## THE HIGHERSIDE CHATS – HARALD KAUTZ VELLA | BLACK GOO, BLACK MAGICK, SPIDER BEINGS, & THE ELITE

Brace yourself! German researcher, Harald Kautz Vella joins THC to break down his deep level research into the true nature of the Elite’s campaigns against humanity. **According to Harald’s research, an invading version of what is known as “black goo” landed on our planet roughly 80,000 years ago. This black goo could be considered a type of alien AI or a “seed device” for creating life within a biosphere. This invader does not belong here, and has been attempting to unplug it’s program to the detriment of our natural order.** It contains remnants of it’s original lifeforms, spider type beings, which have been coaxing the elite into carrying out their plans for Earth bound manifestation for as long as we know. Our energies have been used as feed, and our environment has been tweaked to make the people weak. **The plan to get these higher dimensional Archonic beings to “hook” into their human husks is getting closer all the time, and is at the heart of the transhumanist agenda.** It’s a lot to take in. I hope you’re sitting down.
