

EXPLOITATION OF A CHILD THAT  
ADVANCED THE AFRICAN AIDS AGENDA  
By David Icke

I was sickened to watch a BBC television documentary last Sunday about Nkosi Johnson, a wonderful young boy who became the face of the campaign in South Africa to make the lethal drug AZT more widely available.

See elsewhere on this website and in Christine Maggiore's book, *What If Everything You Thought You Knew About Aids Was Wrong?* for the background to AZT, the "wonder drug" that destroys the immune system and causes the very Aids it is supposed to help prevent. AZT was formerly a chemotherapy drug that was withdrawn because it was too toxic!! Imagine, therefore, how toxic it must be given the effect on people of the chemotherapy drugs still in widespread use. And what do chemotherapy drugs do? They kill cells. That's it.

They don't kill just cancer cells, but all cells, including those which form the human immune system. The chemotherapy equation is simple: will they kill the cancer cells before they kill enough healthy cells to kill the patient.

The mother of Nkosi died of Aids and he was diagnosed HIV-positive at birth. In his short life he was used as a publicity stunt by his adopted mother, Gail Johnson, to highlight her version of the Aids problem in Africa. He was worked till he virtually dropped and complained of being exhausted by the rounds of interviews and speeches (written and rehearsed by his adoptive mother.)

The finale of the programme was his speech, again carefully rehearsed by Gail Johnson, to a major Aids conference in South Africa attended by President Thabo Mbeki. The programme, which as always was unquestioning in its support for the official version of Aids, presented Mbeki in a highly negative light for quite rightly challenging in his conference speech the "evidence" that HIV causes Aids. He was also criticised for leaving the arena during the speech of Nkosi calling for AZT to be available free to Africans with HIV. Maybe he walked out because he knew that this lovely little boy was being used to produce highly emotional support for the HIV causes Aids and AZT is an answer campaign led, ultimately, by the Illuminati pharmaceutical cartel.

Interestingly, the drug cartel has since "given in" to the campaign to make "anti-Aids drugs" available far more cheaply in South Africa, but all they were doing was playing a mind game. You work people up into a frenzy demanding lethal drugs, which they are manipulated to believe are the only answer. Then you make them believe they have won their campaign against you to make them widely available, when, in truth, you want them consumed in vast quantities.

All debate over the true nature and cause of Aids, and therefore the most effective treatment, is lost in the frenzy to demand and take the "wonder drugs" which will kill you by giving you Aids.

It is a drug induced genocide and that is what Africans face unless they wake up to the way they are being manipulated.  
Former president, Nelson Mandela, has supported the AZT for Africans campaign because it would appear he is simply accepting that the official version of "science" could not be wrong and the multi-national drug cartel would not tell us lies.

It is against this backdrop that Mbeki has been marginised on this issue and any voice of reason is condemned as uncaring.  
It is in this environment, also, that Credo Mutwa must operate and shout in the wilderness.

Here is a typical news story which shows how any challenge to the official line is jumped on from a great height, even if you are the president.

CREDO MUTWA IN PLEA TO  
SAVE AFRICA FROM ILLUMINATI GENOCIDE

Zulu Shaman & Elder Credo Mutwa's  
Plea To The Global Elite:  
Stop The Genocide In Africa!

RICK MARTIN: The weekend of April 28 you may have noticed that all the major prostituted print and broadcast media outlets announced yet another AIDS conference of "goodwill" had just ended in Africa. This latest public relations pageant (or pressure-relief valve) was orchestrated in Nigeria, a location of deep and protracted turmoil.

All the usual array of participants (from politicians to pharmaceutical companies to medical "experts") promised, with special practiced earnestness for the cameras, to work hard to combat this illness. Meanwhile, The Truth of the matter is far different from the likes of this major propaganda event, broadcast far and wide "coincidentally" with our receiving and sharing of the following heart-wrenching communication.

The deep pain and chronic suffering that is a daily experience for many South Africans has never been more vividly described than in my recent phone conversation with Credo Mutwa. Some of you will recall that we presented a remarkable front-page feature interview with Credo Mutwa back in our October 1999 edition of The SPECTRUM. Things have gotten quite a bit worse in South Africa since we last spoke, particularly as it relates to those infected with and dying from AIDS.

On the morning of April 23, I received a telephone call from David Icke's publicist for the United States, Royal Adams, relaying a request from Credo Mutwa to speak with me.

I am grateful to both Royal Adams and David Icke for considering The SPECTRUM to be the appropriate conduit through which to share this great Zulu shaman's most impassioned message. I called Credo Mutwa that same morning, and he was as genuine and cordial as I remembered him to be-but with a very serious edge of urgency in his voice.

Actually, words fall terribly short at times like these for their inability to convey the kind of intense emotional impact his voice so tangibly carried.

It was as though Credo was speaking before the full assembly at the United Nations, delivering, in very measured wording, the most serious and important appeal imaginable. His plea is on behalf of humanity that the genocide (initiated covertly some years ago as part of the depopulation agenda of the dark, so-called "elite" global controllers) MUST CEASE in the land of Africa-which is rapidly becoming a graveyard populated by the walking dead.

With that brief introduction to a subject of tremendous moral consequence, let me just move directly into the message Credo Mutwa wishes to be shared.

Keep those Kleenex handy.

Credo Mutwa: My call, sir, has to do with the terrible disease which is killing my people, the disease which is called AIDS.

My appeal is this, sir: I don't know who the people are who created this disease. But in the last 2 years or so, I have handled many cases. I have handled friends of mine who are dying of this disease. And I know now that this disease, sir, is a man-made one.

I wish to appeal to those human beings who created this disease: PLEASE STOP NOW! You have done enough. You have killed enough of the children of Africa. Stop now! Stop! The death of Africa will be the death of the whole world. If it is correct for Dr. Simon Weisenthal to pursue Nazi war criminals many years after the end of the Second World War, will it also not be just and correct for future Africans to pursue these men and these women who have murdered Africa in this terrible way?

There are questions about AIDS which I want to be answered. AIDS is not just a disease. It is a spiritual disaster to our people. It destroys families, sir. It turns children against parents. It turns lovers against each other. It has turned our society upside-down.

But what chills my blood is the paralyzing that I see amongst our leaders. Men and women who suffered and died for the liberation of South Africa are paralyzed like little rabbits in front of a vicious fox when they have to turn around and face AIDS.

I do not know what our leaders are afraid of, who they are afraid of. Are there, after all is said and done, humanoid shadows out there who scare our leaders witless?

And I say, sir, to the pharmaceutical organizations in South Africa: you have done enough! Your sham of a court case has been rebuked for what it is-an act of cheap advertisement for drugs which have been rejected in Europe, in America, and elsewhere.

On top of death, you are dumping more death on Africa. Why? I say, to every human being on this planet, AIDS is not a God-made disease! If it was, I would not be trying to fight it-half-educated, semi-literate, and stupid as I am. I say this disease was made BY people, and I am appealing to those people to stop, now! There are names which are being bandied about by frightened people in South Africa,

people who talk in whispers. One of the names that is mentioned is the name of the man called [Dr. Robert] Gallo. I say to Mr. Gallo:  
Remember your common humanity. You have done enough. Stop now!

[Editor's note: See Dr. Len Horowitz's monumental book *Emerging Viruses: AIDS & Ebola: Nature, Accident Or Intentional?* for a wealth of documentation placing Dr. Gallo, longtime head of the National Institute of Health (NIH) and National Cancer Institute's (NCI) Section on Cellular Control Mechanisms, at center stage in the AIDS arena.

Evidence suggests he created the AIDS virus about a decade before he received a lot of political accolades for having "discovered" it.]

I say to the pharmaceutical organizations: Sir, you are like octopuses. You have got tentacles sprawling all over the world. You play Jehovah [God] with the lives of our people.

But your tentacles can be lopped-off! You are driving African people into a situation where they will have to turn around and attack you with weapons. And if that happens, you will have only yourselves to blame. I am not threatening anyone. I am only articulating the anger that our people convey to me-as they lay dying, in empty shacks, skeletons wasted to nothing, with skins like brown wet paper.

I say: stop now, my brothers, in the name of our humanity! If your aim is to destroy Africa, say so. Let us fight, and at least die with honor.  
I say: four of my children are gripped by this terrible scourge. I cannot bear the prospect that I will have to bury my offspring before I die.  
It is unnatural and obscene. I say, again, to those shadowy organizations in America, and in England, and Canada, and elsewhere: STOP!

You have done enough. Turn off the tap of murder. You have killed enough. STOP!

Or allow us the right of all threatened animals to retaliate, with weapons, for what is being done to us. If there are, out there, the children of the serpent, the Chitauri, the walkers in darkness, let them know this: that I, Credo Mutwa, am not a brave man.  
But when I see my children ravaged by AIDS, when I see my children turning their eyes, turning away from me,  
I feel the courage of any beast that watches its offspring being slaughtered by a predator.  
You have done enough. Conspirators, you have done enough!

Do you know, sir, let me tell you one last thing before I stop. I, and a White doctor, are saving many of our people-not curing them, because we are not allowed to claim that we have a cure for this disease-but the herbal medicine that we use is making people, who have been condemned to go home and die, come back to life. And I am asking that the South African government and the United Nations, if they are not servants to Dark Forces, they must release this medicine and allow us to combat this scourge, until such a time as scientists can come up with a stronger medicine against AIDS.

I will not allow Africa to die! I am sorry, but I will not allow my people to perish! I am only doing my duty as a father and as a Black man,

and as a human being, in a country which is being deliberately murdered. I cannot accept, and will not accept, the fact that in the United States, the magazine called TIME, states that there are only 920,000 people with AIDS in the United States. And yet, in sub-Saharan Africa, there are close to 44 million. This is illogical! And I want to know the reason behind it. I'm sorry, sir, but this is how I feel!

Martin: Please don't apologize.

Credo Mutwa: These conspirators, sir, these ugly entities have shown a dangerous over-confidence, and it is high time we confronted them.

I cannot-you know, sir, what happens in South Africa is that a child who has got AIDS runs away from his family and hides himself. And if you, the desperate parent, try to go looking for your child, your child fights you and can hit you with stones and drive you away.

It happened to me, sir.

There are stories which newspapers never dare to print, which are happening in South Africa, centering around AIDS. And the newspapers in South Africa, which are directed by conspirators and liars, do not even try to stop the stigma, which they built-up, against AIDS and its victims. In fact, sir, they are making it worse, with the resolve that people who are suffering from this disease find that they are being rejected by their families. Men die alone, in shacks behind their homes. Women chase their husbands out of their homes. Men murder their wives, sir, because of the spread of AIDS.

I appeal to you, and the editor of The SPECTRUM-please, please, tell the world the hell in which we are living. Please! Like now, I am trying desperately to build clinics in South Africa, with the help of my initiate, Virginia Rachele, and others. But we are being blocked and frustrated at every turn. We are threatened.

My house has been broken into 3 times, and the seeds of the precious and endangered plant, which we use in helping our people, were stolen. But I was able to find more, and I intend to find a piece of land-God knows where and how-to plant them, so that this plant, which is on the brink of extinction, should come back and save our people, which it is doing. I appeal to the world, sir, and to all decent human beings, that the strangle-hold that the Chitauri, the Reptile People, have over humanity, should be broken once and for all. The death of Africa will lead to the death of the entire human race.

People must be aware of that, please. Thank you, sir. But, please, can you please tell me, sir: What should a half-educated man like me do? You know, sir, I expected my kids to bury me when I die. But now it seems it is going to be the other way around. What father can see his children being slaughtered in this way? What parent can allow such an ugly thing? What should a parent legally do against these monsters who have unleashed AIDS?

Everything points to the fact, sir, that AIDS is a man-created disease. In fact, I was telling Mr. David Icke, only a few moments ago, that I have traveled widely through Africa, as you know, and I can tell you one thing that scientists who study AIDS cannot tell you:

That people who die of AIDS, sir, immediately after death, show signs of people who have died of arrow poison-you know, as if they'd been shot with a poisoned arrow. They don't die, merely, of a disease, as would happen in the case of tuberculosis or cancer. Their lips are discolored in a way that I have seen happening with people who had been hit by poisoned arrows. What is it in AIDS that behaves like an arrow poison?

And, another thing, sir: It is said that AIDS began as a disease of homosexuals. But wait. In Africa, most homosexuals do not penetrate each other, sir, as they do in Europe.

African homosexuals do the sex act between each other's thighs, not in each other's, you now, back passage.

So, how does it come that these people get AIDS, when there is no physical contact with the body fluids between them?

Another thing: How does it happen, as I have seen now many times, that you find a family of four-a mother, a father, and two children.

You find, sir, that the parents are healthy, but the little kids have got full-blown AIDS.

Can someone, kindly, explain this to me, this phenomenon which I have seen in many parts of southern Africa?

Another thing: You find a man who has got full-blown AIDS, and a wife who is free from AIDS, and these people have got a child who is totally free from AIDS. How can one-can anyone on the Earth who reads your paper, sir, kindly explain this amazing phenomenon to me?

What, other than sexual intercourse, what is another thing that is spreading AIDS?

I suspect there is something else, but the doctors disagree with me when we talk at conferences.

I suspect there is another way by which AIDS spreads through people. Is it an insect, as I suspect, or is it a what?

I don't know. Please, let wise people out there help me, because these conspirators and their running dogs,

these people who work in shadows, are, literally, destroying Africa. And if Africa is destroyed, other races of humankind will follow-one

of them being the Black Americans in America. They won't survive the destruction of Africa.

What is the idea behind Africa's depopulation? I read a chilling book not so long ago, a book written about the "great"

[The word should definitely be contained within quote marks, to depict the actual, opposite meaning of "respect" for this very prolific,

now deceased member of a very major family among the so-called "elite" controllers. Credo knows very well that about which he speaks

so humbly!] White man, Bertrand Russell. Russell stated that, one day, the Western nations would have to decimate Black people, using war, famine, and disease. And this has happened.

I say, please, you Russell followers, please, you racists and Malthusians, you have done enough harm! Stop now!

Stop! In the name of our common humanity, and in the name of the Intelligence that obviously exists behind the Cosmos,

the Intelligence which human beings call by the cheap name, God, please stop now!

Stop, please! Stop!

Thank you very much, sir.

CREDO MUTWA REVEALS AIDS TREATMENT

The following is a transcription of a conversation between Credo Mutwa and Steve, who is helping him to communicate his information through this website. It was recorded on Sunday, April 29th 2001 in Johannesburg, South Africa.

Credo: "I wish to appeal to the world. First, I am not a quack or a charlatan or a sensationalist. I am an old man who has seen much. I wish the world to know that there is a faint ray of hope that emanates from South Africa.

It is a plant which is almost on the point of extinction, a plant called 'Suderlandia Fructosate'. This plant works miracles on people who have the terrible disease called Aids. And it is so miraculous that the miracles are seen within a week or a fortnight. A person, who was lying down on the point of death,

when given this plant, rises and has much energy and is free of depression and has a good appetite.

And I feel that as a nation as a matter of world emergency because the big scientists have not produced a viable safe treatment for aids.

I say that this plant should be planted by all caring governments, by all caring organisations and that it should be given to human beings free of charge."

Steve: "Absolutely. You know what I think is important though Credo, that people understand what to do with the plant."

Credo: "They don't do nothing sir, you are going to laugh about this. You plant the plant okay,

but then you take the little leaves from it and you put them in a tea cup and you pour much boiling water on it.

And then you let the cup stand there, like tea you know, and you just drink, the patient just drinks."

Steve: "The leaves and the red flower?"

Credo: "Yah."

Steve: "Mix them together? Do you need to dry them first?"

Credo: "No you can take them straight from the garden, because if you dry them too much they somehow loose some of their good spirit.

Now this is all you do. Now, there are good doctors I'm working with who are making pills out of this medicine.

But you know sir, I feel we are faced with a national emergency, a world emergency.

You know sir, what I say is this. I can't cure the people of Africa without curing the people of the Caribbean,

because Aids is running around the world. If I cure the people here and they get better, more Aids will come in and eat the same people

whom I tried to cure. So the whole world must be cured. Look, can we say this? Nobody will arrest us or anything?"

Steve: "Well yes, I mean it's not against the law to say this, it's in our rights to speak."

Credo: Thank you sir. I will tell you why. Originally the plant of 'Suderlandia' was all over South Africa. And I will tell you what used to happen.

There was a funny little grayish brown bird, which used to feed on 'Suderlandia's' and this bird was very edible.

And starving people used to hit it with katties (slingshots) and kill it. Now the bird is gone almost.

And now... so the land here is difficult to cultivate&

Steve: The seeds are not being spread.

Credo: "Yah, yah. What is happening is you need to take a fine sandpaper and sandpaper each little seed.

The seeds are very tiny, tinier than grape seeds. And you sandpaper each seed and you plant it in a small blompot (flower pot).

And you allow it to grow until it is about maybe four inches, three inches high. Then you take it and you plant it in the big veld (grassland).

You can make a big garden, maybe twenty acres or so and you plant there. They just grow. There are farmers who have already planted them but they are too few.

This is a world emergency and we must not be selfish.

In the last few years or so there has been many claims made by people about plants and herbs, which they say are beneficial in the fight against aids. Some of these claims have proven to be false and at best have proven to be exaggerations.

But in South Africa there is plan, which is on the brink of extinction.

This plant is called by white people in English 'Suderlandia Fructosate'. This plant is also called by the Afrikaans people 'kankerbos', which means cancer bush or 'kalkoenbos', which means turkey bush.

Now this plant was known in South Africa and other parts of Sub-Saharan Africa for thousands of years.

It was an anti-depressant, it was appetite booster, it was also and still is a dramatic booster of the human immune system.

For many years African people and Xhosi-xhosi people and Xhosi-san people as well as Bantu people used this plant in the fight against cancer, and it was very effective there, and it still is.

And they used it also in the fight against diseases like tuberculosis before there was streptomycin and other drugs to fight tuberculosis.

In the old days when ordinary venereal disease like gonorrhoea, syphilis and others were as incurable as Aids is today, our people used this plant to fight those diseases.

If they had not had this plant, the black people of Southern Africa would have been destroyed just as the Australian Aborigines

were destroyed, and other races of aboriginal people in other parts of the world were brought to extinction by diseases brought in from Europe.

Now, we have found... me and a group of doctors, doctors like Dr Nigel Gerica , Dr Ben van Wyk, Dr Albreght, Dr Mayeng.

We looked at this plant and we found that it was having dramatic impact in creating a better quality of life.

People with full-blown aids, people who had been sent home to die. Not only did we, the five of us,

use the plant to help many people to a better quality of life within the space of a month or a fortnight.

There is a lady in a hospital in Zululand, a white lady who has saved many, many people who have been condemned to die of Aids

in this hospital. Then I also have my student, Virginia Ratele, who has saved many people who were condemned to die of aids.

She has done this in her tribal village near the town of Kuruman.

There is something very strange that is happening now. I and Virginia, who live amongst the mountains of the Magaliesberg, are being terrorized and threatened by white men who are very professional in the way they do this.

They are able to neutralize the security lights and the alarms with which the house in which we live are fitted.

They are able to break in through the doors even though we put devices in the keyholes to stop people from doing so.

These are not your run of the mill thieves; they are professional men who know exactly what they are doing.

I feel that all of human kind is facing an emergency, and that all greed and selfishness should be swept away, and this plant should be made available to nations in the world.

The way the plant grows, I know it can grow in Nazareth, in the United States, India and in China and in other places where Aids is

rampant. I do not claim that this plant, dramatic as the results are is the cure for Aids. I say it is a stopgap, which must be used by all human kind in order to halt the disease of Aids.

Until such a time as the pharmaceutical scientists can come up with a real cure, a cure which is not at all toxic.

I say that this plant 'Suderlandia' is not at all toxic.

It was even used by men such as President Paul Kruger of the South African Republic of 1899 or thereabouts.

And Paul Kruger who used this plant lived to be a very old man, and at one time Paul Kruger tried to send a consignment of 'Suderlandia' to save the life of a German Prince who had cancer of the throat.

But the ship that sailed from Mozambique was too slow and arrived too late to save the prince.

I say this that the United Nations should take over the growing of this plant because we are faced with a world emergency.

We are faced with a disease which devastates all of human kind without thinking. And we have got to stop Aids not only in Africa

but in other parts of the world too. This disease has got to be stopped; it is not a natural disease.

I have dealt with Aids now for the last five years and I now firmly believe, I Credo Mutwa, that Aids is a manmade disease.

The way it behaves in the human body is like no God created ailment ever does. The disease shows a Satanic intelligence and I appeal to all people throughout the world, that here in South Africa is a faint ray of hope, which is however to be drowned by greed, by selfishness and cowardly secretiveness.

I say that this plant belongs to all humankind.

It belongs to the little children dying of Aids; it belongs to the men and women who are ravaged by this ailment.

And I believe firmly that scientists will be able to create a cure for Aids out of this plant.

And I am making this worldwide appeal because our government appears totally indifferent to this offer, which I am making freely for all humanity.

Our government does not seem to be able to take the one step, to have this plant planted throughout South Africa

as a matter of national emergency.

One 'Suderlandia plant' is capable of treating 10 people, and we need plantations of this plant.

And I say that this plant should not be the plaything of greedy businessmen. It should not be the plaything

of thieving pharmaceutical organizations that steal Africa's treasures and lock them up in computers and call them their intellectual property.

I say this that this plant belongs to all the humankind, and that the greedy organizations leave it alone.

We do not need a disease like Aids to reduce the population of the world.

I am told that this disease was created specifically to destroy Africa and I now believe this.

After more than five years of dealing with this disease.

And I say this. I will not allow Africa, a misunderstood and misrepresented nation, a misunderstood and misrepresented continent, to perish, to suit the designs of conspirators.

I say that Africa must live, I say that India must live, China must live, and even the United States must live.

There is hope, a little ray of hope, a green ray of hope, emanating from South Africa, and I call on all human fellow human beings

to make it larger, to spread hope throughout the world. I beg to remind all that there was once a time malaria devastated whole communities throughout the middle east, throughout Africa and elsewhere.

And out of South America there appeared a ray of hope, which grew, larger and larger.

That ray of hope was called the bark of the Cinchona tree, quinine.

And quinine saved thousands of lives, which would have otherwise been swept into oblivion.

I say that people should not look upon me as a quack or a crank.

I am a researcher, self-taught. I am a writer of books, which have sold worldwide.

I am an inventor and a historian and a traditional healer.

And I say please, those who don't believe me come to South Africa and look at this plant yourself.

I say that no organization has the right to call this plant it's property, none.

And I say let hope for humankind be lighted from the southern tip of Africa to overspread the whole planet.

If Aids were created to reduce the human population, then it is a self-defeating thing.

The only way to make people breed less is to end war in the world.

When there is war shaking continents people breed more.

People breed out of fear. People breed out of insecurity.

You, the hypocrites of the United Nations, you the liars within the walls of the United Nations, you,

I challenge you to create a safer world and not a world rotten with disease.

Thank You.

Credo Mutwa

CREDO MUTWA AND THE  
AIDS GENOCIDE IN AFRICA

By David Icke

I have just had a phone conversation with Credo Mutwa, the Zulu shaman and official historian of the Zulu nation, who lives outside Johannesburg in South Africa.

He told me of the horrendous suffering and death caused by Aids in southern Africa - and by the pharmaceutical poisons, like AZT, which claim to "treat" AIDS while, in truth, destroying the immune system of the patient. In other words...causing AIDS.

NO ONE has ever been cured by AZT because it is a former chemotherapy drug that was withdrawn from use in cancer treatment for being too toxic. Imagine what that must mean given the toxicity of chemotherapy drugs still in use!

Interestingly, Credo said that he had seen a purple-grey "colouration" on the lower lip of people dying of AIDS that was exactly the same as those he had seen dying after being hit by a poisoned arrow. He also asks why he has seen children with AIDS while their parents do not have the "disease".

Credo says he has developed with a doctor a herbal treatment for AIDS that is having dramatic results in vastly increasing the production of white blood cells - the body's immune system - but he is under enormous pressure to stop its use. He needs help urgently to increase its availability.

We are trying to get a substantial article from Credo on all these issues, but we need to help him get on the Internet to make this possible. See related appeal.

CAN YOU HELP CREDO MUTWA IN JOHANNESBURG?  
By David Icke

We urgently need to get Credo Mutwa connected to the Internet so he can communicate the truth of what is happening in Africa. At the moment he is isolated with just a mobile phone that can only take incoming calls. He has a computer now, but we need someone in Johannesburg who can set it up for him and teach him how to use it.

IS THERE ANYONE OUT THERE WHO CAN HELP?  
IF SO, PLEASE CONTACT THE WEBMASTER IMMEDIATELY.  
THANKS SO MUCH.
