**There has never been an independent inquiry in the events of 9/11.** Despite two years of repeated attempts by the families of the victims of 9/11, there has never been an independent investigation of What Really Happened that day. [Is there an OngoingCoverup?](#)

- Both President Bush and Vice-President Cheney took extraordinary steps to limit any investigation into the events of 9/11.
- The NTSB never held inquiries into any of the 4 plane crashes, as required by law, and the FBI is withholding the data from the airliner's flight recorders.
- All of the steel from the Twin Towers was shipped out of the country before any investigation was held.

**The media says that bin Laden carried out the 9/11 massacre from the caves of Afghanistan,** yet after a supposedly "thorough" investigation, the FBI says they have not uncovered a single piece of paper that mentioned any aspect of the Sept. 11 plot. [Some are starting to ask: OsamaBinAsset?](#)

- 7 of the supposed "hijackers" turned out to be alive and not even in the US on 9/11.
- 3 of the "hijackers" listed a US Navy base as their address on their drivers licences.

**The Twin Towers didn't collapse, they exploded outwards;** parts of the buildings were ejected as far as 70 m. before they began to fall, and the buildings' concrete was reduced to fine dust. [What really brought down the TwinTowers?](#)

- No steel structured skyscraper in history has collapsed due to fire.
- The steel support columns in the sub-basement of the Twin Towers were melted, and five weeks later, were still pools of molten steel.

**They say an airliner crashed into the Pentagon, but if so, why isn't there the debris of an airliner in the photos of the scene of the [PentagonAttack?](#)**

- There's no airliner debris at the Pentagon, and the deep and focused damage to the building could not be from an airliner crash.
- The FBI is withholding 2 videos that may show what really hit the Pentagon, and the photos from the DoD Pentagon security camera have been falsified.
- This [Flash Video](#) from [FU](#) sums up the evidence nicely.

**The 47 story World Trade Center Building Number 7 was levelled in 8 seconds,** seven hours after the Twin Towers came down. As it hadn't been hit by any plane, nor sustained any significant damage from the "collapse" of Twin Towers earlier two buildings away, [why did Building7Collapse?](#)

- The photographs show that there was no any major fire in the building at the time.

**The source of the anthrax was the US Military biological weapons program.** The anthrax was identified as a strain used by the US government, and the anthrax used was weaponized according to the American process. [Are American terrorists behind the AnthraxAttacks?](#)
