

CHRONOLOGICAL BIBLIOGRAPHY OF ARTICLES BY EDWARD J. GÜBELIN

"I would like to be remembered through my publications. I do not want a monument or posthumous honors. I only want my articles to still be used and still considered valuable. I would wish a list of all my publications could be published, including periodicals and dates, so that later gemologists would have complete reference of them."

Edward J. Gübelin

from A.J. Berenblatt, "Gem legends: The gemologist's gemologist"
National Jeweler, Vol. 35, No. 11, 1991, p. 30.

This bibliography is based on Dr. Gübelin's own compilation from the early 1990s, which was revised and expanded in 1994 by Richard W. Hughes and subsequently updated by the authors. It is arranged chronologically by date of publication. Within each year, articles for which Dr. Gübelin was the sole author or lead author appear first, followed by articles that have other lead authors, in alphabetical order.

1939

Gübelin E.J. Die Mineralien im Dolomit von Campolungo (Tessin). *Schweizerische Mineralogische und Petrographische Mitteilungen*, Vol. 14, pp. 326–442.

1940
