VOL. XLII. No. 1.

THE MASTERCRAFTSMAN OF THE JEWELERS AND SILVERSMITHS.

A LITTLE over 400 years ago—on the 3d of November, 1500—a boy was born to John Cellini, musician and architect, at Florence. "Let him be welcome," his father exclaimed when he received the happy tidings, and thus "Welcome" (Italian, "Benvenuto") became the child's name. At a very early age the boy evinced great inclination for drawing and molding, and, contrary to the desire of his father, who fain would have him become a musician, he entered a goldsmith's shop as an apprentice. But to please his father as well, he learned to play upon the flute besides. When 15 years of age he was banished, together with his brother, for six months from the city of his birth as a punishment for a brawl in which they became involved. This violent and unruly tendency accompanied him all through life, constantly getting him into trouble and distress. At the age of 19 years he went to Rome without the knowledge of his parents, worked there for a time and then returned to Florence. In 1523, Benvenuto was compelled to

leave his home a second time on account of an evil deed, getting away disguised in ecclesiastical garb. He took permanent

sels and trinkets, medals and seals were the fruits of his labors in this period. His liking for combat and danger was fully gratified when, in 1527, the Imperial army, under Charles of Bourbon, marched on Rome. Benvenuto just happened to be on the walls when the Imperial troops entered the city. By a lucky shot he succeeded in killing the leader of the hostile army. Next he fled to the Angel's castle and assisted in its defense, taking charge of a cannon. In the greatest distress the Pope decided to melt down his treasures to protect them from the covetousness of his adversaries. He conferred this task upon Cellini, who took the precious stones and pearls from the tiaras and other pieces and melted down the golden settings. The gems, etc., were sewed into the vestments of the Pope and other dignitaries. Unfortunately, Cellini could not resist the temptation of keeping a portion of the gold himself.

BENVENUTO CELLINI.

sojourn at Rome, entering the service of Pope Clement VII. as a goldsmith as well as a musician of the Papal orchestra. Ves-

ree, Cellini went for some time to Mantua and Florence. At the breaking out of hostilities between his native town and the

Diamonds.

In the rough diamond market (London) the uncut diamonds are graded as follows:

BLUES.—*First grade called Jaegers.*

Second grade called Wesselton.

These are fancy stones, cost very high, and comparatively few are sold.

WHITE.—*First grade called Crystals, the finest white.*

Second grade called Silver Cape; are "very fine white color."

Third grade called Fine Cape, from which we cut the diamonds we call Fine Commercial White.

Fourth grade called Cape; runs on the yellow shade and is lower grade than we find sale for.

Still lower grades of rough stones are called Byewater, Off Color, etc.

We have just cut up a lot of Silver Cape rough stones, which are very fine white and next to the finest grade of white.

These diamonds are finest American cut, round, brilliant and well spread.

We can sell the perfect diamonds from this lot at following list prices and subject to our regular book discount:

$\frac{1}{2}$ Carat Diamonds for \$148.00 per Carat List.

$\frac{3}{4}$ Carat Diamonds for \$170.00 per Carat List.

1 Carat Diamonds for \$186.00 per Carat List.

The imperfects at much lower prices.

YOU CANNOT MATCH THESE DIAMONDS ANYWHERE ELSE AT NEAR THESE PRICES.

We name these prices as samples only. They are taken from our regular line. All our prices are equally low. See our book for full line.

Pope, he was called back by the latter, receiving full pardon for the embezzlement of the gold, to which he pleaded guilty, and received the post of stamp master at the Papistical mint. On the occasion of another misdeed he was also shown mercy by Clement VII. When Benvenuto's brother was killed in a quarrel he took revenge on the murderer by plunging a dagger into his neck from behind. The Pope, as related by Benvenuto, punished him only with a fierce side-glance. Paul III., the successor of Clement VII., also granted Cellini his favor. For the assassination of Pompeo, a goldsmith of Milan, whom Cellini struck down in the street in the midst of his companions, the bold malcreant was given a safe-conduct.

Among the numerous works which the artist created for Paul III., especially noteworthy was the golden cover of a breviary, which Cellini was allowed to hand in person to Charles V. as a present of the Pope, when that potentate came to Rome on the occasion of his expedition against Tunis. The many enemies, however, whom Cellini had made by his violent manner gave him no rest. When matters became too troublesome for him he went to France, but returned soon, as Francis I., taken up by wars, had no use for the arts of peace. Scarcely returned to Rome, he was thrown into prison on the charge of having stolen jewels from the church at the investment of the Angel's castle. By the exertion of all his powers, he succeeded in escaping in an adventurous manner, but soon after was placed under more severe arrest, from

which he was liberated only by the intervention of Francis I., who wanted to draw him to Paris.

New tasks awaited him in France. While so far he had been active only in the field of the small arts as a goldsmith, he now tried his luck successfully in the plastic art on a large scale. In this respect his second trip to France marked an important turning point in his life. He cast the large bronze-relief of the nymph of Fontainebleau, which is now in the Louvre at Paris, and worked on the colossal statue of Mars, whose head was so large as to accommodate a dulcinea of one of his assistants, who hid her there for a time. He returned, in 1545, to Florence, remaining there the remaining 26 years of his life. The Duke of Tuscany, Cosimo I., received him with open arms. The chief work of his life, the "Perseus," was then created, the casting of which he accomplished with great difficulties. When the work was unveiled there was a general enthusiasm. Hundreds of sonnets eulogizing him and his monument were fastened to his door, after the fashion of that period. Of his numerous other creations, the following still exist: the bronze busts of the duke and of Bindo Altoisti. His last large work was a life size Christ on the Cross, of marble, which is now in the Escorial at Madrid. A queer fact in his life is that, in 1558, he entered the clergy. Two years later he was again released from his vows, and married a short time afterward his housekeeper, Piera di Parigi, with whom he had already had two children. No

friendly star ruled over his last years on earth. Penury and sickness were his last companions, until he departed this life in 1571.

These are, in brief, the events forming his career, in which the good and the evil were most strangely intermixed. His character was the outcome of the times in which he lived, when brutal force alone was the law. His importance as sculptor can be readily judged from the works preserved, but it is more difficult to do justice to his ability as a goldsmith. Of the few authentic pieces of goldsmithing of his work extant, the well known salt cellar does not reflect the greatest credit upon him. The two chief figures are not at all proportionate in size to the remaining accessories; their position is outright unnatural. Perfect, however, is the technical workmanship. Both figures are chased, colored enamel alternating with bright gold. The artist himself instructs us regarding the idea underlying the whole composition. The two main figures represent the Earth, the producer of the spices, and the salt-purveying sea is embodied in the image of Neptune. They are seated opposite each other, with their legs interlaced, "as we observe in the case of firths and promontories." The Earth is seated on the head of an elephant, over whom a green enameled cover is spread. Beside her appears a dog, a lion and a salamander, the heraldic animal of Francis I. The pepper receptacle, standing upon the gaily enameled soil, has the shape of a triumphal arch or a temple. On the lid re-

poses a female form, while smaller figures adorn the edges. Neptune is enthroned on a shell. In the blue waves of the sea, in which sea-horses and dolphins disport themselves, floats a richly decorated bark, which holds the salt. The recess of the base of ebony is adorned by the personifications of the winds and times of the day, the latter much influenced by the sculptures of the Medicean graves by Michel Angelo, for whom Cellini always entertained great admiration. The artist finished the salt cellar for Francis I. in 1543. He received 1,000 gold ducats for its production. It has been found that the weight of the piece corresponds almost exactly to this quantity of gold. In 1570, Charles IX. of France presented the salt cellar to the Archduke Ferdinand of Austria, who had represented him at the wedding of Elizabeth of Austria to the French king at Speyer. From the castle Ambras, in Tyrol, it went, in 1806, with other valuables, to Vienna, where it is now kept in the "Hofmuseum."

Further details regarding similar goldsmith's works by Cellini are furnished by the marble base of the Perseus, whose rich decoration is placed to the account of Cellini, the "goldsmith," and perhaps the bust of Duke Cosimo, at the National Museum in Florence. The fantastic ornaments of the coat-of-mail also give one an approximate conception of what many of the ornaments mentioned in his writings may have looked like.

The real fame of Cellini as a goldsmith is based less upon his works than on his autobiography, which Goethe's masterly translation into German* has rendered accessible to the widest circles. It has glorified his name to such a degree that for a long time almost every good piece of goldsmithing from the 16th century was attributed to him. Less known are his essays on goldsmithing and sculpture (translated into German by Justus Brinckmann), which contain interesting information respecting the working methods of that epoch. Although the name of Cellini has, during the last decades, been partly divested of the fame which he has showered upon himself most generously, he has in a certain way maintained his position as the foremost representative of the art of goldsmithing in olden times, since he is one of

the few who possessed with the greatest skill of the artisan the qualities of a creative artist. He is still a vivid example of the old intimate connection of art and tradesmanship. Besides, he is the only one of the old masters whose powerful personality stands distinctly and clearly before us. It is owing to this fact that the 400th anniversary of his birth has been celebrated by the craft in all parts of the civilized world.

Two beautiful and costly silver vases, which formerly belonged to a relative of

BUST OF COSIMO DE MEDICI, BY CELLINI.

IN THE PALAZZO DE BARGELLO, FLORENCE.

Emperor Constantine the Great, were unearthed a few weeks ago near the town of Nisch, in Serbia, which is chiefly memorable as having been Constantine's birthplace. Of their real value the finder had not the faintest conception, but he knew that they were worth money, so he took one to a goldsmith in Nisch, who bought it, and being as ignorant of its real value as the peasant, melted it in a day or two. Fortunately, the second vase came by chance into the possession of Tschachotis, who is the Russian Consul at Nisch and a well known antiquarian and numismatist, and he at once saw that he had acquired a relic of surpassing interest. It did not take him long to decipher the inscription.

The Old Clock on the Stairs.

WHERE can you find a child who has not read and, perhaps, committed to memory that beautiful and famous little poem of Longfellow's which has for its theme the significant refrain of "Forever—never! Never—forever!" That little poem which is so full of pathos, and not only recalls the past but looks with something like longing toward the future. In its lines one can see the beautiful nature of the writer, a nature which everybody loved and one which was full of sympathy for all mankind.

Everybody who reads at all loves the memory of the author of the above named poem and there are none who love that memory more than the students of Bowdoin College, from which Longfellow was a graduate in the class of 1825 with Hawthorne and other famous men. All about Bowdoin there are trees named for Longfellow and places which are always pointed out to the visitor as being associated in some way with the name of the great poet.

In one old house not far from the campus there stands on the stairs an ancient timepiece, a timepiece which answers closely the description of the old clock on the stairs in the poem. This clock is said to be over 100 years old, and to look at it nobody would doubt it. The woman who owns it takes great delight in saying that that is the old clock of which Longfellow wrote, and through all the years that the clock has been in her possession it has been preserved sacred as the original of the "Old Clock on the Stairs."

From the fact that the lady has been so persistent in her claim in regard to this clock, many of the students have come to look upon it in the same light, and the feeling has grown so much through the long years that it has stood there, that this old clock on the stairs in Brunswick is now pointed out to visitors to the old house as the clock of the poem. In spite of the fact that students and faculty would be glad to believe this, if such a thing were possible, anybody who has looked carefully into the description of the house and the clock as related in the poem, and who has studied the history of the poem itself will see that the surroundings of the clock in Brunswick do not coincide with the surroundings of the clock in the poem.

According to the history of the poem

*Cellini's autobiography has also been translated into French by Leopold Leclanché, and into English by Nugent, Roscoe and Symonds.

CHESTER BILLINGS & SON.

1840 Randel & Baremore 1866 Randel, Baremore & Co. 1880 Randel, Baremore & Billings	IMPORTERS OF DIAMONDS OTHER PRECIOUS STONES AND PEARLS 1840 DIAMOND JEWELRY 1900	New York 58 Nassau Street 29 Maiden Lane London, E. C. 22 Holborn Viaduct

the clock referred to stood in an old house in Pittsfield, Mass., known as the "Plunkett" house, and was owned Mrs. Longfellow's maternal grandfather. It was in this house that Longfellow was married, a fact which is beautifully brought out in the poem. But in spite of this there are many points of resemblance between the house and clock in the poem and those in Brunswick. The poem speaks of the porch across which "Poplar trees their shadows throw." This answers the description of the house in Brunswick. "Half way up the stairs it stands," says the poem, and the same is true of the clock in Brunswick. But the one thing more than all others which might seem to refer to the Brunswick clock is that part of the poem which tells of the partings.

"All are scattered now and fled,
 Some are married, some are dead;
 And when I ask with throbs of pain,
 'Ah, when shall they all meet again?'
 As in the days long since gone by,
 The ancient timepiece makes reply—
 'Forever—never!
 Never—forever!'"

This stanza might easily be applied to the parting of his classmates in college and, very likely, it may be so, as the stanza seems to point to young people, since it says that "some are married."

As the old clock in Brunswick was there on the stairs when Longfellow was in college he must have seen it many times, and whether or not this is the clock in the poem it is far from impossible that he might have gained some inspiration from it and have had it in mind when he wrote the lines which seem to fit so admirably the scattering of his class. At any rate the poem is beautiful and there is no particular harm in the belief of the students that they live near the old clock of which one of their most famous graduates wrote.

More Trouble for Promoters of a Tontine Diamond Enterprise.

IONIA, Mich., Jan. 26.—A week ago the officers and stockholders of the Michigan Tontine Investment Co. (diamond dealers) were arrested on a *capias* at the instance of Charles M. Northrup, of Lakeview, and bonds were fixed at \$300 each. They refused to furnish bonds and the Sheriff took them into custody but did not lock them up as all are prominent professional business men of this city. He gave them the jail limit.

The *capias*, returnable on Feb. 5, alleges fraud and misrepresentation in procuring certificates and is against Fred. Cutler, Jr., Charles P. Locke, W. C. Snell, J. H. Fox, Willis S. Peck, H. Horrigan, J. B. Chaddock and A. E. Kelly. The claimant, Northrup, paid for one week's board and the time expired on Friday. He refused to pay further because the Sheriff had not confined the prisoners to the county jail, and they are again practically free. The amount of Northrup's claim is \$164 and he threatens to make an attempt to collect it from the Sheriff.

The Love for Jewelry.

A REVIEW OF THE FASHIONS OF THE PAST YEAR AND A LOOK INTO THE FUTURE.

BY ELSIE BEE.

THE splendor of the 20th century which is now upon us is nowhere more marked than in the realm of the jewelers and goldsmiths. Their ancient and honorable crafts have developed in the attempt to satisfy one of the primæval and inherent instincts of mankind, the love of beauty—a love which is so enduring in its nature that one of the world's great religions typifies the environment of its paradise of eternity by walls of precious stones, gates of pearl and streets of gold. The instinct for beauty and for the adornment of the person stirred in the breasts of those first human beings whom the mists of accumulated ages have swallowed up and of whom we know only what the archæologists discover by the excavation of ruins and unsealing of tombs wherein they find the rude yet often essentially excellent ornaments of the times.

As has been aptly said, "Whatever builds upon the sure foundation of the needs, desires and tastes of the whole human race will always live." If one were to enter into the subject of the evolution of jewelry the Bible would be found the best guide to its earliest historic stages. Jacob's wooing of Rebecca with earrings of gold is a familiar tale; the chain was then, as indeed it still is, an emblem of dignity and honor; the ring, a token of love, affection, friendship, confidence. And as an instance of the theory that life moves in great recurring cycles, that all which is has been and will be again, it is curious to note that probably no one of our articles of decorative jewelry to-day can claim absolute originality. All have had their prototypes and in some form humanity has already used and delighted in them all—chains, rings, bracelets, brooches, etc. Even the pendant, which is very salient in to-day's fashions, appears to have been a "fad," if the word is here admissible, of the ancient Greeks who used it as a talisman and engraved it with scenes from the hunting fields and the sea, or with the heads of warrior heroes of their race.

It is not the object here to trace the long past, but to note briefly those modes which flourished during our last year and, being still full of vitality, have passed over the threshold into the fresh life of the new century. When 1900 was yet young, women had already realized that they might wear what they would, provided only it were beautiful; and, consequently, all through the fleeting days there has been a reaching out into untried paths, a widening of the bounds, until a simple catalogue of the various articles that may enter into the toilette would be imposing through its length alone. There are a few events of New York life which stand forth as guides on fashion's roadway—the horse show in the Fall, the beginning of the opera in January and the Easter season. The first of these this year demonstrated unmistakably that "everything goes," and for the very good reason that the jewelers and society being in perfect accord—one in heart

and mind—as to the ethics and aesthetics of personal ornament, the former have put forth prodigious and untiring efforts in the development of a finer character in their art; with what success need not be said to those who have seen the wonderful exhibits of the Paris Exposition, or who note with attention the manifold attractions of the shops and the delightful creations which enhance the costume of well dressed men and women. Everywhere—at balls, dinners, weddings, receptions, in theater and church, in carriage, on elevated trains and cars—the flash of gems, the glow of gold, the luster of silver greet

JEWELRY WORN WITH THE STREET COSTUME.

the eye; and it is but simple justice to say that glaring exhibitions of bad taste in the use of such things grow ever rarer. Side by side, indeed almost with equal pace, have progressed the expansion of the jewelers' domain and the education of the public in the artistic employment of all the well conceived articles to which they give such ready welcome. Having elected to make herself radiant with the most artistic and becoming accessories that can be found, the American woman has been doing so with the cleverness, the keen perception of that which is harmonious and fitting, for which the world has learned to render her homage.

Royalty and diamonds have ever been associated, and it is, therefore, not strange that in a country of uncrowned kings and queens this stone should lead all others. Referring to one of the social events already alluded to, the opera, we find it

this season a veritable "jewel song." So tremendous is the display of dress, even greater than last year, in the parterre and grand tier boxes, that the ordinary spectator is likely to be as much enchanted with the fascinating drama of fashion and life there, which the *haut monde* enacts with consummate indifference to watching eyes, as with the divine strains that fill the ears. And first in this display must be mentioned the crowns, tiaras, aigrettes and other leading coiffure ornaments. With grace that might have come down through a long line of royal blood are they worn, and the combined treasures of Solomon and the Queen of Sheba could hardly produce anything to outrival the preciousness of some of them. The diamond reigns supreme in these ornaments, yet in the making of not a few tiaras, the opaque color of the turquoise contrasts sharply with the glitter of the king of stones, or the velvety hue of the emerald mellows and enriches it. While tiara or diadem represents the important piece and demands a certain noble poise of the head, the light, dainty aigrette, with its jeweled ornament, is perhaps the most adaptable and becoming of the various hair accessories. The collars of diamonds or pearls, or the two gems in combination; the ropes of pearls, the great diamond sprays on the corsage, the crescents, the large diamond hair brooches stand out as commanding features in the great whole of richness and elegance at this grand function on those particular nights which the *élégantes* choose to make memorable.

Taking its rise in Paris and familiar to alert jewelers and connoisseurs for some time, *l'art nouveau* was, nevertheless, an unknown quantity to the rank and file until the past Summer. Now it is expressed, to some extent, in every grade of jewelry from highest to lowest. The comment has been made that this new phase of the craft appeals too entirely to a critical and highly educated mind; that its exploitation of excellence in art renders it less suitable to the purposes of personal adornment than those styles to which we have been accustomed; that it is better adapted to the curio or art collection than to the jewel case. It can hardly be denied that a sunburst of diamonds, a pearl or turquoise crescent, a glowing opal brooch with *encadrement* of dazzling brilliants is a more effective aid in building up a striking ensemble in dress than is an exquisite ornament of gold and enamels in some Egyptian *motif*, let us say of water, lotos and sacred bird, with jewels as simply a harmonious part of the design; for minute attention must be directed to every detail of such an article, in order worthily to appreciate its meaning and beauty. Yet the new art has gained instant approval and made itself felt not only in its own distinct aspect, but in its influence on existing styles. It delights the connoisseurs and may prove the leaven to further elevate jewelry designing. But the glory and beauty of gems pure and simple, with as little distraction as possible of mountings and adventitious ornament, vibrates a note that is very strong in the popular taste, and the "new art" and the old seem likely to run their course together. So decidedly elastic is the term "new art" and so com-

prehensive its field, that it is difficult to compress a clear idea of it into a brief paragraph. Its *motifs*, however, thus far, have been Egyptian, Greek, Roman and Celtic. It has employed gold and silver, enamels (both opaque and translucent) and gems, but these latter somewhat in subordination to their environment. We have had *nouveau art* necklaces, buckles, pendants, brooches and watch cases and some traces of it in rings.

Among facts that seem to call for mention is the rise to familiarity, during the year, of turquoise matrix. Wherever the pure turquoise has been considered appropriate there may the matrix be introduced instead. Opal matrix, also, is not unknown. The popular affection for turquoise remains as strong as ever, and one reason for this may be the facility with which it harmonizes with all those dull shades of silver now so fashionable and with the various colors of gold which abound. But whether with or without reason, women, and men, also, cherish the turquoise, and the mysterious beauty of the opal casts its spell over countless hearts.

The increasing prices or scarcity of diamonds, fine rubies and emeralds may have something to do with the influx of less valuable stones which the past year has witnessed in common with a year or two preceding. The peridot, or evening emerald, of long ago has again made its pleasing green tint familiar. Montana sapphires, deep blue and also fancy colored, have attained deserved fame. Mexican opals and turquoises, tourmalines, beryls, ruby-red garnets, yellow spessartite, colored fresh water pearls, moonstones, amethysts, topazes, chrysopters, aquamarines, hyacinths or jargoons, as well as jade, lapis lazuli, agate, bloodstone, cornelian, coral, etc., etc., all share in the reign of color which obtains in the gems and substances utilized by the jewelers.

The beauty of baroque or irregularly shaped pearls has made itself widely felt; in fact, the spread of this fashion in the past year has been almost phenomenal. Especially do these pearls lend themselves to the requirements of the new art, or to a phase of art which seems destined to be intermediate between the purely new and the old. The fancy of the designer manipulates these gems of varied and fascinating outline in hundreds of ways, but it is, perhaps, principally in the brooch, pendant and pin that they appear.

Cuttings, too, have been greatly varied during the year that is gone. Cabochons and round topped forms, even in rubies and emeralds, have found great favor. Diamonds have been cut in heart, marquise and other unusual forms, and rose diamonds are more in vogue. Emeralds drilled and threaded on wire hang as drops and pendants and many stones are utilized simply polished rather than cut.

The different shades of gold and silver that have remained in favor, together with the new ones which have established themselves, cannot be overlooked, for they add immensely to the attractiveness of all work in these metals. "Green" or antique gold, of somewhat tarnished and brassy aspect, made its *début* in America this year. A certain fascinating quality cannot be denied it, and as it is increasingly seen in

jewelers' stocks there is doubtless a goodly contingent of admirers for its peculiar beauty, although progress has not been rapid with this style. Bright finish and Roman or yellow gold are always handsome, but it is "rose gold" which has taken the public heart by storm. Everywhere in the charming tints with which the different goldsmiths contrive to vary its pleasing glow, it elicits admiring comments.

The incrustation of one precious stone with another, such as the encroachment of a tracery of tiny brilliants upon the edges of a large opal, is a fancy sometimes occur-

SOME JEWELRY WORN INDOORS.

ring; a small pearl has been noted set in the top of an opal ball stick pin and a large opal heart pendant shows dots of brilliants on its surface. In a résumé of styles of the past year, and of those to which we may confidently look forward, perhaps the simplest way to place the reader *au courant* of the modes is to touch somewhat in detail upon the different lines covered by the jewelers, and here, again, coiffure ornaments lead the way. Fashion has ordained that these shall flourish in variety and numbers. Many fine pieces in diamonds are adjustable and serve either in the coiffure or on the corsage. Mountings for aigrettes permit the use of different ornaments on various occasions. To drape a rope of pearls among the waves of the hair has been one conceit of the season. Elegant and effective is the gem-hilted sword. The tortoise shell pin of two prongs, with jeweled top manipulated in double curves or loops, furnishes a popular and useful accessory.

Combs include tuck, side, back and pompadour styles, and are of shell or amber, with gold, pearl or diamond decoration as a rule, though turquoises play a good part here, and emerald or other green stones are infrequently to be found. On side and tuck combs the gold decoration is usually a simply carved edge, and precious stones form a single narrow line. The tops of high combs frequently curve upward in graceful lines of diamonds around a large central stone that flashes in varying gradations of brilliancy with every movement of the wearer.

The newest development in coiffure ornaments occurs in the clasp or brooch for the back of the head, which has proved a complete success and is almost as extensively in vogue to-day as any article of jewelry that could be mentioned. The long oval, say two and three-fourths inches by three-fourths of an inch, is the latest form assumed by this popular piece.

In arrangements for the neck, the fact that at the recent Vanderbilt-French wedding one of Mr. Vanderbilt's gifts to his bride was a long string of large and finely matched pearls indicates the present prestige of these beautiful jewels. Innumerable are the ways in which pearls are disposed. Long, thick cords composed of many strands of tiniest stones twisted together terminate in tassels formed of similar strands. There are long ropes of large pearls, which end in magnificent diamond drops. Simple necklets of one strand with a small diamond in the clasp furnish one of the most charming examples in pearls. Then there are affairs of two, three or more strands, and when the number grows larger, diamond bars, at intervals, hold the rows in place. Sometimes as many as 24 rows of tiny pearls passed through clasps or slides form one of the well known broad collars.

It is becoming quite the fashion to partially cover the lower portion of the neck, and this is accomplished by means of the broad collar of diamonds or pearls, a *nouveau art* necklace, or by winding the pearl rope twice or more around the throat before allowing it to fall straight down or festooning it upon the corsage, which latter is one of the latest styles.

In face of all that is new, a turn of fashion's wheel has brought up again beads other than pearl. Opals are sometimes seen, and old fashioned gold and coral beads, the counterparts of those worn in this country many years ago, are much in evidence in single strand necklaces, and the coral in ropes, as well. Fanciful designs in necklaces, such as many pendants around a chain or an ornament forming festoons across the front, are too varied for description. While pearls and diamonds continue the most elegant neck stones, color is by no means avoided, and emeralds, turquoises, rubies or their substitutes, olivines, sapphires, topazes, amethysts, etc., all figure in fancy necklaces.

Although it is true that rings may and often do extend in one unbroken line of brilliancy across the entire back of the hand, to wear them on the thumb or first and second fingers is not considered good form; but to compensate for this deprivation, society crowds as many as possible upon the third and last fingers. All gold

A NEW DEPARTURE

IN THE MANUFACTURE OF

Crescent Watch Cases.

CRESCENT CASES have always contained more fine gold and given better service than any other.

But there is a demand for a higher-priced case, and so, in addition to our regular line (whose high quality will be strictly maintained), we have now ready a case that contains about **twice as much gold** as any filled case made. Extra care has been taken in the finish and every detail has had the most minute attention. It is, as we have tried to make it,

AN EDITION DE LUXE

of our regular work. We know that every jeweler will appreciate the desirability of handling these new cases, and the added satisfaction which they must give to customers, as they contain **more gold** and will **wear longer** and **look better** than many solid gold cases.

signet rings with engraved monogram, crest or device, constitute the latest fashion for women, and these are quite suitable for the little finger. Opals find immense favor with both sexes. Strangely enough, while women have been annexing masculine perquisites in the way of watch-fobs and signet rings, men have quietly encroached upon the province of the opposite sex and are now exhibiting an amazing *penchant* for that essentially feminine stone—the turquoise. According to a prominent ring maker many turquoise rings are sold to men, and opals and birth-stones were never so popular for everybody. The opal now occasionally stands by its own beauty in rings, being mounted alone, but oftener its mysterious fires burn in an *entourage* of brilliants, that conserves and heightens all its glow. Fine diamond, ruby and emerald rings have been remarkable for departure from conventional cuttings. Much sentiment in shown in engagement rings in the way of jeweled hearts, true lover's knots, etc. Flower rings are a foreign fancy, feather *motifs* have been utilized, the new art has introduced too many caprices to be more than touched upon, and the story of the scarab in rings has become an oft-told tale. The marquise ring returned to favor in the past year. Clusters with a central stone of sapphire, ruby, emerald, opal or the like, remain one of the never failing delights. Two and three stones diagonally mounted afford a pleasing and standard style. Hoops are still worn. Hand carved rings are making a great run, and their massive character, either with or without jewels, renders them a handsome thing for men's use. The animal fad has been very thoroughly exploited in rings. The "tooth" ring furnishes a novel mounting for a single stone, and "all-gold" seals are a representative masculine style. The interesting intricacies of the various "banquet" rings may not even be entered into here.

The brooch, always fashionable, has varied its forms almost beyond description. Novelty here may be summed up in the term *nouveau art*. Standard diamond mountings for brooches usually assume the round, scroll and star forms. Diamond circles, crowns, crescents, feathers, sprays, swords, arrows, etc., hardly need mention. The "wreath" in the less expensive brooches is always with us. Gold brooches appear in round and other shapes of twisted wire and open work, enameled it may be or enhanced with semi-precious stones. Flowers, flags, reptiles, fish and fowl, rendered in silver, gold, enamels, stones or combinations of some of these, fill an important section in this line. Hearts, new moons, suns; stars, bow-knots, horse-shoes represent a different aspect of the article in question. Ivory miniatures and cameos in plain or precious stone mountings satisfy one phase of public taste, and a good, enduring brooch is furnished in the ovals with one large amethyst, topaz or other stone set in gold, small pearls or semi-precious stones. French designs in Louis XV., XVI. and Empire style hold their accustomed place.

He who runs may read the popularity of the long chain, whether it be lorgnette chain, watch guard or muff chain. The

patterns in gold of finely woven wire, in cable, rope, curb and other links of infinite variety, defy enumeration. The punctuating point in guise of a precious stone still holds good. The muff chain has been adopted this season by those in the swim, and where last year the swell woman permitted herself only a silken ribbon or cord we now frequently see the familiar glitter of gold, or note gun-metal or strings of beads.

In natural sequence to chains come metal purses, and here again the chronicler is daunted by the vastness of the field. Possibly no single accessory of half useful, half decorative intent figures more strikingly in street costume to-day. Affairs of this sort, as it is almost superfluous to state, range from the tiniest specimens for silver change to large bags that take the place of the *matinée* and the old-time satin shopping bags. The smaller kind dangle on the long chain, or are tucked away in the corsage, while most of the larger ones hang at the side à la *chatelaine*, being provided with chain and hook.

Newest and most modish are those large bags of very fine flexible mesh which, by means of a row of rings set a little below the upper edge, draw up on chains, the top falling over like a wide frill, as in the satin bags with draw-strings. All shades of silver, especially the various oxidized effects, prevail in chain purses; jewelry follows the same course as in other decorative work.

The flexible chain bracelet and the bangle literally flourish side by side, as it is not unusual for them to be worn together. In the former the designers vary the links, if not *ad infinitum* at least to the extent of their ingenuity, in devising new patterns. The heavy curbs with padlocks, the daintier links with pendant of heart, clover-leaf, horse-shoe, ball, cube or fleur-de-lis, still give pleasure as engagement bracelets or gifts of friendship. Precious stones all of one kind, as in a bracelet all opals or all turquoises, are set closely together, forming a chain. Popular gold bracelets are beautifully chased or rendered in twisted or rope designs.

Ordinary watches for ladies, to be worn with guard chain, include open-face, hunting and half-hunting cases. Silver watches with niello backs furnish an inexpensive yet decidedly chic style. Other rich ornamentation for silver watches consists in etched flowers, monograms and various devices. Plain gold, plain enamel, ruby, turquoise, diamond or pearl *pavé* backs are among established modes, while the record of fanciful jewelery would demand a volume to do it justice.

Chatelaine watches, being necessarily of a highly decorative character, have seemed to provide a congenial field for *l'art nouveau*, and, save in brooches and pendants, its characteristics have not been better rendered elsewhere. Shaded gold, transparent enamels, fine stones, combined in quaint or symbolic designs, impart a decided interest to the study of watch cases in this rarely beautiful phase of art.

The growing vogue of the watch fob for women is worthy of note by jewelers, and already the fine trade caters to the new fancy which, beginning with the upper

crust of society, is working its way downward.

Omitting any mention of the watch fashions familiar to nearly every man, be he jeweler or not, it may be noted that an inspection of decorative confections of the finest kind reveal attractive and novel points in the representation of the figures on the dial, the color and finish of the case, its jewelery and enameling. The frequent occurrence of very flat watches for both men and women attracts attention.

"Slow, but sure," sums up the progress of the ear-ring. In exclusive shops where, year before last, it was conspicuous by its absence, the ear-ring now occupies a place, honorable, at least, if not extensive. Ear-rings are more worn in general, oftener worn by those near the apex of society's pyramid, and are allowed a greater latitude of form than at the beginning of their struggle for a new career. Nevertheless, elegance or a neat, unobtrusive effect is demanded by prevailing taste in this ornament.

Fans would furnish a fascinating chapter, and a word should be said for the short handled lorgnette, which is becoming an exceedingly fashionable item of the costume. So much so, that it may be suspected that it figures often as a weapon of style rather than a requisite to vision.

Scarfs and stick pins, hat pins, sleeve links, studs and many minor articles present interesting variations in ornament, but apparently record no radical changes in construction.

Of the *bréloques*, charms, trifles that have raged like a whirlwind through every grade of society, what shall we say? This, at least—that those of some significance, which appeal to a certain element of sentiment, imagination (superstition, if you will), which is one of the amiable weaknesses of most people who are socially delightful, are not likely to disappear. But it is both a probable and a very grateful prospect that some of the *banalities* which have satiated a long suffering public may melt away into deserved oblivion.

Marauders Endeavor to Burglarize the Store of Joseph Bitterly.

VICTOR, Col., Jan. 30.—An attempt to burglarize the jewelry store of Joseph Bitterly, Goldfield, early Sunday morning, was frustrated by one of Mr. Bitterly's sons, who shot at and wounded one of the robbers. They cut out a panel from the back door of the jewelry store, turned the key in the lock and attempted to open the door, but a night latch near the top resisted them. The noise aroused the two boys, and the youngest, a lad of 12 years, fired three shots through the door. At the third shot one of the burglars cried out with pain and was heard to fall. John Bitterly saw three men running away in different directions; one was holding the side of his head. The boy again fired at him twice, and the second shot caused him to cry out. After daylight the man was tracked to the F. & C. C. Railroad trestle by a trail of blood.

R. A. Creech, of Goldsboro, N. C., was recently married to Mrs. H. L. Daughtry.

Gem Mining in Ceylon.

BY EDGAR HUHN.

IT may be of interest to some of the readers of this journal to know how precious stones are found and the methods used in mining for them in Ceylon; and I may say that, with very slight variations, the method is the same all through the Orient, with perhaps the exception of the famous Burmah Ruby Mines, at Mogok, in Upper Burmah, whence we get the finest rubies and where the mines are worked by the Burmah Ruby Mining Co., of London, Eng., with modern methods.

The districts in Ceylon in which most of the stones are found are in Ratnapura and Rakwana, both in the southwestern portion of the island and within about 30 miles distance of each other, the former place being about 65 miles from Colombo, the chief port and gem market of Ceylon.

It is a very curious feature in mining in

Ceylon, that with the exception of the diamond, emerald, turquoise and opal, almost every precious and semi-precious stone is found there and frequently a great variety of them are dug out of the same pit. Rakwana is especially famed for its sapphires, and if a native dealer wants to thoroughly impress you with the quality of his goods, no matter where they may come from, he will assure you most solemnly that they are the true Rakwana sapphire.

Almost all the dealers in gems are Mohammedans, the native Cingalese having very little to do with the business, except with the manual labor of digging for them. They are a fine looking race of people, but effeminate and have the reputation of being the most persistent and successful followers of Ananias that ever were born. They do not in any degree possess business instinct. I found them a most pleasant and hospitable people, so I suppose I should not turn on them and give them such a bad character!

The mines, or, I should be more cor-

rect in describing them, diggings, are located in a rather mountainous country, and with the exception of the Everton mine, which has a depth of several hundred feet and which is considered to have been the most successful on the island, are really only shallow pits, usually measuring about six to 10 feet and rarely exceeding 10 feet in depth.

There are certain well defined features in the geological formation of the country to be looked for in seeking for the gem-bearing ground, and when the spot is decided upon digging can proceed, provided one is possessed of the license granted by the proper authorities.

The gems are found in a stratum of the earth usually from three to eight feet below the surface. The stratum is called by the natives *Illam*; it is a loose, gravelly soil and is easily manipulated; when a sufficient quantity has been brought to the surface the *Illam* is taken in small hand carts or carried in baskets on the heads of coolies to the nearest stream and there washed. This is done by means of a closely meshed sieve, made of plaited cane strips and about 30 inches in diameter by nine inches deep, running to a conical point.

The *Illam* is then thoroughly washed in the stream until only the clean pebbles remain. These are then brought ashore and sorted over and the gems picked out. It is in this process of washing that a white man, trying to work one of these mines, loses the best stones, as he cannot look over more than one washer at the same time, while the native is wonderfully quick at throwing out a fine specimen to a place where later on he can come and look for it.

Spinel of all colors and garnets are almost invariably found in conjunction with the other stones; also the different varieties of zircon, commonly termed jargon. Cat's-eyes are usually found together with aquamarines and the different kinds of beryl, of which the alexandrite is the most sought after.

There has also been some successful dredging in the Ratnapura river, and a party have been working in the river in diving suits, quite a new departure there. When I was there the results seemed most promising.

Gem mining in Ceylon has of late years been much on the decline, owing to the old mining districts being seemingly worked out, and there are now comparatively few people engaged in the industry, the majority being engaged in seeking plumbago, which is abundant and is readily marketable; or else they are working on the numerous estates, which, while bringing them in less money, is yet a sure livelihood for them at all seasons.

A good proportion of the stones found are cut locally in the village of Ratnapura and in Kalutara, a small place on the coast, some 40 miles south of Colombo. The quality of the cutting is improving considerably, though the cutters still insist on making them very thick and bulky so as to have them weigh as much as possible.

As this is only a very condensed outline sketch upon this subject I have not attempted to go into the many and very interesting scientific details which would be of interest only to a few readers.

Ring Superstitions.

BY MARY GAY HUMPHREYS.

AS far back as human record goes, superstition clings about gold and gems. The Bible is a repository of such superstitions. The glittering pages of Revelations are the source of numerous poetical beliefs that once had living force concerning the magical properties of gems. These are insuperably connected with the ring, which symbolized eternity. Together they were supposed to exert some occult power on most of the affairs of life. It seems a pity that the ring, which has a language capable of expressing so many of the emotions and sentiments, has come to be regarded only as a bauble, except in its matrimonial significance, where it still has vitality.

If the old ring beliefs could be revived what well filled jewel cases and what becoming finger adornment would we soon see. How entertaining would be the faith that, on going to a picnic, would exact a ring of onyx to drive away snakes, a ruby ring to ensure against possible thunderstorms, and a green stone, *en cabochon*, only malachite instead of emerald, to make sure that no harm come from ice cream or lemonade.

The ladies of ancient days were indeed fortunate in their medical prescriptions. Instead of going to the dentist they wore a ring of agate in which was cut a salamander with the words "Berto Bertion." This was regarded as an infallible remedy for the toothache. There was an acknowledged efficacy in words which sound very pretty, though we don't know what they mean.

Jasper, owing to its prominence in the walls of the New Jerusalem, was one of the most valuable stones in securing personal safety. Better than any accident insurance policy was an elephant head, with a trident in the mouth, cut in jasper, to prevent shipwreck at sea. Jasper was particularly effective when set in silver. A jasper head inscribed with the letters B. B. P. P. N. E. should be in the possession of all hunters, for whom it will bring down big game. It will also help to make up quarrels between friends.

Sardonyx is to be particularly relied on in straightening out the affairs of young people. If a man and a woman have a misunderstanding, and the young man send to the girl a lovely sardonyx ring, all will be forgiven. Sard is the most valuable to men. The ancients believed that the wearing of it was the easiest

road to any woman's favor. Another favorite talisman is a pale sapphire, on which must be engraved a mermaid holding a mirror. This assists in gaining any desire. After elections, or on going to a club or college society dinner, an amethyst ring is the proper adornment, for this ensures against the ill effects of wine.

Married women, on their parts, who wish to effect the affection of their husbands, should wear a jasper on which are cut three ravens. The three birds look like gossips having a fine dish of scandal. They are, in fact, only preventing it. The timid woman, when her husband is from home, has but to wear a beryl set in silver on which is inscribed the names, "Uriel, Gabriel, Raphael, Michael," and it will keep away thieves. It will also guard her against sudden death, as the carbuncle does against fire.

If illness is anticipated, the turquoise will give warning by turning pale—"sweating" the old poets called it. A toad's head on a ring used to be regarded as a sovereign remedy for cramps. Cramp rings, as they were called, were provided for every household, even as a hot-water bottle is to-day. Chalcedony was considered supreme in lunacy and delirium.

The most valuable secret possessed by the ancients was that a chrysolite set in gold would keep people from making fools of themselves. If we could so convince ourselves, what an era of ring giving would set in. One of the most amusing superstitions was that a silver ring made from five sixpences, collected from five bachelors and made into a ring by a smith, who was also a bachelor, would cure fits. A ring made from three silver nails taken from a coffin had a similar virtue.

The Rosicrucian and astrological rings were assumed to have the power of a guardian angel, and held an omnibus contract to look after one's welfare in all things. The Rosicrucian ring is a jasper on which is cut a salamander and the names of the three magi, Asmodiel, Nachiel, Zamiel, or their signs. Another variety has an agate with such cabalistic words as "heth, agros, thebal, adros," all of which have great virtue. For an astrological ring it is necessary to know under what star one is born. If the sun, the ring must be a diamond or sapphire; if the moon, a crystal in silver; Mercury, a magnet in quicksilver; Venus, an amethyst in copper; Jupiter, cornelian in tin; Saturn, a turquoise in lead. With an astrological ring one may practice divination and conjuring.

The planets govern the wearing of rings

during the week. Sunday requires yellow stones. Monday belongs to the moon, hence pearl, cat's-eyes and crystals should be worn. Mars rules Tuesday and demands rubies and battle-red stones. Wednesday is Jupiter's, lord of the heavens, so turquoise and sapphire, which reflect the color of the firmament, should be worn. Thursday is Thor's day, and to him the royal purple amethyst. Friday is sacred to Venus, the sea-born, and in her honor emeralds. On Saturday only wear the resplendent diamond, Saturn's own stone.

The ring as a badge of fidelity has a lore of its own. Its significance as a wedding ring needs no interpretation. There has been an effort to introduce the "gemmal ring," whose continuity is not so absolute, as the more fitting marriage ring. The "gemmal" is several rings which separate, yet make one. The old rings of this sort had each a hand, and when joined, the hands clasped. If the persons separated or the troth was broken, one half was sent back. A divorced one would appropriately wear half the "gemmal ring."

Posy rings were a pretty fashion. Posy contracts from poesie, and was thus named from the legends that were inscribed in the rings. There is a vast collection of these: "Love me and leave me;" "My hart and I until I dye;" "I chuse not to change;" "When hearts agree, there God will be;" "God that fit, this knot to knitt," are instances of these. But the most significant of all is "Mulier viro subjecta est," which is found in numbers of antique rings.

The whole alphabet may be found in gems, Xanthite serving for X, and Zircon for Z. Thus "regard" rings are spelled out. When the Prince of Wales was betrothed to the Princess, he gave her a ring in which a beryl, an emerald, a ruby, a turquoise, a jacinth and an emerald united to spell "Bertie," his familiar name.

The Germans used to make the manner in which the ring was worn of significance. Thus, if a man wanted to be married he wore a ring on his first finger of the left hand; if engaged, he put it on the second finger; if married, on his third; if he preferred to remain single, he wore it on his little finger. The woman announced her intentions in the same manner on her right hand.

There were a number of rings in olden times capable of wonder working in a large way. Foremost of these was the espousal ring of Mary and Joseph, which is one of the treasures of Perugia. It is composed of onyx and amethyst, and will

cure any disorder if it will only occur on St. Joseph's day, when the ring is displayed with great ceremonies. Solomon's ring, which was Masonic and cabalistic, could command the powers of the air and drive devils out of the nose. The ring of Gyges, king of Lydia, enabled him to render himself unseen and do an unlimited amount of eavesdropping. More familiar than any of these is the ring of Polycrates, which at this date seems to exist chiefly to puzzle the student of unknown languages, for no matter what language you take up, sooner or later you encounter the ring of Polycrates, and generally in metrical form.

Serious Fire in the Store of Davis & Freeman.

ATLANTA, Ga., Jan. 26.—The jewelry store of Davis & Freeman, Whitehall St., was the scene of an exciting fire Friday night, caused by the igniting of chemical materials used by the watchmaker, A. S. Levison. The watchmaker's department is situated just back of one of the large front windows of the store, and at the time of the accident, 9 o'clock, he was engaged at work. The flames from the burning chemicals caught the filmy curtains in the window, and in a few seconds, the elegant plate glass, reaching from floor to ceiling, was a mass of shattered fragments. The Fire Department responded promptly and prevented the very disastrous fire which seemed imminent.

Fortunately most of the watches belonging to customers were in the vault and only a few on the outside were damaged. The watchmaker's bench and outfit were entirely destroyed. Besides the loss of the French plate window, which was probably the handsomest in the city, the flames destroyed an elegant regulator, badly damaged a massive show case, and a number of beautiful pieces of cut glass were broken. Mr. Levison was picked up unconscious, and though painfully was not seriously burned. His physicians say he will be out in a week or so.

Davis & Freeman are putting in a new window to-day and business is proceeding as usual. The loss has not yet been estimated.

Reward for the Arrest of Alleged Dishonest Watchmaker.

TEXARKANA, Ark., Jan. 24.—R. G. Northum, proprietor of Northum's Repair Works here, is offering a reward of \$25 for the arrest of a German watchmaker, Louis Swartz, who left his employ on the night of Jan. 21, taking numerous tools and watches belonging to Northum and his customers. Swartz is described as follows: Height about 5 feet, 3 or 4 inches; light sandy mustache, gray eyes; left eye has larger pupil than right. Walks very erect; weight 150 pounds; wore light colored trousers and brown check coat, dove colored hat with black band; fair complexion; age 45; black hair, considerably gray. Has considerable accent in speaking English.

Any jeweler seeing Swartz is requested to telephone or telegraph Marshal Hugh Dean, Texarkana, Ark.

NEW YORK OFFICE, 14 JOHN STREET.

The J. A. and B. of T. Annual.

Interesting Reports at the Annual Meeting of the Jewelers' Association and Board of Trade.

The annual meeting of the Jewelers' Association and Board of Trade was held at 54 Maiden Lane, New York, Thursday afternoon. Interesting reports were presented by president A. K. Sloan, secretary D. L. Safford and treasurer P. T. Tunison, showing a prosperous condition of affairs. C. G. Alford was elected president for the present year. The address and report of the retiring president are here given in full:

PRESIDENT SLOAN'S ADDRESS.

Gentlemen:—A year ago, when you elected me your president, I accepted against my will, as most of you know. I am a one term man and feel that every member in the Association who aspires to the honor of being president should have the opportunity. If one man accepts it year after year what chance have they? But as you assured me I had served the new institution but six months, and feeling that my work was not quite complete, I accepted for another year, and now that our indebtedness is all wiped out and we show a surplus of over \$5,000, I can retire with a feeling that I have done my duty toward my fellow members, and my successor can step in and, by careful watching, make this the greatest Board of Trade in the world.

In the past year we have had quite a large increase in our membership. Our service in all departments of our business, especially in the handling of cases of failure or bankruptcy, is very efficient and I think we get better results in such cases than could be obtained in any other way than through our corporation.

Members should take a personal interest in affairs of our corporation and in cases of failures or bankruptcy at once place your claims with us so that we may exert our full power for obtaining best results.

In September last there was raised through this Association and Board of Trade for the benefit of the Galveston sufferers, \$3,715.50. Of this amount \$3,000 was sent to the Mayor of Galveston and the balance to the Clara Barton Red Cross Relief Fund.

On Oct. 11 we extended an invitation to the Manufacturing Jewelers' Board of Trade of Providence to appoint a committee to meet a committee of our Board with a view of consolidating. Committees were appointed and we met in Providence Dec. 17. Matters are still awaiting further action by the Providence Board.

Mr. John C. Day, one of our active directors, died Oct. 31, 1900. The Board of Directors passed suitable resolutions, which were sent to his family. We have also lost by death two good members, John C. Mount and David Untermeyer.

Our second annual banquet, on Jan. 16, you all know was a complete success, and we have been highly complimented on it by outsiders.

I want to thank the members of the Board of Directors, the members of the different committees and the secretary and treasurer for the faithful manner in which they have performed their duties. It was their good work that has made the Association and Board of Trade the prosperous institution it is. The secretary and treasurer's reports will give you a full statement of our affairs.

SECRETARY SAFFORD'S REPORT.

Mr. President and Members of the Jewelers' Association and Board of Trade:

I submit for your consideration my annual report for the year ending Dec. 31, 1900, as follows:

On Jan. 1, 1900, our membership was 341. During the year 52 members have been admitted; 30 have resigned and one was dropped from the roll, making our membership to Jan. 1, 1901, 362.

As the report of the treasurer shows, we are not only out of debt but have a handsome surplus of over \$5,000.

In producing this result we have not economized in any of the legitimate expenses of the business but have pushed our work as far as time and circumstances would allow.

We have revised and written during the year 14,

843 reports as against 12,966 in the previous year.

We have answered members' inquiries for reports to the number of 38,154 as against 31,419 in the previous year.

We have made changes and corrections in our Reference Book as follows: July issue, 8,232; January issue, 9,173, making a total of 17,405 as against 14,067 for the previous year.

In our collection department we have handled 2,998 claims as against 2,792 for the previous year. Of these we have collected 2,067 as against 1,570 for the previous year. The percentage of claims collected is very satisfactory, being 69 per cent. of the number of claims received and 51 per cent. of the amount of all claims handled, including bankruptcies.

On July 1, 1900, we adopted a new schedule of fees which makes the expense of collections made through attorneys less than those charged by any agency.

Commencing Jan. 1, 1901, our schedule was still further amended so that now no charge is made on

our bankruptcy proceedings resulted in a settlement of 100 per cent. on the claims of over \$90,000 controlled by us.

These and other cases which we have settled show the value of the concentrated action we can have through our members, and lead me to urge that in all cases of failure or bankruptcy, members at once place their claims with us so that we may be sufficiently strong to work out the best results for all.

I have only to add that I see no reason why we should not make even greater progress this year than last. Our finances are in a satisfactory condition, we start the year with an assured income greater than last year, we have proved the benefits of our organization and our ability to aid our members, and with the continued co-operation of our members the limit of our usefulness is not yet in sight.

The election of directors was according to nominations previously made by the nominating committee chosen for the purpose at the last annual meeting, and resulted as follows:

C. G. Alford, of C. G. Alford & Co.; H. A. Bliss, of Gorham Mfg. Co.; J. B. Bowden,* of J. B. Bowden & Co.; O. G. Fessenden, of H. W. Wheeler & Co.; C. E. Hastings, of Carter, Hastings & Howe; Alfred Krower, of Albert Lorsch & Co.; F. H. Larter, of Larter, Elcox & Co.; A. K. Sloan, of Sloan & Co.; G. W. Street, of G. O. Street & Sons; Henry Untermeyer, of Keller & Untermeyer Mfg. Co.; G. W. Van Deventer, of Waterbury Clock Co.; C. F. Wood, of C. F. Wood & Co.; Leo Wormser, of Julius King Optical Co., all of New York. Benj. Allen, of Benj. Allen & Co.; Grove Sackett, of William L. Gilbert Clock Co., and J. A. Todd, of Towle Mfg. Co., Chicago. George H. Cahoon, of George H. Cahoon & Co., and William A. Copeland, of Martin, Copeland & Co., Providence. R. I. George K. Webster, of Webster Co., North Attleboro, Mass.

The meeting chose the following officers for the year 1901: President, C. G. Alford; first vice-president, O. G. Fessenden; second vice-president, H. A. Bliss.

O. G. Fessenden presented the following resolution, which was seconded and unanimously carried:

Resolved, That the thanks of this organization be and they are hereby tendered to the retiring president, Augustus K. Sloan, for his earnest work during the two years he has been our president. When it is remembered that when he assumed office the organization was in debt and that during his administration not only has the debt mentioned been wiped out but a surplus has been created, besides which an amalgamation of the Board of Trade and the Jewelers' Association has been brought about, making the consolidated organization one of the strongest of the kind in the country, we acknowledge with gratitude the earnest work he and his associate officers have given to the concern of the Association—without which we would not have attained the position we now hold.

Resolved, That these resolutions be spread upon the records.

The meeting then adjourned. Secretary D. L. Safford and treasurer P. T. Tunison will continue in their valuable capacities.

C. G. Alford has been actively associated with the jewelry trade for over 32 years. He was born in Williamstown, Mass., Oct. 28, 1845. He went to New

(Continued on page 29.)

*Since deceased.

CHARLES G. ALFORD.

PRESIDENT-ELECT, JEWELERS' ASSOCIATION AND BOARD OF TRADE.

claims collected through us on draft paid through banks or claims paid on demand from our office.

In cases where debtors desire an extension or compromise I call your attention to a resolution of our Board of Directors adopted Nov. 13, 1899, as follows:

Resolved, That members be requested to refrain from signing any papers of compromise or settlement presented to them by a dealer unless said paper bear a certificate of this corporation that the debtor has filed with the corporation a full statement of his affairs, showing names of creditors, the amount owing each, his assets and liabilities, etc."

The wisdom of this course has been shown in several cases and there is no reason why it should not be carried out in all such cases and at no expense to the members.

Under our bankruptcy law the value of our corporation to its members has been shown in every case where we had sufficient claims to put us in control, and this value has come through this control. I will only cite the following:

Parish & Drake, of Columbus, O., made a bill of sale. We commenced proceedings in bankruptcy in which they filed schedules showing assets of only \$28. Through our proceedings we compelled a composition at 66 2-3 per cent. on the \$6,000 of claims we held.

In the matter of the E. Jaccard Jewelry Co., of St. Louis, Mo., in which action was brought for the appointment of a receiver in the State Court,

SUCCESSFUL MERCHANTS, BUYERS, are attracted by **NEW THINGS.** I want to know you, I can serve you through my travel agents or at my well-appointed salesroom, 19 Maiden Lane, New York. **DON'T BUY** until you have seen my lines of 10k. and 14k. Rings, Solid Gold Jewelry, High-Grade Gold-Filled Chains of every sort and Gold-Filled Jewelry. You do not pay me for name or reputation. My prices are as reasonable as square dealing will permit. You buy right of the maker.

M. J. AVERBECK,

19 MAIDEN LANE,

NEW YORK.

(Continued from page 24.)

York in 1863, and when 20 years old started in business for himself, in the dry goods line. Five years later he established the present firm of C. G. Alford & Co. The business was incorporated in 1891. Mr. Alford was one of the founders of the Jewelers' Security Alliance. He was one of the incorporators of the Jewelers' Safety Fund Society and has always been a director of that organization.

George W. Ball's Store Robbed of a Considerable Quantity of Goods.

HARTFORD, Conn., Jan. 30.—George W. Ball's jewelry store, 65 Pearl St., was yesterday noon cleverly robbed of about \$1,000 worth of diamond jewelry while Mr. Ball was at lunch. The store was in charge of a boy, who has been working there a short time, when two well dressed strangers entered. One man stood near the window where the rings were displayed in a tray, while the other man walked to a table in the middle of the store and showed an alarm clock to the boy. He said there was something the matter with it. It was wrapped in a newspaper, and as he put the clock down he unfolded the pages of the paper so that the man in front was shielded from view. The man with the paper said there was an advertisement he wanted to see and he held the paper in front of the boy until the confederate had emptied the tray of the following: One cluster ring, turquoise, value \$100; one Princess ring, \$95; one

National Monthly Import and Export Statistics.

WASHINGTON, D. C., Jan. 30.—The records of the Treasury Department contain the following comparative statistics of interest to the jewelry trade for December, 1899 and 1900, and for the 12 months ended December, 1899 and 1900:

	IMPORTS.		—12 Months Ending—	
	Dec., 1899.	Dec., 1900.	Dec., 1899.	Dec., 1900.

Julius King Optical Co. Against the Garnishees of Hanf Optical Co.

CHESTER, Pa., Jan. 30.—In the Court of Common Pleas, Saturday, Judge Johnson handed down the following opinion in an appeal of the garnishees of the Hanf Optical Co. The action is by the Julius King Optical Co. against various fire insurance companies and others, garnishees of E. E. Hanf:

The plaintiff on May 29, 1900, recovered a judgment against E. E. Hanf, trading as the Hanf Optical Co., before Alderman Smith, of the city of Chester, for \$285.35.

On June 19, 1900, an attachment execution was issued on this judgment and the above named fire insurance companies and Sweeney & Clyde, summoned as garnishees. After hearing, judgment was rendered against the garnishees for \$285.35.

From this judgment the garnishees appealed and on Aug. 19, 1900, filed their appeal in the Court of Common Pleas.

Nothing further was done in the case and on Dec. 12, 1900, the insurance company garnishees presented to the Court the following petition.

The Judge then recites in full the petition of the insurance companies and brokers, in which they say that by reason of the attachment they are in danger of being sued by the Hanf Optical Co. for the recovery of the insurance, and having no interest in the funds * * * are ready and willing to pay the \$2,500 to the parties entitled thereto, or pay that amount into Court, or such amount as the Court may direct. They conclude by asking that the Court award a feigned issue, wherein the Julius King Optical Co. will be the complainant and the Hanf Optical Co. the defendant, to settle the dispute; and that the companies then be released from responsibility and allowed proper costs and counsel fees. The Judge then continued in part:

It is suggested that \$500 is a sufficient sum to be paid into Court to satisfy the plaintiff's judgment and costs.

I can see no reason for requiring the garnishees to pay into Court more than sufficient to satisfy

plaintiff's judgment. Nor can I see any reason why the inter-pleader should not be granted.

I cannot, as requested, order the remainder of the funds in the hands of the garnishees paid to the Hanf Optical Co.

It is true that garnishees in their petition admit that the loss of the Hanf Optical Co. has been adjusted at \$2,500, but this gives the Court no authority to order them to pay the money * * * Let an order be drawn permitting the garnishees to pay into Court the sum of \$650, less fees and costs to be taxed by the Court; also granting a feigned issue in which the Julius King Optical Co. shall be plaintiff and the Hanf Optical Co. defendant.

Upon such decree being signed and money paid into Court, the garnishees are hereby relieved of all duty or liability on said attachment.

Death of Fred. C. Boerner.

FORT WORTH, Tex., Jan. 30.—Fred. C. Boerner, a prominent jeweler of this city, passed away Friday, at the age of 47 years. The stroke of paralysis which he sustained on the 13th of last July was the cause of death, though everything that medical science could do for him was done. He was taken to Hot Springs, Ark., but returned a few days ago. The funeral was held Sunday, from his residence, corner of W. 1st St. and Royal Ave., under the auspices of Red Cross Lodge, Knights of Pythias, of which he was a member. Rev. Junius B. French, assisted by Rev. Charles R. Hyde, conducted the services.

Mr. Boerner was a native of Michigan, having been born in Detroit, but when two years of age his parents removed to Cincinnati, where they resided for three years, afterwards going to Vevay, Ind. He came to Texas in 1879 and first lived at Ennis; then he opened a jewelry store in Waxahachie, coming to Fort Worth in 1887. Here, on June 14, 1899, he married Miss Elizabeth Frances Craft. They have one child, a daughter.

T. R. Helms, a jeweler who has been in Waxhaw, Fla., for some time, has located in Marshville, Fla.

Burglars Raid Dr. W. M. Harper's Jewelry Store.

CORSICANA, Tex., Jan. 23.—Burglars last night broke into the drug and jewelry store, at Rice, owned by Dr. W. M. Harper, and made away with \$100 worth of jewelry. The thieves effected an entrance through a rear window. Dr. Harper came to Corsicana this morning, as he had reason to suspect three parties, and believed they had come to this city. This suspicion was strengthened by the finding of the trays which had contained jewelry lying by the railroad track about a mile south of Rice. Dr. Harper caused the arrest of Charles Montgomery and one Gibbons. Gibbons at once confessed and implicated Fred. Smith, who was also arrested. The three were searched and jewelry found in their possession was identified by Dr. Harper as his property. The three men are now on trial in Justice Roberts's Court.

Charged with Stealing from J. Stuart MacDonald's Store.

WASHINGTON, D. C., Jan. 26.—Charged with the larceny of a cluster diamond pin valued at \$75, from J. Stuart MacDonald, jeweler, Baltimore, a man giving the name of John Smith was arrested here last night by Detective Kratz. Diamonds and jewelry valued at \$500 were found on him when he was searched. It is supposed that he also stole a large majority of this in town. A woman, Mabel Harris, was also arrested and is detained as a witness. The articles found on him include three

diamond studs, two diamond stick-pins, an emerald and diamond pin, a cluster diamond pin with a ruby center, a gold chain with a diamond locket, and several Masonic charms with diamond settings.

The police believe Smith is an expert thief and that Smith is not his name. The prisoners were locked up at the Central Station.

Worcester License Board Remove Boycott on Sidewalk Clocks.

WORCESTER, Mass., Jan. 26.—The boycott on sidewalk clocks has been removed by the license board. Last week, after a short hearing, the board granted permission to the Hall & Lyon Co., 10 Front St., to locate such clocks in front of their store. George T. Scott was before the board but was not certain what pattern of clock he would adopt, and his petition will be acted upon later. The disposition of the board is to grant permits when it is assured the clock will be an ornament to the street. The permits granted yesterday are for illuminated clocks of neat design, set in a mortar to be erected.

Death of Abraham Van Wart.

ENGLEWOOD, N. J., Jan. 30.—Abraham Van Wart, head of the jewelry firm of Abraham Van Wart & Sons and an old and respected resident of this place, died last week after an illness lasting several weeks of Bright's disease. Mr. Van Wart was engaged in the jewelry business on Dean St. for many years. A widow and three sons survive him.

The Safe of Harry P. Wilson & Co. Robbed of Jewelry.

COLUMBUS, O., Jan. 26.—A bold robbery took place at the jewelry store of Harry P. Wilson & Co., on the viaduct, Wednesday evening, when more than \$400 worth of rings was taken from the safe before the store was closed. W. L. Johnson, who has charge of the business for Oris J. Fisher, who was appointed receiver for the business some time ago, had left the store at the usual time. Wilson & Co. and Gallagher Bros., tailors, both occupy the room and both use the safe, and for this reason it was unlocked. Ed. Gallagher was there alone and had occasion to go to the basement for about 10 minutes about 8 o'clock. On his return he took his books to the safe and, as he was putting them in he stepped on a shirt stud lying on the floor. On investigation he found that the jewelry trays had been disturbed and at once sent for Mr. Johnson. He went over the stock and it was found that about 52 rings had been taken, among them two solitaire diamonds. The others were all cheaper rings. One of the studs dropped on the floor was worth \$70.

It is believed that the robbers are local men who had a good knowledge of how matters were conducted about the store. Detectives have been at work on the case for some days and the statement was made Saturday they had a good clue to the men who committed the crime.

Prof. Bouvee, with C. D. McElvain, Red Oak, Ia., has given up his position and returned to Omaha.

**Decision in a Jeweler's Sample Case
Suit of 10 Years' Standing.**

DES MOINES, Ia., Jan. 30.—An interesting suit, that has lasted 10 years, over a jeweler's sample case, was brought to an end in the Supreme Court Monday. The case was that of the Weber Co., appellants, vs. the Chicago, St. Paul, Minneapolis & Omaha Railway Co. It was an appeal from the O'Brien District Court, F. B. Gaynor, Judge. The Supreme Court decision, written by Judge McClain, sustains the trial court, thus leaving the victory with the railway company.

Action was begun in 1891 by the Weber Co. to recover the value of certain jewelry, said to be worth over \$1,000, contained in a jeweler's sample case delivered by a traveling agent of the plaintiffs to the railway company to be transported as baggage. From a judgment for the plaintiffs upon a verdict, the defendants appealed to the Supreme Court and the judgment was reversed. After the case was remanded to the lower Court the plaintiffs amended their petition and another trial was had in which there was a directed verdict for the defendants. From judgment thereon the plaintiffs appealed.

It appeared the traveling agent had three trunks checked. Their combined weight being greater than the amount allowed to be carried free, he paid 50 cents excess baggage charges and received a receipt therefor. Subsequently and before the trunks were placed in the baggage car one of them was stolen, and it was for the contents of this that action was brought. There was a rule of the company that

agents must not receive jewelry sample cases for storage or check them as baggage under any circumstances without a permit had been issued the passenger from the general office of the company.

"If the plaintiff," says the Court, "had such reasonable knowledge of the regulation with reference to jewelry sample cases, and the evidence of that fact is conclusive, then it could not hold the company liable for jewelry samples, even though its agent induced the baggage agent to check them without the permit required by the regulations. * * * We hold that where the agent's authority is expressly limited in this respect, and the limitation is known to the passenger, the act of the agent in violation of the regulation will not bind the company unless something in the nature of a waiver of the regulation is shown, and there is nothing of the kind in this case.

"Appellant, while apparently conceding that the defendant did not become liable for these jewelry samples as baggage, still insists there was a liability for them as warehouseman and that there was negligence on the part of the agents of the defendant in caring for the trunk, such as would charge the defendant with loss thereon in that capacity. But the baggage agent had no more authority to receive these jewelry samples for the company as warehouseman than as carrier."

As to the contention of the plaintiffs that the failure of the defendants to tender a return of the 50 cents received for excess baggage is a waiver on their part of any objection that the merchandise was checked as baggage, the Court points out this sum was received not for transporting merchandise, but for transporting excess weight baggage.

L. Reinheimer has rented the DeGraff building at 522 Main St., Joplin, Mo., and will reopen his jewelry store there.

**Hearing in the Bankruptcy Proceedings
of the American Jewelry Co.**

NEW HAVEN, Conn., Feb. 1.—The hearing of the American Jewelry Co., of this city, in the matter of the petition in bankruptcy of Charles E. Katsch has been going on for two days before Referee Newton. The counsel for the jewelry company allege that they were organized Dec. 25 last. The stockholders were Mr. and Mrs. C. E. Katsch, attorney M. Overlander, trustee, Mr. Rogers, of this city, and Irving M. Dewey, of New York. It is claimed that the last is ill and cannot come here to testify. Dewey held two shares of stock for himself and 35 shares as trustee.

It is claimed that Katsch bought about \$7,000 worth of jewelry between September and December. In December the company were formed and the goods were moved to the Washington building. The goods were attached by the creditors in January, and Mr. Katsch petitioned to be placed in bankruptcy. Samuel Goodman, of S. Goodman Co., was appointed trustee of the estate. The creditors claim that the company were not legally formed and that they are entitled to the goods to be disposed of for their account. The American Jewelry Co. petition to have the goods turned over to them, and it is on this petition that testimony is taken. The creditors claim that there is about \$10,000 worth of goods in the store. The company claim that they bought the goods for \$1,800, and admit they are worth \$2,500. Yesterday Mr. Overlander, Mrs. Katsch

and Mr. Rogers gave their testimony. Mr. Katsch was on the stand.

NEW HAVEN, Conn., Jan. 30.—A suit was filed in the City Court yesterday in which Deputy Sheriff J. Peter Dejon, of New Haven, and Zimmern, Rees & Co. and Adolph Goldsmith & Son, New York, are sued by the American Jewelry Co., of this city, for \$2,500. The plaintiffs seek to recover for alleged damage done the local company in an attachment proceeding recently enacted on the store and goods of the latter on claims against Charles E. Katsch.

The Case of the Three Men Charged with Robbing H. J. Faber.

BUFFALO, N. Y., Jan. 31. — Charles Greene, 15 years old, Charles C. McClelland, 18 years old, and Arthur Long, 30 years old, the three men who were arrested in Toronto last week on suspicion of being the men who stole \$600 worth of diamonds from H. J. Faber, jeweler, 43 E. Genesee St., were arraigned before Judge Murphy in the Police Court yesterday on the charge of grand larceny, first degree. All three men pleaded not guilty and were held for the Grand Jury. Since their arrest it has been learned that Greene was a parole prisoner of the State Industrial School at Rochester.

McClelland, according to the police, is from Toronto and has been in prison in that city. Little is known of Long outside of the fact that he was in Central Prison in Toronto a short time ago.

Settlement Soon of the Estate of the Late Charles H. Schiller.

UTICA, N. Y., Jan. 31.—A settlement of the estate of the late Charles H. Schiller, this city, will be had in a few months, according to a statement by the attorney for the creditors. The administratrix has filed her account and a citation has been issued, returnable on March 13 at the Surrogate's Court. The long delay was necessitated by the fact that some few non-resident creditors refused to waive service of citation or to authorize a local attorney to appear for them. The summons will have to be served by publication for six weeks.

The total receipts amount to \$12,806.59. The expenses of the administratrix will be somewhat large, but will leave a balance of about \$9,000. The creditors' aggregate claims are \$50,414.

Attempt to Rob the Store of Louis Hoffman Miscarries.

LEAVENWORTH, Kan., Jan. 30.—An attempt was made Monday night to rob the jewelry store of Louis Hoffman, 111 S. 5th St. Fortunately Hoffman arrived in time to scare off the miscreants. As is his habit, the jeweler went to the store about 9 o'clock to light the gas. When he entered he saw that the panels in the door leading into the alley were cut out and the braces were also removed. Strange to say the door was locked. The entrance made was large enough for a small sized man to squeeze through. The supposition is that the burglar became frightened at the approach of Mr. Hoffman and scurried away.

Suit Against the Administrator of George H. Bonnet.

COLUMBUS, O., Feb. 2.—The following special dispatch appeared in the *Ohio State Journal* this morning from Zanesville: "E. H. Bonnet has brought suit against W. S. Bell, as administrator of George H. Bonnet and John M. Bonnet, for \$10,000, which he claims to be due himself and other unpreferred creditors of John M. Bonnet, who less than two years ago transferred his jewelry store and other property to George H. Bonnet, it is alleged, to make him, A. H. Bonnet and F. F. Bonnet, of Columbus, preferred creditors, although John M. Bonnet was at that time insolvent. He claims the transfer was illegal."

Creditors Accepting the Proposed Settlement of Albert H. Bonnet.

COLUMBUS, O., Feb. 1.—More than 80 per cent. of the creditors of Albert H. Bonnet, wholesale jeweler, have already signed the proposed agreement for settlement, and all the others will within a few days. There has been no trouble in the matter in any way and all creditors have shown a disposition to accept the best offer that it was possible for him to make at this time. Unfortunately at present, on the advice of his physician, Mr. Bonnet is compelled to be absent from home temporarily. His brother-in-law, William Spilman, of Baltimore, is in charge of the business in his absence. He will likely not be able to return to the city for several weeks yet.

Jeweler Jesse Davidson Accused of Falsely Obtaining \$5.

MONTGOMERY, Ala., Jan. 30.—Jesse Davidson, a jeweler at 17 Commerce St., is under bail for the Grand Jury on an odd charge of obtaining \$5 by false pretences. E. W. Bray alleges that he went to Davidson's place and gave him a gold watch with the request that it be melted and made into a finger ring. Some time afterward Davidson gave Bray a ring and Bray paid him \$5. Later Bray claims that he ascertained that Davidson did not have his watch melted, but had given him a stock ring and that his watch was in Davidson's store for sale.

Bray swore out a warrant, charging Davidson with obtaining \$5 under false pretences, and at the hearing Davidson demanded a jury trial and gave a \$150 bond for his appearance before the Grand Jury.

Meeting of the Creditors of Mrs. Mary J. Gifford.

MANSFIELD, O., Jan. 31.—The creditors of Mrs. Mary J. Gifford, who has gone into voluntary bankruptcy, held their first meeting, yesterday morning, at the office of Charles H. Keating, referee in bankruptcy. The assets were given as \$3,900 and the liabilities at \$3,621.69 and there is a farm in Missouri owned by Mrs. Gifford.

Charles W. Chew, who was appointed receiver of the stock of jewelry pending the meeting of the creditors, was elected the trustee. The referee in bankruptcy will appoint appraisers and the stock will be sold by the receiver. Mr. Chew gave bond in the sum of \$3,000.

Death of John Mitsch.

PITTSBURGH, Pa., Jan. 29.—John Mitsch, aged 66 years, a retired jeweler of Allegheny, Pa., died at his home, 713 Avery St., yesterday, after a three days' illness with grip. Mr. Mitsch was a native of Wurtemberg, Germany, and came to America with his father, Matthias Mitsch, when he was but a child. He started in the jewelry business on Federal St., Allegheny, where he continued until he retired just eight years ago. He was a member of St. Mary's Roman Catholic Church, Allegheny, and of the Knights of St. George. He is survived by his widow, Mrs. Mary Catherine Mitsch, and two sons, John M., of Boston, Mass., connected with the Oil Well Supply Co., and Charles Mitsch, superintendent of the money or-

der department in the Allegheny Post Office.

The Composition in the Failure of Taylor Bros.

HOUSTON, Tex., Feb. 4.—A hearing on the application to confirm the composition offered by Taylor Bros., the bankrupt jewelers of this city, will be held tomorrow, before Judge J. R. Burnett, referee in bankruptcy for the southern division of the eastern district of Texas, at his office in the Kiam building. Taylor Bros. have offered a composition of 30 cents on the dollar cash, and a majority of the creditors have accepted.

C. T. Clingenpeel, Augusta, Okla., is building a residence and business room.

William Gorfinkel Arrested, Charged with Being Implicated in a Theft.

HARTFORD, Conn., Jan. 30.—William Gorfinkel, a jeweler on Asylum St., was arraigned in Court yesterday on a charge of being implicated in the theft of a \$150 diamond, for which crime Betty Johnson, a domestic, was arrested. The Johnson girl admitted taking the ring from her employer and claimed that Gorfinkel had, for her, substituted a paste gem for the real diamond. She then returned the ring. A plea of not guilty was entered by each of the accused, and they were held to be tried on Monday of next week under a bond of \$1,000 each. The Gorfinkel arrested is not M. Garfinkel, who does business at 128 State St.

Death of Edward Carlip.

FREEPORT, Ill., Jan. 30.—Edward Carlip, a pioneer jeweler of this city, died last week at his home, 200 Stephenson St., of old age and a complication of diseases.

Mr. Carlip was born in Brandenburg, Prussia, Oct. 20, 1818. He was a watchmaker by trade and followed his occupation for a number of years in Germany. In 1853 he came to America. Several years later he came west and opened a store in Freeport. He was in partnership with his brother, and together they conducted the first jewelry store Freeport ever had. In 1876 he retired from active business life and the business was then left to his brother, who conducted it very successfully until his death in 1881.

"As an indication of what we are doing just now, look at this," said Manager Sperry, of the A. L. Sercomb Co., Chicago, Ill., showing a letter asking for prices and stating that work done by others in that city had not proved satisfactory. "They had tried others," remarked Mr. Sperry, "and now that they want good work they come to us, because we guarantee all work to be as perfect as heavy plate and good workmanship can make it."

Timely Advice

And the best advice we can offer is to replenish your depleted stock of Diamonds and Diamond Jewelry NOW. It is not too early. If you haven't the goods to offer, of course you cannot make sales, but if you make a proper showing NOW you will be surprised at the extent of your Spring business. Besides, it will gain you a reputation as a diamond house that will be of considerable value to you when the busy season begins. In the meantime, if you have calls for special pieces that you haven't in stock, we can help you.

Tariff Decisions & Regulations.

DUTY ON JAPANESE LUCKY STONES.

A decision has been rendered by the Board of Appraisers on protests by the American Express Co. and Overton & Co., against the decision of the Collector of Customs at New York, on importations of what are known as Japanese lucky stones, in which it is decided that these articles are dutiable at 45 per cent. under Paragraph 112, Act of 1897, and not at 20 per cent. as imitations of precious stones. under Paragraph 435 of the Act. The decision is as follows:

We find that these protests are against the assessment of duty at 45 per cent. ad valorem, under the provision in paragraph 112, act of July 24, 1897, upon articles composed of glass or paste (described in the invoices as "stones" and as "rose mully color") of circular, oblong or elliptical form, from about a fourth to three-fourths of an inch in diameter, some of which have double convex faceted surfaces and others are cut cabochon—or with one convex faceted surface, the other being flat and coated with a preparation of bronze powder. They are fantastically striped or otherwise ornamented in combination multicolors, and do not resemble any known precious or semiprecious stone other than in their shape and faceted style. The protests claim, however, that they are dutiable at 20 per cent. ad valorem, under the provision in paragraph 435 of said act, for "imitations of diamonds or other precious stones," etc.

It appears from the testimony of one of the importers that these articles are known as imitation Japanese lucky stones, a variety unknown in commerce or literature as precious or semiprecious stones. The same witness also testified that the articles are imitation black diamonds, which they do not, however, resemble in any essential respect, not being black, but of such positive colors as blue, green, red and yellow. They appear to be new to the trade of this country, having only been introduced within the past two or three years, and are chiefly used by Orientals as settings in jewelry, or as charms, talismans, or otherwise.

The protests are accordingly overruled and the assessment of duty affirmed in each case.

A thief recently broke into the store of J. F. Lippincott, Tobias, Neb., and stole a quantity of jewelry. Bloodhounds tracked him to Ohio.

War Against the Tontine Diamond Companies of Michigan.

DETROIT, Mich., Feb. 2.—The State authorities are apparently determined to drive the diamond contract companies out of Michigan. A bill has been introduced in the Legislature which will prohibit them absolutely from doing business in the State. The Attorney-General is at work under an existing law. This week he filed information against the New Jersey Tontine Co., asking for an order from the Court to compel them to show by what right they take over the contracts of the Detroit Tontine Co., and to enter into new contracts in the State. The State claims these contracts are gambling devices and are, therefore, both against the law and public policy. Proceedings were

commenced against the Detroit company, but they eluded the authorities by being absorbed in the New Jersey concern.

Several suits have been brought by policy holders against the Ionia Tontine Co. for recovery of money invested in the contracts, and a receiver will probably be appointed for the company.

At Niles, Mich., a large number of investors hold contracts in the Diamond Contract Co., of Chicago, and a lawyer was sent to that city to investigate. He reported that the company had not paid matured contracts because they could not send contracts or checks through the mails, and were trying to evade an Illinois law. However, the Niles people say they would be glad to get out with the money they have invested.

American Silver Workers Deported from the Dominion of Canada.

TORONTO, Can., Feb. 4.—On the 30th ult. three employes of the Toronto Silver Plate Co. were deported to the United States, from which country they had been brought by the company in contravention of the provisions of the Alien Labor law. The company claim to have acted in good faith and to have been unaware that they were breaking the law in engaging American citizens.

Recent investigations in Toronto by Officer Williams, a Dominion official appointed to execute the law, have developed a rather anomalous condition of things. As in another case, he was powerless to order deportation because the workmen, though engaged in New York, were not American citizens.

Death of William E. Cook.

ROME, N. Y., Jan. 31.—William E. Cook, a well known watchmaker living at 205 Rockwell Ave., this city, died at the City Hospital, this morning, of typhoid fever complicated with diabetes. The deceased was born in Annsville on June 8, 1838, removing to Rome about 12 years ago. He was a watchmaker by trade and plied his vocation in various parts of the city. Mr. Cook was twice married, his first wife being Sarah Ryan, of Lee, and the second Mrs. Bernadine Slater, of Utica, whom he married on June 26, 1897. The latter and six children survive.

Alleged Diamond Thief Committed.

BALTIMORE, Md., Jan. 30.—John Smith, arrested in Washington, D. C., Jan. 25, was given a hearing at the Central Police Station, Saturday, on the charge of stealing a diamond cluster pin from J. Stuart MacDonald, jeweler, northeast corner of Baltimore and N. Charles Sts. He was committed for Court. Smith was captured on Pennsylvania Ave., Washington, in company with a young woman, who gave her name as Mabel Harris, and said her home was in Philadelphia. When discovered by the detective Smith had about \$500 worth of jewelry, among which were a heavy gold chain, two diamond studs, a scarf pin and two watch charms, one studded with diamonds.

Smith, the detectives believe, is an expert "pennyweight thief," and their theory is sustained by the experience of Mr. MacDonald. The woman said she met Smith for the first time Friday. He represented himself to her as a traveling agent for Tiffany & Co. No charge has been preferred against Miss Harris, but she is held at the Central Police Station to await further developments.

A pawn ticket of a Philadelphia loan office was found on Smith, showing that he had pawned a diamond pin, a stud and a locket in that city.

Smith also visited the establishment of A. Wallenhorst, jeweler, 17 S. Gay St., and looked at some rings.

M. Hulshouser, jeweler, Rockwell City, Ia., has sold out his millinery stock and will devote his entire attention to jewelry.

Burglars Enter Jewelry Shops in the Fitzgerald Building.

PROVIDENCE, R. I., Jan. 30.—Burglars entered the jewelry shop of Fletcher, Burrows & Co., Fitzgerald building, 53 Clifford St., Monday night, and also tried to effect an entrance into other shops in the same building. They succeeded in getting into another shop on the floor below that on which Fletcher, Burrows & Co. are located, but seem to have been frightened off. The net result of the work of the night is a loss of rather less than \$100.

The shop of Fletcher, Burrows & Co. is on the third floor, and the thieves climbed the fire escape and easily effected an entrance by forcing a window. They overlooked a number of valuable packages in the office and took one that contained five dozen tortoise shell combs, worth about \$35 or \$40.

They first went to the jewelry shop of William J. Feeley Co., on the floor below, where they took nothing but tools. They also went to the shop of L. J. Roy & Co., on the ground floor, but were not able to get in, although they used jimmys on the door. After that they seem to have left the building. The robbery is believed by the police to have been the work of amateurs, as it was clumsily done. Nothing was missed from the shop of Fletcher, Burrows & Co., yesterday morning, and it was not until a thorough search had been made and an accounting of stock taken, that the loss of the package of combs was discovered. There is no clue to the robbers.

Incorporation of the William G. Rogers Company.

GREENFIELD, Mass., Jan. 31.—Announcement is made to-day of the issuance of a certificate of incorporation under Massachusetts law to a new concern in this city styled the William G. Rogers Co. The company are formed for the purpose of making and selling silver goods. Their capital consists of 100 shares of stock valued at \$100 each, a total of \$10,000. William G. Rogers is president, William E. Nichols, treasurer, and Herman M. Purdy the third member of the directorate.

Legal Proceedings in the Wirschinger Bankruptcy.

COLUMBUS, O., Feb. 2.—E. B. Dillon has been appointed receiver of the jewelry stock on S. High St., claimed by both J. A. Violet and Frederick Wirschinger, the latter having filed a petition in bankruptcy some time ago. The receiver was appointed for Mr. Violet. The receiver will continue the business until a trustee is chosen. The stock has been somewhat depleted by sales without getting in new stock, and for this reason the receiver was placed under a small bond of \$500.

The Wirschinger bankruptcy matter was up before Referee Rogers, Friday, on application of Receiver Dillon to sell the stock of goods. Both sides agreed to allow the sale to proceed and the bond was increased to \$5,000. Violet, who claims that the goods were turned over to him in consideration of a loan of \$3,500, has consented to return the store and contents to the receiver and share in the dividend as a general creditor. The Court has appointed T. T. Trees and William G. Harrington to appraise the goods, which are claimed to be worth about \$5,000.

Bold but Unsuccessful Attempt at Burglary.

SEATTLE, Wash., Jan. 30.—Burglars Sunday made a bold but unsuccessful attempt to rob a safe containing diamonds and jewelry in the office of Henry Hensel, a manufacturing jeweler, on the third floor of the Hinckley block. After forcing out the combination knob they were unable to pick the combination itself and abandoned the job when a few seconds longer would have opened the safe.

Mr. Hensel occupies the entire northeastern corner of the third floor, and the burglars made their entrance from the hall by prying open the door. They began their attack on the safe by attaching clamps to the combination knob and tearing it from its socket. After removing the knob, the burglars, with the aid of a steel punch and sledgehammer, drove the combination pin out, exposing the combination. They then attempted to pick the lock, but were unsuccessful. They left the office the way in which they had entered, leaving most of their tools behind them. Mr. Hensel did not visit his office until late in the morning. It required but a few minutes to pick the broken lock and open the safe door.

John Gannon, formerly employed in the factory of the Elgin National Watch Co., Elgin, Ill., died recently at a hospital in Duluth, Minn., aged 28. The funeral was held at Elgin, Thursday.

ADOLF J. GRINBERG CO.,

8 MAIDEN LANE, NEW YORK.

Death of Louis Gutmann.

CINCINNATI, O., Feb. 2.—Louis Gutmann, a pioneer wholesale jeweler of Cincinnati, died of heart trouble at his residence, at 4 o'clock A.M., Friday, Feb. 1, aged 62 years.

THE LATE LOUIS GUTMANN.

He had just returned from a few days at French Lick Springs and was, to all appearance, in the best health, being actively engaged in his business up to half past five o'clock the evening before.

Mr. Gutmann was born in Germany, coming to this country at the age of 15 years and settling at Rochester, N. Y., where he learned the jewelry business. He came to Cincinnati in 1865, going into the jobbing business and traveling for himself. He married the sister of A. G. Schwab, subsequently taking Mr. Schwab into partnership with him. Later Mr. Schwab withdrew from the firm, and with his brother, Moses, they went into business for them-

selves, Mr. Gutmann continuing under the name of L. Gutmann until about two years ago, when he admitted his two elder sons, David J. and Elias, and the firm became L. Gutmann & Sons.

Mr. Gutmann was all his life an exact and conscientious man, exercising these virtues daily. He was an upright man himself and he required others to be so as well. He was held in high esteem by manufacturers and jobbers east and west, and was prominent in commercial and social circles in his own city. He expected to shortly retire from active business and enjoy the competence he had accumulated by thrift in the years gone by. For the past quarter of a century he has occupied the same quarters.

He leaves a widow and six children—David J., Elias, Mrs. Emma Marks, Mrs. Louise Wellhouse, of Atlanta, Miss Lillian and Solomon. The wedding of his daughter Lillian was announced to take place next month, and he was interested in making unusual preparations for it, as she was his last daughter to leave home.

The Cincinnati jewelers who began their business career with the house of L. Gutmann were: A. G. Schwab, Moses Schwab, Messrs. Bene and Lindenberg, Louis Albert, Henry Hahn and Jacob Frohman while a number of out of town jewelers emanated from this house.

A meeting of the Cincinnati Wholesale Jewelers' Association was held at the Gibson House on Friday morning, Feb. 1, to take appropriate action upon the death of one of their most respected members, Louis Gutmann. E. Croninger, president of the Association, was in the chair. Rep-

resentatives of the following firms were in attendance: Fox Bros. & Co., A. G. Schwab & Bro., Joseph Noterman & Co., Herman & Loeb, John Holland Gold Pen Co., Duhme Bros. & Co., Frohman & Co., Bene, Lindenberg & Co., Peck, Selmeier & Peck, P. Henry, the Wadsworth Watch Case Co., Albert Bros., C. Oskamp, Dorst & Co. and E. Croninger. John Holland, J. Frohman and H. C. Walton were appointed as a committee to draft resolutions of condolence and reported the following, which were unanimously adopted:

WHEREAS, It has pleased Almighty God to remove from our midst our fellow member, Louis Gutmann; and,

WHEREAS, Mr. Gutmann was for many years prominent in the wholesale jewelry trade of Cincinnati; and,

WHEREAS, He was honest in all his transactions, and energetic and aggressive in his business; and,

WHEREAS, His exemplary character has left an enviable reputation behind him; therefore,

Be it Resolved, That the sincere sympathy of the Wholesale Jewelers' Association of Cincinnati be extended to the members of his bereaved family.

His long life was crowned with success.

He was faithful to every trust reposed in him.

Further Resolved, That these resolutions be spread upon the minutes of this Association and a copy thereof be properly engrossed and sent to the family of our deceased member.

H. C. WALTON, Chairman,
JOHN HOLLAND,
JACOB FROHMAN,
Committee.

It was further resolved that the Association attend in a body the funeral services of Mr. Gutmann, to be held upon the afternoon of Sunday, Feb. 3. As representing the Association the following gentlemen were selected as honorary pal bearers: A. Herman, J. Frohman, S. M. Peck, Herman Duhme, H. C. Walton and William Pflueger.

FREUND

FREUND

has been known for 36 years as a synonym for fair and square dealing, for carrying attractive goods and for selling them at prices which afford jewelers a good profit. Our facilities and energies have been especially directed towards the improvement and development of our line of jewelry, and we strive constantly to preserve and extend our established reputation as

HENRY FREUND & BRO.,
9-13 Maiden Lane, New York.

The Jewelry House

Another Large Jewelers' Building Proposed for Maiden Lane.

A modern office building to be erected on the southeast corner of Broadway and Maiden Lane, New York, in place of the building now there, including 2 Maiden Lane and 170 Broadway, which was referred to in THE CIRCULAR-WEEKLY two weeks ago, will be a certainty. Plans are being prepared, and the title to the property was passed yesterday from Ehrich Parmly to the new Broadway Building Co. The building will have a frontage of 88 feet on the Lane and 76 feet on Broadway; will be 18 stories high, and will be planned and built entirely for the jewelry trade. The deal is said to be the largest ever effected in the downtown district, involving \$2,200,000, including the cost of the land and the new building.

The work of removing the present buildings will begin on May 1. Architects Clinton & Russell are now preparing the plans, and agreements have already been made with the George A. Fuller Co. for the construction of the building at a contract price of \$900,000. The new skyscraper will have two entrances, one on Broadway and one at 2 Maiden Lane, and its elevators will be five in number.

The building will be ready for occupancy on April 1, 1902. Leasing of space has progressed at a very promising rate, 25 per cent. of the floor space having already been leased or engaged. Three corporations, the names of which are withheld, will occupy the lower part of the building. The corner on the ground floor will have

as a tenant a well known National bank of New York. South of the main entrance, on Broadway, a trust company, now being organized, will have their offices, and the basement will be specially constructed in view of the fact that it has already been secured by a safe deposit company.

This safe deposit company will cater especially to the jewelry trade, and provision will be made by which one elevator will be run direct into the vault compartment from the floors above. Among the firms who are expected to be quartered in the new building are: Alling & Co., W. S. Hedges & Co. and G. J. Smith & Co., now at 170 Broadway.

The purchasers of the property are a syndicate, headed by Stewart Browne, of Stewart Browne & Co., bankers. Title has been taken by the Broadway Building Co., of which Mr. Browne is president. The property has frontages of 76.7 feet on Broadway and 88.10 feet on Maiden Lane. The plot originally owned by Mr. Parmly fronted 76.7 feet on Broadway and 67.10 feet on Maiden Lane. He, however, acquired the small adjoining structure, 2 Maiden Lane, 21 by 88.4, and the new building site was conveyed by him to the Broadway Building Co. as one parcel, for a consideration of \$1,300,000. The building may be called the "Broadway Building," but this point is not yet settled.

George S. Adams, optician, is to open a new jewelry store at Saratoga, Wyo.

Incorporation of the Kursh-Pickering Co.

NEWARK, N. J., Feb. 1.—The Kursh-Pickering Co. have been incorporated in this city, to manufacture jewelry, with a capital of \$50,000, divided into 500 shares. The incorporators are Frank Kursh, Newark; George F. Kursh, Philadelphia, and David B. Pickering, East Orange, who have altogether subscribed \$30,000. The Kursh-Pickering Co. have purchased the entire interests of the Shoemaker-Pickering Co., Newark, and will succeed that concern in the manufacture of fine jewelry.

The three members of the new company are all well known in the jewelry trade; Frank Kursch was for many years practically the head of the firm of Pearce, Kursh & Co., Philadelphia, and one of the best known manufacturers of fine jewelry in the trade; David B. Pickering has for the past two years been managing both the practical and financial ends of the Shoemaker-Pickering Co., and George F. Kursh is now managing the business in Philadelphia and will soon take charge of the works of the new organization. The Kursh-Pickering Co. have more than doubled the facilities of the plants which they have taken over and have added many and varied machines for the production of new and perfect lines of jewelry. The new company will occupy an entire floor at 23 Marshall St., Newark, and expect soon to open a branch office in New York.

Candrup Bros. have closed their jewelry business at Huxley, Ia., and vacated.

Commission Merchants.

We beg to announce that we have opened an office at No. 34 Holborn Viaduct, London, E. C., England, for the convenience of American purchasers of **EUROPEAN SILVERWARE, CLOCKS, POTTERIES, PRECIOUS STONES, ETC.**

The situation of this office (corner of Holborn Viaduct and Holborn Circus) affords an unobstructed north light that is unequalled in the district for the examination of **DIAMONDS AND PRECIOUS STONES.**

At our New York office, No. 100 William Street, we have designs and representative pieces of silver and silver plate (reproductions of old Sheffield styles), manufactured by such houses as Wm. Comyns & Sons, Hukin & Heath and Wm. Hutton & Sons, for whom we act as sole United States agents.

We are also sole agents for the silver and metal work made by the London Guild of Handicraft, under the supervision of C. R. Ashbee.

SAM'L BUCKLEY & CO.

Death of Joseph B. Bowden.

The sad news that Joseph B. Bowden, head of the firm of J. B. Bowden & Co., ring manufacturers, 1 Maiden Lane, New York, and one of the most popular jewelers in the entire trade, had died at his residence, 235 Gates Ave., Brooklyn, reached the jewelry trade of New York, Saturday, and caused universal grief and regret. Mr. Bowden's death was not wholly unexpected, as he had been ill at his home since

THE LATE JOSEPH B. BOWDEN.

Nov. 5, at which time he was suddenly stricken, while talking with a representative of THE CIRCULAR-WEEKLY, at the headquarters of the Jewelers' McKinley and Roosevelt Club, 10 Maiden Lane. Mr. Bowden was taken to his office at the time and a physician summoned, and later taken in a cab to his home, where he gradually grew weaker until the end came Saturday morning.

In the passing of Mr. Bowden the jewelry trade of New York loses one of its most conspicuous, prominent and popular merchants, a man whose open hearted, generous and whole souled disposition caused him to be known and loved by all his associates, business and personal. Evidences of the esteem and love which his fellow-merchants had for him are to be found on every hand; two notable instances being the special resolution passed at the last annual meeting of the Jewelers' League, wishing him a speedy recovery, and the special toast drunk to his health at the annual banquet of the Jewelers' Association and Board of Trade, Jan. 16.

In the work of the jewelry trade Mr. Bowden was a most conspicuous figure. He was president of the Jewelers' Security Alliance; was for years vice-president of the Jewelers' League; was president of the New York Jewelers' Association in 1894; was a director in the Jewelers' Association and Board of Trade; was a director in the Chatham National bank and for many years had been president of the Jewelers' Republican organization during the Presidential campaigns. Mr. Bowden was also the choice of the jewelry trade for the position of Commissioner to the Paris Exposi-

tion, the petition to President McKinley asking for his appointment being signed by jewelers in all parts of the country.

Joseph Benjamin Bowden came of English ancestry on both sides of the house. Some of the Bowdens of earlier generations were prominent in Colonial affairs. One of his ancestors was Thomas Bowden, an officer of the British army, who served with distinction in the French and Indian War. His father, Joseph Bowden, was a successful jeweler, and from him Mr. Bowden naturally acquired his liking for the trade. The son of Joseph and Charlotte Bowden, Joseph Benjamin Bowden was born in the then city of Brooklyn, N. Y., on Jan. 10, 1852. His parents moved to Flushing, N. Y., in 1854. He received a good practical academic education in the local schools and in the Flushing Institute, Flushing, N. Y. Then he entered upon the business in which his father had long been engaged.

At an early age Mr. Bowden was taken into partnership with his father. That was in 1873-74, the firm bearing, however, simply the name of Joseph Bowden. From 1874 to 1878 Mr. Bowden was the head of the establishment of J. B. Bowden. From 1886 to the present time he had been senior partner of the firm of J. B. Bowden & Co., manufacturing jewelers, with offices at the corner of Maiden Lane and Broadway. Mr. Bowden's time had been pretty steadily given to business, so that he had none to give to office seeking, though he had long taken an active interest in political affairs as a Republican.

Mr. Bowden made his home in Brooklyn and was largely identified with the social life of that part of the metropolis. He was a member of several of the leading clubs of Brooklyn, including the Crescent, Union League, Lincoln and Atlantic Yacht clubs. He was also a member of the Masonic order, belonging to Acanthus Lodge, F. and A. M., and the Aurora Grata Scottish Rite Organization. He was married on May 14, 1874, to Miss Alice M. Jaggard, and his widow and three children, Joseph L. Bowden, Laurens R. Bowden and Alice R. Bowden, survive him.

The directors of the Jewelers' Association and Board of Trade held a special meeting Monday morning and adopted the following resolutions on the death of Mr. Bowden:

The Board of Directors of the Jewelers' Association and Board of Trade, having been notified of the death of their associate and fellow member, Joseph B. Bowden, and desiring to give expression to the profound sorrow felt by every member of the organization, order the following resolutions to be spread upon the records of the organization and instruct the secretary to transmit a copy thereof to the family of the deceased:

Resolved, That in the death of Joseph B. Bowden the jewelry trade of the entire country has lost one of its most eminent men. By his faithful work as president of the Jewelers' Security Alliance, vice-president of the Jewelers' League and director in the Jewelers' Association and Board of Trade he contributed in no slight degree to the welfare of these organizations and to making them what they are to-day—successful co-operative trade institutions. No higher tribute can be paid to his memory than to say that his personal character, his sterling integrity, his faithful work in the responsible positions to which he was called makes us proud to remember that he was a jeweler; an honor to the trade he chose as his life work. And while bowing to the will of Almighty God in bringing to a close the earthly career of our friend, we give expression to our sorrow, deeply sympathizing with the family bereaved, whose loss is so much greater than our own.

Resolved, That the Board of Directors attend the funeral services in a body, and as a further mark of respect, this meeting do now adjourn.

At a special meeting of the executive committee of the Jewelers' Security Alliance, held Feb. 4, the following preamble and resolutions were unanimously adopted:

WHEREAS, We have learned with deep sorrow of the demise of our esteemed president, Mr. Joseph B. Bowden. Therefore, be it,

Resolved, that as a last tribute of our respect to our deceased friend and colleague, we record our high appreciation of his sterling qualities and noble character, who by his genial manners and strict integrity attained a prominent position as a useful and public spirited citizen and an able and upright merchant. We deplore the loss of his wise counsel and shall ever remember with profound gratitude the valuable services he has rendered this trade on many occasions, and we shall never forget his unselfish activity in the interest of this Alliance and the fidelity with which he discharged his duties as its president.

Be it further Resolved, That we tender the heartfelt sympathy of this Board to his bereaved family and that the members attend the funeral services and that a copy of these resolutions be sent to Mr. Bowden's family.

IMPRESSIVE FUNERAL CEREMONIES OVER THE REMAINS OF MR. BOWDEN.

So many relatives, personal friends, business associates and Masonic brothers of Joseph B. Bowden attended his funeral Monday evening, at his late residence, 235 Gates Ave., Brooklyn, that the house was crowded from basement up. The parlors and dining room were thrown into one large room for the services, but there was not space for more than half the people at one time. It was, therefore, necessary to divide the funeral ceremonies. First came the regular Episcopal service, conducted by Rev. Dr. Backus, of the Church of the Incarnation; then the members of the family and immediate friends passed upstairs to give room for the members of Acanthus Lodge, F. & A. M., who came up from the basement and formed in front of the casket, which was placed at the base of a beautiful bank of elaborate floral tributes from the directors of the Jewelers' Security Alliance, Jewelers' Association and Board of Trade, Lincoln Club and other organizations and individuals.

The Masonic ceremonies were conducted impressively and eloquently by Past Master L. E. Bomeisler, of Acanthus Lodge, at the particular request of Mr. Bowden, made before his death. Prayer by Rev. Dr. Backus concluded the services. The body was placed temporarily in a receiving vault at Greenwood cemetery, Tuesday, and will be interred there later.

Among the many prominent men connected with the trade who were present were: President George M. Hard and director Daniel J. Carroll, of the Chatham National bank; president C. G. Alford, O. G. Fessenden, Charles F. Wood, C. E. Hastings, P. T. Tunison, of the Jewelers' Association and Board of Trade; H. H. Butts, of the Jewelers' Security Alliance; William Bardel and John R. Greason, of the Jewelers' League; William Smith, of William Smith & Co.

The 20 Per Cent. Duty on Drilled Pearls Again Affirmed.

The 20 per cent. duty on drilled pearls has again been affirmed by the United States Circuit Court, this time by Judge Coxe, in a decision handed down Saturday, affirming the decision of the Board of General Appraisers in the second suit by Charles L. Tiffany.

The Collector classified the pearls under Section 6 of the Act of July, 1897, and assessed a duty of 20 per cent. ad valorem as "articles manufactured, in whole or in part." The importer protested that they should have been classified under Paragraph 436 of said Act, and subjected to an ad valorem duty of 10 per cent. as "pearls in their natural state, not strung or set."

Judge Coxe cites the previous case of Tiffany against the United States, 103 Fed. Rep. 619, in which it is held that pearls with holes drilled through them by skilled labor are not "pearls in their natural state." The Government insists that the resemblance of the articles is greater to "pearls set and strung," as provided for by Paragraph 434 of the Act, than to "pearls in their natural state," as provided for by Paragraph 436. With this view Judge Coxe's decision coincides. The following interesting testimony was given by witnesses: "The Chinese, as well as the East Indians, drill very many pearls for convenience in carrying and handling them. Pearls come into the London and French markets in bunches, where they are strung for convenience, and the bunches are joined together with a silver thread. * **"

In the salient part of his decision, Judge Coxe says:

"The Court is clearly of the opinion that the imported pearls bear a closer resemblance to strung pearls than to pearls in their natural state. That this ruling may result in hardship is a contention which should be addressed not to the judicial, but to the legislative branch of the Government. The decision of the Board is affirmed."

Interview with the Advocates of Assembly Bill No. 167.

A CIRCULAR-WEEKLY representative interviewed attorney C. S. Andrews, representing the New York State Medical Society, which is pushing Assembly bill No. 167, against which the optical societies of the State are fighting, to obtain from him an idea of what the physicians propose to do. Mr. Andrews mentioned the changes in the bill as originally presented by Mr. Bell, which are recorded elsewhere in this paper, and said that "the framers of the bill take the position that by the amended wording the patent medicine trade is not interfered with, nor is any change made in the attitude of the law toward the pharmaceutical trade. The matter of the opposition of the opticians towards the bill, has not, so far as I know, been brought before the medical society, and hence no action has been taken on this point."

An informal conference between Dr. Nelson H. Henry, a member of the Assembly Committee on Public Health, and representatives of the patent medicine and pharmaceutical associations was held Sunday, and the optical organizations would have been represented but for a misunderstanding as to the place of meeting.

Continued Examination into the Affairs of M. J. Davidow.

The examination into the affairs of M. J. Davidow, bankrupt jobber, formerly at 510 Broadway, New York, was continued, Thursday, before Referee in Bankruptcy Miller. Mr. Davidow was examined by attorney G. H. Crawford in detail as to the purchase and disposition of the silver ware, watches, jewelry and other goods bought just previous to the failure. He did not take kindly to the lawyer's questions and it was only through considerable trouble on the part of Mr. Crawford and the referee that reasonably satisfactory answers could be obtained. Davidow said he kept no complete set of books and did not keep any record of dealings on a cash basis, as a rule. Neither did he keep a record of goods received or money paid out. He did make entries of all goods sold on credit.

He testified that he went to New York from Scranton, Pa., in 1896, and had no business for a time. Then he was at 92 Bowery, manufacturing patent gas lamp mantles, but he sold out. Then he had an office at 320 Broadway and was in the money loaning business for about six months, the first part of 1898. In October, 1898, he was at 114-116 Canal St., where he was in business a year and three-quarters. On Jan. 15, 1900, he began business at 510 Broadway. He had been handling diamonds and jewelry for about 18 years.

Davidow was questioned regarding a bill of W. I. Rosenfeld for 25 solid gold watch cases amounting to \$406. He said part was sold and part left in the store "in a paste-board box on a shelf, as usual." A bill for three unmounted diamonds, \$521, bought of J. R. Wood & Sons, was shown. Davidow said he received the stones and put them in a drawer in the original papers. He didn't know whether he locked the drawer or not. Attorney Crawford thought these instances showed a peculiar way of caring for valuable goods, but Davidow assured him it was his usual way, as he had no safe. The examination will be continued this afternoon.

Jewelers' Gold Bars Withdrawn and Exchanged.

Week Ended Feb. 2, 1901.

The U. S. Assay Office report:
Gold bars exchanged for gold coin..... \$218,682 90
Gold bars paid depositors..... 47,105 17

Total \$265,788 07
Of this the gold bars exchanged for gold coin are reported by the Sub-Treasury as follows:
Jan. 28..... \$35,852
" 29..... 51,572
" 30..... 2,397,443
" 31..... 45,979
Feb. 1..... 67,232
" 2.....

Total \$2,598,078
Of this sum over \$2,300,000 was withdrawn for export.

The fire which destroyed the Frankel department store, Des Moines, Ia., Jan. 29, caused a loss estimated at \$8,000 to the jewelry stock of Henry Plumb.

The store of A. H. Furstnow, Fond du Lac, Wis., is to have extensive improvements made. An elevated office will be constructed in the rear of the store.

No. 3 Maiden Lane, New York.

PRIZE-WINNING WINDOWS IN THE SIMMONS CHAINS WINDOW DISPLAY CONTEST.

The list of prize winners in this contest was published in "The Jewelers' Circular-Weekly" of Jan. 23. We show here reproductions of the windows which won second and third prizes.

THE SECOND PRIZE of \$50 was awarded Chris. Bernloehr, Indianapolis, Ind.

This window display used a row of little manikins, each wearing a watch and chain. In the center was a card bearing the sentence: "We All Wear Simmons Chains." In the center of the window was a large sunburst of several dozen chains radiating from a card which bore the figure of Father Time and the legend, "Tested by Time." This was flanked on either side by additional displays.

THE THIRD PRIZE of \$25 was awarded Wm.H.Rollman, Mifflintown, Pa. The photographic reproduction is rather unsatisfactory, but it will be seen that the bottom and background were draped loosely with white material on which were arranged clusters of jewelry, chief among which were Simmons Chains in festoons and on cards. The three Simmons window cards were enhanced by a frame of color contrasting with the background.

R. F. SIMMONS CO., Attleboro, Mass.

NEW YORK: 9 Maiden Lane.
CHICAGO: 126 State Street.

Traveling representatives may consider these columns open for the publication of any news or items of interest regarding themselves or their confreres.

A. S. Alfred, traveler for George B. Hurd & Co., New York, is making a trip west accompanied by E. S. Villinoare, traveler for the Norton-

Paulson Jewelry Co., Kansas City, Mo., left last week for an extended trip through Texas.

Chester G. Hall and Samuel Hall, travelers for Albert Gerwig, Pittsburgh, Pa., started out on Monday on their second trip this year, the former into West Virginia and Ohio and the latter westward.

Dory A. Smith, for the W. J. Johnston Co., Pittsburgh, Pa., started out on Monday for a six weeks' trip. Mr. Smith carries the largest stock of watch cases, movements and fine jewelry ever taken from this city.

The Indianapolis, Ind., jobbers had few callers last week. They were: Mr. Hirsch, Hirsch, Flashner & Robbins; N. Gunzburger, L. & M. Kahn & Co.; E. E. Stockton, The E. Ingraham Co.; Mr. Cutter, The Elgin National Watch Co.

H. S. Hurlbut, formerly with the Non-Retailing Co., Lancaster, Pa., is now connected with the wholesale house of the W. J. Johnston Co., Pittsburgh, Pa., and will start out in a couple of weeks, covering Ohio, West Virginia, Indiana, Michigan and the northwest.

David Stone & Son, jobbers in jewelry, 534 Broadway, New York, have engaged Mortimer Hecksher, formerly with Solomon Bros. & Gross, to represent them in the New England States, and E. J. Kennedy to cover New York State and Pennsylvania. Their travelers start on the road this week.

Paul Wettstein, son of George Wettstein, manu-

facturing jeweler, Cedar Rapids, Ia., started on his maiden trip on the road for that house last Monday. He is 18 years of age and has been in the office with the firm for two years. He sold his first bill in the same town and to the same man that his father sold his first bill, over 25 years ago, when he started to travel for a Chicago house. Mr. Wettstein's son, Frank, who has been traveling for him in Iowa, Kansas and Nebraska, is at present in the City of Mexico for his health.

Traveling men calling on Davenport, Ia., jewelers the past week were: K. H. Clarke, Towle Mfg. Co.; E. B. Frank, The Pairpoint Corporation; M. A. Gluck, Otto Young & Co.; C. M. Davis, Ansonia Clock Co.; Henry Klaas, S. Glickauf & Co.; I. Keasler, Aurora Silver Plate Mfg. Co.; G. W. Wile, Buffalo Jewelry Case Co.; John G. Hodgins, Geneva Optical Co.; A. N. Brittan, M. A. Mead & Co.; Norman L. Strauss, Louis Kaufman & Co.; Thomas W. Agnew, New Haven Clock Co.; Ernest A. Leigh, Wilcox Silver Plate Co.; J. C. Baer, Keystone Mfg. Jewelry Co. and representative of Electric City Box Co.

The travelers who called on the Kansas City, Mo., trade last week were: J. W. Stoneburner, Ford & Carpenter; G. A. Jewett, Hamilton & Hamilton, Jr.; Lucien Rockwell, Poole Silver Co.; William T. Smith, Wilcox Silver Plate Co.; Mr. Wolf, for Eisler & Laubheim; J. M. Friede, Eisenstadt Mfg. Co.; Frank R. Horton, Carter, Hastings & Howe; J. O. Slemmons, J. B. Bowden & Co.; Arthur W. Ware; George D. Gruen, D. Gruen & Sons; A. J. Sherrard, Enos Richardson & Co.; F. W. Agnew, New Haven Clock Co.; Jules Franklin, L. Tannenbaum & Co., L. M. Frank, S. Valfer & Co.; E. Lange, P. W. Lambert & Co.; H. E. Osborne, general agent for O. F. Egginton; I. W. Friedman; J. S. Adler, J. S. Adler & Co.; W. S. Sparrow, Stern Bros. & Co.; N. O. Barnhill, Langsdorf-Byers Jewelry Co.

Travelers in Pittsburgh, Pa., last week were: F. C. Somes, S. O. Bigney & Co.; Mr. Platt, Theodore W. Foster & Bro. Co.; Edwin L. Mumford, Waite, Thresher Co.; James O. Otis, Harvey & Otis; Fred. Clarkson, Albert Lorsch & Co.; Jacob Schorsch, I. Enrich & Co.; William Rosenberger, A. Wallach & Co.; Mr. Bleecker, William S. Hedges & Co.; Mr. Rogers, N. E. Whiteside & Co.; P. M. Layman, Riker Bros.; F. D. Newburger, R. Blackinton & Co.; C. F. Brinck, The Crescent Watch Case Co.; F. D. Smith, Reeves & Browne; S. W. Pickering, Allen & Jonassohn; Walter S. Strauss, Jacob Strauss & Sons; J. W. Armbruster, Illinois Watch Co.; W. H. Gregory, Strobel & Crane; Mr. Parker, Osmun-Parker Mfg. Co.; H. A. Bliss, Kremenz & Co.; Fred. L. Baker, The Non-Retailing Co. and Ehlers & Co.

The following travelers made the Twin Cities

the past week: M. Lampert, Henry Zimmern & Co.; Mr. Landy, S. Valfer & Co.; C. S. Mitchell, for A. L. Silberstein; H. L. Stanton; I. C. Nicholson, Flint, Blood & Co.; Mr. Boice, Royce, Boice & Co.; J. S. Adler, for J. S. Adler & Co.; O. H. Hull, The Pairpoint Corporation; A. Kiersky, A. L. Reed & Co.; R. H. Shailer, The E. N. Welch Mfg. Co.; H. B. Kennion, Parks Bros. & Rogers; Mr. Weiser, Heintz Bros.; B. W. Raymond, Aurora Silver Plate Mfg. Co.; Frank Thompson, Derby Silver Co.; and representative of F. A. Hardy & Co.

The following traveling men called on the trade in Columbus, O., within the past two weeks: William Seckels; E. A. Rose, Weigle & Rose; E. G. Harper, S. & S. Druiff; M. Klipper, Hipp, Didisheim & Bro.; Julius F. Shuman, for William Kinscherf; G. C. Ridgway, Julius King Optical Co.; F. A. Perry, The John Russell Cutlery Co.; M. L. Barnard, J. B. Bowden & Co.; C. J. Roehr, Bassett Jewelry Co.; Mr. Crane, Mandeville, Carrow & Crane; E. C. Stone, Battin & Co.; R. P. Coughlin, Wm. L. Gilbert Clock Co.; W. F. Hudson, Champeinois & Co.; W. Miller, The Herman Keck Mfg. Co.; Walter S. Strauss, Jacob Strauss & Sons; L. A. Burt, R. Wallace & Sons Mfg. Co.

Among the traveling men who visited the Detroit, Mich., trade about Feb. 1, were: L. P. Cook, S. Sternau & Co.; A. H. Kohn, Henry Froehlich & Co.; Mr. Wolff, Eisler & Laubheim; W. C. Barry, Larter, Elcox & Co.; Joseph S. Frank, Susfield, Lorsch & Co.; H. Freund, Henry Freund & Bro.; C. A. Hustrom, Wilcox & Evertsen; Charles H. Anderson, Allsopp Bros.; Harry Osborne, The R. Wallace & Sons Mfg. Co.; W. H. Bryant, T. G. Hawkes & Co.; W. H. Race, The Meriden Silver Plate Co. and the Eureka Silver Co.; Willard H. Wheeler, Hayden W. Wheeler & Co.; M. Klipper, Hipp, Didisheim & Bro.; L. E. Smith, M. B. Bryant & Co.; J. W. McClannin, The International Silver Co.; William Baden, The Max Nathan Co.; H. I. Hefe, LaPierre Mfg. Co.; Charles B. Bartlett, Whiting Mfg. Co.; J. M. Morrow, American Watch Case Co.; G. W. Bleecker, Martin, Copeland & Co.; M. D. Smith, S. B. Champlin Co.; D. Rose, Anthony Eisler & Co.; Carl M. Fishel, Fishel, Nessler & Co.; and S. C. Howard, Dominick & Haff.

Representatives of the jewelry trade calling on Syracuse, N. Y., jewelers the past two weeks were: E. J. Mills, W. & S. Blackinton; Mr. Remington, Carter, Qvarnstrom & Remington; Mr. Smith, George J. Smith & Co.; D. N. Jacoby, Providence Stock Co.; Max L. Jacoby, Manchester Mfg. Co.; Walter S. Noon, W. F. Cory & Bro.; Benjamin M. Henschel, Heintz Bros.; G. H. Sluter, Carter, Hastings & Howe; Willard H. Wheeler, Hayden W. Wheeler & Co.; Mr. Walker, The Pairpoint

Corporation; H. L. Mitchell; M. B. Rosenback, for William I. Rosenfeld; William E. Smith, Standard Oil Co.; Harry W. Frolichstein, Frolichstein & England; Joseph Rosenberg, Louis Strasburger's Son & Co.; Frank H. Dana, The H. A. Kirby Co.; J. Goldberg; S. Cohn, Oppenheimer Bros. & Veith; W. S. Gardner, Bassett Jewelry Co.; Theodore L. Parker, Martin, Copeland & Co.; Mr. Cook, Fontneau & Cook; Henry Gruenthal, for J. J. Cohn; H. B. Richardson, G. A. Dean Co.; Garrett G. Freer, E. A. Bliss Co.; Charles T. Dougherty, William L. Sexton & Co.; Charles A. Hetzel; W. H. Gregory, Strobell & Crane; E. C. McCarter, Wilcox & Wagner and Ziruth & Moore; R. T. Supple, William B. Durgin Co.; C. F. Sweasey, William B. Kerr & Co.; W. H. Bryant, T. G. Hawkes & Co.; S. E. Giffen, National Glass Co.; George B. Potter, Emil Weissbrod & Sons; E. H. Cox, Sussfeld, Lorsch & Co.; Frank S. Goff, Bennett & Bradford; J. B. Richardson, Payton & Kelley Co.; L. E. Van Horn, Philipp Zelenka & Son.

Al. Wormood, of the Illinois Watch Co., Springfield, Ill., was in St. Louis, Mo., last week.

Edwin Beckwith, New York Mutual Optical Co., was among the optical trade of Trenton, N. J., recently.

The traveling men of the L. Bauman Jewelry Co., St. Louis, Mo., six of them, are now on the road with their goods.

L. Adler & Son., New York, will be represented on the road by I. L. Friedman, who will carry a line of diamond jewelry and mountings.

William Andrews, formerly with Enos Richardson & Co., New York, is now traveling for J. J. Cohn, New York. He is now visiting the trade in the west.

J. Bioren, of Bioren Bros., Newark, N. J., and a representative of the Jennings Bros. Co., Bridgeport, Conn., visited the jewelers of Trenton, N. J., last week.

Recent travelers in Omaha, Neb., were: J. A. Patterson, Hayden W. Wheeler & Co.; C. A. Garkick, Schrader-Wittstein Co.; Fred. Pettee, Waterbury Clock Co.

Among the eastern representatives in St. Louis, Mo., last week were: J. Herzog, L. Kaufman & Co., the ring manufacturers of New York; Mr. Rockwell, The Poole Silver Co.

Among the travelers who recently visited San Francisco, Cal., were: George Paine, E. I. Franklin & Co.; Mr. Thornton, Powers & Mayer; G. A. Whiting, Whiting & Davis; L. E. Fay, R. F. Simmons Co., and Wade Williams, Arnold & Steere.

David L. Nesler, the Chicago representative of Nesler & Co., Newark, N. J., started last week from the factory with the intention of taking in Buffalo, Cleveland, Detroit and other cities en route to the metropolis of the west. He is still selling hoop earrings.

The following traveling men interviewed the jewelers of Portland, Ore., the past week: W. E. Meadows, Phelps & Adams; Louis W. Bruns, Juergens & Andersen Co.; Mr. Goldsmith, Adolph Goldsmith & Son; Mr. Weil, Electric City Box Co.; Mr. Hammett, Whiting Mfg. Co.; and a representative of Frank M. Whiting & Co.

McRae & Keeler, Attleboro, Mass., have made a change in their traveling force. Fred. L. Bellows, who has been their representative all over the west for several years, has left them to start in a new business on his own account, in which all wish him success. McRae & Keeler have secured the services of Mr. Sandfeldter, of St. Louis, who has been their employe there. Mr. Sandfeldter will cover the territory between New York and Chicago,

while the metropolis will continue under the direction of William A. Lauder.

An incident of several days ago which had not before seen the light of publication has just found its way back to Attleboro. On a train running up from Dallas, Tex., to Kansas City, Mo., were four Attleboro traveling salesmen for jewelry houses. A member of the quartette is responsible for the story, but asks that the names be not used, as it would attract the attention of their rivals to the fact that the four had invaded Texas for the first time and might lead to fresh competition in their new field of activity. They found in the train with them a gentleman who proved to be one William J. Bryan, of Lincoln, Neb. The five got into conversation and Mr. Bryan poked a little good natured fun at them, declaring that from now on he favored protection for Texas if four such bright men meant to spend much of their time searching for dollars there. The conversation, however, quickly took a political turn and a heated and brilliant debate on the subject of the coinage came about. Mr. Bryan defended his personal views on the coinage very ably, but he had practical men to contend with. The climax of the debate, the remark which silenced the great advocate of 16 to 1, was the reply given to one of his statements by the big portly man, whom the traveling men occasionally call affectionately, "Colonel." Said Mr. Bryan, "But gold is always fluctuating, as well as silver." "Mr. Bryan," was the reply, "I must disagree with you. In my business for 20 years I have bought gold for the manufacture of jewelry and I have paid the same price for it per pennyweight all that time without deviation." The man who silenced Bryan with cold facts from the jewelry district has become the subject of talk wherever jewelry makers or sellers are found congregated.

Newark.

Samuel K. Knott, a manufacturing jeweler, 52 years old, died Jan. 19, at his home, 95 Academy St. He had been ill for several months. The funeral took place Wednesday.

The Coöperative Mercantile Co. have been incorporated in New Jersey with a capital of \$500,000, to deal in jewelry. F. C. Hobb, Clifford W. Perkins, K. K. McLaren, all of Jersey City, are the incorporators.

At the last meeting of the Jewelers' Protective Union, Local No. 2, of Newark, held at headquarters, 210 Market St., it was decided to give a sociable to the members and their friends Friday evening. The entire official staff of the International Jewelers' Workers' Union of America and Canada and the officers of the New York local were invited.

L. M. Barnes is about to renovate and decorate his store at North Adams, Mass.

John M. Frear, 71 Court St., Binghamton, N. Y., will move about April 1 to the People's Bank building. Whitney & Co. then move into the store vacated by Mr. Frear.

14 East 17th Street,

Providence.

Arthur Henius, Providence representative for Bruhl Bros., arrived in this city last week from a business tour of Europe.

The monthly meeting of the New England directors of the Jewelers' Association and Board of Trade will be held in the Wilcox building to-morrow.

Noah H. Holt, Providence representative of the Jewelers' Association and Board of Trade, delivered an interesting address on "The Abundant Life," before the St. Thomas Club, at Taunton, Mass., last week.

In the case of Jacot & Son, New York, against W. J. Briggs & Co., Pawtucket, for \$84 on book account, heard in the 10th District Court, at Pawtucket, last week, a decision was entered in favor of the plaintiffs.

Frank H. Gladding, traveling representative of Clark & Coombs, has the sympathy of his associates in the loss of his wife, who died last week. Mrs. Gladding's father, the late J. D. Benton, was a well known jeweler in this city.

Among the jewelry buyers in the city the past week were: S. Goldstein, Market St. Novelty House, Philadelphia; Mr. Hilleson, of Hilleson Bros., Toledo, O.; Bennett Siegel, Des Moines, Ia.; A. Goldman, of Goldman & Collins, Pittsburgh.

Another evidence of the desire which President Holbrook, of the Gorham Mfg. Co., has for the betterment of the condition of the employes at the works, is to be found in the recent gift by Mr. Hol-

brook of a library of some 800 volumes, covering a wide range of subjects, to be placed in the Casino for the use of the employes.

Among the incorporated companies chartered in Rhode Island who have filed their annual statements with the City Clerk are the Daggett Jewelry Co., Attleboro, and the Cornell-Andrews Smelting Co., of this city. The certificate of the Daggett Jewelry Co. sets forth that the capital is \$15,000, all paid in; that they have no real estate; that the value of their personal assets Dec. 31, 1900, was \$24,188.52, and that the liabilities on that date were \$8,680. The certificate of the Cornell-Andrews Smelting Co. states that the capital, which was limited to \$15,000, has been increased by the amount of \$15,000, and that the whole amount was paid in on Jan. 5, 1901.

The Gorham Silversmiths' Mutual Aid Society held their 36th annual meeting at the Gorham Casino, Thursday evening last. The reports submitted showed the organization to be in a prosperous condition. Disbursements during the past 10 years have amounted to \$46,797.82. The present membership is 540 and 82 applications for membership are pending. The amount of receipts for the past year was \$5,544.62 and the amount of disbursements during the same period was \$5,086.03. The following officers were elected: President, Arnold C. Brown; vice-president, Louis P. Rittman; treasurer, W. A. Clissold; secretary, Fred A. Burt; auditors, George

H. Rhodes and Robert H. Anderson; physician, W. L. Harris, M.D.

The annual reunion of the heads of departments of the Gorham Mfg. Co. works, in this city, was held Wednesday evening, at the Gorham Casino. About 60 persons sat down to the excellent banquet that had been provided. Superintendent Fred Lawton presided, and the informal post-prandial exercises included remarks by John F. P. Lawton, secretary of company, who talked interestingly on the remarkable growth of the works during the 40 odd years he had been connected with the institution, and by Mr. Codman, the chief designer, who gave a brief account of his experiences at the Paris Exposition. Remarks were also made by Mr. Aldrich, of the office department, and Mr. Vogle.

Baltimore.

John N. H. Menger has sold his business to Jerome W. Schirm. Mr. Schirm was for many years with J. Stuart MacDonald.

Charles C. Stieff, manager of the Baltimore Sterling Silver Co., was elected secretary of the regular Democratic Association of the Second Ward, Jan. 29.

William H. Hennegen, of the Hennegen, Bates Co., was a member of the hospitality committee to whom the success of the Merchants' and Manufacturers' Association banquet, held Jan. 31, was due. J. Smith Hopkins was a subscriber to the banquet.

The magnificent silver punch bowl, designed and made by Jacobi & Jenkins, which is a testimonial to S. Davies Warfield, chairman of the executive committee of the Honest Money Democratic League, was presented to Mr. Warfield, Jan. 31. The bowl has already been described in these columns.

Henry Maas, one of the men charged with assaulting and robbing Alexander J. Hubbard, last November, was removed Jan. 30 from the Towson jail to the Baltimore City jail. It was thought that an attempt might be made to get him out or that he might escape, so it was deemed advisable to remove him to the city until the date of his trial.

John Smith, alias Edward Whalen, alias Eddie Ward, alias "Boston Frank," etc., who is in jail awaiting trial on a charge of stealing a diamond pin from J. Stuart MacDonald, is believed to have had a hand in the robbery of the jewelry store of J. V. Alfriend & Co., Norfolk, Va., last December, when about \$4,000 worth of jewelry was stolen. James P. Banner, a representative of Alfriend & Co., came to Baltimore Jan. 31, and upon seeing Smith in jail he identified him as the man seen in Norfolk about the time of the robbery.

The line of diamond jewelry made by Gattle, Ettinger & Hammel, 68 Nassau St., New York, is appropriately designated by them "masterpieces of the jewelers' art." Pendants, tiaras, hair ornaments, pearl necklaces, collarettes and rings of unique and highly artistic design, set with perfect gems in attractive combinations, comprise a line which jewelers in search of pieces with which to appeal to the cultivated taste cannot afford to overlook.

An Event in Cut Glassware

We are fast pushing into prominence an entirely new line of Novelties, which we consider the best ever made in . . .

WICKE & CO., 32 Park Place, New York.

Attleboro.

R. M. Derick and George W. Enbom, who have been in business some time as R. M. Derick & Co., dissolved partnership this week. They plan to resume business as individuals.

The Charles S. Bush Co., dealers in jewelers' supplies, are building an Attleboro headquarters on Railroad Ave. They have placed in charge Sanford A. Hamilton, late of the Hamilton Co., jobbers.

R. Curtis Read, New York representative for J. C. Cummings & Co., was called home by telegraph last week owing to the death of his father, Henry C. Read. The young jeweler has the sympathy of scores of friends.

The Attleboro Y. M. C. A. has arranged to give a course of four free lectures, illustrated, on design, by a member of the faculty of the Rhode Island School of Design for the young men employed in the Attleboro jewelry factories.

P. John Cummings, of P. J. Cummings & Co., left last week for St. Augustine, Fla., for his health. Frank Barton, traveling man for the house, accompanied him to Washington, leaving him there to start for his western circuit.

The Attleboro school board annual report contains a recommendation that the town introduce manual training into the schools in 1901, the course being designed to train up engravers, designers and other craftsmen for the jewelry business.

Charles H. Makepeace and John E. Sherman, who have been doing business under the name of the Attleboro Chain Co., dissolved partnership last week. Fred S. Cobb, for several years with G. H. Herrick & Co., purchased the interest of Mr. Makepeace.

Norton, bordering Attleboro on the south, finds that its jewelry factory village, styled Chartley, is growing rapidly. It has appealed to the State Legislature for permission to issue bonds to install a suitable town water supply, principally owing to the increase in tenements there.

Leslie Fisher, one of the expert engravers of Bates & Bacon, who could not follow the plant into the employ of the Philadelphia Watch Case Co., because of being a member of the American Federation of Labor, left last week for Canton, O., to enter on a position with the Dueber Watch Case Mfg. Co.

Clarence L. Watson, of the Watson & Newell Co., appears as one of the petitioners in the movement of the big and wealthy Interstate Consolidated Electric Street Railway Co., which covers the jewelry territory, to transfer its incorporation from Rhode Island to Massachusetts, the matter being before the House now.

The bill for the raising of the compulsory education age limit in Massachusetts from 14 to 16 years was killed in committee last week. The treatment of this bill in the editorial columns of this paper when it was introduced received flattering comment in the local press and among readers in the Attleboro Republican Club rooms.

A large sum of money was raised by capitalists' subscriptions in 1893, during the depression in the jewelry

business, to aid the destitute employes of the local factories. It was later augmented by similar subscriptions to aid the families of Attleboro jewelry operatives who went into the Spanish war. J. L. Sweet, of the R. F. Simmons Co., was at the head of the organization empowered to expend the money. As it has lain idle for some years it was Saturday turned over to the King's Daughters.

In the statistics of Attleboro jewelry factories in the last issue of THE CIRCULAR-WEEKLY, there was a palpable misstatement regarding the number of employes in the factory of S. O. Bigney & Co. In this factory there are now employed over 100 females, the entire number of male and female employes exceeding 200. This large force have been kept busy largely during the entire year, and have been working evenings during the past month. The S. O. Bigney & Co. factory is one of the truly busy spots in the town.

There was lively bidding Saturday last for pews at the Second Congregational Church. Charles A. Marsh, of C. A. Marsh & Co., and Raymond M. Horton, of the old firm of Walch & Horton, paid the highest premiums, each going \$135 over the set price for a pew out of sentiment and because of the immense demand. At the election of officers of the church last week the following received notice: Charles E. Bliss, of Bliss Bros.; Albert A. Bushee, of A. Bushee & Co.; Harry P. Kent, of F. W. Weaver & Co.; Sidney O. Bigney, of S. O. Bigney & Co., and Herman T. Regnell, of Regnell, Bigney & Co.

David Simmons, jeweler, 543 W. Market St., Louisville, Ky., Thursday, found a purse with \$400 in bills and a check for \$150. In it was the name of the owner, to whom Mr. Simmons returned it.

Horace Finberg, a Polish watchmaker, of Mt. Carmel, Pa., fasted 24 hours, standing in one position, last week, in order to win a wager of \$10.

North Attleboro.

George K. Webster, accompanied by his traveler, Nathan F. Swift, left Friday last for a week's fishing through the ice on Lake Winnepesaukee, N. H. Mr. Swift owns a little cottage there.

G. Herbert French, of Riley, French & Heffron, made a large purchase of real estate from Francis G. Pate, of F. G. Pate & Co., last week. Mr. French has gone to Florida for a short pleasure trip.

Rev. Fr. Charles J. Burns, the loved rector of St. Mary's Catholic Church, in North Attleboro, died last week. At the hour of his funeral on Saturday several local jewelry factories suspended operations.

John H. Peckham, of the recently dissolved firm of Palmer & Peckham, resigned last Wednesday his place on the Board of North Attleboro Selectmen. He left before the end of the week for Chicago, where he proposes to enter the jewelry business.

A veteran jewelry manufacturer and respected citizen, Abiel Coddling, celebrated with modest ceremony last week the 84th anniversary of his birth. Mr. Coddling is a native of this section, born in Rehoboth, the son of Abiel and Chloe Daggett Coddling. From a Revolutionary hero, James A. Coddling, of Taunton, his grandfather, he inherited a sturdy manhood which would have marked the family for success in any line of activity. In 1839 he went to Philadelphia and engaged in the jewelry business there for two years, returning to the Attleboros in 1841. On his return he entered the firm of Ira Richards & Co., and after Mr. Richards's death he remained for 30 years the active head of E. Ira Richards & Co. He has been active in other enterprises, being for years president of the Attleboro Savings bank and director of the local National bank. He is president of the North Attleboro gaslight corporation, and the oldest Mason in the Attleboros. Two sons, James A. and Edwin A., are prominent in local business circles.

Full Revival of the Earring.

SINCE Cleopatra's time and her magnificent pearl earring, which played such a prominent part in her life or, rather, death, this particular piece of feminine jewelry has come in and gone out regularly with the tide of popularity. Just now earrings are considered quite the correct thing, though for 10 or 15 years they have scarcely been worn at all. The "grown-

and undergo inspection. If they would be converted into strictly modern ones they must pay a visit to the jeweler and be re-set. Two settings are permissible—the screw and the French, this latter a combination of the screw and the old fashioned "drop," but without the swing. Pearls and turquoises, alone or set round with diamonds, are all you have to select from if you confine yourself to the earrings of fashion. Of course, pearls, lustrous and of

portant to avoid.

Just now collarettes seem to be more popular than ever. In design and combination of stones they are certainly exquisite, offering a rare chance for display of individual taste. One of all diamonds is not considered as elegant as one combining stones of color. It is the connoisseur, though, who really prefers a design worked out in rich colorings. This taste for gems of color is like that for pomelloes,

[GROUPED AND ENGRAVED FOR "THE JEWELERS' CIRCULAR-WEEKLY" FROM PHOTOGRAPHS BY ROSE & SANDS, 244 FIFTH AVE., NEW YORK.—LOANED TO THIS JOURNAL BY THE SUNDAY EDITION OF THE NEW YORK "HERALD."]

ups" of that period are probably prepared to welcome them as old friends. To the others it will be a new experience, and means having the ears pierced. Jewelers have been predicting for the last two years the revival of this fashion, and there has been a marked tendency in its direction, and now it is generally admitted that earrings are positively to be worn.

Old earrings may be brought forth from their velvet resting places of many years

fairly good size, are favorites. These are rare and expensive enough to be much desired by smart women. The French setting admits of a little variety. A small diamond forms the head of the screw, and depending from this is a large pearl, held perfectly firm by a fine wire loop which passes under the lobe of the ear and fastens at the back on the point of the screw. The effect is that of the drop, yet there is no swinging, the one thing that is most im-

an acquired one; it grows with amazing rapidity, and its gratification is determined only by one's income.

Where pearls are the stones for collarettes, diamond bars are generally used, and these may be quite plain or of fancy design. Matching the pearls when several hundred are needed is by no means an easy thing. In size, shape and luster they must be exactly alike, and these three qualities fix their price.—New York Herald.

William Atherholt, of L. C. Reisner & Co., is canvassing the Schuylkill Valley.

F. M. Rodgers, watchmaker for C. R. Smith & Son, has resigned his position.

Charles Beerhalter has resigned his place as clockmaker at the Bailey, Banks & Bidle Co.

Thomas Maddocks, of Simons, Bro. & Co., left Saturday on his 33d annual tour through the south, accompanied by his wife.

Nellie Haines, daughter of William Haines, retail jeweler, 1224 Columbia Ave., was married last week to Charles Southwell.

The Quaker City Cut Glass Co., who

have their factory at 1819 N. 5th St., were chartered at Dover, Del., Friday, with a capital stock of \$250,000.

William F. Michael, for six years general manager of the establishment of Davis & Galt, silversmiths, has resigned his position with that house.

Edward B. Chase, of J. E. Caldwell & Co., intends to build a handsome new residence near the Rose Tree Hunt Club House, Delaware county.

J. H. Shaw, a badge and medal maker on Arch St. near Broad St., intends to bring suit in the Dauphin county courts to recover for badges furnished the members of the Legislature at the time of the unveiling of the Washington monument.

A bill aimed at Philadelphia's big department stores was introduced in the Delaware Legislature, Friday. It provides that every order and delivery wagon shall be licensed. The big local stores deliver goods in Wilmington and elsewhere in that State.

Joseph K. Davison, manufacturing jeweler, 718 Sansom St., received the contract last week for 5,000 medals to commemorate the inauguration of McKinley and Roosevelt at Washington next month. The contract was secured direct from the Inauguration Committee.

The Peter L. Krider Co. have opened an office and salesroom in the Real Estate Trust building, southeast corner of Chestnut and Broad Sts. Mr. Newhall has on exhibition some beautiful specimens of sterling ware art in centerpieces, loving cups and pitchers. The factory, under the management of Mr. Wood, is still in the old quarters on Chestnut St.

Letters of administration were granted

Thursday to Mrs. M. B. Allebach, on the estate of her husband, Mahlon B. Allebach, formerly a retail jeweler at 1328 Walnut St. The estate is conservatively valued at \$13,500, but is believed to be worth more. It is the intention of Mrs. Allebach to sell the stock, fixtures and good will of the Walnut St. store at private sale.

The shuffle board team, representing the Philadelphia Jewelers' Club in their tournament with the Harold Club, has so far scored decisive victories, and will, in all likelihood, triumph in the end. The team comprises J. Warner Hutchins, L. P. White, A. G. Lee, William F. Parry, William H. Long, Joe Cadwalader, Zophia Laird, A. J. Le Jambre, William Quinn and Fred Block.

Simon Pfaelzer, a member of Pfaelzer Bros. & Co., jobbing and retail jewelers, 932 Market St., has retired from business, after having been connected with the trade in this city 34 years. He will sail in a few days for Europe for a pleasure trip. His retirement took effect Feb. 1. The business will be carried on hereafter by Morris and Frank Pfaelzer, at the old stand, under the name of Pfaelzer & Son. Frank Pfaelzer has been taken into partnership to succeed his uncle, Simon Pfaelzer, who, during 34 years as a jobbing jeweler, formed a wide circle of acquaintances in the trade in this country and abroad, was born 54 years ago in Hemsbach, Baden, Germany. He came to this country when 19 years old and immediately entered the jewelry store of his brother, Morris Pfaelzer, at 201 Market St. At the end of a year he was taken into partnership and the two moved to 203 Market St., where they opened a store. They entered the jobbing field at this time and built up a lucrative trade. After occupying various sites they moved, three years ago, to 932 Market St. Simon Pfaelzer is believed to have amassed a fortune. His retirement from business will be regretted.

Lancaster, Pa.

J. M. Jenks, of J. M. Jenks & Co., has left on a four months' western trip in the interests of his house.

William H. Herr, jeweler, Columbia, this county, has made an assignment to R. Morgan Root, of Pottstown, Pa., for the benefit of his creditors.

Joseph Hahn, foreman of the supply department at L. C. Reisner & Co.'s establishment, who was seriously ill for several weeks, has resumed his duties.

Canada Notes.

H. Sheppard has opened a jewelry store at Grand View, Man.

R. J. Vincent has purchased the jewelry business of P. A. Crews, Mount Forest, Ont.

Winnipeg, Man., may soon have a city clock with four faces for the City Hall tower.

The Hemming Mfg. Co., Toronto, have placed on the market a line of memorial badges for Queen Victoria, which are being extensively worn.

The jewelry store of A. Martin, St. Vincent and Notre Dame Sts., Montreal, was broken into Jan. 25 and some valuable articles were stolen. Mr. Martin reported the affair to the police.

George E. Cooper, well known to the trade as an expert engraver on his own account, died on Jan. 24 in the General Hospital, Toronto, aged 55 years. He had a large number of friends in sporting and military circles.

W. F. Carrier, formerly in the wholesale jewelry trade in Toronto, but of late years the business representative of the Montreal *Star*, in Toronto, died on the 26th inst. at Grace Hospital, where he had gone to have an operation performed.

Aaron Levy, who has represented Levy Bros. Co., Hamilton, on the road for the last 10 years, has gone to Chicago. His place has been taken by J. Bowen, formerly traveling representative of J. Eastwood, New Glasgow, N. S. C. S. McLeod, jeweler, Amherst, N. S., will also travel for Levy Bros. Co. in the Maritime Provinces.

Miss Amelia Knight, employed as a saleswoman in T. N. Rickard's jewelry store, Bowmanville, Ont., met with a terrible death on Feb. 27. Driving in a carriage near Bowmanville in company with her sister, Miss Helen Knight, and Herbert J. Hallett, of Whitby, the carriage was run into at the Grand Trunk Railway crossing and all three instantly killed. It is not known exactly how the accident occurred. The whistle of the locomotive was blown as usual, but the train was almost upon the carriage before the engineer noticed it.

Detective Cuddy, while standing in Ward's pawn shop, Toronto, saw a man named Joseph McCready enter. His evident embarrassment on seeing the officer aroused the suspicion of the latter, who at once arrested McCready and found a new watch in his possession. He traced the watch to Mrs. Gowland's retail jewelry store, King St. E. The property had not been missed, but investigation showed the loss. McCready was brought before the police magistrate on Jan. 29 charged with the theft, and was identified as having spent some time at the store on pretence of wishing to make a purchase. He was convicted and sentenced to six months' im-

prisonment. He is also wanted in Trenton, Ont., but on a charge of theft.

William G. Lewars, of the Bon Ton Novelty Co., was arraigned at the Police Court, in Toronto, on the 1st inst., charged with making a fraudulent use of the mails by advertising to send tea sets, jewelry, etc., free to anyone selling 25 pins at 10 cents each. A. R. Farrance, an expert jeweler, swore that a stone described as a "glorious South African gem" of marvelous brilliancy was really worth about 40 cents. Lewars's cash book showed that the "handsome ladies' and gents' chains" advertised cost him 50 cents per half dozen, and a watch described as of "beautiful and delicate workmanship" was pronounced by the expert "the worst excuse for a watch he had ever seen." The advertisement regarding a 56-piece tea set was so carefully worded as to leave it in doubt whether the correspondent was entitled to receive the entire set or only a single piece of it. The case was enlarged until Tuesday, the 5th inst.

Hearing on the Petition of the New England Optical Institute.

BOSTON, Mass., Feb. 4.—On Feb. 11 a hearing will be given by the Legislative Committee on the petition of the New England Optical Institute. The petition, as outlined in a previous issue of this paper, is for the right to grant the degrees of "Doctor of Physiological Optics" (D.P.O.), and "Bachelor of Optics" (B.O.).

It was learned to-day that there is likely to be some opposition to the passage of this bill, it being said that the State Board of Health opposes it on the ground that no such degree as contemplated should be given to anyone not a physician. On the other hand, the men who are working for the bill say that a physician's knowledge is not necessary. It is very likely that the hearing will result in some very lively arguments. The New England Optical Institute has engaged legal talent to look after its interests and the result will be awaited with great interest by all branches of the trade.

Bankruptcy Proceedings Against Michael Schuster.

WASHINGTON, D. C., Jan. 30.—Proceedings in involuntary bankruptcy were to-day instituted in the Supreme Court of the District of Columbia, by Adolph Rosenthal, I. W. Friedman and Eliassof Bros. & Co., wholesale jewelers of New York, asking the Court to declare Michael Schuster, a jeweler of this city, bankrupt. The creditors ask that a receiver be appointed to take charge of all the goods, effects and properties of Schuster.

Justice Hagner issued a rule requiring Schuster to show cause why he should not be declared a bankrupt and why a receiver should not be appointed, as requested.

New Subscribers can commence at any time. Payments for THE JEWELERS' CIRCULAR-WEEKLY, when sent by mail, should be made in a Post-Office Money Order, Bank Check or Draft, or an Express Money Order or Registered Letter. All postmasters are required to register letters whenever requested to do so.

Pay money only to authorized collectors having proper credentials.

Returning Copies. Returning your paper will not enable us to discontinue it, as we cannot find your name on our books unless your address is given.

Changing Address. In changing address always give the old as well as the new one. Your name cannot be found on our books unless this is done.

Discontinuances. We will continue to send papers until there is a specific order to stop, in connection with which all arrearages must be paid; but such an order can be given at any time, to take effect at or after the expiration of the subscription. All such orders will be promptly acknowledged by mail.

Liability. The courts have decided that all subscribers to journals are responsible until arrearages are paid in full and an order to discontinue has been received by the publisher.

THE JEWELERS' CIRCULAR-WEEKLY IN EUROPE.

Among the places in Europe where it is on file are the following:

- LONDON—First Ave. Hotel, Holborn, E. C.; Holborn Viaduct Hotel, Royal Hotel.
- PARIS—Hotel de L'Athene, Rue Scribe.
- LEIPZIG—Handels-Zeitung für die gesamte Uhren Industrie.
- BERLIN—Deutsche Uhrmacher Zeitung, Jager Strasse, 73.
- GENEVA—Journal Suisse D'Horlogerie.
- AMSTERDAM—Continental Club, Hotel Amstel.
- ANTWERP—Diamond Club, Rue de Pelican.

Every line of reading matter in THE JEWELERS' CIRCULAR-WEEKLY, with the exception of a few brief extracts from exchanges, always properly credited, is written exclusively for this journal. Each issue of THE JEWELERS' CIRCULAR-WEEKLY is copyrighted. Permission to quote is extended to other publications provided such quotations are properly credited.

IT is with feelings of pride that we present to the trade this, our 32d Anniversary Number. We will not enumerate the many special articles and other features that make this one of the finest editions ever issued from our office; but we will call attention to one feature, namely, the beautiful cover, which was designed upon our request by W. C. Codman, head of the designing department of the Gorham Mfg. Co.

Failures in January, 1900-1901.

FORCED liquidation at the opening of the year is customary, and experience has taught that payments maturing on Jan. 1 disclose any weakness that may exist. This annual balancing of accounts tends to drive many unsuccessful firms out of business; either in December, when misfortune seems inevitable, or in January, after a final effort to secure extension. When it is considered that the amount of defaulted indebtedness in January, 1901, was less than the monthly average for the entire year 1900—and the closing months of last year were marred by severe reverses in many branches of trade and manufacture that threatened unusual difficulties at the turn of the year—there is much encouragement to be derived from a careful analysis of the record. In the trading class is comprised the large bulk of business houses that buy and sell without making their wares. This covers the large majority of firms in the United States, and a gratifying return here is of most importance, since it touches the greatest number of persons. Trading failures in January, according to *Dun's Review*, were \$767,241 less than a year previous, and but \$41,512 larger than in January, 1899, which was the year of lowest failure rate. Among the traders designated as "jewelry and clocks," there was \$114,017 of indebtedness in January, 1901, against \$353,558 in January, 1900, a most encouraging exhibit.

Advantages of Labor Saving Machinery.

AN English representative of industrial firms in Birmingham, Manchester and Northampton, sent to the United States to investigate the economies of machinery over hand work, tells a story of interest to all manufacturers. The report of the investigations has just been published in the *London Express*. There is in it many things that are not generally known to Americans. The American ax, for instance, supplants the English ax, because the American ax, made by machinery, sells for \$5 per dozen, while the English hand made ax, of no more enduring quality, sells for \$20 per dozen. American machine made files are selling in England because the cost of manufacture by machinery is one-eighth the cost by hand. In the manufacture of American jewelry, the labor on a certain type of gold brooch, which cost \$1,435 per thousand by hand, costs only \$118 by machinery. Every industry in America has been invaded by machine economies, and the productive power of our factories and laborers has been greatly increased. In England the belief still exists that machine economies are injurious to the wage earner. But while British

manufacturers are clinging to antiquated machinery and tools and are reluctant to give up hand labor, because it is cheap, the United States is constantly improving her machinery and tools and is sending abroad more machinery every year. In summing up, the English investigator of American industrial methods declares that the captains of English industry must abandon old tools and methods, as the nation which is the best equipped with machinery will take and retain the leading position. The United States holds that position now and will undoubtedly retain it.

The Important Factor of Credit.

FROM the fact that there are but about two billion dollars of currency in circulation in the United States, averaging about \$26 for each person, it is very evident that credit is more necessary in the business world than the actual possession of currency. It is also a fact that about 95 per cent. of all business transacted is by checks and drafts, substitutes for money and whose origin was based solely upon confidence in commercial credit. Real and personal assets are but a factor in the creation of credit, and while a substantial asset is desired, at the same time financially light business men need credit far in excess of their actual ability to pay should they be called upon to settle at a moment's notice; therefore, it is necessary for the wholesale house or manufacturer to know the character of the credit seeker, his paying habits, the probable prospect of his success and his business history. The records show much of the real assets of the credit seeker, but the hidden and most vital points, viz.: business character, paying habits and past history, are on the ledgers of the houses to whom he has gone for credit. The interchange of this information by credit men is commendable and of vast importance to all contributors of credit. This source of information produces facts and not opinions. Signed statements should be vigorously insisted upon at least once a year, either direct or through an agency. A system of interchange of complaints might be also arranged, using an agency as the bureau for recording and distributing same for the benefit of all interested, whereby the unsatisfactory and unbusiness-like methods of merchants would count against them, and the restriction of credit would necessitate the change of procedure, paying cash or going out of business, and the satisfactory business man would be encouraged in the cultivation of credit which benefits both the contributor and seeker.

Jewelry Salesman Robbed of Grip of Samples.

PHILADELPHIA, Pa., Feb. 5.—Thomas L. Carson, a traveling jewelry salesman—name of firm unknown—was given knock-out drops in the "Tenderloin" early this morning and robbed of a grip of sample jewelry containing pieces valued at \$500. His alleged assailants, Joseph Wright and William Crawford, have been arrested and were committed to jail at a hearing at Central Police Station this afternoon. They were held in default of \$1,500 bail each.

The English Jewelry Trade.

LONDON, Eng., Jan. 15.

The year of 1900 was heralded by gloomy prognostications born of the dark tidings received from South Africa in December, 1889. The moral certainty of a prolongation of the war, involving increase of taxation, prevalence of mourning, suspension of fashionable functions and other conditions detrimental to a trade intimately associated with the luxury and happiness of the people, predicted bad times in store for the jeweler and his confrères. The prophecy was amply fulfilled during the first half of the year. The rally, however, commenced earlier than was anticipated. The relief of the beleaguered garrisons at Kimberley, Ladysmith and Mafeking produced an enormous rebound in the spirits of the nation and a corresponding reaction on business. The Autumn months showed inflated returns which, in many cases, counterbalanced the slackness of the earlier part of the year.

The war itself produced a harvest of trade in topical or "patriotic" wares. Medals, souvenirs, photo framed pendants, trinkets of all sorts were sold in thousands. Many of them imported, hardly a percentage of more than ephemeral interest or worthy of permanent usage. Cheap, "flashy," striking only because of their up-to-date-ness. Few manufacturers cared to go to much trouble or expense in producing artistic work. Even in larger goods, such as clocks or cruet frames, the value was regulated by the fact that there was

a probability of stocks becoming speedily obsolete. Still, while the fun lasted, it was fairly fast and furious.

In presentation goods different conditions ruled, and a number of jewelers have turned out creditable work in the way of swords of honor, easkets for addresses, models of guns, and so forth. This branch will doubtless continue active for some time to come.

The Paris Exposition created little excitement in jewelry trade circles. The English gold and silver crafts were inadequately represented, and British makers generally boycotted the show. It may be fairly reckoned as one of England's lost opportunities, and the benefit to our jewelry and allied trades is perhaps best expressed as a minus quantity.

A new municipal Act of Parliament which came into force in the Autumn, in London, creating a number of mayoralities, has led to the ordering of chains of office, benefiting a select circle of firms.

The enhanced price of silver has not prejudicially affected the silversmiths. In fact, they have been busier during the time it was highest. October and November were their best months in the year. A notable feature has been the increased popularity of silver for ladies' wear. Not, of course, brooches, bracelets or necklets—these are tabooed by all except the lower classes of consumers—but in buckles, clasps, chatelaines and buttons. Considerable pains and expense have been spent in the production of artistic designs—conventional ornaments, flowers and the human figure in relief predominating. The

latest notion is to finish these wares dull instead of bright polished. The best work is cast; stamped and pierced or engraved work being less in demand. Wire patterns are mainly made up into cheaper lines.

Gold jewelry shows few novelties. Designers are feeling their way in the wake of Parisian jewelers in the production of what is called "l'art nouveau," but it is doubtful whether English tastes will become accustomed to the boldness and freedom of the French ideas. In the limited sphere of men's jewelry the tie-clip is the only innovation of the year. These are worn in pairs, the top (the only part visible) being jeweled. Brooches are worn in profusion—all over the corsage, in fact—and are light and fragile. Hair ornaments, earrings and skirt pins are also in vogue. The chain makers have had a good run of business, the long, muff chains being still very popular. The flat cedar-pencil holder—a comparatively new shape—has had a great sale, only being limited by the production.

Over 800,000 silver watch cases were marked at the London, Birmingham and Chester Halls during the year ending June 30. Birmingham introduced a salutary reform by refusing to hall-mark gold ware under a certain thickness of metal. The tissue-paper stuff formerly on sale—strengthened by solder—was a scandal, and although the sudden change caused inconvenience, the ultimate effect will be good.

Platinum is abnormally high in value, equal to about 23-karat gold, and the rise will doubtless affect its use, as it can hardly compete with high quality gold in public esteem. For mounting diamonds and in welded gold and platinum work it will probably retain its position. Gold continues high in price on the market, but trade quotations have not been altered.

Generally speaking, the lookout for 1901 in the jewelry and allied trades is distinctly hopeful. R. F.

ON MEMORANDUM

After the Holiday Clean-out

Your cases need filling up. We will send you on approval anything you want in Diamonds and Diamond Jewelry to fill up. There's no question that prices will go still higher, so you'll be the gainer if you let us know at once just what you need.

Last Week's New York Arrivals.

THE CIRCULAR—WEEKLY has perfected arrangements for obtaining the names and hotel addresses of all the latest buyers visiting New York, and each day posts in its office, 11 John St., cor. Broadway, a bulletin which every member of the trade is cordially invited to copy.

ASHLAND, PA., A. Loeber, Pabst.
ALLENTOWN, PA., E. H. Wetherhold, Union Square.
BALTIMORE, MD., D. Oppenheimer, Marlborough.
CHICAGO, ILL., S. C. Eppenstein, Grand.
DALLAS, TEX., J. Linz (Joseph Linz & Bro.), Imperial.
LEBANON, PA., F. B. Kendrick, Murray Hill.
MIDDLETOWN, N. Y., J. K. Wiggins, Marlborough.
MONTREAL, CAN., W. M. Birks (H. Birks & Sons), New Amsterdam.
PITTSBURGH, PA., S. L. Levinson, Astor.
TORONTO, CAN., Thomas Marshall, Astor.

William Kleinschmidt, of Kleinschmidt, Howland & Co., New York, sailed on the *Campania*, recently, for Europe, where he will buy such fine specimens of diamonds, sapphires and rubies as he may be able to find in the markets of London and Paris.

New York Notes.

M. Kauffmann sailed for Europe last Wednesday on the *Oceanic*.

Julius King, of the Julius King Optical Co., and Mrs. King are at Orlando, Fla.

Fishel, Nessler & Co. have removed their offices from 588 Broadway to 556 Broadway.

C. Francini, the expert maker of jewelry, has moved one door west, and is now at 14 Maiden Lane.

Avery & Brown suspended business, Tuesday of last week, on account of the death of Mr. Brown's father.

Alter Jorisch, who was a retail jeweler some time ago, has been granted a discharge in bankruptcy in the United States District Court.

The business of the late firm of Stone Bros., 532-534 Broadway, is now conducted by their successors under the style of David Stone & Son.

S. B. Ross, of Malliet, Maxwell & Ross, who recently left for Europe, is at present in Amsterdam, where he will remain about five weeks, purchasing diamonds.

H. Kohlbusch, Sr., manufacturer of scales and balances, who has been confined to his home by illness for several weeks, is now recovering and will shortly be at his office.

The annual meeting of the Spencer Optical Mfg. Co. will be held next Wednesday, at the company's offices, 15 Maiden Lane, at noon, for the election of directors, etc.

Among the firms who suffered severely from the big East Side factory fire, Thursday, were J. B. Colt & Co., manufacturers of gas tanks, who were formerly in the optical business.

At the second meeting of the creditors of Morris Aronov, bankrupt, held Friday, before N. A. Prentiss, referee in bankruptcy, 120 Broadway, several claims were

proved and Henry S. J. Flynn, 132 Nassau St., was appointed trustee.

Judge Brown, of the United States District Court, has granted a discharge in bankruptcy to Henry W. Oliver, formerly a manufacturing jeweler at 15 Maiden Lane. His liabilities were \$13,833.

A mass meeting of journeymen jewelers of New York is announced for the evening of Feb. 14, at Odd Fellows Hall, 69 St. Mark's Place. A representative of the American Federation of Labor will address the meeting.

The bronze statuette presented to the 22d Regiment, N. Y. N. G., of Brooklyn, entitled "The Volunteer," in memory of the late Captain Frank I. Scott, was from Tiffany & Co. It is a fine example of American sculpture, the work of Fitzgerald Peplow.

Joseph Barkow, 8 Willett St., a jewelry peddler, was robbed one day last week, of \$50 worth of goods. He says he was beaten and kicked by half a dozen men at 448 E. 115th St. Nicolo Guigi and Gecono Botzo were in Harlem Court, the next day, on a charge of robbing him. They were held in \$1,000 bail.

The first meeting of the creditors of Lilienstern & Leake, bankrupt jobbers, formerly at 475 Broadway, was held Friday before referee in bankruptcy Theodor Aub, 149 Broadway. Nearly all the 100 creditors were present or represented. Several claims were presented and proved. Joseph Nordenchilds was appointed trustee with bonds of \$6,000.

The partnership of H. C. Hardy & Co., importers of diamonds and precious stones, 24 Maiden Lane, has been renewed from Feb. 1 for one year. The general partners are Horace C. Hardy, Brooklyn; Henry E. Ide, Brooklyn, and John J. Heiser, New York. Danford N. Barney, Farmington, Conn., is special partner and

contributes \$75,000 to the capital of the firm.

The now famous "Maximillian crown jewels," which never belonged to the Mexican Emperor at all, consisting of a diamond pendant containing a 33-karat stone surrounded by 1-karat stones and a 4-karat diamond ring, seized here by Customs Agent Theobald in November last, were sold Thursday in the office of United States Marshal Henkel, in the Federal building, by auctioneer Joseph Shongood. There were a dozen bidders and the jewels, even taking into consideration the fact that they are a bit off color and contain some flaws, sold at considerably less than appraised valuation. The pendant was sold to Joseph Frankel's Sons, diamond merchants, John and Nassau Sts., for \$2,000. The ring was sold to William Goldstone, pawnbroker, 87 Park Row, for \$235. When the gems were seized they were in the possession of Valino M. Preza and Alejandro Marcuci, who had just come from the City of Mexico and were trying to dispose of them in this city. It was declared at the time that the diamonds were a part of the Crown jewels of the ill-fated Emperor Maximillian, of Mexico, but this statement was afterward disproved. Together with another ring similar to the one sold Thursday, the gems were said to be worth \$60,000. The appraised value set upon the pendant, however, was only \$3,721, domestic valuation, and upon the rings \$600 each. A short time ago the pendant and one of the rings were confiscated, the other ring being returned to Preza. At the same time the criminal action against the men, charging them with smuggling, was dropped.

Schedules in bankruptcy of A. S. and S. I. Koplik, formerly engaged in the jewelry business at 106 W. 125th St., have been filed. Firm liabilities are shown amounting to \$17,920, with no assets. Abraham S. Koplik has individual liabili-

ties of \$8,000 on mortgages and nominal assets—amount unknown—consisting of an estate for his own life in property 251 E. 32d St., mortgaged for \$8,000, and a third interest in personalty of the estate of R. Koplik, deceased. Samuel I. Koplik has individual liabilities \$8,315, of which \$8,000 is on mortgages, and assets, value unknown, consisting of a third interest in remainder in property, 251 E. 32d St., and a two-thirds interest in personal property left by R. Koplik. Among the creditors are: Emanuel L. Anrich, \$526; J. T. Scott & Co., \$100; Thomas W. Adams & Co., \$151; Tarrant & Gismond, \$103; George R. Scofield, \$300; Dattelbaum & Friedman, \$251; Goldsmith & Co., \$400; E. A. Haldimann, \$200; Kent & Stanley, \$107; Keller, Ettinger & Fink, \$125; A. C. Van Benschotten, \$128; J. R. Wood & Sons, \$300; Albert Freund, \$226; Enos Richardson & Co., \$336; Morris Prager & Co., \$2,049; Ernest Adler, \$200; Henry S. Herzog, \$308; E. Ira Richards & Co., \$115; Jules Racine & Co., \$386; John Disselkoe, \$450. An account of the affairs of this concern was published in THE CIRCULAR-WEEKLY, Dec. 5, 1900.

L. & M. Kahn & Co. will move into the Corbin building about May 1.

Goldstein & Newman, 296 Grand St., have been succeeded by Max Goldstein, who has bought his partner's interest.

The *World*, Sunday, contained a dispatch from London to the effect that increase in the price of diamonds was, in most part, due to the great demand from this country.

Among the members of the February Grand Jury, now in session, are two jewelers: Bernard Karsch, 641 Eighth Ave., and Andrew P. Nahmens, 262 W. 125th St.

The *Brooklyn Eagle*, Feb. 3, contained a long article on the diamonds of the world, in which appeared a column interview on the subject with Ludwig Nissen, of Ludwig Nissen & Co.

The third annual entertainment and reception of the Buyers' Association of America will be held at Sherry's, Fifth Ave. and 44th St., the night of Feb. 14, for members and ladies.

The business conducted by S. W. McDonald, 26 W. 23d St., has been incorporated as the McDonald-Heyward Co., who will continue in the retail jewelry trade. The capital is \$100,000.

Samuel Buckley & Co., 100 William St., have opened an office at 34 Holborn Viaduct, London, for the convenience of American purchasers of European silver ware, clocks, potteries, precious stones, etc.

The only replica in America of the key of the Queen's tomb is in the possession of Mrs. Murdoch A. MacDonald, of Newark, the widow of a former Newark jeweler, the man who made it 40 years ago, while in the employ of one of the largest jewelry firms in London.

The following cases which were on the calendar of the United States Circuit Court of Appeals for trial this month, all involving the classification of precious and semi-precious stones, have been put over until May 21, at request of defendants' counsel: *United States vs. Rud. C. Hahn*; *United States vs. Rud. C. Hahn*; *United States vs. Rud. C. Hahn*.

A young man of good appearance, 19 years old, who refused to give his name to the police, was arrested after an exciting chase in Madison Ave., Monday night, and fierce resistance on his part, charged with robbing E. W. Dayton, dealer in antiques, Madison Ave. and 60th St. He had upon him five antique rings, a scarf pin and some pawn tickets in the name of Smith for jewelry.

Henry McDonald, for eight years shipping clerk for the Gorham Mfg. Co., 21 Maiden Lane, was held by Magistrate Poole in \$1,000 for the Grand Jury, yesterday morning, on the charge of grand larceny of \$27, received by him several days ago for a C. O. D. package. McDonald was arrested by Detective-Sergeant Nugent, Saturday night. It is alleged that McDonald is responsible for losses of between \$300 and \$400, which have been noticed during the past six months.

A critic says of an actress who has been a star at the New York Theatre: "Miss Farrington wears three and a quarter pounds of diamonds of such scintillating, piercing brilliancy that the lights are turned out during the greater part of the act, in order to save electrical bills and the eyes of the audience. Miss Farrington's diamonds make those of Lady Francis Hope (which were referred to in THE CIRCULAR-WEEKLY recently) look like a glow worm in a blast furnace."

The silver album, illustrated and described in THE CIRCULAR-WEEKLY, Jan. 23, which is to be presented to Emperor William, of Germany, as a form of thanks from the Northeastern Saengerbund for his prize of a silver statuette competed for at the Brooklyn Saengerfest, last July, was on public exhibition at the Lexington Opera House, Sunday. The Emperor's prize was also shown. The album will be forwarded to the Emperor through the German Ambassador at Washington, in a few days.

The gang of Italian counterfeiters, whose arrest a month ago was caused through the suspicions of Charles S. Pratt, gold and silver refiner and assayer, 29 Gold St., as told in THE CIRCULAR-WEEKLY at the time, were found guilty in the Criminal Part of the United States Circuit Court, last Thursday, and sentenced to long terms of imprisonment. Achilles Sieroo, leader of the gang, received the heaviest sentence, 10 years. Michael Chicherio, who is a silversmith by trade, was sentenced to seven years' imprisonment.

Charles Guerin, the Chilean jeweler who was robbed of \$5,000 worth of jewels in the "Tenderloin," Nov. 21, by a man and a woman expert at what is known as the "badger game," has been confined in the House of Detention since that time as a witness. He does not like it and has written and talked much in his efforts to be set free to return home. But the authorities have held him as the leading witness. The woman, Emma McCarthy, has been found guilty, and more convictions are expected. The jewels have not been located.

The Merchants' Association of New York have secured reduced fares on railroads in the territories of the Central Pas-

senger Association and the Trunk Line Association, except from points less than 100 miles from New York, at the rate full fare coming and one-third fare returning. The rates in the C. P. A. territory, including Niagara Falls, Buffalo, Pittsburgh, Wheeling, Louisville, St. Louis, Chicago, etc., are good from Feb. 13 to 17 and March 1 to 4, inclusive. The rates in the T. L. A. territory, including Niagara Falls, Buffalo, Pittsburgh, Wheeling, etc., are good from March 16 to 21 and April 3 to 6, inclusive.

The salesmen and especially the collectors for jewelry firms doing business with residents of the East Side have had their work made harder and more dangerous by the murder of Meyer Weisbard, the jewelry salesman whose body was found in a trunk some weeks ago. One salesman had two men arrested for robbing him of a watch, six rings and three pairs of earrings while he was showing goods in a house. A collector reported to his employers that he was locked in a room where he went to collect a bill and forced to hand over a watch and chain. Another man was made to sign a receipt in full for a bill of \$41 he tried to collect, without receiving any money. Many robbery stories of this sort are heard on the East Side, and some of them are undoubtedly true. The mystery of the Weisbard murder has not been solved by the police.

To the Grand Marshal and the members of his staff in the Sound Money Parade of last Fall have been presented handsome souvenirs of that event by the Mauser Mfg. Co., who made them. The souvenirs are in the form of escutcheons, silver mounted on solid oak panels. In the center are two medallions, one of Mr. McKinley and the other of Mr. Roosevelt. In high relief across the top is an eagle, with a scroll on which is engraved: "Sound Money Parade, 1900." Below the medallion is an ornamental sterling silver plate, upon which are engraved the names of the 64 aides. The whole affair is 24 inches high and 18 inches wide. The presentation was made at a dinner of the Grand Marshal and staff, at the Army and Navy Club, Saturday, the recipients being: General Anson G. McCook, Grand Marshal; Major A. Noel Blakeman, Chief of Staff; Major George DeF. Barton, Chief of Aides; Charles Curie, Jr., Quartermaster; General A. W. Day, Commander of Rear Guard.

Trans-Atlantic Voyagers.

TO EUROPE.

Leo Goldsmith, New York; N. Kauffmann, New York; F. D. Waterman, of the L. E. Waterman Co., New York, and W. Elder Marcus, of Marcus & Co., New York, sailed Wednesday on the *Oceanic*.

FROM EUROPE.

J. Stuart MacDonald, Baltimore, Md., accompanied by his wife, returned recently on the *Oceanic*.

B. H. Davis, of B. H. Davis & Co., New York; L. H. Goldsoll, of London; H. E. Oppenheimer, of H. E. Oppenheimer & Co., New York, and W. N. Walker, of Hayden W. Wheeler & Co., New York, returned last week on the *Lucania*.

Quality.

You can most always get first quality if you pay a high price. Sometimes you can get it at a moderate price. Improved methods of manufacturing and selling can lower price without affecting quality and enable you to buy first-class goods at what you had been paying for inferior kinds.

This is the story of the "Elite" Hall Clock Movement—a first quality article at a low price. We make only one grade—a standard. You never, for instance, see our Westminster Chime Movement graded like this: I., Extra; II., First Quality; III., Ordinary; IV., Cheap Quality. No! Did you ever hear of a II., III. and IV. quality Steinway piano? You didn't, because they make but one grade—a standard. That stands for the best there is. Same way with "Elite" movements—one kind, the best there is.

Our movement equals in quality of time-keeping, tone, solidity and looks the highest-priced movement called "Extra" by other makers and costs less than their so-called "Cheap Quality." We're ready to prove it to all comers. Import orders now being taken.

BAWO & DOTTER,

"ELITE" CLOCKS AND
"ELITE" CHINA, ❁ ❁

26 to 32 Barclay St., New York.

SITUATIONS WANTED-Continued.

SITUATION WANTED—By a good watchmaker to finish the trade; three years' experience; graduate optician; excellent salesman; speaks the Finnish and English languages; A1 references; salary, \$15 per week. Address, J. E. H., care Jewelers' Circular-Weekly.

Miller Stevens, Kansas City, Mo., has received a warranty deed for \$9,000.

Charles A. Leach, McCook, Neb., has given a realty conveyance for \$1,700.

C. A. Kendall has bought out the jewelry stock of Elmer Smith, Earlville, Ia.

E. T. Marsh, who recently located at Duncombe, Ia., has moved from that town.

J. B. Sheets, Blackwell, Okla., has given a realty conveyance for a consideration of \$250.

The dissolution is reported of the old jewelry firm of Forester & Frizelle, Billings, Mont.

E. J. George, Fairfield, Ia., has moved

his stock to the Slagle & Acheson block, in that town.

L. H. Mathner has succeeded to the stock of jewelry, etc., of Mathner Bros., Beaumont, Tex.

Burglars recently entered the store of Fisk & Son, Rowen, Ia., and secured \$200 worth of goods.

Fred I. Lindgren, Ogden, Ia., has given a realty mortgage for \$550 and paid off one amounting to \$250.

W. G. Miller, formerly of Columbus Junction, Ia., is starting in the jewelry business at West Liberty, Ia.

Joseph Davis, Spokane, Wash., has given a chattel mortgage for \$100 and a bill of sale for \$75 on fixtures.

Fred Linde, a jeweler of Donaldsonville, La., is one of the inventors of an electrical process for killing the water hyacinth.

The Evans Merchandise Co. have succeeded to the entire stock of jewelry and notions of W. M. Gear & Co., Knoxville Junction, Ia.

Frank E. Jackson, Angola, Ind., has purchased a stock of jewelry and notions at Hudson, Ind., and will do business there for a short time.

J. & H. Kayser's store, Parkston, S. D., was entered a few days ago and a number of watches and jewelry taken, the value aggregating \$100.

Will Trein, Dixon, Ill., returned from Chicago last week, where he purchased stock for his new jewelry store to be opened at Ashton, Ill.

H. L. Jacot, a jeweler at Bethlehem, Pa., was stricken with apoplexy Thursday night. His condition later improved and there seemed to be a chance of his recovery.

Rovelstad Bros., 161 Chicago St., Elgin, Ill., have purchased for \$15,000 a new store on the same street, into which they will

remove their jewelry business, after thoroughly equipping and refitting the new premises.

J. S. Lewis, of J. S. Lewis & Co., Ogden, Utah, has received a deed for \$8,000, gives a mortgage for \$5,000 and receives another deed for \$6,600.

A fire broke out recently at George Haneline's watch repairing shop, 133 S. Main St., Akron, O., in a pile of papers. But little damage was done.

F. D. Lantz has closed his jewelry store at Castana, Ia., and has gone to Sioux City. It is understood that another jewelry store will be located at Castana.

The Charles R. Kelsey Co., Ltd., have been incorporated in Mountain Home, Idaho, and succeed to the stock of jewelry, etc., of Charles R. Kelsey & Co.

The jewelry store of G. S. De Mots, Hull, Ia., was recently robbed of goods to the value of \$150. The more valuable portion of the stock was in the safe, which was not molested.

A prisoner released from the county jail, Moline, Ill., has disclosed the fact that Julius Limbach, recently pardoned, told him in confidence that he (Limbach) and his pals were casting about for an easy way to get into E. Okerberg's jewelry store when arrested. The crooks were then in the yard in the rear of a restaurant examining a window of the jewelry store. Limbach's petition for pardon was not favored by the Moline police.

Frank I. Bailey, jeweler, Aitkin, Minn., started out recently in a sleigh for a visit to the lumber camps. He had just got across the Mississippi River when the sleigh overturned and the fall resulted in a dislocated shoulder for Mr. Bailey. He turned back to town, had his shoulder put in place and secured some medicine, and in less than one hour from the time of the accident he was again on his way toward the lumber camps.

TO THE
DETAILED JEWELRY
 TRADE
 OF THE
 UNITED STATES

In January, 1868 our Senior, Mr. C. S. Alford, now the President of the corporation, laid the foundation of the business which for upwards of thirty-two years has been successfully maintained without a break or interruption of a single day. Our growth has been steady but not phenomenal. Our record for upright business dealing is unassailable. When we suggest that you look to us for WATCHES and JEWELRY, we know that we offer the best values possible and service that cannot be excelled.

ESTABLISHED 1868
 INCORPORATED 1891
 C. S. ALFORD - PRESIDENT.
 J. W. ALFORD VICE-PRESIDENT AND TREASURER
 J. C. ANDRESS SECRETARY.

Faithfully yours
 C. S. Alford & Co.
 192 Broadway, New York.

GRADED DIAMONDS.

There are several different and distinct grades of diamonds of the finer qualities. These are known in the "Rough" to cutters as Jaegers, Top Crystals, Crystals, Top Silvercapcs and Silvercapcs.

Each of these grades we indicate by letters or numbers. Each diamond we sell, whether loose or mounted, is marked with a number or letter to indicate the quality, and, remember, we guarantee them to be exactly as represented.

We believe even those who are well posted in the different grades would find our system of much assistance in making sales. Our prices will compare favorably with any in the market.

We cater for special memorandum sales. Please try us once and let us show you what we can do in quality and price.

S. C. SCOTT MFG. CO.,
9, 11, 13 Maiden Lane,
NEW YORK.

C. J. Scott has opened a jewelry and notion business on S. Main St., Danville, Ill.

George Lawrence has moved his jewelry and repair shop from Pittsfield to Quincy, Ill.

Wells Bros., dealers in jewelry and boots and shoes, Hampton, Ia., will retire from business.

T. J. Lanyon, jeweler and notion dealer, Little Sioux, Ia., has given a realty mortgage for \$650.

James W. Jones, Joplin, Mo., has given a chattel mortgage on his safe and show cases for \$234.

J. R. Bender, Ashland, Miss., is retiring from business and selling out his jewelry stock at auction.

W. G. Frederick, Sioux Falls, S. D., has bought a cigar store, but will continue his jewelry business also.

Abraham J. Levin, of Abraham J. Levin & Co., St. Joseph, Mo., has sold real estate valued at \$1,200.

The Dublin Drug and Jewelry Co., Dublin, Tex., have sold out their business to the W. J. Clay Drug Co.

J. H. Denman has gone to Chicago, in the interest of the McGregor Jewelry and Music Co., McGregor, Tex.

M. C. Cohen, of Cohen Bros., wholesale opticians, Toronto, Ont., visited Southbridge, Mass., for a few days last week.

John Pruett, formerly of Rockville, Ind., has moved to Terre Haute, Ind., where he will probably go into the jewelry business.

Harry L. Dodge, who recently sold his jewelry store at Bryant, S. D., has gone to the State of Washington for his health.

H. K. and K. K. Lee will engage in the jewelry business in Fosston, Minn. H. K. Lee was formerly engaged in the business there.

The jewelry store of A. E. Kintner, Painesville, O., was scorched recently. The loss is understood to be covered by insurance.

Robert E. Kniesel, of Waterbury, Conn., has accepted the position as head watchmaker at the Pfeiffer Co.'s store, Cedar Falls, Ia.

W. H. Nelson, jeweler and optician for Partridge & Co., Wellston, O., will open a jewelry store on South St., Jackson, O., this month.

John M. Graves purchased the Charles Teel stock of jewelry at Norman, Okla., a few days ago, and will combine the business with his own.

A glass skylight in J. C. Freeman & Co.'s optical store, near Main and Elm Sts., Worcester, Mass., was smashed some days ago by falling snow.

Stephen Engle, a Hazleton, Pa., jeweler, has invented a telephone transmitter which experts say will greatly lessen the cost of equipment of telephone plants.

John H. Tilton, a jeweler of Newbury, Vt., and Miss Annie May Gauthier were married at the home of the bride in Rye-gate, Jan. 8, by Rev. J. L. Merrill.

Andrew E. Macuen, Milford, R. I., has bought the jewelry store occupied by George H. Whittemore. Woonsocket, R. I., and took possession Feb. 1.

Dr. E. A. Russell, jeweler and optician, formerly of Leesburg, Fla., but now of Fitzgerald, Ga., has been in Leesburg for a few days, meeting old friends.

C. J. Nord, formerly with M. A. Hagen, Fargo, N. Dak., will take charge of the jewelry and watch department in Greene's drug and jewelry store, Dickinson, N. Dak.

H. C. Midlam, Rome, N. Y., has purchased from the W. L. Lasher Co. their stock of optical goods and instruments, which he has moved to 110 N. Washington St.

The jewelry store of W. T. Hill, Johnson City, Tenn., was broken into and robbed of several watches and other articles, Jan. 22. The front window was broken and a showcase shattered.

M. C. Weyer, jeweler, Faribault, Minn., was taken in by an alleged farmer, who had a check signed "Farmers' Elevator Co." for \$18.20. The check was forged. It is the fourth case of forgery in Faribault within a month.

E. H. Burrige & Co., who have been operating jewelry establishments both in Humboldt, Tenn., and Paris, Tenn., have closed their business houses in both places and will soon remove to Salem, Ill., where they will continue.

Edward J. Spall, manager of the Edwards jewelry store, 44 North St., Pittsfield, Mass., severed his connection with that business Feb. 1. Mr. Spall has for the past 14 years been connected with the store as manager.

L. Van Hemelryk, jeweler, Buffalo, N. Y., complained to the police last week that a sneak thief had entered his establishment and walked away with two watches. Albert Bihl, arrested on suspicion of stealing the articles, pleaded not guilty, and his case was adjourned.

An attempt was recently made to rob the jewelry store of W. H. Wyman, Colorado Springs, Col., and had it not been for an accident many dollars' worth of valuable goods might have been taken. In removing a glass window the thief broke the glass and was frightened away by the noise.

About a year ago the Cataract Tool and Optical Co., Buffalo, N. Y., received an order to mount telescopes upon several Mauser sporting rifles. The company have since learned that these rifles were shipped to South Africa, and are some of the weapons which have been used so effectively by the Boers.

Word comes from Scotland that Th. mas R. Marshall, head of the well known firm of William Marshall & Co., jewelers and goldsmiths to the Queen, 134 Princess St., Edinburgh, died recently, aged 78 years, at his residence, 4 E. Castle Road, after a protracted illness. Mr. Marshall was identified with philanthropic and religious work in Edinburgh during the past half century.

F. Z. Sherwood's jewelry store, Faribault, Minn., was entered a few days ago and several hundred dollars' worth of jewelry appropriated. The store is on the main street and is prominently located. It seems incredible that it should be entered and robbed without the thieves being detected, especially as a number of burglaries have occurred lately and have put the police force on the alert.

George W. Fisher, Sharon, Pa., is having his store refitted with quarter sawed oak wall cases and with all glass patented onyx

framed showcases. The work is being done by the Cleveland Store Fixture Co., Cleveland, O.

George Mackley is advertising to sell out his jewelry business at Sault Ste. Marie, Ont.

A one-story brick building will be erected in Morris, Ill., for the jewelry store of G. C. Ridings.

The jewelry store of the late C. H. Koller, Orange, Tex., was sold recently to Joe Lucas, Orange, Tex.

Jule K. Pickett, Salem, O., will soon move his jewelry business to another location in the same town.

Burglars broke into Fisk & Son's jewelry store, Rowen, Ia., Wednesday night and got \$200 worth of valuables.

W. J. Hinman, Oneida, N. Y., has moved his jewelry business from James and Madison Sts. to Main and Phelps Sts.

A. H. Minkley, formerly of Toledo, O., and Grand Rapids, Mich., has taken a bench at Bedford's jewelry store, Ionia, Mich.

John Davis, a jeweler of St. Clairsville, O., recently suffered a stroke of paralysis, but his condition is now somewhat improved.

The disastrous fire at Matawan, N. J., early last Sunday morning, destroyed among other buildings the jewelry store of J. M. Manning.

J. P. Hale, Akron, O., has just placed an order with the Cleveland Store Fixture Co., Cleveland, O., for refitting his store with mahogany wall cases.

Charles Buder, Columbus, Miss., was recently elected senior warden of Columbus Lodge No. 5, F. & A. M. He has been connected with the Lodge for many years.

The jewelry store of John J. Bleich, Paducah, Ky., caught fire last Saturday night from an unknown cause. The loss is about \$3,000; fully covered by insurance. Most of the damage was done by water.

The stockholders of the Rochester Optical and Camera Co., Rochester, N. Y., have elected the following directors: H. B. Carlton, F. P. Allen, B. E. Chase, E. W. Peck, R. K. Dwyer, C. M. Smith, J. A. Robertson.

The jewelry store of W. T. Hill, Johnson City, Tenn., was broken into recently and robbed of several valuable watches. The thief broke open a front window and then demolished the showcase. No clue to the guilty parties has been discovered.

The stockholders of the Rockford Silver Plate Co., Rockford, Ill., held their annual meeting Thursday. H. W. Price, A. D. Forbes and William Lathrop were elected directors for three years. Harry Allen and F. J. Sovereign were named as auditors.

The plant of the A. F. Towle & Son Co., Greenfield, Mass., has not been sold as yet, but negotiations are said to be pending from which a favorable outcome is expected. It is reported from Springfield, Mass., that representatives of R. H. White Co. and Jordan, Marsh & Co., of Boston, have been negotiating for the stock of the A. F. Towle & Son Co.'s silver works.

A gasoline stove exploded in the jewelry store of Albert E. Post, 1127 N. Salina St., Syracuse, N. Y., last week, but the

fire was out before the firemen arrived. The damage was slight.

W. G. Frazier has started in the jewelry business at Durham, N. C.

Charles Rogers, an optician of Springfield, Mass., is at Deland, Fla.

It is reported that a watch case factory is negotiating for a site at Quincy, Ill.

C. F. Anderson, a watchmaker of Burlington, Ia., died recently at his residence,

205 N. Gunnison St. The deceased was 60 years of age and lived in Burlington for over 20 years.

H. D. Harker, Cuba, Wis., is enlarging his store to accommodate his new jewelry stock.

J. B. King, Hawkinsville, Pa., has taken more commodious quarters for his jewelry business.

Harry Davis, Topeka, Kan., is selling out at auction, preparatory to retiring from business.

Woodard & Group, jewelers, formerly of 325½ E. Trade St., Charlotte, N. C., have moved to 217 W. Trade St.

John Van Eps will give up his jewelry business at Plainfield, N. J., about April 1, and engage in business at Somerville, N. J.

W. T. Newton and Goetz & Yaffe, jewelers of Knoxville, Tenn., will both remove their businesses to other stores in the same city.

W. H. Bradshaw, Wooster, O., early in the Spring will move his family to Paris, Ill., where he will engage in the jewelry business.

Martin F. Thompson has closed his jewelry shop in Dennis Port, Mass., and gone to Lynn, where he has gone into another business.

Jeweler William Bichman, Pomeroy, O., was recently married, at Point Pleasant, W. Va., to Miss Anna Margaret Mees, of Mason, O.

An attempt was made last week to rob the jewelry store of Henry Ulrich, Main St., Sharpsburg, Pa. The burglar was scared away by a policeman and escaped.

The annual report of the Niagara Silver Co., filed at Lockport, N. Y., last week, shows: Capital (actually issued), \$600,000; debts do not exceed \$300,000; assets, at least one dollar.

J. T. Montgomery has bought an interest in the jewelry business of R. H. Rickert, Statesville, N. C., and the business will be conducted under the firm name of Rickert & Montgomery.

The friends of the late John Wiesen, who was recently drowned in the Niagara River, and especially those employed at the Carter-Crume and the Niagara Silver Co.'s plants, Niagara Falls, are arranging for an entertainment to be given Feb. 19, for the benefit of the widow.

An expert recently worked 11 hours trying to open the safe in Jules Wendell & Son's jewelry store, Oswego, N. Y. The combination refused to work and it was found necessary to telegraph to the safe company. The expert, by drilling a hole in one of the doors, succeeded in opening the safe.

Burglars at New Orleans, La., last week robbed Charles F. Pitcher, a jeweler, at 925 Canal St., of over \$150 worth of cheap jewelry. Among the articles taken were six dozen plated rings, 11 pairs of cuff buttons, two dozen scarf pins, two dozen earrings and four dozen watch chains, besides other articles.

Harry Myers, known as "Diamond Harry," who was brought to Troy from Albany, N. Y., last week by Detective Manning, was arraigned in the Police Court on a charge of swindling Jacob Elkan and Louis Tigar, two pawnbrokers, by selling them "fake" diamonds. Myers was in jail in Albany on a similar charge, but compromised there and was released.

Jeweler Snyder, Tecumseh, Okla., had a confidence game played on him recently, which entailed the loss of a valuable time-piece. While he was in the post office Register Hunter handed him his gold watch asking him to fix it at once. An hour later a well dressed stranger called at Snyder's place and asked, "if that gold watch was fixed yet." Snyder supposed Hunter had sent him and handed out Hunter's watch, which he took and paid \$1 for the repairs. A few minutes later Hun-

ter himself called for the watch, and though the police were called and the town thoroughly searched, no trace of the stranger was to be found.

T. R. Helms, Waxhaw, N. C., has opened a jewelry store at Monroe, N. C.

E. S. Williams is now watchmaker for Patridge & Co., Wellston, O.

B. L. Cooper, formerly of Colorado, Tex., has engaged in business at Snyder, Tex.

A. Rosebrough is remodeling and enlarging his jewelry store at Georgetown, Tex.

W. F. Bell, late of South Town, Ala., has opened a jewelry store at New Decatur, Ala.

A. M. Felson, Gouverneur, N. Y., is remodeling, enlarging and renovating his jewelry store.

Thomas H. McNary, Washington, Pa., last week returned from a business trip to New York.

Edmund H. Abbott has secured new quarters in Owatonna, Minn., for his jewelry business and moved Feb. 1.

Hathaway Bros., Elizabeth City, N. C., have now established their jewelry store in the Overman building, that city.

The Coöperative Mercantile Co., with a capital of \$500,000, to deal in diamonds, were formed in New Jersey, last week.

The jewelers of Freeport, Ill., have all signed an agreement to close their stores at 6 P. M., except Saturday evenings, until December.

N. G. Carr, the veteran jeweler of Concord, N. H., who has been confined to the house the greater part of the Winter by illness, is now almost entirely well again.

The jewelry store of G. S. De Mots, Hull, Ia., was entered by burglars Jan. 27 and goods taken to the extent of \$150. The most valuable portion of the stock was not molested.

Conrad Eifert, Jasper, Ind., died last week, aged 76. He was highly respected and was a pioneer watchmaker of his town. He served many years as a Justice of the Peace.

A fire occurred Jan. 29 in the jewelry store of V. L. Hunt, Rockland, Me., but was put out quickly, before doing much damage. It was caused by the igniting of benzine, with which Mr. Hunt was cleaning a clock.

The case of Kid Dooley and Mat Carter, the two negroes charged at Council Bluffs, Ia., with stealing a gold watch and a gold ring from jewelry stores, was up last week. A change of venue was taken to Justice Ferrier's Court, where the case was tried Wednesday.

The Aldine Mfg. Co., Grand Rapids, Mich., manufacturers of clock and mantel work, filed a trust mortgage recently, covering debts to the amount of about \$20,000. Arthur C. Torrey is made trustee and the Fourth National bank, as the heaviest creditor, is the holder of the document.

A new wholesale jewelry firm, under the style of Bushway, Britt & Co., have been formed at Decatur, Ill. According to the articles of agreement filed in that city, the parties are F. H. Bushway, Lovington; J. C. F. Harrington, Iowa City, Ia., and W. E. Britt, Americus, Ga. The partnership is for three years and the capital is to be \$9,000, each of the three persons mentioned to own \$3,000 worth of stock. Mr. Bushway is named as president, Mr. Britt as vice-president and Mr. Harrington as secretary and treasurer.

Fred. H. Rees severed his connection with the W. H. Frost jewelry store, Elmira, N. Y., Feb. 1, where he had been engaged for years. In the future Mr. Rees will be found in the Steel Memorial building, corner of Lake and Market Sts., where he will conduct the Rees School of Engraving, and engage in the sale of diamonds and fine watches. In the past 12 years he has had charge of the engraving and watch work, as well as superintended the sales of the Frost jewelry store. For some time past Mr. Rees has conducted the Elmira School of Engraving, giving instruction to a number of pupils from all over the country. The school of engraving will, in the future, be known as the Rees School of Engraving.

WESTERN SUPPLEMENT

VOL. XLII.

NEW YORK, WEDNESDAY, FEBRUARY 6, 1901.

No. 1.

Chicago Notes.

All communications in reference to the Chicago department of *The Jewelers' Circular-Weekly*, addressed to Stephen Parlin, 134 Van Buren St., Room 414, Chicago, will receive prompt attention.

TRADE CONDITIONS.

Business is about as usual for the season, with nothing large doing, but there is a good steady general demand. The west is stocked up a little better than for the corresponding time last year, and though the holiday trade was good among the retailers, yet their larger purchases of the Fall and Winter left them with fair stocks on hand. This necessarily restricts trading somewhat for the moment and no great things are expected for February. March, however, should show an improvement. The Spring business is expected to be fully up to normal, and the general indications point to a large business for the year as a whole. The entire country is prosperous and there seems no possibility of anything in the way of adverse legislation that can seriously affect trade. The east and the south, judging from the bank clearances, are in a little better position than the central west. The south, with its high priced cotton, larger crops of rice and increasing manufactories, is in splendid shape and will stand a careful looking after. The same is particularly true of Texas. Traveling men who have returned from States west of Chicago report excellent business in all sections, though it would be even larger but for the number of fair sized stocks met with. The entire absence of failures of any consequence in the jewelry trade speaks well for the healthy condition of the business.

Spaulding & Co. completed inventory last week.

Frank Sproehnle has returned from his eastern visit.

M. A. Lumbard, Des Moines, Ia., was here for a day last week.

John C. Dueber was a visitor here the latter part of the week.

L. A. Hoard, Waupun, Wis., was last week in town as a buyer, visiting jewelry and silver houses.

Frank P. Allen, manager for Boyd Park, Denver, Col., was a caller on business-houses here, last week.

M. Loeb, Chicago manager for the Wadsworth Watch Case Co., is putting in a few days at New York this week.

Mr. Zuckerbrod, of L. Seligman & Co., who has been visiting socially at Baltimore and other eastern cities, is again in Chicago.

J. W. Tice, manager for Adolphe Schwob, has moved the Chicago offices from room 301 to suite 417-418 Silversmiths' building.

Chicago is not one, two, three with Rocky Mount, N. C., when it comes to department stores. A recent letter from that town bore the printed heading, "Office of Mann & Hilliard, Practical Silversmiths

and Custom Shoe Makers, Makers and Retailers in Cakes, Candies, Pies, Etc."

S. Glickauf has been confined to his home the last two weeks with bronchitis. He has so far recovered as to be about the house, but is not yet able to report for duty.

George C. Edwards, vice-president of the International Silver Co., and Mrs. Edwards have returned from Albert Lea, Minn., passing through the city direct for New York.

W. J. Miller, western manager for the Seth Thomas Clock Co., was able last week to resume his trip to central western cities, making calls at St. Louis, Louisville and Cincinnati and returning here Saturday.

C. E. Powers, Oregon, Ill., was here several days last week, but not particularly on a buying trip, though he selected a few necessities. He was a regular attendant at the Carriage Exposition at the Coliseum.

B. Lederer, S. & B. Lederer Co., was in Chicago a couple of days on his way to California, with L. Tannenbaum, New York, to look after mining interests. They expect to remain in the far west a month.

W. J. Buckley, the tower clock man of the Seth Thomas Clock Co., has his hands full this season. His present trip includes the erection of a clock at Jefferson City, Mo., one at Provost, Utah, and one at Rock Island, Ill.

A large shipment from the United States assay office, at New York, was received by Goldsmith Bros., Saturday. It consisted of sweepings and lead, gold and silver bullion, and was switched direct to the smelter at Throop and 58th Sts.

The stock of the Bates & Bacon Chicago office has been transferred to the salesrooms of the Philadelphia Watch Case Co., eighth floor of the Silversmiths' building. H. S. Noyes, who represented Bates & Bacon here, has returned east.

Schrader-Wittstein Co. will move Feb. 7 from the Reliance building to quarters that have been handsomely fitted up for their occupancy on the fifth floor of the Columbus Memorial building. The factory of the company is at 48-50 Wabash Ave.

A novelty in commercial life was introduced by G. A. Soden at his salesrooms last week, it being a lecture by Mrs. Ursula R. Gestefeld, of the church of "The Science of Being," to the employes of the firm. Her subject was the practical use of thought force. Mr. Soden wished his employes to enjoy the benefits of her teachings and if they are interested he is willing to devote one and one-half hours one morning each week for that purpose. Mrs.

Gestefeld was listened to with close attention and Mr. Soden feels the experiment will prove a success.

Mr. Sisson, for a number of years manager of the jewelry department of a well known Chicago house, has succeeded Mr. Talman as head of the department. Mr. Sisson has many friends among the eastern travelers.

J. A. Humphries, Ensley, Ala., who filed a voluntary petition in bankruptcy, had a first meeting of creditors in the office of M. W. Trimble, Birmingham, Ala., Feb. 4, the details of which have not been announced. The liabilities at Chicago will be small.

One of the busy spots in town is the jewelry case and tray factory of the Illinois Case Co., 63-65 Washington St. President Spaulding, of the company, states that with the exception of the third week in January the factory has been rushed since the holidays. Their specialty of all kinds of repair work is a rapidly growing branch of their business.

John Cooper, 14 years old, was a prisoner at the Central police station, a few days ago. Klein Bros., 1501 Chamberlain building, are mourning the loss of jewelry valued at \$250 intrusted in his care. The jewelry was given to Cooper to deliver to customers, but, according to the prisoner, was stolen from him by a negro. The police are inclined to believe his story as to the theft of the jewelry.

John M. Bredt Wants \$10,000 as Balm for His Injured Character.

CHICAGO, Ill., Jan. 29.—A suit for \$10,000 damages has been filed in the Circuit Court by John M. Bredt, a diamond broker, 57 Washington St., against Mrs. Hattie M. Hegberg, 1457 Newport Ave., charging her with criminal libel. Two and a half years ago Bredt appraised a diamond necklace for Mrs. Hegberg. Last month she had him arrested, charging that he had overvalued the necklace which was appraised by him several years before, and that on account of such appraisal she lost money in a sale for less than \$500, the appraisal value and price she paid for it. When Bredt was brought into Court, Dec. 22, he was discharged and the prosecution rebuked for bringing the defendant into Court. He said yesterday:

"The report of the trial in the Court has injured my reputation and business, hence the suit. I have been engaged in business in Chicago too long to have my reputation assailed on such ridiculous charges."

Department Pointers.

DIAMONDS.

Our stock is large, its assortment as to quality and price complete, and as these are the essential qualifications of a stock to buy from advantageously, we think it would pay you to patronize this department. Turn to pages 98 to 112, our 1901 Catalogue; if nothing there suits you, let us know your wants—we can undoubtedly satisfy them. If you haven't our 1901 Catalogue, oblige us by applying for it.

WATCHES.

The fact that throughout the entire Holiday period last year we took care of our customers in this line adds foundation to our claim of having distinctly the best equipped and most reliable Watch Department in the country. It would indeed be a hard matter to find a better collection of gold and other cases of the latest designs, the best makes and the best prices. This department is listed pages 3 to 96, our 1901 Catalogue.

JEWELRY.

In this line as well as others we have made a careful study of what the trade demands. Taken together with our extensive experience we are thus enabled to forecast styles and patterns with some degree of certainty and act accordingly. You can therefore feel safe buying jewelry from us in that it is reliable, that the stock to select from is complete in assortment and style, and that it is bought in such quantities as to save you money. See pages 98 to 356, our 1901 Catalogue.

MATERIAL.

Without question we have the most complete Material Department in the United States. Reliable work cannot be done without reliable tools and material to work with. What we have are the best in every particular. We also have a force of thoroughly experienced clerks to fill your orders, which is an additional advantage. For this department we publish a special catalogue containing about 650 pages. Everything fully illustrated and described and which we will forward on application if you haven't one.

Minneapolis and St. Paul.

Clifford Brush, Ortonville, Minn., is a new employe of Fiske & Co., Minneapolis. Efran & Masser, 189 E. 3d St., St. Paul, have dissolved partnership. Mr. Masser succeeds to the business.

It is quite generally known about town that the Jacobs Jewelry Co., Minneapolis, are soon to be located in a handsome new store further up Nicollet Ave.

Ingram Bros., Menomonie, Wis.; E. L. Overjorde, Northwood, Ia., and L. J. Kabarle, Ellsworth, Wis., were buyers from Twin City wholesalers the past week.

J. H. Mosher, 311 Nicollet Ave., Minneapolis, has closed up his store and placed his affairs in the hands of his attorney, A. M. Higgins, 715 New York Life building. Mr. Mosher finds himself in financial straits and unable to meet his bills. He will, therefore, go through bankruptcy. The schedule of liabilities and assets is not completed.

Detroit.

TRADE CONDITIONS.

The jewelers of Detroit enjoyed the banner trade in the history of the craft here during December, and this was followed by a dull period of two weeks in January. But the last two weeks have witnessed a revival. There is a steady and satisfactory demand for staples, especially silver ware and watches.

J. C. E. Hanford, bookkeeper for the D. B. Bancroft Jewelry Co., Griswold St., died very suddenly last week from pneumonia, arising from an attack of grip.

C. E. DePuy, whose store at Stockbridge was robbed of \$600 in watch movements and cash, was insured in the Fidelity & Casualty Co., and a reward of \$300 has been offered for the arrest and conviction of the thieves.

The wholesale jewelry establishment of Kunz & Shuttleworth narrowly escaped serious damage from fire last week. E. E. Stockton, of the E. Ingraham Co., dropped in for a clock order, and Mr. Kunz went upstairs to ascertain the condition of the stock. Probably five minutes before that sparks had dropped out of a chimney hole and a lively blaze had been started in one corner. In 10 minutes it would have been beyond control. As it was, the loss was trifling.

Columbus, O.

W. S. Tussig has made many improvements in his store on W. Gay St., and now has a very attractive place. The fixtures are all new and the stock of goods make a handsome appearance.

Perry M. Ford has made a satisfactory settlement with his creditors and will continue his jewelry business corner of High and Town Sts. It seems that his inability to meet bills at once came about through the fact that he had to satisfy another obligation upon which he had secured a prom-

ise of the necessary time to realize upon other investment, but which changed hands and was pushed at once.

The director of law of this city has refused to accept the substitute for the original pawnbrokers' license ordinance, as prepared by an attorney representing them. The license, as the ordinance will go to the City Council, will be \$200 per year. The substitute would have made it \$100.

A peculiar case developed some days ago at Newark, near here, when Charles H. Blume, a Marietta jeweler, appeared and claimed a diamond ring in possession of Haynes Bros. It appears that a pennyweighter had taken the ring from Mr. Blume's store, and when he reached Newark he worked the same racket at the Haynes store, leaving the Blume ring in place of one more valuable that he took in the same way. He has never been heard of, but Mr. Blume claimed that the ring which Haynes Bros. had traded for much against their wishes belongs to him.

Indianapolis.

Charles W. Lauer & Co. have presented their friends and customers with good, serviceable desk rulers, containing the firm's name and address.

The American National Bank of Indianapolis opens for business Feb. 4. The list of stockholders includes the names of a number of well known business men, among them Carl F. Walk.

Last week Julius C. Walk & Son displayed a large and handsome line of steins. An unusual demand for these goods was created by the "Stein Dinner," given at the Columbia Club, Feb. 2. Each member furnished his own stein, which is to become the property of the club and used in decorating. About 1,000 were expected at the dinner. All the engravers in the city were kept busy marking steins.

Among the buyers in the city last week were: J. D. Taylor, Logansport, Ind.; E. O. Collins, Franklin, Ind.; J. Rotheringhouse, Gas City, Ind.; J. Booth, Tipton, Ind.; Will Reed, son of J. H. Reed, Paris, Ill.; L. C. Phillips, Carbon, Ind.; J. W. Hudson, Fortville, Ind.; F. Dennis, Westfield, Ind.; J. H. Arnold, Columbus, Ind.; E. Shipley, Greencastle, Ind.; C. M. Jenkins, Richmond, Ind.; G. M. Bartmess, Clinton, Ind.; O. M. Ridgeway, Sheridan, Ind.

Omaha.

TRADE CONDITIONS.

Wholesale dealers purchased larger stocks during January than they have been in the habit of purchasing for a number of years. The prosperity which came two years ago is increasing and all expect to do a big business during 1901. There are still a number of good openings throughout this territory for watchmakers, and anyone with small capital wishing to establish himself in the jewelry business will find opportunities.

E. Welch, Wayne, Neb., was in the city

SEYMOUR W. FROLICHSTEIN.

FRED. H. ENGLAND.

FROLICHSTEIN & ENGLAND,

NEW FIRM—NEW GOODS—NEW IDEAS.

last week on his way home from a vacation east.

L. E. Burris, Elliott, Ia., was a buyer in Omaha last week.

A. D. Smith, Cedar Rapids, Neb., was a purchaser last week.

C. S. Peterson, Oakland, will add a jewelry line to his store.

William L. Bauer, Manilla, Ia., is closing out his jewelry department.

W. D. Abel, Petersburg, Neb., visited the wholesale trade recently.

Paul Albright, David City, Neb., and John B. Ash, Rockford, Ill., are attending the horological school here.

S. Pearson, Oakland, Neb., has enjoyed such a good business the past year that he is greatly increasing his stock.

Jacob L. Jacobson is in Washington, having gone to the Capitol City as one of the Presidential electors from Nebraska.

Gertrude Finley was arrested last week charged with stealing jewelry from her employer, S. A. Goldstein. The property was found in her trunk.

Cleveland, O.

Henry Welf, who has been quite ill with grip, is much improved.

The stock of R. Winzenried, purchased a year ago by F. H. Kramer, is being sold at auction by Mr. Kramer at 59 Euclid Ave.

F. Schroeder, who has been with the Griffith instalment house, has been engaged as watchmaker by F. H. Kramer.

Vandals have been scratching many of the fine plate glass windows in this city. They evidently use a diamond ring to cut

the glass. In most cases the work consists of irregular lines and crosses. On the big window of the Cowell & Hubbard Co. someone has scratched the word "Gussie." This work not only badly mars the glass, but greatly weakens it and renders it liable to break.

Webb C. Ball has returned to Cleveland from St. Louis, Mo., whither he had gone as one of eight representatives of the Cleveland Chamber of Commerce, to secure the selection of Cleveland for the National Encampment of the Grand Army of the Republic, to be held next September. The committee were successful in their efforts, and as the result is expected that Cleveland will be visited by about 250,000 veterans in September.

Denver.

H. J. Taylor, this city, has gone to Trinidad to open a repair shop.

Henry Curtis, Littleton, and H. Rachofsky, Central City, were in Denver last week on business.

Nathan Cohn, Leadville, has retired from business and is now in Denver where he will make his future home.

The Lewis Jewelers' Supply Co., early in January, moved from the People's Bank block to much larger quarters in the Arapahoe building.

Col. J. D. Lewis, jewelry auctioneer, is in Leadville conducting an auction for the Roth Jewelry Co. There is a Leadville ordinance prohibiting such sales.

The Western Jewelry Co., Cripple Creek, some time ago gave a chattel mortgage.

Last week the company were sold out under an order of the Court. Toney Lubelski bought the stock. The goods were invoiced at \$3,400, but brought a much lower figure. The liabilities were \$5,500.

Pacific Coast Notes.

William Robinson, formerly a jeweler of Virginia, Nev., and Miss Ida Beck, of that city, were married recently.

An ordinance has been adopted by the Board of Supervisors of Calaveras county, Cal., raising the license on jewelry peddlers.

D. A. Woodward, Hanford, Cal., has sold a half interest in his jewelry business to N. I. Wheelock, of Los Angeles, Cal. The business will be carried on in future under the name of Woodward & Wheelock.

The Board of Supervisors of San Joaquin county, Cal., are advertising for sealed bids for keeping in good order and repair for the year ending Dec. 1, 1901, all the clocks in the County Court House and the main Court House clock at Stockton, Cal.

The business men of San Jose, Cal., are making preparations for the entertainment to be given in honor of President McKinley's visit to that city next May. J. Kocher, H. Morton, W. Ryder and L. Machefert, jewelers, of San Jose, have been appointed a committee to secure funds to carry on the project.

A. M. Masury, alias James Mitchell, alias Charles Wilson, has been arrested in Sacramento, Cal., on suspicion of having stolen jewelry in San Francisco. A circular received from the

police department of the latter city described the jewelry taken, and some hours later the detectives found Mitchell offering rare bargains in jewelry to a bartender. When arrested jewels valued at \$550 were found in his clothing. Masury recently came to this coast from Boston.

San Francisco.

City retailers report a fairly good trade for January.

George Greenzweig, with his wife and son, is on a visit to New York.

E. W. Wright, Bakersfield, Cal., called on the trade of San Francisco last week.

Fritz Abendroth, Portland, Ore., is enjoying a 10 days' vacation among his friends here.

Ray Friedberger, of Maurice Friedberger & Co., Stockton, Cal., spent a day or two in this city recently.

Robert Radke, father of R. L. and G. H. Radke, of Radke & Co., died recently of apoplexy. The deceased was 75 years of age.

William Hyde, lately with A. I. Hall & Son, was last week placed in charge of the branch of Joseph Fahys & Co., New York, at 120 Sutter St., this city.

George A. Brown, with A. I. Hall & Son, has started on a northern trip, which will be of several months' duration. L. H. Smith will visit the southern territory in the interest of this firm.

St. Louis.

BUSINESS CONDITIONS.

The jewelers here all report business quiet but much better than it was at this time last year. The early part of January was quite dull, but business improved toward the latter part of the month, which brought their January business ahead. Quietness in trade is expected for some time to come, or until Spring trade opens up. The prospects are quite good for a nice business.

Morris Bauman, of the L. Bauman Jewelry Co., is in New York on business.

Mr. Cutter, general manager of the Elgin National Watch Co., was in the city last week.

All the retail jewelers on the west end of Franklin Ave. have decided to close at 6.30 o'clock Wednesday and Friday evenings.

The annual election of the Missouri Re-

tail Jewelers' Association will take place at the rooms of the Association, 507 Franklin Ave., on the afternoon of Feb. 13.

Among prominent jewelers of nearby towns in the city the past week were: Fred. Simon, of Collinsville, Ill.; C. H. Gesecke, Trenton, Ill.; Walter Sperling, Seneca, Kan.; George Daniels, Kearney, Neb., and C. S. Poole, Joplin, Mo.

T. S. Byers announces that he has sold his stock and resigned his position as secretary in the corporation of the Langsdorf-Byers Jewelry Co., and has formed a new company under the firm style of T. S. Byers Jewelry Co., under his personal control.

The S. A. Rider Jewelry Co. were a small loser in the failure of E. Clarke, proprietor of the Magnet department store, Spokane, Wash., one of the largest general stores in the city, that filed papers in bankruptcy in the United States Court, declaring liabilities of \$27,000 with assets amounting to \$19,000. The store and stock are now in charge of the United States Marshal.

Arrangements are now all complete for the Missouri Retail Jewelers' Association banquet, which will take place on the evening of Feb. 14. The banqueting place has been changed from the Broadway Café to Schrap's Café, 921 Olive St. It will be a stag affair and a number of prominent speakers have been invited outside of the Association. Among them will be several prominent in the World's Fair project, who will talk on that matter.

Fred. Heisler, driver of a United States mail wagon, was arrested Feb. 1, charged with extracting jewelry packages from the mails. Heisler denied the charges but made evasive answers when closely questioned. Nothing was found on him but a gold chain. A gold pen and staff were found in the possession of a woman friend. She said she had received them, as well as a gentleman's gold ring, with the gem missing, from him, but that she had taken them to the Barr Jewelry Co. and exchanged them for a brooch. While he admitted making the presents to the woman he denied taking them from the mails. From the Eisenstadt Jewelry Co. it was learned that the ring which Heisler had, had been brought to them from a pawnshop nearly two weeks before Heisler claims that he bought it. The Federal authorities have not yet taken up the case, as the detectives are to be allowed to collect more evidence before he is taken in charge by the Government.

Richard Roberts has discontinued his jewelry business in Garneill, Mont.

No. 7 Carlisle Building,
CINCINNATI, OHIO.

Cincinnati.

BUSINESS OUTLOOK.

The business outlook is good for the jewelers. The travelers who are out are sending in satisfactory orders. The mail orders are better than they were last year and collections are very good.

The Duhme Jewelry Co. will hold an opening on Feb. 15.

The Miller Jewelry Co. have added more men to their force in their repair and other departments.

Joseph Noterman & Co. are taking stock and find they have had the most successful year in the history of the firm.

Constant Van Reeth, importer and cutter of rough diamonds, is becoming popular as a specialist in matching stones.

Hugo Lindenberg, of Lindenberg & Fox, has started out on his first trip for this new firm, consisting of himself and Ed. J. Fox, son of Sol. Fox, of Fox Bros. & Co.

Elmore Becker, son of Joseph Becker, western agent for the Fahys Watch Case Co., has resigned his position with S. & H. Gilsey to go with the new manufacturing concern of Peck, Selmeier & Peck.

Gustave Fox received last week a letter from the Grand Lodge of Elks, acknowledging the receipt of the two magnificent badges ordered for retiring officials and complimenting him on the elegant work and beautiful design of the emblems.

Rauch & Goldsmith, who suffered disaster through the fire of the Grand Opera House, which adjoins their building, have about recovered from the loss. They were fully insured. Charles Goldsmith and Louis Rauch, of the firm, will start on the road this week.

The Wadsworth Watch Case Co. began this year to make solid gold cases in all sizes, and the demand has exceeded the output, they have been so popular. It will be the great feature of this company to turn out an unrivaled line for the Spring trade.

Theodore Neuhaus & Co. are getting out an elaborately illustrated catalogue of medals, badges and class pins. The designs are all of his own conception and will represent months of labor. Mr. Neuhaus has a scrap book that has evoked considerable admiration among his friends. It has several hundred pages, 10x12, in which he has pasted all the new and unique designs as they have appeared in THE CIRCULAR-WEEKLY and other journals in his line of business. He has one book completed and is beginning on another. He has been three years on the first, and it contains a valuable fund of ideas for the designer and manufacturer.

Pacific Northwest.

J. Lesser, Portland, Ore., reports the business for the month of January as good and says large goods have moved very rapidly.

The negro accused of stealing a diamond ring from A. N. Wright, Portland, Ore., has been held for trial with bonds fixed at \$750.

T. H. Brown, Nelson, B. C., has just placed in his store a fine new standard regulator clock. It is seven feet eight inches high and of French manufacture.

Mention The Jewelers' Circular-Weekly.

Connecticut.

W. L. Smith, Seymour, has recovered from his recent illness.

Mitchell & Son have opened for business in the rooms formerly occupied by the Mystic Bridge bank, Mystic.

At the quarterly meeting held last week, the Southington Cutlery Co.'s directors declared a quarterly dividend of 1 1/4 per cent.

Factory L, International Silver Co., at Wallingford, has begun operating on a nine hour schedule per day, from 7 A. M. until 5 P. M.

P. J. Jeffrey and A. Markoff have formed a partnership at New London, for plating gold, silver, nickel and other metals, with an office at 18 Perry St.

Joseph Pinsker, jeweler, of Portland, who has conducted a store on Main St. for some time, is closing out his business pre-

paratory to moving to some other town.

The jewelry store of the late F. A. Shepard, Torrington, which was closed at his death, has been reopened, and the business will now be continued by Mrs. Shepard.

Among the recent patents issued to Meriden residents were the following: To Constant K. Dechard, assignor to International Silver Co., for heat insulator for handled vessels; to Henry M. Doolittle and J. A. Graham, for metal working tool.

Rollin W. Plum, who died at Terryville, Jan. 29, was at one time in the clock business in that town. He was born at Wolcott, Feb. 11, 1821, and in 1844 went to Terryville, where he worked for the old clock firm of H. Welton & Co. He later became prominent in the lock manufacturing business.

At the short calendar session of the Superior Court, New Haven, last week, the

case of the Barker Silver Co., Milford, in which a motion was made for an amendment of the order limiting the time for the presentation of claims against the concern was to have come up for a hearing, but was postponed for a week.

Selectman Hurlburt, of New Britain, received a communication last week from Attleboro, Mass., stating that a company manufacturing jewelry would like to locate in that town if water power could be obtained and a low rate of insurance and cheap labor could be procured. The concern employs 42 hands and has a pay roll of \$300 a week.

The annual meeting of the Holmes & Edwards Mutual Benefit Association was held Monday evening at the factory, Bridgeport. The following officers were elected for the current year: President, William Field; vice-president, Patrick Carney; secretary, Theodore E. Brown; treasurer, William H. Ryburn; auditors, A. G. Baldwin and George A. Murphy.

The annual meeting of the J. D. Bergen Co. was held at the factory of the company at Meriden, last Wednesday. The following were elected directors: James D. Bergen, N. L. Bradley, E. J. Doolittle, C. Berry Peets, C. E. Stockder, Jr., and Clarence P. Bradley. James D. Bergen was elected president and treasurer, and C. E. Stockder, Jr., secretary. A dividend of 6 per cent. was declared.

Hartford's new silver company, to be known as the Simeon L. and George H. Rogers Co., having their headquarters at Hartford, with works also in Wallingford, will begin operations in the course of a few days. The Messrs. McFayden, John and Samuel, who were for years with the William Rogers Mfg. Co., are actively identified with the new works. It is expected that 100 hands will be employed after the plant is fully at work.

Pittsburgh.

S. Maltinsky, Braddock, is having an auction sale before removal.

Murray Henry, formerly in business in McKeesport, Pa., is now with the Keystone Jewelry Co.

W. W. Wattles, of W. W. Wattles & Sons, and Mrs. Wattles are spending several weeks at Atlantic City.

Charles E. Graves, of Charles E. Graves & Co., Chicago, was in the city last week, buying import goods.

O. O. Reams, Wilksburg, Pa., has completed his auction sale and will go out of the jewelry business.

J. W. McKean has discontinued his store at Monessen, Pa., and will hereafter devote his time to the store at Charleroi, Pa.

The Pittsburgh Jewelry Co., of Fifth Ave. and of Smithfield St., will remove into one store, at 443 Smithfield St., at the close of the present sales.

F. W. Koehler, Sharon, Pa., will remove April 1 into the building now occupied by Mr. Brady, who is selling out to quit the jewelry business.

The sad information of the death of A. Schroeder, Niles, O., was received in the city last week. Mr. Schroeder was 35 years in the jewelry business.

Graf & Niemann, of the East End, have found a down town location on 6th St., opposite the Hotel Anderson, and will remove very shortly. The situation is a very good one.

The W. J. Johnston Co. will have their annual meeting of stockholders on Saturday next, for the election of officers. The company have opened their factory on the fifth floor in the Verner building, which is under the supervision of Mr. Kraus. Extensive engraving and watch making departments will be started shortly. W. J. Johnston, president of the company, goes east this week.

Out-of-town visitors last week were:

Charles Loughman, McKee's Rocks, Pa.; A. Moscher, East Palestine, O.; H. H. Weylman, Kittanning, Pa.; R. Bibby, Wilksburg, Pa.; Jacob Wolf, Suterville, Pa.; John Linnenbrink, Rochester, Pa.; William Hunt, Uniontown, Pa.; Harvey Fritz, Oil City, Pa.; Frank Weylman, Kittanning, Pa.; F. B. McKinley, Washington, Pa.; J. C. Rhodes, Homestead, Pa.; E. A. Bloser, New Kensington, Pa.; George V. Brady, Washington, Pa.; Numa Evard, Turtle Creek, Pa.; A. R. Fleming, Wilksburg, Pa.; Mr. Foy, Braddock, Pa.; D. L. Cleland, Butler, Pa.; A. C. Graul, Sharpsburg, Pa.; John Z. Simpson, Blairsville, Pa.; P. J. Manson, Jeannette, Pa.

Mrs. Anna Migel has retired from the jewelry and pawnbroking business in Galveston, Tex.

King, Palmer & Byrd have opened a new stock of jewelry and notions in Sulphur Springs, Tex.

60 MACHINES IN ONE DAY

shipped from our factory is a good indication of the esteem in which **EATON-ENGLE MACHINES** are held. This shipment embraced nearly every State in the Union.

What's the use doing work by old-fashioned methods when by the expenditure of a small amount you can put yourself in a position to do work quickly and well? The samples of work which we send out to every inquirer for a catalogue are all done by our office boys and give a good general idea of the character of the engraving which our machine will do. Have you had a sample yet? If not, let us send you one.

If you will send us two 2-cent stamps, to cover the postage, we will send to you a beautiful aluminum memorandum book engraved with your name. This book is worth a quarter of anyone's money.

This offer applies only to Jewelers, Opticians or Watchmakers employed in jewelry stores. It is not meant for errand boys and is good only until Feb. 20.

We sell you these machines for a **small** first payment and the balance monthly; in doing this **you have the use of the machine and the money while we wait.** Isn't this a liberal proposition?

Let's hear from you to-day, with any questions you may care to ask. You'll get a prompt and courteous reply.

THE EATON & GLOVER CO., 87 Nassau St., New York.

A Few Questions.

Do you want to be known in your city or town as **THE** watch dealer? Do you want to be able to sell a better gold-filled watch case at a lower price than any of your competitors? Do you want to do this and still make a larger profit than you are now making? Do you want to control your own designs and be beyond competition? If you do, write for our special proposition. Remember, **BELL GOLD-FILLED WATCH CASES** are sold direct to you—no middle-man's profit.

Any emblem or monogram, plain or engine-turned, made to order for from 25 cents to \$1.00 over price of plain polished case.

The "Bell Special" is the only gold-filled case made with the amount and quality of gold stamped in the case.

The Jaccard Jewelry Co. are taking their annual inventory.

S. R. Abney, 1208½ Grand Ave., has been on the sick list with grip for a few days.

R. J. Gilbert, of the Jaccard Jewelry Co., is again in the store and is feeling much better since his rest.

H. E. Clevidence, with the Jaccard Jewelry Co., has been called to Mount Morris, Ill., by the death of his father.

J. B. Schmeltz, 1231½ Grand Ave., had a fire last week, which caused damage of about \$200; fully covered by insurance.

J. R. Mercer is invoicing and preparing for the alterations and improvements in his store, which he expects will be started the first of the month.

Charles E. Stafford, who assisted J. R. Mercer during the holiday rush, is traveling for William Birmingham & Son, manufacturers of leather goods.

C. B. Norton, president of the Norton-Paulson Jewelry Co., expects to go with the Commercial Club on their trip through Oklahoma and Texas. They leave this week and will go as far as Fort Worth.

Jan. 25 Senator Farris introduced a bill in the Senate at Jefferson City, Mo., to tax department stores. In many respects the bill is different from the one which passed two years ago, which was declared unconstitutional by the Supreme Court. Senator Farris believes that his bill has been so carefully drawn up that the flaws that were found by the Supreme Court in the 40th Assembly have been avoided.

Among the out-of-town jewelers who called on the local trade last week were: Otto Burkland, Osawatomie, Kan.; Mr. Fry, with S. M. De Tar, of Edgerton, Kan.; J. E. Hathaway, Parkville, Mo.; T. W. Black, Kearney, Mo.; J. B. Hampton, Colby, Kan.; A. A. Cox, Mt. Vernon, Mo.; C. B. Libbey, Weir City, Kan.; Benjamin Hollenbeck, Springhill, Kan.; Harry Davis, Topeka, Kan.; Dick Kolstad, Pleasant Hill, Mo.; Walter Sperling, Seneca, Kan.; C. A. Clement, Springfield, Mo.; Walter Starcke, Junction City, Mo.; Mr. Wilson, St. Joseph, Mo.; A. Kroencke, Concordia, Mo.; Mr. Raines, of Raines Bros., Tarkio, Mo.; Harry Bower, Delphos, Kan.; T. H. Keerner, South McAlester, I. T.; W. F. Kirkpatrick, Winchester, Kan.; B. T. Baley, Monett, Mo., and Mr. Waddell, of Sams & Waddell, of Clinton, Mo., was in town, accompanied by his daughter.

The jewelry store of A. H. Jenks, Co-hocton, N. Y., will move to Coudersport, Pa.

Birmingham, Ala.

W. L. Lawler, a jeweler of Nashville, has opened a business at Centerville.

John T. Adams, Jr., Talladega, who was recently married, is back from his wedding trip to New Orleans.

F. E. Dey, Greenville, has opened a branch business at Evergreen, which will be in charge of Harry Dey.

A. B. Swift, who has been with jeweler R. Heine, Talladega, for a year, has returned to his home in Indiana.

T. J. Irwin, Athens, has enlarged his business to such an extent that he has been forced to employ additional help.

F. W. Bromberg, who succeeded to the jewelry business of E. Gluck, has gone to New York and other markets to buy a new stock of goods. The old Gluck stock was closed out at auction.

J. J. B. McElrath, formerly of Center, Ala., has located in the jewelry business at Woodlawn. Mr. McElrath was post-master at Center 15 years, during which time he learned the jewelry business.

A. Brown & Son, Florence, are now in one of the prettiest stores in the south, which has been fully stocked with jewelry, bric-à-brac and optical goods. This firm were established in Florence in 1869 and have been among the leaders in Lauderdale county's business interests ever since. Until the new organization A. Brown had charge of the optical department with Robert L. Brown at the bench. Their store has been appropriately named the "Gem of Beauty."

Savannah, Ga.

J. B. King, of J. B. & L. A. King, Eastman, Ga., died recently.

Paul Arndt, Charleston, S. C., has given a chattel mortgage for \$700.

J. H. Koch, of Koch & Sylvan, was recently sued in the City Court for \$1,000 damage by Annette Coles, who claimed to have been injured by the collapse of steps of a house she rented from Mr. Koch. The jury awarded her a verdict of \$500.

R. A. Ferris, formerly of Beaufort, S. C., is under arrest in Savannah on a charge of having stolen from the residence of A. M. Greenfield, jeweler, Beaufort, with whom he boarded, a diamond ring valued at \$300 and \$30 in money. Ferris has confessed his guilt and told of how he had the stones taken from the ring and had them reset in other rings, one of which he had given to a female friend and the other he had pawned. Mr. Greenfield has recovered his jewelry, but intends prosecuting Ferris, who will be taken to Beaufort for trial.

The Mercantile National Bank

OF THE CITY OF NEW YORK,

BROADWAY AND DEY STREET,

Solicits Accounts from the Jewelry Trade.

Boston.

F. O. Fuller, with D. C. Percival & Co., returned early this week from a trip through several of the Southern States.

The annual meeting and election of officers of the Boston Jewelers' Club will be held Feb. 12, at some Boston hotel yet to be selected.

The Tiffany Jewelry Co. have added the agency for the Hartford Silver Co., Hartford, Conn., and have placed in position a handsome cabinet for the display of samples.

Charles May & Son, watch materials, are arranging to move from their present quarters on Bromfield St. to the Marlborough building, 403 Washington St., where they have rented a room from the E. Howard Clock Co.

Inspector Shields, of Chief Watts's office, arrested on warrant, Thursday, Russell M. Zuver, 25 years old, Milton, Mass., for illegal conveyance of a watch valued at \$34, on Nov. 27, 1900, held under a conditional contract of sale by Freeman H. Kendall, jeweler, 830 Washington St.

The officials of the American Waltham Watch Co. say that the output at the factory at Waltham is running much ahead of that in recent previous years. Orders are continually coming in from all parts of the country, and these orders are sufficient to keep the company running as at present for several months to come.

The past was a "home" week at Smith's, Patterson & Co.'s, A. A. Abbott, manager of the branch at Montreal, T. A. Brady, of the Upper Provinces, and F. A. Mansfield, of the Maritime Provinces, all being in Boston. M. N. Smith, senior member of the firm, entertained the above named gentlemen at the Algonquin Club, Commonwealth Ave.

Among the buyers in town last week were: C. B. Hammond, Nashua, N. H.; A. W. Avery, Plymouth, N. H.; H. P. N. Dahl, Maynard, Mass.; N. C. Nelson, Concord, N. H.; G. W. Duckworth, Pawtucket, R. I.; L. R. Hapgood, Dover, N. H.; W. S. Lee, Salem, Mass.; Albin Keith, of J. A. Merrill & Co., Portland, Me.; W. A. Kemp, East Pepperell, Mass.

An article which will appeal to retail jewelers, haberdashers and all others who advertise their wares by window display, is a unique and highly practical window reacher manufactured by Francis & Hall, 52 Columbia St., Newark, N. J. This device is three and one-half feet in length and is termed by its makers a mechanical extension of the arm. By its aid one can reach from the extreme corner of a window any article, from a cut glass decanter to a ring, without disturbing the rest of the exhibit. The points are covered with leather for the use of jewelers, to prevent the scratching of delicate articles. The device will undoubtedly meet with success among the retail jewelers.

Manufacturers of

WATCH

CASES

RIVERSIDE, N. J.

Jan. 11, 1901.

To the Trade:-

We beg to announce that we have purchased the watch case manufacturing business of Bates & Bacon, Attleboro, Mass., and will continue, at this place, the manufacture of their well-known brands:-

"FAVORITE,"	guaranteed for	25	years.
"ROYAL,"	"	" 20	"
"REGAL,"	"	" 10	"
"PURITAN,"	"	" 5	"

We assume all guarantees made by Bates & Bacon, and will treat them in the same liberal way as we do our own guarantees, viz.:

A NEW CASE OF THE SAME GRADE GIVEN FREE OF CHARGE

for any case that fails to wear the full guaranteed period, without conditions, without charge and without quibbling.

We trust it will gratify the trade at large, and especially those who have heretofore handled the Bates & Bacon product, to know that the latter's business has passed into such ownership as will rigorously maintain the quality, fulfill the guarantees, uphold and extend the prestige of the goods and continue on a broader scale the honest methods of the makers in relation to the trade.

Mr. E. R. Crippen, formerly manager of the Bates & Bacon business, will be in charge of our New York office and attend to the distribution of our product among the Eastern Trade.

Mr. J. R. Davidson, in charge of our Chicago office, will increase his line by the addition of the Bates & Bacon grades and attend to the distribution of our product in his territory.

Yours respectfully,

PHILADELPHIA WATCH CASE CO.

LETTERS TO THE EDITOR.

THE ELGIN DECISION AND THE WALTHAM DECISION.

NEW YORK, Jan. 21, 1901.

Editor THE JEWELERS' CIRCULAR-WEEKLY:

I have read the interview with President Hulburt, of the Elgin National Watch Co., contained in your last issue, in reference to the decision of the United States Supreme Court in the case of Elgin National Watch Co. vs. Illinois Watch Case Co. I was one of the counsel for the plaintiff in the case of American Waltham Watch Co. vs. U. S. Watch Co., brought and tried in the Supreme Court of Massachusetts, and I was also counsel for the plaintiff in the case of the American Waltham Watch Co. vs. Sandman, brought in the United States Circuit Court for the Southern District of New York and decided by Judge Townsend. Both of the last named cases were tried and decided upon the theory of unfair competition and not on the theory of infringement of a trademark, and there is nothing in the decision of the Supreme Court in the Elgin case which in any way contravenes the doctrine laid down in the two Waltham cases. The opinion of Judge Holmes in the Massachusetts case on appeal to the full bench of the Supreme Court contains the following:

"It was found at the hearing that the word 'Waltham,' which originally was used by the plaintiff in a merely geographical sense, now, by long use in connection with plaintiff's watches, has come to have a secondary meaning as the designation of watches which the public has become accustomed to associate with the name. * * *

"Whatever might have been the doubts some years ago, we think that it is now pretty well settled that the plaintiff, merely on the strength of having been the first in the field, may put later comers to the trouble of taking such reasonable precautions as are commercially practicable to prevent their lawful names and advertisements from deceitfully diverting the plaintiff's custom.

"We cannot go behind the finding that such a deceitful diversion is the effect and intended effect of the marks in question. We cannot go behind the finding that it is practicable to distinguish the defendant's watches from those of the plaintiff, and that it ought to be done."

The Court then enjoined the defendant from doing three things. First, from using the term "Waltham Watches" to describe the defendant's watches at any time or in any way; second, from placing the word "Waltham" on the dial of a watch; third, from placing the words "Waltham, Mass." upon the plate of a watch as a business address without coupling with them some accompanying statement which should distinguish clearly the defendant's watches from those made by the plaintiff. The statement finally determined upon and ordered to be placed upon the plate of the defendant's watches was, "A New Watch Company at Waltham, Est'd 1885."

(American Waltham Watch Co. vs. U. S. Watch Co., 173 Mass. 85.)

The case of the American Waltham Watch Co. vs. Sandman (96 Fed. Rep. 330) was brought against the agent of the Columbia Watch Co., a concern also located at Waltham, and the relief sought was an injunction against the use by the defendant of the words "Waltham, Mass." upon the plate of the watch unless accompanied by some distinguishing statement. The head-

CHICAGO OFFICE, 131 WABASH AVE.

note in the said case, which correctly represents the decision, says:

"The word 'Waltham' on watches, while originally used in a geographical sense only, has by its long continued use by the American Waltham Watch Co. acquired a secondary meaning as a designation of the watches manufactured by that company; and its use by another manufacturer without some accompanying statement to clearly distinguish its watches from those manufactured by such company and in a manner calculated to, and which does, deceive purchasers, constitutes unfair competition."

In this case the decree enjoined the defendant from using the words "Waltham, Mass." as the business address unless accompanied by the statement "A New Watch Company at Waltham, est'd 1895." It will thus be seen that both of the foregoing cases were based upon the theory of unfair competition. In the Elgin case, on the contrary, the opinion of the Court expressly states that the issue under consideration was whether the word "Elgin" was a lawfully registered trade-mark. The language of the Court on this point is as follows:

"It is to be observed, however, that the question we are considering is not whether this record makes out a case of false representation or perfidious dealing or unfair competition, but whether appellant had the exclusive right to use the word 'Elgin' as against all the world. Was it a lawfully registered trade-mark? If the absolute right to the use of the word as a trade-mark belonged to the appellant, then the Circuit Court had jurisdiction under the statute to award relief for infringement; but if it were not a lawfully registered trade-mark, then the Circuit Court of Appeals correctly held that jurisdiction could not be maintained."

The Court, however, guards itself from misunderstanding by using the following language:

"But where an alleged trade-mark is not in itself a good trade-mark, yet the use of the word has come to denote the particular manufacturer or vendor, relief against unfair competition or perfidious dealing will be awarded by requiring the use of the word by another to be confined to its primary sense by such limitations as will prevent misapprehension on the question of origin."

President Hulburd is, therefore, clearly right in his analysis of the opinion of the Supreme Court in the Elgin case. All that the Court decides in that case is that the word "Elgin" was not a good technical trade-mark. The doctrine of the Waltham cases still remains sound. It is still true that where a geographical name has by long continued use acquired a secondary meaning as the designation of the goods of one merchant, the use of such geographical name by another merchant without some accompanying statement to clearly distinguish his goods from those manufactured by the first merchant, or its use in any manner which is calculated to deceive purchasers into supposing that the goods of the second manufacturer are those of the first, will be enjoined.

Yours truly,
F. L. CRAWFORD.

J. A. Atchley has opened a jewelry business at Athens, Tenn.

Detectives of Rochester, N. Y., are making a search for two men who committed a theft at the jewelry store of Herman Roeber, 238 North St., that city, last week. While Mr. Roeber was away, two men entered and while one showed the clerk a broken watch the other stole a ring worth \$60. They escaped before the theft was detected.

ISSUE OF JAN. 29, 1901.

666,719. EYEGLASSES. GEORGE W. WELLS, Southbridge, Mass. Filed Nov. 14, 1900. Serial No. 36,440. (No model.)

In eyeglasses, the combination with the frame-post, having a recessed end, and the end of the spring and nose-guard fitting in said recessed end, of a fastening-screw having a head with straight edges, and a plate extending in the recessed end of the frame-post, between the head of the fastening-screw and the nose-guard, and having an extension thereon to engage one of the straight edges on the head of the fastening-screw.

666,731. ELECTROMEDICAL EYEGLASSES. PHILIBERT BALME, Izicux, France. Filed March 26, 1900. Serial No. 10,165. (No model.)

In a device of the class set forth, the combination with the frame of the eyeglass, the halves of which are made of different metals (copper and zinc), of a suitable projection on each half of the frame, between which projections electric discharges may be produced when the eyeglass is used on the nose.

666,821. MUSICAL INSTRUMENT. FERDINAND SCHAUB, Jersey City, N. J., assignor to the F. G. Otto & Sons, Incorporated, same place. Filed Sept. 5, 1899. Serial No. 729,530. (No model.)

In a mechanical musical instrument, the combination with a music-producing mechanism, adapted to be operated by note-disks, of a receptacle for the note-disks, and two horizontally-swinging arms pivoted to the receptacle and to a suitable support, and means for conveying the disks from said receptacle into playing position and from playing position into said receptacle.

666,855. DETACHABLE BUTTON. WILLIAM U. RAINE, Milwaukee, Wis. Filed July 16, 1900. Serial No. 23,760. (No model.)

666,856. RETINOSCOPE. ELMER LE ROY RYER, New York, N. Y. Filed Sept. 17, 1900. Serial No. 20,241. (No model.)

In an instrument for the examination of the eyes, the exterior casing forming a dark chamber and having at its outer end the eye-opening, and the movable observing-tube within and less in diameter than said casing and having at the operator's end the light-directing means, combined with the light-tube leading to said observing-tube and through which the rays of light pass to said light-directing means, the said casing being provided with means for the reception of the lens or lenses intermediate the outer end of said movable tube and the aforesaid opening.

666,927. EYEGLASSES. ROBERT B. FINCH, Denver, Col., assignor of one-half to Edwin T. Jones, same place. Filed April 18, 1900. Serial No. 13,403. (No model.)

In eyeglasses, the combination of a rigid bridge provided at each extremity with a keeper having two separated arms, and a guard provided with a lever having separated lugs adapted to pass between the arms of the keeper, the keeper-arms and the lugs of the lever being provided with coinciding apertures, a fulcrum-pin passing through said apertures, and a spring surrounding said pin between the lugs of the lever and having a tendency to cause the nosepieces of the guard to grasp the nose of the wearer.

666,928. EYEGLASSES. ROBERT B. FINCH, Denver, Col., assignor of one-half to Edwin T. Jones, same place. Filed June 4, 1900. Serial No. 18,929. (No model.)

In eyeglasses the combination with the eyeglass-frame or lens-mountings, of a bridge having bends at the extremities of its bow portion, said bends being substantially perpendicular to the plane of the lenses, and projections extending forwardly from the bends to the frame or lens-mountings; and spring-held lever-arms extending across the bridge, and suitably fulcrumed on the frame or mountings, their inner extremities or nosepiece being normally spring-pressed toward the bow of the bridge whereby there is cooperative gripping action between the nosepieces of the lever-arms and the bow of the bridge, in a plane substantially perpendicular to that of the lenses.

666,929. EYEGLASSES. ROBERT B. FINCH, Denver, Col., assignor of one-half to Edwin T. Jones, same place. Filed Oct. 18, 1900. Serial No. 33,529. (No model.)

In eyeglasses the combination with the frame or lens-mountings, a bridge, and spring-held lever-arms fulcrumed on the frame or mounting, of a nosepiece composed of two distinct parts, one of which is carried by the lever-arm and has a tendency to move toward the bridge, whereby there is cooperative gripping action between the bridge and nosepiece in a plane substantially perpendicular to the plane of the lenses, the other part being relatively stationary and extending downwardly from the bridge.

666,985. CARVING AND ENGRAVING MACHINE. ATTILIO STIRIA, New York, N. Y. Filed March 8, 1900. Serial No. 7,850. (No model.)

666,997. REGULATOR FOR TIMEPIECES. ARCHIBALD BANNATYNE, Waterbury, Conn., assignor to the Waterbury Clock Co., same place. Filed Nov. 30, 1900. Serial No. 38,118. (No model.)

A hair-spring regulator adapted to be pivotally secured in place, and consisting of a lever provided with an operating-arm, a spring-receiving arm, an arm connecting the operating-arm with the spring-

Old New York Tower Timepieces.

TOWER CLOCKS THAT HAVE MARKED TIME FOR UPWARDS OF A HALF CENTURY AND MORE.

THE cost of a timekeeper to-day is so small that even the poorest citizen can afford to carry one, but there was a time when pocket timepieces were ex-

BRICK CHURCH CLOCK.

pensive, and the town clock was almost a necessary luxury. The divisions of day marked by the clanging strokes of these public tower clocks were heeded by nearly all, and work was begun and left off according to the time called by these ancient recorders. Scattered throughout the older portions of the city these old tower clocks stand to-day as distinct reminders of the early days of our Dutch and English ancestors when New York was little more than a thriving but promising town of the new world.

Down at old Trinity people watch the ticking of the huge clock in the stone tower and listen eagerly to the hour, half-hour and quarter-hour strokes of its musical gong; but while Trinity has the largest and one of the best clocks in the city, it is not by any means the

oldest. It was built in 1846 by James Rogers, and with but slight interruption for occasional repairs the clock has been ticking away the time for over half a century. The clock has the reputation of being one of the best timepieces in America and it is certainly the heaviest. The weights of this clock are from 800 to 1,500 pounds, and the huge pendulum is 18 feet long. The interior mechanism of the clock is all on a large and rather clumsy scale, for the wheels, pinions and cranks take up nearly the whole inside space of the large tower, and the friction is so great that constant oiling and care have been necessary all along to keep the clock in good working order. The main wheels of the clock are 30 inches in diameter, and the frame in which the clock is built is 9 feet long and 5 feet high. Rogers had the reputation of building excellent tower clocks, but in the case of old Trinity he made the mistake of building on too large a scale. The heavy 1,500 pound weight has a drop of 50 feet, and in the event of a break in the cord the fall of the weight might prove a serious matter to the framework of the floor of the tower. To provide against any such contingency a huge box has been built in the bottom of the well, and nearly a bale of cotton is kept there at all times to break the fall of one of the big weights.

Much more important from an historical point of view than Trinity's clock is the ancient timepiece in the tower of St. Paul's Church. This is not by any

CITY HALL CLOCK.

means such a handsome and conspicuous tower clock as Trinity's, for the frame is only 5 feet high and a little over 2 feet wide and four feet deep. Old St. Paul's Church was erected in 1766, but the clock was not put up until nearly 40 years later. The inscription on the inside bears date of 1798, and the words "made by John

Thwaites, Clerkenwell, Lond." Even this date makes the clock more than a century old, and the fact that it keeps excellent time to-day is good evidence that its builder performed his work satisfactorily. Few clocks built to-day could be warranted to stand the storms and weather of a full century, and in all that time lose

ST. PAUL'S CHURCH CLOCK.

only a few hours. The pendulum of this clock is 13 feet in length and is made of wood and makes 32 beats. The ball weight is only 75 pounds, but the main wheels are from 24 to 27 inches in diameter.

Many of the old tower clocks have such heavy weights that the free movement of the mechanism has been greatly hampered, and this is especially true of the old clock in St. John's. The weight is a solid casting and so heavy that several times the proposition to replace it by a lighter one has been discussed. The pendulum is a short one, measuring only 7½ feet, and this in connection with the heavy weight causes such serious blows when the pendulum swings that the whole clock is shaken. Owing to this clumsy movement nearly every tooth in the scape wheel has been broken at one time or another, and

yet the clock has kept excellent time and continues to measure the hours of day and night with wonderful regularity. This clock is very similar to the one in its sister church of St. Paul's, but it is not nearly so ancient or antiquated in construction.

Probably the oldest tower clock in New York is in the old St. George's Episcopal Church, corner of 16th St. and Second Ave. The exact age of the clock is not known, and all that can be gathered of its ancient lineage is that it was built by Simeon Willard, of Roxbury, Mass., and that it was originally put in the tower of the old St. George's Church at the corner of Beekman and Cliff Sts.

This church was built in 1752, and stood there for upward of a century. The present church on 16th St. was the legitimate successor to the downtown structure. The present church is the second building on the site now occupied by it. The first was burned in 1814, and the second was built in the following year. The clock was supposed to be half a century old prior to this time, which would give it an age of nearly 150 years. Hoary though it is with age, the clock continues to tick regularly and mark the time of day exactly. Half a century ago St. George's time regulated the city's movements, and clocks and watches were practically set by it. It varied so little in its time that it was generally recognized as the city's standard timepiece. Even to-day its movements are regular, and it rarely gains or loses in the course of a day or week. The clock is small compared with some of the other tower clocks in the city, and the frame is only 5 feet long. The pendulum is a rod, 5 feet in length, holding an iron ball at its bottom weighing 50 pounds. The regularity with which this pendulum swings back and forth, ticking away the years of a new century, impresses one more than the modern clocks with their fine, finished mechanism. Nearly all the works of these old tower clocks were made by hand, the wheels, pendulums and gearings all being forged out by some expert handicraftsman who understood his business well.

At Second Ave. and 10th St. stands one of the interesting structures of ancient times, and for years it stood as a solitary structure "up in the country north of New York." Beneath its floors the re-

mains of old Peter Stuyvesant, the last Dutch Governor of New York, are buried. On this site the doughty old Governor built a chapel for the Dutch farmers who had farms north of the city. The present

ST. JOHN'S CHURCH CLOCK.

church was built in 1826, when the old chapel was hoary with age, and even at that time the country around was devoted to farming. The Dutch from Harlem came down to this church to worship, and the people from the Long Island shore also crossed the river to attend the meetings there. In this old church building there is a tower clock that was put up shortly after the structure was erected, and it is in many respects an exact duplicate or copy of the tower clock in St. John's. It is smaller, but otherwise very similar.

ST. GEORGE'S CHURCH CLOCKS.

The old Dutch Reformed Church at Fifth Ave. and 29th St. has an ancient clock, copied also after the one in St. John's Church, and its origin dates back to the early part of the present cen-

tury. This clock was built by Stokell, who was in his days one of the best manufacturers of timepieces in the country. The present Dutch Church was a successor to the old wooden building erected at one time on what is now called Old Slip. There was a clock in this first wooden structure, but it must have disappeared when the building was demolished. The present one was constructed shortly after the erection of the church building at 29th St.

There are many more modern tower clocks in the city, but most of them have been built within the last quarter of a century. The Brick Church and others have good clocks. The City Hall clock is also an excellent one and of considerable size. The one on the old Third Ave. R. R. depot is a large and handsome timepiece. But none of these has the historical interest of those that have ticked upwards of half a century and more in the few remaining old churches of the city. They gather new interest and association as time passes, and as they continue to keep good time as in their youthful days they testify to the excellent workmanship of the early clockmakers.

Uses of Diamond Tweezers.

"WEBSTER defines tweezers as 'a small pincers, used to pluck out hairs and for other purposes,' " said an old jeweler to a JEWELERS' CIRCULAR-WEEKLY reporter recently, "but many more purposes are served by the more specific diamond tweezers, a requisite in every jeweler's kit.

"My own I always carry in my breast-pocket, and after using, replace it forthwith. Why? Because otherwise my fellow jeweler with whom I may be negotiating and who has acquired the same habit, may pick it up, place it in his own pocket and incur the trouble of sending it to me. Now, this one," displaying a fine nickel plated tweezers, "has my name etched upon it for just such contingency. The man who neglects this precaution has an occasionally busy time hunting for his lost tweezers; he may find it, in the great hereafter, where the organist 'seated one day at the organ' surmises he may find his 'lost chord.' Eh! in heaven? cer-

OLD DUTCH CHURCH CLOCK.

tainly. The finder will be there too. Neither of them would violate the commandment 'Thou shalt not steal.' It is merely the force of habit.

"And speaking of habit, do you know, a jeweler will spend in time, searching for it, manifold a tweezer's cost rather than not recover one to which he has become accustomed by prolonged and frequent use! He 'has the hang of it'—has become attached to it.

"But aside from its professional utility, I imagine every jeweler who carries one knows how handy it is otherwise. Reading an uncut book away from one's own library conveniences, the flat end serves as a paper cutter. A neighbor in a street car has dropped a silver coin between the slats of the wood floor mat. The coin is too elusive for clumsy fingers to rescue; he calls the conductor, reluctant to lift the four-foot square structure, to the possible discomfort of six or eight passengers. With my ready tweezers I extricate the coin, present it to the loser, receive a smiling acknowledgment and witness a grateful expression on the faces of the passengers who have not been disturbed.

"It will remove superfluous hairs, as Webster says of ordinary tweezers; but run a splinter into your finger and it will

pull it out; it will deftly pick out any small object from a mass of them. Drop your eye glasses in your soup plate, and before the laugh is fairly on you they are rescued without soiling your fingers. No sugar tongs on the table? Wipe your tweezer prongs on your napkin, transfer the stipulated number of lumps to your coffee cup and the laugh is on the hostess. Want to tie a twine knot for which the fingers are too bulky? Seize the twine with your tweezers and it's done in a twinkling. Out fishing and break your line on the big fish you didn't get? Nothing can be so readily used to short-splice your line as tweezers; with its prongs in contact it separates the strands as would a delicate bodkin, and the splicing ends are seized and pulled through by their grip. I have made such splices in eight minutes each. No, I fear I cannot recommend a tweezers nor any other instrument for rescuing the big fishes that are lost.

"Do you want to protract your enjoyment of an extra fine cigar? Hold it in your tweezers when its brevity would otherwise scorch your finger.

"Harry—oh, never mind his other name—was on his Summer vacation in Sullivan County, N. Y., some years ago. One morning, gathered with others on

the hotel piazza, he noticed a young lady who seemed distressed by some throat obstruction which she sought to remove by futile swallowing and spasmodic coughing which afforded no relief. She had thus suffered for several hours. Harry sympathetically asked leave to seek the cause of the irritation; she acquiesced. He observed what seemed to be a fine fish-bone, one end penetrating the thick of the palate, the other end sticking into the adjoining tissue and held by both ends, bent as an archer's bow. Cautioning her to sit quietly he carefully directed his diamond tweezers to it, gripped it midway and withdrew it, presenting it to her gaze as the triumph of a jeweler's tweezers. Harry was dubbed 'Doctor' during the remainder of his stay. No, he didn't marry her; his wife held her head whilst Harry performed the delicate operation."

"Verily a diamond tweezers is a convenient instrument for much more than its nominal purpose in the hands of an ingenious jeweler," concluded the reporter, and the old jeweler responded as demurely as a proposition under the mathematical rule-of-three:

"Hair-pin : Woman :: Diamond tweezers : Jeweler."

DROP PRESSES

PLAIN AND AUTOMATIC.

What the Jewelers and Silversmiths need for the coming season. Plain Drops for work that has to be daped. Automatics for Flat Back and Shallow work.

NEW YORK.

OUR OPTICAL DEPARTMENT

is most complete in every particular and we wish to impress upon you the fact that we are in every way just as capable of handling your Optical business as if we devoted our entire time to this branch. We fill Optical prescriptions of all kinds, the most difficult as well as the simplest, and we absolutely guarantee their correctness. We do it as cheaply and as quickly as anyone. Thus you can order your Jewelry, Tools and Material and Optical goods from the same house, which is a great convenience.

We also carry a full line of Cameras and Camera supplies at best prices and will fill orders from any list you may have.

B. A. & Co. Gold-Filled Spectacle Frames.

We positively guarantee the B. A. & Co. Gold-Filled Spectacle Frames to give entire satisfaction and will cheerfully replace any such frame that fails to do so. Each one carries a tag bearing our guarantee (see fac-simile cut) and the letter "A" is stamped in every bridge to serve as a means of identification. We can furnish these frames in all sizes of eye.

*Enlarged Fac-Simile of Our Guarantee Tag.

CHICAGO.

CONDUCTED BY GEORGE A. ROGERS.

32D YEAR.

WEDNESDAY, FEBRUARY 6, 1901.

VOL. XLII. No. 1.

NOTE—Under this department, all matters of a technical or a news character bearing upon the optical branch of the jewelry industry will be considered. Address communications to The Jewelers' Circular Pub. Co., 11 John St., New York.

SALUTATORY.

IN taking charge of the Optical Department of THE JEWELERS' CIRCULAR-WEEKLY the writer is not fully acquainted with the past work of the paper in this field. Perhaps this is not of so much consequence to readers as what it is proposed that the department shall be in the future. In this regard I find myself reluctant to throw out any glittering promises or arouse hopes that may not be realized. That we purpose making it the most effective of optical departments needs no affirmation, but our success in that particular must be judged by the reader.

In amplifying this department the publishers are but recognizing an established alliance between the jewelry and optical trades. This alliance is not new, and natural evolution seems to be strengthening rather than weakening it, notwithstanding the fact that there probably is something anomalous in the union. The bridge that joins the craft of the jeweler and the profession of the optician is the dual character of the optical business, which is, in certain respects, a craft, or art, and in other respects a learned profession. The optical business—that is, its professional practice—lends dignity to the jewelry craft, if labor can be said to be more dignified in one field than in another. To be a skilled refracting optician requires qualities of mind somewhat different from those required of a skilled mechanic, but it is, perhaps, not altogether proper to regard one as superior to the other.

As to the profession of optics or optometry this is of itself dual in character. As a means of adjusting the action of the eye to the average work required of it in the ordinary affairs of life, so that it may do this work easily and with the least fatigue, and also that its dynamic functions may have due exercise by being put to normal uses, thus establishing the principle of work and rest, that is the highest class of work the optician is called upon to perform. But it was discovered quite early that the proper correction of the eyes with lenses had an important relation to the general health of a great number of people, and of late years the medical profession, or that portion of it making a

specialty of the eye, has devoted a great deal of attention to optics, and the oculist who does not at least assume to be proficient in this work is rare. Defects of the eyes often disturb the balance of the entire nervous system and reflex troubles are developed in remote organs because of the nervous relation, for the different organs of the body are not unlike the great and smaller cities of State, which are connected by telegraphic and transportation lines that make their business relations very intimate. And conversely, the derangement of a remote organ of the body may disturb the normal functional action of the eyes. To ignore this relationship is to disregard the most undeniable of facts.

But optometry cannot be said to be a branch of medicine, although the eye is connected with the general health of many, if not all, human beings. There are few things that are not so connected with the general health. To that extent in which physicians practice optometry they are refracting opticians rather than opticians infringing upon the legitimate field of the physician. Unfortunately, also, for the physician, he is too often a poor optician, and because he is so he affects to despise this branch of learning. This is naturally the case, for they are usually self-taught, and must be to attain any proficiency in the art, unless, without regard to their professional dignity, which some are sensible enough to disregard, they take a course of instruction and training in a real optical or optometric school, which, as a rule, they also affect to despise, and which, from the standpoint of professional ethics, is indeed a despicable institution. The refracting optician is trained in one of these schools and he is the only real professional in optometric work. The physician who, with contempt for these schools and contempt for optical knowledge generally, undertakes to do optometric work, is invariably a blunderer, deserving of the confidence and patronage of no one, for he is not qualified to prescribe lenses for any living human being.

The jeweler optician is, of course, no better, if he be without special training. This is not to say that attendance at an optical college is always necessary for either, but without such training years must be spent and thousands of blunders be made before anyone can arrive at what may be called a "professional" degree of skill. There is nothing in the course of the medical schools—general or special—to impart this intimate knowledge and

give the required practical training. It is to the growing class of professional opticians that this department will be devoted. We have great interest in every class of men or women who are inoculated with the real professional spirit that optometry, and the beautiful phenomena of optics and the mathematical principles that govern them, raises in the breasts of all who begin its study. We hope also to make this department interesting, inspiring and useful to them. How successfully (or unsuccessfully) the editor may set the varied menu of current optical news and literature before readers of this department—that is a question we leave to our optical readers.

Respectfully yours,

GEORGE A. ROGERS.

NOTATION OF CURVATURE.

THE optician, or prospective optician, who desires to get the greatest advantage from the reading or study of original articles in this department, should familiarize himself with the notation of curvature given here.

DEFINITIONS.

By the term "curvature" we have reference to the degree of curvature rather than to its extent; and while the notation may be applied to curved lines or surfaces, whether their curvature is uniform or not, it will only be necessary for the present to consider uniform curvatures.

Spherical surfaces have uniform curvature in all meridians—that is, their curvature is that of any great circle of the sphere or of its circumference. Small circles of a sphere have a uniform curvature, but their curvature is not the curvature of the sphere. Cylindrical surfaces have a uniform curvature in the meridian at right angles to the axis, but in no other meridian, one of which, the axial meridian, has no curvature.

PRINCIPLES.

1. The degree of curvature in a line or surface depends upon its nearness to the center; the nearer it is to the center the greater its curvature.

2. Curvature is inversely proportional to the distance of the curved line or surface from the center of curvature.

3. At a center of curvature, curvature may be said to be infinite (∞); at an infinite distance from the center, curvature may be said to be zero (0).

Optical Department.

[Continued from page 89.]

4. Curvature is static if unchanging, as the curvature in the surface of a lens; dynamic if constantly undergoing modification, as the curvature of waves of light.

5. Curvatures that are convex may be called positive or plus (+), and those that are concave may be called negative or minus (-).

6. But convexity and concavity are really but relative terms, since whether they be convex or concave depends upon the point of view.

UNIT OF CURVATURE.

The unit of curvature is that degree of curvature in a line or surface which has a radius of curvature of one meter. It may be called simply 1, 1 curvature, or 1C. If convex, it is +1C., if concave, -1C. Then, according to principle 2 above, the curvature of a line or surface having a radius of curvature of 1/2 meter is 2C., of 1/3 meter, 3C., of 3/5 meter, 5/3 = 1 2/3C. Whatever part the radius is of a meter the inverse of that quantity is the curvature; and vice-versa, whatever the curvature the radius of curvature in meters is the inverse of that quantity. A curvature of 5C. means a radius of 1/5 meter; of 20C. means a radius of 1/20 meter, etc. (See Fig. 1.)

Fig. 1

NOTATION OF CURVATURE.

To those who are accustomed to work in inches it is only necessary to bear in mind that 1 meter is equal to about 40 in. Then, 1/5 meter equals 1/5 of 40 in. = 8 in., and an 8 in radius, since it is equal to 1/5 meter, means a curvature of 5C. On the same basis a 5 in. radius means 8C., and 20 in. = 2C., etc. To reduce a radius in inches to curvature divide 40 by the number of meters. If we represent curvature by the letter C, and radius by the letter R, the following formulae will apply:

1. By the metric system:

$$C \times R = 1$$

$$1 \div C = R$$

$$1 \div R = C$$

2. By the inch system:

$$C \times R = 40$$

$$40 \div C = R$$

$$40 \div R = C$$

APPLIED TO LENSES.

It will be seen by the above that a lens having one surface spherical, and such surface having a radius of curvature of 1/5 meter (8 in.) will have 5C. in such surface. If the surface is convex its curvature is +5C., if concave, -5C. If the opposite surface has a spherical curvature, radius 1/8 meter (5 in.) its curvature is 8C. If convex, its curvature is +8C., if

concave, -8C. If both surfaces are convex the total curvature of the (Fig. 2) lens is +13C., if both are concave its total curvature is -13C. If one surface is +8C. and the other is -5C., its total, or rather its composite curvature is +3C., and if one surface is -8C. and the other is +5C., its composite curvature is -3C. The curvature in glass lenses is static, since it is fixed in the making and stationary.

Cylinders have uniform curvature in one meridian, the meridian at right angles to

Fig. 2

SURFACE CURVATURE OF A LENS

the axis. The curvature of a cylinder is designated by the curvature of the meridian of uniform curvature. If a lens has a cylindrical surface on one side of +3C. and a spherical surface on the other side of +2C., the meridian of uniform and maximum curvature has a curvature of +5C., the sum of the curvatures of sphere and cylinder, and the meridian of uniform but minimum curvature has a curvature of +2C., the curvature of the sphere only. These are called the principal meridians. No other meridian has uniform curvature.

By the curvature of lenses their dioptric power is determined, but curvature is but one factor in dioptric power or action. Toric lenses are lenses in which one surface has a toric curvature—the equivalent of compounding a sphere and cylinder.

APPLIED TO LIGHT WAVES.

Waves of light are generated at or emanate from points, traversing space in a homogeneous medium at equal speed in all directions. They are, therefore, spherical in curvature. The same notation of curvature applies to them. At the point of generation or emanation their curvature is infinite. It becomes zero at infinity. All waves of light are naturally (unmodified) convex, but spherical lenses through which they pass and spherical mirrors that reflect them change their curvature in many ways and degrees. It is by such action they become concave. Their sphericity is slightly disturbed by such action, but this disturbance is, in dioptrics,

Fig. 3

SHOWING CURVATURE OF WAVES OF LIGHT AT DIFFERENT DISTANCES FROM POINT OF ORIGIN.

considered a negligible quantity, since it is very slight.

Convex or positive waves are those proceeding away from their point of generation or emanation, which is the original center of curvature for them. All waves are naturally of this kind. Concave or negative waves are those proceeding toward their center of curvature, which is an actual or potential focus. If waves are neither convex nor concave they are called

neutral or plane. The curvature of light waves, except the neutral's, is dynamic, for it is always changing by the mere propagation of the waves in space, since by such propagation they are necessarily either approaching or receding from their center. The action of a spherical lens or mirror may increase, decrease or neutralize or reverse curvature at the surface of action. What it is able to do in this respect depends upon its power, but the action of a lens surface is not fixed by its curvature, but depends also upon the curvature of the waves upon which it acts.

Waves one meter from the object and unmodified are +1C. in curvature, or +1C. At 1/2 meter their curvature is +2C., at 1/5 meter +5C., etc. At a distance of 6 meters their (Fig. 3) curvature +1/6C., and this is so slight an amount for waves entering a lens or the pupil of the eye that it is regarded as zero. When a wave of light is modified in curvature by the action of a lens or mirror its changed curvature places the center at some other point. It may be nearer to or farther from the wave. It may be at an infinite distance from it. It may be upon the opposite side of the wave; as when the wave is reversed. We are always able to locate the new position exactly and determine the precise effect.

It is not our purpose here to consider these effects of lenses and mirrors upon the fast fleeing waves of light, but by such modifications all of the beautiful phenomena of optics are produced. The notation of curvature enables us to make a simple analysis of all optical effects, one not complex and algebraic, such as the books are loaded down with, but that every day optical students can easily grasp. The phenomena and the laws that govern them can be made as simple as the phenomena themselves, and nature is simple in all her ways if we but apply a simple system of expressing the work done.

Legislation and Legal Defence Fund.

Paper read at Milwaukee before the Wisconsin State Optical Society by Mrs. Alva Snider, of Beloit, Wis.

THE first and most important question to be considered is, would we better or worse our cause by trying to legislate at this time? It seems to me that with from 10 to 15 physicians in every small town and from one to three opticians, and the cities accordingly, it would be but utter failure. You all know the outcome of the attempts on the part of other societies to legislate. But suppose we did succeed in getting a bill passed to have an examining board, do you imagine the board would consist of opticians? No,

MRS. ALVA SNIDER.

Geneva Adjustable Table No. 991.

We here illustrate for the first time the Geneva Adjustable Table. We consider this the finest table on the market. It is constructed so as to practically balance either ophthalmometer or retinoscope. It has rack and pinion adjustment, assisted and balanced by a coil spring. When at proper height it is made absolutely rigid by a set screw.

Price, \$10.00 EACH.

No. 991. Price, \$10.00 Each.

BIG REDUCTION.

Gervais Chart of the Eye

THIS CHART is one that should be in the office of every oculist and optician. The figures are on a black background and are done in seven colors, and are perfect representations of the different parts of the eye. These charts have always been sold at \$1.25 each, owing to the fact that they had to be imported.

We are pleased to announce that we are prepared to supply this elegant chart at the following extremely low price, as we have finally succeeded in getting a stone made and having charts printed in this country, thus saving for our customers the high duty on them.

ON PAPER 27x35 INCHES, Each 25 Cents.

The cost of sending these separately by prepaid express is 15 cents each.

GENEVA OPTICAL COMPANY,

Branch Office at Des Moines, Iowa.

63 and 65 WASHINGTON ST., CHICAGO, ILLINOIS.

Optical Department.

(Continued from page 90.)

indeed! We would do well if we had one or two men on; the rest would be M.D.'s, as of course it would be in the Governor's hand to appoint them, and the doctors represent a strong political body when they choose to combine; and I want to ask you gentlemen whether a politician would favor the stronger or weaker party. Why, the stronger of course. Not only that, but, knowing little or nothing of either profession, would probably think the M.D.'s were the most capable (?) to do the work on this board. Then who is this board going to examine? Why, it is going to examine you. You say, that is all right, I am ready to be examined. Of course you are. But are you ready to pass an examination put up partially or wholly by the doctors who are prejudiced against the opticians, while the oculist who needs it much more and who is a self-appointed medical eye specialist, neither legally nor scientifically qualified to fit glasses by any other than the medical degree, goes scot free? Dr. Edward Jackson says: "It must be conceded that in former years the medical schools have sadly slighted and ignored training in this department of medical science; and even with the great improvement of the curriculum that has taken place there is still too much cause for reproach in this respect.

"Up to about 20 years ago practically no teaching of ophthalmology was offered in many of our colleges. Even the professor of surgery, who taught the whole subject in two lectures, often allowed these lectures to be crowded out to make room for what he deemed more necessary matter, and since professorships of ophthalmology have been established, so long as examinations in this branch were not a requirement for graduation and no emphasis was laid on its importance, the teaching was neglected and the mass of medical graduates went out almost as ignorant of its important facts as before."

According to statistics gathered from professors and graduates of the different colleges this condition still exists. A professor and two graduates of Yale Medical Department said: "We have only six hours on the subject of optometry." A Harvard graduate said it is the same at that college. A graduate of the University of Pennsylvania, also one from Jefferson Medical College of Philadelphia, said from four to six hours. One gentleman said: "The year I attended Physicians' and Surgeons' of New York we had only one hour on optics." Michigan, Ohio, Vermont and Illinois are said to give no more time to this important subject. Within three days one M.D. said: "Most colleges do not give the subject a minute." And these are the men who will examine us if we have a State examining board before we are able to demand that it be composed of graduates of reliable optical colleges.

Mr. Huxley, a man who knew the cost of victory, in writing to Professor Lancaster on the vice and virtues of combativeness, said: "I wish you would let an old man who has had his share of fighting remind you that battles, like hypotheses, are not to be multiplied beyond necessity."

That, I think, should be our policy with the doctors.

Don't multiply your fights, but try to lessen them, and this can be done only along intellectual lines. Prove that you are their optical superiors and you cannot help winning. Work to strengthen your society. Have a legal defense fund and, if possible, have a member who is located in or near Madison, to watch the legislation and see to it that the doctors pass no bill detrimental to your interest as opticians, but try to do nothing with legislating until we are strong enough to at least have hope of gaining something. Defeat would place us in a worse position than we are now in.

The president, at our last July meeting, requested us to be prepared to discuss at this January meeting the legal defense fund. First, how much money shall we have? How shall it be raised and how shall it be cared for? It should be limited to \$500, but we should have that much I think, as it takes \$250 to carry a case through the lower and Supreme Courts without your lawyer's fee. And the Supreme Court asks a bond of \$250 before your case is begun. Now, I think all money in the treasury after all bills of the society are paid should go to the defense fund. For instance, we all pay our annual dues this January. Of course we cannot put it in now, as we do not know what our expenses will be for the coming year; but one year from now all surplus moneys left from this assessment should be turned over to the legal defense fund. Besides this, each member should be assessed one dollar a year, payable at July meetings, until we have \$500 in the treasury. This fund should be cared for by the treasurer, he to be under surety bond, the cost of said bond to be paid by the society. He should also be empowered to loan this money, but it must be placed where it can be called in on very short notice. The interest accruing thereon should go to the general fund of this society. The defense fund should be used to secure legal advice whenever the board of directors deem it necessary and should be subject to order of said board, this board to meet whenever the president directs or on petition of 15 active members. Any member in good standing severing his connection with the society should have all moneys paid into the defense fund by him returned, except that which may have been expended in the interest of the society, due notice being given, and provided there be no litigation pending.

The next question is, whom shall we defend? Shall it be the optician who uses the degree doctor, or shall it be the optician who uses cycloplegics, or shall it be the peddler? I refrain from expressing any opinion on these questions, but leave them open for discussion. The medical fraternity always has and always will fight the legal recognition of the opticians to the bitter end. Such a fight will entail great expense of time and money. Therefore, we should be well equipped before entering the conflict.

[Commenced in issue of July 6, 1898. Continued from page 73, Jan. 23, 1901.]

PART LXIX.

Pleuroplegia (*pleu-ro-ple'-gi-a*). [Greek, *pleura* = one side + *plege* = a stroke.] A want of equal movements on the part of the muscles controlling the movements of the extra-ocular muscles.

Pneumophthalmos (*pneu-moph-thal'-mos*). [Greek, *pneuma* = the air + *ophthalmos* = the eye.] A pathological condition in which there is a collection of air within the eyeball.

Point (*point*). [Middle English, *point* = sharp end.] The Eye Point of the microscope is a circle of light formed by the rays of light crossing. The Far or Distance Point is placed for practical purposes at twenty feet away for an emmetropic eye. A hyperopic eye is really beyond that point and in a myopic eye the far point is less than twenty feet. The Fixation Point is that point for any dioptric condition at which an object can be distinctly seen. The Focal Point is the point at which the rays of light meet. There are two focal points—an anterior and a posterior. The anterior focal point is formed by a myopic eye and the rays of light. The posterior focal point is formed by an emmetropic eye. The Point of Incidence is the surface upon which the rays of light enter. The Near Point is the nearest accommodative point at which a patient can read. The Absolute Near Point is the nearest accommodative point in which one eye can see distinctly. The Binocular Near Point is the one in which the functions, convergence and accommodation, are so nicely balanced that a single object can be seen perfectly. The Nodal Point is that point to which all the rays of light come after passing through a lens. The posterior pole of the crystalline lens is its nodal point. The Principal Points are the points in the line of the axis of a lens which pass in parallel paths from the object to the image. The Point of Refraction is the point where the line is bent in passing from a rare to a denser medium. The Corresponding or Identical Retinal Point is the same point in space projected by both eyes after both retinas have received the same impression. The Desperate Retinal Point is formed by two different points in space after two different retinal impressions have been received by both eyes. The Point of Sight or vision is the point of observation or place from which an object is seen.

Polarimeter (*po-lar-im'-et-er*). [Latin, *polus* = a pole + Greek, *metron* = a measure.] An instrument which will change the polarizing plane from the right to the left side.

Polarimetry (*po-lar-im'-et-ry*). [Latin, *polus* = a pole + Greek, *metron* = a measure.] The art of using the polarimeter.

Polariscope (*po-lar'-is-cope*). [Latin, *polus* = a pole + Greek, *skopeo* = I see.] An instrument having two chambers, containing tourmaline, in which a pebble is analyzed by passing through the first chamber and polarized after the rays of light have passed through the second chamber.

Against Proposed Legislation.

Committee of Opticians Appear at Albany to Oppose Assembly Bill No. 167.

A hearing before the State Committee on Public Health was held at Albany, N. Y., Wednesday last, on Assembly Bill No. 167 to amend Section 152 of Chapter 661, of Laws of 1892, which was attended by a representative committee of New York opticians for the purpose of remonstrating against the bill becoming a law. The passage of the bill would create great injury to the opticians of the State, as pointed out in THE CIRCULAR-WEEKLY of Jan. 23.

This bill was framed by the New York County Medical Society and introduced by Assemblyman Bell. It was designed principally to control the practice by Christian Scientists, but it also had a bearing on the optical business, the importance of which was quickly seen. So much opposition had developed to the original wording of the bill that some changes were voluntarily proposed by the framers of the bill at the hearing, but while these changes improve in some respects the bearing of the bill on the optician, the latter are not satisfied. Section 152 of the bill, as originally presented to the Assembly, read as follows:

"Any person shall be regarded as practicing medicine within the meaning of this act who shall prescribe, direct, recommend, or advise, for the use of any other person, any remedy or agent whatsoever, whether with or without the use of any medicine, drug, instrument or other appliance, for the treatment, relief, or cure of any wound, fracture, or bodily injury, infirmity, physical or mental, or other defect or disease. This article shall not be construed as prohibiting the service of any person in an emergency * * * or any manufacture of artificial eyes, limbs or orthopedic instruments or trusses, in fitting such instruments on persons in need thereof, when such artificial eyes, limbs or orthopedic instruments or trusses are prescribed by lawfully qualified physicians," etc.

The amendments proposed to the foregoing since the opposition developed would remove some of the offending clauses, but they would not satisfy the opticians. It is proposed to omit the words printed in italics and substitute for the first omission: "give treatment to" and add other words which would make the opening clause of Section 152 read thus:

"Any person shall be regarded as practicing medicine within the meaning of this act who shall give treatment to any other person, by the use of any remedy, agent or method whatsoever, whether with or without the use of any medicine, drug, instrument or other appliance, for the relief, or cure," etc.

The opticians object strongly to the phrase "give treatment to," basing their objections on the interpretation of the word "treatment." It is claimed that on this point hinges the whole question as the matter now stands. In order to make this right, the opticians desire a phrase inserted in the section of the bill, so that it shall provide that the article shall not be "construed as prohibiting the service of any person in an emergency * * * or any optician in adapting glasses to the sight." The last phrase is one desired to be added, but it is also a phrase over which there is likely to be much opposition developed.

At the hearing, Wednesday last, most of the time was taken up by the Christian Scientists and comparatively little attention was given the other opposing interests. Addresses were made by president A. J. Cross, of The American Association of Opticians, and by A. Martin, of Brooklyn, the latter in reply to Dr. Howe, of the Buffalo Medical College, who spoke for oculists who favored the bill in its original form. In order to give the opticians opportunity to present their side of the case in detail, on the lines described above, the committee adjourned the hearing until Feb. 6, at Albany, when Mr. Cross, Charles F. Prentice, L. L. Ferguson, P. A. Dilworth, H. W. Appleton and others will be present to look after the opticians' interests.

NEW YORK STATE ASSOCIATION OF OPTICIANS PASS RESOLUTIONS.

SYRACUSE, N. Y., Jan. 28.—A special business meeting of the New York State Association of Opticians was held in the Assembly room of The Yates, this evening, to protest against Assembly Bill No. 167, and arrange measures to compass its defeat.

There was a large attendance and lively discussions were followed by the adoption of the following resolutions which were framed by a committee composed of H. C. Watts and William D. Oertel, of Syracuse, and G. N. Luckey, of Baldwinsville.

WHEREAS, There is now before our Legislature at Albany a measure known as Assembly Bill 167,

which if enacted a law will legislate all refracting opticians out of business. Therefore, be it, Resolved, That the New York State Association of Opticians, assembled in special session, do most emphatically protest against this unjust measure and base our protests upon the following facts: 1st. For centuries opticians have fitted glasses to the public at large with utmost satisfaction and have invented many of the instruments used in such work. It is comparatively a short period since some of the medical profession have taken up this work, using the same methods and implements that we use, with no better results, and now they seek to monopolize the profession by legislating us out of business. 2d. The science of adapting glasses to correct refractive errors is purely mechanical and therefore does not require a medical education.

Further be it resolved, That a copy of these resolutions be forwarded by our representatives to the Assembly Committee on Public Health, to which this bill has been referred.

William D. Oertel and H. C. Watts, of Syracuse, were elected to represent the Association at Albany.

Among those in attendance at the session were: James Holden, G. N. Babbitt, H. S. Fuller, F. W. Reed, H. C. Watts, W. O. Conger, of Syracuse; A. W. Golder, of Seneca Falls; F. L. Swart, of Auburn; Edwin Wilcox, of Fulton; John Wagner, of Utica; W. J. Fuller, of Phoenix; E. B. Steele, of Newark; G. E. Holmes, of Clifton Springs; M. J. O'Hara, of Camillus; O. H. Wright, of Batavia, and G. N. Luckey, of Baldwinsville.

ACTION BY THE STATE OPTICAL SOCIETY.

The Optical Society of the State of New York have sent out a circular letter to all opticians of New York State, quoting the objectionable parts of the amended bill,

OPERA GLASSES.

OUR SPECIAL MAKES:

**LEMAIRE,
LA REINE,
LEFILS.**

SUSSFELD, LORSCH & CO., 37 & 39 MAIDEN LANE, NEW YORK.

Optical Department.

[Continued from page 93.]

and concluding with these expressions of opinion:

Now and at once, on receipt of this letter, all opticians and friends of fair play are asked to write or telegraph to the members of Assembly Chamber, Albany, to please vote against Assembly Bill 167, as it will kill the opticians' honorable calling by requiring those of the public who buy glasses to first pay an oculist's fee for the prescription before allowing opticians to furnish the glasses; furthermore, there is nothing in this bill that prohibits the doctor from furnishing patients with glasses if they so desire, thus legislating opticians out of business entirely.

It is a pernicious measure born of selfishness and a desire to further class legislation. It is narrow, tending to discourage scientific advancement; unreasonable, because physicians, as physicians, by their own confession, possess only a superficial knowledge of the laws governing light in its transmission through lenses; and misleading, because the true inwardness of the measure is fostered, not by general practitioners of medicine, but by designing specialists who seek to hide behind the cloak of the family doctor and force the public to pay fancy medical fees for mathematical and mechanical services.

Immediate action on your part is necessary, as the bill comes up for bearing on Wednesday, Feb. 6, and your Assemblyman should receive your letter or telegram on that day. Use your influence to have others interested write also.

This letter is signed by F. L. Swart, Au-

RESOLUTIONS OF NEW YORK CITY SOCIETY.

The resolutions which were adopted at a special meeting of the Optical Society of the City of New York, at the Fifth Ave. Hotel, Jan. 28, which meeting was reported in THE JEWELERS' CIRCULAR—WEEKLY last week, were as follows:

WHEREAS, The existing medical acts of the State of New York have proved amply sufficient to protect the practitioners of medicine from the impostures of charlatans and quacks, as is shown by the numerous successful prosecutions that obtain in this country yearly, and

WHEREAS, The passage of Assembly Bill No. 167 will create a monopoly of the adaptation of lenses to the human eyesight, placing in the hands of less than 200 ophthalmologists the exclusive sale or right to designate where such shall be adapted or sold to the 6,000,000 citizens of this State, thereby creating a monopoly for oculists, who, as a class, have not existed for 50 years, while opticians who have pursued their vocation for 400 years are, upon the passage of this act, disbarred.

Be it Resolved, That it is the sense of the Optical Society of the City of New York that further meddling or the amending of the existing medical acts is vicious in its conception and uncalled for by the citizens of this city and State, and we do hereby protest against this attempted pre-emption or curtailment of our vested rights which our profession has enjoyed for the past 400 years.

From the foregoing it will be seen how thoroughly in earnest the opticians are in the fight for what is a matter of vital interest to their business as opticians.

Optical Briefs and Notes.

George Hardy, of the Bay State Optical Co., Attleboro, Mass., was in Denver, Col., last week.

Elwood Riggs, manager of the Columbian Optical Co., Kansas City, Mo., was called to Omaha last week on business.

J. B. White, Columbus, O., has branched out into the jobbing business to some extent and is well satisfied with the trial he has given it.

Fred, S. Benedict, a well known optician, died at his home on Stranwood St., Cleveland, O., last week. Mr. Benedict was 56 years of age.

C. N. Sheldon started on a trip through Kansas, Missouri and Nebraska, last week, in the interest of the Merry Optical Co., Kansas City, Mo.

Irving Silverstein has resigned his position with the Merry Optical Co., Kansas City, Mo. He has been in their employ for the past two years.

Benjamin T. Popenoe, traveler for the Columbian Optical Co., Kansas City, Mo., has just returned from a trip through

Kansas and Missouri and reports trade as being excellent.

J. R. Kingston, city salesman for the Globe Optical Co., Boston, Mass., was confined to his home last week by reason of a severe attack of grip.

On Wednesday evening last, N. E. Harris, of the optical department of the Hoffman Supply Co., Columbus, O., was married to Miss Sarah Williams.

Edwin P. Leonard, employed in the case department of the Globe Optical Co., Boston, Mass., is receiving congratulations over the advent of a son on Jan. 31.

O. S. Johnson, Topeka, Kan.; C. A. Clement, Springfield, Mo., and F. W. Swearingen, Topeka, Kan., were among the opticians who called on the Kansas City jobbers last week.

Mr. Moore, representing F. W. Gesswein Co., New York, called on the wholesale trade in Kansas City, Mo., last week. Mr. Schneider, traveling salesman for Hammel, Riglander & Co., New York, was also in Kansas City last week.

The H. Cole Co., Columbus, O., are making a specialty of engineers' instruments and supplies as well as optical goods, and within the last six months a splendid business in this line has been built up. The company have their manufacturing department in splendid shape now and a large amount of special work is done.

The California State Association of Opticians have elected the following officers: President, E. M. Ackley, San Francisco (re-elected); first vice-president, S. G. Marshutz, Los Angeles (re-elected); second vice-president, C. L. Hogue, San Francisco; treasurer, W. H. Hunt, Oakland (re-elected); secretary, G. L. Schneider, Stockton (re-elected).

C. A. Gager, optician, Cleveland, O., has just returned from a trip to Nuevitas and Matanzas, Cuba. He went there in the interest of certain persons who are contemplating investment in land in that section of the island. Mr. Gager was not favorably impressed with the opportunities for business for either opticians or jewelers in Cuba. Few persons on the island, except the aged and infirm, wear glasses. Publications are few and only a small percentage of the inhabitants can read, and the necessity for glasses is not felt. There are fine opportunities, however, for cattle grazing, gardening and dealing in eggs and produce. The products of the dairy and market garden bring good prices and there is a large demand. Many Americans visit the parts where Mr. Gager stopped.

CLEVELAND, OHIO.

POWER EIGHT, ONE-THIRD
"INDIVIDUAL."
PRICE, \$40.00.

D. W. Beadel, Syracuse, N. Y., is spending two weeks with his son at New Castle, Pa.

H. A. Lambke, an optical goods dealer of Tacoma, Wash., has given a chattel mortgage for \$536.

The Kansas Optical Co. is the name of a new corporation who have just opened for business in Wichita, Kan.

Among the opticians from the vicinity of Syracuse, N. Y., in attendance at the hearing on the Bell bill in Albany, on Wednesday last, were: William D. Oertel and H. C. Watts, of Syracuse; A. W. Golder, of Seneca Falls, and F. L. Swart, of Auburn.

The wedding of Wayne Orlo Conger, optician, with H. C. Watts, Syracuse, N. Y., and Leona Alair Fralick occurred in the presence of a large number of friends and relatives on the evening of Jan. 16, at 8 o'clock, at the home of the bride's parents, Mr. and Mrs. John P. Fralick. After a trip to New York and Boston Mr. and Mrs. Conger are at home to their friends at 202 Furman St.

The Indiana Optical Society had a meeting Jan. 29 at the Dennison Hotel, Indianapolis, Ind. The meeting was an enthusiastic one, from which it is thought much good will come to the opticians. The following officers were elected: E. Shipley, Greencastle, president; J. H. Arnold, Columbus, vice-president; G. M. Bartmess, Clinton, secretary; Miss Stella Rogers, Indianapolis, first assistant secretary; Miss Elizabeth Crane, Indianapolis, second assistant secretary; E. O. Collins, Franklin; C. M. Jenkins, Richmond; O. N. Ridgevay, Sheridan; Paul E. Hulsmann, Indianapolis, and W. H. McDougal, Indianapolis, executive committee. The society were organized about four years ago to better a bill before the State Legislature, which was considered detrimental to the optical profession. Having accomplished

that effort the society gradually became more and more inactive until this meeting, which put new life into the cause. The new officers are determined to make the society a working one and to do everything to promote the advancement of the profession in Indiana. It was decided to have at least four meetings during the year. It is thought the president will soon call a meeting to take up much unfinished business.

Optical Trade Notes.

The Spencer Cœrulean frameless eye glasses and spectacles are the latest improvement in dioptics. By them a perfectly clear and flawless lens will have the same effect as a blue tinted lens without necessary loss of lens power caused by the mass of blue in the ordinary variety. Up to the present time nothing had been done in the way of relieving super-orbital headaches caused by bright, pure white concave spherical lenses for myopic patients other than prescribing blue tinted lenses, which neutralize the orange rays of light, which are the disturbing factor, producing irritation upon a sensitive myopic retina. The Spencer Optical Mfg. Co. have succeeded, after years of careful experimenting, in producing a patent lens so constructed that direct or central vision improved by the correction will not be interfered with by a mass of blue glass as in the old method. The blue tint will be diffused from the periphery, thereby perfectly neutralizing the orange rays without the least sacrifice as to the definition of the lens or diminution of vision in consequence of an interception of the waves of light.

W. E. Knuth has purchased the entire business of the Helena Lapidary Co., Helena, Mont.

INDISPENSABLE TO THE RETAIL JEWELER.

Wells' Perfect Self-Conforming Ring Adjuster.

By having an assortment of these adjusters in stock, a jeweler can often sell a ring which he could not sell without them; and, besides, there are many rings in use that need one of these adjusters which can be fitted at a good profit.

Wholesale prices are as follows: 1 doz. 10 K. gold, assorted sizes, \$3.75; one doz. metal, assorted sizes, 85c; by the single piece, 10 K. gold, No. 6, 25c; No. 7, 30c; Nos. 8 or 9, 40c; No. 10, 50c. Metal, any size, 10c; or 8 for 25c. Ask your jobber for them, or I will send at once prepaid only on receipt of price. Stamps taken for small amounts; money orders for larger ones. Address, **CHESTER H. WELLS, Jeweler, Meshoppen, Pa.**

These adjusters have been thoroughly tested and will stand hard usage when fitted in a ring.

Prices charged by jewelers when they fit them in a ring are: Gold, No. 6, 50c; No. 7, 60c; Nos. 8 or 9, 75c; No. 10, \$1.00 each. Metal, any size, 25c each.

The Francis Engraver

SAMPLES.

Why Refused. Why Misunderstood. How Cut. How Should be Cut. Effect on Trade.

SURPRISE is expressed because I refuse to cut and send samples to those who write for them. I stopped that over a year ago. Claims have been made that it was caused by a failure on the part of the machine to perform the work satisfactorily. If those seeking for information knew the truth, they would know that a sample cut on sheet aluminum with a special graver is a poor index by which to estimate the merits of a machine. Jewelers have shown me samples of this kind that were sent to them with a blank of the same kind, accompanied with a request that the blank be sent to me to be cut for comparison, and the following is added: "Mr. Francis will probably refuse to cut the sample for you; if so, we leave it for you to draw your own conclusions." It is easy to see that I would refuse after what is said on page 741 of the August *Keystone*. It says: "I positively refuse to cut samples unless the party requesting them is present to see them cut." The catalogue says: "Samples prove nothing," and this has been written many times. Space has never permitted me to go into detail to make the matter plain to others. Now that it is being used against me I will explain: First, Why the refusal is made. Second, Why the value of a sample as evidence of a machine's efficiency is misunderstood. Third, How samples are cut. Fourth, How they should be cut. Fifth, How they have affected some who have relied on them to a finish.

Samples have been refused because special cuttings are accepted as samples of general work, and specimens of general work are turned down by comparison because erroneously supposed to be inferior. In cutting samples of general work the cheapest Francis can put to shame the defender of any other machine, but this mistaken idea of the public, of making an exception a standard, put a quietus on my part; for I will not send samples that the machine cannot back up in the hands of others. Samples cut as I shall describe have a peculiar style of their own that is very effective, but of no particular value to the jeweler. It is one of the limits to which special work can be carried. It has not yet attained that degree of perfection shown by the professional sample maker for sewing machine companies, who can depict Father Time, with silken hair, flowing beard and a keen-edged scythe, striding forth on his endless mission; work so cunningly wrought that it might be mistaken for a painting. The intelligent housewife, in quest of a machine for family work, does not take such things for her standard of excellence in making a choice, and when she gets her machine she does not have to make Father Time seven hundred times weary in trying to put him on a napkin, for she never expected to do it; but the jeweler expects to put a fac-simile of that identical special sample on some napkin ring, and if time was not endless and all human things mortal, the old gentleman would drop his scythe and throw up his hands in despair at the thought.

The old Spencer-Harris machine was sold over thirty years ago; the Wright flourished over twenty years ago. Each had its day of usefulness and has long since been buried. I can resurrect one of either kind, and with it reproduce any of these little, flat, machine-cut aluminum samples that have appeared since their days. Of course, in doing this I would have to provide graver and type. These are the essentials in making such samples on perfectly flat surfaces—not carefully constructed machines. Machines are carefully constructed to bring the graver, type and a great variety of work into proper relations to correctly apply the principle on which the engraver is built—not simply to push a graver forward as a planer does it.

If aluminum is wet with squeegee solution while being cut, and is afterwards washed in gasoline to remove the paraffine, the brilliancy of the cut is unequalled. This makes it the easiest of metals to engrave nicely. Cutting in imitation of handwork by grinding and setting graters to cut all on one side is the most effective. To produce the best special samples requires some preparation. A special graver must be produced with great care, perfect type, a bottle of squeegee solution, a swab, a washing tray and some blanks that are perfectly flat. Having dressed a graver so that it can be set with its cutting edge nearly horizontal, so that when its point has entered the metal to the depth of a sixty-fourth of an inch, its edge is skimming the surface back a distance covering a good wide shade (as the skilled engraver does it with the flat side of his burin), we have accomplished the hardest part. Of course, in sharpening it we have tried to free it as nearly as possible from every microscopic nick or scratch. In this condition it will leave a cut that reflects light like a mirror. If the machine has a turning

point any letter will do, but if the graver is stationary our choice of type must be limited to letters having shades all running as nearly as possible in the same direction. Such work is best when each shade is cut with a rapid stroke. If the machine is handicapped by having a stationary graver it requires a considerable practice to reach the highest attainable proficiency necessary to make fairly presentable samples. A stationary graver can only cut shades that are nearly parallel. In all such samples the shades only are effective.

If a few parallel shades are pleasing when nicely cut, and are accepted, where a sample of a machine's general work conveys no adequate impression of its value as evidence of efficiency, how does the recipient of such specimens explain his estimate of effectiveness when he learns that the same graver, held in the same position, will cut the same parallel shades whether held in an engraving machine, the stock of a Boynton shaper, the cross-head of a Rockford planer, or the arbor of a type machine?

A customer asks for samples to have ocular evidence before him that the machine is correctly built. If a number are sent he picks out those that suit him best, probably without a thought as to the conditions under which they might have been cut. A dozen samples, cut in a dozen ways on the same machine, would give him a dozen impressions, each of a different machine, or if the cuts were made when the tool was held in something not an engraving machine, as I have shown they can be, and a photograph of the cutting could be seen, he would probably say that he did not want to buy at all, and conclude that I was right when I said: "Samples prove nothing."

The man who buys by them makes them his criterion, by which he estimates the machine's value as applied to his work, and from the day he sends in his order until he receives the machine, many times in his "mind's eye" he transfers the letters to some odd-shaped article of more or less value, that he expects to engrave when sold. He does not realize that the graver that cuts the special work would not do for anything else. If this graver was ever sent with the machine he would soon realize it, but I never send a special graver of this kind unless ordered, and I have only received orders for two during the past year. Think of this graver, with a nearly horizontal cutting edge, cutting toward you, on one side of a slightly oval surface, where its edge would take out a broadside of metal where a hair line was intended; then think of it again, cutting in the same direction, on the other side of same oval, where a shade was intended, and see how impotent it is to make anything but the narrowest kind of a line. Now, when it is especially remembered that there is no machine having a graver that can be tilted in operation, if you do not see that such a tool is utterly useless in general work you cannot be naturally endowed with a strong love for mechanics.

Samples should be cut with a machine ready for general work, with graters made with equal sides and worked in a perpendicular stock, or without lateral tilt, so that each side has the same cutting surface, as in cutting ovals the cut gains on one side of the graver what it loses on the other. These are always sent with a machine, and if samples were cut with them the buyer could reproduce the sample very soon after having received his machine, and his satisfaction would be complete.

When a machine is sold from samples cut with a special graver of the kind mentioned, the buyer is always trying to reproduce them. Not having the graver, and perhaps the type, or the skill, he is of course facing an impossibility. Nevertheless, he tries, and tries hard; he thinks the fault is in himself; he works hopelessly, but keeps at it. Explain to him the cause of his failure, and if his machine has a fault that he does not show up to you, as having been revealed to him, it is of such a minor character that he has overlooked it in his excitement.

It takes an expert hand engraver to equal the general work done by the Francis. Some of the best hand engravers to be found in the jewelry stores buy them. They say: "We have always had a man, or have always done our own engraving, but our time is worth more to us if given to other work; we have help whose time can better be applied to it. We find that the work is as good as our own in most ways, better in some, and that it will save us something in not requiring skilled help. Send us your best machine and outfit."

The machine and its work are superior to anything else ever offered, and when claims are made that my refusal to send samples is based on anything unsatisfactory in the machine or its work, they are false.

Address, **A. E. FRANCIS, 780 Cedar Ave., CLEVELAND, OHIO.**

THE JEWELRY REPAIRER'S HANDBOOK.

Copyright by THE JEWELERS' CIRCULAR PUB. CO., 1901.

THIS series of articles is presented mainly for that large class of workmen who have learned their trade in stores and who desire to know the best as well as the latest methods employed in jewelry repair shops. With this end in view the author intends to explain methods more fully than he otherwise would to workmen who have made the repairing of jewelry a specialty. The first thing to consider is

THE BENCH.

The jeweler's bench must be strong and well made and securely fastened to the floor to insure firmness. Its dimensions should be about 3 ft. 4 in. high, 2 ft. wide and 3 ft. long and the top 1 1/4 in. thick.

The bench usually contains two drawers; one—measuring from 21 to 24 in. long, 18 in. wide and 3 in. deep—immediately below the top of the bench, in which all tools are kept when not in use, and when closed it should be at least 3 inches back from the edge of the bench to allow the jeweler's hand perfect freedom while working at the bench pin; the other, or lap pan, from 21 to 24 in. long, 24 in. wide and 1 1/4 in. deep in front and having sloping sides which make the drawer 4 1/2 in. deep at the back. This pan is lined with zinc, and when pulled out lies snugly in the jeweler's lap and catches all filings and scraps that fall from his work.

A very important part about the bench is the bench pin, and the writer has been considerably surprised to learn that very many jewelers have never heard of it. Into the edge of the top of the bench and above the middle of the lap-pan, a hole is cut about 3 in. long, 2 1/2 in. deep and 3/8 of an inch wide. Into this hole is fastened the bench pin—a flat piece of wood about 3 in. wide, 1/2 in. thick and extending 3 in. from the edge of the bench. Another style of pin with two surfaces—one flat and the other sloping—is used for filing rings. This style can be made to order or obtained from any material dealer.

On the bench pin most of the work is done, and it has aptly been called a third hand. Its further uses will be pointed out in the sequel.

TOOLS.

The beginner need not have many tools with which to begin work; indeed, for some time, in shops, he does not do anything but saw straight and curved lines in copper or brass plate. Then the tools required are a saw-frame and blades, a pair of flat pliers, a rule or straight-edge, a pair of dividers and a scribing point. As he advances he makes flat band rings of the strips, and for this work he requires a cut-off size gauge, one of which will be found on the top of every Allen ring-stick, a pair of shears, a pair of half-round pliers, a half-round file, a ring mandril, a rawhide mallet—small size—a blow-pipe, soldering block or charcoal, a borax slate and cake of borax, a small camel's-hair brush, a water-bottle, a pickle pan, a pickle cup and a soldering lamp, either alcohol or gas. Provided with these tools, the be-

ginner is enabled to make up plain rings, and as he progresses he can do many repair jobs without requiring any more tools. But as these will be needed some time or other, below is presented a complete list of them, the use of each being briefly explained when considered necessary:

- | | | | | |
|---|----------------------------------|-----------------|-----------------|------------------|
| Alcohol lamp. | Bench-brush. | | | |
| Alcohol cup. | Beading tools. | | | |
| Anvil. | Borax. | | | |
| Blow-pipe. | Blow-pipe. | | | |
| Borax-slate. | | | | |
| Burnishers { Regular. | | | | |
| { Spoon. | | | | |
| Camel's-hair brush. | Drills. | | | |
| Charcoal block. | Eyeglass. | | | |
| Draw-plate. | Emery sticks. | | | |
| Drawing tongs. | | | | |
| Files { Half-round. | { Coarse | | | |
| { Flat. | and | | | |
| { Barrette. | Fine. | | | |
| { Needle. | Knife-edge. | | | |
| | Round. | | | |
| | Square. | | | |
| | 3-cornered. | | | |
| Gravers. | Matting tools. | | | |
| Hand-vise. | Magnet. | | | |
| Hammers { Large. | Oil-stones { Hard | | | |
| { Small. | | { and | | |
| Lamp. | { Soft. | | | |
| Pendant bow contractor and ring bender. | | | | |
| Pliers { Rivet. | Saw-frame and blades. | | | |
| { Round. | | Split tweezers. | | |
| { Half-round. | | | Soldering-iron. | |
| { Flat. | | | | Setting mandril. |
| { Parallel. | | | | |
| { Cutting. | Tweezers. | | | |
| { Pointed flat. | | Vise. | | |
| Pusher. | | | Water-bottle. | |
| Pump-drill. | | | | Wax-box. |
| Punches. | | | | |
| Pin-vises. | Watchmakers' medium stiff brush. | | | |
| Ring mandril. | | | | |
| Ring clamp. | | | | |
| Ring size stick. | | | | |
| Rawhide mallet. | | | | |
| Scotch-hone. | | | | |
| Screw-drivers. | | | | |
| Sieve. | | | | |
| Shears. | | | | |
| Soldering lamp. | | | | |
| Spiral turners. | | | | |
- The beading tools are tapering pieces of tempered steel, about four inches long, and have a concaved end which forms the beads or grains used when setting pearls. The tools are held in graver handles and are given a rolling motion.
- Prepared borax can be bought at any material house, but crystallized borax, obtained in any drug store, will answer just as well.
- The spoon-burnisher is made by softening and rounding and retempering the wide end of a flat file. This burnisher is used for removing dents, etc., from spoon bowls.
- The small camel's-hair brush is used for placing the borax paste on the joint to be soldered. A larger one can be used for anti-oxidizing purposes.
- Every jeweler should have a draw-plate with round holes and a pair of drawing tongs.
- The matting tools are used to mat the solder which has run into the engraving or matting of band rings.
- The magnet and sieve are used to remove dirt and steel, as well as iron, from the filings and scraps of gold.
- The pendant bow contractor is used to bend very heavy rings which cannot be bent with the half-round pliers.
- The rivet pliers are used to extract rivets from joints which resist all other methods.

They are made from a pair of English hawkbill case-pliers by drilling a hole through the end of the flat jaw and bending the curved end so that it will be exactly above the hole when the pliers are opened about a quarter of an inch. The curved part should be filed so as to go into the average joint without splitting it. It is not supposed to push the rivet out entirely, but simply to start it, after which it may be easily removed with a pair of pliers or a rivet punch.

The ring clamp or vise is a wooden arrangement for holding rings while stones are being set in them. It is a very useful tool and should be employed by every jeweler.

A spiral turner is a piece of steel about three or four inches long and one-fourth of an inch in diameter. The one end is fastened into a long handle and the other is filed flat. Then a groove is cut across the middle about one-eighth of an inch deep and wide enough to allow the spiral wire to enter. Then to the side of the middle and about one-sixteenth of an inch from the top, a hole is drilled perpendicularly to the groove. A piece of wire is fitted into the hole, which will hold the spiral wire in position while being turned into a spiral.

The split tweezers have two broad ends, one of which is sawed in half lengthwise for about a quarter of an inch. This is opened to form a triangle. A narrow band, which fits around the other end, is moved back or forth when an article is inserted or taken out of the jaws. This tool is used mainly for holding scarf pins and button backs while soft-soldering.

The setting mandril is made by softening, smoothing and retempering a large rat-tail file. This tool is used for rounding up settings that are made of gallery.

The water-bottle should have a perforated cork and is used to drop water on the borax slate to grind the paste for soldering purposes.

The wax-box is an ordinary tin box half filled with wax which has been melted and allowed to cool. This box is used for keeping diamonds and other precious stones while on the work-bench.

The wax-point is a conical piece of ordinary beeswax, the pointed end of which is used to pick up stones while setting them.

The pusher, used to push the prongs over stones, is a piece of soft steel about three-sixteenths of an inch square and about two inches long. It is fastened into a graver handle so that an inch or an inch and a half protrudes, according to the length of the handle used. The end which comes in contact with the prong is slightly beveled back and roughened, so that it will not easily slip.

The Scotch-hone or stone is very useful for removing scratches and file marks from articles to be polished, and especially so where engraving has been removed.

(To be continued.)

The wind last week demolished the glass window of the Martin & Hoerr jewelry store, Mankato, Minn.

Miles Bradley, for 20 years employed by the Bristol Brass and Clock Co., was found dead at his home on South St., Bristol, Conn., a few days ago. He was 65 years old and died of heart disease.

LADY RACINE

Automatic Machine-Made
and Warranted.

No. 144.

Open face, 10-line, silver, gold plated, full jeweled, nameless movement, transparent enamel, inlaid fleur-de-lis, imitation pearl border, back and front, with enameled filled pin to match; complete, in silk plush box.

B. A. BALLOU & CO.,

Providence, R. I.

WORKSHOP NOTES.

Gold Size.—Mix yellow ochre, 1 part; copal varnish, 2 parts; linseed oil, 3 parts; turpentine, 4 parts; boiled oil, 5 parts. The ochre must be reduced to the finest powder and ground with a little of the oil before mixing.

Gold Electroplating in hot baths is more regular, more rapidly obtained and possesses a deeper shade than that by cold baths. Crystallized soda phosphate, 21 oz.; soda bisulphite, 3½ oz.; pure potassium cyanide, 1-3 oz.; pure gold transformed into chloride, 1-3 oz.; distilled water, 2 1-5 gal. This is satisfactory for electrogilding silver, bronze and other alloys rich in copper.

Rusting of Tower Clocks.—The iron parts of turret clocks are much exposed to rust, for which reason they are generally provided with a rust-protector coating. For the prevention of rust a mixture has been found valuable which consists of 125 parts of mutton tallow and 20 parts camphor melted together and mixed with a little graphite. The parts of the clock to be protected are coated with this.

To Blanch Soldered Silver Ware.—To whiten soldered silver ware again mix in a porcelain dish 1 part of sulphuric acid with 20 parts of water. The soldered article is then made red hot and thrown into this mixture. The mixture is now heated to a feeble boil for a few minutes. By this treatment the soldered silver ware obtains a very uniform, dull white color. The taking out of the silver ware is best done with a wooden rod, for the sulphuric acid must positively not come in contact with any other metal.

Gilding Articles to Look Like Polished Gold.—Dr. Ebermayer gives a formula for gilding articles so as to look like polished gold, by simply dipping them into a warm solution. Dissolve 10 grammes gold in 40 grammes hydrochloric acid and 15 grammes nitric acid; stew down, letting as much of the acid escape as possible; then throw down the gold as fulminating gold by means of spirit of ammonia; filter and wash. In the meantime dissolve 100 grammes of potassium cyanide in as little water as possible and then dissolve the gold upon the filter with the cyanide solution. Pour this solution again over the filter until all the brown particles are dissolved, when the gilding solution is prepared by the addition of 1 liter distilled water. Into this solution, while warm, dip the metallic object to be gilded, and when drawn out it will have all the appearance of polished gold.

Everybody knows that an invitation to a wedding is a gentle intimation that presents, however small, will be gratefully received by the bride. But it has been left to a distinguished native of India to make open confession of this pleasing hypocrisy. Writing to the people in his station, asking them to his daughter's wedding, this man used the following formula: "Mr. and Mrs. — request the presents of Col. — and the officers of the — Regiment at the wedding of their daughter." The story is true.—*London Globe.*

Facts and Figures.

It may interest you to know that during the **twelve months ending September 30th, 1900**, there were **imported** into the **United States**

28,000,000 V. T. F. Watch Glasses.

Had they not been sold to the jobbers and manufacturers as quickly as they were imported, the following results might have been accomplished:

Placed **side by side** they would have formed a line **682 miles** long, or $4\frac{3}{4}$ times the distance between Albany and New York.

Placed **one on top of the other** they would have formed a column **166,600 feet high**, or $54\frac{1}{2}$ times the height of the Statue of Liberty; 346 times the height of the Pyramids of Egypt; ten times the height of Pike's Peak.

What better proof that the **quality** of the **V. T. F.** surpasses all other makes as the **quantity** exceeds all others.

That this department shall prove mutually beneficial to our readers, it is desirable that the members of the trade generally communicate with THE JEWELERS' CIRCULAR-WEEKLY regarding any advantageous device or plan that they are utilizing in connection with their business.

PRIZE ESSAY COMPETITION, NO. 2.

SUBJECT:

"How to Treat Customers—How to Sell."

No. 3.
PRIZE ESSAY COMPETITION.
First Prize, \$20.
Second Prize, \$10.

These prizes will be given to the writers of essays on the subject

"How to Foster Spring Trade."

The prizes will be for the best and most reasonable essays, not for the language in which the ideas are expressed. Anyone may enter, whether he be a retailer, salesman or any employe.

The standing of the judges who have kindly consented to act is a guarantee that the contest will be carried on strictly on its merits and in an absolutely fair and impartial manner. We shall designate each contribution by a letter, keeping a list of contributors with the letters of their articles. Thus the judges will not even know the names of the writers whose products they pass upon.

RULES:

Essays must be in this office by Feb. 15, 1901.
 Essays must be written on one side of paper.
 No limit to number of words, and specimens of records are admissible.

NOTE.—THE JEWELERS' CIRCULAR-WEEKLY reserves the right to publish any or all of the competing essays received.

Preference will be given, all other things being equal, to those whose contributions reach us at the earliest date.

POINTS OF COMMERCIAL LAW.

An agreement by which an employe is to receive a certain percentage of the profits of a business as compensation in whole or in part for his services does not create a partnership between the employer and employe, or as to creditors.

A partner has no right, over the objection of another partner, to execute promissory notes in the partnership name, or to execute a chattel mortgage on firm assets to secure the same, due immediately for debts which have not yet matured.

All the members of a copartnership which has had continuous dealings with another are liable to him for goods purchased of him upon the credit of the firm after its dissolution, if he has had no notice of such dissolution, actual or by advertisement.

CONGENIALITY is the keynote of success in selling goods, and the salesman (either wholesale or retail) who possesses this quality has an invaluable aid at his command. Tact, courtesy, knowledge of goods and ability to judge the prospective purchaser are also essentials which are not to be overlooked, but the main requisite is congeniality.

Approaching a buyer with a smile, make him feel that you are pleased to do business with him and that it is a pleasure to serve him. By so doing you win half the battle. He instinctively reposes a certain amount of confidence in you and believes such representation as you may make regarding the articles he desires to purchase. This is equally true of ladies, and you can gently direct their thoughts toward such articles as you desire to sell, without too strongly recommending anything in particular; for if too urgent the impression is very quickly gained that there is some special reason for such action.

Impress upon the prospective customer that you desire to serve him, but do not be too insistent upon his buying when he calls. Be pleased to show your goods, and even if no purchase is made retain a cheerful frame of mind and countenance.

Do not endeavor to impress the customer with the idea that you are doing him a favor by waiting on him and that you possess superior knowledge. Many a man is quickly offended at having some preconceived notion regarding merchandise—of which he knows very little—subjected to ridicule, and this happens not infrequently with the younger salesman. Show him where he is wrong, but do not do it in such a way as to give offence.

Be ready to cheerfully rectify mistakes which may happen, and even at times go beyond what is strictly necessary in order to please your customer.

If this method of doing business is conscientiously and consistently carried out there is no reason why every jeweler should not be a success as a "salesman."

L.

IT is an understood fact that all customers cannot be treated the same way, but a solid foundation may be built upon the one word "courtesy." From a salesman's point of view this would mean: First, adopting an easy and pleasing manner in presenting goods to the prospective

buyer and giving the impression that the salesman's time is theirs; second, showing due appreciation of their tastes and ideas, giving suggestions whenever necessary (precaution being taken in this connection, as a sale is often lost by an ill timed remark), and displaying knowledge of the goods in a pleasant and inoffensive manner; third, retaining a courteous demeanor if, perchance, the customer concludes not to purchase.

In selling goods, great ability is not required so much as a thorough knowledge of the goods and an honest representation of the same. When the salesman realizes the fact that by treating his customers courteously he not only works for his own interests but for those of the firm and customers, as well (for they are all so bound together that he cannot labor for the one without laboring for the others), he will no doubt find that this method of doing business will insure the return of the customers at some future time and an increase of sales, and thereby it solves the problem of "How to Treat Customers—How to Sell." A.

MY idea in waiting on a customer in a retail store is that when the customer enters the store he should be spoken to in a pleasant tone of voice. The salesman should not be too quick in asking if there is something he or she wants. Show whatever goods are wanted. If it be a watch, inquire as to size desired; explain the beautiful design of the engraving on the case, the color and the guarantee on both movement and case. If it be a ring, or any other article, show it in the same manner, convincing the customer that you have the finest and most tasty goods in the market. If the customer finds something that suits, let him or her inquire the price. Then state the same, but don't let the customer stand in an embarrassed mood; make him feel welcome and enjoy the call. Keep urging on the sale. After the sale is made invite the customer to be seated. Do up the goods in a neat manner and inquire if there is something else wanted. If not, thank the customer and invite him to call again. T.

F. A. Vogt, South Bend, Ind., has a very pretty electric display in front of his place of business. It is in two colors, alternating, and attracts considerable attention.

Gand HINTS to JEWELERS

Best Dressed Windows Among the Retail Jewelers.

Series II. Nos. XXVII. and XXVIII.

NOTE.—We inaugurated with the issue of May 3, 1899, the second series of characteristic retail jewelers' windows. The first series consisted of illustrations and descriptions of more than 100 different displays, extending over a period of eight years. We desire any jeweler who thinks his window is interesting or calculated to serve as a lesson to his brother jewelers, to send to us a photograph of such window for illustration under this department.

WITHIN the next three weeks two holidays of a patriotic character will occur—Lincoln's Birthday, Feb. 12, and Washington's Birthday, Feb. 22. As suggestions for symbolic jewelers' windows we present here two pictures. The first one is a patriotic window display consisting of palms backing a flag surmounting which is a brass eagle. The pots at the side of the portraits are draped. In front of the flag are stars formed by watches and chains. The flag falls gracefully between the wreathed portraits of Washington and Lincoln.

The main feature of the second patriotic window is the shield. The stripes are made of cards with links, studs, etc., while the stars and field are sunbursts on the dark covering of the window floor. Lorgnettes, chatelaine bags, rings and brooches are arranged in curved lines around the shield. Flags are placed in the background.

SOME JEWELERS' IDEAS.

Some years ago, in the month of December, a jeweler of Sydney, New South Wales, Australia, paid a man to collect a freight car full of snow in the mountains and deliver as much of it to him as he could. On Christmas day in the jeweler's window was a huge snowball, resting on a deep iron tray, and when the news spread about the city traffic was blocked for several hours until the novel sight had melted. Men who had not seen snow for 40 years, when they emigrated from the "old country," hobbled out among the crowds and people swarmed and struggled to get a glimpse of what they looked on as a sort of eighth wonder of the world.

C. A. Whitman, Adams, Mass., has a novel attraction in his show window, which was made by himself. It is a miniature woodshed, under which is an automaton representing himself as busily engaged in sawing wood. The representation of himself is perfect and the novelty attracts much attention.

A short time since, John L. Hastings, Mohawk, N. Y., determined to institute a guessing contest, respecting the number

of parts contained in a seven-jeweled Elgin watch. The prizes offered were a beautiful silk umbrella to the man

On the day set for the guessing each lady guesser received free a "beauty pin." The winners were Mrs. M. E. Halse, who

ORIGINAL SUGGESTION FOR A WASHINGTON AND LINCOLN PATRIOTIC WINDOW.

guessing the nearest, and another fine umbrella to the lady guessing the nearest. | guessed the exact number, 158, and Fred. Wells, who guessed 157.

ORIGINAL SUGGESTION FOR PATRIOTIC WINDOW FOR LINCOLN AND WASHINGTON BIRTHDAYS.

Jewelers' Court,

(E. D. GARNSEY, Owner),
51 & 53 MAIDEN LANE, - - NEW YORK.
Ready for occupancy April 1st, 1901.

This modern, twelve-story, absolutely fireproof business building will have solid masonry floors, solid plaster partitions, high marble wainscotings, three high-speed elevators, mail chute, basins in all offices, electric light and everything that contributes to comfort and convenience.

Offices of all sizes are provided and floors may be leased entire or in part, partitioned to suit tenants. Those desiring to carry on light manufacturing can be accommodated, special provision being made for adequate power. Drop hammers will be located in the basement.

Floor plans are now ready for inspection and leases can be arranged by communicating with

VOORHEES & FLOYD,
56 Liberty Street, New York.

DON'T FORGET THE JEWELERS' CIRCULAR PUBLISHING CO.'S BOOK LIST when in want of any technical work in the Jewelry or Kindred Trades.

BUYERS' INFORMATION BUREAU.

Questions as to the makers of certain lines of goods, where to buy certain lines, where certain kinds of work are done, the owners of certain trade-marks and other matters relating to the buying branch of a jewelry business will be cheerfully answered under this department. The reader cannot ask too many questions. All queries received are also answered promptly by mail.

BUFFALO, N. Y., Jan. 25, 1901.

Editor of THE JEWELERS' CIRCULAR—WEEKLY:

Having been referred to you by W. E. Hayward, Attleboro, Mass., I would like to ask you if you could give me the names of some reliable firms who deal in photographic brooches. I use a great number of rolled plate goods and any information on this subject will be greatly appreciated by me. Hoping to hear from you, I remain,

Yours truly,

FRANK J. GOETZ.

ANSWER:—A. E. Siviter & Co., Market and 5th Sts., Pittsburgh, Pa., make such goods as desired, from 12½ cents to a dollar.

POINT PLEASANT, W. Va., Jan. 28, 1901.

Editor of THE JEWELERS' CIRCULAR—WEEKLY:

Will you kindly refer me to some responsible party from whom I can buy electrical supplies, such as wire, lamp, etc.? I would also like to put in my place about a 30-light (16 C. P.) plant, and would like to be referred to some one who can figure with me on this. And oblige,

A. F. KISAR.

ANSWER:—For electrical outfits, address the Tower-Binford Electric & Mfg. Co., Richmond, Va. For incandescent lamps, address the Kentucky Electrical Co., Owensboro, Ky.

BALTIMORE, Md., Jan. 25, 1901.

Editor of THE JEWELERS' CIRCULAR—WEEKLY:

A customer of mine wishes to have the use of some electrotypes of chains, bracelets and different articles of jewelry for a small catalogue. He is willing to pay for the use of them. Could you let me know if you have any of them, or who might have?

Yours,

M. KOHNER.

ANSWER:—Any manufacturer from whom correspondent gets jewelry illustrated in their circulars or catalogues will furnish electrotypes without charge for a catalogue.

WAYNE, Neb., Jan. 21, 1901.

Editor of THE JEWELERS' CIRCULAR—WEEKLY:

I have for repairs a movement to an old floor clock; the pendulum ball and rod are missing, having been lost. Where can I obtain a ball and rod? Would like to know who can make me one. The clock is an old one, made in Glasgow over 100 years ago. By answering above and giving me information asked you will be conferring favor to,

Yours truly,

J. G. MINES.

ANSWER:—If correspondent will address the Seth Thomas Clock Co., 144 Wabash Ave., Chicago, Ill., giving full particulars of what is wanted, the company probably will fill the want.

CLYDE, N. Y., Jan. 14, 1901.

Editor of THE JEWELERS' CIRCULAR—WEEKLY:

Can you refer me to any house where I may be able to purchase a souvenir spoon with a hunting design on bowl and handle?

Yours respectfully,

H. E. CHILD.

ANSWER:—Simmons & Paye Mfg. Co., 129 Eddy St., Providence, R. I., may have such a spoon or will make one.

CHICO, Cal., Jan. 9, 1901.

Editor of THE JEWELERS' CIRCULAR—WEEKLY:

Can you give me any information that will help me to determine, with any degree of certainty, what are diamonds (in rough) in looking over a pan of gravel at the mines? We have a rich gold mine here and some fine diamonds have been found, but the miners, looking for gold, do not hunt for the diamonds. I bought a diamond

last Fall in rough, and after cutting, it was small, ½—1.32 k., and a trifle yellow, but it readily sold for \$60.

Yours truly,

CHAS. A. CLIFFORD.

ANSWER:—We would refer correspondent to "The Hand Book of Precious Stones," by M. D. Rothschild, price \$1.00, for sale by this company. He will find considerable information in it. Perhaps the most important test is specific gravity, a delicate operation undoubtedly. The specific gravity of diamonds is 3.5 to 3.6. The hand book referred to tells how to find the specific gravity of the various precious stones.

DANVILLE, Pa., Jan. 23, 1901.

Editor of THE JEWELERS' CIRCULAR—WEEKLY:

Kindly give me the New York city address of Rest Femer Smith & Co., umbrella makers. Thanking you in advance, I am,

Very respectfully,

H. REMPE.

ANSWER:—43 Downing St., New York.

MINNEAPOLIS, Minn., Jan. 10, 1901.

Editor of THE JEWELERS' CIRCULAR—WEEKLY:

We wish to know who makes emblem buttons for the Order of Eagles. The one we mean is the F. O. E., and we think same is made somewhere in Washington, either Tacoma or Seattle. Thanking you in advance for an early answer, we remain,

Respectfully yours,

JACOBS JEWELRY CO.

ANSWER:—We are informed that Harvey & Otis, Providence, R. I., are the only people who make these articles under the patent of William S. Tarrant, Seattle, Wash. C. G. Braxmar, 10 Maiden Lane, New York, has a patent pending for something of the same kind, but he has not yet put the article on the market.

WELLINGTON, Kan., Jan. 18, 1901.

Editor of THE JEWELERS' CIRCULAR—WEEKLY:

Would you kindly give the names in your next issue of some of the best houses in this country who make a specialty of selling doublets, half-pearls and jobbing stones in general for manufacturing purposes? Greatly oblige,

Yours very truly,

ROSER & Co.

ANSWER:—Albert Lorsch & Co., 37 Maiden Lane; Allen & Jonassohn, 65 Nassau St.; Goodfriend Bros., 13 Maiden Lane; Nordlinger & Mamluck, 24 John St., and Bruhl Bros., 68 Nassau St., all of New York.

WILLIAMSPORT, Pa., Jan. 21, 1901.

Editor of THE JEWELERS' CIRCULAR—WEEKLY:

We have a customer who is going to have a silver anniversary and wants something in the way of a souvenir to take the place of a card at the table. Instead of having a card with the guest's name, she would like some article of silver that could have the name engraved on it. Can you suggest some appropriate article that will not cost over 50 or 60 cents each? Thanking you in advance, we are,

Respectfully yours,

DIENER & Co.

ANSWER:—We suggest the following, prices of which would probably be within the limit mentioned, not including engraving: Glove hook, small nail file, cold cream jar, court plaster case, dressing comb, stamp box, key ring, pencil holder or tie clasp.

THE RAMBLER'S NOTES

WHAT THE RAMBLER SAW AND HEARD AMONG THE DEALERS IN ART POTTERY, CUT GLASS, BRONZES, ETC.

A NEW AMERICAN POTTERY. AN entirely new ware of American manufacture, just introduced by the J. B. Owens Pottery Co., Zanesville, O., is called the "Iris," and is not only unlike any line heretofore on the market but possesses artistic features that should make it rank with the finest American pottery. Like the "Utopian" ware of the same firm, the "Iris" has a body of blended colors, but instead of the dark hues of the former the body color of the new ware shows light and delicate tints of pearl blue, pink and similar shades. The body is highly glazed and is ornamented with fine figure work—animals, flowers or birds. The pieces now displayed at the company's New York salesrooms, 68-70 West Broadway, include a large number of vases in various sizes and shapes.

ROYAL BONN and his own "A. K." Limoges china are the leading lines among the samples offered by C. L. Dwenger, 35 Park Place, New York. In the china a large number of decorations are shown in standard effects, there being no radical departure from the finer decorations of former years. All treatments, from the daintiest of floral sprays to pronounced flower bands, are here to be found, while the prevailing Art Nouveau influence is seen in some floral borders and styles that ornament a full line of china. All the new regular lines of Royal Bonn are here displayed.

L. STRAUS & SONS last week began to show their import samples for Spring, and now have on display at their warerooms, 42-46 Warren St., New York, complete lines of all the pottery, statuary, art goods, bronzes, china and bric-à-brac which they carry for the jewelry trade. In their own Limoges and Carlsbad china and Rudolstadt pottery they are showing more varieties and finer assortments than ever before; while their cut glass line was never larger at this season of the year than it is at present.

THE RAMBLER.

THE CARRARA MARBLE INDUSTRY.

(Continued from Jan. 30, 1901)
ANNUAL SHIPMENTS.

Statistics showing the shipments of marble for the past 10 years are given in the following table:

Year.	Total shipments. Tons.	Total value.	Declared value of shipments to United States.
1890	161,750	\$2,816,900	\$364,130
1891	159,455	2,771,200	440,401
1892	169,813	2,980,000	578,279
1893	144,682	2,073,000	691,503
1894	130,077	2,135,600	570,495
1895	150,618	2,592,800	679,128
1896	158,231	2,750,000	681,864
1897	157,644	2,732,000	627,528
1898	179,096	3,062,000	539,952
1899	204,813	3,475,000	557,234
Total	1,615,579	\$27,382,500	\$5,730,714

As will be seen by the foregoing, exportations to the United States during the period given slightly exceed 20 per cent. of the total shipments. No other country, with the exception of Italy, is so large a buyer. A record of shipments by countries is not available, but, from careful investigation, I believe the following proportions are approximately correct:

	Per cent.
United States	20
England and colonies	15
France	13
Germany	8
Spain and Portugal	5
Italy	20
Other countries	19
Total	100

SELLING PRICES AND EXPENSES OF PRODUCTION.

So much depends on color, quality, etc., of the various marbles produced at Carrara, that it is only possible to give the range of prices approximately. The ordinary varieties are quoted from 97 cents to \$1.60 per cubic foot f. o. b. Leghorn; the finer grades of statuary blocks, from \$3.50 to \$7. A variety known as "Bianco P," a fine white grade without veining, the best of which is produced at the Massa quarries, sells at from \$1.80 to \$4. The finer grades of colored marbles sell as high as \$7 per foot.

In considering the cost to the exporter, many things must necessarily be taken into account. Location and proximity to transportation facilities, soundness, depth or thickness of the various veins, with consequent ability or inability to produce blocks of large size, amount of labor necessary to properly open the quarry, are all

important factors. A fair estimate of the average cost of actual quarrying is, I believe, 50 cents per cubic foot. Taking this as a basis, the other items of expense are made up of hauling charges, municipal toll, dressing blocks, lighterage, etc., and the total average cost per cubic foot f. o. b. Leghorn is ascertained to be about as follows:

	Cents.
Hauling to Marina by quarry railroad, per cubic foot	11
Municipal toll	2½
Dressing blocks at Marina	3½
Loading on lighters at Marina	2
Lighterage to Leghorn	12
Cost of quarrying	50

Total cost per cubic foot..... 81

As has been stated, the municipality leases the quarries for a merely nominal sum; it, however, exacts a toll on all block marble shipped of approximately 2½ cents per cubic foot, and on sawed slabs at the rate of 7 cents per ton, or half a cent per cubic foot. Manufactured marble, statuary and the like, are exempt from this tax.

COLORED MARBLES.

Many varieties of colored marbles are also found on the mountains surrounding Carrara. Two varieties of blue, dove colored marble, known as "Bardiglio" and "Pavonazro," are well known in the United States, the latter especially being largely used and commanding a high price. Some new and very beautiful fancy marbles have recently been discovered near the villages of Gragnana and Castelpoggio, north of Carrara. In the vicinity of Castelpoggio, a very fine variety of red marble is quarried. Some varieties of the well known black-and-gold marble are found at Monte d'Arni and Foce, near Carrara. It is similar to that found at Porto Venere, in the Gulf of Spezia, having a densely black ground crossed in all directions by yellow veins. Besides these colored marbles, some fine onyx has been discovered at Monte d'Arni. These quarries are not now in active operation, it being found unprofitable to work them under present conditions. The merchants and exporters of Carrara also deal largely in the well known Siena yellow marble and the various varieties of Numidian marbles. The latter are brought from the quarries back of Oran, on the northern coast of Algeria.

The extent of its commerce with all nations in its own particular line, with the variety, quality and beauty of its marbles, justly entitles Carrara to stand at the head of the marble-producing centers of the world. It has occupied this position for centuries and bids fair to continue to do so for many more to come.

We are considered to have the most "unique" assortment of high-class Art Novelties shown to the trade this season.

MEDALS IN THE CONGRESSIONAL LIBRARY.

AMONG the very many valuable collections of art and literature donated to the Congressional Library none will be of more interest to the curiosity seeker than the collection of 50 Holland medals presented to the library by Consul Newell, at present located at The Hague. These medals are all, with one exception, of bronze, and vary in size from 1x1 inch to 3½x3½, with two plaquettes still larger, the dates ranging from 1884 to 1900.

The collection of Wilhelmina medals is perhaps most interesting at the present time, although they, with one or two exceptions, are not the best from the point of workmanship. One of these, the inauguration medal, represents a very young child, bust, face in profile, 2x2 inches, the reverse side showing a laurel wreath in relief on a perfectly plain background. Another of these Wilhelmina medals is one that was presented by Her Majesty to the officials of the palaces and the castles, at the time of the inauguration; it is 1½x1½, carries on its face profiles of the Queen and Queen-Regent, both very clearly cut; the reverse side is one of the prettiest of the collection, showing at the

lower part of the medal a crown, mace and sword lying on a cushion, from the back of which spreads a wreath of laurel over the upper part of the medal. Another, commemorative of a visit of Wilhelmina to the Province of Limburg, in 1895, bears a profile of a girl of 15; on the reverse is a shield bearing the royal coat of arms on a plain background. A plain engraved coin medal is not worthy of special mention, as the features of the Queen are very indistinct. One of the largest and heaviest of the Wilhelmina collection is a medal of Her Majesty, bearing date of 1890; on the face is a profile of a girl of 10 years of age; the flowing hair and the features are particularly well worked out. The reverse side is very elaborately carved in an inscription and flowers, all in relief. There is also a portrait medal, at about 15 years of age, and a medal offered to newspaper correspondents on the occasion of the inauguration bears a female figure clad in armor and wearing a helmet, with an appropriate inscription on the reverse side. Some very fine heraldic work is shown on a medal commemorative of the 14th anniversary of the Queen, held in Antwerp in 1894.

The collection contains two plaquettes; one offered by the city of Amsterdam, on the occasion of the inauguration of the Queen, in 1898, is 2½x4. The design represents in the background the front of the cathedral, in front of which lies an immense lion, and on the left a female figure holding aloft a palm and surrounded by anchors and chains is very clear, but is very slightly raised. The back of this plaquette is perfectly plain. The other is commemorative of the regency of Her Majesty Queen Emma. It is 2½x3½ inches. The designing is divided into two halves, upper and lower; in the lower half is a representation of the palace, with a seated female figure on the right and a standing one on the left, the standing one holding up on the upper half a medallion portrait of the Queen, the upper corners being filled in with two cherub figures, the whole being surmounted by a scroll, in the center of which is a crown, and on the ends of the scroll the dates 1890-1898. The reverse side carries a suitable inscription.

There are 10 medals offered at different times by the Riflemen's Association, and while all are small, 1½x1½, the work on many of them is particularly fine. In one is a very fine piece of work, in a ruff around a profile head, similar to those worn in the time of Elizabeth; another shows a flying figure of Victory, passing over a hunter in Dutch costume, wading through a marsh. The smallest detail in all these medals is perfect, and in the one for 1897 is shown a very fine figure of a huntsman on one knee, finger on the trigger, with gun raised ready to shoot. The detail work in this is excellent.

In the collection are several exhibition medals, among them being the Society Exhibition of 1890, representing a female figure, with wings outstretched, protecting the kneeling figures of a miner and a blacksmith, both typical of labor. The Batavia Exhibition medal of 1893 bears a female figure, representing Success, flying over the city. The detail work on this medal is so perfectly done that it reminds one of

GÉRARD, DUFRAISSEIX & ABBOT,

29 BARCLAY STREET,

NEW YORK.

the veiled statue, the limbs showing perfectly through a gossamer drapery. Another, showing very fine work, fully equal to any done in marble, is the Fishery Exhibition medal of 1892, 2x2 inches, bearing a figure of a fishwife, whose features, hair and poke bonnet are perfect. The reverse side shows a relief composed of various fishing utensils used in Holland. There is also a fine Paris Exposition medal by Georges Lemaire. The Exhibition medal of Dordrecht, 1897, 3½x3½, is in German silver, and shows in the foreground two figures, one of an old Dutch burgher extending the hand of friendship to a modern man; in the background are representations of old Dutch vessels. Among the most notable medals of the entire collection is the Baker medal of 1896, not only for the fine carving on the face in the griffins bearing a shield, but more especially for the fine detail work displayed in the wreath of cornflowers, poppies and wheat on the reverse, which seem only to need color to have life. Among other exhibition medals in the collection is the Nimrod medal for 1898, and another of 1899, both showing hunting dog heads and hunting equipment. And along with these one must not forget the Shooting Society medal of "Bogardus"; the diameter of the medal is only 1½ inches, yet in this small space is a perfect forest scene, with horse, dogs and man in the foreground, a deer standing among the trees on a slight elevation and a castle on a hilltop in the distance, all clear, even to the leaves on the trees. Especially fine detail work is seen on the

Exchange medal of Utrecht, 3¼x1¼, representing the buildings in fine relief; the Sailing Society medal of Holland. Souvenir medal of the King of Bohemia, 1896; 50th anniversary of the Polytechnic School at Delft, 1898; Life Insurance of Utrecht; Active Charity Society, Amsterdam; Sporting Terrance medal, a Capella Koor; the Limburgia Society, 1888; Society of Art and Friendship, of Rotterdam; 20th anniversary of the establishment of the S. S. Company, Nederland, and in addition to all of these one must not forget other splendid portrait works, as shown in a medal commemorative of the death of William III.; Prof. Asser, the well known sculptor; another William III., in military uniform; a portrait bust of C. H. Backer, one of the Grand Duke of Luxemburg, on his accession to the throne; Dr. Wm. Julius; profile of William III., on his 70th anniversary, some of this work being modeled by the celebrated artist, L. Jünger.

Among the peculiar medals of the collection may be noted that of the University of Utrecht, in 1894, in which the very odd conceit is displayed of depicting the entire college buildings from an altitude, so that the roof outline of the buildings is given, and done so perfectly that one feels that he might almost be looking at a photograph taken in the same position; another variation is an oval medal, 1½x2½, issued by an association to favor the visiting of strangers to Nymeger; in the foreground is a castle battlement, bearing on the wall the coat of arms of the city and a crown. An oblong, 1½x2¾, inviting strangers to Haarlem, shows a drawbridge

over a moat to a castle in the background, all very clearly defined and in relief. There is also a small medal of a similar design.

These medals are all the work of C. J. Begeer, a silversmith of Utrecht.

Theus Bros., Savannah, Ga., designed and executed the handsome loving cup presented to Col. A. R. Lawton, on Jan. 19. The cup is of silver, lined with gold, is nine inches high and eight inches in diameter, with three handles representing a grape vine; a band of grape vine, leaves and grapes in high relief, encircles the cup near the rim; the handles and ornamentations are in French gray finish; the cup is highly polished and bears the following engraving on the first panel: "1894-1900, Testimonial of Esteem to Col. Alexander Rudolph Lawton, from First Regiment Infantry, Georgia State Troops, Jan. 19, 1900"; on the second panel, "Field and Staff First Battalion, Co. H, German Volunteers; Co. I, Oglethorpe Light Infantry; Co. K, Savannah Cadets; Co. L, Irish Jasper Greens; Co. M, Republican Blues"; on the third panel, "Second Battalion, Co. A, Savannah Volunteer Guard; Co. B, Savannah Volunteer Guard; Co. C, Savannah Volunteer Guard; Co. D, Savannah Volunteer Guard; Third Battalion, Co. E, Burke Light Infantry; Co. F, Kell Rifles; Co. G, Brunswick Riflemen." Theus Bros. have on exhibition in their window the first and second contributions to a proposed free library in Savannah, Ga., consisting of a dime and a check for \$1; both gifts are in gilt frames.

THE J. D. BERGEN CO., 38 MURRAY STREET, NEW YORK.

Opening and Closing the Holy Door.

THE most interesting ceremony of the Roman Catholic Church at the closing year of a century—the opening and

GOLDEN HAMMER,

WITH WHICH THE POPE KNOCKS AT THE HOLY DOOR, BEFORE THE OPENING OF THE DOOR.

closing of the Holy Door of St. Peter's Cathedral, at Rome—is the occasion for the use of two magnificent tools of solid gold, a hammer and a trowel, handsomely embossed and etched, made especially for this purpose. The opening ceremony was witnessed a year ago, and the closing took

place on Christmas Eve. The ceremony of opening the Holy Door is declared to be symbolical of the fact that the Church is open to all men so long as they go there after a thorough and sincere conversion.

The Pope, who is seated on a raised throne in front of the large door in the middle of the grand portico, remains stationary for a brief while, until the Prince of the Throne presents to His Holiness the golden hammer here illustrated. This the Pope takes in his right hand, and, rising from his throne, goes and knocks at the Holy Door. His clergy follow him, each with a candle in his hand. His Holiness, after knocking three times at the door, says in Latin: "Open to me these doors of justice!" Then the choir adds: "This is the door of the Eternal One, and the just will enter in," etc.

The three knocks which he gives are said to represent the three continents—Europe, Africa and Asia—to which the Pope offers the treasures which he is the medium for dispensing. The three strokes also are looked upon as symbolizing the joy that the jubilee causes to the faithful of Heaven, Earth and Purgatory.

The closing of the door is a very similar ceremony to the opening, and at this the trowel is used. The greatest solemnity is observed, and thousands of privileged pilgrims flock to the cathedral to be witnesses. His Holiness, taking the trowel, lays the first brick for the closing of the door, all the Cardinals, Monsignors and other dignitaries in Rome being witnesses of the operation. The bricks used for this purpose are about double the ordinary

size, being covered with a thin layer of plate—in some cases of silver and in others

GOLDEN TROWEL,

WITH WHICH THE POPE LAYS THE FIRST BRICK WHEN THE HOLY DOOR IS CLOSED WITH MASONRY.

of gold. They bear in relief the Papa arms and the inscription: "Leo XIII Pont. Max. Aperuit et clausit." The drawings from which the engravings of the hammer and trowel were made were kindly loaned to this journal by the New York Tribune.

Vol. XLII. No. 2.

THE JEWELS OF THE NEW QUEEN OF ENGLAND.

WHEN the present Queen Alexandra went to England as a bride her father and mother were not King and Queen of Denmark, though there was every prospect that they would be so in course of time; and, in point of fact, a very short period elapsed after their eldest daughter's marriage before the expected accession took place. They were anything but rich, and their children were literally accustomed to plain living and high thinking, the young princesses, when emancipated from lessons, helping their good mother, and stitching for themselves even more than the daughters of the average English country gentleman of that day. Consequently, it was hardly to be expected that Princess Alexandra's jewel case was very well filled before her marriage, and this was an unspoken but generally recognized reason why precious stones figured largely among her wedding presents. She is, moreover, fond of jewels, and knows that diamonds and pearls are peculiarly suitable to her special style of grace and beauty; but innate good taste leads her to avoid bijouterie that is almost barbaric in its gorgeousness and that is worn in all its splendor by some of the fashionable women of the period.

To Princess Alexandra, as to all her other daughters and daughters-in-law in earlier days, Queen Victoria gave a splendid

parure of opals and diamonds. Her Majesty was very fond of opals, and in spite of the ancient superstition about their being un-

life. Bereavement comes to every family under the sun, but from bitter and heart-rending sorrows such as have pursued the Austrian and Spanish Royal races, the English has been comparatively free.

A magnificent pearl and diamond necklace which the Princess frequently wears was one of her husband's first presents. It consists of circular clusters of diamonds with a large pearl in the center of each, and they are connected by festoons of diamonds. A large pear shaped pearl of the finest quality forms a pendant from each of the three principal clusters. These can be taken apart and worn in various forms, each being a perfect ornament in itself.

Of jeweled crosses the Princess has several, but, perhaps, the one she prizes most highly is Queen Dagmar's cross, which is an exact replica of one that was made for a Queen Dagmar late in the 12th or early in the 13th century, and has been an heirloom in the Danish Royal family ever since. The original contains relics of Canute, the patron saint of Denmark, and is inscribed with the name of the Queen it was made for, whose memory is kept green, not only on account of her traditional virtues, but by at least one girl of every generation of her descendant's bearing her name. The Princess Dagmar, who was the Princess of Wales's next and favorite sister, is the Czarina Dowager of

Lancaster Watch Material

It is a fact that we are in a better position to furnish the watchmaker more promptly than any other jobber in the United States with the following material: Lancaster, Aurora and Hamilton. We are right at the seat of operation. We have the largest and only stock of Lancaster watch material in America. We can fill your order for **Waltham, Elgin, Hampden, New England, Columbus, Illinois, Rockford, Seth Thomas, Howard, Century, Trenton, New York Standard and Swiss** as quickly as any house in this country.

We Never Sell Imitation Material for Genuine.

We have a special made balance staff and a special mounted hole jewel. We can furnish you with these balance staffs for all of the above-named watches for **\$18.00 per gross**. Every mounted jewel is cemented and trued and we sell them for **\$7.50 to \$12.00 per gross, less 10 per cent. for cash**.

Give us a trial at your mail business and we will demonstrate our promptness.

vices in brilliants. The other is the tiara of diamonds consisting of 365 splendid stones, each of which was the gift of a personal friend of the Princess, on her silver wedding day. The shape is that of an old Roman coronet, and it was thought more suitable to make her an offering in that form than for each friend to make a smaller present.

Perhaps the handsomest neck'ace the new Queen has, next to the Prince's present on her marriage day, is one of diamonds and pearls, with a pair of earrings to match, which was a wedding present from the Corporation of the City of London, but the diamond and ruby neck-

An opal and diamond bracelet, interspersed with small emeralds, was an offering from Manchester ladies, and their sisters of Leeds gave one of particularly fine diamonds. The Duke and Duchess of Saxe-Coburg-Gotha seem to make a specialty of fine sapphires and continually give them in presents. To the Princess of Wales for her silver wedding they gave some splendid ones set with diamonds in a brooch. Another silver wedding present was the wonderful butterfly, which was the offering of the Grand Lodge of Free Masons. It is a most brilliant and gorgeous glorified Psyche, consisting of 217 Brazilian diamonds of the finest luster, the eyes

Burglars Invade the Store of Richardson & Hammond.

LYNNVILLE, Tenn., Feb. 5.—Excitement prevailed here last week, when it became known that Richardson & Hammond's jewelry store had been entered during the night of Feb. 1 by burglars and several hundred dollars' worth of jewelry carried off. A plate glass window in front was broken, showing where an entrance was effected. About 9:30 o'clock Dr. W. E. Scott, whose office is over the store, heard a noise and went down to investigate, but failing to see anything to arouse his suspicion, thought nothing further of it until the discovery next morning. lace she often wears runs it very close, and was the gift of the late Czar and her sister, the Czarina. A very fine one of pearls and diamonds was presented by the late Grand Duke of Hesse and Princess Alice.

Her collection of bracelets is immense, and besides those that belong to sets of jewels she has one that is a most interesting memento of her marriage, and was presented by the eight daughters of English peers who were her bridesmaids, and though strangers on that eventful day, were speedily admitted to the circle of her friends. It is of gold, richly set with brilliants and divided into eight compartments, each of which contains the miniature portrait of one of the ladies, and on the reverse side her initial in diamonds on Garter blue enamel.

being magnificent rubies. Jewels, after all, are only glittering stones, and even a Princess is but a woman, though when she is a good wife and mother, like the Princess of Wales, she is worth more than all the gems of Golconda. She herself, as all the world knows, esteems her children and grandchildren as the jewels of her life, and her happiest moments are spent in their companionship.

Dingelhof Bros. File a Petition in Bankruptcy.

WILMINGTON, N. C., Feb. 7.—Dingelhof Bros., jewelers, filed a petition in bankruptcy here to-day. The liabilities are \$2,800; assets, \$2,200. Hayden W. Wheeler & Co., New York, are the largest creditors, for \$500.

were telephoned for from Nashville, but the message was not received in time for them to reach here as expected.

No clue has as yet been found as to the guilty parties. The proprietors estimate their loss at between \$350 and \$400, and several others who had jewelry in the shop for repairs are losers.

D. Gundling & Co. File a Petition in Bankruptcy.

TRENTON, N. J., Feb. 6.—D. Gundling & Co., who several years ago made a sensational failure in New York, yesterday filed a petition in bankruptcy in the United States District Court. The stated liabilities are \$60,796.47 and the assets \$6,379.

Extracts from the Chairman's Speech of Interest to the Jewelry Trade.

KIMBERLEY, Jan. 5.—The twelfth ordinary general meeting of shareholders of the De Beers Consolidated Mines, Limited, was held at the company's office on Friday. Francis Oates presided, and there were also present: H. M. Penfold; F. Hirschhorn, and qq A. Beit, J. Wernher, H. Hirsche, M. Michaelis, L. Breitmeyer, L. Reyersbach; H. P. Rudd; C. E. Nind; D. J. Haarhoff, and in trust for H. J. Lange and J. E. Orpen; D. Harris and qq Henry Barnato, Barnato Bros., Jack Joel, S. B. Joel, Louis Abrahams and Alfred Abrahams; T. Tyson; A. W. Weatherby, qq M. Joseph, A. D. Joseph and G. H. Bonas; H. Beck; Isidore Mendelssohn; A. Brink; Alpheus F. Williams; W. H. Beddy; C. F. Beaton, qq A. Mosely; Walker Marshall; F. Carstairs Rogers; T. Rowe English and qq Robert English; Thomas Shields, G. W. Compton; A. Reyersbach, qq Harry Mosenthal, G. J. S. Mosenthal, William Mosenthal, Isidore Dreyfus; O. D. Wright; F. J. Gardiner; qq John Morrogh; P. Peiser and qq K. C. Peiser; A. Aronson; Leon Sutro and qq A. Dunkels; Leopold Herz; Lionel Abrahams, qq Reuben Abrahams; E. F. Rayham and W. Pickering, secretary.

Mr. Sutro proposed that the directors' report, balance sheet and profit and loss account be taken as read. This was seconded by Mr. Haarhoff and unanimously agreed to.

The chairman in his speech said among other things:

Turning first to the directors' report, which deals immediately with the balance sheet and profit and loss account, you will notice that we have made a profit on the year of £581,148 only. Well, that sum, as compared with previous years, is rather a small one. But being residents, most of you, you will readily understand why the profit is so very much less than usual. If you turn to the credit side of the profit and loss account you will find that our revenue from diamonds during the present year has been about 2,000,000, while the year before it was 4,000,000. As practical men, you will understand that the establishment of a great concern like this necessitates a very large expenditure, and that having to pay all our ordinary standing charges for the whole year out of half a year's revenue, so to speak, and in addition having a number of extraordinary expenses thrown upon us—like our war expenditure, amounting to £167,000—and also making allowance for the ordinary amount set down for depreciation—all these things together have made a great change in our balance sheet as compared with the year before. They also explain why the directors, much to the dissatisfaction, I fear, of shareholders at a distance, thought it unwise to pay a dividend during the year. It is true that there was a balance of nearly £500,000 profit made, but that would have been insufficient for an ordinary dividend such as we have been accustomed to pay; and in the circumstances of the country the directors deemed it wise to conserve their resources, in view of eventualities, and resolved to pay no dividend. I should like at this stage to state that the directors have just declared a dividend for the first six months of this financial year, ending Dec. 31, and not, as wrongly advertised, for the six months ending June 30. So that at any rate we are now in a better position than when we last met, thanks to the military authorities having relieved us from the state of siege, and thanks also to their co-operating with us as far as possible in allowing supplies to come forward to enable us to carry on some portion of our work.

As the directors' report shows clearly, we practically did nothing during the siege, and subsequent to the siege, up to the end of the financial year, very little work was done. But since then there have been improved transport facilities, fuel has been allowed to come in, and to some extent we

have been able to procure native labor. But even at the present time we are not working full time; in fact, our operations are all more or less curtailed. Under the circumstances we must be thankful for mercies received, in that we have been able, after all, to get such returns for the past six months as have justified the directors in declaring a dividend. It was at one time hoped that we should have been able to pay, in addition to the dividend, a bonus to shareholders, but we have not been able to increase our operations to the extent that we anticipated, and consequently it has been thought prudent not to carry out that intention. It is possible, however, later on, that if circumstances improve, some acknowledgment in the way of bonus may be made to the shareholders in connection with the past year for which they have received no dividend.

Of course, the figures before you in the balance sheet, and profit and loss account, are all large, and I would like to point out a matter which has not been explained in the general manager's report, but may, perhaps, be of interest to you. You will notice that the working expenses per load in nearly all the mines have increased during the past year. I think you will see that such an increase was inevitable, since we have had greater difficulties in working and we have had to pay our officers for supervision at times when we were unable to do any work at all; the expenses have been spread over a fewer number of loads, and that would naturally result in a higher working cost per load. We have also had to use English instead of colonial coal, which, on account of the increased railage charges and the high cost of fuel at the coast, has added considerably to our expenses. I may remark that it has never been the desire of the directors, and certainly not of the chairman, to bring down the cost of working by diminishing the wages of the workpeople. We hope that the cost of working will be lowered by improved methods and improved machinery.

It is sometimes said, "Give a dog a bad name and hang him." Traveling about the country one sometimes hears sneers being cast at Kimberley and the state of affairs in Kimberley. Well, I have lived here for 25 years, and I can safely say I have never known the condition of the working classes in Kimberley at any time so good as at the present. In spite of all that has been said about the action of the company in trying to work more systematically and economically, nothing has been done in the direction of paying lower wages, and I think if we take the wages paid to our workpeople during the past seven years they will compare not unfavorably with those received by the same class of people in any other part of the country, not excepting Johannesburg. You will find from the general manager's report that his motto is "Excelsior." He has engaged a most competent assistant in Mr. Robbins for the purpose of carrying out an electrical installation, the effect of which will be, we believe, in the direction of economy and to make the cost per load less. Neither the directors nor the general manager would be doing their duty if they did not adopt improvements of this kind, but in the other direction in which it has been suggested so often that we contemplate changes, viz., reducing the wages of our employes, public rumor is altogether wrong. This applies to natives also. We pay natives a considerably higher wage than any other employer in South Africa.

I trust that the present temporary interruption of railway traffic will soon be overcome and that our work will go on with greater energy than we have been able to put into it just lately, so that by the time of the shareholders' next meeting our work will have increased to a very large extent. We have a great many diamonds to produce to bring up the production to the normal amount. Allowing for the six months of last year when we produced practically nothing, we have a great deal of leeway to make up, and I believe the general manager is making his plans to increase the working of both the Kimberley and De Beers mines and to provide for the working of Bultfontein, and later on, perhaps, Dutoitspan; and with due regard to the protection of the diamond market we shall increase our operations. For my own part, as an old resident of 25 years' standing, I believe the prospects of Kimberley as a town and a community were never so bright as to-day. The better price which we have obtained, and are likely to obtain, for our diamonds will justify us in working our poorer mines, and consequently there will be employment found for a greater number of people than at present. The future of Kimberley, therefore, is assured, and there is no fear of that collapse which some people professed to foresee

when the whole of the mines passed into the hands of the De Beers Company. There is no doubt as the world gets more civilized and the circle of wealth becomes wider, that the world's demand for diamonds will go on increasing, and, consequently, while the company will have to use discretion in regulating the production to avoid crises of any kind, it seems to me certain that to supply the world's needs in respect of diamonds, more work must be done by De Beers, and more work means employment of more people, and the prospects of Kimberley will consequently be better, and, to my mind, they were never so bright as to-day.

Mr. Haarhoff proposed that the following gentlemen be re-elected directors for the ensuing year: C. E. Atkinson, Carl Meyer, F. Baring-Gould, John Morrogh, G. W. Compton, Harry Mosenthal, Sir Donald Currie, C. E. Nind, Robert English, F. Oates, T. E. Fuller, Captain H. M. Penfold, D. Harris, C. D. Rudd, L. S. Jameson, T. Shields. Captain Tyson seconded and the motion was carried.

The chairman remarked that during the year changes had been made in the alternates of both their life governors. The alternate directors for them now were Mr. Hirschhorn, who was a decided acquisition to the board and an old Kimberley man, and H. P. Rudd, son of C. D. Rudd, also an old Kimberley man.

Mr. Brink moved and Alpheus Williams seconded: That in accordance with provisions of clause 80 of the articles of association the sum of £9,087 2s. be voted to the directors, other than life governors, as remuneration for their services.

C. G. Theiling, Chester, S. C., will open a branch store in Laurens, S. C., this month.

Death of A. H. Simon.

ST. PAUL, Minn., Feb. 6.—Adolph H. Simon, for many years the proprietor of the jewelry store at E. 7th and Jackson Sts., died Monday afternoon at his home, 60 E. Summit Ave. He was in poor health for nearly a year and gradually declined. Paralysis was the immediate cause of death. Mr. Simon is survived by a widow.

About one year ago Mr. Simon closed out his retail stock and went into the wholesale jewelry business, locating his establishment at 414 Robert St. He was a member of Union Lodge, No. 48, Odd Fellows, and the members of the lodge are requested to meet at 8 o'clock to-night in Odd Fellows' hall, 5th and Wabasha Sts., to make arrangements for attending the funeral. Mr. Simon was a member of Ancient Landmark Lodge, No. 5, A. F. and A. M. The funeral will take place at 2.30 P. M., to-morrow, and will be in charge of Ancient Landmark Lodge.

W. F. Kirkpatrick Brings a Thief to Terms.

ST. JOSEPH, Mo., Feb. 3.—A daring attempt was made yesterday to rob the diamond store of W. F. Kirkpatrick of a pair of valuable gems. A richly dressed young man asked the proprietor to show him some of the best stones in the store, and in a very familiar way expressed his opinion of the different gems displayed before him. He appeared to be a good judge of diamonds, and as the proprietor turned his head for an instant two valuable loose stones disappeared from a paper. The discovery was instantly made by the proprie-

tor. Very quietly he folded up the papers, leaving the one from which the stones had been stolen until the last.

Then saying carelessly that he had something else to show him, the proprietor turned to a drawer in his desk, and, producing a revolver, said: "This is the gem I want you to see. Please return those diamonds."

The thief protested that he had been insulted, but simultaneously dropped the stones into the paper and was permitted to depart.

City Council of Leadville Considering Auction License Law.

LEADVILLE, Col., Feb. 3.—The matter of the city ordinance regulating the amount of the license to be paid by merchants desiring to have auction sales of their stocks of goods will likely come up for consideration. While the city won its case against Charles Roth, wherein the latter applied to the District Court for an injunction restraining the city from interfering with his auction sale of his stock of jewelry, the City Attorney, also County Attorney Cavender, who, owing to the illness of City Attorney Bouek, tried the case in the District Court, have advised the City Council to reconstruct the ordinance with regard to auction sales, they believing that the ordinance as it now stands is illegal, in that the license of \$100 a day is excessive and will not stand a test. The City Council will probably amend and reconstruct the ordinance in such a way that it will stand the test of the courts.

PEARLS.

Prepared:

When you are in need of anything unusual, you generally want it in a hurry. That is the time to remember that our stock is not only replete with diamonds, pearls and precious stones of the grades usually carried, but that it contains gems of a character that cannot be duplicated.

We have extraordinary facilities for securing the best in the markets of the world. The condition of our stock evidences this fact at a glance.

Infancy Not a Defense in Suit for Payment of Bill.

TROY, N. Y., Feb. 5.—Justice Fursman, Feb. 2, denied a motion to open a judgment taken by default against Mrs. Sadie Clark Decker, of Hudson, by William B. Joseph, jeweler, of the same city, for \$155.

Mrs. Decker is said to be a member of a wealthy family in Columbia county, and the jewelry in the case was purchased, it is said, while she was a minor and without the knowledge of her family. She married subsequently, and when notice of an action against her for the amount due was served, she turned it over to her husband, so her attorney, L. R. Tilden, of Hudson, told the Court, and relied upon him to attend to the matter further. They went on a wedding trip and forgot all about the claim until their return, when Mrs. Decker found judgment filed against her.

Attorney E. F. McCormick opposed the motion on behalf of Mr. Joseph and said the bill had stood a long time before judgment was taken. Mr. Tilden replied that the jeweler should have known better than give credit to a minor, especially when that minor was not in need of credit. He should have notified her family.

"Do you mean to set up the defense of infancy for Mrs. Decker?" asked the Court.

"I think we will have to," replied Mr. Tilden.

"Then your motion is denied," said Justice Fursman decisively. "The young woman got the goods, enjoyed their use, got married, turned the affair over to her husband, went off on a wedding trip and forgot all about it, and now comes into court through counsel and pleads the baby act. It won't go."

Death of A. D. Harlow.

BELFAST, Me., Feb. 8.—A. D. Harlow, of Winterport, one of the best known musicians in Maine, died at his home there, Jan. 26, of paralysis, aged 65 years. He was taken ill only the day before. The deceased was a native of Buckfield. He was a director of the Bangor band at three different periods, and was a veteran of the Civil War, having served as a musician and band director in the Second Maine. After the war he returned to Bangor, where he led the Bangor band until 1876. Upon leaving Bangor, he went to Pawtucket, R. I., where he directed the local band for some years. From Pawtucket, where he remained two years, he went to Elgin, Ill., where he was engaged as leader of the Elgin Watch Co.'s band. In 1898 he went to Winterport, where he lived until the day of his death. He was engaged in the jewelry business there and also directed the Winterport band. He leaves a wife and two children.

In a fire in Plymouth, N. C., N. B. Yeager, jeweler, lost \$800; insurance, \$500.

**Jewelry Seized by Creditors of Charles
E. Katsch Belonged to Him.**

NEW HAVEN, Conn., Feb. 6.—Referee
Newton to-day decided that the stock of
jewelry seized by creditors in the store of
Charles E. Katsch, jeweler, Washington
building, on Church St., does not belong
to the American Jewelry Co., as was al-
leged, but to Mr. Katsch, and that the
creditors have proper claim upon it in the
bankruptcy proceedings that are now pend-
ing. The claim was made by Mr. Katsch
that the jewelry belonged to the American
Jewelry Co. A petition was thereupon
presented that the stock be taken out of
the custody of the trustee, Samuel Good-
man. The matter has been argued before
the referee for two days. When the law-
yers finished to-day Referee Newton
denied the motion for the removal of the
trustee. Mr. Katsch will be examined by
the creditors on Monday, Feb. 11.

Referee Newton in his decision upholds
the trustees, marshal and creditors in their
action in the matter, and furthermore,
declares that the American Jewelry Co.
were one on paper only and were created
for fraudulent purposes. The trustees,
marshal and creditors were represented by
Kleiner, Strouse & Tuttle, while the jew-
elry company were represented by attor-
ney J. B. Tuttle.

Papers in suits for claims aggregating
\$2,350 on Charles E. Katsch, of the Amer-
ican Jewelry Co., were filed in the Super-
ior Court to-day by Deputy Sheriff DeJon.
The suits were brought through attorney
David Strouse, representing Henry Freund
& Bro., New York, whose claim is for
\$850, and Gattle, Ettinger & Hammel, New
York, whose claim is for \$1,500. A large
quantity of jewelry was attached to secure
each of the cases. In the complaint it is
alleged that the goods in question were
purchased last September.

Some of the creditors, through their at-

torneys, claim that Katsch disposed of his
jewelry store on Church St. to the Amer-
ican Jewelry Co., and that the company
were formed with some of Katsch's family
as holders of some of the stock. It is
claimed that the property was worth much
more than it was sold for. It was dis-
posed of for \$1,800, and some of the credi-
tors state that it was worth \$10,000.

**Examination into the Affairs of Abraham
Frackman.**

The examination into the affairs of
Abraham Frackman, 379 Grand St., New
York, against whom an involuntary peti-
tion in bankruptcy was filed, as told in
THE CIRCULAR-WEEKLY, Jan. 23, has
been going on the past two weeks, being
conducted by Epstein Bros., who repre-
sent the creditors. This matter is due to
come up in the United States District
Court, to-day.

It was claimed that Frackman disposed
of part of the stock in his store just be-
fore the failure, with intent to defraud
creditors. Frackman claimed that the
goods, worth about \$1,000, disappeared
from the store in some manner he could
not explain, during the time he was not at
the store and while it was in the hands of
the City Marshal who made an attachment
or the receiver appointed by the United
States District Court.

Frackman testified in his examination
that when he left the store, Jan. 14, there
were gold watches, diamonds and jewelry
there as usual, but he did not know how
much in value. City Marshal Samuel I.
Abramson told of serving two attachments
on Jan. 14. He took nothing from the
store, but made an inventory. There were
no gold watches nor diamonds to be
found.

Charles Sherwood's jewelry store, in
Jerry City, O., was burned out Feb. 2.

Death of William S. White.

UTICA, N. Y., Feb. 7.—While on a visit at South New Berlin, William S. White died last Saturday morning, after a brief illness. He had not been in the best of health for the past two years, suffering from the effects of a fall upon the icy sidewalk.

Mr. White was born in Bloomville, Delaware county, 47 years ago. In 1885 he located in Waterville, where for 11 years he was engaged in the jewelry business. Mr. White was compelled by failing health to give up his business, and for the past five years he had resided in Utica. He was a fine mechanic and a very genial man, well informed on the topics of the day. He was a member of Sanger Lodge, F. and A. M., of Waterville, and Republican in politics. In December, 1884, Mr. White married Miss Helen Martin, of Schoharie county, who survives, with two sons, Warren and Walter.

E. K. Shaw Kills His Wife and Tries to Kill Himself.

RICHMOND, Ind., Feb. 5.—The news has been received in this city of a tragedy at Anniston, Ala. E. K. Shaw was engaged in the jewelry business in Dublin, Wayne county, until last Spring, when he left with his wife for the south. At Anniston Mr. and Mrs. Shaw were arrested for taking subscriptions for the *Ladies' Home Journal* and keeping the money. The night of their arrest they hired a special officer to guard them at the hotel, in order that they might not spend the night in jail. Disgraced, disheartened and with the odium of a criminal charge resting over them, Shaw deliberately cut his wife's throat and then cut his own. Mrs. Shaw was dead when found, but he will probably recover.

Shaw will be tried for murder as soon as he is able to appear in court. A letter written by them jointly and left on a table in the room where the tragedy took place was addressed to the dead woman's sister, Mrs. J. F. Smith, of Crown Point, Ind. It gave the particulars of their intention to die together and made a disposition of their property.

New Working System at the Elgin Watch Factory.

ELGIN, Ill., Feb. 5.—President Hulburt, of the Elgin National Watch Co., has decided to try the nine-hour day in the big factory of the company here, commencing on May 1 and continuing for six months. The working hours will be nine hours five days in the week and eight hours on Saturday, with no reduction of pay. The announcement was made to-day and is entirely voluntary.

Chris. Jansen, a Davenport, Ia., jeweler, joined the Excelsior Rifle Club, which includes all the expert shots of that city about a month ago, and the veterans of the club are wondering where he learned to shoot. At last week's contest he won a handicap event, possible 250, with a score of 242, and the open event, possible 75, with a score of 74, defeating some of the best shots of the Middle States.

Durand & Co. Searching for a \$3,000 Emerald.

NEWARK, N. J., Feb. 8.—The loss of a particularly fine emerald under very unusual circumstances has been giving Durand & Co. much concern the past few days. The stone, which was valued at \$3,000, had been received from a New York house to be mounted. It was taken to the stone setting department and handed to the foreman. He in turn handed it to one of the workmen, who picked it up with a pencil of beeswax and, as he supposed, placed it in the prepared setting. Just then he heard a click as of something falling upon the iron floor at his feet as he was wiping the beeswax from his fingers upon his apron. He looked first to the floor, then to his bench, and

then to the prepared setting. The gem was gone. A search was begun immediately and continued actively for several days, but the stone has not been found.

The floor is of closely riveted sheet iron, and every inch of it has been gone over by daylight and bull's-eye lamps repeatedly, while every part of the workbench has been closely examined. The stone is a large one, but microscopic crevices were searched for fragments of it. The workman who handled it is a veteran employe of the house and has set thousands of gems of equal or greater value. He is not under suspicion, nor will the members of the firm disclose his name.

The search has not yet been given up.

The Paris Diamond Market.

PARIS, France, Feb. 1.

Le Diamant says in its last issue: Bort is still excessively dear.

It is reported from Amsterdam that American buyers have recently paid the following prices for good merchandise: Gros mêlé, 300 to 325 francs per karat; two grains, 330 to 360 francs per karat; three grains, 350 to 380 francs per karat, and other sizes in the same ratio.

Meeting of the New Directors of the Jewelers' Association and Board of Trade.

The first meeting of the new board of directors of the Jewelers' Association and Board of Trade was held Wednesday. Two vacancies in the board were filled, one caused by the death of J. B. Bowden and one caused by the resignation of G. W. Van Deventer, of the Waterbury Clock Co. The new men elected are: Seth E. Thomas, of Seth Thomas Clock Co., and Simon Fink, of Fink, Bodenheimer & Co. The usual committees for the present year were chosen and routine business transacted.

The following firms were unanimously elected members of the Jewelers' Association and Board of Trade: S. Davis & Co., Chicago, Ill.; Recob, Ziegler & Co., Chicago, Ill.; Charles Kahn, J. M. Lafferty, Morris May & Co. and Meyrowitz Mfg. Co., New York; National Self-Winding Clock Co., Bristol, Conn.; Rodenberg & Dunn, New York.

The Police Oppose Statement as to the Death of Morris Silverman.

Morris Silverman, a jeweler, was discovered lying behind a locked door in his store at 3056 Third Ave., New York, Tuesday night of last week, with a bullet wound in the back of his head. He died the next morning in Fordham Hospital after declaring that he had been shot by burglars who had attempted to rob his store. This statement is supported by Mrs. Silverman, but is opposed by the coroner and the police, who have the opinion that Silverman shot himself in the head and was not attacked by any one, in view of the fact that he was in his store when discovered, behind a locked door.

Mrs. Silverman says that her husband had the door connected by an electric wire with a wheel by which he could lock it in a moment without moving from behind the counter, in order to be able to secure the door to prevent the escape of any one who might attempt to steal jewelry. It is claimed that Silverman was robbed of a diamond ring, a year ago, by a young man who took it from a tray of rings he was examining and escaped through the door. The locking device was then adjusted to prevent a similar robbery in future.

John W. Babbitt, Danvers, Mass., has sold out to Willard E. Morse, who will take possession on April 1.

Deputy United States Marshal Sheehan served a restraining order on J. W. Hilker, jeweler, Wells, Minn., whose creditors are taking action in the bankruptcy court. Mr. Hilker is restrained from disposing of his stock.

Timely Advice

And the best advice we can offer is to replenish your depleted stock of Diamonds and Diamond Jewelry NOW. It is not too early. If you haven't the goods to offer, of course you cannot make sales, but if you make a proper showing NOW you will be surprised at the extent of your Spring business. Besides, it will gain you a reputation as a diamond house that will be of considerable value to you when the busy season begins. In the meantime, if you have calls for special pieces that you haven't in stock, we can help you.

Fire in the Factory of the Whiting Mfg. Co.

The Whiting Mfg. Co. and the American Watch Case Co. were heavy sufferers from a fire in the four story building, corner of E. 4th St. and Lafayette Place, New York, Wednesday night. So extensive was the damage from fire and water that both concerns were obliged to temporarily cease business. The Whiting Mfg. Co. succeeded in resuming work in part of their departments, Monday, but it may be two weeks yet before the watch case company can resume operations. The loss was greatest to the Whiting Co. and will be between \$50,000 and \$75,000, but much of the damage cannot be estimated in cash values. The American Watch Case Co., who rented the upper floor of the building from the Whiting Co., suffered extensively, mainly from water. Both concerns carried full insurance. About 500 men were temporarily deprived of employment.

The fire started on the second floor, probably in a new flue which had recently been put into the building and into which was swept the waste powder that had been used for polishing silver ware. The fire was confined principally to this floor and the one above, but the first floor offices, engine room and basement were flooded by water. Only a few dies were destroyed, as all but the few in actual use are stored in specially built vaults under 4th St. The shafting and machinery throughout the building were warped and damaged by heat and water so that they will have to be thoroughly overhauled before they can be used. A number of important designs in use were destroyed.

Two important pieces of work barely escaped ruin, and one was less lucky. The Hobson testimonial to be presented to the hero of the *Merrimack* incident of the Spanish war, illustrated and described in THE CIRCULAR-WEEKLY of Nov. 7, 1900, had been in the factory on the second floor, receiving some final touches, and was taken the day before the fire to its destination in another part of the city. The large and elaborate punch bowl, to be a part of the silver service for the new battleship *Illinois*, to be presented by the citizens of that State, had been in that same department

Peculiar Action of the Common Council of Boston.

Boston, Mass., Feb. 8.—At the meeting last evening of the Boston Common Council, the following order was introduced by Councilman Mildram of Ward 24, and has aroused considerable comment among the jewelry trade. It is of especial interest to the Thomas Long Co., 77 Summer St., the successful bidder for supplying the badges for this year.

"Ordered, that a committee of five members of the Common Council be appointed to procure expert evidence on the value of the badges furnished this year to the members of the Common Council, and to consult with dealers in old metal concerning the best terms obtainable for the badges in bulk.

"Ordered, that the City Auditor be directed not to pay the bill for these badges until this committee has reported its findings to the Common Council and the latter has taken action thereon."

As soon as President Kiley realized the purport of the order he ruled it out as "discourteous to a committee of the Common Council."

At the office of the Thomas Long Co. little could be learned about the matter. The firm declined to discuss the affair more than to say that it was a case of "petty politics." Other members of the trade do not hesitate, however, to talk more freely and intimate that it is a case of being "sore" on the part of a firm who have supplied the badges in former years, but who lost the contract this year. The badges cost \$7 each, and as there are 75 councilmen, the bill is \$525, and is worth trying to secure.

Mr. Davidson, the treasurer of the Thomas Long Co., said that his firm were ready to stand back of their workmanship to any degree, and from the fact that the committee on badges accepted the design and sample submitted by the Thomas Long Co., it would appear that the city would have to pay the bill.

Proceedings of The Jewelers' League.

The regular monthly meeting of the executive committee of The Jewelers' League was held Feb. 8. There were present Vice-Presidents Fessenden, Bardel and Greason, Messrs. Street, Karsch, Lissauer and secretary L. Stevens, Jr. Upon motion duly made and seconded, G. M. Van Deventer, of Waterbury Clock Co., was chosen chairman of the executive committee for 1901.

Five requests for change of beneficiary were received and upon motion granted and the following applicants were admitted to membership: Edwin V. Sweet, New York, recommended by N. D. Prentiss and L. A. Miller; George A. Street, Brooklyn, New York, recommended by George W. Street and L. A. Miller; William J. Elson, Brooklyn, New York, recommended by R. F. Forrester and L. A. Miller; H. E. Brown, New York, recommended by E. H. Brown and L. A. Miller; William L. Penfield, Hawthorn, Conn., recommended by E. H. Brown and L. A. Miller; M. J. Mahlmeister, New York, recommended by E. A. Lehmann and L. A. Miller.

The next meeting will be held March 8.

Proceedings of the Jewelers' Security Alliance.

The regular monthly meeting of the Jewelers' Security Alliance was held on Feb. 8, the following members being present: Chairman Butts, Vice-President Stern, Treasurer Karsch, Secretary Noyes and Messrs. Wood, Sloan, Kroeber and Champenois, of the committee.

The deaths of J. B. Bowden and David Untermyer having left the Alliance without a president and first vice-president, A. K. Sloan, of Sloan & Co., was elected president; Leopold Stern, of Stern Bros. & Co., first vice-president; F. Kroeber, second vice-president; C. G. Alford, of C. G. Alford & Co., and A. L. Brown, of Avery & Brown, members of the executive committee. These elections are for the remaining part of the year, ending May 7, the constitution providing that in case of any vacancies the executive committee shall fill them until the next annual meeting.

New members were elected as follows: Sylvester Engle, Hazleton, Pa.; Simon Onderwyzer, New York city; Cornelius Pieper, Zeeland, Mich.; William Keck, Muskegon, Mich.; King, Raichle & King, Buffalo, N. Y.; Lundberg & Lee, San Francisco, Cal.; Ernest F. Randolph, Farina, Ill.; Riheldaffer & Brownfield, Fairmont, W. Va.; James Bergman, New York city; J. D. Dalzell & Co., Newark, N. J.; D. W. S. Hodges, Mansfield, Mass.; H. S. Johnston, Apollo, Pa.; Lochman Bros., Springfield, Ill.; Woods & Chatelier, New York city; H. H. Blase, Wilkes-Barre, Pa.; Stephen A. Bowers, Creston, Ia.; Lewis P. Boyle, Corydon, Ia.; H. E. Conklin, Chanute, Kan.; F. A. Coville, Wayland, Mich.; H. D. Barnett & Bro., Ironton, O.; Peter Miller, Kingman, Kan.; D. D. Williams & Co., Emporia, Kan.

Reinheimer's jewelry store, Joplin, Mo., was destroyed by fire at an early hour on the morning of Jan. 31. The loss in jewelry stock was heavy and was only partially covered by insurance.

Death of Albert Landsberg.

DETROIT, Mich., Feb. 8.—Albert Landsberg, president of the firm of L. Black & Co., jewelers and opticians, and one of the oldest business men in Detroit, died Wednesday night, at the Alhambra Flats. He suffered a stroke of paralysis last Summer, from which he never recovered. Mr. Landsberg was 64 years of age, was born at Breslau, Germany, and came to this country when 13 years of age. When very young he engaged in the optical business with L. Black, who died in 1870. He continued the business, with his sister as a partner.

The day of his death was the 34th anniversary of his wedding. Two years ago the firm of L. Black & Co. were incorporated, and Mrs. Black, whose home is now in Europe, continued as a partner with A. Black, M. Black and Mr. Landsberg. For years the business was carried on at the corner of Jefferson and Woodward Aves. Several years ago a move was made up town to 156 Woodward Ave., where a large business is done. The deceased leaves a wife, who has been the leading spirit in the business for the last two years.

Death of Charles Terheyden, Sr.

PITTSBURGH, Pa., Feb. 7.—Charles Terheyden, Sr., one of the first manufacturing jewelers in Pittsburgh, died on the night of Feb. 6, at his residence, 5000 Liberty Ave. He had been ailing for some time, but was only confined to the

house for 10 days. Death was due to pneumonia and grip.

Mr. Terheyden was born in Germany 78 years ago, but came to this country in 1845, locating in Pittsburgh. He had been a jeweler in his native land and was connected with the firm of James B. McFadden, of this city. About 40 years ago he formed a partnership with B. Berkley for the purpose of manufacturing jewelry. About 25 years ago he purchased the interest of Mr. Berkley, and until a few years ago conducted the business himself. He had been engaged in the jewelry business on Smithfield St. for 40 years.

For 30 years the family resided on Troy Hill, Allegheny, and while there Mr. Terheyden was a member of the Church of the Holy Name. Later he was connected with St. Joseph's Church. He was a member of St. George's Ritters. The deceased is survived by his wife, three sons—Henry, the jeweler, of Smithfield St.; Charles, Jr., the manufacturing jeweler, and Dr. William Terheyden, also a one-time jeweler. Three daughters, Louisa, Anna and Clara, also survive him.

Illinois Watch Co. Get a Full Verdict Against Lapp & Flershem.

SPRINGFIELD, Ill., Feb. 9.—The case of the Illinois Watch Co. vs. Lapp & Flershem was argued before Judge Gary, in the Circuit Court of Cook county, Feb. 5 and 6. The jury returned a verdict for the plaintiffs in the full amount claimed, \$1,882.

"'Tis a Good Job and Well Done."

Jobs "well done" are not so easily found in the jewelry, or any other business. Our years of experience and acquaintanceship with gold jewelry enable us to match or repair articles with the minimum loss of time and expense. We have a specially organized department for this purpose and shall be pleased to have you avail yourself of its facilities.

The execution of designs to suit individual tastes is a matter in which we take particular pride. Estimates cheerfully submitted.

DRAWBACK ON RIBBON GOLD LEAF.
WASHINGTON, D. C., Feb. 5.—The Treasury Department has extended the provisions of the order issued on July 28, 1900, establishing a rate for allowance of drawback on "ribbon gold leaf" of full width (3 3/4 inches), manufactured by the W. H. Coe Mfg. Co., Providence, R. I., to cover the same class of manufactures by the said company of narrow widths when exported.

The instructions to the Collector of Customs at Providence set forth that the drawback entry must show the number of unit packages in each case containing the same number and width of rolls, the number of rolls of each width exported and the equivalent of the exported rolls expressed in terms of rolls of full width, that is to say, 3 3/4 inches wide. In the case of rolls of narrow widths 5 per cent. of the exported quantity will be added thereto to compensate for loss incurred in the manufacturing process.

Sensational Jewel Theft in the Boston Trade.

BOSTON, Mass., Feb. 8.—The case against John A. Smith, who is charged with the larceny of a diamond ring valued at \$100, the property of Robert P. Stahl, jeweler, in the Jewelers building, developed a sensational side in the East Boston Court this forenoon, when Smith was arraigned. Stahl did not want to prosecute the young man and the latter was held in \$500.

The arrest of Smith occurred on Wednesday, and it is said that he was trying to sell the ring when the police put in an appearance. The story was that Stahl loaned the ring to a young woman friend and that Smith obtained it in some way from her. When the case was called to-day Stahl was on hand bright and early and it is said tried to have the case settled out of court. The principal witness, or rather the one who attracted the most attention, was a young woman who gave the name of Mrs. Alice Brown. When asked what she knew about the case she declined to inform the Court and also declined to give her address. She also declined to give the name of the young woman said to have been with her on the night of the alleged theft. Judge Emmons repeated his questions and, securing no response, ordered the woman committed to jail for 15 days for contempt of court. The case was thus summarily disposed of for to-day and was continued to Feb. 15.

In a fire in the Eagle House, Marlboro, Mass., on the morning of Feb. 6, Alexander Chillette, jeweler, claims to have lost \$3,000 worth of jewelry, watches, etc.

Bench Jewelers of New York Have an Enjoyable Time.

As an observance of the second anniversary of the Jewelers' Protective Union, No. 1, of New York, a ball and vaudeville show were given, Saturday evening, in Grand Central Palace, Lexington Ave., under the direction of the officers and committees of the Union, for the pleasure of members and friends. The entertainment programme showed several attractive lines of entertainment, which were exhibited to their best advantage by stage manager James L. Barry. There were alternating turns of music, monologue, character and costume song, pantomime, reading, dialect singing and the inevitable one-act comedy sketch, all of which were well done by professional artists. The dancing was, perhaps, the feature that afforded more real enjoyment than any other of the evening, and until snug up to Sunday morning the feet of the union jewelry workers and their friends kept time to the orchestra's tuneful music.

The officers of the Union are: President, H. J. Vollmer; vice-president, J. Windner; financial secretary, S. Zudeck; recording secretary, L. Traznik; trustees, R. Bryor, S. Haltricht, E. Koepficus; auditors, R. Scheffel, C. Goetzinger, W. Buesing; sergeant-at-arms, G. Schicke.

The ball was in charge of the following: Floor manager, S. Haltricht; assistant floor manager, George Peters; floor committee, Charles H. Goetzinger, R. Scheffel, G. F. Rainess, C. Herwig, Albert Mente, F. E. Mansfield, John Pittavino, J. Speth,

William McKim, Charles Enrik, George Seeger, E. Wood, Edgard Royce, Joseph Lehn, Christopher Grau, P. B. Flaishnick, M. Kreutzer, Robert Grossmann. The general committee of arrangements included: Julius Windner, H. J. Vollmer, Joseph Gabryel, L. F. Traznik, S. Haltricht.

Detectives Go to Buffalo in Connection with the Ruprecht Robbery.

PITTSBURGH, Pa., Feb. 9.—County detective Robert G. Robinson and detective Thomas McQuade have gone to Buffalo to look after the interests of Allegheny county, in the Ruprecht robbery case. Louis Mentz, who is alleged to have disposed of some of the watches stolen from Ruprecht's store, in Sharpsburg, and who has been indicted for receiving stolen goods, has steadily maintained his innocence. It has been learned that he obtained the watches from Henry Altman, of Buffalo, and the case will be thoroughly investigated.

Detectives Robinson and McQuade will spend several days in Buffalo and will endeavor to learn where Altman got the goods. District-Attorney Haymaker is determined to run the affair down if he has to appeal to the Governor of New York to assist him in the matter. The man who sold to Altman is now wanted by the police. Mr. Altman may yet be required to produce the man who sold him Ruprecht's jewelry.

Preparations for the Winter Banquet of Eastern Manufacturers' Association.

PROVIDENCE, R. I., Feb. 11.—The board of governors of the New England Manufacturing Jewelers' and Silversmiths' Association held a meeting at the law offices of Hon. George A. Littlefield, Saturday evening, and completed arrangements for the organization's Winter banquet which is to take place at the Trocadero on the evening of Friday, Feb. 15. There was a full attendance of the members of the board of governors, and an enthusiasm was manifested that augured well for the future of the Association. It is expected that there will be present at the Winter banquet next Friday evening, which will be the first meeting of the Association since the adoption of the new constitution and by-laws, between 350 and 400 members and guests, and that the affair will be the largest of the kind held in this city in years. Beginning at 6.30 o'clock a reception will be held in the Trocadero parlors, and at 7.30 o'clock the banquet will be served by Caterer Tillinghast.

President Frank T. Pearce will preside at the postprandial exercises, when there will be speeches by prominent members of the Association in this city and the Attleboros, and by distinguished guests from abroad, upon subjects especially interesting to the jewelry fraternity. Music will be furnished during the evening by the Apollo Male Quartette, of Boston, and the Glenham Orchestra, of this city. The board of governors also, at their meeting, Saturday evening, elected 25 new members, this making over 50 members elected since the reorganization of the Association at the postponed annual meeting held Jan. 21, and bringing the total membership of the Association up to more than 200. This is a remarkable growth from 49 members, which was the total a year ago, and reflects much credit upon President Pearce and the other officers of the Association.

Novel Case Over a Ring.

TRENTON, N. J., Feb. 8.—Rudolph Stokes has engaged counsel and will secure a writ of replevin to get possession of a ring, valued at about \$100, belonging to his wife, now in the possession of Cook & Jaques. According to Stokes, he took the ring to Cook & Jaques to have a prong holding the stone fixed. The work was done, but when Stokes called for it, Mr. Jaques, it is said, refused to give up the ring until Stokes had paid a prior bill which the firm held against him and his former partner in business.

Stokes said he was willing to pay the cost of repairing the ring, but refused to assume the old debt; but he was not allowed to have the article unless he paid in full. The defense will likely be interesting.

Schneider's soldering fluid is a substitute for borax which, although it has been on the market but six months, has commended itself highly to large and small manufacturers. It is sold in one, four, eight and 16 ounce bottles, at prices which will be found in the manufacturer's announcement, while larger quantities can be furnished at greatly reduced prices. It is made by Emil Schneider, Newark, N. J.

Tariff Decisions & Regulations.

Among the decisions handed down the past week by the Board of Classification of the United States General Appraisers, were:

Webb-Freyschlag Mercantile Co., Kansas City, Mo., imported small toilet pins with ornamental heads of colored glass in imitation of precious stones or jet, which belong to the class of articles commercially known as jewelry. Following repeated decisions of the Board, it is held that the goods are dutiable as assessed at 60 per cent., under paragraph 434, act of 1897, and the protest is overruled which claimed that they were dutiable at 45 per cent.

Andrew R. Steven, New York, imported a variety of goods, among which were bonnet or scarf pins with ornamental heads of cut glass, and in overruling protests against original assessment, the Board hold that these pins are dutiable as assessed at 45 per cent., under paragraph 193, act of 1897, or at 60 per cent., as jewelry, under paragraph 434.

Belcher & Loomis Hardware Co., Providence, imported wire, which was assessed at 45 per cent., as "clock and watch wire," under paragraph 137 of act of 1897. The importers claimed the wire to be smaller than No. 6 wire gauge, and as such dutiable at 40 per cent., under paragraph 137. They claimed that the wire is not one of the classes specially enumerated in paragraph 137. The Examiner at the Port of New York stated that such wire had been uniformly assessed as watch or clock wire. The Board held that it was provided for in the paragraph referred to, and therefore subject to duty as assessed.

The American Express Co. imported merchandise which was returned as "300 gross garnet counter pivots for music box furnishings," and valued at 300 francs. They were assessed at 50 per cent., under paragraph 115, act of 1897. The protest claimed that the garnets were dutiable at 10 per cent., or at 20 per cent., under paragraph 435, as "precious stones advanced in condition or value from their natural state, * * * and not set," or for "imitation of diamonds or other

precious stones composed of glass or paste," etc. "It appears," said the Board in their decision affirming the original decision, "that the articles are expressly designed for use as counter pivots or bearing surfaces in music boxes, or cap jewels or similar purposes in electrical instruments. * * * They are cut cabochon or oval on one side and flat on the other; are polished; are about a quarter of an inch in diameter and are unsuitable for use as clock or watch jewels. * * * The protest is overruled and the assessment of duty affirmed."

Boston.

Fred. F. Place, retailer, 81 Hanover St., froze his ears during the recent cold snap and has been kept at home for a few days.

Included among the true bills presented to Judge Sheldon, of the Superior Criminal Court, Saturday, were indictments against David Werblinsky, Samuel Goldstein and David Kerner, the three men charged with stealing a safe containing jewelry and \$1,300 in money from the store of Morse Bros., jewelers, 85 Lowell St., West End.

Buyers in town last week included: W. F. Newhall, Lynn, Mass.; J. H. McGovern, Haverhill, Mass.; S. W. Baker, Rockland, Mass.; E. G. Wright, Putnam, Conn.; A. W. Avery, Plymouth, N. H.; A. J. Hunt, Adams, Mass.; H. A. Stone, Ayer, Mass.; E. F. Welch, Westboro, Mass.; L. R. Hapgood, Dover, N. H.; P. H. McCarthy, Springfield, Mass.; R. M. Cook, Marblehead, Mass.; F. M. Nichols, Taunton, Mass.; F. M. Padelord, Fall River, Mass.

In commenting on the growing interest taken in Mexican agriculture, *Farm Loans and City Bonds*, a Chicago financial paper, says: "The profits in rubber, sugar, coffee, chocolate, etc., are unquestionably enormous, and the stockholders in some of these companies which own plantations are beginning to receive tangible proof of that fact in the shape of dividends. A plantation which is in the hands of a company which has fully met the necessary conditions is the Montezuma. This enterprise will stand the closest investigation, and its shares are being taken by a conservative class of people, who consider it a very conservative investment and about as safe as anything but a Government bond."

THE MANUFACTURERS OF THE

LARTER SHIRT STUDS

HAVE BEEN AWARDED BY THE PATENT OFFICE AT
WASHINGTON, D. C.,

Two Additional Patents,

BOTH UNDER DATE FEB. 5, 1901.

See Patent Dept., this Issue of "The Jewelers' Circular-Weekly," Page 48.

We are now fully protected in the actual or in similar construction of the Larter stud, as the following dates and numbers of patents will prove:

U. S. GOVERNMENT PATENT:

Dec. 18, 1900, No. 11,878

Feb. 5, 1901, No. 667,574

Feb. 5, 1901, No. 667,631

AND

GREAT BRITAIN PATENT:

July 15, 1899, No. 19,716

THE LARTER STUD IS
IN A CLASS BY
ITSELF.

There is no stock of shirt studs in the United States so large and complete—all with the successful Larter back—as the lines we are carrying in 18k. gold, 14k. gold, also 10k. gold and extra quality 14k. plate. These last two lines are to be had through leading jobbers only.

EVERETT & BROWN,

68 Nassau St., New York.

Attleboro.

Samuel Purrington, for years in charge of a department in the shop of the Horton, Angell Co., died last week, aged 46. The funeral took place on the 10th.

There is informal talk relative to a display of jewelry from the Attleboros at the coming Pan-American Exhibition, in Buffalo. Something is likely to be done about it within a few days.

A hearing has been called before the Probate Court to arrange for the admission of the will of the late Henry C. Reed, of Attleboro, father of R. Curtis Reed, of the New York office of J. C. Cummings & Co.

Louis C. Luther, of J. W. Luther & Co., and Samuel M. Einstein, of the Attleboro Mfg. Co., purchased last week for a large sum one of the leading sites on Attleboro's main street. They propose to improve it greatly.

James E. Blake, of the James E. Blake Co., starts on Thursday for California, part business and part pleasure. Two nights before his departure a party of 25 of the jewelers, with their wives, were to assemble at the home of William H. Garner, of the Dunbar, Leach, Garner Co., to give him a farewell reception.

The annual report of the School Board recommends the introduction of manual training into the public schools along lines calculated to develop skilled help for the jewelry factories. This is a subject which has been agitated by press, pulpit and officials for the past year, and is apt to bear fruit at the March town meeting.

Everett B. Bliss, of Bliss Bros., is serving on the Grand Jury, in Taunton, with some of the most sensational crimes to be tried in the history of Massachusetts. Charles E. Bliss, his brother and partner, and Everett S. Horton, of the Horton, Angell Co., are witnesses against the most

dangerous set of thieves arrested here in a century.

A marked change has come about in the office of Richards, Hill & Co. Fred H. Hill has purchased the interests of J. Shepard and of Herbert L. Richards, and has taken the plant. He has associated with him as a financial helper and advisor James E. Blake, of the James E. Blake Co. The new firm will turn out high grade chain.

Fred. L. Bellows and Bernard Simms have started in business together as Bellows & Simms. Mr. Bellows has just resigned from the traveling staff of McRae & Keeler after several years of unusually successful work. Mr. Simms has been with Simms & Co. for 14 years. The latter will run the shop and Mr. Bellows will carry the grip.

A bill was introduced into the Massachusetts Legislature which will probably be passed, according to present indications, and will touch a large number of the concerns doing business in Attleboro. It was brought in by Representative Dean, of Wakefield, and requires that any person or persons doing business of any kind under a firm name other than their own shall be officially registered.

Boston Office, 67 Chauncy Street.

New York Office, 80 Chambers Street.

Canada Notes.

Fred. Buscombe, jeweler, Vancouver, B. C., has been visiting the eastern markets and leaves in a few days for a European trip, returning home in May.

R. G. Galbraith, representing Ryrice Bros., Toronto, has gone on a purchasing trip to New York and will place extensive orders for Spring novelties.

David Reesor, Brandon, Man., whose store was recently destroyed by fire, has purchased the store in the same city recently occupied by the late T. F. Butcher, jeweler, and will shortly re-open business on an extensive scale.

A fire in Montreal recently did a good deal of harm and Providence manufacturers lose a good customer, H. A. Nelson & Co., who decided to go out of business. Besides H. A. Nelson & Co., another firm who carried jewelry were burned out entirely, viz., Bernstein & Wolsey.

M. G. Neiley, Winnipeg, Man., has sold out his jewelry business and gone to New York, where he will devote himself to an artistic career. His vocal abilities have secured a local recognition and he will take a course of instruction at some leading conservatory and become a professional singer.

Frederick Claringbowl, jeweler, Hamilton, has the sincere sympathies of the trade on account of the death of his wife, which occurred on the 1st inst. under peculiarly painful circumstances. Two days before Mrs. Claringbowl complained of illness and a doctor who was called in declared her to be suffering from an internal trouble requiring an operation. She was unable to withstand the shock

and died shortly after having been operated on.

On the 7th inst. William C. Hanbold, secretary of the International Watch Case Engravers' Union, arrived in Toronto from New York, to endeavor to adjust the difficulty between the American Watch Case Co. and the Union. The manager of the company, Mr. Quigley, refused to submit the matter to arbitration. The Union will, consequently, lay the matter before the American Federation of Labor, with which it is affiliated, and the labor bodies of Canada, and in case the company refuse to recede from their position a prolonged struggle is likely to result. In the meantime the striking engravers have all secured positions elsewhere and the question has resolved itself into a fight over the status of the shop with regard to the Union, which Manager Quigley refuses to recognize.

Mrs. C. Schomburg, the wife of a prominent jeweler of Columbus, Ga., died Feb. 4, at Milledgeville.

The jewelry establishment of J. N. Bucher, Hillsboro, Tex., was burglarized a few nights ago, and two pistols, a gold watch case, several razors, gold collar buttons and other items to the value of about \$50 were stolen.

Louis Maratsky, agent and clerk at Hudson, N. Y., has filed a petition in bankruptcy, with liabilities of \$3,292 and assets of \$20 in cash. He was formerly in the jewelry business, and in December, 1892, he gave a bill of sale of his stock, valued at \$3,500 to \$4,000, to H. M. Smith & Co., 83 Nassau St., New York, to secure their claim of \$3,800.

A JOURNAL DEVOTED TO THE INTERESTS OF JEWELERS, WATCHMAKERS, SILVERSMITHS, ELECTROPLATE MANUFACTURERS, AND ALL ENGAGED IN KINDRED BRANCHES OF INDUSTRY.

Member of the American Trade Press Association.

Our editorial columns will contain our own opinions only, and we will present in other columns only what we consider of interest or value to our readers. Advertising matter will not be printed as news.

Advertising rates in THE JEWELERS' CIRCULAR-WEEKLY are lower, considering the number of tradesmen reached by its large circulation, than in any other jewelry journal.

Notices of changes in standing advertisements must be received one week in advance; new matter can be received up to Monday.

INFORMATION FOR SUBSCRIBERS.

Terms of Subscription, Postage Prepaid.

	PER ANNUM.
United States and Canada, - - -	\$2.00
Foreign Countries in Postal Union, - - -	4.00
England and Colonies, - - -	16s.
France and Switzerland, - - -	20 fr.
Germany, - - -	16 marks
Single Copies, - - -	.10

New Subscribers can commence at any time. Payments for THE JEWELERS' CIRCULAR-WEEKLY, when sent by mail, should be made in a Post-Office Money Order, Bank Check or Draft, or an Express Money Order or Registered Letter. All postmasters are required to register letters whenever requested to do so.

Pay money only to authorized collectors having proper credentials.

Returning Copies. Returning your paper will not enable us to discontinue it, as we cannot find your name on our books unless your address is given.

Changing Address. In changing address always give the old as well as the new one. Your name cannot be found on our books unless this is done.

Discontinuances. We will continue to send papers until there is a specific order to stop, in connection with which all arrearages must be paid; but such an order can be given at any time, to take effect at or after the expiration of the subscription. All such orders will be promptly acknowledged by mail.

Liability. The courts have decided that all subscribers to journals are responsible until arrearages are paid in full and an order to discontinue has been received by the publisher.

THE JEWELERS' CIRCULAR-WEEKLY IN EUROPE.

Among the places in Europe where it is on file are the following:

LONDON—First Ave. Hotel, Holborn, E. C.; Holborn Viaduct Hotel, Royal Hotel.

PARIS—Hotel de L'Athene, Rue Scribe.

LEIPZIG—Handels-Zeitung für die gesamte Uhren Industrie.

BERLIN—Deutsche Uhrmacher Zeitung, Jager Strasse, 73.

GENEVA—Journal Suisse D'Horlogerie.

AMSTERDAM—Continental Club, Hotel Amstel.

ANTWERP—Diamond Club, Rue de Pelican.

Every line of reading matter in THE JEWELERS' CIRCULAR-WEEKLY, with the exception of a few brief extracts from exchanges, always properly credited, is written exclusively for this journal. Each issue of THE JEWELERS' CIRCULAR-WEEKLY is copyrighted. Permission to quote is extended to other publications provided such quotations are properly credited.

"YOUR 32d Anniversary Number is a gem. It reflects honor upon the trade it represents," writes to us a well known member of the trade. This is praise indeed, and makes us rest secure in the conviction that our work fulfilled all our promises, as well as all our high hopes.

IF jewelers generally exercised as much coolness, courage and presence of mind as W. F. Kirkpatrick, of St. Joseph, Mo., did when, a few days ago, a potential customer "flimflammed" some diamonds from a paper of stones placed before him for inspection, there would be fewer losses among them, and the light fingered fraternity would be more chary in their designs upon the jewelers.

De Beers Meeting and Price of Diamonds.

IN another portion of this issue are printed copious extracts from the speech of the chairman of the De Beers Consolidated Mines, Limited, at the annual meeting of that monopolistic corporation just held. These extracts bear upon the past year's output of diamonds, the earnings and the outlook for the shareholders' interests. If any member of the trade has had a lurking feeling that the price of diamonds had reached its zenith, he will have this feeling entirely dissipated by a perusal of this speech. First the chairman says: "We have made a profit on the year of £581,148 only. Well, that sum, as compared with previous years, is rather a small one." Then he speaks of the dissatisfaction of shareholders at the decision of the directors not to pay a dividend during the year. Further on he says: "We have not been able to increase our operations to the extent that we anticipated." Also, he speaks of a possible bonus to the shareholders later on, if circumstances improve "in connection with the past year for which they have received no dividend." Of course, we all know that it is the London syndicate that puts the price on the rough in its transference to the cutter and dealer, but this price is really based upon the figure at which the output in South Africa is bought and the conditions prevailing in the operations of the De Beers Co. The De Beers's chairman's report is not altogether satisfying to the shareholders, and it is certain that the company's price per karat to the syndicate, for the next year, will be a high and stiff one, so that the company may be enabled to carry out their promises to the shareholders—a large dividend and a bonus. Under these conditions continued increases in the price of diamonds may be expected in rapid succession in a short time.

Letters to the Editor.

MAKERS OF TOWER CLOCKS.

NEW YORK, Feb. 6, 1901.

Editor THE JEWELERS' CIRCULAR-WEEKLY:

We note your article referring to old tower clocks, and would like to state that the clock at St. Mark's Church, 10th St.

and Second Ave., is a Howard. We installed it there in 1881, when the old clock was taken out. We have a great many other clocks which have been running in towers since 1846, and would be glad at any future time you may wish to write up an article referring to the same, to give you a list and the histories.

Yours very truly,
THE E. HOWARD CLOCK CO.,
W. R. Cadmus, manager.

Samuel Baernkopf Indicted by the Grand Jury.

PHILADELPHIA, Pa., Feb. 11.—Samuel Baernkopf, until about a month ago a retail jeweler with two stores, one on 8th St. and another on 9th St., was indicted by the Grand Jury to-day on the charge of disposing of the goods in the two stores with intent to defraud his creditors. The indictment was secured at the instance of the Jewelers' Association and Board of Trade, of New York, and secretary D. L. Safford represented the Association before the Grand Jury.

Baernkopf, through his attorneys, instituted habeas corpus proceedings, two weeks ago, and the hearing was held in the Court of Sessions, Friday, and denied. This left him to the action of the Grand Jury.

Baernkopf was arrested the first week in January. He had disposed of the goods in his stores a few days previous, for, it is said, \$8,000, which the Jewelers' Association and Board of Trade claim was below the proper value. Creditors who are members of the Association have claims amounting to over \$7,000, and the total liabilities are claimed to be more than \$17,000, and the correct valuation of the stock he sold as about \$15,000. He claimed to have paid some of his creditors with the \$8,000 received from the sale.

Accounts of the case were published in THE CIRCULAR-WEEKLY of Jan. 9 and 16.

Death of William J. Lasher.

ROME, N. Y., Feb. 10.—At his home, 215 W. Thomas St., at 11.50 A. M., to-day, occurred the death of William J. Lasher, Sr., in his 64th year. Mr. Lasher had been in poor health the past year and in that time he had had two severe attacks of illness.

Mr. Lasher was born in Argyle, Washington county, Oct. 16, 1837, being a son of John Lasher. He remained on his father's farm till he was about 30 years old, when he disposed of his plot of ground, and with the proceeds of this and what he had saved he went to the village of Taberg, and there he put up a large store and stocked it with general merchandise. He branched out in business and opened a branch store in Peterboro, and this store he conducted for nearly 20 years. In connection with the store he had a musical department. It was 22 years this Spring that Mr. Lasher disposed of his business in Taberg and moved with his family to this city. He went into business, putting in a stock of musical instruments and jewelry.

The gold lorgnette worn on a long chain distinguishes the swellest street costumes.

North Attleboro.

Winthrop F. Barden, of Chapman & Barden, has resigned his place as a member of the National Supreme Lodge of the American Benefit Society, to which he has been an able assistant.

John B. Peck, foreman of the factory of H. F. Barrows & Co., died on the 5th after an illness lasting less than an hour. He went from city his home in excellent health, but had been at the office but a few minutes when he felt so ill that he returned home at once. Shortly after half past seven death came. Mr. Peck was a native of Dighton, Mass., being born there Oct. 4, 1842. He was married in 1866 to Miss Harriet I. Hopkins, of Pawtucket, and he made that city his home for seven years. In 1873 he removed to Providence, and after two years of residence there they came to North Attleboro. From 1875 until his death Mr. Peck was employed by H. F. Barrows & Co. From the year 1888 he had been their foreman, being up to that time head tool maker. He was for eight years chief engineer of the Fire Department and always active in town affairs. He was a member of Sumner Lodge of Knights of Pythias and of Prentiss M. Whiting Grand Army Post. A wife and daughter survive him. The funeral took place on Friday afternoon, and at the request of the family the secret orders took no part, and the service was of the simplest nature.

The three stone ring remains one of the enduring styles.

Providence.

Max Z. Stein, jobber, New York, called upon local manufacturers the past week.

The Montana Diamond Co. are preparing a large store for occupancy at 321 Westminster St.

E. L. Spencer & Co. have engaged W. R. Boss as traveling representative, thus increasing their selling force.

Frank P. Sherman, of the Lawton-Sherman Co., is reported as convalescent from his recent illness with typhoid fever.

Alfred Vester & Co., makers of metal ornaments, 21 Mason St., have changed their firm name to Alfred Vester & Sons.

Thomas E. Carpenter, formerly a manufacturer of rings in this city, has the sympathy of the trade in the loss he has suffered by the recent death of his wife.

The jewelry shop of Herman Kern, with all the fittings for the manufacture of chains, at 59 Page St., was sold at public auction at 10 o'clock Saturday morning, by order of the assignee, Mark Streicher. The property was purchased by Charles W. Bowen, owner of the building, on the second floor of which the shop was located, for \$375.

On account of the large number of the members of the Manufacturing Jewelers' Salesmen's Association who are making their western trips somewhat earlier than usual this season, the reunion and banquet, which was to have been held the latter part of the present month, will be postponed to a date in the coming month of March yet to be decided upon.

George M. L. Mitchell, with the Albert

Walker Co., wholesale jewelers, has been appointed referee in the bankruptcy case of George E. Blanchard, retail jeweler, East Greenwich, R. I., the filing of whose voluntary petition in bankruptcy was noted in THE CIRCULAR-WEEKLY of Jan. 30. Mr. Blanchard has accepted a position with Eastman & Co., in their jewelry store, 37 Dorrance St., this city.

According to the City Hall records the chattel mortgage made by Abraham Jacobs to Leo Winograd has been discharged, as has also the mortgage for \$300 by Lazar Jacobs to the same party. From the same source it is learned that Lazar Jacobs has given a chattel mortgage for \$1,000 on all the stock, tools, etc., in the premises at 205 Willard Ave. The effect of these transactions is that the small jewelry business at the above address is to be continued by Lazar Jacobs.

A thief accomplished a quick job in the line of a window smashing robbery at the store of the Pawtucket Loan Co., 11 Railroad Ave., Pawtucket, shortly before midnight, last Tuesday. The police officer on the beat says that everything was all right in the store at 11.11 o'clock, but a passing street car conductor four minutes later noticed that there was a hole broken through the front plate glass window. Seven watches aggregating in value \$82.75 had been taken by the slick robber, who probably took advantage of the noise of a passing freight train to turn the trick.

Among the certificates filed by corporations at City Hall in accordance with the annual requirement of the corporation law in this State, are statements by the Ludwig-Stern Co. and the Howard Sterling Co., the former makers of rolled gold plated jewelry at Blackstone and Gay Sts., and the latter manufacturers of silver ware at 7 Eddy St. The statement of the Howard Sterling Co., which is signed by John J. Conly, president, Sullivan Ballou, secretary and treasurer, and John J. Banigan and Birney C. Parsons, directors, certifies that on Dec. 31, 1900, the amount of capital stock fixed by vote of the corporation was \$320,000, the amount of capital stock paid in was \$242,000, the value of personal assets of the corporation was \$222,737.08 and the total amount of debts and liabilities was \$136,076.71. The statement of the Ludwig-Stern Co. is in substance that the amount of capital stock on Dec. 31, 1900, paid in was \$24,000, the value of the corporation's real estate according to the last assessment for city tax was \$9,120, the value of their personal assets was \$39,499.50 and the total amount of debts and liabilities was \$25,680.71.

ON MEMORANDUM

After the Holiday Clean-out

Your cases need filling up. We will send you on approval anything you want in Diamonds and Diamond Jewelry to fill up. There's no question that prices will go still higher, so you'll be the gainer if you let us know at once just what you need.

NEWARK, N. J.

CROSS & BEGUELIN

Importers and Cutlers of Diamonds and Precious Stones

43 Rue de Meslay, PARIS

Telephone,
2188 Cortlandt

17 Maiden Lane, NEW YORK

New York Notes.

The Lane presented its usual holiday appearance Tuesday. All the stores and offices were closed in honor of Lincoln's Birthday.

Gilbert T. Woodhull, of Mount & Woodhull, 26 Maiden Lane, sailed on the *Lucania*, Saturday, for a business trip to London, Paris and Amsterdam.

The annual meeting of the Keystone Watch Case Co. stockholders was held Wednesday last, at the company's office, 23 Maiden Lane. The officers of last year were re-elected.

Leo Veit, for 12 years with his brother, B. Veit, importer and dealer of watch materials, 13 Maiden Lane, has been admitted to partnership in the business. The new firm will be known as B. & L. Veit.

David Goodfriend, bookkeeper for Goodfriend Bros., 13 Maiden Lane, was married, Wednesday evening last, to Miss Beatrice Schwartz, at the home of the bride's parents and in the presence of a good representation of Maiden Lane members of the trade.

A meeting of East Side jewelry peddlers and others interested in the detection of the murderers of Meyer Weisbard was held last week, but nothing definite materialized. Efforts are still being made to raise the \$1,500 reward to stimulate the arrest of the guilty party.

The case of Elias M. Pilzer, bankrupt, who petitioned for a discharge from all his debts in bankruptcy, came up in the United States District Court, before Judge Brown, Wednesday, but as objections were made to granting the petition, the matter went over until Feb. 20.

In a report of a meeting of the creditors of Solomon Bros. & Gross, at Providence, Jan. 25, a statement was made in error regarding the dissolution of partnership. S. Richard Gross retired from

the firm Jan. 31, 1901, not Jan. 1, 1901, and the business has since been in the hands of Eli Solomon.

Among the creditors of George L. Davidson, who has filed a petition in bankruptcy, with liabilities of \$29,233 and assets of \$4,600, are the following: Mrs. Theresa Lynch, \$2,595; Thomas Kirkpatrick, \$3,000; E. M. Gattle, \$687; all for jewelry. Mr. Davidson lives at Hotel Grenoble and is not in business.

The examination into the affairs of M. J. Davidow, bankrupt jobber, late of 510 Broadway, was continued before Referee in Bankruptcy Miller, last Wednesday. Attorney G. H. Crawford went on with the questioning of Mr. Davidow along the lines of the preceding examination, as reported in THE CIRCULAR-WEEKLY last week. The examination will be continued this afternoon.

The first meeting of the creditors of the bankrupt firm of A. S. & S. J. Koplik, formerly engaged in the jewelry business at 106 W. 125th St., who were adjudicated bankrupts on Jan. 7, will be held at the office of Macgrane Coxo, referee in bankruptcy, 63 Wall St., Feb. 28, at 10.30 o'clock A.M., at which time creditors may prove claims, appoint a trustee, examine the bankrupts, etc. A summary of the filed schedules of this firm was published in THE CIRCULAR-WEEKLY last week.

The Merchants' Association of New York have notified the railway lines of the southwest that they will put into effect reduced rates for members of the Merchants' Association from all points on one of those lines. These rates will apply from Texas to New York by way of St. Louis, Mo. These reduced rates will be effective from Feb. 13 to 17, inclusive, and March 1 to 4, inclusive, the return limit being for 30 days from the date of the sale of the ticket; the general terms and conditions being practically the same as

those put into effect by the Trunk Line Association and the Central Passenger Association for similar concessions, as noted in THE CIRCULAR-WEEKLY last week. These dates are the same as the dates previously granted by the lines of the Central Passenger Association.

A handsome silver service has just been completed by the Whiting Mfg. Co. which will be presented to Lieut. R. P. Hobson by some of his friends. The set consists of a tray and five pieces, all of which are decorated in nautical style and engraved with scenes connected with the historic deed in this naval officer's career. The tray, having more room, is more elaborately engraved and etched than the other pieces. On the tray is this inscription: "Presented to Lieutenant Richmond Pearson Hobson by his friends and admirers in recognition of his bravery and heroism in the sinking of the collier *Mer-rimack*, in Santiago Harbor, June 3, 1898." This testimonial is now on public exhibition at the store of the Whiting Mfg. Co., Broadway and 18th St., where the workmanship is receiving much attention from trade people and others.

The two handled silver loving cup made by Tiffany & Co. and presented to Henry Martyn Baird, Professor of Greek, by the Alumni Association of New York University, is in the form of the old amphora or wine bottle. It is 11½ inches high. The body of the cup is encircled with a band of Greek figures in bold relief; on the front of the cup is the seal of the University with a branch of laurel; on the back is the inscription, in the antique square lettering: "Presented to Henry Martyn Baird, LL.D., L.H.D., of the class of '50, by the Alumni Association of New York University, in commemoration of the 50th anniversary of his graduation. New York, February 7th, 1901." A Greek treatment of the ivy leaf of friendship surrounds the

top of the vase. Prof. Baird has filled the chair of Professor of Greek at the New York University for 41 years. The cup was formally presented by the Rev. Dr. John Reid, '70, at the annual dinner of the Alumni Association, at the Hotel Savoy, New York, Feb. 7.

The Eaton & Glover Co. have secured additional room adjoining their offices, 87 Nassau St., which they will shortly occupy.

Si. Frankel, of Joseph Frankel's Sons, will sail next Saturday on the *Kaiserin Maria Theresa*, for Genoa. Mr. Frankel will spend some time in Nice, returning to this country next August.

Adolph Luthy has retired from Abel, Luthy & Co., 64 John St., by mutual agreement. The business will be continued by John A. and Edward C. Abel under the firm name of Abel Bros. & Co. Mr. Luthy, who was designer in the late firm, will be succeeded in that capacity by an expert German designer, employed for that purpose.

Conrad Schickerling, 9-11-13 Maiden Lane, has admitted his brother Alfred to partnership, and under the style of Schickerling Bros. will continue business, manufacturing, mounting and selling high grade diamond jewelry. The firm will occupy larger quarters in the Jewelers' Court building, 51-53 Maiden Lane, as soon as that building is completed.

Samuel Carpenter, for some years a jeweler of Flushing, L. I., died at his home there, Wednesday, aged 85 years. He was of an inventive mind, and an isochronal movement for watches, which also includes a movement known as a double impulse chronometer, a device which lessened the power necessary to run a watch at least one-half, was developed from his brain. He had not been in business for several years.

SUFFOLK WATCH CO.,

37 & 39 Maiden Lane, New York City.

Philadelphia.

S. Kind & Son are having alterations made in their store on N. 8th St.

J. W. Clark, formerly a retail jeweler of Croyden, Pa., has opened a retail store on Mill St., Bristol.

William H. Ritzmann, watchmaker, with J. E. Caldwell & Co., was married last week to Miss Pauline Salm.

Henry Van Acken, Sr., 1424 N. 10th St., has been drawn as a grand juror for the February term of Court.

G. A. Schaab, Shenandoah, Pa., was attacked while at dinner, Sunday, by a mad dog. He held the dog at bay until a policeman arrived.

William F. Michael, lately with Davis & Galt, has accepted a position with Ro'ler & Speidel, manufacturing silversmiths, 1018 Chestnut St.

Herman Nagele, watchmaker, Arch and 13th Sts., has secured the contract to keep in repair the clocks in the various departments of the City Hall.

George Kersch has resigned his position as manager of Wanamaker's repair department to enter the jewelry business in Newark with his father.

Among the jewelers who were prominent at the German-American ball, Monday, were: Max Brueckman, Isaac Herzberg and Charles Diesinger.

Walter Chattin, of the firm of Oliver & Chattin, jewelers' supplies, 8th and Sansom Sts., has gone on a gunning trip to Kentucky. Mr. Chattin is rather a splendid marksman.

The stock and fixtures of the retail jewelry store of M. B. Allebach, deceased, 1328 Walnut St., which remain unsold Feb. 20, will be closed out at public auction on that day.

J. Frank Allee, jeweler, Dover, Del., presented to Lieutenant-Governor Cannon, last week, a handsome jeweled gavel. The wood that it was made of was taken from the oldest elm tree in Delaware.

E. P. Ledos, the Newark manufacturer of jewelers' materials, during his last visit here presented Common Councilman Henderson, of this city, with a jeweled badge of the Order of Elks, in appreciation of the latter's hospitality during the annual convention last Summer.

A. Marks, optician, of New York, who was charged with selling worthless spectacles to residents of Coatesville, Parksburg and other small Pennsylvania towns, has been rescued from the clutches of the law by his brother, M. Marks, of New York. The cases were settled by the return of the money to the victims and the payment of all costs. Marks is alleged to have been operating in many places. In Parksburg he secured \$60 for a pair of spectacles.

The Mercantile National Bank

OF THE CITY OF NEW YORK,

BROADWAY AND DEY STREET,

Solicits Accounts from the Jewelry Trade.

Roy Phillips, formerly with M. B. Al'e-bach, deceased, has accepted a position with H. Fitton, retail jeweler, Atlantic City, N. J.

Richard Weyl, 706 Chestnut St., agent of the Meriden Cutlery Co., left Monday on an extended traveling trip through the State.

Oscar Kind, of S. Kind & Son, jewelers, 928 Chestnut St., was married last week to Miss Theresa B. Katz, daughter of Mr. and Mrs. Marcus Katz, at the Mercantile Club. Frank and Philip Kind were ushers.

Among the retail jewelers who were in town last week were: Charles A. Chamberlain, Flourtown, Pa.; J. W. Clark, Bristol, Pa.; Charles Kohler, Norristown, Pa.; William Beck, Vineland, N. J.; W. L. Roberts, Wilmington.

The Jewelers' Club, of this city, have had so many landlords during the past few weeks that the Board of Governors are at a loss to know whom to pay this month. The property again changed hands last week, when Dr. William Thomson bought it.

The change in the personnel of H. Muhr's Sons, which was forecasted in THE CIRCULAR-WEEKLY some months ago, has

at last materialized. Ralph Binder, who has had the diamond department of the store for the last 20 years, severed his connection with the firm Saturday. The diamond corner will hereafter be conducted by Mr. Kipling. Victor Binder, who was associated with his brother in the conduct of the diamond corner for seven years, severed his connection with the firm several weeks ago. It is rumored that Ralph and Victor Binder will start a retail store in a few weeks. Both are widely known in the trade and highly esteemed.

Springfield, Mass.

Springfield has two new stores of interest to the jewelry trade. One is the New Era Diamond Palace and the other is an optical company who have secured a prominent location on Main St. and have put in a splendid line of goods.

Walter L. Stannard, a member of Hayes, Stannard & Co., is last year's champion for long distance riding, having covered something over 38,000 miles, or several thousand miles more than his next nearest competitor. Most of the riding was done in connection with his business, his part in the firm being in going about to see customers and collecting.

LOFT TO LET

with or without power.

Very desirable for Jewelers or Silversmiths.

DEITSCH BROS.,
14 E. 17th St., New York.

Columbus, O.

Charles H. Backenstoe, jeweler, Fostoria, was married last Sunday to Miss Marie Wurtemberger, of Toledo.

H. W. Hildebrant, assignee of J. R. McComb, Shelby, has sold the stock of jewelry to O. G. Carter and J. M. Chandler, of Cleveland. They will close it out at cut rates, it is said, as soon as possible.

Administrator W. S. Bell, of the George H. Bonnet estate, at Zanesville, is selling out the jewelry stock at private sale. He has placed very low figures on it in order to obviate the necessity of selling at auction, but expects to dispose of what is not sold in this way at auction later on. This will close up a jewelry business which has been in the Bonnet family almost ever since Zanesville has been a town.

George Haughran was received at the penitentiary a few days ago to serve six years for attempting to hold up jeweler William Dorer, Bellaire. He walked into Mr. Dorer's store and commanded him to throw up his hands, but a son of the proprietor happened to be in the room and the men gave the robber a fight. He shot several times at the elder Dorer, but did not hurt him. He was at once arrested and sent to the penitentiary from which he was released only a few months before.

The case of Charles H. Blume, Marietta, against Haynes Bros., Newark, has been settled and dismissed. Some time ago a man went into the store of Haynes Bros. and manipulated the ring case, taking a diamond valued at \$135 and leaving one in its place that was worth about \$85. It seems that Mr. Blume had lost a ring in the same way and he went to Newark and identified the ring in Haynes Bros.' store as the one taken. The matter was settled satisfactorily to both parties and Haynes Bros. retain the ring.

Harrington & Nonnemacher have arranged to move from their present location on April 1 to 83 N. High St., where the new room will be completely remodeled for them. A new front in light wood or metal and plate glass will be put in and the floor will be laid with a handsome pattern of tile. For some years the firm have occupied a room in connection with a music house, but here they will be alone.

ONE HUNDRED THOUSAND AMERICAN WATCHES have **ABBOTT'S PATENT STEM-WINDING ATTACHMENTS**. A few million key-winding watches are still in use. A few jewelers may make a few dollars by sending a few of these watches for alteration to **HENRY ABBOTT, 9-11-13 Maiden Lane, New York.**

PIRIE MAC DONALD

gives you

GREETING. He has a workshop on the 16th floor of the Washington Life Building, New York, where he makes photographs and various other kinds of portraits of men. Not but that he loves women, as all good men should, but because he knows he can make men's pictures best. "Blessed is that man who has found his work."

News Gleanings.

E. C. Eager, agent, Syracuse, N. Y., is selling at auction.

Will DeSmidt has opened a jewelry store at Cedar Grove, Wis.

William E. Hall has removed to a new location at Johnstown, N. Y.

F. J. Stilson, Atlanta, Ga., has filed a voluntary petition in bankruptcy.

Charles L. Paaseh has discontinued his jewelry business at Newburgh, N. Y.

M. Mannerud, Lake Benton, Minn., will move his business to Hendricks, Minn.

On March 1 E. J. Gilbert, Fonda, N. Y., will remove to Fultonville, N. Y.

M. Weinstein has moved his jewelry store in Webster, S. Dak., into new quarters.

F. L. Hunke, Albany, N. Y., is attending to business again after a severe illness.

Christensen & Erikson have opened up a new stock of jewelry in Salt Lake City, Utah.

M. H. Rice, Montpelier, Vt., has failed, and is offering creditors 25 cents on the dollar.

W. W. Mitchell has decided to sell out his entire jewelry business located in Kaufman, Tex.

J. J. Binder is about to discontinue the jewelry business he has been conducting in Ashland, Wis.

William Kemp, Sr., is closing out the stock of jewelry which he has been operating in Flatonia, Tex.

R. C. Bernau, who has been in business at Abbeville, S. C., is preparing to locate in Greensboro, N. C.

S. Roseman, of Roseman Bros., San Antonio, Tex., has been sued for \$108, the value of some rings.

R. J. Gabriel has advertised the stock of jewelry for sale which he has been operating in Carthage, Mo.

Irving Oppel, of G. A. Oppel & Son, Little Falls, N. Y., has been confined to his home by illness.

For the past three weeks John Krank, Schenectady, N. Y., has been holding an auction sale of his stock.

Edmund Spencer is now the honored orator of Hudson Council, of the Royal Arcanum, at Hudson, N. Y.

E. C. Bennett, jeweler, Zumbrota, Minn., was married at Red Wing, Minn., last week to Miss Beatrice Gahler.

K. B. Hefte has moved his jewelry store in Carthage, S. Dak., into new quarters with T. W. Howey's drug store.

S. W. Risien has removed the stock of

jewelry which has been located in Mexia, Tex., to a new location in Corsicana, Tex.

A transcript of judgment for \$829 has been filed against George W. Ryan, Jr., of George W. Ryan & Co., Omaha, Neb.

J. Lanning, jeweler, Wesley, Ia., died recently of typhoid fever, of which he had been sick all Winter. He leaves a widow.

The E. R. Moses Mercantile Co., Great Bend, Kan., have sold out the branch store they have been conducting in Clafin, Kan.

E. Hayes, who is engaged in the jewelry and musical instrument business in Norfolk, Neb., has given a chattel mortgage for \$250.

H. Roberts, East Grand Forks, Minn., who was recently burned out, has accepted a position at Dickinson, N. Dak., at the bench.

Anderson & Houghton have practically suspended business at their store at Little Falls, N. Y., while the same is undergoing a complete transformation.

The interest of the late F. H. Auerbaeh in the jewelry and dry goods business of F. Auerbaeh & Bro., Salt Lake City, Utah, has been disposed of.

Otto L. Heintz and Edwin A. Heintz have been admitted into the firm of Heintz Bros., Buffalo, N. Y., and the firm are continuing under the same style.

P. Nelson & Co., Duluth, Minn., who have a department store in that city, will open up another store in West Duluth, where they will carry a large stock of jewelry.

B. W. Moore, jeweler, Stewartville, Minn., has accepted the representation of the People's Telephone Co. there. He is succeeded as jeweler by Clarence Moore, of Winona, Minn.

In some sections the jewelry trade seems to get the political fever. At Canajoharie, N. Y., F. L. Burton is running for Town Clerk; Charles A. Hagadorn, for Police Justice, while William J. Roser, an ex-jeweler, is a candidate for Supervisor.

John Rosendahl has closed his jewelry business at Echo, Minn., and has moved to Winthrop, Minn., where he will open a stock. He will also serve as watch inspector for the Minneapolis and St. Louis Railway for the division ending at Morton.

The application to confirm the composition of 30 per cent. cash offered by the bankrupt jewelry firm of Taylor Bros., Houston, Tex., a few days ago, was heard by the referee, Feb. 6. Over two-thirds of the creditors accepted the proposition and none of them filed any objection. Judge Burnett, the referee, recommended the confirmation of the composition and forwarded the papers to Judge Bryant for his action.

J. B. BOWDEN & CO.,

1 Maiden Lane,

NEW YORK.

U. G. Miller, of Columbus Junction, Ia., will go into the jewelry business in West Liberty, Ia.

Jule K. Pickett, Salem, O., will move to 111 E. Main St. The store will be greatly improved.

Mrs. George Petchtle will continue the jewelry business of her late husband in Middleburg, N. Y.

L. S. Clark, a jeweler and optician, of 18 years' experience, has started a jewelry store in Glenville, O.

Ash Pierce, of Anaconda, Mon., was in Everett, Wash., last week, looking for a business location for a jewelry store.

Andrew Anderson, of Park River, N. D., will open a jewelry store in the O. H. Nelson building, Thief River Falls, Minn.

M. Korman has closed out his store in St. Michael's, Md., at auction, and with his family removed to Washington, D. C.

A small blaze occurred in the rooms over L. Fischel's jewelry store, New Orleans, La., a few days ago. Little damage was done.

It is reported that Carl Milligan, a jeweler from Keosauqua, Ia., has rented a store in New London, Ia., and will go into business there soon.

J. E. Cochran and W. N. Burke have purchased the jewelry business of D. E. Kennedy, Tifton, Ga., and opened business, Feb. 1.

In a fire in Dover, N. J., a few days ago, the jewelry stock of Edward Scott was greatly damaged by water. Loss covered by insurance.

Mrs. Fidelia Ewell Foucher, wife of Charles H. Foucher, jeweler, Wyoming, N. Y., died last Saturday afternoon, aged 70 years and 6 months.

A. M. Ambler, Middletown, N. Y., has been appointed watch inspector and examiner for the Ontario and Western Railroad in place of B. F. Gordon, who retired Feb. 1.

Hugh L. Coffman, who has been employed in the J. C. Herkner Jewelry Co.'s store, Grand Rapids, Mich., accompanied by his mother and sister, has gone to Colorado Springs to reside permanently.

John H. Merz, Sr., aged 82, died at the residence of his son John, at Hopewell, N. J., some days ago, from paralysis. Deceased was well known in Somerville, N. J., and for many years conducted a jewelry store there.

Austin M. Edwards, jeweler and silversmith, Lancaster, N. Y., has petitioned in bankruptcy. He acknowledges that there are unsecured debts against him amounting to \$19,891.68, and that he has assets to the amount of \$50, which he claims to be exempt.

B. Siegel, loan broker, Des Moines, Ia., has decided to open a wholesale jewelry house in that city. At present Mr. Siegel is in the east, procuring a stock. It is understood that the house will be opened up in one of the store rooms on Court Ave., in the wholesale district.

John Mitchell, with his wife and two children, arrived in Nassau, N. Y., about a month ago, claiming to be a manufacturing jeweler. He hired a residence and a store, and while they were undergoing repairs the whole family left for parts unknown, leaving several unpaid bills.

OPALS.

We have received from Australia a large consignment of rough Opals, which we are cutting. We will, on receipt of \$10.00, send an **assorted package of 10 carats** to any jeweler and return money if goods are not worth double that price.

GRADED DIAMONDS.

There are several different and distinct grades of diamonds of the finer qualities. These are known in the "Rough" to cutters as Jaegers, Top Crystals, Crystals, Top Silvercapes and Silvercapes.

Each of these grades we indicate by letters or numbers. Each diamond we sell, whether loose or mounted, is marked with a number or letter to indicate the quality, and, remember, we guarantee them to be exactly as represented.

We believe even those who are well posted in the different grades would find our system of much assistance in making sales. Our prices will compare favorably with any in the market.

We cater for special memorandum sales. Just try us once and let us show you what we can do in quality and price.

S. C. SCOTT MFG. CO.,
 9, 11, 13 Maiden Lane,
 NEW YORK.

Traveling representatives may consider these columns open for the publication of any news or items of interest regarding themselves or their conferees.

John F. Branigan has severed his connection as traveling salesman with Torrey Jewelry Co., Attleboro, Mass., and is now connected with J. M. Fraser & Co.,

Providence, R. I.

Harry Birch was in Charlotte, N. C., on the 7th. Maurice Rosenbaum, of Rosenbaum & Adler, New York, left for the west Friday.

William Cooper, of Cooper & Forman, New York, is sick with grip at Anderson, N. C.

Seymour W. Frolichstein and Fred H. England, of Frolichstein & England, New York, left for their territories Saturday and yesterday respectively.

Mr. Platt, Theodore W. Foster & Bro. Co.; I. Price, Byron L. Strasburger & Co.; Mr. Kennedy, Joseph Fahys & Co., called on Indianapolis, Ind., trade last week.

Among the representatives of the wholesale jewelry houses in Trenton, N. J., recently were: Mr. Stanborough, Carter, Hastings & Howe; Robert Gatter; William Link; E. Brennan, for L. Witsenhausen.

A meeting of the committee on reorganization of the New England Jewelry Traveling Men's Association will be held about March 1. The exact date and place of meeting will be announced later. This committee were appointed at the annual meeting held in January.

The following were in Minneapolis and St. Paul, Minn., the past week: I. Wile, Electric City Box Co.; Lewis L. Squire, F. H. Cutler & Co.; Rudolph Cony, L. Heller & Son; Mr. Peck, O. W. Bullock & Co.; W. A. Moore, F. W. Gesswein Co.; and representative of E. G. Webster & Son.

Among the eastern traveling men in St. Louis, Mo., last week were: Charles Higbee, H. F. Barrows & Co.; Mike Lambert, Henry Zimmern & Co.; Charles DeWolf, Landers, Fray & Clark; Mr. Klipper, Hipp, Didisheim & Bro.; Mr. Krugler, H. A. Kirby Co.; Harry B. Kennion, Parks Bros. & Rogers; Henry Froehlich, H. Froehlich & Co.

The following traveling salesmen recently visited the trade in Columbus, O.: C. P. Koch, The Meyrowitz Mfg. Co.; A. E. Lavigne, Mathey Bros., Mathez & Co.; T. E. Bowne, E. Ira Richards & Co.; Emanuel Jacobson, Jacobson Bros.; Fred. L. Baker, The Non-Retailing Co.; Julian Bechet, Shafer & Douglas; T. C. Keys, L. E. Waterman Co.; Fred. Casper, The Mauser Mfg. Co.

Traveling salesmen who called on Davenport, Ia., jewelers the past week were: David Beer, Bernheim, Cohen & Beer; Henry Froehlich, Jr., Henry Froehlich & Co.; Frank N. Wilcox, International Silver Co.; Louis Freund, Henry Freund & Bro.; D. Wile, Buffalo Jewelry Case Co.; M. Stein, Louis Wolfsheim & Co.; A. N. Brittan, M. A. Mead & Co.; Max Noel, Stein & Ellbogen Co.; L. Newhouse, L. Newhouse & Co.

Travelers have been more numerous in Toronto, Ont., latterly than at any time since the holidays, among the more recent arrivals being: E. A. Woodmancey, Potter & Buffinton, Providence; Mr. Goldberg, Heintz & Goldberg, Chicago; George E. Smith, Theodore W. Foster & Bro. Co., Providence; Fred. C. Steimann, F. C. Steimann & Co., New York; F. H. Wilkinson, for A. Wittnauer, New York. The trade are buying freely in anticipation of a good Spring season.

Among the traveling salesmen who recently visited the trade in Detroit, Mich., were the following: H. D. Cretchen, Hayden W. Wheeler & Co.; F. E. Jackson, for William Davidson; M. H. King,

M. H. King & Co.; William Hanauer, Julius Becker & Co.; F. D. Newberger, R. Blackinton & Co.; W. J. Carrow, Mandeville, Carrow & Crane; A. D. Engelsman, Goodfriend Bros.; E. C. Stone, Battin & Co.; F. C. Staudinger, Sansbury & Nellis; Lewis P. Cook, S. Sternau & Co.; M. E. Van Bergh, Van Bergh Silver Plate Co.; Lewis L. Squire, F. H. Cutler & Co.; W. S. Dudley, Rogers, Smith & Co.

The traveling men who visited Kansas City, Mo., merchants last week were: George J. Gruen, D. Gruen & Sons; S. C. Howard, Dominick & Haff; G. A. Webster; Arthur E. Hall, Holmes & Edwards Silver Co.; George E. Butterworth; F. L. Pettet, Waterbury Clock Co.; R. Arnstein, Arnstein Bros. & Co.; A. Kiersky, A. L. Reed & Co.; R. H. Schley, Sloan & Co.; Louis Freund, Henry Freund & Bro.; O. H. Hull, The Pairpoint Corporation; C. A. Garlick, Schrader, Wittstein Co.; J. W. Payne, Meriden Cutlery Co.; Mr. Bliss, Kremenetz & Co.

Stern, Stern Bros. & Co.; Mr. Tarlton, Wightman & Hough Co.; Otto Wormser, Joseph Frankel's Sons; Mr. Pelletreau, David Kaiser & Co.; Harry F. Barrows, H. F. Barrows & Co.; T. G. Frothingham, T. G. Frothingham & Co.; E. I. Franklin, E. I. Franklin & Co.; R. G. Sweet, R. F. Simmons Co.; E. R. Snow, Keystone Watch Case Co.; George Becker, George Becker & Co.; Charles W. Jenks, Charles W. Jenks & Bro.; W. D. Fenimore, California Optical Co.; Joseph Dupaul, Dupaul-Young Optical Co.; C. D. Waugh, E. Kirstein Sons Co.; Charles Keller, Charles Keller & Co.; Mr. Cahoon, Providence Optical Co.

A. Eastwick Wood, traveler for the Wilcox Silver Plate Co., of the International Silver Co., sends to THE CIRCULAR-WEEKLY an account of a thrilling experience he had on a recent trip south. He had found business good and everyone was looking for a prosperous Spring trade; cotton had touched 10 cents and an even higher figure was looked for; in fact, the outlook was very bright. Mr. Wood started from the hotel in Columbia, N. C., in a carriage to the depot to take a train for Greenville, S. C., when just as he was within a block of the station the horse took fright at a steam roller and started to run away. This in itself was not of much consequence, as the driver could have pulled to a stop, but he kept pulling and tugging at the lines until finally the bit broke, which threw the bridle over the horse's head. This seemed to scare the horse more than anything else, and then he started at a speed that would have done credit to Salvo. The vehicle was the ordinary light phaeton style with two seats; the driver, with Mr. Wood's trunks, was on the front seat, while Mr. Wood was in the back. The traveler sat for a moment perfectly cool and collected, taking in the situation, and he concluded that he would rather take his chances of jumping out to being smashed against a telephone pole. So he stepped out on the step and jumped. He landed on his feet and immediately "slid for second," scraping his kneecap and bruising himself pretty badly. But the wagon was smashed to kindling wood, the horse was hurt, the driver had his arm broken and was cut about the head. After being taken to a drug store and having his knee washed and bound up, Mr. Wood was enabled to continue his journey to Greenville, where he arrived five hours later so stiff and sore that he had to be helped from the train. As soon as he got to the hotel he sent for D. C. Durham, of The Gilreath-Durham Co., who came over immediately and procured a good physician, who made a critical examination and pronounced the case not serious, but advised complete rest, which Mr. Wood did not take, and he was laid up twice. Then he concluded to go home and remain there until perfectly well. He arrived at his home last Sunday afternoon on crutches and will remain quiet until about the 15th of this month, when he will go direct to Augusta, Ga., and finish his trip.

Pittsburgh.

O'Gusky & Meyers are holding an auction sale at their Carnegie store.

M. E. Shutterly, lately with A. E. Siviter & Co., has gone with Joseph De Roy.

A. C. Fry, Frankstown Ave., East End, is holding an auction sale to quit the business.

The death of Whitehead Siviter, young son of Mr. and Mrs. A. E. Siviter, occurred on Sunday last.

Mr. Brillhart, Sr., who is in charge of the late Max P. Wilson's store, Indiana, Pa., will start a store in that town.

H. Carlson has left the Keystone Jewelry Co. to go with Carlson Bros., Bloomfield, Pa. M. Henry takes his place.

A. E. Siedle, the East End jeweler, expects to make a number of improvements before moving to his new quarters on Penn Ave.

Graf & Niemann, 6011 Penn Ave., are disposing of the present stock, "25 per cent. off," preparatory to their removal to 6th St.

Liljedahl & Lundborg will remove from Main and 8th Sts., Braddock, Pa., to Main and 6th Sts., where they will have better facilities for their increasing business.

The matrimonial engagement of Harry Heeren, son of Otto Heeren, of Heeren Bros. & Co., to Miss Ethelyn B. Lowry, Du Bois, Pa., is formally announced.

James McConahy, who for 25 years was a jeweler at New Castle, Pa., died last week in the Warren, Pa., hospital. He was a Civil War veteran and leaves a wife and two daughters.

Cohen & Rosenthal are offering creditors 25 cents on the dollar. They state that if the offer is not accepted they will go into bankruptcy. They further state their liabilities are about \$12,000 with assets of not more than \$3,000. In November last the firm claimed assets of \$25,000 and liabilities of \$9,000.

Buyers in the city last week were: H. H. Weylman and Mrs. Weylman, Kittanning, Pa.; M. J. Scudder and Mrs. Scudder, St. Mary's, W. Va.; H. R. Brown, New Brighton, Pa.; John Z. Simpson, Blairsville, Pa.; W. F. Brehm, Rochester, Pa.; G. V. Brady, Washington, Pa.; Leroy Swan, New Castle, Pa.; A. French Poole, Washington, Pa.; S. C. Schuster, Latrobe, Pa.; John Linnenbrink, Rochester, Pa.; Charles Loughman, McKee's Rocks, Pa.

A stranger entered the store of Caplan & Teplitz, Monessen, Pa., one day last week and asked to see some diamond rings. While Mr. Caplan's attention was apparently momentarily distracted, the stranger dropped a \$100 diamond ring into his coat pocket and started toward the door. Quick as a flash, however, Jeweler Caplan drew a revolver, leveled it at the astonished stranger, and demanded his ring. The request was immediately acceded to, the man disappeared and Jeweler Caplan is the hero of the hour in Monessen, McKeesport and Braddock circles.

M. N. Grasby, jeweler, La Crosse, Wis., left town about a fortnight ago, leaving his clerk in charge. Feb. 4 his stock was seized on a writ of attachment issued at the instance of A. Hirsch & Co. and M. S. Fleishman Co., of Chicago.

TRADE PAPER ADVTG. AGENCY N.Y. #149

The Francis Engraver

is the only machine having a turning point. If you are a mechanic you know what that means. If you are not, and do not really understand why it is said to be better, post up before buying or you will always regret it. This journal will have fifty-two little advertisements in it this fiscal year, commencing with the full-page advertisement that appeared last week. You may be prejudiced against all engraving machines, as many are who do not understand them, and judge by what they have seen in the past, but don't let these little squibs escape your notice. They will all be different, and before you know it you will understand more about engraving machines than you ever expected to, and think more and more of them. When you have time, write me to send you catalogue, etc. If you ever happen to find yourself confronted with the problem of how to do your engraving best and cheapest, if you don't think the time and postage well invested, I'll pay you for the trouble.

Address, **A. E. FRANCIS,**
No. 780 Cedar Ave., Cleveland, Ohio.

VOL. XLII.

NEW YORK, WEDNESDAY, FEBRUARY 13, 1901.

No. 2.

Chicago Notes.

All communications in reference to the Chicago department of *The Jewelers' Circular-Weekly*, addressed to Stephen Parlin, 134 Van Buren St., Room 414, Chicago, will receive prompt attention.

At 10.30 o'clock on the night of Feb. 4, a fire occurred at 146 State St., near Madison, the blaze originating in the cellar by the crossing of electric light wires and doing \$3,500 damage, \$500 of which was represented in smashed plate glass. The Barrios Diamond Co., J. A. and S. T. Harris, local agents, suffered the principal loss. They occupied the ground floor.

Mrs. John J. Watson, who, as Miss Amy Sesselberg, was arrested in the store of C. D. Peacock, a few weeks ago, on a charge of stealing a diamond ring, has brought suit against the firm for \$50,000 damages. The young woman's fiancé, Mr. Watson, came to her aid at the time of her arrest and has since married her. Miss Sesselberg was discharged upon the preliminary hearing of the accusation against her. She lived in Kaukauna, Wis., and was visiting in this city at the time of her arrest.

Chemicals exploding in the laboratory of the Economical Drug Co., 84 State St., are believed to have been the cause of a fire there at 11 o'clock on the night of Feb. 5, and which did about \$5,000 damage in that and the building at 86 State St. The flames worked up through the wall to the south into Seaver's restaurant, but the damage there was almost entirely from smoke. F. C. Happel & Co., wholesale jewelers, on the third floor at 84 State St., also suffered damage by smoke. Their loss is placed at \$350.

Henry Landsman, who was arrested last Monday, charged with robbery, acquainted the police with a new incentive to robbery. He wants to learn a trade, and for that reason he stole, in hopes of being sent to the penitentiary. "I want to go there to learn some trade because I cannot live at my present trade on \$7 a week." That was the way he explained it. Landsman was employed as a jeweler by J. Rosenthal, 3138 Cottage Grove Ave. He is 25 years of age. A few days ago he disappeared and so did an \$85 diamond ring belonging to his employer. When Henry was arrested six pawn tickets were found in his possession. He said they were for rings he had stolen from his brother, who is a jeweler also, and from

Cincinnati.

Joseph Becker, agent for Joseph Fahys & Co., is in Dallas, Tex., calling on old customers.

E. E. Mosiman, Bluffton, Ind., is arranging his business to leave on the first of March for a two months' tour of California.

A. Clooney, Maysville, Ky., was in town last week, buying goods. M. Basinger, of Basinger & Cameron, Lima, O., was in the city.

Frank Rose, of the Ophir Diamond Co., this city, went to Milwaukee last week to marry Miss Evelyn Hartly. They will reside in this city.

The death of L. Gutmann will not necessitate any change in the firm. The sons will carry on the business under the same firm name of L. Gutmann & Sons.

Jack Bitterman, of Bitterman Bros., Evansville, Ind., will be married on Feb. 14 to Miss Hattie Sholer, of that city. They will go east on a wedding trip.

Irving Herman has returned from a trip and says business is very good through the country. He reports that Jenkins & Co., Richmond, Ind., have opened a branch store at Elwood, Ind.

Morris Strauss, formerly with the old firm of Schroder & Herman, when they were on Race St., a number of years ago, has returned from North Dakota, where he has been for the past 10 years.

Mayo Loeb, of Herman & Loeb, son of L. Loeb, of this firm, has been laid up at his home for five weeks. This firm have been seriously handicapped the past three months by the illness of their force.

Frank Herschede and wife start this week for a seven weeks' trip to California. They will visit all the large cities and resorts en route and make a visit to relatives at Los Angeles. This is the first pleasure trip Mr. Herschede has taken in years, and he expects to thoroughly enjoy it and be benefited by it.

The Wadsworth Watch Case Co. shut down Monday on account of the funeral of Miss Stegeman, which occurred that day. Miss Stegeman was the sister of Mr. Wadsworth's wife and also of Harry Stegeman, of the same company. She had gone south for her health and died at Asheville, N. C., last week.

Gustave Fox & Co. have got out a new model of their patented elk head for watch cases. The ornament will be made in gold and silver and will have rivets on the back to rivet it to the case. Some are made with a circle of enamel, in which the

name or inscription may be put. The gold ones will be very elaborate and some of them will be quite expensive, but their beauty will commend them to the high class trade.

Joseph Noterman & Co. made last week a solid gold medal for M. Pieper, the Covington jeweler, which is to be presented to the Covington Chief of Police. The medal cost about \$300, is four inches long, the medallion containing the State seal in colored gold. A wreath of laurel in sage colored gold surrounds the seal. The whole is suspended from a spread eagle. The seal is encircled with small diamonds and a 1-karat diamond is in the top. It is a magnificent piece of work.

Minneapolis and St. Paul.

W. F. Kuhn, manufacturing jeweler, St. Paul, has removed from 274 E. 7th St. to 214 E. 7th St.

The journeymen jewelers of Minneapolis contemplate forming a union under the trades and labor rules.

H. E. Schloss, of B. Schuette's Minneapolis store, has left for a northern trip. He will be gone a fortnight.

Rentz Bros., Minneapolis, are setting up their new hydraulic press. Fred. Damcke, engraver for this firm, has been ill with rheumatism for 10 weeks.

A hearing as to the disposition of goods and assets in the case of Abraham Cohen, insolvent jeweler, St. Paul, occurred before the referee last week. Cohen gave conflicting answers to questions and got thoroughly mixed up. He testified to losing \$5,000 on a bond deal in June, after which he was confronted with a statement which he made to an eastern clock company, Aug. 1, in which he stated that his liabilities, all told, amounted to something over \$1,000, and his net assets exceeded \$11,000. Following this meeting his attorney presented a statement to the effect that he, Cohen, suffered from a bad memory and from ignorance of the English language; that since the hearing his memory had been refreshed by interviews with people with whom he had transactions outside the store, and that his statements were incomplete because of his failure to understand questions and because of his poor memory. Further, the statement declares that through "shame and abashment" he was unwilling at the previous hearing to state that he had lost \$5,000 at gaming. In view of these statements a further hearing was asked. It was set for Feb. 12.

Kansas City.

The store of C. S. Raymond Sons is closed at present.

E. A. Church, Oak Grove, Kan., has opened a store for himself at Buckner, Mo.

W. H. Fitzsimmons, engraver for Cady & Olmstead, was called to Pottstown, Pa., by the sudden illness of his wife.

C. B. Norton, president of the Norton-Paulson Jewelry Co., is expected to return from his trip with the Commercial Club this week.

Ike Gleason, for many years with M. B. Wright and later with the Streicher Watch and Jewelry Co., has opened a jewelry store for himself on 12th St.

Cady & Olmstead have received an advance card addressed to "Kadey & Olmsted" from a firm they have traded with for years. They prefer to have their names spelled in the usual manner.

Arthur Clark, of the L. Bauman Jewelry Co., St. Louis, Mo., and formerly with Norton-Paulson Jewelry Co., this city, was called to Kansas City, Saturday, by his wife who is seriously ill but is slightly improved at present.

Sedalia Council, No. 47, United Commercial Travelers, passed resolutions last week indorsing Edward S. Villmoare for coal oil inspector of Kansas City. Mr. Villmoare travels for the Norton-Paulson Jewelry Co.

E. M. Crellin, Chillicothe, Mo., has entered the employ of Duck & Missman, as watchmaker. Duck & Missman are a new firm who went into business just previous to the holidays, and they report business as keeping up very nicely.

Bullard & Moore, manufacturers of photo-jewelry, buttons, medallions, etc., and dealers in all kinds of plated and solid rims and frames, have dissolved partnership. The dissolution took effect Feb. 1, Harry G. Moore taking the Cincinnati plant, which he has been managing for over a year, and George A. Bullard taking the Kansas City house, which was started nearly four years ago and of which Mr. Bullard has had charge for the past 15 months.

J. H. Baker, formerly in business at Horton, Kan., and who sold out his store on Grand Ave., last Fall, and assisted L. J. Marks with his recent auction, will go east early in March to purchase tools, machinery and a stock to open a new manufacturing business here. Mr. Baker will be the manager and secretary of the firm who will be called the Kansas City Wholesale Jewelry Mfg. Co. They will have a capital stock of \$50,000 and expect to have the business running by the first of May. The firm have secured rooms in the New Nelson building, at Missouri Ave. and Main St.

The merchants from the surrounding territory who visited Kansas City, last week, were: C. C. Stevenson, Pittsfield, Kan.; M. C. Rosenfield, Leavenworth,

Kan.; A. L. Howard, Louisburg, Kan.; T. C. Pitts, Aldrich, Mo.; S. J. Huey, Excelsior Springs, Mo.; Leroy Van Lehn, Stafford, Kan.; F. W. Swearingen, Topeka, Kan.; McCoy M. Stott, Miraville, Mo.; D. M. Conn, Cameron, Mo.; E. A. Burlingame, Argentine, Kan.; C. E. McCoy, Polo, Mo.; August Schlieker, Vinita, I. T.; J. A. Robb, Almira, Kan.; Frank Wuerth, son of J. H. Wuerth, of Leavenworth, Kan., and junior member of J. H. Weurth & Son; C. E. VanVoorhis, Yates Center, Kan.; J. O. VanVoorhis, Osawatomie, Kan., and J. E. Watkins, Tonganoxie, Kan.

Indianapolis.

Charles Smethurst, Converse, Ind., has sold out his jewelry business to Merle Agness.

Since Feb. 10 Phil Diel, Marion, Ind., has occupied a fine room in the Glass block. This store is now one of the handsomest jewelry stores in the State.

Chris. Bernloehr has taken his brother, John, into partnership. The firm are now known as Bernloehr Bros. Charles Bernloehr will soon finish his course of study with the Illinois Watch Co., and become watchmaker for his brothers.

Buyers in the city last week included: E. M. Wilson, Anderson, Ind.; J. A. Meissen, Cicero, Ind.; Joseph Booth, of I. Booth & Son, Tipton, Ind.; George Drake, Pendleton, Ind.; E. A. Wiley, Mooresville, Ind.; J. W. Thompson, Danville, Ind.

Abraham B. Bowman, aged 23, died at his residence Feb. 3. Mr. Bowman was well known in the S. Meridian St. wholesale district, having held a confidential position with Schnull & Co. for seven years. He left the employ of the firm last October and re-engaged in the jewelry business, the firm being known as the Bowman Jewelry Co.

Fred. H. Schmidt died Feb. 4, at his home, 16 Elm St., after an illness of 10 months. For several years he was an active traveling man, and later a jeweler in Jackson Place. Four months ago he was operated upon, but death was inevitable and four weeks ago he was taken home to die. A widow and two children survive him. He was born in Nassau, Germany, 51 years ago, and had lived in this city since 1880.

Springfield, Ill.

The factory of the Illinois Watch Co. commenced working 12 hours per day on Feb. 4, owing to the steadily increasing demand for their watches.

James Keithly, a fireman employed by the Illinois Watch Co., while crossing the tracks of the Illinois Central, near the Union depot, was struck by the engine of a passenger train and seriously injured, being badly cut about the shoulders. His recovery is doubtful.

NEW FIRM—NEW GOODS—NEW IDEAS.

\$1000 A YEAR FOR LIFE.

A thorough investigation will convince you that \$12.50 per month invested for six years in the Montezuma Plantation will give you an income of \$1,000 for life. It will convince you that the enterprise is

NOT A SPECULATION

but a solid, conservative investment, in which the organizers, to make their profit, must make a success for the investors. The plantation consists of 6,000 acres and is being planted to sugar and rubber.

The interest of one is the interest of all and each shareholder has only one vote—impossible to freeze out.

The Mexican Coffee and Rubber Growers' Association manages the plantation for 25 years. The mercantile agencies will tell you that it has \$5,000,000 capital and \$1,000,000 assets, including its own steamboats.

SIX PER CENT. GUARANTEED FOR SIX YEARS.

To investors who pay all cash the Association guarantees six per cent. for six years and the Chicago Title and Trust Co. agrees to pay it, which makes it as sure as the interest on a Government bond. The Trust Co., capital \$1,500,000, also holds the title to the land and receives every dollar paid by the investors.

Not one of all the authorities on the planet places the profit on rubber and sugar at less than 50 per cent.—most all at 100 to 200.

Sir Thomas Lipton says:

"For sure, large and permanent returns nothing equals a well managed tropical plantation."

Russell Sage says:

"If I were a younger man I would invest my money in a rubber plantation, as it is better than a bank. Spreckles is making millions from his sugar plantation in Hawaii."

You can invest as little as \$2.50 per month. The shares are non-forfeitable after three years' payment. If the investor dies the amount paid will be returned. The members annually elect an inspector to visit the land and excursions will be conducted. Many Chicago business and professional men have taken shares and indorsed this enterprise. We invite the most rigid investigation. Write for literature

MONTEZUMA PLANTATION,

1107 Ashland Block, CHICAGO.

San Francisco.

Leon Carran, of Carran & Green, goes east this week.

Taber Bros. will reopen their establishment here soon.

Mr. and Mrs. F. C. Ewert, of Woodland, Cal., were in this city last week.

Walter King, with Charles Haas & Son, Stockton, Cal., is enjoying a vacation here.

H. E. Hall will go to Honolulu, Hawaii, this week. He will be away about six weeks.

George Smith, representing the Keystone Watch Case Co., is doing some missionary work on this coast.

W. Kenna, representing the Elgin National Watch Co., is in from Los Angeles on his way to the Pacific Northwest.

J. A. Young, who recently purchased the business of Haskell & Muegge, this city, will take to the road about the 15th inst.

Y. H. Boudreau, Modesto, Cal., has sold his business there to W. L. Tregea, who has been with J. N. Brittain for several years.

Percy Greer, auctioneer, who has just had a successful sale in Los Angeles, Cal., is now at Soledad, according to reports received in this city.

G. Beninghausen, Seattle, Wash., was at the Grand Hotel, this city, last week. A. P. Hall, Visalia, Cal., was among our visitors from the interior.

A large number of travelers for eastern houses have visited this city and have met with unusual success. Our jobbers are rapidly getting their men out and anticipate a lively demand.

A. Hansen, Seattle, Wash., is greatly pleased that Seattle has secured the building of a United States battleship. The contract price of \$3,600,000 will materially assist the merchants there.

George E. Paine, with E. I. Franklin & Co., North Attleboro, and S. J. Hughes, with George H. Cahoon & Co., Providence, were among the representatives of eastern manufacturers here last week.

Pacific Coast Notes.

E. P. Segret, watchmaker and jeweler, has opened an establishment at Carters, Cal.

A. E. Howard, of Howard & Ingalsbe, Merced, Cal., has purchased Mr. Ingalsbe's interest in the jewelry establishment and will hereafter conduct it as sole proprietor.

W. T. Harris, Jack Moore and Thomas Lackey, of San Bernardino, Cal., have returned to that city from a trip into the des-

ert beyond Kramer, where they investigated some opal beds. They were gone almost a month and seem satisfied with the prospect.

Omaha.

E. Baldwin, Lexington, Neb., has sold out.

George Perkins, Genoa, Neb., has sold out to A. B. Miller.

W. H. Weir, Boone, Ia., was in the city last week purchasing goods.

H. E. Snyder, Plattsmouth, Neb., was in the city last week buying goods.

Homer Wicker, with A. L. Coleman, the South Omaha jeweler, has accepted a position with L. P. Judd, Cedar Rapids, Neb.

A. M. Molesworth, Shelby, Ia., reported as closing out, has removed to Marysville, Mo., where he will engage in the jewelry business.

T. L. Combs & Co., "the Busy Jewelers," are making extensive improvements in their store building. A balcony is being built in which the work shop will be placed, and a neat private office is being furnished on the ground floor.

George W. Ryan has returned from a visit of several weeks' duration in Milwaukee. During his absence handsome improvements have been made in his store. The whole front was taken out and new plate glass with deep recess windows for showing goods erected.

W. Hanson, of the horological school, has returned to his home in Kansas. Edward Morey, Valentine, Neb., has entered for a course in watchmaking. Percy Wilkins has established himself in business in New Hampton, Ia., and has engaged F. C. Calhoun as his assistant.

Hiram E. Smith, who sold his jewelry business in Madison, Wis., to Mr. Gamm about two years ago and then spent a year in Norway restoring his health, has now bought out the business of A. E. Thoreson, at 122 E. Main St., that city. Mr. Thoreson goes to California, where he has a brother interested in sawmills and coal mines.

Thomas W. Humphrey, who had been in the jewelry business in Billings, Mon., several years, has sold his entire stock to J. Forester. Mr. Forester will remove his stock from the Belknap block to the location which Mr. Humphrey has held, consolidating the two stocks. Mr. Humphrey has not yet decided what he will do, but he will remain in Billings for the present. He is offering his creditors 33 cents on the dollar.

PHOTO BUTTON JEWELRY.

NOT A FAD. HAS COME TO STAY.

Send for our 48-page illustrated catalogue of the largest assortment manufactured. We are headquarters for Photo Buttons, Advertising Buttons, Button Machines, Button Findings, and everything pertaining to the business.

ST. LOUIS BUTTON CO.,

No. 620 N. Broadway,

ST. LOUIS, MO.

Mention The Jewelers Circular-Weekly.

St. Louis.

TRADE CONDITIONS.

The jewelry business continues quiet, with little prospect of it being better until the Spring trade sets in. January was good towards the last and many jewelers who thought they would fail in doing the amount of business they did last January pulled ahead.

John C. Dueber, president of the Dueber-Hampden Co., Canton, O., was in St. Louis last week.

Joe McKenna, manager of the material department of the Bauman-Massa Jewelry Co., has been quite ill for several days with grip.

There were but few near-by buyers in the city last week. Among them were: Roy Goulding, of E. H. Goulding's Sons, of Alton, Ill., and C. H. Bard, Sedalia, Mo.

The new show windows of the Merrick, Walsh & Phelps Jewelry Co. are now completed and make a very handsome appearance. They are large and afford an opportunity for a fine display of bric-à-brac, jewelry, etc.

Miss A. Meyer, bookkeeper for several years for J. W. Cary & Co., Holland building, left the services of that firm last week and will be married this week. She was very popular with her late employers and the well wishes of that firm and her many friends will go with her.

F. L. Jaccard, the Texas traveler for the Bauman-Massa Jewelry Co., came in Feb. 9 to attend the funeral of his mother, Mrs. Sophie Jaccard, who died at De Soto, Mo., Feb. 8, at the age of 74 years. Mrs. Jaccard's husband was a distant relative of the well known jewelers by that name who were once in business in this city.

J. C. Adams, manager of the watch department of the Mermod & Jaccard Jewelry Co., will go out on a trip this week over the lines of the Burlington and Wabash Railroads in the interest of the Mermod-Jaccard new timekeeper, the "Paragon," which is specially adapted for railroad service. He will be gone two weeks.

The Retail Jewelers' Association of Missouri are making special preparations

for their banquet, Thursday evening, Feb. 14. Plates will be laid for 40 or 50 persons, but more can be taken care of if they attend. A number of prominent business men have been booked for speeches and the subject of the World's Fair will be touched upon. Among those who will probably address the members are: Congressman Richard Bartholdt, Judge John A. Talty, of the Circuit Court, and Hon. Robert H. Kern. Others are also expected.

Thieves broke the large plate glass window of Joseph J. Hoepffner's jewelry store, 1231 N. 13th St., about 8 o'clock on the evening of Feb. 8, and stole a tray of valuable diamond rings. They succeeded in getting away with their plunder and no clue was left which would lead to their identity. Mr. Hoepffner, who was in his store when the burglary was committed, gave chase to the men, but they escaped into a nearby market after firing at their pursuer.

Detroit.

Nearly every jeweler in the city is taking inventory or preparing to do so shortly. Wright, Kay & Co. will take stock after hours this year.

A glittering array of prizes to be awarded winners in the Detroit bonspiel contest and the Michigan Whist Association tournament is on exhibition in the show windows of Wright, Kay & Co.

H. A. Bromberg, jeweler, Battle Creek, last week made three sales of diamonds aggregating \$1,100. He declares that more diamonds have been sold during the past year than during the previous five years. Investors are buying only the very best quality.

The largest medal press in Philadelphia, Pa., and probably in this country, is in the factory of the Peter L. Krider Co. Heavy bronze medals, about five inches in diameter, can be struck off on this press, which has an arm 14 feet long.

667,181. SAFETY WATCH-CARRYING DEVICE. JENNIE BEEBE, Los Angeles, Cal., assignor of one-half to John Cristian Haag, same place. Filed Feb. 26, 1900. Serial No. 6,632. (No model.)

The circular spring device consisting of two spring sides, two spring-loops at the top connecting these spring sides, springs having upper and lower hooks attached to one of the spring sides for engaging the pocket.

667,252. APPAREL-BELT. EMMA ROBERTON, New York, N. Y. Filed March 21, 1900. Serial No. 9,512. (No model.)

A belt, comprising a strap having a plurality of cross-pieces mounted thereon and movable thereon throughout its length, said cross-pieces being each composed of a flexible covering in which is placed a flexible strip of stiffening material.

667,307. BUCKLE. ALBERT F. FULLER, Newark, N. J., assignor to the J. E. Mergott Co., of New Jersey. Filed Oct. 8, 1900. Serial No. 32,368. (No model.)

667,308. BUCKLE. ALBERT F. FULLER, Newark, N. J., assignor to the J. E. Mergott Co., of New Jersey. Filed Oct. 27, 1900. Serial No. 34,566. (No model.)

667,320. ALARM-CLOCK. ARTHUR JUNGHANS, Schramberg, Germany. Filed Oct. 16, 1900. Serial No. 33,208. (No model.)

In an alarm-clock, the combination, with one of the toothed wheels of the alarm-train, of a tooth, a spring normally holding the said tooth out of contact with the said wheel, and means for moving the said tooth into the forward path of one of the teeth of the said wheel against the pressure of the said spring, whereby the said tooth and wheel become interlocked until the said wheel is moved in the reverse direction in rewinding the alarm-train.

667,402. WATCHMAKER'S TOOL. LOUIS REICHERT, Scranton, Pa. Filed Aug. 9, 1900. Serial No. 26,378. (No model.)

As an article of manufacture a device for adjusting the jewels in watch-pallets consisting of a plate having a series of openings therein corresponding in their general outlines to, and adapted to receive, different forms of pallets, the walls of said openings in front of the jewels being so located as to form stops or gages adapted to limit the outward movement of the jewels when the latter are in proper position for working.

667,574. BUTTON FOR SHIRTS, ETC. CHARLES A. PIERSON, Newark, N. J., assignor to Frederick H. Larter, Harry C. Larter and Halsey M. Larter, same place. Filed Jan. 3, 1899. Serial No. 700,914. (No model.)

A button comprising a head, a shank having a post connected to said head and a tubular barrel disposed at right angles to said post or approximately so, said barrel having one end, where it

connects with the post, open, and the other end also open and provided with a bearing for a spring, a hollow shoe section slidably arranged in said barrel and serving as a casing for a spring, said slidable shoe section having its end toward the post end of the barrel provided with a spring-bearing, a stem or rod in said shoe section or

casing secured to said casing at the bearing therein for the spring and extending from said spring-bearing out from the barrel at or near the spring-bearing of said barrel, and a spring encircling said rod or stem and having one portion resting within the slidable shoe section or casing against the bearing within the same, and the remaining portion of the spring, in its normal position, projecting from said casing into the barrel and resting against the spring-bearing thereof.

667,631. BUTTON OR STUD. HALSEY M. LARTER, Newark, N. J., assignor of two-thirds to Frederick H. Larter and Harry C. Larter, same place. Filed Sept. 10, 1898. Serial No. 690,673. (No model.)

The herein-described stud or button comprising a recessed shank formed of a piece of metal tubing bent at right angles and having the bend rounded to facilitate passage through a buttonhole, a head fastened to one end of said shank, a solid filler arranged inside at the bend and a tubular plunger in the other end, the shank and filler being perforated at the bend to provide an outpassage for said plunger, an integral lip bent radially inward at the free end of the arm in which the plunger lies and the plunger being longitudinally slotted to receive said lip, a spiral spring lying in said plunger and bearing at one end against said lip and at the other end against the closed end of the plunger, a conical cap at the forward end of the plunger and a stop projection at the rear end adapted to enter a recess in the shank and engage the filler to limit the forward movement of the plunger.

DESIGN 34,019. BRACELET. THOMAS S. BEN-

NETT, Providence, R. I., assignor to Albert C. Becken, Chicago, Ill. Filed Nov. 9, 1900. Serial No. 35,987. Term of patent 3 1/2 years.

REAL EBONY

Combination Traveling Set.

Our MR. WILLIAM ANDREWS is now in the South, MR. A. WEISS is West and MR. H. GREENTHAL is East showing our Fine New Line of Real Ebony and Rosewood Toilet Articles, as well as the Latest Novelties in Leather Goods.

J. J. COHN,

Manufacturer of Leather Goods

And Importer of Ebony and Rosewood Toilet Articles,

35 MAIDEN LANE, - - - NEW YORK.

CHICAGO OFFICE, 131 WABASH AVE.

"B. A." Gold Shell Collar Buttons are guaranteed as follows: "We will replace every 'B. A.' button which for any reason proves unsatisfactory." This guarantee is on the back of each card and our trade-mark embossed on the front.

B. A. BALLOU & CO.,

Providence, R. I.

That this department shall prove mutually beneficial to our readers, it is desirable that the members of the trade generally communicate with THE JEWELERS' CIRCULAR-WEEKLY regarding any advantageous device or plan that they are utilizing in connection with their business.

PRIZE ESSAY COMPETITION, NO. 2.

SUBJECT:

"How to Treat Customers—How to Sell."

No. 3.
PRIZE ESSAY COMPETITION.
First Prize, \$20.
Second Prize, \$10.

These prizes will be given to the writers of essays on the subject

"How to Foster Spring Trade."

The prizes will be for the best and most reasonable essays, not for the language in which the ideas are expressed. Anyone may enter, whether he be a retailer, salesman or any employe.

The standing of the judges who have kindly consented to act is a guarantee that the contest will be carried on strictly on its merits and in an absolutely fair and impartial manner. We shall designate each contribution by a letter, keeping a list of contributors with the letters of their articles. Thus the judges will not even know the names of the writers whose products they pass upon.

RULES:

Essays must be in this office by Feb. 15, 1901.
Essays must be written on one side of paper.
No limit to number of words, and specimens of records are admissible.

NOTE.—THE JEWELERS' CIRCULAR-WEEKLY reserves the right to publish any or all of the competing essays received.

Preference will be given, all other things being equal, to those whose contributions reach us at the earliest date.

ANOTHER BEAN GUESSING CONTEST.

PETIT & CARSON, New Rochelle, N. Y., had recently a bean guessing contest at their store. The beans were contained in a large glass bowl, which was displayed in one of their show windows. The contest closed on New Year's Eve. Much interest was created in the guessing, as over 500 guesses were received by the firm. When the beans were counted it was found that there were 5,029, and that the nearest guess sent in was by Miss Lizzie Boyd, of Burling lane. Her guess was 5,017. The next nearest guessers were Henry Scott, 5,001, and D. W. Van Cott, 5,000. The prize offered was a handsome silk umbrella, with a gold handle inlaid with mother-of-pearl.

MY first principle in business is the Golden Rule, "Do unto others as you would have them do unto you." And I believe if this were practiced more in the jewelry business there would not be so much suspicion attached to our line. When a customer enters my store I do not jump to the conclusion that he or she has come to buy. So my first endeavor is to make the customer feel at home, then to wear a pleasant look and have a civil word or two, and if it should turn out that the party has come on some begging expedition I give with good grace. Or if the customer hands a watch to examine and I find a piece of pegwood sticking in it, I pull it out; or if the hair spring is caught, I unhitch it and I hand the watch to the customer. If the party asks how much is the job, I tell him or her there is no charge, with just as much grace as I would receive \$5.

I have been in the retail jewelry business for the last 20 years and I know I have never lost anything by treating customers in this way. If the customer wants to buy I try to sell what is wanted, not what I would like to sell. But when the customer leaves it to my judgment I always advise to the best of my knowledge what is the best, even if I don't make as much profit on the article as I would if I sold what he or she would have selected without my advice. I also make it a rule never to guarantee any article I am not sure of; for instance, if a person wants a rolled plate chain, I show the different kinds and say that the higher price I ask is a sign that I paid more for the goods. Now, the customer cannot expect a chain for \$1.50 to wear as well as a chain for \$9 or \$10. If I sold a good make of chain for a good price and I see that it did not give satisfaction, I give another; but I never give a guarantee, as some of the best rolled plate articles will sometimes go back on a person, and I feel I do better by my customer in replacing the chain if I think that it did not give satisfaction. Again, I make it a point to make a fair profit on all sales and work. But the work must be good and the goods I sell must be as represented. I have found by conducting my business on these lines that I have always been successful and have heard of expressions from the public something like this: "Go to —; he will charge you a good price, but you can bet on what he tells you and you know what

you buy. When he does a piece of work he does it. A child can buy just as cheap and just as good as an experienced person." Now, in the case of goods to be exchanged I am just as anxious to exchange as I was to sell, for I want my customer to be pleased, and if I have not got just what will please, I cheerfully return the money. In such cases I have always retained my customer.

I think the foregoing are the most vital points to follow in our line as to how to treat a customer and covers partly how to sell, but would add that to sell goods the first thing is to have the store as neat and clean as possible. Then the stock must be kept clean, the silver ware bright, with clean cards and nice cases, for the best salesman cannot sell when things are slovenly and dirty. Then sell goods on their merit, do not over-guarantee anything and tell the truth about every article. A man who starts in to misrepresent and try to make all the money he can may succeed for a short time. But he will find out that his customers, one by one, will leave him, until at last he is forced to give up. For such principles have never yet paid in the long run, while I will warrant that any young man starting with my plan will not only make money but will retain that which is more valuable, honor, which will gain him the confidence and esteem of the community in which he lives. X.

IN any retail business, especially the jewelry and kindred lines, where goods or merchandise of beauty, art or ornamentation are sold to customers, a large majority of whom are ladies and people of cultivated taste and refinement, it is absolutely necessary for the salesman, whether he be proprietor or clerk, to treat and receive all customers with a cheerful smile and pleasant manner and to readily apologize for mistakes or misunderstandings, without displaying anger or contempt. He should be on the alert for opportunities to render small favors, and also endeavor to show a feeling of sincere welcome.

All clerks and salesmen are not gifted with a pleasant disposition and affable manner, or can submit to rebukes or accusations that are often experienced behind the retail counter without showing in some degree anger or resentment; but a pleasant disposition can be largely acquired by diligent practice and forethought. Re-

Grand HINTS to JEWELERS

sentment is only permissible to a salesman when the honesty, integrity or reputation of the firm or business has been basely or unjustly attacked; even then it should be defended in a dignified and forcible but gentle manner. To do this successfully, giving justice to all concerned and retaining the customer, requires judgment and cordiality.

A young man will never be a good salesman until he has complete control of his disposition. He must also know the stock and class of goods the store has for sale to such an extent that he has a ready answer to any question that may be asked about them.

An important duty of a salesman when a customer enters is to learn what the customer wants. Some customers are averse to giving this desired and valuable information (due probably from previous dealings with unreliable houses), but the good salesman will bring the full power of his tact into use. This information is indispensable, even if it must be obtained unknowingly to the customer. If all other methods fail it must be surmised from the impression received by observing the general attitude, speech and manner of the intending purchaser.

Many good salesmen may lose a sale, but he is not a good salesman who cannot tell the cause of losing a sale.

A knowledge of physiognomy and human nature will be found a valuable accessory to the clerk and salesman, as it will enable him to form a correct view of customers the moment they enter.

He who wishes to be a successful salesman must be temperate. One with debauched countenance and bloodshot eyes cannot successfully sell goods and maintain the reputation of his employer's business. A business reputation can be ruined in a day, while it takes years of work, honesty and fidelity to make one. Therefore, the salesmen and clerks must guard their employer's business reputation as they would their own character. D.

LOVING CUP PRIZE TO CHAMPION WALTZER.

JUDSON S. NEWING, jeweler, Binghamton, N. Y., writes the following letter to *The Leader* of that city:

BINGHAMTON, Feb. 6.

To the Editor of *The Leader*: Sir—Who is the champion prize waltzer of Broome county? That is a question that interests a great many of the dance-goers of Binghamton. Now, to decide this question I will give a handsome silver loving cup to the social club in the city who will send the best representative to the prize waltz to be given by the Ivy Leaf Social Club Monday evening, Feb. 11, at Odd Fellows' hall. I believe this ought to settle the question, as I understand all of the prize waltzers are members of the various clubs.

Best Dressed Windows Among the Retail Jewelers.

Series II. No. XXIX.

NOTE.—We inaugurated with the issue of May 3, 1899, the second series of characteristic retail jewelers' windows. The first series consisted of illustrations and descriptions of more than 100 different displays, extending over a period of eight years. We desire any jeweler who thinks his window is interesting or calculated to serve as a lesson to his brother jewelers, to send to us a photograph of such window for illustration under this department.

HERE is presented an original suggestion for a Washington's Birthday window. On either side of the bust of Washington, which stands out against a background of palms, are placed field glasses,

play an experienced window dresser to achieve good effects. Little novelties often do the trick.

An English paper suggests a clock with a 12-inch diameter placed at an angle in the window with a nicely painted, bright colored card sign, eight by 20 inches, advertising some article placed immediately above or below the clock and changed every few days, which will prove an excellent and attractive advertising medium. Everybody looks at a clock, and under those conditions cannot help but see the sign.

JEWELERS' BRIGHT AD. SAYINGS.

The way rings are made has more to do with their real value than is usually sup-

ORIGINAL SUGGESTION FOR A WASHINGTON'S BIRTHDAY WINDOW.

telescopes and small flag draped pictures of Revolutionary battles. In the central foreground are placed a hatchet and a branch of a cherry tree encircled with rings. At one side of this group are placed sword pins, souvenir spoons, etc. On the other side is a small clock supported by tiny guns. Chains or necklaces form the letters "Feb. 22, 1732."

WINDOW DEVICES.

WINDOW dressing and display as a means of advertising is to-day an important thing. Many people walk along the street merely to glance at brightly furnished windows with late products in any line of merchandise. It is not even necessary to go to any great expense or to em-

posed. You cannot detect a trace of solder on the rings we sell. An expert would tell you that these settings are solid and absolutely secure.—Ferguson & Craig, Champaign, Ill.

The watches that you have bought here this Christmas have passed from us to you but our interest in them hasn't passed. They must do good service. Must tell the truth about the time, else they will make us untruthful. Remember that a watch needs fostering until it gets steadied down to the daily task of going an even gait. An occasional visit here will help it.—George E. Feagans, Joliet, Ill.

Little eye ills grow to big ones. Have any of your children complained about their eyes or head?—Kendall Optical Co., Harrisburgh, Pa.

FOR THE NEW YEAR!

TO THE RETAIL JEWELRY TRADE:

We offer the result of more than Fifty Years of Ring Making, confident that the methods we now employ enable us to furnish you the most desirable goods for **QUALITY, STYLE and PRICE** obtainable.

are most worthy of your attention. Do not neglect their purchase. Goods sent on approval to responsible parties.

THE TRIUMPH

—OF—

CROWN and LION CASES

in 1900 has spurred the makers to still greater efforts, and they start the new year and century with a magnificent new line and an unprecedented variety of styles and patterns.

There are no makes of filled cases now on the market so firmly or justly fixed in trade favor. Salability and satisfaction given have placed them first in quick-selling, profit-making staple stocks.

**SOLD BY ALL
LEADING JOBBERS.**

CONDUCTED BY GEORGE A. ROGERS.

32D YEAR.

WEDNESDAY, FEBRUARY 13, 1901.

VOL. XLII. No. 2.

NOTE—Under this department, all matters of a technical or a news character bearing upon the optical branch of the jewelry industry will be considered. Address communications to The Jewelers' Circular Pub. Co., 11 John St., New York.

WOMEN OPTICIANS.

ASIDE from the social question and the question of the "eternal fitness

of things," optometry opens up a field in which women of the right mental and physical poise find play for their natural talents. Optometry is so essentially a work of fine details, finely executed, that there can be no surprise at the success of some women in this field. Her natural gifts and talents are in her favor, and natural aptitude counts for so much and education without such aptitude counts for so little, that it is not to be wondered at if some women fairly put their male compeers upon their mettle. At present there are few women opticians, but the percentage of women students of optometry seems to be on the increase. Unless social conditions greatly change this percentage is likely to increase and lady opticians will be as prevalent as, if not more prevalent than, lady doctors, lady lawyers, lady dentists, etc. As compared with the other professions, optometry is far more appropriate, it must be confessed, as there is nothing about it that raises any question involving delicacy of consideration or one that a woman may not discuss with any person. From the social standpoint, however, it is to be regretted that women should be compelled to engage in any of these departments of endeavor.

OPTICAL LEGISLATION.

IN the matter of optical legislation opticians of Illinois who entertained the

view that a law creating a board of examiners, whose license would be required to entitle opticians to practice optometry, have received a setback in the late decision of the Supreme Court of that State, relative to a similar law creating and giving arbitrary power to a board of pharmacy. The latter law has been declared unconstitutional and void, and on the perfectly legitimate grounds that it was class legislation and deprived people of their rights under the Constitution, which in Illinois are specially protected by clauses in the Constitution aimed directly at such discriminating legislation.

An optical law of a similar character

would be exceedingly difficult to get through the Legislature under these circumstances, and it would be of no effect if passed, unless everything the opticians aim to accomplish by it is taken out of the bill, which would, of course, leave matters in the same condition as now. There was serious opposition to the law, or proposed law, in the Illinois Optical Society, as shown at the last meeting. This opposition has now even more tangible grounds for opposing legislative action of any kind. As has been pertinently suggested many times in the past, you can't legislate knowledge or capacity into a human being.

The next question is, What is to be done about it? We would suggest that the Optical Society of the State of Illinois adopt a standard of qualification for full membership, and that it issue to full members—those who pass the examination and are eligible in all other respects—a certificate setting forth the qualification. As it would not be policy at the present time to exclude any deserving person who desires to become a member, any applicant might become simply a business member and be entitled to all the general advantages of membership by the payment of the membership fee, being given a specific time, perhaps one year, in which to qualify himself for full membership, which he would be expected to do if he continued his connection with the society. The rule should be retroactive, affecting all present as well as future members, from the president down. It could be provided that representatives of optical journals need not qualify for full membership, but would continue as business members merely, thereby being eligible to office or to any committee except the committee on qualifications of members. The effects of such action on the part of the Illinois Society could not but be beneficial upon all optical organizations. The question of a standard of qualification would soon settle itself and be based upon the committee's questions to applicants. The optical college professors would certainly not object to questions from their compeers, and afterward they would aim to make their graduates proficient in the directions necessary to pass the examination of the optical society or societies. The societies would thus control the colleges by prescribing the qualifications of membership of societies outside of the colleges. No college whose students could not pass these examinations would be able to do business, and the different schools would at once come in touch

with the societies for the purpose of raising the standard to the point at which it should rest. This is a much better solution of the question than legislation. The society, to protect itself, would adopt a code of ethics by which its members would be governed, and no one should be allowed to pursue a course that would reflect upon the society and retain still his membership. The society would not need to worry, as some of its members seem to have done, over the "short term" of optical schools, but could devote all their spare time to seeing that their own qualifications were up to the standard. The college men would get together and insist upon an advanced standard, although it might not be considered good policy to institute a too difficult examination to begin with. The fees for these examinations and certificates should be modest, but they ought to help out the society treasury to some extent, as well as pay the expenses involved in holding the examinations.

Spectacle Optics for Photographers.

AS a matter of elementary education, if one makes any pretence at all to an acquaintance with science, or professes a really intelligent and enlightened interest in the affairs of every-day life, one should know something about the dioptric system of nomenclature. For its use is of the greatest help to understanding the rationale of adapting spectacles—surely the first thing that should excite the curiosity of anyone concerning himself with applied optics. To illustrate what is meant, there is a rule—a sound one, within reasonable limitations—that presbyopia, a normal and unavoidable affection of the eyes due to old age, calls for spectacles having 1D. additional power for each five years of age after the age of 40. To understand why this is, by learning something of the meaning of accommodation, long sight and short sight, is a task easily within the capacity of almost anyone. *London Optician.*

The L. C. Henrichsen Co., Portland, Ore., are quite busy in their optical department.

The Keppler Jewelry Co., Anaconda, Mont., have employed George H. Shirkey, who is a thorough workman and graduate optician. They have spared neither time nor means in fitting up their optical department in a scientific manner.

Optical Department.

[Continued from page 53.]

DIOPTRIC CONDITIONS OF THE EYE AND HOW TO DISCOVER AND MEASURE THEM.

EMMETROPIA.

THE normal eye, the eye that is optically correct, is a desirable though rare possession. Perhaps the optician is prejudiced and gets his idea of its rarity from the fact that it is an eye he seldom meets, because its fortunate possessor has little use for him or his services, at least during the earlier years of life or before well on toward old age. He may never arrive at the latter period, for if "the good die young" good eyes may go with them beyond the optician's field of practice.

Emmetropia needs study. It is the model eye. The best correction for an eye is the correction that gives it the nearest possible semblance in its action to the emmetropic eye. The optician should know the emmetropic eye more thoroughly than any other kind of eye. Fig. 1. It may

FIG. 1.—EMMETROPIC EYE VIEWING DISTANT OBJECT—"x" INDICATES DISTANCE OF OBJECT; "O," NO ACCOMMODATION; "F," THE FOCUS.

be ideal to many, but to the optician it should be real, for that is the kind of eye he endeavors, under all sorts of varying circumstances, to construct. One thing, quality or power is possessed by the eye, however, if we regard it as the organ of vision, which it is in a superficial point of view, that the optician cannot modify, and that is the power of vision itself. He cannot make an eye see. He cannot help it to see. The eye does all the seeing for itself. It sees perfectly or imperfectly according to its power or visual acuity, and all the lenses in creation will not help it in the least.

What does the eye see? It sees the image upon the retina. That is the beginning, not the end, of seeing. If the retinal image is blurred it is the best of vision to see the blur just as it appears upon the retina. It would be an anomalous eye that, with a blurred image on the retina, would see anything else than a blur. When the optician, by the imposition of lenses, makes the retinal image sharp and clearly defined, he does not improve the vision, but gives the eye or visual power something different to see. The retinal image is from the standpoint of sensation, not vision, but the object. A good eye, one possessed of the highest visual power, sees this object just as it is, blurred or unblurred, as the case may be. But such an eye would not be necessarily

emmetropic. Emmetropia is not a visual thing. It is an optical condition of the eye. An eye may be emmetropic but totally blind at the same time, or it may be emmetropic and partially blind. It may possess all degrees of visual power from absolute blindness to the highest visual power and be emmetropic or ametropic in all cases.

What, then, is an emmetropic eye? It is an eye that, without muscular action, places a distinct image of distant objects on the retina, especially one point at a distance which is focused upon the center of the fovea centralis. If the power of vision is normal, then, under the above circumstances, we say vision is normal. The point in the world—the point of fixation—and the central point in the fovea are in conjugate focus. A pencil of light proceeding from the point of fixation is focused upon the center of the fovea, and this without muscular action by which the composite lens in the forward part of the eye is given more than its static dioptric power. Points adjoining the point of fixation are focused with almost equal accuracy at other points of the retina, so that all the light from each individual point of the object impinges upon one distinct retinal point, producing the image. Each such point in the object is in conjugate focus with its point at the retina. As to the distance of the object, if the lens system of the eye focuses the light from a point 20 feet away it will so nearly focus points at an infinite distance that 20 feet is regarded as optical infinity.

In emmetropia, the retina has, without accommodative action, a clear and sharply defined image of the distant object. As the image is really the beginning of vision, the object itself so far as vision is concerned, it not only has normal visual acuity but a distinct object to see. Vision is not blurred because the object is not blurred. But while the emmetropic eye is directed to the distant objects nearer objects at one side of the line of vision may intervene. They cannot be accurately imaged upon the retina. There is the double reason for being visually unconscious of them: they are out of the direct line of vision and imperfectly fo-

FIG. 2.—EMMETROPIC EYE VIEWING OBJECT AT 20 IN. THE ACCOMMODATION (A) SHOWN BY THE CRESCENT ON THE LENS IS 2D.

cused. To obtain a clear retinal image of near objects it is necessary for the eye to exercise muscular force—to use the accommodation—and by such action to so increase the dioptric power of the lens that pencils of light from the near object will be focused upon the retina, producing a clear image. Fig. 2. But the stan-

dard capacity of the emmetropic eye is its capacity to focus the light from distant points upon the retina without muscular action rather than its power, by accommodation, to focus light from the near object. What it may do in the latter respect depends upon its accommodative power and not upon its emmetropia, but the emmetropic eye, since it uses none of its accommodation for the distant object, has all of its accommodative power to be used for near objects. This is really the greatest advantage possessed by it.

The standard eye is then an eye not based upon visual power, for visual power and emmetropia are quite unconnected. It is an eye that has infinity for its point of rest, for only when viewing the distant object is it at rest muscularly. When viewing distance it is under no muscular tension nor nerve strain. In viewing objects 20 feet or more away, which comprises so large a part of services the eye renders, it is at complete rest. Rest is essential to muscles and nerves, especially motor nerves. But work is also essential. The muscles and nerves of the emmetropic eye rest when the distant object is being viewed; they work when the near object engages attention. This is normal and healthful exercise. There is no strain, unless the eyes are over used for near objects, and they will even stand a great amount of abuse without serious protest. The picture of emmetropia (see figure) should be thoroughly impressed upon the mind so that it may be comprehended in its entirety and all its advantages be duly appreciated.

An emmetropic eye is the same for all meridians. It does not focus telegraph wires upon the retina while yet incapable of focusing the telegraph posts, but every object, horizontal or vertical, round, square, or oblong, is given its due form and proportion in the retinal image. What the image is so the object appears. The action of the lens system of the eye and of each dioptric surface by which images are imposed upon the retina is a most complex affair and would require many articles of this length to fully state. But knowledge of the action of each surface for an ordinary or average emmetropic eye would not materially help the optician to fit a pair of defective eyes. It is not, therefore, practical to go into these details, however interesting they may be, unless there should prove to be a demand for such minute data. Emmetropic eyes are not necessarily alike in their various dimensions and dioptric factors. They are only alike in their composite effect—a perfect retinal image of the distant object without accommodative action.

(To be continued.)

The "line of sight"—a secondary axis of the eye—is the straight line connecting the fovea centralis with the point of fixation (that is, the object looked at); and the angle between this and the major axis of the corneal ellipse is called a . It may reach 10° or 12° in the horizontal plane. The "line of fixation" joins not the fovea centralis but the center of rotation of the eye with the object fixed; and the angle between this and the principal axis of the eye is called y .—London Optician.

Optical Department.

[Continued from page 54.]

Opticians Win a Point.

Their Opposition to the Original Bell Bill in the New York Legislature Bears Fruit.

The opticians have apparently won one important point in their fight against New York Assembly bill No. 167, or the "Bell bill," as it is popularly known. They have succeeded in convincing the Assembly Committee on Public Health that certain amendments are necessary to give the opticians proper protection and the promise has been given that such changes will be made. This developed Wednesday last, when the committee held a continued hearing on the bill at Albany. So much opposition has materialized from the druggists, pharmacists and artificial limb makers, who would be seriously affected if the bill became a law, that the opticians have had a hard time convincing the medical men who are behind the bill and the committeemen in whose hands it is, of the justice of their claims. But Wednesday, this was accomplished, and unless there are changes made in the future, the bill will be generally satisfactory to the optical interests in its present form.

The representatives of the trade at Albany, Wednesday, were: President F. L. Swart, of the Optical Society of the State of New York; W. D. Oertel, chairman of the executive committee of the same society, and B. V. Smith, of Grey Optical Co., Albany. The bill with the changes now proposed will read as follows, the latest amendments being printed in italics:

An act to amend Section 152 of Chapter 661 of the laws of 1893, entitled "An act in relation to the public health, constituting Chapter 25 of the general laws."

SECTION 1. Section 152 of Chapter 661 of the laws of 1893, entitled "An act in relation to the public health, constituting Chapter 25 of the general laws," is hereby amended to read as follows: SECTION 152. Construction of this Article.—*Any person shall be regarded as practicing medicine within the meaning of this act who shall profess to heal or who shall give treatment to any other person by the use of any remedy, agent or method whatsoever, whether with or without the use of any medicine, drug, instrument or other appliance, for the relief, or cure, of any wound, fracture or bodily injury, infirmity, physical or mental, or other defect or disease.* This article shall not be construed as prohibiting the manufacture, sale or use of any proprietary or patent medicine, and where no diagnosis is made by the maker or seller thereof; or the giving of temporary relief in an emergency by a registered pharmacist or any person, or the domestic administration of family remedies; nor shall it be construed to affect commissioned officers serving in the United States army, navy or marine hospital service, while so commis-

sioned; or any one while actually serving on the resident medical staff of any legally incorporated hospital; or any legally registered dentist exclusively engaged in practicing dentistry; or any rights of chiropodists under existing laws; or any manufacturer of artificial eyes, limbs or orthopedic instruments or trusses; or manufacturer or constructor of optical instruments in fitting such instruments on persons in need thereof; etc.

Regarding the phrase "give treatment to," which is not approved by some opticians, on account of the possible question as to the definition thereof, as referred to in THE CIRCULAR-WEEKLY last week, Dr. E. E. Harris, president of the New York Medical Association, is quoted as saying that the word "treatment" in this connection presupposes a diagnosis of a disease and a knowledge of medicine, and effectually protects the public without infringing on individual rights.

California State Association of Opticians.

STOCKTON, Cal., Feb. 3.—The California Association of Opticians held their annual meeting, Jan. 21, 1901, in San Francisco Hall, Alcazar building, San Francisco. The California opticians are still full of vim and ambition. However, the one drawback is the great distance many of the members have to travel to attend the meetings.

This meeting was the occasion of election of officers and a revision of the by-laws. The latter was left with the committee until the next meeting, the third Monday in April, when there will be an extra long session to dispose of laws and business affairs for all time, so as to waste no time at the regular meetings. All future meetings will be devoted almost entirely to instructive lectures and to entertainment.

First vice-president S. G. Marshutz, Los Angeles, was present at the meeting. He made a few remarks relative to the optical business in his end of the State, and asserted emphatically the importance of a complete organization.

The officers elected for the ensuing year are: President, E. M. Ackley, San Francisco (re-elected); first vice-president, S. G. Marshutz, Los Angeles (re-elected); second vice-president, C. L. Hogue, San Francisco; treasurer, W. H. Hunt, Oakland (re-elected); secretary, G. L. Schneider, Stockton (re-elected). Mr. Hogue was appointed as a committee of one to obtain instruction and entertainment for the next meeting. The meeting was exceedingly pleasant and cheerful, and was adjourned at a late hour.

Optical Briefs and Notes.

Gustave Holle, optician, Philadelphia, Pa., has moved from 15th St. and S. Penn Square to 1429 Chestnut St.

Julius Lamb, optician, 267 S. 3d St., Philadelphia, Pa., was married about a fortnight ago to Miss Katharine Newman.

Andrew V. Brown, son of D. V. Brown, Philadelphia, Pa., has returned from his southern wedding trip and taken up his home in Tioga with his bride, formerly Miss Ida Booz, of Glenside, Pa.

William Fellman & Co., oculists and opticians, Philadelphia, Pa., have moved from 6 N. 13th St. to 1029 Chestnut St., where they have opened a handsome and elaborately equipped optical store. The branch store on N. Front St. will be conducted by them as hitherto. This enterprising young firm have within the past few years built up a lucrative trade.

The wife of T. Haines Moore, optician, Ridge Ave. and Spring Garden St., Philadelphia, Pa., died suddenly last Friday, under circumstances so unusual that a public inquest had to be held to determine the cause of death. It was then established that Mrs. Moore got bottles containing carbolic acid and whiskey confused, after returning home from a ball with her husband, late Friday, and drank the poison in mistake for whiskey. The dose was a fatal one, and she died a few hours later. Mr. Moore is indignant at the statements, given much publicity, that his wife committed suicide after a quarrel with him, and all doubt as to the exact cause of death was removed by Mr. Moore's testimony at the inquest. Mr. Moore is widely known to the trade in Philadelphia and was formerly with Queen & Co. He is a brother-in-law of Harrison Crapp, in charge of the optical depart-

Optical Department.

Continued from page 55.

... at S. J. Berg's store. He has been twice married.

H. B. Vining, optician, Kansas City, Mo. has been on the sick list.

Fred Lanctot, jeweler, Ada, Minn., is taking a correspondence school course in optics.

J. C. Gibson, optician, was at G. F. Barr's jewelry store, Huntington, N. Y., Feb. 12.

H. Wade, optician, Swanton, Vt., is moving to more spacious quarters in the Farrell block.

B. H. Blank, traveler for Hammel, Riglander & Co., New York, called on the Kansas City, Mo., optical trade last week.

C. N. Sheldon, traveler for the Merry Optical Co., Kansas City, Mo., has just returned from a western trip and reports a good trade.

Elwood Riggs, manager of the Kansas City, Mo., branch of the Columbian Optical Co., is in Topeka, Kan., on a short business trip.

Mr. Edmondson, optician, is now at J. M. Bigwood's jewelry store, 607 Wabash Ave., Terre Haute, Ind., and will remain all this month.

Fred C. Merry, of the Merry Optical Co., Kansas City, Mo., has gone on a three weeks' business trip. He will visit Chicago, New York and Southbridge, Mass.

G. F. Applegate, of the Sun Optical Mfg. Co., Trenton, Mo., is taking a course of study at the Institute of Mechano-Neural Therapy, N. Clinton Ave., that city.

The engagement is announced of Abe Isaacs, of the Pacific Optical Co., 343 Kearny St., San Francisco, Cal., and Miss Fannie Marks, with Davis, Schonwasser & Co.

G. W. Pierce, secretary of the Bay State Optical Co., Attleboro, Mass., was in San Francisco, Cal., last week, on his annual trip. Mr. Pierce has found business in that section very good.

The Globe Optical Co., 93 Yonge St., Toronto, Ont., are giving up business and will dissolve partnership. They have announced a sale at greatly reduced figures to close out the entire stock.

Mr. Sargent, optician, Hartford, Conn., was married a few days ago at Fort Plain. The bride is the daughter of Mr. and Mrs. Joseph Falling, of that place. This is Mr. Sargent's fourth venture in the matrimonial line.

Herman E. Bouscarr, optician, 1533 Chestnut St., Philadelphia, Pa., must move back the front of his store building about a foot, according to a legal building line fixed by Judge Pennypacker, after considerable litigation.

S. G. Marantz, Los Angeles, Cal., left on Jan. 22 for a two months' trip to New York, where he will establish a new wholesale importing house. He will handle principally all kind of thermometers, barometers and large optical instruments.

The Standard Optical Co., 217 Kearny St., San Francisco, Cal., are working day and night filling orders from their trav-

elers, who are covering the territory from Victoria to Mexico and from Ogden to the Pacific. Their sales are far ahead of last year.

Under a recent decision of the Commissioner of Customs of Western Australia, spectacles with gold frames and with or without glasses are classified as opticians' goods, and are assessed with duty at the rate of 10 per cent. ad valorem.

J. C. Hutson & Co., Omaha, Neb., are desirous of securing larger store facilities, as their business has outgrown their present quarters, but unfortunately they have a lease on their building for a year to come. If they could sub-lease it they would move at once.

John A. Perkins, manager of the Winchester Optical Co., Winsted, Conn., says of the state of business: "We have been very busy during the year past, but it is naturally quiet at this time. Orders are coming in now, however, and I think we shall have a good year."

Dan B. Cavanaugh, manager and buyer for the optical department of the Doggett Dry Goods Co., Kansas City, Mo., has just returned from New York. He visited Philadelphia and other eastern cities, returning via St. Louis, his health being much benefited by his trip.

C. W. Wingate, jeweler and optician, 16 Bromfield St., Boston, Mass., is closing out his stock at auction. This was made necessary through the failure of a firm which occupied half of the premises. Mr. Wingate is undecided as to whether he will remain in his present quarters or seek new ones.

J. T. Gallagher, Knobnoster, Mo.; Sam Allen, Shawnee, Okla.; August Schlicker, Vinita, Ind. Ter.; C. E. Van Voorhis, of the Van Voorhis Jewelry Co., Yates Center, Kan.; C. C. Stevenson, Pittsburg, Kan., and Frank Wuerth, Leavenworth, Kan., called upon the Kansas City, Mo., opticians last week.

Fred Huber, who has conducted the business of the Fidel Huber jewelry store, Dillon, Mont., left last week for New York, where he will take a course in optics. Mr. Goldsmith will now conduct the jewelry business of the Fidel Huber store. Mr. Huber will return in May, when he will take a position with his brother.

The following are studying optics under Dr. S. W. Lane, of the Southwestern Optical College, Kansas City, Mo.: Charles E. Van Voorhis, Yates Center, Kan.; Roy E. Allen, Shawnee, Okla.; Frank W. Swearingen, Topeka, Kan.; Jas. F. Barr, Stockton, Mo.; A. J. Godfrey, Marceline, Mo., and John May Rose, Chicago, who is there taking a post-graduate course.

The insolvent business of the Canadian Camera and Optical Co., Toronto, Ont., was sold on the 6th, under an order of the Court, and was purchased by F. H. Hallford, of Hamilton, at 35½ cents on the dollar. The nominal assets of the company are \$17,000, and it is thought that the creditors may realize 20 cents on the dollar. The business may be continued by Mr. Hallford.

The store and workroom of Frank M.

Silva, optician, were damaged to the extent of between \$200 and \$300 in a fire which occurred in the building at 207 Westminster St., Providence, R. I., Wednesday evening. Mr. Silva had only returned to his shop, Wednesday, after an illness of five weeks' duration, during which time his shop had remained closed. The fire originated in the basement and practically wrecked the building.

The opticians of Tennessee have formed a temporary association, with the following officers: President, H. W. Liggett, Memphis, Tenn.; vice-president, L. T. Little, Union City, Tenn.; secretary, E. B. Meyer, 341 Main St., Memphis, Tenn.; treasurer, Prof. H. Lauffer, Memphis, Tenn.; executive committee, H. J. Cook, Knoxville, Tenn.; A. H. Wenning, Nashville, Tenn.; G. R. Calhoun, Nashville, Tenn.

The new catalogue of Oskamp, Nolting & Co., Cincinnati, O., is in press and will be out by the first of March. It represents a full line of optical supplies, and includes all kinds of opera, field and other glasses and compasses. It is fully illustrated and shows what a complete line they carry. If you do not receive a copy next month write for it. Harry Emrie is in charge of this department of this firm and has made the catalogue a special study for months.

The Optical Society of the City of New York will hold their regular monthly meeting in Parlor D R, Fifth Avenue Hotel, this evening, at 8.30 o'clock. Prof. William Fox will deliver a lecture on a subject of scientific optical interest. The society will also consider the following motion:

"That a prize of \$5 be awarded to the member writing the best original article upon any subject of optical interest, either scientific or practical, the article to be of reasonable length and to be handed in for reading."

Prospects of the Sale of the Alvan Clark Telescope Works.

Boston, Mass., Feb. 8.—It is said that the prospects are good for the sale of the old Alvan Clark telescope works on Brookline St., Cambridgeport. The plan is to form a stock company, purchase the works, etc., modernize them where such is needed, and carry on the business in a manner which will be a great improvement on the present state of affairs. These are the works started by the late Alvan Clark, the world-famous telescope maker. The Lick, Yerkes and many smaller instruments were made at this factory. When Mr. Clark died, his son Alvan G. Clark took up the business, and it was nearly as successful as when his father was in charge.

On the death of the son the business passed into the hands of Richard H. Grogan, Jr., his son-in-law. The latter carried on the works for about six months, and was just getting the affairs well under way, when he met his death, July 4, at the hands of his brother-in-law, Charles R. Eastman. Since that date Carl A. R. Lundin, the veteran manager, who has been at the works for about 26 years, has continued the business for Mrs. Grogan. The future of the business was very uncertain until the present plan appeared on the horizon.

Jewelers' Court,

(E. D. GARNSEY, Owner),
51 & 53 MAIDEN LANE, - - NEW YORK.
Ready for occupancy April 1st, 1901.

This modern, twelve-story, absolutely fireproof business building will have solid masonry floors, solid plaster partitions, high marble wainscotings, three high-speed elevators, mail chute, basins in all offices, electric light and everything that contributes to comfort and convenience.

Offices of all sizes are provided and floors may be leased entire or in part, partitioned to suit tenants. Those desiring to carry on light manufacturing can be accommodated, special provision being made for adequate power. Drop hammers will be located in the basement.

Floor plans are now ready for inspection and leases can be arranged by communicating with

HAMILTON, Ont., Jan. 29, 1901.
 Editor of THE JEWELERS' CIRCULAR-WEEKLY:
 Would you kindly give us the address of some manufacturers of electric time clocks suitable for restaurants, with electric bells communicating from different departments to clock in main office. I want a regular watchman's clock. And oblige.
 Yours very truly,

LAMPMAN BROS.
 ANSWER—See Winding Clock Co., Grand and DeKalb Aves., Brooklyn, N. Y.; F. Howard Clock Co., 403 Washington St., Boston, Mass.; Johnson Electric Service Co., Milwaukee, Wis.; Standard Electric Time Co., Waterbury, Conn.

CHAMPAIGN, Ill., Dec. 6, 1900.
 Editor of THE JEWELERS' CIRCULAR-WEEKLY:
 Please let us know where we may have an old carved fan repaired. It has delicate carved sticks and should require very careful work upon same. Thanking you in advance for your kindness and trouble.
 Very truly,

JEWELRY.
 ANSWER—C Levielle, 51 W. 19th St., New York, makes a specialty of repairing fine fans. He will, undoubtedly, be able to fix the one correspondents have.

NEW YORK, Jan. 7, 1901.
 Editor of THE JEWELERS' CIRCULAR-WEEKLY:
 Your paper, to which my employer is a subscriber for a number of years, contains a department about watches and clocks. I would like to buy a book containing illustrations of all fa-

mous clocks and would, therefore, ask you if such a work exists and where I could buy a copy of it. I think that you are in a position to give me the desired information and you would greatly oblige me by sending same to
 Yours truly,

I. ADELSBERGER.
 ANSWER—Perhaps the best work of the character specified is "Old Clocks and Watches and Their Makers," by F. J. Britten. For sale by Charles Scribner's Sons, 153-7 Fifth Ave., New York.

MAYSVILLE, Ky., Jan. 29, 1901.
 Editor of THE JEWELERS' CIRCULAR-WEEKLY:
 Maysville Commandery, No. 10, are in the market for 500 to 1,000 souvenir badges, special design, in metal, to be used at the Triennial Conclave next August. Will you kindly give me the address of some people who do that class of work, and oblige.

G. A. MCCARTHEY.
 ANSWER—We refer correspondent to N. Stafford, 66 Fulton St., New York, who, we think, can supply him with what he wants.

LINCOLN, Neb., Jan. 13, 1901.
 Editor of THE JEWELERS' CIRCULAR-WEEKLY:
 Can you give me the address of the different importers of cut beads, etc.; also importers of filigree jewelry made up? And oblige,
 Yours respectfully,

C. E. MYERS.
 ANSWER—For cut beads we refer correspondent to A. & H. Veith, 719 Broadway, New York. For importers of filigree

jewelry to I. Emrich & Co., 42 E. 14th St., New York, and for American manufacturer of filigree jewelry, Peter Hartmann, 36 Maiden Lane, New York.

Patent Time Indicator.

SAMUEL P. THRASHER, New Haven, Conn., has arrived home from a two months' business trip to England, where he has established headquarters for the manufacture and sale of his patented time indicator. He has interested English capital in the company and clocks are now being manufactured. Later he will form a company in this country and will begin the manufacture of clocks in New Haven. The business established in England will in no way conflict with the inventor's American rights. At the English headquarters of the company an exhibit is being prepared for the Glasgow Exposition which opens next Spring. Mr. Thrasher will probably return to England to take charge of the exhibition in May.

An eight-day clock that has run continuously for 52 years is owned by William Rishel, of Jefferson township, Berks county, Pa.

A dispatch from Essex, Conn., stated that a watch believed to have been lost some time about 1627 has been found on Poverty Island. The outside of the watch appears to have been engraved. On the inside of the outer case is engraved a name, which cannot be made out, and the date, 1627.

THE RAMBLER'S NOTES.

WHAT THE RAMBLER SAW AND HEARD AMONG THE DEALERS IN ART POTTERY, CUT GLASS, BRONZES, ETC.

C. DORFLINGER & SONS, 36 Murray St., New York, are preparing

OPENING NEW LINE OF CUT GLASS WARE.

now for the opening of an attractive new line of cut glass ware some time next week. Several novelties will be shown. General business is reported good, with orders for the lines at present in stock coming in with pleasing regularity.

A UNIQUE line of clocks and jeweled frames for photographs is to be

UNIQUE LINE OF CLOCKS AND FRAMES.

seen on the tables and counters of Sydney J. Manby, 30 E. 29th St., New York. There are high class novelties in art goods, and pieces of odd shapes, as well as bronzes and antiques such as the jewelry trade can handle to advantage, in addition to the usual assortment of fancy goods of recent importation.

WICKE & CO., 32 Park Place, New York, are displaying a line of cut

A LINE OF MUCH INTEREST TO JEWELERS.

glass of much interest to those who are constantly on the lookout for things that are new, useful and ornamental. Just at this time they are paying attention particularly to some attractive specimens of Tut-hill's cut glass ware of rich design, which are considered of special importance to the jewelry trade. An assortment of 11 pieces has been assembled and is offered to the trade, including bon-bon and olive dishes and a celery tray, that are unique in design.

THE RAMBLER.

Art in Wrought Iron.

A REMARKABLE piece of wrought iron art work from the Armbruster works, at Frankfort-on-the-Main, was put on exhibition at Tiffany's, Feb. 1, where it will probably remain until the weather permits of the laying a foundation for it upon the grounds of George Gould's place, at Lakewood, where it is to become a part of the ornamentation. A Prussian eagle attacking a dragon forms the group, which is entitled, "The Triumph of Enlightenment Over Ignorance." At the Paris Exhibition the group formed the centerpiece of the German exhibit.

Old Pottery from Egypt.

THE Egyptian Gallery at the British Museum has, says the *Sphere*, just come into possession of the mummy of a man which may well be the oldest known body of any human being. The facts concerning it are briefly summed up in the following particulars: The grave was first seen by a wandering Arab; he reported his discovery to a British official, who immediately sent a couple of Egyptian soldiers to guard it day and night until it could be safely removed. The body is not a mummy of the ordinary historic Egyptian period, such as that of Rameses II., the father of the Pharaoh of the Exodus. It was never bound up in linen or cased in any painted coffin, but was merely coated with a preparation of bitumen, the Arabic word for which is *mumia*; hence our word mummy. To reach the period when this man hunted along the banks of the Nile it is necessary to travel backwards in time through the modern period since Elizabeth, through mediæval Europe, through the whole history of Rome and Greece, past the time of the earliest mummied king the museum possesses, past even Menes, the earliest king to which Egyptian records make reference, who, according to Mariette, ruled about 5004 B. C. Then we are among two prehistoric races, one the conquerors and the other the conquered, out of which sprang the Egyptian race of the earliest dynasties. It is with these remote stocks that this man is connected. Considering the conditions in which he was found, it is evident that he was associated with a late period of the new stone age of Egypt. He is buried in a characteristically neolithic grave (the graves of this period are covered with rude slabs of stone), and has neolithic pots and flint implements beside him. They are like other neolithic pots and chipped flint weapons and knives found in other parts of the world. The fine, thin flint knives were perhaps placed in the grave as part of a funeral ritual. They should be compared with the Egyptian flints in the prehistoric section of the museum; they are almost identical with those found in the grave. There is, of course, no inscription of any kind on the pots, knives or grave, all having been made long before the invention of a written language. It is curious to note that certain ancient Egyptian documents mention traditions of a race called the Trehennu, who had red hair and blue eyes. This man has distinctly auburn hair. He was buried on the western shore. In later times every Egyptian was buried

on that side of the river, and Egyptian models of the death boats on which the body was ferried over the stream may be seen in the Egyptian Gallery.

A Remarkable Work in Mexican Onyx.

THE largest and most elaborate piece of onyx ever manufactured in Mexico is being made in the City of Mexico for Fairfax Cartwright, the charge d'affaires of Great Britain, in Mexico. It is in the form of a mantelpiece and is intended by Mr. Cartwright for his ancestral home, Aynho Park, near Banbury, Oxfordshire, Eng. The general design of the mantelpiece is English rénaissance. The work of manufacturing this handsome ornament has been in progress for several months. The artist in charge of the carving is an Italian, Francesco Laffi, with a young assistant, Dante Blaggi. The mechanical execution is in charge of Pablo Aguiloché, a Spaniard, who has had many years' experience in the quarries of Carrara, Italy.

The onyx is used in the white and green. The round pillars, on either side, are monolithic pieces of green onyx of a remarkably delicate shade, and they stand out against a background of the white onyx. The cornice above the fireplace is elaborately carved in roses and garlands and is seven feet from end to end. Beneath it is an elaborately treated slab, with the Cartwright coat of arms, also carved in onyx, in the center. Inside of the pillars and on either side of the fireplace are two panels in white Carrara marble. These panels are the only parts about the mantelpiece that are not of onyx, and they are of marble, because onyx would not stand the heat consequent on so close a proximity to the fire. The garlands and medallions with which the two Carrara marble panels were carved, were designed by Homdedeu, the Catalonian artist. The large space inside the fender will be laid with onyx tiles, which have been carefully selected and are of colors corresponding with the mantelpiece.

Grapework is the vogue in Philadelphia, Pa. The artists of the Peter L. Krider Co. have just completed some beautiful examples of hand carved vines, leaves and clusters of grapes, in half relief, on sterling, which are much admired. The pitchers, loving cups, punch bowls and centerpieces are attracting the attention of art critics.

Alcohol	Gum mastic.
(Wood,	Muriatic acid.
Ammonia.	Nitric acid.
Aqua-regia (nitro-muriatic acid).	Sal-ammoniac.
Benzine.	Shellac.
Bi-carbonate of soda.	Saltpetre.
Boric acid.	Sulphuric acid.
Calcium plaster.	Sulphate of iron.
Canada balsam.	Sulphuret of potash.
Chloride of iron.	Soap.
Chloride of zinc.	Washing soda.
Chromic acid.	

Boric acid is used in the preparation of anti-oxidizer.

Chromic acid is used for testing silver. If a drop of it be placed on sterling silver it will immediately change its color from a bright crimson to a dark red, while on silver less than coin it will become the color of chocolate.

Muriatic acid is used in the preparation of soft-solder destroyer; for making aqua-regia, etc.

Nitric acid is used for testing gold and silver; removing mercury from gold and silver and for making aqua-regia.

Aqua-regia, which is an old name for nitro-muriatic acid, is composed of three parts of muriatic acid and one part of nitric acid. This acid or combination is used for dissolving gold and testing alloys of 14 karat or over.

Sulphuric acid is used for making the pickle which is used for cleaning articles after they have been heated.

It may be well to state here that should any acid, by accident, fly into the eyes of the workman he should immediately rub soap and water into the parts affected. We know this from experience to be an efficient antidote.

The uses of alcohol are so well known to the trade that it is not necessary to state anything about it excepting that wood alcohol, which is only one-half as expensive as grain alcohol, will answer just as well as the latter for the jewelry repairer's use.

Ammonia should be bought pure and diluted with four times its volume of water. This will be found satisfactory for washing jobs.

Bi-carbonate of soda, or baking soda, is used for washing dirty and slightly tarnished silver ware.

Benzine is used mainly for removing tripoli from work before using rouge.

Canada balsam, which can be obtained in any drug store, is the cement used for cementing bifocal lenses.

Calcium plaster, or plaster of paris, is used for fastening tops on vinaigrettes, salt shakers, etc.

Chloride of zinc dissolved in alcohol is used as a soft-soldering fluid. It can be purchased at any drug store.

Chloride of iron is used for oxidizing brass buckles. The chloride is dissolved in water and then boiled. While boiling, the buckle is immersed until the desired shade is obtained. Should a darker shade be wanted, dip the article into a liver-of-sulphur solution.

Gum mastic is the best cement we know of for cementing pearls on pegs. It comes in "tears" or balls and hardens very quickly.

There are on the market jewelry soaps and washes of various descriptions, but for every-day use in the shop and store we prefer Ivory soap. It is smooth, does not scratch or cause the work to tarnish and is nice for cleaning the hands and face.

Shellac is used principally for fastening braid in the metal ends, for guards.

Sulphate of iron is used for precipitating gold held in solution and for making soft-solder destroyer.

Saltpetre is used as a flux for refining purposes.

A piece of sal-ammoniac is the handiest thing for tinning a soft-soldering iron. Moisten the sal-ammoniac with the soldering-fluid and then rub the heated iron and a piece of soft-solder over it.

Sulphuret of potash, or liver-of-sulphur is used for oxidizing articles of silver. It should be kept tightly corked in a bottle and can be used in either of two ways. Place a small piece in a boiling-cup and add some water, then slowly heat and immerse the article; or dissolve it in water and place it in a bottle to be used when wanted.

Washing soda is very useful for removing pickle from hollow goods. Place the articles in a bowl of warm water and add washing soda until all bubbling ceases.

(To be continued.)

It Will Pay.

VOL. XLII. NO. 3.

UNIQUE AND INTERESTING SPECIMEN OF GOLD MOUNTING.

TWO views are here presented of an interesting piece of work, interesting not only because of its construction, but also because of its importance in connection with public affairs. The article is a ballot box and was made by Shreve & Co., San Francisco, Cal., upon the order of the Republican State Committee of California, and

edge glass, resting upon a base of dark red-wood burl. Rising from each of the four corners is a column of manzanita, with base and capital of gold, heavily chased. Resting upon these columns is the top—a combination of California buckeye, madrone and manzanita—the upper part opening as a lid, hinged and fastened with a gold

Davis, Christian B. Rode, Frank McGowan, Warren R. Porter, James McFadden." On one side is a gold shield, engraved: "President William McKinley, of Ohio." On the other side is a gold shield, engraved: "Vice-President Theodore Roosevelt, of New York." On the front edge of the cover is a gold band, with the inscription: "Repub-

FRONT

BACK

GOLD MOUNTED BALLOT BOX IN WHICH THE PRESIDENTIAL ELECTORS OF THE STATE OF CALIFORNIA DEPOSITED THEIR VOTES.

was used Jan. 14 to receive the ballots cast by the electors of the State of California for William McKinley as President and Theodore Roosevelt as Vice-President. The box will be presented to President McKinley.

The box is 8x8 inches square, and was designed and manufactured by Shreve & Co., being constructed of California woods, mounted with 14-karat gold. The box proper is formed by four panels of beveled

padlock, the key of which is secured by a chain. On the front face of the base is placed, in gold, the Great Seal of the State of California, on either side of which is an American flag in 14-karat gold enameled in colors, entwined with gold laurel leaves in relief. On the back of the base is a gold shield, inscribed: "Presented to Hon. William McKinley, by the Electors, Samuel M. Shortridge, William J. Barrett, John W. Ryan, Harold T. Power, William R.

lican Majority, November 6th, 1900, 39,770."

On the back edge of the cover is a gold band, engraved: "Ballot Box, Presidential Electors of California, January 14th, 1901." The whole is contained in a rich morocco case, the bottom of which, when the cover is removed, serves as a pedestal.

Some of the new silver is not burnished, but finished with a soft, dull whitish luster, recalling the natural hue of the metal.

PRIZE-WINNING WINDOWS
IN THE WINDOW DISPLAY COMPETITION OF
SIMMONS CHAINS.

We show here photographic reproductions of the five windows which won the fourth prizes of \$10 each in our window display contest. They are as follows:

No. 1.—THE C. N. MAXWELL JEWELRY CO., Tuscaloosa, Ala. This display had for its centerpiece a large white globe with the map of the world marked thereon by Simmons Chains.

No. 2.—REID & TODD, Bridgeport, Conn. Three large arches displayed the three Simmons window cards on a background of royal purple and silver.

No. 3.—LOUIS A. ANTOINE, Chicago, Ill. Big cables from the top of the second story supported signs on two sides of the store and the corner windows were filled with Simmons Chains.

No. 4.—GEO. E. SHAW, Putnam, Conn. A tasteful and very inexpensive display. Bright selected Autumn leaves, holding watches and chains, were distributed over a white ground. Festoons of chains lined the sides and back.

No. 5. CAMPBELL & CO., Chicago, Ill. A large suspension bridge whose cables were made of Simmons Chains was the center of attraction here.

CHICAGO: 126 State Street.

Precious Stone Markets.

PARIS, FRANCE, Feb. 10, 1901.

Pearls.—The tendency of the pearl market is continuing unchanged, viz.: very firm. The patience of the East Indians who send their lines to London is remarkable. If they do not at once obtain the prices asked for their lots, they immediately order their return. Many times, to a telegraphic offer below the prices asked, their only reply is another dispatch ordering the immediate return of the pearls.

Thus it is that the rich Indian consignors of pearls hold the lots sometimes for 10, 15 or even 20 years. These lots are constantly making the trip between India and Europe, and their prices are always higher; there is never any reduction. The owners are perfectly certain that they will sell the pearls some time or another, and also aware of the fact that for the last 100 years pearls have been constantly increasing in price.

Schulz & Rudolph, 28 John St., New York, have just received a varied assortment of new timepieces from the Jürgen factory, among which is a watch that attracted much attention at the recent Paris Exposition on account of its complications, it being a chronograph, minute repeater, split second and minute register, with perpetual calendar, lunar phases, etc. It is a marvelously complicated piece of mechanism of unerring precision.

ELSIE BEE'S FASHIONS.

A LADY'S RAMBLES AMONG THE JEWELERS.

Nouveau art seems to be taking the fine shops by storm. Watch cases of plain, lustrous colored enamel bear floral forms of carved gold in all degrees of relief from low to very high. So distinct are some of these forms that they have the effect of a spray of flowers laid carelessly on the case. The lotus, poppy, sunflower, chysanthemum, rose and other bold motives are most in evidence.

New art necklaces show in the jewelers' cases side by side with the most costly pearl and diamond collars. There promises to be an era of colored stones in neckwear. Tinted gold, many hued enamels and colored gems all combine in each single confection, making the new throat pieces radiantly beautiful. Each one also is a specimen of rare designing, for individuality is the key note in the new form of jewelry.

A broad collar in open work of brilliants wherein are set, at intervals, nine very large cabochon turquoises (the long axis running across the collar), is a striking example of the growing vogue of color in the necklace.

The barbaric beauty of rough gold and uncut gems will be the next novelty exploited, if one of those vague intimations

which have ushered in all our late fashions is to be trusted.

Uncut stones are set in rings, purses, chains, umbrella tops, or wherever fancy dictates.

Jewelers provide ingenious devices for doing away with ear piercing, thus making easy the path of the newly favored ornament.

Little, round balls of turquoise, about the size of a pea and perfect spheres of purest blue, are the captivating form of newest earrings. No mounting shows.

Rose gold reigns in the lorgnette and jewelry has become most elaborate.

Muff chains are massive and encircled with semi-precious stones.

Inexpressibly dainty is a ring composed of two small diamonds, oval cut and mounted one above and the other below the band of the ring, which is itself encrusted with brilliants. The whole is an array of blue-white stones apparently devoid of any touch of metal.

A bracelet of rarest elegance consists of a mere thread of gold with a pendant comprising first a square cut emerald, second a ruby, and last a marquise diamond.

Very thin watches are in evidence and,

N. H. WHITE & CO.

invite the attention of
the trade to their.....

conversely, others are of unusual bulk and rotundity.

A lady's watch in plain black enamel and brilliants is a striking and elegant object.

"Tooth" ring mountings are used for some very large diamonds for men's wear. They display the stone with great effectiveness.

Pretty tie clips of gold wire in heart shape are useful accessories in the evening toilet. They are set with pearls and turquoises.

An adjustable bracelet adapts itself to any size of wrist. It is constructed on the trellis pattern and contracts or expands after the fashion of the familiar iron gate.

Two butterflies in pearls, each mounted on a small safety pin and connected by a tiny chain, form a very pretty lace accessory. Lace is now lavishly used and jewels never find a more becoming background.

It is rumored that the popular gold tags are to be varied with crystal ones.

The "fiddle" shape furnishes a smart variation in the backs of hair brushes.

The "natural growth" idea is very noticeable in silver ware designing. There is much brightly polished silver to be seen.
ELSIE BEE.

Corals in Paris.

WE have repeatedly reported the growing vogue of the coral. This stone is now extremely fashionable. In all the showcases of the fine Paris jewelry stores one can see coral trinkets where we were not wont to see any for years.

Coral of pale shades is particularly favored, the price of this variety having trebled during the past two years.

The dainty, dark haired, bright eyed coral workers at Naples are rejoicing, as the fruit of their labor is increasing again. The chief source of material for these feminine operators is the precious coral (*Corallium rubrum*) occurring in the Mediterranean. Most corals are collected from rocky banks in the Mediterranean, on the coasts of Sardinia, Sicily, North Africa and also in the Adria.

About 150,000 to 200,000 kilos is fished annually in the Mediterranean Sea, representing a value of about \$1,500,000. The price per kilo is estimated according to color—pale pink is the prettiest—at from \$4 to \$600, but at the present time about \$75 is paid on an average for good merchandise. Chief markets for corals are Paris and Naples, but since the charming ornament is again entering into favor there is likely to be a demand for it at other places as well for a long time to come. It cannot be gainsaid that the coral is always pretty, whether in vogue or not.

SON & CO.

The Situation at Antwerp.

PARIS, Feb. 10.—The strike of the diamond workers has been declared suspended for lack of funds until the next revival of business. It has been decided to organize the federation by forming a powerful "caisse de resistance," so as to be able to succeed better in the future. The federation of the "Antwerpsche Diamant Bewerkeres Bereenigung" has issued forth stronger and better organized than before the strike, despite its loss.

The number of its members has risen from 600 to 2,500, who now regularly pay their assessment of one franc per week. They have also founded a co-operative society among themselves for the purpose of procuring all they need in their households at favorable prices and terms. On the other hand, the employers and "eigengewerkmakers" have also founded, in agreement with some workmen, a society of mutual aid. Already 300 members have been enrolled. The workmen pay 50 centimes for assessment per week each and each employer and "eigengewerkmaker" agrees to pay as much per "meule," ordinarily occupied by him.

The employers also bind themselves to give the preference to these workmen, as they require them. Several workmen have had to appear of late before the court for violation of the liberty to work and rebellion against the police. The majority have been acquitted; others have been condemned to the payment of small fines amounting to a few francs, which proves that many charges made against them were exaggerated.

A committee were organized here two years ago among the merchants and workmen under the honorary presidency of Louis Coettermans, with the object of collecting money to erect a statue of Louis Bercken, the originator of diamond cutting at Antwerp. Owing to the crisis in the business, the project had been deferred to a more favorable time. Now the said committee have resumed their activity and have addressed an appeal to the people to assist in the work, which is expected to be crowned with success.

The strike has wrought great damage. It was impossible for the manufacturers to finish all the work which had been commenced, and for that reason many foreign dealers who came here at the end of November last were not able to find what they desired to purchase. A few have bought some lots of the old stock; of the new merchandise little has been sold, several manufacturers being left with the larger part of their goods on hand. This state of affairs seems to point to a

8 MAIDEN LANE, NEW YORK.

fresh crisis in our industry at a more or less near period, for everybody familiar with the diamond business knows that the foreign buyers will not return before the month of March or April.

Up to the present the workmen have had no cause for complaint on account of lack of work, for the demand has exceeded the offerings, the result of which has been that some large firms have raised the salary of their employes a little so as to keep them.

Let us hope that in future, if the strike question is still stirring, labor will arrive at a better understanding with capital for the welfare of all concerned.

The old diamond cutting establishment of Mr. Van Emden has been sold to a syndicate of six polishers for the sum of 38,000 francs. A few years ago this plant was bought at 120,000 francs.—From Antwerp correspondence in *Le Diamant*.

Jules Wendell & Son, Oswego, N. Y., have recently had their store redecorated.

S. C. Suydam, Baldwinsville, N. Y., has been confined to his home for several weeks past by an aggravated attack of the shingles.

W. F. Main and M. E. Price, of the W. F. Main Co., wholesale and manufacturing jewelers, Iowa City, Ia., have gone east on a business trip.

The firm of Stone & Beekwith have dissolved by the retirement of L. S. Beekwith, and their business will hereafter be transacted at Ilion, N. Y., by George H. P. Stone. Their New York office is at 11 John St.

The Petition in Bankruptcy of Fred J. Stilson.

ATLANTA, GA., Feb. 12.—Fred J. Stilson, for many years proprietor of one of the best known jewelry houses in the city, through his attorneys, King & Anderson and Lewis W. Thomas, Feb. 9, filed a petition in voluntary bankruptcy in the United States District Court. The petition sets forth that the assets are \$29,240.24, the stock and fixtures amounting to \$22,680. The bills, notes and accounts are put down at \$3,679.74. In addition to the foregoing the other assets are a lot of land at Oxana, Ala., for which Mr. Stilson paid \$500 some eight or 10 years ago, and \$20,000 par value of the stock of the Gadsden Land Co., for which he paid \$2,300. The other assets consist of a small amount of cash on hand.

Mr. Stilson's liabilities are set forth at \$27,808.72, only a small amount of which is preferred. The preferred creditors include taxes amounting to \$155.48, a small amount due the clerks in the store, a local creditor who is secured to the amount of \$500, and the attorneys who are representing him in the case. The unsecured creditors include firms in New York, Cincinnati, Boston, Providence, and Mrs. Stilson, to whom is due an amount advanced by her to aid in paying the creditors of the old firm of Stilson & Collins at the time of their failure about two years ago.

Judge Newman the same day appointed T. D. Meador, vice-president of the Lowry National Bank, receiver of the stock, fixtures and other property, and in accordance with the order of the court Mr. Mea-

dor took charge. It is probable arrangements will be made to continue the business under the receivership. Mr. Meador gave bonds in the sum of \$10,000. The case will be referred to Percy Adams as referee.

Mr. Stilson has been in business in Atlanta for many years and has made numerous friends.

Good Openings for Watchmakers and Jewelers in the West.

OMAHA, Neb., Feb. 15.—The old saying of Horace Greeley, "Go west, young man," was never as true as it is to-day with regard to watchmakers and jewelers. The demand for good workmen has been heavy for several years all through this territory. Wholesale dealers of Omaha are in constant communication with retailers throughout Nebraska, Iowa, Colorado, South Dakota and Wyoming, who wish to secure good watchmakers. The horological school in this city is turning out graduates continually, but they are not in sufficient number to supply the demand. When, added to this condition of things, good wages are offered, it seems strange that more men do not learn the business or more of the unemployed come west. A good workman is always sure of a position. A poor one will not hold it long.

It is also worthy of note that there are many very good openings for jewelers and watchmakers with a small amount of capital. In fact, if a good workman comes with first class recommendations he need have very little capital. The writer has been told repeatedly by an Omaha whole-

PEARLS.

Prepared:

When you are in need of anything unusual, you generally want it in a hurry. That is the time to remember that our stock is not only replete with diamonds, pearls and precious stones of the grades usually carried, but that it contains gems of a character that cannot be duplicated.

We have extraordinary facilities for securing the best in the markets of the world. The condition of our stock evidences this fact at a glance.

Alfred H. Smith & Co.,

CHICAGO.

182 Broadway, N. Y.

DIAMONDS

And Other Precious Stones.

saler that he would be only too glad to furnish the outfit on time for any reliable watchmaker and jeweler who would establish himself in business in his territory. There is one place on the Burlington where a dealer who had been doing a big business was obliged to remove on account of personal affairs. He could find no one to take his place, and that town is without a jeweler. There are also openings along the Northwestern in Iowa and the Rock Island roads where a few hundred dollars to start with would enable a man to work into a paying business. No matter how much other business may be overdone, there is a scarcity of watchmakers in the west, and the man who understands his business and will come west is assured of a competency.

Practical Machine for the Cleaving of Diamonds.

WASHINGTON, D. C., Feb. 15.—A clipping from a Belgian newspaper received by the State Department sets forth the information that the diamond industry is at the present moment very much occupied with a curious invention—a machine for cleaving diamonds. It is known that the work of cleaving constitutes a special branch, and a very delicate one, in the art of working diamonds.

The machine in question, it appears, accomplishes this difficult feat, and the manufacturers will realize great advantages therefrom. The machine was invented in America. The large cutting firms in Brussels are, at this moment, making trial of it.

More of the Charles E. Katsch Jewelry Stock Recovered.

NEW HAVEN, Conn., Feb. 13.—The examination of Charles E. Katsch in the bankruptcy court was postponed to-day until next Monday by an arrangement made with Referee Newton. The referee has decided that the stock in Mr. Katsch's new store did not belong to the American Jewelry Co., as was alleged, and the creditors will share in whatever benefits are to be derived from this stock. Deputy United States Marshal Bowen has, in addition to the stock that was seized recently, found more stock that is valued at about \$3,000. It consists of rings, watches and valuable stones. The articles seized will be added to the stock already in the hands of the trustee.

Charles Bahe and Marion Mann, Faribault, Minn., are under arrest on a charge of robbing F. Z. Sherwood's jewelry store in Faribault. The police suspected them and kept a sharp watch on their actions, as well as a lookout for the stolen property in pawnshops. Part of the missing goods was lately found in a St. Paul second-hand store. The proprietor gave a description of the men who sold him the goods and it fits the men in charge very well.

The Creed-Kellogg Co. Suffer by a Serious Fire.

BOSTON, Mass., Feb. 16.—The Creed-Kellogg Co., dealers in jewelry and novelties, were the principal victims in a \$150,000 fire, Wednesday night, in the six-story brick and stone structure at the corner of Essex and Kingston Sts., known as the Kingston building. The fire was discovered about 11 o'clock and was first made known to the firemen by means of the automatic alarm in the building. This was followed by three alarms. The weather was bitterly cold and handicapped the firemen in handling the long lines of hose, ladders, etc. The fire is believed to have been caused by spontaneous combustion among the stock of the Creed-Kellogg Co. on the second floor.

The enormous quantities of water poured into the building resulted in a perfect flood of jewelry, combs, etc., being washed down the stairs from the second floor. This stock was carried out into the streets and the crowds were not slow to take advantage of this opportunity to obtain jewelry at lower prices than usual. As soon as the police became aware of what was going on, they interfered, but not until many rings and other pieces of jewelry had been taken away.

G. M. Kernahan, New London, Ia., has given a chattel mortgage for \$81.

The store of L. G. Prescott, Princeton, Minn., was burned out lately, but he is starting up again.

Annual Meeting of Wallingford Corporations.

WALLINGFORD, Conn., Feb. 16.—The annual meeting of the R. Wallace & Sons Mfg. Co. was held this afternoon and the following directors were elected: Frank A. Wallace, Henry L. Wallace, Walter J. Leavenworth, Wallingford; George M. Wallace, New Haven; Selah A. Hull, George M. Curtis, Meriden, and Henry J. Lewis. The officers elected comprised: President, Frank A. Wallace; secretary, Henry L. Wallace; treasurer, Walter J. Leavenworth; assistant treasurer, Clifford W. Leavenworth; superintendent, Charles D. Morris.

This afternoon the annual meeting of the Valentine-Linsley Co. was held, and the directors elected comprised the following: Frank A. Wallace, Clifford W. Leavenworth, Charles D. Morris, Frank W. Morris, E. C. Valentine. The directors elected these officers: President, Clifford W. Leavenworth; treasurer, Charles D. Morris; secretary, E. C. Valentine.

Death of an Old Time Jeweler.

SPRINGFIELD, Mass., Feb. 16.—Francis Norton, Tax Collector of the city of Springfield for 49 years and who died last week, was for several years a leading jeweler of the city. He had been in poor health for a long time and was compelled to resign his office as collector, but as he would not be relieved of office until April 1, death forestalled his purpose.

Born 75 years ago, he was of stock that traced itself back to George Norton, who settled in this country in 1629. The deceased entered upon his business training at the age of 20, in Hartford, Conn., and after a few years as a clerk in general stores, determined to branch out for himself, and with J. M. Skiff opened a jewelry store in this city, and the firm continued successfully for a few years until they dissolved, and Mr. Norton continued the business alone until 1859, when he was elected City Collector. At that time Springfield was a city of 15,000 with a tax levy of \$79,000 annually, while to-day it has a population of over 62,000 and a tax levy exceeding \$1,000,000. In 1860 he was elected an assessor and held the office until 1883, barring three years, when, the duties of his old office having increased, he gave up the assessorship.

Suggested License Fees for the District of Columbia.

WASHINGTON, D. C., Feb. 16.—In response to a Senate resolution calling upon the District commissioners to furnish such a schedule of license fees as, in their opinion, should be levied and collected on the different trades, occupations and business enterprises in the District of Columbia, the Assessor of the District has forwarded a list which, to his office, he says, seems equitable and just. Among other trades and occupations, the following are mentioned:

Auctioneers, \$100 per year; business brokers, \$10; dealers in general merchandise, per \$1,000 on stock, \$10; dealers in general merchandise, per \$100, \$2; silversmiths, \$12.

E. J. Saxe, Detroit, Wis., has opened a store at La Crosse, Wis. He will carry stock and do general repairing.

Timely Advice

And the best advice we can offer is to replenish your depleted stock of Diamonds and Diamond Jewelry NOW. It is not too early. If you haven't the goods to offer, of course you cannot make sales, but if you make a proper showing NOW you will be surprised at the extent of your Spring business. Besides, it will gain you a reputation as a diamond house that will be of considerable value to you when the busy season begins. In the meantime, if you have calls for special pieces that you haven't in stock, we can help you.

DRAWBACK ON WATCHMEN'S CLOCKS.

WASHINGTON, D. C., Feb. 13.—The following letter has been issued by the Treasury Department regarding drawback allowed on watchmen's clocks manufactured by the Newman Clock Co., Chicago, Ill., from imported clock movements and domestic metal cases and keys:

TREASURY DEPARTMENT, Feb. 11, 1901.

SIR:—On the exportation of watchmen's clocks manufactured by the Newman Clock Co., of Chicago, Ill., from imported clock movements and domestic metal cases and keys, a drawback will be allowed equal to the amount of the duties paid on the imported materials used, less the legal deduction of one per cent.

The drawback entry in each case should identify each movement exported by numbers, marks, sizes, etc., as shown by the import invoices, subject to verification and examination by the collector.

Respectfully,

O. L. SPAULDING,
Assistant Secretary.

COLLECTOR OF CUSTOMS, Chicago, Ill.

The Continued Case of John Smith, Charged with Larceny.

BOSTON, Mass., Feb. 16.—The continued case of John Smith, the man charged with the larceny of a diamond ring valued at \$100, the property of Robert P. Stahl, Jewelers building, was called in the East Boston District Court, this forenoon. Since a week ago Friday, when the case was last heard, it has developed that the ring does not belong to Mr. Stahl, but was given to him by another man to sell.

When the case was called, last week, it will be remembered, a young woman witness declined to answer the questions of the Court and was sentenced to 15 days in jail for contempt. After one night in jail, she sent word to Judge Emmons that if released she would tell all she knew of the case. In court to-day she gave the name of Mrs. George Brown. What testimony she gave was stated privately to Judge Emmons and counsel Thomas F. Rice. After hearing her testimony, the Court found Smith not guilty and ordered his discharge. Mr. Stahl was not present and the ring was given to its owner, a Mr. Poole.

M. Weinstein will move his jewelry store in Webster, S. D., to new quarters.

Philadelphia Jewelers' Annual.

New Officers Elected and Preparations Effected for the Annual Banquet.

PHILADELPHIA, Pa., Feb. 20.—The annual meeting of the Philadelphia Jewelers' Club was held last night at the headquarters of this popular organization, 1225 Chestnut St. The date for the annual banquet was fixed and committees named to arrange the details and appoint the various sub-committees. Officers were elected to serve for the current year. The reports of the treasurer and secretary were received and read, and, although considerable enthusiasm was manifested during the balloting, it was, with the exception of the election of the vice-president, more or less cut and dried, as foreshadowed in THE CIRCULAR-WEEKLY'S report of the meeting when the candidates for office were nominated.

The by-laws of the club provide that the vice-president shall be a non-resident of Philadelphia, and, as the majority of non-residents are New Yorkers, there is always considerable electioneering for candidates from Maiden Lane. This year Archie Rutherford, of H. A. Kirby Co., and Harry C. Larter, of Larter, Elcox & Co., were the nominees. Both are popular men. The voting was spirited and resulted in the election of Archie Rutherford. One of the features of the meeting was the overwhelming vote in favor of J. Warner Hutchins, the retiring president of the club, as a member of the board of governors. He received the highest number of votes cast during the week. The election resulted as follows:

President, Louis P. White, 706 Chestnut St.; vice-president, Archie Rutherford, of H. A. Kirby Co.; treasurer, Wm. F. Parry, Jr., S. S. White Dental Co.; secretary, Wm. S. Quinn, of H. Muhr's Sons; board of governors, J. Warner Hutchins, Wm. P. Sackett, Wm. H. Long, A. G. Lee and Newton B. Elting.

When Mr. Hutchins, who presided at the meeting, turned over the president's chair to Mr. White, he gave a heart-to-heart talk to the members of the club, and when he closed there were many moist eyes—an unprecedented incident. Mr. White replied feelingly, and Mr. Long, on behalf of the members of the club, expressed sincere regrets at the retirement of Mr. Hutchins.

The report of Mr. Parry, treasurer, was then read and showed that the club was in a better financial condition than ever before. Mr. Quinn's report, as secretary, showed that the club had 150 members in good standing and that there were 30 on the waiting list, the majority of whom had been waiting for months past. It was then moved that the by-laws be amended to increase the membership from 150 to 175, and after some little discussion, this was done. Mr. Kelly made the motion. Mr. White suggested that a permanent art exhibit be made to enhance the appearance and furnishings of the club's quarters. This met with the approval of the members, who pledged themselves to contribute to the exhibit objects of art from time to time.

The next business of the club was to arrange for the fifth annual banquet, to be held next month, in accordance with the custom of former years. Tuesday, March 12, was agreed upon as the date. The place of holding the banquet will be left to the banquet committee to decide. President White then appointed the following as members of the banquet committee: J. Warner Hutchins, chairman, Wm. G. Earle, Wm. P. Sackett, Wm. H. Long, Wm. Linker, Wm. Bruhl, Fred. Simons, James H. Kelly and Howard L. Roberts. The reception committee will be announced by Mr. White later.

T. W. Humphrey sold out the jewelry business he had been conducting in Billings, Mont., to J. Forester, for a consideration of \$5,000.

New York Jewelry Workers Hold a Public Meeting.

Local Union No. 1, International Jewelry Workers' Union of America, held a public meeting and revived its charter, in Odd Fellows' Hall, 69 St. Mark's Pl., New York, Thursday evening. There was a fair representation of the jewelry shop workers of New York. The main object of the meeting was to secure, so far as possible, a reunion between the members of the organization who remained members all through the strike and those who, for various reasons, dropped out during that contest in 1899, as well as to secure new members from among the men who had never joined a trade union.

Herman Robinson, general organizer of the American Federation of Labor for the State of New York, addressed the meeting. He outlined the advantages of organized labor and spoke of the special benefits in the jewelry trade. Samuel Prince, Assemblyman representing the 16th district, and Charles Herwig, international secretary of the union, were other speakers.

International president Frederick Drissler made an address and presented a charter which made Union No. 1 an officially recognized branch of the International Jewelry Workers' Union of America. The officers of the union stated that it is now in a better condition in every way than ever, with the membership constantly increasing.

J. A. Schirman, Fargo, N. Dak., has filed a voluntary petition in bankruptcy.

Burlingame Bros. have decided to quit business in Hartford City, Ind., and will shortly move the stock to some point in Michigan.

Hiram E. Smith, Madison, Wis., who about a year ago disposed of his interests to his partner, W. J. Gamm, and spent the time since then in Norway regaining his health, has purchased the business of A. E. Thoreson, at 123 E. Main St., Madison.

Charles L. Tiffany Enters Upon His 90th Year Under Happy Auspices.

Charles L. Tiffany, of Tiffany & Co., New York, entered upon his 90th year under peculiarly happy and favorable auspices, Feb. 15. He has just recovered from a severe cold and it was his first appearance at Tiffany's in two weeks. This was the longest that he had ever been away on account of illness in his entire business career of 64 years; in fact, he had never before been absent more than three days consecutively in consequence of sickness.

All morning, wagons and messengers arrived at his home, at 255 Madison Ave., with the tributes of regard from his many friends throughout the city, and when he reached his office, at Union Square, he found awaiting him beautiful floral tokens from his employes and more cablegrams, letters and messages than he could find time to read, as he was overwhelmed with the fervent greetings and well wishes of his hundreds of employes, who know him only as a friend. They were overjoyed to see their chief once more at his desk, and their warm expressions of regard received cordial acknowledgments, filled with gratefulness for their kind sentiments.

New Members in the Firm of Patek, Philippe & Co.

The announcement has just been made that Alfred G. Stein, the American representative of Patek, Philippe & Co., and Jules Perrier, for 30 years an important collaborator of the firm, have been admitted to partnership in the firm.

Mr. Stein, who was born in New York in December, 1866, received his early education in a remote part of Alabama, near Mobile, where his father still lives. He studied horology under F. W. C. Nieberg and for two years was employed at the bench with Tiffany & Co. Since then he has been with Patek, Philippe & Co., representing them at the Chicago Exposition in 1893, where he had charge of their exhibit and acted as secretary of the Swiss Commission in the Horological Section. He was the only judge from this country on horology at the Paris Exposition in 1900, and was one of the three United States delegates to the International Congress of Chronometry and Chronology. It is interesting to note that Mr. Stein is the first American member of the firm, the cosmopolitan character of which is shown by the fact that since the establishment of the business, in 1837, besides its founder, Antoine Norbert de Patek, a nobleman from Poland, it has included Adrian Philippe and two other Frenchmen, one Russian, one Greek, one German and several Swiss. The achievements of the firm in the horological field, their successes in various timing contests and the many honors gained by them at exhibitions are well known to the readers of THE CIRCULAR-WEEKLY.

The Capital City Jewelry Co., Des Moines, Ia., have perfected their organization and have leased quarters in the Youngerman block, to do a wholesale business. Several traveling men will be put on the road at once. B. Siegel, formerly a retailer, is the principal stockholder.

Third Annual Entertainment of the Buyers' Association of America.

The third annual entertainment and reception of the Buyers' Association of America and their friends was held, Thursday night, at Sherry's, New York, with 1,000 present. After an informal reception was a musical programme which lasted until 11 o'clock, when a grand march began the dancing. Representatives of the large department houses were present from New York, Jersey City, Cleveland, Sioux City, Richmond, San Francisco, Baltimore, Philadelphia, Newark, Boston, New Haven and Kansas City. The committee of arrangements consisted of G. M. Butler, B. M. Sinks, R. C. Dickman. The reception committee were E. M. Lostman, Leo Kaufman, C. L. Smith, W. J. Beckton, A. L. Fletcher, Benjamin Braun, J. Flegenheimer, J. L. Adrien, T. J. Churchill, Charles S. Wood.

The Buyers' Association announce that there has been during the past year an increase of over 25 per cent. in the membership, and that there has been an insurance clause under contemplation for the benefit of the members. New commodious quarters, where social reunions may be held by members of the association and their friends, are now provided at 26 E. 20th St. In these new rooms recreation, such as billiards, progressive euchre, whist, etc., may be indulged in and there are facilities by which buyers may procure meals.

Three Men Relieve Jeweler E. D. Thomas of a Wallet of Precious Stones.

SAN ANTONIO, Tex., Feb. 14.—E. D. Thomas, a jeweler of E. Houston St., this city, was yesterday robbed of a wallet containing 40 unset diamonds, ranging in weight from ½ karat to 1-32 karat, and a lot of opals and half pearls. The total value of the stolen goods will reach \$1,500. The robbery was committed in broad daylight, and is best described in the words of Mr. Thomas, who said to THE CIRCULAR-WEEKLY correspondent:

"Three days ago an elderly man, weighing about 140 pounds, came into the store and asked to see some plated collar buttons. These goods were in a rear show case, on the right-hand side of the store and very close to a safe in which valuable jewelry, money and unset precious stones were kept. The old man bought a collar button, paying 25 cents for it, and left the store. He came back afterwards and looked at other goods, but made no purchase and left again. Yesterday, just after 12 o'clock two well dressed young men of very genteel appearance entered the store and asked me to show them some silk umbrellas; and immediately afterward the same old man who had bought the gold plated collar button entered the store. I was engaged near the front of the store showing the first two men an umbrella, and paid but little attention to the old man, who sauntered to the back end of the room. When he was well back, one of the men whom I was serving said:

"This seems to be a good umbrella,' and he opened it so that it was between me and

the old man at the back part of the house. I did not like this action and I looked from behind the open umbrella just in time to see the old man step from behind the end of the counter near the safe. Just at this moment one of the men in front asked:

"What is this set of jewelry worth?' and as I turned to answer the old man walked forward and said:

"You seem to be busy now, and I will drop in later.'

"The old man then walked out, going west on Houston St. The other two men soon left. As soon as they left, I went back to the safe and discovered that the wallet containing the unset diamonds, opals and half pearls was gone. I immediately asked my jeweler, who was at work in a back room, if he had taken the wallet out of the safe, and he replied that he had not. I immediately sent an alarm of the robbery to police headquarters."

The police are working on the case, and as Mr. Thomas was able to give good descriptions of the three men, their chances of arrest are considered good.

Jeweler J. B. Barnes in a Duel.

CASTLE ROCK, Wash., Feb. 9.—Last Wednesday evening people were startled by the report of eight shots being fired in rapid succession. Upon investigation it was found that the shooting was done by J. B. Barnes and Harry Lovell, each with a 38-calibre revolver firing at the other at close range. Barnes fired five shots and Lovell three.

Lovell had been rooming at the Barnes

home and Mr. Barnes thought he had reasons to believe that improper relations existed between Lovell and Mrs. Barnes. After the shooting Lovell was found in a lot. He had been shot in the left leg, the tibia being broken. His coat showed that four bullets had passed through it in various places, but there were no wounds of importance to his person except the one in the leg. Mrs. Barnes fell in the wagon track in the alley from a wound in the hip. Barnes escaped uninjured. The wounded were carried to their homes and medical aid was summoned.

J. B. Barnes is a jeweler of this place and is well and favorably known. Harry Lovell is comparatively a stranger here.

Second Hold-Up at Caplan & Teplitz's Store Succeeds.

PITTSBURGH, Pa., Feb. 15.—Another attempt at robbery, and this time a successful one, was made on the store of Caplan & Teplitz, Monessen, Pa., on Feb. 14. It appears that as Samuel Caplan, not Mr. Teplitz, as was at first reported, was returning to the store after he had locked up for the evening, having forgotten a handkerchief, he found himself confronted by three men as he stepped inside the door. The lights from the street reflected on the barrels of three revolvers leveled at his head.

"Throw up your hands and make no noise or we will blow your block off," said one of the robbers in a low voice. Caplan complied with the request. "Now, open up the safe and get a move on you," said the leader. Caplan opened the safe and one of the thieves lighted a match to see which box contained the valuables they wanted. They selected a box containing diamond rings valued at \$650, and told the jeweler to put the other "trash" back in the safe.

One of the robbers then kept Caplan

covered with a gun while the others opened the back door. He then slowly backed to the doorway, keeping Caplan covered. When the thieves disappeared from the doorway Caplan rushed after them and fired several times at the retreating forms, but his aim was wild and the shots were not returned. Caplan's shots brought a large crowd of excited citizens to his store and the police arrived there within a short time after the robbery. The town was scoured for the robbers, but no trace of them was found. A thorough investigation of the robbery is being made.

Boston Jewelers' Club Elect Officers for Ensuing Year.

BOSTON, Mass., Feb. 13.—Thirty members and friends of the Boston Jewelers' Club were present at Young's Hotel last evening, the occasion being the annual meeting and election of officers for the year 1901.

The officers for the ensuing year are: Arthur H. Pray, president; William A. Thompson, vice-president; C. O. Lawton, secretary and treasurer, and H. B. Burnham, E. W. Martin and William C. Wales, directors.

Brief addresses were made by president A. H. Pray, H. W. Patterson and D. C. Percival. The next meeting will be held at the Waldorf-Astoria.

Charles P. White, for several years head workman in the jewelry store of his brother, the late E. B. White, Houlton, Me., is soon to open business in Merritt's brick block, Houlton.

The bankrupt stock of the Western Jewelry Co., Cripple Creek, Col., was recently sold at auction at their store, 175 E. Bennett Ave. The sale continued until the entire stock was sold.

NEW ENGLAND MANUFACTURING JEWELERS' & SILVERSMITHS' ASSOCIATION.

Winter Banquet

At the Trocadero, Providence, R. I.,

Evening of February 15, 1901.

PROVIDENCE, R. I., Feb. 16.—The executive officers of the reorganized New England Manufacturing Jewelers' and Silversmiths' Association covered themselves with glory last evening when the Winter banquet of that organization took place at the Trocadero, the most elegant assembly hall in this city. The event was not only the largest and most successful ever held in this section of the country by any association of jewelers, but may safely be set down as one of the most notable functions of the sort that have taken place in Providence in recent years.

Nearly 400 members and guests assembled for the exchange of social greetings in the Trocadero parlors and an hour later sat down to the sumptuous feast under which the eight long tables groaned in the banquet hall above. It was a big and jolly crowd, for the officers and members of the association were everywhere in evidence, spreading broadcast the hearty good-fellowship for which jewelers are famous, and making everybody welcome and at home.

It was but a few minutes after 7.30 o'clock, the hour scheduled for the banquet to begin, when the line was formed and the members and guests marched up the grand staircase to the banquet hall. Chairman George H. Grant of the executive committee, who acted as master of ceremonies, led the way, followed by Lieutenant-Governor Kimball on the arm of president Frank T. Pearce. The other honored guests and speakers of the evening—Hon. Walter B. Vincent, president of the Board of Aldermen; George H. Peet, president of the Providence Board of Trade; Edward G. Bockland, Rhode Island representative of the New York, New Haven and Hartford Railroad; Hon. George A. Littlefield, Representative from Providence in the General Assembly; Rev. L. L. Henson, pastor of the Cranston Street Baptist Church—were escorted by the officers of the association—vice-presidents O. C. Deveraux and A. A. Bushee, secretary S. A. Baldwin, treasurer S. H. Manchester, S. O. Bigney and Roswell C. Smith, of the executive committee. Theodore

W. Foster, J. Perry Carpenter and Charles M. Robbins, of the membership committee, and John M. Buffinton, William C. Greene and Nathan B. Barton, of the advisory committee.

At the conclusion of the dinner, during which an excellent musical programme was rendered by the Glenham orchestra, president Frank T. Pearce arose to inaugurate the after-dinner exercises, making a brief address, in which he gave a short account of the growth of the organization from a little jewelers' club, formed some 20 years ago.

FRANK T. PEARCE,
PRESIDENT.

PRESIDENT PEARCE'S REMARKS.

Since that time it seemed as though there were not much strength in the organization at times, and as though the Manufacturing Jewelers' Association of New England did not amount to very much. But recently we looked abroad and saw in the other great cities the jewelers' associations having their annual banquets, which were affairs of importance, and we felt that here in Providence and the Attleboros we ought to be able to support an organization of jewelers that would be second to none in the country. Our officers have looked the field over and studied the requirements for making our association representative of the jewelry trade of the whole country. A year ago we had a membership of only 49, and hardly half of them manufacturing jewelers, while now we have a membership of over 200. But we want to go onward. Let that be our watchword until we have made all of the jewelers of this section members of our association. There are other reasons than the social element why they should be with us, but I will leave that to the other speakers who are to follow me.

President Pearce referred to the faithful work of the committee on the new constitution and by-laws, which were adopted at the annual meeting, in January, and which have been already described in these columns,

and spoke briefly of the more essential changes contained therein. After giving thanks to the members of the executive committee for arranging for the delightful dinner which all had enjoyed, he introduced as the toastmaster of the evening Hon. George A. Littlefield, whom he referred to as one whose wit and wisdom had often been heard by the members of the association and who was no stranger to them.

ADDRESS OF HON. G. A. LITTLEFIELD.

I think that we shall all admit that we have had a delightful evening up to this point. Now let us all conspire to have a delightful evening for the rest of the time we shall be here by giving our best attention to the speakers who have honored us with their presence.

I don't know why I should have been selected to act as your toastmaster this evening. Your excellent president could have done it just as well. But since you have seen fit to choose me I will do the best I can, and thank you for the honor you have done me.

It seems to me fitting that this corporation, which means so much to the State of Rhode Island, should first receive the greetings of the State. It gives me pleasure to introduce to you a man who embodies as much as any statesman I know that intellectual independence we must all admire, typified by the heroic figure of the "Independent Man" which surmounts the great dome of our marble capitol—his honor the Lieutenant-Governor, Charles Dean Kimball.

ADDRESS OF LIEUTENANT-GOVERNOR C. D. KIMBALL.

The Lieutenant-Governor spoke very briefly, his remarks being in substance as follows:

It is hardly necessary for me to say that the State of Rhode Island is honored by your invitation to send a representative to this dinner. The material welfare of the State depends upon the prosperity of its business men. There is no class of men in the State more important than the men in the business represented by this Association. Of course, many of you present are not of Rhode Island, but your interests are the same as ours.

I do not wish to detain you with extended remarks, and will therefore call to your attention but a single matter for your consideration—a characteristic of the government of the State—and that is that the State officers here are elected annually. This is probably in accordance with the custom of the early days, when it was possible for men of business to attend to political affairs. Now, we men of business find that we must give our entire attention to our business or have some one attend to it for us. Frequent elections and political agitation are for this reason undesirable. In business we must have men of experience, and so it should be in affairs of government. We should not forget that ours is one of the few States in the Union that elect their officers annually. In other States they are elected for terms of from two to four years.

The toastmaster announced that invitations to attend the banquet had been sent to all the members of the Rhode Island delegation in Congress, and that he was in receipt of a telegram from Senator Nelson W.

Aldrich and letters from Senator George Peabody Wetmore and Representative Melville Bull, expressing their regret that pressure of public business prevented their acceptance. Representative Adin B. Capron had fully expected to be present, but at the last moment learned that he also would be unable to do so. In introducing the next speaker, Mr. Littlefield said:

"I suppose it is not impossible to think of Providence as a rich jewel in the setting of New England, and in this connection I am reminded of the old saying that there is but one jewel that we can carry with us into the future world—the jewel of wisdom. Now that we have heard from the Representative of the State of Rhode Island, it is proper that we should hear from the city of Providence, and I, therefore, take great pleasure in introducing a gentleman well known to us for his rare, judicial, discretionary wisdom—Hon. Walter B. Vincent, president of the Board of Aldermen."

S. O. BIGNEY,
MEMBER, EXECUTIVE COMMITTEE.

Alderman Vincent said in part:

ADDRESS OF ALDERMAN W. B. VINCENT.

Mr. Toastmaster and Gentlemen: I trust you will excuse me if I do not pronounce the whole name of your Association, for the hour is already drawing late and there are several speakers still whom I know you are anxious to hear.

This is one of the evenings when, if you will pardon a reference to a song that has gained some popularity, there seems to be a little taken off the top. I would remind the Lieutenant-Governor that he is not at the top of the heap, but if he will wait a little while we will fix that all right.

A little time ago I had the pleasure of addressing in this hall the Nobles of the Mystic Shrine. I thought that was a pretty lively time.

(Voice from a farther side of the hall: "They ain't in it.")

Mr. Vincent—I think the gentleman has anticipated the remark I was about to make.

Gentlemen, the city of Providence will be glad to appreciate you if you will only appreciate the beauties of our city a little. It is customary to answer when a man from another city asks, "What do you do in Providence?" "Why, Providence is at the head of the jewelry trade of all the world." Seriously speaking, however, there is nothing like an association of this character for men of business. It is an advantage to you in your business. I think you will agree with me that it is an advantage to you to be able to associate yourselves together in this social way. It is well enough to say that "business is business," but that is a theory that may be carried too far. The very way in which you meet one another in your places of business is important. I am glad to learn that your association is so prosperous as I learn from your president that it is, and I trust I may meet these gentlemen before me again.

The next speaker introduced by Mr. Littlefield was S. O. Bigney, the toastmaster remarking that after remarks from representatives of the State and the city, it would be pleasing to hear from a member of the

Association itself, and he would therefore introduce a gentleman who was a member of the executive committee and who was chairman of the tariff committee appointed by the Association about a year ago to represent the interests of the New England manufacturers before the committee at Washington. Mr. Bigney said in part:

ADDRESS BY S. O. BIGNEY.

Mr. Toastmaster and Gentlemen: I will take up but a moment of your time, as the hour is getting late. The subject which has been assigned to me is perhaps not very interesting to all of you, but it ought to be, for it is intimately connected with your interests and your welfare. You will remember that at our last annual banquet we passed resolutions condemning the French treaty. Your tariff committee did hard work and their work was so effective at Washington that the French Minister issued a circular in which he said that the New England jewelers were unnecessarily alarmed, and that the proposed reciprocity treaty would really be to their interests. Your tariff committee obtained a copy of M. Cambon's circular and answered it so conclusively as to show that we knew more of our interests than did M. Cambon. Shortly afterward all action on the treaty was

GEORGE H. GRANT,
MEMBER, EXECUTIVE COMMITTEE.

postponed for one year. Some time ago we were informed by the daily press, on what authority I don't know, that the treaty had died a natural death, but we have learned within a few weeks that it is likely to come up again. Therefore it is necessary that we continue our work against it. We well know that a reduction of the tariff rates will be detrimental to our interests.

Now, this treaty is not a Democratic measure, but, strangely enough, it is a Republican one and has been signed by a Republican President. I think we ought to place ourselves on record against it, and have therefore prepared a resolution which I will read:

"At our last annual banquet this organization passed a resolution condemning the French reciprocity treaty and asking our Congressmen to defeat it. A short time afterward the said treaty was postponed for one year, and we believe that in a short time it will be presented for ratification. Therefore he it

"Resolved, That it is the sense of the New England Manufacturing Jewelers' and Silversmiths' Association, representing 50,000 people, that the passage of the French treaty, so-called, will work great injury not only to the manufacturers of jewelry and kindred trades, but also to thousands of employes as well, and they honestly believe and assert that the French treaty should not become a law, and that said representatives be requested to do all in their power to defeat said treaty; therefore be it further

"Resolved, That the secretary of the New England Manufacturing Jewelers' and Silversmiths' Association shall transmit to President McKinley and each and every member of Congress a copy of these resolutions."

Mr. Bigney moved the adoption of the above, and the motion was seconded by Charles M. Robbins, who is also a member of the tariff committee. The president remarked that the matter would come before the board of governors for action and would undoubtedly be adopted, but he would like

to get the sense of the Association by an aye and no vote. The result was a unanimous vote in favor of the resolutions. Continuing, Mr. Bigney said:

I think this industry has been made a political football long enough. The matter of the tariff ought to be taken out of politics and put in the hands of a life commission. You well know that for two years out of every four we are on the anxious seat. It seems to me a reflection on the intelligence of the citizens of this country to allow the tariff matter to remain in the hands of politicians. All sections of the country should be allowed to send committees to represent their interests before a commission at Washington. You will find the Tariff League and the Home Market Club of Boston in line, and the matter can be taken out of the hands of the political parties. I have another resolution which I would like to offer.

Mr. Bigney read the following resolution, which President Pearce later said would also be considered by the board of governors of the Association:

"Resolved, That the New England Manufacturing Jewelers' and Silversmiths' Association believe that the time has come for the removal of the vexed tariff question from politics and placing

ROSWELL C. SMITH,
MEMBER, EXECUTIVE COMMITTEE.

the same in the hands of a permanent commission, made up of statisticians whose duty it shall be to investigate and ascertain the difference between the cost in this country and all foreign countries, and that difference between the cost in this country and the lowest foreign cost shall be the minimum rate of duty placed on all goods imported into this country which come into direct competition with home production. Be it further

"Resolved, That the various industries shall select a delegate and that said various delegates from the different industries shall receive a hearing before this Board or Commission prior to any change made in the established tariff rates, etc."

President George H. Peet, of the Providence Board of Trade, was introduced as the representative of the oldest business men's association in Providence.

Mr. Peet's address was short but to the point.

GEORGE H. PEET'S ADDRESS.

The Providence Board of Trade has done a great work in this community. I think it will do more and better work in the future, and of course we expect you to help us. You represent one of the most important industries of the State. You have made Providence famous, as something else has made Milwaukee famous.

I have no doubt that when old Roger Williams landed on Fox Point he was met by some aborigine drummer from Attleboro with Providence nose rings in his nose, who no doubt sold Mr. Williams a very large hill of goods.

OSTBY & BARTON CO.,

Makers of Gold Rings.

OSTBY & BARTON CO.,

CHICAGO,
103 State Street.

Now, what benefits your Association benefits ours. Our interests are mutual. The more prosperity there is the more shirt waists will be sold, and the more jewelry will be required for them. The textile industry and the jewelry trade will be benefited together.

Two great events were scheduled for to-night: a heavy-weight boxing match and a jewelers' banquet—brawn in Cincinnati and brains in Providence. But the heavy-weight boxing match has been declared off, while here we are. All of which goes to show the superiority of brains over brawn. And speaking of boxing reminds me of Terry McGovern, who is like Rhode Island in one respect: he is the biggest little thing that ever happened.

Mr. Littlefield in introducing the next speaker, E. G. Buckland, said: "Providence is fortunate in having within her borders a sort of deputy president of the Consolidated road. It has been said that if the officers of the Consolidated understood their business as their legal representative in this State did, it would be better for all concerned. He is a comparatively new comer here, and perhaps will tell us of his impressions of Rhode Island." Mr. Buckland's speech was a gem, sparkling with wit and eloquence. Among some of the good things he said were the following:

After the very flattering introduction your toastmaster has given me, I feel somewhat as Uncle Remus said "Brer Fox" did after falling into the honey bees' hive: he wasn't just bedaubed with honey, but he was "civered" with it. When I was asked to speak to you here I agreed to do so on condition that I shouldn't have to talk shop.

I was told when I came to Rhode Island I would find it a very narrow State, but, gentlemen, I came from Connecticut. I remember a certain commercial traveler who got off the train at Litchfield one day to go to a place he was told was three miles away. He got a farmer to drive him to the place, and they drove and drove. Finally he asked the farmer, "Aren't your miles pretty long here in Connecticut?" and the farmer replied, "Gosh, they have to be; they are so durned narrow."

I was told that coming as the representative of the railroad I would find myself in a den of lions. I always had sympathy for Daniel, but he had the advantage of me. He could say to the lions, "Now, gentlemen, if there is going to be any after-dinner speaking you'll have to count me out."

I came here about the time of the Spanish war, and I cannot forget the readiness, the enthusiasm and the patriotism with which you made your preparations for participating in the conflict. When I remember the noble lives of Gen. Nathaniel Greene, Com. Oliver Hazard Perry, Gen. Ambrose E. Burnside and the many other heroes from this State, I can readily understand that the blood that flowed through their veins is living today in the veins of their descendants and associates here. There has been no holding back in Rhode Island, no consulting of selfish interests in considering the question of carrying out the indications of our manifest destiny. And I may say here, though it is perhaps foreign to my subject, that there can be no turning back from the consequences which have followed Dewey's sailing into Manila Bay. I believe, as has been said, that there was but one thing worse that he could have done,

and that was to have sailed away. There has not been a moment from that time to this day when the country could have turned aside from the course it has pursued. And the same relations obtain with respect to the Nicaragua treaty. A nation can't break its word any more than an individual can break his word; its responsibility increases in proportion as it is an aggregation of individuals.

As I came to Rhode Island I

found it a State made famous in the national legislature. This State is represented in the halls of Congress as no other State in the Union is represented. This State does, through its senior Senator, dictate in a large measure the destinies of this Union.

As to the railroad company, I find the Golden Rule a good thing to work under. We wish to treat you honestly, and we believe you will treat us in the same spirit.

Rev. L. L. Henson, the last speaker, was introduced as another new comer to Rhode Island, a man who came here from the State of Abraham Lincoln's nativity. Mr. Henson's remarks were in part as follows:

I am glad thus early to have the privilege of meeting this body of men. I believe in men and I believe in meeting men as a man. Some one has said that people are divided into men, women and preachers, but I protest against that classification. I am glad of this opportunity of meeting you on the broad platform of manhood. We are mutually dependent upon each other. Rev. E. E. Hale said at the college a few days ago that the man oiling his reaper in Dakota was helping to answer the prayer of the woman in Scotland when she asked God to give her her daily bread. It is a beautiful thought. We are all workers together. In so far as we do the work we are fitted to do we are working out God's purpose, whether we manufacture jewelry or sermons. You know the best man in the world is the man who can do the most for others. Let us go away to-night with that thought.

Toastmaster Littlefield then read the following extract from the letter of regret received from former-Governor Elisha Dyer:

With so many gifted speakers you will hardly miss me, but if you will allow me I should like to present to the Association this little gem of English writing applicable to the craft:

"The manufacture of jewels has in all times been a test of the artistic powers of a nation; for, being intended only for personal adornment, the genius of the jeweler has been directed to the production of the largest amount of beauty in the most limited space."

To you gentlemen, workers of gold and silver, used every day to the companionship of the costliest metals and the choicest gems, the calling itself may have become a mere matter of business, but to us on the outside, however, who recognize the clever ingenuity, the refined taste and the marvelous adaptation of beautiful ideas, the trade seems to be unlimited in its ability to bring forth form after form of unending beauty.

From the letter of President Faunce, of Brown University, who said that only his absence in Florida prevented his attendance at the banquet, Mr. Littlefield read the following extract:

I regard it as very important that the industry and the education of New England should keep in vital contact, in order that education may become more practical and that industry may be lifted to the highest level. Particularly in the work of jewelers and silversmiths, which has given the State of Rhode Island a reputation throughout the world, is there need of thorough training in the art of design, and the wide knowledge of the best art of the ancient and modern world. I hope to see the day when we shall not be obliged to look to Europe for our best designers or our best technical education, but when our American schools shall give all the training that our American industries demand.

After President Pearce had extended thanks on behalf of the Association to Mr. Littlefield for the able and dignified manner in which he had conducted the office of toastmaster, the evening came to a close near the midnight hour with the singing of "Auld Lang Syne."

In making the preliminary arrangements for the banquet the appointment of special committees was dispensed with, the work of preparation being performed by the executive committee, the members of which are George H. Grant, S. O. Bigney and Roswell C. Smith, with the active assistance of the president and other ex-

ective officers of the Association. Mr. Grant made a most efficient master of ceremonies, directing the work of the caterer, the orchestra and the Apollo Quartette with such skill and discretion that everything passed off with the most perfect smoothness.

Notes on the Banquet.

Nobody had to ask where George Dover and his party were—after two or three wine courses had been disposed of. His magnificent tenor voice was heard frequently leading the songs, in which the whole company joined with the orchestra.

One of the largest house parties was that composed of the guests of Roswell C. Smith, seated at the head of Table E, nearly all influential in municipal affairs. The party included J. William Moore, Beverly S. Lake and Thomas H. Leonard, fellow members with Mr. Smith in the City Council; city editor J. J. Rosenfeld, of the Providence *Journal*; council clerk D. F. Hayden, Linus Armstrong, Ed. J. Mulchahey and A. G. Van Houten, of New York.

George Grant's party was one of the merriest in the hall. The party included Henry A. Carpenter, S. J. Briggs, Hon. Henry R. Barker, Hon. W. A. H. Grant, Hon. Clarence A. Aldrich and William J. Braitsch, the latter Mr. Grant's business partner.

The officers of the Ostby & Barton Co. formed a pleasant party of their own. They were: Englehardt C. Ostby, president; N. B. Barton, treasurer; Arthur Ostby, superintendent, and Frederick Carr, secretary.

Walter Burdick, James Campbell and George Williams were present as the guests of O. C. Devereux.

Nobody had a better time at the banquet than Major Horton, of the Horton & Angell Co., and Capt. Ben. Hall, both old soldiers.

President Pearce had the largest party of guests. They were his son, A. G. Pearce; Walter W. Burnham, a friend prominent in the Masonic Order; W. H. Shedd, E. I. Rogers, C. C. Newhall, F. A. Chace, A. J. Ferguson and W. P. Vaughan.

One of the most pleasing features of the evening was the singing, in which everybody joined on two or three occasions. "Marching Through Georgia" is a stirring chorus when sung by 300-odd voices. "How Dry I Am" was also quite strongly rendered, though there was no particular reason for the sentiment.

The Apollo Quartette added to their already generous laurels by their fine singing, and the orchestra played delightfully. Like everything connected with the affair, the musical features were strictly "all right."

M. N. Grasby, of La Crosse, Traced to Norway.

LA CROSSE, Wis., Feb. 13.—Word has been received here that M. N. Grasby, the jeweler of this city who extracted \$1,000 worth of jewelry, which had not been paid for, from his store before leaving, has gone to Norway. Creditors are in charge of the remainder of his stock. His creditors maintain that his conduct was criminal.

Grasby left town over two weeks ago and the sheriff closed the store. Feb. 4, on a writ of attachment issued at the instance of A. Hirsch & Co. and M. S. Fleishman Co., Chicago creditors. Mr. Ness was left in charge of the store, but was ignorant as to where the proprietor went. McConnell & Schweizer, who represent the Chicago firms, state that their attachment covers the entire stock.

Charles H. Becker, of Becker & Lathrop, Syracuse, N. Y., left Monday for New York and Washington and two weeks' duck shooting on Chesapeake Bay.

The Upson Jewelry Co.—Directors: W. D. Upson, Charles E. Hall and W. R. Upson. President and treasurer, W. D. Upson; secretary, Charles E. Hall.

Jewelers Want to Know the Whereabouts of Oscar Lipman.

SAN FRANCISCO, Cal., Feb. 13.—The police of this city are looking for Oscar Lipman, a jeweler whose office was in the Thurlow block and who is wanted to settle for about \$1,800 worth of diamonds, watches and other articles which several prominent jewelry firms claim is due them from him. For some time Lipman, who is a young man, had been engaged in the jewelry business in this city, where he enjoyed the confidence of the wholesale jewelers generally. He operated extensively on the "memorandum" plan.

It is stated at Aronson's Loan Office that Lipman owed for nearly \$1,500 worth of jewelry. Alphonse Judis, wholesale jeweler, claims that Lipman has failed to account for \$200 due him, and Carrau & Green claim a debt of \$80. Other firms in the jewelry business claim to hold bills against Lipman to the extent of about \$200. Lipman's relatives offered to settle his accounts for 50 cents on the dollar, but this offer was withdrawn later.

George E. Hooper & Co. are conducting an auction for R. L. Brough, St. Albans, Vt.

J. U. Potts has removed his jewelry store at Oelwein, Ia., to a better location in the same town.

"1835-R.WALLACE"

Stamped on an article of Silver-plated ware is a guarantee of worth and quality.
Every dealer, when selecting a line of plated ware, always has in mind two leading qualities, and these usually are durability and design, as these are the ones on which most depends his reputation as a dealer in honest ware.
Our goods are made of the highest grade of Nickel Silver, plated with FINE Silver. Our extra, or A 1 grade, is plated 20 per cent. heavier than the regular standard. Triple and sectional plates are also carried in stock.
In designing patterns we endeavor to select only such as are graceful in outline and thoroughly artistic in decoration, and which conform most closely to the taste of a discriminating purchaser, which our long experience enables us to do.
Our line consists of the following patterns: Tipped, Fiddle, Windsor, Shell, Joan, Virginia, Astoria, Stuart and Anjou.
Any dealer who is not already familiar with our line will find it much to his advantage to write for Catalogue and discounts.

CROSS & BEQUELIN,
17 MAIDEN LANE, NEW YORK.

Train Robbers Secure a Valuable Package of Watches, Etc.

A quantity of watches, cases, movements, rings and a silver salad set, which were sent by express over two weeks ago, in one large package, by William Morris & Co., jobbers, Philadelphia, Pa., addressed to Joseph Fahys & Co., 54 Maiden Lane, New York, fell into the hands of car robbers while in transit between the two cities. In spite of all the efforts of detectives, no trace of the missing property has been found. The total value of the contents of the package was about \$275.

The goods were taken from a Pennsylvania Railroad express car between Trenton and New York early Sunday morning, Feb. 3, and the loss will therefore fall on the express company unless their detectives succeed in recovering them. In the large package addressed to Joseph Fahys & Co. were nine smaller packages and boxes, each of which contained a separate order. A list of the goods has been prepared and is here given:

Manasseh Levy, Broadway and John Sts., New York. Repair slips: 1923, one ladies' 0-size, fancy 10-year case, with Tempers movement, \$6.25. 1923, one ladies' 0-size, fancy five-year case, with Tempers movement, \$5.75.

Stern Bros. & Co., 33 Gold St., New York. Four gents' rings, styled signet rings. Package contained pink memorandum slip and one white invoice; total value about \$16.

Joseph Fahys & Co., New York. Contained seven or eight sixteens, 14k. open-face cases, valued at from \$17 to \$24.

Robbins & Appleton, 21 Maiden Lane, New York. Repair slip: 19291820, 18-size, 15-jeweled nickel movement; 8311666, Y-size, seven-jeweled nickel movement; 9305608, 9306569, 9306520, 9393241; two sixties, 0-size, seven-jeweled gilt movement, 9126739, 9259465.

Elgin National Watch Co., 11 John St., New York. Repair slips: No. 1923, one No. 2070, 18-size, seven-jeweled, nickel movement, 8944391, \$4. No. 1924, two No. 2060, six-size, seven-jeweled, nickel movement, 8390366, 8890923, at \$4.50 each. No. 1925, two 2080, 18-size, seven-jeweled, nickel movement, 8635496, 8714428, at \$4 each.

Miss Hammer, Brookline, Mass. One silver salad set; value, \$20.

Bates & Bacon, 9 Maiden Lane, New York. Two 16 hunting, 20-year filled cases, at \$6.50 each. On repair slip No. 1922, one fancy case and one engine-turned, Nos. 673607, 672891.

Triumph Watch Co., 37 Maiden Lane, New York. Contained 13 16-size "Advance" movements. In this package were two repair slips: No. 1921, 12 "Advance" movements for exchange; No. 1928, one "Advance" movement.

Crescent Watch Case Co., 21 Maiden Lane, New York. Contained five 72-size, open-face silver-nickel cases, valued at \$1.40 each.

Clever Swindler Works Among the St. Louis Trade.

ST. LOUIS, Mo., Feb. 16.—A diamond sunburst brooch, valued at \$800, was obtained from the jewelry store of the Merrick, Walsh & Phelps Jewelry Co., Thursday afternoon, and the detectives are looking for the thief.

Thursday afternoon, a young man, faultlessly dressed, walked into the jewelry store and, going directly to Mr. Walsh, said he wanted to look at some diamonds, and he wanted the best in the store. He was not long in making a selection, but took the diamond sunburst, a very handsome one, and asked the price.

When Mr. Walsh told him, he said: "I will take it with me and you may send the bill to me at the brewery." "What brewery?" asked Mr. Walsh. "Why, the William J. Lemp brewery," replied the young

man. "I am William J. Lemp, Jr.; you surely know me, Mr. Walsh, don't you?" Mr. Walsh thought he did. The young man put the jewel into his pocket and walked out.

After he had left the store, Mr. Walsh made inquiries. He found he had been swindled. The affair was reported to the police and detectives put on the case. The next day the sunburst, minus one of the largest diamonds, was located in the pawnshop of Benjamin Barnett & Co., 607 Pine St., where it had been left as security for a loan of \$175. The police have a description of the thief, but he has not been found.

The day following Mr. Walsh's experience, it developed that the same individual had represented himself as Mr. Lemp, Jr., at Mermod & Jaccard Jewelry Co.'s store and had attempted to obtain possession of a diamond crescent there, but his effort was foiled by Ernest Jaccard, one of the directors of the firm, who insisted on positive identification. The stranger appeared indignant and left the store. The police think the thief is not a local crook.

Death of Thomas C. Noble.

AUGUSTA, Me., Feb. 13.—Thomas C. Noble, who died in this city last week, was known in the jewelry trade. Mr. Noble was born in Portsmouth, N. H., August 24, 1807, and after leaving school, he entered the general store of the Cocheco Manufacturing Co., where he remained until attaining his majority. He came to Augusta in Oct., 1830, and opened a hardware store, subsequently going into the grocery business. He gradually worked into the clothing and jewelry business, being for years one of our leading merchants. He was married in 1835 to Adeline Johnson, and three children survive him.

Charles I. Biederman, who has been with W. T. Chapman, Pawling, N. Y., for several months past, has returned to his father's jewelry store at Camden, N. Y., and taken charge of the watchmaking and optical departments.

NOTICE.

February 7th, fire seriously injured the building partly occupied by our factory, and our plant was badly damaged by water. In order to expedite the resumption of work we have rented a new shop, larger and better than the old one, where we expect to resume manufacturing the first week in March.

Missouri Jewelers Banquet.

Enjoyable and Instructive Affair of the Missouri Retail Jewelers' Association.

St. Louis, Mo., Feb. 15.—The 11th annual banquet of the Retail Jewelers' Association of Missouri took place at Schrap's restaurant, 921 Olive St., last evening. The table at which the officers and invited guests were seated was at one end of the room and the two other tables were placed at right angles to it. They were handsomely decorated.

The second page of the menu card gave a list of the toasts and those who were to respond to them and these were as follows:

Herman Mauch, toastmaster.

"Greater St. Louis. Nothing Impossible"—Hon. Judge Talty.

"Louisiana Purchase Exposition"—R. H. Kern.

"Mercantile Association"—Charles Thuner.

"Woman. Lovely Woman"—Charles F. Krone.

"Here's to woman, whose heart and whose soul
Are the light and the life of each spell we pursue.

Whether burned at the tropics or chilled at the pole,
If woman be there, there is happiness too."

Music by Gaedeck's orchestra.

The banquet committee were composed of the following members of the Association: Herman Mauch, F. W. Bierbaum, F. W. Baier, Otto Steiner, W. F. Kemper.

The following jewelers and their employes were present: F. W. Baier, John

Schmid, W. F. Kemper, H. Mauch, F. W. Bierbaum, O. H. Kortkamp, Otto Steiner, G. Eckhardt, George Hess, Theodore Ebeling, William Brazeale, John Zeitler, Al. Gerne, F. Wjndweh, W. Dueber, R. Heitz, H. Kaesser, P. V. Kaesser, John Schmid, Jr., Vincent Gorley, J. Ryser, F. Besse, George Stumpf, W. Wolfsberger, M. Hocker, George Konert, J. C. Adams and Charles Pfeiffer. The Eisenstadt Mfg. Co. were represented by Albert Frech, H. C. Hain, Louis Gutfreund, W. Barker, G. Gambrell, A. Eisenbeiss and E. B. Hull; Bauman-Massa Jewelry Co. were represented by Ed. Massa, Jul. Wendell and I. Felsner; the St. Louis Clock and Silver Ware Co. were represented by Dick Pfeiffer, F. L. Steiner and A. J. Marks; the Weiss Jewelry Manufacturing Co. were represented by M. L. Weiss and J. Auer; William Weidlich & Bro. were represented by William and E. C. Weidlich; the Merry Pelton Silver Co. by O. J. Wilmarth; the Waterbury Clock Co. by Charles C. Aybell and William Pettee; the L. Bauman Jewelry Co. by J. B. Hartmann and J. A. Delmar; H. Froehlich & Co., New York, by S. H. Veit; R. Lowenstein by S. Loebner; the Bauman & Frey Mfg. Co. by J. Frey, and J. W. Cary & Co. by Ed. Lang and Jul. Steidemann; C. N. Van Buren; W. C. Howland, correspondent of THE JEWELERS' CIRCULAR-WEEKLY.

Judge Talty, who responded to the toast, "Greater St. Louis, Nothing Impossible," made a fine address and spoke of St. Louis as a manufacturing center, its resources and its various big enterprises and predicted a bright future for the city, compli-

menting highly the jewelry industry. He also spoke of the benefits that the World's Fair would be to it and took a look into the future and pictured what the city would be after the World's Fair.

Mr. Kern, responding to the toast, "Louisiana Purchase Exposition," made many brilliant and forceful remarks in the course of his toast. He laughingly began by saying that Judge Talty had taken part of his subject from him, but that he would forgive him for it, as all were so interested in having the World's Fair that it was impossible to speak without saying something about it. He said that the jewelers' industry contributed as much as any other industry to the success of this country. He also spoke of the many obstacles the World's Fair promoters had to overcome and said the jewelers had done their share in every way, both financially and in giving assistance in trying to secure it. He also pictured what the World's Fair would do for the city, and what a number of strangers it would bring to the city as well as the great number of new ideas. He predicted that the population of St. Louis would number a million of people as a result of the great enterprise and that it rested with the people of St. Louis to secure this big increase by making the strangers who came to visit it desire to stay. He said that the jewelers' interests and hard work banded with the other industries would bring about this result. It meant much and he asked that the jewelers continue to give all the help they possibly could.

Mr. Thuner, responding to the toast, "Mercantile Associations," spoke at length and with great earnestness of the value of mercantile associations and of the many benefits that would come to the business interests of the city, and to the laboring man as well, by helping each other and fighting for things that could be secured only by working together.

Mr. Krone made the witty speech of the evening when he spoke on women. His remarks were frequently interrupted by laughter and applause.

After the regular toasts had been made the toastmaster called on several others, and a number of bright remarks were made by the members of the Association and their guests.

While the banquet was in progress, a girl, dressed in the uniform of a district messenger boy, distributed valentines to each one at the tables. Some were dainty and some were comic. Great fun was caused while the guests received them. It is said that Sam and Morris Eisenstadt were the senders, as they were not in attendance, owing to the death of their uncle, Mr. Jacobs. Their presence was missed greatly, as they are popular and have never missed a previous banquet.

Two or three vaudeville acts were introduced in the course of the evening, enlivening the proceedings.

It was conceded by those present that it was one of the best banquets ever given by the Association.

THE ANNUAL MEETING.

The 11th annual meeting of the Retail Jewelers' Association of Missouri was held at 3 o'clock, Feb. 13, at 507

APPROVED!

WHEN we decided upon the **New Departure** in the manufacture of **CRESCENT WATCH CASES**, we firmly believed that there was a demand for a better gold-filled case than had ever been made and that the jewelry trade were willing to pay a higher price for such a case. The many orders and numerous congratulatory letters received daily show that our belief was well founded.

No case ever before placed upon the market has received such hearty and immediate approval.

EXTRACTS FROM A FEW OF MANY LETTERS RECEIVED.

I want to say that I think you make the best filled case in the market, and I believe there will be a demand for your "Extra" Fine Filled Watch Case; I am sure I will buy some the first opportunity I have.

We note with pleasure your intention to make a better case. It is certainly refreshing to find a manufacturer nowadays who is improving the quality of goods, for it seems as if every one is aiming to produce as cheap a quality as he can. We think the public is willing to pay for a better article. Your cases have always given satisfaction to our trade.

We wish to compliment you on the fact that you are going to make a filled case with gold enough in it so that where a jeweler wishes to sell an article that will wear equal to a gold case, there will be one in the market which he can get. We think you are heading in the right direction and wish you success in your enterprise.

You cannot make filled cases too good for us. When the line is on the market, we will use them. We are glad to see the advancement to better made cases.

I think you have struck the right track. More gold, better finish, more money, more satisfaction, more watch sales for the dealer who cares for his reputation. I shall do what I can to sell the new case and believe I can do it.

There will be a place in our stock for your "Extra" cases; we are glad to know that such a line is available. We will use them when they are ready for the market.

This new case, which is an

EDITION DE LUXE

of our regular work, contains about **twice as much gold** as any filled case on the market. Extra care has been taken in the finish and every detail has had the most minute attention. They contain **more gold** and will **wear longer** and **look better** than many solid gold cases. **SAMPLES AND PRICE-LISTS FROM THE JOBBING TRADE.**

LEATHER NOVELTIES.

51-53 W. 13th STREET,

NEW YORK.

Franklin Ave. The old officers were unanimously re-elected as follows: F. W. Baier, president; John Schmid, vice-president; William F. Kemper, secretary; Herman Mauch, financial secretary; F. W. Bierbaum, treasurer; directors, O. H. Kortkamp, Otto Steiner, William Henkler, Charles Derleth, Gerhard Eckhardt, George Hess, F. W. Drosten and Frank Niehaus.

The annual reports of the standing committees were read and adopted, and the secretary was instructed to have printed copies sent to all members.

The grievance committee reported a grievance against "fake auctions," and the matter was fully considered.

The Association resolved to take an active part in the Louisiana Purchase Centennial and to appoint committees at the proper time to look after the jewelry trade interests, and to establish headquarters for visiting jewelers.

Tariff Decisions & Regulations.

Among the decisions handed down the past week by the Board of Classification of the United States General Appraisers were:

Charles Mayer & Co., Indianapolis, imported decorated china, which was assessed at 60 per cent., under paragraph 95, of act of 1897. The importers claimed it to be dutiable at 35 per cent., under paragraph 418, of the act of 1897. The goods were found to be bisque figures of babies, to be used as ornaments. The protest was overruled.

Heroy & Marrenner, New York, imported concavo-convex glass disks, which were assessed at 45 per cent., under paragraph 109, act of 1897. The importers claimed the merchandise to be entitled to free entry, under paragraph 565. When the case was called, the importers failed to appear or offer evidence. The protest was therefore overruled.

REAPPRAISEMENTS.

Among the recent reappraisements of merchandise by the Board of United States General Appraisers were the following:

Precious stones, from W. Goldwasser, Antwerp, Dec. 29, 1900.—Cut diamonds, 42 stones, 42 3/16 karats, entered at 242, advanced to 275 francs per karat; 28 stones, 8 13/16 karats, entered at 220, advanced to 240 francs per karat; 53 stones, 25 15/16 karats, entered at 248, advanced to 275 francs per karat.

are most worthy of your attention. Do not neglect their purchase. Goods sent on approval to responsible parties.

M. B. BRYANT & CO., 7 MAIDEN LANE, NEW YORK.

Solid Gold Pendant and Bow.

This is the new feature which will appeal to every practical watchmaker as being absolutely essential in a permanently guaranteed gold-filled case.

The pendant is the handle of the case and has more wear and friction than any other part of case.

The gold stock on both outside and inside of the backs of

Fahys Permanently Guaranteed 14k. Filled Cases

is about double the thickness of that used in the best 25-year guaranteed cases.

Below is copy of certificate which accompanies each case.

WARRANTED
TO WEAR
PERMANENTLY.

This case,

No. _____,

is made of two extra heavy sheets of
14k. gold, stiffened by a sheet of hard metal between.

WE GUARANTEE

that, should the gold sheets wear through,
a new case will be given in exchange at any time.

It has a solid gold pendant.

It has a solid gold bow.

It has solid gold joints.

ASK YOUR JOBBER FOR PRICES.

The Second Annual Beefsteak Dinner of the 18-Karat Club.

Beefsteak, good spirits and a jolly crowd combined to make an enjoyable time for 64 of the employes of Tiffany & Co., New York, Saturday night. The beefsteak came in luscious, juicy chunks; the good spirits were drawn fresh from the wood, and the jolly crowd was composed of the members of the 18-Karat Club, assembled to partake of their second annual beefsteak dinner.

The feed was held in Healey's Dungeon, a subterranean grotto at Columbus

ing conspicuously absent.

The menu, or programme, or score-card—call it what you will—which was uniquely printed on the coarsest of brown paper, gave notice of a bout of 25 rounds at catchweights. The start was at 7 P.M., the finish, no one knows just when, as every watch in the crowd had run down.

The officials of the bout were: Referee, H. H. Treadwell; timer and interrupter, E. D. Bird; steakholder, W. H. Joslyn; chop-per, A. Turgeon; beer-ale expert, John C. Hall.

Among other numbers on the bill were songs by the Tiffany Diamond Quartette,

the speaking and singing became general, and when the crowd broke up everyone was grateful to the committee for a most enjoyable evening.

A list of those who participated included: William J. Armstrong, C. Asten, E. L. Barnard, A. J. Barrett, Claude Berard, E. D. Bird, Harry Bogert, Emerson Bostwick, George Bremser, J. B. Brosseau, Jr., William H. Brown, E. A. Brush, J. J. Burns, James H. Carl, Charles S. Chase, Samuel W. Christie, H. C. Connell, Walter L. Cook, John T. Curren, Hugh Dalzell, John D. Dalzell, M. M. Dodd, Frank Doman, William S. Eaton, E. W. Gavey, John C. Hall, George F. Heydt, H. W. Hiller, J. Hovenden, Oscar Jaekel, Harry Johnson, Walter H. Joslyn, Thomas C. King, F. J. Knight, J. Egbert Lent, J. T. Lough-

SOME SCENES AT THE SECOND ANNUAL BEEFSTEAK DINNER OF THE 18-KARAT CLUB.

Ave and 66th St., into which the 18-Karats trooped, and having divested themselves of coats and waistcoats, donned long calico garments. They then sat about the inviting board, which was composed of champagne cases piled three high and grouped on three sides of a long quadrangle.

Immediately thereafter the creatures of the good genius of the dungeon passed down the line, dispensing dainty morsels of beef, served on gravy soaked bread, also beverages of varying hues of yellow and amber, followed by other viands, all of which were disposed of with nature's own utensils, knives, forks and plates be-

composed of T. C. King, William Moore, H. Johnson and E. H. Thayer, while William O'Shear did sundry tricks with cards and played a cornet. B. Russell Throckmorton recited "The Jolly Pedagogue" and other pieces, while Selters Waters, a real funny man, convulsed the members.

A coronation also had a part in the proceedings. Frank Doman, as the originator of the beefsteak dinner idea, was dubbed by the "Referee" King Francis I., and invested with a crown of massive gold (paper).

At the completion of the programme, Col. Treadwell called upon several of the prominent members to speak, after which

rey, M. F. Magee, A. W. Mather, J. Charles Mettam, Edward Miller, William Moore, Ten Broeck B. Morse, T. F. Morton, C. Myers, T. M. Nelson, J. D. Nunan, H. W. S. Pell, F. W. Pleister, C. E. Rogers, A. S. Rose, P. Ross, T. Ryan, A. W. Schumacher, Charles G. Shelton, William Sniffen, E. H. Thayer, B. Russell Throckmorton, E. V. Titus, Adolph Trost, Arthur Turgeon, Harry J. White, Fred. W. Whitehouse, John Williams.

H. L. Benedict, Syracuse, N. Y., junior member of the East Syracuse firm of M. S. Benedict Mfg. Co., has bought of "Bert" Whitley, of Muncie, Ind., "Jim Ross" for \$750. The horse can make 2.15, though he has no mark. Mr. and Mrs. Benedict have been visiting in Muncie.

Connecticut.

L. F. Ising, Danbury, has been holding an auction sale.

E. F. Bennett, who was formerly in the jewelry business in New Britain, is now engaged in mining at Pike's Peak, Col.

The watch factory in Cheshire was closed completely, Feb. 11, when the machinery was shipped to the purchasers in Ohio. The property belonged to Seth E. Thomas, of Thomaston.

Jeweler William Gorfinkel, Hartford, who had been in the county jail awaiting trial in the Superior Court on a charge of stealing a diamond ring, was, Feb. 8, released on bail of \$1,000.

S. A. Jones, president of the defunct Meriden Bronze Co., Thomas Levens and Weesterbarth Bros. have formed a company to make brass goods in the latter's shop on Miller St., Meriden. They will employ about 25 hands.

Seavy L. Burgess, for the past nine years a traveling salesman for the C. F. Monroe Co., Meriden, is no longer connected with that company, and has taken a position as head salesman for one of the largest china companies in the country.

Commissioner Benjamin F. Lee has received applications for space in the Buffalo Exposition from these Connecticut manufacturers among others: George W. Parker, Danbury, art pottery; Landers, Frary & Clark, New Britain, cutlery.

An order was granted in the Superior Court, New Haven, by Judge Roraback, a few days ago, extending the time for the presentation of claims against the Barker Silver Co. This is a Milford concern now in the hands of a receiver and the claims are not all in.

At the annual meeting of the Biggins-Rodgers Co., Wallingford, the following board of directors were elected: E. T. Carter, Meriden; F. W. Miner, New Haven; Henry E. Biggins, Dr. O. E. Powers and Henry B. Hall. The directors elected these officers: President, Henry E. Biggins; secretary, Henry B. Hall; treasurer, F. W. Miner.

The Scovill Mfg. Co., of Waterbury, held their annual meeting in the company offices, last Tuesday, and re-elected the following officers: President, treasurer and general manager, C. P. Goss, Sr.; vice-president, F. J. Kingsbury; assistant treasurer, Edward O. Goss; secretary, M. L. Sperry; assistant secretary, T. R. Hyde, Jr.

At the annual meeting of the Edward Miller Co., Meriden, Tuesday last, new directors were elected to fill the vacancies caused by the death of the late O. B. Arnold and Lewis Hall. The following directors were chosen: Edward Miller and Edward Miller, Jr., Arthur E. Miller, John L. Billard, A. Chamberlain, Henry J. Lewis and B. C. Kennard. Messrs. Chamberlain, Lewis and Kennard are new directors, taking the places of Messrs. Arnold and Hall, deceased, and Fred Ives, who retires. The directors met and re-elected the old officers, as follows: President, Edward Miller; secretary and treasurer, Edward Miller, Jr.; assistant treasurer, B. C. Kennard.

The receiver of the Barker Silver Co., Milford, has reported that the business of silver plating is now in condition to go on

The Giant of Collar Buttons

IN QUALITY,
IN SALES.

One Million Five Hundred Thousand Kremenz One-Piece Collar Buttons made and sold within the last year.

WHY?

Because of their HIGHEST QUALITY, BEST CONSTRUCTION, GIVING THE MOST WEAR, AND GREATEST COMFORT and their IRON-CLAD GUARANTEE.

To verify this we invite the trade to read "The Story of a Collar Button, with Illustrations," which may be had FREE for the asking, and to try the experiment suggested on page 5 of that booklet.

Extract from "Printers' Ink," Nov. 23, 1898.

The Little Schoolmaster now suggests, to every pupil in his class, to send a two-cent stamp to Kremenz & Co., 49 Chestnut Street, Newark, N. J., and ask to be favored with a copy of their leaflet, "The Story of a Collar Button." Afterward, if any pupil will send to *Printers' Ink* another leaflet, new or old, that is half as good as this one, or that approaches it in excellence, the deserving student will be rewarded with one of *Printers' Ink's* souvenir spoons as an acknowledgment of his discovery and contribution. "The Story of a Collar Button" is the best piece of advertisement construction that has come to *Printers' Ink's* attention in the year of our Lord 1898.

Should you wish to utilize this booklet to increase your collar button business, we will, on receipt of your order, print your card upon and send you a quantity of them.

Kremenz One-Piece Collar Buttons are stamped as follows, ON BACKS:

Patent sustained by United States Supreme Court.

Quality and Construction have made our reputation.

All Kremenz Collar Buttons are Manufactured by

KREMENTZ & CO.,

in their Factory,

49 Chestnut Street,

and he has been authorized to continue it. He said that they were busy now and able to employ 31 hands.

C. E. Polsey, secretary and treasurer of the E. A. Bliss Co., Meriden, has gone to the Bermudas for a short trip.

A. W. Austin, South Norwalk, is to vacate his present store April 1. Mr. Austin will locate in some other store.

A notice has been posted in the works of the Shelton factory of the International Silver Co., stating that the factory will run 10 hours per day.

Joseph Pinsker, watchmaker and jeweler, who has closed out his business in Portland, is looking about for another location to establish himself in business.

John Spencer, of J. Spencer & Co., South Norwalk, has disposed of his interest in the business to his partner, Henry F. Colburn. In the future the firm will be known under the title of Colburn & Lauder.

Gen. George H. Ford, New Haven, president of the David Humphrey's Branch of the Connecticut Society Sons of the American Revolution, was the guest, Friday evening, Feb. 15, in New York city, of the Empire State Society, S. A. R., at the latter society's banquet.

The annual statement of the New England Watch Co. is: Capital stock, \$588,750. Directors, E. L. Frisbie, Jr., A. O. Jennings, H. S. Chase, J. S. Elton, E. C. Lewis, H. W. Scovill, J. H. Bronson, C. N. Wayland, D. L. Dresser and G. W. Burnham; president, E. L. Frisbie, Jr.; treasurer, E. L. Frisbie, Jr., and secretary, A. O. Jennings.

The annual statement of the Benedict & Burnham Mfg. Co. is: Capital stock, \$400,000. Directors, E. C. Lewis, E. L. Frisbie, Jr., G. W. Burnham, A. W. Dickinson, J. Hobart Bronson, J. S. Elton, C. N. Wayland, H. L. Wade and D. L. Dresser; president and treasurer, E. L. Frisbie, Jr.; assistant treasurer, G. W. Burnham; secretary, A. M. Dickinson.

Boston.

Royal E. Robbins, of Robbins, Appleton & Co., has been drawn for jury duty.

D. C. Percival has been elected to membership in the New York Yacht Club.

Charles E. Durgin, city salesman for the Thomas Long Co., has been recently elected Worthy Patron, Mystic Chapter, No. 34, O. E. S., of East Boston.

Boston members of the trade received announcements last week that the jewelry firm of C. B. Duckworth, Pawtucket, R. I., had been succeeded by the new firm of Edward Goffe & Son.

Before Judge Sheldon, in the Superior Court, Friday, the bail of David Werblinsky, David Turner and Simon Goldstein, charged with stealing a safe from the store of Morse Bros., jewelers, 85 Lowell St., was raised from \$1,200 to \$3,000 each. They will not be tried until March, and the Government wished to make sure of their presence then.

Among the buyers in town last week were seen: Mr. Gillespie, of Richardson & Gillespie, Leominster, Mass.; S. W. Baker, Rockland, Mass.; A. C. Tucker, Whitman, Mass.; C. W. Wilcox, Milford, Mass.; H. P. N. Dahl, Maynard, Mass.; H. S. Hewitt, Brockton, Mass.; John Chamberlain, of B. M. Chamberlain & Son, Salem, Mass.; L. R. Hapgood, Dover, N. H.; H. R. Miller, South Framingham, Mass.; Nelson H. Davis, Worcester, Mass.; F. F. Shaw, Manchester, N. H.

W. G. Austin, Martinsburg, Va., has rented a new store on W. King St., that city, into which he will remove his jewelry business about April 1.

U. G. Miller has moved from Columbus Junction, Ia., to Muscatine, Ia., where he will open a jewelry store.

Canada Notes.**TRADE CONDITIONS.**

There are few special features in connection with the preparations for the Spring trade. The demand for heart-shaped goods of all kinds and colors which has for some time prevailed in the United States is now at its height here and likely to continue for some time. Bracelets remain much in vogue. In long chains the tendency is towards a heavier line of goods. The general demand is for good articles, the people having become dissatisfied with the cheaper lines and inclined to look with suspicion upon guarantees if prices appear too low in accordance with the quality. This tendency manifests itself strongly in connection with the watch trade, the reduction in the price of filled gold cases having made buyers doubtful as to the quality. The "scheme jewelry" business appears to have spent its force, but sales were very large during its continuance. Encouraged by the activity of the souvenir trade last year, manufacturers are placing on the market a more extensive line than has hitherto been produced. It is anticipated that the holding of the Buffalo Pan-American Exposition will cause a great demand for souvenirs in the neighboring Canadian towns and cities, but no special designs are being made on this side of the line. The clock trade is better than last year, but the cheaper grades are selling best. The watch movement business is extremely good, although stocks are short, but the situation is improving in this respect and it is probable that the market will soon be adequately supplied. In sterling silver the local manufacturers are making great efforts to increase production so as to meet the competition of an American company who will start a factory in Canada.

J. R. Munshaw, Wingham, Ont., has sold out to H. Chisholm.

E. L. McDonald & Co., of Wawanesa, Man., were recently burned out.

J. F. Van Dusen has removed from Flesherton, Ont., to Dundalk, Ont.

W. H. Wallace, Dauphin, Man., has closed his branch store at Gilbert Plains, Man.

The stock of F. C. Dunne & Co., Chatham, Ont., has been sold to Von Gunton Bros.

J. & A. Yake, formerly of College St., Toronto, have opened a jewelry store at 361 Yonge St.

J. C. Swallow, Midland, Ont., has been seriously ill with typhoid fever for about two months.

Albert T. Shad, jeweler, St. Catharines, Ont., has given a chattel mortgage for \$100 to Martha Aikins.

The store of Osborne Strathearn, Kaslo, B. C., has been partially destroyed by fire. Estimated loss, \$1,400.

The stock, etc., of A. W. Bice, Ailsa Craig, Ont., is advertised for sale by tender and the business is to be closed out.

Out-of-town buyers visiting Toronto, last week, included E. Smith, Oakville; Robert Frost, Orillia; George Momas, Bracebridge, and W. H. Burke, Bruce Mines.

A. R. Harmon, representing Robbins, Appleton & Co., and J. Wilmarth, representing W. H. Wilmarth & Co., Attleboro, were in Toronto, last week.

Joseph Thibault, who was arrested about a month ago for stealing valuable stones from the jewelry store of Mr. Thibadeau, Montreal, had his trial before Judge Desnoyers, last Friday afternoon. The Court decided that the evidence brought up by the detective was sufficient to convict the prisoner, who was adjudged guilty.

On the evening of the 14th inst., the male employes of Ambrose Kent & Sons, Toronto, to the number of 44, enjoyed a sleigh ride to Borrell's hotel, York Mills, where supper was taken and a very pleasant evening passed. They presented W. L. Wilkinson with a silver-mounted pipe and a pouch of tobacco, and their host, Mr. Borrell, with a Masonic signet ring.

Philadelphia.

Louis Beconne has resigned his position with Kingsbacher Bros., 516 Wood St., Pittsburgh, and is back in this city.

Al. Brown has been promoted foreman of Wanamaker's jewelry repair factory, to succeed George Kearsch, resigned.

P. F. Schilliol, with Smith & Dreer, jewelers, 10th and Arch Sts., has returned from a three months' pleasure trip through Europe.

James Bathgate, the genial manager of Gimbel's watch department, has been elected a member of the Philadelphia Jewelers' Club.

William Blair, of Blair & Crawford, retail jewelers, 806 Chestnut St., is the regular Republican candidate for school director in the 15th Ward.

The members of the Philadelphia Jewelers' Club are preparing to hold a pool tournament as soon as the shuffleboard tournament, now in progress, is ended.

George White, who carries jewelry from the material supply houses in this city to Norristown retailers, and who has been sick for a month, has recovered and is again at work.

William B. Crawford and Joseph Wright have been arrested and committed for trial charged with robbing Thomas Carson, an itinerant diamond dealer, of \$500 worth of gems.

Richard Weyl, agent for the Meriden Cutlery Co., and S. R. Kamp, of L. P. White, are away on trips through western Pennsylvania and Ohio, and will not be back until April.

Jack Pettingell, who covers the Phila-

delphia market in the interests of the International Silver Co., received the felicitations of the local trade while here last week, on his recent marriage.

Joseph Bittner, the well-to-do jewelry engraver, who mysteriously disappeared two weeks ago from the home of his daughter, 2130 Park Ave., has been found. He is detained in Milwaukee by the police of that city pending an investigation as to his sanity.

William G. Atherholt, who has been covering contiguous territory for L. C. Reisner & Co.'s branch establishment in this city, has been promoted to western and southern salesman for the Lancaster house. He will make trips of from eight to 14 weeks. His successor at the Philadelphia establishment has not yet been chosen.

A bill recently introduced into the Legislature imposing a mercantile license tax on all vendors of or dealers in goods, wares, merchandise, and providing for the collection of this tax by one collector for each county, meets with strong objections from retail jewelers throughout the State, and a movement is on foot to petition against the passage of the bill.

In order to meet the requirements of a trade constantly increasing in volume, C. F. Rumpp & Sons, manufacturers of fine leather goods and novelties for the jewelry trade, in plain and sterling mounted, have decided to build an addition to their factory at the southwest corner of 5th and Cherry Sts. It will be 52x110 feet, of mill construction.

C. A. Carmany, retail jeweler, Coatesville, Pa., was in this city last week to replenish a stock depleted by thieves last Monday. Mr. Carmany stated that a stranger entered his store and asked to see some rings. He laid out several for his inspection and turned to get some more when the stranger grabbed five rings and dashed out of the door. He was pursued, but effected his escape.

The receivers of James D. Hughes, voluntary bankrupt, who recently traded as Hughes, McGlensey & Co., jobbers, 111 8th St., have declared a dividend of 20 per cent., to be followed in a few weeks by another dividend of 15 per cent., making the total dividend 35 per cent. Mr. Hughes is still ill at his father's house in Phoenixville, with Bright's disease. His physicians have declared his ailment incurable.

John B. Martin, one of the most widely known and popular jewelry salesmen in Philadelphia, and who for some years past

DEITSCH BROS.,

MAKERS OF FINE LEATHER GOODS,

ALSO

IVORY, EBONY AND SHELL,

NEW YORK.

14 East 17th Street,

has held a position of trust with Simons, Bro. & Co., was one of the passengers on the Clyde Line steamer *Comanche*, which was nearly consumed by flames at sea, Wednesday morning last, and considerable relief is felt by his associates that he escaped death. Mr. Martin had embarked at New York city southbound to Jacksonville, his purpose being to accept a position with Greenleaf & Crosby Co., jewelers, that city. Mr. Martin intends to remain with Greenleaf & Crosby Co. two months, when he will return to Philadelphia and resume his duties at Simons, Bro. & Co. The trip is taken to restore Mr. Martin's health, which has been somewhat impaired of late.

J. L. Joffi, retail jeweler, 3d St. below Girard Ave., was arrested Feb. 15, charged with receiving stolen goods consisting of jewelry valued at \$75, representing the proceeds of various boarding-house robberies by Harry Gilmore, alias James Carpenter, alias James Melville, who has already pleaded guilty. The detectives re-

covered a gold bracelet from Joffi's window, alleged to have been stolen. The thief testified that he had sold a quantity of jewelry which he had pilfered to Joffi for \$5, and that he had previously taken the stuff to other places where it was tested, and where he was offered \$16, which he refused to take for fear he would be arrested. Joffi refused to make any statement regarding his alleged dealings with the prisoner, and was held in \$600 bail for trial by Magistrate Cunningham.

A. J. Davidson, a Weaverville, Cal., jeweler, with the assistance of Assemblyman J. A. Hubbard, is hot after the Paris commission of his State, and in particular Varney W. Gaskill, the commission's interesting secretary. Mr. Davidson loaned his big gold nugget, which was celebrated all over northern California, to Gaskill to exhibit at Paris, and only a part of it came home again. He claims he can get no satisfactory explanation from Gaskill and demands that his conduct be investigated.

Providence.

Lange & Fischer are preparing to move from 46 Garnet St. to 67 Friendship St.

G. W. Tucker has begun business as a manufacturer in the shop at the rear of 235 Eddy St.

Among the officers of the newly organized Oxford Club of this city are: Harry Cutler, of the Cutler Jewelry Co.; David Bernkopf, of Leeder & Bernkopf, and Benedict B. Lederer, of S. & B. Lederer Co.

Included in the imports from foreign countries received at the port of Providence during the past week were the following: From Bremen, 12 packages of imitation precious stones; from Havre, one package of imitation precious stones, one package of glass stones.

George N. Kingsbury, executive superintendent of the Rhode Island Commissioners to the Pan-American Exposition, states that the Gorham Mfg. Co. have been assigned one of the most desirable locations on the exhibition grounds at Buffalo. The Brown & Sharpe Mfg. Co. have also been fortunate in the amount of space allotted to them.

Heath, Such & Co. are a new firm of jewelers' tool makers who have started in business at 283 Thurber's Ave. The members of the firm are Thomas Heath, who has had some years' experience in the employ of the Gorham Mfg. Co., and Charles H. Such, who for the past 10 years was an employe of the H. A. Kirby Co., and previous to that was with Dutee Wilcox.

While the banquet was in progress Friday evening, a little anxiety was caused by the fact that a double alarm of fire had been sounded from box 233, which has been rung for more than one fire in the jewelry district. It was soon learned, however, that the fire was confined to the building at the corner of Weybosset and Eddy Sts. and the Amasa Mason building adjoining on Eddy St. The only jewelry shop to suffer loss was that of P. Crossin & Co., in the latter building, a small smoke and water damage being caused there.

The following new members have been elected by the board of governors of the New England Manufacturing Jewelers' and Silversmiths' Association since the last meeting: William P. Chapin, Thomas F. Kilkenney, Walter E. Smith, Arthur Hcnius, Charles W. Battey, Ora E. Case, F. V. Kennon, James Smith, George A. Cahoone, David Bernkopf, Harvey Huestis, George W. Hutchison, S. J. Greene, J. M. Frazer, P. Wunderle, Charles D. Waite, H. A. Lincoln, J. B. Richardson, J. Parker Ford, A. S. Cumerford, George R. Clarke, Calvin Dean and Alfred Krower, all of Providence; W. H. Garner, E. A. Fargo, Frank Mossberg, William E. Rounsville, H. L. Perry, George L. Shepardson, E. E. Rhodes, Harold E. Sweet, Fred. L. Torrey, N. Justin Smith, W. A. Engley, L. W. Teed, E. D. Gilmore, Ezekiel Blake, S. M. Einstein, William H. Blake and R. V. Macdonald, of Attleboro; H. H. Curtis, of North Attleboro; E. E. Thomas, Jr., of Attleboro Falls; William F. Maintain, of Plainville; E. A. Lewis, of Waterbury, Conn., and L. P. Sturtevant, of Swansea, Mass.

Attleboro.

Fontneau & Cook, Attleboro Falls, are looking for suitable quarters to move very soon to Attleboro.

Winthrop F. Barden, of Chapman & Barden, resident in Attleboro, is to attend a session of the national grand lodge of the American Benefit Society on the 27th.

A special train bore the jewelers of the Attleboros to Providence, last Friday, for the annual banquet of the New England Manufacturing Jewelers and Silversmiths' Association.

The local caucuses are on foot this week. J. Thomas Inman, of J. T. Inman & Co.; Alfred R. Crosby, of Smith & Crosby, and Thomas E. McCaffrey, of P. J. Cummings & Co., will preside at the three caucuses.

Announcement is made of the incorporation of the Bay State Tap & Die Co., of Taunton, a concern in mechanical lines which ally them to the jewelry business. The incorporators are Louis A. Lincoln, Alfred L. Lincoln and Herbert C. Wood. The company have a paid in capitalization of \$5,000.

Charles A. Marsh, of C. A. Marsh & Co., left, last week, for a southern tour, part business, part pleasure, accompanied by Mrs. Marsh. James E. Blake, of the James E. Blake Co., with Mrs. Blake, left with the Raymond & Whitcomb excursion from Boston for the Mardi Gras and southern California. At the home of William H. Garner, of the Dunbar, Leach, Garner Co., a very brilliant farewell party was given the Blakes.

B. F. Rodgers Brings Suit Against His Former Partner.

LOUISVILLE, Ky., Feb. 13.—Benjamin F. Rodgers, formerly of Rodgers & Pottinger, last week filed suit against Thomas J. Pottinger, who was also a member of the old firm. Mr. Rodgers sues to have an agreement to arbitrate the differences between himself and Mr. Pottinger in regard to the value of Rodgers's stock in the firm enforced.

Some time ago the partners disagreed and it was decided by them that it would be best for one to retire. Accordingly, Rodgers agreed to sell out to Pottinger. A second disagreement arose over the value of Rodgers's stock in the company. Pottinger placed the value at \$2,000, but Rodgers thought it was worth more. A proposition to arbitrate was agreed on, and Pottinger paid the \$2,000 down and deposited \$1,000 additional in the hands of the Hon. Augustus E. Wilson as an evidence of good faith. A third person was to be selected as the arbitrator. In his petition filed in the Circuit Clerk's office Mr. Rodgers avers that since that time Pottinger has refused to submit the matter to an outside and disinterested man for the purpose of arbitration, and he asks that the Court enforce the agreement made by him with Mr. Pottinger.

J. H. Windom and M. A. Crowley, of Smithville, Tenn., were in New York, recently, to dispose of a pearl found by a fisherman at the mouth of Sink Creek, Caney Fork River, Tenn. They claimed the pearl to weigh 104 grains, to be sky blue in color, perfectly round and worth \$2,700.

North Attleboro.

John C. Cody, North Attleboro, father of John W. Cody, of Smith & Crosby, died last week.

Harry Robinson has succeeded to the position of foreman for H. F. Barrows & Co., vacated by the death of the late John B. Peck.

Joseph Brady, with Maintien Bros. & Elliot, was thrown from a sleigh, last week, by a runaway horse, but, fortunately, was not seriously hurt.

A sale of real estate affecting the town as well as the jewelry business took place, Feb. 13. The group of jewelry factories in Attleboro Falls, the southern village of North Attleboro, owned and partly occupied by B. S. Freeman & Co., was sold at public auction to Ezra Marble, a Boston real estate dealer, for \$16,500. A mortgage on the estate was held by the North Attleboro bank, but was lately transferred to the heirs of the late John Howard Fallon, of Providence, J. H., Dalton and Emma Fallon. The terms of the document not being fulfilled, the sale took place, and there were two bidders, Mr. Marble bettering the first bid by \$300 and getting the estate. There is one very large three-story factory building, with three smaller buildings, each able to shelter two good-sized firms, standing beside it.

Death of Emil Kolb.

PHILADELPHIA, Pa., Feb. 16.—Emil Kolb, eldest son of G. F. Kolb, one of the pioneer jewelry case manufacturers of this city, who founded the firm of G. F. Kolb & Sons, 732 Sansom St., died at his home on E. York St., Kensington, Thursday, Feb. 7, and was buried Sunday. Mr. Kolb was formerly in partnership with his brother, Eugene Kolb, trading under the firm name of G. F. Kolb's Sons, 732 Sansom St. The brothers dissolved partnership about two years ago, Eugene Kolb buying out his brother's interest and continuing the business at 732 Sansom St., while Emil Kolb started a jewelry case factory in Kensington. Both brothers had a lucrative trade. Emil Kolb was the patentee of Kolb's adjustable silver chest, which now has an extensive sale. The business will be carried on at the York St. factory by Mr. Kolb's eldest son.

Death of Daniel M. Collins.

Daniel M. Collins, a well known jeweler in Brooklyn, New York, at 425 Fulton St., died, Sunday, at his home, 412 Sackett St., of pneumonia. Mr. Collins was born at Lima, N. Y., 36 years ago, and graduated from the Genesee Normal Institute and the Genesee Wesleyan Institute. He then entered the employ of the J. R. White Jewelry Co., Rochester, afterward becoming their manager, which position he held for a number of years. He started the business in Brooklyn several years ago. He was well known in secret and benevolent society circles, being a member of Brooklyn Lodge of Elks, Knights of Columbus and Royal Arcanum. He was also prominent in the Booth Dramatic Society. His widow, Sadie Brooks Collins, survives him, as do two young sons. The funeral services will be held at his late home, this morning, with a mass afterward in St. Agnes' Roman Catholic Church.

Bill to Regulate Sale of Spectacles and Eyeglasses.

OLYMPIA, Wash., Feb. 12.—The following bill has been introduced in the upper house of the State Legislature, now in session in this city, by W. W. Wilshire, a Republican lawyer of Seattle, at the instance of a number of Seattle jewelers:

AN ACT

REGULATING THE SALE OF SPECTACLES AND EYEGASSES, PROVIDING FOR LICENSING THE SAME, AND PRESCRIBING A PENALTY FOR THE VIOLATION THEREOF.

Be it enacted by the Legislature of the State of Washington:

SECTION 1. It shall be unlawful for any person to peddle, sell or offer for sale or barter, any spectacles or eyeglasses, as an article of merchandise, from any boat, wagon, cart or other vehicle of any kind, or from any pack, basket or other package carried on foot, or from a pocket of his clothing, without having first obtained a license so to do from the county auditor of the county in which said merchandise is sold or to be offered for sale or barter: *Provided*, This act shall not be construed to apply to any person selling spectacles or eyeglasses in his regular established place of business, nor to administrators or executors selling property of deceased persons at public or private sale.

SEC. 2. The county auditors of the respective counties in this State are hereby authorized and required to issue to any applicant therefor a license to sell or peddle spectacles or eyeglasses, as an article of merchandise, from any traveling boat, wagon, cart or any kind of vehicle, or from any pack, basket or package carried on foot, or from a pocket of the clothing, in any of the incorporated cities or towns and elsewhere in such county, outside of the regular established place of business of such applicant, within this State, for the period of time to be specified in such license, upon payment by such applicant of a license fee of five dollars per day for the number of days for which such license is issued.

SEC. 3. Any person violating the provisions of this act shall be deemed guilty of a misdemeanor, and upon conviction thereof shall, for each offense, be punished by a fine of not less than \$20 nor more than \$100, or by imprisonment in the county jail for a term of 30 days, or by both such fine and imprisonment.

Death of Wellington W. Washburn.

GALESBURG, Ill., Feb. 13.—Wellington W. Washburn, a prominent resident of this city, who died Feb. 8 and was buried Sunday, was for nearly a quarter of a century in the jewelry business and was for many years well known as a jeweler of this city. Mr. Washburn was born in Akron, O., Sept. 18, 1836, where he lived until his education was completed. After leaving high school in 1852 he entered a jeweler's store to learn the watchmaker's and jeweler's trade, remaining in that position until 1859, when he came to Galesburg. His first co-partnership was with J. K. Armstrong, from 1867 to 1872, under the firm name of Washburn & Armstrong. He continued in the jewelry business until April, 1875, when he sold out to E. W. Trask, of Aurora. Later, in 1877, Mr. Washburn was elected cashier in the Second National bank of Galesburg, and in 1883 he organized the Galesburg National bank, of which he was elected first president. In May, 1889, business called him to California. In May, 1895, he returned to Galesburg, where his home has been ever since.

Arthur Totten, formerly with Rogers & Bro., and recently with E. Ira Richards & Co., has just accepted a position as traveler with Larter, Elcox & Co., New York.

WALTHAM WATCHES.

16 Size, S. W., '99 Model, Pendant Setting.

HUNTING OR OPEN FACE.

RIVERSIDE MAXIMUS, Nickel;

21 Diamond and Ruby Jewels; Two Pairs Diamond Caps; Both Balance Pivots running on Diamonds; Raised Gold Settings; Jewel Pin Set without Shellac; Double Roller Escapement; Steel Escape Wheel; Exposed Pallets; Compensating Balance, Accurately Adjusted to Temperature, Isochronism and Five Positions, and Carefully Timed; Patent Breguet Hairspring, Hardened and Tempered in Form; Patent Micrometric Regulator; Tempered Steel Safety Barrel; Exposed Winding Wheels; Gold Train; Fine Glass Hand-Painted Dial of Most Modern and Artistic Design. The superior construction of this movement adapts it to the most exacting service.

Vol. XLII. Feb. 20, 1901. No. 3.

A JOURNAL DEVOTED TO THE INTERESTS OF JEWELERS, WATCHMAKERS, SILVERSMITHS, ELECTRO-PLATE MANUFACTURERS, AND ALL ENGAGED IN KINDRED BRANCHES OF INDUSTRY.

Member of the American Trade Press Association.

Our editorial columns will contain our own opinions only, and we will present in other columns only what we consider of interest or value to our readers. Advertising matter will not be printed as news.

Advertising rates in THE JEWELERS' CIRCULAR-WEEKLY are lower, considering the number of tradesmen reached by its large circulation, than in any other jewelry journal.

Notices of changes in standing advertisements must be received one week in advance; new matter can be received up to Monday.

INFORMATION FOR SUBSCRIBERS.

Terms of Subscription, Postage Prepaid.

	PER ANNUM.
United States and Canada, - - -	\$2.00
Foreign Countries in Postal Union, - - -	4.00
England and Colonies, - - - - -	16s.
France and Switzerland, - - - - -	20 fr.
Germany, - - - - -	16 marks
Single Copies, - - - - -	.10

New Subscribers can commence at any time.

Payments for THE JEWELERS' CIRCULAR-WEEKLY, when sent by mail, should be made in a Post-Office Money Order, Bank Check or Draft, or an Express Money Order or Registered Letter. All post-masters are required to register letters whenever requested to do so.

Pay money only to authorized collectors having proper credentials.

Returning Copies. Returning your paper will not enable us to discontinue it, as we cannot find your name on our books unless your address is given.

Changing Address. In changing address always give the old as well as the new one. Your name cannot be found on our books unless this is done.

Discontinuances. We will continue to send papers until there is a specific order to stop, in connection with which all arrearages must be paid; but such an order can be given at any time, to take effect at or after the expiration of the subscription. All such orders will be promptly acknowledged by mail.

Liability. The courts have decided that all subscribers to journals are responsible until arrearages are paid in full and an order to discontinue has been received by the publisher.

THE JEWELERS' CIRCULAR-WEEKLY IN EUROPE.

Among the places in Europe where it is on file are the following:

- LONDON—First Ave. Hotel, Holborn, E. C.; Holborn Viaduct Hotel, Royal Hotel.
- PARIS—Hotel de L'Athene, Rue Scribe.
- LEIPZIG—Handels-Zeitung für die gesamte Uhren Industrie.
- BERLIN—Deutsche Uhrmacher Zeitung, Jager Strasse, 73.
- GENEVA—Journal Suisse D'Horlogerie.
- AMSTERDAM—Continental Club, Hotel Amstel.
- ANTWERP—Diamond Club, Rue de Pelican.

Every line of reading matter in THE JEWELERS' CIRCULAR-WEEKLY, with the exception of a few brief extracts from exchanges, always properly credited, is written exclusively for this journal. Each issue of THE JEWELERS' CIRCULAR-WEEKLY is copyrighted. Permission to quote is extended to other publications provided such quotations are properly credited.

More Proposed Anti-Department-Store Legislation.

ONCE more the opponents of department stores in the State of Missouri are endeavoring to legislate them out of existence or to so hedge them about with obstructions as to make their career anything but easy sailing on a calm sea. In the 41st General Assembly of that State has been introduced "An act to regulate business and trade in cities having a population of 50,000 or over, declaring it unlawful and making it a misdemeanor to transact business in violation of the provisions thereof, and providing a penalty for such violation; providing for the appointment of license commissioners in such cities, prescribing their powers, defining their duties and fixing their compensation." The act segregates all branches of trade into classes numbered from 1 to 76, which in their turn are gathered into groups lettered from A to V. If the act becomes a law it "shall be unlawful for any person or persons, firm or corporation or association of persons, to have on hand, exposed for sale, or to offer for sale or to sell in the same store, building or premises, or in connected stores, buildings or premises, under a unit of management or superintendency or otherwise, at retail, any articles, goods, wares or merchandise of more than one of the several groups in Division Two, described in Section One, without first having obtained a license therefor as hereinafter provided."

The group that principally interests the jewelry industry is Group E, Jewelry Classes 17, 18, 19. These classes comprise watches, clocks and jewelers' findings and optical goods; jewelry and gold and silver mounted goods; gold and gold plated goods, silver and silver plated goods, bronzes, diamonds and precious stones, umbrellas, parasols and canes, statuary and glassware. This is a fairly comprehensive list of the merchandise of the modern jewelry store, and evinces a careful investigation of the character of the stock of such a store as well as an inquiry among jewelers and suggestions from such dealers as to the proper schedule to be embodied in the proposed law. Yet we note in Class 14 traveling equipments, toilet cases, fancy leather work; in Class 43, art work, china, metal or wood; in Class 45, cutlery; in Class 46, lamps; in Class 68, instruments of precision for experiment and research; in Class 69, chronometric and thermometric articles and fancy notions; in Class 70, musical merchandise, in which musical boxes would, of course, be included. All of these lines are carried to a greater or lesser extent by the up-to-date jewelry and optical store. How much taxes the proprietor of such a store would have to pay, to be within the letter of the law, would be an interesting calculation for the license commissioner; for, says the act, the commissioner "shall charge and collect from the applicant to whom said license is issued, the sum of five hundred (\$500) dollars for each and every group named in the application for said license, by the selecting therefrom of all or any of the articles therein contained, being in addition to the group in the application

mentioned as the principal business of the applicant; provided, when an article or articles are found in two or more groups, other than the group under which the applicant conducts or desires to conduct his principal business, it shall be necessary to secure only one license to sell said article or articles."

The promoters of this act proclaim it as being entirely different to the one passed by the 40th General Assembly but which was subsequently declared by the courts unconstitutional. The career of the present act will be followed with interest.

Further Resolutions Over the Death of Joseph B. Bowden.

At a meeting of the executive committee of the Jewelers' McKinley and Roosevelt Club, held Feb. 11, at the office of the Keystone Watch Case Co., New York, resolutions expressing their sorrow at the death of Joseph B. Bowden, the late president of the Club, were passed, and a committee of three were appointed, consisting of Col. John L. Shepherd, of the Keystone Watch Case Co., Charles F. Brinck, of the Crescent Watch Case Co., and John Frick, to draft suitable resolutions and have them handsomely engrossed in the form of a folio volume for presentation to the family of the deceased. This volume will be enclosed in a black seal leather box. The resolutions as drafted by the committee and passed by the executive committee, are as follows:

WHEREAS, The members of the executive committee of the Jewelers' McKinley and Roosevelt Club, expressing the opinion of all the members of the Club, are profoundly impressed by the recent melancholy event of the death of their friend, associate and president, Joseph B. Bowden, and aside from the renewed warning thus given them of the uncertainty of human life, the executive committee gratefully record their sincere respect for the excellent character of Mr. Bowden, as well in all private and personal relations as in the public aspect of his life for the many years that he was interested in Presidential elections, having been the President of the Jewelers' Republican Clubs for the years of 1884-1888-1896-1900.

And that he was distinguished by his unremitting attention to, and enthusiastic interest in the efforts of what he believed to be, his political duties and for the best interest of his country.

As a merchant of life-long existence among the jewelers, extending beyond a quarter of a century, he sustained an irreproachable reputation for integrity, honorable dealing, and his career was crowned with success.

Resolved, That we most respectfully tender to the family of Mr. Bowden this expression of our most profound sympathy.

Signed by Charles L. Tiffany, first vice-president; David C. Dodd, second vice-president; A. K. Sloan, third vice-president; John L. Shepherd, chairman executive committee; William F. Ackerman, secretary; Charles F. Wood, treasurer, and members of the executive committee.

Edward Carmichael has succeeded O. A. Pease, Onawa, Ill.

The stock of jewelry at Mount Sterling, Ill., owned by Ed. Parson has been destroyed by fire.

C. E. Davis, Sylvester, Mich., has purchased the jewelry stock and repair outfit of Charles Burdick, Mecosta, and is now located in that town.

J. L. Brandies & Sons have incorporated in Omaha, Neb., for a department store business, with a capital stock of \$350,000, and will have a very complete jewelry department.

Traveling representative⁶ may consider these columns open for the publication of any news or items of interest regarding themselves or their confreres.

Clarence Rudolph, formerly of Massillon, O., is with Goddard, Hill & Co., Pittsburgh, Pa. He started out, Monday, on a western trip.

Travelers in Pittsburgh, Pa., last week were: Charles B. Bartlett, Whiting Mfg. Co.; F. Van Olinda, New England Watch Co.; H. C. Barnum, Shafer & Douglas; S. W. Abbey, E. Ira Richards & Co.; S. E. Williams, for G. Armeny; Arthur Bradshaw, International Silver Co.; Harry Osborne, R. Wallace & Sons Mfg. Co.; Simon Goldsmith, Solidarity Watch Case Co.; C. H. Higbee, H. F. Barrows & Co.

S. D. Binge, S. & B. Lederer Co., was registered at the Iroquois, Buffalo, N. Y., last week.

Traveling salesmen who visited Boston, Mass., last week were: Irving L. Russell, L. Tannenbaum & Co.; Mr. Stevens, American Optical Co.; Mr. Wilkinson, C. A. Wilkinson & Co.; O. D. Eveleigh, Eveleigh Optical Co.

Among the traveling salesmen who were in Denver, Col., the past week were: George B. Ross, Robert H. Ingersoll & Bro.; George G. Gubbins, Illinois Watch Co.; H. C. Rowbotham, C. P. Goldsmith & Co.; Mr. Price, Byron L. Strasburger & Co.; S. Schimmel, Sussfeld, Lorsch & Co., and Mr. Cutter, general manager of the Elgin National Watch Co.

The jewelers of Portland, Ore., were interviewed by the following travelers the past week: W. L. Mason, Hayden W. Wheeler & Co.; Lee Hirsch, Louis Kaufman & Co.; W. A. Weizmann, representing Frank W. Smith; Mr. Parker, Osmun-Parker Mfg. Co.; J. Leudan, A. Eisenberg & Co.; L. F. Starks, representing William B. Glidden, and Sydney Weinschenk, for Alphonse Judis.

Travelers who called upon the Indianapolis, Ind., trade last week included: A. Kiersky, A. L. Reed & Co.; John Marsh, C. A. Marsh & Co.; Arthur Bradshaw, Meriden Britannia Co.; M. L. Barnard, J. B. Bowden & Co.; Mr. Wolff, Eisler & Laubheim; E. Smith, for E. H. H. Smith; E. A. Tyler, The Ansonia Clock Co.; W. J. Le Moin, The Ames-Bonner Co.; H. D. Sherrill, Sinnock & Sherrill; G. W. Bleecker, Martin, Copeland & Co.; Harry Kennion, Parks Bros. & Rogers.

Traveling men calling on Davenport, Ia., jewelers the past week were: Sam Kunstadter, J. Floersheim, Kunstadter & Co.; Louis Freund, Henry Freund & Bro.; K. J. Bemis, International Silver Co.; J. M. Morrow, American Watch Case Co.; George H. Wright, Unger Bros.; F.

Thompson, Derby Silver Co.; W. F. Adams, Simpson, Hall, Miller & Co.; Ferguson Mead, International Silver Co.; W. H. Bryant, T. G. Hawkes & Co.; A. E. Binkley, for John W. R. Harding; Harry S. Aicher, and representative of M. Lippett & Co.

Among the travelers in St. Louis, Mo., last week were: William Pfeuger, Joseph Noterman & Co.; Sol. H. Veit, Henry Froehlich & Co.; H. M. Carle, Keystone Watch Case Co.; C. C. Offerman, William Smith & Co.; Charles Whiting, Whiting & Davis; Fred. L. Pettee, Waterbury Clock Co.; Seymour W. Frolichstein, Frolichstein & England; A. Kiersky, A. L. Reed Co.; A. E. La Vigne, Mathey Bros., Mathez & Co.; Fred. G. Gruen, D. Graen & Sons; C. H. Anderson, Allsopp Bros.; M. L. Barnard, J. B. Bowden & Co., and S. A. Goldsmith, A. Goldsmith & Son.

The traveling men representing eastern firms who called on the Kansas City, Mo., jewelry trade last week were: J. M. Morrow, American Watch Case Co.; F. Thompson, Derby Silver Co.; William Rosenberger, A. Wallach & Co.; R. L. Kintz, E. G. Webster & Son; F. D. Newberger, R. Blackinton & Co.; Fred. J. Foster, Unger Bros.; H. B. Rogers, N. E. Whiteside & Co.; M. Klipper, Hipp, Didisheim & Bro.; F. D. Smith, Reeves & Browne; I. L. Friedman, L. Adler & Son; A. M. Hurd, Seth Thomas Clock Co.; F. L. Carpenter, Frank M. Whiting & Co.; D. Schwab, Ciner & Seeleman; and A. Vreitzfelder, for Manasseh Levy.

Among the traveling salesmen who recently passed through Detroit, Mich., were: F. R. Krugler, The H. A. Kirby Co.; R. H. Schley, Sloan & Co.; C. G. Perry, The Ripley-Howland Mfg. Co.; Addison W. Raubaud, Day, Clark & Co.; C. M. Dillon, The Meriden Cutlery Co.; H. D. Cretcher, Hayden W. Wheeler & Co.; George A. Stockder, J. D. Bergen Co.; F. L. Pettee, Waterbury Clock Co.; H. C. Barnum, Shafer & Douglas; Theo. G. Walpuski, American Morocco Case Co.; Walter S. Noon, W. F. Cory & Bro.; Max Gunzburger, Lissauer & Co.; S. L. Griffin, C. F. Rumpff & Sons; Fred. Casper, The Mauser Mfg. Co.; F. C. Jackson, for William Davidson; F. S. Howard, Towle Mfg. Co.

The following representatives of eastern wholesalers were in Minneapolis and St. Paul, Minn., the past week: F. H. Horton, Carter, Hastings & Howe; Will Gregory, Strobell & Crane; Mr. Perley, Aiking & Co.; Fred. Foster, Unger Bros.; Mr. Clark, The Towle Mfg. Co.; R. H. Schley, Sloan & Co.; D. Schwab; Mr. Sherrard, Enos Richardson & Co.; H. B. Rogers, N. E. Whiteside & Co.; Mr. Jacobs, Honan Silver Plate Co.; Mr. Myers, Queen City Silver Plate Co.; Mr. Kunstadter, J. Floersheim, Kunstadter & Co.; Mr. Smith, W. D. Earle & Co.; Mr. Kintz, E. G. Webster & Son, and representatives of J. A. Wright & Co. and Martin, Copeland & Co.

Calling on Syracuse, N. Y., jewelers the past week were: S. D. Binge, S. & B. Lederer Co.; A. W. Bogart, Waterbury Clock Co.; J. N. Beckwith, Beckwith, Grant & Co.; Benjamin Westervelt, New England Watch Co.; S. & A. Borgzinner and Van Bergh Silver Plate Co.; W. H. Pullman, E. A. Lehmann & Co.; Percy D. Lucas, The Mauser Mfg. Co.; S. Glenn Walmsley, for Hermann Baum; A. E. Alexander, Simpson, Hall, Miller & Co.; Mr. Wagner, Wagner Mfg. Co.; Herman Meyers, for Zach. A. Oppenheimer; E. F. Skinner, Henry Ginnel & Co.; H. B. Crawford, S. Sternau & Co.; F. P. Babcock, Newark Tortoise Shell Novelty Co.; H. C. Barnum, Shafer & Douglas; Addison W. Raubaud, Day, Clark & Co.; Fred. S. Eason, N. H. White & Co.; H. Allyn Parker, Gebhardt & Parker; C. C. Rosenberg, W. H. Terhune & Co. M. Freed & Co. and M. J. Averbeck were also represented.

Jewelers' Gold Bars Withdrawn and Exchanged.

CROSS & BEGUELIN

Importers and Cutters of Diamonds and Precious Stones

43 Rue de Meslay, PARIS

Telephone, 2188 Cortlandt

17 Maiden Lane, NEW YORK

New York Notes.

David Livingston, bookkeeper for Goodfriend Bros., who was married recently, has established his home at 34 W. 113th St.

S. Glenn Walmsley, of Brooklyn, well known to the trade, was married, Wednesday last, to Miss Lila T. Morse, of Manhattan.

Charles Cohen, a jewelry peddler, living at 207 Harrison Ave., Brooklyn, has been reported missing to the police, by his wife. He is 42 years old and was not known to have much money or jewelry with him.

William Wiesenberger, formerly a pawnbroker at 528 Sixth Ave., and before that time a traveling jeweler, who was indicted, last June, on four charges of receiving stolen goods, and convicted in November, has not yet been sentenced. He is in jail awaiting the Judge's action.

An effort is being made by the importers of New York to secure from Congress an additional United States Circuit Court Judge, in order that the great amount of accumulated business now awaiting the action of that court may be disposed of. Among the 23,150 protests from appraisers' decisions, which are awaiting the court's attention, are 3,000 protests involving jewelry.

The case of Abraham Frackman, formerly a retail jeweler at 379 Grand St., against whom an involuntary petition in insolvency was filed, a month ago, was called in the United States District Court, Wednesday. Judge Brown ordered adjudication. There has been considerable legal controversy over this matter, partly on account of the disappearance of a considerable part of the assets of the bankrupt, as told in THE CIRCULAR-WEEKLY last week.

Schedules of Louis Maratsky, Hudson, N. Y., who filed a petition in bankruptcy, as published last week, show the following creditors in the jewelry trade: Seth Thomas Clock Co., \$100; New Haven

Clock Co., \$100; C. T. Anderson, Reading, Pa., \$100; C. A. Van Benschoten, \$200; Waterbury Watch Co., \$100; James W. Tufts, Boston, \$125; John Keller, \$300; R. L. & M. Friedlander, \$120; Dattelbaum & Friedman, \$122; Attleboro Novelty Co., \$133.

A reward of \$1,000 has been offered for the arrest and conviction of the murderer or murderers of Morris Silverman, the jeweler who was found dying in his store, at 3056 Third Ave., Manhattan, Feb. 5, as told in THE CIRCULAR-WEEKLY last week. The reward is offered by Mrs. Silverman, who refuses to accept the police theory that her husband committed suicide. She says he had a good business and no reason to kill himself. Silverman, in a few moments of consciousness after he was found, just before he died, claimed to have been hit by burglars who attempted to rob his store.

Jesse T. Hoke, a clerk in John W. Stevenson's jewelry store, 486 Vanderbilt Ave., Brooklyn, was arrested Friday in Manhattan, charged with the larceny of jewelry worth \$1,000 from the store on Thursday afternoon. Hoke is 26 years old and had been employed by Stevenson for a month. Stevenson claims that he left the store in Hoke's charge Thursday afternoon. When he returned he found that the clerk had disappeared, taking with him the jewelry, consisting of rings, bracelets, chains, and several watches, among them one valued at \$400. The police found in Hoke's possession pawn tickets and two diamond rings.

Schedules in bankruptcy of Morris Schlesinger, who did business as the Brazilian Diamond Co., at 248 W. 125th St., show liabilities of \$1,387 and no assets. He turned over all his assets, on Jan. 3, to an assignee, and they realized \$110. His petition in bankruptcy was filed Jan. 5. Among the larger creditors are: I. Mann, \$297;

George J. Smith & Co., \$123; Morris Guggenheim, \$200. Schlesinger was duly adjudicated bankrupt Jan. 31. The first meeting of the creditors will be held March 8, at 4 o'clock p. m., at the office of Ernest Hall, referee in bankruptcy, 64 William St., at which time claims may be proved, a trustee appointed and the bankrupt examined.

Schedules in bankruptcy of Alexander Backer, jeweler, 371 Eighth Ave., have been filed showing liabilities of \$3,794 and nominal assets \$2,107, consisting of stock of jewelry \$1,000, debt due \$300, cash \$7, safe and fixtures \$800, mortgaged for \$250. Among the creditors are: E. & J. Bass, \$214; R. L. & M. Friedlander, \$116; David Mayer, \$108; Charles Altchul, \$219; Adolphe Schwob, \$274; Conrad Schickering, \$211. Backer was duly adjudicated bankrupt, Jan. 26. The first meeting of the creditors will be held, Feb. 28, at the office of Macgrane Cox, referee in bankruptcy, 63 Wall St., at 11.30 o'clock a. m., when claims may be proved, a trustee appointed and the bankrupt examined.

Fifty dollars and M. B. Dunning, with William Bardel, 22 Maiden Lane, parted company and became reunited under unusual circumstances, last week. Mr. Dunning, on Feb. 11, drew the half hundred from a bank to assist him in passing over Lincoln's birthday anniversary. When he arrived at his office the \$50 was missing. Careful search was made, but no trace of the money or explanation of its sudden disappearance could be found. So Mr. Dunning made up his mind to charge it to profit and loss, and passed the holiday. The next morning a man entered the office and handed Mr. Dunning \$50 in bills and a card which bore the name of R. J. Rogers, 9 Maiden Lane, New York representative of the Providence house of Lawton, Sherman Co., who expressed regret that the holiday prevented a sooner return of the money. He declined to accept the reward that was

most willingly offered, and would take only Mr. Dunning's liberal thanks.

James J. Fisher will hereafter represent F. J. Boesse, importer of watch materials, tools and supplies, 68 Nassau St.

R. M. Cohen, for five years with Stern Bros. & Co., 68 Nassau St., will hereafter represent the Niagara Ring Mfg. Co., Buffalo, N. Y., in western territory.

Laurens B. Bowden, a son, and William C. Kimball, a friend, have accepted the trust imposed upon them by the will of Joseph B. Bowden, and will be the executors of the estate.

George N. Joyce, one of the oldest jewelry houses in the city, for very many years under the United States Hotel, at the corner of Water and Fulton Sts., will move to the Temple Court building, corner of Beekman and Nassau Sts., May 1.

The American Watch Case Co., whose plant was badly injured by fire in the building partly occupied by them, have rented a new shop in the New York Life Insurance building, corner of Elm and Leonard Sts. This building, which is absolutely fireproof, is said to be one of the finest factory buildings in the city.

Bunde & Upmeyer, Milwaukee, Wis., have opened an office at 65 Nassau St., where they will make a specialty of dealing in American pearls. The office will be in charge of Henry W. Sowade, who has been known to the trade during the past 30 years, having been connected for 13 years with M. Fox & Co., and 15 years with Grinberg & Glauber and A. J. Grinberg & Co.

A bill that will affect jewelry instalment dealers, if it becomes a law, is now before the New York Legislature. Its purpose is to prevent arrest and imprisonment for non-payment of instalment debts unless the sum due is more than \$25. The promoters of the bill claim that there have been many instances where imprisonment has been cruel and oppressive, and the arrests made when the justice of the claims was questionable.

The stock in the store of John Schmidt, retail jeweler, 159 Myrtle Ave., Brooklyn, was damaged by fire and water to the extent of about \$5,000, last week, and his household effects suffered also. He lived in a tenement, in which the fire started, over the store. About two years ago there was a similar fire in the jeweler's shop and a policeman, who rescued the family, was presented with a gold watch and chain by the grateful jeweler.

Louis Lilienthal, who describes himself as an agent, residing at 306 W. 113th St., Monday filed a petition in bankruptcy with liabilities of \$33,293 and no assets. There are only three creditors, viz.: Lindenbaum & Weil, of London, \$26,633, for goods sold to him on Jan. 1, 1900; Bruhl

Frères, Paris, \$6,270, for balance of an account contracted in New York in 1895 and 1896, and Dr. William Hirsch, \$300, for services as physician. Mr. Lilienthal was formerly a member of the firm of Bruhl Bros. & Co. and later of the United States Diamond Cutting and Polishing Co. More recently he was in business at 14 John St.

There are plans in process of formation which, if successful, will result in the release of Max J. Lasar, now serving a sentence in the Erie county jail for smuggling diamonds from Canada. The efforts of his friends may take the form of a petition for his pardon, and the request for his release will be based on his poor health, as referred to in THE CIRCULAR-WEEKLY recently. It is said that he cannot live long under present conditions, and a jail physician is quoted as saying that symptoms of consumption and paresis have become apparent. Lasar was not in good health at the time of his detection, nor for some time previous thereto.

The bi-monthly meeting and dinner of the New York Credit Men's Association, held Thursday evening, at the Wool Club, was attended by over 150 members. There were delegations from Philadelphia, Baltimore and Boston. President Field, of the National Association, was expected, but was confined to his house by severe illness. Ex-President Cannon and president John R. Ainsley, of Boston, president James H. Ritter, of Philadelphia, were present and delivered addresses. Lignante's Mandolin Quartette gave a novel effect to the dinner. A. H. Watson, president of the New York Association, presided at the meeting, and after a short address of welcome introduced William A. Prendergast, secretary of the National Association of Credit Men, who addressed the Association.

The examination into the affairs of M. J. Davidow, bankrupt jobber, formerly at 510 Broadway, which has been going on for the past few weeks, was advanced a trifle last Wednesday, when attorney G. H. Crawford examined Bookkeeper Epstein, employed by Joseph B. Friedlander, a Brooklyn glass merchant, as to the details of numerous financial transactions between Davidow and Friedlander. The Brooklyn man was in the habit of advancing money to Davidow on endorsed notes and he was not able to tell all the details that Attorney Crawford wanted in the interests of the creditors, and the bookkeeper was therefore called upon to supply the missing links. No facts were developed beyond those reported in THE CIRCULAR-WEEKLY, Jan. 30. The exam-

ination was adjourned until Monday afternoon, when it was again adjourned until this afternoon at 1 o'clock.

Zacharias Van Blerken, a jewelry worker, formerly at 286 W. 85th St., but now an inmate of the insane department of Bellevue Hospital, as a paranoiac, is one of the principal witnesses for the prosecution in the trial of three student nurses who are being tried in Court of General Sessions on charges of pounding, kicking and strangling a patient named Hilliard. Van Blerken was a witness to the affair, but on account of his being an inmate in an insane hospital there was some question about admitting his testimony. He proved to be an apparently intelligent and valuable witness and cross-examination did not disturb his story. He resisted successfully attempts of the lawyers to pry into his domestic affairs, except to say that he was "put away" by his wife as he "wasn't very pleasant around the house," but no more information on that point could be obtained.

The first meeting of the creditors of Isador Kantro, formerly a jeweler at 2096 Third Ave., Manhattan, who filed a petition in bankruptcy, as recorded in THE CIRCULAR-WEEKLY, Jan. 30, was held, Thursday, before Referee in Bankruptcy Miller, 346 Broadway. The principal feature was a lively contest between two rival lawyers, each representing a would-be trustee, the result of which was that neither side won. The candidates for referee were J. H. Koehler, lawyer, 309 Broadway, and B. F. Lesser, of the Anchor Silver Plate Co., 425 Broadway. Seven claims representing \$1,752 voted for Mr. Koehler; eleven claims representing \$1,477 voted for Mr. Lesser. The referee decided that neither had a majority in amount or number. Objections were then filed by each lawyer against the proofs of claims filed by the other side. The referee took time to consider the objections and then decided that, as the creditors had failed to select a trustee, he would appoint one. George H. Gilman, 41 Wall St., was appointed. He is also the receiver appointed by Judge Brown, of the United States District Court. The examination of the bankrupt will be begun to-morrow, at 2 P. M., before Referee Miller.

Napoleon Bonaparte was entertained, one day last week, at the Brooklyn residence of Francis R. Simmons, of Henry Ginnel & Co., 31 Maiden Lane. At least the man said he was France's former ruler, but later it developed that he was a well known Brooklyn man of musical ability whose head was unbalanced. Beyond the temporary commotion in the house and the alarm of Mrs. Simmons and daughter, no harm was done.

A bill in the interest of auctioneers who have daily "bargain sales" has been intro-

The Mercantile National Bank

OF THE CITY OF NEW YORK,

BROADWAY AND DEY STREET,

Solicits Accounts from the Jewelry Trade.

duced in the Legislature by Assemblyman James E. Smith. At present, licenses are granted by the City Clerk to "any person engaged in and carrying on the business and occupation of auctioneer." The proposed law substitutes "citizen" for "any person" and imposes a license fee of \$500, instead of no fee, as at present, and requires the auctioneer to file a bond of \$5,000, instead of \$2,000, as now. The City Clerk, instead of the President of the Council, is to hear complaints of persons who claim to have been defrauded and may revoke licenses. The auctioneers complain that President Guggenheimer, of the Council, has been too severe and revoked too many licenses (for good cause, he says). The auctioneers desire the change.

Louis Mintz, the dealer in watch materials, who was indicted in connection with the Ruprecht jewelry robbery of Sharpsburg, Pa., because he sold some of the goods found to have been stolen from Mr. Ruprecht, returned from Pittsburgh, last week, to New York. Mr. Mintz called at the office of THE CIRCULAR-WEEKLY, Monday, and explained that there was an error in the dispatch from Pittsburgh, Feb. 9, where it stated that he, Mintz, had obtained the stolen watches from Henry Altman, of Buffalo. This, Mintz says, is not so, as he never saw Altman. He purchased the watches in question from a reputable pawnbroker, whose name he gave to District Attorney Haymaker, and he believes that the District Attorney learned from this pawnbroker that the goods were obtained by him from Altman. Mr. Mintz claims that he has already satisfied the authorities of his innocence in connection with the matter, and expects the indictment to be quashed. Mintz also claimed that Ruprecht has for some time known that the stolen goods had been sold by Altman who, it is said, will be called upon to show from whom he obtained them.

A petition in involuntary bankruptcy was filed on Saturday against Solomon Seligman, dealer in jewelry, pictures, etc., at 10 E. 14th St., 5 E. 13th St., and 44 W. 14th St. It is alleged that he owes L. R. Harsha Mfg. Co. \$253; William Renter \$104, and August F. Richter \$177. Seligman is alleged to have committed an act of bankruptcy by permitting, while insolvent, a creditor to obtain a preference. The assets are claimed to be about \$10,000 and the liabilities about \$50,000. William Ford Upson has been appointed temporary receiver of the assets on the application of Stern, Singer & Barr, representing William Reuter, a creditor. The receiver's bond was fixed at \$10,000. Just before these bankruptcy proceedings Seligman was sued by the New Haven Clock Co. for a bill of \$100. Judgment was granted and a city marshal seized 31 watches to satisfy the judgment. Legal steps were taken to have the judgment set aside, but the motion was denied Friday morning in the Second Municipal District Court.

The petition of William H. Thornton, who filed a petition in bankruptcy last year, for a discharge from all his debts, is set down for a hearing before Judge

Brown, in the United States District Court, next Wednesday, at which time and place he may be examined by his creditors. This matter has dragged along for some time on account of the inability of Mr. Thornton to arrange to meet his creditors or appear in court at any of the several times when the case has been set down for hearing since Jan. 24.

George E. Fahys, of Joseph Fahys & Co., returned yesterday from a long western trip which extended to the Pacific coast.

San Francisco.

TRADE CONDITIONS.

The retail business still remains quiet. It is too early for the retailers to buy largely. The demand is not equal to that of last year at this time.

H. Lemon, of Prescott, Ariz., is reported among the missing.

J. C. Feige is making interior trips for A. Eisenberg & Co. and is doing a good business.

Franz Malincke, Tacoma, Wash., was here, last week, en route to Mexico, on a pleasure trip.

Paul D. Walsh returned, Feb. 12, from an extended and successful trip in the interest of Armer & Weinshenk.

S. J. Hughes, of Geo. A. Cahoon & Co., Providence, R. I., has found business very bright from New York to the Coast.

David Glickman, a jeweler, has been arrested on a charge of grand larceny. C. T. Rea is the complainant. According to Rea's statement, Glickman some time ago mortgaged his household effects to him. Recently Glickman, it is alleged, sold the furniture to another person without satisfying his debt to Rea. Hence the warrant sworn out by Rea. Glickman was arrested at the County Hospital, where he was under treatment for an injury to a leg.

Shreve & Co. are displaying another handsome trophy—a solid silver punch bowl 16 inches high, with rococo decorations and three sharpshooter rifles well modeled in silver, with the ladle being decorated with the design of the Golden Gate, the end of the handle being finished with an 18 karat gold bear. This prize will be given by N. Ahrens, president of the Germania Schuetzen Club, at the third national shooting festival of the National Shooting Bund of the United States, July 14-23, 1901.

Al. Cleaver, Boone, Ia., has opened a new jewelry store at Ogden, as a branch of his establishment in Boone. E. C. Wellington is in charge.

A fire broke out at Fredericksburg, Tex., Feb. 6, in Richter's jewelry store and was caused by a heating stove. The store and about \$3,000 stock were destroyed.

The Stanton-Nickett Jewelry Co. have been incorporated in South Dakota with a capital of \$25,000. Horace J. Nickett, Elton G. Stanton and George P. Hall are the incorporators.

A dispatch from Pana, Ill., last week, stated that farmers in this and other towns have been swindled to the extent of \$10,000 on the "gold watch scheme." The agents got blank orders which afterward proved to be notes of considerable value.

Last Week's New York Arrivals.

THE CIRCULAR-WEEKLY has perfected arrangements for obtaining the names and hotel addresses of all the latest buyers visiting New York, and each day posts in its office, 11 John St., cor. Broadway, a bulletin which every member of the trade is cordially invited to copy.

TO EUROPE.

F. A. Jeanne, of Alfred H. Smith & Co., New York, sailed on the *New York*, recently.

Arthur H. Kirkpatrick, of Chester Billings & Son, New York, sails to-day on the *St. Louis*.

Solomon Lindenborn, New York, and Mrs. Lindenborn, sailed recently on the *Lucania*. On the same steamer went: Michael Dreicer, of Jacob Dreicer & Son, New York; Emanuel Koscherak, of Koscherak Bros., New York.

S. Frankel, of Joseph Frankel's Sons, New York, sailed Saturday on the *Kaisarin Maria Theresia*, for Genoa, accompanied by Mrs. Frankel and daughter.

FROM EUROPE.

S. B. Ross, of Malliet, Maxwell & Ross, New York, is expected home soon on the *Rotterdam*.

Henry Fera, of Fera & Kadison, New York, recently returned from a European trip on the *Majestic*.

Aliaz Paxson, a retired jeweler of Rockford, Ill., who was also town collector for Rockford, for one year, is considerably interested in the recent receipt by County Treasurer Gilmore of \$60 in conscience money from an unknown source. While Mr. Paxson was collector he lost just that amount by accident in making change, and is inclined to think that the sender is the one who benefited by the mistake.

"Precious Stones ...and Gems,

Their History, Sources
and Characteristics,"

By EDWIN W. STREETER,
London, England.

ILLUSTRATED WITH COLORED PLATES.

SIXTH EDITION.

Revised and largely re-written up to date.

345 pp. Price, \$6.

The contents of the volume may be briefly summarized as follows: Precious stones in general—Sources; history; working; cutting (including various forms); engraving and carving; burning and coloring; and trade conditions (50 pp.); diamonds (95 pp.); rubies (31 pp.); sapphires (14 pp.); star stones, spinel and bolas (5 pp.); emeralds (10 pp.); true cat's eye and Alexandrite (5 pp.); opals (5 pp.); turquoise (14 pp.); semi-precious stones, about 40 varieties (74 pp.). Classifications, appendices and index occupy the remaining 34 pages.

11 JOHN ST., cor. Broadway,

NEW YORK.

J. J. R. McElrath has opened a jewelry business at Gate City, Ala.

Arthur Myers, Morris, Ill., will open a jewelry store in Marseilles, Ill.

Edwin Vogel, of M. Vogel & Bro., Philadelphia, Pa., recently visited St. Augustine, Fla.

Philip Jacoby, Spokane, Wash., is on a trip to New York and Philadelphia, purchasing a new stock of jewelry.

C. L. Van Wert, Colorado Springs, Col., has completed a large addition to his jewelry establishment on Pike's Peak Ave.

F. H. Bushway was in Decatur, Ill., last week, assisting in fitting up offices for the jewelry business in which he is interested.

E. M. Hale, Lima, O., has leased a new store in the Ashton block, that city, into which he will soon remove his jewelry business.

A fire at Plymouth, N. C., recently, did considerable damage to the jewelry stock of N. B. Yeager, of which a small portion was saved. His loss is placed at \$800 and his insurance, \$500.

The Empire State Diamond Co., of Tonawanda, N. Y., have been incorporated with a capital of \$10,000. J. O. Schuchert, W. J. Rogers and U. J. Rogers, Tonawanda, are the directors.

J. J. Palmer, a leading jeweler of Newport News, Va., has taken his sons, George L. and Fred J. Palmer, into partnership. The business is now conducted under the style of J. J. Palmer & Sons.

T. B. Douthet's store, at Richey, Mo., was broken into Feb. 10 and \$42 in cash, a check for \$6, four watches, finger rings, cuff buttons and other jewelry to the amount of \$50, were stolen. No arrests have been made.

Mrs. Ida Kelly was arraigned in court at Peekskill, N. Y., Friday, charged with grand larceny in obtaining jewelry from Holmberg & Weeks, of that village, under false pretences. She was arrested in New York on Thursday.

The board of directors of the Hamilton Watch Co., Lancaster, Pa., have organized and re-elected the old officers as follows: President, Charles D. Rood; vice-president, P. T. Watt; treasurer, Frank P. Coho; secretary, Eugene P. Coho.

W. A. Peden, Fairfax, Mo., recently had an auction sale of his jewelry stock.

Eugene H. Benson, Chestertown, Md., will open a jewelry store in St. Michael's.

The watch factory building at Wichita, Kan., recently sold for \$4,000, is to be torn down.

A fire at Jasper, Ala., Feb. 10, destroyed among other stores a frame building occupied by a watchmaker.

Arthur Threadgill, Marlin, Tex., will remove his jewelry business about March 1 to the Donohoo building in that town.

Thomas George, Fairfield, Ia., has removed his jewelry store to commodious quarters in the Acheson building of that town.

E. A. Frazer and S. F. Swan, of Swan Bros., Creston, Ia., recently visited Chicago, purchasing goods for their jewelry department.

Jacob Lippman, of Rothstein & Lippman Bros., jewelers, Johnstown, Pa., recently arrived home from a business and pleasure trip to New York. Mrs. Lippman was in New York with him.

Some unknown person broke a plate glass window of the O. L. Rosenkrans & Thatcher Jewelry Co.'s store, Milwaukee, Wis., last week, but ran away without stealing anything. It is not thought that the window was broken intentionally.

The Torrington Time Globe Novelty Co., Jersey City, N. J., have been incorporated to manufacture under patents time globes. The capital is \$50,000 and the incorporators are Edward F. Dingwell, Julius H. Richards and Theodore A. Rachter.

The jewelry store of E. S. Haines, Joplin, Mo., was entered December, 1899, and diamonds to the value of several thousand dollars were stolen. Nothing was heard of the missing stones until Mr. Haines's attention was recently called to a replevin suit brought against the chief of police of Aurora, Ill., to recover about a thousand dollars' worth of diamonds. Mr. Haines examined the diamonds and identified them as being those stolen from him.

Always First

to consider the welfare of the retail jeweler, we were the first to make an **extra heavy** gold-filled watch case to meet the demand for better goods which the prosperous condition of the country created. Since the **BELL SPECIAL GOLD-FILLED WATCH CASES** were introduced, over a year ago, the sales have been phenomenal. They contain more gold than any other filled case on the market and are the only filled cases made with the quantity and quality of gold stamped in the case.

Any emblem or monogram, plain or engine-turned, made to order for from 25 cents to \$1.00 over price of plain polished case.

News Gleanings.

James Nutt, a jeweler, of Ogden, Ia., has opened a store at Boone, Ia.

D. W. Currier is closing out his jewelry business at Sioux Falls, S. Dak.

H. Plumb's jewelry store, Des Moines, Ia., recently underwent extensive alterations and repairs.

J. J. Osborn, Lexington, Ill., has removed his jewelry business to a store opposite his old location.

Angelina Weitzel, the wife of Alfred L. Weitzel, a jeweler at 934 Penn St., Reading, Pa., died Feb. 9 in the 77th year of her age.

Louis Kirch, manufacturing jeweler, recently of 89 Hanover St., Manchester, N. H., has moved to new quarters at 1035 Elm St., that city.

Charles E. Wardin, Topeka, Kan., whose stock of jewelry was partially destroyed by fire Dec. 31, has resumed business at his old stand 611 Kansas Ave., that city.

A note from Litchfield, Ill., states that the Randle jewelry stock has been removed to Raymond by John W. Strain and this stand will soon be occupied by the Harvel jewelry store.

Thomas Church, a peddler of cheap jewelry, was recently fined \$30 at St. Joseph, Mo., on a charge of vagrancy. Church went into a jewelry store and tried to force the proprietor to purchase his wares, and for this was arrested.

A sketch of the career and portrait of Joseph Ladomus, jeweler, of 320 Market St., Chester, Pa., were published in the Philadelphia Times, Feb. 9. Mr. Ladomus succeeded to his present business from his father in 1848, so has been established over half a century.

President Samuel Gompers, of the American Federation of Labor, recently received a gift from the Watchworkers' Union, of Elgin, Ill., of a handsome gold watch. On the front case is the raised monogram, "S. G." in two colors of gold, on the face the colored seal of the union, and inside the case the inscription of presentation.

An article is to be inserted in the town warrant next month to see if the town of Ware, Mass., will accept and care for a gift of a town clock, to be given by the family of the late John H. Storrs as a memorial. The clock is to be put in the tower of the Town Hall and will cost about \$4,000. It will be made by the E. Howard Clock Co., of Boston. The dials will be of heavy ground glass, 6½ feet in diameter, and illuminated by Welsbach lights. There will be four chime bells, weighing 2,000, 800, 500 and 400 pounds each.

Consul Harris, of Mannheim, Germany, notes an opportunity for the sale of American fountain pens, in a recent report, in which he says: "I am advised that in Heidelberg University, near this city, where about fifteen hundred students are in attendance, only a small number of fountain pens are in use, and few, if any, are offered for sale. The students carry ink in bottles to and from classes. It would appear that our lower priced pens should find a market there and in other parts of the district, including Mannheim, where fountain pens are rarely seen."

J. M. Graves, Norman, Okla., has given a chattel mortgage for \$21.
 D. C. Holt is about to embark in the jewelry business at Baldwin, Mich.
 J. J. Salfinger, Melrose, Minn., has moved his jewelry store to new quarters.
 The Dublin Drug and Jewelry Co. have discontinued business in Dublin, Tex.
 Fred. Studer has sold his stock of jewelry in Coleman, Tex., to Jerry Harbourn.
 U. S. Bruner, De Witt, Ia., will move his jewelry store into new and larger quarters.
 George L. Newton, Carlsbad, N. M., has decided to add a line of drugs to his business.
 A. M. Phillips, of Barstow & Phillips, Oshkosh, Wis., is confined to his home by illness.
 Lang & Staacke, St. Peter, Minn., have dissolved partnership, George W. Staacke succeeding.
 J. L. Hastings, Mohawk, N. Y., has had a handsome new open oak wall case placed in his store.
 The entire establishment of H. R. Richter, Fredericksburg, Tex., has been destroyed by fire.
 James G. Mines, Wayne, Neb., has paid off a realty mortgage for \$1,700 and given a new one for \$1,500.
 Jeremiah Gomph, Utica, N. Y., has had his store repapered and the handsome steel ceiling newly tinted.
 F. A. Austin, St. Paul, Minn., is now in charge of C. J. Wimer's jewelry department at Minneota, Minn.
 J. H. Barnes & Co. have sold out their

jewelry manufacturing business in Cedar Rapids, Ia., to Elson & Co.
 Smith & Boyce have succeeded to the entire jewelry and stationery business of Mellor & Co., Malvern, Ia.
 J. B. Duncan has sold a half interest in his jewelry and drug business in Bartlett, Tex., to M. K. Daugherty.
 At the election held last week, F. L. Burton, Canajoharie, N. Y., was re-elected Town Clerk for a term of two years.
 L. Drumgoole, of Drumgoole Bros., San Antonio, Tex., has given a mechanics' lien on realty to the amount of \$930.
 C. J. Wells, The C. J. Wells Co., Utica, N. Y., has returned home from a three weeks' trip of recuperation, much improved physically.
 H. M. Mason, Bloomington, Ill., has sold out his grocery stock and will hereafter devote his entire time to the jewelry end of his business.
 W. H. Bradshaw, Wooster, O., who conducted a store at Marshall, Ill., several years ago, and later at Paris, Ill., has decided to return to Paris and reopen in business there.
 W. C. Crosman, Auburn, N. Y., was a passenger on the steamer *Comanche* last week on her voyage to Charleston, S. C., when fire broke out during the night and at one time assumed a very serious aspect.
 Louis Cherry, Braidentown, Fla., has moved his store into the building adjoining the city market, which he has had nicely fitted up for his business, making one of the completest little stores on the Manatee river. Mr. Cherry has formed a partnership with Wade H. Watson, to

Careful Inspection

of every part before delivery is one of the precautions that make

SEND FOR PRICE-LIST.

The Trenton Watch Co.,
 TRENTON, N. J.

The Hot Water Plate.

Here is a modern, stylish utensil that you will look upon as a novelty, perhaps. But study it.

Think about the missing palatableness of the meat when one is half an hour late to dinner, or for breakfast to serve wheat or buckwheat cakes, scrambled eggs or ham and eggs, enjoying them to the last mouthful, still hot. And when you fully fathom its utility you will look upon it as a necessity.

You will wish you had learned about it years ago when the English people did, for it is very popular in England.

Every one of your customers will want them.

The illustrations tell a lot about it. The name doesn't.

It is called a hot water plate for the want of a better name. It is illustrated, so that the name will not mislead you.

You don't have to be told that the cover is to prevent the loss of the heat, or that the meat goes on top of the plate, and it is obvious that the spout at the side is where you pour the hot water. Will keep hot for an hour.

Each plate is furnished with an enameled iron funnel for filling purpose.

PRICES.

Nickel-Plated Hot Water Plates,

fitted with heavy English Decorated China Plates.

No. 355, 9 inches diameter, = \$2.50 each.
 No. 357, 9 1/2 inches diameter, = 3.15 "

carry a line of musical instruments, pianos, organs, etc., which will be in charge of Mr. Watson.

Walter C. Cornell will, about April 1, open a jewelry store at 39 Water St., Newburgh, N. Y.

Wayne M. Reed has sold his jewelry store at Athol, Mass., and has gone to Waltham.

H. H. Nerbovig has opened a jewelry store in the front part of the Shaw store, Waseca, Minn.

L. R. Herrick, formerly with T. H. Bowen & Co., Bridgeton, N. J., has accepted a position with A. D. Sturges, Norwich, N. Y.

Charles E. Winslow, who has worked at the jewelry business in Minneapolis, Minn., for a number of years, has been taken to the insane asylum at Yankton.

It is reported that a watch and clock company of Chicago want to locate in Greenville, O. They will capitalize at \$50,000 and agree to furnish \$40,000, the citizens of that town to take the rest and furnish a three story frame factory.

The jewelry store of G. B. Tilghman, Cape Charles, Va., was entered recently by robbers and about \$75 worth of silver ware was stolen. A part of the property was found in the woods near town on the next day. No clue to the guilty persons has been obtained.

A town clock has just been erected for the town of Dover, Pa., by the E. Howard Clock Co., of Boston. The dials of the clock are four feet in diameter, with gilt figures and hands, and the bell, which weighs 1,000 pounds, is struck by a 20-pound hammer.

W. B. Baker, jeweler, Independence St., Shamokin, Pa., died of typhoid pneumonia Feb. 8. Ever since his store was robbed, about a month ago, Mr. Baker had been suffering from nervousness. He was taken to the Mary Packer hospital and upon his return he was stricken with typhoid pneumonia. The remains will be taken to Lima, N. Y., for interment.

The family of the late John H. Storrs, Ware, Mass., have offered to give that town a handsome clock for the Town Hall, and a town meeting will be held next month to take advantage of the offer. The clock will be made by the E. Howard Clock Co., Boston. The dials will be of heavy ground glass, six and one-half feet in diameter, and illuminated. There will be four chime bells, weighing 2,000, 800, 500 and 400 pounds each. The chimes can be regulated to strike as desired and the makers claim that the largest one can be heard a distance of three or four miles.

Utica, N. Y.

The Atlas Jewelry & Furniture Co. began an auction sale of their stock, together with fixtures, etc., on Feb. 11. Sales are to continue until everything is disposed of.

Joseph Cohen, jewelry agent, was married to Miss Anna M., daughter of Mr. and Mrs. A. Epstein, of Ogdensburg, at the synagogue Aushe Sofen, in Ogdensburg, Feb. 19.

The funeral of Hyman M. Abelson was held from 166 Whitesboro St., Tuesday afternoon last, at 2 o'clock, Rev. Louis Levine, rabbi of the House of Jacob, officiating. The floral offerings were many and beautiful.

The Japanese art goods firm of Shimamura & Co., who were located at 102 Genesee St., have left town. Their suit in the City Court was dropped, as the complainant made no appearance. The firm were arrested for not taking out a non-resident's license, which the city requires for auctions, at \$50 per day.

Syracuse, N. Y.

S. Kauffman will make some radical improvements in his store in the near future.

Charles H. Dower, watchmaker, jeweler and optician, has opened a department at R. Stowell & Co.'s store, 317-319 S. Salina St.

Workmen have altered the Lawrence-Tibbitts Building, Oneida, preparatory to its occupation by William J. Hinman, who removed his jewelry store from 17 Madison St. on Feb. 15.

The Joseph Seymour Mfg. Co. have been awarded the contract for furnishing all the souvenir spoons to be sold at the Pan-American Exposition. The number to be produced has not been stipulated, but it will exceed 1,000,000 and require the services of a largely increased force, which will be employed night and day.

Savannah, Ga.

G. J. Davis, Rome, Ga., has given a chattel mortgage for \$400.

H. C. Eggers, Greenwood, S. C., has offered to compromise with his creditors.

The city clocks of Savannah will shortly be equipped with illuminated dials; that for the City Exchange clock has been ordered of city timekeeper Robert Scmeider.

J. N. Koch, of Koch & Sylvan, jewelers, was sued, recently, in the City Court for \$1,000 damages by Annette Coles, a tenant, who claimed to have been injured by the collapse of the steps of a house rented from Mr. Koch. A jury awarded her \$500.

The Rookwood Pottery Co., Cincinnati, O., are working on a new glacé which is expected to create a furor in art circles. It is called the Matt glacé and is in crystal design in colors. It was quite the rage in Paris. One of the famous tiger eye vases, valued at 10,000 francs, which was shown at the Paris Exposition, has arrived at the company's factory. It is a wonderful piece of art and will probably be purchased for a museum. Mr. Bing, the Paris agent for Rookwood Co., has cabled his congratulations to Mr. Taylor on his recent decoration by the French Government.

NEW YORK.

Pittsburgh.

Steele F. Roberts is in New York, buying Spring goods.

H. Gold has opened up in the engraving and kindred lines at 1329 Fifth Ave.

Philip Ruprecht will remove shortly to better quarters on Main St., Sharpsburg.

A. E. Siedle, East End, has taken out a permit for \$2,500 worth of repairs to his new building on Penn Ave.

The jewelry store of Abraham Levinson, Dunbar, Pa., was entered on the night of Feb. 14, and robbed of valuable cutlery and jewelry.

E. J. Fogelman, formerly watchmaker for Joseph De Roy, is now with G. B. Barrett & Co. M. E. Shutterly takes Mr. Fogelman's place with J. De Roy.

R. T. McGeagh has purchased a lot 20x100 feet, improved, with an old frame building, on Fifth Ave., for \$7,500. The property is said to be that known as No. 1018.

A. E. Siviter & Co. will remove on April 1 to the fifth floor of the Goddard, Hill & Co. building, while the Rodney Pierce Optical Co. will take the fifth floor.

A slight fire with no disastrous results occurred at the store of J. M. Roberts on the night of Feb. 15. The fire depart-

ment responded before any serious damage was done.

J. W. Allison will do the city trade for Goddard, Hill & Co., with which firm he has long been identified. Mr. Allison's place on the road will be filled by a new representative whose name was not learned.

John Lanzendorfer, Punxsutawney, Pa., was hurt by a train last week. He was out driving and attempted to cross the tracks when a train struck and demolished the rig, and injuring Mr. Lanzendorfer, though not seriously.

A verdict for \$3,875 against Louis J. Seleznick (the Pittsburgh Jewelry Co.) and the Howard Sand Co. was rendered on Saturday in the case of Mrs. Elizabeth McHale and her daughter, Mary McHale. The daughter fell into a coal hole in front of the defendants' property on Smithfield St., and sustained a fracture of one of her legs and was otherwise seriously hurt.

George W. Kaufman, of Brooklyn, New York, is a guest of his brother, J. G. Kaufman, of J. G. Kaufman & Co., this city, and intends entering the concern. The firm will then be known as Kaufman Bros. J. G. Kaufman will continue to look after the city and nearby trade, while George W. Kaufman will travel westward for the new house.

WESTERN SUPPLEMENT

VOL. XLII.

NEW YORK, WEDNESDAY, FEBRUARY 20, 1901.

No. 3.

Chicago Notes.

All communications in reference to the Chicago department of The Jewelers' Circular-Weekly, addressed to Stephen Parlin, 134 Van Buren St., Room 414, Chicago, will receive prompt attention.

William Tall, of South Haven, Mich., is in the city taking a course in optics.

J. A. Todd, Towle Mfg. Co., is visiting at the Newburyport factory.

B. Schuette has returned from a business trip east.

M. C. Witherspoon, Ouray, Col., has been here for a few weeks taking a course of engraving with J. B. Wiggins.

Fred. Thearle, of C. H. Knights & Co., has left for a well earned pleasure trip in California.

H. M. Carle, Chicago manager for the Keystone Watch Case Co., is back from a short visit at the factory.

Frank Happel started on his third trip of the present season for F. C. Happel Co., leaving last week for the west.

R. C. Demarest, Barbour Silver Co., is again at his desk after a painful tie-up at home for a couple of weeks with a sprained ankle.

W. S. Sparrow and Mrs. Sparrow are in the east on pleasure and business combined, taking in Washington before their return.

H. F. Hahn, accompanied by his wife, has gone to southern California, where they will enjoy rest and recreation for about three months.

A couple of small failures were reported last week. F. W. Erdmann, Wickliffe, Ky., has gone into bankruptcy, and Payne & Bonfight, Mattoon, Wis., have assigned.

A. W. Ford & Son, Freeport, Ill., are holding an auction. Mr. Ford's son will shortly leave Freeport and enter a manufacturing business outside jewelry lines, at Colorado City, Col.

Charles Lester returned the latter part of the past week from his visit at the factories of the New England Watch Co. and the New Haven Clock Co., for whom he is Chicago manager.

J. R. Davidson is on a two to three weeks' trip, calling on the western trade of the Philadelphia Watch Case Co. Mr. Hyatt has charge of the Chicago offices during Mr. Davidson's absence.

A. L. Sercomb has returned from a 10 days' visit east, and says he had the best time in his life. He visited all the factories and found them running full

blast. In some lines the factories are having a hard time to keep up with the demand.

Ostby & Barton Co. and Theodore W. Foster & Bro. Co., who occupied offices here jointly with Bates & Bacon, will divide the space formerly used by Bates & Bacon, and occupy the entire salesroom at 607 Columbus Memorial building.

Mr. Lapp, of Lapp & Flershem, having completed his tour of the West Indies, has returned from Nassau, in the Bahamas, to Palm Beach, Fla., where he will make a short stay before returning home. He is expected in Chicago the end of the present week.

Jeweler Leach, Vermont, Tex., was in town a week buying. Mr. Leach has done nicely since he left Chicago three years ago for Texas. A fine flow of rich oil has been struck at the town, and there is now a boom on in which all trades are sharing the benefits.

J. A. Limbach, manager of Theodore W. Foster & Bro. Co.'s Chicago office, and D. A. Wilkins, of Ostby & Barton Co.'s office, have returned from a trip to the Pacific coast, extending since the first of the year. They report about the usual business for the season and that the coast looks forward to a good trade for the year 1901.

I. Gevurtz, Portland, Ore., bought a big bill of plated ware here last week, shipping the goods to the coast with seven carloads of house furnishings. This is Mr. Gevurtz's entry into the silver plated ware field. He is assisted in his business by five grown-up sons, one of whom accompanied him on his present buying trip.

Recob, Ziegler & Co. have succeeded the firm of C. K. Landon, 712 Columbus Memorial building. The new firm have incorporated with a capital stock of \$35,000. Mr. Recob is of the Wheaton Watch Co. Mr. Ziegler has been connected with the jewelry trade here for the last 10 years, first with Sproehnle & Co., later with B. F. Norris, Alister & Co., and more recently with J. W. Forsinger.

A dry goods house at the northeast corner of State and Madison Sts. contemplate an important enlargement of their retail jewelry business, and have engaged men from three of the leading retail down-town stores to take charge of their departments. It seems the intention of the dry goods store to enter the field of high class jewelry. Such a step is likely to meet with retaliatory measures by the better class of retail jewelers.

Fred. Caruthers, of the watch department of B. F. Norris, Alister & Co., has

accepted the position of Chicago agent for Hipp. Didisheim & Bro., and will establish offices for the firm on the eighth floor of the Columbus Memorial building. Mr. Caruthers has been with B. F. Norris, Alister & Co. the last eight years, and has always been faithful to his employers' interests. He is a good man in the right place. Mr. Caruthers left Monday for a visit to the New York office.

With a stolen package of jewelry belonging to the Imperial Mfg. Co. in his possession, William Block was arrested at the post office, Feb. 12. The prisoner, who is a messenger employed by the Postoffice News Co., was taken to the county jail, and was to have a hearing before United States Commissioner Humphrey, Feb. 13. Block was sent to the postoffice by his employers. The key to the news company's box fitted the box of the Imperial Mfg. Co., and the boy is said to have stolen the package of jewelry in this way.

Every watchmaker in Chicago, and also those who are not watchmakers, have a treat in store for them March 7, if they can induce some friend of theirs who is a member of the American Horological Society to invite them to a stereopticon exhibit to be given before the Society by W. F. Nye, of New Bedford, Mass., who has kindly consented to make the trip here with about 100 views illustrating exciting scenes of the Cape Cod fishermen among the schools of porpoise and blackfish, from whose jaws the finer grades of oils are made. Do not miss the treat set for March 7, if you have a friend who can invite you.

Collector of the Port Nixon's figures are out for the year 1900, showing direct imports of jewelry at Chicago to have been but \$34,743, on which was paid a duty of \$21,051.94. In diamonds and precious stones the imports were \$94,827, with duty of \$9,556.47. There was \$124,444 worth of clocks and watches brought direct to Chicago, for which the Government is the richer by \$17,007.92. The value of musical instruments imported was \$208,119, and the duty \$100,183.45. Cutlery amounted to \$19,206, with duty of \$13,381.29, and china and glass ware loom up with a valuation of \$654,667, which paid \$395,982.79 in duties. The statement does not show all the foreign goods that come into this port, as a great deal of merchandise is duty paid at the exterior port and consequently no record is made of it here.

Mr. Darlington, of the clock department at B. F. Norris, Alister & Co., has taken the position made vacant by Mr.

OUR EASTER SUPPLEMENT.

There are many new and particularly salable articles scheduled for the early Spring trade which we will bring to the attention of jewelers through the medium of an Easter Supplement.

This Supplement will appear before long and will contain a select assortment of what, in our judgment, will create rapid and profitable sales. We will be prepared to fill all orders from it with no delay. Watch for it.

Two Items For Your Consideration.

JUST ABOUT DIAMONDS.

It is always advisable, and even necessary where your profits are concerned, to buy Diamonds where there is the largest assortment both in quality and price. This saves you time and trouble, therefore the expense resulting from time and trouble.

The enormous outlay required for a complete Diamond stock renders it impossible for any but a most successful concern to carry such a stock profitably. This is why we claim our precedence in the Diamond trade. We will gladly furnish estimates if requested.

Silberberg & Co., of Chicago, have incorporated with a capital of \$10,000, to do a wholesale and retail jewelry business. Incorporators: A. B. Silberberg, Marks Levy, J. Stirlen.

Two men entered the jewelry store of William J. Freudenberg, 739 Lincoln Ave., a few nights ago, ostensibly to make a purchase. Freudenberg says he saw one of them put two watches in his pocket. He chased the men and with the assistance of a policeman caught one of them.

Pacific Coast Notes.

Burglars broke into Densmore's jewelry store at Covina, Cal., recently, and secured money and goods to the value of \$500.

Louis Zahl, Oakland, Cal., has moved to his new store at 1066 Washington St., and he has opened his new quarters as the Zahl Jewelry Co.

The copartnership between Anson P. Hall and J. P. Alverson, under the firm name of A. P. Hall & Co., Tulare, Cal., was dissolved by mutual consent, Feb. 8, A. P. Hall retiring. J. P. Alverson remains in business at the old stand.

The establishment of Jacob Kirsbaum, 2309 Washington Ave., Ogden, Utah, was broken into recently and 12 watches, 12 dozen rings, a number of bracelets and some cash were taken. No clue has as yet been found to identify the thieves.

F. A. Francisco, for many years connected with a large silver ware manufacturing establishment in New York, is dying at Newcastle, Cal., of consumption. Mr. Francisco came to California about six years ago in the hope of recovering his health.

St. Louis Button Co., 620 N. Broadway, St. Louis, Mo.

Cincinnati.

TRADE CONDITIONS.

The factories keep busy on repair and order work, working overtime all week. It is evident there is a good year ahead.

L. G. Spelman, of S. C. Citroen & Co., diamond cutters, is en route to the northwest on an extended trip. In his trip he has picked up some very valuable stones to be recut and polished by his house. They have been extremely busy the past few weeks.

The Miller Jewelry Co. are working on an order of rings for the 33d degree Mason class, which meets at Cincinnati, this week. All the Masons in the State who have reached this degree will be presented with a ring upon initiation, at the session. They are elaborate and beautiful.

The committee of the Christian Endeavor Society, which is meeting here this week to arrange for the national association, which convenes here this Summer, want the local manufacturers to bid for the button to be worn at this meeting. They want a new design, unique and expressive, specially for this meeting.

The Duhme Jewelry Co. had their opening last week. The mammoth room was brilliantly illuminated with incandescent lamps, and the splendid equipment of the place with the magnificent stock make it a truly 20th century store. They gave away as a souvenir a three inch satin ribbon on which was printed a picture showing a section of the store with these words: "The Grandest Jewelry Store in the World."

Theodore Neuhaus & Co., who received the order from the National Cash Register Co. for the "Legion of Honor" jewels which they intend to present to their agents for best sales in contests, have completed the first batch of nine. They are of solid gold, three inches long. The medal is suspended from an elaborate bar by a chain, while a tiny cash register hangs from the bar. The medal is enameled in royal purple. The letter N in the center is surrounded by a gold wreath. The cost of each is

TOWLE MANUFACTURING CO.,

CHICAGO.

NEWBURYPORT, MASS.

\$22.50 and the order covers a period of four years.

I. Chance, Canton, O., was in the city, last week, en route to New Orleans to attend the Mardi Gras.

Detroit.

The Diamond Syndicate Co. have been dissolved by the sale of their property and franchise there to W. Jay Gould.

E. H. Rosenberg, last week, gave a chattel mortgage on his stock of jewelry at 6, 7 and 8 Valpey building, for \$3,000 in favor of Henry Rosen.

Fire in the Hoodoo district of Detroit did \$1,100 damage, last week, and among the losers was the wholesale jewelry firm of J. A. Selling & Co. Their stock suffered damage of \$500; fully insured.

Denver.

Thomas A. Whiteley has succeeded L. E. Stanton, Sterling, Col.

E. L. Peisar, Aspen, spent a few days in Denver last week, on his way to Honolulu, where he is going for his health.

M. C. Witherspoon, Ouray, passed through the city last week on his way home from a several weeks' trip in the east.

Charles Zeitter, watchmaker, with Sam Mayer, who is a prominent Elk, visited Cheyenne last week in connection with the order.

T. J. Lewis, of the Lewis Jewelers' Supply Co., has been on an extended trip through the southern part of this State and New Mexico.

Minneapolis and St. Paul.

Joseph Schech, with the Jacobs Jewelry Co., is the proud father of a daughter, born Feb. 8.

E. R. Apt has started out on his Iowa trip for B. Schuette, Minneapolis. He will be gone two months.

W. L. Pettit, wholesale jeweler, Minneapolis, has removed his stock from the Masonic Temple to 18 S. 6th St.

Marcus Jaffe, Minneapolis, will start out with a line of jewelry on his own account about March 1. He will make northern Minnesota and northern Wisconsin.

Rentz Bros., Minneapolis, are making a handsome star for Chief of Police Col. Fred. W. Ames. It is a gold star, with the words "Chief of Police, Minneapolis, Minn." engraved thereon. In the center there will be a handsome 3-karat diamond. The star will be worth about \$400.

James H. Mosier, lately in the jewelry business in Minneapolis, has filed a petition in bankruptcy. The schedules show secured debts of \$638.10, mostly for borrowed money, and incurred in 1890 in Rockwell, Ia., and in Minneapolis in 1897. The unsecured debts aggregate \$1,884.45, being scattered around pretty generally. Chicago jobbers come in for the larger amounts. The assets consist of household goods, books and pictures, a bicycle and tools, aggregating \$450, and are all claimed as exempt. There is no stock in trade.

The Reed-Bennett Co., wholesalers, Minneapolis, have fitted up their salesrooms with a new outfit of show cases in

white oak. Below, the glass cases are fitted with shallow drawers which slip out for exhibiting goods. But a unique feature of the case is that the goods in the glass case rest upon a sliding bottom with a back attached, similar to a drawer, and this slips out the same as the drawers. The back to the sliding bottom serves for the door to the show case. The cases aggregate 60 feet in length and were designed by J. M. Bennett, of the company.

The rehearing in the case of Abraham Cohen, insolvent, St. Paul, before the referee in bankruptcy, has been continued until Feb. 21. The schedule of assets and liabilities is made up and is as follows: Assets up to Aug. 1: Merchandise, \$9,337; pledges, \$1,256; open accounts, \$250; cash, \$400; total, \$11,243. After Aug. 1: Pledges, \$300; merchandise, \$28,865.14; borrowed from bank, \$1,500; sales, \$10,393.34; total, \$50,306.48. Liabilities: Store expenses, \$4,556; family expenses, \$3,810; diamonds, \$2,083.17; merchandise, \$5,013.92; on hand, \$8,551; bills, \$501; total, \$24,515. Balance on hand, \$25,791.39. Mr. Cohen names a number of well known men in the jewelry business in St. Paul, who, he alleges, have won money from him at poker, at which he places his losses to the amount of \$5,000. Other items that escaped his memory were: Theatre going, \$200; drinks, \$100; lost on election bets, \$150.

Among the retailers in the Twin Cities from the country the past week were: Fred. Willman, Stillwater, Minn.; J. C. Hamill, Farmington, Minn.; Albert Aslesen, Dawson, Minn.; M. M. Zimmern.

\$1000 A YEAR FOR LIFE.

A thorough investigation will convince you that \$12.50 per month invested for six years in the Montezuma Plantation will give you an income of \$1,000 for life. It will convince you that the enterprise is

NOT A SPECULATION

but a solid, conservative investment, in which the organizers, to make their profit, must make a success for the investors. The plantation consists of 6,000 acres and is being planted to sugar and rubber.

The interest of one is the interest of all and each shareholder has only one vote—impossible to freeze out.

The Mexican Coffee and Rubber Growers' Association manages the plantation for 25 years. The mercantile agencies will tell you that it has \$5,000,000 capital and \$4,000,000 assets, including its own steamboats.

SIX PER CENT. GUARANTEED FOR SIX YEARS.

To investors who pay all cash the Association guarantees six per cent. for six years and the Chicago Title and Trust Co. agrees to pay it, which makes it as sure as the interest on a Government bond. The Trust Co., capital \$1,500,000, also holds the title to the land and receives every dollar paid by the investors.

Not one of all the authorities on the planet places the profit on rubber and sugar at less than 50 per cent.—most all at 100 to 200.

Sir Thomas Lipton says:

"For sure, large and permanent returns nothing equals a well managed tropical plantation."

Russell Sage says:

"If I were a younger man I would invest my money in a rubber plantation, as it is better than a bank. Spreckles is making millions from his sugar plantation in Hawaii."

You can invest as little as \$2.50 per month. The shares are non-forfeitable after three years' payment. If the investor dies the amount paid will be returned. The members annually elect an inspector to visit the land and excursions will be conducted. Many Chicago business and professional men have taken shares and indorsed this enterprise. We invite the most rigid investigation. Write for literature.

TRADE CONDITIONS.

There is still a quietness in jewelry circles. Something, however, is always doing, but only enough to give the jewelers a little encouragement. Notwithstanding that business is slow there has been more doing up to the present time this month than last year for the same period.

Few nearby jewelers were in town the past week. The names of those are: M. G. Wolff, Chester, Ill.; Wm. Brazeale, Pacific, Mo.

Joseph McKenna, manager of the material department of Bauman-Massa Jewelry Co., is still very ill with pneumonia and grip. He was sent a menu card of the jewelers' banquet and a valentine.

Adolph Jacobs, aged 65 years, died here, Feb. 10, and was buried from his residence, 4110 Maryland Ave., on the following Tuesday. Mr. Jacobs will be remembered by the older members of the jewelry trade as managing partner of M. Eisenstadt & Co. from 1863 to 1883, when he left the jewelry business and went into the insurance business. He was an uncle of Samuel and Morris Eisenstadt, of the Eisenstadt Mfg. Co., Holland building.

Word comes from Joplin, Mo., that \$1,000 worth of jewelry belonging to E. S. Haines has just been recovered in Aurora, Ill. Mr. Haines's jewelry store in Joplin was burglarized in December, 1899, and no trace was ever found of the goods taken, until a Mrs. Pierce brought suit to replevin some jewelry from the chief of police of Aurora, Ill. This caused so much notoriety that Mr. Haines heard of it, and at once identified the property. Mrs. Pierce is supposed to be a member of a notorious gang of crooks who operated through the mining district in 1899.

A. J. Frank, a Chicago optician, visited Orange Springs, Fla., last week, on a business trip.

Pacific Northwest.

Mr. Shephers, jeweler, Cambridge, was a visitor at Weiser, Idaho, last week.

The house of A. Peterson, jeweler, Vancouver, B. C., was recently robbed of jewelry to the amount of \$300.

Ike Lurie, jeweler, Seattle, Wash., contemplates the erection of a handsome residence on his property at Seattle.

J. D. Bennett, jeweler, after doing business at Lostine, Ore., for the past two years, left for Redwood City, Cal., last week.

William Siegrist, Hillsboro, Ore., has formed a partnership with his brother and they will conduct a business at Chehalis, Wash.

Gardner & Davis, conducting a jewelry business at Union, Ore., have dissolved partnership by mutual consent. A. N. Gardner will continue in the jewelry business.

C. E. Luthy, jeweler, Rexburg, Idaho, offers a ring as a prize for the best display advertisement written by a student attending the Academy or the district school.

The fire department was, last week, called out to extinguish a small blaze in Otto Dufner's jewelry store, Astoria, Ore. Prompt action quelled the fire before serious damage was done.

A leading social event recently at Olympia, Wash., was the wedding of L. L. Berens, jeweler, of New Whatcom, and Miss Ada Caldwell, of Olympia. Mr. and Mrs. Berens left for a trip to Spokane, and on their return will make their home at New Whatcom, Wash.

P. E. Kern, located at Broadway and Fifth Ave., Skagway, Alaska, is one of the leading jewelers and has one of the largest and finest stores of its kind in Alaska. Mr. Kern has been in the jewelry business for nearly 20 years, most of that time being spent in El Paso, Tex., where he had a large establishment. Mr. Kern now employs five men in his manufacturing department alone. On a trip down the Yukon to Dawson, last season, this jeweler secured many hundred dollars' worth of orders.

A. H. Mitchell, of Challoner & Mitchell, Victoria, B. C., has just left for an extended trip to Great Britain and Europe. It has become the established rule of this firm to send a representative every year to the principal jewelry trade centers in order to secure the best class of goods and the latest novelties. Mr. Mitchell while in London and on the Continent will arrange to have the goods shipped earlier than usual, so that the firm will receive them in Victoria in ample time for the season's trade.

J. Sharp will soon open a jewelry store at West Salem, Ill.

We manufacture the Largest and Best

F. H. NOBLE & CO., 103 State St., Chicago.

Kansas City.

H. F. Sloane has returned from Wichita, Kan.

H. B. Carswell is designing the official spoon for the Nobles of the Mystic Shrine.

C. S. Raymond Sons have opened their store again and are continuing their auction.

The Meyer Jewelry Co. are selling a great many of the small gold plated "Nation" hatchets. They expect a large trade from Kansas.

R. H. Morehouse, formerly in business at Council Grove, Kan., is now in the employ of D. D. Williams, of Emporia, Kan., as optician and watchmaker.

The Jaccard Jewelry Co. are designing and manufacturing the pins for the Westport High School. They resemble the shape of a *fleur-de-lis* and are of gold with green enamel.

Walter Sperling, Seneca, Kan., while visiting in St. Louis, last week, was summoned to Warrensburg, Mo., by the serious illness of his mother, reaching there several days before her death. He stopped over in Kansas City on his return from the funeral.

In the Jan. 29 issue of THE CIRCULAR—WEEKLY an item was published in regard to a button designed for the Mystic Shrine by H. B. Carswell. Since that date Mr. Carswell has received a number of communications regarding it, one letter coming from Toronto, Can., which was dated Feb. 5.

George A. Bullard, who took the Kansas City branch of the firm of Bullard & Moore, who dissolved partnership, Feb. 1, is conducting business under the name of

the Bullard Button Co., and is located at 1131 Grand Ave. The Bullard Co. have issued a handsome new catalogue, showing their new lines of goods, with the different styles of rims and frames.

The merchants who called on the local trade last week were: A. Manifold, Leroy, Kan.; H. A. Tibbals, Oskaloosa; O. C. Shull, Fulton, Kan.; C. H. Van Kirk, Odell, Mo.; Walter Sperling, Seneca, Kan.; John T. Rhodes, Oskaloosa, Kan.; H. P. Hall, Carthage, Mo.; C. C. Stevenson, Pittsburg, Kan.; C. A. Clement, Springfield, Mo.; B. Hoffman, Leavenworth, Kan.; J. M. Coffman, Polo, Mo.; W. F. Suppe, Galena, Kan.; J. T. Gallagher, Knobnoster, Mo.; J. O. Van Voorhies, Osawatimie, Kan.; J. F. Long, Lamar, Mo.; the junior partner of R. Grammer & Son, and Fred Essig, Plattsburg, Mo.

Indianapolis.

H. A. Comstock has just completed his annual February inventory of stock.

N. L. Sanders succeeds J. L. Ackerman, Monon, Ind., in the jewelry business.

Feb. 11, Sam Thalls was called to Hagerstown, Ind., by the death of his father.

John Dyer, who is associated with his father, George G. Dyer, in the manufacturing jewelry business, has recently been appointed assistant instructor at the Y. M. C. A. gymnasium.

Henry Schergens is forced to leave his old location, 301 E. Washington St., by the erection of a large block on the old site. His move will be only until the new block is finished.

Established in 1880.

The guarantee of the CROWN and LION cases means that a brand-new case of the same grade will be given free of charge for any Crown or Lion case that fails to wear the full guaranteed period.

THE TRIUMPH
—OF—
CROWN and LION CASES

in 1900 has spurred the makers to still greater efforts, and they start the new year and century with a magnificent new line and an unprecedented variety of styles and patterns.

There are no makes of filled cases now on the market so firmly or justly fixed in trade favor. Salability and satisfaction given have placed them first in quick-selling, profit-making staple stocks.

SOLD BY ALL LEADING JOBBERS.

That this department shall prove mutually beneficial to our readers, it is desirable that the members of the trade generally communicate with THE JEWELERS' CIRCULAR-WEEKLY regarding any advantageous device or plan that they are utilizing in connection with their business.

PRIZE ESSAY COMPETITION, NO. 2.

SUBJECT:

"How to Treat Customers - How to Sell."

Notice to Competing Essayists.

The essays in Competition No. 3, "How to Foster Spring Trade," will be printed at conclusion of Competition No. 2 essays.

JEWELERS' IDEAS AND SCHEMES.

The prize offered by C. E. Willson, Deekertown, N. J., to persons writing the sentence, "Eyes tested free at Willson's," the most times on a postal card, was awarded to A. W. Bedell, who succeeded in getting 1,000 sentences on an ordinary postal card. The prize was a pair of gold frame spectacles. The second prize, a pair of aluminium frame spectacles, was awarded to J. B. Kimber, who wrote the sentence 428 times.

C. E. Riddeford, New Milford, Conn., has placed a handsome eight-day clock in the Probate office.

P. C. Krouse & Co., Columbus, O., have an attractive window display. It is in the form of a small Ferris Wheel, turned by an electric motor. On the top and sides of the cars are fastened diamond jewelry of various kinds, each being brought to view in turn by a revolution of the wheel.

Feb. 1 J. C. Walk & Son, Indianapolis, Ind., began their annual "spoon" sale.

Arthur Levy, New Brunswick, N. J., has had placed in his show window two "magic lamps," of 100-candle power each. They generate their own gas from gasoline and give a bright and steady light.

LEGAL NOTES.

The parties to a written contract have power to reform it, so as to correct a mutual mistake, without any new consideration passing between them, whether the mistake was as to the legal effect of the writing as it originally stood, or was caused by the accidental omission of words which they intended it to contain.

The test as to whether a promise is direct or collateral is whether the credit was given to the person making the promise or to a third person.

IT is often urged against writings like this that they profess to teach what can only be acquired by practical experience. Reflection upon this objection induced me to write on this subject and I trust I may be pardoned for dissenting from such criticism. The art of how to treat customers and sell is, like the science of chemistry, something which must, of course, stand the test of actual practice, but it is as true of the one as of the other that it is based on comprehensible facts which may be set forth in print.

The whole philosophy of how to treat customers is politeness, and the first qualification of a salesman is the basis of all true politeness, kindness. All politeness should be real and from the heart. If you constantly strive to reason away your prejudice against people, you will become ultimately polite. Most of our dislikes have very little foundation. A large proportion of them spring from idle gossip, from fancied slights or from trials to our temper which we could very easily forgive were it really our interest to do so. But it is always to our interest to keep on the best terms with every one. To do this one must maintain a watch over his or her temper and suffer no opportunity to escape, however trifling, of gratifying others. If kindness of heart be the first requisite in politeness, it is quite as true that assiduity is not less needed. Let the memory be on the alert to recall everything which may be agreeable or serviceable to those with whom you come in contact and keep your eyes and ears open to seize the opportunity for the performance of any friendly office, no matter how trifling. Politeness, be it remembered, includes polish, elegance, ease and gracefulness of manner united with a desire to please others and a careful attention to their wants and wishes. By remembering all the instances of true politeness, devoid of a desire to display, which fall under your notice and by applying them you will soon become graceful in manner. Begin by strictly observing all the little courtesies of thanks, salutations, offering places, handing chairs, paying deserved compliments, and, in fact, by rendering services and attentions to all people at all times that are proper and fit. Do not neglect anything of this kind even to a person for whom you care very little, nor say to yourself: "He will never know it if I neglect it."

Bear continually in mind the fact that

in selling goods the secret of success lies not so much in knowing what to say, as in what to avoid saying. Every man or woman of ordinary intelligence can, by resolutely acquiring information and striving to impart it in correct language, become a fair talker. But to sell on your merits, it is necessary to influence the minds of others. You must establish a genial and sympathetic tone between yourself and your customer, so that in the end he may retain the conviction that you have said nothing which sober second thought would disapprove or to which he would recur with doubt. To do this is always in one's power. It consists in following vigorously the simple rule: Those please most who offend the least. Whenever you meet with a man or woman who seems to want to do all the talking, bear patiently with him or her and content yourself with the method of Sir Walter Scott, which was to direct the conversation to subjects on which he or she can give you useful information, and limit yourself to an occasional remark, which you will have time to render piquant and which, if apropos, will make an impression.

Patience is the first of all the social virtues, but silence is her most useful handmaid. And though you are a Job by nature, you will seldom take part in a conversation in which these two qualities may not aid you. It would be well if every one would once a day reflect on the proverb to the effect that we seldom get into trouble by saying too little but very often by saying too much. I can safely say that in reviewing my own knowledge on this subject I find that those who made the biggest sales and produced the most favorable impression on all were men and women who indicated the possession of great patience. No degree of brilliance or of knowledge will impress well bred people with a sense of superiority at all comparable to that which is awakened by patience and self-command. It is the true basis of the *savoir faire*, or knowing how to act correctly under all circumstances, which is the whole art of being a man of the world. In connection with this there is an accomplishment of very great importance, which is generally regarded as being entirely a natural gift. I refer to tact, to that judicious employment of our powers just at the right time. The most certain means of acquiring this quality is

WING and HENT ST. JEWELERS

ADVICE AND CRITICISM ON RETAIL JEWELERS' ADVERTISING.

[This department is free to every retail jeweler and optician. Forward for criticism your newspaper ads, booklets, catalogues, novelties, circulars, etc. Ask advice and offer suggestions. Replies in these columns are unbiased. Make letters full and particular as desirable. Every letter and ad. sent will receive full attention, though the publication of the matter may sometimes be delayed some weeks. Address all letters and other matters to The Jewelers' Circular Pub. Co., 11 John St., corner Broadway, New York.]

STAUNTON, Va., Jan. 26, 1901.

Editor of THE JEWELERS' CIRCULAR-WEEKLY:

We enclose you an ad. that appeared in our local daily paper. Do you approve of the style? Foxy Quiller, a comedian, recently appeared in this city in "The Highwayman," a comic opera, and his expressions were on the tongues of every one who attended the performance. That's what prompted us to insert this style of an ad.

Yours very truly,

SWITZER & GRUBERT.

The advertisement that Switzer & Grubert send might, in a comparatively small community like Staunton, Va., where a large part of the populace might attend a popular comedian's performance, prove effective. In a large city it would have little meaning, as those readers of the advertisement who would understand the references made in it would be but a small percentage of the number of people under whose eye the advertisement would appear. However, the advertisement itself is quite a telling one and calculated to increase the work in the repair department of this jewelry firm's store.

The larger advertisement appearing on this page is a reproduction of that appearing upon a blotter issued by F. C. Billups, Marion, Ind., and is reproduced as a specimen of good display composition. Again, the

goods." The advertisement is calculated to keep trade in his town.

"I'll have my watch repaired at Switzer & Grubert's," says

Foxy Quiller

after trying to make it run by oiling it with soft soap.

That's supposed to be a joke, but our aim is to call your attention to our watch repairing department. Don't take your watch to a tinker or an inexperienced person. It's too valuable a piece of mechanism and you can't afford to have it ruined. Bring it to us, where our work has stood the test of time. Only expert work done here and our charges are no more than the tinker. With us you run no risk—it's to our interest to have it right.

SWITZER & GRUBERT,
Jewelers and Opticians.

Our esteemed Paris contemporary, *Le Diamant*, says in a recent issue: "We thank

to very strictly adhere to the rule of doing as you would be done by at all times. And with this I may urge to neglect nothing that can possibly please. A thousand nameless little things, which nobody can describe but which everybody feels, conspire to form that whole of pleasing, as the several pieces of a mosaic, though separately of little beauty or value, when properly joined form beautiful figures which please everybody. A look, a gesture, an attitude, a tone of voice, all bear their part in the great work of pleasing. The art of pleasing is more necessary in selling goods than perhaps in any other vocation. It is in truth the first half of the business, for if you do not please the firm you are sent to, you will be of very little use to the firm you are sent from. Please the eyes and the ears; they will introduce you to the heart and nine times in 10, the heart governs the understanding.

I trust that the reader will not regard these remarks as the mere commonplace of morality. They are matters of sound common sense and their application gives the best possible basis for forming an elegant man or woman of the world, of the type which is now becoming most admired and respected.

To Keep Files Clean.—The pesky, uneven working of a file is known to be due to the fact that filings clog the teeth of the file, in such a manner as to be difficult of removal. To obviate this evil, it is recommended to go over the files well with the scratch brush before use, and then to grease them with olive oil. A file prepared in this

NOTE—Under this department, all matters of a technical or of a news character bearing upon the optical branch of the jewelry industry will be considered. Address communications to The Jewelers' Circular Pub. Co., 11 John St., New York.

OPERA GLASSES AND THE EYES. THE following item is taken from the New York Sun:

"The most prolific source of weak eyes among young people, particularly young women, is poor opera glasses," said an optician. "The havoc that defective instruments are creating among the eyes of the theatre-going population is a condition that is really worth while viewing with alarm. Never before were there so many cheap glasses on the market as at the present time. Everybody who patronizes the playhouses must have glasses, and as the good lenses are expensive the majority of people satisfy themselves with the cheaper grade.

"This is a great mistake. Far better would it be to view the stage with the naked eye, no matter what the distance from the footlights. A poor glass blurs the objects on the stage instead of rendering them distinct, and the effort to produce order out of this chaotic vision strains the eye and works irreparable mischief.

"Even at a short distance either a good glass or none at all should be used, and the farther back one goes the stronger should be the optic power. Actually the reverse of this rule prevails, however, the glasses in the gallery being usually inferior to those in the orchestra chairs.

"It would be a blow to my trade but a blessing to the eyesight of the public if the Board of Health would establish the office of inspector of opera glasses and appoint thereto a competent and conscientious optician who would allow none but good glasses to pass into the hands of theatre patrons."

It is a little hard to discover at what the writer of the above or the optician he quotes is driving. If the article had ended with the recommendation of some specially constructed high class instrument of the opera glass variety, all would have been explained. In the absence of any specifications by which good opera glasses and poor ones can be distinguished, no motive appears, unless the optician is looking for an appointment as "State Inspector of Opera Glasses" with a fee of 10 cents for every instrument on which his label of approval appears. There can be no doubt that poor opera glasses are poor and good opera glasses are good, but that properly constructed opera glasses properly focused for the eyes that use them ever injure the eyes is a statement that will not bear inspection, whether the glasses need it or not. A poor opera glass—one that cannot be adjusted so as to focus the objects seen through it—is not really an opera glass and no one could use it to advantage. The writer of the quoted article gives his case away when he says: "Even at a short distance either a good glass or none at all

should be used, and the farther back one goes the stronger should be the optic power."

Cheap opera glasses constructed upon correct optical principles do not blur objects for near distances or far distances, but their power is weak and they may be constructed so faultily that they cannot be accurately adjusted for different distances, and for this reason—because they are incapable of serving the purpose of opera glasses—they will naturally have no market and cannot be profitably manufactured at any price.

The purpose of opera glasses is to give enlarged retinal images of the stage and the people and objects upon it. The distinctness of the images depends upon the proper adjustment of the lenses. The aberration of instruments of such low power is too insignificant in amount to make anything but the most ordinary lenses necessary. The principle upon which opera glasses are constructed is very simple. The forward lens is positive and usually of about half the power of the negative lens near the eye. The positive lens focuses the light from the stage at some posterior point. But between the lens and focus a negative lens intercepts and neutralizes the converging rays. They enter the eye as though coming from a distance, and the eye is able, if emmetropic, to focus them without accommodation. The effect of this arrangement of lenses is to lengthen the eye from something less than one inch to four or five inches. The images upon the retina are proportionately enlarged. The adjustment of the instrument consists of a mechanical means of increasing or decreasing the distance between the lenses. If the lenses are nearer the negative lens more than neutralizes the converging rays and causes them to become divergent. This stimulates the accommodation of the eye, or if the eyes are myopic it corrects such myopia. If the lenses are farther apart, the negative lens does not quite neutralize the convergence of the rays, and this tends to relax the accommodation or correct hyperopia. The adjustment should be such as to relax the accommodation to the fullest extent, and, therefore, the lenses should be separated as widely as possible without blurring the images.

The De Zeng refractometer, with which all opticians are familiar, is constructed precisely upon the principle of the opera

glass, and is used to measure hyperopia and myopia. The adjustment needed to give clear vision of distant type is measured and from such data the condition of the eye is accurately determined. It has also an attachment for imposing cylinders to correct astigmatism. The Cross retinoskiometer and dioptrimeter are constructed also upon the same principle, but with these differences: In the retino-skiameter, the observing optician watches the reflex instead of the subject viewing the object, and in both instruments the spherical lenses are the composites of two equal cross cylinders, so that one cylinder may be moved while the other is stationary, in this manner measuring astigmatism by the dioptric assistance required for different meridians of the eye.

In the use of opera glasses one should know that the lenses should be as widely separated as possible, so as to relax the ciliary muscle, though, of course, not to the extent of blurring the images. The amount of separation depends upon the eye, which becomes a part of the instrumentation by which the objects are seen distinctly. With enlarged images there should be no ciliary strain and there is, of course, with distinct images, no retinal strain, which might not be the case without the opera glasses. The glasses give muscular and nerve rest, both for motor and sensory nerves. It is impossible that this should be injurious. It is true it doesn't cultivate the powers of the eye, but one doesn't go to a theatre for that purpose, but to enjoy the diversion of the play. If the eyes are put at rest, the enjoyment is not lessened, but enhanced by ocular rest and ease. Opera glasses give such rest and ease in both directions, though the weaker glasses may not be sufficient for a distant observer. If not, his naked eyes certainly are not. The poorest or weakest opera glass in the market, if properly constructed—and it must be to be salable—provides desired help, though perhaps not enough of it. There is, therefore, no foundation for the squib taken from the *Sun* and a "State Inspector of Opera Glasses" would, to be of any real use to any one, have to open also "A School for the Instruction of the People in the Proper Use of Opera Glasses."

Max Maas has returned to Kansas City, Mo., from a trip to the east.

DIOPTRIC CONDITIONS OF THE EYE AND HOW TO DISCOVER AND MEASURE THEM.

[Commenced in issue of Feb. 13.]

EMMETROPIA.

MEASUREMENT OF EMMETROPIA.

The diagnosis of emmetropia is the determination of the fact of emmetropia by optometric measurement. It is as important to be able to diagnose emmetropia as any defective condition of the eyes. The methods of diagnosis are divided into the two great classes, subjective and objective. The subjective methods are those in which the question is determined whether, without accommodation, the retina has a clear image of the distant object by the person's power of vision. If visual acuity is normal we may depend upon the clearness with which the eye sees to determine the question, provided our subject is able to tell us what he sees, but otherwise we must use objective methods and determine the facts for ourselves. This is usually done with children or illiterates, and may be employed in all cases to corroborate subjective tests.

The chief methods of subjective testing are the trial lenses used in connection with the Snellen test type, and the use of instruments, chiefly the optometer, refractometer, dioptrimeter, prisoptometer, etc. Trial case testing is of chief importance in this connection, as it gives to the eyes the same conditions that they operate under when wearing the glasses, and the methods with instruments require the corroboration of the trial lenses to make the results certain. If an eye is emmetropic and is directed to the Snellen type 20 feet away, seeing all the letters down to and including the 20 line with clearness, and the patient can call off the letters, this shows normal visual acuity, but is not a proof of the emmetropia. If, however, in such position, a +.25D lens blurs the letters slightly, a +.50D lens blurs them more, etc., it is strong evidence of emmetropia. The plus lens imposed brings the focus forward of the retina, and since in emmetropia there is no accommodation for distance, no accommodation can be relaxed, and diffusion is inevitable with even the slightest plus. If diffusion and imperfect vision results from the use of plus spheres, under such circumstances, emmetropia is presumed to be the condition.

The optometer employs a plus lens and establishes an artificial far point beyond which nothing is seen distinctly. The dioptric values, or their lineal equivalents, are then established upon the basis of such artificial far point. In the refractometer or dioptrimeter, a sliding plus lens, with a neutralizing minus lens at the eye, so changes the curvature of incident waves at the eye, that precisely the required curvature can be obtained and is reduced to diopters upon the instrument. But this instrument cannot be used in connection

with the Snellen test type, in gauging vision, as it magnifies the letters. The amount of the magnification also varies for different positions of the moving lens, so that, as far as its literal nomenclature is concerned, it cannot be depended upon. With a +5D moving lens and a -10D stationary eye lens, with the former four inches forward of the latter, an emmetrope, or hyperope whose accommodation covered his hyperopia, would see the distant type distinctly. But an emmetrope would not see the distant letters distinctly if the moving lens were moved farther away. The prisoptometer shows emmetropia when the circular discs at the proper distance appear tangent to each other at all points.

These instruments and methods of diagnosis will be more fully considered under "hyperopia." The chief objective methods are by skiascopy and ophthalmometry. This does not include ophthalmoscopic measurements, as that instrument is but an indication or index of error, and not suitable for measurements, any opinion to the contrary being biased. The ophthalmometer does not, of course, measure spherical or symmetrical defects, but merely shows certain differences for different meridians. It will not, therefore, indicate, much less measure, emmetropia, myopia or hyperopia. Skiascopy is the most complete and valuable objective test. If an eye is emmetropic and a +1D lens is imposed before it, the accommodation will be fogged to that extent. If light is reflected to it from a plane retinoscope at one meter and the reflex is viewed from a point directly back of the mirror through the aperture, motion in the pupil will be neutral, for the point of reversal will be at the observing eye.

(To be continued.)

CORRECTION OF PRESBYOPIA.

OPTICIANS are so familiar with the rule to prescribe the highest plus lens a patient will accept, that they are apt to apply it to all cases whatsoever, even to presbyopes. The purpose of the rule in hyperopia is to relax the ciliary to the utmost for distant vision, thus relieving it of constant contraction or strain, and adding so much to the amplitude of accommodation for near vision. In presbyopia, where a plus lens is given for the mere purpose of assisting the eye for near vision by a lens that will do a part of the work the accommodation has done before, and which it has become incapable of doing, the rule should be reversed and the weakest plus lens that will give comfortable near vision should be prescribed.

Too many opticians and oculists are unacquainted with this reversal of the rule and the reason for it, and are, therefore, apt to give a too strong presbyopic correction. We may illustrate the rule in the case of a presbyope of 50 years, whom we may also suppose to be a hyperope of 2 d. For the correction of the hyperopia a + 2 d. lens should be prescribed of course; but, having corrected the hyperopia fully, the increased plus correction for presbyopia should be the least possible for the pur-

pose. If the amplitude of accommodation is found to be 2.50 d.—which is about the amount usually left at the age of 50 years—and one-half of this amount can be used comfortably, which should be determined by test, it is a mistake to give more than + 1.25 d. addition, or + 3.25 d. in all, for the full correction of hyperopia and presbyopia. An under correction is preferable to an over correction, even though, on that account, the glasses require changing every two years or even every year.

As some opticians may be disposed to disagree with the above we will state our reasons. The accommodation, like every other muscular function, requires normal exercise. Without such exercise it degenerates or goes into premature dormancy. To over correct presbyopia is to compel the patient to hold his book or paper too near, or, by holding it at the usual distance, to relax the ciliary completely or at least take away the normal exercise which preserves it. He thus becomes very soon a complete presbyope, and if emmetropic or corrected for distance, has but two points of distinct vision—infinity and the point established by the glasses he wears. Outside of the two fixed points there is no range. Objects at all other points are seen dimly because the accommodation is without power to adjust the eye to them. You have given him, in place of his accommodative range, two points of distinct vision and only two.

The opposite of this course is indicated by the rule to prescribe the least plus for presbyopia possible. In connection with the rule it is possible for oculists to indicate a course of exercise for the accommodation that will preserve rather than accelerate the loss of accommodative power. This may be accomplished by daily exercise in ranging a card of printed matter from arm's length to the nearest point possible to distinguish the letters. It is surprising what a systematic and frequently repeated course of exercise will do in this direction. Massage, both with warm and cold water, in connection with the exercise, for the purpose of stimulating ocular circulation, may postpone presbyopia even a dozen years. We limit such work to oculists, for the reason that people would not usually pay attention to such recommendation unless it came from a medical adviser. The oculist would also be entitled to and would, probably, exact compensation for his services, while an optician would seem to be presumptuous and acting quite out of his field to pursue the same course. He can, however, adopt the rule laid down for the correction of presbyopia.

Constant wearers of eyeglasses, spectacles, etc., are much annoyed by the dimming of the glasses upon entering a warm room from a cooler place. It will greatly interest them to know that this evil can be obviated by rubbing the glasses with soft soap. All that is necessary is to rub every morning or before going out a little so-called green soap (washing soap, potash soap) over the whole surface of the glass, polishing it until it is bright again. The preparations, "Glasolin" and "Oculustro," offered for the same purpose at high prices, are nothing else than pure potash soap.—*Die Werkstatt.*

PART LXX.

Polariscopic (*po-lar-is-cop-ic*). [Latin, *polus* = a pole + Greek, *skopeo* = I see.] That which belongs to a polariscope.

Polariscopy (*po-lar-is-cop-y*). [Latin, *polus* = a pole + Greek, *skopeo* = I see.] The art of using the polariscope.

Polarization (*po-lar-iz-a-tion*). [Latin, *polus* = a pole.] The ability to form poles of intensity having opposite qualities. Chromatic Polarization is an act of forming poles of intensity but of opposite characters as displayed by colors. The polarization of light is the separation of the rays of light by both the vertical and horizontal planes, or two planes at right angles, in which the seven component parts of the sunlight are seen, viz.: violet, indigo, blue, green, yellow, orange and red.

Polarizer (*po-lar-i-zer*). [Latin, *polus* = a pole.] Nicol's prisms employed in a microscope for the purpose of polarizing the rays of light. The term, polarizer, is sometimes given to the second chamber of the polariscope.

Pole (*pole*). [Latin, *polus* = a pole.] The central point of a spherical lens.

Polemophthalmia (*pol-em-oph-thal'-mi-a*). [Greek, *polemos* = a war + *ophthalmos* = the eye.] A muco-purulent conjunctivitis which breaks out in the army.

Poly (*pol-y*). [Greek, *polus* = much] A Greek prefix denoting many.

Polychromatic (*pol-yeh-ro-mat'-ic*). [Greek, *polus* = much + *chroma* = a color.] Possessing many colors.

Polychromous (*pol-yeh-ro'-mous*). [Greek, *polus* = much + *chroma* = a color.] Made up of many colors.

Polycoria (*pol-yo-o'-ri-a*). [Greek, *polus* = much or many + *kore* = a pupil.] The presence of more than one pupil or aperture through the iris. Synonym: **Polykoria**.

Polydacria (*pol-yd-ac'-ri-a*). [Greek, *polus* = much or many + *dakruon* = a tear.] An excess of shedding tears.

Polykoria (*pol-yk-o'-ri-a*). [Greek, *polus* = much or many + *kore* = a pupil.] An iris through which are several apertures. Synonym: **Polycoria**.

Polymicroscope (*pol-ym-i'-cro-scope*). [Greek, *polus* = much or many + *mikros* = a small body + *skopeo* = I see.] A revolving microscope.

Polymicrotome (*pol-ym-i'-cro-tome*). [Greek, *polus* = much or many + *mikros* = a small body + *temnes* = I cut.] A microtome which will make many microscopical sections in a very short space of time.

Polyopia (*pol-y-o'-pi-a*). [Greek, *polus* = much or many + *opsis* = vision.] An eye in which several images are formed upon the retina. Synonym: **Polyopsia**.

Polyopsia (*pol-y-op'-si-a*). [Greek, *polus* = much or many + *opsis* = vision.] An abnormal condition of the eye in which there are several retinal impressions made. Synonym: **Polyopia**.

Polyphemous (*pol-yph-e'-mous*). [Greek, *polus* = much or many + *pheme* = a voice.] A single-eyed monster. Synonym: **A Cyclops**.

Polystichia (*pol-ys-tich'-i-a*). [Greek, *polus* = much or many + *stichos* = a row.] An eyelid upon which the eyelashes form in several rows.

Pop-eyed (*pop-eyed*). A large, protruding condition of the eyes. Synonym: **Exophthalmos**.

Porosis palpebrae (*po-ro'-sis pal-pe-brae*). [Greek, *poros* = a callus + Latin, *palpebra* = the lid.] A small, benign tumor the size of a pea, located within the lid, due to the pent up secretions of the meibomian glands. Synonym: **A Chalazion**.

(To be continued.)

Degrees for Opticians.

Arguments for and Against Granting Petition of the New England Optical Institute.

BOSTON, MASS., Feb. 12.—Before the members of the Committee on Education of the House of Representatives was heard to-day the arguments of prominent opticians of the State on the bill to authorize the New England Optical Institute to grant the degrees of Doctor of Physiological Optics (D.P.O.) and Bachelor of Optics (B.O.). There was a large attendance of opticians representing both the institute and the trade; indeed, there were so many that it became necessary to adjourn to a larger committee room.

The Hon. William B. Durant appeared for the petitioners and read extracts from the petition (printed in these columns recently). Mr. Durant then offered two amendments, one to require that the student shall complete a two years' course of study, and the second providing a penalty for the use of titles of "Doctor" or "M.D." without the addition of the words "of Physiological Optics," unless duly authorized by law so to do. He outlined the progress of the optician from the early days of the fitting of glasses and also the work that is done by the New England Optical Institute, putting in the prospectus books and list of courses used at the institute.

Mr. Durant stated that 90 per cent. of the people of the commonwealth procure their glasses from opticians rather than from oculists. Exact science, therefore, is necessary for the optician, and this school is not for the treating of disease. The trained optician has two spheres of work, the filling of the prescriptions of the oculist and the fitting of glasses for the 90 per cent. of the people referred to above.

The witnesses for the bill made their plea from an educational standpoint, urging that it would be a protection to the public and a great power in raising the standard of the profession throughout the State. They put in a strong plea, and many present in favor of the bill were not beard on account of lack of time.

Dr. William A. Earle, president of the New England Optical Institute, thought that the whole question was whether or not education is to be encouraged. Dr. Earle said that a large percentage of the people cannot afford to go to an oculist for an examination and then go to an optician for the purpose of getting a prescription filled. Another advantage is found in the fact that oculists do not settle in small towns where the optician does all the fitting of glasses. There is no other school in the country on the plan of the New England Institute, and no other opportunity for the imparting of knowledge such as the institute purposes is afforded. Dr. Earle outlined at considerable length the courses of the school and the work of the students. He brought out the fact that the graduates of the school will in no way practice medicine.

Dr. Franklin T. Kirt, of the staff of instructors of the institute, was the next witness. He thought there might be three classes of objectors; first, the class that advertises in the daily papers; second, the opticians who do no refracting but merely fill the prescriptions of the oculists; third, the members of the medical profession, who may fear that another class of quacks is about to be launched on the market. The first two he dismissed briefly. To the last class he addressed himself. Incidentally he remarked that in the Harvard Medical

[Continued from page 58.]

School and the Medical School of the University of Pennsylvania there is not a single course of mathematics or physics, showing plainly that these great institutions had no idea of turning out opticians.

Albert G. Barber, manager of the Globe Optical Co., Boston, thought that the institute filled a long-felt want. He said that the majority of opticians gain their knowledge by picking it up in the best way that they can.

William L. Thomas, a student in the institute and an employe of John W. Sanborn & Co., opticians, Boston, was called upon to tell how he had gained his optical education before entering the institute. He said that his education was obtained in the usual way, by observing experts in the business and by picking up knowledge by practice and study. He thought that the institution was particularly valuable to him in perfecting his chosen line of work.

A strong opposition was made, and this was not unexpected by those who are working for the passage of the bill. The first came from some of the opticians of Boston, who claimed simply to fill the prescriptions of oculists, and the second from physicians. Some of the opticians took the ground that the public would go to men who had a title tacked onto their names, although the opticians would be fully as capable of filling prescriptions, as they have been in the past.

Dr. David W. Cheever, a prominent Boston physician, thought it injudicious for people to fit glasses and treat the eyes unless they have a thorough medical training. He thought it unsafe for the optician to fit glasses unless he has this training. He admitted that it is desirable for the optician to have all the education in his business that is possible, and it is also better to have the two years' training at the institute than to pick up education in the best way possible. He thought the course too brief and not sufficiently thorough.

Dr. F. W. Draper, president of the Massachusetts Medical Society, appeared for that organization in opposition to the bill. He stated that there is no public demand for the bill, and thought that the requests of the petitioners were audacious. Dr. Draper thought that the granting of the right to confer degrees would be establishing a dangerous precedent that the committee had no right to bequeath to their successors. He admitted that the second amendment relieved the bill of its worst features. He placed in the hands of the committee a large number of remonstrances from various parts of the State, including prominent hospitals.

Dr. T. M. Strong, president of the Homoeopathic Medical Society, was the last objector, representing the medical profession. His society, he stated, objected more to the use of the word "doctor" in the bill than to anything else.

The first witness for the opposition, for the opticians, was D. C. Coleman, of Andrew J. Lloyd & Co., Boston, and there was a lively "war of words" between him and the witnesses for the bill over the business of the opticians in Boston, bringing out the professional jealousy that exists in the city. Mr. Coleman stated that he represented nine-tenths of the opticians in Boston, and they were opposed to the bill. In reply to a question he stated that the whole matter is a fight between the opticians of Boston.

William F. Pinkham, of the optical firm of Pinkham & Smith, Boston, opposed the bill as an optician, saying that the optical business is a trade and not a profession. Both of these witnesses spoke exclusively from a commercial point of view.

Frank A. Hill, secretary of the State Board of Education, appeared in opposition, presenting a protest signed by all the members of the Board save one. His opposition was general, with a view of safeguarding the interests of the State.

Dr. Edwin B. Harvey, secretary of the Board of Registration in Medicine, thought that something should be done to regulate the optical business to the end that quacks, impostors and uneducated pretenders be driven out of the business. Dr. Harvey suggested the second amendment which was incorporated in the bill. He was the last witness heard, and the hearing was then adjourned.

The following remonstrances were presented, Wednesday, against the bill proposed by the New England Optical Institute: By Mr. Pettingill, Salisbury, Mass.; by S. W. Abbott and others; Francis W. Chadbourne and others; J. W. Courtney,

for the Boston Medico-Psychological Society, Maurice D. Clarke and others; W. G. Eaton, for the North Middlesex Medical Society; R. H. Fitz and others; Joseph Frame and others; Thomas H. Gage and others; J. E. Garland and others; Henry F. Hewes, for a section of the Massachusetts Medical Society; Charles P. Hooker and others; Frank F. Paddock and others; George L. Richards and others; Walter F. Sawyer and others; George A. Stickney and others; and Charles H. Williams, for the Boston Society for Medical Improvement.

The report of the committee is expected within a few days, and the result will be awaited with considerable interest by opticians in all parts of New England, and to a certain extent throughout the country.

Monthly Meeting of the Optical Society of the City of New York.

The Optical Society of the City of New York held their February meeting at the Fifth Avenue Hotel, Wednesday evening. An interesting lecture on "Cylindrical Lenses" was delivered by Prof. William Fox and received appreciative applause at the close.

L. L. Ferguson, chairman of the committee on legislation appointed at the previous meeting to represent the Society at the hearing on the Bell bill at Albany, reported that the committee attended the hearing and that an amendment had been offered, which, if accepted, would suffice to protect the interests of the opticians. Mr. Ferguson advised all opticians to keep a close watch on the doings at Albany in

this matter, because of that old truism about slips 'twixt cup and lip, and to communicate directly with district Assemblymen, if necessary. The committee were discharged with a vote of thanks.

The matter of encouraging original work with the pen was discussed by the Society. It was voted to offer a prize of \$5 to the optician who writes the best original paper of optical interest. The contest is open to all opticians of the United States. The papers will be read at meetings of the Society, by the authors or someone else, and then voted upon. Papers may be sent to secretary M. H. Harris, 142 W. 23d St., New York.

Meeting of the New England Association of Opticians.

The regular monthly meeting of the New England Association of Opticians was held on the evening of Feb. 19, at Young's hotel, Boston, Mass. The address of the occasion was delivered by William P. McEvoy, of the Globe Optical Co., who took for his subject, "The Fitting and Bending of Frames." At the completion of the address there was the usual informal discussion.

Optician Fuller, of Springfield, Mass., who has been examining the eyes of the Westfield school children, under directions from the school committee, finds that about 15 per cent. of the pupils have defective vision.

The Uniontown Drug Store, Uniontown, Ala., has put in a stock of optical goods.

S. Slonim has opened a jewelry and optical establishment at 35 Church St., New Brunswick, N. J.

A. N. Sanford, optician, has opened offices on the second floor of the Boston building, Honolulu, Hawaii.

H. B. Graves, secretary and treasurer of the Standard Optical Co., was a visitor in Philadelphia, Pa., last Friday.

A. H. Hunter, from New Hampshire, is engaged with Heeren Bros. & Co., Pittsburgh, Pa., in their optical department.

Mr. Moore, representative of the Bausch & Lomb Optical Co., called on the Kansas City, Mo., trade last week.

Elwood Riggs, manager of the Columbian Optical Co., Kansas City, Mo., has returned from a business trip to Kansas.

C. H. Burnham, of Lancaster, N. H., was in Berlin, N. H., a few days ago, with a view of locating there in the optical business.

W. A. Myer, representing F. C. Chinn, Sacramento, Cal., has opened temporary quarters in the Odd Fellows' building, Colusa, Cal.

George H. Clark, until recently with C. E. Woodbury, New Bedford, Mass., is now with the Globe Optical Co., 403 Washington St., Boston, Mass.

Harrison Crapp has resigned his position as manager of the optical department of N. Snellenburg & Co.'s store, 12th and Market Sts., Philadelphia, Pa.

B. A. Sutherland has bought out the grinding plant owned by the Southern Optical Co., Charlotte, N. C., and has sent out a neat circular to that effect.

E. D. Gould, optician, 521 Adams St., Toledo, O., left for New York, the first of last week, in the interest of his optical plant, which will shortly be increased to double its present size.

George Harris, Wardner, Idaho, has received a letter from A. P. Winslow, in which he states that he has graduated as an optician since he left Wardner. He is at Ferndale, Cal.

Mitchell Smith, Baker City, Ore., has constructed a dark room in his store for the examination of eyes by the skiascopic method, and has engaged the services of a graduate optician.

The stockholders of the Spencer Optical Mfg. Co., 15 Maiden Lane, New York, held their annual meeting, Wednesday last. Re-election of all the former officers of the company resulted.

George Beale, a well known Philadelphia, Pa., optician, has been chosen coach of the basket ball team of the Central High School, a game at which Mr. Beale is adjudged an expert.

The Twin City Case Co. have been opened for business at 3032 Pillsbury Ave., Minneapolis, Minn., for the manufacture of spectacle and eyeglass cases and for gold lettering. W. A. Noble is the manager.

Lula M. Lasley is conducting a very successful optical business in connection with her father's jewelry business at Advance, Ind. She recently finished a thorough course in optics.

S. Stern, optician, Kingston, N. Y., has received word that his father died in Europe on Jan. 12. The deceased was 102 years old. His widow survives him. The couple had been married over 67 years.

D. C. Prudden, the well known Kansas City, Mo., optician, has returned from a business trip to Chicago, where he was the guest of his old friend, Jack Hardin, vice-president of F. A. Hardy & Co.

E. J. Foy, Great Bend, Kan.; Dr. A. F. Zimmerman, Warrensburg, Mo.; J. H. Whiteside, Liberty, Mo., and Dr. Axtell, of Axtell & Abbey, Newton, Kan., called on the wholesale opticians of Kansas City, Mo., last week.

Elmer E. Searles, formerly with the Southbridge Optical Co., Southbridge, Mass., has entered the employ of the American Optical Co. Miss Belle Cooper has entered the employ of the American Optical Co. in their office.

A. I. Agnew, manager of the Columbian Optical Co., Omaha, Neb., spent last week in Denver, Col., and Salt Lake City, Utah, visiting their branches in those cities. It is expected he will visit the Kansas City, Mo., branch on his return.

Frank A. Cady, a respected citizen of Southbridge, Mass., for many years, died, last week, at the age of 64 years. Mr. Cady was born in Woodstock, Conn., but went to Southbridge at an early age, and lived there since. For over 20 years he was a mechanic for the American Optical Co.

A. N. Sumerlin, optician, for the past five years in the Wonderly block, Grand Rapids, Mich., has leased the store, 6 Canal St., and has opened in his new location with a line of optical goods. Mr. Sumerlin is a graduate of the McCormick Optical College, Chicago.

Dr. Javal, a member of the Paris Academy of Medicine and director of the Sorbonne-Ophthalmological laboratory, has been promoted to the highest rank in the French Legion of Honor and decorated with the black eagle. Dr. Javal, who has done so much to cure blindness, has been totally blind himself for 12 years. Although over 60 years old, he continues his scientific work and is recognized as one of the foremost eye specialists in the world.

Dr. Frank Van Fleet, chairman of the committee on legislation of the Medical Society of the State of New York, and also chairman of the board of censors of the Medical Society of the County of New York, makes a public statement concerning the attitude of the medical organizations towards Assembly bill No. 167, which has been opposed by the opticians. Dr. Van Fleet says:

"The bill under consideration was objected to, in the beginning, by manufacturers of proprietary articles, opticians and others, who claimed that its enactment would prevent a person recommending a friend to take some simple and harmless remedy, and would also interfere with the sale of patent medicines, in this way interfering with newspaper advertising of such articles. The framers of the bill had no such intention in framing the measure and agreed to alter the phraseology. This has been done. * * * The legitimate business of the optician will not be interfered with in any way. All these objections have been withdrawn.

"This bill is designed to give an increased and necessary protection to the public. * * *

"Christian scientists, osteopaths, hydropaths and others who treat disease by peculiar methods will have to comply with the law. * * * We only insist that every person who treats disease shall demonstrate to the State Board of Medical Examiners their ability to tell that a disease exists; how to differentiate the disease which may exist and then the matter of treatment must be left to individual judgment."

Mace B. Short, of the Bay State Optical Co., Attleboro, Mass., celebrated in a modest manner the 74th anniversary of his birth, last Friday. He has been one of the active and useful men of that section for very many years. He is a descendant of the pioneer settlers who built up the strong foundations of the prosperous jewelry district. Mr. Short first learned the trade of cotton milling, and in the old Dodge factory in Attleboro worked his way from picker to overseer of the plant. After 11 years of this work, he selected the jewelry business as a life work, and under Ira Richards he learned the trade. He left that house to join Sturdy & Bradford, and continued with them until just after the civil war. Then, with Peter Nerney, he formed the firm of Short & Nerney, the two being joined in 1876 by the late James J. Horton. In 1897, the jewelry lines were all dropped and the metal parts of optical goods became their specialty. They followed it immediately by installing a lens department and making optical goods complete, being the first factory for the purpose in the southern half of the State. The change of line led to a change of name, and the Bay State Optical Co. became their appellation.

B. A. Marsden, who was so dangerously injured in the wreck on the Erie Railroad near Meadville, Pa., Feb. 7, is a traveling salesman for D. V. Brown, wholesale optician, 738-40 Sansom St., Philadelphia, Pa., and is affectionately known to almost every optician in Pennsylvania, New Jersey and Ohio as "Ben" Marsden. Dispatches received from the hospital in Meadville indicate that this popular young salesman will eventually recover. Mr. Marsden was badly crushed in the wreck—in which three were killed outright and over a dozen more or less dangerously injured. He has been on the road for D. V. Brown for the last five years. He had boarded the train at Meadville, Pa., for Youngstown, O., and occupied a seat in the smoker when the train was derailed while turning a curve. The cars behind the smoker were "telescoped" and nearly all the passengers in the smoking car were pinned under the wreck. Although himself badly crushed Marsden insisted that all the others be removed from the car by the rescuing parties before he would accept their assistance. As soon as he was removed from the train Marsden lapsed into unconsciousness and remained in that state for nearly 24 hours. F. E. Van Patton, optician, Meadville, the last customer to whom Marsden had sold a bill of goods, at once wired to Mr. Brown and the latter, accompanied by Marsden's mother, left the same evening for Meadville.

The well known jewelry store of George H. Johnston, West Branch, Mich., will in future be conducted by Johnston & McKay, the new member of the firm being Alex. McKay, who has been employed by Mr. Johnston for the last five years.

BUYERS' INFORMATION BUREAU.

Questions as to the makers of certain lines of goods, where to buy certain lines, where certain kinds of work are done, the owners of certain trade-marks and other matters relating to the buying branch of a jewelry business will be cheerfully answered under this department. The reader cannot ask too many questions. *All queries received are also answered promptly by mail.*

POTTSVILLE, Pa., Feb. 4, 1901.

Editor of THE JEWELERS' CIRCULAR—WEEKLY:

Kindly send the name and address of manufacturer making Mexican filigree handle flat ware in sterling.

Respectfully,

R. C. GREEN'S SONS.

ANSWER:—W. G. Walz Co., El Paso, Tex., make such goods.

JERMYN, Pa., Feb. 6, 1901.

Editor of THE JEWELERS' CIRCULAR—WEEKLY:

Kindly give me the factory address of the Ansonia Clock Co. and Welch Clock Co.

Yours respectfully,

JOHN FORSCHNER.

ANSWER:—The Ansonia Clock Co.'s factory is in Brooklyn, New York, and the E. N. Welch Mfg. Co.'s factory is in For-estville, Conn.

BLACK ROCK, Ark., Feb. 4, 1901.

Editor of THE JEWELERS' CIRCULAR—WEEKLY:

I want to get the address of people who make diving suits.

Very truly,

W. D. BURD.

ANSWER:—A. Schrader's Son, 32 Rose St., New York.

DANVERS, Mass., Jan. 28, 1901.

Editor of THE JEWELERS' CIRCULAR—WEEKLY:

I am thinking of going on the road with a grip of watchmakers' tools and material. I want to buy at jobbers' prices. To whom shall I apply? Can you give me the address of a manufacturer who makes all kinds of balance staffs and jewels for American watches?

MASSACHUSETTS.

ANSWER:—We refer correspondent to Hammel, Riglander & Co., 35 Maiden Lane; Sussfeld, Lorsch & Co., 37 Maiden Lane; Cross & Beguelin, 17 Maiden Lane, all of New York.

SARATOGA SPRINGS, N. Y., Feb. 7, 1901.

Editor of THE JEWELERS' CIRCULAR—WEEKLY:

Will you kindly advise me by whom the domestic Chippendale furniture is made? and oblige,

Yours very truly,

CHARLES A. LEE.

ANSWER:—Address Aimone Mfg. Co., 430 E. 23d St., and Zucchi & Larezzo, 511 W. 30th St., both of New York.

BRIDGEPORT, Conn., Feb. 7, 1901.

Editor of THE JEWELERS' CIRCULAR—WEEKLY:

Can you inform us where we can find second-hand jewelers' tools?

Yours truly,

REID & TODD.

ANSWER:—We refer correspondents to Eugene Sheffer, 207 Centre St., New York. Should he not have what is wanted, Henry Blundell & Co., Providence, R. I., may have.

KENDALLVILLE, Ind., Feb. 9, 1901.

Editor of THE JEWELERS' CIRCULAR—WEEKLY:

Will you kindly let me know the addresses of some makers or dealers of electric lighting fixtures? I will want something of that kind for my residence, to be erected this season.

Respectfully yours,

CHARLES G. BECKMAN.

ANSWER:—For electric lighting fixtures we refer correspondent to the Bradley & Hubbard Mfg. Co., 21 Barclay St., New York; Archer-Pancoat Co., 67 Fourth Ave., New York, Oxley & Enos Mfg. Co., 371 Fifth Ave., New York. For electrical outfits, the Tower-Binford Electrical & Mfg. Co., Richmond, Va., and for incandescent lamps, the Kentucky Electrical Co., Owensboro, Ky.

HARTFORD, Conn., Feb. 10, 1901.

Editor of THE JEWELERS' CIRCULAR—WEEKLY:

Kindly give me in your question column the address of the parties who manufacture the "Prescott Screw Case Opener," and oblige,

Yours truly,

A. D. STRANG.

ANSWER:—The "Prescott" screw case opener is patented and made by A. E. Prescott, North Creek, N. Y., whose New York agents are Sussfeld, Lorsch & Co., 37 Maiden Lane.

DANVILLE, Pa., Feb. 11, 1901.

Editor of THE JEWELERS' CIRCULAR—WEEKLY:

Could you give me the name of some party who makes or imports China or bisque flowers? I want a large bouquet of them in flowers of various kinds. Thanking you for any information you can give, I remain,

Very truly,

H. REMPE.

ANSWER:—These articles were imported, and, though we have made inquiry, we are told that nobody in the United States handles them at present.

MILFORD, Mass., Feb. 13, 1901.

Editor of THE JEWELERS' CIRCULAR—WEEKLY:

Can you give us the address of the makers of the "Lincoln" fountain pen? Thanking you in advance, we remain,

Yours truly,

C. W. WILCOX.

ANSWER:—W. G. Frazer & Co., 36 Gold St., New York.

THE RAMBLER'S NOTES.

WHAT THE RAMBLER SAW AND HEARD AMONG THE DEALERS IN ART POTTERY, CUT GLASS, BRONZES, ETC.

AS an exhibit of ceramics, the china display in the import section of

ART CHINA AT BAWO & DOTTER'S.

Bawo & Dotter's warerooms, 26-32 Barclay St., New York, is more than worthy of notice. The shapes, decorations and colorings are specially pleasing. This is notably so of a line of Vienna china that looks almost like French ware, which has been imported from Kloesterle. The decorations are light and in every way attractive, after the festoon style. Bawo & Dotter have also an interesting addition to their line of Imperial Crown china on which are portraits of four of Shakespeare's heroines, artistically reproduced from original paintings by C. Schmidt-Helmbrechts.

END EMANN & CHURCHILL, 50 Murray St., New York, show, in their

FRENCH CHINA AND BOHEMIAN GLASS WARE.

general stock of china and glass ware, a line of French china with some new shapes, as well as new effects in decoration on older shapes. Some worthy specimens of Bohemian glass ware attract attention.

CHARLES A H R E N - F E L D T & S O N , 5 0 - 5 4 Murray St., New

COLLECTIONS OF ROYAL VIENNA AND ROYAL BONN.

York, are exhibiting several pieces of bric-à-brac, including a collection of Royal Vienna and Royal Bonn, and clock sets, trays, candelabra and vases in the Dresden style that should have particular interest to buyers for the jewelry trade. There is one line of Royal Bonn vases with the body of natural green and a panel or medallion on which is a head, a bust or an entire figure, all of the highest type of art work, that would please the connoisseur with deep purse. The line of Vienna ware is not so extensive as some others, but what there is of it has exceptional merit.

THE Astor House is the temporary headquarters, this month, for several representatives of English concerns that do not have permanent establishments in New York. Their lines of art pottery, bric-à-brac, cut glass, etc., are interesting to buyers of these goods. THE RAMBLER.

The Death of R. W. Binns, F.S.A.

FROM England comes the news of the death of R. W. Binns, F.S.A., for many years managing and art director of the Royal Porcelain Works, Worcester. Mr. Binns died at his residence on Dec. 28, 1900, in his 82d year. With the death of Mr. Binns another link between the English potters of to-day and those of a past generation is severed. Most, if not all, of his old friends connected with the potting industry of the middle of the past century

THE LATE R. W. BINNS, MANAGING AND ART DIRECTOR OF THE ROYAL PORCELAIN WORKS, WORCESTER, ENG.

had predeceased him—Sir Henry Doulton, Colin Campbell, W. J. Goode and others. Mr. Binns was quite an enthusiast in everything pertaining to the production of high class pottery, and his name will forever be connected with the Royal Porcelain Works, Worcester, and be associated with that of the founder of the works, Dr. Wall, and with those of his successors—the Flights, the Barrs, and the Chamberlains.

Mr. Binns was born in Dublin in 1819, commencing his business life in that capital, where he was apprenticed in 1834. He left Dublin about 1846 to take up the management of a famous London house. There he had the opportunity of handling the productions of many manufacturers and laid the foundation of the complete knowledge of pottery he afterwards acquired, and which has made his opinion on the various phases of it appreciated throughout the world. While in that occupation he made good use of his leisure hours in

studying in art schools and museums the masterpieces of antique art. On the invitation of W. H. Kerr, a fellow countryman, he went to Worcester, in 1851, as part proprietor of the Worcester Porcelain Works. Throughout the whole of his life Mr. Binns was ever actuated by the highest aims: for the attainment not only of artistic merit and technical perfection, but of those nobler qualities of commercial probity and moral standing.

In 1851, when Mr. Binns went to Worcester, the energies of the establishment were in a very feeble and comparatively pulseless state—the business, in fact, was in the condition of a plant that had exhausted its soil. On assuming the reins of management he at once attempted to infuse new life into the system. He laid down definite principles upon which to work, and inspired the artists with new and higher aspirations. He built new workshops and new showrooms. He engaged new artists, adopted new methods and generally elevated the style of production. This he did with so much success that in a comparatively short time the productive capacity of the manufactory was on a level with that of firms which had formerly been looked upon as almost above competition. The Royal Porcelain Works, Worcester, were fully represented at the International Exhibitions at Vienna in 1873 and at Paris in 1878. At the former of these, the jury awarded that the "Worcester" should be bracketed with "Mintons" in the highest place—each receiving the Diploma of Honor. In the Paris Exhibition, 1878, Worcester was placed first, and was again awarded the Diploma, while Mr. Binns was created a chevalier of the Legion of Honor.

From this time onward, the productions of Worcester continued to develop and improve under the fostering care of Mr. Binns, and there can be no doubt that the great advances made in ceramics throughout England were largely due to the leading spirit at Worcester inviting competition and thus compelling improvement. Mr. Binns was an earnest student of the art he loved so well, and applied himself to an investigation of the previous history of the manufactory at Worcester, and to the collection of specimens of the early productions there. That interesting and historical collection is now to be seen in the museum at the works. Among his literary productions one of the most important was "A Century of Potting in the City of Worcester," which embodied a history of the works. He also wrote an autobiographical work, recording the events of the 45 years which comprised his residence in Worcester.

ONE HUNDRED THOUSAND AMERICAN WATCHES have ABBOTT'S PATENT STEM-WINDING ATTACHMENTS. A few million key-winding watches are still in use. A few jewelers may make a few dollars by sending a few of these watches for alteration to HENRY ABBOTT, 9-11-13 Maiden Lane, New York.

CHEMICALS, TABLES, RECIPES.
[Continued.]
TABLES.

IN all Government assay reports the proportion is given in fine gold and by thousandths. Thus thousandths reduced to karats equal:

1,000		or	24k.	
.958 1-3	or 23k.		.458 1-3	or 11k.
.916 2-3	" 22k.		.416 2-3	" 10k.
.875	" 21k.		.375	" 9k.
.833 1-3	" 20k.		.333 1-3	" 8k.
.791 2-3	" 19k.		.291 2-3	" 7k.
.750	" 18k.		.250	" 6k.
.708 1-3	" 17k.		.208 1-3	" 5k.
.666 2-3	" 16k.		.166 2-3	" 4k.
.625	" 15k.		.125	" 3k.
.583 1-3	" 14k.		.83 1-3	" 2k.
.541 2-3	" 13k.		.41 2-3	" 1k.
.500	" 12k.			

Coin gold is .900 fine, which is equivalent to 21 3/4k.

Silver coin, also, is .900 fine; while sterling silver is .925 fine.

Sterling silver is so called from the fact that the Easterlings—inhabitants of Eastern Germany in the 12th and 13th centuries—were noted for the purity of their alloys, and especially of their silver. Hence the name.

TROY WEIGHT.
24 grains = 1 dwt.
20 dwts. = 1 oz.
12 oz. = 1 lb.
One cubic inch of pure gold weighs 8.4 oz.
One cubic inch of pure silver weighs 4.56 oz.

RECIPES.

Anti-oxidizer: There have been very many published recipes for anti-oxidizing solutions, chief of which was one consisting of ochre and borax. This preparation is bright but too dirty for the jobbing jeweler. The following recipes have been in use for years and found to be perfectly satisfactory:

A good anti-oxidizer is made by taking four ounces of rain water and putting in as much boric acid as will dissolve. Then add one-fourth ounce of pulverized borax. To apply, heat the article and, when warm, paint it with a camel's-hair brush which has been dipped in the solution. This preparation is very good for engraved band rings and all articles which do not contain stones. But should it be desired to anti-oxidize an article containing stones, the following solution should be used: Take an ounce of alcohol—grain or wood—and put in as much boric acid as will dissolve. To apply, dip the article into the solution; remove and ignite, when it will burn off with a green flame and leave a thin, white, uniform coating upon the article to be repaired. Should a transparent anti-oxidizer be desired add ammonia, largely diluted with water, to the latter solution until it becomes perfectly clear. Before applying be sure to have the article perfectly clean. Paint it with a camel's-hair brush moistened with the liquid and placed on a warm piece of charcoal to dry. When dry do not handle the article more than is absolutely necessary.

Blue Remover: Blue remover is made of equal parts of elixir of vitriol and muriatic acid.

Pickle: Pickle is prepared by mixing 1 part of sulphuric acid and 20 parts of water.

Oxidizing Solutions: No. 1: Place the article to be oxidized in a solution of liver of sulphur (sulphuret of potash) diluted with spirit of sal-ammoniac. No. 2: Salt petre, 1 part; sal-ammoniac, 2 parts; sulphate of copper, 2 parts. These ingredients are reduced to a fine powder and dissolved in acetic acid. No. 3: Place a small piece of sulphuret of potash in a boiling cup and add about an ounce of water. Heat, but do not boil the mixture and immerse the article to be oxidized.

(To be continued.)

PROVIDENCE, R. I.

The Oxidation of Silver.—M. Berthelot made known at the session of the French Academy of Sciences the results of fresh experiments for the determination of the conditions under which the combination of silver with oxygen takes place. According to the statement of this savant it was presumed, heretofore, that a temperature of 2,000° C. was necessary for the production of this combination. M. LeChateliér has demonstrated that silver oxidizes in oxygen at a temperature 300° C. under pressure of 10 to 15 atmospheres. Berthelot has studied the action of oxygen at normal pressure and found that a mixed oxidation takes place at about 400° C.

32D YEAR.

NEW YORK, WEDNESDAY, FEBRUARY 27, 1901.

VOL. XLII. No. 4.

THE CROWN JEWELS OF ENGLAND.

IN the issue of THE CIRCULAR-WEEKLY of Feb. 13 were illustrated and described the jewelry of the new Queen of England, Alexandra. We supplement that article with a picture of the Crown Jewels of Great Britain, as stored in the Tower of London. These jewels have been often enumerated and described, and we will content ourselves here with the reference only to the Imperial State Crown worn by Victoria and which was made in the year 1838, with jewels taken from old crowns and others furnished by her command. It consists of diamonds, pearls, rubies, sapphires and emeralds, set in silver and gold. It has a crimson velvet cap, with ermine border, and is lined with white silk. There are 241 pearls in the band alone. In the front of the crown, and in the center of a diamond Maltese cross is the famous ruby, said to have been given to Edward, Prince of Wales, son of the

Black Prince, by Don Pedro, King of Castile. This ruby was worn in the helmet of

Henry V. (Shakespeare's great hero), at the battle of Agincourt, in 1415. The cross is

formed of 75 brilliant diamonds. All told, there are in the crown 5 rubies, 11 emeralds, 17 sapphires, 377 pearls and 2,780 diamonds.

The jewels of the Russian imperial family form one of the most valuable collections in the world. This collection is guarded in a fortified castle watched over by a special detail of 180 retired officers and a body of soldiers. For this service they are well paid. No officer who in his days of active service was addicted to gambling or to extravagance can ever hope to be selected as one of the custodians of the imperial jewels. The Czar keeps a portion of his own private jewels in banks in London and Paris, so that in case a revolution should break out in St. Petersburg he would have an "anchor to windward" in the two foreign capitals.

THE CROWN JEWELS OF ENGLAND STORED IN THE TOWER OF LONDON

Reigning Fashions in Paris.

PARIS, Feb. 10, 1901.

Although many Parisians have gone to the sunny Mediterranean shores, the Paris season is still at its height. Receptions, balls and feasts of all kinds are following one another in rapid succession. Women

NO. 1. NECK PENDANT OF ENAMELED GOLD.

who attend these fashionable functions are adorned with so many jewels that they sparkle like a shrine. With a view to satisfy this unprecedented rage for jewelry, jewelers are exhibiting the most tasteful and artistic creations.

The neck pendants and belt buckles il-

lustrated on this page and page 9 are from a fine selection exhibited by one of the most important firms in the Rue de la Paix. No. 1 is a quite new and elegant neck pendant of enameled dead gold. It represents a bat, whose body is replaced by the bust of a woman. The half-outspread wings are of translucent enamel and their meeting forms a loop from which is suspended a magnificent pearl. The chain of this pendant is composed of dead gold links fastened together by uneven pearls. No. 2 is also a neck pendant of enameled dead gold. This attractive jewel represents a sort of orchid, the center of which is set with a large diamond, while a fine topaz is suspended from the end of the stem. Nos. 3 and 4 are belt buckles of enameled dead gold. They are the latest patterns in this line. The first is in the form of an escutcheon, adorned with dainty field flowers. The latter represents, surrounded by foliage, a peacock whose plumage is marvelously enameled.

Among a number of other fascinating jewels, I noticed a delightful bodice buckle consisting of three large carnations of different colors (one red, another white, and a third yellow), made of rubies, brilliants and topaz, mounted in gold.

Large combs and diadems for evening wear are as much in fashion as ever. Let me first mention, in this line, a charming comb made of mistletoe branches in enamel. Again, a superb diadem, consisting of violets carved out of cornelian, each flower being mounted on enamel.

Another exquisite diadem is composed of a garland of silver grapes and vine leaves, which surround the top of the headdress and fall to the nape of the neck.

A magnificent necklace consists of six twisted rows of pearls with an enameled gold clasp, adorned with opals.

Platinum chains are now in great favor.

NO. 2. NECK PENDANT OF ENAMELED GOLD.

Thanks to their durability, these chains can safely bear heavy gems and jewels.

Sapphires set with fine diamond dust and mounted in platinum are much used to make fancy jewels, such as bodice buckles, brooches, etc.

Buttons are now veritable jewels. They

come in many beautiful and new designs and are made mostly of gold, silver and precious stones.

Exquisite cuff buttons consist of oval magnifying lenses of crystal in which are inserted artistic and very finely enameled reproductions of castles, portraits, landscapes, etc.

Umbrella handles come in the most varied patterns. One of the most popular is

NO. 3. BELT BUCKLE—SEE PAGE 7.

of enameled dead gold and represents a duck, whose green and gold feathers are reproduced in a striking manner.

Charming desk accessories consist of oxidized silver or crystal inkstands whose cover, when opened, discloses a small and elegant watch. In the same order of ideas, crystal pen racks set with precious stones are also delightful.

Articles in carved boxwood enjoy the greatest vogue. In this line I will mention mirror frames, match boxes and watch cases, of which the elaborately carved wood is ornamented with plates of enameled gold.

NO. 4. BELT BUCKLE—SEE PAGE 7.

One of the most beautiful specimens in luxurious glass ware is a champagne cup, whose bowl is the calyx of an iris flower, enameled in relief and displaying the most marvelous richness of tones.

Tasteful cut crystal scent bottles have the neck adorned with dainty bunches of flowers. These are attached to the stopper and do duty for a label on which is written the name of the scent. A. L.

Windolph & Cordes, Grand Island, Neb., contemplate moving to improved quarters soon.

The Chicago Lumbering Co., Manistique, Mich., have sold their jewelry stock to Duncan G. Currie, who will open a store in the same town. It is probable that William J. Weber, who was in charge of the jewelry department just sold, will also begin business for himself in the same line.

The Diamond Markets.

ANTWERP, Feb. 5, 1901.

Our market showed a little improvement last week, but not equal to general expectation. Two bad factors, namely, rain and snow, were often the reason that affairs were not concluded. We think, however, that the month of February will bring more life to the trade.

Many lots of roses were sold at good prices, so that the actual stock in this quality will not be large. There is a good demand for rough, but, it being very scarce, high prices are held by the dealers. Some firms have sent their buyers to London. Flat goods, wanted by our own manufacturers, fail also on the market.

Henry Fera, of Fera & Kadison, New York, was recently in Antwerp at Mr. Vrieslander's factory, 71 Rue du Transvaal, buying m \acute{e} lée.

Samuel H. Levy, L. & M. Kahn & Co., New York, was recently at Maurits Saks's office. He has bought a fine series of stones.

Mr. Ullmann, of London, made offers through his broker, who paid a visit to Antwerp last week.

A committee have been formed in Antwerp to collect money by subscription to erect a statue of Lodewijk Bercken, the inventor of diamond polishing. Louis Coetermans was elected as honorary president and G. Antoine president. This committee expect to begin work on the statue with suitable festivities.

Monday, Jan. 28, a young fellow smashed

the large show window of jeweler L. Boon, at the Place Verte, with a piece of iron.

An important theft was committed at the factory of Janssens-De Croes, Rue de la Province (Sud), at noon, when all the workmen were away. When they returned, at 1.30 o'clock, they found a dozen fine brilliants had been stolen from the mill of Mr. Wellner. The police claim to know the robbers. The stones represent a value of about \$6,000.

A new firm have been established here under the style of Bernard Meeussen & Co. The partners are Bernard Meeussen, A. J. L. Peeters and Charles J. Rombaut. The firm will engage in the diamond trade.

LONDON, Feb. 6, 1901.

The market in rough diamonds is very quiet for the moment, owing to the death of the Queen Victoria. Many Antwerp houses are represented here and their buyers are trying to get some favorable prices, but so far without result. After the general mourning, more movement is likely in the trade.

Smets & Co., of Antwerp, made a small purchase in m \acute{e} lée.

AMSTERDAM, Feb. 5, 1901.

There have been a number of buyers here, including many from America. Among them was S. H. Levy, of L. & M. Kahn & Co., New York, who went to Antwerp.

The condition of the workmen is not improving. Those who have no work are numerous, estimated at 1,000, and the number

increases. It is hoped that the manufacturers will soon be able to employ more help.

PARIS, Feb. 6, 1901.

The French diamond market shows much improvement. The jewelers made good sales in December, which is always a good period, when people buy presents for the new year. Large quantities of roses changed hands during these days and the prices paid for same show a small advance on former rates. A lot of these goods were taken for America, representing an amount of about \$14,000.

Pearls and emeralds were also sold largely. An Antwerp diamond broker is here this week, who usually has in hand fine lots of brilliants.

Planning for the Big Trade Convention in Philadelphia.

PHILADELPHIA, Pa., Feb. 20.—"More than 1,000 delegates, representing the jewelry and all other business and manufacturing industries of the south, will be in Philadelphia next June, at the meeting of the Southern Industrial Association," said N. F. Thompson, of New Orleans, a few days ago, to a CIRCULAR—WEEKLY representative. Mr. Thompson is secretary of the Association and came here to arrange with the Trades League, an organization to which such representative jewelers as John F. Simons, Fred. Simons, Jacob Muhr and J. Albert Caldwell belong, for the reception of the delegates.

It is expected that the convening here of so many merchants and manufacturers from the Southern States will do a great deal towards increasing Philadelphia's trade with the south. The Trades League and allied business organizations of this city are keenly alive to the possibilities of the meeting. Several women's organizations in the south are planning to hold conventions here at the same time with the industrial association, and their meetings will be really auxiliaries of the convention.

Two Negroes Wanted for Robbing L. Voigt, Jr.'s, Store.

ROANOKE, Va., Feb. 20.—The Chief of Police has issued a circular, asking information regarding Will Burrows and Sam Hardy, two negro criminals, who entered the jewelry store of L. Voigt, Jr., and carried off goods valued at \$150. These two negroes were serving out a term in the penitentiary for larceny, and the Bediord county authorities hired them, with some others, to work upon the county roads. In a caboose car, where some of the convicts were quartered, they burned a hole in the car and escaped. All were captured except Burrows and Hardy. The men are described as follows: William Burrows is of dark ginger cake color, 30 or 35 years old, 5 feet and 9 or 10 inches in height, and weighs 160 or 180 pounds; steals and gambles for a living. Sam Hardy is dark brown, 30 or 35 years old, weighs 150 pounds, and is 5 feet and 8 inches tall.

The tray of rings was stolen from Mr. Voigt's store between Jan. 9 and Jan. 18, either from the window or the safe.

Bill Against Tontine Diamond Companies in the Michigan Legislature.

LANSING, Mich., Feb. 13.—The house committee on State affairs reported out favorably yesterday afternoon Representative Alward's bill declaring certain contracts or agreements to be unlawful and to provide punishment for soliciting or entering into the same. It is aimed at the various tontine companies throughout the State, who are doing an illegal business by selling diamonds, mining stock, etc., under the guise of a contract to repurchase the property sold.

These concerns have sprung up all over the State and the Attorney-General has been after them for some time. While the bill does not absolutely prohibit these companies from doing business, it serves the same purpose by knocking out the repurchasing feature. It reads as follows:

SECTION 1. It shall be unlawful for any person or corporation to solicit the making of, or to make or enter into any contract or agreement for the purchase or sale of property, real or personal, containing any covenant, agreement or guarantee providing that the resale or purchase of the property so sold or purchased, upon the payment of any bonus or premium, or upon the making of any grant, donation or gift in excess of the sum or sums actually paid as a consideration for such purchase or sale, together with unlawful interest as provided by law.

SEC. 2. All contracts or agreements made or entered into in violation of the provisions of this act shall be void in this State, whether made or entered into within or without the State.

SEC. 3. Any person or member of any firm or corporation who shall solicit the making of any contract or agreement in violation of this act, or any person or corporation who shall solicit the making of contract or agreement in violation of this act, either in person or by any other person or agency, or any person or corporation who shall in any manner whatsoever be a party to any such contract or agreement, shall be guilty of a misdemeanor, and upon conviction thereof shall be punished by imprisonment in the State prison not more than two years, or in the county jail not more than one year, or by a fine of not less than \$100 nor more than \$1,000, or by both such fine and imprisonment in the discretion of the Court.

SEC. 4. Any corporation doing business in this State under and pursuant to any law thereof, violating any of the provisions of this act, shall forfeit all of its corporate privileges and franchises in this State.

Nicholson File Co. to Acquire Two More Manufactories.

PROVIDENCE, R. I., Feb. 21.—The Nicholson File Co., of this city, are shortly to acquire two of the largest file and rasp manufactories in America outside of those they already control. The Nicholson File Co. have controlled for some time the American Works, at Pawtucket; the Great Western Works, at Beaver Falls, Pa.; the Eagle Works, at Middletown, N. Y.; the McClellan Works, at Saginaw, Mich., and some smaller properties. The addition of the two plants gives to the Nicholson File Co. a united capacity of about 9,500 dozen files and rasps a day, and employment to between 2,200 and 2,300 hands, and makes it the dominant company in the file trade of the world, giving it the control of about 80 per cent. of the file product of this country.

The directors, by permission of the Legislature, have voted to increase the capital stock from \$1,000,000 to \$2,000,000.

A report that the Star Watch Case Co., Elgin, Ill., desired to move to Aurora, in order to enlarge their business, is denied.

Solid Gold Pendant and Bow.

This is the new feature which will appeal to every practical watchmaker as being absolutely essential in a permanently guaranteed gold-filled case.

The pendant is the handle of the case and has more wear and friction than any other part of case.

E. D. Thomas Gets Back the Lot of Goods Stolen from Him.

SAN ANTONIO, Tex., Feb. 16.—The thieves who robbed E. D. Thomas's safe of diamonds and other precious stones, valued at \$1,500, became afraid of being quickly captured, and the whole lot of stolen gems is again in the hands of Mr. Thomas. The gems were, yesterday, received through the mails by detective George Shoaf, who was closely on the trail of the trio of robbers. Mr. Shoaf immediately placed the envelope containing the diamonds and other precious stones into the hands of Mr. Thomas. It is believed that the crooks have left San Antonio and that they are probably in Mexico by this time.

Agents for a Jewelry Firm Fined as Peddlers.

TRENTON, N. J., Feb. 18.—Charles L. Jackson and Edward Van Ripper, agents for a Paterson firm of jewelers, were fined \$10 each in the Central Police Court last week. They were charged with peddling without a license. Their method was to go to a house and leave a quantity of cheap jewelry, engaging children to sell it. The children were to have a commission for their part and the men would call later and collect the money. Judge Macpherson decided that this scheme was in violation of the spirit of the ordinance and the fine was imposed.

Government Medals Commemorative of the War with Spain.

WASHINGTON, D. C., Feb. 20.—The Committee on Naval Affairs have recommended the passage of the following joint resolution looking to the striking off a series of bronze medals, as follows:

"That the Secretary of the Navy be and he is hereby authorized to cause to be struck bronze medals commemorative of the naval and other engagements in the waters of the West Indies and on the shore of Cuba during the war with Spain, and to distribute the same to the officers and men of the Navy and Marine Corps who participated in any of the said engagements deemed by him of sufficient importance to deserve commemoration. Provided, That officers and men of the Navy or Marine Corps who rendered specially meritorious service, otherwise than in battle, may be rewarded in like manner. And provided further, That any person who may, under the provisions of this act, be entitled to receive recognition in more than one instance shall, instead of a second medal, be presented with a bronze bar, appropriately inscribed, to be attached to the ribbon by which the medal is suspended."

The bill also carries with it an appropriation of \$25,000 for the purposes named.

Scheme Jewelry Held Up by the Police.

GRAND RAPIDS, Mich., Feb. 20.—A basketful of small packages of cheap jewelry is held in the office of Acting Assistant Postmaster Hall. The packages are all addressed to local people and bear nothing which will give an inkling of the sender's address, beyond a New York post office box number. The receiver is asked to sell the contents of the package, which consist of 12 pins, for 10 cents, and return the money to the post office address and receive a gold watch in return.

The scheme is pure fraud, according to the authorities.

Important Arrest of an Alleged Swindler in Boston.

BOSTON, Mass., Feb. 21.—Behind the simple record on the bulletin board at police headquarters, chronicling the arrest last night of a man giving the name of Fred. Foster, is a story that is very interesting to the local jewelry trade. Foster is charged with larceny and in court, to-day, was held in \$1,000 for trial one week from to-day.

According to the police story, Foster, who claims to have come to Boston recently from Denver, Col., hired a store at 172 Tremont St. and announced that he was about to open a place for the sale of jewelry and watches. He went to the Bay State Trust Co., 222 Boylston St., and opened an account in the name of Fred. Foster, depositing a certified check on the Mount Vernon National bank, of this city, for \$192, and actual cash to the amount of \$230.

Armed with these evidences of a business man, he visited several wholesale jewelry houses and bought goods as follows: Smith, Patterson & Co., \$600; D. C. Percival & Co., \$856; Morrill Brothers Co., \$1,882; Kettell & Blake, \$750, and J. C. Sawyer, \$750. At each place he directed that the goods be delivered at his Tremont St. store at 5 o'clock yesterday afternoon.

The attention of the police was first called to the case through an alleged attempt made by Foster to sell some gold watches to the Wilson Jewelry Co., Tremont Row. He offered the goods at a price which aroused the suspicions of this company, the price he quoted being \$2.50 on each watch, less than the price at which the watch manufacturers themselves offered the goods. The Wilson company, in order to catch the man, bought some watches, paying him \$36 in cash and giving

him a check for \$60. Payment on the check was stopped. D. C. Percival & Co. were notified of the offer made by Foster, and immediately several firms in the trade were notified, and it was then learned that Foster had been trying to buy goods as well as to sell them. J. C. Sawyer, remembering a former experience of his, notified Chief Inspector Watts, late yesterday afternoon, and the Chief sent two of his men to the store of Foster at 5 o'clock, and when he offered a check in payment for some goods which had just been sent in, placed Foster under arrest and took him to police headquarters. Knowing that the Pinkerton people acted for jewelers' organizations, the local agency was notified, and Superintendent Leith, in turn, telephoned to the New York office, giving an account of the case here and asking for information as to Foster.

To-day it was learned, so the police say, that Foster's real name is Emanuel Townsend Goldberg, and that he is wanted by the Chicago police for the alleged passing of fraudulent checks in that city last November. In his possession at the time of his arrest were found a quantity of blank checks on the First National bank, of Cincinnati, \$382 in money, and a loaded revolver. There was a check for \$800 on the Cincinnati bank, bearing the name of James Hillrich Company, A. Edwards, treasurer. Chief Inspector Watts says that Bradstreet's Agency shows no firm of that name in Cincinnati. Receipts and money orders indicated that he had sent watches to the Andrews Collateral bank, of New York, to be pawned, using the name of W. J. Faith and E. Faith. Another piece of evidence which will help to identify him is a key tag bearing the number 20,059, issued by the Interstate Casualty Co., of New York.

The Pinkerton people in New York say

that Foster, or Townsend, was once a lawyer in New York and that he was disbarred. It is said that he has a wife living in 96th St., New York. Chief Inspector Watts says that the man's game was to secure as much jewelry as he could by means of his checks, draw down his bank balance, and then "jump" the town. As a matter of fact, his present balance at the Bay State Trust Co. is \$1.40.

About three years ago an attempt was made to procure goods from Boston jewelers by methods resembling those of Foster. Arrests were made then and the loss at that time was trifling. The trade are congratulating themselves over the early check put upon Foster and it is believed that this arrest will have the effect of keeping other people similarly inclined from Boston for some time to come.

Discovery of Aztec Jewelry in the Yale Peabody Museum.

NEW HAVEN, Conn., Feb. 20.—A workman engaged in sweeping out a storeroom in the Yale Peabody museum was stopped in his work by a professor, who noticed a piece of shining metal in what was supposed to be a small heap of brass. It turned out to be \$10,000 worth of gold in Aztec jewelry.

It is supposed that the late Professor O. C. Marsh, who was for years at the head of the Peabody museum, purchased the jewelry in his travels and when he returned to Yale deposited it in the cellar storeroom temporarily. Evidently he had forgotten all about it.

Judgment by Consent Against Use of "Rogers" on Silver Plated Ware.

An injunction was recently secured by the International Silver Co. restraining the M. S. Benedict Mfg. Co., East Syracuse, N. Y., from making or selling silver plated ware stamped Wm. H. Rogers, on the ground that it simulated and infringed certain "Rogers" trade-marks controlled by the plaintiffs. This injunction, which was entered by consent, was issued by Judge Coxe, of the United States Circuit Court for the Northern District of New York, in an action commenced by the International Silver Co., last November. It was brought against the M. S. Benedict Mfg. Co., M. Stuart Benedict and Harry O. Benedict, who were acting as selling agents for Wm. H. Rogers, Plainfield, N. J., whose name on the silver ware was the cause of the suit. The International Silver Co. asked for a preliminary injunction and demanded a judgment, giving them the usual damages and costs, and a perpetual injunction restraining the defendants from making, selling or disposing of any silver plated ware bearing the name of Wm. H. Rogers or any abbreviation thereof that would lead the public to think that these goods were manufactured by the International Silver Co. The defendants finally consented to the preliminary injunction and the action will probably be discontinued.

No action has yet been commenced against Wm. H. Rogers, of Plainfield.

J. C. Keith will move into a newly fitted up store at Ellwood City, Pa., March 1.

"1835-R.WALLACE"

Stamped on an article of Silver-plated ware is a guarantee of worth and quality.

Every dealer, when selecting a line of plated ware, always has in mind two leading qualities, and these usually are durability and design, as these are the ones on which most depends his reputation as a dealer in honest ware.

Our goods are made of the highest grade of Nickel Silver, plated with FINE Silver. Our extra, or A 1 grade, is plated 20 per cent. heavier than the regular standard. Triple and sectional plates are also carried in stock.

In designing patterns we endeavor to select only such as are graceful in outline and thoroughly artistic in decoration, and which conform most closely to the taste of a discriminating purchaser, which our long experience enables us to do.

Our line consists of the following patterns: Tipped, Fiddle, Windsor, Shell, Joan, Virginia, Astoria, Stuart and Anjou.

Any dealer who is not already familiar with our line will find it much to his advantage to write for Catalogue and discounts.

Litigation Over a Benefit of The Jewelers' League.

Judge McAdam, of the New York Supreme Court, Wednesday, signed an order granting permission to take testimony by affidavit from several witnesses in San Francisco in an interesting suit for interpleader, brought by The Jewelers' League, of New York. The suit involves \$5,000 insurance in the League on the life of James H. Higgins, who died in San Francisco in August, 1889. The League ask the Court to determine to whom the benefit shall be paid.

At first Mr. Higgins desired the amount to be paid to his wife. Several relatives were next made beneficiaries in turn, and a short time before his death two creditors were named. The League paid the amount in the Supreme Court and have let the several claimants fight the case out among themselves. The widow, Elizabeth Higgins, insists that her husband was not in his right mind when he transferred the fund to other relatives, and the relatives in turn agree that Mr. Higgins must have been insane when he ordered the amount paid to any creditor. The creditors alone profess to believe that the deceased jeweler was in his right mind. They are Mary F. Healey and Edward B. Reid, both of San Francisco. The League are not interested in the disposition of the money, as they have deposited the amount with the Union Trust Co. to be drawn by whosoever the Court decrees is entitled to it.

Law to Prevent Acceptance of Pledges from Intoxicated Persons.

HARRISBURGH, Pa., Feb. 19.—Representative Hutt, of Philadelphia, has introduced in the House a bill providing that pawnbrokers shall not loan money or make advances on goods, articles or things of value offered for pledge by any person under the influence of liquor. A fine is the penalty attached. The bill is not yet out of committee.

A Reminder of the Defunct Peoria Watch Co.

PEORIA, Ill., Feb. 21.—An important decision relating to the affairs of the Peoria Watch Co. has been handed down in the Appellate Court, sitting at Ottawa, Ill. The case was that of the First National Bank vs. Johnson L. Cole, Joseph Brodman and Moses Gish, who were original stockholders in the old watch factory. They had surrendered their stock, and it was reissued to other parties, who paid for it. The bank sought to hold these original stockholders on the ground that they had subscribed for the stock but had never paid for it. The Master in Chancery held that the defendants could not be made liable, and the Appellate Court now confirms that decision, which involves over \$25,000.

"Rory" Sims, Daring Jewelry Store Thief, Again Under Arrest.

PHILADELPHIA, Pa., Feb. 22.—According to the police of this city, the man who was arrested under the name of James Riley for robbing Levy's pawnshop, Wilmington, on the night of Feb. 6, and who has been sentenced to five years' imprisonment, is no other than "Rory" Sims, alias Joseph Hanlon, alias Wilson, an old time safe breaker and jewelry store robber known to the police of every big city in the country. Capt. Miller, chief of the local sleuths, has Rory's picture in his official album. Mr. Miller told a CIRCULAR-WEEKLY reporter that Rory has only recently completed a 10 years' sentence in the Auburn penitentiary for robbing the safe in the jewelry store of Frank Hoffa, 407 7th St., N. W., Washington, D. C., on the night of Oct. 11, 1890, the booty amounting to \$10,000. The Pinkerton Detective Agency took charge of the investigation for The Jewelers' Security Alliance, and Detectives Miller and Tate, who had formerly arrested Rory, apprehended him and his alleged confederate, James McLaughlin, in Philadelphia, and they were taken to Washington and convicted mainly upon the evidence of a pair of gold sleeve buttons, which Rory had given to a woman in this city. McLaughlin's health failed while he was in prison and he was pardoned by President Harrison and returned home to die.

Death of Franklin F. Place.

BOSTON, Mass., Feb. 23.—The Boston trade were shocked to hear, Wednesday, of the death, the previous evening, of Franklin Fairbanks Place, the well known retail jeweler of 81 Hanover St., at his home, in

THE LATE FRANKLIN F. PLACE.

Westwood, a suburb of this city. Mr. Place had been ill but 10 days and was considered as improving, when bronchial pneumonia set in and he was unable to combat it.

Mr. Place was born in Dedham (now Westwood) April 25, 1858. His early years were spent in Dedham and in 1876 he went to work for his brother, Crawford D. Place, to learn the jewelry business. In 1881 he opened the store at 81 Hanover St., his brother being a partner, and in 1893 he bought his brother's share and continued the business himself until his death.

Mr. Place was a man of social inclinations and made many friends, and at the annual dinner of the Jewelry Travelers' Association of New England, held recently, took a prominent part. He was a member of Mt. Taber Lodge, F. & A. M., East Boston; Bethany Com., Knights of Malta, Hyde Park; New England Hotel Men's Mutual Benefit Association; McKinley 13 Club of Boston, and Westwood Light Artillery. Mr. Place was unmarried. He was very fond of traveling and had attended all the meetings for some years of the Hotel Men's Mutual Benefit Association. He was considerable of a sportsman, going to Maine every Spring with the Commodore's Club.

The funeral services were held Friday afternoon, at 2.30 o'clock, in the Baptist Church at Westwood, being conducted by Rev. W. H. Ryder, of Gloucester, chaplain of the National Lancers, assisted by Rev. G. M. Bodge, of Westwood. The church was filled to overflowing with the many friends of the deceased, and special electric cars met the train at Dedham and conveyed the people to Westwood and return. The burial was in the Westwood cemetery. Among those present at the funeral were noticed F. R. Hollister, of Chapin & Hollister Co., Providence, R. I.; O. E. Place, Providence,

R. I.; U. C. Smith, Brockton; D. A. Fisher, of Bay State Plate Co.; Alexander Harwood, Armstrong Transfer Co.; Walter B. Snow, Poole Silver Co.; John McClosky, of Nelson H. Brown; S. J. Learned, W. H. Pentz, C. M. Johnston and W. M. Gardner, all clerks in the employ of Mr. Place, and many others.

Death of William M. Smith.

PHILADELPHIA, Pa., Feb. 21.—William M. Smith, an aged jeweler, who was formerly in charge of the factory of Simons, Bro. & Co., this city, and who held responsible positions with many other local houses, died at his home, 750 N. 2d St., Reading, Pa., Feb. 17, and was buried yesterday. At the time of his death he was in partnership with his brother, Joseph Smith, retail jeweler, Penn St., near 4th St., Reading. Mr. Smith had an extended acquaintance among retail jewelers and salesmen in Philadelphia and Reading, and until recently made weekly trips to this city to buy materials and supplies.

He was a native of Reading and was born in that city, 84 years ago. He was the son of Josiah Smith, a clock and watch maker on Penn St., between 3d and 4th Sts. His father was born on a large plantation on the Brandywine, near Wilmington, Del., and died in Reading in 1860, at the age of 83 years. William Smith was a member of the Reading Artillerists and left for the Mexican War with Captain Leoser, Dec. 26, 1846. The heat, battles and difficulties of that war were so great that Mr. Smith never fully recovered from

the effects, although he was able to work at his trade for many years. William learned the trade of watchmaker from his father. After the Mexican war he came to this city and worked for nearly all the big Chestnut St. establishments.

Burglar Cleverly Enters George Honnet's Store, but Gets Little.

WILMINGTON, N. C., Feb. 20.—A burglar secured \$30 worth of low priced watches and plated ware, tried unsuccessfully to enter the safe, and left some sterling silver ware in an unfastened case, in the jewelry store of George Honnet, 12 N. Front St., a few days ago.

The burglar entered through a second story window into a dentist's office. With an augur he then bored two parallel rows of holes across the floor, lifted out the flooring and knocked a hole through the laths and plastering. Across the opening of a foot and a half square the burglar laid a dentist's lathe and from it he swung down into the store on a rope improvised of curtains, towels and a piece of manila rope.

As is his custom, Mr. Honnet had put all of his diamonds and other jewels, gold watches and other valuables in his safe the night before.

The suit brought against Rosenman Bros., San Antonio, Tex., to recover alleged interest paid on two pawned diamond rings, has been withdrawn by mutual consent. It appears that L. E. Daniell, a temporary resident of San Antonio, secured a loan on the rings from Rosenman Bros. When redeemed, 18 months' interest was charged, as pawnbrokers do. Daniell claimed the amount he paid was \$54, above legal rates, and, therefore, sued for the \$54 and \$54 penalty, according to Texas laws. This is in explanation of an item published in a recent issue of THE CIRCULAR-WEEKLY.

Additional Returns of Rhode Island Cor- porations.

PROVIDENCE, R. I., Feb. 16.—Additional corporation returns have been recorded at City Hall in accordance with the annual requirement of the corporation law of Rhode Island.

H. A. Kirby Co., Jan. 1, 1901, set forth assets at \$702,507.10; liabilities, bills payable and accounts payable, \$220,141.28; capital stock, \$300,000; surplus, \$182,365.82; total, \$702,507.10. The statement is signed by Henry A. Kirby and Archibald Rutherford, directors.

The Burdon Wire and Supply Co. give their capital stock paid in on Dec. 31, 1900, as \$140,300; the value, as last assessed for a town tax, of their real estate, was \$26,920; assessed under name of former owner, \$6,380; total real estate, \$93,300; value of personal estate on Dec. 31, 1900, \$248,064.03; total amount of debts and liabilities on that date, \$103,296.23. Signed by Henry J. Spooner, W. B. Gladding and George H. Remington, directors.

The American Seamless Wire Co. state that the capital stock actually paid in is \$100,000; real estate, nothing; personal assets on Dec. 31, 1900, \$126,443.95; debts and liabilities, \$180,000. The statement is signed by Frank H. Andrews, Joseph Balch, Arthur H. Watson and Albert A. Baker.

The B. K. Mfg. Co. say that the capital stock is \$3,000, all of which is paid in; real estate, nothing; assets at close of business, Dec. 31, 1900, \$13,314.03; liabilities, \$9,594.44, Charles L. Barrows, John M. Semple and S. O. Bigney signing as directors.

Henry A. Bromberg, jeweler, Battle Creek, Mich., delivered an address before the Woman's Club there, recently, on the subject, "The Peasantry of Russia."

Threatening Fire at the Store of Hardy & Hayes.

PITTSBURGH, Pa., Feb. 23.—A most threatening fire broke out to-day in the basement of the five-story building at 211 Fifth Ave., occupied by Hardy & Hayes. The firm had been arranging to remove next door and, fortunately, all valuables were packed and ready to be carried to the new quarters.

About 11.45 o'clock A. M. an explosion of natural gas occurred in the basement, where the plumbers were employed thawing out a gas pipe. The noise was slight and the employes did not apprehend danger until smoke came pouring through an areaway in the sidewalk. An alarm was sent in from box No. 51, at Fifth Ave. and Master's Way, which was responded to promptly by the downtown companies. By the use of the chemical hose all danger was soon averted. Employes of Hardy & Hayes succeeded in removing tray after tray of the more valuable jewelry into the adjoining building, where Hardy & Hayes expected to be located about March 1. A great deal of the firm's stock had already been removed and thus considerable damage by smoke and water was averted. As it is, the firm's loss amounts to about \$300. They will be located in their new quarters next week.

Window Smasher Boldly Robs Ogusky & Meyer's Store.

PITTSBURGH, Pa., Feb. 21.—The show window of Ogusky & Meyer's jewelry store, on Broadway, Uniontown, was badly smashed by the hurling of a brick by a white man, about an hour after the store had closed last night. The window smasher then quickly gathered together about \$150 worth of watches and jewelry in the window and disappeared just as the crowd, which had heard the crashing of the glass, collected.

Two men have been arrested and are supposed to be concerned in the robbery. One man was arrested before the theft who had in his possession a pair of shoes which he had been seen stealing. An hour after the robbery, a man with some small articles stolen from a store was arrested and held. Both are supposed to belong to a gang.

Duty on Clocks in New Venezuelan Tariff.

WASHINGTON, D. C., Feb. 20.—Under the provisions of the new tariff of Venezuela, which went into effect on Oct. 10 last, it is provided that all clocks intended for public use, and imported under orders from the Venezuelan Government, may be entered free of duty.

Henry Flowers, for a number of years employed by the Elgin National Watch Co., died recently of pneumonia. He was born in England, 59 years ago, and went to Elgin 13 years ago. The first 11 months of his stay there he was employed in the watch factory. Then he went to the Cannon factory for six months. Returning to Elgin he secured employment in the escape room of the watch factory.

Successful Hold-Up in the Jewelry Store of W. S. Tussing.

COLUMBUS, O., Feb. 23.—Last Monday evening a negro walked into W. S. Tussing's jewelry store, E. Gay St., just as the clerk, John Tussing, was putting the trays of valuable goods in the safe. Drawing a revolver and pointing it at the clerk's head, he demanded money. Mr. Tussing told him he had no money and, watching his chance, he landed a blow on the negro's jaw which, however, failed to stagger him. The man repeated, "Give me your money; I mean business." Again Tussing struck him, but the negro meant what he said and, turning his weapon, dealt the young man a vicious blow on the left side of the face, cutting a gash and stunning him. Tussing then

backed into the rear room, daring the robber to shoot and at the same time informing him that he would return as soon as he could reach his gun.

The negro followed until he reached the safe, and then snatching a tray of watches, hurried out of the store. At the door was another colored man waiting for him, and they departed together. Tussing had secured his gun by this time and followed the fleeing men for several squares, but as there was no one else in the store he returned to look after matters there and the men escaped.

Detectives were notified and at once began a search for the robbers. Four watches and the broken tray were found near the store, where the men had dropped them, but the remainder of the watches they took with

them. Most of the watches, 50 in number, were in gold cases and the lot is valued at about \$1,000. John Tussing has recognized the picture of "Monk Fawcett" as the man who held him up, but he did not see the other man. He is considered the desperado of Ohio and the police of this and other cities have had much trouble with him. It is reported that several of the watches have been pawned in Cincinnati and the officials of that city have been asked to look out for him. One man was arrested and five watches were found in his possession, but from what the Cincinnati authorities say he is not the man who did the work, but may be the one who stood on the outside and guarded the door.

A Revolver Plays an Important Part in a Robbery in R. Feickert's Store.

St. LOUIS, Mo., Feb. 21.—Joseph M. White, who says he is a physician, was arrested, last night, charged with the theft of a lady's gold watch from Robert Feickert, jeweler, 2866 Jefferson Ave. Shortly before 9 o'clock, on that night, two men entered the store and asked Mrs. Feickert, who was behind the counter, to show them some gold watches. There was something about their looks that prompted Mrs. Feickert to call her husband to wait on them. A lady's gold watch had been left on the counter. When Mrs. Feickert turned her back to call her husband one of the men grabbed it and ran out of the store. White started to follow the other man out, but Mr. Feickert, who at that instant stepped out, picked up his revolver and covered White, ordering him to remain inside.

At the point of his pistol Mr. Feickert marched his prisoner outside to the end of the block in search of a policeman. Finding none, however, he marched him back to the store, where he kept him while his wife telephoned to their other store, at 2629 Gravois Ave., and the clerk there brought a private watchman. White claims that he had nothing to do with the other man.

Death of an Old Time Jeweler.

NORWICH, Conn., Feb. 23. — Gilbert Bradley Prindle, an old time jeweler, died at East Poughkeepsie, Vt., Feb. 8, aged 95 years. He was in business in New York for five years previous to 1840, conducting a watchmaking and jewelry shop. Then he moved to Norwich. In 1855 he returned to Poughkeepsie, Vt., and remained there until his death. He continued at his business until his sight failed him, a number of years ago. For some time previous to his death he was nearly blind.

Mr. Prindle was born in Sandgate, Bennington county, Vt., March 14, 1806, where his father, Sherman Prindle, had moved with his parents, from Newtown, when he was a child 10 years old. Gilbert Bradley Prindle married Henrietta Lamson, daughter of Capt. Edward Lamson, one of the early settlers of Poughkeepsie, in 1833. In 1835 they moved to New York, remaining there until 1840, when they removed to Norwich, where they remained until 1855, when they returned to Poughkeepsie. Mrs. Prindle died Aug. 4, 1856. Nine children were born to them, only four of whom are now living.

As a Supplement

to the advice we have been giving the last few weeks, we are offering a splendid line of diamonds at prices as low as can be found anywhere.

50 HOLBORN VIADUCT, LONDON.

Death of William F. Fischer, Sr.

DETROIT, Mich., Feb. 23.—William Frederick Fischer, Sr., one of Detroit's oldest business men, died, this week, from the effects of an attack of grip. He was a jeweler and it was with the Detroit jewelry business that his long life had been closely identified. The firm of P. & W. Fischer, who dissolved 10 years ago, by mutual consent, represented the oldest business partnership in this city. It was composed of William F. Fischer, who died this week, and his brother, Peter Fischer, and they were in business together for 54 years.

Mr. Fischer was born on Sept. 1, 1814, at Ludensheid, Westphalia, Prussia. After a public school education, the young man served an apprenticeship to a manufacturer of clocks and watches. In 1834 he sailed for America and came directly to Detroit, where he began business. At that time Detroit was a village. In the Fall of the year he returned to the old country, coming back with a party of friends attracted by his stories of the new country and its rich prospects. Since that date William and Peter Fischer remained in almost continuous business together. William Fischer, deceased, retired 10 years ago from active participation in the business, which was conducted by Peter. The business is at present located at 217 Jefferson Ave. Two years of their lives the brothers spent in Milwaukee and engaged in the jewelry business there. The deceased was prominent in secret society circles. He leaves three children.

Imperial Opal to Be Presented by United Australia to King Edward VII.

[Special Cable Dispatch to *The Sun*.]

LONDON, Feb. 23.—It seems probable that to the list of famous jewels of the world will be added an "imperial opal." This magnificent gem is 250 karats in weight, two inches long and two inches thick. It now lies in a London bank, where it was deposited in 1899 by its owner [Maurice Lyons, of Brisbane], who told the late Premier of Queensland that he intended to present it to the Queen in the name of the Commonwealth when the first Parliament of united Australia assembled.

The gem has been seen by very few persons, as the owner was anxious to keep the secret until as the first Australian gem it should be placed in the crown regalia. Queen Victoria was partial to opals. The acceptance of the gem now rests with the King.

Opals of great value must be of the most exceptional kind. The Emperor of Austria has magnificent opals for which, it is stated, he has refused £50,000.

Dissatisfaction Over Watch Cases Presented Canadian Volunteers.

TORONTO, Can., Feb. 23.—A great deal of indignation has been aroused in London and Windsor by the discovery that the large number of gold watches presented as souvenirs to the volunteers returning from South Africa contained a large amount of silver in the cases. The cases, which were supplied by the American Watch Case Co., Toronto, were 35 pennyweights in weight and apparently all gold, but on examination it was found that two bars of silver had been substituted for gold in the springs of the watches. When the weight of the springs and the silver bars was deducted the cases weighed only 26 pennyweights each.

In London the matter was brought to the attention of the presentation committee, who held a meeting and discussed the matter and decided to accept the watches, but to send a resolution of remonstrance to the watch case company. Peter Birtwhistle, the jeweler through whom they were ordered, seconded the resolution. The defence of the firm is that they simply followed the custom of the trade.

Hiam Cohen Blind Owing to His Recent Shooting.

JACKSONVILLE, Fla., Feb. 23.—M. I. Cohen returned Feb. 22 to Jacksonville from New York and Baltimore with his brother, Hiam Cohen, whom he took to New York, several weeks ago, and where they were in consultation with the most prominent eye specialists, as many as 15 being consulted regarding the blindness which Hiam Cohen sustained after being accidentally shot in the head several weeks ago. The opinion of all was that the young man had a chance of recovering his sight, which might come back to him at any time, but as to how soon, none could state. The cause of the blindness was given as shock to the optic nerve.

Find of Opal-Bearing Quartz Reported from Texas.

KARNES CITY, Tex., Feb. 24.—A quartz formation containing opals of fine quality has been discovered in the southern part of Karnes county. Many valuable opals have been picked upon the surface of the ground in that locality during the past few years, and this led to the discovery of their source.

C. P. Dochum has succeeded to the business of Dochum Bros., Belton, Tex.

Frederick W. Zimmer and T. J. Zimmer have formed a partnership and have leased the store, 319 Main St., Poughkeepsie, N. Y., and will open May 1 with a line of diamonds, watches and jewelry. Both are practical men who have had 20 years' experience.

The Gold and Bronze Souvenir Medals of the Inauguration.

PHILADELPHIA, Pa., Feb. 23—Joseph K. Davison, manufacturing jeweler, 718 Sansom St., who received the contract for the medals for the inaugural ceremonies at Washington, next Wednesday, has, according to the terms of the contract, made three solid gold and 5,000 bronze medals,

OBVERSE OF THE OFFICIAL INAUGURATION MEDAL.

which will be shipped to John Joy Edson, Chairman of the Inauguration Reception Committee, next week.

The gold medals are exceptionally well finished, made of pure gold and weighing two ounces each. They will be presented as souvenirs to President McKinley, Vice-President Roosevelt and John Joy Edson, Chairman of the Reception Committee and a wealthy resident of Washington. On the obverse side of the medal is the bust of President McKinley in profile. On the reverse side are engraved the names of the President and Vice-President and the date of the inauguration.

The bronze medals are exactly like, in design, the gold medals, and are of solid bronze. They are the official medals of the inauguration. Twenty-five hundred of them will be distributed among the 2,500 members of the Inauguration Committee and the rest will be distributed as souvenirs among the Senators, Congressmen and army and navy officers.

In recognition of the intelligent and skilful way in which the medals were fashioned and made, Joseph K. Davison has been appointed one of the marshals of the civilian escort of the President and Vice-President.

A. J. Pritchard has opened a store at Columbia, Pa. He is from Norfolk, Va., and is the first colored man to engage in a trade in Columbia.

Burglars secured \$500 worth of jewelry from the store of J. E. Springer & Co., Valdosta, Ga., recently, during the excitement attending a small fire in the vicinity.

A. Davison, Who Went Into Insolvency, Is in More Trouble.

FREEMONT, Ill., Feb. 21.—A. Davison, jeweler at Dixon, who went into insolvency recently on account, it was alleged, of family difficulties, the main thing being a note for \$4,000 held by Mrs. Davison's relatives, is in more trouble.

Henry S. Dixon, the referee in bankruptcy, learned, a few days ago, that Davison had a lot of valuables in a safe at Belvidere. Last Thursday Mr. Dixon ordered Davison to pay to the trustee, M. Maloney, \$1,050, a four-ton safe valued at \$500, silver ware valued at \$300 and watches and diamonds valued at \$500. The stipulation was that the surrender was to be made within 24 hours. The order was not complied with and the referee then ordered Davison to appear in court in Chicago to show cause why he should not be arrested for contempt of Court. Davison appeared and the Judge gave him one week in which to make an explanation.

Two Jewelers of Savannah Suffer by Fire.

SAVANNAH, Ga., Feb. 21.—The store of E. F. Fegeas was destroyed by fire last night. The loss is estimated at \$5,000, with insurance of \$1,000. Mr. and Mrs. Fegeas and a clerk, Henry Luhrs, occupied rooms over the store, and were aroused in the early morning by the alarm of fire and escaped in their night clothes. Mr. Fegeas, while endeavoring to save some jewelry owned by his wife, was badly burned about the eyes, face and hands, after which he collided with a glass door and received a number of cuts and bruises. He is now in the Savannah Hospital. His physicians believe his eyesight will be saved, but he will be considerably disfigured.

The store and dwelling of A. Stone, jeweler, were also badly damaged by fire at the same time. Mr. Stone is unable at present to estimate his loss. He carried insurance of \$400 on stock.

Jewelers' Gold Bars Withdrawn and Exchanged.

Week Ended Jan. 23, 1901.

The U. S. Assay Office report:

Gold bars exchanged for gold coin.....	\$133,190 76
Gold bars paid depositors.....	68,925 13
Total	\$202,115 89

Of this the gold bars exchanged for gold coin are reported by the Sub-Treasury as follows:

Feb. 18.....	\$57,469
" 19.....	30,757
" 20.....	23,582
" 21.....	5,619
" 23.....	15,758
Total	\$133,185

James H. Steinberger, Russellville, Ala., has opened a store at East Florence, Ala. W. E. Field, Crystal Springs, Miss., suffered severely by fire recently, when 12 business houses were destroyed.

Spontaneous combustion caused a slight fire in the jewelry shop of Fred. J. Hollister, Freeman block, N. Salina and Wolf Sts., Syracuse, N. Y., some days ago. The damage was small.

The Giant of Collar Buttons

IN QUALITY,
IN SALES.

One Million Five Hundred Thousand Kremenz One-Piece Collar Buttons made and sold within the last year.

WHY? Because of their HIGHEST QUALITY, BEST CONSTRUCTION, GIVING THE MOST WEAR, AND GREATEST COMFORT and their IRON-CLAD GUARANTEE.

To verify this we invite the trade to read "The Story of a Collar Button, with Illustrations," which may be had FREE for the asking, and to try the experiment suggested on page 5 of that booklet.

Extract from "Printers' Ink," Nov. 23, 1898.

The Little Schoolmaster now suggests, to every pupil in his class, to send a two-cent stamp to Kremenz & Co., 49 Chestnut Street, Newark, N. J., and ask to be favored with a copy of their leaflet, "The Story of a Collar Button." Afterward, if any pupil will send to *Printers' Ink* another leaflet, new or old, that is half as good as this one, or that approaches it in excellence, the deserving student will be rewarded with one of *Printers' Ink's* souvenir spoons as an acknowledgment of his discovery and contribution. "The Story of a Collar Button" is the best piece of advertisement construction that has come to *Printers' Ink's* attention in the year of our Lord 1898.

Should you wish to utilize this booklet to increase your collar button business, we will, on receipt of your order, print your card upon and send you a quantity of them.

Kremenz One-Piece Collar Buttons are stamped as follows, ON BACKS:

Patent sustained by United States Supreme Court.

Quality and Construction have made our reputation.

Looks Like a Gang of Swindlers.

The Shrewdness of W. I. Rosenfeld Results in Putting a Gang into the Hands of the Police.

The careful business methods pursued by William I. Rosenfeld, jobber in watches, diamonds and jewelry, 19 Maiden Lane, New York, last week, resulted in the arrest of four men whom the police say are some of the most dangerous swindlers that have been operating in the city for several years. The arrest occurred in the following way:

On Monday, Feb. 18, two men called on Mr. Rosenfeld, giving their names as Leopold S. Oppenheimer and Oscar Lichtenstadt, and stating that they were brokers and had come to see him to arrange for the purchase of \$5,000 worth of jewelry. This jewelry, they said, was for a Fred. H. Rohter, and in payment for it, they said, one, John P. Cavanaugh, would tender Mr. Rosenfeld a first mortgage for the amount on free and clear real estate in New York. After making a few inquiries about the goods and casually mentioning a commission, the men departed and promised to call again the next day. This they did, accompanied by the Mr. Rohter referred to, who looked at some jewelry and told Mr. Rosenfeld that he would call Thursday with the man who had given the mortgage. Owing to the fact that they did not quibble about prices and had been apparently very easy to suit, Mr. Rosenfeld became suspicious.

On their second call Oppenheimer and Lichtenstadt had shown him a card from the Lawyers' Title Guarantee Co., stating that certain property, located at 228 W. 62d St., was recorded in the name of John P. Cavanaugh. Mr. Rosenfeld consulted his lawyer, who learned from the Title Co. that this card was genuine and that Mr. Cavanaugh was the recorded owner of the lot. Nevertheless, Mr. Rosenfeld decided to make an investigation on his own account, and, going to the property, which proved to be a negro tenement, after some difficulty found from a tenant that he paid his rent to E. Marrin. Mr. Rosenfeld called up Mr. Marrin, who was at 520 E. 18th St., and learned from him that he is the agent of the property, which is owned by an estate and that Mr. Cavanaugh had no valid claim to it in any way. Mr. Rosenfeld then notified the Police Headquarters, who assigned Detective-Sergeants Nugent, Madden and Barry on the case. The four men, Oppenheimer, Lichtenstadt, Rohter and Cavanaugh called on Mr. Rosenfeld by appointment, Thursday, and the detectives were concealed in a back room. Mr. Cavanaugh

brought with him the deed of the property and Gibson Putzel, the attorney for Mr. Rosenfeld, who was present, drew up the usual affidavits as to possession, which Cavanaugh signed and the transfer was ready to be made. At a given signal the detectives came in and arrested the four men, who at first protested but later accompanied them to Police Headquarters, where they were locked up. Friday morning, the prisoners were arraigned in the Centre St. Police Court as suspicious persons and Magistrate Hogan held them until Monday for examination.

From the attorney of the estate who owns this property, a CIRCULAR-WEEKLY reporter learned that fictitious transfers of a number of lots owned by this estate have been recorded many times the past few years, and that on alleged mortgages given on this property various concerns in the liquor and tobacco trade have given thousands of dollars' worth of merchandise. In the abstract of title which the prisoners would show for their claim would appear transfers formerly recorded in which the name of Selig, arrested some months ago for swindling, appeared. The police believe the men arrested to be connected with this and other gangs of daring operators who have mulcted jewelers and other merchants in various cities in the United States besides New York for some years back.

This is not the first time that Rohter and Cavanaugh have attempted to obtain goods from members in the jewelry trade. A CIRCULAR-WEEKLY reporter discovered that, in 1899, Rohter obtained as much as \$7,000 worth of jewelry from George A. Gerlach, then in business at 14 John St., on notes of various people, Cavanaugh and himself among others, which were indorsed by Cavanaugh and supposed to be secured by real estate which he held in this city. There were a number of notes for \$400 and \$500 and one for \$5,000, all of which went to protest at maturity, and Mr. Gerlach learned that the real estate and mortgages, which were supposed to secure these notes, were fictitious. When the four prisoners were arraigned, Monday, for examination, the case was postponed until yesterday.

The examination was begun, yesterday afternoon, and was adjourned until Thursday.

Tariff Decisions & Regulations.

DUTY ON CUTLERY FOR MOUNTING.

A decision of interest to dealers and manufacturers who import cutlery for mounting in silver or silver plate was handed down last week by the Board of Classification of the United States General Appraisers. It was rendered on the protest of Wiebusch & Hilgers and involved the duty on unfinished pocket knives. The Board's decision, written by General Appraiser Fischer, is as follows:

"The merchandise in question consists of assembled but unfinished pocket knives. They were returned by the local appraiser as 'partly manufactured pocket knives, as blades and other parts, imported in a manner other than assembled in finished pocket knives,' and duty was assessed thereon at the rate of 40 per cent. ad valorem and five cents apiece, under the provisions of paragraph 153 of the act of July 24, 1897. The importers claim that said knives, when valued at not more than 40 cents per dozen, are dutiable at 40 per cent. ad valorem, and that those valued at more than 40 cents and not exceeding 50 cents per dozen are dutiable at the rate of 40 per cent. ad valorem and one cent apiece, under the provisions of said paragraph 153.

"The question raised here is similar to that passed upon by this Board in *re Silberstein, La Porte & Co.* in G. A. 4367. The Board there held that the proviso to paragraph 153 did not apply to articles consisting of assembled parts of knives and only applied to such parts when imported as separate articles and not as assembled in the form of knives. Upon appeal to the Circuit Court of the United States for the Southern District of New York, the decision of the Board was affirmed (*United States vs. Silberstein et al.*, 99 Fed. Rep., 263), and the decision of this Court was affirmed by the United States Circuit Court of Appeals without opinion on Dec. 11, 1900. The Treasury Department in Treasury decision 22706 has signified its acquiescence in that ruling.

"Following the decision mentioned, we reverse the decisions of the collector and sustain the claims in the protests as to all partly finished knives covered thereby, valued at less than 40 cents per dozen and claimed to be dutiable at the rate of 40 per cent. ad valorem, and as to such of said articles as are valued at more than 40 cents per dozen and not more than 50 cents per dozen and claimed to be dutiable at the rate of 40 per cent. ad valorem and one cent each.

"The protests are overruled as to all other merchandise included in any of the invoices accompanying these protests. Proper reliquidation will follow."

MISCELLANEOUS DECISIONS.

Among other decisions handed down during the past week by the Board were:

J. H. Purdy & Co. imported agate pallet stones for use in French clocks, and agate compass jewels; the former were returned for duty as parts of clocks at 40 per cent., under paragraph 191, of the tariff act of 1897, and the latter as manufactures of agate at 50 per cent., under paragraph 115 of the same act. The Board sustained the protest as to the pallet stones, but overruled the protest relative to the jewels, sustaining the decision of the Collector.

The China & Japan Trading Co. imported cloisonne ware and fans. The cloisonne ware was assessed for duty as manufactures of metal at 45 per cent., under paragraph 193, act of 1897. It was claimed to be dutiable at 40 per cent., under paragraph 159. The fans were assessed for duty at 50 per cent., under paragraph 437, and were claimed to be screens, dutiable at 35 per cent., under paragraph 407. The Board sustained the claim as to the cloisonne ware, but overruled the protest as to the fans, sustaining the decision of the Collector.

REAPPRAISEMENTS.

Among the reappraisements of merchandise handed down last week by the United States General Appraisers were the following:

Jewelry and colored glass, from W. Klaar, Gablonz, Jan. 5, 1901.—Jet buckles, jet and steel

buckles, gilt and steel pins, jet pins, etc., all advanced 10 per cent.

Manufactures of metal and glass, etc., from W. Klaar, Gablonz, Jan. 5 and 12, 1901.—Pins and buckles, etc., advanced by addition of commissions, added to invoice but deducted on entry.

Articles composed of beads, from Hanna, Dabdrab & Son, Bethlehem, Oct. 8, 1900.—Mother-of-pearl rosaries, second quality No. 1, entered at 3 francs per dozen, no advance; ditto, No. 2, entered at 3.75 francs per dozen, no advance; ditto, No. 3, entered at 4.50 francs per dozen, no advance.

No Trace of the \$3,000 Emerald Missing from Durand & Co.'s Factory.

NEWARK, N. J., Feb. 21.—No trace has yet been found of the valuable emerald lost three weeks ago in the stone setting department of Durand & Co. Search has not been stopped, however, and it may be found yet. Notification has been sent to the trade throughout the United States in order to make it difficult for any one to dispose of the stone, in case it disappeared through dishonest hands and should be offered for sale.

In the meantime Durand & Co. have to stand the loss of \$3,000 or more, the estimated value of the lost stone. They have secured another which is almost identical, and this has been mounted and sent to the New York customer who sent the missing one.

J. A. Mitchell, Mound City, Mo., lost \$75 worth of jewelry by burglars, who visited his store recently.

Albert Megede, Richmond, Mo., has sold his interest in the jewelry business, conducted under the name of L. Megede's Sons, to his brother, Louis.

The Hot Water Plate.

Here is a modern, stylish utensil that you will look upon as a novelty, perhaps. But study it.

Think about the missing palatableness of the meat when one is half an hour late to dinner, or for breakfast to serve wheat or buckwheat cakes, scrambled eggs or ham and eggs, enjoying them to the last mouthful, still hot. And when you fully fathom its utility you will look upon it as a necessity.

You will wish you had learned about it years ago when the English people did, for it is very popular in England.

Every one of your customers will want them.

The illustrations tell all about it. The name doesn't.

It is called a hot water plate for the want of a better name. It is illustrated, so that the name will not mislead you.

You don't have to be told that the cover is to prevent the loss of the heat, or that the meat goes on top of the plate, and it is obvious that the spout at the side is where you pour the hot water. Will keep hot for an hour.

Each plate is furnished with an enameled iron funnel for filling purposes.

MANUFACTURED BY

S. STERNAU & CO.,

204 Church Street,

Philadelphia.

M. Baylinson, formerly of Litchfield & Baylinson, Sansom St., has opened a retail store at 340 N. 8th St.

The Rocky Mountain Jewelry Co. have moved from 330 N. 8th St. to a more desirable location at 240 N. 8th St.

Rudolph H. Krishker, 145 N. 9th St., is convalescing from pneumonia, with which he has been confined to bed four months.

Charles Emery, watchmaker, for many years with Bailey, Banks & Biddle Co., has resigned his position with that house.

Ebenezer P. Percival, whose store at 221 N. 8th St. was recently gutted by fire, has moved into temporary quarters at 207 N. 8th St.

J. H. Merz, Hopewell, N. J., whose father recently died, has inherited a comfortable fortune according to the terms of his father's will.

Ten gold watches, rings and other jewelry were the booty secured by burglars who visited the store of Frank C. Stidham, 4th and King Sts., Wilmington, last week.

The contract for the costly clock set presented to Past Grand Commander James F. Morrison, at a banquet, Saturday, by the Department of Pennsylvania, G. A. R., was awarded to William P. Sackett, of Wanamaker's.

Samuel Baerncopf, indicted on charges brought by the Jewelers' Association and Board of Trade, New York, pleaded not guilty to the charge, Wednesday last, in the Court of Common Pleas. He will probably be tried the latter part of next month.

Edward Sickles, of Morris Sickles & Sons, jobbers, will start on a European tour March 9, in company with Theodore Hart and Jacob Hess. The trio will "do the continent" thoroughly and will not return until July 4. The trip is for pleasure solely.

Frank Davison, in business with his father, Joseph K. Davison, manufacturing jeweler, 718 Sansom St., will attend the inaugural ball at Washington, March 4. Mr. Davison is a member of the crack City Troop, which will attend the inaugural services in a body.

The silver book, made by C. Kibele & Co., 628 Chestnut St., for presentation to

the Emperor of Germany by the North-eastern Saengerbund, and described in a recent issue of THE CIRCULAR-WEEKLY, was turned over to the German Ambassador last Monday at Washington.

William G. Blair, of Blair & Crawford, 804 Chestnut St., has been elected a school director in the 15th ward. W. C. Williams, of L. C. Reiser & Co., 111 S. 8th St., was elected to the same office in the 18th ward. Jeremiah Shaw, badge and medal manufacturer, 13th and Arch Sts., was elected a member of Common Council.

George W. Smith & Co. have received the contract for the memorial clock for Houston Hall, University of Pennsylvania, for which \$450 was contributed by the class of 1899. The clock is to be placed over the south door on the first floor of Houston Hall, and facing inward. It will measure three feet in height and five feet long. The woodwork will be like the interior of the hall, stained oak. It will have a severely plain dial, with heavy brass trimmings and prominent brass letterings for the hours and for the memorial inscription on the clock. It will be in the Elizabethan style: Westminster and Whittington chimes will strike the hours, quarters and halves and electric gongs, rung by the clock work, will ring the hours on all floors of Houston Hall.

At the annual meeting of the Philadelphia branch of The Jewelers' League, of New York, held in this city recently, the following officers were elected for the ensuing year: C. B. Bishop, of the National Optical Co., chairman; W. H. Dotter, retail jeweler, 1826 N. 22d St., vice-chairman; William F. Michel, with Roller & Speidel, secretary and treasurer, and the following were appointed by the chairman as the executive committee: William G. Blair, 804 Chestnut St.; William H. Long, with J. E. Caldwell & Co., 902 Chestnut St.; Samuel Kind, of S. Kind & Son, retail jewelers, 928 Chestnut St.; F. W. Gilbert, Dennison Mfg. Co., 1007 Chestnut St., and Robert Pinkstone, retail jeweler, 1947 South St. A meeting of the executive committee was to be held Tuesday, Feb. 26, at the Manufacturers' Club.

A \$200 diamond ring was secured from Henry Hood, of Wanamaker's, last week.

on a forged merchandise credit by Charles H. Gorgas, who is now under bail awaiting trial.

The daughter of Charles E. Lewis, 4600 Frankford Ave., is ill with typhoid fever.

Alfred Brown, foreman of Wanamaker's jewelry factory, was married last Wednesday.

John Lang, diamond dealer, Sansom St., near 8th St., failed of re-election to Common Council at the recent election.

H. Hensel, formerly one of the best known jewelry salesmen in Philadelphia, is said to be dying at his home in Germantown.

James Stewart, formerly in charge of the clock repair department of Wanamaker's, has taken a responsible position with G. W. Russell, 22 N. 6th St.

Emil Kerth, for 18 years a watchmaker for J. E. Caldwell & Co., has severed his connection with that house and is now with Bailey, Banks & Biddle Co.

The shuffleboard game between the Jewelers' Club and the Harold Club was won by A. G. Lee, of the former organization. William G. Breuhl, a well known jeweler, was defeated in his match.

An unsuccessful attempt to defraud stock brokers came to light, Thursday, when the name of Jacob Froelich, diamond dealer, 131 S. 7th St., signed to checks in payment of stocks, was found to be a forgery.

An inventory was filed Monday by Harry N. and Charles M. Allebach, of the estate of Mahlon B. Allebach, lately deceased, retail jeweler, 1328 Walnut St. The value of the estate is shown to be \$18,258.70, of which sum about \$1,000 represents the stock and fixtures of the jewelry store and the balance investments in electric and steam railway companies.

An inventory was filed with the Register of Wills, Wednesday, of the personal estate of Henry O. Hurlburt, who at the time of his death, shortly before Christmas, was senior member of H. O. Hurlburt & Sons, jobbing and retail jewelers, 938 Market St. Exclusive of the real estate, which is not accounted for, the estate is valued at \$180,429.52. Of this sum, \$161,456 represents Mr. Hurlburt's interest in the firm of H. O. Hurlburt & Sons. Other assets are: Investment in Fiber Spinning Co., North Wales, Pa., \$5,000; cash balance, \$1,547.80, and mortgages, \$8,735.84. Investments had also been made in the form of insurance on the lives of E. B. Williams, T. O. Haydock and B. F. Hagy.

NOTICE.

On February 7th, fire seriously injured the building partly occupied by our factory, and our plant was badly damaged by water. In order to expedite the resumption of work we have rented a new shop, larger and better than the old one, where we expect to resume manufacturing the first week in March.

American Watch Case Co.

THE INAUGURATION

of each President marks an era in the history of the United States.

It stands primarily for progress.

THE FREUND POLICY,

which was inaugurated thirty six years ago, is well known. It rests at the present time upon the same basis on which it has successfully solicited the support of public favor during ten administrations.

While conservative in some respects, it has been steadily marked by progress, and has developed, until to-day, we are proud to say, thousands of jewelers place implicit confidence in it.

AND THE JEWELERS' WEEKLY CONSOLIDATED

PUBLISHED EVERY WEDNESDAY BY
THE JEWELERS' CIRCULAR PUB'G CO.,
CORBIN BUILDING, 11 JOHN ST., COR. BROADWAY,
NEW YORK.
TELEPHONE: 1148 CORTLANDT. CABLE ADDRESS: JEWELAR, NEW YORK.

Vol. XLII. Feb. 27, 1901. No. 4.

A JOURNAL DEVOTED TO THE INTERESTS OF JEWELERS, WATCHMAKERS, SILVERSMITHS, ELECTROPLATE MANUFACTURERS, AND ALL ENGAGED IN KINDRED BRANCHES OF INDUSTRY.

Member of the American Trade Press Association.

Our editorial columns will contain our own opinions only, and we will present in other columns only what we consider of interest or value to our readers. Advertising matter will not be printed as news.

Advertising rates in THE JEWELERS' CIRCULAR-WEEKLY are lower, considering the number of tradesmen reached by its large circulation, than in any other jewelry journal.

Notices of changes in standing advertisements must be received one week in advance; new matter can be received up to Monday.

INFORMATION FOR SUBSCRIBERS.

Terms of Subscription, Postage Prepaid.

	PER ANNUM.
United States and Canada, - - -	\$2.00
Foreign Countries in Postal Union, - - -	4.00
England and Colonies, - - -	16s.
France and Switzerland, - - -	20 fr.
Germany, - - -	16 marks
Single Copies, - - -	.10

New Subscribers can commence at any time.

Payments for THE JEWELERS' CIRCULAR-WEEKLY, when sent by mail, should be made in a Post-Office Money Order, Bank Check or Draft, or an Express Money Order or Registered Letter. All postmasters are required to register letters whenever requested to do so.

Pay money only to authorized collectors having proper credentials.

Returning Copies. Returning your paper will not enable us to discontinue it, as we cannot find your name on our books unless your address is given.

Changing Address. In changing address always give the old as well as the new one. Your name cannot be found on our books unless this is done.

Discontinuances. We will continue to send papers until there is a specific order to stop, in connection with which all arrearages must be paid; but such an order can be given at any time, to take effect at or after the expiration of the subscription. All such orders will be promptly acknowledged by mail.

Liability. The courts have decided that all subscribers to journals are responsible until arrearages are paid in full and an order to discontinue has been received by the publisher.

THE JEWELERS' CIRCULAR-WEEKLY IN EUROPE.

Among the places in Europe where it is on file are the following:

- LONDON—First Ave. Hotel, Holborn, E. C.; Holborn Viaduct Hotel, Royal Hotel.
- PARIS—Hotel de L'Athene, Rue Scribe.
- LEIPZIG—Handels-Zeitung für die gesamte Uhren Industrie.
- BERLIN—Deutsche Uhrmacher Zeitung, Jager Strasse, 73.
- GENEVA—Journal Suisse D'Horlogerie.
- AMSTERDAM—Continental Club, Hotel Amstel.
- ANTWERP—Diamond Club, Rue de Pelican.

Every line of reading matter in THE JEWELERS' CIRCULAR-WEEKLY, with the exception of a few brief extracts from exchanges, always properly credited, is written exclusively for this journal. Each issue of THE JEWELERS' CIRCULAR-WEEKLY is copyrighted. Permission to quote is extended to other publications provided such quotations are properly credited.

The Fight Against False Reciprocity.

THOROUGHLY expert handling of the subject of reciprocity has just come to a close after being splendidly exemplified by a correspondence between the Boston Home Market Club and the Hon. John A. Kasson, of Missouri, Special Minister Plenipotentiary under the State Department. Mr. Kasson was the commissioner who drafted, under orders from the Administration, a series of six secret treaties to bring about so-called reciprocity between this country and France, Argentina, and other countries. Those who have followed the matter, as published in this journal, know that the drafting of the six treaties was laid bare by the New England jewelry manufacturers. The attempt to foist the disastrous treaties on the country was unknown until the jewelry men of New England found it out and struck blows which not only ended in the agreement on the part of the Administration to drop the treaties, but also in the dissolution of Mr. Kasson's commission and the public statement by the organs of the Administration that reciprocity is for the present a dead issue. A few days ago the treaties were discussed by the Boston Home Market Club. The reports of their deliberations came under the eye of Mr. Kasson. He addressed the Club a letter in which he defended his treaties and his actions throughout. In response, there appeared in the New England press a lengthy article which is masterly to the last degree. A committee of the Home Market Club, consisting of Charles A. Stott, of Lowell, Mass.; Frank W. Cheney, of South Manchester, Conn., and Charles W. Hutchins, of Worcester, Mass., prepared an answer to Mr. Kasson. It is a document of about 7,000 words, in which the general subject of reciprocity is treated, and then elaborately detailed attention is given to all of Mr. Kasson's admittedly ruinous treaties. The history of former reciprocity, the history of the attitude of the Republican party, and all the kindred matters which shed a bit of real light on the subject receive attention. It is a thoroughly complete and convincing article. In the handling of the French reciprocity treaty so vigorously fought by the jewelers appears the following passage, referring to the seemingly wanton concessions offered the French:

Another flagrant example is the concession of 10 per cent. on cheap jewelry and ornaments. To be sure, this leaves a duty of 35 per cent. on some and 50 per cent. on other articles, which to the uninformed seems high. But any duty is high or low as measured by foreign competition. Under the Wilson duty of 35 per cent. employment in our factories was reduced more than one-half, and we lost our Spanish-American markets. But under the Dingley duties labor in these factories has tripled, and not less than 50,000 people are employed, though we have not yet been able to regain our lost markets. It is absurd to think that we can export these goods to France under her minimum rates. Nearly all who are engaged in the business express the belief that if the treaty is ratified the blight will be like that under the Wilson law.

In the last part of the article a tribute is paid to the splendid fight of the jewelers against odds to have the treaty either amended or thrown out, and which resulted so effectively. The work done by the jewelers, through a committee of seven energetic manufacturers backed by the prayers of thousands of operatives and the "emergency fund" of \$100,000 raised in two hours one afternoon when things looked blue, has

never been realized to its full extent save by the few thoroughly conversant with the story, but the achievements of the jewelers in behalf of the country's industries are beginning to be appreciated at last.

Sale of Stocks in Bulk.

THE merchants of several States are greatly interested in bills pending in their respective Legislatures which aim to prevent the disposal of a stock of merchandise in bulk without notice to the creditors of the vendor. These bills provide in general, that such sale shall be presumed to be fraudulent and void as against such creditors, unless the vendor and vendee shall, at least five days before the sale, make an inventory in detail of the articles to be included in the sale, and the creditors notified personally or by registered mail of the proposed sale. There is no doubt that such a statute in any State would afford some protection to the wholesale dealer against fraudulent sales, while it would not impose undue hardship upon the retailer. It would prevent secret sales and afford an opportunity to creditors to protect themselves.

Trans-Atlantic Voyagers.

TO EUROPE.

O. D. Wormser, of Joseph Frankel's Sons, New York, and William Leeder, of Leeder & Bernkopf, Providence, R. I., left, yesterday, on the *Lahn*.

Simon Fink, of Fink, Bodenheimer & Co., New York, sails, March 9, on the *Lucania*.

F. Trebilcock, Toronto, Can., and Henry Witte, of Bawo & Dotter, New York, sailed, Wednesday, on the *Majestic*.

TO NEW YORK.

George H. Hodenpyl, of Hodenpyl & Sons, New York, returned from Europe, Sunday, on the *Rotterdam*.

L. W. Rubenstein, New York, returned from the Bermudas, last week, on the *Trinidad*.

S. Bass, New York; S. Lorie, of Saunders, Lorie & Co., Toronto, Can., arrived on the *Oceanic*.

Jeweler Alfred Hart and His Wife Lost in the Sinking of the "Rio Janeiro."

SAN FRANCISCO, Cal., Feb. 24.—Among the lives lost by the sinking of the Pacific Mail steamship, *Rio Janeiro*, Friday, according to the latest revised list of the passengers, were Alfred Hart and Mrs. Hart. Mr. Hart was formerly in the jewelry business here and at Los Angeles, but recently he had been in Manila. He was returning home when the steamer ran aground in the fog. The body of Mrs. Hart has been recovered.

\$2,500 for the Man Who Gave Information That Led to Lasar's Arrest.

BUFFALO, N. Y., Feb. 23.—It is announced that Government officials have paid \$2,500 to the person or persons who gave information which led to Max J. Lasar's arrest, while he was trying to smuggle \$31,000 worth of diamonds into this country by means of persuading a young couple to carry to the American side a package in which the diamonds were concealed.

Providence.

Charles F. Irons, of Irons & Russell, has been appointed administrator of the estate of the late William H. Handy.

W. Osmond Clark, of Clark & Coombs, 86 W. Exchange St., is compelled by illness to remain for some days at his home.

William Morton, silversmith, has removed from 69 Friendship St. to quarters in the Penholder building, 38 Friendship St.

A small fire in the shop of Ramsdell & Reynolds, makers of metal ornaments, 180 Friendship St., was extinguished with little damage, last Wednesday.

The firm style of Hatch & Becken, stone setters, 421 Weybosset St., has been changed to Hatch & Co., P. W. Hatch having bought out the interest of his former partner, J. A. Becken.

Secretary Marcus W. Morton has again returned to his duties at the office of the Manufacturing Jewelers' Board of Trade after a number of days' absence resulting from an attack of grip.

Ernest C. Baker, who is associated with his brother, George M. Baker, in the refining business at 91 Page St., was married, last week, to Miss Rose F. Freeman, daughter of Ald. Freeman, this city.

E. L. Fuller, of Charles E. Fuller, refiner, 100 Richmond St., was elected a member of the committee on admissions and of the house committee at the annual meeting of the Rhode Island Yacht Club, last week.

Among the imports received at the Port of Providence from foreign countries, the past week, were one package of imitation

precious stones, one package of precious stones and one package of glass stones from Havre, and one package of imitation precious stones from Bremen.

Ruel W. Glidden, a well known silversmith of this city and Attleboro, died, at his home, in Edgewood, last Sunday afternoon, after a brief illness. The deceased had followed the silversmith's trade at Frank M. Whiting & Co.'s, Attleboro, and in later years in this city, being employed by the Gorham Mfg. Co. At the time of his death he was in his 71st year and leaves a widow and three children, a daughter and two sons.

The old refining firm of Horace Remington & Son have become incorporated under the name of the Horace Remington & Sons Co., with a capital stock stated at \$15,000. According to the articles of association, which were filed with the Secretary of State, Thursday, the incorporators are Horace A. Remington, Albert A. Remington and Horace E. Remington, and the purpose of the corporation is to engage in the business of refining gold and silver, assaying and sweep smelting, and buying and selling gold, silver and other metals, and for the transaction of any other business connected therewith or incidental thereto. The business will be continued as before in the company's building, at 91 Friendship St., corner of Garnet St.

Attleboro.

William H. Goff, Jr., of William H. Goff, Jr., & Co., has the sympathy of the trade

in the loss of his brother, Howard C. Goff, a bright and promising school boy.

John M. Fisher, of J. M. Fisher & Co., and Herman T. Regnell, of Regnell, Bigney & Co., are the leaders in a movement among the Massachusetts Prohibition party to start their State campaign for next Fall.

Washington's Birthday was observed in Attleboro by the closing of most of the shops until Monday of this week. Work is dull just now, most of the shops being engaged either in taking stock or running with light forces two or three days a week. Only the cheaper lines of ladies' Spring goods show any signs of activity.

The arrest of Wilbert C. Trussell, in Boston, last week, for financial transactions of a shady nature, recalls an old affair of the jewelry district. The man, some years ago, lived in Attleboro and persuaded the jewelry manufacturers to subscribe over \$10,000 for the development of a patent he had taken out on a device to produce wonderfully cheap refrigeration. He spent quite a period in Canada shortly after the jewelers began to probe into the subject of what was being done with the funds.

A progressive movement which has been lately agitated has now taken definite form. A museum has been started under promising auspices at the high school building. In it will be exhibits illustrating the most tasteful work and best designs of the jewelry business, and the last four years of work in the instruction in drawing from now on will be to develop the boys and girls along this line and turn them out with a good basis for a factory education. The schools are to cater to the industry of the town.

Attleboro is in the final throes of a hot and bitter political conflict. Last week three caucuses were held and the following manufacturers received nominations: Alfred R. Crosby, Smith & Crosby; Everett S. Horton, Horton, Angell Co.; Raymond M. Horton, formerly of Walch & Horton; Louis J. Lamb, C. H. Allen & Co.; Charles E. Bliss, Bliss Bros.; Hiram R. Packard, with the Daggett & Clap Co.; Charles M. Robbins, Charles M. Robbins Co.; Herbert A. Clark, Horton, Angell Co., and Charles P. Keeler, McRae & Keeler.

North Attleboro.

John Butler, 70 years of age, and for more than a generation a prominent jewelry employe in North Attleboro factories, died last week.

Alton H. Riley, of Riley, French & Hefron, left, last week, with Mrs. Riley for a lengthy stay, pleasure seeking, at Palm Beach, Fla.

Neville Huntington, the colored man who confessed to the robbery of W. P. Ballou's retail jewelry store, last December, was sentenced, last week, in the Superior Court, at Taunton, to 15 months in the House of Correction.

North Attleboro's political crises come at a different time from those of Attleboro, but the municipal campaign is not far distant. The local press is agitating the candidacy of F. S. Gilbert for the position of Selectman.

ON MEMORANDUM

After the Holiday Clean-out

Your cases need filling up. WE will send you on approval anything you want in Diamonds and Diamond Jewelry to fill up. There's no question that prices will go still higher, so you'll be the gainer if you let us know at once just what you need.

V. W. ARING, N. Y.

CROSS & BEGUELIN

Importers and Cutters of Diamonds and Precious Stones

43 Rue de Meslay, PARIS

Telephone, 2188 Cortlandt

17 Maiden Lane, NEW YORK

New York Notes.

Hamrick & Co. will remove their business from 870 Broadway to the store at 866 Broadway.

The American Watch Case Co. are rapidly installing their machinery in their new factory and expect to resume work March 4.

Dan. I. Murray, jewelers' auctioneer, 3 Maiden Lane, is now conducting a successful sale at the French and Oriental Art Rooms, 55 W. Market St., Wilkes-Barre, Pa.

William E. Cohn, 39 Maiden Lane, has learned that oil has been found on land which he owns at Abilene, Tex., and has refused an offer of \$1,000 more than he paid for the land.

Frank Netschert, manufacturer of natural preserved plants for decorative purposes, has moved his show room from 7 Barclay St. to 129 Fifth Ave., where he has secured much larger and more attractive quarters for the display of his product.

The leading diamond importers and cutters of New York yesterday received notice of another advance by the "Syndicate" in the price of rough diamonds. The amount of the raise is 5 per cent, and the new price went into effect yesterday.

Morris Aronov, bankrupt, has applied to the United States District Court for a discharge of all his debts in bankruptcy. A hearing on the petition will be had before Judge Brown, March 6, when creditors may show cause why the petition should not be granted.

David Linder, 122 Essex St., against whom an involuntary petition in bankruptcy was filed last month, as published in THE CIRCULAR-WEEKLY, Jan. 30, was adjudicated a bankrupt by Judge Brown, of the United States District Court, Wednesday, after all objections had been withdrawn.

It is reported from labor circles that the Miscellaneous Trades Section of the Central Federated Union has suspended the jewelers' organization for having engaged non-affiliated musicians to play at their recent ball. None of the delegates of the suspended organization was present when the action was taken.

Charles Guerez, the Chilian jeweler who was despoiled of \$3,500 worth of diamonds two months ago in a panel room in "Soubrette Row," mistakenly accused a young woman at 33d St. and Broadway, Wednesday, of helping in his robbery. He caused considerable disturbance by so doing and was locked up on a charge of disorderly conduct.

At the instigation of the New York police, a warrant to search B. Braunstein's jewelry store, 121 Washington St., Hoboken, was issued recently. Jacob Svoboda, arrested for robbing W. Bott, told the police he had sold some of the booty to Braunstein. Bott, who went to the jewelry store, recognized there a magnifying glass as part of his property. The warrant was then issued. Braunstein is reported to have sailed for Germany.

A handsome silver loving cup was presented by the Independent Steam Fire Co., No. 7, of Charles Town, W. Va., to Charles Broadway Rouss, of New York, on the occasion of the latter's 65th birthday, Feb. 11. The cup, which is gold lined and richly chased, engraved and inscribed, was furnished by Charles W. Brown, jeweler, of Charles Town. The cup was presented to Mr. Rouss, in New York, by Turner Ashby Beal, on behalf of the donors.

Mr. Schoureck, who for many years has represented Deitsch Bros., manufacturers of leather goods, 14 E. 17th St., on the Pacific coast, was recently taken seriously ill in San Antonio while on his way to that territory. Mr. Schoureck is now

laid up at the Manger Hotel, that city, with grip and inflammatory rheumatism. His employers have sent one of their staff to look after him and see that he gets the best of care. As it will probably be about six weeks before he resumes his trip, Rudolph Klunk will temporarily cover his territory, visiting California and the middle west.

William Mallet, whose home is in Rochester, attempted suicide, Saturday, by cutting his throat, at 345 W. 27th St., where he had been stopping with his brother. Mallet had stopped here on his way to Ansonia, Conn., where he is interested in several clock patents, and had become mentally deranged. He was taken to the New York Hospital, where it is said his condition is critical.

Daniel Nathan, jeweler, 2248 Third Ave., who skipped out, Jan. 7, owing \$12,000, was arrested, Saturday, by order of the District-Attorney, and held for examination, March 7, in \$2,000 bail. After Nathan had skipped, Charles Altchul, on Jan. 9, obtained a warrant for his arrest, which could not be served. Nathan surrendered, Jan. 16, and was held in \$1,000 bail for examination on March 7. As a number of the creditors had reason to believe that this charge might not hold, Milton M. Goldsmith, an attorney representing L. Adler & Son and the S. F. Myers Co., went before the District-Attorney, last week, and made new charges, which resulted in Nathan's second arrest. The specific charge now against the prisoner is the larceny of \$1,020 worth of diamonds obtained on memorandum from L. Adler & Son, Jan. 7, the day he skipped. These goods were not given him for sale, but to put into his show window. Altogether, he obtained about \$3,800 worth of merchandise from the same firm. Nathan will be examined on both charges March 7.

until Monday, while new furnaces were being put into the building.

A fire in the factory building at 85 Crosby St., last week, caused slight damage by smoke and breakage to the factory of Fishel, Nessler & Co. on the top floor.

John Preston, jeweler, Middletown, N. Y., recently paid a short visit to his brother, Stephen Preston, Jr., jeweler, Mt. Vernon, and who for many years previous had been in business in Harlem.

Ludwig Nissen, of Ludwig Nissen & Co., was elected vice-chairman of the city committee of the Citizens' Union, at a meeting held Monday night. He is one of four vice-chairmen representing different boroughs of the city.

Charles Robertson, who is said to have been at one time a prominent jeweler of Maiden Lane but who for some years back had worked at his trade as an employe, died at his home, 405 Pearl St., Saturday.

The examination in bankruptcy of Morris J. Davidow was continued, Wednesday, at the office of referee Seaman Miller. Davidow was examined both by Charles Stecker, his own attorney, and G. H. Crawford, representing the creditors. The examination continues to-day.

A meeting of the creditors of the Barker Silver Co. was held, Wednesday, at the office of August H. Vanderpoel, referee in bankruptcy, 2 Wall St. No trustee was

elected, nor was any business of a definite nature accomplished. An adjournment was taken for three weeks.

Joseph Goodfriend, uncle of Meyer and Jacob Goodfriend, of Goodfriend Bros., 11 Maiden Lane, who was familiarly known to their many friends as "Uncle Joe," died, Friday, at the residence of Meyer Goodfriend, 14 E. 125th St. The deceased was 79 years old. Funeral services were held Sunday morning.

Frank Chester Fisher, who is said to have been for 36 years in the jewelry trade, died at his home, 215 W. 51st St., Friday, after a month's illness, following a stroke of paralysis. He was 54 years old and the son of James Potter Fisher, of Providence, R. I. He leaves a widow, who was formerly Miss Josephine Drummond.

Customs Inspector Donohue, last week, seized from a passenger on the North German Lloyd steamship *Lahn* an emerald, diamond and pearl necklace, two lace collars, and some other articles not usually carried in pockets. The jewels had not been declared, and they were taken to the seizure room in the Public Stores. Their value was said to be about \$500. The passenger, who gave his name as E. Zimmerman, of Atlanta, was not arrested.

A package of loose diamonds, imported into this country and consigned to Samuel A. Buitenkant, was ordered seized, last week, for undervaluation. The diamonds

were invoiced at \$13,000, but when examined by Jewelry Examiner Mindil at the Appraisers' Stores, Wednesday, he placed their value at \$21,600. The case will probably be appealed to the General Appraisers for reappraisal. Customs authorities were remarkably reticent about this case, and it was impossible to learn the address of Mr. Buitenkant, whose nervous haste to get the goods through had first aroused suspicion, or the name of the steamer on which his property arrived. At the Law Department of the Custom House, Monday, it was said that no official report of the case had yet been received.

A petition for a writ of certiorari has been filed in the United States Supreme Court, at Washington, with the idea of bringing before that court the action known as the *United States vs. Rud. C. Hahn*, decided by the United States Circuit Court of Appeals, in New York, a year ago. This action was in relation to the duty under the tariff of 1883 upon agate penholders and other articles, and among other things involved the question as to what was a precious stone. The action in bringing this case to the Supreme Court was taken, in order, as foretold in *THE CIRCULAR-WEEKLY* a few weeks ago, to get, if possible, from the highest court, an adjudication as to exactly what is and what is not a precious stone. The petition for the writ of certiorari was submitted by Solicitor-General Richards on behalf of the United States; Comstock and Brown represented the importer and filed a brief in opposition.

Judge Lacombe in the United States Circuit Court, Saturday, signed orders directing that certain parts of the answers filed by the Ansonia Clock Co., the New Haven Clock Co. and the Waterbury Clock Co. to the actions brought against them some time ago by the Manhattan Watch Co., be expunged from the records. These actions, which, as published in detail in *THE CIRCULAR-WEEKLY*, Nov. 14, 1900, were to recover for an alleged infringement of a patent on an improvement in cheap watches granted to Edmond Kuhn, Nov. 27, 1883, and eventually assigned to the Manhattan Watch Co. In their answers to the suits, filed last month, the defendant companies, besides denying infringement, denied that the Manhattan Watch Co. were an existing corporation, claimed that they wound up affairs and went out of business 10 years ago, and made other allegations similar in effect. To these statements the Manhattan Watch Co. took exception, and asked that they be expunged from the record. After hearing argument of counsel, Judge Lacombe granted the motion.

BROOKLYN.

P. A. Becker, formerly a manufacturer of miniature glass display cases for jewelers, at 243 Willoughby St., will be located at 45-51 De Kalb Ave., March 1.

Harry Devere and Louisa Zath were held for further examination by Magistrate Kramer in the Lee Ave. Court, last week, charged with stealing a gold watch, valued at \$75, from Frederick Martin, a jeweler, 933 Broadway.

Gilmon E. Silsbee, a restaurant keeper of the borough, was ordered arrested, Thurs-

day, by Magistrate Brenner, Silsbee, Wednesday morning, called on E. Haas, a diamond broker of 1655 Broadway, Manhattan, and asked Haas to change a \$100 bill. He was accommodated, but when Haas made a demand for the \$100 bill, Silsbee expressed surprise. Haas obtained a warrant for Silsbee's arrest, but when Magistrate Brenner called the case neither Silsbee nor Haas was in court. Some one explained that it was all a joke and that the case had been settled. The Magistrate refused to consider it a joke and ordered a policeman to arrest Silsbee.

James Hoke, a working jeweler, who was arrested, recently, for making away with several watches belonging to his employer, was committed for the action of the Grand Jury, last week, by Magistrate Brenner in Adams St. Police Court.

John Gordon, a jeweler of Richmond Hill, died suddenly of acute pneumonia, Monday morning, in the Morris Park Hotel, at the corner of Atlantic Ave. and Lefferts Pl. Gordon was on his way to business in the city when stricken and was carried to the hotel, where he died a short time after.

Last Week's New York Arrivals.

THE CIRCULAR-WEEKLY has perfected arrangements for obtaining the names and hotel addresses of all the latest buyers visiting New York, and each day posts in its office, at John St., cor. Broadway, a bulletin which every member of the trade is cordially invited to copy.

The stock and fixtures of the bankrupt E. K. Gifford Co., Mansfield, O., have been sold to T. E. Black for \$1,220.

The jewelry store of J. H. Grubb & Co., Thurmond, W. Va., was practically ruined by a fire which destroyed nearly all the business section of that town, Saturday.

The store of Warren T. Gressman, Hamburg, N. Y., was gutted by fire Friday, causing a damage estimated at \$1,000, with no insurance. He will resume business as soon as his stock can be replaced.

The directors of the Oneida Silver Ware Mfg. Co., Oneida, N. Y., met last week for the purpose of organizing and choosing a general manager. The directors elected for the ensuing year are: Thomas D. Wilkin, Charles A. Stringer, Stephen C. Waterman, William E. Witter and Sidney W. Moore.

J. T. Scott & Co. Unable to Overcome the Stress of Their Old Failure.

J. T. Scott & Co., jobbers in watches, diamonds and jewelry, 4 Maiden Lane, New York, made an assignment, Thursday, to Leo Wormser, of the Julius King Optical Co., giving no preferences. The firm were composed of James T. Scott and William P. Wallace, who have run the business since May, 1898. The reasons stated for the failure were lack of capital, bad business and poor collections. It has been well known that the firm have been making an up-hill fight for several years, having been handicapped by impaired credit due to their previous assignment, in 1894.

Assignee Wormser stated to a CIRCULAR-WEEKLY reporter that he had taken hold and had men working on the books, making up the inventory and schedules, which he was sure would be ready for filing within the 20 days allowed. "Until these are made," said Mr. Wormser, "no statement as to the liabilities and assets can be given, and the reported statements in the newspapers, that I put the liabilities at over \$100,000, is absolutely without foundation." Whether they were above or below that sum Mr. Wormser stated he could not say, nor did he give the names of the principal creditors. A number of relatives are known to be creditors, but these have had their money in the business for a great many years. Mr. Wormser stated that as soon as the schedules were ready a meeting of the creditors would immediately be called. The firm had not filed a petition in bankruptcy because they believed an assignment would be better for the creditors.

The firm were founded in 1847 by James T. Scott, the father of the present head. The business was first at Wheeling, W. Va., then at Pittsburgh, Pa., and in 1870 was moved to New York. The present James T. Scott became a partner in 1874 and, after his father's death, with his brother, S. C. Scott, continued the business. In May, 1894, they assigned, but settled with the creditors at 40 per cent. and continued. S. C. Scott retired in May, 1898, and Mr. Wallace became a partner. The members of the firm have always been highly regarded personally.

An involuntary petition in bankruptcy was filed against J. T. Scott & Co., yesterday afternoon, by Stern, Singer & Barr, as attorneys for three creditors: Moore & Son, for \$2,555.99; Schmitz, Moore & Co., \$581.49, and August Meyer, \$4.05 on a claim assigned by Block & Bergfels. They ask that the firm be declared bankrupt, alleging the assignment, made Friday, by the firm as the act of bankruptcy.

Edward D. Scott has moved from Rockaway, N. J., to Long Island.

Charles V. Mount's store at Shenandoah, Ia., was badly damaged by fire, Wednesday.

John E. Van Natta, Lewistown, Pa., has had a well executed portrait of Gen. J. P. Taylor on exhibition in his show window.

In a fire in Concord, N. H., Feb. 23, J. C. Derby's jewelry store was damaged somewhat by smoke and water.

Shuttles Bros. & Lewis, Dallas, Tex., have amended their charter by increasing their capital stock from \$30,500 to \$50,000.

Trade Gossip.

Jewelers, precious stone dealers and others who are dissatisfied with their present location and are on the lookout for new quarters will find it to their advantage to look at the large and light offices which are offered for rent in the Morton building, a new and fire-proof structure at 112-114 Nassau St., New York.

J. Heilbronn & S. Marchand, 26 John St., New York, have just received the first instalment of rough diamonds from the large purchase recently made by them abroad. The lot comprises some exceedingly fine stones, which are already in process of polishing, and will be ready for the trade in about four weeks.

The pocket catalogue of diamonds and precious stones for 1901, issued by S. C. Scott Mfg. Co., 9 Maiden Lane, New York, is a booklet which every jeweler will find both useful and convenient. One of its features is a chart for the grading of diamonds, in which the character of the stones is classified under 14 heads, the classifications being used in connection with an illustrated price list in order to show the value of jewelry mounted with different grades of stones. The high value set upon this method of classification is shown by the many letters of commendation from jewelers called forth by the previous use of the chart. A new feature of the booklet is a brief series of articles on pearls and precious stones, condensed from the best authorities on the subject in such a way as to avoid the use of technical phraseology, while giving all that it is important and useful to know concerning gems. The colored stones are illustrated in color, with prices of the various weights of stones of a good medium quality. The sizes of the different colored stones of various weights are shown, so that the jeweler may easily estimate what weight he needs for mounting. A diamond table and other matter of useful information complete the book, which will be sent to the trade on application.

A pearl button factory is about to begin business at Burlington, Ia., to employ 300 people.

Olaf Ovrom, Waupaca, Wis., has sold out to C. M. Hall, who was a clerk in the store.

William H. Packard, Mt. Gilead, O., has sold out to W. C. Morrison, who comes from Cleveland, O.

PIRIE MAC DONALD

gives you

GREETING. He has a workshop on the 16th floor of the Washington Life Building, New York, where he makes photographs and various other kinds of portraits of men. Not but that he loves women, as all good men should, but because he knows he can make men's pictures best. "Blessed is that man who has found his work."

J. L. Fincher & Son have succeeded J. L. Fincher, Fort Valley, Ga.

E. Dosh, Guthrie Center, Ia., has given a realty mortgage for \$2,500.

W. E. Wilson, Navasota, Tex., has been sued for a debt amounting to \$64.

H. F. Waddell will engage in the jewelry business at Stewart, Minn., at once.

A voluntary petition in bankruptcy has been filed by J. A. Schirman, Fargo, N. D.

H. P. Turner has opened a watchmaking and jewelry office at Howard Lake, Minn.

J. H. Dunnaway, recently of Duluth, Minn., has moved to Fort Benton, Mon.

Christian Iron, Harper, Kan., has given a quit claim deed for a consideration of \$17.

A new stock of jewelry has been opened at Thief River Falls, Minn., by A. Anderson.

F. J. Dwyer has sold his stock of jewelry and notions in Rockwall, Tex., to J. R. Jones.

George L. Andrus has opened a new jewelry store at 318 E. Main St., Rochester, N. Y.

Al. Harman has succeeded to the stock of jewelry, etc., of Harman & Birmingham, Austin, Ark.

John P. Graham, with Cozad & Freeman, Des Moines, Ia., died of heart failure, recently.

Jacobson Bros., Hardwick, Minn., will locate at Howard Lake, Minn., for the jewelry business.

E. A. Merritt, of Merritt & Co., Northville, Mich., has been married to Miss Norine Clarkson.

Joseph K. Roumain, Baton Rouge, La., has recently returned from a purchasing tour in the north.

Myron Dubois, Little Falls, N. Y., has been confined to his home as a result of having been vaccinated.

Tabet Bros. have succeeded to the jewelry and dry goods business of Jowdy & Tabet, San Antonio, Tex.

Alden R. Vaughan & Co., Pawtucket, R. I., are having a clearance sale previous to moving into a new store.

E. H. Hopkins, Penn Yan, N. Y., is enjoying a well earned vacation at Los Angeles, Cal., the guest of his brother, Frank.

Harry Casey, suspected of robbing Baker & Ricard's store, Toledo, O., April 2, 1897, was indicted by the Grand Jury, recently.

Soldosky, Olson & Co., who have been engaged in the jewelry and clothing business in Briceyn, Minn., have dissolved partnership.

N. J. Fellows, recently with Albert H. Pike, Rockford, Ill., has been chosen secretary of a company who will manufacture jewelry in Cincinnati, O.

R. E. Brigham has bought out P. Davidson, who for 31 years has been in business in Schuylerville, N. Y. Mr. Brigham was with Mr. Davidson four years before buying him out.

The Bonitia Diamond Co., Worcester, Mass., offered \$100 to anybody who could select a genuine diamond from their variety of imitation stones. Miss J. E. Murphy did it last week and, it is said, got the money.

Charles Bahe and Marion Mann, who were held at Faribault, Minn., on a charge of robbing the store of Frederick Z. Sherwood, had a hearing and were bound over to the action of the Grand Jury at the May term of the District Court.

The stock of John C. Alexander, Middletown, O., has been attached by a Court order in a suit brought by Albert Bros., Cincinnati, O., to recover \$4,306, alleged to be due on a note. The goods may be sold at auction by a receiver.

Hon. Roland Ellis, attorney for the respondent in the case of Samuel Steinhart against the Lazarus Jewelry Co., Macon, Ga., has filed answer in the United States Court. The respondent objects to the original bill and all amendments, and complains that the amount involved was not sufficient to put the company in the Court of Bankruptcy.

Louis I. Stephens, Jacksonville, Fla., commenced a jewelry removal auction sale Feb. 23. Mrs. A. E. Martin, formerly of the firm of Cooke & Martin, will assist during the sale. Mr. Stephens will remove from W. Bay St. to 20 Main St., near the stand he occupied for many years, and from which he was compelled to remove last Summer to make way for the erection of a big business block.

John J. Ferguson, Alexandria, La., said to be the oldest established jeweler in central Louisiana, has ceased doing business in that line. He commenced in the jewelry business there in 1865, and had a jewelry store from that time to the present day, over 35 years. A number of young jewelers now doing business started with him as apprentices. Mr. Ferguson will still continue in active business, having with his wife opened a hotel there, the Hotel Ferguson. His jewelry stock has been turned over to his son, Dave C. Ferguson, who will open a jewelry store at Crowley, La.

The
Mercantile National Bank

OF THE CITY OF NEW YORK,

BROADWAY AND DEY STREET,

Solicits Accounts from the Jewelry Trade.

John L. Warner, jeweler, Anita, Pa., is dead.

R. H. Ayer, jeweler, Coneord, N. H., is dead.

H. W. Senior has opened a jewelry store at Montgomery, N. Y.

Amiel Grandmason has opened a small repair shop at Kenton, O.

C. Edward Eager, Syracuse, N. Y., has been having an auction sale.

W. F. Lang has established himself as a watch and clock repairer at Winchester, Ky.

Lewis Hartman & Co., Tiffin, O., have transferred their jewelry stock to Standt & Miller.

L. H. Bellesfield, Allentown, Pa., will move next week from his present store to 615 Linden St.

A. J. Ness will open a jewelry store at La Crosse, Wis., in the store formerly occupied by M. N. Grasyb.

Goetz & Yaffee, Knoxville, Tenn., have moved from 117½ Gay St. to a larger and better store at 205 Gay St.

J. K. Pickett will occupy improved quarters on the ground floor for his watch repairing business at Salem, O.

The engagement is announced of jeweler William P. Robinson, Portsmouth, N. H., and Miss Florence B. Hill.

Lawrence T. Smith, of Smith Bros., Greenfield, Ind., has sold his interest in the business to his brother, Henry.

William H. Merrill has moved from Washington, N. J., to Pen Argyl, Pa., where he will conduct a jewelry store.

R. H. Rickert, Statesville, N. C., has newly fitted up a store in the Mills building and has moved his stock to the new location.

E. F. Linton, a traveling jewelry peddler, was arrested and fined \$50 and costs, at Durant, Miss., for peddling without a license.

Harry Davis, 810 Kansas Ave., Topeka, Kan., has moved from that location and disposed of most of his stock of jewelry at auction.

William T. Newton, Knoxville, Tenn., will move, July 1, from 241 to 313 Gay St., where he will have a store better located than his present one.

Charles H. Worthington will open a jewelry store at Westfield, Mass., April 1. He has been with Robert C. Hollister, jeweler, of the same place.

J. W. Tuttle & Co., Plattsburgh, N. Y., have taken Fred. Parshall, an employe, into partnership, and the firm name is now the Tuttle & Parshall Co.

A son of Page J. Smith, Cumberland, Md., graduated from West Point, last week, and is now enjoying leave at his home before being assigned to duty in the army.

R. St. P. Smith and A. J. Webster, for several years with J. T. Allen & Co., jewelers, Richmond, Va., have located at 626 E. Main St., that city, to do repairing for the trade.

The jewelry store of L. G. Trower, Oberlin, Kan., was robbed of \$100 worth of watches and rings recently. The goods

were found where the burglars hid them and two arrests were made.

H. J. Crocker, Sons & Co. lost about \$500 worth of jewelry and other goods from their general store at Orlinda, Tenn., by burglary. Bloodhounds were placed on the trail without result.

Morek & Kirberger, Warren, Pa., have placed a second order with the Cleveland Store Fixture Co., Cleveland, O., for the installation of store fittings and fixtures, to be completed by Oct. 1.

The store of J. H. Gabathuler, Davenport, Ia., was flooded with water on the occasion of the fire in the upper stories of the Windsor hotel block, last Wednesday. The loss was covered by insurance.

O. A. Pease, one of the oldest established jewelers in Iowa, has retired from the business he has conducted for 30 years at Corning, Ia., on account of his health. J. E. Carmichael has purchased the stock and continues the business.

The Capital City Jewelry Co., of which B. Scigel is the principal stockholder, have perfected their organization and leased quarters in the Youngerman building at W. 5th and Mulberry Sts., Des Moines, Ia. They will engage in the wholesale jewelry business, employing a capital of about \$20,000. Several traveling men will be put on the road. Mr. Scigel has conducted a pawnbroking and retail jewelry establishment for a number of years at W. 4th and Walnut Sts. He has sold that business to an Omaha man, who takes possession at once.

Copyrighted Sept., 1900, by S. C. SCOTT.

Whether loose

or mounted every diamond we send out is marked with a grade number or letter to indicate the quality, and, remember, we guarantee them to be exactly as represented.

A feature of our Grading System is that it tells without examination whether a stone is perfect or not. This is an aid to even those who are well posted in the different qualities.

Dealers who do not feel competent to rely entirely on their own judgment will find our System a great help, both in ordering and selling.

Our Guarantee, in addition to yours, makes easier selling and satisfied customers, and the additional satisfaction of having dealt fairly with them.

Our prices, you will find, will compare favorably with any in the market. When you have a prospective sale for something not in stock, a trial order will convince you.

Traveling representatives may consider these columns open for the publication of any news or items of interest regarding themselves or their conferees.

Feb. 18, D. J. Reagan started on a long trip west for Baldwin, Miller & Co., Indianapolis, Ind. He will cover his route in western Indiana, Illinois, Kansas and

Iowa.

Harry Snow is on the road visiting the western trade in the interest of the Meyer Jewelry Co., Kansas City, Mo.

The following traveling men interviewed the jewelers of Portland, Ore., the past week: Morry Mayer, M. Schussler & Co., Inc., San Francisco. Frank G. Moyer, the American Watch Case Co., New York; Walter Wise, J. Hoare & Co., Corning, N. Y.; and Charles Weinschenk, Armer & Weinschenk, San Francisco, Cal.

Traveling men calling in Davenport, Ia., the past week were: J. E. Vander Voort, Vander Voort Bros.; H. A. Reichman, Joseph H. Fink & Co.; Charles Lochner, Hayes Bros.; S. W. Frolichstein, Frolichstein & England; R. L. Kintz, E. G. Webster & Son; A. S. Wormood, Illinois Watch Co.; A. D. Shoup, Ira L. Henry Co.; G. E. Tinker, William B. Durgin Co.; J. R. Payne, Meriden Cutlery Co.; and B. Kaufman, for Fred. Kaufman.

Among the traveling men in Indianapolis, Ind., last week were: J. R. Davidson, Philadelphia Watch Case Co.; Fred. L. Pettee, Waterbury Clock Co.; Ives L. Lake, American Waltham Watch Co.; Mr. Shiman, Shiman Bros.; M. Newhouse, Workman & Newman; J. G. Fuller, Fuller, Carpenter & Co.; I. Price, Byron L. Strasburger & Co., and representatives of Whiting & Davis and Silbermann & Co.

The following eastern representatives were in St. Louis, Mo., last week: M. Baum, Rothschild Bros.; S. A. Goldsmith, A. Goldsmith & Son; Seymour W. Frolichstein, Frolichstein & England; A. Rosenthal; F. G. Gruen, D. Gruen, Sons & Co.; G. W. White, W. S. Hicks' Sons; M. L. Barnard, J. B. Bowden & Co.; Max Arnstein, Arnstein Bros. & Co.; Theodore Yankauer, Rees & Yankauer; and Otto Sinauer, Oppenheimer Bros. & Veith.

The following traveling salesmen made Minneapolis and St. Paul, Minn., the week past: L. E. Smith, M. B. Bryant & Co.; S. C. Howard, Dominick & Haff; Mr. Eckfeldt, Eckfeldt & Ackley; Harry Bliss, Krentz & Co.; George J. Gruen, D. Gruen, Sons & Co.; O. Bartel, Western Clock Mfg. Co.; A. Weiss, for J. J. Cohn; Mr. Cutter, Elgin National Watch Co.; Mr. Amberg, Amberg & Co.; J. Rothschild, Ingomar Goldsmith & Co.; I. Speyer, Goldsmith Bros.; Mr. Leubuscher, O. E. Bell Co.; Mr. Rosenbaum, Rosenbaum & Adler; J. W. Tice, for Adolphe Schwob; Axel Madsen, Sproehle & Co.; G. W. Blecker, Martin, Copeland & Co.

The eastern traveling men who called on the trade of Kansas City, Mo., last week were: Charles Lochner, Hayes Bros.; F. C. Winship, T. B. Clark & Co.; M. W. Smith, S. B. Champlin Co.; Walter S. Noon, W. F. Cory & Bro.; S. A. Goldsmith, Adolph Goldsmith & Son; K. H. Clark, Towle Mfg. Co.; W. H. Gregory, Strobell & Crane; J. Williams, for G. Armeny; C. N. Perley, Alling & Co.; A. N. Brittan, M. A. Mead & Co. and the Regal Jewelry Co.; Richard Meeker, Bates Bros. Co.; Hubert Somborn, Albert Berger & Co.; H. C. McCConnell, C. G. Alford & Co.; E. L. Weidlich, W. Weidlich & Bro.; Walter S. Strauss, Jacob Strauss & Sons; Mr. Kenny, L. E. Waterman Co.; C. P. Young, William B. Kerr & Co.; Carl M. Fishel, Fishel, Nessler & Co.

Travelers in Pittsburgh, Pa., recently were: Mr. Sideman, Redlich & Co.; T. J. Watter, Allison & Lamson; F. D. Heffron, Riley, French & Heffron; H. Henrich; G. T. Howard, Towle Mfg. Co.; M.

Baum, Rothschild Bros.; E. Untermeyer, Charles Keller & Co.; George H. Remington, Waite, Mathewson & Co.; A. J. Sherrard, Enos Richardson & Co.; J. Fred. Crane, Mandeville, Carrow & Crane; J. W. McClannin, International Silver Co.; Max Huss, S. & A. Borgzinner; M. Kohn, Silbermann & Co.; J. F. Dean, Reed & Barton; Charles S. Isabel, Arnstein Bros. & Co.; P. M. Layman, Riker Bros.; Harry E. Farquharson, Bliss Bros.; Mr. Somes, S. O. Bigney & Co.; F. C. Allen, D. Gruen, Sons & Co.; C. A. Hulstrom, Wilcox & Evertsen; Fred. Clarkson, Albert Lorsch & Co.; William Matschke, A. Joralemon & Son; R. H. Stevenson, E. G. Webster & Son; Walter R. Bristol, William Rogers Mfg. Co.; L. Strauss, H. H. Curtis Co.; Frank J. Keller, The Keller Mfg. Co.; Lucien Rockwell, Poole Silver Co.; George W. White, William S. Hicks' Sons; Gust. A. Keller, Endemann & Churchill; John C. Hull, The Silver Plate Cutlery Co.; J. E. Simonson and Frank L. Wood, Ludwig Nissen & Co.

Springfield, Mass.

L. S. Stowe has been elected to the corporation of the Home for Aged Men.

Peter Horenstein, who stole some garnets and opals from E. Goldberg, a jewelry peddler, was fined \$30 in Police Court.

J. D. Kingsberg, jeweler, has established a loan business in connection with his jewelry store, and will hereafter loan money on watches and diamonds.

F. L. True, of True Bros., had an attack of heart disease while going home on a car one evening recently, and for a time it looked as if he might not survive. He was first taken on the car, and upon being removed to the walk collapsed again. It was some time before he could be removed to his home. He was laid up for several days.

The increasing business of O. W. Bullock & Co. has led that firm to hire new quarters, and the first floor and basement of the building at the corner of Dwight and Taylor Sts., comprising about 18,000 feet, have been rented. The work of removal will begin April 1 and progress slowly until the last of the month, when there will be a shut down in order to move the machinery. The firm manufacture watchmakers', jewelers' and dentists' tools, beside specialties in fine hardware, and employ a considerable force the year round. Other space in the same building will be secured if the business grows as expected.

Death of Henry L. Jacot.

SOUTH BETHLEHEM, Pa., Feb. 20.—Henry L. Jacot, for 30 years a jeweler here, died yesterday after an illness of several weeks' duration, which included a stroke of apoplexy. He was 71 years old.

Mr. Jacot was a native of France. When a young man he learned the trade of watchmaker, which occupation he skillfully followed up to the time of his last illness. He came to Bethlehem about 30 years ago and entered the employ of James K. Rauch. After leaving the employ of Mr. Rauch, he opened a store for himself. He was an expert mechanic and was considered one of the best at his trade in this section of the State.

He is survived by his wife, Dermia, and by three sons and two daughters. They are Gustavo, of Bethlehem; Henry, of New York; Mrs. Robert E. de Schweinitz, Victor and Fannie.

Connecticut.

Charles P. Buskirk, Winsted, is rapidly getting settled in his new and attractive jewelry store in Cavagnaro's block.

A. W. Austin, Norwalk, will, on or before April 1, move to 40 Wall St., where he will have a lighter and more desirable store.

In a fire in New Britain, on the morning of Feb. 21, Samuel Greenstein, watchmaker and jeweler, lost, according to his estimate, \$400.

The New Haven Clock Co., New Haven, ask for a reduction in their taxes, as assessed on their New Haven plant. The plant was assessed at \$250,000.

J. D. Thomas, Thompsonville, was last week called to Philadelphia, Pa., to attend the funeral of his aunt. During his absence Robert F. King had charge of his business.

The National Self-Winding Clock Co., Bristol, have established a depot for the benefit of the local jewelry trade at the McGowan Cycle Co., 155 Orange St., New Haven.

The marriage is announced of J. Hart Welch, Jr., and Miss Maud Bullen, on Thursday last, in New York. The groom is the eldest son of J. Hart Welch, president of the E. N. Welch Mfg. Co., Forestville. He is a member of the Welch & Osborne Co., wholesale dealers in clocks, 45 Maiden Lane, New York.

A slight fire occurred at Rogers & Brother's factory, Waterbury, last week. A small frame building used as a stock room for dust, in the rear of the main factory, was burned. Companies from the center responded quickly to the call, only to find that in the meantime the fire had been put out by the members of the private company at the factory, and the automatic sprinklers in the building where the fire started. The damage to the structure was very slight.

Through the effective work of the fire department, Miller Bros.' Cutlery Co., Meriden, escaped a destructive fire early last Tuesday night. A blaze in the three story wooden building in the rear of the main factory, known as the shear department, caused a loss of about \$300 to the building. Water damaged probably \$2,500 worth of goods and machinery. The fire originated from an exploded lamp which set a can of japan ablaze in Wrigglesworth & Son's shear department on the second floor of the rear building.

The Rogers Silver Plate Co., Danbury, Feb. 23, completed a full sized hatchet,

heavily plated with silver, which was shipped to Wichita, Kan., addressed to Mrs. Carrie Nation, the saloon wrecker. The instrument was inclosed in a leather case, so arranged that Mrs. Nation may carry it handily when on her crusades. The express package containing the hatchet and case was inscribed, "From Thomas S. Turrell, Medina, N. Y., who will gladly furnish more hatchets if they are needed."

George W. Mitchell, of Bristol, trustee under the will of E. N. Welch, has been given judgment for \$1,100 and \$28.70 costs in the suit against Ida D. Cleveland, of Plainville, formerly of Bristol. April 15 has been set as the last day for redemption. The property in question is located in Plainville and formerly belonged to R. A. Potter. He transferred the land to Mrs. Cleveland in 1899, subject to a former mortgage of \$1,000, as evidenced by a note in possession of the trustee. The suit to foreclose was brought in October, 1900. Judgment was given by Judge Elmer in the Superior Court last week.

The following, recorded in Wallingford Town Clerk's office, last week, is self-explanatory: "This is to certify that at the annual meeting of The Rogers Brothers Manufacturing Company, a corporation of the State of Maine, held on January 16, 1901, at Portland, Maine, the name of the said Rogers Brothers Manufacturing Company was duly and legally changed to The Simeon L. and George H. Rogers Company. In witness whereof, I, George H. Rogers, of the county of Hartford, State of Connecticut, secretary of the said The Simeon L. and George H. Rogers Company, also secretary of said The Rogers Brothers Manufacturing Company before said change of name have hereunto set my hand and seal this 16th day of February, A. D., 1901. The Rogers Brothers Manufacturing Company and The Simeon L. and George H. Rogers Company. By George H. Rogers. Received from record February 18, 1901, at 7 o'clock P. M. and recorded by me, Henry Martin, Assistant Town Clerk."

The owner of the store occupied by W. M. Farrington, Bangor, Me., has decided to either build on the front of the block or move the present block out to the street line. Mr. Farrington has recently added an engraving machine to his outfit and is doing some fine work.

Know The Weight

of the gold in a watch case and you know how good the case is. That's the way you buy solid gold cases. That's the way you ought to buy filled cases also. Then you don't have to depend upon the word or guarantee of the maker for the lasting quality. **BELL SPECIAL 14K. GOLD-FILLED CASES** are all **10 dwt. gold standard**. That is, there are 10 dwts. of gold in an 18-size hunting case—other sizes in proportion—and they are so stamped in the gold. They are the only filled cases made with the quality and quantity of gold stamped in the case. They are the best cases in every way for your fine trade. Write us for prices. Remember, we sell to you direct and give you the middleman's profit.

Any emblem or monogram, plain or engine-turned, made to order for from 25 cents to \$1.00 over price of plain polished case.

1 Maiden Lane,

NEW YORK.

Chicago Notes.

All communications in reference to the Chicago department of *The Jewelers' Circular-Weekly*, addressed to Stephen Parlin, 134 Van Buren St., Room 414, Chicago, will receive prompt attention.

Mr. Zuckerberg, of L. Seligman Jewelry Co., is in town.

A. L. Fisher, of B. F. Norris, Alister & Co., has returned from a visit east.

A petition has been filed, it is reported, to place H. G. Rouse, Peoria, Ill., in involuntary bankruptcy.

Washington's Birthday was observed by the wholesale trade, all closing at 12 o'clock and most closing all day.

Joseph Schoenthaler has returned from a visit to New Orleans, where he had been "taking in" the Mardi Gras.

C. P. Dungan, Chicago manager for the Meriden Britannia Co., has gone on a visit to the works at Meriden, Conn. He will make a short stop at New York.

Mrs. W. P. Waters, wife of W. P. Waters, jeweler, Sheridan, Wyo., is in the city on a purchasing trip. Mrs. Waters looks after the millinery side of the store.

Arthur Bradshaw, of The International Silver Co., has been in town the past few days. Mr. Sherman, of Simpson, Hall, Miller & Co., is in the city. C. A. Barnum, of Meriden Britannia Co., was a visitor to the city, last week.

A very pretty wedding took place, last week, at Morris, Ill., the contracting parties being John Bonar and Miss Stella Johnson. Mr. Bonar has been for years the manager of the jewelry business of S. C. J. Peterson, and Miss Johnson is a daughter of Sheriff C. W. Johnson.

Benjamin Berkovitz, jeweler, who in past years conducted shops in various parts of the city, disappeared last August, and it is claimed that valuables worth several hundred dollars, which had been left with him for repairs, disappeared at the same time. Berkovitz was located in Joliet, last Thursday, and placed under arrest by Chicago officers.

The following out-of-town buyers were in town, last week: Mr. Ferguson, of Ferguson & Craig, Champaign, Ill.; D. W. Bratton, Brazil, Ind.; C. W. Fenn, Prophetstown, Ill.; George O. Warren, Sycamore, Ill.; J. F. Lindvall, Moline, Ill.; E. P. Sherman, Gray's Lake, Ill.; W. J. Keating, Watertown, S. D.; H. F. Witt, Sycamore, Ill.; E. P. Sundberg, Fargo, N. D.

Ruben W. Wheeler, Penn Yan, N. Y., has been having an auction sale.

Cincinnati.

John R. Costen has applied for a divorce from his wife.

A. J. Thoma, of Thoma Bros., started on a trip, last week, and almost immediately began sending in orders.

Frank Herschede reports better sales this month than in years at this season. Many large pieces were sold and the hall clock trade was quite an item.

Otto Heeren, of Heeren Bros. & Co., Pittsburgh, Pa., stopped over a short time in Cincinnati to see his friends, en route home from a trip west. He is very optimistic about the business prospects for this year.

Two men were discovered Friday trying to force entrance into A. Demois's jewelry store, E. 4th St., and were arrested. They claimed to have been drunk and not to know what they were doing. They were sentenced to the workhouse.

The Cincinnati police think they have located some of the watches stolen from William S. Tussing, Columbus, last week. A number of new watches were pawned by two negroes in second-hand stores and the police located the men. The men are being held for identification.

A large number of out-of-town jewelers were in town, last week, to attend the annual meeting of the Ohio Society of Scottish Rite Masons. Among them were: A. P. McConahay and John Van Liew, Van Wert; Frank Henn, Chillicothe, O.; James Wetherell, Parkersburg, W. Va.; J. W. Boyer, Sistrerville, W. Va.; H. A. Bedel, Jackson, O.; G. McMurchy, New Richmond, O.

The United States Watch Co. have sent out a circular to the trade announcing their readiness to fill orders for gold or silver cases. The company were incorporated under the laws of Kentucky and they expected to occupy the old quarters in Newport, Ky., of the Wadsworth Watch Case Co., but a lease could not be secured. Quarters were finally secured at the corner of Pearl and Ludlow Sts., this city.

The wedding of Miss Lillian Gutmann, daughter of the late Louis Gutmann, to H. Jacobs, of Natchez, Miss., which was postponed on account of her father's death, last month, took place Monday evening with only immediate friends and relatives present. Mr. Jacobs expects to be admitted to the firm of L. Gutmann & Sons about June 1, after stocktaking. The firm will continue under the same name as heretofore.

The factory of Joseph Noterman & Co. is now thoroughly equipped for the big business which is expected. The two upper floors are devoted to manufacturing. They

make all their own dies and, being the oldest house in the city, have the largest stock of dies of any concern; also being a progressive house, they are continually putting in new appliances to facilitate work, and utilize every new improvement for the furtherance of their business. Their offices are on the second floor and are handsomely fitted with every convenience. This is one of the largest diamond mounting manufacturing concerns in the country and dates back to the '50s, when Joseph Noterman, Sr., made the name noted for diamond mountings.

Louis McDowell, who tried to swindle three jewelry firms out of some diamonds by claiming to be the son of Eugene Zimmermann, a wealthy railroad man and father-in-law of the Duke of Manchester, is an old time crook. His method was to represent himself to be the son of a local man of wealth, and thereby obtain such goods as he wanted. He and his wife were stopping at the St. Nicholas, the swellest hotel in the city. After his arrest the police searched their trunks, but found nothing to incriminate them, and the wife did not appear to be mixed up in his crookedness. He was sent to the workhouse for a long term and the woman left town. Detectives and Mr. Walsh, of Merrick, Walsh & Phelps Jewelry Co., St. Louis, Mo., came to this city to see if McDowell is the man who robbed the jewelry firm, as reported in the last issue of *THE CIRCULAR-WEEKLY*.

Detroit.

M. Blood and Will Knapp, representing the L. Black Co., last week started out to cover Michigan, Illinois and the west for the firm.

The contract for the jewels for officers of the Grand Lodge of Michigan, F. & A. M., was, last week, awarded to W. A. Sturgeon & Co. This firm also designed and executed the handsome menu cards for the Michigan Club banquet.

The taking of inventory at night by Wright, Kay & Co. was interrupted, last week, by the blowing out of the furnace. As it was zero weather, the proprietors and clerks were compelled to burn oil stoves and wear their overcoats while waiting on customers. Nearly all the down town store proprietors are taking inventory.

At a recent meeting of the L. Black Co., after the death of Albert Landsberg, the following officers were elected: President, M. Black; vice-president, A. Black; secretary and treasurer, I. Landsberg. There will be no change in the personnel of the company because of the death of Mr. Landsberg, who had no active part in the business.

St. Louis.

F. Dienstbier & Co., Broadway near Pine St., have moved two squares farther south on the same street.

An ordinance has been introduced in the House of Delegates here providing that any street railway company issuing transfers with time limitations through their conductors shall be required to carry a clock with a dial not less than 12 inches in diameter in all cars of said company. The location is specified to be by the side of the cash register on the cars, so that the passengers may be able to verify the time as designated by the punch on the transfers issued.

Louis McDowell, arrested at Cincinnati, a couple of days ago, has been identified as the young man who, some days ago, secured a diamond brooch, valued at \$800, from the Merrick, Walsh & Phelps Jewelry Co., representing himself to be Wm. J. Lemp, Jr. Detectives and Mr. Walsh left for Cincinnati, Thursday afternoon, upon being notified of the arrest. Friday, a telegram was received from Mr. Walsh, stating that he had positively identified McDowell as the man who secured the brooch. McDowell at the time of his arrest was accompanied by a stylishly dressed woman. The robbed firm report that they have recovered the brooch. It was located in a pawnshop.

Pacific Northwest.

F. C. Brodie, Sumpter, Ore., has moved into new quarters on Granite St.

C. E. Nash, of Burmeister & Andresen's jewelry store, Oregon City, Ore., expects soon to go to Nehalem.

W. H. Snyder and Harvey Richardson, of Silverton, Ore., will move to Castle Rock, Wash., in a short time, where they will establish a jewelry business.

Schott & Williams, Brownsville, Ore., have dissolved by mutual consent. Mr. Schott will have charge of the music department, including jewelry, notions, etc.

An ordinance has been introduced at Newport, Ore., licensing occupations, professions, etc. Jewelry stores where jewelry is sold and watches and clocks repaired are licensed for \$5.

L. A. Messing, Spangle, Wash., will establish a jewelry store at Rosalia, Wash. Mr. Messing is an expert clock and watchmaker, and in the course of a few days will be ready to do work in his line.

A slight blaze was discovered last week on the roof of Hill's jewelry store, Commercial St., Nanaimo, B. C. The prompt action of Messrs. Hill and O'Connell prevented what might have proved a serious conflagration.

J. J. Walker, Nelson, B. C., has moved into new and commodious quarters. Mr. Walker started in the jewelry business at Nelson, Sept. 1, 1897. By strict attention to business and good treatment of his customers his business grew to such proportions that the old quarters were much too small. His new fittings are now all in place and his stock displayed, and the store is one of the finest in western Canada.

The veteran Moses Goodman, Rochester, N. Y., has been confined to his residence for some time past, caring for a badly sprained ankle.

Pittsburgh.

Henry Erskine, Penn Ave., is seriously ill with tuberculosis.

A. I. De Roy has returned from a business trip to New York.

C. F. Hasinger has purchased the store of the late Max Wilson, Indiana, Pa.

The Pittsburgh Jewelry Co. will remove to Pfeiffer's storerooms on Smithfield St., a few doors from their present location.

D. J. Jones, a commission dealer in diamonds and watches, has opened an office in Room 303, Chronicle-Telegraph building.

Caplan & Teplitz, Monessen, Pa., who reported \$650 worth of diamonds stolen by robbers, state that the gems were returned and left on their steps.

Henry A. Barrett, while returning to his home on his daily trip to New Brighton, Pa., had a narrow escape from death in the serious wreck on the Ft. Wayne & Chicago, last Thursday. He escaped unhurt.

Gems worth \$2,000 were stolen from A. E. Siviter & Co. at the time of Mr. Siviter's child's death. The matter was kept a profound secret, and last week the jewels were as mysteriously returned. The affair is puzzling those interested.

A charter was issued by the State department at Harrisburgh, on Feb. 20, to the George B. Barrett Co., of Pittsburgh. The capital stock is \$150,000. The directors are: George B. Barrett, Sewickley, Pa.; Henry A. Barrett, New Brighton, Pa., and W. O. Harrison, Allegheny, Pa.

Some time ago the store of Frank Crantz, 34th and Butler Sts., was robbed of a valuable watch. Information was received last week that a man named Malinowski had stolen the watch and had it in his possession. An officer searched the man, found the watch and Jeweler Crantz made information against him. He was promptly arrested.

The bursting of water pipes in the top floor of the Verner building, occupied by the W. J. Johnston Co., last week caused much damage by a large sized flood to the floor of the company named and the ceiling of Albert H. Gerwig. The place was in a deplorable condition, as the water had been pouring hours before it was discovered. Business received a check until the place was straightened up.

A. U. Potter, Tampa, Fla., has moved to the Theedon Drug Co. building, same city.

Columbus, O.

TRADE CONDITIONS.

The time of failures is well over now and the jewelers of central Ohio may well congratulate themselves that as a business the record has been so good. The crisis has passed and it can be said that there were fewer embarrassments in this line than almost any other, and the failures that did occur were mostly small ones. The loss at farthest can amount to only a few thousand dollars, comparatively speaking, perhaps 40 or 50. This is a good record when attention is called to the fact that Ohio is a large State, with much wealth and extensive business interests, and that in the jewelry line alone there is an immense amount of money invested. Among the larger retail dealers it can be said there has been no trouble at all. It has been mainly with the smaller stores, where the owners risked a great deal in starting in business and were not fortunate enough to be in position to pay their bills due in January. It can be said also that the list of failures in all lines of business has been remarkably small so far this year, much smaller than was predicted earlier in the season.

August F. Thoma, jeweler, Piqua, has been married to Anna M. Attenweller, the ceremony being performed by Rev. G. Steinlage.

William T. Oberer, formerly in the jewelry business here but now a resident of Cincinnati, was in the city, last week, calling on friends.

The F. L. Wirsching jewelry stock and fixtures are being advertised for sale at 151 S. High St., in bulk, by E. B. Dillon, receiver, 119½ S. High St.

The jewelry store of Wayne Young, Caldwell, was badly damaged by fire, a few days ago, but it has not been possible to obtain the extent of the loss or the amount of insurance on it.

A Newark paper has the following to say about a Utica, O., jeweler: "R. R. Lusk, jeweler, has as nice a store as one will find in any of our cities. He has been in business 21 years. His line is complete and kept in a neat and attractive manner."

A. M. Bailey, who had been with Albert H. Bonnet for years in the jobbing house here has secured a position with Goddard, Hill & Co., Pittsburgh, Pa. He has been in the house for a short time, but will go on the road for them within a week or two. Mr. Bailey is an industrious salesman and is well liked by the trade.

The stock of Albert H. Bonnet, wholesale jeweler, who made a settlement with his creditors some time ago, will be closed out and the business will be discontinued for the present. Under the circumstances, this was deemed best at this time. All the creditors, with the exception of one or two small ones, have agreed to the terms of settlement and the matter has now all been arranged. It is thought that Mr. Bonnet will be able to return home within a few days, but he has not determined as to what course he will pursue in the future.

Perry M. Ford & Co. are out just \$18.50 on a check racket worked by a man who gave his name as John Brent. The man had been in Columbus for perhaps six months and had represented that he was doing some business for another house. He secured goods from Mr. Ford for the above amount and deposited with him a check for a good sized amount as security. The check proved to be worthless. A number of other merchants here were caught in the same way. Brent, who is a raw German about 60 years of age, is now supposed to be in Pennsylvania and the Co-

lumbus police department is on the lookout for him.

The pawnbrokers' license has gone into effect here and the blanks are being filled out. The amount due from the time the ordinance was passed to Jan. 1 next is \$86.68, which they will all be compelled to pay. They may be allowed some of it in return for aiding the police department in detecting criminals who make it a practice to pawn stolen goods, if they so desire. Besides the license fee, they are compelled to give a bond of \$500 to insure their observing the ordinance. A system of reports to the Superintendent of Police has been arranged, showing the goods taken in pawn, the amount loaned on them and the name of the party securing the loan. These are to be made daily. The penalties for violation range from \$10 to \$200.

San Francisco.

L. Carrau, of Carrau & Green, is east and will be gone several weeks.

Taber Bros. have reopened their establishment at 910 Market St., this city.

G. D. Schulze, Dixon, Cal., is at the Palace Hotel, this city, and C. A. Phillips, Sacramento, is at the Grand.

Clinton R. Coulter, son-in-law of Charles Hadenfeldt, was killed in the railroad wreck on the Central Pacific at Mills Station, Nev., Feb. 17.

Frank E. Whitney has gone to Seattle and thence will visit the cities of the Pacific Northwest in the interest of the International Silver Co. and the E. Ingraham Co.

C. S. Untermeyer has been here representing Charles Keller & Co., New York. C. Rowbotham visited the trade in the interest of C. P. Goldsmith & Co., New York. William A. Weichmann, representing Frank W. Smith, Gardner, Mass., was with us last week.

Pacific Coast Notes.

F. C. St. John, Los Angeles, Cal., has sold out.

Carl Brand, son of C. J. Brand, jeweler, Nevada City, Cal., died in Weimar, Germany, Feb. 17.

The jewelry business of the late E. Joseph will be continued at Ukiah, Cal., under the management of his son, P. H. Joseph.

The front window of Z. F. Vaughn's jewelry establishment, Tulare, Cal., was broken into, last week, and a quantity of rings and chains was stolen.

A. J. Davidson, jeweler, Weaverville, Cal., has returned from San Francisco. He was offered and accepted \$300 in payment of his claim for damages to the nugget loaned by him to the Paris Exposition commissioners.

W. L. Wheelock, who recently purchased an interest in the jewelry business of D. A. Woodward, Hanford, Cal., left for Los Angeles, last week, and will take his family back with him to reside in Hanford.

An electric alarm clock in the store of R. Kocher & Son, San Jose, Cal., went into action at 2 o'clock in the morning, recently, and a burglar raid story spread until J. R. Kocher arrived and shut off the electricity.

M. Friedberger & Co., who received the contract to keep the clocks of the court house at Stockton, Cal., in proper working

order, will remodel the plans now in use in the tower. By a new system of backing on the dials and an increased lighting power, the clocks of the court house will be put in first class condition and kept running in a reliable way.

The jewelry business of Y. H. Boudreau, Merced, Cal., has been sold to Will L. Tregea, formerly of that city but for some time past engaged in the jewelry business with Brittain & Co., San Francisco. It is Mr. Boudreau's intention to remove in a short time to near San Jose, where he will reside. The new proprietor will take charge of the business some time during the early part of March.

Kaiser & Co. have decided to enlarge their storeroom at Stockton, Cal., about fourfold in order to accommodate their increased business. To do this the firm will occupy a part of the Jackson block, 111 E. Main St., adjoining the present store of the company. The new annex is being remodeled to conform to the fittings of the company's original jewelry store, at 109 E. Main St., and when completed, Kaiser & Co. will have one of the most up-to-date jewelry stores in Stockton.

Minneapolis and St. Paul.

The aged father-in-law of George Hartman, with Sischo & Beard, St. Paul, died, last week.

Louis Zohanyi, who has been in the store of Lewis Finkelstein, St. Paul, will go on the road at once, taking South Dakota.

Notice has been published of a meeting of the creditors of James H. Mosier, insolvent, Minneapolis, to be held March 6.

Gus Weiskopf has started on the northern trip for B. Schuette, Minneapolis. C. Herrick, watchmaker for B. Schuette, is the proud father of a son.

George S. Greenleaf, manufacturing jeweler, Minneapolis, has suffered a stroke of paralysis of the right side. Mr. Greenleaf has been in Grand Forks all Winter and has but lately returned.

Sam Pavian and W. Marks, who were formerly in the jewelry business in St. Paul, had a dispute, last week, which ended in blows. Pavian had his hand bandaged as a result of the encounter and Marks received minor injuries.

Among the dealers in from the country, the past week, were: George B. Johnson, Pipestone, Minn.; M. Weinstein, Webster, S. D.; W. F. Main, Cando, N. D.; Olson Bros., Carver, Minn.; Mr. Goven, watchmaker for M. A. Worcester, Lidgerwood, N. D.; W. G. Gould, Glencoe, Minn.

Denver.

George Bell Lapidary and Jewelry Mfg. Co., of Denver, have been incorporated by George Bell, J. H. Rotert, Earl M. Cranston; capital stock, \$35,000.

Thieves entered the jewelry store of Charles J. Doersam, 430 16th St., one night last week, and stole 100 cheap watches, 25 studs, six ladies' neck chains, a dozen ladies' watch chains and a dozen ladies' watches. The total value of the stolen articles is about \$200. The thieves effected an entrance by boring a hole through the rear door and throwing back the bolt. Once inside they could steal with impunity. The police have no clue.

Kansas City.

E. G. Alber has returned from Hot Springs, Ark.

G. S. Catchadal, Superior, Neb., is on his way to the Indian Territory.

D. J. Monk and bride, of Pawhuska, I. T., are here on their wedding trip.

W. L. Porterfield, a photo and jewelry novelty dealer, has given a chattel mortgage for \$500.

W. S. Suppe, Galena, Kan., who was recently married, is visiting in Kansas City, accompanied by his bride.

W. A. Woodrow, Pond Creek, O. T., it is reported, died last week. Mr. Woodrow was well known to the Kansas City trade.

Mr. Margolis, of Margolis & Metzger, is in the German hospital. He was operated upon last Monday and is very ill at present.

J. H. Gilbert, formerly with M. B. Wright and Cady & Olmstead, this city, but now with Merry & Pelton Silver Co., St. Louis, Mo., has been visiting here.

The death is reported from Minneapolis, on Feb. 13, of Robert D. Russell, brother of C. E. Russell, the well known Kansas City jeweler, and of Sol Smith Russell, the actor.

Herman Oppenheimer, of the Oppenheimer Jewelry Co., while walking down the hill on 9th St., slipped on the ice and fell. His shoulder was dislocated and he was quite badly bruised by the fall.

Among the out-of-town merchants who called on the Kansas City trade last week were: Leslie White, Lee's Summit, Mo.; A. Y. Bowswell, Fairland, I. T.; George E. McCoy, Polo, Mo.; C. L. Porter, Moline, Mo.; A. E. Ziegler, Ravenswood, Mo.; I. W. Jackson, Meeker, Col., and R. C. Wyman, Maitland, Mo.

J. R. Mercer's store is torn up, undergoing repairs and improvements. Mr. Mercer expects to have the handsomest store of its size to be found anywhere. The old front will be torn out and an entirely new glass front, having swell windows, will be substituted. The side wall will be moved over eight feet, increasing the size of the store that much in width. There will be a new office. The interior will be redecorated and new show cases put in.

The trophy presented to the Kansas City Fire Department, by Co. E, 3d Regt. Mo. Infantry, U. S. V., has just been completed by H. B. Carswell. A handsome cut of the trophy was given on the front page of THE CIRCULAR—WEEKLY, Aug. 8, 1900, but since then a very appropriate top has been added. It is a square of onyx, with bullets forming corner posts. A large cartridge is erected in the center of the square and from this, suspended by

chains, is a mahogany wood cleat from the magazine door of Morro Castle, Havana. In the center of the wood is a silver plate bearing the inscription. The work on the trophy is all very fine, and it is composed very largely of material having an interesting history. The cartridges were taken from the Spanish fleet which was sunk off Santiago de Cuba.

Indianapolis.

Horace A. Comstock will spend a few weeks at Hot Springs, Ark.

Ikko Matsumoto has been granted a patent on a tiger claw ring mounting.

David Bixler, Bern, Ind., and George L. Spahr, Lebanon, Ind., were in the city last week.

Feb. 19 the store of Koontz & Fair, Walkerton, Ind., was looted by thieves. All the jewelry and \$60 in money were taken.

Mart Mullin, of Mullin Bros., Liberty, Ind., has sold out to his brother, Scott, who will continue the business in his own name.

It is reported from Rochester, Ind., that C. C. Wolf, who was robbed of \$600 worth of jewelry last October, has received word from the Sheriff of Kankakee, Ill., that three men have confessed to the crime. They were sentenced to prison at Joliet, Ill., on the charge of robbing a store at Momence, Ill., and while in jail confessed to other prisoners the Rochester robbery. Their names are Frank Boyce, of South Bend, Ind.; James Harris, of Elkhart, Ind., and Arthur Wells, of Chicago, Ill. Their headquarters were at Chicago and their hiding place will be searched in hope of recovering, at least, some of the plunder.

Cleveland.

Charles Remillet, Findlay, O., is advertising his jewelry establishment for sale.

The Home Security Co. will remove to the second floor, at 88 Euclid Ave., on April 1.

Captain R. E. Burdick and Webb C. Ball are members of the executive committee that will have charge of all arrangements for the G. A. R. encampment in this city next Fall.

Captain R. E. Burdick has been given the honor of having charge of the Presidential division of the inaugural parade at Washington next month. Captain Burdick will be aide-de-camp of the division in which the President rides. General S. V. Green, of New York, is the chief marshal of the parade, and appointed Captain Burdick to his position on the parade staff.

PRIZE ESSAY COMPETITION, NO. 2.

SUBJECT:

"How to Treat Customers—How to Sell."

Notice to Competing Essayists.

The essays in Competition No. 3, "How to Foster Spring Trade," will be printed at conclusion of Competition No. 2 essays.

BUYING OLD PRECIOUS METALS.

LEWIS J. HENISE, York, Pa., makes a specialty of buying old gold, silver and precious metals. To foster this department of his business, he issues a circular, of which the following is a copy:

We take pleasure in calling your attention to the fact that we are more extensively engaged in the buying, refining and melting of old gold and silver than ever before.

Our business is constantly on the increase, which is largely due to the very high prices we pay. Spot cash is what does the work.

Are you not in possession of any of the following articles which are entirely out of style, broken or such as you have no use for: Rings, scarf and brooch pins, charms, old spoons, watch cases, chains, bracelets, thumbles, lockets, teeth plates, gold leaf, hat pins, spectacles, earrings, fillings, silver novelties, filings, jewelers' sweepings? If you have any of the above we can use it, providing there is any gold or silver about it.

Make up a package and bring or send it to us. We'll quote its value. If our price is satisfactory, which it invariably is, we will give you the cash; if not, you get the goods.

We could give you the names of several thousand people who sell and ship us gold, but that isn't business.

Let's hear from you.

Yours respectfully,

THE HENISE GOLD & SILVER REFINING WORKS,
324 W. Market St.

Accompanying the circular is a card 9 x 3½ inches to which are attached scraps of leaf of gold, silver and other precious metals.

SOME MEN BUY UP OLD IRON, SOME
OLD BRASS, SOME OLD COPPER AND
LEAD. WE BUY UP OLD GOLD AND SIL-
VER.

The above is the striking catch line of the card.

An advertising scheme of a West Chester, Pa., optician is the offer of H. F. Freeman, secretary of the Pennsylvania State Optical Society, of a pair of solid gold spectacles or eyeglasses to the person writing "H. F. Freeman, Eyesight Specialist," the greatest number of times on one side of a United States postal card. The contest closed Saturday.

ALL engaged in trade have the same object in view: to acquire riches, to better their condition; vulgarly, to make money and to make it as speedily as opportunities permit. In our business we elect to supply the demand of our communities for the useful and the ornamental in precious metals, gems, etc., and we will consider the fixed rules we must follow to attain even limited success in our vocation.

The valuable character of merchandise in our line requires as a first condition that it be offered to the intending purchaser in an attractive manner, with favorable surroundings. Therefore, wherever practicable, the store should be so arranged in furniture, decoration and color scheme as to harmonize with the size of the room and the stock carried.

In no business more than ours is the best foundation for success first of all a love of truth. In every dealing avoid all trickery; the competition and rivalry of the day lead to devious ways to try to satisfy the many who want something for nothing, but common honesty and the "golden rule," will work just as advantageously in jewelry as in anything else.

Never say 14-karat when you mean 10-karat; never give a guarantee you cannot fully carry out; never make extravagant statements about your goods and prices, or, after a while, your warrant will be worthless, as your customers will not take you seriously. In sales of importance, of diamonds, fine watches, etc., it might be well to state in writing just what it is proposed to do. People speak more definitely when they read an offer recorded in black and white.

Be punctual. All men reverence punctuality, in theory; few carry it into practice. In both money and work engagements be punctual; be careful to make no promises if the chances of fulfilling them are uncertain. Shape good plans of business. Be persevering and persistent. A systematic person can accomplish more than he expects to; a disorderly one always finds a portion of his task unfinished.

Prices should be plainly marked on neat tickets or tags, easily perceived by the customer; it gives him the confident feeling that you are "one-priced," and frequently makes sales, where customers in handling goods from curiosity find the price much less than they expected, and what might be called "accidental" sales are induced. Compromises and concessions must fre-

quently be made; always make them so as to convince your customer that in your first demand there was no desire or attempt to overreach him.

It is sometimes prudent and worth taking much pains to bring your customer to your way of thinking, when you know he would eventually regret his own judgment if followed out. But as a rule endeavor to meet the desires of your patrons; generally the customer of the greatest intelligence is the most amenable to your counsel, and the most foolish are the readiest to suspect you have some motive when you seek to shape their selection.

Tact, which is said to be a female possession, is absolutely necessary, as the versatility and vacillation of customers are great; cultivate tact by all methods.

The subject of credit is a difficult one to decide at times, but in this matter decide promptly. When you have to communicate reasons for an unfavorable decision for a desired credit, always do it so as to give the least pain and create the least discussion; do not imply any falsehood. A bold, but not unkind sincerity should be the groundwork of all our dealings. Most men are slaves because they cannot pronounce the monosyllable "No". A polite man will pronounce it whenever he chooses with less danger of offence than a rude man's "Yes".

Pay great attention to cutting short your losses. If any goods are becoming "slow," sacrifice them "at once," at cost or less. Later they may bring nothing and cumber space which should be filled with newer or more popular goods. In a small or moderate sized town it is even well to send such "shopkeepers" to New York, or elsewhere, for disposal, rather than have them a drug among a limited clientele.

When help is employed, the greatest attention must be paid to seeing that clerks are always polite to the customer; a supercilious clerk, who "puts on airs," can do great damage to any business. Clerks should be encouraged to be frank and friendly with the employer. If they feel able to comment on things they are invaluable counselors, as they see many things which may escape the attention of the most particular person. It is also well to delegate as much as possible of the labor to their eyes and hands. Employers sometimes do too much themselves and worry unnecessarily, and when they leave

Gand HINTS to JEWELERS

their stores their help lack that self-reliance which is such an aid to the easy conduct of all business. Always recognize the good efforts of clerks by quiet praise and avoid hasty criticism of their occasional lapses.

The employment of saleswomen in jewelry stores is a mooted subject worthy a separate discussion. Their numbers seem increasing, no doubt on their merits.

Great moderation should be exercised in personal expenses. A shrewd business man can in no better way invite and deserve success than by prudent living. It produces a good effect and gives confidence to the customer and dispenses entirely with that disagreeable alternative of having to retrench and reduce living if a little adversity may strike.

In business, no expense should be spared that may possibly swell sales. Discreet advertising, handsome printing, tasty packing and delivery of purchases all conduce to make your own store known and to extend its custom.

With diligence and discretion translated into daily action, failure is impossible; trade must always be done among men; the store marked for the fairness of its dealings, promptness, neatness, politeness and efficiency will receive its full share of the trade going, and in a fattened bank account reward its worthy owner.

These few remarks apply more particularly to the home trading of the good, old fashioned kind, at the local jewelry store. No particular pains seem necessary to attract many people, with a fancied but false economy, to trade with the new fangled business aggregations which are taking on such proportions as to threaten the extinction of the old style shopkeeper, who knows but one line, but knows it well.

As John Ruskin says in his lecture on "Traffic": "The entire object of trade education is to make people not merely do the right, but to enjoy the right things; not merely industrious, but to love industry; not merely just, but to hunger and thirst after justice." U.

HOW to Treat Customers. How to Sell in the Jewelry Business." First inspire the customer with confidence in you, and never allow this confidence to be shaken one moment by false act or statement. You will then have a customer for life. K.

Jacob W. Oller, for several years at Ashton, Ill., has sold out his stock and his residence. He goes to Dixon, Ill., to engage in the hardware business. William Trein will occupy the store vacated by Mr. Oller, at Ashton, and continue the jewelry business.

GUARDS AGAINST THEFT.

THE following article from the Council Bluffs, Ia., *Nonpareil* contains some points of value to the jewelry store keeper:

"A customer had gone into a jewelry store on Broadway the other day when his attention was attracted by the clerk's laying out five of each kind of goods. If the customer was looking at watches, five watches were displayed on the case; if he was looking at chains, rings, locket or ware of any kind, the clerk invariably laid out five of each kind.

"Why do you always lay out five of each kind?" asked the customer.

"The clerk was loath to tell at first for fear of insulting his customer, but on being pressed admitted that it was to guard against shoplifters.

"We make it a rule to lay out five of each kind," said the clerk. "Then we are sure to know that five go back into the case after the customer has finished looking at the goods. This has become an established rule, and it is seldom that we vary from it. You can readily see that it is to our advantage to establish the rule of always laying out five pieces of goods. When this has once become the rule it is almost second nature for the clerk to determine that five pieces go back into the case."

"Is this an absolute safeguard against the shoplifter?" was asked.

"Oh, no," replied the clerk. "We have to deal with some of the shrewdest sharks in the business of lifting jewelry. Sometimes in spite of all our precaution they steal the goods right out from under our noses. The practice of putting out five pieces of goods protects us from the greeny or the beginner, because to them it is not known that five pieces are always put out. It is the professional that we have the most trouble with. He knows our methods as well as we do ourselves, and not knowing when we are dealing with an honest customer and when with a professional shoplifter, we are sometimes caught off our guard.

"I remember of catching a greeny and then I remember of catching a professional. You will readily notice the difference between the two. I was showing the greeny some gold rings, when another clerk called me to the end of the counter to give the price of a piece of jewelry. While I was gone the greeny picked up one of the rings and slipped it into his pocket. Upon returning to him again I did not at first miss the ring. My attention was drawn to his nervous manner, which I had not noticed when he first came in. The greeny began to fidget somewhat and the first thing that attracted my suspicion was that large beads of perspiration were standing on his forehead.

"I immediately counted the rings and discovered that one was gone. He said that he guessed he wouldn't take anything to-

day and was preparing to leave the store, when I said: "Did you want to keep the ring that you have in your pocket?" He immediately became confused and put the ring back on the counter. No arrest was made, because it sometimes loses trade. All we ask for is the goods back in their place. If we cannot influence the thief to return the goods, of course an arrest is then made.

"Now, I will tell you of the professional, and you will see the difference. This particular one of whom I tell you I afterward was told had come from Liverpool, England, and was one of the smoothest in the business. He had probably underrated westerners, and it was probably due to that fact that I succeeded in recovering the goods, which he picked up under my very eyes.

"He was tall, well dressed and a splendid looking man. He came into the store and asked to be shown some gold watches. He began with the very highest priced ones and in that way got me intensely interested in making a big sale. He looked them all over and carefully handling one of the costliest ones, said, "I don't know whether that would suit him or not?" I bit right away, and replied, "Were you thinking of a present for some one?" "Yes," he replied; "it is for the superintendent."

"Then I became more earnest than ever upon making the sale and put more goods on the counter than was really customary. It is the custom to put one kind of goods back in the case before showing another line. But this time I was off guard. After almost deciding upon a watch, he began looking for a chain. That was when he began to work on his real job. I did not notice it at the time he was doing it, but I remembered afterward that as the chains were shown him he put them all in a pile. In that way it was much easier for him to take a chain without my noticing its disappearance. When he had gotten the chains in a pile he called my attention to another part of the case, and it was then that one hand picked up two of the chains and slipped them into his pocket, while his eyes and seemingly his attention were on me.

"At last he concluded that he would not buy just then, but would be back later. He left the store without my discovering that he had taken two of the best chains. When I came to disentangle the chains which he had so cleverly tangled I found that two were missing and, of course, surmised immediately what had become of them.

"I went out on the street and recognized the professional as he was standing on the corner waiting for a car. He probably thought that he had done his work so well that there was no cause to be cautious. I walked up to him and said, "You didn't come back. Give me the chains and there will be no arrest and nothing said."

"His dark eyes swept up and down the street, his hand reached into his pocket and he slipped the chains from his hand into mine. The car came and he was soon in Nebraska."

BUYERS' INFORMATION BUREAU.

Questions as to the makers of certain lines of goods, where to buy certain lines, where certain kinds of work are done, the owners of certain trade-marks and other matters relating to the buying branch of a jewelry business will be cheerfully answered under this department. The reader cannot ask too many questions. All queries received are also answered promptly by mail.

CHESTER, S. C., Feb. 18, 1901.
 Editor of THE JEWELERS' CIRCULAR-WEEKLY:
 Kindly inform me who imports or sells the cheap cylinder watch known as the

UNION SQUARE.

Yours very truly,
 RUD. BRANDT.

ANSWER:—Jules Racine & Co., 37 Maiden Lane, New York. See page 69 of "Trade-Marks of the Jewelry and Kindred Trades," published by The Jewelers' Circular Pub. Co.

ABBEVILLE, S. C., Feb. 8, 1901.
 Editor of THE JEWELERS' CIRCULAR-WEEKLY:
 Please let me know whose trade-mark this is in rings.
 Yours truly,

R. C. BERNAU.

ANSWER:—This is the mark of Larter,

Elcox & Co., 21 Maiden Lane, New York. See page 19 of "Trade-Marks of the Jewelry and Kindred Trades," published by The Jewelers' Circular Pub. Co.

NEWARK, N. J., Jan. 30, 1901.
 Editor of THE JEWELERS' CIRCULAR-WEEKLY:
 We have looked through your "Trade-Mark"

book several times for the manufacturer of gold jewelry using the following trade-mark, viz.: A Maltese cross inside a circle. Kindly let us know who the party is and oblige,

Yours respectfully,
 CHAMPENOIS & Co.

ANSWER:—Schwarzkopf & Solinger, 100 Stewart St., Providence, R. I., use a Maltese cross with a circle close to the cross and with a very small monogram, S. & S., in the center of the cross. H. A. Kirby Co., 85 Sprague St., Providence, R. I., use a cross similar to the Maltese with an ornamented circle, but with more space between the cross and the circle.

NEW YORK, Feb. 9, 1901.
 Editor of THE JEWELERS' CIRCULAR-WEEKLY:
 Please let us know who uses this trade-mark on hair brush, and oblige,
 Respectfully,

G. HIRSHFIELD.

ANSWER:—This is the mark of Simons, Bro. & Co., 611 Sansom St., Philadelphia,

Pa.; New York office, 19 Maiden Lane. See page 48 of "Trade-Marks of the Jewelry

and Kindred Trades," published by The Jewelers' Circular Pub. Co.

MORRISTOWN, N. J., Jan. 17, 1901.
 Editor of THE JEWELERS' CIRCULAR-WEEKLY:
 Kindly tell me who has the following trade-mark: W with ring around it.
 Yours, etc.,

J. S. HALL.

ANSWER:—This is the trade-mark of

Frank M. Whiting & Co., North Attleboro, Mass. See page 17 of "Trade-Marks of the Jewelry and Kindred Trades," published by The Jewelers' Circular Pub. Co.

WATERTOWN, N. Y., Jan. 26, 1901.
 Editor of THE JEWELERS' CIRCULAR-WEEKLY:
 Kindly inform me the silver ware manufacturer using the following trade-mark:

and oblige,
 Yours truly,
 J. S. BAIRD.

ANSWER:—Watrous Mfg. Co., Wallingford, Conn., now controlled by the International Silver Co., Meriden, Conn. See page 50, "Trade-Marks of the Jewelry and Kindred Trades," published by The Jewelers' Circular Pub. Co.

Morris Meyer, who has been conducting a jewelry store at Clinton, Mass., through his wife, Mrs. Martha Meyer, has closed the store and removed the stock to Boston, Mass.

FOR THE NEW YEAR !

VOL. XLII. No. 4.

NOTE—Under this department, all matters of a technical or of a news character bearing upon the optical branch of the jewelry industry will be considered. Address communications to The Jewelers' Circular Pub. Co., 11 John St., New York.

**OPTICAL
FAKERY.**

FAKERY in optics, though not well defined as yet, is perfectly understood. It is a practice that all opticians and societies who desire to place the practice of optometry among the professions should frown down. No person who uses the methods of the fakir should be permitted to display the certificate of membership of any optical society, if it be possible to prevent it. Only upon the basis of a fair technical knowledge of optics, fair skill in the art of fitting and proper methods of doing business should persons be received into the different societies. Fakery is not confined to the ignorant, although a man who indulges in such methods cannot be said to be highly educated. There is more excuse for the ignorant man, who is obliged to do business by such methods or none, than for one who is technically and practically qualified. The former is no discredit to any one but himself; the latter, if he be a member of an optical society, is a discredit to the society and to the profession generally. That there may be no misunderstanding as to what is meant by the term "fakery" we will specify some of the methods referred to by that word:

1. The pretension by an optician that he cures diseases by the glasses he prescribes, especially diseases of long standing, with which his patient was bedridden for 20 years or less, although the correction of the eyes may be beneficial to sick persons as well as one of the means of restoring health to them, being often the means of relieving pain and discomfort.
2. The pretension that he employs a special method of treatment in which there are virtues unknown to the general optician, or that some well known instrument used by him and accessible to any optician who has the price is of a foreign, peculiar or special design and that only he is able by it to determine the glasses required.
3. The use of a circus poster style of announcing his business to the public, as "Doctor David Doodle, the Great Eye Specialist" or terms of similar import; or the indulging in street pageants in which "The Doctor" is made conspicuous by a fine turnout, long hair or conspicuous garments.
4. The professional "traveling" optician,

who has no center of action or location, but spreads himself over the country generally, chiefly because he can't survive publicity of his methods or skill in any one place. This should not be construed to include those who make periodical visits to different towns but have a fixed location.

Doubtless there are many other things which characterize the fakir, but usually one of the above is included and it is enough. The graduates of schools which teach optical students to practice in such illegitimate manner—if the school be responsible for it—should be professionally ignored. This kind of practice, and the school which encourages or countenances it, can do nothing but harm to the standing of honest, competent and legitimate work. Optical publications which give over their columns to the mouthings of fakirs of this kind are no more legitimate than the fakirs themselves and should have no standing whatever with the profession.

There may be certain foundational truths in the practice of hypnotism—almost every eccentricity of this kind has some elements of truth and virtue in it—but we can see no legitimate relation between it and the science and art of optometry. We should take a "compound hypnotic-optician" or "optical-hypnotist" as a fakir as a matter of course, for if by hypnotism hyperopia can be cured or astigmatism neutralized the practice of optometry is a fake in and of itself, a senseless proceeding and quite without any meaning. Optometry and Christian Science make the same mongrel compound, and either the optician should become a complete Christian Scientist and let lenses alone, in which case he is beyond our sphere of influence, or he should have his hands clean of Christian Science. It is more important that optical societies be kept clean of these fakirs than that the highest technical qualifications be insisted upon. The only legitimate bases of qualified membership are, however: (1) Technical qualification, (2) practical qualification, (3) legitimate methods of doing business.

AMONG the guests at the recent banquet of the Illinois Optical Society was Mrs. Alva Snider, wife of President Snider, of the Wisconsin Optical Society. Mrs. Snider, it appears, is not a mere spectator at optical gatherings in her own State, but an active participant, having read a paper on "Optical Legislation and the Defense Fund" before the last meeting of Wisconsin opticians, in Milwaukee, which was published in a recent

issue of this journal. As the legislative question is sure to prove one in which social and political influences are not to be despised, the participation of the "little women" in the affairs of optical societies augurs well for a final happy issue from the dangers that now seem to be darkening about the opticians' path. Let opticians, by all means, encourage such co-operation as the opticians of Wisconsin have in this respect. There is no reason why the "woman contingent" of each State society should not be an important, useful and valuable factor.

To Clean Optical Lenses.

FREQUENTLY the cleaning of optical lenses is not conducted with the necessary care, so that they often suffer injury. It is well known that glass is a comparatively soft substance and that the dust accumulating on the glass consists of fine particles of sand which is, at least, one and a half times as hard as the glass itself. Furthermore, it should be borne in mind that optical glasses are much softer still than ordinary window glass, so that it will be readily seen that the penetrating dust alone is the cause of the fine fissures and the destruction of the polish. Therefore, not only should a soft cloth be used for cleaning optical lenses, but it is still more preferable to employ leather, care being taken that it is perfectly free from dust, otherwise just the contrary of the desired end will be attained.

Freshly washed cotton cloths are considered the best polishing material, since leather frequently does not remove the grease from the glass, but rather throws it down on it. The use of liquid, especially a caustic one, should also be avoided, as well as all polishing agents attacking the glass, such as English red, etc.

The Southbridge Optical Co., of Southbridge, Mass., through B. L. Bugbee, of the board of trustees, filed, last week, with the Secretary of State their annual corporation statement. It is as follows:

Real estate and buildings.....	\$10,841
Machinery	23,099
Cash and debts received.....	10,621
Manufactures and merchandise	19,589
Patent rights	125
Cash on hand	159
Value of fixtures.....	1,742
Total	\$66,167
Capital stock	\$20,000
Debts	21,884
Profit and loss.....	24,283
Total	\$66,167

[Continued from page 53.]

DIOPTRIC CONDITIONS OF THE EYE AND HOW TO DISCOVER AND MEASURE THEM.

[Commenced in issue of Feb. 13.]

EMMETROPIA.

IN viewing the near object the emmetropic eye requires to exercise its accommodation. This action of the eye is effected by contraction of the ciliary muscle, which releases the tension of the capsule upon the crystalline lens, and the lens, expanding of its own elastic force, becomes more convex. As it is placed between media having a lower index of re-

fraction, such increase of convexity gives the lens, and, therefore, the lens system of the eye, greater dioptric power. The amount of accommodation required depends upon the curvature of the waves of light coming to the eye from the object, which depends upon the nearness of the object.

When the emmetropic eye is viewing the distant object all the waves coming to it from such object are neutral in curvature. Its dioptric action is then, without accommodative assistance, just adapted to focus each pencil at the retina. The accompanying figure (Fig. 3) represents the emmetropic eye acting in this manner upon a single pencil of light. The sign "∞" indicates that the object is at infinity. The incident wave is neutral. The resistance of the cornea, together with its curved form, makes the wave concave. It centers at some point, as F_2 back of the retina. It increases in curvature as it advances toward the lens. It reaches the lens with a curvature less than that of the anterior surface, and by the resistance of the lens applied at its central area first, it acquires an increased curvature.

FIG. 3. EMMETROPIC EYE VIEWING DISTANT OBJECT.

fraction, such increase of convexity gives the lens, and, therefore, the lens system of the eye, greater dioptric power. The amount of accommodation required depends upon the curvature of the waves of light coming to the eye from the object, which depends upon the nearness of the object.

When the emmetropic eye is viewing the distant object all the waves coming to it from such object are neutral in curvature. Its dioptric action is then, without accommodative assistance, just adapted to focus each pencil at the retina. The accompanying figure (Fig. 3) represents the emmetropic eye acting in this manner upon a single pencil of light. The sign "∞" indicates that the object is at infinity. The incident wave is neutral. The resistance of the cornea, together with its curved form, makes the wave concave. It centers at some point, as F_2 back of the retina. It increases in curvature as it advances toward the lens. It reaches the lens with a curvature less than that of the anterior surface, and by the resistance of the lens applied at its central area first, it acquires an increased curvature.

This action at the anterior surface of the lens focuses it nearer to the retina, as at F_1 , but still beyond the retina. It evolves increased curvature in passing through the lens. At the posterior surface of the lens the wave escapes or emerges from the lens into a medium of less resistance. By the form of the wave, as well as by the form of this surface, the margins of the wave are first to emerge, the central areas being held longest in the lens. This imparts the last touch required to center them at the retina, to which they proceed, falling with

fraction, such increase of convexity gives the lens, and, therefore, the lens system of the eye, greater dioptric power. The amount of accommodation required depends upon the curvature of the waves of light coming to the eye from the object, which depends upon the nearness of the object.

In crossing the space from the cornea to the lens the waves evolve increased curvature, but not so much as before, for the reason that (1) the more curved they are the more rapidly they evolve curvature, and (2) the space is decreased by the advancement of the anterior surface of the lens because of (1) the lessened concavity of the waves, and chiefly (2) because of the greater curvature of the lens at this surface. The waves are considerably increased in curvature and focused at F_1 , very nearly at the same point as in static refraction. They evolve increased curvature in passing through the lens, and action at the posterior surface is very nearly identical with action in static re-

FIG. 5. EMMETROPIC EYE ACCOMMODATING FOR OBJECT AT DIFFERENT DISTANCES.

fraction. The waves or pencils are again focused upon the retina, as before, the image is sharp and distinct and vision perfect.

The muscular action required for accommodation to this extent is unknown, except by the dioptric units of effect, which is 4D. We say that the eye exercises, under such circumstances, 4D. of accommodation. It overcomes +4C. curvature in the waves and still places the focus at the retina. The increased dioptric action is exercised (1) at the cornea in part, (2) at the anterior surface of the lens in part,

and (3) perhaps a little by increased curvature of the posterior surface of the lens, or by other unknown factors. The increased action of the cornea is not due to any increase of its curvature, but to the increased curvature of the waves upon which it acts. The lens is the only changing dioptric surface, unless we consider the waves themselves dioptric surfaces, which indeed they are, their curvature being as much a factor of dioptric action as the curvature of the so-called refracting surface. (Fig. 5.)

The quantity of accommodative power in an eye is not deemed to be so much a question of the muscular power of the ciliary as one of the elasticity of the lens, and its readiness to respond to the lessened tension upon it when the ciliary muscle contracts. In youth its elasticity is great and it responds very quickly to ciliary action, but as age advances it becomes more

FIG. 4. EMMETROPIC EYE ACCOMMODATING FOR OBJECT AT 10 INCHES.

hardened and less responsive. Donders' table on the power or amplitude of accommodation has not been greatly changed by later writers, and even the most thorough compilation of statistics upon this point would be only an approximation—as accurate, perhaps, as a mortality table in setting forth the limit of life. One can readily obtain the amplitude of accommodation in a given case, however, and that, rather than the table, is the thing to be governed by. The table is valuable in drawing general conclusions only.

To read the fine print on the test type reading card when held at 13 in. requires, in emmetropia, accommodation of 3D. The distance of this type gives the angle of vision requisite for providing retinal images of the letters and words that persons

with normal visual power should see distinctly—that is, provided the retinal images are clear. The retinal images will be clear and of sufficient size for clear perception at 13 in. if the eye is emmetropic and exercises 3D. of accommodation. If the emmetropic eye is unable to accommodate 3D. comfortably and continuously, the images will blur and the print become indistinct. To exercise 3D. of accommodation comfortably and continuously an emmetropic eye should have at least 5D. of accommodative power. Otherwise fine print will be blurred if held close to

Optical Department.

[Continued from page 54.]

the eyes—closer than 13 in.—and the images will be too small to be distinctly perceived if held at a greater distance. Larger print will be required—that that may be held farther from the eyes—for comfortable reading.

The accommodative power usually drops below an amplitude of 5D. at the age of 40 years, although by reading larger print and holding the book or paper a little farther away, or using a trifle over the comfortable amount of accommodation at the time when glasses are necessary to assist the waning accommodation may be postponed a few years. Undoubtedly accommodative power may be so cultivated by exercise as to retain sufficient vigor for ordinary reading purposes well on toward the age of 50 years. But to strain the accommodation by reading, without such cultivation, is not a wise plan. The accommodation is much to be preferred, while it lasts, to any lens, because it can be adjusted to the most minute variations of distance. Whatever may be done to postpone the wearing of glasses for this purpose, short of straining the accommodation, is not only an advantage but a wise policy. It is fighting the decrepitude of advancing old age, and, of course, a losing fight in the end.

Little has been said upon methods of preserving the accommodation in the textbooks. It is one of those subjects upon which we must rely upon future experiment to reveal what may be done, if anything can, indeed, be done, in this regard. But in any case, if life continues, the emmetrope, with distant vision "just as good as it ever was," and just as easy, is compelled to don glasses for reading. That is, he becomes a presbyope, and that, although it does not negative emmetropia, is not emmetropic on its own account, since all eyes come eventually under its sway, whatever their condition in other respects. Presbyopia will be the subject of our next paper.

[Series to be continued.]

School Councilman Kendall, of Cleveland, O., has started a subscription to furnish spectacles to school children who need them but whose parents cannot afford to buy them. J. P. Johnston, optician, 37 Colonial Arcade, has offered to furnish and fit glasses for 100 children.

Optical Briefs and Notes.

J. T. Johnson, optician, was in Shelbyville, Ky., recently.

The Solomonson Optical Co., Cleveland, O., will move to 88 Euclid Ave., about April 1.

The firm of Hearn & Harrison, optical goods, Montreal, Can., have registered a new partnership.

L. P. Juvet, optician and jeweler, Glens Falls, N. Y., has secured a new location and will move April 1.

The Caruss Optical Co., 50 Asylum St., Hartford, Conn., have increased their business largely of late.

M. Baylinson has added an optical department to his retail jewelry store, at 340 N. 8th St., Philadelphia, Pa.

Otto Zoellner, of Otto Zoellner & Bro., Portsmouth, O., is in Chicago, taking a post-graduate course in optics.

O. P. Bourbon, who has an optical store on 12th St., Kansas City, Mo., has returned from a trip through Kansas.

The Dupaul-Young Optical Co., Southbridge, Mass., have installed a four-ton safe, one of the largest in the town.

Charles E. Monroe, Southbridge, Mass., has recently added to his optical paraphernalia one of the latest ophthalmometers.

The Columbian Optical Co., Des Moines, Ia., have closed their retail and consulting rooms and opened a wholesale establishment.

Stanley Grater, formerly with the Upson Jewelry Co., Waterbury, Conn., has recently completed a course at a New York optical school.

Edward M. Holman, optician and jeweler, Worcester, Mass., has recently returned from a two months' pleasure visit to Asheville, N. C.

The Standard Optical Co. employes at Geneva, N. Y., have an indoor base-ball team that is playing a series of games in that vicinity.

Morris Earle, of Williams, Brown & Earle, manufacturing opticians, Philadelphia, Pa., is in Florida on a two weeks' pleasure trip.

H. L. Hall, manager of the Chicago Case Co., Chicago, called, last week, on his Kansas City, Mo., customers. He went from there to Omaha, Neb.

B. Mayer, optician, 550 N. Gay St., Baltimore, Md., was in Philadelphia, Pa., last week, looking for a refractorist to manage his retail optical store.

J. S. Frank, traveler for Sussfeld, Lorsch & Co., New York, called upon the opticians

and jewelers of Kansas City, Mo., last week, with a fine line of samples.

R. L. Hogarth, of The Geneva Optical Co., Chicago, is in Des Moines, Ia., looking after their branch there. J. G. Hodgens, of the traveling force of The Geneva Optical Co., is in Chicago for a few days.

Arthur Holmes, formerly with L. Abrahams, optician, 9th and Market Sts., has accepted the management of the optical department of N. Snellenberg & Co.'s store, Market and 12th Sts., Philadelphia, Pa.

J. Frank Brinkerhoff, optician, 4235 Lancaster Ave., Philadelphia, Pa., who was nominated by the Democrats and Citizens' Union for school director, was defeated at last Tuesday's election by a narrow majority.

Jesse O. Van Voorhies, Osawatomie, Kan.; John H. Van Kirk, of Nebraska, and W. C. Wolf, Milford, Kan., are in Kansas City, Mo., studying optics under Dr. S. W. Lane, of the Southwestern Optical College.

E. B. Meyer, an optician of Memphis, Tenn., and brother of L. Meyer, president of the Meyer Jewelry Co., Kansas City, Mo., is quite a fancier of Belgian hares and carrier pigeons. His stock has secured a number of prizes.

The Brooks Optical Co., St. Louis, Mo., held their annual meeting last week and elected the following officers for the ensuing year: A. R. Brooks, president; G. I. Brooks, secretary; James J. Burke, treasurer and manager.

S. J. Strickler, Salina, Kan.; A. F. Zimmerman, Warrensburg, Mo.; G. S. Catchdall, Superior, Neb.; M. C. Rosenfield, Leavenworth, Kan., and C. C. Clement, Springfield, Mo., called on the wholesale opticians of Kansas City, Mo., last week.

A. I. Agnew, manager of the Columbian Optical Co., Omaha, Neb., has returned from Denver, Col., and made a short visit in Kansas City, Mo., on his way home. McLelan Parr, manager of the Denver branch

of the Columbian Optical Co., left, last Saturday, for a trip through Arizona for his health.

H. W. Colver, optician, Albert Lea, Minn., will open a music store soon.

T. W. Clark, of Clark Bros., St. Cloud, Minn., has gone to Peoria, Ill., to take a course in optics.

Charles E. Seybold, of McNamee & Co., Wheeling, W. Va., has completed a course of lectures upon "Refraction," under Dr. R. H. Knowles, New York.

T. G. Burgess, representing C. P. Goerz, manufacturing optician, called on the trade in Columbus, O., last week. He reported a good business in all the cities in the west that he had visited.

An Interesting Meeting Promised by the Pennsylvania Optical Society.

PHILADELPHIA, Pa., Feb. 23.—The Optical Society of the State of Pennsylvania will hold their regular midwinter meeting, on Tuesday, March 12, 1901. A. Martin will give a talk on the recent attempted legislation against the opticians in New York State, and his experiences before the committee at Albany. This will be followed by a debate on the following resolution: "Resolved that a regular stated charge should be made by the refracting optician for the examination of eyes." The affirmative side of this question will be opened by Mr. Martin and the negative championed by Mr. Longstreth; the question being then debated by all the members present.

Process to Frost Ordinary Glass.—

A little Epsom salt (sulphate of magnesia) stirred in beer with a small dose of dextrine and applied on the panes by means of a sponge or a brush permits of obtaining matt panes. One may vary this kind of window by imparting a still more picturesque appearance to it in coloring the saline liquor with different hues. In this manner green leaves, red flowers, brown stems, a blue background may be produced; in short, any shades fancy may desire.—*Revue Chronométrique.*

Opticians Win Their Point.

Exempting Clause in the Bell Bill Amended to include Opticians Specifically.

The opticians of New York have won a temporary and possibly a permanent victory in their fight against the "Bell" bill as originally introduced in the Assembly of New York and known as Assembly Bill No. 167. This bill amending the medical act did not originally exempt opticians from the provisions defining the practice of medicine. The opticians, as told in these columns Feb. 13, succeeded in having the wording changed to exempt, among others, a "manufacturer or constructor of optical instruments in fitting such instruments on persons in need thereof, etc." but this did not prove satisfactory to a great number of the refractionists, who claimed the bill still might be construed to make them amenable to its provisions.

After hearing from a number of leading members of the optical profession, president F. L. Swart, of the Optical Society of the State of New York; William D. Oertel, chairman of the executive committee of that society, and B. V. Smith, of the Grey Optical Co., who has acted as the opticians' representative at Albany, appeared, Wednesday last, before the Committee on Public Health, who gave another hearing on the bill. Messrs. Swart, Oertel and Grey explained that in its present form the bill was opposed by the rank and file of opticians even with the conceded change in wording, and asked that the language of the exempting clause be amended so as to read, "any optician adapting glasses to the sight." After a spirited argument they were given to understand that a number of the committee would agree to this change.

A. Jay Cross, president of the American Association of Opticians, received a telegram, Thursday, stating that the Health Committee had agreed to insert the words, "opticians adapting glasses to the sight" in the exempting clause. He later received word that the bill has been reported out of the committee as amended, and will be reprinted in the form demanded by the opticians and then recommitted to the committee. No printed copy of the bill in its new form was obtainable up to last night. The "Bell" bill now only hits at the Christian Scientists and will be fought by that body alone.

G. Goodman, Hallock, Minn., has gone east to take a course in optics.

WORKSHOP QUERIES.

NOTE.—Questions bearing upon the various departments of the jewelry or silver ware workshop will be answered under this head. THE JEWELERS' CIRCULAR-WEEKLY has facilities for answering in a practical manner technical queries of this character, and offers its services to the trade.

NEW HAVEN, Conn., Jan. 11, 1901.

Editor of THE JEWELERS' CIRCULAR-WEEKLY:

Will you kindly inform us how we can polish opals that have been worn and are badly scratched? By so doing you would confer a favor on

Yours truly,

S. SILVERTHAU & SONS.

ANSWER:—To polish opals properly, a set of lapidary tools is required. In addition to the tools it requires practice to polish and cut evenly. We think the best way for correspondents would be to send the opals to a lapidary, as the polishing of them is an inexpensive job.

HARRISONBURG, Va., Feb. 5, 1901.

Editor of THE JEWELERS' CIRCULAR-WEEKLY:

Kindly inform us what will clean black enamel clocks.

Yours truly,

D. C. DEVIER.

ANSWER:—Enamel clock cases are usually cleaned by rubbing them with a soft sponge moistened in water; or, if this does not cut the grease, alcohol is used. This removes spots from the surface, but when the spots are beneath the surface of the enamel, we know of no remedy. We would caution correspondent about rubbing the enamel too hard, or it may become scratched and look worse than before.

BELLAIRE, O., Feb. 1, 1901.

Editor of THE JEWELERS' CIRCULAR-WEEKLY:

Will you kindly tell me how to true up a balance wheel (cut balance) which runs a little or con-

siderably out of true, and state tools required for such work and where they are made?

Yours,

HOROS.

ANSWER:—The question asked cannot be answered briefly to be comprehensive. "Balance cut," or generally known by the phrase "chronometer balances," is from the standpoint of truing up of two kinds: those which are new and those which are met with in the course of watch repairing. We take it that the latter kind are meant, and these are found to be out of true from several causes. First, from having been handled roughly by inexperienced persons; next from a fall or other violent shock, and last from a change in the molecular condition of the two metals composing the laminæ, which last derangement takes place most frequently from the balance having been exposed to extremes of temperature, more especially cold. Thus the laminæ of the balance of a ship's chronometer which was in use for three years in the Behring Sea were entirely separated (the brass from the steel) by the extreme cold of that latitude. Intelligence and discrimination are required to know from which standpoint to tackle the job. Rough handling or other violence would mostly bend the balance at the arm, and this must be the point of attack. The one tool indispensably required in all cases is a good calipers, fitted with steel safety tips, for fine pivots, and a movab'e straight edge. It may also be stated here that tools out of the ordinary for training balances are not to be bought, but every operator must make his own, the properties of which can only be indicated. The most

universal and handy tools are the operator's fingers, as these prevent kinks and the marring of the brass surface. Material's for other tools are preferably ivory, hard rubber and celluloid of a width of a quarter of an inch, more or less, with cross cuts and fitted in light, round handles. The fingers are best to be used when the circular form of the laminæ is distorted. Absolutely true balances are seldom to be met with and, therefore, it may be truly said that balances are only trued approximately. Some very fine watches are on y fitted with chronometer balances which remain perfectly true on being cut, and continue in that condition only when not exposed to extremes of temperature. In adjusting watches and chronometers to changes of temperature, a balance is frequently poised and kept on the poising tool during changes of temperature, and if it remains during these in its normal position, it is considered a more nearly perfect balance, whether its circular form be perfect or only nearly so.

To Restore the Color to a Gold or Gilt Dial.—Dip the dial for a few seconds in the following mixture: Half an ounce of cyanide of potassium is dissolved in a quart of hot water, and 2 ounces of strong ammonia mixed with half an ounce of spirits of wine are added to the solution. On removal from this bath, the dial is immediately immersed in warm water; then brush with soap, rinse, and dry in hot boxwood dust. Or it may be simply immersed in dilute nitric acid; but in this case any painted figures will be destroyed.

The guarantee of the CROWN and LION cases means that a brand-new case of the same grade will be given free of charge for any Crown or Lion case that fails to wear the full guaranteed period.

THE TRIUMPH
—OF—
CROWN and LION CASES

in 1900 has spurred the makers to still greater efforts, and they start the new year and century with a magnificent new line and an unprecedented variety of styles and patterns

There are no makes of filled cases now on the market so firmly or justly fixed in trade favor. Salability and satisfaction given have placed them first in quick-selling, profit-making staple stocks.

SOLD BY ALL LEADING JOBBERS.

WORKSHOP NOTES.

Diamantine.—This substance consists of crystallized boron, the basis of borax. By melting 100 parts of boracic acid and 80 parts of aluminium crystals is obtained the so-called bort, which even attacks diamond. The diamantine of commerce is not so hard.

To Cut Glass Under Water.—It is said to be possible to cut a sheet of glass roughly to any desired shape with an ordinary pair of scissors, if the operation be performed under water. Of course, a smooth edge cannot be obtained by such means, but it will be found satisfactory.

Gilding au Bouchon.—To gild by means of a wad the following paste may be used:

- Chloride of gold, dry.... 12 grammes
- Cyanide of potassium.... 80 grammes
- Spanish white.....100 grammes
- Cream of tartar..... 5 grammes
- Distilled water.....100 grammes

To Soften Steel.—For the purpose of softening steel it is heated to a brown-red and plunged into soft water, river water being the best. Care should be taken, however, not to heat over brown-red, otherwise it will be hard when immersed. The steel will be soft enough to be cut with ease, if it is plunged in as soon as it turns red.

To Whiten Iron.—Mix ammoniacal salt in powder with an equal volume of mercury. This is dissolved in cold water and mixed thoroughly. Now immerse the metal, heated to redness, in this bath and it will come out possessing the whiteness and beauty of silver. Care should be taken not to overheat the article and, thus, burn it.

To Cut Glass Without a Diamond.—Scratch the glass around the shape you desire with the corner of a file or graver; then, having bent a piece of wire into the same shape, heat it red hot and lay it upon the scratch and sink the glass into cold water just deep enough for the water to come almost on a level with its upper surface. It will rarely ever fail to break perfectly true.

To Make Gold Amalgam.—Eight parts of gold and 1 of mercury are formed into an amalgam for platinø by rendering the gold into thin plates, making it red hot and then putting it into the mercury while the latter is also heated to ebullition. The gold immediately disappears in combination with the mercury, after which the mixture may be turned into water to cool. It is then ready for use.

To Clean Soldered Watch Cases.—Gold, silver and other metallic watch cases, which, during the soldering with hard solder, or otherwise, have been exposed to heat, are simply laid into diluted sulphuric acid (1 part acid to 10 to 15 parts water), whereby they are freed from the oxide produced by the fire. Heated acid accelerates the cleaning process. The articles are then well rinsed in water and dried. Gold cases are next brushed with powdered tripoli moistened in oil, to remove the pale spots caused by the heat and boiling, and to restore the original color. After that they are cleansed with soap water and finally polished bright with red stuff. Silver cases are brushed bright, after the boiling, with scratch brush and beer.

THE RAMBLER'S NOTES.

WHAT THE RAMBLER SAW AND HEARD AMONG THE DEALERS IN ART POTTERY, CUT GLASS, BRONZES, ETC.

NEW PRODUCTIONS IN ROYAL COPENHAGEN.

THERE will be more than usual enthusiasm among the lovers of artistic ceramics at the latest pieces introduced in the ware of the Royal Copenhagen Porcelain Co. This is especially true of the new vases and plates which come in dark, solid body colors, ornamented with white narcissus flowers. The two body colors shown on the pieces at the company's New York salesrooms, 96 Church St., are green and blue, and both are in shades and have a finish and luster that are entirely different from anything on commercial china or pottery now on the market. Among the novelties are reproductions of small insects, as bees, beetles, dragon flies, etc., which show the usual perfect work of the artists employed by this concern, while menu cards are among other new pieces just out. In the "Marguerite" shape, introduced first at the Paris Exposition, are a number of handsome plates with floral designs, that are proving very successful with the fine jewelry trade.

THE SEASON'S LINE OF G. D. A. CHINA.

PROBABLY the most noticeable feature in this season's line of "G. D. A." china, of which the import samples are now on exhibition at the warehouses of Gérard, Dufraissex & Abbot, 29 Barclay St., New York, is the predominance of strong colors, and this not only applies to dark shades but is noticeable in the pinks, blues and other hues that have heretofore been in light effects. Borders, wide and narrow, as well as dainty floral decorations still hold a prominent place and appear in modifications of the patterns popular for the past two years. The art nouveau influence is to be seen in a few new styles of ornamentation, but does not play as important a part in the pieces for the American market as it does with pieces for the European market. One of the most artistic lines of rich plates this firm have ever carried is now offered by them to the trade, as well as some of the daintiest and most artistic decorations that have been seen in this china for many years. The line of small sets, novelties and special pieces in china is as large and varied as ever and contains the usual number of new articles and graceful forms.

THE NEW MONROE CUT GLASS.

THE first productions of the new cut glass just introduced by the C. F. Monroe Co., on exhibition at their New York salesrooms, 28 Barclay St., show many high grade cuttings with distinctly original features in their designs. One of the most prominent designs is the "Kimberley," which runs through a full line and shows an unusually brilliant mass of large stars; while another, known as the "Eclipse," is formed of wide, interlacing bands, which give an exceedingly beautiful and brilliant effect. The "Peerless," a medium grade cutting, has also pretty features.

THE RAMBLER.

A Book for Glass Ware Collectors.

TO the collector of old American glass ware there is no publication of the last few years that will be more welcome than the recent volume of Edwin Atlee Barber, entitled "American Glass Ware," and published by the author. This book, which takes up the history of the manufacture of glass in this country from the time of the first glass bottle factory located in Virginia, soon after the founding of the colony, in 1607, right up to modern firms making the most artistic productions of the day, is dedicated to all lovers of the antique, the curious and the beautiful in glass ware. It is a volume of 112 pages, finely printed and bound in green cloth, profusely illustrated with many full page half tones and photogravures in addition to a host of small wood cuts of articles which it describes. Its author, Mr. Barber, needs no introduction to collectors of glass ware, and his book is, to some extent, a compilation of articles contributed by him to the New York *Sun* and the *Glass and Pottery World*, wherein many of the illustrations it contains originally appeared.

Antique flasks and bottles being the principal pieces manufactured by the early American glassmakers, are necessarily the articles treated most fully in this work. Mr. Barber's description of these is very full, and his essay on "The Way to Identify Old Glass Ware" will be interesting and instructive, even to those not familiar with the subject. He takes up many of the principal factories separately and not only gives a sketch of the business and the idea of the works, but he gives also a compilation showing briefly by description and illustration the principal articles of these factories which are familiar to collectors. There is also a chapter on miscellaneous designs by

unknown makers. Glass cup-plates are treated very fully, and, in addition, is an article on political glass ware, with illustrations of early pieces and some of the souvenirs of the recent campaigns. The book concludes with a chapter on modern artistic work, such as cut glass, and also a short account about the "Favrile" glass of the Tiffany Glass & Decorating Co., now the Allied Arts Co. At the end is a list of bottle designs and a general index.

The Glass Industry of Lorraine.

FROM Kehl, under date of Jan. 12, 1901, Max Adler, vice-consul, writes regarding the glass industry of Lorraine:

"There is hardly in all Germany an industry more productive and flourishing than the glass industry in its various branches. While the trade papers of other industrial lines are complaining about the decline of business and consequent reduction in profits, and while it has been found necessary in many important branches to curtail the output and even close factories here and there altogether—not only on account of overproduction, but because the trade had fallen off—the glass industry has not only been able to hold its own, but even to increase its output. This has been due not only to increased activity on the part of the manufacturers and their agents, but also to the fact that the glass factories are able to produce excellent goods so cheaply that they can compete in the world's markets against those of all other nations.

"Some 50 years back, Bohemia was leading in nearly all kinds of glass ware, from the cheap grades up to the very best and finest, and it was hardly thought possible that these products would ever have to fear a competitor. To-day, Germany has almost surpassed her rival.

"The glass factories in Lorraine—four in number—are making hollow glass of all kinds and description, watch and spectacle glasses, lamp glasses, window glass, glasses for pendules and for scientific instruments, etc. While a good deal of the output is sold in Germany, most of it finds its way to foreign countries, and the United States has always been a good customer. For the last three years, however, the export of the glass products of Lorraine has increased remarkably, as shown by the following figures, taken from the records of the United States consulate at Kehl:

1897.....	\$64,707.53
1898.....	67,177.26
1899.....	139,493.76
1900.....	177,576.17"

ONE HUNDRED THOUSAND AMERICAN WATCHES have ABBOTT'S PATENT STEM-WINDING ATTACHMENTS. A few million key-winding watches are still in use. A few jewelers may make a few dollars by sending a few of these watches for alteration to HENRY ABBOTT, 9-11-13 Maiden Lane, New York.

(Commenced in issue of Feb. 6, 1901.)

CHEMICALS, TABLES, RECIPES.

[Continued.]

RECIPES [Continued].

Lens Drilling Fluids: No. 1: Oil of camphor and sweet oil, equal parts. No. 2: Turpentine and oil of camphor, equal parts.

Soft-soldering Fluid: Soft-soldering fluid is generally made by dissolving small pieces of zinc in muriatic acid until all effervescence ceases; after which a small amount of sal-ammoniac is added. Another way to make this fluid is to dissolve a small amount of chloride of zinc in alcohol.

Soft-solder Destroyer: Many jewelers use nothing but muriatic acid to remove soft-solder from articles to be repaired but, in all our experience, we have not found anything to equal the formula of George E. Gee; therefore we give it in its entirety:

- Proto-sulphate of iron..... 2 oz.
- Nitrate of potassa..... 1 oz.
- Water 10 oz.

13 oz.

Reduce the proto-sulphate of iron (green copperas) and nitrate of potassa (saltpetre) to a fine powder, then add these ingredients to the water, and boil the preparation in a cast-iron saucepan for some time; afterwards allow the liquid to cool, and in doing

so it will shoot into fine crystals; if any of the liquid should remain uncrystallized, pour it from the crystals and again heat it, when, on cooling a second time, it will all have become crystallized. The crystallized salt should then be taken and dissolved in muriatic acid, in the proportion of 1 ounce of salt to 8 ounces of acid. Now take of the latter preparation 1 ounce, and add it to 4 ounces of boiling water in a pipkin, keeping up the heat by means already stated. In a short space of time the most obstinate cases of soft-solder will be cleanly and entirely removed and without the work changing color, if the instructions are properly carried out in preparing the mixture, etc.

Solution for Removing Cement from Work: A substitute for alcohol for removing cement from work is made of:

- Rain water.....1 gallon
- Lime2 pounds
- Washing soda.....1 pound

Slack the lime in rain water. Then pour off the liquid and in it boil the washing soda for one hour. To use, place the articles to be cleaned in a boiling-cup and cover with the liquid, which is heated to the boiling point. Then rinse in water and dry.

A Good Silver Cleanser is made of the following:

- Rain water.....11 oz.
- Crystallized nitrate of silver..1 oz.
- Cyanide of potassium.....2½ oz.
- Powdered chalk.....5 oz.
- Cream of tartar.....1-16 oz.
- Table salt.....¼ oz.

TESTING ACIDS.

The U. S. Mint Test for gold coin is composed of:

- Strong nitric acid.....6½ drachms
- Muriatic acid.....1-6 drachm
- Pure water.....12-3 drachm

The U. S. Mint Test for silver is composed of:

- Nitrate of silver.....24 grains
- Nitric acid.....10 drops
- Water 1 ounce

If the coin is of base metal it will at once turn black.

For buying in old gold the jeweler will need two different kinds of acid—strong and weak, or more generally known as straw-colored and white. The straw-colored acid is the nitro-muriatic acid previously mentioned and the white acid is chemically pure nitric acid.

To test gold of any karat rub the article on the testing stone and the ends of two or more needles that are supposed to be nearly the same in quality. Then apply the testing acid and the article will be of the same quality as the needle whose mark disappears at the same time.

Thus for testing 18k., rub the 18k. test on the stone and the article to be tried next to it. Then with the stopper put some of the straw-colored acid over both rubs at the same time. If the article tried is 18k. the acid will not affect it, but will withstand it the same as the test does; if not 18k. the acid will cause it to turn red.

From the description given for testing 18k. the reader can easily ascertain the quality of any other alloy. It should be borne in mind that the nitric or white acid should be used for testing gold 14k. fine or less. Always keep the testing stone and needles free from dirt and grease.

(To be continued.)

The Francis Engraver.

Write for booklet just out, and see how many of the men who tell what they know about machines are acquaintances of yours, or reside near you. When asked for a conscientious statement they responded with valuable information. It is something everyone who intends to buy a machine ought to know. If you buy without seeing it you will be sorry. Send business card. Only intended for the trade.

ROMAN STYLE IN SILVER WARE DESIGNING.

THE trophy offered by the Pittsburgh *Chronicle-Telegraph* to the club winning the hockey championship of western Pennsylvania, is conceded by followers of athletics to be one of the best ever presented for competitors in any sport in that vicinity. The trophy is a production of E. P. Roberts & Sons and reflects more than ordinary credit upon its designers. It is a vase of silver, standing 38 inches high, upon an 8-inch ebony pedestal. The design is Roman in its general effect. The top has a richly designed and carved appliqué floral border, culminating in a perfectly executed Medusa head. The curve of the bowl is fluted, and as a part of the symmetry and harmony of the effect, smaller fluting appears elsewhere. A unique and ornate effect is produced at the stem with an arrangement of acanthus leaves. The base is decorated with a superbly etched reproduction of a photograph showing a hockey team. This photograph was taken at Duquesne Gardens and represents one of the crack local teams in action. This etched panel adds vastly to the appropriateness of the trophy. At the top, on both sides, are two gold hockey sticks bound together with gold wreaths. Resting on the brink of the cup is the "puck," seemingly unsupported. Two scroll shields are upon either side, each having over it great gold wreaths. Upon the front of the shield is the inscription: "The Pittsburgh *Chronicle-Telegraph* Hockey Championship Trophy. Season 1901." An exact duplicate of this shield on the reverse side will be similarly engraved with the name of the winning team. The revolving pedestal is an unusual and clever device. The trophy is now on exhibition in one of the large Fifth Ave. windows of the store of E. P. Roberts & Sons, where it will remain for several weeks to interest passers-by.

THE PITTSBURGH "CHRONICLE-TELEGRAPH" HOCKEY CHAMPIONSHIP TROPHY.

Pearls for Debutantes.

ODD effects in jewelry are the fad just now, says the *Sun*, and it is noticeable that the taste of the women who set the styles runs to the irregular pearls called baroque. Débutantes and young matrons are the chief upholders of the pearl fad, as the pearls give a touch of elegance to simple costumes. One of the favorite combinations is made of two rows of seed pearls with pendant jewels hung around at intervals and a large baroque pearl pendant from the center. The other jewels are oftenest topazes, amethysts, moonstones and sapphires, and the whole gives a brilliant effect. Besides irregular pearls there is a craze among the women who can afford such luxuries for uncut gems, particularly of turquoises, in belt buckles, waist brooches, cuff buttons and umbrella handles. Rough turquoises are set in rose gold and the stone is frequently inscribed with hieroglyphics in gold. They give a barbaric touch to a costume, the effect of which is enhanced by the peculiar hue of the stone in contrast with the gold setting. It will be a dainty picture of herself which the débutante of 1901 can show to her children 10 years hence.

Kings' Jewels.

THE Prince of Bulgaria is reported to be possessed of precious stones to the value of \$5,000,000. These he keeps locked in a little castle on the banks of the Danube. King Milan of Serbia kept such of his jewels as were not in pawn in London and Paris banks. Some of the jewels belonging to the German imperial family are kept in London banks, like those of the Czar.

Reigning Fashions in Paris.

PARIS, Feb. 17, 1901.

In table ware the prettiest things are now to be seen. As an example, I will cite the double jam pot frame, with spoons, here illustrated. It is made of crystal and silver and represents two

DOUBLE JAM POT FRAME.

oranges, the upper part of which is stripped of its peel.

A particularly attractive butter dish is of crystal and its cover is a large butterfly of chased silver, with outspread wings. A small silver spoon is placed behind upon two little hooks representing the legs of the insect.

Very artistic and beautifully wrought are sugar tongs of silver-gilt and consisting of

two life size legs of a turkey, inlaid on a silver foundation.

At fashionable dinners, a spreading fad is the use of a special service for each course of the meal. For instance, for fish, plates are artistically decorated with fish and shellfish; then, for game, plates represent hunting scenes or different heads of game, such as hares, pheasants, partridges, etc. The same fancy prevails in dessert plates and coffee services. As to this last line, cups adorned with Empire designs are in the most perfect taste.

In order to enable one's guests to help themselves to *hors d'œuvres*, or desserts, large crystal dishes are made use of. They are encircled by a band of burnished silver and divided into several square and hollow compartments. These dishes stand on four silver feet fitted with small wheels of india rubber, which give the greatest mobility to these practical table accessories.

Here are sketches showing some of the newest patterns in hat and hair pins now exhibited by the leading firms of the Rue de la Paix. These pretty accessories of the feminine toilette are mostly made of matt gold or silver, and their heads are elaborately chased and set with precious stones. Apropos of hat pins, I must say that those which do not injure the hat have two small catches sewed to the hat, under the rim, close to the head on either side. The hat pins go through the small catches and fasten firmly into the hair, thereby keeping the hat in position.

Large rubies are still very rare here and

are quoted at fancy figures. There are plenty of emeralds of medium and ordi-

SOME NEW PARIS HAT AND HAIR PINS.

nary qualities; but very fine emeralds are very difficult to find, unless at exorbitant prices. A. L.

FINE PEARLS A SPECIALTY.

**68 Nassau St., cor. John St., Sheldon Building,
Room 16, NEW YORK.****The Diamond Markets.**

ANTWERP, Feb. 15.—The market has again a quiet tendency. The stock in polished goods is very large for the moment. Many of our "Eigenwerkmakers" are in a pitiable condition, all their money being engaged in their unsold polished diamonds. Bort is always very dear in proportion to the rough. Some firms have been obliged to lay off their workmen owing to the increase of their finished stock.

Week before last many American firms were represented on the market, while last week brought many Continental buyers. Mr. Bareyansky, of Odessa, and Mr. Kolinsky, of Frankfort-on-the-Main, were at the Diamond Club and bought brilliants and Antwerp roses. Two Frenchmen were also here, Mr. Strauss and Mr. Pan, of Pan & Co., both Paris houses. They bought fine lots of blue-white brilliants just finished by the cutters. Mr. Stavenhager, of Oppenheimer, Stavenhager & Co., Frankfort-on-the-Main, who was here three weeks ago, arrived again this week and bought small lots of brilliants. Mr. Backes's son, of Backes & Strauss, London, bought for his firm fine roses and brilliants.

Since the crisis in the diamond trade of last year, Australian stones have been polished by our workmen. It has often happened that they have earned only 8 to 10 francs per week by polishing these bad stones, but the result has been very good in one respect: they are now acquainted with all the difficulties in polishing.

The death is announced of S. Frechie, one of the oldest diamond cutters in the city. He was 82 years old.

A copartnership has been formed between Henry Van den Bosch and his brother, Fred. Van den Bosch, under the style of Van den Bosch Frères. They are established as diamond dealers and polishers.

D. de Leon, a diamond polisher and a much esteemed man, died Feb. 2.

The syndicate formed here, some time ago, among the proprietors of the large diamond factories have accepted as a uniform rate for the location of mills, 7.50 francs per mill per week. They will also try to freeze out the small factories by giving their proprietors a yearly allowance.

PARIS, Feb. 14.—The tone of the market is somewhat better, owing to the arrival of a number of foreign sellers. Some sales were made, but there still remains on hand a very important stock of polished diamonds.

Mr. Ginsberg, a German, has been here asking for colored stones and pearls.

Coral is still in favor. This stone, which was out of the market for many years, appears in the show windows of our jewelers. High prices are asked—a good proof of a growing demand.

France exported to the Philippine Islands from July, 1899, to March, 1900, jewelry to the value of 350,000 francs.

The collar of pearls, destined for the Princess of Asturia, is composed of very splendid pearls, set in one line. It represents a value of 250,000 francs and was

SON & CO.

bought here through a Madrid house. It is a marvelous work. The present offered by her future husband is a beautiful brooch, entirely of brilliants, representing a lily, also of Paris manufacture but sold by a Spanish firm.

Large rubies are always very scarce and high here. Emeralds of medium quality come readily, but the fine sorts are found with great difficulty and are sold only at extraordinary prices.

LONDON, Feb. 14.—A little improvement has been observed in the trade. Let us hope it will not stop half way. It is generally believed that there is always plenty of rough diamonds. The latest mail from the Cape brought several lots for the Syndicate.

Some people here think that as soon as the war in the Transvaal is over the Government will levy a duty of 10 to 15 per cent. on diamonds. It is certain that the enormous expenses occasioned by this war must be settled in the near future, and one means will be to tax the principal products of the conquered countries, among them diamonds and gold.

AMSTERDAM, Feb. 15.—We have had a number of buyers here, among them Mr. Pan, of Pan & Co., of Paris. He came from Antwerp and completed orders and made large purchases in fine brilliants, just finished by our polishers.

The condition of the workmen does not improve and about 600 men have been dismissed by the Syndicate of Diamond Cutters and Polishers.

The following prices were paid here by American buyers: For first grade fine m  le, 300 francs to 325 francs per karat; for second grade, 325 francs to 350 francs per karat; for third grade, 350 francs to 375 francs per karat, and the other grades in proportion.

In statistics of workmen engaged in the diamond factories, Amsterdam is at the head with 7,000 workmen. Antwerp follows with about 3,500. Then come Geneva and the Jura together with more than 700 men. Paris and Hanau are given nearly 200. In New York, Brooklyn and Cincinnati are working 200 to 300 in the trade. London has only 50 workmen.

Decision in Suit Over Quantity of Fine Turquoises.

EL PASO, Tex., Feb. 28.—The controversy between the heirs of the murdered Amos J. De Meules, "the turquoise king of the Jarillas," for the possession of \$7,787 worth of beautiful cut stones left by the "king" with A. H. Richards, a jeweler of this city, has been settled by a court decision in favor of the plaintiffs. The suit was of somewhat complicated nature and hinged on the question of whether De Meules's home was in Texas or New Mexico. Under Texas laws the brothers and sisters of deceased would inherit a part of the estate and they contended that they owned a portion of the turquoises. The jury decided in favor of plaintiffs' contention that De Meules's home was in El Paso, Tex. The collection of turquoises involved in the suit is one of the most beautiful ever seen in the southwest.

More About the Get-Rich-Quick Diamond Concerns of Michigan.

DETROIT, Mich., Feb. 23.—There are hundreds of contract holders in the Tontine Surety Co., of New Jersey, in this city and Michigan, who expected to get rich on the diamond contract plan. Fifteen months ago the Tontine Surety Co., of Detroit, ceased writing a \$120-for-\$80 contract and commenced on a \$100-for-\$80 basis. The company offered the 50 per cent. contract holders stock in the New Jersey concern, which is an extension of the Detroit Tontine Surety Co. It was an ultimatum. Now those who are paying on the \$100-for-\$80 contract have been offered what President Farmer, of Detroit, calls "a generous proposition." He issued it this week and among other things says:

"As you are the holder of one or more \$100 diamond contracts, issued by the Tontine Surety Company of Michigan, on which there is a balance due, if you will pay the entire balance on or before March 1 next we will mature your contracts at once and sell you therefor 10 shares of fully paid-up and non-assessable stock of the Tontine Surety Co., of New Jersey, at \$10 per share, par value."

The whole plan is clear now and the get-rich-quick people are wearing long faces. Attorney-General Oren proposes to use every means at his command to drive this and other companies of a similar nature from the State.

Provisions of the New Tariff of British Honduras.

WASHINGTON, D. C., Feb. 27.—A new tariff went into effect in British Honduras on Feb. 1, of the present year, under which

it is provided that the rates on jewelry and all kindred lines shall be 10 per centum ad valorem, while bullion and coin, church decorations and unmanufactured tortoise shell are all to be admitted free of duty.

The tax on commercial travelers within the colony has been raised from \$5 to \$10 per annum.

Fred. Frick Clock Co. Formed to Manufacture Programme Clocks.

WAYNESBORO, Pa., Feb. 23.—The Fred. Frick Clock Co., to manufacture and sell patent electric programme clocks invented by Mr. Frick, are being organized. The new company will have an authorized capital of \$20,000, of which \$17,000 has been subscribed by 17 local business men, whose business experience and financial backing will insure the new organization a firm foundation.

The first stockholders' meeting was presided over by Daniel Hoover, president of the People's National bank, and J. E. Frantz acted as secretary. The directors are five of the stockholders, as follows: A. O. Frick, F. Forthman, T. B. Smith, J. E. Frantz and W. T. Omwake. Mr. Omwake is the company's solicitor and will secure a charter as soon as possible.

Mr. Frick disposes of all his stock, machinery, tools, patents, etc., to the company, under an agreement of royalties on his inventions, and will be retained in the employ of the new organization. A condition of the agreement is that the industry must remain in Waynesboro.

Death of New Jersey's Oldest Watchmaker.

PATERSON, N. J., Feb. 27.—Hubert Tavis, 92 years old, an old-time repairer, died here yesterday. To-day would have been his birthday anniversary and it was to be duly celebrated. He died sitting in a chair, without previous warning of his death. About two months ago he was ill with pneumonia, but recently was apparently in his usual health.

Mr. Tavis was said to be the oldest watchmaker in New Jersey. He was born in Holland and came to the United States in 1853. He married, 62 years ago. A widow, 80 years old, and four children are living.

Mysterious Robbery and Return of a Quantity of Jewelry.

MARION, S. C., Feb. 23.—Between \$200 and \$300 worth of watches and jewelry disappeared from the store of H. B. Rote, recently, under peculiar circumstances. The robbery occurred at night, yet the door, secured by two locks, showed no sign of having been forced from the outside, though both the fastenings on the inside were forced off, which induced the suspicion that the locks had been tampered with from the inside. Again, only solid gold watches and jewelry, with the exception of one or two pieces of sterling silver, had been taken, and this seemed to indicate that some one who knew the value of the various articles in the store was concerned in their taking.

A clerk employed by Mr. Rote has been

arrested and is now in jail, awaiting examination. All the missing goods have been returned under circumstances as unusual as the robbery. When the janitor of the Court House entered that building, a few mornings ago, he found on the door sill a sack, which was found to contain all the missing watches and other articles taken from Mr. Rote's store. Where the sack came from or who put it there is still shrouded in mystery so far as the police will admit.

A Watch Decided to Be Not Wearing Apparel.

BOSTON, Mass., Feb. 28.—Judge Lowell, of the United States District Court, has handed down an opinion which sets forth that a bankrupt's watch is not clothing and is not an exempt asset. The decision is in the case of Frank Turnbull, a plumber, who recently filed a voluntary petition in bankruptcy. Turnbull, through his counsel, contended that his watch was exempt. Clauses 1 and 5 of section 34, chapter 171, of the Public Statutes of Massachusetts exempt from execution "the necessary wearing apparel" of a bankrupt and "the tools, implements and fixtures necessary for carrying on his trade or business." And under section 6 of the Bankruptcy Law bankrupts are allowed the exemptions prescribed by the State laws. Judge Lowell, after discussing in detail the legal aspect of the issue, says:

"There is no prevailing consensus of opinion that a watch either is or is not 'wearing apparel.' * * * Upon the whole a watch does not seem to me included within the natural meaning of the words 'necessary wearing apparel.' I hold, therefore, that a watch is not exempt under the bankruptcy act as 'necessary wearing apparel of the bankrupt.' * * * In his petition in bankruptcy the petitioner stated that he was a plumber, but there was no evidence of how he followed his trade or how his watch was necessary to him herein. The burden of proof is upon the bankrupt, and the fact that he is a plumber does not of itself establish that he needs a watch in his trade."

A Very Bold Game of Robbery That Did Not Quite Succeed.

KANSAS CITY, Mo., Feb. 26.—Last Friday at 5 o'clock a bold attempt at robbery was made by John Holbert in the Barr Jewelry Co.'s store, third floor Hewson building, 1016 Walnut St. The Barr Jewelry Co. are manufacturing jewelers and Holbert inquired if the company bought old rings. Mrs. Rose Scruggs, who was in charge of the counter, replied in the affirmative and the young man went out. In 10 minutes he returned with a ring, which he handed to Mrs. Scruggs, who took it into the back room. When he returned Holbert was gone, as was also a tray containing 42 rings, which had been in the show case. Mrs. Scruggs immediately gave the alarm and R. L. Hagan, an employe of the company, started in pursuit. The empty tray and

four rings were found on the stairs. Holbert ran around the block and into the east entrance of Emery-Bird-Thayer's store, where, seeing he was being pursued, he threw the rings broadcast. He went through the store, coming out at the Walnut St. entrance, one block west, and proceeded calmly down the street. By the time his pursuer reached the door the thief was half a block away. Mr. Hagan called to a policeman, who placed Holbert under arrest. Mrs. Scruggs positively identified Holbert as the man who had tried to sell the ring.

Jeweler's Wife in Serious Condition from Injuries from a Negro.

ATLANTA, Ga., March 2.—The wife of C. A. Buchanan, jeweler, is in a serious condition from injuries received from a negro who entered his house yesterday morning. Mrs. Buchanan was alone at the time. The negro ordered her to give him all her valuables and, covering her with a pistol, compelled her to cook him a breakfast. After eating the meal and examining the house, all the time threatening the woman, he seized her, threw her on a bed, secured her with book straps, placed a newspaper under her feet and applied a match. Setting fire to window curtains in the room, he fled.

Mrs. Buchanan managed to free herself, ran out of doors screaming for help, and, as soon as the flames were extinguished, collapsed with hysteria. Physicians say her condition is critical. The country is being searched for the negro, whose life will be in extreme danger if he be found.

Legislation in Rhode Island Against Trading Stamps, Etc.

PROVIDENCE, R. I., March 2.—The Committee on Judiciary of the House of Representatives gave a public hearing, Tuesday afternoon, on the bill which has been introduced aiming to do away with the trading stamp business in this State. The title of the act is somewhat interesting: "An act to protect the public morals by prohibiting schemes and devices in the nature of lotteries." The act characterizes all schemes and devices to sell, give or distribute trading stamps or the like as being in the nature of a lottery and detrimental to the public morals and, therefore, illegal. The act further declares that no concern shall be allowed to dispose of such stamps with the understanding that they may be redeemed for prizes or for money. A penalty of not less than \$100 nor more than \$500 fine, or imprisonment not exceeding three months for each offence is provided.

At the hearing it was argued by counsel for parties in favor of the proposed bill that trading stamps were demoralizing to the merchants and customers alike, stimulating women and children to buy unnecessary things, merely for the sake of obtaining a prize, said to be worth \$5 but in reality of much less value. It was asserted that the stamp schemers made their profit from the merchant twice over—first by selling the stamps, and again by the loss of the stamps. Counsel asserted that as great a proportion as 75 per cent. of the stamps issued were never redeemed. Among the speakers at the hearing was H. S. Tanner, the Westminster St. jeweler, who stated that he had used trading stamps for some time, but was of the opinion that they were of no benefit to him. He claimed that he knew of many other merchants whose experience was the same.

The sterling silver ware of the bankrupt A. F. Towle & Son Co., Greenfield, Mass., has been sold to Smith & Murray, Greenfield, and to the R. H. White Co., Boston, Mass. The plated ware has been sold to Smith & Murray. The plant has not yet been sold.

Legislation Sought in Kansas Against Peddlers.

GREAT BEND, Kan., March 3.—E. R. Moses, head of the E. R. Moses Mercantile Co., who have one of the finest stocks of jewelry in this part of the country, has just returned to this city from Topeka, where he has been putting in some earnest work among the legislators in the interest of the law to license peddlers, and also for the bill to revise the mortgage and promissory note law. In speaking of his trip and the cause for which he was working, he remarked:

"There is no reason why peddlers should not pay a license the same as any other merchant. On the contrary, there is every reason why they should. Down in Barton county a peddler last year sold \$12,000 simply in rights to merchants to handle a patent flour chest. He paid no license. Last year also another peddler in the same county made \$5,000 in selling patent wire fence rights. These are only instances. The peddler's license will by no means be prohibitory, but will range from \$5 to \$50, according to the articles sold."

Charles Roth Retaliates Upon the City of Leadville.

LEADVILLE, Col., Feb. 28.—Charles Roth, jeweler, who came here from Denver about a year ago, and who has been having much trouble, recently, with the city authorities in endeavoring to carry on an auction, to-day applied to the District Court for an injunction against the city, restraining the authorities from interfering with him in carrying on the auction. Roth claims that if he wins the case he will sue the city for damages, inasmuch as the authorities have interfered with him carrying on his business for over a week, and also for false arrest. Colonel Lewis, auctioneer, will also probably sue for damages for false imprisonment.

Large Finds of Garnets Near Grayson, Ky.

ST. LOUIS, Mo., March 1.—A few miles from Grayson, Ky., discoveries of garnets in large quantities on several of the small tributaries of Guyon River have been made. The presence of the garnets was ascertained a year ago by several Cincinnati men who were looking for timber lands. They secured nearly a gallon of the gems and sent a number of them to lapidaries in London, England, for examination. The report has just been received. It declares the stones of first quality, though not very large.

The J. S. Moore Mfg. Co. have been incorporated in Maine to manufacture and deal in jewelry, with a capital of \$150,000. President, John S. Moore, Waterville, Me.; treasurer, George V. C. Bacon, Boston, Mass.

The Chicago Police Want Fred Foster, Arrested in Boston.

Boston, Mass., March 1.—The latest developments in the arrest of Fred Foster, on the charge of attempting to secure \$3,000 worth of jewelry from prominent wholesale jewelers, show that he is wanted in Chicago. It is claimed that he secured 119 watches from M. A. Mead & Co., 103 State St., Chicago. It is said the watches bought by the Wilson Jewelry Co., Tremont Row, and E. B. Horn Co., 429 Washington St., were a part of this lot. When it was learned here that Foster was wanted in Chicago, his bail was increased to \$2,000.

Detective-Sergeant Fitzgerald, of Chicago, arrived in Boston, Saturday, and as soon as the necessary preliminaries are complied with Foster will be taken back to Chicago to stand trial on the charge against him in that city. The Boston jewelers are congratulating themselves at the way in which they escaped being swindled and are willing to waive their rights in the case and allow the Chicago authorities to have the first "whack" against Foster.

Lancaster, Pa.

Louis Sondheimer, of J. M. Jenks & Co., was frightfully burned last week by the bursting of a rubber hot water bag while confined to bed.

Ezra F. Bowman, of the Ezra F. Bowman Technical School, will dispose of the stock of his retail jewelry store in order to devote his whole time to the school, which has grown the past year.

The board of directors of the Empire State Diamond Co., Tonawanda, N. Y., have elected the following officers: President, William J. Rogers; secretary and treasurer, Joseph A. Schuchert.

Against Department Stores.

Large Chicago Jewelers Co-operate in an Effort to Counteract Their Competition.

CHICAGO, Ill., March 4.—Several of the large Chicago retail jewelers have united in an effort to offset the demoralizing influences on the business of retail jewelers in all large cities exerted by the department stores. A circular letter has recently been sent out to the manufacturing jewelers and silversmiths of the United States in which the situation is outlined and co-operation is asked for. Appended is the letter:

To the Manufacturing Jewelers, Silversmiths and Kindred Lines:

We desire to call your attention to the great danger to our trade by the encroachments of the department stores on the general jewelry, time-piece and silversmithing interests.

We believe that a strong effort should be made by the manufacturers and jobbers to strengthen their interests by placing their products in the hands of only the specialty merchant, who has established a safe and permanent outlet for such wares.

Our attention has been recently called to the fact that goods are being placed in the department stores by certain manufacturers who, hitherto, have claimed to sell exclusively to the legitimate jewelry trade. (If you destroy the business of the jeweler, what have you left?)

In some cases reputable manufacturers have been induced to sell an opening bill, with the promise of a large future business—promises that have not been kept. It has not only been a detriment to the legitimate jeweler, but also to the manufacturers themselves.

We firmly believe that it is only fair to handle the goods of the manufacturer who sells exclusively to the jeweler, and we further believe that by dealing with the manufacturer who does not make an effort to restrict his trade to the jeweler only, we are encouraging him and working a great injury to the general business.

An effort to eliminate this growing evil should be general throughout the country and we desire your valuable help and assistance in this undertaking to protect our mutual interests, and we trust this letter will receive your earnest consideration.

Our aim should be to protect and foster that high respect and regard for the gold and silver smith art, which is to-day almost universal throughout the civilized world, and we desire your hearty co-operation.

An early expression in reference to the above will greatly oblige the undersigned.

Yours respectfully,

Signed: SPAULDING & Co.,
C. D. PEACOCK,
HYMAN, BERG CO.,
ROWE BROS.,
KEIL & HETTICH,
SHOURDS, ADCOCK & TEUFEL,
CHARLES E. GRAVES & Co.,
GOODRICH & POTTER Co.

One of the first replies came from the Gorham Mfg. Co., who have for many years firmly refused to sell to department stores and are naturally in line with the present movement. The company's hearty co-operation is promised. The Gorham Mfg. Co.'s letter is as follows:

February 20, 1901.

MR. C. D. PEACOCK, Chicago, Ill.

Dear Sir:—We are in receipt of a circular letter signed by yourself and seven other jewelry houses of Chicago, calling our attention to the dangers to the jewelry trade from encroachments by the department stores.

As you are aware, we can well claim to be the originators of the movement to prevent the sale of our class of goods through such channels, as we believed it would tend to cheapen their character and lessen their value as fashionable articles of merchandise through methods employed by the dry goods and department stores in the sale of their wares, and we are glad to give you such co-operation to this end as lies in our power. We wish, however, to call attention to the fact that, heretofore, during the many years that we have labored to establish just such relations between the manufacturers and the retail jewelers

handling their goods, we have not been supported as earnestly as should have been done by the retail jewelry merchants.

For instance, we have absolutely confined the sale of our wares for more than 20 years to the legitimate jewelry trade everywhere. Many retail jewelers will enter into an agreement with a manufacturer to purchase his goods on condition that he does not sell the department stores in his own city, irrespective of the fact that such manufacturer may distribute his wares through an *advertising department store in another city*, with the result that the local jeweler is injured almost as much by having his stock of goods catalogued in the cheapest and least attractive way, and circulated by a dry goods store from another city, reaching his own, however, leaving the jeweler in the position of offering the same goods from his own case that have been made common and cheapened in the eyes of all discriminating purchasers who have seen them illustrated in a dry goods store catalogue, thus rendering them in the eyes of such people undesirable for fashionable girls that go so far to make up the business in our line of wares.

We also desire to call your attention to the common practice of some manufacturers to sell all the goods they can to the department and dry goods stores, making their opening bill a feature, filling them full of their wares, then reforming, going to the retail jewelers and saying: "We don't sell the dry goods trade any more; we did sell them, but we have stopped;" and in that way inducing the jeweler to replace his goods in their stocks where they have been temporarily left out—the jeweler losing sight of the fact that these goods have also been made cheap in the eyes of his customers by bargain sales, catalogue advertising, etc. Many of the retail merchants of this country, who have made the loudest cry about purchasing from houses who sold to the legitimate trade only, have at once reinstated these manufacturers and put their lines in their stocks, regardless of the fact that the season previous they sold the identical goods to their dry goods store competitor.

This may be and is called *smart* on the part of the manufacturer practicing such methods, but how does it reflect on the perspicuity of the retail merchant allowing himself to be thus cajoled?

We feel that the trade generally are in error with reference to one feature of this dry goods and department store competition, namely, in the assumption that they sell cheaper than is customary with the retail jeweler. A careful investigation on our part proves this assumption to be untrue, and, as a rule, the dry goods or department store merchants do not sell at a less profit than is usual with the retail jeweler, but they do sell a cheaper line of goods, misrepresenting the same through pretentious advertisements in the daily papers, calculated to create the impression with the public that they are selling the same class of goods that the jewelers sell, which is not generally true.

Now, while we have no intention whatever of changing our position in this regard, we feel that we have a right to ask that the retail jewelry merchants throughout the country shall support those manufacturers who take the same stand that we do, and that these retail merchants should absolutely refuse to give their patronage or put into their stocks lines from manufacturers who do not confine their trade to the jewelers everywhere.

We believe to-day that this movement has so far reached toward success that, if a united effort were made now on the part of the leading retail jewelry merchants, the lines of goods that you would desire to place in your stock can be wholly protected from being sold in any dry goods store or department store in the land.

We know that important houses in the dry goods business have found it an impossibility to successfully handle fine silver ware, and they have confessed their failure as having arisen from the fact that the manufacturers of the best lines of goods have persistently refused to sell them.

Our letter to you is not intended to discourage the movement which you have started in Chicago, as we believe it to be in the right direction, but if the manufacturer is to give adherence to that movement in Chicago and elsewhere, he should have the united support of the leading jewelers all over the country in so doing, and this is the only way that it can be made effective for your interests as well as for the manufacturer's interests.

Assuring you of our hearty co-operation in any movement that will tend to confine the sale of

sterling silver ware to the legitimate jewelry trade, we remain,

Very sincerely yours,
Signed: GORHAM MFG. Co.,
EDWARD HOLBROOK, Pres.

In addition to this reply, others have already been received from some 30 manufacturers, all of whom are in favor of the movement suggested for the protection of the legitimate retail jewelry business. Among these are the following:

Reed & Barton,	Mauser Mfg. Co.,
Dominick & Haff,	William B. Durgin Co.,
Carter, Hastings & Howe,	Redlich & Co.,
Day, Clark & Co.,	Sloan & Co.,
Riker Bros.,	A. J. Hedges & Co.,
Geoffroy & Co.,	Bippart & Co.,
Charles P. Goldsmith & Co.,	Charles Keller & Co.,
A. Joralemon & Son,	Block & Bergfels,

AT THE PARIS EXPOSITION.

Death of T. V. Dickinson.

NIAGARA FALLS, N. Y., March 2.—Thomas Verity Dickinson, one of this city's best known citizens, died at the residence of B. F. VanDenburg, where he made his home, to-day. Mr. Dickinson was stricken with apoplexy early Wednesday morning and since then had been unconscious. Mrs. C. C. Robbins, Mr. Dickinson's daughter, who resides in Chicago, was summoned by wire when her father was stricken and was at his bedside when the death occurred.

Mr. Dickinson was born in Lancashire, England, Aug. 1, 1843. He came to the United States with his parents, in 1848, and settled in Buffalo, where his father entered the jewelry business. Thomas, Jr., received his education in the public schools of Buffalo, and on arriving at maturity embarked in the jewelry business with his father. In 1865 he married Miss Matilda Burtis, of Rochester, who died about a year ago. He came to Niagara Falls in 1892 and opened a jewelry store in the Imperial Hotel block, where he remained for six years, when he removed to the Arcade building. The only surviving relatives are two daughters, Mrs. E. M. Wood, of Denver, Col., and Mrs. Robbins, of Chicago.

Receiver Appointed of the Assets of J. T. Scott & Co.

Judge Brown, in the United States District Court, Wednesday, appointed Walter P. Long receiver of the assets of J. T. Scott & Co., jobbers in watches, diamonds and jewelry, 4 Maiden Lane, New York, against whom an involuntary petition in bankruptcy was filed the day before, as published in full in THE CIRCULAR—WEEKLY last week. The firm had, a few days before, made an assignment to Leo Wormser, and Mr. Wormser, as assignee, had already begun on his schedules when the bankruptcy proceedings were commenced. After the appointment of Mr. Long, which was on the application of Stern, Singer & Barr, the attorneys representing the petitioning creditors, Mr. Wormser turned over the property to the receiver and withdrew.

A representative of Receiver Long stated to a CIRCULAR—WEEKLY reporter that, having just taken hold, he was in no position yet to state the assets and liabilities, but that the statement would be ready before the first meeting of the creditors in bankruptcy was held. What the receiver's plans are as to the disposition of the stock could not then be learned. It is probable that Mr. Wormser will be the choice of the creditors for the position of trustee, if he will accept the position.

Albert Davison Adjudged Guilty of Contempt of Court.

CHICAGO, Ill., Feb. 28.—Albert Davison, of Dixon, Ill., who was being detained by the Government officers as a principal witness on a charge of fraud against attorney Max H. Kunze, of Belvidere, was himself adjudged guilty of contempt in the United States District Court and sent to the county jail by Judge Kohlsaat. The defendant, who sought relief under the bankruptcy act, some weeks ago, is charged with failing to turn over all his property to the trustee. He protested that he knew nothing of its whereabouts.

Davison was formerly in the jewelry business, and when his store was burned he saved some of the jewelry, it is said. He filed a petition in bankruptcy, which contained no schedule of assets. The trustee was informed that Davison had about \$2,000 hidden, and the jeweler and his lawyer were arrested. Kunze was called before United States Commissioner Mason to answer to the charge of having received the property of a bankrupt after the filing of a petition. He denied the charge and the prosecution called witnesses to prove its case. Davison swore that Attorney Kunze persuaded him to file a petition in bankruptcy and told him to omit the schedule of assets. He said further that the lawyer had taken possession of a note for \$600 and had kept an iron safe as security for the payment of his fees. The lawyer asked time to make out his defense, and a continuance until March 13 was allowed.

Louis McDowell Identified as the Impersonator of William L. Lemp, Jr.

St. LOUIS, Mo., March 2.—Louis McDowell, in a bench warrant issued Feb. 28

in the Criminal Court, is charged with obtaining goods by false pretenses. The warrant was issued on orders from the Grand Jury and is supposed to precede a true bill. McDowell is alleged to have visited the jewelry store of Merrick, Walsh & Phelps Jewelry Co., a short time ago, and on representing himself as William J. Lemp, Jr., secured a diamond brooch valued at \$800.

McDowell was arrested in Cincinnati and brought back to this city, but denies his guilt and says he will be able to prove his innocence. Mr. Walsh, from whom the brooch was secured, and the pawnbroker to whom it was pawned, have positively identified him. He was also identified by

Charles W. Benson, a salesman for Gill Jewelry Co., 7th and Olive Sts., who says that he was the man who visited his place on the day the fraud was perpetrated at the Merrick, Walsh & Phelps Jewelry Co., and requested him to remove one of the diamonds from a sunburst which has been identified as the one secured by means of the impersonation. [The portrait on page 20 is from a photograph loaned this journal by the New York headquarters of the Pinkerton Detective Agency.]

End of the Long Established Bonnet Jewelry Store in Zanesville, O.

ZANESVILLE, O., March 1.—The wholesale and retail business of the late George H. Bonnet, conducted for the past two months by his estate, is now at an end, after 40 years' existence, the administrator having decided to close it up.

The founder of the business, John M. Bonnet, Sr., died some 20 years ago. He was succeeded by his sons, John M., A. H. and Frank. In a few years Albert and Frank withdrew and went to Columbus, leaving John M., Jr., sole owner. Three years ago, George H. Bonnet became proprietor. He died last December, when William S. Bell, as administrator, took charge and closed up the business. E. S. Keene, who has had charge of the watchwork and engraving of the Bonnet establishment since 1863, will remain in Zanesville in business for himself. He has secured quarters in the office of the Adams Express Co., where he will conduct a repair shop, carrying no stock.

Death of Addison Conkling.

Addison Conkling, who was for many years well known in the jewelry trade, died at his home, 521 Westminster St., Elizabeth, N. J., Wednesday morning. Death was due to heart failure superceded by an attack of

THE LATE ADDISON CONKLING.

grip, and was entirely unexpected by his family, as he had been well enough the evening before to play cards.

The deceased was born in Brooklyn, Feb. 22, 1851, and received his education in the Brooklyn schools and at Peekskill, N. Y. He first started in the jewelry business with Mulford & Bonnet, jewelers, then at 24 John St., for whom he traveled for some

years. Later he was a member of Link & Conkling, who were in business at Newark, N. J. He was also the New York representative of Giles, Bro. & Co., of Chicago, for some time, and on leaving them became the agent of the Essex Watch Case Co. About 11 years ago he went into the clock business for a short time, and gave this up to introduce mammoth calendars, which business he developed and conducted until his death. The deceased was known personally to a large number of merchants in the "Lane," and to a great number of retailers whom he had visited in his travels. He was a large man, of genial temperament and made hosts of friends in the jewelry trade. The deceased is survived only by his mother. The funeral services took place from his late residence, Saturday, at 1 o'clock P. M., and the remains were interred at Plainfield, N. J.

Edward Eisele, of King & Eisele, Buffalo, N. Y., was given a pleasant surprise on the occasion of his 70th birthday anniversary, Feb. 14. While he was at luncheon the factory employes decorated his desk with flowers, smilax and ferns. When he returned the workmen, headed by supt. Edward P. Burkhalter, gathered and presented him with a handsomely framed study of a biblical scene. Mr. Eisele was quite overcome by the demonstration of loyalty and good will, but finally regained enough composure to make a suitable reply.

Frank L. Sargent, repairer, Milo, Me., has moved his business in the same town.

THE "ANJOU"

"1835—R. WALLACE"

Stamped on an article of Silver-plated ware is a guarantee of worth and quality.

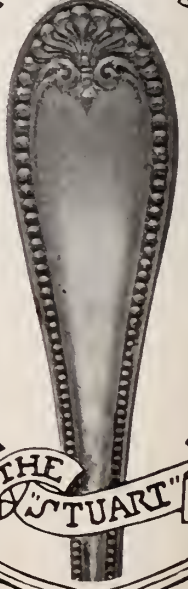

Every dealer, when selecting a line of plated ware, always has in mind two leading qualities, and these usually are durability and design, as these are the ones on which most depends his reputation as a dealer in honest ware.

Our goods are made of the highest grade of Nickel Silver, plated with FINE Silver. Our extra, or A 1 grade, is plated 20 per cent. heavier than the regular standard. Triple and sectional plates are also carried in stock.

In designing patterns we endeavor to select only such as are graceful in outline and thoroughly artistic in decoration, and which conform most closely to the taste of a discriminating purchaser, which our long experience enables us to do.

Our line consists of the following patterns: Tipped, Fiddle, Windsor, Shell, Joan, Virginia, Astoria, Stuart and Anjou.

Any dealer who is not already familiar with our line will find it much to his advantage to write for Catalogue and discounts.

Arrangements Complete for Philadelphia Jewelers' Annual Banquet.

PHILADELPHIA, Pa., March 3.—Arrangements for the sixth annual banquet of the Philadelphia Jewelers' Club are now practically completed. The banquet will be given at Horticultural Hall, the scene of last year's dinner, Tuesday night, March 12, at 6.30 o'clock. The indications are that the banquet this year will surpass anything of the kind ever before given by the Jewelers' Club.

From the number of acceptances received so far, 400 guests are expected. This will exceed by 100 the number who dined last year. The floral decorations will be more lavish and ornate than ever before; two orchestras, Prof. Richard Litley's and the Spanish Troubadors, and a brass band, will fill the air with melody before and during the banquet. Prof. Litley's orchestra is made up of 20 pieces. The Spanish Troubadors have been assigned to an alcove in the reception room. The caterer will be O. L. West, the successor of Carl Essner.

The menus are to be lasting souvenirs of the occasion, something dainty and exquisite, but just what form no one of the banquet committee will divulge. They will be a distinct feature of the occasion, and everybody is expected to be joyfully surprised when they are distributed.

The speakers will be as follows: United States Assistant Attorney-General James M. Beck, one of the most eloquent orators in America; Postmaster-General Charles Emory Smith, a vigorous, convincing talker; Hampton L. Carson, professor of law at the University of Pennsylvania and one of the most scholarly members of the Philadelphia bar; Charles F. Warwick, former Mayor of Philadelphia, a post-prandial story teller who has few peers; the Rev. Dr. Cornelius L. Twing, of Brooklyn; Samuel H. Ash-

bridge, Mayor of Philadelphia; William L. Stone, Governor of Pennsylvania; George Webster, an eminent engineer and chief of the Bureau of Surveys; and, perhaps, Judge Samuel Pennypacker, of this city.

J. Warner Hutchins, chairman of the banquet committee, explained to a CIRCULAR—WEEKLY representative that the entire preparations this year had been in the hands of only one committee instead of a general committee and a number of sub-committees, as in previous years, and that the committee's work had been expeditiously and satisfactorily done. The members of the banquet committee are: J. Warner Hutchins, chairman; William H. Long, of J. E. Caldwell & Co.; William P. Sackett, of Wanamaker's store; William G. Earle, 13 N. 9th St.; William Linker, manufacturing silversmith, 718 Sansom St.; William Breuhl; Frederick Simons, of Simons, Bro. & Co.; James H. Kelly, of Bailey, Banks & Biddle Co., and Howard L. Roberts, of the Keystone Watch Case Co. The reception committee have not yet been named.

Alabama Notes.

A. J. Vess has opened a stock at Tusculumbia.

The C. N. Maxwell Jewelry Co., Tusculumbia, have offered a handsome gold medal for the local golf championship.

S. Martin & Bros., who recently opened a jewelry store at Piedmont, have occupied new quarters at the Moody building.

Since R. Heine opened business at Talladega he has seen every business in the town change hands, except his own and two others. Mr. Heine has added an expert engraver to his work list.

During the progress of a row in Montgomery, some days ago, the participants smashed the plate glass front of the C. L. Ruth jewelry store. A lot of cut glass in the window was also broken. The loss was considerable.

Death of Henry G. Reed.

TAUNTON, Mass., March 2.—Henry G. Reed passed away at an early hour Friday, March 1.

Henry Gooding Reed was born in Taunton, Mass., 91 years ago, the son of John

THE LATE HENRY GOODING REED.

Reed, who married Rebecca Gooding, a member of one of the old Dighton families. Mr. Reed was one of the leading manufacturers in southern Massachusetts, and was

probably the oldest engaged in active business.

He founded the firm of Reed & Barton, a firm who have branched out and become one of the leading silver and britannia manufacturers in the country. Their goods are all over the world, their traveling men have long ago invaded Africa and their India trade is large. In fact, Reed & Barton's is probably one of the best known manufactories of silver and plated wares in this hemisphere.

Mr. Reed never held political office, but always took an active interest in the growth and prosperity of his native city. He was a director of the Taunton National bank since 1851, a trustee of the Taunton Savings bank since its organization in 1869, a director of the Taunton City Mission and Associated Charities from their beginning, and president of the Reed family association of Taunton since 1873. He was also an interested and liberal life member of the Old Colony Historical Society. He was a member of the Winslow Congregational church, where for years he had been a faithful, devout attendant and a generous giver. To him more than to any one else belongs credit of having built the handsome new church structure, one of the highest types of architectural symmetry and beauty in the city. It was he who made the largest contributions to the building fund, and had it not been for him the handsome walls might never have been raised—at least not for many years. In public and private charities his beneficence is well known, but many are the kindly helps to those less for-

tunate than himself of which the world will never know.

Mr. Reed had been married three times; first to Clara, daughter of Isaac White, of Mansfield, who died Sept. 27, 1847; second to Frances Lee Williams, daughter of Jared Williams, of Dighton, who died May 9, 1857, and third, Oct. 27, 1858, to Delight R., daughter of Christopher Carpenter, of Rehoboth. His children were Clara Isabel, wife of Dr. Charles T. Hubbard; Henry Arthur, deceased; Ida Frances, deceased; Fannie Lee, wife of William Bradford, Homer Dowse, a resident of West Newton, and Henry Francis, who died a few months ago.

The Jewelers' Protective Union's 23d Annual.

The Jewelers' Protective Union held their 23d annual meeting Monday afternoon at 3 o'clock, at the rooms of the Jewelers' Association and Board of Trade, 54 Maiden Lane, New York. The reports of the officers showed the organization to be in a flourishing condition, generally and financially. After the reports had been adopted the following officers were all re-elected for the ensuing year:

William R. Alling, president; O. G. Fessenden, vice-president; Ira Goddard, secretary and treasurer; executive committee, J. C. Aikin, C. E. Hastings, August Oppenheimer and Leopold Stern.

The Union have, during the year just ended, shown a great increase in membership and have issued a large number of new certificates to travelers.

The R. F. SIMMONS COMPANY are the only makers of gold-filled chains who make their own seamless gold-filled wire.

They buy gold bullion of the U. S. Government and make the ingots from which, with the aid of the most improved machinery (covered by their own patents), they draw the highest-grade and most uniform gold-filled wire that can be made. This process, by economizing time and labor, enables them to use in Simmons Watch Chains a finer quality of stock than can be produced by any other maker of seamless wire at the same cost.

Simmons Watch Chains

The careful attention given to every detail in the process of making Simmons Chains has produced the standard gold-filled chains of the world.

The trade-mark "R. F. S. & CO." is stamped on the inside of the swivel bow of every genuine SIMMONS CHAIN.

NEW YORK, 9 Maiden Lane. R. F. SIMMONS CO., Attleboro, Mass. CHICAGO, 126 State St.

Two of the Dastard Assailants of Alexander J. Hubbard Sentenced.

BALTIMORE, Md., March 2.—Two of the three men who cowardly robbed and assaulted Alexander J. Hubbard, the aged jeweler, Nov. 20, 1900, have been tried and convicted and are now serving their sentences in the Maryland penitentiary. Henry Maas, of New York, was sentenced, Thursday, to 10 years, after a trial lasting four days. John Murphy, who turned State's evidence, got nine years and nine months, dating from Dec. 13, when he pleaded guilty.

Thus ends the last chapter in one of the most sensational and daring crimes recorded in the criminal annals of Baltimore city. As shown by the evidence, three men entered the little jewelry store of Mr. Hubbard, located in a gloomy basement at 13 North St., between 10 and 11 o'clock of that November morning, induced the aged proprietor to go to the back of the store, seized him, choked him, bound him hand and foot, and threw him into a coal bin. They then robbed the store and took their booty to New York, where two of them, Maas and Murphy, were arrested. Murphy confessed his crime. "Kid" Mory, the third man, has never been captured.

During the last day of Maas's trial his demeanor was nonchalant in the extreme, but when he was placed in the dock to await the jury's verdict his cheerfulness was gone. The jury was out 20 minutes and returned the verdict of guilty. Judge Burke immediately proceeded to pass sentence.

"Henry Maas," he said, "you have been found guilty and I am about to sentence you. Have you anything to say?" Maas did not respond and the Judge continued: "The judgment of the Court is that you restore the property you have taken from Alexander J. Hubbard and that you be confined in the Maryland penitentiary for 10 years."

Murphy, by pleading guilty, avoided a long trial, but he was shown less consideration than he evidently expected, as his sentence was only three months less than the limit provided by law.

Judge Dennis passed sentence on Murphy and asked him whether he had anything to say. Murphy was mute. The Judge then remarked that it was customary to show clemency to criminals who pleaded guilty and saved the State the cost of a trial, but he added that Murphy was the victim of an unfortunate condition of affairs.

"If you had stolen a hog or chicken," said Judge Dennis, "I could have sent you to the penitentiary for 15 years and there would have been some latitude for clemency. For the crime of robbing, the Maryland Legislature has fixed the limit at 10 years. That is no more than sufficient for the atrocious crime you committed. I hope your case will be the means of calling the Legislature's attention to the matter and with the result of changing the law. I will show you some clemency, however, and will allow you three months off the limit. These three months will be of great benefit to you at the end of your term. I sentence you to nine years and nine months in the penitentiary."

Change in price of JAS. BOSS SCREW CASES.

The only change in the new Price List just mailed you is an advance in the price of Boss 14 K. and Boss 10 K. Filled Screw Back and Bezel Cases.

As so large a proportion of BOSS Screw Cases are carried by persons whose watches are subjected to extremely hard usage we have decided to increase the thickness of gold on these cases and increase the price accordingly. This action will be especially appreciated by that portion of the trade which sells screw cases to railroad men and others whose occupations make them particularly hard on watches.

Our New Price List.

A Word in Season.

The Keystone Watch Case Company,

19th and Brown Sts., Philadelphia, Pa.

Need of Extra Caution in Buying Filled Cases.

"Standard goods" and "cut prices" are a contradiction in terms—an impossibility. To represent the cut-price filled cases as "standard" is simply trifling with a jeweler's intelligence. You can always feel certain when prices are cut that the quality is cut to correspond. The plan of the price cutters is, of course, to make all they can before the trade awakes to the trick.

This is evidently the intention of certain makers of so-called filled cases who, although heretofore selling their goods below the regular quoted prices, have recently cut the prices still more and the quality even more than the price.

In face of this there is only one safe course for the jeweler to pursue, viz.: stick to the Boss—the one line of cases which have been on the market long enough to demonstrate just what is required and made by the one concern which never quibbles or repudiates its guarantees.

National Monthly Import and Export Statistics.

WASHINGTON, D. C., March 2.—The records of the Treasury Department contain the following comparative statistics of interest to the jewelry trade for January, 1900 and 1901, and for the seven months ending January, 1901:

Tariff Decisions & Regulations.

Among the decisions handed down the past week by the Board of Classification of the United States General Appraisers were the following:

Bawo & Dotter imported glass ware consisting of candleabra, lamps, lamp chimneys and table and bar glass ware of the type known as containers. Duty was assessed thereon at 60 per cent., under paragraph 100 of the act of 1897. The importers claimed that the merchandise was dutiable at 45 per cent., under paragraph 112, as manufactures of glass not specially provided for. The Board overruled the protest.

Fonderville, Van Iderstine and others imported a large variety of articles of opal, porcelain or blown glass ware, colored, cut, engraved and otherwise decorated, as lamps, lamp chimneys, candleabra, globes, jugs and carafes, which were returned for duty at 60 per cent., under paragraph 100 of the act of 1897. The importers claimed that the merchandise was dutiable at 45 per cent., under paragraph 112, as manufactures of glass not specially provided for, on the ground that only articles in the nature of decorated glass bottles or other vessels of glass used as containers, or of such a type that they can be filled, are within the provisions of paragraph 100. Decisions overruling like protests have been sustained by the United States Circuit Court and by the United States Circuit Court of Appeals, and on authority of these decisions the protest was overruled.

W. J. Pratt, Des Moines, Ia., imported statuary upon which duty was assessed at appropriate rates. Mr. Pratt claimed that as the principal piece was broken, and therefore worthless, he should not be called upon to pay any duty. The Board decided that as the importer had made no offer of abandonment to the Government, under the provisions of section 23 of the customs administrative act, no relief could be afforded.

New Movements Issued by the Elgin National Watch Co.

The Elgin National Watch Co., Friday, announced to the watch trade that they had just issued three movements of a new 1901 model. The movements are 18 size, three-quarter plate, stem wind and are specially constructed for exacting railroad service. They are named and described as follows:

Veritas (No. 214), o. f., lever set, nickel; 23 extra fine ruby jewels (raised gold settings); adjusted to temperature, isochronism and positions; quick train with gold wheels; straight line double-roller escapement with steel escape wheel; poised pallet and fork; pallet arbor and escape pinion cone-pivoted and cap-jeweled; exposed pallets, compensating balance; Breguet hair spring, micrometric regulator; patent safety barrel with spring box rigidly mounted on bridge; barrel arbor pivots running in jewels; display winding work; patent recoiling click; patent self-locking setting device; double-sunk glass-enamel dial; dust ring; plates beautifully damaskeened, carefully timed and finely finished throughout.

Veritas (No. 239), o. f., lever set, nickel; 21 fine ruby jewels (raised gold settings); adjusted to temperature, isochronism and positions; quick train with gold wheels; straight line escapement with steel escape wheel; pallet arbor and escape pinion cone-pivoted and cap-jeweled; exposed pallets; compensating balance; Breguet hair spring; micrometric regulator; patent safety barrel with spring box rigidly mounted on bridge; display winding work; patent recoiling click; patent self-locking setting device; double-sunk glass-enamel dial; dust ring; damaskeened plates, carefully timed and finely finished throughout.

B. W. Raymond (No. 240), o. f., lever set, nickel; 19 fine ruby jewels (raised gold settings); adjusted to temperature, isochronism and positions; quick train with gold wheels; straight line escapement with steel escape wheel; exposed pallets; compensating balance; Breguet hair spring; micrometric regulator; patent safety barrel with spring box rigidly mounted on bridge; barrel arbor pivots running in jewels; display winding work; patent recoiling click; patent self-locking setting device; double-sunk glass-enamel dial; dust rings; damaskeened plates; carefully timed and finely finished throughout.

No. 3 Maiden Lane, New York.

The Schedules of Solomon Seligman Filed.

The schedules of Solomon Seligman, a dealer in jewelry, pictures, etc., at 10 E. 14th St., and 5 E. 13th St., New York, against whom, as published in THE CIRCULAR-WEEKLY, Jan. 20, proceedings in involuntary bankruptcy were taken by three creditors, were filed, Monday, by Mr. Seligman in the United States District Court, New York. They show liabilities of \$45,920.60, of which \$42,145.24 is in unsecured claims, \$3,200 accommodation paper, \$312.43 secured claims and \$263 due for wages. His assets he values at \$14,299.50, of which \$10,000 is the amount he estimates his stock in trade to be worth, \$2,000 the value of machinery, tools, etc., and \$2,210 the estimated value of the open accounts.

Among the largest creditors in the jewelry trade are: P. & A. Linton, \$554; Crossin & Co., \$109; R. L. Griffith & Son Co., \$874; A. C. Messler Co., \$172; Attleboro Mfg. Co., \$453; Watson & Newell Co., \$390; G. J. Smith & Co., \$196; O. W. Hawkins & Co., \$151; J. W. Grant Chain Co., \$159; Hipp. Didisheim & Bro., \$457; Bristol Mfg. Co., \$816; McRae & Keeler, \$330; W. C. Edge Co., \$355; Briggs & Goff, \$261; H. M. Williams & Co., \$325; Myers & McNary \$526; Rhodes Bros., \$302; R. H. Ingersoll & Bro., \$206; I. Mann, \$379; A. Schwob, \$181; J. W. Johnson, \$254; William Loeb & Co., \$432; National Jewelry Case Co., \$383; L. Manheimer, \$466; Sussfeld. Lorsch & Co., \$393; P. J. Cummings & Co., \$225; Criterion Watch Case Co., \$1,188; Jeannette Jewelry Co., \$409; I. Ollendorff, \$426; Keystone Silver Plating Co., \$169; Wildpret & Saacke, \$803; A. L. Tuska, \$183; Plainville Stock Co., \$582; E. E. Thomas, Jr., & Co., \$563; W. E. Moore Bronze & Plate Co., \$170; Rice & Wallenstein, \$108; Williams & Payton, \$1,143; J. R. Wood & Sons, \$214; Charles Keller & Co., \$435; Mockridge Jewelry Co., \$144; James E. Blake Co., \$288; Nathan & Co., \$542; Bugbee & Niles Co., \$719; E. Brown & Co., \$501; Ludwig-Stern Co., \$177; W. H. Bell & Co., \$1,077; George H. Cahoon & Co., \$861; C. M. Robbins & Co., \$363; George L. Brown & Co., \$1,062; McDonald & Culver, \$759; J. C. Wolstenholme, \$429; Bennett & Bradford, \$690; A. H. Bliss Co., \$397; S. O. Bigney & Co., \$1,177; B. K. Smith & Co., \$277; P. S. Eddy, \$174; Ellis & Co., \$134; Mason, Howard & Co., \$494; Simms & Co., \$209; F. T. Pearce & Co., \$371; Clark & Coombs, \$128; New England Watch Co., \$182; I. Busch, \$119; Lancaster Silver Plate Co., \$285; New York Clock Co., \$101; H. Schwartz, \$392; Fuller, Carpenter & Co., \$380; F. A. Leonard & Co., \$124; The Trafton Co., \$107; Mrs. F. Rubenstein, \$500; I. Rothschild, \$158; H. L. Judd Co., \$400.

Judge Brown, Monday, signed an order adjudicating Seligman a bankrupt and sending the case to a referee.

A motion to authorize the receiver to sell the stock came up before Judge Brown, yesterday. The motion was first opposed by the attorneys for the Jewelers' Association and Board of Trade, but finally both sides consented to an order, which, as finally amended by the Judge, provides that appraisers be appointed to value the stock; that the stock be exposed for bids from Friday until Tuesday; that sealed bids for the whole stock or for the jewelry, fixtures or pictures separately be received Tuesday morning; that the bids then will be opened by Judge Brown, and if any offer proves satisfactory the stock will be sold to the bidder. If not, an auction sale is to be ordered by the Court.

The Giant of Collar Buttons

IN QUALITY,
IN SALES.

One Million Five Hundred Thousand Kremenz One-Piece Collar Buttons made and sold within the last year.

WHY?

Because of their HIGHEST QUALITY, BEST CONSTRUCTION, GIVING THE MOST WEAR, AND GREATEST COMFORT and their IRON-CLAD GUARANTEE.

To verify this we invite the trade to read "The Story of a Collar Button, with Illustrations," which may be had FREE for the asking, and to try the experiment suggested on page 5 of that booklet.

Extract from "Printers' Ink,"
Nov. 23, 1898.

The Little Schoolmaster now suggests, to every pupil in his class, to send a two-cent stamp to Kremenz & Co., 49 Chestnut Street, Newark, N. J., and ask to be favored with a copy of their leaflet, "The Story of a Collar Button." Afterward, if any pupil will send to *Printers' Ink* another leaflet, new or old, that is half as good as this one, or that approaches it in excellence, the deserving student will be rewarded with one of *Printers' Ink's* souvenir spoons as an acknowledgment of his discovery and contribution. "The Story of a Collar Button" is the best piece of advertisement construction that has come to *Printers' Ink's* attention in the year of our Lord 1898.

Should you wish to utilize this booklet to increase your collar button business, we will, on receipt of your order, print your card upon and send you a quantity of them.

Kremenz One-Piece Collar Buttons are stamped as follows, ON BACKS:

Patent sustained by United States Supreme Court.

IMPORTERS OF EBONY.

Connecticut.

George J. Fisher, Middletown, has been improving his store by a new sign.

C. H. Brown, assistant treasurer of the International Silver Co., is seriously ill at his home in Wallingford.

The annual meeting of the directors of the Ansonia Clock Co. was held at Ansonia, Feb. 23. Only a few of the directors were present.

A report from East Hampton says a jewelry factory may be established there, employing 25 to 30 people, in a mill which has been closed for five years.

Homer B. Hoyt, South Norwalk, is going out of the jewelry business and will, after April 1, make a specialty of the optical and watch repairing business.

Otto Bogani, formerly traveler for L. H. Keller & Co., New York, but now of the firm of Foote & Co., Jersey City, has been visiting his father, F. P. Bogani, Middletown.

John R. S. Ward, a former resident of Wallingford, died suddenly Friday at his home in North Haven. He was born in Wallingford in 1810 and for many years was engaged with his brothers in the manufacture of Britannia ware.

Frank S. Parsons, of Bristol, who has at different times had charge of the plating department in the E. N. Welch Mfg. Co., of Forestville, and the E. Ingraham Co., of Bristol, has secured a position in New York and will move his family to that city.

Andrew Cody, an employe of the International Silver Co., Meriden, met with a painful accident, Thursday afternoon, when a piece of metal flew from the machine at which he was working and penetrated his left eye. It is believed his eyesight will be saved.

The examination of C. E. Katsch, bankrupt jeweler, New Haven, was to have been resumed Feb. 23, but was continued. There is a dispute over certain claims against the estate. Mrs. Katsch has a claim of \$1,000 and Attorney Overlander another amounting to \$200 that are objected to.

The output of the Holmes & Edwards Silver Co., Waterbury, has been gradually

increasing during the past year, so that it is now double what it was when the company were taken into the International Silver Co. The capacity of the factory has been doubled, although no very large additions have been built.

The involuntary petition against the National Electrical Co., of Milford, filed by the Coe Brass Co., Torrington, New Haven Clock Co., New Haven, and the Bradley & Hubbard Mfg. Co., Meriden, was received at the office of Referee Newton in New Haven, Feb. 23. The company were adjudicated bankrupt at Hartford.

The recent fire in the large wooden building that adjoins the Miller Bros. Cutlery Co. factory, Meriden, used for the shear department, prompted the officials to hold a conference to provide means for better protection. As the wooden part of the main building endangered other portions of the property it was decided to build a new brick addition to replace the frame structure.

The suspicious actions of two strangers in P. H. Stevens's jewelry store, Bristol, Thursday afternoon, caused considerable excitement for a time. Mr. Sill was alone in the store when suddenly a strange, rough looking man opened a rear door and stepped inside. He had taken only a few steps when another man came in the front door. The clerk realized at once that something was wrong and told the fellow who had entered by the rear door to go out the front way. Instead of doing so the man retraced his steps and went out through the rear door. In the meantime the other man saw the clerk meant business and he, too, beat a retreat, going out of the front door. Chief of Police Arms was notified and began a search for the men, but did not succeed in finding them. The Chief thinks they had planned a job, but were scared away.

There was an incipient blaze in the spoon department of the Bristol Brass and Clock Co., Bristol, last Wednesday. The fire was in a blower between the buffing and shipping departments. The factory is equipped with an automatic sprinkling system and two of the heads went off, deluging everything in their vicinity and keeping the fire well within bounds, so

PIRIE MAC DONALD
gives you

GREETING. He has a workshop on the 16th floor of the Washington Life Building, New York, where he makes photographs and various other kinds of portraits of men. Not but that he loves women, as all good men should, but because he knows he can make men's pictures best. "Blessed is that man who has found his work."

that the workmen were able to drown it out without any great difficulty.

Clarence Eaton has resigned his position in F. H. Hill's jewelry store at Danbury. His successor is Louis Mabie.

The Waterbury Board of Education are progressing with plans for the repair of the Washington school town clock.

William H. Carpenter, of Bristol, traveling salesman for the Bristol Brass and Clock Co., has been in the Post Graduate Hospital in New York for several weeks, where he underwent a severe surgical operation. He is now at his home and is slowly improving.

President Pierce N. Welch, of the First National bank, Waterbury, who is a large owner of stock of the New Haven Clock Co. and a director of that company, has been elected a director of the Peck Bros. Co. Walter Camp, secretary and assistant treasurer of the New Haven Clock Co., has also been elected a director of the same company.

Frank W. Thompson, who severed his connection with the International Silver Co. at Meriden, Thursday, to take a position as traveling salesman with C. Rogers & Bros., was presented with a handsome ruby scarf pin with a setting of 14 diamonds by the office and show room employes of the International Co. as a token of their friendship and long association, he having been with the concern for 20 years.

There was a hearing, Feb. 25, in the United States District Court at New Haven, in the case of Eugene P. Palmer vs. The Meriden Britannia Co. The plaintiff avers that the defendants leased a building site of him and it was contracted that a building should be erected on the site and upon the expiration of a term of years the building was to be delivered to the plaintiff. The claim is that the building was not constructed according to contract and he sues for \$20,000 damages.

The annual meeting of the American Brass Co. was held in Waterbury, Feb. 25. The following directors were chosen: Charles F. Brooker, A. A. Cowles, J. S. Elton, D. Willis James, C. N. Wayland, W. E. Dodge, James A. Doughty, J. P. Elton, E. T. Coe, E. L. Frisbie, Jr., G. W. Burnham, D. Leroy Dresser. At a subsequent meeting the following officers were chosen: President, Charles F. Brooker; first vice-president, Edward L. Frisbie, Jr.; second vice-president, Alfred A. Cowles; third vice-president, James S. Elton; secretary and treasurer, John P. Elton; auditor, George E. Cole; executive committee, Charles F. Brooker, E. L. Frisbie, Jr., John P. Elton, A. A. Cowles, James A. Doughty.

Syracuse, N. Y.

C. E. Eager, agent, has closed his auction sale.

Miss B. M. Babcock is spending a month's vacation in Kentucky and Arkansas.

George E. Wilkins returned, on Friday, from a short business trip to New York.

A jewelry dealer and silk merchant named Merzo Shaul, formerly at Mohawk, N. Y., but now dead, left a legal puzzle which lawyers are trying to solve in carrying out the provisions of his will. It appears that Mr. Shaul had some objections to certain near relations getting any part of his estate, valued at \$20,000, and he, therefore, made a will whereby he gave the use of his property to his wife during her lifetime of widowhood. The will provided that on the death or remarriage of his wife all of the property should go to those persons who were related to him as third cousins, adding that by the term third cousins he meant the children of those persons who were related to him as cousins. Mrs. Shaul died last June and a lawyer, who began to look up the claims of persons entitled to the estate, found 94 third cousins within the genealogical tables, namely, great-great-grandchildren of the same great-great-grandparents; 166 children of cousins; 220 third cousins; and 450 children of second cousins or children of all of the persons who are great-grandchildren of the same great-grandparents as the testator. All of this total of 930 persons appear to be legal heirs and entitled to a share of the \$20,000.

Cleveland.

Fire, which started in a saloon at Mantua Station, O., Thursday night, burned out the jewelry establishment of S. H. Eldridge. Mr. Eldridge's loss is total. Nearly the whole of the business part of the town was destroyed.

While going through the personal effects of Mrs. Mary Sherman, who died at Arcadia, O., one day the past week, administrator W. F. Weiser discovered a massive solid silver watch made 131 years ago. The ancient timepiece had been hidden in the bottom of a trunk.

Webb C. Ball is one of the incorporators of the Cleveland Business Men's Convention League. This league were organized some time ago for the purpose of bringing conventions and meetings of various kinds to the city and otherwise "booming" the business interests of Cleveland.

 GENERAL OFFICES,
 Champlain Bldg., CHICAGO, ILL.

Pittsburgh.

J. K. Fisher, Braddock, left last week on a lengthy trip to Florida.

Frank Nisbit, formerly of Wilkensburg, Pa., is opening a fine new store at Swissvale, Pa.

Joseph De Roy has purchased a handsome piece of property at the corner of Liberty Ave. and Matilda St., East End, for \$47,000.

Al. Andrews, manager of Heeren Bros. & Co.'s silver department, spent a few days, last week, visiting Reed & Barton's plant, Taunton, Mass.

Albert Gerwig was one of a delegation of Pittsburgh business men who went on to Harrisburgh, last week, in the interests of the famous "ripper" charter, now a law.

The Pittsburgh Jewelry Co., Smithfield St., opened an auction sale, on Saturday last, to dispose of old stock before removing in an adjoining storeroom, on April 1.

News from nearby towns state that: H. C. Smouse, Oakland, Md., has sold out to D. A. Ashby.—Lewis Hartman & Co., Tiffin, O., have disposed of their stock to Staudt & Miller.

Among the Pittsburgh jewelers to go on to Washington for the inaugural ceremonies are Harry and Albert Heeren and Emil Geilfuss, all three of whom accompany the Washington Infantry.

The New York Jewelry Co., 165 Carson St., South Side, are holding an auction sale to quit the business. Henry C. Berger, 929 Fifth Ave., has filed a petition in bankruptcy: liabilities, \$3,036, and assets, \$1,610. S. Weinhaus, W. Roseman and Harry Heeren were appointed appraisers.

Leopold W. Vilsack & Co. have secured a lease on the building on Fifth Ave., known as the Carter Shoe Store, one of the best locations in the city, and will remove therein on April 1. Mr. Vilsack and Charles O'Brien leave for New York this week to buy largely for the new store.

Harrisburgh, Pa.

Edward Rinkenback has bought the large store property a few doors below his present store and will remove thereto after making the necessary repairs. It is much larger than his present store.

E. L. Egolf is gradually disposing of his jewelry business, owing to his increasing optical business, which will be continued at his present location on N. 3d St. He has sold his establishment in Charlotte, N. C.

E. G. Hoover, of 23 N. 3d St., is celebrating the 10th anniversary of his starting in business in this city by enlarging his facilities for handling his patronage. He has secured the floor above his store and will move his repairing department thereto about April 1. Mr. Hoover came here 10 years ago from Philadelphia and now employs 10 people regularly. His principal as-

sistant is Louis Schaeberle, lately with J. E. Caldwell & Co., Philadelphia. Mr. Hoover has been watch inspector for the Cumberland Valley Railroad since 1893, and clock repairer for the Pennsylvania Railroad for nine years.

Columbus, O.

Fred L. Wirschinger has opened a store and repair shop on E. State St. His old store room, on High St., has been closed up and the remainder of the stock removed.

Harrington & Nonnenmacher are having a reduction sale preparatory to removing to their new location, now being remodeled for them. They will have a very handsome room when it is completed.

J. B. Tucker, one of the oldest and best known jewelers in this city, has grown tired of the North End and has moved to a neat little room on Long St. just east of High. Mr. Tucker was for years employed by various jewelers in the city, but has been in business for himself for two or three years.

A great part of the stock of Albert H. Bonnet has been closed out and the remainder will be shipped east and sold by his brother-in-law, Mr. Spilman, who has had charge of his affairs for some time. Mr. Bonnet has returned home from Michigan greatly improved in health, but he has as yet made no definite arrangements as to what he will do in the future.

The man who pawned in Cincinnati watches stolen from W. S. Tussing's store, this city, has been brought to Columbus. He would say nothing about the matter to the Cincinnati officers, but when he arrived here he told his story, saying that he purchased the three watches from another colored man for \$5 and afterward pawned them for \$8.50, intending to leave them with the pawnbroker. He said he pawned his overcoat to secure part of the money that he paid for the watches. He described the man from whom he purchased the goods, and his description tallies almost exactly with that of Monk Fawcett, who is now known to be the man who held John Tussing up and took the goods. Several other watches have been secured from Cincinnati pawn shops, but it is not known who pawned them. Neither is it known whether they have the partner of the robber here or not. His story is pretty straight, and some are inclined to believe that he did purchase the watches, as he says.

J. R. Munshaw, Wingham, Ont., has sold out to Herbert H. Chisholm.

A meeting of the creditors of A. J. R. Wilson, Hepworth, Ont., took place Feb. 26.

Frank M. Smith, jeweler, Wallaceburg, Ont., has given a renewal chattel mortgage to Smith Bros.; amount, \$2,400.

THE JEWELERS' CIRCULAR

AND HOROLOGICAL REVIEW.

AND THE JEWELERS' WEEKLY CONSOLIDATED

PUBLISHED EVERY WEDNESDAY BY
THE JEWELERS' CIRCULAR PUB'G CO.,
 CORBIN BUILDING, 11 JOHN ST., COR. BROADWAY,
 NEW YORK.
 TELEPHONE: 1148 CORTLANDT. CABLE ADDRESS: JEWELAR, NEW YORK.

Vol. XLII. March 6, 1901. No. 5.

A JOURNAL DEVOTED TO THE INTERESTS OF JEWELERS, WATCHMAKERS, SILVERSMITHS, ELECTROPLATE MANUFACTURERS, AND ALL ENGAGED IN KINDRED BRANCHES OF INDUSTRY.

Member of the American Trade Press Association.

Our editorial columns will contain our own opinions only, and we will present in other columns only what we consider of interest or value to our readers. Advertising matter will not be printed as news.

Advertising rates in THE JEWELERS' CIRCULAR-WEEKLY are lower, considering the number of tradesmen reached by its large circulation, than in any other jewelry journal.

Notices of changes in standing advertisements must be received one week in advance; new matter can be received up to Monday.

INFORMATION FOR SUBSCRIBERS.

Terms of Subscription, Postage Prepaid.

	PER ANNUM.
United States and Canada, - - -	\$2.00
Foreign Countries in Postal Union, - - -	4.00
England and Colonies, - - -	16s.
France and Switzerland, - - -	20 fr.
Germany, - - -	16 marks
Single Copies, - - -	.10

New Subscribers can commence at any time.

Payments for THE JEWELERS' CIRCULAR-WEEKLY, when sent by mail, should be made in a Post-Office Money Order, Bank Check or Draft, or an Express Money Order or Registered Letter. All postmasters are required to register letters whenever requested to do so.

Pay money only to authorized collectors having proper credentials.

Returning Copies. Returning your paper will not enable us to discontinue it, as we cannot find your name on our books unless your address is given.

Changing Address. In changing address always give the old as well as the new one. Your name cannot be found on our books unless this is done.

Discontinuances. We will continue to send papers until there is a specific order to stop, in connection with which all arrearages must be paid; but such an order can be given at any time, to take effect at or after the expiration of the subscription. All such orders will be promptly acknowledged by mail.

Liability. The courts have decided that all subscribers to journals are responsible until arrearages are paid in full and an order to discontinue has been received by the publisher.

THE JEWELERS' CIRCULAR-WEEKLY IN EUROPE.

Among the places in Europe where it is on file are the following:

LONDON—First Ave. Hotel, Holborn, E. C.; Holborn Viaduct Hotel, Royal Hotel.

PARIS—Hotel de L'Athene, Rue Scribe.

LEIPZIG—Handels-Zeitung für die gesamte Uhren Industrie.

BERLIN—Deutsche Uhrmacher Zeitung, Jager Strasse, 73.

GENEVA—Journal Suisse D'Horlogerie.

AMSTERDAM—Continental Club, Hotel Amstel.

ANTWERP—Diamond Club, Rue de Pelican.

Every line of reading matter in THE JEWELERS' CIRCULAR-WEEKLY, with the exception of a few brief extracts from exchanges, always properly credited, is written exclusively for this journal. Each issue of THE JEWELERS' CIRCULAR-WEEKLY is copyrighted. Permission to quote is extended to other publications provided such quotations are properly credited.

THE report of Gen. George W. Mindil, Jewelry Examiner at the Public Stores, New York, on the importation of precious stones and pearls for the month of February, made to Appraiser Wake-man, March 1, shows a great increase in the amount of goods sent to the American market. Gen. Mindil's figures for last month, \$1,776,073.74, are the largest reported for any February since he took charge of his department, being nearly \$1,200,000 more than in February, 1900, and over \$500,000 more than in any other February in the past five years. A comparison of the importations for last month with those of previous Februaries in the four years is interesting:

	Cut.	Uncut.
1901.....	\$1,171,313.60	\$604,760.14
1900.....	533,796.70	44,244.09
1899.....	737,180.69	482,802.46
1898.....	338,307.17	627,473.60
1897.....	43,696.80	156,141.72

Retail Jewelers' Move Against Department Stores.

It is a decided stand that the principal retail jewelers of Chicago have taken in their movement against the encroachments on their legitimate field by the department stores. Eight of the largest retail jewelry firms of that city have co-operated in addressing a letter to the manufacturing jewelers, silversmiths and kindred tradesmen, expressing their belief that a strong effort should be made by the manufacturers and jobbers to guard their interests by placing their products in the hands of only the specialty merchant, who has established a safe and permanent outlet for such wares. They further assert their belief that it is only fair on their part to handle the goods of only those manufacturers who sell exclusively to the jewelers, and, further, that by dealing with those manufacturers who do not make an effort to restrict their trade to the jeweler, they—the writers of the communication—would encourage them and work great injury to the jewelry business at large. These retailers further assert that an effort to eliminate the growing evil should be general throughout the country, and they, therefore, seek the co-operation of the recipients of their communication to protect their mutual interests. This movement upon the part of the Chicago retail jewelry trade will meet with the heartiest indorsement of the retailers universally, while already many of the leading manufacturers in the jewelry, silver ware and kindred lines have guaranteed earnest coöperation with the retailers. The method proposed in the Chicago jewelers' letter is the only possibly effective one to meet and counteract the threatening competition of the department stores. It worked with good results to the trade when the National Retail Jewelers' Association, under the leadership of Arthur S. Goodman, were in the zenith of their power. The retail jeweler has the absolute right not to deal with those manufacturers or jobbers who try to sell their product both to the department stores and the retail jewelry trade; and if enough of the retailers feel this right and have the strength of character to exercise it, it is

only a matter of time—and not a long time at that—when such manufacturers and jobbers will come to a full realization of the situation that they have sacrificed a sure, safe, profitable and permanent outlet for their product for a fleeting, unstable and quasi-profitable one.

Decision in a Suit Against the Jewelers, and Tradesmen's Co.

In an opinion handed down, last week, by the General Term of the City Court, New York, on an appeal in the action of Margaret Willison against the Jewelers' and Tradesmen's Co., Judge Fitzsimons took occasion to criticise the action of the company in regard to an insurance policy in question in this suit. The plaintiff was a beneficiary to the extent of \$500, in a policy issued by the Jewelers' and Tradesmen's Co. on the life of her father, and sued for the amount. When the case came to trial in the City Court her complaint was dismissed, on the ground that she had not given to the Jewelers' and Tradesmen's Co. satisfactory evidence of her father's death, as required by the policy. On appeal from this decision the General Term of the City Court orders a new trial, and, in the opinion by Judge Fitzsimons, says:

"The testimony clearly shows that the defendant had proper and satisfactory evidence of the death of the assured, because its Vice-President and Adjuster, after they were notified of such death, endeavored to have the complainant take a nominal sum for her claim, and upon her refusal to accept such offer, notified her that she was entitled to nothing. Thus it appears that they had full satisfactory evidence of death but wished to escape their liability under the policy to pay \$500 to plaintiff; also to avoid the payment of any sum, if possible, and had a clear and well defined determination to pay as little as possible in any event. Such seems to be the habit of many life insurance companies. During the lifetime of the assured they willingly receive all the money he offers, but upon his death seem unwilling to pay to the beneficiary the sum fixed by the policy. I think that such a practice should not be encouraged. The judgment must be reversed and a new trial ordered, with costs to appellant to abide the event."

Judges Conlan and O'Dwyer concurred in the opinion.

Jewelers' Gold Bars Withdrawn and Exchanged.

Week Ended March 2, 1901.

The U. S. Assay Office report:
 Gold bars exchanged for gold coin..... \$175,694 46
 Gold bars paid depositors..... 262,257 40

Total	\$437,951 86
Of this the gold bars exchanged for gold coin are reported by the Sub-Treasury as follows:	
Feb. 25.....	\$67,412
" 26.....	46,162
" 27.....	20,526
" 28.....	36,197
March 1.....	5,388
" 2.....
Total	\$175,685

Death of a Claimant to the Invention of the Stem Winding Watch.

JERSEY CITY, N. J., March 2.—Emil Hunziker died at Christ Hospital, Feb. 22, of pneumonia, aged 60 years. He had lived alone for 20 years and was mechanically and inventively inclined. Hunziker claimed to be the inventor of the stem winding watch, which invention was subsequently, he alleged, stolen from him. He said that the invention was gotten up by him 30 years ago.

Providence.

The S. B. Champlin Co. are planning to erect a 40-foot extension to their factory, 116 Chestnut St.

W. R. Pierce & Co., formerly located on Plainfield St., Olneyville, have removed to 42 Willow St., in the annexed district.

John McWilliams, head of the McWilliams Mfg. Co., makers of jewelers' machinery, is ill at his home, threatened with pneumonia.

George L. Vose, of the George L. Vose Mfg. Co., left with Mrs. Vose, last week, for a trip to California. Engelhardt C. Ostby, of the Ostby & Barton Co., has gone with his son, Harold, on a similar journey.

The tools and machinery included in the metal ornament making plant of John H. Bampton, who died some months ago, have been purchased by I. H. Sisson & Co., who purpose manufacturing ornaments and findings for jewelers, at 101 Westfield St.

By order of assignee Eugene F. Bowen, of the Mechanics' Instalment Co., the interest of that concern in watches, rings, chains, jewelry, etc., which had been sold on leases, was sold at public auction Saturday. The price brought by these outstanding accounts was \$60.

Among the imports received the past week at the port of Providence were: From Bremen, four packages of imitation precious stones, two packages of glass stones, two packages of manufactures of

metal and one package of glass ware; from Havre, one package of precious stones and one package of imitation precious stones; from Liverpool, one package of clock movements and one package of chamois leather.

E. L. Fuller, secretary of the Theodore W. Foster & Bro. Co., makes some amendments to an item published under this head last week: There was no election at the meeting of the Rhode Island Yacht Club a week ago Monday evening, owing to the death of the late commodore, William B. Banigan. Mr. Fuller served as fleet captain with Commodore Banigan, and his term of office expired at the last meeting. He has now been nominated for chairman of the committee on admissions and as a member of the house committee.

Newark.

John W. Reddall & Co. have been cutting some new dies for large and small silver ware, among the latter being some with particularly attractive features.

Herpers Bros. have just issued a new pamphlet, describing and illustrating new designs in frames and bezels and heavy galleries for miniatures.

Peter Morningstern, a well known lapidary and a member of a prominent Newark family, died at his home, 50 Warren St., Wednesday morning, after an illness of only three days. He was born in Ulster county, N. Y., in 1836, but he spent most

of his life in Newark. He was a Freemason and an Elk. He is survived by his wife.

Attleboro.

William H. Goff, Jr., added a lot of new machinery to their plant in the Bushee building, last week.

Randall & Ackermann moved back to their old quarters in the W. D. Wilmarth building, last week, after spending some weeks in the S. O. Bigney building.

Jose Amyot, of Jose Amyot et Frères, Quebec; Henry Smith, Danielson, Conn., and Mr. Towne, Newark, N. J., placed numerous orders in person with the manufacturers, last week.

William H. Leavy, of London, Eng., spent the past week in town, making arrangements to take sample lines for various local manufacturers back to Great Britain to sell as a commission agent.

James E. Blake, of the James E. Blake Co., has brought suit against the Interstate Street Railway Co. because one of their cars overtook and smashed his automobile while running too near the rails, one day last Summer.

The Attleboro militia company, recruited almost exclusively from the jewelry factories and led by Capt. William H. Goff, Jr., of William H. Goff, Jr. & Co., participated in the inaugural parade at the National capital.

William C. Tappan, of the D. F. Briggs Co., started, last week, for a combined pleasure and business trip to the City of Mexico. Mrs. Tappan accompanied him. Before starting he contracted for the erection, during his absence, of a big addition to his racing stable.

The firm and employes of Frank Mossberg Co. showed generosity, last week, to John Johnson, an employe who nearly lost a hand in a piece of machinery. The office contributed \$20 and the shop \$60 toward the expense of the needed surgical operations to save the hand.

North Attleboro.

Isaac N. Capron, who learned the jewelry manufacturing business in Providence and has for the past generation been identified with the trade in the Attleboros, died last week.

Application is being drawn up for the dissolution of co-partnership of Sommer & Mills Co. J. J. Sommer is praying that a receiver may be appointed by the Court of Taunton and the business be sold at public auction.

At the national convention of the American Benefit Society, in Boston, last week, important committee positions were given Winthrop F. Barden, of Chapman & Barden, for a long time prominent in national circles of the order.

In the Court of Common Pleas at Providence, last week, there was a hearing affecting the disposition of part of the estate of the late Henry D. Merritt, of H. D. Merritt & Co. The suit had to do with claims presented by certain relatives who alleged themselves entitled to a share for caring for Mrs. Merritt.

ON MEMORANDUM

After the Holiday Clean-out

Your cases need filling up. We will send you on approval anything you want in Diamonds and Diamond Jewelry to fill up. There's no question that prices will go still higher, so you'll be the gainer if you let us know at once just what you need.

New York Notes.

J. A. Flomerfelt has entered a judgment for \$77.17 against Henry M. Hunter. William B. Durgin, of the William B. Durgin Co., Concord, N. H., paid a visit to New York last week.

Max Freund, who has been ill for the past two months, is now on the road to recovery. He is at present at Lakewood, N. J.

Among the judgments against Julius L. Kirsch canceled last week was one for \$226.06, entered by the Meriden Britannia Co., April 3, 1895.

Judgments against Israel M. Finkelstein by J. Horowitz, \$226.62, entered Feb. 15, 1893, and by E. P. Hatch for \$479.72, entered Dec. 5, 1892, were satisfied last week.

Mrs. Theresa Lynch was one of the petitioners who filed an involuntary petition in bankruptcy, Saturday, against Nathaniel S. Wertheimer, against whom she holds a judgment for \$252.

The annual meeting of the stockholders of the Gorham Mfg. Co. for the election of directors will be held at the office of the company, Broadway and 19th St., Monday next, at 2 o'clock p. m.

The International Clock Co., of New York, have been incorporated with a capital of \$50,000. N. Trahan, Brooklyn; Joseph Konigsberg and Joseph Forsheim, New York, are the directors.

The first meeting of the creditors of Louis Lilienthal, who filed a petition in bankruptcy Feb. 18, will be held at the office of Ernest Hall, referee in bankruptcy, 64 William St., March 12, at 4 o'clock p. m.

Anthony Moors, as assignee of Elizabeth Moors, who conducted business as a silversmith under the style of the Moors Co., is advertising for creditors to present their claims to him at the office of Rider & Smith, 29 Pine St., on or before March 31.

The International Jewelry Workers have given recognition to the master craftsman of their trade in the design of their new charters, on all of which will be found the picture of Benvenuto Cellini, the celebrated goldsmith of the 16th century.

Sig. H. Rosenblatt has been admitted as a member of the firm of Zimmermann & Forshay, metal dealers, and the firm continue without change. The other partners are Leopold Zimmermann, Louis J. Rees, M. H. Hauser, John S. Scully, Jr., and Leonard Schafer.

Judge Scott, in the New York Supreme Court, Wednesday handed down a decision in the proceedings brought by the Whiting Mfg. Co. against the Tax Commissioners of this city to review their assessment by the Tax Board. Judge Scott orders this assessment reduced by \$52,100.

Lafayette Lilienstern and Thomas H. Leake, composing the firm of Lilienstern & Leake, formerly jobbers in jewelry at 475 Broadway and now in bankruptcy, have arranged for a composition in bankruptcy with their creditors. Wednesday last they filed a petition to the United States District Court, asking the Court to confirm this composition. A hearing on this subject will be had before Judge Brown, Wednesday next, at 10.30 o'clock a. m., at which creditors and others interested may show cause why the composition should not be confirmed.

Aaron Nadler and Max Weisler, who composed the firm of Nadler & Weisler, dealers in peddlers' supplies and jewelry at 92 Chrystie St., filed a petition in bankruptcy last week with liabilities of \$7,498 and assets \$633 in accounts. Mr. Nadler has individual liabilities of \$4,973 and assets of \$1,485 in accounts. The firm gave up business in December last. Among the largest creditors are Union Braiding Co., \$150; Capron & Co., \$250; G. M. Bab-

ington & Co., \$200; Attleboro Mfg. Co., \$350; J. M. Fisher & Co., \$100; M. Streicher, \$100; Esser & Barry, \$200; W. A. Sturdy & Co., \$175; Wm. Graham, \$150; Simms & Co., \$150; George L. Brown, \$200; Chase Mfg. Co., \$200; S. & B. Lederer Co., \$100; W. H. Wilmarth & Co., \$180; F. H. Sadler & Co., \$100; J. L. Roy & Co., \$150; Joseph Heller & Co., \$150; Fletcher, Burrows & Co., \$90; E. S. Budlong, \$150. Judge Brown signed an order restraining all further proceedings against the bankrupts by Benjamin Kalichman under a judgment for \$542, which he recovered, Jan. 10, in the City Court.

Judge Brown, of the United States District Court, Thursday, granted a discharge in bankruptcy to the William A. Brown Co., manufacturers of gold and silver ware at 127 W. 32d St., against whom creditors filed a petition in bankruptcy on June 13 last. The liabilities were \$28,513 and assets \$15,126. The company, on June 7, went into the hands of a receiver in proceedings for dissolution brought by W. H. Brown and W. E. Ward, two of the directors. A petition in bankruptcy was then filed by the Jewelers' Association and Board of Trade. Among the firm's principal creditors were: Thomas G. Brown & Sons, \$4,500; Benedict & Warner, \$4,354; Thomas F. Heffron, \$4,043; Louis Strasburger's Son & Co., \$2,195; Edward Swan, \$1,906; Mutual Bank, \$1,500; Frank & Shire, \$1,325; Louis Bonet, \$1,547; Charles S. Platt, \$1,612; J. W. Diefenhoff, \$2,695; Mount & Woodhull, \$625; Kastenhuber & Lehrfeld, \$520; John R. Keim, \$300; Gorham Mfg. Co., \$276; Australian Opal Co., \$283, and J. J. Donnelly, \$261. The W. A. Brown Co. were incorporated Feb. 24, 1899, with a capital of \$50,000. They succeeded the firm of Brown & Ward.

DON'T FORGET THE JEWELERS' CIRCULAR PUBLISHING CO.'S BOOK LIST when in want of any technical work in the Jewelry or Kindred Trades.

175 Broadway, where he is engaged in the watch business, filed a voluntary petition in bankruptcy in the United States District Court, Saturday, to get rid of two personal judgments—one for \$3,000, entered by Miller, Riddell & Terestonte, of Toronto, Can., for lawyers' fees and costs, and another for \$125, by J. Zimmerman, being a disputed account for rent. Mr. Doll's schedules show no assets except \$49.75, the value of clothing, which is exempt. The petitioner is agent for the William F. Doll Mfg. Co., watch case manufacturers and jewelry dealers, whose business he conducts. Judge Brown signed an order restraining further proceedings by creditors under the judgments mentioned in the petition.

L. Tannenbaum, of L. Tannenbaum &

Co., returned Friday from an extended western trip.

The American Waltham Watch Co. have declared a semi-annual dividend of 4 per cent., payable March 15, to stockholders of record Feb. 27.

Max Freund, who has been ill for some time past, returned from Lakewood last week, where he had spent a short time while convalescent.

William Bardel, recently appointed United States Consul to Bamberg, Germany, is advertising to sell his diamond and jewelry business at 22 Maiden Lane.

Among the creditors of Alfred E. Aarons, who filed a petition in bankruptcy, Saturday, is William Reiman, retail jeweler, Hoffman House, to whom he owes \$650.

A union were formed recently by the agents and collectors of several hundred instalment jewelers and instalment dealers and merchants in their respective lines on the East Side, for mutual protection, and to abolish some of the abuses in that trade by the employers, for which the collectors are often held responsible by their customers. The union, known as the "Agents' and Collectors' Union of New York," have elected B. Weckstein president, and, last week, distributed circulars to customers enlisting their aid against the East Side Jewelers' and Peddlers' Association. The circular requested customers to patronize only the members of the union, who will wear official buttons, and to appeal to the president of the union if they are unfairly treated by the bosses. In an interview with Mr. Weckstein, published in one of the daily papers, Weckstein is reported to have exposed a number of illegal and even tyrannous methods employed by instalment dealers to force delinquent customers to pay, and to even persecute good customers in order to make them pay more quickly or to pay more than the prices agreed to in their contract for goods. The union seek to abolish these methods, as they cause the collectors to be thoroughly detested, and are often responsible for personal attacks made upon them. A bill was introduced in the Legislature, recently, to prevent body judgments for less than \$25 indebtedness. The union are in favor of, while the bosses, it is said, are fighting this bill.

Leopold S. Oppenheim, Oscar Lichtenstein, F. H. Rohter and John P. Cavanaugh, the four men arrested at the office of William I. Rosenfeld, Feb. 21, on the charge of being suspicious persons, were examined in the Centre St. Court, last week, before Magistrate Hogan on the charge by Detectives Nugent and Madden that they were at the time of the arrest attempting to swindle Mr. Rosenfeld out of \$5,000 worth of jewelry by means of a fraudulent mortgage on real estate. The entire transaction was detailed in THE CIRCULAR-WEEKLY last week. The examination of the men took place Thursday and Monday and the facts, as related, were brought out before the Magistrate by Assistant District Attorney Skidmore. The defendants, through lawyers Rosenthal and Joachinson, contended that Cavanaugh was a bona fide holder of the property for which the mortgage was to be given to Mr. Rosenfeld in payment of the jewels and had a recorded deed of that property from a Mr. Chapman. The Assistant District Attorney brought out the fact that the title claimed by the prisoners went back through various people to a man by the name of Angel, who had sold it under a chattel mortgage and afterward made a fraudulent transfer of the property. All the transfers from this time the District Attorney claimed to be fraudulent and were known to be so by the defendants. The attorneys for the defense interposed various legal technicalities against the men being held and the Magistrate allowed them and the Assistant District Attorney to submit briefs, Monday afternoon, on the point and reserved his decision.

Renewed reports to the effect that the International Silver Co. would take action to resume dividends on the preferred stock at the annual meeting this month

As a Supplement

to the advice we have been giving the last few weeks, we are offering a splendid line of diamonds at prices as low as can be found anywhere.

A large line of mounted diamonds continually on hand.

50 HOLBORN VIADUCT, LONDON.

were circulated last week and appeared in many news and financial papers. When questioned about these reports vice-president C. A. Hamilton said, Saturday, that no official information had been given out by the company, nor had any official statement been made by any of the directors or officers on this subject. The reports, he said, were mere guesswork, as until after the meeting, on March 13, no definite statement of the action of the directors can or will be made.

M. F. Bargebuhr, formerly with Albert Lorsch & Co., now represents Blancard & Co., 45 John St. Mr. Bargebuhr will call on the trade of New York and Newark.

The stores of Reed & Barton, 6 Maiden Lane and 17th St. and Union Sq., were closed Friday, during the funeral of the late Henry G. Reed, whose obituary appears in another column.

It was reported from Vienna, Austria, that a man arrested there recently with \$25,000 worth of jewelry, who was supposed to be a New York jewelry thief, has confessed that he is not a New Yorker, but is Heinrich Wolf, a deserter from the German army. When arrested the man gave his name as W. A. Morley, of 211 W. 37th St., New York.

The well known firm of Ludeke & Power, importers of diamonds, with offices at 14 John St., dissolved Wednesday, Charles L. Power retiring. Adolph Ludeke, with Alexander C. Chase, continues business at the old address without change, under the style of A. Ludeke & Co. Mr. Power will also continue in busi-

ness as an importer of diamonds and other precious stones under his own name and his new office will be in the Gill building, 9-13 Maiden Lane.

John Scott, an old silversmith, died Tuesday night, Feb. 26, at his home in Long Island City. He was 60 years old and had been employed by the Gorham Mfg. Co. for many years. At the time of his death he was in charge of their polishing shop, in the building at 19th St. and Broadway. Funeral services were held at Long Island City, Friday.

It was reported from Elmira, N. Y., last week that a New York jewelry concern had been swindling the residents of that city by inducing them to sell cheap scarf pins in the belief that they would receive a fine silver watch. When the pins were sold, it is said, a lead imitation watch was sent. Complaints were made to the Post Office, but the Secret Service of that Department refused to give the name of the accused firm nor was it to be found upon inquiry in the trade.

The annual meeting of the stockholders of the International Silver Co. for the election of directors for the ensuing year and for the transaction of other business will be held at the office of the company, 83 Montgomery St., Jersey City, N. J., on Thursday, March 28, at 11 o'clock. The transfer books of the preferred stock will be closed from March 1 to 28, both dates inclusive. The next quarterly meeting of the directors will be held Wednesday, March 13.

An action has been commenced in the City Court, New York, by the Fairchild

& Johnson Co., gold pen and pencil manufacturers, against Oscar Wachtel and another, of Frankfort, Germany, doing business as M. Erlebach Nachfoeger, to recover about \$200 for goods sold. Money of the defendants in a New York bank was attached over a week ago. The suit was commenced Saturday, and an order to serve the summons by publication was signed by Judge O'Dwyer, of the City Court, Monday.

BROOKLYN.

Edwin Haas, a diamond broker of Manhattan, who, as told last week, accused G. E. Silsbe, a restaurant keeper, of swindling him out of \$100, was reprimanded by Magistrate Brenner in the Adams St. Court, Wednesday, when he asked to withdraw the complaint, saying that in it he had misstated facts. The Magistrate told Haas that he had sworn falsely either one time or another and that he would send a copy of both statements to the Grand Jury for consideration.

Frederick Martin, jeweler, on Broadway, Brooklyn, three weeks ago caused the arrest of Harry De Vere and Lucy Smith on the charge of swindling him out of a watch valued at \$20. Two more complaints from jewelers against the prisoners were received by the police last week, one from William Goldman, 670 Broadway, and the other from H. J. Woronov, 727 Grand St. The former claimed that the pair had abstracted from his store, Feb. 12, three watches, while the latter claimed to have missed a silver watch and jewelry after their visit to his store, Feb. 8. De Vere and

Miss Smith have been held for the Court of Special Sessions.

William Corthell, an optician employed in a jewelry store in Manhattan, is the defendant in a suit for absolute divorce brought by his wife, Jennie Corthell, in the Supreme Court, in this city. Judge Gaynor, Saturday, granted her alimony and counsel fees pending the suit.

Edmund Jerome C. Hill, 26 years old, a diamond setter and watch case engraver, residing at 1183 Degraw St., and Joseph Fay, 21 years old, of 847 Bedford Ave., were before Magistrate Voorhees, Monday, in the Grant St. Court, charged with malicious mischief by John McKeon, of 1177 Degraw St. They were each held for Special Sessions in \$200 bail.

A. A. Webster & Co., jewelers, Brooklyn, last week inserted an advertisement in *The Eagle*, to discover the owner of a gold wedding ring, found at Old Orchard Beach, Me., in the Summer of 1898. The ring had been sold by the jewelers in 1884, but the name of the purchaser was unknown. The finder advertised several times, and finally turned it over to Webster & Co., to see if they could discover the owner.

Last Week's New York Arrivals.

Whiteside & Co.; George C. Booth, Hutchison & Huestis; S. E. Vansant; Allen Pellencer, Green Bros.; Dan. F. Pickering; Mr. Duval, National Glass Co.

Maurice J. Baer, representing the Attleboro Mfg. Co., was in Pittsburgh, Pa., last week and showed THE CIRCULAR-WEEKLY representative an autograph letter from Carrie Nation. It was in reply to a letter from Mr. Baer to Mrs. Nation, informing her that he had sent her four dozen hatchets. The following is the letter to Mr. Baer:

IN JAIL, Topeka, Kan., Feb. 22.
 Dear Brother:—I do not know how to thank you for the voluntary present. I have not yet heard from them, but they shall do good service to humanity. I never got a letter from you before. Read Isaiah 54-16. I am nursing my wrath to keep it warm, and bide till God opens these bars, and then the hatchets shall open other bars, even the bars of hell.

In love with Humanity,
 (Signed) CARRIE NATION,
 A Home Defender.

The hatchets sent by Mr. Baer were not the plate glass destroyers evidently expected by Mrs. Nation, and just what her feelings will be when she receives the consignment of four dozen hatchet stick pins can only be conjectured. Some of that "warm wrath" may come Mr. Baer's way. The hatchet pin is inscribed with "Death to Rum," and may serve as emblems for Carrie's Home Defenders. Mr. Baer received a photograph button from Mrs. Nation.

Schmid Bros., New Castle, Pa., will move to new quarters April 1.

D. W. Beadel, Syracuse, N. Y., has returned from a month's sojourn in Pittsburgh. Mr. Beadel has discontinued his optical department at C. E. Eager's jewelry store.

John B. Ash, wholesale jeweler at Rockford, Ill., has moved into new and more commodious quarters at 105B 1st St., that city, and has engaged L. S. Thomas, of Denver, Col., to assist in his establishment. Mr. Ash has also put in a large new safe and improved his fixtures, and, altogether, has one of the finest establishments he has ever conducted. A conspicuous sign on his window reads: "No Goods Sold at Retail."

Philadelphia.

George Fife has again left the employ of C. R. Smith & Son.

N. B. Baylinson has returned from a successful southern trip.

Samuel Deutsch has succeeded Max Golden, jobber, 711 Sansom St.

The jewelry and optical store of Charles Schwartz, on 8th St., has been abandoned.

M. Goldstein has removed from 516 South St. to larger and better quarters, at 602 South St.

Jacob Garrison has bought out the jewelry store of his brother, J. S. Garrison, 12 N. 2d St.

William Kiefer, watchmaker, has resigned his position with G. W. Russell & Co. to accept a position at Wanamaker's.

Frank Huber, manager of the tool department of the Lancaster house of L. C. Reiser & Co., was here, last Wednesday, on business.

Louis Schaeberle, watchmaker, has left the employ of J. E. Caldwell & Co. to go with the jewelry store of E. G. Hoover, Harrisburgh, Pa.

William H. Long, 1629 South St., has sold the property at 1627 South St., operated by him as an optical department, to his son, George Long.

Lewis G. Stidham, for many years with the jewelry auction house of L. W. Stidham & Sons, Wilmington, died in that city, last week, aged 48 years.

John Lang, 725 Sansom St., was taken sick in New Orleans, recently, and returned at once to this city, where he is now under the care of physicians.

J. Jacobs & Co., jewelry auctioneers, 220 South St., have purchased property on 2d St. above South St., where they intend to put up a handsome building for auction purposes.

Victor Bernfeldt, dealer in jewelry, 2024 N. 17th St., dropped dead, last Wednesday, in the store of J. J. Cochran, 1917 Columbia Ave. Bernfeldt was 52 years old. Heart disease was the cause of death.

P. Carroll, watchmaker, jeweler and manufacturer of society medals and badges, has removed from 1428 W. Cumberland St. to 1513 Susquehanna Ave., where he has one of the handsomest retail stores up town.

Philip Jacoby, formerly a retail jeweler of this city, who left 10 years ago to seek a fortune in the west, was here last week. Mr. Jacoby is now located as a retail jeweler in Kalispell, Mont. He placed several large orders with local jobbers.

The plaster in the ceiling of the office of Jacob Froelich, 131 S. 7th St., became dislodged, last Friday, and crashed to the floor. Fortunately, Mr. Froelich was not in the office at the time and he escaped injury. The fixtures of the office were considerably damaged.

Ebenezer P. Percival has moved from his temporary store, at 207 N. 8th St., to 221 N. 8th St., which building, destroyed by fire, some months ago, has been repaired. It is rumored that Percival's store will be on the second floor and that the first floor will be devoted to auction sales of jewelry.

An opportunity for some manufacturing jeweler to secure a profitable contract is afforded by the passage of a bill at Harrisburgh, Thursday, providing for medals for

the heroes who responded to Lincoln's first call for volunteers in the dark days of '61. Assemblyman Blackwell, of Hunterdon, is the father of the measure.

Louis McDowell, the man who was arrested in Cincinnati, a few days ago, charged with swindling jewelers by representing himself as the son of various millionaires, will soon be brought to this city to answer the charge of fleecing E. J. Hertz, 13th and Chestnut Sts., out of a brooch worth \$250 by representing himself as J. Pierpont Morgan's son.

Max Golden, who, until Jan. 1, was a jobber at 711 Sansom St., was adjudged a voluntary bankrupt in the United States District Court in this city, Wednesday last. His liabilities are \$12,716.09, with no assets. It is understood that this action is the sequel of a financial embarrassment 10 years ago. Mr. Golden seeks to have his good name restored.

A bill was presented to the State Legislature, at Harrisburgh, last week, to prohibit mercantile agencies doing business in this State without a permit, costing \$5 a year. Such permits are to be issued only to companies with a paid up capital of not less than \$50,000, and the agencies must pay a tax of 3 per cent. of the total business done in the State. They may be prosecuted for giving incorrect, damaging information. Fine and imprisonment is the penalty for violating the act.

Henry D. Auer died, last week, after a month's illness. Mr. Auer was born at Fuerth, Bavaria, June 22, 1840. He learned the trade of goldsmith in the old country and, removing to this city in the early 70's,

established himself in business, at 1058 Ridge Ave., where he has remained ever since. In German organizations Mr. Auer was particularly active. For 21 years he was a member of the Philadelphia Turngemeinde, and he was president of the Turnerfest held here several years ago. He was also a director of the German Society and in 1898 he was the delegate of the Philadelphia Turners at the San Francisco Turnerfest. He leaves a widow and seven children.

Baltimore.

Alexander J. Hubbard, the aged jeweler, was injured by falling from a car at Baltimore and Schroeder Sts., Feb. 21. He was carried to his home by two men. His physician pronounced the injuries severe. Mr. Hubbard had a deep cut over the eye and received a bad shock to his nerves by the fall. Mr. Hubbard says he had been down town in the afternoon, and, returning home, alighted from a Baltimore St. car. While he still held the handle on the side of the car it started off and threw him violently to the ground on his face.

Judges Harlan and Wickes sat in the Criminal Court, Wednesday, and heard argument on the petition for an order of Court requiring the Police Commissioners to return to John Smith the jewelry taken from him when he was arrested last December, in Washington, on the charge of stealing a diamond pin valued at \$75 in the jewelry store of J. Stuart MacDonald, of Baltimore. Several hundred dollars' worth of jewelry was taken from Smith

C. A. TROESCHER, (Established 1871 as The New York Morocco Case Co.),
85 NASSAU STREET, NEW YORK.
TELEPHONE, 5722 CORTLANDT.

and turned over to the Police Commissioners. William Colton, his attorney, put Captain of Detectives Pumphrey on the witness stand to prove that no claimants had appeared for the jewelry. Mr. Colton contended that the jewelry belonged to Smith and should be returned to him. Alonzo L. Miles, counsel for the Police Commissioners, opposed the return of the jewelry until after Smith had been tried. The Judges decided that they had no jurisdiction to order the jewelry returned.

A pretty young woman about 20 years old, of evident refinement, who said her name was Bessie Green but whom the detectives believe to have adopted a false name when she found herself in the charge of the police, was arrested on the charge of stealing an opal ring, valued at \$5, from Welsh & Bro. The young woman asked to see some rings, but left without making a purchase. After she had gone the salesman missed the ring and, going to the door, saw her a short distance up the street, coming out of another jewelry store, where, it was claimed, she had tried to sell the ring.

Boston.

E. A. Bigelow, of the E. Howard Clock Co., was in New York last week on a business trip.

George A. Carpenter, of the Crescent Watch Case Co., returned last week from a business trip to Chicago.

At a recent meeting of the American Waltham Watch Co., Reginald C. Robbins was elected to the directorate of the company.

William Rupert, for 10 years with J. C. Sawyer, 383 Washington St., has opened an office for the jobbing business at 403 Washington St.

Stanton & Glover are closing out their stock at 47 Hanover St. by auction and in the future will carry on their entire business at 21 Court St.

E. C. Fitch, president of the American Waltham Watch Co., is now in Naples and is not expected to return to this country before early next Summer at least.

W. R. Morse, watchmaker for Henry W. Clark, 57 Jewelers building, was operated on successfully last week at a local hospital for a trouble with one of his eyes.

Joseph C. Batchelder, in charge of the silver ware department of Smith, Patterson & Co., is receiving the sympathy of the trade at the death of his father, which occurred last week.

Joseph Bennett, traveling salesman for F. L. Shepardson & Co., North Attleboro, was called to Boston last week by reason of his wife's undergoing an operation at Carney Hospital.

The R. H. White Co., who have bought the bankrupt stock of sterling silver ware from A. F. Towle & Son Co., Greenfield,

Mass., are offering it for sale this week in their jewelry and silver ware department.

Josephine Story, 45 years old, no home, was arrested last week on a charge of disposing of a diamond ring valued at \$95, bought from F. G. Butler & Co., 406 Washington St., under a conditional contract.

The stock of jewelry from the wholesale store of Creed, Kellogg & Co., slightly damaged by smoke, has been sold to the Raymond Syndicate, and is on sale this week at the main "syndicate" store, on Washington St.

M. N. Smith, of Smith, Patterson & Co., has gone to Florida to join his family and will be away from the cold of New England for a number of weeks. His brother and business partner, Carl Smith, has just returned from Florida.

The business of the late Fred. F. Place is being continued at 81 Hanover St., pending the appointment of an administrator of the estate. Samuel G. Learned, Mr. Place's head clerk, is looking after the conduct of affairs for the present.

Albert D. Monroe, of Monroe & Lane, silversmiths, visited Taunton and vicinity last week, after an absence of eight years. Previous to entering business for himself Mr. Monroe was with Reed & Barton, Taunton, and on this visit he hunted up many old friends and acquaintances.

H. W. Clark, Jacob Bornstein and Mr. Fletcher, of Malden, have just completed their appraisal of the stock of Aronson & Co., who, under the name of the Bedford Jewelry Co., were in business at 56 Summer St. The stock will probably be disposed of by auction in the near future.

Announcements have been issued this week for the annual ladies' night of the Boston Jewelers' Club, to be held at the Parker house on the evening of March 22. The programme includes a reception and dinner, after which the party will visit the Boston Museum to witness Edna May's appearance in "The Girl From Up There."

There was considerable excitement early last Wednesday afternoon as the result of a slight fire in the store of M. Myers, third floor of the Jewelers building. The elevator boys ran out the fire hose with which the building is equipped and the stock of Mr. Myers probably was damaged more by water than by fire. The blaze is said to have been caused by the overturning of a lighted alcohol lamp close to a pile of excelsior.

Among the buyers in town last week were: George A. Andrews, with W. F. Newhall, Lynn, Mass.; S. Gurney, of Gurney Bros., Brockton, Mass.; E. M. Welsh, Westboro, Mass.; W. M. Amzen, Fall River, Mass.; Paul M. Harvey, Portsmouth, N. H.; O. H. Sleeper, Exeter, N. H.; E. Cote, Lawrence, Mass.; S. C. Scoutlebury, Springfield, Mass.; A. W. Anthoine, Lewiston, Me.; Alden Webb,

Bemly, Mass.; J. W. Taft, Campello, Mass.; F. W. Peabody, Danvers, Mass.; A. H. Matson, E. Horwichport, Mass.; A. C. White, Pepperell, Mass.

Trade Gossip.

Eliassof Bros. & Co., importers and jobbers of diamonds, watches and jewelry, 9-13 Maiden Lane, New York, and 62-64 State St., Albany, N. Y., are sending to their friends and patrons a neat and useful desk blotter.

As an evidence of the growing popularity and increasing appreciation of the advantages of using celluloid ring trays, C. A. Troescher, 85 Nassau St., New York, the manufacturer of these trays, mentions the fact that over 5,000 of them were sold during the holiday season.

Whiting & Davis, manufacturers of sterling silver novelties, Plainville, Mass., and 12-16 John St., New York, have just received a letter from their London connection, stating that the new Queen of England, Alexandra, has set the fashion of wearing a snake necklace. The correspondent urges Whiting & Davis to send at once a quantity of their "Alice Nielsen" serpent necklaces and bracelets, as he anticipates a large sale for them in England.

Elk lockets are a new line this season which Henry Freund & Bro., 9 Maiden Lane, New York, have brought out. They are sold either with or without diamonds. The demand for Elk goods is reported by this firm to show an increase for the finer quality of article, and their stock, accordingly, contains a large proportion of the finer grade of Elk jewelry. The same firm also report a heavy demand for gold barrettes, which they are showing mounted with pearls, turquoises and other precious stones and in floral designs.

On account of the rapid growth of his business, the last few years, Frank Netschert, manufacturer of natural prepared plants for decorative purposes, has been compelled, in order to secure better facilities for the manufacture of his product, to build another factory, which is located at 240-260 Moffatt St., Brooklyn, New York, within a short distance of his old plant. While only a portion of the new factory has been completed, the increase will enable Mr. Netschert almost to double his output, and it will be greatly extended until it occupies the entire building. The New York factory, at 7 Barclay St., has been abandoned and the salesrooms removed to 129 Fifth Ave., New York, as previously reported. The Chicago office and salesrooms remain at the old address, 187 S. Clark St.

Justice Porter, in Cumberland, Md., dismissed Jacob Meyers, a spectacle lens adjuster, charged with selling without license, after Meyers proved that he was a manufacturer who knew his business.

Watches, Jewelry, Cases, Silverware, Trays, FOR S. A. BORGZINNER, 82-84 NASSAU ST. NEW YORK, FOR TOILET ARTICLES, MANICURE, PAPER BOXES.

Canada Notes.

A. Hastings has opened a jewelry store in Aurora, Ont.

D. Navin & Co. have opened a jewelry store at Florence, Ont.

Lampman Bros., jewelers, Hamilton, Ont., are giving up business.

J. E. McIntosh has removed from Red Deer, Alberta, to Port Elgin, Ont.

A. N. Rahy, Victoria, B. C., has settled with his creditors at 33 1-3 cents on the dollar.

Peter Birtwhistle, London, Ont., has gone to Hot Springs, Ark., for the benefit of his health.

A. W. Bice, Ailsa Craig, Ont., has compromised with his creditors by paying 19½ cents on the dollar.

W. J. Mitchell has purchased the jewelry business of Ammon Davis & Co., Queen St. E., Toronto.

S. Lorie, of Saunders, Lorie & Co., Toronto, returned, last week, from London, England, where he made some extensive purchases.

A. Mitchell, of Challoner & Mitchell, Victoria, B. C., spent a few days in Toronto, recently, on his way to Europe on a pleasure trip.

Ammon Davis, Toronto, is opening up in Hamilton, Ont., where he has purchased the fixtures of the store formerly occupied by Davis & McCullough. He is laying in a new stock of jewelry.

Among the retail merchants of Montreal who have signed a petition to the Quebec Legislature for it to pass a bill imposing a special tax, not exceeding 10 per cent., on the annual value of any building used as a departmental store, is Adolphe Mongeau, jeweler.

E. W. Gilmore & Bro. have opened an office and show room at 50 Bay St., Toronto, Ont., for the purpose of conducting a wholesale business in silver plated ware, sterling silver novelties, real and imitation ebony, real and imitation cut glass ware, fancy gilt clocks, gold and silver mounted Dresden, Venetian and Bohemian ware, etc. They will control the complete line of the M. S. Benedict Mfg. Co., East Syracuse, N. Y., for Canada.

R. N. Scott & Co., wholesale jewelers, Montreal, whose affairs are in an embarrassed shape, have made a proposition that creditors should grant them a discharge upon the payment of 20 per cent. of their claims. The firm date from March, 1897, when they succeeded J. H. Jones & Co., who were also unsuccessful and who had some years previously taken over the business from the late Robert Wilkes, of Toronto. The liabilities are stated at about \$27,000.

Copyrighted Sept., 1900, by S. C. Scott.

Whether loose

or mounted every diamond we send out is marked with a grade number or letter to indicate the quality, and, remember, we guarantee them to be exactly as represented.

A feature of our Grading System is that it tells without examination whether a stone is perfect or not. This is an aid to even those who are well posted in the different qualities.

Dealers who do not feel competent to rely entirely on their own judgment will find our System a great help, both in ordering and selling.

Our Guarantee, in addition to yours, makes easier selling and satisfied customers, and the additional satisfaction of having dealt fairly with them.

Our prices, you will find, will compare favorably with any in the market. When you have a prospective sale for something not in stock, a trial order will convince you.

S. C. SCOTT MFG. CO.

9, 11, 13 Maiden Lane,
New York.

days ago showed a well dressed young woman some cheap rings. She wanted something more expensive. She was shown it and then suddenly concluded she would not purchase. Mr. Block was suspicious and quickly missed two rings. The woman was arrested and the rings found on her.

N. M. Jordan, Fort Worth, Tex., has sold out.

Mrs. C. W. Harper, Colfax, Va., has sold out.

B. F. Straub, Waterville, Minn., has moved to new quarters.

McManus Bros. have succeeded T. H. McManus, Newton, Kan.

H. C. Risse, El Reno, Okla., has given a chattel mortgage for \$298.

C. E. Wisard will open a jewelry store in Howard, S. Dak., at once.

E. H. Treiber has moved from Parkston, S. Dak., to Sutton, Neb.

M. G. Stonebrink, Dayton, Ore., has filed a petition in bankruptcy.

C. E. Luthy has discontinued the jewelry business in Rexburg, Idaho.

C. H. Pratt, Helena, Mon., contemplates locating in Billings, Mon.

H. W. Alexander, Liscomb, Ia., has sold real estate for a consideration of \$300.

B. E. Leas, of Hudson, Ind., will engage in the jewelry business at Luverne, Minn.

B. F. LaValley, Reynolds, N. Dak., will start a branch jewelry store at Holmes, N. Dak.

G. F. Miller has moved his stock of jewelry and notions from Milan to Hurland, Mo.

Part of the stock of W. H. Taylor & Co., Shenandoah, Ia., has been destroyed by a fire.

John Schmitz, Parsons, Kan., has given a chattel mortgage to Mrs. L. A. Schmitz for \$2,130.

A. K. Nuckolls & Co. will soon open a stock of jewelry, notions, etc., in St. Joseph, Mo.

George Searles has taken a position in the jewelry store of Otto Nelson, Peshtigo, Wis.

E. M. Schwenke, New Richland, Minn., will move his stock of jewelry to new quarters soon.

William Gaw, dry goods and jewelry dealer, Webb City, Mo., has given a realty trust deed for \$5,000.

J. M. Stephens has succeeded to the jewelry and notion business of Stephens & Turner, San Angelo, Tex.

The stationery and jewelry firm of Scott & Williams, McMinnville, Ore., have dissolved by mutual consent.

E. L. Rinkenback, Harrisburgh, Pa., has purchased real estate near his present store, which he will improve and occupy.

J. M. Swanson, Marathon, Ia., has sold out to W. E. Pelley, taking as part payment a chattel mortgage amounting to \$2,845.

Suit has been brought against Alexander Fuhrman, Kansas City, Kan., to foreclose a real estate mortgage amounting to \$743.

Leo Hirsch, Centerville, Ia., has admitted a partner in his notion and jewelry business, and the firm are now Hirsch & Chapman.

The C. C. Pottinger Jewelry Co have been organized in Shawnee, Okla., and succeed to the jewelry business established there by C. A. Miles.

A. J. Levin, of A. J. Levin & Co., St. Joseph, Mo., has received a warranty deed for a consideration of \$900, and gives a realty trust deed for \$500.

John Graham, Prairie City, Ia., died suddenly at his home. He was a good workman, but drink had led to family separation and wrecked his career.

H. E. Robie, of Newburyport, Mass., is endeavoring to interest capitalists of Haverhill, Mass., in the formation of a company for the manufacture of silver ware.

Ralph Trowbridge, who has had charge of the jewelry department in Robert Peterson's store, Barnesville, Minn., has bought the business of T. I. Lewis, Moorhead, Minn.

Jacobson Bros. have bought the fixtures of M. Barr & Co., Howard Lake, Minn. The latter have given up the business and moved their stock to their homes, where they will close it out.

A. A. Preston, Rose Hill, Ia., has constructed at odd times a complete little gasoline engine which develops three-quarters of one horse-power. Mr. Preston is an enthusiast on gasoline engines.

George Nash, a negro with a criminal record, was arrested at Norfolk, Va., last week for the robbery of the store of George Honnet, Wilmington, N. C., Feb. 13. The stolen goods were found in Nash's possession.

Buffalo, N. Y.

James Clegg, of Seneca St., has been having his store painted and redecorated.

Jewett & Co. will very soon discontinue their business on Elk St. and remove to Houlton, Me.

William Ehmman and wife, with a party of friends, are enjoying a month's stay at Hot Springs, Ark.

Eugene Tanke is enjoying a trip through Mexico, and will return home by way of Cuba and Porto Rico.

The thieves who stole the diamonds from H. J. Faber's store were indicted by the Grand Jury, last week.

E. R. White, Cold Spring, has placed in his store a number of very handsome and unique show case lights.

A. & R. Bergman are advertising a closing out sale of their stock, preparatory to entering the wholesale jewelry business.

C. F. Chouffet is doing a good trade in the sale of Pan-American clocks, and expects to dispose of 30,000 of them during the Exposition.

Rosalia Proneik, 1275 Broadway, reported to the police, on Saturday last, that her store had been entered by burglars during the previous night and robbed of all property of any value outside of the safe.

Philip Regan entered the jewelry store of Henry Preussmann, 213 Genesee St., on Friday last, and asked to look at some rings. Several trays were shown to him, and after looking them over a few moments, he grabbed six rings and ran out of the store. Preussmann reported his loss to the police and Regan was soon arrested and locked up.

Eternal Hustle, Coupled with Honesty and Integrity, is the Just Price of Success.

WESTERN SUPPLEMENT

VOL. XLII.

NEW YORK, WEDNESDAY, MARCH 6, 1901.

No. 5.

Chicago Notes.

All communications in reference to the Chicago department of *The Jewelers' Circular-Weekly*, addressed to Stephen Parlin, 134 Van Buren St., Room 414, Chicago, will receive prompt attention.

TRADE CONDITIONS.

There are a few bright spots this week in the general quietude of business circles. Watch and clock manufacturers are doing well, optical houses are getting the usual amount of business, sterling silver houses report a good improvement for February and silver plated ware houses say they have nothing to complain of. Nevertheless, the general jobbing trade is not quite up to the average, and in some lines is far below the average for the month. Judging from the bank clearings, the south and southwest are doing relatively better than the west and northwest. February, as a rule, is a month from which little can be expected in northern climates, owing to the difficulty of maintaining communication between the farms and country towns on account of bad roads. These become improved as the season advances, and with better facilities for getting around and the advent of warmer weather, an improvement in trade may naturally be expected.

In a fire at 123 22d St., Feb. 24, J. & R. Sims, book dealers and jewelers, lost \$1,200.

Sigmund Stern, of Stern Bros. & Co., spent the week in Chicago, returning east Monday.

Martin, Copeland & Co. were busy the latter part of the week with their annual stock taking.

Mr. Newman, of Workman & Newman, visited manager M. Newhouse, of the Chicago office of the company, the past week.

G. Rodenberg, of the S. & B. Lederer Co., has returned from his visit to the Providence factory and leaves this week for a business trip around the loop of central western cities.

The junior member of A. W. Ford & Son, Freeport, Ill., was in the city to say good-bye to his numerous friends prior to leaving for Colorado Springs to enter a manufacturing business.

Mr. Swartzchild has left Texas for California after an extended stay in the former State. He will remain in California until the latter part of April. Mrs. Swartzchild accompanies him and the trip is principally for pleasure.

The salesrooms of S. & B. Lederer Co. and P. H. Bettman, in the Silversmiths' building, are undergoing extensive remodeling. The firms now occupy the entire space and have private offices and all conveniences for the prompt transaction of business.

Mr. Lester, Chicago manager New

England Watch Co. and New Haven Clock Co., just back from the factories, says they will soon show a new line of novelties for the 1901 season. He reports business fully satisfactory in watch and clock lines.

Henry Plumb, Des Moines, Ia., was in town last week replenishing his stock, which suffered severely in a recent fire. His store was fully insured and he collected \$6,000 from the insurance companies without difficulty. Mr. Plumb restocked liberally.

Mr. Drummond, cashier of the Towle Mfg. Co., prior to leaving for San Francisco to sail for New Zealand on the *Sierra*, received a telegram stating that the passenger list of the boat for next sailing was full. He has therefore postponed his New Zealand trip for a month.

Mrs. Edith Walton Smith, wife of Edward J. Smith, secretary of the firm of Spaulding & Co., died Feb. 25 at the Virginia Hotel. Her home had been in Evanston until three months ago. Mrs. Smith's body was taken to Detroit for burial.

R. B. Schoenthaler, who has been connected with the Barbour Silver Co., branch of the International Silver Co., for the last nine years, will sever his connection with that company March 1, to accept a position with the Wm. L. Gilbert Clock Co., where he will assist in taking care of the Chicago trade.

S. C. Eppenstein, of the Illinois Watch Case Co., shook hands with friends Saturday prior to leaving for New York with his wife and 23 months' old son, whence they sailed, March 5, on the *Kaiser Wilhelm der Grosse* for a four months' tour of the United Kingdom and the Continent. Mr. Eppenstein will visit the offices of the company in England, Germany and Switzerland, as well as call at all the watch centers of the Old World. This is his fifth trip abroad and he is as much at home in foreign cities as in Chicago.

M. Sprague, a diamond salesman, residing at 268 Mohawk St., was assaulted near his home, Feb. 25, and robbed of a satchel said to contain \$1,000 worth of stones. Mr. Sprague was taken unawares and was dazed by the blows, but grappled with the highwayman and struggled for possession of the satchel. He was again felled to the sidewalk and when he regained his feet the thief was escaping with satchel in hand. Sprague boarded a trolley car going in the same direction as the robber, but evidently the move was noticed, for the thief turned off into a side

street and was lost sight of. The case was immediately reported to the police, but no arrests have been made.

A contract for 1,000 solid 14-karat gold pins was recently placed by Alexander Dowie with M. Bazzett & Co. for use of Zion Congregation, which has 60,000 members. The pins are shield shaped, ½ inch in length, with body of Roman gold divided into quarters of colored enamels. The quarter at point of shield is in white enamel with word ZION in blue. The upper quarter is blue enamel with flying dove in white. The remaining quarters are in gold with white enameled sword and scepter in one and in the other a crimson cross on white enamel background. It is probable 50,000 such pins will shortly be in use.

J. A. Hull, 28 years old and an alleged forger, was arrested here last week for swindles claimed to have been perpetrated about a year ago. It is claimed he secured considerable money at that time by presenting a check for a purchase and receiving the balance above the price of the purchase in cash. He is said to have secured some \$600 cash and between \$300 and \$400 in jewelry from B. F. Norris, Alister & Co. in this way. In a few days the forgeries were discovered and a warrant sworn out, but the police were unable to learn his whereabouts, though heard of at various cities since that time.

Omaha.

C. L. Combs & Co. have given up the jewelry business they have been conducting in South Omaha.

W. E. Burlingim has secured \$620 damages against the Omaha National bank. The bank seized a jewelry stock belonging to Shook & Patterson, Rising Sun, on a debt. The stock was the property of the plaintiff, his mortgage having been foreclosed a few days before the seizure.

Joseph Miller, Buffalo, N. Y., a diamond dealer, was arrested Wednesday on a charge of attempting to defraud a hotel proprietor.

J. B. White, optician, Columbus, O., will, on April 1, move from his present location, at 110 N. High St., to the Dispatch building, where he has leased a large and handsome room. It will be entirely remodeled and a new double front will be put in, as well as tile floor, and all other modern equipment. Mr. White's business has been rapidly increasing of late and he has to have more room than he could get in his present location.

Kansas City.

Walter M. Jaccard left for New York the latter part of last week.

Sam Quigley has accepted a position as engraver with Duck & Missman.

Earle Williams has severed his connection with the Oppenheimer Jewelry Co.

J. A. Oskamp, with the Jaccard Jewelry Co., is detained at home on account of illness.

The Jaccard Jewelry Co. are getting out the invitations and programmes for the K. C. Medical College commencement, which will be held in the near future.

Leon A. Mosher, junior member of J. A. Mosher & Son, Burlington, Kan., who was recently married, visited in Kansas City, while en route to Chicago, on his wedding trip.

J. R. Mercer has a large placard posted on a small front door announcing that he is "Open for Business," otherwise it would be impossible to find the entrance, as the whole front of the building has been taken out preparatory to making the changes.

Indianapolis.

Julius C. Walk is taking a vacation in the south.

Mr. Galloupe, of the Crescent Watch Case Co., has been doing missionary work among the jewelers of the city.

Last week a fire on the third floor of the block in which H. A. Comstock's store is located caused some loss from smoke and water. The water swept through the floors and entered Mr. Comstock's jewelry store. The most damage was done to a case of silver and ebony goods. The loss of \$300 was covered by insurance.

F. O. Brooks has disposed of his interest in the stock and firm of Brooks & Dold, Madison, Ind. Mr. Brooks voluntarily retires after 50 years of active business life in Madison. He went to Madison when a young man and for several years conducted a jewelry business with his brother; later he became associated with Godfrey Dold, who is also a veteran in the jewelry business in Madison. Being in poor health and having reached the 72d year of his age, Mr. Brooks feels that he has earned the right to lead a quiet life, free from all business cares.

Denver.

H. G. Petty, Fort Collins, was in Denver last week on business.

Frank E. Bristol has moved his store from North Denver to 16th St., near Stout St.

J. L. Bishop, formerly of Fort Scott, Kan., is working for J. D. Allen, this city.

M. F. Warren, Colorado Springs, has just returned from an extended visit to the east.

Walter Booth, indicted on eight counts for larceny of jewelry from the Denver store where he was employed, has been sentenced to a term in the Buena Vista reformatory. Booth is only 23 years old and is married to a rich New York girl, who is said to have been driven from him by his continued dishonesty. Booth formerly lived in New York.

Pacific Northwest.

TRADE CONDITIONS.

Trade is slow throughout the jewelry trade in the North Pacific Coast. Dealers and their assistants are busy fixing and brightening up stock preparatory to Easter trade, which is expected to be better than heretofore. February business will show an increase over the corresponding month last year. The outlook is encouraging. Your correspondent finds no complaint from anyone in the trade.

Burnett Bros., Chehalis, Wash., are remodeling their store building.

The trustee of D. L. Bettchen's jewelry store, Moyie, B. C., distributed assets March 1.

H. A. Richardson and W. H. Snyder, of Silverton, have gone to Castle Rock, Wash., where they will establish a jewelry and watch business.

F. A. Heitkemper, of the G. Heitkemper Co., Portland, Ore., has returned to the store after 40 days' session of the State Legislature, of which he is a member.

W. W. Wilmot, a native of Tasmania, aged 39 years, and a jeweler by trade, committed suicide aboard the American ship *Kennebec*, in Seattle, Wash., harbor, a few moments prior to the vessel starting for Sydney. It is believed that Wilmot had been in the jewelry business at Seattle lately, as among his effects were numerous receipted bills showing his good credit with wholesale houses in Chicago. Wilmot had been in the employ of Albert Hansen as an expert watchmaker during the holiday seasons.

Hesse & Sturges, Boise, Idaho, have offered prizes to be awarded at a big mas-

querade ball to be given soon. The prizes are on exhibition at their store.

J. A. Mauer will remove to a new location in Eugene, Ore., in a few days.

The Seattle, Wash., police think they have a clue to the robbers who recently secured \$200 worth of diamonds, rings and other jewelry from the window of the Chicago Loan Office, after smashing the plate glass with a muffled brick. Manager Harry Silver was removing jewelry from the show case inside when the crash came. He ran to the door, but found that it was fastened from the outside. The thief, previous to breaking the window, had fastened a chain with two hooks through the door handle that prevented it being opened from the inside. Two persons who were standing around the corner heard the crash and saw the man run from the place and disappear in an alleyway.

St. Louis.

Derleth & Co., Centralia, Ill., have dissolved, Fred L. Pfeiffer retiring and William Derleth, formerly of East St. Louis, continuing the business.

Alexander Kennedy, of Alexander Kennedy & Co., is on a duck hunting trip. He is usually quite successful, but has been known to bring back only a cold.

Out-of-town dealers here have not been plentiful. Among those in last week were: L. B. Moore, Denison, Tex.; J. Harvel, Litchfield, Ill.; Louis Heilbron, Texarkana, Tex., and W. T. Woolford, Potosi, Mo.

Pacific Coast Notes.

A. B. Wilson, Martinez, Cal., has made a number of improvements in his establishment, including a linoleum covering on the floor.

R. H. Reed, Corona, Cal., has carpenters at work remodeling counters, etc., with a view to rearranging the interior of his jewelry store in the Phillips block.

Charles King, who recently moved to Auburn, Cal., from Oregon, has purchased a residence in the northern part of that city, and it is understood he will shortly open a jewelry store there.

It was reported a few days ago that two women shoplifters had purloined several gold chains from the jewelry store of Leo M. Schiller, San Diego, Cal. Mr. Schiller had gone home, leaving two young boys in charge of the store, when the chains were taken.

Honolulu, Hawaii, is being swept by a wave of burglaries. Among the many places which have been entered by thieves is the jewelry establishment of H. G. Biart, on Fort St. This store was visited on the night of Feb. 17. A pane of glass in a door was taken out and the door thus opened. The burglar made a thorough search of the place and was evidently looking for some object of special value. Some plated ware was taken by him.

L. H. Green, New York representative of the Providence Stock Co., has been visiting trade in Baltimore and Philadelphia.

The father of John Stoehr, Traer, Ia., died recently. He was in the jewelry business at Traer some years ago.

Cincinnati.

The number of prominent weddings to come off in April give the jewelers prospects for fine trade.

George Newstedt has, in one of his show windows, the largest cuckoo clock ever shown in Cincinnati.

The Gebhardt Mfg. Co. are working on the new patents and expect to have the goods ready for the market in a few weeks.

Charles Gebhardt, of Albert Bros., has recovered from a siege of sickness of several weeks' duration and started out on his delayed trip last week.

Eugene Fromeyer, of L. Gutmann & Sons, has returned from a long trip and will go out with a fresh stock immediately, to complete his first trip.

Joseph Beeker, of Joseph Fahys & Co., is closing up the February stock sales and says he had a very good month. He is confident this year will be a hummer.

Frank Herschede, en route to California via Mexico, was heard from in a very substantial way by his house, in several orders for hall clocks from Mexico City.

S. C. Citroen & Co. have put on another expert cutter to meet the demands of the trade. There is plenty of business, but the prices for recutting and repairing are too low to permit of much profit, owing to the increase in price of diamond cut.

The John Holland Gold Pen Co. have had a greatly increased business this year and are so far behind their orders that they are putting on more men to catch up. They are just getting out a new fountain pen which they believe will make big sales this year.

Gustave Fox & Co. are making the largest badge ever made in this city, of solid gold. It is for a sheriff in Montana. It is 7½ inches long and has a diamond in the center of the city seal, and is engraved and enameled and has considerable work on it.

William Pfeuger and John Osthoff, of Joseph Noterman & Co., are home after fresh samples to replenish their depleted stock before continuing their trips. Mr. Pfeuger reports that W. W. Howe, Carlisle, Ky., has sold his store to Edward Taylor and will remove to a larger city.

A recent wedding of note was that of George H. Newstedt to Miss Anna Tudor. Mr. Newstedt has opened a new store on Vine St. He is an Elk and is quite prominent in fraternal and social circles. He is a brother of August Newstedt, of Bene, Lindenberg & Co., and a nephew of C. J. F. Bene, of the same firm.

The Wadsworth Watch Case Co. have added a number of new designs in their gold stock and the demand is increasing to such an extent that they have been unable to fill orders promptly. The experiment of making gold cases has been successful and will hereafter be one of the prominent features of the company's business.

There has been a revival in the sale of elk teeth charms since the attempt to stop the sale failed. In fact, it had the effect of advertising the stock, since many have ordered them who never before saw them. Cincinnati houses have not hesitated to continue in the making of these charms, knowing them to be a marketable line.

They are perfecting a safety pin fastener that will be a new century attraction.

James Morton, employed by C. A. Adams, presented a forged order for a clock, at the store, purported to have been signed by a well known customer. He secured the clock and pawned it. He was arrested.

A young man and woman failed to work a now well known trick at the store of the Duhme Jewelry Co., a few days ago. They looked at high priced diamond lockets. While the man was examining the goods, the woman tried to attract the clerk's attention elsewhere. The clerk watched the man instead and saw one of his hands close. The clerk grabbed the hand and by force opened it. In it was one of the lockets. The couple were ordered out of the store and they lost no time in obeying.

Minneapolis and St. Paul.

I. C. DeGraff, lately in business at Dickinson, N. D., has sold out and come to Minneapolis, where he expects to locate.

The Palace Loan & Jewelry Co., 36 Washington Ave. S., Minneapolis, have put in a new front and made other improvements.

George Abrams has moved his jewelry business from 197 E. 3d St., St. Paul, to 191 Sibley St. He will also open a store at 187 E. 3d St.

Kreger's loan and jewelry office, 204 Washington Ave. S., Minneapolis, was burned out in the fire which destroyed the Windom block.

Abraham Cohen, insolvent retailer, St. Paul, offers his creditors a settlement at 35 cents on the dollar. The offer will be considered March 9.

M. Thouren & Co., manufacturing jewelers, Minneapolis, are seeking new office rooms, as the present location is to be torn down and rebuilt.

S. B. Abeles, Minneapolis, has fitted his show windows with 100-hour arc electric lights. The windows are also surrounded with incandescent lights.

S. Jacobs & Co., Minneapolis, will soon move from 410 Nicollet Ave. to 518 and 520 Nicollet Ave., where the store will be remodeled for their use. The plans provide for a unique and pleasing store.

F. L. Bosworth & Co., wholesale silver ware, etc., Minneapolis, have added another room to their space in the Boston block, and now have seven rooms. They have been so crowded as to be unable to properly display their samples. Mr. Bosworth is away on a short trip to Duluth and Superior and the Iron Range.

Among the dealers from the country in the Twin Cities the past week were: R. F. Lussier, Cass Lake, Minn.; L. J. Field, Oronoco, Minn.; F. J. Vanasek, Montgomery, Minn.; Jacob Haga, Hector, Minn.; E. M. Schwenka, New Richland, Minn.; R. T. Trowbridge, Moorhead, Minn.; C. A. Morrison, Eau Claire, Wis.; S. A. Lasky, West Superior, Wis.; H. Rosenblom, Frazee, Minn.

The Minneapolis Jewelry Mfg. Co. will remove their offices and warerooms from the present location, 26 and 28 Washington Ave. S., to the second floor of the new Andrus block, 5th St. and Nicollet Ave. They will have stockrooms located on the

third floor. The new location will have far better light and accommodations and the company will have a more compact space. New fixtures and new furniture will be put in. They will move about May 1.

The Mowrey & Murray Co., manufacturing jewelers, St. Paul, are arranging for extensive additions to their plant. Their space on the fourth floor of the Ryan block will be more than doubled. They have ordered new power rolls, a complete refining plant, sweep reducer, annealer, new casemaking outfit, etc. There will be a gold refining plant. The practical work will be in charge of John C. Leavitt, late superintendent of the Sterling mines at Providence, Ariz. Mr. Leavitt is a practical assayer and will become a member of the firm, who will hereafter be known as Mowrey, Murray & Leavitt. Mr. Leavitt is now in New York, selecting machinery. The new firm will manufacture settings and mountings and will keep a good stock on hand. They will also make and carry a full line of rings, stones, etc. The new machinery is to be installed by April 1.

D. D. Hayden, Housatonic, Mass., has improved the interior of his store.

John Fisher, Hazleton, Pa., will move that business to Sayre, Pa., April 1.

Nelson H. Davis, Worcester, Mass., has moved into new quarters, which have all the fittings of an up-to-date establishment. An optical department is a feature.

Fire and water damaged the factory of Jacob L. Jacobson, Omaha, Neb., Thursday, to the extent of about \$1,000, which was covered by insurance. The workrooms suffered the most, but business was not seriously delayed.

William Pugh, Cleveland, O., has remarried his divorced wife. Mrs. Pugh, after the divorce, married a man named Saunders, but she again secured a divorce. Then Pugh and his former wife made up. They returned to Cleveland after the wedding.

San Francisco.

E. A. Richmond, Arcata, Cal., was here for a day or two last week, on his way to San Diego, Cal., where he expected to remain for about two weeks.

John H. Curran, a manufacturing jeweler of New York, arrived in this city last week and stopped at the Palace Hotel. He had been visiting the trade in the southern part of California.

J. B. Broadbent, Boise, Idaho, stopped at the Occidental Hotel, this city, last week. J. G. McAlpine, Gilroy, Cal., and F. A. Barss, Placerville, Cal., were in the city, purchasing goods. G. Maher, Fresno, Cal., stopped at the Grand Hotel, and called on the trade, with a view to purchasing stock.

Rings, Charms, Scarf Pins, etc.

312 MARKET STREET, NEWARK, N. J.
Bell Telephone, No. 6542.

Jewelers' Court,

(E. D. GARNSEY, Owner),
51 & 53 MAIDEN LANE, - - NEW YORK.
Ready for occupancy April 1st, 1901.

This modern, twelve-story, absolutely fireproof business building will have solid masonry floors, solid plaster partitions, high marble wainscotings, three high-speed elevators, mail chute, basins in all offices, electric light and everything that contributes to comfort and convenience.

Offices of all sizes are provided and floors may be leased entire or in part, partitioned to suit tenants. Those desiring to carry on light manufacturing can be accommodated, special provision being made for adequate power. Drop hammers will be located in the basement.

Floor plans are now ready for inspection and leases can be arranged by communicating with

ISSUE OF FEB. 26, 1901.

668,638. IMPLEMENT FOR USE WITH MOLTEN METAL. ALBERT L. HAASIS, New York, N. Y. Filed June 6, 1900. Serial No. 19,211. (No model.)

An implement for use with molten metal consisting of a body of molded graphite having a metallic strengthening rod or bar molded therein, one end of the rod or bar being covered to protect it from the action of the molten material, and the other left uncovered so as to permit it to expand and contract independently of the graphite body.

668,759. FOUNTAIN-PEN. WILLIAM W. STEWART, Brooklyn, N. Y. Filed July 14, 1900. Serial No. 23,572. (No model.)

In a fountain-pen, the combination of a nozzle having a bore therein which is in open communication with the reservoir and with the air, a pen-nib seated in the bore of said nozzle so as to divide the same into a plurality of passages and a thin controlling-piece contained within the bore of the nozzle beneath the pen-nib and terminating at both ends within the nozzle, the plane of the controlling-piece extending longitudinally of the bore so as to form passages at the sides thereof.

668,760. FOUNTAIN-PEN. WILLIAM W. STEWART, Brooklyn, N. Y. Original application filed July 14, 1900. Serial No. 23,572. Divided and this application filed Dec. 13, 1900. Serial No. 39,636. (No model.)

In a fountain-pen, the combination of a nozzle having a bore therein which is in open communication with the reservoir and with the air, a pen-nib situated in the bore of said nozzle so as to divide the same and a controlling-piece contained within the bore of said nozzle beneath the pen-nib, said controlling-piece comprising a plurality of pins.

668,783. TIME LAMPLIGHTING APPARATUS. JAMES H. TOWAN, Boston, Mass., assignor of three-fourths to James E. Wall, same place, and Samuel A. Stewart and George L. Damon, Cambridge, Mass. Filed March 5, 1900. Serial No. 7,289. (No model.)

In an apparatus of the class described, a spring-operated actuator, a plurality of latches which operate in succession to hold the actuator ineffec-

tive, a clock and means controlled by the clock to release the effective latch, whereby the actuator may be operated until restrained by the next latch.

668,897. FLOWER-HOLDER. SIMON WEILLER, New York, N. Y. Filed Dec. 8, 1900. Serial No. 39,181. (No model.)

A holder, comprising a bar having a fastening device for securing the bar to a dress or the like, a pin on the bar extending approximately parallel to and in the direction of the length of the bar, to receive the stems of a bunch of flowers and a flexible band for passing over the front of the pin.

668,965. PHOTOGRAPHIC SHUTTER. LOUIS J. VOGT, Rochester, N. Y., assignor to Vogt Optical Co., same place. Filed June 9, 1900. Serial No. 19,750. (Model.)

668,968. ALARM-CLOCK. OTTO BARTEL, La Salle, Ill. Filed Sept. 6, 1900. Serial No. 23,227. (No model.)

A clock-case having an opening into which is inserted a dish-shaped sounder, the edges of the opening being in contact with the outer walls of the sounder, the said sounder having a flared foot or supporting portion for the case.

669,051. DEMAGNETIZER. OAKLEY S. WALKER, Worcester, Mass. Filed July 31, 1899. Serial No. 725,593. (No model.)

The combination of two magnetic conductors arranged to be magnetically united by the article to be demagnetized and a rotating electromagnet arranged to bring its poles into proximity with said conductors, whereby the polarity of said conductors is changed.

"How to Treat Customers - How to Sell."

Notice to Competing Essayists.

The essays in Competition No. 3, "How to Foster Spring Trade," will be printed at conclusion of Competition No. 2 essays.

A PROFITABLE WINDOW CARD.

Mt. PULASKI, Ill., Feb. 15, 1901.

Editor of THE JEWELERS' CIRCULAR-WEEKLY:

For several years I have been a reader of THE CIRCULAR, or CIRCULAR-WEEKLY as it is now called, and would not be without it. I especially appreciate the little notes appearing from time to time under the heading of "Jewelers' Schemes and Ideas."

Enclosed herewith you will please find copy of a recent window card used in connection with a stock clearing ring sale that has proven successful to an unusual degree. I find these sales each year a splendid way of clearing my stock of slow sellers, to say nothing of the advertisement it makes.

Wishing you prosperity in the new century, I remain,

Very sincerely,

WALTER W. MAYER.

The window card referred to reads as appended:

HOW to treat customers is a subject that calls for the mind of a person who has had experience as a salesman. There is such a thing as treating a customer as a customer and as one to whom you wish to sell.

In the writer's experience he has found there are two classes of customers: One that appreciates your efforts; the other, who, from lack of good breeding or education, fails to appreciate your efforts and acts as though you are too low in station to be noticed, much less listened to.

Customers should be treated on all occasions with the utmost politeness, even if the clerk has some dislike for them. It sometimes occurs to the writer that the salesman can be compared to the actor or actress who, when off the stage, roams around with a long and drawn face, but when on the stage, viewed by the public, appears the happiest of mortals.

If while standing near the door you see a customer coming in the direction of your store, politely open the door, and say some courteous word on the time of day

has secreted a piece or has forgotten to put it back in the tray. A customer sometimes remains away from a store not because the clerk asked about any article thought missing, but because she thought the clerk thought she wanted to steal.

If customers have bundles which would probably be more easily carried if converted into one large bundle, or if you see rings worn by the customer which would be greatly improved in appearance by cleaning, offer your services. I have known of many sales made by little favors like these. Always offer to deliver if you see it is inconvenient for the customer to carry the purchase.

If the customer is inclined to converse, do not walk away after making a sale, but engage in conversation, and when the customer is leaving the store walk to the door. If not rushed with trade, open the door and ask the customer to call again.

The above methods have served me very well.

R.

A CATALOGUE OF VALUE TO JEWELERS.

ANNUAL INVENTORY SALE.

There comes a time each year in the history of any live business to unload certain surplus stock; at a loss, if necessary, to keep pace with progress.

The business man who can't take a loss must in time fall back and see patrons going where the stock is kept fresh and up to the times. Here's my offer upon the altar of business prudence. Every ring in this window is solid gold and the prices were from \$1.50 to \$5.50. Since the holidays I have been suffering with an overdose of stone set rings and here they are.

Yours for **\$1.70.**

JEWELERS' IDEAS AND SCHEMES.

In a window of the store of D. C. Dusenberry & Son, Middletown, N. Y., are a set of turquoise and pearl earrings and brooch, once the property of Queen Victoria and presented by her in about the year 1840 to a friend residing at Goshen.

A new jewelry store is to be opened in Shamokin, Pa., by New York parties.

Edward D. Scott, Rockaway, N. J., is reported to have left that place with bills unpaid, and the portion of his stock that had not been sold at auction was held up at the depot by alleged creditors.

or on the weather. If the customer is loaded with parcels, assist in putting her at ease, at the same time offering her a seat. Then learn her wishes. If a clock, piece of silver ware or other bulky goods which is in a place a little difficult to reach, do not hesitate to place before her the entire stock, if necessary to please her, or, in other words, do not be afraid to show goods. If she wishes to see jewelry keep a watchful eye on goods, noting, in drawing out goods, if the trays are full; this will avoid any possibility of mistake. It often occurs that the above is neglected, causing some very disagreeable occurrences through the thought that the customer

THERE is no part of the jeweler's store that so thoroughly reflects the taste and character of the proprietor as his window, and there is nothing for which the enterprising jeweler is more alert than ideas which will help him display his stock so as to make the greatest showing and attract the maximum attention. For this reason the 32-page booklet, issued by the Barlow Mfg. Co., Holyoke, Mass., showing the many varieties of display fixtures made by them to meet the needs of all merchants, will be scrutinized with interest by all jewelers into whose hands it falls. Besides articles of utility, glass shelf-fixtures of an ornamental character and velvet and glass stands, the catalogue, or more properly, the supplement, shows illustrations and gives descriptions of many pieces which are introduced especially to cover the needs of jewelers for display purposes, for both the show case and the window. Among the principal pieces of this kind which are offered at popular prices are chain and pin stands, with velvet cover top, and stick pin and hat pin stands. Everything that the trade require in this line, whether or not it is illustrated in this catalogue, is manufactured by the company, who also make a specialty in supplying special articles to suit the re-

ING and HINTS to JEWELERS

quirements of individual dealers. In addition to window display fixtures, the company also make show cases and special fixtures for glass or wood shelves.

POINTS OF COMMERCIAL LAW.

LESSON IN INTERIOR ARRANGEMENT.

REFERENCE was made in a recent issue of this journal to the new establishment of the Duhme Jewelry Co., Cincinnati, O. We here present a full view of the interior, which will immediately strike one as being remarkably beautiful. The store is on 4th St., between Race and Vine Sts. Words can hardly describe the beauty of the scene that is presented to the eyes. The Duhme Co. have, in the first place, the

A NOVEL WINDOW PROTECTOR.

T. TAYLOR SHANNON, retail jeweler, 3853 Lancaster Ave., Philadelphia, Pa., has originated a novel way to protect the contents of his bulk window from thieves and at the same time to attract the attention of passers-by. "Bruce," a beautiful Scotch collie, has been given a place in the show window among diamonds, watches, rings and the like. "Bruce" watches so quietly that many pedestrians imagine he is

VIEW OF THE INTERIOR OF THE NEW ESTABLISHMENT OF THE DUHME JEWELRY CO., CINCINNATI, O.

tion of partnership property owned equally by two persons is invalid where the judgment is against only one of the partners individually.

A promise by one to pay the debt of another out of the funds of such other party in his hands is not a promise that should be in writing in order to be binding on the promissor.

largest room in Cincinnati under one span. This room is fitted out in regal style, with 2,500 electric lights.

In the rear of the salesroom a "silver room," which is in reality simply a space surrounded by a mahogany railing, is one of the most attractive of the features. Down the center aisle there is a rich display of cut glass, Florentine pictures, French clocks, etc.

stuffed, until a specimen of the genus "hobo" passes or loiters about the window, when the dog pricks up his ears and assumes a belligerent attitude until the man passes on. He seems to be able to distinguish between possible customers and loiterers. Mr. Shannon says the novelty of the advertisement has attracted many customers to the store.

NOTE—Under this department, all matters of a technical or of a news character bearing upon the optical branch of the jewelry industry will be considered. Address communications to The Jewelers' Circular Pub. Co., 11 John St., New York.

ELEMENTARY OPTICS.

TWO professors in the Chicago University have been making experiments

for the past year upon the effects of different constituents of the blood upon heart action in pulsation. They have come to the conclusion that common salt provides the stimulus required. It is stated in connection with the experiments that physiology, or the investigation of physiological phenomena, has been practically stationary for several years, as no one was willing or had time for experiment in elementary physiological phenomena. Their discovery will greatly modify medical practice in many directions, through a better knowledge of an elementary physiological principle. This is a lesson opticians pursuing researches in physical and physiological optics may take to heart. It applies with great force to elementary optical phenomena. A better understanding of these phenomena is what is most wanted at this time.

In the analysis of lens action, most writers up to the present time have accepted the old theories and nomenclatures, and evolved therefrom nothing specially new or startling. In this system the ray of light and the angle of incidence and angle of refraction, and divergence and convergence of the rays have been basic principles. The writer's notation of the curvature of waves of light, which first appeared in the *Keystone's* text book on Skiascopy, of which he is the author provides a far better system. We will, in the course of our work in this department, more fully elaborate that system, and we prophesy that within a few years the system will receive general recognition as the best of all systems. The essential value of the system lies in the fact that by the notation the simple expression "+5C." or "-3C." tells one the character of all the light coming to a lens from an object, or emerging from the posterior surface of a lens. It also gives a new meaning to the expression "+8D." which is that action of a lens or mirror that changes +5C. waves of light to -3C.

or +3C. to -5C. The action of a lens that changes -5C. waves to +3C. or -3C. to +5C. is, on the contrary, a -8D. action.

In all of this there is no confusion of rays, each of which, even those from the same point of the object, impinges upon the lens at an angle proportional to the distance of the point of incidence from the axial ray, giving millions of different angles for the different rays of a single pencil of light, and other millions for the rays from other points of the object, all of which is hopelessly confusing and beyond calculation. But with the waves of each series, all of which are from the same point, every ray is included, and by analogy, all the other waves are of equal value and contain all the rays. By this system a ray of light is regarded—and it is so in fact—as a minimum pencil of light from one point of the object. All the rays taken together form the major pencil, of which the rays are constituent minimum fractional parts. To say, then, that a pencil of light is "a bundle of rays" is to say that it consists of an infinite number of infinitely small parts, which, since every physical thing is so composed, contains no information. It is defining a term in the terms of that which is to be defined and precisely like defining an orange as one hundred one-hundredths of an orange.

A pencil of light really consists of all the waves of light coming from a given point of an object that fall upon a given area, as that of a lens or mirror, or that enter the pupil of the eye. This includes all the rays. But, while the rays are variously divergent, each wave that reaches the area from a fixed distance has a fixed curvature. Moreover, each ray, which is a minimum minor pencil of the larger major pencil, consists of minimum waves having the same curvature as the wave of which they are a minimum part. If the curvature of different areas of the waves are not equally affected by a reflecting or refracting surface, it is easy to differentiate the various effects and reduce aberration to precise mathematical values, which would be impossible with an infinite number of differently refracted rays; for who can make an infinite number of calculations for an infinite number of bundles of rays?

It has been necessary, in evolving optical formulæ under the ray system, to

treat the thickness of the lens as a negligible quantity. This may be done for lenses of low power, but how about the dioptric surfaces of the eye which, though but from one to four millimeters apart, such space produces an evolutionary variation amounting to from 1D. to 8D.? By the wave system these spaces are computed with the most delicate accuracy, and for ordinary dioptics the variation of the marginal areas of the lens from central areas may be treated as of negligible value. We thus determine the precise dioptric action of the central areas of all lenses and dioptric or catoptric surfaces, the surfaces, or portion of them, in which, as diopticians, we are chiefly interested. We may then determine the action at any specific marginal point or for the extreme edge of the lens, and determine to the millionth of a millimeter its focal point with reference to the focal point of the axial minor pencil. This is the measurement of spherical aberration, which varies in the same lens according to the dioptric work of the anterior compared with the posterior surface of the lens.

What the system will do in the matter of chromatic aberration in simplifying the aplanatic and anastigmatic and rectilinear principle in composite and compound lenses, is a question of the future, but there are great possibilities in it. What it reveals in regard to the surface action of lenses, both from a physical and chemical or chromatic standpoint, is enough for the present and gives a basis for future research.

American Spectacles.

"UP to 15 years ago," said an optician, "four-fifths of all the finer spectacles used were made in France. In the past six or eight years French spectacles have been supplanted by American glasses, which are now sold even in France.

"American spectacles are now easily the best in the world, and their superiority is due to the same characteristics that mark so many American manufactured productions, namely, adaptability to their use, good workmanship, uniformity and interchangeability of parts. There have been made in this country great improvements in the special machinery with which the spectacles are made, so that the parts are produced with precision."—*New York Sun.*

Optical Department.

[Continued from page 56.]

DIOPTRIC CONDITIONS OF THE EYE AND HOW TO DISCOVER AND MEASURE THEM.

[Commenced in issue of Feb. 13.]

PRESBYOPIA.

PRESBYOPIA is not emmetropia, but an emmetropic eye may be, and in the course of events naturally becomes presbyopic. It becomes presbyopic when, in spite of its normal vision for distance, the accommodation falls below 5 D. This is an arbitrary line and based upon the fact that, with less than 5 D. of accommodation, the eye cannot use the 3 D. required for reading

correction of a pair of eyes for distance, monocular and binocular, for the presbyopic correction is something imposed over the distance correction. But with emmetropia to start with, the fine correction of presbyopia is an art in its own right. We must confine ourselves to the emmetropic presbyope for the present and take the preceding dioptric faults later. This is the natural order, for after the correction of other dioptric faults, the client becomes artificially emmetropic, and the case will be exactly like correcting emmetropic presbyopia.

An eye whose amplitude of accommodation has fallen below 5 D. is presbyopic. The question then is: "How much lens assistance for comfortable reading does it require?" The first question is that of distance. The writer makes 16 inches rather than 13 inches the basis of the calculation. Presbyopes usually defer taking on their reading glasses. As a result, when they

tance, the point next to be considered is how to divide his range of accommodation so that he may see either at a greater or at a less distance, the latter by relaxing, the former by increasing the accommodative action. To so divide the accommodation, or its range, we must know what the remaining amplitude is. This can be judged quite accurately, though not absolutely, by age. We may say to ourselves, if the emmetropic client is 45 years old: "The amplitude should be about 3 D. He can use half of this amount (perhaps a little more) comfortably. That is 1.50 D. The glass should correct or relieve the accommodation of the remainder. If the distance is 16 inches, the action required is 2.50 D. If we allow him 1.50 D. for accommodative action, the presbyopic correction is 2.50—1.50 D.=1.00 D." In many cases this calculation will "hit the nail on the head." If it does not, it is an easy matter to reduce or increase the correction so that the range, measured by the far and near points of clear vision, is just right to involve the proper amount of accommodative action for the chosen distance.

In the accompanying figure (Fig. 6) is represented the eye with an amplitude of 3 D. viewing the object at 16 inches. The lens is a +1 D., changing the +2.50 C. to +1.50 C. waves, and the accommodative action is 1.50 D., the two making the requisite action (2.50 D.) for 16 inches. By relaxing 1 D. of the accommodation, the far point is 27 inches, or with all accommodation relaxed 40 inches. The near point is, with the remaining 1.50 D. of accommodation, at 10 inches. The range extends from 10 inches to 40 inches, instead of from 13 inches to infinity. By bringing the far point to 40 inches with a +1 D. the near point is also brought to 10 inches. The accommodation is no greater and no less with the lens, but the range is more suitable for comfortable reading, because when reading at 13 inches there is still 1 D. of accommodation unused.

The purpose of this method of procedure is (1) to relieve the accommodation of action that would tire or strain it, and (2) to give it still all the work it is capable of doing comfortably. Without this correction the trouble would be that the accommodation would be overtaxed, which is detrimental and causes accommodative asthenopia. With a higher correction the trouble would be that no accommodation need be exercised for comfortable reading, and this, instead of preserving accommodative power, would cause it to deteriorate more rapidly. One mistake is as bad as the other, but with the former the person himself would be to blame, for glasses would relieve the accommodation of strain; while the latter mistake is the optician's own. He ought to know better than over-correct his presbyopic cases. It is with regard to this point that many oculists show their insufficient knowledge of dioptrics. They put on plus lenses that take all accommodative action from the eye. At the schools where physicians are turned into oculists (eye, ear, nose and throat specialists) such fine points have to be passed over in order to teach the technique of tenotomies, or operations for cataract, etc.

But we have not reached the end of presbyopic corrections. If the ciliary muscle is to be relieved of some part of its natural work, the convergence must also be relieved

FIG. 6. PRESBYOPIC CORRECTION OF EMMETROPIC EYE. AMPLITUDE 3 D.—1.50 D. IN USE.

at 13 inches continuously without pain or weariness. Presbyopia, therefore, begins at about the age of 40 years, although in many people it is actually postponed to nearer the age of 50 years. When it comes, no matter how well one may be able to see at a distance, glasses are required for comfortable reading. As the accommodation is positive or adds power to the lens system of the eye, which is also positive, a plus lens is needed to assist the accommodation.

The correct and accurate fitting for presbyopia is a fine art. Oculists have conceded that opticians may be qualified to fit presbyopia, and that only. I wish I could return the compliment and say that oculists are qualified to prescribe for this trouble; but experience has shown that few oculists can do properly this fine work. The trouble with them seems to be that they entirely misjudge it and its importance. So they clap on a +3.00 D. or +2.50 D. in all cases, regardless of circumstances. This is the height of stupidity. It isn't the only stupid thing oculists do in correcting defective eyes with glasses by any means, and we do not pretend to say that some opticians are not quite as stupid as oculists in the matter of fitting presbyopia; but the stupidity of either does not excuse the stupidity of the other. A stupid optician is as bad as a stupid oculist, but no worse.

The correct fitting of presbyopia is one of the finest pieces of work the optician or oculist is called upon to perform. It involves everything else in optometry and has something of its own besides. It means, in the first place, making your client emmetropic, or eliminating all dioptric faults. Emmetropia, natural or artificial, is the foundation of a presbyopic correction. It, therefore, involves all the points in the due

read, they become accustomed to holding their reading matter at a considerable distance—20 inches or 25 inches away—and it is too much of a change, usually, to make the easiest position 13 inches. They think the glasses "too strong." They will hold it at 20 inches or more, if possible, and not use any accommodation. This gives the accommodative function no exercise, and is to be avoided. With a correction for 16 inches he may hold the paper at 20 inches or 13 inches if his amplitude will allow, the nearer distances giving greatest play to the accommodation.

It must be borne in mind, however, that the occupation of the wearer cuts an important figure. He may be a minister and desire a correction that will enable him to see his notes on the pulpit clearly and comfortably; or he may be a clockmaker, requiring that the eyes be fitted for, say, 10 inches, so as to make the small parts of the clock he handles print an image upon the retina large enough for clear and distinct perception; or she may be a milliner, or fine-sewing woman, who is required to look continuously at minute objects or to make fine spacings. The correction should be adapted to the use to which the glasses are to be put. Conventional rules for the correction of presbyopia do not hold in these cases. The client should be given glasses suited to the distance he wishes to use them, as far as possible. Such glasses may not be comfortable reading glasses, and will not be, unless he has left still quite an amplitude of accommodation. The less the amplitude of accommodation the more exact must be the correction, for, without any accommodation, the glasses fix one point, and only one, of distinct seeing.

Having determined the question of dis-

Optical Department.

(Continued from page 57.)

of an equal portion of its work, for otherwise convergence, or its exercise as before, will induce ciliary action, and the dioptric correction will not correct. Decentration or prisms for reading glasses, or, if bifocals are prescribed, the displacement of the wafers inward, should be a part of every presbyopic correction. It is better to displace the wafers inward than to decenter, for the reason that when the eyes are converged, as in reading, the pupils center at the center of the wafer, giving a well balanced field of the reading under the wafer, with no edges to come between. The wafer should be decentered inward also, if the correction is considerable, for its displacement to the center of the converged pupils alone does not relieve convergence, but merely neutralizes their prism value when they are neither displaced nor decentered. Without displacement or decentration they are prisms base out for the converged eyes, and thus they increase the convergence required.

The correction of presbyopia with nicety is, therefore, the finest of all optometric arts. If presbyopes were as particular as the ordinary 30 year old asthenope, this work would be attended to more carefully. But usually presbyopes are satisfied with anything within a mile of right. Their plus correction helps them and they do not know that they have not the best correction obtainable. It is always pitiful to see an old woman trying to do sewing with misfit glasses, which she believes to be the finest spectacles in the world, because they were fitted by Dr. Blank—"the family oculist." To suggest that they are wrong in any way is to bring down on your head a tirade upon opticians and all their ilk for daring to criticize an eminent professional such as the aforesaid family oculist. I recently had an experience of the kind with the most horribly fitted pair of glasses on the loveliest old lady I know. It wouldn't be worth anybody's while to try to convince her that her glasses are not of the best. She thinks her eyes are failing, and I guess she's about right there, but the doctor who fitted (?) her ought to be compelled to dance in a pair of boots two sizes too large for him, with changed rights and lefts, until he became too lame to keep his office hours.

L. M. Lowenthal, Mt. Ayr, Ia., is visiting friends and relatives in Syracuse, N. Y. Mr. Lowenthal formerly lived in Syracuse and this is his first visit there in 20 years.

Optical Queries.

NIPGEN, O., Feb. 17, 1901.

Editor of THE JEWELERS' CIRCULAR-WEEKLY:

What amount of trial lenses would you advise me to buy, and just what instruments are absolutely necessary for testing, and what book of instruction would be best? I have trial cases offered me, but second-hand; would you advise me to purchase such? I remain,

Yours respectfully,

A. DEALER.

ANSWER:—1. A complete trial case contains usually

1. 32 prs. + spheres.
2. 32 prs. — spheres.
3. 20 prs. + cylinders.
4. 20 prs. — cylinders.
5. 10 prisms, $\frac{1}{2}^{\circ}$ to 10° .
6. 6 plano-smoked or shaded lenses.
7. 1 plano-red.
8. 1 plano-blue.
9. 1 cobalt or chromatic test.
10. 1 Maddox rod.
11. 1 double prism muscle test.
12. 1 pinhole disc.
13. 2 stenopaic discs.
14. 1 solid opaque disc, black.
15. 1 opaque disc—ground glass.
16. 2 half opaques—ground glass.
17. 1 graduated trial frame—2 or 3 cells.
18. 1 plain trial frame.

A complete outfit is desirable, both for work and for appearance. Some of the above (6, 9) are little used. 2. A complete trial case embraces everything requisite for subjective testing. 3. Hartridge's "Refraction" or Thorington's "Refraction and How to Refract." One good book closely studied is better than a multiplicity of books skimmed through. 4. One is often able to buy a trial case second-hand that is quite as good as a new one. The only difficulty is in the judgment of the purchaser. A new case bought of any standard house, or a second-hand case recommended by them, will be found all right.

Changes in the Firm of Gall & Lembke.

It was announced last week that Charles Lembke, one of the oldest opticians in New York and former president of the American Association of Opticians, had retired from Gall & Lembke, of which firm he has been the head for so many years. This announcement, however, was only technically true, as Mr. Lembke, although he has given up his financial interest in the concern, will continue the same active work on behalf of the business as heretofore.

The firm formerly comprised Charles Lembke and his sons, Emil L. and Charles Lembke, Jr. Mr. Lembke, Sr., recently withdrew as a partner, transferring his interest to J. A. Theo Obrig, for 12 years an employe of the firm, who, with the two sons, now continues the business without any change. When seen at the office of the firm, 21 Union Sq., last week, Charles Lembke, Sr., explained that, being financially independent and wanting to recognize Mr. Obrig's services, he had transferred his interest to the latter. He felt that the business should not be divided among more than three partners. Mr. Lembke will hereafter continue his former duties without change, for the mere love of the work and his personal interest in the concern.

Formation of the Colorado State Optical Association.

DENVER, Col., Feb. 25.—The Colorado State Optical Association have been formed in this city. The following officers have been elected: President, J. H. Gallup; vice-president, Robert Brooks Finch; secretary and treasurer, R. H. Biegel; directors, Miss E. H. Chapman, H. G. Biegel, J. C. Bloom and S. Garwood Lippencott. These officers will hold position until the annual meeting and election, in April.

All opticians in Colorado are invited to join the association. The dues are \$2 a year and \$2 initiation fee. Further information may be obtained from secretary R. H. Biegel, 636 16th St., Denver.

The Central Optical Co., recently established in business at Southbridge Mass., in the shop formerly occupied by the Blanchard Optical Co., are reported to be employing 20 people and doing a good business.

'Bell' Bill Now Satisfactory.

The Bill as Now Amended Meets with the Approval of Almost All Opticians.

The amendments obtained by the opticians of the State of New York, through the committee of the Optical Society of the State of New York, to the "Bell" bill, as published last week, were found to be, when the bill was finally printed, even more satisfactory to this trade than the first reports indicated. Not only did the committee insert the clause of exemption asked by the opticians, viz., "or any optician engaged in adapting glasses to the sight," but they also left the clause, formerly put in for the opticians, "or manufacturer and constructor of optical instruments in fitting such instruments on persons in need thereof."

As the bill now stands it is thoroughly satisfactory to the rank and file of opticians of New York, who believe that should it pass it will exempt them thoroughly from all prosecution under the Medical act. There are a number of refractionists who are against the bill in any form, but owing to the concessions obtained, they will not fight its passage, leaving that to the Christian Scientists, osteopaths and others at whom it strikes. The bill, as now printed, reads:

AN ACT

TO AMEND SECTION ONE HUNDRED AND FIFTY-TWO OF CHAPTER SIX HUNDRED AND SIXTY-ONE OF THE LAWS OF EIGHTEEN HUNDRED AND NINETY-THREE, ENTITLED "AN ACT IN RELATION TO THE PUBLIC HEALTH, CONSTITUTING CHAPTER TWENTY-FIVE OF THE GENERAL LAWS."

The people of the State of New York, represented in Senate and Assembly, do enact as follows:

SECTION 1. Section one hundred and fifty-two of chapter six hundred and sixty-one of the laws of eighteen hundred and ninety-three, entitled "An act in relation to the public health, constituting chapter twenty-five of the general laws," is hereby amended to read as follows:

Sec. 152. Construction of this article.—*Any person shall be regarded as practicing medicine within the meaning of this act who shall profess to heal or who shall give treatment to any other person by the use of any remedy, agent or method whatsoever, whether with or without the use of any medicine, drug, instrument or other appliance, for the treatment, relief, or cure, of any wound, fracture, or bodily injury, infirmity, physical or mental or other defect or disease.*

This article shall not be construed as prohibiting the manufacture, sale or use of any proprietary or patent medicine where no diagnosis is made by the maker or seller thereof; or the giving of temporary relief in an emergency by a registered pharmacist or any person, or the domestic administration of family remedies; nor shall it be construed to affect commissioned officers serving in the United States army, navy or marine hospital service, while so commissioned; or any one while actually serving on the resident medical staff of any legally incorporated hospital; or any legally registered dentist exclusively engaged in practicing dentistry; OR ANY OPTICIAN ENGAGED IN ADAPTING GLASSES TO THE SIGHT or any rights of chiropodists under existing laws; or any manufacturer of artificial eyes, limbs, or optical or orthopedic instruments or trusses, OR MANUFACTURER OR CONSTRUCTOR OF OPTICAL INSTRUMENTS, in fitting such instruments on persons in need thereof; or any lawfully qualified physician in other states or countries meeting legally registered physicians in this state in consultation; or any physician residing on a border of a neighboring state and duly authorized under the laws hereof to practice medicine therein, whose prac-

tice extends into this state, and who does not open an office or appoint a place to meet patients or receive calls within this state; or any physician duly registered in one county to attend isolated cases in another county, but not residing or habitually practicing therein.

This article shall be construed to repeal all acts or parts of acts authorizing conferment of any degree in medicine *causa honoris* or *ad eundem* or otherwise than on students duly graduated after satisfactory completion of a preliminary and medical course of not less than that required by this article, as a condition of license.

Sec. 2. This act shall take effect immediately.

EXPLANATION.—Matter in italics and capitals is new.

Indiana Opticians and a New Medical Bill in the Legislature.

INDIANAPOLIS, Ind., Feb. 28.—The Indiana Optical Society held a called meeting in Indianapolis, Feb. 21, that was well attended. Plans were made for a meeting to be held in Elwood, Ind., next June, when lectures and talks by learned opticians will be given.

The Indiana Optical Society have been interested in a bill before the State Legislature, known as the Medical bill, which has passed the Senate. The bill was considered unfair, as it gave the oculists too much advantage over the opticians; but through the efforts of the Optical society, it has been amended so that it will not affect resident opticians, but it does affect all itinerant opticians, whom it excludes from practice in the State of Indiana. Traveling spectacle vendors have been doing a big business in the farming districts of the State.

Optical Briefs and Notes.

S. B. Millard, Litchfield, Minn., has a class of eight students in engraving and optics.

Edward Burgheim has completed a course at a Chicago optical college and will locate in Indianapolis, Ind.

E. P. Chapman, optician, was at Mal-lory & Hollenbeck's jewelry store, Cats-kill, N. Y., last week.

In the optical department at William T. Marcy's store, Indianapolis, Ind., chamois for cleaning glasses are given away.

The Thomson Optical Co., of South Bend, Ind., have been incorporated with capital stock of \$20,000. The directors are: Harry A. Thomson, Nettie E. Thom-son and Susan L. Thorp.

The Standard Optical Co. have been in-corporated to do business in San Fran-cisco, Cal., with a capital stock of \$50,000, of which amount \$250 has been subscribed. The directors are: A. Nordman, I. Nord-man, C. Nordman, M. Nordman and Otto tum Suden, of San Francisco.

At the next regular monthly meeting of the Optical Society of the City of New York, which will be held Wednesday even-ing, March 13, in Parlor DR of the Fifth Avenue Hotel, Prof. William Fox will deliver a lecture on the "Spheres Cylin-ders, and Sphere Cylindrical Lenses." The Society will also listen to original papers by members competing for the \$5 prize for the best article relating to the science of optics or any of its branches. The winner will be selected by popular vote.

The Trenton Watch Co.,
TRENTON, N. J.

Optical Department.

[Continued from page 59.]

City Ophthalmic College, Kansas City, Mo., has been spending several weeks visiting in Memphis, Tenn. He will return in about a week.

Mr. Schimmel, representing Sussfeld, Lorsch & Co., New York, dealers in optical goods, is visiting the trade of San Francisco.

William Auld, the former foreman of the Merry Optical Co.'s shop, Kansas City, Mo., has gone to Boston, Mass., to accept a position.

A. G. Barber, manager of the Globe Optical Co., 403 Washington St., Boston, Mass., was in Southbridge, last week, on a business trip.

Abner C. Thomas, Sistersville, W. Va., and T. A. Westmyer, Wheeling, W. Va., are now taking a course at the Spencer Optical Institute, New York.

H. E. Thomas & Co., Wilmington, Del., have refitted and remodeled their optical department and it is now said to be the largest optical store in the State.

C. T. Beardsley, Denver, Col., is in Billings, Mont., visiting his friend, S. P. Gainforth. Mr. Beardsley is a jeweler and optician and may decide to locate at Billings.

Edwin P. Wells, president of the Globe Optical Co., Boston, Mass., accompanied by Mrs. Wells, sailed from New York, last Saturday, for Porto Rico, where he will be for the next four weeks.

P. A. Cross has resigned his position with the Southbridge Optical Co., Southbridge, Mass., and has gone west to accept the position of foreman in the shop of the Merry Optical Co., Kansas City, Mo.

At the recent annual meeting of the Cohen Bros. Co., Toronto, Can., the following officers were elected: President, Mark Cohen; vice-president, M. M. Cohen; secretary, Lionel G. Amsden; treasurer, E. De Young Cohen.

F. C. Merry, who returned to Kansas City, Mo., last week from a two weeks' trip to the large optical factories of the east, has decided to add many new facilities in the way of first class help and improved machinery to the plant of his company.

Mr. Fennimore, of the California Optical Co., San Francisco, Cal., stopped over in Chicago, with his wife and son, on their return home from a visit east. "I find after a visit to the principal optical houses of the country that the west and California are in the van in the way of progress," remarked Mr. Fennimore.

The optical business conducted for the past 27 years by B. Kahn & Son, at 32 Maiden Lane, New York, will, on May 1, be removed to the store under 189 Broadway. Thereafter it will be run by a new corporation to be known as Henry Kahn & Co., to be formed, about the middle of next month, by Henry Kahn, A. E. Kahn and Herman E. Isaac. The new company will enlarge the business in the wholesale, retail, camera, instrument and other departments, and intend to have one of the finest general optical stores in lower New York.

THE HOROLOGICAL REVIEW

Progress in Chronometry.

[From the French of L. REVERCHON in *La Nature*.]

THE introduction into chronometry of nickel-steel, of which Ch. Ed. Guillaume has made a study, has allowed of a solution of an arduous problem, which for many years has occupied the attention of skilful makers unsuccessfully. This is the

FIG. 1.—Rate of a marine chronometer: *ab*, secondary error with the nickel-steel balance. The lower curve indicates the result obtained with the ordinary balance.

correction of the secondary error. When a compensated balance of a chronometer has been adjusted to two temperatures it is subject to the following laws, announced in 1833 by the celebrated English watchmaker, E. J. Dent:

1. Between the two temperatures to which it has been adjusted, the chronometer gains.
2. Above and below these temperatures, it loses.

So that the rate of the chronometer, instead of being represented by a straight line, has for its index a curve of parabolic form, cutting the theoretical straight line in two points corresponding to the two temperatures of adjustment.

The deviation between the apex of the parabola and the theoretical straight line is called the secondary error.

To minimize this deviation and bring the parabolic arc as near as possible to the theoretical chord has been the object of numerous efforts. Notwithstanding that course has been had to a multitude of ingenious contrivances, the secondary error has stoutly resisted. During the last five years the average in the pocket chronometers inspected at the Neuchâtel Observatory has been 2.34 seconds. The substitution of a nickel-steel alloy for the ordinary steel in the rim of the circular bal-

ance has almost completely annulled, at the first stroke, this elusive error. Dr. Guillaume has achieved this remarkable result by a nickel-brass-steel balance, and M. Nardin, the well known marine chronometer maker, of Locle, has applied the balance to a timepiece previously furnished with a balance of ordinary brass-steel and has reached the result indicated by our first curve. (Fig. 1.)

The secondary error, which was 1.9 sec. with the old balance, fell immediately to 0.3 sec. for the new.

Paul Ditisheim, another Swiss chronometer maker, whose skill is also unsurpassed, has obtained with a pocket chronometer of lever escapement a result still more remarkable, which is represented in the second figure. The

circumstance most worthy of notice in these results, which are also confirmed by other observations, is the perfect accord between the theoretical calculation and the practical observation.

Paul Nardin writes me as follows: "The introduction of nickel-steel in the

construction of circular balances is the most important improvement which has been realized for a long time in the adjustment of chronometers to temperatures. The honor belongs to Dr. Guillaume."

These words are just. It is also proper to congratulate the Swiss chronometer makers, Nardin and Ditisheim, who, by their enterprising efforts, have given to the invention of the learned physician the stamp of their experience.

O. E. Davies, Rockland, Me., has moved to new quarters.

Defects of Balance Staff Pivots.

From the French of Maillard-Salin, of the consulting editorial staff of the *Revue Chronométrique*.

DEFECTS in the pivots of the balance staff cause a damage not incident to those of the other mobiles of the escapement. Friction, as is known, cannot be a cause of variation in the rate of a watch unless it is irregular. On this account care should be taken to see that the jewel holes and staff pivots are perfectly round and smooth. If a machine made pivot is placed under a strong microscope, it will be found covered with small facets, more or less symmetrical. When the watch is placed in a vertical position, the pivots revolve on these facets and produce variations which the adjusters are unable to prevent. To remedy this defect, I formerly heated the pivots and worked them on the lathe. I could thus make them quite round and smooth, but they wore out rapidly. This practice being more injurious than the defect that I proposed to correct, I was obliged to have recourse to the burnisher, which has the great advantage of considerably hardening the surface.

The following is a method which I have seen employed at Geneva and which I have myself employed for five or six years in touching up burnished pivots. It gives excellent results, and I think should be better known.

On an ordinary pivot lathe I adjust on

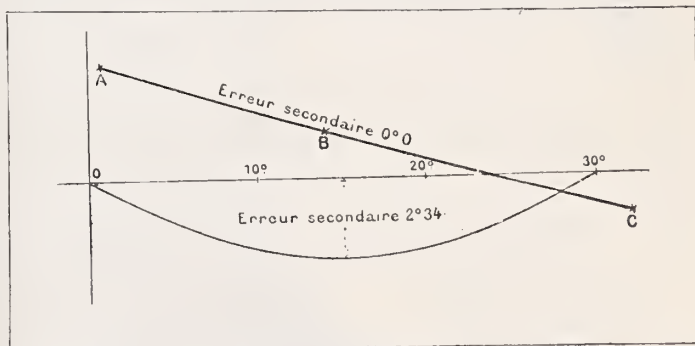

FIG. 2.—Rate of a pocket chronometer with nickel-steel balance. The curve indicates the average of the ordinary chronometer balance for the last five years.

one side a runner, with the central point bored for holding the pivot, and on the other side one in the center of which is placed a stone having a hole quite cylindrical and well polished. The hole should

be about a quarter of a hundredth of a millimeter smaller than the pivot to be retouched. I place the staff in the lathe between the runners without tightening the *lardon** of the one carrying the stone, but pressing the runner lightly against the pivot, turning it a little between the fingers while I make the staff revolve by means of a bow. The pivot is engaged little by little in the hole, and when I withdraw it is perfectly round, polished, cylindrical and the hardness of its surface has been completely preserved.

The operation is not so difficult as might appear at first sight. It is true, some pivots may be broken at the outset, but after a few trials, when the suitable hole has been well selected, accidents will seldom occur. The oiling of the hole must not be forgotten. One resulting imperfection is a little burr of metal at the base of the cone. This cannot be readily removed, but it can be allowed to remain, as it causes no inconvenience.

A second cause of variation is the ex-

*This is one of the terms which, on the average, convey a more accurate idea by transferring it to the English, though less necessary here than in some other cases. As used by many French writers, it is rather elusive, and therefore dictionaries of any kind will afford little aid. In horology it is oftenest applied to the projecting part of the potence, though sometimes to a pallet. In other mechanisms it will vary, not so much according to the branch of industry as to the particular machine or implement. It is very often equivalent to flange in English, though sometimes applied to other projections, without much regard to exactness.—*Trans.*

aggerated play that many watchmakers think they ought to give to the pivots in their holes. In such a condition, when a watch is placed horizontally, the pivots will turn on the sides of the holes, producing the same effect as an increase in the radius of gyration of the balance; that is, a retardation. If this displacement of the pivots were regular, the retardation would also be regular. But there are many causes for the movement of the pivots in their holes, and there results an increase of the average deviation in the daily rate of the watch.

The play of the pivots should be reduced as much as possible. With holes well made and pivots treated as I have mentioned, the pivots should not have a play of more than half a hundredth of a millimeter.

Flattening Distorted Balance Springs.

A SPIRAL spring which is bent up and down in such a fashion that its restoration seems hardly possible, or at least to require great loss of time, can be easily and quickly flattened by the following process: Take a round disc of brass about 2 c. m. in diameter and about $\frac{1}{2}$ m. m. in thickness; grind it flat on one side and fit at the edge two steady-pins opposite each other. Next, drill a hole about $\frac{3}{4}$ m. m. in diameter through the center of the disc. Now make a round steel disc of the same size and thickness. Bore a hole of the same size as the brass disc, in the center

of the steel disc, and also provide two holes in such a manner as to receive with gentle friction the above mentioned steady-pins of the other disc. After the steel disc has also been ground flat, this most simple but very practical tool may be put into use. Lay the bent spring on the brass disc so that the spiral ring lies in the center hole and cover it with the steel plate, taking care that no coil is on top of another. Now, seize these two plates with the tongs and subject them with the spring to the flame of a spirit lamp. As soon as the steel plate has reached the dark blue color remove the lamp and carefully, but as quickly as possible, lift off the steel disc with the tweezers. By this method the spring is flattened perfectly and it is now easy to lay it concentric again. Before using the steel plate it must be polished off with an emery stick, so as to be able to watch the shade better.

SOME NEW BOOKS.

DEUTSCHER UHRMACHER - KALENDER FÜR 1901, BERLIN. We beg to acknowledge the receipt of the above horological calendar, which is gotten up in the usual synoptical manner characteristic of its predecessors. The contents are compiled with great care and show that the popularity the work enjoys is well deserved. It contains a mass of information which must needs be of great value to our German fellow-craftsmen, while the technical portion is of interest to all members of the profession.

THE RAMBLER'S NOTES.

WHAT THE RAMBLER SAW AND HEARD AMONG THE DEALERS IN ART POTTERY, CUT GLASS, BRONZES, ETC.

THREE NOTED ENGLISH LINES ON EXHIBIT.

THREE English art wares that will interest all jewelers having a fine art pottery trade are now exhibited in this country by John A. Service, whose temporary headquarters are Room 62 of the Astor House, New York. These lines are Royal Worcester, including the Granger Worcester, the china and jasper ware of Josiah Wedgwood & Sons, Ltd., and the fine glass ware of Thos. Webb & Sons. The Worcester lines are, as usual, beautiful and perfect specimens of the highest ceramic art. In addition to the standard ornamental pieces, the samples this year show new styles in fish and game sets, plates, cups, olive trays, A. D. coffee sets and other novelties, while the salient feature in the pottery line lies in the fact that the pieces run more into color than ever before, the ancient forms and coloring of the ware being revived and superadded, to some extent, the usual shapes and ivory tints of recent years. In Granger Worcester, in addition to the pierced pottery, is some especially fine china ware, among whose many decorations and ornamentations are some formed of massive clusters of roses, which will long be remembered by all who see it. In this ware there has been revived a line of old classical figures which, years ago, formed candlesticks but are now fitted for electric light fixtures. In the Webb glass ware displayed, special attention is called to the unusually large variety of articles of utility and to ornamental pieces now decorated in rock crystal engraving. Some beautiful effects, such as that called the Cascade, recently introduced in this ware, are shown for the first time in the American market. A full line of pieces for mounting in silver and silver gilt, offered by the manufacturers, contains many unique and attractive features, of which the gilding of the inside edge of the piece to hide the cement of the mounting, is not one.

REMARKABLE EXHIBIT OF DOULTON WARE. THE many celebrated lines of art ware made by Doulton & Co. are, this year, to be seen in a greater and richer variety than ever before, in the exhibition made by the company's American traveler, William Beach, at the Astor House, New York. So many lines and different sam-

ples are contained in the two rooms occupied for displaying these goods, that an inspection is necessary to obtain any idea of the completeness of the assortment or the artistic merits of the decorations. Of the more prominent of the many decorations are the Morrisian vases and ornamental pieces, whose decorations are on the order identified with William Morris and made popular by him. There are two subjects of decoration and two color schemes in this ware; the former being either conventional flowers or figure panels, and the latter a combination of Vandyke brown and maroon, or royal blue and white. Blue Iris ware with a light blue decoration carried to the edge of the vases which it ornaments, also stands out prominently, as do the beautiful pieces in metallic hues, the Art Nouveau decorations in soft, light shades, on plates and ornaments, and the new varieties of Holbein ware. For the new pieces of this last ware, Holbein is somewhat a misnomer, as they no longer show heads as the subject of decoration; but, instead, have pastoral scenes, though the attractive combinations of the old coloring are retained. In fine plates alone over 200 varieties are now here displayed to American buyers.

ENGLISH POTTERY AGENTS HERE.

AMONG the travelers for English pottery and china houses who now have quarters in the Astor House, New York, and who are displaying their Spring lines to their American customers, are A. F. Berridge, representing Minton's, Ltd., and Mr. Cooper, who displays the lines of Foley china.

THE RAMBLER.

Missing Art Treasures.

THERE are missing mislaid art treasures and curios to the value of about \$10,000,000, says a London paper. The other day a famous picture by Rubens, the great Flemish painter, was found in a dust-bin in Wapping, England. It had been bought previously for 60 cents, but the last owner did not think it worth even that, and the dustman removed it. It turns out to be worth \$55,000.

If one comes across a piece of old canvas with a woman's foot painted on it he should examine it, for it may be worth \$25,000. One of the finest pictures in the world—Titian's "Madonna of Lucca"—is worth at present \$80,000 and is in a famous private collection. But the picture was mutilated 80 years ago, a piece being

cut out by an enemy of the owner and hidden. The picture represents the Virgin Mary and the left foot, life sized, is missing. This foot is said to be somewhere in England and is worth \$25,000, or at the rate of \$5,000 a toe. With the foot the complete picture will be worth \$105,000, and the odd \$25,000 would be easily procured in exchange for the lost piece.

The Venus of Milo's right arm is missing. This Venus is the most famous statue in the world and stands in the Louvre, in Paris; but her right arm is somewhere. There is no price one could set on the statue itself, for \$500,000 would not buy it; but the arm would fetch \$50,000, if not more—in fact, that sum was once offered for it. The Venus has lost both arms, but the right one was discovered several years ago by a wealthy English antiquarian, who communicated with the authorities who guard the Venus. It was proved satisfactorily that the arm was the missing one and the finder was offered his own price for it. But he wanted to buy the Venus and add the arm to it; then he would lend the statue to the Louvre for an indefinite period. The authorities did not approve of this and the owner went to England in dudgeon and buried the arm no one knows where. The owner died two years ago and the \$50,000 worth of marble—no bigger than a man could carry—lies awaiting a finder.

There is a bronze figure of a "faun" somewhere, with two murders hanging over its head and a price of \$15,000 set upon it. It is about three feet high and one of its owners was murdered for refusing to sell it to a fanatical collector. The owner's heir, who inherited the statue, was killed by housebreakers, who rifled his country seat and carried off the "faun" among other things. They were unable to sell it and twice it was nearly recovered, but eventually the thieves buried it. If you find it you will realize \$15,000.

If one comes across an old sword of any kind that looks as if no human being could ever have wielded it, he should inspect the hilt to see if there are not five empty jewel settings on each side in the form of a cross. If so, it is probably the State sword of Edward II., who died a while ago, and he will easily get \$3,500 or \$4,000 for it. It is known to be in Great Britain, either in some remote dealer's shop or hanging on some smoking room wall. The empty settings used to contain 10 of the finest rubies of the times. The rubies are at large, but as they are not recognizable from other fine rubies it is little use looking for them. They were worth \$5,000 each.

(Commenced in issue of Feb. 6, 1901.)

THE MAKING OF A RING.

THE reader being acquainted with the tools and chemicals needed for the making and repairing of jewelry, we will now explain the methods employed in the making of a flat band ring which will illustrate many points in jewelry making.

The first thing to be considered is the gold. If old gold is used, we generally take gold of the karat desired, but when all the old gold is of a lower karat, we must add a certain amount of pure gold to raise the old gold to the fineness desired. For instance, suppose we have a lot of 8k. spectacle frames which we desire to make up into 14k. rings. The gold spectacle frames must be thoroughly cleaned and all solder, rivets and screws removed, and then the gold is accurately weighed and the result noted; suppose it weighs 12 dwts. Then, by using the numeral 20 as a multiplier—which will always be constant

because it represents the number of penny-weights in an ounce—we determine the amount of fine gold to be added by the following example:

$$\begin{aligned} 20 \times 14 &= 280 \\ 20 \times 8 &= 160 \\ 280 - 160 &= 120 \\ 120 \div 10 &= 12. \end{aligned}$$

Therefore, it is seen that to every ounce of 8k. gold must be added 12 dwts. of fine gold to raise it to 14k. Thus, in the example above cited, 7 1-5 dwts. of fine gold must be added to the 12 dwts. of 8k. gold to raise it to 14k.

The divisor, 10, of the example is the difference between the quality to be made and 24, which represents the number of karats; thus we see that the divisor will always represent the difference between the quality as improved by the addition of fine gold and 24.

If new gold or coin is used it must be reduced to the karat desired by adding to it copper and silver instead of fine gold, as in the former case. Suppose it is desired to reduce 12 dwts. of coin—which is nearly 22k. fine; 21 3-5 to be exact—to 14k. By using the number 20 as a multiplier, we find that

$$\begin{aligned} 20 \times 22 &= 440 \\ 20 \times 14 &= 280 \\ 440 - 280 &= 160 \\ 160 \div 14 &= 11 \text{ } 3\text{-}7. \end{aligned}$$

Therefore, we find that to every ounce of coin must be added 11 3-7 dwts. of silver and copper in order to reduce it to 14k. gold.

In this case we desired to reduce 12 dwts. of coin and the amount of alloy to be added would be 6 6-7 dwts.

In reducing gold it will be noticed that the divisor always must be the karat of gold reduced.

The gold and required alloys being made ready, we proceed with the melting. This may be done in crucibles when there is a forge in the shop, but in many places the workman has nothing but his lamp, blow-pipe and a piece of charcoal. Before placing the gold and alloys in the crucible, the latter should be rubbed well on the inside with charcoal to prevent the borax—which is used as a flux—and the gold from adhering to the sides and bottom. Then the crucible containing the metal is placed in the forge and the fire is started. The fuel generally used is gas, which is blown with great force by a blower connected with the forge. In some places charcoal forges are still used for melting purposes.

While the gold is melting, adjust the ingot mould to the width desired, and after slightly oiling it, place it near the forge to become heated just so the hand can touch it and not be burned. Then when the gold is thoroughly melted, which is known when it becomes perfectly clear on the top, it should be stirred well to mix the several alloys and then, while removing the crucible from the fire, a small piece of beeswax should be dropped onto the molten mass. This will exclude air and prevent oxidation.

(To be continued.)

The store of John R. Lyons, Jackson, Tenn., who handled clocks among other goods, was recently damaged by fire to the extent of \$1,500.

THE RENAISSANCE STYLE IN SILVER WARE DESIGNING.

THE famous solid silver Woodlawn Vase, which has recently been purchased by the Westchester Racing Association and will be raced for at the Autumn meeting at Morris Park, is again brought to notice by this change of ownership. The vase, one of the oldest sporting trophies in the United States, is now being repaired by Tiffany & Co. to make good some slight damages caused by its eventful history of over 30 years. This vase was made by Tiffany & Co. for R. A. Alexander, of Woodburn, Ky., in 1860. It was presented to the Woodlawn Association, of Louisville, Ky., to be run for at their Spring and Autumn meetings at four miles and to be won three times successively before becoming the property of the winner. The vase is one of the earliest and most costly turf trophies made in this country. In general style it is of the renaissance order and of pleasing proportions, standing 33½ inches high and weighing 348.6 ounces. The central part of the bowl contains four noble, full length figures of Victory, exquisitely modeled, with hands extended above the heads clasping laurel wreaths to be placed upon the winners. In the intervening spaces between the figures on the body of the vase are large shields containing the following: One, a fine engraving of a horse, the first winner of the cup; another, a picture of the finish of the race in front of the grand stand, and the judges' booth. The two other panels are blank, having been reserved for inscriptions. The vase is surmounted by a figure of a jockey on his mount, both superb examples of modeling. On a tier below are a succession of panels containing alternately ornamentation and seven bust portraits of officials of the Southern Racing Association who were interested in the cup. Below the body of the

cup is another tier of decorations of inlaced strap work and bosses. Forming the base

stud farm, from the skittish foal to the full grown sire and dam. Above these are two silver placards on which are engraved the following conditions and rules governing the contest for the vase:

THE WOODLAWN CHALLENGE VASE.

1st. The entrance for starting for the vase shall be \$300, play or pay. The race to be a dash of four miles (weight for age) and to be run for on the Saturday previous to the regular meeting. Those challenging in the Fall are to run in the Spring, and those challenging in the Spring are to run in the Fall.

2d. The racer shall enclose his name with good security for the subscription, and place the same in the entry box of the secretary, which will be left at the Galt House on the Saturday previous to the regular Fall and Spring meetings. The paper shall state that the subscriber challenges for the vase, and will name at the post.

3d. It shall be the duty of the secretary to draw out the entries on the Saturday following, record them in his book and have them published in the daily bulletin of that race week.

4th. The party winning the vase shall be entitled to the money, but must give bond to the amount of \$1,500 for the delivery of the vase to the secretary, to be run for at the next meeting.

5th. Anyone winning this vase three times shall be released from the bond, and can claim the vase as his property.

6th. Should there be no challenges for the vase after it is once won, the party then holding it shall be considered as the winner that season.

Four square abutments serve as feet to the vase, and these are decorated with horseshoes, saddles and other paraphernalia brought out in bold relief. During the history of the Woodlawn Vase it has been from Kentucky to San Francisco and to New York. During the Civil War it was buried for safety. At one time financial difficulties of the association then holding it came near causing its sale. The vase is valued at \$1,000. It has been raced for some 20 times, but has never been won the necessary three times by one party. The vase is a fine example of old style trophy designing and ornamentation.

to the vase, in raised figures, is a representation of horse-life on Mr. Alexander's

Theodore W. Foster & Bro. Co.

Effect of Death of the Queen Upon the Jewelry Trades.

LONDON, Eng., Feb. 10.

It is too early to estimate the full effect of the Queen's death upon the jewelry and allied trades, but some idea of its tendency may be gathered. The question does not merely relate to British manufactures, but has considerable importance as regards foreign import trade. The event is of unprecedented dimensions, the only calamity even remotely analogous being the death of the Prince Consort, in 1861. The term fixed for "official" mourning is based upon the precedent of the rules promulgated at the death of William IV. General mourning (as distinguished from "court" mourning) has been reduced to full mourning until March 6, followed by half mourning until April 17. This announcement has met with general approval. The general public are also enjoined to wear "the deepest mourning." It is usually understood that the general mourning is to last for about half the period assigned to the court. The immense expense involved will, of course, divert funds which would otherwise be available for the customary luxuries, and in many ways affect the actual necessities of the poorer classes. Added to this the stagnation of the many trades dependent upon the social pleasures of the well-to-do classes will cause distress among the employes; only a few favored trades, mainly the textile, will derive any benefit.

The official order for court mourning is as follows:

LORD CHAMBERLAIN'S OFFICE, Jan. 24.

Orders for the Court to go into mourning for her late Most Gracious Majesty Queen Victoria, of blessed memory, viz.: The ladies to wear black dresses trimmed with crape, and black shoes and gloves, black fans, feathers and ornaments; the gentlemen to wear black Court dress with black swords and buckles. The mourning to commence from the date of this order. The Court to change the mourning on Wednesday, July 24 next, viz.: The ladies to wear black dresses with colored ribbons, flowers, feathers and ornaments, or gray or white dresses with black ribbons, flowers, feathers and ornaments. The gentlemen to continue the same mourning, and on Friday, Jan. 24 next, the Court to go out of mourning.

As regards jewelry, the customary formula on such occasions is abandoned. It was usual in all recent precedents to allow "pearls, diamonds and plain gold and silver ornaments." The phraseology of the present order is copied with slight variations from that on the death of the Prince Consort with the important exception that during the second period (half or semi-mourning, as it called) the words as to pearls, etc., quoted above, were inserted. The difference is very marked and it is possible a subsequent notice may be issued rectifying the omission. When mourning garb was more strictly confined to black attire no jewelry, properly so called, was worn. Pearls were first admitted and later on diamonds were allowed even in the early or "full" mourning stage. Later on colored gems, such as rubies, amethysts and opals, were not considered out of place in "half mourning." Jet is, of course, at all times permissible, and in later years black enamel ornaments have been in vogue.

The jewelry trade hardly knows yet how far to go and, as a consequence, nothing has

been done beyond filling up stocks of jet goods, black enamel ornaments and the more modern oxidized and "gun metal" wares. Jet ornaments, brooches mostly; earrings perhaps; bracelets, pins and so forth will have a great sale among poorer customers and a limited vogue in wealthier circles; but these hardly come within the province of jewelry. Black enamel offers a wider scope for workers in the precious metals, but gun metal and oxidized goods are principally of foreign make. Without some mitigation of the official orders it is difficult to see how the jewelers can keep their workmen going. Watch chains of gold alternated with black steel are being shown for men's wear, and studs, links and scarf pins will be in demand. The old fashioned jet alberts and silk with gold bands are also being put into the show cases, but it is difficult to imagine a revival of their popularity. Souvenir portraits and badges will find plenty of customers, but it is probable most of these will be imported, although Birmingham will, doubtless, do what it can to supply the demand. High class jewelry is at present out of the running, but any cheap, effective ornaments coming within the limits of "mourning" will find a ready market from whatever quarter they come.

EARLY SPRING FASHIONS.

A LADY'S RAMBLES AMONG THE JEWELERS.

Mitts, according to the best forecasters of fashion, will be in vogue the coming Summer. Rings have always been an accompaniment of this very feminine accessory and the opportunity for an increased use of finger ornaments in street dress is one sure to be improved.

The velvet day gown is the swell confection of early Spring and in black or deep rich tones of color it affords an unequaled background, as women have quickly perceived, for the handsome display of gold and jewels in the guise of the chain with its many and diverse attachments, the chatelaine bag or purse, the watch fob and the fashionable ferrets.

Exceedingly intricate work is lavished on the finer kinds of parasol handles in gold and silver, transparent enamels and gems which are now shown for the approaching season. These are, perhaps, works of art for the connoisseur rather than striking fashionable ornaments. For bolder effects carved and burnt ivory with gold bands and ornaments, silver gilt with adornment of large semi-precious stones, rock crystal and elaborately embossed silver in various shades of gray find favor.

Elegant santoirs are composed of enameled and pierced gold links set with diamonds, emeralds, sapphires, rubies and pearls.

The finest platinum links, making hardly more than an invisible thread, are used for the neck chain that supports pendants or costly ornaments of large diamonds, rubies, emeralds, singular baroque pearls, etc.

Pear shapes are popular in jewels. A pendant of turquoise matrix in this shape has no added ornament other than a little "cup" of brilliants into which it is set. This pendant interests also by its unusual markings, which are of a brown that is almost golden.

Gold beads, coral beads, opal beads and imitation pearls in necklets and chains all figure extensively in the every-day costume.

Coral is more than ever worn. It is now prominent in sleeve links and studs.

Odd or cross-matched stones are a late wrinkle in cuff links.

The "Egyptian" phase of the "new art" seems the one most largely exploited; it finds a congenial field in brooches, watches, pendants.

The scarab has become almost as ubiquitous as the serpent. It grows bigger and bigger and is by no means confined, as at first, to seals and rings, but is found in sleeve links, pendants, brooches, purse tops, umbrella handles and various other situations.

The Jewelers' Circular Publishing Co.

The Diamond Markets.

ANTWERP, Feb. 22.—The tendency has been very quiet this week; first, because it has been Carnival week, and, second, because the weather has been bad, snow falling every day. Toward the end of the week it was a little better and business was done here and there. There is always a good demand for roses, but rough in this quality is very scarce. Lots are sold as soon as finished.

Mr. Goldsmith, an American buyer, arrived here last week and left Tuesday, the 19th inst. He bought several lots of mêlées, two and three grains, fine white goods, and paid normal prices.

J. B. H. Simons, 44 Coburg St., an esteemed diamond polisher, died Feb. 16. He was 41 years old.

The old diamond factory of Mr. Van Emden has been sold to a syndicate of 10 polishers for 38,000 francs. Some years ago this establishment was valued at 120,000 francs.

AMSTERDAM, Feb. 21.—There is no improvement in our polished goods market. The tone remains quiet. We have, however, good reports from America and from all other parts of the world, so that we may expect an early return of good times.

Mr. Pam, of Pam & Co., Paris, bought, last week, several lots of fine brilliants and roses.

Rough remains scarce and high. One important lot of second grade, called Wesselton, three grains, was taken for American dealers at 435 francs per karat.

LONDON, Feb. 21.—The rough market is much better, while the polished goods remain unchanged. American buyers are awaited here and the dealers are hoping to do a large business with them. Prospects are quite good for a nice business in the future. The sorting of rough diamonds is better than before and prices remain the same, so that the polished stones will be worth certainly five francs more per karat.

There is an inquiry for pearls and fancy colored stones, the prices of which are always rather high.

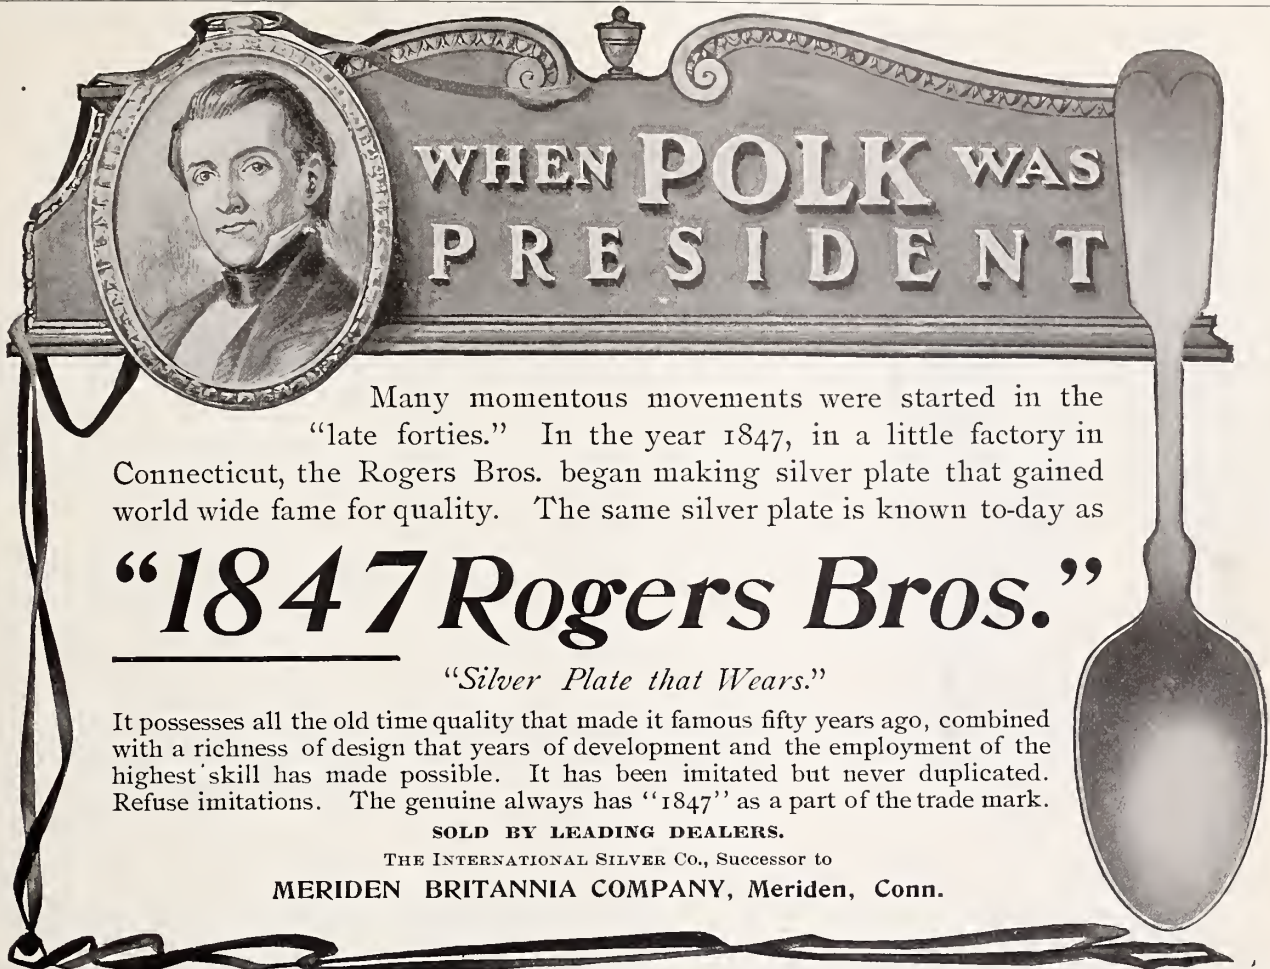

A brilliant weighing 20 karats has been found in the diamond mines of New Jagersfontein by a miner. The stone has not yet been estimated. It has a blue-white color and seems to be very clear.

PARIS, Feb. 22.—The Paris gem market is very quiet, partly on account of the Carnival. A good demand for coarse goods rules here for the moment, but the stock in that quality is very small.

Mr. Pam, of Pam & Co., Paris, returned after visiting the markets of Antwerp and Amsterdam. He bought largely for his house.

The tendency regarding pearls and emeralds remains steady. No weakness is to be expected and prices are bound to rise in the future.

B. W. Robinson, jeweler and optician, Worcester, N. Y., has decided to move his stock of goods and family to Winchendon, Mass., where he will engage in the same line of business.

WHEN POLK WAS PRESIDENT

Many momentous movements were started in the "late forties." In the year 1847, in a little factory in Connecticut, the Rogers Bros. began making silver plate that gained world wide fame for quality. The same silver plate is known to-day as

"1847 Rogers Bros."

"Silver Plate that Wears."

It possesses all the old time quality that made it famous fifty years ago, combined with a richness of design that years of development and the employment of the highest skill has made possible. It has been imitated but never duplicated. Refuse imitations. The genuine always has "1847" as a part of the trade mark.

The Voluntary Petition in Bankruptcy of McDuffie & Heath.

ATLANTA, Ga., March 4.—A petition in voluntary bankruptcy was filed on the afternoon of March 1, by W. B. McDuffie and A. T. Heath, Jr., partners under the firm name of McDuffie & Heath, who have been conducting a jewelry business at 72 Whitehall St. The debts of the firm are placed at \$3,562.68, with assets of \$2,868.99.

W. J. Johnston Co., Pittsburgh, Pa., are mentioned as the largest creditors, the amount of the firm's indebtedness to them being in the neighborhood of \$1,500. The only Atlanta creditors are the Neal Loan & Banking Co., A. L. Delkin, Joseph Irons and several of the Atlanta newspapers, to all of whom they are indebted for small amounts. Judge Newman appointed A. L. Waldo receiver for the firm, his bond being fixed at \$2,000.

McDuffie & Heath, who succeeded A. L. Delkin in the jewelry business, several years ago, have made many friends since coming to Atlanta. They are highly regarded among the jewelers of this city, all of whom express the hope that their embarrassment will be temporary and that they will soon be on their feet again.

Mr. Fellows Finds Much Lost Property, but Gets Little Than is.

BANGOR, Me., March 9.—W. H. Fellows, a jeweler of this city, is acquiring a reputation as a discoverer of lost goods. His record up to date is \$1,765.34, and such things as a couple of satchels, sev-

eral bunches of keys and handfuls of jack-knives are not counted. His first find was a two dollar bill. Two days afterward he stumbled onto a wallet containing \$15. Three days later he picked up another purse which had \$52 in it. The biggest find in all was an endorsed check issued by a Bangor firm for \$1,695.19, which he found blowing about the streets. The check had been lost while the clerk was taking it to the bank and had not been missed up to the time Mr. Fellows appeared to restore it to the owners.

Mr. Fellows says that sometimes people thank him for returning their property, but some of them do not seem to appreciate honesty or anything else, and take the lost goods as a matter of course. When he returned the check the owners just looked at him and smiled, and didn't even say "Thank you."

Jeweler A. W. Dodd, Not His Brother, Dr. W. E. Dodd, Thought Missing.

BURTE, Mon., March 1.—The friends of Dr. W. E. Dodd, oculist, are satisfied that he was not a passenger on board the wrecked steamer *Rio Janeiro*, and are inclined to believe that the man by that name who is among the missing is A. W. Dodd, a young jeweler of this city and brother of the oculist. A. W. Dodd was employed with a local jewelry firm, a member of which concern received a letter from him recently in which he stated that he would leave for the United States Feb. 12. He said nothing about the return of his brother, Dr. Dodd.

THE "ANJOU"

"1835-R.WALLACE"

Stamped on an article of Silver-plated ware is a guarantee of worth and quality. Every dealer, when selecting a line of plated ware, always has in mind two leading qualities, and these usually are durability and design, as these are the ones on which most depends his reputation as a dealer in honest ware. Our goods are made of the highest grade of Nickel Silver, plated with FINE Silver. Our extra, or A 1 grade, is plated 20 per cent. heavier than the regular standard. Triple and sectional plates are also carried in stock. In designing patterns we endeavor to select only such as are graceful in outline and thoroughly artistic in decoration, and which conform most closely to the taste of a discriminating purchaser, which our long experience enables us to do. Our line consists of the following patterns: Tipped, Fiddle, Windsor, Shell, Joan, Virginia, Astoria, Stuart and Anjou. Any dealer who is not already familiar with our line will find it much to his advantage to write for Catalogue and discounts.

BUSINESS METHODS: *DIRECT and INDIRECT*

How and where a manufacturer shall market his wares is a question for him to settle as he sees fit.

If, however, he says that he deals with the *legitimate* JEWELRY TRADE *only*, and yet sells *on the quiet* to the Dry Goods stores, the fact should be made known.

Selling "*exclusively*" to the Jewelers in one city while supplying the Dry Goods Stores in others near by, is not carrying out the letter of the law of honorable dealing.

Such practices, in justice to the houses that do their business right, should be exposed.

The Trade knows another type of manufacturer; the one whose sales to the Trade have not come up to expectations (there have evidently been several such during the past few seasons), and who therefore unloads on the Dry Goods Stores. The next season he has reformed and sells to the Trade only.

But his wares have been made known to the public through the bargain sale announcements and identified with the Dry Goods trade.

People of taste and refinement who naturally look to the Jeweler for the best fashions in SILVERWARE, will hardly care to buy a WEDDING PRESENT or other Gift that bears the trade-mark of a last season's BARGAIN SALE.

As a matter of fact, these "bargain" prices are nearly always actually higher than those charged by the legitimate trade.

These are commonplaces of our business, may be, but they are, too, very strong factors in its success and growth.

There are Silversmiths enough, whose business is with the Trade only, to afford a healthy competition, and whose reputations are valued too highly to risk them in such devious ways.

Why not buy of them? You pay no more for their wares and *you know* that they will have the distinction of *exclusiveness*.

Buyers of taste value this first.

Tariff for the Philippines.

Tariff Recommended by the Commission, but Susceptible to Change Up to April 15.

WASHINGTON, D. C., March 5.—The proposed customs tariff for ports of the Philippine Archipelago, as recommended by the Commission appointed for the purpose and with reference to which the War Department will be pleased to receive recommendations and suggestions up to April 15 next, contains the following provisions:

Articles not enumerated in the tariff shall, for the application of duty, be assimilated to those which they most closely resemble, and shall, in the first instance, be so classified by the Collector of the port of entry into which the articles are brought.

When an article presented for customs clearance is not included in the tariff, and when doubts arise as to its assimilation, the interested party or the importer may request the Collector at the port of entry to indicate the number according to which such article is dutiable, and clearance shall be effected in accordance therewith.

When articles are composed of two or more materials or of different parts, the duty for total weight shall be taxed upon component material of chief value.

Common packing, packages, receptacles and coverings of imported merchandise in use and imported with such merchandise, unless otherwise expressly provided for, shall be admitted free of duty; if any articles so used are in fact imported as merchandise and have an appreciable value, full duty is to be collected on same; and whenever such articles are of higher value than their contents they are always dutiable according to the number of the tariff to which they belong.

Gross weight includes all coverings of whatever nature, without any allowance for tare.

Net weight is the weight of the articles exclusive of any and all covering.

When the same package contains two or more articles dutiable on gross weight and paying different rates of duty, the article most highly taxed shall be dutiable together with all its separate packing and with the weight of all exterior packages. The other articles shall be dutiable separately.

The proposed rates of duty are as follows:

Adornments for personal use:

- Of amber, \$3.50 per kilo, net weight.
- Of bone, \$1.50 per kilo, net weight.
- Of celluloid, \$1.50 per kilo, net weight.
- Of coral, \$3.50 per kilo, net weight.
- Of horn, \$1.50 per kilo, net weight.
- Of ivory, jet, mother-of-pearl or of tortoise shell, \$3.50 per kilo, net weight.
- Of imitations of any of the above, \$1.50 per kilo, net weight.
- Agates, 30c per karat, net weight.
- Alarm clocks, 25c. each.
- Amber, unwrought, \$1 per kilo, net weight.
- Wrought, \$3.50 per kilo, net weight.

- Imitations of, unwrought, 60c. per kilo, net weight.
- Imitations of, wrought, \$1.50 per kilo, net weight.
- Amethysts, 30c. per karat.
- Bisque, 25c. per kilo, net weight.
- Cases for clocks, dutiable as manufactured articles according to their component material of chief value.
- Chronometers, in cases or boxes, for marine or professional use, too large to be carried on the person, \$7 each.
- Clocks, common, with weights and springs, 25c. each.
- Tower, whether set up or not, \$12.50 each.
- Wall, works for, finished, 50c. each.
- Coins, of gold or silver, free.
- Combs, of tortoise shell or ivory, \$5 per kilo, net weight.
- Coral, unwrought, \$1 per kilo, net weight.
- Wrought, \$3.50 per kilo, net weight.
- Coral, imitation, unwrought, 60c. per kilo, net weight.
- Wrought, \$1.50 per kilo, net weight.
- Crystal and glass imitations:
- Artificial eyes, \$2.50 per kilo, net weight.
- Cut glass, articles of, \$20 per 100 kilos, net weight.
- Decanters of crystal, \$7 per 100 kilos, net weight.
- Dials for watches, \$5 per hectogram, net weight.
- Diamonds, in the rough, unmounted, free.
- Unset, \$1 per karat, net weight.
- Douhlets, unset, 12c. per karat, net weight.
- In gold jewelry, \$17.50 per hectogram, net weight.
- In silver jewelry, \$8 per hectogram, net weight.
- Enamel, glass and crystal, \$2.50 per kilo, net weight.
- Eyeglasses, glass for, \$2.50 per kilo, net weight.
- Fans, of tortoise shell, ivory or mother-of-pearl, \$5 per kilo, net weight.
- Of kid, silk tissue or feathers, \$5 per kilo, net weight.
- Flasks, of crystal, or imitation, if cut, \$20 per 100 kilos, net weight.
- Of crystal, or imitation, in engraved, \$15 per 100 kilos, net weight.
- Of crystal, or imitation, for toilet purposes, 25c. per kilo, net weight.
- Forks, of gold, \$3 per hectogram, net weight.
- Of gold, plated, \$2 per kilo, net weight.
- Of silver, 80c. per hectogram, net weight.
- Of silver, plated, \$2 per kilo, net weight.
- Goggles, set in gold, \$3 per hectogram, net weight.
- Set in silver, 80c. per hectogram, net weight.
- Set in other materials, \$2.50 per kilo, net weight.
- Ivory, unwrought, \$1 per kilo, net weight.
- Wrought, \$3.50 per kilo, net weight.
- Jet, unwrought, \$1 per kilo, net weight.
- Wrought, \$3.50 per kilo, net weight.
- Imitations, unwrought, 60c.; wrought, \$1.50 per kilo, net weight.
- Jewelry, gold and platinum or alloys thereof, \$12.50 per hectogram, net weight.
- Same, set with pearls or precious stones, \$25 per hectogram, net weight.
- Same, set with doublets, imitation precious stones or imitation pearls, \$17.50 per hectogram, net weight.
- Of silver, not set, \$3 per hectogram, net weight.
- Same, set with pearls or precious stones, \$15.50 per hectogram, net weight.

- Same, set with doublets, imitation precious stones or imitation pearls, \$8 per hectogram, net weight.
- Gold and silver plated, \$2.40 per kilo, net weight.
- Lenses for spectacles or eyeglasses, \$2.50 per kilo, net weight.
- Mother-of-pearl, unwrought, \$1 per kilo, net weight.
- Wrought, \$3.50 per kilo, net weight.
- Imitations, 60c., unwrought; \$1.50, wrought, per kilo, net weight.
- Opals, 30c. per karat, net weight.
- Pearls, unset, 40c. per karat, net weight.
- Seed pearls, 10c. per karat, net weight.
- Imitations, 5c. per hectogram, net weight.
- Pens, gold, \$3 per hectogram, net weight.
- Precious stones, in the rough, unmounted, free.
- Cut, not mounted, \$1 per karat, net weight.
- Mounted in gold jewelry, etc., \$25 per hectogram, net weight.

- Watch movements, detached parts and dials, \$5 per hectogram, net weight.
- Watches, common, with common movements, not jeweled, 25c. each.

Receiver Appointed for the Oneida Silverware Mfg. Co.

ONEIDA, N. Y., March 8.—Before Supreme Court Justice Lyon, at Binghamton, Tuesday, S. W. Cooley, of Oneida, asked for the appointment of a receiver for the Oneida Silverware Mfg. Co., Ltd. of this city. The company have been engaged in manufacturing silver ware, and the assets, largely in specially constructed spoons, unused metal, etc., amount to about \$42,000. The liabilities are \$16,000. Charles A. Stringer, of Munnsville, N. Y., who has been connected with the works, was appointed receiver, and Robert J. Fish, of Oneida, referee in the case.

The appointment of a receiver for the company grew out of a misunderstanding among the stockholders and this misunderstanding will probably be adjusted within a short time and then the business will go on as before. It is claimed that the company are financially sound and have always made money since their organization in 1894.

Supposed Clue to the Men Who Robbed Burt Ramsay & Co.

CLEVELAND, O., March 7.—R. C. Lamont, under arrest in Cincinnati, is alleged to be possessed of information which the Cleveland police are anxious to obtain. It is alleged that he is familiar with the details of the diamond robbery of Burt Ramsay & Co., Cleveland. The charge upon which Lamont was locked up in Cincinnati is loitering.

The Burt Ramsay & Co. robbery occurred on the evening of Oct. 10, last year, and diamonds valued at \$1,500 were stolen from the store in the Colonial Arcade.

H. J. Chatman, Cohoes, N. Y., has moved from 172 to 52 Remsen St.

The Giant of Collar Buttons

IN QUALITY,
IN SALES.

One Million Five Hundred Thousand Kremenz One-Piece Collar Buttons made and sold within the last year.

WHY?

Because of their HIGHEST QUALITY, BEST CONSTRUCTION, GIVING THE MOST WEAR, AND GREATEST COMFORT and their IRON-CLAD GUARANTEE.

To verify this we invite the trade to read "The Story of a Collar Button, with Illustrations," which may be had FREE for the asking, and to try the experiment suggested on page 5 of that booklet.

Extract from "Printers' Ink," Nov. 23, 1898.

The Little Schoolmaster now suggests, to every pupil in his class, to send a two-cent stamp to Kremenz & Co., 49 Chestnut Street, Newark, N. J., and ask to be favored with a copy of their leaflet, "The Story of a Collar Button." Afterward, if any pupil will send to *Printers' Ink* another leaflet, new or old, that is half as good as this one, or that approaches it in excellence, the deserving student will be rewarded with one of *Printers' Ink's* souvenir spoons as an acknowledgment of his discovery and contribution. "The Story of a Collar Button" is the best piece of advertisement construction that has come to *Printers' Ink's* attention in the year of our Lord 1898.

Should you wish to utilize this booklet to increase your collar button business, we will, on receipt of your order, print your card upon and send you a quantity of them.

Kremenz One-Piece Collar Buttons are stamped as follows, ON BACKS:

Patent sustained by United States Supreme Court.

Quality and Construction have made our reputation.

All Kremenz Collar Buttons are Manufactured by

KREMENTZ & CO.,

in their Factory,

49 Chestnut Street,

PARKS BROS. & ROGERS,

Consolidation Not Yet.

Committee of Manufacturing Jewelers' Board of Trade Report.

PROVIDENCE, R. I., March 9.—The committee appointed some time ago by the Manufacturing Jewelers' Board of Trade, this city, to confer with a similar committee from the Jewelers' Association and Board of Trade, New York, in regard to the proposed consolidation of the two organizations, have made their report to the directors of the local Board.

It will be remembered that the two committees met in this city on Dec. 15, when the representatives of the Jewelers' Association and Board of Trade explained at some length the regulations and methods according to which their association were conducted and presented arguments for the suggested consolidation. The local committee simply carried out the instructions of the body by which they were appointed and listened. It was not expected at the time that the committee would be ready to report at the annual meeting of the Board, which occurred on the following week, but the matter has been thoroughly discussed since then, and it was thought likely that the committee might report at the January meeting of the board of directors. Members of the committee have been absent from the city, however, and the report has now only recently been made.

The committee's report was quite brief, being in substance to the effect that they saw no reason why the Manufacturing

Jewelers' Board of Trade should take steps toward joining forces at this time with the Jewelers' Association and Board of Trade. That was about all there was to it. The sense of the report was, in brief, this: Realizing, after careful consideration of the matter, that there was no way in which the Board could enact legislation, under its charter and constitution, so as to consolidate with any other body, and that the only procedure by which a combination could be effected would be by the members voting to dissolve the local Board and end their corporate existence, with the agreement or understanding that all the members join the Jewelers' Association and Board of Trade, the committee did not deem it advisable to recommend that such action be taken.

Members of the committee and a large proportion of the Providence Board are quite willing to admit that there would be economy, increased power and influence and numerous other advantages if the two organizations were to work together, employing the same counsel, for instance, in cases in which members were concerned. It is even hinted that some such arrangement may be proposed and accomplished at some time in the future. But a majority of the members of the Manufacturing Jewelers' Board of Trade are not ready to vote to end the existence of their organization.

D. W. Smith, of Pipestone, Minn., has let the contract for a new line of furniture and fixtures and claims he will have the finest store in that part of the country.

GUARANTEED FOR TWENTY-FIVE YEARS.

THE NEW STYLES OF

CROWN 14k. FILLED

Cases represent a distinct improvement in shape, ornamentation and general finish over any previously shown. The quality is the same that has, in thousands of instances, withstood over a quarter of a century of wear. The Crown trade-mark means proved merit.

THE NEW STYLES OF

LION 10k. FILLED

Cases will still further prove their claim to be "first in style and worth" in the 10k. grade. The patterns are in great variety and equal those on the highest-priced gold cases. Most jewelers consider these cases the best selling and most profitable to handle of all watch cases.

GUARANTEED FOR TWENTY YEARS.

FOR SALE BY ALL LEADING JOBBERS.

To More Accurately Estimate Production of Gold and Silver.

WASHINGTON, D. C., March 9.—To more accurately determine the production of gold and silver and the amounts of each used in coinage and in the arts, the Secretary of the Treasury has, in addition to the circulars sent out to jewelers and gold and silver workers, issued the following new order to the customs officers of the various ports:

TREASURY DEPARTMENT, March 1, 1901.

To Collectors and other officers of the Customs:

In estimating the product of gold and silver in the United States and showing the disposition thereof, it is absolutely necessary that the Director of the Mint should know what amount and value of gold and silver has been imported and exported bearing the stamp of a United States mint or assay office, and that such bullion be separately stated from "Other bullion." You are, therefore, instructed to show in your monthly returns to the Bureau of Statistics hereafter, rendered on Forms 1a and 8a, imports and exports of gold and silver bullion subdivided as follows:

Bullion refined—

U. S. mint or assay office

barsozs. fine, and value.

Other bullionozs. fine, and value.

Until a new edition of blanks, Forms 1a and 8a, can be printed, you are directed to adapt the blanks you have to the requirements of this circular by inserting in ink the classes required, as shown in the inclosed examples.

You are also directed to report to the Bureau of Statistics the imports and exports of gold and silver bars into and from your port during the calendar year 1900 and January and February last, showing the values and ounces, fine, of the two kinds of bars above indicated, respectively.

L. J. GAGE,
Secretary.

The Passing of the Old Clockmakers.

BRISTOL, Conn., March 8.—Walter Bulkley, one of the last of Bristol's original clockmakers, died at his home, in Forestville, Tuesday night, March 5, after an illness of several months. He had suffered with dropsy and finally the disease assumed an aggravated form so that his death had been expected for a long time.

Mr. Bulkley was born in Forestville, in a house on the Stafford road, 72 years ago, and had practically lived in that village all his life. As a young man he worked in the old Boardman clock shop. Later he went to Winsted and was connected with the Gilbert Clock Co. for some years. He was a brother-in-law of ex-Senator Elisha N. Welch, of Forestville, the clock manufacturer, and when the latter founded his great clock industry in that village Mr. Bulkley became connected with the establishment. He was with the Welch company the greater portion of his life and only left their employ a short time ago. Mr. Bulkley was a gentleman of the old school, was cordial but dignified, and had always been recognized as one of the first citizens of Forestville. He was a musician of considerable ability. The deceased was never married, had a rather retiring disposition, and was never concerned in public life to any extent. He is one of the last of the old-time clockmakers that made Bristol a celebrated clock center.

One of his sisters, as remarked above, married Elisha N. Welch, and the only near relatives that he had at the time of his death were J. Hart Welch, president of the E. N. Welch Mfg. Co., and his two sisters, Mrs. H. Drusilla Mitchell and Mrs. Helen Atkins McKay.

Solomon Bros. & Gross File a Voluntary Petition in Bankruptcy.

A voluntary petition in bankruptcy was filed Monday in the United States District Court, New York, by Felix H. Levy, on behalf of Solomon Bros. & Gross, formerly jobbers in jewelry and novelties, 605 Broadway. The petition is signed by Eli Solomon who has been conducting the business alone, as his partner, S. Richard Gross, has withdrawn and is now traveling in the south for a jewelry house. The schedules filed with the petition show the firm's liabilities to be \$28,852.51 and their assets to be worth \$27,259.87. The liabilities are to about 200 creditors, principally for small amounts, while the assets include stock, \$19,467; fixtures, \$2,209; open accounts, \$2,833, and moneys on deposit, \$2,748.

As recently told in these columns, negotiations for a compromise with the creditors have been on for some time and the firm's offer to settle at 50 per cent. was accepted by nearly all the creditors. On account, however, of the great number of creditors for small amounts, it was found impracticable to carry out the plan, so, by agreement with their creditors and as the best means of arriving at an adjustment of their affairs, it was decided to file a voluntary petition in bankruptcy. It is believed that a speedy adjustment of the affairs of the firm will be made. Among the creditors whose claims amount to \$100 or more are:

American Enamel Co., \$541; Attleboro Mfg. Co., \$2,096; Arlington Mfg. Co., \$436; William Bens, \$1,488; B. A. Ballou & Co., \$102; E. F. Blackinton & Co., \$125; Bristol Mfg. Co., \$355; Bernheim, Cohen & Beer, \$202; Cory & Reynolds, \$132; P. J. Cummings & Co., \$118; F. M. & J. L. Cobb, \$227; Daggett & Clap Co., \$390; Daggett Jewelry Co., \$500; J. M. Fraser & Co., \$156; Falls Mfg. Co., \$149; Fostoria Glass Co., \$178; S. K. Grover & Co., \$227; George H. Holmes & Co., \$118; E. Huebner & Sons, \$408; Havel Mfg. Co., \$236; N. N. Hill Brass Co., \$138; J. T. Inman & Co., \$1,024; Krusius Bros., \$294; Lenzen & Ruckert, \$242; McDonald & Culver, \$185; Mossberg Wrench Co., \$242; Marble, Smith & Forrester, \$814; William Nerney & Co., \$3,891; Ostby & Barton Co., \$223; Parks Bros. & Rogers, \$114; D. S. Spaulding, \$126; Siberstein, Hecht & Co., \$542; F. Sprouer & Son, \$100; Selwyn Imp't'g & Trading Co., \$147; Regnell, Bigney & Co., \$197; Schofield, Batten & Co., \$132; Smitz, Moore & Co., \$804; F. W. Weaver & Co., \$154; G. K. Webster, \$1,374; Waters & Co., \$265; J. Wodiska, \$147; A. L. Sonn & Co., \$154; S. Valfer & Co., \$104; rent, \$287. There is also a contingent liability of \$3,000 on notes which ought to be paid by others.

Mr. Gross arrived in New York, Monday, after the petition had been filed, and has joined in the petition of his partner.

Jewelers' Gold Bars Withdrawn and Exchanged.

Death of John M. Bogle.

PROVIDENCE, R. I., March 8.—John M. Bogle, master mechanic at the works of the Gorham Mfg. Co., Elmwood, this city, died suddenly from heart disease yesterday forenoon. Mr. Bogle had returned

THE LATE JOHN M. BOGLE.

yesterday morning from New York, in company with Louis Demmert, who is connected with the Gorham Mfg. Co.'s office in that city. Together they started from the New York boat for the works at

Elmwood, in an automobile which they had brought with them from New York. Mr. Bogle was in the act of putting on the chain which had been displaced at the rear of the vehicle when he died. The body was carried to the office of a physician nearby and superintendent Fred Lawton, of the Gorham company, was notified. The medical examiner was summoned and pronounced the cause of death to have been heart failure.

Mr. Bogle was born in Knightsville, a suburb of this city, in 1849. After obtaining his early education in the Providence public schools he entered the employ of John Hawes, first as bookkeeper but a little later to learn the trade of machinist. He began his long term of service with the Gorham Mfg. Co., which continued from 1869 until his death, as a toolmaker. His evident ability was given recognition, and after being advanced from one position to another he was made master mechanic when he had been with the company about seven years. Through all of his 25 years in this responsible position he showed himself to be possessed of large executive faculty, keeping pace with the great growth of the concern with which he was connected. He was in charge of the planning and erection of the large factories which now comprise the Gorham works at Elmwood, and the task of moving the big plant from its old location at Canal, Steeple and N. Main Sts. was carried out under his direction. Many of the special machines for the making of silver ware, used exclusively by the Gor-

ham Mfg. Co., were designed by him. His most recent large work was the installation of an electrical plant at the works. His wife and one son, Daniel, survive him.

Bill in Pennsylvania Legislature Against Trading Stamps.

HARRISBURGH, Pa., March 9.—A bill has been introduced into the General Assembly by Mr. Gamble to prevent merchants, manufacturers, importers and retailers, or their agents or employes, offering, giving or selling any customer any ticket, check, trading or premium stamp, entitling the holder to receive money or any article of value as inducement to the purchaser, to the injury of legitimate business, and providing a penalty for violation of the act. This is a blow at trading stamp stores and has the hearty indorsement of leading jewelers throughout the Commonwealth.

Jeweler Tobias Prigoff Misses an Emerald.

SYRACUSE, N. Y., March 6.—Tobias Prigoff, a manufacturing jeweler in the Sedgwick, Andrews & Kennedy building, has reported to the police the loss of an emerald valued at \$250. The stone has been missing two weeks. It had been sent to the mounting room, and during the noon hour, while the place was in charge of only one of the workmen, the stone disappeared and it has not yet been found. The stone weighed between 1½ and 1¾ karats. The emerald had been sent to the jeweler from out of town to be set.

PEARLS.

The Scope.

We do not confine ourselves to dealing in one grade of goods, but simply to dealing in one line.

We deal in everything that pertains to that line, from the most expensive to the most moderate.

The result of this thoroughness is manifest in the assortments awaiting your inspection.

DIAMONDS

And Other Precious Stones.

Be on Guard for Checks of "W. R. Fisher, Jeweler, Southington, Conn."

SOUTHINGTON, Conn., March 6.—The police of this place have been at work on what appears to be a swindle worked on the Bentley Jewelry Co., of Boston, Mass., by a man who claimed to be a jeweler of Southington, named W. R. Fisher. There is no such man here. He conducted operations by mail; hence the Post Office authorities desire his arrest for fraudulent use of the mails. The method was as follows:

Upon a letter head inscribed "W. R. Fisher, jeweler, Southington, Conn.," he wrote after this fashion:

"I have a customer for a diamond ring, a clear white stone; one to cost about \$60 or \$70. Enclosed find check for \$50. Send ring C. O. D. for balance, payable upon approval."

The ring was sent according to directions, and was delivered upon the payment of the balance over the \$50 check, Fisher first telephoning from Bridgeport to learn if there was a C. O. D. awaiting him here. Later on the Boston firm found the check to be worthless and the case was reported to the police, but too late to make an arrest. Had the notice been a day earlier Fisher would undoubtedly have been apprehended.

Another jewelry firm with an order and check from Fisher telegraphed the bank upon which the check was drawn before filling the order. They found Fisher to be as unknown there as he is in Southington. The bank upon which Fisher's checks are drawn was not stated in the information sent here.

D. M. Currier, Tyndall, S. D., has gone to Hawarden, Ia., to live with his daughter. This removal is necessitated by the recent death of Mrs. Currier. J. J. Krall is selling out Mr. Currier's stock of jewelry.

FINE GOODS ONLY.

Seth Thomas Clock Co. Ultimately Win Suit Against Cass County, Neb.

PLATTSMOUTH, Neb., March 4.—Judge Jessen, in the District Court to-day, entered judgment on the mandate of the Supreme Court, which ends the long litigated suit by the Seth Thomas Clock Co. against Cass County. This action, which was told of in THE CIRCULAR-WEEKLY, March 8, last year, was brought over six years ago to recover \$1,000, the value of a clock which the company had put in for the county. The clock was erected in 1892, and in payment therefor the Board of Commissioners gave a draft for the amount to one, S. L. Wickersham. The draft was payable to the Seth Thomas Clock Co., or bearer. Wickersham cashed the draft from the County Treasurer and skipped, and when the company demanded payment it was refused and the suit resulted.

The Seth Thomas Clock Co. claimed that they did not know Wickersham and that he did not represent them. The case was twice tried in the District Court, where it was won by the county and twice appealed to the Supreme Court, which decided in favor of the Seth Thomas Clock Co. The County Commissioners have now ordered the payment of the claim, which, in the present form, is about \$1,300, making the total cost to the county for the clock about \$3,000.

Edward Graham has opened a watch repairing shop at Wakefield, R. I.

The directors of the Frick Clock Co., Waynesboro, Pa., have organized by the election of these officers: President, J. Elmer Frantz; secretary, Thomas B. Smith; superintendent and treasurer, Fred. Frick. The board have under consideration the enlargement of the clock works and other matters concerning the expansion of the business.

New Element in Which Real and Imitation Diamonds Can Be Distinguished.

PHILADELPHIA, Pa., March 10.—Arthur W. Goodspeed, Assistant Professor of Physics in the University of Pennsylvania, in an interview, gave little credence to the report of a discovery at Berlin of an element capable of transmitting rays, by means of which imitation and real diamonds may be distinguished.

Consul Guenther, at Frankfort, in writing to the State Department on the subject of the discovery in his Consular report, under date of Jan. 31, says: "A new technical journal, *Kirchhoff's Technische Blätter*, to be issued within a few days, will contain an interesting article concerning the latest rays.

"In 1895 a French chemist discovered rays emanating from the element uranium, which possessed properties similar to the Roentgen rays. They were called Becquerel rays, after their discoverer. But while the discovery of Roentgen aroused great interest in the whole civilized world, and led to radical changes in medical diagnosis, the Becquerel rays were employed only in a minor way in physical laboratories, and an assertion by the French scientist, Demarcays, that they were not emitted from uranium, but from a new element, made no impression.

"Recent experiments by the Berlin High School of Technology have proven this assertion, that a new element is responsible for the Becquerel rays, and the interesting fact has been observed that those rays render almost every transparent substance luminous in the darkness."

Serious Fire at the Store of A. E. Colburn.

ARGENTA, Ark., March 8.—The store and contents of A. E. Colburn were destroyed by fire Sunday, causing a loss of about \$12,500. Nothing was saved but the goods in the safe, which were damaged. The insurance is about one-quarter of the loss. The residence of Mr. Colburn was also damaged.

George Ludwig, a young man 23 years old, employed by Mr. Colburn, was seriously injured while trying to save property. He burst open the rear door of the store and the current of air thus created caused a wave of flame to envelop him. Before he could be rescued his head, face and hands had been so badly burned that it was at first feared he would lose both eyes and possibly hands. To-day the physician attending expressed the opinion that he will not lose an eye or hand, but that he will, in all probability, be disfigured for life.

LUDEKE & POWER,
IMPORTERS OF DIAMONDS,
12-16 JOHN STREET.

New York, Feb. 28th, 1901.

The firm of Ludeke & Power having expired by limitation has this day been dissolved by mutual consent. Mr. A. Ludeke will assume all liabilities and collect all outstanding accounts.

Court Orders Sale of the Property of the Ottawa Silver Co.

OTTAWA, Ill., March 8.—In accordance with a decree of the United States Circuit Court, the property of the Ottawa Silver Co. will be sold next Monday. The decree was signed Feb. 26, in the case of the National City bank against the Ottawa Silver Co. The suit was brought by the bank as one of the creditors, and Al. F. Schoch, who represents the Ottawa Development Association. The decree ordered receiver W. W. Nash to reduce to cash at once all assets of the Ottawa Silver Co. now in his hands, and to distribute the same among the parties entitled thereto, according to their respective interests and under direction of the Court.

It is found that E. C. Swift is a subscriber to the capital stock of said company for the amount of \$500, and that he has heretofore paid into the treasury \$250, and that there is still \$250 due and payable to the receiver. It was also ordered that the deed of conveyance given by Al. F. Schoch to the Ottawa Silver Co., dated Jan. 20, 1900, be set aside and that the property be reconveyed to Al. F. Schoch inside of 10 days, and upon refusal to do so the Master in Chancery of the court will execute such conveyance, and the receiver will in 30 days surrender possession of said premises, together with the machinery, fixtures, etc.

Strawberry forks rank among timely table items.

1900 Precious Stone Production

Large Output of Sapphires in Montana and of Purple Pink Garnets in North Carolina.

WASHINGTON, D. C., March 9.—The preliminary report on the production of precious stones in the United States made to the Geological Survey by George F. Kunz, special agent in charge of that line of investigation for the Survey, shows that in 1900 there was a large output of the fine sapphires of Fergus county, Mont., and a considerable development of the mines of fancy colored sapphires of Granite county, same State. There was also a systematic working of the beryl deposit in Mitchell county and an increased output of turquoise in Grant and Santa Fé counties, New Mexico, and Lincoln county, Nevada:

There was a large sale of turquoise, cut with rock, under the name of "turquoise matrix," from all the localities where that stone is found. The mining of purple pink garnets in Macon county, North Carolina, was carried on largely. A discovery of colored tourmalines was made in a new locality in California.

There was an increase in the price of diamonds last year and the popularity of pearls, rubies and emeralds continues.

The total output of precious stones in the United States during the year amounted to \$233,170, as against \$185,770 in 1899. The stones of greatest value produced in the United States were turquoise, sapphire, rhodolite, beryl, quartz and crystal. The value of diamonds produced was \$150.

Litigation Over Turquoise Bearing Property in California.

LOS ANGELES, Cal., March 2.—P. F. Schoer has filed a complaint against R. A. Johnson and the Farmers' and Merchants' bank. He asks an injunction against Johnson restraining him from drawing \$7,300 now in the bank, a receiver appointed over their mining property and an accounting from Johnson.

Schoer claims equal partnership with Johnson in turquoise mining claims of San Bernardino county, known as the Himalaya, Grand View, Eureka, Red Rock, Swede, Excelsior Nos. 1, 2 and 3, Bonanza Nos. 1, 2 and 3. Throughout their copartnership, Schoer says, he has superintended the work, turning over the product to Johnson, who has handled the financial end of the partnership. He claims to have given him at least \$7,000 worth of turquoise to sell. Schoer says that Johnson sold out the claims to Lippman Tannenbaum, New York, for the sum of \$12,300, on Feb. 14, Tannenbaum paying Johnson \$5,000, also depositing \$7,300 in the Farmers' and Merchants' bank, to be delivered to Johnson on presentation of a deed.

No Rub Mfg. Co., to deal in silver polish and patent medicines, have been incorporated under Maine laws, with a capital of \$500,000. President, Fred C. Baker, Everett, Mass.; treasurer, George F. Gould, Brookline, Mass. Certificate approved March 7.

As Cutters And Importers

of Diamonds we are in a position to serve the trade most advantageously. We conscientiously make use of our facilities for the benefit of our customers, and those who buy from us find the diamond business profitable.

Failure of Reciprocity.

Hon. John A. Kasson Resigns Special Reciprocity Embassy on Account of Failure of Treaties.

WASHINGTON, D. C., March 9.—On account of the failure of the commercial agreements which he negotiated with foreign countries, the Hon. John A. Kasson, Special Reciprocity Ambassador of the United States, has tendered his resignation to the President. The President has declined to accept the resignation, holding that Mr. Kasson was not responsible for the failure of the treaties.

Mr. Kasson had previously placed his resignation at the disposal of the President. This was done when so much opposition developed to the reciprocity treaties which Mr. Kasson had negotiated, that he believed it might be construed by the Administration as due to personal dissatisfaction by members of Congress with his conduct of the negotiations. The President, however, assured Mr. Kasson that he entertained no such suspicion, it being apparent that a great many Senators and Representatives had other reasons for endeavoring to defeat the commercial agreements. When Mr. Kasson returns from a vacation in Florida he will renew the negotiations with the representatives of foreign countries to effect new arrangements that will be transmitted to the Senate when it assembles in December.

Death of Charles August Schumacher.

Charles August Schumacher, a prominent retail jeweler of the lower West Side of New York, died at his home, 98 Perry St., Tuesday, March 5, of consumption brought on by bronchial asthma. Mr. Schumacher had been ill since May and his death was not unexpected. The deceased was 36 years old, and was the son of and succeeded the late Charles August Schumacher, an old and well known retail jeweler of New York, whose obituary was published in THE CIRCULAR-WEEKLY last June. He was born Sept. 11, 1864, in New York, at 46 Eighth Ave., where his father was in business for many years, and after receiving his education in the public schools started in to learn the watchmaker's trade. His apprenticeship he served with two jewelers in Maiden Lane, and when 18 years old he went to Utica, N. Y., where he was employed by W. S. Taylor, remaining there about seven months. He then went to New York, entered the store of his father and remained with the business from that time on, taking absolute charge of it during the last few years of his father's life. While in Utica he met Miss Anna Prignitz, whom he married Aug. 30, 1891, and his widow and one daughter survive him.

The deceased was a member of the Royal Arcanum and various social and political clubs in his neighborhood. He was well known to many of the principal dealers in the "Lane," and was popular with both friends and business associates. The funeral services were held from 46 Eighth Ave., Friday morning, and the remains were interred at Greenwood. The business at 46 Eighth Ave. will be conducted by his widow without change.

Samuel Sheppard, watchmaker, has been engaged by J. W. Hietel, 52 N. 11th St.

A. Pollock, of Morris Sickles & Sons, has returned from a seven weeks' western trip.

George Fife, lately with C. R. Smith & Son, is now with S. Kind & Son, 928 Chestnut St.

John Lohmeyer, watchmaker, has resigned his position with Riggs & Bro., 310 Market St.

J. W. Hietel, 52 N. 11th St., is to have alterations made to his store to increase the floor space.

John Demmert, formerly a retail jeweler of Trenton, N. J., has accepted a place with L. Bedichimer, 11th and Sansom Sts.

George L. Kite, of the Quaker City Watch Case Co., has recovered from a serious attack of inflammation of the stomach.

Frank Kind, of S. Kind & Son, was an usher, Monday, at the wedding of Mr. Chotzen, of New York, and Miss Stern, of this city.

Frank Morrison, formerly with Hamilton & Diesinger, has recovered from an illness lasting nearly two years, and is prepared to resume trade work.

An eagle made up of 40,000 stones, diamonds, rubies and sapphires, weighing 5,000 karats and valued at \$200,000, is on exhibition at Wanamaker's.

Bailey, Banks & Biddle Co. have completed an order for stationery and jeweled emblems for the Children of the American Revolution, an hereditary society.

The first meeting of the creditors of Max Golden, bankrupt jobber, 711 Sansom St., will be held next Friday at 308 Walnut St., the offices of the referee, Richard S. Hunter.

August Robinson, who smashed and robbed a show window in the store of Joseph Daniel, 31st and Market Sts., recently, was sentenced Friday to imprisonment for seven years.

Bailey, Banks & Biddle Co. made the gold and jeweled badge which was presented to President McKinley, March 4, by Congressman Morrell, on behalf of the Harmer Club, of this city.

Mr. and Mrs. E. A. Oliver and Mr. and Mrs. George A. Oliver, of Burlington, N. J., were here on pleasure and business during the week. The Oliver brothers are leading jewelers of Burlington.

Edward Sickles, of M. Sickles & Sons, gave a farewell banquet to a number of jewelers and personal friends last Tuesday, to celebrate his departure for Europe. Mr. Sickles sailed from New York, Saturday.

John Lang, diamond dealer, Sansom St., who was reported in these columns last week to be ill, is now said to be suffering from an organic disease of the heart, and is in such a precarious condition that his projected trip to Cuba has been indefinitely postponed.

Jules A. Levy, son of the late Bernard Levy, for many years a manufacturing jeweler at 9th and Sansom Sts., has gone into partnership with A. Sandoz, under the firm name of Sandoz & Levy, jewelry case manufacturers, 722 Sansom St. Mr. San-

doz will have charge of the factory and Mr. Levy will represent the house on the road.

Volume 1, No. 1, of the *Watch Case Engraver*, a monthly magazine, devoted to the cause of the Watch Case Engravers' International Association, has been issued.

Otto Danninger and August Hahn, who were charged with having flimflammed Frank Meyer, a diamond dealer, out of a costly ring, were acquitted in court last week.

A collection of Sheffield plate, antique silver ware and old silver, belonging to George Streit, of Bournemouth, England, is to be sold at public auction, at 12th and Walnut Sts., March 18.

Charles Gorges, arrested for having obtained a \$400 ring from H. Hood, of Wanamaker's store, on false pretenses, waived a hearing before Magistrate Kochersperger, Wednesday, and was held in \$1,200 bail for court.

Two men who were trying to peddle jewelry at 6th and South Sts., last week, and who had several dozen rings in their possession, were arrested on suspicion of having stolen the rings. The property has not yet been identified.

Charles Schwartz, jeweler and optician, with stores at 149 N. 8th St. and 17 S. 8th St., denies that either place has been abandoned, and says his business was never in better condition. This is a correction of an item published last week.

An effort was recently made by the watchmakers of this city to revive the old Philadelphia Horological Society, and a temporary organization was effected at the store of Breitingger & Kunz, 37 N. 9th St., where the horologists meet. The following officers were elected: George Cullen, president; Mr. Breitingger, vice-president; A. Dwyer, secretary, and J. W. Hietel, treasurer. Meetings will be held from time to time while the reorganization is being perfected, at Mr. Hietel's store, 52 N. 11th St. Eventually the society will have quarters of their own.

A new department store to be known as "The Metropolitan," Binghamton, N. Y., will have a jewelry department.

WHAT'S IN A NAME?

OUR goods by any other name might sell as well—but then you would not have our broad guarantee back of them.

That's worth a good deal to you; and therein lies the *Value of the Name*,

Providence.

A. S. Vennerbeck, of Vennerbeck & Clase, has been elected treasurer of the Quinnoquin Golf Club, this city.

W. O. Clark, of Clark & Coombs, has sufficiently recovered from his recent illness to be able to be at his office a part of each day.

The corporation return filed at the City Clerk's office by the Improved Seamless Wire Co. contains the following items: Capital stock, \$100,000; real estate, none; assets, \$59,514.21; liabilities, \$59,244.21.

Detective Cannon arrested, last week, a man, who gave the name of William Abraham, on a charge of having committed larceny from the jewelry shop of J. H. Collingwood & Co., enamellers, 107 Friendship St.

Announcement is made of the dissolution of the copartnership heretofore existing between William J. Braitsch and George H. Grant, by mutual consent. Mr. Grant has withdrawn from the firm and the business will be continued by Mr. Braitsch under the same firm style, W. J. Braitsch & Co., at the same location, 472 Potter's Ave.

The addition to the S. B. Champlin Co. building at the corner of Chestnut and Ship Sts., mentioned in last week's issue of THE CIRCULAR-WEEKLY, is to be five stories in height and cover a lot of land 40 by 50 feet. The contracts have been awarded for the erection of the building, which will be of brick and specially adapted for the manufacture of jewelry.

An act was introduced in the House of

Representatives of the State Legislature, Tuesday last, proposing an amendment to the Rhode Island corporation law which would do away with the present provision requiring corporations to file annually with City or Town Clerks a certificate signed by a majority of the directors truly stating the amount of capital stock actually paid in, the value of real estate as last assessed, the amount of debts and liabilities and the value of personal assets.

Imports received at the port of Providence the past week included the following from Bremen: Twelve packages of manufactures of metal; four packages of imitation precious stones and one package of glassware. From Liverpool: One package of jewelry, manufactures of metal, etc. From Hamburg: One package of jewelry. From Havre: One package of half-pearls, one package of imitation precious stones, one package of jewelry, one package of glass stones and one package of imitation jewelry.

Edward N. Cook, maker of gold plate, 144 Pine St., has formed a corporation for carrying on his business, the charter having been filed the past week with the Secretary of State. The incorporators are: Edward N. Cook, Ida J. Cook and William C. Starkweather, and the corporation will be known as the Edward N. Cook Plate Co. According to the articles of incorporation the purposes of the concern are the manufacturing of stock for jewelry, watch cases, cane heads, optical goods and other work required in rolled gold plate. The capital stock is stated at \$50,000.

Attleboro.

Sidney O. Bigney, of S. O. Bigney & Co., has returned from a visit in Washington, D. C.

John M. Fisher, of J. M. Fisher & Co., left, last week, for Florida, accompanied by Mrs. Fisher.

E. Herbert Briggs, with G. A. Dean Co., was last week elected president of the association which supports Attleboro's baseball.

Word comes from southern California of the illness of James E. Blake, of the James E. Blake Co., who is traveling there for pleasure.

Joseph E. Nickerson, the popular traveling man for Sadler Bros., took to himself a wife last week. He was wedded to Miss Mabel N. Eaton, of South Attleboro.

Business in the jewelry factories is fast sinking to a minimum. The only shops making any pretense at rush work are those making cheap novelties in ladies' Spring and Summer goods. There are immense demands for "Carrie Nation Hatchet pins," which are claimed to be "endorsed by Mrs. Nation," and there is also a tremendous run on badges for the fast increasing membership of the "Order of Buffaloes."

The French reciprocity treaty, which has been the bugbear of New England jewelry manufacturers, has broken out afresh. Word came from Washington, Saturday morning, in a message from a trusted friend to a member of the Company C Association Tariff Committee to the effect that a new document had appeared which bears on the case. It is represented that nothing less than an agreement between the United States and the French Governments has been entered into whereby the treaty is given 18 months more of life. Prompt attention will be given the matter and, if necessary, the old fight reopened.

Representative Thomas W. Williams was presented, last week, with a handsome and costly souvenir spoon by the manufacturing jewelers of the town, in recognition of his good record in the Legislature and more particularly for his successful intercession in their behalf with the State police, resulting in an application of the labor laws "with discretion." The spoon is of silver, the handle richly decorated with the famous codfish, the State House, Faneuil Hall, the old South Church, public library, a "Hub," Bunker Hill monument, the Washington elm, a bowl of beans, and other devices equally appropriate to the State capital. On the concave side of the bowl, which is of gold, is an engraving of one entrance to Boston's subway, which has attracted much comment for its excellence. On the convex side of the bowl is an appropriate inscription.

Town meeting, last week, had many features interesting to the jewelry manufacturers. Raymond M. Horton, formerly of Walsh & Horton; Louis J. Lamb, of C. H. Allen & Co.; Charles E. Bliss, of Bliss Bros.; Charles M. Robbins, of the Charles M. Robbins Co.; Herbert A. Clark, of the Horton & Angell Co., and Charles P. Keeler, of McRae & Keeler, were elected to office. Mr. Lamb, J. Lyman Sweet, of the R. F. Simmons Co., Everett B. Bliss, of Bliss Bros., and Mark E. Rowe, formerly

of the Horton, Angell Co., were appointed a committee on building a town hall. Increased appropriations were granted the fire department on representation that it would keep down the insurance on the factories. J. Thomas Inman, of J. T. Inman & Co., presented, as head of a committee, a comprehensive report for installing a sewerage system.

Taunton.

John Murray, who held a responsible post at the Reed & Barton works, has taken a still more responsible one with one of the leading Attleboro houses and removed his household there.

The directors of Reed & Barton have elected W. B. H. Dowse, son-in-law of the late Henry Gooding Reed, to succeed him as president of the old corporation. Mr. Dowse is a wealthy patent lawyer of West Newton, Mass.

The funeral of the late Henry Gooding Reed, founder of the silver house of Reed & Barton, took place last week. There was a public service at the Winslow Congregational church and prayer at the residence. At the former the employes of the house attended in a body and Rev. T. Clayton Welles officiated. The floral tributes were very elaborate. The bearers were Theodore Hail, David Howe, William McAusland, George B. Harvey, John Rogers, Charles Minshew, A. F. Jackson and William Rayment.

CHAS. S. CROSSMAN & CO.,
3 Maiden Lane, New York.

North Attleboro.

Two burglars forced an entrance through a window into the office and packing room of G. C. Hudson & Co., Whiting building, last Friday night. They decamped with 60 ladies' gold chains and 36 silver bracelets. They chose a time when the night watchman was on the second floor. Increased vigilance at all the other shops is the result and the police are actively trying to find the thieves, who are believed to be local talent.

The firm of Sommer & Mills Co. dissolved last week. J. J. Sommer and Harold H. Totten continue the concern, assuming all liabilities, and the plant will not be shut down a day. The first proposition was the appointment of a receiver, but as this would close the factory and cause delay, it was thought unfair to the operatives; hence the above arrangement was reached by mutual consent. Fred J. Mills, the third partner, withdraws from the firm.

The plant of the Warren, Brower Co. passed into the hands of Louis J. Lautenbach on Friday afternoon of last week. The concern succeeded the Seymour, Knapp, Warren Co. and occupied the third floor of the big shop on South St., Plainville. The concern experienced serious financial embarrassment and the entire plant, tools, machinery, furniture, fixtures, stock, goods and personal property were mortgaged to Mr. Lautenbach. For breach of the conditions of the document the plant was offered at public auction and bought in by the mortgagee. It is regarded as an excellent plant and Mr. Lautenbach will have no trouble in disposing of it. His plans regarding it are not yet public.

Town meeting draws near in North Attleboro and the prevailing issue is the matter of whether or not to have license. The jewelry manufacturers are straining every nerve and spending their money freely in the campaign in favor of no license, and it is certain that the vote will be extremely close. Among the jewelers who secured caucus nominations at the hands of the Republicans and Democrats, last week, were: Edwin D. Sturtevant, of Sturtevant, Whiting & Bigelow; Frank L. Shepardson, of F. L. Shepardson & Co.; Fred S. Gilbert, of F. S. Gilbert & Co.; John E. Tweedy, of Cheever, Tweedy & Co.; James G. Cheever, retired; Albert Totten, retired. Mr. Sturtevant is the central figure of the fight for office. He has been chairman of the town Selectmen for several years, and the main issue, aside from license, is an attempt to oust him.

A. B. Kennedy, Ithaca, N. Y., was elected an Alderman of that city at the charter election last week.

JEWELERS' CLUB, PHILADELPHIA

Sixth Annual Banquet.

Tuesday Evening, March 12, at 6.30 o'clock,

at

HORTICULTURAL HALL.

PHILADELPHIA, Pa., March 12.—Actually there were 312 jewelers from all parts of the country who dined to-night at Horticultural Hall as guests of the Philadelphia Jewelers' Club, at their sixth annual banquet. Everyone was a boy again "just for to-night"—heart whole and fancy free, gay, nimble witted youngsters, without a care for the morrow. Quite true, there was a statesman or two here and there, a nest of reporters at table F—omnipresent and ubiquitous as usual—orators, and even a clergyman, the Rev. Dr. Twing, but these were only to give the dinner dignity. Horticultural Hall—beautiful always—was resplendent to-night. Multicolored electric lights studded the golden ceiling and cast a soft radiance over the banquet hall. Candelabra, artistically shaded, lighted the tables at regular intervals. Palms, ferns, immortelles softened and subdued the table decorations.

The dinner was set for 6.30 o'clock, and the reception committee were early on hand to proffer the club's welcome. The guests were greeted by the committee in the reception room. Even the brass band, hidden in an alcove in the far end of the room, could not drown the cordial greetings. The members of this committee, appointed only a few days ago by President White, were as follows: H. C. Larter, Charles F. Duffy, Ludwig Nissen, A. J. Le Jambre, James M. Bennett, J. D. Battin, George W. Read, E. B. Midlen, L. S. Lewis, William R. L. Fullerton, M. V. Burton, J. D. Pettin-gill, A. G. Lee, N. B. Eltinge, T. J. Mooney, William F. Parry, Jr., William S. Quinn, H. A. Bodenheimer, Harry Oliver, B. F. Griscom, Matthias Stratton, Frank Wood, Joseph Cadwallader and E. H. Eckfeldt.

The members of the banquet committee were William G. Earle, William H. Long, James H. Kelly, William Bruehl, Howard L. Roberts, William P. Sackett, Fred. M. Simons, William Linker and J. Warner

Hutchins, chairman.

As the guests crowded into the reception room each one was promptly made at home by the committeemen. Shortly after 7 o'clock Mr. White, president of the club, directed the guests to the banquet room. There they remained standing at

Bureau of Surveys; C. G. Alford, president of the Jewelers' Association and Board of Trade, New York, and F. V. Stoy, Mayor of Atlanta.

The tables of the guests extended lengthwise and each was designated from "A" to "F" in lettered immortelles.

Before ascending to the banquet hall printed sheets were handed to the guests, showing the names of each opposite a number, on diagrams representing the tables, each of which was lettered. A corresponding number was placed on each plate at the tables, so that it was an easy matter for the guests to find the places assigned to them.

A small menu card was placed beside each plate. During the dinner, also, a handsome menu souvenir was handed to each guest. On the front cover was a hand painted bust of a beautiful woman, artistically vignettted; the back cover contained a blue shield, with the words, "The Jewelers' Club." On the first page appeared an elaborately engraved vignette, in blue, with the inscription, "Sixth Annual Banquet of the Jewelers' Club, of Philadelphia, Tuesday evening, March 12, 1901." Then followed, on successive pages, the menu proper, a list of the toasts, the names of the guests, and on the last page the names of the banquet committee, the reception committee, the officers of the club and the board of governors. The souvenirs, which were made by the Bailey, Banks & Biddle Co., were presented in neat boxes. They came as a surprise to the diners and received high encomiums for the beauty of design and the excellence of workmanship which distinguished them.

At the side of each plate was a printed slip of club choruses. It contained a stanza or two from each of the following songs: "Star-Spangled Banner," "Every Race Has a Flag but the Coon," "That's Where My Money Goes," "I Have Waited, Honey, Waited Long for You," "Lam, Lam, Lam,"

L. P. WHITE,

PRESIDENT OF THE PHILADELPHIA JEWELERS' CLUB.

their chairs until the guests of honor came in. They took their seats at a table elevated on a platform and extended crosswise at the north end of the hall, at which L. P. White presided. They were Mayor Samuel H. Ashbridge, Hampton L. Carson, former Mayor Charles F. Warwick, the Rev. Dr. Cornelius L. Twing, of Brooklyn, George S. Webster, chief of the

"Whistling Rufus." "Coon, Coon, Coon." "I Can't Tell Why I Love You," "Ma Tiger Lily." "When Reuben Comes to Town" and "Auld Lang Syne." As the band struck up each of these tunes, during the repast, the guests sang the choruses with great vigor and enthusiasm, frequently calling on the band for an encore. The first song, "The Star-Spangled Banner," was sung standing, the guests waving their napkins above their heads, in time to the air.

Rev. Cornelius L. Twing said grace.

After the coffee had been served and the cigars passed, L. P. White, the president of the club, who also acted as toastmaster, rose to introduce the speakers. He was given three rousing cheers. Mr. White said:

Gentlemen, members and guests of the Jewelers' Club, I take great pleasure in extending to you a most cordial invitation to the sixth annual dinner of the Jewelers' Club of Philadelphia.

Mr. White then proposed the toast to the President of the United States, which was drunk standing. He then continued:

We have with us this evening a number of distinguished gentlemen who will speak to us, and we will proceed at once with our toasts. I have first to introduce to you a gentleman not unknown to most of you, the Honorable Hampton L. Carson.

MR. CARSON'S SPEECH.

Mr. Carson spoke as follows to the toast, "The Future Possibilities of the United States":

I have not seen so many jewelers in line since the third day of November last, and I have not seen so intelligent and prosperous and enthusiastic a gathering of men in this hall since the last dinner of the Philadelphia bar. I am a little at a loss to know why, after having had extended to me the courtesy of being one of your guests for four years, you should have requested me a second time to address you on this occasion. I would not have made you a talk if you had acted like the little girl who was sent to attend a party alone and had been instructed by her mother as to her behavior—what she should say and how she should act. When she came home her mother asked her what she had done and said, and she replied: "Well, mother, when they first passed the cake I said 'I thank you very much,' but when they passed it a second time I was a little puzzled, for you had not told me what to say, but I thought of dear papa and said, 'Damn you, no.'" I well recollect that in picking up a little book published in London about 10 years before William Penn had landed here in Philadelphia, then a town of but 2,000 inhabitants, I found an account of this city, in which, after describing the various buildings and business people, hutchers, bakers, bricklayers—and jewelers—the author said, "Of the apothecaries and lawyers I shall say nothing, because the place is very peaceful and healthy—and long may we be preserved from the pestiferous drugs of the one and the abominable loquacity of the other;" but to proceed with the task set me of responding to the toast, "The Future Possibilities of the United States."

I know there are a great many men who are pessimistic—to whom the future is full of dark clouds and gloomy prospects; the air is full of germs and bacteria and the water full of microbes. (Laughter.) We suffer every four years from Bryanism. But we seem somehow or other to have forgotten that we ever had a Declaration of Independence. We have turned our backs on the Constitution. We have forgotten the glorious deeds of our ancestors and are drifting into a chaotic condition.

I want to say, gentlemen, that I am not pessimistic. I do not care how great or serious the problems of the present or future may be. I believe that the same patriotic devotion, self-sacrifice and heroism born to our people will take care of the interests of this country and control us in the present and future as they have done in the past. It does not fill my mind with forebodings that the flag of the United States is flying in far-distant seas and foreign lands.

The first time those Stars and Stripes were seen by foreign eyes it was when they were carried at the masthead of the *Ranger*, commanded by

John Paul Jones. When that noble emblem was given to Jones, he made a pledge that he would never strike his flag in disaster or haul it down in defeat, and when, under the very cliffs of Old England, he locked yardarm to yardarm in that dread battle with the *Serapis*; when 60 dead were upon his decks and great numbers of wounded writhed in agony in the cockpit and when the ship had been burning within for five hours; and when the British captain hailed him through the smoke and lurid flames and said, "Have you struck your flag?" Jones replied, "No, I have only begun to fight" (great applause), and when he found, in order to save the lives of his wounded and prisoners, he would have to transfer them to his prize, he was the last man to leave the deck, and as he turned to haul down the flag he looked about him and saw the dead upon the deck and he said, "As those men have given their lives that that flag might float, I cannot rob them of the glory by taking it down; I will give them the ship for their sepulchre and the flag shall fly over them as an everlasting emblem of their loyalty," and as the ship reared high in air in her last lunge the last object seen flying in air was that stricken flag, as it sank with the glorious dead. When some years ago in the harbor of Samoa that gigantic tidal wave engulfed the vessels of many nations and flung them on the beach, those gallant tars under the Stars and Stripes from the mastheads sang that song which you have sung here to-night—"Oh, say can you see by the dawn's early light," Wherever that

J. WARNER HUTCHINS,
CHAIRMAN OF THE BANQUET COMMITTEE.

flag goes, there law and order and justice and liberty and happiness and prosperity will always go (long and enthusiastic applause).

Afraid of the future? Ah, no; those words, spoken at sunrise from the deck of the *Olympia* on that May morning; those words that have changed the history of this country as well as the world, "You may fire, Gridley, when ready," will live undying. Behind that gun stood the gunner; behind the gunner stood the officer of the deck; behind the officer stood the captain; behind the captain, the Admiral, and behind the Admiral, the President—and behind the President stood the people, and behind the people, the Constitution.

When on the train, the other day, I picked up a little volume containing an account of the Congress of Religions which had taken place in Chicago in 1892, and when I saw that on the pages were printed the remarks of Hindoos, and Mussulmans, and Chaldeans, and Zoroasterians, Jews and Gentiles, representatives of every nation, instead of having my faith shaken. I tell you it was renewed, and I had greater faith in the brotherhood of man.

I stood on the shores of the great Pacific, and though I faced the setting sun I knew I was looking at the birthplace of the morning. I saw the signs on the streets of Seattle, Vancouver and in the Far East, and I recognized the truth that as those great steamers go out, they sail west and west until dropping anchor in the pleasant tropical waters, they carry with them the characterization of our western advancement and freedom.

The songs of liberty will be sung in every clime. Just as our fathers believed in the development of popular institutions, so shall we believe that the future of this country is not downward in tendency, but always upward, and still upward. Should we not, in the words of the greatest of American poets, say

"Sail on, O ship, nor fail to grasp the sea,
Our hearts, our hopes are all with thee."

After the conclusion of Mr. Carson's speech the band played "America," the guests singing the song with a considerable show of feeling, aroused by the patriotic flights of the speaker.

THE REMARKS OF MAYOR ASHBRIDGE.

Mr. White then introduced Mayor Ashbridge, of Philadelphia, who said:

This occasion is always a memorable one, a remarkable one. It is a pleasure to me to look into your faces and join with you in the pleasures of the hour. I regard it as a high and distinguished compliment of honor. It always affords me great pleasure to come to the Jewelers' Club banquet and partake of your good fellowship, and without speaking slightly of any organization in this city, I must honestly say that there is no other body of men in Philadelphia who seem to have such a capacity for real pleasure and honest good fellowship as the Jewelers, as particularly evidenced at their annual banquet, from year to year, and you seem to have a natural faculty for transferring this hospitable tendency easily and unconsciously to your friends and guests. It is most agreeable and pleasant.

After dwelling at some length, but with great eloquence to matters pertaining locally to Philadelphia alone and its government, the Mayor concluded by saying:

I am thankful and grateful for one thing—whatever I believe to be right and for the betterment of the people of Philadelphia and its business interests, I have the courage to carry out, no matter what may be said to me or of me. We should try to enjoy the friendship of all men, the rich and low alike. If you cannot speak good of a man, keep your own counsel and say nothing at all. May the American people never forget the sacrifices and causes that gave us liberty and freedom beyond comparison with any civilized land.

At the conclusion of Mayor Ashbridge's speech the band played "The Star-Spangled Banner," in which all present joined.

DR. TWING'S RESPONSE.

Mr. White then introduced the Rev. Dr. Twing, of Brooklyn, who replied to the toast "Historical."

Dr. Twing's remarks were entirely of a humorous character and were received throughout with boisterous merriment. He spared no one from the time he started in by addressing the "congregation" as "Mr. President and Fellow Feeders." Dr. Twing related his experiences with a certain young couple of different religious beliefs who came to him to be married. When he visited them a short time after, he found a picture of Pope Pius on one side of the parlor and a picture of William of Orange on the other. He asked the newly made wife how they got on. "Oh," said she, "very well; when Pat came home drunk on the 17th of March he punched a hole through William of Orange and pulled him off the wall and stamped on him. The next day I hocked Pope Pius to raise enough money to buy a new William of Orange, and Pat had to save his money to get the Pope out of hock." These people, Mr. Twing said, were making history. At this there was a great outburst of laughter. The Doctor said:

I am up against a hard proposition. History repeats itself, but strange are the exigencies of human life. This morning, in the discharge of my duties as chaplain of the almshouse, I preached to about 150 paupers, and to-night I am addressing how many hundred millionaires?

That is something of an experience, to speak in Flatbush and then at Philadelphia, and my name isn't Bryan, either, and I am not a candidate for any office, unless it might be Assistant Mayor of Philadelphia or typewriter to former Mayor Warwick.

For to-night, at least, we are all expansionists. The 20th century is here, boys; it was welcomed here in Philadelphia, as well as in Brooklyn, but it has never had such a warm reception as it is getting here to-night, and it isn't very late yet, either. It doesn't look as though there was going to be any frost in this assemblage to-night.

This is John Wanamaker's silver wedding, but what's that to us?—it's our sixth birthday, and if we are only as prosperous as John Wanamaker when our 25 years roll by, oh, my (laughter), and that's no pipe dream, either.

Now, my friends, I wish you that prosperity that you seek for, and the bountiful enjoyment of it. I hope you will get it. I don't want you to think that what has been said to you to-night by Mr. Carson is mere froth, because it is not. It is the best and purest sentiment that can be expressed by lips, and there are not many who can do it as well as he can. (Loud applause.) You have some good ones over here. They say Philadelphia is slow, but I have learned different—why, just play the "Georgia Cake Walk," and see where you are (alluding to the cake walks that some of the guests had indulged in during the dinner) I wish I had you all in Brooklyn; I would get you to join my church, and if you would only sleep until time for collection, I'd have 'em play the "Georgia Cake Walk" and then I'd be sure to get all your wallets.

But, boys, you are all happy now, and you have a good right to be—you have had a good year, a prosperous year; you have been blessed by having a Government that stands for something (applause). One hundred cents on the dollar and all that you have here, all that we have anywhere under our flag, is due to the Declaration of Independence, declared right here in Philadelphia. Election is over and you have seen the benefit of it.

I trust that they who live to see the close of the 20th century may have as good cause for rejoicing as we do who see it dawn. We are living in an age which it is a good thing to live in, and if there is a hell, I truly hope that the only ones who go there to live and dwell there forever are the pessimists.

Doctor Twing was given a veritable ovation at the close of his speech. With the assistance of the band, the members standing, sang "For He's a Jolly Good Fellow."

EX-MAYOR WARWICK'S SPEECH.

The last speaker of the evening was former Mayor Warwick, of Philadelphia, whose great popularity with the members naturally gave him a hold on them greater than that of any previous speaker. He fulfilled every expectation. Mr. Warwick replied, in kind, to some of Doctor Twing's witticisms. In alluding to the latter's wish, that he might be made a typewriter in Warwick's office, the former Mayor plainly told the would-be typewriter that he was too old, too fat and not of the right sex. "Although," said Mr. Warwick, "I would be very willing to meet him on Saturday night and go with him anywhere, and attend his church the next morning."

Mr. Warwick's subject, "The Ladies," was, he said, the one subject upon which he was at his best. He told a story which he credited to Senator Henry C. Grady, of Georgia. "I was down there," said the speaker, "and met Grady at a meeting where a number of women were present, and we, naturally, got to talking of them. 'Women, God bless 'em, there's nothing like 'em,' said Grady; 'now, there's my wife; my, how I love that woman—I wish I had a dozen like her.'

"Woman," said Mr. Warwick, "is the brightest jewel in man's fate and destiny,

but you don't want two of these jewels in the same ring, for the luster of one is apt to spoil the effect of the other."

Woman's influence is greater to-day than ever it was, great though it has ever been. Aspasia ruled Athens because Pericles loved her, and her influence over him was an all-powerful one. She was a philanthropist, an economist, a politician; we all know what Cleopatra did—she toyed with Cæsar and she ruined Anthony; we have all heard of Catharine the Great, the greatest woman and the mightiest ruler that even Russia ever produced; and we have heard of our own Molly Pitcher; and so I could go on, but most of all, we love to hear of the mother and wife who looks with loving eyes and with a divine sense of love and justice over the child, and here we have the pure woman, the good woman—God bless her—her influence is yet to grow—but not with a hatchet—and will grow greater and better than ever. Woman, pure woman, to-day, perhaps, is more revered than at any previous time in the history of the world.

We around this table know what has taken place in the period of our lives. It was less than a hundred years ago that the clumsy stage coach rumbled over the rough roads and made the trip from Philadelphia to New York in two days, and from New York to Boston in three. We go from here now from Philadelphia to New York in two hours; from here to Atlantic City in 90 minutes—70 minutes on the fast express trains—60 minutes they tell us sometimes, but you never get there on time. It was not until some time in the fifties that the first telegraph was operated. Steam and electricity have annihilated time, and they have sent this old world spinning on its axis. The Baltimore Clipper would leave its port, and if everything was favorable, she could make the trip to London in three weeks. If it was not, it might be three months, and to-day we do this in six days. It was not so many years ago when the farm tools in use and the methods of husbandry employed were practically the same as those used thousands of years ago by the ancient Romans and Egyptians.

Now we reap and sow by machinery. One McCormick reaper can do the work of 100 men with ease. We talk with our friends in Chicago and the voice can be plainly recognized. We will talk to Mars yet and I'll bet a hundred dollars to a doughnut that when we do we'll reach Venus. And yet we who are here to-night cannot even commence to predict what the future has in store. A hundred years from now our children's children will in all probability look back upon us as slow, old, antiquated fossils. How can it be better summed up than in the language of the philosopher Carlyle, who says:

"We pass from one century to the next and no chime rings out when one period passes into another."

Our nation is growing and is still to keep growing. It is now like a young giant first feeling his strength. I have no fear of the future—this people can never tyrannize the Philippines, and they never will. They can never browbeat the Cubans, and they never intend to. One thing we should do, we should support the Administration, and you should know that the Administration, by reason of its position, knows more about these things than we do. It sounds so like nonsense to me when they tingle in my ear about William McKinley anticipating a crown. God in his fondness, who has led us thus far, will lift us up and still lead us. That grand old flag never will float over the body of an abject slave or unfurl its folds over the crown of a Cæsar.

As Mr. Warwick sat down, the familiar strains of "Hail, Columbia," well rendered by the combined music, were quickly taken up by the diners. After this Mr. Warwick was tendered three hearty cheers, everybody sang "Auld Lang Syne" in good old-fashioned style and with more than ordinary heartiness—and the Sixth Annual Banquet of the Jewelers' Club of Philadelphia was over.

The officers of the club are: L. P. White, president; A. Rutherford, vice-president; William F. Parry, Jr., treasurer, and William S. Quinn, secretary. The board of governors consist of: J. Warner Hutchins, William H. Long, A. G. Lee, William P. Sackett and N. B. Eltinge.

Echoes of the Banquet.

J. R. Gleason and T. Zurbrugg spent a good part of the evening in whispered conversation.

A representative of a prominent manufacturing concern who indulged in several cakewalks expended considerable energy in explaining to the reporters that he was officially not at the banquet.

The festivities were greatly enlivened by the cakewalks that accompanied the coon songs discoursed by the bands. Among the most prominent couples that entertained the crowd were "Goldfish" Quinn and Ed Riley, Harry Oliver and Warner Hutchins, and Edward Ensign and S. Frank Pierson.

Edward Ensign early in the proceedings crowned his head with a red candle shade, thereby setting the fashion for his immediate neighbors.

N. B. Eltinge, on whom fell the responsibility of preserving order during the speeches, found it difficult at times to curb the enthusiasm that was by no means confined to the younger element.

Although the banquet was officially ended before half-past eleven, the proceedings continued for several hours at the neighboring hotels, where the discussions of the affair were emphasized by the popping of champagne corks.

One of the features of the banquet was the toasts to the heads of the several tables, which were drunk standing amidst loud cheering, the guests at the different tables competing with each other in friendly rivalry in an endeavor to drown each other's voices.

Ben Samuel received loud and long applause for the brilliant execution of an intricate *pas secul*, which he modestly described as a "Yiddishe" cakewalk.

H. L. Roberts regretted the absence of a gallery, which made the presence of ladies impossible. Some of his neighbors, however, seemed to have dissenting views on the subject

Among the most graceful dancers were H. H. Moulton and Cooper Stone.

"Bill" Bruehl was all in all to Table F.

"Jim" Bathgate was quiescent—saving himself for the aftermath, he said.

"Del" Lee and Archie Rutherford had a little tilt, but it ended happily.

"Oh, here comes papa. I never saw him look so severe, the mean old thing." This was said to Archie Rutherford, but he didn't seem to mind it.

That joke that was cracked by Warwick about Twing's marriage was made from a tip given by "Lou" White to the former Mayor long before the banquet.

R. C. Putnam, with J. E. Caldwell & Co., was conspicuous among the younger crowd for his dignity.

"Goldfish" Quinn knows more about a certain incident at the reception preceding the banquet than he cares to tell. But "Phiz" "was wise." Jake can tell the rest.

Peter L. Krider Co., Philadelphia, Pa., have just completed an eight-inch prize cup, presented by Robert J. W. Koons, vice-commodore of the Corinthian Yacht Club, as a prize for 36-foot yachts, to be competed for Decoration Day, May 30. The trophy is a loving cup decorated with a large anchor with cables twined around the cup, from which fly the Corinthian Yacht Club flag, the vice-commodore's flag and his own private signal, in rich enamel.

Third Edition

WORKSHOP NOTES

For

JEWELERS and WATCHMAKERS.

Being a collection of the latest practical receipts on the manufacture and repairing of watches and clocks and on the various processes entering into the manufacture and repairing of jewelry, as coloring, polishing, enameling, annealing, oxidizing, etc.; in short, a thorough compendium of the numerous mechanical departments of the jewelers' and watchmakers' shop.

Containing 300 pages. (Size, 7½ x 10½ inches), Bound in Cloth, Stiff Covers.

This book is the most useful, comprehensive and perfect publication of the kind and should be in the hands of every jeweler and watchmaker in the country.

PRICE, \$2.50.

... PUBLISHED BY ...

THE JEWELERS' CIRCULAR PUBLISHING CO.,

11 John Street, cor. Broadway, New York.

Boston.

The annual meeting of the stockholders of the American Waltham Watch Co. has been called for March 28.

Frank E. Nathan, of the Nathan & Hurst Jewelry Co., Jewelers building, was ill for several days last week.

D. C. Percival, Jr., of D. C. Percival & Co., has gone to southern California on a pleasure trip of three or four weeks.

Benjamin Griscom, of Bippart, Griscom & Osborn, Newark, N. J., was in town some days ago and sailed for Europe on March 6.

Thomas O. Pray, with Arthur H. Pray, diamond dealer, 376 Washington St., has been at his home ill for several days. A. H. Pray is in Bermuda for the month of March.

The Boston Jewelers' Club have been obliged to make some changes in their arrangements for the annual Ladies' Night, and the present plan is for a reception and banquet at the Parker House, March 25, to be followed by a theatre party to John Drew's production of "Richard Carvel," at the Hollis Street Theatre.

The Ripley-Howland Mfg. Co., through their trustee, W. A. Bates, have filed with the Secretary of the Commonwealth their annual corporation report. Its figures are as follows:

Machinery	\$7,250
Cash and debts.....	36,449
Manufactures and merchandise.....	90,746
Miscellaneous	12,572
Total	\$147,017
Capital stock	\$108,000
Debts	6,281
Reserved for depreciation.....	32,736
Total	\$147,017

On the Chicago train leaving Boston, March 5, was a detective from Chicago, who was accompanying Emanuel Townsend Goldberg to that city, where he is to answer a charge of passing a worthless check last November on a firm of that city. Goldberg, or Fred Foster, as he called himself when arrested here on the afternoon of Feb. 20, had attempted, so it is said, to obtain \$3,000 worth of jewelry from various well known local firms. He also sold a number of watches here and it is claimed that these watches were obtained in Chicago by means of a worthless check.

Among the buyers in Boston last week were: F. T. Hayden, Middleboro, Mass.; J. S. Stanley, Wakefield, Mass.; U. C. Smith, Brockton, Mass.; William Moulton, Newburyport, Mass.; E. S. Padelford, Gloucester, Mass.; W. R. Hurlburt, South Framingham, Mass.; Mr. Gray, of Grant Jewelry Co., Lowell, Mass.; E. A. Doyle, Lynn, Mass.; W. H. Heath, South Braintree, Mass.; J. H. Connor, Lynn, Mass.; G. A. Collins, Salem, Mass.; A. N. Welsh, Peabody, Mass.; Paul M. Harvey, Portsmouth, N. H.; Fred Low, of Daniel Low & Co., Salem, Mass.; W. F. Newhall, Lynn, Mass.; E. F. Welsh, Westboro, Mass.; N. C. Nelson, Concord, N. H.; George Lucas, Wakefield, Mass.; N. C. Squire, Lynn, Mass.; W. S. Lee, Salem, Mass.; H. S. Tanner, Providence, R. I.; Warren Barker, Fall River, Mass.; E. W. Folson, Somersworth, N. H.; H. J. Webb, Springfield, Mass.

Canada Notes.

W. H. Wegenast, Drumbo, Ont., has disposed of his business.

Harry Ryrie, of Ryrie Bros., returned last week from a pleasure trip to Jamaica.

Lampman Bros., late of Hamilton, have purchased the jewelry business of C. H. Rieder, Woodstock.

E. Davidson, Hamilton, has remodeled and refitted his place of business, in accordance with modern designs.

Walter J. Barr, manager of the Goldsmiths' Stock Co., Toronto, has gone on a business trip to Montreal and Quebec.

P. J. Harwood, for a number of years with the late T. F. Butcher, Brandon, Man., will establish a business there for himself.

John W. Case, representing H. F. Carpenter & Son, refiners, Providence, R. I., was in Toronto last week, buying jewelers' sweepings. Frank E. McCullin, representing W. A. Rogers, New York, was in Toronto last week.

Early in the morning of March 2 a bold robber smashed the plate window of M. D. White's store, in Grand Forks, B. C. He snatched two cases of rings set with diamonds and other stones, valued at \$1,000, and made good his escape.

On the 5th inst. the employees of the Toronto Silver Plate Co., Toronto, presented George Crowther, Jr., who left the employ of the firm to go to South Africa with Baden-Powell's police, with a handsome gold wrist watch and a hunting knife.

Out-of-town buyers in Toronto, last week, included: A. Gibson and A. W. Cressman, Peterborough; J. H. Cochran, Tottenham; H. R. Francis, Grand Valley; T. A. Watson, Newmarket; W. F. McCarty, Lindsay, and H. G. Armstrong, Lucknow.

Benjamin Powell, who recently severed his connection with the American Watch Case Co., Toronto, to join Baden-Powell's South African police force, was presented with a gold watch and chain, accompanied by a purse, from the company and his fellow employees.

A strong agitation is in progress against the trading stamp nuisance, and advantage is being taken of the sitting of the Provincial Legislature to urge the passage of a bill abolishing the system. The Retail Merchants' Association are the principal organizers of the movement. On the 7th inst. a large deputation, numbering about 150 members of the association, of whom about 30 were from outside towns and cities, waited upon Premier Ross and asked that a bill permitting municipalities to pass by-laws prohibiting the use of trading stamps be passed this session. Among the spokesmen were W. B. Rogers, president of the association, and E. M. Trowern, Toronto, and A. W. Cressman, Peterborough, jewelers.

Where a partnership is dissolved and one partner, for a consideration, agrees with the other to pay the firm debts as between themselves, the one so agreeing becomes the principal and the other a surety for him.

Tariff Decisions & Regulations.

Among the decisions handed down the past week by the Board of Classification of the United States General Appraisers was the following:

DUTY ON WATCHES.

Jules Racine, Glaeuzer Frères & Rheinboldt and others imported watches (cases and movements) as entreties. These were assessed under paragraph 191, tariff act of 1897, so as to make the cases and movements dutiable separately—the movements being dutiable specifically according to the number of jewels, and in addition thereto at the rate of 25 per centum ad valorem, and the cases at 40 per centum ad valorem.

The claims advanced by the importers are: (1) That watches as entreties are dutiable at 20 per centum ad valorem, under section 6, act of 1897, as non-enumerated manufactured articles. (2) That the articles in question are dutiable as entreties, under paragraph 191, as watch movements imported in cases at the rate of 25 per centum ad valorem in addition to specified rates provided for, according to the number of jewels; in other words, that no separate duty is to be imposed upon the cases. (3) That the articles in question are dutiable under paragraph 193, act of 1897, as manufactured articles not specially provided for.

In deciding this protest the Board refer to the case of Jules Racine & Co., Sept. 27, 1898, where the same questions were raised and were all settled. It was there held that where watches were imported, consisting of cases containing complete movements, the movements and cases were dutiable *separately*—the movements according to the number of jewels and in addition thereto at 25 per centum ad valorem, as provided in paragraph 191; the cases were furthermore held dutiable at 40 per centum ad valorem, as set forth in the same paragraph. On appeal, this decision was affirmed by the United States Circuit Court for the Southern District of New York, and on a further appeal the United States Circuit Court of Appeals affirmed this decision. The protests now before the Board on the same points were accordingly overruled and the decision of the Collector affirmed.

Reappraisements.

Among the reappraisements of merchandise by the Board of United States General Appraisers last week were the following:

Precious stones, cut, from Benj. A. Soep & Co., Amsterdam, Feb. 6, 1901.—Diamonds, 246 15/32 karats, entered at 103, advanced to 145 florins per karat; mélé, 67 1/4 karats, entered at 70, advanced to 100 florins per karat; mélé, 12 1/2 karats, entered at 60, advanced to 80 florins per karat; 13 stones, 4 7/32 karats, entered at 100, advanced to 130 florins per karat; small, 8 9/32 karats, entered at 100, advanced to 145 florins per karat.

Manufactures of horn (umbrella handles), from R. Kunz & Ch. Hoffmeister, Paris, Jan. 24, 1901.—Echantillons corne, serie A to T, entered at from .30 to 4.25, advanced to from .375 to 5.3125 francs each; echantillons ivoire, serie J. F. H., etc., entered at from 1.25 to 12, advanced to from 1.5625 to 15 francs each. Add case.

Savannah, Ga.

The store of J. A. Ingram, 104 Broughton St. E., has been closed by Deputy Sheriff Sweeney, to satisfy a mortgage in favor of J. F. Williams. The stock of jewelry, etc., will be offered for sale on Monday, March 18, by the Sheriff.

S. E. Theus, of Theus Bros., has been appointed on a committee of the Confederate Veteran Association, to aid needy Confederate soldiers to secure pensions from the State of Georgia and to obtain admission for them to the Confederate Soldiers' Home, recently opened.

At a special meeting, held Monday evening, March 11, the Philadelphia Jewelers' Club decided to increase their membership limit from 175 to 200.

Waltham Watches.

SYSTEMATIC railroad watch inspection was first adopted during recent years. Introduced by a wise foresight, it has been gradually extended to almost every railroad in the United States and Canada. This safeguard for the traveling public was made possible by the construction of WALTHAM railroad watches, from which, indeed, it was the logical result. The AMERICAN WALTHAM WATCH COMPANY was the first to manufacture an 18 size full plate movement. For a quarter of a century this Company has made watch movements expressly designed for railroad use, and more than twenty years ago WALTHAM watches were selected by the British Government as the official timekeepers on the state railways in India. Successive improvements in manufacturing at WALTHAM have always enabled the AMERICAN WALTHAM WATCH COMPANY to produce the best pocket timepieces. The WALTHAM watch not only was the first, but was, and is, the finest railroad watch.

The VANGUARD is the highest quality 18 size WALTHAM movement. It was introduced in 1894 and immediately became the foremost watch for railroad men. It is the best 18 size movement one can buy. Other qualities of movements in VANGUARD model are CRESCENT STREET and APPLETON, TRACY & CO. This model has many points of superiority. Important among them are the following:

FIRST.—Its solidity and strength. While the frame of the ordinary movement is composed of seven parts, the VANGUARD model frame has but four parts. In this model separate pillars are dispensed with, the top plate and its support being in one piece.

SECOND.—The location and protected condition of the balance wheel, which is placed farther from the mainspring than in the ordinary full plate movement and accordingly is less liable to polarization that might accrue from a slight degree of magnetism in the mainspring. The value of this improvement will be apparent when it is considered that should the balance wheel, which in a quick train watch normally vibrates 18,000 times per hour, make but ten vibrations more or ten vibrations less, per hour, the watch will have gained or lost forty-eight seconds per day.

THIRD.—The use of the double roller, whereby escapement friction is reduced.

FOURTH.—The manner of securing the jewel pin in the impulse roller.

FIFTH.—The improved tempered steel safety barrel, which secures the train of the watch against dangers otherwise likely to result from breakage of the mainspring, and also allows the use of an extra wide and long mainspring, which gives the watch more than forty hours' run. This barrel may be taken out without removing the balance.

All WALTHAM railroad movements are fitted with the WALTHAM patent Breguet hairspring. This spring is hardened and tempered in form—not a flat spring merely bent into shape. It is not to be found on any other make of watches in the world.

The finish of the steel parts, damaskeening of the plates, and other features of ornamentation are consistent with the excellent timekeeping qualities of these movements.

American Waltham Watch Company,

WALTHAM, MASS.

Optical Briefs and Notes.

The Globe Optical Co., Boston, Mass., through trustee A. G. Barber, have filed with the secretary of the commonwealth their annual corporation report, which is as follows:

Machinery and store fixtures.....	\$2,779
Cash and debts	38,876
Manufactures and merchandise.....	54,218
Total	\$95,873
Capital stock	\$45,000
Debts	34,718
Profit and loss account.....	16,155
Total	\$95,873

The Maine Association of Opticians had their meeting at Portland, Me., March 6. This society are of recent birth, having been incorporated Jan. 17, 1901. The officers are: H. E. Murdock, president, Portland; Arthur P. Allen, first vice-president, Bangor; Orel E. Davies, second vice-president, Rockland; A. M. Wentworth, treasurer, Portland, and R. B. Swift, secretary, Portland. The executive committee consist of E. E. Tuttle, Portland; E. S. Pendexter, Portland; George McL. Presson, Farmington; William H. Blacar, Bangor, and J. H. Voyer, Lewiston. The following extracts from the by-laws will give some idea of the requirements of members:

"Any citizen of Maine of good moral character and known and recognized as a regular optician, having a permanently located business, and not a traveler, canvasser or peddler, or that uses any assumed title, may become an active member of this Association.

"Any citizen of Maine of good moral character engaged in selling, dealing in or manufacturing optical goods, but who has given no special study to the subject of refraction and the adaptation of glasses to defective vision, may become an associate member.

"Any person who has been a member of this Association and who has permanently removed from the State, or a person that has rendered some valuable service to the Association or to the cause of opticians in general, may be elected an honorary member of this Association."

Jacob Miller, in business with Mark Miller, optician, 86 Nassau St., New York, was arraigned Wednesday, before United States Commissioner Shields, charged with attempting to sell "washed" documentary revenue stamps to the amount of \$671. He was held for examination in \$2,500 bail. The official who made the arrest said that Miller had as a confederate one Kaufman, of 101 W. 100th St., who is now in custody. The stamps were of \$3, \$5 and \$10 denomination. The Secret Service agents say that about two years ago Miller was arrested on a similar charge, convicted and fined \$1,000, which he paid. Miller claims that he does not know Kaufman, and that the latter, to clear his own skirts, claimed to have gotten the stamps from him.

(Optical notes continued on page 60.)

Interesting Meeting of Pennsylvania Opticians.

PHILADELPHIA, Pa., March 9.—The semi-annual meeting of the Optical Society of the State of Pennsylvania, to be held

at Hotel Lafayette, Tuesday evening, will have several features of interest. The meeting of the society in the evening will be preceded by a business session of the society's Board of Examiners, of which J. F. Brinkerhoff is chairman, in the morning, at which a number of applicants who desire certificates will be examined. In the evening a discussion will probably be led by president A. Martin, who will tell of the recent attempted legislation against the opticians in New York State.

This will be followed by a consideration of the following:

"Resolved, That a regular stated charge should be made by the refracting optician for the examination of eyes."

This is a question in which every optician has the liveliest interest, and is one, however, in which a wide divergence of views is held. During the debate, Tuesday evening, President Martin will present the affirmative side of the question, while secretary C. A. Longstreth will voice the sentiments of those who believe there should be no charge for the examination of eyes.

Bill to License Opticians in the Illinois Legislature.

CHICAGO, Ill., March 9.—A movement is on foot to secure the passage of a State law to compel the licensing of opticians. A bill has been introduced into the House of Representatives, at Springfield, which is entitled "An act to insure the better education of opticians, to regulate the practice of opticians in the State of Illinois and to create a State Board of Opticians." Section 1 of the bill provides that after six months from the passage of the act it shall be unlawful for any person not a registered (or licensed) optician to practice as an optician, and any violator shall be liable to a penalty of not less than \$25 nor more than \$100 for the first offense, and for each subsequent offense to a double penalty.

The bill provides for a State board of opticians as follows:

"A State board of opticians, to consist of five practicing opticians of recognized standing and ability, each of whom shall have practiced his profession for at least five years in the State of Illinois, is hereby created, and the Governor, with the advice and consent of the Senate, shall, within 30 days after the passage of this act, appoint the members of said board of opticians. The persons so appointed shall hold their offices for five years."

The board to be appointed in the discretion of the Governor, by the Illinois Optical Society, will be required annually to report to the Governor and to the Illinois Optical Society upon the conditions of the optical profession and trade in Illinois, which report shall also furnish a record of the proceedings of the board for the year and also the names and place of business of all opticians duly registered under this act.

The bill provides that every certificate of registration, or license, shall be conspicuously exposed in the place of business of the optician possessing it; and every person holding a license shall have it recorded in the office of the clerk of the county in which he resides or does business, within three months of its date, and until the license is recorded the holder is forbidden to practice—to sell his goods.

43 Rue de Meslay, PARIS

Telephone, 2133 Cortlandt

17 Maiden Lane, NEW YORK

New York Notes.

The Patent Case Co., 322 W. 35th St., have ceased to manufacture

The American Watch Case Co. have commenced manufacturing at their new shop, corner Elm and Leonard Sts.

Follmer, Clogg & Co., umbrella manufacturers, formerly of 414 Broadway, now occupy the entire second floor of 395 Broadway, where they have one of the largest and handsomest salesrooms of the kind in the city.

The following judgments against I. M. Finkelstein were recorded canceled last week: By Max Freund & Co., Dec. 6, 1892, for \$562.22; J. McCreery and others, Dec. 9, 1892, for \$808.92; C. Jackson and others, Sept. 1, 1897, for \$133.45; and by Alois Kohn & Co., Aug. 23, 1898, for \$726.97.

Lissauer & Co., who own the building at 12 Maiden Lane, have begun extensive improvements to make it a first class office structure. In about two months, when these improvements are completed, Henry E. Oppenheimer & Co. will occupy the entire second floor, on which their office is now situated, trebling their present office space.

A grand banquet and ball will be held Sunday, March 17, by the New Yorker Uhrmacher Verein, in celebration of the 25th anniversary of the founding of the society. The event will take place at William Allaire Hall, 194 Third Ave., near 18th St., and an enjoyable time is expected. J. Schneisters is president of the society and Emil F. Ungerer is the secretary.

Albert Ulmann, one of the founders of THE JEWELERS' WEEKLY, has written a "Landmark History of New York," which D. Appleton & Co. will issue in a few days. The book describes and illustrates all the interesting historic sites on Manhattan Island, and contains much valuable his-

toric matter. The origin of Maiden Lane and references to the section surrounding it form one of the attractive features of the work.

Judgments against Herman I. Dietz aggregating over \$5,000 were recorded canceled last week. They were by H. A. Groen & Bro. for \$849.41, entered Feb. 10, 1896; B. Berman *et al.*, \$566.01, entered July 27, 1896; J. Vonder Linden, \$1,021.17, entered June 28, 1895; L. Rothschild, \$197.87, entered Nov. 18, 1895; Schulz & Rudolph, \$728.01, entered Jan. 28, 1896; L. Rosenberger *et al.*, \$278.13, entered Dec. 21, 1895; J. Vonder Linden, \$355.02, entered June 28, 1895, and by Louis Strasburger's Son & Co., \$1,150.30, entered March 14, 1896.

Leopold S. Oppenheimer, Oscar Lichtenstein, Frank H. Rohter and John P. Cavanaugh, the four men arrested at the office of William I. Rosenfield, Feb. 21, and accused of attempting to swindle him out of \$5,000 worth of jewelry by means of a bogus mortgage on real estate, have been held by the Grand Jury. Magistrate Hogan, of the Centre St. Court, last week handed down his decision, which he had reserved after the examination, holding the men but reducing their bail from \$5,000 to \$2,000 each. This reduction was owing to the fact that the crime was only attempted grand larceny. The four prisoners were indicted by the Grand Jury, Monday, and were called to plead, before Judge Newburger, in Part I. of General Sessions, yesterday.

The Supreme Court of the United States, last week, handed down a decision denying the petition of the Solicitor-General for the writ of certiorari to bring before that court the action known as the United States *vs.* Rud. C. Hahn, decided by the United States Circuit Court of Appeals, in New York, a year ago. This action was in rela-

tion to the duty under the tariff of 1883 upon agate penholders and other articles, and among other things involved the question as to what was a precious stone. The writ was sought in order, as told in THE CIRCULAR-WEEKLY a week ago, to get, if possible, from the highest court, an adjudication as to exactly what is and what is not a precious stone. In refusing to take up this case, the Supreme Court have, say the attorneys for the importers, indicated that they do not take issue with the series of decisions of the Circuit Court of Appeals in which the latter court gave a broad construction to the term "precious stone."

The New York Court of Appeals at Albany last week heard arguments on the final appeal in the action of interpleader, brought by The Jewelers' League against Conrad Hepke. This suit is to determine the claim of Hepke to the insurance to Frank X. Becker, of whom he was a creditor. Hepke claimed the full \$5,000 under an assignment of the policy, but the lower court awarded him but \$635, the actual amount loaned on it, giving the remainder to Thekla M. Becker, the daughter of the deceased. The many interesting features of the case and the importance of Judge Russell's decision, handed down Aug. 20, 1899, to the members of The League, were spoken of in full in THE CIRCULAR-WEEKLY at that time and again when the case came up for decision by the Appellate Division, last March. In the argument last week Mr. Hepke, the appellant, was represented by Walter R. Beach, while Abel Crook, counsel for The Jewelers' League, was specially retained to appear for Thekla M. Becker, the daughter. Decision was reserved.

The quarterly meeting of the directors of the International Silver Co. will be held today, and there is much speculation in the silver plate trade as to what action the

board will take in relation to a dividend on the preferred stock. Only one quarterly dividend has been paid and two have been passed. No information as to the probable action of the board could be obtained at the office of the company, in New York, Monday. The 7 per cent. cumulative pre-

ferred stock of the International Silver Co., to the amount of \$5,107,500, has been admitted to the unlisted department of the Stock Exchange. The quotations last week averaged 35.

Fanny Morris, who conducts a jewelry and pawnbrokers' sale store at 22 Bow-

ery, made an assignment Monday to Edwin F. Stern. She has carried on the business for several years. Mr. Stern said that the liabilities are \$2,500 and assets \$1,000.

Wiener & Levy, 1225 Broadway, have been succeeded by Daniel Levy, who conducts the business under his own name.

In accordance with the order of Judge Brown, noted last week in these columns, bids for the stock and fixtures of Solomon Seligman, the bankrupt jeweler and picture dealer, formerly of 10 E. 14th St., were opened in the United States District Court, yesterday morning. Bids were received for the stock up to the amount of over \$9,000, but all these were rejected, while a bid for the fixtures of \$1,050 was accepted. The stock will be sold at auction Friday.

Chief of Police John Hayes, of Kansas City, Mo., warns the jewelry trade to look out for a man calling himself B. Rosenthal, an itinerant vendor of diamonds and jewelry, against whom he has a warrant for grand larceny and embezzlement to the amount of \$2,500. Rosenthal is about 30 years old, heavy build, about five feet six inches and weighs about 175 pounds. He has dark, muddy complexion, very thick black hair inclined to curl, smooth face and is bow-legged. He is a Polish Jew and speaks several languages, is a loud talker and great flatterer, and begins his sentences with the word "listen" or the word "understand." He is of a very nervous temperament and has an important air. Chief Hayes asks if Rosenthal is found that he be arrested at once and a telegram sent to the Kansas City police, who will send on immediately for him.

The schedules of Robert Welch, doing business as Welch & Miller, manufacturers of jewelry cases, 169 Broadway, were filed yesterday in the Clerk's office of the Supreme Court, Brooklyn. Mr. Welch made a general assignment March 2, giving preferences to his wife, Sarah M. Welch, for \$1,719, for borrowed money, secured by a chattel mortgage, and to the estate of his father, Robert Welch, for \$100. The assignee is E. L. Roake, lawyer, of the firm of Lansing & Roake, 177 Broadway. The assignment is due, according to Mr. Welch, to a general decrease in business since the panic of 1893, and to the competition of sweatshop and contract made goods. The schedules show the liabilities to be \$13,619 and the assets to be nominally \$11,567 and actual worth \$6,483. Assignee Roake stated that he had not yet determined when he would call a meeting of the creditors, as he had not yet realized anything on the assets and was not in a position to state what the estate would pay or what offer Mr. Welch would be able to make them. The credi-

tors, he stated, were but few in number and all friendly to the insolvent, as he had dealt with them for many years. Mr. Welch's business is one of the oldest in its line and he has been in it since 1868, conducting it alone for some years past. Mr. Welch is well known in the jewelry trade and had the reputation of making a very fine quality of jewelry cases.

Walter M. Jaccard, president of the Jaccard Jewelry Co., Kansas City, Mo., accompanied by his wife, paid a visit to this city last week.

An adjourned meeting of the creditors of A. S. Koplik & Son was held at the office of referee in bankruptcy M. Cox, 63 Wall St., Thursday afternoon. H. L. Herzog, counsel for several creditors, objected to claims filed by the estate of Rosalie Koplik, I. Hirsch & Son and other claims by members of the Koplik family, aggregating in all \$12,500, on the ground that they were fraudulent and fictitious and had been paid. He based his objection on the statement that the records in the Sheriff's office show that the judgments by Rosalie Koplik and I. Hirsch & Son and others on which the bankrupts were sold out, were fully satisfied. The attorney for the creditors holding the disputed claims offered to withdraw them, but this Mr. Herzog would not agree to. The referee decided that the claims should not be withdrawn nor would he allow the creditors to vote on them. On consent of all parties the referee was instructed to appoint a trustee and the meeting was adjourned until to-day, for the purpose of taking testimony on the alleged fraudulent character of the claim.

BROOKLYN.

Miss Louise Scheer, daughter of William Scheer, manufacturing jeweler, 45th St. and Fifth Ave., Manhattan, and Edmund J. May were married Thursday evening at the home of the bride, 619 Marcy Ave. Rev. Dr. J. J. Heischmann officiated. Charles H. May was best man. Only members of the family were present. Mr. and Mrs. May left on an extended trip south.

An auction sale of the stock of M. Straus, retail jeweler, 409 and 411 Fulton St., commenced Monday and will continue at 11 o'clock A. M. daily until further notice.

tion. The sale is conducted by auctioneers A. J. Comrie and John H. French.

Louisa Vath, who was arrested about a month ago with Harry De Vere on complaint of Fred Martin, jeweler, 933 Broadway, was last week committed for three months in the Court of Special Sessions. The two other complaints made against De Vere and the girl mentioned last week will not be pressed against Miss Vath. De Vere did not respond when his name was called. He was out on \$200 bail and the bond was declared forfeited.

SPECIAL NOTICES

IN THE

JEWELERS' CIRCULAR-WEEKLY

PRODUCE THE

DESIRED RESULTS.

It's Stamped In The Case.

There is no guess-work about the gold in BELL SPECIAL 14K. GOLD-FILLED CASES. Every case is 10 dwt. standard, that is, every 18 size hunting case contains 10 dwts. of gold—other sizes in proportion. You know just what you're getting and you also know that you're getting more gold than is in any other gold-filled case. When you sell these cases you make not only the retailer's profit but the middleman's also. We sell to you direct.

Any emblem or monogram, plain or engine-turned, made to order for from 25 cents to \$1.00 over price of plain polished case.

E. Hancock Co.

Newark.

It was reported last week that the build-
ing on Broad St., wherein J. Frank Beers
conducts his jewelry business, had been
sold by Thomas B. Allen, the owner.

Carington & Co., whose jewelry factory
at 19 Green St. is to be torn down to make
way for the new City Hall, have purchased
a lot, 25x100 feet, in Frelinghuysen Ave.,
corner of Wright St., and will build a
factory; \$1,850 was paid for the lot.

United States Marshal Thomas J. Alcott
will hold a sale in the Post Office building,
Thursday, March 24, of sets of diamonds,
pearls, rubies, emeralds, opals, turquoise,
sapphires, etc., consisting of rings, ear-
rings, bracelets, brooches and the like, all
having been forfeited to the United States
for violation of the customs laws. In the
list are 37 diamond rings.

Baltimore.

J. Stuart MacDonald, president of the
Union League, was at the head of that
organization in the inaugural parade at
Washington, March 4.

John Smith, alias "Boston Frank," plead-
ed guilty, in Part 2, of the Criminal Court,
March 7, to the larceny of a diamond pin,
valued at \$75, from J. Stuart MacDonald,
jeweler, and was sentenced to three years
in the penitentiary. The crime was com-
mitted Jan. 25, and after the police had
arrested Smith and looked up his record
they concluded they had captured a noto-
rious criminal. They describe him as a
"pennyweighter." When asked by Judge
Harlan what he had to say, Smith replied
only that he had never been arrested in
this State before. The Judge at once im-
posed the sentence without comment.

Jacob Epstein, proprietor of the Balti-
more Bargain House, by William Pinkney
White, attorney, instituted three suits in
the Superior Court, March 8, to recover
on policies of insurance on his stock in
the building on Baltimore St., near How-
ard, which was destroyed by fire Dec. 8.
Two of the suits are against the Niagara
Fire Insurance Co., of New York, the
claims being for \$10,000 and \$5,000, respec-
tively. The other suit is against the Man-
hattan Fire Insurance Co., of New York,
to recover \$5,000. All the other insur-
ance companies who had risks on the
property have paid the claims against
them.

J. A. Conn, Cameron, Wis., has had a
time clock placed in his store.

Copyrighted Sept., 1900, by S. C. SCOTT.

Whether loose

or mounted every diamond we send out is marked with a grade number or letter to indicate the quality, and, remember, we guarantee them to be exactly as represented.

A feature of our Grading System is that it tells without examination whether a stone is perfect or not. This is an aid to even those who are well posted in the different qualities.

Dealers who do not feel competent to rely entirely on their own judgment will find our System a great help, both in ordering and selling.

Our Guarantee, in addition to yours, makes easier selling and satisfied customers, and the additional satisfaction of having dealt fairly with them.

Our prices, you will find, will compare favorably with any in the market. When you have a prospective sale for something not in stock, a trial order will convince you.

News Gleanings.

A. M. Molesworth has opened a store at Blanchard, Ia.

Mrs. F. M. Vuille, of St. Joseph, Mo., has been sued for \$9.

Nutter Bros., Martinsville, Ind., have put in new wall cases.

George Schrody has opened a jewelry business in Lansing, Ia.

Ole Knudson, of Valley City, N. D., has moved to a new location.

W. B. Kennedy, Eureka, Utah, has discontinued the jewelry business.

W. A. Parsley has opened a new stock of jewelry in Washburn, N. D.

Emil Sutter, Abilene, Kan., has filed a voluntary petition in bankruptcy.

J. Harvell & Son, Litchfield, Ill., are putting in new fixtures and stock.

D. B. Judd has moved his stock of jewelry from Dawson to Chester, Neb.

M. O. Stanley, Ponca City, Okla., has given a chattel mortgage for \$1,200.

Charles W. Keeler, Binghamton, N. Y., will remove to 71 Court St. on April 1.

George H. Lang, Mankato, Minn., has bought a residence property in that city.

M. Barr & Co., Howard Lake, Minn., have disposed of their stock of jewelry.

A voluntary petition in bankruptcy has been filed by L. W. Mowry, Slaton, Minn.

A. G. Foggman, Hillsboro, N. D., was married in Portage, Wis., to Miss Helen Schneider.

D. C. Baker, Washington, Pa., has sold a large safe to Fred. C. Fleming, of Fairmont, W. Va.

A bank is reported to be in possession of the dry goods and jewelry store of P. Auspitz, Perry, Ia.

John M. Holm, Rosseau, Minn., was married recently in Warren, Minn., to Miss Isabella Isaacson.

L. Epstein & Co. have filed articles of copartnership and will conduct a jewelry business in St. Louis, Mo.

Rachel Goldman has given a bill of sale on her jewelry business in St. Louis, Mo., for a consideration of \$350.

Fred. H. Rees, Elmira, N. Y., has admitted to partnership Dan E. Rice, and the firm are now Rees & Rice.

Laure Snodgrass, New Palestine, Ind., has disposed of his stock and contemplates going to Oklahoma to make his future home.

Harry Bullard, Wellsville, N. Y., is now occupying the entire store in which he is located, and has had it fitted up in a very neat manner.

Robbers broke into the store of Henry Croessmann, at Duquoin, Ill., Wednesday, taking watches, rings and other articles valued at \$800.

Rumor has it that E. D. Vosbury, Binghamton, N. Y., is closing out his stock, preparatory to a discontinuance of the jewelry business.

The Seastrunk-Roy Mfg. Co. have opened up for business in San Antonio, Tex., and will conduct a jewelry manufacturing, wholesale and repair business.

Cleaver Bros. & McIntosh, Boone, Ia., have bought the business of E. C. Flinn, Carroll, Ia. The business will be continued as a branch at Carroll, in charge of W. H. Cleaver.

The stock of the bankrupt Fred J. Stillson, Atlanta, Ga., had been advertised for sale in bulk, but as no satisfactory bid has been received the goods may be sold at special retail sale.

The jewelry store conducted by the late J. A. Schrom, Coopers town, N. Y., is to be reopened by Mrs. Schrom and managed by Samuel White.

The Grand Jury have dismissed the case of Bessie Green, the young woman arrested recently upon the charge of stealing an opal ring valued at \$5 from Welsh & Bro., Baltimore, Md.

Among the articles selected by the British Chancellor of the Exchequer on which to place increased duties to offset the decline in England's foreign trade, are clocks, most of which are from the United States.

The Stanton-Nickett Jewelry Co. have been incorporated to do business at Brookings, S. D., with a capital of \$25,000. The incorporators are Horace Nickett, Elton G. Stanton and George Hall.

A man known as Zibe Rife is reported to be defrauding Iowa people. He makes claims, at times, that he is about to open a jewelry store, but does not do so. He has been at Marne and Atlantic, Ia.

E. L. Rinckenbach, Harrisburgh, Pa., celebrated the 14th anniversary of his engaging in business in that city, Tuesday evening of last week, with a banquet to his force of clerks and a few friends at his home.

The Diamond Tontine Savings Co. have been incorporated at Savanna, Ill., with capital \$1,500, to sell diamonds on the instalment plan; incorporators, Charles Soltow, Ralph Thompson, William C. Thompson.

The C. F. Dann Mfg. Co., of Buffalo, N. Y., were incorporated at Albany, N. Y., on March 5, to manufacture jewelry. The capital is \$10,000, and the directors are Charles F. Dann, J. I. Block and Sigmond Bock, all of Buffalo.

J. O. Van Voorhies, Osawatomie, Kan., has purchased new stock and also a number of decorative attractions for his window and store, including a ship chronometer, an old army carbine, one of the first breech loading guns made and a lot of sabre bayonets.

A petit larceny case brought against Joseph Miller, of Buffalo, president of the Tontine Diamond Co., by Judge Rogers, of Tonawanda, N. Y., alleging that Miller had appropriated to his own use \$20 invested in shares of the company by Rogers, has been settled out of Court.

E. H. Kennerdell, of Tarentum, Pa., proprietor of a jewelry store in Salem, O., has, owing to the continued illness of his local manager, Charles B. Kennerdell, decided to close his Salem store. The goods will be sold at special sale. Charles B. Kennerdell was taken seriously ill just before Christmas and has not recovered.

In a fire which practically destroyed the business section of Park River, N. Dak., Feb. 28, the stores of Andrew Anderson and S. O. Huseth were burned out. Mr. Anderson saved most of the contents of his store, which was covered by insurance. Mr. Huseth saved practically all his goods and carried a small insurance on stock, but none on building.

W. A. Brashfield will open a store at Gainesville, Tex.

George P. Kirtland, Nashville, Tenn., has moved to 208 Union St.

A. S. Smith, Birmingham, Ala., has recovered from six weeks' illness.

T. J. Dorrah, Springfield, Tenn., has added a line of jewelry to his stock.

Robert A. Ball, Grand Rapids, Mich., will open a store at Traverse City, Mich.

F. W. Terhune, for some time at Sioux Falls, S. Dak., has moved to Groton, S. Dak.

F. H. Coburn, East Troy, Wis., has moved to a new location in the same town.

Wallace Brown, Geneva, O., will contract his business and run it on a smaller scale.

H. Zuckweiler, Pekin, Ill., is improving the conveniences and appearances of his store.

T. A. Long, of Blue Ridge, Tex., has purchased the business of Avy Edwards, Howe, Tex.

Charles H. Pifer, Pueblo, Col., suffered from fire last week, the building in which he was located being gutted.

Michael Adams, Dubuque, Ia., is improving his building, which will be occupied by a jewelry store when completed.

The store of Charles, J. Hill, Southbridge, Mass., was broken into last week and goods to the value of \$80 or \$90 were taken.

William Hover, 64 years old, of Frankfort, N. Y., was severely injured by being struck by a railroad train at Utica, N. Y., a few days ago.

The store of P. M. Sawyer, Arlington, Ia., was burned out March 5. His loss is estimated at \$2,500, with an insurance of \$1,700. J. Valentine lost \$300 by the same fire; covered by insurance.

The O'Hara Waltham Dial Co., Waltham, Mass., have adopted a 10-hour schedule five days a week, and will be closed all day Saturdays. The factory has been running on eight-hour time, with a Saturday half-holiday.

Albert Lancaster, of Birmingham, Ala., was married, Feb. 28, at Chattanooga, Tenn., to Miss Annie Warner. His start on the matrimonial journey was delayed a few hours owing to the fact that a hotel clerk forgot to call him in time to catch a train.

Robert T. Young, New Bedford, Mass., put jewelry, money and clothes in a trunk one night last week. Burglars broke in, tried to pry open the trunk lock, could not do it, and therefore carried away the

trunk. Police officers found it later, emptied of all valuables.

Mrs. Lena Kupfer recently sold her jewelry store at Dillon, Mon., to Fidel and Fred Huber and in future it will be conducted under the firm name of Huber Bros. Fidel Huber has been manager of the store since the death of his uncle, Mr. Kupfer, about 20 years ago.

The building which has been occupied by the Gale Jewelry Co., Norfolk, Va., for the past 20 years, will be replaced by a new building. The Gale Jewelry Co. have secured a store room in the new building, but will be forced to move from their present stand temporarily.

E. Bourgeois, of Dijon, France, father of A. Bourgeois, Jackson, Miss., has been enjoying a trip through the eastern part of the United States. He spent about two weeks in Jackson as the guest of his son and expressed himself as highly delighted with America and her institutions.

The stock and good will of D. B. Anderson, Marietta, O., have been purchased by Reigner & Wittlig, composed of A. P. Reigner and Henry Wittlig. Mr. Reigner has been in the store for a number of years. Mr. Wittlig has grown up in the business under his father, Jacob Wittlig.

Robert L. Boyd, who was arrested on Feb. 8, charged with 15 cases of larceny from his former employers, M. Goldsmith & Son, Washington, D. C., was to have been given a hearing in the Police Court Wednesday, but the prosecuting attorney gave notice that he would continue the case indefinitely.

D. W. Whittle, an associate of the late D. L. Moody, died March 4, at East Northfield, Mass., aged 60 years. He was born in Chicopee Falls, Mass. He served in the civil war, married in Chicago in 1863, and went with the Elgin National Watch Co. In 1875 he gave up his lucrative position to give his entire time to evangelistic work.

Charles C. Walter, one of the oldest and best known jewelers and watchmakers of Richmond, Va., died March 4, aged 75 years. Grip was the immediate cause of his death. Mr. Walter was born at Richheld Springs, N. Y., Sept. 30, 1825, but had been a resident of Richmond for more than 50 years. Fifty-two years ago he married Miss Zellean V. Felows, of Richmond, who survives him. He leaves two children, Mrs. L. T. Robertson, of New York, and Charles W. Walter, of Richmond, and Miss Lena Walter, an adopted child. Mr. Walter was a prominent Methodist. He was a member of the Knights of Honor.

THE BASSETT JEWELRY CO.,
Providence, R. I.

Chicago Notes.

All communications in reference to the Chicago department of The Jewelers' Circular-Weekly, addressed to Stephen Parlin, 134 Van Buren St., Room 414, Chicago, will receive prompt attention.

Louis Manheimer is taking a short rest at Hot Springs, Ark.

Benj. Allen left Saturday for a 10 days' visit in New York and vicinity.

Star Watch Case Co., Elgin, have increased their capital stock from \$30,000 to \$100,000.

Mr. Miller, for J. W. Forsinger, was in town for a day and left for his southern and western territory.

Frank Sproehnle has gone west to look after the interests of Sproehnle & Co. in that territory.

A. C. Becken has returned from an extended visit in the southwestern territories, accompanied by his family.

Miss Spencer, of John Spencer & Daughter, Edgerton, Wis., was in town last week making selections for their stock.

F. H. Caruthers, in charge of the Chicago office of Hipp, Djidshcim & Bro., is back from a 10 days' visit at the eastern house.

The Anchor Silver Plate Co. have moved their Chicago offices from the fourth to the eighth floor of the Silversmiths' building.

Mr. Swartzchild, after an extended visit at Laredo, Mexico, has left Mexico for California, where he will spend some weeks at Pasadena.

Mr. Russell, of Russell & Lyon, Jacksonville, Ill., and Mack A. Hurlburt, Fort Dodge, Ia., were among the more prominent buyers of the week.

Sydney Joseph, Eliassof Bros. & Co., was a caller on the trade, and says there is nothing wrong in business, judging from the lines he represents.

Martin Meyer, Chicago representative of the J. D. Bergen Co., is on a trip east, covering Toledo, Cleveland, Pittsburgh and central western cities.

Mine and Quarry News Bureau, Chicago, have changed their name to Globe Chronometer. The object is also changed to manufacture jewelry, novelties and timekeepers.

C. F. Gillmann, jeweler, N. Clark St., for seven years president of the North Side Business Men's Association, has been nominated for Alderman by the 23d Ward Republican Convention. There was no opposition.

Mr. Archer, of Wadsworth & Archer,

Beatrice, Neb., passed through here last week on his return home from the President's inauguration at Washington, which he had attended as a member of the Nebraska Governor's party.

Manager Davidson, of the Philadelphia Watch Case Co., says business continues strong in their lines, that the Bates & Bacon line is swamped with orders and that this is practically true of both lines. The strength is attributed to quality and finish of the goods named.

W. O. Kellogg has taken the Watson & Newell Co.'s line, with offices at 405 Masonic Temple. The Watson & Newell Co. have purchased the fixtures of the A. F. Towle & Son Co., at that number, and will carry a full sample line and stock at their Chicago headquarters.

Otto Matthei & Co., manufacturing jewelers, have established in business at 820 Silversmiths' building. Otto Matthei was with Schrader-Wittstein Co. and their predecessors for 22½ years. The firm consist of Otto and Henry Matthei, brothers, the latter also for many years connected with Chicago houses.

J. F. Kappelman & Co. have succeeded E. M. Frye & Co., watch case repairers and platers, eighth floor, Silversmiths' building. Mr. Kappelman was formerly in the jewelry commission business and became identified with the repair and plating business through having had considerable work of this kind done by others. Mr. Frye will remain with the new concern for the present.

Frederick Purdy, of J. H. Purdy & Co., secured the first patent filed in the new century, it being a process for manufacturing fuel gas, which by the process can be manufactured and placed in the holder at a cost of 10 cents per 1,000 feet, based on the current prices for coal and crude petroleum. Outside these products only air and water is required. It is the intention to interest municipalities and large manufacturers in the new process.

Fred Foster was brought back to Chicago from Boston, March 8, as he is wanted on a charge of obtaining goods under false pretenses. Foster, as is claimed by M. A. Mead & Co., 103 State St., represented himself as an agent of an Alaskan jewelry house and selected 115 gold watches. On his request, the jewelers say, the watches were sent to a wholesale jewelry firm on Market St. by a messenger, who was met in front of the building by Foster. The latter, it is charged, took the watches and handed the messenger a worthless check for \$1,265. Thirteen of the watches have been recovered.

L. T. Kuehl, son of George Kuehl, importer of cuckoo clocks, was a conspicuous figure at the McKinley inaugural at Washington. He was selected as Illinois guidon bearer and marched just in advance of Governor Yates. At the age of 18 Mr. Kuehl enlisted in the Illinois Volunteer Cavalry, and was mustered out at Chickamauga in October of that year. He enlisted again in old Troop C, Illinois Cavalry, and served as private, corporal and sergeant, being selected by his captain as color-bearer for his ability to handle a guidon. He now represents the firm of George Kuehl during the absence of Theodore Kuehl in Europe.

The Commercial Travelers' Outing Club, a social organization of members of the jewelry and cognate trades, have fitted up a pretty club room in the Baltimore building for social purposes, and as a permanent home and meeting place for members and their friends. The officers of the club are: Ed. A. Tyler, president; William Barker, Jr., vice-president; Thomas J. Hoefler, treasurer; Hugh E. King, secretary, and Paul A. Schordiche, corresponding secretary. The personnel of the management of the club is alone sufficient to assure continued success of the club, and the idea of a permanent club home appeals strongly to the traveling men in jewelry lines. Aside from social features the club gives one the opportunity of a broadening of business views and has been warmly commended by those who have investigated it.

St. Louis.

Louis McDowell, who has been identified as the young man who secured an \$800 brooch from Merrick, Walsh & Phelps Jewelry Co., by representing himself as W. J. Lemp, Jr., has been charged with obtaining goods under false pretenses by the Grand Jury here.

Otto Homann was arrested at the home of his prospective bride, March 5, while assisting in the preparations for their wedding, on a charge of forgery. He forged a check for \$250 and presented it in payment for \$185 worth of jewelry purchased from F. H. Niehaus & Sons Jewelry Co., 1302 Franklin Ave. As Mr. Niehaus was well acquainted with the boy's father he accepted the check and gave \$65 in change. The articles were two rings, two watches and chains, one brooch and a pair of studs. They were to be the wedding gifts of the young man to his sweetheart. Upon the young man's promise of good behavior his father settled the af-

fair with Mr. Niehaus, who refused to prosecute young Homann, and he was released.

Rudolf Niehaus, for many years with the R. B. Gray China Co., is now with the Mermod & Jaccard Jewelry Co., in the china, glass, clock, bronze and marble department.

Owing to increase in business the Baum-Massa Jewelry Co. have been compelled to enlarge their quarters. They have taken in two rooms adjoining their present quarters in the Commercial building, southeast corner of 6th and Olive Sts., over the Merrick, Walsh & Phelps Jewelry Co.

Minneapolis and St. Paul.

C. F. Zinn, jeweler, St. Paul, was fined in the police court for running down a young woman with a bicycle.

J. M. Bennett, of the Reed-Bennett Co., Minneapolis, has gone to New York, Providence and other eastern cities.

F. L. Bosworth, of F. L. Bosworth & Co., wholesalers, Minneapolis, is back from a trip through the Iron Range in northern Minnesota.

Miss Ethel Mowry, a well known saleswoman for C. D. White & Co., Minneapolis, has gone with R. B. Wegner & Co., wholesalers, 400 Ryan block, St. Paul.

S. B. Abeles, Minneapolis, plans extensive alterations to his store. The rear will be entirely remodeled, the optician's room fitted up and changes made in the machine shop.

Mr. Wheeler, Cando, N. D.; A. C. Peterson, Gibbon, Minn.; J. Coddon, St. Croix Falls, Wis., and Mrs. N. Seewald, Velva, N. D., were buyers in the twin cities, last week.

Weld & Son, jewelers, 520 Nicollet Ave., Minneapolis, will remove soon to 524 Nicollet Ave. The vacated store, with the room adjoining, is to be occupied in about a month by S. Jacobs & Co., jewelers.

Kansas City.

C. W. Nelson, formerly of Cameron, Mo., intends to open a store at Odessa, Mo.

The Meyer Jewelry Co. will soon place on the market a new polishing lathe. The lathe is being made for them exclusively.

Charles H. Harsch and L. J. Marks expect to continue their auctions in the near future, both being anxious to close out their stocks.

P. Margolis is recovering from the serious operation which was performed on him at the German Hospital, two weeks ago, and expects to be back at his store in a short time.

G. E. Jaccard, of St. Louis, the father of Walter M. Jaccard, of the Jaccard Jewelry Co., spent the latter part of the past week here, attending the meeting of the directors of the Jaccard Jewelry Co.

The trial of Albert Holbrook, charged with stealing rings from the Barr Jewelry Co., Feb. 22, has been postponed for a couple of weeks. The rings were all recovered and will be returned to Mr. Barr after the trial.

Kansas City is becoming a popular place

for young married couples to spend honeymoons in. Ten couples, of which the grooms were jewelers, visited here the past month, and Monday morning, March 4, Charles A. Wolf, Topeka, Kan., and Miss Grace Wittlesey, Topeka, came here and were married by Judge Gibson. Albert Fricke, with Margolis & Metzger, was married to a young lady from Olathe on March 6.

The out-of-town merchants who called on the trade last week were: James B. Hayden, Topeka, Kan.; Andrew Melluish, Ottawa, Kan.; A. B. Phinney, Overbrook, Kan.; F. M. Dillon, Bonner Springs, Kan.; Jules Schneider, Sterling, Neb.; D. W. Hope, C. W. Nelson, Granite, Okla.; Frank M. Schutz, Shenandoah, Ia.; Louis Hoffmann, Leavenworth, Kan.; G. W. Lewis, Herington, Kan.; L. M. Conn, Cameron, Mo.; S. A. Pence, Kearney, Mo., and T. J. Mitchell, Missouri City, Mo.

Omaha.

J. C. Brown, Thayer, Neb., has closed out.

G. A. Parberry, Surprise, Neb., has closed out.

George G. Schram has opened a jewelry store in Madison, Neb.

C. L. Shook, of the Shook Mfg. Co., is taking a short run over the State.

Paul H. Anderson is opening a jewelry department in his store in Bassett, Neb.

William D. Abel, Petersburg, Neb., has sold out his jewelry store and is now employed by the Shook Mfg. Co., of Omaha.

Chicago, No. 133 Wabash Ave.
New York, No. 9 Maiden Lane, Gill Bldg.
San Francisco, No. 66 Crocker Bldg.

Cincinnati.

Mr. Pyle, of Pyle & Tate, Xenia, O., was in town, last week, buying goods.

Julian Schwab, son of A. G. Schwab, is making his initial trip for A. G. Schwab & Bro.

Mr. Hardy, of Hardy & Hayes, Pitts-
burgh, Pa., was here, Saturday, looking
over the new goods at Rookwood pottery
and picking up other goods made in the
Queen City.

Constant Van Reeth, who is making dia-
mond cutting and repairing a specialty, is
opening a profitable avenue to customers in
matching stones and recutting, which is
proving remunerative to buyers of odd
stones.

Gustave Fox & Co. made an elegant Past
Exalted Ruler badge for the Des Moines,
Ia., Lodge of Elks, that cost \$150. It is of
solid gold, 2½x3 inches, suspended from a
fancy scroll bar, with the raised name in
colored gold and having a diamond center.

The Miller Jewelry Co. will take the cor-
ner rooms in the Lion building, which are
on the floor they now occupy. These rooms
take in the whole floor on the north and,
being corner rooms, give more light, as
well as more space for increasing business.

S. C. Citroen has a 2½ karat diamond
which has a black spot in it, called carbon
vein, which he is taking out for a customer,
with less than a half karat loss of the stone.
It is a peculiar and unusual defect, but the
operation will make a gem, now marketless,
of considerable value.

A large bronze plate is displayed in
Frank Herschede's window, this week, with
an inscription commemorating the location
of the old Fort Washington, which was de-
molished in 1808. It is to be inserted in a
granite monument to be located on the site
of the old fort.

Among the Cincinnati travelers who ar-
rived home, last week, to renew their stock
were: S. Lindenberg, of Bene, Linden-
berg & Co.; B. S. Newman, with Frohman
& Co.; Ed. C. Pfaffle, with L. Gutmann &
Sons; Gus Frank, with Herman & Loeb; J.
C. Miller, of The Miller Jewelry Co.; Jo-
seph Mehmert; S. Peck, of Peck & Selmeir.
All reported sales very good.

Indianapolis.

H. A. Comstock is back from Hot
Springs, Ark., much benefited by the
change and rest.

Aaron Pursell, Noblesville, Ind., passed
through the city last week, on his way to
Broad Ripple, where he was called by the

serious illness of his father, who died a
few days later.

At 3 o'clock on the morning of March
2 the pottery works at Gas City, Ind., were
destroyed by fire. The fire department is
a volunteer organization of the citizens,
who fought the fire long and bravely. Al
Rothinghouse, of the jewelry and drug
firm of Rothinghouse Bros., was caught
under falling debris and so severely in-
jured that death resulted two days later.

Detroit.

George Kinch recently opened a new
jewelry store at Chesaning, Mich.

Arthur A. Carmer has removed his jew-
elry stock from Lansing to Eaton Rapids.

O. L. Altenburg announces that he will
shortly open a new jewelry store at
Ithaca, Mich.

D. W. Davis, of this city, will shortly
open a jewelry store in the new Steketee
block, Grand Rapids.

M. L. Barnard, formerly with Traub
Bros. & Co., this city, now with J. B.
Bowden & Co., New York, will visit the
Detroit trade about April 1.

Joseph E. Brill's horse was frightened
by one of the delivery automobiles of
Traub Bros. & Co., and he has filed a
declaration in Justice Court for \$100 dam-
ages.

William B. Shepner, jewelry, Flint, re-
cently filed a trust mortgage on his stock
and fixtures in favor of Capt. George E.
Newall for \$3,872.13. The assets are
\$1,800.

The wholesale jewelry firm of Kunz &
Shuttleworth have been succeeded by
Kunz & Rogers. Mr. Rogers furnishes
capital and is engaged in other lines of
business. Mr. Kunz will continue the
business as heretofore.

Walter R. Shute, formerly with Day,
Clark & Co., New York, announces that he
will shortly traverse this territory as a rep-
resentative of Jones & Woodland. Mr. Shute
is one of the most popular of the jewelry
salesmen who visit Detroit.

Denver.

C. H. E. Denton, of Iowa, is in Denver,
looking for an opening.

I. Moore, Denver, will open a store in
North Denver at the stand formerly oc-
cupied by F. Bristol.

William Kraft has formed a partnership
with his brother and under the name of
Kraft Bros. has opened a repair and man-
ufacturing shop in the Times building.

G. A. Ehret, with Gottesleben & Sons,

Georgian STERLING SILVER.

TOWLE

MANUFACTURING CO.,

CHICAGO.

NEWBURYPORT, MASS.

is in the hospital in a serious condition. He broke his wrist in a fall from a bicycle and it will be several weeks before he is out.

A. Hielscher, formerly of Salt Lake, has opened up in Silverton.

H. E. Berry, formerly at 1633 Curtis St., is now with Park-Barnhart Co.

T. G. Underhill, Colbran, Col., and Sam. Hirst, Pueblo, were in Denver last week.

T. J. Lewis, president of the Lewis Jewelers' Supply Co., took a business trip to Idaho Springs last week.

Lillian Reiche has instituted suit against Lehman, Hamilton & Co., jewelers, People's Bank building, to recover \$15,000 damages for alleged injuries to her business sustained by an attachment of the stock. The plaintiff owed a bill to the defendants and for the purpose of enforcing payment the property was attached.

Columbus, O.

The Columbus Watch Co.'s factory is running steadily and putting out a splendid line of movements, for which there is a good demand. Manager Reel says the business has been very satisfactory the past year.

Robbers secured about \$500 worth of watches and rings from the store of A. T. Lowendorf, Niles, a few nights ago. They also secured about \$50 in cash. Only the best goods were taken, which seems to show that the robbers knew something about the store.

C. T. Pfaff, who was killed by accident in Florida a few days ago, was a director of the Columbus Watch Co. and a stockholder and active member of the Pfaff, Bruck & Reel Co., in which manager William Reel, of the watch company, is also interested. His death takes away one of the prominent business men of the city.

James Curran, of New Lexington, has leased the well known Bonnet stand at Zanesville, and within the next few weeks

will put in a large line of jewelry and kindred goods. He is well known to the trade, having conducted a jewelry business at New Lexington for some years. Jesse Leidy, of Zanesville, has been engaged by Mr. Curran and will aid him in arranging his new store.

Detectives have been at work on the Tussing robbery here, but it seems that nothing has been accomplished in the way of capturing Monk Faucet, the man who is supposed to have done the work. The man captured in Cincinnati is still in captivity, but he has told nothing more than was detailed in last week's issue of THE JEWELERS' CIRCULAR—WEEKLY.

The case of Fred L. Wirschinger was heard in Bankruptcy Court a few days ago. Mr. Wirschinger said that in September John A. Violet was taken into partnership, his portion being made up of money loaned to the partner before that time. The firm name was then changed to Wirschinger & Co., and he considered that he was really in the employ of the partner after that time. The liabilities were shown to be \$6,697.97, and while the assets given are considerably larger than the liabilities, there are items enumerated that will yield nothing to the creditors.

Pacific Northwest.

J. A. Mauer, Eugene, Ore., has moved into new quarters.

H. A. Byers, Pee Ell, Wash., is building an addition to his jewelry store.

A. H. Harris, Milton, Ore., is in Prineville, looking for a location.

Mr. Henderson, Phoenix, B. C., has opened an establishment in Portland, Ore.

H. A. Richardson & Co. have opened their jewelry store at Castle Rock, Wash.

W. R. Stark, Silver City, Idaho, will visit Caldwell in the near future. It will be a pleasure trip.

J. J. Beeler, Weston, Ore., now has his

jewelry store located in the Hessel building, recently erected.

The Miller Jewelry Co., composed of James G. Miller and A. Pierce, have commenced business at Everett, Wash.

G. Beninghausen, Seattle, Wash., and Franz Mahneke, Tacoma, Wash., have both returned from a short but delightful trip to Mexico.

Mr. Stoddard, jeweler, Victoria, B. C., is disposing of his stock, his intention being to close out, previous to going to Dawson, N. W. T.

The store of Wilson & Roper, Grant's Pass, Ore., was burglarized and over \$100 in value was taken, principally in the cheaper grade of jewelry.

G. K. Birge, Davenport, Wash., has bought out A. J. Davenport. Mr. Davenport has gone to Chicago, where he will take up the study of music.

San Francisco.

Henry Wolff leaves on his northern trip the last of this week.

G. Bell, of Denver, is enjoying a week of our balmy Spring weather.

Fred Roth, of L. & M. Kahn & Co., New York, was among the last of the travelers here.

William Warren, formerly of J. Glindemann & Co., has opened a repair shop in Sacramento, Cal.

Otto Paulson has accepted a position with Brittain & Co., this city. Will L. Tregua, formerly with Brittain & Co., has gone to Modesta, Cal.

C. W. Wickersham, who sold his business at Wadsworth, Nev., is now in this city, purchasing a stock for a store he will open in Bakersfield, Cal., in the near future.

David Glickman, jeweler, Devisadero St., this city, who has been arrested several times for pawning watches and jewelry given him to be repaired, was held to answer before the Superior Court last week

Spend a Few Minutes Looking Through

rests in the fact that over 1,000,000 have been sold with entire satisfaction to dealer and wearer.

AJAX
INSULATORS

are carried by people in all walks of life because they are cheap, reduce the wear and tear of the case, protect the watch from all ordinary magnetic influences, are perfect in action and convenient in use.

Made for all sizes of American cases, open face and hunting.

The Newark Watch Case Material Co.,

19 WARD ST., NEWARK, N. J.

Selling Agents:

HENRY ZIMMERN & CO.,
47 MAIDEN LANE, N. Y.

on a charge of grand larceny for selling furniture on which he had executed a chattel mortgage for \$100.

John S. Jepson, of Riker Bros., Newark, N. J., was last week in San Francisco, calling on the trade. Daniel Wile, of the Buffalo Jewelry Case Co., is enjoying the delights of our early Spring for the first time. He is acquainting himself with the trade here and goes hence to southern California, where he will spend several weeks at Coronado Beach and Los Angeles.

Pacific Coast Notes.

A new front is to be put in J. C. Wahlen's jewelry store, at Petaluma, Cal., in the near future. Instead of the present single window, there will be a middle entrance and two front windows.

Daniel S. Park, of Denver, Col., senior member of Park & Morrison, Roswell, N. M., has been in the latter city, recently, looking after his business interests. The jewelry establishment at Roswell is under the management of his partner, Harry Morrison.

About \$50 worth of jewelry stolen from H. Harbrand's store, 119 N. Los Angeles St., Los Angeles, Cal., has been recovered by detectives in that city. The plunder, consisting of watch chains, rings and pistols, was packed away in the room of William Taylor, ready for sending away. Taylor was arrested and booked on a charge of burglary.

The jewelry store in the Grand Central building, Fresno, Cal., occupied by Hubbell & Maxson, has been attached to satisfy claims of creditors, among whom are Percy C. Church and F. M. Chittenden. M. B. Kellogg is in charge as receiver. It is understood that the liabilities are quite considerable. There are separate claims against Mr. Hubbell's interest in the business.

Pittsburgh.

Sheff Bros., Wheeling, W. Va., have dissolved, A. J. Sheff retiring.

A. Grafner, of Grafner Bros., has returned from an extended western trip.

Mr. Andrews, for many years with H. A. Bennett, has accepted a position with A. C. Gies, Frankstown Ave., East End.

Robert W. Brady, Washington, Pa., has been spending the past few days in this city, buying stock and fixtures for his new

store, which he intends opening on Main St., Washington. He will have his opening on April 1.

H. H. Clees, with A. E. Siviter & Co., Verner building, has gone on a short vacation to his home at Phillipsburg, Pa.

J. L. Mandorff, formerly in business in New York, has decided to open a new store in this city, on April 1. He has rented a store on 5th St.

L. W. Vilsack has disposed of his fixtures in his Fifth Ave. store to J. McKean, Charleroi, Pa. It is Mr. Vilsack's intention to have an entirely new outfit in his new store.

The following out of town jewelers were in the city the past week: George V. Brady, Washington, Pa.; J. Z. Simpson, Blairsville, Pa.; E. A. Bloser, New Kensington, Pa.; T. Scott, of J. Scott's Sons, Cadiz, O.; W. E. Johnston, Cannonsburg, Pa.; Warren Mathews, New Castle, Pa.; Harry Grieb, Butler, Pa.; J. N. Caler, Beaver Falls, Pa.; L. C. Brehm, West Newton, Pa.; F. H. Marshall, Derry Station, Pa.; A. V. Johnston, Evans City, Pa.; J. Young, Braddock, Pa.; W. F. Brehm, Rochester, Pa.

W. H. Coffey, Rockford, Ill., will move to Seattle, Wash.

W. S. Fawcett, of Xenia, O., will go on the road as a salesman for a Cincinnati firm.

The Grand Mercantile Co. have succeeded to the jewelry and dry goods stocks of A. E. Goldman, Burlington, Ia.

F. J. Millea, of Springfield, Mass., has bought the National Plating Works, of Holyoke, and will continue the business there.

J. H. Gabathuler, Davenport, Ia., one of the losers in the Windsor Hotel block fire, has opened salvage salesrooms on Brady St., and returns to the hotel block as soon as the improvements following the fire there are completed.

James M. Phillips, a well known young jeweler of Portland, Ind., died at his home in that city recently, aged 28 years, of consumption. He had been at San Antonio, Tex., for several weeks, but received no benefit, and the family were apprised of his condition, a brother going immediately after him. They started back with the knowledge that it would be a race with death, and arrived home nine hours before he died.

PHOTOGRAPHS OF MEN.

ONE of the traditions of photography is that men always want to look like some one else. So they hook you up with a high check and martingales, and tell you to throw out your chest, to make you look like John Drew or Hackett.

I am one of the people who can't get over the isness of the is—and the way that simple, manly, characteristic pictures sell proves that the tradition is a fallacy.

H. R. Woodward, Norwich, has removed to 134 Main St.

The spoon department of the Bristol Brass & Clock Co., Bristol, is operating some of its rooms 13 hours a day.

Business is reported as being exceedingly brisk in the German silver department at R. Wallace & Sons Mfg. Co.'s, Wallingford.

A notice posted in the Derby factory of the International Silver Co. announces that until further notice the factory will close Saturdays.

Ernest Pratt, long a jeweler in Litchfield, has applied for a discharge from bankruptcy and his application has been reported upon favorably by the United States Court referees.

James B. Williams, Glastonbury, is seriously ill at the home of his daughter in Charleston, S. C. His illness is caused by a carbuncle, which has developed upon the back of his head near the base of the brain.

The seven per cent. accumulative preferred stock of the International Silver Co., the market for which has been on the curb since the company were organized, has been admitted to the unlisted department of the New York Stock Exchange.

Coleburn & Lauder, jewelers and opticians, who recently bought out the firm of J. E. Spencer & Co., have two stores, one at 3 Main St., Norwalk, and the other at 96 Washington St., South Norwalk. They announce in the local papers that they

have provided complete optical departments at both stores, with rooms especially fitted up for that purpose.

Melrose M. Burritt, formerly superintendent of Rogers & Hamilton Co., Waterbury, but since the closing of that shop employed at the Rogers & Bro.'s manufactory, has accepted a position as superintendent of the Simeon L. & George H. Rogers Co., Hartford.

James J. Grace, of the Grace Jewelry Co., Hartford, has brought suit for divorce from Mrs. Ruana E. Pomroy Grace. This is the second divorce suit in which they have been engaged. Mr. Grace charges his wife with having deserted him a few weeks after they were married.

The celebrated suit involving a large sum of money belonging to Mrs. Drusilla Mitchell, of Bristol, was decided by the United States Supreme Court, March 5. The First National bank of Chicago was the other party to the suit. The decision of the Supreme Court reverses the decision of the Circuit Court of Appeals for the second circuit. The case involved the right to hold Mrs. Mitchell, who resides in Connecticut, for the debts of a real estate firm in Chicago, of which her husband was a member on a guarantee signed by herself. There was contention over the question whether the Connecticut law controlled Mrs. Mitchell in the disposition of her property and the Supreme Court held that it did. Mrs. Mitchell is a sister of J. Hart Welch, president of the E. N. Welch Mfg. Co.

PRIZE ESSAY COMPETITION, NO. 2.

SUBJECT:

"How to Treat Customers—How to Sell."

Notice to Competing Essayists.

The essays in Competition No. 3, "How to Foster Spring Trade," will be printed at conclusion of Competition No. 2 essays.

WORKERS IN SHOW WINDOWS.

A BROADWAY shoe manufacturer was asked what method of advertising he found most profitable.

"Placing my men near the window," he said, "so they can work in view of the public. I don't know of anything that catches the attention of the passerby more quickly than the sight of a demonstrator sitting close the window running a machine for dear life.

"Manufacturers of all kinds of goods have adopted this plan. Waistmakers put their most skilled workers on exhibition to show how the finest garments are cut and sewed. Cigar manufacturers take the public into their confidence and let them see the process of rolling as performed by the cleverest hands. Men who deal in mechanical contrivances have found that it pays to have at least one machine set up near a window so the crowd outside may observe the intricacy of its parts and the rapidity of its action. Jewelers have stationed their most expert lapidaries within view of the street that possible customers may see how precious stones are cut and polished and set.

"It isn't everybody who can work in public. It takes a person with good strong nerves and concentration of thought to do difficult work in a show window. I have men in my employ who are excellent workers, but they get flustered when subjected to unusual surveillance and ruin everything they put their hands to. I have tried some of them as window operators, but they can't get used to it.

"A man who can run a machine at full tilt, or paint a picture, or fry pancakes or iron a shirt in the full gaze of the public eye and not lose his head is an artist, and worth several dollars more a week to his employer than the more modest individual. And he gets it, too."—New York Sun.

H. K. Lee has opened a new stock of jewelry in Fosston, Minn.

ON first consideration this is a rather difficult problem, in that character study is an important factor and a necessary faculty. If one is not a possessor of that innate trait or that keen insight, or is not a reader of physiognomy, expression, voice and conversation, it remains for time, study and patience to acquire these abilities for a salesman to be successful.

The spice of a salesman's daily life is the various moods, manners and conversations that present themselves for calling into operation promptness, willing spirit, kindness and thoughtfulness, interest, truthfulness, courtesy, gentleness, dignity, tact, common sense and judgment; a variety of dispositions in according to a variety of treatments. There should be promptness in meeting and greeting the customer; if circumstances are such that immediate service is impossible, a word of recognition and explanation oftener holds than otherwise; a cheerful and pleasing demeanor and a willing spirit to assist and serve; a kindness and thoughtfulness in things constantly occurring, often entirely foreign to the line of business; the seeming nonentities but little acts that make deep and lasting impressions, and retain the patronage of the people. Interest manifested in the customer and his wants is a desired quality; the interest that is never permitted to lag or wane, the interest that controls impatience that is so apt to show itself. The virtue of patience is often rewarded by a surprise in another line.

The art of truthfulness is brought into play always. The intelligent people we come in contact with daily require truth and knowledge on the part of the clerks concerning their line of business and the art of imparting this knowledge.

Courtesy and an affable manner to every individual in or out of the store is a practice worthy of attention. Gentleness and quietness of manner and voice are esteemed qualities; to the cultivated, bespeaking refinement and culture, traits admired by people of all stations of life, winning confidence and respect which your natural dignity should hold, aiding greatly in satisfying customers.

Try to gain the customers' ideas; offer suggestions, enlarge on their ideas, sometimes making entire change of thought for a moment and throwing a fortuitous light

on the subject. This method sometimes wins, while in another case it would defeat all efforts. Herein comes the necessity for tact, in reading mentally, discerning which method to apply to make your sale.

The practical salesman of common sense and judgment, with the combined qualities just referred to, faces success on every side and has only the pleasant phases in a clerk's or salesman's life, broadening and developing his customers as well as himself and demonstrating the fact that a clerk is as much to be honored as any artist—for selling is an art. L.

ALWAYS have a pleasant greeting for persons entering the store, such as "Good morning," or "How do you do?" This is a good way to open a conversation. If he is still a little backward, say "What can I do for you?" Should he ask for another salesman, no matter what your personal feeling may be towards him, make an effort to find him, and if he's not about inform the customer and offer your services to show him anything he may want to see. If the customer wants to see a low priced article, show it to him, then tell him how, with a small difference in price, he can get a better article. Show him something better and explain where the difference lies; such as usefulness, style, wearing qualities, etc. But you find, perhaps, that your customer wants all he can get for his money. Now's the opportunity to get rid of one of your odds-and-ends.

Say it is a watch. Well, here's a watch that is a first class article, but a little larger than is carried now. Tell him he can have it at cost; then get the cost price out of it. It is always a good sale to get rid of an article that is out-of-date.

Then there is the customer who is "only looking around." Treat him nicely, show him what you have in stock, try and get an idea of what he has in view. Show him the usefulness and good points of different articles, for, perhaps, he is selecting some kind of a present. A little pains often makes a sale. Don't be afraid to do a customer a little kindness. For instance, a man has a hunting-case watch and wants a glass fitted. You find the lid works stiffly. Put a little oil on the hinge and it will work all right. Straighten his spectacles free of charge. Such little acts

Gand HINTS to JEWELERS

are very little trouble, but are appreciated by the customer and long remembered.

Treat the children right. Don't judge a man by his clothes. Keep yourself neat and clean. Always thank the customer when he pays you or when you hand him back his change. Politeness always pays. Keep the stock in presentable condition, with clean cards, tags, etc. Have a nice show window display, for that acts as a good advertisement and brings in customers, and to get the customer is the main thing after all. Let your motto be: "Once a customer, always a customer." S.

JEWELER TALKS ON ADVERTISING.

[North Adams, Mass., *Transcript*.]

L. M. BARNES, the jeweler, while always a prudent advertiser, never believed in brass bands or flaring posters to push his business. He has been in the jewelry business for the past 35 years, during which time he has built a sterling reputation for honest dealing, and has a steady, lucrative business.

However, a short time ago, knowing that in a few weeks his store would be in the hands of the carpenters to put in new steel ceilings and otherwise renovate it, he expressed to the ad. man of the *Transcript* his desire to reduce his large stock before that time, so that he would have less to move about and possibly be broken and soiled during the renovation. He said he was willing to give a discount off each article in order to move them more rapidly, and asked if we thought it could be done in that time. Realizing that if properly written and placed before the people results would be promptly apparent, especially as we were in a position to personally know that over 4,100 copies were sold every night, we unhesitatingly answered in the affirmative, and were told to "go ahead."

Taking four columns, 10 inches deep, we told the story just as it was—in plain, commonplace language, just as Mr. Barnes would have told a customer in his store, giving the reasons for reducing the stock, and of what the stock consisted. This size ad. we ran two days, and then in a smaller space kept telling the same story in one way or another for the two weeks allotted to us. Results, as we were confident, began to be apparent almost from the start. But we will let Mr. Barnes tell the story, as he did when we asked him the other day about the results of his special advertising.

"Well, I should say I did hear from the ad.," he said. "Why, I am doing a regular land office business. Before this special advertising began trade was very dull—unusually so—but it began to pick up so rapidly that it surprised me. Every day I heard from the ad. and sold goods directly as the result of the same. In some cases

they would mention that they had read it. At the end of the week my cash sales for Saturday were equal to a good Christmas week Saturday, and during the week the sales kept up until at the end of that week I found the cash still ahead of the week before. I reduced my stock materially, sold a large amount of high priced goods and a number of watches. I am now satisfied that advertising, properly written, displayed and placed, will bring prompt results."

JEWELRY ADVERTISING 75 YEARS AGO.

AMONG many old-time relics shown to a CIRCULAR-WEEKLY representative on a recent visit at the store of J. L. Heymann, Fayetteville, Tenn., was a copy of the Nashville *Whig*, of June 11, 1825, which contained an advertisement by a jeweler. The advertisement occupied a space 1½x2 inches, type close, and if a person did not look sharply, he would hardly think it an advertisement without first reading it. It was as follows:

Jewelry

Just received by P. Negrin, at the sign of the large watch, on College St., between Nashville and State banks—where ladies and gentlemen are invited to call and supply themselves on the best terms.

P. N. continues to repair watches, clocks and jewelry as well in the country as in town, at the shortest notice—as he has a young man of skill to assist him, he flatters himself that he can execute with promptness anything in his line of business entrusted to his care. t. f.

The above would hardly meet with great success in any of our papers to-day. Mr. Heymann makes a special effort to collect relics or curios pertaining to the jewelry trade.

THE CONGREGATING OF BUSINESSES.

A PROPOS of the paragraph in a recent number of *The Times*, noting the congregating of dealers in antiques on Fourth Ave., the observant man remarks: "Dealers in antiques are not the only gregarious men in business. Your great department stores are so nearly all in one territory that that part of Sixth Ave. between 14th and 23d Sts. that contains the greater number of them has come to be generally known as 'the shopping district.' Similarly, 34th St., between Broadway and Park Ave., and 31st St., to an almost similar extent, have become headquarters for the ladies' tailors. About 30th St. are clustered a large number of men's tailors of the better class, and Fifth Ave. itself, particularly that part between 23d and 42d Sts., is about equally divided between milliners, art dealers, photographers and jewelers, all catering to such as can pay the highest prices for the goods

they buy. Similarly, 23d St. has become a sort of center for bookish folks. The leading florists have pre-empted a short section of Broadway just above Madison Sq., and another section of Fifth Ave., a short distance below the 59th St. entrance to the Park, and right in the heart of the club house and fashionable residence district. All of the leading hatters have establishments within pistol shot of Madison Sq. This massing of competitors in the same line of business is getting to be about as noticeable in the retail districts uptown as it is in the wholesale districts downtown, where each distinct line of business has been massed for many years."—*New York Times*.

PRINCIPAL AND AGENT.

(*Law points compiled from the latest decisions of the highest courts.*)

Agency to sell goods does not necessarily carry with it authority to collect for same. (35 S. E. Rep., 409.)

Agency cannot be proven by the declarations of the alleged agent, whether spoken or written. (36 S. E. Rep., 312.)

Payment by the principal of part of the contract price is a ratification of the agent's act in making the contract. (46 Atl. Rep., 306.)

Where a person procures another to write a letter for him, he is presumed to know its contents, whether he did or not, when the person to whom it is sent acted upon it. (32 N. W. Rep., 755.)

A contract may be enforced against one person, shown to have been the real principal, although it purports to be the individual contract of the agent by whom it was made. (101 Fed. Rep., 591.)

It is immaterial whether a contract was authorized prior to its execution or subsequently ratified. If a contracting party could authorize it in the first instance, he could ratify it subsequently. (86 Ill. App. Ct. Rep., 216.)

The burden is upon him who seeks to avail himself of the acts of an agent, in order to charge the principal, to prove the authority under which the agent acted, to establish the agency, and the extent of same. (13 P. S. Ct. Rep., 143.)

Where a principal ratifies the unauthorized act of his agent he cannot afterward avoid the effect of such ratification by showing that he was not acquainted with all the facts of the transaction ratified, where he was in possession of means of learning same. (63 N. Y. Sup. Rep., 339.)

An agent who has authority to pay the debt of his principal has authority to promise to pay it; and where an agent acting within the scope of his authority makes a payment on account of the debt of his principal, and nothing more is said or done, a promise to pay the balance of the debt will be inferred, so as to take the case out of the statute of limitations. (80 L. T., 327.)

Gold, Silver and Rolled Plate Chains and Jewelry.

Novelties in Gold and Silver Bracelets. Also a large line of Chain Trimmings.

WORKSHOP NOTES.

To Remove Rust from Nickel.—For removing rust from nickel the following process is recommended by *Le Praticien Industriel*: First grease the articles well; then, after a few days, rub them with a rag charged with ammonia. If the rust spots persist, add a few drops of hydrochloric acid to the ammonia, rub and wipe off at once. Next rinse with water, dry and polish with tripoli or "brillant belge."

To Hard Solder Parts Formerly Soldered with Tin Solder.—To repair gold or silver articles which have been spoilt with tin solder proceed as follows: Heating the object carefully by means of a small spirit lamp, brush the tin off as much as possible with a chalk brush; place the article in a diluted solution of hydrochloric acid and leave it therein about 8 to 10 hours, as required. If much tin remained, perhaps 12 hours may be necessary. Next withdraw it, rinse off and dry; whereupon it is carefully annealed and finally put in a pickle of dilute sulphuric acid, to remove the annealing film. When the article has been dipped, it may be hard soldered again.

Alloys of Gold.—It is known that a metal acquires altogether new properties by alloyage with other metals or even with other simple or compound bodies. Thus copper imparts to gold a certain hardness and a red color, the alloyage with silver renders it lighter in color and lead hardens it. In order to free gold from arsenic and from antimony, with which it is sometimes mixed, we take advantage of the volatility of these two bodies by heating strongly. A reddish-brown alloy almost as hard as iron and strong enough for certain horological mechanisms is obtained by fusing 18 parts of gold with 13 of copper, 11 of silver and 6 of palladium. The metal employed for the manufacture of cheap articles is composed of 90 parts of copper, 2.5 of gold and 2.5 of aluminium. Green gold in graduated shades is produced by corresponding alloyages of gold, cadmium and silver.

To Cement in a Pallet Stone.—For this purpose it is necessary to place small pieces of shellac around the stone when in position and to subject it to heat. But very often the lac spreads unevenly or swells up; and this, in addition to being unsightly, is apt to displace the stone. This drawback can be avoided as follows: The pallets are held in long sliding tongs, and, taking a piece of shellac, heat it and roll it into a cylinder between the fingers; again heat the extremity and draw it out into a fine thread. This thread will break off, leaving a point at the end of the lac. Now heat the tongs at a little distance from the pallets, testing the degree of heat by touching the tongs with the shellac. When it melts easily, lightly touch the two sides of the notch with it; a very thin layer can thus be spread over them, and the pallet stone can then be placed in position and held until cold enough. The tongs will not lose the heat suddenly, so that the stone can easily be raised or lowered as required. The projecting particles of cement can be removed by a brass wire filed to an angle and forming a scraper. To cement a ruby pin, etc., one may also use shellac dissolved in spirit, applied in the consistency or syrup and liquefied again by means of a hot pincette, by seizing the stone with it.—*Deutscher Uhrmacher Kalender.*

VOL. XLII. No. 6.

NOTE—Under this department, all matters of a technical or of a news character bearing upon the optical branch of the jewelry industry will be considered. Address communications to The Jewelers' Circular Pub. Co., 11 John St., New York.

**PRISM
CORRECTIONS.**

THE OPHTHALMOLOGIST, of Chicago, edited by Dr. Charles McCormick, and an exceedingly bright and spicy journal, contains in its December issue the following:

"The Ophthalmic Record has contained recently a series of articles on the apparent position of an object seen through a prism base out. Some writers claimed the object appeared nearer and others farther distant. No satisfactory reasons were given. I have experimented much and have reached the conclusion it is all imagination. If the reader will try the experiment half an hour he will never be guilty of prescribing prisms for eye troubles."

Prisms are bad on a pair of eyes that don't need them—very, very bad indeed. They make the muscle under the apex of the prism, and its corresponding muscle in the other eye, draw the eyes to one side or the other in order to place the maculae in such position with reference to the images that the latter will fuse. But suppose one's eye had in effect a prism in them to start with. What a relief it would be to the worn and torn muscles and weary nerves to have a prism so placed over the eye as to neutralize the existing prism action in the eye. If the doctor will put a 5° prism, base in, over his right eye, looking at and fusing the images of a candle flame at 20 feet, and then place a 5° prism, base out, over the other or on the other eye, the sense of relief from it will be as distinct as the sense of strain from one of the prisms only. He will then say, with many others, "What a relief prisms are when correctly used!"

Prescribing prisms for real muscular imbalances is taking real prism effects out of the eyes, not putting them in. To neutralize spherical errors of refraction (hyperopia or myopia) we prescribe spheres, equal in value but of opposite character from the error. To neutralize cylindrical errors (astigmatism) we prescribe cylinders of equal value but opposite kind. The only way, with glasses, to neutralize a prismatic error (muscular imbalance) is with a prism base the other way, all of the doctor's treatises, theories, conclusions, opinions and vituperation of prisms and prism prescribing to the contrary notwithstanding. Let one who doesn't have any astigmatism

put a +2D. cylinder over the eye and go to rotating around. Will the effects be such that he will conclude that "he will never be guilty of prescribing cylinders for eye troubles?" It would seem so, according to the doctor's ideas. We happen to know, however, that the doctor really prescribes prisms for his cases, and invariably, for a lens is a multiplicity of prisms. If the doctor never puts the base out, in, up or down—that is, never decenters the lenses—his patients do, after they get the glasses, for they converge the eyes back of the glasses, and that, if the lenses are plus, gives them prisms, base out; if minus prisms base in. To decenter a plus lens in is really taking a prism out of the glass for near vision, not putting one in. Therefore, to insist that prisms never be prescribed is to prescribe them for the near object, where they may be harmful, for the sake of eliminating them for distance, where they may be acceptable and beneficial.

As for the theory that muscular imbalances are the products of defective dioptric conditions—hyperopia, myopia or astigmatism—that will not hold water. Several degrees (prism diopters) may be and often are found in emmetropic eyes, or eyes so nearly emmetropic that not only will any plus correction be repudiated, but the amplitude of accommodation disproves the hypothesis of latent hyperopia. Muscular imbalances have effects upon the apparent dioptric condition of the eyes, especially exophoria, and the real dioptric condition has effects upon the apparent binocular balance or imbalance, especially hyperopia. But to say that one factor is invariably the cause of the other, is to assume what in special cases is untrue. Emmetropia should not at least produce imbalances, although it often is coupled with them. Nothing could be worse than the indiscriminate prescription of prisms, and undoubtedly prism prescriptions touch the tenderest area in the optometric field, but when they are necessary they are very necessary indeed, and nothing will take their place.

German Optical and Plate Glass Industry.

TALBOT J. ALBERT, United States Consul at Brunswick, Germany, writes, under date of Jan. 22, 1901, as follows:

"One of the most important industries in my consular district is the manufacture of

optical and plate glass and, associated therewith, the construction of scientific and optical instruments. There are two enterprises engaged in this industry, both of which export to the United States. The Deutsche Spiegelglas Actien Gesellschaft, the works of which are situated at Freden, in the province of Hanover, but at the same time in the Brunswick district, manufactures plate glass and lenses for eyeglasses.

"The incorporated firm of Voigtländer & Sohn Actien Gesellschaft manufactures optical glass and scientific instruments. During the year ended Dec. 31, 1900, the value of the optical and plate glass shipped to the United States from this district was \$82,193 and the value of the scientific instruments \$1,379. The factory of Voigtländer & Sohn is situated in the city of Brunswick and was established in 1756. It is said to be the oldest enterprise in this line of business. It employs 260 hands and has a staff of 15 foremen, who are scientifically and technically trained. One branch of the business is the manufacture of photographic objectives of all systems and sizes; euryscopes are made, as well as anastigmatic collinears and apochromat-collinears, used by photographers and employed for process work of all kinds.

"This firm also manufactures all sorts of hand and tripod telescopes up to six inches (diameter of objective) and Galilean and prismatic binoculars. Since 1811, there has been continual progress in this sort of work, great improvements having been made in the technique of melting glass and the instruments having been lately brought to a high state of efficiency. The firm has recently introduced in the construction of its instruments a new alloy of aluminium and magnesium, called magnalium, which greatly reduces their weight and renders them weatherproof. The managers supply the German navy with marine telescopes and have furnished the German artillery with 6,000 glasses. The trade with the United States has become so important that they have established a branch factory in the city of New York. The firm has gained a reputation for a short rifle telescope which is in general use by sportsmen in Germany."

The Yanss Optical Co., of New York, have been incorporated, with a capital of \$5,000. The directors are E. A. Chapman, Sophia Chapman and W. F. Yanss, New York.

Optical Department.

[Continued from page 57.]

DIOPTRIC CONDITIONS OF THE EYE AND HOW TO DISCOVER AND MEASURE THEM.

[Commenced in issue of Feb. 13.]

HYPERMETROPIA.

HYPERMETROPIA, or as it is more commonly called, hyperopia, is best defined as that condition of the eye in which accommodative action is required to focus light from the distant object upon the retina. This definition leaves out the question as to whether it is the shortness of the eye or weakness of its dioptric power that is at fault, for it really makes

FIG. 7.—HYPEROPE OF 3 D. VIEWING OBJECT AT INFINITY.

no difference which may be the cause. If the accommodation is not sufficient for the purpose, which it certainly will not be as age advances and the accommodative power lessens, the potential focus of each pencil is back of the retina, and diffusion circles take the place of foci upon the retina, producing a blurred image. The object seen being the blurred image, we commonly say that vision is indistinct or below normal in that case. But hyperopes who have sufficient accommodation to focus light from the distant object upon the retina, and whose eyes do so focus it, producing a clearly defined image, are the ones most troublesome to the optician, because he is unable to improve their distant vision with glasses.

It is perfectly clear and well settled that a hyperope of any amount should wear constantly plus lenses of sufficient power to enable the eyes to focus light from the distant object upon the retina without accommodative action. But it is sometimes difficult to make the layman comprehend this fact. He wants to know why, with sufficient accommodation for the purpose, he should not use it. The voluble Dr. Jenkins, who writes articles on the eye for the newspapers and some of the indiscriminate medical journals, tells him he should not, that his eyes are better for the use of the "focusing muscles," etc., and laymen generally are impregnated with this false notion. He who follows the doctrine long enough will find his error fast enough, for although he can see at a distance well, the use of his accommodation for that purpose simply

takes off so much accommodative power, and his eyes give out for the near print, often before reaching the age of 30 or even 20 years. But it is not a simple case of subtraction that the eyes readily submit to. Whatever the amplitude of accommodation, only part of it can be used comfortably and continuously as we have seen. Consequently that which is used to neutralize hyperopia is taken from the usable part of the accommodation, and that quickly reduces one to what may be called premature presbyopia.

There is still a worse feature to uncorrected hyperopia. Since the accommodation is called into action to neutralize the hyperopia, the ciliary muscle is under constant tension during the waking and working hours. It is required for distant vision to cover the hyperopia. For near vision as much more accommodation as the distance of the object represents is added to the tax on the ciliary. The latter only is a healthful use of the ciliary, for by glancing at the distant object that part is relaxed. Not so with the hyperopic action. That must be constant, and such use of a muscle is not healthful action, but *strain*. It is not action, for action of a muscle is alternate contraction and relaxation. In this case there is no rest for the ciliary and no rest for the nerves that stimulate it to contract. Such a drain upon nerve force is like the small leak that sinks the big ship. The muscle develops cramp or spasm and is unable often to relax when the necessity for its contraction is taken away by the imposition of a plus lens. This element, since it does not yield to correction by a lens, at least readily, is known as latent hyperopia in contradistinction from the manifest hyperopia which relaxes when a sufficient plus lens is imposed. This element of hyperopia (the latent) is often overestimated, however, because of other influences that cause the muscles to remain under tension in spite of the imposition of a lens sufficient

benefit. A change of the lenses later is much preferable, for opticians at least, to whom his customers are clients rather than patients, who are too apt to consider an over-correction, that would be accepted from a physician without demurrer, as a mistake or blunder on the part of the optician, whose relations with him are as much commercial as professional. The ordinary individual will accept discomforts in following the advice of his medical dictator that he would not tolerate from anyone else.

The discovery, measurement and correction of hypermetropia are quite simple. As the eye is using its accommodation—putting on little plus lenses of its own—for distance, it is only necessary to substitute plus lenses of glass of equal power to cause the ciliary to relax as much as it is capable of. By imposing gradually increasing plus lenses before the eye while looking at the distant type, it must needs relax, or the focus of each pencil, or the foci of the system of pencils, from the distant type will advance forward of the retina and blur the images. If the imposition of a +.50 D. S. blurs the distant type or renders the letters less distinct, it may be known that the foci are forward of the retina. It is customary, and good practice, to increase the plus in spite of this fact, for perhaps another diopter or half diopter, so as to cause the ciliary to relax, if it will, and the foci to go back to the retina. If they do so and the images are again distinct, increased plus is put on, though not enough to blur the images badly. When the images become decidedly blurred—vision say $\frac{20}{40}$ —there should be no hurry in reducing the lens. Let it stay in place for a few minutes while engaging the client in conversation.

When it becomes apparent that the ciliary will not relax further, gradually reduce the plus by imposing one of .25D. less, putting the latter in place before

FIG. 8.—HYPEROPIC EYE OF 3 D. VIEWING OBJECT AT INFINITY. 20 INCHES. 8 INCHES.

to take its place. Of this element we will speak later.

The proper lens for a hyperopic eye to wear is the plus lens that relieves the ciliary of any necessity of action or contraction when the eye is viewing the distant object. The latent element that does not yield to its plus correction—and there is usually a latent element in hyperopia—should be uncorrected until the wearing of the correction for the manifest has relaxed it or a portion of it. The plus correction may, however, be crowded to the limit—and should be for the purpose of relaxing the latent—of acceptable vision. Beyond that no one can go without causing dissatisfaction and producing no real

benefit. Rather slowly go down the scale in this manner until the blur is almost entirely removed. The stopping point will usually be found above the point accepted or the first repudiated in going up the scale. The acceptance of any plus, while vision is $\frac{20}{20}$ or better is proof that there was hyperopia in the first place, and that the ciliary has been relaxed for the amount of the plus lens accepted. The glass lens has taken the place of previous ciliary action, and the released action may then be used for the purpose for which it was evidently intended—to see the near object. If 1.50D. can be turned over in this manner it means a great deal of benefit to the wearer. Sup-

Optical Department.

[Continued from page 58.]

pose he is 30 years of age and that his amplitude of accommodation is 7D., 3.50D. of which he can use comfortably and continuously. The 1.50D. of hyperopia covered by ciliary action, reduces his available accommodation to 2.00D., making his comfortable near point 20 inches from the eyes. By covering the hyperopia with its correction 1.50D. is added to the amount.

But the strain the eyes and ciliary mus-

worn principally in the pocket rather than in front of the eyes. On the same plan he would advise patients to carry a weight in one or both hands constantly so as to develop the muscles, only occasionally setting the weights down to rest the weary muscles. There is nothing more to hyperopia than this—it is quite enough—except that hyperopia may be concealed by two principal things: one producing, or covering real latent hyperopia, the other making even the manifest go into hiding. The optician must consider the former always, and know how to uncover the latter.

As to latent hyperopia, that is the element our friends of the medical fraternity are supposed to go after when they introduce atropine or other cycloplegic into the eye. It paralyzes the ciliary muscle, that is, if carried far enough, and the latent element, if there be any, appears, and may be measured by a plus lens. But the doctors do not try to cover

this latent hyperopia with a plus lens to be worn by the patient, for when the effects of the drug wear off the spasm returns, and the full plus correction would not be accepted. The doctors *guess* how much to reduce the full plus correction, and as there are many doctors and authorities, there are many kinds of guesses. If they don't guess right, however, they can guess again. The optician's method of fogging the accommodation is a much better method. There is no guessing about it. The optician gives as much plus as will be accepted, and that is as near right as can be ascertained. It is what the doctors come to in their final guess, if they ever make the glasses satisfactory. But they take a long and thorny road to reach it.

The other concealing factor, that hides even manifest hyperopia, is exophoria—a tendency of the eyes to turn out, necessitating convergence to overcome the tendency. This is apt to induce accommodative action—in some people more than in others—and the eyes, when operating together, appear less hyperopic than they really are, because of such accommodative action. By shutting out binocular vision (covering one eye with the opaque disc) this influence is removed, and the eye may

be accurately measured for manifest hyperopia. But when each eye is thus measured the full correction is not accepted for both eyes at the same time, because convergence again comes into play, inducing accommodation, and the eyes are made physiologically myopic and cannot see the distant object distinctly. The lenses *seem* too strong for them. A suitable prism, depending upon the amount of hyperopia, base in, allows the eyes to diverge according to their tendency and abates convergence. This, in turn, abates accommodative action, and the type becomes clear with the full plus over both eyes. What should be done under these circumstances will be discussed later, but it is plain that the hyperopia so concealed is not latent, as it is often taken to be by the doctors, and cycloplegia is not in the least necessary to reveal the hyperopia.

(Series to be continued.)

Death of Adolphus Goldstein.

LOUISVILLE, Ky., March 4.—Adolphus Goldstein, optician, died of pneumonia, Feb. 28. Mr. Goldstein was 72 years of age and had been ill about 10 days.

Mr. Goldstein came to this country from Hungary when a boy of 18, going first to St. Louis, where he was a commission merchant for many years. He came to Louisville 25 years ago and started in business as a jeweler and as an optician, in which he has been engaged ever since. About 35 years ago he paid a short visit to his native city, Temesvar, Hungary, and there married. He had 10 children, four married sons, six daughters, all of whom, with his wife, survive him. His sons are Dr. Granville and Dr. Rudolph Goldstein, Will Goldstein and Nathan Goldstein. Mr. Goldstein was a Royal Arch Mason and a member of the Knights of Honor. The Preston Lodge of Masons had charge of the funeral.

UNCORRECTED. CORRECTED. HYPEROPIC EYE OF 3 D.

cle have been under previous to correction has very likely developed asthenopia, especially for close work. Your client may not only be an asthenope, but a misanthrope—made so by pain and exhaustion of the nerve centers that control accommodation. But these centers are also closely connected with other vital functions, and nerve exhaustion produced by hyperopia may seriously disturb or derange the functional action of organs remote from the eyes. Such effects are known as nervous reflexes. The convergence of the eyes, controlled by practically the same center, may also be deranged, and both together may involve other organs, if one alone would not. The nervous organism is such that the least imbalance at one nerve center may, by induction, imbalance the entire nervous system. A correction means the removal of the cause, and frequently a restoration to health, where all the medicines in the world would have produced no permanent effect.

Hyperopia should be corrected in full, and the hyperope should wear his correction constantly. Our loquacious Dr. Jenkins says the glasses should be worn long enough to rest the focusing muscles, and then taken off—that is, they should be

Optical Briefs and Notes.

(Continued from page 36.)

J. W. Arney, optician, has located at Green Bay, Wis.

There are now two opticians at Vernon, Ala.: James Ferguson and C. H. Kilreese.

L. L. Ferguson and F. A. Bates, opticians, now at 2A Maiden Lane, New York, will remove May 1 to 155 Broadway.

L. M. Lubin, optician, 8th and Chestnut Sts., Philadelphia, Pa., is having alterations made to his property at 912 Arch St.

Frederick E. Ives, Juniper and Chestnut Sts., Philadelphia, Pa., has been granted a patent on a photo-chromoscopic apparatus.

B. F. Melton, of the Kansas Optical Co., Wichita, Kan., called on the wholesale opticians of Kansas City, Mo., last week.

E. S. Smith, Olean, N. Y., had some fine machinery for lens grinding and jewelry manufacturing placed in his store recently.

It is stated in the trade in Philadelphia, Pa., that J. E. Limeburner, retail optician, 1702 Chestnut St., contemplates retiring from business.

William Wardell, who opened an optical store on 17th St. near Pine St., Philadelphia, Pa., some months ago, has closed out his business.

F. W. Bromberg, successor to E. Gluck, Birmingham, Ala., has installed an optical department and placed R. M. Mertz in charge.

John Pugh, Bowling Green, O., who recently graduated from the Detroit Optical College, has located in Kenton, O., for the practice of his profession.

OFFICE AND FACTORY:

ROOMS 303 & 304 BEEKMAN BUILDING,

101 BEEKMAN STREET,

Cor. Pearl Street,

NEW YORK.

N. G. Smith, Dunkirk, N. Y., has been putting a dark room for optical purposes, in his store, and making other improvements of a noticeable character.

W. Wallace, Uniontown, Pa., has been taking a course in optics in Pittsburgh, Pa. He will assume charge of the optical department in the store of his brother, J. W. Wallace.

A. G. Barber, manager of the Globe Optical Co., Boston, Mass., attended the monthly meeting of the Maine Association of Opticians, held at Portland, Me., on March 6.

The Worcester, Mass., *Telegram* of March 4 had an extended story of the establishment and development of the business of the American Optical Co., Southbridge, Mass.

Jacob Stover, formerly a jeweler and optician at 5th St. and Susquehanna Ave., Philadelphia, Pa., has abandoned his jewelry department and devotes his entire attention to the optical trade.

Frank Adams, with D. V. Brown, wholesale optician, 728 Sansom St., Philadelphia, Pa., is covering the trade of Ben Marsden, who is convalescing from injuries received in a railroad wreck about three weeks ago.

It was reported that Dr. W. E. Dodd, oculist, Butte, Mont., was in the lost steamer *Rio Janeiro* at San Francisco. Later reports deny this assertion, Dr. Dodd being at the present time in Honolulu.

The optical store at 1627 South St., Philadelphia, Pa., formerly run as an annex to the jewelry store of William H. Long, 1629 South St., has been purchased by George Long, a son of the former, and will be conducted by him in the future.

Daniel J. Krouse has resigned his position as manager of the optical department of Williams, Brown & Earle, Philadelphia, Pa., and has been succeeded by William J. Burns. It is stated that Mr. Krouse intends to start in business for himself.

D. V. Brown, wholesale optician, Philadelphia, Pa., joined George W. Wells, of the American Optical Co., and Hiram Wells at Atlantic City, Saturday. Andrew Brown followed later. All were accompanied by their wives and had a merry time.

Ben Marsden, traveling salesman for D. V. Brown, Philadelphia, Pa., who was injured in the railroad wreck at Meadville, Pa., some weeks ago, was able to return to Philadelphia, Tuesday, and at once went to Atlantic City to hasten his recovery.

Miss Elizabeth Schmidt, Leavenworth, Kan., has gone to Kansas City, Mo., to study optics under Dr. S. W. Lane, of Southwestern Optical College. E. V. Hanna, Kansas City, and William W. R. Thorpe have just completed the course.

John Crane, a traveling optician, who resides in Fort Scott, Kan., was severely injured last week, in Fulton, Kan., by being jerked off the rear platform of a car. His back was sprained and his doctor reports he is threatened with traumatic meningitis.

Isaac Nathans, an itinerant optician who has an established trade in southern Pennsylvania, New Jersey and Delaware, lost his stock of goods last week. Nathans had expressed the stock from Salem, N. J., to

Philadelphia, and the cases became lost en route.

Otto Mehmert, son of Joseph Mehmert, Cincinnati, O., has returned from New York, where he had been for some months taking an optical course. He will take charge of the optical department which Mr. Mehmert has added to his store on Freeman Ave.

John J. Brandt has accepted a position to travel for the Merry Optical Co., Kansas City, Mo., in the south and in Oklahoma, Missouri, Nebraska, Kansas and Texas. He entered on his new duties March 11. He had been in the employ of F. A. Hardy & Co., Chicago.

Fred R. Baker, of the Chicago Optical Co., Lansing, Mich., has taken a position as manager of the optical department of a wholesale jewelry and optical house in St. Paul, Minn. He is now selling out his stock at Lansing and will move to St. Paul about the first of April.

Miss Josephine J. Nixon, who has been in the optical department of D. B. Anderson, Marietta, O., will probably engage in that business for herself, Mr. Anderson having sold out. Miss Nixon is a graduate of the Spencer Optical Institute, New York, and the Chicago Ophthalmic College.

George B. Bement, Broadhead, Wis., has sold a half interest in his business to F. R. Smith, late of Strickland, Smith & Co., jewelers and opticians at Fond du Lac, Wis. Mr. Smith is a graduate of the Detroit Optical College and of the Northern Illinois College of Ophthalmology and Otology, Chicago. The firm name will be Bement & Smith.

In accordance with a resolution of the board of directors of Queen & Co., Incorporated, manufacturing opticians, Philadelphia, Pa., passed Feb. 28, notice has been given that a special meeting of the stockholders of the company will be held at the general office, 1010 Chestnut St., April 1, at 3 o'clock P. M., to take action on approval or disapproval of a proposed issuance of preferred stock.

The Kansas City Optical Co., Kansas City, Mo., are offering \$15 in prizes. The first will be \$5 worth of goods for the person making the best portrait of genre; second, \$5 worth of goods for the best landscape or marine; third, \$5 for the best picture of any subject. Something of value will be given as a prize for pictures each month, and in December they intend to give one valued at not less than \$50. Only two pictures can be offered by one competitor, on cards smaller than 11x14.

Consul Albert writes from Brunswick, Germany, in regard to magnalium, a new alloy of aluminium and magnesium, with a percentage of from 2 to 30 per cent. of the latter metal. Magnalium, it seems, is free from the bad qualities of aluminium, while it retains its light weight, firmness and tenacity. It is especially applicable in the automobile industry, in electro-technics, aeronautics and dentistry. It can be worked with the file, lathe and planing machine; it is also admirable as a solder, and its pliability adapts it as a border for lenses and eyeglasses. Magnalium is absolutely weatherproof and does not rust.

Jewelers' Court,

(E. D. GARNSEY, Owner),

51 & 53 MAIDEN LANE, - - NEW YORK.

Ready for occupancy April 1st, 1901.

This modern, twelve-story, absolutely fireproof business building will have solid masonry floors, solid plaster partitions, high marble wainscotings, three high-speed elevators, mail chute, basins in all offices, electric light and everything that contributes to comfort and convenience.

Offices of all sizes are provided and floors may be leased entire or in part, partitioned to suit tenants. Those desiring to carry on light manufacturing can be accommodated, special provision being made for adequate power. Drop hammers will be located in the basement.

Floor plans are now ready for inspection and leases can be arranged by communicating with

VOORHEES & FLOYD,
56 Liberty Street, New York.

BUYERS' INFORMATION BUREAU.

Questions as to the makers of certain lines of goods, where to buy certain lines, where certain kinds of work are done, the owners of certain trade-marks and other matters relating to the buying branch of a jewelry business will be cheerfully answered under this department. The reader cannot ask too many questions. *All queries received are also answered promptly by mail.*

LILTON, N. Y., Feb. 19, 1901.

Editor of THE JEWELERS' CIRCULAR-WEEKLY

Will you please send us the address of Stott Bros., cut glass concern?

Yours respectfully,

G. H. P. STONE.

ANSWER:—4450 Main St., Manayunk Station, Philadelphia, Pa.

MILFORD, Mass., Feb. 16, 1901.

Editor of THE JEWELERS' CIRCULAR-WEEKLY:

Can you give us the address of a first class house in New York that does fan repairing of all kinds? We will greatly appreciate the favor, as we have a great deal of trouble with that class of work at present. Yours truly,

C. W. WILCOX.

ANSWER:—C. Levielle, 51 W. 19th St., New York, is reputed to be an able repairer of fans.

ANN ARBOR, Mich., Feb. 15, 1901.

Editor of THE JEWELERS' CIRCULAR-WEEKLY:

Can you inform us who are manufacturers of steins beer mugs? We have written to several pottery houses, but they do not make them.

Yours, etc.,

HALLER'S JEWELRY STORE.

ANSWER:—Charles Ahrenfeldt & Son, 50 Murray St.; Bawo & Dotter, 28 Barclay St.; Endemann & Churchill, 50 Murray St., all of New York.

READING, Pa., Jan. 30, 1901.

Editor of THE JEWELERS' CIRCULAR-WEEKLY:

On advice of L. A. Schlechter I write for address of manufacturers of clock movements for mechanical toys—something small but good; say a

movement 1 $\frac{1}{4}$ x3x4 at largest. Trusting above information can be given, I thank you in advance, and oblige,

C. R. SCHALL.

ANSWER:—The Seth Thomas Clock Co., 49 Maiden Lane, New York, make two sizes of movements for such purposes. One of the sizes is about what is wanted.

DOVER, N. H., Feb. 22, 1901.

Editor of THE JEWELERS' CIRCULAR-WEEKLY:

Can you give us the address of any parties making ebony candelabrum or candlesticks? Thanking you in advance for same, we remain,

Yours very truly,

HODSDON BROS.

ANSWER:—The International Silver Co., Meriden, Conn., make candelabra of silver plate, with ebony column or center post. We do not know of any concern making them of all ebony.

POSTON, Mass., Feb. 16, 1901.

Editor of THE JEWELERS' CIRCULAR-WEEKLY:

Will you kindly give me addresses of two jewelers in Cleveland, O., who sell souvenirs largely? and oblige,

Respectfully,

GEO. E. HOMER.

ANSWER:—Our correspondent in Cleveland says that there are no manufacturers of souvenir spoons in that city, so far as he can learn. Scribner & Loehr, 143 Euclid Ave.; Bowler & Burdick Co., 129 Euclid Ave., and Cowell & Hubbard Co., 115 Euclid Ave., do considerable jobbing in these goods. Webb C. Ball Co., 233

Superior St., make a specialty of them in a retail way.

DOWAGIAC, Mich., Feb. 21, 1901.

Editor of THE JEWELERS' CIRCULAR-WEEKLY:

Where can I buy memorandums in celluloid with metal outside pieces, aluminum, sterling or leather; something about the size of a silver dollar, with small hole so ribbon or chain and pencil can be attached; also where can I buy small assorted colored wood pencils with ring on end to be used with above?

F. B. BLACKMOND.

ANSWER:—Such goods can be obtained from the Baldwin & Gleason Co., 60 Reade St., New York.

NEWARK, N. J., Feb. 9, 1901.

Editor of THE JEWELERS' CIRCULAR-WEEKLY:

Will you kindly let us know whether there is a shaving strop made in silver to work automatically?

Yours very truly,

UNGER BROS.

ANSWER:—Kaempfe Bros., 8-12 Reade St., New York, make automatic strops for safety razors, silver plated, with ebony handles. These are the only automatic strops we are able to find.

SAG HARBOR, N. Y., Feb. 19, 1901.

Editor of THE JEWELERS' CIRCULAR-WEEKLY:

Please give me the address of one or two importers of solid back rosewood hair brushes and mirrors; first class goods.

Yours truly,

C. E. FRITTS.

ANSWER:—Glaenger Frères & Rheinboldt, 26 Washington Pl., New York, import rosewood hair brushes, but not the mirrors. The mirrors are made in this country and can be obtained, as can also the hair brushes, from Calhoun, Robbins & Co., 410 Broadway, New York.

THE RAMBLER'S NOTES.

WHAT THE RAMBLER SAW AND HEARD AMONG THE DEALERS IN ART POTTERY, CUT GLASS, BRONZES, ETC.

OLD AND NEW EFFECTS IN JASPER.
EXTREMES veritably meet in the styles shown in this season's samples of the Jasper ware of Josiah Wedgwood & Sons, Ltd., wherein are to be found many pieces, entirely new to this line, side by side with reproductions of some of the first pieces made in this pottery. In these reproductions is the trophy cup whose festoon decorations show some of the most exquisite cameo work ever made in Jasper. Reproductions of their old black Basalt ware, including pottery with cameo decoration and figures duplicating those originally made by Flaxman, also form an interesting part of the company's display for this season. New colorings have been introduced in the Jasper and new combinations of two or more colors are also to be found, while one of the new decorations shows a distinct departure from the former classical subjects, being a combination of longitudinal stripes with a lateral band containing festoons. A new feature in the teapots is a patent device of aluminium similar to a tea ball, which sets in the cover and may be lowered or raised at will by a chain which passes through the top.

ART WARE OF METAL AND GLASS.
FLOWER vases in many pretty styles are one of the features of the line combining decorative glass and metal work made by The Pairpoint Corporation. At the New York warerooms of this concern, 38 Murray St., are to be found some entirely new pieces in which the pierced metal work of gilt forms but a band at the bottom of these vases, the greater part of the glass being handsomely decorated and entirely exposed. On others, the metal work extends almost to the top, while on still others the pierced work covers the entire glass, except where the panel has been cut away to expose the decoration of the glass beneath. The company's full line of candlesticks in this ware now shown contains most graceful forms and attractive decorations. The bodies of the candlesticks are in glass and are decorated in all the prevailing styles, from Empire effects to small floral designs, while the stands and tops are in most cases of gilt and sometimes in silver plate.

POPULAR CUT GLASS.

THE J. D. BERGEN CO., 36 Murray St., New York, are now displaying their lines of popular priced cut glass ware, to which they have given especial attention during the past few years, and the results thus far have been beyond their most sanguine expectations. Twelve popular priced cuttings are now displayed by this concern, many of which are to be found in full lines, and all can be had in the principal pieces which go to make up the assortment of cut glass such as jewelers carry. Three strong lines of stem ware also serve to make their assortment one of the most complete of the kind thus far carried, as do the many innovations that have been made in the shapes and styles of stand-ard as well as special pieces.

AN ATTRACTIVE LINE OF FRENCH CHINA.

A MORE varied and generally attractive line of French china has never been shown by C. L. Dwenger, at this season of the year, than now graces the counters of his warerooms, at 35 Park Pl., New York. The decorations of this, his own A. K. ware, show more pronounced colorings and florid styles than it has contained for some years back, but these are in such perfect and harmonious color combinations and have such graceful decorations as to be in perfect taste. This year his line of small sets and novelties contains more articles and a greater number of decorations than ever before, and among them are to be found pieces which, while in common use, are new to this china, and are here in sizes, shapes and decorations that make them specially suitable for small prizes and for presentation purposes. Among these pieces may be seen small tea pots, coffee pots and milk pitchers in tankard shape, *deux tasse* size, with spur handles.

Snakes and Beetles in Jewelry.

SNAKES and beetles are coming out strong in women's jewelry. The snakes are in the forms of Cleopatra's rings and bracelets, the eyes in which are in jewels which match the color of the particular costume worn.

The beetles are used for the pins worn in the back of the hair, for belt buckles and for brooches. They are made of rough stones inlaid with gold.—*The Sun.*

Some Lost Treasures.

IN one of the ducal castles of Scotland is a set of carved old bog oak chairs. There are four of them and an armchair; but there should be eight altogether—three chairs and an armchair are missing. Those missing chairs are somewhere in the country, but so far they have not been found. They would fetch \$750 each and \$1,000 for the armchair if discovered, for the incomplete set is a splendid one and nothing can replace the missing chairs. They have been lost a matter of 30 years, and though it seems hard to mislay such things, they disappeared, but were not stolen. So \$2,500 awaits anybody who can find them. Each has a "fleur de lys" carved on the under edge of its seat.

One china bowl, like a slop basin, of Dresden ware is the only thing missing from one of the most valuable sets in the world and the rest are carefully guarded in a private museum. This bowl is thought to be somewhere and may be lurking in some old dealer's shop or doing daily work in a cottage. The rest of the set, incomplete, is worth \$1,500, but \$750 would be the price of this bowl alone. Some day it will probably be picked up for a few pence and bring in 50 times as many pounds to the finder. It has a crown in blue on the inside and a pair of crossed swords on the bottom, and is the size and shape of a common slop basin, but beautifully moulded and very odd looking.

"Grandfather's clocks" are good things to keep one's eyes on, for there is one somewhere whose door panel was carved by King James II. in his spare time. It is a black clock and has the royal arms set in the midst of a panel design. The carving is well done, though not strikingly rich, and rather knocked about. The clock is somewhere, probably in an old cottage or inn parlor, for it is not striking enough in appearance for a prowling dealer to snap it up. It would fetch \$4,000, however, and may sell for more than that when found, as it has been valued at \$5,000. It disappeared—not by theft, but by mismanagement—80 years ago, and may turn up at any moment, bought for a couple of guineas.

An indorsement on the back of a note before its delivery subjects the indorser merely to the obligations of an ordinary indorsement unless it is shown that the maker of such indorsement did it as a maker of the note.

THE MAKING OF A RING.

[Continued.]

THE casting of gold into the ingot-mould is a delicate operation and requires a steady hand; otherwise the gold would be spilled around on the forge. After the gold is cast, it should be removed from the ingot-mould and cooled in water so that it may be readily handled. Then the edges and corners are filed and hammered to remove all small pieces which would otherwise be lost while the bar or strip was being rolled.

But where the workman does not have these appliances and must do his melting on charcoal, he must proceed in a different manner. First, he should secure two large pieces of charcoal—we would suggest prepared charcoal, which can be obtained in blocks of the desired shape—and rub a flat surface on each. At the end of one of the flat surfaces should be cut a hole sufficiently large to receive the gold and alloys.

Now a mould or form should be made from a strip of sheet iron, about 6 inches long, and from 1-16 to 1/8 of an inch wide. This should be bent with square corners to form an oblong mould whose ends should extend out to guide the molten mass into the form. This done, the workman should make 12 or more saw-cuts crosswise on the flat surface of each block and then place his form in position with the extended ends near the hollowed part, and then place the second piece of charcoal on top of the form and bind all together securely with strong binding wire.

All is now ready to melt and cast the gold. Place it and the alloys—which should be well mixed—and a small piece of borax into the hollow and blow a strong, steady flame onto the mass until it is thoroughly melted; at the same time agitate it constantly to insure its becoming thor-

oughly incorporated. When the molten mass begins to churn and become perfectly clear on the top it is ready to be cast.

This operation is as delicate as casting into an ingot-mould, and in many cases even more so. When satisfied that all is right, the charcoal-block should be tilted sufficiently to allow the mass to run into the form, and as soon as it is in the mould should be turned up perpendicularly and tapped slightly with the blowpipe to settle the gold. Allow it to cool, cut the binding wire, remove the bar and trim and hammer as explained heretofore.

To melt gold in this way requires considerable practice with the blowpipe, so that one might blow a steady current of air through it, and at the same time breathe through the nostrils. Many jewelers cannot do this, but where practice is persisted in, the result can be accomplished.

If the reader will close his mouth and fill his cheeks with air until they are distended, he will find that he can close the passage between the mouth and throat so that while he is breathing through the nose the cheeks will remain full. Then if a blowpipe is inserted and the passage closed the blowpipe will not permit the air to escape from the cheeks so rapidly but that the lungs may be filled by breathing through the nose, while the muscles of the cheeks are forcing the air out through the blowpipe. Then, when the lungs are filled the passage is opened and the cheeks refilled.

Now we are ready to roll or hammer the gold, which is done by passing it through two steel rollers which are pressed closer together by screws after each passage of the strip or bar. After being rolled several times, the gold becomes exceedingly hard and sometimes cracks. To prevent this the bar should be frequently annealed. After the strip is annealed, it is rolled or hammered to the desired thickness, after which it is annealed and boiled out in sulphuric acid pickle. The strip of gold should be cut so that a piece about three inches long and somewhat wider than the desired width of the ring is obtained.

Suppose the ring is to be made size 8. On the top of every Allen ring gauge will be found a scale from 1 to 13. To make a ring size 8, the end of the strip of gold should be placed at the end of the metal forming the gauge and then a line should be drawn across the strip of gold. Then at 8, on the top scale, draw a similar line across the strip and when the ring is made up—providing due care has been taken—it will measure 8 exactly. But broad rings should have an allowance of about one-half a size, when marking off the strips. In this case the strip would measure 8 1/2 and when the ring was made up the reader would find the ring to measure 8 exactly. It is for this reason that clerks should notice whether they are using wide or narrow size rings when taking the size needed by a customer. In this connection it should be mentioned that in shops, the reading is taken at the lower edge of the ring and not in the middle, as is sometimes claimed.

(To be continued.)

It Will Pay.

32D YEAR. NEW YORK, WEDNESDAY, MARCH 20, 1901. VOL. XLII. No. 7.

INGENUITY IN MECHANICAL HOROLOGY.

THERE have always been watches, clocks and amusing horological objects made with automatons or moving figures. But it was especially during the 18th century, says Mathieu Planchon, in *La Nature*, that this fad assumed the character of a craze which had never been attained before and certainly has not been outdone since. In the delicate little pieces of that epoch all qualities are united—taste, richness of material, skill—in the execution, with a freshness of coloring truly remarkable. It is notable that in times of yore all these charming articles were made use of, while today they are kept under glass cases. The pieces we are about to describe possess interest from the mechanical as well as from the artistic viewpoints, and the talent shown by the horologist goes hand in hand with that of the other artists who took part in their construction. Fig. 1 represents a "lorgnette" (spy glass). It belongs to the incomparable collection of Frank Bernard. This charming piece, about

seven to eight centimeters in height, is entirely covered with enamel paintings and is encircled with precious stones. The whole

of the circumference. This cylindrical part forms a muff, in the interior of which turns a second cylinder containing the whole mechanism. If the interior cylinder be moved by the outer part of the spy glass the dial marking the hours appears. This piece, therefore, constitutes a little table clock. If we continue to give a gyratory movement, a landscape, entirely of enamel, presents itself in the second field before the opening, while in the first field a complete hunting party passes rapidly. We see the hounds, the "piqueurs," and the cavaliers pursuing a stag. The subjects are in bas-relief. During this scene a hunting air is played in the interior of the piece. If the cylinder be turned still further a panel becomes flush with the muff and thus closes the opening.

The original of Fig. 2 is in the same collection as the spy glass. It represents a dainty, little mouse, less than life size. It is entirely of gold and is dotted with fine pearls. By pulling its tail a

Lancaster Watch Material

It is a fact that we are in a better position to furnish the watchmaker more promptly than any other jobber in the United States with the following material: Lancaster, Aurora and Hamilton. We are right at the seat of operation. We have the largest and only stock of Lancaster watch material in America. We can fill your order for **Waltham, Elgin, Hampden, New England, Columbus, Illinois, Rockford, Seth Thomas, Howard, Century, Trenton, New York Standard and Swiss** as quickly as any house in this country.

We Never Sell Imitation Material for Genuine.

We have a special made balance staff and a special mounted hole jewel. We can furnish you with these balance staffs for all of the above-named watches for **\$18.00 per gross**. Every mounted jewel is cemented and trued and we sell them for **\$7.50 to \$12.00 per gross, less 10 per cent. for cash**.

Give us a trial at your mail business and we will demonstrate our promptness.

Diamonds.

\$74.00 List for One-half Carat Very Fine White and Absolutely Perfect Diamond, finest cut, being at the rate of \$148.00 List per carat.

\$186.00 List for One Carat Very Fine White and Absolutely Perfect Diamond; finest cut.

We cut these from rough stones called **Silver Cape**.

You cannot match these Diamonds anywhere else at near these prices.

We name the above as samples only; they are taken from our regular line; other sizes and qualities at equally low prices.

See our book for full price-lists.

We grade our diamonds as follows:

EXTRA-FINE WHITE.—We cut from rough stones called *Crystals*, which are the finest white.

VERY FINE WHITE.—We cut from the rough stones called *Silver Cape*, which is the grade next to the finest white.

FINE COMMERCIAL WHITE.—We cut from the rough stones called *Fine Cape*, which is the next lower grade.

We do not cut any of the lower grades of rough stones—which are called *Cape*, *Fine Byewater*, *Byewater*, etc.

It pays to buy at first hands.

EARLY SPRING FASHIONS.

A LADY'S RAMBLES AMONG THE JEWELERS.

A snake bracelet or ring goes without saying with anybody who affects popular style in jewelry.

Very high, round topped and cabochon emeralds and rubies represent distinguished form in rings.

Entirely novel in the handsome aigrette ornaments now so favored is a large star of very sharp, long rays. The rays, in alternative, consist of diamonds and emeralds and a large diamond forms the center.

One of the most chic effects in card cases is that of black suède with corner ornaments of tiny brilliants and pearls.

While the serpent in jewelry twines its folds around nearly every kind of stone there is none for which it displays such affection as for the turquoise.

Buffalo leather affords a number of Spring novelties in bags and the like. It is of handsome aspect, rich red brown in color and of rough surface.

Combination pocketbooks and card cases in sea lion skin with gold and enamel initials furnish an attractive article.

Vienna leather goods affect Egyptian landscape designs and colors.

In anticipation of the outing season small silver cups for trophies are out in plain silver and silver gilt, with shapes both new and graceful.

A dainty little trifle for Easter or other presentation is a heart shaped silver gilt box, containing half a dozen jeweled stick pins; golf emblems adorn the cover.

Raised work is never more valuable in silver ware than in combination with pierced work. It is a relief to the appearance of thinness and cheapness which sometimes pertains to piercing when the latter is used alone.

Some of the new spoons and forks are carried out entirely in gilt and enamels.

Colonial patterns are popular in spoons and forks. One of the simplest of new designs is the "palm leaf" tip. Old English styles find favor and Persian patterns attract by their intricacy and novelty.

Alluring mourning chains are in gun metal and pearls.

Burnt ivory inlaid with silver makes a good cane handle.

Soft, lusterless shades of gray abound in silver ware.

It is said that silver ferrets and tags are to be the next craze.

ELSIE BEE.

The Diamond Markets.

ANTWERP, March 1.—No change is observed in the Antwerp diamond market since last week. The general tone remains very quiet and sales are not many. The usual bort rules now at 12½ to 13 francs per karat, but lower and higher prices are paid according to the quality. If the present state of the market continues we will certainly have another crisis, which will be, perhaps, more extensive than that of last year.

Another rise is announced in rough. This is always better than a decline, but our manufacturers are not inclined to pay these high prices so long as they have polished goods on hand.

There was some demand for mēlées, but gross stones are abandoned. Several polishers have kept these latter goods, in order to sell them at better prices.

Notwithstanding the bad condition of the trade there is talk of a new diamond factory being started here.

The following prices were paid for good polished goods sold for American dealers by one of the largest Antwerp houses: Gross mēlées, 315 francs per karat; two grains, 335 francs per karat; three grains, 350 francs per karat; four grains, 380 francs per karat.

Mr. Stavenhagen, of Oppenheimer & Co., Frankfurt, Germany, who was here four weeks ago, has again been here, but he has bought only mēlées at about 200 francs per karat. Mr. Hahn, of Paris,

Whiting & Davis, Manufacturers.

New York, 14 John Street.
Factory, Plainville, Mass.

visited the Diamond Club, but did not buy much.

Jan. 17 an iron box containing 39 brilliants, nearly finished, was stolen from Mr. Brandon, proprietor of a diamond factory in Van Spanjen St. One of the two accused persons was sentenced to two years' imprisonment and 26 francs fine, and the other was acquitted.

A diamond factory has been opened in Brussels. In 1880 and 1890 two factories were established in Belgium's capital, but they were obliged to stop business.

The committee formed to erect a statue to Lodewijk Berken, the inventor of diamond polishing, held a meeting a few days ago and the following officers were chosen: Louis Coetermans, honorary president; president, Gustave Antoine; vice-presidents, A. Adler and J. F. Smaelen; secretaries, R. Serverius and F. Bruns; treasurer, L. N. Cassiers; counsellors, Fr. Colbert, J. Beukelder, L. Peeters, Aug. Van den Elsacker and H. Termote.

AMSTERDAM, Feb. 28.—The market was not animated during the week. The best buyers are always the Yankees; they bought several lots of mêlées. Some years ago America took only fine goods, but now many American firms are buying diamonds in all qualities, a proof that they can make use of all our goods. The general opinion here is that New York will this year give a good number of orders for diamonds.

Owing to the continuing demand for more wages from the workmen, polished goods are becoming dearer and dearer.

A lot of small brilliants, imperfectly cut, was sold last Monday at 580 francs per karat.

The public subscription opened in the Netherlands with the view to present a crown to Queen Wilhelmina has produced already 200,000 guilders.

LONDON, Feb. 28.—As expected, a rise of 5 per cent. is announced in rough diamonds and the Syndicate think that this increase will not bring any decrease in the demand for goods. The report of the 12th ordinary general meeting of shareholders of the De Beers Consolidated Mines, Limited, held in Kimberley, gives the impression here that this company's connection with the Syndicate is solid and that we may expect this year successive rises in rough.

PARIS, March 1.—A little improvement came in the Paris gem market at the beginning of the week and it seems to continue. Very good news was received from New York and Philadelphia and travelers are announcing their trips for Spring.

The rise in roses, as well as in Antwerp and Amsterdam roses, continues and the prices are extraordinary. Fine colored stones are sustained in price and pearls are unchanged.

A new firm have been formed here under the style of Bernard & Habib. They will engage in the polishing of diamonds. The capital is 100,000 francs and the duration of the partnership 10 years.

**Interesting Notes on the Watch Trade of
Switzerland.**

PHILADELPHIA, Pa., March 15.—Under date of Feb. 12 Vice-Consul Leo J. Frankenthal writes from Berne, Switzerland, to the National Association of Manufacturers as follows:

"In the issue of *American Trade* for Jan. 15 I notice a small item relating to the watch trade of Switzerland. The following notes may be of sufficient interest to be given a place in your valuable and sprightly journal:

"There has been a steady growth in the value of the total exports of watches and materials from Switzerland from the \$16,000,000 exported in 1894 to the round \$21,000,000 export of 1899, and the figures for 1900, which have not yet been given, will show another increase of at least \$1,000,000. In round numbers Switzerland exports the watches and parts in this proportion: Gold watches and chronometers, \$8,000,000; silver watches, \$7,600,000; nickel watches, \$4,000,000; finished works, \$570,000, and materials and watch jewels, etc., \$1,900,000.

"The average value of watches exported in 1899 per piece was as follows: Gold watches, \$9.78; silver watches, \$2.83, and metal watches, \$1.65. The United States is the largest customer for finished works, taking in 1899, 130,000 out of a total of 458,000, and paying on the average \$1.54 apiece."
