SYNOPSIS

Although accounts of humanoids piloting flying saucers goes back many decades, this scenario was not initially publicized widely and soon forgotten by the general public. In 1952 radio newsman Frank Edwards startled the listening public with an interview he had with William Squyres, who observed a UFO with occupants over Pittsburg, KS in 1952. A little over a decade later the UFO occupant scenario began evolving to cover alien abductions and very strange creatures. This compilation deals with humanoid encounters that did not result in known alien abductions. These cases are available on an earlier compilation entitled, *CE IV*.
