## **PRESS RELEASE:**

**Local author exposes Nazi historian; David Irving perjury allegations in Canada, and linked to mysterious sex attacks in London.**

David Irving has always courted controversy. From the publication of his first book *The Destruction Of Dresden* in 1963 to his endorsement of *The Leuchter Report*, the document which "proves" that the Auschwitz gas chambers did not really exist, Irving has presented himself to both the establishment and the general public as a fearless iconoclast, ruthlessly shattering the popular images of Winston Churchill, Adolf Hitler and other historical figures, regardless of the consequences to himself or posterity. But people who live in glass houses shouldn't throw stones, and now, Alexander Baron, who has spent three years researching Irving and his far right connections, shatters one or two images himself. In this book, Baron reveals:

How Irving's commitment to historical truth extends to lying under oath. Baron proves that, at the 1988 trial in Toronto, Canada, when Irving first endorsed *The Leuchter Report*, he lied through his teeth.

How Irving was linked to a series of sex attacks in London in 1991-2, and how his friends in high places covered up for him.

Who Irving's powerful friends are. Their identity will astound you.

Baron, himself the victim of police harassment and a mysterious hammer attack, has built a formidable case against the notorious "Revisionist" historian. His book *Revising The Revisionists, Unmasking Irving*, is available only from ITMA at the above address, £7.99 post free.

This is the book David Irving will want to ban and others will want to burn. Order your copy now before the author has another mysterious accident.
