## Introduction

A proverb is like a diamond. A diamond was a huge mass of carbon, one part of which is shaped and compressed by huge pressure over millions of years to produce something beautiful and timeless. In a similar way, great proverbs are the product of lifetimes of struggle and enlightenment, shaped by the pressures of existence on this planet into timeless pieces of wisdom that live on forever, and find their ways into the hearts of other humans living in other times, and inspire them to greatness.

Time travel has not yet been invented; therefore, it is practically impossible to send ourselves to the past, and speak to the greatest minds who are no longer with us today, and to learn from their wisdom. We do not need to rely on time travel, however: their words have survived, many of them in the form of proverbial sayings.

The modern world is relentlessly busy. Long ago, things were different. Wise men and women had the time to think at leisure, and to come up with nuggets of strong information that stood the

test of time, and that we still keep in mind today.

Wisdom is handed down from generation to generation across the world. A lot of this wisdom is in oral form, and uses a lot of words. Proverbs are instances of wisdom concentrated into its most powerful form: because it is most impressive when you use very few words to convey a deep and profound meaning.

Over time, wise women, mystic shamans, scientists, artists, philosophers, and leaders of people have come up with proverbs that have stood the test of time. Aphorisms are today created by the bulk aggregating power of social media, and the collaborative web ensures that the power of sharing and creation of text posts leads to viral content and propagates proverbs in the form of memes quicker than ever before in history. We live in exciting times!

Knowing a large number of proverbs is useful in many real life situations. For example, if you are giving a speech, sprinkling well chosen proverbs throughout your talk is a good way to appear smart without putting in too much effort on your own. The same is true of formal writing; it is like borrowing wisdom from a public

source. In addition, using and knowing proverbs leads to benefits in your own life: you will see that you become less wordy and more pithy in your thought process and expression.

This book provides a large number of puzzles that will guide you towards some of the greatest proverbs, sayings, and short quotes of all time.

You will exercise your brain in this quest for wisdom.

Have fun!

## Well of Wisdom 1

### Basic Structure

In each Set of clues below, you will need to identify which proverb is hinted at. A clue is provided to help you:

In each puzzle, you are given half the letters in the proverb, with every alternate letter being replaced with the underscore symbol ( \_ ). You have to reconstruct the original proverb from the fragment provided.

You should try to guess the shorter words first.

I have given you a good mix of short, well-known proverbs, and more obscure ones, so that you will both achieve and learn.

Answers can be found at the end of the book.

## Well of Wisdom 2

### **Basic Structure**

In this format, everything is pretty much the same as it was in the previous chapter, but the format of the main clue given to you is different. Here's how your mission will be different:

Your main clue takes the letters of each word in the entire proverb, jumbles them up, and gives them to you. This boils down to you solving a series of anagram puzzles, one for each word! Each word will be kept separate, so that it makes things easier for you. All capital letters will be converted to lowercase, though this should not cause too much confusion.

You should try to guess the shorter words first.

I have given you a good mix of short, well-known proverbs, and more obscure ones, so that you will both achieve and learn. In case you are unable to guess a particular proverb, you can use the solutions to improve your knowledge base for the future.

Answers can be found at the end of the book.

## Well of Wisdom 14

### **Basic Structure**

In this format, everything is pretty much the same as it was in the previous chapter, but the format of the main clue given to you is different. Here's how your mission will be different:

Your main clue takes the letters of each word in the entire proverb, jumbles them up, and gives them to you. This boils down to you solving a series of anagram puzzles, one for each word! Each word will be kept separate, so that it makes things easier for you. All capital letters will be converted to lowercase, though this should not cause too much confusion.

You should try to guess the shorter words first.

I have given you a good mix of short, well-known proverbs, and more obscure ones, so that you will both achieve and learn. In case you are unable to guess a particular proverb, you can use the solutions to improve your knowledge base for the future.

Answers can be found at the end of the book.

### **Basic Structure**

In this format, everything is pretty much the same as it was in the previous chapter, but the format of the main clue given to you is different. Here's how your mission will be different:

Your main clue takes the letters of each word in the entire proverb, jumbles them up, and gives them to you. This boils down to you solving a series of anagram puzzles, one for each word! Each word will be kept separate, so that it makes things easier for you. All capital letters will be converted to lowercase, though this should not cause too much confusion.

You should try to guess the shorter words first.

I have given you a good mix of short, well-known proverbs, and more obscure ones, so that you will both achieve and learn. In case you are unable to guess a particular proverb, you can use the solutions to improve your knowledge base for the future.

Answers can be found at the end of the book.
