GreenDex

The following attractions, activities, tours and accommodation have been selected by Lonely Planet authors because they meet our criteria for sustainable tourism. Some places are run locally or by a community (eg a women's group or church) and profits remain in the community. Some are also unintentionally very 'green'; they may have no electricity, and grow or catch their own food. Compared to consumption in the West, these places are very economical with resources. We've also included ecolodges that are upmarket compared to the local village guesthouse, and offer ecotours (such as bird-watching), which allow communities to make a living from the natural environment, and provide an alternative to selling up to mining and logging companies.

We want to keep developing our sustainable-travel content. If you think we've omitted someone who should be listed here, or if you disagree with our choices, contact us at www.lonelyplanet.com/contact and set us straight for next time. For more information about sustainable tourism and Lonely Planet, see www.lonelyplanet.com/responsibletravel.
