The destroyer *Decoy*, Lt. W. D. Paton, was engaged in manoeuvres off the Stilly Isles on August 13th, 1904, when she was sunk in a collision with the destroyer *Arin*. One man was killed.

DEER LODGE

U.S. Maritime Commission; 1919; Northwest Steel Co.; 6,187 tons; 409-8x54-2x27-7; 579 n.h.p.; turbine engines. The American steamship *Deer Lodge* was torpedoed and sunk by a submarine in February 17th, 1943, off Port Elizabeth on a voyage from Baltimore to Saldanha Bay.

DEFENCE

British Navy, armoured cruiser; 1907; Pembroke Dockyard; 14,600 tons; 525x74-5x28; 27,000 i.h.p.; 23 knots; triple-expansion engines; Yarrow boilers; four 9-2 in. guns, ten 7-5 in., fourteen 12pdr., 5 T.T.

The *Defence* was the flagship of Rear-Admiral Sir R. Arbuthnot, commanding the 1st Cruiser Squadron at the battle of Jutland. The squadron was composed of the *Defence*, *Warrior* (which see), *Duke of Edinburgh* and *Black Prince* (which see), all being ships of powerful armament and good speed. It met with dire misfortune in the battle, only one of its units, the *Duke of Edinburgh*, surviving.

The *Defence* had a complement of 54 officers and 845 men, to which must be added four civilians who were on board at the time, making 903 all told. She was commanded by Capt. S. V. Ellis.

At 5.30 on the afternoon of March 31st, 1916, the squadron was rapidly approaching the German 'Scouting Force' of battle cruisers under Admiral von Hipper. From the westward Admiral Beatty was approaching the same enemy at the head of his battle cruisers. Twenty minutes later the *Defence*, followed by the *Warrior*, began to shell the German light cruiser *Wiesbaden*, which soon lay helpless and in flames between the two fleets. In an attempt to destroy this ship and to close with Hipper's squadron, Admiral Arbuthnot crossed the bows of the far more powerful *Lion* and thereby exposed himself to the concentrated fire of von Hipper, who was making a desperate effort to protect the *Wiesbaden*. Both the British cruisers encountered a tornado of shell fire, the *Defence* being hit by two salvos in quick succession. She blew up with every soul on board. The *Warrior* was so badly damaged that she sank the next morning, but without any further loss of life than that sustained in the battle.

DEFENDER

*British Navy, destroyer; 1932; Vickers-Armstrong; 1,375 tons; 326x33x8-5; 36,000 s.h.p.; 35-5 knots; turbine engines; 3-drum boilers; four 4*7 in. guns, 7 smaller, 8 T.T.*

The destroyer *Defender*, Lt. Cdr. G. L. Farnfield, was bombed and sunk off Sidi Barrani on July 11th, 1941. All the ship's company were taken off and there was no loss of life.

DEFOE

Lampart & Holt Line; 1940; Harland & Wolff; 6,245 tons; 438-8x62-3x25-4; 896n.h.p.; oilengines.

The British cargo ship *Defoe* caught fire after an explosion on September 24th, 1942, in position 52° 11' N., 19° 32' W. The bow of the vessel as far as the foremast was blown off and she was abandoned. Two days later the drifting hulk was sighted in position 51° N., 18° 10' W., but she was not salvaged. She was on a voyage from Manchester to Famagusta carrying drums of liquid chlorine and aeroplane varnish.

DEGAMA

Elder Dempster & Co.; 1899; Furness, Withy & Co.; 3,507 tons; 337-5x45-2x18-8; 271 n.h.p.; triple-expansion engines.

The British cargo ship *Degama* was wrecked at Las Palmas on November 6th, 1914, while on a voyage from Rotterdam to Port Harcourt with a general cargo.

DEIMOS

U.S. Navy; 1943; Permanente Metals Corp.; 7,191 tons; 422-8 x57x34-8; 339 n.h.p.; triple-expansion engines.

The steamship *Deimos* was torpedoed and sunk by a Japanese submarine on June 23rd, 1943, off the Solomon Islands.

DEIPARA

D. & E. Flli. Bozzo; 1886; Earle's Co.; 2,282 tons; 310x37x 20-1; 206 n.h.p.; compound engines.

The Italian steamship *Deipara* was torpedoed and sunk by a submarine in the Mediterranean on May 9th, 1918.

DEISTER

Rabien & Stadlander; 1921; Howaldtswerke; 1,760 tons; 260-9x40-9x17-5; 149 n.h.p.; triple-expansion engines.

Sailing from Antwerp and Leixoes to Oporto, the *Deister* was wrecked off Oporto on February 3rd, 1929.

DEKABRIST

U.S.S.R.; 1903; Vickers, Sons & Maxim; 7,363 tons; 475-8 x 54-1x32-6; 855 n.h.p.; triple-expansion engines.

The Russian steamship *Dekabrist* was torpedoed and sunk by a German submarine on November 4th, 1942, off the North Cape.

DELAGOA MARU

Nippon Yusen K.K.; 1919; Mitsubishi Zosen Kaisha; 7,148 tons; 420x56x38-5; 620 n.h.p.; triple-expansion engines.

The steamship *Delagoa Mam* was torpedoed and sunk by the U.S. submarine *Trigger* on November 2nd, 1943, about 300 miles E. of the Ryukyu Islands.

DELAMBRE

Lampart & Holt Line; 1917; Mitsubishi Zosen Kaisha; 7,032 tons; 444-8x58-2x31-4; 524 n.h.p.; triple-expansion engines.

The British steamship *Delambre* left the Rio Grande on June 30th, 1940, for Liverpool. On July 5th, she was intercepted and sunk by a German raider about 900 miles E. of Ferrol. The captain and an unspecified number of survivors were picked up by the raider.

DELAMERE

Bromport Steamship Co.; 1915; Sunderland Shipbuilding Co.; 1,525 tons; 267-3x38-8x16-7; 224 n.h.p.; 10 knots; triple-expansion engines.

The steamship *Delamere* was torpedoed and sunk by a German submarine 110 miles W. by N. of Fastnet on April 30th, 1917. Ten of her crew were killed. The captain was among the survivors.

DELANO

W. & T. W. Pinkney; 1892; J. Laing; 2,968 tons; 320x41-8x 18-1; 277 n.h.p.; triple-expansion engine.

The British cargo ship *Delano* was wrecked on August 14th, 1902, at Seal Cove, N.F.L., while on a voyage from Rotterdam to Baltimore carrying a general cargo.

DELAWARE

C. Dixon; 1865; Isle of Man S.B. Co.; 3,243 tons; 380-2 x 36-3x26; 280 h.p.; compound engines.

The British steamship *Delaware* was bound from Liverpool to Calcutta with a general cargo and 50 passengers and crew. On December 20th, 1871, she was seen to be in difficulties off Mincarlo, Scilly Isles. There was a violent gale at the time and the steamship struck on a ledge of rock, afterwards known as the Delaware Ledge. Local boatmen attempted a rescue, but the steamship sank very quickly. On the following day two of the ship's officers were taken off from White Island. The number lost was 42.

DELFIN

"Polena" Soc. di Nav.; 1918; Scotts S.B. & Eng. Co.; 5,322 tons; 421-5x52-2x28-2; 490 n.h.p.--triple-expansion engines.*

The Italian steamship *Delfin* was torpedoed and sunk by a British submarine on December 14th, 1942, N. of Macronisi Island, Greece.

DELFININA

Baltimore Insular Line; 1919; Hanlon D.D. & S.B. Co.; 3,480 tons; 320-7x46x24-4; 387 n.h.p.; triple-expansion engines.

The American steamship *Delfina* was torpedoed and sunk by a German submarine on June 5th, 1942, on a voyage from Puerto Rico to Charleston.

DELFSHAVEN

N.V. Gebr. van Uden; 1930; W. Gray & Co.; 5,281 tons; 421-2 x54-3x27-2; 463 n.h.p.; quadruple-expansion engines.

The Dutch steamship *Delfshaven* was torpedoed and sunk by a German submarine on September 6th, 1942, between Trinidad and Table Bay.

DELHI

Peninsular & Oriental Steam Navigation Co.; 1905; J. Caird & Co.; 8,090 tons; 470x56-2x32; 1,257n.h.p.; 16-5 knots; quadruple-expansion engines.

The liner *Delhi* with 85 first class passengers, among whom were the Duke and Duchess of Fife (The Princess Royal) and their two daughters, Princess Alexandra and Princess Maud, was bound from London to Bombay via Marseilles. At about 2 o'clock on the

DELHI MARU

morning of December 13th, 1911, the ship ran ashore in very rough weather some two miles from Cape Spartel. There was a strong westerly wind and very heavy rain. A wireless call was immediately sent out and was picked up by the station at Cadiz and within a short time several men-of-war were speeding to the wreck. The first to arrive was the French cruiser *Friant*, 3,722 tons, which at once sent away her boats in an effort to take off the shipwrecked people. Unfortunately her steam launch was swamped and with the fire out became unmanageable and capsized, three seamen being drowned.

The next ships to arrive were the British battleship *London*, and the cruiser *Duke of Edinburgh*. At about 11 a.m. Rear-Admiral Sir C. Cradock brought a boat from the *Duke of Edinburgh* alongside and with great difficulty took off the Royal Party from the *Delhi*. On her way back the boat was swamped not far from shore and everyone thrown into the water, the Princess Alexandra having a narrow escape from drowning. Eventually all came safely to land, and in their somewhat exhausted condition had to walk four miles to the lighthouse at Cape Spartel.

The conduct of the Moorish authorities was not helpful. No assistance was given to the shipwrecked people and no mules or conveyances provided for the journey to Tangier, 10 miles away.

The *Delhi* at the time of her loss was carrying £295,925 in gold and silver bullion, all of which was ultimately salvaged, as was the case with most of the cargo.

DELHI MARU

Osaka Shosen K.K.; 1922; *Osaka Iron Works*; 2,182 tons; 270 X 43 X 22 • 5; 210 n.h.p.; triple-expansion engines. The steamship *Delhi Mam* was taken over by the Japanese Navy and converted into an auxiliary gunboat. On January 16th, 1944, she was torpedoed and sunk by the U.S. submarine *Swordfish* about 100 miles S. of Yokohama.

DELIA

Giovanni Gavarone; 1917; *A. McMillan & Son*; 5,406 tons; 413-2x52x27-8; 458 n.h.p.; triple-expansion engines. The Italian steamship *Delia* was torpedoed and sunk on April 16th, 1942, off Villanova, Brindisi.

DELIGHT

British Navy, destroyer; 1932; *Fairfield Shipbuilding Co.*; 1,375 tons; 326x33x8-5; 36,000 i.h.p.; 35-5 knots; turbine engines; 3-drum boilers; four 4-7in. guns, 7 smaller., 8 T.T. The destroyer *Delight*, Cdr. M. Fogg-Elliott, was bombed and sunk by German dive bombers off Dover on July 29th, 1940, at the beginning of the heavy raids on England. The destroyer carried a complement of 145, of whom six ratings died of wounds and three officers, including the commander, and 57 ratings were wounded.

DELLWYN

Angel, Son & Co.; 1920; *J. Lewis & Sons*; 1,451 tons; 234-8x 35-7x16-6; 86r.h.p.; triple-expansion engines. The British steamship *Dellwyn* was bombed by insurgent aircraft on July 25th, 1938, at Gandia, during the Spanish Civil War. She was again bombed and sunk on the 27th.

DELMAR

Joseph F. Wilson & Co.; 1889; *R. Dixon & Co.*; 2,374 tons; 295-2x38-2x20-2; 242 n.h.p.; triple-expansion engines. The British cargo ship *Delmar* was wrecked on July 8th, 1901, at Blackhead, Cape Ballard, N.F.L., while on a voyage in ballast from Dundee to Mobile.

DELMUNDO

Mississippi Shipping Co.; 1919; *American International S.B. Corp.*; 5,032 tons; 390x54-2x27-8; turbine engines. The American steamship *Delmundo* was torpedoed and sunk on August 13th, 1942, on a voyage from Buenos Aires and Trinidad to New York.

DELOS

RederiA/BNorrland; 1901; *J.R.Andersen*; 228 tons; 114-9 X 25-3x11-7; 61 n.h.p.; oil engines. The Swedish auxiliary schooner *Delos* grounded on November 8th, 1945, outside Fagelhorn during a violent snowstorm and broke up. There was one survivor.

DELPHIC

White Star Line; 1897; *Harland & Wolff*; 8,273 tons; 475-9 x 55-2x35-9; 375 n.h.p.; 11-5 knots; triple-expansion engines. The *Delphic*, Cardiff for Montevideo with coal, was torpedoed and sunk by a German submarine 135 miles S.W.f.W. off Bishop Rock, Scilly Isles, on August 16th, 1917. Five lives were lost.

DELPHY

United States Navy, destroyer; 1918; *Bethlehem Shipbuilding Corp.*; 1,215 tons; 310x30-9x9-3; 27,500s.h.p.; 35 knots; turbine engines; Yarrow boilers; four 4 in. guns, one 3 in.A.A., 12 T.T.

On September 8th, 1923, a flotilla of U.S. destroyers, all sister ships, under command of Capt. Edward H. Watson, which had been taking part in exercises with other ships, was steaming through dense fog in line ahead at a speed of 20 knots. The assumption of those responsible for the flotilla was that they were about eight miles from land and had plenty of sea-room. This was a cardinal error as the ships were close to the island of Santa Barbara, off the coast of California, and without any preliminary warning the leading destroyer, the *Delphy*, Lt. Cdr. Donald T. Hunter, crashed on the rocks at Honda Point. The next in line, the *Young*, ran into the still revolving propellers of the *Delphy*, which ripped her side open. A third destroyer, the *Chauncey*, then ran into the other two. The four remaining destroyers, the *Fuller*, *Nicholas*, *Woodbury* and *S. P. Lee* ran on the reef without having time to reduce speed. All seven ships became total wrecks, lying along the coast at intervals of roughly 250 feet at every conceivable angle. Of those on board, totalling over 500 officers and ratings, 22 lost their lives; a very small number considering the violence with which the ships struck.

It was at first thought that the disaster was caused by exceptional tides and currents set up by the great Japanese earthquake which had occurred a week previously. This belief was strengthened when it was known that the Pacific Mail Steamship Co's liner *Cuba* had run ashore in the fog on the island of San Miguel a few miles away. Further investigation proved this theory to be mistaken.

DELPLATA

Mississippi Shipping Co.; 1920; *American International S.B. Corp.*; 5,127 tons; 390x54-2x27-8; turbine engines. The American steamship *Delplata* was torpedoed and sunk on February 20th, 1942, in the Eastern Caribbean.

DELVALLE

Mississippi Shipping Co.; 1919; *American International S.B. Corp.*; 5,032 tons; 390x54x32; turbine engines. The American steamship *Delvalle* was torpedoed and sunk on April 12th, 1942, on a voyage from New Orleans to St. Thomas.

DEMETRIOS INGLESSIS

D. Inglessis Fils; 1891; *J. L. Thompson & Sons*; 2,088 tons; x 280x38-2x17-4; 196n.h.p.; triple-expansion engines. The Greek steamship *Demetrios Inglessis* was sunk by a German submarine off Ushant on December 2nd, 1916.

DEMIR-HISSAR

Turkish Navy, torpedo boat; 1907; 97 tons; 124x14x5; 1,900 i.h.p.; 26 knots; triple-expansion engines; two 1 pdr. guns, 3 T.T. The torpedo boat *Demir-Hissar* entered the Aegean Sea on March 8th, 1915, early in the Dardanelles campaign, to lie in wait and attack Allied snipping.

After some five weeks, during which she failed to sink any ship, she was intercepted by the British destroyer *Wear* on the night of April 15th and while endeavouring to escape she ran aground in Kalamuti Bay, Chios, where she became a total wreck.

DEMOSTHENES

C. D. Calafatis; 1907; *R. Stephenson & Co.*; 3,880 tons; 339-5 x 47-1x20; 313 n.h.p.; triple-expansion engines. The Greek steamship *Demosthenes* was wrecked on June 10th, 1925, on Comoro Island with a cargo of phosphates.

DEMPO

Rotterdamsche Lloyd; 1930; Koninkl.Maats.de Schelde; 17,024 tons; 551x70-4x41-6; 3,090n.h.p.; 18-5 knots; oil engines.

The Dutch liner *Dempo* was taken over in the Second World War for service as an Allied troopship. On March 17th, 1944, the vessel was a unit of Convoy SNF 17, on passage from Naples to North Africa. When in a position between Algiers and Philippeville the convoy came under attack from the German submarine *U-371*. The *Dempo* was hit by a torpedo and sank 70 minutes later, but without loss of life.

DEN HAAG

N.V. Petroleum Industrie Maats.; 1925; Fried. Krupp A.G.; 8,971 tons; 469-8x63-2x35-3; 763 n.h.p.; oil engines.

The Dutch motor tanker *Den Haag* was torpedoed and sunk by the German submarine *U-48* on February 15th, 1940, 150 miles N.N.W. of Ushant, homeward bound to Rotterdam, loaded. Twenty-six lives were lost.

DEN OF SEATON

Charles Barrie & Son; 1901; Sit Raylton Dixon & Co.; 3,892 tons; 350x47-7x19-5; 380n.h.p.; triple-expansion engines.

The British cargo ship *Den of Seaton* sank after a collision on May 22nd, 1904, off Barry Island while on a voyage from Newport to Calcutta with coal and general cargo.

DENALI

Alaska S.S. Co.; 1920; Hanlon D.D. & S.B. Co.; 3,432 tons; 320-7X46X24-4; 274 n.h.p.; triple-expansion engines.

The American steamship *Denali* went ashore at 3 a.m. on May 19th, 1935, at Zayas Island about 50 miles N.W. of Prince Rupert. She was carrying passengers, explosives and general cargo from Seattle to Alaska. The ship broke in two, there was a fire and dynamite in the cargo exploded.

DENBIGH CASTLE

British Navy, corvette; 1944; Caledon Shipbuilding Co.; 1,010 tons; 252x36-7x13-5; 2,880i.h.p.; 18-5 knots; triple-expansion engines; one 4 in. gun, six 20mm.

The corvette *Denbigh Castle*, Lt. Cdr. G. Butcher, D.S.C., was on North Russian convoy duty when she was sunk either by mine or torpedo in the Kola Inlet on February 13th, 1945. Lt. Cdr. Butcher was among the survivors.

DENBY GRANGE

Houlder Bros. & Co.; 1912; Northumberland S.B. Co.; 4,252 tons; 380-1x49x26-4; 330 n.h.p.; triple-expansion engines.

The British cargo ship *Denby Grange* sank after a collision on October 24th, 1918, in 39°52'N., 5°32'E., while on a voyage from Newport to Spezia with a cargo of coal.

DENEWELL

G. N. Patterson & Co.; 1906; Tyne Iron S.B. Co.; 3,091 tons; 331-1X 48 • 1X 21 • 8; 294 n.h.p.; triple-expansion engines.

The British cargo ship *Denewell* foundered on July 6th, 1907, in Carraca Bay, near Finisterre, while on a voyage from Larmes to Rotterdam carrying an ore cargo.

DENMARK MARU

Hakuyo Risen K.K.; 1920; Kawasaki Dockyard; 5,870 tons; 385 x51x 36; 437 n.h.p.; triple-expansion engines.

The Japanese steamship *Denmark Maru* was torpedoed and sunk by the U.S. submarine *Whale* on January 16th, 1944, about 400 miles S.W. of Iwo Jima in the Volcano Islands.

DENPARK

J.&J.Denholm; 1928; Lithgows; 3,491 tons; 350x49x23-7; 339 n.h.p.; 10 knots; triple-expansion engines.

On May 12th, 1942, the steamship *Denpark*, Capt. John McCreadie, was about 350 miles N.W. of St. Vincent, C.V., on a voyage from Takoradi to Workington, when she was torpedoed and sunk by a German submarine. Sixteen of her crew, including Capt. McCreadie, and five gunners were killed. The *Denpark* was not in convoy.

DENT HOLME

Hine Brothers; 1883; J. L. Thompson & Sons; 1,221 tons; 230-5x33-3x15-5; 99 h.p.; compound inverted engines.

The British cargo ship *Dent Holme* sank after a collision off Matane on July 6th, 1885, while on a voyage in ballast from Montreal to Cow Bay, C.B.

DEODATA

SkibsA/Deodata; 1897; Laporte & Cie.; 3,295 tons; 324-8x 45-5x24-1; 209 n.h.p.; oilengines.

The Norwegian tanker *Deodata* struck a mine and sank on October 21st, 1939, off the Inner Dowsing lightship, inward bound to Grangemouth.

DEPTFORD

Britain S.S. Co.; 1931; Smith's Dock Co.; 4,034 tons; 366-4X 52x24-7; 10-5 knots; triple-expansion engines.

The steamship *Deptford*, Capt. Ferguson, from Kirkenes to England with iron ore, was torpedoed by a German submarine at 1 p.m. on December 13th, 1939, N.W. of Honningsvaag Lighthouse at Stadt, Norway. The vessel sank immediately and out of her crew of 35 there were only five survivors. Four men were picked up by the steamship *Firda*, and another three by the steamship *Nordnorge*, but two died shortly after they were taken on board. Capt. Ferguson was lost with the vessel. The *Deptford* was not in convoy at the time of the sinking.

DEPUTE ALBERT TAILLANDIER

French Government; 1921; Chant. Nav. Francais; 2,329 tons; 266-6x39-3x23; triple-expansion engines.

The steamship *Depute Albert Taillandier*, carrying coal from Rotterdam to Brest in April, 1922, capsized and sank during heavy weather off Ushant.

DEPUTE EMILE DRIANT

Soc. Anon. de Nav. Les Armateurs Francais; 1920; Government Yard (Lorient); 2,098 tons; 266-7x39-4x23; 149 n.h.p.; triple-expansion engines.

The steamship *Depute Emile Driant* was carrying coal from Newcastle to Rouen when, on August 19th, 1923, the cargo shifted during a gale off Boulogne and the ship took a heavy list. The crew got off into two boats before the ship capsized and sank, but before they could get clear the mast fell across the larger boat and the 19 occupants were "drowned. Five men in the other boat were saved.

DEPUTE PIERRE GOUJON

1894; Sir Raylton Dixon & Co.; 4,121 tons; 375x47x28; 470 n.h.p.; triple-expansion engines.

The French steamship *Depute Pierre Goujon* was torpedoed and sunk by a German submarine in the Bay of Biscay on November 12th, 1917.

DEPUTE RAOUL BRIQUET

French Government; 1920; Government Yard (Rochefort); 2,170 tons; 266-7x39-4x23; 149 n.h.p.; triple-expansion engines.

Carrying coal from Hull to Stockholm the *Depute Raoul Briquet* capsized and sank on November 2nd, 1921, about 40 miles off Flamborough Head.

DERNA

"Tirrenia" Soc. Anon. di Nav.; 1912; Cantieri Navali Ruiniti; 1,769 tons; 277-2x36-4x18-2; 191 n.h.p.; triple-expansion engines.

The Italian steamship *Derna* was torpedoed and sunk by a British submarine on March 10th, 1943, in the Gulf of Lyons.

DERRY CASTLE

F. Spaight & Sons; 1883; Dobbie & Co.; 1,367 tons; 239-8X - 36x21-4.

The iron barque *Deny Castle* left Geelong, Australia, for Falmouth on March 12th, 1887. On the night of the 20th in thick weather the vessel ran on to a reef off Enderby Island, Auckland Islands. There was no previous warning and she was in full sail and struck the reef with such violence that she broke in two amidships.

DERRYCUNIHY

Of her crew of 23 only eight reached shore. These eight men subsisted for 92 days on shellfish, being in sight of a New Zealand Government food depot at Port Ross, which they had no means of reaching. Eventually they found an axe with which they fashioned an extremely small and frail boat, six feet long by two and a half feet wide. In this two men managed to reach the food depot and brought back supplies. The party then ferried themselves by ones and twos to the depot, where they were found by the sealing steamship *Awaruna* which brought them to Melbourne.

The New Zealand authorities despatched the lighthouse steamship *Stella*, under Capt. Fairchild, to investigate the cause of the wreck. It was established that the charts supplied to the *Deny Castle* were defective.

DERRYCUNIHY

McCowen & Gross; 1944; Burntisland S.B. Co.; 7,093 tons; 425x57x35-1; 516 n.h.p.; oilengines.

The British motorship *Derrycunihy* struck a mine and sank on June 24th, 1944, off the coast of Normandy. Nine of her crew, 13 gunners and about 150 troops were lost.

DERRYMORE

McCowen & Gross; 1938; Burntisland S.B. Co.; 4,799 tons; 414x56-9x25-7; 449 n.h.p.; oilengines.

The British motorship *Derrymore* was torpedoed and sunk by a Japanese submarine on February 13th, 1942, in the Java Sea. Nine Australian Air Force personnel were killed.

DERRYNANE

McCowen & Gross; 1938; Burntisland S.B. Co.; 4,896 tons; 414-7x57x25-7; 394 n.h.p.; triple-expansion engines.

The British steamship *Derrynane* was in convoy from Lourenco Marques to Immingham when, on February 12th, 1941, the convoy was attacked by a German raider about 400 miles S.E. of the Azores. The *Derrynane* was hit by shellfire and blew up with the loss of all on board, 35 crew and a gunner.

DERWEN

W. & C. T. Jones S.S. Co.; 1899; J. Readhead & Sons; 3,544 tons; 341x46-6x24-7; 293 n.h.p.; triple-expansion engines.

The British cargo ship *Derwen* was wrecked on December 8th, 1911, at Sagres while on a voyage from Kherson to Rotterdam carrying a cargo of grain.

DERWENT

British Navy, destroyer; 1903; Hawthorn, Leslie & Co.; 555 tons; 225x23-5x12; 7,000 i.h.p.; 25-5 knots; triple-expansion engines; Yarrow boilers; four 12pdr. guns, 2 T.T.

The destroyer *Derwent* was mined and sunk off Havre on May 2nd, 1917. Her official complement was 70.

DESDEMONA

A. Kirsten; 1920; Reiherstieg Schiffsw.; 1,305 tons; 258 X 37-4x14-6; 107 n.h.p.; triple-expansion engines.

The German steamship *Desdemona* struck a mine and sank on March 4th, 1944, off the Norwegian coast on a voyage from Hamburg to Skien.

DESERT LIGHT

U.S. Maritime Commission; 1903; W. Gray & Co.; 2,231 tons; 313x43-2x19-2; 222 n.h.p.; triple-expansion engines.

The steamship *Desert Light* was torpedoed and sunk by a German submarine on April 16th, 1942, between New York and Bermuda.

DESIGNER

Charente S.S. Co. (T. & J. Harrison); 1928; D. & W. Henderson & Co.; 5,945 tons; 419-8x54-6x30-4; 524 n.h.p.; 13 knots; turbine engines.

The steamship *Designer*, Capt. D. A. McCallum, was off the coast of Portugal on July 9th, 1941, when she was torpedoed and sunk by a German submarine. The vessel carried a crew of 79 of whom 68, including Capt. McCallum, were killed.

DESPINA G. MICHALINOS

Michalinos Maritime & Commercial Co.; 1907; W. Gray & Co.; 2,851 tons; 331x47-5x20-1; 292 n.h.p.; triple-expansion engines.

The Greek steamship *Despina G. Michalinos* was torpedoed and sunk by a submarine in the Mediterranean on October 13th, 1917.

DETLEF

German Government; 1910; A. Vuijk & Zonen; 1,809 tons; 271X 39-1x17-4; 190 n.h.p.; triple-expansion engines.

The steamship *Detlef* was formerly the Estonian *Sigrid*, seized by the Germans. She was bombed and sunk by British aircraft in April, 1945, at Kiel.

DETTIFOSS

H/f Eimskipafjelag Islands; 1930; Fredrikshavns Veer ft og Flydedok; 1,564 tons; 237-1x36-2x21-2; 124 n.h.p.; compound engines.

The Icelandic steamship *Dettifoss* was torpedoed and sunk by a German submarine on February 21st, 1945, off the Irish coast.

DEUCALION

Koninklijke Nederlandsche Stoomboot Maats.; 1914; Rijkee & Co.; 1,796 tons; 296-8x43-2x16-1; 196n.h.p.; triple-expansion engines.

The Dutch steamship *Deucalion* was bombed and sunk by German aircraft on July 4th, 1940, 20 miles S.S.W. of Portland.

DEUTSCHLAND

Norddeutscher Lloyd; 1866; J. Caird & Co.; 2,898 tons; 328 x 40x26; 600 n.h.p.; 13 knots; compound engines.

The liner *Deutschland* left Bremen for New York on Saturday, December 4th, 1875, with 230 persons on board, mostly emigrants. The ship was commanded by Capt. Brickenstein and had on board both a Weser pilot and a Channel pilot. Her first port of call, was to have been Southampton where she was to embark more passengers and collect the English mail. The weather was wintry but not unusually rough for the time of the year. As the ship crossed the North Sea, however, she ran into a succession of snowstorms which had the effect of throwing her off her course. Soundings were taken at every half 4our, the ship going dead slow, when at 5 o'clock on the morning of the 6th, she struck on the Kentish Knock sands without seeing any of the lightships thereabouts. The engines were immediately reversed but the propeller broke with the strain, leaving the ship at the mercy of the seas. Her position was roughly 23 miles from Harwich in one direction and 22 miles from Margate in the other, she was thus too far away for any of her signals to be seen from the shore.

For several hours the *Deutschland* sent up rockets without attracting attention, but at 9.30 a.m. the master of the Kentish Knock lightship discovered her and by firing guns and sounding his fog-horn did all in his power to signal shipping. At dark the lightship began to send up rockets, two of which were seen by the Sunk lightship at 5.20p.m., but this vessel did not glimpse the wreck until 7.30 on Tuesday morning, the 7th. Rockets from the Sunk had attracted the notice of men on the Cork lightship which also commenced to send up signals. Fortunately these were seen at Harwich about 7.30 p.m. on Monday, the 6th, but in all these many hours no ship had passed and those on shore had no idea of the position of the wreck. Another handicap was that owing to the rough sea small fishing craft, of which there were plenty in normal times, were all in harbour.

At daylight on the 7th the paddle tug *Liverpool* under command of Capt. Carrington, left Harwich for the Cork lightship, from which she proceeded to the Sunk and from her to the Kentish Knock, until she located the wreck. She anchored under the *Deutschland's* lee and sent boats, later she ran alongside and began a hazardous transfer from ship to ship. Ultimately the *Liverpool* embarked 173 persons.

The number lost was 57, many of whom were frozen to death in the rigging.

DEUTSCHLAND

Hamburg-Amerika Linie; 1923; Blohm & Voss; 21,046 tons; 645-8x72-2x41-9; turbine engines.

The German liner *Deutschland* was bombed by British aircraft, and caught fire, capsized and sank on May 6th, 1945, off Neustadt. At the time she was used as an off-shore prison for political prisoners.

DEVERON

Christensen & Paulsen; 1875; R. Steele & Co.; 1,261 tons; 231-3x36-2x22-2.

The Norwegian sailing vessel *Deveron* was torpedoed and sunk by a German submarine off the north coast of Scotland on June 9th, 1917.

DEVIS

Lamport & Holt Line; 1938; Harland & Wolff; 6,054 tons; 438-6x62-3x25-4; 4,000h.p.; 14 knots; oilengines.

The *Devis*, Capt. W. Denson, serving as an auxiliary transport, was conveying troops through the Mediterranean on July 5th, 1943, when she was attacked and damaged by enemy aircraft S.E. of Majorca. The *Devis* was in convoy and at first it was hoped that she might be saved but later she was torpedoed by a submarine and eventually sank. There were no casualties among the crew, but 52 of the troops were killed.

DEVON

Federal Steam Navigation Co.; 1897; Hawthorn, Leslie & Co.; 6,059 tons; 420x54x28-7; 505n.h.p.; triple-expansion engines.

The British cargo ship *Devon* was wrecked on August 25th, 1913, on Pencarrow Point, Wellington Heads, while on a voyage from Montreal to Wellington with a general cargo.

DEVONIA

P. & A. Campbell; 1905; John Brown & Co.; 622 tons; 245X 29x9-7; 325n.p.h.; 17 knots; diagonal compound engines.

The paddle steamship *Devonia* was taken over by the Admiralty at the beginning of the Second World War for service as a minesweeper. On May 31st, 1940, she was engaged in the evacuation of the British Army from Dunkirk when she was bombed by German aircraft and so severely damaged that she had to be beached and abandoned.

The full story of the Dunkirk Evacuation is told under the destroyer *Grafton*.

DEVONIAN

F. Leyland & Co.; 1900; Harland & Wolff; 10,435 tons; 552-9X 59-3x36-8; 847n.h.p.; 14 knots; triple-expansion engines.

The liner *Devonian* was torpedoed and sunk by a German submarine on August 21st, 1917, off Tory Island, with the loss of two lives.

DIALA

Anglo-Saxon Petroleum Co.; 1938; Bremer Vulkan; 8,106 tons; 465-5x59-3x33-8; 502n.h.p.; 12-5 knots; oilengines. The motor tanker *Diala*, Capt. H. J. A. Peters, was torpedoed by a German submarine in the North Atlantic on January 15th, 1942. The bows were blown off and the vessel was abandoned but continued to drift, and was last seen two months later, on March 19th. Fifty-seven of her crew were killed. Capt. Peters was among the eight survivors.

DIAMOND

British Navy, destroyer; Vickers Armstrong; 1,375 tons; 326 x 33x8-5; 36,000i.h.p.; 36 knots; turbine engines; 3-drum boilers; four 4-7 in. guns, 6 smaller, 8 T.T.

The destroyer *Diamond*, Lt. Cdr. P. A. Cartwright, was engaged in the evacuation of British troops from Greece in April, 1941. On the 26th, the *Diamond*, in company with the destroyer *Wryneck*, Cdr. Lane, picked up some 700 officers and men from a transport which had been bombed and set on fire in the Gulf of Nauplia. Next morning both destroyers were subjected to persistent dive bombing and were hit and sunk. Of the *Diamond's* complement, Lt. Cdr. Cartwright, six officers and 141 ratings were lost. Of approximately 950 persons (including troops) on both ships only about 50 were rescued.

The evacuation from Greece lasted from April 25th to May 1st, 1941, and on the latter date Admiral Sir Andrew Cunningham, Commander-in-Chief, Mediterranean Fleet, reported that 45,000 troops and airmen had been safely withdrawn with no other naval losses than the above-mentioned destroyers and four transports. At the same time the Army authorities announced that 80 per cent of the force landed in Greece had been evacuated. In addition to this number many thousands of civilian refugees had been evacuated by the R.A.F.

DIANA

JacdeVoogd; 1936; Niestern & Co.; 313 tons; 127-6x24-lx 8-7; 62n.h.p.; oilengines.

The Dutch coaster *Diana* was bound from Newport to Watchet on January 18th, 1941, when she struck a mine in the Bristol Channel. The motorship sank with five of her crew.

DIANA

RederiAIB Diana; 1908; Osbourne, Graham & Co.; 1,878 tons; 289-1x40x18; 175 n.h.p.; triple-expansion engines.

The Swedish steamship *Diana* was bombed and sunk by British aircraft on March 5th, 1944, N. of Borkum, Germany, outward bound from Emden.

DIANA

Italian Government; 1901; Bremer Vulkan; 1,190 tons; 232-4x 33-2x13-4; 90 n.h.p.; triple-expansion engines.

The steamship *Diana* was formerly the Greek *Maid of Samos*, seized by the Italians. She was torpedoed and sunk by a British submarine on April 12th, 1944, off Imperia.

DICKERSON

United States Navy, destroyer-transport; 1919; New York S.B. Corp.; 1,090 tons; 314-5x30-5x8-5; 25,000 s.h.p.; 35 knots; turbine engines; six 3 in. guns, 2 m.g.A.A., 6 T.T.

The United States destroyer-transport *Dickerson*, Lt. Cdr. R. E. Lounsbury, was engaged in operations off the Japanese island of Okinawa in April, 1945. On the 2nd there commenced a series of heavy attacks by Japanese bombers lasting until the 5th. One bomber crashed on the bridge of the destroyer, killing Lt. Cdr. Lounsbury and 53 officers and men, and causing vital damage.

All attempts to keep the *Dickerson* afloat failed, and she had to be scuttled.

DICTO

B. Stolt-Nielsen; 1904; Short Bros.; 2,363 tons; 295x45-1 x 20-8; 258 n.h.p.; triple-expansion engines.

The Norwegian steamship *Dicto* was sunk by a German submarine off Ushant on April 5th, 1917.

DIDO

Wilson Line; 1896; Earle's Shipbuilding Co.; 4,769 tons; 400-7 x48x28-8; 339 n.h.p.; 10 knots; triple-expansion engines.

The steamship *Dido*, Capt. Taylor, hit a mine and sank four miles N.N.E. of Spurn lightship on Saturday, February 26th, 1916. Twenty-eight of her crew, including the captain, were killed.

DBELPI

Marchesa Giulia Moncalvi ved. de la Penne & Figli; 1912; Stettiner Oderwerke; 1,527 tons; 254-4x35-6x14-4; 146 n.h.p.; triple-expansion engines.

The Italian steamship *Dielpi* was bombed and sunk by British aircraft on August 27th, 1942, N. of Tolmetta, Italy.

DIETHER VON ROEDER

German Navy, destroyer; 1937; Deschimag, Bremen; 1,811 tons; 384x38-3x9-5; 55,000 s.h.p.; 36 knots; turbine engines; five 5 in. guns, four 37mm., 8 T.T.

The *Diether von Roeder* was one of the flotilla of German destroyers sunk in the second battle of Narvik on April 13th, 1940. A full account of the battles is given under the British flotilla leader *Hardy*, which was sunk in the first action on April 10th. There is also a short account under the Norwegian coastal defence ship *Norge*.

DILIGENCE

British Navy, revenue cutter.

The revenue cutter *Diligence* is given in the Navy List for 1838-9, and her commanding officer's name is stated to be Capt. Sir John Reid, Bart. Beyond this there are no particulars. On January 7th, 1839, the cutter was in the Irish Channel with a fair number of persons on board. She encountered bad weather and was driven ashore on the coast of Ireland. Sir J. Reid and 56 others were drowned; the number of survivors is not stated.

DILIGENT

DILIGENT

James Westoll; 1888; Short Bros.; 2,184 tons; 292-3 X 3 9 - 1 X 18-9; 205 n.h.p.; triple-expansion engines.

The British cargo ship *Diligent* sank after a collision off Hartland on April 12th, 1917, while on a voyage from Santander to Troon carrying an Admiralty cargo.

DILSBERG

Raeburn & Verel; 1882; Murdoch & Murray; 1,514 tons; 265-2x34-1x22-3; 160 n.h.p.; 9 knots; compound engines.

The steamship *Dilsberg*, Capt. James Andrews, left Middlesbrough at 6 o'clock on the morning of Thursday, December 8th, 1892, for Civitavecchia with a cargo of 1,850 tons of pig iron. At 7 a.m. the following morning the second officer took a bearing on the Corton lightship and at 10.50 a.m. the first officer took a bearing on the Ship wash lightship. It was proved later that both bearings were incorrect. Capt. Andrews was also in error when he mistook the Longsand lightship for the Galloper. This sequence of errors threw the ship off her course and at 2.45 p.m., in hazy weather, she ran on the Longsand off Ramsgate. The engines were reversed but the safety valve of the boiler broke and the second engineer was badly scalded, steam fell off and it became impossible to keep the pumps working. The sea was rough and the starboard lifeboat and the gig were smashed as soon as they were swung out. The crew were driven to take refuge in the fore-rigging, on the bridge and in the charthouse, six men in the forepart of the steamship being washed overboard and drowned and the captain badly injured. At 1 a.m. the jollyboat was washed away leaving only the port lifeboat which was partially staved in.

The parlous condition of everyone on board was eased at daylight when the tide ebbed and the lifeboat was repaired and launched. Eventually 14 of her crew of 21 reached the Kentish Knock lightship, nine miles from the wreck, at about four in the afternoon of Saturday, December 10th, Capt. Andrews having died from his injuries in the lifeboat.

DIMITRI DONSKOI

Russian Navy, armoured cruiser; 1885; New Dockyard, Leningrad; 5,893 tons; 296-4x52x24-3; 6,609 i.h.p.; 16-5 knots; triple-expansion engines; six 6 in. guns, ten 4-7 in., two 2pdr., 5 T.T.

The *Dimitri Donskoi* was the last of that tragic collection of ships, popularly known as the Baltic Fleet, but in official terms the Second Pacific Squadron, which was almost wholly destroyed at the battle of Tsushima. The vessel was an armoured cruiser, built in 1885 and reconstructed and re-armed in 1895, with a very slow speed and a light armament for a ship of her class. Her inclusion among the modern ships of Admiral Rojdestvensky's squadron, which was intended to defeat the Japanese and unite with the Russian fleet at Port Arthur, was a naval blunder of the first order. Nevertheless this old ship acquitted herself with great honour, and redeemed by her actions a little of the sadly tarnished naval reputation of her country. The full story of Tsushima is told under the *Kniaz Swaroff*, Rojdestvensky's luckless flagship. The *Dimitri Donskoi* was a unit of the cruiser division under Rear-Admiral Enquist, and during the day of the battle, 27th May, 1905, it fell to her share to defend the fleet auxiliaries. In the performance of this duty she sustained damage to her upperworks, but was otherwise intact. She escaped the night attacks of the torpedo craft which had proved so fatal to her consorts, and on the morning of the 28th was proceeding at about 11 knots off the island of Matsushima. It was her hope to elude the Japanese squadrons and to reach Vladivostock in safety. She was not sighted by the enemy until 5.20 in the afternoon, when she was headed off by the *Niitaka* and *Otawa* of Admiral Dewa's 3rd Division of light cruisers, which were later joined by the 4th Division under Admiral Uriu, making six ships against one.

Despite the odds the ancient *Dimitri Donskoi* put up a splendid fight, lasting from 6.50 in the evening, when the two Japanese cruisers opened fire, to well into the darkness, when her attackers drew off. The ship then repulsed an attack by three destroyers, finally throwing off all her foes and continuing on her course. Her condition by this time was, however, desperate. The fire of so many ships, though not maintained by the Japanese with any vigour, had damaged her on both sides, for the *Niitaka* and *Otawa* had attacked on the port beam and the 4th Division on the starboard. Her water-line armour was intact but one boiler had been holed by a shell,

her upperworks had sustained further damage, her ammunition was almost exhausted and her losses in killed and wounded amounted to nearly 200 officers and men of her complement of 503, her captain being among the wounded.

After continuing for some time it was decided that the ship was no longer battle-worthy and just before dawn on the 29th the remnant of her crew landed in parties on the island of Matsushima from the cutter, the sole remaining boat. The last party opened the seacocks and scuttled the ship in time to prevent her from falling into the hands of the Japanese torpedo boat flotilla, which had been searching for her during the night.

In this fashion ended the last fighting unit of the Baltic Fleet, eight battleships and two cruisers having preceded her, while four battleships had surrendered, leaving only a few scattered ships to reach friendly harbours.

DIMITRIOS

E.C.Embricos; 1902; R. Stephenson & Co.; 2,508 tons; 310 X 43-1x20-5; 233 n.h.p.; triple-expansion engines.

The Greek steamship *Dimitrios* was torpedoed and sunk by a submarine in the Mediterranean on October 6th, 1915.

DIMITRIOS G. THERMIOTIS

A.M. Tatakis; 1906; A. Stephen & Sons; 4,271 tons; 385-5X 50 X 26; 390 n.h.p.; triple-expansion engines.

The Greek steamship *Dimitrios G. Thermiotis* was torpedoed and sunk by a German submarine on January 18th, 1942, off Cape Race, on a voyage from Demerara and Sydney, N.S., to London. There were no survivors.

DINARA

Austrian Navy, destroyer; 1909; Austria; 390 tons; 6,000 i.h.p.; 28 knots; turbine engines; Yarrow boilers; six 12 pdr. guns, 2 T.T.

The destroyer *Dinara* was torpedoed and sunk in Durazzo Harbour by a flotilla of Italian torpedo boats on October 2nd, 1918.

DINGLE

West Lancashire S.S. Co.; 1914; J. Fullerton & Co.; 593 tons; 170x28-1x10-3; 90 n.h.p.; triple-expansion engines.

The steamship *Dingle* hit a mine and sank on February 20th, 1916, when she was ten miles south by west of Kentish Knock. Nine of the crew including the captain were killed.

DINORAH

J. Dryden; 1860; Robinson & Co.; 367 tons; 119x26-5x17.

The barque *Dinorah* was run down by the steamship *Dorunda* near Gibraltar about July 28th, 1876. Ten lives were lost.

DINORAH

French Government; 1912; W. Doxford & Sons; 4,208 tons; 369-4x52x25-9; 310 n.h.p.; triple-expansion engines.

The French steamship *Dinorah* was torpedoed and sunk by a German submarine in the Atlantic on September 25th, 1917.

DINSDALE

The Admiralty; 1942; Harland & Wolff; 8,214 tons; 465-6x 59-5x33-8; 502n.h.p.; oilengines.

The tanker *Dinsdale* was torpedoed and sunk by a German submarine on May 31st, 1942, 120 miles S.S.W. of St. Paul Rocks. Five men were killed on board and eight were lost in a dinghy.

DIOMED

Ocean S.S. Co.; 1895; Scott & Co.; 4,672 tons; 392x47-1x26; 350 n.h.p.; 12 knots; triple-expansion engines. The *Diomed*, Capt. J. Myles, was torpedoed and sunk by a German submarine 57 miles W.N.W. of the Scilly Isles on August 22nd, 1915. The explosion killed Capt. Myles who was on the bridge at the time as well as a quartermaster and a seaman. The first officer, Mr. T. W. Richardson, and two men were injured. In getting away the boats, two British and five Chinese seamen were drowned, making a total loss of ten dead and three injured from a crew of 52.

DIONE H

Ambrose, Davies & Matthews; 1936; Ateliers et Chantiers de la Seine; 2,660 tons; 307-6x43-6x19-1; 225 n.h.p.; 9 knots; triple-expansion engines.

The steamship *Dione II*, Capt. R. Squirrel, was bombed and disabled

by German aircraft on February 3rd, 1941, about 200 miles W. of Ireland on a voyage from Wabana to Cardiff. Early on the following morning she was torpedoed and sunk by a German submarine. The chief officer was the only survivor.

DIPLOMAT

Charente S.S. Co.; 1921; C. Cornell & Co.; 8,240 tons; 482-1x58-4x33-4; 871 n.h.p.; turbine engines.
The steamship *Diplomat* was torpedoed and sunk by a German submarine on November 27th, 1940, on a voyage from New Orleans to Liverpool. Fourteen of her crew were lost.

DIPTON

A. M. Sutherland; 1906; Furness, Withy & Co.; 3,811 tons; 340x47-1x27-4; 317n.h.p.; triple-expansion engines.
The British cargo ship *Dipton* sank after a collision on November 5th, 1918, in 49° 18' N., 6° 05' W., while on a voyage from New York and Sydney, C.B., to Havre carrying a general cargo.

DIRPHYS

V.J.Pateras; 1917; W. Pickersgill & Sons; 4,240 tons; 390 x 53-3x23-5; 466n.h.p.; triple-expansion engines.
The Greek steamship *Dirphys* was torpedoed and sunk by a German submarine at 1 a.m. on June 8th, 1941, about 600 miles E. of Newfoundland on a voyage from Swansea to Montreal. Six of her crew were killed.

DIU

Portuguese Government; 1901; Flensburger Schiffs. Ges.; 5,556 tons; 418-1x54-8x20-4; 505 n.h.p.; quadruple-expansion engines.
The German steamship *Marienfels* was requisitioned by the Portuguese Government and renamed *Diu*. She was torpedoed and sunk by a German submarine in the Bristol Channel on October 14th, 1917.

DIXIE

A/S Frank; 1937; Porsgrund Mek. Verksted; 1,610 tons; 246-6x37-9x18.2; 63 n.h.p.; compound engines & L.P. turbine.
The Norwegian steamship *Dixie* was bombed and sunk by Allied aircraft on June 17th, 1944, in the Varanger Fjord.

DIXIE ARROW

Socory-Vacuum Oil Co.; 1921; New York Shipbuilding Corpn.; 8,046 tons; 468-3x62-7x32-0; 625 n.h.p.; 11 knots; quadruple-expansion engines.
The American tanker *Dixie Arrow*, Capt. A. M. Johanson, was torpedoed and sunk by a German submarine S. of Cape Hatteras on March 26th, 1942. Eleven of her crew, including Capt. Johanson, were killed and one was wounded. The vessel was not in convoy at the time.

DJAMBI

Rotterdamsche Lloyd; 1919; Maats. Fyenoord; 6,984 tons; 445-6x54-3x34-4; 1,590n.h.p.; oil engines.
The Dutch motorship *Djambi* was in collision with the *Silverbeech* and sank on March 13th, 1943, in about 39° N., 10° W., while on a voyage from Liverpool to Beira.

DJEMNAH

Messageries Maritimes; 1875; Messageries Maritimes; 3,716 tons; 394-6x39-7x32-8; 10 knots; compound engines.
The French liner *Djemnah* was carrying a large contingent of troops through the Mediterranean in an escorted convoy on the night of July 14th-15th, 1918, when she was torpedoed by a German submarine. She sank within a short time with the loss of 442 lives.

DJERISSA

F. C. Strick & Co.; 1910; W. Gray & Co.; 3,723 tons; 350-1X50-1x23-6; 314n.h.p.; triple-expansion engines.
The British cargo ship *Djerissa* was wrecked on Newbiggin Shoal, Cresswell, on November 21st, 1927, while on a voyage in ballast from Emden to the Tyne.

DJIBOUTI

Cie. Havraise Peninsulaire de Nav. a Vap.; 1901; Sir James Laing & Sons; 4,305 tons; 388 x 47-8 x 27; 418 n.h.p.; triple-expansion engines.
The French steamship *Djibouti* was torpedoed and sunk by a submarine in the Mediterranean on January 28th, 1918.

DJURDJURA

Ministry of War Transport (Westbourne Shipping Co.); 1922; Ardrossan S.B. & D.D. Co.; 3,460 tons; 350-7x50-2x22-8; 375n.h.p.; triple-expansion engines.
The British steamship *Djurdjura* was torpedoed and sunk by a German submarine on June 13th, 1941, on a voyage from Peipel to Oban. Thirty-three of her crew were lost. There were five survivors.

DOELWYCK

740 tons; 185 X 31x18 (approx.).
The sailing ship *Doelwyck* was bound from Sydney, N.S.W. to Batavia. On the night of April 21st, 1854, when in company with the *Hester*, 840 tons, she ran on Kenn Reef in the Coral Sea. The *Hester* was wrecked at the same time. The crews took to the boats, those from the *Doelwyck* not being heard of again. One of the *Hester's* boats with nine men was picked up by the *Jenny Lind*.

DOGGER BANK, Battle of, see BLUCHER**DOGGERBANK**

German Government; 1926; Harland & Wolff; 5,154 tons; 420-3x53-9x26-5; 717n.h.p.; oil engines.
The German tanker *Doggerbank*, formerly the British *Speybank*, was torpedoed and sunk by a German submarine on March 3rd, 1943, about 600 miles S.W. of the Azores. For the full story see *Speybank*.

DOKANMARU

Osaka Shosen K.K.; 2,270 tons.
The Japanese ship *Do/can Mam* was torpedoed and sunk by the U.S. submarine *Kete* on March 10th, 1945, about 100 miles N.W. of Amami O., Ryukyu Islands.

DOKKA

D/S A/S Songa; 1925; Laxevaags Mask. & Jernskibs.; 1,168 tons; 230x36-5x14-8; 101 n.h.p.; triple-expansion engines.
The Norwegian steamship *Dokka* was torpedoed and sunk by a German submarine on October 17th, 1940, on a voyage from Barry to Sydney, N.S. Ten of her crew were killed.

DOKOMARU

Nippon Yusen Kaisha; 2,274 tons; steam engines.
The steamship *Doko Maru* was sunk by U.S. carrier-based aircraft on October 21st, 1944, W. of Panay Island, Philippines.

DOLORES

A. Holland & Co.; 1890; R.Dixon & Co.; 2,188 tons; 277x39x18-2; 200 h.p.; triple-expansion engines.
The British cargo ship *Dolores* was wrecked on May 23rd, 1892, at the Castillos, Uruguay, on a voyage from Penarth to La Plata with a cargo of coal.

DOLPHIN

General Steam Navigation Co.; 1855; London; 641 tons; 197X 28-2x16-3; 180 n.h.p.; 10 knots; steam engines.
On the night of September 18th, 1885, the paddle steamer *Dolphin* left Dover for Havre with 25 passengers and crew. When off the South Foreland the *Dolphin* was run down by the steamship *Brenda* and sank almost at once. She was struck just abaft of midships with such force that she was nearly cut in two. The number drowned was 11 of whom four were passengers.

DOM PEDRO

Chargeurs Reunis; 1879; Forges et Chantiers de la Mediterranee; 3,000 tons; 329-8x39-4x22; 1,300i.h.p.; 10 knots; compound engines.
The French ship *Dom Pedro* left Havre for La Plata on May 20th, 1895, with 126 persons under command of Capt. Crequer, an old and experienced officer of the company. The ship called at Bordeaux

DOMALA

and Pasajes and was making for Carril (now Villagarcia) to embark some 200 emigrants. At about 6 p.m. on the 27th when nearing Carril she struck on the Fraquina Reef, between 10 and 12 miles off shore. The boilers exploded and there was an immediate panic. Capt. Crequer fought, revolver in hand, to quell the crowd, but his instructions to the passengers went unheeded and finally only 39 persons were saved, some by boats from the shore.

The weather was fine and clear with a calm sea and had it not been for the panic it is very probable that the greater proportion of those on board would have been saved.

DOMALA

British India Steam Navigation Co.; 1921; Barclay Curie & Co.; 8,441 tons; 450x58-3x32-9; 1,085 n.h.p.; 13-5 knots; oil engines.

The *Domala*, Capt. Fitt, was bombed, but not sunk, in the English Channel at about 4.30 a.m. on Saturday, March 2nd, 1940. The vessel was bound from London via Antwerp, where she had embarked 143 British Indian subjects repatriated by the Germans, to Calcutta. The total number on board was 295 of whom 46 were English and 249 were Indians. Some 20 miles E. of St. Catherine's Point a Heinkel bomber with her navigation lights burning passed over her in the direction of the English coast and was assumed by the ship's officers to be a British patrol. Shortly afterwards the same aeroplane came back flying at a height of 30 to 40 feet above the liner's deck. Four bombs were dropped, three of which hit, causing terrible casualties among the passengers and crew. Capt. Fitt, who was on the bridge, was killed, together with 18 other Europeans and 81 Indians, of whom 36 were crew. Before flying away the bomber swept the liner's decks with her machine guns.

The *Domala*, badly damaged, was towed into Cowes Roads. The Dutch steamship *Jonge Willem* picked up one lifeboat containing 48 persons and also a raft with three men. Whilst engaged in this work of rescue she was bombed and machine gunned by the same aeroplane but suffered no damage or casualties.

DOMINGO

S. Censinifu D.; 1902; Hall, Russell & Co.; 4,297 tons; 365-2x 48-2x20-4; 357 n.h.p.; triple-expansion engines.

The Italian steamship *Domingo* was wrecked on February 18th, 1923, at Foz Arelho near Cape Carvoeiro on a voyage from Penarth to Venice with a cargo of coal.

DOMINGO DE LARRINAGA

Larrinaga Steamship Co.; 1929; Lithgows; 5,358 tons; 415X 55 X25-6; 359 n.h.p.; 10-5 knots; triple-expansion engines.

The steamship *Domingo de Larrinaga*, Capt. William Chalmers, was 300 miles S.W. of Freetown on July 31st, 1940, when she was intercepted and sunk by a German raider. Eight of the crew were killed and 30 were taken on board the raider. The *Domingo de Larrinaga* was not in convoy at the time.

DOMINO

Ellermerfs Wilson Line; 1917; Dundee S.B. Co.; 1,193 tons; 255-5x36-2x14-9; 249 n.h.p.; triple-expansion engines.

The British cargo ship *Domino* was wrecked at Groningen light-house on November 4th, 1923, while on a voyage from London to Christianssand with a general cargo.

DOMIRA

Maclay & Mdtype; 1924; W. Gray & Co.; 3,852 tons; 352-2X 50x24-7; 354 n.h.p.; triple-expansion engines.

The British cargo ship *Domira* was wrecked on Great Guano Cay on September 25th, 1929, while on a voyage in ballast from New York to Cardenas.

DON ANTONIO ULLOA

Spanish Navy, 3rd class cruiser; 1887; Spain; 1,130 tons; 210 X 32x12-5; 1,600 i.h.p.; 14 knots; triple-expansion engines; four 4•7 in. guns, four 2•2 in., two 1•6 in., 5 m.g., 3 T. T.

For narrative of the loss of this vessel see *Reina Cristina*, flagship of Rear-Admiral Montojo at the battle of Manila Bay, May 1st, 1898, when the entire Spanish Asiatic Squadron was destroyed.

DON ARTURO

Buenos Ayres & Pacific Railway Co.; 1906; Craig Taylor & Co.; 3,680 tons; 350x50-1x23-3; 322 n.h.p.; 10-5 knots; triple-expansion engines.

The steamship *Don Arturo*, on a voyage from Algiers to the Tees, in ballast, was lost in the Atlantic on, or about, June 25th, 1917. It is a reasonable surmise that she was sunk by a German submarine. The vessel carried a crew of 34.

DON BENITO

George Dodd; 1906; Short Bros.; 3,749 tons; 350-4x50-1x 23-1; 322 n.h.p.; triple-expansion engines.

The British cargo ship *Don Benito* sank after a collision on March 27th, 1917, about 50 miles south-west of Bishop's Light, Scilly. At that time she was being employed as an Admiralty collier and was on an voyage from Astoria to the United Kingdom with a cargo of patent fuel.

DON DIEGO

Buenos Ayres & Pacific Railway Co.; 1906; J. Readhead & Sons; 3,632 tons; 350x50-1x23-2; 326 n.h.p.; triple-expansion engines.

The British ship *Don Diego* was intercepted by a German submarine on May 21st, 1917, 40 miles east by south of Linosa. The ship was shelled and sunk, and five of the crew were killed.

DON ESTEBAN

De La Rama S.S. Co.; 1936; Fried. Krupp Germania Werft; 1,616 tons; 267-1x37-4x14-4; 447 n.h.p.; oil engines.

The Philippine motorship *Don Esteban* struck a mine and sank on February 20th, 1942, on a voyage from Darwin to Manila.

DON ISIDRO

De La Rama S.S. Co.; 1939; Fried. Krupp Germania Werft; 3,261 tons; 320-9x46x20; 883 n.h.p.; oil engines.

The Philippine motorship *Don Isidro* was bombed by Japanese aircraft on February 19th, 1942, on a voyage from Batavia to Darwin. The vessel was run ashore near Darwin in a sinking condition and was wrecked. Eleven lives were lost.

DON JOSE

Madrigal & Co.; 1879; Caird & Co.; 1,758 tons; 269-3x33-8 X 23-9; 208 n.h.p.; compound engines.

The Philippine ship *Don Jose* was wrecked on November 17th, 1925, 15 miles east of Keelung on a voyage from Keelung to Manila with coal.

DON JUAN DE AUSTRIA

Spanish Navy, 3rd class cruiser; 1887; Spain; 1,130 tons; 210x 32x12-5; 1,600 i.h.p.; 14 knots; triple-expansion engines; four 4•7 in. guns, four 2•2 in., two 1•6 in., 5 m.g., 3 T. T. For narrative of the loss of this vessel see *Reina Cristina*, flagship of Rear-Admiral Montojo at the battle of Manila Bay, May 1st, 1898, when the entire Spanish Asiatic Squadron was destroyed.

DON MARQUIS

U.S. War Shipping Administration; 1943; California S.B. Corp.; 7,176 tons; 422-8x57x34-8; triple-expansion engines.

The steamship *Don Marquis*, carrying service stores and personnel, was in collision with the tanker *Missionary Ridge*, 10,195 tons, on September 26th, 1944. Fire broke out and there was considerable loss of life. The ship was beached in 2° 10' S., 147° 32' E., and was later towed to Seadler Harbour, Admiralty Islands.

DONA AURORA

De La Rama S.S. Co.; 1939; Cantieri Riuniti DelVAdriatico; 5,011 tons; 413-3x55-7x25-4; 1,122 n.h.p.; oil engines.

The Philippine motor vessel *Dona Aurora* was torpedoed and sunk by an Italian submarine on December 25th, 1942, 150 miles N.W. of Fernando de Noronha on a voyage from Table Bay to Baltimore. Seven of her crew were killed.

DONAU

Flensburger Dampfercompagnie Harold Schuldt & Co.; 1939; Neptunwerft Rostock; 2,931 tons; 332• 1x49x19-1; 316n.h.p.; compound engines & L.P. turbine.

The German steamship *Donau* was torpedoed and sunk by a British submarine on August 30th, 1941, W. of Seloen Island, Norway. She was a unit of a troop carrying convoy which included, among others, the *Bahia Laura*, which was also sunk. Some 1,700 German troops were lost on these two ships.

DONAU

Norddeutscher Lloyd; 1929; Deutsche Schiff.-u. Maschinenbau; 9,035 tons; 521x63-6x31-1; triple-expansion engines & L.P. turbine.

The German liner *Donau* was wrecked by an internal explosion on January 16th, 1945, in the Oslo Fjord, and was put ashore in a sinking condition. She was carrying some 1,500 German troops at the time, a number of whom were killed by the explosion.

DONEGAL

Midland Railway Co.; 1904; J.Caird & Co.; 1,885 tons; 33 1x 42-1x17-2; 386 n.h.p.; 19 knots; triple-expansion engines.

The passenger steamship *Donegal* was converted to a hospital ship in the First World War. On the evening of April 17th, 1917, she was bringing slightly wounded men from France when she was torpedoed by a German submarine 19 miles S. of Dean lightship. She sank in a very short time taking with her 29 wounded soldiers and 11 of her crew.

DONERAIL

U.S. Maritime Commission; 1924; Burmeister & Wain; 4,473 tons; 380x53-9x25-3; 629 n.h.p.; oil engines.

The Panamanian motorship *Donerail* was intercepted by a Japanese submarine on December 9th, 1941, and sunk by gunfire, about 200 miles S.E. of Hawaii on a voyage from Suva to Vancouver. The ship carried a crew of 33 and seven passengers. One boat containing 24 men got away from the ship but the captain and 15 others died before the boat reached land.

DONETZ

Russian Navy, gunboat; 1887; Black Sea; 1,200 tons; 200 x 30x14; 13 knots; triple-expansion engines; two 6 in. guns, one 4 • 7 in., two 12 pdr., four 3 pdr.

The gunboat *Donetz* was serving as guardship at Odessa at the outbreak of the First World War. Late in October 1914 Turkey entered the war against the Allies, and on the 29th, two Turkish torpedo boats made a surprise attack upon the shipping in Odessa harbour. They were successful in torpedoing the *Donetz* and damaging the French steamship *Portugal*, together with three Russian steamships. They also shelled the town and caused some loss of life.

DONETZ

Sovtorgflot; 1924; Barclay, Curie & Co.; 1,710 tons; 250-5x 39-7x17-9; 169 n.h.p.; triple-expansion engines.

The Russian steamship *Donetz* left Leningrad on December 29th, 1935, for Hamburg and Rotterdam with a cargo of grain and is supposed to have struck a mine on the next day south of Styrsudd. Wreckage and bodies were washed ashore.

DONIZETTI

"Tirrenia" Soc. Anon di Nav.; 1928; Cant. Nav. Triestino; 2,428 tons; 294x40-2x21-1; 357n.h.p.; oil engines.

The Italian motorship *Donizetti* was sunk by gunfire from British warships on September 23rd, 1943, S.W. of Rhodes.

DONNA MARIA II

Portuguese Navy, frigate, sail; 32 guns.

On the afternoon of October 30th, 1850, the Portuguese frigate *Donna Maria II*, Capt. d'Assis e Silva, was preparing for a party in celebration of the birthday of Don Fernando, consort of the Queen of Portugal. The ship was lying at anchor in the harbour of Macao, a royal salute having been fired just previously, when she blew up without warning. All on board were killed with the exception of nine persons, who were rescued by the boats of the U.S. ship *Marion* which was lying nearby. Five of these afterwards died of their injuries.

The number of those on board at the time of the disaster was estimated at 200, chiefly Lascar seamen, with European officers and marines.

DONOVAMA

Anglo-Saxon Petroleum Co.; 1941; Hawthorn, Leslie & Co.; 8,149 tons; 465-3x59-3x33-8; 502 n.h.p.; oil engines.

The tanker *Donovama* was torpedoed and sunk by a German submarine on July 21st, 1942, on a voyage from Lagos to Trinidad. Four men were killed on board and another died after being picked up.

DORA

E. Brodin; 1881; R. Thompson & Son; 1,526 tons; 271 -3 x 34-1x16-9; 175 n.h.p.; triple-expansion engines.

The Swedish steamship *Dora* was torpedoed and sunk by a German submarine in the North Sea on June 10th, 1918.

DORA

U.S. Shipping Board (Emergency Fleet Corp.); 1913; Cantieri Navale Triestino; 7,037 tons; 411-8x51-7x26-3; 519 n.h.p.; triple-expansion engines.

The American steamship *Dora* was torpedoed and sunk by a German submarine in the Atlantic on September 4th, 1918.

DORA FRITZEN

Johs. Fritzen & Sohn; 1914; Ropner & Sons; 6,888 tons; 419-4 X56-9x34-2; triple-expansion engines.

The German steamship *Dora Fritzen* was torpedoed and sunk by British motor torpedo boats on January 6th, 1945, off Stavfjord, Norway.

DORAVORE

Lundegaard & Stray; 1887; Short Bros.; 2,760 tons; 316-5X 40x19-2; 245 n.h.p.; triple-expansion engines.

The Norwegian steamship *Doravore* was sunk by a submarine in the Mediterranean on or about February 20th, 1917.

DORCHESTER

Merchants & Miners Transportation Co.; 1926; Newport News S.B. & D.D. Co.; 5,649 tons; 350x52x36; 404 n.h.p.; triple-expansion engines.

The American steamship *Dorchester* was in convoy from St. John's, Newfoundland, to Greenland on February 3rd, 1943, when she was torpedoed by a German submarine. She had on board a crew of 130, an armed guard of 23 and 751 passengers, most of the latter being U.S. troops. In addition she carried 1,000 tons of cargo.

The attack took place at 3.55 a.m. without warning. There was some confusion and many of the boats and rafts were got out too hurriedly before the way on the ship had ceased. As a result many of them capsized. The explosion cut off the electric power and no radio signals could be sent.

The *Dorchester*, which had been torpedoed on the starboard side, sank very rapidly without the three U.S. cutters which formed the escort realising that she was in trouble. Of the 904 people on board 605 were lost, including 404 soldiers.

DORI MARU

Japanese Government; 1902; Nylands Varksted; 1,469 tons; 231-5x35-1x20-4; 109n.h.p.; triple-expansion engines.

The steamship *Dori Maru* was formerly the Chinese *Tong Lee*, seized by the Japanese. On July 6th, 1944, she was torpedoed and sunk by the U.S. submarine *Tang* about 150 miles S.W. of Chinsampo, Korea.

DORIC STAR

Blue Star Line; 1921; Lithgows; 10,086 tons; 529-8x64x37; 1,398 n.h.p.; 13 knots; turbine engines.

The liner *Doric Star*, Capt. W. Stubbs, was intercepted and sunk by the German pocket battleship *Admiral Graf Spee* on December 2nd, 1939, about 500 miles W. of Damara Land, South West Africa. Passengers and crew were taken off before the sinking and there were no casualties.

DORRINGTON COURT

DORINGTON COURT

Court Line; 1939; J. L. Thompson & Sons; 5,281 tons; 426 X 59-9x25-5; 420 n.h.p.; triple-expansion engines.

The steamship *Dorington Court* was torpedoed, shelled and sunk by a submarine on November 24th, 1942, 105 miles S.E. of Lourenço Marques, on a voyage from Calcutta to England.

DORIS

Soc. Commerciale Italiana di Nav.; 1901; N. Oderofu A. & Co.; 3,979 tons; 340 - 5x45x19-8; 322 n.h.p.; triple-expansion engines. The Italian steamship *Doris* was torpedoed and sunk by a submarine in the Mediterranean on October 13th, 1917.

DORISBROOK

Miller & Richards; 1915; J. Blumer & Co.; 3,431 tons; 348-5 X 48-7x23-3; 301 n.h.p.; triple-expansion engines.

The British steamship *Dorisbrook* sank after a collision on February 9th, 1918, in 5° 48' S., 81° 19' W., while employed as an Admiralty collier. She was on a voyage from Barry to Peru with coal.

DOROTHY

J. Ness & Co.; 1903; J. L. Thompson & Sons; 3,806 tons; 364-9x50-5x23-3; 328n.h.p.; 10 knots; triple-expansion engines.

The steamship *Dorothy* was torpedoed and sunk by a German submarine 25 miles S.E. by S.A.S. of Pantelleria on February 24th, 1917. Six of the crew were killed. The captain was among the survivors.

DORRIGO

John Burke Ltd.; 1913; *Smith's Dock Co.*; 715 tons; 180-5X 29-6x13-6; 96 n.h.p.; triple-expansion engines.

The Australian coasting steamship *Dorrigo* left Brisbane for Thursday Island, Queensland, on April 5th, 1926. There was a heavy S.E. sea and the steamship foundered off Double Island Point a few hours after leaving port. Of those on board 22 were lost and two survivors were picked up from a raft.

DORSET

Federal Steam Navigation Co.; 1934; *Workman, Clark & Co.*; 10,624 tons; 493-5x68-6x34-5; 11,000 b.h.p.; 16 knots; oil engines.

The liner *Dorset*, Capt. J. C. Tuckett, was bombed and disabled by enemy aircraft on August 13th, 1942, whilst in a convoy to Malta. She was abandoned without loss of life and shortly afterwards was again bombed and sunk 75 miles W. of Malta.

DORSETSHIRE

British Navy, heavy cruiser; 1929; *Portsmouth Dockyard*; 9,975 tons; 630x66x17; 80,000 s.h.p.; 32-25 knots; turbine engines; 3-drum boilers; eight 8 in. guns, eight 4 in., four 3pdr., 16 smaller; 1 aircraft.

The heavy cruiser *Dorsetshire*, Capt. A. W. S. Agar, v.c., D.S.O., was bombed and sunk on April 5th, 1942, the day after she left Colombo in company with the heavy cruiser *Cornwall*. The attack was carried out by dive bombers from an aircraft carrier which formed part of a strong Japanese raiding force sent into the Bay of Bengal early in April. The vessel sank with the loss of 19 officers, 192 British and 16 South African ratings killed and one officer wounded. *Cornwall* (which see) was also sunk and over 1,100 survivors from both ships, including the captains, were rescued next day by British destroyers.

Dorsetshire was one of the ships engaged in the pursuit of the *Bismarck* (which see) and fired the final torpedo which sent the German battleship to the bottom. She also sank a surface raider in the South Atlantic in December, 1941.

DORTE JENSEN

Hakon Thomsen; 1901; *Wood, Skinner & Co.*; 2,086 tons; 280X39-6X18-5; 188 n.h.p.; triple-expansion engines.

The Danish steamship *Done Jensen* struck a mine and sank in the North Sea on June 18th, 1917.

DORTHEA

A/SD/Dorthea; 1921; *Kjobenhavns Flydedok & Skibsv.*; 1,298 tons; 241-8x36-2x16-2; 106n.h.p.; triple-expansion engines. The Danish steamship *Dorthea* was in collision with the *Kirsta* on March 20th, 1937, while on a voyage from Methil to Copenhagen with a cargo of coal. She sank 15 miles S.E. of the Skaw lightship.

DORYO MARU

Osaka Shosen K.K.; 2,274 tons. The steamship *Doryo Mam* was torpedoed and sunk by the U.S. submarine *Spadefish* on March 23rd, 1945, about 150 miles W.S.W. of the Shichi-to Islands.

DORYSSA

Anglo-Saxon Petroleum Co.; 1938; *Hawthorn, Leslie & Co.*; 8,078 tons; 465-3x59-3x33-8; 4,000 i.h.p.; 12-5 knots; oil engines.

The motor tanker *Doryssa*, Capt. W. Fraser, was intercepted by a German submarine on April 25th, 1943, about 250 miles E.S.E. of Cape Agulhas. The submarine opened fire from the surface and later sank the vessel with a torpedo. Forty-eight of the crew, including Capt. Fraser, were killed.

DOSEI MARU

Japanese Government; 1920; J. C. Tecklenborg A.G.; 10,895 tons; 523-5x65-7x37-5; 1,020 n.h.p.; triple-expansion engines. The steamship *Dosei Mam* was formerly the Philippine *Don Jose*, bombed by the Japanese at Guadalcanal in December, 1941, and subsequently repaired by them. On January 16th, 1945, she was sunk by U.S. carrier-based aircraft about 50 miles S. of Hongkong.

DOTEREL

British Navy, sloop; 1880; *Chatham Dockyard*; 1,124 tons; 170 x 36x15-7; 900 i.h.p.; 12 knots; compound engines; 6 guns.

The sloop *Doterel* left Sheerness on January 17th, 1881, under command of Cdr. Richard Evans with a complement of 155 officers and men to join the British squadron in the Pacific. The ship reached the Straits of Magellan without incident and on the morning of April 26th, left Elizabeth Island at about 6 and anchored at Punta Arenas at 8.30. At 10 o'clock there was an explosion which burst open the starboard side of the ship and the upper deck. Some thirty seconds later there was a more violent explosion in the neighbourhood of the fore magazine and the ship sank. Cdr. Evans was in his bathroom at the time and was able to jump overboard and grasp some wreckage with the help of which he was able to gain the shore.

The loss of life in this disaster was 143 officers and men. The saved numbered 12, including Cdr. Evans, Lt. J. M. Stokes, Paymaster J. N. Colborne, Engineer Walker and eight members of the crew.

H.M.S. *Garnet* with divers on board arrived at Punta Arenas about the middle of May. The divers found the ship lying in 11 fathoms of water, in two portions, the larger being about 96 feet in length and the other, much damaged, about 25 feet long, some distance away. Other wreckage such as masts, guns and anchors were distributed about the bed of the ocean, all testifying to the extreme violence of the explosions.

An Admiralty Court Martial gave its verdict on September 3rd, 1881, to the effect that the explosion was attributable to gases from paint, and exonerating officers and crew from all blame.

A quantity of paint was carried on board and it was presumed that the first explosion took place in the paint store. A similar explosion occurred on board H.M.S. *Triumph*, also on the Pacific station, when three men were killed and seven injured. As a result of these accidents the Admiralty ordered all stores of the particular brand of paint in H.M. dockyards and ships to be destroyed.

DOTTEREL

Cork Steamship Co.; 1904; *Swan, Hunter & Wigham Richardson*; 1,596 tons; 270x35-8x19-6; 209 n.h.p.; 10 knots; triple-expansion engines.

The steamship *Dotterel* struck a mine and sank 4½ miles N. by E. of Boulogne Pier on November 29th, 1915. Five of the crew were killed. The captain was among the survivors.

DOTTEREL

British & Continental Steamship Co.; 1936; Burntisland S.B. Co.; 1,385 tons; 262x40x15-7; 11 knots; triple-expansion engines.
The steamship *Dotterel*, Capt. William Nash, was in convoy off No. 6 Buoy, Southwold, on March 7th, 1941, when she was torpedoed by a German submarine. The disabled ship was taken in tow but drifted ashore and became a total wreck. Eight of the crew were killed and two wounded. Capt. Nash was among the survivors.

DOUAISIEN

Cie. des Bateaux a Vapeur du Nord; 1921; Nordseewerke A.G.; 2,954 tons; 338-7x48-2x20-8; 320 n.h.p.; triple-expansion engines.
The French steamship *Douaisien* struck a mine and sank on May 29th, 1940, when leaving Dunkirk with 1,250 evacuees on board, most of whom were saved.

DOUGLAS

Douglas S.S. Co.; 1881; Hall, Russell & Co.; 1,566 tons; 250-2x34-2x23-6; 240 h.p.; compound inverted engines.
The British cargo ship *Douglas* was wrecked on February 11th, 1886, on the White Rocks, off Swatow, China. She was on a voyage from Amoy to Swatow carrying passengers and a general cargo.

DOUGLAS

Pyman, Bell & Co.; 1873; T. Turnbull & Son; 1,022 tons; 225-3X30-1X16-7; 99hp.; compound engines.
The British cargo ship *Douglas* was wrecked on April 20th, 1888, near Hanstholm Light, Denmark, while on a voyage from Libau to Antwerp carrying a cargo of oats.

DOUGLAS MAWSON

Queensland Government; 1914; A. W. Settree; 333 tons; 141-6X30-7X7-8; 40r.hp.; compound engines.
The Queensland Government steamship *Douglas Mawson* was bound from Burketown to Thursday Island when she was overwhelmed by a cyclone in the Gulf of Carpentaria. The disaster occurred on March 28th, 1923, the steamship sinking with all on board.

DOURO

The wood ship *Douro* with a cargo of iron and brass fittings was wrecked on Crebawethan Round Rock, Scilly Isles, on January 28th, 1844. All hands were lost.

DOURO

Royal Mail Steam Packet Co.; 1865; J. Caird & Co.; 2,846 tons; 326-4x40-2x35; 500 h.p.; 12 knots; compound inverted engines.
The liner *Douro* left Lisbon on Friday, March 31st, 1882, on her homeward voyage from Brazil to Southampton. She was under command of Capt. E. C. Kemp and carried 135 persons, of whom 55 were passengers. At about 10.45 on the evening of April 1st, 45 miles off Cape Finisterre, the first officer being in charge, a light was sighted on the starboard bow which later proved to be that of the Spanish steamship *Yrurac Bat*, Corunna to Havana. A collision appeared imminent and the order was given to port the *Douro's* helm, but too late to save the vessel. The Spanish steamship struck her with a great force on the starboard side, almost amidships, and she began to sink. There was some confusion in lowering the *Douro's* boats but eventually seven got away in safety. The liner then foundered, going down by the stern.
Meanwhile the *Yrurac Bat* was in a bad way and within a short time she also foundered. Both ships had sunk within 30 minutes of the collision and matters were made worse by a strong N.N.E. wind and a heavy sea. The arrival of the steamship *Hidalgo* prevented a much greater loss of life and she was able to pick up 112 of the *Douro's* people and 32 from the *Yrurac Bat*, which carried 68 all told.

The drowned numbered 59, of whom 23 belonged to the *Douro* and 36 to the *Yrurac Bat*. Capt. Kemp and most of his officers were drowned.

DOURO

E.B. Aabys Rederi A/S; 1921; A/S Jarlso Vcerft; 928 tons; 200-4x31-9x12-7; 106 n.h.p.; triple-expansion engines.
The Norwegian steamship *Douro* was bombed and sunk by German aircraft on May 9th, 1942, between Reykjavik and Hull. Ten lives were lost and ten saved.

DOVER CASTLE

Union Castle Mail S.S. Co.; 1904; Barclay Curie & Co.; 8,271 tons; 476-4x56-7x31-9; 969 n.h.p.; 14-5 knots; quadruple-expansion engines.
The liner *Dover Castle* was first employed as a troopship in the First World War, and later converted to a hospital ship. At about 7 p.m. on May 26th, 1917, when in the Mediterranean 50 miles N. of Bona, she was attacked by a German submarine which scored a hit with a torpedo. The *Dover Castle* was in company with another hospital ship, the *Karapara*, escorted by the destroyers *Camelon* and *Nemesis*. The *Nemesis* put out a smoke screen and escorted the *Karapara* to Bona. The *Camelon* meanwhile took off the wounded and the crew from the sinking vessel. The captain and a volunteer crew remained on board in the hope of saving the hospital ship, but about an hour later another torpedo struck her and she sank in three minutes. All on board were saved except seven stokers who were killed by the explosion.

DOVER MARU

Kuribayashi Shosen K.K.; 1920; Ishikawajima S.B. & Eng. Co.; 3,212 tons; 305x43-7x27-2; 338 n.h.p.; triple-expansion engines.
The steamship *Dover Mam* was bombed and sunk by U.S. land-based aircraft on October 26th, 1943, S. of Rangoon.

DOWA MARU

Nitto Risen K.K.; 1,916 tons.
The steamship *Dowa Maru* was torpedoed and sunk by the U.S. submarine *Guavina* on November 22nd, 1944, 60 miles west of Sin Cowe Island.

DOWLAIS

Dowlais Steamship Co.; 1904; R. Craggs & Sons; 3,016 tons; 330-1x46x22-2; 289 n.h.p.; 9-5 knots; triple-expansion engines.
The steamship *Dowlais* was torpedoed and sunk by a German submarine off Cap de Fer on December 3rd, 1917. Twenty-six of her crew, including the captain, were killed.

DRAGONE

Italian Navy, torpedo boat; 194-; Italy; 706 tons; 265-7X 27-2x9; 22,000sh.p.; 31-5 knots; turbine engines; 3-drum boilers; two 3-9 in. guns, six 20 mm.A.A., 6 T.T. The Italian torpedo boat *Dragone* was torpedoed and sunk by a British motor torpedo boat off Spezia on the night of June 14th-15th, 1944.

DRAGONFLY

Galbraith, Pembroke & Co.; 1883; W. Gray & Co.; 1,761 tons; 257-2x34-9x19-6; 150 h.p.; compound engines.
The British cargo ship *Dragonfly* was wrecked on December 10th, 1889, off Nieuwe Diep while on a voyage from Taganrog to Amsterdam with a cargo of rye.

DRAGONFLY

British Navy, gunboat; 1938; J.L. Thornycroft & Co.; 585 tons; 197x33x5; 3,800 s.h.p.; 17 knots; turbine engines; two 4 in. guns, one 3 • 7 in. howitzer, 8 m.g.
The river gunboat *Dragonfly* was attempting to escape from Singapore on February 14th, 1942, when she was attacked and sunk by Japanese dive bombers. The vessel carried a complement of 74.

DRAKE

British Navy, armoured cruiser; 1902; Pembroke Dockyard; 14,100 tons; 500x71x26; 30,557 i.h.p.; 23 knots; triple-expansion engines; Belleville boilers; two 9-2 in. guns, sixteen 6 in., fourteen 12pdr., three 3pdr., 2 T.T.
The armoured cruiser *Drake*, with a complement of 900 under command of Capt. S. H. Radcliffe, was torpedoed by a German

DRAUPNER

submarine off the north coast of Ireland on October 2nd, 1916. The ship had been engaged in convoy duties and had just parted from her destroyer escort. Immediately she was struck, Capt. Radcliffe decided to make for Rathlin Island as his ship was still navigable. The destroyer escort returned and kept close company with the cruiser until she anchored in Church Bay, Rathlin Sound.

Shortly after coming to anchor the *Drake* began to list heavily and it was thought advisable to abandon her. She capsized later in the afternoon without loss of life.

DRAUPNER

Schjelderup & Schjott; 1901; Trondhjems M.V.; 1,126 tons; 231-4x34-4x13-6; 106n.h.p.; triple-expansion engines.
The Norwegian steamship *Draupner* was sunk by a German submarine in the English Channel on November 30th, 1916.

DREPANUM

Salvatore Tagliavia & Co.; 1914; Palmers' Co.; 2,736 tons; 324 X 43x23-9; triple-expansion engines.
The Italian steamship *Drepanum* was in collision with the German steamship *Lippe*, 7,849 tons, on November 20th, 1943, and sank off Gothenburg.

DRESDEN

German Navy, light cruiser; 1908; Blohm & Voss; 3,592 tons; 395x43-3x17-7; 13,500 i.h.p.; 24-5 knots; turbine engines; Schulz-Thornycroft boilers; ten 4-1 in. guns, eight 5pdr., 4 m.g., 2T.T.

The light cruiser *Dresden* was, in July of 1914, employed in safeguarding her country's interests off Mexico, as there had been a revolution in that country just previously. On July 17th, the *Dresden* took on board the family of the ex-President and took them to Jamaica, afterwards proceeding to Port au Prince where she met the *Karlshruhe*, and the two ships exchanged captains. After she left Port au Prince on the 28th, under her new commander, Capt. Ludecke, her position was a constant source of anxiety to the Allies as she was assumed to be still in West Indian waters, but in point of fact she was making for South America with a view to rounding Cape Horn and joining up with Von Spec's East Asiatic Squadron. Later the British forces began the long chase down the Atlantic coast of South America, but failed to catch the light cruiser, which made for Easter Island, where she was joined by the rest of the German squadron on October 12th.

On her voyage down the coast she captured and sank the *Hyades*, 3,352 tons, on August 15th; the *Holmwood*, 4,223 tons, on the 26th; and later, after joining up with Von Spec, the *North Wales*, 3,691 tons on November 16th. In addition to her captures she stopped several other vessels, compelling them to destroy their wireless and requiring the officers and crews to swear that they would take no further part in hostilities against Germany.

The *Dresden* took part in the battle of Coronel on November 1st (see *Good Hope*) and was also present at the battle of the Falkland Islands on December 8th (see *Scharnhorst*) from which she was the only German vessel to escape. She made for Punta Arenas, which she reached on December 11th, and thence steamed to Hewett Bay for repairs. By great good fortune the supply ship *Sierra Cordoba* was in these waters and the *Dresden* fell in with her and began a long game of hide and seek among the uncharted waters of the Magellan Straits. From there she sailed on February 14th, 1915, for Masafuera in the Juan Fernandez group. On her way she sank the British barque *Conway Castle*, 1,694 tons, on February 27th, transferring the crew to a Peruvian sailing ship a week later. On March 14th, the *Dresden* was discovered in Cumberland Bay, Juan Fernandez, by the light cruiser *Glasgow* and the armoured cruiser *Kent*.

The fight that ensued was very brief, the *Dresden* being hit several times by the salvos from the *Kent's* 6 in. guns. She then hoisted a white flag and sent a boat bearing a message that she was interned. This statement was obviously untrue as the Chilean government possessed no forces in the islands which could effect the disarmament of the ship. The Chilean maritime governor, who was the sole representative of his country's authority, and who combined with his more exalted functions the humble one of lighthouse keeper, requested Capt. Luce, commanding the British force, to disable the *Dresden's* machinery, but while preliminaries were being settled the German ship blew up. Seven of her crew had been killed and 29

wounded. The badly wounded were placed on board the auxiliary cruiser *Orama* and taken to Valparaiso. The remainder, including Capt. Ludecke, were later embarked on a Chilean cruiser and interned on an island in Valparaiso Harbour.

DRESDEN

Norddeutscher Lloyd; 1914; Bremer Vulcan; 14,690 tons; 550-3x67-3X35-1; 1,850 n.h.p.; quadruple-expansion engines.
On a Norwegian cruise with 1,000 passengers and 300 crew the *Dresden* struck a rock at 4 p.m. on June 20th, 1934 at Klepp, Boku Island. She was refloated and beached near Blikshavn on Karmoy Island. She began to list at 2.45 a.m. on June 21st, and turned over and sank at 8 a.m., an hour after the last of the crew had been taken off. One woman passenger was lost on the ship and three others died after being taken off.

DREVER

J.Fenwick&Son; 1888; Palmers'Co.; 1,029 tons; 220x32-4x14-7; 181 n.h.p.; triple-expansion engines.
The British collier *Drever* sank after a collision near Newarp lightship on April 19th, 1901, while on a voyage in ballast from London to the Tyne.

DREXLER

United States Navy, destroyer; 1944; United States; 2,200 tons; 376-5x40-9x12-5; 60,000 s.h.p.; 36-5 knots; turbine engines; six 5 in. guns, twelve 40 mm.A.A., eleven 20 mm.A.A., 10 T.T.
The destroyer *Drexler* was attacked by Japanese aircraft off Okinawa on May 28th, 1945. The vessel, which carried a complement of over 250, was hit and sunk.

DRINA

Royal Mail Steam Packet Co.; 1913; Harland & Wolff; 11,483 tons; 500-7x62-3x40-2; 680n.h.p.; 13-5 knots; quadruple-expansion engines.
The liner *Drina* was torpedoed and sunk by a German submarine two miles W. of Skokham Island on March 1st, 1917, with the loss of 15 lives. The captain was among the survivors.

DRIVER

British Navy, corvette; 1,056 tons; 280 n.h.p.; steam engines; 6 guns.
The paddle corvette *Driver*, Cdr. Horatio Nelson, was wrecked on Mariguana Island in August, 1861. The number lost is not known.

DRONNING MAUD

An Christensen; 1907; Laxevaags Maskin & Jernskibsbyg.; 1,102 tons; 229 X 35 • 3 X15 • 9; 101 n.h.p.; triple-expansion engines.
The Norwegian steamship *Dronning Maud* struck a mine and sank in the North Sea on September 1st, 1916.

DRONNING MAUD

Det Nordenfjeldske D/S; 1925; Fredriksstad M/V; 1,489 tons; 235-8x37-7x13-8; 284 n.h.p.; triple-expansion engines.
The Norwegian steamship *Dronning Maud*/zs bombed and sunk by German aircraft on May 1st, 1940, near Gratangen, Norway. The vessel was serving as a hospital ship at the time and 42 lives were lost.

DRONT

West Russian S.S. Co.; 1907; Irvine's S.B. & D.D. Co.; 3,488 tons; 324-7x47x22-4; 287n.h.p.; triple-expansion engines.
The Russian steamship *Dront* was torpedoed and sunk by a German submarine in the Arctic on September 1st, 1917.

DROTT

E.Brodin; 1881; Caird & Purdie; 1,286 tons; 244-4x34-lx15-2; 146 n.h.p.; compound engines.
The Swedish steamship *Drott* struck a mine and sank in the Baltic on January 21st, 1915.

DRUMBURLIE

Gillison & Chadwick; 1888; R. Thompson & Sons; 2,395 tons; 305 x 39 • 7 x 24 • 2; 220 h.p.; triple-expansion engines.
The British cargo ship *Drumburlye* was wrecked on April 30th, 1891, near the Smalls while on a voyage from the Clyde to Bombay carrying a general cargo.

DRUMCRUIL

J. Chadwick & Son; 2900; J. Blumer & Co.; 3,788 tons; 350-3 x 46-5x18-8; 318 n.h.p.; triple-expansion engines.

The British cargo ship *Drumcruil* was wrecked on May 7th, 1905, at Boavista, Cape Verde Islands, while on a voyage from Iquique to the United Kingdom with a cargo of nitrate.

DRUMELZIER

J. Chadwick & Son; 1895; J. Laing; 3,625 tons; 340x44-7'x 18-5; 303 n.h.p.; triple-expansion engines.

The British cargo ship *Drumelzier* was wrecked on December 27th, 1904, off Fire Island while on a voyage from New York to Swansea with a copper and general cargo.

DRUMMOND CASTLE

Castle Mail Packets Co.; 1881; John Elder & Co.; 3,706 tons; 365x43-5x31-3; 600 n.h.p.; 12-5 knots; triple-expansion engines.

The *Drummond Castle* left Cape Town for London on May 28th, 1896, with 143 passengers and 103 crew under command of Capt. W. W. Pierce. On the night of June 16th she was off Ushant and within one day's steaming of home. The sea was calm but visibility was poor.

The strong currents converging on the island of Molene, off Ushant, make the locality one of the most dangerous in the world for navigators, and the extent to which the *Drummond Castle* was pulled eastwards by the tide was apparently not realised. Between 10 and 11 o'clock that evening the liner was sighted by the steamship *Werfa*, the first officer of which noted that she was off her course and heading for a dangerous coast. The vessels were about a quarter of a mile apart at the time and soon afterwards the *Drummond Castle* was lost to view. Shortly before 11 p.m., still steaming at 12 knots, she struck a reef of rocks known as the Pierres Vertes, at the south entrance to the Fronveur Sound.

The captain believed the vessel to be driven firmly on the rocks, and although the boats were made ready they were not lowered. The Chief Engineer released steam from the boilers to prevent an explosion, but all efforts to keep the ship afloat were useless and she foundered within four minutes of striking.

The drowned numbered 243, of whom Capt. Pierce, his officers and crew accounted for 101, and the passengers for 142. The three saved were Mr. Charles Marquandt, a first class passenger, Quartermaster Wood and Seaman Godbolt, all rescued by Breton fishermen.

DRYADE

Everett & Newbiggin; 1906; A.G. "Neptun" Schiffs. & Masch.; 1,833 tons; 251-7x37-2x14-9; 133 n.h.p.; triple-expansion engines.

The British cargo ship *Dryade*, which had been requisitioned by the Admiralty, was involved in a collision and sank approximately 10 miles south-east of Flamborough Head on December 8th, 1917. She was on a voyage from the Tyne to London with a cargo of coal.

DRYBURGH

G. Gibson & Co.; 1919; Campbeltown S.B. Co.; 1,289 tons; 230x35-8x15-5; 172 n.h.p.; triple-expansion engines.

The British cargo ship *Dryburgh* struck a wreck half-a-mile northeast of Dimlington on November 11th, 1939, while on a voyage from Leith to Antwerp with a cargo of coal and horsemeat.

DUCD'AUMALE

Soc. Gen. d'Armement; 1900; Chantiers Nantais de Constr. Maritime; 2,189 tons; 277-7x40-3x22-5.

The French sailing vessel *Due d'Aumale* was sunk by a German submarine in the Bay of Biscay on January 22nd, 1917.

DUC DE NORMANDIE

Armement Ledun; 1947; Beliard Crichton & Cie.; 366 tons; 141-6x27-7x12-7; oilengines.

The French motorship *Due de Normandie*, Capt. Rigue, capsized and sank on February 21st, 1951, one mile from the West Hinder lightship off Flushing during a gale. Two members of the crew were rescued but one died afterwards.

DUCA DI GENOVA

La Veloce Nav. Italiana; 1907; Cantieri Navali Riuniti; 8,337 tons; 475-8x53-4x18-7; 760 n.h.p.; quadruple-expansion engines. The Italian steamship *Duca di Genova* was torpedoed and sunk by a submarine in the Mediterranean on February 6th, 1918.

DUCESS

Taylor & Sander son; 1883; Short Bros.; 1,881 tons; 284-5 X 37-2x20-3; 165 h.p.; compound engines.

The British cargo ship *Duchess* sank after a collision off the Casquets on April 23rd, 1893, while on a voyage from Bilbao to Sunderland carrying an ore cargo.

DUCESS

British Navy, destroyer; 1932; Palmer & Co.; 1,375 tons; 326X 33x8-5; 36,000 i.h.p.; 35-5 knots; turbine engines; 3-drum boilers; four 4-7in. guns, 7 smaller, 8 T.T.

The destroyer *Duchess*, Lt. Cdr. R. C. H. White, was sunk in collision with the battleship *Barham* in the North Channel, west coast of Scotland, on December 12th, 1939. Six officers, including Cdr. White, and 123 ratings were lost. One officer and 22 ratings were picked up.

DUCESS OF ATHOLL

Canadian Pacific Railway Co.; 1928; W. Beardmore & Co., 20,119 tons; 582x75-2x41-7; 3,600 n.h.p.; 17-5 knots; turbine engines; Yarrow boilers.

The liner *Duchess of Atholl*, Capt. H. A. Moore, O.B.E., R.D., R.N.R., was serving as an auxiliary transport when she was torpedoed and sunk by a German submarine. The attack took place some distance N. of Ascension Island on October 10th, 1942, the vessel being in convoy at the time. Four of her crew were killed and two wounded, the survivors being picked up by ships in company.

DUCESS OF CORNWALL

Duchess of Cornwall Steamship Co.; 1889; W. Gray & Co.; 1,706 tons; 260-5x36-6x18-3; 156 n.h.p.; 8-5 knots; triple-expansion engines.

The steamship *Duchess of Cornwall* was torpedoed and sunk by a German submarine five miles N. of Cape Barfleur on April 11th, 1917. Twenty-three of her crew, including the captain, were killed.

DUCESS OF HAMILTON

Caledonian Steam Packet Co.; 1890; W. Denny & Bros.; 553 tons; 250 X 30-1x10; 266 n.h.p.; 15 knots; diagonal compound engines.

The Clyde paddle steamer *Duchess of Hamilton* was taken over by the Admiralty in 1914 for service as an auxiliary minesweeper and it was while acting in this capacity that she struck a mine and sank off Longsand on November 29th, 1915.

DUCESS OF RICHMOND

London & South Western Railway Co.; 1910; D. & W. Herder son & Co.; 354 tons; 190-2x26-1x8-7; 15 knots; diagonal compound engines.

The paddle steamer *Duchess of Richmond* was taken over by the Admiralty during the First World War for service as an auxiliary patrol vessel. She survived the war but was blown up by a mine in the Mediterranean on June 28th, 1919, when engaged in mine-sweeping.

DUCESS OF YORK

Canadian Pacific Railway Co.; 1929; John Brown & Co.; 20,021 tons; 581-9x75-2x41-7; 3,748 n.h.p.; 18 knots; turbine engines.

The liner *Duchess of York*, carrying troops from the Clyde to Free-town, was bombed and set on fire by German aircraft on July 11th, 1943, off the coast of Portugal. The fire could not be controlled and the ship was abandoned. She was sunk at 12.45 a.m. the next day by a torpedo from one of the convoy escorts.

DUCKBRIDGE

DUCKBRIDGE

Duckbridge Steamship Co.; 1914; Craig Taylor & Co.; 1,491 tons; 240x36-2x20-1; 153 n.h.p.; 9 knots; triple-expansion engines.

The steamship *Duckbridge* was mined and sunk six miles N. of Straithie Point on February 22nd, 1916. Nineteen men, including the captain, were killed.

DUERO

Cia. Maritima Frutera; 1920; Caledon S.B. & E. Co.; 1,420 tons; 270-6x38-2x23-9; triple-expansion engines.

On July 26th, 1953, during a fog in the Straits of Gibraltar, the Spanish steamship *Duero* sank in a collision with the *Culrain*. One passenger and 27 of the crew were saved.

DUFFIELD

Northern Petroleum Tank S.S. Co.; 1938; Odense Staalskibs-veerft/ALS; 8,516 tons; 475-9x61-8x33-8; 653 n.h.p.; 11 knots; oil engines.

The tanker *Duffield*, Capt. M. Manthorpe, was torpedoed and sunk by a German submarine approximately 350 miles W.N.W. of Tenerife at 9 p.m. on April 8th, 1941. Twenty-five of her crew were killed. Capt. Manthorpe was among the survivors.

DUFFRYN MANOR

Frederick Brown; 1907; W. Doxford & Sons; 3,952 tons; 349-8x49x24; 292 n.h.p.; triple-expansion engines.

The British cargo ship *Duffryn Manor* was wrecked on April 26th, 1909, at Minicoy Island while on a voyage from Rangoon to Hamburg with a cargo of rice.

DUGUESCLIN

E.Hulin; 1882; A.Leslie & Co.; 1,764 tons; 265x34-9x23-4; 172 n.h.p.; compound engines.

The French steamship *Duguesclin*, on a voyage from Rouen to Swansea in ballast, was sunk in a collision with the steamship *Ross-shire* at 4 a.m. on January 4th, 1899, 17 miles off Trevoise Head. The captain and eleven of the crew were saved. The *Ross-shire* also sank, with the loss of one man crushed by the collision.

DUILIO

Lloyd Triestino Soc. Anon. di Nav.; 1923; Ansaldo Soc. Anon.; 23,635 tons; 635-6x76-3x46-3; 4,297 n.h.p.; turbine engines.

The Italian liner *Duilio* was torpedoed by a British submarine in September, 1941, off the Adriatic coast of Italy, but managed to reach port in a badly damaged condition. On July 10th, 1944, she was bombed and sunk by Allied aircraft in the Bay of Muggia.

DUINO

"Adriatica" Soc. Anon di Nav.; 1923; Stabilimento Tecnico; 1,334 tons; 237-2x34-4x13-7; turbine engines.

The Italian steamship *Duino* struck a mine and sank on February 8th, 1942, eight miles from Bari.

DUISBURG

Hamburg-Amerika Linie; 1928; Deutsche Werft A.G.; 7,389 tons; 463-6x60-1x28; 1,585 n.h.p.; oil engines.

The German motorship *Duisburg* was torpedoed by a British submarine and sunk by gunfire from surface craft on November 9th, 1941, 145 miles E. of Syracuse.

DUIVELAND

Scheepvaart & Steenkolen Maats.; 1909; Rijkee & Co.; 1,297 tons; 231-4x34-5x14-8; 150 n.h.p.; triple-expansion engines.

The Dutch steamship *Duiveland* struck a mine and sank in the North Sea on March 25th, 1916.

DUKE OF ALBANY

Lancashire & Yorkshire Railway Co. and London & North Western Railway Co.; 1907; J. Brown & Co.; 1,997 tons; 330-5x41-1x17-1; 425 n.h.p.; 22-5 knots; triple-expansion engines.

The steamship *Duke of Albany* was taken over by the Admiralty in the First World War for service as an armed boarding steamship. On August 24th, 1916, she was attacked and sunk by a German submarine 20 miles E. of the Skerries. At the time of her loss she was

under command of Cdr. George N. Ramage, R.N.R., and carried a complement of 13 officers and 98 ratings. Cdr. Ramage and Eng.-Lt. Maskell with 22 ratings were drowned.

DUKE OF SUTHERLAND

Aberdeen & London Packet; 1847; R. Napier & Son; 804 tons; 198x26x17-5; 250 i.h.p.; 10 knots; steam engines.

The steamship *Duke of Sutherland* left London on Wednesday evening, March 30th, 1853, with 52 persons on board under command of Capt. Edward Howling. The vessel arrived off Aberdeen harbour on Friday evening, April 1st. There was a heavy sea running on the bar and the "fresh" of the River Dee was setting down very strongly. The wind was S.E. which made it a difficult matter to enter the harbour, which was protected by a granite pier running half a mile into the sea. In the judgment of the harbour master it was possible for the *Duke of Sutherland* to come in, and at half tide the flag was hoisted for the vessel to proceed. As she was crossing the bar the "fresh" caught her on the port bow and threw her head straight for the pier. The captain reversed his engines but had scarcely got stern way when another sea flung the ship on to the rocks at the head of the pier. In ten minutes there was three feet of water in the engine room and, as the ship lay broadside on to the waves, she was quickly pounded to pieces.

The boats were lowered, the first of which was swept away half empty and the other smashed in by the seas. The Aberdeen lifeboat came out but was damaged in getting alongside, as a consequence of which she could only take off a limited number of people. The rocket apparatus and lines were obtained only after a considerable loss of time owing to the absence of the key of the store, when it was discovered that there was no powder. This was obtained from a shop half a mile distant, but when procured no one knew how to discharge the rocket. A naval officer fitted up a temporary line but it proved slow and cumbersome. In the meantime Capt. Howling was injured and washed overboard and drowned.

A small boat manned by five men now reached the wreck but on the return to shore was capsized and five of the occupants drowned. From first to last there was a succession of tragic accidents until the *Duke of Sutherland* broke in two and foundered.

In all 16 persons lost their lives. There was much public censure at the unprepared state of the rocket apparatus and at the conduct of a few of the crew who escaped in the first boat.

DUKE OF YORK

Robinson Bros.; 1892; Sir Raylton Dixon & Co.; 3,026 tons; 319-5x41-1x21-5; 270 n.h.p.; triple-expansion engines.

The British cargo ship *Duke of York* sank after a collision off the Royal Sovereign Light on May 6th, 1907, while on a voyage from Hull to Alexandria carrying a cargo of coal.

DULVERTON

British Navy, destroyer; 1940; Vickers-Armstrong; 904 tons; 272-3x28-2x7-7; 19,000 s.h.p.; 27-5 knots; turbine engines; 3-drum boilers; four 4 in. guns, 8 smaller.

The destroyer *Dulverton*, Cdr. S. A. Buss, M.V.O., was bombed and sunk by German aircraft off Kos, Dodecanese, on November 13th, 1943. Three officers, including Cdr. Buss, and 75 ratings were killed and three officers wounded.

DULWICH

South Metropolitan Gas Co.; 1916; Dublin Dockyard Co.; 1,460 tons; 240-3x36-1x18-3; 10 knots; triple-expansion engines.

The collier *Dulwich* struck a mine and sank seven miles N. by E. from Ship wash lightship on June 10th, 1917. Five of her crew were killed. The captain was among the survivors.

DUMANA

British India Steam Navigation Co.; 1923; Barclay, Curie & Co.; 8,427 tons; 450x58-3x32-9; 1,110 n.h.p.; 13-5 knots; oil engines.

The liner *Dumana*, Capt. O. West, was on a voyage from Port Etienne to Takoradi with a Royal Air Force contingent on board when, at about 8.30 p.m. on December 24th, 1943, she was hit on the port side by a torpedo. She sank in a very short time dragging some of her boats down with her before they could be released from the falls. Three officers, one engine room hand and 20 lascars were

killed, as well as seven officers and men of the R.A.F. Capt. West was among the survivors.

A memorial to those lost was erected at Sassandra, on the Ivory Coast.

DUMRA

British India Steam Navigation Co.; 1922; C. Hill & Sons; 2,304 tons; 272x44x21; 260 n.h.p.; 11 knots; oilengines.
The liner *Dumra*, Capt. W. C. Cripps, was torpedoed by a Japanese submarine in the Indian Ocean, between Durban and Madagascar, in the early hours of June 5th, 1943. As the first torpedo failed to sink the vessel the boats stood by in the hope of returning and effecting temporary repairs. A second torpedo was fired soon after the boats got away, however, and the *Dumra* sank. The Chief Engineer, Mr. H. T. Graham, was taken prisoner.

Capt. Cripps, who remained on board, was blown into the sea by the explosion of the second torpedo. He was picked up but died shortly afterwards. Twenty-six other lives were lost.

The *Dumra's* motor boat towed the other boats to the St. Lucia lighthouse, but her engine was swamped before it was possible to make a landing. At daylight all the survivors landed safely.

DUNA

W.H.Stott & Co.; 1907; R. Duncan & Co.; 1,572 tons; 275 x 38•2x16•8; 234 n.h.p.; triple-expansion engines.
The British cargo ship *Duna* was wrecked at Old Head, South Ronald shay, on July 26th, 1912, while on a voyage from Hesosandto Liverpool carrying a general cargo.

DUNAFF HEAD

Ulster S.S. Co.; 1918; Workman Clark & Co.; 5,258 tons; 390-4x51-8x29-8; 12 knots; triple-expansion engines.
The steamship *Dunaff Head*, Capt. R. Dick, was torpedoed and sunk by a German submarine in the North Atlantic on March 8th, 1941. Five of her crew were killed. Capt. Dick was among the survivors.

DUNBAR CASTLE

Union-Castle Mail S.S. Co.; 1930; Harland & Wolff; 10,002 tons; 471-2x61-2x29-6; 977 n.h.p.; 14-5 knots; oilengines.
The liner *Dunbar Castle*, Capt. H. A. Causton, with a crew of 150 and 48 passengers was outward bound from London to Beira in convoy. On January 9th, 1940, she struck a mine two miles N.E. of the North Godwins, and foundered in 30 minutes. Capt. Causton was fatally injured by the explosion and died later in one of the boats, one man was killed and seven others reported missing. The Chief Officer, Mr. H. H. Robinson, took over command and got everyone away without further loss of life, the boats being picked up a short time afterwards by a coastal motor barge.

DUNBARMOOR

Moor Line; 1903; W. Doxford & Sons; 3,651 tons; 340x50-1x20-6; 300 n.h.p.; 10 knots; triple-expansion engines.
The steamship *Dunbar Moor* was intercepted by a German submarine 180 miles W.N.W. of Fastnet on March 8th, 1917. The submarine opened fire from the surface and sank the vessel with shells. Twelve of her crew, including the captain, were killed.

DUNCAN

United States Navy, destroyer; 1941; Federal Shipbuilding Co., Kearney; 1,700 tons; 348-3x36x10; 50,000 s.h.p.; 36-5 knots; turbine engines; Babcock & Wilcox boilers; four 5 in. guns, 10 T.T.

The destroyer *Duncan* was part of a force of cruisers and destroyers under command of Rear-Admiral Norman Scott, comprising the cruisers *San Francisco* and *Salt Lake City*, of over 9,000 tons, nine and ten 8 in. guns respectively, and the *Boise* and *Helena*, 10,000 tons, fifteen 6 in. guns, with the destroyers *Duncan*, *Buchanan*, *Farenholt*, *Laffey* and *McCalla*, all of 1,700 tons. The squadron was one of three grouped around the island of Guadalcanal on the watch for Japanese ships attempting to reinforce their army on the island. On the afternoon of October 11th, 1942, the Japanese were discovered steaming through the channel between Choiseul Island and New Georgia and Admiral Scott's squadron proceeded in chase. Shortly before midnight there was an action lasting about 20 minutes in which the Americans sank a heavy cruiser and two destroyers and

damaged three other ships. The squadrons then lost touch for a time the *Boise* having been set on fire by shells from a Japanese heavy cruiser, and losing 107 men before the flames could be got under control. Later on the same night contact was re-established, the Japanese again suffering heavy punishment which caused them to break off the action.

The *Duncan* was badly damaged in the first phase of the battle when participating in the torpedo attack upon the Japanese cruisers. She remained afloat until morning when she had to be abandoned. The destroyer *Farenholt* was damaged, but not so badly as the *Boise*, though the latter ship was sufficiently battleworthy to take part in the second phase, in which she suffered further damage.

The Japanese losses were the cruiser *Furutaka*, 7,100 tons, and the destroyers *Fubuki* and *Murakumo*, both of 1,700 tons, and the *Natsugumo*, 1,500 tons.

The action was known as the battle of Cape Esperance.

DUNDALK

Dundalk & Newry Steam Packet Co.; 1899; A. & J. Inglis; 794 tons; 236x32-1x15-2; 283 n.h.p.; 12 knots; triple-expansion engines.

The steamship *Dundalk* was torpedoed and sunk by a German submarine five miles N.N.W. of the Skerries, off Anglesey, on October 14th, 1918. Twenty-one of her crew, including the captain, were killed.

DUNDALK

British Navy, fleet minesweeper; 1919; Clyde Shipbuilding Co.; 710 tons; 231x28-3x7-5; 2,200 i.h.p.; 16 knots; triple-expansion engines; Yarrow boilers; one 4 in. gun, 1 smaller.

The fleet minesweeper *Dundalk* struck a mine and sank off Harwich on October 16th, 1940. The vessel's normal complement was 73.

DUNDEE

British Navy, sloop; 1932; Chatham Dockyard; 1,060 tons; 266x34x8-7; 2,000 s.h.p.; 16-5 knots; turbine engines; 3-drum boilers; two 4 in. guns, 12 smaller.

The sloop *Dundee*, Capt. O. F. M. Stokes, D.S.O., was torpedoed and sunk by a German submarine in the North Atlantic on September 15th, 1940. The vessel did not sink immediately and most of her crew were saved, but six officers and six ratings lost their lives. Capt. Stokes was among the survivors.

DUNDRENNAN

I. Houston & Co.; 1880; Oswald, Mordaunt & Co.; 1,950 tons; 268-9x39-7x24-2.

The sailing ship *Dundrennan* was lost off Struis Point on, or about, April 11th, 1895. Twenty-five of the crew were drowned.

DUNEARN

Henderson & McIntosh; 1895; Short Bros.; 3,142 tons; 351-4x42-1x17-5; 297 n.h.p.; triple-expansion engines.

The British cargo ship *Dunearn* capsized and sank on August 26th, 1908, during a typhoon off Goto Island while on a voyage from Karatsu to Singapore with a cargo of coal. Fifty-one of her crew of 53 were lost.

DUNEDIN

Shaw, Savill & Albion Co.; 1874; R. Duncan & Co.; 1,320 tons; 241x36-1x20-9.

The iron ship-rigged *Dunedin*, Capt. A. F. Roberts, left Oamaru, New Zealand, for London on March 20th, 1890, with a cargo of frozen meat. She carried a crew of 34.

The ship had made history in February, 1882, when she carried the first cargo of frozen meat from New Zealand to England. The refrigerating machinery was fitted up on board the vessel and the meat was frozen as she proceeded on her voyage. This experiment, which was initiated by the New Zealand and Australian Land Co., was successful, and marked the beginning of the New Zealand frozen meat trade.

No news of the *Dunedin* came to hand after she had been spoken by a passing ship some days out from port, and it was assumed that she had foundered in a storm in the region of Cape Horn, or had struck an iceberg.

DUNEDIN

Henderson & McIntosh; 1884; A. Stephen & Sons; 1,326 tons; 240•6x34-1x17•3; 140hp.; compound engines.

The British cargo ship *Dunedin* was wrecked on August 26th, 1893, near Omega while on a voyage from Archangel to Cette and Marseilles with a wood cargo.

DUNEDIN

British Navy, light cruiser; 1918; Armstrong; 4',850 tons; 472-5 x46-5x16-5; 40,000 s.h.p.; 29 knots; turbine engines; Yarrow boilers; six 6 in. guns, three 4 in., four 3pdr., 12 smaller, 12 T.T.
The cruiser *Dunedin* was one of the smaller and older cruisers in commission at the outbreak of the Second World War. She was commanded by Capt. R. S. Lovatt, O.B.E., and in the winter of 1941 was serving in the South Atlantic. On November 27th the German Admiralty issued a statement that H.M.S. *Dragon* had been sunk by a German submarine, this name being a mistake for *Dunedin*, which was a cruiser of the same class. No further news of the ship came to hand until four officers and 63 ratings, the survivors from the *Dunedin*, were picked up. The British Admiralty thereupon announced that *Dunedin* had been lost on November 24th.

Casualties were heavy, no fewer than 26 officers, including Capt. Lovatt, and 392 ratings being killed. Of the survivors one officer was wounded.

DUNHOLME

Watts, Ward & Co.; 1883; W. Gray & Co.; 1,762 tons; 256-2X 34-3x19-9; 150 h.p.; compound engines.

The British cargo ship *Dunholme* sank after a collision with the s.s. *Kinloch* off Dover on July 6th, 1891. She was carrying a general cargo on a voyage from Antwerp to Rio de Janeiro. Seventeen of her crew were lost.

DUNKELD

J. & M. Gunn & Co.; 1880; A. Stephen & Sons; 2,791 tons; 320-8x40-5x23-2; 258 n.h.p.; compound engines.

The British cargo ship *Dunkeld* foundered on March 27th, 1895, east of Lobos Island, Uruguay, while on a voyage from Barry to Buenos Aires carrying a cargo of coal.

DUNKERQUOIS

Cie. des Bateaux a Vapeur du Nord; 1911; Campbeltown S.B. Co.; 2,087 tons; 281-7x40x19-3; 194 n.h.p.; triple-expansion engines.

The French steamship *Dunkerquois* was torpedoed and sunk by a German submarine in the Bay of Biscay on August 18th, 1917.

DUNKIRK EVACUATION, see GRAFTON

DUNKWA

Elder Dempster Lines; 1927; A. McMillan & Son; 4,752 tons; 355-3x49-2x22-4; 489 n.h.p.; 12-5 knots; oil engines.

The liner *Dunkwa*, Capt. J. W. Andrew, was torpedoed and sunk by a German submarine on May 6th, 1941, about 300 miles W. of Freetown. Eight of the crew were killed. Capt. Andrew was among the survivors.

DUNMORE

Clyde Shipping Co.; 1878; J. & G. Thomson; 1,080 tons; 230-7 x32 8 x 15 - 9; 220 h.p.; compound inverted engines.

The British cargo ship *Dunmore* was wrecked on December 18th, 1882, on Ballyquintin Point, Co. Down, while on a voyage from Waterford to Belfast with a general cargo.

DUNMURRY

Boyd Bros. & Co.; 1891; Short Bros.; 2,592 tons; 293-5x39x 18'4; 250 h.p.; triple-expansion engines.

The British steamship *Dunmurry*, on a voyage from New York to Antwerp with grain, capsized and sank during a hurricane on August 29th, 1891, about 250 miles from Halifax. Eight of her crew were drowned, the captain and 20 others were picked up by the German tanker *Hans v. Kurt* after three days in a boat with no food or water.

DUNOON

British Navy, fleet minesweeper; 1918; Scott's S.B. & E. Co.; 710 tons; 231x28-3x7-5; 2,200 i.h.p.; 16knots; triple-expansion engines; Yarrow boilers.

The fleet minesweeper *Dunoon* struck a mine and sank off Smith's Knoll near Great Yarmouth on April 30th, 1940. Three officers and 23 ratings were killed.

DUNROBIN

Sutherland Steamship Co.; 1903; W. Doxford & Sons; 3,617 tons; 339-9x50-2x22-6; 300 n.h.p.; 9knots; triple-expansion engines.
The steamship *Dunrobin* was torpedoed and sunk by a German submarine 49 miles S.W. by S. \ S. of the Lizard on November 24th, 1917. Thirty-one of her crew, including the captain, were killed.

DUNSLEY

H. S. Thomas; 1889; J.L. Thompson & Sons; 1,987 tons; 284 x 38-1x19-4; 208 n.h.p.; triple-expansion engines.

The British cargo ship *Dunsley* foundered on August 30th, 1911, about 20 miles south-west of Bardsey Island while on a voyage in ballast from Appledore to Birkenhead.

DUNSTAFFNAGE

J.Houston; 1881; Oswald, Mordaunt & Co.; 1,945 tons; 268-4 X39-7X24.

The sailing ship *Dunstaffnage* of Liverpool was lost off Aberdeen on March 17th, 1883. Twenty-three of the crew were drowned.

DUNVEGAN CASTLE

Union-Castle Mail S.S. Co.; 1936; Harland & Wolff; 15,007 tons; 540 x71-9x37-8; 9,500 b.h.p.; 17 knots; oil engines.

The liner *Dunvegan Castle*, Capt. H. Ardill, was taken over by the Admiralty early in the Second World War for service as an auxiliary cruiser. On August 28th, 1940, when W. of Ireland the vessel was torpedoed and sunk by a German submarine. Four officers and 23 ratings were killed, and three officers and nine ratings wounded. The survivors, numbering 250 including Capt. Ardill, were landed in Scotland.

DUPETIT-THOUARS

French Navy, armoured cruiser; 1901; Toulon; 9,517 tons; 460x63-7x24-5; 19,600 i.h.p.; 21 knots; triple-expansion engines; Belleville boilers; two 7-6 in. guns, eight 6-4 in., four 4 in., sixteen 3 pdr., 2 T.T.

The armoured cruiser *Dupetit-Thouars*, engaged upon convoy duty in the Atlantic, was steaming to pick up an American convoy when she was torpedoed by the German submarine *U-62*, Lt. Cdr. Ernst Hashagen, some 400 miles W. of Brest on the evening of August 7th, 1918. The sun was setting in a clear sky and the U-boat commander was afforded an ideal target of which he took full advantage. Two torpedoes were discharged, both of which scored hits.

The *Dupetit-Thouars*, which carried a complement of 540, sank in 20 minutes. Thirteen of her crew were killed by the explosion, but the remainder were taken off, either in her own boats or by U.S. destroyers.

DURBAN

Union S.S. Co.; 1877; J.Laing; 2,809 tons; 360x38-5x28-5; 550hp.; compound engines.

The British cargo ship *Durban* was wrecked on June 11th, 1893, at Socorro Point, Teneriffe, while carrying a cargo of wool and hides on a voyage from Natal to Southampton.

DURBAN MARU

Nippon Yusen K.K.; 1919; Mitsubishi Zosen Kaisha; 7,163 tons; 420X56x38-5; 574 n.h.p.; triple-expansion engines.

The steamship *Durban Maru* was torpedoed and sunk by the U.S. submarine *Muskallunge* on August 21st, 1944, about 50 miles S.E. of Cana, Indo-China.

DURLEY CHINE

Canadian Government; 1913; Osbourne, Graham & Co.; 1,918 tons; 279X40-1x18-4; 209 n.h.p.; triple-expansion engines.

The Canadian cargo ship *Durley Chine* sank after a collision 60 miles east of Sandy Hook on April 22nd, 1917, while on a voyage in ballast from Halifax, N S. to Norfolk, Va.

DUSSELDORF

DeutschAustralischeDampfs.Ges.; 1922; Blohm&Voss; 5,146 tons; 407x56x25-9; 634 n.h.p.; turbine engines.

The German steamship *Dusseldorf* was wrecked on December 6th,

1923, 20 miles north of Valparaiso on a voyage from Hamburg and Antwerp to Valparaiso.

DWINSK

Russian East Asiatic Steamship Co.; 1897; Harland & Wolff; 8,173 tons; 469-5x53-1x22-3; 954 n.h.p.; 14 knots; triple-expansion engines.

The steamship *Dwinsk* was torpedoed and sunk by a German submarine 400 miles N.E. by N. f N. of Bermuda on June 18th, 1918. Twenty-four of her crew were killed. The captain was among the survivors.

E. A. BRYAN

E. A. BRYAN

U.S. War Shipping Administration; 1944; Permanente Metals Corp.; 7,212 tons; 422-8x57x34-8; triple-expansion engines.

The steamship *E. A. Bryan* was completely destroyed by an explosion on July 17th, 1944, at Port Chicago in San Francisco Bay while loading ammunition.

E. G. SEUBERT

Standard Oil Company of New Jersey; 1918; New York S.B. Corp.; 9,181 tons; 467-6x62-7x32; quadruple-expansion engines.

The tanker *E. G. Seubert* was torpedoed and sunk by a submarine on February 23rd, 1944, in the Gulf of Aden on a voyage from Abadan to Aden. Three of her crew and three gunners were lost.

E. J. BULLOCK

Standard Oil Co. of New Jersey; 1920; Bethlehem S.B. Corp.; 6,630 tons; 435x56x32; 600 n.h.p.; triple-expansion engines.

The tanker *E. J. Bullock* was sunk by an explosion on October 6th, 1938, twenty-five miles off Dry Tortugas Island in the Gulf of Mexico while carrying crude oil from Smiths Bluff to Baltimore.

EAGLE

British Navy, aircraft carrier; 1918; Armstrong Whitworth; 22,600 tons; 667x105x27; 50,000 s.h.p.; 24 knots; turbine engines; Yarrow boilers; nine 6 in. guns, four 4 in., 22 smaller, 21 aircraft.

The aircraft carrier *Eagle*, laid down at Elswick in 1913 as the Chilean battleship *Almirante Cochrane*, was purchased on the stocks by the British government in 1917, launched in 1918 and completed as an aircraft carrier in 1920. She was not too successful in her new role and many modifications had to be carried out before she was finally commissioned in 1922. Like all the early types of aircraft carrier she could accommodate only a small number of planes for her large dimensions and tonnage.

In August, 1942, she was one of a squadron of four aircraft carriers operating in the Mediterranean under command of Rear-Admiral Lyster. An important convoy for Malta was passing through the Sicilian Narrows in face of most determined opposition from German submarines and dive bombers, and a few Italian torpedo boats. Action was joined on August 11th when submarines, attacking in packs, hit the *Eagle* with several torpedoes. The ship did not remain long afloat, but those of her aircraft which were flying at the time managed to land safely on other vessels.

The official complement of *Eagle* was 748, which was greatly exceeded on this occasion, probably owing to the ship carrying many more than her regular number of aircraft, and no fewer than 930 persons, of whom 68 officers, including Capt. L. D. Mackintosh, her commander, and 862 ratings, were taken off. Two officers and 161 ratings were lost.

The cruiser *Manchester* (which see for full story of the convoy), the cruiser *Cairo* and the destroyer *Foresight* were also lost in this action.

EALING

Watts, Watts & Co.; 1882; Hodgson & Soulsby; 2,026 tons; 285 x 36 X 24; 240 n.h.p.; compound engines.

The British cargo ship *Baling* was wrecked on January 6th, 1896, near Canso, while on a voyage from St. John's, N.F.L. to New York. She was carrying a cargo of copper ore. One of her boats arrived at Canso on the 8th, with nine survivors badly frostbitten, the captain and eight others having died of exposure and been put overboard. The first officers' boat with the remaining nine of the crew was never seen again.

EARL WEMYSS

A. McAlister; 1884; R. Duncan & Co.; 1,411 tons; 247X 37-8x21-4.

The iron sailing ship *Earl Wemyss* was sunk in a collision off Pernambuco on September 8th, 1888. Two passengers and 12 members of the crew were drowned.

EARL OF ABERDEEN

Earl Sailing Ship Line (D. Brown & Sons); 1886; C. Cornell & Co.; 2,205 tons; 291-2x42-6x24.

The four masted ship *Earl of Aberdeen*, Capt. W. Patrick, with a

crew of 29 and a cargo of 3,099 tons of coal, left Barry for Montevideo on May 13th, 1892. At about 2.30 a.m. on the 15th the ship struck on the Hat and Barrels reef, off Pembrokeshire, and sank. Two men managed to get away in a boat and the others took refuge in the rigging.

Later the steamship *Mary Hough* came on the scene and sent a boat, which could not effect a rescue owing to the heavy swell. The gunboat *Foxhound* then arrived and managed to take off several men, but those in the fore rigging would not attempt to reach the jigger mast and were drowned. Sixteen men, including five apprentices, were lost. The captain and first officer were among the survivors.

EARL OF CHESTER

Prowse & Co.; 1845; Chester; 493 tons; 125-6x28-2x19-5.

The sailing ship *Earl of Chester*, Capt. Mancollis, left Liverpool at the end of October, 1867, with a general cargo and a crew of about 18. The vessel was wrecked two miles from Ty Cross, Holyhead, shortly after leaving port. All on board were lost.

EARL OF CHESTER

Martin & Marquand; 1883; J. Blumer & Co.; 1,449 tons; 246-5 x 35-1 x 16-3; 125 h.p.; compound engines.

The British cargo ship *Earl of Chester* sank after a collision on April 22nd, 1892, near Ilfracombe while on a voyage from Cardiff to Sables d'Olonne carrying a cargo of coal.

EARL OF ELGIN

Anglo-American Oil Co.; 1909; Russell & Co.; 4,448 tons; 384-7x49-7x26-3; 320 n.h.p.; 9 knots; triple-expansion engines.

The steamship *Earl of Elgin* was torpedoed and sunk by a German submarine ten miles W. % S. of Caernarvon Bay lightship on December 7th, 1917. Eighteen of her crew, including the captain, were killed.

EARLSPARK

Denholm Line Steamers; 1929; Scott's Shipbuilding & Engineering Co.; 5,250 tons; 407-3x53-3x28-5; 534 n.h.p.; 11 knots; triple-expansion engines.

The steamship *Earlspark*, Capt. E. J. Williams, was W. of Bordeaux on June 12th, 1940, when she was torpedoed and sunk by a German submarine. Seven of her crew, including Capt. Williams, were killed and one wounded.

EARLSTON

R. Chapman & Son; 1941; Burntisland S.B. Co.; 7,195 tons; 420X58x35-3; 468 n.h.p.; triple-expansion engines.

The British steamship *Earlston* was torpedoed and sunk by a German submarine on July 5th, 1942, in the Barents Sea on a voyage from Iceland to North Russia. Twenty-three of her crew and three passengers were lost.

EARNMOOR

Earnmoor Steamship Co. (A. Earnshaw); 1887; Palmers^l Co.; 1,320 tons; 280x36-2x23; 250 h.p.; triple-expansion engines.

The steamship *Earnmore*, on a voyage from Baltimore to Rio de Janeiro, was overwhelmed in a hurricane off the Bahamas on September 5th, 1889. Two boats managed to get away; that containing the captain and 18 men was never heard of again. The second boat in charge of the first officer with six men was picked up after some days, the occupants being in the last stages of exhaustion. They were landed at Nassau on September 30th.

EAST INDIAN

Ford Motor Co.; 1918; Uraga Dock Co.; 8,159 tons; 445 x 58x 29; 1,112 n.h.p.; oil engines.

The American motor vessel *East Indian* was torpedoed and sunk by a German submarine on November 3rd, 1942, about 300 miles S.W. of the Cape of Good Hope on a voyage from Table Bay to Punta Arenas. Fifty-six lives were lost from her complement of 45 crew, 16 gunners and 12 passengers.

EAST WALES

West Wales S.S. Co.; 1925; W. Dobson & Co.; 4,358 tons; 400-1x53x25-3; 490 n.h.p.; triple-expansion engines. The British steamship *East Wales* was torpedoed and sunk by a German submarine on December 16th, 1942, on a voyage from New York to Alexandria via the Cape. The captain and 16 of the crew were lost.

EASTBOURNE

E. Morgan & Co.; 1878; R. Thompson, jun.; 2,240 tons; 300-2x36x25-3; 226n.h.p.; compound engines. The British cargo ship *Eastbourne* was wrecked on May 7th, 1901, near Bougaroni, Algeria, while on a voyage from Hull to Sulina carrying a cargo of coal.

EASTERN LUCKY

Heng Shipping Co.; 1919; American S.B. Co.; 3,355 tons; 323x43-7X—; triple-expansion engines. The Panamanian steamship *Eastern Lucky* sprang a leak and sank on December 12th, 1959, in lat. 23° 39' N., long. 117° 39' E., while on a voyage from Hong Kong to Yokohama with scrap iron.

EASTERN MONARCH

Somes Bros.; 1856; Dundee; 1,844 tons. The sailing ship *Eastern Monarch* arrived at Spithead from Karachi on Friday morning, June 3rd, 1859. She had on board 352 invalid soldiers, 30 women and 53 children, besides crew and some other passengers, making a total of nearly 500 persons.

At 2.30 a.m., about an hour after the ship had dropped anchor, there was a loud explosion followed by a burst of flame. The ports of the ship had been opened for purposes of ventilation and fanned by the current of air from these the fire spread with great rapidity. The troops, under Col. Alien, exhibited perfect discipline and there was no panic. Two sailing barges, the *Providence* and the *Petrel*, came alongside and took off large numbers of people as did the boats from the Naval ships *Falcon* and *Flying Fish*.

Capt. Morris, in command, did everything possible to subdue the fire but without avail and finally the ship had to be abandoned.

Owing to the good discipline and the promptness of the rescuing boats there was only a small loss of life. In all eight persons were burned, including a woman and five children. The cargo consisted of saltpetre, linseed, ivory and bones. The fire was supposed to have been caused by the spontaneous combustion of the saltpetre.

EASTERN PRINCE

Prince Line; 1910; J.Priestman & Co.; 2,885 tons; 340x46-2x 21-6; 383 n.h.p.; 11-5 knots; triple-expansion engines. The steamship *Eastern Prince* was torpedoed and sunk by a German submarine 30 miles S.f.W. of the Eddystone on August 30th, 1917. Five of her crew were killed. The captain was among the survivors.

EASTERN SWORD

Sword S.S. Line; 1920; Uraga Dock Co.; 3,785 tons; 330-3 X 46-1x27-6; 419n.h.p.; triple-expansion engines. The American steamship *Eastern Sword*, on a voyage from New York to Demerara, was torpedoed and sunk by a German submarine on May 4th, 1942, eight miles from Georgetown. The captain and 11 of the crew were killed.

EASTLAND

Eastland Nav. Co.; 1903; Jenks Shipbuilding Co.; 1,961 tons; 265x38-2x19-5; 343 n.h.p.; 22 knots; triple-expansion engines.

The excursion steamship *Eastland*, Capt. Harry Pedersen, was chartered for a pleasure trip arranged by the employees of the Western Electric Co. On the morning of July 24th, 1915, she was lying alongside the Chicago River quay having embarked about 2,500 persons. The order was given to cast off but before more than one hawser could be loosened the others snapped with the weight of the vessel, which drifted away from the quay and gradually turned over to port. For a few minutes she floated on her side and then sank in shallow water, the waves just level with her starboard side. Over 1,000 people on the upper deck were precipitated into the river in a few seconds, while below deck the water flooded through the portholes and drowned many more. Five other steamships lying at the quayside at once lowered their boats and began the work of

rescue. Despite the greatest heroism on the part of these and other rescuers, however, no less than 812 persons lost their lives.

The *Eastland* was afterwards raised and sold to the U.S. Navy Board, which converted her into a training ship and renamed her *Wilmette*. She was scrapped in November, 1946.

EASTLEA

Cliff side Shipping Co.; 1924; J. Priestman & Co.; 4,267 tons; 365 X 51 • 6 X 25 • 2; 330 n.h.p.; 10 knots; triple-expansion engines. The steamship *East lea*, Capt. M. McPherson, was torpedoed and sunk by a German submarine in the North Atlantic on March 30th, 1941. Thirty-six of her crew, including Capt. McPherson, were killed. She had sailed from St. Vincent, Cape Verde Islands, for Newport News and was carrying a general cargo.

EASTMOOR

Moor Line; 1922; Northumberland S.B. Co.; 5,812 tons; 399-8x52-9x32-8; 569n.h.p.; triple-expansion engines. The British steamship *Eastmoor* was torpedoed and sunk by a German submarine on March 31st, 1942, about 600 miles E. of Hampton Roads on a voyage from Savannah to the U.K. The captain and 15 of the crew were lost.

EASTWAY

Williams Bros.; 1918; W. Gray & Co.; 3,107 tons; 331 -2X46-8x23-1; 430 n.h.p.; triple-expansion engines. The British cargo ship *Eastway* was wrecked on Danae Reef on March 15th, 1923, while on a voyage from Delagoa Bay to Djibouti with a cargo of coal.

EASTWAY

St. Mary Steamship Co.; 1915; Northumberland Shipbuilding Co.; 5,832 tons; 400x52x35-4; 535 n.h.p.; 11 knots; triple-expansion engines.

The steamship *Eastway* left Norfolk, Virginia, for Pernambuco on October 18th, 1926, with 7,500 tons of cargo and 1,761 tons of bunker coal, being overloaded to the extent of 141 tons. She was commanded by Capt. J. H. Vanstone and carried a crew of 35. On the 21st the ship received wireless warning that the hurricane was approaching, but on the course she was steaming it was assumed that she would encounter only its outer fringes. This proved a miscalculation and by the 22nd she was being swept by tremendous seas which smashed one of her port lifeboats, washed away much of her deck gear and ripped off her hatch covers. She also developed a slight list which increased as the day wore on.

Capt. Vanstone personally supervised the efforts of his crew to place fresh covers over the hatches, and it was while engaged in this work without a lifeline that he was washed overboard and drowned. At 5.38 p.m.—the *Eastway* at that time having a list of 15 degrees—an S.O.S. call giving her position as lat. 31° 25' N., long. 64° 15' W., was sent out, which was picked up by the steamship *Luciline* 30 miles away. The *Luciline* steamed in the direction given but at about 7 p.m. the *Eastway* turned on her beam ends and sank with 22 members of her crew including all the officers, except the third officer, Mr. Davey. One of the starboard lifeboats was cut from its lashings and floated clear when the vessel sank, and Mr. Davey and 11 men swimming nearby were able to clamber into it—these were the sole survivors. The *Luciline* arrived on the spot at about 10 p.m. and cruised around until noon the next day when she picked up the lifeboat.

EAVESTONE

Furness Withy & Co.; 1912; Sir R. Dixon & Co.; 1,858 tons; 275-9x40-5x18-3; 156n.h.p.; 9 knots; triple-expansion engines.

The steamship *Eavestone* was intercepted by a German submarine 95 miles W. of Fastnet on February 3rd, 1917. The submarine opened fire from the surface and sank the vessel with shells. Five of her crew, including the captain, were killed.

EBER

German Navy, gunboat; 1887; Germany; 570 tons; 152-5X 26-3x10-3; 400i.h.p.; 12 knots; triple-expansion engines; three 4•7 in. guns.

The gunboat *Eber* was a unit of a small squadron lying in the harbour of Apia, Samoa, during the crisis between Germany and

EBISU MARU

the United States over the islands in the early months of 1889. On March 15th the anchorage was swept by a violent hurricane which destroyed the three German and three American warships, as well as the merchant shipping. The full story is related under the the *Trenton*, flagship of the U.S. squadron, which was lost.

The *Eberhad* previously suffered some damage to her propeller, which limited her steaming powers, and soon after the hurricane burst she was hurled on to a coral reef and her side torn open. She sank immediately, taking with her 76 out of her complement of 80, including Capt. Lt. Wallis, her commander.

EBISU MARU

Kobe Sanbashi K.K.; 1935; *Kasado Qock K.K.*; 490 tons; 161-5x28-5x13; oil engines.

The motorship *Ebisu Mam* broke into three after striking a wreck on October 29th, 1946, off Chinampo, Korea. The ship was carrying passengers and 497 Japanese were drowned.

EBONOL

Great Southern S.S. Co.; 1917; *Clyde S.B. & E. Co.*; 1,175 tons; 210•1x34-7x15-6; triple-expansion engines. The British cargo ship *Ebonol* sank 3[^] miles off Sugar Loaf Island, south of Swatow on May 24th, 1950. She was on a voyage from Swatow to Hongkong carrying passengers and a cargo of sugar. It was reported at the time that an explosion had occurred but the cause of the casualty was never established. The crew were saved but seven passengers lost their lives.

EBRO

Del Forenede Dampskibs Selsk.; 1912; *Helsingors Jernskibs-og Maskinbyg.*; 1,028 tons; 235x35-6x23-9; 150 n.h.p.; triple-expansion engines.

The Danish steamship *Ebro* was sunk by a German submarine in the Bay of Biscay on January 6th, 1917.

ECHIZEN MARU

Kita Nippon Risen K.K.; 1907; *W. Hamilton & Co.*; 2,424 tons; 294-4x44x13-3; 202 n.h.p.; triple-expansion engines. The steamship *Echizen (Etizen) Mam* was torpedoed and sunk by the U.S. submarine *Tang* on February 24th, 1944, about 150 miles W. of Terian Island, Ladrone Islands.

ECHUNGA

Adelaide Steamship Co.; 1907; *Sir R. Dixon & Co.*; 6,285 tons; 390 -1x56x33; 10-5 knots; triple-expansion engines. The steamship *Echunga* was torpedoed and sunk by a German submarine 40 miles N. by E. of Ushant on September 5th, 1917. Nine of her crew were killed. The captain was among the survivors.

ECLAIR

P. Dreland; 1855; France; 187tons; 109-2x22-5x12-7. The brig *Eclair*, Capt. P. Dreland, was wrecked on the Longships reef off Land's End, on September 1st, 1874. The vessel was on a voyage from Norway to Dublin. Six of the crew were drowned. Capt. Dreland was among the survivors.

ECLIPSE

British Navy, destroyer; 1934; *W. Denny & Bros.*; 1,375 tons; 329x33-2x8-5; 36,000 s.h.p.; 35-5 knots; turbine engines; 3-drum boilers; four 4•7 in. guns, 7 smaller, 8 T.T. The destroyer *Eclipse*, Cdr. E. Mack, D.S.O., D.S.C., was mined and sunk off Kalimno, Dodecanese, on October 24th, 1943. Five officers and 114 ratings were killed. Cdr. Mack and another officer were wounded.

ECUADOR

Pacific Steam Navigation Co.; 1881; *Laird Bros.*; 1,768 tons; 300x36-2x19-3; 90 n.h.p.; compound engines. The British cargo ship *Ecuador* foundered on July 4th, 1916, about 14 miles off Constitucion.

EDAM

BrodreneBjornstad; 1901; A.G. "Neptun"; 2,381 tons; 291 -5X 41-2x16-6; 180 n.h.p.; triple-expansion engines. The Norwegian steamship *Edam* was sunk by a German submarine in the North Sea on October 15th or 16th, 1916.

EDAMITSU MARU

Osaka Shosen K.K.; 6,872 tons. The steamship *Edamitsu Mam* was sunk by U.S. carrier-based aircraft on August 9th, 1945, off Rashin, Manchuria.

EDDA

Lloyd Triestino S.A. diNav.; 1924; *Stabilimento Tecnico*; 6,107 tons; 414-5x53-9x30-2; turbine engines. The Italian steamship *Edda* was torpedoed and sunk by a British submarine on January 20th, 1943, about ten miles S.E. of Djerba Island.

EDDLETHORPE

J.Coverdale&Son; 1882; *W. Gray & Co.*; 1,735 tons; 259-6X 34-7x19-5 ; 150 h.p.; compound engines. The British cargo ship *Eddlethorpe* sank after a collision on November 19th, 1891, in the Bosphorus while on a voyage in ballast from Port Said to Odessa.

EDEN

Royal Mail Steam Packet Co.; 1882; *Barrow S.B. Co.*; 2,145 tons; 309 -5x36-2x16-7; 335 n.h.p.; compound engines. The British cargo ship *Eden* was wrecked on Cabrit Island, Martinique, on August 25th, 1909, while on a voyage in ballast from Barbados to St. Thomas.

EDEN

British Navy, destroyer; 1904; *Hawthorn Leslie*; 550 tons; 225 x 23-5x12; 7,000 i.h.p.; 25-5 knots; triple-expansion engines; Yarrow boilers; four 12pdr., 2 T.T. The destroyer *Eden*, Lt. A. C. N. Farquhar, was one of the smaller and older destroyers serving in the First World War. On the night of June 16th, 1916, she sank after a collision in the Channel, going down with about half her complement, including Lt. Farquhar.

EDEN

H.S.Horgen; 1879; *W. Gray & Co.*; 1,304 tons; 246x34-2x 17-2; 136 n.h.p.; compound engines. The Norwegian steamship *Eden* was torpedoed and sunk by a German submarine in the English Channel on April 30th, 1917.

EDENCRAG

Hartlepool S.S. Co.; 1940; *Burntisland S.B. Co.*; 1,592 tons; 264•3x40-3x16-2; 185 n.h.p.; triple-expansion engines. The steamship *Edencrag* was sunk by mine or torpedo on December 14th, 1942, off Oran on a voyage from Gibraltar to North Africa. The ship sank in two minutes, with the loss of 13 lives.

EDENMOOR

Walter Runciman & Co.; 1894; *J. Readhead & Sons*; 3,107 tons; 321-5x41-6x21-9; 281 n.h.p.; triple-expansion engines. The British cargo ship *Edenmoor* caught fire and sank off Jebeltier, Red Sea, on November 26th, 1897, while on a voyage from Batoum to Bombay carrying a cargo of petroleum.

EDERNIAN

S.S. Demetian & Ordovician Co.; 1906; *Craig Taylor & Co.*; 3,588 tons; 342x51x22-7; 308 n.h.p.; 10 knots; triple-expansion engines. The steamship *Edernian* was torpedoed and sunk by a German submarine six miles S. by E. of Southwold on August 20th, 1917. Fourteen of her crew were killed. The captain was among the survivors.

EDILIO

Soc. Commerciale Italiana di Nav.; 1910; *W. Doxford & Sons*; 4,829 tons; 392-6x51-5x27-6; 338 n.h.p.; triple-expansion engines. The Italian steamship *Editio* was torpedoed and sunk by a submarine in the Mediterranean on February 2nd, 1918.

EDINBURGH

James Mitchell & Sons; 1884; *M. Pearse & Co.*; 1,645 tons; 248x34-5x20-6; 159 n.h.p.; compound engines. The British cargo ship *Edinburgh* sank after a collision off Hais-borough Lightship on February 13th, 1913, while on a voyage from Methil to Oran carrying a cargo of coal.

EDINBURGH

British Navy, cruiser; 1938; Swan Hunter, Wigham Richardson; 10,000 tons; 613-5x63-3x17-2; 80,000 s.h.p.; 32-5 knots; turbine engines; 3-drum boilers; twelve 6 in. guns, twelve 4 in., four 3pdr., 16smaller, 6 T.T.; 4 aircraft.

The cruiser *Edinburgh*, Capt. H. W. Faulkner, was engaged upon convoy duties on the Murmansk route when, on April 30th, 1942, she was disabled by a submarine attack. The ship carried a complement of about 700. The torpedo damaged *Edinburgh's* steering gear and she was assisted by H.M. destroyers *Foresight* and *Forester* and two Russian destroyers. She was taken in tow by *Forester* but the tow rope parted and the heavy seas made further towing impracticable.

After nearly 24 hours, in which *Edinburgh* was assisted to steer by towing *Foresight*, a tug was brought on the scene escorted by British and Russian destroyers and a fresh attempt was made. The weather was still very bad, with occasional snow squalls, and under cover of these the submarines pressed their attacks, assisted by large enemy destroyers. At about 6.30 on the morning of May 2nd, there was a sharp engagement between four British and three German destroyers. One of the German destroyers was hit and stopped but the others managed to get off a salvo of torpedoes against the helpless *Edinburgh*, which received a second hit. The loss of life amounted to two officers and 55 ratings. Despite the bad weather a large proportion of the crew was taken off in safety, the guns' crews being left on board. The ship continued to float until late in the afternoon, when the remainder of the crew was taken off and she was sunk by the escorting destroyers.

EDIRNE

T. C. Munakalat Vekdleti Devlet Denizyollari; 1948; Oskar-shamms Varv A/B; 3,619 tons; 335-9x48-9x21-2; compound engines.

The Turkish steamship *Edirne* went ashore on Burhou Island, Alderney, during fog on January 29th, 1950. She was refloated but sank on the next day two miles N.W. of Alderney lighthouse.

EDITH

J.Lauritzen; 1931; Nakskov Skibs. A/S; 1,566 tons; 254-2 x 39-2x15-4; 164 n.h.p.; compound engines. The Danish steamship *Edith* was bombed and sunk by insurgent aircraft 30 miles off Barcelona on August 27th, 1937, during the Spanish Civil War.

EDITH CAVELL

H. E. Moss & Co.; 1898; Bar tram & Sons; 3,475 tons; 350 x 46-5x16-2; 298 n.h.p.; triple-expansion engines. The British cargo ship *Edith Cavell* was wrecked near Maroni in position 5°45'N., 54° W., on November 30th, 1924, while on a voyage from Marseilles to Cayenne and Fort de France with a general cargo.

EDITOR

T.&J.Harrison; 1885; M. Pearse & Co.; 1,701 tons; 250X 33-9x15-1; 170n.h.p.; triple-expansion engines. The British cargo ship *Editor* was wrecked on March 22nd, 1897, on Penrhor Point, Holyhead. She was on a voyage from Maceio to Liverpool carrying a cargo of cotton and sugar.

EDMONTON

Watts, Ward & Co.; 1879; Swan; 1,663 tons; 255-6 x 34-2 x 22-9; ifiO h.p.; compound inverted engines.

The British cargo ship *Edmonton* was wrecked on Great Bahama Bank on May 30th, 1880. She was carrying a cargo of coal on a voyage from Cardiff to Havana.

EDMUND

Emigrant ship; 1840 (circa); 400 tons (approx.). The emigrant ship *Edmund*, Capt. Wilson, left the roadstead of Carrigaholt, Co. Clare, on the evening of Sunday, November 18th, 1850, with 207 persons on board, bound for New York. On the following day the vessel encountered a W.N.W. gale which carried away two of her masts and she became unmanageable. At about 11 o'clock on the night of Tuesday, the 20th, she struck on the Duggerna Rocks off the Bay of Kilkee. The force of the seas washed her off the rocks and drove her further inshore, where the remaining

mast went by the board and she broke in two. Fortunately the mast provided a bridge from the ship to the rocks, and by clambering over it a total of 111 persons were saved. Those lost numbered 96.

Capt. Wilson, who was among the survivors, was the last to leave the ship.

EDNA

AlBHera; 1905; SunderlandS.B.Co.; 829tons; 195x32x13-5; 123n.h.p.; triple-expansion engines.

The Finnish steamship *Edna*, Capt. C. F. Carlstedt, on a voyage from Trondheim to Preston, sprang a leak in heavy weather on March 7th, 1952, about 80 miles N.W. of the Shetland Islands. A wireless message stated that the ship was being abandoned in a sinking condition, but that was the last heard of the ship or of her crew of 18.

EDO MARU

Konan Risen K.K.; 1937; Osaka Zosen K.K.; 1,299 tons; 219-3x35-8x18-5; 145 n.h.p.; triple-expansion engines. The steamship *Edo Mam* was taken over by the Japanese Navy and converted into an auxiliary gunboat. On August 13th, 1943, she was torpedoed and sunk by the U.S. submarine *Sunfish*, S. of Iwojima, Volcano Islands.

EDOGAWA MARU

Nippon YusenKaisha; 6,968 tons. The steamship *Edogawa Mam* was torpedoed and sunk by the U.S. submarine *Sunfish* on November 17th, 1944, about 100 miles W.S.W. of Cheju Do Island, Korea.

EDOGAWA MARU

Toyo Kaiun K.K.; 1,972 tons. The steamship *Edogawa Mam* was torpedoed and sunk by the U.S. submarine *Sea Devil* on April 2nd, 1945, about 120 miles S.W. of Mokpo, Korea.

EDOUARD DETRAILLE

G. Belot; 1901; Ateliers et Chantiers de la Loire; 2,185 tons; 276-5x40-3x22-5.

The French sailing vessel *Edouard Detaille* was sunk by a German submarine in the Bay of Biscay on September 25th, 1917.

EDSALL

United States Navy, destroyer; 1920; W. Cramp & Sons, Philadelphia; 1,190 tons; 314x30x10; 25,000s.h.p.; 35 knots; turbine engines; four 4 in. guns, one 3 in.A.A., 12 T.T. The destroyers *Edsall* and *Pillsbury* were ordered to leave Javanese waters and make for Australia at the close of the disastrous battle of the Java Sea, February 27th-March 1st, 1942. The vessels, which were sister ships of the old flush-deck type built between 1919 and 1920, were intercepted by a superior Japanese force which sank them both. The destroyers had an official complement of 122 per ship.

EDUARD GEISS

C. E. Geiss; 1903; Nylands Verksted; 1,456 tons; 231-7x 35-2x14-7; triple-expansion engines.

I The German steamship *Eduard Geiss* was bombed and sunk by British aircraft on May 6th, 1944, off Borkum.

EDWARD B. DUDLEY

U.S. War Shipping Administration; 1943; North Carolina S.B. Co.; 7,177 tons; 422-8x57x34-8; triple-expansion engines. The steamship *Edward B. Dudley* left New York on April 1st, 1943, and Halifax on the 4th for Liverpool. On the 10th she reported that she had evaded a submarine attack but was being followed by two submarines. Nothing more was ever heard of the ship or her crew.

EDWARD DAWSON

J. M. Lennard & Sons; 1890; Armstrong, Mitchell & Co.; 1,907 tons; 265x37x23-4; 169 n.h.p.; triple-expansion engines. The British tanker *Edward Dawson* ran aground and burnt out on Zoutlande Bank, mouth of the river Scheldt, on October 1st, 1911, while carrying petroleum on a voyage from Novorossisk to Rotterdam.

EDWARD RUTLEDGE

American Export Lines; 1931; New York S.B. Co.; 9,360 tons; 450x61-6x42-3; turbine engines.

The American steamship *Edward Rutledge* was torpedoed and sunk by the German submarine *U-130* on November 12th, 1942, off Casablanca during the Allied landings.

EDWARD U. DEMMER

Milwaukee- Western S.S. Co.; 1899; Detroit S.B. Co.; 4,651 tons; 423-9x51-9x28; 218 n.h.p.; triple-expansion engines. The American steamship *Edward U. Demmer* sank in a collision on May 20th, 1923, about 40 miles S.E. of Thunder Bay Island whilst trading on the Great Lakes.

EDWY R. BROWN

Oriental Trade & Transport Co.; 1938; Cantieri Riuniti delV Adriatico; 10,455 tons; 490-2x70x37; 1,003 n.h.p.; 12 knots; oil engines.

The tanker *Edwy R. Brown*, Capt. A. Chambers, was in the North Atlantic, about 400 miles W. of the Faroes, on February 17th, 1941, when she was torpedoed and sunk by a German submarine. She was on a voyage from Aruba to Liverpool and her crew of 47 and two gunners were lost.

EEMDIJK

Holland-Amerika Lijn; 1913; W. Gray & Co.; 6,180 tons; 401-6x54x33; 339 n.h.p.; triple-expansion engines. The Dutch steamship *Eemdiijk* struck a mine and sank in the North Sea on September 23rd, 1915.

EETA

W. V. Stott & Co.; 1883; Wigham Richardson & Co.; 1,191 tons; 235 x 32 • 3 X14 • 6; 150 h.p.; compound engines. The British cargo ship *Eeta* was wrecked on Saltholman Reef on May 5th, 1894, while on a voyage from Liverpool to Norrköping carrying a general cargo.

EFFINGHAM

British Navy, cruiser; 1925; Portsmouth Dockyard; 9,770 tons; 605x58x20-5; 65,000 i.h.p.; 30-5 knots; turbine engines; Yarrow boilers; nine 6 in. guns, four 4 in., four 3pdr., two 2pdr., 11 m.g.

The cruiser *Effingham*, Capt. J. M. Howson, was conveying the 2nd Battalion South Wales Borderers and other troops from Ankenes to Bodo in Norway, during the brief campaign in that country. On May 18th, 1940, when within one hour's steaming of her destination, the cruiser struck an uncharted rock and became a total loss. There were no casualties among the ship's company or the troops, and much of the military equipment was transferred to small craft and taken to Bodo.

EFFNA

Ministry of Shipping (M. Campbell & Co.); 1919; Skinner & Eddy Corp.; 6,461 tons; 402-6x54-8x32-1; 359 n.h.p.; triple-expansion engines.

The steamship *Effna* was torpedoed and sunk by a German submarine on the night of February 28th, 1941, about 350 miles N.W. of the Hebrides on a voyage from Baltimore to Newport. There were no survivors.

EGDA

L. Mowinkel; 1897; A. Rodger & Co.; 2,527 tons; 314x 44-1x20'7; 249 n.h.p.; triple-expansion engines. The Norwegian steamship *Egda* was torpedoed and sunk by a German submarine in the Irish Channel on January 7th, 1918.

EGEO

"Adriatica" Soc. Anon, di Nav.; 1927; Stabilimento Tecnico; 3,311 tons; 331-7x44-8x21-3; 1,103 n.h.p.; oil engines. The Italian motor vessel *Egeo* was sunk by gunfire from Allied warships on April 24th, 1941, about one mile from Tripoli.

EGERAN

1941; 1,142 tons; oilengines.

The German motor vessel *Egeran* struck a mine and sank off Memel on November 26th, 1941.

EGERLAND

1940; 8,788 tons; oilengines. The motor tanker *Egerland* was built in Norway as the *North America* for Norwegian owners, and was taken over by the Germans on completion. On June 5th, 1941, she was sunk by Allied warships in the North Atlantic.

EGGA

Elder, Dempster & Co.; 1901; Londonderry S.B. & E. Co.; 1,445 tons; 219-8x36-2 x 13-1; 119 n.h.p.; compound engines. The British cargo ship *Egga* was wrecked on June 17th, 1908, on Lagos bar while trading on the west coast of Africa. She was carrying a general cargo.

EGGLESTONE ABBEY

Pyman, Watson & Co.; 1888; W. Gray & Co.; 2,401 tons; 290X 38-2x20-3; 217 n.h.p.; triple-expansion engines. The British cargo ship *Egglesstone Abbey* was wrecked off Cape Sao Thome, South Brazil, on March 16th, 1896, while on a voyage from Cardiff to Buenos Aires carrying a cargo of coal.

EGHOLM

Ministry of War Transport (Ellermarts Wilson Line); 1924; Fredrikshavn Skibs. & Flydedok; 1,317 tons; 254-6x37-2x16; turbine engines.

The steamship *Egholm* was torpedoed and sunk by a German submarine on February 25th, 1945, off St. Abb's Head on a voyage from Leith to London. Two of her crew and three gunners were lost.

EGITTO

"Adriatica" Soc. Anon, di Nav.; 1927; Stabilimento Tecnico; 3,329 tons; 331-9x44-8x21-8; 1,103 n.h.p.; oilengines. The Italian motorship *Egitto* struck a mine and sank on March 1st, 1942, about one mile off Taranto.

EGLANTINE

John Ridley, Son & Tully; 1878; Tyne Iron S.B. Co.; 1,312 tons; 258x32x21-1; 130 n.h.p.; compound engines. The British cargo ship *Eglantine* was wrecked on Filey Brigg on April 16th, 1915, while on a voyage from the Tyne to Havre with a cargo of coal.

EGLE

MarioZoboli; 1893; Rijkee&Co.; 1,143 tons; 238-9x32-lx 15-6; triple-expansion engines. The Italian steamship *Egle* was torpedoed and sunk by a British submarine on March 29th, 1943, about one mile from Capo Carbonara.

EGRET

West Russian S.S. Co.; 1905; W. Gray & Co.; 4,055 tons; 350 X 46-1x23-6; 291 n.h.p.; triple-expansion engines. The Russian steamship *Egret* struck a mine and sank in the North Sea on January 28th, 1917.

EGRET

British Navy, sloop; 1938; J. S. White & Co.; 1,200 tons; 276X 37-5x8-3; 3,600 s.h.p.; 19-25 knots; turbine engines; 3-drum boilers; eight 4 in.A.A. guns, 5 smaller. The sloop *Egret* was sunk by a German glider bomb off the coast of N.W. Spain on August 27th, 1943. Six officers and 188 ratings were killed and one officer wounded.

EGUSKIA

Cia. Anon, de Nav. Izarra; 1875; Scnlesinger, Davis & Co.; 1,181 tons; 235'3x32-3x18-2; 127 n.h.p.; compound engines. The Spanish steamship *Eguskia*, formerly the *Puebla*, was torpedoed and sunk by a submarine in the Mediterranean on July 19th, 1918.

EGYPT

Peninsular & Oriental Steam Navigation Co.; 1897; J. Caird & Co.; 7,941 tons; 499-8x54-3x24-5; 11,000 i.h.p.; 18 knots; triple-expansion engines. The P. and O. liner *Egypt*, Capt. A. Collyer, left Tilbury for Marseilles and Bombay on May 19th, 1922, having on board 44 passengers and 294 crew, of whom 208 were Lascars and other

Asiatics. In addition to her other cargo the *Egypt* carried a consignment of gold and silver totalling £1,054,000 in value.

On the evening of the next day, in the neighbourhood of Ushant, the liner ran into thick fog and after proceeding for some little time Capt. Collyer stopped his engines and lay to. The sound of another steamship's siren could be heard gradually approaching but the fog was too dense to locate her. Suddenly she appeared on the port beam of the *Egypt*, going very fast, and within the short space of 15 seconds struck the liner on the port side between the funnels with terrific violence. The stricken ship at once began to sink and a dreadful panic ensued among the Lascar seamen, who rushed the boats. Several of the European members of the crew followed their example and all orderly methods of saving life went by the board. The heavy list to port also created much greater difficulties for those who were striving to preserve some sort of discipline, and impeded the proper launching of the remaining boats.

Within 20 minutes of the collision the *Egypt* sank, her list being so great just prior to her going that all boats, rafts and deck fittings were cut loose so that they might float when the wreck submerged. By this action the lives of many persons were saved. There are several instances of individual heroism, such as that of an army officer who jumped into a boat and forced its Lascar occupants to return to the side, eventually getting 70 people away in safety.

Meanwhile the vessel which had done the damage, the French steamship *Seine*, 1,383 tons, La Pallice to Havre, took the survivors on board and conveyed them to Brest.

Fifteen passengers and 71 of the crew were lost with the ship, and one person died in hospital. Capt. Collyer remained at his post to the last and was picked up in the water by one of the boats.

The position of the vessels at the time of the collision was about 20 miles off the Armen Lighthouse, the disaster occurring about 7 o'clock in the evening.

The task of recovering the specie lost in the liner marked a new era in the science of undersea salvage. The work was taken in hand as soon as possible, but not without misgiving, for the vessel had sunk in 60 fathoms of water, a depth beyond that at which diving operations could normally be carried on. From 1923 to 1928 various companies conducted a search for the wreck, but without success. In June, 1929, the Italian Society for Marine Recovery, directed by Commendatore Giovanni Quaglia, took up the search. After many disappointments extending over 15 months the wreck was located at a depth of 360 feet. The ship was lying on an even keel, with masts and funnels still standing, and on a smooth sea bed. The patent diving suit carried on board the Italian salvage ship, *Artiglio*, enabled a diver to descend to this great depth in perfect safety and later to recover nearly all the specie. Blasting operations opened up a way into the ship's hull through which the treasure was eventually extracted.

The cost of the salvage from first to last to the Italian company alone was £200,000, but a great task had been achieved and much valuable experience of deep sea diving had been gained. An idea of the immensity of the work may be realised from the fact that it did not finally conclude until 1933, or nearly five years after it commenced. Taking into account the fruitless years of search by the French and Swedish companies from 1923 onwards, quite ten years had been spent on salving the *Egypt's* gold.

EGYPTIE

Armement Adolf Deppe; 1901; *S.A. John Cockerill*; 2,412 tons; 288-3x45x18; 231 n.h.p.; triple-expansion engines. The Belgian steamship *Egypte* was lost in the Atlantic on or about January 22nd, 1917, presumably sunk by a German submarine.

EGYPTIE

French Government; 1905; *Eiderwerft A.G.*; 2,568 tons; 283-4x41-9x24-9; triple-expansion engines. The former Belgian steamship *Egypte* was seized by French authorities on August 15th, 1941. She was lost by war causes in June, 1944.

EGYPTIAN

Ellerman Lines; 1891; *Russell & Co.*; 2,923 tons; 311-5x41-3x20-2; 246n.h.p.; triple-expansion engines. The British cargo ship *Egyptian* was wrecked on August 26th, 1912, on Scroby Sands while on a voyage from Antwerp to the Tyne with a cargo of iron and cement.

EGYPTIAN

Ellerman Lines; 1920; *W. Harkess & Son*; 2,868 tons; 316-3x44-1x23-3; 233 n.h.p.; triple-expansion engines. The steamship *Egyptian* was torpedoed and sunk by a German submarine on March 6th, 1943, about 400 miles S.S.E. of Cape Farewell on a voyage from New York to London. Thirty-five crew and nine gunners were lost.

EHIME MARU

Yamashita Risen K.K.; 1920; *Uraga Dock Co.*; 4,653 tons; 360X51-2x28-5; 358 n.h.p.; triple-expansion engines. The steamship *Ehime Maru* was torpedoed and sunk by the U.S. submarine *Halibut* on November 2nd, 1943, about 300 miles E. of the Ryukyu Islands.

EIAN MARU

Dairen Kisen K.K.; 1905; *J. L. Thompson & Sons*; 3,825 tons; 352X49-7X24-6; triple-expansion engines. The steamship *Eian Maru* struck a mine and sank on July 25th, 1945, off Yonago, Japan.

EIDENT

James Westoll; 1880; *Short Bros.*; 1,520 tons; 260-5x34x18-7; 178 n.h.p.; compound engines. The British cargo ship *Eident* sank after a collision off Sunderland on October 24th, 1902. She was on a voyage in ballast from London to the Tyne.

EIDSIVA

A. Halvorsen; 1902; *Bergens Mek. Verksted*; 1,092 tons; 228-6x35-2x15-9; 101 n.h.p.; triple-expansion engines. The Norwegian steamship *Eidsiva* struck a mine and sank in the North Sea on October 31st, 1915.

EIDSIVA

Pelton S.S. Co.; 1907; *Frammes Mek. Vaerks.*; 1,053 tons; 216 X 31X 20 • 1; 132 n.h.p.; triple-expansion engines. The British cargo ship *Eidsiva* was wrecked on December 26th, 1917, two miles south of the entrance to the River Tees. She was on a voyage from the River Tyne to Rouen carrying a cargo of coal.

EIDSVOLD

A.T. Simonsen; 1902; *Burmeister & Wain*; 1,570 tons; 250 X 34-7x15-7; 225n.h.p.; triple-expansion engines. The Norwegian steamship *Eidsvold* was sunk by a German submarine in the western Atlantic on June 4th, 1918.

EIDSVOLD

Norwegian Navy, coast defence ship; 1900; *Armstrong*; 4,166 tons; 301-2x50-5x17-7; 4,500 i.h.p.; 16-5 knots; triple-expansion engines; Yarrow boilers; two 8-2 in. guns, six 5-9 in., eight 3 in., two 3 pdr.

The coast defence ship *Eidsvold*, in company with her sister ship, the *Norge*, was lying at the port of Narvik on April 9th, 1940. A large amount of German seaborne supplies, particularly iron ore, had been passing through neutral Norwegian waters and on April 8th the British had begun preventive measures, sowing minefields over the course to Narvik. It had become known that the Germans were engaged upon operations of a more extensive nature and were sending a force of 11 destroyers and some merchantmen to occupy the port, while at the same time powerful military and naval expeditions were undertaking the invasion of Norway at points lower down the coast.

The *Eidsvold* received orders from Capt. Askim, of the *Norge*, senior naval officer, to proceed outside the harbour and intercept the attackers. This was at about 3.20 a.m. and the weather was very foggy. Just under an hour afterwards two German destroyers appeared out of the mist and one of them sent an officer to the *Eidsvold* with a demand for immediate surrender. The demand was rejected and the German officer, immediately on pushing off from the ship discharged a Very-light signal to the waiting destroyers, which at once fired torpedoes.

The *Eidsvold* was struck in the forward magazine and instantly blew up. Of her crew of 193 only eight were saved. The full story of the action is told under the *Norge*.

EIFUKU MARU

EIFUKU MARU

Todai Risen K.K.; 1918; *Kawasaki Dockyard Co.*; 5,866 tons; 385 x 51 x 36; 444 n.h.p.; triple-expansion engines. The steamship *Eifuku (Eihuku) Mam* was torpedoed and sunk by the U.S. submarine *Growler* on August 31st, 1942, off Keelung, Formosa.

EIFUKU MARU

Nippon Yusen K.K.; 1939; *Mitsubishi Jukogyo K.K.*; 3,520 tons; 341 - 2x48-2x27-9; triple-expansion engines. The steamship *Eifuku (Eihuku) Mam* was torpedoed and sunk by the U.S. submarine *Pampanito* on February 8th, 1945, about 150 miles N.E. of Dungun, Malaya.

EIHO MARU

Japanese Government; 5,209 tons. The tanker *Eiho Mam* was bombed and sunk by U.S. carrier-based aircraft on January 12th, 1945, twenty-five miles S.E. of Phanrang, Indo-China.

EIHO MARU

Iino Kaiun K.K.; 5,068 tons. The tanker *Eiho Mam* was sunk by U.S. carrier-based aircraft on January 21st, 1945, off Kaohsiung, Formosa.

EIJI MARU

Nippon Yusen Kaisha; 6,968 tons. The steamship *Eiji Mam* struck a mine and sank on September 6th, 1944, in the Bashi Channel, Formosa.

EIJO MARU

Toa Kaiun K.K.; 2,274 tons. The steamship *Eijo Maru* was torpedoed and sunk by the U.S. submarine *Spadefish* on June 17th, 1945, near Esashi, Japan.

EIJU MARU

Kihara Shosen Kogyo K.K.; 1897; *W. Gray & Co.*; 2,455 tons; 302 x 43 • 1 x 19 • 7; 227 n.h.p.; triple-expansion engines. The steamship *Eiju (Eizyu) Maru* was torpedoed and sunk by the U.S. submarine *Eaton* on May 16th, 1945, in the Yellow Sea.

EIJUN MARU

Dairen Risen K.K.; 1916; *Uraga Dock Co.*; 2,156 tons; 268 X 40-7x23-6; triple-expansion engines. The steamship *Eijun (Eizyuri) Maru* struck a mine and sank on July 1st, 1945, off Shimonoseki.

EIJUN MARU

Toho Kaiun K.K.; 1916; *Uraga Dock Co.*; 2,156 tons; 268X 40-7x23-6; triple-expansion engines. The steamship *Eijun (Eizyuri) Mam* sank on September 18th, 1945, near Hikoshima during a typhoon.

EIKA

Aalesunds Dampskibsred. A/S; 1903; *Framnes Mek. Verksted*; 695 tons; 181-7x28-2x13-2; 56 n.h.p.; triple-expansion engines. The Norwegian steamship *Eika* left Dunston on February 6th, 1934, for Murviken. Lifebuoys, a lifeboat, wreckage and the bodies of two of the crew were washed ashore on the Norwegian coast, but there was no further news of the ship.

EIKA

Rederi A/S Kragero; 1939; *Langesunds Mek. Verksted*; 1,503 tons; 248-3x38-6x17-2; compound engines & L.P. turbine. The Norwegian steamship *Eika* was torpedoed and sunk by a German submarine on January 29th, 1940, 200-250 miles off Ushant. Sixteen of her crew were killed.

EIKA H

H. Haraldsen; 1906; *Osbourne, Graham & Co.*; 1,268 tons; 235 - 3x33-8x15; 157 n.h.p.; triple-expansion engines. The Norwegian steamship *Eika II* was torpedoed and sunk by a German submarine in the North Sea on August 19th, 1917.

EIKA MARU

Japanese Government; 1896; *W. Hamilton & Co.*; 1,248 tons; 239-7x35-6x17-8; 214 n.h.p.; triple-expansion engines. The steamship *Eika Maru* was formerly the Portuguese *Wing Wah*, sunk by mine or torpedo in June, 1943, near Haiphong, and afterwards raised and repaired by the Japanese. She was torpedoed and sunk by the U.S. submarine *Tambor* on June 2nd, 1945, in the Gulf of Tonkin.

EIKAN MARU

Nippon Yusen Kaisha; 6,903 tons. The steamship *Eikan Mam* struck a mine and sank on June 26th, 1945, off Kamaishi, Japan.

EIKHAUG

Eikhaugs Rederi A/S; 1903; *Nylands Verksted*; 1,436 tons; 231 - 6x35-1x20-4; 109 n.h.p.; triple-expansion engines. The Norwegian steamship *Eikhaug* was torpedoed and sunk by a German submarine on September 7th, 1941, in the North Sea. Fifteen of her crew were lost.

EIKO MARU

Taiyo Kogyo K.K.; 1940; *Tama Shipbuilding Co.*; 3,535 tons; 340-4x48-2x26-2; triple-expansion engines. The steamship *Eiko Maru* was shelled and sunk by U.S. surface craft on January 30th, 1944, off Lae Island.

EIKO MARU

Osaka Shosen Kaisha; 3,011 tons. The steamship *Eiko Maru* was torpedoed and sunk by a British submarine on June 18th, 1944, about 50 miles N.W. of Penang Island.

EIKO MARU

Nippon Yusen K.K.; 1903; *Mitsubishi Dockyard*; 1,843 tons; 262 X 35 • 5 X 14 -1; 263 n.h.p.; triple-expansion engines. The steamship *Eiko Maru* was torpedoed and sunk by the U.S. submarine *Seadragon* on October 24th, 1944, about 150 miles N.W. of Luzon Island, Philippines.

EIKO MARU

Chosen Yusen K.K.; 1918; *Hakodate Dockyard Co.*; 1,164 tons; 215 X 31' 5 X 18 • 5; 74 n.h.p.; triple-expansion engines. The steamship *Eiko Maru* was bombed and sunk by U.S. land-based aircraft on May 6th, 1945, off Kunsan, Korea.

EIKYO MARU

Osaka Shosen Kaisha; 6,948 tons. The steamship *Eikyo Maru* was torpedoed and sunk by the U.S. submarine *Dale* on October 14th, 1944, 45 miles west of Papar, North Borneo.

EIKYU MARU

Nippon Yusen Kaisha; 6,862 tons. The steamship *Eikyu Maru* was sunk by U.S. carrier-based aircraft on November 13th, 1944, in Manila Bay.

EILDON

George Gibson & Co.; 1905; *A. Stephen & Sons*; 1,329 tons; 260X34-1X17-7; 276 n.h.p.; triple-expansion engines. The British cargo ship *Eildon* struck a rock and sank two miles north-east of Molene on May 4th, 1915, while on a voyage from Liverpool to Nantes carrying a cargo of sheet iron and railway materials.

EIMAN MARU

Nippon Yusen Kaisha; 6,968 tons. The tanker *Eiman Maru* was bombed and sunk by U.S. carrier-based aircraft on January 12th, 1945, 25 miles N.E. of Binh Dinh, Indo-China.

EIREKI MARU

Nippon Yusen Kaisha; 6,923 tons. The steamship *Eireki Maru* was sunk by U.S. carrier-based aircraft on July 14th, 1945, near Hakodate.

EIRINI

N. G. Kyriakides; 1897; *J. Blumer & Co.*; 2,452 tons; 290 x42x17-4; 227 n.h.p.; triple-expansion engines. The Greek steamship *Eirini* struck a mine and sank in the Bristol Channel on August 26th, 1917.

EIRINI KYRIAKIDES

The heirs of the late N. G. Kyriakides; 1922; *R. Thompson & Sons*; 3,781 tons; 360-1x50x22-9; 340 n.h.p.; triple-expansion engines. The Greek steamship *Eirini Kyriakides* was torpedoed and sunk by a German submarine on June 13th, 1941, off the Azores on a voyage from Lourenco Marques and Freetown to Ardrossan. All 31 of her crew were lost.

EISHO MARU

Japanese Government; 1917; *Great Lakes Engineering Works*; 2,486 tons; 253x43-5x27-5; 284n.h.p.; triple-expansion engines. The steamship *Eisho Maru* was formerly the Panamanian *Folozu*, seized by the Japanese at Shanghai on December 8th, 1941. On May 29th, 1943, she was torpedoed and sunk by the U.S. submarine *Tambor* about 200 miles E. of Hue, Indo-China.

EISHO MARU

Iino Kaiun K.K.; 2,850 tons. The tanker *Eisho Maru* was bombed and sunk by U.S. land-based aircraft on March 2nd, 1945, thirty miles S.W. of Cheongkong, Hainan Island.

EIWA MARU

Nippon YusenKaisha; 6,968 tons. The steamship *Eiwa Maru* was sunk by U.S. carrier-based aircraft on November 13th, 1944, in Manila Bay.

EIYO MARU

Kanto Tanker K.K.; 1929; *Yokohama Dock Co.*; 8,673 tons; 460-9x60x37-5; 975 n.h.p.; triple-expansion engines. The steamship *Eiyo Maru* was torpedoed and sunk by the U.S. submarine *Guavina* on February 20th, 1945, about 50 miles S.E. of Cana, Indo-China.

EIYO MARU No. 2

Nippon YusosenK.K.; 5,061 tons. The tanker *Eiyo Maru No. 2* was torpedoed by the U.S. submarine *Paddle* and bombed and sunk by carrier-based aircraft on September 7th, 1944, in the Sulu Sea.

EIZAN MARU

KokokuKisenK.K.; 1913; *W. Pickersgill & Sons*; 4,702 tons; 383x51-7x26-6; 431 n.h.p.; triple-expansion engines. The steamship *Eizan Maru* was torpedoed and sunk by the U.S. submarine *Plunger* on January 18th, 1942, south of Susami, Japan.

EIZAN MARU

Tsurumaru Hirotaro; 1915; *Kawasaki Dockyard Co.*; 1,681 tons; 249X37-5X20-9; 172 n.h.p.; triple-expansion engines. The steamship *Eizan Maru* was torpedoed and sunk by the U.S. submarine *Trigger* on November 21st, 1943, off the coast of Korea.

EJIRI MARU

Nippon YusenKaisha; 6,968 tons. The steamship *Ejiri Maru* was torpedoed and sunk by the U.S. submarine *Laponon* October 10th, 1944, off Masinlok, Philippines.

EKATERINI PEPPA

Christos Peppas; 1889; *Hall, Russell & Co.*; 1,788 tons; 270-2 X 35-2x16-7; 216n.h.p.; triple-expansion engines. The Greek ship *Ekaterini Peppa* was in collision in a fog with the *Pluto* on February 7th, 1938, and sank half a mile N.W. of Adler Grand lightship. She was on a voyage from Danzig (Gdansk) to Oran with a cargo of coal.

EKISAN MARU

Tomoe Gumi K. K.; 3,690 tons. The steamship *Ekisan Maru* was torpedoed and sunk by the U.S. submarine *Skate* on September 29th, 1944, off Okinawa Island, Ryukyu Islands.

EKKAI MARU

Japanese Government; 1908; *Scotts'S. & E. Co.*; 2,984 tons; 300-3x45-2x21-1; 381 n.h.p.; triple-expansion engines. The steamship *Ekkai Maru* was formerly the Panamanian *Morazan*, seized by the Japanese. She was sunk by U.S. carrier-based aircraft on September 24th, 1944, S. of the Calamian Group, Philippines.

EKNAREN

Rederiaktieb. Transatlantic; 1922; *W. Doxford & Sons*; 5,243 tons; 420x54x25; 640n.h.p.; oilengines. The Swedish motorship *Eknaren* was torpedoed and sunk by a submarine on July 1st, 1942, off the west coast of Madagascar on a voyage from Suez to Table Bay. The captain and four others were picked up by a whaler. Some of the survivors who were picked up by the British steamship *Mundra* were lost when that ship was sunk five days later.

EKNO

RederiAIBRex; 1916; *Lindholmens M.V.*; 1,847 tons; 262 X 42-7x18-1; 214n.h.p.; triple-expansion engines. The Swedish steamship *Ekno* struck a mine and sank on June 21st, 1942, between Heligoland and Bremen.

EKONTARCHOS DRACOULIS

G. A. Dracoulis; 1918; *Richardson, Duck & Co.*; 5,329 tons; 400-2x52-4x28-4; 517n.h.p.; triple-expansion engines. The Greek steamship *Ekontarchos Dracoulis* was torpedoed and sunk by a German submarine on January 20th, 1940, in the North Atlantic. Six of her crew were killed.

EL ALMIRANTE

U.S. Maritime Commission; 1917; *Newport News S.B. & D.D. Co.*; 5,248 tons; 364X51-2x23-8; triple-expansion engines. The Panamanian steamship *El Almirante* was sunk in collision with the steamship *Elias Boudinot*, 7,176 tons, on April 20th, 1943, about 400 miles E. of New York on a voyage from New York to Liverpool.

EL CANO

Spanish Navy,gunboat; 1885; *Spain*; 524 tons; 157-5x25-5x 8-5; 600i.h.p.; 11-5 knots; triple-expansion engines; three 4*7 in guns, 2 m.g. For narrative of the loss of this vessel, see *Reina Cristina*, flagship of Rear-Admiral Montojo at the battle of Manila Bay, May 1st, 1898, when the entire Spanish Asiatic Squadron was destroyed.

EL COSTON

U.S. Maritime Commission; 1924; *ToddD.D. & Const. Corp.*; 7,280 tons; 426-9x57x26-6; turbine engines. On fire after collision with the *Murfreesboro* on February 26th, 1944, the Panamanian ship *El Coston* sank on the next day in lat. 37°5N, long. 53° 17' W. She was on a voyage from New York to Liverpool.

EL DJEM

P.G. Cottaropoulos; 1913; *Schiffsw.v. Henry Koch*; 2,575 tons; 290-6x41-2x24-3; 190 n.h.p.; triple-expansion engines. The French steamship *El Djem* was bombed and set on fire by insurgent aircraft on May 30th, 1938, at Valencia during the Spanish Civil War. The ship was run ashore and became a total wreck.

EL DORADO

A/B Halmstad; 1883; *J. L. Thompson & Sons*; 1,519 tons; 259-9x38x14-4; 175 n.h.p.; compound engines. The Swedish steamship *El Dorado* sank on July 15th, 1923, after a collision three and a half miles S.E. by S. of Cross Sand lightship while sailing in ballast from Ghent to Hull.

EL GAMIL

EL GAMIL

The United Storage Navigation & Commercial Co. S.A.E.; 1904; Sunderland S.B.Co.; 1,356 tons; 249x36-5x—; triple-expansion engines.

The Egyptian steamship *El Gamil* sank on October 25th, 1960, in the Red Sea about 30 miles N.N.W. of Abu Ail while sailing from Suez to Aden. Twenty-two lives were lost.

EL GOLEA

Cie. de Nav. Mixte; 1929; Forges & Chantiers de la Mediterranee; 4,840 tons; 369-7x52-6x23-8; turbine engines. Sailing from Port Vendres to Algiers with passengers and general cargo, the French steamship *El Golea* struck rocks at Cala Ratjada, N. Majorca, in bad weather on May 26th, 1931, and broke in two.

EL LAGO

U.S. Maritime Commission; 1920; Downey S.B. Corp.; 4,221 tons; 334 • 6 X 47 • 1 X 23 • 1; 359 n.h.p.; triple-expansion engines. The Panamanian steamship *El Lago* was torpedoed and sunk by a German submarine on October 11th, 1942, six days out from Reykjavik bound to New York. There were no survivors.

EL MADINA

Scindia Steam Nav. Co.; 1937; Barclay, Curie & Co.; 3,962 tons; 359-8x50-2x22; 916 n.h.p.; triple-expansion engines & L.P. turbine. The Indian steamship *El Madina*, sailing from Calcutta to Chittagong with troops, was torpedoed and sunk by a Japanese submarine on March 16th, 1944. Ten of her crew, six gunners and 364 soldiers were lost.

EL OCCIDENTE

U.S. Maritime Commission; 1910; Newport News S.B. & D.D. Co.; 6,008 tons; 405-6x53-1x27-4; 714 n.h.p.; triple-expansion engines. The Panamanian steamship *El Occidente* was torpedoed and sunk by a German submarine on April 13th, 1942, about 200 miles out of Murmansk bound to Iceland and New York. Twenty of her crew of 41 were lost.

EL SONADOR

Cia. de Vap. Primera; 1897; Gourlay Niestern; 1,406 tons; 261-3x33-6x13-9; 202 n.h.p.; triple-expansion engines. The Panamanian steamship *El Sonador*, Capt. Andrepu, left Methil Roads on February 16th, 1940, for Gothenburg with a cargo of coal. She was not heard of again and was thought to have been lost by enemy action on the 17th or 18th.

EL TORO

C. T. Bowring & Co.; 1913; Swan, Hunter & Wigham Richardson; 5,958 tons; 420X54-4X32-2; 513 n.h.p.; triple-expansion engines. The British tanker *El Toro* was wrecked on the Skelligs on January 2nd, 1917, while employed as an Admiralty oiler. She was outward bound from Sabine, Texas.

ELANCHOVE

Cia. Maritima Elanchove; 1902; Northumberland S.B. Co.; 4,524 tons; 351-4x50-8x28-3; 359 n.h.p.; triple-expansion engines. On a voyage from Bilbao to Cardiff with iron ore, the Spanish ship *Elanchove* broke in two and foundered at 11.30 p.m. on October 25th, 1936, in a storm about 150 miles off Bilbao.

ELBA

Leith Hull & Hamburg Steam Packet Co.; 1899; Ramage & Ferguson; 1,081 tons; 225-2x33-5x14-8; 146 n.h.p.; 9 knots; triple-expansion engines. The steamship *Elba* was torpedoed and sunk by a German submarine six miles N.W. by W. of Pendeen Lighthouse, Cornwall, on April 28th, 1918. Ten of her crew were killed. The captain was among the survivors.

ELBE

Norddeutscher Lloyd; 1881; John Elder & Co.; 4,510 tons; 418-2x44-9x35-4; 17-5 knots; compound engines. The liner *Elbe*, Capt. von Gossel, left Bremerhaven at 3 o'clock on the afternoon of Tuesday, January 29th, 1895, bound for New York, and due to call at Southampton for her full complement of passengers. At the moment of sailing she had on board 354 persons, of whom 50 were first and second-class passengers and 149 steerage. Her crew numbered 155, including a Weser pilot and an English pilot. The weather was exceptionally severe, the winter of 1894-95 being distinguished by a blizzard of great intensity throughout Europe. A bitter E.S.E. wind was blowing and there was a heavy sea, but the night was clear, though very dark.

As the ship crossed the North Sea she discharged rockets at intervals, to warn nearby shipping of her presence. At just before 5.30 on the morning of January 30th a small steamship, the *Crathie*, 475 tons, was sighted bearing down upon the *Elbe*, apparently quite unaware of the latter's presence, though all lights were brightly burning. A succession of rockets were discharged by the liner in the hope of causing the oncoming ship to alter course, but in vain. Within a few minutes of being sighted she struck the *Elbe* with terrific force on the port side, abaft the engine room.

The confusion which always attends a collision at night was made worse by the failure of the *Elbe's* electric light, the hundredth frightened passengers and the intense cold. The work of getting away the boats was difficult as the falls of many of them were frozen and had to be chopped through. Shortly before 6 a.m., twenty minutes after the collision, the *Elbe* sank by the stern, taking with her 334 of those on board, and leaving afloat one boat in which were 20 persons, the sole survivors.

This boat, which contained five passengers, one of whom was a woman, and 15 members of the crew, including the third officer, Herr Stollberg, the chief engineer, Herr Neussell and the English pilot Mr. R. Greenham, was picked up at about 11 a.m. by the smack *Wildflower*, Skipper William Wright, the occupants being almost dead from exposure.

Capt. von Gossel was last seen on the bridge and went down with his ship.

Meanwhile the *Crathie*, Capt. A. Gordon, continued on her course. She had her bows stove in down to below the water line and had shipped some water. Those on board were unaware of the devastation they had wrought and believed the other vessel to have continued on her course. In any case the way on both ships soon separated them and the *Crathie* made no attempt to ascertain if her assistance was required, but made for Maassluis, and later for Rotterdam, where she docked. Of her crew of 12 one man was injured.

ELBERFELD

Norddeutscher Lloyd; 1923; J.C. Tecklenborg A.G.; 6,272 tons; 431-1x56-5x30-3; 447n.h.p.; triple-expansion engines. On a voyage from Hamburg to Vladivostok the German ship *Elberfeld* went ashore on November 20th, 1927, at Bajo Aceitera between Cape Trafalgar and Zahara.

ELBING

German Navy, light cruiser; 1914; Schichau; 4,320 tons; 426-5x46x17-7; 27,400 i.h.p.; 27-5 knots; turbine engines; eight 5 • 9 in. guns, four 2-5 in., 2 T.T. The light cruiser *Elbing*, Capt. Madlung, was a unit of the German 2nd Scouting Group at the battle of Jutland. This group was under the direction of Admiral Hipper, commanding the German Battle Cruiser Squadron. The ship was originally built to the order of the Russian government, but was completed for the German navy after the declaration of war.

At 2.38 on the afternoon of May 31st, 1916, the *Elbing* made contact with H.M.S. *Galatea*, flagship of the 1st Light Cruiser Squadron, with which she exchanged salvos. The ship escaped the more serious fighting during the day and it was not until nightfall that she was again engaged, coming within range of a British flotilla which discharged torpedoes at her, but at too great a depth, so that they passed beneath her hull.

At her next encounter she was not so fortunate as she was hit in the wireless room and sustained 18 casualties. Just after midnight, when other British flotillas were pressing home an attack on a German Battle Squadron, the 2nd Scouting Group was compelled

to turn towards their battleships and attempt to run between them, a delicate manoeuvre at the best of times, but doubly hazardous under war conditions. Two ships contrived to get through, but the *Elbing* was rammed on the starboard quarter by the battleship *Posen*. The light cruiser at once began to settle down, and after trying for an hour-and-a-half to navigate her, Capt. Madlung called a destroyer alongside and transferred 477 officers and men, and then with a skeleton crew tried to save his ship. At 3 a.m. British destroyers hove in sight and the German captain exploded charges and sank the *Elbing*, he and his party escaping in the cutter.

Finding himself among a number of sailors from H.M. destroyer *Tipperary*, which had been sunk just previously, Capt. Madlung caused a flare to be burned in order to direct the British ships to the rescue of their drowning countrymen. Considering that he ran great risk of capture this was a most chivalrous action.

The *Elbing's* cutter was later picked up by a Dutch trawler and her party taken to Holland.

ELCANO

Cia. Arrendataria del Monopolio de Petroleo S.A.; 1918; *Vickers*; 5,199 tons; 400x52-4x28-5; 490n.h.p.; triple-expansion engines.

The Spanish steamship *Elcano* was sunk by aircraft at Gijon on August 28th, 1937, during the Spanish Civil War.

ELCANO

La Naviera Filipina; 1938; *Hong Kong & Whampoa Dock Co.*; 1,435 tons; 218-8x38-6x13-5; 213 n.h.p.; oil engines. The Philippine motor vessel *Elcano* was torpedoed and sunk by a Japanese submarine on April 20th, 1942, off Corregidor.

ELDORADO

A. Gray & E. S. Dawes; 1873; *Earles* Co.*; 3,332 tons; 387-3x39-1x19-4; 450 h.p.; compound inverted engines. The British cargo ship *Eldorado* was wrecked on February 11th, 1885, near Peniche while on a voyage from London to Calcutta with a general cargo.

ELEANOR

Eleanor Steamship Co.; 1888; *H. S. Edwards & Sons*; 1,980 tons; 270x36-5x19-7; 186n.h.p.; 8-5 knots; triple-expansion engines.

The steamship *Eleanor* was torpedoed and sunk by a German submarine nine miles W. by S.+S. of St. Catherine's Point on February 12th, 1918. The captain and 34 others were killed.

ELEANOR

Harries Bros. & Co.; 1912; *Antwerp Eng. Co.*; 1,277 tons; 229-5x35-7x14-7; 141 n.h.p.; triple-expansion engines. The British cargo ship *Eleanor* lost her propeller and drifted on to rocks and sank at Godrevy Light on December 22nd, 1922. She was on a voyage from Barry to Portsmouth with a cargo of coal.

ELECTRA

British Navy, destroyer; 1934; *Hawthorn Leslie*; 1,375 tons; 329x33-2x8-5; 36,000s.h.p.; 36 knots; turbine engines; 3-drum boilers; four 4•7in. guns, 6smaller, 8 T.T. The destroyer *Electra*, Cdr. C. W. May, formed part of an Allied force of five cruisers and four destroyers under Rear-Admiral K. Doorman of the Royal Netherlands Navy engaged in resisting a Japanese landing on the island of Java. The first phase of the battle occurred on the afternoon of February 27th, 1942, between the Allies and two Japanese 10,000-ton cruisers, several light cruisers and about dozen destroyers. The Allies suffered heavily, losing two Dutch cruisers and a destroyer, and two British destroyers. In the second phase, which took place on the next night, one British, one Australian and one American cruiser were lost, as well as a British, an American and a Dutch destroyer, thus the entire force was overwhelmed.

The *Electra* was lost on the first afternoon in a hot engagement with three Japanese destroyers of superior weight and armament. Of her complement of about 145 there were 54 survivors, these being picked up on the following day by an American submarine which transferred them to a Dutch minesweeper. They eventually reached Australia in safety.

The full story of the battle is told under the cruiser *De Ruyter*, flagship of Admiral Doorman, which was lost in the first action.

ELEFHERIOS M. TRICOGLU

E. Tricoglu; 1894; *Palmers' Co.*; 2,633 tons; 303x43-1x19-2; 269 n.h.p.; triple-expansion engines.

The Greek steamship *Eleftherios M. Tricoglu* was wrecked on January 29th, 1926, on Aranmore Island, Co. Donegal, on a voyage from Braila to Sligo with a cargo of maize.

ELENA R.

A. Roussos & Co.; 1917; *Newport News S.B. & D.D. Co.*; 4,576 tons; 370 X 53 - 2 X 27; 471 n.h.p.; triple-expansion engines. The Greek steamship *Elena R.* struck a mine and sank on November 22nd, 1939, off the Shambles, on a voyage from Rosario to Antwerp.

ELENI STATHATOU

A. D. Stathatos; 1919; *Northumberland S.B. Co.*; 5,625 tons; 399-6x53x32-8; 517n.h.p.; triple-expansion engines. The Greek steamship *Eleni Stathatou* was torpedoed and sunk by a German submarine on January 28th, 1940, 200 miles W. of the Scilly Isles. Twelve of the crew were killed.

ELEONORA MAERSK

Ministry of War Transport (Athel Line); 1936; *Deutsche Werke*; 10,694 tons; 504-3x68-7x34-1; 1,356 n.h.p.; 12 knots; oil engines.

The Danish tanker *Eleonora Mcersk* was operated by the Athel Line after the German occupation of Denmark in 1940. She was bombed and sunk by German aircraft in Suda Bay, Crete, on May 17th, 1941. Seven of her crew were killed.

ELFI

T. O. Hannevig & Co.; 1908; *Rotterdam Droogdok Maats.*; 1,120 tons; 230-4x34-2x13-8; 147n.h.p.; triple-expansion engines.

The Norwegian steamship *Elfi* was torpedoed and sunk by a German submarine in the North Sea on February 7th, 1918.

ELFRIDA

Pyman, Bell & Co.; 1889; *Osbourne, Graham & Co.*; 2,257 tons; 290X38x20-1; 235 n.h.p.; triple-expansion engines. The British cargo ship *Elfrida* sank after a collision off Flam-borough Head in December, 1906, while on a voyage from Benisaf to the Tyne carrying an ore cargo.

ELGIN

John Warrack & Co.; 1870; *Aitken & Mansel*; 1,430 tons; 247-1x32-5x23-9; 150 h.p.; compound inverted engines. The British cargo ship *Elgin* was wrecked on Bombay Shoal, China Sea, on May 28th, 1881, while on a voyage from Saigon to Hong Kong carrying a cargo of rice, fish and sugar.

ELGINSHIRE

Turnbull, Martin & Co.; 1881; *E. Withy & Co.*; 2,069 tons; 285-5x36x22-7; 200 h.p.; compound engines. The British cargo ship *Elginshire* was wrecked near Vera Cruz on April 22nd, 1890. She was on a voyage from Swansea to Vera Cruz carrying a general cargo.

ELGINSHIRE

Turnbull, Martin & Co.; 1891; *C. S. Swan & Hunter*; 4,579 tons; 364x48•1x25; 450 h.p.; triple-expansion engines. The British cargo ship *Elginshire* was wrecked near Timaru, New Zealand, in March, 1892, while on a voyage from Rockhampton to London. She was carrying a cargo of meat and wool.

ELI

P. Lindoe; 1870; *Bergens Mek. Vcerks.*; 1,107 tons; 229 x 35-2x15-8; 106 n.h.p.; triple-expansion engines.

The Norwegian steamship *Eli* struck a mine and sank in the North Sea on December 25th, 1914.

ELI

Jorgensens Rederi A/S; 1931; *Eriksbergs Mek. Vcerks.*; 4,332 tons; 380-8x54-2x24-5; 474 n.h.p.; oil engines.

The Norwegian motorship *Eli* was bombed and sunk by German aircraft on September 10th, 1940, near Skerkyvore.

ELIAS HOWE

ELIASHOWE

U.S. War Shipping Administration; 1942; Kaiser Co.; 7,176 tons; 422-8x57x34-8; 339 n.h.p.; triple-expansion engines. The American steamship *Elias Howe* was torpedoed and sunk by a submarine in the Gulf of Aden on September 24th, 1943. She was on a voyage from Durban to Aden.

ELIDA

J. Ingmansson; 1889; Campbelltown S.B. Co.; 1,693 tons; 260 X 37 • 2 X16 • 6; 153 n.h.p.; triple-expansion engines. The Swedish steamship *Elida* was torpedoed and sunk by a German submarine in the North Sea on May 2nd, 1915.

ELIE

Chr. Andresen; 1921; Antwerp Eng. Co.; 1,873 tons; 279x 40-2x18-2; 213 n.h.p.; triple-expansion engines. The Danish steamship *Elie* struck a mine and sank on November 24th, 1944, between Rixhoft and Leba.

ELIKON

Achaia S.S. Co.; 1883; Earle's Co.; 1,166 tons; 251'5x32-2x 15-9; 224 n.h.p.; compound engines. The Greek steamship *Elikon* was sunk by a German submarine in the Bay of Biscay on February 1st, 1917.

ELINGAMITE

Huddart Parker & Co.; 1887; C. S. Swan & Hunter; 2,585 tons; 310-5x40-8x19-7; 10 knots; triple-expansion engines. The steamship *Elingamite*, Capt. Attwood, left Sydney for Auckland on November 5th, 1902, with 136 passengers and 59 crew. On the morning of Sunday, November 9th, she ran into thick fog. At the time the ship was within a day's steaming of her destination. She reduced speed to five knots but at about 10.30 a.m. struck the rocks on the middle island of the Three Kings. An order to reverse the engines was acknowledged by the engine room, but the engines were for some unknown reason unable to obey. This failure at a vital moment sealed the vessel's doom and she again swung on to the rocks and sank in 20 minutes.

Five boats and two rafts were launched, one boat capsized but its occupants were rescued by the others. Several of the boats reached Hohura, a small settlement on the mainland, and one raft with 11 persons reached the Great King Island. Another boat came safely ashore on the middle island of the Three Kings. The people from this boat experienced great privation until rescued by H.M.S. *Penquin*, which had been sent to look for survivors.

Altogether 150 persons were collected from various places, including a party originally of 16 who were on a raft, eight having perished in the meantime. One boat was never heard of again.

A Court of Inquiry suspended Capt. Attwood's certificate for 12 months and fined him £50. This decision was reversed many years afterwards when an error of three miles in charting the islands was discovered. The £50 fine was refunded to the captain and he also received compensation.

ELIOFILO

D. & E. Fratelli Bozzo; 1897; Russell & Co.; 3,583 tons; 339-3 x45-9x17-8; 294 n.h.p.; triple-expansion engines. The Italian steamship *Eliofilo* was torpedoed and sunk by a German submarine off the Scilly Isles on June 2nd, 1917.

ELISABETH BORNHOFEN

Robert Bornhofen; 1923; J. Frerichs & Co. A.G.; 2,289 tons; 296-2x42-8x19-6; 185 n.h.p.; triple-expansion engines. The German steamship *Elisabeth Bornhofen* was bombed and sunk by British aircraft on October 4th, 1944, at Bergen.

ELISABETH HENDRIK FISSE

Hendrik Fisser A.G.; 1924; R. Duncan & Co.; 5,145 tons; 403X53X27-8; 410 n.h.p.; triple-expansion engines. The German steamship *Elisabeth Hendrik Fisser* outward bound from Venice, struck a mine and sank on October 18th, 1943, near Dubrovnik.

ELISABETHVILLE

Cie. Beige Maritime du Congo; 1910; A. Stephen & Sons; 7,017 tons; 415x55-2x25-6; 568 n.h.p.; quadruple-expansion engines. The Belgian steamship *Elisabethville* was torpedoed and sunk by a German submarine in the Bay of Biscay on September 6th, 1917.

ELISE SCHULTE

Atlas Reederei A.G.; 1911; Cant. Nav. Riuniti; 5,238 tons; 379X51-3x27-7; 335 n.h.p.; triple-expansion engines. On a voyage from Lulea to Emden with a cargo of ore, the German steamship *Elise Schulte* went ashore on October 8th, 1934, on the Juister Riff and broke amidsthips.

ELISESCHULTE

Atlas Reederei A.G.; 1913; Northumberland S.B. Co.; 4,163 tons; 384-1x52-2x27; 320 n.h.p.; triple-expansion engine^A The German steamship *Elise Schulte* was wrecked near Tromso, North Norway, on January 10th, 1942.

ELIXIR

Thos. Appleby & Co.; 1904; Irvine's S.B. & D.D. Co.; 2,746 tons; 300x44x19-7; 245 n.h.p.; triple-expansion engines. The British steamship *Elixir* was wrecked on October 28th, 1906, at Cape Ballard, N.F.L., while on a voyage from Hamburg to Charleston with a cargo of salt.

ELIZABETH

A.H. Bull's S.Co.; 1918; Standard Shipbuilding Corp.; 4,727 tons; 377x52x26-8; 1,650i.h.p.; 11 knots; triple-expansion engines.

The steamship *Elizabeth*, Capt. W. G. Hudgins, was torpedoed and sunk by a German submarine off the coast of Cuba on May 20th, 1942. Six of her crew were killed. Capt. Hudgins was among the survivors. The vessel was not in convoy at the time.

ELIZABETHIV

1911; W. Doxford & Sons; 7,395 tons; 445x60x29-2; 412 n.h.p.; triple-expansion engines.

The Norwegian steamship *Elizabeth IV*, formerly named *Tellus*, was sunk by a submarine in the Mediterranean on September 8th, 1916.

ELIZABETH JENKINS

1862; Yarmouth, N.S.; 667 tons; 141-8x29-8x18. The Canadian wooden barque *Elizabeth Jenkins* was sunk by collision in the English Channel in November, 1866, with the loss of ten lives.

ELIZABETH KELLOGG

Kellogg S.S. Corp.; 1920; Terry S.B. Corp.; 5,190 tons; 391-9X 51x28-5; 550 n.h.p.; triple-expansion engines. The American tanker *Elizabeth Kellogg* was torpedoed and sunk by a German submarine on November 23rd, 1943, soon after leaving Cristobal for Puerto Barrios with fuel oil. Eight of her crew and two gunners were lost.

ELKA

J. Charopoulos; 1881; T. Turnbull & Son; 2,128 tons; 281 -2X 38x23-8; 220 n.h.p.; triple-expansion engines. The Greek steamship *Elka* was torpedoed and sunk by a submarine in the Mediterranean on April 19th, 1918.

ELKTON

U.S. Shipping Board (operated by Lykes Bros.); 1919; Skinner & Eddy Corp.; 6,18 tons; 402-6x54-8x32-1; 359n.h.p.; triple-expansion engines.

Sailing from Shanghai on December 30th, 1926, and Iloilo on February 9th, 1927, for New York with a cargo of sugar and coconut oil, the *Elkton* is believed to have foundered in about lat.14°N., long.136°E.

ELLA

German Government; 1904; Helsingors Jernsk. & Maskin.; 1,522 tons; 249-1x37-5x15-9; 169n.h.p.; triple-expansion engines.

The steamship *Ella* was formerly Estonian, seized by the Germans. She was sunk by the Russians in July, 1941, N. of Juminda, Gulf of Finland.

ELLASAYER

Fisher, Renwick & Co.; 1883; Doxford & Sons; 1,744 tons; 258x37x16-7; 200n.h.p.; compound engines. The British cargo ship *Ella Sayer* was wrecked on September 1st, 1897, about seven miles north of Scarborough while on a voyage from Kotka to Hull with a cargo of pit props.

ELLAN VANNIN

Isle of Man Steam Packet Co.; 1860; Tod & McGregor; 380 tons; 198-6x22-2x10-7; 600 i.h.p.; 12 knots; compound engines.

The steamship *Ellan Vannin* was an old ship and well known to all Isle of Man visitors. Built in 1860 as a paddle steamer and named *Monads Isle*, she was converted to twin screw in 1883 and renamed *Ellan Vannin*. On December 3rd, 1909, she left Ramsey, Lo.M., for Liverpool, having on board 14 passengers and a crew of 21, under command of Capt. James Teare. The weather was very wild and on approaching the mouth of the Mersey the ship was overwhelmed by the seas and foundered with all on board.

ELLEN

J. Render son; 1865; J.&S. W.Olive; 499 tons; 135-1x30-2x17-7.

The Australian barque *Ellen* foundered in a S.E. gale off the Seal Rocks, just N. of Newcastle, N.S.W., on June 11th, 1891. There was only one survivor.

ELLEN JAMES

J. Jones & Co.; 1904; D. Williams & Co.; 165 tons; 101-4x23-7x11-9.

The three-masted schooner *Ellen James* was intercepted by a German submarine in the Bay of Biscay on April 3rd, 1917. The submarine opened fire from the surface and sank the schooner. Five of her crew, including the captain were killed.

ELLENIA

D. Tripovich & Ci.; 1900; Northumberland S.B. Co.; 4,580 tons; 360x48x20•1; 356n.h.p.; triple-expansion engines. Sailing from Hampton Roads to London with a cargo of coal, the Italian ship *Ellenia* was in collision on September 15th, 1926, and sank on the next day in lat. 49° 50' N., long. 11° 37' W.

ELLERBECK

Sharp & Co.; 1910; Blyth S.B. & D.D. Co.; 1,499 tons; 245X 36-7x16-3; 224n.h.p.; triple-expansion engines. The British cargo ship *Ellerbeck* was wrecked on Flats and Barrels Rock on August 15th, 1914, while on a voyage from Barry to Pentland carrying a cargo of coal.

ELLERSLIE

Hansen Bros.; 1906; J. Readhead & Sons; 3,854 tons; 346 x 49-5x26-5; 334n.h.p.; triple-expansion engines. The British ship *Ellerslie* was wrecked on Michel Reef, Mozambique, on October 20th, 1917, while employed as an Admiralty collier. She was on a voyage from Cardiff and Durban to Zanzibar carrying a cargo of coal and Government stores.

ELLEWOUTSDIJK

Solleveld, van der Meer & T. H. van Hatturfs Stoomvaart Maats.; 1906; Scheepswerf Voor Jan Smit, Czn.; 2,229 tons; 303-6X 43•1x20; 226n.h.p.; triple-expansion engines. The Dutch steamship *Ellewoutsdijk* struck a mine and sank in the North Sea on December 30th, 1915.

ELLIDA

A. Halvorsen; 1901; Bergen Mek. Verksted; 1,124 tons; 228-5 x 35-4x15-9; 101n.h.p.; triple-expansion engines. The Norwegian steamship *Ellida* was torpedoed and sunk by a German submarine in the North Sea on April 19th, 1917.

ELLIMINA

E. Goumas; 1922; Stettiner Oderwerke A.G.; 1,055 tons; 223X 33-9X —; triple-expansion engines.

The Greek ship *Ellimina* struck rocks and sank on August 20th, 1960, about four miles N.W. of Telos Island. She was on a voyage from Thessaloniki to Port Said with a cargo of iron ore.

ELLINICO

Sardi, Andreadaki & Stavridi; 1904; Grangemouth & Greenock Dockyard Co.; 3,059 tons; 331x48x22; 285n.h.p.; triple-expansion engines.

The Greek steamship *Ellinico* left the River Mersey on June 14th, 1941, for Wabana and was not heard of again. She was thought to have been sunk by a submarine about 500 miles S.S.W. of Cape Farewell.

ELLISPONTOS

Embiricos Bros.; 1906; Campbeltown S.B. Co.; 2,989 tons; 331-5x45-5x22-1; 287n.h.p.; triple-expansion engines. The Greek steamship *Ellispontos* was torpedoed and sunk by a German submarine in the North Sea on April 17th, 1915.

ELM GROVE

J. Leddra; 1863; Arbroath S.B. Co.; 255 tons; 109x24-5x14-5. The barque *Elm Grove* of Sydney, N.S.W., was* engaged in the Australian coasting trade. On September 8th, 1876, when on a voyage from Newcastle, N.S.W., to Adelaide, the barque was wrecked on Five Mile Beach. Eight of the crew were lost.

ELMCREST

Crest Shipping Co.; 1911; W. Dobson & Co.; 4,343 tons; 378x53-5x24-4; 342n.h.p.; triple-expansion engines. The British steamship *Elmcrest* was torpedoed and sunk by a German mo tor torpedo boat on July 4th, 1940, on a voyage from Hull to Wabana. Sixteen of her crew of 38 were lost.

ELMDALE

Morrison S.S. Co.; 1941; Burntisland Shipbuilding Co.; 4,872 tons; 424-2x57x25-8; 451 n.h.p.; 10-5 knots; triple-expansion engines.

The steamship *Elmdale*, Capt. D. McPhee, Baltimore for Alexandria, was torpedoed by a German submarine on November 1st, 1942, in lat. 0° 18'N., long. 34° 55'W. The vessel sank in seven minutes. Six of her crew were killed. Capt. McPhee was among the 36 survivors landed at Fortaleza.

ELMETE

Pyman Bros.; 1891; W. Gray & Co.; 1,991 tons; 277-4x38-1 x 17-6; 160 h.p.; triple-expansion engines.

The British cargo ship *Elmete* was wrecked at Abrolhos, Brazil, on February 5th, 1895, while on a voyage from Buenos Aires to Antwerp. She was carrying a cargo of wool, grain and sheep.

ELNA

United States Government; 1924; Hanlon D.D. & S.B. Co.; 1,435 tons; 240x40x15; 188 n.h.p.; triple-expansion engines. The *Etna* was taken over by the U.S. Army during the Second World War and was lost owing to marine causes off Rattray Head on December 27th, 1943.

ELNAE.

D/SA/SForto; 1925; Laxevaags Mask. & Jernskibs.; 1,174 tons; 230X36-5x14-8; 101 n.h.p.; triple-expansion engines. The Norwegian steamship *Etna E.* struck a mine and sank on March 16th, 1941, near Crackington Haven.

ELOBY

British & African Steam Nav. Co.; 1913; Irvine's Shipbuilding Co.; 6,545 tons; 405x54-1x32-6; 577n.h.p.; 12 knots; triple-expansion engines.

The liner *Eloby* was torpedoed and sunk by a German submarine 75 miles S.E. by E. of Malta on July 19th, 1917. The captain and 55 of her crew were killed.

ELPS

Hellenic Co. of Maritime Enterprises; 1879; A. Leslie & Co.; 1,481 tons; 260x34-2x23-3; 167 n.h.p.; compound engines. The Greek steamship *Elpis* foundered on April 22nd, 1921, 23 miles N.W. of Acre, Palestine.

ELPIS

A.Basilis; 1901; W. Gray & Co.; 3,433 tons; 331x47-2x24-8; 285 n.h.p.; triple-expansion engines. The Greek steamship *Elpis* went ashore on November 12th, 1921, in the Balearic Islands while on a voyage from Blyth to Odessa with a cargo of coal.

ELSA

K.S.Petersen; 1876; G.W.Russell; 1,236 tons; 190-5x37-1X 22-1. The Danish sailing vessel *Elsa* was torpedoed and sunk by a German submarine off the south coast of Ireland on September 9th, 1917.

ELSA

W. Wilhelmsen & Fearnley & Eger; 1904; Tyne Iron S.B. Co.; 3,581 tons; 335x48-1x25-5; 292 n.h.p.; triple-expansion engines. The Norwegian steamship *Elsa* was torpedoed and sunk by a German submarine in the English Channel on January 24th, 1918.

ELSDON

Sharp Steamship Co.; 1914; Blyth Shipbuilding & Dry Dock Co.; 1,522 tons; 245x37-3x16-4; 224 n.h.p.; 10-5 knots; triple-expansion engines. The steamship *Elsdon*, Capt. R. W. Milburn, left Hull with 1,979 tons of coal for Odense on December 18th, 1925. She carried a crew of 17. Nothing more was heard of her after the pilot was dropped off the Humber at 11.20 p.m. until the 29th, when a lifeboat bearing her name and containing the body of a man was picked up by Danish fishermen 22 miles W.S.W. of Thyboron Canal, Jutland. On January 8th, 1926, another of her lifeboats was found off Torungen Light on the S.E. coast of Norway.

From reports of captains crossing the North Sea on the night of December 19th-20th it was ascertained that the weather was rough with heavy cross seas, snow squalls and patches of fog.

ELSE

O/YElse(A. K. Seppinen); 1900; Niiscke & Co.; 1,360 tons; 248-3x37-4x16; 104 n.h.p.; triple-expansion engines. The Finnish steamship *Else* struck a mine and sank on August 27th, 1942, near Samso Island, Denmark.

ELSEMARIE

A/S Schanches Rederi; 1917; Superior S.B. Co.; 1,885 tons; 251-1x43-8x18-2; 266 n.h.p.; triple-expansion engines. The Norwegian steamship *Else Marie*, under German control, was bombed and sunk by Russian aircraft on July 7th, 1942, near Vardo. Thirteen of her crew were killed.

ELSIE

Rederi A/B Fram; 1882; J. Readhead & Co.; 1,410 tons; 259-1 x 36-1x16-3; 135 n.h.p.; compound engines. On a voyage from Viipuri to Zaandam with a cargo of timber the Finnish ship *Elsie* went ashore on November 12th, 1939, on the North Grounds of Terschelling Island and broke her back.

ELSTREE GRANGE

Houlder Bros. & Co.; 1916; Sir R. Dixon & Co.; 6,598 tons; 420 X 5 3-5 X 3 6-6; 790 n.h.p.; 11 knots; triple-expansion engines. The steamship *Elstree Grange*, Capt. A. G. Ablett, was lying in Liverpool Docks on May 3rd, 1941, having just discharged her cargo, when the area was subjected to a very heavy air raid. The vessel was hit amidships by a parachute mine and completely wrecked. The ammunition store also exploded causing further havoc. Of those on board at the time seven men were killed. Seaman George Wheeler rescued two badly wounded men and was later awarded the George Medal.

ELTERWATER

Sharp S.S. Co.; 1907; Blyth S.B. Co.; 1,228 tons; 235x33-5x 15; 166 n.h.p.; triple-expansion engines. The British ship *Elterwater* hit a mine and sank on December 16th, 1914, three miles east of Scarborough. Six of the crew were lost.

ELUSA

N.V. Petroleum Maats. "La Corona"; 1936; Wilton-Fijenoord; 6,236 tons; 428-1x54-5x30-9; 377 n.h.p.; oil engines. The Dutch motor tanker *Elusa*, loaded with diesel oil, was torpedoed in the North Atlantic by a German submarine on May 21st, 1941, and caught fire and sank. Three lives were lost.

ELVE

P. A. van Es & Co.; 1916; Fijenoord; 889 tons; 222x34-4x 15-2; 127 n.h.p.; triple-expansion engines. The Dutch steamship *Elve* was bound from Oporto to London on October 9th, 1917, when she was torpedoed and sunk by the German submarine *U-72*. The attack took place off the north coast of Scotland. The steamship, which was sailing under the British flag at the time, sank with the loss of 31 lives.

ELVIRA

Luis Liano; 1885; Tyne Iron S.B. Co.; 1,114 tons; 209-6X 30-2x13-5; 123 n.h.p.; triple-expansion engines. The Spanish steamship *Elvira* was wrecked on December 18th, 1922, at the entrance to Rivasdella while on a voyage from Bilbao in ballast.

ELY

Chr. Andresen; 1888; W. Gray & Co.; 1,747 tons; 260x36-7x 18-2; 156 n.h.p.; triple-expansion engines. The Danish steamship *Ely* struck a mine and sank in the Baltic Sea on May 27th, 1915.

EMANUELE PESSAGNO

Italian Navy, destroyer; 1930; Cantieri Navali Riuniti; 1,628 tons; 352x33-5x16-7; 50,000 s.h.p.; 38 knots; turbine engines; Odero boilers; six 4-7 in. guns, four 37 mm.A.A., eight 13 mm. A.A., 4 T.T. The Italian destroyer *Emanuele Pessagno* was torpedoed and sunk by a British submarine 70 miles N.W. of Benghazi on May 29th, 1942. The vessel carried a complement of about 200.

EMBASSAGE

Hall Bros. Steamship Co.; 1935; J. L. Thompson & Sons; 4,954 tons; 409-2x57-6x24; 1,700 i.h.p.; 10 knots; triple-expansion engines. The steamship *Embassage*, Capt. W. E. Kiddie, was torpedoed and sunk by a German submarine on August 27th, 1941, 100 miles W. of Achill Head, Co. Mayo, on a voyage from Leith to Pepel. Capt. Kiddie and 38 men were killed. The boatswain and two seamen clung to an upturned boat and were rescued after three and a half days adrift. They were the only survivors.

EMBRICOS NICOLAOS

Geo. Nic. Embiricos; 1918; J. Priestman & Co.; 3,798 tons; 365 x 51-5 x 22-1; 384 n.h.p.; triple-expansion engines. The Greek steamship *Embricos Nicolaos* was bombed and sunk by German aircraft on March 22nd, 1941, off Gavros on a voyage from Piraeus to Port Said.

EMBLA

Stockholms Rederiaktieb. Svea; 1908; Lindholmens V.A.; 1,040 tons; 227-2x33-6x14-1; 83 n.h.p.; triple-expansion engines. The Swedish steamship *Embla* was bombed and set on fire by German aircraft on April 6th, 1944, in the Gulf of Lyons. She reached Port Vendres still burning and was repaired. Soon after leaving port, on the 19th, she was again bombed and sank.

EMDEN

German Navy, light cruiser; 1908; Danziger Schiffswerft; 3,593 tons; 387X43-5X17-7; 13,500 i.h.p.; 25-1 knots; triple-expansion engines; Schulz-Thorny croft boilers; ten 4-1 in. guns, nine 5 pdr., 4 m.g., 2 T.T.

The light cruiser *Emden*, Capt. K. von Muller, was one of the German East Asiatic Squadron, all the ships of which were destined to become famous before their final destruction in battle. Towards the end of July 1914 the ship was lying at the German naval base of Tsingtau, China. On the outbreak of war a conference of all the captains under command of Admiral Graf von Spee was held at Pagan Island, where the vessels of the squadron had gathered. It was decided to make for South America, but Capt. von Muller, an officer of exceptional ability, suggested that his fast ship *Emden* should be given permission to enter the Indian Ocean and conduct commerce raiding operations on her own. The admiral concurred and the *Emden*, with the supply ship *Markomannia* was detached from the squadron and at once proceeded to the Indian Ocean.

The first act of the raider was to step a dummy funnel, making four in imitation of the ships of the British 'county' class. This done the ship kept a sharp look out for merchantmen, particularly colliers as she would soon be in need of large supplies of coal. From the commencement she was fortunate, sighting the Greek steamship *Pontoporos* on September 8th, with 6,000 tons of coal for the British government at Bengal. The coal was seized as contraband and the Greek ship ordered to accompany the *Emden*. Within the course of the next few months the raider captured the following merchant ships:—

Indus, 3,413 tons; *Kabinga*, 4,657 tons; *Lovat*, 6,102 tons; *Diplomat*, 7,615 tons; *Trabboch*, 4,028 tons; *Killin*, 3,544 tons; *Clan Matheson*, 4,775 tons; *King Lud*, 3,650 tons; *Gryfevale*, 4,437 tons; *Buresk*, 4,350 tons; *Ribera*, 3,500 tons; *Foyle*, 4,147 tons; *Tymeric*, 3,314 tons; *Clan Grant*, 3,908 tons; *Ponrabble*, 473 tons; *Ben Mohr*, 4,806 tons; *St. Egbert*, 5,596 tons; *Chilkana*, 5,220 tons; *Troilus*, 7,562 tons; *Exford*, 4,542 tons.

The passengers and crews of these vessels were treated with the greatest consideration by Capt. von Muller who maintained the most chivalrous traditions of the sea. Of the steamships listed above, the *Kabinga* and *Gryfevale* were spared to convey the prisoners to neutral ports and the other ships were sunk.

On September 22nd at 9.30 p.m. the *Emden* appeared off Madras which she shelled for a short time, setting fire to the storage tanks of the Burma Oil Company. She fired about 40 shells which, in addition to destroying two or three tanks also killed 16 persons and wounded three others.

On October 28th, just before dawn, the *Emden* steamed into Penang where the Russian light cruiser *Jemtschug* (which see) lay at anchor with a French destroyer which was undergoing boiler repairs. The German cruiser, flying the Japanese flag was first mistaken for British and then for Japanese until too late. She succeeded in torpedoing the *Jemtschug*, which sank immediately. The destroyer was shelled to pieces and on coming out of harbour the *Emden* encountered another French destroyer, the *Mosquet* (which see). This little vessel made a most plucky attack on the raider but was soon sunk. The *Emden*, at risk of capture, hove to and rescued 36 men, three of whom died later.

The end was now drawing near. Early in the morning of November 9th the raider arrived off Cocos (Keeling) Island and sent an officer and 48 men armed with four machine-guns and 30 rifles to destroy the wireless equipment and cables of the Eastern Telegraph Company. An "S.O.S. *Emden* here" was sent off before the raider's wireless was able to jam. It reached a convoy some 60 miles distant consisting of the Australian cruisers *Melbourne* and *Sydney*, with a number of transports. Capt. Silver of H.M.A.S. *Melbourne*, in command of the convoy, at once detached the *Sydney*, Capt. J. C. T. Glossop, to engage the *Emden*.

The message reached the convoy at 6.30 a.m. and at 9.40 a.m. the first shot, fired by the *Emden*, began the fight. The Germans were at the time under the impression that they had encountered the light cruiser *Newcastle*, a vessel for which they thought themselves more than a match. They soon discovered their mistake and although they fired rapidly and accurately the superior weight of metal and the expert manoeuvring of the *Sydney* began to tell against them. The German's foremast and three funnels were shot away, her decks were a shambles and she was heavily on fire. In this

condition she was driven ashore at North Keeling at 11.20 a.m. The *Sydney* then went in pursuit of the captured British collier, *Buresk*, which was sunk by her prize crew at 12.10 p.m. The *Sydney* lowered two boats to pick up survivors, took on board 37 persons, of whom 16 were the German prize crew, and, leaving boats behind, to look for others, steamed back to the wreck. The *Emden* still flew her flag which she refused to haul down until fired upon, when a man was sent aloft to remove it.

The ships engaged are here compared, together with the losses sustained by each:

Emden, 3,593 tons, ten 4-1 in. guns, Seven officers, 108 men killed, Three officers, 53 men wounded. One hundred and fifty-five unwounded prisoners.

Of the wounded one officer and three men died later. Capt. von Muller escaped uninjured.

Sydney, 5,600 tons, eight 6 in. guns.
Four killed, 12 wounded.

The German crew were interned in Australia until the end of the war.

An interesting sequel was the voyage of the landing party left behind when the fight commenced. Lt. von Mucke in charge of this seized an old three-masted schooner, the *Ayasha*, of 70 tons. He hurriedly provisioned her and after thoroughly destroying the cable station set off with his crew for Padang, Sumatra, which he reached after a voyage of 16 days. Here he added four Germans who desired to get home to serve the Fatherland and then steered for the Gulf of Aden, being overtaken by the German collier *Choising* from Padang. The *Ayasha* was then scuttled and von Mucke and his men voyaged on the collier to Hodeidah, on the coast of Arabia, where they landed with their machine-guns and rifles. After many adventures they reached Constantinople, having lost one man by typhus and three in fights with the Arabs on the journey.

EMDEN

German Navy; 1925; Wilhelmshaven; 5,400 tons; 493-5x47x 17-5; 46,500 h.p.; 29 knots; turbine engines; eight 5-9 in. guns, three 3•5 in., 4 m.g., 4 T.T.

The German light cruiser *Emden* had seen more than 14 years service at the outbreak of the Second World War, when she was serving as a training ship for officer cadets. In the first fortnight of the war, when lying at Wilhelmshaven, she was bombed and damaged by British aircraft. She was repaired and later took part in the invasion of Norway.

As a light, fast vessel, which might have been used to advantage on the high seas, the *Emden* did little to emulate her famous fore-runner, and her record was uneventful. On April 9th, 1945, she was lying in Kiel harbour when she was attacked by British bombers and heavily damaged. On the 13th she was attacked again and although she remained afloat was wrecked beyond repair. On May 3rd the naval authorities gave orders for her to be scuttled.

EMIDIO

Socony-Vacuum Oil Co.; 1921; Bethlehem Shipbuilding Corp.; 6,912 tons; 435x56-2x33-5; 2,600 i.h.p.; 10-5 knots; triple-expansion engines.

The American tanker *Emidio*, Capt. Clark A. Barrow, was torpedoed, shelled and sunk by a Japanese submarine 20 miles W. of Blunt's Reef, California, on December 20th, 1941. Five of her crew were killed and five wounded. Capt. Barrow was among the survivors.

EMILE FRANCOU

Cie. Maritime Beige (Lloyd Royal) S.A.; 1929; Flensburger Schiffsb. Ges.; 5,859 tons; 443-7x57-2x26-7; 383n.h.p.; quadruple-expansion engines.

The Belgian steamship *Emile Francqui* was torpedoed and sunk by a German submarine on December 16th, 1942, about 800 miles W. of Ushant on a voyage from Liverpool to St. John, N.B. Forty-six lives were lost.

EMILE MIGUET

Cie. Navale des Petroles; 1937; Atel. & Chant, de France; 14,115 tons; 546-1x73-8x40-1; 982 n.h.p.; oilengines. The French motor tanker *Emile Miguet*, on a voyage from Corpus Christi to Havre, was torpedoed, set on fire and sunk by a German submarine on October 13th, 1939. Two lives were lost.

EMILIE

EMILIE

A. Richaud; 1875; Charland; 729 tons; 163-2x32-8x19-1. The wooden barque *Emilie*, Capt. G. L. Small, was formerly the *Arabella*. On March 26th, 1890, she sailed from Bluff, South Island, New Zealand, for Port Pirie, South Australia, with a cargo of sawn timber. On the following day she encountered a hurricane and started a leak. She became waterlogged and did not answer to her helm. Under these circumstances the captain gave orders to abandon ship, and one boat containing nine men was in the act of putting off when it was struck by a falling mast and smashed. Only one of its occupants regained the ship which had now rolled over on to her side. All her masts had gone and, after some lapse of time she righted herself and continued to drift for five days, eventually going ashore at Red Head, Stewart Island, on March 31st.

Four survivors, including the mate who was fatally injured, managed to reach shore where they remained for seven days, subsisting on shellfish and a dead seal. They were found by a party of mutton-birders and taken on board the tug *Awarua*, which landed them at Bluff on April 14th. The mate, John Brownrigg, died in hospital shortly afterwards.

EMILIE MAERSK

Dampskibsselsk. af 1912; 1922; Odense Staalskibsværft; 2,212 tons; 284-9x42-4x19-9; triple-expansion engines & L.P. turbine.

The Danish steamship *Emilie Maersk* went aground on January 14th, 1941, near Borkum and at some time between that date and February 5th, she foundered off Borkum Island. A life raft was recovered.

EMILIO MORANDI

Federazione Italiana del Consorzi Agrari; 1904; Howaldts-werke; 1,523 tons; 246x36x13-2; 117n.h.p.; triple-expansion engines.

The Italian steamship *Emilio Morandi* was torpedoed and sunk by a British submarine on January 9th, 1943, N.E. of Kuriat, Tunisia.

EMILY REED

Emily Reed Ship Co.; 1880; A. R. Reed; 1,565 tons; 215x40-6x24-1.

The American sailing ship *Emily Reed* was bound from Newcastle, N.S.W., to Portland, Oregon. She had almost reached the end of her voyage when she was wrecked at the mouth of the Neghalem River on February 14th, 1908. Ten of the crew were drowned and six saved.

EMIR

Compagnie de Navigation Mixte; 1882; Wigham Richardson & Co.; 1,291 tons; 246x31-7x23-6; 12 knots; compound engines.

The French passenger steamship *Emir* left Gibraltar for Oran on August 8th, 1911, with 113 persons all told, most of the passengers being Moors and the remainder French. Shortly after leaving, the steamship ran into fog and at 4 o'clock on the following morning, when five miles E. of Tarifa, she came into collision with the s.s. *Silver ton*, 2,682 tons, Newport, Mon., to Taranto with 4,000 tons of coal. The *Emir* was so badly damaged that she sank in deep water in a very few minutes taking with her 86 of those on board. The remaining 27, including all the crew, were picked up by the boats of the *Silver ton*.

EMILYNMOR

Emlyn Line; 1919; Smith's Dock Co.; 606 tons; 170x30x15-7; 94n.h.p.; 9 knots; triple-expansion engines. The steamship

Emlynmor, Capt. T. Butler, left Middlesbrough for Pembroke Dock at 3 p.m. on October 22nd, 1927, with a cargo of iron plates and angles. She carried a crew of 13. Weather conditions were ordinary for the time of the year and the ship signalled Dungeness at 8.45 p.m. on the 24th in fine and clear weather. She was then proceeding at a speed of 5.5 knots which would have brought her near the Wolf Rock Light by midnight on the 26th, and it is presumed that she foundered somewhere in this neighbourhood with all hands.

The *Emlynmor* was a converted submarine chaser.

EMMA

Worms etde.; 1892; A. McMillan & Son; 1,617 tons; 255 X 35-5x22; 189 n.h.p.; 10 knots; triple-expansion engines. The French steamship *Emma*, in ballast, was bound from Dunkirk to Bordeaux when she was torpedoed by a German submarine off Beachy Head at about 4.30 on the afternoon of Wednesday, March 31st, 1915. She was hit on the starboard side just abaft the engine room and sank in three minutes. Of her crew of 21 only two were saved, being picked up by a British destroyer after they had been in the water for one and a half hours.

EMMA

A. Zanchi; 1942; Italy; 7,931 tons; oil engines. The Italian motorship *Emma* was torpedoed and sunk by a British submarine on January 16th, 1943, about four miles S. of Ischia.

EMMA BAKKE

Skibs A/S Hilda Knudsen; 1929; Kockums Mek. Verks.; 4,721 tons; 397 x 54 • 7 x 24 • 9; oil engines. The Norwegian motorship *Emma Bakke* caught fire after an explosion on October 9th, 1954, about 250 miles W. of Casablanca. She was abandoned and 40 crew and nine passengers were picked up by the s.s. *Corrientes*. The *Emma Bakke* sank within the next two days. She was on a voyage from Philadelphia to Istanbul.

EMMA L. OULTON

Canadian; 1871; Sackville, N.B.; 660 tons; 145x29x18 (approx.).

The Canadian wooden barque *Emma L. Oulton* was overwhelmed by bad weather in the North Atlantic in March, 1876. The crew abandoned ship. One boat with five men was picked up.

EMMONS

United States Navy, fleet minesweeper; 1941; Bath Ironworks; 1,630 tons; 348-3x36x10-2; 50,000 s.h.p.; 36-5 knots; turbine engines; four 5 in. guns, four 40mm, four 20mm. The United States fleet minesweeper *Emmons* was formerly a destroyer. On April 6th, 1945, she was sunk off Okinawa by Japanese bombers. The vessel carried a complement of 210.

EMPEROR

Canada S.S. Lines; 1910; Collingwood S.B. Co.; 7,031 tons; 525 x 56 • 1 x 27; triple-expansion engines.

The British cargo ship *Emperor* was wrecked on Canoe Rocks off Isle Royale, Lake Superior, on June 4th, 1947, while on a voyage from Port Arthur, Ontario, to Ashtabula, Ohio, with a cargo of iron ore. Fourteen lives were lost.

EMPIRE ACTIVITY

Ministry of War Transport (Galbraith, Pembroke & Co.); 1919; Swan, Hunter & Wigham Richardson; 5,329 tons; 400 • 3x52-4X 28-4; 517 n.h.p.; triple-expansion engines.

The British cargo ship *Empire Activity* was wrecked one-and-a-half miles south-east of Peckford Reef on October 3rd, 1943, while on a voyage from Botwood to the United Kingdom with a cargo of zinc concentrates.

EMPIRE ADVENTURE

Ministry of Shipping (Runciman Shipping Co.); 1921; Northumberland S.B. Co.; 5,145 tons; 375x51-2x31-7; 370 n.h.p.; triple-expansion engines.

The steamship *Empire Adventure* was torpedoed and sunk by a German submarine on September 20th, 1940, on a voyage from the Tyne to Wabana, N.F.L. Twenty-one of her crew of 39 were lost.

EMPIRE AIRMAN

Ministry of Shipping (M. Whitwill & Son); 1915; Stabilimento Tecnico; 6,586 tons; 449-8x55-6x34-1; 369 n.h.p.; triple-expansion engines.

The steamship *Empire Airman* was torpedoed and sunk by a German submarine on September 21st, 1940, 350 miles W. of Maim Head on a voyage from Wabana, N.F.L. to Cardiff. Twenty-nine of her crew were lost.

EMPIRE AMETHYST

Ministry of War Transport (Hadley Shipping Co.); 1941; Furness S.B. Co.; 8,032 tons; 463-5x61-2x33; 674 n.h.p.; triple-expansion engines.

The British cargo ship *Empire Amethyst* was lost without trace after sailing from New Orleans on April 6th, 1942, on a voyage to Free-town with a crew of 47, including six gunners. She was last seen at 8.15 a.m. on the 12th, 150 miles S. of Haiti, and was considered to have been sunk by a submarine on about the 14th.

EMPIRE ARNOLD

Ministry of War Transport (Sir R. Ropner & Co.); 1941; W. Gray & Co.; 7,045 tons; 431-5x56-2x35-2; 11-5 knots; triple-expansion engines.

The steamship *Empire Arnold*, Capt. Tate, with a general cargo was 500 miles E. of Trinidad on August 4th, 1942, when she was torpedoed and sunk by a German submarine. Three officers and six men were killed. Capt. Tate and one other were taken prisoner.

EMPIRE ATTENDANT

Ministry of War Transport (Andrew Weir & Co.); 1921; Barclay Curie & Co.; 7,524 tons; 450x58-3x32-9; 1,085 n.h.p.; 13 knots; triple-expansion engines.

On July 15th, 1942, the steamship *Empire Attendant* was off the coast of Rio de Oro, West Africa, when she was torpedoed and sunk by a German submarine. She carried a crew of 59, none of whom was ever heard of again.

EMPIRE BARRACUDA

Ministry of War Transport (Stanhope S.S. Co.); 1919; American International S.B. Corp.; 4,972 tons; 391-9x54-2x28; 660 n.h.p.; turbine engines.

The steamship *Empire Barracuda* was torpedoed and sunk by a German submarine on December 15th, 1941, about 250 miles out from Gibraltar, with the loss of 12 lives.

EMPIRE BEAUMONT

Ministry of War Transport (W. Runciman & Co); 1942; Furness S.B. Co.; 7,044 tons; 431-3x56-2x35-2; triple-expansion engines.

The steamship *Empire Beaumont* was torpedoed and sunk by German aircraft on September 13th, 1942, about 200 miles S. of Spitsbergen on a voyage from the Clyde to North Russia. Four of her crew, one gunner and one passenger were killed.

EMPIRE BELL

Ministry of War Transport (J. Westoll); 1930; Nya Varvs A/B; 1,744 tons; 286-5x40-2x16-7; 124 n.h.p.; compound engines.

The steamship *Empire Bell* was torpedoed and sunk by a German submarine on September 25th, 1942, on a voyage from the Tyne to Reykjavik. The ship sank in four minutes, with the loss of ten lives.

EMPIRE BISON

Ministry of War Transport (Ropner Shipping Co); 1919; South Western Shipbuilding Co.; 5,612 tons; 410-5x54-3x27-2; 359 n.h.p.; 10 knots; triple-expansion engines.

The steamship *Empire Bison*, Capt. W. H. Harland, was in the North Atlantic on November 1st, 1940, when she was torpedoed and sunk by a German submarine. At the time of her loss she was carrying as passengers seven ratings from the auxiliary cruiser *Rajputana*. Capt. Harland and 37 others were killed. The second officer, Mr. Carlton and three others, spent eight and a half days adrift on a raft before being rescued.

EMPIRE BLANDA

Ministry of War Transport (Larrinaga Steamship Co); 1919; Lithgows Ltd.; 5,693 tons; 423-5x56x28-7; 548n.h.p.; 12 knots; triple-expansion engines.

The steamship *Empire Blanda*, Capt. George A. Duncan, was formerly the Hamburg-Sudamerika *Rio Grande* which became a prize of war. She was lost without trace after sailing from Halifax, N.S., on February 3rd, 1941, on a voyage to Grangemouth with a cargo of scrap iron and steel. She was last sighted on February 9th, and was carrying a crew of 40.

A German broadcast on October 7th, 1942, claimed that she was sunk by a submarine about 300 miles E.S.E. of Cape Farewell.

EMPIRE BRIGADE

Ministry of War Transport (Cairns, Noble & Co); 1912; J. Priestman & Co.; 5,154 tons; 400x53-5x26-6; 440n.h.p.; 12 knots; triple-expansion engines.

The steamship *Empire Brigade*, Capt. S. W. Parks, was formerly the Italian *Elios* of the Lauro Line which had been taken over as a prize of war by the Ministry of War Transport and managed by the Cairns Noble company. On October 18th, 1940, the vessel was W. of the Hebrides in convoy when she straggled and fell victim to a German submarine. Six men were killed. Capt. Parks was among the survivors.

EMPIRE BROADSWORD

Ministry of War Transport (Cunard White Star Line); 1944; Short Bros.; 7,177 tons; 396-5x60-1x35; turbine engines. The steamship *Empire Broadsword* struck a mine and sank on the coast of Normandy on July 2nd, 1944, with the loss of seven lives.

EMPIRE BUFFALO

Ministry of War Transport (Lyle Shipping Co); 1919; Skinner & Eddy Corp.; 6,404 tons; 402-6x54-8x32-1; 11 knots; triple-expansion engines.

The steamship *Empire Buffalo*, Capt. John B. Hill, was torpedoed by a German submarine about 75 miles S.W. of Grand Cayman Island in the British West Indies on May 6th, 1942. Capt. Hill and 12 men were killed. The survivors landed at Kingston with the exception of the boatswain who was found after a search by aircraft and landed at Key West.

EMPIRE BYRON

Ministry of War Transport (J. & C. Harrison); 1941; Bar tram & Sons; 6,645 tons; 416-8x56-6x34; 292n.h.p.; triple-expansion engines.

The steamship *Empire Byron* was torpedoed and sunk by a German submarine at 6.15 a.m. on July 5th, 1942, in the Barents Sea on a voyage from Hull to North Russia. Three of her crew, three gunners and one passenger were lost.

EMPIRE CARIBOU

Ministry of War Transport (Sir W. R. Smith & Sons); 1919; Downey Shipbuilding Corp., Arlington, U.S.A.; 4,861 tons; 383-3x52-2x27-4; 339n.h.p.; 10 knots; triple-expansion engines.

The steamship *Empire Caribou*, Capt. M. Duffield, was in the North Atlantic on May 10th, 1941, when she was torpedoed and sunk by a German submarine. Capt. Duffield and 28 men were killed.

EMPIRE CELT

Ministry of War Transport (J. German & Co); 1941; Furness S.B. Co.; 8,032 tons; 463-5x61-2x23; 674n.h.p.; triple-expansion engines.

The steamship *Empire Celt* was torpedoed by a German submarine on February 24th, 1942, broke in two and sank about 420 miles S.S.E. of St. John, N.B., on a voyage from the Clyde to New York. Six of her crew were killed.

EMPIRE CITIZEN

Ministry of War Transport (P. Henderson & Co); 1922; Reiherstieg Schiffswerft; 4,683 tons; 361-2x50-2x23-8; 336 n.h.p.; 10 knots; quadruple-expansion engines.

On February 2nd, 1941, the steamship *Empire Citizen* was in the North Atlantic when she was torpedoed and sunk by a German submarine. Capt. Hughes and 77 men were killed and one wounded.

EMPIRE CLOUGH

Ministry of War Transport (Larrinaga Steamship Co); 1942; J. Readhead & Sons; 6,147 tons; 405-8x53-5x32-8; SOSn.h.p.; 12 knots; triple-expansion engines.

The steamship *Empire Clough*, Capt. Felix Bastarrechea, was in convoy in the North Atlantic on June 9th, 1942, when she was torpedoed and sunk by a German submarine. Five of her crew were killed. Capt. Bastarrechea was among the survivors.

EMPIRE COMET

EMPIRE COMET

Ministry of War Transport (Dodd Thomson & Co.); 1941; Lithgows Ltd.; 6,914 tons; 432-7x56-2x34-3; 490n.h.p.; 12 knots; triple-expansion engines.

The steamship *Empire Comet*, Capt. H. R. Willis, with a crew of 35, sailed from Halifax on 7th February, 1942, bound for Manchester, in convoy. On February 9th she became detached from the convoy and was never seen again. It was assumed that she was torpedoed by a German submarine.

EMPIRE CORPORAL

Ministry of War Transport (British Tanker Co.); 1922; Palmers' Shipbuilding & Iron Co.; 6,972 tons; 440x57-1x33-8; 654n.h.p.; 10 knots; turbine engines.

The tanker *Empire Corporal*, Capt. G. E. Hodgson, was in convoy in the Bahama Channel at the south-eastern end of Cuba when, on August 14th, 1942, she was torpedoed and sunk by a German submarine. Six of her crew were killed. Capt. Hodgson was among the survivors.

EMPIRE COWPER

Ministry of War Transport (R. Chapman & Son); 1941; W. Doxford & Sons; 7,164 tons; 428-8x56-6x35-5; 511 n.h.p.; triple-expansion engines.

The steamship *Empire Cowper* was bombed and sunk by German aircraft on April 11th, 1942, on a voyage from Murmansk to Iceland. Nine of her crew were lost.

EMPIRE CROMWELL

Ministry of War Transport (Lambert Bros.) ; 1941; W. Pickersgill & Sons; 5,970 tons; 401x54x33-2; 292n.h.p.; triple-expansion engines.

The steamship *Empire Cromwell* was torpedoed and sunk by a German submarine on November 28th, 1942, on a voyage from Table Bay to Trinidad and New York. The captain, 20 crew and three gunners were killed.

EMPIRE CROSSBILL

Ministry of War Transport (J. Morrison & Son); 1919; Los Angeles S.B. & D.D. Co.; 5,463 tons; 410x54-4x27-2; 422 n.h.p.; 10.5 knots; triple-expansion engines. The steamship *Empire Crossbill*, Capt. E. R. Townend, was torpedoed and sunk by a German submarine on September 11th, 1941, on a voyage from Philadelphia to Hull in convoy. All on board, 37 crew, ten gunners and one passenger, were lost.

EMPIRE DABCHICK

Ministry of War Transport (J. Morrison & Son); 1919; Atlantic Corpn.; 6,089 tons; 410-5x54-2x27; 598 n.h.p.; 11 knots; triple-expansion engines.

The steamship *Empire Dabchick*, Capt. P. Birch, was torpedoed and sunk by a German submarine on December 3rd, 1942, about 200 miles S.E. by S. of Sable Island on a voyage from Liverpool to St. John, N.B. Capt. Birch, the entire crew of 36 and 11 gunners were lost.

EMPIRE DACE

Ministry of War Transport (Townsend Bros. Ferries); 1942; Swan, Hunter & Wigham Richardson; 716 tons; 179 - 5 X 40 - 2 X 11; 132 n.h.p.; triple-expansion engines.

The ferry *Empire Dace*, with a crew of 20 and some 100 passengers, struck a mine and sank at the entrance to Missolonghi, Greece, on December 1st, 1944. At least 45 lives were lost.

EMPIRE DAWN

Ministry of War Transport (Runciman Shipping Co.); 1941; W. Doxford & Sons; 7,241 tons; 428-8x56-5x35-5; 516 n.h.p.; oil engines.

The motorship *Empire Dawn*, on a voyage from Suez to New York, was shelled and sunk by a German raider on September 12th, 1942, about 900 miles W. of Cape Town. Twenty of her crew were killed and 21 taken prisoner.

EMPIRE DELL

Ministry of War Transport (G. Nisbet & Co.); 1941; Lithgows; 7,065 tons; 432-2x56-2x34-2; 436 n.h.p.; triple-expansion engines.

The steamship *Empire Dell* was torpedoed and sunk by a German submarine on May 12th, 1942, on a voyage from Garston to Halifax. Fifteen of her crew were lost.

EMPIRE DEW

Ministry of War Transport (R. Chapman & Son); 1941; Lithgows; 7,005 tons; 432x56-2x34-2; 436 n.h.p.; triple-expansion engines.

The steamship *Empire Dew* was torpedoed and sunk by a German submarine on June 12th, 1941, in mid-Atlantic on a voyage from the Tyne to the St. Lawrence. Twenty-three lives were lost.

EMPIRE DRYDEN

Ministry of War Transport (Sir R. Ropner & Co.); 1942; Wm. Doxford & Sons; 7,164 tons; 428-8x56-5x35-5; 511 n.h.p.; 11.5 knots; triple-expansion engines.

The steamship *Empire Dryden*, Capt. Powley, with a general cargo was in the Atlantic on April 20th, 1942, when she was torpedoed and sunk by a German submarine. Twenty-five survivors in boats landed at Bermuda on May 8th. Captain Powley and twenty-four men in two boats were last seen on April 23rd.

EMPIRE ELAND

Ministry of War Transport (Douglas & Ramsey); 1920; Long Beach S.B. Co.; 5,613 tons; 410-5x54-3x27-2; 552 n.h.p.; triple-expansion engines.

The British cargo ship *Empire Eland* was lost without trace after sailing in ballast from the River Mersey on September 7th, 1941 on a voyage to Mobile and Tampa. She carried a crew of 32 and five gunners.

EMPIRE ENDURANCE

Ministry of War Transport (Booth S.S. Co.); 1928; Deutsche Werk Vulkan; 8,570 tons; 512-7x63-7x30-9; 1,190n.h.p.; 14 knots; triple-expansion engines & L.P. turbine. The steamship *Empire Endurance*, Capt. W. W. Torkington, with a crew of 89 and five passengers, was torpedoed and sunk by a German submarine on April 20th, 1941, 500 miles W. of Ireland. A boat containing 20 of the crew and four passengers was picked up the next day, but another boat known to have got away was found empty on May 10th, 250 miles W.N.W. of the Orkney Islands.

EMPIRE ENERGY

Ministry of War Transport (E. R. Management Co.); 1923; A. G. "Neptun"; 6,589 tons; 440x57-1x29-5; 720 n.h.p.; triple-expansion engines & L.P. turbine.

The British cargo ship *Empire Energy* was wrecked 11 miles west of Cape Norman in Belle Isle Strait on November 4th, 1941, while on a voyage from New York and Sydney, N.S., to Belfast carrying a cargo of maize.

EMPIRE ENGINEER

Ministry of Shipping (Weidner, Hopkins & Co.); 1921; Canadian Vickers; 5,358 tons; 400x52-4x28-5; 520 n.h.p.; triple-expansion engines.

The British cargo ship *Empire Engineer* was lost without trace on a voyage from Sydney, N.S., to Newport, Mon. She sailed from Halifax, N.S., on January 22nd, 1941, with a cargo of steel. She had a crew of forty.

EMPIRE EVE

Ministry of War Transport (Headlam & Son); 1941; W. Pickersgill & Sons; 5,979 tons; 401x54x33-2; 292 n.h.p.; 11 knots; triple-expansion engines.

The steamship *Empire Eve*, Capt. L. Z. Weatherill, was under Admiralty charter in the Mediterranean off the Algerian coast when, on May 18th, 1943, she was torpedoed and sunk by a submarine. Five of her crew were killed. Capt. Weatherill was among the survivors.

EMPIRE EXPLORER

Ministry of War Transport (T. & J. Harrison); 1925; Swan, Hunter & Wigham Richardson; 5,345 tons; 407x52-2x28-5; 606 n.h.p.; quadruple-expansion engines. The steamship *Empire Explorer* was torpedoed, shelled and sunk by a German submarine on July 8th, 1942, between Demerara and Barbados, with the loss of ten lives.

EMPIRE FROST

Ministry of War Transport (G. Heyn & Sons); 1940; Lithgows; 7,005 tons; 432-2x56-2x34-2; 436n.h.p.; 11 knots; triple-expansion engines. The steamship *Empire Frost*, Capt. J. McClelland, was attacked and badly damaged by German aircraft on March 12th, 1941, about 30 miles N.W. of Lundy Island. She was taken in tow by ships in company but on the 13th she was again attacked and sunk with the loss of six men. Capt. McClelland was among the survivors.

EMPIRE FUSILIER

Ministry of War Transport (Watts, Watts & Co.); 1921; Soc. Anon. Cantieri Cerusa; 5,408 tons; 379-2x51-9x27-5; 337 n.h.p.; triple-expansion engines. The steamship *Empire Fusilier*, sailing from the Tyne to Tampa, straggled from convoy on February 8th, 1942, and was torpedoed and sunk by a German submarine on the following day. Nine of her crew were lost.

EMPIRE GEM

Ministry of War Transport (British Tanker Co.); 1941; Harland & Wolff; 8,139 tons; 463-2x61-2x33-1; 502 n.h.p.; 11-5 knots; oil engines. The tanker *Empire Gem*, Capt. F. R. Broad, was torpedoed and sunk by a German submarine at 7.45 p.m. on January 23rd, 1942, when some distance off Cape Hatteras. Forty-nine of her crew were killed. Capt. Broad and the wireless operator were the only survivors. The *Empire Gem* was not in convoy.

EMPIRE GHYLL

Ministry of War Transport (Stephenson Clarke & Co.); 1941; Grangemouth Dockyard Co.; 2,011 tons; 272x40x17-2; 144 n.h.p.; 10 knots; triple-expansion engines. The collier *Empire Ghyll*, Capt. A. C. Mansen, struck a mine and sank near Gunfleet on October 18th, 1941. Five of her crew and two gunners were killed. Capt. Mansen was among the survivors.

EMPIRE GILBERT

Ministry of War Transport (Turner, Brightman & Co); 1941; Bartram & Sons; 6,640 tons; 416-8x56-6x34; 292 n.h.p.; triple-expansion engines. The steamship *Empire Gilbert* was torpedoed and sunk by a German submarine on November 2nd, 1942, between Spitsbergen and Jan Mayen Island on a voyage from the Tyne to Archangel. There were only three survivors, who were picked up by the submarine after having been two hours in the water.

EMPIRE GOLD

Ministry of War Transport (Common Bros); 1941; Furness S.B. Co.; 8,028 tons; 463-5x61-2x33; 674 n.h.p.; triple-expansion engines. The tanker *Empire Gold*, carrying 10,500 tons of white spirit, was torpedoed by a German submarine on April 18th, 1945, off the Bay of Biscay. She caught fire, broke in two and sank. Thirty-eight of her crew of 42 and all five gunners were lost.

EMPIRE GUILLEMOT

Ministry of War Transport (W. A. Souter & Co.); 1919; Western Pipe & Steel Co.; 5,720 tons; 410-5x54-2x27-1; 359 n.h.p.; triple-expansion engines. The steamship *Empire Guillemot* was torpedoed and sunk by Italian aircraft on October 24th, 1941, off Bona, on a voyage from Malta to Gibraltar. Eleven of her crew were lost.

EMPIRE HAIL

Ministry of War Transport (Larrinaga Steamship Co.); 1941; Lithgows; 7,005 tons; 432-2x56-2x34-2; 436n.h.p.; 10 knots; triple-expansion engines. The steamship *Empire Hail*, Capt. Robert Jones, was in convoy in the North Atlantic on February 23rd, 1942, when she was torpedoed and sunk by a German submarine. The entire crew of 42 and seven gunners were lost.

EMPIRE HAWKSBILL

Ministry of War Transport (Runciman (London) Ltd.); 1920; South Western S.B. Co.; 5,724 tons; 410-5x54-3x27-2; 576n.h.p.; triple-expansion engines. The steamship *Empire Hawksbill* was torpedoed and sunk by a German submarine at 12.29 a.m. on July 19th, 1942, about 200 miles N. of the Azores on a voyage from Barry to Table Bay. All her crew of 37 and nine gunners were lost.

EMPIRE HEATH

Ministry of War Transport (Joseph Robinson & Sons); 1941; Bartram & Sons; 6,643 tons; 416-8x56-6x34; 10 knots; triple-expansion engines. The steamship *Empire Heath*, Capt. W. T. Brown, was on passage from Victoria, Brazil, to Freetown when she was torpedoed and sunk by a German submarine. The attack took place on May 11th, 1944, when the vessel was N.W. of the small volcanic island of Trinidad in lat. 29° 31' S., long. 29° 50' W. The chief steward was saved and became a prisoner of war. The remaining 48 of the crew, nine gunners and one passenger were lost.

EMPIRE HERITAGE

Ministry of War Transport (Chr. Salvesen & Co.); 1930; Armstrong, Whitworth & Co.; 15,702 tons; 508-3x72-5x50-5; 1,079 n.h.p.; 11 knots; triple-expansion engines. The tanker *Empire Heritage*, Capt. J. C. Jamieson, was torpedoed and sunk by a German submarine about 25 miles W.N.W. of Malin Head, Co. Donegal, on September 8th, 1944. Forty-seven of her crew, 52 passengers, eight gunners and a signalman were lost.

EMPIRE HERON

Ministry of War Transport (Andrew Weir & Co.); 1920; Moore Shipbuilding Co.; 6,023 tons; 402-6x53x32-2; 12 knots; turbine engines. The steamship *Empire Heron* was in the North Atlantic when, at 11.3.0 on the night of October 15th, 1941, she was torpedoed and sunk by a German submarine. Thirty-four of her crew and nine gunners were lost, one survivor being picked up later.

EMPIRE HOMER

Ministry of War Transport (Haldin & Philipps); 1941; Greenock Dockyard Co.; 6,993 tons; 432-7x56-2x34-2; 320 n.h.p.; triple-expansion engines. The British cargo ship *Empire Homer* was blown ashore and wrecked on Sandray Island on January 15th, 1942. She was sailing in ballast on a voyage from Greenock to New York.

EMPIRE HOPE

Ministry of War Transport (Shaw Savill & Albion Co.); 1941; Harland & Wolff; 12,688 tons; 521-4x70-4x40-5; 12,000s.h.p.; 16 knots; oil engines. The *Empire Hope*, Capt. G. Williams, was one of the vessels comprising the famous Malta convoy of August, 1942. On the evening of the 12th, when near Cape Son after a day of continuous bombing attacks, the vessel's engines were damaged by near misses from bombs, 18 of which fell around her. So near were the explosions that some of her guns' crews were blown overboard but managed to swim back to the ship. Finally two direct hits set fire to the part cargo of kerosene in drums. The fire could not be controlled and the *Empire Hope* was sunk by ships in company, all the crew being picked up by the destroyer *Penn*.

Capt. Williams and the third officer, Mr. G. V. Conolly, were each awarded the D.S.C. in recognition of their efforts to save the vessel.

For further details see the *Waimarama*. The full story of the Malta convoy is told under the aircraft carrier *Eagle*.

EMPIRE HOWARD

EMPIRE HOWARD

Ministry of War Transport (*Raeburn & VereT*); 1941; *Lithgows Ltd.*; 6,985 tons; 431x56-2x34-2; 439n.h.p.; 11 knots; triple-expansion engines.

The steamship *Empire Howard*, Capt. H. J. M. Downie, O.B.E., was torpedoed and sunk by an enemy submarine on April 16th, 1942, while in a convoy to Russia. Twenty of her crew were killed on board and nine others died after being picked up. Capt. Downie was among the survivors.

EMPIRE HURST

Ministry of War Transport (*Smith, Hogg & Co.*); 1941; *W. Gray & Co.*; 2,852 tons; 310-6x44-4x19-4; 255n.h.p.; triple-expansion engines.

The steamship *Empire Hurst* was bombed and sunk by German aircraft on August 11th, 1941, about 400 miles W. of Gibraltar on a voyage from Aguilas to Barrow. Twenty-six of her crew were killed.

EMPIRE IMPALA

Ministry of War Transport (*Sun Shipping Co.*); 1920; *Virginia S.B. Corp.*; 6,116 tons; 403-3x53-2x32; 359n.h.p.; triple-expansion engines.

The British cargo ship *Empire Impala* was lost without trace after sailing from New York on February 23rd, 1943, on a voyage to Hull carrying a general cargo. She had a crew of 42 and six gunners.

EMPIRE JAGUAR

Ministry of War Transport (*Sir W. R. Smith & Sons*); 1920; *Uchida Shipbuilding Co.*; 5,186 tons; 399-6x54-7x27-6; 513 n.h.p.; 11 knots; triple-expansion engines.

The steamship *Empire Jaguar*, Capt. H. T. Thomas, was in the North Atlantic when, on December 8th, 1940, she was torpedoed and sunk by a German submarine. Capt. Thomas and his crew of 36 were killed. Capt. Thomas commanded the *Empire Toucan* when she was torpedoed in June of the same year.

EMPIRE JAVELIN

Ministry of War Transport (*Blue Star Line*); 1944; *Consolidated Steel Corp.*; 7,177 tons; 396-5x60-1 x55; 11 knots; turbine engines.

The steamship *Empire Javelin*, Capt. J. McLean, was torpedoed and sunk by a German submarine on December 28th, 1944, about 40 miles S. of St. Catherine's Point. Eight of her crew were killed. Capt. McLean was among the survivors.

EMPIRE KESTREL

Ministry of War Transport (*Sir W. R. Smith & Sons*); 1919; *Great Lakes Engineering Works*; 2,689 tons; 254x43-9x25-9; 232 n.h.p.; 9-5 knots; triple-expansion engines.

The steamship *Empire Kestrel*, Capt. A. J. R. Hooper, was in the Mediterranean off the coast of North Africa when, on August 16th, 1943, she was attacked by enemy aircraft and sunk by an aerial torpedo. Eleven of her crew were killed. Capt. Hooper was among the survivors.

EMPIRE KINGSLEY

Ministry of War Transport (*Chr. Salvesen & Co.*); 1941; *Greenock Dockyard Co.*; 6,996 tons; 432-7x56-2x34-2; 11 knots; triple-expansion engines.

The steamship *Empire Kingsley*, Capt. D. Hunter, was torpedoed and sunk by a German submarine on March 22nd, 1945, off Falinouth. Eight of her crew were killed. Capt. Hunter was among the survivors.

EMPIRE KOHINOOR

Ministry of War Transport (*Anchor Line*); 1919; *W. Hamilton & Co.*; 5,225 tons; 400-5x52-3x28-5; 517n.h.p.; triple-expansion engines.

The steamship *Empire Kohinoor* was torpedoed and sunk by a German submarine on July 2nd, 1943, about 150 miles S.W. of Monrovia on a voyage from Table Bay to England. Six of her crew were lost.

EMPIRE LAKE

Ministry of War Transport (*Constants (S. Wales) Ltd.*); 1941; *W. Gray & Co.*; 2,852 tons; 310-6x44-4x19-4; 255 n.h.p.; triple-expansion engines.

The steamship *Empire Lake* was torpedoed and sunk by a submarine on July 15th, 1943, off the east coast of Madagascar on a voyage from Durban to Aden. She sank in one minute with the loss of 25 of her crew and six gunners.

EMPIRE LAKELAND

Ministry of War Transport (*Blue Star Line*); 1942; *J. Readhead & Sons*; 7,015 tons; 430-9x56-2x35-2; 577n.h.p.; 11 knots; triple-expansion engines.

The steamship *Empire Lakeland*, Capt. F. J. Gudgein, left New York on February 23rd, 1943, for Glasgow with a crew of 57 and eight gunners. She straggled from convoy during the evening of March 11th and was never seen again. She was probably sunk by a German submarine.

EMPIRE LANCER

Ministry of War Transport (*Glen Line*); 1942; *Lithgows Ltd.*; 7,037 tons; 432-7x56-2x34-2; 558 n.h.p.; 11 knots; triple-expansion engines.

The steamship *Empire Lancer*, Capt. M. Jollivet, was torpedoed and sunk by a German submarine on August 16th, 1944, in the Mozambique Channel. Capt. Jollivet and 36 of his crew and five gunners were killed.

EMPIRE LAWRENCE

Ministry of War Transport (*Crosby, Son & Co.*); 1941; *J. L. Thompson & Sons*; 7,457 tons; 423-8x59-9x35; 320 n.h.p.; triple-expansion engines.

The steamship *Empire Lawrence* was bombed and sunk by German aircraft on May 27th, 1942, off the North Cape on a voyage from Reykjavik to Murmansk. The captain, 11 crew and three gunners were lost.

EMPIRE LEOPARD

Ministry of War Transport (*Maritime Shipping & Trading Co.*); 1917; *Skinner & Eddy Corp.*; 5,676 tons; 411-2x54-1x27-1; 549 n.h.p.; triple-expansion engines.

The steamship *Empire Leopard* was torpedoed and sunk by a German submarine on November 2nd, 1942, about 500 miles E. of Belle Isle on a voyage from Botwood, N.F.L., to Avonmouth. Thirty of her crew and seven gunners were lost. There were four survivors.

EMPIRE LIGHT

Ministry of Shipping (*British India S.N. Co.*); 1940; *Barclay, Curie & Co.*; 6,828 tons; 427-9x57-5x32-1; 630 n.h.p.; triple-expansion engines & L.P. turbine.

The steamship *Empire Light*, on a voyage from Calcutta to Durban, was sunk by the German raider *Pinguin* on April 25th, 1941, N. of the Seychelles. The crew were taken aboard the *Pinguin* and, save for one Lascar, were lost when the raider was sunk by the cruiser *Cornwall* 13 days later.

EMPIRE LIGHT

Ministry of War Transport (*H. E. Moss & Co.*); 1925; *J. Brown & Co.*; 6,537 tons; 420-1x54-4x32-8; 776n.h.p.; oil engines.

The motorship *Empire Light*, on a voyage from Manchester to New York, was torpedoed by a German submarine on March 7th, 1943, about 400 miles E. of Labrador. Some of the crew got away in boats, in very bad weather, but the boats were never seen again. A naval ship stood by for three days to take off those still on board but was not able to approach on account of the weather. The ship disappeared on the 10th. Forty-four of her crew and five gunners were lost.

EMPIRE LYTTON

Ministry of War Transport (*Harris & Dixon*); 1942; *Furness S.B. Co.*; 9,807 tons; 438-8x68-3x36-1; 674 n.h.p.; triple-expansion engines.

The tanker *Empire Lytton*, sailing from Curacao to Gibraltar with 12,500 tons of benzine, was torpedoed and sunk by a German sub-

marine on January 9th, 1943, about 500 miles E. of the Canary Islands. Thirteen of her crew and one gunner were lost.

EMPIRE MAHSEER

Ministry of War Transport (Mitchell, Cotts & Co.); 1920; American International S.B. Corp.; 5,087 tons; 390x54-2x28; 416 n.h.p.; turbine engines.

The steamship *Empire Mahseer* was torpedoed and sunk by a German submarine on March 3rd, 1943, about 100 miles out from Durban bound for Baltimore. Seventeen of her crew and one gunner were lost.

EMPIRE MALLARD

Ministry of War Transport (H. Hogarth & Sons); 1918; Todd D.D. & Constr. Corp.; 4,957 tons; 381-4x53-2x27; 472 n.h.p.; triple-expansion engines.

The British cargo ship *Empire Mallard* sank after a collision with the *Empire Moon* on September 26th, 1941, near Point Amour, Belle Isle Strait. She was on a voyage from New York and Sydney, N.S., to the River Mersey with a cargo of steel ingots and bars.

EMPIRE MARCH

Ministry of War Transport (Headlam & Son); 1942; Vickers-Armstrongs; 7,040 tons; 433x56-2x34-4; 516 n.h.p.; 11 knots; triple-expansion engines.

The steamship *Empire March*, Capt. A. W. Pinkney, left Calcutta on October 21st, 1942, and Durban on December 18th, bound for Bahia and England. On January 2nd, 1943, about 150 miles N.W. of Tristan da Cunha she was intercepted and sunk by an enemy raider. Thirty-three of her crew were killed. Capt. Pinkney and 24 others were taken aboard the raider.

EMPIRE MERCHANT

Ministry of Shipping (Kaye, Son & Co.); 1938; Deutsche Werft A.G.; 4,864 tons; 398-6x52-7x16-3; 1,163 n.h.p.; oil engines. The motorship *Empire Merchant* was torpedoed and sunk by a German submarine on August 16th, 1940, off the west coast of Ireland on a voyage from Avonmouth to Kingston, Jamaica. Six of her crew and one gunner were lost.

EMPIRE MERLIN

Ministry of War Transport (Sir R. Ropner & Co.); 1919; Ames S.B. & D.D. Co.; 5,763 tons; 409-8x54-2x29-2; 369 n.h.p.; 11-5 knots; triple-expansion engines.

The steamship *Empire Merlin*, Capt. Simpson, with a general cargo was in the North Atlantic about 250 miles N.W. of the Hebrides on August 25th, 1940, when she was torpedoed and sunk by a German submarine. Of a crew of eight officers and 25 men only one man survived.

EMPIRE MERMAID

Ministry of War Transport (Lyle Shipping Co.); 1919; Skinner & Eddy Corp.; 6,381 tons; 403-1x54-9x31-8; 359 n.h.p.; 11 knots; triple-expansion engines.

The steamship *Empire Mermaid*, Capt. J. Ferguson, was bombed off the N.W. coast of Scotland on March 26th, 1941. The vessel was carrying survivors of the s.s. *Cape Nelson*, of the same company, as well as her own crew. She remained afloat for two days, sinking on the 28th with the loss of 19 men in the first officer's boat, and four who died from exposure or wounds out of 23 in the captain's boat. Capt. Ferguson was among the survivors.

EMPIRE MERSEY

Ministry of War Transport (Larrinaga Steamship Co.); 1920; R.Duncan & Co.; 5,791 tons; 449-9x57-9x26-6; 609 n.h.p.; 10-5 knots; triple-expansion engines.

The steamship *Empire Mersey*, Capt. Felix Bastarrechea, was in convoy in the North Atlantic on October 14th, 1942, when she was torpedoed and sunk by a German submarine. Captain Bastarrechea and 15 of his crew were killed, and two wounded. Captain Bastarrechea was in command of the *Empire Clough* when she was torpedoed in June of the same year.

The *Empire Mersey* was formerly the *Ramon de Larrinaga* and capsized in the Delaware River on February 9th, 1941, with the loss

of two lives. She was salvaged, reconditioned and taken over by the Ministry of War Transport and handed back to the Larrinaga company to manage.

EMPIRE METAL

Ministry of War Transport (British Tanker Co.); 1942; Harland & Wolff; 8,201 tons; 465-6x59-5x33-8; 502 n.h.p.; 10 knots; oil engines.

The motor tanker *Empire Metal*, Capt. S. Shaw, was bombed and sunk by German aircraft on January 2nd, 1943, whilst lying in Bona Harbour, Algeria. Capt. Shaw and five of his crew were killed.

EMPIRE MICA

Ministry of War Transport (Anglo-American Oil Co.); 1941; Furness S.B. Co.; 8,032 tons; 463-5x61-2x33; 674 n.h.p.; triple-expansion engines.

The tanker *Empire Mica*, on a voyage from Houston to the United Kingdom, was torpedoed and sunk by a German submarine on June 29th, 1942, off the west coast of Florida. Thirty-three of her crew were lost.

EMPIRE MORDRED

Ministry of War Transport (G. Nisbet & Co.); 1942; C. Connell & Co.; 7,024 tons; 431-3x56-3x35-2; 510 n.h.p.; 11 knots; triple-expansion engines.

The steamship *Empire Mordred*, Capt. Hugh Mackinnon, was mined and sunk off Ceuta on the night of February 7th, 1942. Eleven of her crew, three gunners and one passenger were lost. This was the fourth time during the war that Capt. Mackinnon was among the survivors from a vessel under his command which had been sunk by enemy action.

EMPIRE NEWCOMEN

Ministry of War Transport (Martyn, Martyn & Co.); 1941; W. Gray & Co.; 2,873 tons; 315-4x46-5x23; 269 n.h.p.; triple-expansion engines.

The steamship *Empire Newcomen* was torpedoed and sunk by a German motor torpedo boat on November 30th, 1941, five miles S. of Dudgeon Light on a voyage from London to Sunderland. Ten of her crew were killed.

EMPIRE NOMAD

Ministry of War Transport (Connell & Grace); 1942; J. L. Thompson & Sons; 7,167 tons; 423-8x57-2x34-5; 507 n.h.p.; triple-expansion engines.

The steamship *Empire Nomad* was torpedoed and sunk by a German submarine on October 13th, 1942, about 150 miles S. of Durban bound for Trinidad and New York. Three of her crew and three gunners were killed.

EMPIRE PANTHER

Ministry of War Transport (Stanhope S.S. Co.); 1919; Columbia River S.B. Corp.; 5,600 tons; 410x54-2x27-6; 579 n.h.p.; turbine engines.

The steamship *Empire Panther* struck a mine and sank on January 1st, 1943, off Strumble Head on a voyage from New York to Cardiff. Six of her crew were killed.

EMPIRE PATROL

Ministry of War Transport (Furness, Withy & Co.); 1928; Stabilimento Tecnico; 3,334 tons; 331-9x44-8x21-3; oil engines.

The British motorship *Empire Patrol* caught fire on September 29th, 1945, when approximately 38 miles off Port Said. She sank on October 1st in position 31° 30' N., 32° 33' E. The ship was sailing in ballast from Port Said to Castelorizo Island with Greek refugees. Thirty-three lives were lost in this disaster.

EMPIRE PRAIRIE

Ministry of War Transport (Kaye Son & Co); 1941; Lithgows Ltd.; 7,010 tons; 431x56-2x34-2; 519 n.h.p.; 11 knots; triple-expansion engines.

The steamship *Empire Prairie*, Capt. R. J. Payne, left Halifax on April 7th, 1942, for Table Bay and Alexandria with a crew of 44 and five gunners. She was never seen again and was probably sunk by a submarine.

EMPIRE PROGRESS

EMPIRE PROGRESS

Ministry of War Transport (H. Hogarth & Sons); 1918; Harland & Wolff; 5,249 tons; 400-6x52-3x28-5; 490n.h.p.; triple-expansion engines.

The steamship *Empire Progress*, on a voyage from Glasgow to Tampa, was torpedoed and sunk by a German submarine on April 13th, 1942, about 200 miles N.W. of the Azores. The captain, seven crew and four gunners were killed.

EMPIRE PROTECTOR

Ministry of War Transport (W. Thomson & Co.); 1921; Cant. Offic. Savoia; 6,181 tons; 394-5x51-5x34-9; 12 knots; turbine engines.

The steamship *Empire Protector*, Capt. J. Cringle, was originally an Italian vessel and became a British prize of war in 1940. On May 30th, 1941, when near Cape Palmas on her way from Cape Town to Freetown, the *Empire Protector* was struck amidships on the starboard side by a torpedo from a German submarine. The attack took place at about 10.20 a.m. and the ship was badly damaged, her engine room flooded, No. 3 hatch was burst open and fuel oil was set on fire. Four of the crew and one gunner were killed by the explosion.

In view of the damage and the hopelessness of his position Capt. Cringle gave orders to abandon ship and the survivors put off in two small bridge boats and a few rafts, the other boats having been rendered unseaworthy. Soon after leaving the vessel the crew observed a second torpedo explode against the starboard side abaft of the mainmast and the ship sank.

Capt. Cringle had sent out a wireless call for assistance, but this did not reach any other ship and the arrival of the s.s. *Arundo* of Rotterdam was quite fortuitous. She picked up all the boats by 4.30 in the afternoon and landed the 33 occupants at Freetown on the following day.

EMPIRE PURCELL

Ministry of War Transport (Dover Nav. Co.); 1942; W. Gray & Co.; 7,049 tons; 431-5x56-2x34-3; 510n.h.p.; triple-expansion engines.

The steamship *Empire Purcell* was bombed, set on fire and sunk by German aircraft on May 27th, 1942, off the North Cape on a voyage from Middlesbrough and Reykjavik to North Russia. Seven of her crew and one gunner were killed.

EMPIRE RIDGE

Ministry of Shipping (Witherington & Everett); 1941; Lithgows; 2,922 tons; 315-2x44-4x19-9; 240n.h.p.; triple-expansion engines.

The steamship *Empire Ridge* was torpedoed and sunk by a German submarine on May 19th, 1941, on a voyage from Melilla to Garston with iron ore. Twenty-eight of her crew and three gunners were lost. There were two survivors.

EMPIRE ROSEBERY

Ministry of War Transport (C. Rowbotham & Sons); 1944; Blythswood S.B. Co.; 2,370 tons; 290-7x44-1x19-1; triple-expansion engines.

The steamship *Empire Rosebery* struck a mine and sank on August 24th, 1944, two miles N. of Anromanches, with the loss of ten of her crew and three gunners.

EMPIRE SAILOR

Ministry of War Transport (Cairns Noble & Co.); 1926; Stabilimento Tecnico; 6,140 tons; 430x55-5x27-6; 1,323n.h.p.; 14 knots; oil engines.

The motor vessel *Empire Sailor*, Capt. F. W. Fairley, was formerly the Italian *Cellini* of the Italia company which had been taken over as a prize of war by the Ministry of War Transport. On November 21st, 1942, the vessel was in convoy some 300 miles E. of Halifax, N.S., when she was torpedoed by a German submarine. The explosion released deadly fumes from the phosgene and mustard gas which formed part of her cargo and 23 officers and men died from its effects and several others were seriously affected but recovered. Capt. Fairley, who commanded the *Cairmona* when she was torpedoed in 1939, was among the survivors.

EMPIRE SHACKLETON

Ministry of War Transport (Houlder Bros. & Co.); 1941; Lithgows Ltd.; 7,068 tons; 432-7x56-2x34-2; 436n.h.p.; triple-expansion engines.

The steamship *Empire Shackleton*, Capt. H. E. Jones, left the Mersey on December 18th, 1942, for Halifax, N.S., being the 'Commodore ship' of the convoy under command of Vice-Admiral Egerton. On the evening of the 26th the convoy was attacked by German submarines with disastrous results. Between the evening of the 26th and the evening of the 28th no fewer than 18 British and Allied vessels were sunk. The *Empire Shackleton* was torpedoed and sunk at 10.15 p.m. on the 28th. One boat containing 11 men, of whom five were gunners, was lowered to the water's edge and cut adrift by the men without orders. This boat drifted away and was picked up by the s.s. *Calgary* which took the men to Freetown. Two other boats, with Vice-Admiral Egerton and 41 others, were picked up by the special service vessel *Fidelity* which was torpedoed and sunk with all on board on December 29th. Captain Jones and 36 others were lost with the ship.

EMPIRE SKY

Ministry of War Transport (Claymore Shipping Co.); 1941; J. L. Thompson & Sons; 7,455 tons; 426x59-9 x 35; 320 n.h.p.; triple-expansion engines.

The steamship *Empire Sky*, on a voyage from Hull and Reykjavik to Archangel, was torpedoed and sunk by a German submarine on November 6th, 1942, about 300 miles W. of the North Cape, with the loss of all on board.

EMPIRE SOLDIER

Ministry of War Transport (Wm. Cory & Son); 1929; Lithgows; 4,539 tons; 385x52x26-1; 477 n.h.p.; triple-expansion engines. The British cargo ship *Empire Soldier* was in collision with the *F. J. Wolfe* and sank on September 16th, 1942, in position 47° 35' N., 51° 44' W. She was on a voyage from New York and Halifax, N.S. to Hull carrying a general cargo.

EMPIRE SONG

Ministry of Shipping (Cayzer, Irvine & Co); 1940; Greenock Dockyard Co.; 9,228 tons; 463-8x63x32-7; 1,370 n.h.p.; triple-expansion engines & LP turbine.

The steamship *Empire Song*, on a voyage from the Clyde to the Middle East with munitions, was sunk by an internal explosion on May 9th, 1941, off Malta. Eighteen of her crew were killed.

EMPIRE SPRING

Ministry of War Transport (Donaldson Bros. & Black); 1941; Lithgows; 6,946 tons; 432-2x56-2x34-3; 490 n.h.p.; 10 knots; triple-expansion engines.

The steamship *Empire Spring*, Capt. A. McKechnan, left the Mersey on February 2nd, 1942, in convoy for Halifax with a crew of 42 and five gunners. The convoy dispersed on the 15th about 300 miles E. of Sable Island. The *Empire Spring* was never seen again and was thought to have been sunk by a submarine.

EMPIRE SPRINGBUCK

Ministry of War Transport (W. A. Souter & Co); 1918; Ames S.B.&D.D.CO.; 5,591 tons; 409-5x54-2x27-4; 543 n.h.p.; 10.5 knots; triple-expansion engines.

The steamship *Empire Springbuck*, Capt. W. O'Connell, was in convoy in the North Atlantic when she was torpedoed and sunk by a German submarine. She had sailed from Sydney, N.S., for Leith and London carrying a cargo of steel and explosives. The attack took place on September 10th, 1941, and the vessel sank with all hands, 42 officers and men. Capt. O'Connell had been in command of the motor vessel *Hylton* when she was torpedoed six months previously.

EMPIRE STANLEY

Ministry of War Transport (R. S. Dalgliesh); 1941; Greenock Dockyard Co.; 6,921 tons; 432-7x56-2x33-2; 688 n.h.p.; oil engines.

The motorship *Empire Stanley*, on a voyage from Durban to Aden, was torpedoed and sunk by a submarine on August 17th, 1943, about 200 miles S.E. of Madagascar. The captain, 18 crew, six gunners and one passenger were killed.

EMPIRE STAR

FrederickLeyland & Co.; 1935; *Harland & Wolff*; 12,656 tons; 524-2x70-4x32-3; 12,000 b.h.p.; 16knots; oilengines. The *Empire Star*, Capt. S. N. Capon, was torpedoed and sunk by a German submarine in the North Atlantic on October 23rd, 1942. Four men were killed on board. The captain's boat with 26 crew, six gunners and six passengers was never seen again.

EMPIRE STATESMAN

Ministry of Shipping (Runciman Shipping Co.); 1920; *G. Ansaldo & Co.*; 5,306 tons; 379x51-5x28-3; 606 n.h.p.; oilengines. The British cargo ship *Empire Statesman* sailed from Freetown on November 19th, 1940, on a voyage to Oban and Middlesbrough with an ore cargo. She reported engine trouble two days later but no subsequent news of the ship was received. She carried a crew of 32.

EMPIRE STEEL

Ministry of War Transport (Andrew Weir & Co.); 1941; *Cammell Laird & Co.*; 8,138 tons; 465-3x59-3x33-8; 502 n.h.p.; 10 knots; oilengines.

The motorship *Empire Steel* was torpedoed and sunk by a German submarine on March 24th, 1942, in the North Atlantic. She carried a crew of 47 of whom 39 were killed.

EMPIRE STEVENSON

Ministry of War Transport (W. Brown, Atkinson & Co.); 1941; *J. Readhead & Sons*; 6,029 tons; 405-8x53-5x33-3; 415 n.h.p.; triple-expansion engines.

The steamship *Empire Stevenson*, on a voyage from Hull to North Russia, was torpedoed by a German aircraft, blew up and sank on September 13th, 1942, off the North Cape. All on board were lost, 40 crew and 19 gunners.

EMPIRE STREAM

Ministry of War Transport (J. S. Stranaghan & Co.); 1941; *Lithgows*; 2,922 tons; 315-2x44-4x19-9; 240 n.h.p.; triple-expansion engines.

The steamship *Empire Stream*, on a voyage from Gibraltar to Dundee, was torpedoed and sunk by a German submarine on September 25th, 1941, about 800 miles W. of Cape Finisterre. Four of her crew, two gunners and two stowaways were killed.

EMPIRE SUN

Ministry of War Transport (J. Cory & Sons); 1941; *Short Bros.*; 6,952 tons; 427-5x57x34-3; 431 n.h.p.; triple-expansion engines.

The steamship *Empire Sun*, on a voyage from Portland, Me., to England, was torpedoed and sunk by a German submarine on February 7th, 1942, about 150 miles S. of Halifax. Eight of her crew, two gunners and one passenger were killed.

EMPIRE SURF

Ministry of War Transport (Saint Line); 1941; *Bartram & Sons*; 6,641 tons; 416-8x56-6x34; 292 n.h.p.; triple-expansion engines.

The steamship *Empire Surf*, on a voyage from Manchester to Jacksonville, was torpedoed and sunk by a German submarine on January 14th, 1942, about 600 miles E. of the Orkney Islands. Thirty-eight of her crew of 44 and all nine gunners were lost.

EMPIRE THUNDER

Ministry of Shipping (F. Carrick & Co.); 1940; *W. Pickersgill & Sons*; 5,965 tons; 401x54x33-2; 292 n.h.p.; triple-expansion engines.

The steamship *Empire Thunder* was torpedoed and sunk by a German submarine on January 6th, 1941, off Stornoway. All the crew got away in the boats but one boat with nine men was blown up by a torpedo.

EMPIRE TIGER

Ministry of Shipping (Turner, Brightman & Co.); 1919; *Todd D.D. & Construction Corp.*; 4,886 tons; 380-2x53-2x27; 339 n.h.p.; triple-expansion engines.

The steamship *Empire Tiger* left Philadelphia on February 6th, 1941, and Halifax on the 13th, bound for the Clyde. At 10 p.m. on the

26th the ship called for assistance, giving her position about 300 miles S. of Iceland and stating that she was badly down by the head in heavy weather. A second call at 12.35 a.m. on the 27th reported "shipping heavy seas" and a final message at 2.12 a.m. "all boats washed away".

EMPIRE TOWER

Ministry of War Transport (Counties Ship Management Co.); 1935; *Burntisland S.B. Co.*; 4,378 tons; 372x52-4x25-2; 335 n.h.p.; triple-expansion engines.

The steamship *Empire Tower*, on a voyage from Gibraltar to Middlesbrough, was torpedoed and sunk by a German submarine on March 5th, 1943, about 250 miles W. of Cape Finisterre. Forty-one of her complement of 47 were lost.

EMPIRE TURNSTONE

Ministry of War Transport (Kaye Son & Co.); 1918; *Columbia River S.B. Corp.*; 6,113 tons; 410x54-2x27-6; 551 n.h.p.; 11 knots; turbine engines.

The steamship *Empire Turnstone*, Capt. H. B. Collins, was torpedoed and sunk by a German submarine on October 22nd, 1942, in the North Atlantic. She went down with all hands, 46 officers and men.

EMPIRE UNION

Ministry of War Transport (Canadian Pacific Steamships); 1924; *Stabilimento Tecnico*; 5,952 tons; 390-8x54x29-6; 465 n.h.p.; triple-expansion engines.

The steamship *Empire Union* was torpedoed and sunk by a German submarine at 11.40 p.m. on December 26th, 1942, on a voyage from London to St. John, N.B. The captain, five crew and one gunner were killed.

EMPIRE VOLUNTEER

Ministry of Shipping (J. Cory & Sons); 1921; *Harbour Marine*; 5,319 tons; 399-8x52-3x28-5; 521 n.h.p.; triple-expansion engines.

The steamship *Empire Volunteer*, on a voyage from Wabana, N.F.L., to Glasgow, was torpedoed and sunk by a German submarine on September 15th, 1940, about 250 miles W. of the Hebrides. Six of her crew were killed.

EMPIRE WAGTAIL

Ministry of War Transport (Smith, Hogg & Co.); 1919; *Todd Dry Dock Corp.*; 4,893 tons; 380-1x53-1x27; 339 n.h.p.; triple-expansion engines.

The steamship *Empire Wagtail*, on a voyage from Cardiff to Boston, was torpedoed and sunk by a German submarine on December 28th, 1942, about 900 miles E. of Cape Finisterre. All on board were lost, 36 crew and seven gunners.

EMPIRE WAVE

Ministry of War Transport (Ban, Crombie & Co.); 1941; *J. L. Thompson & Sons*; 7,463 tons; 423-8x59-9x35; 320n.h.p.; triple-expansion engines.

The steamship *Empire Wave*, on a voyage from Sunderland to Halifax, was torpedoed and sunk by a German submarine on October 2nd, 1941, about 500 miles E. of Cape Farewell. One boatload of 30 men was lost and one man died in another boat.

EMPIRE WHALE

Ministry of War Transport (Donaldson Bros. & Black); 1919; *Federal Shipbuilding Co.*; 6,159 tons; 395-5x55x31-4; 645 n.h.p.; 11 knots; turbine engines.

The steamship *Empire Whale*, Capt. J. Davitt, was torpedoed and sunk by a German submarine on March 29th, 1943, while in convoy in the Bay of Biscay. Capt. Davitt, 41 crew and one passenger were lost.

EMPIRE WILDEBEESTE

Ministry of War Transport (G. Nisbet & Co.); 1918; *Skinner & Eddy Corp.*; 5,631 tons; 409-6x54-2x27-1; 416n.h.p.; turbine engines.

The steamship *Empire Wildebeeste*, on a voyage from Hull to Baltimore, was torpedoed and sunk by a German submarine at 2.5 a.m. on January 24th, 1942, about 600 miles W. of Philadelphia. Eight of her crew and one gunner were killed.

EMPRESS

Curwen Bros.; 1889; *Grangemouth Dockyard Co.*; 1,315 tons; 232x34-9x16-4; 136n.h.p.; triple-expansion engines. The British cargo ship *Empress* was wrecked on March 21st, 1897, on Black Rock, Carnsore, Wexford, while on a voyage from Seville to Ayr with a cargo of iron ore.

EMPRESS

Taylor & Sander son; 1882; *Short Bros.*; 2,025 tons; 291x40-2x20-2; 204 n.h.p.; compound engines. The British cargo ship *Empress* struck a wreck and foundered on January 23rd, 1915, off Sheringham, while on a voyage in ballast from London to Sunderland.

EMPRESS

Amaryllis Shipping Co.; 1893; *Furness Withy & Co.*; 2,914 tons; 314x40-5x21-4; 249 n.h.p.; 9 knots; triple-expansion engines. The steamship *Empress* was mined and sunk on July 31st, 1917, four and a half miles E. by S. ½ S. of Withernsea Lighthouse. Five of her crew were killed. The captain was among the survivors.

EMPRESS EKATERINA II

Russian Steam Navigation & Trading Co.; 1913; *W. Denny & Bros.*; 5,545 tons; 381x51-8x27-7; 788 n.h.p.; triple-expansion engines. The Russian steamship *Empress Ekaterina II* was torpedoed and sunk by a submarine in the Mediterranean on January 30th, 1918.

EMPRESS QUEEN

Isle of Man Steam Packet Co.; 1897; *Fairfield Co.*; 1,995 tons; 360-1x42-3x17; 1,290 n.h.p.; compound diagonal engines. The British cargo ship *Empress Queen* was wrecked on February 1st, 1916, at Bembridge Ledge, Isle of Wight, while on a voyage from Havre to Southampton carrying a cargo of ammunition.

EMPRESS OF ASIA

Canadian Pacific Railway Co.; 1913; *Fairfield Shipbuilding Co.*; 16,909 tons; 570-1x68-2x42; 3,720 n.h.p.; 20 knots; turbine engines. The liner *Empress of Asia*, Capt. J. Bissett-Smith, O.B.E., was transporting some 2,200 troops to the Far East when she was attacked by nine Japanese dive-bombers about six miles from Singapore on February 5th, 1942. The vessel sustained five direct hits, of which four fell near the bridge and the fifth on the galley, causing her to catch fire. The Australian sloop *Yarra* (which see) came alongside and took off many hundreds of those on board, at the same time engaging the enemy bombers with her anti-aircraft guns. It proved impossible to extinguish the fire and the *Empress of Asia* drifted ashore and was burned out.

Seven persons were killed and 153 taken prisoner by the Japanese.

EMPRESS OF BRITAIN

Canadian Pacific Railway Co.; 1931; *John Brown & Co.*; 42,348 tons; 733-3x97-8x56; 12,753n.h.p.; 24 knots; turbine engines. The liner *Empress of Britain*, Capt. C. H. Sapsworth, C.V.O., was the largest unit of the company's fleet. On October 26th, 1940, the vessel was 150 miles off the coast of Ireland, homeward bound from Canada, when she was attacked by German aircraft which machine-gunned the liner's gun crew and then returned and dropped a heavy bomb, scoring a direct hit. Shortly after this the aircraft returned for the third time and dropped a large number of incendiary bombs, setting the ship on fire in several places.

The *Empress of Britain* was manoeuvred so that the forward portion of the ship was clear of smoke, and about 300 of the passengers were gathered there. The work of launching the boats was then commenced and was carried through with a complete absence of panic. As the ship was not sinking there was ample time for most of the 643 persons on board to be embarked in safety.

Ships of the Royal Navy hurried to the scene and picked up the survivors, while others took the *Empress of Britain* in tow. On October 28th, the liner was attacked for the fourth time, on this occasion by a German submarine, commanded by Lt. Jaenisch, which got home two torpedoes. The ship blew up and sank soon afterwards.

Of those on board 598 were saved, including Capt. Sapsworth, who was the last to leave the vessel. The number either killed or drowned was 49.

EMPRESS OF CANADA

Canadian Pacific Railway Co.; 1922; *Fairfield Shipbuilding Co.*; 21,517tons; 627x77-9x42-2; 26,000s.h.p.; 20knots; turbine engines. The liner *Empress of Canada*, Capt. G. Goold, with about 1,400 Greek and Polish refugees as well as Italian prisoners on board, was torpedoed by an Italian submarine 400 miles S. of Cape Palmas, West Africa, at 11.56p.m., on March 13th, 1943, and again 55 minutes later. The vessel sank in 12 minutes but despite this a large proportion of those on board were saved. Forty-four of the crew, eight gunners and about 340 passengers were lost. Capt. Goold was among the survivors.

EMPRESS OF CANADA

Canadian Pacific Co.; 1928; *John Brown & Co.*; 20,325 tons; 581-9x75-2x41-7; 18 knots; turbine engines. The liner *Empress of Canada*, formerly the *Duchess of Richmond*, was lying in Gladstone Dock, Liverpool, on January 26th, 1953, when she caught fire. All efforts to control the flames failed and the ship capsized on the following day. She was raised in February, 1954, but as repairs were estimated to be in the region of £200,000 she was sold for scrap. There was no loss of life.

EMPRESS OF CHINA

Canadian Pacific Railway Co.; 1891; *Naval Construction & Armaments Co.*; 5,947 tons; 455-6x51-2x33-1; 1,167n.h.p.; 17-5 knots; triple-expansion engines. The three sister ships, *Empress of China*, *Empress of India* and *Empress of Japan*, were built by the C.P.R. Co. in 1891, when the company entered into a contract with the British and Canadian governments to carry mails. On August 27th, 1911, the *Empress of China* was wrecked in a fog off Nojima, some 35 miles from Yokohama, but all the passengers and crew, together with the mails, were taken off in safety.

EMPRESS OF IRELAND

Canadian Pacific Railway Co.; 1906; *Fairfield Shipbuilding Co.*; 14,191 tons; 548-9x65-7x36-7; 18,500i.h.p.; 20 knots; quadruple-expansion engines. The *Empress of Ireland*, Capt. Kendall, R.N.R., left Quebec at 4.30 p.m. on May 29th, 1914, bound for Liverpool. She carried 1,477 persons, inclusive of crew and passengers. The night was alternately fine and foggy, as the fog lay about in patches. When altering course some 20 miles below Rimouski the look-out observed the lights of another steamship coming up the river, which would normally pass the liner on her starboard side. The fog then swept over the water and enveloped both ships and Capt. Kendall therefore put his engines astern and signalled by three blasts of his siren that he had done so.

The fog was now very thick when suddenly the bows of a big ship loomed into sight and crashed into the starboard side of the liner. The on-coming vessel proved to be the *Storstadt*, 6,028 tons, Capt. Andersen, belonging to the A/S Maritim of Norway. The *Empress of Ireland* was struck between the funnels and a huge hole torn in her side, running from the engine room aft. The boiler rooms were flooded and the watertight bulkheads rendered useless.

Capt. Kendall at once hailed the *Storstadt* and requested her to keep her engines going so that her bow might remain in the hole and thus serve to keep the liner afloat. This request could not be complied with, as the bows of the *Storstadt* were too crumpled by the collision, she was therefore obliged to back away, permitting a torrent of water to rush into the doomed ship. Within 15 minutes of the collision, the *Empress of Ireland* had foundered, going down in some 19 fathoms, five miles E. of Father Point.

The disaster occurred at 1.55 a.m. and the passengers were asleep in their berths. Only a few of them found their way to the upper deck. Five minutes after the ship was struck her position was hopeless. Her wireless failed after the first S.O.S. messages had gone out; she was listing heavily and it was almost impossible to launch the boats, although four ultimately got away. The first officer, Mr. Steede, attended personally to the launching of what few boats

could be got away; but while engaged in this work he was killed by a boat which carried away from its tackle.

Two steamships, the *Eureka* and the *Lady Evelyn*, were lying alongside the wharf at Father Point with steam up and both put out on receipt of the *Empress of Ireland's* S.O.S. Between them they picked up several hundreds of survivors, while the boats of the *Storstadt* picked up many others.

The number lost was 1,014; 463 were saved, including Capt. Kendall. It was the second occasion on which the captain had been in the public eye, for some years previously, when in command of the *Montrose*, he had wirelessed the news to England that Dr. Crippen, the murderer, was among his passengers.

EMS

Norddeutscher Lloyd; 1937; Deutsche Sch.-u-Maschb. A.G. Weser; 3,287 tons; 358-8x50-2x19-9; 885 n.h.p.; oil engines.
The German motorship *Ems* was sunk by British light naval craft 30 miles E.S.E. of Barfleur on October 13th, 1942.

EMSHORN

Kauffahrtei Seereed. Adolf Wiards & Co.; 1913; J. Readhead & Sons; 4,301 tons; 369-6x51-1x25-5; 385n.h.p.; triple-expansion engines.
The German steamship *Emshorn* was torpedoed and sunk by a Russian submarine on December 21st, 1941, 23 miles from Kirkenes, Norway.

EMSLAND

Kauffahrtei Seereed. Adolf Wiards & Co.; 1901; Howaldtswerke; 5,170 tons; 405-3x52-4x23-1; 312n.h.p.; triple-expansion engines.
The German steamship *Emsland* was torpedoed by a British submarine and sunk by carrier-based aircraft on February 5th, 1942, off the coast of Norway.

EMSSTROM

Kauffahrtei Seereed. Adolf Wiards & Co.; 1900; Howaldtswerke; 4,517 tons; 388-9x52-1x21-8; 312n.h.p.; triple-expansion engines.
The German steamship *Emsstrom* was bombed and sunk by Russian aircraft in the East Baltic on February 16th, 1945.

ENA DELARRINAGA

Larrinaga Steamship Co.; 1925; F. Schichau; 5,200 tons; 387-5x52-7x32-2; 346n.h.p.; 10-5 knots; triple-expansion engines.
The steamship *Ena de Larrinaga*, Capt. R. S. Craston, was torpedoed and sunk by a German submarine off the Gulf of Guinea on April 5th, 1941. Five of her crew were killed. Capt. Craston was among the survivors. The *Ena de Larrinaga* was not in convoy at the time.

ENCOUNTER

British Navy, destroyer; 1934; Hawthorn, Leslie; 1,375 tons; 329x33-2x8-5; 36,000s.h.p.; 36 knots; turbine engines; 3-drum boilers; four 4 • 7 in. guns, 6 smaller; 8 T.T. The destroyer *Encounter*, Lt. Cdr. E. V. St.J. Morgan, took part in the battle of the Java Sea, fought on February 27th-March 1st, 1942, when an Allied squadron consisting of one British, one Australian, one American and two Dutch cruisers, with one Dutch and three British destroyers under command of Rear-Admiral K. Doorman of the Royal Netherlands Navy was completely destroyed.

The *Encounter* was the only destroyer to escape the first phase of the action on the 27th, when both Dutch cruisers and three destroyers were sunk. She reached Sourabaya in safety where she joined the cruiser *Exeter*, badly damaged in the action, and the U.S. destroyer *Pope* which so far had not been engaged. The three ships left harbour on the night of the 28th with the intention of steaming to Australia. Owing to injuries to her boilers *Exeter* could only steam at half speed, though during the night repairs to two more of her boilers enabled her to make 23 knots. On the following morning she wirelessed that she had been intercepted by three Japanese cruisers. At just before noon she was sunk by her crew having expended all her ammunition and with her engines damaged beyond repair.

The *Encounter* sank a short time afterwards, but the *Pope* ran into a rain squall and was not located by the enemy for more than an hour, at the end of which time she was attacked and sunk by Japanese bombers.

The full story of the battle is told under the *De Ruyter*, flagship of Admiral Doorman.

ENDEAVOUR

Australian Commonwealth Government; 1908; Government Dockyard, N.S.W.; 331 tons; 131-2x23-2x10-8; 45r.h.p.; triple-expansion engines.
The Australian Fisheries Investigation steamship *Endeavour* left Melbourne for Macquarie Island with the Director of Fisheries and his staff on December 3rd, 1914. She left homeward bound with 24 persons on board but foundered without survivors. Ships sent in search failed to find any trace of her.

ENDYMION

Verano S.S. Co.; 1909; J. Fullerton & Co.; 887 tons; 210x 32-7x13-5; 129n.h.p.; triple-expansion engines. The British steamship *Endymion* was torpedoed and sunk by an insurgent submarine on January 31st, 1938, during the Spanish Civil War.

ENERGI

Cia. de Nav. Estoco, S.A.; 1898; Flensburger Schiffsb. Ges., 1,051 tons; 219-8x34-9x12-6; triple-expansion engines. The Panamanian steamship *Energi* struck a mine on September 21st, 1950, and sank in three minutes, off Furusund, N. of Stockholm.

ENERGIE

J. & A. Van der Schuyt; 1918; N.V. Haarlemsche Scheepsb. Maats.; 843 tons; 201-5x30-2x13; 89n.h.p.; triple-expansion engines.
The Dutch steamship *Energie* left Haugesund for Holland on November 3rd, 1918. She carried a crew of 17, and was never heard of again. The Dutch authorities regarded her as a war casualty; probably mined and sunk.

ENERGIE

1943; 1,866 tons.
The German ship *Energie* was bombed and sunk by British aircraft on May 3rd, 1945, in the Baltic.

ENERO

Cia. Bilbainade Nav.; 1898; Campbeltown S.B. Co.; 2,047 tons; 282x40-1x19-2; 174 n.h.p.; triple-expansion engines. The Spanish steamship *Enero* was sunk in a collision with the steamship *Stregulus* on October 31st, 1902, off Dungeness. Twenty-two of her crew were drowned.

ENFIELD

Pyman Bros.; 1885; W. Gray & Co.; 2,055 tons; 279-7x37-4X 20; 200 h.p.; triple-expansion engines.
The British cargo ship *Enfield* was wrecked near Vinga on December 8th, 1893, while on a voyage in ballast from Aarhus to West Hartlepool.

ENGEN MARU

Nippon Yusen Kaisha; 6,968 tons.
The steamship *Engen Mam* was torpedoed and sunk by the U.S. submarine *Pampanito* on February 6th, 1945, about 150 miles N.E. of Dungan, Malaya.

ENGINEER

T. & J. Harrison; 1908; Swan, Hunter & Wigham Richardson; 5,883 tons; 399x51x26-7; 491 n.h.p.; triple-expansion engines.
The British cargo ship *Engineer* caught fire and sank on June 18th, 1920, at Delagga Bay while on a voyage from Liverpool to Mauritius carrying a general cargo.

ENGLAND

De Forenede Kulimportorer; 1930; Swan, Hunter & Wigham Richardson; 2,319 tons; 283-8x42x17-8; 201 n.h.p.; triple-expansion engines. The Danish steamship *England* was torpedoed and sunk by a

ENGLAND MARU

German submarine on January 27th, 1940, about 25 miles E. of Copinsay. There was only one survivor.

ENGLANDMARU

Yamashita Kisen K.K.; 1919; *Kawasaki Dockyard Co.*; 5,830 tons; 385x51x36; 437 n.h.p.; triple-expansion engines. The steamship *England Mam* was torpedoed and sunk by the U.S. submarine *Grayback*, on May 17th, 1943, in the Admiralty Islands.

ENGLISH TANKER

Mid-Atlantic Shipping Co.; 1923; *Tynelron S.B.Co.*; 5,387 tons; 365•2x51•3x30•7; 467 n.h.p.; turbine engines. The British tanker *English Tanker* was damaged in an insurgent air raid at Alicante on March 6th, 1938, during the Spanish Civil War. The tanker was again bombed and set on fire on June 6th. She was eventually sunk in a third attack on June 9th.

ENGLISHMAN

British & North Atlantic Steam Navigation Co.; 1891; *Harland & Wolff*; 5,257 tons; 430x47x37-9; 350 n.h.p.; 11 knots; triple-expansion engines. The steamship *Englishman* was torpedoed and sunk by a German submarine 30 miles N.E. of Malin Head at about noon on Friday, March 24th, 1916. Ten of her crew were killed; 68 survivors, including the captain, were picked up and brought into Oban.

ENJU MARU

Okada Gumi K.K.; 1919; *Canadian Vickers*; 5,374 tons; 400-3X 52-3x28'5; 520 n.h.p.; triple-expansion engines. The steamship *Enju (Enzyu) Mam* was bombed and sunk by U.S. carrier-based aircraft on August 4th, 1944, N. of the Bonin Islands.

ENKIMARU

Nippon Yusen Kaisha; 6,968 tons. The steamship *Enki Mam* was torpedoed and sunk by the U.S. submarine *Boarfish* on January 31st, 1945, off Quangngai, Indo-China.

ENKYOMARU

Japanese Government; 1907; *Fevigs Jernskibsbyggeri*; 2,278 tons; 298-9x42x19-4; 230 n.h.p.; triple-expansion engines. The steamship *Enkyo Mam* was formerly the Italian *Enderta*, chartered by the Japanese. She was bombed and sunk by U.S. land-based aircraft on May 18th, 1945, E. of Cheju Island, Korea.

ENMORE

John Holman & Sons; 1872; *Pearse*; 1,763 tons; 269•9x32•7x25; 170 h.p.; compound inverted engines. The British cargo ship *Enmore* foundered on October 23rd, 1880, in 50° N., 24° W., while on a voyage from Montreal to Hamburg with a cargo of rye.

ENNA

Sicilia Societa di Navigazione; 1874; *Fill Orlando*; 1,814 tons; 276-5x32-5x25-1; 231 n.h.p.; triple-expansion engines. The Italian steamship *Enna* was torpedoed and sunk by a submarine in the Mediterranean on November 24th, 1917.

ENNA

Italian Government; 1922; *Fried. Krupp A.G.*; 3,325 tons; 288-4x46-8x26-3; 338 n.h.p.; triple-expansion engines. The steamship *Enna* was formerly the French *Montesquieu*, seized by the Germans at Marseilles and handed over to the Italians. On May 30th, 1943, she was bombed and sunk by British aircraft in the Bay of Naples.

ENNISKILLEN

John Kelly, Ltd.; 1927; *J. Lewis & Sons*; 355 tons; 138-1x24-3x10; 50 n.h.p.; 9-5 knots; triple-expansion engines. The steamship *Enniskillen*, Capt. J. Semple, left Blyth on January 20th, 1927, for Dundalk with a cargo of 360 tons of coal. She was a new ship and was valued at £12,931. She carried a crew of nine. After leaving port at 7 p.m. in thoroughly good trim and with no indications of defects of any kind she was never seen again. On the 22nd, at a point some 24 miles E. of Bell Rock, off the Firth of Tay, the trawler *Strathblane* found her port lifeboat floating bottom upwards.

This was the first indication that the *Enniskillen* had met with disaster and after the usual lapse of time she was posted missing.

Bad weather was reported from ships and lighthouses in the North Sea over the period when it was assumed that the vessel was lost.

ENNISMORE

J. Cormack & Co.; 1880; *Barrow S.B. Co.*; 1,499 tons; 260X 34-2x17-9; 180 n.h.p.; compound engines. The British ship *Ennismore* was torpedoed and sunk by a German submarine 23 miles east of Girdleness on December 29th, 1917. Ten lives were lost.

ENOSHIMA MARU

The *Enoshima Mam*, engaged on repatriation service, struck a mine and sank on January 22nd, 1946, 30 miles from the mouth of the Yangtze River. She had some 4,300 Japanese passengers on board, most of whom were rescued by the American motor vessel *Brevard* but about 600 were drowned.

ENOURA MARU

Nippon Yusen Kaisha; 6,968 tons. The steamship *Enoura Mam* was bombed and sunk by U.S. land-based aircraft on March 26th, 1945, about 50 miles S.W. of Formosa.

ENRICHETTA

Dair Orso & Co.; 1899; *J. Priestman & Co.*; 3,683 tons; 340x 48x20-5; 343 n.h.p.; triple-expansion engines. The Italian steamship *Enrichetta* struck a mine and sank in the Mediterranean on June 30th, 1917.

ENRICHETTA

V. DeLuca; 1910; *W. Doxford & Sons*; 5,011 tons; 394-8x51-7x27-8; 338 n.h.p.; triple-expansion engines. The Italian steamship *Enrichetta* was torpedoed and sunk by a German submarine west of Gibraltar on May 9th, 1918.

ENRICHETTA

Italian Navy; 1907; *J.L. Thompson & Sons*; 4,652 tons; 386x50-2x24-5; 392 n.h.p.; triple-expansion engines. The steamship *Enrichetta* was torpedoed and sunk by a British submarine on October 10th, 1942, five miles from Preti Island, N.W. of Navarino.

ENRICO COSTA

G. Costa fu Andrea; 1928; *Burntisland S.B. Co.*; 4,080 tons; 380-8x51-4x25-1; 387 n.h.p.; triple-expansion engines. The Italian steamship *Enrico Costa* was torpedoed and sunk by a British submarine on June 26th, 1941, off Marina di Caronia, Sicily.

ENTEELLA

L. Mangiarotti & E. Ravano; 1899; *N. Oderofu A.*; 2,691 tons; 311-6x40-9x18-2; 224 n.h.p.; triple-expansion engines. The Italian steamship *Entella* was torpedoed by a British submarine on April 11th, 1943, and ran ashore and sank off Torre Finocchia, Sardinia.

ENTERKIN

T. C. Guthrie; 1889; *R. Duncan & Co.*; 1,698 tons; 256-4x 38-9x22-4. The sailing ship *Enterkin*, on a voyage from Hull to Brisbane with a cargo of iron pipes, was driven on to the Galloper Sands in a heavy gale on December 12th, 1891. Only one man of her crew of 31 survived.

ENTERPRIZE

F. H. Kirkhouse & Co.; 1888; *J. L. Thompson & Sons*; 2,002 tons; 284x38-1x18-2; 202 n.h.p.; triple-expansion engines. The British cargo ship *Enterprize* was wrecked on June 15th, 1907, on Cowbar Steel, near Staitness, while on a voyage from the Tyne to Rotterdam carrying a cargo of coal.

ENTRERIOS

Hamburg-Sudamerika Linie; 1923; *F. Schichau*; 5,179 tons; 386-4x52-7x29-9; 344 n.h.p.; triple-expansion engines. The German steamship *Entrerios*, on a voyage from Narvik to

Germany with ore, was bombed and sunk by British aircraft on January 14th, 1944, off Lister. All her crew of 40 were lost.

ENVOY

T. Wilson, Sons & Co.; 1872; Gilbert & Cooper; 1,353 tons; 253-8x31-9x18; 167 n.h.p.; compound engines. The British cargo ship *Envoy* foundered on November 8th, 1911, in the North Sea while on a voyage from Hull to Stockholm. She was carrying a general cargo.

EOLE

Soc. "Les Affreteurs Reunis"; 1916; Jos. T. Eltringham & Co.; 3,156 tons; 330-8x47-9x22-5; 305 n.h.p.; triple-expansion engines. The French steamship *Eole* sank near Corunna on December 16th, 1921, while on a voyage from Hamburg to Braila with coal.

EOLO

Chiarella & Carbone; 1877; Tyne Iron S.B. Co.; 1,679 tons; 270x34x24-5; 173 n.h.p.; compound engines. The Italian steamship *Eolo* was torpedoed and sunk by a German submarine in the Atlantic on July 30th, 1917.

EOLO

Cia. Uruguay a de Nav.; 1886; W. Denny & Bros.; 1,653 tons; 296x35-8x13-9; 535 n.h.p.; compound-diagonal engines. The Argentine paddle steamship *Eolo* sank in a collision on September 20th, 1928, near Vizcaino Island in the River Parana. The ship was carrying passengers.

EPAMINONDAS C. EMBIRICOS

C. E. Embiricos; 1927; W. Pickersgill & Sons; 4,385 tons; 373-2x52-7x25-8; 387 n.h.p.; triple-expansion engines. The Greek steamship *Epaminondas C. Embiricos* was torpedoed and sunk by a Japanese submarine on February 15th, 1944, about 150 miles N.W. of the Addu Atoll on a voyage from Colombo to Lourenco Marques.

EPSILON

B. J. Van Hengel; 1913; Rotterdam Droogdok Maats.; 3,211 tons; 331-7x48-2x22-2; 274 n.h.p.; triple-expansion engines. The Dutch steamship *Epsilon* struck a mine and sank in the English Channel on January 31st, 1917.

EQUIPOISE

U.S. Maritime Commission; 1906; Barclay Curie & Co.; 6,210 tons; 430-2x54-3x32; 784 n.h.p.; triple-expansion engines. The Panamanian steamship *Equipoise* was torpedoed and sunk by a German submarine on March 26th, 1942, about 100 miles E. of Norfolk, Virginia, on a voyage from Rio de Janeiro to Baltimore. Thirty-eight of her crew were lost.

ERA

Australian Steamships; 1888; E. Withy & Co.; 2,379 tons; 299-2x38-5x20-7; 240 n.h.p.; triple-expansion engines. The Australian ship *Era* was torpedoed and sunk by a submarine on May 1st, 1918, when she was 18 miles north east by east of Cape Terej, Algeria. Twelve men were killed.

ERATO

Ellermarks Wilson Line; 1923; J. Duthie Torry S.B. Co.; 1,335 tons; 247-3x36-2x14-6; 207 n.h.p.; triple-expansion engines. The British steamship *Erato* was torpedoed and sunk by a German submarine on July 28th, 1941, about 450 miles W. of Ushant, on a voyage from Liverpool to Oporto. The ship sank in five minutes, with the loss of eight of her crew and one gunner.

EREAGA

Cia. Maritima del Nervion; 1890; Ropner & Son; 2,233 tons; 272-3x38-9x18-6; 201 n.h.p.; triple-expansion engines. The Spanish steamship *Ereaga* struck a mine and sank in the Bay of Biscay on June 2nd, 1917.

EREBUS

British Navy, survey vessel; 1826; Pembroke Dockyard; 372 tons; 105x28-9x13-9; 20 n.h.p.; 6 knots.

H.M.S. *Erebus* was a former naval bomb ship fitted out for Antarctic exploration in 1839, when she sailed under command of Capt. Sir James Ross, in company with H.M.S. *Terror* (which see). In 1845 the same two ships were again chosen for an expedition to the Arctic under command of Rear-Admiral Sir John Franklin, who flew his pennant in *Erebus*. It was anticipated that the expedition would take about three years, and stores and provisions were laid in for that period. In addition the ships were overhauled and equipped with auxiliary engines of 20 horse power and screws were fitted. On May 19th, 1845, they sailed from Greenhithe with a complement of 134 officers and men. Capt. Francis R. M. Crozier of *Terror* was second in command of the expedition, he having commanded the same ship in the Antarctic voyage of Sir James Ross. Cdr. James FitzJames was, under Franklin, in command of *Erebus*.

The object of the expedition was to complete the work of Ross, Parry and other explorers and to trace and, if possible, navigate the North-West Passage, of which less than 300 miles remained to be charted. The Admiralty was responsible for sending the ships, and from it Franklin received his orders to make his way up Lancaster Sound to about lat. 74° N., long. 98° W., in the vicinity of Cape Walker. From there he was to work southward and westward in a course as direct to Behring's Strait as conditions would permit.

On June 3rd they left Stromness in the Orkney Islands and on July 4th anchored off Whale Fish Islands, near Disco, on the west coast of Greenland. On July 26th they were sighted by the whaler *Prince of Wales*, of Hull, Capt. Dannet, in about lat. 74° 48' N., long. 66° 13' W. Both ships were then made fast to the ice in Melville Bay. This was the last that was ever seen of them.

The disappearance of the Franklin expedition caused a tremendous sensation in Britain and America. How deep was the feeling may be gauged by the fact that some 39 public and private relief parties were sent out between 1847 and 1857.

From relics and messages found at various times by these search parties and from conversations they had with Eskimos, it is possible to piece together the outstanding features of the voyage. The ships sailed through Baffin's Bay and Lancaster Sound where the presence of ice caused them to turn along the Wellington Channel and proceed around Cornwallis Island, coming back again to Barrow Strait about 100 miles to the westward of the entrance to the Wellington Channel. The winter was now fast approaching and the ships turned back to Beechy Island, where they went into winter quarters. Before the coming of spring they experienced their first loss, two seamen and a marine dying and being buried on the island.

In the summer of 1846 the ships proceeded down Peel Sound, as the ice in Barrow Strait forbade their passage in that direction, and came to within 12 miles of the north extreme of King William's Land. *Terror* and *Erebus* were caught in the ice on September 12th, 1846. Sir John Franklin died on the 11th June, 1847, and on April 22nd, 1848, the party, now reduced to 105, under command of Capt. Crozier set off on foot to find a way back, but they all perished in the Arctic Circle.

ERFURT

Norddeutscher Lloyd; 1923; Vulcan Werke, A.G.; 4,201 tons; 360-7x51x26; 480 n.h.p.; oil engines.

The German motorship *Erfurt* struck a mine and sank on March 20th, 1944, near Fehmarn.

ERIC

Turnbull Bros.; 1892; T. Turnbull & Son; 2,768 tons; 312-5X40-7x21-9; 235 n.h.p.; triple-expansion engines. The British cargo ship *Eric* was wrecked on August 14th, 1912, on Sable Island. She was carrying a cargo of maize on a voyage from Rosario to Quebec.

ERICA

British Navy, corvette; 1941; W. Simons & Co., Renfrew; 925 tons; 193x32x16; 17 knots; quadruple-expansion engines; one 4 in.A.A. gun, several smaller.

The corvette *Erica*, Lt. A. C. C. Seligman, R.N.R., struck a mine and sank N.E. of Benghazi on February 9th, 1943. The vessel's normal complement was 85.

ERICE

ERICE

Giuseppe D'Ali; 1919; *McDougatt Duluth Co.*; 2,350 tons; 261 x43-5x22-4; 262 n.h.p.; triple-expansion engines. The Italian steamship *Erice* was bombed and sunk by British aircraft on May 14th, 1943, at Civitavecchia.

ERICH GIESE

German Navy, destroyer; 1936; *Deschimag, Bremen*; 1,625 tons; 374x37x9-3; 50,000 s.h.p.; 36 knots; turbine engines; five 5 in. guns, four 37 mm., 8 T.T.

The German destroyer *Erich Giese* was one of a flotilla of 11 destroyers which entered Ofot Fjord on April 9th, 1940, with the intention of making a landing at the port of Narvik. Owing to engine trouble the *Erich Giese* was not able to take part in the first battle of Narvik, on April 10th, but at its close she steamed out and picked up some survivors from H.M.S. *Hunter* (which see). At the second battle, which took place on the 13th, she had only one engine in working order, and this broke down soon after she came into action, leaving her at the mercy of the British gunners. Her guns were knocked out one by one, about 60 of her complement were killed or wounded, and she capsized, blowing up as she disappeared beneath the water. About half her crew were drowned.

The full story of both battles of Narvik is told under the British flotilla-leader *Hardy*, which was sunk in the first action, April 10th.

ERICH KOELLNER

German Navy, destroyer; 1937; *Deschimag, Bremen*; 1,625 tons; 374x37x9-3; 50,000 s.h.p.; 36 knots; turbine engines; five 5 in. guns, four 37 mm., 8 T.T.

The *Erich Koellner* was one of the flotilla of German destroyers sunk in the second battle of Narvik on April 13th, 1940. A full account of both battles is given under the British flotilla-leader *Hardy*, which was sunk in the first action on April 10th. There is also a short account under the Norwegian coastal defence ship *Norge*.

ERICH LEA

Bjornstad & Bmkhus; 1904; *R. Duncan & Co.*; 1,630 tons; 260x37•2X18•1; 172 n.h.p.; triple-expansion engines. The Norwegian steamship *Erich Lea* was torpedoed and sunk by a German submarine in the North Sea on May 10th, 1918.

ERIDANIA

Lloyd Triestino; 1916; *Cant fere San Rocco*; 7,039 tons; 411-1x53-1x24-8; 853 n.h.p.; triple-expansion engines. The Italian passenger steamship *Eridania* was torpedoed and sunk by a Polish submarine on October 7th, 1943, between Veruda and Pola.

ERIDANO

"Ave" Soc. Anon. di Nav.; 1912; *R. Thompson & Sons*; 3,586 tons; 352-9x50-8x21-6; 355 n.h.p.; triple-expansion engines. The Italian steamship *Eridano* was torpedoed and sunk by a British submarine on December 4th, 1941, six miles off Cape Dukato.

ERIDANO

Italian Navy, torpedo boat; 194-, *Italy*; 706 tons; 265-7x27-2x9; 22,000 s.h.p.; 31-5 knots; turbine engines; 3-drum boilers; two 3-9 in. guns, six 20 mm.A.A., 6 T.T.

The Italian torpedo boat *Eridano* in company with her sister ship, the *Arturo*, was engaged by H.M. destroyers *Lookout* and *Meteor*, 1920 tons, six 4-7 in. guns, off Genoa, on the night of March 17th, 1945. The *Arturo* was sunk by gunfire and the *Eridano* so badly damaged that she was scuttled by her crew. Both ships were manned by Germans and had been renamed *TA-29* and *TA-24* respectively. The number lost is not known.

See also *Arturo*.

ERIE

United States Navy, gunboat; 1936; *New York Navy Yard*; 2,000 tons; 328-5x41-3x11-5; 6,200 s.h.p.; 20 knots; turbine engines; four 6 in. guns, two 3par., 2 m.g., 1 seaplane. The United States gunboat *Erie* was torpedoed and sunk by a German submarine off Curacao on November 12th, 1942. The vessel carried a complement of over 200.

ERIE MARU

Nanyo Kaiun K.K.; 1920; *Asano S.B. Co.*; 5,493 tons; 400X 53-2x29-4; 513 n.h.p.; triple-expansion engines. The steamship *Erie Maru* was torpedoed and sunk by the U.S. submarine *Sturgeon* on January 11th, 1944, in the Bungo Channel, Japan.

ERIKA

Helmsing & Grimm; 1899; *Helsingors Jernskibs-og Maskinbyg.*; 2,430 tons; 290x42-5x19-3; 215 n.h.p.; triple-expansion engines.

The Russian steamship *Erika* was sunk by a German submarine in the Arctic on October 6th, 1916.

ERIKA FRITZEN

Johs. Fritzen & Sohn; 1906; *W. Doxford & Sons*; 4,169 tons; 349 X50-9x24; 310 n.h.p.; triple-expansion engines. The German steamship *Erika Fritzen* struck a mine and sank on February 25th, 1945, N. of Wamemunde.

ERIKA HENDRIK FISSER

Hendrik Fisser A.G.; 1924; *Nordseewerke*; 3,347 tons; 332-7X46-5x20-6; 248 n.h.p.; triple-expansion engines. The German steamship *Erika Hendrik Fisser* was bombed and sunk by British aircraft on November 25th, 1942, five miles S. of Christiansand. All but four of her complement of 50 were lost.

ERIKA SCHUNEMANN

E. Haubuss Schiffahrtsges.; 1889; *Strand Slipway Co.*; 1,177 tons; 225-9x34-2x15; 137 n.h.p.; triple-expansion engines. The German steamship *Erika Schunemann* was bombed by Russian aircraft and blew up and sank on December 14th, 1944, at Libau.

ERIKSHOLM

Aktieb. Svenska Amerika-Mexiko Linien; 1901; *R. Thompson & Sons*; 2,632 tons; 313x45x20-5; 254 n.h.p.; triple-expansion engines.

The Swedish steamship *Eriksholm* struck a mine and sank in the North Sea on January 1st, 1918.

ERIMO

Nippon Yusen Kaisha; 6,500 tons. The Japanese tanker *Erimo* was torpedoed and sunk by the U.S. submarine *S-39* on March 4th, 1942, about 200 miles N.E. of Djakarta.

ERINPURA

British India Steam Navigation Co.; 1911; *W. Denny & Bros*; 5,143 tons; 411x52-5x24-7; 1,059 n.h.p.; 16 knots; triple-expansion engines.

The steamship *Erinpura*, Capt. P. V. Cotter, was a unit of a convoy of 23 merchantmen escorted by 11 destroyers and sloops bound for Malta on May 1st, 1943. The convoy was some 30 miles N. of Benghazi when it was attacked by German bombers and torpedo-carrying aircraft. The action commenced in the late afternoon and aided by the fading light the aircraft torpedoed a tanker and then bombed the *Erinpura*, which had 1,025 troops on board. The bomb fell through one of the hatches and exploded in the hold, sinking the ship with great rapidity. The gun crew fought to the last and went down with the vessel. Fifty-four of the crew, three gunners and an unspecified number of troops were lost.

Capt. Cotter was knocked down by a column of water which fell on the bridge and was rendered unconscious. He was rescued by an Indian rating who swam with him to a raft.

ERITREA

Lloyd Triestino; 1918; *Blyth S.B. & D.D. Co.*; 2,517 tons; 295-7x42x19-2; 417 n.h.p.; triple-expansion engines. The Italian passenger steamship *Eritrea* was torpedoed and sunk by a British submarine on February 9th, 1943, five miles from Monopoli.

ERIVAN

Tonsberg Hvalfangeri; 1893; *Palmers'Co.*; 2,395 tons; 285-2X 38-7x26; 233 n.h.p.; triple-expansion engines. The Norwegian tanker *Erivan* struck rocks and sank on December 31st, 1924, 15 miles off Swain Island, near Kerguelen Island.

ERLANGEN

German Government; 1922; Forges & Chantiers de la Mediterranee; 3,509 tons; 346-4x44-7x21 -8; 502 n.h.p.; triple-expansion engines.

The steamship *Erlangen* was formerly the French *Gouverneur General Cambon*, seized by the Germans. She was bombed and set on fire by Allied aircraft on June 15th, 1944, and beached in a sinking condition about six miles S. of Sestri Levante.

ERLING LINDOE

AISDIS Erling Lindoe; 1917; N.V. Werfde Njord; 1,281 tons; 236-9x36-4x16-1; 127n.h.p.; triple-expansion engines. The Norwegian steamship *Erling Lindoe* struck a mine and sank on August 11th, 1944, in the Kattegat. Thirteen of her crew were killed.

ERNA III

Ministry of War Transport (Joseph Constantine S.S. Line); 1930; Helsingors Jernskibs & Maskinbyggeri A/S; 1,590 tons; 253-3X 39-1x15-4; 184 n.h.p.; 10 knots; compound engines with L.P. turbine.

The former Danish steamship *Erna III*, Capt. Sorensen, left Milford Haven in convoy on September 12th, 1941, bound for Montreal in ballast. She was last reported on September 21st-22nd in heavy weather with low visibility, dropping astern of the convoy.

ERNA OLDENDORFF

Egon Oldendorff; 1900; J.Priestman & Co.; 2,095 tons; 289 -8 x 42-2x20-4; 205 n.h.p.; triple-expansion engines. The German steamship *Erna Oldendorff* was bombed and sunk by Allied aircraft on August 11th, 1941, at St. Nazaire.

ERNANI

Giovanni Gavarone; 1910; Russell & Co.; 6,619 tons; 476-4X 57x28-9; 690 n.h.p.; triple-expansion engines. The Italian steamship *Ernani* was torpedoed and sunk by a submarine on June 28th, 1941, 450 miles W. of Las Palmas.

ERNE

British Navy, destroyer; 1903; Palmer & Co.; 550 tons; 225 x 23-5x12; 7,000 i.h.p.; 25-5 knots; triple-expansion engines; Reed boilers; four 12pdr. guns; 2 T.T.

The destroyer *Erne* was wrecked off Rattray Head, on the coast of Aberdeenshire, on February 6th, 1915. Her official complement was 70.

ERNEST LEGOUVE

G. Belot; 1901; Ateliers et Chantiers de la Loire; 2,246 tons; 276-5x4x22-5.

The French sailing vessel *Ernest Legouve* was torpedoed and sunk by a German submarine in the English Channel on April 5th, 1917.

ERNEST REYER

Soc. Nouvelle d'Armement; 1902; Chantier & Ateliers de St. Nazaire; 2,708 tons; 282-8x44x22-7.

The French sailing vessel *Ernest Reyer* was lost off Ushant on May 2nd, 1916, presumably sunk by a German submarine.

ERNEST SIMONS

Messageries Maritimes; 1893; Messageries Maritimes; 5,555 tons; 442-9x47-1x36-7; 727n.h.p.; triple-expansion engines.

The French steamship *Ernest Simons* was sunk by a submarine in the Mediterranean on April 3rd, 1917.

ERNESTO

Demetrio Vanni; 1920; Vanni & Puglisi; 1,389 tons; 221 -1x 37-5x24; 80h.p.; oil engines.

The Italian motorship *Ernesto* was dismasted, sprang a leak and was wrecked off Lampedusa on February 21st, 1921.

ERNESTO TORNQUIST

Cia. Argentina de Pesca S.A.; 1897; C. Connell & Co.; 6,620 tons; 450x52-5x30-7; triple-expansion engines. Carrying 208 whaling factory workers and stores from Sandefjord to Grytviken, the Argentine whale oil refinery *Ernesto Tornquist*

went ashore on October 15th, 1950, between Cape Constance and Antarctic Point on the N. coast of South Georgia during a snow-storm. The ship was abandoned at 7 a.m. on the next day and broke in two.

ERNST HUGO STINNES 11

A. G. Hugo Stinnes; 1905; Burmeister & Wain; 3,637 tons; 360-4x49x22-4; 441 n.h.p.; triple-expansion engines. The German steamship *Ernst Hugo Stinnes 11* was wrecked on November 20th, 1925, near Gisko, Aalesund, while on a voyage from Rio de Janeiro to Trondhjem.

EROS

Shipping Controller (Fisher Renwick & Co.); 1900; Laxevaags Mask. & Jernskibsbyggeri; 1,122 tons; 230-7x34-2x13-5; 97n.h.p.; 8 knots; triple-expansion engines. The steamship *Eros* was on a voyage from the Tyne to Rouen with coal when, on August 17th, 1918, two miles N.E. by N. of Filey Brig, Yorkshire, she was torpedoed and sunk by a German submarine. The captain and six of his crew were killed.

ERRIA

A/S Det Ostasiatiske Kompagni; 1932; Nakskov Skibs. A/S; 8,767 tons; 440-3x62-2x33-7; 1,283n.h.p.; oil engines. Carrying 133 passengers and cargo from Vancouver to Liverpool and Copenhagen, the Danish motorship *Erria* caught fire at the mouth of the Columbia River on December 20th, 1951, and was abandoned. Eight passengers and three of the crew were missing. In the following year the ship was towed across the Atlantic to Schiedam, repaired, and re-entered service in 1953.

ERROL

A. P. Ulriksen; 1868; Barclay, Curie & Co.; 1,446 tons; 239-5x37-6x22-9.

The Norwegian barque *Errol* was bound from Peru to Newcastle, N.S.W. She carried a crew of 22. At midnight on June 18th, 1909, she was wrecked on the Middleton Reef, Tasman Sea. The crew managed to reach shore, but during the following three weeks 17 died from exposure and privation. Five survivors were rescued by the steamer *Jofua* on July 12th.

ERTOGRUL

Turkish Navy, wooden frigate; 1863; Constantinople; 2,344 tons; 250x49-8x23-6; 600 n.h.p.; 10 knots; two 6 in. guns, eight 4-7 in.

The Turkish frigate *Ertogrul*, wearing the flag of Vice-Admiral Osman Pasha, was on a ceremonial and training cruise. She had a ship's company of 653 all told, and in 1886 had been reconstructed and armed with 6 in. and 4-7 in. breech loading, quick-firing guns. There was no reason to assume that she was ill found in any particular.

On September 18th, 1890, she was off the south coast of Japan when she encountered a great gale which wrecked other vessels beside herself, including the Japanese mail steamship *Musasha Mam*. The frigate sank with nearly all her company, including Vice-Admiral Osman Pasha. There were only 69 survivors.

ERVIKEN

H.J. Wallem; 1895; J. Readhead & Sons; 2,134 tons; 284-3X 39x16-8; 185 n.h.p.; triple-expansion engines. The Norwegian steamship *Erviken* was torpedoed and sunk by a submarine in the Mediterranean on October 25th, 1917.

ERVIKEN

Wallem & Co.; 1921; W. Doxford & Sons; 6,595 tons; 420x 54x34-4; 577n.h.p.; triple-expansion engines. The Norwegian steamship *Erviken* was torpedoed and sunk by a German submarine on October 16th, 1941, 600 miles N.W. of Ireland. Twenty-four of her crew were killed.

ESASHI MARU

Nippon Yusen Kaisha; 6,923 tons. The steamship *Esashi Mam* was sunk by U.S. carrier-based aircraft on November 19th, 1944, off Cape Bolinao, Lingayen Gulf.

ESCAMBIA

ESCAMBIA

Crow, Bogart & Rudolf; 1879; Mounsey & Foster; 2,154 tons; 291 X34-7X24-5; 210 h.p.; compound inverted engines. The British cargo ship *Escambia* foundered on the San Francisco bar on June 19th, 1881, while on a voyage from San Francisco to St. Vincent with a cargo of grain.

ESCAUT

Cie. Nationale Beige de Transports Maritimes; 1938; Soc. Anon. J. Cockerill; 1,087 tons; 230x36-3x13-3; 198 n.h.p.; oil engines.

The Belgian motorship *Escaut* was taken over by the British navy for use as a depot ship. She was torpedoed and sunk by German aircraft on August 3rd, 1941, off Point Attika, Gulf of Suez.

ESCHERSHEIM

Lehnkering & Cie. A.G.; 1913; Rotterdam Droogdok Maats.; 3,303 tons; 330-3x48-2x22-2; 274 n.h.p.; triple-expansion engines.

Sailing from Bremen to Oslo with a cargo of coke, the German ship *Eschersheim* was abandoned in a sinking condition on March 13th, 1940, two miles from Hirtshals and sank on the same day near Rubjaerg lighthouse. Eight of the crew were missing.

ESCORT

British Navy, destroyer; 1934; Scott's Shipbuilding Co.; 1,375 tons; 326x33-25x8-5; 36,000 s.h.p.; 35-5 knots; turbine engines; 3-drum boilers; four 4-7 in. guns, 7 smaller, 8 T.T. The destroyer *Escort*, Lt. Cdr. J. Bostock, was hit by a torpedo from a submarine while in the Western Mediterranean on July 14th, 1940. The ship was taken in tow but she foundered some hours later. *Escort* carried a complement of 145, of whom two ratings were killed and one officer and 12 ratings wounded.

ESCURIAL

Raeburn & Verel; 1879; A. Stephen & Sons; 1,188 tons; 230-2 X 30-2x22; 130 h.p.; compound engines.

The British cargo ship *Escorial* was wrecked near Portreath, Cornwall, on January 25th, 1895, while on a voyage from Cardiff to Fiume with a cargo of coal. The captain and 13 of the crew were drowned; eight were saved.

ESK

British Navy, destroyer; 1934; Swan Hunter & Wigham Richardson; 1,375 tons; 329x33-2x8-5; 36,000 i.h.p.; 35-5 knots; turbine engines; 3-drum boilers; four 4-7 in. guns, 7 smaller, 8 T.T.

The destroyer *Esk*, Lt. Cdr. R. J. H. Couch, D.S.C., was sunk by a mine on September 1st, 1940, in the North Sea. The destroyer sank with the loss of nine officers, including Lt. Cdr. Couch, and 151 ratings. One rating was wounded.

ESKDALE

Maclean, Doughty & Co.; 1873; J. Readhead & Co.; 1,133 tons; 229-4x30-8x17-6; 99 h.p.; compound engines. The British cargo ship *Eskdale* was wrecked on November 20th, 1888, near Hoburg light, Sweden, while on a voyage from Riga to West Hartlepool carrying a cargo of wooden goods.

ESKDALE

Norwegian Navy, destroyer; 1942; British Isles; 1,025 tons; 280x-29x7-7; 19,000 s.h.p.; 27-5 knots; turbine engines; 3-drum boilers; four 4 in. guns, two 20 mm.A.A. The destroyer *Eskdale* was built for the Royal Navy but was lent to Norway. She was torpedoed and sunk by a German motor torpedo boat, on April 14th, 1943, off the Lizard while escorting a convoy.

ESKMERE

Bromport Steamship Co.; 1916; North of Ireland Shipbuilding Co.; 2,293 tons; 287-2x40-6x22-8; 240 n.h.p.; 9 knots; triple-expansion engines.

The steamship *Eskmere* was torpedoed and sunk by a German submarine 15 miles W.N.W. of South Stack, off Anglesey, on October 13th, 1917, while employed as an Admiralty collier. The captain and 19 of his crew were killed.

ESPAGNE

Armement Adolf Deppe; 1909; Chant. Nov. Anversois; 1,463 tons; 235-5x36-1x12-3; 150 n.h.p.; triple-expansion engines. The Belgian steamship *Espagne* was torpedoed and sunk by a German submarine in the English Channel on December 25th, 1917.

ESPANA

Spanish Nationalist Navy, dreadnought battleship; 1912; Vickers-Ferrol Dockyard; 15,452 tons; 439-5x78-7x26; 15,500 i.h.p.; 19-5 knots; turbine engines; Yarrow boilers; eight 12 in. guns, twenty 4 in., two 3 pdr., 2 m.g., 3 T.T.

The battleship *Espana* was one of two capital ships possessed by Spain at the outbreak of the Civil War, 1936-39. The vessel was taken over by the Nationalists, her sister ship, the *Jaime Primo*, (which see) remaining in the hands of the Government.

When the Nationalist offensive against the Basques took place in 1937 the *Espana* was employed in the blockade of Bilbao. On April 30th she struck a mine, going down off Santander with a very heavy loss of life.

The disaster was a severe blow to the small Nationalist navy, which lost a 10,000 ton cruiser, the *Baleares* (which see) soon after. A more detailed account of the fighting is given under the *Jaime Primo*, which blew up at Carthagena.

ESPARTA

United Fruit S.S. Corp.; 1904; Workman Clark & Co.; 3,366 tons; 330-6x44-5x28-9; 320 n.h.p.; triple-expansion engines.

The American steamship *Esparta* was torpedoed and sunk by a German submarine on April 9th, 1942, 17 miles from Jacksonville.

ESPARTO

London & Edinburgh Shipping Co.; 1880; S. & H. Morton & Co.; 1,245 tons; 241-2x33-1x15-8; 127 n.h.p.; triple-expansion engines.

The British cargo ship *Esparto* sank after a collision with the French steamship *Noel* on November 28th, 1897, off the Royal Sovereign lightship while on a voyage from Bonell to Barcelona carrying a cargo of coal. Five of her crew were lost.

ESPERIA

"Adriatica" Soc. Anon. di Nav.; 1918; Soc. Esercizio Bacini; 11,398 tons; 527-9x61-9x31; turbine engines. The Italian liner *Esperia*, carrying troops from Italy to North Africa in a strongly escorted convoy, was torpedoed and sunk by the submarine *Unique*, 11 miles N.W. of Tripoli, Libya.

ESPERO

Italian Navy, destroyer; 1927; Ansaldo; 1,073 tons; 307-5 X 30-6x10-7; 40,000 s.h.p.; 36 knots; turbine engines; Express boilers; four 4 • 7 in. guns, four 37 mm., two 13 mm., 6 T.T. The Italian destroyer *Espero* was one of a division of three cruising in the Eastern Mediterranean on June 27th, 1940. The ships were sighted by British scouting aircraft and the Australian cruiser *Sydney*, 6,830 tons, eight 6 in. guns, Capt. John Collins, R.A.N., and a destroyer flotilla at once gave chase. The Italian vessels were all very fast and at once took evasive action, the gunfire being at extremely long range, despite which the *Espero* was hit and sunk by the *Sydney*. She fought in a most resolute manner and went down with colours flying and with her only effective gun still firing. Forty-four officers and ratings from her complement of 142 were picked up by the British. The two other destroyers managed to outsteam their pursuers and escape.

This was the first engagement between British and Italian naval forces after Italy had entered the Second World War on June 11th, 1940.

ESPEROS

Hellenic Shipping & Commercial Co.; 1918; Blyth S.B. & D.D. Co.; 1,461 tons; 255-2x35x16-2; 237 n.h.p.; triple-expansion engines.

The Greek steamship *Esperos* was bombed and sunk by German aircraft on April 21st, 1941. She was in service as a hospital ship and was anchored off Missolonghi to take off wounded.

ESQUIMAUT

Canadian Navy, fleet minesweeper; 1941; Canada; 590 tons; 162x28x8-5; 2,000b.h.p.; 16 knots; diesel engines; one 3 in. A.A.gun,two20mm,4mg.

The fleet minesweeper *Esquimaut* was torpedoed and sunk by a German submarine off Halifax, N.S., in April, 1945. The vessel's normal complement was 60.

ESSO GETTYSBURG

Standard Oil Co. of New Jersey; 1942; Sun Shipbuilding & Dry Dock Co.; 10,173 tons; 503x68x39-3; 7,240s.h.p.; 14-6 knots; turbo-electric engines.

The tanker *Esso Gettysburg*, Capt. Peder A. Johnson, left Atreco, Texas, for Philadelphia on June 6th, 1943, with a cargo of 119,726 barrels of crude oil. The vessel carried a mercantile crew of 45 officers and men and one officer and 26 men of the U.S. navy as gun crews. On June 10th, at about 2p.m., when 100 miles S.E. of Savannah, Georgia, the tanker was struck on the port side by two torpedoes. She immediately burst into flames and the men launching the lifeboats were compelled to abandon their task and jump overboard. The water round about was soon ablaze with burning oil and a total of 15 survivors eventually succeeded in reaching a half burned lifeboat in which they were adrift for 19 hours until picked up by the s.s. *George Washington*, Capt. T. H. Park. All the officers of the *Gettysburg* were killed with the exception of Ensign John S. Arnold, U.S.N., in command of the gun crews, who kept up a hot fire on the submarine until driven from his post by the flames. Later he was awarded the Navy Cross.

ESSO HAMBURG

1939; Germany; 9,847tons; oilengines.

The motor tanker *Esso Hamburg* was taken over on completion by the German navy for use as a fleet auxiliary. She was sunk off the coast of Greenland during the naval action, May 24th-27th, 1941, which resulted in the sinking of the *Bismarck* (which see).

ESSO HARRISBURG

Standard Oil Co. of New Jersey; 1942; Bethlehem Sparrows Point Shipyard; 9,887 tons; 488-3x68-3x36-9; 7,700s.h.p.; 15 knots; turbine engines.

The tanker *Esso Harrisburg*, Capt. C. Kelson, left Cartagena, Colombia, with a cargo of 113,342 barrels of crude oil early in July, 1944. She carried a mercantile crew of 44 officers and men and one officer and 27 men U.S. naval gun crew. At 7.25 p.m. on the 6th the vessel was hit in the stern by a torpedo which damaged her rudder and propeller and stopped her engines. A second torpedo struck her on the starboard side about 20 minutes later, followed by a third after a short interval. Most of the crew got away safely and were picked up by the Dutch submarine chaser *Queen Wilhelmina*, but Capt. Kelson and three mercantile crew with four U.S. naval ratings went down with the vessel.

ESSO SALTA

Cia. Transportadora de Petroleos; 1928; Palmers¹ Co.; 3,109 tons; 325x55-2x16-4; 288n.h.p.; triple-expansion engines.

The Argentine tanker *Esso Salta* was struck by lightning on September 25th, 1948, at Campana. There was an explosion, fire broke out and she sank. Attempts to refloat her were unsuccessful.

ESSO WHEELING

Standard Oil Co. (New Jersey); 1944; Alabama D.D. & S.B. Co.; 10,173 tons; 504x68-2x39-2; turbo-electric engines.

Sailing from Santos to Abadan the American tanker *Esso Wheeling* went ashore on a reef off Quoin Point on November 5th, 1948, and broke in two in a heavy swell.

ESSO WILLIAMSBURG

Standard Oil Co. of New Jersey; 1941; Sun Shipbuilding & Dry Dock Co.; 11,337 tons; 524-6x70-2x39-7; 915 n.h.p.; 15-2 knots; oilengines.

The tanker *Esso Williamsburg*, Capt. J. Tweed, left the island of Aruba, Dutch West Indies, for Reykjavik, Iceland, on September 12th, 1942, with a cargo of 110,043 barrels of fuel oil and a crew of 42 officers and men with 18 naval gunners. She sent a wireless distress call at 8 24 a.m. on the 21st, and a blue flare was sighted

about 450 miles S.E. of Cape Race, but nothing more was ever heard of her.

ESSONITE

W. Robertson; 1904; Scott & Sons; 589 tons; 174-8x28-lx 10 • 7; 99 r.h.p.; triple-expansion engines.

On February 1st, 1917, the British ship *Essonite* was torpedoed and sunk by a German submarine three miles N.N.W. of Trevose Head. Ten of her crew were killed.

ESTE

SchachSteenberg & Co.; 1891; C. Cornell & Co.; 1,420tons; 229-8x36-1x21-7.

The Danish sailing vessel *Este* was sunk by a German submarine in the North Sea on or about April 26th, 1917.

ESTER

l. Lauritzen; 1917; Kjobenhavns Flydedok-og Skibsbyg.; 1,207 tons; 239-9x35-7x14-5; 98n.h.p.; triple-expansion engines.

The Danish steamship *Ester* was sunk by a German submarine in the North Sea on April 1st, 1917.

ESTEREL

Fraissinet&Co.; 1904; A. McMillan & Son; 2,574 tons; 295 x 41-6x14-7; 261 n.h.p.; triple-expansion engines. The French steamship *Esterel* was torpedoed and sunk by a submarine in the Mediterranean on April 9th, 1917.

ESTON

Peninsular & Oriental Steam Navigation Co.; 1919; Goole S.B. & Repairing Co.; 1,487 tons; 240-2x36-1x19-1; 172 n.h.p.; 11 knots; triple-expansion engines.

The steamship *Eston*, Capt. H. Harris, left Hull on January 26th, 1940, for Blyth, and was reported off Blyth on the 28th. Nothing more was heard of the ship or her crew of 17 until one of her boats and the body of one of the crew were washed ashore some days later.

ESTRELLA

Shipping Controller (Elder Dempster & Co.); 1912; Clyde Shipbuilding & Engineering Co.; 1,740 tons; 280-5x42-6x16-6; 217n.h.p.; 10 knots; triple-expansion engines. The steamship *Estrella* struck a mine and sank five miles S.^{W.} of the Shipwash lightship, off Harwich, on March 5th, 1918. Twenty of her crew were killed. The captain was among the survivors.

ESTRELLANO

Ellerman Lines; 1920; Hall, Russell & Co.; 1,983 tons; 250-8 X 38-2x17-1; 230 n.h.p.; triple-expansion engines. The British steamship *Estrellano* was torpedoed and sunk by a German submarine on February 9th, 1941, about 400 miles W. of Gibraltar on a voyage from Leixoes to Liverpool. Six of her crew were killed.

ESTRID

A/S D/S Torm; 1924; Kjobenhavns Flydedok-og Skibsbyg.; 1,200 tons; 235-4x36-2x13-7; 83n.h.p.; triple-expansion engines.

Sailing from Valencia to London with oranges the Danish steamship *Estridwent* ashore off Audierne during a fog on February 2nd, 1933.

ETAL MANOR

l. Fenwick & Sons; 1916; J. Crown & Sons; 1,875 tons; 268 X 37-9x17-6; 199 n.h.p.; 9 knots; triple-expansion engines.

The collier *Etal Manor* was torpedoed and sunk by a German submarine seven miles S. by W. of Hook Point, Waterford, on September 19th, 1917. The captain and five of his crew were killed.

ETASHIMA MARU

Nippon Yusen Kaisha; 6,435 tons.

The steamship *Etashima Mam* was torpedoed and sunk by the U.S. submarine *Sunfish* on September 13th, 1944, about 150 miles W. of Mokpo, Korea.

ETEN

Pacific Steam Navigation Co.; 1871; *Lairds*; 1,853 tons; 292 x 38-1x21-2; 300 n.h.p.; 12 knots; compound inverted engines. The steamship *Eten*, Capt. Coathupe, was employed in the company's South American coastal trade and plied regularly between Valparaiso and Panama. On Saturday, July 14th, 1877, she left Valparaiso for Panama, her first port of call being Coquimbo, with mails and a total of 155 persons, passengers and crew. Capt. Coathupe was an officer well acquainted with the coast. The ship set her normal course and according to all the evidence kept to it throughout the night. There was, however, an extremely strong current running, with a continual disturbance of the sea, due to the effects of an earthquake and tidal wave on May 10th. These disturbances and their power to drive ships off their course were reported shortly afterwards by Capt. Mills of the *Lima*. At about 5.50 on the morning of Sunday, the 15th, the *Eten* struck the rocks near Cape Ventanas. Her position was hopeless from the beginning as the coast was strewn with huge boulders which broke the seas into a welter of surf. One boat was launched but was partially swamped so that it took one hour to make the shore with six persons. The ship then foundered with great suddenness.

Of those on board, a number, estimated at between 20 and 30, managed to reach one of the tallest boulders, where they gathered to await rescue, constantly swept by the sea. A few persons escaped from the wreck in boats or on spars and other floating wreckage, but by far the greater number were drowned immediately. Among the survivors was Mr. Stevenson, the second officer, who landed about 1.30 in the afternoon. He at once sought out one of the chief residents of the district and asked that a message for help be sent to Los Vilos and Coquimbo. This was readily promised, but the message did not reach either of the places until the 16th, by which time most of the unfortunates on the rock had either jumped or been swept into the sea.

An attempt at rescue was made by H.M.S. *Amethyst*, steam corvette, 1,934 tons, Capt. A. J. Chatfield, R.N., which was lying at Coquimbo. She arrived on the 16th and sent a boat to the rock, but the fury of the seas prevented it from approaching very near. The crew could not see any sign of life on the rock and the boat returned and reported that all who had taken refuge there must be regarded as lost. Meanwhile the Chilean man-of-war *Chacabuco* arrived and took on board 35 survivors from the shore, and conveyed them to Valparaiso.

The drowned numbered 120, including Capt. Coathupe and the first officer.

The wreck, which lay about 500 yards from shore, broke up very quickly and by evening on the 16th there was very little of it left.

ETENDARD

French Navy, destroyer; 1908; *France*; 335 tons; 196-8x 21-7x11-5; 6,400 h.p.; 30 knots; turbine engines; Normand boilers; one 9 pdr gun, four 6pdr, 2 T.T.

The French destroyer *Etendard* was in action with German destroyers off Dunkirk on April 25th, 1917. She was hit and sunk by torpedoes. Her normal complement was 71.

ETHEL GWENDOLINE

R. Taylor; 1883; *Usk Shipbuilding Co.*; 249 tons; 120-1 x 22x10-5; 50 h.p.; compound engines.

The coasting steamship *Ethel Gwendoline* sank off Rattray Head on March 21st, 1890. The captain and six of the crew were drowned.

ETHELINDA

Harrowing Steamship Co.; 1911; *W. Gray & Co.*; 3,257 tons; 335x47-5x23-2; 309 n.h.p.; 9 knots; triple-expansion engines.

The steamship *Ethelinda* was torpedoed and sunk by a German submarine 15 miles N.W. of the Skerries on January 29th, 1918, on a voyage from Bilbao to Barry with iron ore. The captain and 25 of his crew were killed.

ETHELWALDA

Harrowing Steamship Co.; 1890; *J. Readhead & Sons*; 2,414 tons; 290-4x40x19-9; 251 n.h.p.; triple-expansion engines. The British cargo ship *Ethelwalda* was wrecked on October 30th, 1911, at the entrance to Port Talbot. She was on a voyage from Uleaborg to Port Talbot carrying a cargo of pitwood.

ETHIOPIA

African S.S. Co.; 1873; *T. Royden & Sons*; 1,761 tons; 293x 34-3x23-2; 250 h.p.; compound inverted engines. The British cargo ship *Ethiopia* was wrecked off Loango on July 28th, 1882, while on a voyage from Hamburg to the west coast of Africa with a general cargo.

ETNA

Nav.Gen.Italiana; 1914; *Cant.Nav. Riuniti*; 5,604 tons; 394-9 x 51 • 7 x 27 • 6; 337 n.h.p.; triple-expansion engines.

The Italian steamship *Etna* was torpedoed and sunk by a German submarine off Madeira on October 1st, 1917.

ETOLIA

Elder, Dempster & Co.; 1887; *Harland & Wolff*; 3,220 tons; 345 • 6X40 • 9X26 • 7; 288 n.h.p.; triple-expansion engines. The British cargo ship *Etolia* was wrecked on June 9th, 1906, at Cape Sable while on a voyage from St. John, N.B., to Barrow with a wood cargo.

ETONIAN

F. Leyland & Co.; 1898; *Furness Withy & Co.*; 6,515 tons; 475-5x52-3x23-2; 842 n.h.p.; 14 knots; triple-expansion engines.

The steamship *Etonian* was torpedoed and sunk by a German submarine 34 miles S. by E. % E. of the Old Head of Kinsale on March 23rd, 1918, while on a voyage from Liverpool to Boston with general cargo. Seven of the crew were killed. The captain was among the survivors.

ETRURIA

Italian Navy, protected cruiser; 1891; *Italy*; 2,280 tons; 278 -2 X 39-5x16-7; 7,500 i.h.p.; 19-5 knots; triple-expansion engines six 4 • 7 in. guns, six 6 pdr., 2 T. T.

The old Italian cruiser *Etruria* was lying in Leghorn Harbour on August 13th, 1918, when she suddenly blew up. The cruiser carried a complement of 246, but the full number was not on board at the time of the disaster.

For list of warships destroyed by internal explosion while lying at anchor during the First Great War see *Vanguard*.

ETRURIA

D. Tripovich & Ci.; 1906; *Flensburger Schiffsb. Ges.*; 2,633 tons; 302-6x44x16-6; 192 n.h.p.; triple-expansion engines. The Italian steamship *Etruria* was bombed and sunk by British aircraft on December 22nd, 1942, W. of Egadi.

ETRICK

Peninsular & Oriental Steam Navigation Co.; 1938; *Barclay Curie & Co.*; 11,279 tons; 496-5x63-2x31; 1,510 n.h.p.; 20 knots; oilengines.

The P. & O. liner *Ettrick*, Capt. J. M. Legg, O.B.E., was serving as an auxiliary transport during the Allied landings in French North Africa in November, 1942. She was on the homeward voyage in convoy on the 15th when she was torpedoed and sunk by a German submarine 150 miles W. of Gibraltar. Eighteen naval ratings and six Indian members of the crew were killed, and four men were wounded.

ETRICKDALE

R. Mackill & Co.; 1875; *W.B. Thompson*; 1,324 tons; 245 x 32-2x20-8; 165 h.p.; compound inverted engines. The British cargo ship *Ettrickdale* was wrecked three miles off Gibraltar on March 11th, 1886, while on a voyage from Benisaf to the Clyde carrying a cargo of iron ore and esparto.

EUBEE

Chargeurs Reunis; 1922; *Chantiers de France*; 9,645 tons; 483-4x58-9x34-6; 340 n.h.p.; triple-expansion engines.

Carrying 178 passengers and a general cargo from Bordeaux to Buenos Aires, the French steamship *Eubee* was involved in a collision with the *Corinaldo* during a fog. The accident occurred at 4 a.m. on August 14th, 1936, about 90 miles N. of Rio Grande, and the *Eubee* foundered two days later.

EUGENE V. R. THAYER

Sinclair Refining Co.; 1920; *Bethlehem S.B. Corp.*; 7,138 tons; 430-2x59-2x32-8; 2,600 i.h.p.; 10• 5 knots; triple-expansion engines.

The American tanker *Eugene V. R. Thayer*, Capt. B. F. Svendsen, was some distance off Parnahyba, Brazil, on April 9th, 1942, when she was torpedoed and sunk by a German submarine. Eleven of her crew were killed and three wounded. Capt. Svendsen was among the survivors. The vessel was not in convoy at the time of the sinking.

EUGENIA

Italian State Railways; 1906; *Russell & Co.*; 4,835 tons; 385 X 49-7x18-4; 429 n.h.p.; triple-expansion engines. The Italian steamship *Eugenia* was torpedoed and sunk by a German submarine off the south-west coast of Ireland on August 6th, 1917.

EUGENIA

M.Livanos; 1902; *R. Craggs & Sons*; 3,029 tons; 330-2x46x22-2; 289 n.h.p.; triple-expansion engines. The Greek steamship *Eugenia* was torpedoed and sunk by a submarine in the Mediterranean on August 14th, 1917.

EUGENIA

Turner, Morrison & Co.; 1881; *T. Turnbull & Son*; 2,079 tons; 286 X 36 X 24 • 1; 241 n.h.p.; compound engines. The British cargo ship *Eugenia* was wrecked on April 16th, 1918, 13 miles south of Batticaloa. She was on a voyage from Rangoon to Bussorah carrying a cargo of teak and cattle trucks.

EUGENIA

A.Basilis; 1898; *Russell & Co.*; 3,974 tons; 345-3x49-8x17-9; 364 n.h.p.; triple-expansion engines. Sailing from Huelva to Hamburg with ore, the Greek ship *Eugenia* struck a mine and foundered on April 16th, 1921, off the Burlings.

EUGENIA

F. Dragone & A. Turcio; 1880; *J. L. Thompson & Sons*; 1,162 tons; 243-0x34-2x18-2; 154 n.h.p.; compound engines. The Italian steamship *Eugenia* sprang a leak and sank on October 19th, 1921, 15 miles S.S.E. of Ischia.

EUGENIE

Martin & Son; 1855; *New Brunswick*; 1,194 tons; 189-2x36-1x22-5.

The sailing ship *Eugenie*, Capt. W. McNeily, left Liverpool for America in mid-December, 1865. She met a succession of gales and could not get away from the Irish coast. Off the Old Head of Kinsale she attempted to follow a pilot boat, as she had had to cut away her mainmast and was badly in need of shelter. The weather was thick and the pilot boat soon became lost to sight. The vessel, however, was able to make Ballycotton Bay, where fore and mizzen masts were cut away and two anchors dropped. The violence of the seas caused both cables to part and the *Eugenie* drifted ashore, where she rapidly went to pieces. Of her crew of 17 the first officer, Mr. Russell, was the only survivor. The wreck occurred on, or about, January 7th, 1866.

EUGENIE FAUTREL

G. Belot; 1899; *Ateliers et Chantiers de la Loire*; 2,212 tons; 279-1x40-2x22-7.

The French sailing vessel *Eugenie Fautrel* was sunk by a German submarine in the Bay of Biscay on September 29th, 1917.

EUGENIE LIVANOS

Theofano Maritime Co.; 1936; *W. Gray & Co.*; 4,816 tons; 419-2x56-7x25-3; 460 n.h.p.; triple-expansion engines. The Greek steamship *Eugenie Livanos* was intercepted by a German raider and sunk by gunfire on December 7th, 1942, 300 miles S.E. of Madagascar. Eleven of her crew were killed and the remainder were taken prisoner by the raider. One of these died soon after being picked up.

EUGENIO C.

G. Costa fu Andrea; 1928; *Burntisland S.B. Co.*; 4,078 tons; 380-8x51-4x25-2; 387 n.h.p.; triple-expansion engines. The Italian steamship *Eugenio C.* was bombed and sunk by British aircraft on April 26th, 1944, in the Bodo Fjord, Norway.

EULER

Dampfsch.Ges.Neptun; 1925; *A.G. Weser*; 1,879 tons; 238-7x41-7x16-5; 280 n.h.p.; oil engines. The German motorship *Euler* struck a mine and sank on October 14th, 1941, off Grand Charpentier Light, near St. Nazaire.

EULIMA

Anglo-Saxon Petroleum Co.; 1937; *N.V. Wilton-Fijenoord*; 6,207 tons; 432-1x54-6x30-8; 377 n.h.p.; 11-5 knots; oil engines.

The tanker *Eulima*, Capt. F. W. Wickera, was torpedoed and sunk by a German submarine on February 23rd, 1943, 500 miles N.W. of the Azores. Two men were killed on board. The second and third mates were taken prisoner by the submarine, and the remaining 50 crew and nine gunners were lost at sea in the boats.

EUMAEUS

Ocean S.S. Co.; 1921; *Caledon Shipbuilding Co.*; 7,472 tons; 459-2x56-3x32-5; 6,000 s.h.p.; 14-5 knots; turbine engines. The liner *Eumaeus*, Capt. J. E. Watson, left Liverpool on December 28th, 1940, for Singapore and Shanghai via the Cape. On January 14th, 1941, when about 500 miles S.W. of Cape Palmas, she was intercepted by a German submarine. The enemy opened fire from the surface at a range of about 2,000 yards shortening to 700 yards, at which distance he opened up with machine guns, intending to drive the liner's gunners from their guns. For more than an hour the lightly armed British ship stood up to the shelling of two 4 in. guns and bullets from machine guns, but by the end of that time she was no longer manageable, having received four direct hits on the bridge and much damage in the engine room. It was not, however, until she had exhausted her small supply of ammunition that the order was given to abandon ship. Eight of the crew, including the chief and fourth officers, and 24 passengers were killed, 305 survivors were picked up on January 16th.

The *Eumaeus* was sunk by a torpedo shortly after she was abandoned.

EUPHORBIA

Stag Line; 1907; *W. Doxford & Sons*; 3,837 tons; 350-1 x 50-1x22-4; 292 n.h.p.; 10 knots; triple-expansion engines. The steamship *Euphorbia* was torpedoed and sunk by a German submarine 56 miles N.E. of Algiers on July 16th, 1916. Eleven of her crew were killed. The captain was among the survivors.

EUPHORBIA

Stag Line; 1917; *W. Dobson & Co.*; 3,109 tons; 331 x 48x22-2; 249 n.h.p.; 9 knots; triple-expansion engines. The steamship *Euphorbia* was torpedoed and sunk by a German submarine 14 miles E. by S. of the Royal Sovereign lightship on December 1st, 1917. Fourteen of her crew were killed. The captain was among the survivors.

EUPHORBIA

Stag Line; 1924; *Sunderland Shipbuilding Co.*; 3,380 tons; 331x48x23-2; 249 n.h.p.; 10 knots; triple-expansion engines. The steamship *Euphorbia*, Capt. T. Hilton, left Swansea on December 5th, 1940, and Milford Haven on, December 7th, for Lynn, Massachusetts, after which no further news of her came to hand. Presumably she fell victim to a submarine. The *Euphorbia* carried a crew of 33 and one gunner.

EUPHRATES

Armement Adolf Deppe; 1901; *Armstrong, Whitworth & Co.*; 2,809 tons; 300x45-7x16-8; 280 n.h.p.; triple-expansion engines.

The Belgian steamship *Euphrates* was torpedoed and sunk by a German submarine in the Atlantic on January 22nd, 1917.

EUPION

EUPION

British Tanker Co.; 1914; *Mackay Bros.*; 3,575 tons; 325-3X 44-7x28-2; 401 n.h.p.; 11 knots; triple-expansion engines. The tanker *Eupion* was torpedoed and sunk by a German submarine W. of Loop Head, Co. Clare, on October 3rd, 1918. Eleven of her crew were killed. The captain was among the survivors.

EURO

Italian Navy, destroyer; 1927; *Tirreno*; 1,092 tons; 307-5 x 30-5x10-7; 40,000 s.h.p.; 36 knots; turbine engines; Express boilers; four 47 in. guns, four 37mm.A.A., two 13 mm.A.A., 6T.T.

The destroyer *Euro* was bombed and sunk by British aircraft off Tobruk in August, 1940. The vessel sank in shallow water and was refloated and repaired by the Italians. At the capitulation of Italy in September, 1943, she fell into the hands of the Germans, and a month later, October 1st, she was sunk by bombers of the R.A.F. off Leros. The *Euro's* normal complement was 142.

EUROPA

Somes Bros.; 1851; *London*; 841 tons.

The sailing ship *Europa*, Capt. Gardner, left Plymouth for the Crimea on May 30th, 1854. She carried five officers and 54 men of the Enniskillen Dragoons, one officer's servant and two women, and a crew of 44, making 106 persons all told; there were also 57 horses besides war stores on board. On the 31st, at about 10 p.m., when 200 miles from Plymouth, the captain was called from his cabin to an outbreak of fire. He at once set the seamen and soldiers to extinguish it, but the discipline among both bodies of men was not good. On returning to the deck the captain found the soldiers attempting to launch the boats, from which they were dissuaded by their officers, though several men got away in boats not equipped with oars or furnished with provisions. Lt. Col. Willoughby Moore, commanding the detachment, the captain and a handful of seamen did what they could against heavy odds. At last, when the fire gained a tremendous hold upon the ship, Capt. Gardner gave orders for all on board to attend to their own safety and to make their way to the fore channels where a boat from the brig *Clemathe* was ready to take them off. Lt. Col. Moore was unable to get so far and was lost with the ship.

The total loss of life was two officers and 16 men of the Enniskillens, one woman and two seamen. The survivors were picked up by the brig *Clemathe*, the barque *Maranan*, the German schooner *Kennet Kingsford* and the steam frigate *Tribune*.

The fire was assumed to have originated through spontaneous combustion of the hay carried for the horses.

EUROPA

Palgrave, Murphy & Co.; 1862; *Palmers' Co.*; 676 tons; 206-5x26-1x17-2; 90 h.p.; compound engines. The steamship *Europa*, on a voyage from Glasgow to Malaga, was sunk in a collision with the steamship *Roseville* at 12.15 a.m. on October 12th, 1884, off the Cloch Lighthouse, River Clyde. The captain, chief engineer and three men were drowned.

EUROPA

Canadian National Steamships; 1931; *Burmeister & Wain*; 10,224 tons; 465-4x62-2x37-2; 6,400 b.h.p.; 14 knots; oil engines.

The former Danish liner *Europa* was bombed and sunk by German aircraft, on May 3rd, 1941, when lying at Liverpool.

EUROPA

Atlas Reederi A.G.; 1899; *W. Gray & Co.*; 3,767 tons; 338-5X 51x24-4; 312 n.h.p.; triple-expansion engines. The German ship *Europa* was reported to have sunk after collision on March 15th, 1944, near Stavanger.

EUROPE

Ant. Dom. Bordes & Fils; 1897; *Laporte & Co.*; 2,839 tons; 303-7x41-9x23-8.

The French sailing vessel *Europe* was sunk by a German submarine in the Bay of Biscay on September 24th, 1917.

232

EUROSEE

1941; *Germany*; 10,327 tons.

The German tanker *Eurosee* was bombed and sunk by British aircraft on March 22nd, 1943, at Wilhelmshaven.

EUROSTADT

Europdische Tanklager-u. Transp. A.G.; 1923; *J. C. & N. C. Kiehn*; 1,118 tons; 221-9x32-5x15-3; 144 n.h.p.; oilengines. The German tanker *Eurostadt* was torpedoed and sunk by a British submarine on May 17th, 1943, in the Kongsfjord on a voyage from Tromso to Kirkenes.

EURYDICE

Royal Navy, training frigate, sail; 1843; *Portsmouth Dockyard*; 921 tons; 141x38x8-7; 26guns.

In 1877 the frigate *Eurydice*, Capt. M. A. S. Hare, was converted into a training ship for ordinary seamen and sailed from Portsmouth on November 13th, 1877, with a complement of about 300 officers and ordinary seamen. Her destination was the West Indies and she was accompanied by the training brig *Martin*, being joined later at Madeira by H.M.S. *Liberty* from Plymouth, also manned by ordinary seamen.

On March 6th, 1878, the *Eurydice* left Bermuda on her homeward voyage, the other ships of the squadron having preceded her. In addition to her crew the vessel now carried a number of military officers and invalids from the West Indies. So far as can be ascertained the number on board totalled 368 persons.

From the time of her leaving Bermuda to her being sighted by the coastguard at Bonchurch, I.O.W., no news of the *Eurydice* reached England. At about 3.30 on the afternoon of Sunday, March 24th, the vessel was seen bearing for Spithead under all plain sail. A heavy bank of cloud was coming down from N.W. and the glass was falling rapidly. There was an ominous stillness and such wind as there was came from westward, blowing on the port quarter of the ship. At ten minutes to four the wind suddenly veered to the eastward; and a gale, accompanied by a blinding fall of snow came from the highlands down Luccombe Chine, striking the *Eurydice* just a little before the beam and driving her out of her course, which was heading to the N.E. The ship was then discerned about two and three-quarter miles E.N.E. of Dunnose Head, near Ventnor.

The schooner *Emma* was sailing a little behind the *Eurydice* and when the squall had passed she was seen to be on course in a normal manner; an evidence of the freakish nature of the wind. This ship picked up only five survivors, three of whom afterwards died. The remaining two were members of the crew, Benjamin Cuddiford of Plymouth, an able seaman, and Sydney Fletcher of Bristol, an ordinary seaman.

The evidence of these men was that sail was taken in at 3.45 p.m. when the weather showed signs of changing. The captain was on deck and ordered the lower studding-sails to be taken in; to let go the topsail halliards and the mainsheet. At this time the water was over the lee netting on the starboard side. Meanwhile extra men had been ordered to the wheel, there being six all told, assisted by Sub-Lt. the Hon. Edward Gifford. The men aloft taking in the royals were ordered below. The ship righted for a moment and then turned gradually over from forward and went down. Most of the men and boys were in the forepart and were sucked under when the vessel sank. On the following day it was established that the ship had foundered in 11 fathoms and that her topmasts with all sail set, were plainly visible.

Salvage operations were immediately instituted and the vessel was raised and brought into Portsmouth on September 1st, 1878. She was never in commission again and was shortly afterwards broken up.

EURYLOCHUS

China Mutual Steam Nav. Co.; 1912; *London & Glasgow Co.*; 5,723 tons; 430-5x53-9x30-3; 13 knots; triple-expansion engines.

The steamship *Eurylochus*, Capt. A. M. Caird, was intercepted and sunk by the German raider *Steiermark*, on January 29th, 1941, about 600 miles W. of Sierra Leone. Thirty-eight of the crew were killed and 33 taken on board the raider. Capt. Caird was among the survivors.

EURYMEDON

Ocean S.S. Co.; 1924; Caledon Shipbuilding & Engineering Co.; 6,223 tons; 431 - 8 x 54 • 7 x 30 • 1; 3,700 b.h.p.; 13 - 5 knots; oil engines.

The mptrsrhp *Eurymedon*, Capt. J. F. Webster, was in the North Atlantic in convoy on September 25th, 1940, when she was attacked by a German submarine. The first torpedo struck the vessel on the port side in the engine room after which the enemy craft circled round to the starboard side and discharged a second torpedo which again struck the engine room. Two lifeboats were destroyed by the explosion and most of those in them were killed. The *Eurymedon* still continued to float and Capt. Webster returned on board in the hope of saving her. This proved impossible and the captain was taken off on the 27th by a boat from the s.s. *Sulairia*, herself torpedoed, and at 8.5 p.m. the *Eurymedon* sank. Twenty of the crew and nine passengers were killed.

EUSEBIA DEL VALLE

Cia. Naviera Valle; 1894; Russell & Co.; 4,157 tons; 368-7x 47-5x26-9; 399n.h.p.; triple-expansion engines. Sailing from Follonica on February 20th, 1932, for Hamburg, the Spanish ship *Eusebia del Valle* sprang a leak and foundered on March 2nd, 60 miles S.W. of Ushant.

EUSTACE

George Pyman & Co.; 1878; T. Turnbull & Son; 1,665 tons; 258 - 6x34-1x19-9; 187 n.h.p.; compound engines. The British cargo ship *Eustace* sank after a collision off Yarmouth on November 8th, 1895, while on a voyage in ballast from Cherbourg to Sunderland.

EUSTON

Webster & Barraclough; 1905; R. Craggs & Sons; 3,511 tons; 340x47-1x24 • 7; 319 n.h.p.; triple-expansion engines. The British cargo ship *Euston* was wrecked on November 21st, 1911, on Juan de Nova, Mozambique Channel, while on a voyage from Tampa to Yokohama carrying a cargo of phosphate.

EUTERPE

Euterpe Steamship Co.; 1883; A. Stephen & Sons; 1,522 tons; 260 - 1x36x16-4; 184 n.h.p.; 8-5 knots; compound engines. The steamship *Euterpe* left Huelva on December 26th, 1915, bound for the Tees, and was last reported passing Yarmouth on January 7th, 1916. She had a crew of 19.

EUXEINOS

L. Nicolaidis; 1901; W. Pickersgill & Sons; 2,891 tons; 324 X 47-1x21-7; 291 n.h.p.; triple-expansion engines. The Greek steamship *Euxeinos* was torpedoed and sunk by a submarine in the Mediterranean on March 2nd, 1918.

EUZKADI

Madrigal & Co.; 1900; American S.B. Co.; 1,143 tons; 251X 43-6x26-1; 352 n.h.p.; triple-expansion engines. The Philippine steamship *Euzkadi*, on a voyage from Legaspi to Manila with hemp and copra, foundered during a typhoon on November 23rd, 1928, off Samar Island.

EUZKERA

AyoHermanos; 1894; 350 tons.
The Honduran ship *Euzkera*, a converted yacht, was sailing from Cuba to Cartagena, Colombia, with circus livestock, passengers and a small cargo when she lost her rudder and capsized and sank on September 1st, 1948, about 150 miles N. of Puerto Colombia. Eight of her crew and 36 passengers were lost. A boat containing three of her crew and nine passengers was picked up a week later by the Norwegian tanker *El Caribe*.

EVELYN

Joseph Merryweather & Co.; 1876; W. Gray & Co.; 1,230 tons; 237x31-4x17-1; 110h.p.; compound inverted engines. The British cargo ship *Evelyn* sank after a collision off Cape St. Vincent on August 13th, 1883, while on a voyage from Newport to Salerno carrying a cargo of coal.

EVELYN

/ Cornfoot & Co.; 1863; Jones, Quigin & Co.; 1,202 tons; 204X 34x23.

The iron barque *Evelyn* left Newcastle, N.S.W., on September 19th, 1893, for Lyttelton, New Zealand, with a cargo of 1,689 tons of coal. She carried a crew of 20, of whom four were apprentices.

Ten days later she was sighted from shore passing through Cook Strait on a southerly course. A succession of gales, alternating between north and south, had buffeted the ship since leaving port, and it was assumed that after she had passed out of sight on the 29th she was overwhelmed by the seas and sank.

The s.s. *Rotorua* reported a large amount of wreckage over an area of two miles, and two other vessels stated that they had seen the *Evelyn* in a precarious situation off Cape Palliser. As late as February, 1896, a lifebuoy marked *Evelyn*, was picked up by the s.s. *Kahu*. That was the last ever heard of the barque.

EVELYN

Greatham S.S. Co.; 1906; Irvine's S.B. & D.D. Co.; 3,664 tons; 340x48-2x12-9; 301 n.h.p.; triple-expansion engines. The British cargo ship *Evelyn* was wrecked on January 9th, 1913, at Louisburg. She was on a voyage from Bremen to Savannah with a cargo of salt.

EVELYN

Harris, Irby & Vose; 1883; Oswald, Mordaunt & Co.; 1,963 tons; 263-8x36-1x24-2; 205 n.h.p.; compound engines. The American steamship *Evelyn* struck a mine and sank in the North Sea on February 20th, 1915.

EVENING STAR

Traves & Co.; 1854; Jersey; 786 tons; 160-4x32-1x20-8. The barque *Evening Star* was lost off Little Cayman in the West Indies in the middle of August, 1876. The captain, first officer and nine men were drowned. There were six survivors.

EVERASMA

F. Grauds; 1920; R. Duncan & Co.; 3,644 tons; 364-9x51-5X 22-6; 391 n.h.p.; triple-expansion engines.
The Latvian steamship *Everasma* was torpedoed and sunk by a German submarine on February 28th, 1942, about 800 miles E. of the Windward Islands on a voyage from St. Thomas, W.I., to Rio de Janeiro. One of her boats with 15 men eventually reached Barbados.

EVERELZA

Mrs. E. Grauds; 1921; J. L. Thompson & Sons; 4,520 tons; 364-5x52-8x24-3; 347n.h.p.; triple-expansion engines. The Latvian steamship *Everelza* was torpedoed and sunk by a German submarine on August 13th, 1942, off Haiti on a voyage from Trinidad to Baltimore. Twenty-three of her crew of 37 were lost.

EVEREST

Peter Rowe & Sons; 1881; W. Gray & Co.; 1,646 tons; 261 • 6 X 34-6x19-5; 170 n.h.p.; compound engines. The British cargo ship *Everest* was wrecked on March 30th, 1911, on Isabella Bank, near Ceuta, while on a voyage from Bagnoli to the Clyde carrying a cargo of iron ore.

EVERILDA

A.L.Nilson; 1882; T. Turnbull & Son; 1,366 tons; 243x34x 17 • 9; 156 n.h.p.; compound engines.
The Swedish steamship *Everilda* struck a mine and sank in the Baltic on December 6th, 1914.

EVERLEIGH

Atlantic Shipping & Trading Co.; 1930; Furness S.B. Co.; 5,222 tons; 406-3x56x26-9; 527n.h.p.; triple-expansion engines. The steamship *Everleigh*, on a voyage from London to New York, was torpedoed and sunk by a German submarine on February 6th, 1945, off the Cherbourg peninsula. Six of her crew were killed.

EVERSOLE

EVERSOLE

United States Navy, destroyer; 1943; United States; 1,450 tons; 306x36-9x10-7; 12,000s.h.p.; 28 knots; turbine engines; two 5 in. guns, two 40 mm.A.A., six 20 mm.A.A., 3 T.T. The United States destroyer *Eversole* was torpedoed and sunk by a Japanese submarine E. of Leyte, on October 28th, 1944. The vessel carried a complement of 220.

EVERISEN

Netherlands Navy, destroyer; 1926; Burgerhouts, Rotterdam; 1,310 tons; 322x31-2x10-5; 31,000s.h.p.; 36 knots; turbine engines; Yarrow boilers; four 4-7in. guns, two 3 in., four 12-7 mm., 2 m.g., 6 T.T.

The Dutch destroyer *Evertsen* left Tandjong Priok, Java, on the night of February 28th, 1940, in company with the U.S. heavy cruiser *Houston* and the Australian cruiser *Perth*, both of which had been damaged in the fighting against the Japanese in the previous few days. It was known that the enemy was in strength at all the exits of the straits leading from those waters to the open sea. Nevertheless the three ships hoped to get through and reach Australia. At 11.30p.m. the *Perth* sent out a wireless message stating that the enemy had been sighted and that action was about to be joined. The *Houston* was sunk by torpedo within the first hour and the *Perth* sank some two hours afterwards.

The *Evertsen* was engaged by two Japanese cruisers which set her on fire and forced her ashore on a reef off Sebutu Island, Sunda Strait. Of her complement of about 150 a few managed to escape, the remainder of the survivors becoming prisoners of war.

The full story of the fighting in the Dutch East Indies is told under the Dutch cruiser *De Ruyter*, flagship of Rear-Admiral K. Doorman, in command of the Allied squadron.

EVROS

I. G. Livanos; 1918; J. L. Thompson & Sons; 5,283 tons; 400-3x52-3x28-4; 517n.h.p.; triple-expansion engines. The Greek steamship *Evros* was torpedoed and sunk by a German submarine on October 17th, 1941, about 800 miles W. of the Hebrides on a voyage from Victoria, Brazil and Sydney, N.S., to Ardrossan. Thirty of her crew of 32 were lost.

EXAMELIA

American Export Lines; 1920; American International S.B. Corp.; 4,891 tons; 390x54-2x27-8; turbine engines. The American steamship *Examelia* was torpedoed and sunk by a submarine on October 9th, 1942, off Mossel Bay on a voyage from Calcutta to New York. Eleven of her crew were killed and 40 picked up and taken to Table Bay. Twenty-six of these survivors were killed when on board the Dutch steamship *Zaandam*, sunk on November 2nd.

EXCELLENCE PLESKE

Shipping Controller (Lambert Bros.); 1886; W. Gray & Co.; 2,059 tons; 275-3x37-3x19-8; 203n.h.p.; 9-5 knots; triple-expansion engines.

The former Danish steamship *Excellence Pleske* was torpedoed and sunk by a U-boat two and a half miles S.S.E. of Dungeness on March 31st, 1918. Thirteen of her crew were killed. The captain was among the survivors.

EXCHANGE

Manchester Liverpool and North Wales S.S. Co.; 1884; W. Thomas; 279 tons; 135x22-3x9-9; SOr.h.p.; 9 knots; compound engines.

The steamship *Exchange* was intercepted by a German submarine 30 miles N.W. of Cayeux on March 23rd, 1917. The enemy opened fire from the surface and sank the vessel with shells. Eight of her crew were killed. The captain was among the survivors.

EXECUIVE

American Export Lines; 1920; American International S.B. Corp.; 4,978 tons; 390x54-2x27-8; turbine engines. The American steamship *Executive* was torpedoed and sunk by a German submarine on March 5th, 1943, about 300 miles W. of Tromsø on a voyage from Murmansk to Loch Ewe. Eight of her crew and one gunner were killed.

EXETER

British Navy, heavy cruiser; 1929; Devonport Dockyard; 8,390 tons; 575x58x17; 80,000 i.h.p.; 32 knots; turbine engines; 3-drum boilers; six 8 in. guns, eight 4 in., four 3pdr., 6 T.T., 2 aircraft.

The 8 in. gun cruiser *Exeter* first came into prominence at the battle of the River Plate, which ended in the destruction of the German pocket battleship *Admiral Graf Spee* (which see) in December, 1939. The ship, then commanded by Capt. F. S. Bell, sustained the full weight of the enemy's heavy guns until her consorts, *Ajax* and *Achilles*, arrived. Four of her six 8 in. guns were put out of action; her steering gear was smashed and hand steering had to be employed. Of her complement, five officers and 56 ratings were killed and three officers and 20 ratings wounded. After the battle she was sent home for a refit and early in 1942 was in Far Eastern waters. On February 27th, under command of Capt. O. L. Gordon, M.V.O., she formed one of a force of cruisers and destroyers under Rear-Admiral K. Doorman of the Royal Netherlands Navy engaged in repelling a Japanese landing in the Dutch East Indies. The Allied force comprised, beside *Exeter*, the Dutch cruisers *De Ruyter*, 6,450 tons, seven 5-9 in. guns (flagship) and *Java*, 6,670 tons, ten 5-9 in. guns, the Australian cruiser *Perth*, 7,040 tons, eight 6 in. guns, the U.S. heavy cruiser *Houston*, 9,050 tons, nine 8 in. guns, and the Dutch destroyer *Kortenaer* with the British destroyers *Electra*, *Encounter* and *Jupiter*. Not one ship of this unfortunate squadron escaped destruction. The Japanese force comprised the cruisers *Nati* and *Haguro*, 10,000 tons, ten 8 in. guns apiece, two lighter cruisers and about a dozen destroyers.

Action was joined about 4 o'clock in the afternoon, *Exeter* receiving a hit from an 8 in. shell which caused great damage in her boiler room, putting six of her eight boilers out of action and considerably reducing her speed. In these circumstances she had no alternative than to go about for Sourabaya as she could not keep up with her consorts.

At Sourabaya she made contact with the U.S. destroyer *Pope* and later was joined by *Encounter*, the three ships leaving under cover of night for Australia. For this voyage *Exeter's* maximum speed was at first 15 knots, but her engine room staff worked heroically through the night and by morning three more boilers were in use and speed had increased to 26 knots. Her plight was still very grave, however, as she had expended four-fifths of her 8 in. gun ammunition in the recent action and was in no condition to fight a prolonged engagement. At 9.35 on the morning of March 1st the ships ran into three Japanese cruisers and some four or five destroyers and *Exeter* sent out a wireless message that she was about to engage the enemy. Despite the odds the battered cruiser fought well for over two hours after which time, at just before noon, she was sunk by her crew. Her boilers had been wrecked and all her ammunition expended before she sank.

The loss on board *Exeter* in both actions amounted to 54 officers and men killed. The survivors were taken prisoner by the Japanese and no less than 152 of them died in captivity. Capt. Gordon, who was released at the conclusion of hostilities, had preserved his records of the actions in a tube of shaving cream.

The destroyer *Encounter* sank shortly after the cruiser, but *Pope*, which scored a hit on a cruiser, ran into a rain squall and was not located for more than an hour, at the end of which time she was attacked and sunk by Japanese bombers.

EXFORD

Tatem Steam Nav. Co.; 1914; Bartram & Sons; 5,886 tons; 400 X 52x25-4; 453 n.h.p.; triple-expansion engines. The British ship *Exford* was torpedoed and sunk by a German submarine on July 14th, 1917, 180 miles W. by S. \ S. of Ushant. Six of the crew were killed.

EXMOOR

British Navy, destroyer; 1939; Vickers-Armstrong; 904 tons; 272-3x28-2x7-7; 19,000 s.h.p.; 32-5 knots; turbine engines; 3-drum boilers; four 4 in. guns, 8 smaller.

The destroyer *Exmoor*, Lt. Cdr. R. T. Lampard, was escorting a convoy off Lowestoft on the night of February 25th, 1941, when she was attacked by a flotilla of German torpedo boats. *Exmoor* put up a strong defence of her convoy but was torpedoed in the action and sank with the loss of four officers, including her commander, and 100 ratings. No ships of the convoy suffered loss or damage.

EXMOUTH

Emigrant ship; 1835 (circa); 320 tons.

The sailing vessel *Exmouth*, Capt. I. Booth, left Londonderry on Sunday, April 25th, 1847, for Quebec with a crew of 11 and 240 emigrants, and three women passengers. The vessel was registered for 165 passengers, but by counting two children to one adult it was possible to comply with the very easy-going regulations of the time. The ship encountered bad weather from the commencement of the voyage and on the night of Wednesday, the 28th, the captain, decided to run for shelter. He picked up a light which he assumed to be that of Tory Island, but was badly out in his reckoning and on nearer approach it was seen to be the flashing light of pransa on the point of the Runs of Islay. The ship was by this time too close inshore and she was dashed upon the rocks of the island, where she foundered.

During the storm the emigrants had been battened below deck and they were drowned without the slightest opportunity of escape.

The survivors were three seamen, those lost numbered 251 persons.

EXMOUTH

British Navy, destroyer; 1934; Portsmouth Dockyard; 1,475 tons; 343x33-7x8-7; 38,000 s.h.p.; 36knots; turbine engines; 3-drum boilers; five 4 • 7 in. guns, 7 smaller, 8 T.T. The destroyer *Exmouth*, Capt. R. S. Benson, was either mined or torpedoed in the Moray Firth on January 21st, 1940. Loss by submarine torpedo is considered the more probable. Capt. Benson, 15 officers, and 173 ratings were killed.

EXPORT

Russian Commercial S.S. Co.; 1902; R. Craggs & Sons; 2,712 tons; 320 • 1X 45 • 1 X 21 • 4; 263 n.h.p.; triple-expansion engines. The Russian steamship *Export* was torpedoed and sunk by a German submarine in the North Sea on August 9th, 1917.

EXPOSITOR

American Export Lines; 1919; American International S.B. Corp.; 4,959 tons; 390x54-2x27-6; 600 n.h.p.; turbine engines. The American steamship *Expositor* was torpedoed and sunk

by a German submarine on February 22nd, 1943, about 900 miles E. of Newfoundland on a voyage from Belfast Lough to New York. Six of her crew were killed.

EXPRESS

South Western Steam Navigation Co.; 1847; Ditchburn & Mare; 311 tons; 160x22-1x11; 13 knots; annular cylinder engines; paddles 18ft. diam.

The paddle steamer *Express* was owned by the London and South Western Railway through the South Western Steam Navigation Co., as at that date, 1847, permission had not been granted to railway companies to own steamships. The vessel was built in the very short time of six weeks, having engines installed which were originally intended for a gunboat of the Royal Navy. These engines were what was known as annular cylinder engines and caused some sensation in engineering circles at the time.

In 1848 the *Express* was temporarily taken over by the government, who placed Capt. Paul, R.N., in command, and sent her to Havre to receive the fugitive ex-King Louis Philippe of France, who came on board in the guise of a fisherman. The *Express* then went to Littlehampton where the ex-King was put ashore.

The ship was wrecked in the Jailer Passage, off St. Corbiere, Jersey, on September 20th, 1859. She had on board 200 passengers and crew, of whom three passengers were drowned in a panic rush for the boats. The captain had been taken ill and his absence from the bridge left the course of the ship in less experienced hands, and was a contributory cause of the wreck.

EXPRESS

American Export Lines; 1940; Bethlehem Steel Co.; 6,736 tons; 451-9x66-2x28-9; turbine engines.

The American steamship *Express* was torpedoed and sunk by a submarine June 27th, 1942, about 200 miles off Mozambique on a voyage from Bombay to Table Bay. Fourteen of her crew of 56 were lost.

F. W. HARRIS

F. W. HARRIS

Harris & Dixon; 1877; Pearse; 1,834 tons; 280-5x33-7x24; 220 h.p.; compound inverted engines.

The British cargo ship *F. W. Harris* was wrecked on July 1st, 1880, at Cape Chance Cove, N.F.L., while on a voyage in ballast from Cardiff to Montreal.

FABIAN

Ellerman Lines; 1919; W. Gray & Co.; 3,059 tons; 331 -2x 46-8x23-2; 407n.h.p.; triple-expansion engines. The British steamship *Fabian*, on a voyage from Liverpool to Istanbul via the Cape, was torpedoed, shelled and sunk by a German submarine on November 16th, 1940, about 300 miles W. of Cape Palmas, Liberia. Six of her crew were killed.

FABIO FILZI

Lloyd Triestino; 1940; Cantieri Riuniti DelVAdriatico; 6,836 tons; 463-9x62-3x25-4; oilengines.

The Italian motor vessel *Fabio Filzi* was torpedoed and sunk by a British submarine on 13th December, 1941, 15 miles S. of Taranto.

FABRIANO

Italian Government; 1909; Swan, Hunter & Wigham Richardson; 2,943 tons; 322-7x46-1x19-2; triple-expansion engines. The steamship *Fabriano* was formerly the French *Mayenne*, seized by the Italians. On April 11th, 1943, she was torpedoed and sunk by a British aircraft near Cape Gallo.

FACTO

B. Stolt-Nielsen; 1904; Short Bros.; 2,372 tons; 295x45-1x 20-8; 257n.h.p.; triple-expansion engines.

The Norwegian steamship *Facto* was torpedoed and sunk by a German submarine in the English Channel on September 16th, 1917.

FACTOR

George Gibson & Co.; 1903; S. P. Austin & Son; 1,178 tons; 227-9x35x14-6; 173 n.h.p.; triple-expansion engines. The

British cargo ship *Factor* sank after a collision in position 54°30'N., 0°23'W. on May 9th, 1919, while on a voyage in ballast from Antwerp to Leith.

FAGERHEIM

D/S A/S Fagerheim; 1938; Kaldnes Mek. Verks.; 1,590 tons; 248-6x42-2x17-9; 205n.h.p.; compound engines. The

Norwegian steamship *Fagerheim* was torpedoed and sunk by a German submarine on January 14th, 1940, in the Bay of Biscay. Fourteen of her crew were killed.

FAGERNES

Societa Nazionale di Navigazione; 1916; Osaka Iron Works; 3,204 tons; 305x43-7x27-2; 288 n.h.p.; 10 knots; triple-expansion engines.

The Italian steamship *Fagernes* left Swansea at 9.30 p.m. on March 17th, 1926, under command of Capt. V. Ventura with a cargo of 4,500 tons of coal for Leghorn. The vessel carried a crew of 31. Some two hours after leaving port she sighted the lights of another vessel on the starboard bow. There was a slight haze and a choppy sea. The lights of the strange vessel were sighted again much nearer the *Fagernes* and the captain ordered his helm hard-a-starboard and sounded his siren but too late to prevent a collision. The Italian steamship was struck near the after mast and Nos. 3 and 4 holds were flooded. The ship sank by the stern at such an angle as to render it impossible to launch the lifeboats, but the jolly boat was launched from the side of the ship as she heeled over. Ten men managed to get away in this, narrowly escaping being drawn down when the steamship foundered.

The s.s. *Cornish Coast*, 616 tons, of the Coast Line, put into Cardiff some hours later with damage to her bows and reported having been in collision with an unknown steamship off the Scarweather lightship, 15 miles from Swansea. She had made signals in morse and had remained in the vicinity for about an hour without sighting the ship or any survivors.

The ten men in the jolly boat were picked up by the s.s. *Skeldon* and landed at St. Ives. It was stated later that the *Fagernes* had sent

out S.O.S. calls, but these were not received owing to a wireless concert at Swansea interrupting their reception. The total number drowned was 21.

FAGERSTEN

Skips A/S Akershus; 1921; Eltringhams; 2,342 tons; 290 X 44x20-8; 203 n.h.p.; triple-expansion engines. The Norwegian steamship *Fagersten* was torpedoed and sunk by a German submarine on October 13th, 1942, about 500 miles E. of Belle Isle Strait, with the loss of 19 lives.

FAIDHERBE

Pascal, Buhan & Cie.; 1882; R. Thompson & Son; 1,589 tons; 240 X 35 x 15 • 1; 160 n.h.p.; compound engines. The French steamship *Faidherbe* was sunk in a collision with the French steamship *Mitidja*, 1,174 tons, on October 23rd, 1900, off Alicanti, in fog. Twenty-four of the crew were drowned; eight survivors were picked up by the *Mitidja*.

FAIRFIELD

Lawrence; 1833; Hernosand; 434 tons.

The wood sailing ship *Fairfield* left Calcutta on July 6th, 1852, for England with a crew of 27. The ship experienced good weather until off the coast of Africa when she ran into a gale. She was driven ashore 110 miles S. of Port Natal on September 7th and was broken up by heavy seas. The captain, first and second officers and 17 men were drowned, but seven seamen managed to reach shore in an exhausted condition. Fortunately they fell in with a party of Kaffirs, by whom they were well treated, and were eventually brought to a South African town.

FAIRFIELD CITY

Isthmian S.S. Co.; 1921; Chickasaw S.B. & Car Co.; 5,686 tons; 424-2x56-2x26-5; turbine engines.

The American steamship *Fairfield City* was bombed and sunk by German aircraft on July 5th, 1942, between Reykjavik and North Russia. Eight of her crew were killed.

FAIRHOLM

McCalman & Co.; 1871; A. & J. Inglis; 196 tons; 120x20-1x 10-8; 40 n.h.p.; compound engines.

The Glasgow steamship *Fairholm* was off the north coast of Ireland in dense fog when she struck a rock and foundered on, or about, August 24th, 1874. The captain and several of the crew were drowned.

FAIRMOUNT

Montreal Transportation Co.; 1903; C. S. Swan & Hunter; 1,895 tons; 248-6x42x20-6; 210n.h.p.; triple-expansion engines.

The Canadian cargo ship *Fairmount* was wrecked on August 23rd, 1915, in 22° 15' N., 73° 44' W., while on a voyage from Newport News to Cienfuegos carrying a cargo of coal.

FAIRY

British Navy, sloop; 1826; Chatham Dockyard; 233 tons; 90-2x24-7x11; two 12pdr guns.

The sloop *Fairy*, Capt. W. Hewett, was brig rigged and was used as a survey vessel. Her official complement was 55 officers and men, but at the time of her loss she had 63 persons on board. She left Harwich on a surveying cruise on November 12th, 1840.

Soon after putting to sea the sloop encountered a violent gale which drove her ashore on the coast of Norfolk. So heavy were the seas that it proved impossible to send help from shore, and the vessel broke up and sank with all on board.

FAIRY

British Navy, destroyer; 1897; Fairfield Shipbuilding Co.; 380 tons; 5,700 i h.p.; 30 knots; triple-expansion engines; Thorny-croft boilers; one 12pdr. gun, five 6pdr., 2 T.T. The destroyer *Fairy* rammed and sank the German submarine, *UC-75*, in the North Sea on May 31st, 1918. As a result of this the *Fairy* sustained damage which caused her to sink later. Her official complement was 60.

FAJA DE ORO

Petroleos Mexicanos S.A.; 1914; *Hawthorn, Leslie & Co.*; 6,067 tons; 433-5x54-6x32-4; 536n.h.p.; triple-expansion engines.

The Mexican tanker *Faja de Oro* was torpedoed and sunk at 2.15 a.m. on May 21st, 1942, off Key West on a voyage from Philadelphia to Tampico. Ten of her crew of 37 were lost.

FALABA

Elder Line; 1906; *A. Stephen & Sons*; 4,086 tons; 380 -5 X 47-4x22-9; 424 n.h.p.; 14 knots; triple-expansion engines. The steamship *Falaba*, Capt. Davis, left Liverpool at 6 p.m. on Saturday, March 27th, 1915, for Sierra Leone. She carried 151 passengers and 96 crew, together with cargo valued at £50,000. At 11.40 on the morning of the 28th, when 38 miles W. of the Smalls lighthouse, she sighted a submarine flying the white ensign but as she came closer this was hauled down and the German naval ensign substituted. The submarine, which was the *U-28*, 870 tons, Cdr. Baron von Forstner, who had sunk the Yeoward liner *Aguila* (which see) on the previous day, immediately signalled 'Stop and abandon ship'. To this signal the *Falaba* paid no attention but increased to full speed. A second signal then came from the submarine, 'Stop, or I will fire into you'. As the *U-28* could do 16 knots on the surface, Capt. Davis decided that he had no alternative but to obey, as he could not outpace the submarine. He therefore stopped his ship and swung out five of his boats but had no time to do more before the *U-28* fired a torpedo at a range of 150 yards. She remained afloat for barely ten minutes after the explosion.

The steam-drifter *Eileen Emma*, Skipper George Wright, picked up 40 persons, six of whom, including Capt. Davis, died shortly afterwards. The drifter *Wenlock*, Skipper Denis Randleson, rescued another eight, of whom two died. Altogether 104 persons perished.

FALCON

British Navy, destroyer; 1899; *Fairfield Shipbuilding Co.*; 408 tons; 5,700 i.h.p.; 30 knots; triple-expansion engines; *Thornycroft boilers*; one 12pdr. gun, five 6pdr., 2 T.T. The destroyer *Falcon* was sunk in collision in the North Sea on April 1st, 1918. Her official complement was 60.

FALK

Brodrene Biornstad; 1904; *Fevigs Jernskibsbyg.*; 1,379 tons; 230 x35-1x14-6; 142 n.h.p.; triple-expansion engines. The Norwegian steamship *Folk* was sunk by a German submarine off Ushant on December 8th, 1916.

FALKE

German Navy, torpedo boat; 1926; *Wilhelmshaven Yard*; 800 tons; 277-7x27-5x9-2; 24,000 s.h.p.; 33 knots; turbine engines; *Schulz-Thornycroft boilers*; three 4-1 in. guns, two 1 pdr., 6 T.T. The German torpedo-boats *Falke*, *Jaguar*, *Mowe* and *Kondor* were lying at Havre on "D" Day, June 6th, 1944. The vessels were all of a small and not very fast class, but suitable for night raids on Allied shipping transporting troops and stores to Normandy. In the course of Allied air attacks upon shipping in the port of Havre the *Falke*, *Jaguar*, and *Mowe* were sunk on June 14th, and the *Kondor* met with the same fate on the 28th. The normal complement of ships of this class was 121.

FALKLAND

Palace Shipping Co.; 1889; *W. H. Potter & Sons*; 2,867 tons; 317-8x45-3x24-9.

The four-masted barque *Falkland*, Capt. G. S. Grade, was 135 days out from Tacoma and was off the Bishop Rock, Scilly Isles at 5.30 p.m. on June 22nd, 1901, in a strong south-westerly gale. The vessel missed stays while altering tack to pass the Bishop Rock and the tide carried her on to the rock. She struck amidships at about 6.45 p.m., her mainyard actually touching the lighthouse. She then slipped off the rock and drifted away, sinking about ten minutes later.

Lifeboats from St. Mary and St. Agnes landed 24 persons, including the captain's wife and child, but Capt. Gracie and five of the crew were drowned.

FALKLAND

H. Fredriksen; 1897; *D. & W. Henderson & Co.*; 4,877 tons; 400 X 49 • 2 X 28; 349 n.h.p.; triple-expansion engines. The Norwegian steamship *Falkland* was torpedoed and sunk by a German submarine off the south coast of Ireland on August 12th, 1917.

FALKLAND

A/S Det Dansk Franske D/S; 1888; *J. Readhead & Co.*; 2,224 tons; 290X39x18-8; 234 n.h.p.; triple-expansion engines. While on a voyage from Sutha to Stettin the Danish ship *Falkland* went ashore on December 10th, 1921, at Darsserort, east of Warne-munde, and broke up in a gale.

FALMOUTH

British Navy, light cruiser; 1910; *W. Beardmore & Co.*; 5,250 tons; 450x48-5x15-2; 22,000 i.h.p.; 27 knots; turbine engines;

Yarrow boilers; eight 6 in. guns, four 3pdr., 2 T.T. The *Falmouth* of the 3rd Light Cruiser Squadron, was commanded by Capt. J. D. Edwards and had a complement of 376. On August 19th, 1916, she was part of a cruiser screen guarding the Battle Fleet. In the course of this duty *Falmouth* engaged two Zeppelins which were shadowing the British, and just about 5 p.m. turned back to close her consorts. At that moment she ran across the line of fire of the German submarine *U-66*, Lt. Cdr. von Bothner, which discharged two torpedoes at less than 1,000 yards range, both striking *Falmouth* on the starboard side. The ship did not sink for many hours and throughout the following night proceeded under her own steam until the early morning, when she was taken in tow by two tugs from Immingham.

Quite unsuspected by the British the Germans had established a line of submarines running out from Flamborough Head to intercept shipping approaching the Humber. As *Falmouth* was towed directly across this line she became an easy target for the enemy and the *U-63* got home two torpedoes which, surprisingly enough, did not sink the vessel, though she had now been hit four times. She remained afloat for another eight hours and eventually sank five miles S. of Flamborough Head.

All the crew were taken off by the escorting destroyers and there was no loss of life, but one stoker died from his injuries later.

FAMA

C. Archer Arentz; 1889; *Russell & Co.*; 2,417 tons; 294-5X 40-2x18-4; 222 n.h.p.; triple-expansion engines. The Norwegian steamship *Fama* was sunk by a German submarine off the south-west coast of Spain on January 3rd, 1917.

FANAD HEAD

Ulster S.S. Co.; 1917; *Workman, Clark & Co.*; 5,200 tons; 390-4x51-8x29-8; 379 n.h.p.; triple-expansion engines. The steamship *Fanad Head* was torpedoed and sunk by a German submarine on September 14th, 1939, off the west coast of Ireland on a voyage from Montreal to Belfast.

FANDANGO

British Navy, minesweeper; 1918; *Great Britain*; 290 tons; 130x27x3-5; 450 i.h.p.; 10 knots; compound engines; one 3 pdr. gun.

The minesweeper *Fandango* struck a mine and sank in the Dvina River, North Russia, on July 3rd, 1919, when engaged in operations against the Bolsheviks. The vessel carried a complement of about 50.

FANE

V. Torkildsen; 1901; *Bergens Mek. Verksted*; 1,119 tons; 228-5x35^3x15-9; 101 n.h.p.; triple-expansion engines. The Norwegian steamship *Fane* struck a mine and sank in the North Sea on August 6th, 1917.

FANEFJELD

D/S A/S Storfjeld; 1920; *C. van der Giessen & Zonen*; 1,354 tons; 239-7x36-2x16-2; 126n.h.p.; triple-expansion engines. The Norwegian ship *Fanefjeld* left Bidulal on April 8th, 1942, and foundered near Isafjord some time before April 11th. The crew of 22, the pilot and one passenger were lost, and only one body was recovered.

FANNY

AlBSvenskaAmerika-MexikoLinien; 1887; CraigTaylor&Co.; 1,450 tons; 236x33-7x16-7; 147n.h.p.; triple-expansion engines.

The Swedish steamship *Fanny* was torpedoed and sunk by a German submarine in the Bay of Biscay on September 19th, 1918.

FANTASSIN

French Navy; destroyer; 1909; France; 450 tons; 222x22x10; 8,600hp.; 30 knots; turbine engines; Normand boilers; six 9pdr guns, 3 T.T.

The French destroyer *Fantassin* was sunk in a collision with the destroyer *Mameluk*, 407 tons, near Corfu on June 5th, 1916. The destroyer's normal complement was 77.

FANTOFT

Rasmus F. Olsen; 1898; Bergens Mek. Verksted; 1,034 tons; 225-5x32-1x13-2; 97n.h.p.; triple-expansion engines. The Norwegian steamship *Fantoft* struck a mine and sank in the Bay of Biscay on February 9th, 1918.

FAR

Skibs. AIS Skibsfart; 1921; Forth S.B. Co.; 2,475 tons; 295-5x 43-7x22-5; 182 n.h.p.; triple-expansion engines. Sailing from the Tyne for Copenhagen, the Norwegian ship *Far* went aground on January 8th, 1950, off Flekkefjord, and broke up during a storm.

FARADAY

Siemens Bros. & Co.; 1923; Palmers' Co.; 5,533 tons; 394-3 X 48-3x34-6; 530 n.h.p.; triple-expansion engines. The cable ship *Faraday* was bombed and set on fire by German aircraft on March 26th, 1941, half mile off St. Abbs Head, and sank the next day. Sixteen of her crew of 125 were killed. Ninety miles of submarine cable were recovered from the wreck.

FARMATYR

Holm&Wonsild; 1906; Howaldtswerke; 1,426 tons; 241 -2 X 36-1x16-5; 96 n.h.p.; triple-expansion engines.

The Danish steamship *Farmatyr* struck a mine and sank in the North Sea on September 2nd, 1916.

FARMSUM

Stoomv. Maats. Oostzee; 1929; A. Vuijk&Zonen; 5,237 tons; 421 -7x56-2x26-5; 549n.h.p.; quadruple-expansion engines. The Dutch steamship *Farmsum* was a unit of Convoy OB 252, bound from Blyth to Buenos Aires. She was unable to maintain her place in the convoy and became a straggler. On December 7th, 1940, some 500 miles N. of the Azores, she was torpedoed and sunk by the German submarine *U-99*, with the loss of 16 lives.

FARNHAM

Thompson Steam Shipping Co.; 1898; R. Thompson & Sons; 3,102 tons; 325-4x48-6x21-5; 289 n.h.p.; 9-5 knots; triple-expansion engines.

The steamship *Farnham* was torpedoed and sunk by a German submarine 90 miles N.W. of Fastnet on May 19th, 1917. Seventeen men, including the captain, were killed.

FARNHAM

Alpha S.S. Co.; 1913; Richardson, Duck & Co.; 4,793 tons; 380-2x50-9x28; 385 n.h.p.; triple-expansion engines. The British steamship *Farnham* was bombed by insurgent aircraft and set on fire on June 27th, 1938, at Alicante, during the Spanish Civil War. The fire was extinguished but the vessel sank with her back broken.

FARNLEY

J. Temperley & Co.; 1879; Smith; 2,002 tons; 280x35-2x 24-6; 200 h.p.; compound inverted engines.

The British cargo ship *Farnley* was wrecked on Horns Reef, Denmark, on December 31st, 1880, while on a voyage from Savannah to Reval carrying a cargo of cotton. All on board were lost.

FARO

E. B. Aabys Rederi A/S; 1919; Schiffsbau Ges. Unterweser; 844 tons; 212-9x31-4x13-2; 85n.h.p.; triple-expansion engines.

The Norwegian steamship *Faro* was torpedoed by a German submarine on January 27th, 1940, and was wrecked in Taracliff Bay, Orkney Islands, the following day. Seven of her crew were killed.

FASHODA

Maclay & McIntyre; 1898; J.Reid&Co.; 2,786 tons; 320 x 46x21-3; 236n.h.p.; triple-expansion engines. The British cargo ship *Fashoda* was wrecked two miles north of Cape Carvoeiro on August 30th, 1911, while on a voyage from Barry to Port Said carrying a cargo of coal.

FAULX

French Navy; destroyer; 1911; France; 745 tons; 237x24-9x 9-4; 14,000 h.p.; 31 knots; turbine engines; Normand boilers; two 4 in. guns, four 9pdr., 4 T.T.

The French destroyer *Faulx* was sunk in a collision in the Straits of Otranto on March 10th, 1918. The destroyer's normal complement was 62.

FAUSTINO R. SAN PEDRO

Altos Hornos de Vizcaya S.A.; 1890; J. Readhead & Sons; 2,420 tons; 290-5x40x19-8; 234 n.h.p.; triple-expansion engines.

Sailing from Gijon to Bilbao with a cargo of coal, the Spanish ship *Faustina R. San Pedro* was in collision with the *Maria Amalia* and sank on June 11th, 1937, S.W. of the Isla de Los Conejos, near Comillas.

FAUSTUS

Cia. Nav. Acapulco S.A.; 1943; Bartram & Sons; 6,379 tons; 416-8x56-6x34-0; triple-expansion engines. The Panamanian steamship *Faustus* went ashore during a gale on the night of November 6th, 1952, outside the northern entrance of the Nieuwe Waterweg and sank. The ship was on a voyage from Hampton Roads to Rotterdam with coal.

FAUVETTE

General Steam Navigation Co.; 1912; Sir R. Dixon & Co.; 2,644 tons; 315x43-9x18-7; 534n.h.p.; 15-34 knots; triple-expansion engines.

The steamship *Fauvette* rendered important and useful service during the First World War. When war was declared she was lying at Bordeaux and brought the British colony from that port to England. She later returned and acted as despatch vessel during the period that the French government remained at Bordeaux. In 1915 she brought the boom defence to the island of Mudros and laid it at the approaches to the harbour. During the Dardanelles campaign she served as a fleet auxiliary, carrying troops to and from Gallipoli and Salonika.

On March 9th, 1916, the *Fauvette*, under command of Cdr. H. J. Wilson, R.N.R., was steaming towards the Thames when she struck two mines off the North Foreland in quick succession. The ship sank in four minutes, taking with her two officers and 12 ratings.

Cdr. Wilson and the remaining members of the ship's company got away in the two port lifeboats.

FAVONIAN

F. Ley land & Co.; 1881; Oswald, Mordaunt & Co.; 2,282 tons; 342-5x34-5x23-5; 208n.h.p.; compound engines. The British cargo ship *Favonian* was wrecked on June 6th, 1900, near Bougaroni, Algeria, while on a voyage from Liverpool to Alexandria carrying a general cargo.

FAVOR

German Government; 1940; Langesunds Mek. Verksted; 1,323 tons; 251 -2x41-7x14-8; compound engines & L.P. turbine.

The steamship *Favor* was formerly Norwegian, seized by Vichy French authorities at Oran and later taken over by the Germans. On January 18th, 1943, she was sunk by British warships S.E. of Sardinia.

FAVORITA

Industrie Navali S.A.; 1906; R. Craggs & Sons; 3,576 tons; 349-8x49-8x23; 322 n.h.p.; triple-expansion engines. The Italian steamship *Favorita* was torpedoed by British aircraft on November 22nd, 1942, 80 miles E. of Cape Carbonara, and sank the next day.

FAVOURITE

Emigrant ship, Bremen; 1845 (circa); 450 tons. On the morning of Friday, April 29th, 1854, the sailing vessel *Favourite*, bound from Bremen to Baltimore with 191 emigrants was in collision off Start Point with the American ship *Hesper*, Capt. Jones, bound from Charleston to Antwerp. At the time of the collision, about 1.30 a.m., a thick rain was falling and there was a heavy sea with a strong westerly wind. Capt. Hoegman of the *Favourite* was in his berth and on coming on deck saw that his ship had been struck on the starboard side and cut down to the waterline. In company with the first officer and four seamen he jumped for the bows of the *Hesper* and succeeded in getting on board.

The vessels drifted apart after the impact and when last seen the *Favourite* was thronged with despairing emigrants for whom there was no hope of rescue. The roughness of the seas prevented the *Hesper* from rendering assistance, but she stood by till daybreak when no sign of the other ship or her passengers was visible.

The number drowned was 201, the six men who had jumped on to the *Hesper* being the only survivors.

FAWN

F. A. Jaques & Co.; 1883; Vulcan Iron Works; 1,131 tons; 230x32-2x15-3; 99 n.h.p.; compound engines. The British cargo ship *Fawn* foundered on February 1st, 1896, after striking a rock in Gijon Bay, while on a voyage from Vigo to Santander carrying a cargo of coal.

FAZILKA

British India S.N. Co.; 1890; W. Doxford & Sons; 4,152 tons; 366x48-2x26-5; 462 n.h.p.; triple-expansion engines. The British steamship *Fazilka* was wrecked on October 31st, 1919, on the east coast of Great Nicobar Island. She was on a voyage from Penang to Calcutta, carrying passengers and a general cargo.

FEARLESS

British Navy, destroyer; 1934; Cammell Laird; 1,375 tons; 329x33-25x8-5; 36,000 s.h.p.; 35-5 knots; turbine engines; 3-drumboilers; four 4-7 in. guns, 7 smaller, 8 T.T. The destroyer *Fearless*, Cdr. A. F. Pugsley, was one of a large escorting force of battleships, aircraft carriers, cruisers and destroyers taking an important convoy through the Central Mediterranean in July, 1941. On the 22nd the ships were sighted by Italian scouting aircraft and during the night attacks were made with indifferent success by high level and torpedo bombers. *Fearless* was the only ship among the large number present to suffer any vital damage. She was hit by a torpedo from one of the bombers and put out of action. It was not possible to take her in tow so her company was transferred to other ships and she was sunk by the British forces. Of her complement of 145 one officer and 24 ratings were killed.

A cruiser, a destroyer and one merchant ship suffered minor damage and sustained a few casualties, but the convoy was otherwise unscathed and reached its destination safely.

FECHENHEIM

Unterweser Reederei A.G.; 1930; Howaldtswerke A.G.; 7,871 tons; 499-2x63-lx—; oil engines. Sailing from Narvik to Emden with ore, the German motorship *Fechenheim* went aground in Maaloyssund on October 3rd, 1955, and broke in two.

FECHTELER

United States Navy, destroyer; 1943; United States; 1,450 tons; 306x36-9x10-7; 12,000 s.h.p.; 28 knots; turbine engines; two 5 in. guns, two 40 mm.A.A., six 20 mm.A.A., 3 T.T. The destroyer *Fechtelar* was torpedoed by a submarine N. of the Zafarin Islands, in lat. 35° IT N., long. 2° 23' W., on May 4th, 1944. The vessel carried a complement of 220.

FEDERAL

McIlwraith, McEacharn & Co.; 1890; W. Doxford & Sons; 2,403 tons; 290x40x19-6; 256 n.h.p.; 10 knots; triple-expansion engines.

The *Federal* was a steamship engaged in the Australian coastal trade. On March 21st, 1901, she was on a voyage from Port Kembla to Albany, West Australia, with a cargo of coal. She was sighted by the lighthouse keeper at Gabo Island, there being a full gale at the time. The keeper subsequently reported that she was hugging the shore and that, considering the sea, he was surprised that she was not in more open water. The ship was last seen near Ram Head. Later on the 21st wreckage from the ship's superstructure was washed ashore on Gabo Island.

At the time of the disaster the ship was carrying a crew of 30, but no passengers.

FEDERAL

American Republics Corp.; 1901; Chicago S.B. Co.; 2,881 tons; 303-2x42-2x23-2; 184 n.h.p.; triple-expansion engines. The American tanker *Federal* was shelled and sunk by a German submarine on April 30th, 1942, five miles N. of Gibara on a voyage from Tampa to Banas. Five of her crew of 33 were killed.

FEDERICO

G. Costa fu Andrea; 1920; Bremer Vulkan; 1,466 tons; 247-3x33-9x19-4; 106 n.h.p.; triple-expansion engines. The Italian steamship *Federico* was torpedoed and sunk on July 28th, 1941, off Cape Bonifati, Cosenza.

FEDERICO CONFALONBERI

1911; W. Doxford & Sons; 4,434 tons; 369-5x50x26-3; 383 n.h.p.; triple-expansion engines.

The Austrian steamship *Izged*, which had been requisitioned by the Italian Government and renamed *Federico Confalonieri*, was torpedoed and sunk by a German submarine off the south-west coast of Ireland on March 5th, 1917.

FEDERICO GAROLLA

F. Garolla; 1889; Palmers' Co.; 2,180 tons; 279x37-7x19-1; 216 n.h.p.; triple-expansion engines. Sailing from Fiume to Novorossisk the Italian steamship *Federico Garolla* sank on April 19th, 1930, between Zante and Cephalonia after a boiler explosion. Only three of her crew of 23 survived.

FEDORA

Giovanni Gavarone; 1910; W. Doxford & Sons; 5,016 tons; 387-4x51-7x27-6; 338 n.h.p.; triple-expansion engines. The Italian steamship *Fedora* was torpedoed and sunk by a British submarine on January 10th, 1944, 35 miles off Cephalonia.

FEHMARN

Rochling, Menzell & Co.; 1915; Howaldtswerke A.G.; 1,200 tons; 233-3x34-6x15-1; 84 n.h.p.; triple-expansion engines. The *Fehmarn* capsized and sank on December 31st, 1921, 180 miles E. of Spurn Head on a voyage from the Tyne to Hamburg with coal. The ship took a heavy list during a gale and never recovered.

FEISTEIN

Hans Waage; 1913; Blyth S.B. Co.; 2,991 tons; 324-2x46-6x22-6; 265 n.h.p.; triple-expansion engines. The Norwegian steamship *Feistein* struck a mine and sank in the North Sea on March 31st, 1917.

FELIPE

Viuda de F. Astorqui; 1888; R. Dixon & Co.; 2,204 tons; 275-2x37x19; 185 n.h.p.; triple-expansion engines. The Spanish ship *Felipe* sank after a collision in the English Channel on September 3rd, 1926, while sailing from Rotterdam to Cadiz with coal.

FELIX HENRI

Mme. Nicolardot; 1933; Fredriksstad Mek. Verks.; 2,526 tons; 300-9x46-6x22-5; 138 n.h.p.; compound engines. The French steamship *Felix Henri* was torpedoed and sunk by a submarine on August 28th, 1943, 20 miles S.W. of Elba.

FELIXSTOWE

FELKSTOWE

British Navy, fleet minesweeper; 1940; Lobnitz & Co.; 672 tons; 174x28-5x9-5; 2,400s.h.p.; 16 knots; turbine engines; 3-drum boilers; one 3 in.A.A. gun, two 20 mm.A.A., 4 m.g. The fleet minesweeper *Felixstowe*, Lt. Cdr. C. G. Powney, R.N.V.R., struck a mine and sank off Sardinia on December 18th, 1943.

FELLSIDE

Quayside Shipping Co.; 1917; *J. Blumer & Co.*; 3,509 tons; 356-3X48-7x23-9; 311 n.h.p.; triple-expansion engines. The British steamship *Fellside* was torpedoed and sunk by a German submarine on July 17th, 1940, about 130 miles W. of Ireland on a voyage from the Tees to Sydney, N.S. Twelve of her crew were killed.

FELTORE

Ore S.S. Corp.; 1917; *Bethlehem Steel Co.*; 7,117 tons; 449-1x57-2x34; 556n.h.p.; turbine engines. The American ship *Feltore* went ashore on August 1st, 1930, at Cruz Grande after a voyage from Sparrows Point, Baltimore, in ballast. She broke her back on the rocks.

FELTRE

1904; *Bremer Vulkan*; 6,455 tons; 409-4x52-8x28; 387 n.h.p.; quadruple-expansion engines. The German steamship *Rhenania*, which had been requisitioned by the Italian Government and renamed *Feltre*, was torpedoed and sunk by a German submarine in the North Sea on August 26th, 1917.

FELTRIA

Cunard S.S. Co.; 1891; *W. Denny & Bros.*; 5,254 tons; 420 x 48-2x30-6; 666 n.h.p.; 13 knots; quadruple-expansion engines. The steamship *Feltria* was torpedoed and sunk by a German submarine eight miles S.E. of Mine Head, Co. Waterford, on May 5th, 1917. The captain and 44 of the crew were killed.

FENAY LODGE

Fenay Steamship Co.; 1904; *J.L. Thompson & Sons*; 3,223 tons; 326-1x48x23-8; 299n.h.p.; 10 knots; triple-expansion engines. The steamship *Fenay Lodge* was torpedoed and sunk by a German submarine 250 miles N.W. by W.£W. of Fastnet, on March 6th, 1917. Five men, including the captain, were killed.

FENELLA

Isle of Man Steam Packet Co.; 1937; *Vickers Armstrongs*; 2,376 tons; 314-6x46-1x17-1; 1,379n.h.p.; 21 knots; turbine engines. The steamship *Fenella*, Capt. W. Cubbon, was acting as an auxiliary transport during the evacuation of the British Army from the Dunkirk beaches. On May 29th, 1940, she was lying on the outside of the Eastern Arm of Dunkirk harbour in company with the destroyers *Grenade* and *Jaguar* and the paddle steamship *Crested Eagle*. All five ships were heavily bombed and the *Fenella* was hit and sank the next day. Fifteen men were killed. Capt. Cubbon was among the survivors. The *Grenade* was set on fire and sank soon afterwards.

The full story of the Dunkirk evacuation is told under the destroyer *Grafton*.

FENG YANG MARU

Toa Kaiun K.K.; 1915; *Osaka Iron Works*; 3,977 tons; 320 X 47x14-7; 202 n.h.p.; triple-expansion engines. The steamship *Feng Yang Mam* was bombed and sunk by U.S. land-based aircraft on August 31st, 1944, near Kiukiang, Yangtze River.

FENICIA

"Adriatica" Soc. Anon. di Nav.; 1919; *Toledo S.B. Co.*; 2,584 tons; 260-9x43-8x25-4; 315 n.h.p.; triple-expansion engines. The Italian steamship *Fenicia* was torpedoed and sunk by a British submarine on March 10th, 1941, about 65 miles S.E. of the Kerkenna Islands.

FENSTANTON

William Milburn & Co.; 1882; *A. Leslie & Co.*; 2,465 tons; 300x37x27-4; 300 h.p.; compound engines. The British cargo ship *Fenstanton* was wrecked off Saddle Island, Queensland, on September 30th, 1884, while on a voyage from Newcastle, N.S.W., to Singapore carrying a cargo of coal.

FEODOSIA

Hamburg-Amerika Linie; 1922; *Akt. Ges. "Neptun"*; 3,075 tons; 337-7x48-3x20-9; 246n.h.p.; triple-expansion engines. The German steamship *Feodosia* was bombed and sunk by British aircraft on the night of April 4th, 1945, in the Kattegat.

FERDINAND A.

J. Stern; 1888; *Tyne Iron S.B. Co.*; 2,062 tons; 286-7x37x 22-1; 229 n.h.p.; triple-expansion engines. The French steamship *Ferdinand A.* was torpedoed and sunk by a German submarine off Ushant on May 21st, 1917.

FERDINAND BOL

Netherlands Government; 1919; *Columbia River S.B. Corp.*; 5,704 tons; 410x54-2x27-6; turbine engines. The Dutch ship *Ferdinand Bol* sank after a collision in fog with the *Norse King* off Newfoundland on July 30th, 1942.

FERMOY

British Navy, fleet minesweeper; 1919; *Dundee Shipbuilding Co.*; 710 tons; 231x28-3x7-5; 2,200 i.h.p.; 16 knots; triple-expansion engines; Yarrow boilers; one 4 in. gun, 1 smaller. The fleet minesweeper *Fermoy* was lying in dock at Malta on May 4th, 1941, when she was bombed and totally destroyed by enemy aircraft. The vessel's normal complement was 73.

FERN

Laird Line; 1900; *Ailsa Shipbuilding Co.*; 444 tons; 180-2 x 29x21-1; 120 n.h.p.; 8-5 knots; triple-expansion engines. The steamship *Fern* was torpedoed and sunk by a German submarine five miles E. by N. of the Kish lighthouse on April 22nd, 1918. The captain and 12 of her crew were killed.

FERN HOLME

Hine Brothers; 1883; *J. L. Thompson & Sons*; 2,610 tons; 310-6x40-2x24-5; 325 h.p.; compound engines. The British cargo ship *Fern Holme* was wrecked on July 9th, 1888, in Holyrood Bay, N.F.L., while on a voyage from Montreal to London with a cargo of deals.

FERNANDO L. DE YBARRA

Altos Hornos de Vizcaya Soc. Anon.; 1919; *Soc. Espanola de Construccion Naval*; 3,308 tons; 314 X 48 • 1 X 22 • 1; 304 n.h.p.; triple-expansion engines. The Spanish ship *Fernando L. de Ybarra* went aground on December 20th, 1943, at Baleal Beach near Cabo Carvoeiro and sank.

FERNANDO POO

Compania Transmediterranea; 1935; *Compania Euskalduna*; 6,914 tons; 391-7x53-8x29; 1,240n.h.p.; oilengines. The Spanish motorship *Fernando Poo* was sunk by gunfire from the insurgent warship *Ciudad de Mahon* at Bata in October, 1936, during the Spanish Civil War.

FERNCASTLE

AISGlittre; 1936; *Deutsche Werft A.G.*; 9,940 tons; 492-9X 66-1x36-4; 1,165n.h.p.; oilengines. The Norwegian motorship *Ferncastle*, sailing from Fremantle to Abadan with wheat, was intercepted by a German raider with an attendant motor torpedo boat on June 17th, 1943, about 700 miles S. of Cocos Island. She was struck by four torpedoes from the torpedo boat and sunk by gunfire from the raider. Two men were killed on board and the remainder of the crew put off in two boats. One of these with 16 men was never seen again. The other reached Madagascar 30 days later, six of the 19 men on board having died during the 2,800 mile voyage.

FERNDALE

AISGlittre; 1925; *Deutsche Werft A.G.*; 4,302 tons; 382-7X 53-4x24-9; 493n.h.p.; oilengines.

The Norwegian motorship *Ferndale*, under German control, was bombed and sunk by British aircraft on December 16th, 1944, off the coast of Norway.

FERNDENE

Dene Steam Shipping Co.; 1899; *Northumberland Shipbuilding Co.*; 3,770 tons; 340X48x25-9; 316 n.h.p.; 10 knots; triple-expansion engines.

The steamship *Ferndene* was torpedoed and sunk by a German submarine 150 miles W. of Bishop Rock on April 24th, 1917. The captain and eight of her crew were killed.

FERNEBO

A. Brostrom & Son; 1912; *Oskarshamns M.V. Aktieb.*; 1,326 tons; 228-8x36x16; 126n.h.p.; triple-expansion engines.

The Swedish steamship *Fernebo* struck a mine and sank in the North Sea on February 9th, 1917.

FERNHILL

AJSGlittre; 1926; *KockumsMek. Vcerks.*; 4,116 tons; 377-6x 54x22-9; 438n.h.p.; oilengines.

The Norwegian motorship *Fernhill* was torpedoed and sunk by a German submarine on August 7th, 1943, about 300 miles W. of Sierra Leone on a voyage from Liverpool to Montevideo. Five of her crew were killed.

FERNLANE

Dampskätsk Garonne; 1927; *Burneister & Wain*; 4,310 tons; 376-5x53-8x23-6; 489n.h.p.; oilengines. The Norwegian motorship *Ferlane* was torpedoed and sunk by a German submarine on May 7th, 1941, about 400 miles from Sierra Leone.

FERNTOWER

GohGwanLoo; 1867; *Denton, Gray & Co.*; 943 tons; 212-8x 28-6x14-7; 110hp.

The steamship *Ferntower* was lost near Saigon on August 26th, 1886, on a voyage from Saigon to Hongkong. About 50 persons were drowned.

FERONIA

Gladstone & Co.; 1890; *Ropner&Son*; 2,966 tons; 315X40-5x 20-2; 256 n.h.p.; triple-expansion engines.

The British cargo ship *Feronia* was wrecked on March 13th, 1906, in the Maulmain River. She was on a voyage from Maulmain to Port Said with a cargo of rice.

FERRET

British Navy, sloop; 385 tons; 8 guns.

The brig rigged sloop *Ferret*, Lt. H. M. Carre, was wrecked off Dover on March 29th, 1869. There was no loss of life.

FERRUCCIO

1881; *Schlesinger, Davis & Co.*; 2,192 tons; 290-4x37-2x24-5; 228 n.h.p.; compound engines.

The Italian steamship *Ferruccio*, formerly named *Cicerone*, was torpedoed and sunk by a German submarine in the North Sea on February 6th, 1917.

FERRYHILL

Aberdeen Coal & Shipping Co.; 1919; *Hall, Russell & Co.*; 1,086 tons; 221-1x33-4x14; 178 n.h.p.; triple-expansion engines.

The steamship *Ferryhill*, Capt. Wm. Stevens, on a voyage from Blyth to Aberdeen, struck a mine and sank on January 21st, 1940, with the loss of 11 lives.

FIANONA

Soc. Anon. Coop. di Nav. "Garibaldi"; 1915; *Stabilimento Tecnico*; 6,660 tons; 449-6x57-3x31-1; 370n.h.p.; triple-expansion engines.

The Italian steamship *Fianona* was torpedoed and sunk by a Dutch submarine on June 12th, 1941, S. of Vada, near Piombino.

FIDELIO

AISFidelio; 1930; *Burntisland S.B. Co.*; 1,843 tons; 265-8X 43 X18; 144 n.h.p.; triple-expansion engines. The Norwegian steamship *Fidelio* was torpedoed and sunk by a German submarine on November 2nd, 1942, off Great Yarmouth. Nine of her crew were killed.

FIDELITAS

Soc. Anon. di Nav. Mare Nostrum; 1914; *W. Hamilton & Co.*; 5,740 tons; 439-4x53x29-9; triple-expansion engines. The Italian steamship *Fidelitas* was bombed and sunk by Allied aircraft on November 27th, 1944, at Sula Fjord, Norway.

FIDELITY

British Admiralty; 1920; *H. & C. Gray son*; 2,456 tons; 264-8X41-3x18-8; 252 n.h.p.; triple-expansion engines. The steamship *Fidelity* was formerly the French *Le Rhin*, taken over by the Admiralty for convoy escort duty. On December 29th, 1942, while escorting a convoy from Liverpool to Halifax, she was torpedoed and sunk by a German submarine 200-300 miles N.N.W. of the Azores. All on board were lost, including 42 survivors from the *Empire Shackleton*, sunk on the previous day.

FIDRA

Chr. Salvesen & Co.; 1889; *R. Irvine & Co.*; 1,218 tons; 231-5 X 32 X14; 96 n.h.p.; triple-expansion engines.

The British cargo ship *Fidra* was wrecked near Amrum in January, 1909, while on a voyage from Burntisland to Rendsburg carrying a cargo of coal.

FIDRA

Scottish Navigation Co.; 1936; *Burntisland S.B. Co.*; 1,574 tons; 265X40-5X16-3; 111 n.h.p.; triple-expansion engines. The steamship *Fidra* was torpedoed and sunk by a German submarine on March 5th, 1943, about 250 miles W. of Cape Finisterre on a voyage from Almeria to Barrow. The captain, 13 crew and three gunners were lost.

FIERY STAR

1851; *Webb & Co., New York*; 1,361 tons. The full-rigged clipper ship *Fiery Star*, Capt. W. H. Yule, was formerly a famous unit of the Black Ball Line, when she was known as the *Comet*. Under the latter name she made some record passages—New York to San Francisco, 102 days; San Francisco to New York, 76 days; Liverpool to Hong Kong, 84 days. As *Fiery Star*, however, her career was less distinguished.

On April 1st, 1865, she left Moreton Bay, Queensland, for London, with 55 passengers and 41 crew, and a cargo consisting largely of wool. On the 19th, when 150 miles N.W. of the Chatham Islands, a quantity of wool which was stored in the fore-hold was found to be on fire. The outbreak was not considered serious at first and the captain gave orders for the hold to be sealed off in the hope that the flames might be stifled. Meanwhile the ship's course was changed for Lyttelton, New Zealand, but a gale-force wind compelled the captain to make for the Hauraki Gulf.

The fire was now taking firm hold of the ship and by the 23rd there was no other course than to abandon her. The boats available were, however, quite inadequate to accommodate all on board. Two had been washed away in the gale; two were unsuitable for a long sea voyage, leaving only two others for 96 people.

Capt. Yule called all hands and asked for volunteers to remain with the ship in the hope of sighting a passing vessel, while the remainder took to the boats. The first mate, Mr. W. C. Sargent, and 17 men volunteered to stay, and the captain with the passengers and the remainder of the crew, 78 all told, left in the two boats at 3 p.m. on the 23rd. They were never seen again.

Those left on board the *Fiery Star* now turned to fight the fire with great resolution. The gale still continued and on the 5th of May the raft constructed as a last means of escape was swept away. The ship still continued to burn, but the gale blew itself out and at 1 a.m. on the 12th the lights of a vessel were sighted. Rockets were sent up and the sailing ship *Dauntless*, Capt. Moore, from Dublin to Auckland, came alongside.

The resolute Mr. Sargent asked for help to fight the fire, but Capt. Moore declined as he felt the plight of the *Fiery Star* to be hopeless. Boats were sent and all the crew were taken off, the mainmast of the

FIFE

burning ship falling as the last boat left the side. Soon after this the ship sank.

The mate and his 17 men had upheld the highest traditions of their service. The people of Auckland, where they landed, were so impressed by their devotion and courage that the town presented Mr. Sargent with £80, and gave another £80 to be shared among the men.

H.M.S. *Brisk* carried out a search for the missing boats in the waters around the Chatham Islands, but without success.

FIFE

Sutherland S.S. Co.; 1907; *W. Doxford & Sons*; 3,918 tons; 350-5x49-1x24; 292 n.h.p.; triple-expansion engines. The British cargo ship *Fife* sank after a collision on February 15th, 1917, in 60° N., 9° W., while on a voyage from the Tyne to Cette carrying a cargo of coal.

FIFESHIRE

Turnbull, Martin & Co.; 1878; *W. Hamilton & Co.*; 1,353 tons; 260 X32-3X22-6; 140 h.p.; compound inverted engines. The British cargo ship *Fifeshire* was wrecked off Cape Roca on August 28th, 1883. She was carrying a cargo of coal on a voyage from Cardiff to Malta.

FIFESHIRE

Scottish Shire Line; 1898; *Clydebank Engineering & S.B. Co.*; 5,812 tons; 420x54-7x28-8; 493 n.h.p.; 12 knots; triple-expansion engines.

The liner *Fifeshire* left Melbourne toward the end of July, 1911 for London with three first class and 33 third class passengers. She called at Adelaide where she embarked another four passengers, the total number of persons on board when she left for England being 105. On the night of August 9th the liner was 20 miles S. of Cape Guardafui, near Aden, when at 10.30 p.m. in fine but hazy weather she stranded in about four fathoms. There was no loss of life occasioned by the stranding and next day the captain sent one of the lifeboats under Mr. Woods, the first officer, with five seamen to obtain assistance. Unfortunately this boat ran into a gale which swept her some 250 miles from the scene of the wreck and she was picked up five days later by the s.s. *Arkandearg* with her occupants at the point of exhaustion.

Meanwhile the position of the *Fifeshire* was decidedly uncomfortable as the seas were punishing her to a dangerous degree. The captain therefore decided to abandon her and four boats under the captain, second, third and fourth officers respectively were got away with all the remaining people. The last boat left at noon on the 11th and during daylight they managed to keep fairly near to each other. On the next morning, however, the captain's boat was alone, the second officer's boat which was nearest, having disappeared, and the other having been picked up by the Messageries Maritimes liner *Adour*. Later the same vessel picked up the captain's boat, but the second officer's boat could not be located.

A search by the Italian warship *Volturno* and the Indian Marine vessel *Dalhousie* failed to find any survivors and the boat had to be given up as lost. The number missing was 24, of whom ten were passengers.

FIJI

British Navy, cruiser; 1939; *John Brown & Co.*; 8,000 tons; 549 X62x16-5; 72,500 s.h.p.; 35 knots; turbine engines; 3-drum boilers; twelve 6 in. guns, eight 4 in., 16 smaller, 3 aircraft. The cruiser *Fiji*, Capt. P. B. R. W. Williams-Poulett, formed part of a force of cruisers and destroyers under Admiral King charged with the duty of preventing Italian convoys running from Greece to Crete with reinforcements and supplies. The Italians, having made an unsuccessful night attempt on May 21st, 1941, decided to change over to transit by day, escorted by very heavy formations of German dive bombers. On the morning of the 22nd a second convoy was reported S. of the island of Milos and the British steamed to intercept it in face of intense bombing attacks by the Germans. By afternoon the destroyer *Greyhound* had been sunk and it became necessary to send two other destroyers *Kandahar* and *Kingston*, to pick up survivors. While engaged upon this task they had the support of *Fiji* and *Gloucester* (which see) but after some hours the latter ship was hit amidships by a big bomb and sank. *Fiji* was now left to shift for herself against an overwhelming force of the Luftwaffe and

after shooting down a number of them she was hit and damaged so that her speed fell off to a considerable degree. A second attack under circumstances much more favourable to the enemy succeeded in sinking the cruiser off the island of Antikithera just before nightfall. A total of 17 officers and 224 ratings was lost when the vessel sank, 34 officers and 500 ratings being picked up by *Kandahar* and *Kingston*.

FIJIAN

Carriso Inc.; 1919; *Merrill-Stevens S.B. Corp.*; 3,381 tons; 333-8x48x24-9; 423 n.h.p.; oil engines.

The Panamanian motorship *Fijian* caught fire after an explosion on March 24th, 1937, about five miles off Arutua Island, Tuamotu Archipelago. Two days later she was abandoned and sank. She was on a voyage from San Francisco to Lae, New Guinea.

FILIA E. TRICOGLU

E. Tricoglu; 1896; *Sir R. Dixon & Co.*; 2,570 tons; 311-6x42-3x14-6; 249 n.h.p.; triple-expansion engines. On a voyage from Sulina to Sweden with a cargo of grain, the Greek steamship *Filia E. Tricoglu* was wrecked on January 27th, 1926, on Siphanto Island.

FILLEIGH

Atlantic Shipping & Trading Co.; 1928; *W. Pickersgill & Sons*; 4,856 tons; 395-5x55-4x25-9; 339 n.h.p.; triple-expansion engines.

The steamship *Filleigh*, on a voyage from London to Antwerp, was torpedoed and sunk by a German submarine on April 18th, 1945, ten miles E.N.E. of the North Foreland. Five of her crew were killed.

FINCHLEY

Watts, Ward & Co.; 1881; *J. Blumer & Co.*; 1,951 tons; 27lx37-1x24-3; 250 h.p.; compound inverted engines. The British cargo ship *Finchley* was wrecked off Nova Scotia on September 29th, 1884, while on a voyage from Coosaw to Dublin carrying a cargo of phosphate rock.

FINCHLEY

Watts, Watts & Co.; 1912; *J. L. Thompson & Sons*; 4,126 tons; 351-7x50-9x25-9; 350 n.h.p.; triple-expansion engines. The British cargo ship *Finchley* was wrecked on Trek Island on August 20th, 1915, while carrying a cargo of nitrate on a voyage from Mejillones to Archangel.

FINGAL

London & Edinburgh Shipping Co.; 1894; *W. B. Thompson & Co.*; 1,562 tons; 280x35x18-1; 474 n.h.p.; 14 knots; triple-expansion engines.

The steamship *Fingal* was torpedoed and sunk by a German submarine six miles E. by S. of Coquet Island at 10.50 a.m. on March 15th, 1915. The vessel carried a crew of 27, six of whom were killed.

FINGAL

D/S A/S International; 1923; *A/S Moss Varft*; 2,137 tons; 276-1x43-7x18-9; 188 n.h.p.; triple-expansion engines. The Norwegian steamship *Fingal* was torpedoed and sunk by a Japanese submarine on May 5th, 1943, off Coff's Harbour, N.S.W. Twelve of her crew were killed.

FINISTERE

Cie. Generale Transatlantique; 1908; *A. McMillan & Son*; 2,112 tons; 249x43x21^8; 92 n.h.p.; triple-expansion engines. The French steamship *Finistere* was lost in the Bristol Channel on or about June 11th, 1918, probably sunk by a German submarine.

FINLAND

Donald Currie & Co.; 1886; *A. McMillan & Son*; 1,363 tons; 230-6x33x15-9; 120 h.p.; compound engines. The British cargo ship *Finland* was wrecked on April 26th, 1887, on Great Fish Point, Cape Colony, while on a voyage from London to Durban with a general cargo.

FINLAND

Ellermarfs Wilson Line; 1884; Earless Co.; 1,828 tons; 271 -lx 35-lx18-6; 164 n.h.p.; triple-expansion engines. The British cargo ship *Finland* was in collision and sank on December 16th, 1917, approximately ten miles north-east of Auskerry, Orkney.

FINLANDE

Ministry of War Transport (Hellyer Bros.); 1937; Chant. & Atel. deSt.Nazaire; 1,343 tons; 232-3X37-8x17; oilengines. The British trawler *Finlande* was wrecked off Peterhead on December 18th, 1944, while on a voyage from Iceland to Hull.

FINNANGER

Westfal-Larsen&Co.; 1928; Nederlandsche Scheepsbouw Maats; 9,551 tons; 474-4x64-5x36-5; 806 n.h.p.; oil engines. The Norwegian tanker *Finnanger* left the Clyde on February 14th, 1942, in convoy for Halifax and Curacao. The convoy became dispersed and the *Finnanger* was last seen by the Norwegian tanker *Belinda* on the 26th, about 300 miles S. of Cape Race.

FINTRA

The South Georgia Co.; 1918; E. Finch & Co.; 2,089 tons; 248-8x41-7x19-4; 259n.h.p.; 9-5 knots; triple-expansion engines.
The steamship *Fintra*, Capt. R. J. Roll, was torpedoed and sunk by a submarine on February 23rd, 1943, about 50 miles off Algiers. Seven of her crew were killed. Capt. Roll was among the survivors.

FIONA

London & Edinburgh Shipping Co.; 1905; Caledon S.B. & E. Co.; 1,611 tons; 280x36-1x18; 443 n.h.p.; triple-expansion engines. The British steamship *Fiona* was wrecked on Pentland Skerries on September 6th, 1917, while employed as an armed boarding steamship.

FIONA

The Admiralty; 1927; Swan, Hunter & Wigham Richardson; 2,190 tons; 280x43-6x18-6; 469n.h.p.; triple-expansion engines.
The *Fiona* was formerly the passenger steamship *Juna*, taken over by the Admiralty. She was sunk by enemy action in the Mediterranean on April 18th, 1941.

FIRECREST

Crest Shipping Co.; 1907; Bremer Vulkan A.G.; 5,394 tons; 420-5x54-5x27-9; 519n.h.p.; quadruple-expansion engines. The steamship *Firecrest* was torpedoed and sunk by a German submarine on August 25th, 1940, about 100 miles W. of the Orkney Islands on a voyage from Wabana to the Tees. All her crew of 40 were lost.

FIRDENE

Maats. Noord-Europa; 1883; Wigham, Richardson & Co.; 1,448 tons; 251 x35-3x15-9; 160 n.h.p.; compound engines. The Dutch steamship *Firdene*, on a voyage from Cagliari to Stockholm with salt, was sunk in a collision with the Norwegian barque *Bodvar*, 445 tons, on May 8th, 1897, off Heligoland. Eight of her crew were lost. The *Bodvar* also sank but with no loss of life.

FIRE Drake

British Navy, destroyer; 1934; Vickers Armstrongs; 1,350 tons; 329x33-2x8-5; 36,000s.h.p.; 35-5 knots; turbine engines; 3-drum boilers; four 4-7 in. guns, 7 smaller, 8 T.T. The destroyer *Fire Drake*, Cdr. E. H. Tilden, D.S.C., was torpedoed and sunk by a German submarine in the North Atlantic on December 16th, 1942. Cdr. Tilden, six officers and 164 ratings were killed.

FIRENZE

Tirrenia Soc. Anon, di Nav.; 1912; Soc. Esercizio Bacini Riva Trigoso; 3,952 tons; 360-9x44-9x24-5; 454n.h.p.; triple-expansion engines.
The Italian steamship *Firenze* was torpedoed and sunk by a British submarine on December 24th, 1940, 20 miles W. of Saseno.

FIRETHORN

U.S. Maritime Commission; 1937; Nakskov Skibsvcerft; 4,700 tons; 401-4x57-3x24-9; 808n.h.p.; oilengines. The Panamanian motorship *Firethorn* was torpedoed and sunk by a German submarine on October 7th, 1942, off the Cape of Good Hope on a voyage from Trinidad to Table Bay. Eleven of her crew and one gunner were lost.

FIRTH FISHER

J. Fisher & Sons; 1919; J. Lewis & Sons; 574 tons; 164 -8 x 27 x 11-1; 105 n.h.p.; triple-expansion engines.
The steamship *Firth Fisher* struck a mine and sank on May 21st, 1940, half a mile E. of Boulogne Pier. Seven of her crew were killed. The pilot and three others were saved.

FIRTH OF FORTH

A. Tate & Co.; 1893; W. Doxford & Sons; 2,232 tons; 31 lx 38-2x21-6; 233n.h.p.; triple-expansion engines. The British cargo ship *Firth of Forth* foundered 25 miles off Cape Bengut, near Bona, on July 25th, 1903, while on a voyage from Hamburg to Vladivostock carrying a general cargo.

FIRTH OF SOLWAY

J. Spencer & Co.; 1885; W.B.Thompson; 1,313 tons; 228 -4 x 36-5x21.
The barque *Firth of Solway* was sunk in a collision with the steamship *Marsden*, 919 tons, on April 19th, 1896, off the Kish lighthouse, near Bray Head, Ireland. The captain and eight men were picked up by the *Marsden* but the captain's wife and child and 13 men were drowned.

FISCUS

Tempus Shipping Co.; 1928; Northumberland Shipbuilding Co.; 4,815 tons; 399x54-5x25-2; 432n.h.p.; 10 knots; triple-expansion engines.
The steamship *Fiscus*, Capt. E. Williams, was torpedoed and sunk on October 18th, 1940, about 120 miles W. of Barra Island, in the Hebrides. Capt. Williams and 37 of her crew were killed, and only one man was saved. The *Fiscus* was in convoy at the time.

FISGARD II

British Navy, training ship; 1870; Glasgow; 6,010 tons; 280 X 54 x 23; no engines or boilers.
The training ship *Fisgard II* was originally the ironclad *Invincible* which took part in the bombardment of Alexandria in 1882. The ship had been placed on the sale list, but withdrawn when there was a shortage of naval training establishments. Her name was changed to *Erebus* and later to *Fisgard H*. On September 17th, 1914, she was in tow of two tugs, the *Danube* and the *Southampton*, in very heavy weather off Portland Bill. She had no engines or steering gear and was manned by a crew of 64 ratings, Chief Petty Officer Coll being in command. During the day her condition became serious owing to the quantity of water she was shipping through her hawse-pipes. The crew endeavoured to trim her by shifting a quantity of machinery from the upper deck to the lower, but this failed to assist, and the *Fisgard II* began to heel over until she lay on her beam ends. She carried four boats and 20 lifebelts, but one boat was smashed as soon as it was launched.

The hired transport *Crown of Galicia* and the two tugs did what they could to save life, but at 4.20 p.m. the training ship foundered five miles off Portland Bill with a loss of 21 ratings.

From statements made by the captains of the tugs it was established that *Fisgard II* made signals of distress earlier in the day and it was decided to put into Portland. This was prevented by the heavy seas and the ship's lack of steering gear.

FISHPOOL

Pool Shipping Co.; 1940; Sir J. Laing & Sons; 4,950 tons; 418 X58-8X25-8; 413 n.h.p.; 9-5 knots; oil engines. The motor vessel *Fishpool*, Capt. Cole, was lying in Syracuse Harbour on July 25th, 1943, when she was bombed and set on fire by enemy aircraft. The ship, which was loaded with 1,000 tons of aviation spirit and 4,000 tons of munitions, blew up and sank. Capt. Cole, 27 of the crew and several passengers were killed and many of the survivors wounded.

The *Fishpool* was a remarkably unfortunate vessel for on November 14th, 1940, when on her maiden voyage, she was bombed by German aircraft in the North Atlantic outward bound in ballast. Capt. Hill, ten officers and 16 men were killed and she was abandoned. Later the Admiralty sent out and towed her into the Clyde. On May 9th, 1941, she was badly damaged in an air raid at Barrow-in-Furness and one man was killed. Two days later, while in dock, a land mine dropped alongside at a distance of ten feet, killing another of the crew. Capt. Howitt and seven men were badly wounded.

FISKE

United States Navy, destroyer; 1943; United States; 1,200 tons; 306x36x10-7; 6,000 s.h.p.; oil engines; three 3 in. guns, two 40mm.A.A., four 20mm.A.A., 3 T.T.

The destroyer *Fiske* was torpedoed and sunk by a German submarine in mid-Atlantic on August 2nd, 1944. The vessel carried a complement of 220.

FITO

*Adolfo Ramirez Escudero; 1880; Schlesinger, Davis & Co.; 1,453 tons; 254 x 32-8x18-9; 152 n.h.p.; compound engines. In collision with the *Dunarea* on October 24th, 1930, the Spanish ship *Fito* sank 12 miles E. of Salvora on the Spanish coast.*

FITZJAMES

*Matthews & Luff; 1883; Vulcan Iron Works; 468 tons; 163 x 24-1x10-7; 71 r.h.p.; compound engines. The steamship *Fitzjames* foundered in heavy weather off Beachy Head on November 24th, 1898. The captain and eight of the crew were drowned. Three survivors were picked up by the steamship *Olive* but one of these died soon afterwards.*

FITZROY

*Langley Bros. S.S. Co.; 1912; Napier & Miller; 623 tons; 170-2x30-2x10-6; 72 r.h.p.; triple-expansion engines. The Australian steamship *Fitzroy* with 32 passengers and crew foundered in a S.E. gale off Cape Hawke, N.S.W., on June 26th, 1921. There was only one survivor.*

FITZROY

*British Navy, fleet minesweeper; 1919; Lobnitz & Co.; 710 tons; 231x28-3x7-5; 2,200 i.h.p.; 16 knots; triple-expansion engines; Yarrow boilers; one 4 in. gun, several smaller. The fleet minesweeper *Fitzroy* was mined and sunk off Great Yarmouth on May 27th, 1942. One officer and 13 ratings were killed.*

FIUME

Italian Navy, heavy cruiser; 1931; Stabilimento Tecnico; 10,000 tons; 599-5x67-7x19-5; 95,000 s.h.p.; 32 knots; turbine engines; 3-drum boilers; eight 8 in. guns, twelve 3-9 in., eight 37 mm., eight 13 mm., 2 aircraft.

The Italian 10,000 ton 8 in. gun cruisers *Flume*, *Pola* and *Zara* constituted the Italian heavy cruiser squadron under Admiral Cantoni at the battle of Cape Matapan, fought on March 28th-29th, 1941. Just before noon on March 27th British aircraft on patrol in the neighbourhood of Sicily reported cruisers at sea to the S.E. of the island. The whole Mediterranean Fleet under Vice-Admiral Sir Andrew Cunningham was lying at Alexandria and dispositions were at once made for intercepting the enemy, whose object was assumed to be a raid on either the Greek or Egyptian convoys. A cruiser squadron under Vice-Admiral H. D. Pridham-Wippell comprising *Orion*, 7,215 tons, flagship, Capt. G. R. B. Back, *Ajax*, 6,985 tons, Capt. E. D. B. McCarthy, *Gloucester*, 9,400 tons, Capt. H. A. Rowley and the Australian cruiser *Perth*, 6,980 tons, Capt. Sir P. W. Bowyer-Smith with the destroyers *Hereward*, 1,340 tons, *Hasty*, 1,340 tons, *Ilex*, 1,370 tons, and the Australian destroyer *Vendetta*, 1,090 tons, was ordered to take up a position S. of Crete. The main battle squadron, comprising the battleships *Warspite*, 30,600 tons, flagship of Admiral Cunningham and commanded by Capt. D. B. Fisher, *Valiant*, 30,600 tons, Capt. C. E. Morgan, *Barham*, 31,100 tons, Capt. G. C. Cooke, and the aircraft carrier *Formidable*, 23,000 tons, flagship of Rear-Admiral C. W. Boyd, commanded by Capt. A. W. Bissett, with the 14th Destroyer Flotilla, comprising the *Jervis*, 1,760 tons, *Janus*, 1,690

tons, *Nubian*, 1,870 tons, and *Mohawk*, 1,870 tons, and the 10th Destroyer Flotilla, comprising the Australian destroyer *Stuart*, 1,530 tons, *Greyhound*, 1,335 tons, *Griffin*, 1,335 tons, *Hotspur*, 1,340 tons, and *Flavock*, 1,340 tons, left Alexandria steaming on a north-westerly course. At 7.49 a.m. on the 28th, aircraft reported an Italian fleet comprising the battleship *Vittorio Veneto*, 35,000 tons, nine 15 in. guns, six cruisers and seven destroyers off Gavro Island, S. of Crete. Two more cruisers and two destroyers joined this force later in the morning. The nearest of the British squadrons was that of Admiral Pridham-Wippell 40 miles S.E., while that of Admiral Cunningham was 95 miles S.E. of that of Pridham-Wippell. At 8.2 a.m. the British cruisers made contact with the enemy and contrived to lure them in the direction of the main battle squadron. By 9 a.m. the Italian cruisers had turned from a course S.E. to a new one bearing N.W. and at 10.58 the *Vittorio Veneto* came into view. The British cruiser force now turned S.E. to avoid the enemy's big guns, keeping some 16 miles from the battleship.

Meanwhile the aircraft carrier *Formidable* had sent up her torpedo-bombers and at 11.30 a.m. these made an attack on the *Vittorio Veneto* forcing the enemy to turn towards his bases. This air attack was premature, for it was not intended to scare the enemy into a retirement, but rather to encourage him to advance further away from his home ports. Anxiety for the safety of Admiral Pridham-Wippell's force of cruisers, however, induced Admiral Cunningham to make an air attack thus early in the action, though he clearly foresaw the consequences. Shortly after this the British forces united and soon news came that a second Italian fleet was at sea comprising two Cavour class battleships, 23,622 tons, ten 12-6 in. guns, and the heavy cruiser squadron *Flume*, *Pola* and *Zara*, with four destroyers. This force was reported as 80 miles W. of Gavro Island. During the rest of the day the opposing fleets saw little of each other, the Fleet Air Arm continuing to bomb any targets which presented themselves. As a result of this three hits were scored on the *Vittorio Veneto* and others on two cruisers and a destroyer. The speed of the *Vittorio Veneto* was reported as having decreased enabling Pridham-Wippell's force to make contact for a second time just before nightfall. The destroyers were disposed for a torpedo attack, but before this developed the heavy cruiser *Pola* was sighted in a disabled condition not far from the British battle squadron, being undoubtedly one of the victims of the Fleet Air Arm's bombs. As the battleships swung round to make their attack two other Italian cruisers, the *Zara* and the *Fiume* (in that order) led by a large destroyer, which was at first mistaken for a cruiser, with a number of destroyers following, crossed the bows of the British from starboard to port. The distance separating the two lines was barely 4,000 yards and at this range, under the glare of the searchlights of the destroyer *Greyhound*, the 15 in. guns of the battleships blew the heavy cruisers to pieces. In a few minutes they were a mass of flame and a torpedo attack from the destroyers sank them within a very short time. The Italian destroyers discharged their torpedoes without effect and they were then engaged by a British flotilla which sank two of them by gunfire. The *Pola* was sunk soon afterwards, making a loss to the Italians of three heavy cruisers and two destroyers, the *Giosue Carducci* and the *Vittorio Alfieri*, both of 1,729 tons. In addition to this loss the battleship *Vittorio Veneto* suffered an appreciable amount of damage.

Survivors picked up by the British numbered 53 Italian officers and 850 ratings, besides 35 German officers and ratings. The total lost approximated to 3,000, including Admiral Cantoni commanding the heavy cruiser squadron.

The *Fiume* carried a complement of 705, of whom a large proportion was lost.

The British lost one aircraft, but suffered no damage to their ships or casualties among their crews.

The work of rescuing survivors was continued next day, assisted by a small force of Greek destroyers, but all efforts in this direction had to be abandoned on the arrival of German dive bombers. After shooting down two Ju. 88's Admiral Cunningham ordered the withdrawal of all units engaged in rescue work, at the same time sending a message to the Italian commander-in-chief, Admiral Riccardi, giving the position of the shipwrecked Italians.

FJORD

*A/SD/SFjeld; 1914; Tyne Iron S.B. Co.; 4,032 tons; 355-3X 50-8x24-9; 355 n.h.p.; triple-expansion engines. The Norwegian steamship *Fjord* was torpedoed and sunk by a Ger-*

man submarine on December 2nd, 1941, near Estepona Point, Spain, with the loss of 14 lives.

FJORDEN

Johan Hyide; 1909; *Schiffswerft van H. Koch*; 1,733 tons; 275-7x40-2x16-7; 151 n.h.p.; triple-expansion engines. On a voyage from Bangkok to Hong Kong the Norwegian ship *Fjorden* sank about ten miles S.W. of the latter port on April 12th, 1933.

FJORDHEIM

A/S Theologos; 1930; *Swan, Hunter & Wigham Richardson*; 4,115 tons; 374-8x51-5x23-7; 363 n.h.p.; triple-expansion engines. The Norwegian steamship *Fjordheim* was torpedoed and sunk by a German submarine on September 2nd, 1944, off the north west coast of Ireland.

FLACHAT

Compagnie Generale Transatlantique; 1880; *M. Pearse & Co.*; 2,175 tons; 300x36x25-5; 220 n.h.p.; 10 knots; compound engines. The French liner *Flachat* struck on Anaga Point, Teneriffe, on the night of February 16th, 1898, in dense fog and heavy sea. The vessel carried 51 passengers and 50 crew of whom eight passengers and 16 crew were saved. The vessel crashed on to the rocks at about 11.30 p.m. and the captain immediately let go both anchors and steam was at once blown off from the boilers. The port lifeboat and two others were got away, but all three were swamped and sunk. The starboard lifeboat was then launched with great difficulty, and after seven hours of strenuous effort by the crew. Unfortunately there was an attempt to rush her as soon as she got afloat and of about 50 people only 16 succeeded in reaching her. Another boat also got away with eight persons.

FLAMBORO

J. E. Bowser & Son; 1885; *Palmers' Co.*; 1,966 tons; 265x39-9x22-4; 215 n.h.p.; triple-expansion engines. The British cargo ship *Flamboro* was wrecked on July 2nd, 1896, on Kem Reef in the White Sea. She was on a voyage from Archangel to Kem and Bordeaux with a cargo of wood.

FLAMSTEED

Lampart & Holt; 1892; *R. & W. Hawthorn, Leslie & Co.*; 3,381 tons; 345X43-8X25-9; 228 h.p.; triple-expansion engines. The British cargo ship *Flamsteed* was wrecked on March 27th, 1893, near Valparaiso while on a voyage from Liverpool to Valparaiso carrying a general cargo.

FLANDRE

Cie. Generale Transatlantique; 1914; *Chantiers de VAtlantique*; 8,571 tons; 464-4x57x29-6; compound engines. The French liner *Flandre* struck a mine and sank on September 14th, 1940, at the mouth of the River Gironde.

FLANDRES

Arm. Adolf Deppe; 1896; *C. Cornell & Co.*; 4,517 tons; 370-5x46-6x27-2; 365n.h.p.; quadruple-expansion engines. The Belgian steamship *Flandres* struck a mine and sank in the North Sea on April 8th, 1918.

FLANDRIA

Fornyade Angf. AjB Gotha; 1898; *Helsingors Jernsk. & Maskin.*; 1,179 tons; 228-2x33-1x13-1; 150n.h.p.; triple-expansion engines. The Swedish steamship *Flandria* struck a mine and sank on January 18th, 1940, about 100 miles off Ymuiden, with the loss of 17 lives.

FLEUR DE LYS

British Navy, corvette; 1940; *W. Simons & Co.*; 925 tons; 193x32x26; 2,750 i.h.p.; 17 knots; quadruple-expansion engines; one 4 in. A.A. gun, several smaller. The corvette *Fleur de Lys*, Lt. A. Collins, was torpedoed and sunk by a German submarine west of Gibraltar on October 14th, 1941. Lt. Collins, five officers and 65 ratings were killed.

FLEURS CASTLE

T. Skinner & Co.; 1874; *J. & G. Thomson*; 2,472 tons; 326X35-4x27-4; 235 h.p.; compound-inverted engines. The steamship *Fleurs Castle*, Capt. J. B. Thomson, was wrecked at Ras Asir, near Cape Guardafui, on July 9th, 1882. Capt. Thomson, 16 of the crew and one passenger were saved.

FLIRT

British Navy, destroyer; 1900; *Palmer & Co.*; 335 tons; 210X21x11; 5,700 i.h.p.; 30 knots; triple-expansion engines; *Thornycroft boilers*; one 12 pdr., five 6pdr., 2 T.T. On October 23rd, 1916, the Admiralty became aware that the German naval command was preparing a sortie by light forces which might have for its aim a raid upon the defences of the Straits of Dover. It was known that Capt. A. Michelsen, commanding the destroyer flotillas of the High Seas Fleet, was leading the 3rd and 9th flotillas, of 24 destroyers in all, down the Dutch coast toward Zeebrugge. Vice-Admiral Sir R. Bacon, commanding the Dover patrol, therefore disposed the forces under his command to meet the threatened attack, which came on the night of October 26th, in the area bounded by a line drawn from Dover to Calais on one side and from the Downs to Dunkirk on the other.

The destroyer *Flirt*, a small and old ship commanded by Lt. R. Kellett, left Dover about 8 p.m. and two hours later, hearing gunfire in the direction of the line of drifters guarding the submarine barrage, made towards it. Here she found the drifter *Wayney II* on fire, and at once lowered a boat to go to her assistance. At the same time a destroyer line came into sight, but gave no grounds for action as it was presumed to be French. Shortly afterwards these ships opened fire on the *Flirt* and sank her with every man on board, the boat's crew being the only survivors.

The official complement of the *Flirt* was 80. The German flotillas, after damaging the destroyer *Nubian* and sinking one or two drifters, returned to their base without loss.

FLIRT

Bulk Oil Transport Inc.; 1917; *Slidell S.B. Co.*; 1,474 tons; 228-0x43-0x16-0; compound engines. Carrying a cargo of coal from Newport News to Porto Rico the American steamship *Flirt* caught fire on January 30th, 1919, when she was in lat. 25° 7' N., long. 69° W. She became a total loss.

FLORA

E. P. Nomikos; 1904; *R. Craggs & Sons*; 2,980 tons; 330-lx46x22-2; 295 n.h.p.; triple-expansion engines. On a voyage from Sunderland, which she left on January 20th, 1940, for Rosario, the Greek ship *Flora* was last reported in the Downs on January 22nd. The ship was not seen again and all 25 of the crew were lost. Bodies and a lifeboat were washed ashore.

FLORE

J. Stern; 1906; *Furness, Withy & Co.*; 3,553 tons; 347X47-4X25-2; 292 n.h.p.; triple-expansion engines. The French steamship *Flore* was torpedoed and sunk by a German submarine in the North Sea on July 26th, 1917.

FLORENCE

Florence Steamship Co.; 1882; *T. B. Scath & Co.*; 115 tons; 149-8x22-2x10-7; 56 h.p.; compound engines. The coasting steamship *Florence* foundered off the Calf of Man on September 20th, 1889. Only one man was saved.

FLORENCE

Furness, Withy & Co.; 1889; *Short Bros.*; 2,492 tons; 293-5X40-2x18-5; 220 n.h.p.; 10 knots; triple-expansion engines. The steamship *Florence* left Halifax on December 17th, 1912, for Liverpool with a crew of 27 and a cargo of about 4,000 tons of produce, chiefly cheese, butter and ham. On the morning of the 20th she was wrecked in Marine's Cove, St. Mary's Bay, not far from Cape Race. The second officer and four men were the only ones saved.

FLORENCE D.

Cadwallader-Gibson Lumber Co.; 1919; *Superior S.B. Co.*; 2,639 tons; 247-4x43-3x25-6; triple-expansion engines. The American steamship *Florence D.* was bombed and sunk by Japanese aircraft on February 19th, 1942, about 200 miles E. of Mindanao Island, Philippines.

FLORENCE RICHARDS

FLORENCE RICHARDS

R. Nicholson & Sons; 1873; J. L. Thompson & Son; 1,056 tons; 221-5x30-1x16-8; 120 h.p.; triple-expansion engines. The British cargo ship *Florence Richards* foundered on March 10th, 1890, off Cape Roca, while on a voyage from Arzew to Rouen with a cargo of salt.

FLORIAN

Ellerman Lines; 1940; W. Gray & Co.; 3,174 tons; 345-7x 50-1x20-7; 606 n.h.p.; triple-expansion engines & L.P. turbine. The British cargo ship *Florian* was lost after sailing from Oban on January 18th, 1941. She was on a voyage in ballast from Hull to New York. On January 20th a British naval trawler sighted wreckage and a lifeboat from the *Florian* in 61° 14' N., 12° 05' W., but found no trace of her crew of 44.

FLORIDA

Hamburg-Sud-Amerikanische Dampfs. Ges.; 1939; Bremer Vulkan; 6,150 tons; 454-8x59-3x23-5; 985n.h.p.; oil engines. The German motorship *Florida* struck a mine and sank on April 14th, 1940, about eight miles N.E. of the Skaw.

FLORIDAMARU

Kawasaki Risen K.K.; 1925; Kawasaki Dockyard Co.; 5,845 tons; 405x53x34; 902n.h.p.; oilengines. The motor vessel *Florida Mam* was bombed and sunk by U.S. land-based aircraft on April 2nd, 1943, off New Hanover Island.

FLORIDE

Compagnie Generale Transatlantique; 1907; Chantiers & Ateliers de Provence; 413-2x52-2x35; 402 n.h.p.; 12-5 knots; triple-expansion engines.

The French liner *Floride*, Capt. Monsson, fell a victim to the German auxiliary cruiser *Prinz Eitel Friedrich*, N.E. of Fernando Noronha on February 19th, 1915. The liner was sunk and her 86 passengers and 78 crew taken on board the raider, where they remained as prisoners until they were landed at Newport News on March 11th.

During a brief career as a commerce raider the *Prinz Eitel Friedrich*, which was a converted Norddeutscher Lloyd liner of 8,897 tons, sank the following ships:—

- Dec. 5th, 1914 ss. *Charcas*, 5,067 tons.
- Dec. 11th, 1914 *Jean*, French barque.
- Dec. 12th, 1914 *Kidaltou*, barque.
- Jan. 26th, 1915 *Isabel Browne*, Russian barque.
- Jan. 27th, 1915 *Pierre Loti*, French barque, 2,196 tons.
- Jan. 27th, 1915 *William P. Frye*, barque, 3,374 tons.
- Jan. 28th, 1915 *Jacobsen*, French barque, 2,195 tons.
- Feb. 12th, 1915 *Invercoe*, barque, 1,421 tons.
- Feb. 18th, 1915 s.s. *Mary Ada Short*, 3,605 tons.
- Feb. 19th, 1915 ss. *Floride*, 6,629 tons.

Feb. 20th, 1915 s.s. *Willerby*, 3,630 tons. On March 11th, 1915, having been unable to obtain coal supplies, and with engines badly in need of repair the *Prinz Eitel Friedrich* steamed into Newport News and was interned.

FLORIDIAN

E.D. Hulbert; 1840 (circa); 500 tons. The American barque *Floridian* was chartered by a German company to carry emigrants to the United States. She left Antwerp on Tuesday evening February 27th, 1849, under Capt. Whitmore, having on board a crew of 20, the captain's wife and 176 emigrants, for the most part German agricultural labourers and mechanics with their wives and children. The ship encountered bad weather soon after leaving the Flemish Banks, with hail and snow, and by Wednesday morning she was facing a full gale. At three o'clock in the afternoon she struck on the Long Sand off Harwich and in a very short time became a total wreck. The first officer was in charge of the ship and had gone below to check his position, the second officer remaining on deck. Capt. Whitmore ordered out the boats as soon as he saw the plight of his ship, but the first boat smashed and capsized. The second boat was then got away, among its occupants being the captain and his wife. The emigrants seeing themselves thus deserted made a rush for the boat which was at once overcrowded and sank. The remainder of the emigrants, about 100, took refuge

on the quarterdeck, but the crew lashed themselves to the rigging. An hour after striking the *Floridian* broke in two and the mainmast fell overboard with all those clinging to it. During the night many more were swept from the decks and those lashed in the rigging were frozen to death.

On Friday afternoon, March 2nd, H.M. revenue cutter *Petrel* approached the wreck and saved three of the crew and one passenger, the latter having lost his reason. The total loss of life was 193 persons, about 80 of whom were women and children.

FLORIDIAN

F. Leyland & Co.; 1913; Short Bros.; 4,777 tons; 385 X 51 -5X27-5; 393 n.h.p.; 11 -5 knots; triple-expansion engines. The steamship *Floridian* was torpedoed and sunk by a German submarine 200 miles W. by N. of Fastnet on February 4th, 1917. Five of her crew were killed. The captain, chief engineer and the wireless operator were taken on board the submarine as prisoners.

FLORIDIAN

American Hawaiian S.S. Co.; 1915; Maryland Steel Co.; 6,765 tons; 415 X 53 • 7 X 28 • 1; 666 n.h.p.; quadruple-expansion engines. On a voyage from Boston and Los Angeles to Seattle the American ship *Floridian* was in a collision and sank on September 1st, 1928, 50 miles S. of Cape Flattery.

FLORISTON

R. Chapman & Son; 1899; Ropner & Son; 3, 429 tons; 325x46x 21-6; 314 n.h.p.; triple-expansion engines. The British cargo ship *Floriston* was wrecked on October 13th, 1914, at Gabarus Point, C.B., while on a voyage from Quebec to Avonmouth with a cargo of grain.

FLORIZEL

C. T. Bowring & Co.; 1909; C. Council & Co.; 3,081 tons; 305 -5x43-1x29-6; 437 n.h.p.; triple-expansion engines. The British cargo ship *Florizel* was wrecked on February 24th, 1918, seven miles north of Cape Race. She was on a voyage from St. John's, N.F.L., to New York with a general cargo.

FLORRIESTON

W. S. Miller & Co.; 1901; W. Gray & Co.; 3,366 tons; 331 x 47-1x24-7; 268 n.h.p.; 9-5 knots; triple-expansion engines. The steamship *Florrieston* was torpedoed and sunk by a German submarine six miles E. of N. of South Stack, off Holyhead, Anglesey, on April 20th, 1918. Nineteen men, including the captain, were killed.

FLYING ENTERPRISE

Isbrandtsen Company, Inc.; 1944; Consolidated Steel Corpn.; 6,711 tons; 396-5x60-1x25-8; turbine engines. The American freighter *Flying Enterprise* left Hamburg on December 21st, 1951, for the United States. She encountered rough weather and on December 28th, when about 380 miles W. of Land's End, a crack had developed across her deck and she was listing about 30° to port. In reply to her S.O.S. the American ship *Southland* went to her assistance and took off the 10 passengers and all the crew, with the exception of the captain, Kurt Carlsen. The U.S. destroyer *John W. Weeks* also stood by. On January 2nd the salvage tug *Turmoil*, 1,136 tons, arrived and although the list of the *Flying Enterprise* had now increased to 80°, the tug's mate Kenneth Dancy joined Captain Carlsen on board, and the ship was towed towards Falmouth at 3¹/₂ knots. Unfortunately when, within 50 miles of that port in the early morning of January 9th the tow parted. On January 10th, the ship was listing so badly that Captain Carlsen and Kenneth Dancy were able to walk up the funnel to the deck of the tug and at 4.12 p.m. on that day she turned over and sank. Captain Carlsen was awarded Lloyd's Silver Medal for Meritorious Services in recognition of his efforts to save his ship.

In July and August, 1953, the Italian firm Sorima succeeded in salvaging \$56,000 and \$5,000 in bank notes from the wreck, although a package containing \$100,000 could not be found. This firm has carried out many notable salvage operations, including the recovery of over £1,000,000 worth of bullion from the *Egypt* in 1932

FLYING FOAM

Rylands & Co.; 1863; *T. Oliver*; 1,327 tons; 207X 37X 24. The Canadian wooden ship *Flying Foam* was wrecked off the Irish coast on April 5th, 1884. Five of the crew were drowned.

FLYING LARK

Chiap Hua Shipping Co. (Panama); 1915; *A/S Fredriksstad Mek Verks.*; 1,253 tons; 235 X 33 -6 X—; triple-expansion engines. The Panamanian steamship *Flying Lark* was bombed by Indonesian aircraft on April 28th, 1958, in Amboina harbour. Nine of the crew were killed and six missing. She was again bombed two days later and sank.

FLYNDERBORG

C.K.Hansen; 1901; *Helsingors Jernskibs-og Maskinbyg*; 1,400 tons; 251 • 5 X 36 • 1 x 16 • 9; 166 n.h.p.; triple-expansion engines. The Danish steamship *Flynderborg* was torpedoed and sunk by a German submarine in the North Sea on October 21st, 1917.

FLYNDERBORG

Dampskibsselsk. Dannebrog; 1919; *Helsingors Jernsk. & Maskin.*; 1,417 tons; 249-5x38-1x15; *ISOn.h.p.*; triple-expansion engines. On a voyage from Casablanca to Norresundby the Danish ship *Flynderborg* struck a rock and foundered on March 14th, 1930, off Ushant in dense fog.

FOFO

P. Maoris & E. D. Hadjiconstantis; 1892; *J. Readhead & Sons*; 2,615 tons; 298'5x40-1x20-1; 232 n.h.p.; triple-expansion engines. The Greek steamship *Fofo* was sunk by a German submarine off Ushant on December 4th, 1916.

FOFO

C.J.Frangos; 1891; *W. Gray & Co.*; 2,419 tons; 285-6x39x 21-3; 215 n.h.p.; triple-expansion engines. Sailing from Penarth to Bougie with a cargo of coal the Greek ship *Fofo* was 40 miles N.E. of Oran on February 25th, 1930, when there was an explosion in the hold and she sank.

FOINA

D/S A/S Foina; 1915; *Helsingors Jernsk. & Maskin.*; 1,674 tons; 248-8x38-1x15-4; 150 n.h.p.; triple-expansion engines. The Norwegian ship *Foina* left Sarpsborg on December 7th, 1939, bound for Grangemouth and was not seen again. A lifeboat with two bodies was found on December 12th, about 160 miles W.N.W. of Rattray Head.

FOKION

Epirotiki Steamship Nav. Co.; 1910; *Cantieri Navali Triestino*; 1,158 tons; 224-3x33-2x15-1; 247 n.h.p.; triple-expansion engines. The Greek steamship *Fokion* was bombed and sunk by German aircraft on April 18th, 1941, at Nea Psara, Eubcea Island, during the German invasion of Greece.

FOLGORE

Italian Navy, destroyer; 1931; *Partenopei*; 1,220 tons; 315 -2 X 30-5x10-2; 44,000s.h.p.; 38 knots; turbine engines; 3-drum boilers; four 4.7 in. guns, four 37 mm.A.A., four 13 mm.A.A., 6T.T. The Italian destroyer *Folgore* was one of a destroyer division escorting a convoy bound for Tunisia on the night of December 1st-2nd, 1942. The ships were surprised by a force under Rear Admiral Sir H. Harwood, comprising the cruisers *Aurora*, flagship, *Argonaut* and *Sirius*, with the destroyers *Quiberon* and *Quentin*. The *Folgore* was sunk as well as four of the merchantmen. Another destroyer of the escort was badly damaged. The British lost the *Quentin* (which see) by air attack when returning to base on the following day. The action took place in the Sicilian Channel.

FOLIA

CunardLine; 1907; *Sir J. Laing & Sons*; 6,705 tons; 430 X 52-7x25; 869 n.h.p.; 11 knots; triple-expansion engines. The Cunard cargo ship *Folia* was torpedoed and sunk by a submarine four miles E.S.E. of Ram Head, Youghal, on March 11th, 1917. Seven of her crew were killed. The captain was among the survivors.

FOLKE

F. D. Malmros; 1881; *Osbourne & Graham*; 1,352 tons; 246-5x34-1x17-4; 144 n.h.p.; compound engines. The Swedish steamship *Folke* was torpedoed and sunk by a German submarine in the North Sea on April 14th, 1915.

FOLMINA

Holland-Gulf Stoom. Maats.; 1915; *Wilton's Engineering & Slipway Co.*; 1,158 tons; 230-2x34x13-2; 120n.h.p.; triple-expansion engines. The Dutch steamship *Folmina* was torpedoed and sunk by a German submarine on January 25th, 1918, two miles off Sunderland, on a voyage from Rotterdam to Leith. Eight of her crew were killed.

FONTAINEBLEAU

Soc. des Services Contractuels des Messageries Maritimes; 1923; *Ateliers & Chantiers de la Loire*; 9,986 tons; 478 -5x59-2x27-3; 966 n.h.p.; turbine engines. The French ship *Fontainebleau* left Marseilles, under command of Capt. Guillaud, for Yokohama with passengers, mail and general cargo, and when off Djibouti on July 12th, 1926, a fire broke out and she became a total loss.

FOOCHOW

I. S. Swire; 1873; *Scott & Co.*; 1,103 tons; 235-4x26-3x17-2; 98 h.p.; compound inverted engines. The British cargo ship *Foochow* was wrecked at Chefoo on August 9th, 1883, while on a voyage from Newchwang to Chefoo carrying a cargo of beans.

FORELAND

Clyde Shipping Co.; 1894; *London & Glasgow Co.*; 4,421 tons; 391-8x46-6x27-9; 350 n.h.p.; triple-expansion engines. The British cargo ship *Foreland* was wrecked on May 7th, 1901, at Table Island, Coco Group, while on a voyage from Rangoon to Bombay with a cargo of rice.

FORERUNNER

African Steamship Co.; 1845 (circa); *British Isles*; 400 tons; 10 knots; compound engines. The steamship *Forerunner*, Capt. Johnstone, left Madeira on the afternoon of October 25th, 1854. Just before nightfall when steaming at about nine knots the ship struck on a rock at the eastern end of the Island of Fora. The engine room was flooded almost immediately and the ship sank in a few minutes taking with her 14 persons. The survivors, about 25 in all, reached the little town of Santa Cruz in three of the ship's boats.

FORESIGHT

British Navy, destroyer; 1934; *Cammell Laird*; 1,350 tons; 329x33-2x8-5; 36,000s.h.p.; 36 knots; turbine engines; 3-drum boilers; four 4-7 in. guns, 4 T.T. The destroyer *Foresight* took part in escorting a convoy to Malta, August 10th to 14th, 1942. The ships were heavily attacked in the Sicilian Channel by German dive and torpedo bombers as well as by submarines and torpedo boats. On the 12th *Foresight* was hit by a torpedo from a bomber and badly damaged. She was taken in tow, but after more than 12 hours it became impossible to save her and she was abandoned and sunk by the British force. *Foresight* carried a complement of 145, of whom one officer and four ratings were killed. The story of this Malta convoy is told under the aircraft carrier *Eagle* and the cruiser *Manchester*, both of which were lost.

FOREST

FOREST

G. Churchill, Sons & Co.; 1873; Churchill & Sons, Windsor, N.S.; 1,488 tons; 202-3x40-8x24-5.

On the evening of September 11th, 1877, the wooden two deck ship *Forest*, Capt. Lockhart, with a crew of 21, bound for Sandy Hook, New York, in ballast, ran down the iron ship *Avalanche*, 1,210 tons, Capt. Williams, about 15 miles S. by W. of Portland. The latter ship sank immediately taking with her 94 of her company, only three members of the crew managing to clamber on to the *Forest*. The *Forest* was badly holed and about half an hour after the collision she foundered with a loss of 12 men. The three survivors from the *Avalanche* were among those saved from this double disaster which cost 106 lives. A full description will be found under the *Avalanche*.

FOREST CASTLE

Jackson Bros. & Cory; 1898; W. Doxford & Sons; 2,788 tons; 300X43•1X23•9; 232n.h.p.; triple-expansion engines. The British cargo ship *Forest Castle* struck a rock and foundered off Brest on February 13th, 1909, while on a voyage from Bilbao to Rotterdam carrying a mineral cargo. Nine of the crew were lost.

FOREST QUEEN

Rawson & Robinson; 1863; Henderson, Colborn & Co.; 446 tons; 171-4x24-7x13-2; 90 h.p.; compound engines. The steamship *Forest Queen* was sunk in a collision with the steamship *Loughbrow*, 733 tons, on February 24th, 1892, near Flamborough Head. The captain was picked up by the *Loughbrow* but all the crew of 12 and two passengers were drowned.

FORESTMOOR

Moor Line; 1910; J. Blumer & Co.; 2,844 tons; 315-5 X 46-5 X 21-3; 257n.h.p.; 9 knots; triple-expansion engines. The steamship *Forestmoor* was torpedoed and sunk by a German submarine 54 miles W. by N. of Cape Spartel, Morocco, on October 5th, 1917. The captain and 21 of her crew were killed.

FORFAR

British Navy; 1922; Fairfield Shipbuilding Co.; 16,402 tons; 548-7x70-2x40-3; 2,532n.h.p.; 17 knots; turbine engines. *Forfar* was formerly the liner *Montrose*, taken over by the Admiralty early in the Second World War for service as an auxiliary cruiser. She was commanded by Capt. N. A. C. Hardy and when about 500 miles W. of Ireland on December 1st, 1940, was torpedoed by a German submarine and sank on the following day. Capt. Hardy, 36 officers and 136 ratings were killed. Three ratings were wounded. Three officers and 15 ratings were picked up.

FORFARSHIRE

Dundee, Perth & London Steamship Co.; 1834; Dundee; 270 tons; 180x22-5 (40-5 over paddles) X—; 190 n.h.p.; 8-5 knots. The *Forfarshire*, Capt. J. Humble, was one of the pioneer coastal steamships of the age of steam and during her brief career was patronised by crowds of tourists and by Scottish people journeying to and from England.

The ship left Hull for Dundee on Wednesday, September 5th, 1838, at 6 p.m. carrying 63 persons all told. At about 4 o'clock on the next morning it was discovered that the starboard boiler was leaking and two furnaces were drawn. The ship was off Flamborough Head at the time and the captain judged it safe to continue his voyage rather than make for Shields. Later in the day the weather became rough, developing before long into one of the worst gales experienced on the north-east coast. The fires were re-lighted under the leaky boiler and every effort made to raise as much steam as possible.

By evening the ship was feeling the full force of the gale, and boiling water from the boiler was being flung across the stokehold so that the firemen could not approach the fires. In addition the hatches had to be kept open to allow volumes of steam to escape. At 1 a.m. on the 7th September the engines stopped, the vessel being at that time off St. Abb's Head. Her position was very precarious, for despite the setting of the sails the ship was being gradually blown inshore.

The captain now decided to make the Fairway and ride out the gale in the lee of the Fame Islands. Rain was descending in torrents but the Berwick light was visible and as the ship drifted steadily south she picked up the revolving light of the Longstone Lighthouse

on the Inner Fame. At about 3.45 a.m. the captain gave orders to drop anchor, assuming his position to be in the Fairway, under shelter of the Inner Fame. The anchors were never dropped for immediately upon the orders the look-out descried breakers ahead at the foot of the dreaded Harkers. In the few minutes left an attempt was made to put about but the force of the gale was too great and the steamship crashed upon the rocks. She broke in two at the paddle-box, and the whole of the after-portion was at once engulfed by the seas with all the first-class passengers, save one, who ran on deck just before the crash.

Some of the crew lowered the forward starboard quarter-boat and the passenger, the mate and seven sailors jumped into her. They hoped to lay off the wreck and pick up survivors but the seas swept them away. The captain, his wife in his arms, was washed overboard, and within a few minutes only 13 persons were left alive on the wreck. Of these one was a woman with two children, three steerage passengers, the ship's carpenter and six of the crew.

During the night two men, one of whom was a clergyman, and the two children died from exposure. At dawn the party saw that the tide was ebbing and they crept down to the rocks, being unaware that there was a double tide—one of the highest on that coast for many years—and that within two hours it would be washing over them again.

Meanwhile in the Longstone Lighthouse, Grace Horsley Darling, a young woman of 23 years, had descried the ship at about a quarter to five. She roused her father, who had not long gone off watch, and they scanned the wreck with a telescope. No one could be seen on its deck, but at about 7 a.m. a figure appeared and then others. Under the persuasion of his daughter William Darling consented to launch the cobbler, a craft 21 ft. long by 5 ft. 4 in. beam, capable of holding at most only seven persons. They rowed through the howling gale, came about under the rocks, and took off the woman, an injured man, the carpenter and two sailors. These they safely landed at the lighthouse, with Grace Darling whose determination had been the driving force of the rescue. The sailors and William Darling then returned to the wreck and brought off the other four men. In all nine persons were saved and succoured by the Darlings.

Of the 63 persons on board at the time of the disaster 45 died and 18 were saved.

FORLI

1904; Nederlandsche Scheepsbouw Maats.; 1,525 tons; 251-5 X 34-6x18-5; triple-expansion engines.

The steamship *Forli* was formerly the French *Sebaa*, seized by the Germans at Marseilles in December, 1942, and handed over to the Italians. She was torpedoed and sunk by a British submarine on March 17th, 1943, S. of Naples.

FORMBY

Clyde Shipping Co.; 1914; Caledon Shipbuilding & Engineering Co.; 1,282 tons; 270-2x36-2x16-7; 318n.h.p.; 11 knots; triple-expansion engines.

The steamship *Formby* was torpedoed and sunk by a German submarine in the Irish Sea on, or before, December 16th, 1917. Fifteen men, including the captain, were killed.

FORMIDABLE

British Navy, 1st class battleship; 1901; Portsmouth Dockyard; 15,000 tons; 430x75x29; 15,000 i.h.p.; 18-4 knots; triple-expansion engines; Belleville boilers; four 12 in. guns, twelve 6 in., sixteen 12 pdr., six 3 pdr., 2 m.g., 4 T.T.

H.M.S. *Formidable*, Capt. A. N. Loxley, was a unit of the 5th Battle Squadron serving with the Channel Fleet and on December 30th, 1914, left Sheerness with her consorts to take part in firing exercises off Portland. For the first part of its voyage, as far as Folkestone, the squadron was escorted by six destroyers and, when these turned back, by the light cruisers *Topaz* and *Diamond*. The exercises were carried out on the 31st about 25 miles off Portland Bill, there being no signs of hostile submarines. At sundown Admiral Sir Lewis Bayly decided to remain at sea, despite the absence of a destroyer screen, and steered for the south of the Isle of Wight, intending to resume the exercises next morning.

The regulations of the Admiralty laid it down that where submarine attack was possible an alteration of course should be made just after dark. Admiral Bayly accordingly made a 16 point altera-

tion at 7 p.m., steaming at ten knots in line ahead, *Formidable* being the rear ship, except for the light cruisers astern. The night was clear, though there was some cloud, the visibility being about two miles, with a southerly wind and a rough sea. At 2.20 a.m., as the squadron was passing through a number of fishing smacks, *Formidable* was struck by a torpedo on the starboard side abreast her foremost funnel. She swung put of the line and began to lower her boats at the same time beginning to list to starboard. The weather had been growing steadily worse and the ship was soon listing so badly that her engines stopped and she lay helpless with her head to the sea.

The night was now very dark and the launching of the boats, without the assistance of steam, was a difficult operation. In all, four were got out, but of these one barge was capsized, but the other, containing 43 men, was picked up by *Topaz*. The pinnace, with 60 men, managed to reach Lyme Regis, and the cutter, with 71 men, was later picked up by the Brixham smack *Provident*, skipper William Pillar, who by splendid seamanship gybed his small craft, despite the danger, and came alongside the cutter. This boat was overloaded and in a bad way, but all the men were safely transferred before she sank, though the *Provident* only carried a crew of three men and a boy. *Diamond* also picked up 37 officers and men.

Meanwhile the bulk of the ship's company were still on board the battleship when, about 3.5 a.m., she was struck by another torpedo, this time on the port side, abreast the after funnel. All hope of saving her had now vanished and the men were sent to break up woodwork for saving life. During this time a large liner with lights burning passed close to the scene, but although *Topaz* made a signal to her to stand by, which she acknowledged, she did not comply and steamed out of sight. *Topaz* was then ordered by Capt. Loxley to steam away as the submarine was still in the vicinity. With great reluctance Cdr. W. J. B. Law obeyed, endeavouring to stop another steamship on his way. At 4.45 a.m., about two and a half hours after she was first struck, *Formidable* turned over to starboard and sank.

Of the 780 persons on board, 35 officers, including Capt. Loxley, and 512 men were drowned.

FORSVIK

A. Brostrom & Son; 1913; Bergens Mek. Vcerks.; 1,107 tons; 224x36-7x14-5; 116n.h.p.; triple-expansion engines. The Swedish steamship *Forsvik* struck a mine and sank in the North Sea on September 19th, 1915.

FORTATHABASKA

Ministry of War Transport (J. & C. Harrison); 1943; Burrard D.D.Co.; 7,132 tons; 424-6x57-2x34-9; 505n.h.p.; triple-expansion engines.

The steamship *Fort Athabaska* was bombed and sunk by German aircraft on December 2nd, 1943, at Bari. Thirty-six of her crew and three gunners were killed.

FORTBABINE

Ministry of War Transport (W. Thomson & Co.); 1942; North Vancouver Ship Repairers; 7,135 tons; 424-6x57-2x34-9; 505n.h.p.; 11 knots; triple-expansion engines. The steamship *Fort Babine*, Capt. J. Cringle, was struck by an aerial torpedo when proceeding to Algiers in convoy. She was towed to Oran, some 80 miles distant, on February 8th, 1943, where her cargo was discharged and temporary repairs effected. She was then towed to Gibraltar on April 9th and further repairs were undertaken. On September 5th, she left for England with a crew of 24 towed by two naval tugs. On the 13th she was again attacked by enemy aircraft in lat. 41°31'N., long. 14°39'W., and was struck by two bombs which killed the gun's crew of seven men, blew in number four hatch and set her on fire. Twenty minutes later the *Fort Babine* was abandoned. Altogether her unlucky voyage cost the lives of 13 men, as six were killed in the first attack off Oran.

FORTBELLINGHAM

Ministry of War Transport (Hain Steamship Co.); 1943; Burrard Dry Dock Co.; 7,153 tons; 424-6x57-2x34-9; 628n.h.p.; 11 knots; triple-expansion engines. The steamship *Fort Bellingham*, Capt. Jf. N. Maley, was in the region of North Cape at 11.37 p.m. on January 25th, 1944, when she was torpedoed and sunk by a German submarine. Twenty-one of her crew, seven gunners and two naval staff were lost. Capt. Maley was among the survivors.

FORTBUCKINGHAM

Ministry of War Transport (Joseph Constantine S.S. Line); 1943; Burrard Dry Dock Co.; 7,122 tons; 424-6x57-2x34-9; 505 n.h.p.; 10 knots; triple-expansion engines. The steamship *Fort Buckingham*, Capt. McLeod, was torpedoed and sunk by an enemy submarine at 11.57 p.m. on January 20th, 1944, in the Indian Ocean. Capt. McLeod, 33 of his crew and eight gunners were lost.

FORTCONCORD

Ministry of War Transport (Larrinaga Steamship Co); 1942; Davie Shipbuilding & Repair Co.; 7,138 tons; 424-6x57-2x34-9; 505 n.h.p.; 10 knots; triple-expansion engines. The steamship *Fort Concord*, Capt. Francis P. Ryan, in convoy from Halifax to Manchester, straggled from convoy and was torpedoed and sunk by a German submarine at 2.40 a.m. on May 12th, 1943. Capt. Ryan, 29 crew and eight gunners were lost, two of the crew were taken prisoner and two survivors were picked up after having been 47 days at sea.

Capt. Ryan was in command of the *Minnie de Larrinaga* when she was bombed in London Docks in September, 1940.

FORTDEARBORN

U.S. War Shipping Administration; 1943; Kaiser Co. Inc.; 10,448 tons; 504x68-2x39-2; turbo-electric engines. The American tanker *Fort Dearborn* broke in two on March 12th, 1947, 800 miles N.W. of Honolulu. The two sections drifted ten miles apart and the forepart was sunk by the U.S. Navy. The after-part was towed to Honolulu on April 9th.

FORTFITZGERALD

Ministry of War Transport (E. R. Management Co.); 1943; West Coast Shipbuilders; 7,133 tons; 424-6x57-2x34-9; 505 n.h.p.; triple-expansion engines. The steamship *Fort Fitzgerald* was bombed and set on fire by German aircraft on October 4th, 1943, off the coast of Algeria on a voyage from New York to Alexandria. Five of her crew were killed. The burning wreck was sunk by gunfire.

FORTFRANKLIN

Ministry of War Transport (Dodd Thomson & Co.); 1942; West Coast Shipbuilders; 7,135 tons; 424-6x57-2x34-9; 505 n.h.p.; 11 knots; triple-expansion engines. The steamship *Fort Franklin*, Capt. T. Trott, was torpedoed and sunk by an enemy submarine on July 16th, 1943, between the islands of Madagascar and Reunion. Five of her crew were killed. Capt. Trott was among the survivors. The *Fort Franklin* was not in convoy at the time.

FORTLAMY

Ministry of War Transport (J. Cory & Sons); 1919; Craig, Taylor & Co.; 5,242 tons; 400-1x52-3x28-4; 517n.h.p.; triple-expansion engines. The steamship *Fort Lamy*, in convoy from Philadelphia to Liverpool, was torpedoed and sunk by a German submarine on March 8th, 1943, 200 miles W. of Iceland, after she had stopped to secure her boats damaged by heavy weather. Forty of her crew and six gunners were lost; two of the crew and one gunner were saved.

FORTLEE

U.S. War Shipping Administration; 1943; Sun S.B. & Dry Dock Co.; 10,198 tons; 504x68-2x39-2; turbo-electric engines. The American tanker *Fort Lee* was torpedoed and sunk by a Japanese submarine on November 2nd, 1944, on a voyage from Abadan to Brisbane with 15,000 tons of fuel oil. Six of the crew and three gunners were killed on board and one of the ship's boats with 16 men was lost.

FORTLONGUEUIL

Ministry of War Transport (J. Chambers & Co.); 1942; United Shipyards; 7,128 tons; 424-5x57-2x34-9; 539 n.h.p.; 11 knots; triple-expansion engines. The steamship *Fort Longueuil*, Capt. C. G. Edwards, on a voyage from Koseir to Newcastle, N.S.W., was torpedoed and sunk by a Japanese submarine on September 20th, 1943, 500-600 miles S.E. of the Seychelles. Only two of her crew survived; these men drifted

FORT MASSAC

ashore on an island after many days at sea and were later taken prisoner by the Japanese.

FORT MASSAC

Ministry of War Transport (J. Cory & Sons); 1943; Burrard D.D. Co.; 7,157 tons; 424-6x57-2x34-9; triple-expansion engines.

The British cargo ship *Fort Massac* sank after collision with the *Thornaby* on February 1st, 1946, in position 51° 53' N., 1° 32' E. She was on a voyage from Middlesbrough to Table Bay with a general cargo.

FORT MERCER

Trinidad Corporation; 1945; Sun S.B. & Dry Dock Co.; 10,266 tons; 504X68-2X39-2; turbo-electric engines. The American tanker *Fort Mercer* broke in two during heavy weather on February 18th, 1952, off Chatham, Mass. The forepart was sunk by gunfire and the afterpart was towed to Newport, R.I. The ship was eventually fitted with a new forepart and recommissioned as the *San Jacinto*.

FORT MISSANABIE

Ministry of War Transport (T. Dunlop & Sons); 1943; Marine Industries; 7,147 tons; 424-7x57-2x34-9; 339n.h.p.; triple-expansion engines.

The steamship *Fort Missanabie* was torpedoed and sunk by a German submarine on May 19th, 1944, seven miles from Stilo Point on a voyage from Taranto to Augusta. The captain, 11 crew and one gunner were lost.

FORT MUMFORD

Ministry of War Transport (Sir W. R. Smith & Sons); 1942; Prince Rupert Dry Dock & Shipyard Co.; 7,132 tons; 424-2X 57-2x35; 505 n.h.p.; 11 knots; triple-expansion engines. The steamship *Fort Mumford*, Capt. J. H. Smith, was torpedoed and sunk by a submarine on March 20th, 1943, about 500 miles N.W. of Ceylon. Her entire crew of 46 and four of the five gunners were lost. Capt. Smith commanded the *Botavon* when she was bombed in May, 1942.

FORT NORFOLK

Ministry of War Transport (Sir W. R. Smith & Sons); 1943; United Shipyards, Montreal; 7,131 tons; 424-5x57-2x34-9; 339 n.h.p.; 9.5 knots; triple-expansion engines. The steamship *Fort Norfolk*, Capt. G. Homsby, was sunk by a mine on June 24th, 1944, while taking part in the operations connected with the invasion of Normandy. Eight of her crew were killed and five wounded. Capt. Homsby, who was among the survivors, was in command of the *Queen City* when she was torpedoed in December, 1942.

FORT PELLY

Ministry of War Transport (Sir R. Ropner & Co.); 1942; Yarrows; 7,131 tons; 424-6x57-2x34-9; 505 n.h.p.; 11-5 knots; triple-expansion engines.

The steamship *Fort Pelly* with a cargo of ammunition was at Port Augusta on July 20th, 1943, during the Allied landings in Sicily when she was attacked by German bombers. She sustained several direct hits which exploded the ammunition, killing four officers and 34 men and wounding many of the survivors. She eventually sank.

FORT QU'APPELLE

Ministry of War Transport (W. Thomson & Co.); 1942; Burrard Dry Dock Co.; 7,127 tons; 424-6x57-2x34-9; 505 n.h.p.; 11 knots; triple-expansion engines.

The steamship *Fort Qu'Appelle*, Capt. W. A. Murray, was fresh from the builder's yard. She was in part manned by the survivors of the *Benleuch*, of which vessel Capt. Murray had been the commander. The *Fort Qu'Appelle* left Vancouver with a general cargo on April 3rd, 1942, bound for the eastern coast of Canada. At 10.45 on the night of May 16th she was struck on the starboard side by a torpedo from a German submarine. The explosion wrecked the two starboard lifeboats and blew a large hole in the vessel's side so that, although she still continued to float, there was no chance of saving her. The port lifeboats were lowered and ordered to remain by the ship until daylight. Unfortunately this was not possible, for some-

time during the night another torpedo exploded immediately under the captain's boat as it lay alongside, killing Capt. Murray and 12 officers and men. One gunner was also killed and two of the crew wounded.

The responsibility for the remaining boat now devolved on Chief Officer Gair, who took men off a raft at daylight and then, with a total number of 34 on board, endeavoured to reach the eastern Canadian coast some 300 miles distant. At about 5 o'clock on the afternoon of the 18th the boat was sighted by a patrolling aircraft and four hours later H.M.C.S. *Melville* picked up the survivors and brought them to Shelburne, N.S.

FORT RICHEPANSE

Ministry of War Transport (Canadian Pacific Steamships); 1936; Odense Staalskibsværft; 3,485 tons; 343-5x48-6x24-5; 724 n.h.p.; oil engines.

The motorship *Fort Richepanse*, on a voyage from Montreal to Liverpool, was bombed and disabled by a German aircraft at 10 a.m. on September 3rd, 1941, 480 miles W. of Loop Head. At 6 p.m. on the same day she was torpedoed and sunk by a submarine. Thirty-one of her crew and five passengers were lost.

FORT SUKINE

Ministry of War Transport (Port Line); 1942; Prince Rupert Dry Dock Co.; 7,142 tons; 424-2x57-2x35; 505 n.h.p.; triple-expansion engines.

The British steamship *Fort Stikine*, a new ship with a cargo of cotton and 1,400 tons of munitions, was lying in Bombay docks soon after mid-day on April 14th, 1944, when she caught fire. So sudden was the outbreak and so quickly did it spread that little could be done to keep the flames from the ammunition. The ship, which was lying in a crowded berthing place, blew up at 4.06 p.m. with terrible consequences to all around her. Eighteen merchantmen and three warships of the Royal Indian Navy, were either sunk or badly damaged. Warehouses alongside were wrecked and bales of blazing cotton were hurled over a wide area, starting other fires wherever they fell.

The fires on shore continued for two days and nights, and when it became possible to compute the measure of destruction involved, it was found that 15 of the merchantmen and two of the warships were damaged beyond repair. In addition to this, there were the burned and shattered buildings ashore, and the terrible casualties. These amounted to 336 killed and over 1,000 injured. The disaster, though not so great in extent, resembles the blowing up of the ammunition ship *Mont Blanc* (which see) in Halifax harbour, Nova Scotia, during the First World War.

FORT SUMTER

U.S. War Shipping Administration; 1943; Kaiser Co. Inc.; 10,448 tons; 504x68-2x39-2; turbo-electric engines. The American tanker *Fort Sumter* broke in two on May 10th, 1946, when she was 720 miles S. of Attu Island. The crew was taken off and both sections of the ship were scuttled.

FORT VICTORIA

Bermuda & West Indies S.S. Co.; 1913; W. Beardmore & Co.; 7,784 tons; 411-7x56-7x34-1; 1,374n.h.p.; quadruple-expansion engines.

The British cargo ship *Fort Victoria* sank in the Ambrose Channel on December 18th, 1929, after a collision. She was on a voyage from New York to Bermuda, carrying a general cargo.

FORTH

Royal Mail Steam Packet Co.; 1841; R. Menzies & Co.; 1,940 tons; 245X60 (over paddles)X30-3; 450 i.h.p.; 9 knots; side-lever engines.

The paddle steamship *Forth* was one of the splendid but unfortunate fleet with which the R.M.S.P. Co. began its service to the West Indies and Central America. The ship ran 16 voyages without accident, but at 5 a.m. on January 14th, 1849, she struck on the Alicrane Reefs, near Campeachy, and became a total wreck. There was no loss of life, the passengers and crew being landed on the reef, from which they were later taken off by a passing vessel.

This was the second time that one of the company's ships had been wrecked on the Alicranes, the first being the *Tweed* (which see) which sank with a heavy loss of life in February, 1847.

FORTUNA

A. G. Hall; 1894; *J. Bishop*; 125 tons; 98-3x24x10-2. The American fishing schooner *Fortuna* was sunk in a collision with the steamship *Barnstaple*, 1,356 tons, off Highland Light, Cape Cod. The collision took place on January 13th, 1896, the schooner sinking with nine of her crew of 23.

FORTUNA

Koninklijke Nederlandsche Stoomboot Maats.; 1913; *N.V. Werf Rijkse & Co.*; 1,254 tons; 251-4x36-2x16; 150 n.h.p.; triple-expansion engines.

The Dutch steamship *Fortuna* was bound from Rotterdam to Cardiff on October 22nd, 1916, when she struck a mine laid by the German minelaying submarine *UC-16*. She sank nine miles S.W. of Beachy Head, with the loss of 15 of her crew.

FORTUNA

Compania Argentina de Pesca; 1893; *C. Cornell & Co.*; 1,793 tons; 270-7x30x22-5.

The steel sailing ship *Fortuna*, Capt. O. Larsen, left the Mersey on October 23rd, 1927, for South Georgia with a cargo of 3,000 tons of coal and 1,000 empty oil drums. Five days later (28th) when ten miles S. of the Irish coast in extremely rough weather, a violent explosion blew up the main cabin and mess-room and set the vessel on fire. The flames gained rapidly despite the efforts of the crew.

At about 10 p.m. the ship heeled over and sank, taking with her one of the lifeboats which had no time to get away. The other lifeboat managed to get clear. Capt. Larsen and the first and second mates were dragged down with the ship but came to the surface and were picked up.

At the time of the disaster the vessel carried a crew of 26, of whom five were drowned. The survivors landed on the Welsh coast near Carnarvon on the following day.

FORTUNA

E. Behnke; 1906; *Akt. Ges. Neptun*; 2,700 tons; 291-1x44x16-6; 191 n.h.p.; triple-expansion engines.

The German steamship *Fortuna* was bombed and sunk by British aircraft off Texel on August 2nd, 1943.

FORTUNATA

Soc. Anon. Ilva; 1883; *D. P. Garbott*; 3,348 tons; 340-5 x 42-1x27-8; 266n.h.p.; triple-expansion engines. The Italian steamship *Fortunata* was torpedoed and sunk by a German submarine off the west coast of Ireland on April 30th, 1917.

FORTUNE

British Navy, destroyer; 1912; *Fairfield Co.*; 950 tons; 266X 27x9; 25,000 i.h.p.; 32 knots; turbine engines; Yarrow boilers; three 4 in. guns, 4 T.T.

The destroyer *Forjune* was a unit of the 4th Flotilla at the battle of Jutland on May 31st, 1916, and carried a complement of 68 under command of Lt. Cdr. F. G. Terry. The ship took part in the torpedo attacks which developed after nightfall and at about 11.30 p.m. she came under heavy fire from the German battleships making for the Horn Reefs. The heavy salvos of the big ships set her on fire and she went down with four officers and 63 men, only one man being saved.

The full story of Jutland is told under the *Invincible*, flagship of Rear-Admiral H. L. A. Hood, which was lost.

FOSCOLIA

Watts, Watts & Co.; 1879; *C. Mitchell & Co.*; 1,536 tons; 252x34x22-7; 160 n.h.p.; compound engines. The British cargo ship *Foscolia* sank after a collision in fog with the U.S. cruiser *Columbia* off Fire Island on May 28th, 1898, while on a voyage from New York to Bordeaux carrying a cargo of grain.

FOSCOLO

Tirrenia Soc. Anon, di Nav.; 1942; *Fiume*; 4,500 tons; oil engines.

The Italian motorship *Foscolo* was torpedoed and sunk by British aircraft on December 13th, 1942, two miles off Cape Lilibeo.

FOTINI CARRAS

M. J. Carras; 1918; *R. Duncan & Co.*; 4,452 tons; 375-6X 51-7x26-5; 517n.h.p.; triple-expansion engines. On a voyage from Pagoumene to Bowen, Queensland, the Greek ship *Fotini Carras* went ashore on South Bellona, on July 7th, 1939. She broke her back and sank.

FOUCAULD

Chargeurs Reunis; 1922; *Forges & Chantiers de la Mediterranee*; 11,028 tons; 483-4x58-9x34-9; 679n.h.p.; triple-expansion engines.

The French liner *Foucauld* was bombed and sunk by German aircraft on June 20th, 1940, at La Pallice.

FOUDROYANT

French Navy, destroyer; 1929; *Dyle-Bacalan, Bordeaux*; 1,495

tons; 330-9x32-2x9-5; 35,000 i.h.p.; 33-5 knots; turbine engines; four 5-1 in. guns, two 37mm., 6 T.T. The destroyer *Foudroyant*, Cdr. Fontaine, was engaged in operations connected with the evacuation of the French and British armies from Dunkirk, when she was bombed by German aircraft. The attack took place on June 1st, 1940, and the destroyer was so severely damaged that she sank.

The *Foudroyant* carried a complement of nine officers and 150 ratings, of whom 19 ratings were killed.

FOUGUEUX

French Navy, destroyer; 1928; *Ateliers & Chantiers de Bretagne*;

1,378 tons; 330-9x32-2x9-5; 35,000s.h.p.; 36-4 knots; turbine engines; four 5-1 in. guns, two 37mm.A.A., 6 T.T. The destroyer *Fougueux*, Capt. Sticca, was stationed at Casablanca and participated in the defence of that port when the American forces made their landing on November 8th, 1942. The vessel, in company with five other destroyers, made a sortie from the port at about 8 a.m. against American landing craft going in W. of Cape Fedhala. The French flotilla was heavily engaged by the cruisers *Augusta* and *Brooklyn*, and the *Fougueux* also came under fire from the battleship *Massachusetts* and the cruiser *Tuscaloosa*. At about 10 a.m. the *Fougueux* was hit by heavy shells from both the latter ships and sank with the loss of 11 ratings, besides many wounded out of her complement of 159.

The full story of the action is told under the cruiser *Primauguet* which was sunk on the same occasion.

FOUNDATION STAR

Foundation Shipping Corpn.; 1916; *Craig, Taylor & Co.*; 5,505 tons; 370• 1x15-4x23-1; triple-expansion engines. On a voyage from Veracruz to Philadelphia with a cargo of molasses, the Honduran ship *Foundation Star* broke in two on September 6th, 1952, during heavy weather and sank 130 miles S.E. of Charleston. Eighteen of her crew of 30 were taken off by other ships which went to the rescue, but the captain and nine of the crew who put off in a boat were never seen again.

FOUNTAINS ABBEY

J. Cormack & Co.; 1879; *Palmers' Co.*; 1,285 tons; 243X 32-2x18; 149 n.h.p.; compound engines.

The British cargo ship *Fountains Abbey* was wrecked near Red Head on November 15th, 1921, while on a voyage from Riga to Dundee with a cargo of flax and timber.

FOURCHE

French Navy, destroyer; 1910; *France*; 745 tons; 237x24-9x 9-4; 14,000 h.p.; 31 knots; turbine engines; Normand boilers; two 4 in. guns, four 9pdr., 4 T.T.

The French destroyer *Fourche* was torpedoed and sunk by the Austrian submarine *U-15* in the Straits of Otranto on June 23rd, 1916. The destroyer's normal complement was 62.

FOURNEL

Cie. Generale Transatlantique; 1880; *A. & J. Inglis*; 2,047 tons; 300-2x36x24-9; 250 n.h.p.; compound engines. The French steamship *Fournel* was sunk by a submarine in the Mediterranean on or about June 25th, 1916.

FOWBERRY TOWER

FOWBERRY TOWER

Milburn Line; 1929; Hawthorn, Leslie & Co.; 4,484 tons; 400-7x53 • 3 x 25; 426 n.h.p.; triple-expansion engines. The British steamship *Fowberry Tower* was bombed and sunk by German aircraft on May 12th, 1941, soon after leaving Hull for the U.S.A. Six of her crew were killed.

FOWEY ROSE

R. Hughes & Co.; 1923; I.I. Abdela & Mitchell; 470 tons; 142-1x25x11-6; 8-5 knots; compound engines. The steamship *Fowey Rose*, Capt. Alfred Tyrell, was bombed and sunk by German aircraft on July 5th, 1941, at a position approximately 20 miles S.W. of Govan's Head, Pembroke-shire. Capt. Tyrell and seven of her crew were killed. Capt Tyrell was in command of the *Dudley Rose* when she was bombed and sunk in April 1941.

FOXEN

O. F. Ahlmark & Co.; 1920; Stavanger Stoberi & Dpk.; 1,308 tons; 240-3x37-1x15-5; 132 n.h.p.; triple-expansion engines. The Swedish steamship *Foxen* struck a mine and sank on January 18th, 1940, about 120 miles E. of the Moray Firth. There was only one survivor.

FOXLEY

Reliance Shipping Co.; 1906; Northumberland Shipbuilding Co.; 4,274 tons; 360-5x48x20-2; 362 n.h.p.; 11 knots; triple-expansion engines. The steamship *Foxley* with a cargo of nitrate valued at £70,000 was bound from Pisagua to Rio de Janeiro. She carried a crew of 41 and when passing through the Straits of Magellan stranded on Sir John Narborough Island, on March 18th, 1912, and became a total wreck. One boat containing the captain, first officer, chief and third engineers managed to reach Punta Arenas. The other boat containing 30 men was never heard of again.

FOYLE

British Navy, destroyer; 1903; Cammell Laird; 550 tons; 225 X 23-5x12; 7,000 i.h.p.; 25-5 knots; triple-expansion engines; four 12pr. guns, 2 T.T. The destroyer *Foyle* struck a mine and sank in the Straits of Dover on March 15th, 1917. Her official complement was 70.

FOYLEBANK

Bank Line; 1930; Harland & Wolff; 5,582 tons; 426-8 X 57-3 X 25-8; 830 n.h.p.; 11 knots; oil engines. The motor vessel *Foylebank* was taken over by the Admiralty during the Second World War for service as an auxiliary anti-aircraft ship. On July 4th, 1940, when lying in Portland Harbour she was bombed and sunk by German aircraft.

FOZ DO DOURO

Portuguese Government; 1907; A. Vuijk & Zonen; 1,677 tons; 268-2x38-8x17-6; 183 n.h.p.; triple-expansion engines. The German steamship *Vesta* was requisitioned by the Portuguese Government and renamed *Foz do Douro*. She was sunk by a German submarine off the north-west coast of Spain on January 28th, 1917.

FRAM

Angf. AIBKjell; 1897; Sir R. Dixon & Co.; 2,491 tons; 314-7X 43x20-5; 233 n.h.p.; triple-expansion engines. The Swedish steamship *Fram* was torpedoed and sunk by a German submarine on February 1st, 1940, in Aberdour Bay. Ten of her crew of 19 were killed.

FRAMFIELD

Woodfield Steamship Co.; 1894; J. Priestman & Co.; 2,510 tons; 301x39-6x20-5; 242 n.h.p.; 10 knots; triple-expansion engines. The steamship *Framfield* struck a mine and sank three miles N.E. of the Sunk lightship on October 24th, 1916. The captain and five of the crew were killed.

FRANCA FASSIO

Villain & Fassio; 1892; Wigham, Richardson & Co.; 1,858 tons; 292X37-2x22-6; 366 n.h.p.; triple-expansion engines. The Italian steamship *Franca Fassio* was torpedoed and sunk by a British submarine on October 4th, 1940, 16 miles from Capo Noli.

FRANCE

Ant. Dom. Bonles & fils; 1890; D. & W. Renderson & Co.; 3,800 tons; 361x48-8x25-9. The French 5-masted barque *France* left the Tyne with a cargo of coal for Iquique. On May 13th, 1901, after a hurricane had passed through the area, she was seen by the Spanish barque *Josefa*. The *France* was listing heavily and was flying a signal asking for assistance. Her position was 32° 22' S., 39° 27' W. The *Josefa* approached as near as possible and it could be seen that only three boats remained on board, and there was no sign of any crew. It was not possible to take the *France* in tow and neither the ship nor the crew were seen again.

FRANCE

Soc. Gen. de Transports Maritimes a Vapeur; 1896; S.A. des Forges & Chantiers de la Mediterranee; 4,025 tons; 397-2X42 X 30-5; 474 n.h.p.; triple-expansion engines. The French steamship *France* was sunk by a submarine in the Mediterranean on November 7th, 1915.

FRANCE

French Navy, dreadnought battleship; 1913; St. Nazaire; 23,120 tons; 544x88-5x29; 28,000 i.h.p.; 20 knots; turbine engines; Belleville boilers; twelve 12 in. guns, twenty-two 5-5 in., 8 smaller, 4 T.T. The battleship *France*, Capt. Victor Guy, was a unit of the Mediterranean Squadron under Vice-Admiral Salaun. On July 18th, 1922, the squadron left Toulon for six weeks manoeuvres in the Atlantic and Channel. For some weeks exercises and firing practice were carried out off Quiberon and on the night of August 25th-26th operations had just been concluded and the ships were returning to their anchorage when the *France* grounded in shallow water near the Basse-Noil velle Reef. The vessel was steaming at 12 knots and the force with which she stranded tore a huge hole in her bottom, flooding the engine room and stopping the dynamos so that all lights failed throughout the ship. Capt. Guy headed his ship for the Basse-Nouvelle Reef toward which the current was setting with the intention of beaching but the failure of the engines rendered this impracticable and the battleship gradually settled down, turned on her side and foundered in ten fathoms.

The *France* was not carrying her full complement of 1,108 officers and men at the time, and as far as can be ascertained had a crew of 900, in addition to whom there were 25 officers undergoing a gunnery course. Discipline on board was excellent and everyone was taken off in safety, except one stoker who was trapped below and drowned. The battleship *Paris* and the cruisers *Strasbourg* and *Metz* conveyed the survivors to Lorient.

It was stated later that the spot where the vessel struck was marked on the chart as having a depth of eight fathoms, whereas it was actually only five. This was the second accident in the neighbourhood of Quiberon owing to faulty charts, the *Hoche* having stranded there a year or so previously.

FRANCE MARU

Tochiki Shoji K.K.; 1919; Kawasaki Dockyard Co.; 5,828 tons; 385 X 51 X 36; 437 n.h.p.; triple-expansion engines. The steamship *France Maru* was bombed and sunk by U.S. carrier based aircraft on January 12th, 1945, 50 miles S.E. of Gocong, Indo-China.

FRANCES DUNCAN

J.T. Duncan & Co.; 1907; Palmers' Co.; 2,384 tons; 297-2X 41-5x20-8; 438 n.h.p.; 11 knots; triple-expansion engines. The steamship *Frances Duncan*, Capt. F. Martin, was on her way from Barry to Rouen with a cargo of coal when she encountered exceptionally heavy weather. At about noon on December 5th, 1929, a large number of persons watching from the cliffs at Land's End saw a huge wave strike the vessel and throw her over on to her beam ends. She remained in this position with her decks almost perpendicular to the sea for about half an hour, her cargo having shifted

and making it impossible for her to right herself. She then capsized and sank without being able to launch a boat. Of her crew of 21 by far the greater number were trapped below and could not reach the upper deck. Capt. Martin and four others were saved and 16 were drowned. The steamship *Alice Marie* came upon the scene in time to pick up the five survivors, but although she cruised around for a considerable time no others were sighted.

FRANCES MASSEY

W. A. Massey & Sons; 1927; Sir J. Priestman & Co.; 4,212 tons; 365 X 51 • 5 X 25 • 1; 375 n.h.p.; triple-expansion engines. The steamship *Frances Massey*, on a voyage from Wabana, N.F.L., to Glasgow, was torpedoed and sunk by a German submarine on June 6th, 1940, 14 miles N.W. of Tory Island. Thirty-three of her crew and one gunner were lost, the captain being the only survivor.

FRANCES SALMAN

Canadian Gulf Line; 1919; McDougall Duluth Co.; 2,609 tons; 251x43-7x25-8; 352n.h.p.; triple-expansion engines. The American steamship *Frances Salman* left St. John's, N.F.L., on January 17th, 1942, for Corner Brook and was not seen again. She was thought to have been sunk by a submarine on the 20th.

FRANCESCO

Fili. Sanguinetifu G.; 1896; J. Priestman & Co.; 3,438 tons; 353x44x18-8; 286n.h.p.; triple-expansion engines. The Italian steamship *Francesco* was torpedoed and sunk by a German submarine in the Bay of Biscay on May 6th, 1917.

FRANCESCO BARBARO

Soc. Italiana di Armamento Sidarma; 1940; Cantieri Riuniti deir Adriatico; 6,342 tons; 451-3x60-7x26; 1,320 n.h.p.; oil engines. The Italian motorship *Francesco Barbara* was torpedoed and sunk by a British submarine on September 27th, 1942, off Navarino.

FRANCESCO CIAMPA

F. S. Ciampa & Figli; 1899; T. Turnbull & Son; 3,611 tons; 351-5x43x20-6; 282n.h.p.; triple-expansion engines. On a voyage from Benisaf to Rotterdam with a cargo of iron ore, the Italian ship *Francesco Ciampa* was in collision on February 11th, 1927, and sank near the South Goodwin lightship.

FRANCESCO CRISPI

Lloyd Triestino Soc. Anon. di Nav.; 1926; Ansaldo; 7,600 tons; 447-1x52-9x26-8; turbine engines. The Italian steamship *Francesco Crispi* was torpedoed and sunk by a British submarine on April* 19th, 1943, 18 miles from Cape Le Serre, Elba.

FRANCESCO NUELO

Italian Navy, destroyer; 1925; Quarnaro; 1,058 tons; 295-7X 30-5x10-5; 36,000 s.h.p.; 35 knots; turbine engines; Express boilers; four 4-7in. guns, four 37mm., two 13mm., 4 T.T., 30 mines.

The destroyer *Francesco Nullo* was one of the flotilla of destroyers and submarines which were based on the Eritrean port of Masawa, and which constituted Italy's sole naval force in the Red Sea when she entered the Second World War in June, 1940. On the night of October 21st-22nd, 1940, a British convoy was attacked by two Italian destroyers which discharged torpedoes without doing any damage. The Italian ships were driven off by the convoy escort which failed to bring them to action. In the early hours of the next day the destroyer *Kimberley*, 1,690 tons, Lt. Cdr. J. S. M. Richardson, made contact with the *Francesco Nullo* and after 40 minutes brisk action forced her to run ashore, where she was blown up by one of *Kimberley's* torpedoes.

As the spot where the *Francesco Nullo* grounded was near to the Italian shore batteries these opened fire, hitting *Kimberley* and wounding three ratings.

Most of the *Francesco Nullo's* complement of about 150 were saved.

FRANCESCOSTOCCO

Italian Navy, torpedo boat; 1916; Odero; 669 tons; 238x24x9; 15,500 s.h.p.; 30 knots; turbine engines; Thorny craft boilers; six 4 in. guns, two 40 mm., 4 m.g., 4 T.T.

The torpedo boat *Francesco Stocco* ran into a minefield laid off Fiume by the British submarine *Rorqual* at the end of January, 1944. The vessel struck one of the mines and sank. Her normal complement was 100. On the occasion of the Italian capitulation in September, 1943, the *Francesco Stocco* had been bombed off Corfu when on her way to surrender to the allies. The Germans took her to Fiume, where she was repaired and recommissioned under their orders.

FRANCIS ASBURY

U.S. War Shipping Administration; 1943; St. Johns River S.B. Co.; 7,176 tons; 422-8x57x34-8; 2,500 i.h.p.; 10-5 knots; triple-expansion engines.

The American steamship *Francis Asbury*, Capt. Jean V. Patrick, was in convoy 18 miles off Flushing, Holland, on December 3rd, 1944, when she struck a mine and sank. Ten of her crew were killed. Capt. Patrick was among the survivors.

FRANCIS E. POWELL

Atlantic Refining Co.; 1922; Chicago S.B. Co.; 7,096 tons; 605x60x32; 274 n.h.p.; triple-expansion engines. The American tanker *Francis E. Powell* was torpedoed and sunk by a German submarine at 3 a.m. on January 27th, 1942, about 400 miles E. of Savannah on a voyage from Port Arthur to Providence.

FRANCIS GARNIER

Cie. Cotiere de VAnnam; 1903; Wood, Skinner & Co.; 1,243 tons; 229-3x33-1x17-3; triple-expansion engines. The French steamship *Francis Garnier* struck a mine and sank on February 20th, 1944, S. of Cana, Indo-China.

FRANCIS PRESTON BLAIR

U.S. War Shipping Administration; 1943; Marin-Ship Corp.; 7,194 tons; 422-8x57x34-8; triple-expansion engines. Sailing from Manila to Sydney in ballast the American ship *Francis Preston Blair* went ashore on July 15th, 1945, on the Saumarez Reefs. It was a very exposed position and salvage was hopeless.

FRANCOMARTELLI

Azienda Generale Italiana Petroli; 1939; Cantieri Navali Riuniti; 10,535 tons; 491-1x68-3x36-4; 1,323 n.h.p.; oil engines. The Italian motor tanker *Franco Martelli* was torpedoed and sunk by a submarine on April 18th, 1941, about 300 miles W. of St. Nazaire.

FRANCOIS COPPEE

TV. & C. Guillon; 1900; Ateliers et Chantiers de la Loire; 2,289 tons; 276-5x40-3x22-5. The French sailing ship *Francois Coppee*, bound from Newcastle, N.S.W. to San Francisco, was wrecked in Tomales Bay, N. of San Francisco, on November 13th, 1903, with the loss of 19 lives.

FRANCOISE D'AMBOISE

Soc. Nouvelle d' Armement; 1901; A. Dubigeon; 1,973 tons; 261-3x38-8x22-4. The French sailing vessel *Francoise d'Amboise* was sunk by a German submarine in the North Sea on June 21st, 1916.

FRANCOL

British Admiralty; 1917; Earle's Co.; 2,607 tons; 320 X41-5 X 23-1; 603 n.h.p.; triple-expansion engines. The British tanker *Francol*, on a voyage from Batavia to Fremantle, was shelled and sunk by Japanese cruisers on March 3rd, 1942, about 200 miles E. of Christmas Island. A few survivors were picked up by the Japanese.

FRANCOLI

Cia. Trasmediterranea; 1865; J. Laing; 1,241 tons; 236-5 x 31-2x18-4; 135 n.h.p.; compound engines. The Spanish steamship *Francoli* was sunk by gunfire from a submarine in the Mediterranean on October 1st, 1918.

FRANCONIA

FRANCONIA

Cunard S.S. Co.; 1911; *Swan, Hunter & Wigham Richardson*; 18,150 tons; 600-3x71-3x40-4; 2,170 n.h.p.; 17 knots; quadruple-expansion engines.

The liner *Franconia*, employed as an auxiliary transport, was 195 miles E. of £ S. of Malta on October 4th, 1916, when she was torpedoed and sunk by a submarine. At the time of the attack she had no troops on board. Of her crew of 314 twelve were killed.

FRANGOULA B. GOULANDRIS

Goulandris Bros.; 1918; *J. L. Thompson & Son*; 6,701 tons; 412-3x55-5x34-4; 558 n.h.p.; triple-expansion engines. The Greek steamship *Frangoula B. Goulandris* was torpedoed and sunk by a German submarine on July 2nd, 1940, on a voyage from Cork to St. Thomas, W.I. There were 26 survivors.

FRANK SEAMANS

Rederi A/S Nidaros; 1928; *Sir J. Priestman & Co.*; 4,271 tons; 352 X 60x22-2; triple-expansion engines.

The Norwegian steamship *Frank Seamans* was torpedoed and sunk by a German submarine on May 7th, 1942, between Paramaribo and Trinidad.

FRANKBY

Macvicar, Mar shall & Co.; 1904; *C. Cornell & Co.*; 4,182 tons; 385 X 50x25-7; 443 n.h.p.; triple-expansion engines. The British cargo ship *Frankby* was wrecked on December 11th, 1917, on Formigas Rocks, Azores, while on a voyage from Antofagasta to Marseilles carrying a cargo of nitrate.

FRANKEN

(1940-45); 10,800 tons.

The German tanker *Franken* was torpedoed and sunk by a Russian submarine on April 8th, 1945, E. of Hela, Poland.

FRANKENSTEIN

Fried. Krupp A.G.; 1923; *Fried. Krupp A.G.*; 3,703 tons; 338-7x47-3x26-2; 290 n.h.p.; triple-expansion engines. The German steamship *Frankenstein* was torpedoed by a British submarine, and bombed and sunk by aircraft in April, 1941, at Florø, during the German invasion of Norway.

FRANKLIN

New York & Havre Steam Navigation Co.; 1849; *Westervelt & McKay, New York*; 2,184 tons; 263x41-8x26; 1,250 i.h.p.; 10-3 knots; steam engines.

The *Franklin* was one of the early American steamships which entered into competition with British vessels for a share of the Atlantic trade. She belonged to the New York & Havre Steam Navigation Co., which was formed in 1848 by Messrs. Fox and Livingstone, who had previously run the Havre Line of sailing packets founded by their father-in-law, Francis Depau. The line took over a contract for the U.S. mails valued at approximately £30,000 per annum, which had fallen vacant owing to the collapse of the Ocean Steam Navigation Co.

The *Franklin* was later joined by the *Humbolt*, of 2,850 tons, and for some years these ships maintained a regular trans-Atlantic service. Then came disaster; the *Humbolt* was wrecked in 1853, but with the loss of only one person, and about eight months later, on July 17th, 1854, the *Franklin* was wrecked off Montauk Point, New York, but without loss of life. This proved a mortal blow to the company which struggled on until the outbreak of the Civil War in 1861, when it ceased to operate.

FRANKLIN K. LANE

Standard Oil Company; 1920; *Bethlehem S.B. Corp.*; 6,589 tons; 435 X 56x32; triple-expansion engines.

The American tanker *Franklin K. Lane* was torpedoed and sunk by a German submarine on June 8th, 1942, between Trinidad and Aruba. Four lives were lost.

FRANZ FISCHER

British Admiralty (Everett & Newbigiri); 1881; *Irvine & Co.*; 970 tons; 224-3x31-5x12-3; 105 n.h.p.; compound engines. The steamship *Franz Fischer* was formerly German and seized by the British. She was two miles south of Kentish Knock on February

1st, 1916, when she was hit and sunk by a bomb from a Zeppelin. The captain and 12 of the crew were killed.

FRANZ HANBEL

Haniel G.m.b.H.; 1911; *J. Blumer & Co.*; 2,188 tons; 287x41x17-2; triple-expansion engines.

The German steamship *Franz Haniel* struck a mine and sank on May 23rd, 1940, in Kiel Bay.

FRANZ RUDOLF

F.L.Nimtze; 1906; *Howaldtswerke*; 1,419 tons; 240-6X36X16 • 7; 96 n.h.p.; triple-expansion engines.

The German steamship *Franz Rudolf* was torpedoed and sunk by a Russian submarine on September 20th, 1942, in the Baltic.

FRASER

Canadian Navy, destroyer; 1931; *Vickers Armstrong*; 1,375 tons; 326x33-25x8-5; 36,000 s.h.p.; 35-5 knots; turbine engines; 3-drumboilers; four-4-7in. guns, 7smaller, 8 T.T. The destroyer *Fraser* was sunk in a collision with the British cruiser *Calcutta*, 4,200 tons, on June 28th, 1940, in the Gironde estuary. Forty of her complement of 155 were lost.

FRATELLIBIANCHI

Fratelli Bianchi; 1898; *Palmers'Co.*; 3,542 tons; 350x45-2x27; 317 n.h.p.; triple-expansion engines.

The Italian steamship *Fratelli Bianchi* was torpedoed and sunk by a submarine in the Mediterranean on July 4th, 1917.

FRATELLICAIROLI

Italian Navy, torpedo boat; 1914; *Pattison*; 615 tons; 236-2X24x8-8; 14,500 s.h.p.; 30-8 knots; turbine engines; Thornycroft boilers; five 4 in. guns, two 40 mm.A.A., 4 m.g.; 4 T.T.

The Italian torpedo boat *Fratelli Cairoli* struck a mine and sank N. of Tripoli on December 23rd, 1940. The vessel carried a complement of about 100.

FRATTON

Southern Railway; 1925; *D. & W. Henderson & Co.*; 757 tons; 220-3x33-6x14-1; 165 n.h.p.; 15 knots; triple-expansion engines.

The cross-Channel steamship *Fratton* was taken over by the Admiralty during the Second World War for service as a mercantile auxiliary. On August 18th, 1944, when lying in Seine Bay, Normandy, the vessel was sunk by an underwater explosion.

FRAUENBURG

German Government; 1913; *Greenock & Grangemouth Dockyard Co.*; 2,111 tons; 272-2x42-7x17-6; 250 n.h.p.; triple-expansion engines.

The steamship *Frauenburg* was formerly the Estonian *Peet*, seized by the Germans. She struck a mine and sank on November 7th, 1941, eight miles N. of Ventspils.

FRAUENLOB

German Navy, light cruiser; 1902; *Weser*; 2,715 tons; 328 X 40x17-2; 8,500 i.h.p.; 21-7 knots; triple-expansion engines; Schulz-Thornycroft boilers; ten 4-1 in. guns, ten 1 pdr., 4 m.g., 2 T.T.

The German light cruiser *Frauenlob* was an old and small ship but at the battle of the Heligoland Bight she had given a good account of herself in a brief engagement with the British ships *Arethusa* and *Fearless*. At Jutland the ship was under command of Capt. G. Hoffmann and formed part of the 4th Scouting Group. It was not until 10.20 in the evening of May 31st, 1916, that she was engaged in an action between the five ships of the German 4th Scouting Group and the four ships of the British 2nd Light Cruiser Squadron. The vessels were not more than 1,500 to 2,000 yards apart and for 15 minutes they fired into each other at almost point blank range.

The *Frauenlob* was the third in the German line and when passing the *Southampton*, flagship of Cdre. Goodenough, she was struck in the port engine room by a torpedo from that ship and sank.

Not one man was saved out of a complement of 12 officers and 308 men.

FRECCIA

Italian Navy, destroyer; 1930; Tirreno; 1,206 tons; 315x32x 9-5; 44,000 s.h.p.; 38 knots; turbine engines; 3-drum boilers; four 4-7 in. guns, four 37 mm.A.A., four 13 mm.A.A., 6 T.T. The destroyer *Freccia* was lying off Genoa on August 19th, 1943, when she was bombed and sunk in an Allied air attack. The vessel's normal complement was 150.

FRED W. GREEN

Ministry of War Transport (Furness, Withy & Co.); 1918; Great Lakes Engineering Works; 2,292 tons; 253-5x43-8x20-4; 226 n.h.p.; triple-expansion engines.

The steamship *Fred W. Green*, on a voyage from New York to Freetown, was torpedoed, shelled and sunk by a German submarine on May 31st, 1942, about 200 miles E. of the Bermudas. The captain, three crew and one gunner were killed.

FREDENSBORG

A/S Dannebrog; 1922; Jan Smit Czn.; 2,094 tons; 283 -4x42-1x18-3; 180 n.h.p.; triple-expansion engines. The Danish steamship *Fredensborg* was torpedoed and sunk by a German submarine on January 27th, 1940, about 20 miles E. of Grimsby, with the loss of her crew of 20.

FREDERICK C. DAVIS

United States Navy, destroyer; 1943; United States; 1,200 tons; 306x36-9x10-7; 6,000 s.h.p.; 20 knots; turbine engines; three 3 in. guns, two 40 mm.A.A., four 20 mm.A.A., 3 T.T. The destroyer *Frederick C. Davis* was torpedoed and sunk by a German submarine in mid-Atlantic on April 24th, 1945. The vessel carried a complement of 220.

FREDERICK S. FALES

Oriental Trade & Transport Co.; 1939; Cantieri Riuniti deW Adriatico; 10,525 tons; 490-4x70x37; 1,000 n.h.p.; 12 knots; oil engines.

The tanker *Frederick S. Fales*, from Curacao to the Clyde with 14,000 tons of fuel oil, was torpedoed and sunk by a German submarine on September 21st, 1940, 150 miles S. by E. of Rockall. Twenty of her crew and one gunner were lost.

FREDHEIM

Alf. Monsen; 1878 r Whitehaven S.B. Co.; 1,144 tons; 240-3x⁴ 33-2x16-6; 121 n.h.p.; compound engines. Sailing in ballast from Glasgow to Ayr the Norwegian ship *Fredheim* was in collision near Dumbarton and sank on January 24th, 1928.

FREDRIKA

/ Mannerheim; 1890; J. Blumer & Co.; 1,851 tons; 270x 37-1x17-1; 170 n.h.p.; triple-expansion engines. The Swedish steamship *Fredrika* was torpedoed and sunk by a German submarine in the North Sea on July 12th, 1917.

FREDVILLE

Jens A. Morland; 1917; Wiltons Eng. & Slipway Co.; 1,150 tons; 230-5x34-1x13-2; 120 n.h.p.; triple-expansion engines. The Norwegian steamship *Fredville* struck a mine and sank on January 11th, 1940, 80-100 miles E. of the Orkney Islands. Eleven of the crew were lost.

FREEMAN DENNIS

Dennis & Doane; 1865; Beaver River, N.S.; 808 tons; 167-6 x 35-5x21.

The Canadian wooden barque *Freeman Dennis* left St. John, N.B., on September 29th, 1881, for Liverpool. On October 20th, in heavy weather, she was sighted near the Azores by the barque *Maggie Miller*, whose captain sent a boat with a request for help as his ship had suffered damage, only to be told that the *Freeman Dennis* had sprung a leak and was herself in distress. Nothing more was ever heard of the *Freeman Dennis* or her crew of 15. The *Maggie Miller* was abandoned by her crew soon afterwards.

FREIDIG

A/S Rona; 1903; Wood, Skinner & Co.; 1,333 tons; 237X 35-2x16; triple-expansion engines.

Sailing from Aberdeen to Liverpool with a cargo of rye, the Norwegian ship *Freidig* foundered on February 7th, 1944, when the cargo shifted. She was in the vicinity of Strathie Point.

FREIENFELS

Deutsche Dampfs. Ges. Hansa; 1929; A.G. Weser; 7,563 tons; 506-4x62-2x27-9; 785 n.h.p.; triple-expansion engines. The German steamship *Freienfels* struck a mine and sank on December 19th, 1940, near Leghorn.

FREMAD I

/ M. Jacobsen & Co.; 1885; J. & G. Thomson; 1,554 tons; 236-6x39-2x22-8.

The Norwegian sailing vessel *Fremad I* was sunk by a German submarine in the North Sea on April 9th, 1917.

FREMONA

Cairn Line of Steamships; 1887; Gourlay Bros. & Co.; 3,028 tons; 328x42-2x25-9; 295n.h.p.; 9-5 knots; triple-expansion engines.

The steamship *Fremona* was torpedoed and sunk by a German submarine ten miles N. by W. of He de Bas on July 31st, 1917. Eleven of her crew were killed. The captain was among the survivors.

FREYA

E.R. Retzlaff; 1877; R. Dixon & Co.; 1,350 tons; 250 x 32 -8 x 16-8; 143 n.h.p.; compound engines.

The German steamship *Freya* left Stettin on January 9th, 1930, for Rotterdam and passed Cuxhaven on January 11th, but was never heard of again.

FRIAR ROCK

U.S. Maritime Commission; 1921; Stabilimento Tecnico; 5,441 tons; 404 -1x54-1x29; 456 n.h.p.; triple-expansion engines. The Panamanian steamship *Friar Rock* was torpedoed and sunk by a German submarine on January 13th, 1942, 100 miles S.E. of Cape Race on a voyage from Sydney, N.S., to the Clyde. Seven survivors were picked up but two of these died soon afterwards.

FRIDLAND

Axel Brostrom & Son; 1910; W. Gray & Co.; 4,960 tons; 400x 52 • 8 X 26; 497 n.h.p.; triple-expansion engines. The Swedish steamship *Fridland* struck a mine and sank in the North Sea on February 7th, 1918.

FRI DTJOF NANSEN

Bergh & Helland; 1897; J. Readhead & Sons; 3,275 tons; 326x 47x23-9; 286 n.h.p.; triple-expansion engines. The Norwegian steamship *Fridtjof Nansen* struck a mine and sank in the North Sea on January 5th, 1916.

FRI DTJOF NANSEN

P. Bogen; 1881; C. S. Swan & Hunter; 2,190 tons; 295 -8 x 36-2x24-6; 221 n.h.p.; compound engines. The Norwegian steamship *Fridtjof Nansen* was torpedoed and sunk by a German submarine in the North Sea on May 29th, 1917.

FRIEDENAU

Bugsier-, Reederei-u. Bergungs-A.G.; 1920; Ateliers & Chantiers de la Loire; 5,219 tons; 393-3x56-1x29; triple-expansion engines.

The German steamship *Friedenau* was torpedoed and sunk by the British submarine *Triton* on April 10th, 1940, in the Skagerrak.

FRIEDRICH BREME

Deutsch-Amerikanische Petroleum Ges.; 1936; A.G. Weser; 10,397 tons; 487-9x69-9x37-1; oil engines. The German motor tanker *Friedrich Breme* was shelled and sunk by British warships on May 27th, 1941. She had been acting as supply ship to the German battleship *Bismarck*.

FRIEDRICH ECKOLDT

German Navy, destroyer; 1937; Blohm & Voss; 1,625 tons; 374X 37x9-3; 50,000 s.h.p.; 36 knots; turbine engines; five 5 in. guns, four 37 mm. A.A., four 20 mm. A.A., 8T.T. The destroyer *Friedrich Eckoldt* was one of a flotilla accompanying the pocket battleship *Lutzow* and the heavy cruiser *Hipper* on a raid upon a British convoy to North Russia. Contact was made about 9.30 a.m. on December 31st, 1942, off North Cape, the convoy being escorted by a small force of destroyers under command of Capt. R. StV. Sherbrooke, D.S.C. Despite the overwhelming superiority of the Germans the British managed by skilful manoeuvring and the laying of smoke screens to prevent an attack on the convoy. This was achieved for the loss of one destroyer, the *Achates*, 1,350 tons, and after a brilliant defensive action lasting more than two hours Capt. Sherbrooke was relieved by the arrival of the British cruisers *Sheffield*, 9,100 tons, twelve 6 in. guns, Capt. C. T. Addis, flagship of Vice-Admiral R. L. Burnett, and *Jamaica*, 8,000 tons, twelve 6 in. guns, Capt. J. Hughes-Hallett, D.S.O.

The aspect of the action now completely changed, the German destroyers and the *Hipper* coming under heavy fire from the British ships, which damaged the cruiser and caused her to reduce speed. A salvo from the *Sheffield* set the *Friedrich Eckoldt* on fire. Later the destroyer was hit by more salvos and sank by the stern. The *Lutzow* and *Hipper* and the remaining destroyers then broke off the action and retired.

For further details see under the destroyer *Achates*.

FRIEDRICH KARL

German Navy, armoured cruiser; 1902; Blohm & Voss; 9,050 tons; 394x65x25-7; 18,500 i.h.p.; 21 knots; triple-expansion engines; Dilrr boilers; four 8-2 in. guns, ten 6 in., ten 15 pdr., 4 m.g., 4 T.T.

The armoured cruiser *Friedrich Karl* was the flagship of Rear-Admiral Behring, who was entrusted with the task of keeping watch upon the movements of the Russian fleet in the Baltic during the First World War. In November, 1914, his small force consisting, besides his flagship, of a few light cruisers and about four destroyers, was lying at Danzig awaiting some abatement of the stormy weather before proceeding to Libau (Liepaja) to sink blockships and prevent the port's use as a base for submarines. It was not until the middle of the month that it became possible to put to sea, and by this time the Russians had sown protective minefields across all the approaches to the port.

In the early hours of November 17th, when Rear-Admiral Behring's squadron was about 30 miles off Memel, the flagship struck a mine. Nevertheless the work of blocking the harbour was proceeded with, despite violent snowstorms, and later, when all hopes of saving the *Friedrich Karl* were abandoned, her crew were taken off by the light cruiser *Augsburg*. Although there were no losses among her 557 officers and men, the loss of the ship herself was a severe blow to the German navy, which possessed few armoured cruisers and regarded even old ones as precious.

FRIEDRICH KARL

Reederei Wendenhof G.m.b.H.; 1938; Neptunwerft Rostock G.m.b.H.; 1,262 tons; 236-3 35•5X15•1; triple-expansion engines.

The German steamship *Friedrich Karl* struck a mine and sank on December 23rd, 1942, 20 miles N. of Borkum.

FRIEDRICHSHAFEN

1944; 1,925 tons.

The German ship *Friedrichshafen*, on a voyage from Gefle to Eitheim, was torpedoed and sunk by a British submarine on April 15th, 1944, 15 miles S.S.E. of Egersund. All her crew of 28 were lost.

FRIELINGHAUS

Fried.KruppA.G.; 1922; Fried.KruppA.G.; 4,339tons; 380-IX 47-4x26-4; 289 n.h.p.; triple-expansion engines. The German steamship *Frielinghaus* was sunk at Narvik on April 10th-13th, 1940, during the invasion of Norway. She was subsequently raised and repaired but on June 28th, 1942, she struck a mine and sank off the Frisian Islands.

FRIESLAND

Scheepv. en Steenkolen Maats.; 1930; Cowpen Dry Dock Co.; 2,662 tons; 295-2x44x18-9; 270 n.h.p.; 10 knots; triple-expansion engines.

The Dutch steamship *Friesland* was bound from Dagenham to Blyth on October 27th, 1941, as a unit of Convoy FN 37. When 18 miles N.N.W. of Cromer the convoy was heavily attacked by German dive bombers, which hit the *Friesland* and sank her with the loss of 13 of her crew.

FRIGG

Rederi A/B Eyrstrasalt; 1886; J. Readhead & Co.; 1,592 tons; 268• 1x36-3x16-1; compound engines.

The Swedish steamship *Frigg* struck a wreck and sank on April 28th, 1944, off the German coast while on a voyage from Emden to Sundsvall.

FRIGGA

Akties. Inger; 1900; Laxevaags Maskin & Jernskibsbyg.; 1,046 tons; 225-8x32-2x13-3; 97 n.h.p.; triple-expansion engines.

The Norwegian steamship *Frigga* was torpedoed and sunk by a German submarine in the English Channel on August 25th, 1917.

FRIMAIRE

Plisson Steam Navigation Co.; 1900; Sir R. Dixon & Co.; 1,778 tons; 272 -5x40x18-1; 190 n.h.p.; 9 knots; triple-expansion engines.

The steamship *Frimaire* was torpedoed and sunk by a German submarine 21 miles S.S.E. of Belle He on March 15th, 1917. The captain and eleven of the crew were killed.

FRIMAIRE

Cie. Nationale de Navigation; 1930; Deutsche Werft A.G.; 9,242 tons; 468 x61-8x36-4; compound engines.

The French tanker *Frimaire* was torpedoed and sunk by a German submarine on June 15th, 1942, soon after leaving Aruba for Covenas, with the loss of all on board.

FRINTON

D.InglessiFils; 1903; ClydeS.B.&E. Co.; 1,361 tons; 269-7X 36-2x16-3; 542 n.h.p.; triple-expansion engines.

The Greek steamship *Frinton* was bombed and sunk by German aircraft on April 22nd, 1941, at Megara during the invasion of Greece.

FRISCO

Chr.J.Reim; 1939; PorsgrundMek. Verks.; 1,582tons; 246-6X 37-9x18-2; 63 n.h.p.; compound engines.

The Norwegian steamship *Frisco* was torpedoed and sunk by a German submarine on January 12th, 1942, between Savannah and Argentina, N.F.L. Thirteen of her crew were lost.

FRISIO

Netherlands Navy, gunboat; 1912; Amsterdam Dockyard; 540 tons; 172-2x28x9-2; 1,500 b.h.p.; 14 knots; oilengines; four 4 in. guns, 2 m.g.

The gunboats *Frisio*, *Brimio* and *Gruno* were engaged in resisting the German invasion of Holland which commenced on May 10th, 1940. After putting up a stout defence in the Zuider Zee the *Frisio* and *Brimio* were sunk by dive bombers, but the *Gruno* managed to reach an English port.

All three ships were of the same tonnage and dimensions and each carried a complement of 63.

FRITHJOF EIDE

B.Pedersen&Son; 1904; Howaldts\verke ; 1,207 tons; 226- 6 X 34-6x15-6; 117 n.h.p.; triple-expansion engines.

The Norwegian steamship *Frithof Eide* was torpedoed and sunk by a German submarine in the North Sea on November 9th, 1917.

FRITHJOF EIDE

Birger Pedersen & Son; 1905; J. L. Thompson & Sons; 4,140 tons; 360X.50-3X16-9; 338 n.h.p.; triple-expansion engines.

The Norwegian steamship *Frithjof Eide* went ashore on November 27th, 1934 on Prestogalten .about five miles S. of Rorvik, and became a total wreck.

FRIXOS

Alex. G. Zachariassen; 1888; *Richardson, Duck & Co.*; 2,471 tons; 297'8x40-4X19; 217 n.h.p.; triple-expansion engines. The Finnish steamship *Frixos* was torpedoed and sunk by a German submarine in the Arctic on April 13th, 1917.

FRODE

L. H. Carl; 1893; *Burmeister & Wain*; 1,875 tons; 283-4X38-2x17-3; 198 n.h.p.; triple-expansion engines. The Danish steamship *Frode* was torpedoed and sunk by a German submarine off the west coast of Ireland on September 3rd, 1915.

FROGNER

Fearnley & Eger; 1907; *NylandsVcerksted*; 1,476 tons; 260-1x37-2x17-1; 152n.h.p.; triple-expansion engines. The Norwegian steamship *Frogner* was torpedoed and sunk by a German submarine in the English Channel on April 29th, 1918.

FRONDEUR

French Navy, destroyer; 1929; *Chantiers Navals Francais*; 1,378 tons; 330-9x32-2x9-5; 35,000s.h.p.; 33-5 knots; turbine engines; four 5-1 in. guns, two 37 mm.A.A., 6 T.T. The destroyer *Frondeur* was lying in Casablanca harbour when the Americans made their landing on November 8th, 1942. The vessel, in company with five other destroyers, made a sortie from the port about 8.20 a.m. against American landing-craft going in W. of Cape Fedhala. She lasted longer than most of her consorts which were soon sunk or disabled by the American heavy ships. At about 11.15 a.m. the *Frondeur* was hit aft by shells from the U.S. cruisers *Wichita* and *Tuscaloosa* and was driven back to harbour where she was later bombed and sunk. She suffered no fatal casualties.

The full story of the action is told under the cruiser *Primauguet* which was sunk on the same occasion.

FROSINONE

Italian Government; 1914; *Ateliers & Chantiers de France*; 5,202 tons; 352'9x52-5x28-7; triple-expansion engines. The steamship *Frosinone* was formerly the French *Congo*, taken over by the Italians. She was bombed and sunk by German aircraft on December 2nd, 1943, at Bari.

FROSSOULA

Phoenix S.S. Co.; 1903; *Tyne Iron S.B. Co.*; 1,282 tons; 220x33x21-6; 149n.h.p.; triple-expansion engines. The Panamanian steamship *Frossoula* was bombed and sunk by German aircraft on July 15th, 1940, 240 miles N.W. of Finisterre. There were 11 survivors including the captain.

FROYA

Norwegian Navy, minelayer; 1916; *Norway*; 760 tons; 284-7x27x8-2; 7,000 i.h.p.; 22 knots; turbine engines; four 4 in. guns, one 3 in., two 1 pdr., 2 T.T., 200 mines.

The minelayer *Froya* was sunk in action with a German warship in Trondheim Fjord, on April 9th, 1940 during the German invasion of Norway. The vessel's normal complement was 78.

FUBUKI

Japanese Navy, destroyer; 1927; *Maizuru*; 1,700 tons; 371-5x33-7x9-9; 40,000 s.h.p.; 34 knots; turbine engines; Kampon boilers; six 5 in. guns, 4 A.A.m.g., 9 T.T.

The destroyer *Fubuki* took part in the night action off Cape Esperance on October 11th-12th, 1942. The Japanese force of six cruisers and six destroyers, steaming through the channel between Choiseul Island and New Georgia, in the Solomons Group, ran into a U.S. squadron of four heavy cruisers and five destroyers. There were two actions, one before midnight on the 11th and the other on the following morning. The *Fubuki* was sunk by gunfire off Savo Island. Other Japanese ships lost were the heavy cruiser *Furutaka*, 7,100 tons, and the destroyers *Murakumo*, 1,700 tons, and *Natsugumo*, 1,500 tons.

The full story of the action, which was known as the battle of Cape Esperance, is told under the U.S. destroyer *Duncan*.

FUJI MARU

Nippon Yusen K.K.; 1937; *Mitsubishi Jukogyo K.K.*; 9,138 tons; 452-8x60-4x36-1; 1,333 n.h.p.; turbine engines. The steamship *Fuji (Huzi) Mam* was torpedoed and sunk by the U.S. submarine *Shad* and *Grayback* on October 27th, 1943, N.W. of the Ryukyu Islands.

FUJIKAWA MARU

Toyo Kaiun K.K.; 1938; *Mitsubishi Jukogyo K.K.*; 6,938 tons; 437-4x58-5x32-8; 839n.h.p.; oil engines. The motor vessel *Fujikawa (Huzikawd) Maru* was taken over by the Japanese Navy for use as an aircraft transporter. On February 17th, 1944, she was sunk by U.S. carrier-based aircraft in the Caroline Islands.

FUJIKAWA MARU

Kawasaki Kisen K.K.; 2,829 tons. The steamship *Fujikawa Maru* was torpedoed and sunk by the U.S. submarine *Darter* on March 30th, 1944, 120 miles north of the Kaap de Goede Hoop, Vogelkop, New Guinea.

FUJINAMI

Japanese Navy, destroyer; 1942; *Japan*; 2,200 tons; 415x35x—; 34 knots; turbine engines; six 5 in. guns, eight 25 mm.A.A., 15 T.T.

The destroyer *Fujinami* was one of nine such vessels sunk at the battle of Leyte Gulf, October 23rd-26th, 1944. The *Fujinami* was attached to the Central Force which was heavily engaged in the San Bernardino Strait and off the E. coast of Samar in the Philippines. The *Fujinami*, which carried a complement of over 200, was bombed and sunk by U.S. carrier-borne aircraft S. of Mindoro on the 26th, the last day of the battle when all the Japanese units were retiring.

The full story of the battle of Leyte Gulf is told under the battleship *Musashi*.

FUJISAN MARU

Iino Shoji K.K.; 1931; *Harima S.B. & Eng. Co.*; 9,527 tons; 493-4x65x37; 1,857n.h.p.; oil engines.

The tanker *Fujisan (Huzisan) Maru* was sunk by U.S. carrier-based aircraft on February 17th, 1944, in the Caroline Islands.

FUJITAMA MARU

Tamai Shosen K.K.; 2,218 tons. The steamship *Fujitama Maru* struck a mine and sank on May 30th, 1945, off Kobe.

FUKKAI MARU

Meiji Kaiun K.K.; 1920; *Yokohama Dock Co.*; 3,829 tons; 345x50x29-1; 343 n.h.p.; triple-expansion engines. The steamship *Fukkai (Hukkai) Maru* was torpedoed and sunk by the U.S. submarine *Pogy* on December 13th, 1943, off the Palau Islands.

FUKKO MARU

Fukko Shosen K.K.; 1924; *Kobe Steel Works*; 3,834 tons; 350-7x50x27; 478n.h.p.; oil engines.

The motor vessel *Fukko (Hukko) Maru* was torpedoed and sunk by the U.S. submarine *Sandlance* on May 17th, 1944, about 150 miles W. of Tenian Island, Ladrone Islands.

FUKOKU MARU

Nisshin Kaiun Shokai; 1920; *British American S.B. Co.*; 2,851 tons; 320x43-8x25-1; 257n.h.p.; triple-expansion engines. The steamship *Fukoku (Hukoku) Maru* was sunk by U.S. carrier-based aircraft on June 12th, 1944, about 150 miles W. of the Ladrone Islands.

FUKUEI MARU

Kuribayashi Shosen K.K.; 1918; *Hakodate Dockyard*; 1,113 tons; 215x31-5x18-5; 88n.h.p.; triple-expansion engines. The steamship *Fukuei (Hukuei) Mam* was torpedoed and sunk by the U.S. submarine *Pickrel* on April 7th, 1943, off the north east coast of Honshu Island.

FUKUEI MARU

FUKUEIMARU

ToaBoeki K.K.; 1938; *Osaka Zosensho*; 1,868 tons; 271-7x40x20-3; 156 n.h.p.; triple-expansion engines. The steamship *Fukuei (Hukuei) Mam* struck a mine and sank on May 24th, 1945, off the Goto Islands, Japan.

FUKUEI MARU No. 2

ToaBoeki K.K.; 1939; *Kawanimani Kogyo K.K.*; 1,901 tons; 271-7x40x20-3; 150 n.h.p.; triple-expansion engines. The steamship *Fukuei (Hukuei) Mam No. 2* was torpedoed and sunk by the U.S. submarine *Wahoo* on January 26th, 1943, about 300 miles N. of New Guinea.

FUKUI MARU No. 2

Teikoku Kisen K.K.; 1917; *Hakodate Dock K.K.*; 1,592 tons; 235x36x21-5; 150 n.h.p.; triple-expansion engines. The steamship *Fukui (Hukui) Mam No. 2* was torpedoed and sunk by the U.S. submarine *Segundo* on June 11th, 1945, in the Yellow Sea.

FUKUJU MARU

Murao Kisen Goshi Kaisha; 1883; *Wigham Richardson & Co.*; 1,784 tons; 255-5x35-1x24-5; 195 n.h.p.; compound engines. Sailing from Ofunato to Muroran with a cargo of ore, the Japanese ship *Fukuju Mam* was wrecked on March 3rd, 1930, at Shiriyasaki, and sank.

FUKUJU MARU

Okadagumi K.K.; 1919; *Canadian Vickers*; 5,291 tons; 400 x 52-4x28-5; 520 n.h.p.; triple-expansion engines. The steamship *Fukaju (Hukuzyu) Mam* was torpedoed and sunk by the U.S. submarine *Picuda* on November 23rd, 1944, off the west coast of Tsushima Island.

FUKUKENMARU

ToaKaiun K.K.; 1920; *Osaka Iron Works*; 2,558 tons; 284-5 x 42-5x23; 288 n.h.p.; triple-expansion engines. The steamship *Fukuken (Hukuken) Maru* struck a mine and sank on December 29th, 1942, in the Hainan Strait.

FUKUKOMARU

Kusunoto Kisen K.K.; 1919; *Harima Dockyard*; 2,041 tons; 270x39x23-9; 150 n.h.p.; triple-expansion engines. The Japanese steamship *Fukuko Maru* went ashore on July 4th, 1929, at Akiyura Island, Chishima, in dense fog, and became a total loss.

FUKUOKA MARU

Yamasaki Kisen K.K.; 1885; *C. S. Swan & Hunter*; 2,606 tons; 317x38x24-5; 299 n.h.p.; compound engines. The steamship *Fukuoka Maru* was wrecked on January 23rd, 1927, at Kawajiri Bay while on a voyage from Fushiki to Tsuruga.

FUKUREI MARU

ToaKaiun K.K.; 5,969 tons. The steamship *Fukurei Maru* was torpedoed and sunk by the U.S. submarine *Ronquil* on August 24th, 1944, off Keelung, Formosa.

FUKUSEI MARU

Fukuyo Kisen K.K.; 2,219 tons. The steamship *Fukusei Mam* was torpedoed and sunk by the U.S. submarine *Barb* on March 28th, 1944, 235 miles east of Naha, Okinawa Island.

FUKUSHU MARU

Kita Nippon Kisen K.K.; 1903; *Framnes Mek. Verksted*; 1,454 tons; 237-1x34-2x19-2; 111 n.h.p.; triple-expansion engines. The steamship *Fukushu (Hukusyū) Maru* was torpedoed and sunk by the U.S. submarine *Pollack* on March 11th, 1942, in the East China Sea.

FUKUURAMARU

Iino Kisen K.K.; 1894; *Nylands Varksted*; 3,177 tons; 325 x 41-8x21-2; 258 n.h.p.; triple-expansion engines. The steamship *Fukuura (Hukuurd) Maru* was bombed and sunk by U.S. Navy carrier-based aircraft on October 10th, 1944, 50 miles south of Naha, Okinawa Island.

258

FUKUYAMAMARU

Kaiyo Kisen K.K.; 1936; *Harima S.B. & Eng. Co.*; 3,581 tons; 334-9x48x26; 241 n.h.p.; triple-expansion engines. The steamship *Fukuyama (Hukuyama) Maru* was torpedoed and sunk by the U.S. submarine *Tang* on February 22nd, 1944, W. of Tenian Island, Ladrone Islands.

FUKUYAMA MARU

Kokoku Kisen K.K.; 6,040 tons. The steamship *Fukuyama Mam* was bombed and sunk by U.S. carrier-based aircraft on January 9th, 1945, 25 miles S. of Kaofsiung, Formosa.

FUKUYOMARU

Hashimoto Bunji; 1892; *Wood, Skinner & Co.*; 1,594 tons; 250-3x34x15-5; 138 n.h.p.; triple-expansion engines. The steamship *Fukuyo Maru* went ashore in dense fog on August 27th, 1931, near Nemuro on Harukaru Island and was wrecked.

FUKUYOMARU

Toyo Kisen K.K.; 1920; *Asano S.B. Co.*; 5,463 tons; 400x53-2x29-4; 513 n.h.p.; triple-expansion engines. The steamship *Fukuyo (Hukuyd) Mam* was torpedoed and sunk by the U.S. submarine *Trepang* on December 6th, 1944, off the north coast of Luzon Island, Philippines.

FUKUZANMARU

Japanese Government; 1918; *Federal S.B. Co.*; 6,607 tons; 397x55-2x31-1; 619 n.h.p.; turbine engines. The steamship *Fukuzan (Hukuzan) Maru* was formerly the British *Federlock*, seized by the Japanese at Shanghai in December, 1941. She was sunk by unknown causes on August 4th, 1942, off Tama-gawa, Honshu Island.

FUKUZAN MARU

Miyachi Kisen K.K.; 1928; *Armstrong, Whitworth & Co.*; 6,889 tons; 434-9x56-5x—; triple-expansion engines. The steamship *Fukuzan Maru* sank in a typhoon on October 27th, 1961, 60 miles N. of Saipan. The ship was on a voyage from Townsville to Yokohama.

FULANI

Elder, Dempster & Co.; 1907; *Harland & Wolff*; 3,731 tons; 370-6x49-3x21-8; 528 n.h.p.; triple-expansion engines. The British cargo ship *Fulani* was wrecked on June 3rd, 1914, on Carpenter Rock, Sierra Leone, while on a voyage from the west coast of Africa to Liverpool carrying a cargo of palm oil.

FULHAM VII

Borough of Fulham (Stephenson, Clarke); 1942; *Burntisland S.B. Co.*; 1,552 tons; 247 x39-6x16-6; triple-expansion engines. The British collier *Fulham VII* sank after a collision with the *Alfred Victory* on February 14th, 1946, about nine miles off Beachy Head. She was on a voyage from Barry to London.

FULLER

United States Navy, destroyer; 1919; *Bethlehem Shipbuilding Corp.*; 1,215 tons; 310x30-9x9-3; 27,500 s.h.p.; 35 knots; turbine engines; Yarrow boilers; four 4 in. guns, one 3 in. A.A., 12 T.T. The destroyer *Fuller* was one of a flotilla of seven such vessels which were wrecked steaming through a dense fog at high speed near the island of Santa Barbara, off the coast of California, on September 8th, 1923. The full story of the disaster is told under the *Delphy*, leading ship of the flotilla.

FULMAR

British & Continental S.S. Co.; 1919; *H. & C. Grayson*; 1,698 tons; 265x41-2x26-6; 251 n.h.p.; triple-expansion engines. The British cargo ship *Fulmar* was sunk following a collision off *Dungeness* March 28th, 1927, while on a voyage from Liverpool to Rotterdam carrying a general cargo.

FULMINE

Italian Navy, destroyer; 1931; Quarnaro; 1,220 tons; 315-5 X 30-5x10-2; 44,000 s.h.p.; 38 knots; turbine engines; 3-drum boilers; four 4 • 7 in. guns, four 37 mm., four 13 mm., 6 T. T. The destroyer *Fulmine* was one of a flotilla escorting a convoy of merchantmen across the Central Mediterranean on November 9th, 1941. As an additional protection the Italian Admiralty had assigned two heavy cruisers as a covering force. Despite these precautions a small British squadron of two cruisers, *Aurora*, Capt. W. G. Agnew, commanding Force K, and *Penelope*, both of 5,270 tons, with two destroyers, attacked the convoy. Five merchantmen were sunk as well as the *Fulmine*. The *Libeccio*, 1,449 tons, stopped to pick up survivors from the *Fulmine* and was torpedoed and sunk later in the day. The Italian heavy cruisers took no part in the action.

FULWELL

Tyzack & Branfoot; 1902; J. L. Thompson & Sons; 3,824 tons; 364-7x50-5x23-3; 328 n.h.p.; triple-expansion engines. The British cargo ship *Fulwell* sank after a collision on January 14th, 1915, in 40° N., 10° W. while on a voyage from Calcutta to Hull with a cargo of linseed.

FUMITSUKI

Japanese Navy, destroyer; 1926; Fujinagata Shipbuilding Yard; 1,315 tons; 320x30x9-9; 38,500 s.h.p.; 34 knots; turbine engines; Kanpon boilers; four 4-7 in. guns, 2 A.A.m.g., 6 T.T. The destroyer *Fumitsuki* was one of the vessels lost in the defence of the naval base of Truk in the Carolines. The fighting extended over the three days February 16th-18th, 1944, and was between U.S. carrier-borne aircraft and Japanese warships. It resulted in a Japanese loss of three cruisers and four destroyers. The *Fumitsuki* was bombed and sunk on the 17th. Her normal complement was 150. ! For further details see the light cruiser *Agano*.

FUROR

Spanish Navy, destroyer; 1896; J. Brown & Co.; 370 tons; 220x22x5-5; 6,000 i.h.p.; 28 knots; triple-expansion engines; two 12pdr., two 6pdr., two 1 pdr., 2 T.T. The destroyer *Furor* was one of a flotilla of three which accompanied Admiral Cervera's squadron of armoured cruisers to Cuba during the American-Spanish War of 1898. The other destroyers were the *Pluton* (which see) and the *Terror*, which was so badly in need of repair that she was left at Martinique. The *Furor* carried a complement of 80 and was commanded by Lt. Carlier; she also had on board the officer commanding the flotilla, Capt. Villaamil. In the battle of Santiago de Cuba the ship was engaged by the U.S. armed yacht *Gloucester* and sunk after a brief action in which some 37 of her crew were killed.

The full story of the battle will be found under the *Infanta Maria Teresa*, flagship of the Spanish squadron.

FURULAND

S. Ugelstad; 1895; Wood, Skinner & Co.; 1,817 tons; 276 x 39x17-6; 210 n.h.p.; triple-expansion engines. The Norwegian steamship *Furuland* was sunk by a German submarine in the English Channel on November 7th, 1916.

FURUTAKA

Japanese Navy, heavy cruiser; 1925; Mitsubishi; 7,100 tons; 595x50-7x14-7; 95,000s.h.p.; 33 knots; turbine engines; Kanpon boilers; six 8 in. guns, four 4-7 in., 6m.g., 12 T.T., 2 aircraft.

The heavy cruiser *Furutaka* was sunk in an action with the U.S. heavy cruisers *Salt Lake City* and *San Francisco*, of over 9,000 tons, the cruisers *Boise* and *Helena*, 10,000 tons, and five destroyers. The American squadron was lying in wait for the Japanese force on the night of October 11th, 1942, and surprised it steaming through the channel between Choiseul Island and New Georgia in the neighbourhood of Cape Esperance. There were two fierce engagements, the first occurring before midnight on the 11th, and the second on the following morning. The *Furutaka* was sunk by gunfire as were the destroyers *Fubuki*, 1,700 tons, and *Natsugumo*, 1,500 tons. The destroyer *Murakumo*, 1,700 tons, was sunk by air attack on the 12th after having been badly damaged in the first action. The strength of the Japanese was estimated at six cruisers and six destroyers.

The action was known as the battle of Cape Esperance. For the full story of the battle see the U.S. destroyer *Duncan*.

FURY

Royal Navy, destroyer; 1934; J. S. White & Co.; 1,350 tons; 329x33x8-5; 36,000h.p.; 35-5 knots; four 4-7 in. guns, 7 smaller, 8 T.T.

The destroyer *Fury* was a unit in the very large fleet of warships which took part in the 'D Day' landing in France on June 6th, 1944. At 10.45 a.m. on the 21st she struck a mine and was driven ashore in a gale and wrecked.

FUSEI MARU

Japanese Government; 1921; Dunlop, Bremner & Co.; 2,256 tons; 285x42-6x20; 298 n.h.p.; triple-expansion engines. The steamship *Fusei Maru* was formerly the British *Fausang* seized by the Japanese at Hongkong in December, 1941. On September 1st, 1943, she was torpedoed and sunk by the U.S. submarine *Seawolf* 200 miles S.W. of Nagasaki.

FUSHIMI MARU

Nippon Yusen K.K.; 1914; Mitsubishi Dockyard & Eng. Works; 10,935 tons; 504-9x63-3x37-4; 1,337n.h.p.; triple-expansion engines.

The steamship *Fushimi (Husimi) Maru* was torpedoed and sunk by the U.S. submarine *Tarpon* on February 1st, 1943, off the west coast of Honshu Island.

FUSHIMI MARU

Naigai Kisen K.K.; 1937; Osaka Iron Works; 4,935 tons; 369-8x54-1x29-2; 433 n.h.p.; turbine engines. The steamship *Fushimi (Husimi) Maru* was torpedoed and sunk by the U.S. submarine *Tautog* on May 3rd, 1944, S. of the Kurile Islands.

FUSHIMI MARU

Masuda Kyugoro; 1902; W. Gray & Co.; 2,542 tons; 306-4x45-1x20-1; 231 n.h.p.; triple-expansion engines. The steamship *Fushimi (Husimi) Maru* was torpedoed and sunk by the U.S. submarine *Bonefish* on October 14th, 1944, 50 miles west of San Fernando, Philippines.

FUSHIMI MARU

Amagasaki Kisenbu Gomei Kaisha; 1864; A.Denny; 1,229 tons; 233-7x30-3x22-5; oil engines. The motorship *Fushimi (Husimi) Maru* struck a mine and sank on April 6th, 1945, off Yawata, Japan.

FUSHIMI MARU No. 3

4,292 tons. The steamship *Fushimi Maru No. 3* was torpedoed and sunk by the U.S. submarine *Kingfish* on January 7th, 1944, W. of Palawan in the Philippines.

FUSILIER

1942; 7,761 tons. The German ship *Fusilier* was torpedoed and sunk by a Russian submarine on November 20th, 1944, in the Eastern Baltic.

FUSO

Japanese Navy, dreadnought battleship; 1914; Kure; 29,330 tons; 673x94x28-5; 40,000s.h.p.; 22-5 knots; turbine engines; Kanpon boilers; twelve 14in. guns, sixteen 6in., eight 5in., 30 smaller; 2 T.T., 1 aircraft

The battleship *Fuso* was part of the 'Southern Force*' which engaged the Americans in the Surigao Strait at the battle of Leyte Gulf, October 23rd-26th, 1944. The Japanese disposed of two battleships, one heavy cruiser and four destroyers, of which only one destroyer out of the whole squadron survived the action. The rival fleets met in the early hours of the 25th, the American commander, Rear-Admiral J. B. Oldendorf, having deployed his light forces on either side of the strait, sealed off the further end with his heavy ships. Into this trap the Japanese steamed without suspicion and so accurate and rapid was the concentration of shells and torpedoes that the two battleships and three of the destroyers were sunk before they had time to make an effective reply.

FUSO MARU

The *Fuso* was struck by torpedoes and went to the bottom with her sister ship, the *Yamashiro*, with a very heavy loss of life. The heavy cruiser *Mogami* was disabled and was bombed and sunk on the following day. The destroyers *Asagumo*, *Michishio* and *Yamagumo*, all of 1,500 tons, were also sunk.

The full story of the battle of the Surigao Strait is told under the battleship *Yamashiro*. For the battle of Leyte Gulf see under the battleship *Musashi*.

FUSO MARU

Osaka Shosen K.K.; 1908; *Barclay, Curie & Co.*; 8,195 tons; 475X57-7X32-6; 1,130 n.h.p.; triple-expansion engines. The transport *Fuso Mam* was torpedoed and sunk by the U.S. submarine *Steelhead* on July 31st, 1944, off the north coast of Luzon Island, Philippines.

FUTAMI MARU

Matsumoto Kisenbu Goshi Kaisha; 1902; *W. Pickersgill & Sons*; 3,055 tons; 324x47-1x21-7; 277 n.h.p.; triple-expansion engines.

The steamship *Futami Mam* was wrecked on January 22nd, 1927, near Matsushima Island, while on a voyage from Vladivostok to Yokaiishi.

FUYO

Japanese Navy, destroyer; 1922; *Fujinagata Shipbuilding Yard*; 820 tons; 275x26-5x8-2; 21,500 s.h.p.; 31-5 knots; turbine engines; Kanpon boilers; three 4• 7in. guns, 2 m.g., 4 T.T. The destroyer *Fuyo* was torpedoed and sunk off Manila by the U.S.

submarine *Puffer* on December 20th, 1943. The destroyer's normal complement was 110.

FUYO MARU

Harada Shoko Goshi Kaisha; 1878; *Short Bros.*; 1,262 tons; 238-5x35x18; 162 n.h.p.; compound engines. The steamship *Fuyo Mam* was wrecked on December 11th, 1919, at Ikinoshima, off Nagasaki.

FUYUKAWA MARU

Kawasaki Kisen K.K.; 2,844 tons. The steamship *Fuyukawa Maru* was sunk by U.S. carrier-based aircraft on October 24th, 1944, off Masinlok, Philippines.

FYLGIA

Rederiaktieb. Svenska Lloyd; 1889; *W. Dobson & Co.*; 1,741 tons; 266x37-1x!5-8; 176 n.h.p.; triple-expansion engines. The Swedish steamship *Fylgia* formerly the *Talavera*, was torpedoed and sunk by a German submarine in the North Sea on January 24th, 1918.

FYLGIA

Rederi A/B Svenska Lloyd; 1919; *Limhamns Skeppsvarv. AjB*; 1,388 tons; 239-3x38x16-4; 130 n.h.p.; triple-expansion engines.

The Swedish steamship *Fylgia* was wrecked on October 22nd, 1924, at Hogkallegrund while on a voyage from Hernosand to Seville. All on board were lost.

G 194

German Navy, destroyer; 1911; Germania Werft; 654 tons; 16,000 i.h.p.; 31-5 knots; turbine engines; Schulz-Thomycroft boilers; two 24pdr., 2 m.g., 4 T.T.

The destroyer *G 194* was on patrol in the North Sea in company with another destroyer on the night of March 25th, 1916. At the same time a British force under Commodore R. Y. Tyrwhitt was retiring after covering an attack by seaplanes on the German airship base at Hoyer near the coast of Schleswig. The leading ship of the British line was the light cruiser *Cleopatra* and at 10.15 p.m. she descried sparks from the funnels of enemy destroyers on her port bow. Putting over his helm, Capt. F. P. Loder-Symonds of *Cleopatra* increased speed to 20 knots, and succeeded in ramming the rearmost destroyer *G 194* with such force that he cut her in two, the severed portions of the ship drifting by on either side of the light cruiser. There was neither time nor opportunity to save life and the *G 194* foundered with all on board, 93 officers and men.

As a result of her sudden alteration of course *Cleopatra* was brought across the bows of the light cruiser *Undaunted*. There was a collision in which the former ship was slightly damaged and the latter had her bows stove in, and her speed reduced to six knots. As all the ships were steaming without lights there was some confusion for a time, but ultimately both cruisers reached port in safety.

G. I. JONES

Jones Bros.; 1867; Gaddarn & Co.; 457 tons; 132x27x16-6. The wooden barque G. I. Jones, Capt. J. Nutron, was wrecked at Perranuthnoe, between Porthleven and Marazion in Mount's Bay, Cornwall, on September 1st, 1883. Twelve of the crew were drowned.

G. VOYAZIDES

Chios S.S. Co.; 1904; Blyth S.B. Co.; 3,040 tons; 330-8x47-3x21-8; 274n.h.p.; triple-expansion engines. The Greek cargo ship G. Voyazides was torpedoed and sunk by a submarine in the Mediterranean on September 16th, 1918.

GABRIELLE

F. Bouet; 1911; Osbourne, Graham & Co.; 1,410 tons; 248-3X35x14-8; 177n.h.p.; triple-expansion engines. The French steamship Gabrielle was torpedoed and sunk by a German submarine in the English Channel on February 2nd, 1917.

GAFSA

C. T. Bowing & Co.; 1906; W. Doxford & Sons; 3,922 tons; 349-8x50-2x23-4; 302 n.h.p.; triple-expansion engines. The British ship Gafsa was torpedoed and sunk by a German submarine on the 28th March, 1917, when she was ten miles S.E. AS. from Kinsale Head. Seven of the crew were killed.

GAILLARDIA

British Navy, sloop; 1917; Blyth Shipbuilding Co.; 1,290 tons; 262 X 35 x 12; 2,500 i.h.p.; 17 knots; triple-expansion engines; two 4 in. guns, two 12pdr.

In March, 1918, the Admiralty embarked upon the tremendous task of placing a mine barrage across the North Sea at its northern exit. By this means it was hoped to trap a large number of German submarines passing to and from German ports to the open sea. On March 22nd *Gaillardia* was engaged in buoying one of the newly-sown minefields when she fouled one of the mines and blew up with the loss of a large proportion of her complement of 93. The Admiralty felt some misgiving on receipt of the news of the loss of *Gaillardia* as she was only a small ship with a draft of 12 feet, whereas the minefield over which she was operating was 65 feet below the surface. It was, however, decided to persevere with the task and by June it was reported by Rear-Admiral J. Strauss, U.S.N., commander of the American minelaying flotilla, that of 3,385 mines laid only 150 had exploded prematurely.

GAINSBOROUGH

Manchester, Sheffield & Lincolnshire Railway Co.; 1880; Earless S.B. Co.; 1,081 tons; 231-1x30>3x16-7; ISO.h.p.; compound inverted engines.

The British cargo ship *Gainsborough* sank after a collision off Flamborough Head on December 27th, 1883. She was on a voyage from Hamburg to Grimsby carrying a general cargo.

GAIRLOCH

John Cook & Son; 1887; A. Stephen & Sons; 2,191 tons; 282 x 37x19-2; 186n.h.p.; triple-expansion engines. The British cargo ship Gairloch was wrecked near Cape St. Vincent on August 26th, 1897, while on a voyage from Newport to Constantinople carrying a cargo of coal.

GAIRLOCH

James Gar diner & Co.; 1899; C. Cornell & Co.; 3,766 tons; 354X45X25-7; 354 n.h.p.; triple-expansion engines. The British cargo ship Gairloch was wrecked off Diego Suarez on May 27th, 1905, while on a voyage from Barry to Diego Suarez carrying a cargo of coal.

GAIRSAY

British Navy, minesweeping trawler; 1943; British Isles; 560 tons; 164x27-5x 14; 800i.h.p.; 12 knots; triple-expansion engines; one 4 in. gun.

The minesweeping trawler *Gairsay* was among the ships blockading Havre during the invasion of France in the summer of 1944. On the night of August 2nd the trawler fell victim to a German remote controlled motor boat with an explosive charge fixed in the bow. These boats were sent out in large numbers on the calculation that some of them would find a target. On the night in question, which was the first occasion on which they were used, the destroyer *Quorn*, two small transports and a landing craft were sunk as well as *Gairsay*. In the ensuing attacks the remote controlled motor boats failed to establish themselves as reliable weapons, 58 of them being destroyed.

GAIRSOPPA

British India Steam Navigation Co.; 1919; Palmers' Co.; 5,237 tons; 399-3x52-2x28-5; 517n.h.p.; 10-5 knots; triple-expansion engines.

The steamship *Gairsoppa*, Capt. G. Hyland, with a cargo of pig iron left Freetown at the end of January 1941 in a homeward-bound convoy. On February 14th the vessel was obliged to leave the convoy owing to her rapidly diminishing coal supply. On the 16th when 300 miles S.W. of Galway Bay she was shadowed by a large four-engined German bomber which did not attack her but no doubt brought a submarine on the scene, for at about 10.30 on the same evening the *Gairsoppa* was struck on the starboard side by a torpedo. The submarine then surfaced and opened fire with machine-guns as the steamer's boats were in the act of being lowered. Owing to the machine-gun fire and the heavy swell the boats became separated and only two were in sight of each other at daylight. As one of these two was waterlogged and only contained two lascars these men were taken into the other boat which then set sail for the mainland. Food and water were short and the nights were bitterly cold so that several of the occupants died from exposure. Of the eight Europeans and 27 Asiatics in the boat only three Europeans and four Asiatics were alive 13 days later when the boat sighted the Lizard. The rough weather was too much for the failing strength of these seven men and in attempting to run ashore the boat overturned, only one European out of the whole ship's company being rescued by the local lifeboat. This man, Mr. R. H. Ayres, second officer, had navigated the boat to within sight of safety in circumstances of great hardship and peril. His devotion to duty during the 13 days boat voyage was later recognised by the award of the M.B.E. Capt. Hyland, 82 crew and two gunners were lost in this disaster.

GAISMA

Jura Shipping Co.; 1900; Ropner & Son; 3,077 tons; 323-9x48-1x21-7; 273n.h.p.; triple-expansion engines. The Latvian steamship Gaisma was sunk by war causes on July 22nd, 1941, E. of Gotland. There were no survivors.

GAKUJOMARU

Toa Kaiun K.K.; 2,220 tons. The Japanese steamship Gakujo Mam struck a mine and sank on April 28th, 1945, off Yawata, Japan.

GAKUZYO MARU

Toa Kaiun K.K.; 1,500 tons. The Japanese steamship Gakuzyo Maru struck a mine and sank on July 9th, 1945, off Shimonoseki.

GALA

GALA

S. Spampinato; 1897; *Carmichael, Maclean & Co.*; 1,029 tons; 225-7x34-1x13-1; 110 n.h.p.; triple-expansion engines. The Italian steamship *Gala* was torpedoed and sunk on April 9th, 1942, 25 miles S.W. of Benghazi.

GALATA

MustafaUman; 1882; *C. S. Swan & Hunter*; 1,376 tons; 256 x 35x17-9; 180 n.h.p.; compound engines. The Turkish steamship *Galata* went ashore on January 1st, 1939, at Bender Ereğli during a gale and was wrecked.

GALATASARAY

Sadikoglu Asian ve Mahdumu Silepcilik; 1890; *Bergens Verks.*; 724 tons; 201-1x31-8x11-6; triple-expansion engines. The Turkish steamship *Galatasaray* left Zonguldak on March 14th, 1952, for Istanbul and either foundered during a gale or struck a mine. Bodies and lifebuoys were found in the vicinity of Kef ken Island. She carried a crew of 16.

GALATEA

British Navy, light cruiser; 1934; *Scot's Shipbuilding Co.*; 5,220 tons; 500x51x13-9; 64,000 s.h.p.; 32-25 knots; turbine engines; 3-drum boilers; six 6 in. guns, eight 4 in., 9 smaller, 6 T.T.

The light cruiser *Galatea*, Capt. E. W. B. Sim, was a unit of the 15th Cruiser Squadron. On the night of December 14th, 1941, the squadron was returning to Alexandria from an unsuccessful search for an enemy convoy when it was attacked by German dive bombers. The attacks persisted for about seven hours. Just before midnight *Galatea* became a target for a German submarine which hit her with two torpedoes in quick succession. The cruiser turned over and sank in three minutes. Capt. Sim, 22 officers and 447 ratings were killed. About 100 survivors were picked up by the destroyers *Griffin* and *Hotspur*.

Galatea had seen much war service as she had taken part in the Norwegian campaign and the evacuation of the British army from France in May-June, 1940. She had also taken part in the rounding up of the *Bismarck*.

GALATEA

A/S D/S Galatea; 1912; *Laxevaags Maskin&Jernskibs.*; 1,152 tons; 228-2x35-2x15-9; 101 n.h.p.; triple-expansion engines. The Norwegian steamship *Galatea* was sunk by mine or torpedo on January 21st, 1945, off Land's End on a voyage from Liverpool to Barry. Seventeen of her crew and three gunners were lost, the sole survivor being picked up on February 8th.

GALEKA

Union Castle Mail S.S. Co.; 1899; *Harland & Wolff*; 6,772 tons; 440-3x53-2x29-6; 374 n.h.p.; 13 knots; triple-expansion engines.

The liner *Galeka* was commissioned as a troopship on the outbreak of the First World War, and about a year later was converted into a hospital ship. While serving in the latter capacity she struck a mine off Cap La Hague on October 28th, 1916, and had to be beached near Havre. All attempts at salvage proved unsuccessful and she became a total wreck.

GALGORMCASTLE

I. Stewart & Co.; 1892; *Workman Clark & Co.*; 1,596 tons; 256-2x38x22.

The barque *Galgorm Castle*, Capt. M. Frampton, was intercepted by a German submarine 90 miles W. of the Fastnet at 4.45 on the afternoon of February 27th, 1917. The enemy opened fire from the surface and sank the ship with a loss of 11 men. Capt. Frampton and his wife were among the survivors.

GAULEA

Adriatica Soc. Anon di Nav.; 1918; *Cantiere San Rocco*; 8,040 tons; 443-6x53-1x24-9; 853 n.h.p.; triple-expansion engines. The Italian liner *Galilea* was torpedoed and sunk by a British submarine on March 28th, 1942, ten miles from Antipaxo. The ship was carrying troops from North Africa to Italy, 768 of whom were lost.

GALIOLA

Nav. Carlo Martinolich; 1917; *Baanhoek N.V.*; 1,428 tons; 247-7x36-9x15-6; 181 n.h.p.; triple-expansion engines. The Italian steamship *Galiola* was torpedoed and sunk by a British submarine on April 24th, 1943, 14 miles from Punta Milazzo.

GALLANT

British Navy, destroyer; 1935; *A. Stephen & Son*; 1,335 tons; 323x33x8-6; 34,000 s.h.p.; 35-5 knots; turbine engines; 3-drum boilers; four 4 • 7 in. guns, 7 smaller, 8 T.T. The destroyer *Gallant* was engaged in convoy duties in the Mediterranean and in January, 1941, was escorting a convoy carrying military supplies for Greece. Air attacks were pressed home by German aircraft and on the 10th *Gallant* was disabled by a bomb. She was taken to Malta, but became the target for a second German air attack on the 20th, when she was hit and sunk.

The vessel's normal complement was 145.

GALLIA

Compagnie de Navigation Sud-Atlantique; 1913; *Forges et Chantiers de la Mediterranee*; 14,966 tons; 574-2x62-8x36-9; 22 knots; triple-expansion engines & L.P. turbine. The French liner *Gallia* was carrying 2,700 persons, mainly French and Serbian troops to Salonika, together with a large quantity of artillery. At about 5.30 p.m. on October 4th, 1916, some distance off Sardinia, she was sighted by the submarine *I7-35*, commanded by the famous Capt. Arnauld de la Periere, a German of French ancestry. From statements made later by this officer he took a most difficult shot at the transport from a distance of 900 yards. He did not anticipate scoring a hit as the *Gallia* was steaming at approximately 18 knots on a zig-zag course, the torpedo did, however, strike home and was sufficient to sink the vessel.

The torpedo caused a violent internal explosion which destroyed the wireless installation so that no S.O.S. call could be sent out.

The discipline on board the *Gallia* was by no means good, hundreds of soldiers throwing themselves into the water immediately after the explosion. The lifeboats were lowered with too much haste and there were many signs of panic. Of those on board 1,362 French and Serbian troops and members of the crew were picked up from rafts and boats next day by the French cruiser *Chateaurenault*.

GALLIA

Federazione Italiana del Consorzi Agrari; 1887; *Bartram, Haswell & Co.*; 2,728 tons; 300x39-3x19-9; 242 n.h.p.; triple-expansion engines.

The Italian cargo ship *Gallia* was torpedoed and sunk by a German submarine in the English Channel on October 24th, 1917.

GALWAY CASTLE

Union-Castle Mail S.S. Co.; 1911; *Harland & Wolff*; 7,988 tons; 452-3x56-3x30-8; 722 n.h.p.; 14 knots; quadruple-expansion engines.

The *Galway Castle* was taken over as a troopship on the outbreak of war in 1914 and carried many thousands of troops during the campaign in German South-West Africa. Later she returned to the company and was used as a mail steamship, on one occasion narrowly escaping destruction by a German bomber near the Gull lightship on August 3rd, 1916.

She left Plymouth on September 10th, 1918, and when two days out and 160 miles S.W. i S. of Fastnet she was torpedoed by the German submarine *U-82*. Her back was broken and communication fore and aft became extremely difficult. It seemed that she would sink within a few minutes and boats were launched in great haste. Some capsized and some were swamped and many lives were lost.

The disaster occurred at 7.30 in the morning and destroyers were rushed from Plymouth immediately on receipt of the wireless call. They did not arrive in time to prevent a heavy death-roll and it was found on landing the survivors at Plymouth that 150 persons had been drowned. Much of this loss could have been avoided had it been realised in time that the *Galway Castle* was not sinking. The vessel actually remained afloat for three days, but all on board were so convinced at the time that another torpedo attack was imminent that they took to the boats with fatal results.

GAMBIER

W. Howard Smith & Sons; 1874; J. & R. Swan; 1,578 tons; 280-1x31-9x16-8; 155 n.h.p.; 10 knots; compound engines. The steamship *Gambier* was in Port Phillip Bay bound to Melbourne when, in the early morning of August 28th, 1891, she met the steamship *Easby*, 1,489 tons, in ballast, outward bound for Newcastle, N.S.W. The vessels collided near the entrance to the West Channel, the *Easby* striking the *Gambier* amidships on the port side.

The passengers on the *Gambier* were asleep below, the time being about 1 a.m. Boats were launched but with such haste that the tackles were fouled and one boat capsized, drowning nearly all its occupants. There was short time available for the saving of life as within ten minutes the *Gambier* had foundered, with only her topmasts above water. A few of the passengers and crew clung to these and were afterwards taken off by the *Easby*. Six of the crew and 20 passengers were drowned.

The survivors, including the captain who was taken down when the vessel sank but managed to swim to the surface, were brought to Melbourne by the *Easby*.

GAMBIER BAY

United States Navy, escort aircraft carrier; 1943; United States; 6,730 tons; 498x80x19-7; 11,200Lh.p.; 18 knots; Skinner-Unaflo engines; one 5 in. gun, twenty-four 20 mm.AA. The United States aircraft carrier *Gambier Bay* formed one of a squadron of six such vessels under command of Rear-Admiral C. A. F. Sprague at the battle of Leyte Gulf, October 23rd-26th, 1944. The squadron, which was slow and lightly-armed met the Japanese Central Force, consisting at the time of four battleships, five cruisers and 11 destroyers (one battleship, one cruiser and one destroyer having been sunk by the Americans on the 24th) on the morning of the 28th off the east coast of Samar. A running fight ensued in which the slow American carriers and their escorting destroyers suffered heavily. The *Gambier Bay* was sunk by gunfire and her sister ship the *St. Lo* was sunk by shore based dive bombers. The destroyers *Hoel*, *Johnston* and *Samuel B. Roberts* were also sunk by gunfire. In addition to their losses in ships the Americans lost 105 aircraft.

The full story of the battle of Leyte Gulf is told under the battleship *Musashi*.

GAMBLE

United States Navy, minelayer; 1918; Newport News Shipbuilding Co.; 1,160 tons; 314-3x30-5x9-9; 27,000 s.h.p.; 35 knots; turbine engines; four 4 in. guns, one 3 in.A.A., 80 mines. The United States minelayer *Gamble* took part in the American attack on Iwojima in February, 1945. On the 18th, the vessel was attacked by Japanese suicide aircraft and sank after one of these had crashed on her deck. She carried a complement of 128.

GANDA

Companhia Colonial de Navegacao; 1907; Flensburger SchiffsbauGes.; 4,333 tons; 387-8x51x25-2; 473 n.h.p.; 11-5 knots; triple-expansion engines.

The Portuguese steamship *Ganda* with a total company of 71 on board was bound from Lisbon to Mozambique. On Friday, June 20th, 1941, when off Casablanca, she was struck by two torpedoes from a German submarine which killed the second officer, the chief engineer, a member of the crew and two passengers, and badly injured 19 others. The survivors took to the boats, there being 26 passengers and crew in one lifeboat and 42 in a motor lifeboat, of whom the former party reached Lisbon on the 22nd, and the latter reached Huelva many days later having been picked up by a Spanish trawler 300 miles from land.

Portugal was not at war with Germany.

GANDARA

British India Steam Navigation Co.; 1919; Craig Toy lor & Co.; 5,281 tons; 400x52-4x28-4; 517 n.h.p.; 10-5 knots; triple-expansion engines.

The British steamship *Gandara* was some days out from Calcutta bound to Suez in company with the s.s. *Dardanus* when, on April 6th, 1942, the *Dardanus* was bombed and disabled by a Japanese aircraft off Masulipatam. The *Gandara* took the disabled ship in

tow. Soon afterwards three Japanese cruisers appeared and opened fire, whereupon the tow was cast off and the crews of both ships took to the boats. Both ships were sunk. All on board the *Dardanus* were saved, but 13 of the *Gandara's* crew were lost.

GANDIA

Van Heyghen Freres; 1907; Swan, Hunter & Wigham Richardson; 9,626 tons; 459x59-9x31-1; 899 n.h.p.; triple-expansion engines.

The Belgian steamship *Gandia* straggled from convoy and was torpedoed and sunk by a German submarine on January 22nd, 1942, 420 miles S. of Cape Race on a voyage from Liverpool to St. John, N.B. Forty-two men were killed on the ship and another 24 died in the boats. Fourteen survivors were eventually landed.

GANEKOGORTA MENDI

Sotay Aznar; 1908; Compania Euskalduna; 3,061 tons; 321-4x46-1x20-8; 247 n.h.p.; triple-expansion engines. The Spanish cargo ship *Ganekogorta Mendi* was sunk by a submarine in the Mediterranean on August 9th, 1916.

GANGE

Messageries Maritimes; 1905; Messageries Maritimes; 6,886 tons; 447-2x52-6x32-6; 545 n.h.p.; triple-expansion engines. The French steamship *Gange* was torpedoed and sunk by a submarine in the Mediterranean on April 14th, 1917.

GANGES

James Nourse; 1930; Harland & Wolff; 6,246 tons; 424-6X56x28-8; 864 n.h.p.; 12 knots; triple-expansion engines & L.P. turbine.

The steamship *Ganges*, Capt. J. T. Vivian, was sunk by Japanese warships and aircraft on April 6th, 1942, when 20 miles off Vizagapatam. Fifteen of her crew were killed. Capt. Vivian was among the survivors.

GANGES MARU

Osaka Shosen K.K.; 1918; Osaka Iron Works; 4,382 tons; 345x49-8x28-1; 390 n.h.p.; triple-expansion engines. The steamship *Ganges Maru* was torpedoed and sunk by the U.S. submarine *Salmon* on May 28th, 1942, about 300 miles S.E. of Cana, Indo-China.

GANNET

General Steam Navigation Co.; 1879; M. Pearse & Co.; 1,127 tons; 245-3x33x17-7; 181 n.h.p.; 9-5 knots; compound engines.

The British steamship *Gannet* was mined and sunk five miles E.N.E. of the Shipwash lightship on July 7th, 1916. Eight of the crew were killed. The captain was among the survivors.

GAPERSHELL

Anglo-Saxon Petroleum Co.; 1891; C. Hill & Sons; 1,422 tons; 237-5x36-3x21-2; ISS n.h.p.; oil engines. The British auxiliary barquentine *Gaper Shell* was wrecked on January 25th, 1919, on Matamede Island near Angoche. She was on a voyage from Singapore to Beira with a cargo of benzine and kerosene.

GARDENIA

W. Coupland & Co.; 1879; Tyne Iron S.B. Co.; 1,898 tons; 280x35x24-7; ISS n.h.p.; compound engines. The British cargo ship *Gardenia* sank after a collision four miles east of Cross Sand lightship on October 4th, 1913, while on a voyage from Benisaf to the Tees carrying an ore cargo. Three survivors were picked up by a drifter, but 18 of the crew were lost.

GARDENIA

British Navy, corvette; 1941; W. Simons & Co.; 925 tons; 193 x 32x16; 17 knots; quadruple-expansion engines; one 4 in.A.A. gun, several smaller.

The corvette *Gardenia* was sunk on November 9th, 1942, by Vichy French aircraft when taking part in the landings on the North African coast. Two ratings were killed.

GARLINGE

GARLINGE

Constants (South Wales); 1918; E. Finch & Co.; 2,012 tons; 284-3x41-7x19-4; 259n.h.p.; 10 knots; triple-expansion engines.

The steamship *Garlinge*, Capt. W. C. Barnes, was torpedoed and sunk by an enemy submarine 21 miles N. of Cape Ivi, Algeria, on November 10th, 1942. Twenty-five of her crew were killed. Capt. Barnes and 14 others were saved.

GARM

Norwegian Navy, destroyer; 1913; Horten Dockyard; 540 tons; 227x23-5x8-7; 8,000 i.h.p.; 27 knots; turbine engines; six 3 in. guns, 3 T.T.

The small destroyer *Garm* was sunk in action with German forces in Sognefjord on April 26th, 1940, during the operations connected with the invasion of Norway. The vessel's normal complement was 76

GARM

Stockholms Rederi-A/B Svea; 1912; Campbeltown S.B. Co.; 1,231 tons; 230x35-8x15-6; 136 n.h.p.; triple-expansion engines.

The Swedish steamship *Garm* was torpedoed and sunk by a German submarine on September 11th, 1941, 200 miles N.E. of Cape Farewell on a voyage from Sydney, N.S., to Methil. Six of her crew of 20 were lost.

GARMOYLE

Clyde Shipping Co.; 1896; Caledon S.B. & E. Co.; 1,229 tons; 250x33-8x16-3; 293 n.h.p.; 10 knots; triple-expansion engines.

The steamship *Garmoyle* was torpedoed and sunk by a German submarine 14 miles S.E. of Mine Head, Waterford, on July 10th, 1917. The captain and 19 of the crew were killed.

GARMULA

British India Steam Navigation Co.; 1920; Palmers' Co.; 5,254 tons; 400x52-3x28-5; 517 n.h.p.; 10-5 knots; triple-expansion engines.

The steamship *Garmula*, Capt. R. C. Brown, was on a voyage from Cape Town to the United Kingdom when, on the evening of July 23rd, 1942, some 200 miles W. of Freetown, she was torpedoed forward of the bridge and sank within a few minutes. Two lifeboats were lowered of which one was smashed against the side.

Three officers and 14 Indian ratings were killed. Capt. Brown left the ship as she sank and managed to swim to a raft. The survivors were picked up by H.M.S. *Pict* and landed at Freetown.

GARNES

A/S Kr. Jepsens Rederi; 1930; Bergens Mek. Verksted; 1,559 tons; 250-6x39-3x17-4; 138 n.h.p.; triple-expansion engines.

The Norwegian steamship *Garnes* struck a mine and sank on March 24th, 1947, off Terschelling.

GARGET

Rotterdamsche Lloyd; 1917; Koninkl. Maats. de Schelde; 7,118 tons; 446-6x54-3x34-3; turbine engines.

The Dutch steamship *Garget* was bound from Mormugao to Cape Town on June 19th, 1944, when she was torpedoed and sunk by the German submarine *U-181*. The attack took place some 500 miles N.E. of Mauritius, the steamship going down with 88 of those on board. Five lascars were picked up from a raft on June 30th, and another five on July 4th.

GARONNE

W.R. Corfield; 1884; C. S. Swan & Hunter; 1,019 tons; 210-5x29-6x15-2; 96 n.h.p.; compound engines.

The British cargo ship *Garonne* was wrecked on February 19th, 1899, at Penfret, Glenan Island, Finisterre, while on a voyage from Bordeaux to Cardiff. She was carrying a cargo of pit props and wine.

GAROUFALIA

Antonis G. Lemos Sons; 1914; Irvine's S.B. & D.D. Co.; 4,708 tons; 385x52x27; 320 n.h.p.; triple-expansion engines.* The Greek steamship *Garoufalia* was torpedoed and sunk by a German submarine on December 11th, 1939, off Folia on a voyage from Oslo to Kirkenes.

GARRON HEAD

Ulster Steamship Co.; 1913; Irvine's S.B. & D.D. Co.; 1,933 tons; 283-2x40-2x18-6; 175 n.h.p.; 8-5 knots; triple-expansion engines.

The steamship *Garron Head* was mined and sunk 40 miles N. by E. ½ E. of Bayonne on November 16th, 1917. Twenty-eight of her crew were killed. The captain was among the survivors.

GARTAVON

GartLine; 1921; H. & C. Grayson; 1,777 tons; 264-5x41-2x18-7; 252 n.h.p.; triple-expansion engines.

The steamship *Gartavon* was torpedoed and sunk by a German submarine on September 7th, 1939, about 150 miles W.S.W. of the Bishop Rock on a voyage from Cette to the Clyde.

GARTHWAITE

W. Garthwaite; 1917; W. Dobson & Co.; 5,659 tons; 400-5x52x33; 465 n.h.p.; 11 knots; triple-expansion engines. The steamship *Garthwaite* was torpedoed and sunk by a German submarine four miles E. of Whitby on December 13th, 1917. The captain and 13 of the crew were killed.

GARTNESS

The Laurium Transport Co.; 1890; J. Readhead & Sons; 2,422 tons; 290-4x40x19-8; 234 n.h.p.; 9 knots; triple-expansion engines.

The steamship *Gartness* was torpedoed and sunk by a German submarine 180 miles S.E. by E. f E. of Malta on August 19th, 1917. Thirteen of her crew, including the captain, were killed.

GASCONIER

Lloyd Royal Beige Soc. Anon.; 1906; Irvine's S.B. & D.D. Co.; 2,986 tons; 324-6x47x13-7; 275 n.h.p.; triple-expansion engines.

The Belgian steamship *Gasconier* struck a mine and sank in the North Sea on August 20th, 1918.

GASTELU

Cia. Nav. Guipuzcoana; 1921; Echevarrieta y Larrinaga; 3,272 tons; 331x48x23-3; 411 n.h.p.; triple-expansion engines. On a voyage from Huelva to Hamburg with a cargo of iron ore the Spanish ship *Gastelu* sprang a leak and sank on October 1st, 1938, in the Bay of Biscay.

GAULOIS

French Navy, 1st class battleship; 1896; Brest Dockyard; 11,260 tons; 387-5x67-5x28; 14,500 i.h.p.; 18-2 knots; triple-expansion engines; Belleville boilers; four 12 in. guns, ten 5-5 in., eight 4 in., twenty 3pdr., 4 T.T.

The *Gaulois* had been employed throughout the Dardanelles campaign with a squadron of old French battleships. The ship had a complement of 631 officers and men, and on December 27th, 1916, she was on her way from Corfu to Salonika, escorted by a destroyer and two trawlers when, 30 miles E. of Cerigo in the Southern Aegean, she was torpedoed by the submarine *£7-47*, Lt. Cdr. Steinbauer.

Four men were killed when the torpedo exploded. The crew exhibited splendid discipline, and after it had been ascertained that there was no hope of saving the battleship they were taken off by the small ships without further loss.

The *Gaulois* remained afloat for barely half an hour and sank on an almost even keel. An Inquiry established that shortly before the torpedoing the escorting destroyer had stopped to pick up a message dropped by the battleship and this gap in the protective screen gave the submarine commander his opportunity.

GAUSS

Dampfs. Ges. Neptun; 1925; Deutsche Werke, A.G.; 1,236 tons; 232-6x36-1x14-3; 224 n.h.p.; oil engines. The motorship *Gauss* was taken over by the German Navy for escort duties. On December 11th, 1942, she was sunk by British warships off Dieppe. Ten survivors were picked up.

GAZCON

Ministry of War Transport (E. R. Management Co.); 1932; A. Stephen & Sons; 4,224 tons; 394-7x53-1x22-8; 493 n.h.p.; triple-expansion engines.

The steamship *Gazcon*, on a voyage from New York to Alexandria via the Cape, was torpedoed and sunk by a submarine on September 1st, 1942, in the Gulf of Aden. Eleven of her crew and one gunner were lost.

GAZELLE

Benn; 1826; Whitehaven; 242 tons.

The brig *Gazelle*, homeward bound from Sydney for London, was lost in a gale off Ramsgate on the night of Monday, November 25th, 1850. Capt. Ramsay and about 14 others, one of whom was a passenger, were drowned. The first news of the wreck came when boats and wreckage drifted ashore. There were no survivors.

GAZELLE

W. S. Waterston; 1877; A. Stevens & Sons; 349 tons; 143-5x27-1x13-1.

The iron barque *Gazelle* left Thursday Island for Lyttelton, New Zealand, on February 3rd, 1894, with a cargo of guano. She had put into Thursday Island owing to the illness of her master, Capt. Svendsen, who died there. Mr. C. Rogers, the mate, took over as captain, and another mate was signed on from shore.

After leaving the island the weather became increasingly rough until early on the morning of February 3rd, when the barque with sails blown away and totally unmanageable was wrecked W. of Waikawa Bay. Of her crew of ten the second mate and a seaman were the only survivors. Later they were taken off shore by the s.s. *Lily* and brought to Nelson, New Zealand.

GAZELLE

German Navy, light cruiser; 1898; Krupp; 2,645 tons; 328x39x17-2; 8,500i.h.p.; 21 knots; triple-expansion engines; Niclausse boilers; ten 4-1 in. guns, fourteen 1 pdr., 4 m.g., 3 T.T. The light cruiser *Gazelle* was mined and badly damaged during operations in the Baltic in January, 1915. The ship was not repairable and became a total loss, this being the fourth disaster of its kind to befall the squadron of Rear-Admiral Behring. At the time the *Gazelle* was engaged in patrol duties and was keeping a look-out for British submarines. She carried a complement of 264.

GEELONG

Peninsular & Oriental S.N. Co.; 1904; Barclay, Curie & Co.; 7,951 tons; 450-2x54-5x26-9; 803n.h.p.; triple-expansion engines.

The British cargo ship *Geelong* sank after a collision in 32° 46' N., 30° 05' E., on January 2nd, 1916. She was on a voyage from Sydney to London carrying lead and general cargo.

GEELONG

Australian Navy, fleet minesweeper; 1941; Australia; 733 tons; 186x31x8-5; 1,800i.h.p.; 16 knots; triple-expansion engines; one 3 in. gun, one 20mm, 4 m.g.

The fleet minesweeper *Geelong*, Lt. M. E. Mathers, R.A.N.R., was sunk by collision with the U.S. tanker *York* off the coast of Northern Australia on October 18th, 1944. The vessel's normal complement was 70. There were no casualties.

GEIERFELS

Deutsche Dampfs. Ges. Hansa; 1931; Deutsche Schiffs-u. Maschinenbau; 7,605 tons; 503-8x62-2x27-7; 672 n.h.p.; triple-expansion engines & L.P. turbine.

The German steamship *Geierfels* was sunk by mine or torpedo on December 19th, 1940, near Leghorn.

GEISER

Thingvalla Line; 1881; Burmeister & Wain; 1,818 tons; 324-4 x39-3x22; 2,000i.h.p.; 12 knots; compound engines. The liner *Geiser*, Capt. C. Moller, left New York for Copenhagen on Saturday, August 11th, 1888, with 107 passengers and a crew of 53. At about 3.30 on the morning of Tuesday the 14th, the ship was some 30 miles S. of Sable Island steaming through hazy weather and rain when she was run down by the liner *Thingvalla*, 2,542 tons, Capt. Lamb, of the same company, inward bound to New York.

Neither vessel appears to have sighted the other until just before the collision, but both reversed their engines in time to lessen the force of the impact. The *Geiser* starboarded her helm, but the *Thingvalla* ported hers and a collision became inevitable. The *Thingvalla's* bow struck the *Geiser* amidships, abaft the starboard main rigging at right angles to the keel and cut her almost in two. The stricken vessel remained afloat for about seven minutes during which time she launched three boats, one of which capsized. In the darkness many passengers fell through the hole made in the side and others slipped off the sloping deck into the water. The *Geiser* then turned over to starboard and went down, taking 119 persons with her.

The first officer, Mr. Brown, was in charge of the *Geiser* when the collision occurred, Capt. Moller having gone below about two hours before. The *Thingvalla* was also under command of her first officer, with Capt. Lamb in his berth below.

The *Thingvalla* whose boats picked up 31 survivors, including Capt. Moller, was badly damaged, a large hole being torn in her bows. The bulkhead held however and the ship, which was carrying 61 cabin and 394 steerage passengers of her own, continued on her way. The same afternoon she fell in with the Hamburg-Amerika liner *Wieland* which took off her passengers and brought them to New York. The *Thingvalla* meanwhile put in to Halifax, Nova Scotia.

GELTWOED

J. Sprott; 1876; Williamson & Co.; 1,056 tons; 215-7x33-9x21.

The barque *Geltwoed* was bound from Liverpool to Melbourne with a general cargo and a crew of 27. She was not heard of for some time, but in July, 1876, she was found wrecked in Ricoli Bay. There were no survivors.

GEM

W. Robert son; 1887; J. Fuller ton & Co.; 464 tons; 175-2x25-2x10-2; S.O.R.h.p.; 8-5 knots; triple-expansion engines.

The steamship *Gem* was mined and sunk three and a half miles S.E. by E.I.E. of Scarborough on December 25th, 1914. The captain and nine of the crew were killed.

GENBUMARU

Nippon Yusen K.K.; 1925; Osaka Iron Works; 1,872 tons; 255 x 39x22-7; 211 n.h.p.; triple-expansion engines. The steamship *Genbu Mam* was torpedoed and sunk by the U.S. submarine *Halibut* on April 27th, 1944, off Okinawa, Ryukyu Islands.

GENCHUMARU

Kinkai Yusen K.K.; 1918; Ishikawajima S.B. & E. Co.; 3,208 tons; 305x43-9x27-3; 279n.h.p.; triple-expansion engines. On a voyage from Hakodate to Shimizu the *Genchu Mam* was blown ashore during a typhoon on the E. coast of Idzu on November 14th, 1932. There were 43 in the crew and 36 were lost.

GENERAAL VAN DER HEIJDEN

Koninklijke Paketvaart Maats.; 1928; N. V. Haariemsche Scheepsbouw Maats.; 1,213 tons; 230-7x38-2x14-8; 93 n.h.p.; compound engines.

The Dutch steamship *Generaal van der Heijden* was lying in Bombay harbour on April 14th, 1944, when the British ammunition ship *Fort Siskine* (which see) caught fire and blew up. The fire spread to the Dutch vessel which was burned out, sinking with the loss of 14 of her crew.

GENERAL ALVEAR

Flota Argentina de Nav. Fluvial; 1914; A. & J. Inglis; 1,717 tons; 320-4x40-1x12-3; 597n.h.p.; triple-expansion engines. Carrying 57 passengers and mail, the Argentine ship *General Alvear* went ashore in fog on July 24th, 1953, at Punta Yeguas near Montevideo, and sank during a storm four days later.

GENERAL ARTIGAS

Hamburg-Sudamerikanische Dampfs. Ges.; 1923; Hwaldts-werke; 11,254 tons; 473-6x60-7x41-9; turbine engines. The German steamship *General Artigas* was bombed and sunk by British aircraft on July 25th, 1943, at Hamburg.

GENERAL BONAPARTE

GENERAL BONAPARTE

Cie. de Navigation Fraissinet; 1923; Chantiers & Ateliers de Provence; 2,796 tons; 315-4x44-6x24-5; 434n.h.p.; triple-expansion engines.

The French steamship *General Bonaparte* was torpedoed and sunk by a submarine on May 19th, 1943, on a voyage from Ajaccio to Nice, with passengers.

GENERAL CHANZY

Cie. Generate Transatlantique; 1891; Cie. Generate Transatlantique; 2,257 tons; 341-2x35-7x15-5; 478 n.p.h.; 10 knots; triple-expansion engines.

The liner *General Chanzy*, Capt. Cayol, left Marseilles for Algiers on Wednesday, February 9th, 1910, with 88 passengers and 72 crew. The ship encountered heavy weather from the outset, being repeatedly swept fore and aft by the seas. During the night of the 9th-10th she was blown considerably off her course and at about eight o'clock on the morning of the 10th she struck on the rocks off the N.W. coast of the island of Minorca. The seas were terrific and, within a few minutes of striking, the bridge of the *General Chanzy* was carried away. Shortly afterwards the boilers burst, hurling casks and crates from the cargo high into the air and doing such damage to the decks that the passengers and crew were deprived of their means of escape.

The sole survivor was Marcel Radez, a young passenger of about 23 years of age, who was able to give only a very meagre account of the disaster, he being asleep in his berth until the vessel struck. He had, however, witnessed the boiler explosion and its dire effects, and later had been washed on to the rocks at the foot of the cliffs, which thereabouts were some 150 feet high. From there he had managed to reach a small village, arriving nearly 24 hours after the shipwreck occurred. The inhabitants were unaware until that time that a ship had been lost and as a consequence no attempts to save life had been organised.

The total number drowned was 159. Capt. Cayol was a valued officer of the Compagnie Generate Transatlantique and was a Chevalier of the Legion of Honour.

At the time of the disaster the ship was carrying 143 bags of mail, 1,484 postal packets and 183 tons of cargo. A flotilla of five French destroyers was sent to the wreck, but was not able to do more than recover a number of bodies, the ship being too badly damaged to be salvaged.

GENERAL GRANT

Boyes, Richardson & Co.; Boston, U.S.A.; 1,103 tons. The American sailing ship *General Grant*, Capt. W. H. Loughlin, was bound from Melbourne to London, having on board 83 persons. On May 14th, 1866, after about a week at sea the ship came in sight of Disappointment Island, one of the Auckland group. The captain attempted to pass between it and the main island, but in doing so the ship was wrecked in the darkness. At daybreak it was found that she had run into a fissure in the cliffs and ultimately into a cave where her topmasts had been snapped off and her bow had become firmly fixed on the rocks. Soundings were taken from the stern, which was clear, and it was found that there was 25 fathoms of water. The cliffs were about 400 feet high, overhanging and quite unscaleable, so the boats were launched and made for a small stretch of shore. In the meantime 68 persons had been drowned. The survivors decided to make for Disappointment Island, some 6 miles away, which they reached in safety.

On this place they lived for eighteen months, until November 21st, 1867, when the brig *Amherst*, of Invercargill, New Zealand, arrived and took off all that remained. During their stay one man died and the first officer, Mr. B. Brown, and 3 men were drowned while attempting to reach New Zealand.

The number of survivors rescued by the *Amherst* was 10, the total lost being 73.

GENERAL LEZO

Spanish Navy, gunboat; 1885; Spain; 524 tons; 157-5x25-7x8-5; 600i.h.p.; 11 knots; triple-expansion engines; two 4-7in. guns, one 3 in., 1 m.g., 2 T.T.

For the narrative of the loss of this vessel see *Reina Cristina*, flagship of Rear-Admiral Montojo at the battle of Manila Bay, May 1st, 1898, when the entire Spanish Asiatic Squadron was destroyed.

GENERAL METZINGER

Soc. des Services Contractuels des Messageries Maritimes; 1906; Blohm & Voss; 9,312 tons; 476-6x55-2x30-8; 805 n.h.p.; quadruple-expansion engines.

The French liner *General Metzinger* was bombed and sunk by German aircraft on June 11th, 1940, at Havre.

GENERAL OSORIO

Hamburg-Sudamerikanische Dampfs. Ges.; 1929; Bremer Vulkan; 11,590 tons; 498-5x66x32-8; 2,335 n.h.p.; oil engines. The German liner *General Osorio* was bombed and sunk by British aircraft on April 9th, 1945, at Kiel.

GENERAL SAN MARTIN

Cia. de Nav. Geamar; 1918; Forges & Chantiers de la Mediterranee; 9,589 tons; 481-6x58-2x27-2; triple-expansion engines. Sailing from Buenos Aires on September 4th, 1954, to San Antonio, Chile, the Argentine ship *General San Martin* did not arrive at the latter port where she was due on the 17th. She was last reported at 9 p.m. on the 12th after the pilot had taken her through the channels in the Gulf of Penas. Wreckage and bodies of animals were sighted N. of the Gulf of Penas and it is assumed that the ship foundered during heavy seas in that vicinity.

GENERAL SBMPSON

Fernie & Co.; 1856; J. Johnston; 1,121 tons; 188x37-7x22-8; The Canadian wooden ship *General Simpson* was wrecked in the Laccadive Islands in 1863. Of those on board eight were drowned.

GENERAL SLOCUM

Knickerbocker Steamboat Co.; 1891; Devine & Burtis, Brooklyn; 1,284 tons; 236-4x38x7-5; 1,400 i.h.p.; 12 knots; beam engine.

The loss of the Hudson River paddle-steamship *General Slocum*, Capt. W. H. Van Schaick, is a tragedy which figures in the maritime history of New York with the same vividness as does the loss of the *Princess Alice* in the maritime chronicles of London. Both were crowded with holiday makers and their destruction was accompanied by the loss of hundreds of lives.

On the morning of June 15th, 1904, the *General Slocum* left the landing stage at Third Street, East River, with an excursion party composed chiefly of mothers and children connected with St. Mark's Lutheran Evangelical Church, New York City, the occasion being the Sunday School outing to Locust Grove. The party came from the poor and thickly populated districts of New York's East Side. The ship on which they embarked was built mainly of wood, of low freeboard and shallow draught, with four spacious decks, being in appearance the typical American river-steamship.

At the moment of leaving, the *General Slocum* carried 1,388 persons, of whom only 30 were crew. After just under an hour's steaming, when approaching Hell Gate channel, at a point opposite the end of 138th Street, there was an outbreak of fire. This, it was subsequently established, originated in a small cabin in which was a collection of paint, oil, and other inflammable stores.

Fanned by a strong wind the flames spread with great rapidity and within a few minutes the wooden superstructure of the steamship was a raging furnace. The captain at once made for the bank, but finding himself too near to the oil tanks along the Harlem shore, decided to beach the ship at North Brother Island, about half a mile ahead. The fire had gained firm hold amidships and the greater part of the women and children were gathered aft. Here there were scenes of dreadful panic, the pressure of the crowd bursting the rails and precipitating scores of unfortunates into the water. Mothers began to fling their children, lashed to any object they thought might float, into the water and jumped in after them.

In the meantime the engines continued to run, and the ship, wrapped in flame and smoke, drew nearer to the shore. Other river craft came to the rescue and one, a tug, lashed itself to the *General Slocum's* paddle-box and took off a large number of people gathered there. The tug eventually caught fire and was compelled to cast off. Fire-floats now came alongside and began to pour water on the flames, but without making any impression. The water round about the steamship was soon thick with bodies, either dead or drowning, and rowing boats made their way among these in desperate efforts to save life. Eventually the steamship grounded on North Brother Island and for the first time comparative safety was achieved, but

too late to calm the terrors of the frantic women who still continued to jump overboard.

The death roll reached 957, of whom two were members of the crew, while in addition to this 175 passengers and five of the crew were injured. These who escaped unscathed numbered 251.

Less than 30 minutes elapsed between the outbreak of fire and the vessel's total destruction after going aground. No boats were lowered and there appears to have been no organized effort at life-saving on the part of the crew. The fire hose was found to be rotten and the lifebelts were lashed at such a height as to place them out of reach of the women and children.

GENERAL TURNER

Eastern Shipping Co.; 1919; Dominion S.B. Co.; 2,490 tons; 251'1 x 43'6 x 21'2; 328 n.h.p.; triple-expansion engines. The British cargo ship *General Turner* struck a mine and sank 45 miles off Kaliakra on July 13th, 1921. She was on a voyage from Braila to Rotterdam carrying a cargo of grain and cattle.

GENERAL WHITNEY

Metropolitan Steam Ship Co.; 1873; Harlan & Hollingsworth; 1,849 tons; 227-4x40-5x18-2; 154 n.h.p.; steam engines. The American steamship *General Whitney* foundered in heavy weather on April 23rd, 1899, 50 miles E. of Cape Canaveral, as a result of taking water through a defective sea cock. The crew took off in two boats, one of which, with 16 men, capsized on reaching land. The captain and 11 others were drowned. Fifteen men in the other boat landed safely.

GENERALE ANTONIO CANTORE

Italian Navy, torpedo boat; 1921; Odero; 635 tons; 237-9 x 23-9x9; 18,000 s.h.p.; 3 3 knots; turbine engines; Thorny croft boilers; three 4 in. guns, two 3 in.A.A., 2 m.g., 4 T.T. The torpedo boat *Generate Antonio Cantore* was mined and sunk off Benghazi on August 22nd, 1941. The vessel's normal complement was 105.

GENERALE ANTONIO CHINOTTO

Italian Navy, torpedo boat; 1921; Odero; 635 tons; 237-9x 23-9x9; 18,000s.h.p.; 33 knots; turbine engines; Thornycroft boilers; three 4 in. guns, two 3 in.A.A., 2 m.g., 4 T.T. The torpedo boat *Generate Antonio Chinotto* was mined and sunk off Brindisi on March 28th, 1941. The vessel's normal complement was 105.

GENERALE CARLO MONTANARI

Italian Navy, torpedo boat; 1921; Odero; 635 tons; 237-9x 23-9x9; 18,000s.h.p.; 33 knots; turbine engines; Thornycroft boilers; three 4 in. guns, two 3 in.A.A., 4 T.T. The torpedo boat *Generate Carlo Montanari* fell into German hands at the capitulation of Italy in September, 1943. The vessel was lying at Spezia on October 4th, 1944, when she was bombed and sunk during an Allied air attack. Her normal complement was 105.

GENERALE MARCELLO PRESTINARI

Italian Navy, torpedo boat; 1921; Odero; 635 tons; 237-9 x 23-9x9; 18,000s.h.p.; 33 knots; turbine engines; Thornycroft boilers; three 4 in. guns, two 3 in.A.A., 2 m.g., 4 T.T. The torpedo boat *Generale Mar cello Prestinari* was mined and sunk on January 21st, 1943, off the island of Capi, at the eastern end of Sardinia. The vessel's normal complement was 105.

GENEVIEVE

F.Bouet; 1912; Osbourne, Graham & Co.; 1,598 tons; 260x 36'5x15'8; 189 n.h.p.; triple-expansion engines. The French steamship *Genevieve* was torpedoed and sunk by a German submarine in the Bristol Channel on January 16th, 1918.

GENIERE

Italian Navy, destroyer; 1938; Odero-Termi-Orlando; 1,620 tons; 350x38-5x10-7; 48,000s.h.p.; 39 knots; turbine engines; 3-drum boilers; four 4-7 in. guns, six 37 mm.A.A., four 13 mm. A.A., 6 T.T.

The destroyer *Geniere* was sunk by Allied bombing at Palermo on March 1st, 1943. The vessel carried a complement of about 200.

GENISTA

British Navy, sloop; 1916; Napier & Miller; 1,250 tons; 267-7X 33-5x11-7; 2,000i.h.p.; 16-5 knots; triple-expansion engines; cylindrical boilers; two 4 • 7 in. guns.

The sloop *Genista*, Lt. Cdr. John White, was engaged in mine-sweeping duties off the W. coast of Ireland when she was torpedoed and sunk by a German submarine. The attack took place on October 23rd, 1916, and *Genista* sank very rapidly, taking with her all her officers and 73 ratings. Only 12 ratings were saved.

GENKAIMARU

Shimatani Kisen K.K.; 1939; Tama S.B. Co.; 3,850 tons; 340-4x48-2x26-2; 232n.h.p.; triple-expansion engines & L.P. turbine. The steamship *Genkai Maru* was sunk by U.S. carrier-based aircraft on September 12th, 1944, W. of Leyte Island, Philippines.

GENMEIMARU

Nippon Yusen K.K.; 1917; Mitsubishi Dockyard & E. Works; 3,180 tons; 305x43-7x27-2; 270n.h.p.; triple-expansion engines. The steamship *Genmei Maru* was bombed and sunk by Australian aircraft on December 16th, 1943, off the north coast of Timor Island.

GENOA

T. Wilson Sons & Co.; 1890; J. Blumer & Co.; 1,942 tons; 276-5x38-1x16-2; 195n.h.p.; 9-5 knots; triple-expansion engines. The steamship *Genoa*, Capt. Westcott, left Hull on January 8th, 1912, for Blyth where she took on board a cargo of coal, leaving for Riga on January 15th. She carried a crew of 24. Some days after leaving port there was a heavy gale in the North Sea and lifebuoys marked *Genoa*, Hull, and lifebelts marked *Wilson Line*, Hull, together with one of the ship's hatches, were washed up along the shore at Berwick-on-Tweed and upon Holy Island. After some lapse of time the *Genoa* was posted as missing.

GENOAMARU

Nippon Yusen K.K.; 1919; Mitsubishi Zosen Kaisha; 6,785 tons; 425X 5 3 - 6 X 3 7 - 5 ; 518 n.h.p.; triple-expansion engines. The steamship *Genoa Maru* was torpedoed and sunk by the U.S. submarine *Finback* on June 11th, 1943, off the Caroline Islands.

GENOVA

Soc. Anon. A. Parodifu B.; 1904; Northumberland S.B. Co.; 3,486 tons; 340-5x48x19-5; 335n.h.p.; triple-expansion engines. The Italian cargo ship *Genova* was torpedoed and sunk by a submarine in the Mediterranean on July 27th, 1917.

GENTIAN

British Navy, sloop; 1915; Greenock & Grangemouth Dockyard; 1,250 tons; 267-7x33-5x11-7; 2,400i.h.p.; 17 knots; triple-expansion engines; two 4 • 7 in. guns, two 3 pdr. The sloop *Gentian* was mined and sunk in the Gulf of Finland on July 16th, 1919, in company with the sloop *Myrtle* which also struck a mine and sank. The vessels were operating against the Russian Bolshevik forces at the time. They were sister ships and each carried an official complement of 93.

GENUA

R. M. Sloman, Jr.; 1930; Flensburger Schiffsbau Ges.; 1949 tons; 296-4x42-7x16-2; 162 n.h.p.; compound engines. The German steamship *Genua* was sunk by British warships on October 14th, 1940, at Egersund, Norway.

GENYOMARU

Asano Bussan K.K.; 1937; Kawasaki Dockyard Co.; 10,018 tons; 500x65x37-1; 2,250n.h.p.; oil engines. The tanker *Genyo Maru* was sunk by U.S. land-based aircraft on June 20th, 1944, 600 miles E. of Luzon Island, Philippines.

GENZANMARU

Yamamoto Kisen K.K.; 1918; Osaka Iron Works; 3,189 tons; 305x43-7x27-2; 288 n.h.p.; triple-expansion engines. Carrying 300 fishermen and a crew of 40, the *Genzan Maru* went

ashore in fog on June 6th, 1932, on the E. coast of Kamchatka. She was refloated but leaked badly and sank on the next day off Karaginski Island in deep water.

GENZAN MARU

Miyachi Risen K.K.; 1906; *J. C. Tecklenborg A.G.*; 5,708 tons; 421X 55 -1 X 20 • 3 ; 504 n.h.p.; quadruple-expansion engines. The steamship *Genzan Mam* was torpedoed and sunk by the U.S. submarine *Halibut* on December 16th, 1942, off Aomori, Japan.

GENZAN MARU No. 2

Ono Risen K.K.; 1882; *W.B.Thompson*; 7,775 tons; 265-7x 35-4x21-1; 237 n.h.p.; compound engines. Sailing from Kushiro on February 18th, 1923 for Yokohama with a cargo of coal, the *Genzan Mam No. 2* was not seen again.

GEO

Preston Steam Navigation Co.; 1915; *Russell & Co.*; 3,048 tons; 331-3x49x21-9; 241 n.h.p.; 9 knots; triple-expansion engines. The steamship *Geo* was torpedoed and sunk by a German submarine six miles N. by W. of Cape Peloro, Sicily, on January 29th, 1918. The captain and 15 of the crew were killed.

GEOLOGIST

T. & J. Harrison; 1944; *Lithgows*; 6,155 tons; 435x54-6x26-5 ; triple-expansion engines. The British cargo ship *Geologist* sank after a collision with the *Sunprincess* in 10° 49' N., 61° 40' W., on July 13th, 1955. She was on a voyage from Glasgow to Mauritius carrying a general cargo. Twenty of the crew of forty-two were lost.

GEORG L.-M. RUSS

E. RUSS & Co.; 1938; *Flensburger Schiffsbau Ges.*; 2,980 tons; 341-4x52-7x18-2; 366 n.h.p.; triple-expansion engines & L.P. turbine. The German steamship *Georg L.-M. Russ* was torpedoed and sunk by a British submarine on August 12th, 1942, about 50 miles S. of Rekefjord, Norway.

GEORG STAGE

Stiffelsen Georg Stages Minde; 1882; *Burmeister & Wain*; 206 tons; 102x25-1x13-2; 82h.p.; 8 knots; compound engines. The steel three-masted auxiliary sailing ship *Georg Stage*, Capt. M. E. Malthe-Brunn, was built as a training ship for Danish merchant navy cadets. She carried a crew of ten and 80 cadets, also the captain's wife.

At about 11:30 on the night of June 25th, 1905, when approaching Copenhagen in clear weather with all lights brightly burning, she was struck on the starboard side by the British steamship *Ancona*, 1,245 tons, Capt. Mitchell. The captain of the training ship, who was in charge at the time, realised that a collision was imminent, and gave orders for the cadets to assemble on deck. This order was obeyed with promptitude and contributed greatly to the saving of life.

The *Ancona's* captain had already stopped his engines and the two ships lay locked together, thus enabling 18 persons, including the captain's wife, to scramble on to the steamship. The hole torn in the side of the *Georg Stage* proved too large to be stopped, and water flooded in, causing the vessel to sink very rapidly. She heeled over to starboard and the fore and main rigging fell into the sea taking many of the cadets with it. These boys managed to grasp the floating rigging, or to swim to the mizzen topsail-yard which remained above water.

Meanwhile the Swedish steamship *Irene*, Capt. Svensson, had arrived and turned her searchlight on the scene. She lowered her boats, which with those of the *Ancona*, which was standing by, took off all the survivors, including Capt. Malthe-Brunn.

The total number drowned was 22, most of them boys, and the disaster greatly shocked the people of Denmark.

At the subsequent inquiry it was stated that the *Ancona* was proceeding at a speed of eight and a half knots, and that the training ship's red light was first sighted at some considerable distance and then lost to view. Later her green light suddenly appeared so close as to make a collision inevitable. Capt. Mitchell immediately stopped

his engines, and when the collision occurred his ship was not under steam. This made the impact much less violent, but even so its effect was disastrous. Capt. Mitchell was commended for his prompt action in stopping his engines, and for giving every assistance after the collision.

The loss of training ships between 1824 and 1963 has been severe. They are recorded under their names, as follows:—

<i>Admiral Karpfänger</i>	<i>Gneisenau</i>
<i>Atalanta</i>	<i>Goliath</i>
<i>Comte de Smet de Naeyer</i>	<i>Kobenhavn</i>
<i>Eurydice</i>	<i>Niobe</i>
<i>Georg Stage</i>	<i>Pamir</i>

GEORG THBELE

German Navy, destroyer; 1936; *Deutsche Werke, Kiel*; 1,625 tons; 374x37x9-3; 50,000 s.h.p.; 36 knots; turbine engines; five 5 in. guns, four 37 mm., 8 T.T. The *Georg Thiele* was one of the flotilla of German destroyers sunk in the second battle of Narvik on April 13th, 1940. A full account of both battles is given under the British flotilla leader *Hardy*, which was sunk in the first action on April 10th. There is also a short account under the Norwegian coastal defence ship *Norge*.

GEORGE

G. Schembri & Sons; 1893; *W. Dobson & Co.*; 1,340 tons; 239-6x32-2x13-1; 154 n.h.p.; triple-expansion engines. The British cargo ship *George* was seized by the Russian Bolsheviks at Batoum on August 9th, 1922. Subsequently she struck a mine and sank on September 22nd, 1922, while on a voyage from Batoum to Odessa.

GEORGE

Cia. Mar. Chryssanthi; 1896; *R. Craggs & Sons*; 1,510 tons; 265-6x37x16-4; triple-expansion engines. Sailing from the Tyne to Gefle the Costa Rican ship *George* sprang a leak on November 27th, 1956, and sank about ten miles E. of Oland Island.

GEORGE A. DRACOULIS

Mme. Maria G. Dracoulis & Sons; 1912; *Schiffsw. v. Henry Koch*; 1,570 tons; 241-4x36-1x16; 129n.h.p.; triple-expansion engines. The Greek steamship *George A. Dracoulis* was bombed and sunk by German aircraft on April 25th, 1941, during the invasion of Greece.

GEORGE A. GRAHAM

Montreal Transportation Co.; 1891; *Chicago S.B. Co.*; 2,410 tons; 310 -5x39-1x21-3; 241 n.h.p.; triple-expansion engines. The Canadian cargo ship *George A. Graham* was wrecked in South Bay, Manitoulin Island, on October 7th, 1917. She was carrying a cargo of grain.

GEORGE CALVERT

U.S. Maritime Commission; 1942; *Bethlehem Fairfield Shipyard*; 7,191 tons; 423-1x57-1x34-8; 339 n.h.p.; triple-expansion engines. The American steamship *George Calvert* was torpedoed and sunk by a German submarine on May 20th, 1942, N.W. of Havana on a voyage from Baltimore to Trinidad and the Persian Gulf.

GEORGE CANNING

Sloman & Co.; 1845 (circa); 700 tons. The sailing vessel *George Canning* left New York for Hamburg on December 3rd, 1854, with 70 passengers and a crew of 26. The ship made a good crossing but on the 31st encountered a violent gale off the Elbe. At 9 p.m. the captain hove to in the hope of the weather moderating and at about midnight the ship was sighted by the steamship *John Bull* five miles S.S.W. of Heligoland. This was the last that was seen of the *George Canning* and it is surmised that sometime during the night she was driven on to the Scharhorn Sand at the south side of the entrance to the Elbe.

There were no survivors.

GEORGE L. TORIAN

Upper Lakes & St. Lawrence Trans. Co.; 1926; Earless Co.; 1,754 tons; 253x43-2x17-8; 122n.h.p.; triple-expansion engines.

The Canadian steamship *George L. Torian* was torpedoed and sunk by a German submarine on February 22nd, 1942, between Paramaribo and Trinidad. There were only four survivors.

GEORGE M. COX

Isle Royale Line; 1901; Craig S.B. Co.; 1,762 tons; 259x40-5x26-6; 213 n.h.p.; triple-expansion engines. Sailing from Chicago to Port Arthur, Ont., with a number of passengers, the American ship *George M. Cox* struck a reef and sank on May 27th, 1933, off the Rock of Ages Reef in Lake Superior.

GEORGE M. LIVANOS

Livanos Maritime Co.; 1938; W. Gray & Co.; 5,482 tons; 441'1 x 57-7 x 26-7; 492 n.h.p.; triple-expansion engines. Carrying nickel ingots and wool from Newcastle, N.S.W. to Antwerp and Havre, the Greek ship *George M. Livanos* went ashore on April 1st, 1947, at Mouille Point at the entrance to Cape Town. She almost broke in two and caught fire, and was still burning 17 days later.

GEORGE MACDONALD

Sinclair Refining Co.; 1943; Bethlehem Sparrows Point Shipyard; 10,165 tons; 501-7 x 68-3 x —; turbine engines. On June 27th, 1960, the American tanker *George MacDonald* was on a voyage from Houston to New York with 130,000 barrels of fuel oil when there was an explosion in the engine room. The engine room was flooded and the ship was taken in tow on the following day, but she sank on the 29th.

GEORGE ROYLE

James Westoll; 1892; Short Bros.; 2,525 tons; 300-4x40x18-8; 220 n.h.p.; 10 knots; triple-expansion engines. The steamship *George Royle* left the Tyne on Friday, January 15th, 1915, for St. Nazaire. Shortly after leaving port the ship ran into a blizzard and on the morning of the 18th was off Sheringham, in a sinking condition. At 3 a.m. the Cromer lifeboat went out in response to flares but saw nothing of the *George Royle*. Two empty boats and one filled with provisions drifted ashore at Weybourne. Of the steamship's crew of 18 only five were saved. From these it was learned that the *George Royle* foundered 11 miles E. of Sheringham Shoal.

GEORGE THATCHER

U.S. War Shipping Administration; 1942; California S.B. Corp.; 7,176 tons; 422-8x57x34-8; 339 n.h.p.; triple-expansion engines.

The American steamship *George Thatcher* was torpedoed, set on fire and sunk by a German submarine prior to November 4th, 1942, off the French Congo on a voyage from Charleston to Mombasa. The captain, four crew and 13 gunners were lost, but 48 survivors were picked up by a corvette of the Free French navy.

GEORGES MABRO

T. Mabro; 1918; Forth S.B. & E. Co.; 2,555 tons; 305-3x42-8x21-5; 234 n.h.p.; triple-expansion engines.

The Egyptian ship *Georges Mabro* left Leixoes for Glasgow on September 21st, 1940, but was not seen again. A German broadcast in August, 1942, claimed that she had been sunk by a submarine.

GEORGES PHILIPPAR

Messageries Maritimes; 1931; France; 17,359 tons; 542-7x68-2x43-8; 11,600 i.h.p.; 17-5 knots; oil engines. The liner *Georges Philippar*, Commandant Vicq, left Marseilles on February 26th, 1932, on her maiden voyage to the Far East. Leaving Yokohama on her homeward run the liner touched at Shanghai, Saigon and Colombo and on clearing the last named port had on board 767 persons, of whom 253 were crew. At 2 o'clock on the morning of May 16th, 1932, Madame Valentin who occupied No. 5 cabin on "D" deck saw smoke issuing from an electric commutator. She gave the alarm and the engineers threw out the switches in that part of the ship to isolate the fire. Des pite their promptitude, however, flames broke out along the leads before the current could be

cut off. The captain gave orders to put the vessel before the wind and to stop the engines. The boats were at once filled and lowered, those amidships having to be protected by fire extinguishers to prevent their catching fire as they swung.

The condition of affairs on "D" deck was now very bad. The fire-fighting appliances were totally inadequate to quench the flames and an order to close the watertight doors resulted in greater tragedy. Many passengers were trapped in their cabins or in alleyways and were asphyxiated; others managed to jump out through the scuttles. The fire having been discovered at a time when nearly everyone was asleep most of the passengers were in their night attire. Fortunately the general conduct was good and the decision to launch the boats at once to avoid the risk of burning was a wise one.

An S.O.S. call was sent out five or six times, but after that the wireless apparatus and the auxiliary generator on the upper deck caught fire and no further calls could be made. The message was received, however by two British steamships, the *Contractor* and the *Mahsud*, and by the Russian tanker *Sovetskaiia Nefti*, which picked up 672 persons between them.

At about 8 a.m., Commandant Vicq made an examination of all the first and second class cabins accessible, and having satisfied himself that no one remained on board left the ship, being the last to do so. He was badly burned about the face and legs, but remained in one of the boats picking up survivors.

The position of the *Georges Philippar* when the alarm was given was five miles from Cape Gardafui, in the Gulf of Aden. During the day the vessel drifted nearly 45 miles, entirely helpless and becoming, in Commandant Vicq's words, a floating brazier.

The vessel eventually foundered at 2.56 p.m. on the 19th, having drifted to a position 145 miles N.E. of Cape Gardafui.

The total number of persons who lost their lives was 54, all of whom were passengers.

The evidence of the captain was that some eight days before the fire the alarm had rung for no apparent reason. This also happened about half an hour before the fire on the 16th. On each occasion the ship's officers made an examination but discovered nothing unusual.

GEORGETOWN VICTORY

U.S. War Shipping Administration; 1945; Bethlehem, Fair field Shipyard; 7,604 tons; 439-1x62-1x34-5; turbine engines. Carrying 1,400 army and navy personnel on a voyage from Sydney to Glasgow, the American steamship *Georgetown Victory* went ashore at Killard Point, Co. Down, on April 30th, 1946. She broke in two and was completely wrecked. All of the crew and passengers were saved by boats and breeches buoy.

GEORGIAN

F. Leyland & Co.; 1890; Harland & Wolff; 5,088 tons; 442-6x45-2x31; 433 n.h.p.; 12 knots; triple-expansion engines. The steamship *Georgian* was torpedoed and sunk 52 miles N. of Cape Sidero, Crete, on March 8th, 1917. Five of her crew were killed. The captain was among the survivors.

GEORGIC

Oceanic Steam Navigation Co.; 1895; Harland & Wolff; 10,077 tons; 558-7x60-3x36; 612 n.h.p.; 13 knots; triple-expansion engines.

The White Star liner *Georgic* with 1,200 horses and a general cargo, mainly wheat and oil, was on a voyage from Philadelphia to Liverpool when she was shelled and captured by the German raider *Moewe* on December 10th, 1916, 590 miles E.S.E. of Cape Race, one man being killed. Her crew was taken off and she was sunk by torpedo. The liner was the largest and most important prize which fell to Count Nikolaus zu Donna Schlodien throughout his successful career as a commerce raider. The *Moewe*, an armed merchantman of 4,500 tons, left Germany at the end of December, 1915. Her first voyage was of short duration and by March 5th, 1916, she was back in a German port. On this first raid she was disguised as a Swedish merchantman with the Swedish colours painted on her sides. She laid a minefield off Pentland Firth on January 1st, 1916, proceeding thence to La Rochelle where she laid more mines on the 9th. She then ran out into the Atlantic as far as the Canaries and Madeira and on to the neighbourhood of the St. Paul Rocks in the South Atlantic, but by February 22nd was back in the Bay of Biscay.

During this period she was responsible for the loss of the following ships.

Jan.	6th, 1916	Battleship <i>King Edward VII</i> , 16,350 tons, mined
"	7th "	<i>Bonheur</i> , Norwegian barque, mined "
"	11th "	<i>Farringtonford</i> , 3,146 tons, sunk "
"	11th "	<i>Corbridge</i> , 3,687 tons, retained as collier and sunk January 30th.
"	13th "	<i>Bayo</i> , Spanish, mined
"	13th "	<i>Dromonby</i> , 3,627 tons, sunk
"	13th "	<i>Author</i> , 3,496 tons, sunk
"	13th "	<i>Trader</i> , 3,608 tons, sunk
"	15th "	<i>Ariadne</i> , 3,055 tons, sunk
"	15th "	<i>Appam</i> , 7,781 tons, robbed of bullion and retained for prisoners.
"	16th "	<i>Clan MacTavish</i> , 5,816 tons, sunk after action.
"	20th "	<i>Edinburgh</i> , barque, 1,473 tons, sunk
Feb.	4th "	<i>Luxembourg</i> , Belgian, 4,322 tons, sunk
"	6th "	<i>Flamenco</i> , 4,629 tons, sunk
"	8th "	<i>Westburn</i> , 3,300 tons, retained for prisoners and sunk February 22nd.
"	9th "	<i>Horace</i> , 3,335 tons, sunk
"	23rd "	<i>Maroni</i> , French, 3,109 tons, sunk
"	25th "	<i>Saxon Prince</i> , 3,471 tons, sunk

The *Moewe* was by far the most successful of the German commerce destroyers. Her fight with the liner *Otaki* (which see) was by no means an easy victory and left her badly damaged and on fire. Nevertheless she eluded capture by a British force consisting of two battleships, 11 armoured cruisers, six light cruisers and ten auxiliary cruisers as well as two French cruisers. The type of ship engaged in the search needed to be much larger and more heavily armed than those hunting the German raider *Wolf*, for the *Moewe* carried two 7.5 in. guns, two 6 in., four 3 in. and was fitted with four torpedo tubes.

GEORGINA

/ Worrall & Co.; 1838; Pictou, N.S.; 227 tons. The wooden barque *Georgina*, Capt. Wilson, left Liverpool for Arica, Chile, with a general cargo on March 16th, 1844. She carried a crew of 14. The weather was rough from the commencement of the voyage and on the following morning, about nine miles N.E. of Westford, she was driven on to a shoal known as Blackwater Bank. The force of the wind drove her right over the shoal and she again got into deep water, where both anchors were dropped but failed to hold. When it became evident that the ship would sink the crew took to the boats, which capsized.

Two persons only were saved, Capt. Wilson being among the drowned.

GEORGIOS

N. G. Kyriakides; 1913; J. Blunter & Co.; 3,124 tons; 331 -3x 47-8x 22-5; 303 n.h.p.; triple-expansion engines. The Greek cargo ship *Georgios* was torpedoed and sunk by a German submarine off Ushant on April 20th, 1917.

GEORGIOS

*Livanos Bros.; 1914; W. Dobson & Co.; 3,536 tons; 360x52x 23 * 7; 365 n.h.p.; triple-expansion engines.* The Greek ship *Georgios* went ashore on October 1st, 1932, at Valserame in the Gulf of Bothnia, and broke in two.

GEORGIOS M.

5. G. Lyras & M. G. Lemos; 1905; W. Pickersgill & Sons; 4,254 tons; 381 -4x 49x 25-7; 429 n.h.p.; triple-expansion engines. On a voyage from Varna to Antwerp with 6,000 tons of barley in bulk, the Greek ship *Georgios M.* reported on November 9th, 1931, that the cargo had shifted and she was in distress. The French steamship *PLM*. 22 rescued five of the crew on November 11th, but was driven off by weather conditions leaving 18 men still on board. She was not able to get a rocket line on board, but stood by waiting for the seas to moderate. On the 11th, the *Georgios M.* disappeared from sight in a heavy squall of rain and was never seen again.

GEORGIOS MARKETTOS

C. P. Markettos; 1890; Osbourne, Graham & Co.; 2,269 tons; 290 x 38x 20; 208 n.h.p.; triple-expansion engines. The Greek cargo ship *Georgios Markettos* was torpedoed and sunk by a German submarine in the Bristol Channel on October 12th, 1917.

GERALD TURNBULL

Turnbull Bros.; 1912; Sunderland S.B. Co.; 3,177 tons; 330 x 48-7x 22-2; 286 n.h.p.; triple-expansion engines. The British cargo ship *Gerald Turnbull* was wrecked on Gannet Rock Ledge, Bay of Fundy, on May 19th, 1913. She was on a voyage in ballast from Madeira to Grindstone Island.

GERASIMOS

*N. D. Lykiardopulos; 1913; Napier & Miller; 3,845 tons; 375-8 x 51 * 6 x 22 * 7; 361 n.h.p.; triple-expansion engines.* The Greek cargo ship *Gerasimos* was torpedoed and sunk by a submarine in the Mediterranean on December 4th, 1917.

GERD

Stockholms Red.-AjB Svea; 1907; Murdoch & Murray; 2,323 tons; 285-3x 42-1x 19-6; 230 n.h.p.; triple-expansion engines. Following a collision with the Finnish barque *Lingard* the Swedish ship *Gerd* sank near Yngö on November 2nd, 1935. Lifebuoys and a writing desk belonging to the *Gerd* were found, but all of her crew of 21 were lost.

GERD

German Government; 1935; Helsingors Jernskibs & Maskin.; 1,700 tons; 292-3x 41-7x 16-8; 234 n.h.p.; compound engines & L.P. turbine.

The steamship *Gerd* was a Danish ship seized by the French and renamed *St. Raymond*, but was later taken over by the Germans who reverted to the former name. On February 22nd, 1943, she was bombed and sunk by British aircraft off Cape Carbonara, on a voyage from Tunis to Sicily.

GERDA FERDINAND

Hugo Ferdinand Dampfs.-Reed.; 1901; C. S. Swan & Hunter; 3,727 tons; 348-8x45-2x17-9; 321 n.h.p.; triple-expansion engines.

The German ship *Gerda Ferdinand* was stranded on November 28th, 1941, at Argusgrund and became a total loss.

GERDA TOFT

Jens Toft A/S; 1944; *Foundation Maritime*; 2,928 tons; 315-5x46-5x21-9; 269 n.h.p.; triple-expansion engines. The Danish ship *Gerda Toft* was overcome by heavy seas and sank on December 23rd, 1954, north of the Frisian Islands. About 15 or 20 men got away in a lifeboat, but it capsized and there were no survivors. A lifeboat containing two bodies was found on February 5th, 1955.

GERMAINE

S. Castanos; 1898; *Irvine's S.B. & D.D. Co.*; 2,573 tons; 313x44x20-6; 247 n.h.p.; triple-expansion engines. The Greek steamship *Germaine* was sunk by a submarine in the Mediterranean on October 28th, 1916.

GERMAINE

F. Bouet; 1909; *Sunderlands S.B. Co.*; 1,428 tons; 246x34-2x14-5; 177 n.h.p.; triple-expansion engines. The French steamship *Germaine* was torpedoed and sunk by a German submarine in the Bristol Channel on March 10th, 1918.

GERMAN EMPEROR

J. S. Barwick & Co.; 1872; *Short Bros.*; 909 tons; 210-3x29-5x16-5; 98 h.p.; 10 knots; compound engines. The steamship *German Emperor* with a crew of 16 and 6 passengers was proceeding up the Channel in a dense fog on the morning of May 21st, 1889. When off the East Goodwins she collided with the steamship *Beresford*, 2158 tons, Capt. Vickers, with a general cargo from Middlesbrough to Bombay, which was lying at anchor. The *German Emperor* sank within three minutes under the bows of the *Beresford*, which lowered her boats and picked up 3 men, while another 8 persons managed to clamber aboard her before the *German Emperor* foundered.

In all 11 were saved, including the captain, chief engineer and second officer.

The *Beresford*, with a large hole in her starboard bow, was able to reach Gravesend and later to dock at Tilbury.

GERMANIA

H. Metcalfe; 1908; *Rotterdam Droogdok Maats.*; 1,064 tons; 232-8x34-6x14-2; 127 n.h.p.; triple-expansion engines. The Swedish cargo ship *Germania* was torpedoed and sunk by a German submarine in the North Sea on June 30th, 1917.

GERMANIC

Sir W. H. Cockerline; 1936; *W. Gray & Co.*; 5,352 tons; 413-3x57x27; 400 n.h.p.; triple-expansion engines. The steamship *Germanic* was torpedoed and sunk by a German submarine on March 29th, 1941, about 400 miles S. of Iceland on a voyage from Halifax to Liverpool. Five of her crew were killed.

GERMANY

Allan Line; 1868; *M. Pearse & Co.*; 3,244 tons; 343x42x—; 10 knots; steam engines. The steamship *Germany*, on a voyage from Liverpool to Havana and New Orleans, was wrecked on December 22nd, 1872, at Pointe de Coubre, River Gironde, with the loss of 25 lives.

GERRIT FRITZEN

Johs. Fritzen & Sohn; 1922; *Ouse S.B. Co.*; 1,761 tons; 262-5x40x15-7; 169 n.h.p.; triple-expansion engines. The German steamship *Gerrit Fritzen* was sunk by Russian action on March 12th, 1945, near Gdynia.

GERTRUD

German Government; 1930; *Antwerp Engineering Co.*; 1,960 tons; 294-9x43-7x18; 204 n.h.p.; triple-expansion engines. The steamship *Gertrud* was formerly the Danish *Gerda Toft*, seized

by the French in April, 1940, and later taken over by the Germans. She was bombed by British aircraft on June 1st, 1944, N.W. of Heraklion. She was towed into port but on the next morning was again bombed and sunk. Most of the crew were killed.

GERTRUD BRATT

Angf. A. B. Osterson (A. Bratt); 1927; *Kockums Mek. Varks.*; 1,510 tons; 254-2x38-3x16-3; 140 n.h.p.; triple-expansion engines.

The Swedish steamship *Gertrud Bratt* was torpedoed and sunk by a German submarine on September 24th, 1939, ten miles off Jomfruland.

GERTRUDE

Otto Trechmann; 1879; *W. Gray & Co.*; 1,347 tons; 244 X 32-2x18-4; 120 h.p.; compound engines.

The British cargo ship *Gertrude* was wrecked in West Bay, Portland, in fog on August 26th, 1894. She was on a voyage from Huelva to Rotterdam carrying an ore cargo.

GETSUYO MARU

Toyo Kisen K.K.; 6,440 tons.

The Japanese steamship *Getsuyo Maru* was torpedoed and sunk by the U.S. submarine *Seawolf* on January 10th, 1944, 50 miles W. of Oki no Erabu in the Ryukyu Islands.

GIACOMO MEDICI

Italian Navy, torpedo boat; 1917; *Odero*; 635 tons; 238x24x9-2; 15,500 s.h.p.; 32 knots; turbine engines; Thornycroft boilers; four 4 in. guns, two 3 in. A.A., 4 m.g., 4 T.T. The torpedo boat *Giacomo Medici* was bombed and sunk by British aircraft at Catania on April 16th, 1943. The vessel's normal complement was 100.

GIANG BEE

Heap Eng Moh S.S. Co.; 1908; *Maats. Fyenoord*; 1,646 tons; 270-4x40-2x16-9; 165 n.h.p.; triple-expansion engines. The British steamship *Giang Bee* left Singapore on February 12th, 1942, for Australia with 245 passengers, mostly women and children. On the 13th she was bombed and sunk by Japanese aircraft in the Banka Strait, with the loss of 223 lives.

GIANICOLO

A. Lauro; 1921; *Cantieri Nav. Triestino*; 7,035 tons; 437-1x53-9x27-6; 483 n.h.p.; triple-expansion engines. Leaving Rotterdam on January 30th, 1938, for Genoa, the Italian ship *Gianicolo* was reported to be in distress on February 11th, but she was not found by aeroplanes and was never seen again.

GIBEL-HAMAM

M. H. Bland & Co.; 1895; *Wood, Skinner & Co.*; 647 tons; 180-4x29-1x11-4; 90 n.h.p.; 8-5 knots; triple-expansion engines.

The steamship *Gibel-Hamam* was torpedoed and sunk by a German submarine off Abbotsbury, Dorset, on September 14th, 1918. Twenty-one men, including the captain, were killed.

GIFUMARU

Nippon Yusen K.K.; 1921; *Toba Shipyard*; 2,933 tons; 305 x 43-7x27-2; 350 n.h.p.; triple-expansion engines. The steamship *Gifu (Gihu) Maru* was torpedoed and sunk by the U.S. submarine *Seawolf* on November 2nd, 1942, off the south east coast of Mindanao Island, Philippines.

GIJON

Cia. Trasatlantica; 1872; *W. Pile & Co.*; 1,843 tons; 279-5x35-7x24-8; 300 h.p.; steam engines.

The Spanish steamship *Gijon*, on a voyage from Corunna to Havana with 113 passengers and about 100 crew, collided with the British steamship *Laxham* in fog on July 21st, 1884, near Cape Villano. Both ships sank. Forty-five of the *Gijon's* passengers and 11 of the crew of the *Laxham* were picked up by the Spanish steamship *Santo Domingo*. These were the only survivors.

GBLI RADJA

Indonesian Government; 1955; Scheepswerf de Wall; 1,013 tons; 250 • 5 x 36 • 9 x —; oil engines.

The Indonesian ship *Giti Radja* was hit by a bomb from an unidentified aircraft on April 28th, 1958, and sunk at Donggala

GIMLE

V. Torkildsen; 1904; Laxevaags Maskin & Jernskibs.; 1,131 tons; 228'6 x 36-3 x 15-9; 132 n.h.p.; triple-expansion engines.

The Norwegian cargo ship *Gimle* was torpedoed and sunk by a German submarine in the North Sea on November 4th, 1917.

GIMLE

Skibs-AIS Froland; 1916; Jpnker & Stans; 1,271 tons; 238-2 x 36-5 x 15-8; 177 n.h.p.; triple-expansion engines. The Norwegian steamship *Gimle* was torpedoed and sunk by a German submarine on December 4th, 1939, off the east coast of England

GINETTE LE BORGNE

Compagnie Ch. le Borgne; 1903; Northumberland S.B. Co.; 1,619 tons; 245 x 36-6 x 18-3; 175 n.h.p.; triple-expansion engines.

The French steamship *Ginette le Borgne* struck a mine and sank on September 13th, 1940, off Sardinia.

GINETTE LE BORGNE

Soc. Fecampoise de Peche; 1947; Bath Iron Works Corp.; 1,662 tons; 225 x 38-6 x 17-5; oil engines.

The French trawler *Ginette le Borgne* was in collision and sank on May 24th, 1951, on the Grand Banks fishing grounds during a fog. Ten of the crew were drowned and two more died later, out of the total of 63 men aboard.

GINO ALLEGRI

Lloyd Triestino; 1941; 6,836 tons.

The Italian ship *Gino Attegrì* was bombed and sunk by British aircraft on May 31st, 1942, about 80 miles W. of Benghazi.

GINREI MARU

Toa Kaiun K.K.; 5,949 tons.

The *Ginrei Maru* was bombed and sunk by Chinese aircraft on December 22nd, 1943, 125 miles S. of Hong Kong.

GINSEI MARU

Taihei Risen K.K.; 2,218 tons.

The steamship *Ginsei Maru* struck a mine and sank on May 25th, 1945, off Shimonoseki.

GINYO MARU

Nippon Yusen K.K.; 1921; Asano S.B. Co.; 8,613 tons; 445 x 58 x 40; 965 n.h.p.; turbine engines.

The steamship *Ginyo Maru* was torpedoed and sunk by the U.S. submarine *Flying Fish* on December 16th, 1943, off Kaohsiung, Formosa.

GINZAN MARU

Hashimoto Kisen K.K.; 2,220 tons.

The Japanese steamship *Ginzan Maru* struck a mine and sank on May 25th, 1945, off Shimonoseki.

GIORGIO

Cia. Italiana Trasporti Olii Minerali; 1907; Newport News S.B. & D.D. Co.; 4,887 tons; 400-6 x 49-9 x 30-8; 416 n.h.p.; triple-expansion engines.

The Italian tanker *Giorgio* was torpedoed and sunk on March 24th, 1943, eight miles from Cape Cefalu.

GIORGIO OHLSEN

Industrie Navali Soc. Anon; 1926; Cantieri Cerusa; 5,694 tons; 394'2 x 51-9 x 27-6; 335 n.h.p.; triple-expansion engines.

The Italian steamship *Giorgio Ohlsen* struck a mine and sank on February 14th, 1940, about six miles from Cromer. Sixteen of her crew were killed.

GIOSUE CARDUCCI

Italian Navy, destroyer; 1936; Odero-Termi-Orlando; 1,729 tons; 350-5 x 33-5 x 12; 48,000 s.h.p.; 39 knots; turbine engines; 3-drum boilers; four 4 • 7 in. guns, four 37 mm., four 13 mm., 6 T.T.

The destroyer *Giosue Carducci* was one of a force of cruisers and destroyers which encountered the British battleship line at the battle of Cape Matapan in the early morning of March 29th, 1941. The *Giosue Carducci* was sunk by gunfire and torpedoes from the destroyer *Havock*.

The full story of the battle is told under the cruiser *Fiume*.

GIOVANNI ACERBI

Italian Navy, torpedo boat; 1916; Odero; 669 tons; 238 x 24 x 9; 15,500 s.h.p.; 30 knots; turbine engines; Thornycroft boilers; six 4 in. guns, two 40 mm., 4 m.g., 4 T.T.

The torpedo boat *Giovanni Acerbi*, stationed off Italian East Africa, was discovered by Swordfish aircraft from H.M. aircraft carrier *Eagle*, which bombed and sank her on April 1st, 1941.

The ship's normal complement was 100.

GIOVANNI BOCCACCIO

Tirrenia Soc. Anon, di Nav.; 1919; Shanghai Dock & Engineering Co.; 3,141 tons; 342-6 x 46-7 x 23-2; 434 n.h.p.; triple-expansion engines.

The Italian steamship *Giovanni Boccaccio* was wrecked in the Gulf of Salamina on November 19th, 1943.

GIOVANNI DA VERAZZANO

Italian Navy, destroyer; 1928; Quarnaro; 1,628 tons; 352 x 33-5 x 16-7; 50,000 s.h.p.; 38 knots; turbine engines; 3-drum boilers; six 4-7 in. guns, four 37 mm. A.A., eight 13 mm A.A., 4 T.T.

The Italian destroyer *Giovanni da Verazzano* was torpedoed and sunk by a British submarine 25 miles off Lampedusa on October 19th, 1942. The vessel carried a complement of about 200.

GIOVANNI DELLE BANDE NERE

Italian Navy, light cruiser; 1930; Castellamare; 5,069 tons; 555-5 x 50 x 14-2; 95,000 s.h.p.; 37 knots; turbine engines; 3-drum boilers; eight 6 in. guns, six 3-9 in., eight 37 mm., eight 13 mm., 4 T.T., 2 aircraft.

The Italian light cruiser *Giovanni delle Bande Nere* was torpedoed and sunk by the British submarine *Urge* in the Central Mediterranean on March 23rd, 1942. The vessel had been heavily damaged on the previous day in action with a British squadron under Rear-Admiral P. L. Vian which was escorting a convoy from Alexandria to Malta. The Italian force, which consisted of a battleship of the Littorio class, two 10,000-ton cruisers and four 5,000-ton cruisers, was driven off by the much weaker British squadron and the battleship was set on fire and torpedoed, but did not sink.

For full story of the battle of Sirte see under the destroyer *Heythrop*.

GIOVINEZZA

D. Tripovich & Ci.; 1925; Cantieri Navali Triestino; 2,362 tons; 303-5 x 41-7 x 20-6; 279 n.h.p.; triple-expansion engines. The Italian steamship *Giovinezza* was torpedoed and sunk by a British submarine on May 18th, 1941, S.W. of Benghazi.

GIPSY

British Navy, destroyer; 1935; Fairfield Co.; 1,335 tons; 323 x 33 x 8-5; 34,000 s.h.p.; 35-5 knots; turbine engines; 3-drum boilers; four 4-7 in. guns, 7 smaller, 8 T.T.

The destroyer *Gipsy*, Lt. Cdr. N. J. Crossley, was mined and sunk off Harwich on November 21st, 1939. Thirty ratings were killed. Lt. Cdr. Crossley, two officers and ten ratings were wounded.

GIRAFE

Raffinerie de Petrole de la Gironde; 1920; Chantiers & Ateliers de Provence; 1,171 tons; 219-4 x 34-2 x 12-8; 81 n.h.p.; triple-expansion engines.

There was an explosion on board the French tanker *Girafe* on March 22nd, 1934, while loading petroleum at Port Jerome, River Seine.

Twelve men were killed and 8 seriously injured. The tanker sank in the basin but later raised and sold to be broken up

GIRALDA

South Metropolitan Gas Co.; 1887; Osbourne, Graham & Co.; 1,100 tons; 225x33x16-1; 128 n.h.p.; 8-5 knots; compound engines.

The collier *Giralda* was torpedoed by a German submarine five miles N.N.W. of Whitby on August 28th, 1918, and subsequently beached. Six of her crew were killed. The captain was among the survivors.

GIRALDA

South Georgia Co.; 1924; J. Lewis & Sons; 2,178 tons; 280-2X40-7x18-8; 230 n.h.p.; 10 knots; triple-expansion engines. The steamship *Giralda*, Capt. J. E. Rasmussen, was bombed and sunk by German aircraft on January 30th, 1940, about three miles SE of Grimness, South Ronaldsay, Orkneys. Capt. Rasmussen and the crew of 22 were killed.

GISKO

P. A. Musceus; 1880; W. Gray & Co.; 1,643 tons; 256-4x34-6 X19-8; 178 n.h.p.; compound engines.

The Norwegian cargo ship *Gisko* was sunk by a German submarine off the north coast of Scotland on April 22nd, 1917.

GIULIO CESARE

Lloyd Triestino; 1921; Swan, Hunter & Wigham Richardson; 21,900 tons; 634x76-1x46-3; 3,620 n.h.p.; turbine engines. The Italian liner *Giulio Cesare* was bombed and sunk by British aircraft on September 11th, 1944, at Trieste.

GIULIO GIORDANI

Azienda Generale Italiana Petroli; 1939; Soc. Anon. Ansaldo; 10,534 tons; 499-3x68-6x36-6; 1,323 n.h.p.; oil engines. The Italian motor tanker *Giulio Giordani* was torpedoed and sunk by British aircraft on November 17th, 1942, N.N.E. of Misurata.

GIUSEPPE DORMIO

Giuseppe Dormio; 1904; Napier & Miller; 1,008 tons; 245-4x36-2x14-2; 144 n.h.p.; triple-expansion engines. The Italian steamship *Giuseppe Dormio* was torpedoed and sunk by a British submarine on August 11th, 1944, between Pola and Fiume.

GIUSEPPE GARIBALDI

Italian Navy, armoured cruiser; 1899; Ansaldo; 7,294 tons; 344x59x25; 13,500 i.h.p.; 20 knots; triple-expansion engines; Niclausse boilers; one 10 in. gun, two 8 in., fourteen 6 in., ten 12 pdr., two 10 pdr., 4 T.T.

The armoured cruiser *Giuseppe Garibaldi* belonged to a group of six ships of very similar design which found great favour among second-class naval powers during the 1890's. They were, for that period, heavily armed, fast and well armoured.

The *Giuseppe Garibaldi* served during the First World War as the flagship of Admiral Trefani, but her war-time career was not of long duration as she was torpedoed and sunk a few months after Italy entered the war. On July 18th, 1915, a force of cruisers and destroyers was despatched by the Italian Admiralty to bombard the coastal railway between Cattaro and Ragusa (Dubrovnik), particularly the railway bridge near the latter town. This operation was carried out with great thoroughness, the railway being put out of service for more than a month. On the run back to base, the squadron was attacked by the Austrian submarine *U-4*, and the *Garibaldi* was torpedoed, but remained afloat long enough for most of her complement of 540 to be taken off, including the Admiral and Capt. Franco Nunes, in command. The number drowned amounted to about 30 officers and men.

GIUSEPPE LA FARINA

Italian Navy, torpedo boat; 1917; Odero; 635 tons; 238x24x9-2; 15,500 s.h.p.; 32 knots; turbine engines; Thorny croft boilers; four 4 in. guns, two 3 in.A.A., 4 m.g., 4 T.T. The torpedo boat *Giuseppe La Farina* was mined and sunk off the Kerkenna Islands, near Sfax, on May 4th, 1941. The vessel carried a complement of 100

GIUSEPPE SIRTORI

Italian Navy, torpedo boat; 1916; Odero; 669 tons; 238x24x9-2; 15,500 s.h.p.; 30 knots; turbine engines; Thorny croft boilers; six 4 in. guns, two 40 mm.A.A., 4 m.g., 4 T.T. The torpedo boat *Giuseppe Sirtori* was on her way to surrender to the Allies after the capitulation of Italy on September 8th, 1943. On the 14th, when off Corfu, the vessel was bombed and sunk by German dive bombers. The number lost is not known.

GIUSEPPINA GHERARDI

L. Ghirardi; 1892; Armstrong, Mitchell & Co.; 3,319 tons; 342-5x42-6x28-5; 274 n.h.p.; triple-expansion engines. The Italian tanker *Giuseppina Ghirardi* was torpedoed and sunk by a British submarine on June 10th, 1941, eight miles from Cape Helles, Dardanelles.

GJESO

E. Engelbrethsen; 1912; Trondhjems Mek. Verksted; 1,094 tons; 226-3x36-4x15-7; 116 n.h.p.; triple-expansion engines. The Norwegian cargo ship *Gjeso* struck a mine and sank in the North Sea on June 29th, 1915.

GLACE BAY

Brown, Jenkinson & Co.; 1912; W. Doxford & Sons; 6,104 tons; 443 X 58x26-1; 447 n.h.p.; triple-expansion engines. The British cargo ship *Glace Bay* was wrecked on May 2nd, 1913, at Mistaken Point, N.F.L., while on a voyage in ballast from Sydney N.S. to Wabana, Belle Isle.

GLADIATOR

British Navy, second class cruiser; 1896; Portsmouth Dockyard; 5,750 tons; 320x57-5x21; 10,000 i.h.p.; 19 knots; triple-expansion engines; ten 6 in. guns, nine 12 pdr., three 3 pdr., 5 m.g., 2 T.T.

The 2nd class cruiser *Gladiator*, Capt. W. Lumsden, was on her way from Portsmouth to Long Sands range on Saturday, April 25th, 1908, when she was overtaken by a strong N.W. gale and snow-storm. The weather rapidly thickened and by the time the ship was off the Needles visibility had been reduced to a few yards. At about 2.30 p.m. the s.s. *St. Paul*, 11,629 tons, of the International Mercantile Marine Co., suddenly loomed out of the murk to starboard and ran her down. At the time *Gladiator* was steaming slowly, which no doubt prevented an even more serious disaster. She was struck amidships on the starboard side and began to sink, but was able to make for the Isle of Wight, where she ran aground near Black Rock buoy. Meanwhile the *St. Paul* lowered her boats and picked up a large number of the crew, many of whom had climbed on to the port side of their ship as she heeled over.

The normal complement of *Gladiator* was 480, but there were considerably fewer on board at the time of the collision. Altogether one officer, Lt. W. G. P. Graves, and 25 ratings were drowned and two died later from their injuries, making a total loss of 28 lives.

GLADIO

Italian Navy, torpedo boat; 194-; Italy; 706 tons; 265-7X27-2x9; 22,000 s.h.p.; 31-5 knots; turbine engines; 3-drum boilers; two 3-9 in. guns, six 20 mm.A.A., 6 T.T. The torpedo boat *Gladio* was brought to action by the British destroyer *Termagant*, 1,710 tons, at the entrance to the Gulf of Salonika on October 7th, 1944. After a brief action the *Gladio* was sunk by gunfire. The number lost is not known.

GLADIOLUS

British Navy, corvette; 1940; H. Robb; 925 tons; 193x32x16; 2,750 i.h.p.; 17 knots; quadruple-expansion engines; one 4 in. A.A. gun, several smaller.

The corvette *Gladiolus*, Lt. Cdr. H. M. C. Sanders, p.s.o., D.S.C., R.D., R.N.R., was torpedoed by a German submarine in the North Atlantic on October 16th, 1941. Of those on board five officers, including Lt. Cdr. Sanders, and 59 ratings were killed. *Gladiolus* had sunk the submarine *U-26* on June 30th, 1940, and had shared with two other corvettes in the sinking of the *U-556*.

GLADYS

Wyndham Bros.; 1900; *Scott & Sons*; 179 tons; 95x21-6x10; 36r.h.p.; 8 knots; compound engines.

The steamship *Gladys* was mined and sunk three miles S.W. of Cap Gris Nez on November 27th, 1917. Six of her crew were killed. The captain was among the survivors.

GLAMORGAN

Warren Line; 1872; *W. Simons & Co.*; 2,397 tons; 320-1 x 36-6x28-8; 11 knots; compound inverted engines. The steamship *Glamorgan* left Liverpool on February 8th, 1883, for Boston in bad weather. At 1.20 a.m. on the 14th she was struck by a tremendous wave. When she emerged the fore mast, bridge and all deck erections had gone, the main hatches were stove in and the engine room flooded. The captain and seven men on deck at the time were swept overboard. Fortunately the weather moderated soon afterwards and the ship remained afloat. On the 16th she was sighted by the steamship *Republic* which took off the 44 survivors just before the *Glamorgan* foundered.

GLAMORGAN

D. & C. Radcliffe; 1883; *Sir W. G. Armstrong, Mitchell & Co.*; 2,066 tons; 286x37-1x23; 235 h.p.; compound engines. The British cargo ship *Glamorgan* sank after a collision off the Varne on April 15th, 1891, while on a voyage in ballast from Antwerp to Cardiff.

GLANAYRON

J. Mathias & Son; 1889; *C. S. Swan & Hunter*; 2,577 tons; 303-5x39x20-5; 276 n.h.p.; triple-expansion engines. The British cargo ship *Glanayron* was wrecked on the Outer Diamond Shoals, Cape Hatteras, on May 23rd, 1896. She was carrying a cargo of phosphate on a voyage from Fernandina to Rotterdam.

GLANHAFFREN

J. Mathias & Sons; 1888; *J. Readhead & Co.*; 2,233 tons; 290x 39-1x18-8; 222n.h.p.; triple-expansion engines. The British cargo ship *Glanhafren* was wrecked off La Castella Point, Italy, on February 14th, 1905, while on a voyage from Penarth to Venice carrying a cargo of coal.

GLANMIRE

Rankine Line; 1888; *W.B. Thompson & Co.*; 1,141 tons; 242-2x33-2x15-3; 282 n.h.p.; triple-expansion engines. The British cargo ship *Glanmire* foundered off St. Abb's Head on July 25th, 1912, while on a voyage from Amsterdam to Grange-mouth carrying a general cargo.

GLANRHVD

Harries Bros. & Co.; 1924; *Vickers*; 1,525 tons; 245-9x38-8x 16; 173 n.h.p.; 9 knots; triple-expansion engines. The steamship *Glanrhvd* left Newport, Mon., at 2.35 p.m. on January 14th, 1938, with a cargo of 2,173 tons of coal for Irlam on the Manchester Ship Canal. At the time of her departure it was raining with a fresh S.S.W. wind blowing. She was last seen at 7.30 p.m. four miles to northward of the Foreland Point Light. Next day much wreckage was washed up in Port Eynon, Oxwich and Slade Bay. The *Glanrhvd* carried a crew of 17, all of whom were lost.

GLANITIV

J. Mathias & Sons; 1891; *Ropner & Son*; 2,949 tons; 313-5x 40-6x20-2; 235n.h.p.; triple-expansion engines. The British cargo ship *Glanitivy* was wrecked two miles from Cani Rocks, near Bizerta, on May 28th, 1903. She was on a voyage from Barry to Port Said carrying a cargo of coal.

GLANYSTWYTH

J. Mathias & Sons; 1892; *Furness, Withy & Co.*; 2,993 tons; 314x40-5x21-2; 266n.h.p.; triple-expansion engines. The British cargo ship *Glanystwyth* was wrecked on Fratelli Rocks, near Bizerta, in fog on April 11th, 1904. She was on a voyage from Cardiff to Port Said carrying a cargo of coal.

GLASGOW MARU

Kokusai Risen K.K.; 1919; *Kawasaki Dockyard Co.*; 5,831 tons; 385 x51x 36; 437 n.h.p.; triple-expansion engines. The steamship *Glasgow Maru* was sunk by war causes on August 22nd, 1943, in the Indian Ocean.

GLATTON

British Navy, monitor; 1913; *Armstrong Whitworth*; 5,700 tons; 310 x 73x16-5; 4,000 i.h.p.; 13 knots; triple-expansion engines; Yarrow boilers; two 9-2 in. guns, six 6 in.

The monitor *Glatton* was one of two coastal defence battleships ordered from Armstrong Whitworth for the Norwegian navy in 1913. At the outbreak of the First World War all work on the ships ceased but in 1915 they were taken over by the Admiralty and completed as monitors, their beam being increased by 20 feet. When commissioned early in 1918 the first ship, the *Bjoergvin*, was renamed *Glatton* and her sister, the *Nidaros*, was named *Gorgon*. On September 16th, 1918, the *Glatton* was one of four monitors lying in Doyer Harbour ready to take part in operations on the Belgian coast in co-operation with the land forces. At just before 6 p.m. there was a tremendous explosion which shook the whole town, followed at intervals by explosions of less violence. The *Glatton* was seen to be burning furiously and a great crowd of onlookers began to gather on the sea-front. All efforts of those on board the monitor to check the flames were without avail and the danger of a further and more devastating explosion was enhanced by the presence at near anchorages of several merchantmen loaded with explosive cargoes. The situation was not only perilous for the ships, but for the huge crowd alongshore, and at about 7 p.m. Vice-Admiral Sir Roger Keyes, senior naval officer, called in the help of the military forces and all people were cleared from the front.

The fire on the *Glatton* was now threatening another magazine and orders were given for a destroyer to torpedo and sink her. This was done and the vessel turned on her side and sank.

The loss of life was extremely heavy, one officer and 19 men being killed by the first explosion and 57 killed later, making 77 all told. In addition to this there was a large number of injured.

GLEN HEAD

Ulster Steamship Co.; 1883; *J. Readhead & Co.*; 1,500 tons; 256-5x34-5x17-9; 173n.h.p.; compound engines. The British cargo ship *Glen Head* was wrecked about three miles south of Swaneke lighthouse, Bornholm Island, on December 8th, 1934. She was on a voyage from Riga, via Liepaja, to Cork carrying a wood and general cargo.

GLEN HEAD

Ulster S.S. Co.; 1909; *Clyde Shipbuilding & Engineering Co.*; 2,011 tons; 295-3x42-1x17-6; 217n.h.p.; 10 knots; triple-expansion engines.

The steamship *Glen Head*, Capt. R. Dick, was bombed and sunk by German aircraft on June 6th, 1941, about 100 miles S.W. of Cape St. Vincent. Twenty-three of her crew were killed. Capt. R. Dick, who had commanded the *Dunaff Head* when she was torpedoed in the previous March, was among the survivors.

GLENART CASTLE

Union-Castle Mail S.S. Co.; 1900; *Harland & Wolff*; 6,824 tons; 440-3x53-2x29-6; 375 n.h.p.; 12-5 knots; triple-expansion engines.

On August 15th, 1914, the *Glenart Castle* under her original name *Galician* was intercepted by the German auxiliary cruiser *Kaiser Wilhelm der Grosse* (which see) off Teneriffe on her way home from Cape Town. A Lt. Deane and Gunner Sheerman were taken prisoners, but the ship was allowed to proceed on her course as there were women and children on board.

Under her new name of *Glenart Castle* she was taken over by the British government as a hospital ship. On February 26th, 1918, she was torpedoed and sunk by the German submarine *UC-56*, ten miles W. of Lundy Island, on a voyage from Newport to Brest to embark wounded. Her commander, Capt. Burt, and 94 of the crew were among the 153 killed out of her total complement of 186.

GLENAVON

McGregor, Gow & Co.; 1881; *London & Glasgow Co.*; 2,986 tons; 360'4x43-3x24-5; 379n.h.p.; triple-expansion engines. The British cargo ship *Glenavon* was wrecked on Linting Rock, Sa Mun Group, China, on December 30th, 1898. She was on a voyage from Japan, via Hong Kong, carrying a cargo including tea and rice. Four of her crew were drowned and one died of exhaustion after swimming to land.

GLENBANK

J.A.Zachariassen & Co.; 1893; *A. Rodger & Co.*; 1,481 tons; 240-1x37x21-7.

The Norwegian sailing ship *Glenbank* with a crew of 24 was overwhelmed by a hurricane off Legendre Island, Australia, on February 6th, 1911. All were drowned with the exception of one seaman.

GLENDALE

G.B.Harland & Co.; 1874; *R.Irvine & Co.*; 1,096 tons; 230-3X 30-6x17-3; 112 n.h.p.; compound engines. The British cargo ship *Glendale* was wrecked near Cape Sviatoi in the White Sea on July 21st, 1899, while on a voyage from Archangel to Newport carrying a cargo of deals.

GLENDALE

Weardale S.S. Co.; 1886; *J.Laing*; 1,000 tons; 211 x 30-5X 14'6; 99n.h.p.; triple-expansion engines.

The British cargo ship *Glendale* was wrecked on a reef off Heligoland on January 11th, 1909. She was carrying a cargo of coal from Bo'ness to Hamburg.

GLENDENE

Glendene Shipping Co.; 1929; *W. Gray & Co.*; 4,413 tons; 387-5x52-5x24-8; 360 n.h.p.; triple-expansion engines. The steamship *Glendene*, on a voyage from Buenos Aires to the Mersey, was torpedoed and sunk by a German submarine on October 8th, 1942, 250 miles S. of Monrovia. The captain and four of the crew were lost.

GLENEDEN

Livingston, Conner & Co.; 1890; *J.Priestman & Co.*; 1,133 tons; 231-5x32-1x15-5; 120 h.p.; triple-expansion engines. The British cargo ship *Gleneden* was wrecked near Mandal on September 29th, 1891, while on a voyage from Windau to Dublin carrying a cargo of wood.

GLENELG

McGregor, Gow & Co.; 1883; *London & Glasgow Co.*; 3,034 tons; 360-2x43-3x24-5; 530 h.p.; compound inverted engines. The British cargo ship *Glenelg* was wrecked off Ushant on July 29th, 1884, while on a voyage from London to Penang carrying a general cargo.

GLENELG

A.J.Ellerker; 1875; *Aitken & Mansell*; 210 tons; 135-8X 21-1x11-3; 80r.h.p.; compound engines. The small Australian coasting steamship *Glenelg* with cargo and passengers was wrecked on the coast of Victoria on February 25th, 1900, with the loss of 31 persons.

GLENFARG

McGregor, Gow & Co.; 1894; *London & Glasgow Co.*; 3,647 tons; 360x44x27-9; 445 n.h.p.; triple-expansion engines. The British cargo ship *Glenfarg* foundered near Shirose Island on August 14th, 1914, while on a voyage from Kuchinotsu to Shanghai carrying a cargo of lumber.

GLENGYLE

Glen Line; 1914; *Hawthorn, Leslie & Co.*; 9,395 tons; 500-2 x 62-3x34-7; 988 n.h.p.; 14 knots; triple-expansion engines. The liner *Glengyle*, Capt. R. A. Webster, was homeward bound from Vladivostok when she was torpedoed by the German submarine *U-38*, Lt. Cdr. Max Valentiner, on January 1st, 1916, 240 miles E. by S. of Malta. The liner carried 18 passengers and 102 crew, mostly Chinese and lascafs. All the passengers were saved but two officers, one steward and seven Chinese were killed.

GLENISLA

Lindsay, Grade & Co.; 1883; *Tyne Iron S.B. Co.*; 1,559 tons; 265 X 36 • 2 x 17; 160 h.p.; compound inverted engines. The British cargo ship *Glenisla* was wrecked near St. David's Head, Pembrokeshire, on February 28th, 1886. She was carrying a cargo of coal on a voyage from the Clyde to Savona.

GLENISLA

James Mitchell & Sons; 1878; *W.B.Thompson*; 1,266 tons; 250-1x32-7x20-3; 150 n.h.p.; compound engines. The British cargo ship *Glenisla* sank after a collision three-quarters of a mile from Kirkabister Light, Lerwick, on November 24th, 1917. She was carrying a cargo of coal on a voyage from the Tyne to Slemmestad.

GLENLEA

Morrison S.S. Co.; 1930; *Sir John Priestman & Co.*; 4,252 tons; 367'5x51-5x25-1; 375 n.h.p.; 10 knots; triple-expansion engines.

The steamship *Glenlea*, Capt. J. R. Nicol, on a voyage from Cardiff to Durban, was torpedoed and sunk by a German submarine on November 7th, 1942, in mid-North Atlantic. Forty-four of her crew were killed. Capt. Nicol was taken prisoner of war.

GLENLIVET

Maclay & McIntyre; 1883; *Palmers' Co.*; 1,610 tons; 265-5X 36-3x16-5; 179 n.h.p.; compound engines. The British cargo ship *Glenlivet* was wrecked on Pointe du Raz de Sein, Finisterre, on October 8th, 1900. She was on a voyage from Bilbao to Whitehaven carrying a cargo of iron ore.

GLENMOOR

Moor Line; 1928; *W.Doxford & Sons*; 4,393 tons; 375x52-6x 25-7; 417n.h.p.; oil engines.

The motorship *Glenmoor*, on a voyage from Cardiff to Alexandria, was torpedoed and sunk by a German submarine on November 27th, 1940, about 200 miles W. of Ireland. Thirty-one of her crew of 33 were lost.

GLENNON

United States Navy, destroyer; 1942; *Federal Shipbuilding Co.*; 1,700 tons; 348-5x36x10; 50,000 s.h.p.; 36-5 knots; turbine engines; *Babcock & Wilcox* boilers; four 5 in. guns, four 40 mm., seven 20 mm., 5 T.T.

The United States destroyer *Glennon* was engaged in the operations consequent upon the landing of the Allied army in France on "D Day", June 6th, 1944. The vessel was mined and sunk when off the coast of Normandy. Her normal complement was 210. Two other U.S. destroyers, the *Corry* and the *Meredith*, were mined and sunk in the same area on the same day.

GLENN'S FERRY

U.S. War Shipping Administration; 1945; *Kaiser Co.*; 10,448 tons; 504X68-2X39-2; turbo-electric engines. On a voyage from Los Angeles to Manila, the American tanker *Glenn's Ferry* was reported to be aground on October 6th, 1945, at Batag Island. On October 10th, there was an explosion and fire broke out. The ship was gutted and broke in two.

GLENOGLE

Glen Line; 1916; *Hawthorn Leslie & Co.*; 7,682 tons; 469-8 x 58-2x32-3; 842 n.h.p.; 11 knots; quadruple-expansion engines. The steamship *Glenogle* was torpedoed and sunk by a German submarine 200 miles S.W. of Fastnet on March 27th, 1917. Nineteen of her crew were killed. The captain was among the survivors.

GLENOGLE

Lim Chin Tsong; 1882; *London & Glasgow Co.*; 3,750 tons; 420-5x45-1x25-3; 554 n.h.p.; triple-expansion engines. The British cargo ship *Glenogle* was wrecked on Syriam Flats, Rangoon, on January 17th, 1919. She was on a voyage from Rangoon to Calcutta carrying a cargo of rice.

GLENORCHY

GLENORCHY

Furness, Withy & Co.; 1909; Scotts' S.B. & E. Co.; 4,737 tons; 400 X52x17-8; 526 n.h.p.; triple-expansion engines. The British cargo ship *Glenorchy* was wrecked off Victoria Bar, Brazil, on March 1st, 1920. She was on a voyage from New York to Victoria, Brazil, carrying a general cargo.

GLENORCHY

Glen Line; 1939; Taikoo Dock & Engineering Co.; 8,982 tons; 483x66-4x31-2; 2,469 n.h.p.; 14 knots; oil engines. The liner *Glenorchy*, Capt. G. Leslie, was torpedoed and sunk by a German torpedo boat five miles N. W. of Kelibia Light, Tunisia, on August 13th, 1942. Seven of her crew, including Capt. Leslie, were killed.

GLENRATH

Lindsay, Grade & Co.; 1879; Palmers' Co.; 1,665 tons; 255x34-6x23-6; 160 h.p.; compound engines. The British cargo ship *Glenrath* struck a sunken wreck and foundered near Cape Look-Out on October 1st, 1890, while carrying a cargo of timber on a voyage from Pensacola to Antwerp.

GLENROY

McGregor, Gow & Co.; 1901; London & Glasgow Co.; 4,901 tons; 400-9x49-2x29-2; 422 n.h.p.; triple-expansion engines. The British cargo ship *Glenroy* was wrecked on Falloeden Shoal, near Singapore, on April 7th, 1915, while on a voyage from Portland, Oregon, via Vladivostok, to London. She was carrying a general cargo and soya beans.

GLENROY

R. Livingston & Co.; 1899; W. Gray & Co.; 2,755 tons; 318X 46-1x21-1; 245 n.h.p.; triple-expansion engines. The British cargo ship *Glenroy* was wrecked at Les Falaises on February 10th, 1916, while on a voyage in ballast from Malta to Bougie.

GLENTURRET

Glen Line; 1896; London & Glasgow Co.; 4,696 tons; 400X 49-2x29-6; 525 n.h.p.; triple-expansion engines. The British cargo ship *Glenturret* was wrecked at Cordemais, River Loire, on July 26th, 1918. She was on a voyage from Buenos Aires to Nantes carrying a cargo of grain.

GLITREFJELL

A/S Rudolf; 1934; Porsgrund Mek. Verks; 1,568 tons; 246-6X 37-9x18-2; 109 n.h.p.; compound engines & L.P. turbine. The Norwegian steamship *Glitrefjell* was sunk by torpedo or mine on December 16th, 1939, 75 miles E. of St. Abb's Head on a voyage from Oslo to the Tyne. Five of her crew were killed.

GLITRE

Smedvigs Tankrederi A/S; 1928; A/B Gotaverken; 6,409 tons; 408-3x55^3x32-3; 543 n.h.p.; oil engines. The Norwegian tanker *Glitre* was torpedoed and sunk by a German submarine on February 23rd, 1943, about 800 miles E. of Cape Race, on a voyage from Manchester to New York.

GLODALE

Humphries (Cardiff); 1907; Irvine's S.B. & D.D. Co.; 3,033 tons; 324-7x47x13-8; 275 n.h.p.; triple-expansion engines. The British cargo ship *Glodale* was wrecked at Point Pogan, Murmansk, on January 1st, 1918. She was carrying a cargo of munitions on a voyage from Murmansk to Bergen.

GLORIOUS

British Navy, aircraft carrier; 1917; Harland & Wolff; 22,500 tons; 786-3x100x28; 90,000 i.h.p.; 30 knots; turbine engines; Yarrow boilers; sixteen 4-7 in. guns, four 3pdr., 17 smaller, 48 aircraft. The aircraft carrier *Glorious* was a sister ship to the *Courageous* which was torpedoed in the Channel by a German submarine on September 17th, 1939. Both ships were originally battle cruisers designed with a view to operating in the Baltic in the First World

War, a purpose which they never fulfilled. Some years after the Armistice in 1918 they were converted into aircraft carriers. On June 8th, 1940, *Glorious*, escorted by the destroyers *Acastra* and *Ardent*, was surprised off Narvik by a German force consisting of the battleships *Scharnhorst* and *Gneisenau* and some other warships. The three British ships were sunk in a very short space of time, but very little from British sources is known about their end. The German version issued through a News Agency was as follows:—

"Towards the evening of June 8th units of a German patrol in the Arctic Sea met the *Glorious*, which was accompanied by two destroyers.

"The *Glorious* attempted to let her aeroplanes take off, but the first German salvoes prevented this. The two destroyers threw out smoke screens . . . and fired torpedoes again and again . . . concentrated fire put the first destroyer out of action and the water closed over it.

"The *Glorious* tried to make off but she could not get up full speed on account of the damage done to her. The fight continued until the glow of fire was to be seen in the *Glorious*. Slowly the giant began to turn on her side. Pouring out flames and smoke she drifted with the wind. A moment later she sank. "But the destroyer did not give up. Our guns silenced her forward guns but the aft guns continued firing. More salvoes from our guns and the enemy was at length silenced. The destroyer was in flames and slowly began to sink. Steam arose, probably through the boilers bursting."

The Germans in their first communique announced that they had rescued some hundreds of survivors. A Norwegian vessel picked up 36 officers and men from a raft and brought them to a British port. The approximate number of officers and men serving on the three ships was 1,500, and of this number a considerable proportion must have been lost.

GLOUCESTER

British Navy, cruiser; 1937; Devonport Dockyard; 9,600 tons; 591-5x62-3x20; 75,000 s.h.p.; 32 knots; turbine engines; 3-drum boilers; twelve 6 in. guns, eight 4 in., one 3-7 in., four 3pdr., 16 smaller, 6 T.T., 3 aircraft.

The cruiser *Gloucester*, Capt. H. A. Rowley, formed part of a force of cruisers and destroyers under Admiral King charged with the duty of preventing Italian convoys running from Greece to Crete. On the morning of May 22nd, 1941, a convoy was reported S. of the island of Milos and the British steamed to intercept it in face of intense bombing attacks by German dive bombers. During the afternoon *Gloucester* and the cruiser *Fiji* were sent to cover the destroyers *Kandahar* and *Kingston* engaged in picking up survivors from the destroyer *Greyhound* (which see) which had been bombed and sunk. While carrying out this operation *Gloucester* was hit amidships by a heavy bomb and sank shortly afterwards off the island of Antikithera. Forty-nine of her 50 officers and 687 of her 755 ratings were lost. Capt. Rowley went down with the vessel.

The full story of the action is told under the cruiser *Fiji*, which was also lost.

GLOUCESTER CASTLE

Union-Castle Mail S.S. Co.; 1911; Fairfield Co.; 8,006 tons; 452-7x56-2x30-7; 722 n.h.p.; 12 knots; quadruple-expansion engines.

The liner *Gloucester Castle*, Capt. H. H. Rose, left Liverpool for Table Bay on June 21st, 1942. The vessel carried 12 passengers, 142 crew and six gunners, as well as a general cargo. On the night of July 15th when off S.W. Africa she was attacked by a raider which shot away her wireless transmitter, destroyed all the boats on the starboard side and damaged her so severely that she sank within ten minutes. Capt. Rose and 92 passengers and crew were killed and 61 persons got away in two of the port lifeboats. These boats were subsequently picked up by the raider and the occupants taken to Japan as prisoners. Two persons died in captivity.

GLOUCESTER CITY

Chas. Hill & Sons; 1881; Richardson, Duck & Co.; 1940; 270-2x36x23-5; 200 h.p.; compound inverted engines. The British cargo ship *Gloucester City* was sunk by floating ice on February 21st, 1883, in 46° N., 48° W., while on a voyage from Bristol to New York carrying a general cargo.

GLOWWORM

British Navy, destroyer; 1935; Thornycroft & Co.; 1,345 tons; 323x33x8-5; 34,000s.h.p.; 35-5 knots; turbine engines; 3-drum boilers; four 4 - 7 in. guns, 7 smaller; 10 T.T. The destroyer *Glowworm*, Lt. Cdr. Gerald Roope, was one of the vessels engaged upon the mining of Norwegian waters to prevent their use by the Germans, more especially to interrupt the iron ore traffic between the port of Narvik and Germany. The operation began on April 8th, 1940, and coincided with the German invasion of Norway. Early on the morning of the 8th when escorting the battle cruiser *Renown*, *Glowworm* lost touch owing to one of her crew having fallen overboard. The delay occasioned in picking up the man, together with the heavy seas which reduced the destroyer's speed to ten knots, allowed a German force consisting of the 10,000 ton cruiser *Hipper* and four destroyers to intercept her.

Action was joined at daybreak and *Glowworm* engaged first one and then two enemy destroyers. These vessels failed to score any hits, though the British vessel managed to get in at least one before the enemy broke off the action. Shortly afterwards the *Hipper* came in sight and began to shell *Glowworm*. Lt. Cdr. Roope decided to make smoke and attack with torpedoes. This attempt failed and the more desperate plan of ramming the cruiser was put into operation and, despite a deluge of shell fire, succeeded in striking the enemy on the starboard side, though with insufficient force to cause vital damage. By this time *Glowworm* was a wreck and at about 10 a.m. Lt. Cdr. Roope gave orders to abandon ship and the destroyer turned on her side and sank. Unfortunately the strain of the action proved too much for the gallant commander who took to the water in an exhausted condition. He managed to reach the *Hipper* but failed to catch a rope thrown to him and was never seen again. He was posthumously awarded the Victoria Cross.

Of the *Glowworm's* complement of eight officers and 144 ratings, seven officers and 105 ratings were killed. Lieutenant Ramsey and 39 ratings were picked up by the Germans and of this number two men died while prisoners of war.

GLUCKAUF

Gluckauf Kohlenhandels m.b.H.; 1912; S. P. Austin & Son; 1915; 265'8x37-8x17-8; 199 n.h.p.; triple-expansion engines. The German steamship *Gluckauf* struck a wreck and sank on February 9th, 1939, 20 miles N.E. of Spurn Head. She was on a voyage from Immingham to Rostock.

GNAT

British Navy, gun vessel; 464 tons; 120n.h.p.; steam engines, twin screw; 2 guns. The steam gun vessel *Gnat*, Cdr. C. B. Theobald, was wrecked off Balabac Island, China, on November 15th, 1868. The number lost is not known.

GNEISENAU

*German Navy, training corvette; 1879; Germany; 2,856 tons; 244-4x44-9x19*7; 2,500 i.h.p.; 13 knots; compound engines; sixteen 5-9 in. guns, 6 m.g.*

The training corvette *Gneisenau*, Capt. Kretschmann, was a three-masted topsail schooner with auxiliary engines. She carried a crew of 460, of whom 49 were naval cadets and 230 were boys training as seamen. On December 16th, 1900, she was lying off Malaga Harbour, Spain. The weather was extremely rough and the anchorage unsafe, a fact which had been brought to the notice of the captain, who was advised to bring his ship within the harbour. Despite the roughness of the weather and the nearness of the vessel to the shore she rode at only one anchor. Later a full gale developed and a second anchor was dropped as the first was dragging. The ship was outside the Mole with a very rocky shore to starboard. The two anchors failing to hold, the cables were cut and the ship headed for open sea under steam. Unfortunately the fires had been allowed to burn low and sufficient steam was not available to give the vessel steerage way and she was driven on to the east breakwater of the outer harbour. In ten minutes she had sunk in a nearly upright position. A number of her crew took to the rigging and were rescued by persons from the shore, who were quite close to the wreck.

A Spanish sailor threw a rope to Capt. Kretschmann, who declined to avail himself of it, but threw his sword as a gift to his would be rescuer and then went down with his ship.

The number drowned was 38, besides nearly 100 injured through being dashed upon the rocks.

GNEISENAU

German Navy, armoured cruiser; 1906; Weser; 11,600 tons; 449-7x71x25; 26,000 i.h.p.; 24-8 knots; triple-expansion engines; Schulz-Thornycroft boilers; eight 8-2 in. guns, six 5-9 in., twenty 24pdrs., 4 m.g., 4 T.T.

The *Gneisenau* was, at the outbreak of the First World War, a unit of the German East Asiatic Squadron under Admiral Graf von Spee. She participated in the action off Coronel on November 1st, 1914, when two British armoured cruisers, the *Good Hope*, flagship of Rear-Admiral Sir C. Cradock, and the *Monmouth* were sunk.

On December 8th, 1914, the *Gneisenau*, in company with the light cruiser *Nurnberg*, was sent on in advance of the squadron with instructions to seize the governor of the Falkland Islands, and to establish a base there for the approaching German ships. The arrival of Vice-Admiral Sir Doveton Sturdee with a large force a few hours earlier frustrated this move, and when they sighted the tripod masts of the battle cruisers both German ships turned away, hotly pursued by the British.

During the fight which ensued the *Gneisenau* was under fire for four hours. She fought with great bravery and toward the end of the contest was engaging the battle cruisers *Inflexible* and *Invincible* and the armoured cruiser *Carnarvon* single-handed. At 5.20 p.m., when her last round of ammunition had been fired, "Abandon ship" was ordered. The vessel was blazing furiously and she was scuttled, sinking with colours flying at about 6.2 p.m. Of her crew of 850 some 200 were saved.

A full account of both battles and the forces engaged may be seen under *Good Hope* and *Scharnhorst*, the respective flagships.

GNEISENAU

Norddeutscher Lloyd; 1935; Deutsche Schiff.-u. Maschinenbau A. G. Weser; 18,160 tons; 625-6x74-1x41-4; 4,333n.h.p.; turbine engines.

The German liner *Gneisenau* struck a mine and sank on May 2nd, 1943, off the south coast of Lolland Island, in the Baltic.

GOA

British India S.N. Co.; 1874; W. Denny & Bros.; 1,903 tons; 297-8x33-3x25-7; 207 n.h.p.; quadruple-expansion engines. The British cargo ship *Goa* was wrecked on August 26th, 1906, on Kukrimukr, Sunderbund, while on a voyage from Calcutta to Rangoon carrying a general cargo.

GOATHLAND

Headlam & Rowland; 1906; Tyne Iron Shipbuilding Co.; 3,044 tons; 331 x48-1x21-8; 292 n.h.p.; 10 knots; triple-expansion engines.

The steamship *Gpathland* was torpedoed and sunk by a German submarine ten miles S. of Belle He on July 4th, 1917. Twenty-one men, including the captain, were killed.

GODAFOSS

HjF Eimskipafelag Islands; 1921; Svendborg Skibs & Maskin; 1,542 tons; 230x34-6x20-5; 168 n.h.p.; triple-expansion engines.

The Icelandic steamship *Godafoss*, on a voyage from Loch Ewe to Reykjavik, was torpedoed and sunk by a German submarine on November 10th, 1944, about 150 miles S. of the Vestmann Islands. She had stopped, against convoy orders, to pick up survivors from the torpedoed steamship *Shirvan*. Fourteen of her crew, one naval signalman and ten passengers were lost.

GODETIA

British Navy, corvette; 1940; John Crown & Sons; 925 tons; 205 x 33x14-5; 2,800 i.h.p.; 16 knots; triple-expansion engines; 3-drum boilers; one 4 in.A.A. gun, 1 pom-pom, several 20 mm. The corvette *Godetia* was sunk in a collision off the coast of Northern Ireland on September 6th, 1940. The vessel's normal complement was 85,

GODFRBED BUEREN

Atlas Reederi A.G.; 1911; W. Doxford & Sons; 4,664 tons; 390'3x53-4x26-6; 436 n.h.p.; triple-expansion engines. The German steamship *Godfried Bueren* struck a mine and sank on January 18th, 1941, in the Kattogat 20 miles E. of Lim Fjord.

GOFFREDO MAMELI

1912; W. Doxford & Sons; 4,124 tons; 370-3x50-3x25; 310 n.h.p.; triple-expansion engines. The Austrian steamship *Maria Racich* was requisitioned by the Italian Government and renamed *Goffredo Mameli*. She was torpedoed and sunk by a German submarine west of Gibraltar on September 20th, 1917.

GOFUKU MARU

Yamashina Yoshio; 1927; Mitsui Bussan Kaisha; 2,419 tons; 285x42x23-2; 181 n.h.p.; triple-expansion engines. The Japanese steamship *Gofuku Maru* went ashore on February 18th, 1933, at Ohtasaki and broke in two.

GOGRA

British India Steam Navigation Co.; 1919; Workman Clark & Co.; 5,190 tons; 400-2x52-3x28-4; 517 n.h.p.; 10-5 knots; triple-expansion engines.

The steamship *Gogra*, Capt. John Drummond, left the Clyde on March 26th, 1943, for India, being one of a large convoy of over 100 merchantmen escorted by the sloop *Black Swan* and seven corvettes. At about 9 p.m. on April 2nd, some 400 miles W. of Oporto, the *Gogra* was struck by a torpedo. The ship sank quickly taking with her Capt. Drummond, six officers and 31 Indian crew. Chief Officer G. R. Mudford and 37 other survivors were picked up by various ships and brought to Freetown.

GOIDELIAN

O. & W. Williams; 1901; W. Harkess & Son; 1,220 tons; 225 X 35-1x17-8; 131 n.h.p.; triple-expansion engines. The British cargo ship *Goidelian* struck a rock and foundered off Sagres on June 25th, 1905. She was on a voyage from Gandia to Liverpool carrying a fruit and general cargo.

GOKOKU MARU

Osaka Shosen K. K.; 10,438 tons. The steamship *Gokoku Maru* was taken over by the Japanese navy for use as an auxiliary cruiser. On November 10th, 1944, she was torpedoed and sunk by the U.S. submarine *Barb* about 50 miles W. of Sasebo, Japan.

GOLCONDA

British India Steam Navigation Co.; 1887; W. Doxford & Sons; 5,874 tons; 422x48-1x24; 627 n.h.p.; 12 knots; triple-expansion engines.

The steamship *Golconda*, outward bound from the Tees to Calcutta, was torpedoed and sunk by a German submarine five miles S.E. by E. of Aldeburgh on June 3rd, 1916. Nineteen of her crew were killed. The captain was among the survivors.

GOLD SHELL

Anglo-Saxon Petroleum Co.; 1931; Bremer Vulkan; 8,208 tons; 451'2x62-1x34-1; 714 n.h.p.; 12•5 knots; oil engines. The tanker *Gold Shell*, Capt. W. F. Brierley, was mined and sunk on April 16th, 1945, about ten miles off Ostend. Capt. Brierley, 31 of the crew and three gunners were killed.

GOLDEN FOREST

Oceanic & Oriental Nav. Co.; 1919; Northwest Steel Co.; 5,658 tons; 409-8x54-2x27-7; 583 n.h.p.; turbine engines. The American ship *Golden Forest* was being operated by the American-Hawaiian S.S. Co. when she went ashore on September 5th, 1929, in Shelikof Strait, Alaska. She was on a voyage from San Francisco to Dairen.

GOLDEN GATE

Aspinwall Line; 1851; W. H. Brown & Co.; 2,850 tons; 285X 43x32; 11 knots; beam engine; paddles 35 ft. diam. The paddle steamship *Golden Gate* was a large vessel for her time, having accommodation for about 1,200 passengers. A sister ship to

a most successful liner of the same company, the *Golden Age*, she was herself very unfortunate. In 1854 she stranded near San Diego and in 1857 broke her shaft and had to put back to San Francisco on one paddle. Her route was from San Francisco to New York and the amount of gold entrusted to her from the former place was at times fabulous. In July, 1862, she sailed from San Francisco with 337 persons, of whom 242 were passengers, and 1,400,000 dollars worth of gold. When off Manzanillo, Mexico, on July 27th, she caught fire and burned with great rapidity. At the time of the outbreak she was about three and a half miles from shore, her passengers being at dinner. The captain at once headed for the beach but before he reached it the upper deck had collapsed on the unfortunate people.

One circumstance which added to the tragedy was that the fire originated amidships and drove one body of people forward and another aft, thus preventing any combined effort to fight the flames. As soon as she touched the shore those who could swim jumped overboard, while a very few were saved by the boats. The place where they landed was destitute of all comfort and the survivors underwent much further suffering before they were finally rescued.

Of the total number on board only about 80, including the captain, were saved.

An attempt was made to salvage the treasure, and a schooner and a party of divers were chartered for this purpose. As a result of their efforts several cases of gold were recovered.

GOLDEN STAR

The sailing ship *Golden Star*, bound from Mobile to Liverpool, was lost off Fethard lightship, Co. Wexford, on December 29th, 1860. The masts were cut away and every effort made to save the vessel, but she drove ashore in a fierce gale. Capt. Stapleton, his wife, servant girl and 16 crew were drowned.

GOLDENFELS

(see *Atlantis*)

GOLDFINCH

British Navy, destroyer; 1910; Fairfield Co.; 747 tons; 246-5 X 25-3x8-7; 13,500 i.h.p.; 27 knots; turbine engines; Yarrow boilers; two 4 in. guns, two 12pdr., one 3 pdr.A.A., 1 m.g., 2 T.T. The destroyer *Goldfinch* was wrecked off Start Point, Sanday Island, the Orkneys, in dense fog on the night of February 18th-19th, 1918. Her official complement was 72.

GOLIATH

British Navy, line-of-battleship; 1842; Chatham Dockyard; 2,590 tons; 190x56x23; 400i.h.p.; 8 knots (steam); 60guns. The *Goliath* was a wooden line-of-battleship which had an unusual career, for she did not proceed to sea after completion, but was laid up in the Medway until the outbreak of the Crimean War. At the conclusion of the Crimean War, in which the vessel took no part, she was converted to steam and her armament reduced to 60 guns. She served for about five years, when she was again laid up until 1870, in which year she was loaned by the Admiralty to the Metropolitan Asylums Board for the training of pauper boys from an association of metropolitan parishes.

The *Goliath* was under command of Capt. Bouchier, R.N., with a complement of 458 boys, besides officers. The captain's two daughters also lived on board the ship. On Wednesday morning, December 22nd, 1875, just before 8 o'clock, a fire broke out in the lamp room on the main deck. At the time the lamps were being extinguished and one was inadvertently dropped by a lad named Loeber. The oil was upset over the deck and immediately caught fire, the lad Loeber with great presence of mind flung his jacket on the flames and sat down on it, hoping by this means to prevent them spreading. His courage was unavailing, however, and although the pumps were manned with all speed, and admirable discipline prevailed, in a few minutes the fire had established a firm hold on the ship.

The boats were hanging from their falls on the upper deck and the flames burned away the ropes so that they fell end-on to the water, finally dropping away and sinking. There was a fresh breeze blowing through the open ports and this fanned the fire between decks to furnace heat. Fortunately most of the boys managed to save themselves by swimming to barges and boats moored in the river, and as *Goliath* was lying off Grays close to passing shipping there was no lack of help.

The boats of the training ship *Arethusa* rendered great service in saving life and Capt. Walter of that vessel was awarded the medal of the Royal Society for the Protection of Life from Fire.

The death roll amounted to 12 men and boys. Capt. Bouchier, whose two daughters saved themselves by swimming to passing craft, was the last to leave the ship.

GOLIATH

Royal Navy, 1st class battleship; 1900; Chatham Dockyard; 12,950 tons; 418x74x26-5; 13,500 i.h.p.; 18-4 knots; triple-expansion engines; Belleville boilers; four 12 in. guns, twelve 6 in., ten 12 pdr., six 3 pdr., 2 m.g., 4 T.T.

In the early months of the First World War the battleship *Goliath*, Capt. T. L. Shelford, was engaged on the East African coast blockading the German light cruiser, *Konigsberg*. With the destruction of that ship her service in those waters came to an end and she was ordered to the Dardanelles, where she arrived by the middle of April, joining the 1st Squadron of the Mediterranean Fleet.

After the landing of the troops on the Gallipoli Peninsula on April 25th, 1915, the support of the ships became vital to the success of the operation. The French general in command at Kereves Dere had asked for naval artillery support during the night as the Turkish counter attacks were very determined. To meet this request two battleships were sent in each evening to be ready whenever such attacks developed. On May 12th *Goliath* and *Cornwallis* were assigned this duty and anchored in Morte Bay, the night being very dark with fog approaching from the Asiatic shore. The conditions were ideal for a torpedo attack and both ship's companies were fully on the alert, additional protection being afforded them by five destroyers, stationed in the straits.

The Turks were not blind to such an opportunity and as Lt. Cdr. Firlie, a German naval officer, had asked to be allowed to attempt a torpedo attack, it was judged a suitable moment and he was put in charge of the Turkish destroyer *Mouavenet-Millieh*. This craft was one of the best of its kind possessed by the enemy and was of 620 tons, armed with 12 pounder guns, 18 in. torpedo tubes and having a speed of between 34 and 35 knots.

Favoured by the dense fog and going dead slow the *Mouavenet-Millieh* hugged the European shore of the straits, eluding two of the watching destroyers, and came in sight of the battleships. At about 1.15 on the morning of the 13th she was discovered by *Goliath*, but too late to be attacked for she discharged three torpedoes in quick succession. The first hit *Goliath* abreast the fore turret, the second abreast the foremost funnel and a third abreast the after turret. So swiftly did the battleship sink that many of those below were drowned before they could reach the upper deck.

The *Mouavenet-Millieh* escaped without injury and returned to her base. Of the 750 on board *Goliath* about 570, including Capt. Shelford, were drowned.

GONCALVES DIAS

Lloyd Brasileiro; 1920; American International S.B. Corp.; 4,996 tons; 390x54-2x27-8; turbine-engines. The Brazilian steamship *Goncalves Dias* was torpedoed and sunk by a German submarine on May 24th, 1942, about 100 miles S. of Ciudad Trujillo on a voyage from Rio de Janeiro to New Orleans.

GONDUL

Stockholms Rederi A/B Svea; 1928; Helsingors Jernskibs. & Maskin.; 1,342 tons; 264-2x37-3x14-1; 168n.h.p.; triple-expansion engines.

The Swedish steamship *Gondul* struck a mine and sank on May 29th, 1943, off Wismar. The ship had previously been badly damaged through striking a mine on October 1st, 1940.

GOOD HOPE

Royal Navy, armoured cruiser; 1901; Fairfield Co.; 14,100 tons; 529-5x71x28; 30,000 i.h.p.; 23-5 knots; triple-expansion engines; Belleville boilers; two 9-2 in. guns, sixteen 6 in., twelve 12 pdr., three 3 pdr., 2 T.T.

On the outbreak of the First World War, the armoured cruiser *Good Hope* was sent to reinforce the squadron under Rear-Admiral Sir Christopher Cradock on the North American station. The Admiral transferred his flag from *Suffolk* to *Good Hope*, and on August 16th, 1914, sailed for the Panama Canal zone to superintend the search for the German cruisers *Dresden* and *Karlsruhe*. Later the

ship proceeded down the coast of South America to the Falkland Islands and thence up the Pacific coast. On October 27th the Admiral arrived at his base in the Vallenar Roads and joined with the rest of his squadron, which now consisted of *Good Hope*, *Monmouth*, *Glasgow* and *Otranto*, the last named being an auxiliary cruiser. The maximum speed of this force, a very important factor, was 18 knots, as *Otranto* could steam no faster. Independently the other three ships were capable of from 22•5 to 25•8 knots.

For several weeks prior to this concentration Admiral Cradock had been in communication with the Admiralty regarding the scanty forces at his command and the immense task assigned to them. As a result of his presentation of the facts he was told that a force adequate to patrol the Atlantic coast of South America would be concentrated off Montevideo under Admiral Stoddart. In addition to this his own force was to be strengthened by the old battleship *Canopus*, which was too slow to chase the German armoured cruisers, but might possibly cause them to refrain from attacking. Cradock was prompt to point out that the inclusion of this ship would reduce his strategic speed to 12 knots. On her arrival in South American waters he gave orders that she was to join him on the Pacific coast, which she did on the 30th October, but was in need of 24 hours in which to effect repairs to her machinery. This robbed Cradock of her services at a time when they were most needed and he proceeded up the coast without her, being intent for the moment on trapping the enemy light cruiser *Leipzig*.

The other two German ships which the British had been following these many thousands of miles had now got into touch with the rest of the East Asiatic Squadron, under Admiral Graf von Spee. This squadron had been playing a sort of hide and seek in the vast spaces of the Southern Oceans against mixed squadrons of British, French and Japanese cruisers. With considerable skill von Spee had managed to elude his pursuers and to join up with his two light cruisers off the Pacific coast. His immediate object just prior to the battle was to cut off the light cruiser *Glasgow*, which had gone to Coronet at the same moment that Cradock was seeking the *Leipzig*.

The strength of the rival forces was as follows:—

BRITISH			
<i>Good Hope</i> (flagship)	14,100 tons	23-5 knots	two 9-2 in. guns, sixteen 6 in.
<i>Monmouth</i>	9,800 „	22-5 „	fourteen 6 in. guns
<i>Glasgow</i>	4,800 „	25-8 „	two 6 in. guns, ten 4 in.
<i>Otranto</i>	12,500 „	18 „	eight 4.7 in. guns

GERMAN			
<i>Scharnhorst</i> (flagship)	11,420 tons	23•2 knots	eight 8•2 in. guns, six 5-9 in.
<i>Gneisenau</i>	11,420 „	23-5 „	eight 8•2 in. guns, six 5-9 in.
<i>Leipzig</i>	3,200 „	22-5 „	ten 4•1 in. guns
<i>Nurnberg</i>	3,400 „	23-5 „	ten 4•1 in. guns
<i>Dresden</i>	3,544 „	23-5 „	ten 4•1 in. guns

Both admirals became aware of the proximity of each other about October 31st, and at 6.40 p.m. on November 1st the squadrons made contact off Coronet, Chile.

An attempt on the part of Admiral Cradock to engage while the light was good and targets were clear was frustrated by the superior speed of the German squadron, which kept out of range until the setting sun reflected the British ships in sharp silhouette against the horizon. The German ships being in the evening haze were almost invisible.

The sea was rough and the 6 in. guns on the lower decks of the two British armoured cruisers could not be brought into action. Another handicap was that the crews had only joined the ships in August of 1914, and since that time had been afforded but scant opportunity of gunnery practice.

At 7.04 p.m., after an hour of manoeuvring the first shot was fired at a range of 11,500 yards. This was extreme for the British but easy for the sixteen 8-2 in. guns of the big German cruisers. At her third salvo the *Scharnhorst* struck *Good Hope* on the fore-deck and destroyed the 9-2 in. guns. Admiral Cradock knowing that his only hope was to close the range to enable his 6 in. guns to have full play, steamed towards the enemy. By 7.23 the range was down to 6,600 yards, with *Good Hope* firing with all the guns she could bring to bear.

GOODALL

Darkness was now coming on and the range again decreased to 5,500 yards. *Good Hope* was now on fire in several places and afforded a clear target to her enemies. In desperation Cradock endeavoured to approach to within torpedo range, being met with salvo after salvo from the two enemy cruisers. At 7.53 *Good Hope* blew up with her Admiral and all hands.

Monmouth, badly battered and steaming astern to the seas, got away in the darkness, but was discovered when the moon rose and was sunk by gunfire at about 9.30 p.m. *Glasgow* and *Otranto* escaped under cover of night.

The total number lost was about 1,400, of whom *Good Hope's* company accounted for 900.

GOODALL

British Navy, frigate; 1943; United States; 1,085 tons; 289 -5 X 35 x—; 6,000 b.h.p.; 20 knots; oilengines; three 3 in. guns, four 20 mm.A.A.

The frigate *Goodall* was torpedoed by a German submarine in Kola Inlet on April 29th, 1945, while escorting a convoy to North Russia. She remained afloat for some time but had to be sunk by ships in company as it was not possible to tow her. Six officers and 92 ratings were killed and two officers wounded.

GOOLISTAN

F. C. Strick & Co.; 1898; W. Gray & Co.; 2,756 tons; 306X 43-1x18-3; 240 n.h.p.; triple-expansion engines. The British cargo ship *Goolistan* sank after a collision about 170 miles from Lisbon on September 11th, 1904, while on a voyage from Karachi to Plymouth carrying a cargo which included grain. The third officer and six of the crew were drowned.

GOOLISTAN

Hindustan S.S. Co.; 1929; Short Bros.; 5,851 tons; 440 X 57-5X27-4; 472 n.h.p.; 10 knots; triple-expansion engines. The steamship *Goolistan*, Capt. W. Thomson, left Archangel on November 17th, 1942, for Manchester, in convoy, with timber and general cargo. At about 1.10 a.m. on November 23rd, she was torpedoed and sunk about 300 miles W.N. W. of the North Cape. There were no survivors.

GORDON CASTLE

Maclay & McIntyre; 1871; J. & G. Thomson; 2,045 tons; 307 -7x34-3x25-4; 197 n.h.p.; compound engines. The steamship *Gordon Castle*, Capt. Casey, collided with the Hamburg steamship *Stormarn*, 588 tons, in fog in Cardigan Bay on September 10th, 1900. Both vessels sank, the *Gordon Castle* going down with the captain and 19 of the crew. The *Gordon Castle* was on a voyage from Barcelona to Barrow with a cargo of iron ore.

GORDONIA

Gordon S.S. Co.; 1881; J. L. Thompson & Sons; 2,338 tons; 275x38-5x20-6; 236 n.h.p.; triple-expansion engines. The British collier *Gordonia* sank after a collision off Haisbro' on June 2nd, 1903, while on a voyage from the Tyne to Genoa.

GORYU MARU

GoyoShosen K.K.; 1940; Kawaminami Kogyo K.K.; 1,912 tons; 271 -6x40x20-3; 150 n.h.p.; triple-expansion engines. The steamship *Goryu Mam* was bombed and sunk by U.S. land-based aircraft on February 4th, 1944, off Jaluit Island, Marshall Islands.

GOSEI MARU

Koun Kisen K.K.; 1937; Tsummi Seitetsu Zosen K.K.; 1,931 tons; 271 -6x40x20-3; triple-expansion engines. The steamship *Gosei Mam* was sunk by U.S. carrier-based aircraft on February 17th, 1944, in the Caroline Islands.

GOSFORTH

Watts, Ward & Co.; 1866; T. & W. Smith; 1,064 tons; 244-5X 29-2x17-4; 120 h.p.; compound inverted engines. The British cargo ship *Gosforth* was wrecked in 45° N., 10° W., on April 4th, 1881, while on a voyage from Newport to Savona carrying a cargo of coal.

GOSHU MARU

GoyoShosen K.K.; 1939; Kawasaki Dockyard Co.; 8,592 tons; 443-2x60x40; 833 n.h.p.; turbine engines. The aircraft transporter *Goshu (Gosyu) Mam* was attacked by U.S. carrier-based aircraft on March 30th, 1944, and sunk off Babel-thuap, Palau Islands.

GOSHU MARU

Goyo Shosen K.K.; 2,211 tons. The *Goshu Mam* struck a mine and sank on June 23rd, 1945, off Yawata, Japan.

GOSHUN MARU

Goyo Shosen K.K.; 2,300 tons. The steamship *Goshun Mam* struck a mine and sank on November 23rd, 1944, 235 miles west of Inchon.

GOSSAMER

British Navy, fleet minesweeper; 1937; W. Hamilton & Co.; 815 tons; 230x33-5x7-9; 1,750 i.h.p.; 17 knots; turbine engines; 3-drum boilers; two 4 in. A.A. guns, 9 m.g. The fleet minesweeper *Gossamer* was bombed and sunk by German aircraft in Kola Inlet, North Russia, on June 24th, 1942. The vessel's normal complement was 80.

GOTHENBURG

McMeckan, Blackwood & Co.; 1854; Lungley & Co.; 501 tons; 176x26x16-5; 11 knots; compound engines. The *Gothenburg* was a small but very popular steamship running between Australia and New Zealand in the 1860's. She was rigged as a barque, with her funnel set well aft between main and mizzen-masts. After many years on the New Zealand run her owners transferred her to the Australian coastal service. The gold rush was at its height and it is recorded that on one of her trips between Port Adelaide and the Northern Territory she carried nearly 1,000 passengers.

In February, 1875, the *Gothenburg* was on voyage from Port Darwin to Adelaide, having on board 85 passengers and 35 crew, under command of Capt. R. G. A. Pearce. When off the coast of Queensland she encountered one of the worst cyclones in the history of the country.

The little ship, with low engine power and no help from her canvas, was unable to stand up to the wind and was blown onto the Great Barrier Reef. It was the night of February 24th, 1875, and the position of the ship was 24 miles off Cape Upstart. She sank with a loss of 98 lives, there being 22 survivors.

At the time of the disaster the ship was carrying a gold consignment valued at £43,000. This was recovered from the wreck before it finally broke up.

GOTHENBURG CITY

Christopher Furness; 1884; E. Withy & Co.; 2,529 tons; 301-5X 38x23-8; 300 h.p.; compound engines. The British cargo ship *Gothenburg City* was wrecked near Blyth on June 27th, 1891. She was on a voyage from Montreal to the Tyne carrying a cargo of cattle and deals.

GOTHIA

R.Gohle; 1883; W. Pickersgill & Sons; 1,826 tons; 270-2x 40-3x18-6; 198 n.h.p.; compound engines. The Swedish cargo ship *Gothia* was torpedoed and sunk by a German submarine in the North Sea on May 11th, 1918.

GOTHIA

Rederiaktieb. Svenska Lloyd; 1937; Eriksbergs Mek. Vcerks.; 1,640 tons; 284-2x41-2x15-3; 473 n.h.p.; oilengines. The Swedish motorship *Gothia* was torpedoed and sunk by a German submarine on January 22nd, 1940, 45 miles W. by N. of St. Kilda. There were only 11 survivors of her crew of 24.

GOTHIC

Gothic S.S. Co.; 1919; H. & C. Grayson; 2,444 tons; 265X 41-2x26-6; 229 n.h.p.; triple-expansion engines. The steamship *Gothic*, on a voyage from Immingham to the Tees, struck a mine and sank on September 12th, 1940, off Spurn Point. Twelve of her crew of 24 were lost.

GOTHLAND

Soc. Anon. de Nav. Beige-Americaine; 1893; Harland & Wolff; 7,660 tons; 490-7x53-2x33-5; 4,400 i.h.p.; 15 knots; triple-expansion engines.

The liner *Gothland* was on her homeward voyage from Montreal to Rotterdam when she ran into dense fog at the entrance to the Channel. At about 4.30 on the afternoon of June 23rd, 1914, she struck on the Gunner Rocks, close to the Bishop Lighthouse, Stilly Isles. The lifeboats from St. Mary and St. Agnes at once proceeded to her assistance and were joined by the Penzance and Scillies steamship *Lyonesse*. Between them all the passengers and crew, 281 persons, were taken off in safety.

At first there were some hopes of salving the liner, but these had to be abandoned and she became a total wreck.

GOTIA

German Government; 1905; Craig, Taylor & Co.; 1,966 tons; 280-3x42-2x19-4; 210 n.h.p.; triple-expansion engines. The steamship *Gotia* was formerly the Swedish *Balticia*, seized by the Germans. She was bombed and sunk by Russian aircraft on October 11th, 1944, off Langfjord, North Norway.

GOTTINGEN

Norddeutscher Lloyd; 1944; 6,267 tons. The German ship *Gottingen* was torpedoed and sunk by a Russian submarine on February 23rd, 1945, S.W. of Libau.

GOULD

British Navy, frigate; 1942; United States; 1,300 tons; 300 x 35 X—; 5,500 h.p.; 20 knots; turbine engines; three 3 in. guns, two 40 mm., four 20 mm.

The frigate *Gould*, Lt. D. W. Ungoed, was on patrol N.E. of the Azores with frigates of the First Escort Group under command of Cdr. C. Gwinner, D.S.O., D.S.C., in *Affleck* in company with *Gore* and *Garlies*. On March 1st, 1944, *Gould* was hit by a torpedo and sank with the loss of seven officers, including Lt. Ungoed, and 116 ratings. *Gore* sighted and depth-charged a German submarine which she forced to the surface. All the ships of the patrol then opened fire on the submarine destroying her conning tower and gun, after which she disappeared, 14 survivors being picked up. Shortly afterwards a second submarine was sighted and depth-charged by the patrol and compelled to surface. The concentrated fire of the British ships, but chiefly that of *Affleck*, broke the submarine's back and she sank, one survivor being picked up.

GOVERNEUR GENERAL LAFERRIERE

Etablissements A. Klaguine; 1923; Forges & Chantiers de la Mediterranee; 3,453 tons; 344-5x44-5x21-8; turbine engines. The French steamship *Gouverneur General Laferriere* was sunk by gunfire during the Allied attack on Oran on November 8th-9th, 1942.

GOVERNEUR GENERAL PASQUIER

Soc. les Affreteurs Maritimes; 1906; Nederlandsche Scheepsbouw Maats.; 1,994 tons; 296-3x38x20-9; 229 n.h.p.; triple-expansion engines.

The French steamship *Gouverneur General Pasquier* struck a mine and sank in May, 1943, near Hongay, Indo-China.

GOVERNOR

Admiral Line; 1907; New York S.B. Co.; 5,474 tons; 391-9X48-2x19-7; 679 n.h.p.; triple-expansion engines. On a voyage from San Francisco to Seattle with passengers and general cargo, the American ship *Governor* was in collision off Port Townsend on April 1st, 1921, and sank. Three of the crew and seven passengers were reported missing.

GOVERNOR FENNER

Andrews Bros.; 1831; New York; 500 tons. The American sailing ship *Governor Fenner* left Liverpool on Friday, February 19th, 1841, for New York with 400 tons of iron. She was under command of Capt. Andrews and carried 125 persons, of whom 107 were passengers, mostly emigrants. At about 2 o'clock on the morning of the next day the ship was 15 miles W. of Holyhead in calm weather but thick fog, when she ran into the paddle steamer *Nottingham*. The impact was so violent that the bows of the *Governor*

or *Fenner* were stove in and she filled and sank. Mr. Carter, the first officer, was in charge of the ship and he called the captain as soon as the *Nottingham* was sighted, but a collision was inevitable and both officers barely escaped with their lives, jumping on to the steamer as their own ship went down beneath them.

Of the company on board the *Governor Fenner* 123 were drowned, the captain and the first officer being the only survivors.

The *Nottingham* was struck on the starboard side, her paddle box, wheel and wheel shaft being shattered, her starboard engine wrecked and her funnel knocked overboard. Beside passengers she carried over 100 cattle and sheep, many of which were killed by the impact, while the remainder were thrown overboard to clear the vessel. She managed to get into dock without further mishap.

GOVIKEN

Wallem & Co. A/S; 1917; Seattle Construction & Dry Dock Co.; 4,854 tons; 381-5x53-1x27; 472 n.h.p.; triple-expansion engines.

The Norwegian steamship *Goviken* was torpedoed and sunk by a German submarine on June 27th, 1942, on a voyage from Aden to Lourenco Marques. Thirteen lives were lost. Some of the survivors who were picked up by the British steamship *Mundra* were lost when that ship was sunk nine days later.

GOVINO

D. G. Pinkney & Son; 1878; J. Laing; 2,032 tons; 284-3x34x24-9; 200 n.h.p.; compound inverted engines. The steamship *Govino*, on a voyage from Antwerp to Buenos Aires, was wrecked on the English Bank, near Montevideo, on October 7th, 1881.

GOVINO

W. & T. W. Pinkney; 1882; J. Laing; 2,279 tons; 287-8x37-4x27-3; 190 n.h.p.; compound engines. The British cargo ship *Govino* foundered 400 miles east of Newfoundland on December 11th, 1898. She was on a voyage in ballast from Leith to Baltimore.

GOWANBURN

R. Shankland & Co.; 1886; J. Scott & Co.; 2,079 tons; 289-1X42-2x23-7.

The steel four-masted barque *Gowanburn*, Capt. W. Gerhardt, left Newcastle, Australia, on February 15th, 1893, for San Francisco with a cargo of 2971 tons of coal. On the 22nd, a week after sailing, a large four-masted barque was sighted off Awakino, the weather being fair at the time. Next day a gale sprang up and shortly afterwards wreckage from the *Gowanburn* was washed ashore on Awakino beach. This was the only trace of the ship found, except for two lifebuoys bearing her name and port of registry, Greenock.

She was lost in the same series of gales which sank the *Northern Star* (which see).

GOWER COAST

Powell, Bacon & Hough Lines; 1899; Dundee Shipbuilders Co.; 804 tons; 198-1x30-2x13-1; 98 r.h.p.; 9 knots; triple-expansion engines.

The steamship *Gower Coast* left the Tyne on March 31st, 1917, for Treport, with coal. She was last seen in Boulogne Roads on April 4th, and was probably sunk through striking a mine. She had a crew of 15.

GOYA

A/S J. Ludwig Mowinckels Rederi; 1942; A/S Akers Mek. Verksted; 5,230 tons; 430x57x—; 1,659 n.h.p.; oil engines. The motorship *Goya* was launched in 1940 to the order of Norwegian owners and taken over by the Germans on completion. On April 16th, 1945, she was torpedoed and sunk by a Russian submarine N. of Rexhøft, while taking part in the evacuation of refugees from East Prussia.

GOYO MARU

Goyo Shosen K.K.; 1938; Kawasaki Dockyard Co.; 8,469 tons; 443 X 60x40; 833 n.h.p.; turbine engines.

The tanker *Goyo Maru* was torpedoed and sunk by the U.S. submarine *Tambor* on February 3rd, 1944, about 150 miles E. of Nantien, China.

GOZAN MARU

GOZAN MARU

KuribayashiShosen K.K.; 1919; *Ishikawajima S.B. Co.*; 3,213 tons; 305x43-7x27-2; 279 n.h.p.; triple-expansion engines. On March 30th, 1944, the *Gozan Maru* was attacked by U.S. carrier-based aircraft and sunk off Babelthup, Palau Islands.

GRACE

Standard Commercial S.S. Corp.; 1912; *Harlan & Hollingsworth Corp.*; 1,861 tons; 229x39-1x28-8; 150 n.h.p.; triple-expansion engines.

The American cargo ship *Grace* was sunk by a submarine in the Mediterranean on July 18th, 1917.

GRACE DARLING

R.Richardson; 1864; *Prince Edward Island*; 381 tons; 126x29-6x15-1.

The barque *Grace Darling*, with a crew of 14, ran ashore at St. Combs, near Fraserburgh, on, or about March 5th, 1874. All on board were drowned.

GRACIE FIELDS

Southampton, Isle of Wight & S. of England Royal Mail Steam Packet Co.; 1936; *J. I. Thornycroft & Co.*; 393 tons; 195-9 X 24-9x8; 185 r.h.p.; 17 knots; compound engines. The paddle steamer *Gracie Fields* was taken over by the Admiralty at the beginning of the Second World War for service as a minesweeper. On May 29th, 1940, when engaged in the task of evacuating the British Army from the Dunkirk beaches the *Gracie Fields* was sunk by German aircraft.

The full story of the Dunkirk evacuation is told under the destroyer *Grafton*.

GRACIOSA

1890; *Russell & Co.*; 2,276 tons; 279-4x41-9x24-4. The German sailing ship *Margretha* was requisitioned by the Portuguese Government and renamed *Graciosa*. Subsequently she was shelled and sunk by a German submarine off the north-west coast of Scotland on August 24th, 1918.

GRACIOSA

Skibs A/S Fjeld; 1917; *Clyde S.B. & Eng. Co.*; 1,773 tons; 265-2x42-2x17-8; 214 n.h.p.; triple-expansion engines. The Norwegian steamship *Graciosa* caught fire at Bombay on April 14th, 1944. There was an explosion, and she was still burning eight days later. It was impossible to extinguish the fire and the ship was entirely gutted.

GRAFFOE

E. Morgan & Co.; 1892; *Furness, Withy & Co.*; 2,996 tons; 314x40-5x21-2; 239 n.h.p.; triple-expansion engines. The British cargo ship *Graffoe* foundered off Ramsey Island, St. George's Channel, on January 27th, 1903, having struck a rock when her steering gear failed. She was carrying a cargo of coal on a voyage from the Clyde to Buenos Aires.

GRAFTON

British Navy, destroyer; 1935; *Thornycroft & Co.*; 1,335 tons; 323x33x8-5; 34,000s.h.p.; 35-5 knots; turbine engines; 3-drum boilers; four 4-7 in. guns, 7 smaller, 8 T.T. The destroyer *Grafton*, Cdr. C. E. Robinson, was engaged in the fighting along the Dutch, Belgian and French coast, commencing with the invasion of the Low Countries by the Germans on May 10th, 1940. From this date to June 3rd, when the evacuation of the British Army from Dunkirk was completed, there was bitter fighting at sea, mostly between destroyers of the Allied navies and German dive-bombers. A large force of British ships, chiefly destroyers, minesweepers and minelayers, operated off the coast of Holland conveying steamships laden with refugees to England and sweeping channels and laying minefields to protect the area from attacks by enemy surface craft. This work was combined with giving artillery support to the left flank of the army by bombarding places

along the coast as they fell into German hands and also in maintaining an anti-aircraft barrage. It was almost solely a task for smaller ships and was carried out at great cost to the flotillas concerned. The enemy accomplished his subjection of Holland in the very short space of four days, during which time the Dutch managed to withdraw most of their navy from various ports to England. The same thing occurred in the case of the very considerable Dutch mercantile marine, which was augmented by 26 German vessels which had been sheltering in Dutch harbours and automatically became prizes of war. This accession of naval strength to the Allies more than counterbalanced their losses, grievous though they were.

The chief units of the Royal Netherlands Navy to come to England were the cruisers *Sumatra*, 6,670 tons, *Tromp*, 3,350 tons, and the *Heemskerck*, 3,350 tons, the last named ship being taken in tow as she was not completed. Two cruisers of 8,350 tons on the building slips at Rotterdam were blown up before the Dutch quitted the city. In addition the East Indies Squadron consisted of the cruisers *De Ruyter*, 6,450 tons, and *Java*, 6,670 tons, as well as the old battleship *Soerabaja*, 5,644 tons, and many destroyers and submarines.

The Dutch losses in the withdrawal comprised the destroyer *Van Galen*, 1,316 tons, the sloop *Johan Maurits van Nassau*, 1,520 tons, the minelayer *Hydra*, 593 tons, and the gunboats *Frisco* and *Brinio*, 540 tons, besides several smaller craft.

The next mischance to befall the Allied land forces was the surrender of the Belgian Army on May 28th, and the retreat of the British to Dunkirk. The latter event, so ominous at the time, has come to be regarded as one of the triumphs of sea power whereby an army of 338,682 officers and men was transported in safety back to its home base despite the loss of nearly all its defensive and offensive equipment.

About the middle of May the Admiralty had completed a survey of all the motor boats, yachts and other small craft lying in harbours round the coast of Britain, and this information proved invaluable in the next few weeks. The weather was fine and the sea very calm and under these conditions a huge armada composed in the first place of 222 destroyers, minesweepers, sloops and other small naval craft, together with 665 yachts, ferries, motorboats and all the odds and ends which may be found lying in any average harbour round the coast, commenced to ply between the sands of Dunkirk and south-eastern England in a continuous stream. The adventure was not without its perils despite the fine weather, for the German Air Force was constantly over the beaches and over the crowded shipping. Nevertheless the army was evacuated with an extremely small loss, and at 10.30 p.m. on June 3rd the nation heard with relief the news that the embarkation was completed. Vice-Admiral Bertram Ramsay, who superintended the whole complex operation, was knighted for his services.

At about 11 p.m. on May 28th, *Grafton*, in company with the destroyer *Wakeful*, the danlayer *Comfort* and the minesweeper *Lydd*, left for Dover with troops. The vessels were steaming at 20 knots when at 12.45 a.m. on the 29th, they were attacked by a force of German torpedo boats which torpedoed *Wakeful*, which broke in two and sank with nearly 600 troops. *Grafton* stopped and was lowering her boats when she was torpedoed. Some confusion occurred owing to the arrival of *Comfort* at full speed, *Grafton* mistaking her for an enemy and firing into her and killing most of her crew. The Germans were also firing their light guns, a shell from which struck *Grafton's* bridge and killed Cdr. Robinson.

In addition to the Dutch ships already mentioned the losses sustained off the coasts of the Low Countries and France during the three weeks from May 10th to June 3rd were as follows:—

BRITISH DESTROYERS

DUTCH AND FRENCH COAST

<i>Valentine</i>	900 tons	May 15th, 1940
<i>Whitley</i>	900 +,,	„ 20th „,
<i>Wessex</i>	1,100 „	„ 25th „,

BRITISH MINESWEEPERS

Skipjack 815 tons June 1st, 1940
Brighton Belle; *Brighton Queen*; *Grade Fields*; *Medway Queen*;
Waverley; *Crested Eagle* (all paddle-steamers).
King Orry; *Moncfs Isle* (ex-Isle of Man steamships).

In addition there were eight trawlers, five smaller vessels and the gunboat *Mosquito*.

GRAIGWEN

Graig Shipping Co.; 1926; *R. Duncan & Co.*; 3,697 tons; 365 x 51 • 5 X 23; 392 n.h.p.; triple-expansion engines. The steamship *Graigwen*, on a voyage from Montreal to Barry, was torpedoed and sunk by a German submarine on October 9th, 1940, about 250 miles W. of the Hebrides. Seven of her crew were killed.

GRAN

Wilson & Morland; 1907; *Bergens Mek. Verks.*; 1,153 tons; 229 - 1x35 - 1x15 - 9; 106 n.h.p.; triple-expansion engines. The Norwegian cargo ship *Gran* struck a mine and sank in the North Sea on May 23rd, 1917.

GRANBY

R. Ropner & Co.; 1895; *Ropner & Son*; 1,891 tons; 270x39- 5 x 14-1; 152 n.h.p.; triple-expansion engines. The British cargo ship *Granby* was wrecked near Porto Alegre on July 31st, 1895, while on a voyage in ballast from Imbetiba to Buenos Aires.

GRANDCAMP

French Government; 1942; *California Shipbuilding Corp.*; 7,176 tons; 422-8x57x34-8; triple-expansion engines. The steamship *Grandcamp* caught fire and blew up on April 16th, 1947, while loading ammonium nitrate at Texas City. The explosion set fire to the steamship *Highflyer*, lying alongside loading a similar cargo and she also blew up. This in turn destroyed the steamship *Wilson B. Keene*, tearing away the hull of the ship above the water-line. These explosions destroyed about one third of the port of Texas City, killing some 500 people, and injuring about 3,000.

GRANE

Schjelderup & Schjott; 1899; *Bergens Mek. Verks.*; 1,122 tons; 231 • 1X33 - 2X13 - 7; 97 n.h.p.; triple-expansion engines. The Norwegian cargo ship *Grane* was torpedoed and sunk by a German submarine in the English Channel on March 9th, 1918.

GRANGE

The Carron Co.; 1892; *Wigham Richardson & Co.*; 1,519 tons; 280 x 36 - 2x17 - 7; 622 n.h.p.; triple-expansion engines. The British cargo ship *Grange* foundered in the North Sea on December 31st, 1908. She was carrying passengers and a general cargo on a voyage from Grangemouth to London.

GRANGEMOUTH

G. Gibson & Co.; 1908; *Grangemouth & Greenock Dkyd. Co.*; 1,419 tons; 275-2x36-1x17-3; 310 n.h.p.; triple-expansion engines. The British cargo ship *Grangemouth* sank after a collision with the *Sudanese* on March 22nd, 1939. She was in 53° 50' N., 0° 20' E., on a voyage from Antwerp to the Tees carrying a general cargo.

GRANICOS

Granicos S.S. Co.; 1916; *W. Gray & Co.*; 3,689 tons; 360- 2 x 51x22- 7; 378 n.h.p.; triple-expansion engines. The Greek steamship *Granicos* was torpedoed and sunk by an Italian submarine on March 28th, 1943, 300 miles S. of Monrovia on

a voyage from Rio de Janeiro to Freetown. Thirty of her crew were lost, one survivor was taken on board the submarine and another picked up later by the motorship *Leigh-ton*.

GRANLI

A/S Granli; 1935; *Nylands Verksted*; 1,577 tons; 247-5X 39-2x17-4; 142 n.h.p.; compound engines. The Norwegian steamship *Granli* was intercepted by a German warship and sunk by gunfire about 350 miles E. of Cape Race on March 16th, 1941. The survivors of her crew were taken prisoner.

GRANTA

Witherington & Everett; 1927; *Smith's Dock Co.*; 2,719 tons; 305x45-5x21-3; 266 n.h.p.; 9-5 knots; triple-expansion engines. The steamship *Granta*, Capt. L. A. Sixt, was in convoy in the North Sea off Cromer on January 12th, 1940, when she struck a mine and sank. Twelve of her crew were killed and one wounded. Capt. Sixt was among the survivors.

GRANTOR

John Holman & Sons; 1896; *Furness, Withy & Co.*; 2,936 tons; 315 x 43x18-1; 246 n.h.p.; triple-expansion engines. The British cargo ship *Grantor* was wrecked at Boavista, Cape Verde Islands, on March 31st, 1897. She was on a voyage from Cardiff to Santos carrying a cargo of coal.

GRANVILLE

U.S. Maritime Commission; 1913; *W. Gray & Co.*; 4,071 tons; 350X50x25-3; 314 n.h.p.; triple-expansion engines. The Panamanian steamship *Granville* was torpedoed and sunk by a German submarine on March 17th, 1943, 900 miles S.W. of Cape Farewell on a voyage from New York to Iceland. Twelve of her crew were lost.

GRASSHOPPER

British Navy, gunboat; 1938; *J. I. Thorny croft & Co.*; 585 tons; 197x33x5; 3,800 s.h.p.; 17 knots; turbine engines; two 4 in. guns, one 3-7 in. howitzer, 8m.g. The gunboat *Grasshopper* was endeavouring to escape from Singapore but was intercepted by Japanese dive-bombers on February 14th, 1942, driven ashore on Siampeng Island, Sumatra, and became a total wreck. The vessel carried a complement of 74.

GRATIA

J. Jost; 1905; *Eiderwerft Akt. Ges.*; 2,068 tons; 274X39-7X 15-8; 139 n.h.p.; triple-expansion engines. The German steamship *Gratia* broke in two and sank during a storm on January 17th, 1940, of TBorkum.

GRAVENSTEIN

H. C. Horn; 1906; *Burmeister & Wain*; 3,505 tons; 369x47-5x 23-5; 380 n.h.p.; triple-expansion engines. The German steamship *Gravenstein* was bombed and sunk by Russian aircraft on March 27th, 1945, at Gdynia.

GRAVINA

Larrinaga & Co.; 1878; *A. Leslie & Co.*; 618 tons; 190x26-1x 16; 115 n.h.p.; compound engines. The Spanish passenger steamship *Gravina* with a large number of passengers on board was lost in a cyclone off the Philippines on May 22nd, 1895. From a total of 171 passengers and crew only three were saved.

GRAVINA

R. Mac Andrew & Co.; 1886; *J. Readhead & Co.*; 1,242 tons; 227 x 32 • 1 X14; 124 n.h.p.; 9 knots; triple-expansion engines. The steamship *Gravina*, bound from Seville to London, with fruit, was torpedoed and sunk by a German submarine 85 miles W. of Fastnet on February 7th, 1917. Seven men were killed and the captain and 14 others taken prisoner.

GRAY RANGER

The Admiralty; 1941; *Caledon S.B. & E. Co.*; 3,313 tons; 339-7x48-3x22-6; 598 n.h.p.; oil engines. The tanker *Gray Ranger*, on a voyage from North Russia in ballast,

GRAYBURN

was torpedoed and sunk by a German submarine on September 22nd, 1942, midway between Jan Mayen Island and Iceland. There were 21 survivors.

GRAYBURN

Wallem & Co.; 1938; Sir J. Laing & Sons; 6,342 tons; 453-2X 63 • 7 x 27; 525 n.h.p.; triple-expansion engines. The steamship *Grayburn*, on a voyage from Baltimore to Swansea, was torpedoed and sunk by a German submarine on June 29th, 1941, about 400 miles S. of Iceland. Thirty-five of her complement of 53 were lost.

GRAYFIELD

Evan Jones & Co.; 1900; W. Gray & Co.; 2,121 tons; 291 X 42-1x19-2; 215 n.h.p.; triple-expansion engines. The British cargo ship *Gray field* was wrecked on Robin Rigg, near Maryport on November 22nd, 1906, while on a voyage from Poti to Maryport carrying a cargo of iron ore.

GRAZIA

Giovanni Gavarone; 1923; Cantieri Cerusa; 5,857 tons; 394 -3X 51-8x28-4; 338 n.h.p.; triple-expansion engines. The Italian steamship *Grazia* struck a mine and sank on November 19th, 1939, five miles N. of the North Foreland on a voyage from the Tyne to Servola with coal.

GRAZIELLA

Dampskirtsk. Garonne; 1917; Osbourne, Graham & Co.; 2,757 tons; 285x43-3x!9; 196 n.h.p.; triple-expansion engines. The Norwegian steamship *Graziella*, under German control, was bombed and sunk by British aircraft on September 16th, 1943, off the Norwegian coast between Stavanger and the Naze.

GREAT DUKE

American sailing ship; 1845 (circa); 2,000 tons. The American sailing ship *Great Duke* was on a voyage from New Orleans to Liverpool with a cargo of 4,500 bales of cotton, together with other goods. The ship was under command of Capt. Sampson and carried a crew of 32. On February 21st, 1856 she was driven on to the rocks of St. Gowan's Head, near Milford Haven in a violent S.S.W. gale. The heavy seas soon pounded the ship to pieces. The only survivors were the first officer and two seamen.

GREAT LIVERPOOL

Peninsular & Oriental Steam Navigation Co.; 1838; Humble & Milcrest; 1,540 tons; 240 X 56 (overpaddle boxes) X 21; 468 n.h.p.; 12 knots; side lever engines.
The wooden paddle steamer *Great Liverpool*, Capt. MacLeod, was one of the ships purchased from the Atlantic trade by the P. and O. company to form its first fleet. Though not very large she was highly thought of by her new owners, and her loss began a brief but disheartening succession of disasters for the P. and O.
On February 24th, 1846, at about 4 a.m., the ship was between Corcubion and Cape Finisterre, steaming at ten knots through dark and hazy weather with a rough sea. She struck on a reef and sustained heavy damage below the waterline, but managed to steam for some distance until the rising water swamped her fires. She drifted at the mercy of the seas toward Corcubion, finally going ashore about one and a half miles from that place. The boats were launched and all on board, with the exception of two women and a child who were drowned in the capsizing of a boat, came safely to shore. The whole of the mail was also saved.

GREAT NORTHERNER

Fernie Bros.; 1858; Muirhead & Co.; 1,461 tons; 183 X 35 -6x

The wooden sailing ship *Great Northerner* was employed in the Liverpool-India trade for about ten years. In 1869 she was lost off Bombay, going down with 16 of her crew.

GREAT QUEENSLAND

Taylor, Bethell & Roberts; 1852; Mare & Co.; 1,794 tons; 253-7x38-9x25-7. The loss of the wooden sailing ship *Great Queensland* was probably

the worst disaster in the history of Australian emigration. The vessel left London for Melbourne early in August, 1876, under Capt. Holden. She carried 569 passengers and crew; a very large number for a ship of such moderate tonnage. She had a general cargo, two items of which were patent gunpowder and ordinary gunpowder.

On August 12th, in the neighbourhood of Cape Finisterre, a tremendous explosion occurred at sea. This was later assumed to have come from the *Great Queensland*, as pieces of wreckage thought to have belonged to her were afterwards washed ashore along the French coast. No other traces of the ship were ever found.

A subsequent examination of patent gunpowder similar to that carried by the emigrant ship found it to be impure.

GREAT REPUBLIC

American, sailing ship; 1853; Donald McKay; 4,555 tons; 325 X 53 X 38; steam engine for heavy work.

The *Great Republic* came from the yard of the famous American firm of Donald McKay, and was the largest sailing ship built in the nineteenth century. Her mainmast was 250 feet in height and her main yard 120 feet in length, with other masts and yards in proportion. She was intended for the Australian trade in which the Americans hoped to outclass their British competitors. On both sides of the Atlantic keen interest was evinced in the progress of the ship, columns being devoted by the press of both countries to details of her launch and fitting out. The ship was rigged at New York, where she took on board her first cargo, consigned to Liverpool. On December 20th, 1853, shortly before sailing, a disastrous fire broke out in Front Street, near to the East River quays and docks where the *Great Republic* was lying. The fire spread among the wooden buildings with amazing speed and the yards and rigging of the sailing ship caught fire, the burning yards falling to the deck and igniting the hull, which burned to the holds and set fire to the cargo, after which the hulk was scuttled.

Two other ships lying close to the *Great Republic* were also set on fire and totally destroyed. These were the *White Squall*, a famous clipper of the fifties, and the *Joseph Walker*. The *White Squall* came adrift from her moorings and floated up river a mass of flames, and a dreadful danger to other shipping, which fortunately managed to avoid her.

The *Great Republic* was valued at 300,000 dollars and her cargo at a like amount; the *White Squall* was valued at 100,000 dollars and her cargo at 45,000, while the *Joseph Walker* stood at 95,000 for ship and cargo. The dock buildings which were burned accounted for a further 100,000 in round figures, and the whole loss amounted to 940,000 dollars.

The charred hulk of the *Great Republic* was afterwards raised and cut down from four decks to three, and her masts and sail area reduced accordingly. Thus ended the first experiment with large sailing ships, and it was not until the early twentieth century, when vessels like the *Preussen* (which see) and the *Thomas W. Lawson* (which see) were launched that the very big sailing ship once more appeared. They were dogged by the same ill fortune that attended the *Great Republic*, and in any case were not meet rivals for steam.

GREAT REPUBLIC

New York-Pacific Mail Steamship Co.; 1866; Henry Steers & Co.; 4,750 tons; 380x47 (79 over paddles) x 31-5; 10 knots; vertical beam engine.

The paddle steamer *Great Republic* was unusually large for the time and was constructed of white oak and chestnut. With her sister ships *America*, *China* and *Japan*, she was to establish a trans-Pacific service between San Francisco, Yokohama and Hong Kong. Her passenger capacity was for 150 cabin passengers, with 1,200 in the steerage. After several years on the Pacific run she was badly strained in a storm and was withdrawn and placed in the coastal trade, plying between San Francisco and Portland, Oregon.

On April 16th, 1879, the *Great Republic* left San Francisco with nearly 600 passengers, bound for Portland, and on the night of the 19th arrived off the Columbia River. The sea was calm and the weather clear so that the crossing of the bar presented no difficulties, nevertheless she went heavily aground and it became necessary to take to the boats. Nearly all of her company were landed in safety, but one boat containing the first and second officers and 12 members of the crew capsized and all were drowned. The weather then began to freshen and within a few days the wreck went to pieces.

GREATEND

Newbiggin S.S. Co.; 1920; J. I. Thornycroft & Co.; 1,495 tons; 240 • 4 X 36-1X16-3; 178 n.h.p.; triple-expansion engines. The British steamship *Greatend* was bombed and sunk by Insurgent aircraft on May 28th, 1938, at Valencia, during the Spanish Civil War. The ship had been damaged in previous raids on Valencia on May 7th and 13th.

GREATHAM

Coombes, Marshall & Co.; 1890; W. Gray & Co.; 2,338 tons; 290X38-1 x20 • 3; 210 n.h.p.; 9 knots; triple-expansion engines. The steamship *Greatham* was torpedoed and sunk by a German submarine three miles S.E. of Dartmouth on January 22nd, 1918. Seven men were killed. The captain was among the survivors.

GREAVESASH

Newbiggin S.S. Co.; 1917; C. Remoldson & Co.; 1,263 tons; 235-5x36-1x14-2; 167 n.h.p.; 10 knots; triple-expansion engines. The steamship *Greavesash* was torpedoed and sunk by a German submarine ten miles N.E. of Cape Barleur on February 26th, 1918. Eight of her crew were killed. The captain was among the survivors.

GRECIAN

Allan Line S.S. Co.; 1879; W. Doxford & Sons; 3,481 tons; 360'5x40-1x22-8; 432 n.h.p.; compound engines. The British iron steamship *Grecian* was wrecked on February 9th, 1902, at Sandwich Point, seven miles south-east of Halifax, N.S., while on a voyage to that port from Liverpool.

GRECIAN

Merchants & Miners Transportation Co.; 1900; Harlan & Hollingsworth Co.; 2,827 tons; 265x42x36; 300 n.h.p.; triple-expansion engines. On a voyage from Boston to Philadelphia the American steamship *Grecian* collided in fog with the *City of Chattanooga* on May 27th, 1932. She sank near the Block Island S.E. light.

GREENBRIER

Coast S.S. Co.; 1893; Furness, Withy & Co.; 3,331 tons; 345X 41-2x18-6; 445 n.h.p.; triple-expansion engines. The American cargo ship *Greenbrier* struck a mine and sank in the North Sea on April 2nd, 1915.

GREENLAND

Currie Line; 1914; Henry Koch; 1,281 tons; 241-1x36-2x 15-6; 162 n.h.p.; 12 knots; triple-expansion engines. The steamship *Greenland*, Capt. D. Moar, struck a mine and sank on December 6th, 1941, while in convoy off the East Coast, near Aldeburgh. Ten of her crew were killed. Capt. Moar was among the

GREENVILLE

Worldwide S.S. Co.; 1920; Craig, Taylor & Co.; 6,323 tons; 412-2x55x33-5; triple-expansion engines. The Liberian ship *Greenville* reported that she had a 15 degree list during a gale on September 20th, 1953, in an approximate latitude 50° N., longitude 22° 50' W. She was abandoned on the next day in a sinking condition and most of the crew were rescued.

GREGOR

1895; Germaniawerft; 3,969 tons; 355-1x43-6x25-6; 365 n.h.p.; triple-expansion engines. The *Gregor* was a German ship seized by the Russians at Odessa in 1914. On February 11th, 1920, she was being towed from Odessa to an unstated destination when she broke from tow and stranded nine miles W. of the Bosphorus. Some 200 British refugees were on board, most of whom were taken off.

GREGORY

United States Navy, destroyer; 1919; Bethlehem S.B. Corp.; 1,190 tons; 314x30x10; 26,000 s.h.p.; 35 knots; turbine engines; four 5 in. guns, one 3 in., 12 T.T. The United States destroyer *Gregory*, with her sister ship the *Little*, was engaged in escorting convoys to Guadalcanal through the dangerous Ironbottom Sound. Strong forces of Japanese light

cruisers and destroyers made frequent raids into the sound during darkness, and on the night of September 5th, 1942, both United States destroyers were attacked and sunk. Their normal complement was 122.

GREIF

Deutsche--Australische Dampfs. Ges.; 1914; Akt. Ges. Neptun; 4,900 tons; 418 x54x26-8; 15 knots; triple-expansion engines; four 5-9 in. guns, 2 T.T. The steamship *Greif*, formerly *Guben*, was taken over by the German Admiralty in the First World War for service as a commerce raider. On February 28th, 1916, she was in the Skagerrak making for open sea. The British auxiliary cruiser *Alcantara*, 15,831 tons, eight 6 in. guns, Capt. T. E. Wardle, was wamed to be on the look-out for her, and at 6.45 on the morning of the 29th the two ships met.

The *Greif* was disguised as the *Rena*, with Norwegian colours painted on her sides. She stopped at a distance of 1,000 yards to allow a boarding boat from the *Alcantara* to approach, and then lowered her bulwarks and opened fire. The full story of the action, in which both ships were sunk, is told under the *Alcantara*.

GREIF

German Navy, torpedo boat; 1926; Wilhelmshaven Yard; 800 tons; 277-7x27-5x9-2; 24,000 s.h.p.; 33 knots; turbine engines; Schulz-Thornycroft boilers; three 4 • 1 in. guns, two 1 pdr., 6 T.T. The torpedo boat *Greif* was bombed and sunk by British aircraft in Seine Bay on May 24th, 1944. The vessel's complement was about 130.

GREKLAND

Angf.Aktieb. Tirfing; 1905; J. Blumer & Co.; 2,744 tons; 314 X 46-5x20-7; 257 n.h.p.; triple-expansion engines. The Swedish cargo ship *Grekland* was torpedoed and sunk by a German submarine in the North Sea on June 29th, 1918.

GRELDON

Dulcia S.S. Co.; 1903; Richardson Duck & Co.; 3,322 tons; 325 X 47x22-7; 280 n.h.p.; 9 knots; triple-expansion engines. The steamship *Grelton* was torpedoed and sunk by a German submarine seven miles E.N.E. of North Arklow lightship on October 8th, 1917. The captain and 27 of her crew were killed.

GRELEEN

Haenton Shipping Co.; 1894; Harland & Wolff; 2,286 tons; 313X38-2x22-4; 245 n.h.p.; 9 knots; triple-expansion engines. The steamship *Greleen* was torpedoed and sunk by a German submarine seven miles E. by N. of Berry Head on September 22nd, 1917. Nineteen men, including the captain, were killed.

GRELHEAD

Cardigan Shipping Co.; 1915; Richardson, Duck & Co.; 4,274 tons; 380x51x24-8; 395 n.h.p.; triple-expansion engines. The steamship *Grelhead*, on a voyage from Melilla to the U.K., was torpedoed and sunk by a German submarine at midnight on December 1st, 1941, two miles off Punta Negri. Thirty-five of her crew of 37 and all six gunners were lost.

GRELROSA

Cardigan Shipping Co.; 1914; Northumberland S.B. Co.; 4,574 tons; 385X 51 -9x27-1; 320 n.h.p.; triple-expansion engines. The steamship *Grelrosa*, in convoy from New York to the Tyne, straggled from convoy in bad weather and was bombed and sunk by a German aircraft on January 28th, 1941, about 400 miles W. of Malin Head. Five of her crew were killed.

GREMYASHCHI

Russian Navy, gunboat; 1893; New Dockyard, Leningrad; 1,700 tons; 225x41x11; 2,000 i.h.p.; 14-5 knots; triple-expansion engines; one 9 in. gun, one 6 in., four 12 pdr., six 3 pdr., 4 m.g.; 2 T.T.

The gunboat *Gremyashchi* was mined and sunk about two and a half miles from the Lao-tieh-Shan lighthouse, on August 18th, 1904. At the time the vessel, in company with some destroyers, was escorting the French steamship *Georges*, bringing despatches from

GRENA

the Viceroy, Admiral Alexieff, and the Commander-in-Chief, General Kuropatkin.

Of the *Gremyashchfs* complement of 188 officers and men, eight stokers were drowned. The vessel sank in a very few minutes.

GRENA

A/S J. Ludwig Mowinckels Rederi; 1934; Gotaverken A/B; 8,117 tons; 455-5x59-2x35-9; 653 n.h.p.; oilengines. The Norwegian tanker *Grena* was torpedoed and sunk by a enemy submarine on March 21st, 1944, between Aden and Abadan.

GRENADE

British Navy, destroyer; 1935; A. Stephen & Sons; 1,335 tons; 323x33x8-5; 34,000 s.h.p.; 35-5 knots; turbine engines; 3-drum boilers; four 4•7 in. guns, 7 smaller, 8 T.T. The destroyer *Grenade*, Cdr. R. C. Boyle, was bombed and set on fire in Dunkirk harbour on May 29th, 1940, when taking part in the evacuation of the British Army. A trawler took the burning *Grenade* in tow to prevent her from blocking the fairway, but it was not possible to do more than this and she foundered shortly afterwards.

The official complement of *Grenade* was 145, but the exact number of troops and crew on board at the time is not known.

The full story of the Dunkirk evacuation is told under the destroyer *Grafton*.

GRENADIER

Tyne-Tees S.S. Co.; 1895; Wigham Richardson & Co.; 1,004 tons; 240 x 30 -2 x 14 - 7; 181 n.h.p.; 9 knots; triple-expansion engines. The steamship *Grenadier* was torpedoed and sunk by a German submarine six miles E.N.E. of the Shipwash lightship on February 23rd, 1917. The captain and seven of her crew were killed.

GRENVILLE

British Navy, destroyer; 1935; Yarrow & Co.; 1,485 tons; 327x 34-5x8-7; 38,000 s.h.p.; 36 knots; turbine engines; 3-drum boilers; five 4 - 7 in. guns, 7 smaller, 8 T.T.

The destroyer *Grenville*, Capt. G. E. Creasy, M.V.O., was mined and sunk in the North Sea on January 19th, 1940. The ship carried a complement of 190 of whom 81 officers and ratings were killed. Capt. Creasy was among the survivors.

GRETAFIELD

Northern Petroleum Tank S.S. Co.; 1928; Cammell Laird; 10,191 tons; 500-2x67-9x36-9; 874 n.h.p.; 11-5 knots; quadruple-expansion engines & L.P. turbine.

The tanker *Gretafield*, Capt. E. Derricks, was torpedoed 12 miles E. of Wick, on the N.E. coast of Scotland, on February 14th, 1940. The vessel caught fire and of the 41 men who formed the crew 11 were killed, the survivors being taken off by trawlers. The *Greta-field* was navigated as far as the coast, where she was beached and remained blazing for several days. Capt. Derricks was among the survivors.

Two other vessels were sunk round about the same time in this vicinity and later the Admiralty announced that two German submarines probably concerned in the sinkings had been destroyed within a few hours of the attack.

GRETASTON

W. S. Miller & Co.; 1901; W. Gray & Co.; 3,395 tons; 331 x 47-2x24-7; 268 n.h.p.; triple-expansion engines. The British ship *Gretaston* was sunk by the German minelayer *U.C. 72* on April 30th, 1917, in 45° 26' N., 1° 37' W. The captain and 28 of the crew were killed.

GRETAVALE

Crawford Shipping Co.; 1928; Lithgows; 4,586 tons; 385x52x 26-6; 477 n.h.p.; triple-expansion engines.

The steamship *Gretavale*, on a voyage from Baltimore to Loch Ewe, was torpedoed and sunk by a German submarine at 11.50 p.m. on November 2nd, 1941, about 250 miles N.E. of the Belle Isle Strait. There were only five survivors of her crew of 42 and five gunners.

286

GRETE HUGO STINNES 8

Hugo Stinnes; 1911; Flensburger Schiffsb. Ges.; 1 551 tons; 243-3x37-7x17-7; 136 n.h.p.; triple-expansion engines. On a voyage from Hamburg to Danzig the German ship *Grete Hugo Stinnes 8* was wrecked N.N.E. of Rixhoff in January, 1916.

GREYHOUND

British Navy, destroyer; 1935; Vickers Armstrong; 1,335 tons; 323x33x8-5; 34,000 s.h.p.; 36 knots; turbine engines; 3-drum boilers; four 4-7 in. guns, 6 smaller, 8 T.T.

The destroyer *Greyhound*, Cdr. W. R. Marshall-A'Deane, D.S.O., D.S.C., A.M., was bombed and sunk on May 22nd, 1941, when acting with a force under Admiral King engaged in preventing the passage of an Italian convoy from Greece to Crete. The convoy was strongly protected by German dive-bombers which succeeded in hitting *Greyhound* at about 2 o'clock in the afternoon. The ship was off the island of Antikithera when she sank. Of her complement of 174 a I total of three officers and 88 ratings were picked up by the destroyers *Kandahar* and *Kingston*. Those killed numbered six officers, including Cdr. Marshall-A'Deane, and 74 ratings. Four ratings were picked up by the enemy and became prisoners of war. For further details of the action, see the cruiser *Fiji*.

GREYSTOKE

R. Ropner & Co.; 1885; E. Withy & Co.; 2,119 tons; 275-9X 37 • 3 x 19; 160 h.p.; triple-expansion engines. The British cargo ship *Grey stoke* was wrecked on Gross Vogelsand, near Cuxhaven, in December, 1892, while on a voyage from Odessa to Hamburg carrying a cargo of corn. All on board were drowned.

GRIESHEIM

Lehnkering & Cie., A.G.; 1920; F. Schichau; 4,998 tons; 361X 51-4x31-5; 344 n.h.p.; triple-expansion engines. Sailing from Narvik to Rotterdam with ore, the German ship *Griesheim* went aground on January 24th, 1937, S. of Bronnoy-sund, and broke in two.

GRIFFON

British Navy, steam gun vessel; 425 tons; 80 n.h.p.; steam engines; 5 guns.

The steam gun vessel *Griffon*, Cdr. D. G. Davidson, stranded after collision with the gun vessel *Pandora* at Little Popo at night in October, 1866. There was no loss of life, but the collision brought to a head the question of the navy's night signalling, which was extremely inefficient. Soon afterwards a system invented by Lt. P. H. Colomb, and based on the Morse Code, was introduced.

Nothing had been done to improve night signalling since the 18th century, and Colomb's system of easily read short and long flashes undoubtedly saved the navy from many serious accidents subsequently to 1867, when it first came into use.

GRIGORIOS ANGHELATOS

D. Anghelatos; 1897; W. Doxford & Sons; 3,635 tons; 351X 46 x 25; 282 n.h.p.; triple-expansion engines. The Greek steamship *Grigorios Anghelatos* was torpedoed and sunk by a submarine in the Mediterranean on December 5th, 1916.

GRIGORIOS C. II

P.G. Callimanopulos; 1919; C. Hill & Sons; 2,546 tons; 303 X 43x20-7; 265 n.h.p.; triple-expansion engines. The Greek steamship *Grigorios C. II* was intercepted by the German raider *Admiral Scheer* and sunk by gunfire on February 20th, 1941, W. of the Seychelles on a voyage from New York to Piraeus.

GRIMSBY

British Navy, sloop; 1933; Devonport Dockyard; 990 tons; 266x34x8-7; 2,000 s.h.p.; 16-5 knots; turbine engines; 3-drum boilers; two 4-7 in. guns, one 3 in., two 3 pdr., 10 m.g. The sloop *Grimsby*, Cdr. K. J. D'Arcy, was operating with the Eastern Mediterranean Fleet off the coast of Libya. On May 25th, 1941, she was bombed and sunk by enemy aircraft off Tobruk. Her normal complement was 100.

GRIMSEL

Cay, Hall & Co.; 1880; J. Readhead & Co.; 1,398 tons; 251 x 34-2x17-5; 130h.p.; compound engines.

The British cargo ship *Grimsel* was wrecked on Inchkeith on October 12th, 1889, while on a voyage from Salonica to Leith carrying a cargo of rye.

GRIPFAST

Newbiggin S.S.Co.; 1910; J. Crown & Sons; 1,109 tons; 225 x 35-6x13-6; 164 n.h.p.; triple-expansion engines. The steamship *Grip fast* was bombed and sunk by German aircraft on July 9th, 1942, S. of Prawle Point on a voyage from Barry to Sheerness. Five of her crew were killed.

GRO

Biørn Biørnstad & Co.; 1895; W. Hamilton & Co.; 2,667 tons; 309-7x42-6x20-5; 241 n.h.p.; triple-expansion engines. The Norwegian cargo ship *Gro* was torpedoed and sunk by a German submarine in the English Channel on August 22nd, 1917.

GRO

O. G. Olsen & I. H. Olsens Rederi A/S; 1917; J. L. Thompson & Sons; 4,211 tons; 352-2x50-9x26; 365n.h.p.; triple-expansion engines.

The Norwegian steamship *Gro* was torpedoed and sunk by a German submarine on September 7th, 1940, on a voyage from Montreal to Manchester, with the loss of 11 lives.

GROENLO

N.V. Stoomv. Maats. Noordzee; 1926; Boele & Co.; 1,948 tons; 275-3x41-2x18-6; 209n.h.p.; triple-expansion engines. The Dutch steamship *Groenlo* was a unit of Convoy FS 54, bound from Middlesbrough to London. On November 24th, 1941, when E. of Lowestoft, the convoy came under attack from German motor torpedo boats. The *Groenlo* was hit by a torpedo and sank with the loss of her crew.

GROM

Polish Navy, destroyer; 1936; J. S. White & Co.; 2,144 tons; 374x37x10-2; 54,000 i.h.p.; 39knots; turbine engines; 3drum boilers; seven 4 - 7 in. guns, four 47 mm., 4 m.g., 2 D.C.T., 6 T.T. The Polish destroyer *Grom*, together with many other Allied cruisers and destroyers, was engaged in escorting convoys of troops withdrawn from Norway on May 1st, 1940. The Germans made the most persistent attacks on the ships by bombers, the escort suffering severely. The *Grom* sank on the 3rd as a result of bomb hits, one officer and 65 ratings of her complement of about 200 being drowned. The British destroyer *Afridi*, 1,870 tons, and the French destroyer *Bison*, 2,436 tons, were also sunk in the fighting in these waters.

GROMKI

Russian Navy, destroyer; 1904; Nevski Works; 350 tons; 196-9x18-4x11-5; 5,700i.h.p.; 26 knots; triple-expansion engines; one 12pdr. gun, five 3pdr., 3 T.T.

The Russian destroyer *Gromki* was a unit of the 2nd Destroyer Flotilla of the Baltic Fleet at the battle of Tsu-Shima on May 27th, 1905. The ship came through the fighting of that day without damage and attached herself to the cruiser *Vladimir Monomach*, which was in a precarious state. Later she went to the assistance of the battleship *Sissoi Veliki*, but in neither instance would the captains of these two ships permit her to take off the crews. On the morning of the 28th, when it was evident that she could not be of further assistance, she sought her own safety from the gradually encircling Japanese. At about 9 a.m. she was sighted by the enemy destroyer *Shiranui* and torpedo boat No. 63. After a chase of two hours there was a determined engagement in which the *Gromki* had her boilers disabled, her guns put out of action one by one, her magazines flooded and two-thirds of her small complement of 62 killed or wounded. Despite so desperate a condition of affairs there was no thought of surrender and she continued to use her last gun, supplied by ammunition which had been collected on deck, until she sank.

The Japanese rescued about one-third of her crew.

GRONANT ROSE

R. Hughes & Co.; 1924; J. Fullerton & Co.; 1,110 tons; 220-5 X 34 - 2 X 13 - 2; 169 n.h.p.; triple-expansion engines. The British steamship *Gronant Rose* foundered off Pierres Vertes, Ushant, on September 27th, 1929. She was on a voyage from Cardiff to Brest carrying a cargo of coal.

GROOTEKERK

N.V. Vereenigde Nederlandsche Scheepv. Maats.; 1923; New Waterway S.B. Co.; 8,685 tons; 493-3x58-2x37-2; 968 n.h.p.; turbine engines.

The Dutch ship *Grootekerk* sailed from Swansea on February 18th, 1941, for Freetown, Penang and Singapore, and nothing was heard of her after she had passed the Mumbles on the same day.

GROPPO

Italian Navy, torpedo boat; 1942; Italy; 860 tons; 274-5x31x8; 16,000s.h.p.; 28 knots; turbine engines; 3-drum boilers; three 3-9 in. guns, six 20 mm.A.A., 2 T.T.

The torpedo boat *Groppo* was lying at Castellammare on May 25th, 1943, when she was bombed and sunk by British aircraft. The number lost is not known.

GROSSER KURFURST

German Navy, turret ironclad; 1875; Wilhelmshaven Dockyard; 6,663 tons; 370x52x24; 850n.h.p.; 14 knots; compound engines; four 10 in. guns, two 6-75 in.m.l.r.

The German turret ironclad *Grosser Kurfurst* was a unit of a squadron commissioned on May 6th, 1878, for service in Turkish waters. The squadron consisted of four ships, the large ironclad *Konig Wilhelm*, flagship of Rear-Admiral von Batsch, commanding, and three turret ironclads, the *Grosser Kurfurst*, *Preussen* and *Friedrich der Grosse*, the last named ship not having joined at the time of the disaster. The Russo-Turkish War had just concluded and the ships were to watch Germany's interests in the Near East during the deliberations of the Berlin Congress.

The *Grosser Kurfurst* carried a complement of 497 officers and men, Capt. Count Montz, who had formerly served in the British navy, being in command. On Friday morning, May 31st, the ships were off Folkestone with clear weather and a smooth sea. The flagship was leading with the *Grosser Kurfurst* slightly abaft her beam and the *Preussen* astern.

In this formation the squadron came across two sailing ships hauled to the wind on the port tack, and standing across the bows of the leading ironclads. The *Grosser Kurfurst* on the inshore side gave way to the first barque in accordance with the rules of navigation, porting her helm and passing under the stern of the ship. Meanwhile the *Konig Wilhelm* endeavoured to cross the bows of the merchantman but finding that she had no room to do this changed course and stood under the other's stern, coming round at right-angles to the *Grosser Kurfurst*. There was little time or space in which to manoeuvre, the captain of the *Grosser Kurfurst* increased to full speed and ported her helm, hoping to avoid a collision or to minimise its force. He was not successful in either and the helmsman on the *Konig Wilhelm*, losing his nerve, failed to obey the orders of the officer of the watch and flung the helm over to port instead of keeping it steady. A last moment's effort to avert catastrophe was made by the *Konig Wilhelm* which reversed her engines. The collision followed immediately, the *Grosser Kurfurst* running at a speed of about nine knots and the flagship at about six knots, the former being struck on the port side between the main and mizzen masts with tremendous force. Her armour-plate was ripped away by the ram of the flagship and a vast hole torn in her side below the waterline into which the water rushed drowning all those stationed there. All the boats along the port side were smashed.

The plight of the *Grosser Kurfurst* was hopeless from the moment of impact. She heeled over to port, having just sufficient steerage way to head for land with the intention of beaching, and then her stokehold was flooded, there was a rush of escaping steam and the vessel sank within eight minutes.

The number killed was 284 officers and men, the survivors being taken on board the other ships.

The *Konig Wilhelm* had her bowsprit smashed and her ram badly twisted. Her watertight compartments held firm, though she made a great deal of water forward, and she managed to reach Portsmouth, where she was docked.

GROVE

A diver sent down to the wreck of the *Grosser Kurfurst* found that it was lying in two parts, one part being keel uppermost.

On his return to Germany Rear-Admiral von Batsch was court-martialled and sentenced to six months imprisonment for culpable neglect in connection with the sinking. He was confined to the fortress at Magdeburg, but after a short term of only 14 days he was pardoned and set at liberty by the Emperor William I.

GROVE

British Navy, destroyer; 1941; Swan Hunter; 904 tons; 272-7 X 28-3x7-7; 19,000 s.h.p.; 27 knots; turbine engines; 3-drum boilers; four 4 in. guns, 8 smaller.

The escort destroyer *Grove*, Cdr. J. W. Rylands, was a unit of the Eastern Convoy from Alexandria to Malta under Rear-Admiral P. J. Vian in mid-June, 1942. The convoy was sighted by enemy aircraft when some days out and an intensive and persistent attack by bombers, torpedo boats and submarines developed, supported by heavy units of the Italian Navy. On the 12th *Grove* was sunk by a torpedo. Two officers and 108 ratings lost their lives. The convoy was able to send a few ships into Tobruk, but was finally compelled to put about for Alexandria.

For full story of the convoy see under the light cruiser *Hermione* which was lost in the action.

GRUTTO

Smith & Van Ommeren; 1925; C. Van der Giessen Zonen; 920 tons; 244-8x36-2x12-5; 258 n.h.p.; triple-expansion engines. The Dutch steamship *Grutto* left London on March 4th, 1940, for Rotterdam and was never seen again. Wreckage was sighted seven and a half miles from Thornton Ridge buoy on the 6th, and the body of one of the crew was washed ashore. The ship was considered to have been sunk by striking a mine.

GRYF

Polish Navy, minelayer; 1936; Chantiers Augustin Normand; 2,227 tons; 337-7x44-3x28; 6,000 i.h.p.; 20 knots; Sulzer diesel engines; six 4•7 in. guns, four 40mm, 300mines. The Polish minelayer *Gryf* was sunk in the first fighting of the Second World War. The vessel was attacked by German destroyers and aircraft off Hel on September 3rd, 1939. Her normal complement was 205.

GRYFEVALE

Barr, Crombie & Co.; 1906; Grangemouth & Greenock Dkyd. Co.; 4,437 tons; 370x52-2x17-5; 374 n.h.p.; triple-expansion engines.

The British cargo ship *Gryfevale* was wrecked on October 21st, 1917, in avoiding a German submarine ten miles north of Cape Blanco. She was on a voyage from Mauritius to Gibraltar carrying a cargo of sugar.

GUADELOUPE

Compagnie Generale Transatlantique; 1906; Chantiers de VAtlantique; 6,600 tons; 432-6x52-3x31-4; 718 n.h.p.; 16 knots; triple-expansion engines.

The French liner *Guadeloupe*, homeward bound from Rio de Janeiro with 143 passengers and a general cargo which included military supplies, was captured by the German auxiliary cruiser *Kronprinz Wilhelm* on February 22nd, 1915, some 300 miles S.E. of Fernando de Noronha. The liner was kept for about a fortnight, as well as the British collier *Chasehill* which had also just been captured and relieved of her cargo of coal. The *Chasehill* was then released together with the crew and passengers of the *Guadeloupe* and sent to Pernambuco, which she reached on March 12th. The *Guadeloupe* was sunk on March 9th.

The auxiliary cruiser *Kronprinz Wilhelm* was a North German Lloyd liner of 14,908 tons with a speed of 23 knots, equipped for service by the light cruiser *Karlsruhe* (which see) which turned over to her two 3 -4 in. guns with a small amount of ammunition. The ammunition supply would have been much larger had not the two ships, which were lying about 120 miles N.E. of Watling Island in the Bahamas, been compelled to separate by the light cruiser *Bristol* which gave chase to the *Karlsruhe*. This took place on August 6th, 1914, the *Kronprinz Wilhelm* having cleared New York just prior to the declaration of war.

The auxiliary cruiser now embarked on a brief, but profitable

career of commerce destroying. She was commanded by Lt. Cdr. Paul Thierfelder, one of the *Karlsruhe's* officers, and made her first capture on August 27th, having crossed the Atlantic and coaled off Las Palmas. The prize was the Russian barque *Pittan* which was released shortly afterwards. After that her luck was steady, though moderate, and between September, 1914, and March, 1915, she captured the following Allied merchantmen.

Sept 4 th , 1914	<i>Indian Prince</i> , 2,846 tons, sunk
Oct 7 th "	<i>La Correntina</i> , 8,529 tons, sunk
" 28 th "	<i>Union</i> , French barque, sunk
Nov 21 th "	<i>Anne de Bretagne</i> , French barque, 2,063 tons, sunk
Dec 4 th "	<i>Bellevue</i> , sunk
" 4 th "	<i>Mont Agel</i> , French, sunk
" 28 th "	<i>Hemisphere</i> , 3,486 tons, sunk
Jan 10 th "	<i>Potaro</i> , 4,419 tons, retained as supply ship, scuttled.
" 14 th "	<i>Highland Brae</i> , 7,634 tons, sunk
" 14 th "	<i>Wilfrid M.</i> , schooner, 251 tons, sunk
Feb 3 rd "	<i>Semantha</i> , Norwegian barque, 2,280 tons, Sunk
" 22 nd "	<i>Chasehill</i> , 4,583 tons, retained and released

with prisoners

" 22n	<i>Guadeloupe</i> , French, 6,600 tons, sunk
Mar 9th	
Mar 23 nd	<i>Tamar</i> , 3,207 tons, sunk
" 27 th	<i>Coleby</i> , 3,824 tons, sunk.

On April 11th, the *Kronprinz Wilhelm* weather-worn and damaged with no supply ships from which to draw assistance, steamed into Newport News, having eluded the cruiser *Suffolk* during the night, and was interned by the United States authorities.

GUADIANA

Royal Mail Steam Packet Co.; 1874; London & Glasgow Co.; 2,504 tons; 332-1x36-3x28-6; 400 h.p.; compound inverted engines.

The British cargo ship *Guadiana* was wrecked off Abrolhos, Brazil, on June 20th, 1885, while carrying a cargo of coffee from Santos to New York.

GUAHYBA

Companhia Commercio e Nav.; 1908; Grangemouth & Greenock D.D.Cp.; 1,891 tons; 275-5x43-5x17-5; 211 n.h.p.; triple-expansion engines.

The Brazilian cargo ship *Guahyba* was torpedoed and sunk by a German submarine at St. Vincent, Cape Verde Islands, on November 2nd, 1917.

GUARATINGA

Empresa Internacional de Transportes; 1944; Dravo Corporation; 2,902 tons; 309x50x25; oil engines.

The Brazilian motorship *Guaratinga* went aground on July 21st, 1954, near Santa Marta lighthouse and became a total loss.

GUARUJA

Cie. de Nav. France Amerique; 1922; Forges & Chantiers de la Mediterranee; 4,282 tons; 362-2x45-9x23-6; turbo-electric engines.

Sailing from Genoa for Buenos Aires the French ship *Guaruja* went ashore on January 2nd 1938, near Punta Polacra, near Almeria, and broke her back.

GUATEMALA

Cie. Generale Transatlantique; 1908; Chantiers de Normandie; 5,913 tons; 387-1x51-4x28-2; 265 n.h.p.; triple-expansion engines.

The French steamship *Guatemala* was torpedoed and sunk by a German submarine in the Bay of Biscay on September 6th, 1915.

GUDBRAND

Sverre Hansen Akties.; 1897; J. Priestman & Co.; 1,860 tons; 271-2x39-6x16-4; 196 n.h.p.; triple-expansion engines. The Norwegian cargo ship *Gudbrand* was torpedoed and sunk by a German submarine in the North Sea on March 16th, 1917.

GUDMUNDRA

E. Hogberg; 1921; AID Oresundsvarvet; 1,776 tons; 273-8 X 41-2x17-8; 229 n.h.p.; turbine engines.

Sailing from Barbados for Liverpool with a cargo of sugar, the Swedish ship *Gudmundra* went ashore on November 7th, 1941, near St. Pierre Island and became a total loss.

GUDVANG

D/S A/S Gudvin; 1912; Fredrikstad Mek. Verksted; 1,470 tons; 243 X 39 - 3 X 17 • 3; 150 n.h.p.; triple-expansion engines. The Norwegian steamship *Gudvang* was intercepted by German patrol boats in the Skagerrak on April 1st, 1942, while endeavouring to escape to England. After an exchange of gunfire the *Gudvang* was sunk and the survivors taken prisoner.

GUDVEIG

D/S A/S Gudvin; 1920; Odense Staalskibsværft; 1,300 tons; 241 • 2 X 36 • 3 x 16 • 3; 106 n.h.p.; triple-expansion engines. The Norwegian steamship *Gudveig* was torpedoed and sunk by a German submarine on January 25th, 1940, five miles N.E. by E. of the Longstone Light, Fame Island.

GUERNSEY

London & South Western Railway Co.; 1874; J. & W. Dudgeon; 509 tons; 195-5x26x13-4; 189 n.h.p.; 13 knots; triple-expansion engines.

The steamship *Guernsey*, Capt. Barrow, was wrecked off Cap de la Hague at about 10 o'clock on the night of April 8th, 1915. She left Guernsey for Southampton at 7 p.m. with a cargo of flowers and vegetables, in a strong N.W. breeze and a rough sea. Owing to war conditions the light on Cap de la Hague was not burning and in the darkness and with a most dangerous coast to navigate the *Guernsey* ran on the rocks not far from the cape. So violent was the shock that the captain was flung overboard from the bridge and never seen again. There was no time to launch more than one lifeboat. This boat, containing 12 survivors of her crew of 19, was picked up by the steamship *Cherbourg* and the occupants taken to Southampton.

GUIDING STAR

Miller & Thompson (Golden Line); 1853; W.&R. Wright; 2,013 tons; 233x38x22-1.

The clipper ship *Guiding Star* was a large vessel for the 1850's. She was engaged in the emigrant trade to Australia, and had made one round trip from Liverpool to Melbourne and back. She left Liverpool for Melbourne on her second voyage on January 9th, 1855, having on board 480 persons, passengers and crew.

The winter of 1854-55 was extremely severe at sea, and homeward-bound ships reported, on arrival, vast icefields through which they had passed at some peril. One such field was computed to be 60 miles in length and 40 miles in breadth, and it was in this that the *Guiding Star* was thought to have become trapped. The position was 44° S., 28° W., extending to 40° S., 20° W.

The *Guiding Star* had been sold during the voyage by Miller & Thompson for £8,050. At the time of her loss she was under charter to the Golden Line running to Australia.

GUIDO

Ellermarks Wilson Line; 1920; Goole S.B.&R. Co.; 3,921 tons; 333x46-6x29; turbine engines.

The steamship *Guido*, on a voyage from St. Kitts to Greenock, was torpedoed and sunk by a German submarine on March 8th, 1943, about 450 miles E.S.E. of Cape Farewell. Eight of her crew and two gunners were lost.

GUIDO BRUNNER

D. Tripovich & CL; 1925; Cantieri Navali Triestino; 1,081 tons; 222-2x35x13; 194 n.h.p.; triple-expansion engines. The Italian steamship *Guido Brunner* was bombed and sunk by Allied aircraft on February 14th, 1944, on a voyage from Rbgosniza to Durazzo.

GUILDFORD

Peter'sen, Tate & Co.; 1882; Palmers' Co.; 2,281 tons; 298x 37-2x23-7; 270 h.p.; compound engines. The British cargo ship *Guildford* was wrecked on Neckmann Grund,

Gulf of Finland, in December, 1893. She was on a voyage from Charleston to Reval carrying a cargo of cotton.

GUILDHALL

Letricheux Line; 1898; Tyne Iron Shipbuilding Co.; 2,609 tons; 290x43x19-5; 250 n.h.p.; 9 knots; triple-expansion engines. The steamship *Guildhall* was torpedoed and sunk by a German submarine 40 miles S.W. by W.i.W. of Bishop Rock, Scilly Isles, on June 25th, 1917. Eleven men, including the captain, were killed.

GUILLEMOT

General Steam Navigation Co.; 1894; Cambeltown S.B. Co.; 1,754 tons; 260x36-5x18-3; 166 n.h.p.; 11 knots; triple-expansion engines.

The steamship *Guillemot*, Capt. Ward, was on a voyage from the Tyne to Genoa when she met with heavy weather in the Bay of Biscay on December 20th, 1911. On the morning of the 21st the seas smashed the steamship's steering gear and by the 22nd she was unmanageable with all her deck cargo adrift. In this condition she was sighted by the s.s. *Lincairn*, Capt. C. S. Jackson, from Java for the Clyde. The *Lincairn* stood by and at about noon Capt. Ward gave orders for the *Guillemot* to be abandoned. Two boats were launched, the others having been smashed, and the first of these containing four men managed to reach the *Lincairn*. The second capsized but two men clung to the keel and another found a piece of floating wreckage. These three were also rescued, but the remainder of the crew of 16, including Capt. Ward, were drowned when the *Guillemot* foundered shortly afterwards. The only officers saved were the second officer and the third engineer.

GUILLERMO

W. Gonzalez Garra; 1896; D. & W. Henderson & Co.; 3,797 tons; 350x45-4x25-8; 302 n.h.p.; triple-expansion engines.

Carrying a cargo of ore from Huelva to Rotterdam the Spanish ship *Guillermo* sank off Oporto on March 14th, 1921.

GUILVINEC

Cie. France-Navigation S.A.; 1920; Lloyd Royal Beige (Gt. Britain); 3,181 tons; 331x46-5x23-3; 442 n.h.p.; triple-expansion engines.

The French steamship *Guilvinec* was torpedoed and sunk by an unidentified submarine on February 19th, 1941, 170 miles off San Sebastian, with the loss of 17 lives.

GUINE

Cia. Colonial de Nav.; 1898; Reiherstieg Schiffswerf; 4,032 tons; 361 - 3x44-8x25-7; 338 n.h.p.; triple-expansion engines. Carrying mail, passengers, maize and general cargo from Luanda to Lisbon, the Portuguese ship *Guine* went ashore on August 21st, 1930, near Bolama and broke up.

GUINEVERE

United States Navy, armed yacht; 1908; Geo. Lawley & Son; 499 tons; 197-5x32-5x18-8; several small guns. The United States armed yacht *Guinevere* was wrecked on the French Atlantic coast on January 25th, 1918.

GULDBORG

C.K. Hansen; 1890; Irvine & Co.; 1,575 tons; 250x35x16-4; 134 n.h.p.; triple-expansion engines.

The Danish steamship *Guldborg* was sunk by a German submarine in the North Sea on October 20th, 1916.

GULF OF ADEN

Greenock Steamship Co.; 1887; R. Dixon & Co.; 2,366 tons; 300x40-2x23-9; 450 h.p.; triple-expansion engines. The British steamship *Gulf of Aden* was bound from Liverpool to Valparaiso with a general cargo and a large number of passengers. She foundered on May 22nd, 1890, with the loss of 73 lives.

GULF OF PANAMA

Greenock Steamship Co.; 1880; W. Richardson & Co.; 1,592 tons; 261 X 34 - 3 x 21 - 3; 180 h.p.; compound inverted engines. The steamship *Gulf of Panama*, on a voyage from Shimonoseki to Bremen, with rice, was wrecked off the Texel on the night of October 28th, 1882. Twenty-two of the crew were drowned.

GULFAMERICA

GULFAMERICA

Gulf Oil Corporation; 1942; Bethlehem Sparrows Pt. Shipyard; 8,081 tons; 445x64-2x34-9; 583 n.h.p.; turbine engines. The American tanker *Gulfamerica* was torpedoed, shelled and sunk by a German submarine on April 11th, 1942, five miles off Jacksonville, on a voyage from Port Arthur, Texas, to New York. Seventeen of her crew and two gunners were lost.

GULFLAND

Gulf Oil Corporation; 1918; New York S.B. Corp.; 5,277 tons; 391 -1 x 51 - 2 X 30 • 2; 543 n.h.p.; triple-expansion engines. Sailing from Beaumont to Jacksonville the American tanker *Gulfland* was in collision on October 20th, 1943, and caught fire. She was then three miles E. of Jupiter Light, Florida, and stranded on a reef where she broke in two. The afterpart was salvaged and towed into Jacksonville.

GULFOIL

Gulf Oil Corporation; 1912; New York S.B. Corp.; 5,189 tons; 383x51 - 2x30; 543 n.h.p.; triple-expansion engines. The American tanker *Gulfoil* was torpedoed and sunk by a German submarine on May, 17th, 1942, 250 miles out of Port Arthur bound for New York with diesel oil. Twenty-one of her crew were lost.

GULFPENN

Gulf Oil Corporation; 1921; Sun S.B. Co.; 8,862 tons; 480 -5 x 66x36-8; 819 n.h.p.; quadruple-expansion engines. The American tanker *Gulfpenn* was torpedoed and sunk by a German submarine on May 13th, 1942, about 250 miles out of Port Arthur bound for Philadelphia with fuel oil. Thirteen of her crew were lost.

GULFSTATE

Gulf Oil Corporation; 1920; Bethlehem S.B. Corp.; 6,882 tons; 435x56x33-8; 421 n.h.p.; triple-expansion engines. The American tanker *Gulfstate* was torpedoed and sunk by a German submarine on April 3rd, 1943, 100 miles S. of Miami on a voyage from Corpus Christi to New York with crude oil. Twenty-seven of her crew and seven gunners were lost.

GULFTRADE

Gulf Oil Corporation; 1920; Sun S.B. Corp.; 6,776 tons; 429-3x59-2x31-4; 612 n.h.p.; triple-expansion engines. The American tanker *Gulftrade*, Capt. Torger Olsen, was torpedoed by a German submarine, and broke in two and sank on March 10th, 1942, about five miles off the coast of New Jersey, inward bound from Port Arthur, Texas, with fuel oil. Nineteen of her crew were lost.

GUN

RederiAIBVinga; 1891; J. Blumer & Co.; 1,222 tons; 237-2x 34-2x16-2; 142 n.h.p.; triple-expansion engines. The Swedish steamship *Gun* was torpedoed and sunk by a German submarine on September 30th, 1939, off Hanstholm, Denmark.

GUNBORG

Rederi A/B Sylvia; 1930; Oskarshamns Mek. Vcerks.; 1,572 tons; 269 - 2x40-4x16-6; 122 n.h.p.; triple-expansion engines & L.P. turbine.

The Swedish steamship *Gunborg* was torpedoed and sunk by a German submarine on October 18th, 1940, 150 miles W. of the Hebrides on a voyage from Halifax, N.S. to the Clyde.

GUNDA

A/S Olymp; 1919; McDougallDuluthCo.; 2,241 tons; 251 -3 x 43-7x22-2; 184 n.h.p.; triple-expansion engines. The Norwegian steamship *Gunda* was torpedoed and sunk by a submarine on November 19th, 1942, off the coast of East Africa between Inhaca and Punta da Oro. Thirty-eight of her crew of 46 were killed.

GUNHILD

H.Silven; 1920; Eriksbergs Mek. Va>rks.; 678 tons; J 80 - 6 x 28-9x11-6; 65 n.h.p.; triple-expansion engines. The Swedish steamship *Gunhild* left Gothenburg on October 12th, 1934, for Bremen, and on October 14th at noon was sighted 12

miles N.E. of Horns Reefs, but she was not seen again. Lifebuoys and bodies were washed ashore.

GUNNAREN

Rederi-A/B Transatlantic; 1930; A/B Lindholmen-Motala; 3,229 tons; 354-1x50-1x21-7; 543 n.h.p.; oil engines. The Swedish motorship *Gunnaren* went ashore at 5 a.m. on August 19th, 1935, on Swona Island, Pentland Firth. She broke in two and became a total loss.

GUNNY

A/S Lesjar; 1920; Eltringhams; 2,362 tons; 290-4x44x20-8; 203 n.h.p.; triple-expansion engines. The Norwegian steamship *Gunny* was torpedoed and sunk by a German submarine on March 2nd, 1942, about 400 miles S. of the Bermudas, with the loss of 14 lives.

GUNVOR

A/S Herdis; 1935; Trondhjems Mek. Verksted; 1,942 tons; 277-7x43-2x18-1; 214 n.h.p.; compound engines & L.P. turbine. The Norwegian steamship *Gunvor* was torpedoed and sunk by a German submarine on June 10th, 1942, between Mobile and Trinidad.

GURKA

British Navy, destroyer; 1907; Hawthorn Leslie; 880 tons; 255 x 25-5 x 8; 14,250 i.h.p.; 33 knots; turbine engines; Yarrow boilers; five 12pr. guns., 2 T.T. The destroyer *Gurka* was mined and sunk four miles S.E. of Dun-geuss buoy on February 8th, 1917. Her official complement was about 80.

GURKHA

British Navy, destroyer; 1937; Fair field Shipbuilding Co.; 1,870 tons; 355-5x36-5x9; 44,000 s.h.p.; 36-5 knots; turbine engines; 3-drum boilers; eight 4-7 in. guns, eight smaller, 4 T.T. The destroyer *Gurkha*, Cdr. A. W. Buzzard, was cruising off Bergen on April 9th, 1940, with other units of the Home Fleet in the hope of intercepting some of the German ships engaged upon the invasion of Norway. During the afternoon the British force was subjected to continuous attacks by enemy aircraft. The battleship *Rodney* was hit by a bomb which failed to penetrate her armour; the cruiser *Aurora* was repeatedly attacked without success, but *Gurkha* which was accompanying her was hit and badly damaged. About four and a half hours after this *Gurkha* sank with the loss of five officers and ten ratings killed and three ratings wounded, an attempt to take her in tow having failed.

GURKHA

British Navy, destroyer; 1940; British Isles; 1,920 tons; 354 x 37x10; 48,000 s.h.p.; 36-5 knots; turbine engines; 3-drum boilers; six 4• 7 in. guns, one 4 in.A.A., 4 T.T. The destroyer *Gurkha*, Cdr. C. N. Lentaigne, was the second destroyer of that name to be lost in the Second World War. On January 17th, 1942, when off the coast of Libya she was torpedoed and sunk by an enemy submarine. Five officers and four ratings were killed and two officers wounded. Cdr. Lentaigne was among the survivors.

GURNEY E. NEWLIN

Union Oil Co. of California; 1942; Bethlehem Shipyard; 8,225 tons; 445-4x64-2x34-9; 583 n.h.p.; 12-5 knots; turbine engines.

The American tanker *Gurney E. Newlin*, Capt. H. L. Dahllof, was in convoy in the North Atlantic at about 7 p.m. on October 27th, 1942, when she was torpedoed and sunk by a German submarine. Thirty-four members of the crew and 13 U.S. naval gunners were killed. Capt. Dahllof was among the survivors.

GURRE

C.Gran; 1889; Blyth S.B. Co.; 1,733 tons; 260x36-6x16-9; 174 n.h.p.; triple-expansion engines. The Norwegian cargo ship *Gurre* was torpedoed and sunk by a German submarine in the North Sea on March 1st, 1917.

GUS. W. DARNELL

U.S. War Shipping Administration; 1944; Todd-Houston S.B. Cprn.; 7,247 tons; 422-8x57x34-8; 339 n.h.p.; triple-expansion engines.

The American steamship *Gus. W. Darnell* was torpedoed and sunk by Japanese aircraft at Samar Island, Philippines, on November 23rd, 1944.

GUSTAF E. REUTER

Rederiaktieb. Reut; 1928; Eriksbergs Mek. Vcerks.; 6,336 tons; 418-9x55-1x32-1; 543 n.h.p.; oilengines. The Swedish motorship *Gustaf E. Reuter* struck a mine and sank on November 26th, 1939, 14 miles W.N.W. of Fair Isle.

GUSTAF WASA

Rederi A/B Gustaf Wasa; 1890; J. Blumer & Co.; 1,382 tons; 250 X 37x16-7; 139 n.h.p.; triple-expansion engines. On a voyage from Hartlepool to Norrkoping the Swedish ship *Gustaf Wasa* went ashore on February 26th, 1936, at Arkobaden, Arkosund Skerries, and sank.

GUTHRIE

A. Gallussen & Co.; 1884; W. Doxford & Sons; 2,338 tons; 314X 38-3x23-6; 308 n.h.p.; compound engines. The British cargo ship *Guthrie* was wrecked on November 3rd, 1914, on Tientsin Bar. She was carrying a general cargo and was bound for Yladvostock.

GUYSBOROUGH

Canadian Navy, fleet minesweeper; 1942; Canada; 672 tons; 180X 28X 8-5; 2,400 i.h.p.; 16 knots; triple-expansion engines; 3-drum boilers; one 4 in.A.A. gun, two 20 mm., 4 m.g. The fleet minesweeper *Guysborough* was lent to the Canadian government by the British Admiralty. On March 17th, 1945, she was torpedoed and sunk by a German submarine off Ushant. Her normal complement was 70.

GWALIA

F.J.Broomfield; 1881; W. Pickersgill & Sons; 1,348 tons; 240 x 33x16-7; 146 n.h.p.; compound engines. The British collier *Gwalia* sank after a collision off Whitby in April, 1907, while on a voyage from the Tyne to Bordeaux.

GWALIA

Rederi-AjB Svenska Lloyd; 1907; S. P. Austin & Son; 1,258 tons; 221 -5x34-5x14-1; 141 n.h.p.; triple-expansion engines. The Swedish steamship *Gwalia* was torpedoed and sunk by a German submarine on December 2nd, 1940, about 300 miles from Lisbon inward bound from Cardiff with coal. Sixteen of her crew of 20 were lost.

GWENDOLINE

TurnbullBros.; 1883; T. Turnhull & Son; 1,729 tons; 260-2 X 37-1x18-5; 150 h.p.; compound engines. The British cargo ship *Gwendoline* sank after striking rocks off Tarifa on April 28th, 1891. She was on a voyage from Cardiff to Constantinople carrying a cargo of coal.

GWENDOLINE

Steers Sand & Gravel Corp.; 1886; Camden, N.J.; 149 tons; 98-5x20-6x10-8; 640 h.p.; oil engines. The American tug *Gwendoline Steers* was overwhelmed in a gale which swept Long Island Sound on December 30th, 1962, and sank off Baton's Neck, Long Island.

All her crew of nine were lost. One of her boats containing the body of a man who had perished from exposure was picked up later.

GWIN

United States Navy, destroyer; 1940; United States; 1,630 tons; 348x35x10-2; 44,000 s.h.p.; 36-5 knots; turbine engines; Express boilers; four 5 in. guns, 10 smaller, 5 T.T. The destroyer *Gwin* formed part of a task force under Rear-Admiral W. L. Ainsworth which intercepted a Japanese squadron of cruisers and destroyers in the Kula Gulf on Tuesday, July 13th, 1943. The American force consisted, among other ships, of the cruisers

St. Louis and *Honolulu* and the New Zealand cruiser *Leander*, all of which were hit and damaged by torpedoes. The *Gwin* was hit and set on fire. She was taken in tow, but later it became necessary to abandon her after which she was sunk by ships in company. The action was known as the Second Battle of Kula Gulf.

GWYNWOOD

W. France, Fenwick & Co.; 1937; S. P. Austin & Son; 1,177 tons; 230-8x36-1x13-3; 148 n.h.p.; 10 knots; triple-expansion engines.

The collier *Gwynwood*, Capt. H. Cook, was bombed and sunk by German aircraft on February 4th, 1941, while awaiting convoy in the River Humber. Capt. Cook, eight crew and two gunners were killed.

GYDA

Skibs A/S William Hansens Rederi; 1920; Laxevaags Maskin. & Jernskibs.; 1,591 tons; 245-8x37-9x15-5; 138 n.h.p.; triple expansion engines.

The Norwegian steamship *Gyda* was torpedoed and sunk by a German submarine on July 18th, 1940, on a voyage from Glasgow to Bathurst, N.B. Eleven of her crew were lost.

GYOEI MARU

Japanese Government; 2,790 tons. The Japanese ship *Gyoei Maru* was bombed and sunk by U.S. land-based aircraft on January 14th, 1944, 100 miles S. of Hong Kong.

GYOKU MARU

Japanese Government; 1941; Hong Kong; 6,854 tons. The steamship *Gyoku Maru* was seized by the Japanese in December, 1941, while under construction at Hong Kong for British owners as the *Empire Dragon*. She was torpedoed and sunk by the U.S. submarine *Thresher* on September 18th, 1944, about 100 miles W.N.W. of Mokpo, Korea.

GYOKUREI MARU

Toa Kaiun K.K.; 5,588 tons. The steamship *Gyokurei Maru* was torpedoed and sunk by the U.S. submarine *Grayback* on December 18th, 1943, off Okinawa Island.

GYOKUYOMARU

Toyo Kisen K.K.; 5,396 tons. The Japanese ship *Gyokuyo Maru* was torpedoed and sunk by the U.S. submarine *Spadefish* on November 14th, 1944, about 150 miles E. of Shanghai.

GYOKUZAN MARU

TomoeGumi Kisen; 1,970 tons. The steamship *Gyokuzan Maru* was torpedoed and sunk by the U.S. submarine *Halibut* on December 12th, 1942, off Tamagawa, Japan.

GYORYU MARU

1918; Long Beach S.B. Co.; 2,180 tons; 245-6x42x24-1; triple-expansion engines. The steamship *Gyoryu Maru* was formerly the Panamanian *Eldorado*, seized by the Japanese at Hong Kong in December, 1941. She struck a mine and sank on May 13th, 1945, off Kobe.

GYOSAN MARU

Japanese Government; 1922; N. of Ireland S.B. Co.; 5,698 tons; 411 X53-8x28-3; 708 n.h.p.; triple-expansion engines. The steamship *Gyosan Maru*, formerly the British *Hosang*, seized by the Japanese, was torpedoed and sunk by the U.S. submarines *Flounder* and *Guavina* on November 21st, 1944, 25 miles north-west of Sin Cowe Island, South China Sea.

GYOTEN MARU

Japanese Government; 1941; Hong Kong; 6,854 tons. The steamship *Gyoten Maru* was under construction at Hong Kong in 1941 as *Empire Pagoda*, scuttled before completion and subsequently raised and completed by the Japanese. On February 17th, 1944, she was torpedoed and sunk by the U.S. submarine *Tang* in the Caroline Islands.

GYOYU MARU

GYOYU MARU

Japanese Government; 1918; Hong Kong & Whampoa Dock Co.; 2,232 tons; 270 x40-1x19-4; 215 n.h.p.; triple-expansion engines.
The steamship *Gyoyu Maru* was formerly the British *Joan Moller*, seized by the Japanese at the outbreak of war. She was torpedoed and sunk by the U.S. submarine *Seahorse* on July 3rd, 1944, about 250 miles E. of Hainan Island.

GYPSUM PRINCESS

Gypsum Packet Co.; 1892; D.S.Howard; 735 tons; 162 -9 x 36x16-8 The wooden three-masted Nova Scotia schooner *Gypsum Princess*

292

was run down by the German steamship *Ems*, 4,912 tons, on, or about, June 14th, 1898. Six of the crew were drowned.

GYPSUM QUEEN

Gypsum Packet Co.; 1927; Furness S.B. Co.; 3,915 tons; 347-8x52-8x23; 409 n.h.p.; triple-expansion engines. The steamship *Gypsum Queen*, on a voyage from New Orleans and Sydney, N.S., for Glasgow, was torpedoed and sunk by a German submarine on September 10th, 1941, about 300 miles N.E. of Cape Farewell. Nine of her crew and one gunner were lost.

H. C. FLOOD

Dampsk.-A/S Falkeid; 1917; Bergens Mek. Verksted; 1,907 tons; 266 - 9 X 42 - 1 X 18; 162 n.h.p.; triple-expansion engines.

The Norwegian steamship *H. C. Flood* struck a mine and sank on December 15th, 1939, near Tynemouth.

H. D. COLLIER

Standard Oil Co. of California; 1938; Sun S.B. & D.D. Co.; 8,298 tons; 444-1 x 65-3 X 35-1; 600 n.h.p.; turbine engines. The American tanker *H. D. Collier* was torpedoed by a Japanese submarine on March 13th, 1944, 200 miles S.W. of Karachi on a voyage from Abadan to Bombay with 11,600 tons of aviation spirit and kerosene. The tanker caught fire and burned for three days before sinking. Thirty-three of her crew and 12 gunners were lost.

H. F. DE BARDELEBEN

Bulk Transportation Corp.; 1918; Seattle Construction & D.D. Co.; 5,020 tons; 380x 53-2x 27; 472 n.h.p.; triple-expansion engines.

The American steamship *H. F. de Bardeleben* was disabled in a gale on March 9th, 1932, and foundered on the next day in heavy weather about 700 miles E. by S. of Sandy Hook.

H. L. HUNLEY

Confederate States Navy, submersible torpedo boat; 1863; Park & Lyons; 40 x 4 x 5; 4 knots; hand cranked propeller; one spar torpedo.

The Confederate States submersible torpedo boat *H. L. Hunley* was the first submarine to sink a warship in action. She was built during the American Civil War and on the night of February 17th, 1864, she torpedoed and sank the United States sloop-of-war *Housatonic* off Charleston, South Carolina. The explosion of the torpedo, which was discharged at very close quarters, probably wrecked the submarine as well as her victim. On the other hand she may have been drawn down when the *Housatonic* sank. The crew of nine were lost as well as five from the sloop.

For full story of the action see *Housatonic*.

H. M. STOREY

Standard Oil Co. of California; 1921; Bethlehem S.B. Corpn.; 10,763 tons; 500 x 68 - 2 x 30; 550 n.h.p.; triple-expansion engines. The American tanker *H. M. Storey* was torpedoed and shelled by a Japanese submarine in 17° 20' S., 173° 30' E., and sank on May 17th, 1943. She was on a voyage from Noumea to Los Angeles. Sixty-three of her crew got away in the boats. Two were killed on board.

H. P. HANSEN

Aabenraa Rederi Ajs; 1899; Short Bros.; 1,597 tons; 254-4 X 37x18-1; 156 n.h.p.; triple-expansion engines. The Danish steamship *H. P. Hansen*, under German control, was bombed and sunk by British aircraft on May 24th, 1941, W. of Borkum.

HAAKON VII

I. A. Christensen; 1907; Scheepswerf voorheen Jan Smit, Czn.; 2,175 tons; 281 - 4x42-2x20-6; 228 n.h.p.; triple-expansion engines.

The Norwegian cargo ship *Haakon VII* was torpedoed and sunk by a German submarine in the English Channel on September 7th, 1917.

HAAKON VII

Det Nordenfjeldske D/S; 1906; Trondhjems Mek. Verksted; 1,347 tons; 250-3x33-2x21-6; 223 n.h.p.; 12 knots; triple-expansion engines.

The mail and passenger steamship *Haakon VII* was running from Finmarken to Bergen through a heavy gale on October 6th, 1929, when she struck the rocks at Stanfjorden, Floro. The vessel was steaming at 12 knots at the time and the violence with which she struck hurled the captain from the bridge on to the rocks below, where he was picked up some hours later dazed and bruised but otherwise unhurt. The number of persons on the *Haakon VII* was 75, of whom nine passengers and nine crew were drowned.

The survivors scrambled over the bows of the ship on to a narrow ledge of rock and were taken off four hours later by the Norwegian steamship *San Lucar*.
