NEW ORLEANS, La., March 8.—The police have just been notified of a case of securing goods on a worthless draft, in which the house of M. Scooler was the victim, losing two rings valued at \$350, and \$150 in cash. The draft was drawn apparently by Austin, Nichols & Co., New York, for \$500. It was presented by two men, who called at the Scooler store, one day last week, selected the rings and tendered the draft in pay-

ment. It was accepted and the balance over the cost of the rings was given in cash. The police have no tangible clue as yet.

**Defended His Goods with His Life, but
Finally Lost Them.**

GREENSBURG, Pa., March 13.—Lewis Foust, at Monessen, had a desperate fight with three burglars early yesterday morning. The thieves smashed a plate glass window in his jewelry store and were engaged in appropriating rings, watches, etc., when Mr. Foust, awakened by the noise, came upon the scene. He opened fire with a revolver and the robbers returned the shots. The firing awakened the neighbors, who rushed to the scene and one of them, in the excitement, discovering Mr. Foust crouched in the store, fired a bullet at him, believing him to be a robber. The ball struck the wall an inch from his head.

The robbers, upon the appearance of Mr. Foust's neighbors, ran and escaped in the darkness, with \$60.00 worth of goods.

**Plant of the Ottawa Silver Co. Sold by
the Receiver.**

OTTAWA, Ill., March 12.—The Ottawa Silver Co. plant was sold yesterday by the receiver to M. S. Benedict, of the M. S. Benedict Mfg. Co., East Syracuse, N. Y., and E. G. Clarke, of Muncie, Ind., who will operate it at once.

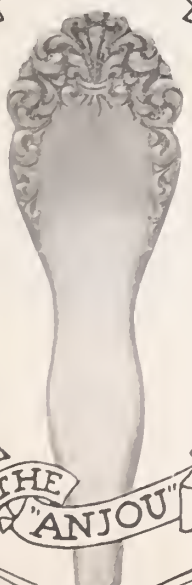

The jewelry establishment of Murphy Bros., Tyler, Tex., has been damaged by fire to the extent of \$700. The insurance will amount to \$500.

"1835—R. WALLACE"

Stamped on an article of Silver-plated ware is a guarantee of worth and quality.
Every dealer, when selecting a line of plated ware, always has in mind two leading qualities, and these usually are durability and design, as these are the ones on which most depends his reputation as a dealer in honest ware.
Our goods are made of the highest grade of Nickel Silver, plated with FINE Silver. Our extra, or A 1 grade, is plated 20 per cent. heavier than the regular standard. Triple and sectional plates are also carried in stock.
In designing patterns we endeavor to select only such as are graceful in outline and thoroughly artistic in decoration, and which conform most closely to the taste of a discriminating purchaser, which our long experience enables us to do.
Our line consists of the following patterns: Tipped, Fiddle, Windsor, Shell, Joan, Virginia, Astoria, Stuart and Anjou.
Any dealer who is not already familiar with our line will find it much to his advantage to write for Catalogue and discounts.

Death of Joseph B. Tomlinson.

JACKSON, Mich., March 13.—Joseph B. Tomlinson, one of the oldest and best known jewelers and business men in Michigan, died this week at his home here, aged 81 years. He was familiarly

THE LATE JOSEPH B. TOMLINSON.

known as "Uncle Joe," and, while eccentric, he was generally esteemed and honored. He never wore an overcoat, refused the services of a physician and up to his last breath would take no medicine. "Uncle Joe" was born in New York State, Oct. 6, 1820, and was a grandson of an English colonial settler of Connecticut. His early days were employed as a school teacher and in learning the jeweler's trade. He came to Jackson in 1840 and soon formed a partnership with E. C. Stone in the jewelry business. A few years later he purchased the interest of Mr. Stone in the business and his jewelry store at 132 W. Main St. still enjoys an excellent business.

Mr. Tomlinson assisted in organizing Jackson's first fire department in 1845 and also was a charter member of the Lodge of Odd Fellows. One of the greatest comforts of his last days was Masonry. He was a 32d degree Mason and no Masonic meeting was deemed complete without his presence. He was a member of the Mystic Shrine. Forty years ago he made a compact with his old Masonic friend, Samuel Porter, that the survivor should conduct the funeral services of the other. In accordance with this plan, Mr. Porter, who is an old man, had charge of the Masonic part of the funeral. Mr. Tomlinson leaves a son and daughter. The jewelry business will be continued.

The W. F. Main Co., Iowa City, Ia., are to enlarge their business and to have additional capital. Mr. Main has taken in as copartners Louis E. Lyon, who has been superintendent at the factory; M. F. Price, manager of the Equitable Mfg. Co.; S. C. Coman, manager of the Eastern Mfg. Co., Chicago, and M. H. Taylor, business manager of the home offices of the W. F. Main Co.

BUSINESS METHODS: *DIRECT and INDIRECT*

How and where a manufacturer shall market his wares is a question for him to settle as he sees fit.

If, however, he says that he deals with the *legitimate* JEWELRY TRADE *only*, and yet sells *on the quiet* to the Dry Goods stores, the fact should be made known.

Selling "*exclusively*" to the Jewelers in one city while supplying the Dry Goods Stores in others near by, is not carrying out the letter of the law of honorable dealing.

Such practices, in justice to the houses that do their business right, should be exposed.

The Trade knows another type of manufacture; the one whose sales to the Trade have not come up to expectations (there have evidently been several such during the past few seasons), and who therefore unloads on the Dry Goods Stores. The next season he has reformed and sells to the Trade only.

But his wares have been made known to the public through the bargain sale announcements and identified with the Dry Goods trade.

People of taste and refinement who naturally look to the Jeweler for the best fashions in SILVERWARE, will hardly care to buy a WEDDING PRESENT or other Gift that bears the trade-mark of a last season's BARGAIN SALE.

As a matter of fact, these "bargain" prices are nearly always actually higher than those charged by the legitimate trade.

These are commonplaces of our business, may be, but they are, too, very strong factors in its success and growth.

There are Silversmiths enough, whose business is with the Trade only, to afford a healthy competition, and whose reputations are valued too highly to risk them in such devious ways.

Why not buy of them? You pay no more for their wares and *you know* that they will have the distinction of *exclusiveness*.

Buyers of taste value this first.

Kansas City Merchants Anxious to Learn Whereabouts of Bernard Rosenthal.

KANSAS CITY, Mo., March 13.—Bernard Rosenthal, diamond broker, is wanted by the police. He is charged with victimizing several wholesale jewelers and other persons, including pawnbrokers. Max Shoeman, who lives at the Coates house, and Fred. M. Chamberlain, wholesale jeweler, Keith & Perry building, swore out a warrant before Justice Walls, Saturday, charging Rosenthal with embezzlement. Shoeman lost \$350 in jewels and Chamberlain \$1,100 in money and a check for \$70. Edwards & Soane Jewelry Co., Keith & Perry building, are losers to the extent of \$250. Several persons were victimized by cashing checks issued by Rosenthal. The Baltimore hotel cashed three of \$10 each.

Rosenthal came to Kansas City about a year ago and took handsome apartments at the Midland hotel, where he lived until a few weeks ago, when he moved to the Baltimore. Following his arrival here, he bent all his energies in pursuit of his business. He was an indefatigable worker and soon gained prestige in business circles. He said that he was from Cuba and, with his prepossessing manner and high style of living, attracted considerable attention. His scheme was to sell diamonds and watches on commission and he had a fair business. He disappeared about March 1 and it is thought he secured about \$5,000 in jewelry and money, though the exact amount cannot be determined. Nothing has been heard of him and it is believed he has embarked for some foreign port.

A Sleight of Hand Sneak Thief Succeeds in J. R. Mercer's Store.

KANSAS CITY, Mo., March 14.—Two men entered J. R. Mercer's jewelry store, 10 E. 11th St., Monday afternoon, and one of them managed to get away with a diamond ring valued at \$50. Newton Regan, who is well known to the Kansas City police, is under arrest, charged with complicity in the affair.

The game was an old one, played this time with a slight variation. Regan and the other man, whose identity cannot be ascertained, went into the store and the unknown asked to be shown some diamond rings, parenthetically remarking that he wanted good ones. A trayful of costly rings was placed before the two men and they examined them at leisure. The stranger was smoking a cigar and the ashes fell on his necktie and coat. He stepped to the door, ostensibly to brush them off, while Regan continued to look at the rings. The first man did not return and F. E. Woodington, who was waiting on the men, at once discovered that one of the rings was missing. He detained Regan and an officer was called at once. At the police station Regan professed complete ignorance of the matter and averred he did not even know the name of the stranger, who, he said, he had met in a saloon only an hour before. The stranger said he wished to buy diamonds and asked Regan to accompany him, so the latter says. Regan, however,

has been wanted by the police for about two years.

The same two men entered the store of Cady & Olmstead a short time before they went to Mr. Mercer's, but Mr. Haller, who waited on them, saw one of them trying to conceal a ring in his palm and asked him to hand it back. The man protested, but Mr. Haller insisted on his giving it up and took the ring from him.

The First Quarterly Sale of Ivory at Antwerp.

WASHINGTON, D. C., March 14.—Consul-General Lincoln reports from Antwerp, Feb. 16, 1901:

"The first quarterly sale of the year took place on the 5th inst., the quantity of ivory offered for sale being as follows:

Kongo:	Pounds.
Hard	137,960
Soft	12,350
Angola	20,985
Kamerun	11,307
Gaboon	4,090
Abyssinian	4,806
Mozambique	286
Gold Coast and Senegal.....	1,566

Total 193,350
Hippopotamus tusks 50

Grand total 193,400

"The totals for the corresponding quarter of preceding years were:

	Pounds.
1900.....	160,195
1899.....	141,466
1898.....	126,555
1897.....	131,656
1896.....	145,062
1895.....	135,256

"Higher prices were obtained for heavy

tusks of good and medium qualities; inferior grades were disposed of at about 19 cents per 2.2046 pounds under last prices; the same is true of oversizes and tusks for bangles. Tusks for tails showed a slight falling off in values, but solid scrivailles advanced by about 9 cents per 2.2046 pounds. Soft ivory was disposed of at good prices. The stock on hand amounts to about 298,723 pounds."

Joshua Hyde Dead After Living Almost a Century.

MT. VERNON, O., March 14.—Joshua Hyde, aged 97 years, for many years a prominent business man of this city, died Monday. The deceased was born in Vermont. He came to Ohio when two years of age, his parents settling in Wayne county. Mr. Hyde afterward returned to his native State, where he remained several years. He came again to Ohio, settling in Mansfield. Later he came to Mt. Vernon and engaged in the jewelry business, in which he amassed a fortune. The funeral was held to-day from the First Baptist church, of which he had long been a member. Mrs. Hyde, who is in her 81st year, is lying at the point of death. The couple celebrated their golden wedding anniversary several years ago. Five children survive Mr. Hyde.

George H. P. Stone, Ilion, N. Y., has bought residence property, which he will occupy.

D. G. Currie, Manistique, Mich., has erected an electric clock and sign in front of his store.

GUARANTEED FOR TWENTY-FIVE YEARS.

THE NEW STYLES OF CROWN 14k. FILLED

Cases represent a distinct improvement in shape, ornamentation and general finish over any previously shown. The quality is the same that has, in thousands of instances, withstood over a quarter of a century of wear. The Crown trade-mark means proved merit.

THE NEW STYLES OF LION 10k. FILLED

Cases will still further prove their claim to be "first in style and worth" in the 10k. grade. The patterns are in great variety and equal those on the highest-priced gold cases. Most jewelers consider these cases the best selling and most profitable to handle of all watch cases.

GUARANTEED FOR TWENTY YEARS.

FOR SALE BY ALL LEADING JOBBERS.

NATIONAL SELF-WINDING CLOCK
BRISTOL, CONN., U. S. A.
THE CLOCK THAT WINDS ITSELF

NATIONAL SELF-WINDING CLOCK
BRISTOL, CONN., U. S. A.
THE CLOCK THAT WINDS ITSELF

GUARANTEED

The
Clock
That
Winds
Itself.

Winds Itself and Strikes, Too.

Has a *lever* movement, with hour and half-hour strike.
Has a balance set in jewels (like a watch).
Is finished in mantel styles—and others, too.
Does NOT have to "set level" to keep going.

Is ALL inside of the case—No outside wires necessary.

Has a "contact" theoretically and practically perfect—a *sliding* "contact."

Our clocks are run by a spring electrically wound once in seven to eight minutes, thus securing the **most uniform tension possible upon the running train.**

The even tension thus maintained on the running train in our self-winding clocks makes possible a **lever movement**, capable of keeping accurate time in all varieties of clocks, and particularly in mantel and house clocks.

The batteries will run the clock from twelve to eighteen months and then can be replaced by new batteries in three to four minutes' time.

Any jeweler can take it to pieces, clean and oil it, if necessary, and put it together again with as little delay as in the cleaning of an ordinary clock.

Illustration showing movement with battery connections.

Mantel Clock. Style 2. Time and strike.
Height, 9 $\frac{5}{8}$ in. Length, 10 $\frac{7}{8}$ in.
(Eight styles now ready.)

Should any part of the movement, with ordinary usage, become disabled or worn out within two years, the company will, on application and return of the part, send a duplicate without expense to the owner. We guarantee our batteries to run the clock one year.

Full particulars and booklet sent on request.

**A Pair Victimizing Southern Pawnbrokers
with "Fake" Jewelry.**

CHARLESTON, S. C. March 13.—Two men have been causing pawnbrokers and police of this city some trouble by successfully securing a loan on "fake" jewelry. The pair registered at a hotel and for a day or two walked about and looked over the place. Then came a notice from the express office indicating that a valuable package was awaiting them, that it had been shipped C. O. D. and that to obtain it the amount of \$2,600 would have to be produced. The visitors called for the package and the money was paid over from a fat roll that stood the call without a flinch. The strangers took their package, which was marked "jewels," and with all proper notices and receipts went out into the city and took some pains to let the facts in connection therewith be known.

Later the men visited several pawnbrokers, telling stories of hard luck and the need for temporary loans until remittances came "to-morrow." A watch and a diamond from the express package were offered as security for a loan of \$500. The loan was refused by several loan offices, but finally the story was repeated to willing ears, the deal was made and the pair walked out and down the street. The morning came and waned, but the strangers did not appear to reclaim their diamond and watch. About noon the pawnbroker's nervousness sent him to a jeweler to have the brilliant tested. "Painted," said the expert, laconically. The men had left the city during the night and had neglected to leave their addresses.

No good description of the men was obtained, except that one is tall and the other is short.

**Litigation Over Ownership of a Des
Moines, Ia., Store.**

DES MOINES, Ia., March 12.—An effort is being made in the District Court to have a receiver take control of the jewelry establishment of C. Mauthe, 508 W. Locust St., and dispose of the stock at public sale. A petition looking toward this was filed in the court, yesterday, by R. H. Orwig, intervening in the case of E. N. Curl against C. Mauthe, *et al.*

In his petition Mr. Curl alleges that he secured a judgment some time ago for \$1,992.15 against Mr. Mauthe, and the execution thereon was returned unsatisfied and has never yet been satisfied. He states that Mr. Mauthe has been the owner of the jewelry stock and store for 10 years and that the same is worth \$5,000, but that Mr. Mauthe claims he is controlling and operating the same simply as a trustee, hence the judgment cannot be satisfied. The trusteeship is denied by Mr. Orwig, who asks the court to declare Mr. Mauthe the sole owner and to order a receiver appointed to take over the stock, sell it and pay to Mr. Orwig the amount of his old judgment.

R. J. Anderson, of R. J. Anderson & Co., Swainsboro, Ga., has been in business in that town for 16 years. W. G. Wood, of the firm, has been in the town 20 years.

Arrest of a Man Supposed to Be One of the Robbers of Lewis Seewald's Store.

COLUMBUS, O., March 15.—It is believed that Marsh Lindsay, a hack driver, of Findlay, O., is one of the men who took part in the robbery of Lewis Seewald's jewelry store, Tiffin, a few months ago, when a tray of valuable diamond rings was taken. The theft, it will be remembered, was accomplished by two men, one of them talking to the proprietor while the other took the goods and walked out of the door. One young fellow drove the buggy containing the men to Upper Sandusky, where they were supposed to have taken a train west.

Lindsay has been arrested at Findlay and taken to Upper Sandusky as a member of the famous Foster gang, successors of the Blinkey Morgan gang, who have been terrorizing the people of the northwestern part of the State for months, or years it might be said. Within the last six months several brutal murders have been laid at their door and three or four of them are now serving time in the penitentiary. This, however, has not deterred the others from going on with their work. Several heretofore prominent men have been identified with them. When Lindsay was arrested a photograph was taken of him, which appeared in one of the papers. Mr. Seewald recognized it as that of the man who held his attention while the other robbed him. He requested the photograph and when it was sent to him he at once declared the man to be the same who robbed him.

Jewelers' Gold Bars Withdrawn and Exchanged.

Week Ended March 16, 1901.

The U. S. Assay Office report:

Of this the gold bars exchanged for gold coin are reported by the Sub-Treasury as follows:

March 11.....	\$36,606
" 12.....	51,089
" 13.....	25,838
" 14.....
" 15.....	76,239
" 16.....
Total	\$189,772

NEW ACT REGARDING EXCHANGE OF GOLD COIN FOR GOLD BARS.

WASHINGTON, D. C., March 11.—Among the acts that were approved by the President at the close of the last session was one providing for the amendment of the law governing the exchange of gold coin for gold bars at the various mints of the United States, as follows:

"That the superintendent of the coinage mints and of the United States assay office at New York may, with the approval of the Secretary of the Treasury, but not otherwise, receive United States gold coin from any holder thereof in sums of not less than \$5,000, and pay and deliver in exchange therefor gold bars in value equaling such coin so received. Provided, that the Secretary of the Treasury may make, in his discretion, such exchange without charge or may impose a charge therefor."

Trial in Boston of a Trio of Alleged Safe Robbers.

BOSTON, Mass., March 17.—The trial of the three men charged with the larceny of a safe containing \$1,302 in cash and jewelry to the value of \$2,400, from Max Morse, jeweler, 85 Lowell St., West End, began Thursday, before Judge Sherman, in the Superior Criminal Court. The defendants are David Werblinsky, Samuel Goldstein and David Werner. The larceny attracted widespread attention at the time from the fact that the safe was carried off in broad daylight and was found weeks later in a dilapidated condition in the Quincy marshes, near the clubhouse of the Wollaston Golf Club.

The defendants evidently realized the seriousness of the situation in the securing of their counsel. Thomas Riley, ex-Democratic candidate for the Mayoralty of Boston, appeared for Werner, while the other defendants were represented by the law firm of Nason & Proctor and Philip Tworoger. Assistant District Attorney Sughme conducted the prosecution for the Government.

The safe was shown in court in the condition in which it was left by the three men when they forced it open. The contents of the safe, or a part of them, were recovered in the houses of Werblinsky and Werner, in Chelsea. Mr. Morse testified that the safe was in his room in the house at 85 Lowell St., and he opened it on the forenoon of Nov. 14 and took a watch from it. He left the house at 10 o'clock A.M. and did not return until

5 o'clock P.M., when he found the safe and its contents gone. He saw the safe a month later and also some of the money and jewelry which had been recovered. Goldstein lived with Werblinsky. At 2 o'clock A.M., on Jan. 14, five Boston policemen went to the Chelsea police station and subsequently, with the Chelsea policemen, visited Werblinsky's house. Werblinsky was called out to attend to his horse, which was said to have been cast. When he had gone to look after his horse the police entered the house and, they claim, found a part of the jewelry. They also assert that they found \$240 in money in a stocking secreted under a pillow in Werblinsky's sleeping room, and later \$248 in money under a mattress in Goldstein's room.

Barney Price, a witness, said that he saw Goldstein standing outside Morse's house. He saw also a horse and wagon nearby, containing pulleys and shafting. Israel Rothman said he saw Werner going from the house to the wagon with a safe on his shoulder. The defence set up an alibi. Werblinsky's defence rested on evidence that he was at a Democratic caucus, in East Boston, working for one Miller. Testimony in behalf of Werner placed him visiting in Sauerville. Goldstein maintained that he was at Werblinsky's house on Nov. 14.

The three defendants have been convicted, the jury being out five minutes.

Louis I. Stephens, Jacksonville, Fla., is selling out his stock of jewelry.

Death of Enoch B. Whittaker.

WALLINGFORD, Conn., March 13.—Word was received here this forenoon at R. Wallace & Sons Mfg. Co.'s factory of the death of Enoch B. Whittaker, at a hospital in Brooklyn, last night. He underwent an operation for appendicitis, Monday, the operation being successful. Yesterday he had a relapse and died last night.

Mr. Whittaker was traveling salesman for the above company, having been in their employ for some years and was a valuable man. His territory covered Canada and many of the principal cities of the United States.

Colonel W. J. Leavenworth left for Brooklyn to attend the funeral of Mr. Whittaker. John W. Sisson, of the New York store of R. Wallace & Sons Mfg. Co., will also attend the funeral.

Commercial Travelers' Claims Are Preferred Against Other Creditors.

NEW HAVEN, Conn., March 15.—Judge Roraback, in the Superior Court, to-day, decided that commercial travelers' claims are preferred with those of laborers and mechanics against other creditors of companies that go into the hands of receivers. The suit out of which this decision grew was that of J. J. Walsh, M. H. Wichstrand and John McDonnell against the Meriden Bronze Co., who failed about a year ago with liabilities of \$100,000.

W. H. Bradshaw will open a store at Paris, Ill.

PEARLS.

The Scope.

We do not confine ourselves to dealing in one grade of goods, but simply to dealing in one line.

We deal in everything that pertains to that line, from the most expensive to the most moderate.

The result of this thoroughness is manifest in the assortments awaiting your inspection.

Trenton Watch Co. Stockholders Receive Pleasing Reports.

TRENTON, N. J., March 14.—The annual meeting of the stockholders of the Trenton Watch Co. was held Tuesday and the gratifying report was made that the company had cleared \$15,000 over the profits of last year.

The stockholders approved a proposition of the directors to enlarge the plant. The addition to the works will cost about \$10,000. Seven thousand of this will be spent for a building and \$3,000 for machinery. This will allow the plant to double its capacity. Now over 300 watches a day are turned out.

The following directors were elected: John Moses, Barclay L. Stokes, Lawrence Farrell, James Moses, O. O. Bowman, T. R. White, Jr., and A. G. Moses.

Cohen Bros., Reading, Pa., will enlarge their store. N. P. Cohen, who has been in charge of a store at Lancaster, Pa., will move to Reading.

Settlement in View in the Mrs. Mary A. Oskamp Will Litigation.

CINCINNATI, O., March 16.—The work of several months looking to the settlement of the troubles brought over the estate of the late Mary A. Oskamp seems to bear fruit. If it does, John C. Daller will be allowed to remain undisturbed in the possession of the Oskamp store, 417 Vine St., because it will be purchased by him and his wife, who was Miss Oskamp. Some months ago the proposition was made to pay the heirs of Mrs. Oskamp that which would be their distributive share of her estate, less the amount of the debts of the business, which would be assumed by those paying the heirs.

The litigation now on the verge of settlement was begun soon after the death of Mrs. Oskamp, several years ago. William, Henry and Clemens Oskamp, her sons, sued to contest her will. That instrument made an equitable division of the estate among the heirs, but codicils which she made gave to Mr. Daller, her son-in-law, the right to conduct the jewelry business for a period of 20 years without security, he to have the right at any time within that period to purchase it for a price to be fixed by certain rules which she laid down. During that time the heirs were not to get anything from the business. It was claimed that Mrs. Oskamp was not competent to make a will at the time she executed those codicils, and a motion was made to set them aside, but allow the will itself to stand. The result of the trial was a verdict declaring the codicils void. The case was taken to the Circuit Court and is pending there. Before this trial Judge Ferris, in the Probate Court, heard exceptions to the account of Mr. Daller as executor under the will of his mother-in-law, and also a motion to remove him. The exceptions were principally that he had failed to charge himself with a note for \$82,000 which he had given Mrs.

OPPENHEIMER BROS. & VEITH,

CORNER NASSAU AND JOHN STREETS, NEW YORK.

Amsterdam, 2 Tulp Straat. - - London, 45 Holborn Viaduct.

Oskamp. He exhibited a cancellation of that note purporting to have been written by Mrs. Oskamp. The charge was then made by those opposing him that the signature to the paper of cancellation was a forgery. It was in testimony that the paper had been found only a little while before the trial in the Probate Court. Mrs. Daller found it among some papers and it was claimed that her mother had given it to her. The trial covered a period of several weeks. Experts were brought here from other cities to testify as to the genuineness of the signature to the paper. The result of that hearing was that Judge Ferris held there was no forgery, according to the testimony. This was appealed to the Common Pleas Court. Mr. Daller resigned as executor of the will and David Edwards was appointed as a disinterested person to act as administrator of the estate, and is still so acting. A suit was also filed to set aside the contract for the running of the store by Mr. Daller for 20 years.

Several months ago negotiations began between the contending heirs for a settlement. A proposition was made by Mrs. Daller to purchase the business. She was to assume all the debts, which at the beginning of the litigation aggregated \$113,000. Besides this she was to pay to each heir \$6,500. William and Henry were to receive their share in cash, while the others were to receive part cash and part in notes, payable 10 years after date. An agreement to do this was drawn and submitted to the heirs. Some were in favor of it and some not, but finally everything looked favorable to a settlement when another snag was struck by the refusal of one heir to take notes for part of her share. She wanted the same payment as the others, so that all would be treated alike. Since then matters have rested, but it was learned this week that the money was being raised by Mrs. Daller to carry out the agreement of purchase and payment. The intention is to pay all cash, so that there can be no objection by any of the heirs. The amount involved is over \$150,000, including the debts that will be assumed. When it is done all the litigation will be dismissed.

M. N. Grasby, jeweler at La Crosse, Wis., who, it was alleged, disappeared a month or so ago and left behind him numerous creditors with the intention of defrauding them, has returned. He makes the following statement: "I have just returned from a business trip to St. Paul, Minneapolis and North Dakota. I left my business in the hands of my clerks as usual, but on returning found it in the hands of the Sheriff. I intend to defraud no one and as soon as I can straighten up my affairs here I shall resume business."

Tariffs of Venezuela and India.

New Provisions Relating to Articles in the Jewelry and Kindred Trades.

WASHINGTON, D. C., March 16.—The new tariff of Venezuela, which went into effect on Nov. 7, 1900, provides for the assessment of the following duties on importations into the various ports of the country:

Free:

Legal gold coin; platinum, gold and silver, unwrought; clocks for public use, when imported by order of the Government.

14.46 cents per kilogram:

Jet, manufactured.
Marble, jasper, alabaster and other similar stones, wrought or polished into articles not otherwise mentioned.

Glass and crystal, manufactured, in any form not elsewhere mentioned.

24 cents per kilogram:

Tortoise shell, crude.
Amethyst, quartz.

48.2 cents per kilogram:

Fancy articles of glass or porcelain mounted in gilt or silvered metal.

Spectacles, opera glasses, telescopes, eyeglasses, magnifying glasses and microscopes, except those of gold or silver.

Barometers, hygrometers, chronometers, octants and other similar instruments of all classes.

Pocketbooks, purses, spectacle cases and all similar articles, except those which have gold or silver trimmings.

Shells.

Coral in articles of all kinds, except when made up with gold or silver.

Knives and forks, with German or white metal, or silvered or gilt.

Articles of German or white metal, including trays, dishes, lamps, candelabra and other similar articles.

Bone, ivory, mother-of-pearl, real and imitation; jet, real and imitation; tortoise shell, manufac-

tured in articles of all kinds not elsewhere mentioned.

Hands, keys, springs, spirals and other parts of watch and clock movements, excepting those of gold and silver.

Imitation pearls and stones, not set, or set in any metal except gold or silver.

White metal or German silver, in articles of all kinds not otherwise specially enumerated.

Imitation jewelry.

Table or wall clocks, alarm clocks, water clocks, hour glasses and all other similar articles, except such as be imported for the use of the Venezuelan Government.

96.5 cents per kilogram:

Fans of all kinds.

Sword sticks.

\$1.93 per kilogram:

Precious stones, pearls and jewelry; articles wholly or in part of gold or silver; watches of any material, empty watch cases, jewelry cases and the like, even when imported separately.

All duties are to be assessed upon the gross weight.

BRITISH INDIA.

WASHINGTON, D. C., March 16.—The new tariff for British India provides as follows:

Clocks, watches and other time keepers and parts thereof, 5 per cent.

Optical instruments, 5 per centum ad valorem.

Precious stones and pearls, unset, including the stones generically known as Cambay stones, such as agates, cornelians and onyx, are imported free of duty.

Jewelry and jewels, including plate and other manufactures of gold and silver, and silver ware, plain, other than European, are subject to a duty of 5 per centum ad valorem, on an evaluation of 1 rupee per tola.

Similar articles to those enumerated in the foregoing paragraph, if embossed or chased, other than those of European manufacture, are dutiable at 5 per centum ad valorem, on an evaluation of 1 rupee and 4 annas per tola.

All other sorts of jewelry, except precious stones and pearls, unset, which are free, 5 per centum ad valorem.

Temporary Receiver for the Wilson Jewelry Co.

BOSTON, Mass., March 16.—In the Supreme Court, Thursday forenoon, Judge Knowlton appointed Henry S. McPherson temporary receiver of the Wilson Jewelry Co., Tremont Row, upon the application of Emily H. Potter, administratrix of the estate of her late husband, Whipple N. Potter, Jr., who was an officer and creditor of the corporation. Other creditors, including D. C. Percival & Co., the Globe Optical Co. and Daniel Pratt's Son, are said to have been interested, too.

The liabilities are said to foot up \$30,000 and the assets are said to be about the same. There is considerable speculation among the trade as to what will be the outcome of the whole affair. The sudden and unexpected death of Mr. Potter, who is said to have had complete control of the financial affairs of the company, undoubtedly precipitated the present action of the creditors outside of Mrs. Potter.

Previous to the building of the Subway station almost opposite the store of this company, the site was considered as one of the best in Boston for the conduct of a business such as had been carried on there for many years. But many seem to think that conditions have changed now and that in order to make the business pay smaller quarters are necessary. The Wilson Co. hired the whole building in which their store was located and occupied the greater part of it. The whole of the lower floor and the greater part of the second floor were occupied by them and it seems to be the opinion of one of the creditors, at least, that too much money was paid for rent.

Removal.

On the 22d instant we will remove our business to No. 15 Maiden Lane, where we will remain until May 1st, 1902, at which time we expect to occupy offices in the new building which is to be erected on the site of our present quarters.

Thieves Successful for the Fifth Time at Ezra Means's Store.

PITTSBURGH, Pa., March 16.—A bold and successful robbery occurred early on the morning of March 15, at Big Run, a small town south of Du Bois, Pa. Two men entered the jewelry store of Ezra Means, about 2 o'clock, and blew open the large safe with nitro-glycerine. The charge was a heavy one which wrecked the store and awakened people for blocks around. Before anyone could reach the scene the burglars had gone over the contents of the safe, consisting of watches, trays of jewelry and \$35 in money, and made their escape, taking the booty with them.

A posse was formed and the men were tracked through the light snow for three miles to Bell's Mills, where the trail was lost, the fugitives evidently having boarded a northbound Buffalo, Rochester & Pittsburgh freight train, passing their pursuers in the darkness. Mr. Means estimates his loss at \$1,000. This is the third time within a year, and the fifth time in eight years, that he has been robbed, and each time the thieves escaped.

Railroad Held Responsible for Station Clock That Stopped.

GREEN BAY, Wis., March 14.—Because the clock in the Northwestern station in this city stopped on Sunday morning, the day of the big blizzard, and a traveling man missed the train, a suit for \$250 damages has been begun in the courts here against the road.

A well known drummer left his hotel at 20 minutes to 9 o'clock by the depot clock, and seeing that he had plenty of time, he went to a lunchroom and ate a hearty breakfast. He then walked to the station and found that the clock still announced that it was 20 minutes to 9.

His train was gone and he was forced to wait until the next morning before he could leave the city. Investigation showed that the ice coated hands had become too heavy for the works to move and the clock had stopped.

Incorporation of the Tuttle & Parshall Co.

PLATTSBURGH, N. Y., March 13.—The Tuttle & Parshall Co., to succeed to the jewelry business of J. W. Tuttle & Co., are the latest addition to the business houses of this place. The principal members of the new company are Mr. Tuttle and Fred C. Parshall, who has been with Tuttle & Co. for three years.

Before coming to Plattsburgh Mr. Parshall's training and experience were along jewelry lines. Four years were spent with A. D. Norton, of G.oversville. Mr. Parshall learned the business in Cooperstown, the Summer resort on Otsego Lake. He has also held responsible positions with Frank E. Davis, Northampton, Mass.; L. S. Stowe & Co., Springfield, Mass., and J. W. Cusack, Troy, N. Y. Last year Mr. Parshall spent the Winter as leading salesman for the Greenleaf & Crosby Co., at their St. Augustine, Fla., establishment, with such satisfaction to that firm that they offered him a permanent and lucrative position, but he prefers entering business here.

New York, March 1st, 1901.

The co-partnership heretofore existing between Adolph Ludeke and Charles L. Power having been dissolved by mutual consent, the undersigned desires to announce that he will continue the business of Importing Diamonds and other Precious Stones at 9, 11 and 13 Maiden Lane, under the firm name of

CHARLES L. POWER & CO.

Respectfully,

CHARLES L. POWER.

HENRY FREUND & BRO., DIAMONDS, WATCHES and JEWELRY.

9-11-13 Maiden Lane, New York City.

Death of Edward G. Buckenham.

Edward G. Buckenham, who was prominent for many years in the trade as a manufacturer of diamond jewelry and as a dealer in diamonds, passed away, Wednesday, at his residence, 54 King St., New York. Mr. Buckenham will be remembered as the head of the firm of Buckenham, Cole & Hall, who were in business for more than a quarter of a century at 10 Maiden Lane.

The deceased was born in London, England, in 1824, and was the son of George Buckenham, a London jeweler. He came to America with his father, in 1839, and the latter soon after became manager of the factory of Ball, Black & Co. Edward G. Buckenham worked with his father for a short time and then for other firms until 1855. When 21 years old he started in business for himself and was afterward joined by George Cole under the style of Buckenham & Cole, who conducted business at the corner of Warren St. and Broadway. The concern later became Buckenham, Cole & Hall and moved to Maiden Lane, where they established a reputation as manufacturers of fine 18 karat diamond jewelry. In 1878 John F. Saunders was admitted and the firm changed to Buckenham, Cole & Saunders, who continued until their dissolution in 1881. Mr. Buckenham then conducted the business alone for a short while and finally retired, 16 years ago. The deceased was a Mason, but was a member of no organization in the trade. He is survived by a wife, two sons and a daughter. The funeral services took place, Friday, from his late residence.

Death of David S. Marsh.

WALTHAM, Mass., March 15.—David S. Marsh died, Monday afternoon, at his home here. He was born at East Calais, Vt., Dec. 30, 1826. After obtaining a common school education he learned the watchmaker's trade and entered the employ of the Harvard Clock Co., at Roxbury, in 1846, and while there invented an eight day watch. He was next employed by Durand & Co. and subsequently opened a jewelry store at Newark, N. J. He came to Waltham in 1862 and began working for the American Watch Co. The following year the Nashua department was moved to Waltham and Mr. Marsh finished watches for it as long as it lasted. Later he conducted a clothing store in Waltham for 17 years. He leaves a widow, son and daughter.

Stolen Rings Returned in Time to Be Stolen Again.

ANDERSON, Ind., March 15.—The store of F. T. Shroyer was robbed one night last week of a tray of gold rings valued at \$50. Henry Adams, the thief, was captured the next day at Indianapolis. The tray and rings were returned to Mr. Shroyer, Monday, and the next night the store was robbed of the same tray of rings. Nothing else was taken.

Victor Bogaert, Lexington, Ky., will sail for Brussels to-day, where he will be married in June to Miss Josephine Reynolds, the sister of his deceased wife.

No Dividend Yet Declared by the International Silver Co.

The directors of the International Silver Co. held their regular quarterly meeting, Wednesday, at the executive offices of the concern, 71 Broadway, New York, and decided to again defer, for the present, payments of dividends on the preferred stock of the company. This is the third quarterly meeting at which payments have been deferred. The reports submitted as to the condition of the company are said by the directors to have been favorable, many old obligations having been wiped out and old stock disposed of. It was also reported that there was cash enough in the treasury to pay two years' dividends on the preferred stock, although it was not deemed advisable to take any such action at the present time.

Said a director of the company to a CIRCULAR-WEEKLY representative, when asked about the future action of the directors: "The management of the International Silver Co. are proceeding upon most conservative lines and in the interest of the company as a commercial corporation. There is no attempt to affect the stock market, nor do they countenance any stock jobbing schemes. Whether the dividends on the preferred stock will be resumed at the next meeting is a question for the future; neither I nor any other director can tell what the board as a whole will do until the time comes."

Reported Loss of Diamonds and a Kidnapping Threat.

KANSAS CITY, Mo., March 18.—A theft of \$3,000 worth of diamonds from the Edwards & Sloane Jewelry Co. and a threat to kidnap the young son of George H. Edwards unless \$1,000 should be paid immediately for the return of the gems is a story with which the local detectives are wrestling.

The theft, according to statements made public to-day by detectives, occurred late last Monday afternoon. The gems disappeared mysteriously from the firm's storerooms in the downtown district and all efforts to trace them proved unavailing. On the following morning Mr. Edwards received a letter containing a proposition to return the diamonds upon the payment of \$1,000. The letter stipulated that the money be in 20 dollar bills, be wrapped in a package and left at midnight (Wednesday) at 40th and McGee Sts., in the southern part of the city.

The letter expressly stated that the package should be sent out by William Dearduff, one of the firm's clerks, and closed by threatening to kidnap Mr. Edwards's son if the money was not forthcoming. Mr. Edwards immediately had his son taken out of school and he has since been guarded at the Edwards home.

Wednesday night Dearduff, with a package of waste paper, went alone to the corner designated. In his story to the detectives Dearduff says he was met by two men, one of whom demanded a package.

The next day Dearduff reported that he had found the missing tray in the basement of the Keith & Perry building. Later he reported that, while working in the basement, some one had stabbed him in the back.

The Giant of Collar Buttons

IN QUALITY,
IN SALES.

One Million Five Hundred Thousand Kremenz One-Piece Collar Buttons made and sold within the last year.

WHY?

Because of their HIGHEST QUALITY, BEST CONSTRUCTION, GIVING THE MOST WEAR, AND GREATEST COMFORT and their IRON-CLAD GUARANTEE.

To verify this we invite the trade to read "The Story of a Collar Button, with Illustrations," which may be had FREE for the asking, and to try the experiment suggested on page 5 of that booklet.

Extract from "Printers' Ink,"
Nov. 23, 1898.

The Little Schoolmaster now suggests, to every pupil in his class, to send a two-cent stamp to Kremenz & Co., 49 Chestnut Street, Newark, N. J., and ask to be favored with a copy of their leaflet, "The Story of a Collar Button." Afterward, if any pupil will send to *Printers' Ink* another leaflet, new or old, that is half as good as this one, or that approaches it in excellence, the deserving student will be rewarded with one of *Printers' Ink's* souvenir spoons as an acknowledgment of his discovery and contribution. "The Story of a Collar Button" is the best piece of advertisement construction that has come to *Printers' Ink's* attention in the year of our Lord 1898.

Should you wish to utilize this booklet to increase your collar button business, we will, on receipt of your order, print your card upon and send you a quantity of them.

Kremenz One-Piece Collar Buttons are stamped as follows, ON BACKS:

Patent sustained by United States Supreme Court.

Quality and Construction have made our reputation.

All Kremenz Collar Buttons are Manufactured by

KREMENTZ & CO.,

Receiver for Howard Sterling Co.

The Business to Be, However, Continued as Heretofore.

PROVIDENCE, R. I., March 16.—Parties having business connections with the Howard Sterling Co., silversmiths, of this city, received, Wednesday, the following circular letter:

PROVIDENCE, R. I., March 12, 1901.
I have this day been appointed receiver of the Howard Sterling Co., and by order of the Court am authorized to continue the business of the company as heretofore.

I shall therefore continue to run such business and will take and fill all orders as promptly as the company has heretofore done. The same salesmen who have heretofore represented the company will call upon you for your orders.

Thanking you in advance for a continuance of past favors and promising prompt attention to all orders given, I am,

Very truly yours,
BIRNEY C. PARSONS,
As Receiver of Howard Sterling Co.

Mr. Parsons is a Boston attorney and a director in the Howard Sterling Co. The order appointing him as receiver came from Judge Colt, of the United States Circuit Court, as a result of a bill of complaint filed by Horace Loring and Francis Welch, of Boston, trustees of the estate of Charles W. Loring, setting forth that they hold notes from the company of the following dates and amounts: Sept. 7, 1897, \$10,000; Nov. 1, 1897, \$10,000; Nov. 11, 1897, \$3,000; Dec. 6, 1897, \$40,000; a total of \$63,000.

The stock of the Howard Sterling Co. is held almost exclusively by the estate of the late Joseph Banigan, who was a millionaire rubber manufacturer of this city, and the estate of Charles W. Loring, of Boston, who is now living, although his business affairs are managed by trustees. From the inquiry made by THE CIRCULAR-WEEKLY correspondent, it is believed that the business is entirely solvent and that the present action in going into receivership has for its object the convenient arrangement of the corporation's finances, which can be more readily accomplished in this way than under some more lengthy plan of operation that might be followed.

The annual statement of the condition of the concern, set forth in the certificate filed Feb. 7, at the office of the City Clerk, in accordance with the corporation law of Rhode Island, contained the following:

Amount of capital stock filed by vote of corporation, \$320,000; amount of capital stock paid in, \$242,000; value of personal assets Dec. 31, 1900, \$222,737.08; total amount of debts and liabilities Dec. 31, 1900, \$136,076.71. This statement was subscribed to by the officers of the company, John J. Conny, president; Sullivan Ballou, secretary and treasurer; B. C. Parsons and John J. Banigan, directors.

Mr. Conny received a CIRCULAR-WEEKLY representative, who called to interview him at his office, in the Banigan building. (Mr. Conny is secretary and manager of the large real estate interests of the Banigan heirs.) In reply to a question as to the future prospects and intentions of the Howard Sterling Co., of which he is president, he remarked that the above letter, sent out to the trade by Mr. Parsons, substantially set forth their intentions.

"We believe," he said, "that we have a valuable property. We have put considerable money into it and expect to get it out

again. We propose to continue the business. There has been no interruption and will be none. We desire first to reassure our customers of this and of our stability. The business will be carried on as before, except, perhaps, that it will be done in a more aggressive way, so as to increase our output and make the whole country familiar with the excellence of our goods."

Mr. Connly was asked whether the effect of the receivership would be a reorganization of the company, but he was not ready to talk on that point, remarking simply that he did not know just how long the receivership would continue. He spoke of the completeness of the equipment of the company's plant for the production of fine sterling silver ware of all kinds and repeated that the business would continue.

Jeweler Van Arkel Loses in a Suit Against His Brother.

MUSKEGON, Mich., March 13.—An interesting case, which was the result of some differences between two brothers in regard to the support of their aged mother, has been concluded in the Circuit Court. The parties concerned were James W. Van Arkel, a local jeweler, and Garrett Van Arkel, a druggist, at Muskegon Heights. Last September James went to the store of Garrett to talk over the matter of the support of their mother and hot words ensued. The result was that Garrett caused James's arrest on a charge of assault and battery, the former claiming that the latter choked him and in other ways abused him. James was acquitted and then brought suit for \$2,000 for malicious prosecution against Garrett. The jury has rendered a verdict in favor of the defendant, finding him not guilty.

Tariff Decisions & Regulations.

Among the decisions handed down the past week by the Board of Classification of the United States General Appraisers were the following:

R. F. Lang imported merchandise consisting (1) of agate in various shapes not larger than one inch in any dimension and of different colors, described as red, black, striped moss and tiger-eye, suitable for use as charms, sleeve buttons, etc., etc.; (2) of manufactures of agate designed for use as penholders. These were returned for duty at 50 per cent. ad valorem, under paragraph 115, of the tariff act of 1897, as manufactures of agate, and a protest that the merchandise was dutiable at 10 per cent. ad valorem, under paragraph 435, as precious stones, cut but not mounted, was overruled by the Board.

George Borgfeldt & Co. imported necklaces composed of glass and metal, glass constituting the article of chief value, designed for use as jewelry. A claim of the importers that the goods were dutiable at 25 per cent. ad valorem, or at 45 per cent. ad valorem, under paragraph 188, 112 or 193, was overruled and the assessment of 60 per cent., under paragraph 434, as jewelry, was sustained.

J. Floersheim, Kunstadter & Co., of Chicago, imported women's belts of metal, plated to look like silver, in a number of fancy designs and having clasps for chatelaine. They were assessed for duty at 60 per cent., under paragraph 434, and were claimed by the importers to be properly dutiable at 45 per cent., under paragraph 193. The protest was overruled.

The Newark Colored Leather Co. imported merchandise which was assessed for duty as leather not specially provided for at 20 per cent., under paragraph 438, of the act of 1897. It was claimed by the importers to be dutiable under the same paragraph at 10 per cent. as skins for morocco, tanned but unfinished. The protest was sustained.

W. A. England, Worcester, Mass., has called a meeting of his creditors. His liabilities are \$10,000 to \$15,000; assets, \$6,000 to \$10,000; largest debts to New York and Boston houses.

The Trenton Watch Co.,
TRENTON, N. J.

Boston.

William A. Bates, treasurer of the Ripley-Howland Mfg. Co., 383 Washington St., has gone to Cuba and Nassau for a trip of several weeks' duration.

Thomas O. Pray, the father of Arthur H. Pray, diamond dealer at 376 Washington St., continues ill at his home, but his condition is not believed to be serious.

Leopold Goldstein, doing business as the Dresden Jewelry Co., has filed a voluntary petition in bankruptcy, with liabilities of \$2,489 and assets of \$500.

It is reported that George E. Homer, jeweler, 45 Winter St., has purchased the business of the Bedford Jewelry Co., 52 Summer St., and will carry it on in addition to his business.

W. E. Geyer, with D. C. Percival & Co., has just completed the designs for a catboat for C. P. Fenno, with the same firm. Mr. Geyer is gaining quite a reputation among the trade as a designer of boats and is said to have several orders on hand for boats to be built for the approaching yachting season.

Among the buyers in Boston last week were noticed: H. A. Stone, Ayer, Mass.; H. L. Dole, Haverhill, Mass.; E. W. Longfellow, Haverhill, Mass.; E. F. Welch, Westboro, Mass.; Charles Sinclair, with N. C. Nelson & Co., Concord, N. H.; J. H. Connor, Lynn, Mass.; G. A. Schmidt, Lawrence, Mass.; E. R. Bennett, Amherst, Mass.; W. A. Kemp, East Pepperell, Mass.

The copartnership lately existing between William S. Foster, Charles W. Byrnes and James Kingman under the style of Foster & Co., doing a jewelry

business at the corner of West and Mason Sts., has been dissolved and the business will be continued by the limited partnership under the same style of Foster & Co. The new firm will be composed of William S. Foster, Charles W. Byrnes, James Kingman and Walter W. Hodges. Mr. Hodges has contributed to the common stock \$30,000 in actual cash payment. The above partnership commenced business on March 1, 1901, and will terminate on Feb. 29, 1904. Messrs. Foster, Byrnes and Hodges are residents of Boston, while Mr. Kingman resides in Newton. Mr. Hodges enters the firm as a special partner.

Lynchburg, Va.

James Finnegan, of Ryland & Rankin, is on a several weeks' pleasure trip to his old home in Syracuse, N. Y.

The H. Silverthorn Co., one of the oldest business houses in this city, have been reorganized, taking in Lynchburg's old veteran city treasurer, John W. Bransford, and George H. Poling, who has long been a faithful employe of this jewelry establishment. The officers of the company now are: John W. Bransford, president; George H. Poling, vice-president; H. T. Silverthorn, secretary and treasurer. By the deal the entire concern is owned by Lynchburg stockholders, they having bought the interest formerly owned by N. H. White & Co., New York, and The W. J. Johnston Co., Pittsburgh, Pa.

Connecticut.

Mr. and Mrs. George H. Wilcox, of Meriden, left March 13 for Augusta, Ga.

Samuel L. Barbour, of the Barbour Silver Co., Meriden, is in the south for a short stay.

James B. Williams, the veteran Glastonbury manufacturer, who has been ill at Charleston, S. C., is reported out of danger.

N. Burton Rogers, of the Rogers Silver Plate Co., Danbury, announces in the local press that he is not a candidate for nomination for Mayor of that city.

The Wm. L. Gilbert Clock Co., Winsted, have posted a notice that their plant will run on a 55 hour schedule from date. The company have been running on a 40 hour schedule.

The architect has completed the plans and specifications for the two story brick addition to the Miller Bros.' Cutlery Co. factory, Meriden, which is to occupy a space 35 feet wide and 73 feet long.

M. Wittstein has sold his barber shop on State St., Bridgeport, and will devote his entire time to his jewelry business. The firm will remove from the corner of Broad and State Sts. to 1154 Main St. within a few weeks.

H. Wales Lines, as receiver for the Meriden Bronze Co., Meriden, was authorized, March 15, by Judge Roraback, in the Superior Court, at New Haven, to pay a dividend of 25 per cent. to the creditors of the company only on preferred claims.

Melrose M. Burritt, formerly superintendent of the Rogers & Hamilton Co., Waterbury, has been appointed superintendent of Factory H. International Silver Co., Hartford, and not of the factory of the Simeon L. & George H. Rogers Co., as published last week.

The partnership existing and doing business in Branford under the firm name of F. E. Peckham & Co. has been dissolved by mutual consent. John H. Morton, who will continue the business, will pay all indebtedness and he alone is authorized to collect all claims in favor of the partnership.

The Hartford Sterling Co., Union Pl., Hartford, organized after the Barbour Silver Co. left that city and located in Meriden, closed their plant there Saturday night, as it had been decided to remove it to Philadelphia. An official stated, Friday, that the company have been unable to find a location in Hartford large enough and otherwise suited for their work and so it was decided to remove to Philadelphia and join it with a plant owned by the company there. The company have employed about 30 hands.

Newark.

Louis Van Adward, a retired jeweler, 49 years old, fell down stairs at 79 Commerce St., recently, and was taken to the City hospital in a serious condition. He died at that institution last week. Van Adward retired from business several years ago. He had no relatives in this city and an effort will be made to locate a niece who lives in Brooklyn. In the meantime the body will lie at his late home.

Floyd Wyckoff, 17 years old, of Towanda, Pa., was arrested on Ferry St., March 12.

From OCEAN to OCEAN

No. 3 Maiden Lane, New York.

and charged with attempting to sell alleged stolen goods. He is suspected of being implicated in the robbery of a jewelry store at Towanda, March 11, and when arrested had a number of watches and some jewelry in his possession. In the Third Precinct Court, Police Judge Schalk ordered Wyckoff held until the proper papers could be made out committing him to jail to await instructions from Towanda.

The United States Marshal will to-morrow hold one of the largest sales of goods seized by the United States Government while being smuggled into this country ever offered in Newark. The sale will take place in the Federal building and the articles offered will consist of diamonds, rubies, pearls, emeralds, opals, turquoises and sapphires, making in all five bracelets, 11 rings, eight brooches and five earrings. Their total valuation is placed at about \$12,000. The goods will go to the highest bidder without reference to their value and the proceeds will be turned into the United States Treasury.

Detroit.

Mrs. S. E. Dodge, wife of a prominent Ypsilanti, Mich., jeweler, died on Friday. She leaves a husband and two children.

A magnificent Past Master's jewel manufactured by W. A. Sturgeon & Co. was presented, last week, by Zion Lodge, F. & A. M., to R. H. Murray.

During the last week 18 suits were started in Detroit Justice courts against the Tontine Surety Co., by holders of diamond contracts. In the majority of cases the contracts had matured and were surrendered, but the "pure white \$80 diamond" was not forthcoming. Judgments have been given in the cases so far tried.

Ex-Alderman Herman Borck obtained three diamonds on approval, last November, from jeweler John Hellerich. He returned two, but kept the third without paying for it. Then Borck went into bankruptcy, claiming he was not responsible for his debts. The jeweler brought suit and obtained a judgment for \$45 and \$2 costs.

Omaha.

A. L. Coleman, South Omaha, is offering to his creditors 16 cents on the dollar.

Mawhinney & Holliday have incorporated with G. W. Ryan, of George W. Ryan & Co., under the name of Mawhinney & Ryan Co. The business of G. W. Ryan & Co. will be closed out at their present location, while the new firm will continue the business at the Mawhinney & Holliday location, corner 15th and Douglas Sts. The capital stock is \$60,000 and the company will deal in jewelry and crockery. The incorporators are: John F. Mawhinney, George W. Ryan and J. P. Holliday.

Harry S. Yost, Shenandoah, Pa., has discontinued his business for the present, but will reopen, April 1, in a new location with increased stock and facilities.

M. T. Graham, formerly of Nashville, Tenn., recently started a wholesale and retail jewelry business at Fort Smith, Ark., and is very much pleased with the change. Mr. Graham will visit New York in June.

THINK

(Samples only.)

Providence.

At the regular monthly meeting of the Manufacturing Jewelers' Board of Trade, held at the office of secretary M. W. Morton, in the Wilcox building, Friday noon, business of a routine nature was transacted. Two new members were elected to the board.

Included in the imports from foreign countries, received at the port of Providence the past week, were one package of precious stones and one package of imitation precious stones from Havre, and one package of imitation precious stones from Bremen.

John T. Drinan, who carried on a chasing and engraving business at the corner of Page and Pine Sts. and was one of the most prominent Grand Army men in this city, died suddenly, Thursday, at his home, 159 Ocean St., from the effects of an attack of grip. He was born 52 years ago, in New Haven, Conn., where he learned the trade of a jeweler, at which he worked until the outbreak of the Civil War. He served in the 15th Connecticut Volunteer Infantry throughout the war, until captured in 1865, when he was confined as a prisoner of war in Libby prison and Belle Isle. Coming to Providence, soon after the war, he worked for a time at his trade as a jeweler, but soon went into business on his own account as a chaser.

Delegates from a number of the larger shops of the city met, Friday evening, at the Narragansett hotel and formed a jewelers'

base-ball league consisting of eight teams from the following shops: Ostby & Barton Co., Parks Bros. & Rogers, Waite, Thresher Co., Clark & Coombs, B. A. Ballou & Co., Marden & Kettlety, George W. Dover and R. L. Griffith & Son Co. George W. Dover was made president of the league, J. P. Sullivan vice-president, G. H. Munroe secretary and H. L. Swan treasurer. The board of directors will consist of one representative from each shop. It was voted that there be no Sunday games, that no team in the league play for money and that all players be actually employed in the shops their teams represented at least 30 days before they be allowed to play.

Creditors of John M. Peck, doing business as the Providence Notion Co., last week filed a petition in bankruptcy in the United States District Court. The creditors, mostly jewelry manufacturers, claim to have accounts aggregating over \$500. The petition asks that Mark Streicher, or some other suitable person, be appointed receiver. Mr. Peck made an assignment March 5 to D. M. Katter. The latter was in Mr. Peck's employ and the petitioners assert that he is an unfit person to handle the business. The petitioners think that the goods have been shipped from the store. An order has been issued by the Court requiring Peck to appear on March 20 to show cause why the petition of the creditors should not be granted. The petitioners and the amounts they claim to be due them are as follows: Levi J. Roy, \$87; Joseph Heller, \$144.50; Mark Streicher, \$165.50; S.

New York
9 Maiden Lane

R. F. SIMMONS CO.

ATTLEBORO, MASS. Chicago
126 State Street

G. Easterbrook, \$99; Horace Grayson, \$61.50.

Mark Streicher has moved his jewelry factory from 93 Sabin St. to 110 W. Exchange St.

The name of The Trafton Co., composed of James G. Trafton and Walter E. Sanford, has been changed to the Trafton-Sanford Co.

W. S. Roberts has opened a retail and repair store in the Tyler block, Pawtucket. He was formerly associated in the jewelry jobbing business with C. B. Duckworth, of Pawtucket.

E. E. Craddock, formerly traveling salesman for Fulford & Hobart, has accepted a similar position with I. H. Sisson & Co. The latter firm recently purchased the tools and machinery used in the metal ornament business of John H. Bampton.

Fire broke out twice last Sunday in the refining factory of the Horace Remington & Son Co., corner of Friendship and Garnet Sts., causing a damage of about \$200. Fortunately the blaze was promptly discovered each time and extinguished by the chemical apparatus of the fire station nearby.

Pawtucket, R. I., is to be favored with a new enterprise. The firm of Goffe & Son, composed of F. L. Goffe, who for the past 17 years has been connected with the J. A. Foster Co., of Providence, and F. W. Goffe, the junior partner, who has been with the Weybosset Jewelry Co., of Providence, have purchased the stock of Charles B. Duckworth, who for several years has conducted a jewelry and art store at 181 Main St. With a large stock of Spring goods and the introduction of a full line of sporting goods, the new firm enter the business field. The store has been refitted and made attractive for the opening, which will occur this week. Both men are possessed of progressive ideas. Watches and diamonds with the great assortment of sporting goods will be sold.

Springfield, Mass.

The Enterprise Plating Co. have removed from this city to Holyoke and will occupy quarters in the Willard building, Front St.

A large part of the stock of the A. F. Towle & Son Co., Greenfield, purchased by Smith & Murray, this city, is being sold at prices that must rather distress local jewelers.

Mrs. Lucy Hale, wife of D. Frank Hale, died in this city, last week, as the result of paralytic shocks. She was born in East Hartford, Conn., and was married to Mr. Hale in 1855.

IVORY, EBONY AND SHELL,

14 East 17th Street,

NEW YORK.

North Attleboro.

Woodbury Melcher, of Scofield, Melcher & Scofield, has been on the serious sick list for some days.

Several North Attleboro jewelers have joined the movement for a reduction of the postal rates inaugurated in Philadelphia.

The Wrentham jewelry factories were last week shut down for a period of three days, owing to a heated local political campaign.

The young women of the H. F. Barrows & Co. jewelry shop have organized a base ball nine. A challenge will shortly be issued to the men of the working force.

A school of jewelry designing has been started in North Attleboro by a public spirited citizen. Alpheus G. Green, for several years a designer for the Gorham Mfg. Co., has been placed in charge.

Fred S. Gilbert has been elected to office in an organization of local business and professional men of the town to maintain a place of resort for young men of the jewelry factories which will be wholesome in its influence.

Fred J. Mills, whose retirement from the Sommer & Mills Co. was mentioned last week, has sold his entire household property and engaged passage for England. With his father as partner he is about to start a jewelry manufactory in London.

A. H. Bliss, of A. H. Bliss & Co., has had built for himself a two seated automobile. The work has been done in a small building erected for that purpose on his land and an expert from Tarrytown, N. Y., has superintended the work. The carriage is done and is regarded as a success.

Martin Brown, representing a jewelry house of Meriden, Conn., has been spending several days in North Attleboro. He is seeking to entice to Meriden as large

a number of stone setters as possible. His concern is running 13 hours a day and would add greatly to its working force if men and girls could be secured.

The four young men who committed the robbery mentioned in last week's issue as having been perpetrated at the factory of G. C. Hudson & Co., were promptly arrested. Deputy sheriff E. Carlisle Brown, who had charge of the case, learned that a local youth had been giving away to friends in Providence some valuable woven purses of the sort now being made by a number of local houses. He at once began to work on that clue with the result that on the 12th he arrested George Heckman, Edward Sekowski, Lester and Robert Tilton. Each pleaded guilty at the time of his arrest and the Tiltens and Sekowski not only surrendered their persons but also a quantity of loot hidden in their homes. Heckman could not do so, as he had only mounted guard while the robbery was committed and then refused to share the plunder. The boys confessed at the same time to having robbed John T. Joyce & Co., which fact had never been known even in the Joyce office, for they had acted so skilfully and taken so little that it had not been missed. They spent the time until Saturday of last week in jail at Taunton under \$300 bail. Saturday they were given a hearing. There were two charges against each, but Sheriff Brown decided to be lenient and withdrew one of each pair. They were then arraigned on the charge of entering the Hudson factory and stealing 47 guard chains, 24 neck chains and 21 bracelets. They pleaded guilty. A representative of the Hudson concern begged for leniency for them and their parents did the same. The Judge summed up the case in a serious and fatherly way and recorded a conviction, but suspended sentence and allowed them all to go on probation.

Attleboro.

Harry Clap, of the Daggett & Clap Co., is passing cigars on the arrival of a little daughter in his home.

Bernard Rothschild, of Rhodes Bros. & Rothschild, left last week with his sample case for a fortnight through the Empire State.

There is discussion in several jewelry offices as to the value of an exhibit in the Massachusetts-Rhode Island building, at the Pan-American Exposition.

Charles E. Bliss, of Bliss Bros.; William H. Garner, of the Dunbar, Leach, Garner Co., and Harold E. Sweet, of the R. F. Simmons Co., were given office when the Attleboro school board organized.

A public hearing was held last week by the town officials who are framing a new by-law to restrict hawkers and peddlers. It was shown that a good deal of cheap jewelry, represented to be made abroad, is being peddled, and rigorous prohibition of this will be embodied in the by-law.

Another bill, introduced into the Massachusetts House, would affect Attleboro factories if passed, but such a result is not anticipated. It would prohibit all factories from turning waste or sewage into the water of any natural watercourse in the State. The practice is, of course, almost universal, and the Ten Mile River through the Attleboros is no exception.

The Tiffany Glass and Decorating Co., New York, have made a princely loan to the Attleboro public schools. A Museum of Arts and Crafts has been started in the schools to exemplify taste in designing manufactured goods, and the course of instruction in drawing is arranged to furnish excellent training for men and women to go into certain branches of the jewelry and art goods industries. Hearing of it, the Tiffany Co. have loaned a large collection of their Favre glass ware.

JUST BECAUSE

you haven't noticed our adv. in this medium for the past two years, you needn't think you've lost **Dover**. We've been doing "stunts" on another stage. Now that we are top-liners in the circuit, you can look for a change of bill every week.

For the edification of those who have been born, in a business sense, in the interim, we modestly announce that we are the largest makers of **Jewel Settings, Metal Ornaments and Jewelry Components** in the **United States** and their **possessions**, acquired and in prospect.

GEO. W. DOVER,

80 Clifford St., Providence, R. I.

P. S.—Mix a few of Dover's ideas with yours and watch them effervesce.

THE "DUKE OF YORK."

We do not sell our wares to Dry Goods and Department Houses and have never done so.

Waltham Watches.

SYSTEMATIC railroad watch inspection was first adopted during recent years. Introduced by a wise foresight, it has been gradually extended to almost every railroad in the United States and Canada. This safeguard for the traveling public was made possible by the construction of WALTHAM railroad watches, from which, indeed, it was the logical result. The AMERICAN WALTHAM WATCH COMPANY was the first to manufacture an 18 size full plate movement. For a quarter of a century this Company has made watch movements expressly designed for railroad use, and more than twenty years ago WALTHAM watches were selected by the British Government as the official timekeepers on the state railways in India. Successive improvements in manufacturing at WALTHAM have always enabled the AMERICAN WALTHAM WATCH COMPANY to produce the best pocket timepieces. The WALTHAM watch not only was the first, but was, and is, the finest railroad watch.

The VANGUARD is the highest quality 18 size WALTHAM movement. It was introduced in 1894 and immediately became the foremost watch for railroad men. It is the best 18 size movement one can buy. Other qualities of movements in VANGUARD model are CRESCENT STREET and APPLETON, TRACY & CO. This model has many points of superiority. Important among them are the following:

FIRST.—Its solidity and strength. While the frame of the ordinary movement is composed of seven parts, the VANGUARD model frame has but four parts. In this model separate pillars are dispensed with, the top plate and its support being in one piece.

SECOND.—The location and protected condition of the balance wheel, which is placed farther from the mainspring than in the ordinary full plate movement and accordingly is less liable to polarization that might accrue from a slight degree of magnetism in the mainspring. The value of this improvement will be apparent when it is considered that should the balance wheel, which in a quick train watch normally vibrates 18,000 times per hour, make but ten vibrations more or ten vibrations less, per hour, the watch will have gained or lost forty-eight seconds per day.

THIRD.—The use of the double roller, whereby escapement friction is reduced.

FOURTH.—The manner of securing the jewel pin in the impulse roller.

FIFTH.—The improved tempered steel safety barrel, which secures the train of the watch against dangers otherwise likely to result from breakage of the mainspring, and also allows the use of an extra wide and long mainspring, which gives the watch more than forty hours' run. This barrel may be taken out without removing the balance.

All WALTHAM railroad movements are fitted with the WALTHAM patent Breguet hairspring. This spring is hardened and tempered in form—not a flat spring merely bent into shape. It is not to be found on any other make of watches in the world.

The finish of the steel parts, damaskeening of the plates, and other features of ornamentation are consistent with the excellent timekeeping qualities of these movements.

American Waltham Watch Company,

WALTHAM, MASS.

PUBLISHED EVERY WEDNESDAY BY
THE JEWELERS' CIRCULAR PUB'G CO.,
 CORBIN BUILDING, 11 JOHN ST., COR. BROADWAY,
 NEW YORK.
 TELEPHONE: 1148 CORTLANDT. CABLE ADDRESS: JEWELAR, NEW YORK.

Vol. XLII. March 20, 1901. No. 7.

A JOURNAL DEVOTED TO THE INTERESTS OF JEWELERS, WATCHMAKERS, SILVERSMITHS, ELECTROPLATE MANUFACTURERS, AND ALL ENGAGED IN KINDRED BRANCHES OF INDUSTRY.

Member of the American Trade Press Association.

Our editorial columns will contain our own opinions only, and we will present in other columns only what we consider of interest or value to our readers. Advertising matter will not be printed as news.

Advertising rates in THE JEWELERS' CIRCULAR-WEEKLY are lower, considering the number of tradesmen reached by its large circulation, than in any other jewelry journal.

Notices of changes in standing advertisements must be received one week in advance; new matter can be received up to Monday.

INFORMATION FOR SUBSCRIBERS.

Terms of Subscription, Postage Prepaid.

	PER ANNUM.
United States and Canada, - - -	\$2.00
Foreign Countries in Postal Union, - - -	4.00
England and Colonies, - - - - -	16s.
France and Switzerland, - - - - -	20 fr.
Germany, - - - - -	16 marks
Single Copies, - - - - -	.10

New Subscribers can commence at any time.

Payments for THE JEWELERS' CIRCULAR-WEEKLY, when sent by mail, should be made in a Post-Office Money Order, Bank Check or Draft, or an Express Money Order or Registered Letter. All postmasters are required to register letters whenever requested to do so.

Pay money only to authorized collectors having proper credentials.

Returning Copies. Returning your paper will not enable us to discontinue it, as we cannot find your name on our books unless your address is given.

Changing Address. In changing address always give the old as well as the new one. Your name cannot be found on our books unless this is done.

Discontinuances. We will continue to send papers until there is a specific order to stop, in connection with which all arrearages must be paid; but such an order can be given at any time, to take effect at or after the expiration of the subscription. All such orders will be promptly acknowledged by mail.

Liability. The courts have decided that all subscribers to journals are responsible until arrearages are paid in full and an order to discontinue has been received by the publisher.

THE JEWELERS' CIRCULAR-WEEKLY IN EUROPE.

Among the places in Europe where it is on file are the following:

LONDON—First Ave. Hotel, Holborn, E. C.; Holborn Viaduct Hotel, Royal Hotel.

PARIS—Hotel de L'Athene, Rue Scribe.

LEIPZIG—Handels-Zeitung für die gesamte Uhren Industrie.

BERLIN—Deutsche Uhrmacher Zeitung, Jager Strasse, 73.

GENEVA—Journal Suisse D'Horlogerie.

AMSTERDAM—Continental Club, Hotel Amstel.

ANTWERP—Diamond Club, Rue de Pelican.

Every line of reading matter in THE JEWELERS' CIRCULAR-WEEKLY, with the exception of a few brief extracts from exchanges, always properly credited, is written exclusively for this journal. Each issue of THE JEWELERS' CIRCULAR-WEEKLY is copyrighted. Permission to quote is extended to other publications provided such quotations are properly credited.

The "Memorandum" Question.

IN their action appointing a committee to take up the question of "memorandum" bills as used in the jewelry trade, the directors of the Jewelers' Association and Board of Trade have touched upon a subject of vital importance to all jewelers and one which, for the benefit of the trade in general, should be thoroughly gone into and settled at the earliest possible moment. Collateral to this subject is another of equal importance which often grows out of memorandum transactions, namely, the right of the jeweler to recover, without costs, property taken on memorandum and hypothecated with a third party. This question came up prominently, recently, after the conviction of Charles E. Mather, charged with the larceny of a pearl rope valued at \$21,000 from Alfred H. Smith & Co., and a pearl necklace valued at \$3,600 from Fred. W. Lewis & Co., both of New York. In its final outcome this case called attention to a condition in relation to the recovery of stolen goods that will be anything but satisfactory to jewelers if the same procedure be followed by the courts in future suits. It had been believed up to that time that a man whose goods were stolen was absolutely protected by the law after the conviction of the thief, and that the property stolen could be recovered, if traced, provided the theft had been proven. This, however, was not the experience of Messrs. Smith & Co. and Lewis & Co., inasmuch as, although they applied to the court after Mather had been convicted on both crimes, for an order to restore to them the articles stolen by Mather, the application was denied; and to recover the property these merchants had to compromise with the pawnbroker with whom Mather had pawned the jewelry and pay him half the sum he had advanced upon them. If the action of the Judge in refusing to Messrs. Smith & Co. and Lewis & Co. an order for their property be good law, jewelers should take some measure to have the code so amended that it will afford them more protection than now exists. The reading of Sections 687 and 688 of the Code of Criminal Procedure seems, however, to protect the owner of stolen property despite the construction put upon it by the pawnbroker and his attorney. These sections read as follows, in dealing with the disposal of property, stolen or embezzled:

687. WHEN IT COMES INTO CUSTODY OF MAGISTRATE HE MUST DELIVER PROPERTY TO OWNER, ON PROOF OF TITLE AND PAYMENT OF EXPENSES.—If property stolen or embezzled come into the custody of a magistrate, it must, unless its temporary retention be deemed necessary in furtherance of justice, be delivered to the owner, on satisfactory proof of his title and on his paying the necessary expenses incurred in its preservation, to be certified by the magistrate.

688. COURT IN WHICH TRIAL IS HAD, ETC., MAY ORDER SUCH DELIVERY TO OWNER.—If property stolen or embezzled have not been delivered to the owner, the Court before which a trial is had for stealing or embezzling it may, on proof of his title, order it to be restored to the owner.

We would call attention to that part of Section 688 which distinctly provides that on proof of his title the Court may order the property stolen to be restored to the owner. It was contended in the Mather case by the pawnbroker's attorney that

in "proving his title" the owner of the goods must bring a civil action and that the evidence which convicted the thief was not sufficient for the Court to grant an order restoring the property. In the civil action the attorney would undoubtedly contend that the evidence of the criminal trial was not admissible and that the owner must prove all over again the circumstances of the theft and his ownership of the property. Such an action, as is well known, would take at least two, and perhaps as much as 10 years before its final adjudication. With all due respect to the Court and the attorneys, we differ from the construction which they have put upon these sections and believe that the sections do, as they always were supposed to, give power to the Magistrate in whose custody the stolen property has come, to order, after the conviction of the thief, the property to be delivered to the owner on satisfactory proof to the Magistrate of title thereto. If the word "may" in this section gives the Magistrate discretion to refuse such an order or makes him liable to the pawnbroker if he complies with the complainant's request, is it not time that the jewelers agitate for legislation to change this section?

Agitation for a proper memorandum that will not be subject to the provisions of the "conditional sales" statutes is primarily for the purpose of allowing the jeweler to recover property given on memorandum that has been diverted from the possession of the person to whom it was intrusted. If, under the law as it is administered, a holder of stolen property may not be required to surrender it after the conviction of the thief, will any improvement in memorandum agreement alone be effective in facilitating the recovery of property by the owner?

Jewelers' Association and Board of Trade on the Question of "Memorandum."

Acting on a communication from Milton P. Bagg, the board of directors of the Jewelers' Association and Board of Trade, at their regular meeting, Thursday, appointed a committee of three to look into the question of "memorandum" as used in the transaction of business in the jewelry trade and to report on the legal status of the agreements generally used and upon the advisability of drafting an agreement for universal use by the trade that would not be subject to the provisions of the conditional sales section of the Liens law passed in New York in 1897. This committee, who were O. G. Fessenden, of Hayden W. Wheeler & Co., A. K. Sloan, of Sloan & Co., and Leo Wormser, of the Julius King Optical Co., held a session, Monday afternoon, at the rooms of the Jewelers' Association and Board of Trade, 54 Maiden Lane. Mr. Bagg appeared before them and spoke on the necessity of taking some action to settle the status of memorandum bills and presented a brief drawn by his attorneys on the subject. After a general discussion, the committee adjourned and will report at the next meeting of the directors.

Harvey R. Smith has gone into the jewelry business in El Dorado, Kan.

Traveling representatives may consider these columns open for the publication of any news or items of interest regarding themselves or their confreres.

The traveling representatives of the eastern firms who called on the Kansas City, Mo., trade last week were: J. P. Norton, Whiting Paper Co.; C. A. Hulstrom, Wilcox & Evertsen; George L. Brenning, Dennison Mfg. Co.; Herbert W. Van Houten, for C. Sydney Smith; William J. McQuillin, Hodenpyl & Sons; W. C. Barry, Larter, Elcox & Co.; Mr. Singleton, Adams & Singleton; Thomas E. Rogers, Riker Bros.

L. Zohonyi has returned from his maiden trip for Louis Finkelstein, St. Paul, Minn.

E. R. Apt, traveling salesman for B. Schuette, Minneapolis, Minn., has left for the northern trip.

A. Rosenbaum, with L. Witsenhausen, New York, has just returned from a successful trip west and south.

J. S. Cohen, of J. S. Cohen & Co., St. Paul, Minn., has got back from a trip in the copper country.

Among the traveling salesmen who were in Denver, Col., last week were: Mr. Bierbaum, J. M. Fisher & Co., and George Anderson, E. L. Spencer & Co.

Frank Glickouf, representing A. I. Shapira & Bro., St. Paul, Minn., has just returned from a trip through the copper country.

The annual banquet of the Manufacturing Jewelers' Salesmen's Association has been set for April 13. The members are requested to notify secretary E. W. McAllister, at Providence, R. I., if they propose to attend. It will be a big affair.

W. H. Burton, Gorham Mfg. Co., just back in Chicago from Montana, reports good sales of large stuff for weddings after Easter and a good demand for staple goods in that section. The country seems to be prosperous and jewelers are reporting a pretty good business.

The following traveling men interviewed the jewelers of Portland, Ore., the past week: Henry M. Abrams, M. L. Levy & Co.; De Lacey Stone, Shafer & Douglas; David Beer, Bernheim, Cohen & Beer; James W. Hagan, Bippart, Griscom & Osborn.

A number of eastern men were in Cincinnati, O., last week, among them: J. J. Sommer; E. Mumford, Waite, Thresher Co.; Harry Kennion, Parks Bros; & Rogers; H. Mix, Wightman & Hough Co.; A. H. Oakley, Thornton Bros.; H. Cobb, Daggett & Clap Co.; G. N. Lawton, for D. S. Spaulding; R. B. Steele, Kohn & Co.

Among the traveling salesmen who recently passed through Detroit, Mich., were: E. W. Brannon, John W. Reddall & Co.; A. H. Cohn, Henry Froelich & Co.; Charles Lochner, Hayes Bros.; Jack Thompson, Bioren Bros.; Lawrence H. Smith, Bippart, Griscom & Osborn; F. D. Newburger, R. Blackinton & Co.; William Matschke, F. & F. Felger; G. F. Lettes, A. Sartorius & Co.

E. S. Villmoare, traveler for the Norton-Paulson Jewelry Co., Kansas City, Mo., returned from his Texas trip, last Saturday, and went out again almost immediately. William S. Schuman is making his first trip for the Norton-Paulson Jewelry Co. this week, representing their material department. He is a brother of Julius Schuman, who travels for William Kinscherf, New York.

Traveling salesmen seen in Boston, Mass., last week included: David Kaiser, David Kaiser & Co.; Leverett S. Lewis, Morris Prager & Co.; E. H. Pelletreau, David Kaiser & Co.; Irving L. Russell, L. Tannenbaum & Co.; Harry F. Barrows, Jr., H. F. Barrows & Co.; Thomas G. Frothing-

ham, Jr., Thomas G. Frothingham & Co.; W. S. Metcalf, The Plainville Stock Co.; E. W. Martin, Martin, Copeland & Co.; Mr. Larter, Larter, Elcox & Co.

The following eastern traveling representatives were in St. Louis, Mo., last week: Mr. Curley and Mr. Wells, The American Waltham Watch Co.; John H. Carr and Mr. Dickinson, The Elgin National Watch Co.; Louis Barnett, Bracher, Becker & Barnett; George W. Birnbaum, Bonner & Co.; J. Rothschild, Ingomar Goldsmith & Co.; F. M. Van Houten, Van Houten Bros. Jewelry Co.; Lewis L. Squire, F. H. Cutler & Co.; J. H. Friedlander, H. Z. & H. Oppenheimer.

The following traveling men were in Minneapolis and St. Paul, Minn., the past week: Mr. Sandfelder, the D. F. Briggs Co.; H. B. Lewis, the Franklin Pen Co.; B. Eichberg, Eichberg & Co.; Jules Franklin, L. Tannenbaum & Co.; representatives of C. P. Goldsmith & Co. and of the Parker Clock Co.; Harry McConnell, C. G. Alford & Co.; Frank Carpenter, Frank M. Whiting & Co.; Fred. Pettee, the Waterbury Clock Co.; C. B. Osgood, the Dennison Mfg. Co.; E. L. Mumford, the Waite, Thresher Co.; I. S. Richter, Doran, Bagnall & Co.; Frank Franklin, Louis Kaufman & Co.; John P. Gill, Ignaz Strauss & Co.

Traveling men calling on Davenport, Ia., jewelers the past week were: F. C. Winship, T. B. Clark & Co.; F. R. Horton, Carter, Hastings & Howe; A. F. King, King, Raichle & King; F. L. Carpenter, Frank M. Whiting & Co.; Alex. Strauss, Jacobson Bros.; G. W. Bruns, Juergens & Andersen Co.; I. Phillips, J. Hoare & Co.; M. L. Barnard, J. B. Bowden & Co.; Otto Sinauer, Oppenheimer Bros. & Veith; R. B. Reineck, Seneca Glass Co.; J. F. Garland, L. H. Keller & Co.; E. G. Adler, Freudenheim Bros. & Levy; E. P. Sinnock, Ehrlich & Sinnock; Stephen H. Bridges, H. F. Hahn & Co.; Thomas E. Rogers, Riker Bros.

The Indianapolis, Ind., trade were visited last week by the following traveling representatives: William W. Middlebrook, B. A. Ballou & Co.; E. A. White, The George L. Vose Mfg. Co.; Max L. Jacoby, Manchester Mfg. Co.; Milton S. Rodenberg, Rodenberg & Dunn; G. Rodenberg, S. & B. Lederer Co.; Harry B. Kennion, Parks Bros. & Rogers; Charles F. Langhaar, George Becker & Co.; L. T. Field, W. G. Clark & Co.; C. T. Barbour, Plainville Stock Co.; E. W. McAllister, Irons & Russell; A. H. Oakley, Thornton Bros.; F. N. Vaslett, Fletcher, Burrows & Co.; Mr. Cook, Fontneau & Cook; H. E. Cobb, The Daggett & Clap Co.; Frank W. Trewin, The Keystone Watch Case Co.

Travelers in Pittsburgh, Pa., last week included: Richard Robinson, T. G. Frothingham & Co.; Mr. Cook, Fontneau & Cook; J. M. Torbert, The Simeon L. & George H. Rogers Co.; J. J. Sommer, Sommer & Mills Co.; F. R. Sheridan, Horton, Angell Co.; J. Lenardson, Charles E. Hancock Co.; D. Skutch, New Haven Clock Co.; W. H. Race, International Silver Co.; John T. Miller, Seth Thomas Clock Co.; George Southwick, Union Braiding Co.; Frank W. Trewin, The Keystone Watch Case Co.; Albert L. Stearns, Roy Watch Case Co.; George H. Remington, Waite, Mathewson & Co.; Mr. Williams, Arnold & Steere; W. R. Shute, Jones & Woodland; George L. Paine, E. I. Franklin & Co.; Mr. Woods, Woods & Chatellier; R. M. Hamilton, Hamilton & Hamilton, Jr.

Among the representatives of wholesale houses noticed in Syracuse, N. Y., the past two weeks were: O. Krause, Arthur W. Ware & Co.; J. E. Simonsou, Ludwig Nissen & Co.; M. D. Smith, S. B. Champlin Co.; Morris Weil; H. E. Slater, Champenois & Co.; W. H. Hurlbert, Providence Optical Co.; W. H. Bryant, T. G. Hawkes & Co.; F. C. Allen, D. Gruen, Sons & Co.; Charles T. Dougherty, William L. Sexton & Co.; Frank L. Wood, Ludwig Nissen & Co.; Frank D. Delano, Day, Clark & Co.; Mr. Lavigne, Mathey Bros., Mathez & Co.; Lawrence H. Smith, Bippart, Griscom & Osborn; M. May, Morris May & Co.; Mr. Marston, Manning, Bowman & Co.; S. E. Coggins, Towle Mfg. Co.; Mr. Noyes, Ehrlich & Sinnock; C. F. Sweasy, William B. Kerr & Co.; Mr. Kingman, Arnold & Steere; C. E. Thomas, International Silver Co.; W. F. Heft, T. B. Clark & Co.; E. H. Cox, Sussfeld, Lorsch & Co.; Mr. Zugsmith, Seamless Wire Chain Co.; M. Baum, Rothschild Bros.; E. W. Brannon, John W. Reddall & Co.; J. Goldberg; Theodore Lyons, for S. Lyons; Arthur N. Tichenor, George B. Bains & Sons; Frank W. Harmon, M. B. Bryant & Co.; W. H. Gregory, Strobell & Crane; A. N. Dorchester, Chapin & Hollister Co.; George S. Benedict, Geneva Optical Co.; C. P. Koch, The Meyrowitz Mfg. Co.; Jacob Schorsch, I. Emrich & Co.; William L. Waldert, E. Kirstein, Sons Co.; Mr. Kenrick, Reed & Barton.

43 Rue de Meslay, PARIS

Telephone, 2188 Cortlandt

17 Maiden Lane, NEW YORK

New York Notes.

H. Tissot has entered a judgment for \$1,251 against Vincent Grosso.

John E. Shepard, retail jeweler, will remove, May 1, from 170 Broadway to 43 Nassau St.

F. Kohn, 37 Maiden Lane, who has been ill since April last, is again at his office and has resumed business.

Edward Todd & Co. have vacated their offices at 9 E. 16th St. and are now located in larger quarters at 1128 Broadway.

The judgment for \$667.40 entered by Alois Kohn & Co., May 5, 1893, against Israel M. Finkelstein was canceled last week.

Charles N. Swift & Co., manufacturers of boxes, cases and wooden novelties for the jewelry trade, are occupying new quarters on the top floor of 329 Fourth Ave.

The J. Rogers Silver Co., of New York, were incorporated last week with a capital of \$3,500. The directors are Jacob Rogers, Lizzie Relkin and Bernard Rogers, of New York.

The regular meeting of the stockholders of the Gorham Mfg. Co. was held last week and the old board of directors reelected. The directors will, at a future meeting, elect the officers of the corporation.

Sydney J. Manby, late of 30 E. 29th St., has removed to more commodious and convenient show rooms at 1 W. 38th St., where he will have on exhibition a complete and attractive line of bric-à-brac, clocks, bronzes and smokers' articles.

At the annual meeting of the stockholders of C. G. Alford & Co., held Wednesday last, C. G. Alford, J. Warren Alford and J. C. Andress were reelected directors. At a subsequent meeting of the directors, C. G. Alford was reelected president. J. Warren Alford was re-

elected vice-president and treasurer, and J. C. Andress was reelected secretary.

At the regular monthly meeting of the directors of the Jewelers' Association and Board of Trade, held Thursday, the following concerns were unanimously elected to membership in the organization: Chemical National bank, Lissauer & Co. and Charles L. Power & Co., New York; O. C. De Long, Syracuse, N. Y., and W. J. Johnston Co., Pittsburgh, Pa.

T. C. Worden is now the Assistant Appraiser in charge of the Second Division of the Public Stores, New York, through which pass the precious stones, jewelry, silver, art goods, china and other lines imported by and for the jewelry trade. Mr. Worden, who succeeds the late J. Hart Brewer, in charge of this department, was formerly at the head of the 10th Division.

Benjamin F. Davis, who was arrested in this city recently, charged with stealing \$8,000 from Hipp. Didisheim & Bro., watch importers, 54 Maiden Lane, for whom he had acted as agent at Chicago, was taken to Chicago last week. Davis pleaded guilty and said he was willing to return to Chicago. Magistrate Olmstead committed him to the Tombs. A warrant for Davis's extradition was obtained, but Warden Hagan, of the Tombs, refused to give him up unless he had a discharge from the Magistrate. Magistrate Olmstead refused to sign a discharge, on the ground that he had no legal authority to do so. Warden Hagan, Thursday, released Davis and he was taken to Chicago, Friday.

A. J. G. Hodenpyl, of Hodenpyl & Sons, who was a juror at the Paris Exposition of last Summer, is the recipient of a beautiful silver loving cup, presented to him by Tiffany & Co., last week. The cup, which was made by the donors,

comes as a memento of their esteem and as a token in recognition of Mr. Hodenpyl's successful work at the Exposition. It is of sterling silver, eight and one-half inches high by six inches, in diameter, weighs 45 ounces and has a capacity of five pints. At the front, between two of the three handles, appears Mr. Hodenpyl's monogram, "A. J. G. H.," surrounded by a belt containing the motto, "Cum grato animo pro optime factis." The cup has been universally admired by the many friends to whom Mr. Hodenpyl has shown it and is one of the most cherished testimonials in Mr. Hodenpyl's possession.

The schedules of David Linder, a bankrupt instalment jeweler, formerly of 122 Essex St., were filed in the United States District Court, Wednesday. Linder was declared a bankrupt on the petition of three creditors, filed Jan. 22 last. His schedules show liabilities of \$10,489.07 and nominal assets of \$13,440.95. Of the liabilities \$1,547 is in secured claims; \$8,691.37 of creditors whose claims are unsecured, and \$250 in accommodation paper. The assets include cash, \$6; stock on hand, \$1,126, and accounts due Linder, \$12,108. Among the creditors for more than \$100 are: L. Bernan, \$120; M. Scheuer, \$144; F. Kaffeman, \$177; A. A. Vantine & Co., \$201; S. Korowitz, \$457; Alois Kohn & Co., \$204; Lawson Bros., \$227; Reich & Rottenberg, \$233; Spiro & Hirsch, \$847; M. D. Sorkin, \$564; J. Horowitz, \$207; S. L. Schwartz, \$1,715; B. Cohen, \$100; J. Muscat, \$200; L. Rabelsky, \$100; A. Peckles, \$300; L. Mandel, \$100; J. Wilkenfeld, \$600; A. Newman, \$115; Samadowitz & Wolfberg, \$105; J. Aizenman, \$300; F. Banner, \$710; J. McCann & Co., \$238, and E. T. McGill, \$201.

Consider Carefully

the value of selling a watch case that contains a definite quantity of gold. You don't have to give any lengthy explanation of the thickness of the gold or ask your customer to rely upon your word for the satisfactory wear of the case. **BELL SPECIAL 14K. GOLD-FILLED WATCH CASES** are 10 dwt. standard and are so stamped in the case. A purchaser can see at once how much gold he is getting for his money, and always bear in mind that these are the only filled cases that are 10 dwt. standard and that have the quantity and quality of gold stamped in the case. It is to your interest to examine these cases before laying in your Spring stock.

Any emblem or monogram, plain or engine-turned, made to order for from 25 cents to \$1.00 over price of plain polished case.

HENRY ABBOTT, 9 Maiden Lane, New York.

Lane will be vacated and torn down in connection with the corner building, and on these premises will be erected a 15 or 18 story modern office building. Hayden W. Wheeler & Co., who have occupied 2 Maiden Lane since 1853, will, April 1, move temporarily to 15 Maiden Lane, where they will remain until the new building is completed, when they will return to their old site and occupy floor space equal to what they now have on two floors. The building at 2 Maiden Lane was erected in 1852 and Charles E. Hale, founder of the business of Hayden W. Wheeler & Co., became one of its first tenants. Hayden W. Wheeler came to 2 Maiden Lane in 1853 and traveled for Mr. Hale four years, after which he was given an interest in the business. The firm then became Charles E. Hale & Co. and the succeeding changes in firm name and personnel have been Wheeler, Parsons & Co., Wheeler, Parsons & Hayes and Hayden W. Wheeler & Co.

Philipp W. Zellenka, of Philipp Zellenka & Son, is now in Budapest, Austria.

A. F. Roy, founder and president of the Camm Watch Case Co., 21 Maiden Lane, has severed his connection with that company and has been succeeded as president by S. H. Holmes. The other officers remain as before.

Charles A. Hamilton, vice-president of the International Silver Co., is president of the Arizona Blue Bell Copper Co., and among the other directors of the company are George C. Edwards, of the International Silver Co., and Hon. J. Frank Allee, jeweler, Dover, Del.

The building at 9-11-13 Maiden Lane, which, since its erection, has been known as the Gill building, will hereafter be known as the Jewelers' building. The

original name was taken from Frank N. Gill, who was, but is no longer, the owner of the structure. The old lettering will be changed this week.

Joseph Brüll, the son of the late Joseph Brüll, for many years a leading jeweler on the East Side of New York, died at his home, 512 E. 89th St., March 11, and was buried, Thursday, from St. Joseph's Church, 87th St., between Avenue A and First Ave. The deceased had been connected with the business established by his father at 35 Avenue A for a number of years, and was admitted into partnership in January, 1894, when the firm became Joseph Brüll & Son. Since the death of his father, Nov. 5 last, he had conducted the business. The deceased was a member of Centennial Council 252, C. B. L.; St. Joseph Society of Yorkville; the Palestrina Society of New York; Yorkville Council 362, K. of C.; Cecilian Verein; St. Aloysius Society of St. Nicholas Church, and other organizations.

A meeting of the creditors of Solomon Seligman, the 14th St. jeweler and picture dealer, recently adjudicated a bankrupt, was held before referee in bankruptcy F. K. Pendleton, 27 William St., Saturday morning. The nominations for trustee made to the referee were secretary D. L. Safford, of the Jewelers' Association and Board of Trade, who was proposed on behalf of the many creditors whom this Association represent, and William F. Upson, the temporary receiver, who is nominated by Stern, Singer & Barr, the attorneys for the three creditors who put Seligman into bankruptcy. Mr. Safford's nomination was seconded by William P. Williams, on behalf of the eastern creditors, represented by the Manufacturing Jewelers Board of Trade, of Providence, for which Mr. Wil-

liams is the New York attorney. As practically all the creditors were in favor of Mr. Safford, Referee Pendleton declared him trustee and he is now in charge. The sale of Seligman's stock took place at his store, Friday, and the jewelry was auctioned off. It did not bring the inventory value or even as much as was bid for it in bulk. The fixtures were sold in bulk, as published last week, and the pictures were sold Monday.

H. Healy, 33 Myrtle Ave., Brooklyn, has opened a branch store at 435 Fulton St.

C. G. Alford, of C. G. Alford & Co., left, yesterday, on a two weeks' business trip through the west.

Louis Bogen has succeeded Nathan Cummings in the retail jewelry business at 2179 Eighth Ave.

E. S. Johnson & Co., now at 31 Maiden Lane, will remove about April 15 to the Jewelers' Court, 51 Maiden Lane.

The engagement of Elias Markens, with the Seamless Wire Mfg. Co., and Miss Harriet A. Levy has been announced. Mr. Markens has just returned from a successful trip through the west.

The first meeting of the creditors of David Linder, bankrupt, will be held, March 28, at 11 o'clock A. M., in the office of Seaman Miller, referee in bankruptcy, 346 Broadway.

H. A. Groen & Bro. have moved their diamond cutting factory into larger quarters in the same building, 29 Gold St., where they will have accommodations for twice as large a force as formerly.

The first meeting of the creditors of Solomon Bros. & Gross, who filed a petition in bankruptcy March 12, will be held at the office of N. A. Prentiss, referee in bankruptcy, 120 Broadway, March 30, at 11 o'clock A. M.

An order of Judge Brown, of the United States District Court, yesterday, adjudicated bankrupt the firm of J. T. Scott & Co., jobbers in jewelry, 4 Maiden Lane,

against whom, as already published, an involuntary petition in bankruptcy was recently filed by three creditors, after the firm had made a general assignment.

The action of Charles Knapp, manufacturing jeweler, 41 Maiden Lane, against Charles M. Levy, another manufacturing jeweler, which has been in the United States Courts for several years, has been finally settled by the action of the United States Circuit Court of Appeals, which has dismissed the appeal of Mr. Levy with costs. This suit, often spoken of in these columns, was brought by Mr. Knapp to recover damages for an infringement of design patent No. 24,690 for rings. The complainant claimed that Mr. Levy had infringed his design by producing a ring which imitated in general effect the design patented by him. The case was decided by Judge Wallace and Mr. Knapp was awarded a judgment of \$488 as damages and costs. Mr. Levy then took the appeal, which has been dismissed.

Smokers' Articles,
Desk Requisites, Etc., Etc.**

We issue no Catalogues.

PHOTOGRAPHS OF MEN.

ONE of the traditions of photography is that men always want to look like some one else. So they hook you up with a high check and martingales, and tell you to throw out your chest, to make you look like John Drew or Hackett.

I am one of the people who can't get over the isness of the is—and the way that simple, manly, characteristic pictures sell proves that the tradition is a fallacy.

**PIRIE MAC DONALD,
141 BROADWAY, NEW YORK**

NICKEL-PLATED TOAST RACK

AMERICAN PEARLS

and baroques bought for cash or sold on commission. Correspondence solicited. Established 1880.

We also make a nice line of baroque pearl jewelry for the trade.

CHAS. S. CROSSMAN & CO.,
3 Maiden Lane, New York.

Canada Notes.

Ammon Davis, who sold his business in Toronto, has opened another store at 12 King St. W., Hamilton, Ont.

James Rytic, of Rytic Bros., Toronto, left, on the 14th, for an extended European trip, accompanied by Miss Rytic. They will begin their tour, which is one of business and pleasure combined, at Naples, visiting the leading art centers of Europe. Mr. Rytic expects to place extensive orders for diamonds and precious stones at Amsterdam.

The case of R. G. Lewars, the scheme jewelry man operating under the name of the Bon Ton Novelty Co., came up at the Criminal Sessions Court, on the 15th, an indictment having been found against him for using the mails for an unlawful purpose. Mr. Du Vemet, counsel for the defence, raised a technical objection and urged that an amendment made in the law practically rendered it inoperative. The case was remanded until the Interim Sessions to allow the point to be considered.

A number of Toronto capitalists are interested in the amalgamation now being arranged between the silver plated ware business of William A. Rogers, New York, and the Niagara Silver Co., Niagara Falls, N. Y. As their operations extend to this side of the line, a charter has been applied for under the Ontario Companies Act, the name under which incorporation is sought here being William A. Rogers, Limited. The directors of the new concern are likely to include A. E. Ames, Robert Kilgour and S. J. Moore, of Toronto. Mr. Moore has been the general manager of the Niagara Silver Co. for several years and will probably be the president of the new company, Mr. Rogers being general manager. The amalgamation arrangements provide for introduction of considerable additional capital, which will be employed in extending the lines of manufacture.

Trade Gossip.

P. I. Burroughs, the jewelry auctioneer, who has just concluded a successful clearing sale for Birely & Son, Oshkosh, Wis., left that place last Sunday for Montreal, where he will, next Saturday, open a \$100,000 sale.

The growth of the convivial "Order of Buffaloes" has induced Loeb & Co., 33 Gold St., New York, to produce a Buffalo ring, which has already had an extensive sale. The ring is of silver and has on either side of a stone a finely modeled head of a buffalo. The rings are set with cats'-eyes, turquoise matrix or doublets, and are finished either bright, oxidized or colored rose gold. They are sold to retail at \$1.

A new silver plated candlestick, No. 949, has just been placed on the market by S. Sternau & Co., 204 Church St., New York, who are manufacturers of everything in metal ware. The candlestick is 2½ inches high, ¾-inch base, with solid bead trimming, silver pated and burnished. If the reader has not received a copy of S. Sternau & Co.'s latest catalogue, which contains over 50 new articles this season, he is requested to write for one, mentioning this paper, and a copy will be sent to him.

Jewelers who are about to order new show cases or store fixtures will do well to consult with Demarest & Eckerson, 435 Seventh Ave., New York, who make a specialty of turning out artistic store fixtures of the highest grade. The two members of this firm were formerly with B. & W. B. Smith, who failed some years back. Handsome cases of their manufacture are in use by Black, Starr & Frost, John Wanamaker and a number of other high class stores.

John Haack, renovator and improver of pearls, 11 John St., New York, received, a few days ago for improving, a pearl that had been in the setting for 20 years or more. The pearl was rough and lusterless, showing the marks of the clamps as well as other defects. After it had passed through Mr. Haack's hands the pearl was smooth, perfectly round and of a decidedly even and brilliant luster. THE CIRCULAR-WEEKLY representative saw the pearl before and after its renovation, and while before it was improved it looked as though it might have been boiled, after it was improved it looked as though it had never been submitted to wear or usage. It was a remarkably fine job.

A person engaged in the business of carrying freight by wagons from depots to other places and delivering packages for all persons who desire to employ him is a common carrier.

Philadelphia.

F. C. Missimer Mfg. Co. have made an assignment to Louis Hutt.

Work on the new buildings of the Keystone Watch Case Co. will be started in the early Spring.

E. P. Ledos, of the Ledos Mfg. Co., Newark, N. J., stopped off in this city, last week, on his way to California.

The estate of Victor Berenfeld, who died suddenly about three weeks ago, has been valued, according to papers filed last week, at \$2,000.

The daughter of J. H. A. Davisson, of J. E. Caldwell & Co., is to be married shortly to Frank Bennett, of West Philadelphia.

Charged with the theft of a gold watch from Snellenburg's jewelry department, Maggie Harris was, last week, held in \$600 bail for trial.

C. S. Powell, 5 S. 8th St., presented the members of the Camden Basket Ball Team with handsome badges, Saturday, at the team's anniversary celebration.

Jacob Muhr, of H. Muhr's Sons, and Andrew Kass, 13th and Market Sts., were elected to the board of directors of the Hebrew Education Society, at a recent meeting.

The convention of Knights Templar in this city, next September, will afford some manufacturing jeweler an opportunity to secure a profitable contract for medals and badges.

Charles Lodomus, Chester, Pa., has been subpoenaed by the Grand Jury of Delaware county, to give evidence regarding the alleged defective construction of the new county bridge over Chester creek.

Mrs. Schwartz, who abandoned her jewelry store on 8th St., near Race St., recently, is said to be in Atlantic City, where she intends to open a retail store with her brother-in-law, Charles Schwartz, who now conducts two stores in 8th St., one opposite the abandoned establishment of Mrs. Schwartz.

The local branch of the International Jewelers' Union held a special meeting in the hall at 8th and Spring Garden Sts., Thursday evening. The meeting was an open one and was largely attended by union and non-union jewelers. This branch of the union was incorporated on Oct. 27 and now has a membership of more than 200.

C. R. Smith & Son, 18th and Market Sts., have recovered a gold watch which was stolen from their establishment, last April, in a most unexpected way. On Tuesday last William Rogers, a coachman employed by George W. Childs-Drexel, brought the watch to the store to have it repaired. It was identified as the one, worth \$350, which was stolen last year. Rogers was arrested, but denied having stolen the timepiece.

OF THE CITY OF NEW YORK,

BROADWAY AND DEY STREET,

Solicits Accounts from the Jewelry Trade.

News Gleanings.

Lewis Hattery, Stewart, Wis., has sold out and will move to Iowa.

J. K. Williamson (Agt.), Rome, Ga., has filed a petition in bankruptcy.

The home of W. F. Baker, Cartersville, Ga., was destroyed by fire, March 8.

Horace W. Bacon, Spencer, Ind., is endeavoring to compromise with his creditors.

J. S. Graham, recently at Charleroi, Pa., is now with J. D. McAulis, Beaver Falls, Pa.

E. E. Wheeler, Hampton, Ia., expects to engage in the jewelry business at Cando, N. Dak.

Fire slightly damaged the store of Albert Von Bracht, Poughkeepsie, N. Y., March 11.

The William B. Durgin Co., Concord, N. H., have temporarily reduced their working force.

The store of W. J. Hinman, Oneida, N. Y., was much damaged by water in a fire next door, Wednesday.

Isaac Laning, Bridgeton, N. J., was severely bitten by a dog, last week, while walking along a street.

Herman Ackerman, Marysville, Kan., has moved his stock to a temporary location until his new building is completed.

A traveling dealer in "fake" clocks and jewelry has been operating in Mankato, Minn., and vicinity, recently.

W. D. Wade, manager of the Wade Jewelry Co., East Liverpool, O., is on an extended business trip of several weeks.

The citizens of Adrian, Mich., led by H. P. Wonder, of the City hotel, are endeavoring to raise funds to purchase a town clock.

C. S. Allison & Son, Owosso, Mich., are rearranging the interior of their store and show window since the removal of H. W. Mann.

A. E. Sprague, of Columbus, O., has opened a jewelry store with a small stock of goods in the front part of a drug store at Piqua, O.

Sarah F. Eells and Marie L. Frame have sold to Julius Dryfuse the stock of jewelry at Eells & Frame's store, Toledo, O., for \$2,011.61.

R. D. Trowbridge has now secured the business of T. I. Lewis in Moorhead, S.

Dak., and in future will conduct the jewelry establishment.

Some time during the night of March 9 thieves entered the store of J. A. Strachan, Atlanta, Ga., and stole a lot of jewelers' and watchmakers' tools.

J. Guy Daniels, Newberry, S. C., has purchased the interests of his partner in the firm of Daniels & Co. and will conduct the business under his own name.

Herbert H. White, who was a clerk with the William B. Durgin Co., Concord, N. H., but for two years past with the volunteer army in the Far East, is expected home soon.

The jewelry store conducted by the late J. A. Schrom, at Burlington, N. Y., is to be reopened by Mrs. Schrom and managed by Samuel White, until recently employed by M. E. Lippitt.

F. C. Cook, Janesville, Wis., who has been in Florida with a party of friends, has returned home after enjoying the climate, and states that he landed a 142 pound tarpon without assistance one day.

A. H. Baker, jeweler, who had been engaged in business at Red Lion, Pa., for about 10 years, has moved to his Baltimore county farm. Mr. Baker, before leaving, disposed of the greater part of his stock at auction and private sale.

Fred. Reama, of the Reama Silver Plating Co., Springfield, O., recently sent to Mrs. Carrie Nation a small silver plated hatchet. She received it while in the jail at Topeka, and Mr. Reama received a letter written on the Sheriff's letter head, acknowledging receipt of the gift.

Julius E. Gerhardt, of Gerhardt & Feitel, Pittsfield, Mass., has been awarded first prize of \$100 in gold for excellence in steel engraving. The contest was conducted under the auspices of Eaton & Glover, New York, and was open to Canada, Mexico and the United States.

Racine College, Racine, Wis., has been presented with a clock which stands seven feet high. On the face is the inscription: "In memory of Herbert E. Schoen, born March 10, 1886, died Nov. 13, 1900." The gift is from George Schoen, father of the boy, who was a student at the college.

W. E. Wilson, Navosota, Tex., has filed papers with the County Clerk, making an assignment of his stock of jewelry for the benefit of accepting creditors, naming H. H. Wilson as assignee. The assignment

was made for the benefit of such of his creditors only as accept their proportional share of the estate of said assignee.

Mrs. Lena Kupfer, Dillon, Mon., has sold out.

Martin Doerr, San Jose, Cal., has been attached.

J. W. Sharrard, Louisville, Ky., is in bankruptcy.

E. Lueck, of Benson, Minn., is ill of stomach trouble.

The Art Jewelry Co., San Jose, Cal., are reported in difficulties.

William Peterson, Jacksonville, Ill., has moved to new quarters.

C. Scheuermann, Madison, N. J., will move his store, April 1.

B. O. Rosse, West Chicago, Ill., has moved to a new location.

I. Zeller, Aztec, N. M., has moved his stock to a new location.

Alfred P. Larsen, Granite Falls, Minn., has changed his quarters.

D. C. Baker, Washington, Pa., is selling his stock at auction.

L. D. Hannon, Sparta, Tenn., lost heavily by fire, last Wednesday night.

M. C. Wells, Towanda, Pa., lost a dozen watches by burglars last week.

A. L. Bolsta, Ortonville, Minn., has moved his stock into new quarters.

Hans Peterson, for many years at Fertile, Minn., has gone to Toledo, Ore.

A. F. Snyder, Cripple Creek, Col., has given mortgages amounting to \$4,784.

H. F. Waddell, of Glencoe, Minn., has opened a jewelry store in Stewart, Minn.

J. C. Veden, Wadena, Minn., was married lately to Miss Lottie Howard.

H. J. Robertson has bought stock for a store soon to be opened in Wyndmere, N. Dak.

Paul C. Puls, Eau Claire, Wis., has made a number of interior improvements to his store.

Edward E. Notlage, West Medway, Mass., proposes to locate in business in the west.

L. DeBeck, Kalispell, Mon., has discontinued the jewelry business he has been conducting.

Benjamin S. Wilber, of Newburgh, N. Y., has rented quarters at Washingtonville, N. Y.

Edmund J. Daumont, one of the oldest and best known watchmakers in Louisville,

Ky., died of cancer. He was an old resident of that city.

Carter & Moyer, Uvalde, Tex., have sold their stock of jewelry and notions to Moyer & Rawley.

O. A. Bronson, Watertown, S. Dak., has bought the old Cloyes stock of jewelry and added it to his own.

C. D. Osborne, Davis City, Ia., has sold his stock of jewelry, etc., to O. W. Halstead.

E. R. Moses, of the E. R. Moses Mercantile Co., Great Bend, Kan., has been making a buying trip.

W. H. Robins, Emmetsburg, Ia., has released a realty mortgage for \$1,000 and given a new one for \$1,300.

John G. Brown, of the jewelry and drug firm of Brown & Matthewson, Marshall, Tex., has sold real estate for \$630.

P. S. Wise, of Wise & Son, St. Charles, Mo., is trying to interest capital in a printing press invented by him two years ago.

The jewelers of Portsmouth, O., have agreed to close their stores at 6 o'clock every evening except Tuesday and Saturday.

The Globe Mfg. Co., Leominster, Mass., making horn and celluloid jewelry, intend to build an addition to their factory to care for increasing business.

Leopold Lowenstein, Stephenson, Mich., had his heel torn off and his foot badly lacerated by a vicious dog. Fears are entertained of blood poison.

Mr. Grubert, of Switzer & Grubert, Staunton, Va., has retired from the business on account of ill health. Mr. Switzer will continue, having purchased his partner's interests.

George B. Bement has sold a half interest in his jewelry business at Brodhead, Wis., to F. R. Smith, of Fond du Lac, Wis. Mr. Smith was formerly of Strickland, Smith & Co., of Fond du Lac.

C. H. Phelps, who has been engaged in the jewelry, book and stationery business in Bismarck, N. Dak., has disposed of his stationery business and will continue in the jewelry and book line.

J. M. Radebaugh, Janesville, Minn., is constructing a "precision gravity clock." When completed it will run by gravity and with such absolute accuracy as to time that it will be practically exact from one year to another. It will be enclosed in a handsome black walnut case 10 feet high.

S. Mandelson will start in the jewelry

and dry goods business in Nebraska City, Neb., before the first of April.

J. A. Wiedemann, El Dorado, Kan., has sold out.

The death is reported of J. L. Wingate, Mt. Pleasant, Ia.

Frank LeBron, Keokuk, Ia., has satisfied a realty mortgage for \$1,000.

Emil Sutter, Abilene, Kan., has filed a voluntary petition in bankruptcy.

Walter C. Cornell is opening a jewelry store at 39 Water St., Newburg, N. Y.

Fred W. Brodegaard, Omaha, Neb., has given a realty mortgage for \$1,800.

M. S. Hall, Mankato, Kan., has sold real estate for a consideration of \$500.

The Elgin National Watch Co.'s quotations for shares run from \$1,600 to \$1,700 each.

G. F. Scallor has removed his stock of jewelry and notions from Devine to Big Foot, Tex.

H. O. Ewing, Fontanelle, Ia., has purchased the china and jewelry business of W. A. Weisler.

Edward E. Triem, Laporte, Ia., has been sued for \$5,000 by a woman, who claims he circulated false and injurious reports concerning her.

The plant of the defunct Anchor Silver Plate Co., owned by M. J. Cummings, at Oswego, N. Y., has been sold to the Mohawk Mfg. Co., who will manufacture sweaters in it.

Castelberg's National Jewelry Co., Washington, D. C., were awarded third prize in the series offered by the inaugural committee for the best electric illumination designs exhibited during the inauguration.

C. W. Jelliff and J. S. Pickering, of Mansfield, O., attended the funeral of Joshua Hyde, one of the oldest jewelers in the State, at Mt. Vernon, O. Twenty-five years ago they began apprenticeship under Mr. Hyde in Mt. Vernon and continued with him until they established themselves in Mansfield.

Ferdinand French, a negro, of Duquoin, Ill., was strung up by the neck and otherwise tortured to obtain a confession to the robbery of the store of Henry Croessmann, at Duquoin, Tuesday noon of last week, and the State authorities caused the arrest of Dr. T. B. Ragan, Jr., a dentist, charged with being the leader in the work. The negro denied that he robbed the store.

An Italian pack peddler, who gave his name as George Macoe and said he was from Springfield, Mass., was arrested at Chicopee, Mass., for selling jewelry. The man had a

license to sell other goods, but not jewelry. There is a severe penalty attached to selling jewelry in this way. He had a secret drawer in the old wooden box he carried in which was concealed a collection of jewelry calculated to delight the heart of an unsuspecting woman purchaser.

Thomas W. Munce, a traveling salesman for a Cleveland, O., wholesale jewelry house, was robbed of a satchel containing two dozen watch chains and six cheap watches, while waiting for a train at Rochester, N. Y. Munce was seated on one of the benches in the depot and had placed his satchel beside him. When he reached for it he found it was gone and in its place was an old grip containing a couple of old shirts, some collars and cuffs and a necktie.

Joseph W. Hurd died in Chicago of pneumonia, March 5, after a brief illness. He was a native of New Hampshire. Mr. Hurd went to Rockford, Ill., from the old Cornell watch factory, at Grand Crossing, at the time the Rockford Watch Co. began business, and in 1876 succeeded Dell Clark as superintendent of the factory. He invented a watch regulator that brought in \$200 per month at one time, but which has been superseded now. He remained superintendent of the Rockford factory for about 10 years. He then embarked in the sale of carriages, but disposed of his interests and went to Aurora, Ill., as superintendent of the watch factory there. For the past two years Mr. Hurd had not been actively engaged in business.

Last week Robert Leding, 401-405 11th St., Washington, D. C., of the former firm of Moore & Leding, jewelers, in going over his accounts found a supposed shortage, in one instance of \$10, on the part of a former clerk, Calvin McGrew. From this grew an exaggerated report of embezzlement on the part of the young man, aggregating \$1,400. This led to the arrest of the young man at his home in Hagerstown, Md. He was brought back to Washington and the case set for trial, Monday, when a plea for *nolle pros* was entered by the young man's attorney. The evidence in the case covered a transaction with reference to the sale of a watch, the first payment for which the cashier stated was not turned in. This was entirely disproved by the evidence of the purchaser of the watch, who stated that she saw McGrew hand the money to the cashier and also heard him tell him that he (McGrew) would be responsible for the balance of the money. The defendant was promptly exonerated.

TRADE CONDITIONS.

A little of all kinds of business could be found in Chicago last week good, bad and indifferent, according to the house interviewed and the lines carried by it. There was no need inquiring at watch houses—they have had good trade all along. There seemed to be a pretty good business with sterling silver houses, but plated ware was quiet. Optical houses are running along about as usual and in tools and materials the demand is easing up a bit after an active trade all Winter. This is a dull season in clocks, but the houses seem to be reasonably busy. January and February were good months in clock lines and March shows the usual seasonable falling off. The factories, which as a rule have been behind in filling orders, will now have the opportunity of catching up.

M. A. Mead is making a business trip through the west.

J. B. Schaefer, Sandusky, O., is taking a course of optics at a Chicago school.

Mr. Bennett, of Reed-Bennett Co., Minneapolis, Minn., was in the city for a brief stay on his return trip from the east.

S. L. Griffin, representative of C. F. Rumpp & Sons, leather goods, Philadelphia, Pa., will be at the Palmer house, Room 510, this city, from March 18 to April 18.

Mrs. Spaulding, jewelry store manager of the estate of the late L. C. Garwood, Champaign, Ill., was in town several days for the purpose of looking over stocks and also to employ a competent workman.

Mrs. Selkirk, wife of jeweler A. T. Selkirk, Charlotte, Mich., was in town last week, visiting the wholesale millinery houses. Mrs. Selkirk occupies one side of the jewelry store with millinery stock.

H. H. Spaulding, of the Illinois Case Co., reports the factory busy on new work, more orders for jewelry cases having come in in February than could be taken care of easily. Repair orders are also numerous.

T. D. Robertson, Dallas, Tex., has been visiting at northern cities. While at St. Louis on his way home he received the unwelcome intelligence that his home had been destroyed by fire with all its contents, the family escaping in safety. He was reasonably well insured.

Charles Henry Annin, a jewelry designer of ability associated with the house of Stevens, Wallace & Co., and Miss Hattie B. Minkler, an estimable young lady

of La Grange, were married at noon Thursday at the home of J. A. Todd, in that suburb. The couple will be at home in La Grange after April 15.

D. N. Johnson, for 14 years with the Sumpson, Hall, Miller & Co. branch of the International Silver Co., has severed his connection with that house and accepted a position with C. Rogers & Bros. Mr. Johnson has passed through boyhood to manhood in the silver ware business in Chicago.

J. M. Hedden, a well known silver ware man between the Missouri River and the Rockies, with headquarters at Denver, Col., has completed arrangements with C. Rogers & Bros. to represent them in that territory the coming year. The towns between the river and the mountains are as familiar stamping grounds for Mr. Hedden as is his home city.

J. H. Purdy & Co. received last week a curiosity from the Philippines in the shape of a Philippine "bolo." It is a two foot sword or cleaver with heavy blade, widest a short distance from the point, and has an ebony handle with brass hand guard. It was brought from Cebu, P. I., by a returning soldier as a present to Mrs. Purdy from her brother, who is hospital steward at Cebu.

H. G. Nye, Chicago manager C. Rogers & Bros., has returned from an extended trip along the Pacific coast. While there he made arrangements with Nordman Bros., San Francisco, to represent their factory on the coast. They will carry a full stock. "I had a nice trade all through my coast trip," said Mr. Nye, "and confess I was surprised at the opportunities there. To-day Seattle is one of the best towns of its size in the Union."

A gasoline explosion recently occurred in the store of M. M. Hertzstein, Crete, Neb., and Mr. Hertzstein's hands were so severely burned that he was obliged to go to St. Joseph's hospital, Omaha, for treatment. For a time it was feared that both hands had been so badly burned that amputation would have to be resorted to, but it is stated now that both can be saved, though it will be some weeks before he will be able to resume his duties.

Every employe of the Illinois Central railroad who has worked for the company for more than a year will receive recognition for his services from the stockholders in the shape of a bronze medal. A New York jewelry firm have made 16,000 of these medals and they will be distributed among the men in a few days. One side of the medal bears the inscription, "The Mis-

issippi Valley Route," and on the other is inscribed the name of the employe receiving the medal and the words "Jubilee Souvenir."

Martin, Copeland & Co., for 14 years past located at 151 State St., will move about April 15 to the seventh floor of the Champlain building, northwest corner State and Madison Sts., where they will occupy larger quarters. Manager Bleeker, of the Chicago office, is personally superintending the arrangement of the new quarters. The space formerly occupied by them at 151 State St. will be taken by Stern Bros. & Co. in the enlargement of their sales room.

Business the past week was almost entirely confined to orders from travelers or direct from country firms. There were comparatively few buyers here making personal selections. Among the more prominent of the visitors were: J. W. Neasham, Ottumwa, Ia.; A. H. Frandsen, Monmouth, Ill.; A. L. Haman, St. Paul, Minn.; Mr. Bennett, Minneapolis, Minn.; R. E. Stephens, Newport, Ind.; H. Goldman, Milwaukee, Wis.; Henry Bott, Milwaukee, Wis., and the regular nearby trade.

Columbus, O.

John W. Brennan was arrested in this city a few days ago while attempting to sell a lot of valuable jewelry for a very small sum. He claimed to have bought the goods, but he will be held for investigation. The officers believe him to be a crook.

F. M. Deinlein, jeweler, Neil house block, was a few days ago neatly victimized out of three pairs of fine opera glasses. Mr. Deinlein called at police headquarters and reported that he had several customers in his store and a large quantity of goods on exhibition. He made several sales and after the crowd thinned out somewhat he began putting the goods away, when he missed the opera glasses. He gave a description of some of the parties.

The Columbus officials are having trouble with the pawnbrokers, only six of them having as yet complied with the law requiring them to secure a license and pay a fee of \$100, or \$86.58 from Feb. 2, when the ordinance went into effect. There are 25 to 30 of them doing business in the city. It has been decided to compel them to pay the license or close their places of business. The pawnbrokers' association have given up the idea of testing the constitutionality of the ordinance.

TWO MORE ITEMS FOR YOUR CONSIDERATION.

Our Policy.

In the face of the present discussion as to confining the sale of jewelry to legitimate jewelers, we wish to state that we have always considered this a most vital point and have acted accordingly. We confine our sales to legitimate jewelers, believing we thus act in the interests of those who devote their entire time to this business and whose trade we could not afford to lose. We will continue to protect our patrons to the best of our ability by selling our goods to the trade only.

Your Sales.

There are many conditions which affect your sales, chief among which is the buying of goods from a house that caters to its customers' interests and that believes this to be the best method of winning and holding patronage. Such a house we claim to be, with such principles as appear under "Our Policy." Jewelers always find a good margin in goods bought of us, because our extensive business and purchases permit of such margins. We never misrepresent and we are always willing to do business with jewelers upon terms most advantageous to them.

St. Louis Button Co., 620 N. Broadway, St. Louis, Mo.

Cincinnati.

Among the buyers in town last week were: H. Emmerling, Hillsboro, O.; David Meenes, of Mcenes & Patton, Springfield, Tenn., and J. G. Laupus, Seymour, Ind. They all reported trade very good, so far.

August Newstedt, of Bene, Lindenberg & Co., is home to stock up for a continuation of his trip. He reports trade better than any previous Spring. Jonas Wise, of Frohman & Co., is home for a few days to get some of the new goods that have just come in. L. Loeb, of Herman & Loeb, has been on an eastern trip. While in West Virginia he inspected some mines in which he intends to invest.

Frank Herschede writes from California, where he is stopping for a few weeks, making a tour of the principal cities, that business on the coast seems to be fine, with prospects for a good trade this year. He is on a pleasure trip, but has incidentally picked up some fine hall clock orders for future delivery. John Herschede, who has charge of the business, says the orders are coming in daily in a very gratifying way. They have received some excellent orders from the east.

Mrs. F. L. Marshall, calling herself a White Rat from New York, stopped at the Burnet house, last week, for one day and then moved her baggage to the Rand hotel for a few days, returning to the Burnet for another day. She was presented with a bill and she gave a check for \$700, which the hotel people would not cash. She went out to get it cashed and did not return. In the meantime she visited the store of B. Frank Flint and asked him to send diamond jewelry, valued at \$500, to the Burnet for approval. He refused. Then she went to W. A. Davidson & Co. and purchased about \$35 worth of jewelry. Mr. Davidson would not accept her check for the amount and she left, saying she would return, pay the money and take the goods. She returned, but evidently without the cash, as she said she did not care for the goods and would not take them. The woman disappeared without getting anything, so far as can be learned. She is described as a small woman, about 30 years old, dark complexion and a dashing manner, attractive but not handsome; a woman to make friends easily.

TRADE CONDITIONS.

The wholesale dealers report that business has been good the past week and that more outside jewelers have been in the city than there had been for some time. The prospects are that the coming Summer will be one of the best for many years.

W. F. Kemper, treasurer of the Retail Jewelers' Association of Missouri, was a juror in the Criminal Court, last week.

At the next meeting of the Retail Jewelers' Association of Missouri the subject of sending out invitations to the watch companies, jewelry manufacturers and the jewelry interests in general, to participate in having exhibits at the St. Louis World's Fair will be brought up and discussed.

The work of creating the World's Fair is acquiring gratifying impetus. The spirit manifested shows that St. Louis was only waiting for an opportunity to give tangible evidence of its readiness to come to time in fact as well as on paper. Although the call for the first 10 per cent. on subscriptions distinctly stated that Monday, March 18, was the day on which subscriptions would be received at the Bank of Commerce, the doors of the bank had not been opened five minutes, March 14, before cash was tendered. The first actual payment in full on account of the first call and in response to the demand was made by the Eisenstadt Mfg. Co. when they presented a check for \$500, being 10 per cent. on their subscription of \$5,000.

Two bold thieves broke a show case in front of the jewelry store of Armando Vieta, 1819 Franklin Ave., about 8 o'clock, Thursday evening, and stole a diamond ring valued at \$55. The robbery was committed while Mr. Vieta was in his store and several pedestrians were passing on Franklin Ave. Both robbers were young men and one of them is supposed to have been hurt in breaking the glass, as blood was found on the sidewalk in front of the place soon after the men ran away. They were neatly dressed and were first noticed by Mr. Vieta apparently admiring the different articles of jewelry in the window. Mr. Vieta watched them for some time and was about to walk from behind his counter when there was a crash of falling glass in the direction of the show case. Looking around, he saw one of the men put his hand into the window and grab at a tray in which valuable rings are kept. He yelled at the robber and then ran to the door. When he reached there the thieves were running toward 19th St. The jeweler followed them a short distance, but they disappeared in the darkness.

TOWLE **MANUFACTURING CO.,**
CHICAGO **NEWBURYPORT, MASS.**

San Francisco.

F. H. Levy, of M. Schussler & Co., is home again.

E. A. Phelps, of Phelps & Adams, is in New York.

John B. Whitney was in Los Angeles, Cal., last week.

Mrs. Emile Pfund, Aberdeen, Wash., spent last week in this city.

E. B. Dana, New York, was among the guests at the Lick house, this city, last week.

H. E. Hall, writing from Honolulu, expresses himself so well pleased with our new possessions as to have postponed his return to the next steamer.

C. W. Gibbs, Wallace, Idaho, has been making his first trip to this city, accompanied by his mother and sister, who reside in Portland, Ore.

Among the visiting jewelers in San Francisco, last week, were: J. D. Clune, Sacramento, Cal.; J. Christensen, Rio Vista, Cal.; R. C. Richmond, Arcata, Cal., and Charles W. Wright, Eureka, Cal.

At a recent meeting of the retail jewelers of the North End, San Francisco, it was decided that all stores should close at 8 o'clock on all evenings, with the usual exceptions. It was agreed that any jeweler who violated the agreement should be compelled to pay a fine of \$10.

Earl Wilson, aged 19, and Leo Vaughn, aged 17, of Tulare, Cal., have been arrested in this city and their arrest has led to the clearing up of a very mysterious jewelry robbery which occurred in Tulare, last November. Vaughn is a nephew of Z. F. Vaughn, jeweler, Tulare, who last November lost several hundred dollars' worth of jewelry from his store, no trace of the robbers being found at the time. The boys came to this city and took a room in the Bonanza house, where they have been for weeks. Last week Wilson was accused by Vaughn

of stealing a gold watch. Wilson was arrested and at the police station he told such a story as led to the arrest of Vaughn, and the police consider that they now have all the evidence necessary to prove that Vaughn was the one who took the jewelry. It is believed that Vaughn has made a confession to the police in which Wilson is implicated in the robbery. Wilson was a waiter at Tulare and a very close friend of young Vaughn.

Pacific Coast Notes.

E. J. Lewis, Stockton, Cal., has vacated the store at 123 E. Main St.

George Gies intends to engage in the jewelry business at Sonoma, Cal.

Oscar R. Luedke, Anaheim, Cal., has sold his jewelry business to his brother, Adolph.

F. C. St. John, watch and clock repairer, has located in Grass Valley, Cal., having opened a shop in W. E. Johnston's store.

The jewelry business of Y. H. Boudreau, Modesto, Cal., has been formally transferred to W. L. Treggea and the new proprietor took possession, on March 1.

Gordino & Ingalsbe, jewelers, Salinas, Cal., have moved their stock of goods from their old location into 218 Main St., recently vacated by S. F. Hollander, jeweler.

S. F. Hollander, for several years past a highly esteemed citizen and prominent business man of Salinas, Cal., has gone to Eureka, Cal., where he will open a jewelry store and make that city his permanent home.

Another one of the windows in J. Glick's jewelry store, Hunter St., Stockton, Cal., was broken last week, making three glasses that have been destroyed of late. The damage was done with a rock and the manner in which the glass was broken indicated that the party had held it in his hand when he shattered the window. The rock was found on the floor under the break.

Pacific Northwest.

The death occurred, last week, of Albert E. Giering, Seattle, Wash.

George Classon will engage in the jewelry business at Ontario, Ore.

H. A. Richardson & Co. have opened up at Castle Rock, Wash.

J. H. Dunniway, watch repairer, has located at Ft. Benton, Mont., with D. G. Lockwood.

Wilson & Roper's store, Grant's Pass, Ore., was recently burglarized and goods to the value of \$100 taken.

Ed. F. Fowler Co., Boise, Idaho, are now located in new and commodious quarters at 208 N. 8th St.

Francis Dielschneider, McMinnville, Ore., has gone to San Francisco, where he will enter a jewelry manufacturing house.

D. T. Prichard, Medford, Ore., has returned from a business trip to Klamathon. It was reported that he had decided to locate at Klamathon, but he denies this report.

The store of Ames & Beull, Orting, Wash., was entered, last week, and about \$75 worth of jewelry taken. Entrance was effected through the front window by breaking a pane of glass.

Fred. Roper has purchased the interest of his partner, Roy Wilson, at Grant's Pass, Ore., and is now sole proprietor and manager of the establishment. G. D. Cusino remains in charge of the watch repairing department.

An ordinance has been introduced by the City Council of Astoria, Ore., which provides that jewelers shall each pay an annual license as follows: Dealers whose stock does not exceed in value the sum of \$2,500 shall pay an annual license of \$2.50; those whose stock in trade exceeds in value the sum of \$2,500 shall each pay an annual license at the rate of \$2.50 for the first \$2,500 worth of stock in trade and \$1 additional thereto for each \$1,000 worth of

Trade Secrets to Increase Your Business

are a feature of

It shows you **How** and **What** to push on dull days. 'Tis a gentle reminder of **what will sell this Spring**. Can't we send you a copy? It's free.

IMPERIAL MFG. CO.,

Masonic Temple, Chicago.

stock, or fractional part thereof, in excess of \$2,500.

E. T. Mower & Co., Seattle, Wash., have given a chattel mortgage for \$550.

Charles J. Hill, of Everett, Wash., has given a chattel mortgage amounting to \$500.

Marcus Sobel, Spokane, Wash., will move to a new location, at 507 Riverside Ave., his former store having been taken by an adjoining cloak and suit house.

The yield of the sapphire mines, now being worked on the west fork of the Rock Creek, 35 miles southwest of Philipsburg, Mont., for the year 1900 is given at 200,000 karats of rough crystals, 1,200 karats being fit for cutting.

Minneapolis and St. Paul.

The A. H. Simon stock, St. Paul, is being closed out.

Lewis Finkelstein, St. Paul, has gone to Hot Springs for three weeks.

F. P. Remer, jeweler, St. Paul, was acquitted of a charge of indecent exposure.

Albert Goodman, jobber, St. Paul, has returned from his southern Minnesota trip.

Frank C. Worrell, retailer, Minneapolis, has gone on a trip to Portland, Ore., for a few weeks.

J. T. Mutri, Woolsley, Can., has been in St. Paul taking an optical course with F. H. Upham.

A. E. Gregory, jewelry auctioneer, is in Minneapolis after conducting a sale at Sheboygan, Wis.

Walter G. Hudson, with J. B. Hudson, Minneapolis, has been in New York after Spring novelties.

J. M. Bennett, of the Reed-Bennett Co., Minneapolis, has returned from a three weeks' trip in New York.

Herman Haueter, of Fern'd & Haueter, Bellingham, Minn., has been in Minneapolis in search of the \$800 worth of jew-

elry stolen from the firm last week. He found about \$40 worth of goods in a Minneapolis pawnshop and is on the track of still more.

M. Thouren & Co., manufacturing jewelers, Minneapolis, have removed their offices and works from the Reeve building to 407 Nicollet Ave., fourth floor.

Harry Turner, formerly watchmaker for M. Shapira, St. Paul, but later of Howard Lake, Minn., has returned and is now at the bench for Masor, jeweler, 7th St., St. Paul.

Fagerstrom & Deeny, both members lately watchmakers for A. H. Simon, St. Paul, have opened an office and will do work for the trade. They are located in the Baltimore block.

Mowrey, Murray & Leavitt, manufacturing jewelers, St. Paul, have occupied their enlarged quarters in the Ryan block and now have nearly three times the floor space they formerly used.

Kreger's Loan and Jewelry office, recently burned out at 204 Washington Ave. S., Minneapolis, has established temporary quarters at 419 Washington Ave. S. They expect to be back at the old quarters in 30 days.

The R. B. Wegner Co., jobbers, St. Paul, will, about April 15, move from the fourth floor of the Ryan block to a new room to be fitted up on the second floor of the same building. I. D. Allen, who has been on the road for the house, has gone to Wheaton, Minn., to take charge of Mr. Wegner's retail store there.

Among the retailers in the city from the country the past week were: Dr. J. D. McKenzie, Milnor, N. D.; F. W. Harper, Renville, Minn.; O. Holmberg, Woonsocket, S. D.; W. F. Main, Cando, N. D.; C. H. Nerbovig, Mapleton, Minn.; W. S. Lindsay, Casselton, N. D.; S. B. Millard, Litchfield, Minn.; M. A. Fargem n, Fergus Falls, Minn.; C. Arveson, Sleepy Eye, Minn.; William Plackner,

Arlington, Minn.; J. C. Herdliski, Princeton, Minn.; Mr. Hauenstein, of Hauenstein Bros., Red Wing, Minn.

The creditors of Abraham Cohen, the insolvent jeweler of St. Paul, refused to accept the offer of 35 cents on the dollar for unsecured claims. After considering the matter, however, creditors to the extent of \$13,431.33 concluded to accept. Creditors to the amount of \$7,730.66 refused and there were others who had not signified either way. It is probable that the court will direct a settlement on that basis.

Denver.

The wife of B. Lamon, jeweler, died early last week.

H. G. Petty, Fort Collins, Col., was in Denver last week.

Boyd Park, of Salt Lake, was in Denver last week, looking after the Denver branch of his business.

Bert Lang, formerly in the engraving business for himself, has gone to Salt Lake to work for Boyd Park.

Col. J. D. Lewis, jewelry auctioneer, has returned from Leadville. Col. Lewis had a rather uncomfortable time in the Cloud City. He was conducting an auction for Jeweler Roth and both were arrested for violating a city ordinance, it being against the law of that community to dispose of goods in that manner. Lewis sued for an injunction against the city to stop the auction and believed that the Court would declare the law unconstitutional. District Judge Owers, however, did not take that view of the case and Messrs. Lewis and Roth lost their suit. That stopped the auction and Col. Lewis came to Denver.

H. J. Pier has purchased the jewelry and drug business of Emil Brauch, Hurley, S. Dak.

Kansas City.

F. C. Altman is entertaining a little son at his home, 1318 Harrison St.

Mr. and Mrs. S. E. Woodstock left last week for a few months' stay at Hot Springs, Ark.

Mr. Meyer, of the Meyer Jewelry Co., has gone to Chanute, Kan., for a business and pleasure trip.

Col. A. R. Kane, the jeweler and cattle raiser of southern Kansas, was last week in Kansas City with a train load of stock.

Harry Everhardt, son of L. D. Everhardt, jeweler, and one of Warrensburg's best known young men, died shortly after noon, March 7, of consumption, from which he had been a sufferer for several years.

J. H. Baker, manager of the Kansas City Wholesale Mfg. Jewelry Co., has returned from the east, where he had been making purchases preparatory to opening the company's new business in the Nelson building.

The Jaccard Jewelry Co. are getting up the invitations and programmes for the commencement exercises of the University Medical College and the Kansas City School for Nurses. They also furnished the invitations and programmes for the Kansas City Medical College exercises, held on March 5.

The jury in the case of Emma Farrington against the Streicher Watch and Jewelry Co. returned a verdict giving the plaintiff \$1,500 damages. She asked for \$2,100. Her household goods were seized by the defendant company and sold under an attachment to satisfy the debts of her husband, Elijah Farrington.

Joseph S. Frank, traveler from New York, gave a dinner at the Baltimore during his stay here, last week, as the result of a wager which he had made with J. R. Mercer when Mr. Frank was here last Spring. Mr. Frank claimed that it was impossible to rebuild Convention Hall by July 4, in time for the National Convention, while Mr. Mercer believed that it could be done. Mr. Mercer won.

The number of employes wanted would indicate that the jewelry business is keeping up well in the west. Park Findley, Beloit, Kan., wants to engage the services of a watchmaker and optician. S. Spitz, Santa Fé, N. M., who devotes special attention to Mexican filagree work, wants a fine engraver; Edwards & Sloane Jewelry Co., Kansas City, intend to add another man in their manufacturing department to do cutting for enamel and ornamental work, and the Streicher Watch and Jewelry Co., Kansas City, will employ a manager for their business.

Cleveland.

The revival of the fashion for wearing earrings has taken hold of Cleveland women.

Charles Ettinger has placed a new four dial Seth Thomas street clock in front of his place of business on Ontario St.

Mrs. Sarah E. Beckwith, mother-in-law of A. T. Hubbard, of the Cowell & Hubbard Co., died recently. The funeral was held from the home, 1023 Euclid Ave., and was attended by many friends.

NEW YORK.**

Pittsburgh.

John T. Reger has removed to Carson St., between 18th and 19th Sts.

Liljedahl & Lindborg have removed from 737 to 705 Braddock Ave., Braddock, Pa.

Charles Fehrenbach has opened a new jewelry store on Ohio St., Allegheny.

J. W. Jones was in the city last week purchasing stock for his new store at Sigonier, Pa.

E. H. Kennerdell, Tarentum, Pa., expects to close the sale of his Salem, O., store this week.

Harry B. Hayes, of Hardy & Hayes, has bought a residence in Sewickley, Pa., to which he will shortly remove his family.

Philip Ruprecht, the Sharpsburg jeweler, whose store was robbed last August, and who gained some fame because he tracked the thieves over this State and New York, was again visited by thieves last Sunday evening, about 10 o'clock, though this time he suffered no loss. The rear door of his store at 808 Main St. was forced open. It was barred by a thick hickory stick, which was broken by the thieves. Why nothing was taken after the store was broken into cannot be understood.

Indianapolis.

Frederick M. Herron is a member of the finance committee of the Commercial Club.

J. B. Bingaman, Hartford City, Ind., and Emely & Stanton, Casey, Ill., are conducting auction sales.

March 12, William B. Doddridge, Mentone, Ind., filed a bankruptcy petition. His liabilities are \$2,279.60 and his property worth \$320.

J. B. Bingaman, Hartford City, Ind.; Joseph Booth, of I. Booth & Son, Tipton, Ind., and Mr. Emely, of Emely & Stanton, Casey, Ill., were in the city last week.

J. C. Walk & Son are members of the Merchants' Association of Indianapolis, who refund the entire railroad fare of persons living within a radius of 40 miles from Indianapolis upon the purchase of \$25 worth of merchandise from one member of the association or from all combined.

Every little while gold is found in Brown county, Indiana, and even diamonds have been found in the old hillside creeks. Last Summer a diamond weighing in the rough five karats was found. A carbon streak ran almost through the center of it. The stone was sent to the cutter, who made two stones, weighing, respectively, 1½ karats and ¾—1.64 karat. The stones are very brilliant but of a yellow shade, not deep enough to be called canary, but too deep

to rank with even "the whites" of to-day. They have been estimated at between \$60 and \$70 per karat. These diamonds are owned by an Indianapolis man.

Atlanta, Ga.

"Kelley the Jeweler" is refurnishing and refitting his Broad St. establishment and the interior looks fresh and Springlike.

Mrs. Buchanan, the wife of the Atlanta jeweler who was so cruelly attacked and robbed by a negro, some weeks ago, is slowly improving. The negro has not as yet been caught.

Plans have been perfected and work begun on additions to Davis & Freeman's large Whitehall St. jewelry establishment. Architect Dinwiddie will have the entire work completed by April 1. The massive front will be exquisitely finished in marble and plate glass and the vestibule and interior will be of mosaic hardwood and marble. The fixtures and furnishings will all be in white and gold, making one of the handsomest jewelry stores in the south.

The entire stock of the F. J. Stilson Jewelry Co. was, March 13, turned over to Charles W. Crankshaw, whose bid of \$10,200, for Mrs. M. A. Crankshaw, was accepted that morning by attorney W. T. Newman, Jr., trustee in the bankruptcy case of F. J. Stilson. Mr. Newman was appointed trustee less than a month ago by P. H. Adams, referee in bankruptcy, and the case has been expeditiously handled. The entire stock of diamonds, jewelry, cut glass, fixtures, etc., will be placed on the market by Mr. Crankshaw.

A beautiful booklet comes from the Bureau of Publicity of the Pan-American Exposition, Buffalo, N. Y. The unique feature of it is the miniature reproduction of the famous poster, "The Spirit of Niagara." The booklet is a popular picture book, the first page having an engraving of the electric tower, 391 feet high, and which will form the centerpiece of the exposition. Other pages show horticulture, graphic arts and mines, manufactures and liberal arts, the music temple, the plaza and its beautiful surroundings, the athletic field, the agricultural, live stock and ethnology features, and a few of the 30 or 40 ingenious and novel exhibits which promise to make the midway the most wonderful that has even been prepared for exposition visitors. The last page shows a ground plan of the exposition, whereon the location of different buildings is indicated. Any one desiring a copy of this booklet may have it free by addressing the Pan-American Bureau of Publicity.

New York Salesroom, 621 Broadway.

The Francis Engraver

produces the closest imitation to hand work attainable. The turning point cannot be correctly understood by a good mechanic without conviction that nothing else will do. If indifferent to this fact you will find the truth unfolding itself with force, when too late to be cheaply remedied.

It is not surprising that so little is known of engraving machines and the way in which they perform the work by many who are eager for information concerning them. The rotary graver turns one revolution to cut an "O," always presenting its cutting edge to the metal. The hand engraver turns his block one revolution to cut an "O" with a single stroke, and so presents the metal to the cutting edge of his instrument. The results are the same. In whatever direction the lines run they are made clear, flashy and without bur.

If you will write me I will send you interesting information about that beneficent "Warning to the Trade" that appeared in this paper last Fall, and with it much information invaluable to a prospective purchaser of a machine.

We make a specialty of fitting up Jewelers' and Silversmiths' plants complete. We will give estimates on any size plants according to the production desired. We can furnish experienced men to set up and put plants in running order.

WORKSHOP NOTES.

Egg Stains.—These are easily and quickly removed from silver by rubbing with common salt. A pinch taken between the thumb and finger and rubbed on the spot with the end of the finger will usually remove the darkest egg stain.

To Clean Silver Ornaments.—Make a strong solution of soft soap and water, and in this boil the articles for a few minutes; 5 will usually be enough. Take out, pour the soap solution into a basin, and as soon as the liquid has cooled down sufficiently to be borne by the hand, scrub the articles with it, using a soft brush. Rinse in boiling water and place on a porous substance (a bit of tiling, a brick or unglazed earthen ware) to dry. Finally give a light rubbing with a chamois. Articles, thus treated, look as bright as new.

To Poise a Watch Balance.—Poising a watch balance is done with sufficient accuracy by scraping one arm of the calipers with a file, when the balance is set in motion. This will cause the heaviest part to settle downward with certainty, observing always that the pivots are nicely rounded and formed at the ends. In some cases it becomes necessary to put a balance out of poise in order to make the watch go equally in various positions. The rule for this is: To make the watch gain, the balance should be heaviest on the lower side when hanging up; to make it lose, the reverse.

To Clean Silver Ware.—Make a thin paste of levigated chalk and sodium hyposulphite, in equal parts, rubbed up in distilled water; apply this paste to the surface, rubbing well with a soft brush. Rinse in clear water and dry in sawdust. Well levigated, not precipitated, chalk should be used for this purpose. Some authorities advise the cleaner to let the paste dry on the ware and then rub off and rinse with hot water.

Silver Plated Ware.—Into a wide mouthed bottle, provided with a good cork, put the following mixture: Cream of tartar 2 parts, levigated chalk 2 parts, alum 1 part. Powder the alum and rub up the other ingredients and cork up tightly. When required for use, wet sufficient of the powder, and with a soft linen rag rub the article, being careful not to use much pressure, or otherwise the thin layer of plating may be cut through. Rinse in hot suds and afterward in clear water and dry in sawdust. When badly blackened with silver sulphide, the article, if small, may be dipped for an instant in hydrochloric acid and immediately rinsed in running water. Larger articles may be treated as coins are—immersed for two or three minutes in a 10 per cent. aqueous solution of sulphuric acid, or the surface may be rapidly wiped with a swab carrying nitric acid, and instantly rinsed in running water.

Silver Coins.—Make a bath of 10 parts of sulphuric acid and 90 parts of water and let the coin lie in this until the crust of silver sulphide is dissolved. From 5 to 10 minutes usually suffice. Rinse in running water, then rub with a soft brush and castile soap; rinse again, dry with a soft cloth and then carefully rub with chamois.

The above illustrates one of a large variety of styles in our new Silverware and Toilet Cases. Patent applied for.

Exclusively for the Jewelry Trade.

If a Day's Supply of Ink is Good, a Year's Supply is 364 Times Better.

Blair's is the only Fountain Pen in the world having a year's supply cartridge of correspondence and cheque security ink free! Right in the penholder, needing water only to instantly produce a uniform ink everywhere. Holders non-leakable and jointless. New ink supply, which will not freeze or mold, 10c. each. Ordinary ink may also be used. Particularly good for Jewelers, as a year's supply of ink is given free to every purchaser.

BLAIR'S FOUNTAIN PEN CO., W 163 BROADWAY, NEW YORK.

That this department shall prove mutually beneficial to our readers, it is desirable that the members of the trade generally communicate with THE JEWELERS' CIRCULAR-WEEKLY regarding any advantageous device or plan that they are utilizing in connection with their business.

PRIZE ESSAY COMPETITION, NO. 3.

SUBJECT:

"How to Foster Spring Trade."

NOTE.—The Decisions in the Prize Essay Competition, No. 2, "How to Treat Customers—How to Sell," will be announced next week.

No. 4.

PRIZE ESSAY COMPETITION.

**First Prize, \$20.
Second Prize, \$10.**

These prizes will be given to the writers of essays on the subject

"How to Promote a Bric-à-brac, Pottery and Cut Glass Department."

The prizes will be for the best and most reasonable essays, not for the language in which the ideas are expressed. Anyone may enter, whether he be a retailer, salesman or any employe.

The standing of the judges who have kindly consented to act is a guarantee that the contest will be carried on strictly on its merits and in an absolutely fair and impartial manner. We shall designate each contribution by a letter, keeping a list of contributors with the letters of their articles. Thus the judges will not even know the names of the writers whose products they pass upon.

RULES:

**Essays must be in this office by June 15, 1901.
Essays must be written on one side of paper.
No limit to number of words, and specimens of records are admissible.**

NOTE.—THE JEWELERS' CIRCULAR-WEEKLY reserves the right to publish any or all of the competing essays received.

Preference will be given, all other things being equal, to those whose contributions reach us at the earliest date.

SOME PRINCIPLES IN SELLING GOODS.

LANCASTER, Pa., March 11.

Editor THE JEWELERS' CIRCULAR-WEEKLY:

I am not going to write an essay on "How to Treat Customers—How to Sell," but I would, first, quote P. T. Barnum, who said:

"Never treat a customer as if you never expected to see him again, for he will see some one else."

Second: My aim is to have a customer feel when he leaves my store that it would be a pleasure for him to come again. If you do not succeed in doing this, you have missed an opportunity that you may never get again.

W. W. APPEL

FIRST: Believe in it. Many jewelers neither expect nor work for trade in the Spring. They take the little that drifts in and grumble, but they do nothing. Before the Christmas holidays, when a certain amount of business is sure to come to them, they freshen up their stocks, advertise—hunt for buyers. In the Spring the buyer is obliged to hunt the jeweler. It has come to be part of a jeweler's creed that the bottom drops out of business on the 25th day of December. That article of faith has much to do with his dull trade in the early months of the year. As a rule, a man gets what he looks for.

Although the custom of making Christmas presents crowds a lot of business in the few days immediately preceding Christmas, it would be well for the jeweler to remember that only a small percentage of the surrounding population bought anything of him. Not all who intended to purchase even did so. Some who were short of funds in December have January dividends, Christmas money presents and Christmas profits in their pockets later. There is always the virgin soil of thousands who have yet to buy their first piece of jewelry. Every month brings its quota of the rising generation to the point of desire for rings, scarf pins, studs, brooches, chains and other glittering fads dear to the heart of youth. And every month adds to the number of those able to buy them. Then there are the disappointed ones who did not get what they hoped for at Christmas; and there are the conscience-stricken who did not give where they received. These are all open to the jeweler's appeal.

Then the dissemination of so many jewels by gift during the holidays creates a positive want for more. Mrs. Smith was quite satisfied with her old brooch until she saw the new one Jones gave his wife; and the sparkle of that diamond given to her bosom friend haunts Mrs. Jones. Every Christmas prepares the way for trade in the Spring. Let the jeweler properly second the efforts of Mrs. Smith and Mrs. Jones and he will soon sell another brooch and diamond. But if he is listless, Smith and Jones may succeed in holding over until next Christmas.

It is true there are difficulties in the way of the jeweler; but they are not insuperable. When an enterprising business

man finds an obstacle barring the road to success he does not stand still or turn back; he seeks to overcome it. We Americans have rounded up our ideas of giftmaking about weddings and Christmas. The pleasant foreign custom among friends of giving to each other, as mementoes, little trinkets which they have worn does not obtain here. It should. We are rich enough now to indulge in such a kindly luxury. Small gifts of affection at parting, or as graceful acknowledgment for favors done, are especially within the province of the jeweler, and cannot be confined to any season.

Another difficulty is the general lack of understanding here as to the proprieties in the use of jewelry. No woman would shop in a ball dress or cook in a street costume, yet many will wear the same diamond ring and jewelry on the cars, in church, or at the opera. This should not be. Jewelry should be fitted to the time, the dress, the occasion. A man thinks he has given an unanswerable reason for refusing to buy a scarf pin when he says: "I have one." Yet he should not think the possession of a Winter scarf a hindrance to the purchase of a lighter one for Spring wear. Times are changed. This is no longer a poor and struggling people in a little known part of the earth, but a phenomenally rich nation in constant touch with the whole world. The jeweler must change with the times. He must drop the idea that his business is to fix watches all the year and sell goods 10 days before Christmas only. That does not pay the expenses of these days. He must sell goods all the year round. There is enough money afloat, if he knows how to coax it into his coffers. And he must use every effort to educate his public up to the new conditions.

The greatest hindrance to Spring trade, or any other except holiday trade, which the jeweler has to contend is his own ingrained idea that he must wait for his customers to take the initiative. The enormous business of our department stores is not built up by supplying the absolute needs of the people simply. It is done by creating and stimulating wants which they prepare themselves to fill. How they do this may be easily learned by watching their methods. Do not say that these methods of the big stores, with their big crowds of

ING and HINTS to JEWELERS

buyers, are impractical for the jeweler and his small store. The big stores were small and the buyers few in the beginning. It is not possible, of course, to sell as many diamonds as pocket handkerchiefs, but the sale of them can be increased proportionately. Confidence will carry a man a long distance when he jumps, and there is a lot of truth in the saying that "faith will move mountains"; but it will not move them if you turn your back to them.

Bargain hunters—the Golconda of the department stores—can be tempted with jewelry as well as dry goods. They can be tempted with anything. A well worded ad. about desirable left over odds and ends would keep things moving after Jan. 1. Their folly is none of the jeweler's business. His business is to move his stock at a margin; to give the dear public what it wants for a profit—even if it wants bargains. You need not tremble to sell a shop worn article for \$1.49 because you charged another customer \$1.50 for the same thing fresh from the factory.

Jewelers should not only convince themselves of the possibilities of the Spring but they should also study the special needs of that season as they do those of the holidays, and govern themselves accordingly. When the days lengthen put the lamps on the shelf and bring out the walking sticks. Teach the young men that a nobby cane is a comfortable and dressy companion for a walk, and that father should have a handsome silver mounted stick in keeping with his age and dignity. Open your umbrella stock in the eyes of the public when the Spring rains set in and don't be afraid because the dry goods man sells a cheap article with tin trimmings for less than yours. Fight back when he imitates your sterling goods and preach the common sense truth that a good article is cheaper, in the long run, than a poor one at any price. Show the people that a shoddy umbrella looks as mean on the street as a shabby coat or gown and will destroy the effect of the best dressed person that walks abroad. And don't think you have supplied the whole neighborhood when you have sold a half dozen. Your neighbor, the dry goods man, will sell them by the hundred. Combat the idea, which you have allowed the public to acquire, that you cannot sell as cheap. Demonstrate that yours are worth the difference in price and are, value for value, quite as cheap.

In the Spring "a young man's fancy lightly turns to thoughts of love." If he does go a-wooing, the "dearest girl in the world will need a ring." Sell it. Sell the best you can. There may be a wedding ring and baby rings and silver spoons and forks, and a lot of stuff back of that Spring sale.

There will be some marriages in the Spring. Do not neglect to keep the public

in mind that you have as good a stock of things suitable for wedding presents then as at any time.

The Winter's social campaign always makes a place in households for new pieces of cut glass, china and bric-à-brac. Urge your customers to fill up the gaps which Jane and Mary, and possibly Madame herself, have made for you.

Spring housecleaning and reorganization are sure to discover some need. It is a good time to replace damaged or lost pieces of silver; to put a new clock on the parlor mantel or hang one in the kitchen and stable that will enable the help to keep pace with orders set by master's watch.

People move into new houses in the Spring. When they do, the need of clocks and bronzes is almost as grinding as the inability to make old carpets fit the new rooms.

While the Spring rummaging is going on, remind the people that you can mend or recolor their old and unusable trinkets; or if they wish to exchange them for new, that you will allow them for the full value of the metal in them. There are a good many dollars for you lying in those jewel boxes, if you are on hand when they are resurrected during the Spring cleaning.

Above all, remember that at Easter time the feminine world arrays itself afresh. New hats require new hat pins and hair ornaments. New dresses call for dainty jewels to complete the *tout ensemble*. Old studs and buttons are false notes in the harmony of new Spring finery. The art of the jeweler should be as indispensable in the new make-up as that of the milliner and dressmaker. It is the jeweler's fault if the women do not think so.

Suggestion is the most common impulse to action. People generally do what is generally expected of them. Tell a man that he needs "Smith's Soluble Specific for Snuffles," and keep on reiterating it and, whether he has snuffles or no, it is only a question of time when he will buy it or snuffle himself to death. Impress a woman with the idea that a makeshift brass pin spoils the beauty of her Spring hat, and she will buy one of the jeweler, even if somebody has to quit smoking for awhile to pay for it.

If a family need a clock and a chair and cannot afford both, the decision as to which is needed most will depend largely on the jeweler and furniture dealer.

Let a jeweler push his Spring wares in the Spring and people will buy them as they do Spring remedies, Spring coats, hats, gowns and all the other things which they imagine to be indispensable adjuncts of the season.

The jeweler must believe in the possibilities of the Spring. He must advertise Spring goods; show Spring goods in his windows; talk Spring goods in his store,

and then he will divide more satisfactorily in the Spring the money which is always floating, with the traders who now get the bulk of it, and do not cease on the first of January to hustle for it.

As business is done now, a man, especially one who has luxuries to sell, cannot drop his hook and go to sleep. He must throw bait and keep on throwing bait if he would catch fish. If a jeweler had his usual Spring lethargy in December his holiday trade would not amount to much either.

It is the business of a salesman to sell—of a merchant to get the customer to his salesman. W. R. C.

JEWELERS' IDEAS AND SCHEMES.

R. H. Bedford, Greenville, Mich., offered prizes to the residents of the town who wrote the sentence "Eyes tested free at Bedford's" the greatest number of times on postal cards. Miss Elva Fries wrote it 700 times on one card and won first prize. The second prize was won by Rev. A. B. Curtis, who wrote it 495 times.

On exhibition in a Cincinnati, O., jeweler's window is a diamond that is alleged to have been cut from the wonderful Imperial. The "chip" weighs about two karats and is valued at \$5,000. It is violet in color and is declared to be matchless.

Adam Fisher, Greensburg, Pa., has a handsome delivery wagon for use in his business. It has a covered top with French plate bevel glass sides and doors. The body of the wagon is finished in a deep maroon. It is used to deliver new clocks and gather up those that need repairing and then return them again to the trade. This branch of the work will be made a specialty.

S. W. Baker, Rockland, Mass., has installed an acetylene gas plant in his store. He will also light two stores adjoining and expects to extend the service to several other business places in the immediate vicinity.

A collection of coins collected by James O'Brien during his travels in Mexico, Alaska and California has been on exhibition at R. M. York's store, Gouverneur, N. Y.

Hesse & Sturges, Boise City, Idaho, have just installed a safe weighing nearly 9,000 pounds in their jewelry establishment. It is both fire proof and burglar proof and is the largest in the city.

32D YEAR.

WEDNESDAY, MARCH 20, 1901.

VOL. XLII. No. 7.

NOTE—Under this department, all matters of a technical or of a news character bearing upon the optical branch of the jewelry industry will be considered. Address communications to The Jeweler's Circular Pub Co., 11 John St., New York.

CRAWFISHING IN NEW YORK.

IT is apparent that the medical fraternity of New York that sought to secure a medical practice act that would bar opticians from fitting glasses have been glad to accept an amendment or modification of their bill to stop or stay the opposition of local and national optical societies. The amended bill specifically exempts from its provisions "opticians who fit glasses to the sight." If the bill passes "opticians who fit glasses to the sight" can go on practicing. How about opticians who fit glasses to the nervous system—the ultimate thing sought being the relaxation of nerve tension, sight being something that will take care of itself under these circumstances? What if such relaxation removes the cause of headaches, stops a nerve leakage tending to nervous prostration, St. Vitus' dance, locomotor ataxia, etc.? What if the inductive effect of nervous calm in the little group of nerve cells on the floor of the fourth ventricle restores normal action to the liver and eliminates "sugar" from the urine? Glasses that may do such things are not, of course, for the optician. He can only "adapt lenses to the sight."

The proper adaptation of lenses to the sight—to normal sight—may have the above effects, although the optician has no intention of achieving them. What is he going to do under such circumstances? Take the glasses away? If his glasses produce such effects, is he to say so or must he keep mum about it? Is he practicing medicine when he talks about it or is he just an ordinary optician when he keeps still and saws wood, but lets his medical coadjutor, who, probably, cannot fit for either the sight or nervous system as well as he, do all the blowing? There does not appear to be any need of concern regarding the state of optical affairs in New York under the amended bill if it passes. All that the doctors want, apparently, is a monopoly upon pretensions. Opticians who make pretensions are not, however, in any danger, for they can claim, if interfered with, that they are merely "adapting glasses to

the sight." They can go on fitting the nervous system just the same, for they will, in fact, be doing so whether they make such pretension or not. Vision or sight is inherent. Opticians cannot do anything for it any more than can doctors. Lenses merely take tension off the muscles and nerves in securing good retinal images.

Other States will follow New York. The legislative dangers are really past. There may be attempts to revive them in some States, but they will not last a long while. The optician is on top and he will stay there. The M. D. who practices optometry will find more and more that he needs to be educated specially for this branch of science, a branch not included in the curriculum of medical schools. He may continue to crawfish for the name of "healer" in all things, but the day of narrow legislation for professional and all other classes is nearly past.

Profitable Session of the New York State Association of Opticians.

SYRACUSE, N. Y., March 15.—A most profitable session of the New York State Association of Opticians was held at Baggs' hotel, Utica, Wednesday afternoon and evening, March 13, with a large attendance. A business session was held in the afternoon, beginning at 2 o'clock. The application for membership of S. F. Dey, of Geneva, was received and referred to the committee on membership. F. William Reed, of Syracuse, whose application was received in January, was elected a member of the Association. Charges were preferred by two members of the Association against N. Wilson Carriere, who was accused of conduct unbecoming a gentleman and a member of the Association, and a committee were appointed to investigate the charges.

The Association voted to donate \$30 to help defray the expenses incurred by the Optical Society of the State of New York in attending hearings on the Bell bill at Albany. H. C. Watts offered as an amendment to the by-laws that notice be sent each member of the amount of his dues and 30 days given for payment of same, all members whose dues remained unpaid at the expiration of that time to be dropped from the rolls; reinstatement to be had by payment of dues and upon application.

A resolution was offered, changing the name of the Association from New York State Association of Opticians to Central New York Association of Opticians. Both the amendment and resolution were tabled, to be taken up and considered at the annual meeting in May. The amendment to Article 2, Section 2 of the by-laws offered at the January meeting and reading,

"The dues of this Association shall be three dollars (\$3) per annum, payable quarterly in advance, one dollar (\$1) of which shall be paid to the Optical Society of the State of New York at their annual meeting,"

was taken from the table and adopted. At the close of the afternoon session the members of the Association visited the Utica opticians at their places of business and then assembled at 6 o'clock for dinner at Baggs' hotel. An enthusiastic and interesting session was held in the evening. Herbert C. Watts read a paper on "The Adapting of Prisms" and F. L. Swart, president of the Optical Society of the State of New York, one on "Organization." Ex-president William D. Oertel spoke on "Legislation, so far as it affects Opticians," and gave the history of the Bell bill. There were many interesting discussions and much attention was given to the subject of organizing and districting, it being proposed to divide the State into two districts, each district having its own headquarters and place of meeting, but subject to the Association. William D. Oertel and A. W. Golder, who were appointed a committee to go to Buffalo and assist in making arrangements for the meeting of the Optical Society of the State of New York in June, will endeavor to promote organization in that section. Among those in attendance were:

A. M. Kenney, E. M. Kenney, Mr. Enquest, B. V. Clark, Mr. Evans, Mr. Payne, Mr. Haskins, Fred. Hamilton and John Wagner, of Utica; James Holden, William D. Oertel, H. C. Watts, of Syracuse; F. L. Swart, of Auburn; A. W. Golder, of Seneca Falls; C. B. Hibbard, of Pulaski; Mr. Trea, of Groton; Carl Hoerz, of Dolgeville; Edwin Wilcox, of Fulton; Mr. Morgan, of Herkimer.

S. F. Dey, Geneva, N. Y., will give his time to his optical work as soon as he retires from the jewelry business.

F. W. Martin, Nashua, N. H., formerly of Thompson & Martin, has opened an office where he will do business as an optician.

Optical Department.

[Continued from page 61.]

OPTOMETRY AND HEALTH.

THE proper correction of a pair of eyes with glasses promotes health. This is unavoidable. Many people suffer diverse ills simply because their eyes are dioptrically imperfect, and the muscular and nerve tension required to make them produce the best retinal images possible acts as a strain upon muscles and nerves. Suitable lenses take off this strain and prevent nerve leakage, pain and various discomforts. It is, no doubt, because of these facts that physicians look upon the fitting of glasses as "practicing medicine." Their error lies in assuming that the practice of medicine is the only means of alleviating human suffering. There are other and better ways. The modern medical adviser, if honest, often prescribes a course having in it neither medicine nor surgery. He often meets cases that defy his skill as a medical man, setting all his theories at naught. Indeed, the best he can do in any case is to diagnose to the best of his ability, prescribe what he thinks best and trust to God for the patient's recovery. Unless the physician has been trained in optometry specially—and that training is not included in any medical course—the dioptric action of the eye and its relation to health are a sealed book to him. He cannot even find out whether there is a dioptric fault, or what is the error, and if he knows it he cannot measure or correct it. This is quite beyond his sphere.

A trained optician may not know one-quarter as much about the human system as this physician. This knowledge would be of no use to him if he did. But he knows the eye and how to discover and measure its defects. He may not be acquainted with the microscopic structure of the retina—of what use is that knowledge to any one?—but he knows the action of the accommodation. He is unfamiliar with the chemistry of digestion and the action of various drugs on digestion, but he knows the nerves that give the eye its physiological action and can discover readily whether they are under tension or strain, and he also knows how to relax that strain with a lens. He doesn't know, perhaps, how the blood circulates through the heart, or know a weak heart action from a normal one, but he knows the effects, in a general way, of ocular reflexes and appreciates the widespread nervous derangement that may proceed from a slight dioptric fault. In fact, when it comes to the eye, he is the superior of the physician on a pure question of health. Why should he not be? He will do something that will restore health, while the physician may prescribe drugs, change of climate, change of diet, mode of life, style of living till kingdom come and produce no effect whatever. The optician is not treating disease; disease is not the trouble. He is correcting a mechanical defect that leads to great physiological waste and does it skilfully and with mathematical precision. The mere physician is a baby beside him for this work. If the case involves disease the optician does nothing with that element. His correction of dioptric faults makes it possible for the physi-

cian to treat the disease properly and successfully if he knows how.

Some physicians object to opticians being called or calling themselves—it is often the former—doctor. Physicians have not a monopoly of this word. It has no reference in itself to medicine. There are degrees of doctor of laws, doctor of philosophy, doctor of divinity, as well as doctor of medicine and surgery. What objection can a physician raise to the degree "doctor of optics" or "doctor of optometry"? There is more legitimate objection to the degree "doctor of ophthalmology," for that would imply an ability to treat the eye medically and surgically, and that is a qualification no optician assumes. He has no time for it. It is outside of his specialty. He is perfectly willing to let the physician or oculist occupy that field exclusively. An oculist who does all of these things is a sort of general practitioner on the eye, and often of the ear, nose and throat as well. The optician is more of a specialist. He leaves out other things for the same reason that the oculist leaves out obstetrics, nervous diseases, skin diseases, kidney, liver and stomach affections, etc.

The optometric profession is not "recognized" at present. It will be as fast as opticians qualify themselves. The real opticians are not "howling" for "recognition." That would be to assume yourself an ignoramus to start with. No qualified man wants "recognition." He usually has as much of it as he can take care of. No kind of "recognition" qualifies the man but that "recognition" that comes unsought. It is the best kind, but it doesn't sprout in legislative assemblies and it isn't defined by law. Legislation will delay or derange real recognition, not advance it. Optometry has the elements of a learned science in it. It cannot be tacked like a scalp to the ridge pole of the big medicine man if opticians behave themselves. It is one of the *health* sciences, but it is not medicine, surgery, dentistry or pharmacy. It is something by itself, and it will stay something by itself. The "medical" bluff has been played until it is played out. The way is now clear to make optometry a learned profession. Let us have no "queer" moves at this stage of the evolutionary development going on.

The Spectacles Worn by Jefferson.

A. G. PRETLOW, of Powhatan County, Virginia, has a peculiar pair of spectacles worn for many years by Thomas Jefferson. The lenses are of the exact size of a dime. They are set in very substantial frames of solid silver and were made by a Philadelphia firm still in existence. Some time ago Mr. Pretlow wrote to know if the glasses were really made for Jefferson, and received in reply a letter from the house, saying that on a certain date about a century ago a pair of spectacles were made by the house for "Mr. Thomas Jefferson, of Charlottesville, Va.," and describing the glasses. The description showed the spectacles in Mr. Pretlow's possession to be those of Thomas Jefferson beyond question. Mr. Pretlow inherited the glasses. He is a direct descendant of the great statesman. The spectacles came down through Col. Alexander Garrett, who married a niece of Jefferson.

Penn. Opticians in Session.

Legislation Affecting the Trade in New York Discussed.

PHILADELPHIA, Pa., March 13.—The Pennsylvania State Optical Society held their semi-annual meeting at the Lafayette hotel and among other important subjects fully discussed was the question whether or not there should be a charge for the examination of eyes separate from the fee for the prescribing and sale of glasses. The resolution, which provoked a lengthy discussion on this subject, was introduced by J. F. Brinkerhoff, vice-president of the Society, and was as follows:

"Resolved, That a regular stated charge should be made by the refracting optician for the examination of eyes."

There was a wide divergence of opinions and the opticians were unable to agree. C. A. Longstreth placed himself on record as opposed to charges. Eventually, it was decided that the matter be postponed until the annual meeting of the Society is held in September next, when there will be a fuller attendance. In the meantime it was agreed to leave the matter to each to decide the best for his business. The attendance at last night's meeting was not as full as had been expected owing to the fact that many of the opticians had been invited to the Jewelers' Club banquet at Horticultural Hall.

A. Martin, president of the Society, at the request of members made an address reviewing his experiences before the Legislative committee, at Albany, at the time of the attempted legislation against the opticians of New York State. He said that he found, with others, that the proposed legislation was projected by the oculists of New York State and really amounted to a war between oculists and opticians. "The oculists wanted a law to compel every optician," he said, "to send everyone wanting an examination of the eyes to an oculist for such examination." It is generally recognized that a graduated optician is an expert in eye testing and fully as qualified to make an examination as an oculist. This was strenuously contended by the opticians of New York and at last they succeeded in having the bill so amended that the standing of opticians was given more dignity than ever before, as the amended bill gave them legal recognition as experts.

At a meeting of the board of examiners of the Society before the evening session, applicants for the dioptrician grade were examined by J. F. Brinkerhoff, 4229 Lancaster Ave. The results of the examinations will not be made known until next week. In the meantime the examiners will go over the papers carefully.

The Washington State Legislature have passed the law licensing peddlers of spectacles and eyeglasses, the fee being \$5 per day. A copy of the bill was published on page 33 of THE CIRCULAR-WEEKLY of Feb. 20.

Optical Department.

[Continued from page 62.]

Optical Briefs and Notes.

Cohen Bros., Reading, Pa., will fit up an optical department.

J. Stewart Flint, optician, was in Warrensburg, N. Y., recently.

T. J. Williams, optician, recently established at Lexington, Ky., has secured additional room.

A. K. Hawkes, optician, Atlanta, Ga., has been at Tampa, Fla., for a week, from March 11 to 16.

S. R. Abney, Kansas City, Mo., has added some new instruments to his optical department.

C. A. Graves, optician, Columbus, O., has moved to an office at the corner of Spring and High Sts.

B. M. Levoy, of New York, dealer in optical goods, was in Southbridge, Mass., last week, visiting the optical factories.

M. H. Gorton, Le Roy, N. Y., has added an optical department to his store, with the latest instruments for the work.

The Columbian Optical Co., Kansas City, Mo., have moved their manufacturing department into one of their front rooms.

T. C. Beardsley, of Holdredge, Neb., will locate at Helena, Mont., and engage in the optical, and, later, in the jewelry business.

G. Alfred Walter, optician, now at 170 Broadway, New York, will, May 1, remove his store to 43 Nassau St., between Liberty St. and Maiden Lane.

Eastman Kodak Co., Rochester, N. Y., have incorporated in Illinois with a capital of \$26,000. Their capital stock in New York is \$5,000,000.

Z. C. Cushman has returned home to Rockford, Ill., from Chicago, where he has been studying the past year, and will soon open an office as a graduate optician.

The following opticians called on the Kansas City, Mo., jobbers last week: J. H. Whiteside, Liberty, Mo.; J. A. Schmidt, Leavenworth, Kan., and B. L. Buley, Monett, Mo.

F. E. Bayles, Chillicothe, Ill., has arranged with Wyatt & Dewein, opticians, 425 Main St., Peoria, Ill., to have them make regular trips to Chillicothe and examine eyes and fit glasses.

A. I. Agnew, manager of the Columbian Optical Co., Omaha, Neb., is east. He is at present in New York, where he will remain several weeks, visiting the different offices of the optical companies.

The National Optical Association, so called, of Columbus, O., have moved to apartments on the second floor of the Smith Hotel building, near the corner of Broad and High Sts. This is made necessary by the fact that the room formerly occupied will be used, after April 1, by Harrington & Nonnemacher, jewelers.

The Granite State Optical Association held their bi-monthly meeting, Wednesday evening last, in the parlors of Brown & Burpee, in Manchester, N. H. The principal paper was read by the president of the association, George H. Brown, and was on the subject, "The Kind of Accommoda-

tion Provided Our Dumb Animals."

The Michigan Optical Co., Detroit, Mich., have increased their capital stock from \$15,000 to \$50,000. Several new stockholders have been admitted, but the former officers are still in control. The company will move to another part of the city. One capitalist has offered to build a three-story factory, with 20,000 square feet of floor, on condition of a long term lease, and within the last few days still other offers of a similar character have been made. This leaves the company somewhat undecided which to accept. The new building is expected to be completed next Summer, and when the removal takes place the company will employ at least 80 persons in addition to the present force.

Frank Rose, proprietor of the Gophir Duplex Lens Optical Co. and the Barrios Diamond Co., of Milwaukee, Wis., was arrested recently, at Cincinnati, O., in a civil action instituted by Miss Belle Connelly, of St. Paul, Minn., who claims she was divorced from her husband at Chicago, with the understanding that she was to marry Rose. They left Chicago together and went north. Rose afterwards met Miss Evelyn Hartley, a Milwaukee girl, and, it is alleged, married her in

Chicago, Feb. 4. He sent a newspaper account of the wedding to Miss Connelly, at St. Paul. She decided to proceed against him. Rose is said to have stores in Milwaukee, Chicago, St. Paul and Cincinnati, where he is proprietor of the Gophir Diamond Co., dealing in imitation precious stones.

The regular monthly meeting of the Optical Society of the City of New York was held Wednesday in parlor DR of the Fifth Avenue hotel, and proved to be a session of great interest to the 25 gentlemen who attended it. The meeting was called to order by President Appleton and Prof. Fox delivered his lecture, the subject being, as already announced, "Sphere Cylindrical Lenses." When Mr. Fox had finished L. L. Ferguson made a brief address to the society on a method for obtaining some proposed legislation relating to the optician, and the business session then commenced. After the routine business was finished and E. Bosch and Mr. Barker had been proposed for membership there was a general discussion on the subject broached by Mr. Ferguson, which finally resolved itself into the question whether legislation or education was, at present, most needed by the opticians.

Optical Department.

[Continued from page 63.]

The debate which followed brought out many interesting points and among those who participated were Messrs. Benn, Teed, Cross and Harris. It was finally decided to take up the subject at the next meeting and an adjournment was taken as the clock's hands began to point toward midnight.

W. Meyers, optician, Sacramento, Cal., is visiting in Nevada City, Cal.

J. F. Wooster, of the California Optical Co., San Francisco, Cal., is making his initial trip in the south.

The bill in the Minnesota Legislature prohibiting the fitting of glasses by unlicensed persons has been passed by the Senate.

Morris Earle, of Williams, Brown & Earle, wholesale and retail opticians, Philadelphia, Pa., has returned from a southern gunning trip.

A. Reed McIntire, of McIntire, Magee & Brown, wholesale opticians, Philadelphia, Pa., was confined to his home, last week, with bronchitis.

William J. Burns has succeeded D. J. Krouse as manager of the optical department of the Philadelphia house of Williams, Brown & Earle.

C. A. Longstreth, secretary of the Pennsylvania State Optical Society, is away on a pleasure trip to Old Point Comfort, accompanied by Mrs. Longstreth.

D. J. Krouse, formerly in charge of the optical department of Williams, Brown & Earle, Philadelphia, Pa., is now with Daniel J. Weston, retail optician, 17th and Chestnut Sts., Philadelphia.

The regular monthly meeting of the New England Association of Opticians was held on Tuesday evening, March 19, at Young's hotel, Boston. The address of the even-

ing was delivered by W. R. Wills, of Boston, who took for his subject "The Diamond as Used in Optical Work." Mr. Wills was for 30 years with the American Waltham Watch Co., but more recently has been engaged in the work of a lapidary at 179 Summer St. He is looked upon as an expert in the drilling and polishing of precious stones and in the setting of diamonds for all mechanical arts.

Peter Boeringer, a pioneer optician of St. Paul, Minn., died at his home in that city, last week, of old age, being 87 years of age. He went to St. Paul in 1874 and had been engaged in the optical business with his son, William. He received a medal from Louis Philippe, of France, in 1840, for the first display of daguerreotypes made in France. Mr. Boeringer was born in Basil, Germany, in 1814, and came to America in 1848, settling in New Orleans, where he lived for 19 years. When the war broke out he enlisted in the Seventh Louisiana Volunteers and was promoted to a lieutenancy for bravery in battle. He is survived by a widow and five children.

The White-Haines Optical Co., of Columbus, O., have been incorporated with a capital stock of \$25,000. The incorporators are J. B. White, C. O. Haines, J. J. Jennings, C. H. Hanna and Charles Kinney. Mr. White was formerly in the jewelry business in that city, but about a year ago closed out his stock and entered the optical business exclusively, in which he has been very successful, having built up a good trade. Mr. Haines was formerly a member of the jewelry firm of Haines & Oberer, but he has been in the optical business for about a year in a handsome room on High St., near Gay. He has also made a success of the business. J. J. Jennings is cashier of the City Deposit bank and Charles Kinney has just retired from the office of Secretary of State. Mr. Hanna is at the head of a large paint manufacturing company of Columbus. J. B. White will be president of the company and C. O. Haines, secretary and treasurer. The store will be in a large room in the Dispatch building, which is now being fitted up especially for it. The company will look after the manufacturing optical work and jobbing business. There will be no fitting done. Both Mr. White and Mr. Haines will spend a portion of their time on the road for the first year. A full line of optical goods and engineering and drawing instruments and material will be carried.

Bell Bill in N. Y. Legislature.

Reported Favorably to the Lower House with the Two Amendments Exempting Opticians.

ALBANY, N. Y., March 14.—The Assembly Committee on Public Health, this morning, reported favorably to the lower house of the Legislature Mr. Bell's bill amending the Medical act, which, in its original form, was so strenuously fought by the opticians of this State. As the bill now goes before the Assembly for consideration it contains the two amendments announced in THE CIRCULAR-WEEKLY, March 6, which exempt from the provisions of the medical laws any optician engaged in adapting glasses to the sight, as well as any manufacturer of optical instruments.

It was feared by some that the amendments obtained from the committee by the Optical Society of the State of New York, after their hard fight, might be stricken out before the bill was finally reported, but this was not done.

Progress of the Bill of the New England Optical Institute.

BOSTON, Mass., March 16.—From the present outlook the proposed bill of the New England Optical Institute, asking for authority to grant degrees to graduates of the Institute, is likely to go over to the next General Court.

Early this week Representative Saunders, of Ward 11, the Back Bay district, moved in the House that the bill be put on the table. A few days later when the bill came up again, he moved that it be referred back to the Committee on Education, and this means practically that nothing more will be done this year. Representative Saunders was acting undoubtedly for many of the oculists and opticians in the Back Bay district, who are strongly opposed to the bill, as they believe its passage will be detrimental to their own interests. Of course, it lies within the power of the Committee on Education to recommend favorably or adversely to the next General Court, and it is believed now that the latter course will be the one adopted.

A. G. Barber, manager of the Globe Optical Co. and prominent in the management of the affairs of the New England Optical Institute, did not appear discouraged when asked about the situation and seemed to feel that already considerable progress had been made toward the betterment of conditions, and that, if not this year, next year, the bill will be passed.

LUBRICATION OF DELICATE MACHINERY.

AN interesting lecture was delivered March 7 by Joseph K. Nye, of the W. F. Nye factory at New Bedford, Mass., under the auspices of the American Horological Society, at the rooms of the Chicago Jewelers' Association, in the Columbus Memorial building. The subject of Mr. Nye's discourse was "Watch Oil from the Black-fish to the Bottle," and was illustrated by 100 fine stereopticon views showing how the fish are caught, processes of oil manufacture, old New Bedford whalers, and historic points of interest around Cape Cod. Before 8 p. m., the hour set for the lecture, an appreciative audience filled the hall, including many friends of members of the Society. Mr. Nye was introduced by Secretary Trumbull, of the Society, in a few well chosen words, and at once entered upon his subject. It was a heart-to-heart talk with watchmakers, rather than a formal lecture, and was given added instructiveness by the numerous questions asked the lecturer by his audience.

At the conclusion of his address, which was given the closest attention, the room was darkened and the series of stereopticon pictures thrown on the screen, which proved a most interesting feature. Each was explained by Mr. Nye, with one exception. That was when the likeness of W. F. Nye was shown. The elder Mr. Nye needed no introduction to a Chicago audience, and the son said anything at this time it was lost in the handclapping that followed the appearance of his father's portrait. At the close of the entertainment Mr. Nye was warmly congratulated by many in the audience and was barely able to catch the 11.30 clock train for Peoria, where he had promised to address the students at the horological school the following day.

The Lecture.

NO study, comprehend and direct some of the very delicate and wonderful processes of nature is one of the most satisfactory and profitable occupations of the human mind; and the past ages, and particularly the past wonderful century, have, through the agency of much thought and discovery, brought to man some marvellous developments for his comfort and happiness. It is no longer ago than 1839 that Daguerre discovered that a polished silver plate, after having been exposed to the fumes of iodine, was sensitive to rays of light. This simple discovery started a great boiling of the human mind that has reached the wonderful result with which we are all so familiar, in the shape of the photograph, the commonest method of reproducing visible form.

The same has been true in the evolution of mechanical lubricants. It is easily within the memory of many of us that sperm oil was considered the only lubricant suitable for moving machinery; and yet I suppose that many within the sound of my voice hardly know what sperm oil is. Then came the discovery of mineral oil, which for some years was used in its crude state as a lubricant, and which, under the stimulating effect of necessity, began its divisions and subdivisions into qualities and kinds suitable to the wonderful developments of machines, which have since kept just a little ahead of man's ability to furnish a perfect lubricant for each kind of machinery that the world has so rapidly produced crying out for a special kind of lubricant.

We speak of oils in a general way much as we would speak of a brick block. We call it a building and yet we know it is ultimately formed by the putting together of thousands of these familiar particles which we call a brick; an almost endless combination of these little particles is made to bring our immense structure to its perfection, and produce for us the kind of building adapted to our wants. Just so every kind of matter in the universe is formed, by different combinations of little atoms known in chemical language as elements, just as the house is laid up brick by brick; and in all nature there is known to science only about 40 odd of such elementary bricks, and of these only a few are in common use. In the world of lubrication but three of these are in use for the construction of all lubricants, *i. e.*, hydrogen, carbon and oxygen, and it is by the myriad combinations of the atoms of these three common elements that the various grades of lubricants are constructed. Probably the simplest known form of lubricant is two parts of hydrogen to one of oxygen, and to its continued use the entire human race is indebted for its daily life. It is the cheapest known lubricant, for it costs nothing and can be had for the fetching, and every man, woman and child in the round world makes daily and hourly use of it—this H₂O of our school days—the life sustaining fluid called water.

By the use of a large amount of force, with expensive and complicated machinery, we can produce a current of electricity which will separate in very small quantities these two elements of hydrogen and oxygen in water and produce them in gases in just that proportion of two to one, and it is a most tantalizing thought that could we add artificially to this combination a single atom of carbon, we would have obtained a substance that would make a certain octopus tremble in its boots. Nature, in her great workshop, is constantly at work upon just such combinations, and through the agency of motion in this great terrestrial

ball and the powerful effect of the light and heat of the great sun, grinds and boils and runs her product into the cauldrons of the earth, for man to dig and delve for, to his profit and comfort.

The discovery of petroleum brought to light a compound which in the matter of lubrication is second in its usefulness to water. But instead of being a combination of hydrogen and oxygen, the oxygen is replaced by carbon; and every known mineral oil, wherever found and however changed by man, is some combination of hydrogen and carbon atoms. The combinations are readily separated by exposing the hydrocarbon to the influence of heat. From the simple combination of one of carbon to four of hydrogen to a high combination involving many parts of each of these elements, and known as the common lubricating oils of commerce. I have said that this hydrocarbon combination can be easily separated by heat. All friction is but a means of producing heat, and from the massive journal of the 5,000 horse-power steam engine to the delicate little jeweled pivot of my pocket timepiece, the great world of machinery is grinding away its life in producing tiny heat vibrations. Left to their own destruction these moving parts would go on gathering with each revolution an additional increment of heat until the quantity produced would be sufficient to loosen the attractive force of its atomic particles, which, floating away from their position, would gradually leave the bearing in a disintegrated state. Such a condition is purely and simply friction, and to place some substance between the moving parts which shall steadily and rapidly carry away the heat produced is the sole province of lubrication. The greater the heat produced the greater the quantity of lubricant required to carry off this heat, and the more rapid this production of heat the more evaporative the quality of lubricating material required.

During the past few years the size and weight of journals have increased rapidly. When these heavy journals first appeared it was commonly supposed that a thick, viscous fluid was necessary for their proper lubrication, and in some instances where the journals turned slowly, and the heat producing result was low, it is evident that the slow evaporating properties of such viscous oils were sufficient; but the introduction of electricity producing machinery where the requirements were both for heavy journals and high speed, it became evident that a large quantity of easily evaporated oil was the only means of reducing the friction, and that out of the substance of these heavy, slowly evaporating hydro-carbon oils must be taken that combination or that portion which would fill the requirements, and the question was asked: How can this be done?

The answer was easy—simply by means of fire to evaporate or throw off the required portions, which were condensed; or, in other words, by the process of distillation, collect the lighter portions which were suitable for this work. This, of course, is not the whole process of refining oils, but it is the basis upon which all refiners work, and will answer for this paper.

Coming now to the delicate friction of a watch, the same process goes on. Its delicate movements grind and resist in the same manner as the ponderous engine journal. *The finest jeweled pivot known to the watchmaker's art produces, exactly in its proportion, the same number of increments of heat, and no point so fine and exquisitely turned, and no jewel so smooth or highly polished, but the evolution of heat goes on between its surfaces;* and the problem which presents itself is to find a lubricant which shall be influenced by a range of heat from 20° below zero to many degrees above 100, and which at the same time shall be sensible to the very delicate heat producing conditions in a watch bearing. It is evident that our hydro-carbon oil will not fill the bill; for the very joy with which a particle of hydrogen will release itself from its particle of carbon, under the influence of the slightest heat, proves it unworthy of a place in watch lubrication; and this brings us to the consideration of another class of oils; in fact, we must look for some substance which shall so bind the molecule of hydrogen to its molecule of carbon that it shall be reluctant to sever its connection.

(To be continued.)

A New Perpetual Calendar.

[From the French of the ABBE SALVATORE FRANCO. Description furnished to the *Académie des Sciences.*]

BY means of horological mechanism, the formulas are represented which lie at the foundation of any epoch in the Gregorian and Julian style. The apparatus is in the form of a table, on which are inscribed the date of the month, the day of the week, the name of the saint, and the day of the moon. At the top of the table, a movable roller gives the movable feasts. At the bottom eight dials furnish the Roman Indiction, the Golden Number, the Epact and the Dominical Letter, the old Epact, the Martyrological Letter, the age of the moon and the day of the week. Four of these dials are connected with the movable columns of the calendar.

The first dials are composed of four concentric circles, each bearing figures which serve to give the year in which particulars are sought. That of the Golden Number may serve directly until the year 19,999; beyond that, perpetuity can be secured by sectionizing the years. The Epact is given directly until the year 10,099, but there is a contrivance by which it can be ascertained beyond that year. The same is the case for the Dominical Letter in the Gregorian and Julian style. The other dials, based on the results of the first, furnish the movable festivals, the lunations and the day of the year.

The apparatus can be put to use very readily. It can be utilized by historians, studying any epoch, and by astronomers, who have before them the approximate bases of certain calculations.

Antique Horological Curios.

(Continued from page 1.)

spring of a mechanism, concealed in its tiny body, is wound up. Then the wee beast commences to run along, moving its four feet and the head in the most natural fashion. The exactness of its motions, from a mechanical standpoint, is most astonishing. Reproduced in cut 3 is a pistol of great richness. It is embellished with enamel, fine pearls, diamonds, etc. The crown of jewels with the crescent indicates that the object must have belonged to a Sultan. When the cock bearing the gun stone is snapped down a little bird darts forth from the barrel and rests on top; then it proceeds to sing, while clapping its wings and moving its head. When the air is finished the bird returns into the barrel.

A bonbonnière is represented by Fig. 4. On its cover is painted on copper a carpenter's shop. The men, isolated from the background, move and act in accordance with the work they are supposed to accomplish. The rather complicated mechanism, considering the numerous functions of the figures, is contained in the cover.

Fig. 5 shows another bonbonnière, the property of the same collector. This piece, entirely covered with most remarkable enamel painting, is of gold. Its cover is composed of three panels, each of which can be opened separately. Under the middle lid is the compartment which serves for the reception of the bonbons. One of the others closes over an hour dial and a minute dial. The third compartment contains a charming mechanical picture representing a Cupid forging an arrow, while another is working the bellows; in the background the wings of a windmill turn. The figures are of different colored gold and are chased, the landscape being in enamel. The whole exhibits a magnificent color combination.

The subject of Fig. 6 is a little harp, about seven centimeters in height. It is made of gold, enriched with emeralds and precious stones. The dial is placed in the body of the instrument. By unlatching a mechanism in the interior a melody is caused to be played, which bears a striking resemblance to the sounds of a harp.

Fig. 9 shows a gold watch, the back of which presents the interior of a kitchen. The figures and certain accessories are in gold, while the rest is painted. We perceive the dog turning a wheel, and by a mechanical transmission the meat on the spit before the fireplace also moves. On one side a maid servant is spinning at her wheel and on the other side a stream of water seems to run from a fountain. Everything moves and appears lifelike.

We see in Fig. 8 a silver knife with orna-

ments of gold and precious stones, having a clockwork in the handle, the dial and the balance being exposed to view. The horological mechanism is a little masterpiece. It is of the length of the knife and requires a peculiar disposition of the wheels, etc. Besides, it strikes the hours like a clock. The idea of placing a clock in the handle of a knife dates back at least to the 17th century.

In Fig. 7 we see a knife, forming part of the collection of Mr. Marmuse, which has two dials on one side and a single one on the other. Each of these dials has a hand which seems to indicate the time. This is not the case, however, for these hands only hold the secret which it is necessary to know in order to open or close the knife. The combination consists in placing each

8. POCKET KNIFE. 9. KITCHEN. 10. LANTERN.
HOROLOGICAL CURIOS AT THE RECENT PARIS EXPOSITION.

hand on a determined hour; for, otherwise, the knife remains immovably closed or open. Evidently the knives of the 18th century with clocks in their handles were the outcome of these primitive trick knives.

The important collection of Mr. Chappay includes a little lantern of gold, as shown in Fig. 10. It is a beautiful piece of art, in form and decoration, and especially as regards the horological movement. It has three enamel dials with gold hands actuated by a single movement in the interior of the lantern. The top of the lantern, being on hinges, can be opened so as to admit of winding the clockwork.

Professor C. H. Shaw, an antiquarian of Chicago, and now a resident of Phoenix, Ariz., recently discovered a necklace consisting of 28 large blue turquoise stones, unusually rare for size, beauty and value. The stones were discovered in an apartment in a ruin near Casa Granda containing stone slabs with inscriptions and writings. The necklace, stone slabs and crude implements buried in the ruins, as well as many other turquoise stones interspersed in the mound, have been moved to Shaw's private museum.

THE RAMBLER'S NOTES.

WHAT THE RAMBLER SAW AND HEARD AMONG THE DEALERS IN ART POTTERY, CUT GLASS, BRONZES, ETC.

MARBLÉS AND TERRA COTTA IN VARIETY.

TWO of the many different art wares, of which samples are now shown on the third floor of George Borgfeldt & Co.'s building, 3d, 4th and Wooster Sts., New York, are marbles and terra cotta. Of the marbles little need be said further than that the line is more than up to the usual standard and contains Castellina and Carrara figures and busts in a variety to suit all tastes and fancies. The figures are, this year, subordinate in variety to the busts, which come in all sizes. Marble pedestals are also prominent in the line. In their own Vienna terra cotta ware the firm are showing a striking effect, produced by a soft light green finish, absolutely new to figures of any kind. This is to be seen on some very large busts of Lucretia, Loreley and Ceres, and also on figures and electroliers. These last are of a unique character and are proving especially popular with the jewelry trade. In one style a girlish figure holds in front of her an enormous mirror, from which droops a lily vine, in each of whose flowers is fastened an electric bulb.

A LONG WANTED USEFUL DEVICE.

S. STERNAU & CO., 204 Church St., New York, are offering to the trade a hot water plate with metal cover. A china plate forms the top of the base. Between the base and the bottom of the base is the receptacle for the hot water. The water is put into the receptacle by means of the spout and a funnel, the capacity being a pint for the smaller size. The base keeps the plate warm for some time, and the meat or other food is kept on the plate and is always in a palatable condition. Every person has experienced the difficulty in keeping meats, etc., warm during the course of the meal, and this device will win hearty approval by every user. The metal part of the base and outside of the dome shaped cover are handsomely nicked; the inside of the cover is in a satin finish. Each plate is furnished with an enameled iron funnel. The heavily decorated English china plates are supplied in two sizes, No. 355 being 9 inches in diameter and No. 357 9½ inches in diameter. The nickel plated knobs are furnished in two sizes, No. 3550 fitting

plate No. 355 and No. 3570 fitting plate No. 357.

REMARKABLE LINE OF BRONZES.

THERE is, this season, the usual large and finely selected display of bronzes in the warehouses of Ferd. Bing & Co.'s Successors, 10 Washington Place, New York, and in the collection will be found every new treatment and style of commercial bronzes, as well as all the finishes, effects and popular subjects which are standard in this line. The Art Nouveau influence is especially strong at the present time, manifesting itself not only in the style of the figures and subjects, but also in the colorings, especially in the pieces having what is known as the violet finish. A very fine collection of small ornaments is, as usual, shown, as are electric bronzes of all sizes, while the figures in both real and French art bronze embrace an unusually large assortment of subjects. Some new sets, consisting of jardinières, with candelabra side pieces, come in silver and in gilt finish, while a very attractive style of vase, whose design is based on a flower motif, is to be seen in a new violet finish.

CHARACTERISTICS OF L'ART EXTREME.

L'ART EXTREME is the name given to a collection of Italian art ware by Hamburger & Co., 28-30 W. 4th St., New York, in which the articles imitate, in metallic colors, old lava ornaments, pitchers and jugs. The pieces are of exceptionally heavy earthen ware and have unique characteristics, being in the form of grotesque animals, birds, fishes and reptiles. Another line of reproductions shown by the same firm, now proving popular with the trade, is a collection of small vases and animal ornaments that exactly imitate in size, form and color small specimens of Egyptian and Cyprian pottery, now in various museums. In the standard lines carried by this house mention should be made of some new Teplitz vases and figures in ivory bisque effects, and Vienna panels of Art Nouveau design, which come in frames of metal, whose design is also on the new art lines.

THE RAMBLER.

Old Rhymes on Tankards.

IN the days of the stage coach and country inn, when peer and highwayman quenched their thirst with the contents of

the same pewters, it was a common practice to inscribe on these tankards rhymed couplets, often the inspiration of the village poet, and more or less eloquent of bibulous wisdom. Although the sentiment of these verses will not commend itself to abstainers, they are worth placing on record as throwing a light on the habits and humor of other days. One of these couplets sums up the ordinary man's antipathies thus:

"Two things all honest men do fear:
A scolding wife and ill-brewed beer."

Another is loyal and almost moral in its philosophy, and runs thus:

"Drink fayre, don't swayre;
God save ye Kinge!"

The pewter on which these lines were inscribed has a history of centuries.

A very sensible rhyme is a parody of the well known fighting couplet, and runs thus:

"He who drinks and runs away
Will live to drink another day."

There is quite a mine of moral teaching in a few of the verses inscribed on these pewters, as in these:

"Straight is the line of duty,
Curved is the line of beauty;
Follow the straight line, thou shalt see
The curved line ever follow thee."

This verse has more appropriately been found on water jugs in village inns. On some tankards are to be seen quaint perversions of common maxims. One assures us that "It's a long tankard that cannot be refilled." Another suggests, with Mark Tapleyan philosophy, "Never put off till to-morrow what you can drink today," while a third conveys a very useful and timely hint in "It's a muddled man who doesn't know his own pewter." Nearly all the above have been inscribed also on pottery.

"This is the clock
That will tick and tock;
That will tell the men,
Who are sons of Penn,
How old '99
Goes ahead on time!
It will chime
In the hall the Houstons built!"

Thomas B. Donaldson placed the above verse at the head of a quaint circular, copies of which were sent to each of his former classmates. The class have been striving to raise a sufficient sum among their members to place the memorial clock on the first floor of Houston Hall of the University of Pennsylvania. The clock will be of bronze and made after the Elizabethan style. Westminster chimes will strike every 15 minutes and electric gongs will ring the hours on all floors of Houston Hall. The entire cost will be \$700.

THE JEWELRY REPAIRER'S HANDBOOK.

(Commenced in issue of Feb. 6, 1901.)

THE MAKING OF A RING.

[Continued.]

AFTER the strip of gold is marked to the desired size, take a pair of half-round pliers, or, if the ring is very heavy, take the pendant bow contractor and bend the strip into an ellipse. Then, with the saw or shears, cut off the surplus gold at the marks made on the strip. Now with a flat or barrette file, file the joints smooth and be very careful to keep them free from grease and dirt. This done, join the two ends with the pliers or bow contractor. Now mix up some borax paste and paint the joint well and lay on a small piece of solder. Many jewelers use solder made by taking the gold they are working and reducing it two karats. The reader can easily do this by following the instructions given for reducing a higher karat of gold to a lower. Instead of using all copper and silver a small amount of brass should be added to the alloy.

Cadmium solder is used a great deal, and this the jeweler can make by taking gold of any alloy and, after weighing, melt it. When in a perfectly liquid state, he should add one-fourth its weight of cadmium, stir the mixture well and pour very quickly, as the cadmium is dissipated at so high a temperature.

The borax and solder having dried on the ring, lay the latter on a piece of charcoal and gently heat it, first on the opposite side of the joint, then the whole ring, until the solder melts and flows down through the entire joint. Allow the ring to cool, and then boil it out in the sulphuric acid pickle. If the gold is 10k. fine the color, after being boiled out, will be red, and the finer the gold the lighter will be the color. This is due to a lesser amount of copper in the alloys. After the ring is boiled out it is washed and dried. After this the solder is filed out nice and smooth on the inside of the ring with a fine half-round file. The ring is then ready to be rounded up. This is done by placing it on the mandril, which, in factories, rests on a gum tree block, and striking the ring on all sides with a rawhide mallet.

This operation requires considerable skill and practice, because the mandril must be held in the palm of the left hand and given

a revolving motion, so that the mallet, which is held in the right hand, will strike all parts of the ring and make it perfectly round. Now, suppose the band ring was to be size 8 full and, after being rounded up, it measures $7\frac{3}{4}$. To make it size 8 full, we must use the steel hammer, and with careful, sharp blows, which must be given around the entire surface of the ring, we draw it up to the required size.

In sizing rings of this kind the writer prefers this method, because it leaves one joint only in the ring, and consequently the latter is not so liable to break while being worn. When the required size is obtained the sides of the ring are filed flat and smooth until the desired width is obtained. This done, the surface of the ring is filed flat and smooth, so that it may be easily polished. To file a ring of this kind, hold it between the thumb and forefinger of the left hand with the ring resting against the bench pin. Then with a fine half-round file begin to file the surface flat and slightly hollow from the middle to the edge of the ring. To do this push the file from the body and at the same time give the ring a circular motion toward the body, and *vice versa*. Care should be taken to keep the ring the same thickness in all its parts. This seems to be a difficult matter for some ring makers—possibly apprentices—judging from the number of rings that we have seen that are thinner at the joints than anywhere else. This is due quite often to the fact that one end is rolled or pressed harder than the other, or the joint may not have been properly made and the jeweler filed away too much of the surface with the solder.

Engraved band rings are made in the same manner as the flat bands, excepting that the flat strip of gold is given its impression by rolling it in a small steel die, which makes the imprint in the strip.

Plain or half-round band rings are made in the same manner as flat bands, excepting that they are considerably thicker and are filed or turned half-round.

In ring shops plain rings are made by rolling long strips of gold through a pair of rolls, the lower one of which is grooved the desired shape of the ring.

The rings we have mentioned are now ready for the polisher, excepting the engraved band rings, which must have the green color removed. This is done by heating the ring to redness and plunging it into alcohol. We will describe the polishing of these rings under the head of "Polishing."

(To be continued.)

Gilding Brass Articles.—For a cheap gilding of brass parts, the *Wiener Gewerbe Zeitung* gives the following recipe: Dissolve in three-fourths liter of water, 5 grammes of sodium phosphate and 3 grammes of caustic potash; also in one-fourth liter of water: 1 gramme of gold chloride and 16 grammes of potassium cyanide. Both solutions are well mixed and the mixture brought to a boil, whereupon the articles to be gilded are dipped in. The gold contained in the mixture can be utilized almost entirely. If the solution does not work well any longer, a little potassium cyanide is added, and it is used for pre-gilding the objects, which may then be gilded again in a fresh solution.

VOL. XLII. No. 8.

CYPRIAN JEWELRY OF 1000 YEARS BEFORE CHRIST.

THERE have been some important additions of late to the British Museum. In Dr. Murray's department of Greek and Roman antiquities, and in Mr. Read's department of British and Mediæval antiquities, the additions are of artistic as well as of historical interest. In point of age, Dr. Murray's acquisitions may reasonably take precedence, seeing that they belong to the Mycenaean age, or about B. C. 1000. They are all from Cyprus, and complement in an interesting manner the treasure brought to England from that island five years ago. The articles are nearly all of pure gold, and obviously had been made for the decoration of the bodies of rich or distinguished personages while lying in state during the preparation of the tombs. These ornaments are all from the site near Famagusta, which has been identified as the original settlement of the Greeks under Teucer on their return from Troy. This place Teucer named after Salamis, his native island, from which he had been banished by his father; the exact spot, so often looked for, had never been discovered until 1896, on which occasion the British Museum made its

great find of carved ivories, gold ornaments, vases, and so forth, which may now be seen in the galleries at Bloomsbury. By the law of the island, one-third of the treasure-trove had to be left there, but the por-

the mouth and the forehead of the deceased, and the patterns, which are beaten from a stamp, are very simple, being identical in several instances with the Celtic spiral. The earrings are noteworthy as

showing first a direct imitation of nature in the shape of a bull's head, and next the degradation of the type into little more than a geometric pattern. The ingot of gold is of the same irregular shape and the same weight as the oldest gold coins known as darics. The rings include a very interesting double one, which was inlaid with some vitreous material which has gone. There are also two necklaces, earrings, and a cylinder of hematite. Perhaps the most interesting articles are the dress pins, the oldest known type of the Greek fibula, or pin, to fasten the female dress, one on each shoulder. They are simple in design and have a long, sharp point, like a stiletto. Apart from their great antiquity and their interest as articles of dress, they on one occasion

ANCIENT GOLD ORNAMENTS FROM CYPRUS.

tion brought to the British Museum abundantly proves that the original Greek settlers must have found the island extremely rich in gold and copper.

The larger articles were made to cover

played a sufficiently conspicuous part in history to attract the notice of Herodotus. This entertaining historian tells us (Book V. 87) that from a great battle between the Æginetans and the Athenians only one man

of the latter escaped death; this individual, on his return to Athens, recounted the disaster which had overtaken their army, "and when the wives of the men who had gone on the expedition against Ægina heard it," they, "enraged that he alone of the whole number should be saved, crowded around this man, and, piercing him with the clasps of their garments, each asked him where her own husband was—thus he died!" The Athenians regarded this action of the women as more dreadful than the disaster itself, and "compelled them to change their dress for the Ionian"—a linen tunic which did not require clasps.

The Diamond Markets.

ANTWERP, March 7.—Previous trade calmness has now made place for a better tone. For the moment the market is steady and the rise of 5 per cent. in rough in London has resulted here in the owners not releasing polished goods at prices asked a week ago. Sales have been made, the new rise being paid. There have been a good number of foreign buyers here this week and lots of mēlées of all grains were sold at prices favorable to the sellers. Paris houses are making their choice of fine brilliants in this market.

Mr. Kahn, of L. & M. Kahn & Co., New York, is expected here the beginning of April.

Some merchants in polished diamonds have begun to employ another division in the small weights and they now apply the decimal system. The karat remains the unit, but is no more divided into $\frac{1}{2}$, $\frac{1}{4}$, $\frac{1}{8}$, 1-16, 1-32, 1-64, but into 1-10, 5-10, 8-10, down to 1-100 of one karat. For instance, if one karat costs 365.50 francs, 1-10 of a karat would cost 36.55 francs; 2-10, twice 36.55 francs, or 73.10 francs, and 1-100 of a karat, 3.65 francs; 3-100, 10.95 francs. This mode of calculation is easier than to reckon what 1-32 or 1-64 karat would cost at 365.50 francs. Although people may not quickly discard old habits and customs, it is likely that owing to the high prices of diamonds, this new system will be much employed in the future.

The death is announced of an excellent diamond polisher, F. Sels, 34 years old and living at 15 Lozana St.

The news of the establishment of another large diamond factory is now confirmed.

A co-operative society have been founded under the style "De Eendracht," with headquarters in Borgerhaut, near Antwerp, having for their aims: The locating for shareholders and other persons of mills for diamond polishing; if need be, the delivery of materials, tools and furniture for the trade, and the undertaking of all transactions relating to the diamond trade. The capital is 100,000 francs minimum, divided into shares of 50 francs each. The officers are: Jan Diels, diamond polisher, Antwerp, president; J. Wils, Borgerhaut, vice-president; F. Reusens, secretary; L. Bell, treasurer; J. Meinertzhagen, diamond merchant, second secretary; counselors: A. Magnus, contractor, Borgerhaut; J. Chauliac, manufacturer, Antwerp; J. Snyers, polisher, Borgerhaut.

AMSTERDAM, March 7.—The general opinion here is that we are entering on a new period of firmness and that sales will be made this month on a more extensive scale. The rise in rough is not yet paid on polished goods, but buyers will at length be obliged to pay it, owing to the expected additional rises, which may occur soon. There is a very good demand for mēlées, but prices are too high to any but immediate consumers; and speculators in these goods have, therefore, been eliminated.

The following prices give a little idea of the actual value of diamonds: Gross mēlées, 310 to 340 francs per karat; two grains, 335 to 365 francs per karat; three grains, 360 to 385 francs per karat. Other sizes in the same ratio. There is plenty of rough held by dealers who are speculating with it. American buyers are expected to arrive here next month.

**The Jewelers' League Win a Suit of Great
Importance to the Members.**

ALBANY, N. Y., March 20.—The Court of Appeals has handed down a decision settling the suit of interpleader brought by The Jewelers' League against Conrad Hepke and Thekla M. Becker and others which involves principles of vital importance to The Jewelers' League and similar insurance organizations. The Court affirms the decisions of the lower courts which sustained the contention of The League that a creditor of a deceased member could not receive from the insurance more than the actual amount for which the deceased was indebted. The suit arose over the payment of the \$5,000 insurance on the life of Frank X. Becker, a member of The League, who was survived by an infant daughter. Prior to his death Becker had made Conrad Hepke, a creditor, beneficiary of his policy, to secure a debt of \$635. Hepke, under an assignment of the policy, claimed the full \$5,000, and The League, contending that the infant daughter should receive the full amount, less the \$635 indebtedness, brought action of interpleader to determine the rights of the infant and of the creditor. The case was tried before Judge Russell, in the Supreme Court, in June, 1899, whose decision awarded to Hepke only the amount of the debt, \$635, with interest. The Appellate Division sustained this decision, last March, and the Court of Appeals has now also affirmed it, settling the case finally.

T. A. Long has established himself as jeweler and optician at Howe, Tex.

**Comparisons That Show That Smuggling
Is Now Greatly Prevented.**

WASHINGTON, D. C., March 21.—The Treasury authorities have been making some more comparisons between March, 1900, and March, 1901, to show how the more stringent regulations in force at the Custom House in New York have prevented smuggling. Four ships arrived in three days, on which, among the supposed personal luggage of passengers, were found concealed merchandise intended for trade purposes, which paid \$25,697 duties.

In the corresponding three days of last year, two of the same ships and two others of the same lines came in, and the revenue from merchandise in passengers' luggage was only \$3,910. It would not have exceeded \$2,000, probably, but for the fact that on one of the ships, *La Gascogne*, the Government agents happened to capture a female smuggler, whose compulsory tribute raised the total for that ship from a few hundreds to \$2,600.

**Report from Montana Regarding the
Sapphire Mines of That State.**

A report from Helena, Mon., says that John H. Farmer, of that city, has received a letter from a large manufacturing jewelry house of New York, asking for information regarding Montana sapphires. The firm are anxious to buy a large quantity of these stones either in the rough, or they will purchase a good sapphire field and search for stones themselves. The report further says that Tiffany & Co., New York, have bought up a large amount of the Yogo fields and

TRADE **1835-R-WALLACE** MARK

SILVER SMITHS,

WALLINGFORD CONN.

"1835-R-WALLACE"

Stamped on an article of Silver-plated ware is a guarantee of worth and quality.

Every dealer, when selecting a line of plated ware, always has in mind two leading qualities, and these usually are durability and design, as these are the ones on which most depends his reputation as a dealer in honest ware.

Our goods are made of the highest grade of Nickel Silver, plated with FINE Silver. Our extra, or A 1 grade, is plated 20 per cent. heavier than the regular standard. Triple and sectional plates are also carried in stock.

In designing patterns we endeavor to select only such as are graceful in outline and thoroughly artistic in decoration, and which conform most closely to the taste of a discriminating purchaser, which our long experience enables us to do.

Our line consists of the following patterns: Tipped, Fiddle, Windsor, Shell, Joan, Virginia, Astoria, Stuart and Anjou.

Any dealer who is not already familiar with our line will find it much to his advantage to write for Catalogue and discounts.

HAND-WROUGHT

..MARTELE'..

STERLING SILVER.

There is an increasing demand among the best trade for ware differing from conventional or machine-made designs; in other words, pieces which have every indication of being hammered up by hand from the flat metal into a finished article.

To supply this demand is the object of our line of MARTELE', which can be furnished at moderate prices, considering the workmanship and character of the ware.

No. C 2861. Dish. Length, 17 inches.

This illustration gives a fair impression of the actual article, although each piece produced is likely to differ slightly from the preceding one of the same design, as is usually the case in hand-made wares.

Send for Circular No. 9, giving illustrations and prices.

that other jewelry houses are attempting to prevent Tiffany & Co. from obtaining a monopoly upon Montana precious stones.

George F. Kunz, of Tiffany & Co., stated to a CIRCULAR-WEEKLY representative that the report, so far as Tiffany & Co. are concerned, is erroneous, as that firm never go into mining and do not own one inch of mining ground.

A Fine Opportunity for Ambitious Young Lads.

The Manufacturers' Association of New York, as recently noted in THE CIRCULAR-WEEKLY, at the suggestion of Ludwig Nissen, the president, appropriated the sum of \$2,000 for an industrial scholarship, including the cost of tuition for four years and incidental expenses. The purpose of the Association in providing means for the industrial education of a young man of

Greater New York is to encourage young men to qualify themselves for leadership in industrial pursuits by adding to the dignity of labor the advantage of trained hands directed by developed minds.

The Industrial Educational Commission, which does not include members of the Association, is composed of Hon. Alex. E. Orr, chairman; Dr. William L. Felter, secretary; Rev. Dr. S. D. McConnell, Dr. Truman J. Backus and Hon. Henry W. Maxwell.

Boys who desire to compete for the scholarship are requested to make application in writing, addressed to James T. Heile, secretary of the Manufacturers' Association of New York, 198 Montague St., Brooklyn. The following restrictions and qualifications govern applicants:

1. Applicants must be residents of the city of New York.
2. They must be at least 17 years of age.

3. They must have received at least three years' high school instruction, or an education equivalent to such instruction.

4. Applicants must have at least two references for scholarship and two for moral character.

5. Each applicant must present a physician's certificate of good health.

6. The successful candidate will be permitted to make his choice of the school or college he desires to attend from the list approved by the Commission.

7. The scholarship shall be awarded only to such candidate as is unable to pay his own way through college.

8. No legal responsibility attaches to the successful candidate for the return of the value of the scholarship; but, should the financial condition of the student be sufficiently prosperous, he is at liberty to make such return with the understanding that the money be used for other beneficiaries.

9. Applications should be filed not later than April 20, 1901; and at a later date notices will be issued to competitors, naming the time and place for the holding of examinations.

**Second Petition in Bankruptcy Filed by
J. W. Sharrard.**

LOUISVILLE, Ky., March 20.—James W. Sharrard, jeweler, 306 W. Market St., has filed a petition in bankruptcy. His total liabilities are listed at \$5,636, of which amount \$5,432 is unsecured. His assets consist of \$4,000 in stock and debts due on open accounts to the amount of \$653. The latter he divides into two classes, viz.: Old and new. This distinction arises from the fact that Mr. Sharrard had once before taken advantage of the bankrupt law and that some of the debts are due from the period when he was in business at 534 Fourth Ave. The amount due on old debts is listed at \$517 and on new accounts at \$136.

Mr. Sharrard's first petition in bankruptcy was filed under date of July 8, 1899. The case was closed before the referee on Feb. 10, 1900. His liabilities at that time were \$5,693 and assets \$5,125. His stock of jewelry was listed at \$3,000. The largest creditors under Mr. Sharrard's second petition are as follows: E. B. Clark, Louisville, \$3,089; R. W. Logan, Louisville, \$137; Henry Cowan, Boston, Mass., \$957, and Joseph Cowan, Boston, Mass., \$582.

**Contest Over Will of the Late Jeweler
Willford's Wife.**

NEW BRUNSWICK, N. J., March 24.—Judge Strong has filed his opinion in the case of the caveat filed against the probate of the will of Mrs. Mary Ann Willford. Mrs. Willford lived in Perth Amboy and was the widow of Mr. Willford, of the late firm of Willford & Chilton, Perth Amboy. After her husband's death she went to Montreal and died there. Harry Hope Chilton, who had been a clerk in her husband's store and boarded at the Willford home, presented for probate a will making him the sole legatee of Mrs. Willford. The probate of the will was contested by Mrs. Willford's brothers and sisters, who declared that the will had been made by Mrs. Willford under compulsion.

Judge Strong handed down his decision yesterday and the two brothers and three sisters win in the contest. The Court decrees that the brothers and sisters shall receive the estate in equal parts and Chilton will be cut off. This will case was one of the most famous ever tried in Middlesex county. The case occupied several days in the taking of testimony and has resulted, for the first time almost in Middlesex county, in a will being set aside. The Judge thought there was proof of undue influence on the part of Chilton over the testatrix and, therefore, decided to break the will and let the property go to the natural heirs.

THE CRESCENT WATCH CASE CO., Newark, N. J.

Friends of William Bardel Give Him a Farewell Dinner.

About 35 friends of William Bardel, the newly appointed United States Consul to Bamberg, Germany, gathered at a banquet, Thursday evening, to bid farewell, God speed and *bon voyage* to their popular friend and fellow jeweler. The dinner was held at Mouquin's restaurant, 20 Ann St., New York, and proved an interesting and enjoyable occasion. The guests began gathering shortly before 6 o'clock and when Mr. Bardel entered he was greeted by the orchestra with the strains of "Hail to the Chief," and by applause from the guests who assembled to welcome him. Most of those present were officers or members of The Jewelers' League, of which Mr. Bardel is a vice-president.

The presiding officer of the evening was Henry Hayes, president of The Jewelers' League. Mr. Bardel sat at Mr. Hayes's right and the other gentlemen at the head table, which ran at right angles to the main table, were Leo Wormser, Max J. Lissauer, B. Karsch, J. R. Greason, George W. Street, A. K. Sloan, William C. Kimball and John A. Carney. An excellent menu and three good wines soon put the diners in a genial condition, appropriate to the occasion, and at the entrance of the dessert the speech-making of the evening began with three cheers for Mr. Bardel.

Mr. Hayes in the opening address began by saying that he wished to express two sentiments in regard to Mr. Bardel's appointment—one of regret and one of pleas-

ure; regret that Mr. Bardel had to leave his friends in The League, and pleasure that he had the opportunity of serving his country. He spoke of the attempt to have the guest of the evening nominated four years before for the same position, told how he deserved it and what a worthy representative of the Yankee nation he would be. He also referred feelingly to the beer in the Bamberg district, intimating that it might be one of the reasons for Mr. Bardel's desire for the appointment. Mr. Bardel arose to the strains of "He's a Jolly Good Fellow" and fittingly responded to the opening address. Among other remarks, he stated that as a representative of the United States Government it made no difference to him whether there was good or bad beer in Bamberg. He expressed himself as being flattered at the reception and pleased to meet his many old friends. He bade good-bye to his friends in the trade and The League and closed his remarks with a toast to The Jewelers' League and a wish for its prosperity in the future.

Mr. Parker spoke of Mr. Bardel's 15 years' continuous work in The League and concluded with an acrostic poem of farewell, the first letters of whose lines spelled Mr. Bardel's name. A. K. Sloan, the next speaker, kept the room in a roar with a funny story about Mr. Bardel and spoke a brief farewell to the guest. He was followed by W. C. Kimball, Max J. Lissauer, John A. Carney, Gen. George W. Mindil, J. H. French, Levi Stevens, Jr., Mr. Miller and others, who took the occasion to add their mite to the intellectual feast of the evening and pay their tribute to the

guest of the evening. After the diners had, standing, sung "Auld Lang Syne" and "He's a Jolly Good Fellow," the banquet ended amid cheers for Mr. Bardel, The Jewelers' League and Mr. Mouquin.

The three gentlemen who acted as the committee responsible for the dinner were Levi Stevens, Jr., George W. Street and Leo Wormser. Among those who attended were: Henry Hayes, Bernard Karsch, Max J. Lissauer, Leo Wormser, John A. Carney, Gen. George W. Mindil, A. Barker Snow, A. N. Taylor, Harry Stevens, F. T. Oertel, Dr. Baker, R. F. Forrester, L. A. Miller, F. J. Boesse, J. H. French, Levi Stevens, Jr., H. K. Heller, John R. Greason, Jr., H. Roloff, A. L. Woodland, Charles J. Fox, Henry Karsch, S. B. Kent, J. R. McAllister, M. B. Dunning, T. L. Parker, W. E. Moutoux, D. N. Smith, A. McLeod, William C. Kimball, A. K. Sloan, George W. Street, J. R. Greason and a CIRCULAR—WEEKLY reporter.

Legal Complications Over Disposal of Eells & Frame's Goods.

TOLEDO, O., March 20.—Eells & Frame are the defendants in an action filed by Louis Hendricks, who sues to recover \$362.32 alleged to be due on account. Louis Dryfoose is made a party defendant. It is asserted that the jewelry firm, in contemplation of going into insolvency, transferred their stock of goods to Mr. Dryfoose for \$2,011.61, as mentioned in THE CIRCULAR—WEEKLY last week.

Mr. Dryfoose has been temporarily enjoined from disposing of the stock, pending the settlement of the action.

Receiver Necessary to Protect Lazarus Jewelry Co.'s Creditors.

MACON, Ga., March 20.—Judge Speer, in the United States Circuit Court, has handed down his opinion in the matter of Samuel W. Steinhardt vs. Max Lazarus and others, in which he holds that a receiver for the Lazarus Jewelry Co. is necessary in order to protect the creditors. On this point Judge Speer is certain, but on a legal question involving action by creditors when the company were declared insolvent, he is in doubt and takes further time for consideration. The opinion is dated March 16 and in it Judge Speer says:

I do not doubt from all of the evidence that this was a sham corporation, that Max Lazarus had substantial values in it, which, in view of the case as far as it has gone, should be subjected to the claims of his creditors. I do not believe that intelligent business men like Wolff and the others who hold trivial amounts of stock in this corporation would have permitted Max Lazarus or others concerned to speculate in cotton futures with the assets of the so-called Lazarus Jewelry Co. unless the man thus speculating was the real owner of the property. I presume no other corporation was ever conducted more completely by one individual than was this alleged corporation by Max Lazarus. He was, in a word, the whole corporation, and it seems upon the averments and prayers of the bill and the affidavits that the creditors should be entitled to the appointment of a receiver to subject, so far as can be done by that officer, the values belonging to Max Lazarus in this concern to his judgment debts.

The point on which Judge Speer has doubts and concerning which he finds authorities very conflicting is whether execution should have been issued and return of *nulla bona* made thereon before the bill was filed. In concluding his opinion on this matter Judge Speer says:

In many of the authorities it is said that where a debtor is alleged to be insolvent, that it is not necessary to sue out an execution and have a return of *nulla bona*.

While, as I say, I have received great light from this argument, I must take further time to consider these conflicting authorities.

Something has been said about the delay in the decision of this case, but except for the last week I do not think it is chargeable to the Court, for I have on file application from counsel on the one side and the other requesting delay. If the gentlemen desire to furnish additional briefs on the one question about which I have doubt, I will receive them.

Mr. Shehorn's Presence of Mind Caused Arrest of Two Thieves.

SCOTTSBORO, Ala., March 21.—Two strangers appeared at the jewelry store of R. L. Shehorn, last Saturday, and offered for sale at a low figure a gold watch. Mr. Shehorn grew suspicious and recalled a notice of the theft of a watch in a Chattanooga paper. While examining the watch the jeweler took the name and number of the movement, and on comparing them with the numbers given of the stolen watch found they were the same. Mr. Shehorn notified the officers and within a short time the two men were arrested.

The men gave their names as Benjamin Schwab, of Atlanta, Ga., and Joe P. Davis, of Savannah, Ga. Schwab admitted having been in Chattanooga one week ago and said he bought the watch from a stranger on the street in Nashville. Sheriff Austin thinks the men are professional hotel thieves. The men refused to return to Chattanooga without requisition papers.

The Peculiar Kansas City Case Remains Unsolved by Police.

KANSAS CITY, Mo., March 22.—Mystery still surrounds the theft of \$3,000 worth of diamonds from the Edwards & Sloane Jewelry Co. and the threat to kidnap the young son of Mr. Edwards, together with the payment of 50 imaginary \$20 bills to unknown men by a clerk, all of which was told in THE CIRCULAR—WEEKLY last week.

Unusual reticence is being maintained by all persons interested. The police are still hopeful of tracing the culprit by means of the letter, in which he demanded \$1,000 on the threat to kidnap the young son of Mr. Edwards. William Dearduff, the clerk who was wounded by an unknown man supposed to be the one who took from him the package of waste paper sent in lieu of the money to a designated point, is resting easily at his home in Kansas City, Kan., but refuses to discuss the affair without the permission of his employers. The police, Pinkerton officials and the members of the firm maintain a close silence regarding the entire occurrence, but express the hope that the guilty parties will soon be apprehended.

Arrested Because They Did Not Have Auction Licenses.

MIDDLETOWN, O., March 20.—J. C. Alexander, jeweler, and J. T. Anderson, architect, were arrested on a warrant charging them with opening an auction and conducting the same without paying the auction license exacted by the city. The arrests caused a sensation in business circles. Both men gave bond in the sum of \$100 each, signed by Attorney Rhonemus, who will defend them on the charge. Albert Bros., wholesale jewelers, Cincinnati, are the holders of the mortgage claims against Alexander and may figure in future developments. The arrests were made on complaint of Casper Fenzel, jeweler.

Left His Property to Outsider and Will May Be Contested.

JACKSON, Mich., March 20.—Joseph B. Tomlinson, the aged jeweler who died recently, left the greater portion of his estate, valued at between \$15,000 and \$20,000, to Miss Bertha R. Hannaford, not a relative. She is a bookkeeper in a Jackson dry goods store. Zera Tomlinson, a son, will probably oppose the will, which has been offered for probate.

The proprietors of the several jewelry establishments of the city honored Mr. Tomlinson's memory by the tribute of a unique floral design in the form of an hour glass, significant of the thought that life's sands have run out.

W. A. Nelson, Wapello, Ia., has sold a half interest in his business to George Wynn, of Pulaski, Ia.

The Suit of the L. E. Waterman Co. vs. the Parker Pen Co.

PHILADELPHIA, Pa., March 23.—An opinion granting the motion of the Parker Pen Co. to dismiss the appeal of the L. E. Waterman Co. from the decision of the local United States Circuit Court in the equity proceedings instituted by the Waterman Co. against the Parker Co. was handed down, Friday, by Judge Bradford, of the Circuit Court of Appeals.

Judge Dallas decided that the service of the writs upon an agent of the defendant company at the Export Exposition of 1899 was informal, as such temporary occupancy did not make the space so occupied a regular and established place of business in this city. The Waterman Co. thereupon appealed. Judge Bradford holds that if the order of the lower tribunal was not final, no appeal would be, and if it was final the appeal should have been to the United States Supreme Court. Judge McPherson also filed an opinion concurring in the conclusion of Judge Bradford, but stating that an appeal should have been taken to the Supreme Court, as the case raised a question of jurisdiction.

Frank A. Jewett has opened a jewelry repair business at Saugerties, N. Y.

C. C. Gere, Urbana, Ill., will erect a building for his business, in company with a butcher.

Benedict Bros., Katonah, N. Y., have purchased the jewelry and stationery business of F. T. Jelliff, Mount Kisco, N. Y. They will thoroughly renovate and improve the store and open about May 1 with an entirely new and up-to-date stock.

The Retail Jewelers' Movement Against the Department Stores.

CHICAGO, Ill., March 23.—In view of the interest taken by the retail jewelry trade in the recent efforts to lessen department store competition, C. D. Peacock, of this city, has forwarded to jewelers in other cities the following circular letter:

The jewelers of to-day are confronted with the department store problem.

Is it not for the best interests of the jewelers to have our various lines confined to the legitimate jeweler only, who is giving to the public reliable goods at lower prices than the so-called department store?

What is the way to meet this condition of affairs? Is it not better that an effort be made to convince the manufacturers that their interests and ours are mutual, and their products should only be placed in the hands of the legitimate jeweler?

Is it not to our interests to stand united against a common enemy—the department store jeweler? If a few stores of this kind should make a success, will it not be an incentive for others to follow their example and make an effort to build up jewelry departments in other cities, creating an unfair and costly competition for established jewelry houses?

Co-operative work by the jewelers and their employes with the manufacturers and their representatives will undoubtedly help to prevent this encroachment on our business and retain the high standard of and advance our general trade interests.

An understanding between the jewelers of your city in regard to this problem will strengthen us all against the department store feature of our business. We cannot too strongly present this matter to the jewelers of the United States, as it is of vital importance to the retailer, manufacturer and jobber. A united effort in the various cities at the present time will, we believe, accomplish the desired results.

The danger of department store competition would be greatly lessened by the jewelers refusing to handle the products of manufacturers who do not confine their goods to the jewelers only. In giving our patronage to these houses, a feeling of unrest is created with the manufacturers who are with us in this movement.

Favorable replies have been received from many of the leading manufacturers. There are several manufacturers, however, who are receiving a greater part of their business from the jewelers

OPPENHEIMER BROS. & VEITH,
Importers and Cutters,

CORNER NASSAU AND JOHN STREETS, NEW YORK.

Amsterdam, 2 Tulp Straat. - - London, 45 Holborn Viaduct.

and are placing their goods in department stores; from these we have received no reply.

We inclose herewith a copy of a letter issued by some of the Chicago jewelers, which has been forwarded to the leading manufacturers of this country, and it will explain itself.

Yours respectfully,
C. D. PEACOCK.

The letter referred to in the last paragraph was the one addressed to the manufacturers and signed by eight of the largest retailers of Chicago, as published in THE CIRCULAR-WEEKLY recently. About 400 letters have been sent out by Mr. Peacock, covering all cities of over 20,000 population and, later, cities of less population will be included. Favorable replies are being received daily from various sections of the country, those of the last few days coming from Detroit, Dayton, Minneapolis, Cincinnati, Cleveland, St. Louis and Omaha. In these replies the writers express their desire to co-operate in the work. They regard the department store as a menace and a positive detriment to jewelers in the cities. They are heartily in accord with and strongly endorse any policy which will mitigate or avert this impending evil. It is anticipated that the movement started in Chicago will be taken up in all the large cities of the country and thus an influence be exerted that will result in benefit to the retail trade. The good will of manufacturers is desired in this work and their co-operation will go far toward making the movement a success. "We know we are soliciting the efforts of the most intelligent people of the country," said Mr. Peacock, "and we appeal simply to their reason and good judgment."

Consolidation of the Businesses of Messrs. Tryon and Swanson.

WEST SUPERIOR, Wis., March 20.—C. F. Tryon, Tower Ave. and 12th st., has disposed of his entire stock and business to C. A. Swanson & Co., Red Wing, Minn. The new firm are composed of C. A. Swanson and his father, A. Swanson, the latter a prominent citizen of Red Wing. The former is a practical jeweler, watchmaker and optician, and for the past four years has been engaged in business at Wabasha, Minn.

Benedict-Clarke Silver Co. Operating the Ottawa, Ill., Plant.

OTTAWA, Ill., March 20.—The plant of the former Ottawa Silver Co., which was sold by receiver W. W. Nash, on March 10, will be operated at once by the Benedict-Clarke Silver Co. [Mention of the sale was made in THE CIRCULAR-WEEKLY of March 20.] The successful bid was \$3,000, which included the assets of the defunct company, consisting of manufactured goods, office and factory fixtures, tools, raw material and supplies, etc., but not the real estate and machinery, which belonged to the Ottawa Development Association. The association and the new company readily came to an understanding on this point, the association selling the property mentioned for \$5,000.

The new company are composed of M. S. Benedict and H. L. Benedict, of the M. S. Benedict Mfg. Co., East Syracuse, N.Y., Toronto and Chicago, and E. G. Clarke and L. McGlashan, of the Ontario Silver Co., Muncie, Ind., and Niagara Falls. Fred. K. Stickle, of Syracuse, will be secretary and treasurer of the new company and D. J. Toothill will be manufacturing manager. Incorporation papers have been filed. To D. J. Toothill is due the credit of uniting these silver ware interests in Ottawa. The factory has already begun operations and it is understood arrangements have been made whereby the M. S. Benedict Mfg. Co. will take the entire output of the Ottawa factory. One addition to the novelty department now being planned is a full line of gold clocks and other specialties of a kindred nature which will be manufactured on a large scale.

The Benedict-Clarke Silver Co. were incorporated at Springfield, Ill., yesterday, with a capital stock of \$60,000, paid up. The incorporators are Henry Mayo, Fred. K. Stickle and Vincent J. Duncan.

Requisition for Alleged Jewelry Thief.

HARTFORD, Conn., March 23.—Governor Yates, of Illinois, to-day issued requisition on the Governor of Connecticut for the extradition of Max Greenfeld, who is under arrest at Hartford and wanted in Chicago to answer a charge of larceny of jewelry and money to the value of \$4,000 from Abraham Greenbaum, Feb. 23, 1900. Greenfeld escaped immediately after committing the act and until now all efforts to apprehend him have been unavailing.

Jewelers' Gold Bars Withdrawn and Exchanged.

Week Ended March 23, 1901.

Total

The insurance people have made an adjustment satisfactory to W. H. Homuth, Bloomington, Ill., whose stock was damaged from fire recently.

**Condition of Affairs of the Wilson Jew-
elry Co.**

BOSTON, Mass., March 25.—Exceptions have been taken to the story in reference to the Wilson Jewelry Co., Tremont Row, which appeared in the last issue of THE CIRCULAR-WEEKLY. W. E. Woodman, who has held the position of manager of the company for some time, said to-day that the application for a receiver was made entirely on the responsibility of the widow of the late treasurer of the company, Whipple N. Potter, Jr., and that the creditors had nothing to do with it. Mr. Woodman is authority for the statement that the examination of the books by experts shows an overdraft of \$21,000, made by Mr. Potter.

Mr. Woodman said that there would probably be a receiver's sale between April 12 and 15. The future of the company is not to be predicted just now, more than to say that there is every likelihood of another Massachusetts corporation purchasing the stock and continuing the business. It has been rumored that Mr. Woodman would be the purchaser, but in regard to this rumor, while not denying it absolutely, Mr. Woodman said that if he did buy it he would be acting for others rather than for himself alone.

The officers of the company up to the time of the death of Mr. Potter were: Thomas R. Breed, president; Whipple N. Potter, Jr., treasurer, and E. B. Newton, secretary.

**Some Interesting Features of the Lapi-
dary's Art.**

BOSTON, Mass., March 23.—W. R. Mills, a well known lapidary, gave a very interesting talk before the New England Association of Opticians, Tuesday evening. Mr. Mills took for his subject, "The Diamond as Used in Optical Work." He said a lapidary needs only a few tools where diamonds are concerned. There are three essential ones—the truing tool, the diamond drill and the lens cutter—but these call for the most careful manufacture, the difficulty lying in making and adjusting the edge.

The differences between the Brazilian black diamond, the hardest substance known and the ordinary white diamond were shown; the former being used only as a tool and never as a gem, he said, though it was very rare and expensive. By far the most interesting feature was an exhibition of work on some of the harder stones, principally quartz crystal and agate, the smaller examples in the more expensive sort. One was a crystal watch, in which all the parts but the working train were of transparent crystal.

Jewelers Enjoy Themselves.

The Twelfth Annual Ladies' Night of the Boston Jewelers' Club.

BOSTON, Mass., March 25.—The twelfth annual ladies' night of the Boston Jewelers' Club was celebrated with a dinner and theater party to-night. Shortly after 5 o'clock the members of the club, with their wives and invited guests, gathered in two large rooms on the second floor of the Parker house. At 5.45 o'clock vice-president William A. Thompson, acting for president Arthur H. Pray, who is absent in Bermuda, led the way into the banquet room. Both rooms were handsomely decorated with palms and cut flowers, and for the next two hours careful at-

tention was given to a discussion of the menu.

At 7.45 o'clock several automobiles were drawn up on the School St. side of the hotel and the members of the party were taken quickly to the Hollis Street Theater, where a section of seats had been reserved for John Drew's initial performance in this city of "Richard Carvel." This part of the programme was especially pleasing to the party and at the conclusion of the play the automobiles were again brought into service and the party were taken to their homes, all loud in praises of the care and thoughtfulness of the committee, and feeling sure that this Twelfth Ladies' Night had excelled any previous one.

Those present were: William A. Thompson and wife, James S. Blake and wife, D. C. Percival and wife, E. A. Bigelow and wife, H. B. Burnham and wife, Charles O. Lawton and wife, W. S. Tiffany, formerly of Tiffany & Wales, now of South Attleboro, Mass., and four guests; Alfred Barker and guest, Woodbury Melcher and wife. Mr. Melcher, who is a member of Scofield, Melcher & Scofield, Providence, R. I., was elected a member of the club to-night, the rules being suspended in order to accomplish this at this time.

H. W. Patterson had as an additional guest, T. S. Sherry.

The officers of the Boston Jewelers' Club for 1901 are: Arthur H. Pray, president; William A. Thompson, vice-president; Charles O. Lawton, secretary and treasurer; H. B. Burnham, E. W. Martin and W. C. Wales, executive committee.

Worcester, Mass.

A. W. Gunnison, of Hudson, for several years in the jewelry trade, has filed a voluntary petition in bankruptcy in the United States District Court, in Boston. His counsel is W. J. Merriam, of this city. Mr. Gunnison owes about \$3,000 and his assets are nominal.

Blackmer & Vaughan, counsel for W. A. England, jeweler, 394 Main St., have not yet called a meeting of the creditors. Notice has been sent out that a meeting will be called and the announcement is made by the counsel that the liabilities are between \$10,000 and \$15,000, and his assets at a forced sale will not yield more than \$6,000 to \$10,000. The creditors number about 100, the majority being in New York and Boston, although there are a few small creditors in Worcester. It is claimed Mr. England had a poor holiday trade and has been unfortunate in a business way for some time. It is not settled that bankruptcy proceedings will have to be resorted to. The creditors may take action, allowing the business to be carried on.

Cornelius Chambers, clockmaker and jeweler, was found dead in bed at the home of his son, Charles Chambers, Troy, N. Y., March 19. Mrs. Chambers died three weeks ago and since that time Mr. Chambers had resided with his son. The deceased was stricken with paralysis about a year ago and never fully recovered. The coroner pronounced death due to natural causes resulting from paralysis. Mr. Chambers was 67 years of age.

Removal.

Seized Diamonds and Jewelry Bring Unusually High Prices.

NEWARK, N. J., March 22.—Diamonds and jewelry seized at various times recently from returning European travelers by United States Customs officials for violation of the customs laws were sold at auction yesterday. The prices paid by the many bidders present were high, as auction sale prices run.

The professional buyers were largely in evidence long before the first diamond ring was offered for sale. Many of these buyers were from New York, Jersey City and Philadelphia and represented various diamond houses.

The second lot offered for bids was a beautiful solitaire ring of nearly three karats, which had an appraised value of \$440, including duty. The bids ran rapidly up on this ring until \$325 was bid.

A set of beautiful earrings, finely matched, each of them announced to weigh two and one half karats, was sold for \$365 to Manny Bock, of Newark. This was the highest price paid for any single lot offered during the day, and a spasm of applause passed over the crowd when the marshal knocked them down to Mr. Bock.

The total sales amounted to \$6,993, and United States Marshal Alcott said that the prices realized were the highest he has obtained in years. Ordinarily, he said, such sales realized a little less than the 60 per cent. customs tax, and he was perfectly satisfied when the prices covered the tax. This sale, he added, had brought not only the customs duty, but, in addition, the full foreign value of the stones.

Among those who bid was Sheriff Charles Fenton, of Burlington County, who made the trip for the especial purpose of buying some choice stones. He went home without making a purchase. Many court officers from Trenton, Camden, Jersey City, Philadelphia and New York were also present, but none of them made a purchase. The prices were too high.

Mr. Dodd Caught Ill Fated Steamer in Time to Meet His Death.

BUTTE, Mon., March 20.—A letter received by P. A. Towle, of Towle & Winterhalter, tells of a mere chance by which Albert W. Dodd happened to be a passenger on the ill fated steamer *Rio de Janeiro*. Mr. Dodd was among the unfortunates who lost their lives, as told in THE CIRCULAR-WEEKLY recently, and together with his brother, Dr. William E. Dodd, of this city, had been touring the Hawaiian Islands. Dr. Dodd concluded almost at the last moment to remain in Honolulu, while his brother made up his mind to return to San Francisco on the *Rio de Janeiro*, but the steamer had left the wharf before he was ready to depart, and with two other tourists he took a small boat and sailed out into the harbor to the ship.

A letter from a jewelry firm in San Francisco, with whom Mr. Dodd was acquainted, contains the information that divers have not been able to locate the wreck because of the great depth of the water at the point the ship sank.

FANCY STONES.

Under this heading are classified

RUBIES, EMERALDS, SAPPHIRES, PEARLS, SPINELS, TURQUOISES AND OPALS.

IN OUR 1901 CATALOGUE we illustrate all the above fancy stones, in natural colors, showing the different weights and prices of each. We also print with each a series of articles giving useful information. We believe dealers who are not fully posted could increase their sales of these goods by making a study of these articles and by keeping our catalogue handy for reference.

1 GR. 2 GR. 3 GR. 4 GR. 5 GR. 6 GR. 7 GR. 8 GR.

This cut, showing the different sizes and weights of pearls, is but one of the many illustrations of the various stones shown in our catalogue. If you have not received a copy we will be pleased to send you one upon application.

BARLOW MFG. CO.,
Holyoke, Mass.

Boston Salesrooms, 125 Summer St.

Connecticut.

The William L. Gilbert Clock Co., Winsted, have 350 employes at work in their factory.

Andrew B. Kingsbury, Norwich, is to sell out his jewelry business to enter the manufacture of steam heaters.

The Consolidated Railroad Co. are making preparations to install a fine system of timepieces in the South Norwalk stations.

George M. Curtis, Meriden, lectured in that city before a large gathering of school children, March 21, regarding his recent trip through Egypt.

E. O. Oxley, who was employed to sell jewelry on the instalment plan by Charles B. Beers and Walter G. Bunnell, Bridgeport, was arrested last week. The warrant charges him with stealing \$50 on March 7. The prisoner admitted embezzling about \$15.

The Bristol Brass and Clock Co., Bristol, intend to build a two-story brick addition in the rear of the spoon shop department on Main St., 45x115 feet in size. The new factory will furnish employment to 75 to 100 new hands. The company propose to manufacture, in connection with their other products, an extensive line of table cutlery.

Detective Capt. Henry D. Cowles, of the New Haven Detective Bureau, arrested Mrs. Carrie Rosenquest, Saturday, on a charge of theft. The woman has been employed for two years to wash the floor in S. H. Kirby & Son's jewelry store and do other work about the place. Sat-

urday it was discovered that she was robbing the firm. When arrested she was taken to the police station and in a bag she carried were found watches and jewelry from the store. She was held under bonds of \$150.

In the Superior Court, at Hartford, March 21, Judge Robinson sentenced William Gorfinkle, who keeps a jewelry store on Asylum St., to the State prison for 20 months. Gorfinkle was found guilty by the jury of the theft of a diamond valued at \$150, it having been taken from a ring belonging to lawyer Edward Garvan and a spurious stone substituted. Gorfinkle collapsed when sentence was pronounced. The case against Betty Johnson, the servant girl who stole the ring and who turned State's evidence, was *nolled*.

A hearing took place before the judiciary committee at Hartford, March 22, on the bill for the licensing of itinerant merchants who come into Connecticut cities with their fire sales, damage sales and the like, thereby interfering with local tradesmen. The bill has the approval of the State Business Men's Association and is heartily indorsed by the business men's associations existing in several of the larger cities. It provides that each itinerant vendor shall make a special deposit of \$500 with the State Treasurer; that he shall pay a State license of \$25 and that in each town where he does business he shall, before receiving a local license, pay taxes on his stock of goods at the same rate paid by local merchants on their stocks.

GUARANTEED FOR TWENTY-FIVE YEARS.

THE NEW STYLES OF

CROWN 14k. FILLED

Cases represent a distinct improvement in shape, ornamentation and general finish over any previously shown. The quality is the same that has, in thousands of instances, withstood over a quarter of a century of wear. The Crown trade-mark means proved merit.

THE NEW STYLES OF

LION 10k. FILLED

Cases will still further prove their claim to be "first in style and worth" in the 10k. grade. The patterns are in great variety and equal those on the highest-priced gold cases. Most jewelers consider these cases the best selling and most profitable to handle of all watch cases.

GUARANTEED FOR TWENTY YEARS.

Catalogue and Price-List Furnished upon Application.

Providence.

Charles Wolfson, New York, was in town last week calling on the trade.

A quarterly dividend of 1½ per cent. upon the preferred and capital stocks of the Gorham Mfg. Co. has been declared, payable April 1 next to stockholders of record March 25.

Edward H. McKenna, for a number of years foreman of the engraving and chasing shop of John T. Drinan, whose death was recorded last week, will continue the business for the benefit of the family.

George D. King, doing business as the Attleboro Forge Co., has given a chattel mortgage for \$3,000 to the Merrimac Chemical Co. on all stock, tools, fixtures, etc., in the shop at 21 Page St., this city; the shop on leased land with all the stock, tools, fixtures, etc., contained therein, on Union St., Attleboro; and all the stock in stock room at 21 Elm St., North Attleboro.

The firm of Edward N. Cook, as already announced, have been incorporated under the laws of the State of Rhode Island under the name of Edward N. Cook Plate Co. The officers are: Edward N. Cook, president and treasurer; E. Clinton Cook, secretary, and William C. Starkweather, superintendent. The company will continue the manufacture of gold and silver plate and seamless wire.

Plans for the coming season of the Jewelers' Baseball League were discussed at a meeting held at the office of the president, George W. Dover, Friday evening. A committee on grounds were appointed, consisting of George W. Dover, O. H. Mun-

roe and J. Casey. An advisory committee were also appointed to be composed of the executive officers of the league, together with the directors from the various shops represented in the organization, as follows: Chairman, T. M. Jacques, Parks Bros. & Rogers; secretary, Irvin Bissell, Ostby & Barton Co.; Hugh Travers, Waite; Thresher Co.; Harry Mays, of George W. Dover; J. Casey, Marden & Kettley; George C. Anderton, B. A. Ballou & Co.; Thomas Bell, Clark & Coombs, and Clarence Heath, R. L. Griffith & Son Co.

North Attleboro.

Charles H. Clark and E. Foster Clark have been admitted into the firm of W. G. Clark & Co. The firm name remains unchanged.

Fire broke out one day last week in the King building, Bruce Ave. Among the firms threatened with destruction of their plants were George H. Court, toolmaker, and John J. Birmingham, enamel shop. The response of the local department was so prompt that the damage was slight.

The public record was filed last week of the transfer of the Benjamin Stanley Freeman ground of factory buildings to Ezra Marble, of Boston. It shows that the trustees of the estate of the late John Fallon, of Providence, who held the mortgage on the place received from Marble the sum of \$16,500.

Albert Totten, retired, was elected selectman at North Attleboro, recently. Edwin D. Sturtevant, of Sturtevant, Whiting & Bigelow, was beaten, after serving on the

board as chairman for many years. The town voted license by a small majority, after a spirited campaign against liquor, backed by the manufacturers.

Attleboro.

Edward A. Robinson, formerly of the International Jewelry Co., and Arthur M. Briggs returned last week from a lengthy tour of the south.

The committees of the Manufacturing Jewelers' Salesmen's Association are busy under the direction of president J. Thomas Inman, of J. T. Inman & Co., in preparing the details for the coming annual reunion.

Official investigation of a rigid character by authorities and insurance people is being made into the cause and responsibility for an accident at the steam power plant which furnishes power for the three Robinson jewelry factory buildings. A fire was built under an empty boiler with costly results.

The handsome collection of their glass ware given the Attleboro public schools by the Tiffany Glass and Decorating Co., New York, is to be the central feature of a reception at the High School building in a few days. A canvass of the jewelry manufactories is being made to get them to contribute to the Museum of Arts and Crafts, of which the glass is the nucleus.

The Attleboro jewelers were visited last week by a representative of the Philadelphia *Item*, and invited to place themselves on record as favoring the present agitation of that paper for a reduction of the first class postal rate from 2 to 1 cent per half ounce. Many did so and several contributed toward the fund being raised by the paper to push their idea through the proper channels.

The jewelry shops in Attleboro have reached about the minimum. The greater part are closed. A few are running with very few hands from one to four days a week. The longest to hold out have been the Spring goods and novelty houses and they are fast succumbing. As an example, McRae & Keeler were still running with their usual force six days a week long after other shops had closed their doors. They are still on full time, but are diminishing their working force daily. The cold facts of the matter are that the enormous Spring trade prophesied by men whose position gave them a sight of the market did not come to pass. However, conditions are not discouraging. The salesmen are on the road with the grips, hustling for fresh orders, and the next three months are expected to be about their normal condition, with probably a genuine rush on Summer goods through June. The passage of Winter and approach of Summer mean a good deal to the town. A Spring awakening of business and health to the workers are the signs of the near future. The past three years have been marked by great increase of dwelling houses, erected by the jewelers to encourage their help to own homes of their own. The contractors state that this Spring and Summer are to see a repetition of this. It is fostered by the fact that this Spring and Summer will see two new electric roads pierce the surrounding suburbs and rural free delivery will make it far more convenient and pleasant to spread out. A comfortable Summer, if nothing better, seems promised for the jewelry town.

Philadelphia.

T. S. Mitchell, 56 N. 8th St., has had a new ceiling and other alterations made to his store.

A. K. Chattaway, of Boston, Mass., has accepted a position with J. E. Caldwell & Co., as watchmaker.

W. O. Shepard, retail jeweler, Camden, N. J., has recently been awarded a patent on a policeman's baton.

John Kirschnek, Media, Pa., contemplates moving to larger and handsomer quarters in the same town.

Herman L. Woche, son of Charles J. Woche, jeweler, 718 Chestnut St., announces his engagement to Miss Thekla A. Dietz.

Harry Harper, a well known retired jeweler, has just recovered from a serious illness. Mr. Harper is now past three score and ten.

Charles Tutmantel, watchmaker for William G. Earle & Co., 1030 Market St., is the proud father of a boy, born to Mrs. Tutmantel last week.

George W. Harvey has removed from 1235 S. 49th St. to 1233 S. 49th St., where he has a large floor space and much better equipped establishment.

E. Emery, lately watchmaker with the Bailey, Banks & Biddle Co., has assumed charge of the watch repair department of O. F. O'Neill, Kensington.

S. Rush Weaver, jeweler, 1103 Chestnut St., has brought suit against Louisa Johnson to recover \$621 for a diamond pin and a pair of diamond earrings.

The Bailey, Banks & Biddle Co. are having alterations and improvements made to their factory at the southwest corner of 12th and Sansom Sts.

A new refining company, to be known as the Philadelphia Gold & Silver Refining Co., started March 24, at 711 Sansom St. S. Kline is head of the company.

A big retail estate transaction more or less interesting to Philadelphia jewelers was consummated last week when William L. Elkins bought the store property at the northeast corner of 8th and Chestnut Sts. from Henry W. Sharpless, for \$825,000.

The police are looking for a thief who stole a diamond ring valued at \$150 from the store of R. L. Saunders, 13 S. 8th St., Wednesday night. The thief was shown a tray of diamonds and when the clerk turned his back he grabbed the gem and ran from the store.

The Ways and Means Committee of Harrisburgh, Thursday, amended the present mercantile tax law requiring one-half of a mill on every dollar of gross business for wholesalers and one mill on every dollar for retailers. The prevailing tax rate was cut squarely in two, a pleasant surprise for the retail jewelers throughout the State.

Burtis H. Limerick, a jeweler, in business with his brother James A. Limerick, died, March 18, at his home, 4031 Locust St., of heart disease. Though only 24 years old, Mr. Limerick was well known and much respected in the trade. He was also widely known socially and a member of the Historical Society of Pennsylvania. He was a veteran of the Spanish war.

Thomas Liggins, retail jeweler, 1209 N.

The Giant of Collar Buttons

IN QUALITY,
IN SALES.

One Million Five Hundred Thousand Kremenz One-Piece Collar Buttons made and sold within the last year.

WHY?

Because of their HIGHEST QUALITY, BEST CONSTRUCTION, GIVING THE MOST WEAR, AND GREATEST COMFORT and their IRON-CLAD GUARANTEE.

To verify this we invite the trade to read "The Story of a Collar Button, with Illustrations," which may be had FREE for the asking, and to try the experiment suggested on page 5 of that booklet.

Extract from "Printers' Ink," Nov. 23, 1898.

The Little Schoolmaster now suggests, to every pupil in his class, to send a two-cent stamp to Kremenz & Co., 49 Chestnut Street, Newark, N. J., and ask to be favored with a copy of their leaflet, "The Story of a Collar Button." Afterward, if any pupil will send to *Printers' Ink* another leaflet, new or old, that is half as good as this one, or that approaches it in excellence, the deserving student will be rewarded with one of *Printers' Ink's* souvenir spoons as an acknowledgment of his discovery and contribution. "The Story of a Collar Button" is the best piece of advertisement construction that has come to *Printers' Ink's* attention in the year of our Lord 1898.

Should you wish to utilize this booklet to increase your collar button business, we will, on receipt of your order, print your card upon and send you a quantity of them.

Kremenz One-Piece Collar Buttons are stamped as follows, ON BACKS:

Patent sustained by United States Supreme Court.

Quality and Construction have made our reputation.

All Kremenz Collar Buttons are Manufactured by

KREMENTZ & CO.,

No. 202.

No. 205.

11th St., headed a delegation of citizens who called on Mayor Ashbridge, Thursday, to protest against the erection of a public bath-house opposite Mr. Liggins's handsome store.

H. Muhr's Sons and William P. Sackett have the contracts for medals and trophies for the intercollegiate gymnastic tournament.

Only one piece of the tray of diamonds, valued at \$3,000, stolen from the jewelry store of William G. Earle & Co., 13 N. 9th St., last Summer, has been recovered. This piece is valued at \$100.

R. H. Smith, 1610 W. Susquehanna Ave., intends to go south for a protracted stay after Easter for a complete rest from business cares and worryment. The store will be left in charge of an assistant.

Edward Salms, Philadelphia agent of a New York jewelry firm, has brought suit for \$20,000 damages against Harry Molleston, traveling salesman for Kohn & Adler, for the alienation of the affection of Salms's wife.

Samuel Dudgeon, a clockmaker, living at 55 N. 40th St., has the contract to repair the clock in Independence Hall. Mr. Dudgeon also has the contracts for keeping in repair other big timepieces of the city.

Arthur Webb, son of jeweler Jesse E. Webb, West Chester, is attending the Philadelphia School of Horology, preparatory to starting in business with his father. Young Webb will have charge of the optical department when it is started, which will be soon.

A splendid collection of cut glass and ceramics from the Paris Exposition was recently received in the museum at Memorial Hall, Fairmount Park. Edwin Atlee Barber, honorary curator of the department of American Pottery and Porcelain, of the Pennsylvania Museum and School of Industrial Art, has been appointed to the office of secretary of the corporation and curator of the museum to succeed Dalton Dorr, deceased. Mr. Barber is an authority on pottery, porcelain and ceramics.

P. Carroll, who recently bought the property at 1513 W. Susquehanna Ave. and moved thereto from his former place, at 15th and Cumberland Sts., has not yet finished beautifying and adorning the establishment. When the alterations are all completed the store will be one of the handsomest retail places uptown. The story of Mr. Carroll's career as a jeweler is an interesting one. He has been in business over a score of years. Until seven years ago he was in the retail and wholesale business at 2d and Poplar Sts., but a trusted salesman made off with thousands of dollars' worth of goods and left the jeweler practically penniless. He failed and though past middle age had to start life all over again. He was forced to accept a position with an 8th St. jeweler to whom he had once refused to sell goods. For 10 months he worked for \$9 a week to give bread and butter to his family. About five years ago he opened a place on Cumberland St. and by dint of unceasing efforts again built up a lucrative trade. Now fortune is once again in the earnest jeweler's grasp.

Pittsburgh.

G. B. Brillhart, McKee's Rocks, is quite ill with typhoid fever.

James G. Corbett is now with L. W. Vilsack as watchmaker.

Charles W. Wattles has gone to Cambridge Springs for a short stay.

Philip Ruprecht has removed to his new quarters on Main St., Sharpsburg.

J. C. Keith, Elwood City, has removed to his new quarters on Main St.

D. E. Baker will hold a final auction at Washington, Pa., to quit the business.

J. K. Fisher, Braddock, Pa., has returned from a three weeks' trip to Florida.

J. H. Bee, New Kensington, Pa., is holding an auction to dispose of old stock.

Fred Luhr, St. Mary's, Pa., will shortly remove to his new building on Railroad St.

H. E. Hillman, Wheeling, W. Va., lost his son last week, who died from typhoid fever.

Mrs. R. A. Noble returned to her home in Wellsville, O., after spending two weeks in Pittsburgh.

Donahue & Jones, Punxsutawney, Pa., have dissolved partnership, T. C. Donahue retiring to start elsewhere. J. S. Jones will continue.

P. A. Goodnough, Union City, Pa., has sold out to Palmer & Borst, formerly of North East, Pa. Mr. Goodnough goes into business in Erie, Pa.

The W. J. Johnston Co. will start repair work this week on their fifth story department, which will be a manufacturing one, under the foremanship of Mr. Kraus.

A. L. Shelley has charge of the office department on this floor.

The matrimonial engagement of Emanuel Grafner, of Grafner Bros., and Miss Jennie Rodelheim, daughter of Mr. and Mrs. S. Rodelheim, of 4212 Park Side, Philadelphia, is announced. Miss Rodelheim formerly resided in Pittsburgh.

Among out of town dealers in the city last week were: William Herzberg, Connelville, Pa.; Fred. Laban, Steubenville, O.; A. Jacobs, Duquesne, Pa.; John Bren-

ner, Youngstown, O.; T. W. Gurley, Meyersdale, Pa.; A. V. Johnson, Apollo, Pa.; C. M. Wilson, Salem, O.; L. C. Brehm, West Newton, Pa.; E. H. Kennerdell, Tarentum, Pa. Mr. Kennerdell will sell out his Salem store at auction.

Munhall Station was visited by thieves early Saturday morning. They broke into the jewelry store of A. J. Paynter, but got only four cents, evidently not caring to carry off jewelry or watches, of which Mr. Paynter had quite a large stock.

Thomas M. Breen, a popular young jeweler in the employ of Heeren Bros. & Co., died on March 16, at his home, 1730 Penn Ave., as the result of injuries received by being struck by a traction car the same day.

Sherman O'Neill, a prominent young man of the East End, was arrested on last Thursday on the charge of false pretense. The warrant was sworn out by Frank Keating, a clerk in the employ of J. C. Grogan. It is charged that O'Neill bought some jewelry at Mr. Grogan's and paid with a check on a bank with which he had no account. He was held for a hearing.

The Pittsburg Jewelry Co. are interested in two new inventions, on which patent allowances have just been granted. These are electrotherapeutic spectacles and a time indicator or watch opener. They are the inventions of Alexander F. Humphrey, who designed and constructed them especially for Lewis J. Seleznick, president of the Pittsburg Jewelry Co. It is the intention of the company to manufacture these articles at their new place, 443 Smithfield St., which will be opened on April 15.

Studor & Gaus, 215 Federal St., Allegheny, were cleverly victimized by two flimflam operators on Thursday evening. The firm are out a pair of earrings, valued at \$25, and there is no clue to the thieves. Two well dressed men entered the store at 9 o'clock in the evening. One of them purchased a collar button for 15 cents and then in an off-hand manner asked to be shown some earrings. A tray was set before them and a half hour's barter was indulged in, when two women came in and claimed Mr. Studor's attention. After they had departed the men stated they had decided not to buy that day and departed. Mr. Studor discovered his loss after their departure and notified the police, but to no avail.

Boston.

J. C. Sawyer, 383 Washington St., has gone to Florida for a few weeks on account of the ill health of Mrs. Sawyer.

W. B. Tilton, with D. C. Percival & Co., started out last week on his initial trip through New York State.

After an illness of six weeks, J. H. Hanson, Peabody, Mass., was in town last week, visiting his friends among the trade.

R. D. Gordon, of Gordon & Bergin, Jewelers building, is absent in Jamaica and will not return to Boston until early in April.

F. M. Peabody, formerly in business in Danvers, Mass., is now in charge of the watch repairing department of N. G. Wood & Sons, Tremont St.

Royal E. Robbins, of Robbins, Appleton & Co., has been confined to his home, at Pride's Crossing, for several days by reason of a slight illness.

Efforts are being made to secure an agreement among the wholesale trade to close on Saturdays at 1 o'clock P.M., from April 1 to Oct. 1.

The employes of Smith, Patterson & Co. were made happy last week by the receipt of a box of oranges from Mr. Smith, who is in Florida.

J. E. Stephens, jeweler, Rumford Falls, Me., was in town last week. Mr. Stephens is one of the officials of the United States Motor Carriage Co. and is much interested in this latest kind of vehicle.

Boston creditors of W. A. England, Worcester, Mass., received word last week of his impending financial trouble. No statement of his exact financial condition has been received here as yet.

A meeting will be held in Boston on April 20 of the committee appointed at the annual meeting of the Jewelry Travelers' Association of New England, to take steps toward the reorganization of the club. F. R. Hollister is the chairman of the committee.

Considerable speculation was made last week at the sudden jump in the stock of the American Waltham Watch Co. It was rumored that extensive changes were soon to be made, but this was denied at the Boston offices of the company. The annual meeting of the company will be held on March 28 and there may be something done at that time in the way of explanation of what now is not clear to the public at large.

When employes of S. Ullian, jeweler, 78 Cambridge St., West End, opened the store last Tuesday morning an unhappy discovery was made. Some time during the night previous the place was entered, presumably by means of false keys, and 65 watches were stolen. The police have been notified, but thus far no arrests have been made.

What might have proved to be a serious fire last Saturday night in the shop of Adanis & Singleton, manufacturers of diamond mountings, 383 Washington St., was prevented through the timely presence on the scene of Henry Carter, the janitor. Carter discovered a fire in progress in the charcoal bin and extinguished the flames before they had gotten under headway. Had it not been for Carter the result might have been much more serious, and as a token of their appreciation the tenants in the building raised a substantial sum of money, which was given to the faithful janitor. The cause of the fire is unknown.

Baltimore.

Arthur Wallenhorst furnished the new afternoon paper, the *Baltimore Star*, with timepieces for their building, 123 W. Baltimore St.

The new hammer for "Lord Baltimore," the City Hall bell, arrived March 23, and within a few days Baltimore's curfew will toll as of yore.

A gang of men have been at work in the dome of the City Hall the past week repairing the clock work and bell attachment. The four big clocks have been stopped for several days, while this work is in progress. Superintendent of Public Buildings Hellman expects the work will be completed this week.

The contract for a three-story store at 323 W. Lexington St. was let March 20. It is intended for a jewelry store. The whole front will be of glass and ornamental iron work, with bay windows on the ground floor. The rest of the building will be of brick and stone. The dimensions are 18 by 70 feet. Benjamin F. Spink, of New York, who has stores in New York, Washington and Baltimore, is having the building erected.

Alfred G. Clark will open a jewelry store in Dodgeville, Wis., at once.

Three Good Reasons

why you ought to lay in a line of our BARRETTES

RIGHT NOW.

BECAUSE this is the time of year when there is a demand for these goods and by pushing them you can stimulate your Spring trade.

BECAUSE, while the barrette is a novelty and is worn largely on account of its attractiveness, it is also a becoming necessity.

BECAUSE we carry an extensive assortment as to styles at uniformly moderate prices.

HENRY FREUND & BRO., The Jewelry House,

9-11-13 MAIDEN LANE, NEW YORK.

NATIONAL SELF-WINDING CLOCK
BRISTOL, CONN., U. S. A.
THE CLOCK THAT WINDS ITSELF

NATIONAL SELF-WINDING CLOCK
BRISTOL, CONN., U. S. A.
THE CLOCK THAT WINDS ITSELF

GUARANTEED

The
Clock
That
Winds
Itself.

Winds Itself and Strikes, Too.

Has a *lever* movement, with hour and half-hour strike.
Has a balance set in jewels (like a watch).
Is finished in mantel styles—and others, too.
Does NOT have to "set level" to keep going.

Is ALL inside of the case—No outside wires necessary.

Has a "contact" theoretically and practically perfect—a *sliding* "contact."

Our clocks are run by a spring electrically wound once in seven to eight minutes, thus securing the **most uniform tension possible upon the running train.**

The even tension thus maintained on the running train in our self-winding clocks makes possible a **lever movement**, capable of keeping accurate time in all varieties of clocks, and particularly in mantel and house clocks.

The batteries will run the clock from twelve to eighteen months and then can be replaced by new batteries in three to four minutes' time.

Any jeweler can take it to pieces, clean and oil it, if necessary, and put it together again with as little delay as in the cleaning of an ordinary clock.

Illustration showing movement with battery connections.

Mantel Clock. Style 2. Time and strike.
Height, 9 $\frac{5}{8}$ in. Length, 10 $\frac{1}{8}$ in.
(Eight styles now ready.)

Should any part of the movement, with ordinary usage, become disabled or worn out within two years, the company will, on application and return of the part, send a duplicate without expense to the owner. We guarantee our batteries to run the clock one year.

Full particulars and booklet sent on request.

prettiest stores of the kind in western Massachusetts.

C. King will locate at Antwerp, O.

O. K. Glumme, Whitewater, Ill., will move to Oregon, Ill.

N. W. Lickfold has opened a new store at Gadsden, Ala.

L. F. Berry, Wichita, Kan., is conducting an auction sale.

M. Hainer, McComb, Miss., will soon move into new quarters.

P. F. McCoy, Seneca, Ill., has moved to new quarters in the same town.

Greer's jewelry store at Callaway, Neb., was damaged by fire, March 14.

A. Cleaver has bought the jewelry store of E. C. Flinn, at Carroll, Ia.

C. A. Randolph, Huntsville, Tex., has renovated and improved his store.

William Weyman, Hazleton, Pa., will move to a new location in the same town.

The store in Scranton, Pa., occupied in part by Charles Eldred is being remodeled.

Edward Dolan, formerly of Port Oram, N. J., is now in business at Rockaway, N. J.

J. C. Croy, who has been located in Dahlonaga, Ga., for some time, will move to Fairmount, Ga.

A new jewelry store is to be opened at New Castle, N. J., as a branch of a Wilmington, N. J., house.

Muncie, Ind., is interested in a report that a watch factory may locate there, provided sufficient inducements are offered.

The estate of Charles H. Schiller, Utica, N. Y., remains unsettled, owing to the fact

that the Surrogate, in whose court the matter is held, has been undergoing an optical operation in New York. An early settlement is expected.

A. L. Castritius, Westerly, R. I., is supplying gold badges given to members of a local fire company for five years' service.

The Wisconsin Pearl Button Co., La Crosse, Wis., are about to double their capacity and add 50 more cutting machines.

R. A. Ball, Traverse City, Mich., has opened a repair establishment and will add a stock of jewelry in a few weeks.

A meeting of the creditors of Adolph J. Sherman, Fargo, N. Dak., was held March 14. Appraisers were appointed, but no trustees.

Joseph Neafach, manufacturer, Albany, N. Y., has filed a petition in bankruptcy with liabilities of \$1,714.88 and assets of \$185.06.

I. Crabtree, for the past year a partner in the firm of the late Ramsdell & Co., Eastport, Me., will soon open a jewelry and repair shop in that place.

Charles E. Burris will close his jewelry store in Crestline, O., and remove the stock and fixtures to Galion, O., adding them to his present store at Galion.

Isaac Traub, Niagara Falls, N. Y., has in his possession for sale a large diamond without a flaw and weighing six and a half karats. It is of a clear, fine color.

Robert Scarf, doing business as George B. Johnson & Co., Pipestone, Minn., is offering creditors 50 cents on the dollar. He has disposed of an undivided half interest in the stock of goods to J. W. Taylor, which is inventoried at \$1,200.

Frank Scott, of Pickerel Lake Township, Minn., and A. J. Hoyne, of Albert Lea, Minn., have bought the jewelry stock of the Providence Jewelry Co., of Albert Lea, and will operate the business. Their dealings will be at wholesale only.

C. A. Swanson, Wabasha, Minn., has purchased the jewelry store of C. F. Tryon, of West Superior, Wis. He will continue his store at Wabasha and has placed F. G. Ohm in charge. Mr. Ohm was formerly with Mr. Tryon, at West Superior.

Frank Haverman, charged with petit larceny of jewelry from the Happ & Marks store, at South Bend, Ind., has been sentenced to the reformatory for a term of one to three years, fined \$5 and disfranchised for two years, on a plea of guilty.

Edmund Green, 51 years old, of Pottsville, Pa., blew out his brains March 18. He was a jeweler and became despondent because he had been out of work since last October. Green was one of the best wing shots in the lower part of the county.

James W. Lewis, who for some months has been employed at Scranton, Pa., will, on April 1, open a repairing establishment at Pittston, Pa. Mr. Lewis was for many years with the late Theodore R. Staley and was also of the firm of Kirby & Lewis.

The case of William B. Jarvis, of Grand Rapids, Mich., formerly secretary and manager of the Aldine Mfg. Co., has been continued over until the next term of the United States Court, by consent. Jarvis is charged with having opened mail directed to the Grand Rapids Clock and Mantel Co., and in this way securing some of their patronage.

New Subscribers can commence at any time.

Payments for THE JEWELERS' CIRCULAR-WEEKLY, when sent by mail, should be made in a Post-Office Money Order, Bank Check or Draft, or an Express Money Order or Registered Letter. All postmasters are required to register letters whenever requested to do so.

Pay money only to authorized collectors having proper credentials.

Returning Copies. Returning your paper will not enable us to discontinue it, as we cannot find your name on our books unless your address is given.

Changing Address. In changing address always give the old as well as the new one. Your name cannot be found on our books unless this is done.

Discontinuances. We will continue to send papers until there is a specific order to stop, in connection with which all arrearages must be paid; but such an order can be given at any time, to take effect at or after the expiration of the subscription. All such orders will be promptly acknowledged by mail.

Liability. The courts have decided that all subscribers to journals are responsible until arrearages are paid in full and an order to discontinue has been received by the publisher.

THE JEWELERS' CIRCULAR-WEEKLY IN EUROPE.

Among the places in Europe where it is on file are the following:

- LONDON—First Ave. Hotel, Holborn, E. C.; Holborn Viaduct Hotel, Royal Hotel.
- PARIS—Hotel de L'Athene, Rue Scribe.

The Jewelers' League's Benefits.

THE Jewelers' League is to be congratulated on the recent decision of the Court of Appeals approving of its honest and beneficial system of protecting its members against the designs of persons who seek to take advantage of the necessities of the members. The case of Frank X. Becker illustrates the axiom that truth is often stranger than fiction. Mr. Becker became a member of The League in 1884, at which time The League was under a charter of reincorporation under Chapter 175, Laws of 1883. Up to that time it had been operating under the Benevolent Act of 1848. After the adoption of the Insurance law of 1892, The League was advised that it must change its mode of transacting its affairs or become a fraternal body in law as well as in fact. In 1895 the Legislature passed a law for the express purpose of enabling The League to reincorporate as a fraternal society, which was immediately accomplished, and its by-laws were so amended as to provide that a beneficiary must be a person having an insurable interest, and further that if the designated beneficiary should die, the executive committee should ascertain who was dependent upon the deceased member and pay the benefit moneys to such person as a gratuity on behalf of such member. Up to 1896 Becker's wife, Katie, had been named as his beneficiary. About that time he became interested in an organization known as the Anti-Semitic Association, having branches in New York, Brooklyn and Jersey City. It was decided to institute a branch in Chicago and money was sought to pay the expenses of Becker and another, who were to go to Chicago for such purpose. Conrad Hepke, of Jersey City, advanced \$300 for this purpose upon the security of Becker's certificate in The League, whereupon Hepke was designated as creditor to the extent of one-fifth and Becker's wife, Katie, was designated to the extent of the remaining four-fifths. In July, 1897, the wife died and Becker made his will giving to his daughter, Thekla M. Becker, a girl about 12 years old, all his insurance moneys. A few months later, Becker, needing more money, obtained from Hepke \$300, and upon the latter agreeing to pay future assessments of The League, Hepke was designated as sole beneficiary with the word "creditor" added to his name. Upon Becker's death, which occurred in 1898, The League determined to submit to the Supreme Court the question whether the creditor, Hepke, was entitled to the whole benefit of \$5,000, or only to the amount of his advances, \$600, with interest. Meanwhile, the guardian of the infant daughter, who was in an orphan asylum, made efforts to adjust the matter so that the little girl might receive some portion of the fund without a law suit, but Hepke strenuously insisted that he had for \$600 bought the \$5,000 benefit moneys and must have them. Under advice of its counsel, Abel Crook, The League passed a resolution that the daughter was dependent on her deceased father and should receive any surplus after payment of the amount due the creditor. It urged that it was the duty of The League to see fair play, and that it was against good morals to permit a creditor for a small

sum to secure for his own use the entire benefit moneys to the exclusion of the dependent child, and The League brought an action of interpleader to determine this question. This case was tried before Hon. Leslie W. Russell, at Special Term, in October, 1899, who sustained the position of The League in an opinion warmly commendatory of that organization. Among other things he says:

We have the case before us of a benefit certificate which for 12 years the deceased kept up for the benefit of the wife, who at his death might be left destitute with their young and helpless daughter, during which period the contributions of the deceased husband and father went to pay his share to swell the benefit funds for other widows and children. The wife dies; he soon follows her to the grave; the 12-year-old orphan daughter goes to an orphan asylum for maintenance, and the creditor claims that the benevolent fund passes to him on the theory that he did not take the certificate simply as a just creditor only asking reimbursement for his advances, but as one who bought a speculative hazard on the life of the father, and in three months thereafter becomes entitled absolutely to the whole sum of \$5,000, paying therefor at the ratio of one to eight.

In an organization like The Jewelers' League it may be very well to allow a creditor a beneficial interest in the life of the deceased. That creditor may have advanced, as Hepke partially did in this case, the very sum necessary to continue the provision for death. But here the creditor's interest ceases. The just motive is for security; the life or death of the debtor beyond this interest is to him no more than that of any one else. A stranger might as well intervene and gamble on the chance in which death became the winning hazard.

The objects of this association are undoubtedly variant from those of life insurance companies. The latter organizations may well, by skilful choice of lives and acute energy, swell capital funds far beyond the reserve necessary to protect the insured, and may well issue annuities and endowment policies as well as incidental protection for dependents upon the life of the insured. But fraternal benevolent associations limit the contributions and burdens of living associates to the sum required to provide for protection to those who need protection when the pillar of the household shall have passed away. We may well doubt whether The Jewelers' League might not justly claim that others than dependents could not demand from its funds anything beyond indemnity, and that bargains and sales of its benevolent contribution upon the chance of life were antagonistic to the whole scheme of its order.

The conclusion is that justice requires the payment of the advances of \$635, with interest; that no other part be diverted to turn a benign benefit certificate into a gambling policy of insurance; and the main portion of the fund represented by that certificate goes to the needy child, according to the will of the father and the action of The League, and thus the change of beneficiary accomplishes all it was intended for and works no injustice.

The masterly opinion of Justice Russell has now been unanimously adopted by the Court of Appeals. This decision settles the much disputed question and protects the families of the members of The Jewelers' League against the machinations of outsiders.

LETTERS TO THE EDITOR.

DISSENT FROM: OUR OMAHA CORRESPONDENT'S VIEW OF CONDITIONS IN THE WEST.

SUMPTER, Ore., March 13, 1901.

Editor THE JEWELERS' CIRCULAR-WEEKLY:

In your issue of Feb. 20, I noticed some few statements by an Omaha correspondent that represents a condition of things in the west totally different from what I, for one, have found; and in conversation

with good watchmakers of long experience I find them of the same opinion, to the effect that a different condition of things exists than this communication would lead one to believe.

This article states: "It seems strange that more men do not learn the business, etc." I would think it strange if more did, in view of the constantly increasing mania among the people for sending away for what they need in our line and constantly increasing competition, from a peanut peddler to a department store. Further on the article states: "He could find no one to take his place." No wonder; most likely that community was well supplied with catalogues from various houses in New York and Chicago, and probably any jeweler out of business knew that any farm hand could quote seven jeweled movements at \$4 to him, and ask how much better the dealer could do. Only two days ago I had such an experience, and added to this I have found small towns of 600 or 700 people with two jewelers, where one could only live and keep afloat, let alone lay by a little.

Yours respectfully,
"VIDL."

A. E. Veon, Brainerd, Minn., has moved his jewelry store to new quarters.

E. F. Mayer, Butte, Mont., has sold out to C. A. Dilger.

D. G. Gallett, Aberdeen, S. Dak., is the proud father of a new girl.

Owing to the dissolution of Erickson & Christensen, Salt Lake City, Utah, S. Erickson will continue the business.

EASTER FASHIONS.

A LADY'S RAMBLES AMONG THE JEWELERS.

Easter has brought out fine specimens of book ornamentation. Massive Bibles for the reading desk are embellished with silver in open and heavy relief work, enriched with large crystals cut in many facets and correspondingly large garnets *en cabochon*. On the center of the covers are medallions enameled in colors.

Prayer books were never prettier than at this season. Many and diverse are the colors of the leathers used. Greens range from the softest, tenderest tint of newly opening foliage to the dark, glossy, rich hue of an old ivy leaf. Blues there are, rich red-browns, tans and new soft gray tints, so that almost any costume can be matched.

A very neat finish of the season is the metal half-round binding extending nearly around the edges of the cover, or only protecting the corners. Triangular corner pieces have their usual vogue. Gold and silver seem to divide favor quite equally, as do plain and relief surfaces.

A notable departure in elaborate ornamentation, which, in some instances, nearly conceals the leather binding, is the combination of gilt and silver, parts of the design being rendered in each. One book is covered with open work of shaded silver flowers and upon the center of this rests a gold cross and the monogram I. H. S.

Another taking little book shows a blue enameled cross resting on a bed of white lilies. A pretty little affair bound in snake-skin has a slender Roman cross inlet in silver.

Prayer book markers of three or four pieces show the usual designs, but gilt seems to be the favorite coloring.

Some very swell canes will, undoubtedly, make their *début* on Easter morning. Partridge wood and rattan with a wire run through it are especially chic in the lightest and slenderest of walking sticks. These have long silver crooks, either rounded or slightly angular, in plain bright or daintily carved and gray finish. Bright silver is very much in evidence in other smart sticks of Malacca and various natural woods.

A very elegant parasol handle is in ebony surmounted by a perfect sphere of especially handsome turquoise matrix, which is tipped with a pearl.

White finished sticks and swan heads represent a new *motif* in sunshade handles. Many of the parasols are very gay and the handles correspondingly gorgeous.

The fragrant Weichsel wood with a bunch of life-like red cherries seems a perennial favorite.

Rock crystal and topaz in charming tints afford very beautiful handles. The many animal *motifs* remain in vogue. Decorated porcelain ball tops are again revived and carved and stained ivory makes a fine handle.

Writing table accessories are always popular at Easter and most taking among them is the assortment of seals. Crystal and topaz in pink or other beautiful hues form the shafts of the newest of these, which fascinate with a dainty and fragile beauty; while gilt, silver and decorated porcelain retain their place as standard styles. The plain gold surface for the engraving of the seal is either square or round and of very considerable size. An amethyst, bloodstone, carnelian or the like is often used as the stone bearing the device.

Very pretty and appropriate trinkets for Easter gifts are found in hearts cut in amethysts or some of the many kinds of topaz. These are encircled with a slender gold wire.

A golden, pink eyed hare leads the Easter procession of very tiny animal charms. The latter make a good showing in the Spring productions.

A pretty thing for presentation to a lady is a small case containing a pair of folding silver scissors, a bodkin, needle case and other useful items. Superstition may be satisfied and the ill-luck of giving anything sharp averted by exacting a penny in return.

Pleasing flasks for men are of wicker-work pattern carried out in silver.

New York Notes.

A. M. Bachrach has entered a judgment for \$737 against Herman Harris.

The Gorham Mfg. Co. have entered a judgment for \$86.70 against Arthur W. Jaffray.

A judgment for \$535.49, entered by Benedict Bros., Jan. 18, 1895, against Matt. J. Ward was satisfied last week.

The judgment for \$270.58 entered against J. Thomas Lynch, Oct. 27, 1900, by S. Leach was satisfied last week.

A judgment against the American Watchman's Time Detector Co. for \$32.15 has been entered by F. E. Driscoll.

The annual meeting of the stockholders of the Whiting Mfg. Co., silversmiths, 18th St. and Broadway, will be held at the office of the company, Wednesday, April 3, at 3 o'clock p. m.

Wallace Nowacke, of Nowacke & Co., manufacturers of shell goods, 140 W. 23d St., is advertising, pursuant to statute, that since the death of his partner, Frederick J. Etzel, he will continue the business alone under the old firm name.

Solomon Fidler, a clerk residing at 769 E. 150th St., has filed a petition in bankruptcy, with liabilities of \$947 and no assets. He was formerly in the jewelry business. Among the creditors are: Charles M. Levy, \$271; J. R. Wood & Sons, \$144; J. Sumner, \$200; A. L. Hodes, \$110.

William Dietz, living at 60 Avenue A, who is said to have been employed in the jewelry business, committed suicide early Wednesday morning on the grave of his wife in Evergreen cemetery, Brooklyn, by taking prussic acid. He was about 55 years old. His wife died last November and Dietz had been disconsolate since her death.

The first meeting of those interested in

the affairs of Isador Kantro, bankrupt, for the purpose of examining into accounts and methods of the bankrupt, was held before referee Seaman Miller, Monday afternoon. Mr. Kantro was subjected to questioning from attorneys representing the creditors and the examination was continued.

Charles Guerez, the alleged Brazilian jeweler whose many tribulations have been recorded in these columns, was convicted of burglary, before Judge Foster, in the Court of General Sessions, Wednesday, and was remanded for sentence. Guerez was recently found in a closet of a room in the Waldorf-Astoria hotel and when arrested had burglars' tools in his possession.

An interesting lecture under the auspices of the New York Society of Accountants and Bookkeepers was given last night at 117 W. 23d St. It was on the subject of "Bankruptcy Law" and was delivered by Hugo Kanzler, of the New York bar, who spoke upon the history of the bankruptcy law and the decisions of the Judges and referees on some of the most important sections of the law. A second part of the lecture will be delivered April 23, at which time Mr. Kanzler will take up and discuss the intricate subject of "Preferences."

A verdict for \$200 has been awarded to John T. Dalzell, of 413 Halsey St., Brooklyn, in his action against the Metropolitan Street Railway Co. to recover \$5,000 damages. Dalzell alleged that he entered one of the defendants' cars in Manhattan, on Oct. 25 last, with two cases of jewelry. The conductor refused to take his fare, ordering him from the car, and when he failed to obey the command one of his cases was hurled over the dashboard. Dalzell was compelled to go after it. He further alleged that he was assaulted and ejected from the car.

Harry Snowden, traveler for N. H. White & Co., died at Annapolis, Md., last Sunday night, of typhoid fever. He was buried at Baltimore, Md., Tuesday last. He was taken ill three weeks ago. Mr. Snowden was 33 years old and unmarried. He had been with N. H. White & Co. nearly two years. Previous to that time he was with the Pairpoint Corporation for three years and with Hennege-Bates Co. for six years. He had many friends in the trade, among whom he was very popular.

J. Pierpont Morgan was the donor of the Bement collection of minerals, said to be the finest in the country, given to the Museum of Natural History early this year. The identity of the giver was kept secret at the time, but the fact now comes out in a report by ex-Mayor Abram S. Hewitt, of the Board of Trustees. Mr. Morgan is also a trustee. The collection is pronounced by Mr. Hewitt to be unrivaled and added to the former gift of the Tiffany gems and pearls advances the Museum to the foremost rank among institutions of its kind.

Edgar W. Abbot, of Haviland & Abbot, importers of French china, 29 Barclay St., arrived from Europe, last week, on the *Oceanic*, suffering from an apoplectic stroke, and was removed in an ambulance to his home, 1146 Dean St., Brooklyn. Mr. Abbot sailed for Europe a month ago on the *Oceanic*, accompanied by his wife and sister. During the voyage he was stricken with apoplexy and was attended by the ship's surgeon until the vessel reached England. He was then removed to a hotel and given the best medical attention. He remained there a week and under the doctor's instructions was brought home to this country on the *Oceanic's* return voyage. He bore the voyage back comparatively well and after being removed to his home, last week,

EASTER (GLASS) VASES.

GREAT VARIETY—LARGE STOCK.

C. DORFLINGER & SONS, 36 MURRAY STREET, NEW YORK.

The Bowden Rings

ARE COMPLETE IN VARIETY, CORRECT IN QUALITY AND PERFECT IN FINISH. WE MAKE EVERY VARIETY OF FINGER RINGS.

J. B. BOWDEN & CO.,

1 Maiden Lane,

NEW YORK.

a marked improvement in his condition was noticeable.

Goldstein & Steinberg, 1960 Third Ave., are reported to have sold out.

Joseph H. Fink will leave, to-day, for Lakewood, where he will remain about a month.

The United States Smelting and Refining Works will move, about April 1, from 25 to 16 John St.

The E. Howard Clock Co., 41 Maiden Lane, have this week moved into new office quarters in the front of the building.

S. Valfer, of S. Valfer & Co., 33 Maiden Lane, who has been ill for 12 weeks, is now improving, but is still unable to attend to business.

Max Mayer was recently admitted to the firm of Bonner & Co. The firm will move, May 1, from their present quarters, 49 John St., to 51 Maiden Lane.

The Congo Diamond Co., of New York, have been incorporated with capital of \$3,000. Directors: Joseph Goldenson, David Garfinkel and M. J. Jacobus, New York.

A handsomely engrossed copy of the resolutions adopted by the Jewelers' Security Alliance, on the death of Joseph B. Bowden, will be presented to Mrs. Bowden this week.

Word was received by the Tiffany Glass and Decorating Co., recently, that the Grand Prix for blown glass has been awarded to the Tiffany Studios of New York at the National Exposition of Ceramics and Glass that has just been closed at St. Petersburg, Russia.

Deputy Sheriff Strauss has received an execution for \$739 against Harris Herman, 40 Catharine St., in favor of Abraham M. Bacharach. The Sheriff levied upon some silver ware, imitation jewelry and the safe and removed them from the store. Mr. Herman has been in the jewelry trade for about six years.

Albert Wild, importer of precious stones, 68 Nassau St., having sold his business to L. Heller & Son, 48 Maiden Lane, leaves for Germany on March 28. Through THE CIRCULAR-WEEKLY he wishes to thank all his friends in the trade for their generous patronage while he was in business in this country.

It was reported last week that the police have for four months been looking for Isador Federbush, watchmaker, 23 years old, on the charge of robbing his employer of several thousand dollars' worth of jewelry. The man wanted is said to have skipped out, Nov. 12 last, and taken the goods with him.

Benjamin F. Davis, formerly Chicago representative for Hipp, Didsheim & Bro., who was taken to Chicago by the police, on March 15, to answer to a charge of embezzling several thousand dollars, was held for examination on his arrival there. The complaint against him in Chicago placed the amount of his stealings at \$2,000 and his bonds were fixed at the same amount, but he is supposed to have stolen more than that sum.

Henry McDonald, who was for eight years shipping clerk for the Gorham Mfg. Co., 21 Maiden Lane, and who was arrested, Feb. 2, on a charge of grand larceny of \$27 received for a C. O. D. package, was sentenced to eight months in the peniten-

tiary, in the Court of General Sessions, last Thursday. It was alleged that McDonald not only took the \$27 mentioned but was responsible for other losses of a similar nature aggregating between \$300 and \$400.

Emil Rink, London agent for the Phonoharp Co. and the National Musical String Co., is coming to the United States in company with Jacques Ullman, of C. H. & J. Ullman & Co., the Paris manufacturers of musical instruments, early in April, for the purpose of selecting a few American specialties made by firms in the United States and not yet properly represented there. The lines he has in mind include specialties in the fancy and toy trade, including American games, bronzes, clocks, watches, household goods, tools, etc. His visit will be brief. Communications addressed care of the *Music Trade Review*, 3 E. 14th St., New York, will be handed to Mr. Rink when he reaches this city.

Marcus Stern, 48 Maiden Lane, caused the arrest of Joseph Weening, who repairs and deals in diamonds at 36 John St., on the charge of petit larceny. Mr. Stern claimed that Mr. Weening received three small diamonds from him to repair and returned only two of the three, retaining one of the value of about \$17. Mr. Weening claimed that Mr. Stern's boy called for and received one diamond and that he returned the other two through his clerk at Mr. Stern's place of business. The case was tried before the Court of Special Sessions, Judges Jacobs, Hinsdale and Holbrook presiding. Mr. Weening was defended by Sol. & Benj. Oppenheimer, 320 Broadway. The Court dismissed the charge against Mr. Weening and he was honorably discharged. Mr. Weening will now sue Mr. Stern through his lawyers to recover damages for false imprisonment and malicious prosecution.

The death occurred at 5 o'clock A.M., Saturday, of Thomas E. Willson, the father of T. Edgar Willson, for several years New York reporter and city editor of this journal. Deceased was 56 years of age and in many ways was a remarkable man. He was librarian of the New York *World* and possessed a grasp upon facts that made him a ready encyclopedia for knowledge of wide range. He joined the staff of the *World* in 1869 and held since various positions of trust and responsibility. Of a high order of intellectuality and possessed of a wonderful memory, he was, as a magazine contributor and statistician on the most abstruse subjects, widely known and respected. Mr. Willson entered the navy during the Civil War and was discharged with the rank of lieutenant. He was a member of the Reform Club and one of the starters of the single tax movement. He leaves his wife, his son, T. Edgar, and two daughters.

A well dressed man entered the store of S. T. Ryan, 706 Eighth Ave., and asked to be shown some diamond rings which were on a tray in the window. The wife of the proprietor placed the tray on the counter and the man, selecting one, asked its price. The woman put the tray back in the show case and then went to the rear of the store, where her husband was at work, to ascertain the price of the

jewel. While the woman's back was turned the man jumped over the counter and, securing the tray of precious stones, jumped back again and fled through the door. Ryan and his wife, who had heard the bell on the door ring, jumped to their feet and started after the man. He, holding the tray in his hand, ran up Eighth Ave. to 46th St., followed by a large crowd, including two detectives. The man suddenly ran into a hall and disappeared. Ryan estimates the value of the stolen gems at about \$1,500.

Charles Ludwin, a dealer in jewelry, furniture and clothing on the instalment plan, was arrested Thursday in a suit brought by Antonio Guido, 1755 Third Ave., to recover \$2,000 for alleged false imprisonment. He gave bail and was released. The plaintiff had a clerk, Frank Calo, who in August, 1899, bought a gold chain of Ludwin for \$22, which was to be paid for at the rate of 22 cents a week. After he had paid one instalment he was taken to the hospital, where he has since been. Ludwin, according to the papers, last Summer brought a suit in which he declared that Guido and Calo were responsible for the payments of the instalments and had converted the chain to their own uses. As the summons was not served on Guido and as Calo did not appear judgment was granted by default. Guido, in an affidavit, says that City Marshal Albert M. Hengerman on Sept. 1, 1900, insisted on arresting him on an execution against him in the Ludwin case. Guido was locked up for a night and the greater part of a day before he obtained his release.

Mayor Van Wyck, March 18, gave a hearing on the bill recently passed by the New York Senate and Assembly, which forbids body executions to be issued on judgments for less than \$25. This bill has been of vital importance to the instalment trade and has been fought strenuously by the instalment dealers, who claim that if it should become a law they would be swindled by many of their customers, over whom they could not hold the threat of incarceration in jail. The hearing was attended by several hundred people, among whom were represented a large proportion of the instalment jewelry houses and a number of dealers who sell to them. Among those who spoke against the bill were Councilman Leo M. Harburger, who claimed that it was not constitutional and that it would drive many small dealers and peddlers out of business. Peter B. Olney, on behalf of those opposed to the bill, presented a petition against it which was signed by a thousand wholesale merchants, among whom were many watch, watch case and jewelry manufacturers, diamond importers and other members of the jewelry trade, who supply the instalment houses. This petition asked the Mayor to veto the measure. Assemblyman Leo Sanders, who is the father of the bill, spoke in its favor, and asked the Mayor to approve it, telling him that the abuses which had grown out of the instalment trade had made necessary such a measure, and that it was done to stop the outrages which, under the cloak of these instalment contracts, had been going on for some time. After the hearing Mayor Van Wyck reserved his decision.

D. Goldschmidt & Bro., 472 Third Ave., have dissolved partnership. D. Goldschmidt will continue at the old store. S. Goldschmidt has opened a new store at 259 Third Ave.

A news dispatch from Washington, D. C., says that James E. Malone, a jewelry salesman who gives his business address as 253 Church St., New York, complained to the police there Sunday morning that a satchel containing jewelry samples worth \$450 had been stolen from him. Mr. Malone was registered at the St. James hotel, where he arrived at noon, Saturday. He missed the satchel Sunday morning.

Ludwig Limpert, 21 years old, and his brother, Carl, 33 years old, were arraigned, last week, before Magistrate Zeller, in the Morrisiana Police Court, charged by Sussfeld, Lorsch & Co., 37 Maiden Lane, with having stolen goods from the latter's establishment to the value of \$1,000. The younger brother, who has been in the employ of Sussfeld, Lorsch & Co. for five years, admitted that for a year past he has been robbing his employers of opera glasses, which his brother Carl, who has been out of work for a long time, pawned in places all over the city. The mother of the young men has been ill for many months, and it is said that it was to buy her delicacies that Ludwig committed the robberies. The younger brother was released on bail, but the elder was held.

The store of William J. Hinman, Oneida, N. Y., was damaged by fire last week.

M. Scooler, New Orleans, La., writes to THE CIRCULAR-WEEKLY that he lost nothing from the operations of a man named Austin, who secured jewelry with a bogus check, as mentioned in these columns last week. It appears that the man was introduced to the firm by a reliable New Orleans business man, who, on learning that he had made an error, adjusted matters so that Mr. Scooler lost nothing.

Inspector Boardman, of Washington, D. C., has received a communication from Vienna, Austria, giving a description of the jewelry, valued at \$25,000, which was taken from C. A. Waff, who was arrested in that city several weeks ago upon his arrival from New York. When the news of the arrest at Vienna was received, it was believed to be possible that some of the jewelry mentioned had been stolen at the time several second-story robberies were committed. On this account the Vienna authorities were cabled and the answer was received a few days ago. Inspector Boardman is satisfied that the jewelry was not taken from Washington.

Last Week's New York Arrivals.

THE CIRCULAR-WEEKLY has perfected arrangements for obtaining the names and hotel addresses of all the latest buyers visiting New York, and each day posts in its office, 11 John St., cor. Broadway, a bulletin which every member of the trade is cordially invited to copy.

Dun & Co., \$183; Day, Clark & Co., \$106; Daggett & Clap Co.,

\$4,322; Eisler & Laubhein, \$732; Ehrlich & Sinnock, \$986; J. M. Fisher & Co., \$523; Fontneau & Cook, \$235; Fowler Bros., \$409; E. I. Franklin & Co., \$427; R. L. & M. Friedlander, \$202; Gorham Mfg. Co., \$483; T. F. Gregg, \$226; Gardner & Steinheuer, \$132; R. L. Griffith & Son Co., \$130; J. A. & S. W. Granbery, \$110; W. C. Greene & Co., \$396; Hampden Watch Co., \$766; Hoagland & Co., \$109; Hebbard & Co., \$352; A. J. Hedges & Co., \$140; Harvard Button Co., \$130; Hamilton & Hamilton, Jr., \$494; Walter E. Hayward, \$935; Hodenpyl & Sons, \$2,219; J. T. Inman & Co., \$294; J. W. Johnson, \$470; Jeannette Jewelry Co., \$474; Julius King Optical Co., \$139; A. J. Kahn & Co., \$1,877; Larter, Eleox & Co., \$114; S. & B. Lederer Co., \$106; C. A. Marsh & Co., \$1,395; Manhattan Cut Glass Co., \$275; David Mayer, \$301; H. D. Merritt & Co., \$495; Marble, Smith & Forrester, \$1,721; Moore & Co., \$2,554; S. C. Powell, \$221; Peckham Seamless Ring Mfg. Co., \$389; Plainville Stock Co., \$3,681; E. A. Potter & Co., \$1,330; Reed & Barton, \$201; Jules Racine Co., \$683; Reeves & Browne, \$409; J. F. Sturdy's Sons, \$1,833; R. F. Simmons Co., \$250; B. L. Strasburger & Co., \$3,720; Schultze, Leiss & Co., \$868; Schmitz, Moore & Co., \$581; Simons, Bro. & Co., \$875; C. Sydney Smith, \$456; Smith & Crosby, \$660; George L. Vose Mfg. Co., \$841; J. J. White, \$415; Leo Wormser, \$468; C. F. Wood & Co., \$217; Waterbury Clock Co., \$235; Waite, Mathewson & Co., \$543; Ziruth & Moore, \$104; Ziruth, Kaiser Co., \$457; William Smith & Co., \$634; W. C. Edge Co., \$197; Fuller, Carpenter & Co., \$123; The Bristol Mfg. Co., \$141; Sandland, Capron & Co., \$303.

An order for the sale of the property of J. T. Scott & Co., by the receiver, was signed by Judge Brown, in the United States District Court, Thursday.

The property may be inspected at 4 Maiden Lane. Bids for the stock and fixtures will be received by receiver Walter P. Long, at 4 Maiden Lane, until March 29. Bids will be opened in the United States District Court, March 30, at 10:30 o'clock A.M. In case no bid is satisfactory the stock and fixtures will be sold at public auction, April 2.

There was a hearing before United States Commissioner Alexander, Friday, in which matters connected with the failure of J. T. Scott & Co. were gone into by interested parties. The creditors endeavored to bring out and prove that Mrs. Scott, mother of the head of the company, was a liable partner, as well as Mr. Scott and William P. Wallace. This matter remained undetermined at the close of the hearing, which was continued until yesterday forenoon, when it was again continued until to-morrow afternoon at 2 o'clock.

Death of H. M. Smith.

H. M. Smith, well known to the trade as the founder of H. M. Smith & Co., New York, died recently at New Haven, Conn., after an illness of several weeks. Death was due to paralysis and head trouble of long standing. He was over 73 years old and had been in the pen business for nearly 50 years. About 1865 he established the business that bears his name, making gold pens. When fountain pens were introduced he took them up and has represented his own and other firms ever since. He was a valued member of the travelers' staff of the L. E. Waterman Co., and at various times was connected with other firms. He was the first man to offer the Paul E. Wirt pen on the road, his house making an early specialty of this pen. In 1896 he retired from his business and took up traveling again, and it was on his last trip on the road that he was stricken with his fatal illness, although he had been a sufferer for some months. Last year he visited Europe, returning to the road as soon as he came back. He was buried at Asheville, Conn., his birthplace, or his "native heath," as he was wont to call it. He leaves a widow.

Recently Organized Suffolk Watch Co. Buy a Waltham Factory.

WALTHAM, Mass., March 25.—The Columbia Watch factory has been sold to a new company recently organized and to be known as the Suffolk Watch Co. The officers are: President, Morton Crehore; secretary and general manager, Renton Whidden; treasurer, Stephen Whidden.

Burglars Caught in the Act with Plunder.

BETHLEHEM, Pa., March 22.—While engaged in robbing the jewelry store of Thomas A. Milchsack, last night, Erwin Wright and another man were surprised by a policeman. Wright was captured with a large and valuable quantity of goods. Both are sons of respectable residents, are married and have families.

The aged father of Hector Lamont, Jr., Duluth, Minn., died of old age at the home of his son lately. Mr. Lamont, Sr., was 80 years of age.

McAllister, Irons & Russell; H. W. Van Houten, for C. Sydney Smith; Mr. Dorrance, Simons, Bro. & Co.; Mr. Krugler, the H. A. Kirby Co.

Traveling salesmen who visited Boston, Mass., last week included: Charles S. Isabel, Arnstein Bros. & Co.; Mr. Kaiser, David Kaiser & Co.; Mr. Stern, Stern Bros. & Co.; Charles Orcutt, Chester Billings & Son; Jack Townsend, Neresheimer & Co.; Alex. Chase, A. Ludeke & Co.; Mr. Mayer, J. Heilbronn & S. Marchand; Mr. Nordlinger, L. & M. Kahn & Co.; Alphonse Kahn; Ralph Lewis, Durlach Bros.; Mr. Peck, the Waite, Thresher Co.; E. L. Spencer, E. L. Spencer & Co.; T. G. Frothingham, Jr., T. G. Frothingham & Co.; H. F. Barrows, Jr., H. F. Barrows & Co.; T. B. Wilcox, The Pairpoint Corporation; H. W. Beach, the International Silver Co.; Ed. Simons, Simons, Bro. & Co.; Frank H. Hadden, the John Russell Cutlery Co.; George H. Howland, Kleinschmidt, Howland & Co.; Leo Goldsmith; Walter E. Hayward; E. H. Colby, the Towle Mfg. Co.; J. Arthur Cope, Rogers, Smith & Co.; E. Eckfeldt, Eckfeldt & Ackley; William Jones, Jones & Woodland; Wallace Franklin, E. I. Franklin & Co.; Wallace Campbell, Day, Clark & Co.; Harry Hayes, the Howard Sterling Co.; Mr. Elting, Jung, Staiger & Klitz; H. B. Beach, Jr., and Mr. Petingill, the International Silver Co.; Mr. Whiteside, N. E. Whiteside & Co.

Travelers in Pittsburgh, Pa., recently included: Leo A. Heilborn, Coddling & Heilborn Co.; Mr. Sylvia, The Pairpoint Corporation; H. D. Meyer, A. J. Hedges & Co.; E. A. Reed, Reed & Barton; S. E. Coggins, Towle Mfg. Co.; Walter S. Strauss, Jacob Strauss & Sons; S. H. Fink, Fink, Bodenheimer & Co.; H. L. Sherman, Simpson, Hall, Miller & Co.; Leo Henle, Sussfeld, Lorsch & Co.; A. Kiersky, A. L. Reed Co.; L. E. Smith, M. B. Bryant & Co.; E. Lange, P. W. Lambert & Co.; E. F. Tyler, Edward Todd & Co.; J. F. Dean, Reed & Barton; A. W. Levy, Byron L. Strasburger & Co.; W. H. Race, International Silver Co.; Frank E. Whitmarsh, Alvin Mfg. Co.; Mr. Bliss, Kremenetz & Co.; D. Skutch, New Haven Clock Co.; Fred. Clarkson, Albert Lorsch & Co.; Frank C. Beckwith, Joseph Fahys & Co.; J. Fred.

DOVER SAYS

in the manufacturing of Jewelry, Decorative Metal Wares, Belt Buckles or any commodity that requires metal ornamentation of any kind whatsoever, the degree of success to be attained is eventually determined upon **ability to assemble integral parts** in such a manner as will **arrest the attention of the buyer**. This accomplished, the balance of the transaction becomes simply a matter of routine merchandising.

The unsophisticated manufacturer of other days called these small parts "**Jewelers' Findings**;" a portion of our big sign on the front of our building calls them "**Jewelry Components**." The correctness of the word with which to describe the meaning is not paramount in this advertisement, the essential feature being to impress upon the public the fact that the **integral parts** made by **George W. Dover** are an **indispensable feature** to the carrying on of a **successful manufacturing business enterprise**.

GEO. W. DOVER,

80 Clifford St., Providence, R. I.

P. S.—Compound a few of Dover's integral parts with yours and **watch** their effulgent growth.

Crane, Mandeville, Carrow & Crane; W. R. Shute, Jones & Woodland; H. J. Fink, James Kahn's Sons; E. C. Stone, Battin & Co.; Mr. Hodgins, Farrant & Gismond; C. B. Bartlett, Whiting Mfg. Co.; C. P. Elliot, Maintien Bros. & Elliot; D. Schwab, Ciner & Seelman; Mr. Williams, Arnold & Steere; Fred. J. Foster, Unger Bros.; Mr. Somes, S. O. Bigney & Co.; James O. Otis, Harvey & Otis.

The Cincinnati traveling men who returned home last week to stock up were: William Pfeleger and John Osthoff, of Joseph Noterman & Co.; Mr. Bene, of Bene, Lindenberg Co.; Julius Hahn, of Henry Hahn & Co.; A. Herman, of Herman & Loeb; Joseph Mehmert; Ely Gutmann, of L. Gutmann & Sons.

A substation of the Syracuse, N. Y., post office is to be located in the store of F. J. Hollister.

A runaway smashed the show window and damaged the building of H. J. Graham, Central Falls, R. I.

Canada Notes.

Ferdinand Hogue & Co., Montreal, have assigned and have been sold out.

James H. Roseborough, jeweler, Dauphin, Man., is advertising his business for sale.

D. Beatty, Montreal, has been making his usual purchasing trips to New York and Boston.

Howard G. Armstrong, jeweler, Lucknow, Ont., has given a renewal bill of sale to W. A. Armstrong for \$1,100.

On the 17th inst. the office staff of the Toronto Silver Plate Co., Toronto, presented a handsome gold locket, suitably engraved, to William N. Petch on his leaving the service of the company.

The premises of J. & B. C. Silver, jewelry jobbers, St. Paul St., Montreal, were

broken into recently by youthful thieves and a quantity of jewelry was stolen. The youths were caught—three of them—and sentenced to three years in the reformatory.

William A. Rogers, Limited, the joint stock company just organized for acquiring the businesses of W. A. Rogers, of New York, and the Niagara Silver Co., have issued \$600,000 of preference stock, bearing 7 per cent. interest, cumulative, \$290,000 of which is being offered to the public in Toronto at par by A. E. Ames & Co. The subscription books were opened on the 25th inst.

R. A. Dickson & Co., Montreal, are holding an auction sale of their entire stock of diamonds, watches, jewelry, sterling silver ware, etc. This is the most gigantic sale ever contemplated in the trade of that city and it is feared will demoralize the usual course of business for some time to come. The sale commenced on Saturday afternoon and will continue every afternoon and evening until the goods are all disposed of.

Benjamin Chapman, jeweler, 261 Yonge St., Toronto, died at the General hospital on the 17th inst., in his 66th year. He had been under treatment at the hospital for heart trouble for two weeks prior to his death. The deceased was a well known citizen and had been in business for many years, at one time taking an active part in trade movements. He was for 30 years a member of the Irish Protestant Benevolent Society. The funeral, which took place on the 19th to Mount Pleasant cemetery, was largely attended, among the many floral tributes being a pillow sent by the clerks of Rylie Bros.

A bill dealing with the trading stamp evil has been introduced into the Ontario Legislature by George A. Graham, M. P. P. for Brockville. It is very brief and simple in its provisions and provides for local option by empowering the Councils of cities, towns and villages to pass by-laws for prohibiting the giving, selling and receiving of trading stamps, coupons, or other similar devices, and for prohibiting the giving, selling or dealing therewith by any person, firm or corporation engaged in trade or business; and for imposing fines on persons, firms and corporations infringing such by-laws; and for levying the same by distress and sale of the goods and chattels of the offender; and for the imprisonment of such offenders for any term not exceeding one month. The bill has received a second reading and will be considered in committee next week.

Charles Lavallee, a jeweler who lived with his family on Sanguinet St., Montreal, has disappeared entirely since Sept. 25 last. Despite the notices and photographs which have appeared in the city papers no trace of the missing man has been discovered. He left Montreal on the date mentioned to go to see some friends in New York and he has neither been seen nor heard from since. Mrs. Lavallee is most distressed. She has been able by teaching music and with the kindness of friends to maintain her children and keep up the payment on her husband's life insurance. If she could learn of his whereabouts, whether dead or alive, she would be much relieved. She gives the following descrip-

HOWARD STERLING COMPANY, SILVERSMITHS,

PROVIDENCE, R. I., U. S. A.
NEW YORK, 860 BROADWAY, Samples only.

PROVIDENCE, R. I., March 12, 1901.

I have this day been appointed Receiver of Howard Sterling Company, and by order of court am authorized to continue the business of the company as heretofore.

I shall therefore continue to run such business, and will take and fill orders as promptly as the company has heretofore done. The same salesmen who have heretofore represented the company will call upon you for your orders.

Thanking you in advance for a continuance of past favors, and promising prompt attention to all orders given, I am,

Very truly yours,

BIRNEY C. PARSONS,

As Receiver of Howard Sterling Company.

tion of her missing husband: He is of dark complexion, wore a heavy dark moustache, with hair and eyebrows also dark. Sometimes he wore a beard. He had a very nervous manner. He was five feet four or five inches in height, and had an operation mark on the instep of one foot; also a scar about two inches long on one arm. He is 35 years of age.

Albert R. Carr, jeweler, Sydney, N. S., has had a writ issued against him by J. Carr for \$1,704.

E. C. Fitch, president of the American Waltham Watch Co., is shortly expected back from Italy.

A. R. Harmon, of the American Waltham Watch Co., has returned to Montreal from Boston.

R. N. Scott & Co., jobbers, Montreal, have arranged with their creditors and are again carrying on business at their old stand, McGill St.

C. H. White, formerly of Charlotte-town, P. E. I. has entered into partnership with Frederick Lighter, Glace Bay, C. B., and will carry on a jewelry business.

H. A. Hattie, who has been carrying on the business of manufacturing jewelry at Yarmouth, N. S., for some time, has, owing to ill health, assigned and will return to his home at Truro.

Private A. Hannaford, late of the Royal Canadians, was presented, last Saturday afternoon, with a handsome gold watch charm by his fellow employes at R. Hemsley's jewelry factory, Montreal.

Buffalo, N. Y.

Charles Kramer, 20 years old, was fined \$25 in the police court, March 19, on the charge of petit larceny. Kramer is an employe of Heintz Bros. A few days ago the firm missed a bar of gold worth, it is said, \$200. It was discovered concealed in the basement of the establishment. Suspicion fell on Kramer, and Otto Heintz, a member of the firm, swore out a warrant for his arrest. Kramer said he had no intention of stealing the gold. The fine was paid by his parents.

Charles McClellan, Arthur Long and Charles Green, who were concerned in the robbery from J. Faber's jewelry store on

Jan. 22, are awaiting sentence. The thieves were captured in Toronto, a few weeks ago. Green pleaded guilty and McClellan and Long were convicted after trial.

Trenton, N. J.

A. L. Williams left last Saturday for New York city, to take a Clyde line steamer for Cuba. Mr. Williams's trip will be absolutely for pleasure and he expects to be gone about three weeks.

The Trenton Watch Co., at a recent meeting, elected the following directors: John Moses, Barclay L. Stokes, Lawrence Farrell, James Moses, O. O. Bowman, T. R. White, Jr., and A. G. Moses. It was stated at the meeting that the company had cleared \$15,000 over the profits of last year. A decision was reached to make an addition to the works costing \$10,000. This will double the capacity of the plant. At present over 300 watches are being turned out daily and it is desired to make this number 600. There is a big demand for all the goods that can be produced. Orders are now on hand that it will take several months to fill.

Denver.

Louis Adler, of L. Adler & Son, was in Denver last week.

Philip H. Doll, East Las Vegas, N. M., was in Denver last week.

John Birrer, this city, has opened a repair shop at 424 Central block, Pueblo.

T. J. Lewis, of the Lewis Jewelers' Supply Co., is on a two weeks' trip on business at El Paso, Tex.

Colonel J. D. Lewis, jewelry auctioneer, has gone to Laramie, Wyo., to conduct an auction for William Manassee.

Charles Roth has closed out his store in Leadville and returned to Denver. He has not yet decided where he will locate.

Eugene Kreider, formerly of this city, has gone to Rocky Ford, Col., where he has opened a store in the Opera House Pharmacy.

E. L. Peisar, Aspen, Col., who several weeks ago started for the Pacific coast, intending to extend his trip to the Hawaiian Islands, spent his time at Los Angeles and has returned to Aspen greatly improved in health.

A Special Feature

of **BELL GOLD - FILLED WATCH CASES** and one that you will find of considerable help in making sales is the special engraving of any emblem, monogram, portrait or design your customer may desire. You can have this done at short notice and at little expense and please your customer by giving him just what he wants. He will then do some good advertising for you by talking to his friends about his purchase. Try it and see if it doesn't work greatly to your advantage.

The "Bell Special" Gold-Filled Watch Cases are 10 dwt. standard and are the only filled cases made with the quality and quantity of gold stamped in the cases.

PHOTOGRAPHS OF MEN.

ONE of the traditions of photography is that men always want to look like some one else. So they hook you up with a high check and martingales, and tell you to throw out your chest, to make you look like John Drew or Hackett.

I am one of the people who can't get over the isness of the is—and the way that simple, manly, characteristic pictures sell proves that the tradition is a fallacy.

Providence, R. I.

Trade Gossip.

Nordlinger & Mamluck, dealers in precious and imitation stones, Providence and New York, are circulating a novel souvenir in the shape of heavy lead pencils, a foot in length, colored in red, white and blue and stamped in silver with the name of the firm.

In the item regarding the Buffalo rings, which appeared in THE CIRCULAR-WEEKLY last week, an error was made regarding the price of the rings, which is \$12 a dozen wholesale. The rings, which are protected by patent, have been in great demand on account of the rapid growth of the order by which they are largely used.

Frank Herschede, 24 E. 4th St., Cincinnati, O., is acquiring new customers daily for his elegant hall clocks. Inquiries come in every day for his catalogue and sales usually result from applications. He covers the whole country, selling in New England as well as in California. The hall clock is becoming a feature now with leading jewelers in small towns as well as large ones who can hold big customers.

The Simeon L. & Geo. H. Rogers Co., Hartford, Conn., have just issued Catalogue No. 2 illustrating their electro-silver plated table ware. The book, which contains 56 pages, is fully illustrated with the different pieces of the large number of patterns made by this company, and has the price of each article conveniently arranged for quick reference. Any jeweler who has not received a copy of the catalogue should not fail to write for one.

Fairchild & Johnson Co. will remove about April 15 from their present quarters, 220 Fourth Ave., New York, to the new Parker building, 225-233 Fourth Ave., corner 19th St., where the factory and office will be located. The change was necessitated by the rapid growth of the business, which compelled the com-

pany to seek larger factory space. Their new quarters will give them more than double the floor space now occupied. Their new Spring designs in gold and silver pencils and pencil holders are now being shown, many of them being entirely different from anything heretofore produced.

The American Waltham Watch Co. have completed their illustrated catalogue of Waltham mainsprings. For ease of reference, the arrangement of the catalogue is particularly noteworthy. Each movement is illustrated in connection with a cut showing the style of the spring to be used with it and its size; and the description of the movement, its name, the fastening, the length of the spring in inches, its average width and strength according to the Den-nison gauge; illustrations showing the diameter and width of the barrel, its number and the number of its teeth, if any, are all given. Much interesting matter relative to mainspring gauges and the method of measuring mainsprings will be found in the catalogue.

Reed & Barton have issued one of the handsomest catalogues received by the trade, illustrating a single pattern of silver. The book illustrates "Les Cinq Fleurs," which is described as "A recent creation of rare beauty in flat ware." The name of the pattern, which means "The Five Flowers," is derived from the fact that the designer has selected the wild rose, the peony, the poppy, the orchid and the fleur-de-lis as a *motif*. The use of the purely floral decoration, which lends itself to much elaboration, results in a pattern of great beauty and elegance. The catalogue, which shows, in exquisite half tone cuts, the designs, the sizes and shapes of the various pieces, is printed in two colors and is one of the best productions of one of New York's most artistic printers. Jewelers who have not received a copy should send for one at the earliest opportunity.

A Pan-American Guide.

The New York Central Railroad's "Four-track Series" has been enriched by a new issue, No. 15 of the series. This is devoted in part to a description of the Pan-American Express, the new train which leaves New York every day in the year at 8 p. m., arriving at Buffalo at 7.25 o'clock the next morning. The folder is profusely illustrated with views of the Pan-American Exposition, and contains a map of the United States and Canada.

The cover of the folder has a good picture of the electric tower in colors, and among the pictures in black and white are the New York State building, the United States Government building and many of the most striking sculptural features. It gives a good description of the aims and objects of the undertaking and will be valuable as a guide book to those who visit the place.—*New York Tribune.*

A copy of No. 15 of the New York Central's "Four-track Series" will be sent free, postpaid, to any address in the world on receipt of a postage stamp of any country on the globe, by George H. Daniels, General Passenger Agent, Grand Central Station, New York.—*Adv.*

Chicago Notes.

All communications in reference to the Chicago department of The Jewelers' Circular-Weekly, addressed to Stephen Parlin, 134 Van Buren St., Room 414, Chicago, will receive prompt attention.

B. Schuette is on a business visit to his Minneapolis house.

E. B. Leckey, Eagle Grove, Ia., was in last week making purchases.

C. H. Cole, Sandwich, Ill., was in last week making a few necessary purchases.

F. Bosecker, Guttenberg, Ia., is in town looking after Chicago property in which he is interested.

Frankenberg Bros. & Newman, Bisbee, Ariz., were among those who placed good orders here the past week.

Letters from A. W. Frazee, Rockford, Ia., state that he has purchased the jewelry interests of E. R. Bartz, that place.

Mr. Petersen, of Petersen & Christensen, Randall, Ia., who were recently burned out, was in town last week making selections.

Among the visitors of the week was Mr. Garring, of Peck & Garring, Denison, Tex. The firm are about to hold an auction.

T. Zurbrugg spent a couple of days in Chicago last week with Mr. Davidson at the Chicago office of the Philadelphia Watch Case Co.

George E. Mosiman, who has been connected with his brother, E. E. Mosiman, in business at Bluffton, Ind., for 15 years, was among the buyers in town last week.

J. B. Crawford, who was laid up with inflammatory rheumatism while visiting an uncle at Algonquin, Ill., is again on the road for J. H. Purdy & Co. and sending in orders.

Painters and decorators were busy at the Towle Mfg. Co.'s salesroom last week and as a result the room, always the most homelike, has put on an added brightness.

B. Mercil & Sons' Plating Co., of Chicago, have incorporated with a capital stock of \$2,000, for the manufacturing and dealing in solid and plated wares. Incorporators: Benoni Mercil, Emil A. Basener, Frederick Z. McClory.

Bert B. Case, Mountain Home, Ark., after completing a course of optics at St. Louis, has decided to leave Mountain Home and open a store at Comanche, I. T., where he says he will remain "for life."

Martin E. Meyer, in charge of the Chicago branch of the J. D. Bergen Co., reports

trade excellent in this line and that the new patterns are taking well. In the leather goods line of J. C. Hacker, also handled by Mr. Meyer, things could not be better.

David G. Geary, traveling salesman for Hermann & Co., 1018 Masonic Temple, died at the Nicolle hotel, Minneapolis, Minn., Saturday, after a short illness. He was 28 years old and had been with Hermann & Co. 14 years.

Finlay M. Drummond, cashier for the Towle Mfg. Co., left Tuesday last for San Francisco, whence he will sail, March 27, for his home at Gisborne, N. Z. Mr. Drummond will be gone five months, returning by way of India, Suez Canal and England, and also visiting his ancestral country—Scotland.

R. M. Powers, for 12 years with the Chicago office of the New Haven Clock Co., has accepted a road position with George Greenzweig & Co., jobbers, San Francisco, and will represent them on the coast. He left Tuesday for his new duties with the best wishes of his many Chicago friends.

An interesting feature of the regular monthly meeting of the American Horological Society, held Thursday evening, was an address by Theo. Gribi on "Some Features of the Lever Escapement." While of a technical nature, Mr. Gribi handled his subject in a way most interesting to the practical watchmakers present.

A thief threw a brick through the show window of P. H. Anderson's jewelry store, 15 Milton Ave., the afternoon of March 18, and secured four watch cases, valued at \$14. At the time of the incident people were passing along the street, but the thief was so quick that the window was broken, the watch cases taken and the escape secured before even those in the store knew what had happened.

Stevens, Wallace & Co., 96 State St., are in financial difficulties. A judgment for \$1,525 has been confessed to Charles W. Hubbard. It is claimed that the stock has been sold to Daniel I. Murray, auctioneer. An auction sale is now going on and creditors are likely to receive 50 to 75 cents on the dollar. The firm's liabilities are placed at \$3,400 on notes, \$4,000 for merchandise and \$1,500 for rent; a total of \$8,900.

Information was received from Kansas City early Friday morning that George Haight and William Leavitt were arrested there while trying to dispose of a satchel filled with jewelry valued at \$2,500. Haight, it is said, confessed to the police that he had been an employe of Otto Young & Co., Chicago, and had systematically robbed the

firm for months, until he got the collection which he was trying to sell. Leavitt refused to talk. A man named Haight was employed a couple of months in the optical department of Otto Young & Co.

What is said to be a fraud in bankruptcy proceedings, which may result in indictments, has been discovered by examination into the affairs of Jacobs & Goldman, formerly engaged in the jewelry business in the Medinah Temple. The information brought out at the hearings before Referee in Bankruptcy Eastman is said to involve the junior partner of the firm in a plot to defraud David Jacobs and a number of creditors. A few days ago \$1,500 worth of missing jewelry was found in a trunk at 25 Carpenter St., this being the home of Abraham Marks, brother-in-law of Goldman. His story implicated Morris Goldman, a brother, and Harry Goldman, a nephew of the jeweler.

About the middle of the year J. H. Purdy & Co. received an importation of jewels made of agate and used for compasses and marine clocks. The tariff law places a duty of 10 per cent. ad valorem on jewels for watches and clocks, while on manufactures of agate a duty of 50 per cent. ad valorem is imposed. The firm paid the 50 per cent. duty under protest. The General Board of Appraisers at New York have rendered a decision that the jewels, being made of agate, will come under the 50 per cent. duty, whereas if they had been manufactured from garnet they would have come under the 10 per cent. The decision was received here last week. The invoice was accompanied by an invoice of clock pallet jewels and a refund was allowed on these, but not on the other jewels used for clocks and compasses.

Buying stolen property is charged against Jacob Wolf, jeweler, 147 E. 31st St. Wolf claims distinction by reason of having killed a robber a year ago. He was arrested last week on a warrant sworn out by Mrs. Mary M. Morgan. She says her son Harry, 12 years old, has been selling the family jewels to Wolf at worse than fire-sale prices. A \$40 ring for \$1, a \$20 pin for 35 cents and a \$10 pin for 25 cents are among the lot she mentions. She says she has been missing her jewels one by one and suspected that her boy knew something about their disappearance. The boy finally agreed to tell her where they were on condition that he would not be punished. He then said that he had disposed of the stolen articles to Wolf and spent the money with his boy friends. Wolf furnished bail. He avers that he had not the slightest idea the stuff was stolen.

Cincinnati.

I. N. Pollack, Ashland, Ky., was last week in town buying goods.

Louis J. Hendricks, manager of the Jewelers' Co., is out on a trip this week.

Ely Gutmann, of L. Gutmann & Sons, has returned from a very prosperous trip.

S. C. Citroen, diamond cutter, has been adding improvements for facilitating his business.

The Miller Jewelry Co. will move into their new quarters April 1. They are now remodeling them.

The eastern men in town last week complained of bad business. The jobbers are also complaining of dull trade.

Oscar Trounstone, of Theodore Neuhaus & Co., has returned from Asheville, N. C., where he had been the past month.

The bookkeeper of Lusky & Lowenheim, Nashville, Tenn., accidentally shot himself in his hand, last week, while removing a revolver from his desk.

Gebhardt Bros., manufacturing jewelers, have their new pin fastener at the Patent Office and as soon as they have received the letters patent they will put it on the market.

Victor Bogaert, Lexington, Ky., passed through Cincinnati en route to Europe to get married. He will return in June, bringing his bride and his two boys whom he took over to France last Summer, after his wife died.

Ira C. Werner, a wholesale jeweler of Milwaukee, Wis., was married in Cincinnati last week to Mrs. Fanny Davy. Mrs. Davy recently came into possession of a large fortune and her family wanted her to marry another man, but she preferred Mr. Werner.

St. Louis.

The Gould Electrical Protective Co. last week bought out the Holmes Electric Protective Co. The latter company have almost exclusively furnished electrical burglar protection to the jewelry houses here. The Gould Co. have handsomely fitted quarters on the ground floor of the Holland building.

The following out of town buyers were in last week: Ed. Vail, of Ed. Vail & Co., Wichita, Kan.; J. M. Hawley, Troy, Ill.; Pete Longnecker, with Frank B. Thayer, Memphis, Tenn.; Will L. Moyers, Bardwell, Ky.; William Mosby, Batesville, Ark.; Charles Mosby, Batesville, and J. H. Tetley, Flat River, Mo.

Louis McDowell, who secured an \$800 diamond sunburst from Merrick, Walsh & Phelps Jewelry Co. by representing himself as William J. Lemp, Jr., was sentenced to three years in the penitentiary last Thursday. The case was called for trial and the State introduced several witnesses, including clerks in the Merrick, Walsh & Phelps jewelry establishment. Ben Barnett, a pawnbroker who advanced \$175 on the ornament, and clerks in other stores where some of the stones were removed, all of whom identified McDowell. When the State closed McDowell pleaded guilty.

The store of Charles J. Wurst & Co., Elyria, O., was damaged recently by heat, smoke and water from a fire in the basement.

San Francisco.

George A. Brown, of A. I. Hall & Sons, is just in from his northern trip.

J. B. Whitney has just returned from Los Angeles, Cal., and reports great preparations for the Fiesta to be held there May 8 and 9.

F. H. Levy, of M. Schussler & Co., has just returned from a seven weeks' eastern trip. He thinks the prospects excellent for a good year.

M. W. Potter, representing J. M. Fisher & Co., Attleboro, was in town last week. With possibly one exception, he has taken on this trip the largest orders in his record.

I. P. Isenbach, New York, was last week at the Lick House; Henry H. Davis, Medford, Ore.; A. Amstutz, Napa, Cal.; C. H. Steinmetz, Suisan, Cal., and C. W. Wickersham, Wadsworth, Nev., were guests at the Golden West hotel, this city, last week.

Julius A. Young, 115 Sutter St., who succeeded Haskell & Muegge, has just returned from a satisfactory trip of three weeks' duration, extending as far south as San Diego. He has just added to his other lines that of George W. Heath & Co., manufacturers of gold and silver novelties, New York.

Burt Wellington, alias West, alias Hess, and Henry Smith have been charged with grand larceny and burglary. Wellington and his companion are said to have broken into the rooms of a jeweler at 220 Sutter St., this city, and are accused of having stolen a large quantity of silver ware.

Pacific Coast Notes.

S. A. Sharp has sold his store in Mariposa, Cal., to B. J. Ballard, jeweler.

L. H. Service has moved his jewelry stock to the Dworack block, on D St., Madera, Cal.

T. Cruse, practical watchmaker and jeweler, has opened a jewelry establishment at Lincoln, Cal.

Harry Chute is selling out his stock of jewelry at Lakeport, Cal. He is undecided as to where he will locate.

The auction sale inaugurated by A. H. Ewert, jeweler, Ukiah, Cal., is being attended by large crowds. The sale will continue for a few days.

I. B. Nason, who has been employed in the jewelry stores of Redding, Cal., for a number of years, has gone to De La Mar, Cal., where he will conduct a jewelry and repair shop.

J. D. Bennett, Portland, Ore., who of late has been working in San Francisco, has located on 4th St., San Rafael, Cal., where he will open a stock of jewelry and optical goods.

The sale of the stock in hand of Receiver Kellogg and belonging previously to Hubbell & Maxson, jewelers, Fresno, Cal., commenced last week. H. M. Johnston, of Austin & Johnston, appeared on behalf of the creditors.

A part of the stock of jewelry of Z. F. Vaughn, Tulare, Cal., was attached last week on complaint of L. Jacobi, San Francisco. This is, doubtless, an outgrowth of the unfortunate notoriety given to the store the week previous.

Pickering & Jelliff, Mansfield, O., will move to a new location.

Pacific Northwest.

W. Wheeler has opened a jewelry store at Coburg, Ore.

W. H. Finck, Seattle, Wash., will build a handsome two-story residence for himself.

Abbott & Son, Forest Grove, Ore., have moved into new quarters.

J. H. Seymour, Astoria, Ore., has just returned home from a business trip to Portland.

J. Sutcliffe, Woodburn, Ore., will, during this month, close out his stock, as he will retire from business.

The sale of jewelry at Mr. Forcimer's store, Nanaimo, B. C., still continues. Mr. Forcimer will close out his stock and retire from business.

W. C. Chamberlain, jeweler, New Westminster, B. C., has offered a handsome silver trophy to be competed for this Summer by the baseball teams of that vicinity.

L. A. Messing, Rosalia, Wash., is erecting an addition to his building. Mr. Messing's business is increasing so that it is necessary for him to enlarge his building.

Hayes Howard, Marshfield, Ore., has been proffered a position in a jewelry store in Honolulu and will leave shortly for San Francisco to be ready to sail for the islands at an early date.

The County Commissioners of Hamilton, Mon., have ordered of A. L. Bank two electric clocks for the court house there. The clocks will be different from anything ever seen in that locality. Mr. Banks will have charge of the clocks to see that they are kept in running order.

Dr. William Dodd, of Butte, Mon., arrived at San Francisco last week from Honolulu on the steamer *Mariposa*. It was reported that he was on the ill-fated vessel, *Rio de Janeiro*. It was Dr. Dodd's brother, A. W. Dodd, a jeweler of Butte, who went down with the *Rio de Janeiro*.

The City Council of Grand Forks, B. C., has offered a reward of \$500 for the arrest

and conviction of the parties who smashed the window of Mayor White's jewelry store and got away with \$1,100 worth of jewelry. To this has been added another \$500, making the amount \$1,000 for the capture of the robbers.

The Red Lodge, Mon., post office recently received something like 100 small packages containing the cheapest kind of jewelry, mostly scarf pins. These packages are addressed to various residents of the city, having been sent out on approval by an eastern house. Each person receiving one of these packages is requested to send \$1 to the house or else return the jewelry.

W. F. Main, Iowa City, Ia., has commenced suit against W. A. Freeburger, at Montesano, Wash., to recover for the value of goods sold. One of Mr. Main's agents sold a bill of goods to Mr. Freeburger. After the order had been sent in, the latter discovered that Charles Veysey had had trouble with the firm, so when the goods came, he claimed they were not as represented and refused to accept them. When the depot was broken into several months ago, part of the jewelry was stolen by the burglars. Mr. Main brought suit against Charles Veysey on the same sort of proposition, but was defeated in the Superior Court at Montesano.

Minneapolis and St. Paul.

O. H. Arosin, St. Paul, is making interior improvements.

Frank Newcomb and Bert Clausin, travelers for S. H. Clausin & Co., Minneapolis, are in off the road.

The R. B. Wegner Co., St. Paul, are reported as about to sell out their branch store in Wheaton, Minn.

Mr. Elliott, with J. L. Moody, Ellsworth, Wis., has been in St. Paul, taking an optical course with F. H. Upham.

Walter G. Hudson, with J. B. Hudson,

Minneapolis, has returned from a purchasing trip east, whither he went in search of Spring novelties.

G. Huff, Forsyth, Mon., has been in the Twin Cities. He is but lately out of the hospital at Brainerd, Minn., where he was treated for appendicitis.

The following dealers from the country were in the Twin Cities the past week: H. Buck, Garretson, S. Dak.; Olson & Isaacson, St. Croix Falls, Wis.; E. E. Finch, River Falls, Wis.; J. T. Gardner, Cass Lake, Minn.

Columbus, O.

Regnier & Wittlig, Marietta, who recently succeeded D. B. Anderson & Co., are looking prosperous and enjoying a good trade. The firm are Austin B. Regnier and Henry T. Wittlig.

The store of Charles Remillet, Findlay, is reported to have been closed on execution in favor of the American National bank, of that city, for \$2,000. Mr. Remillet did business at 111 S. Main St. Although the time has not been definitely settled, it is thought the sale will take place on March 28.

Springfield friends have received word that Frank J. Grove, formerly a well known jeweler of that place, had been drowned by the sinking of the steamer *Rio de Janeiro* in San Francisco bay some weeks ago. It is said that he had planned to make a trip to the Klondike on his return to this country. He had been traveling through the Eastern countries.

John Lakin, said to represent the Duhme Jewelry Co., Cincinnati, was arrested in Springfield, Friday, on the charge of violating the transient vendors' ordinance, passed by the City Council a few weeks ago. Lakin claims he was selling goods by sample, but it is said an affidavit will be filed against him to the effect that he was selling direct to customers.

The Sort Your Customers Want

is what you'll find in

The Newest Spring and Summer Fads in **Jewelry Novelties** that will help hold your old trade and bring the new to your store are the kind we make. Can't we prove that to you? A postal card will do it.

IMPERIAL MFG. CO.,

Masonic Temple, Chicago.

It is not known just what the purpose of his arrest is. H. L. Rockfield, proprietor of the Arcade hotel, signed his bond.

Traveling men coming into Columbus report business fair over the country, but there is no rush anywhere. They believe, however, that there will be a good Spring trade.

Three pawnbrokers in this city have been arrested for resisting the ordinance requiring them to pay a license. The arrests had the effect of bringing a number of them in with their fees.

William F. Savage, who has been with Goodman Bros. for a year, is now with F. F. Bonnet as head watchmaker. He is known in a great many of the larger cities as an expert workman, having spent much time in the factories both of this and the old countries in perfecting his profession. E. T. Albert, formerly with Mr. Bonnet, is now with Andrew Morden.

Kansas City.

Walter M. Jaccard has returned from St. Louis.

The *Official Daily Law & Credit Guide* announces a judgment of \$1,600 against the Streicher Watch and Jewelry Co.

M. Gordon, who formerly had a jewelry store on 12th St., will locate in Excelsior Springs, Mo., and open a store there.

I. N. Collins, Cherokee, Kan., a pioneer jeweler of that State, is contemplating selling out his business, owing to his advanced age.

Earl St. Hor has taken the place with the Norton-Paulson Jewelry Co. which William Schuman vacated to go on the road for them. He will be second man in the material department.

O. Kolstad, who had been in the jewelry business for a long time at Pleasant Hill, Mo., died there last week. He had had poor health for a number of years and had been a great sufferer.

Earl Underwood, Arkansas City, Kan., visited the Kansas City trade, last week. He has sold out his store in Arkansas City to Ralph Wickliffe and has not yet decided whether or not he will open another in some other city.

J. R. Mercer has received no news in regard to the thief who stole from his store a diamond valued at \$50, two weeks ago. The trial of Newton Ragan, the man who accompanied the thief, has not yet taken place. He is being held on an old charge.

Fred M. Chamberlain, Max Shoeman and Edwards & Sloane Jewelry Co. have issued a circular offering \$50 reward for the arrest of Bernard Rosenthal, and 10 per cent for the recovery of any goods which were taken by Rosenthal just previous to his disappearance from Kansas City, the first of March. Nothing has been heard from him.

The out of town jewelers who called on the Kansas City merchants last week were: A. J. Carruth, Herington, Kan.; W. C. Johnson, Alton, Mo.; W. F. Kirkpatrick, St. Joseph, Mo.; W. T. Brown, Sterling, Kan.; E. D. Squibb, Bois D'Arc, Mo.; O. S. Dooty, Melburn, Kan.; A. R. Kane, Baxter Springs, Kan.; John Rupp, of the Bliss Jewelry Co., Atchison, Kan.;

A. A. Cox, Mt. Vernon, Mo.; Morris Goldstein, Marshall, Mo.; W. J. Colman, Powhattan, Kan.; M. C. Rosenfield, Leavenworth, Kan.

Indianapolis.

M. M. Kime has succeeded Hammond & Kime, Petersburg, Ind.

E. Duff, western traveler for Heaton, Sims & Co., was in off the road last week.

Henry Rossier and wife, Martinsville, Ind., were in the city last week, attending the Scottish Rite entertainment and buying goods.

The State geologist has received inquiries from the Department of the Interior concerning the value of the diamond found in Brown county, Ind. THE CIRCULAR—WEEKLY of last week contained an account of the stone and of its having been cut into two fine, small stones. The State geologist is of the opinion that the stone was brought into this part of the country from the Hud-

son Bay region during the glacier period.

H. A. Comstock is advertising a "Removal Sale." He is the third jeweler who has had to seek a new location since the beginning of the year. L. F. Kiefer & Son, Henry C. Schergens and H. A. Comstock have all been forced to move, as the buildings in which they were located are being torn down for the erection of new and modern blocks. Mr. Comstock will occupy a desirable store room on Washington St. in the same block as his old store.

Last week Indianapolis was a city of mourning, flags at half-mast everywhere, on account of the death of ex-President Benjamin Harrison. Great crowds came in on every train. March 16 all business houses were closed from 11 to 2 o'clock, while the military procession escorted the body to the State House, where it lay in state and was viewed by thousands. Among the jewelers who displayed flags, tied with black, were: Julius C. Walk & Son, H. A. Comstock, W. T. Marcy and William J. Eisele.

Handsome Gold Watch to Ex-Congressman John F. Fitzgerald.

BOSTON, Mass., March 13.—One of the finest watches ever manufactured in this city was furnished by Kettell & Blake, 376 Washington St., and presented, last evening in Faneuil Hall, to Ex-Congressman John F. Fitzgerald, of Boston, on his completion of six years as Congressional Representative from this district. The watch was of the Waltham pattern, 18 karat, and was accompanied by a Dickens chain with a diamond locket and gold pencil. On the back of the watch was a diamond monogram of the letters "J. F. F." The whole was enclosed in a handsome mahogany case, with a gold plate on the outside bearing the inscription: "Presented to the Hon. John F. Fitzgerald by his friends on the completion of six years in Congress—1895—March 4—1901." The value of the gift is \$1,000.

Birmingham, Ala.

TRADE CONDITIONS.

Local jewelers report a good business and an outlook for Spring trade unprecedentedly bright. All have laid in big stocks in anticipation.

F. W. Bromberg, who succeeded E. Gluck, deceased, has enlarged his store room and put in an extra work bench. He carries a much bigger stock than did Mr. Gluck.

W. T. Bell has established a jewelry business at Decatur.

Frank B. Gibson, Sheffield, has turned out a fine piece of work in a loving cup given by friends to J. J. Gray.

M. Steinberger has opened a jewelry store at Florence. He has purchased property there. Mr. Steinberger was formerly at Russellville.

Harry Mercer recently turned out a beautiful piece of work—a watch which the old associates of master mechanic C. B. Gifford, of the Louisville and Nashville railroad, resigned, gave him. It was beautifully engraved, the work being done in Mr. Mercer's place of business here.

C. L. Ruth, of C. L. Ruth & Son, Montgomery, is interesting himself in a public library for his city. Mr. Carnegie has offered to give \$50,000 for a library if the city will pay \$5,000 a year for keeping it up. Mr. Ruth, who is a member of the City Council, has been named as one of the committee to arrange details and try to get the deal consummated.

WATCH PRESENTED TO EX-CONGRESSMAN JOHN F. FITZGERALD.

Mrs. Henry J. Rosenstihl, wife of the junior member of the firm of William Rosenstihl & Son, Union Springs, died in Birmingham, last Saturday, after a long and painful illness. She had been brought here for treatment. Mr. Rosenstihl is the brother of secretary William Rosenstihl, of the Retail Jewelers' Association of Alabama. Mrs. Rosenstihl was a daughter of Capt. E. Troup Randle, a leading citizen of Union Springs and an officer of the Confederate army. She had been married nine years. One daughter, five years old, is left.

Thomas J. Zimmer, Jr., and Fred. W. Zimmer, of Poughkeepsie, N. Y., will, on May 1, consolidate their jewelry businesses and open a new store at 315 Main St., that city.

ISSUE OF MARCH 19, 1901.

670,045. COLLAR-BUTTON. AUGUST WEBER, Taylor, Pa. Filed May 11, 1900. Serial No. 16,378. (No model.)

The herein described collar-button comprised in a central plate constructed from spring-steel or other suitable metal, the said plate slitted at each end with a pair of parallel slits and the metal contiguous to the outer sides of said slits bent up so as to form lugs, clasps hinged to the lugs of each end thereof and adapted to fold in opposite directions, one of the said clasps provided with a stud adapted to pass through the buttonhole of a

shirt-collar and the other of the said clasps adapted to be ornamented and to fold upon a stud projecting forward from the central plate aforesaid, a stud on the central plate aforesaid adapted to engage with the said clasp and also adapted to have the tangs of a collar buttoned thereto, whereby the collar is secured to the shirt and the ornamental clasp exposed forward.

670,156. PROCESS OF PREPARING SILVERING LIQUID. CONSTANT LAVAL, Allegheny, Pa., assignor to one-half to J. W. Peters and C. M. Suter, same place. Filed March 6, 1900. Serial No. 7,548. (Specimens.)

The process of preparing a silvering liquid, which consists in mixing nitrate of silver, water and ammonia and filtering the same; also mixing potassium and sodium tartrate with water; also mixing nickel sesquioxide with water; then uniting the said potassium and sodium tartrate and nickel sesquioxide mixtures and filtering; and finally mixing equal parts of the filtered solutions immediately before using.

670,213. LATHE-CHUCK. AMBROSE SWASEY, Cleveland, O., assignor to the Warner & Swasey Co., same place. Filed Jan. 7, 1901. Serial No. 42,277. (No model.)

In a chuck for lathes, etc., the combination with a core having a plurality of compressible jaws, and bushing-sections adapted to be held against the inner faces of said jaws, of catches for so holding them, and mechanism projecting from the forward end of said core for operating said catches.

670,277. METAL ORNAMENTATION. HANNIBAL GOODWIN, Newark, N. J. Filed Jan. 20, 1892. Serial No. 418,700. (No specimens.)

The process which consists in imposing upon a metallic surface a design in organic matter, then flowing the plate with a greasy or equivalent matter to prevent on the parts not covered by the design an adhesion thereto of a deposited metal which penetrates through the resinous, gummy or equivalent matter next to be applied to the parts not covered, then flowing the said resinous solution, then applying a solvent of the design and removing the same together with the overlying grease, and then depositing on the bared design a metal for ornamentation or utility, the grease on the adjacent portions serving to confine adhesively said deposit to just the parts from which the design was removed.

370,307. SPECTACLES OR EYEGLASSES. CLEMENT B. BISHOP, Philadelphia, Pa. Filed Aug. 4, 1899. Serial No. 726,118. (No model.)

A lens-clasp for spectacles or eyeglasses, said clasp comprising an end bar and flexible side bars, each of said side bars being expandable and contractible in the direction of its length and retaining a permanent set for each adjustment, whereby the clasp can be adapted to lenses of different thicknesses, while always preserving the central

The Francis Engraver

Every job done on a late Francis can be a sample of work that no other machine can equal. The Francis is the only machine equipped with a turning point, by which you are protected against the scrapes and scratches of a stationary graver.

Old English, Roman and Block letters are mostly made up of curves, lateral lines and cross lines; the turning point cuts them all from hair line to heavy shade, with bright, flashy cuts, because in cutting you face the graver the way the line runs. Cutting deep lateral lines, such as are necessary in seal cutting, digging out of corners and shading in all directions can only be effectually done with a point that turns.

If you are at all interested in engraving, and have the slightest idea of ever buying a machine, invest two cents in postage and five minutes time to write me, and I will send you information that you will remember as long as you live, and that will be a great help to you when you do think of buying.

Gold, Silver and Rolled Plate Chains and Jewelry.

Novelties in Gold and Silver Bracelets. Also a large line of Chain Trimmings.

"TRADE-MARKS of the JEWELRY and KINDRED TRADES" will enable you to find the maker of any article bearing a trade-mark. It contains over 2,250 marks. Price, Book and Supplement, \$2.50. THE JEWELERS' CIRCULAR PUBLISHING CO., 11 John Street, New York.

BUYERS' INFORMATION BUREAU.

Questions as to the makers of certain lines of goods, where to buy certain lines, where certain kinds of work are done, the owners of certain trade-marks and other matters relating to the buying branch of a jewelry business will be cheerfully answered under this department. The reader cannot ask too many questions. All queries received are also answered promptly by mail.

CUMBERLAND, Md., Feb. 12, 1901.

Editor of THE JEWELERS' CIRCULAR-WEEKLY:
Can you inform me where the Automatic Knife Co., of Middletown, Conn., have gone to or what has become of the company? They failed two or three years ago and I cannot trace them. I still have calls for the knife. It was a good one.
WALTER POWELL.

ANSWER:—The Automatic Knife Co. sold their business at Middletown, Conn., to the Hatch Automatic Knife Co., Milwaukee, Wis. The post office at Middletown forwards all mail for the Automatic Knife Co. to Fremont, O. We are also informed that the Automatic Knife Co.'s goods are sold at wholesale by the Bayonne Knife and Cutlery Co., Bayonne, N. J., who, we think, can give more definite information.

NEW YORK, Feb. 16, 1901.

Editor of THE JEWELERS' CIRCULAR-WEEKLY:
Can you give me any information as to where I can get instruction in jewelry designing? I am a practical jeweler, having worked at the bench for about 15 years, and recognize the fact that if I could become a good designer it would materially assist me in the business. I have lately subscribed to your paper and thought you might be able to recommend some designer willing to give instruction. Of course, I expect to pay for it.
Yours very truly,
A. McK.

ANSWER:—There are several schools of designing where the lessons go to some extent into the designing of jewelry and silver. We refer correspondent to the Artist-Artisan's Institute, 142 E. 33d St., New York. In this institute, we understand, the course goes particularly into industrial designing, jewelry being a special feature.

BAY CITY, Mich., March 2, 1901.

Editor of THE JEWELERS' CIRCULAR-WEEKLY:
Please let me know who makes a locket of two trade dollars, screw or snap, or a similar locket that looks like a dollar and shows no joints. If possible, also let me know the approximate cost, and oblige,
Yours respectfully,
R. G. GRABOWSKY.

ANSWER:—Durand & Co., 49 Franklin St., Newark, N. J., make the Trade Dollar lockets. The price to the trade is about \$2 each.

PARIS, Ky., March 6, 1901.

Editor of THE JEWELERS' CIRCULAR-WEEKLY:
Can you find out for us who makes the bandeaux actresses wear, consisting of a band with large brilliants, to go around the head? Thanking you in advance,
Respectfully yours,
A. J. WINTERS & Co.

ANSWER:—If correspondents will write to W. Dazian, 26 Union Square, New York, we think they will get what they want. He has these articles from \$3 upward.

ATLANTA, Ga., Feb. 11, 1901.

Editor of THE JEWELERS' CIRCULAR-WEEKLY:
We will be obliged if you will have some one send us on approval a sterling silver rose-gilded inexpensive L'Aiglon scarf pin. Thanking you in advance for your trouble, we are,
Yours truly,
MAIER & BERKELE.

ANSWER:—We have made a thorough search for the makers of the "L'Aiglon" scarf pins and are unable to find them. Can any reader furnish us the information?

NEW BEDFORD, Mass., March 11, 1901.

Editor of THE JEWELERS' CIRCULAR-WEEKLY:
Can you give me the name of any manufacturer who has put upon the market a Hobson souvenir spoon? I am very anxious to obtain one for my collection. An early reply will greatly oblige. Thanking you in advance for the favor, I am,
Yours very truly,
MISS E. C. AUSTIN.

ANSWER:—We advise correspondent to write to C. L. Ruth & Son, 15 Dexter Ave., Montgomery, Ala.

MONTREAL, Can., March 12, 1901.

Editor of THE JEWELERS' CIRCULAR-WEEKLY:
Will you please be so kind and give me the names and addresses of makers of celluloid business cards, and also makers of ivory business cards? You will find enclosed stamp for early reply. Thanking you for past favors, I remain,
Yours respectfully,
J. PROCKTER, JR.

ANSWER:—Baldwin & Gleason Co., 58 Reade St., New York, can furnish these cards.

ALBANY, N. Y., Feb. 22, 1901.

Editor of THE JEWELERS' CIRCULAR-WEEKLY:
Will you kindly inform me where I can get solid gold prayer beads and crucifixes? Thanking you, I remain,
Yours respectfully,
A. SACHS.

ANSWER:—I. Emrich & Co., 42 E. 14th St., New York; Sloan & Co., 21 Maiden Lane, New York.

RICHMOND, Va., March 8, 1901.

Editor of THE JEWELERS' CIRCULAR-WEEKLY:
Kindly advise us the address of "Sheppard," the man who makes souvenir spoons.
Yours truly,
JULIUS MEYER'S SONS.

ANSWER:—We presume correspondents mean the Shepard Mfg. Co., Melrose, Mass.

EL PASO, Tex., Feb. 27, 1901.

Editor of THE JEWELERS' CIRCULAR-WEEKLY:
Will you kindly inform us who makes album lockets in solid gold? That is, a locket that will hold five or six photos. With thanks in advance,
Yours truly,
SILBERBERG BROS.

ANSWER:—The album lockets referred to are imported by A. Held & Co., 61 Nassau St., New York.

NEW YORK, March 1, 1901.

Editor of THE JEWELERS' CIRCULAR-WEEKLY:
Can you inform us the name and address of the maker of a gold plated charm representing a peanut?
Yours truly,
C. B. S.

ANSWER:—We are unable to find the maker. Can anyone inform us?

E. H. JACKSON, Pres. & Treas. A. D. JACKSON, Mgr.

That this department shall prove mutually beneficial to our readers, it is desirable that the members of the trade generally communicate with THE JEWELERS' CIRCULAR-WEEKLY regarding any advantageous device or plan that they are utilizing in connection with their business.

PRIZE ESSAY COMPETITION, NO. 3.

SUBJECT:

"How to Foster Spring Trade."

No. 4.
PRIZE ESSAY COMPETITION.

First Prize, \$20.
Second Prize, \$10.

These prizes will be given to the writers of essays on the subject

"How to Promote a Bric-à-brac, Pottery and Cut Glass Department."

The prizes will be for the best and most reasonable essays, not for the language in which the ideas are expressed. Anyone may enter, whether he be a retailer, salesman or any employe.

The standing of the judges who have kindly consented to act is a guarantee that the contest will be carried on strictly on its merits and in an absolutely fair and impartial manner. We shall designate each contribution by a letter, keeping a list of contributors with the letters of their articles. Thus the judges will not even know the names of the writers whose products they pass upon.

RULES:

Essays must be in this office by June 15, 1901.
Essays must be written on one side of paper.
No limit to number of words, and specimens of records are admissible.

NOTE.—THE JEWELERS' CIRCULAR-WEEKLY reserves the right to publish any or all of the competing essays received.

Preference will be given, all other things being equal, to those whose contributions reach us at the earliest date.

NOTICE TO ESSAYISTS.

Owing to the fact that a number of the essays submitted in the Prize Essay Competition, No. 2, "How to Treat Customers—How to Sell," appear upon first reading to be of equal merit, the judges in the contest desire, in justice to all, to go more carefully into the matter and they are, therefore, unable to give their decision in time for announcement this week. Announcement of the awards will positively be made in the issue of April 3d.

WHEN Spring comes and everything begins to brighten up, after the Winter months, business which is generally almost at a standstill as far as sales are concerned, must be also brightened up. First of all give your store a complete house-cleaning, from top to bottom, paper it freshly, paint it a-new and make its appearance bright outside as well as inside. Then turn your attention to your stock. Fill in whatever is lacking and buy stock pertaining to Spring needs. The stock you have will, of course, need regarding and cleaning; attend to this above all things, for when a customer sees goods that look tarnished he or she obtains a bad impression which is hard to dispel. In fact, have everything look new and bright.

The windows must also be given strict attention as they are your main advertisers. Have them so attractive that people passing by must stop and inspect the display.

When customers enter the store treat them courteously, be they high or low in station, so that when they leave they will carry away an impression of having been well treated. This will also be an advertisement in itself.

Advertise widely and quote prices of certain lines of goods and have the goods to suit all classes of trade; in short, make everything so pleasing to your public that they will not forget to come back to you. Above all, be honest in your dealings with everyone. This has been our policy for the last 19 years and has always proved successful.

F. A. S.

IN the first place one must have clean, fresh goods. The left-over goods must be brightened up until they look like the newest. Then the store must be clean; a little new paint and paper or frescoing will help wonderfully in making a storeroom attractive. Then select something unique and pretty; advertise it well and sell it low, at a price that will bring custom; or better still, give it away with every sale to a certain amount. If it be a city store, let the article be something that may become a fad; let it be something original, made expressly for your particular house. This, if the clerks are bright and accommodating, will bring trade. If it be for a store in a small town, the article should be something useful. Let it be well circulated throughout the country that for one or two months, as suits best, every customer buying

\$1 worth of goods will receive a present. For a \$10 sale have a better article to give.

People seem to have a perfect mania for getting something for nothing and will buy a bill of goods of the man who they are sure will do as he promises, and if they will get an article for nothing, even if they pay more for the goods than they would elsewhere.

After all this costs no more than other advertising. By buying a quantity you get the articles at a low price and by giving them away you increase your trade more than enough to pay the bill.

Then we find a phonograph will draw trade in a country store. Put a line in your local paper inviting your friends to drop in and hear the latest songs, and you will find this will increase your trade.

L. A. J.

Interviews with Progressive Retail Jewelers.

Representative Jewelers Analyze Some of the Forces that Actuated Their Business Along the Road to Success.

"I AGREE with the idea that it gives a merchant an advantage out of all proportion to have more than one retail store in a city, but in my case I discontinued my four stores and concentrated all my efforts to the development of this one, for special reasons."

So said C. G. Rochat, 73-75 Montgomery St., Jersey City, N. J., to the representative of THE JEWELERS' CIRCULAR-WEEKLY, who called upon him recently.

"At the time I had more than this store, my sons were too young to be of any assistance and I had no one on whom I could rely. Now one of my sons, a student and graduate in optics, 26 years old, is the head of my optical department and my right hand, and my other son is a trusty employe."

"Can you give me your story, Mr. Rochat?"

"At the age of 23, on the 1st of January, 1873, I started in the jewelry business for myself, at the Five Corners, 'On the Heights,' in this city. I had been practically educated and trained, both in Europe and America. This was my capital, for my savings, quite naturally, were not very large. But, besides good health, I had been enabled to build up a good reputation, the basis for all the credit I could reason-

ING and HINTS to JEWELERS

ably hope for or wish. So I started out with pretty good chances for success.

"Fortune favored me conservatively and in a few years, finding more room imperative, I moved to a larger store at 588 Newark Ave. In 1882 I opened a store on Palisade Ave. with Charles Popham, under the firm name of Charles Popham & Co. I furnished the capital and the stock, giving him a half interest. We did a good business for five years, when I sold out to Mr. Popham, who, after continuing for two years, sold out to go into real estate. During these years I opened a store in Morristown, N. J., owing to the illness of my wife, for it was my intention to sell out all my other interests and settle there. Fortunately, my wife recovered and I sold out the Morristown store. It was in 1882 that I first obtained my foothold in this place, and gradually relinquished my hold on all of my other retail interests."

"Quite a complicated tale."

"Well, to go into the wholesale ramifications would make the story very much more so, so I'll stick to essentials. My business on this spot grew steadily and in 1893 I acquired a 10-year lease of these two stores, and occupy the basement and the floor above, mostly for retail purposes. Aside from this I have outside jewelry interests, and together with two other gentlemen own the Ajax Chemical Co., manufacturers of photographic supplies, at 62 Montgomery St. You know I have a full fledged photographic department also."

"Mr. Rochat, that suggests that you think it wiser to carry a large general stock than to restrict yourself to a narrow line."

"That depends. If I were located in New York city, I should adopt the policy of making my line as narrow as I could and trying to build up on a reputation of being headquarters for some fine specialty. But, outside of New York city, I don't think this would be apt to pay in the jewelry line. I have, therefore, made my line as full and comprehensive as I could, embracing many things which would under no circumstances be classified under the jewelry line. Nevertheless, on jewelry I restrict myself to nothing less than a good line, entirely barring 'pinchbeck.' And outside of clocks and silver ware, I keep only a few specialties besides optical goods and photographic supplies."

"Do you advertise, Mr. Rochat?"

"Yes; for the character and extent of my business, I consider myself a liberal advertiser. I patronize the local papers, such as *The Jersey City Journal*, and take large space, restricting myself almost entirely to display."

"How about other publications?"

"I find that, though there is a great difference of opinion about such sheets as church programmes, social affair periodicals and the

like, they have always paid me, and I believe in and patronize them."

"And about novelties?"

"I have always been a steady user and distributor of them—all sorts of things which struck my fancy and were not prohibitive in price for distribution. For I argued that if they engaged my attention they would do the same to others."

"How would you distribute them?"

"By mail, to lists. At present I am getting up a United States census sheet, which I think will prove quite a card."

"How do you get your lists?"

"They are mostly names from my books—all who have ever dealt with me, amended and pruned out—an excellent list. I have also received a good one through the Young Men's Christian Association, of which I was a director."

"I note you advertise in street cars, also. Do you get good returns?"

"Oh, yes. Although I have adopted no system of keying, by close observation I am satisfied that the cars pay me well."

"No other advertising?"

"No, unless you call my window displays such. These I am very particular about and have them changed every day. I have a skilled window dresser whose talent is well exercised on these. My idea is to impress the public both by the volume and the richness of the show."

"How many clerks have you, Mr. Rochat?"

"From 10 to 12 all the year around. These include four men at the bench at all times, and sometimes five. I swell my force by a few wholesale salesmen who help me around the holidays."

"Do you find that New York city is a competitor?"

"A fierce one. However, that is one of the factors that I naturally have to contend with. Of course, it enters into consideration in all my dealings. But there is one bit of competition which is growing all the time and is not pleasant to contend with—the department stores."

"I did not suppose you would feel them over here."

"Oh, yes. Where do they not penetrate? My great complaint is that they buy seconds, which they sell as firsts. And then, notwithstanding that they gain such immense advantages through their discounts, they sell so close."

"I see you have one saleslady."

"Yes. I find that with many goods ladies best like to be served by a lady. But with my most precious wares my sons or I wait on the customer."

"Do you do an extensive charge trade?"

"Not as much as I might if I wished. Ninety per cent. of my trade is cash over the counter. And of the remainder my losses are so insignificant as to amount to nothing. I prefer a smaller business which takes little risk."

"How do you preserve your stock from accumulating undesirable leavings?"

"After the holidays, up to the middle of March, we clear out everything undesirable by marking down goods we desire to get rid of to exactly half. This is *bona fide*. We supplement careful buying this way and the result is a clean stock always. Besides this, I have a system of taking account of my stock of rings and the like, twice a week, and of diamonds, watches, etc., twice a month. This keeps me posted on even the most remote contingencies, such as charged goods, as well as sold ones, and guards even against stealing."

"Do you shade your prices, if need be, in selling?"

"No. We are strictly one price. Everything is marked in plain figures. This also gives a very valuable impression of square dealing."

"You seem personally in touch with every phase."

"I am. I even examine every bit of work and make the price on all that comes from my repair department. I buy everything also. I have also instituted an individual system on cash receipts and had a cash register specially built. By means of this the cash is left in charge of one person entirely."

"How do you receive visiting salesmen?"

"Through the same entrance as customers, and their wares are displayed in the basement."

"What proportion of your trade is done around the holidays?"

"The best way of expressing that is to tell you that we sell about three times as many goods in money value in the month of December as in any other month."

"And how do the other months run?"

"There is where one of the great advantages of my general stock comes into play. Through that I am enabled almost to equalize the remaining 11 months of the year. Thus, because of the immense reductions, January and February are not bad. Then from March to July business is normal. The Summer months are notably dull in jewelry. But in my business it is during these that my photo. supply trade is brisk. And the Fall months take care of themselves, which brings us back to the holidays."

"As to my remark, at the beginning, that it gives a merchant an advantage out of all proportion to have more than one store in a town, especially is this the case if he is an advertiser. For it divides the expenses of advertising, as well as some other expenses, by just as many as he has more stores, and it multiplies the chances of selling in the same ratio. Only he must either be able to divide his attention fully, or he must have lieutenants and aides on whom he can implicitly rely. I have such now in the two sons I have in my business, but I did not have them when I had my four stores."

The above illustrates one of a large variety of styles in our new Silverware and Toilet Cases. Patent applied for.

If a Day's Supply of Ink is Good, a Year's Supply is 364 Times Better.

Blair's is the only Fountain Pen in the world having a year's supply cartridge of correspondence and cheque security ink free! Right in the penholder, needing water only to instantly produce a uniform ink everywhere. Holders non-leakable and jointless. New ink supply, which will not freeze or mold, 10c. each. Ordinary ink may as be used. Particularly good for Jewelers, as a year's supply of ink is given free to every purchaser.

BLAIR'S FOUNTAIN PEN CO., W 163 BROADWAY, NEW YORK.

WORKSHOP NOTES.

To Tighten a Ruby Pin, set the ruby pin in asphaltum varnish. It will become hard in a few minutes and be much firmer and better than gum shellac, as generally used.

Ink for Painting the Hours.—Work up some clean lampblack in oil of spike lavender; then add a small quantity of spirit varnish and thoroughly mix the whole. This is applied with a fine brush and the success of the operation depends very much on the selection of the brush.

To Remove Soft Solder from Gold.—Place the work in spirits of salts (hydrochloric acid) or remove as much as possible with the scraper, using a gentle heat to enable you to get off the solder more easily. It is very useful to know where hard soldering is required, either in bright or colored work.

Cleaning.—To give the works of a watch a good appearance many methods are adopted. Dipping or soaking the parts in benzine or spirits of wine facilitates the removal of greasy dirt. A good, soft brush occasionally cleansed by rubbing on chalk or burned bone, and tissue paper to hold the parts so as to prevent contact with the skin, will be found as good a method as any.

To Oxidize Fine Steel Articles.—Fine steel objects, such as spectacle frames, etc., may be readily blackened in the following manner: For this purpose take blue vitriol solution and lay the pieces in this for a short time; next rinse them off thoroughly with water and draw through a solution of hyposulphite of soda, to which a very small quantity of hydrochloric acid is added, and wipe off well with a rough rag.

To Replace Broken Pivots.—Broken pivots may be replaced by drilling up the old pinion, which may possibly require softening for the purpose, and putting in a plug of steel, which is then made into a pivot. To center the broken pinion correctly the watchmaker proceeds thus: First, the end is made tolerably flat with Arkansas stone; the pinion is then mounted in the turns with a screw ferrule on it, and the broken end resting in a groove cut across the T rest; the point of the graver is brought against the end and the work is turned with a drill-bow, its circumference being always bearing in the groove, while the graver rests on the T, and with its point centers the pinion end.

To Weaken a Balance Spring.—A balance spring may require to be made weaker; this is effected by grinding the spring thinner. Remove the spring from the collet and place it upon a piece of peg-wood cut to fit the center coil. A piece of soft iron wire, flattened so as to pass freely between the coils and charged with a little powdered oilstone, will serve as a grinder, and with it the strength of the spring may soon be reduced. Operations will be confined to the center coil, for no other part of the spring will rest sufficiently against the wood to enable it to be ground, but this will generally suffice. The effect will be rather rapid; therefore be careful or the spring may be made too weak before expected.

NOTE—Under this department, all matters of a technical or of a news character bearing upon the optical branch of the jewelry industry will be considered. Address communications to The Jewelers' Circular Pub Co., 11 John St., New York.

ASTIGMATIC ACCOMMODATION.

MR. AMSDEN, in *The Canadian Optician*, quotes Tcherning on this

subject and dissents from the views Tcherning expresses. While we are glad to agree with brother Amsden in disagreeing with Tcherning, we cannot see the point of his case, illustrating astigmatic accommodation.

If an eye is $\frac{1}{4}$ D. hyperopic in one of its chief meridians and emmetropic in the other and accommodates $\frac{1}{2}$ D., placing the focus of one meridian $\frac{1}{2}$ D. forward and the focus of the other $\frac{1}{2}$ D. back of the retina, making the case one of pseudo-mixed astigmatism, such accommodative action is merely spherical and there is nothing astigmatic about it. Astigmatic accommodation would be accommodation of $\frac{1}{4}$ D. in the hyperopic meridian so as to unify the focus in all meridians, the meridian of emmetropia remaining, during such accommodation, entirely unchanged. Tcherning evidently does not believe an eye capable of this action.

I think most refractionists of wide experience are familiar with a class of cases in which the eye, without a lens of any kind, will see most distinctly each line in the astigmatic chart successively. It is first the vertical, then the 11, 10, 9, 2, 1 and all the way around the same. If the astigmatism is static and spheres are imposed, only two meridians of the eye can be focused, one at a time. The action of the oblique muscles may cause a variation in these chief meridians, but probably of no more than 60° in all, 30° on each side of the normal position.

But there would be no cause for such action when one eye was being tested singly. Astigmatic accommodation, or accommodation in one meridian while another at right angles to it remains neutral, or greater accommodation in one meridian than the other, would produce this phenomenon. It seems to be the only principle that will account for the successive clearness of each line of the astigmatic chart and the successive dimness of all the others.

In cases of considerable hyperopia with astigmatism, in fogging with spheres, certain lines of the chart become clear for an

instant and then disappear. As we reduce the plus, such effects recur, showing, apparently, quite a degree of astigmatism; and yet, when the end is reached, only a slight astigmatic element is found. This indicates that ciliary spasm may be more unrelenting in one meridian than another, perhaps tonic in one, clonic in the other. Such could only pertain to the crystalline and to its anterior or mobile surface.

These phenomena are in consonance with the hypothesis that astigmatism may be more or less accommodative. Many cases show astigmatism to be quite a stationary factor. In such static cases, no doubt, the astigmatism is chiefly, if not altogether, corneal, but it would not do to assume them to be corneal altogether, for even the crystalline may have static astigmatism and be unable to act except in a spherical manner. Such astigmatism will disturb the corneal findings alone, for it may enhance corneal astigmatism, neutralize it partly or wholly, reverse it as to meridians, or change the chief meridians of the aggregate astigmatism.

It is impossible, under the circumstances, to lay down fixed laws for the correction of astigmatism. It is important to differentiate, as far as possible, the static from the dynamic and to make the correction cover only the static portion; that is, neutralize it, for if static astigmatism is neutralized there is no longer any stimulus for astigmatic accommodation.

New England Optical Institute Bill Held Over.

BOSTON, Mass., March 21.—There was a very brief hearing, March 19, on the optical bill giving the right to the New England Optical Institute to grant a legal degree of bachelor of optics (B.O.). Former Senator William B. Durant, who appeared in favor of the bill, stated at the opening of the hearing, before the Committee on Education, that he had been informed that there was a great deal of opposition in the House, and since the bill had been recommended to the committee he had learned that there was likely to be a determined fight if the bill was again sent back by the committee. He also stated that the New England Optical Institute would not be ready to grant the degree for another year, and he had decided to ask the committee to refer the bill to the next General Court.

Thus ends the attempt, for this year at least, to bring about the passage of the bill. During the next 12 months the officers of the institute will try and bring about a change of the sentiment that undoubtedly prevails to a great extent at present.

DIOPTRIC CONDITIONS OF THE EYE AND HOW TO DISCOVER AND MEASURE THEM.

[Commenced in issue of Feb. 13.]

HYPEROPIA.

THE discovery and measurement (diagnosis) of hyperopia are best made by means of test lenses and the Snellen type at a distance of 20 ft. Such test places finally before the eyes the lenses the person is to wear, in the place they are to be worn and under the conditions required to relieve the condition of the eyes for which they are worn. Useful and valuable as other methods may be in the corroboration of facts found by this method, or however much they may be briefer than this method in making the diagnosis, this is the final test. A finding different in any particular from the findings of the test lenses must give way to them. It is not difficult to see in what respects the other methods may be at fault, when showing a different condition of the eyes than that which the test lenses show. For the purpose of showing such faults we will briefly consider the other methods.

THE OPTOMETER.

The simplest is, perhaps, the optometer, in which a plus lens is placed before the naked eye and, by being moved to a greater or less distance, clears the image of small types or figures upon a card some 20 in. distant. If the lens used is a +2 D. and the printed card is 20 in. from it, to an emmetropic eye it is perfectly distinct, for the lens neutralizes each pencil of light from the card, transmitting plane waves of light to the eye, which is exactly adapted to focusing them at the retina whether it be immediately back of the lens or at a distance from it. An emmetropic eye would, with the +2 D. lens before it, require no accommodation to see clearly the type or figures upon the card, for, since the lens exactly neutralizes or makes plane the +2 C. waves received from the card, the eye receives the same sort of waves (waves neutral in curvature) which it receives from the object at infinity, and which it is adapted, without accommodation, to focus at the retina. But if the lens and card are separated by a greater distance than 20 in., the incident waves at the lens are less than +2 C. and, therefore, the lens transposes them and emits concave or negative waves to the eye. The emitted waves being concave, their curvature enhances as they advance, for they have potential foci at

Optical Department.

[Continued from page 61.]

points posterior to the lens. As the emmetropic eye is not adapted to these waves, and accommodation would make it still less adapted to them, they focus forward of the retina and the images are blurred by diffusion at the retina, and the more so the farther the eye may be back of the lens.

emmetropic eye cannot focus at the retina. But a hyperopic eye of, we will say, 3 D., if it sees the type clearly in the original position, does so by accommodative action. It will, therefore, continue to see the type clearly when the lens or card is moved so as to separate them, by relaxing its accommodation. In the second form of the instrument, Fig. 11, when the card is moved to a point 8 in. or 200 mm. from the lens, it will be at the limit point or *punctum*

- (2) $.833 - x + x = 6.664 x - 8 x^2$, or, further,
- (3) $8 x^2 - 6.664 x = -.833$, or, further,
- (4) $x^2 - .833 x = -.104$. From which,
- (5) $x = \frac{.833}{2} \pm \sqrt{-.104 + \left(\frac{.833}{2}\right)^2}$ and
- (6) $x = .153 \text{ m.} = 153 \text{ mm.}$

As the lens in its original position is 125 mm. from the card and must be moved to a position 153 mm. from it, it is moved $153 - 125 = 28 \text{ mm.}$ toward the eye or away from the card, and in that position the eye of 3 D. hyperopia will see the letters and figures clearly without accommodation. A scale may be formed on the rod to show the position of the lens for any degree of hyperopia.

If the lens is midway between the card and the eye it will focus at the cornea, and no eye can then refocus the pencils at the retina or see the figures upon the card through the lens. The points intermediate this midway point and the original position of the lens will run the gamut of hyperopia from 0 to ∞ . But the lens may also be nearer the eye than such midway point. If it is directly before the eye—the card being at the opposite end of the rod—it will measure 6 D. of hyperopia, for 2 D. of its power will be required to neutralize the light from the card and the emergent waves will be -6 C. , having potential foci at points 1-6 meter = 166.6 mm. posterior to the cornea. Movement of the lens from this point toward the midway point will correct higher and higher degrees of hyperopia until it reaches the midway point. As more than 6 D. of hyperopia is rare, the instrument can be used in the form shown either in Figs. 10 or 11 to best advantage.

But we were to speak of the imperfections of this instrument as compared with the test lens method in a space of 20 ft.

FIG. 10. OPTOMETER WITH STATIONARY CARD AND MOVABLE LENS.

But a hyperopic eye—one deficient in dioptric power—may in this manner be given the exact waves it requires to focus them at the retina without accommodation. An eye 2 D. hyperopic requires -2 C. waves for this adaptation; a 5 D. hyperope -5 C. waves, and so on. Hence, with an instrument of this kind the amount of hyperopia may be measured, and is measured really by the curvature of the waves it receives and is able to focus at the retina. The instrument may be constructed in either of two ways: (1) With a stationary card and a movable lens, as shown in Fig. 10, or with a stationary lens and a movable card, as shown in Fig. 11. In either case a lens of sufficient power to bring the instrument within convenient compass, and a sliding rod for lens or card, or both, of four times the focal length of the lens, will measure all degrees of hyperopia. In the form shown in Fig. 11—that is, with a stationary lens—only 6 D. of hyperopia, or any less amount, can be measured. But in the other form any degree of hyperopia may be measured. If both the lens and card are movable, the instrument may be readily changed from one form to the other by fixing the lens or screen at the points marked.

remotum of the eye with $+8 \text{ D.}$ lens before it, for the $+8 \text{ D.}$ lens corrects the hyperopia and makes the eye artificially 5 D. myopic; and the *punctum remotum* of a 5 D. myope is 8 in. In that position the waves emerging from the lens are -3 C. and just adapted to the static refraction of the eye. The position of the lens in the first instrument must also be such as to give the eye

FIG. 11. OPTOMETER WITH STATIONARY LENS AND MOVABLE CARD.

In both illustrations here the instrument is set for emmetropia. An emmetropic eye will see the type on either card, if of the same size, with equal clearness, and without accommodation. The letters will appear of equal size, notwithstanding their different distances from the eye, but in the second form a larger field of the card and less aberration will be observed. Movement of the lens, in the first instrument, toward the eye, or movement of the card, in the second, farther from the lens, will dim the letters or figures to an emmetropic eye, for either will cause the transmitted waves to become concave, and these the

-3 C. waves or waves that focus at 1-3 meter posterior to the eye or cornea and therefore $\frac{1}{3} + 1-3 = 5-6 \text{ meter}$, or 833 mm. from the card. To determine the position of the lens relative to the card:

Let $x =$ its distance in meters from the card.

Then, $.833 - x =$ its distance from the focus 1-3 mm. back of the eye.

From the above we have the equation:

$$(1) \frac{1}{x} + \frac{1}{.833 - x} = 8, \text{ which reduces to}$$

The first point to be noted is that many diopters may be represented by a slight movement of the lens or card, particularly of the lens in the second form of the instrument, where, as we have seen, a movement of 28 mm. = about one inch, is the equivalent of 3 D. and a movement from 125 to 250 mm. from the card (the midway point) runs the whole gamut of diopters from 0 to ∞ . The spacings and the adjustment of the instrument to them must be made with great accuracy to get the quarter diopters.

Optical Department.

[Continued from page 62.]

especially in the higher dioptric values where the spaces grow even narrower. But this is not the chief fault, for it may be corrected in a finely constructed instrument. The other imperfection is this: There is a principle of magnification involved and the magnification varies for each different position of the lens or the card. In the second instrument the emmetrope requires the card to be at 125 mm., the 3 D. hyperope at 200 mm. to relax the accommodation. If the type is the same, it will be minimized to the hyperope in the latter position. It will appear smaller because of the greater distance it is required to be from the eye to relax the accommodation. It will appear of the same size to him as to an emmetrope with a +5 D. lens in the place of the +8 D., the difference in the two lenses (3 D.) being the measure of the hyperopia. To one with a higher degree of hyperopia the card would require to be moved farther away to relax the accommodation. Because of this fact the value of the Snellen or any other scale of the printing on the card is lost. The visual angle changes and is reduced with each movement of the card to a greater distance. This is a serious loss and there is no way to correct it. The more perfect the mechanical construction of the instrument the more certain is this imperfection.

In the first instrument the latter imperfection is quite as pronounced as in the second, but here the nearer the lens is brought to the eye—and that movement depends upon the amount of hyperopia—the more the type on the card and the card itself is magnified. The hyperope who sees the type through the lens in its original position at 125 mm. from the card, does so by accommodative action. As the lens is drawn toward the eye the accommodation is relaxed. This is, in effect, the same as an emmetrope putting a minus lens before his eye to neutralize the concave waves or converging rays. The greater the hyperopia, the nearer the lens is brought to the eye, the more accommodation relaxes and the larger grows the visual angle. No scale of constructing the letters for this imperfection will remedy it, but the imperfections do not entirely cast out the optometer as an instrument for measuring hyperopia. It does, however, to a large extent, dispose of the Snellen principle in test type—that is,

making each part of the letter the equivalent of a 5' angle—and requires that clearness in seeing and absence of diffusion be the test rather than the line on the card he read. A hyperope of 5 D. would see lines quite out of range to the emmetrope in the first instrument, while the emmetrope would see lines quite out of the range of the hyperope when the card was at his artificial *punctum remotum*. The instruments are valuable as quick finders of the approximate amount of hyperopia.

Optical Briefs and Notes.

L. G. Miller, optician, formerly connected with Herman & Co., Williamsport, Pa., has opened offices at 410 Pine St., that city.

A. J. Carruth, Herington, Kan., and B. L. Buley, Monett, Mo., called on the Kansas City, Mo., optical trade last week.

Elwood Riggs, manager of the Kansas City, Mo., branch of the Columbian Optical Co., is making a business trip through Kansas.

George W. Wells, of the American Optical Co., was the guest of D. V. Brown, Philadelphia, Pa., at his home in Tioga, Saturday and Sunday last.

F. A. Rowsey has been engaged by W. J. Burns, manager of the optical department of Williams, Brown & Earle, Philadelphia, Pa., as assistant.

Dr. Charles T. Brown has just completed the monthly course at the Philadelphia Optical College and will start with optical goods exclusively at Rutland, Vt.

Jacob Rubenstone has opened a retail store at 1607 Susquehanna Ave., Philadelphia, Pa. He has added an optical department to this store, which is conducted by Mrs. Rubenstone, a graduate optician.

J. Will Terry, of the Omaha, Neb., office of the Columbian Optical Co., passed through Kansas City, Mo., on his way to El Dorada Springs, Mo., where he has gone for his health. Later he will go to Buffalo, N. Y.

A. H. Pendergast, a traveling optician, was arrested while in Kansas City, Mo., last week by two detectives and taken to Iola, Kan., where he is confined in jail at present. He claims that he is innocent of the charge on which he was arrested.

Frank Adams, of D. V. Brown, wholesale optician, 740 Sansom St., Philadelphia, Pa., is on a trip through the State and reports business only fair. Jack Lynch, of the same house, is in West

Virginia and says trade there is very good.

D. Buchanan & Son, Richmond, Va., propose to enlarge their optical department, and their optician, William W. Barrs, spent February and March at the Philadelphia Optical College. Dr. O. S. Highbarger, Burkittsville, Md., spent February at the Philadelphia Optical College. He has been a successful optician for many years, but feels he has reaped much benefit from this post-graduate course.

In the Superior Court in Portland, Me., March 15, the case of Lesser Franklin vs. John L. Town was heard. This is an action upon a promissory note for \$80, the plaintiff being the endorsee. The defendant is a jeweler of Brunswick, Me., and on the 25th of last June entered into a contract with the agent of the Le Maire Optical Co. of New York, to handle their goods. At the time of signing the contract the defendant signed five notes of \$80 each, the note in suit being one, with the understanding that the agent was to send him optical goods to the amount of \$400. The agent was to select such goods as would be suitable for defendant in his line of trade. Shortly afterward the defendant received a consignment of goods from the company which, upon examination, turned out to be worth only about \$100. H. E. Murdock, of Portland, examined the goods and stated that glasses for which the company charged \$20 a dozen were, in fact, worth only \$2.90 a dozen. The defendant thereupon refused to receive the goods and wrote the company that he rescinded the contract and asked for the return of his notes. This the company refused to do and afterward endorsed notes over to plaintiff, a resident of New York. The defendant now claims as matter of law that the notes were obtained through fraud and that the burden is upon the plaintiff to show that he is an innocent holder. This Le Maire Optical Co. have no

Optical Department.

[Continued from page 63.]

connection with the Paris house of Le-maire

D. J. Kramer, Salida, Col., has added a retinoscope to his office equipment.

W. W. Essick has established an optical manufacturing business at Reading, Pa.

Optician Plumley, Bridgeport, Conn., has removed his office to 147 Prospect St

A. Marschuetz, of the Spencer Optical Mfg. Co., New York, was in Denver, Col., last week.

George W. Custer, Du Bois, Pa., is the oldest established optical and jewelry house in that place.

Charles L. Hall, Gallipolis, O., has moved his optical and watch repairing shop to new quarters.

The Hirsch Optical Institute, Kansas City, Mo., have filed an application for a *pro forma* decree of incorporation.

Homer B. Hoyt, jeweler and graduate optician, is now located at 9 United Bank building, Washington St., South Norwalk, Conn.

The Geneva Optical Co., Chicago, Ill., will, on or about May 1, start a branch on the seventh floor of the Oriel building, St. Louis, Mo.

Arthur Carpenter, formerly with the Globe Optical Co., Boston, Mass., is now with Thurston's photographing establishment, Bromfield St.

Last week thieves broke into a show case belonging to S. C. Dustin & Co., opticians,

210 Woodward Ave., Detroit, Mich., and stole the contents valued at \$66.

White & Lighter, Glace Bay, C. B., have opened a first class optical department in connection with their jewelry business. Mr. White is a graduate of the Philadelphia Optical College.

The Bell bill has been advanced to the third reading, in the Assembly at Albany, N. Y., and no further obstacles to its soon becoming a law are anticipated, at least none that will affect the optical interests.

Letters received from Edwin P. Wells, president of the Globe Optical Co., Boston, Mass., who is in Porto Rico, indicate that he is having a most enjoyable time. Mr. Wells will return to Boston about the first of April.

J. A. Caoutte, of the Parisian Optical Co., Lynn, Mass., is preparing to open a new store at Springfield, Mass., and was last week in Boston buying his stock. The Lynn store will be continued, his partner, D. B. Rubin, being in charge.

T. C. Beardsley, of Holdredge, Neb., has decided to locate at Billings, Mont., and engage in the jewelry and optical business. For the present he will be located in Dr. Gainfordth's office, but will open a line of jewelry as soon as he can find a location.

The Master in Ordinary, Toronto, Can., has declared a dividend of 15 cents on the dollar in connection with the Canadian Camera and Optical Co., whose liabilities amount to \$17,000. A further dividend of 10 per cent. will be declared shortly and it is probable that the creditors will receive their claims in full. Argument

has been heard and decision is pending as to whether the A. R. Williams Co. were entitled to a preferred claim on some machinery they supplied to the defunct concern.

In the Superior Court, at Worcester, Mass., Wednesday last, the case of Leonia Lemire vs. Edward E. Dammers, optician, was tried. The case is an action of tort to recover for alleged injury to the eye of the plaintiff, March 22, 1900, due, it is alleged, to the negligent examination of plaintiff's eye by the defendant, who, it is claimed, used a powerful artificial light. Sullivan & O'Connell appeared for the plaintiff and George S. Taft for the defendant. The jury returned a verdict for the plaintiff for \$525. The defendant has taken an appeal. He claims the method used is the same he has always used and the same used by all opticians.

For the past year the Columbus Pharmacal Co., Columbus, O., have conducted an optical department with success. The company deal with physicians exclusively and do not visit the drug trade, but everything is carried that is needed in the profession. There are 14 salesmen on the road covering Ohio, Pennsylvania, Indiana, western New York, Illinois, West Virginia, Kentucky, Virginia, Michigan and Missouri. The optical department draws from all this territory through the traveling salesmen, and the orders come in in the form of prescriptions directly from the physicians. The company may put in a complete jobbing department later on. C. Lorain Harrod, M.D., has charge of the department and conducts it in a very practical and business-like manner.

LUBRICATION OF DELICATE MACHINERY.

[Paper read by Joseph K. Nye, before the American Horological Society, Chicago, March 7.]

[Continued from page 66, March 20.]

NOW, all animal oils are like our mineral oil, composed of different combinations of hydrogen and carbon, but it has one addition—an element which binds them into closer communion, the common element—oxygen. Could we take a combination of, say, 11 atoms carbon to 20 atoms hydrogen, and add to this six atoms oxygen, we should have a combination which would resemble sperm oil, pure and simple, and we should have one which would with difficulty be separated from its hydrogen. The oxygen by some inscrutable provision of nature has bound them firmly, and it is at present beyond the human mind to conceive what constitutes the attractive force that these various combinations of atoms hold one to another. You will see that this combination known as sperm oil has filled the requirements for a delicate watch machinery. It has a good specific gravity. It has proper viscosity to be retained in the bearing. And its low evaporative properties, or in other words, its reluctance to give up its hydrogens make it very suitable to be retained for a long period under the varied conditions of heat and cold and the slow wear to which a watch is subjected; and so it would, but even under these conditions its 20 parts of hydrogen, which however tenacious of their hold are not inseparable, will in a short time wholly give up to the mechanical equivalent produced by our tiny bearing. We must search for a similar oil which contains more of these life-giving atoms of hydrogen, which, while leaving its combination rapidly enough to carry off the heat produced, will still have enough of them to last for the period that a watch is expected to wear.

Far out in the blue depths of the Atlantic Ocean nature has a small workshop. Into the digestive cauldron of a huge, slimy fish she shovels myriads upon myriads of little brown animal life, which look as much as anything like the short section of a dry pine-needle. This fish is known to sailors as the porpoise, or blackfish, and the pine-needle is the squid. The porpoise knows little about horological construction, or just why he is consuming this squid. He is satisfying his hunger. But by the fearful and wonderful processes by which he is made it is necessary that part of his construction should be a brain, and a certain substance within his jawbones known as marrow. All this he carries with him in his wanderings

about the broad ocean, until on a certain unfortunate day he, with perhaps a hundred or two of his fellows, swims within the shallow waters which surround old Cape Cod. The Lord has not made as a part of the aforesaid brain the knowledge of the law of tides, and so long as there is water enough to swim in, if the tide is high he goes far in toward the shore and plays and gambols with his young in the warm and shallow water; until of a sudden he realizes that the depth is not sufficient for his comfort; and then comes the struggle which sees his finish. Down on the shore armed with knives, pitchforks, whale spades and various other death-dealing implements, comes a delighted horde of Cape Codders, and between fish and man there ensues such a scene of blood and destruction that is given to but few to witness, until upon the yellow sand of the old Cape perhaps a hundred or more of these fish have given up their lives, that millions of people may be able to catch their train with certainty. The body of these fish produces an oil which is of little value, but the aforementioned marrow from the jawbone produces a reeking, slimy mass, out of which is produced the beautiful clear and limpid fluid which contains just the requisite number of hydrogens, carbons and oxygens, which dropped in minutest quantity into the delicate bearings of a watch shall go on day by day, week by week, month by month, and even year by year, wholly absorbing the small but definite amount of heat produced by the friction therein, and exquisite in its judgment to determine just when that heat has amounted to a sufficient quantity to liberate its little particles of hydrogen, striving to deviate not one iota from its proper absorption of this heat; doing its duty faithfully and never laying down its lubricating life until too much has been asked of it; and the watchmaker opening his customer's watch looks down into the little jeweled bearing to find naught but the little dark resultant of all this faithful work, and says: "This watch needs oiling," and straightway proceeds to clean the bearing from the little particle of carbon which has been left by the departing hydrogen; and having looked back on his record, he lays it down, saying, "Well done, thou good and faithful servant." And now having discovered the substance from which we can construct our lubricant, with all its necessary hydrogens, carbons and oxygens, it may be interesting to you to know a little of the long and toilsome process by which the reeking mass of slime as it comes from the fish is brought to perfection.

If the marrow could be taken away from the fish without the addition of bone, blood or animal matter, all would be well, but the process with such rough instruments as are

available is all but impossible, and through all the process of refinement clear down to the finished product entails trouble for the refiner. However, brain, marrow, blood, bone and muscle are all carried to a huge kettle, where by gentle heat, either from the sun or from a small fire, the mixture is slowly and carefully warmed. At this point a little overheating would ruin the whole mass. After many days of this heating a large portion of the animal matter settles out, leaving the top of a beautifully clear amber color. At ordinary temperature the oil from the body and head are very much alike in appearance, and just here comes the great temptation to the honest fisherman to mix a little of the cheap product with that of great value, and as it is only later in the process of refinement that such mixture can be revealed, the manufacturer is often at great loss in his purchase.

At this point the oil is shipped to the factory, where the first process is again to go over the fisherman's gentle heating, and thus in a more delicate manner to complete his work. The oil is then placed in large tanks or casks to await the process of grading, and often two years must elapse ere the trained and skilful eye of the refiner can tell into just what class to place his oil. I suppose there are not six men in the world who have had the long and patient training and the necessary experience to separate these delicate oils into their proper qualities; and indeed it would be almost impossible for me to describe the *extremely* delicate variations in color, texture, smell and taste which go to make up his report. A very large part of the reliability of the oil so valuable to the watchmaker lies right here in this gradation under the almost intuitive skill of the refiner.

After these two years or more of rest, the oil has got to a condition where its surplus oxygens have united with whatever animal or loose organic matter may have been floating in microscopic particles within it, and they are easily removed by the ordinary strainers of an old factory; but something is still left in the oil which is very sensible to the high or low range of temperature, and to remove this requires its subjection, while spread out in thin layers, to a temperature far below zero. And just as in many processes no chemical change can be made to take place until the substance is heated to a high temperature, so with our oil, no further change in its construction can be made except at this very low temperature, nor must it be cooled too rapidly. When properly done the process is one most interesting to watch. All through its liquid amber little flecks of translucent material appear, joining and rejoining like frost on a windowpane into most beautiful forms, resembling a miniature forest whose foliage is

white. By means of a certain fine and close grained fabric, these particles at this juncture are filtered out; and, strange to say, this residuum, once a portion of a brilliant, almost colorless fluid, never even at normal temperature becomes anything but a slimy mass, resembling poor lard. In order to get this low temperature, it is necessary to ship the oil to a very high latitude, where long continued cold can be depended upon; and for this purpose the refinery which I represent has established a chilling plant at St. Albans, Vt. The oil is then reshipped to the factory, and for another year is watched and tended with the utmost care, and finished by a process known only in the Nye factory, until it is ready for market, the most delicate and highly refined article of its kind ever offered to the world.

And now, gentlemen, I have purposely made this paper short, for I have with me nearly a hundred stereopticon views, taken on the spot, which will far better than any paper tell you the story of the production of these fine fish jaw oils.

Faith Curing Timepieces.

"THE mercantile value of the Faith Curist profession is becoming evident, unless my credulity has been overstrained," said an old jeweler to a CIRCULAR-WEEKLY reporter. "It has been suggested to me that to the retail jewelry trade a wide field of enterprise has been opened, wherein long dormant material

may be roused into efficiency and live dollars.

"Every merchant jeweler has an old box stowed into an out-of-the-way corner, into which, for years past, has been dumped decrepit, invalid, diseased, hypochondriacal, deranged watch movements. The cases thereof have gone to the crucible and been 'purified as by fire,' but the revivifying of the debilitated actuating power within the cases has been heretofore beyond the reach and ken of plodding jewelers. In fact, it is beyond the expedient to the average watchmaker to-day. But 'What is the matter with Faith Cure?' is echoed by 'It's all right.'

"There's nothing wrong with these movements which it is not possible to rectify. The watchmaker cannot, but the Faith Curist can; of course, if a pinion or staff be missing, the Faith Curist cannot think, or speak, it into existence; but given all its component parts, the problem is solved, because the Faith Curist has resolved that it shall be so; that it shall be so is as clear as logic based upon mysticism can make it. No cat has two tails; a Maltese cat has one more tail than no cat; therefore, a Maltese cat has three tails. Proven beyond a doubt in the estimation of my informant," persisted the old jeweler, "and if THE JEWELERS' CIRCULAR-WEEKLY has truly at heart the interests of the watchmakers, it will disseminate this information over the length and breadth of this land, so that 'he who runs may read,' and if the Faith Curists can make those watches run, why shouldn't they make them read?"

"Here is a tentative, wide open market for old watch movements which have shown incapacity to 'move,' either mechanically or metaphorically. Jewelers should get them out ready for the demand by these professors of aero-dynamics.

"My informant assures me that testimony suggestively to this effect was given, recently, in the Surrogate's Court of New York County."

Independence Hall's Historic Clock.

THE historic clock in Independence Hall, Philadelphia, Pa., which recently stopped for about a week, has been completely overhauled and repaired by Samuel Dudgeon. Mr. Dudgeon says that the cause of the historic clock's breakdown was the loosening of a pin in the rack arms, whereby the lock arms of the striking part were released, with the result that one of the latter was broken off short at the hub by coming in contact with one of the larger spur wheels. Among other repairs found necessary was the replacing of the gun metal roller bearings of the pulleys carrying the heavy weights with Babbitt metal roller bearings, and a new wrought iron connection between the chain and cams which raises the 350-pound hammer that strikes the hours on the bell. The clock is of the type known to the trade as the six leg gravity escapement tower clock. The dials of the clock are nine feet in diameter. Together with the bell it weighs 12,000 pounds.

HOROLOGICAL QUERIES.

NOTE.—Questions bearing upon the watch-maker's bench will be answered under this head. **THE JEWELERS' CIRCULAR-WEEKLY** has facilities for answering, in a practical manner, all horological queries, and offers its services to the trade.

GREENFIELD, Mass., Feb. 12, 1901.
 Editor of **THE JEWELERS' CIRCULAR-WEEKLY**:
 Can you inform me, through your answers to correspondents, about what time hall clocks were made by Wilson, Birmingham, England? I have just obtained one which was used by my father as a regulator when he began business here in 1844, 57 years ago, and it is in good condition to-day.
 Yours truly,
 E. H. HOLLISTER.

ANSWER:—In none of the records at our command have we been able to trace a clock maker named Wilson, of Birmingham, Eng. Expert repairers of clocks, such as Thomas Reynolds, 13 E. 30th St., New York, never heard of a manufacturer of this name and say that, as a rule, Birmingham clocks are not very valuable. We would advise Mr. Hollister to write to the secretary of the British Horological Institute, Northampton Sq., Clerkenwell, London, Eng.

DANVILLE, Pa., Feb. 15, 1901.
 Editor of **THE JEWELERS' CIRCULAR-WEEKLY**:
 Can you tell me the date of the first striking clock?
 Yours truly,
 OTTO SALZMAN.

ANSWER:—The first mention that authoritative records give of a striking clock is that, in the "rule" of the monks of Citeaux, drawn up in 1120 and quoted by Calmet, the duty is prescribed to the sacristan of so adjusting the abbey clock that it might strike and awake the monks for matins. Dante, who was born in 1265 and died in 1321, mentions an "orologia" which struck the hour. Previous to the Citeaux clock, records show that any device resembling a striking clock was merely a bell sounded at regular intervals, the instant of ringing being determined by a sun dial or sand glass. The word "clock" signifies a bell. Further information on striking clocks may be obtained from horological books.

LOUISVILLE, Ky., March 7, 1901.
 Editor of **THE JEWELERS' CIRCULAR-WEEKLY**:
 Will you kindly give us the names and addresses of several schools of horology and engraving? Thanking you in advance for this information, we are,
 Yours very truly,
 JAMES K. LEMON & SON.

ANSWER:—Bradley Polytechnic Institute, Horological Department, Peoria, Ill.; S. W. Eckley (for jewelers and engravers), Peoria, Ill.; W. F. A. Woodcock & Co., Winona, Minn.; St. Louis Horological School, 2308 Locust St., St. Louis, Mo.; Philadelphia College of Horology, 1213 Filbert St., Philadelphia, Pa.; Ezra F. Bowman Technical School, Lancaster, Pa.; La Porte Watch School, La Porte, Ind.; Omaha Watch Repairing and Engraving Technical Institute, 509 Sheely Block, Omaha, Neb.

The Boston trade were considerably interested in an exhibit of art jewelry shown recently by Miss Barteaux, in her studio at 4 St. Botolph St., Back Bay. The collection included some beautiful specimens of the new long silver girdles now being worn and also many novelties which are believed never to have been shown in this country before.

WORKSHOP QUERIES.

NOTE.—Questions bearing upon the various departments of the jewelry or silver ware workshop will be answered under this head. **THE JEWELERS' CIRCULAR-WEEKLY** has facilities for answering in a practical manner technical queries of this character, and offers its services to the trade.

NEW YORK, March 4, 1901.
 Editor of **THE JEWELERS' CIRCULAR-WEEKLY**:
 How would you suggest to do oxidizing in a cold way?
 Yours,
 MECHANIC.

ANSWER:—Silver is oxidized in the cold way by immersing it into a saturated solution of liver-of-sulphur, which is prepared and kept for instant use, by dissolving a small piece of the liver-of-sulphur in an ounce of water. Always keep the bottle containing the fluid tightly corked.

WALLINGFORD, Conn., March 3, 1901.
 Editor of **THE JEWELERS' CIRCULAR-WEEKLY**:

Being a subscriber of your paper, I feel at liberty in asking you a question about the alloying of silver. Will you please tell me if there are any alloys that could be put in silver (when smelted) so when you come to work the silver into different articles you wouldn't have to have the articles fired (or fire-scaled)? You know, after annealing silver you have to have it fire-scaled before you can finish it.
 Yours truly,
 SILVERSMITH.

ANSWER:—We are sorry that we do not know of any alloys that can be put into the molten silver to prevent the objectionable fire-coating. As correspondent is, no doubt, familiar with the processes of removing fire-coat, we will not give any instructions upon that subject.

PROVIDENCE, R. I., Feb. 14, 1901.
 Editor of **THE JEWELERS' CIRCULAR-WEEKLY**:
 Will you kindly give me the following information through your columns, and greatly oblige? Do the Alvin Mfg. Co. or any other firm hold a patent for depositing silver on glass and then engraving through it, and if so, what is the date of same?
 Very truly yours,
 N. T. CROSSMAN.

ANSWER:—The Alvin Mfg. Co.'s process relating to silver deposit ware is patent No. 472,230, granted April 5, 1892.

ANDERSON, Ind., March 2, 1901.
 Editor of **THE JEWELERS' CIRCULAR-WEEKLY**:

Can you inform me as to the best way to transfer one engraved letter to another piece to be engraved, on knives, forks and spoons? Am now using a postal card and soap, but that takes too long, and I have used a roller, but with no success. What is the difference of heat in using natural or manufactured gas? Which is the hotter?
 Yours respectfully,
 GEORGE GREYER.

ANSWER:—The best way to transfer engraving from one piece to another is to rub transfer wax into the engraved letters. This wax is made of: Beeswax, 3 parts; tallow, 3 parts; Canada balsam, 1 part; olive oil, 1 part. If the wax becomes too hard, add a few drops of olive oil, and if too soft, a little more beeswax. Care should be taken that the wax does not remain on the surface about the engraving, otherwise the impression would be blurred. Then moisten a piece of paper by drawing it over the tongue and lay it on the engraving. Upon this is laid another piece of dry paper and securing both with the thumb and forefinger of the left hand, so they will not be moved, go over the entire surface with a burnisher made of steel or bone, with a pointed end. This will press the lower paper into the engraving

and cause the wax to adhere to it. Then the top paper is removed and the corner of the lower one gently raised. The whole is then carefully peeled off, and underneath will be found a reversed, sharp impression of the engraving. The edges of the paper are then cut so it can be fitted in a position on the other articles similar to that on the original one. When this is done lay the paper in the proper position and rub the index finger lightly over it, which will transfer a clear likeness of the original engraving. If due care is taken two dozen or more transfers can be made from a single impression. 2. Several persons have informed us that natural gas yields a greater amount of heat than artificial gas, due, no doubt, to its composition and greater pressure, but as we cannot find any authority for the statement we do not commit ourselves.

THE RAMBLER'S NOTES.

WHAT THE RAMBLER SAW AND HEARD AMONG THE DEALERS IN ART POTTERY, CUT GLASS, BRONZES, ETC.

VARIED LINES OF POTTERY.

THE dealer looking for odd, weird or unique effects in pottery can do no better than to visit the warehouses of Charles Ahrenfeldt & Son, 52 Murray St., New York, where samples of almost every European pottery that enters into the jewelry trade are now displayed. Italian pottery, as usual, is prominent in the line, while among the less familiar wares are Alsatian pottery, Hessian vases and jugs in crude effects, Bodenbach ware, Moravian vases of various forms, and a collection of Baden pottery, which recently received a gold medal at the Paris Exposition. In standard lines exceptionally fine assortments are here shown in Royal Vienna, Dresden and Royal Bonn. In Bonn one of the newest varieties is called the "Meissonier" and shows panels of blue with large, full figure decorations of men in costume, following subjects of the famous artist whose name the ware bears.

TWO FINE LINES FOR JEWELERS.

OF the many lines of art wares for the jewelry trade offered by L. Straus & Sons, 42-48 Warren St., New York, there are none which will appeal generally to all classes of dealers more than their own Rudolstadt pottery and American cut glass. The pottery, this year, shows more than the usual variety of decorations and embraces all classes of treatment, from the lightest of flower effects to the most beautiful and artistic figure panels, while ivory treatment still remains a prominent decoration of the line. The cut glass includes a variety that could hardly be increased, either in grades, the number of styles of cutting, shapes, or different pieces. Rock crystal cutting is also to be found in this line, on both the white and colored glass ware, while a collection of pieces, white and colored, mounted in sterling silver, is both rich and varied.

COMPLETE AND RICH LINE OF GILT REGULATORS.

GILT regulators form one of the lines which Glaenger Frères & Rheinboldt, 6-28 Washington Pl., New York, may, with pride, call to the attention of importing jewelers, as it is one of the most complete as well as the richest that the dealer could desire from which to select his stock. Beginning with the plain

gilt regulators, the oval shape pieces and the frames with bead edge, the line spreads out into fancy regulators with medallion and rhinestone pendulums, after which come the cloisonné enamel pieces, wherein is an assortment so rich and large that an inspection is necessary to give an adequate idea of its extent and beauty. There are, however, a few pieces so unique in character that special mention should be made of them. These are regulators with porcelain cases and domes decorated with figures in Vienna style on a ground of deep blue. In some of these the clocks are between six pillars which support the dome; the dome, pillars and band at the base showing the Vienna decorations. Others are in box shape, with the dome and case decorated in the same manner.

EASTER NOVELTIES IN POTTERY AND GLASS.

AMONG the Easter novelties sold by Bawo & Dotter, 26-32 Barclay St., New York, are many lines, prominent among which are a number of small vases in Venetian style, with serpents or flowers connecting the stem to the bowl. In a similar glass ware is shown a collection of ornaments somewhat larger in size, which consists of representations in colored glass of lilies, roses and other plants with leaves, showing variegated metallic colorings. In cameo ware is to be found an excellent collection of eggs in the form of vases and ornaments; the white cameo decoration consisting principally of rabbits or birds on a solid matt ground of green or blue. A number have full figures in white of rabbits, chickens or babies. Easter eggs of glass and china are also shown in many other wares.

THE RAMBLER.

Reverent Care of Old China.

WE all sustain a certain measure of damage from the wastefulness of the class which, using what they do not pay for, have no adequate sense of its value. Costly cut glass and exquisite china are nicked and shattered past repair by clumsy and careless persons, who have no idea of the heart-breaks they cause.

We women love our pretty cups and saucers, our dainty vases and plates, and our beautiful bric-à-brac, and around every piece a myriad of associations cluster. This bit reminds us of Florentine sunshine, the other came from the Swiss

Alps, another yet always brings up a glimpse of an English lane overrun with roses. No money can pay for those delicate and lovely things which have become endeared by the use of a lifetime, and sacred through the touching of fingers now folded under the coffin lid. We shall secure the minimum of waste in most cases by a return to the old plan of our grandmothers, when, following their good example, we shall wash our china ourselves. It is work for gentlewomen, not for peasants, with no training in the art of deft handling and fine manipulation.

A tin basin divided into compartments—one for washing in hot soapsuds, piece by piece, the other for dipping and rinsing—a supply of soft towels, and a lady not in a hurry, are all that are needed to enable us to hand our china down, an heirloom, intact, to the generations which are to follow us.

An old English custom, traditional in the leisurely homes across the water, was imported by the colonial gentlewomen of the south, when they first established family life on this side of the great sea, and to this day, in Maryland, Virginia, Kentucky and South Carolina the mistress of the house and her daughters personally care for their fine china. A beautiful array of rare china is shown in a New England homestead, the envy of collectors, the admiration of guests, so exquisite are the shapes, so transparent the eggshell thinness, so harmonious the coloring and the whole equipage is perfect still—not a single piece having been broken since a Puritan ancestress brought it from Devon, long before the Revolution. The daughters of the house have always, with religious care, washed and wiped and taken down and put away this treasure beyond price.—*Collier's Weekly*.

You May Believe This or Not.

A STORY comes from Middletown, Pa., that on March 8, 1901, at 8 o'clock in the evening, a grandfather's clock purchased by a Mr. Irwin, of that town, March 8, 1831, at 8 o'clock in the evening, began to strike and did not stop until it had struck 1,000 times. After a short period of rest it cut loose again for another 1,000 strokes. The clock was purchased at the store of the late Joseph Ross, in Middletown, who was the father of Charlie Ross, who was kidnaped at his home in Germantown, Pa., a number of years ago. The clock has been keeping good time for seven decades and its queer freak cannot be accounted for.

THE JEWELRY REPAIRER'S HANDBOOK.

BY JOHN G. KEPLINGER.

Copyright by THE JEWELERS' CIRCULAR PUB. CO., 1901.

(Commenced in issue of Feb. 6, 1901.)

SPECTACLE AND EYEGLASS FRAME REPAIRING.

THERE is probably no more difficult job for the average jewelry repairer than that found in a broken spectacle frame, and especially so in one that has been broken and repaired near one place several times before.

If the reader will note where spectacle frames are generally broken, he will see that nearly two-thirds of all frames are broken on the left side, either in the nose piece, eye wire or side piece. This is due, no doubt, to the manner in which persons put on and remove the spectacles from their faces. Another fruitful source of breakage is the incorrect manner of holding spectacle frames while cleaning the lenses. Persons, as a rule, hold the frames by the nose piece while wiping the lenses. This is wrong, for by so doing the frame is given a severe strain which may cause it to break in the eye wire. The correct way to wipe the lenses is to hold the frame by the joints. This will relieve the frame of nearly all strain and reduce the possibility of breakage to a minimum.

Each time a spectacle frame is repaired it is polished and, consequently, it is made somewhat weaker, as all polishing cuts away more or less of the metal.

In repairing a spectacle frame the workman must leave it as strong, if not stronger, at the place where it had been broken, than it was before. This is an easy matter if due care be taken in soldering, filing and polishing. In illustration, we will take a 10-karat frame, which has been broken at any place in the frame—in this case, in the eye wire near the nose piece.

The first thing to be done is to secure a nice, flat piece of charcoal or any other kind of soldering block, and some sprigs, which can be made of binding wire and

are used to hold the frame and broken ends in position on the soldering block. Then, these being in readiness, clean the broken edges with a file or scraper, and securely fasten the frame on the soldering block so that the broken edges meet but do not press tightly against each other; otherwise in soldering the frame the ends would unite and spring into a V-shape and cause considerable trouble. When the frame is secured on the soldering block, prepare the borax paste by placing several drops of water on the plate and rubbing the cake of borax in it until a thin paste is formed.

Then cut the solder and after moistening the joint with a camel's hair brush, apply the solder with the moist end of the brush, or with a pair of tweezers. Then, with an easy flame, heat the solder and as little as possible of the frame on either side of the joint, until the solder flows. After the solder flows examine the joint to ascertain if it is perfectly united and, if so, remove the frame from the soldering block and pour heated pickle over the joint to remove the borax and fire-coat. But if the joint be not perfectly united re-borax and reheat the frame and cause the solder to flow. If not satisfactory this time, remove the frame from the charcoal, clean it and proceed as before. It may be well to state that the repairer will not have much trouble in this direction if the manipulation of the flame is thoroughly understood and proper care is taken in regard to keeping the work clean. Be sure that there is no foreign matter in the water or on the borax slate which could get into the paste. It is also advisable that the fingers do not touch the parts to be joined, as the grease and perspiration from one's fingers will prevent the solder flowing.

As stated before, in all spectacle repairing the workman should endeavor to leave the joint as strong and as neat as possible. To do this, the solder should be the very best obtainable, and in this connection we wish to state that no good repairer of spectacles or jewelry will use silver solder on gold work. This might be excused on work where it does not show and is gilded afterward, but even this should not be done—should be used and placed on the outside of the eye wire, when the break is in the eye wire—and allowed to melt and flow through to the inside of the eye wire. In this manner the solder will flush the joint on the outside as well as in the inside. The surplus solder on the outside can easily be filed so that the place of the break will be thicker after it is repaired than the other part of the eye wire. Of course, a lump of solder should not be left large enough to attract attention. The solder which flows on the inside of the eye wire can easily be removed by cutting crosswise inside the eye wire with a square graver, or lengthwise with a round graver similar in shape to an inside ring graver.

ART IN GLASS CAMEO WORK.

THE art of glass cameo work is one that, since ancient Greek and Roman times, has had no more beautiful expression in the form of decorative pieces than it has to-day, and to Thos. Webb & Sons, Stourbridge, England, more than to any other one man or firm for 1,000 years past is due the revival of the exquisite work of which the Portland or Berberini vase is the best known and most celebrated example. The most artistic cameo work which the house of Thos. Webb & Sons produce is the work of Mr. Woodall, an artist of rare skill, whose cameo work is considered by connoisseurs to rank with or even excel the ancient masters of the craft whose works are still extant. A notable example of Mr. Woodall's cameo work is here illustrated, and no better description of it can be given than is contained in the fol-

lowing extract from the *Art Critique*:
 "One of the latest of Mr. Woodall's designs, called 'Moorish Bathers,' is wrought

encloses the design. The scene is laid in the interior of a Moorish palace, where a bevy of beautiful maidens are seeking relief from the heat of a southern climate or the ennui of a too luxurious existence, in the pleasures of a bath. The architectural features of the buildings, which surround the bathing court, remind one of a hall in the Alhambra itself. Clustering pillars and toothed arches support a facade, which is fretted and carved with a lavish richness of minute decoration, and in the background, with wonderful perspective, a colonnade runs away to a door of exit, distant and dim. A flight of steps leads down from the marble floor of the court to the bath, in which a graceful nymph is dis-

The Francis Engraver

If you think of buying a machine and desire peace of mind thereafter, post up now on the difference between a turning and a stationary point. The following homely explanation may enlighten you. The graver, like a plow, must plow a furrow to be effective. To plow an "O" with a single cut on an article held in one position, the plow-point must be successively turned toward all points of the compass before the "O" is finished. This produces a revolution of the plow, or the graver, and by the revolution a smooth cut is made in all directions. Suppose the plow cannot be turned, but like the compass always points one way, say toward you; you can see that if pushed around the field the top and bottom of the "O" must be scraped by the graver's sides, and one side of the "O" scratched by its heel in the graver's backward movement. The cutting edge of the stationary plow or graver cannot be correctly used except on a segment of less than one-fourth of the circle. Each backward stroke is a scratch, and all curves that the graver cannot squarely meet must be scrapes or scratches.

The above is just one little point of insight into a question of great importance to the prospective buyer of an engraving machine. Write me and I will send you something about machines that you will never forget.

Lancaster Watch Material

It is a fact that we are in a better position to furnish the watchmaker more promptly than any other jobber in the United States with the following material: Lancaster, Aurora and Hamilton. We are right at the seat of operation. We have the largest and only stock of Lancaster watch material in America. We can fill your order for **Waltham, Elgin, Hampden, New England, Columbus, Illinois, Rockford, Seth Thomas, Howard, Century, Trenton, New York Standard and Swiss** as quickly as any house in this country.

We Never Sell Imitation Material for Genuine.

We have a special made balance staff and a special mounted hole jewel. We can furnish you with these balance staffs for all of the above-named watches for **\$18.00 per gross**. Every mounted jewel is cemented and trued and we sell them for **\$7.50 to \$12.00 per gross, less 10 per cent. for cash**.

Give us a trial at your mail business and we will demonstrate our promptness.

REIGNING PARIS FASHIONS.

PARIS, March 25.—In my wanderings after novelties, I have noticed the loveliest creations, capable of setting women dreaming. The *motif* of most of these jewels is the stately iris, treated in a manner marking

suspended a large, fine pearl. Fig. 2 is an original belt buckle of oxidized silver, consisting of a curious and effective treatment of the flowers and leaves of the iris. Fig. 3 is an exceedingly attractive cloak clasp of enameled dead gold. It represents iris flowers, around which are gracefully twisted leaves and stems of that plant.

more popular. Those specially favored are composed of coral beads alternating with small disks carved out of rock crystal or topaz.

The latest craze among fashionable women consists of adorning the ends of their ties and ribbons with small appendages

Some of the most fascinating necklaces exhibited are those styled dogs' collars, bearing in front a large, dead gold plate treated in the new art style. From this beautiful plate start several rows of pearls close to the neck, behind which they are gathered together by a dead gold clasp. Appealing strongly to feminine taste are necklaces composed of seven rows of emeralds graduated in sizes and surrounded by dainty brilliants. The whole setting is in the purest Louis XVI. style with girandoles

FIG. 1.

FIG. 3.

FIG. 2.

the acme of the skill of our jewelers. The accompanying sketches (Figs. 1, 2 and 3) illustrate some of these new patterns now to be seen in the windows of the leading jewelry stores. Fig. 1 is a dead gold neck pendant in the shape of a heart, in the center of which is a beautifully enameled iris flower, while from the bottom is

and knots of brilliants. With these magnificent necklaces are shown superb corsage ornaments consisting, also, of emeralds and brilliants, set in the same style.

Necklaces of pale coral become more and

bearing the names of *aiguillettes* and *ferrets*. These are made mostly of gold, silver or enamel and most of them are handsomely wrought or richly jeweled.

The newest substantial hooks, fixed to the waist and intended to receive the usual chatelaine attachments, are made of gold or silver, very artistically chased, and repre-

sent snakes' heads or knots interlaced. An up-to-date novelty in this line is the dead gold case, the size of a small cigar case, the inside of which discloses two sliding compartments which can hold all the accessories composing the most complete chate-laine. Two large rubies form the clasps of this charming trinket which hangs by a thin chain of dead gold, sufficiently long to be twice twisted around the wrist.

The revival of jet jewelry is thorough and our leading firms are now exhibiting the most delightful jet ornaments, such as bodice buckles, buttons, etc.

Breloques are still in great popularity

FIG. 4—POCKET GLASS.

and every day new and original ones are created. Among the latest, I will cite a mouse of jade and a gold elephant caparisoned with precious stones. The pocket glass illustrated in Fig. 4 is much worn as a breloque. Its cover is a dainty pansy, the petals of which are enameled in blue and yellow, giving the flower a quite natural appearance.

Earrings continue to enjoy the steady popularity noticed some time since. The earstud has been dethroned by the Creole shape, which is now mainly in favor. The most popular pattern consists of a small, thin ring of gold, the outer edge of which is thickly studded with brilliants.

Charming tie pins for men consist of a pure brilliant mounted in platinum and surrounded by very tiny rubies, sapphires or emeralds.

Dinner tables are now beautifully adorned with several small jardinières, placed at random. They represent doves about to take wing. These are of Minton china and between the outspread wings of the birds are placed bunches of lilies or orchids. When wreathed with garlands of roses, these pretty accessories form an exquisite table decoration.

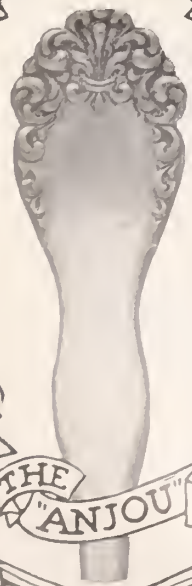

Sprats are served up in cut crystal boxes standing on a silver foot and laid on a small crystal tray. These boxes come in various rectangular shapes and in several sizes. They are provided with a cover of chased silver having a hook intended to bear up tongs. Sometimes the elaborately wrought cover has no hook and the tongs are simply put on the crystal tray upon which the footed box rests.

A. L.

F. A. Bonner, Ardmore, I. T., offers his business for sale, owing to ill health.

The business at Geneva, N. Y., conducted under the style of W. L. Young & Co., will hereafter be conducted by Louis H. Barth, who was a member of the firm.

THE "ANJOU"

"1835—R. WALLACE"

Stamped on an article of Silver-plated ware is a guarantee of worth and quality.

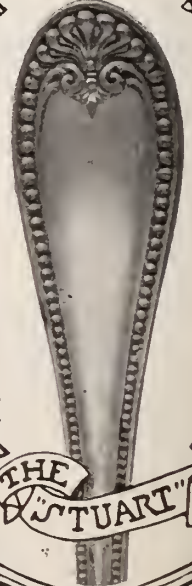

Every dealer, when selecting a line of plated ware, always has in mind two leading qualities, and these usually are durability and design, as these are the ones on which most depends his reputation as a dealer in honest ware.

Our goods are made of the highest grade of Nickel Silver, plated with FINE Silver. Our extra, or A 1 grade, is plated 20 per cent. heavier than the regular standard. Triple and sectional plates are also carried in stock.

In designing patterns we endeavor to select only such as are graceful in outline and thoroughly artistic in decoration, and which conform most closely to the taste of a discriminating purchaser, which our long experience enables us to do.

Our line consists of the following patterns: Tipped, Fiddle, Windsor, Shell, Joan, Virginia, Astoria, Stuart and Anjou.

Any dealer who is not already familiar with our line will find it much to his advantage to write for Catalogue and discounts.

EASTER FASHIONS.

A LADY'S RAMBLES AMONG THE JEWELERS.

For mourning use black suède and other black leather purses and card cases come with very dark gun metal mountings.

Side bags and purses of every description seem more in favor than almost any other costume accessory. One of the most artistic lately seen was of a beautiful shade of gray suède perfectly matched in color with the frame of French gray silver in relief design.

A pretty set of sleeve links and shirt waist studs is of white enamel with a golden fleur-de-lis on each article.

Paper cutters, envelope openers and book marks exploit the cross, the lily and other symbolic Easter devices.

Some of the newest leather belts are very narrow, in three sections united with rings, and are fastened with gilt harness buckles.

Manufacturers have adapted buckles very cleverly to the present fashionable figure. Some are triangular or pointed and others very narrow and curved to the contour of the waist.

One of the most taking of all the new bracelets is the flexible strap woven in fine gold or silver wire, with a keyless padlock which uncloses by the proper manipulation of the little knob in the keyhole.

An equally fascinating bracelet novelty is the double coil, two headed serpent, which can be unwound and worn very effectively as a necklace.

Latest in the popular leather fobs with pendant of horseshoe, or stirrup and bits, is one in the center of which is a crystal enclosing a perfect picture, in colors, of a horse's head.

It is predicted that ornamental gold, silver and jeweled buttons, as well as buckles and slides for ribbons, will find greater use in the costumes of the coming season. Circlets or rings enclosing jeweled flowers are the form of some of the newest imported slides for neck ribbons.

Among striking bits of French jewelry, so quaint and attractive that their limited appearance seems rather surprising, are the Louis XV. basket brooches—baskets of gold filled with flowers rendered in many colored jewels.

ELSIE BEE.

C. L. Byrd & Co., Memphis, Tenn., designed the new club button for the horsemen's club, of that city. It is near the size of a silver quarter, with "Memphis Jockey Club, 1901," around the edge, while the center is a symbol of the club, with a jockey's cap, whip, bridle, bit and horseshoe forming M. J. C. in gold with red enameled background.

The Diamond Markets.

ANTWERP, March 15.—The Antwerp diamond market shows much improvement. The negotiations for peace between England and the Transvaal which seem to have begun added a good deal to confidence in the trade. Should these negotiations lead to peace it is sure that the industry will gain very much by it.

Rough goods are very scarce and high. Several foreign buyers were here last week, among them being Mr. Roulina, of Paris, who bought roses for about 30,000 francs. Another Paris buyer, Mr. Wolfing, bought several lots of m \acute{e} l \acute{e} es and paid the new rise.

LONDON, March 14.—The negotiations for peace between our country and the Boers had as a result a better feeling in the market. Important sales of polished goods were effected during the week. Rough merchandise is taken in good lots by Continental buyers.

Antwerp and Amsterdam buyers were represented on the market, but they did not make large purchases. When they bought something it was only to employ their hands. Black diamonds, which are very rare, were sold at very high prices. It is not often that these precious stones are offered. There is also a demand for black pearls. Owners of these goods can command fancy prices.

PARIS, March 15.—The French diamond market shows much improvement. Brilliants and roses are asked for by several firms and they take all they can get. Some of them are sending their usual buyers to Antwerp and Amsterdam and put wide discretion in their hands.

The tendency of the pearl market continues very firm. The vogue of the coral is the same, this gem being very fashionable here.

William H. Wagner Kills a Constable in a Fight.

SHAMOKIN, Pa., March 18.—William H. Wagner shot and killed Constable Francis Schlief, Friday evening. Wagner has a store in which he sells jewelry and bicycles. Schlief entered the store during the afternoon and had some words with Mr. Wagner's father, and then went out. About 7.30 o'clock Schlief returned, and notwithstanding the customers in the store, walked up to W. H. Wagner and, pulling out a revolver, said, in a loud voice, "There's the gun that is going to kill both you and your father. I'll blow your brains out." Wagner knocked the revolver aside just as Schlief pulled the trigger. The bullet sped harmlessly across the room and a struggle between the two men ensued. In the scuffle Schlief fired a second shot, which did no harm. Wagner jumped behind the counter, secured a revolver that he kept there to protect his store. Raising the weapon the young man pulled the trigger three times in rapid succession. Schlief fell to the floor and died at once.

Wagner gave himself up and was placed in jail. Schlief's motive is not known.

PROVIDENCE, R. I., March 12, 1901.

I have this day been appointed Receiver of Howard Sterling Company, and by order of court am authorized to continue the business of the company as heretofore.

I shall therefore continue to run such business, and will take and fill orders as promptly as the company has heretofore done. The same salesmen who have heretofore represented the company will call upon you for your orders.

Thanking you in advance for a continuance of past favors, and promising prompt attention to all orders given, I am,

Very truly yours,

BIRNEY C. PARSONS,
As Receiver of Howard Sterling Company.

The Pan-American Exposition.

The Court of the Manufactures and Liberal Arts Building Will Be the Center of Attraction.

When the Pan-American Exposition opens at Buffalo, N. Y., next month, there will be so many features of exceptional interest to the visitor that to single out one part or place as worthy of especial attention might seem presumptuous. Nevertheless, for the information of the many members of the jewelry trade who will be among these visitors, attention should be called to what may be termed the "commercial art center" of the exhibition, which is the court of the Manufactures and Liberal Arts building, wherein will be installed the exhibits pertaining to artistic handicraft, embracing the finest work of America's artist-artisans in precious metals, glass, wood and other materials. It is intended that this court will contain the gold and silver work of the jeweler's art, jewelry of every kind and description, planished brass and copper, and a great many intricate and puzzling designs in wood, ivory, bone and other substances which are used for this work. Marble and stone work in fancy decorative forms will also be a feature, as well as ceramics, leather goods and tapestries.

The court has been constructed under the direction of Louis C. Tiffany, of the Allied Arts Co. (formerly the Tiffany Glass and Decorating Co.), and among the principal exhibitors will be the Gorham Mfg. Co., silver ware; Tiffany & Co., jewelry and silver ware; Allied Arts Co., glass ware, and W. & J. Sloane, carpets. These four concerns, whose efforts are practically responsible for the establishment of the court, will have the largest exhibits in this section and occupy the entire west side, while another prominent exhibit of interest to our trades will be that of the Rookwood Pottery Co.

The court will be something like a Roman basilica and with long, straight naves and arches all around. A clear story for ventilation and lighting will be utilized as a garden court and not for exhibition purposes. At the center will be a magnificent fountain designed by Louis C. Tiffany, and the surrounding naves and lower aisles will contain exhibit booths. The façades are all of the design of Mr. Tiffany and it might be here stated that this is the first attempt ever made for a distinctly architectural treatment of the interior of an exposition building, and makes the edifice in keeping with the purely artistic character of the exhibits it will contain. The smaller exhibits will be so combined in large collections as to have the appearance of large exhibits, and thus obviate the chance of giving a petty appearance to any part of the display. Among these larger collections embracing the smaller exhibits will be those of the National Arts Club and the National League of Mural Painters. With exhibits such as those of Tiffany & Co., Gorham Mfg. Co., the Allied Arts Co., the Rookwood Pottery Co. and the two associations mentioned as a basis, there can be little doubt that the court will be the main feature of attrac-

HAND-WROUGHT

..MARTELE'..

STERLING SILVER.

There is an increasing demand among the best trade for ware differing from conventional or machine-made designs; in other words, pieces which have every indication of being hammered up by hand from the flat metal into a finished article.

To supply this demand is the object of our line of MARTELE', which can be furnished at moderate prices, considering the workmanship and character of the ware.

No. C 2861. Dish. Length, 17 inches.

This illustration gives a fair impression of the actual article, although each piece produced is likely to differ slightly from the preceeding one of the same design, as is usually the case in hand-made wares.

Send for Circular No. 9, giving illustrations and prices.

BARLOW MFG. CO.,
Holyoke, Mass.

Boston Salesrooms, 125 Summer St.

tion for all those who are interested in the development of the useful along the lines of the beautiful.

Algar M. Wheeler, Superintendent of Manufactures, has received notification from Tiffany & Co. that if the necessary space were allowed they would make a larger exhibit than any they have ever made. Mr. Wheeler has been informed that the company will illustrate every branch of their immense business. The whole display will represent an investment of more than \$1,000,000.

The W. F. Doll Mfg. Co., 175 Broadway, New York, have received a contract to make the official watch for the Pan-American Exposition.

North Carolina is arranging to send a set of precious stones of the corundum series to the Exposition.

The Ingersoll dollar watch will be manufactured in one of the Exposition buildings, and as these watches are manufactured for this New York concern by the Waterbury Clock Co., a number of the workmen from Waterbury who are familiar with the watches will be sent to Buffalo and remain at the Ingersoll exhibit during the entire Exposition. The watches will be put together and made to run on the Exposition grounds the same as in the factory in Waterbury.

The work of making up the Fine Arts exhibition has progressed so rapidly, owing to the remarkable enthusiasm shown by the leading artists, that it is now an assured fact it will be the finest and most comprehensive collection of American art ever shown. It will be composed entirely of the

work of American artists living at home and abroad. There will be probably over 600 paintings and a magnificent showing of sculpture, the latter being placed both within and outside the Art building.

One of Boston's exhibits at the Exposition will be a collection of Grueby pottery, a creation in ceramics that has already won favorable attention abroad. The collection, valued at \$10,000, is now on exhibition at the store of Bigelow, Kennard & Co., Boston, Mass. The pottery is made by the Grueby Faience Co., South Boston, and takes its name from William H. Grueby, a Boston man, who invented the glaze or enamel which distinguishes it. The designs are by George P. Kendrick, also of Boston. The coloring of this pottery is chiefly a rich, deep green, though other colors, such as a light yellow and old rose, are sometimes employed, and its enamel is of a dull, though extremely smooth texture that distinguishes it from any other known variety of pottery, whether ancient or modern.

The jewelry stock of M. N. Grasby, La Crosse, Wis., was bid in by attorney Charles Schweizer, in the interest of clients, at a little over \$600. The stock invoiced about \$1,000. Grasby was absent from his store for about a month, leaving it in charge of clerks, who claimed to have no knowledge of his whereabouts. After the stock had been seized and application made for a receiver, Grasby returned, made an explanation and declared that he would straighten out his affairs.

GUARANTEED FOR TWENTY-FIVE YEARS.

THE NEW STYLES OF

CROWN 14k. FILLED

Cases represent a distinct improvement in shape, ornamentation and general finish over any previously shown. The quality is the same that has, in thousands of instances, withstood over a quarter of a century of wear. The Crown trade-mark means proved merit.

THE NEW STYLES OF

LION 10k. FILLED

Cases will still further prove their claim to be "first in style and worth" in the 10k. grade. The patterns are in great variety and equal those on the highest-priced gold cases. Most jewelers consider these cases the best selling and most profitable to handle of all watch cases.

GUARANTEED FOR TWENTY YEARS.

THE CHATHAM NATIONAL BANK, NEW YORK.H. P. DOREMUS, *Cashier.*GEO. M. HARD, *President.*W. H. STRAWN, *Ass't Cashier.***Two Men Arrested While Selling Stolen Jewelry and One Confesses.**

KANSAS CITY, Mo., March 28.—George Haight and William Leavett were arrested Friday in J. B. Schmeltz's jewelry store, 1231 Grand Ave., where they were trying to dispose of jewelry at so low a price that the jeweler's suspicions were aroused. They were arrested and when searched they had much jewelry in their possession—1,000 or more rings and other articles, worth \$2,500. They claimed they were traveling salesmen and succeeded in selling about \$40 worth to the Barr Jewelry Co. and a bill of \$160 to Harry Finkelstein, pawnbroker.

Haight said a friend of his had been in the jewelry business and failed and as he owed him money had given him the jewelry. They were held for investigation and given a thorough examination. Haight was proof against this until he was told that a telegram from Chicago identified him as one who had robbed a big wholesale jewelry house there. He then confessed that he was a jeweler and had stolen the goods from Otto Young & Co., Chicago, while in their employ. He worked there from November, 1900, until the second week in January, 1901. Leavett, who was arrested with Haight, denies any knowledge of the robbery. He had known Haight for several years, however. The two men were taken to Chicago, Monday night.

Two Strangers, Left Alone in a Store, Helped Themselves to Watches, Etc.

SCRANTON, Pa., March 27.—Several watches and chains were stolen from the store of E. W. Squiers, Peckville, last Thursday morning, by "Jim" Collins and "Tony" Farrell, of that place. Both men were arrested and are now in the county jail. They entered the store on the morning in question and inquired of Mrs. Squiers, who came to wait on them, if there was any work she could give them to do. She replied that there was not and retired into her living apartments in the rear of the store, thinking that the men would go out. She was called out into the store a short time later by the entrance of a customer and saw that a tray which had contained the watches and chains was empty on the top of the show case. Farrell was arrested. Collins eluded capture until Saturday afternoon. Only a small portion of the jewelry has been recovered.

Jeweler Krauss Left Store Unattended and Thieves Improved the Opportunity.

LA FAYETTE, La., March 25.—Saturday morning the jewelry store of P. Krauss was entered, when he stepped out for a few minutes, and some \$200 worth of jewelry stolen. As yet no arrest has been made.

Death of an Old Watch Case Springer.

Jules Racine, one of the oldest and best known watch case springers in the trade, died of pneumonia after a short illness, March 18, at his home, 207 6th St., Hoboken, N. J. The deceased had worked in this country for over 50 years and was widely known throughout the watch case trade and among the Swiss colony of New York. He was born in January, 1828, at St. Imier, Switzerland, and as a young man learned his trade in his native country. When about 20 years old he came to America and found employment with a watch maker by the name of Barbier, at 76 Fulton St., New York. He then went with L. & M. Mathez, for whom he worked many years, until they sold out their shop in 1877, after which he worked for the American Watch Case Co. For the past 10 years the deceased had been connected with P. A. Jeanneret, 77 Nassau St. In his death the trade lose one of its cleverest workmen and a man highly regarded by his friends and associates.

The deceased was a member of the Watch Case Makers' Mutual Benefit Association but of no other clubs or fraternities. He is survived by a widow and three daughters. The funeral services were held March 21 from his late home.

Property of the Rockford Watch Case Co. Sold and Will Be Operated at Once.

ROCKFORD, Ill., March 27.—The Rockford Watch Case Co. property has been sold by P. Allen Taft to Charles Schleicher and Joseph Meixner. They have formed a stock company and incorporated under the State laws. Messrs. Schleicher and Meixner have been employes of the company for the past 14 years. They will conduct the business on the same lines as it has been in the past, and will enlarge it to its former dimensions. The Rockford Watch Case Co. moved from Chicago, 18 years ago, where they were known as the Northwestern Watch Case Co., owned by a stock company made up of William Lathrop and other local capitalists. W. C. Taft took the management for the stockholders after the company came to Rockford and has conducted the business since. The factory at one time employed 60 men but only employs six now.

The present business will be conducted under the style of the New Rockford Watch Case Co. The incorporators are Joseph Meixner, Charles Schleicher and Alexander Hammer.

Mr. Stoehr, who conducted a jewelry store in Grundy Center, Ia., several years ago, recently died at his home in Freeport, Ill.

George Lang, who conducted a jewelry store on South St., Oyster Bay, N. Y., closed up his business recently and moved to Brooklyn.

William Bardel Sails to Europe to Assume His Consular Duties.

William Bardel, the recently appointed Commercial Agent of the United States to Bamberg, Germany, sailed Saturday, accompanied by his wife, three daughters and a son, on the *Pennsylvania*, to take up his duties in Europe.

Mr. Bardel has been connected with

WILLIAM BARDEL,
COMMERCIAL AGENT AT BAMBERG, GERMANY.

the jewelry trade of New York for 34 years and few merchants in the vicinity of the "Lane" have more friends or are better known than he. Mr. Bardel is a native of Nuremberg, one of the nearest large towns to his new post, and was born in that city, Sept. 29, 1846. Here he received his education and served his commercial apprenticeship in the toy business for which Nuremberg is famous. At the

age of 21 years he came to America, in the interest of Roth & Rau, commission merchants, to establish agencies for them in this country, and after finishing his work for this house he decided to remain in America. His first position in the jewelry trade was as salesman for Phillip Bissinger, importer of jewelry and manufacturing jeweler, 13 John St., and he remained with Mr. Bissinger until 1873. He then started in business for himself and two years later, in 1875, with Henry Heller, formed the firm of Heller & Bardel. The partners purchased from Mr. Bissinger his manufacturing plant, factory and tools, and established themselves as manufacturing jewelers at 13 John St., where they remained until the building was torn down in 1888. The firm then moved to 22 Maiden Lane. The firm dissolved in 1896, Mr. Heller retiring, since which time Mr. Bardel has continued alone.

For many years Mr. Bardel has been a noted figure in the jewelry trade and has been especially prominent in certain circles, particularly The Jewelers' League. Mr. Bardel was one of the first members of The League; was for many years a member of the executive committee; was chairman of that committee and of recent years a vice-president. He was also one of the founders of The New York Jewelers' Board of Trade and at one time vice-president of that organization. He was also among the first members of The Jewelers' Safety Fund Society, The Jewelers' Protective Union and The Jewelers' Security Alliance. Among

other organizations to which he belongs are the Masons and the Brooklyn Germania, of which association he is vice-president. Mr. Bardel was married in 1873 and has five children, two sons and three daughters, four of whom accompanied him and his wife to Germany.

Hoodlums Drove Mr. Ralle Away from Duncanville, Pa.

ALTOONA, Pa., March 25.—A Duncanville, Pa., correspondent writes as follows: We regret that the hoodlum element has succeeded in driving out R. Ralle, a watch maker who opened up a shop here about a year ago. Mr. Ralle is an inoffensive old gentleman and would not harm or molest anyone. He has been annoyed day and night by boys and young men thumping on the door and hammering on the windows and throwing dirt and filth into his shop.

P. C. Johnson has opened a jewelry store in Rockford, Wash.

I. Marks, Eveleth, Minn., will retire from business. Mr. Marks will take up hypnotism as a profession.

An old mirror and clock, said to be over 100 years old, were purchased by Mrs. Zeb Crosby, of Rochester, N. Y., at an auction, recently.

H. V. Taylor and E. W. Stroebel will open a jewelry and music store in Waterloo, Ia., about July 1. Mr. Taylor now has a jewelry establishment in the drug store of Wood & Wyant, in Waterloo.

Argument in Ontario Legislature Against the Trading Stamp Business.

TORONTO, Can., March 30.—The bill now before the Ontario Legislature giving municipal councils power to prohibit the use of trading stamps within their limits came up for consideration before a special committee of the House on the 27th inst.

G. P. Graham, M. P. P., the introducer of the bill, explained the measure, adding the customary arguments against trading stamps and similar devices and calling the attention of the committee to the numerous signed petitions sent in from all parts of the Province asking for the suppression of the system. The merchants had had ample experience as to the working of the device and the great majority had come to the conclusion that it was unprofitable, but owing to the keenness of competition many found it difficult to discard it so long as their rivals continued to resort to this method of inducing custom.

W. B. Rogers, representing the Retail Merchants' Association of Toronto, urged that trading stamps were detrimental to business and injurious to the morals of the community. The system appealed to the greed of those who desired to get something for nothing, but the advantage reaped by the customer was delusive as he was charged more for the goods he bought. The trading stamp companies were simply parasites whose operations in nowise increased the wealth of the country.

E. M. Trowern said that the system was simply an additional item in the cost of doing business. Many who had at first been favorable to the system had been convinced by actual experience of their mistake. Several others, including Mr. Fullerton, who appeared as counsel for the city of Toronto, spoke against trading stamps.

Two or three small dealers spoke in favor of the system and contended that the use of stamps had aided their business.

The committee reported in favor of the bill, adding a proviso that the trading stamp companies be given until Jan. 1, 1902, to go out of business, and another amendment allowing merchants and others to issue bonds redeemable by themselves to serve the same purpose as trading stamps. The bill will come up for a third reading in the House next week.

Death of Simon Salsburg.

WILKES-BARRE, Pa., March 31.—Simon Salsburg, for many years a jeweler in this city, died at his home, 27 N. Welles St., Friday afternoon, after a protracted illness, from a complication of diseases. He had been in failing health for about four years and for 10 weeks had been confined to his room.

He was born in Germany, 56 years ago, and emigrated to this country, 38 years ago, locating in the south before removing to Wilkes-Barre, 35 years ago. He continued in the jewelry business until his health failed. Mr. Salsburg gave freely to charities. He is survived by a wife, three brothers and two sisters.

FANCY STONES.

Under this heading are classified

RUBIES, EMERALDS, SAPPHIRES, PEARLS, SPINELS, TURQUOISES AND OPALS.

IN OUR 1901 CATALOGUE we illustrate all the above fancy stones, in natural colors, showing the different weights and prices of each. We also print with each a series of articles giving useful information. We believe dealers who are not fully posted could increase their sales of these goods by making a study of these articles and by keeping our catalogue handy for reference.

1 GR. 2 GR. 3 GR. 4 GR. 5 GR. 6 GR. 7 GR. 8 GR.

This cut, showing the different sizes and weights of pearls, is but one of the many illustrations of the various stones shown in our catalogue. If you have not received a copy we will be pleased to send you one upon application.

Futile Endeavors to Fleece Jewelers of the City of Mexico.

CITY of MEXICO, Mex., March 18.—A few days ago a well dressed young Mexican entered the "La Violeta" jewelry store, Plateros St., and asked to be shown some trivial article. A case containing 12 gold watches valued at \$1,800 was on the counter and when the salesman turned his back the caller swiftly closed the case of watches and slipped it under his coat. The salesman missed the watches and accused the would-be customer of having taken them. Thereupon the man started to run and was pursued and overtaken by the salesman. The watches were recovered and the man arrested and placed in prison. He has been identified as a well known thief.

J. A. Donovan, a young American who came to this city something over five years ago from Boston, Mass., is in serious trouble. On Feb. 1, Donovan called at the jewelry store, "La Mas Barata," this city, and asked to look at the diamond rings in stock. He selected one with a single gem and when told that the price was \$180 he pulled out a check book and paid for it with a check for the amount asked, signing the name of J. F. Dwyer. The clerk accepted the check and Donovan walked off with the ring. Ten minutes later, when the check was presented to the bank for collection, the holder was informed by the bank officials that the signer thereof had never had any funds in the bank. The proprietor of the jewelry store placed the matter in the hands of the police, but no trace of the alleged culprit could be found until two days ago when he was seen on one of the principal streets by a member of the secret police and was arrested. He was placed in Belem prison and is incomunicado.

Hampden Watch Co. Will Use Electricity as Motive Power.

CANTON, O., March 28.—Work has been begun this week in the various departments of the Hampden Watch Co. preparatory to installing electric machines, to be placed there within the next month. A contract has been made with the Westinghouse Co. that the machines be delivered by April 15. It is thought that they can be erected by May 1. The machines will be 10, 15, 20 and 25 horse power, according to the size of the departments to be operated, the whole aggregating 200 horse power. A new power plant is being erected at the Dueber Watch Case Mfg. Co.'s plant from which power is to be furnished. A fast running engine will operate a 200 horse power generator. President Dueber said this change means a saving of several thousand dollars annually. He says the watch business is promising and is better than last year.

Jeweler and Auctioneer Were Fined, but Will Contest the Case.

MIDDLETOWN, O., March 27.—J. C. Alexander, traveling jeweler, and J. T. Anderson, auctioneer, were each fined \$50 and costs for conducting an auction sale without first applying for a license from the city, they being charged by Casper Fenzel, a local jeweler, with being transient vendors and subject to the license regulations.

The license ordinance will be attacked in the Butler County Court of Common Pleas. The case has attracted marked attention as a test case. The city ordinance prescribes a \$10 a day fee. Alexander and Anderson contest payment on the ground that Alexander had opened up a jewelry store in good faith, and merely took the auction plan of selling goods after a business failure. The city contends that the failure was fraudulent.

Two young men attempted to rob the show window of J. H. Wenger, Tonawanda, N. Y., while he was supposed to be engaged. He saw one of them take a watch and with the assistance of a revolver compelled the prompt surrender of his property.

Another Silver Plate Co.

American Silver Co. Get the Bristol Brass and Clock Co.'s Spoon Department.

BRISTOL, Conn., March 29.—It was announced last night that the American Silver Co. had purchased the spoon department of the Bristol Brass and Clock Co. Last week the fact became public that the latter company intended to erect shortly a large building in addition to their present plant for the purpose of carrying on the manufacture of table cutlery. The American Silver Co. are a new corporation. They will absorb the present spoon department of the old company and will erect the new cutlery factory. The transfer of the books and business will take place April 1. For many years this de-

partment of the Bristol Brass and Clock Co. has carried on the manufacture of various kinds of copper, brass and German silver goods, plated ware and articles for the table. It is the intention of the new corporation to extend this business to larger proportions. From 75 to 100 new hands will be employed before many months.

The American Silver Co. were organized here yesterday and have asked to be incorporated under the laws of the State of Connecticut with a capital of \$200,000. The chief stockholders are J. Hart Welch, the president of the Bristol Brass and Clock Co., and Julian R. Holley, the general manager and treasurer of the same company. The American Silver Co. enter the field as a competitor of the International Silver Co.

The Clerk Stole the Diamonds and Stabbed Himself to Avert Suspicion.

KANSAS CITY, Mo., March 28.—Pinkerton detectives have succeeded in finding the \$3,000 worth of diamonds stolen from the Edwards & Sloane Jewelry Co., March 12, in a small wooden box hid in the basement of the Keith & Perry building. William A. Deardurff, the clerk concerned in the mystery, was arrested in the office of Edwards & Sloane Co., charged with the robbery. The firm are members of The Jewelers' Security Alliance, who, with the local police and Pinkerton detectives, took charge of the case.

Deardurff figured very prominently in the affair, being the man who was designated to take out the package of money by the thief, and the one who found the empty tray, and who said he had been stabbed in the back by a tall man while working in the basement of the building. The detectives shadowed him on the night when he was sent out with the supposed package of money and saw that he did not meet any one, although he told Mr. Edwards on his return that he had given the package to a man who demanded it. He also told a peculiar story about a colored man's coming to his home and offering him one of the rings for \$35, which was worth \$50, and he had purchased it. The detectives believed that as he had been watched so closely, the jewels were either hidden in the basement of the building or at his home. A thorough search was made of the basement and the property was soon found, in a small hole in the wall, loose in a small box which had a flat stone placed over it.

Deardurff is 20 years old and has been with the Edwards & Sloane Jewelry Co. 18 months. He has made a complete confession and says that he stabbed himself in order to avert suspicion. Deardurff accompanied one of the other clerks to the detectives' office, last week, and identified two of the pictures in the rogues' gallery as the photos of the men he had seen loafing around the building for a day or two previous to the robbery. They were men who had been implicated in several robberies similar to this one.

Deardurff pleaded guilty in the Criminal Court this morning and was sentenced to two years' confinement in the penitentiary by Judge Wofford. Mr. Edwards, his employer, and the family and friends of the young man asked to have his sentence made as light as possible. They testified to the good reputation he had borne heretofore. Deardurff said it was the first time in his life he had ever taken anything which did not belong to him, and he did not know what he intended to do with the jewels.

He told the Judge that he was determined to make a man of himself yet, in spite of this trouble. He was acting as shipping clerk, and the Judge said it was a serious mistake to allow so young a man, receiving such a small salary, to fill such a responsible position, as he had so many temptations.

A. Eberhart, Elkader, Ia., is putting up a new store building.

Pendants.

50 HOLBORN VIADUCT, LONDON.

Desperate Daylight Robber in Cincinnati Quickly Captured.

CINCINNATI, O., March 30.—A desperate thief made an unsuccessful attempt to rob J. C. Wilms & Co. in broad daylight, when the sidewalk before the store was crowded with people. Mr. Wilms was sitting behind a counter, and when the robber drew a revolver and leveled it at his head and threatened to shoot if he didn't keep quiet, Mr. Wilms says he thought the man was joking or insane. As he backed over to a case containing watches and began helping himself, Mr. Wilms realized that it was robbery. He jumped up and grappled with the robber. In the struggle his head struck against the edge of the case and he fell to the floor, stunned and bleeding. With four watches in his pocket, the man hurried out the door and ran along the street.

The police quickly gave chase and cornered the man in the rear yard of a house. He tried to shoot the policeman but was prevented. Then he tried to shoot himself but was disarmed. The watches were recovered. The robber was identified as John E. Breul, an old offender who has served time for house burglaries. He is a Swiss, 30 years old, and claims New York as his residence.

Calvin J. Wells Files a Petition in Bankruptcy.

UTICA, N. Y., March 30.—A petition in bankruptcy was filed with the Clerk of the United States District Court, in this city, yesterday, by Calvin J. Wells. He has debts amounting to \$12,568.13 and assets of \$1,025. Only \$253.63 of the liabilities is in secured claims. Alfred A. Cross, of Oneida, is the only secured creditor. He holds a Supreme Court order appointing Charles B. Mason receiver of certain property bequeathed to Mr. Wells by his father, Calvin H. Wells, who died in 1896. The petitioner's interest is valued at about \$1,000, subject to the advancements, amounting to \$775, made to Mr. Wells by his father.

The creditors of Mr. Wells are jewelry manufacturing concerns in different cities. The debts were contracted by him while in business in Oneida. Mr. Wells has no assets except property bequeathed to him and which is secured by other claims. C. Lansing Jones is Mr. Wells's attorney.

This petition has no reference whatever to the C. J. Wells Co., with whom Mr. Wells has been identified in this city.

Herbert N. Bunker, Brewer, Me., will supply the class rings for the senior class of the Brewer high school.

Strike of the Wadsworth Watch Case Co.'s Engravers.

NEWPORT, Ky., March 28.—A strike occurred at the Wadsworth Watch Case Co. factory Tuesday. Sixty-five engravers marched out of the factory. Last Saturday in each man's pay envelope was a card, citing that the company demanded more work from the piece workers and unless the demand was acceded to a reduction in the wage scale would be made.

The Kunze case, in which A. Davison, a former jeweler of Dixon, Ill., accuses him of secreting bankrupt stock, was called before United States Commissioner Mason, March 22. Kunze was on the stand in his own behalf and related at length his connection with the Davison bankruptcy case, and denied that he at any time knew that Davison had money or valuables secreted. Kunze was held for the Federal Grand Jury.

Window Smasher Gets 40 Watches from G. A. Spies's Window.

PITTSBURGH, Pa., March 27. — The jewelry store of G. A. Spies, Monongahela City, was robbed about 2 o'clock yesterday morning, of several hundred dollars' worth of watches and rings. The goods were taken from a show window which had been broken by the use of a large stone. The thieves carried on their work without being detected and escaped with all the booty that could be gathered from the window. No attempt had been made to take articles from the show cases.

About 2 o'clock in the morning, Mr. Spies was awakened by the barking of a dog in the front of his store. He hurried down stairs but found no one in the building and returned to his room. At dawn, persons passing along the street saw that the window had been broken and that everything in it had been carried off. Mr. Spies stated that the thieves got 40 gold and silver watches and a great number of stick pins, brooches and rings.

Suffolk Watch Co. Operating the Plant of Columbia Watch Co.

WALTHAM, Mass., March 28.—The business of the Columbia Watch Co. is now being conducted by the Suffolk Watch Co., recently incorporated under the laws of the State of Maine. The officers are as follows: President, Morton Trehore; treasurer, Steven Whidden; secretary and general manager, Renton Whidden. It is said no material departure from the policy of their predecessors will be made by the new company. W. H. Matheson will continue as superintendent of the factory.

H. I. Marks, Carlisle, Pa., has moved his store.

W. H. Taylor & Co., Shenandoah, Ia., are selling out and will move to York, Neb. Isadore Gittler, son of M. Gittler, who formerly was in business at Ashland, Wis., will open a store in that town.

Fire in Attleboro Falls.

Three Manufacturing Firms Affected but Prompt in Starting Up Afresh.

NORTH ATTLEBORO, Mass., March 30.—Ninety-five thousand dollars' worth of property was destroyed or ruined, Wednesday morning, March 27, at Attleboro Falls, and the factory building owned by the heirs of the late Handel N. Daggett, and the jewelry manufacturing plants of J. F. Sturdy's Sons, W. N. Fisher & Co. and E. E. Thomas, Jr., & Co. went up in smoke or down in a tangled mass of wreckage. Between 300 and 350 men and girls were thrown out of employment. With characteristic energy the firms have secured quarters in the vacant shops in Robinsonville, owned by the heirs of the Fallon estate in Providence, have taken them on a one year lease, and a gang of men are at work now fitting up the shops and moving all that was saved from the ruin into them.

The story of the fire is a short one. The crazed baying of a dog at 2.35 o'clock Wednesday morning aroused William Routley and William Riordan, living near the shop and employed in it. The latter was the first to reach box 43 and the response of the department was an excellent one. The firemen promptly sent a second alarm and the full department was on the scene in a very few minutes. They were hampered by the location of the shop, one side fronting a lake so that the real heart of the flames could hardly be reached, and also from the fact that it must have been burning a long time be-

fore the alarm was sounded at all. The whole shop was finally gutted and the hosemen deserve praise for saving a part of one ell and the big Gold Medal Brail Mill adjoining. At 6.05 the fire was out and the recall sounded. At first it was the positive assertion of all interested that the fire was of incendiary origin. The two men who saw it first declared positively that it started from two places entirely separated, and both of them at considerable distance from the forges. The forges were the only fires in the building at any time. Friday, however, fire marshal H. H. Collamore, of Fall River, deputy sheriff E. Carlisle Brown and chief engineer Harry W. Tufts made the most thorough investigation, and were unanimous that a large crack or defect in the back of a forge was at fault, and that the apparent duplex start was caused by the fire running in two directions along some light wood fixtures before breaking out through the walls of the building.

The shop was in the form of a big "H," two stories high, and with an aggregate floor space of some 25,000 square feet. The first floor of the H was divided equally between E. E. Thomas, Jr., & Co. and W. N. Fisher & Co. The former made ladies' goods and wearing novelties and figured their loss at \$18,000, partly insured. The firm were the successors of the Lenau Thomas Co. Fisher & Co. made findings, swivels, bars and so forth, and figured their loss at \$18,000, partly insured by Mr. Parker. The house embraces only Mr. Fisher himself, being

the successor since 1892 of W. D. Fisher & Co., run by his father. J. F. Sturdy's Sons occupied the whole of the top floor with a very finely equipped plant. They estimated their loss at about \$35,000, very nearly all insured. They make chains and lockets and are an old house, founded in 1865 by J. F. Sturdy, J. A. Perry and F. Doll. The damage to the building is estimated their loss at about \$35,000, very making a total of \$93,000 in shop and plants. The remaining \$2,000 of the estimated loss represents the personal tools and property of the employes, wholly uninsured. To illustrate, Walter W. Cobb ran a room in which he did the stone setting and engraving for all three firms, and his loss is between \$300 and \$400. Alec Irkland, tool maker for the Sturdy house, had a similar loss of over \$150. Almost every adult in the employ of the three houses had a similar kit, and \$2,000 is regarded as a conservative figure. This makes the \$95,000 total.

There was no time spent crying over spilt milk. A temporary office in a small but convenient building on the braid mill property was opened up jointly, telephone connections made, a paymaster installed to give money to those of the employes to whom it was due, and the work of salvage began in earnest. Everything which could ever be of use again is being taken out and put in order and the lease of the Robinsonville shops was effected by Friday morning, and the goods were moved there as fast as they came from the ruins. The firms will be shipping goods in the course of a few days, for the fitting of their new home is going on very rapidly. J. F. Sturdy's Sons will have their line ready within three weeks.

No. 3 Maiden Lane, New York.

Mr. Rote's Burglar-Clerk Is Wanted for Texas Crimes.

MARION, S. C., March 30.—The young man, Viron W. Mitchell, who was employed by H. B. Rote, of this place, and who was arrested and is now in jail here waiting trial for entering Mr. Rote's store during the night of Feb. 15, is also wanted at Belton, Tex., on two charges of burglary and larceny. The Governor of South Carolina honored requisition papers from the Governor of Texas, Wednesday, and the papers are now in the hands of the sheriff. A young man from this town by the name of John P. McMillan is also implicated in the robbery of Mr. Rote's store. He was also familiar with the business, having been employed as a clerk during the holiday season, and he and Mitchell were very chummy. McMillan was indicted by the Grand Jury and trial was set for March 18, but owing to smallpox being discovered that morning in Marion the Judge was absent and Court had to adjourn until June. Mitchell came from Washington, D. C., Jan. 12.

The jewelry stores of Bradford, Pa., will hereafter close at 6.30 o'clock p. m.

John G. Bridgewater, who for many years has been engaged in the jewelry business at New Castle, Del., will remove to Wilmington, Del. He will, however, conduct a branch store at New Castle.

Canada Notes.

Alex. Cameron, Mitchell, Ont., has gone out of business.

The death is announced of James McDougall, jeweler, Richibucto, N. B.

George S. Edmunds, jeweler, Alliston, Ont., has given a chattel mortgage to R. Edmunds for \$400.

The bailiff is in possession of the stock of J. W. Fraser, Russell, Man., and it is to be sold at auction.

H. A. Hattie, jeweler, Yarmouth, N. S., has assigned to E. H. Armstrong, and a meeting of creditors took place March 28.

I. W. Vidito, of M. S. Brown & Co.'s jewelry establishment, Halifax, N. S., and wife left March 28, for Boston and New York.

R. A. Dickson, of R. A. Dickson & Co., jewelers, Montreal, whose auction sale is now proceeding, intends to retire from business.

Henry Birks and Mrs. Birks, Montreal, have returned from a trip to Bermuda. Richard Birks, who has been confined to the house for some weeks through serious illness, is once more able to be out.

H. W. Revell, jeweler, Meaford, Ont., who has made an assignment to C. H. Jay, has been in business about three years. In November last he was obliged to mortgage his stock. A meeting of creditors took place March 29.

The preferred stock to the amount of \$290,000, of William A. Rogers, Limited, which was placed on the market in Toronto on March 25, was all taken up the same day, subscriptions being received amounting to a total of \$380,000. All subscriptions under 50 shares were allotted in full. Many subscriptions were received from the United States, especially from Niagara Falls, Buffalo, and New York. As the prospectus was only before the public for one week, this is regarded as a highly successful floatation.

Theodore A. Cossman, Grand Master of the Ancient Free and Accepted Masons of the Province of Nova Scotia, who recently took unto himself a wife, was presented by the Masons of Halifax, last week, with a handsome and valuable token of their esteem, in the shape of a cabinet of silver ware, consisting of flat ware and a silver hot water urn, accompanied with an address. A fac-simile of the latter engraved on a large silver plate and set in an oval frame of Irish bog oak was also part of the gift. The placing of the address on the plate was a most unique idea. It was done by Mr. Schwitzer, of M. S. Brown & Co.'s jewelry establishment, and was an exact copy of the pen and ink writing, even to the signatures of the committee. It was a credit to the engraver's art. The cabinet was secured from New York and the whole affair cost about \$250.

Syracuse, N. Y.

C. E. Eager has removed the remainder of his stock into the southern half of the store next north of his former location in Salina St.

E. William Frost, watchmaker and engraver, who has been with C. E. Eager for the last seven and one-half years, has located for himself at the corner of E. Washington and Warren Sts.

THINK

of a grocer keeping store without flour,
or a butcher keeping shop without beef,

AND THEN THINK

of a retail jeweler without shirt studs in
his stock.

One is as consistent as the other.

When buying shirt studs, buy the best,
and that's

THE LARTER STUD

It Is in a class by itself,

fitting either buttonhole, eyelet hole
or a combination of the two.

ESTABLISHED 1825

RING MAKERS
AN ENDLESS VARIETY

OFFICE 54 MAIDEN LANE NEW YORK FACTORY BROOKLYN

Providence.

Mr. Phillips, of Richter & Phillips, Cincinnati, O., and Charles Phillips, of Phillips & Wrinch, Toronto, Ont., called upon some of the manufacturers in this city, last week.

Thomas W. Lind is increasing his facilities for the manufacture of jewelers' findings by enlarging his shop room. He will soon occupy the entire floor on which his present shop is situated at 67 Friendship St.

Franklin P. Austin, well known in this city as a skilful jeweler, particularly as a chaser, died Thursday night at his home in Pawtuxet, from pneumonia. Mr. Austin was in his 49th year. For many years he had been associated with the jewelry trade in Providence, having charge of the chasing departments of several of the large shops here. At the time of his death he was with Edwin Tinkham, chaser, rear of 17 Page St.

The Horton-Angell Co., Attleboro, incorporated under the Rhode Island law, have filed a certificate at the office of the City Clerk, this city, setting forth the condition of the concern at the close of business, Dec. 31, 1900, as follows: Capital stock paid in, \$160,000; real estate at assessed valuation, \$21,440; personal assets, \$140,163; debts and liabilities, none. The statement is signed by T. S. Carpenter, H. A. Clark and C. J. McClatchey, a majority of the directors.

As stated in an item in the issue of March 20, one of the reasons which the creditors of John M. Peck, doing business as the Providence Notion Co., gave for filing a petition of bankruptcy was that they believed goods were being shipped away from the store. It has now developed in an order issued from the United States District Court, that the petitioners were laboring under a misapprehension. It has been shown to the Court that a brother, Ira Peck, was doing a manufacturing business in the same building and that the goods shipped away were made by the brother. The Court has ordered the release of the property of Ira Peck, thus indicating the error of the creditors of John M. Peck, who made an assignment for the benefit of his creditors on March 5.

A sneak thief was caught in the act of helping himself to the money in the cash drawer in the safe in the office of the R. L. Griffith & Son Co., 144 Pine St., shortly before 5 o'clock Wednesday afternoon, but the man succeeded in making good his escape. The bookkeeper had left the office for a moment when, hearing a slight noise, she turned back and saw the thief, who had managed to slip into the office from the hallway unnoticed. The safe door was open and the thief had his hand on a package of bills when Miss Dunn saw him. Instead of crying out, as might have been natural, Miss Dunn tried to grapple with the man, but he was too quick for her and eluded her grasp. Walter Griffith, the jun-

Watches, Jewelry, Cases, Trays, Silverware, For, Toilet Articles, Manicure, Paper Boxes.

ior member of the firm, was busy in the packing room near by, but he saw the man making a hasty exit. Quickly grasping the situation, Mr. Griffith gave chase, but the sneak thief had gotten too much of a start, and was quickly lost to sight in the street. The matter was reported to the detective department.

D. L. How, who has been salesman for the Watson, Newell Co., will represent E. L. Logee & Co. in the west until Mr. Hungerford is able to attend to it again. They have added to their line a large number of charms, buttons and pins, in gold and plate, of all societies. When Mr. Hungerford recovers from his illness, he will resume charge of the western territory, and Mr. How will look out for the east.

Attleboro.

David E. Makepeace has given the contract for a duplicate of his present mammoth jewelry factory. The new one will be on Pine St., 153x40 feet, three stories high, with a three story ell 81x40 feet. Three out of town firms will occupy it.

After failing to catch the market at the outset there is one novelty made in the Attleboro shops which is beginning to experience a very respectable rush. It is the various forms of lapel souvenirs for the members and sympathizers of the "White Rats."

Joseph and John Bloom started on Friday the new concern styled Bloom Bros., located in the S. O. Bigney building on County St., and devoted entirely to pearl goods manufacture. The former had been for several years in the pearl department of the W. H. Wilmarth Co. factory, and is a thoroughly practical man.

Kingston, R. I., has been making an offer to L. W. Teed & Co. to remove their plant and business to that place. The Kingston Board of Trade inspected the factory and looked into the commercial record of the firm. The board selected as the site on which they wished to locate the firm a place in their village of Peacedale, and arranged for the erection of a factory, for piping it for gas and wiring it for electricity, and their plans appear to have been pretty definite in every way. Mr. Swift, of the firm, was interviewed Thursday. He stated positively that all the above arrangements, while true so far as they went, were still in the air. He added that Saturday afternoon the board would pay him a visit and that a call at 5 o'clock that day would result in the issuance of an official statement. Saturday afternoon he had experienced a great change of heart. The call resulted in the statement that there was "positively nothing new to say."

Utica, N. Y.

The stock of the late C. C. Shaver has been sold at auction.

Frank Crain, jeweler, Marathon, is a bankrupt. He states that his debts amount to \$2,190.67. The assets exceed the debts.

William M. Swayze, who for some time conducted a trading stamp business, and who recently filed a petition in bankruptcy, was a director in the Oneida Silverware Mfg. Co.

The Giant of Collar Buttons

IN QUALITY,
IN SALES.

One Million Five Hundred Thousand Kremenz One-Piece Collar Buttons made and sold within the last year.

WHY? Because of their HIGHEST QUALITY, BEST CONSTRUCTION, GIVING THE MOST WEAR, AND GREATEST COMFORT and their IRON-CLAD GUARANTEE.

To verify this we invite the trade to read "The Story of a Collar Button, with Illustrations," which may be had FREE for the asking, and to try the experiment suggested on page 5 of that booklet.

Extract from "Printers' Ink," Nov. 23, 1898.

The Little Schoolmaster now suggests, to every pupil in his class, to send a two-cent stamp to Kremenz & Co., 49 Chestnut Street, Newark, N. J., and ask to be favored with a copy of their leaflet, "The Story of a Collar Button". Afterward, if any pupil will send to *Printers' Ink* another leaflet, new or old, that is half as good as this one, or that approaches it in excellence, the deserving student will be rewarded with one of *Printers' Ink's* souvenir spoons as an acknowledgment of his discovery and contribution. "The Story of a Collar Button" is the best piece of advertisement construction that has come to *Printers' Ink's* attention in the year of our Lord 1898.

Should you wish to utilize this booklet to increase your collar button business, we will, on receipt of your order, print your card upon and send you a quantity of them.

Kremenz One-Piece Collar Buttons are stamped as follows, ON BACKS:

Patent sustained by United States Supreme Court.

Quality and Construction have made our reputation.

DON'T FORGET THE JEWELERS' CIRCULAR PUBLISHING CO.'S BOOK LIST when in want of any technical work in the Jewelry or Kindred Trades.

Traveling representatives may consider these columns open for the publication of any news or items of interest regarding themselves or their confreres.

M. H. Douglas, missionary of the Keystone Watch Case Co., is visiting the trade in southern Indiana.

Traveling men who called on Davenport, Ia., jewelers the past week were: Will B. Terry, J. H. Purdy & Co.; E. C. Weidlich, William Weidlich & Bro.; Frank F. Gibson, H. A. Kirby Co.; G. W. Bliss, Krementz & Co.; M. Miller, Herman Keck Mfg. Co.; A. N. Brittan, M. A. Mead & Co.; E. L. Slocum, Louis Hinsberger Cut Glass Co.; George J. Gruen, D. Gruen, Sons & Co.; L. Newhouse, L. Newhouse & Co.; J. A. Goldberg, and representative of J. D. Bergen & Co.

Mr. Peacock, Lord & King, and H. E. Cobb, Daggett & Clap Co., were in Omaha, Neb., last week. Mr. Cobb was on his way to the Pacific Coast.

Among the traveling representatives in St. Louis, Mo., the past week were: Henry Cowan; Lucian Rockwell, Poole Silver Co.; and A. S. Wormood, Illinois Watch Co.

Zach A. Oppenheimer; Dave Beer, Bernheim, Cohen & Beer; Herman Abrams, and A. F. Lowenthal are a diamond quartette who were in San Francisco, Cal., last week.

The traveling representatives of eastern firms who called on Kansas City, Mo., trade last week were: W. A. Weichmann, for Frank W. Smith; Lewis L. Squire, F. H. Cutler & Co.; I. Keasler, Aurora Silver Plate Mfg. Co.; and Mr. Hulstrom, Wilcox & Evertsen.

Fred. Cateron, of Shenandoah, Neb., is now traveling for the Shook Mfg. Co., Omaha, Neb. He has just made his maiden trip and did good business. Mr. Taylor, traveler for the Shook Co., was taken ill at Burlington Junction, Mo., and was obliged to return home for 10 days.

J. P. Kirschby, formerly with Bauman-Massa Jewelry Co. and the St. Louis Clock and Silver Ware Co., St. Louis, Mo., has accepted a position with the Reed-Bennett Co., Minneapolis, Minn. He will represent the material department in Minnesota, North Dakota and South Dakota.

Not many traveling men called upon the Pittsburgh, Pa., trade last week. Among the few were: Lawrence H. Smith, Bippart, Griscom & Osborn; Mr. Samuels, Woodside Sterling Co.; Emanuel Jacobson, Jacobson Bros.; Arthur Bradshaw, International Silver Co.; H. C. Walton, Wadsworth Watch Case Co.; S. C. Corbin, Waterbury Clock

Co.; M. Platt, Theodore W. Foster & Bro. Co. Maurice J. Baer, of the Attleboro Mfg. Co., is visiting his parents in Pittsburgh, Pa.

Traveling men in Indianapolis, Ind., last week included: Richard Robinson, T. G. Frothingham & Co.; John Keane, Ostby & Barton Co.; George Goldberg, W. S. Blackinton; M. Klipper, Hipp. Didsheim & Bro.; R. E. Creasey, The Arlington Co.; I. W. Smith, Horton, Angell Co.; D. Schwab, Ciner & Seelman.

Among the traveling salesmen who recently passed through Detroit, Mich., were: M. Bernheim, Woodside Sterling Co.; A. W. Levy, Byron L. Strasburger & Co.; Leon Sichel, C. P. Goldsmith & Co.; W. S. Dudley, Rogers, Smith & Co.; G. L. Howard, Towle Mfg. Co.; W. C. Barry, Larter, Elcox & Co.; F. C. Shinn, Charles L. Trout & Co.; L. E. Smith, M. B. Bryant & Co.; C. A. Hulstrom, Wilcox & Evertsen; H. J. Rolfe, The Derby Silver Co.; M. L. Barnard, J. B. Bowden & Co.; R. H. Schley, Sloan & Co.; D. Skutch, The New Haven Clock Co.; W. R. Shute, Jones & Woodland; W. H. Race, The Meriden Silver Plate Co.; H. C. Barnum, Shafer & Douglas; W. H. Bryant, T. G. Hawkes & Co.; Clarence Pettit, Link & Angell; J. C. Bigalke, for A. Wittnauer.

Traveling salesmen visiting Boston, Mass., last week included: W. R. Cattle, Henry E. Oppenheimer & Co.; Charles L. Power, Charles L. Power & Co.; Samuel Howland, Joseph Frankel's Sons; Frank Wood, Ludwig Nissen & Co.; Fred. Clarkson, Albert Lorsch & Co.; Alexander Chase, A. Ludeke & Co.; John L. Shepherd, The Keystone Watch Case Co.; John Abel, Abel Bros. & Co.; Lucien M. Zell, The American Gem Co.; Archibald Rutherford, H. A. Kirby Co.; T. B. Wilcox, The Fairpoint Corporation; Mr. Byron, Whiting Mfg. Co.; William S. Metcalf, Plainville Stock Co.; W. B. Ballou, R. Blackinton & Co.; Mr. Schley, Sloan & Co.; Emil Harbeck, Kelley & Steimann; H. B. Beach, Jr., The Middletown Plate Co.

The following visited Minneapolis and St. Paul, Minn., the past week: C. T. Baker, Plainville Stock Co.; B. Kaufman, for Fred. Kaufman; G. Rodenberg, S. & B. Lederer Co.; Fred. Foster, Unger Bros.; Mr. Garland, L. H. Keller & Co.; Mr. Friedman, L. Adler & Son; Harry B. Kennion, Parks Bros. & Rogers; H. E. Cobb, Daggett & Clap Co.; L. E. Fay, R. F. Simmons Co.; E. P. Tiffany, F. H. Sadler & Co.; Lewis P. Cook, S. Sternau & Co.; F. H. Wilkinson, for A. Wittnauer; Abe Harris, Harris, Schuster & Co.; Mr. Mench, Rockford Silver Plate Co.; F. B. Rogers, West Silver Co.; representative of the New Haven Clock Co.; Frank E. Wallis, T. W. Adams & Co.; J. R. Payne, Meriden Cutlery Co.; George Tinker, William B. Durgin Co.

Calling on Syracuse, N. Y., jewelers the past two weeks were: E. C. North, Smith & North; Benjamin M. Henschel, Heintz Bros.; J. Goldberg; Arthur Totten, Larter, Elcox & Co.; T. E. Bowne, E. Ira Richards & Co.; H. W. Frohlichstein, Frohlichstein & England; Mr. Walker, The Fairpoint Corporation; J. H. Thompson, Bioren Bros.; S. Glenn Walmsley, for Hermann Baum; A. H. Oakley, Thornton Bros. and Walter E. Hayward; William Matschke, F. & F. Felger and A. Joralemon & Son; N. Steigerwald, Buffalo Jewelry Case Co.; C. D. Hintze, Enos Richardson & Co.; L. R. Millar, for J. W. Forsinger; Walter S. Noon, W. F. Cory & Bro.; Herbert H. Rosensteel, B. H. Davis & Co.; W. H. Gregory, Strobell & Crane; William W. Middlebrook, B. A. Ballou &

Three Good Reasons

why you ought to lay in a line of our BARRETTES

RIGHT NOW.

BECAUSE this is the time of year when there is a demand for these goods and by pushing them you can stimulate your Spring trade.

BECAUSE, while the barrette is a novelty and is worn largely on account of its attractiveness, it is also a becoming necessity.

BECAUSE we carry an extensive assortment as to styles at uniformly moderate prices.

L. C. Reisner Gets Favorable Auditor's Decision.

LANCASTER, Pa., April 1.—The suit of the relatives of Ezra F. Bowman against L. C. Reisner, which was referred to an auditor, has been settled by the auditor in favor of Mr. Reisner. There is likely to be an appeal from the auditor's decision and the matter may go to the Supreme Court.

This case grew out of the financial difficulties of Ezra F. Bowman & Co., some years ago, when the firm made an assignment for the benefit of creditors. L. C. Reisner was the assignee. It was claimed by some of the relatives and friends of Mr. Bowman, that the assignee bought in the business at a great sacrifice, and exceptions were filed by them to the assignee's account, which was filed about a year ago. An attempt was made to surcharge him with a large amount. The present litigation then began and has so far resulted in a victory for Mr. Reisner.

Boston.

Fred H. Pope, of D. C. Percival & Co., left Boston Thursday for a two weeks' trip to Hot Springs, Va.

Smith, Patterson & Co., 52 Summer St., have just placed in position a beautiful case for the display of a line of solid silver ware.

The wholesale-jewelry trade have agreed to close their stores at 5 o'clock p. m. week days, and 1 o'clock p. m. Saturdays, from April 1 to Sept. 30.

D. Frank Connor, of Holyoke, Mass., identified by Chief Inspector Watts, of Boston as wanted in several New England cities, was arrested last Friday night at Biddeford, Me. It is said he was selling cheap plated watches, claiming them to be solid gold, with the United States assay mark on them. Connor was arraigned in Court and held in \$500 for appearance at the May term.

The following named Washington St. jewelry firms have signed a petition protesting against any legislation which will require the removal of the surface tracks from any portion of Washington St., where the same now are, and humbly beg the Legislature to refuse to enact any such legislation: The E. Howard Clock Co., Charles May & Co., Andrew J. Lloyd & Co., the E. B. Horn Co., the Boston Diamond Co., Montana Diamond Co., Henry Guild & Son, Monroe & Lane, Kettell & Blake, C. A. W. Crosby & Son, A. T. Morrill & Co., the Globe Optical Co. and Freeman & Taylor. The Washington St. business men are very much in earnest in regard to this proposition to remove the car

tracks from the surface of this busy thoroughfare, and the hearings that will be held will undoubtedly be decidedly interesting.

Boston creditors of W. A. England, Worcester, Mass., are beginning to feel anxious about their accounts. It is said that England's landlord is pushing matters in order to secure back rental money. Estimates of the stock on hand vary all the way from \$3,000 to \$25,000. The gas company have shut off the gas and the store is being lighted with kerosene lamps. An offer of 25 per cent. has been made by England's counsel, but it is doubtful if it is accepted.

Among the buyers in town last week were: A. W. Turner, Willimantic, Conn.; J. H. Conner, Lynn, Mass.; F. L. Willoby, Brookline, N. H.; N. C. Squire, Lynn, Mass.; G. A. Collins, Salem, Mass.; C. F. Pettingill, Quincy, Mass.; W. H. Heath, South Braintree, Mass.; W. A. G. Smith, Rockland, Mass.; Percival Safford, of J. F. Safford & Son Farmington, N. H.; H. S. Hewett, Brockton, Mass.; H. L. Dole, Haverhill, Mass.; W. R. Amzen, Fall River, Mass.; F. R. Hayden, Worcester, Mass.

American Waltham Watch Co.'s Surplus Over \$1,000,000.

BOSTON, Mass., March 29.—At the annual meeting of the American Waltham Watch Co. yesterday, the directors were re-elected, with the exception that Reginald C. Robbins succeeds George H. Shirley, deceased. The treasurer's statement showed a surplus for the year of \$328,576. The company's total surplus is \$1,117,576.

New Subscribers can commence at any time.

Payments for THE JEWELERS' CIRCULAR-WEEKLY, when sent by mail, should be made in a Post-Office Money Order, Bank Check or Draft, or an Express Money Order or Registered Letter. All postmasters are required to register letters whenever requested to do so.

Pay money only to authorized collectors having proper credentials.

Returning Copies. Returning your paper will not enable us to discontinue it, as we cannot find your name on our books unless your address is given.

Changing Address. In changing address always give the old as well as the new one. Your name cannot be found on our books unless this is done.

Discontinuances. We will continue to send papers until there is a specific order to stop, in connection with which all arrearages must be paid; but such an order can be given at any time, to take effect at or after the expiration of the subscription. All such orders will be promptly acknowledged by mail.

Liability. The courts have decided that all subscribers to journals are responsible until arrearages are paid in full and an order to discontinue has been received by the publisher.

- ANTWERP—Diamond Club, Rue de Pelican.

Every line of reading matter in THE JEWELERS' CIRCULAR-WEEKLY, with the exception of a few brief extracts from exchanges, always properly credited, is written exclusively for this journal. Each issue of THE JEWELERS' CIRCULAR-WEEKLY is copyrighted. Permission to quote is extended to other publications provided such quotations are properly credited.

THE pronounced increase in the importations of precious stones into the port of New York noticeable during January and February continued through last month. This is well shown in the report just made by Gen. George W. Mindil, Jewelry Examiner at the Public Stores, to Appraiser Wakeman, which gives the total importations of precious stones and pearls during March as \$2,234,538.52, of which cut stones amounted to \$1,416,770.20, and uncut, \$817,768.32. General Mindil's report, which makes some interesting comparisons with former years, is as follows:

HON. WM. F. WAKEMAN.

SIR:—Accompanying this, please find report of precious stones received and passed through the month of March, 1901, also a comparison of figures thus presented with those furnished in reports of corresponding months in the two preceding years.

Month.	Cut.	Uncut.
1901.....	\$1,416,770 20	\$817,768 32
1900.....	720,408 40	60,601 80
1899.....	1,195,397 45	516,513 67

An increase of 25 per cent. on 1899, which was the heaviest year on record, and of 220 per cent. over last year.

A comparison of the first three months of the past three years shows:

First Quarter.	Cut.	Uncut.
1899.....	\$2,973,675 69	\$1,652,627 61
1900.....	1,650,013 41	326,538 12
1901.....	3,886,504 08	2,218,393 75

An increase of about 38½ per cent. over 1899 and about 212 per cent. over 1900.

Keeping in view that Kimberley, South Africa, is the mining and distributing district for all rough stones, and that it was besieged during the period covered by this report for 1901, thus shutting off the diamond supply for the world, these figures show a large increase in the importations this year over all preceding years, and this in the face of constantly increasing prices.

Precious stones are the height of luxury, and the large importations show that America not only leads the world in their purchase, but that the general prosperity of our people enables them to invest in this luxury in ever increasing quantity and value. More than one-third of the importations consist of diamonds in the rough, thus showing a decided increase in the diamond cutting business of our country, an industry established almost altogether since the passage of the present tariff.

GEORGE W. MINDIL.

Samuel Baerncof Convicted of Defrauding His Creditors.

PHILADELPHIA, April 1.—Samuel Baerncof, who was recently proprietor of two retail jewelry stores, one on 8th St. and one on 9th St., this city, was today convicted of the charge of disposing of the stock of the two stores to defraud his creditors. The charges against Baerncof were brought by The Jewelers' Association and Board of Trade.

It was charged that Baerncof obtained jewelry from New York and Philadelphia firms to stock the two stores, upon the representation that he had no debts. In December he sold out both stores for \$8,400. Of this sum, it is alleged, he paid \$5,900 to two preferred creditors and pocketed the balance. In addition to this the Commonwealth alleges that Baerncof had not in reality disposed of the 9th St. store, but had merely procured the alleged purchaser to conduct the business for him. Baerncof insisted that the exchange was made in good faith.

Judge Ralston sat at the trial. The jury, after being out since Saturday, returned a sealed verdict Monday morning. Baerncof has not yet been sentenced.

James Doughty, Bridgeton, N. J., has moved to the Jago building.

Another Silver Stamping Law.

A Law in the New York Legislature Prejudicial to Jewelers' Interests.

ALBANY, N. Y., April 2.—The Assembly will have on its calendar for final passage, Wednesday, a bill introduced by Assemblyman DeGraw, early last month, relating to the marking of articles of sterling and coin silver, by manufacturers thereof, which should be studied carefully by every jeweler and manufacturer of silver ware in this State. The introduction of this bill, which is entitled, "An Act to Prevent Deception in the Manufacture of Certain Articles of Merchandise, by Associations, Corporations and Copartnerships," was entirely unexpected to the trade, and coming as it does after the laws on this subject were perfected to suit all classes of merchants, it is generally thought that the act is a "job" to nullify the effect of the present laws. The bill, which is here printed in full, was ordered to a third reading and then went to the Revision Committee. It will be reported from that committee to-night and will be on the calendar for final passage Wednesday. The bill reads as follows:

AN ACT

TO PREVENT DECEPTION IN THE MANUFACTURE OF CERTAIN ARTICLES OF MERCHANDISE BY ASSOCIATIONS, CORPORATIONS OR COPARTNERSHIPS.

The People of the State of New York, represented in Senate and Assembly, do enact as follows:

SECTION 1. No association, corporation or copartnership shall produce, make or manufacture any article of merchandise whatsoever having upon it, or stamped, labeled, branded, engraved, marked, impressed or printed with the words silver, solid silver, fine silver, pure silver, or either or any of said words, or any other word, words, phrase, sign, expression, device, token, mark or symbol, of any style, name or nature, indicating, denoting or suggesting that such article is silver, sterling silver, sterling, solid silver, pure silver or fine silver, unless nine hundred and twenty-five one-thousandths of the component parts of the metal of which the said article is produced, made or manufactured are pure silver.

SEC. 2. No association, corporation or copartnership shall produce, make or manufacture any article of merchandise whatsoever having upon it, or stamped, labeled, branded, engraved, marked, impressed or printed with any word or words, phrase, sign, expression, device, token, mark or symbol, of any style, name or nature, indicating, denoting or suggesting that such article is coin or coin silver, unless nine hundred and twenty-five one-thousandths of the component parts of the metal of which said article is produced, made or manufactured are pure silver.

SEC. 3. No association, corporation or copartnership shall print, stamp, impress, label, engrave, brand or place upon or cause to be placed upon, any article of merchandise, the words silver, solid silver, fine silver, pure silver, or any other word, words, phrase, sign, expression, device, token, mark or symbol, of any style, name or nature, indicating, denoting or suggesting that such article is silver, sterling silver, sterling, solid silver, pure silver or fine silver, unless nine hundred and twenty-five one-thousandths of the component parts of

the metal of which the said article is produced, made or manufactured are pure silver.

SEC. 4. No association, corporation or copartnership shall print, stamp, impress, label, engrave, brand or place upon or cause to be placed upon, any article of merchandise, any word or words, phrase, sign, expression, device, token, mark or symbol, of any style, name or nature, indicating, denoting or suggesting that such article is coin or coin silver, unless nine hundred and twenty-five one-thousandths of the component parts of the metal of which said article is produced, made or manufactured are pure silver.

SEC. 5. It shall be the duty of every association, corporation, and copartnership engaged in the production, making or manufacturing of any article of merchandise whatsoever having upon it, or stamped, labeled, branded, engraved, marked, impressed or printed with the word or words silver, sterling, sterling silver, solid silver, pure silver, fine silver, coin or coin silver, or any other word, words, phrase, sign, expression, device, token, mark or symbol, of any style, name or nature whatsoever, not later than sixty days after this act takes effect, to file with the secretary of state, who is hereby authorized and directed to receive and file the same free of charge, the private mark or emblem of such association, corporation or copartnership, or a copy, engraving, drawing, printing or legible representation thereof; and it shall also be the duty of such association, corporation or copartnership to stamp, brand, impress, engrave or print upon, or in some manner permanently affix to, each and every such article a facsimile of the private mark or emblem of such association, cor-

poration or copartnership so filed with the secretary of state.

SEC. 6. The officers of every corporation and the members of every association or copartnership, who shall violate the provisions of either section one; section two, section three or section four of this act shall be guilty of a misdemeanor, and shall, upon conviction, be liable to a fine of not less than one thousand dollars nor more than five thousand dollars for each and every offense.

SEC. 7. The officers of every corporation, and the members of every association or copartnership, who shall violate the provisions of section five of this act shall be guilty of a misdemeanor and shall, upon conviction, be liable to a fine of not less than two hundred dollars nor more than one thousand dollars, for each and every offense.

SEC. 8. This act shall take effect immediately.

A careful perusal of the provisions of this bill shows that it is either a piece of crude and foolish, or, on the other hand, malicious and vicious legislation. It provides for nothing not already provided for, except to make penalties for manufacturing fraudulently stamped silver so ridiculously large as to absolutely forbid a conviction by a jury of ordinary men. On the other hand the greater part of the ground covered in the present sections of the Penal Code, covering the making and selling of fraudulently stamped silver ware, is absolutely not touched upon in this bill.

Briefly, first its provisions only touch associations, copartnerships and corpora-

tions and do not affect the individual; second, it provides only for the punishment of the maker and does not affect the seller; third, it does not provide for the combination of two or more metals, or of silver used with any other substance; fourth, it attempts to raise the standard of "coin" silver ware from 900/1000 to 925/1000, something that no Legislature can do; fifth, it makes it necessary for a manufacturer to file his trade-marks and private marks, under a penalty of \$200 to \$1,000 for refusing to do so; sixth, it provides no imprisonment but seeks to impose penalties of not less than \$1,000 and from that to \$5,000 for any infringement of the act. In other words, should this bill become a law, a merchant who stamped the word "coin" on a case containing a 50 cent piece could not get off with less than a fine of \$1,000. The strangest part of this act is that it does not in itself repeal the sections of the Penal Code now in existence, nor does it refer to them in any way. Its provisions are crudely drawn; its wording is bad and at times even foolish, and the effect of its passage would be absolutely detrimental to honest merchants and manufacturers of silver ware throughout the State. Should this become the law and the present one be repealed, manufacturers outside of New York State of any kind of ware stamped "sterling," or anything else, could have their product sold with impunity within the borders of the State, because the act touches not the seller but the manufacturer, whom the State could not get at.

Edward Holbrook, president of the Gorham Mfg. Co., who has been instrumental in having the present silver laws of New York and other States passed, was shown the bill by a CIRCULAR-WEEKLY reporter, yesterday morning, and was very much surprised. After carefully reading it he said: "This is a most mischievous bill; the present laws give perfect protection to the purchaser of silver ware, for they hold both the manufacturer and dealer accountable for goods they purchase or sell. This proposed bill seems to place all the onus on the manufacturer and to exempt the merchant who sells the goods. As many manufacturers who would violate the law are outside the State the effect can easily be seen. The present law is the result of careful work and a growth from the original law, which has been perfected until it is now perfectly satisfactory to honest merchants and manufacturers. In fact, in their present form the sections in the Penal Code were agreed upon before passage by both the manufacturers of silver ware and the responsible merchants of this State."

Death of Oliver S. Hemphill.

PHILADELPHIA, Pa., March 30.—Oliver S. Hemphill, who for more than 40 years was a retail jeweler, died yesterday at his home, 2019 Wallace St., of neuralgia of the heart. Mr. Hemphill was nearly 80 years of age and was at one time one of the most widely known and prosperous retailers in Philadelphia.

If this happens

THREATEN TO RAISE DIAMOND PRICES

ANTWERP, Sunday.—Diamond merchants here declare that the De Beers company intends to raise the price of diamonds thirty per cent on April 1 or May 1.

The company's reason for the projected raise is said to be the reported determination of the English government to make the largest part of the financial burden of the Rand Transvaal war fall on the backs of the diamond mine owners. The mine owners have indignantly protested against such a course, and if their protests prove ineffectual their reply will be a general raise in prices of diamonds. Only in this way, they are said to contend, can they meet the heavy demands of the government.

will you get caught short? No better time to get your customers to invest in diamonds, or to invest your money in diamonds.

We have a very complete stock, and while it lasts, it is subject to your call at present prices.

Anything you want, loose or mounted, "on memo."

CROSS & BEGUELIN

Importers and Cutters of Diamonds and Precious Stones

43 Rue de Meslay, PARIS

Telephone, 2183 Cortlandt

17 Maiden Lane, NEW YORK

New York Notes.

J. A. Zimmermann has entered a judgment for \$147.65 against William F. Doll. The Peckham Seamless Ring Mfg. Co., now at 30 Maiden Lane, will remove about April 15 to 45 Maiden Lane.

Tiffany & Co. last week showed in their window, at Union Square and 15th St., a five foot model of the electric tower in course of erection at the Pan-American Exposition, Buffalo, N. Y.

Customs Inspector Donohue last week seized eight open face watches which he found concealed in a bandage which Anton Frung, a passenger on *La Gascogne*, wore around his body. Frung was not arrested.

Hawley T. Webster has been admitted to the firm of E. G. Webster & Son, manufacturers of silver plated ware, 622 Atlantic Ave., Brooklyn, and 10 Maiden Lane, Manhattan. The other member is F. H. Webster.

Isador Kantro, bankrupt, has applied to the United States District Court for a discharge of all his debts in bankruptcy. A hearing on his petition will be had before Judge Brown, April 10, at 10.30 o'clock A. M., at which time creditors may show cause why the discharge should not be granted.

The Coroner's jury held an inquest last week in the case of Meyer Weisbard, the jewelry peddler whose body was found in a trunk on an East River bulkhead on Jan. 16. The jury returned a verdict that death was due to wounds in the throat inflicted by a sharp instrument in the hands of some person or persons unknown.

There was considerable excitement in front of Tiffany & Co.'s store, Friday, when a quantity of imitation precious stones was spilled on the sidewalk. Three policemen kept at bay the crowd which gathered until the bulk of the stones was picked up by the owner. Those that fell

into the hands of bystanders were found to be nothing but glass.

Owing to the death of John C. Day, of Day, Clark & Co., which occurred Oct. 30, a new firm were recently formed under the old name, who continue the manufacturing jewelry business without change at the old address. The partners are Samuel Clark, Franklin Day, Wallace S. Campbell and William A. Cobb, of the old concern, and in addition Irving G. Day and Addison W. Roubaud.

The creditors of Louis Combremont, bankrupt, a former dealer in jewelers' materials at 45 Maiden Lane, are notified that Frank L. Polk, the trustee in bankruptcy, will sell at auction uncollectable book accounts to the amount of \$1,112.27, together with odd lots of spirals, clasps, etc. The sale will be conducted by auctioneer Charles Shongood, 26 Lispenard St., April 10, at 11 o'clock A. M.

The following judgments against Jacques E., Adolphus E. and Frank E. Karelsen were canceled last week: By W. H. Galloway, for \$1,333.16, entered Sept. 13, 1890; by the Mount Morris bank, for \$2,024.31, entered Oct. 30, 1890, and by the same, for \$1,379.77, entered Oct. 4, 1890; and by C. F. Eddy and others, for \$1,578, entered June 12, 1894. Also a judgment against Jacques E. Karelsen for \$339, entered by D. Miller, June 22, 1896.

Two small boys were discovered by a policeman, Wednesday morning, in the act of prying off the lock of one of the show cases in front of J. Ehrlich's Sons' optical and jewelry store, 223 Sixth Ave., and one of them was captured after a chase. When arraigned in court, Thursday, the boy said he was Jacob Foltz, 13 years old. His sister, an invalid girl of 18, who claimed she was the main support of her family, made a plea for him which resulted in the Magistrate paroling him Saturday in her custody.

A petition in involuntary bankruptcy

was filed, Wednesday, against Harris Herman, dealer in jewelry at 40 Catharine St., by three creditors: Abram Roseman, \$400; Charles Kahn, \$224, and J. R. Wood & Sons, \$510. It was alleged that he is insolvent and suffered a creditor to obtain a preference by a judgment in favor of A. M. Bachrach for \$737, on which the Sheriff levied on his property. Judge Thomas, Friday, appointed Leo Oppenheimer temporary receiver of Harris's property. The bankrupt has been in business about six years.

The sale of the assets of the bankrupt firm of J. T. Scott & Co., 4 Maiden Lane, did not take place last week, as announced by Receiver Long. The creditors, acting through The Jewelers' Association and Board of Trade, last week obtained from Judge Thomas, of the United States District Court, an order to show cause why the receiver should not be restrained from selling the stock. The order is returnable to-day, and in the meantime all proceedings have been stopped. The first meeting of the creditors will be held, April 8, when a trustee will be elected.

Max O. Doering, of Charles Ahrenfeldt & Son, is the chairman of a committee of merchants who have been making a fight to preserve the character of the Board of United States General Appraisers by insisting that a general appraisership shall be considered a judicial and not a political office. The point arose in the dismissal, without a hearing, of General Appraiser Shurtleff, in May, 1899. An action was brought in the Court of Claims to reinstate Mr. Shurtleff and to determine the power of the President to remove for political reasons, and in this Mr. Shurtleff and the committee were recently beaten by a divided Court. It is believed by the committee that the case should go before the Supreme Court of the United States for final adjudication, and as the

WEDDING Season Coming ! Is your Display of CUT GLASS

funds which they had to prosecute the case are now exhausted they are soliciting contributions to pay for the appeal. Contributions may be sent to F. A. Loeb, treasurer, 451 Broadway.

George A. Desenfant and L. Henry have formed a partnership under the style of Desenfant & Henry, as stone setters, at 14 Maiden Lane, Room 74, the office formerly occupied by Mr. Desenfant alone.

James Wallace, for many years a gold leaf manufacturer of New York, died last week at his home, 80 Linden Ave., Greenville, Jersey City. Deceased was born in Scotland 72 years ago and when a boy settled in New York.

There will be a sale of antique jewelry to-morrow at the American Arts Association, comprising the rare watches, rings, brooches, pins, and other pieces in the collection of W. Lewis Fraser. The articles were put on exhibition yesterday.

Louis Lilienthal, formerly of 14 John St., a bankrupt, has applied for a discharge of all his debts in bankruptcy to the United States District Court. A hearing on his petition will be had before Judge Brown, April 17, at 10.30 o'clock A. M., at which time creditors may show cause why the discharge should not be granted.

Mayor Van Wyck has sent back with a veto the Sanders bill mentioned last week, on which a hearing was given March 18, after it had passed the Senate and Assembly. The bill in question forbids body executions to be issued on judgments for less than \$25. It has been fought strenuously by the instalment dealers.

Jules La Croix, New York agent of the New England Watch Co., has returned from a seven weeks' trip through Mexico and Cuba in the interests of his house. He reports the trade in Cuba to be practically at a standstill owing to the political situation, while on the other hand, Mexico is developing very fast on commercial lines. Mr. La Croix placed an agency for the New England Watch Co. with Diener Hermanos, of Mexico City.

Philadelphia.

C. L. Conrad, 1309 N. 2d St., will remove shortly to 609 W. Girard Ave., where he has a handsome, roomy store.

Calvin Moyer, 832 Pennock St., recently graduated from the Philadelphia Horological Society, intends shortly to start in business for himself.

A one-story brick rolling mill and blacksmith shop is to be added to the plant of the Keystone Watch Case Co. The addition will cost \$3,000.

The Gold and Silver Refining Co. are making alterations and improvements to the building at 711 Sansom St., to equip it for the purposes of the company.

The ring stolen from the establishment of R. L. Saunders, 13 S. 8th St., some days ago, was stolen from Mr. Saunders and not from Howard Howe, clerk in the store, as reported last week.

Harry N. Allebach, nephew of Mahlon B. Allebach, recently deceased, has opened a retail store at 120 N. 7th St. and is making a specialty of repair work, particularly of music boxes.

A charter for an organization of salesmen and clerks, to be formed for social intercourse and mutual benefit, was asked for in local courts last week. It is to be called the Middlemen's Association.

Elwood Bailey, for over quarter of a century in business as a retail jeweler at 8th and Chestnut Sts., has abandoned his store, the stock of which has been disposed of at auction, and has moved to offices at 1208 Chestnut St.

Traveler Fred L. Baker Charged with Embezzling by Hayden W. Wheeler & Co.

DETROIT, March 28.—Fred. L. Baker, a traveler for the Non-Retailing Co., Lancaster, Pa., was arrested here this week on a capias, charged by Hayden W. Wheeler & Co., New York, with the embezzlement of \$1,400, in 1900.

Baker, who was staying at the Russell House, induced the Sheriff to allow him to stay there instead of going to jail, in order that he might continue to receive customers. He was allowed to do this on condition that two deputy sheriffs stay in the house with him. Baker hired a room adjoining his own for the deputies, and passed them off, one as his secretary and the other as an assistant to guard his sample cases. He managed to keep the matter quiet in this way for a number of days, and was later released on \$1,000 bail, signed by the American Bond and Indemnity Co.

Baker, who came originally from Newark, N. J., is about 46 years old, and was with Hayden W. Wheeler & Co. for over 20 years. He was discharged by them last November, owing to alleged embezzlements to the amount of \$1,400. He made promises to restore the sum and was not prosecuted on account of his wife and family, who live in New York. Hayden W. Wheeler & Co., who are represented here by the law firm of Foster, Frazer & Aldrich, have instituted the action to recover the amount embezzled. Baker's lawyers are Wier & Waite.

ARE YOU A BUFFALO ?

If not you are behind the times. You have not traveled. You are asleep. You have missed your opportunity. Not to be a Buffalo is not to be in the swim.

Where the order of the Buffaloes originated nobody seems to know. It has sprung up within a fortnight and already its members are numbered by the thousands. Men about town, brokers, pugilists, actors, professional men—all are going into

it. Its duties are few and not arduous. The Buffalo is simply expected to be a "good fellow."

The association is known as the "Order of Buffaloes." If you are a good fellow and have eleven cents you are eligible to membership. Any person may initiate you. In fact, you may start in on your own account and do the initiating within your own circle of friends at once.

—New York Evening Telegram.

To be in the swim you must sell our

Buffalo Ring.

THE GREATEST NOVELTY OF THE SEASON.

Designed by us to meet the demand for an insignia of the order.

These Rings are made of **STERLING SILVER, HEAVILY GILDED**, and closely resemble our **HIGH-GRADE, SOLID GOLD, HAND-CARVED RINGS.**

Fitted with imitation Cat's-eye, Ruby, Emerald, Turquoise Matrix or Opal.

PRICE, \$1.25.

Ask your jobber for them. If he hasn't got them, write us and we will tell you where to get them.

If the Buffalo craze has struck your town, these rings will sell at sight and bring you no end of customers. If it has not reached your place yet, with a little good advertising you can sell a lot of these rings and attract people to your store.

For advertising hints send for our **SPECIAL CIRCULAR** giving history and origin of the Buffaloes.

C. P. Goldsmith & Co., 33-43 Gold St., New York.

Newark.

S. J. Kutz has just completed plans for an addition to the jewelry shop of Mockridge & Co., 46 Oliver St.

Julius Keer, 73 years old, a jeweler by trade, was buried Wednesday from his home, 358 Elm St. He was born in Emmerich, Rhine Province, Germany, in 1828, and came to this country about 50 years ago. He is survived by four children.

Two Suits Cause More Trouble for W. A. England.

WORCESTER, Mass., March 27.—Thayer & Rugg, as counsel for Albert F. Richardson, has brought suit against W. A. England, jeweler, whose financial affairs are in an embarrassed condition. The *ad damnum* of the suit is \$2,000. The same counsel brought suit against England for Chas. Brown, of Leominster, for \$4,000. Both are actions of contract and returnable in the Supreme Court in May.

Trade Gossip.

One of the most artistic lines of fine jewelry in the market is shown by H. Gattle, 7 Maiden Lane, New York. The line, which is particularly strong in rings, contains many new designs. The careful selection of stones and a high grade of workmanship distinguish the goods.

The Illinois Watch Case Co., Chicago, are just placing on the market a complete line of gold cases, the originality of patterns being a special feature of the line, especially in raised and diamond work. A number of distinctly new engravings also are shown and the entire line is one that will add brightness and attractiveness to any jeweler's stock.

C. O. Vaighinger, representing Ernst Gideon Bek, Pforzheim, Germany, arrived on the *Lucania*, Saturday. Mr. Vaighinger will make a business trip, visiting the larger cities for orders for the various lines of goods manufactured by Mr. Bek. He expects to remain about six weeks and will, afterward, visit Canada, returning home the latter part of May.

Abel King, of I. Emrich & Co., 42 E. 14th St., New York, returned last Wednesday from Europe on the *Kaiser Wilhelm der Grosse*, having spent four months in selecting a varied line of art goods and novelties in jewelry, which are said to be of a character never before shown in this country. A large part of his purchases has already been received and is ready for the inspection of visiting buyers. The firm not only carry stock for immediate delivery but will also have special lines for import orders.

Adrian Hix, of Jersey City, N. J., made a ring 13 years ago for his common law wife. He lived in Indiana at the time, and states that, although an all round mechanic rather than a jeweler, he made the ring himself out of four \$5 gold pieces. The woman died some time ago, and he claims that on her deathbed she returned the ring, which he placed in a strong box. Her administrator, however, withheld the ring. Hix has sued in the District Court for the recovery of the ring, which he values at \$100.

Otto Nelson and E. M. Burns, of Peshigo, Wis., have returned from trips through the lumber camps of that section.

Bids have been called for and are now being examined for the stock of the late firm of Dingelhoefer Bros., bankrupts, Wilmington, N. C.

Bushway, Britt & Co., recently established wholesalers at Decatur, Ill., expect to start four or five salesmen on the road, this week.

N. K. Slott has again secured an interest in the business of Otto Potttharst, Davenport, Ia., and the firm style will be Potttharst & Co.

The notion store conducted by F. Albert Wey, St. Joseph, Mo., was entered by burglars, recently, and robbed of articles of jewelry valued at about \$80.

For the recent burglary of T. A. Milchsack's store, Bethlehem, Pa., Michael Watters and E. W. Wright, local men, were sent to jail by the Court.

N. H. Case has sold a half interest in his jewelry business at Sewall, Ia., to Arthur B. Scovern, of Vincennes, Ia. Case & Scovern is the new firm's name.

G. D. Robinson, of Cooperstown, N. Y., has purchased the business and stock of B. W. Robinson, at Worcester, N. Y., and will continue it in the present location.

L. J. Moffit, of Philipsburg, Mon., is preparing to start up his sapphire mines in West Fork, as soon as the season opens. This year the mines will be operated on a larger scale than ever before.

Two privates of the United States Marine Corps were held for trial at Portsmouth, Va., charged with breaking into the store of R. L. Jones & Co. and stealing therefrom a quantity of goods. They denied the charge.

O. N. Bancroft, who had a jewelry repair shop at Eustis, Fla., in the early history of the town, was there for a few days last week. He is now at Bartow, but has seen a large part of the continent, chiefly in an extensive trip into old Mexico.

The Brunswick Paper Box Co. have been incorporated under Maine laws to manufacture and deal in paper boxes and jewelers' and druggists' sundries. Capitalized at \$25,000, all paid in. President, Benjamin Greene, of Brunswick, Me.; treasurer, Stephen C. Whitmore, of Brunswick; directors, Benjamin Greene and Stephen C. Whitmore, of Brunswick; H. I. Jordan, S. D. and W. J. Damney, of Auburn.

Sanford Buckalew, watchmaker, who had made his home in Tampa, Fla., for some years, died suddenly, March 25, at his bench. He had been an inmate of the emergency hospital and had left without it being known. The matter was reported to the police and they were asked to look for him. Just as an officer walked in the door of his shop the man fell dead. He has no relatives in that city or section.

The cases against G. H. Vuille and other

PHOTOGRAPHS OF MEN.

ONE of the traditions of photography is that men always want to look like some one else. So they hook you up with a high check and martingales, and tell you to throw out your chest, to make you look like John Drew or Hackett.

I am one of the people who can't get over the isness of the is—and the way that simple, manly, characteristic pictures sell proves that the tradition is a fallacy.

Unlimited Variety

of designs characterizes **BELL 14k. GOLD-FILLED WATCH CASES** and this is the only line of which this can be truly said: for in addition to the many handsome designs we carry in stock we will engrave any special design, monogram, emblem or portrait that your customer may desire. Ever know of this being done on any other filled cases? No! Because no other filled cases contain enough gold to allow of it. It requires deep cutting and the sheets of gold must be extra thick—as they are in all **BELL 14k. GOLD-FILLED CASES**. It's to your interest to investigate this.

The "Bell Special" Gold-Filled Watch Cases are 10 dwt. standard and are the only filled cases made with the quality and quantity of gold stamped in the cases.

BROOCHES A SPECIALTY.

business men of St. Joseph, Mo., who were arrested for doing business without licenses, were dismissed in court, the merchants having secured the necessary licenses.

John Horne, Blackfoot, Idaho, has been sued for \$233.

John Van Eps will reopen a store at Somerville, N. J.

F. F. Kassel has opened a new stock of jewelry in Weston, Mo.

The dissolution is reported of Fisher & Kowitz, Harrison, Idaho.

N. Peterson, Norwich, N. Y., has moved to new quarters.

Frank L. Chase, Caledonia, N. Y., will move to Wayland, N. Y.

Max Flatauer, Tallahassee, Fla., has moved to New Orleans, La.

A. O. Marble, Essex Junction, Vt., has moved to Northfield, Mass.

U. S. Heffelfinger, Carroll, Ia., has given a realty mortgage for \$800.

Leopold Schneider, Brushton, N. Y., is now located opposite the hotel.

Paul Heilig has opened a watch and jewelry repair shop at Salisbury, N. C.

M. A. Neal has opened up a new stock of jewelry and notions in San Marcos, Tex.

W. W. Hall, Salt Lake City, Utah, has given a quit claim deed for a consideration of \$1.

Shelberg & Co. have opened up a new watchmaking establishment in Eagle Pass, Tex.

O. N. Steenstrup, of Caledonia, Minn., will open a store at Truman, Minn., about May 1.

Pyl & Wyckel, Kalamazoo, Mich., have received the contract for 66 M. I. A. A. medals.

E. C. Burrirt, La Porte, Ind., will move into a new store as soon as repairs are completed.

Robert G. Northum, a Texarkana, Ark., jeweler, died of smallpox, March 21. He was a Pathfinder.

A two story addition is being built to the factory of the Fred Frick Clock Co., Waynesboro, Pa.

Mr. Smith has sold out his interest in the drug and jewelry business of Smith & Briggs, Ripley, Okla.

Adolph Ballot, Boise, Idaho, has sold out his stock and will hereafter be found with J. T. Laughlin.

Samuel Mandelson has moved his stock of jewelry and dry goods from Clay Center to Nebraska City, Neb.

J. A. Turner, of James A. Turner & Co., Mound City, Kan., has given a warranty deed for a consideration of \$200.

H. S. Miller, Milwaukee, Wis., is opposing the laying of street railway tracks in a street before his property.

Frank Blethen has opened a jewelry

store at Houlton, Me., at the stand formerly occupied by J. K. Osgood.

Frederick Witherstine, Herkimer, N. Y., will open a new store in conjunction with a musical instrument dealer.

E. B. Stevenson, Barnesville, O., will move into new quarters in order to secure additional room for his business.

A. F. Williams, Trenton, N. J., has been enjoying a southern trip, extending to Cuba. He is due home the last of this week.

A thief stole a \$60 diamond from the store of Joseph Klem, Rochester, N. Y., last week, and no trace has been found of man or ring.

Samuel S. Graves, jeweler and pawnbroker, of Kansas City, Kan., has recently purchased real estate there, giving a mortgage as part purchase price which amounts to \$3,300.

For obtaining a watch from the Guarantee Watch Co., Richmond, Va., under false pretenses, W. T. McMachin, formerly of Philadelphia, Pa., was arrested and held for trial.

A. G. Potts, who has been salesman with J. L. Cohen, Reading, Pa., for the past four years, has been given the management of Cohen Bros.' loan and diamond broking office, 137-139 N. Queen St., Lancaster, Pa.

Because he mistook another man's house for his own and tried to get into it at 2 o'clock A. M. by way of a ladder and a closed window, a citizen of Marion, Ind., was shot in the calf of his right leg by Samuel E. Soule, jeweler, who thought it was a burglar he was shooting at.

Ira R. Amole, Coatesville, Pa., broke his usual rule of always removing goods from his show window at night and left them covered by newspapers. Burglars came along and now Mr. Amole is poorer by \$140 worth of watches, taken from the window through a hole they broke in the glass.

A dispatch from Nyack, N. Y., says that pearls to the value of \$1,500 have been found in the Hackensack river at Orangeburg, Rockland county, within the last three or four weeks, and a number have also been taken from mussel shells at West Nyack. Several men have taken up the occupation of pearl hunting in these localities.

Marsh Lindsay, the Findlay, O., hack driver awaiting trial on the charge of murder, is not one of the men who stole a tray of diamonds from Lewis Seewald's jewelry store in Tiffin, O., last September. Mr. Seewald went to Upper Sandusky and, instead of identifying him as one of the robbers, found in Lindsay an old time acquaintance.

Connecticut.

G. S. Moshier, 151 Bank St., New London, has been appointed official watch inspector of the New York, New Haven and Hartford railroad.

Louis C. Parker, grandson of ex-Mayor Charles Parker, of Meriden, and a traveling salesman for the Charles Parker Co., is to be united in marriage, April 30, to Miss Nettie Quill, of Mobile, Ala.

Walier Pullen, for several years foreman of the cutlery, fork and machine departments at C. Rogers & Bros.' factory, Meriden, has taken a position with the Bristol Brass and Clock Co., Bristol. As a token of their friendship for him Mr. Pullen's fellow workmen in those departments presented him a handsome gold headed cane.

A meeting of cutlery manufacturers was held at the Winthrop, Meriden, March 28, for the purpose of discussing trade matters. In the party were Homer A. Curtis, representing the Meriden Cutlery Co.; ex-Governor Goodell, of the Goodell Co., Antrim, N. H.; F. H. Oakman, of the Samson & Goodnow Co., Shelbourne Falls, Mass.; H. R. Hinckley, of the Northampton Cutlery Co., Northampton, Mass. The story was current that a trade combination scheme, to regulate prices, etc., was "in the works," but none of the gentlemen would divulge the objects of the meeting, excepting to say it was entirely of a private nature.

Lister & Sheeder, Ann Arbor, Mich., have sold their business to Weinmann & Matthews, of Ypsilanti, Mich.

A grandfather's clock, supposed to be 140 years old, was sold at the public sale of Amos Mertz, deceased, for \$9 recently, at Fleetwood, Pa. The clock was in excellent condition and said to keep good time.

Elmira, N. Y.

There was considerable excitement about the jewelry store of Levi Paltrowitz, 107 W. Water St., on the afternoon of March 27, when Fred White and Lucius R. Stover entered and demanded more money on a watch that they had previously pawned there. Upon refusal, they proceeded to smash things, and their arrest followed.

Justus H. Dimon, a Candor, N. Y. jeweler, was awarded a judgment for \$3,500 in his negligence action against the Lehigh Valley railroad, which was tried in Supreme Court, last week. This was an action for \$20,000 damages. He boarded the Lehigh Valley accommodation train at Berkshire, Aug. 12, 1897, to go to Richford. The engine separated from the remainder of the train. When the engine was again attached to the rest of the train, it came with such force that it threw Mr. Dimon, who was the only occupant of the car, from his seat to the aisle. He claimed that he received injuries to his spine.

Savannah, Ga.

Aug. Tamsberg, Jr., Charleston, S. C., has given a bill of sale for \$150.

J. H. Koch, of Koch & Sylvan, went to Plainfield, N. J., to attend the funeral of his sister, Mrs. George Geibelhouse.

Eugene Daly and Henry Town were last week tried on the charge of burglarizing the jewelry store of J. E. Cochran, of Tifton, Ga., last December. Daly was acquitted; Town was found guilty, with a recommendation to the mercy of the Court. He will be sentenced later.

Dorsey Delancy, colored, last week called at the store of F. Wachstein and asked to be shown some solid gold wedding rings. He selected one, which he requested the jeweler to put aside for him until the next day. He called according to promise next

day, and took from the tray placed before him a ring which he said was the one selected, but a moment later replaced a ring, saying he would call the next day for it. Mr. Wachstein at once examined the ring which he placed in the tray and discovered it was plated. He immediately told Delancy to produce the genuine ring or he would shoot him. The negro gave up the other and departed. Mr. Wachstein notified a detective of the occurrence. Delancy was shortly after arrested. He confessed and is held for trial in the City Court.

Pacific Northwest.

J. A. Maurer, Eugene, Ore., has moved into new quarters.

J. B. Cleaves will locate at Florence, Ore., and will engage in the repairing of jewelry.

A. Ballot, jeweler, is now with J. T. Laughlin, at Boise, Idaho. Mr. Ballot has disposed of his jewelry stock.

C. F. Richards, Seattle, Wash., is making a special display of novelties in sterling silver and solid gold suitable for Easter remembrances.

The Russian Ural Diamond Palace, Spokane, Wash., has been closed. The Easter Furniture Co. secured judgment against J. Davis, the proprietor, for \$63.50 and costs. Davis has disappeared.

A. & C. Feldenheimer, Portland, Ore., have a fine display of silver and gold plated cups, the special prizes to be awarded at the bench show of the Portland Kennel Club which opens April 17.

It has been suggested that the city of Seattle, Wash., put up a large clock at some point easily accessible to view and that it be maintained as a city clock. The proposition is meeting with much favor. The statement is made by those who have investigated the matter that for \$2,000 or \$3,000 a large clock with chimes and a dial capable of being illuminated at night can be put in.

WE do not **CLAIM** that all our **Ornaments, Settings, etc.**, are charged with **magnetism**, but there is a certain influence at work among them that makes them talk for themselves, so to speak.

The word **SUCCESS** seems to be stamped on every piece we make. **Why** is it so? Isn't it because when we make a thing it is **made right**? Isn't it because we devote our energies to making something that is **good for all time**? Then, again, we have the facilities for making stuff in such large quantities that we can work on a **small-profit basis**. **Why**, we executed an order last month for five (5) million pieces of one article without the slightest interruption to our regular volume of trade.

Go to Dover for anything in the **Metal Ornament, Jewel Setting or Jewelers' Findings** line; he's got it if it's good—he'll make it if it's worth making. Follow the crowd! Ask where the most successful firms buy their Findings. Get within the **magnetic influence** of our wares, and that **tired feeling** which hangs over your business will give place to **successful endeavor**.

GEO. W. DOVER,

80 Clifford St., Providence, R. I.

P. S.—Mix a few of Dover's ideas with yours and watch them effervesce.

TAKES ITS WAY

WESTERN SUPPLEMENT

VOL. XLII.

NEW YORK, WEDNESDAY, APRIL 3, 1901.

No. 9.

Chicago Notes.

All communications in reference to the Chicago department of The Jewelers' Circular-Weekly, addressed to Stephen Parlin, 134 Van Buren St., Room 414, Chicago, will receive prompt attention.

TRADE CONDITIONS.

Business the first half of March showed a slight improvement over last year as shown by jobbing houses, and the last half of the month has seemingly shown an improvement over the first half. A further increase in the volume of sales is looked for after Easter. The bank clearings, east, west and south, denote a healthy condition and reports from travelers in the northwest and southwest are of a most encouraging nature. The Pacific Coast has had a good Spring trade, though judging from the reports of returned commercial men it is apparently not as good this year as last. Plenty of snow in the mountains of Colorado will give a large supply of water for irrigating purposes, and prospect for crops the coming season is excellent, giving promise of good trade with the mountain section. This is not a time when opening outfits are being sold, and consequently tools and materials, in which such sales form an important factor, are easing off a bit.

J. B. Hudson, Minneapolis, Minn., was last week in town, reported to be on his way east.

J. W. Carter, Belton, Tex., was in last week, buying, but devoted most of his time to the selection of pianos.

Charles J. Jacobs, Chicago manager of the Homan Silver Plate Co., left Sunday for a short stay at St. Louis.

H. S. Rogers & Son, Plymouth, Ind., have been succeeded by the son, who will continue the business, the father retiring.

J. E. McCourt, Ludington, Mich., was here last week, purchasing a side line of bric-a-brac, a new department with him.

Fred. H. Allen has been renominated a candidate for Alderman in La Grange, his suburban home. Particulars will be given after election.

Fred. Thearle, of C. H. Knights & Co., returned from California early last week after an absence of a month of pleasure and travel on the coast.

Paul Juergens's safe arrival at Naples is reported. Mr. Juergens is accompanied by his wife and daughter, Anna, and will remain abroad six or seven months on a continental tour.

D. M. Grinnell has opened a store at Black Earth, Wis. Mr. Grinnell was formerly in business at Broadhead, Wis., but more recently has been working for Dahle & Berg, Mount Horeb, Wis.

E. C. Ostby, of Ostby & Barton Co., and his eldest son, Harold, are at present at Monterey, Cal., and are expected in Chi-

cago about April 10, visiting San Francisco, Salt Lake City and Denver on their return.

W. H. Habbeler & Co., 78-80 Dearborn St., are removing their stock and business to Sheffield, Ala., where they will conduct a wholesale jewelry business, the same as they have done for the past 14 years in Chicago.

S. C. Eppenstein, of the Illinois Watch Case Co., has reached Switzerland after visiting a number of English cities, with very gratifying results from a business point of view. The export trade of the company is growing rapidly and has become quite an important factor in the business.

George Haight and William Levett, charged with the larceny of a large quantity of jewelry belonging to Otto Young & Co., waived examination when brought before Justice Martin in the Harrison St. Police Court, and were held to the Criminal Court. They were arrested in Kansas City.

Edward Anderson, a trusted clerk in the employ of Nordahl & Olson, jewelers, 449 Milwaukee Ave., occupies a cell in a police station, a self-confessed thief. He is accused of having systematically robbed his employers during the past year or more. Meeting Mr. Olson at the police station the young man broke down and made a full confession. It is believed that the prisoner is guilty of stealing at least \$1,000 worth of watches, rings and other jewelry from the store. Considerable of the stolen property was recovered. The thefts were carried on a long time before Anderson was suspected.

A yacht club trophy, made for the Springfield Yacht Club and known as the Commodore cup, was on exhibition last week at the salesrooms of the Towle Mfg. Co. The body is an elongated egg shape, with festooning of ropes and anchors at the top. Handles were of ropes and stays and boathooks and outer edge of base encircled by ropes. The body and base were plain, except for the cut engravings. On one side was etched a yacht under full sail, and the lettering, "Springfield Yacht Club, Commodore Cup." On the reverse the records of the winners. It was a handsome and artistic trophy.

Buyers here were rather more numerous last week, and taking it all around, it was a pretty good week for business. The following were among those who bought in person: T. H. Gill, Marengo, Ill.; O. K. Glimme, Whitewater, Wis.; J. C. Peers, Rockford, Ill.; Q. B. Hudson, Minneapolis, Minn.; Luther McCain, Delphi, Ind.; George O. Warren, Sycamore, Ill.;

W. W. Denney, Aurora, Ill.; E. B. Leckey, Eagle Grove, Ia.; L. H. Bauer, Elgin, Ill.; J. W. Carter, Belton, Tex.; Mr. Lundgrin, St. Charles, Ill.; Mr. Toms, Richland Center, Wis.; O. K. Monaveh, Cedar Rapids, Ia.; Laderach Bros., Hammond, Ind.; Mr. Young, of Cole & Young, South Chicago, Ill.; C. K. Shortess, Traer, Ia.; H. Reiter, Kouts, Ind.; Horace Shadel, Rogers, Ark.; J. E. McCourt, Ludington, Mich.

A petition for early closing has been circulated among the wholesale and manufacturing jewelry and cognate trades, with the object of concerted action in closing the places of business on Saturdays from May 4 until Aug. 31 at 1 o'clock p.m. and on all other days during the same period at 5.30 o'clock p.m. The following have signed the list:

Wadsworth Watch Case Co., G. W. Marquardt & Sons, Schrader-Wittstein Co., Keystone Watch Case Co., Courvoisier-Wilcox Mfg. Co., M. A. Mead & Co., Stein & Ellbogen Co., Louis Manheimer, Western Watch Case Mfg. Co., Crescent Watch Case Co., M. F. Barger & Co., J. W. Forsinger, C. H. Knights & Co., Robbins & Appleton, Recob, Ziegler & Co., L. H. Schafer & Co., Ostby & Barton Co., Theodore W. Foster & Bro. Co., Lapp & Pleshem, James K. Caldwell (April 1), R. C. Demarest (April 1), International Silver Co. (April 1), M. N. Burchard (April 1), Benj. Allen & Co., H. F. Hahn & Co., A. Hirsch & Co., M. S. Fleischman Co., Alfred H. Smith & Co., Reed & Barton (March 1 to Sept. 15), Joseph Fahys & Co., A. C. Becken, Daggett & Clap Co., L. Seligman Jewelry Co., Jules Racine & Co., George O. Street & Sons, H. Baum, D. Wilcox & Co., D. F. Briggs Co., C. H. Allen & Co., L. Adler & Son, J. J. White, Otto Young & Co., E. Schwarz & Co., O. W. Wallis & Co., Swartzchild & Co., Moore & Evans, Max R. Green & Co., M. Newman, F. C. Happel Co., Rich & Allen Co., J. N. Rutishauser Co., Ed. H. Thielens, John Woollett, T. W. Adams & Co., J. T. Edwards, C. E. Hancock Co., F. H. Noble & Co., George H. Fuller & Son Co., Charles T. Wittstein & Co., W. E. Clow & Co., Simons, Bro. & Co., J. M. & A. C. Johnston, E. G. Webster & Son, Ansonia Clock Co., Juergens & Andersen Co., Sprochnle & Co., Illinois Watch Case Co., Philadelphia Watch Case Co., C. G. Breitenbach, Anchor Silver Plate Co., F. A. Hardy & Co., Gorham Mfg. Co., C. Rogers & Bros., Waterbury Clock Co., J. H. Purdy & Co., F. E. Morse Co., A. Davis & Co., Towle Mfg. Co., Seth Thomas Clock Co., G. A. Webster, Geneva Optical Co., R. Wallace & Sons Mfg. Co., William L. Gilbert Clock Co.

It may be added that the sterling silver ware and watch movement manufacturers have been closing at either 12 o'clock or 1 p.m. since March 1, and the silver plated houses commenced April 1.

P. H. Doll, Las Vegas, Ill., was married last week to Miss Emma Felitz, at Seattle, Wash.

Louis Amundsen, lately with Christophersen & Amundsen, Menominee, Mich., will locate for himself at some place in the west.

San Francisco.

Henry Wolff sailed for Honolulu, Hawaii, last week.

H. Wachhorst, Sacramento, Cal., visited the trade of San Francisco last week.

N. M. Bailey, Rio Vista, Cal., did business in San Francisco a few days ago.

F. E. Whitney has returned from the Pacific northwest. He found trade in that vicinity dull.

Honolulu business has been very dull this Spring. Among the visitors in that city are Mr. Innis, representing George Greenzweig & Co.; Mr. Hall, of A. I. Hall & Sons; Henry Wolff, and Mr. Heacock, of Heacock & Freer, who stopped over two weeks, en route to Manila.

M. L. Krafts, jeweler, 1230 Dupont St., has secured a warrant for the arrest of John Cicovia on a charge of felony embezzlement. Krafts alleges that on March 13 he gave Cicovia two diamonds and a gold chain, which he was to sell, Cicovia representing that he was the owner of a saloon. Krafts ascertained that Cicovia sold out the saloon several months ago. Cicovia has not been seen by Krafts since he got the articles, which are valued at \$123.75.

By the arrest of Charles Mitchell and William Davis, the police of this city believe that they have at last captured the burglars who have been operating south of Market St. the last several weeks. The men were captured last Saturday night, and in their room on Howard St. was found a lot of jewelry that had been stolen from several stores. During the past few weeks at least three jewelry stores south of Market St. have been entered and property valued at several hundred dollars taken.

A. H. Jenks, Bath, N. Y., has sold out to F. J. House, Arkport, N. Y.

Mr. Homan Tells of Business and Other Conditions in Mexico and Havana.

CINCINNATI, O., April 1.—Louis Homan, of the Homan Silver Plate Co., has just returned from a trip through Mexico. Mr. Homan did considerable business for the silver plate company on the trip. Speaking of the situation in Mexico Mr. Homan said that general conditions were good, but that there had been an overdoing of business in the rush of so many people to get into manufacturing.

"All the capital that can be secured," said Mr. Homan, "has been put into manufacturing. Some people have started into manufacturing enterprises and incorporated them and then taken the stock or a large part of it to the banks and borrowed money on it with which they have started other manufacturing enterprises. In this way the banks have become loaded up with a lot of stock that is not the best security in the world, and the result has been that the other extreme has been reached. The banks are not making any loans except upon the best collateral, and even then they do not lend much money, except at 10 and 12 per cent. This, together with the fact that there has been a large drain upon the currency of the republic, has made money rather scarce, and the result is not the best. The currency of the country has largely gone to China, the Philippines, and elsewhere.

"From the City of Mexico we went to Vera Cruz and thence sailed to Havana. The contrast between the City of Mexico and Havana is great. Havana is as clean and as healthy as any American city, and the streets are cleaner and in better condition right now than those of Cincinnati, which is saying a good deal. Havana is becoming Americanized rapidly. Everything there is becoming American and the American flag is everywhere. It is hard to see how we can get out of keeping the island ultimately."

IMPERIAL MFG. CO.,
Masonic Temple, Chicago.

Kansas City.

F. C. Steimann, of F. C. Steimann & Co., dealers in tools and materials, New York, called on the local trade recently.

L. Dierdoff, Osage City, Kan., passed through the city last week en route to Colona, Ia., where he will locate. He called on the trade in passing through.

Arthur Clark, formerly with the Norton-Paulson Jewelry Co. but now with Bauman-Massa Jewelry Co., St. Louis, visited here last week.

The Colonial Pen Co. have established a branch here. It will be under the management of M. S. Morris. A complete line of their products will be carried in stock.

In a recent conflagration at Carthage, Mo., the store of H. P. Hall was destroyed and everything outside of the safe was consumed. His safe fell into the cellar, but on opening it the contents were found in good condition.

The students of the Central High School have ordered pins. The design has the word "Central" in blue and white enamel suspended from a gold bar. Blue and white are the Central school's colors. The pins are about an inch long.

S. Swarts, formerly with C. I. Lee & Co., this city, has gone to Colgate, I. T., where he intends to open a store. Mr. Swarts purchased a stock of jewelry from Garner & Pugh, Colgate, who have been running a jewelry store in connection with their drug business.

Earl Underwood, who sold out his business in Arkansas City, Kan., last week, to Mr. Wyckliffe, has purchased the furniture and fixtures of C. S. Raymond Sons, here, and expects to open a store at the same location, April 20. Mr. Underwood will leave for New York, within a short time, to purchase his stock.

It is said that the attorneys in the case of Emma Farrington against the Streiche Watch and Jewelry Co. have agreed upon a compromise, judgment being confessed for \$425 and costs by the defendants, instead of \$1,600, the amount awarded by a jury. The agreement was probably reached in order that another trial of the case might be avoided.

N. A. Heath, Jr., Hebron, Neb., better known as Bert Heath, visited in Kansas City last week on his way south. Mr. Heath is taking an extended pleasure trip of some three or four months. He left for Port Arthur and from there will go to Fort Worth, El Paso, Los Angeles, San Francisco, and probably will make a trip through old Mexico. He expects to stay six weeks in California and will return by way of Ogden, Salt Lake City, Colorado Springs and Denver.

Omaha.

W. D. Abel was called to his home in Clarks, Neb., by the severe illness of his father.

Albert Edholm is building a residence

at 36th and Douglas Sts., at a cost of \$2,500.

W. H. Spelling has opened a jewelry store and repair shop on Broadway, Council Bluffs, Ia.

Raines Bros., Tarkio, Mo., have purchased the fixtures of another store and moved into larger quarters, with the intention of extending their business.

C. L. Shook and his band are playing for the Auditorium Exposition being held in Omaha. The city is making strenuous effort to secure a \$200,000 auditorium. The larger part of this sum has been subscribed and the building no doubt will be erected.

George W. Ryan, who has purchased Mr. Holliday's interest in Mawhinney & Holliday's jewelry store, will, after closing out his present stock, enter into the new partnership. Mr. Holliday has recently come into a large inheritance and will go into the banking business. Mr. Ryan has just returned from a trip to Maine.

T. L. Combs & Co. have been doing some fine work recently. They have secured the contract for making all the society pins for the Phi Rho Sigma fraternity of both the Creighton and the Omaha Medical colleges. The pin consists of the three Greek letters made up of diamonds, pearls, opals or rubies, according to the fancy of the wearer. They have also received the contract for the official pin of the Omaha Medical college. It is pendant

shape, with the colors of the college and the letters "O. M. C." in monogram.

B. E. Miller, this city, has opened a jewelry store and repair shop in Wellington, Kan.

T. L. Combs is now in Chicago on business. In June he will pay a 30 days' visit to old Mexico on business and pleasure.

E. Morrey has finished his course in the horological school and returned to Valentine, Neb., to engage in business with his father.

C. C. Tanner, Red Oak, Ia.; Abram Hertzler, Indianola, Ia.; John Stackhouse, Topeka, Kan., and Paul Albright, David City, are taking courses in the Omaha Horological School.

Indianapolis.

E. C. Miller has returned from a visit to his father at Parrell, Mexico.

Bernloehr Bros., Pembroke Arcade, have been appointed watch inspectors for the Pennsylvania R. R. system, vice J. C. Walk & Son.

The following jewelers were in the city last week attending the Scottish Rite Convocation and visiting the wholesale houses: F. C. Sheldon, Shelbyville, Ind.; J. M. Tryon, Monroeville, Ind.; W. S. Lasley, Advance, Ind.; Chas. Ham, Frankfort, Ind.; C. N. Hetzner, Peru, Ind.; Henry Rossier, Martinsville, Ind.; E. E. Mosiman, Bluffton, Ind.; Geo. S. Drake, Pendleton, Ind.; George W. Schlagel, Summitville, Ind.; B. Maier, Edinburg, Ind.; J. W. Hudson, Fortville, Ind.; J. A. Meissen, Cicero, Ind.

Ernest Hampton, a colored boy, employed as porter in Smith & Gray's jewelry store, 111 W. Washington St., has been sent to the grand jury on the charge of grand larceny. Hampton tried to pawn a diamond ring and a valuable watch in a pawn shop. The pawnbroker refused to accept the articles and notified the police. For two days the detectives searched for the colored boy but failed to find him, not knowing where he was employed. On the third day the police were surprised when Hampton walked into the police station and demanded to know why the detectives were after him. He at first denied all knowledge of the robbery, but finally said he found the ring and watch in the store in which he was employed. He admitted that he had hidden the jewelry in a box of saw-dust under one of the showcases in the store. The articles were found.

Detroit.

Burglars last week broke the window in jeweler William Roach's store, Jackson, and stole two watches.

A set of handsome jewels, to be presented to the Michigan Lodge of Masons, is on exhibition at the jewelry store of W. A. Sturgeon & Co.

The Tontine Surety Co., of New Jersey, have filed an answer to Attorney General Oren's petition, stating that they are closing up the affairs of the Tontine Surety Co., of Detroit, have filed articles of association at Lansing and are conducting a legitimate business.

Established in 1880.

AN AUCTION

conducted by me is an assured success and a positive guarantee against injury to your future business. Having conducted nearly all the large sales in the United States and Canada in the last twenty-one years, I am prepared to give the best of reference, and do give any manufacturer or jobbing house, or jewelry or silverware salesman in America as a special reference.

Minneapolis and St. Paul.

J. B. Hudson, Minneapolis, has been in Chicago for four days.

Lewis Finkelstein, St. Paul, has returned from a four weeks' stay at the Hot Springs.

H. Birkenhauer & Co., jewelers' supplies, Minneapolis, have added a line of chains, charms and optical goods.

C. H. Carpenter, of the Minneapolis Jewelry Mfg. Co., has been laid up a few days with rheumatism in the ankles.

Mrs. M. Seewald, Velva, N. Dak., who has been in the Twin Cities and her old home at Grantsburg, Wis., for a fortnight, has returned home.

Robert White, case maker for R. B. Ackerman & Co., Minneapolis, has resigned and has gone to Rockford, Ill., where he will engage in business for himself.

Julius L. Strauss, manager of the jewelry department of the Golden Rule Store, St. Paul, has resigned his position, effective April 1, owing to failing health. He will sail from New York April 10 and spend four or five months on the Continent. He expects to return to the jewelry business in the northwest and plans on being back by Sept. 15.

Arthur L. Mace, St. Paul, has lost a watch, chain and medallion pendant by a clever trick. He had left it with O. H. Arosin, jeweler, to be repaired. During

the day when the watch was to be ready for delivery, Arosin was telephoned and inquired of if the watch was ready. On being answered that it was the inquirer stated that a messenger would call. Soon a boy came in with a note purporting to be from Mace, paid the charges and received the watch. Later Mace appeared for his watch. The police are searching for the lost timepiece.

Pacific Coast Notes.

J. D. Bennett has opened a jewelry establishment at San Rafael, Cal.

J. F. Roche, Salmon, Idaho, has sold out to Fiddes & Shutz.

J. E. Vaughn, Tulare, Cal., has been succeeded by Vaughn & Lasch.

Harry Chute, Lakeport, Cal., is reported closing out to retire from business.

C. Nicks is soon to erect a building at Point Arena, Cal., to be used as a jewelry shop.

W. C. Hauser, jeweler, has purchased lots on Main St., Dinuba, Cal., and is contemplating the erection of a two-story building.

The following notice has been published relative to the statement made that Leon Vaughn was arrested for burglarizing the jewelry store of Z. F. Vaughn, Tulare, Cal.: "The said Leon Vaughn was arrested for said offense and brought into court, and on preliminary examination the

fact that Leon Vaughn was not in any way connected with the breaking into said store was shown, but was a subject of unfortunate circumstances. On showing of the above facts the case was promptly dismissed. Signed, D. J. F. Reed, Justice of the Peace."

Pittsburgh.

Harry Heeren is at Du Bois, Pa., on a business trip.

Bygate & Co., Scottdale, Pa., are holding an auction sale.

Emanuel Grafner, of Grafner Bros., went to Philadelphia, last week.

I. E. Isaacs, Smithfield St., left Saturday night on a business trip east.

Charles Kane is the new bookkeeper at Grafner Bros., vice G. E. Crone, resigned.

Mr. Bonnet, formerly a jobber of Columbus, O., has charge of the music box department of Heeren Bros. & Co.

Heeren Bros. & Co. furnished the nickel silver and silver soldered drinking cups for the magnificent new Lake Erie depot.

Miss Grace Miller, formerly with Alex. Munn, Butler St., and Miss Boyd, are permanently in charge of the art and silver ware departments of Hardy & Hayes.

A. E. Siviter & Co. removed on Saturday last to the Goddard, Hill & Co. building, Mr. Thompson, formerly with J. McKinney, East Liverpool, O., is now with this firm.

Justus Mulert, trustee of the property of

every trade-mark used on any goods in your line, so as to be able to duplicate or have repaired any article a customer may present. "TRADE-MARKS" will give you all the information desired. Write for descriptive circular to THE JEWELERS' CIRCULAR PUBLISHING CO., 11 John Street, New York.

Henry C. Berger, bankrupt, of 929 Fifth Ave., received private bids at his office on the store furniture and fixtures and the stock of jewelry. A check for 25 per cent. of the amount of bid was requested to be sent with each bid.

Few visitors were in the city, last week, from out of town. Among them were: Ed. Kennerdell, Tarentum, Pa.; C. M. Wilson, Salem, O.; William Hunt, Uniontown, Pa.; Robert W. Brady, Washington, Pa.; F. F. Robinson, Vandegrift, Pa.; Robert Hunt, Uniontown, Pa.; J. C. Sharer, Alliance, O.; Mr. Roy, Braddock, Pa.; Leroy Swan, Elwood City, Pa.; A. Merz, Sewickley, Pa.; P. C. Yester, McKeesport, Pa.

West, White & Hartman, wholesale jewelers, remove this week to the Bijou building, Penn Ave., near 6th St. They will occupy rooms Nos. 204-205, and will be accompanied by L. O. C. Mehaffey, material; R. M. H. Jantzen, engraver; C. C. Wagner, watchmaker, and Frank A. Land, manufacturer. The new location is in the heart of a busy district and admirably suited to the wants of this firm. Mr. Hartman reports a steadily growing trade and a good business from the country districts.

The following is a complete list of the creditors of H. C. Berger, who filed a petition in bankruptcy recently: Laubheim Bros., \$371.06; W. J. Johnston Co., \$210.35; Oneida Silver Co., \$45; Manhattan Silver Plate Co., \$77.20; Grafner Bros., \$11.75; M. M. Brewster, \$55.50; Poole Silver Co., \$47.81; A. H. Gerwig, \$73.54; S. & S. Druiff, \$33.69; Heeren Bros. & Co., \$609.50; Bergstein & Son, \$168.35; Adolph Rosenthal, \$687.83; New England Watch Co., \$50.50; William L. Gilbert Clock Co., \$90.24.

A letter from Tennessee addressed to "The Big Jewelry Store, Lowell, Mass.," found its way to George H. Wood's establishment in Central St. Mr. Wood, who is in the South, wanted to see if Uncle Sam knew where his jewelry establishment was situated. Uncle Sam knew all right and the letter was safely delivered. Mr. Wood had used that name in his newspaper advertising until it is always associated with his business.

Cincinnati.

The Buckeye Watch Co., of Springfield, O., have been incorporated with a capital of \$10,000.

Constant Van Reeth, diamond cutter, is moving his cutting plant to the Noterman building and will occupy a part of the third floor with Jos. Noterman & Co. He has a finely equipped plant and will be in shape to continue business in a few days.

The ousting of the debenture companies by the recent decision of the Supreme Court has showed up these concerns and has developed that among the holders of the certificates are many jewelers here and throughout the State. There are nine such companies operating in the State, five being in Cincinnati, and the losses to the people, it is said, will reach over \$1,000,000.

Louis H. Goosmann, 915 Central Ave., told the Chief of Police, Friday, that a man who had stolen a watch from his store came in again that day, thinking the jeweler would not recognize him and he might get another chance, but Mr. Goosmann recognized him and sent his boy to get a policeman who was standing on the crossing at that moment. The policeman would not respond, saying he was not on duty, and he got on a car and went away. By the time the boy reached the Central Police Station the man got away, after a severe struggle with Mr. Goosmann. The Chief is looking up the matter.

St. Louis.

TRADE CONDITIONS.

Business among the wholesale jewelers has been quite good the past week, much better than during the same period last year.

The Bauman-Massa Jewelry Co. are now occupying the two additional rooms that increase of business compelled them to take.

Frank W. Baier, president of the Missouri Retail Jewelers' Association, is having considerable trouble with his left hand, which he hurt while cleaning his bicycle. Blood poisoning threatens, and he has had to have a couple of operations performed and it still troubles him.

The Latest Patents.

ISSUE OF MARCH 27, 1901.

670,446. HOLDING-BLOCK FOR CASES OR BOXES. EDWIN J. FLETCHER, New York, N. Y., and CHARLES E. BULKLEY, Summit, N. J., assignors to the Patent Case Co., New York, N. Y. Filed Feb. 8, 1900. Serial No. 4,465. (No model.)

In a block of the character set forth, a base, parallel ways thereon, a pair of jaws received and guided in said ways with liberty to move toward and from each other while maintaining the parallelism of their adjacent faces, a spring attached to both jaws and serving to urge them together with an equal tension on each, and a center piece secured between said jaws and serving to limit their approach and determine the central line between them, all combined and arranged to serve with a case or box.

670,493. BUCKLE. EDWIN W. GROESCHEL, Jersey City, N. J. Filed Sept. 4, 1900. Serial No. 28,904. (No model.)

In a buckle, the combination of two members, one of said members comprising, integrally formed, a substantially straight intermediate-bar portion, elastic side-bar portions extending from the ends of said intermediate-bar portion and bent first inwardly toward each other, to thus form with said intermediate-bar portion a confined belt-space, and then divergently and having their free ends turned off out of the general plane of said member, thus forming hooks, and the tips of said hooks being bent outwardly away from each other, and the other of said members comprising, also integrally formed, side-bar portions, an intermediate-bar portion adapted to be engaged by the hooks of the other member and connecting said side-bar portions at one end, and an elongated belt-receiving loop portion connecting said side-bar portions at the other end, said last-named side-bar portions converging away from the loop portion and having inwardly-projecting stops or abutments disposed contiguous thereto.

670,500. LENS CUTTING AND EDGING MACHINE. FRANK A. MORGAN and FREDERICK H. BROWN, Lebanon, N. H. Filed July 16, 1900. Serial No. 23,775. (No model.)

In a lens cutting and edging machine, a pair of pivotally and gear connected frames carrying the lens-clamps and driving-shaft, and means for imparting a longitudinally-rocking motion to the frames.

670,501. HAT-FASTENER. FREDERICK STAUFENBERGER, Irvington, N. J. Filed Oct. 13, 1900. Serial No. 32,910. (No model.)

In a hat-fastener, the combination, with a retaining-plate adapted to be arranged on one side of a

hat-body, and having a slotted pin-receiving portion, of a hat-pin adapted to be arranged in said pin-receiving portion, means connected with said plate constructed and arranged to permit the hat-pin to be arranged within or to be lifted from said pin-receiving portion, and means for preventing the withdrawal of said pin when arranged in said pin-receiving portion.

670,502. SPOON-HOLDER. BETTY ANDERSON, Lancaster, Ky., assignor of one-half to W. E. McCann, Lexington, Ky. Filed Sept. 21, 1900. Serial No. 30,719. (No model.)

A device of the character described comprising practically a U-shaped clasp with one limb or member thereof slitted and bent reversely in part near the connecting-bend between the members, leaving a pendent portion to overlie the outer side of a vessel, said reversely-bent portions forming up-standing arms extending above said connecting-bend.

670,593. GRINDING OR POLISHING DISK. DANIEL J. MURNANE, Tuxedo Park, Mo., assignor to the National Mercury Mirror Co., of Missouri. Filed Sept. 27, 1899. Renewed Nov. 15, 1900. Serial No. 36,650. (No model.)

A grinding or polishing disk, having a series of slots, through which the grinding or polishing material is adapted to pass, and troughs formed in said disk, and in communication with said slots.

670,634. ELECTRIC CLOCK. FRED. L. GREGORY, Chicago, Ill., assignor to the Sempire Clock Co., same place. Filed March 2, 1900. Serial No. 7,046. (No model.)

In a timepiece, the combination, with frictionally-driven seconds and minute hands, of a pair of set-

table members operatively connected respectively with said hands; a pair of oppositely-movable combined setting and centering levers cooperative with opposite side of the settable member for the minute-hand and simultaneously operative for shifting said settable member to, and centering it in, a predetermined position in opposition to such friction; a horseshoe-electromagnet having an armature secured to an armature-shaft journaled between, and oscillatory in the plane of, the poles thereof; and a pair of setting members both secured to said armature-shaft and one controlling the settable member for the seconds-hand and the other controlling said levers.

670,635. TIMING ATTACHMENT FOR CAMERAS. BERNHARD HERNHUTER, New York, N. Y. Filed June 20, 1900. Serial No. 20,917. (No model.)

A photographic camera provided with a push-rod, a shutter and a lever operatively connected to the push-rod, an alarm, and a spring for throwing the lever against the alarm upon the withdrawal of the push-rod.

670,652. EYEGLASSES. HOWARD F. WALLACE, Los Angeles, Cal. Filed April 19, 1900. Serial No. 13,524. (No model.)

A lens-clamp for eyeglasses, comprising a movable wing having a bearing-bracket adapted to bear against the edge of a lens, a lug on the outer face of said bracket, a second wing having a screw-threaded socket, a screw-threaded stud having a nut-head provided with a groove adapted to engage the lug on the movable wing and means to secure the parts together.

DESIGN 34,261. WATCH-DIAL. EZRA C. FITCH,

Manchester, Mass. Filed Feb. 26, 1901. Serial No. 49,011. Term of patent 14 years.

DESIGN 34,264. TONGUE FOR BELT-

BUCKLES. ANDREW HOLMES, Attleboro, Mass., assignor to O. W. Hawkins & Co., same place. Filed Feb. 14, 1901. Serial No. 47,379. Term of patent 3½ years.

DESIGN 34,265. MEMBER FOR BELT-

BUCKLES. ANDREW HOLMES, Attleboro, Mass., assignor to O. W. Hawkins & Co., same place. Filed Feb. 14, 1901. Serial No. 47,378. Term of patent 3½ years.

DESIGN 34,266. BUCKLE. CHARLES KNOTHE, New York, N. Y. Filed Feb. 28, 1901. Serial

No. 49,362. Term of patent 3½ years.

DESIGN 34,267. SPOON. TYLER CALHOUN,

Ridgetop, Tenn. Filed March 1, 1901. Serial No. 49,519. Term of patent seven years.

20 CENTURY

UP TO DATE

RETAIL MERCHANDISE

That this department shall prove mutually beneficial to our readers, it is desirable that the members of the trade generally communicate with THE JEWELERS' CIRCULAR-WEEKLY regarding any advantageous device or plan that they are utilizing in connection with their business.

PRIZE ESSAY COMPETITION, NO. 3.

SUBJECT:

"How to Foster Spring Trade."

No. 4.

PRIZE ESSAY COMPETITION.

First Prize, \$20.
Second Prize, \$10.

These prizes will be given to the writers of essays on the subject

"How to Promote a Bric-à-brac, Pottery and Cut Glass Department."

The prizes will be for the best and most reasonable essays, not for the language in which the ideas are expressed. Anyone may enter, whether he be a retailer, salesman or any employe.

The standing of the judges who have kindly consented to act is a guarantee that the contest will be carried on strictly on its merits and in an absolutely fair and impartial manner. We shall designate each contribution by letters, keeping a list of contributors with the letters of their articles. Thus the judges will not even know the names of the writers whose products they pass upon.

RULES:

Essays must be in this office by June 15, 1901.
Essays must be written on one side of paper.
No limit to number of words, and specimens of records are admissible.

NOTE.—THE JEWELERS' CIRCULAR-WEEKLY reserves the right to publish any or all of the competing essays received.

Preference will be given, all other things being equal, to those whose contributions reach us at the earliest date.

THE PRIZE WINNERS OF COMPETITION NO. 2.

TRULY have the judges in the Prize Essay Competition No. 2, "How to Treat Customers—How to Sell," had a difficult task in selecting those two essays which they consider entitled to the prizes offered. In all, 22 essays were deemed worthy of publication, and of these fully 15 were admirable essays, replete with valuable suggestions, while all of them, long or brief, showed deep thought and careful preparation. The judges regret that it is not possible to substantially award all the competing essayists. But there could be no competition if all entries were to receive large prizes. After careful reading and rereading, the 22 essays

were divided into four classes: No. 1, No. 2, No. 3, and No. 4. It was natural that those in group No. 1 would contain the essays entitled to the first and second prizes offered. In this group were placed those essays signed E., R., M., and U., and one which we will here designate as XX, as it was inadvertently left unsigned. This system of elimination brought down for final selection five essays, and after consideration the judges deemed the following entitled to the two prizes offered:

1st Prize, M.—J. A. Styron, Jr., with L. M. Carter, Shreveport, La.

2d Prize, E.—Herbert L. Luke, with Ambrose Kent & Sons, Toronto.

Worthy of special mention:

R.—Reginald Foster, London, England.

U.—Robert Schwertner, New York.

XX.—Richard Herbst, with International Silver Co., New York.

NOVELTY FOR A SHOW WINDOW.

A BERLIN firm, well known for its useful articles in the show window decorating line, is offering a novelty which will doubtless find favor among

jewelers, etc. It is an artistically modeled waxed hand, vertically fixed on a turning mechanism, as shown in the cut. Two fingers of the hand are removable and so arranged that they can be adorned with rings. Between the index finger and the middle finger a little hook is attached on which any desired article may be hung, while the wrist is ready to receive bracelets.

IT has been justly said, "The child is father of the man." Trade is like the child, the father being the merchant and the man a union and growth of both. Hence, the maxim may read: "Trade is the parent of success—studied, nourished, guided and guarded from infancy."

The jeweler's trade of all others demands constant effort and an ever vigilant eye and an endless store of patience on his part, lest another, ever on the alert, receive the patronage that should be his.

No matter how long in business or what his gains the merchant is not willing to see his trade passing the door to another shop further on. He may have had for 25 years a prosperous business, but he suddenly awakes to find sales less and business quiet. Why? At this point many console themselves with the thought that it is a political outcome and are satisfied with this reflection. Not so the wide-awake, anxious man. He will investigate the trouble, root out the evil if it exists and rebuild trade.

Trade must be courted, gained and held. To accomplish this several things are requisite. The merchant must know the ware he is handling, that he may be able to discuss freely, intelligently, honestly and adroitly its merits and value. He must be prepared for the various questions arising during the transactions. Oftentimes an undecided answer decides the customer, from lack of confidence, to try elsewhere.

It is my opinion that people are more afraid of being overcharged in jewelry than in any other line. Hence, handle goods that will enable you to compete with all competitors. Mark them plainly, that customers may convince themselves of your prices.

Keep abreast with the times. If you would have a good Spring trade, begin early to study the various wares, designs, fashions and your needs. Make your stock replete with new staples and fashionable novelties; make it prominent for variety and attractiveness.

Each season brings new articles made to meet the demands of Dame Fashion. I heard an elderly lady remark: "One may as well be dead as not be in style," which, at present, seems not overdrawn. Be among the first to have new and up-to-date articles in your stock. Let judgment govern the selection; do not buy too much of one novelty, or too expensive goods for the average customer.

G. and HINTS to JEWELERS

New things will prove good advertising agents and bring people to the store, who, if they do not go elsewhere, are accustomed to send for supplies. Too much cannot be said about advertising. It is the medium through which the world becomes acquainted with you and your wares; it is like the influential friend of child, youth and man.

Never boast about your business, nor advertise a competitor's goods by running them down. This practice will take away trade rather than foster it.

Dress your windows tastefully and attractively, replenishing or changing often. Arrange your store likewise for a good

see his wares first and, consequently, many sales made before looking elsewhere. In this case a good salesman often sells an article to the customer unintentionally when he or she was just "looking," and if he—the salesman—is obliging, ambitious and interested, he will prove a valuable promoter of Spring trade. Bad luck comes to the man with his hands in his pockets, waiting to see how things will turn out. Try to attract customers. Clothe the youth (trade) with substantial merchandise and sustain him by furnishing his needs. By your example and manner lead him—the rest will follow.

A. M. O.

Best Dressed Windows Among the Retail Jewelers.

Series II. No. XXX.

NOTE.—We inaugurated with the issue of May 3, 1899, the second series of characteristic retail jewelers' windows. The first series consisted of illustrations and descriptions of more than 100 different displays, extending over a period of eight years. We desire any jeweler who thinks his window is interesting or calculated to serve as a lesson to his brother jewelers, to send to us a photograph of such window for illustration under this department.

THE original design for a jeweler's Easter window display, here presented, comprehends egg shells as ring boxes,

ORIGINAL IDEA FOR A JEWELER'S EASTER WINDOW DISPLAY.

display. Cleanliness is absolutely necessary—a bit of tarnished silver makes a deep and unfavorable impression.

In other words, make your goods, your store and your window talk, advertise and sell for you. "Goods well shown are half sold."

Be not content to handle the same stock year in and year out just because it has sold; add a change of designs and increase stock by degrees. Additional trade was never made with changeless surroundings of goods. The cry just now is for something new, different and tasty. Do not wait for your friend to display first. Remember the public would then

JEWELERS' IDEAS AND SCHEMES.

Krieg Bros., Toledo, O., make the following special announcement in an advertisement: "We herewith make it known that every customer who will buy not less than 25 cents' worth at our stores will receive a chance free for each 25 cents' worth on this beautiful hand carved cuckoo clock, which we imported from Tiber, Blackforest, Germany. The cuckoo comes out every half hour."

Abraham Blumenthal, of Corning, N. Y., will open a wholesale and retail store at Buffalo, N. Y.

lilies in jardinières and an Easter hare as the main features. Watches and chains form a handsome design around the eggs. Fobs, lozenges, eye glass cases, hat pins, brooches, etc., fill the remaining space.

A Conneaut, O., jeweler, L. V. Stone, has adopted what seems to be an excellent means of keeping himself and his business in the eye and mind of the people. He has placed small clocks over the doors of all the street cars of his town, with the accompanying sign: "L. V. Stone's Time."

WORKSHOP NOTES.

“B. A.” Gold Shell Collar Buttons are guaranteed as follows: “We will replace every ‘B. A.’ button which for any reason proves unsatisfactory.” This guarantee is on the back of each card and our trade-mark embossed on the front.

B. A. BALLOU & CO.,

Providence, R. I.

To Straighten Bent Teeth.—Bent teeth are straightened by means of the screw-driver used as a lever against the root of the adjacent teeth, and bent pivots may be held in the jaws of the pliers and the pinion bent with the fingers in the direction and to the extent required. For such a purpose, pliers having the jaws lined with brass are used so that the pivot is not bruised, and the bending has to be done with great care.

Oxidized Silver.—A mixture of graphite 6 parts and powdered bloodstone 1 part is moistened with oil or turpentine, and the article rubbed with it; then allow to dry and brush off with a soft brush drawn over wax. Or else brush with a soft brush charged with a solution of platinum chloride in alcohol or water, in the proportion of 1 to 20. The vulcanization is carried out by the following means: Immersion in a solution of potassium sulphide (heated to about 80° C.) 5 grammes, ammonium carbonate 10 grammes, water 1 liter, or calcium sulphide 1 to 2 grammes, sal-ammoniac 4 grammes, water 1 liter. In the following solution silver ware acquires a handsome brown tone: Blue vitriol, 20 grammes, saltpetre 10 grammes, sal-ammoniac 20 grammes. By means of bromine, silver and its alloys are colored black. On engraved surfaces a niello-like effect may be created thereby. The articles may also be covered with ammonium sulphide in a porcelain vessel and gradually heated. As soon as they acquire a blue-black coloring, they are taken out, put in soap water and rubbed with a soft brush as long as they are in the soap lye.

Oxidizing Steel Watch Cases.—After the case has been neatly polished off with fine, used emery cloth and cleaned of all traces of fat, it is stuck with the bow knob on an iron wire about 25 cm. long, which has been filed into a conical point. This wire serves as a handle during the manipulations, which can now be conducted without having to touch the case itself. Now heat the case lightly over an alcohol flame, coat it with ordinary white wax and let cool. Next, wipe the wax off again neatly inside and outside with a soft cloth, using a little piece of wood where the cloth has no access. It is essential that no wax remains adhering to the case, for in the subsequent heating any wax would render the case, or rather the oxidation, greasy. Now take a small handful of cotton wool or wadding, lay it in a little tin box, pour ordinary oil of turpentine or benzine over it and light it. This work has to be carried out in a place free from draught, on account of the danger of explosion. While the cotton is burning hold the case for a minute in the flame, so that it becomes evenly and thickly covered with soot. After the cooling wipe the case off again with a soft rag. This process is repeated until the desired shade has been attained. Naturally, the polishing off with emery becomes unnecessary in repeating the operation. For a first trial take a small lady's watch, so as to obtain the necessary practice for larger surfaces.

THE LINE OF VISION.

ONE of the interesting questions that come up periodically for discussion—interesting because of its absurdity chiefly—is as to the line of projection of objects seen. Learned writers have proven that this line extends from any given point in the image on the retina through the nodal point of the eye and thence to the corresponding point in the object in one straight line. Other learned writers have proven that the line from any point of the image is perpendicular to the retina, and, therefore, that it passes through the center of retinal curvature. Dr. Savage, of Louisville, Ky., is the chief advocate of the latter theory. But in the January *Keystone*, the learned reviewer on that paper takes up the mathematical data used by Dr. Savage and proves that it serves to prove that the lines go through the nodal point quite as conclusively as it proves the lines to be perpendicular to the retina. The chief difficulty with these various proofs is that they prove too much. The discussion reminds us of the little algebraic problem most students have encountered, as follows:

Starting out with the hypothesis:

(1) $x = a$,
we first multiply both members by x , which gives:

(2) $x^2 = ax$.

Subtracting a^2 from both members of the equation, we next have:

(3) $x^2 - a^2 = ax - a^2$.

Dividing both members of the last equation by $x - a$ we obtain:

(4) $x + a = a$.

From which we may, by substitution, deduce:

(5) $x = 0$.

(6) $x + x = x$, or $x = 2x$.

(7) $a + a = a$, or $a = 2a$, etc.

But since $a = 2a$, $a = 3a$, or $4a$, etc. This little algebraic puzzle used to engage all the mathematicians in the public schools of Wisconsin every Winter, some years ago. It resembles another of a grammatical character, by which every cat can be proved to have 10 tails. The argument runs as follows: No cat has nine tails, and since one cat has one more tail than no cat, one cat has nine tails plus one tail, or 10 tails in all; all of which is very amusing but not very instructive. The explanation of the algebraic puzzle is found in the operation in which both members of equation (3) are divided by $x - a$, for, since each member is equal to zero, and the division ($x - a$) is also zero, therefore, in each division we have $0 \div 0 =$ indetermination. If any quantity, as a , is multiplied by zero ($a \times 0$), the product is zero; and since

the product of two quantities divided by one of them equals the other, $0 \div 0 = a$, or any quantity.

In the question of the visual line, or line of projection of the retinal image, we have something of the same elusive character. In the physical factors of vision there are certain static and certain dynamic elements. These may be classified and enumerated as follows:

Static Factors:

1. The material object, which must be such as to react upon light.

2. A source of illumination either in the object itself when luminous, or in adjacent media.

3. Transparent media between source of light and object, object and observing eye—that is, along the path traversed by the light.

4. A dioptric or natural eye that will focus light from the object upon the retina.

5. A normal retina, optic nerve and sensory area of brain.

Dynamic Factors:

1. Light generated at object or at source in surrounding media.

2. Its transmission from luminous source to object and thence to eye.

3. Dioptric modification by dioptric surfaces of eye.

4. A real retinal image as result of dioptric action as above.

5. Sensatory impression of retina.

6. Conveyance of such impression to the brain.

All the above factors of vision are physical, since they are effects of physical force operating upon or along material lines of connection or communication. The brain itself is a physical organ and, therefore, capable only of receiving physical impressions. As far as these factors are concerned they possess all the general properties of physical things. The material elements occupy space and have position in space—volume—and, therefore, dimensions. The force elements have direction of action. But none of them alone, nor all taken together, are vision, nor do they account for vision, vision being a psychic and not a physical phenomenon. So far as physical factors are concerned we are utterly at a loss to account for vision and can only say that it is and let it be so. Without, however, going into the psychic analysis, we will say that the retinal image comes nearest of anything to representing this inner power. We will say also, however, that vision, being superphysical, has no physical properties such as volume, position, direction or other physical quality. Taking the image, then, to represent vision, we note that:

1. While the object, or light from it, ac-

counts physically for the retinal image and may be said to produce the image, from a psychic standpoint, it is the image that produces the object. Notice:

2. By changing the position of the image upon the retina the object appears to change position, if the eyes are stationary. Displace the image and you appear to displace the object.

3. By giving the form of the retinal image a changed shape, as with the Maddox rod, and the object becomes of changed form. That is, distort the image and you distort the object.

4. By discoloring the image upon the retina, as giving it a red or green color, although the object is white, the object appears to be of that color. The object gets its color, or apparent color, from the image, not the image its color from the object.

5. By duplicating, tripling, quadrupling or otherwise increasing the number of images on the retina, although there is but one object, you produce as many objects visible as there are retinal images.

6. Whatever the image may be in miniature form, that we call the apparently natural size of the object; but if the image of the distant object is enlarged the object appears larger.

7. To all intents and purposes the image is not, from the psychic standpoint, an image of the object, but the object is an object of the image. Visually or psychically considered the object is:

(a) In the direction the image places it.

(b) Of the form and color the image makes it.

(c) Of the size and distance the image determines it to be.

(d) Of the number of the retinal images, whether duplicated or not.

(e) Without an image there is no visible object; with one there is a visible object whether it exists or not.

The visual line extends then, if it extends at all, from the retinal image or point in it to a conception of an idea of something external to the mind but really within it, the externality being but a projection of such idea. The line has no extension in that direction or any other. If it extended from the retinal image it would go backward into the brain, not forward into the world, but there is no such line. You may draw lines from the physical image to the physical object to your heart's content, but any one who attempts to draw a line from the retinal image to the projection of that image, will attempt a feat more difficult than any contemplated in geometry, trigonometry, surveying, navigation or civil engineering, for it must reach from nowhere to nothing.

Optical Department.

[Continued from page 57.]

BINOCULAR SKIASCOPY.

SKIASCOPY is generally considered as a monocular test and is chiefly so used, but recent experiments have indicated the value of making it binocular. It has usually been considered important, in making the test, to relax the accommodation of both eyes while making a test of one of them. The reason for this is apparent: the accommodation of one eye may induce accommodation of the other, in spite of the lens imposed over the eye under examination.

But accommodative action in an eye is stimulated by any influence tending to incite the third nerves to action. There are really three such influences in a pair of eyes: (1) hyperopia, which the imposition of a sufficient plus lens neutralizes, provided accommodative tendency in the other eye is taken care of in the same manner and at the same time; (2) stimulus to the sphincter muscles of the iris produced, to a certain extent, when the eye accommodates, but chiefly when there is an excess of strong light entering the eye; (3) convergence of the eyes for the distant object, made necessary by the muscular imbalance known as exophoria.

The plus spheres that make the eyes 1 D. myopic, as in the skiascopic test with a plane mirror at one meter's distance, dispose of any demand for ciliary action on its own account, for the ciliary will relax to its fullest extent under these circumstances. The second factor, the iris, may be considered a negligible quantity, but it is well not to have too strong a light for this work, as this may cause too great irritation and induce slight ciliary action. The third factor, I believe, has not been considered as yet in this connection, although its stimulating effect upon the ciliary is well understood. The only way to reach it and relax the accommodation of the other eye with a plus lens at the same time, is by the use of a prism, base in, over either eye, during the test.

If the eye not under examination is merely covered by an opaque disc its ciliary action, if hyperopic, is uncertain. Fogging it with a plus lens causes quite a difference of behavior on the part of the ciliary of the other eye under examination. Hence it is desirable to have it open, but fogged. With both eyes in visual action, a horizontal imbalance (exophoria) becomes at once a disturbing factor, for the convergence required to overcome the exophoria may induce ciliary action, which would conceal the hyperopia. With a prism base in over either eye such tendency to converge is removed. If the prism used over-corrects the exophoria the sixth nerves only would be affected, and this could not induce ciliary action. It is found that this principle is exemplified in those eyes in which there is real exophoria and in which the relation of convergence to accommodation is decidedly sympathetic.

The use of a prism in this manner over the eye under examination will make no

apparent difference in finding or in the real position of the reflex, for, while the prism diverts the incident light toward the nasal side of the retina, allowing the eye to turn according to its tendency outward, it also diverts the emergent light toward the observer's eye and in a corresponding degree. Eyes will be found in which a myopic correction will be reduced from .50 D. to 1.50 D. by skiascopy under this principle, or a hyperopic correction increased an equal amount or more. This test confirms the generally ac-

Optical Glass Industry in France.

AS generally known, glass is not, speaking properly, a chemical combination; it has rather the characteristics of an alloy, if not of a mixture, in which the differences of composition and of density render it very difficult to obtain a product homogeneous in its parts. When Euber & Dollond achieved achromatism by the association of a lens of flint glass with one of crown glass the question of the homogeneity of flint and crown,

THE OPTICAL DEPARTMENT OF CASTELBERG'S NATIONAL JEWELRY CO., WASHINGTON, D. C.

cepted doctrine of the relationship of these muscular and nervous functions. We offer it not as anything new in skiascopy, for others may have noted the same principle; but we have not seen it expressed.

A Fine Optical Department.

WE present here a picture of one of the largest and most elegantly equipped optical departments in the south—that of the Castelberg's National Jewelry Co., 935 Pennsylvania Ave., Washington, D. C. The department is under the management of A. L. Hood, who is an expert optician.

naturally, assumed great importance. It was a Swiss, Pierre-Louis Guinand, born in 1748, who solved the problem. He conceived the idea—simple as the egg of Columbus—to mix the substance in fusion by means of a cylinder of fire-proof clay, in the form of a hook, first heated to white in a special furnace. This process was a perfect success. Guinand obtained glass without striæ, without grains, perfectly homogeneous. A Munich manufacturer, Utschneider, invited the inventor to become associated with him; and Guinand, established in Bavaria, worked there several years with the celebrated Frauenhofer. On return-

Optical Department.

[Continued from page 58.]

ing to Switzerland, he died there in 1824.

Three years later, in 1827, his son, Henri Guinand, formed a partnership with Bontemps, Director of the Choisi-Le Roi Glass Works, and later published a valuable guide for glass makers, revealing the process of his father and the making of optical glasses. The results were fortunate and a prize, decreed by the Society of Encouragement to the French glass maker who obtained the best flint and the best crown glass, was divided in 1839 between Messrs. Guinand and Bontemps. The Revolution of 1848 followed; the industrial crisis and the later political events compelled Bontemps to settle in England. Guinand died in 1851.

His grandson, Mr. Feil, perfected in great measure the process of his grandfather and of his great-grandfather. He obtained glasses of great purity and of perfect homogeneity and succeeded in making lenses for astronomical objectives having all these qualities and measuring up to 0.97 meter in diameter, the size of the lens of the Lick Observatory.

At leisure moments, Mr. Feil had tried to manufacture rubies artificially. Success in this direction won the attention of Mr. Frémy, who several times during a period of 40 years, conducted through the laboratories of the ingenious glass makers, the pupils to whom he gave chemical lectures at the Polytechnic School.

Mr. Feil introduced some new constituents into the composition of optical glass and obtained for photographic lenses some extra-white flints and crowns, which were much admired at the Vienna Exposition of 1873, and some flints, dense and extra-dense, for prisms and objectives of the microscope. Among these was a flint whose density was about 5.5 and the index of refraction 1.896 (Ray D). This was the most refractive flint obtained up to that time. Feil also began to study the effects of the introduction of baryta, but for unknown reasons did not push his investigations very far.

During this period, the Jena laboratory, under the conduct of Abbe & Schott, modified the composition of optical glass by the introduction of new substances, and secured in them, especially for photographic objectives, great improvements. The situation was critical for the French house. Mr. Feil was dead and his partner, Mr. Mantois, originally intending to become a notary, seemed little prepared by previous training to sustain the struggle. Nevertheless, he resolutely commenced it and, assisted by an eminent chemist, Dr. Vermeuil, sought and found in the studies of his predecessor and in his personal researches, the means for maintaining his industry in the rank it had so far held without dispute. His success was complete. As convincing proof, the fact may be cited that the majority of astro-photographic objectives, employed in making celestial charts, and some of the greatest telescope objectives in the world have come from his establishment.

Especially to be noted is the astronomical objective of the Yerkes Observatory of 1.05 m. in diameter, and the astro-photographic objective of the great siderostat, exhibited in Paris in 1900, of 1.25 m. in diameter. In the beginning of 1900 Mantois died, leaving his brother-in-law, Mr. Parra, an ex-student of the Polytechnic School, of Paris, as his successor.

Optical Briefs and Notes.

The W. J. Lasher Co., Rome, N. Y., have discontinued the optical branch of their business.

A. I. Agnew, of the Columbian Optical Co., Omaha, Neb., visited the South-bridge optical factories recently.

F. S. McCambridge will be at North Attleboro, Mass., every Thursday and Sunday, at J. P. Ballou's jewelry store.

The Lawton Optical Co., Wilmington, Del., will open a branch at Atlantic City, N. J., and expect to employ eight men. H. A. Lawton will be manager.

The Standard Optical Co., San Francisco, Cal., find business not so brisk as at this time last year. By energy and perseverance they have so far overcome the adverse conditions that it has become

necessary to put on a number of additional workmen. At the salesroom of the Standard Optical Co., a CIRCULAR-WEEKLY correspondent met W. E. Dodd, who was reported drowned in the Rio de Janeiro disaster.

A. C. Kintner, optician with Walter Powell, jeweler, at Cumberland, Md., has invented a valuable device for retinoscopes or ophthalmoscopes. This device is designed to cut off rays of light falling on the "peephole" of a retinoscope mirror used in the examination of eyes, and is an invention which will be of advantage to all opticians. Mr. Kintner has sold the right of manufacture and use of the shade to one of the largest optical firms in the United States.

W. W. Essick, proprietor of the Pennsylvania Optical Works, Reading, Pa., has purchased the property at 125 S. 5th St. A new factory will occupy the lot, which is 30x230 feet. It will be three stories in height, front and rear, with a two-story wing connecting the two main buildings. The plans have been prepared and work will be pushed as rapidly as possible. Mr. Essick manufactures optical goods. He has another factory at Montreal. Thirty hands are employed in his present plant

at Reading, but this number will be greatly increased in the new place.

The optical business is good in Omaha, Neb., this season.

A. W. Wagner, of Wagner Bros., New York, was in Omaha, Neb., last week.

J. C. Adams has opened optical parlors in the Shukert building, Kansas City, Mo.

John Wimmer, Indianapolis, Ind., is re-decorating the interior of his optical room on N. Penn St.

G. Goodman, Hallock, Minn., has returned from St. Paul, Minn., where he took an optical course.

Mr. Agnew, manager of the Columbian Optical Co., Omaha, Neb., has returned from his trip east.

The Imperial Optical Co., San Francisco, Cal., anticipate remodeling their store at 411 Kearny St.

John Emden, optician, Utica, N. Y., who for 24 years has been located at 58 Franklin Sq., will move May 1.

J. C. Graves, Humphrey, Neb., was in Omaha, Neb., last week purchasing goods, as was also Joe Van Dusen, Logan, Ia.

Optician and Jeweler Frank, Bridgeport, Conn., will remove his store from 176 State St. to corner Broad and State Sts.

W. J. Davis, optician, Woonsocket, R. I., has been at the home of his mother, in Vermont, for two weeks, on account of her illness.

R. D. Hubbard, manager of the Columbian Optical Co., Des Moines, Ia., stopped in Kansas City, Mo., last week while en route to Olathe, Kan.

Mattie Barber has completed her optical course in the Omaha, Neb., horological

school and gone to Arlington, Neb., to practice in Sterling's store.

Charles D. Baum, for six years with H. C. Thomas, Washington, Ind., will take a two years' optical course in Chicago.

The Jones Bros. Dry Goods Co., Kansas City, Mo., have added an optical department to their store, which will be under the management of F. M. Moore.

A. B. Elliott, Los Angeles, Cal., has been among the trade of San Francisco, Cal., introducing his new axonometer or axis finder, an optical protractor for refracting or manufacturing opticians.

Leo Lando, optician, Dennison hotel building, Indianapolis, Ind., is hunting a new location. The hotel has recently changed hands and the room occupied by Mr. Lando will be turned into a grill room.

E. Kirstein's Sons Co., 200 Court St., Rochester, N. Y., makers of the "Shur-on" eye glass, claim for it many advantages over other eye glasses, the chief being indicated by its name. Opticians will find it advantageous to write to the makers for a descriptive circular of these eye glasses.

New Jersey police are on the lookout for supposed spectacle swindlers. One man sold to a Vineland, N. J., woman a pair of "gold rimmed" spectacles for \$25. A few hours later another man called, told her the first spectacles were brass rimmed and talked her into buying of him another pair for \$15. She really didn't want either pair and feels sure she was hypnotized.

T. J. Trafford Huteson, of Boston, Mass., after visiting his brother, J. C. Huteson, Omaha, Neb., for a few days, returned home last Friday. He and his bride returned from abroad just before the holidays. Among the curios they brought to Omaha and left with J. C. Huteson were a box of lava dust from Mt. Vesuvius and an ancient coin embedded in lava which was dug up from the same place.

One of the grinding wheel belts in the optical shop of Michael Woolf, 77 Nassau St., New York, slipped Saturday and became entangled in the shafting and thrashed about until the shop was badly wrecked. A workman was thrown across the room and E. Le Roy Ryer, an optician, was forced to dodge a shower of shattered lenses, wrenches and shop furniture. No one was injured, and the damage done was slight.

The Julius King Optical Co., New York, will, May 1, remove from their New York salesrooms, 2 Maiden Lane, to larger and better quarters, at 4 Maiden Lane. In their new home the firm will occupy the

store, basement, cellar and part of the second floor of the building. The store they will occupy was the one used by J. T. Scott & Co., in the front part of which the Julius King Optical Co. had their quarters some years ago.

Edwin P. Wells, president of the Globe Optical Co., Boston, Mass., returned last week from a four weeks' trip to Porto Rico. Mr. Wells took many photographs and was much pleased with his observations. To one who is patient and willing to grow up with the country, Mr. Wells thought, it was a good place for him to locate. There is not an optician on the island, according to Mr. Wells, although glasses may be bought at the same store where you can buy cotton, cloth, hardware and sugar.

The eye specialists of Minneapolis, St. Paul and the larger cities of the north-west have formed the Northwestern Ophthalmological Society. The society will meet monthly, alternating between Minneapolis and St. Paul. A majority of the eye specialists of the two cities have already affiliated with the organization. The officers elected are: President, Dr. C. D. A. Wright, Minneapolis; vice-president, Dr. J. S. Johnston, St. Paul; secretary, Dr. John McLain, St. Paul; treasurer, Dr. B. F. Graham, Minneapolis. The object is to promote greater fraternity in the profession.

There is little doubt in the minds of politicians and legislators that the Bell bill, amending the medical practice act, which at first was vigorously opposed by opticians, will not be passed at Albany this session. As the bill stands it exempts opticians from its provisions and there are many members of the trade who would like to see it become a law, believing that it will save them trouble in the future. Still, its defeat will not cause many in the trade to mourn. The bill, it is generally believed, will be defeated by the effective work of the Christian Scientists in making a personal appeal to the representatives in every Assembly District, and their political strength has been shown to be such as to make many Assemblymen hesitate to vote for the measure. The physicians, on the other hand, through their committee, claim the bill is not dead and will not die, as it will be introduced every session until it is passed. They demand that the Assembly take a vote upon it, but it is generally expected that the measure will be shelved without any decided action one way or the other.

CHICAGO COLLEGE OF OPTICS.

QUERIES BY OUR READERS.

Note.—Questions under this department will be answered promptly as possible. Some queries require careful investigation before a satisfactory answer can be given; hence such answers are often seemingly delayed. THE CIRCULAR-WEEKLY desires every jeweler to take advantage of this department.

DES MOINES, Ia., March 12, 1901.

Editor of THE JEWELERS' CIRCULAR-WEEKLY:

Will you kindly give me the law on mutilation of United States coin, so that we can use them for bangles or pins, and is it contrary to law to drill or deface foreign currency? You gave it in an article in your paper a short time ago, but we cannot find it, as I think the paper has been mislaid. We have tried to find out here from the Government officers, but they are no better off than we are.

Yours truly,
E. E. ROBINSON,
With T. L. Rogg.

ANSWER:—We print below the law regarding the mutilation of coin:

AN ACT to amend section fifty-four hundred and fifty-nine of the Revised Statutes, prescribing the punishment for mutilating United States coins and for uttering or passing or attempting to utter or pass such mutilated coins.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section fifty-four hundred and fifty-nine of the Revised Statutes of the United States be amended so as to read as follows:

"SEC. 5459. Every person who fraudulently, by any art, way, or means, defaces, mutilates, impairs, diminishes, falsifies, scales or lightens, or causes or procures to be fraudulently defaced, mutilated, impaired, diminished, falsified, scaled or lightened, or willingly aids or assists in fraudulently defacing, mutilating, impairing, diminishing, falsifying, scaling or lightening the gold or silver coins which have been, or which may hereafter be, coined at the mints of the United States, or any foreign gold or silver coins which are by law made current or are in actual use or circulation as money within the United States, or who passes, utters, publishes or sells, or attempts to pass, utter, publish or sell, or bring into the United States from any foreign place, knowing the same to be defaced, mutilated, impaired, diminished, falsified, scaled, or lightened, with intent to defraud any person whatsoever, or has in his possession any such defaced, mutilated, impaired, diminished, falsified, scaled, or lightened coin, knowing the same to be defaced, mutilated, impaired, diminished, falsified, scaled, or lightened, with intent to defraud any person whatsoever, shall be imprisoned not more than five years and fined not more than two thousand dollars."

Approved March 3, 1897.

It is our opinion that it is not contrary to the law to drill or deface foreign currency for jewelry purposes or to use United States coins for bangles and pins, but the Secret Service officials advise any jeweler who intends to use coins in this manner to submit samples to the Treasury Department.

MONTGOMERY, Ala., March 1, 1901.

Editor of THE JEWELERS' CIRCULAR-WEEKLY:

Will you kindly let me know the origin of the three balls in front of pawnbrokers' establishments? Your information will be greatly appreciated by,

Yours respectfully,
L. KLEIN,
Manager Montgomery Loan Co.

ANSWER:—This question was answered in this journal, May 18, 1898. However, we give the answer again in detail: "Pawnbroking," according to Chambers' Encyclopedia, "appears to have been carried on in England by certain Italian merchants or bankers as early at least as the reign of Richard I. By the 12th of Edward a message was confirmed to these traders where Lombard St. now exists, the name being derived from the Longobards, who used to congregate there for business purposes. Subsequently these merchant adventurers became known generally by the name of Lombardens. . . . Among the richest of them were the celebrated

family of the Medici, from whose armorial bearings it is conjectured that the pawnbroking insignia of the three balls have been derived." From Century Dictionary we quote the following: "Pawnbroker's balls, the three gold colored balls which usually form the sign of a pawnshop. The characteristic feature of the coat-of-arms of the Medici family in Lombardy was a group of balls or disks, variously characterized in different accounts (perhaps representing different branches of the family) as six red balls, three gold balls or three blue balls and three coins, and variously explained as representing pills, by way of play upon the family name, or as representing the money of bankers, the coins being indicted by spheres, so as to present a circle in whichever direction looked at. It seems to have been from this armorial bearing that three golden balls hung in a cluster and three blue balls painted on a white ground were early adopted as the sign of money lenders, corresponding to the existing emblem of pawnbrokers."

ALLENTOWN, Pa., Feb. 11, 1901.

Editor of THE JEWELERS' CIRCULAR-WEEKLY:

Will you kindly inform us where we can obtain a book containing crests and coat-of-arms of families of different nationalities?

Respectfully yours,
E. J. FAUST.

ANSWER:—There are a number of books on this subject, among them being Fairbairn's "Crests," published in Edinburgh; "Heraldry and General Armory," by John and J. B. Burke, published in London; "Heraldry; Historical and Popular," by Charles Boutell, London, price of which is \$5. The two books, however, which are considered the standard authority on these subjects are Fairbairn's "Crests," all the crests being illustrated and the work costing \$25; and Burke's "Heraldry," etc., published by Colburn, London, in 1842, a subsequent edition being published by Armstrong, London, about 40 years later, but both being now out of print. A second-hand copy of Burke's could probably be bought by sending to England. Such a book would cost about \$25.

NASHVILLE, Tenn., March 11, 1901.

Editor of THE JEWELERS' CIRCULAR-WEEKLY:

In an old number of THE CIRCULAR I see reference to a book by William Jones named "History and Mystery of Precious Stones." Please let me know the cost of this book and where I can procure it.

Respectfully,
H. M. BRENECKE.

ANSWER:—After a thorough investigation we cannot find, in any of the importing houses in New York, a copy of Mr. Jones's work of the above title. Chatto & Windus, London, are this author's publishers. If correspondent will write them, they will probably give more definite information.

ALLENTOWN, Pa., Jan. 28, 1901.

Editor of THE JEWELERS' CIRCULAR-WEEKLY:

Will you be kind enough to tell me what the license is to carry on an auction in New York, or the law governing the same; and give me all the information you can on the subject?

A. Z.

ANSWER:— If correspondent wishes simply to conduct an auction sale in New York with a regular licensed auctioneer, no license is necessary; but if he wishes to be an auctioneer, a license must first be obtained from the City Clerk's office at

City Hall. There is no fee for this license, but there is an expense of 53 cents for revenue stamps, etc. It is also necessary to furnish bonds. There must be two personal bonds of \$2,000 each, or one surety company bond of \$2,000. The bonds should first be secured and then filed at the City Clerk's office, where the license will be issued as soon as the sureties have been examined and approved.

Red Stuff for Polishing Metals.—To a solution of green vitriol add, dissolved, some sorrel salt. The resulting precipitate of pale yellow ferric oxalate is filtered off and dried. Next, subject the ferric oxalate to a moderate heat in an iron dish, whereby the oxalic acid is expelled with decomposition, and very pure iron oxide of the greatest fineness remains.

Trade-Mark Information.

Note.—The publication of our work, "Trade-Marks of the Jewelry and Kindred Trades," containing over 2,250 marks, all told, the accumulation of various works of reference and the ramifications of our business enable us to trace to their origin nearly all marks that may be found on jewelry, silver ware, art pottery and kindred lines, of both American and foreign make. All questions in regard to trade-marks will be cheerfully answered. We would be pleased to have the trade seek the benefit of our facilities regarding the identity of any marks they cannot trace. We would prefer to receive the article for examination; for if the mark is of foreign origin, the slightest difference between a drawing and the original is of great importance.

No question is too trivial nor too complicated for consideration under this department.
All queries received are also answered promptly by mail.

SALEM, Mass., March 11, 1901.

Editor of THE JEWELERS' CIRCULAR-WEEKLY:

We have some old silver double dishes which bear the enclosed stamp. Could you tell us the name of the maker, or more particularly the

period in which they were made? By so doing you would greatly oblige.

Yours truly,

DANIEL LOW & Co.

ANSWER:—The silver ware referred to was made in London in 1825. The name of the maker we are unable to furnish.

ST. AUGUSTINE, Fla., March 13, 1901.

Editor of THE JEWELERS' CIRCULAR-WEEKLY:

Please kindly give us the full name and address of

H. A. & CO.,

jewelry manufacturers, Providence, R. I.

Yours very respectfully,

GULESERIAN & ALTOONJIAN.

ANSWER:—We do not know of any manufacturing jewelry firm in Providence bearing the initials H. A. & Co. There is, however, in Attleboro, Mass. (but a few miles from Providence), a concern named Horton, Angell Co., who, we think, are the parties correspondents refer to.

SPRINGFIELD, Mass., Feb. 15, 1901.

Editor of THE JEWELERS' CIRCULAR-WEEKLY:

Will you kindly inform us who makes rings with the letter A for a trade-mark? If you can, we shall appreciate it very much.

Yours respectfully,

TRUE BROS.

ANSWER:—Allsopp Bros., 60 McWhorter St., Newark, N. J., stamp their rings with

A ★

the letter A combined with a star. The star may be indistinct in the rings correspondents refer to.

YORK, Pa., March 5, 1901.

Editor of THE JEWELERS' CIRCULAR-WEEKLY:

Kindly let me know name of maker of a talcum jar. The trade-mark is three letters "S" pierced

by an arrow. By answering at once you will greatly oblige me.

Yours truly,

R. F. POLACK.

ANSWER:—This is the mark of the Stone Sterling Silver Co., 138-140 W. 14th St., New York. See page 48 of "Trade-Marks

of the Jewelry and Kindred Trades," published by The Jewelers' Circular Pub. Co.

HARRODSBURG, Ky., March 13, 1901.

Editor of THE JEWELERS' CIRCULAR-WEEKLY:

Kindly inform me whose trade-mark the following drawing is [same as in the just preceding letter].

Respectfully yours,

A. G. WISEMAN.

ANSWER:—This is the mark of the Stone Sterling Silver Co., 138-140 W. 14th St., New York. See page 48 of "Trade-Marks of the Jewelry and Kindred Trades," published by The Jewelers' Circular Pub. Co.

TROY, N. Y., Feb. 20, 1901.

Editor of THE JEWELERS' CIRCULAR-WEEKLY:

Kindly let me know, through THE CIRCULAR-WEEKLY, whose trade-mark is a cobweb—sometimes with W in center, sometimes not—on silver plated

ware; I find it in the trade-mark on sterling, but that is not what is wanted; and oblige,

A SUBSCRIBER.

ANSWER:—The trade-mark referred to is now used by E. G. Webster & Son, on plated ware only, and the spider web is never used without the initial W in the center.

Alphabet Engraved on Pin's Head.

C. KIBELE & CO., jewelers, 628 Chestnut St., Philadelphia, Pa., recently gold plated one of the most remarkable pins in the world. Before it was gold plated and a little ring soldered onto it at the side, it was to the naked eye an inoffensive, unattractive little pin, no bigger, no smaller than the many millions like it everywhere. When the pin was handed to F. F. Hendry, the manager of the store, by a stranger with the request that it be gold plated and a little ring attached to it so that it could be suspended to a chain as a charm, Mr. Hendry regarded his customer askance and mentally commented: "Must be crazy." Audibly he said, soothingly: "Some sentiment connected with it, eh?"

"None at all," replied the customer. "But on the head of that pin is written the English alphabet. Focus your magnifying glass on it and you will see."

Mr. Hendry did as he was directed and read every letter of the alphabet engraved on the head of that pin in Old English letters. The letters begin at a point near the edge of the pin's head and are traced in a circle about the head of the pin. In the center of the circle is the year when the work was done, 1900. Under a powerful microscope the letters are shown to be clearly and distinctly engraved. The naked eye can distinguish nothing. Mr. Hendry's customer said he was Fred Swartz Brink, of 3732 N. 16th St. He explained that the pin's head had been engraved by Aug. Starcke, a jewelry engraver of Philadelphia, and that he had bought the pin from Starcke for a small sum.

THE RAMBLER'S NOTES.

WHAT THE RAMBLER SAW AND HEARD AMONG THE DEALERS IN ART POTTERY, CUT GLASS, BRONZES, ETC.

A MOST interesting innovation in glass ware is to be seen at the wholesale warerooms of C. Dorflinger & Sons, 36 Murray St., New York. This is what is called "case" glass ware and consists of a thin layer of colored glass on the outside of one of clear crystal, the pattern being cut through the colored into the white, giving a white effect on a colored ground. A prominent piece in this ware is a punch set, consisting of a new shaped 14 inch bowl, with 12 cups. The bowl has a green casing and is ornamented with a large cut star covering the bottom and smaller stars filling in the remainder of the piece, while the cups are decorated in a similar manner. Some exceedingly rich and beautiful pieces are also shown, whereon the case glass is etched with a flower design and finished with gold ornamentation. This variety is to be seen in two beautiful new vases just introduced; The firm's full line of staple pieces and novelties in cut and rock crystal glass ware is now complete.

CHARACTERISTICS OF "LIMOUSIN" WARE.

"LIMOUSIN" ware is one of the most striking lines in the warerooms of Endemann & Churchill, 50 Park Place, New York. This ware, which is manufactured by R. Delinieres & Co., Limoges, for whom Endemann & Churchill are the American agents, comes only in vases and plaques and has an underglaze decoration, mainly in shaded royal fire blue, embracing animal, flower and bird subjects of a most perfect character. None of the subjects is duplicated, each showing the individuality of the artist and all being of a high artistic standard that would entitle them to be classed with Copenhagen and other leading potteries of that kind. The name given to this ware is the ancient name for Limoges.

A MARKED improvement on all former lines is noticeable in the present display made by Lazarus, Rosenfeld & Lehmann, 56-62 Murray St., New York, in their own

Limoges china, and never before have they offered to the trade such highly artistic or rich products in this ware as is now embraced in this line. In plates the assortment is exceptionally beautiful, running in decoration from the daintiest incrustated gold bands to the richest Vienna and Sèvres styles produced on French china. Another line in this china in which the variety is both large and attractive is that which embraces rococo plaques, over 70 different styles and sizes being shown in decorations running from flower effects and figure panels to reproductions of famous paintings. In the medium and popular priced lines of this china are to be found as fine an assortment of novelties and sets as the firm have ever offered to the trade.

THE RAMBLER.

Gilding and Silvering of Zinc Art Objects.

SUCH articles are frequently coated with precious metals—gold or silver—which is accomplished in various ways, either by applying a mass from which gold or silver will separate on the zinc surface or else by electroplating, or, finally, by laying leaf gold on the articles by the mechanical process.

In order to gild or silver without the use of electricity proceed as follows (for gilding): Dissolve 10 parts of gold in aqua regia, evaporate the solution carefully to dryness, dissolve the gold chloride thus obtained in 20 parts of water and mix with a solution of 60 parts potassium cyanide in 80 parts of water. The filtered solution is mixed with five parts of cream of tartar and enough elutriated chalk so that a pulp fit to be put on with the brush results, which is applied on the articles and washed off again after some time. For the purpose of silvering dissolve 10 parts of silver nitrate (lunar caustic) in 50 parts of water and mix the solution with a solution of 25 parts of potassium cyanide in 50 parts of water. To the filtered solution add 10 parts of cream of tartar and a corresponding quantity of elutriated chalk to obtain a pulp that can be put on with the brush. The gilding or silvering obtained in this manner is pretty, but of slight durability. At the present time this method is only seldom employed, since the electroplating affords a means of producing gilding and silvering in a handsome and comparatively cheap manner, the metallic coating having to be but very thin. Gold and silver for this kind of work are used in the form of potassio cyanide of gold or potassio cyanide of silver solu-

tions, it being a custom to copper the zinc articles previously by the aid of a battery, since the appearance will then be much handsomer than on zinc alone. Gilding or silvering with leaf metal is done by polishing the surface of the zinc bright and coating it with a very tough linseed oil varnish diluted with 10 times the quantity of benzol. The metallic leaf is then laid on and polished with an agate.

Art in Glass Cameo Work.

[Continued from page 1.]

figures grouped around this bath we have the embodiment of Mr. Woodall's conception of the 'female form divine' in various types of beauty. Symmetry of form, gracefulness of pose and loveliness of feature are all here in perfection. The figure in the foreground stands out in bold relief, the outlines of her form suggesting themselves through her semi-transparent draperies, her lower limbs are revealed bare to the knee, as she gathers up her robe in her hand. On the left of the central figure, supporting herself on the arm of a carved settee, is a finely proportioned woman. Having her back to the spectator, a splendid neck and shoulder are thrown into view; one leg is slightly raised as, with her left hand, she removes her sandal. Just beyond the two principal figures a beautiful girl, reclining at full length on the floor, is watching her companion in the water, and supports her head with one hand, while the other hangs carelessly over the edge of the bath. Other figures are grouped around. Various articles of jewelry, dress and furniture, with palms and other varieties of foliage, all judiciously subordinated to the central theme, complete the *vraisemblance* and artistic truth of this most remarkable and beautiful picture in glass.

The plaque, which is not duplicated, was sold to its present possessor for 500 guineas.

Swell English Wedding Presents.

AT a recent fashionable English wedding the present from the new King and Queen was a beautiful brooch in the form of two large diamond wings held together by a large cabochon ruby.

Princess Victoria gave the bride a diamond, pearl and green enamel bow brooch, and from the Duke and Duchess of Cornwall and York there was a charming pendant of green, pink and white enamel, set with diamonds and having a pearl drop.

SPECTACLE AND EYEGLASS FRAME REPAIRING.

(Continued.)

It is hardly necessary to describe the method of soldering different breaks in the spectacle frames, as one generally proceeds in the same manner in repairing all breaks, no matter where they may be. To the beginner we would state that he should not endeavor to do his work too rapidly, because he may then slight it, in which case he could not hope to become an expert at this work. As will be learned from actual experience, the method described for repairing the frames of spectacles is a good one for the average repairer who is not pushed with work. But for the man who does repair work for the trade this method is entirely too slow; therefore, he resorts to a method which will not necessitate the pinning of the work onto a soldering block.

To illustrate the method of doing this work, we will take a pair of 10-karat spectacle frames that have been broken at the small bend in the nose piece. This is a somewhat difficult job to pin upon a soldering block, as the nose piece quite frequently is higher than the frame and consequently a groove must be cut into the block. But by holding the broken parts in the fingers the work is greatly simplified.

After removing the lens from the side nearest the break, the broken ends are filed or scraped nice and clean. Then the borax paste is ground up and the solder is cut into pieces of the desired size. Then the two ends are moistened with the borax paste and a piece of solder applied, either with the moist borax brush or with a pair of tweezers, to the end which will be above when the pieces are being held in position to be soldered together. In our experience we have found this to be the best way, for the solder will flow downward more readily than it will upward. And, again, in some cases solder can be drawn to its proper place if the repairer will so manipulate his flame and have the required place to be soldered and the approach to it heated to the proper degree, which will attract the solder in that direction. This, however, requires considerable skill and experience and is not so easy to master. When the joint is prepared and the solder placed in position on the upper end, place the blowpipe between the teeth and hold the two parts of the broken frame between the forefinger and thumb of each hand so that the edges will meet perfectly. To do this the hands and frame can be steadied considerably if the small fingers of each hand are extended so that they meet. Another way is to allow the small finger of the left hand to touch or rest against any convenient support, as the bench, vise, etc.

ANCIENT GREEK WORKING IN GOLD.

PUBLIC interest in the collection of ancient Miletian Greek gold and silver work presented to the Metropolitan Museum of Art by J. Pierpont Morgan last November has been constantly growing ever since the pieces were put on exhibition in the museum "gold room." Three salient pieces of his collection were illustrated in THE CIRCULAR-WEEKLY, in

which are of silver, have become oxidized by long years of exposure, while the little buds at the flower centers are of gold and are still bright. In a recent article on the Morgan collection, Prof. Clifton Harly Levy gives the following interesting description of this wreath, its meaning and its uses:

"The bridal wreath is perhaps the gem

monial. She was bathed and anointed and clothed in a robe of finest material, showing beneath its flowing lines the grace and beauty of the bride. Last of all the ornaments placed upon her came the bridal wreath, sometimes woven of flowers, but in most cases where the wealth of the families permitted, of delicately wrought precious metals in imitation of the earlier

BRIDAL WREATH—J. PIERPONT MORGAN COLLECTION OF ANCIENT GREEK GOLD WORK.

METROPOLITAN MUSEUM OF ART.

the issues of December 12, January 2, and January 16 last, and a fourth, considered one of the most exquisite examples of art work of all, is depicted on this page. This is a unique bridal wreath (*Corona Nuptialis*), composed of hawthorn leaves and flowers wrought in silver and gold, and is considered one of the finest examples of workmanship in precious metals of its day, *i. e.*, about 350 B.C. The small leaves,

of this collection of ornaments from the goldsmith's point of view, and it is by no means lacking in interest as a reminder of the ceremonial of which it was a part. According to ancient Greek ideas, marriage was a most joyous occasion, to be celebrated with splendid pageants. After the parents had agreed that the alliance was a fitting one the bride was prepared by her maiden friends for the approaching cere-

wreath of leaves and flowers. The one in the Morgan collection is the finest specimen that has ever come to America. The artist has done his work so well that it is possible to see in the combined silver and gold, leaves of oak, myrtle, and hawthorn and flowers of perfect shape. This wreath was worn by a bride who approached the marital altar at least 350 years B.C. It is

ANTIQUÉ SILVER WARES.

UNIQUE EXHIBIT OF SILVER ARTICLES PRODUCED BEFORE 1700.

LONDON, ENG., March 15.—In a small gallery attached to the Burlington Fine Arts Club, in Savile Row, London, a collection of silver is now on view which is, no doubt, the finest hitherto gathered within four walls. It is a semi-private show, admission being granted only to members of the club or their nominees. The examples shown are confined to European workmanship and are drawn from a number of sources. These include the Windsor Castle collection by special permission of our late lamented Sovereign, the Honorable Society of the Inner Temple, the Oxford and Cambridge Colleges, several of the provincial corporations and great London companies and many private collectors—Lord Rothschild, Sir Samuel Montagu, W. E. Stanyforth and others. The important and necessary omission of specimens from the various English and continental museums alone detracts from the completeness of the exhibition as a representative gathering of works from all the chief collections.

The committee have adopted a flexible rule excluding silver manufactured later than 1700, the majority of the exhibits being of 17th century workmanship. Ecclesiastical plate bulks, largely owing to the pious care always exercised by the Church in guarding its treasures and the patriotic zeal of private owners whose plate was melted down in order to provide funds for

war purposes. Space is insufficient for even a cursory review of the entire collection, but a few notes as to particular features may be interesting.

From remote ages, "classical" times, we have five pieces. A remarkable specimen both as to beauty and preservation is a Grecian libation cup, or phiale (the origin of our word phial), ascribed by its owner to the 4th century, B. C. It is six inches in diameter and one and three-quarter inches high (*i. e.*, saucer shape); "parcel gilt, massive and cast." The under side is occupied by a series of 25 narrow lanceolated leaves with sessile base in relief, in silver, a second row of similar leaves but irregularly pointed and partly concealed being gilt—these finely chased. (I give the complete description, as I shall be surprised if the design is not noted for reproduction by present day artists in silver.)

Two interesting specimens of early ecclesiastical plate of English make are the "Censer" and "Incense Boat" found at the bottom of Whittlesea Mere (Cambridgeshire), in 1850. Among well known pieces are the "Nautilus Cup and Cover," from Windsor (illustrated in this journal a year or two ago); the "Pepys Cup" (formerly belonging to the Diarist, now in the collection of a city company); the "Richmond Standing Cup and Cover," from the Armourers' & Braziers' Co., and the "Warwick Cup," like a number of fine wares made in Augsburg. Two massive silver tables (one from Windsor, made for Charles II.) are impressive mainly on account of bulkiness.

The series of cups, perhaps the most important feature if we analyze the wares,

cannot be reviewed in detail. A cup and cover, "a melon shell mounted as a sea-monster," is extraordinary. Another "melon cup and cover" (dated 1563) has a remarkable stem, "spiral striated and with tendrils." A "gourd cup" (1598) is noticeable as being ornamented with "short horizontal slabs," a rough looking style of engraving. Several cups illustrate the method of ornamentation known as "pounced ground," while others show a "granulated" surface. A small globular cup and cover (1567) bearing the inscription "Remember the Poure," and a standing cup engraved,

"A Proctoer for the Poore am I,
Remember them before thou dye,"

show the uses of church plate in early times. Two small cups deserve special note: One of German make (1620), three and one-eighth inches high, is octagonal, engraved with swags (*i. e.*, festoons of flowers) and bees, embossed with imitation of blobs on German drinking cups. The other, a curious gilt cup like a champagne glass, the foot a fluted design on pounced ground, cup punched from outside in lozenges decreasing in size from edge to center, like large "engine-turning," probably imitating old Venetian glass. This is English work (1603), five inches high and weighs five ounces.

The Standing Salts must not be overlooked. These, as is well known to readers of the text books, were placed before the host at a banquet, the "trencher" salts used by the guests being supplied from them. They were covered in order to prevent the surreptitious addition of poison. Several of the extremely rare "Steeple" designs are

on view, including some with both two and three tiers. A description of one is as follows: "Flattened dome surmounted by a plain four sided steeple on four bracketed caryatids (female figures) is raised upon four bracket scrolls secured to a flanged ring; rests on three birds' wings, clasping hemisphere; 1626; 10 inches high; 10 ounces in weight." Spices were sometimes kept in one of the two or three receptacles in these "standing salts." A set of three "steeple" shaped cups and covers made 15 years earlier weigh 80 ounces in all. The "Bell" shaped salts are also rare and interesting; one on ball feet has three tiers and another (dated 1601), gilt with ring at top, has two compartments for salt or spice and is of English make. A set of "trencher" salts, one inch by three inches, octagonal and quite plain, are dated 1681.

"Wine Tasters," dated 1641 (London), one inch high by three inches in diameter, and another, bowl shaped, with spiral gadroon edge (London mark), also represent a bygone practice. Some have handles. "Bleeding dishes" are likewise happily obsolete—these are saucer shape with flat, triangular pierced handles. A similar vessel—not a bleeding dish—has a handle described as "peculiar to bleeding dishes," which represents "Adam and Eve in a bower."

A description of the numerous rose water and other flat dishes and trays would require too much space, though there are many beautiful specimens.

The candlesticks and candelabra must also be passed over; the shapes are mostly square and, on the whole, do not impress one as superior to modern patterns. The series of spoons, although extensive and illustrating various ages—the bowls very similar, the handles differing in detail—appears meager in comparison with the Avery collection illustrated in THE CIRCULAR-WEEKLY. Two or three combined spoons and forks (the prongs of the latter fitting into slots at the back of movable bowls) are exceptional.

A number of the specimens are enriched with jewelry and pearls (baroque and other shapes) and some fine enamel work. Coconuts, maple and hard wood, ivory and other subsidiary materials are utilized with varying results. Technical observers will notice the various gadroon and beaded borders and the prevalence of the still popular style of fluted ornaments.

The exhibition remains open until April 28 and has already been extensively patronized. American visitors should not fail to get an order to view from the committee or members of the club. R. F.

Ancient Greek Gold Work.

[Continued from page 1.]

a striking memorial of a wedding in the upper circles of Grecian society 2,250 years ago. When the maiden had been fittingly adorned and the magnificent wreath, far handsomer and more artistic than the jewels with which a modern American bride of the rich classes is loaded, placed upon her head, she was led to the threshold of her home, over which the bridegroom lifted her and led her to the altar of the goddess of love, Venus."

The Diamond Markets.

ANTWERP, March 22.—The Antwerp diamond market has again a quiet tendency. Offers are made tentatively on polished goods, while the rough m  le is very rare. Large stones, however, are sufficient to meet demands. Some firms have sent their buyers to London to buy principally flat goods.

Mr. Mendes, of New York, arrived here, March 18, and asked for flat bort, but he did not find much. This sort is employed merely for machinery.

A new rise in the rate for the location of mills in our large diamond factories is again being contemplated. This rate, which some years ago was only 6 francs per mill per week, is at present 7.50 francs.

The first materials are daily becoming dearer. The employers will be obliged at length to require an increase in the tariff. The powder from the cutting of the diamonds has attained the high price of 10 francs per karat, and bort is always very high, especially when good sorts are desired.

PARIS, March 22.—The tone of the Paris diamond market is somewhat better and there is now a good demand for fine brilliants. A number of foreign sellers visited this city, among them the Antwerp diamond broker, Louis Peters, who sold a lot of splendid Antwerp roses at a good price. Colored stones and pearls are sold to amateurs at good prices.

The situation of the diamond industry

in the Jura is not promising. The polishing of colored stones is not flourishing and many hands are not employed at present.

AMSTERDAM, March 22.—We have had a number of buyers here, but most of them came not to make purchases but simply to see what was going on.

Mr. Moppes started yesterday for Antwerp and he has in hand wide limits to buy roses in that market.

There are enough polished diamonds in stock, but the rough flat goods are asked for by several firms.

The Amsterdam roses, medium merchandise, are valued now at 155 to 175 francs per karat, while the best sorts are quoted 200 to 225 francs per karat. Very small roses of 150 to 200 to a karat are very scarce. These stones are principally employed by the jewelers in Switzerland and are set in watch cases. The goods which served as bort in former years are often used now and pass as diamond stones.

Rich Mineral Deposits Reported from Karnes County, Texas.

AUSTIN, Tex., March 6.—In Karnes county, Texas, southwest of here, there is a strip of country that is exceedingly rich in petrifications, agates, opals and other semi-precious stones. The section has been but little explored and it offers a rich field for the mineralogist.

B. R. Stocking, Sharon, Ill., has sold out to Albert Sikes.

"1835-R.WALLACE"

Stamped on an article of Silver-plated ware is a guarantee of worth and quality.

Every dealer, when selecting a line of plated ware, always has in mind two leading qualities, and these usually are durability and design, as these are the ones on which most depends his reputation as a dealer in honest ware.

Our goods are made of the highest grade of Nickel Silver, plated with FINE Silver. Our extra, or A 1 grade, is plated 20 per cent. heavier than the regular standard. Triple and sectional plates are also carried in stock.

In designing patterns we endeavor to select only such as are graceful in outline and thoroughly artistic in decoration, and which conform most closely to the taste of a discriminating purchaser, which our long experience enables us to do.

Our line consists of the following patterns: Tipped, Fiddle, Windsor, Shell, Joan, Virginia, Astoria, Stuart and Anjou.

Any dealer who is not already familiar with our line will find it much to his advantage to write for Catalogue and discounts.

Do Not Handle Imitations— ...Sell the Real Thing.

Conduct your business in a progressive but lofty and dignified manner. Stake your reputation on the wares you sell. Sell only such goods as you can bank on.

Over half a century ago, in the old Stone Mill in Waterbury (now entirely surrounded by newer buildings) the **★ ROGERS & BRO. A-1** brand of flatware first made an enviable reputation for its owners—a reputation that has been steadily growing, and jealously guarded all these years—a reputation that is of great profit to thousands of dealers, through whose hands the goods are being marketed.

That imitations have sprung up is only natural. Some are called "Rogers," others copy designs and styles of packing rather than names or trade-marks. Many so-called makers were unborn till years after the business at Waterbury had reached immense proportions. Their productions are simply imitations—nothing more—and where will you find the imitation equal to the real thing?

★ ROGERS & BRO. A-1 (TRADE MARK) WORKS, WATERBURY, CONN.

The Reisner Exceptions Case.

Digest of Auditor's Report, Which Is in Favor
of L. C. Reisner.

LANCASTER, Pa., April 4.—As briefly reported in yesterday's issue of THE CIRCULAR-WEEKLY, the auditor's report on the exceptions to the account of L. C. Reisner, as assignee of Ezra F. Bowman, has been filed.

The report was made by John Denlinger, one of the two auditors appointed by the Court to examine the accounts and the exceptions, the other auditor, W. A. Atlee, having died Feb. 24, 1900. The report recites the fact that Ezra F. Bowman assigned to L. C. Reisner, Jan. 21, 1896; that Mr. Reisner's report was filed April 15, 1898; that the report was presented to the Court and confirmed, *nisi*, May 21, 1898, and that on May 24, 1898, exceptions were filed by the attorneys for two of the creditors. These exceptions charged that the assignee had failed to account for property and money which came to his hands; that the sale of the stock was not fairly conducted; and that at a fair sale it would have realized considerably more than it did. Exception was also taken to many of the expenditures made by the assignee, including his compensation of \$6,000.

The auditor finds that on Feb. 3, 1896, an agreement was made between the assignee and a number of the creditors, whose claims amounted to \$63,725, in which the latter agreed that the bank and the merchandise creditors should be paid first, and that the parties to the agreement should be paid subsequently out of the proceeds of the assigned estate, if any, in a manner provided for in the agreement. A committee of the creditors who signed this agreement were appointed to supervise the management of the business, which was to be continued for their benefit. The auditor finds that this committee of the creditors watched all the transactions of the assignee carefully; received full information from him regarding his acts, and approved of them up to the time of the sale of the stock, July 6, 1897. It had been originally announced that the stock should be sold in bulk, but on the day of the sale the attorney for one of the excepting creditors read a notice before the sale began, protesting against the sale in bulk and insisting that the stock should be sold in parcels. On the advice of his attorney that this was the proper method of sale, the assignee decided to sell this way. The auditor finds that the assignee was a creditor of the assigned estate, and that on the advice of his attorney he openly announced himself as a bidder and bid the highest price for each lot offered, thus securing the stock offered. Concerning this the auditor reports: "The auditor fails to find any evidence, anything to show that the sale was conducted unfairly, or that any information was withheld from any one who desired information relating to the stock or any part thereof. As already stated, the assignee conducted the sale in accordance with the advice of his counsel and the demand, in part, at least, of counsel for the exceptant, Mary Bowman Herr, and we find there is not sufficient evidence to establish the fact

"TRADE-MARKS of the JEWELRY and KINDRED TRADES" will enable you to find the maker of any article bearing a trade-mark. It contains over 2,250 marks. Price, Book and Supplement, \$2.50. THE JEWELERS' CIRCULAR PUBLISHING Co., 11 John Street, New York.

Boston Salesrooms, 125 Summer St.

of either fraud or unfairness on the part of the assignee."

The auditor reports that although the stock brought a much less sum than the amount at which it was appraised, the testimony of a number of persons, all of whom appeared at the sale as buyers, established the fact that the stock was well arranged; that every opportunity was offered to intending bidders to examine the stock; that it was thoroughly catalogued, and that a list of all the articles included in each section sold was read before such section was put up at auction. He sums up by reporting: "Everything seems to have been done to make the sale an open and a fair one."

Concerning the exception to the charge of \$6,000 for compensation, the auditor reviews the work done by the assignee, the fact that he gave his entire attention to the estate, purchasing new goods in order to make it possible to carry on the business, and performed work entirely unusual in cases of assignment, and concludes: "We are obliged to say that this exception has no merit in it and that the credit for the accountant's compensation must be allowed."

One of the charges to which exception was taken was for \$1,800 as premium on the assignee's bond. This had, admittedly, not been paid at the time the account was filed, and the auditor disallows it on the ground that under the law of Pennsylvania no allowance can be made for obligations incurred until they have been actually paid. All other exceptions are overruled.

Regarding the costs of the audit, amounting to \$933.80, the auditor finds that they should be charged against the estate and not against either the assignee or the excepting creditors.

The auditor by whom the report is made was one selected on behalf of the excepting creditors, the assignee consenting to have him act alone after the death of Mr. Atlee, who had been named as auditor at the instance of the assignee.

Exceptions have been filed to the report both by the assignee and the excepting creditors. Argument on the confirmation of the report will probably be heard in June.

Settlement Made in the Marcher-Lyons Suit.

LOS ANGELES, Cal., April 3.—The suit against S. Lyons, New York, by F. A. Marcher, jeweler, this city, to recover \$10,000 on account of an alleged malicious attachment on his stock, last December, has been settled. It appears that in March, 1896, Lyons secured judgment for \$4,835 against Mrs. Marcher for money borrowed some time previously. The judgment was not satisfied and last Winter Lyons set about securing a settlement by levying executions against Marcher's stock, on the ground that he held property belonging to his wife. Marcher brought his suit because he claimed Lyon's attachment came at the holiday season and caused him much loss, and was made maliciously for the purpose of injuring his business.

GUARANTEED FOR TWENTY-FIVE YEARS.

THE NEW STYLES OF

CROWN 14k. FILLED

Cases represent a distinct improvement in shape, ornamentation and general finish over any previously shown. The quality is the same that has, in thousands of instances, withstood over a quarter of a century of wear. The Crown trade-mark means proved merit.

THE NEW STYLES OF

LION 10k. FILLED

Cases will still further prove their claim to be "first in style and worth" in the 10k. grade. The patterns are in great variety and equal those on the highest-priced gold cases. Most jewelers consider these cases the best selling and most profitable to handle of all watch cases.

GUARANTEED FOR TWENTY YEARS.

HOWARD STERLING COMPANY, SILVERSMITHS,

PROVIDENCE, R. I., U. S. A.
NEW YORK, 860 BROADWAY, Samples only.

PROVIDENCE, R. I., March 12, 1901.

I have this day been appointed Receiver of Howard Sterling Company, and by order of court am authorized to continue the business of the company as heretofore.

I shall therefore continue to run such business, and will take and fill orders as promptly as the company has heretofore done. The same salesmen who have heretofore represented the company will call upon you for your orders.

Thanking you in advance for a continuance of past favors, and promising prompt attention to all orders given, I am,

Very truly yours,

BIRNEY C. PARSONS,

As Receiver of Howard Sterling Company.

Death of Benjamin W. Rambo.

FORT WAYNE, Ind., April 2.—Benjamin W. Rambo, who died recently, was one of the most widely known and most respected citizens of Fort Wayne, where he had lived for many years. He was a jeweler and was one of the first watch-makers in this city. He was prominent in this business many years and continued in it in a small way until within a short time of his demise, at his late home. On first coming to Fort Wayne from New Jersey, in 1846, he took a position with a jeweler named Adams. Later he entered business on his own account and continued in it actively until about two years ago, when he withdrew on account of the infirmities of advanced years. He suffered a stroke of paralysis about a year ago, from which time he was in poor health. His death came rather suddenly and somewhat unexpectedly, for he had been up and around the house as usual the day before his death and made no complaint when he retired in the evening.

Mexican Government Give a Pearl Fishing Concession.

CITY OF MEXICO, Mex., March 25.—R. de Luna, of Los Angeles, Cal., has just obtained from the Mexican Government a pearl fishing concession. Under the terms of the concession he is given the exclusive right for a long term of years to engage in the pearl fishing industry on a section of the east coast of the peninsula of Lower California. A French company hold the concession for pearl fishing on the west coast of the peninsula and have reaped, it is reported, a big profit out of the business. Mr. de Luna says that in addition to the pearls found in the shells there is a fortune in the mother-of-pearl with which the shells are lined.

Anchor Silver Plate Co. Alleged to Have Violated Alien Contract Law.

INDIANAPOLIS, Ind., March 27.—District Attorney Wishard has filed a complaint in the United States Court against the Anchor Silver Plate Co., of Muncie, charging the concern with violation of the alien labor law. It is said in the complaint that the company made a contract with Frank Haywood, of Toronto, Can., in which they agreed to pay Haywood \$18 a week. The District Attorney says Haywood's expenses to Muncie were paid in August, 1899. Owing to the violation of the law, Mr. Wishard says, the company are indebted to the Government in the sum of \$1,000, and he asked the Court for judgment for that amount.

Court Orders Sale of Oneida Silverware Mfg. Co.'s Property.

BINGHAMTON, N. Y., April 4.—Attorney Harrison W. Coley has obtained an order at a special term of the Supreme Court, held by Justice George F. Lyon, directing the sale of the tools, fixtures, manufactured and unmanufactured stock of the Oneida Silverware Mfg. Co., Ltd., for whom a temporary receiver was recently appointed. The sale will be made April 13 by the receiver, Charles A. Stringer, of Munnsville.

Ottawa Silver Co.'s Creditors to Get About 11 Cents on the Dollar.

OTTAWA, Ill., April 5.—The final report of receiver W. W. Nash, of the bankrupt and now defunct Ottawa Silver Co., has been filed. According to his statement, he has taken \$1,200 out of the funds with which to reimburse himself for services. This leaves remaining \$4,304 with which to pay claims of creditors amounting to \$39,129.74. This means that the creditors will get but 11 per cent. of their claims. The report says that the factory, while running under the direction of the receiver, manufactured goods, the sales of which amounted to \$16,397.81. This was done at a cost of \$15,651.97, making a net gain of \$745.84. The report states that the buildings and a portion of the machinery reverted to the Ottawa Development Association under the forfeiture clause. The balance of material and machinery was sold to M. S. Benedict for \$3,000. The book accounts were sold to D. J. Toothill for \$5. The total receipts were \$13,700.77 and the total expenditures \$9,396.77. The plant is now being operated by the recently incorporated Benedict-Clarke Silver Co.

A Richmond, Va., Colored Blacksmith-Jeweler Runs Against the Law.

RICHMOND, Va., April 1.—The jewelers and watchmakers of Richmond recently received an addition in the person of C. E. King. King is a Danville negro and was a blacksmith during the earlier period of his career. In Danville he got into trouble with a colored church and one Sunday he undertook to break up service. Rumor has it that there was a lively scrimmage until the intruder was thrown out of a window. After a few days he turned up in Richmond and, thinking the jewelers' craft somewhat akin to that of the blacksmith, he settled down in Richmond as a watchmaker and jeweler.

James Jasper, colored, some four or five weeks ago entrusted a watch to his keeping and since then has been endeavoring to secure its return. The case was investigated fully in court yesterday and the ex-blacksmith will sojourn in the city jail, in default of \$300 security, for six months.

Injunction Against Disposal of Eells & Frame's Goods Dissolved.

TOLEDO, O., April 6.—The business difficulty in regard to the Eells & Frame jewelry store was before Judge Kinkade last Tuesday on a motion by Louis Dryfoose, who holds a bill of sale, to dissolve an injunction restraining him from disposing of the stock. The Court dissolved the injunction which several of the creditors had previously secured.

The plaintiff, Louis J. Hendricks, of the Jewelers' Co., Cincinnati, is to give additional security for costs, also of \$50, by order of the Court.

N. G. Carr, Concord, N. H., advertises his business for sale, on account of ill health.

J. W. Ridenour, Bedford, Pa., lost \$1,500 by a fire on the opposite side of the street, Friday. The heat was so great that show windows were melted, but the building was saved.

The Giant of Collar Buttons

IN QUALITY,
IN SALES.

One Million Five Hundred Thousand Kremenz One-Piece Collar Buttons made and sold within the last year.

WHY?

Because of their HIGHEST QUALITY, BEST CONSTRUCTION, GIVING THE MOST WEAR, AND GREATEST COMFORT and their IRON-CLAD GUARANTEE.

To verify this we invite the trade to read "The Story of a Collar Button, with Illustrations," which may be had FREE for the asking, and to try the experiment suggested on page 5 of that booklet.

Extract from "Printers' Ink," Nov. 23, 1898.
The Little Schoolmaster now suggests, to every pupil in his class, to send a two-cent stamp to Kremenz & Co., 49 Chestnut Street, Newark, N. J., and ask to be favored with a copy of their leaflet, "The Story of a Collar Button." Afterward, if any pupil will send to *Printers' Ink* another leaflet, new or old, that is half as good as this one, or that approaches it in excellence, the deserving student will be rewarded with one of *Printers' Ink's* souvenir spoons as an acknowledgment of his discovery and contribution. "The Story of a Collar Button" is the best piece of advertisement construction that has come to *Printers' Ink's* attention in the year of our Lord 1898.

Should you wish to utilize this booklet to increase your collar button business, we will, on receipt of your order, print your card upon and send you a quantity of them.

Kremenz One-Piece Collar Buttons are stamped as follows, ON BACKS:

Patent sustained by United States Supreme Court.

Quality and Construction have made our reputation.

All Kremenz Collar Buttons are Manufactured by

Government Seized Spanish Money in Jewelers' Window.

JACKSONVILLE, Fla., April 4.—The late war with Spain keeps cropping up in the United States Court every month. Tuesday the spectators in the court room were examining with interest a large number of silver pieces of Spanish money.

The money was found in the possession of the Greenleaf & Crosby Co., to whom it had been loaned for exhibition by Halstead Roberts, who was employed on the famous little filibuster, *Three Friends*, during the war, and who said that the money was taken from the *Marie Teresa* when the crew of the tug went aboard her after she

had been disabled during the battle at Santiago.

The money was being displayed in the Greenleaf & Crosby Co.'s store when it was seized by a United States Marshal, it being thought that the money was the property of the United States Government. Roberts libeled the money and the case has been pending in the United States Court since that time.

Tuesday the case came up and Judge Locke issued a decree that Roberts was entitled to receive one-half of the amount seized by the Government, the Government paying the costs of the suit. The amount awarded to Roberts is \$260 in Spanish money.

To the Trade:

We take pleasure in asking of the trade the careful inspection of our new price-list.

This is now ready for distribution and will be sent to any retail jeweler upon request.

We invite special consideration of our new grades in 16 size Bridge movements, and also of our Bunn grades in 24, 21 and 17 jewels.

Discriminating jewelers who wish to hold and increase their business with railroad customers will find these movements unsurpassed as accurate timers.

Illinois Watch Company,
SPRINGFIELD, ILL.

A Suggestive Department Store Proposition.

A few weeks ago the proprietor of a department store in a prosperous town in Eastern New York made the following proposition to the representative of a jobbing house who was soliciting an order for a line of low-grade filled cases:

"I will give you an order for 200 of these cases if you first secure orders for some of the goods from the two jewelers on this street. You see, it would help me greatly if I could say that —— and —— are selling these same cases. A little inducement in price would do the rest."

The reason for this proposition is very evident. The department store man realized after a brief experience that his bargain counter would not prevail against the two reputable jewelers so long as the public had confidence in their integrity and remained convinced of the superior merit and reliability of their goods. He had tried his utmost for months, we understand, to make the people believe that he was selling as good goods as the jewelers at a much lower price, but without any encouraging success. The visit of the salesman with the bargain cases suggested a way of leveling matters with such formidable competitors, and hence his proposition. "Go across the street," he could then say to his doubting customer, "and find out what Mr. —— will sell you the case for. He has quite a lot of them in stock."

A shrewd scheme, but we are pleased to say that it did not work. The two jewelers in question have for years staked their reputation on the **JAS. BOSS** cases, and with what result? Let the department store man answer. His bargain counter butted in vain against the stone wall of confidence with which public faith in the Boss surrounded them. There's a lesson and a warning for the entire trade in this episode.

The Jewelers' Leaguers to Hold a Fraternal Banquet.

An interesting dinner will be held April 25 by the members of The Jewelers' League for the purpose of developing the fraternal side of the organization. The following is the letter sent out Saturday to the members, explaining the objects of the dinner, together with the names of the committee in charge.

NEW YORK, April 6, 1901.

DEAR SIR—With the object of creating a more social feeling among the members of The Jewelers' League, and the increasing of the membership, you and your friends are invited to attend an informal dinner, at \$1.25 a cover, to be given at Mouquin's, 149 Fulton St. and 20 Ann St., Thursday evening, April 25, at 6 o'clock.

You will oblige us by signifying on the enclosed postal card your intention as to joining us on that evening and to kindly state how many seats you desire to have reserved for you. An answer is requested on or before Tuesday, April 23.

Good speakers will be present.

The following members have kindly consented to act as a committee:

H. A. Bliss, E. M. Wheeler, A. F. Belcher, E. A. Bliss, A. Schwob, E. I. Rogers, A. McLeod, F. H. Dana, Charles Schwartz, J. B. Wood, Henry Hayes, Luther Hyde, A. S. Gardner, G. W. Parks, C. E. Breckenridge, W. H. Tarlton, J. A. Carney, W. C. Kimball, William J. McQuillin, A. Roseman, David N. Smith, Bernard Karsch, Walter L. Cook, H. Untermeyer, B. Drake Smith, W. H. Wilford, J. P. Snow, J. Bulova, W. C. Parks, George M. VanDeventer, F. Kroeber, R. F. Forrester, Charles R. Jung, A. L. Brown, Samuel Crook, Ferd. T. Oertel, F. J. Boesse, A. K. Sloan, T. L. Parker, M. Stratton, O. G. Fessenden, David Marx, G. B. Osborn, E. A. Lehmann, C. E. Bulkeley, Frederick J. Knight, Sigmund Stern, W. B. Kerr, Alfred P. Hinton, E. B. Eaton, E. H. Brown, Frank M. Welch, A. Rutherford, Charles Bartens, L. S. Lewis, W. A. Malliet, Samuel H. Levy, Henry Froehlich, H. R. Benedict, R. A. Breidenbach, John R. Greason, S. B. Kent, L. Stevens, Jr., G. H. Hodenpyl, George W. Street, S. Arnstein, M. B. Dunning, James A. Cheney, W. E. Brown, W. H. Jenks, L. J. Mulford, J. W. Cocks.

At the last regular and special meetings of the executive committee of The Jewelers' League the following applicants were admitted to membership: F. B. Ruler, New York, recommended by F. Mauser and L. A. Miller; J. B. Gibson, Lancaster, Pa., recommended by J. C. Perry and W. H. Welchans; W. M. Cole, Jr., Brooklyn, N. Y., recommended by David Marx and L. A. Miller; W. H. B. Dumont, Brooklyn, N. Y., recommended by G. M. VanDeventer and A. McLeod; M. Bernheim, New York, recommended by H. Untermeyer and L. A. Miller; B. S. Samuels, New York, recommended by H. Untermeyer and L. A. Miller. The next meeting will be held May 3, 1901.

Plant of Niagara Silver Co. May Be Enlarged Soon.

NEW BEDFORD, Mass., April 5.—A change has taken place in the affairs of the Niagara Silver Co. which may mean an increase in the New Bedford plant of the company. For something over a year the company have owned the machinery formerly used by the Pairpoint Mfg. Co. in the manufacture of flat ware and have operated it in leased room on the Pairpoint plant. This plant, engaged in making flat ware entirely, now employs about 70 hands and the output of about 30 gross a day amounts to about a fifth of the entire product of the company whose main works are at Niagara Falls, N. Y.

Intuitively

ANY PROGRESSIVE JEWELERS
look to us for suggestions. ❁ ❁ ❁

We always have both suggestions and merchandise to offer. Just now it may be that your customers are not "crying" for either **Watches** or **Jewelry**; but for the approaching weddings they are quite likely to "cry" for some new **Cut Glass**. Our **suggestions** and our **Cut Glass** may be just what you want. To introduce this line we herewith make some propositions for your consideration:

We will ship you **Assortment "C,"** 11 pieces, value \$26.42, for **\$25.00**; or **Assortment "D"** 20 pieces, value \$53.88, for **\$50.00**, on our regular terms, four months net or six off ten days. On this **initial shipment** we will pay the freight charges to you. If the Assortment is not in every way satisfactory you may return it to us, **entire**, at our expense. If any risk in this proposition it is **ours**, not **y urs**.

The DeGraw Silver Bill.

Its Introducer Reticent About Its Purposes and Its Sponsors.

The discovery by THE JEWELERS' CIRCULAR-WEEKLY of the introduction of the DeGraw silver bill in the New York Legislature, which was published in full in the last issue, was generally recognized as one of the most important pieces of news that has come to the silver ware trade for several years. The closer the act was inspected, according to the principal manufacturers who carefully follow silver legislation, the more glaring its intentional or unintentional defects appear to be, and there is no doubt in the minds of the trade at large that this bill is one of the most pernicious strikes against honest legislation, relating to the regulation of the stamping of silver ware, that has ever been attempted in New York State. One point to which attention is called that does not tend to show the honesty of the bill is the fact that in its title, "An Act to Prevent Deception in the Manufacture of Certain Articles of Merchandise by Associations, Corporations and Copartnerships," there is no mention of the word "silver" and nothing to lead anyone interested in silver legislation to believe that this bill affected the trade in any way. The analysis of the bill, published last week, shows that it does not cover any ground not already covered by sections 364 A, B, C, D, etc., of the Penal Code, and does not in any way provide for punishment upon the real

offenders in the selling of spurious silver ware.

Assemblyman DeGraw, who introduced the bill, was found Saturday morning at the office of the Cemetery Association at Pine Lawn, L. I., where he makes his headquarters, and he seemed to be anything but glad to see the representative of THE CIRCULAR-WEEKLY who called upon him. When the reporter's mission was explained and Assemblyman DeGraw was asked how the bill came to be introduced, he immediately began a story of how many white metal articles were marked "Sterling," and how the public were being swindled and how it was necessary to protect the public from these swindlers by legislation, etc., etc. THE CIRCULAR-WEEKLY representative here interrupted him and called Mr. DeGraw's attention to the sections of the Penal Code now enforced, which completely cover all offenses against improper marking of silver ware, whereupon the Assemblyman shut up like a clam and did not pretend to know anything about the sections in question. He would not state who were behind the bill, except to say that it was introduced at the request of very responsible people, and when asked if any jewelers had solicited him to take it up, he said he believed some jewelers were represented by those who did.

THE CIRCULAR-WEEKLY reporter then asked him why the bill did not cover individuals, why it was drawn in such a shape as not to cover the ordinary abuses existing in the trade and also asked him the reasons for the defects outlined in

last week's issue. To these questions Mr. DeGraw did not make any reply, except to say that he had a whole stack of matter up at Albany on the bill which he did not remember "by heart" and that he had not a copy of the bill with him. When told that the bill appeared in the issue of THE CIRCULAR-WEEKLY which was then on his desk, Mr. DeGraw made no further excuses except to say that he was very busy and could not give the subject any time. He was again asked why he introduced the bill and finally said it was done by request, and when told that it must have been drawn by parties either ignorant of the present law or who intended to "work" him for their own ends, the Assemblyman simply remarked that "he wasn't being worked and that was all he knew."

"Has no provision been made for a hearing on the bill?" he was asked, and he answered that none had been asked for. The bill, he said, was ready for final passage and might come up Monday (April 8). The Assemblyman's attention was called to the fact that the present legislation was agreed upon before final passage by all the larger dry goods merchants, silversmiths, manufacturers, and everyone interested collaterally and directly in the subject. Of that he said he knew nothing except the fact that the people who gave him the bill were thoroughly responsible houses, and he believed that he was introducing it for the best interests of the public.

As it is now close to the end of the present session of the Legislature and, therefore, there is a chance of hasty action on this bill without debate or consideration, it should be the duty of all jewelers and others in New York State interested in honest legislation to write at once to their Assemblyman and Senator protesting against the passage of Mr. DeGraw's bill, stating, at the same time, that the existing law is not only perfectly effective but is satisfactory to all classes of honest merchants and manufacturers and also to the public at large.

ALBANY, N. Y., April 8.—The DeGraw bill has been passed by the Assembly.

Louis McDowell, Much Wanted Crook, Escapes on Way to Prison.

ST. LOUIS, Mo., April 8.—Louis McDowell, who was sentenced to three years in the penitentiary, March 22, after pleading guilty to securing an \$800 diamond sunburst from Merrick, Walsh & Phelps Jewelry Co., this city, by false representations, is again at large. He escaped from a sheriff. McDowell and another prisoner were being taken to the prison at Jefferson City, when they slipped the handcuffs from their wrists and jumped through a window in the car, near Valley Park, Mo.

McDowell is considered a dangerous man to be at large. He is wanted for several crimes of securing goods from jewelers of Philadelphia, Cincinnati and elsewhere. His method was to represent himself as some person known to the jeweler from whom he tried to secure goods. (A picture of McDowell was published in THE CIRCULAR-WEEKLY of March 6.)

Court Decides That Baltimore Sterling Silver Co. Need No Receiver.

BALTIMORE, Md., April 6.—A case which has been dragging its weary way through the courts and legal entanglements for nearly a year was settled, apparently, by a decision of Judge Sharp, in the Circuit Court, Thursday, in which the Court dismissed the suit of Frederick Bucher in which he asked for the appointment of a receiver for the Baltimore Sterling Silver Co., of which he was formerly president.

Mr. Bucher filed a bill of complaint in the Circuit Court, May 4, 1900, and an amended bill Oct. 13, 1900. He claimed that he had been excluded from the management of the company and was not consulted in the conduct of the business. He alleged that Charles C. Stieff, manager of the company, was responsible for this, and that Mr. Stieff be compelled to disclose the condition of the property to the creditors and stockholders and that a receiver be appointed.

Mr. Stieff, in his answer to the bills of complaint, denied the material allegations contained in them, asserting that Mr. Bucher had and could have free access to the books of the company if he chose so to do, and also asserting that the company were solvent.

An expert accountant, Alexander Dodd, was put to work on the books, and it was upon his testimony, principally, that Judge Sharp dismissed the bill. The company, like other concerns, were shown to have lost money in one year, but to have more than made it up in another year, the

profits for the last year being placed at about \$11,000. Judge Sharp decided that the testimony upon the whole showed that the company were solvent, and that cause for a receivership had not been established. John P. Poe and Charles Herzog were counsel for the plaintiff and Roger T. Gill represented the respondent.

Newark.

Hoyt-Obrig-Geiger & Co. have been incorporated with a capital of \$24,000 to manufacture jewelry. Incorporators: Frederick W. Hoyt, Connecticut; John Obrig, Frederick C. Geiger, both of New Jersey; Frederick F. Guild, attorney, Newark.

A strike was declared, Wednesday, in the polishing department of the Crescent Watch Case Co.'s factory, on 13th St., and 50 girls left the factory. The grievance of the strikers, who recently formed a union, is not on account of wages, but because Superintendent Buerke refused to discharge Maggie Stamm, a young girl who was recently employed after having left the factory seven months ago. Mr. Buerke refused, it is said, because the girl is the sole support of an invalid mother, who is the widow of an old employe of the company. No open negotiations are pending to settle the strike, but it is expected that the trouble will soon be adjusted and the strike declared off.

G. W. Gehman, Terre Hill, Pa., has opened a five and 10 cent store as an annex to his jewelry store.

Retailers Endorsing Chicago Jewelers' Movement Against Department Stores.

CHICAGO, Ill., April 6.—A great many answers from the retail trade in cities of over 10,000 population in reply to the circular letters sent out by C. D. Peacock regarding sales by manufacturers and jobbers to department stores have been received, coming from all the territory bounded by Massachusetts, the Gulf and the Pacific coast. The circulars seem to have struck a responsive chord and the suggestions made in it are warmly approved. The replies are from the leading jewelers of the various cities. In some of the answers it has been suggested that the prominent retail jewelers form an organization to remedy this and other evils. In reply to this E. D. Smith, acting for Mr. Peacock during the latter's absence in California, states that probably the best plan would be for the jewelers of the several cities to organize separately for their own protection, and that later a national association be formed. Omaha, it is understood, has declared its intention of forming a local association, including all the retail jewelry trade of that city.

W. J. Westinghouse, Morgan, Minn., has sold out.

J. A. Hill, Holton, Kan., has disposed of his stock of jewelry.

Mr. Richards, jeweler, at Moosic, Pa., lost considerable stock by burglars last week.

PEARLS.

W. A. England's Affairs Approaching a Crisis.

WORCESTER, Mass., April 4.—Two suits have been brought against William A. England, jeweler, 394 Main St., which probably will bring his affairs to a crisis. The creditors are Albert L. Richardson, auctioneer, of Worcester, and Chas. Bailey, of Leominster. Both parties brought suit through Thayer & Rugg to recover claims, Mr. Richardson's claim amounting to \$1,000 and Mr. Bailey's claim to \$1,411. The *ad damnum* in the Richardson case is \$2,000 and in the Bailey case \$4,000. The papers were served by deputy sheriff W. W. Scott and Jas. T. Forrest is keeper.

An inventory has been taken of the stock in the jewelry store of Mr. England. The appraisers are A. C. Bruce, Walter Howe and Edward Moulton. The inventory is a result of a notification to deputy sheriff W. W. Scott by James H. Wall to vacate the premises, which the deputy sheriff held by virtue of attachments placed through the law office of Thayer & Rugg. It is likely the goods will be sold at auction and the proceeds placed at the disposal of the creditors.

Efforts to Parole Edwards & Sloane Jewelry Co.'s Erring Clerk.

KANSAS CITY, Mo., April 2.—Strong efforts are being made to get Judge Wofford to parole William Deardurff, the young man found guilty of stealing \$3,000 worth of diamond rings from the Edwards & Sloane Jewelry Co., and it is thought he may act favorably on the request. Young Deardurff is not quite 21 years of age and up to the time of his one false step bore an excellent reputation. Judge Wofford is always anxious to keep "first offense" boys away from the evil influences of the penitentiary, especially when they have previously shown good records and seem anxious to be given another chance.

His Business Became Unprofitable and Now He Is Missing.

TOLEDO, O., April 3.—Louis Zaeger, a Main St. jeweler, is not to be found. Last Wednesday morning he left his home on East Broadway as usual. During the afternoon he left his place of business and has not been seen since. It is said that his business, in which he has been engaged for a number of years, had become unprofitable during the past several months, and for this reason he had gotten behind on his rent and other expenses. It is reported that this is the reason for his disappearance. Mrs. Zaeger stated that the family relations were pleasant and, while she thought it was bad finances that caused his disappearance, she was at a total loss to know why her husband should hold the family in suspense.

Mr. Alberts Gets Good Imitation Diamond for a Watch.

BOSTON, Mass., April 8.—A clever trick was played successfully, Tuesday evening, on C. Alberts, jeweler, 229 Tremont St., by which he lost a gold watch and chain valued at \$75. Just before 10.30 o'clock, when Mr. Alberts was getting ready to close his store, a well dressed stranger entered and asked to be shown a 14 karat 15 jeweled watch. Mr. Alberts told the man that all of his best goods had been placed in the safe, and the man asked to see some watches which were in the show case. The supposed customer finally selected a timepiece and remarked that he guessed he would buy it as an Easter gift to his wife.

The price at which Mr. Alberts offered the watch was higher than the stranger wanted to pay, and he at last offered to exchange a "diamond" stud he wore for the watch. While Mr. Alberts was subjecting it to a careful scrutiny and test, the stranger bolted for the door and disappeared with the timepiece. Mr. Alberts rushed into the street, but could find no traces of the man.

The thief is described as about 25 years old, of medium height and dark complexion. The police believe him a professional who may have been watching the place for some time. Mr. Alberts has been in the jewelry business for a long time and says he never saw such a good imitation of a real diamond.

Arguments Heard in Case of Neresheimer vs. Smyth on Appeal.

ALBANY, N. Y., April 4.—In the Court of Appeals, yesterday, arguments were heard in the case of E. Aug. Neresheimer, *et al.*, respondents, *vs.* Thomas A. Smyth, *et al.*, appellants, on an appeal from a judgment of the Appellate Division, Fourth Department, which affirmed an interlocutory judgment in plaintiffs' favor. The action was brought to set aside a certain transfer of a stock of jewelry in the city of Rochester. Walter S. Hubbell and John A. Barhite appeared for appellants and James Breck Perkins for respondents. This is a recent development in an old suit that was in the courts some eight years ago.

The Bell and New Columbus Watch Cos. May Consolidate and Move.

CINCINNATI, O., April 6.—There are reports of a deal on foot by which the Bell Watch Co., Mansfield, O., and the New Columbus Watch Co., Columbus, O., will be consolidated and located at Appleton, Wis., in a new factory to be built for them in that city. The report cannot be verified here, but it is known for a certainty that some arrangement of the sort indicated is in process of development.

Settlement of Watch Case Engravers' Strike to Be Attempted.

CINCINNATI, O., April 8.—President Harbold, of the National Watch Case Engravers' Union, has notified the local union here that he will come on from New York, this week, to try and effect a settlement with the Wadsworth Watch Case Co. and the striking engravers at their Dayton, Ky., factory. The Wadsworth company say there is no change in the aspect of the affair, that the men are still out and will remain so until they can mediate with some degree of reason. The company say they are tired of paying unearned wages and they might as well lose one way as another.

Police Thought He Had Too Many Watches and Arrested Him.

BIDDEFORD, Me., April 2.—The police have arrested a man who seemed to have a lot of watches in his possession which he was trying to raise money on. He claims to be a jewelry drummer from Holyoke, Mass., and when asked why he had so many watches replied that that was part of his business, and added that he had a trunkful of them in Portland, Me. He went into a pawnshop in Biddeford and tried to raise \$20 on one of the watches. The proprietor tried the acid test for gold and found that the case was not gold. He sent for an officer and the man was arrested. He was held to the grand jury.

Gilchrist Bros., Portland, Me., have been closed out under a chattel mortgage. John Guisewite, who recently opened a general store at Coburn, Pa., will carry a line of jewelry and do repairing.

P. O. Fischer, Pawnee, Okla., has become sole owner of the store he has been conducting there and expects to enlarge his stock.

The Silver Service for the "Illinois" Ready for Presentation.

CHICAGO, Ill., April 7.—The silver service which citizens of the State will present to the battleship *Illinois* arrived in Chicago, April 5, and was formally accepted by the committee. William Penn Nixon left for Washington, April 6, to arrange with President McKinley for the ceremony of turning over the service to the officers of the ship. The date of launching the *Illinois*, which is now at the docks at Old Point Comfort, Va., has not been formally announced.

Almost \$6,000 was raised among citizens of Illinois, and for this amount has been bought a service of 10 massive pieces. Most striking among these is the punch bowl, which has a diameter of 20 inches and a depth of 17 1/4 inches, with a capacity of 12 gallons. One side bears the following inscription:

PRESENTED TO THE U. S. BATTLESHIP ILLINOIS BY CITIZENS OF THE STATE IN HONOR OF WHICH THE SHIP WAS NAMED.

On the other side is a plate with the word

ILLINOIS.

Other pieces in the set are a smaller punch bowl, diameter 14 inches and capacity four gallons; two ladles, one large and two small cake dishes, two candelabra and one tray.

Plans for the presentation of a silver service to the battleship were formed more than two years ago, when work on the vessel was begun. G. E. Adams was president of the local association, John R. Walsh was treasurer and Thomas C. MacMillan secretary. The committee on design consisted of H. N. Higginbotham, John R. Tanner, Franklin MacVeagh, John R. Walsh, C. L. Hutchinson, Frank O. Lowden, William Penn Nixon, E. G. Keith and J. W. Bunn. The Whiting Mfg. Co., New York, were the makers of the service.

Court Approves 35 Per Cent. Composition Offer of Abraham Cohen.

ST. PAUL, Minn., April 3.—Judge Lochren, of the United States District Court, yesterday approved the 35 per cent. composition agreed to by the creditors of Abraham Cohen, pawnbroker and jeweler, who took advantage of the bankruptcy law. The total amount paid to creditors is \$9,847 on claims aggregating \$24,000.

Cohen's schedule showed liabilities of \$24,037.41 and assets of \$18,152.47. The examination before referee Michael Doran, Jr., however, showed a wonderful shrinkage in the assets and the protests on the part of creditors were numerous. There was little to show for the large stock of goods purchased within three months of going into bankruptcy and a \$12,000 stock of diamonds had shrunk to \$300. At a second hearing Cohen explained that he had lost \$5,000 in bogus bonds, and a refreshed memory recalled \$5,000 lost at poker, instead of \$2,000 as at first asserted. The creditors finally agreed to accept a composition of 35 per cent.

FANCY STONES.

Under this heading are classified
**RUBIES, EMERALDS, SAPPHIRES, PEARLS, SPINELS,
TURQUOISES AND OPALS.**

IN OUR 1901 CATALOGUE we illustrate all the above fancy stones, in natural colors, showing the different weights and prices of each. We also print with each a series of articles giving useful information. We believe dealers who are not fully posted could increase their sales of these goods by making a study of these articles and by keeping our catalogue handy for reference.

First Meeting of the Creditors of J. T. Scott & Co.

The first meeting in bankruptcy of the creditors of J. T. Scott & Co. was held Monday morning at 11 o'clock A.M., at the office of referee in bankruptcy Seaman Miller, 346 Broadway, New York. About 15 attended the session, among whom were the following lawyers: Hastings & Gleason, representing The Jewelers' Association and Board of Trade; William P. Williams, representing The Manufacturing Jewelers' Board of Trade, Providence; Meyers, Goldsmith & Bronner, representing the receiver; Attorney Camp, representing a bank creditor, and Geo. C. Comstock, representing Mrs. Scott and the sisters of the bankrupt.

The first business taken up was the election of a trustee, and for this office Hastings & Gleason, appearing for the creditors in the organization they represented, proposed Charles A. Stewart, and this nomination was seconded by William P. Williams, on behalf of the Providence creditors. Meyers, Goldsmith & Bronner nominated the present receiver, William P. Long. When a vote was taken Mr. Stewart was elected by a large majority, both in amount and number of the claims. Mr. Scott then took the stand for examination and after a few questions the examination was adjourned until Thursday, April 18.

Incorporators of the American Silver Co. and Who They Are.

HARTFORD, Conn., April 5.—A certificate of the organization of the American Silver Co., of Bristol, has been filed in the State Secretary's office. The capital is \$200,000, of which \$40,000 has been paid in cash and \$160,000 in property. The Bristol Brass and Clock Co. take 7,993 shares and seven persons—J. H. Welch, G. S. Brown, H. F. English, P. N. Welch, G. W. Mitchell, C. S. Treadway and J. R. Holley—take one share each.

Henry F. English is a New Haven millionaire, a director and large owner in the New Haven Clock Co.; Pierce N. Welch is also a New Haven millionaire and likewise a director and large owner in the New Haven Clock Co. His father was Mayor of New Haven and for 30 years president of New Haven's First National bank, of which the son is president to-day. Mr. English's father was the late James E. English, president for many years of the New Haven Clock Co. and Governor of Connecticut and a United States Congressman. The others named above are leading Bristol men.

Death of Stephen Marx.

DETROIT, Mich., April 5.—Stephen Marx, president of the Michigan Optical Co., died at his home, yesterday, aged 78 years. His death was due to old age and a recent attack of grip. He was born in Germany, lived during his boyhood in Switzerland and arrived in New York in 1846, where, a year later, he joined a party of emigrants who went to Wisconsin. He, however, stopped at Detroit. He was prominent in German singing societies and was somewhat of a poet. He wrote an autobiography for private use.

Assignment of the Harvard Button Co.

PROVIDENCE, R. I., April 9.—The Harvard Button Co. have made an assignment to J. C. Collins and the papers are now on record. The company's assets are said to be nominally about \$14,000 and their liabilities about \$11,150. They have about 60 creditors, whose claims run from very small amounts to about \$1,000. A committee of these creditors have been appointed to look into the affairs of the concern. The cause of the failure is said to be that the firm used up too much money in getting new machinery and also a creditor pushing his claim. Assignee Collins believes that a settlement can be made with the creditors and that there will be no bankruptcy proceedings brought. A meeting of creditors was held in this city, Friday, and a second meeting was held at Attleboro, to-day. G. M. Baker, W. S. Hough, Jr., H. J. Astle and P. F. Parsons are the creditors committee.

Fred L. Baker Gives a Bond for His Appearance in Court.

DETROIT, Mich., April 3.—Fred L. Baker, a traveler for the Non-Retailing Co., Lancaster, Pa., who, as published last week, was arrested in this city on a *capias* in an action brought by Hayden W. Wheeler & Co., charging him with embezzlement, gave a bail bond of \$1,000 to the Sheriff, March 28, to appear Friday in court, when the case is called. He will then be called upon to give a bond to appear when the case comes to trial, which will probably be in June. Baker is now, on the road again visiting his customers.

A watchmaker and jeweler has located at Cable, Ill., the first representative of the trade in the place.

The International Silver Co. have just issued an attractive catalogue and price list of the "Star" brand silver plated ware made by Rogers & Bro., Waterbury, Conn. The catalogue is in an attractive red, separate cover, on which appears the device "Hitch Your Wagon to a Star," with an appropriate illustration. Jewelers who have not received a copy of this catalogue should not fail to send for it without delay.

The petition in bankruptcy of Frank W. Crain, Marathon, N. Y., shows more assets than liabilities. The total liabilities are \$2,190.57, of which \$800 is secured. The assets are nearly \$4,500. Of this \$2,529.82 is the value of the stock and fixtures; accounts, \$631.72; insurance policy values, \$800, and \$472.64 claimed to be exempt.

A Decision of Much Importance to Shippers of Goods.

A decision of interest to manufacturing and jobbing jewelers, involving, as it does, the liability of an express company for packages sold under certain circumstances, was given last week by Justice Joseph, in the 7th District Municipal Court, New York. The action was brought by Fishel, Nessler & Co., New York, against the Adams Express Co. to recover \$241.26 and arose in the following way:

On Nov. 15, 1899, the plaintiffs shipped by the Adams Express Co. a package of silver ware to a concern in Des Moines, Ia., and when the package arrived at its destination the consignee refused to accept it. The express company notified Fishel, Nessler & Co., but they, not wishing to relieve the consignee of his liability, paid no attention to the notices. After 11 months, on inquiring about the package, Fishel, Nessler & Co. were informed that it had been sold by the express company in July, 1900, for \$19.75. Fishel, Nessler & Co. then commenced this action to recover the full value of the package and the suit was tried before Justice Joseph, Feb. 21. The express company claimed that under the laws of Iowa they could sell unclaimed packages that had been in their possession for more than three months and also set up the claim that under their receipt they were not liable for more than \$50 in any case. The plaintiffs contended that under the laws of New York they should have held the goods a year and that the conditions of the receipt did not apply. Justice Joseph's opinion, which is a lengthy one, gives judgment to Fishel, Nessler & Co. for the full amount and is to the effect that the laws of the place where the contract was made must govern in its construction and not the place where the goods were to be delivered or sold. He also decides that the express company's receipt, limiting their liability to \$50, has no application, as, after the goods had been carried to the consignee, the express company were nothing but custodians or "bailees" for the property, and that in selling it before the expiration of a year they were guilty of conversion. The case is without precedent, so far as the express companies are concerned, and it will be carried by the attorneys for the Adams Express Co., Guthrie, Cravath & Henderson, to the Appellate Division and, in all probability, to the Court of Appeals. Jacob Marks was the attorney for Fishel, Nessler & Co.

Jewelers' Gold Bars Withdrawn and Exchanged.

Week Ended April 6, 1901.

The U. S. Assay Office report:
 Gold bars exchanged for gold coin..... \$199,672 82
 Gold bars paid depositors..... 59,699 04

Total	\$259,371 86
Of this the gold bars exchanged for gold coin are reported by the Sub-Treasury as follows:	
April 1.....	\$526,302
" 2.....	73,394
" 3.....	1,034,396
" 4.....	31,653
" 5.....	5,583
" 6.....	35,969

Total

..... \$1,707,297

About \$1,500,000 of the figures given above was for gold withdrawn for export.

Pendants.

Fancy Pendants for the neck, of Baroque Pearls, Opals, Turquoises and other fancy stones in combination with diamonds are extremely fashionable, and we are prepared to supply the demand.

When you have calls for these goods let us hear from you. We have them from \$25.00 to \$100 00.

HAYDEN W. WHEELER & Co.,

15 MAIDEN LANE, N. Y.

Telephone, 8 Cortlandt.

50 HOLBORN VIADUCT, LONDON.

Attleboro.

Daniel H. Smith, a retired manufacturer, is slowly recovering from a long and critical illness.

The talk of the removal of L. W. Teed & Co. from Attleboro to Kingston, R. I., has not yet developed anything definite.

Frank H. Sadler, of F. H. Sadler & Co., added his name last week to the growing list of Attleboro fast horse owners.

P. John Cummings, of P. J. Cummings & Co., returned last week from several months' rest and health gaining at St. Augustine, Fla.

Thomas J. Halliday, of the Torrey Jewelry Co., sold a big piece of real estate last week to Charles H. Tappan, of the D. F. Briggs Co.

Mr. and Mrs. Norval B. Lamb celebrate their golden wedding, April 17. Their sons are Louis J. Lamb and William H. Lamb, of C. H. Allen & Co.

Edward A. Sweeney, of the W. H. Wilmarth Co., presented a costly cathedral glass window to the local Episcopal church last week as a memorial to his late mother.

Charles E. Grover, of Grover, Son & Co., who has been for many months at the Massachusetts sanitarium for consumptives, is back at work with his old health and strength.

William C. Tappan, of the D. F. Briggs Co., accompanied by Mrs. Tappan, has returned from a long trip in the southern States, Mexico, California and the Pacific slope. It was part business and part pleasure.

The brief announcement in this paper that David E. Makepeace was to erect a new jewelry factory building in Attleboro, was a small hint at a big matter. It has been known for a long time that there was an opening for a new factory building, and Joseph M. Bates was expected to replace the shop burned in 1893 and whose site now stands idle. Mr. Bates, however, being substantially out of business since selling his watch case plant, decided he did not care to do so. The new factory will have two main sections, each 153x40 feet and three stories high. They will run parallel and at a distance of 92 feet from each other. At the western end of each an 81 foot ell will be raised, the ends of the ells coming so near each other as only to leave a drive between, giving entrance to the big central court. The brick power plant, which now stands in the rear of Mr. Makepeace's present shop, close by, will then come in the center of this court. All modern ideas and conveniences will be installed. The intending tenants are not announced, but

Mossberg & Granville Mfg. Co.
150 NASSAU STREET,
NEW YORK.

it is expected that W. H. Bell & Co. will be one, and the fact that Rhodes Bros. & Rothschild, of this town, are looking openly for larger quarters, and rumors that Chapman & Barden, Plainville, Fontneau & Cook, Attleboro Falls, and Richardson & Bodman, Providence, plan to move to Attleboro soon, naturally connect their names with this shop.

Invitations are out for the wedding of Fred H. Hill, of F. H. Hill & Co., to Miss Mabeth W. Wolfenden, April 17.

The Hayden Novelty Co. placed a large new safe in their office last week and added store-room facilities to their plant.

Charles E. Bliss, of Bliss Bros., for 27 years at the head of one of Attleboro's leading manufacturing houses, retired last week from the active conduct of the firm's affairs. His sons, Herbert C. and Ernest M. Bliss, will run the business hereafter, associated as The Bliss Brothers Co., incorporated under Rhode Island law with \$60,000 capital. The firm started in 1873 with Everett B. Bliss, Charles E. Bliss and R. F. L. Everett as partners, and a plant for making ladies' goods in the Steam Power building, on Railroad St. In 1876 they moved into the Robinson building, No. 2, same street, and opened a New York office with Mr. Everett there. In the early '90's Everett withdrew and later E. B. Bliss. Gold plated charms is now the line and the house is a very successful one, located in the Simmons building on N. Main St., and employing over 100 hands.

North Attleboro.

The jewelry factory of Doran, Bagnall & Co. will be closed from May 6 to 20 for repairs and improvements.

There will be a fresh hearing in a few days in the Bristol county courts on the hotly contested will of the late Henry D. Merritt, of H. D. Merritt & Co.

Eight hundred North Attleboroans are to be added to the free postal delivery district of the town, encouraging shop hands to seek the suburbs for homes, a movement now very marked in both Attleboros.

The recent fire at Attleboro Falls, and other causes, are serving to produce great changes in that section of the town, for many years so prominent in the affairs of New England's jewelry production. The principal matter, with the exception of the fire, is the announcement that W. H. Bell & Co., makers of silver and gold plated chains and bracelets, are about to leave. They will go into the new Makepeace factory at Attleboro, now in process of erection. The present indication is that the Daggett building which was burned will not be rebuilt, at least for a long time, thus making a permanent vacancy on Mill St., which was once quite a center. J. F. Sturdy's Sons, E. E. Thomas, Jr., & Co. and W. N. Fisher & Co. have all settled in the Freeman factories at Robinsonville. They have taken the buildings for a year. The new Sturdy factory is rapidly assuming shape for active operations.

The Bowden Resolutions.

A Beautiful Memorial to the Late Joseph B. Bowden to Be Presented to His Widow.

A unique and beautiful copy of the resolutions passed by The Jewelers' McKinley & Roosevelt Club on the death of their late president, Joseph B. Bowden, is to be presented to Mrs. Bowden by that organization, May 1, and is now exhibited in the window of the Gorham Mfg. Co.'s branch store at 21-23 Maiden

white satin. The following is the text of the resolutions, which are beautifully and artistically engrossed:

At a meeting of
 THE EXECUTIVE COMMITTEE
 of the
 JEWELERS' MCKINLEY & ROOSEVELT CLUB
 of the
 CITY OF NEW YORK,
 held
 FEBRUARY 11th, 1901,

the following resolutions were unanimously adopted:
 WHEREAS, The members of the Executive Com-

the president of the Jewelers' Republican Clubs for the years of 1884-1888-1896-1900.

And that he was distinguished by his unremitting attention to and enthusiastic interest in the efforts of what he believed to be his political duties and for the best interest of his country.

As a merchant of life-long existence among the jewelers, extending beyond a quarter of a century, he sustained an irreproachable reputation for integrity, honorable dealing, and his career was crowned with success.

Resolved, That we most respectfully tender to the family of Mr. Bowden this expression of our most profound sympathy.

Signed: C. L. Tiffany, first vice-president; David C. Dodd, Jr., second vice-president; A. F.

THE VOLUME AND CASE CONTAINING THE RESOLUTIONS ON THE DEATH OF JOSEPH B BOWDEN, PASSED BY THE JEWELERS' M'KINLEY & ROOSEVELT CLUB.

Lane, New York. Unlike most engrossed resolutions, the ones here referred to appear in book form and occupy six pages of a volume handsomely bound in limp black seal leather. On the cover appears an enlarged copy of Mr. Bowden's signature cut from solid 14 karat gold. The book comes in a fine case of seal leather similar to the binding and lined with

mittee of the Jewelers' McKinley & Roosevelt Club, expressing the opinion of all the members of the Club, are profoundly impressed by the recent melancholy event of the death of their friend, associate and president, Joseph B. Bowden, and aside from the renewed warning thus given them of the uncertainty of human life, the Executive Committee gratefully record their sincere respect for the excellent character of Mr. Bowden, as well in all private and personal relations as in the public aspect of his life for the many years that he was interested in Presidential elections, having been

Sloan, third vice-president; William F. Ackerman, secretary; Charles F. Wood, treasurer; John L. Shepherd, chairman executive committee.

Executive Committee—Max J. Lissauer, J. W. Alford, M. B. Bryant, William Bardel, Charles F. Brinck, C. E. Bulkley, William H. Brown, C. C. Champnois, William D. Carrow, George E. Fahys, J. G. Fuller, John Frick, Byron W. Greene, Ralph M. Hyde, Henry E. Ide, Samuel H. Levy, Robert Loch, J. A. Lebkuecher, L. Lilienthal, Ludwig Nissen, Archibald Rutherford, F. R. Simmons, Leopold Stern.

DON'T FORGET THE JEWELERS' CIRCULAR PUBLISHING CO.'S BOOK LIST when in want of any technical work in the Jewelry or Kindred Trades.

Traveling representatives may consider these columns open for the publication of any news or items of interest regarding themselves or their conferees.

H. J. Linn, traveler for Woodstock, Hofer & Co., Kansas City, Mo., was in that city last Saturday. He is now making a trip through Missouri and Indian and Oklahoma Territories. E. S. Villmore, with the Norton-Paulson Jewelry Co., Kansas City, spent last Saturday and Monday in Kansas City, restocking his trunks, and left Tuesday evening for a trip south. S. Schimmel, of Sussfeld, Lorsch & Co., and Mr. Cobb, of Daggett & Clap Co., represented the traveling fraternity in Denver, Col., last week. Max Gluck was obliged to return from a trip for Otto Young & Co., Chicago, west of Omaha and go to the hospital in that city for treatment for rupture, sustained by lifting a sample case suddenly. After treatment at Omaha he returned to Chicago and will lay off for a short vacation. Julius Newman, representing Bene, Lindenberg & Co., Cincinnati, O., in the Western States, is laid up at the Metropolitan hotel, Springfield, Mo., with pneumonia, seriously ill, and Mr. Lindenberg has gone out to see him and finish his trip. Max Gluck, Monte Gluck and Messrs. Simpson and Cook, representing Otto Young & Co., Chicago, in various sections, were in for Easter and to arrange their sample lines. Monte Gluck left Thursday to open up new territory in Louisiana and Alabama. O. L. Ross, traveling for the Reed-Bennett Co., Minneapolis, Minn., has returned from his far western trip, on which he had been gone three months. E. R. Apt, traveling for B. Schuette, Minneapolis, has returned from a three weeks' trip. H. E. Schloss has left for the Lake Superior trip. Among traveling men in Indianapolis, Ind., last week were: C. P. Elliot, Maintien Bros. & Elliot; C. R. Spencer, Capron & Co.; Harry E. Farquharson, Bliss Bros.; M. Klipper, Hipp. Disheim & Bro.; H. G. Schramm, Schrader-Wittstein Co.; J. S. Platt, Theodore W. Foster & Bro. Co.

The following were in Minneapolis and St. Paul, Minn., the past week: A. B. Chase, for F. S. Gilbert; E. A. Reed, Reed & Barton; W. R. Shute, Jones & Woodland; Paul Smith, Whiting Mfg. Co.; J. Marx, Kossuth Marx Jewelry Co.; Delancey Stone, Shafer & Douglas; and the representative of Ehrlich & Sinnock.

The following travelers were in Omaha, Neb., recently: Walter S. Noon, W. F. Cory & Bro.; Fred. J. Foster, Unger Bros.; R. H. Stevens, Mabie, Todd & Bard; B. Kaufman, for Fred. Kaufman; Mr. Hofer, M. A. Mead & Co.; W. F. Adams, Simpson, Hall, Miller & Co.; Mr. Pettee, Waterbury Clock Co.; E. B. Frank, The Pairpoint Corporation; S. Schimmel, Sussfeld, Lorsch & Co.

Traveling men calling on Davenport, Ia., jewelers the past week were: Joe Block, Swartzchild & Co.; C. T. E. Smith, Reed & Barton; LeRoy Cram, Benj. Allen & Co.; E. C. Weidlich, William Weidlich & Bro.; Henry Klaas, S. Glickauf & Co.; W. F. Adams, Simpson, Hall, Miller & Co.; G. W. Henderson, R. L. & M. Friedlander; C. Clauer, Schmidt & Clauer; and Arthur M. Vivian, Benj. Allen & Co.

The traveling representatives of eastern firms who called on the Kansas City, Mo., trade last week were: Frank E. Delano, Day, Clark & Co.; R. H. Stevens, Mabie, Todd & Bard; E. A. Reed, Reed & Barton; Mr. Clinger, T. G. Hawkes & Co.; F. D. Newberger, R. Blackinton & Co.; George F. Mackey, Charles Ahrenfeldt & Son; J. C. Jackson, for William Davison; M. Stein, Louis Wolfsheim & Co.; K. D. Yeaton, S. Sternau & Co.; Fred. J. Foster, Unger Bros.; W. R. Shute, Jones & Woodland; Walter S. Noon, W. F. Cory & Bro.

Travelers in Pittsburgh, Pa., recently were: E. Untermyer, Charles Keller & Co.; E. F. Manuel, Drueding Bros.; I. W. Smith, Horton, Angell Co.; C. P. Elliot, Maintien Bros. & Elliot; F. B. Brigham, Cheever, Tweedy & Co.; Frank W. Colom, J. D. Warren & Co.; M. Kohn, Silbermann & Co.; James V. Otis, Harvey & Otis; Walter R. Bristol, Hall, Elton & Co.; S. E. Bolles, David Kaiser & Co.; J. W. McClannin, International Silver Co.; Mr. Parker, Osmun-Parker Mfg. Co.; George W. Wagoner, Wilcox & Wagoner; G. E. Tinker, William B. Durgin Co.; Emil Herbeck, Kelley & Steinmann; C. N. Perley, Alling & Co.; F. W. Mayer, Bruhl Bros.; M. Bernheim, Woodside Sterling Co.; Mr. Singleton, Adams & Singleton; S. W. Pickering, Allen & Jonassohn; Mr. Heyman, Stern Bros. & Co.; J. F. Barclay, The Mauser Mfg. Co.; F. R. Hass, The Strobel & Wilken Co.; H. C. Barnum, Shafer & Douglas; Carl M. Fishel, Fishel, Nessler & Co.; George A. Stockder, The J. D. Bergen Co.; A. E. Alexander, Simpson, Hall, Miller & Co.; Frank E. Delano, Day, Clark & Co.; P. M. Layman, Riker Bros.; S. C. Howard, Dominick & Haff; W. H. Gregory, Strobell & Crane; C. P. Young, William B. Kerr & Co.; F. A. Perry, The John Russell Cutlery Co.; Mr. Bliss, Krementz & Co.; S. W. Abbey, E. Ira Richards & Co.; Mr. Washbourne, Graff, Washbourne & Dunn; J. R. Goodwin, Carter, Hastings & Howe; Jul. F. Schuman, Jr., for William Kinscherf; Charles Bennett, Jacob Bennett & Son; P. M. Mathews, Mathews & Prior.

WE MANUFACTURE SOLID SILVER ONLY AND OF BUT ONE GRADE, THAT OF STERLING 925-1,000 FINE; THEREFORE, OUR TRADE-MARK IS A GUARANTEE OF QUALITY AS ABSOLUTE AS THE HALL-MARK OF ENGLAND.

THE QUESTION, "IS IT SILVER OR IS IT PLATED?" IS NEVER RAISED CONCERNING A GIFT BEARING THIS TRADE-MARK, AS ALL WARES SO MARKED ARE SOLID SILVER AND SOLID SILVER ONLY.

We do not sell our wares to Dry Goods and Department Houses and have never done so.

*A Good Tale Will
Bear Telling Twice*

Our line of **BARRETTES** includes the newest ideas in these popular hair ornaments: They are made in 10 and 14 kt. gold, plain or decorated with flowers, scroll work, etc.; some set with stones. The prices will commend the articles to purchasers.

Henry Freund & Bro.
THE JEWELRY HOUSE
9, 11 & 13 MAIDEN LANE
.... NEW YORK

Philadelphia.

Ralph Binder is again associated with H. Muhr's Sons and has charge of the diamond counter, as hitherto.

L. P. White, jobber, 706 Chestnut St., will remove June 1 to larger quarters at the southwest corner of 7th and Chestnut Sts., in the building formerly occupied by D. F. Conover & Co.

The motion for a new trial in the case of Samuel Baernkopf, charged with disposing of his stock in two jewelry stores to defraud his creditors, was argued Saturday, but decision was reserved. Baernkopf was convicted about 10 days ago.

William R. Brice, assignee for the benefit of creditors of Williams & Ulmer, silversmiths, formerly in business at Juniper and Walnut Sts., has filed his account with the prothonotary of Court No. 1, through his attorneys, Pennewill & Bright. Notice has been given that the account will be allowed by the Court on Saturday, April 27, unless cause be shown to the contrary.

For the second time within two months the silver ware factory of M. F. Hamilton & Son, 112 S. 13th St., has been attacked by fire. Last Monday a blaze was discovered in the plating department on the second floor. A quantity of acid was stored there and it is supposed that the chemicals caused a pile of waste to ignite. The damage is estimated at \$600.

Thomas Maddock, southern representative of Simons, Bro. & Co., has returned from an extended trip of three months through the south and west, reaching as far south as San Antonio, Tex., and as

far west as Denver, Col. He reports business in excellent condition for the Spring trade. "It is surprising," said Mr. Maddock to THE CIRCULAR-WEEKLY correspondent, "how wonderfully Galveston has recovered from its terrible disaster. Business is almost booming in that town and the outlook, to say the least, is reassuring."

The banquet committee of the Philadelphia Jewelers' Club held their last meeting, Saturday evening, March 30. When the accounts were audited it was discovered that there was a surplus instead of a deficit, as in previous years, and that from a financial viewpoint the recent banquet was the most successful ever given. After the business session, which was attended by the full committee, the members were the guests of J. Warner Hutchins, chairman of the committee, at a supper at the Union League. Later the party attended the Chestnut Street theater at Mr. Hutchins's invitation.

The stock and machinery of the assigned estate of the F. C. Missimer Mfg. Co., 925 Sansom St., will be sold out at an assignee's sale, Thursday, April 11, at 10 o'clock, at the company's establishment. The stock consists of machinery for the manufacture of silver novelties and a lot of finished and unfinished buckles, pitchers, firemen's horns, engine, boiler, dynamos, shafting, belting, etc. The assignee is Louis J. Hutt, a lawyer. The Missimer Mfg. Co. bought out the Earle Silver and Novelty Co. about a year ago. The inventory and appraisal of the assigned estate was filed last week and shows a total of only \$662.37.

PUBLISHED EVERY WEDNESDAY BY
THE JEWELERS' CIRCULAR PUB'G CO.,

- GENEVA**—Journal Suisse D'Horlogerie.
- AMSTERDAM**—Continental Club, Hotel Amstel.
- ANTWERP**—Diamond Club, Rue de Pelican.

Every line of reading matter in THE JEWELERS' CIRCULAR-WEEKLY, with the exception of a few brief extracts from exchanges, always properly credited, is written exclusively for this journal. Each issue of THE JEWELERS' CIRCULAR-WEEKLY is copyrighted. Permission to quote is extended to other publications provided such quotations are properly credited.

THE DeGraw bill, in the New York Legislature, "To prevent deception in the manufacture of certain articles of merchandise by associations, corporations or co-partnerships," is a pernicious, if not malicious measure, and though it has been crammed through the Assembly, it is to be sincerely hoped it will not pass through the Senate or receive the approval of the Governor. Though a measure apparently designed to prevent deception in merchandising, it is itself thoroughly deceptive, for while its title is vague and indefinite, its provisions bear specifically on but one class of manufactures, namely, silver goods. It is aimed in reality to defeat the ends of a perfectly working and honest law now on the Statute books. It should not be permitted to become a law.

The Trend of Failures.

BRADSTREET'S, according to its wont, has been making some interesting computations regarding the failures of the period. In the analysis our matter of fact contemporary does not specialize the industries, but bases its deductions from totalities. For the broadest considerations of industrial conditions this method is undoubtedly the best. Following this method we find that only twice in 19 years have the failures of the first quarter of the year been smaller in number than they are this year. The two exceptions were the first three months of last year and of 1899, when business mortality fell to a very low point. While failures are more numerous this year than for two years past, the damage resulting therefrom—in other words, the liabilities of failing traders—are considerably smaller. It is, in fact, necessary to go back 14 years, to the first quarter of 1888, to find a smaller total of liabilities than is reported this year. Assets show a rather similar shrinkage, but it is worth mention that they are the smallest reported in a like period since 1882, 19 years ago. The unfavorable side to the latter showing is that the percentage of assets to liabilities—in other words, the salvage—is only 45.3 per cent. this year, against 49.7 per cent. in 1900, 46 per cent. in 1899 and 53.8 per cent. in 1898, this pointing, on the one hand, to a steadily decreasing margin of possible recoveries, and, on the other, to the fact that this year, more than for many years past, the failure reported is really and absolutely a failure.

The Firmness of the Diamond Market.

THE condition of the diamond market at the present time is one with which every jeweler should make himself familiar, but, at the same time, he should carefully scrutinize and investigate, before giving credence, the many sensational reports which have appeared in newspapers, both in this country and abroad. A careful canvass among those members of the diamond trade most familiar with the conditions brings to light but one thing sure as to the diamond prices in the future, namely, that the tendency is upward, with almost a certainty of additional advances to the two already reported so far this year. This opinion is based on the uni-

versal belief that the "Syndicate" will be forced to pay to the De Beers Company a material advance over their former contract prices when this contract runs out in May, and that this advance from the "Syndicate" will be made up in their prices to the cutters. Opinions vary as to what the total advance for the year will be, but most dealers put 20 or 25 per cent. as approximately the percentage of advance they expect. No one can speak authoritatively on the subject, for no one outside of the "Syndicate" knows exactly what the conditions are or will be. No member of the trade whom a CIRCULAR-WEEKLY representative saw a few days ago had received any notice of the 5 per cent. advance expected to go into effect April 1, although they all said a notice to this effect would not surprise them in the least. It is generally believed that whatever advances are made by the "Syndicate" will be made in instalments of 5 per cent. at different times and will not come, as predicted in the reports in foreign papers, in one lump. Any jeweler who is putting off purchases of diamonds because he argues in his own mind that prices will not be maintained is acting prejudicial to his own interests.

Trans-Atlantic Voyagers.

TO EUROPE.

A. J. Van Gelder, New York, and I. J. Roe, New York, sailed Saturday, on the *Rotterdam*.

- SPRINGFIELD, MASS., D. Buxton, Imperial.
- YORK, PA., I. I. Cohen, Broadway Central.

Providence.

Mr. Frazer, attorney for the Attleboro Export Co., of Montreal, was in the city last week offering a settlement with the local creditors of that concern on the basis of 50 per cent. cash.

A semi-annual dividend of 5 per cent. has been declared by the board of directors of the J. A. Foster Co., payable April 10 on preferred and common stock of the company to stockholders of record April 1, 1901.

Tuck & McAllister have brought suit against Earle & Prew Express Co. for \$1,000 damages for the loss of some diamonds from a package in transit to this city from Haverhill, Mass., during the Christmas holiday season.

News was received by telegraph, a few days ago, that Englehardt C. Ostby, president of the Ostby & Barton Co., had been injured in California. He was thrown from a horse while riding in Monterey and one hip was broken.

E. W. McAllister, traveling representative for Irons & Russell, who is one of the best known of the many jewelry men who travel from this city and is secretary of the Manufacturing Jewelers' Salesmen's Association, is to take unto himself a wife on the 23d of the present month.

Capt. Ralph S. Hamilton, of Hamilton & Hamilton, Jr., has resigned his position as Adjutant of the First Regiment, R. I. Militia, his frequent business trips to New York in the interests of his firm

rendering it impossible to give the time required for the military duties attending the adjutancy of the regiment.

James T. Hunt, of the Hunt Jewelry Co., 212 Union St., created considerable excitement, Friday, and the result was that he was arrested on a charge of shooting at a keeper who had been put in his place of business. There was an entanglement between Mr. Hunt and the keeper and a shot was fired, doing no damage. Mr. Hunt claimed he was acting under legal advice.

Announcement is made of the dissolution by mutual consent of the copartnership existing between Thomas F. Arnold and Horace W. Steere, under the firm name of Arnold & Steere, makers of gold jewelry, 94 Point St. Mr. Arnold has withdrawn from the firm and has sold his interest in the business to his late partner, Mr. Steere, and William F. Grafton. The business will be continued as before at the same location and under the same firm style, Arnold & Steere.

The stock, tools, machinery and fixtures in the jewelry factory of D. W. Costigan & Co., 230 Eddy St., have been attached and the Common Pleas Division of the Supreme Court has been asked for permission to sell the property in connection with a book account suit brought by Bruhl Bros., stone dealers. The plaintiffs claim that the defendants owe them \$975.70 and place the damages in their suit at \$1,800. The defendants were cited to appear in court, April 6, to show cause why the sale should not take place.

Plans are all but completed for the annual banquet of the Manufacturing Jewelers' Salesmen's Association, at Tillinghast's parlors on Saturday next at 7.30 p. m. The full membership of the association is the company which the officers expect to see at table. The committee who have been working up the details consist of J. Thomas Inman, of J. T. Inman & Co., Attleboro; Benjamin C. Crandall, of J. L. Crandall & Co., Providence; E. W. McAllister, A. C. Donley and John Fleming, Providence. A spread, modest but interesting post-prandial exercises and an entertainment are the programme laid out.

Articles of association have been filed at the office of the Secretary of State in this city for the incorporation of the Bliss Brothers Co. under the laws of Rhode Island. The incorporators are Herbert C. Bliss and Ernest M. Bliss, both of Attleboro, and Edward P. Jastram, of Providence. The Messrs. Bliss are sons of Charles E. Bliss, of the old established Attleboro firm of Bliss Bros., and Mr. Jastram is a Providence attorney. According to the articles, which state that the corporation is formed for the purpose of engaging in the business of manufacturing, selling and otherwise disposing of jewelry, plated ware and articles useful and ornamental in metal and for transacting any other business connected therewith or incidental thereto, the business is to be located in this city. It is probable, however, that the forming of a corporation is simply a change in the form of association of the proprietors of the old business of Bliss Bros., which will be continued at the same location on North Main St., in Attleboro. The capital stock is \$60,000, divided into shares of the par value of \$100 each and all common stock.

Boston.

The R. H. White Co., this city, have purchased the entire stock of jewelry from the Saart Mfg. Co., Attleboro, who are retiring from business, and they are now offering it for sale.

Probably the largest watch in this country, to keep time, has just been completed by the E. Howard Clock Co. for "Keene, the South End Jeweler," and is to be placed in front of his New York store at 140 Fulton St. It is more than four feet across the face and about two feet thick, with a winding stem twice the size of a man's head. It is to be illuminated at night so that it can be seen several blocks away.

Local jewelers are somewhat perturbed over calls from policemen in regard to the recent order of the Superintendent of Police, stating that all jewelers and those connected with kindred trades, who buy old gold and silver, must take out a "second hand" dealers' license. This means an outlay of but \$5, but the annoying part of it, from the jewelers' standpoint, is that reports of purchases must be made to the police every 24 hours, together with a description of the goods bought. It is claimed by the police that many stolen articles have been disposed of to unscrupulous dealers and it is hoped a strict enforcement of this law will tend to prevent a continuance of this work.

If this happens

THREATEN TO RAISE DIAMOND PRICES

ANTWERP, Sunday.—Diamond merchants here declare that the De Beers company intends to raise the price of diamonds thirty per cent on April 1 or May 1.

The company's reason for the projected raise is said to be the reported determination of the English government to make the largest part of the financial burden of the Rand Transvaal war fall on the backs of the diamond owners. The mine owners have indignantly protested against such a course, and if their protests prove ineffectual their reply will be a general raise in prices of diamonds. Only in this way, they are said to contend, can they meet the heavy demands of the government.

will you get caught short? No better time to get your customers to invest in diamonds, or to invest your money in diamonds. We have a very complete stock, and while it lasts, it is subject to your call at present prices.

Anything you want, loose or mounted, "on memo."

CROSS & BEGUELIN

Importers and Cutters of Diamonds and Precious Stones

43 Rue de Meslay, PARIS

Telephone, 2188 Corvillandt

17 Maiden Lane, NEW YORK

New York Notes.

Tiffany & Co. have entered a judgment for \$162.03 against Joseph M. Katinge.

Louis Lehr, manufacturing jeweler, will remove, May 1, from 41 Maiden Lane to 48 Maiden Lane.

George A. Rainess has succeeded to the business formerly carried on by Rainess Bros., 82 Nassau St.

H. S. Kramer, dealer in jewelers' tools and materials, 82 Nassau St., will remove, May 1, to 51 Maiden Lane.

L. H. Green, the New York representative of the Providence Stock Co., has been calling on the trade in Baltimore and Philadelphia the past week.

Judge O'Dwyer, of the City Court, Thursday, appointed Moses Levi receiver for George A. Gerlach in supplementary proceedings brought by Lazarus Spero.

The antique watches and jewelry comprising the collection made by W. Lewis Fraser were sold at auction at the American Art Galleries, Thursday afternoon. The 249 catalogue lots were sold for \$4,215 and the articles went to a comparatively large number of buyers.

The watchmakers' society of this city, known as the New Yorker Uhrmacher Verein, held their annual meeting April 2 and elected the following officers for the year: Honorary president, George Schmidt; president, George Reindel; recording secretary, Emil F. Ungerer; treasurer, Valentine Gehrig, and trustee, Alois Platt.

The Coroner's jury impaneled to inquire into the death of Marcel Silverman, the jeweler who was found dead in his place of business in the Bronx, Feb. 5, with a bullet wound in the head, met again Wednesday afternoon and after hearing the evidence of several physicians

who had examined the man returned a verdict that the deceased came to his death by a pistol wound inflicted by himself.

Florence Bradford Settle, the daughter of C. E. Settle, New York representative of O. M. Draper, and Irving Grinnell Taylor will be married to-day at 5 o'clock p.m., at St. Bartholomew's Church, Pacific St. and Bedford Ave., Brooklyn. Mr. and Mrs. Taylor will spend their honeymoon in the south.

A special meeting of the stockholders of the Consolidated Mineral, Gem and Mining Co. will be held at the office of the company, 3 and 5 W. 18th St., April 22, at 2 o'clock p. m., for the purpose of electing directors for the ensuing year and of voting upon a resolution to reduce this company's authorized capital of \$5,000,000 to \$100,000, and the number of authorized shares of the capital stock of this company from 500,000 to 10,000 shares at \$10 per share.

George Seymour Smith, for 20 years connected with the New York office of the Waterbury Clock Co., 10 Cortlandt St., was buried, Friday morning, at Arlington cemetery. The deceased was 43 years old and had engaged with the Waterbury Clock Co. when a young man. He gradually rose to bookkeeper and held various responsible positions in the office. His health broke down about three years ago, which caused him to leave work for about seven months. He then returned, but had been in poor health from that time. About two weeks ago he was forced to quit work and died April 1, after an illness of six days, at his home, 4 Warren Pl., Montclair, N. J. The deceased was a member of The Jewelers' League and was well known to the customers of his firm. He is survived by a widow and one child. The funeral services were held from his

late residence, Thursday, and among those who attended were a delegation from the office of the Waterbury Clock Co.

The tearing down of the office building at the southeast corner of Maiden Lane and Broadway, which begins May 1, is the cause of the removal of the following jewelry firms, whose offices were situated therein: L. & M. Kahn & Co., diamond importers, to 192 Broadway; Alling & Co., manufacturing jewelers, to 182 Broadway; George J. Smith & Co., manufacturing jewelers, to 9-13 Maiden Lane; W. S. Hedges & Co., diamond importers, to 171 Broadway; Hodenpyl & Sons, diamond importers, to 14 John St.; Manasseh Levy, watches, to 25 Maiden Lane; I. W. Friedman, diamonds, to 192 Broadway; Azure Mining Co., turquoises, to 192 Broadway; The Jewelers' League to 171 Broadway; The Jewelers' Security Alliance to 14 Maiden Lane; Henry K. Bicker & Co. to 12 John St.; John E. Shepard, retail jeweler, to 43 Nassau St., and G. A. Walter, optician, to 43 Nassau St. The following are the removals from the adjoining building, 2 Maiden Lane, which will be torn down about the same time: Hayden W. Wheeler & Co., wholesale jewelers, to 15 Maiden Lane; Julius King Optical Co. to 4 Maiden Lane; L. L. Ferguson and F. A. Bates, opticians, to 155 Broadway; Samuel Lawson, onyx jewelry, to 19 John St.; H. L. Smith, manufacturing jeweler, to 12 Maiden Lane; C. F. Voelker, diamond mountings, to 173 Broadway, and Henry Cohen, diamond cutter, to 36 Maiden Lane.

Among the jewelry concerns who will move into the new Garnsey building, 51 Maiden Lane, about May 1, are the following: Bernheim, Cohen & Beer, now at 14 John St.; L. Heller & Son, now at 48 Maiden Lane; Rothschild Bros., now at 49 Maiden Lane; R. A. Breidenbach, 45

CIRCULAR ON APPLICATION.

J. BACH, 298 Washington St., Newark, N.J.

Maiden Lane; Henderson & Winter, 15 Maiden Lane; Frederick Kaffeman, 32 Maiden Lane; Schickerling Bros., 11 Maiden Lane; John Lamont, 57 Maiden Lane; Bonner & Co., 49 John St.; Bennett & Bradford, 3 Maiden Lane; E. S. Johnson & Co., 31 Maiden Lane; S. Hochhaus, Amsterdam; M. Rosen, 41 John St.

B. & L. Veit have succeeded B. Veit, wholesale jeweler, 13 Maiden Lane.

Abraham J. Corn has succeeded Corn & Weichel, jobbers in jewelry, 506 Broadway.

Mahlmeister & Teitelbaum have succeeded M. Spindler & Co., manufacturing jewelers, 82 Nassau St.

Victoria Davidow, bankrupt, has petitioned to the United States District Court for a discharge of all her debts in bankruptcy. A hearing on her petition will be had before Judge Brown, April 24, at 10:30 o'clock A. M., at which time cause may be shown why the discharge asked for should not be granted.

The examination of Solomon Seligman, the bankrupt dealer in pictures and jewelry, formerly of 14th St., was begun Monday, before referee in bankruptcy F. K. Pendleton, in Lord's Court building. James Murphy, a salesman, and A. S. Silberman, brother-in-law and bookkeeper for Seligman, were examined. The examination will be continued at a later date.

At a continuation of the examination into the affairs of M. J. Davidow, bankrupt jobber in jewelry, etc., late of 510 Broadway, Louis Steckler, counsel for the bankrupt, refused to argue a motion offered by counsel for the trustees that Davidow be compelled to pay over \$36,000, the alleged amount of the deficit in his accounts, until the examination by the creditors of the bankrupt is finished. The examination was adjourned to Wednesday, at 5 o'clock P. M.

Edward R. Cohn, a jeweler at 41 Maid-

en Lane, last week offered a reward of \$500 for the return of an envelope containing several thousand dollars, lost by his wife, March 31, between 132d St. and Lenox Ave., and 118th St. and Lenox Ave. Mr. Cohn had drawn the money from a trust company the Thursday previous.

L. Weil & Sons have succeeded S. Valfer & Co. in the manufacturing of jewelry and silver ware cases, trays, etc., at 33 Maiden Lane. Mr. Weil was a member of the old firm and is now associated with his sons, B. L. Weil and B. Weil, who were also with the late concern. The firm have engaged large factory quarters uptown and will, on May 1, move their office and salesroom to the store and basement at 32 Maiden Lane. S. Valfer has retired from business.

Among the nearest kin to the late Sam. Lewis, the noted English money lender, who was credited with leaving an estate valued at £5,000,000, is Samuel Lyon, of Lyon & Sons, precious stone dealers, this city, and his wife. Mr. Lyon claims to be the first cousin of Mr. Lewis, as is also Mrs. Lyon. According to Mr. Lyon, the deceased left all his property to his wife's relatives and practically nothing to his own. His nearest relatives were his first cousins, numbering about 25, and an attempt will be made by these, he says, to break the will and obtain their fair share of the estate. Isabelle Lyon, the daughter of Samuel Lyon, arrives in Europe this week with the power of attorney from her father and mother to push their claims against the estate.

The fact that Jacob Morch, a prominent retail jeweler at 130 Broadway, Brooklyn, had been robbed of two gems valued at \$3,000 two weeks ago came to light last week, when he offered a reward of \$500 (New York Notes continued on page 44.)

Simply a Matter of Business

IS your stock of STERLING SILVER duplicated on the counters of the DRY GOODS and DEPARTMENT STORES?

If so, your customers are probably getting their catalogues, they go everywhere, and depreciated impressions of your ware.

They are making *your stock common*.

Buyers of taste and refinement value and look for exclusiveness. It is not pleasant to feel that a gift may be found among the "bargain" items in a Department Store catalogue.

GORHAM SILVER will not be found there, for it is *sold* only to the *legitimate Jewelry Trade*. Your customers would appreciate this assurance as much as you will.

Every one knows that GORHAM designs represent the best art and the newest metropolitan fashions of the day.

Their trade mark is as assuring of quality as the famous Hall-mark of England.

YOU PAY NO MORE FOR GORHAM REPUTATION AND FOR GORHAM PROTECTION.

New York Notes.

(Continued from page 40.)

for their recovery. The theft is believed by the jeweler to have been committed by the wife of a wealthy official living in the Williamsburg section of Brooklyn. At the suggestion of the police Mr. Morch kept the news of the robbery from the public until Thursday. The stones were shown to the woman suspected. The suspect is believed to be a kleptomaniac and has not been arrested.

David Mayer, diamond dealer, has moved from the seventh floor of 14 Maiden Lane to more commodious quarters on the fourth floor of the same building.

Fred G. Gruen, of D. Gruen, Sons & Co., Glashütte, Germany, Cincinnati, O., and New York, spent a few days at the New York office of the firm, 65 Nassau St., last week, before sailing for Europe on the *Auguste-Victoria*, Thursday.

Frank Bayerdoerfer, dealer in diamonds and watches, 41 Maiden Lane, is about to retire and is liquidating his business at that address. Mr. Bayerdoerfer has been in the business for over 20 years and retires to go into another line.

Jacob Raphaelson, 37 years old, who gave his address as 211 E. 13th St., and a woman who said she was Jennie Smith, 22 years old, were remanded for examination in the Jefferson Market Police Court, Monday, on a charge of attempting to obtain over \$100 worth of jewelry from Charles W. Schumann's Sons & Co., 937 Broadway, by means of a forged check for \$150. Another man arrested with Raphaelson, said to be M. B. Rome, of 56 E. 4th St., was discharged for lack of evidence. Raphaelson, accompanied by the woman, called at Schumann's, Friday noon, and after picking out little more than \$100 worth of jewelry, offered in payment a check for \$150 on the German Exchange bank, drawn by Frank & Beaman to M. Abrams and bearing the name of the payee on the back. The check was certified by the bank. As it is the firm's custom never to accept checks from strangers and Raphaelson being willing that they should keep it for examination, he was told to return at 3 o'clock, during which time they would make inquiries. This they did and learned that Tiffany & Co. had been inquiring about the same check, which made them suspicious. The cashier of the bank said that the certification was genuine, but gave them three wrong addresses of Frank & Beaman. The firm were finally found and on looking at the signature said the check was genuine, but on examining the check itself discovered that they had never drawn it. The police were then notified and when the woman came back for the jewelry at 3 o'clock it was not given to her and she was shadowed to 18th St., where she met Rome. The two were placed under arrest, as was Raphaelson later. Rome and the woman claimed to know nothing about the check further than that Raphaelson told them he was about to buy jewelry. The prisoners were locked up and, as above mentioned, Rome was discharged and the man and woman held Monday.

To our line of "B. A. GOLD SHELL" COLLAR BUTTONS, which have been received with such favor by the trade, we have JUST ADDED a line of LEVERS of like quality and finish. They are solderless and, we believe, the finest lever buttons ever produced. We bespeak for them your consideration.

Novelties in Gold and Silver Bracelets. Also a large line of Chain Trimmings.

News Gleanings.

Frank Blethen has opened a store at Houlton, Me.

J. K. Mathews, Mediapolis, Ia., has sold out to D. A. Dale.

Blanchard, Ia., desires a jeweler to open a store there.

Harry M. Parsons will open a jewelry store in Adams, Mass.

W. G. Austin, Martinsburg, W. Va., has moved to new quarters.

R. W. Rastall, Big Rapids, Mich., will locate at Traverse, Mich.

James A. Lewis will open a jewelry store at Wilkes-Barre, Pa.

A. B. Cohen, Scranton, Pa., has removed to opposite his old stand.

The store of C. E. Daniels, Rockland, Me., suffered from fire and water April 2.

Mrs. F. A. How, wife of a Huntsville, Ala., jeweler, died April 2, of pneumonia.

Orient, Ia., advertises through its postmaster for a jeweler to locate there.

Ann Arbor, Mich., stores will close evenings, except Saturdays, at 6 o'clock P. M.

Utica, N. Y., stores will close at 6.30 o'clock P. M., except on Wednesdays and Saturdays.

John VanEps, Plainfield, N. J., has moved to Somerville, N. J., where he will continue in business.

A Superior, Ia., druggist, D. E. Collins, advertises for a jeweler to occupy a corner of the drug store.

George H. Prescott, formerly of Keesville, N. Y., has opened a jewelry and repair shop at Champlain, N. Y.

Burglars secured nine nickel plated watches from the store of Cyril Eggermann, Paterson, N. J., last week.

No clue has yet been obtained to the burglars who entered the store of Lee Thompson, Huntington, Ind., recently.

Mrs. M. W. Subers, Bainbridge, Ga.,

is having her store altered and is putting in new cases and handsome new mirrors.

The store of Bergeron & Tougas, Springfield, Mass., was entered last week by burglars and a quantity of jewelry taken.

J. Haglund, of Costello, Pa., has opened a jewelry and repair department in the new store of A. Erickson, Cross Fork, Pa.

Charles T. Nehf, of Swope & Nehf, Terre Haute, Ind., is secretary and treasurer of the volunteer firemen's association of that city.

D. W. Stevens, Montgomery, N. Y., an English watchmaker, has begun business as a repairer and cleaner of watches at Warwick, N. Y.

Charles Holes, 32 years in business at Ridgway, Pa., has moved his family to St. Mary's, Pa., where he will continue to run a jewelry store.

Worcester, Mass., citizens have petitioned the Mayor and City Council, asking that an illuminated tower clock be placed near the city hall.

H. N. Sweeting, Tallahassee, Fla., has purchased the stock of jewelry of Max Flatauer, also of Tallahassee, who will retire from business.

Clarence Loudon, Gorham, N. Y., has sold his residence in that place and will engage in his business of optician and jeweler at Geneva, N. Y.

S. E. Fisher, Hazleton, N. Y., has purchased the jewelry business of E. J. Haverly and will remove the stock to the National bank block in Lockhart St.

M. Loeffler, Chattanooga, Tenn., is having his store overhauled, with a new and handsome front put in and new wall cases and when finished it will be one of the handsomest stores in the south.

J. M. Murphey, who went to Sedalia, Mo., in 1895 and for several years conducted a jewelry store there, died at his

home in Spokane, Wash., March 20. Mr. Murphey sustained a stroke of paralysis a couple of years ago, and it was followed by the second stroke which resulted in his death.

An attempt at robbery was made at Stein's second-hand store, Ogden, Utah, recently. A stranger entered the place and, seizing a small show case containing jewelry, started for the door. Stein ran after him. A policeman joined in the chase and caught the fellow. The contents of the case were worth about \$100.

One of the old landmarks of Binghamton, N. Y., was moved last week, when C. W. Keeler moved his jewelry store from 52 to 71 Court St. The former number has been the site of a jewelry store for upwards of 30 years. Mr. Keeler succeeded T. W. Whitney 15 years ago. His removal up the street was necessitated by increasing trade and the desire to have larger and more up-to-date quarters.

L. Hollander, Leadville, Col., applied to the City Council for a license to conduct an auction for the purpose of closing out his stock. His petition was signed by Gillies & Parker, F. J. Mund and Joseph Cohen, jewelry firms of the city, who were willing that Mr. Hollander should be allowed to sell his goods at auction for the purpose of going out of business. A counter petition was presented and Mr. Hollander was denied his request.

F. H. Seashols, St. Mary's, O., who has been engaged in the jewelry business for several years past, has sold his brick building, stock of watches, jewelry and store fixtures to F. D. Ausman. Mr. Seashols will discontinue the jewelry business and devote his entire time to the manufacture of washing machines, upon which he is part owner in a valuable patent. Mr. Ausman contemplates moving his stock from his present location to his new property, where he will, as in the past, conduct a first class jewelry store.

"Some Things That Dover Does That May Be of Importance to You."

We have a complete organization for **designing special patterns** of **Ornaments** and making them of Brass, Gilding Metal, German Silver, Sterling Silver, Rolled Plate or Solid Gold. No matter for what purpose it is intended, if it is makable we can do it.

We have ideas about this business of ours which have a market value; that is, to be more explicit, the **Dover ideas** introduced into **Metal Ornaments, Jewel Settings, etc.**, place on them a **market value in excess** of the ordinary. This feature becomes, then, one of distinct **advantage**; first, because it **requires less expense** in preparing our goods for the market, owing to the fact that they **are made right**; second, the selling expense is less on account of **their artistic adaptability** to the demands of the trade; third, the **opportunity for profit exists**, nowadays, only in the thing which carries with it a **stamp of superiority**, thereby lifting it above the **ruinous competition** of **driveling mediocrity**.

GEO. W. DOVER,

80 Clifford St., Providence, R. I.

P. S.—Mix a few of Dover's ideas with yours and *watch* them effervesce.

He expects to move to his new location about April 15.

C. W. Pinkerton has put in a stock of jewelry at Luverne, Minn.

Louis Derr, Battle Creek, Ia., recently enjoyed a brief hunting trip.

Andrew H. Frandsen, Monmouth, Ill., has removed to a new location.

Henry Sawyer has opened a jewelry repair shop in Hastings, Minn.

C. A. Richards has opened a new stock of jewelry in Norman, Okla.

The Miller Jewelry Co., Chickasha, I. T., will dispose of their jewelry stock.

K. Krageland, Halstad, Minn., will move his jewelry business to new quarters.

J. E. Nutt has bought the jewelry store of John T. Nelson & Son, Boone, Ia.

C. S. Johnson & Co., Bosworth, Mo., have discontinued the jewelry business.

Herman F. Lape, Utica, N. Y., has sold out his stock at auction and will leave that city.

Guy Cleveland, Kammerer, Wyo., has decided to discontinue the jewelry business.

G. F. Duncan, Eau Claire, Wis., has moved his jewelry business to a new location.

E. C. Flinn has sold his jewelry business in Carroll, Ia., to Cleaver Bros. & McIntosh.

Peter Styve will start a jewelry store at Ellendale, a new town near Owatonna, Minn.

Edward E. Taliaferro, Jackson, Tenn., will be married, April 16, to Miss Harriet De Lana.

The Chicago Jewelry Co. have just opened for business at 1207 Second Ave., Seattle, Wash.

Dr. F. A. Marcy has bought the jewelry business of J. C. Flenneken, Strawberry Point, Ia.

Fred Terhune, Groton, S. Dak., has moved his jewelry business to the new Brunswick building.

S. Graves, jeweler and pawnbroker, Kansas City, Kan., has purchased real estate valued at \$4,320.

C. W. Wright has purchased a stock of jewelry and will open a new store in Mountain View, Okla.

S. W. Wadsworth, one of the old jewelers of Nebraska, is seriously ill at his home in Beatrice, Neb.

The jewelry establishment of A. B. McCarthy, Lexington, Okla., has been damaged by fire to the extent of \$150.

E. M. Landrum, Tahlequah, I. T., has given a chattel mortgage on stock and improvements for a consideration of \$1,500.

W. A. Burwell, the post office jeweler of Missoula, Mont., has formed a partnership

with Sherman Bowen in the jewelry business.

Alfred Beinhorn, Winona, Minn., is in the hospital, where he recently underwent an operation for appendicitis. He is recovering.

A. F. Shay, Blooming Prairie, Minn., will start a branch store at Monona, Ia. It will be in charge of Mr. Helfrick, of Elgin, Ill.

C. Gildemeister, San Antonio, Tex., has given a bill of sale of his jewelry business to Lottie Gildemeister for a consideration of \$2,500.

Nicola, Melham & Harmon have succeeded to the wholesale stock of jewelry, notions, etc., of the Nicola-Melham Co., Sioux City, Ia.

John R. Porte, manufacturing jeweler, Eau Claire, Wis., has an order for 150 dozen gold rings, set with opals, for an eastern wholesale house.

George B. Johnston & Co., Pipestone, Minn., have dissolved, Dr. J. W. Taylor having bought the interest of R. Scarf. Johnston & Taylor succeed.

S. H. Abbott has been appointed administrator for the estate of Louis Matthews, Honey Grove, Tex. This estate includes a jewelry store.

The business of William G. Spies, Steubenville, O., was established 25 years ago, and he now has a complete establishment, including an optical department.

Paul J. Slider, Lake Crystal, Minn., died recently from the effects of grip. He was 45 years of age and leaves a widow, one daughter, two brothers and one sister.

Theodore Jacobson, of Jacobson Bros., Howard Lake, Minn., has been on a visit to Kenneth, Minn., and thence goes to Lansing, Ia., for a visit to his parents.

John P. Rorig and family have left Edwardsville, Ill., for Wilmont, Minn. Mr. Rorig has been engaged in the jewelry business in Edwardsville for a good many years. He has relatives at Wilmont and will make that place his home in future.

The Star Jewelry Co., 172 Front St., Worcester, Mass., were attached, Wednesday, by deputy sheriff James Early, at the instance of S. C. Friedman, counsel for I. Miller, New York. A keeper was placed in charge. The *ad damnum* of the writ is \$1,000.

Captain M. H. Call, Lisbon, N. Dak., has sold his fixtures and a portion of his stock of jewelry to Edward Aarhart, New Ulm, Minn., who will take possession about May 1. Captain Call has bought the jewelry establishment in Fergus Falls, Minn., of his brother-in-law. Captain Call has lived in Lisbon for 12 years. For the past four years he has been commanding officer of Battery A, N. D. N. G.

THE ENTIRE WESTWARD TAKES ITS WAY

WESTERN SUPPLEMENT

VOL. XLII.

NEW YORK, WEDNESDAY, APRIL 10, 1901.

No. 10.

Chicago Notes.

All communications in reference to the Chicago department of *The Jewelers' Circular-Weekly*, addressed to Stephen Parlin, 134 Van Buren St., Room 414, Chicago, will receive prompt attention.

S. J. Stieglitz Faribault, Minn., is selling out at auction.

George Gubbins, Illinois Watch Case Co., left Sunday night for a two weeks' trip west.

Sigmund Stern, of Stern Bros. & Co., will be at Chicago about April 15, for a two weeks' stay.

Max Kling was last week a visitor from New York, stopping but a day to make some special calls.

W. S. Sparrow, Chicago manager of Stern Bros. & Co., spent the past week with Kansas City and St. Louis jobbers.

J. A. Moyer, Convoy, O., was among the out of town jewelers buying last week, who are seldom in this market making personal selections.

H. M. Carle, Chicago manager Keystone Watch Case Co., leaves for Europe on the 16th, to be absent several months for recuperation and pleasure. Mrs. Carle will accompany him.

G. W. Payson, Seth Thomas Clock Co., has returned from an 18 days' trip in Michigan. To inquiries as to the condition of trade in general, in Michigan, Mr. Payson said it was "Fine, very fine."

The names of the New England Watch Co. and the New Haven Clock Co. have been added to the list of those who will close early in accordance with the list so numerously signed last week.

Martin, Copeland & Co. will move Monday, April 15, to suite 701 Champlain building. Arrangements have been made that the move will not interfere for a moment with the transaction of business.

W. T. Woodruff, president of the Seth Thomas Clock Co., who has been in California with his wife and niece since January, stopped off in Chicago on his return, to visit the local office for a couple of days.

It is reported here that the Art Jewelry Co. San Jose, Cal., have in contemplation a proposal of settlement with creditors, and that a conference with San Francisco creditors has been held with that object in view.

The enlarged offices of Stern Bros. & Co., 119-151 State St., are to be entirely refitted in ½-sawed oak, with private offices and increased space for sales department

and waiting room. The improvements will be made prior to May 1.

C. L. Stange, for over three years with C. Rogers & Bros'. Chicago office, has taken a position with William A. Rogers, where he will assist Manager Breitenbach in taking care of the city trade and cover Wisconsin, Michigan and Illinois.

The New Haven Clock Co.'s salesrooms have undergone a complete redecoration, the painters holding sway during the week. Owing to the necessity of removing the scores of regulators on the wall spaces, the task was not an easy one for the sales force.

Contracts have been made between the Seth Thomas Clock Co. and Grace Episcopal Church, Chicago, for a large tower clock in the latter edifice. Mr. Buckley, just back from Tipton, Ia., reports a sale of one of their finest tower clocks at that point.

Miss Minnie Belle Knights, elder daughter of C. H. Knights, will be married April 15 to George E. Ellaire, agent for the Detroit Copper and Brass Co., this city, a promising young business man. The ceremony will take place at the home of the bride's parents, the Rev. H. F. Perry officiating.

C. H. Knights leaves May 22 on the *Oceanic*, having already secured passage. He will be accompanied on his European trip by his daughter, Jeannette, and will be absent about two and one-half months. The time will be largely spent in travel, but will include a thorough inspection of the diamond markets.

Mr. Todd, of the Towle Mfg. Co., broke his record for speechmaking, Sunday, when he addressed the First Baptist Sunday School, at La Grange, his suburban home, for over half an hour, on the Passion Play, as seen by him last Spring at Oberammergau. The close attention given to his description must have proved highly gratifying to the speaker in what was, to him, a new departure.

M. Bazzett & Co. move this week from 102 Madison St. to 145 State St., where they have leased 4,000 square feet on the fourth floor. They will considerably increase their lines in their new location. The new quarters are being thoroughly refitted for their occupancy and that of the Rockford Silver Plate Co. for whom the firm are Chicago agents. A full line of the latter factory's goods will be carried.

Two additional, nicely furnished rooms have been added to the quarters of the Commercial Travelers' Outing Club, at 21 Quincy St., and the movement on the part of the jewelry travelers is meeting with

great success. Ten new members have recently been balloted on and admitted to membership. The purpose is the proper entertainment of out of town customers, and each member has his own key. The secondary object is to increase sociability among the members themselves and hardly an hour in the day passes without the attendance of two or more of the members and their friends.

A number of handsome window displays were made for Easter by leading State St. retail houses, that attracted a great deal of attention from the shoppers. Eight of the score of windows in C. D. Peacock's were given over to Easter, two to Easter suggestions in silver novelties, two to Easter novelties in jewelry, and one each to candelabra and communion sets, stationery, Easter cards and gold and silver articles used on the writing and toilet table. The floral decorations were Easter lilies, tulips and ferns. A feature of Rowe Bros' windows were crosses and anchors covered with puffed silk on which were displayed the smaller articles, the larger articles having each a window for themselves, the display consisting of silver ware, silver novelties and watches. The entire arrangement was in white, scattered palms, roses, tulips and sprays of asparagus fern adding the necessary color for effectiveness. At Lebolt & Co.'s, large candelabra with electric lights nestling in Easter lily globes made a charming effect, besides which large clusters of Easter lilies were used. The wares displayed were appropriate for the season. At Spaulding & Co.'s, Hyman, Berg & Co.'s, Muriel Jewelry Co.'s, Goodrich & Potter Co.'s, and Shourds, Adcock & Teufel's, there were specially handsome windows, but not of distinctively Easter goods.

Some time ago Mrs. Celia Wallace, an eccentric woman philanthropist, of this city, and a woman of reputed wealth, often spoken of as Chicago's diamond queen, from the fact that she possesses a large number of diamond pieces, bought a tower clock from the Seth Thomas Clock Co. and presented it to the Congregational Church at Lake Geneva, Ill., where she had a cottage. After repeated efforts to collect the payment for the clock and on the refusal on the part of Mrs. Wallace to pay for same, the clock company secured judgment against her for about \$1,200. Efforts were then made to secure her attendance before a Master in Chancery, but she refused to appear and a written attachment was issued. So far the deputy sheriffs have been unable to locate Mrs. Wallace. It is claimed her reasons for refusing payment were that the

tower was not tall enough so that she could see the clock from her cottage, and it is said she further claims she could not hear the bells, matters, however, for which the clock company are not in any way responsible. The pastors and others of the congregation say that the clock gives satisfaction in every particular. When apprehended Mrs. Wallace will have to face a charge of contempt of court.

Fred. H. Sanders was in from Ottawa, Ill., last week.

Louis Miller, Laramie, Wyo., was a buyer here, last week.

C. D. Peacock and son, Robert, are at San Diego and Coronado Beach, Cal., and will remain on the coast till first of May.

A massive bouquet of carnations and ferns was on the desk of Fred. G. Thearle as he stepped into the office of C. H. Knights & Co., Saturday, fresh from his California visit. The boys in the house said they did not want him to think that California had a monopoly in the flower line.

Columbus, O.

Eben T. Albert, watchmaker, is now with Andrew Morden. He has spent several years with several of the best houses here and is well known among Columbus people.

Henry Crow has just been released from the Ohio penitentiary after serving a five years' sentence from Indiana on the charge of counterfeiting. He is over 61 years of age and in his earlier days was a jeweler by trade.

E. B. Dillon, receiver of the Wirsching-er jewelry stock, has also been appointed trustee by Referee Rogers of the bankruptcy court. There seems to be a great deal of trouble about getting at this matter in the proper light.

The Thomas Stationery Mfg. Co. are installing their plant at Springfield, the greater part of the machinery and equipment having arrived. The company will make tags and other things used in the jewelry and other trades.

Ten pawnbrokers in this city have decided to go out of business owing to the ordinance recently passed requiring them to pay a license fee of \$100 per year. It seems that the business was not remunerative enough to support such an assessment.

Harrington & Nonnenmacher will shortly move into their new room which has been undergoing improvements for some time. They expected to move on the first of the month, but it was not vacated until about that time and they were delayed in obtaining possession.

While workmen were engaged in moving Harrington & Nonnenmacher's large street clock, Friday, the heavy cast iron top tumbled off and was broken into several pieces. It seems that it had been insecurely fastened to the column upon which it has stood in the same place for nearly 20 years. It weighs about two tons and the original cost was something like \$500. Several persons were passing at the time and one or two of them had very narrow escapes. The works had been removed from the frame.

Pacific Northwest.

P. G. Johnson has opened a jewelry store at Toledo, Wash.

D. T. Pritchard, the pioneer jeweler of Medford, Ore., is at present visiting in Jacksonville.

O. P. Memhard, Spokane, Wash., has purchased a lot on which he will build a residence.

Fidder & Sheets are reported to have purchased F. J. Roche's jewelry and notion store at Salmon, Idaho.

Chas. W. Goodman, Chehalis, Wash., has sold out the greater part of his stock to Burnett Bros. Mr. Goodman will remove to Portland, Ore., where he will go into business.

A. Feldenheimer, Portland, Ore., has commenced suit against E. J. Mendenhall for a balance of \$171.50, said to be due on account, the various sums being enumerated in the account. An attachment has been served against certain real estate belonging to the defendant.

Graham & Moore, 705 Second Ave., Seattle, Wash., dissolved, March 28, by mutual consent. A. B. Graham retires from the firm to engage in other extensive business propositions and the new firm will be known as the Lawrence L. Moore Co., who will continue at the same location.

Adam Weitz, a 13 year old boy of North Colfax, Wash., found lying on the sand of the river bank six gold watches and 18 gold rings. All efforts to locate the owner have been unsuccessful. The jewelry has evidently lain there some time. The watches were in tobacco sacks which had rotted and the works of some of them were ruined by rust.

St. Louis.

Mr. Bauman, of Bauman-Massa Jewelry Co., has just returned from a trip through Texas.

Julius Friton, jeweler and diamond setter, now at Broadway and Market St., will move in a short time around on Broadway.

Frank W. Baier, president of the Missouri Retail Jewelers' Association, who has been suffering from blood poisoning, is no better and is still a very sick man.

W. A. Gill, jeweler, southeast corner of 7th and Olive Sts., has leased the building where his store is situated for a term of 99 years and will likely improve it with a handsome office building.

Indianapolis.

H. A. Comstock is conducting a "removal sale."

Smith Bros., Greenfield, Ind., have just concluded a successful auction sale.

Out-of-town visitors last week included: G. W. Bishop, Walton, Ind.; C. M. Amkens, Frankfort, Ind.; H. C. Nichols, New Palestine, Ind.

Scott Pauley, who started in business for himself last Winter at Gas City, has returned to his old position as watchmaker for Rothinghouse Bros., Gas City, Ind.

W. E. Mack has opened a store at Oswego, N. Y.

Pacific Coast Notes.

M. Morgen, Sacramento, Cal., is enlarging his store and making other improvements.

E. T. Lewis, Stockton, Cal., has sold off his stock and is looking for another location in California.

P. S. Seamons, Palo Alto, Cal., has opened a branch establishment in Redwood City, Cal., in the Livingston building.

Percy McClure, of Upperville, Cal., who purchased H. O. Chute's jewelry business at Lakeport, Cal., moved to the latter place last week.

R. C. Richmond, jeweler, Arcata, Cal., has traded his store in that city to S. P.

Anderson, recently of San Diego, for some property in that city. Mr. Richmond will leave for San Diego in the near future.

S. F. Hollander, late of Salinas City, Cal., has a large force of carpenters at work in the store room of the Gilmore brick block, 2d St. near E, Eureka, Cal., fitting it up for his jewelry business, which he hopes to have opened in a few days.

Leonard G. Sefing, Jr., has opened a store at Allentown, Pa.

Thomas H. McNary, Washington, Pa., has made extensive alterations and improvements in his store.

San Francisco.

B. Klune will in future be with J. N. Brittain, Geary St.

Mr. Ahlstrom, of Ahlstrom Bros., Lakeview, Ore., is calling on the trade of this city.

H. F. Wichman, a prominent jeweler of Hawaii, is expected to arrive here by June 1.

Emile Hirschfeld & Co., wholesale jewelers, have moved from 10 Sutter St. to 126 Kearny St.

A. Patterson, formerly of Vallejo, Cal., has accepted a position with S. H. Collins & Co., this city.

Henry Jacobson, of Jacobson Bros., diamond merchants, New York, last week visited the trade of this city.

M. Yotishuna, a leading jeweler of Tokio, Japan, is in the city, and has placed some large orders with the jobbers here.

H. E. Hall, of A. I. Hall & Son, was to arrive from Honolulu on the *China*, due here April 9, having selected a representative in the islands.

H. L. Rothschild has just returned from a southern trip in the interest of Rothschild & Hadenfeldt. Charles Hadenfeldt, of this firm, is ill and will seek the country for rest and recuperation.

F. H. Larter, of Larter, Elcox & Co., New York, accompanied by Mrs. Larter, has been enjoying a pleasure trip on the Pacific coast and is expected in San Francisco soon from southern California.

M. Schussler & Co. are preparing to move to their commodious new quarters on the fifth floor of the Claus Spreckels annex, which are being handsomely furnished for them. They will occupy them on May 1.

O. M. Howard, formerly of Elmira, Cal., has formed a copartnership with L. C. Swain and will conduct a jewelry business at 3294 Mission St., this city, under the firm name of Swain & Howard. Mr. Howard, as agent of the Southern Pacific Railroad Co. and Wells-Fargo Co., at Elmira, has a large acquaintance with railroad men. Mr. Swain is well known to the trade of the coast.

The window of the jewelry store of J. C. Davidson, 124 Kearny St., this city, was broken last week and diamond mountings to the value of \$150 were stolen. The thief had attempted to reach some diamond ornaments at the rear of the show window by means of a rake clumsily made, but failed. In doing so he must have cut his hand severely, as the edges of the broken glass were covered with blood.

George Greenzweig & Co. report a largely increased business over last year, their export business, especially, having been most gratifying. Trade is developing rapidly with Japan, Manila and Australia. The Manila trade hereafter will increase rapidly, as a much lower tariff will take effect May 1. A monthly steamer service between San Francisco and Manila, by the Oregon and Oriental Steamship Co., will aid the growth of that trade. The first steamer will leave on April 10. Mr. Junes, a representative of George Greenzweig & Co., who lately returned from Honolulu, is in the south and reports a big business.

A New Discovery

**CYCLONE
STEEL SOLDERING
FLUX**

FOR
BRAZING STEEL
... AND ...
*Nickel-Plated Articles
without Bluing or
Destroying Nickel.*

DIRECTIONS.
Coat over article to be soldered with the Flux; take small parcel of spelter and wet freely with Flux. Place the pieces to be soldered in position for soldering, put spelter on joint, then fire.

**MANUFACTURED BY
HODGEN & GOLDING,
KOKOMO, IND.**

Every Bottle Guaranteed. Price of Flux and Box of Solder 50 Cents.

Caveat filed Nov. 17, 1900.

**CYCLONE
ANTI-OXIDIZER**

FOR
**Preserving the Color
and Polish of Gold,
Silver, Nickel and
all other
polished metals while
passing through the
fire in act of
soldering.**

DIRECTIONS.
Warm article and drop in Anti-Oxidizer from two to three times before soldering; see that the article is well coated over. No need of cleaning. Anti-Oxidizer out of joint before soldering.

**MANUFACTURED BY
HODGEN & GOLDING
KOKOMO, IND.**

Every Bottle Guaranteed. Price 35 Cents.
Caveat filed Nov. 17, 1900.

**CYCLONE
HARD SOLDERING
FLUX**

FOR
**SOLDERING GOLD,
Silver and Roll-
plate Goods.**

DIRECTIONS.
Coat article to be soldered over with Cyclone Anti-Oxidizer. Wet solder and joint with Flux. Hold article over alcohol lamp. After solder flows drop article in Soldering Flux while warm. Rinse in water. For larger articles use blow pipe.

**MANUFACTURED BY
HODGEN & GOLDING
KOKOMO, IND.**

PRICE 50 CENTS.
Caveat filed Nov. 17, 1900.

With this Flux you can Braze Malleable Iron, Brass and Steel and leave no enamel crust or lump, as this Flux contains no Borax. ❀ ❀ ❀

Always ready for use and will keep in all climates. ❀

No use of cleaning or scraping article to be brazed as this Flux will cause solder to flow freely and leaves article brazed tougher than before broken.

Cyclone Anti-Oxidizer leaves no scales, crusts or lumps after using, like all others on the market do, as it contains no Borax; no boiling in acid pickle as the Oxidizer preserves the color. ❀ ❀ ❀ ❀

Always ready for use and will keep in all climates. ❀

If you use it once you will always use it as it holds the color. ❀ ❀ ❀ ❀ ❀ ❀

This is what Cyclone Hard Soldering Flux will do: ❀ Will cause solder to flow with less heat; can solder 8-karat gold goods with 18-karat Gold Solder. No danger of melting article you are soldering. No use of cleaning article and joint to be soldered as solder will flow freely. You can also solder all grades of plated jewelry and not destroy plate. After soldering you will find article to be much tougher than before broken. ❀ ❀ ❀ ❀ ❀ Always ready for use and will keep in all climates. ❀ It will pay for itself four times a day. You will say so when you try it. ❀ ❀ ❀ ❀ ❀

Wholesale Jewelers and Diamond Importers
51 E. 4th STREET ❀ CINCINNATI, OHIO

Cincinnati.

I. N. Fox has returned from a stay of several weeks in Florida for his health.

Gustave Fox & Co. made an exquisite and elaborate \$800 Laveleur chain last week with diamond mounted pearl pendants.

S. C. Citroen & Co. have a five karat stone, square shaped, which is to be cut round. It is from Indianapolis and is valued at nearly \$500. It is not pure white.

The Miller Jewelry Co. have moved into their new quarters and are getting down to business, utilizing every square inch of space in their well lighted and appointed rooms.

Frank Herschede has returned from a seven weeks' trip to California. He says he had a delightful time and a profitable tour and made contracts with the leading firms on the coast to handle his hall clocks.

The Cincinnati Travelers' Association have offered to contribute \$4,000 if the Fall Festival Association will add \$6,000, making it \$10,000, to charter a special train to distribute Fall Festival literature through Ohio, Indiana, Kentucky, Tennessee, West Virginia and Alabama, with 50 salesmen to go along with a band. They want to make the 1901 festival a success.

Omaha.

Watleskey & Price have opened a wholesale store in this city.

L. H. Tooks has removed his jewelry store from Cedar Rapids, Neb., to Greeley Center, Neb.

John Baumer, for many years located on Farnam St., has moved around the corner to 307 S. 16th St.

W. F. Cunningham, long with J. P. Frenzer, has abandoned the jewelry business to be a conductor on a Pullman car.

A. Mandelberg has varied the monotony of the season by advertising some discount sales and is driving a good business in Rogers Bros. goods.

Henry Copley is offering a novelty, "All in a Nutshell." It is a case for emery cushion and thimble in the shape of an English walnut shell and is very neat.

Wm. Fleckenstein has left the horological school and entered into business with his father, in Sioux City, Ia. Ed. Morey has also joined his father in Valentine, Neb.

Henry Copley has been reappointed special watch examiner for the Burlington railroad. For a number of years he occupied the same position on the Union Pacific, also.

Trade has been quiet the past week with almost all the jewelers. The month of March had only one clear day in it and the weather has had its effect upon trade, both wholesale and retail, for several weeks past.

J. P. Frenzer, who himself is a prominent Elk, is manufacturing a very beautiful Elk's button. It is of solid gold with ruby eyes and a necklace of diamonds. The workmanship is first class and the whole presents an elegant appearance.

The demand for watchmakers in the west continues. A letter received last week offers a good opening for the right man in Oklahoma. The proprietor of a store

wishes to secure a man to take entire charge of the business. There are no jewelers, opticians or watchmakers in Omaha out of a situation.

An interesting case has just been settled in the District Court. Olive Redding pawned some diamonds with a jeweler and pawnbroker, and Charles E. Wilkins, according to her story, voluntarily redeemed them, promising to return them to her when she repaid him the amount for which they were pawned. But when she offered him the money he refused to accept it or give up the diamonds. Wilkins, on the other hand, denied that she had ever made him a tender of the money, but that she owed him \$900. The jury decided that he must either return the diamonds or pay Mrs. Redding the sum of \$1,704.

For attempting to sell imitation jewelry to a boy, John Flaherty, a peddler of Salt Lake City, Utah, was arrested. He has a police record.

Davenport, Ia.

M. E. Nabstedt & Sons are holding a clearing sale with a view to closing out their novelties and minor lines and carrying only the higher grades of jewelry in the future. They expect to double their manufacturing plant this year, which now employs about 20 hands, and to do an extensive wholesale and retail business in jewelry.

Stories of rich finds of pearls by clambers continue to come down the Mississippi. The clam shells are raked out of the river by the ton for the pearl button factories and yield slugs and cheap pearls in large number. Occasionally a fine pearl is found. P. O. Heide, of Prairie du Chien, is reported to have bought about \$25,000 worth for an eastern house in the past year.

August Colberg, jeweler, over at Moline, Ill., was burglarized Monday night, losing goods worth over \$250. The thief got in from a rear shed through a window,

thence into the store, and then he cracked the safe without trouble. This is the sixth time that this sort of misfortune has befallen Mr. Colberg in as many years.

August Youngerman and Anna H. Hass were married last Saturday evening. The groom has been jeweler for Henry Reis for several years.

Pittsburgh.

A. A. Weisser, Penn Ave., between 15th and 16th Sts., is selling out at auction to quit.

Goldsohl will open one of his establishments on Fifth Ave., adjoining Hardy & Hayes.

Goddard, Hill & Co. are enlarging their floor space and will have 140 feet on the second and 140 feet on the third floors.

The handsome \$1,000 tubular chime clock presented to the Rev. J. P. E. Kummer came from E. P. Roberts & Sons' store.

D. L. Stick, formerly with Frank McVay, and S. D. Thompson, lately with G. M. McKinney, East Liverpool, O., are new travelers with A. E. Siviter & Co., who are in their new quarters on Fifth Ave.

The jewelry store of B. Schulgold, 901 Wylie Ave., was robbed by two newsboys, who took several dozen watches, mostly silver. They effected an entrance by kicking in the glass in the front door. One boy is 11 years old and the other 14. They were arrested and locked up in the Central station.

Out-of-town visitors in the city

last week were: C. F. Kesselmire, Salem, O.; Frank Blosser, New Kensington, Pa.; Frank McKinley and George Brady, of Washington, Pa.; G. Zahringer, Ford City, Pa.; W. E. Johnson, Canonsburg, Pa.; J. F. Murphy, Dawson, Pa.; Mr. Myer, Uniontown, Pa.; W. E. Curran, Zanesville, O.

Minneapolis and St. Paul.

J. B. Hudson, Minneapolis, has returned from a trip to Chicago.

P. A. Borreson, watchmaker for B. Leber, Minneapolis, is now with H. H. Green.

F. L. Bosworth & Co., Minneapolis, are about to issue a supplementary catalogue of 20 pages.

Hyman Fegelson, a St. Paul jeweler, had P. A. Casey arrested on a charge of issuing a worthless check.

Fagerstrom & Deeny have opened a business of watchmaking for the trade at 403 Baltimore building, St. Paul.

B. N. Bendz has returned to Minneapolis from a trip to Europe and is arranging to open a store on 6th St. near Hennepin Ave.

N. Schultis, of the Hankinson Drug and Jewelry Co., Hankinson, N. Dak., has been called to Minneapolis by the serious illness of his mother.

F. P. Remer, the St. Paul manufacturing jeweler who was convicted of indecent exposure, has been adjudged insane and committed to the asylum.

Christian Lee, who was formerly in business in Minneapolis and later has been at Benson, Minn., has returned to

the city. He will open a retail store on Cedar Ave., near 4th St.

Frank C. Worrell, jeweler, 526 Nicollet Ave., Minneapolis, has begun an auction sale of his stock, preparatory to retiring from business. It is understood Mr. Worrell will go to Oregon.

John Stolberg succeeds J. L. Strauss as manager of the jewelry department of the Golden Rule store, St. Paul. Mr. Stolberg has been with the Golden Rule for a number of years and has grown up in the service of the house.

Among the dealers in the Twin Cities from the country last week were: E. H. Gross, Osceola, Wis.; L. H. Bruns, Anoka, Minn.; F. F. Nelson, Willmar, Minn.; E. B. Woodward, Spring Valley, Minn.; V. H. Moffett, Hendrum, Minn.; A. L. Mealey, Delano, Minn.

Denver.

Henry Dow has gone to work for the Monarch Jewelry Co.

D. Davis, 2222 Larimer St., lost his baby through illness, last week.

Max Dawedoff has given a chattel mortgage for \$400 on his fixtures.

A. F. Snyder, Cripple Creek, has given a chattel mortgage on his goods for \$4,400.

Joe Richdale, of Lehman & Hamilton, has been laid up for a couple of weeks with illness.

E. L. Peisar, after a short stay in Denver from his western trip, has returned to Aspen.

Ancient Cyprian and Egyptian Jewelry.

THE JEWELERS' CIRCULAR-WEEKLY published in the issue of March 27 an interesting account of recent discoveries of Cyprian gold ornaments, with illustrations of several pieces that were in use 1,000 years before the birth of Christ. The Rev. Charles R. Gillett, D.D., L.H.D., librarian of the Union Theological Seminary, New York, gives us valuable additional information concerning the specimens in the Gold Room of the Metropolitan Museum of Art, New York, in the following:

"No doubt a large number of the readers of THE JEWELERS' CIRCULAR-WEEKLY noted with interest the cuts and letter-press which appeared on March 27, in reference to the Cypriote ornaments recently found at Salamis, in Cyprus. Such readers must have regretted that the objects were represented on so small a scale, only about one-third of their true size, and also that the antiquities themselves were removed from personal inspection by an ocean's width. For the benefit of such, will you kindly allow me to call attention to the fact that America already possesses an unsurpassed collection of similar articles, containing specimens of all the examples and of all the styles shown in the pictures in your columns, and an immense variety besides? These articles are to be seen, open to public inspection daily, in an amazing profusion and in bewildering richness in the famous Cesnola Collection, in the Gold Room of the Metropolitan Museum of Art, in Central Park, New York.

"I have been studying these objects in gold, silver, bronze, precious and engraved stones, glass and pottery for upwards of two years, and still I find new forms to surprise me and new patterns to command admiration. The graceful curves of the objects in silver and glass, the striking composition of figures and shapes in gold and silver, the beauty of vase and jar, of pitcher and cup are a constant joy and constitute a marked feature of a collection worthy of the most careful and profound study.

"Cyprus, as the name indicates, was the home of copper, and it has preserved for us bronze objects in great variety. Some of the specimens are much corroded, but others show few signs of the lapse of nearly 3,000 years since they were made. Silver also abounded in the palaces, and in the votive offerings made to the gods and in the tombs no stint was known. The white metal has lost its beauty through the action of air and water, but the shapes have been well preserved in cup and bowl, plate and saucer, vase and jug.

"Gold and precious stones have kept their pristine glory and one can only wonder at the delicacy of the workmanship which dates a thousand years back of the current era. Lying as it did within the sphere of influence of Egypt and Assyria, of Phoenicia and Asia Minor, and later of Greece and Rome, Cyprus shows all the influences of its neighbors in its art, and in studying its remains one may feel that a panorama of ancient art is being presented to one's surprised inspection. We have been told that there is nothing new under the sun; that lesson is impressed on the student of such antiquities as these. Cyprus shows us a delicacy of workmanship and a variety of artistic detail which it would be hard to match anywhere, and in this particular line, thanks to Gen. Louis Palma di Cesnola, Director of the Museum, America leads the world."

THE CIRCULAR-WEEKLY published illustrated descriptions of some of the notable gold pieces in the Metropolitan Museum in several recent issues. Now comes word from two American exploring parties in Egypt of important discoveries in that land that turn time back nearly 6,000 years, or twice as far as the wonderful Greek work.

The officials of the University of California have recently received a brief cablegram from Dr. George A. Reisner, who is in charge of the excavations in Egypt for the Archaeological Museum of the University, under the patronage of Mrs. Phoebe Hearst. Dr. Reisner says briefly that he has discovered a rich collection of archaic gold jewelry.

PHOTOGRAPHS OF MEN.

ONE of the traditions of photography is that men always want to look like some one else. So they hook you up with a high check and martingales, and tell you to throw out your chest, to make you look like John Drew or Hackett.

I am one of the people who can't get over the isness of the is—and the way that simple, manly, characteristic pictures sell proves that the tradition is a fallacy.

PIRIE MAC DONALD,
141 BROADWAY, NEW YORK.

Fund, whose headquarters are in Boston, Mass., have received a report from Professor Petrie, who is in charge of the work in Egypt, to the effect that he has unearthed at Abydos records and jewelry of the time of the first Egyptian dynasty, which flourished about 4,000 B. C.

"We have found," writes Professor Petrie, "the names of Narma Ka and a king named by a fish sign, perhaps also of two kings, Deb and Sam of Mena, and the earliest kings. There are about 30 inscriptions and a heavy strip of gold with the name Aha (Mena). In the tomb of Khasekhemui were found stone vases, each with a gold cap tied on with gold wire. Also two bead bangles of gold and a dinner service of a dozen pans and dishes, with 160 models of tools in sheet copper. The frequent use of ivory then is witnessed by the discovery of 40 inscribed ivories and stones and two lions cut in ivory."

Kansas City.

The Underwood Co. have begun business in this city.

C. H. Bard, Sedalia, Mo., has been in the city taking Masonic degrees.

C. S. Raymond has given a bill of sale on his fixtures for a consideration of \$3,000.

Mr. Oskamp, with the Jaccard Jewelry Co., has been at home for some time on account of illness.

John Rupp, Atchison, Kan., was last week in the city and attended the concert given by the Marine band. His wife accompanied him.

W. S. Sparrow, the western manager for Stern Bros. & Co., New York, with office in Chicago, called last week on Kansas City jobbers.

The Harris-Goar Mfg. Co. have engaged in the manufacturing jewelry business in this city. The members of the firm come from Van Meter, Ia.

The building where H. B. Carswell has his jewelry store is to be torn down and a handsome six story structure erected, which will be occupied by a piano manufacturing and music store.

S. M. Coffman, Braymer, Mo., was last week in Kansas City. Mr. Coffman is patenting a jeweler's chuck which he has

invented and which is meeting with great success.

L. J. Marks is holding another auction and has advertised his furniture and fixtures for sale. He is anxious to close out his business and it is rumored he intends locating in New York.

J. R. Mercer is having his store beautifully frescoed in a medallion design. The colors are harmonizing shades of pale blue and dull green with a head in the center of each wall space, surrounded by graceful scrolls. He expects to have alterations completed this week.

The out of town merchants who called on the local trade last week were: M. T. Miller, Joplin, Mo.; J. H. Leroy, Fairberry, Wis.; M. B. Gordon, Braymer, Mo.; S. M. Coffman, Braymer, Mo.; Lester White, Lee's Summit; C. H. Bard, Sedalia, Mo.; J. H. Kittridge, Chillicothe, Mo.; manager of the Bliss Jewelry Co., Atchison, Kan.; R. W. Kiser, Topeka, Kan.; W. H. Meyer, Lawson, Mo.; John Kirkpatrick, Winchester, Kan.; E. P. Goff, Sylvan Grove, Kan.; W. S. Noble, Drexel, Mo.; G. A. Hayes, Effingham, Kan.; G. Williams, Lawrence, Kan.

Harry LeBlanch was arrested April 5 in the North End. The police heard there was a man about the saloons of that part of the city endeavoring to dispose of some watches and getting a description of him finally, found him. When LeBlanch was searched at the police station, eight watches were found on him and three were recovered that he had already disposed of. He came to Kansas City the day before and told a man at the Helping Hand Institute that he had won some watches from a jeweler in a game of poker. To the police he would not talk. Several days ago a burglar entered a jewelry store at Liberal, Kan., and secured quite a number of watches. It is thought he is the thief. The police have communicated with the authorities at Liberal.

A. J. Blackstock, Van Buren, Ark., offers creditors 35 cents on the dollar.

C. L. Dingler, Chester, Pa., expects to close out his stock in a few days and will then take an extended trip through the western States for the benefit of his health.

FOR THE NEW YEAR!

TO THE RETAIL JEWELRY TRADE:

We offer the result of more than Fifty Years of Ring Making, confident that the methods we now employ enable us to furnish you the most desirable goods for QUALITY, STYLE and PRICE obtainable.

The "Bryant" Rings.

M. B. BRYANT & CO., 7 MAIDEN LANE, NEW YORK.

The Latest Patents.

ISSUE OF APRIL 3, 1901

670,923. PHOROMETER. EDMUND T. ALLEN and EGBERT H. GRIFFIN, Chicago, Ill., assignors to the L. Manasse Co., same place. Filed May 3, 1900. Serial No. 15,308. (No model.)

A device for manipulating testing-lenses for use in testing the eyes, consisting of a case which serves as a dark chamber, having a light-aperture at one end, a passage-way for such light, an adjustable mirror at the opposite end to receive the light, a second adjustable mirror on the same end as the light-receiving aperture, and two lens-receiving eyepieces opposed to and at the opposite end of the case from the second adjustable mirror.

670,936. DIE FOR WATCHCASE-CENTERS. WILLIAM MUSHET, Attleboro, Mass. Filed Sept. 5, 1900. Serial No. 29,098. (No model.)

In a die for shaping watchcase-centers, the combination of an expanding-die divided into two parts and having its periphery beveled in both directions from the middle thereof, a socket to hold said expanding-die consisting of an upper and lower member each having a recess in it made with beveled sides fitting on the beveled periphery of said expanding-die.

670,988. EYEGLASSES. HARRY GRIFFITH, York, Pa., assignor of one-half to Charles P. Young, same place. Filed Feb. 8, 1901. Serial No. 46,540. (No model.)

In eyeglasses, the combination of a lens post flanged at its inner end to form a socket, a nose-guard and a lens-connecting device having their ends overlapped between said flanges, a fastening-screw passing through said overlapped parts and into the lens-post and having its head serrated, and a locking device consisting of a plate clamped between said overlapped parts and the lens-post by said screw and provided at one of its longitudinal edges with a flange *f*, this flange lying and fitting between the edges of the overlapped parts and the adjacent one of the flanges of the lens-post and having a spring-pawl formed on one end and bent to normally engage the serrated head of the screw.

671,026. FOUNTAIN-PEN. STEPHEN J. MEYER-PETER, West Somerville, Mass. Filed Oct. 30, 1899. Serial No. 735,283. (No model.)

A fountain-pen consisting of a barrel or staff with an open end having an internal smooth surface, a tubular nozzle removably mounted in the said staff or barrel end and having the front portion rigid and provided with an externally smooth surface unbroken by grooves or indentations and its opposite end divided or split to form diametrically opposed yielding bearing-fingers having frictional engagement with diametrically opposite points of the interior of the said open end of the barrel or staff, the front rigid portion of the

nozzle bearing directly against the internal smooth surface of the open end of the barrel or staff to produce a liquid-tight joint therewith, and a projection on one of said devices to enter a slot in the other by a longitudinal movement of one in relation to the other for restraining the nozzle against inward and axial turning movement while in the barrel or staff end.

671,035. PHOTOGRAPHIC SHUTTER. WILLIAM O. STANLEY, Dublin, Ireland. Filed Sept. 22, 1899. Serial No. 731,324. (No model.)

671,051. SPECTACLE ATTACHMENT. WARREN C. JONES, San Francisco, Cal. Filed Aug. 30, 1900. Serial No. 28,493. (No model.)

As an article of manufacture, a nose-piece for eyeglasses having a gripping-surface provided with a multitude of upwardly-inclined pointed projections arranged throughout the same.

671,066. LENS. CHRISTOPH GRAF, Closter, N. J. Filed Jan. 4, 1901. Serial No. 42,041. (No model.)

A compound lens, consisting of four single lenses juxtaposed, each of a different refracting power, the two inner lenses being negative, and of intermediate refracting power, and the two outer lenses being positive, one of the highest refracting power, and the other of the lowest refracting power.

671,111. STEROSCOPIC MUTOSCOPE. CHARLES F. JENKINS, Richmond, Ind. Filed March 7, 1898. Serial No. 672,930. (No model.)

671,125. TIME-RECORDER. WILLARD LE GRAND BUNDY, Binghamton, N. Y., assignor to the Bundy Mfg. Co., of New York. Filed Nov. 26, 1898. Serial No. 697,543. (No model.)

671,126. TIME-RECORDER. WILLARD LE GRAND BUNDY, Binghamton, N. Y., assignor to the Bundy Mfg. Co., of New York. Filed April 10, 1899. Serial No. 712,385. (No model.)

671,127. TIME-RECORDER. WILLARD L. BUNDY, Binghamton, N. Y., assignor to the Bundy Mfg. Co., of New York. Filed July 12, 1899. Serial No. 723,526. (No model.)

671,128. WORKMAN'S TIME-RECORDER. WILLARD LE GRAND BUNDY, Binghamton, N. Y., assignor to the Bundy Mfg. Co., of New York. Filed Oct. 25, 1899. Serial No. 734,699. (No model.)

671,129. WORKMAN'S TIME-RECORDER. WILLARD LE GRAND BUNDY, Binghamton, N. Y., assignor to the Bundy Mfg. Co., of New York. Filed Oct. 25, 1899. Serial No. 734,700. (No model.)

671,154. PANORAMIC CAMERA. PETER N. ANGSTEN, Burlington, Wis. Filed Aug. 11, 1899. Serial No. 726,847. (No model.)

671,174. ENGRAVING-MACHINE. HONESTUS M. ALBEE, Newark, N. J. Filed Feb. 15, 1900. Serial No. 5,246. (No model.)

In an engraving-machine, movable platens arranged above each other, having traveler-receiving grooves or channels and travelers movably arranged in said channels, for movably separating and supporting the platens one above the other, one of said platens bearing a pattern or design and also the work to which said pattern or design is to be transferred, a fixed table-support or bed-plate on which said platens are movably arranged, all combined with an upright on said bed-plate, an adjustable clamping sleeve or collar on said post, a stem or rod extending therefrom, a rock-beam fulcrumed on said rod or stem, a cross-frame

Jewelers' Court,

(E. D. GARNSEY, Owner)

51 & 53 MAIDEN LANE, - - NEW YORK.

Ready for occupancy April 1st, 1901.

This modern, twelve-story, absolutely fireproof business building will have solid masonry floors, solid plaster partitions, high marble wainscotings, three high-speed elevators, mail chute, basins in all offices, electric light and everything that contributes to comfort and convenience.

Offices of all sizes are provided and floors may be leased entire or in part, partitioned to suit tenants. Those desiring to carry on light manufacturing can be accommodated, special provision being made for adequate power. Drop hammers will be located in the basement.

Floor plans are now ready for inspection and leases can be arranged by communicating with

Design Issued April 3, 1894, for seven years. 23,163. SPOON, FORK, ETC. SINNEY SMITH, Bridgeport, Conn., assignor to the Holmes & Edwards Silver Co., same place.

BUYERS' INFORMATION BUREAU.

Questions as to the makers of certain lines of goods, where to buy certain lines, where certain kinds of work are done, the owners of certain trade-marks and other matters relating to the buying branch of a jewelry business will be cheerfully answered under this department. The reader cannot ask too many questions. All queries received are also answered promptly by mail.

NEW YORK, March 27.

Editor THE JEWELERS' CIRCULAR-WEEKLY:

Parks Bros. & Rogers manufacture a line of "L'Aiglon" scarf pins. See by your "Information Bureau" that you wish to know who are the manufacturers, so take this manner of informing you.

Sincerely,
T. SMITH.

Charms representing a peanut, inquired for in the March 27 issue of THE CIRCULAR-WEEKLY, are made by Walter E. Hayward, Attleboro, Mass., and 21 Maiden Lane, New York.

MONTREAL, Can., March 19, 1901.

Editor of THE JEWELERS' CIRCULAR-WEEKLY:

Can you give me the address of a manufacturer of celluloid cards with embossed gold letters? I think the Baldwin & Gleason Co. do not manufacture them. Thanking you for past favors, I remain,

Yours truly,
J. PROCKTER, JR.

ANSWER:—We refer correspondent to Epstein & Kowarsky, 351 Broadway, New York.

RICHMOND, Va., March 25, 1901.

Editor of THE JEWELERS' CIRCULAR-WEEKLY:

Please give me the correct address of the firm of Bippart Co. Has the firm name been changed? If so, you can please furnish me with same. Thanking you for same,

Respectfully,
J. F. KOHLER.

ANSWER:—Bippart, Griscom & Osborn are successors to Bippart & Co. and are at 32-36 Marshall St., Newark, N. J.

CEDAR RAPIDS, Ia., March 16, 1901.

Editor of THE JEWELERS' CIRCULAR-WEEKLY:

Will you please inform me where I can buy alligator teeth jewelry or the alligator teeth polished and ready for mounting, as I am in the market to purchase some of this class of goods? Hoping that you will give this your immediate attention, and thanking you in advance, I am, as ever,

Respectfully,
PEARL SHELL JEWELRY Co.,
By I. L. Mitchell.

ANSWER:—We refer correspondents to the Barber Jewelry Co., 36 Gold St., New York, and to Theodore Waterbury, Jacksonville, Fla. For teeth in the rough to Greenleaf & Crosby Co., Jacksonville, Fla.

GREENSBURG, Pa., March 17, 1901.

Editor of THE JEWELERS' CIRCULAR-WEEKLY:

Please send me the address of the makers of patented bezels for holding gold coins, made in the form of a charm.

Yours respectfully,
J. S. MURPHEY.

ANSWER:—These goods are not carried in stock, but are generally made to order. The following firms make them and would probably furnish what is wanted: Gorham Mfg. Co., Broadway and 19th St., and T. W. Adams & Co., 11 John St., New York; J. M. Fisher & Co., Attleboro, Mass.

LIVERPOOL, England, March 13, 1901.

Editor of THE JEWELERS' CIRCULAR-WEEKLY:

Knowing your journal as an influential trade organ, we venture to think it within the range of possibility that you may be able to put us into communication with one or more reliable makers supplying rolled gold, acid proof bands for mounting fountain pens, etc. We are ready to buy these

in 25 to 50 gross lots, plain and chased, in different widths, for spot cash against delivery in New York. It is necessary that the articles be of the best quality, at rock bottom prices. It would be no use any middleman trying to sell to us, and our requirements are large enough to interest makers, as we are in a position to place monthly orders. We feel that we are taking somewhat of a liberty in addressing you upon this matter, but on the other hand we suppose that you may possibly have some business acquaintance who might benefit by an introduction to us. We enclose English stamps for reply and thank you in anticipation of your assistance.

Yours faithfully,
THE LANG CO., LTD.

ANSWER:—Aikin, Lambert & Co., 19 Maiden Lane, New York, can supply the rolled gold, acid proof bands for mounting fountain pens, etc. We have taken the liberty of giving them the name of the correspondents and they will communicate direct.

YOAKUM, Tex., March 17, 1901.

Editor of THE JEWELERS' CIRCULAR-WEEKLY:

Will you please give me the address of some manufacturing company who manufacture electric flash lights, something like the enclosed cut? I would like to get the address of the different factories that manufacture lights of this character. Thanking you in advance for this information, I am,

Very truly yours,
JOHN C. JONES.

ANSWER:—As manufacturers of electric flash lights, etc., address Strobel & Wilken Co., 591 Broadway, and Electric Contract Co., 61 Elm St., New York.

CHARLES TOWN, W. Va., March 18, 1901.

Editor of THE JEWELERS' CIRCULAR-WEEKLY:

Please send me the addresses of manufacturers of silver rings—plain, scale, etc. I enclose stamp for reply, and thank you very much for information.

Very truly,
C. W. BROWN.

ANSWER:—Without stones, Palmer & Capron, 20 Maiden Lane, New York; with stones, Flint, Blood & Co., 19 Maiden Lane, New York.

CHARLOTTESVILLE, Va., March 20, 1901.

Editor of THE JEWELERS' CIRCULAR-WEEKLY:

Kindly let me know of a reliable repair house where I can get jewelry case and general repair work done; also gilding. By so doing you will greatly oblige me.

Yours truly,
D. A. TOBIAS.

ANSWER:—We have mailed correspondent a copy of our Vest Pocket Directory, which contains all the information desired.

LOWELL, Mass., March 19, 1901.

Editor of THE JEWELERS' CIRCULAR-WEEKLY:

Kindly let me know who makes cuff link mountings for individual portraits, in locket style, not with glass front, but with gold front, and oblige a subscriber.

Yours, etc.,
FRANK RICARD.

ANSWER:—These goods are not carried in stock, but are made to order by T. W. Adams & Co., 11 John St., New York.

SALEM, Mass., March 23, 1901.

Editor of THE JEWELERS' CIRCULAR-WEEKLY:

Can you give us the name of a manufacturer of a good line of sterling silver crosses? A reply will be greatly appreciated.

Yours truly,
HUSSEY, HYDE & CO.

ANSWER:—Sloan & Co., 21 Maiden Lane, New York.

Mustard and Horseradish Pot.

No. 359.

Heavy nickel-plated mounts, glass jars with wooden tops to prevent verdigris; bone spoons.

Manufactured by

S. STERNAU & CO.,
204 CHURCH STREET, NEW YORK.

Catalogue on application.

That this department shall prove mutually beneficial to our readers, it is desirable that the members of the trade generally communicate with THE JEWELERS' CIRCULAR-WEEKLY regarding any advantageous device or plan that they are utilizing in connection with their business.

PRIZE ESSAY COMPETITION, NO. 3.

SUBJECT:

"How to Foster Spring Trade."

No. 4.

PRIZE ESSAY COMPETITION.

**First Prize, \$20.
Second Prize, \$10.**

These prizes will be given to the writers of essays on the subject

"How to Promote a Bric-à-brac, Pottery and Cut Glass Department."

The prizes will be for the best and most reasonable essays, not for the language in which the ideas are expressed. Anyone may enter, whether he be a retailer, salesman or any employe.

The standing of the judges who have kindly consented to act is a guarantee that the contest will be carried on strictly on its merits and in an absolutely fair and impartial manner. We shall designate each contribution by letters, keeping a list of contributors with the letters of their articles. Thus the judges will not even know the names of the writers whose products they pass upon.

RULES:

Essays must be in this office by June 15, 1901. Essays must be written on one side of paper. No limit to number of words, and specimens of records are admissible.

NOTE.—THE JEWELERS' CIRCULAR-WEEKLY reserves the right to publish any or all of the competing essays received.

Preference will be given, all other things being equal, to those whose contributions reach us at the earliest date.

JEWELERS' IDEAS AND SCHEMES.

C. L. Byrd & Co., Memphis, Tenn., conducted a sale of Confederate souvenir buttons and hat pins. The sale was lively enough to keep two men busy all the time it was in progress. The cash received was placed in a large bowl in a show window. The bowl was more than filled and the unique sight of the pile of coin assisted in stimulating trade from passers-by.

O. C. Sternquist, manager of the H. G. Bates & Co. clock hospital, Philadelphia, Pa., has lately sent out some neat and catchy advertisements in the shape of private mailing cards.

WHAT are you going to do, Mr. Retail Jeweler, to improve your Spring trade? No doubt you have thought of this and formed some plans. Now, see if these suggestions will not aid you in your preparation for this "Spring rush."

First, let us notice the stock. Be sure that it is in the best possible condition. Have a thorough store cleaning. See that the cases and trays are well dusted, the jewelry cleaned and recarded, the rings washed and new tags attached, the silver ware and cut glass polished, and the whole store and stock fresh and inviting. We all prepare for the holiday rush, but are apt to forget the stock during the dull season and just at the time when it should be at its best. There is no reason why, with proper care, goods should appear old and shop worn.

Now, for the windows—by far the greatest of all advertisers, if properly and attractively dressed. Display seasonable goods, with prices on neat cards; not necessarily a reduced price, but you will find that a window with the goods fairly priced will be much more attractive and profitable than one that merely displays goods. As a special attraction, place conspicuously in the window a quantity of old goods, marked at a greatly reduced price. Get the price so low that it is bound to attract attention. Keep your windows clean and fresh—if possible, dusting and rearranging every day.

Newspaper advertising, especially in smaller cities, is profitable. Impress upon the people the necessity of Spring jewelry, just the same as a new suit or a new hat. Call attention to new goods received, and to the fads and novelties of the season. Let the people know that your goods are up to date, and do not be afraid to tell them prices. Look over a newspaper and see how much quicker you notice a price than the name of the firm showing the price. You will notice that afterward. Your ads. should be neat, well worded and not necessarily large. Limit your words to the fewest possible, and make those few tell the story. Change the ads. at least once a week, and make the change conspicuous enough to notice. A good means of calling your customers' attention to Spring styles and new fads is an attractive booklet. The cost of such a book is not great, as the cuts may be secured from manufacturers, and the only expense is for the printing and mailing. Do

not, however, get it up so cheaply that it will look cheap and unattractive. Use good paper and have the matter well set up and printed. Otherwise, a booklet is worse than none at all.

Last, but by no means least—the treatment of customers. Impress on clerks the necessity of being polite and attentive to all, whether they come to buy a diamond ring or a watch key. Nothing attracts trade or advertises a store like politeness to patrons. Every day you hear some one say: "I like to go to this store; they are always so accommodating." Any little accommodation, such as cleaning jewelry or straightening spectacles, is appreciated, and in time you are bound to be repaid.

With a neat store, well dressed windows, clever advertising and polite treatment of customers, we have the fundamental principles of the most successful businesses in the country. Begin now with your preparations and your Spring business is bound to be improved.

F. L. B.

D. W. Kelley has on exhibition in the show window of his store, 82 Westminster St., Providence, R. I., an interesting example of the goldsmithing art of a century ago, in a jewel casket which was presented to the wife of a certain United States Senator by the Prince de Joinville at the time of a visit to this country by the Prince years ago. The elaborate chasing and carving which adorn the casket would of themselves make it a rare work of art, but it is the beautiful ivory miniatures of the Kings Louis XIV., XV. and XVI. and of some of the famous women of those brilliant courts which are the distinctive feature. There are 14 of these ivory miniatures framed in gold on the cover and curving sides of the jewel box, which in its general dimensions is five inches deep, about five inches in width and 6½ inches in length. The casket became the property of a Rhode Island collector some years ago and was placed in Mr. Kelley's hands, recently, to sell. Its worth as a work of art was so quickly recognized that it had been on exhibition but a single day when Mr. Kelley found a purchaser, whose name has not been disclosed.

A new front is being put on the building in which is located the store of W. M. Farrington, Bangor, Me., and his store will be correspondingly improved.

THE GREAT HINTS TO JEWELERS

ADVICE AND CRITICISM ON RETAIL JEWELERS' ADVERTISING.

[This department is free to every retail jeweler and optician. Forward for criticism your newspaper ads., booklets, catalogues, novelties, circulars, etc. Ask advice and offer suggestions. Replies in these columns are unbiased. Make letters full and particular as desirable. Every letter and ad. sent will receive full attention, though the publication of the matter may sometimes be delayed some weeks. Address all letters and other matters to The Jewelers' Circular Pub. Co., 11 John St., corner Broadway, New York.]

THE three advertisements here reproduced are good each in its own way. That of Theodore A. Kohn & Son, New York, exploits an attractive line in a pointed manner. While the quoting of a range of prices is not usually as effective as the quoting of single prices, the range in this case is not so wide as to frighten away prospective buyers. The harping upon the stability of the value of diamonds, as in the advertisement of A. A. Webster & Co., Brooklyn, is always good policy. This advertisement can be employed at other seasons of the year as well as at Christmastide. The advertisement of Fred. B. Blackmond, Dowagiac, Mich., is calculated to increase the business of the repair department of this jeweler's store. The enumeration of the kinds of repair work that he does is a wise measure on his part, as it may stir up in the reader's mind the memory that he or she has something else besides a watch that needs repairing or overhauling.

A. A. Webster & Co.

440 FULTON STREET.

The Value of Diamonds.

NOTE—We refer herein to perfect Diamonds, such as are free from color and defects.

The value of a Diamond is more staple than that of gold. Its intrinsic worth can't be severed from the stone. A Diamond that is yours, *is yours forever*—unless it gets lost.

If you would give a Diamond at Christmas, whether ring, brooch or scarf pin, make sure that it is a pure stone. For the only valuable part to an imperfect Diamond is the price you pay for it.

We sell pure Diamonds.

WORK SHOP...

A great many people have an idea that a jeweler has only to stand back of his counter and sell watches, etc. Should you be able to follow us each day in the week a different opinion would be given you. Our work shop keeps us very busy from 7 a. m. to 8 p. m. each day, repairing watches, making rings larger and smaller, mounting and sizing diamond rings, repairing fans, silver ware, engraving and so many little odd jobs that we are able to repair for you extra jobs, such as shell comb repairing, filigree silver work, hair chain mounting and braiding. Any job that can be done we can do. Bring all your watch work to us; we will do it correctly.

FRED B. BLACKMOND,

Dowagiac, Mich.

The People's Jeweler.

SENTIMENT AS TO OLD SIGNS.

PEOPLE who think that there is no sentiment in commercial life need only wander about any of the old business centers of New York to have their belief changed. They will see old signs, some of them in a state of decay almost bordering on dissolution, on the walls of the houses of the older firms.

In some instances these signs remain even though the name of the firm has been changed. In cases in which sons have succeeded to the business, many of the old signs of the firm which established the business are still to be seen. Many are weatherworn and the lettering almost indistinct, but the present firms do not permit them to be retouched.

Occasionally the boards split and the edges break. These ravages are repaired for safety's sake, but the dim outlines of the lettering remain.

A sign writer who had been called to repair one of these ancient landmarks in Greenwich St. asked the head of the firm, who represents the third generation in the concern, if he should not regild the letters.

"Certainly not," was the answer; "if I consented to your doing that I should expect the business of this firm to fail."

In some cases, in which new names have succeeded to the business, old signs have been removed from the outer walls and placed inside. In an office in a Broadway store there is an old wooden sign suspended over the desk of the grandson of the founder of the firm, who is at the head of the business.

"I couldn't think of leaving the old sign out of doors at night," said the young man, who looked at it with a glow of pride. "I have heard my father say that when that sign was first put up by his father all the merchants in this part of the town came over and looked at it and admired it, and my grandfather gave them a dinner on account of it. If I ever go out of business that sign goes to my house."—*The Sun*.

Brooch Pins

Brooch Pins have always been one of the most important features of our business. This season we have prepared an assortment of moderate-priced pins at \$1.75 to \$25.00, that not only represents great discrimination and expert judgment in selection, but also an unusual degree of artistic merit.

"TRADE-MARKS" will give you all the information desired. Write for descriptive circular to THE JEWELERS' CIRCULAR PUBLISHING CO., 11 John Street, New York.

WORKSHOP NOTES.

To Repair Meerschaum Pipes.—To cement meerschaum pipes, make a glue of finely powdered and sifted chalk and white of egg. Put a little of this glue on the parts to be repaired and hold them pressed together for a moment.

Gilders' Wax for Fire Gilding.—Gilding wax as used for fire gilding consists of: 1. Yellow beeswax 32 parts; finest red chalk 3 parts, aerugo 2 parts and powdered alum 2 parts. 2. Yellow beeswax 96 parts, zinc sulfur. pulv. 48 parts, and powdered borax 15 parts. The dry ingredients must be very finely powdered and thoroughly dried before being added to the molten wax. Recipe No. 1 is for dark shades, No. 2 for light ones.

To Protect Iron from Rust.—In a vessel placed on the fire, put a layer of 3 to 4 centimeters of coal dust on the bottom; 3 to 4 centimeters higher place a grate on which the articles to be treated are laid. Close the vessel and heat for about ½ hour, maintaining the bottom of the vessel at a dark red. At the end of this time, retire from the fire and take out the articles which have acquired a handsome layer of black enamel. This brilliant coating is very durable and permits of exposing the pieces thus treated to all the variations of temperature. A good result is also obtained by covering the objects with a hot solution of sulphur in essence of turpentine.

Cold Soldering.—For soldering articles which cannot stand an elevated temperature, the following process may be employed: Take powdered copper precipitated from a solution of sulphate by means of zinc and mix it in a cast-iron or porcelain mortar with concentrated sulphuric acid. The number of parts of copper varies according to the degree of hardness which it is wished to obtain. Next add, stirring constantly, 70 parts of mercury, and when the amalgam is finished, allow to cool. At the end of 10 to 12 hours the composition is sufficiently hard. For use, heat it until it acquires the consistence of wax. Apply to the surfaces, and, when cooled, it will adhere with great tenacity.

To Clean Gummed-Up Springs.—Frequently we come across springs, especially in old table clocks, to which the resinified oil that has hardened to a tough crust adheres so tenaciously that petroleum or benzine does not accomplish its removal. Sometimes a knife is called in as an aid, though not to the benefit of the spring. Aside from the fact that a thorough cleaning of the spring is never attained with the said liquid, the process is slow. Take caustic soda, dissolve it in a vessel filled with water, preferably warm water, as it accelerates the work; place the spring in it and leave it therein for about one-half hour. Any oil still adhering may now easily be taken off with a hard brush; next, dry the spring with a clean cloth. In this manner gummed-up parts of tower clocks, locks, etc., may be quickly and thoroughly cleaned, and oil paint may be removed from metal or wood. The lye is sharp, but free from danger, nor are the steel parts attacked by it.

CONDUCTED BY GEORGE A. ROGERS.

32D YEAR.

WEDNESDAY, APRIL 10, 1901.

VOL. XLII. No. 10.

NOTE—Under this department, all matters of a technical or of a news character bearing upon the optical branch of the jewelry industry will be considered. Address communications to The Jeweler's Circular Pub. Co., 11 John St., New York.

STATE RELATION TO OPTICAL SCHOOLS. IT is time to talk to the point on the proper relation of the State to optical schools. What should this relation be? In brief, the State's relationship to optical schools should be the same as to any private academy—nil. The State has business of its own to attend to. It is willing that any legitimate educational enterprise should exist. It is willing to incorporate any such educational enterprise provided it states specifically the purposes for which it proposes to be incorporated, limits itself under the charter to those purposes and pays the necessary fees of incorporation. Beyond that the State is a disinterested spectator. Incorporation confers no privilege or authority except the bare franchise to do business as a corporation. Incorporation is a limitation upon enterprise, not an enlargement. A private individual, or an association of private individuals, can do whatever a corporation can do and much more besides, for, not being an artificial person, it is not bound by the limitations imposed upon artificial persons. We notice some schools advertising themselves and their diplomas under the line, "By State authority." This is an entirely misleading phrase. It is meant to be. The State gives neither of these institutions any such authority. The State merely grants them the right to do business as a corporation and under a corporate name *provided they do no other business than that proposed in their application* to the Secretary of State for a charter. The State knows nothing about their course of instruction or whether they instruct at all or not. It does not supervise their work in any way. It grants no privileges whatever to graduates of such institutions. It confers no authority upon them. It doesn't recognize them or the school in any way. No other State is bound to give them the least recognition. The expression "By State authority" is simply put in to make the ignorant believe that in some way the State is back of the school. It is a "catch student" phrase and indicates a weak system of instruction, for any system must be weak that deceives or tries to deceive students or prospective students in this manner. It is afraid to stand on its own

merits as a school and tries to don this weak regalia of the State to make its course go down.

Manufacture of Optical Glasses in Germany.

THE perfection of the lenses and optical glasses exhibited by Germany at the Paris Exposition recently was remarkable. The development of this manufacture is due to causes widely different from those recently assigned by our English confrère, *Nature*. At an exhibition of scientific apparatus in London, in 1876, Mr. Abbe in a report pointed out the gaps which then existed in the manufacture of optical instruments and the need of glasses having, besides dispersive power and the index of refraction, some different properties from those then found in the workshops of opticians.

With the aid of Mr. Schott, at Jena, he undertook to realize his ideal about 1881. His first care was to create a well equipped laboratory whose catalogue in 1886 contained this phrase: "Our industrial enterprise rests upon scientific researches on the relations existing between the optical properties of amorphous fluxes and their chemical constitution." The experimental work of Messrs. Abbe and Schott was only possible from large, though intermittent, subsidies of the State. Consequently, from 1888, almost all the optical glass employed in Germany came from the national manufactory; in 1898, it was exported in bulk to the extent of more than 750,000 francs; the exports of optical instruments, properly so-called, telescopes, spectacles, etc., amounted the same year to more than 6,000,000 francs. To-day the manufacture gives employment to about 5,000 workmen.

At the outset of this enterprise only six constituents entered into the composition of glass. Since 1888, it has become possible to combine with these in a proportion of at least 10 per cent. more than 28 others, the effect of each of which on the dispersion and the index refraction has been carefully determined. For example, it has been found that with the addition of boron, the proportion of the length of the blue extremity of the spectrum to that of the red is reduced, while fluorine, potassium and sodium give the opposite results.

An ordinary achromatic lens, uniting two colors of the spectrum, is formed by the combination of a lens of crown glass with another of flint glass giving the same total dispersion; but although this

total dispersion may be the same for both, it is unequally distributed along the spectrum: in flint glass the dispersion of the blue extremity is greatest, that of the red more feeble than in the crown glass. It follows that light coming from a white source is not white after having traversed the lens; it remains a "secondary spectrum" whose presence has rendered the progress of the microscope so difficult. By combining a large proportion of boron with flint glass, Mr. Abbe has succeeded in producing a spectrum very similar to that of crown glass. He has shown that with two glasses of this kind it is possible to combine three colors in place of two. The resulting spectrum is much reduced in length and is called "tertiary spectrum."

The ordinary microscopic lens formed of two glasses can be corrected of axial aberration for one color only. Mr. Abbe has shown that borated and phosphorated lenses, combined with a lens of fluor spar, have their axial aberration corrected for two colors. To these lenses he gives the name *apochromatics*. It was more difficult to reduce the secondary spectrum by lengthening the red extremity of the crown glass spectrum. By adding fluor spar, potassium or sodium this difficulty was overcome.

The glass for photography, thermometers and barometers has likewise received numerous improvements. But we have said enough to show the rôle that science and method, the well equipped scientific laboratory, has to play in industrial invention.

France has long held the first rank in the glass industry, thanks to the scientific attainments of two men, Messrs. Feil and Mantois, though working with insufficient capital. With a laboratory and suitable equipment, conducted by true scientists and sustained by sufficient financial resources, invention ought to become a manufacture *sui generis*.

Everyone knows that Edison in the United States has created such a laboratory, whence so many marvelous inventions have been launched. In Germany, it seems that, in all the great industries, there are two groups of engineers, the one weighed down with the burden of today, the other specially appointed to researches sustained by large resources. This is a kind of mobilization of intellectual activities to be compared for order, method and fruitfulness to the famous mobilization of Moltke in military matters.—Translated from *La Nature*.

DIOPTRIC CONDITIONS OF THE EYE AND HOW TO DISCOVER AND MEASURE THEM.

[Commenced in issue of Feb. 13.]

HYPEROPIC PRESBYOPIA.

THE static refraction of the eye is its positive lens power without accommodation. It is the lens power of the eye when the accommodation is in repose. This power of the eye is stationary, except for slight changes in advancing years, due probably to the shrinkage of the humors and slight flattening of the cornea, lens, or both. The eye can never exercise less lens power than that represented by its static refraction or static dioptric value. This is not to say that all eyes, or even all emmetropic eyes, have equal static power. A long emmetropic eye has less static power than a short emmetropic eye, or it would be myopic, or the short eye hyperopic. Roughly averaging eyes on the basis of curvature and indices of refraction of the media and the average dimensions, it may be said that the static power is about 53 D. for emmetropia. Hyperopia is an insufficiency of the eye's static power, for even if the hyperopia be considered due to the shortness of the eye or the nearness of the retina to the lens, the static power is insufficient, since it is unequal to the work required of it for emmetropia. A hyperopic eye in order to be at rest (accommodative inaction) while viewing the distant type, must receive concave or negative waves of light from such object. As all waves of light evolving in a homogeneous medium are convex, or, from a distant object, practically plane or neutral, there are no natural waves adapted to give the eye that rest. A plus lens before such an eye converts the plane waves from the distant object into concave waves, and if the lens is of suitable dioptric power, transmits to the hyperopic eye waves of such concavity that it can impart the remaining concavity required to center or focus them at the retina. In "correcting" hyperopia with a plus lens we are, therefore, not correcting the eye in the least, but we are adapting the waves of light to its insufficient static power, so that each pencil or series of waves of light from the distant object are focused at the retina without accommodation. The eye is thus enabled to view the distant object and perceive it distinctly without muscular or nerve action. This leaves it all of its accommodative force to be used for near objects, when the waves become convex by reason of such nearness.

The dynamic power of an eye is that power which is or may be added to the static power by accommodative action. It is greatest in young people, in whom the muscles are capable of great contraction and the humors and membranes possess greatest elasticity and pliability. Nerve force is at such time more spontaneous also and the eye has great accommodative capacity. But the dynamic power of the eye is simply a capacity for action. It will not act without a stimulus and the stimulus to

accommodative action is either (1) nearness of the object or convexity of the waves, and the tendency of the focus to recede beyond the retina unless accommodation is exercised; or (2) hyperopia, which requires accommodative action, even for the distant object, and plane waves, and greater accommodation for the near object and convex waves. The dynamic power of an eye is first engaged in correcting hyperopia, or adding sufficient power to the eye's static refraction to enable it to focus plane waves at the retina. As the amplitude, or total

12a. Vigorous eye at age of 30 years, with 4d. hyperopia, uncorrected, viewing distant objects.

power of accommodation, lessens rapidly with advancing age, if an eye has considerable hyperopia it will not be long before the accommodation will be greatly taxed to correct the hyperopia and enable the eye to see the distant object, or focus the plane waves upon the retina. But long before it experiences this difficulty it will be unable to focus convex waves from the near object. It is on this account that hyperopic eyes fail first for the near object and later for the object at a distance. When hyperopes find that they are unable to read and that the letters on a printed page blur and run together, although they can see at a distance "just as well as ever," they think that "reading glasses" are all they need. When one under the age of 40, unless some preceding debilitating illness accounts for it, shows these symptoms, or reports that in reading at the ordinary distance the letters blur and run together and the paper or

13a. Fatigued eye of 4d. hyperopia, uncorrected at age of 40 years, attempting to see distant objects.

book has to be held at a distance to see distinctly, the prognosis is hyperopia as a matter of course. If plus lenses are prescribed for distance, and the accommodative action required to neutralize or correct the hyperopia is released, the glasses remove the difficulty. But these lenses should be worn constantly and not for reading merely, for otherwise accommodation must be active all the time and the ciliary muscles be under constant tension, which is not only a strain of the accommodative function but has an inductive effect in producing many nervous disturbances and derangements. Of course, the tests will show whether there is in fact hyperopia or not, but not usually all of the hyperopia, if present.

The concealed portion of the hyperopia may be latent, or due to ciliary spasm or cramp. This effect is produced by the long preceding tension upon the ciliary to correct the hyperopia. The doctors, as we have noted, consider that the only means of reaching and determining the amount of such concealed hyperopia is to instill a drug that paralyzes the ciliary muscle and relaxes the spasm, and so it is, if there is a real spasm. But what is the effect or value of finding latent hyperopia in this manner? It cannot be covered by a plus lens and re-

12b. Same eye attempting to read at 13 inches.

laxed, for as soon as the effects of the drug wear off the spasm reasserts itself and the glasses prove too strong for distinct vision, except at near points. The return of the spasm, with such lenses on, causes the eye to become physiologically myopic instead of artificially emmetropic. Nor do the doctors try to cover all of the latent. Sad experience has taught them better. They cover only a part of the so-called latent hyperopia and trust to the ciliary to relax that amount. This is merely guessing. The better way is to fog out all the hyperopia possible, and when the wearing of the strongest plus lenses that are acceptable for awhile relaxes the ciliary or part of the latent, increase them to cover that which has become manifest, and save people the discomfort and annoyance—not to say danger—of having their vision practically destroyed for several days, for to atropize the eyes thoroughly means several days of such

13b. Same eye, corrected for manifest hyperopia, viewing distant object.

discomfort, in which even the distant object is blurred. But often muscular factors entirely independent of a ciliary spasm cause hyperopia to conceal itself, though manifest enough when proper means are used to bring it to the surface. This is not latent hyperopia and there is no excuse for the drug in such cases.

If hyperopia is in excess of the power of accommodation to neutralize, distant vision is marred to some extent. The accommodation may have, as at 30 years, an amplitude of 7 D. But that represents the total and only a portion can be used comfortably and continuously. The usable part is considered to be about one-half the total amount, or, in the case cited, 3.50 D. A hyperope of 4.00 D. would then

Optical Department.

[Continued from page 62.]

have trouble at the age of 30 years to see distant objects distinctly. When fresh and vigorous his eyes would not bother him except for reading, but when fatigued even distant vision would be impaired. If 3 D. of hyperopia were manifest, the other 1 D. being latent, and the former were covered with a +3.00 D. lens, most of the trouble would be eliminated. With +3.00 D. lenses distant objects would be distinct and he would still have available 6.00 D. amplitude of accommodation, but only 2.50 D. could be used comfortably in reading at 13 inches, leaving a reserve of 3.50 D. for extraordinary occasions. Later, the wearing of the +3.00 D. constantly would relax the other 1 D. and he could then wear his full distance correction of +4.00 D., which would leave him all of his accommodation for near seeing. He would need it all at 40 years, for by that time the amplitude will have become about 4.50 D., one-half of which is but 2.25 D., and perhaps something besides, for at this age real presbyopia appears.

(Hyperopic Presbyopia to be continued.)

The Solomonson Optical Co., Cleveland, O., are now located at 88 Euclid Ave., having removed from their old location on Superior St. within the past few days. This firm commenced business in Cleveland in 1855, under the American house. In 1873 they removed to under the Forest City house, where they have been established until the present time. The new store is one of the finest of its kind in the city and is fitted out with all the latest improvements and arrangements for testing eyes.

[Commenced in issue of July 6, 1898.—Continued from page 58, Feb. 20, 1901.]

PART LXXI.

Porta, B. Born in Italy 1540, died 1615. His writings cover several subjects, among which appear dissertations upon optics. He was the father of the camera obscura.

Positive (pos'-it-ive). [Latin, *positivus* = decisive.] That which is real and absolute. The Positive Surface of a periscopic lens is the convex surface.

Post (post). [Latin, *post* = behind.] A Latin prefix meaning that which follows.

Præ (pre). [Latin, *præ* = before.] A Latin prefix meaning that which is in advance or in front of. Synonym: **Pre.**

Pragmatagnosia (prag-mat-ag-no'-si-a). [Greek, *pragma* = object + *agnosia* = non-remembrance.] A want of power to recall to mind the knowledge of ever having seen an object which should be a familiar one. Visual Pragmatagnosia is an abnormal condition in which one is blind to seeing an object.

Pragmatamnesia (prag-mat-am-ne'-si-a). [Greek, *pragma* = object + *amnesia* = loss of remembrance.] An abnormal state in which there is no power to remember having seen an object after once an impression has been made upon the mind. Visual Pragmatamnesia applies to the inability to recall an image formed upon the retina.

Pray's Test Letters (Pray's test let'-ters). [Proper name + Latin, *testa* = a crucible + Latin, *littera* = a letter.] An astigmatic arrangement of large capital letters for the purpose of subjectively determining astigmatism.

Precorneal (pre-cor'-ne-al). [Latin, *præ* = in front + *corneus* = a horny substance.] That which is placed in front of or before the cornea.

Preretina (pre-ret'-in-a). [Latin, *præ* = in front + *retina* = the retina.] That portion of the retinal element which lies anterior to the ora-serrata.

Preretinal (pre-ret'-in-al). [Latin, *præ* = in front + *retina* = the retina.] That which pertains to the portion of the retina located anterior to the ora-serrata.

Presbyope (pres'-by-ope). [Greek, *presbus* = an aged person + *ops* = an eye.] An individual who has passed beyond the 45th year.

Presbyopia (pres-by-o'-pi-a). [Greek, *presbus* = an aged person + *opsis* = eye-sight.] A state or condition of the eyes in which, from progressive hardness and consequent inelasticity of the crystalline lens, the near-point (punctum-proximum) recedes, so that it is necessary to prescribe

PRESBYOPIA.

convex spherical lenses in order to make up for the convexity of the crystalline lens, according to the law deduced by Donders, that for every five years after the 40th year, an additional dioptre convex spherical lens will be required in order that the patient may read, sew, etc., etc., at the convenient range of 14 inches from the eyes.

Donders' Law for Presbyopia:

45 years of age,	+ 1 D. ^s
50 " " "	+ 2 D. ^s
55 " " "	+ 3 D. ^s
60 " " "	+ 4 D. ^s

There may be a few exceptions to the above principle, but, other things being equal, the law stands undisputed. After the 60th year the convex spherical lens required nearly makes up for the sum total of extra convexity of the crystalline lens, so that the + 4 D.^s will remain for a longer or shorter period of time, as the case may be. In a presbyope who has attained his 70th year, the far-point and the near-point are identical; in other words, the crystalline lens has become so hard that the weakened ciliary body lacks ability to make any impression upon it, in addition to which the crystalline lens has become shrunken, so that lenses of at least one dioptre will be required for service at the distance point for this apparent hyopia; and another pair of very strong convex spherical lenses for reading, sewing, etc., etc. A presbyopic patient may also suffer from an error of refraction (hyperopia, myopia, astigmatism) in which instance the error should first be corrected, after which additional convex spherical lenses according to Donders' Law will be required for reading, etc., etc. Synonyms: **Old Sight; Presbytia.**

Charles Ferry, Sumpter, Ore., is now visiting at Granite, Ore.

A. Frank, optician, has located at 176 State St., Bridgeport, Conn.

P. N. Nelson, Galesville, Wis., has added a De Zeng refractometer to his equipment.

K. Birge, Davenport, Wash., has engaged the services of a graduate optician to assist him.

Daniel Rochet, with the Ponder Optical Co., Denver, Col., has just returned from a trip to the Pacific coast.

Mr. Warner, of Warner & Swasey, Cleveland, O., last week called on the trade of San Francisco, Cal.

S. H. Grater, who has been Marlboro, Mass., agent for M. B. Franklin, will go into business for himself at Waterbury, Conn.

Charles Franz, Dubuque, Ia., has lately added improved instruments to his optical department and now has a well equipped department.

R. D. Hubbard, who visited in Kansas City, Mo., last week, has returned to Des Moines, Ia., where he is manager of the Columbian Optical Co.

G. W. Pearce, of the Bay State Optical Co., and W. H. Hurlbert, of the Providence Optical Co., called on Kansas City, Mo., jobbers last week.

John J. Brands is making his first trip for the Merry Optical Co., Kansas City, Mo. His territory will be Missouri, Kansas and Indian Territory.

J. E. Reeves, Groton, S. Dak., has closed his jewelry store and has gone to Leeds, N. Dak., to hold a claim. He will engage in the optical business in the Fall.

C. T. Brown, of Philadelphia, Pa., has rented a store at Rutland, Vt., and opened a parlor. Mr. Brown is a graduate of the Philadelphia Optical College.

M. C. Rosenfield, Leavenworth, Kan., and H. P. Hall, whose stock was destroyed by the fire in the recent conflagration at Carthage, Mo., were in Kansas City, Mo., last week, buying optical goods.

D. V. Brown, 740 Sansom St., Philadelphia, Pa., wholesale optician, has bought the exclusive control for the United States of the ratchet screw for eyeglasses, a recently patented invention of considerable merit.

Will C. Avery, who was with the Merry Optical Co., Kansas City, Mo., for 18 months, will travel for the Des Moines, Ia., branch of the Geneva Optical Co. His territory will be Kansas, Missouri and southwestern Iowa.

The Hirsh Optical Institute have filed articles of incorporation under the laws of Missouri. The officers of the company will be H. A. Hirsh, Dr. Slusher and M. E. Lobenstein, Cedar Rapids. They are located at 12th and Main Sts.

F. D. Ausman, who has recently purchased the jewelry stock of F. H. Seashols, St. Mary's, O., is in Chicago, where he will complete a course in the Chicago Ophthalmic College. Having spent considerable time already in the study of optics he expects to complete

the course in a short time and use the knowledge in his business.

Mr. and Mrs. E. F. Kirchgessner, Adrian, Mich., will open optical parlors at 250 Woodward Ave., Detroit, Mich. Their jewelry store at Adrian will be continued as usual.

The White-Haines Optical Co., Columbus, O., have moved into the new room in the Dispatch building, which has been fitted up especially for the business. Mr. White and Mr. Haines are both young men and through experience are well equipped for the business of manufacturing and jobbing opticians. While there is opposition in Columbus, it is not as strong as in many places, and the new house will have a fertile field to draw from. Joseph Lheureux, formerly foreman of the Whittlesey Optical Co., Cleveland, O., has taken the same position with this company. The plant will be in operation some time this week.

F. E. Robbins, Elmira, N. Y., who for the past 10 years has had charge of the optical department at F. S. Ayres's jewelry store, has opened one of the most complete and scientific optical establishments in southern or central New York. Electricity and other modern methods for examining the eyes and fitting glasses will be employed. The prescription department is supplied with electric power and the latest improved optical machinery for grinding lenses and making repairs. Mr. Robbins is treasurer of the Optical Society of the State of New York and a graduate of the Chicago Ophthalmological College and Hospital.

Treasurer G. N. Wall, of the American Optical Co., Southbridge, Mass., has filed the following annual corporation report with the Secretary of the Commonwealth, Boston:

Real estate and buildings.....	\$154,550
Machinery	108,250
Cash and debts received.....	262,062
Manufactures and merchandise.....	491,303
Miscellaneous	12,000

Total

Capital stock	\$60,000
Debts	24,375
Profit and loss.....	693,730
Reserved for depreciation.....	250,000

Total

Charles A. Chase and A. C. Munroe, trustees of the Worcester Optical Co., Worcester, Mass., have disposed of the special optical machinery and stock of the company, a part going to the Central Optical Co., of Southbridge, Mass., a part to the Webster Optical Co. and the balance to George J. Kirby & Co., Providence, R. I. The factory is not entirely shut down, as a part has been in constant use by a file manufacturer. The trustees have had numerous offers to rent portions of the premises and could have filled the buildings with tenants, had they been so situated as to do so. They, however, have felt it to be their duty to dispose of the property outright and will do so in some way very soon. Several parties are considering the purchase of the property, which is in excellent condition. One feature of the property that manufacturers appreciate is a large unfailling spring of water.

THE HOROLOGICAL REVIEW

The Perret Campyloscope.

AT the present time, when the verification of the theoretical curves of balance springs is occupying more and more attention, it is desirable to call attention to an instrument contrived and constructed by Paul Perret, an adjuster at Chaux-de-Fonds. His campyloscope was exhibited at Paris some time ago,

FIG. 1.

but has since remained comparatively unknown. The cause can only be attributed to its high price, rendered necessary by the great accuracy of its construction. The principle on which it is based is very simple: Suppose (Fig. 1) two rectilinear metallic pieces, forming with each other an angle represented by BDC , and that this angle is movable; that is to say, that its apex D can slide along a straight line VZ , without deviating from it. The opening of the angle can be adjusted at will by means of a nut-screw placed according to BC . Imagine, then, a triangle aed , likewise movable, but invariably following the direction XY at right angles to VZ —admitting that the movement of the system BDC , following the direction VZ , has for a consequence the movement of the triangle aed following XY —the point a will pass over courses proportional to courses passed over by the point D , in such a way that there will be a constant ratio $\frac{DD'}{aa'}$ for all the successive positions occupied by the point D along VZ .

Now, if the point D is furnished with an alidade DA , invariable in length and direction, and perpendicular to VZ , and if the movable point a is determined by the projection of the optical axis of a compound microscope, the eye can then follow over a very small piece, with a

magnifier from 15 to 30 fold, a line to be followed on a drawing of large scale with the alidade DA . Thus, in causing all the points composing a straight line, such as AA' , to follow to the extremity of the alidade, the microscope will meet on a small scale displacements proportioned to the opening of the angle BDC .

This system will, therefore, answer for verifying on a microscopic piece the perfect alignment of all the points composing a straight line. In order to be able to verify also all the points forming any curve, the apparatus is constructed in such a way that the drawing on a large scale may be placed conveniently on a circular platform moving around the center O of the apparatus. The piece to be verified is placed on a disk raised higher but participating in the circular movement of the platform, as represented in Fig. 2. So in combining the circular movement of the platform with the rectilinear movement of the alidade, the position of all the points forming any curve can be verified.

It is sufficient to place the pieces to be verified on the platform in such a way that the contours of the object can be followed with the microscope, at the same time as the contours of the drawing are made to follow the alidade. In order to observe strictly the optical center of the microscope, the sight-piece is fitted with two very fine wires corresponding to two diameters, crossing each other at right angles. The object can be retouched without withdrawing it from the

FIG. 2.

instrument, as in the case of balance spring curves, the microscope and the support being very easily removed. The mathematical precision of this useful instrument is thus subordinated to its perfect practical operation.

After a little experience, all terminal

curves, whether interior or exterior, can be verified and corrected in a very limited time and with inconceivably less trouble and more exactness than with ordinary systems. —Translated from the *Revue Internationale de L'Horlogerie*.

Uniform Standard Time.

SINCE Jan. 1, 1901, Spain has been added to the nations using standard time, that is, Greenwich time. The situation now is as follows:

Great Britain, Belgium, Holland and Spain have the same time. Greenwich noon (0 hour) is taken as the instant of standard noon all over these countries.

When it is noon at Greenwich the standard time is 1 P. M. over all Sweden, Norway, Denmark, Germany, Austria, Switzerland, Italy, Bosnia and Servia; and 2 P. M. over all Russia, Roumania, Bulgaria and Turkey. France and Portugal still keep to Paris and Lisbon local times respectively. The time over all Cape Colony is 1.30 P. M. at Greenwich noon, and in Natal is 2 P. M.

When it is noon at Greenwich the time in West Australia is 8 P. M.; in Japan 9 P. M.; in South Australia, 9.30 P. M.; in Victoria, Queensland and New South Wales, 10 P. M., and in New Zealand, 11.30 P. M.

Greenwich time prevails over all the oceans of the globe. Ships, with few exceptions keep their chronometers running on Greenwich time, though the work of the ships is always done by local reckoning.

In the United States and Canada standard time is from four, five, six, seven or eight hours slower than Greenwich time. When it is noon at Greenwich the time at Halifax is 8 A. M.; at New York, 7 A. M.; at St. Louis, 6 A. M.; at Denver, 5 A. M.; at San Francisco, 4 A. M. The time in Mexico is the same as Denver standard time. Alaska uses, at present, the standard time of San Francisco. The time of Hawaii will probably be 10 hours slower than Greenwich time, while that of the Philippine Islands will be eight hours faster. When it is noon at Greenwich, Hawaiian standard time will be 2 A. M. and Manila time 8 P. M. The system of standard time has so many practical conveniences that it is likely to be extended to all civilized countries in time. The day in Spain is divided into 24 hours (midnight = 24 o'clock), but in most other countries it is separated into two parts of 12 hours each (midnight and noon are each 12 o'clock).

H. J. Croskill, Lunenburg, N. S., is removing to Chester.

New Form of Balance-Staff for Lever Watches.

HOROLOGY, like other industries, goes on toward perfection, notwithstanding some useless inventions, says the *Moniteur de la Bijouterie et de L'Horlogerie*. Various improvements have taken place in the smaller parts of watches. The lever escapement has replaced advantageously the cylinder escapement even in very small ladies' watches. Customers have become more difficult to suit; they are more exacting as to the accuracy of time. They talk now not of a watch varying so many minutes in a day, but so many minutes in a month, or so many minutes in a year. This is true even of quite low priced timepieces.

The lever escapement seems to give satisfaction, and its adjustment can avoid criticism, though many watchmakers experience inconvenience with this escapement, especially in repairing. When the pivot of a cylinder watch is broken the cylinder plug can be replaced by another pivot to be found at the dealers in supplies. If the entire cylinder needs replacing, finished cylinders of all sizes and heights can also be obtained. This is a very great advantage, both with respect to the time saved and the difficulty of the work. But when a pivot is broken in a timepiece with lever escapement it is necessary either to bore the staff and insert a pivot or to replace the entire staff. This is a long and delicate operation, necessitating for a single

pivot a greater expense than the replacement of a cylinder plug.

To obviate this, interchangeable pieces have been made. This would be more advantageous if the types or calibers of lever watches were not so numerous. The dealer, when applied to, could ask "Is it for a French caliber, or a Swiss or an American?" and find the piece wanted at once. But the interchangeable pieces are not all within the reach of Paris watchmakers generally, and still less of those of the provinces or those living at a distance from the dealers in supplies.

So the replacement of a balance-staff or merely the pivot of a balance-staff of a lever watch is a work dreaded by many watchmakers. Can this difficulty be lessened? We answer in the affirmative, and believe that, in consequence of a new invention, it will be easier in the future to replace a balance-staff than a cylinder plug, notwithstanding its improbability at first sight.

The illustration represents in A and in E models of staffs in current use employed for

the table-roller, or for the double roller. It represents: In D, a staff of the new model for double roller or for the table-roller. In B, the roller with its connection made of a single piece with a cavity through the center, represented by oblique marks. In C, the same for double roller. The whole is turned out of a single piece and rests on a smooth staff or rod, passing through the piece.

A watchmaker can understand from an examination of the illustration the facility that this modification will cause in replacing a staff; the balance not being a part of the piece and the adjustment of the balance-spring collet never requiring change. It is sufficient in case of the breaking of a pivot to knock out the staff with a slight blow of a hammer on the point of the lower pivot, and to introduce a new pivot-staff in its place. An assortment will be found at the dealer's, as is now the case with plugs and pivoted cylinders. In case the watchmaker is at too great a distance from the dealer or prefers to make the staff himself, the work is so simplified that it may be entrusted even to an apprentice.

The measuring of the height of the roller or rollers and the position of the balance can be quickly found, and these pieces affixed at the proper points. The pivot-staff or rod, when of the exact length needed, as represented in D, can be introduced simply with the aid of a small hollow punch, a kind of guard pivot, of steel or of brass.

THE RAMBLER'S NOTES.

WHAT THE RAMBLER SAW AND HEARD AMONG THE DEALERS IN ART POTTERY, CUT GLASS, BRONZES, ETC.

POTS AND PEDESTALS IN BLENDED COLORINGS. FOR the coming Summer season S. A. Weller has put on display at his warerooms, 57 Park Pl., New York, an especially fine assortment of jardinières, pots and pedestals in his Louwelsa and Aurelian wares with their beautiful blended colorings. He shows many new and rich pieces in several sizes and many shapes, wherein the decorations are mainly large flowers or figures. Dog heads are now prominent on the newest vases of Louwelsa and come on a number of former shapes which have been revived with great success.

CUT GLASS FOR JUNE WEDDINGS. THE approaching wedding season has greatly increased the cut glass business, particularly with jewelers handling a fine and rich grade of decorated and engraved glass ware. The Pairpoint Corporation report an especially busy season, and to meet the demands now made on them have introduced a large number of new cuttings and new pieces at their New York salesrooms, 38 Murray St. These include six new patterns in bowls, two of which show handsome variations of their well known bull's-eye and prism design. A number of the new vases are in large sizes and show some unique features in overlapped lens cutting. Wide mouthed pitchers are now here in a great variety in quart, three pint and two quart sizes, and show not only many variations in shapes but all the principal cuttings which the company are now running.

RICH EFFECTS IN POUYAT CHINA. THE striking feature of this year's display of samples of the Pouyat Limoges china lies in the richness and variety of the assortment. The collection shown by the New York agents for this ware, Paroutaud & Watson, 50 W. Broadway, is superior in these respects to any line of Pouyat china ever before imported, not excluding the first displays made by this firm that were noted for their unusual richness. Bands still play a prominent part in the decoration and run from the daintiest flower effects to the rich inch gold bands decorated in many ways. Monochrome bands are also shown in many

colors. Plates, as usual, form the line of greatest interest to jewelers, while in addition there are an excellent assortment of vases and plaques and a host of small novelties particularly adapted to the needs of this trade. Strong colorings are prominent, while the art nouveau influence is more strongly shown in this display than in that of any other French china on the market.

GESSOART WARE AND SMALL NOVELTIES.

THE increase in the making of Oriental and cozy corners has given rise to a demand for masks and heads in colored terra cotta which L. W. Levy & Co., 194 Broadway, New York, are now calling to the attention of the jewelry trade. These are in the firm's Gessoart ware and show a perfection in coloring and detail equal to imported terra cotta. In addition to the Gessoart, this concern are now offering new assortments in the many art lines which they import for the jewelers, especially in French china decorated by American artists, electrical bronzes, beer steins and small novelties suitable for the stock of the jewelry stores at Summer resorts.

THE RAMBLER.

The Prussian Crown Treasures.

THE gold and silver treasure of the Royal House of Prussia, which the Kaiser permitted the participants of the Goldsmiths' Day at Berlin (held from Nov. 1 to Nov. 4) to inspect, has a history of incredible magnificence, which excels a hundredfold all former representations of the wealth of silver and gold vessels, etc., which Frederick the Great is said to have found in evidence at his ascension to the throne.

This great treasure represents a respectable number of millions of dollars. The visitor of the Royal castle is familiar with the large silver buffet in the "Rittersaal," and whoever has had an opportunity to see a royal gala dinner table knows the costly wedding presents of Emperor William II. and his father, as well as the wealth of gold and silver show pieces.

But very seldom a chance is afforded to view the valuables, which are kept in the fireproof rooms of the Royal castle. There lies a stone of enormous value, of whose possession the royal Prussian house can justly boast, viz.: the well known "Regent" or "Pitt." This diamond,

weighing 136½ karats, is of the first water; it is square in shape with rounded-off corners. It has a remarkably fateful history. The Duke of Orleans, prince regent of France, bought it from Pitt, an Englishman. At the time of the French Revolution it was pawned with a Berlin merchant named Preskow. Later it was used by Napoleon I. as a pommel and finally taken as booty by the Prussians in the battle of Belle Alliance (Waterloo). That there are many other large diamonds in the Prussian royal treasure hardly requires mention.

What is remarkable in this collection, however, is the large number of pieces of jewelry from the time of the Renaissance, the flowering period of German goldsmithing. They are old heirlooms or else have been found in the burial vaults of the Cathedral in various coffins of the ancestors of the Prussian dynasty.

One of the coffins contained, wrapped in a black velvet cloak, a skeleton, around whose neck was wound a chain with pendants, while the mantle was covered with large pins in the form of rosettes. This trinket, wonderfully worked in gold and enamel, is a masterpiece. The chain and many other pieces of jewelry found in the coffins were incorporated with the crown treasure on the instigation of Crown Prince Frederick William, subsequently Emperor Frederick III. The crown treasure includes another chain, the links of which consist alternately of interlaced hands of white enamel and the lozenge shield of Saxony in gold, with similar lozenge shaped pendants. The whole is of exceedingly delicate workmanship and of marvelous effect. Very beautiful is an ear pendant representing a mermaid making music, in flesh tint enamel, whose double fish tail is in green enamel. In the division of the tail shines a pearl. Quite wonderful is a large quadrilateral brooch with a sapphire in the center surrounded by deep blue enamel, while the rest is executed in blue, red and green enamel and set with symmetrically placed pearls. A large brooch-like button shows a white enameled flower, whose chalice is formed by a ruby reposing on two crossed golden scepters, terminating in round pearls, while three green enameled rose leaves are inserted on the side and below, a large, pendant pearl concluding the piece. Among some other buttons there is a triangular one with blue enamel and pearls, and a rosette shaped one, divided by five blue enameled radial stripes, both of exquisite workmanship. The treasure embraces many more pieces of immense value.

THE JEWELRY REPAIRER'S HANDBOOK.

BY JOHN G. KEPLINGER.

Copyright by THE JEWELERS' CIRCULAR PUB. CO., 1901.

(Commenced in issue of Feb. 6, 1901.)

SPECTACLE AND EYEGLASS FRAME REPAIRING.

(Continued.)

THEN when the ends are in the right position, blow an easy, steady flame onto the edges, and heat as little on either side of the joint as possible—until the solder flows through and around the break. As soon as the solder flows stop blowing and pour pickle over the joint, which will remove the borax and fire coat. A pair of spectacles should never be allowed to lie in or be dipped into the pickle bath, as the acid will attack the steel rivets and screws and cause the gold to become coated very red. One can easily see that the latter method of soldering would be difficult for the beginner, but after some practice it can be mastered by any persevering workman. The reader also can see that this way of soldering is very rapid and useful for soldering the eye wire, no matter where broken; for soldering on broken off joints or end pieces, in which case the end piece is perfectly cleaned and the solder is laid on the eye wire, which has been moistened with the borax paste. Then the frame is held in the left hand and the end piece in a pair of tweezers is held in the right hand, and, with the blow pipe between the teeth, the work is easily and quickly done. Side pieces are held in the same manner to be repaired.

The question has often been raised as to the best way to repair broken side pieces. Some repairers place ferrules over the broken parts and solder with soft solder. This is a questionable practice and is condemned by every workman who takes pride in his work. Others claim that to file the ends off even and to solder, after which the solder is allowed to remain so that the break will be in the middle of the circular lump, is the best way. This is a very good way, but our experience has shown us that the best joint in

side pieces is made by beveling each end so that the ends will overlap and at the same time retain the thickness of the side piece. Then, after soldering, the surplus solder is filed off nicely, so that it does not have a lumpy appearance. Of course, we do not mean to file the solder off entirely, but just sufficiently to make it an even swell and not an unsightly lump. The beginner should remove side pieces to repair them, but more advanced workmen can solder a break three-fourths of an inch or less from the end piece by holding the frame in his fingers.

All spectacle frames, whether gold, gold filled, silver, steel or alumnico, are soldered in the same manner as the gold frames. The steel and alumnico frames have the fire coat and borax removed by filing and scraping instead of being cleaned in pickle. The solder used on gold filled frames is the same as used on gold ones, but silver solder or fine brass wire is used for repairing steel spectacles. Alumnico frames are soldered with silver solder.

When the frame is repaired and cleaned with the pickle wash it with water and dry with a rag, which should be kept about the bench for that purpose. The frame is now ready to be trued and straightened—that is, the middle of the end pieces and the axes or centers of the lenses should be in a straight line, and the planes or top surfaces of the lenses should be in a straight line also. It is very important that the side pieces be similar in curve and shape as well as length, and when lying on a flat surface the curves should lie evenly upon it.

The cards which wholesale and manufacturing opticians issue for determining the pupillary distances of lenses are very useful as straight edges or guides for truing up the end pieces with the axes of the lenses. A simpler and quicker method for the jewelry repairer is to use a saw blade, securely fastened and taut in the saw frame, as a straight edge, which can be laid on the top of the frame, and is more satisfactory than the method of laying the frame on the line of the card. The correctness of the planes or top surfaces of the lenses can be determined by the eye, looking from one end piece to the other.

To slope the side pieces hold the frame by the end pieces—with the side pieces curving upward—between the thumb and forefinger of the left hand; and, starting near the end piece, move the fingers toward its extremity, with it between the thumb and forefinger of the right hand. Should it be desired to increase the curve move the forefinger slightly in advance of the thumb. To decrease the curve the thumb should be in advance.

Frameless spectacles are the most difficult ones to true up properly, because of their liability to break. Care should be taken that there is no strain on the glass anywhere, and especially at the straps which steady the glass. Before attempting to straighten frameless spectacles or eyeglasses see that the ends of the straps fit the edges of the lenses perfectly, so that the lenses will be firm. Then care should be taken that the screw will not draw upon the lens too tightly; if so, it should be taken out and the end of the strap bent slightly or the hole filed somewhat, and the screw again inserted. If this were not done the lens would be liable to break at any time.

(To be continued.)

THE JEWELERS' CIRCULAR

AND HOROLOGICAL REVIEW.

AND THE JEWELERS' WEEKLY CONSOLIDATED

Copyrighted 1901 by THE JEWELERS' CIRCULAR PUB. Co. Corbin Building, 11 John St., Corner Broadway, New York. Entered as second-class matter at the New York, N. Y., Post Office.

32D YEAR. NEW YORK, WEDNESDAY, APRIL 17, 1901. VOL. XLII. No. 11.

THE SILVER SERVICE OF UNCLE SAM'S "ILLINOIS."

THE silver service which the citizens of Illinois are to present to the battleship named after their State is among the most chaste examples of art in American silver working ever presented to a vessel in the United States Navy. The pieces are

admired for the simplicity and the purity of design, there being no attempt to spread ornamentation or to add any effects not in keeping with their pure Colonial outline. As THE CIRCULAR - WEEKLY published last week, the set, as accepted by the committee, consists of 10 massive pieces, comprising a large and a small punch bowl, two ladles, one large and two small cake dishes, two candelabra and one tray. The pieces are

bowl, but serves to give an excellent idea of the artistic character of the entire set. The bowl, as are in fact all the pieces, is exceedingly heavy and massive and is in bright finish with the exception of the inscription panel. The outer edge has a

tion in raised letters. There also appears the shield of the Navy Department, while on the opposite outside surface are the arms of the United States. These coats of arms appear on each piece of the service. The base of the bowl rests on a Grecian cap, which has the fluting and modeled wreaths. The handles curve gracefully from the bottom of the bowl several inches above the rim, falling to it so that the tangent forms the means of support. These are fluted and modeled.

ONE OF THE PUNCH BOWLS OF THE BATTLESHIP "ILLINOIS" SILVER SERVICE.

The punch bowl tray has a diameter of 25 inches, its edge being fluted and festooned with wreaths, as is the bowl rim. These decorations are found on each individual piece of the service. The ladles have fluted stems, with the handles modeled

differing only in the size, the larger being 20 inches in diameter, 17½ inches high with a capacity of 12 gallons, and the smaller being 14 inches in diameter with a capacity of four gallons. The illustration on this page is from a photograph of the smaller

deep fluting broken with the classical draperies so familiar in Colonial designs. Running far enough down to break the general plainness of the bowl are festooned wreaths hanging from the fluting. In the center of the rim is a plate which bears the inscrip-

on the same general lines as the other pieces. The bowls are punch-shaped and lined with gold. The candelabra are among the handsomest pieces of the service and are also among the most graceful. They have seven lights and their main

standards are shaped like Etruscan vases, from the mouth of which spring the center arms from which the other branches radiate. Each branch is fluted, as are the individual sockets. On one side of the standard is the National, on the other the State coat of arms. The candelabra are 18 inches high. The epicurean bowl is a large, oval shaped open dish intended for divers uses for table ornamentation. Its base is the Grecian cap, with fluting and festooning, from which it flares upward and outward, making a deep flange, which forms the wide rim. On this rim are the coats of arms and other decorations which beautify the punch bowl. The fruit dishes are made on the same design, but smaller.

The plans for this set were selected last December and work on the pieces was begun last January. The order for the service was given to Stevens, Wallace & Co., Chicago, and the pieces were designed and made by the Whiting Mfg. Co., New York. The presentation will take place at Newport News on April 25 and will be witnessed by President McKinley and Cabinet, Governor Yates and staff, the members of the committee and several of the contributors.

Debate on the Trading Stamp Question in the Ontario Legislature.

TORONTO, Can., April 6.—The trading stamp question was debated at length in the Ontario Legislature, on the 4th inst., when Mr. Graham moved that the House go into committee on his bill authorizing municipalities to abolish the use of trading stamps.

Mr. Reid moved that the committee rise, the effect of which would be to throw out the bill. Mr. Carscallen, who characterized trading stamps as a fraud on the trading public, against which petitions had come in from all parts of the province, objected to the local option principle of the bill and would like to see the Legislature prohibit them by a definite general act. Mr. Graham, the promotor of the bill, said he was quite willing to go that length, but the

bill had been prepared by the Retail Merchants' Association, acting under the best of legal advice. Hon. Mr. Stratton, Provincial Secretary, believed in giving the municipalities the right to decide whether they wanted trading stamps or not.

Mr. Whitney, leader of the Opposition, deprecated the tendency to shove the responsibility in such matters upon the municipalities. If the system was wrong, and it was necessary to interfere with the right of private contract to suppress it, it should be done by the Legislature. Premier Ross approved of the local option principle. Its adoption would certainly be preferable to dropping the matter altogether. Mr. Reid urged that action in the matter be delayed for a year, as no harm could come from the postponement.

After several other members had spoken, Dr. McKay urged that the very fact that the legal representatives of the stamp companies had stated that the latter were willing to give up on condition that they were allowed time to get out of business was a practical admission that their trade was an illegitimate one. As such it should be suppressed. The committee reported progress, it being understood that an amendment to the bill will be presented, dispensing with the "local option" feature and providing for the absolute suppression of the traffic.

A thief broke the front window of Franzen's jewelry store in East Dubuque, Ia., recently, grabbed all the articles in sight and started on a run down the main street, but was immediately arrested.

SPRING FASHIONS.

A LADY'S RAMBLES AMONG THE JEWELERS.

An Indian arrow head chipped out of turquoise matrix and mounted with gold is one of the most taking bits of originality, in the way of a pendant, that the Easter season brought out.

The almond and the walnut perfectly modeled and life size, in silver and in silver gilt, represent other new attractions in the ever popular pendant. They open in the middle and may contain a tiny powder puff, a mirror, pin cushion or the like.

Easter witnessed the continued prevalence of gems and precious metals in the feminine costume; and not for many years have men been so free, as far as fashion's dictates go, to indulge a taste for rich and elaborate jewelry.

The Spring's new soft silk belts are very wide and buckles are large and bold in design, exploiting in greater part Egyptian motifs and nouveau art floral styles in shaded silver and gold.

Some of the latest gilt buckles achieve a color so high that it is almost an orange red, a result more unique, perhaps, than essentially attractive.

Watch fobs of half a dozen colored stones, each one encircled by a rose gold

serpent and all closely linked together, strike a popular note in color and design.

An open face watch of dark green enamel edged with small whole pearls is attached to a winged heart brooch of the same enamel, surmounted by a crown of pearls.

Sword brooches have a removable sheath fastened to the hilt with a tiny chain set with pearls or brilliants.

Light green enamel presents itself very strikingly in connection with rose gold in lorgnettes; and the lorgnette, regardless of eyesight, gives the last touch of all that is chic to a fashionable costume.

A beautiful banquet ring consists of a large oval opal surrounded by a line of olivines whose peculiar soft green harmonizes with one of the tints of the center stone; and beyond these is a row of brilliants which enliven the otherwise subdued effect.

A most striking new belt is a flexible band woven of bright silver wire with a large grey silver buckle.

Women are taking amazingly to the watch fob in its most masculine aspect.

The jeweled feather is an artistic and favorite motif in ornaments.

ELSIE BEE.

SILVER SMITHS,

WALLINGFORD, CONN.

"1835-R-WALLACE"

Stamped on an article of Silver-plated ware is a guarantee of worth and quality.

Every dealer, when selecting a line of plated ware, always has in mind two leading qualities, and these usually are durability and design, as these are the ones on which most depends his reputation as a dealer in honest ware.

Our goods are made of the highest grade of Nickel Silver, plated with FINE Silver. Our extra, or A 1 grade, is plated 20 per cent. heavier than the regular standard. Triple and sectional plates are also carried in stock.

In designing patterns we endeavor to select only such as are graceful in outline and thoroughly artistic in decoration, and which conform most closely to the taste of a discriminating purchaser, which our long experience enables us to do.

Our line consists of the following patterns: Tipped, Fiddle, Windsor, Shell, Joan, Virginia, Astoria, Stuart and Anjou.

Any dealer who is not already familiar with our line will find it much to his advantage to write for Catalogue and discounts.

THE "STUART"

Reigning Fashions in Paris.

PARIS, March 15.—In the artistic exhibitions in the shop windows of our leading jewelers, belt buckles are still playing a prominent part. In fact, these charming articles are among those in the production of which the ingenuity of manufacturers of jewelry is given free rein. Among new and tasty patterns in this line I noticed the two specimens herewith illustrated, which strongly appeal to the artistic sense. They are of enameled matt gold. No. 1 has for *motif* a tulip branch

NOS. 1 AND 2—BELT BUCKLES.

whose flowers and leaves are happily treated, while No. 2 represents handsomely wrought reeds. No. 3 is an artistic and original cloak clasp of old silver. It is in the form of a snail and at either end is a graceful iris flower, very elaborately

NO. 3—ORIGINAL CLOAK CLASP.

chased. No. 4 is a quite new and beautiful fan holder of oxidized silver. It consists of a big hook to be fixed to the waist and representing a large lily whose petals are widely outspread. This hook is

NO. 4—FAN HOLDER.

fitted with a chain from which to suspend the fan.

A popular and becoming necklace is one composed of five rows of cut jet, kept up by small bars of strass.

Fancy buttons, which play so great a part in the feminine dress, come in the most varied forms, and curiosity shops are being ransacked for authentic and historical ornaments of this kind. The

latest ones are made of light tortoise shell, adorned with a graceful foliage thickly studded with brilliants. The cocks of ancient watches are also much used to make original and charming buttons. These cocks, which are of burnished copper, are very finely wrought. They are mounted on mother-of-pearl and in their center is set a small turquoise or garnet.

Among the most popular fads of the moment are hair clasps or barettes of plain or chased matt gold. The sketches here show the latest creations in this

SPECIMENS OF BARETTES FASHIONABLE IN PARIS.

line. The last is particularly effective, it being of matt gold elaborately chased and representing a mistletoe branch whose berries are fine pearls.

Besides the popular belts of gold ribbon with gold plates, there are belts of metal work with blended tones of gold and bronze, which are the acme of elegance. As an example I will mention one having reproductions of the eyes of peacocks' tails, very artistically executed. The plate of this dainty belt represents peacocks' feathers in enamel.

A pretty novelty is the fancy jewel worn as a corsage or collar ornament and consisting of a small bar of brilliants from the middle of which start two short chains of gold and fine pearls. From these are suspended exquisite charms, such as tortoisés of emerald and diamond, or bees of ruby.

Costly and delightful hand bags are of green leather with square mountings in the Empire style. They are framed by symbolical laurel wreaths and are delicately ornamented with gold bees in relief.

A style widely prevalent among fashionable women consists of wearing, at the theater, fans with tortoise shell mountings. When closed these new fans have the appearance of bunches of flowers and when outstretched each branch represents a stem loaded with flowers from which escapes a perfume.

**Clocks for the U. S. Public Buildings
East of the Rocky Mountains.**

WASHINGTON, D. C., April 11.—The Treasury Department is inviting sealed proposals until May 4, 1901, for supplying to United States public buildings under control of the Treasury Department east of the Rocky Mountains, as the requirements of the service may demand, during the fiscal year ending June 30, 1902, the following described clocks:

Eight day, pendulum, or electric wall clocks, with 12 inch dials, of standard make; frames to be of oak, cherry or walnut. No stated form of proposal is necessary, but the bids should be explicit in description and accompanied by samples of clocks. Intending bidders desiring any information regarding this proposed contract can obtain same upon application to the Superintendent of the Treasury, Washington, D. C.

**Arrested for Having Stolen Rings, Watches
and Silver Ware.**

BOSTON, Mass., April 8.—Amelia Bacall, dealer in old gold and silver, 16 Avery St., was held in court on Wednesday in \$2,500 for the action of the Grand Jury. At the time of her arrest the woman's store was searched and the police claim a lot of stolen property was found there. More property, so it is said, was found at the residence of her brother-in-law, some more at the home of Edward Crawford, 18 Greenleaf St., Roxbury, and still more at the woman's home, 9 Milford St. The value of the property recovered is about \$1,000 and consists of rings, watches and silver ware. The police claim it was the intention of the Bacall woman to melt this property and then sell it in bulk.

A recent order of the Superintendent of Police, requiring all dealers in old gold and silver to procure licenses and to make daily reports to the police of their business during the previous 24 hours, was sent out because of just such business methods as it is claimed were indulged in by this woman.

**W. A. England Offering to His Creditors
60 Cents on the Dollar.**

WORCESTER, Mass., April 8.—W. A. England, 394 Main St., whose doors were closed last week, to-day, through Blackmer & Vaughan, his counsel, offered 60 cents on the dollar to his creditors. The proposition is to pay 20 cents in cash, 20 cents in four months and 20 cents in six months. Over one-half of the number of creditors have accepted this offer, including the attaching creditor.

Carl J. von Seutter succeeds Elisaeus von Seutter, Jackson, Miss., who recently died.

The Diamond Markets.

AMSTERDAM, April 4.—The market here had no animation during the week. However, several buyers were present, among them a couple of Americans, who are always the best business men. They bought several lots of m \acute{e} l \acute{e} es. As per information arrived from New York, several buyers are arranging to make their trips to Europe. There is a good demand for first sorts of brilliants, but the fine qualities of diamonds, such as Jagersfontein and Bultfontein, are very scarce and high prices are offered.

ANTWERP, April 5.—Notwithstanding the Easter festivities the Antwerp diamond market shows a certain improvement, as compared with former weeks. The general tone is now rather steady. Offers were made this week from all sides and many foreign firms were represented in the market.

Mr. Herzl, Vienna, who was here last week, continued to make purchases at high prices. America was also represented here. Irving Baum, New York, was at the Diamond Club, while M. Kahn, of L. & M. Kahn & Co., New York, is expected here next week.

Rough remains high. The rumors of an excessive new rise, spread by some newspapers, cannot be verified and they have had small effect on polished goods, which found easy buyers.

LONDON, April 4.—Owing to the Easter

holidays the English gem market was quiet this week. Rough remains unchanged. We have good news from America, France, Belgium and Holland, where the financial position is decidedly good. Bills that matured at the end of March were 'all paid, and the past three months, which were expected to be very bad, have been better for the trade than anticipated.

It is reported here that a New York house will soon open a large diamond factory and that a London syndicate will be interested in it as regards capital.

The following firms were represented here this week: Bernard Meeussen & Co. and Smets & Co., Antwerp. They made large purchases in rough goods. The latter firm bought especially light yellow stones of low and medium qualities.

PARIS, April 5.—A marked improvement came in the Paris gem market the beginning of the week. Several transactions were made in fine brilliants, roses and flat goods. Pearls are very firm and Tiffany & Co., New York, have recommenced their purchases in a large way. Several American houses made offers to owners of pearls, but owing to the firmness of the pearl market business was not heavy.

It is remarked that very white pearls are preferred in the northern countries of Europe. In Russia, Germany and Holland the pearl luxury is in vogue. The southern countries, on the contrary, take to jewels composed of fine colored stones. Pearls, of course, are also in vogue in Spain.

J. F. McKay's Business Troubles Still Complicated.

DERRY, N. H., April 11.—No new developments have been apparent in the case of John F. McKay, jeweler and optician. His store remains closed and in the care of deputy sheriff C. A. Norton. Mr. McKay is said to have made a settlement with the mortgagee, John Folsom, on Sunday, but since then two attachments have been placed on the stock, one by Dr. D. S. Adams, of Manchester, N. H., and another by Olive D. Myers, of Derry. The case now is somewhat complicated and it is uncertain what the outcome will be.

Crook Who Robbed Michie Bros. Recently Arrested in Nebraska.

CINCINNATI, O., April 3.—Prentice Tiller, recently arrested for mail box robbery, in Hastings, Neb., has been identified by Cincinnati police as one of the men who robbed the store of Michie Bros., 11 years ago. With a companion named Burns he entered the Michie jewelry store and asked to see a tray of diamonds. No sooner had the tray been placed upon the counter than Tiller grabbed it and rushed out the door, followed by Burns, who closed and held the door from the outside until his companion had made his escape. Burns failed to get away and was arrested and given seven years in the penitentiary. Tiller is 41 years old and has spent 10 of the last 20 years in jails. He has operated in many parts of the country.

Suspicious Proceedings of a Trio of Alleged Show People.

LYNCHBURG, Va., April 10.—Several weeks ago two men and a woman, claiming to belong to a theatrical company who were on the road stranded, came to this city and put up at the Carroll hotel. The men, one very large, probably six feet two inches tall but thin, and the other short but heavily set, called on several of the jewelry houses and tried to raise money on a large lot of very fine diamond jewelry. They stated they had hard luck and wished to pawn the jewelry for only a short while, and were willing to pay heavily for the accommodation. They could not get the money from the jewelers, as pawnbroking was not in their line of business, but were referred to a pawnbroker and they succeeded in raising about \$700. They stated that the jewelry they had was worth \$2,500 and they invested in it when in luck, because it was easy and safe to carry. A description of the jewelry pawned here is about as follows:

One bracelet, 28 diamonds, mounted in platinum, manufactured by Wise, of Brooklyn; the stones are of fine quality and good size; one Jules Jürgensen watch, 18-size, 18k. hunting case; one gold open face watch, 18k., 18-size stop watch; one finger ring of fine Siam ruby, fine color and perfect; one solitaire diamond ring, about four karats, off color, valued at \$600; one Princess ring, turquoise center; one Princess ring, Siam ruby, fine quality; one-third karat ring, diamond center, ruby and sapphire on each side; one diamond locket, Roman finish, fine quality stone.

They also had in their possession one gold stud, with diamond of about seven karats, but it was badly feathered, though of good color; also one large unset diamond off color.

The pawnbroker let them have \$700 and they stated they might be back the next week; if so they were to pay him \$50 bonus. If they did not come back soon, they would pay him \$80 per month interest. So far as can be learned, they have not been heard from since. The men gave their names as Blake and stated they came from New York. The police have a full description of the men and jewels.

F. A. Reeves, who was burned out at Glen Gardner, N. J., on March 24, is now at High Bridge, N. J.

Death of Claes A. Estberg.

WAUKESHA, Wis., April 11.—Claes A. Estberg, of C. A. Estberg & Sons, died yesterday, aged 76 years. He was stricken with paralysis last Sunday and did not regain clear consciousness.

Mr. Estberg became connected with the jewelry business in boyhood, when he entered the store of his father, in Stockholm, Sweden. He went to Germany, where he continued in the business until 1850, when he came to the United States and began work at his trade in New York. In May, 1854, he came to Milwaukee and was employed in the store of A. B. Van Cott until he removed to Waukesha, in 1858, and had been a jeweler and watchmaker here for 43 years. Of a quiet and unassuming disposition he always was averse to office holding, yet he was chosen to various school and township offices. He was long a member of the Masonic order and a warden of the Episcopal Church of this city. He was married in Grafton, Ozaukee county, Dec. 25, 1855. The couple have had four sons. Two have been associated with him in business for a number of years, a third is a druggist and the fourth is assistant cashier of the Waukesha National bank.

Indicted for Perjury and Awarded a Patent the Same Day.

DIXON, Ill., April 10.—Albert Davison, jeweler, who is confined in the Cook county jail, in Chicago, awaiting the action of the United States Court in his bankruptcy case, has been granted a patent on a wire stretcher. This patent may be the means of rescuing Davison from the slough of despond into which he has been plunged by his many troubles. The patent was granted by the United States Government on the same day that he was indicted for perjury by a United States Grand Jury.

Death of Frederick W. Pelton.

LOWVILLE, N. Y., April 8.—Frederick W. Pelton, who came to Lowville from St. Louis, about two years ago, to make his home with his daughter, Mrs. D. A. Fitch, died Thursday, aged 77 years, 11 months and 5 days. Mr. Pelton was born in Connecticut, in which State he was for some time engaged in the manufacture of silver ware. Later he went to St. Louis, where in company with his brother, Oliver Z. Pelton, he for several years conducted a silver ware manufactory. Owing to poor health he retired from business two years ago and had since resided in Lowville.

Final Settlement of Estate of Charles H. Schiller.

UTICA, N. Y., April 10.—The estate of the late Charles H. Schiller has finally been settled, after some delay due to the Court. Various claims were allowed, the largest being that of Mrs. Schiller for \$24,726. The net balance to be distributed among those entitled to it is \$8,852.

Jeweler Sells His Business to Enjoy His Father's Fortune.

MARSHFIELD, Wis., April 8.—Ferdinand Hirzy, who has been a jeweler here for many years, has received the intelligence that his father died in Germany, leaving him a fortune. He has sold his business and will leave soon for his native country.

Suits Among Jewelers in Arkansas Court.

LITTLE ROCK, Ark., April 5.—In the Circuit Court, in session here, the following jewelry cases came up:

The Vincennes Jewelry Co., Vincennes, Ind., through their attorney, C. S. Collins, filed suit against the Bayless Jewelry Co., of this city, for \$408.85, alleged to be due for goods furnished.

The L. Bauman Jewelry Co. vs. A. E. Colburn; motion for new trial sustained unless remittitur of \$95 is entered; remittitur entered and motion overruled.

Cable dispatches from Manila say Aguinaldo is buying diamonds and jewelry. Perhaps he is going into the business. If some American house should secure him for their representative in the Philippines, what a card it would be!

L. M. Barnes, North Adams, Mass., is now in his 35th year of continuous business in one store in that city. He began business with bench room in a window corner. Now he has one of the finest jewelry stores in North Adams, with all the modern attachments and facilities.

Alford, Stern, Abbott, Champenois, Kroeber and Brown, of the committee. The following new members were admitted:

F. M. Reiche, Los Angeles, Cal.; Nathan Phillips, Seattle, Wash.; A. L. Ott, San Francisco, Cal.; Isaac Lurie, Seattle, Wash.; S. A. Andrews, Tacoma, Wash.; Taylor & Berlovitz, Newburgh, N. Y.; Parritt Jewelry Co., Bloomington, Ill.; George W. Hoyt, New York; J. Forester, Billings, Mont.; F. C. Ewert, Woodland, Cal.; John A. Brightman, Southbridge, Mass.; Harry Silver, Seattle, Wash.; S. Robinson & Co., Boston, Mass.; G. L. McCloskey, Renovo, Pa.; J. L. Duke Jewelry Co., Fayetteville, Ark.; E. C. Rogg, Jr., Hoboken, N. J.; D. P. Paul, Norfolk, Va.; Charles G. Hamelin, Tacoma, Wash.; Samuel Friedlander, Memphis, Tenn.; R. C. Bernau, Abbeville, S. C.; G. S. Bauder, Elburn, Ill.; V. Schopperle, Oil City, Pa.; J. R. McCrary, Farnhamville, Ia.; O. R. King, Lexington, Ky.; A. B. Jones, Stuart, Ia.; F. K. Baier, Salina, Kan.; A. M. Felson, Gouverneur, N. Y.; The Underwood Jewelry Co., Kansas City, Mo.; C. A. Swanson & Co., West Superior, Wis.; John M. Clower, Clarendon, Tex.; Mawhinney & Ryan Co., Omaha, Neb.; Ralph Wickliffe, Arkansas City, Kan.; Jewett & Co., Houlton, Me.; Huber Bros., Dillon, Mont.; Curran Bros., Zanesville, O.; J. B. Whitlock, Eufaula, Ala.; Norton-Paulson Jewelry Co., Kansas City, Mo.; Mrs. H. F. Steck, Washington, Ia.; Averbek Co., Clarksville, Tenn.

Death of F. G. Stark.

HANOVER, Pa., April 12.—Frederick G. Stark, of F. G. Stark & Son, of this place, died yesterday afternoon, aged 66 years. Mr. Stark was a skilful watchmaker and an artistic engraver. In 1859 he went to Europe, working for some years at his trade in the principal cities of Germany and Switzerland.

Burglars entered G. L. Lull's jewelry store, Owatonna, Minn., April 9, and took about \$75 worth of rings and watch chains.

Death of Edwin B. Horn.

BOSTON, Mass., April 15.—The Boston trade were shocked to learn to-day the death, Saturday afternoon, of Edwin B. Horn, of E. B. Horn Co., 429 Washington St. He had been ill for a long time and 14 months ago was compelled to retire from business on that account.

Mr. Horn was born in Boston, 55 years ago, and at an early age entered the jewelry establishment of his father at 39 Hanover St., as a clerk. On the death of the elder Mr. Horn the business passed into the hands of his son, who removed the stock to the Washington St. store, where the business is still carried on. In 1881 Mr. Horn established a business as a contractor and builder, and during the next few years built 56 apartment houses in the Back Bay district.

Mr. Horn was not a member of any societies or clubs, but was a lover of home life. He is survived by a widow, three sons and two daughters. The vacancy in the jewelry firm will be filled by the eldest son, Frederick A. Horn.

The Three Men Who Stole Jeweler M. H. Morse's Safe Sentenced.

BOSTON, Mass., April 13.—Before Judge Sherman, in the Superior Criminal Court, yesterday, were sentenced David Werblinsky, Samuel Goldstein and David Werner, the three men convicted on March 16 of stealing a safe from Max H. Morse, the Lowell St. jeweler, during the day time of Nov. 14, 1900. Werblinsky goes to State prison for a term of seven to nine years, Goldstein six to eight years, and Werner from four to six years.

The first named received the longest sentence because his record was the worst. Goldstein had served time in New York for breaking and entering a store and stealing 1,000 pairs of trousers. There was no record against Werner. Considerable space has been given in these columns to a description of this theft of the safe and its contents and the finding of the dismantled and discarded safe in the Quincy marshes. A small part of \$1,800 worth of property was recovered and \$480 of the \$1,300 stolen.

Where People Buy No Jewelry and Carry No Watches.

OMAHA, Neb., April 8.—The son of R. L. Powers, Grant City, Mo., decided last Fall to go into business for himself and emigrated to a town of 2,500 inhabitants in the extreme southwestern county of Missouri. He is back home again now and will stay in Grant City for a while. In his new location there was but one watchmaker and jeweler, but that one was sufficient. He says the people down there never buy jewelry and few of them carry watches. One evening he was invited out to a party and of 23 young men who were present he was the only one who carried or owned a watch; and none of them wanted to purchase, either. After trying for six months to make them realize their lost condition, he gave it up in despair and returned home.

A. Sommer, Wichita, Kan., has decided to close out her jewelry stock.

Acquisitions of the Newly Incorporated Wm. A. Rogers, Limited.

The Wm. A. Rogers, Limited, who, as recently told in THE CIRCULAR-WEEKLY, have been incorporated under Canadian laws with a capital of \$1,350,000, have taken over the business of Wm. A. Rogers, New York, and the Niagara Silver Co., Niagara Falls, N. Y. They have also acquired the plant of the E. E. Wood Cutlery Co., Northampton, Mass., and that of the Rogers & Wood silver plate company, of the same place, and are about to acquire a hollow ware factory. They have now the spoon factory of the Niagara Silver Co., New Bedford, Mass., and also the factory at Niagara Falls.

The salesrooms of Wm. A. Rogers, 12 Warren St., New York, are being greatly

enlarged to display the product of the new company, and in addition to the second floor formerly occupied the company have taken the third floor of both Nos. 12 and 14, which will be used as stock rooms. They intend to make their salesrooms the most attractive for displaying silver plated ware in the city.

E. E. Wood, of the E. E. Wood Cutlery Co., will now retire from business, while E. E. Wood, Jr., of the Rogers & Wood Co., will become a superintendent for the Wm. A. Rogers, Limited.

Burglars entered the storehouse of Ponseees & Manor, Purvius, La., last week, and carried away two or three hundred dollars' worth of jewelry and dry goods.

Higher Prices

for Diamonds are certain to come and it is wise to arrange one's affairs so as to profit by them. In this we can render great assistance either from the home office or through our travelers. We are offering a large stock of

**Death of a Noted Authority on Horology,
Rev. H. L. Nelthropp.**

LONDON, England, April 5.—The Rev. H. L. Nelthropp, who died on March 22, at Norwood, London, aged 80 years, was a widely known authority on clocks and watches and twice master of the Clock-makers' Company, London. His valuable collection of clocks and watches belonging to that company is exhibited at the Guildhall, London. He was the author of the standard work on horology: "A Treatise on Watch Work; Past and Present."

Editorially the *London Watchmaker, Jeweller, Silversmith and Optician* says of the Rev. H. L. Nelthropp:

"For several months the Rev. H. L. Nelthropp had been suffering from an illness which terminated in a peaceful manner on the 22d ult. Always cheery to the last he sent a message of good will and hope to the Chairman and the inmates of the Clock and Watchmakers' Asylum, so recently as the 9th ult. But his friends knew that his age and somewhat enfeebled constitution were against recovery and feared the worst. The deceased gentleman was educated at Trinity College, Cambridge. One of its oldest members, he paid frequent visits to the college and took a particular interest in its magnificent library. He was always delighted to act as a guide to his friends and we can call to mind the pleasure we had in going round with him and listening to the anecdotes of the larks which he and the friends of his youth practiced. It is not as a clergyman, an antiquarian or a lover of art that the Rev. H. L. Nelthropp will be remembered but, like Lord Grimthorpe, for the active and life-long interest he took in horology. His writings were well known and are to be found in the libraries of every keen horologist throughout the world. But we in Great Britain, and London in particular, have a lasting memorial of his work in the interest of horology, and his great ability as a collector, in the admirable historical collection of watches—the result of half a century's thought and labor—which he presented, some few years ago, to the Clockmakers' Company for exhibition in the London Guildhall; and it came somewhat as a blow to the donor when some roughs purloined some of the treasures. It is to be hoped that the reverend gentleman has left a diary or some notes

of his travels, for not only would they form interesting reading from the standpoint of the horologer but would contain a number of delightfully strange stories which the deceased gentleman could always recount, concerning the items forming his collection, in a most delightful manner. He will be sadly missed not only by his intimate friends—and he had a large number in the city of London—but by a very large body of watchmakers who only occasionally came in contact with him. His charming manner always impressed them and for our own part we would paraphrase the statement of an old inmate of the Watchmakers' Asylum, in which Mr. Nelthropp took so much interest that 'he not only knew how to keep accurate count of time but, better than most people, how to use it.' He was a splendid example of the grand old English gentleman."

**Annual Banquet of Philadelphia Branch
of The Jewelers' League.**

PHILADELPHIA, Pa., April 13.—The annual banquet of the Philadelphia Branch of The Jewelers' League of New York was held last night at Robert Tagg's Maennerchor Hall, 717 Fairmount Ave. Forty-five people enjoyed an excellent menu. Speeches were made by C. B. Bishop, of the National Optical Co., T. B. Hagstoz, A. Sickles, W. F. Harper, B. H. Lyon and W. Mayhew. The menu was as follows:

- Planked Shad, Whole Boiled White Potatoes.
- Roast Turkey, Apple Sauce. Saratoga Potatoes.
- Chicken Croquettes and Peas.
- Cold Beef Tongue.
- Lettuce (French Dressing Separate).
- American Cheese and Crackers.
- Assorted Cakes. Ice Cream.
- Coffee. Cigars.
- Celery. Olives. Pickles.

The following were the guests of The League: Elwood Bailey, W. H. Bovard, R. E. Pinkstone and Mr. Boyne, W. F. Michael and H. B. W. Michael, W. G. Blair, W. H. Long and W. Quinn, S. Kind, Hy. Euler, C. Heineman, H. Crawford, B. H. Lyon and Mr. Whitechurch, A. Sickles, Horn-Davis and H. Barry, P. H. Rosenthal, W. F. Harper, W. Mayhew, F. A. Davis, J. Stenler, T. B. Hagstoz and son, W. H. Dotter, C. B. Bishop and Mr. Lenoir, H. L. Heffern, J. W. Barry, Westford Warner, Jr.

Before the banquet a short business session was held and it was decided to repeat the dinner each year on March 21.

Tariff Decisions & Regulations.

WASHINGTON, D. C., April 10.—The following letters of the Treasury Department during the week just passed contain rulings on tariff points interesting to jewelry and precious stone importers:

DUTY ON AGATE.

TREASURY DEPARTMENT, April 9, 1901.

SIR:—The Department is in receipt of a letter, dated the 14th ultimo, from the Attorney-General, in which he states that the Supreme Court of the United States has denied the writ of certiorari prayed for in the cases of the United States vs. Rudolph C. Hahn. * * *

The merchandise in the case of the United States vs. Hahn consisted of agate specimens and articles made of agate, upon which duty was assessed at 20 per cent. ad valorem, as a nonenumerated manufactured article, under the tariff act of Oct. 1, 1890. The importers claimed the merchandise to be properly dutiable as precious stones under paragraph 454 of said act, by virtue of the similitude clause, which claim was sustained by the United States Circuit Court, following the decision of the United States Circuit Court of Appeals for the second circuit in the case of Hahn vs. United States, decided Feb. 28, 1900.

As the denial of the writ of certiorari by the Supreme Court is a final disposition of the case in favor of the importer, you are hereby authorized to forward the usual certified statement for the refund of the duties exacted in excess. * * *

Respectfully,

O. L. SPAULDING,
Acting Secretary.

COLLECTOR OF CUSTOMS, New York, N. Y.

BEADED TRIMMING, JET ORNAMENTS, ETC.

TREASURY DEPARTMENT, April 5, 1901.

SIR:—The Department is in receipt of a letter from the United States attorney for the southern district of New York, dated the 8th ultimo, in which he states that the case of Morris Goldberg vs. United States (suit A, 2196) and the case of Samuel Schiff & Co. vs. United States (suit A, 2178) were decided in the United States Circuit Court on the 9th and 11th of February last.

It appears that the merchandise consisted of certain beaded trimmings, jet ornaments, buckles, butterflies, etc., which were returned by the appraiser as manufactures of glass. The collector assessed duty thereon under paragraph 108 of the tariff act of 1890 at 60 per cent. ad valorem. The Board of General Appraisers affirmed the action of the collector. The Circuit Court held that there was no error in the decision of the Board, except that certain items included in the entries involved were manufactures of paste and metal pins and manufactures of metal not specially provided for.

The Attorney-General advises the Department that he has directed the United States district attorney to acquiesce in the decision of the Circuit Court in these cases. You are, therefore, hereby authorized to forward to the Department the usual certified statement for refund of duties exacted in excess.

Respectfully,

O. L. SPAULDING,
Acting Secretary.

COLLECTOR OF CUSTOMS, New York, N. Y.

Among the decisions handed down the past fortnight by the Board of Classification of the United States General Appraisers, New York, were the following:

Lazarus, Rosenfeld & Lehmann, New York, imported merchandise described as lithographic pictures on paper pasted on canvas, mounted on stretchers and painted over to resemble oil paintings, which were assessed for duty at 45 per cent. ad valorem, under paragraph 322, act of 1897, as manufactures of cotton, but claimed by importers to be dutiable as photos or etchings at 25 per cent. ad valorem, under paragraph 703, or as paintings at 20 per cent. ad valorem, under paragraph 454, same act. No evidence was brought forward to prove these claims and the protests were overruled.

W. J. Talmadge imported one painting on glass intended for Grace church, Sheboygan, Wis., assessed for duty at 20 per cent. ad valorem, under paragraph 454, act of 1897. Claimed by importer to be entitled to free entry under provisions of paragraph 703, same act. As the requirements of the Secretary of the Treasury, set forth in article 350, Customs Regulations of 1892, and article 569,

STAR (★) BRAND

Conduct your business in a progressive but lofty and dignified manner. Stake your reputation on the wares you sell. Sell only such goods as you can bank on.

Over half a century ago, in the old Stone Mill in Waterbury (now entirely surrounded by newer buildings) the ★ **ROGERS & BRO. A-1** brand of flatware first made an enviable reputation for its owners—a reputation that has been steadily growing, and jealously guarded all these years—a reputation that is of great profit to thousands of dealers, through whose hands the goods are being marketed.

That imitations have sprung up is only natural. Some are called "Rogers," others copy designs and styles of packing rather than names or trade-marks. Many so-called makers were unborn till years after the business at Waterbury had reached immense proportions. Their productions are simply imitations—nothing more—and where will you find the imitation equal to the real thing?

★ ROGERS & BRO. A-1 (TRADE MARK) WORKS, WATERBURY, CONN.

At No Other Plant in the Whole World

devoted exclusively to the production of Spoons, Forks, Knives, etc., will you find so large, convenient and complete an establishment as in Waterbury. All the prestige and reputation of the "★ **STAR (★) BRAND**," the accumulation of over fifty years of careful and painstaking rolling, stamping and electro-plating, stand back of every dozen spoons, forks and knives put forth at this time.

EVERY PROGRESSIVE MERCHANT IS INTERESTED

in the advertising matter that is now being furnished dealers selling ★ **ROGERS & BRO. A-1** goods. Send for samples, and the latest abridged catalogue, No. 71E.

INTERNATIONAL SILVER CO., Successor to

Customs Regulations of 1899, had not been complied with, the protest was overruled.

H. S. Gordon and B. Illfelder & Co. imported jew's harps, harmonicas and music boxes, assessed for duty at 45 per cent. ad valorem as musical instruments, under paragraph 453, act of 1897, but claimed by the importers to be dutiable at 35 per cent. ad valorem as toys, under paragraph 418, same act. Following a previous decision, the Board held that all the jew's harps, such of the harmonicas as were invoiced at less than two marks and such of the music boxes as were invoiced at less than 12.17 marks, were dutiable as toys as claimed, and sustained the protests as to such. As to the others, the protests were overruled.

Albert Berger & Co. imported merchandise classified as coquill glass, glass lenses and periscopic convex glass lenses with rough edges and ground to required focus. Duty was assessed at 45 per cent. ad valorem, under paragraph 109, act of 1897, and protest was filed by the importers, claiming free entry as unwrought glass discs, under paragraph 565, same act. No evidence in support of this claim was presented and the protest was overruled.

International Exhibition of Fancy and Leather Goods.

WASHINGTON, D. C., April 15.—Under date of March 20, Vice and Acting Consul-General Westacott transmits the prospectus of an international fancy and leather goods exhibition, to be held at the Prince's Skating Club, Knightsbridge, London, from May 4 to June 1, 1901, under the direction of the British and Colonial Exhibitions, Limited, and supported by a large number of leading people. The Vice-Consul-General requests that an early notice may be given, calling the attention of American makers of fancy and leather goods to the opportunity of exhibiting in this exposition; but the latest date (March 31) on which "applications for space should be sent in," had elapsed before the Vice-Consul-General's report was received at the State Department.

Arrested for Passing Bogus Checks Upon Jewelers in Victoria, B. C.

PORTLAND, Ore., April 8.—J. K. Dahl, alias H. F. Henderson, has been arrested at Victoria, B. C., for obtaining goods with bogus checks. It was at S. A. Stoddard's jewelry store that he began operations. He looked over the watches there and finally picked out one valued at \$33, with a chain, and tendered a check for \$42 drawn on the Royal Bank of Canada. Mr. Stoddard accepted the check and tendered him \$9 in change. He next proceeded to the jewelry store of A. P. Blyth, where he purchased a watch valued at \$20 and tendered another bogus check which was accepted. He then went to the jewelry establishment of A. A. Clayton and purchased another watch in payment for which he gave a check for \$28.

Syracuse, N. Y.

W. B. Hitchcock returned Saturday from a business trip through northern New York. George E. Wilkins sailed on the *Marquette* on March 30, for a tour through Holland, Switzerland, France and England. Mr. Wilkins is expected to return home about the middle of May.

W. O. Halstead, Davis City, Ia., has bought out C. D. Osborne, of that place.

Sale of Oneida Silverware Mfg. Co. Prevented by Injunction.

ONEIDA, N. Y., April 13.—An injunction was served last evening on Charles A. Stringer, of Munnsville, restraining him from selling the tools, manufactured and unmanufactured stock, implements and fixtures of the Oneida Silverware Mfg. Co., Ltd., of this city. The sale was to have been held this morning at 10 o'clock, pursuant to an order of Supreme Court Justice George F. Lyon, of Binghamton.

The injunction was obtained by Sidney W. Moore, of this city, through Risley & Love, of Utica, his attorneys. The order was granted by Supreme Court Justice William E. Scripture, of Rome, and is returnable before him April 27. Harry W. Coley is the attorney for Mr. Stringer and will contest the injunction. About a month ago Mr. Stringer was appointed receiver of the company upon petition of a majority of the directors, including Mr. Moore, by an order of Judge Lyon.

Mr. Moore, who obtained the injunction, has always been prominently identified with the silver ware company and for many years has been the president of the board of directors. He claims in his affidavit on which the restraining order was granted that the other directors have entered into a conspiracy to deprive him of his interests in the company. He also alleges that he was induced to sign the petition for the voluntary appointment of a temporary receiver by misrepresentations.

Muddy Roads and Smallpox Handicap Western Salesmen.

OMAHA, Neb., April 10.—From all over the west comes complaint of handicapped business on account of bad roads, and as an illustration of what a traveling man has to contend with this Spring, F. W. Taylor states that at Leon, Ia., the mud was so deep that it required six horses to draw the stage containing four men from the depot to the hotel. Many of the little towns in the State are obliged to depend upon hand carts for their delivery of goods, the streets being impassable for teams and heavy wagons. But as it will all make good crops for the farmers, none of the business men is complaining, although it injures trade for the time being.

Smallpox continues to retard business in this territory. Mr. Kite, of the Eureka Jewelry Co., Wymore, Neb., states that the disease is very bad in that place. At Afton, Ia., the hotel was quarantined on account of it, and at Creston, Ia., even the depot was quarantined because a woman and child were taken ill with the disease while in the waiting room. This, together with the bad roads, has made trade very light and collections as poor as they could well be.

C. V. Mount, Shenandoah, Ia., has sailed for Manila, where he will engage in the jewelry business. He served in the 51st Iowa in the Philippines. He is 60 years old, but well and hearty.

The Tariff on Watches.

Important Test Cases Tried in the United States Circuit Court.

One of the last stages in the tariff fight between the two branches of the watch trade—the manufacturing and the importing—occurred Monday morning, in the United States Circuit Court, in New York, when the appeals of Hipp, Didisheim & Bro. and Adolphe Schwob, from the decision of the Board of Appraisers, handed down Sept. 27, 1898, was argued before Judge Townsend. The question at issue was the construction of paragraph 191 of the Tariff Act of 1897 relating to watch movements, which is said to have been drafted and inserted at the suggestion of the American manufacturers and reads as follows:

"Watch movements, whether imported in cases or not, if having not more than seven jewels, 35 cents each; if having more than seven jewels and not more than 11 jewels, 50 cents each; if having more than 11 jewels and not more than 15 jewels, 75 cents each; if having more than 15 jewels and not more than 17 jewels, \$1.25 each; if having more than 17 jewels, \$3 dollars each, and, in addition thereto, on all the foregoing, 25 per centum ad valorem; watch cases and parts of watches, including watch dials, chronometers, box or ship, and parts thereof, clocks and parts thereof, not otherwise provided for in this act, whether separately packed or otherwise, not composed wholly or in part of china, porcelain, parian, bisque or earthen ware, 40 per centum ad valorem; all jewels for use in the manufacture of watches or clocks, 10 per centum ad valorem."

To test and circumvent this paragraph a number of watch importers imported from Switzerland watches in various stages of completion, or defective in vari-

ous parts, and also watches disassembled and watches not in cases, etc. This was done, it is said, to obtain a judicial construction of the act. Two leading cases, those of Didisheim and Schwob, related first to watch movements which are quite complete, except that they lack the dial, and others that had missing the hour, minute and second hands and the hour and minute wheel. These articles, the manufacturers claimed, were dutiable at 40 per cent. as parts of watches, but their contention was overruled in an elaborate opinion by the Board of Appraisers, which was published in full in this journal at that time.

In the argument on the appeal from this decision, Monday, Col. A. P. Ketcham, counsel for the importers, opened by giving a brief review of the points at issue, and telling why all the protests, but those involving the points here, were abandoned. The manufacturers, he said, had nothing to conceal in their object in bringing in these watch movements, as it was simply for the fact of testing this paragraph. His main contention was that the words "watch movements" in the Tariff act mean complete movements, and in fact all parts of the watch except the case, and he attacked the Appraisers for using in their decision the words "complete" and "incomplete" movement in reviewing the case, as in doing so they begged the whole question from the beginning. There could be no movement, he said, but a complete movement, and this includes everything in the works, the dial

and the hands. To be a watch movement he claimed the article must essentially keep time and any combination of wheels that falls short of this and is in itself unable to perform the functions of a time-keeper, falls short of the definition of watch movement. He analyzed the decision of the Board of Appraisers, claiming that they had not properly considered his points, and after reading various definitions in dictionaries of the word "movement" and "watch movement," claimed that all these showed that the meaning was exactly what the importers contended, works which register time.

William G. Thompson, of Boston, who acted as special counsel for the Government, answered Col. Ketcham and said that the points at issue were: First, whether the term movement in the Tariff act had or had not a commercial meaning, and second, if it had not, did not the articles in question fall within the general scope of the word in its ordinary sense? The Board of Appraisers, he claimed, had found that the word had no commercial meaning, and the articles imported had never before this time been used in trade, and therefore had no particular name of their own. The point before the Board was whether these articles should be embraced under the ordinary definition of watch movement. He gave a brief discourse on the construction of a watch, explaining that the going mechanism was all embraced within the plates and was known as the "train," and that above these plates were two hour wheels, minute wheel and the hands of the watch. All the parts above the plate, Mr. Thompson explained to the Court, related to the time registering properties of the watch, while those between constituted the timekeeping mechanism. The missing parts in all the exhibits, Mr. Thompson pointed out, had nothing to do with the time keeping properties of the watch, but simply the time registering and that the word "movement" embraced everything from the timekeeping parts—the train—to the plates, works, dial and hands.

The exhibits in this case of the articles at issue, he contended, had been wound up and that experts had testified that all had been "timed," and also testified "timing" to be the last process in the manufacture of a watch. By comparing the ticks of these exhibits with a regulated watch, the experts had found that the exhibits kept perfect time. In fact, they had everything necessary to keep time, though not the parts to register the result of their motion. These movements he claimed were to be considered a new species of the *genus* watch movement and should be so classed under the Tariff act. They could not be considered as "parts of watches" as that phrase had a definite meaning that did not embrace articles such as the exhibits. In answer to the Judge's question, he said the contention was of the Government that a movement included everything from the train between the plates, whether or not the springs were in. Another point he raised was that these exhibits had been jeweled and were more directly provided for under the section providing a specific duty on movements

DUEBER- HAMPDEN WATCHES.

John W. Pierwood & Co.
No. 3 Maiden Lane, New York.

according to the number of jewels, and also an ad valorem duty of 25 per cent., than under the paragraph generally providing for parts of watches. The testimony in this suit taken before the Board of Appraisers was voluminous and was not read to the Court; the parts considered essential being cited in their briefs.

Judge Townsend, in his remarks to counsel, intimated that he might differentiate between those movements exhibited which contained everything but the dial, and those in which the hands and wheels above the plate were missing. The argument was concluded Monday afternoon and briefs were submitted and decision reserved.

Death of Anthony Thoma.

THREE RIVERS, Mich., April 13.—Anthony Thoma, one of the best known characters in southern Michigan, died here, this week, aged 70 years. He was the father of five sons, all of whom are in the jewelry business, being located at Kalamazoo, Mich., Battle Creek, Mich., Mineral Point, Wis., and Three Rivers. Besides five sons he leaves a widow and three daughters. The five sons and a nephew acted as pall bearers. Mr. Thoma had not been in business for himself for 15 years, having been succeeded at Three Rivers by a son, George H., who now conducts the business.

Coral and Pearl Fishery Rights in Colombia for Sale.

WASHINGTON, D. C., April 15.—Consul-General H. A. Gudger writes to the Department of State, from Panama, as follows:

"The following notice, dated Panama, Feb. 20, 1901, appeared in a local paper of recent date and is an official announcement by the Panama Government of the intended sale of the rights of the fisheries at the Pearl Islands:

"The Government will shortly accept bids for the right to work the pearl and coral fisheries in Colombian waters for a term of 15 years. To intending bidders for the said right, full particulars will be furnished at the Government House."

"For something like 100 years and more the small group of islands 50 miles to the south of Panama, known as the 'Pearl Islands,' have been famous for their remarkable yield of pearls and coral. During certain seasons of the year, when the waters are unusually clear, these waters are worked by divers, and many pearls of great value have been found there. The pearls rank well in grade and color; in the latter respect they range from the pure white to green and lead gray and frequently jet black.

"These fishing grounds have been a source of great revenue to the Government, as well as to the few more fortunate finders. Some little expense is attached to the business, as it is necessary to have experienced divers and men thoroughly versed in the business.

"It is estimated that the shell of the oyster, commonly known as the mother-of-pearl shell, if trimmed and shipped to Europe or the United States, would be sufficient to defray all ordinary expenses and leave the find of pearl as a clear profit. It is not common to have valuable finds, yet the fisher is sometimes rewarded with pearls of great worth. Some two years ago a small boy, while diving in the shallow water more for sport than work, found a pearl which he sold to a local dealer for \$4,000 silver (\$1,760). This dealer delivered the same pearl to a buyer in Panama and received \$10,000 silver (\$4,400) for it. This pearl is now in Paris and an offer of \$6,000 gold has been made therefor and refused.

"Formerly, those who worked in these waters paid a percentage on their finds; later an annual tax. It seems that now the Government has decided to sell the exclusive right to the highest bidder for a period of 15 years."

The Giant of Collar Buttons

IN QUALITY,
IN SALES.

One Million Five Hundred Thousand Kremenz One-Piece Collar Buttons made and sold within the last year.

WHY? Because of their HIGHEST QUALITY, BEST CONSTRUCTION, GIVING THE MOST WEAR, AND GREATEST COMFORT and their IRON-CLAD GUARANTEE.

To verify this we invite the trade to read "The Story of a Collar Button, with Illustrations," which may be had FREE for the asking, and to try the experiment suggested on page 5 of that booklet.

Extract from "Printers' Ink,"
Nov. 23, 1898.
The Little Schoolmaster now suggests, to every pupil in his class, to send a two-cent stamp to Kremenz & Co., 49 Chestnut Street, Newark, N. J., and ask to be favored with a copy of their leaflet, "The Story of a Collar Button." Afterward, if any pupil will send to *Printers' Ink* another leaflet, new or old, that is half as good as this one, or that approaches it in excellence, the deserving student will be rewarded with one of *Printers' Ink's* souvenir spoons as an acknowledgment of his discovery and contribution. "The Story of a Collar Button" is the best piece of advertisement construction that has come to *Printers' Ink's* attention in the year of our Lord 1898.

Should you wish to utilize this booklet to increase your collar button business, we will, on receipt of your order, print your card upon and send you a quantity of them.

Kremenz One-Piece Collar Buttons are stamped as follows, ON BACKS:

Litigation Over a Share of the Stock of The Dueber Watch Case Mfg. Co.

COLUMBUS, O., April 12.—An interesting legal question in the case of The Dueber Watch Case Mfg. Co. against William J. Piero, trustee for Mrs. S. J. Hecklinger, was filed in the Supreme Court to-day on error from the Circuit Court of Stark County. One John A. Coburn, an employe of the Dueber company, was given four shares of stock of the company with the understanding that they were to be re-transferred to the company whenever he left their employ. Coburn transferred one share to Thomas F. Turner, who, in turn, transferred it to William J. Piero, who also transferred it to Mrs. Hecklinger, in trust as security for an indebtedness. The share was valued at \$1,000, and when Piero presented the share at the company's office to have it transferred on their books they refused to comply with the request. Piero brought suit for \$2,000, alleging in his petition that he was damaged to the extent of \$1,000 in addition to the value of the share. The company set up in their reply that Coburn had no authority to transfer the share except back to the company.

A jury trial was had in the Common Pleas Court, which resulted in a verdict for Piero for \$1,117.75, which judgment was affirmed by the Circuit Court. The Dueber company now come before the Supreme Court, asking for a reversal of the judgment of the lower courts.

F. S. Pease, Dunlap, Ia., has just recovered from a serious illness.

Attleboro.

The Banker and Tradesman records that the Attleboro refining house of Slade & Whipple have made an assignment.

Frank W. Whitaker, with the Frank Mossberg Co., and Miss Sarah J. Brines, employed in the office of C. A. Marsh & Co., were married last week.

The hundreds of young Frenchmen in the jewelry shops are interested in the formation of a union styled the Société des Artisans, with objects of mutual financial benefit.

The Watson & Newell Co. have asked the town for an electric light and highway improvements for the benefit of their hundreds of employes now obliged to leave the shop at night over dark and uncomfortable streets.

Winfield E. Dunham and wife have returned to Attleboro. Mr. Dunham was one of the young Attleboro jewelers induced by representatives of W. F. Main Co., Iowa City, Ia., to go out there to aid in getting their plant under way.

The D. F. Briggs Co. performed an act last week deserving of emulation in every jewelry shop all over the country. They concluded their annual stock inventory and decided that 1900 and the Spring of 1901 had been a prosperous period. As about 20 of their employes, a dozen heads of departments, their salesmen, their office force, and a few individuals among the general working force had been particularly devoted to their interests, they distributed a generous percentage of the profits secured. Charles H. Tappan, who,

GUARANTEED FOR TWENTY-FIVE YEARS.

THE NEW STYLES OF

CROWN 14k. FILLED

Cases represent a distinct improvement in shape, ornamentation and general finish over any previously shown. The quality is the same that has, in thousands of instances, withstood over a quarter of a century of wear. The Crown trade-mark means proved merit.

THE NEW STYLES OF

LION 10k. FILLED

Cases will still further prove their claim to be "first in style and worth" in the 10k. grade. The patterns are in great variety and equal those on the highest-priced gold cases. Most jewelers consider these cases the best selling and most profitable to handle of all watch cases.

GUARANTEED FOR TWENTY YEARS.

FOR SALE BY ALL LEADING JOBBERS.

with his brother, William C. Tappan, constitute the firm, was very modest when interviewed, but would not deny that the sum distributed was about \$2,500.

Albert B. Shannon, with the Philadelphia Watch Case Co., has been spending several days in town.

Fred A. Newell, of the Watson & Newell Co., with Mrs. Newell, returned last week from spending the Winter in Florida.

The Attleboro High School pupils have given an order to a Providence jewelry house for a large number of very handsome gold and enamel school pins.

Rumor has been busy with the story that Joseph M. Bates, late of Bates & Bacon, was about to open a solid gold watch case house in town, but it is officially branded as street talk.

Charles H. Tappan, of the D. F. Briggs Co., has purchased the home place of George H. Randall, of Randall & Ackermann, and, removing the dwelling, has broken ground for what is to be the finest and most modern residence in Attleboro.

John C. Cummings, head of J. C. Cummings & Co., has been very critically ill at his home. At this writing he requires several attendants constantly by him, but the physicians give every assurance that before long he will be on the road to convalescence.

Several hundred attended a reception at the Attleboro High School, Friday, to see the modest beginnings of what is to be a big town Museum of Arts and Crafts. The central features were the rich display of favrile glass loaned by Louis C. Tiffany, New York, and several exhibits by local manufacturing houses, which exemplified the growth of jewelry from the flat plate of stock to the finished article.

North Attleboro.

William N. Fisher and E. E. Thomas, Jr., have dissolved the partnership existing as E. E. Thomas, Jr., & Co.

Theron I. Smith, of T. I. Smith & Co., with Mrs. Smith, returned last week from Palm Beach, Fla., where they spent the Winter.

Alton H. Riley, of Riley, French & Hefron, with Mrs. Riley, returned last week from Palm Beach, Fla., where they spent two months.

The hearings on the will contest of the late Oscar M. Draper, which were to have occupied the Court this month, have been postponed until September.

Henry F. Barrows, Sr., and Henry F. Barrows, Jr., of H. F. Barrows & Co., have been elected president and secretary of the North Attleboro Branch Railroad Corporation.

W. N. Fisher & Co., whose shop at Attleboro Falls was burned out, on Monday of this week were in very practical shape and started up in their new quarters at Robinsonville.

Representative Harry D. Hunt, of North Attleboro, has had made a very handsome loving cup and offered it to the winner of a big tournament now being participated in by a large number of the young men of the town at the local gymnasium.

Philadelphia.

J. Harry Halt, Mt. Holly, was married in this city last week.

D. G. McKelvey, engraver, has opened an office at 730 Chestnut St.

Jacob R. Allebach, Green Lane, Montgomery county, is a candidate for County Treasurer.

Paul Schless, jeweler and optician, 138 N. 8th St., intends to open a branch store at 14 N. 8th St.

Jewelry Workers' Union No. 5 will hold a smoker at 8th and Spring Garden Sts. next Friday.

William Davis, real estate agent for William Weightman, has been elected a member of The Jewelers' Club.

The engravers' union will give an entertainment in Harmonie Hall, 11th and Spring Garden Sts., Friday, April 26.

William Wingert, lately with William Linker, 730 Sansom St., has re-entered the employ of R. Wallace & Sons Mfg. Co.

James Barry has resigned his position as buyer and manager of the silver ware department of Strawbridge & Clothier.

J. E. Caldwell & Co. have received an invoice of orris powder from the monastery of Santa Maria Novella, Florence, Italy.

Newton B. Elting and Harry Bodenheimer are matched for a shuffleboard game to be played at The Jewelers' Club in a few days.

Elwood Bailey, bankrupt jeweler, formerly in business at 8th and Chestnut Sts., has applied for his discharge from

bankruptcy. The hearing will be held April 23.

At the monthly meeting of the board of directors of The Jewelers' Club, Tuesday evening, the date for the annual shad dinner was fixed for April 30.

There is a strike among the engravers of several big houses in this city. The firms affected are Charles H. Elliott, E. A. Wright and the Ashmeade Clark Co.

The assigned estate of Williams & Ulmer, silversmiths, formerly in business at Juniper and Walnut Sts., has been valued, according to an inventory filed in court last week, at \$1,607.30. The disbursements have been \$1,167.94, leaving a balance of \$439.36.

Jacob Froehlich, diamond broker and jeweler, 7th St. near Sansom St., who is also a stockholder in the Delaware Rubber Co., has filed a bill in equity against the Manhattan Storage Co. and the Puritan Rubber Co., to have the defendants restrained from making an alleged infringement upon his trade-marks for rubber tires.

W. F. Engelhart, Jr., jeweler, 204 Market St., was married Tuesday, April 8, to Miss Elizabeth Smith, of Camden, N. J. The evening before the wedding burglars broke into the bride's residence, 6th and Penn Sts., and tried to steal the wedding gifts, but were frightened off. Mrs. Engelhart is a daughter of an ex-Sheriff of Camden.

The award of the contract for a \$200 handsome jeweled badge for the presiding

officer at the Mystic Shrine of this city to a Newark manufacturer has aroused no end of criticism among the local jewelers, who were neither invited nor given an opportunity to bid for the work, and strong protests have been made to the committee of the Mystic Shrine who have the matter in charge.

A magnificent loving cup, the production of Bailey, Banks & Biddle Co., has been presented to J. B. Hutchinson, general manager of the Pennsylvania Railroad, on the occasion of his marriage, last week. The cup stands about 15 inches in height and is about 10 inches in diameter across the top. There are three rustic handles and the decorations are grapes with festoons of flowers and Autumn leaves. Between the handles are blank panels, in one of which is the simple inscription, "From the Freight Department." Beneath this inscription are the names of the department heads in facsimiles of the signatures of the donors.

Boston.

J. C. Sawyer returned last week after a trip of several weeks through Florida and Georgia.

H. O. Richardson, Rutland, Vt., was in Boston last week, buying goods for the store he recently opened in that town.

Mrs. S. L. Kingsbury, of J. H. Hutchinson & Co., Portsmouth, N. H., stopped in Boston last week on her way home from a southern trip.

E. A. Cowan, Jewelers building, has gone south on a business trip, and on his return, in early June, will sail for Europe for the Summer months.

R. D. Gordon, of Gordon & Burgin, Jewelers building, returned from Jamaica last week, after an absence of six months, and reports a most enjoyable vacation trip.

A meeting was held at the office of the Wilson Jewelry Co., Monday afternoon, to arrange a plan for the future of the company. Another meeting has been called for to-day.

R. C. Parsons, Derby Line, Vt., who was in town last week, has the unusual distinction of having one-half of his store in the United States and the other half in Canada.

Thomas Jordan, 20 years old, was arrested on the morning of April 9, on a charge of breaking into the jewelry store of Bernard Adelberg, 1033 Washington St., and the larceny of four clocks. The property was recovered at the time of the arrest.

Boston members of the trade are interested in learning that the store of John F. McKay, West Derby, N. H., has been closed by a sheriff at the request of John Folsom, the mortgagee. McKay was in business in Massachusetts, previous to going to New Hampshire, and local dealers are said to be among the creditors.

Among the buyers visiting Boston last week were seen: E. A. Doyle, Lynn, Mass.; H. E. French, Hudson, Mass.; C. M. Coffin, Haverhill, Mass.; J. S. Stanley, Wakefield, Mass.; F. B. Reed, East Weymouth, Mass.; E. D. Howard, Ware, Mass.; F. H. Coffin, Peterboro, N. H.; Charles Sinclair, of N. C. Nelson & Co., Concord, N. H.

New York, April 6, 1901.

Messrs. M. SICKLES & SONS, Philadelphia, Pa.

Gentlemen:

We were gratified to see in the last number of the *Keystone* your illustration of the **Leading Manufacturers of Watch Cases** (their chamois bags) and the prominence given to the

ROY

We assure you that we shall continue our efforts to **lead them all** in the making of irreproachable **Solid Gold Watch Cases**, and intend to stay where you put us, *i. e.*, "on top."

Yours very truly,

ROY WATCH CASE CO.

Providence.

A new retail jewelry store has been opened by Frank Fredkt, 369 S. Main St.

Lange & Fischer have taken another room in the factory building at 67 Friendship St., thus increasing their facilities considerably.

William Leeder, of Leeder & Bernkopf, stone dealers, arrived home Thursday from his annual European trip in the interests of his firm.

Samuel C. Wolf & Co., 46 Clifford St., formerly doing business under the style of the Rhode Island Jewelry Co., at 25 Calender St., have gone out of business.

The E. N. Cook Plate Co., refiners, are adding to their factory room the shop on the same floor of the building at 158 Pine St., formerly occupied by the Stevens Optical Co.

The wedding of Albert A. Remington, of the Horace Remington & Son Co., and Miss Annie R. Fowler took place last week at the residence of the bride's parents, 202 Adelaide Ave.

The jewelers' baseball team from Wightman & Hough Co.'s shop played their first game, Saturday, with the strong Suttonville nine and were victorious by the score of 17 to 13.

The brass foundry of Fire Commissioner Stillman White, 1 Bark St., has been purchased by T. P. Hall and Peter S. Levey, who for a number of years were connected with Reed & Barton, Taunton.

Henry C. Tilden, of the Tilden-Thurber Co., delivered an interesting lecture on "Stained Glass," Thursday evening, before St. Augustine's Guild, of St. Stephen's parish, in the Webster Guild House, George St.

Harold D. Baker, of the Attleboro Refining Co., was married last Tuesday to Miss Nannie C. Packer, who was formerly bookkeeper for George M. Baker, who is in the refining business in this city and is a brother of Harold D. Baker.

Arthur C. Stone, traveling representative for George W. Dover, manufacturer of jewelers' components, will sail from New York, April 27, for a visit to England, France and Germany. Mr. Stone will combine business with pleasure on his journey.

The sheriff's sale of the stock, tools, machinery, etc., in the jewelry shop of D. W. Costigan & Co., which was to have taken place on April 11, by an order of the Court under the attachment placed by Bruhl Bros., did not take place, the attachment having been vacated. The attorney for Bruhl Bros. states his clients' interest in the matter is now confined to a book account suit which is pending against Costigan & Co. The latter's affairs are in the hands of the mortgagee, M. R. Downey, a broker of this city. Mr. Downey said Saturday that nothing would be done in the case before Tuesday, when it was possible that the entire plant might be sold to Attleboro parties. Mr. Downey is also considering the advisability of placing some one in charge of the business and continuing it. He holds a mortgage for \$2,000 on the plant and is the principal creditor. D. W. Costigan is now foreman for Schwarzkopf & Solinger.

At a meeting of the Jewelers' Base

Ball League, held last week, the draft of the constitution and by-laws and special rules for the government of the league reported by the committee were adopted. B. G. Sullivan, of R. L. Griffith & Son Co., was appointed treasurer in place of H. L. Swan, resigned. Uniforms have been ordered for all of the clubs in the league and some of the teams have already secured their uniforms. The committee on grounds is making good progress and the schedule committee will report at the next meeting. The season will be opened about the middle of next month.

The Stafford & Russell Mfg. Co. have been incorporated in Maine to manufacture finger rings and jewelry; \$60,000 capital stock, \$250 paid in. President, Charles F. Irons, Providence; treasurer, Charles A. Russell, Providence. Certificate approved April 11.

Through the explosion of a blower tank in the jewelry shop of T. E. Bennett & Co., fifth floor of the Manufacturers' building, Thursday morning, a slight fire, just sufficient to open the automatic fire extinguishers above the tank, was caused. The extinguishers let out a flood of water that ruined belts and damaged machinery and stock in the shop, and then, soaking through two floors, damaged stock and machinery in the store room of the Mossberg & Granville Mfg. Co., on the floor below, and the shop of Barstow & Williams, on the floor below that.

The funeral of Albert F. Smith, who was for 25 years employed by Foster & Bailey and the Theodore W. Foster & Bro. Co., was held in the Congregational Church in Barrington, Sunday afternoon. A large delegation of Mr. Smith's shop-mates went from this city to attend the funeral services. There was a large attendance at the church and many floral tributes, among them a beautiful set piece from the employes of Theodore W. Foster & Bro. Co., were displayed as a mark of the esteem in which Mr. Smith was held by all who knew him.

Birney C. Parsons, receiver of the Howard Sterling Co., is publishing a notice to the effect that there will be sold at public auction, at the office of the

Howard Sterling Co., 7 Eddy St., on Saturday, April 20, at 12 o'clock noon, by virtue of an order of the Circuit Court of the United States for the District of Rhode Island, entered March 28, in cause in equity No. 2592, Francis C. Welch, *et al.*, trustees, vs. Howard Sterling Co., the entire assets, property, plant, business, trade-marks, trade names, accounts, choses in action, credits and all other property of every kind and nature of said Howard Sterling Co. The purchaser will be required to pay on account of the purchase \$5,000 in cash or by certified check at the time and place of sale and the balance of the purchase price upon delivery of the property within one week from the time of sale.

Connecticut.

Fred. Heath, Danbury, has gone out of business.

The E. A. Bliss Co., Meriden, are running some of their factory departments nights.

W. H. Knapp, 10 years with Clasen W. Hoyt, Stamford, is now salesman in Wanamaker's New York store.

The Biggins-Rodgers Co., Wallingford, are now running on a 10-hour schedule in place of eight hours a day.

The Holmes & Edwards Silver Co., Bridgeport, furnished the silver for dining cars to run on the Lake Shore line between New York and Chicago and St. Louis.

A certificate of incorporation of the N. Olsen Co., Bridgeport, has been filed with the Secretary of State. The corporation are organized to deal in jewelry, silver ware and fancy goods. The capital stock is \$800.

Samuel A. Galpin, president of the New Haven Clock Co. and receiver for the National Electrical Mfg. Co., Milford, has sold the property of the latter company to Albert J. Wise, of New York. The Milford concern was a part of the plant of the New Haven Clock Co. at one time, but a separate company were afterwards formed and the plant moved to Milford.

A change has been made in Factory E of the International Silver Co., whereby the work in the spinning department will be done by contract and that N. C. Smith, the

foreman of that department and for 36 years an employe, is no longer connected with the factory.

A resolution incorporating C. Rogers & Bros., Meriden, was passed by the Connecticut Legislature, April 10. Chairman Pearne, of the Incorporations Committee, explained that the resolution incorporated a Meriden concern of importance that a few years ago was enlarged and incorporated under the laws of the State of New Jersey. "It desires now to operate under the laws of its own State and we are very glad to have it do so," said Chairman Pearne. The capital stock will be \$915,000, of which 3,000 shares, amounting to \$300,000, will be preferred stock, and 6,150 shares, amounting to \$615,000, will be common stock.

Canada Notes.

J. E. Black has opened a jewelry store at Sinaluta, Man.

Harry Stenson, Kasbo, B. C., has given a bill of sale on his stock for \$1,858.

G. B. Knowles, Sandon, B. C., has placed a chattel mortgage for \$800 on his stock.

A writ has been issued against E. E. Schofield, jeweler, Rossland, B. C., by Alfred Clark.

A. R. Carr, Sydney, N. S., is in financial troubles, and his stock is advertised for sale under execution.

Fred. G. Fawkes, jeweler, Brantford, Ont., has given a renewal chattel mortgage for \$3,000 to G. H. Fawkes.

Ambrose Kent & Sons, Limited, Toronto, have two neat enamel brooches for the Pan-American Exposition.

Gerald Birks, of Henry Birks & Sons, Montreal and Ottawa, has recently returned from a trip to Bermuda.

T. S. Porte, jeweler, Campbellford, Ont., has given a renewal chattel mortgage for \$815 to L. G. Young.

A. Rosenthal, jeweler, Rossin House block, Toronto, has gone on a business trip to London, Paris and Amsterdam.

Judgment has been given against Pierce Bros., jewelers, Williamsburg Tp., in favor of The M. S. Brown Co., Montreal, for \$1,579.

Frederick A. Kent, of Ambrose Kent & Sons, Limited, Toronto, sails from New York, April 25, for Italy, thence to France and England.

J. A. Knox & Co. are moving from their old location, 14 Leader Lane, to 48-50 Wellington, E., Toronto, into more commodious premises.

A. L. R. Wilson, jeweler. Hewston,

Ont., has assigned. The liabilities are \$460 and actual assets about \$200. The business will be sold out.

Walter S. Crone and his son, Nelson J. Crone, of H. A. Nelson Sons Co., Montreal and Toronto, are on their western journey as far as Winnipeg.

James Porter, of Porter & Co., Winnipeg, has just returned from a two months' purchasing trip to Europe, eastern Canada and the United States.

Attleboro Export Co., Montreal, Que., M. E. Stern, manager, are in financial difficulties owing to the withdrawal of the friend who gave financial backing.

Attachments have been taken against A. R. Carr, jeweler, Sydney, N. S., by The Toronto Silver Plate Co. for \$523, by J. R. Eastwood for \$157 and by Smith & Patterson for \$874.

Early last Saturday morning a constable who was on duty at Queen and Bathurst Sts., Toronto, saw a man running away from Walter Michie's jewelry store, at 582 W. Queen St. Upon investigating, he found that a brick had been tossed through Mr. Michie's window, and through the neat hole so made five gold watches had been taken. The officer pursued the thief, and finding him too fleet of foot, fired three shots after him without effect.

Among travelers visiting Toronto last week were: George H. Smith, Theodore W. Foster & Bro. Co., Providence, R. I.; George R. Lamb, Waterbury Machine Co., Waterbury, Conn.; W. R. Humphrey, cutlery manufacturer, Sheffield, England; Frederick W. Andrews, Cornell & Andrews, smelters, Providence, R. I.; L. Lelong, L. Lelong & Bro., smelters, Newark, N. J.; J. R. Delfosse, manufacturers' agent, Montreal, Que.; H. L. Stanton, silk guards, Chicago, Ill.

On the 4th inst. William G. Lewars was tried at the Sessions Court, Toronto, on a charge of using the mails for fraudulent purposes in connection with the business of the Bon-Ton Novelty Co., a scheme jewelry concern, details of whose methods have previously been given. He was acquitted, Judge McDougall holding that, although the "company's" advertisements may have been misleading, there was no evidence of fraud. The Crown Attorney asked for a reserve case, with a view to continuing the prosecution, which will be considered by the Judge.

Rollin Austin, Onawa, Ia., has purchased ground and will erect a new store building on it.

You are missing a good thing if you are not selling our

Watch Case Engravers Strike.

Watch Case Companies Decide to Treat Employees Individually and Not as Union Members.

There is a strike in the watch case trade which, though almost general in its scope, reaching factories from Sag Harbor, L. I., to Newark, N. J., did not come from any united action either of the workmen or the firms employing them. The factories affected are those of the Fahys Watch Case Co., Sag Harbor; DuBois Watch Case Co., and Camm Watch Case Co., Brooklyn, and the Crescent Watch Case Co. and the Courvoisier-Wilcox Mfg. Co., of Newark, N. J. All have, for a year or more, been having difficulties with the unions to which their workmen belong, but these difficulties were in all but one case settled from time to time, until last week. All the manufacturing firms claim that they have suffered interference in the running of their business by the dictation of the unions, until things came to such a pass that they were forced, both for financial and ethical reasons, to put a stop to what they consider a tyrannous control of their shops by the men and their organizations.

The workmen, at least their leaders, on the other hand, claim that they have only acted for self-preservation in insisting on certain union rules, made to keep their profession from being overcrowded by young and incompetent hands. The workmen on strike belong to several unions, the two largest of which are that of the watch case engravers and that of the polishers. The question at issue in all the factories

does not relate to wages but is simply that of unionism or non-unionism, so that all hands belonging to an organization are affected.

The Fahys Watch Case factory had a strike of engravers about a year ago, and since the settlement it has been practically a union factory. Saturday the men were notified that hereafter the firm would not recognize the union, but would treat with the men individually. The workers immediately left the shop and a strike was declared.

The polishers of the Crescent Watch Case Co.'s factory, Newark, have been out for some time because the company refused to discharge Maggie Stamm, a non-union hand. Saturday the strikers received word that if they came back to work it must be as individuals and not as members of a union.

A similar notice, to the effect that they would, after Saturday, dispense with union help, was given to the workmen of the Courvoisier-Wilcox Mfg. Co., some of whose polishers had gone out because the company refused to discharge a non-union man.

The DuBois Watch Case Co., Monday night, notified their employes that union rules would no longer govern their factory.

The employes of the Camm Watch Case Co. have been on strike for about a week.

At a meeting, Sunday, of the Newark workmen they decided to make a vigorous contest, and an attempt will be made to induce the women employed by the firms to quit. Superintendent Buecke, of the Crescent Co., said the employes could have

all the work they wanted provided they left the union, and denied that there was a lock-out.

The Courvoisier-Wilcox Mfg. Co. and the Crescent Watch Case Co. reported yesterday that some of their men had gone back and that the factories were working in all departments.

The Store of S. Desio Broken Into and Robbed.

WASHINGTON, D. C., April 15.—The jewelry store of S. Desio, 1012 F St., N. W., was again broken into early on Sunday morning, by breaking in the show window in which he always carries a very elaborate display, although the best and most expensive pieces are removed at night. The method used was to break the plate glass window large enough to insert the hands of the thieves and in this way they drew the velvet cover to the opening and took everything they could reach, although very fortunately they overlooked about \$1,500 worth of plate and jewelry.

THE THIEVES CAPTURED IN PHILADELPHIA.

PHILADELPHIA, Pa., April 16.—Three men were to-day arrested in this city for the robbery of S. Desio's jewelry store, Washington, D. C., on Sunday night. Eighteen watches, three charms, two cigarette cases, gold cuff buttons and a costly gold pin have been recovered. The prisoners are well known crooks; Al. Hart, alias Andrew Howe, Frank Allen and Charles B. Lynch.

L. B. Smith, Parkersburg, Ia., has sold out.

The advertisement features a detailed illustration of an eagle with its wings spread wide, perched atop a classic pocket watch. The watch face is clearly visible, showing the numbers 1 through 12 and the brand name 'WALTHAM' at the 10 o'clock position. The watch is set against a dark, textured background that resembles a globe or a map of the world. Below the watch, the text 'WALTHAM WATCHES' is written in a large, bold, serif font, and underneath that, in a smaller font, it says 'ARE CARRIED ALL OVER THE WORLD'.

New Subscribers can commence at any time.

Payments for THE JEWELERS' CIRCULAR-WEEKLY, when sent by mail, should be made in a Post-Office Money Order, Bank Check or Draft, or an Express Money Order or Registered Letter. All postmasters are required to register letters whenever requested to do so.

Pay money only to authorized collectors having proper credentials.

Returning Copies. Returning your paper will not enable us to discontinue it, as we cannot find your name on our books unless your address is given.

Changing Address. In changing address always give the old as well as the new one. Your name cannot be found on our books unless this is done.

Discontinuances. We will continue to send papers until there is a specific order to stop, in connection with which all arrearages must be paid; but such an order can be given at any time, to take effect at or after the expiration of the subscription. All such orders will be promptly acknowledged by mail.

Liability. The courts have decided that all subscribers to journals are responsible until arrearages are paid in full and an order to discontinue has been received by the publisher.

THE JEWELERS' CIRCULAR-WEEKLY IN EUROPE.

Among the places in Europe where it is on file are the following:

LONDON—First Ave. Hotel, Holborn, E. C.; Holborn Viaduct Hotel, Royal Hotel.

LEIPZIG—Handels-Zeitung für die gesamte Uhren Industrie.
BERLIN—Deutsche Uhrmacher Zeitung, Jäger Strasse, 73.
GENEVA—Journal Suisse D'Horlogerie.
AMSTERDAM—Continental Club, Hotel Amstel.
ANTWERP—Diamond Club, Rue de Pelican.

Every line of reading matter in THE JEWELERS' CIRCULAR-WEEKLY, with the exception of a few brief extracts from exchanges, always properly credited, is written exclusively for this journal. Each issue of THE JEWELERS' CIRCULAR-WEEKLY is copyrighted. Permission to quote is extended to other publications provided such quotations are properly credited.

Salary and Temptation.

JUDGE WOFFORD, of the Criminal Court, in Kansas City, Mo., before sentencing William Deardurff, who was found guilty of stealing from his employers, the Edwards & Sloane Jewelry Co., a quantity of jewelry valued at \$3,000, questioned the young lad as to his salary.

"I am shipping clerk," said Deardurff, "and get \$6 a week."

"Did you pay board and clothe yourself out of that?" asked Judge Wofford.

"Yes, sir. I pay \$3 a week for my living at home."

"How much did they pay you at first?"

"Four dollars."

A grave look is said to have come over Judge Wofford's face before he said:

"I am no business man, but I have had some experience in this world. I want to tell Mr. Edwards, or any other employer, that he makes a mistake when he places a young man of this age in a responsible position, with temptations about him, and pays him only \$6 a week. I don't see how a man of his age can be expected to keep straight on \$6 a week, board and clothe himself and have a little pocket money. Nearly all crimes of this sort are due to temptations placed in the way of persons who are half paid or without work."

Notwithstanding Judge Wofford's experience in this world, his little lecture is based upon ignorance of the conditions in the jewelry business and its pronouncement is calculated to foster dishonesty and crime, which can hardly be the desire of the occupant of the judicial bench. It must be remembered that Deardurff was only 20 years of age—little more than a boy—living with his parents, and that he was engaged in a business where advancement was only a matter of time and perseverance and good behavior on his part. The salary he was getting was altogether right for his age, the duties he performed and his prospects. There are thousands of youths coming from the schools and colleges who would be happy to start their business careers under the same conditions. The boy had been started at \$4, which was raised to \$6 in a comparatively short time and his position was one that permitted of development with advantage to him. There are hundreds of honest young lads in the jewelry houses who are content under these conditions. Deardurff was one of the exceptional dishonest fellows—that was all. He would have been dishonest had he obtained twice or thrice \$6 per week. The incident opens up a rather broad line of inquiry: The question of the extent to which the size of salaries precludes or diminishes the temptation to steal. To the *Washington Post* it suggests the question: Ought the wages of employes to bear any relation to the value of the things they handle, the degree of temptation to which they are exposed, or the facilities afforded by the positions they fill for appropriating their employer's property? While the impulsive answer would naturally be "yes," we are thoroughly in accord with the *Post* when it says that, "most of the great embezzlements—the looting of banks, trust companies and other corporations—are not the work of underpaid employes" and that "large salaries do not furnish any security against rascality, and inadequate compensation does not make an honest boy or man turn to thieving." However, no one would attempt to argue against the good policy of employers giving their help

salaries at least commensurate with their services and performances.

Remarkable Achievement in Art Glass Working.

There were presented to Grace Church, New York, Easter Sunday, two unique and beautiful glass vases which are, aside from being perfect specimens of artistic glass work, especially interesting as showing the ability of the American glass manufacturer to turn out as difficult large work in rock crystal cutting as any glass decorators in the world. These vases are cylindrical in shape, nine inches in diameter, over two feet high and weigh more than 30 pounds each. They are built on severe ecclesiastical lines and the design, which consists of a mass of flowers, has as its salient motif the passion flower, whose leaves and buds fill the greater part of the surface. In addition to the engraving each vase has a large silver cross forming the center part of the monogram IHS. While the character of the engraving is the same, it is somewhat more elaborate than that usually done on small pieces, such as stem ware.

The difficulty encountered in these pieces lay in the fact that the small copper wheels with which the ordinary articles of glass ware are engraved were absolutely inadequate to cut an engraving of the size here demanded. In addition, the pieces were so large that it was impossible for the engraver to hold them. The manufacturers of these vases were C. Dorflinger & Sons, to whom the donor, a lady who wishes her name to remain unknown, gave the order. In undertaking this work they started on a task never before attempted in the glass trade, and their successful completion of the pieces is a triumph for which they, as well as others interested in the development of American glass making, should be justly proud.

Last Week's New York Arrivals.

THE CIRCULAR-WEEKLY has perfected arrangements for obtaining the names and hotel addresses of all the latest buyers visiting New York, and each day posts in its office, 11 John St., cor. Broadway, a bulletin which every member of the trade is cordially invited to copy.

DeGraw Silver Bill Condemned.

All Interests Seem to Be Opposed to the Passage of the Obnoxious Measure.

ALBANY, N. Y., April 12.—The DeGraw silver bill, as published in THE CIRCULAR-WEEKLY last week, passed the Assembly without opposition on the afternoon of April 8 and was delivered to the Senate the following day. In this latter body the bill was referred to the Committee on Miscellaneous Corporations, who already have a bill exactly similar to it which was introduced by Senator Benjamin M. Wilcox, of Auburn. Senator Louis F. Goodsell, the Chairman of the Committee on Miscellaneous Corporations, informed a CIRCULAR-WEEKLY reporter to-day that he believed there would be a hearing on both bills, Tuesday, April 16.

An investigation in New York last week showed that the DeGraw silver bill is as destitute of friends among other lines of business as it is in the jewelry trade, and also disclosed the fact that the department store interests of New York were not only not responsible for the bill, as some merchants had supposed, but that the leading merchants in this line knew nothing of it. In fact, one of the most prominent and reputed department store proprietors stated when the bill was called to his attention that he was absolutely opposed to it and would use his influence to have it defeated. The present law, he said, was satisfactory to all honest merchants handling silver ware and had

worked perfectly in checking dishonest marking.

Secretary Rosebault, of the Retail Dry Goods Association, had had the bill called to his notice, but not thinking that it was of particular interest had given it no further attention. His organization neither instigated nor did it favor this bill. They were satisfied with the present law and were against any change. None of the leading silversmiths seen by a CIRCULAR-WEEKLY reporter, Monday, had heard anything about a hearing on the bill that was reported to be scheduled for the following day (yesterday), and none had, therefore, made any preparation to appear yesterday at Albany in opposition to it. Several State Senators were written to last week by merchants prominent in the silversmithing, department store, jewelry and other trades asking their help to defeat the bill, and a letter was also sent to Chairman Goodsell, of the Committee on Miscellaneous Corporations by The Jewelers' Circular Publishing Company, protesting against the bill on many grounds.

Vice-President Robinson, of the Gorham Mfg. Co., has been the most energetic of the merchants working against Mr. DeGraw's measure and has been in touch with one or more Senators ever since the bill went to the Senate, where it is in the hands of the Committee on Miscellaneous Corporations. Mr. Robinson has called public attention to the character of the DeGraw bill in the following letter, published yesterday, taking

exception to a brief editorial in the *Tribune* on the measure:

To the Editor of *The Tribune*:

SIR:—In to-day's issue of *The Tribune* you have a short editorial on the present efforts at Albany to suppress the use of the word "sterling" on debased manufactures. We presume you refer to a bill which passed the Legislature last week, which was entitled "An Act to Prevent Deception in the Manufacture of Certain Articles of Merchandise by Associations, Corporations and Co-partnerships."

We think you must have been misinformed regarding the facts. The bill which passed should have been entitled "An Act to Permit the Use of the Word 'Sterling' on Fraudulent Goods."

In 1894 the New York Legislature passed "An Act to Regulate the Sale of Goods Marked Sterling or Sterling Silver, or Coin or Coin Silver," and known as Sections 364A and 364B of the Penal Code, and since that time the word "sterling," when applied to silver ware, has meant that the article bearing such mark should be 925-1000 parts pure silver.

Because the word "sterling" was being improperly used this law was passed in New York State, and as a result we believe it would be impossible to find on sale in New York City to-day any articles stamped "sterling" that were not 925-1000 fine, or approximately that; in other words, the law is so plain and so respected that no manufacturer or seller willingly infringes it.

The present efforts are to enact a law which shall relieve the seller from all responsibility. The seller can offer for sale any goods, no matter how debased, bearing the mark "sterling," provided only that they are not made in New York State. Inasmuch as a very small percentage of the manufacturers are in New York State, it gives an open door for any foreign manufacturer wishing to place on the market debased goods with this stamp to sell the same in New York State.

This is the gist of this act, and we believe that you have been misinformed as to the facts, or you would not say that "manufacturers have gone too far in putting this stamp on alloys largely made up of cheap and base materials."

The title of the act referred to was carefully drawn, that it should not attract attention. It has no reference to the end sought, and, if it becomes a law, would be extremely unfortunate to every honest merchant and to the public at large. The public is fully protected by the present law. The surest way to stop fraud is to stop it where it exists. New York cannot legislate for other States, and if she offers inducements for dishonesty she will find plenty of people that will supply her demands.

GORHAM MFG. CO.,

G. H. Robinson, Vice-President.

NEW YORK, April 15, 1901.

Newark.

B. F. Griscom, of Bippart, Griscom & Osborn, returned from Europe last week on the *Majestic*.

The Kellog Mfg. Co., a newly incorporated concern, will, beside many other articles, manufacture sleeve buttons and belt pins. Their capital is \$25,000, \$2,000 of which is paid in.

An action has been brought in the United States Court by Henry Baxter, a polisher, against C. N. Knight & Co., in which the plaintiff asks \$7,500 damages for an injury he received and which he claims was due to a machine not properly protected by the owners.

W. C. Atkins has purchased the bankrupt jewelry stock of Edward Clark, Poultney, Vt., and will carry on the business.

Johnson Glanttsteine, jewelry agent, arrested at Salt Lake City, Utah, on a charge of embezzlement, was acquitted. Glanttsteine was charged with the embezzlement of a horse.

Clara I. Hubbard, of Taunton, Mass., and Fanny R. Dowse, of Newton, Mass., have been appointed executrices of the will of the late Henry Gooding Reed, founder of Reed & Barton, Taunton.

If this happens

THREATEN TO RAISE DIAMOND PRICES

ANTWERP, Sunday.—Diamond merchants here declare that the De Beers company intends to raise the price of diamonds thirty per cent on April 1 or May 1.

The company's reason for the projected raise is said to be the reported determination of the English government to make the largest part of the financial burden of the Rand Transvaal war fall on the backs of the diamond mine owners. The mine owners have indignantly protested against such a course, and if their protests prove ineffectual their reply will be a general raise in prices of diamonds. Only in this way, they are said to contend, can they meet the heavy demands of the government.

will you get caught short? No better time to get your customers to invest in diamonds, or to invest your money in diamonds. We have a very complete stock, and while it lasts, it is subject to your call at present prices.

Anything you want, loose or mounted, "on Memo."

CROSS & BEGUELIN

Importers and Cutters of Diamonds and Precious Stones

43 Rue de Mestay, PARIS

Telephone, 2185 Cortlandt

17 Maiden Lane, NEW YORK

New York Notes.

The Caw's Pen and Ink Co. have moved from Broadway and Maiden Lane to 227 Broadway.

An itinerant jewelry salesman died suddenly, Wednesday, on the second floor, 179 Thompson St., from heart disease while handing change to one of his customers.

Jerome C. Cook, formerly traveler for Bergstein & Son, is now with Champenois & Co., manufacturing jewelers, Newark, N. J., for whom he will travel. Mr. Cook starts April 22 over the territory formerly covered by James D. Underwood and more recently by C. L. Krugler.

Jacob Kornreich, bankrupt, has applied to the United States District Court for a discharge of all his debts in bankruptcy. A hearing on his petition will be given by Judge Brown, April 24, at 10.30 o'clock A. M., at which creditors may show cause why the discharge asked for should not be granted.

James Tomney, treasurer of the Holmes Electric Protective Co., died, Thursday, at his residence, 624 Carlton Ave., Brooklyn. Mr. Tomney was born in New York, 49 years ago, and entered the employ of the late Edwin Holmes in 1868 at the age of 18, and had since been identified with the growth of the electrical profession. A daughter and two sons survive him. Funeral services were held Saturday morning, at St. Augustine's Church, Sixth Ave. and Sterling Place, Brooklyn.

In the action by Lippman Tannenbaum against Roscoe A. Johnston and Philip Shoer, which, as already told in THE CIRCULAR-WEEKLY, has been pending in the United States Circuit Court for some months, a stipulation was filed Friday to the effect that the defendant, Johnston

have until April 29 to move for leave to file a cross-bill and also that the defendants have the same time in which to file their amended answer. The stipulation states that it is entered in view of negotiations for a settlement of the suit.

The schedules of Fanny Morris, dealer in jewelry and musical instruments, 22 Bowery, who assigned, March 11, to Edwin F. Stern, were filed, Wednesday, by the assignee, in the Supreme Court. They show the liabilities to be \$1,775 and the assets to be worth, nominally, \$925.35 and actually, \$716.35. The assets consist of stock whose cost price is put as the actual value. The principal creditors are: George E. Knapp & Co., Boston, \$525; Rosenbaum & Adler, \$215; David Mayer, \$98; S. & I. Berman, \$102; C. Meisel, \$108; Dattelbaum & Friedman, \$91; T. J. Plunket's Sons (rent), \$165, and L. S. Meyer & Bro., \$106.

Vincenzo Grosso, 2212 Second Ave., was arrested last week as he was leaving the Court of General Sessions, where he had been held under bail on a charge of stealing a watch and chain. The second arrest was on the complaint of Henry Tissot, jobber, 1 Maiden Lane, who alleged that the prisoner, on Sept. 16 last, obtained from him on memorandum a pair of diamond earrings worth \$185 to show to a buyer and had never returned or reported on the same. Grosso has been dealing with jewelers in Maiden Lane for many years and until recently was considered honest and reliable. He has, however, a number of creditors among manufacturers and jobbers at the present time. He was held in \$1,000 bail for examination.

William Wiesenberger, a pawnbroker at Sixth Ave. near 32d St., who, as already published in THE CIRCULAR-WEEKLY, was convicted, Nov. 23, of receiving stolen

goods, was sentenced Thursday by Judge Newburger, in the Court of General Sessions, to two and a half years' imprisonment and also to pay a fine of \$250. There are three other indictments against the prisoner, but these will probably not be pushed. Wiesenberger was convicted of receiving the proceeds of burglaries committed by Henry Hess, who afterward turned State's evidence. Many of the owners of the apartments robbed identified in Wiesenberger's pawn shop much of their property at the time the place was raided by Police Captain Schmittberger. Judge Newburger, in passing sentence, said that he had received many letters asking that clemency be shown the prisoner.

Three actions were commenced last week in the United States Circuit Court by the Regina Music Box Co. against the Symphonium Mfg. Co., manufacturers of music boxes. Each action is brought to recover injunction, damages and an accounting for alleged violations of a patent owned by the complainants. The first suit involves the patent on a star wheel standard, the second one on a removable spring drum, and the third on one covering a peculiar construction of bed plate and motor. All the patents involved were issued to Gustav A. Brachhausen and assigned by him to the Regina Music Box Co. The complainants allege that they have used these improvements for some time and that recently the Symphonium Mfg. Co. have brought out their regular music boxes with attachments which infringe the patents. They ask for the usual preliminary and permanent injunctions, also demand damages and costs, and in addition the profits accruing through the use of the alleged infringing devices.

BROOCHES A SPECIALTY.

David Linder, bankrupt, is advertised by the trustee for April 23, at 11 o'clock A. M. Joseph Shongood & Sons, 26 Lispenard St., are the auctioneers.

Lindo Bros., retail jewelers, now at 1205 Broadway, will remove about May 1 to 1157 Broadway.

Adolph Guggenheim, of Arnstein Bros. & Co., sails for Europe, to-day, on the *Majestic*.

The Regina Music Box Co. will move, May 1, from the corner of 22d St. and Broadway to the Regina building, 11 E. 22d St.

Frank Gutter, retail jeweler, 250½ Sixth Ave., has sold out his stock to John Grosberg and retired from the jewelry business.

Customs Inspector Donahue, Saturday, seized for duty a small diamond scarf pin and two gold bracelets, which he found on H. Davies, of Boston, a saloon passenger on the *Campania*. On paying the duty, which amounted to about \$17, Davies was allowed to retain the jewelry.

No creditors appeared last week at the time set for the meeting at the office of referee in bankruptcy N. A. Prentiss, 120 Broadway, at which the members of the firm of Solomon Bros. & Gross were to have been examined. The examination has, therefore, been declared closed.

A dispatch from Washington, last week, stated that the silver service belonging to the cruiser *Cincinnati*, which had been lost for two years, had been discovered at the Norfolk Navy Yard and had been returned to that ship. Dominick & Haff, silver-smiths, who made this service, stated last week that they had heard no word of its recovery.

L. Adler & Son, late of 49 Maiden Lane, are now occupying the entire seventh floor of 87 Maiden Lane. Their present factory accommodations are much larger than before. They have laid in a number of new machines and are now prepared to turn out several new lines of goods, chief among which will be a choice line of stone rings for men.

The seventh annual meeting of The Manufacturers' Association of New York was held Monday afternoon, at 198 Montague St., Brooklyn. The officers elected are as follows: President, R. W. Bainbridge; first vice-president, Wm. McCarroll; second vice-president, H. J. Vogel. Directors for three years: A. A. Mollenhauer; Charles N. Chadwick, Frank J. Logan, Charles L. Rowland, F. Harvey Field, George T. Moon and W. M. Miller. F. A. Thayer was elected director for one year. The usual reports were presented and read and the usual affairs discussed.

M. Straus, jeweler, 409-411 Fulton St., Brooklyn, learned last week that some swindler had counterfeited his firm's en-

velopes and were using them to swindle the public. His attention was called to the fact by a woman who left a watch for repair, claiming it was purchased from the firm and showed an envelope similar to theirs in which the watch had come. The watch was a key winder set in a stem-wind case and was worthless. She had purchased it from an agent claiming to represent M. Straus. Mr. Straus has also learned of other victims of the swindler.

The proposed sale by the receiver of the stock and fixtures of the bankrupt firm of J. T. Scott & Co. has not yet taken place and probably will not. The sale has been tied up by a temporary injunction obtained by the creditors, who are now in possession with the trustee. An offer has been made to the creditors on behalf of the relatives and friends of Mr. Scott to compromise the claims against the firm on a basis of 15 per cent. cash. This offer has been submitted to Judge Brown, of the United States District Court. A meeting of the creditors will be held at the office of referee Seaman Miller, to-day, and all action in regard to the bankrupt estate will be postponed until after this meeting.

The schedules of Abraham Frackman, a jeweler at 379 Grand St., against whom an involuntary petition in bankruptcy was recently lodged by three creditors, were filed in the United States District Court, Monday. They show liabilities of \$20,712 and nominal assets of \$6,593. The assets consist of stock in the hands of the receiver valued at \$3,500 and accounts which amount to \$3,453. The principal creditors named in the schedules are: A. J. Kahn & Co., \$3,777; S. Brodetzky, \$2,378; R. Lass, \$1,400; Jacob Rogers, \$400; I. Rothbart, \$200; Durlach Bros., \$140; S. Konowitz, \$1,100; Charles Altschul, \$831; A. M. Bachrach, \$550; Alois Kohn & Co., \$530; J. Horowitz, \$225; Laubheim Bros., \$400; D. Mayer, \$247; Finkel & Son, \$121; Fried & Co., \$175; L. Segalbaum, \$231; Spero & Hirsch, \$520; Reich & Rothenberg, \$400; Friedberg & Germansky, \$225; H. Markowitch, \$975, and Diebold Safe Co., \$500.

The Mercantile National Bank

OF THE CITY OF NEW YORK,

BROADWAY AND DEY STREET,

Solicits Accounts from the Jewelry Trade.

Traveling representatives may consider these columns open for the publication of any news or items of interest regarding themselves or their confreres.

George Wettstein, Cedar Rapids, Ia., was in San Francisco, Cal., recently, calling upon the trade. He had come down from Portland, Ore., and left San Francisco on

the night of April 7 for southern California towns, after visiting which he will go east via El Paso and Kansas City.

Mr. Ledos, representing the Ledos Mfg. Co., Newark, N. J., visited Denver, Col., last week on his western trip.

N. R. Fuller, traveling representative of the Edwards & Sloane Jewelry Co., Kansas City, Mo., spent several days in Kansas City, last week, re-stocking his trunks.

The following traveling men were in Omaha, Neb., last week: R. L. Robinson, Dennison Mfg. Co.; H. G. Nye, C. Rogers & Bros.; Jack Adler, of J. S. Adler & Co.; Lewis Bruns, Juergens & Andersen Co.

Harry Kennion, Parks Bros. & Rogers; H. E. Vincent, Simpson, Hall, Miller & Co.; E. E. Stockton, The E. Ingraham Co., and Oscar T. Jonassohn, Allen & Jonassohn, called upon the trade in Indianapolis, Ind., last week.

The following traveling men were in Minneapolis and St. Paul, Minn., the past week: Mr. Jacobs, Homan Silver Plate Co.; Rudolph Cony, L. Heller & Son; W. P. Caryl, S. Langsdorf & Co.; Ferguson Mead, the Barbour Silver Co.

Traveling salesmen calling on Davenport, Ia., jewelers the past week were: Harry Smith, Chambers, Inskip & Co.; Samuel Jaskow, Fink, Bodenheimer & Co.; D. W. Wiser, Heintz Bros.; P. W. Stewart, Julius King Optical Co.; Max Noel, Stein & Ellbogen Co.; Whitson Colyer, C. G. Alford & Co.; A. H. Schtrum, for David Marx; and B. Kaufman, for Fred. Kaufman.

The traveling representatives who called on the Kansas City, Mo., trade last week were: Samuel Kunstader, J. Floersheim, Kunstader & Co.; Mr. Parker, Osmun-Parker Mfg. Co.; Leo Goldsmith; W. F. Adams, Simpson, Hall, Miller & Co.; S. K. Jonas, for I. W. Friedman; H. J. Fink, James Kahn's Sons; I. Price, Byron L. Strasburger & Co.; A. J. Sherrard, Enos Richardson & Co.; F. R. Horton, Carter, Hastings & Howe; R. H. Schley; Augustus Dubosq; H. G. Nye, C. Rogers & Bros.; and representatives of the American Waltham Watch Co.

The following traveling men recently interviewed the jewelers of Portland, Ore.: Zach. A. Oppenheimer, New York; Julius A. Young, successor to Haskell & Muegge, San Francisco, representing Enos Richardson & Co., E. Ira Richards & Co., Dominick & Haff, Rogers & Brother, and T. B. Clark & Co.; E. B. Dana, Carter, Hastings & Howe, New York; W. A. Weichmann, representing Frank W. Smith, Gardner, Mass.; W. P. Hammett, Whiting Mfg. Co., New York; H. C. McConnell, C. G. Alford & Co., New York; Louis Freund, Henry Freund & Bro., New York.

Among the traveling salesmen who recently passed through Detroit, Mich., were: Mr. Ford, Ford & Carpenter; William S. Percy, Benj. Allen & Co.; F. D. Smith, Reeves & Browne; W. J. Carrow, Mandeville, Carrow & Crane; S. C. Howard, Dominick & Haff; E. F. Tyler, Edward Todd & Co.; M. E. Van Bergh, Van Bergh Silver Plate Co.; Richard C. Rhode, Bawo & Dotter; E. C. Stone, Battin & Co.; Fred. J. Foster, Unger Bros.; C. B. Bartlett, Whiting Mfg. Co.; William Hanauer, Julius Becker & Co.; Lewis L. Squire, F. H. Cutler & Co.; E. S. Smith, Smith & North; Robert B. Steele, Kohn & Co.; M. Klipper, Hipp, Didisheim & Bro.; W. J. Lane, Geoffroy & Co.; Frederick C. Staudinger, Sansbury & Nellis.

Traveling salesmen visiting Boston, Mass., last week included: Herman Friese, Fred. W. Lewis & Co.; Jerome C. Adler; Irving L. Russell, L. Tannenbaum & Co.; J. Karelsen, E. Karelsen & Co.; L. Glick, Hammel, Riglander & Co.; Mr. Peck, The Waite-Thresher Co.; George Sylvia, Mount Washington Glass Co.; Mr. Nellis, of Sansbury & Nellis; H. W. Dunham, International Silver Co.; Wallace Campbell, Day, Clark & Co.; Mr. Keller, Keller Mfg. Co.; Mr. Untermyer, Charles Keller & Co.; Harry Hayes, The Howard Sterling Co.; H. B. Beach, Jr., The International Silver Co.; Mr. Metcalf, The Plainville Stock Co.; Mr. Jones, Jones & Woodland; Mr. Larter, Larter, Elcox & Co.

Calling on Syracuse, N. Y., jewelers the last two weeks were: W. J. Lane, Geoffroy & Co.; Jesse L. Browne, Henry Freund & Bro.; William Kinscherf, Jr., for William Kinscherf; Henry Greenthal, for J. J. Cohn; Mr. Neumann, Bergstein & Son; M. Klipper, Hipp, Didisheim & Bro.; M. B. Rosenback, for William I. Rosenfeld; Mr. Thornton, McIntire, Magee & Brown; H. A. Latimer, William W. Hayden Co.; J. C. Bigalke, for A. Wittnauer; William J. Tighe, Eisler & Laubheim; D. Zimmern, Zimmern, Rees & Co.; S. Cohn, Oppenheimer Bros. & Veith; E. B. Downs, Hayden W. Wheeler & Co.; Mr. Mayer, Powers & Mayer; Fred. S. Eason, N. H. White & Co.; Emanuel Jacobson, Jacobson Bros.; Mr. Fenton, William L. Gilbert Clock Co.; E. F. Skinner, Henry Ginnel & Co.; Henry Cowan; C. F. Sweasy, William B. Kerr & Co.; Frank S. Ottley, Riker Bros.; O. S. Clark, C. G. Alford & Co.; Leon H. Coffin, Landers, Frary & Clark; T. W. Smith, Horton, Angell Co.; Paul Gesswein, F. W. Gesswein Co.; Moe Adels, Rees & Yankauer; L. E. Van Horn, Philipp Zellenka & Son; James A. Cheney, Alfred H. Smith & Co. Harris & Gips, The Mexican Art Leather Co., Fontneau & Cook and Frank & Shire were also represented.

Eastern Manufacturers' Salesmen Hold High Revel.

PROVIDENCE, R. I., April 14.—About 75 jewelry men and their friends had a most enjoyable time last evening in Tillinghast's parlors, the occasion being the annual banquet and reunion of the Manufacturing Jewelers' Salesmen's Association. A social hour was enjoyed while the banqueters were assembling from 6.30 until 7.30 o'clock, after which the company sat down to an excellent dinner. There was none of the formality which sometimes characterizes similar functions and the prime object—an evening of thorough social enjoyment, such as jewelry salesmen know how to have—was most successfully accomplished.

President J. Thomas Inman inaugurated the informal after dinner exercises with brief remarks, in which he said that the idea of the organization was not to have a great number of members, but to have those members sincere in the principles of the association, which were the mutual help and sustenance of the members. President Inman introduced as the first speaker A. B. Lewis, a member of the editorial staff of one of the local dailies. Mr. Lewis did not make a set speech, but ventured to tell a few good stories, setting an example that was followed by those who came after.

John F. Fleming, representative of John T. Cuddy & Co. and a member of the committee of arrangements, in the course of a short address said that he had been one of the first to consider the organization of the Manufacturing Jewelers' Salesmen's Association for the purpose of furthering the interests of the salesmen on the road. He spoke of the difficult conditions under which representatives of the local manufacturers labored in endeavoring to sell goods to jobbers at the hotels

in this city and the humiliation the salesmen sometimes had to suffer. He believed the time not far off when the manufacturers as well as the salesmen would see the necessity for establishing some sort of an exchange where the salesmen could meet buyers and show goods to the best advantage. Such a project was one of the original objects of the association. Mr. Fleming said that by all working together the desired end could be accomplished.

Others who spoke in a more informal vein were Sidney O. Bigney, of S. O. Bigney & Co., Attleboro; W. F. Maintien, Plainville, Mass.; A. W. Strandberg and Capt. George H. Sykes, of Sykes & Strandberg, Attleboro, and C. T. Barbour, of the Plainville Stock Co. During the evening an attractive musical programme was rendered by A. C. Moore's orchestra, George W. Dover sang several solos and Fred Mack contributed some excellent stories. The following are the names of those who were present and the firms with which they are connected:

J. Thomas Inman, of J. T. Inman & Co., Attleboro, president of the Association; A. W. Strandberg, of Sykes & Strandberg, Attleboro, former president; S. O. Bigney, of S. O. Bigney & Co., Attleboro; A. E. Donley, Hamilton & Hamilton, Jr., Providence, secretary; John F. Fleming, J. T. Cuddy & Co., Providence; E. W. MacAllister, Irons & Russell, Providence, treasurer; A. B. Lewis, Providence News; Frank Barton, P. J. Cummings & Co., Attleboro; O. W. Hawkins and Joseph Catlow, O. W. Hawkins & Co., Attleboro; F. A. Fairbrother, B. K. Smith & Co., Providence; E. S. McLaughlin, E. S. McLaughlin & Co., Providence; H. E. Jenks, with E. J. Ettlinger; Henry F. Bischoff, Fulford & Hobart, Providence; Bertram Lenzen, Lenzen & Rueckert; F. E. Allen, Elmer Himes, C. H. Allen and W. F. Maintien, C. N. Allen & Co., Attleboro; Walter B. Marble, Marble, Smith & Forrester; W. A. Cook, Fontneau & Cook; F. C. Somes, S. O. Bigney & Co.; S. A. Bennett, Providence; D. N. Jacoby, Providence Stock Co.; M. L. Jacoby, Manchester Mfg. Co., Providence; Harry Cutler, Cutler Jewelry Co., Providence; George H. Sykes, Sykes & Strandberg, and guest; George H. Snell, Attleboro; Alfred Meyer, W. H. Mason; Virgil Blackinton; George W. Dover, Providence; C. Warren Tuttle, Providence; J. Frank Bloomer, George H. Bromley, George F. Phillips and Frank Reynolds, Cory & Reynolds, Providence; Walter Griffith, R. L. Griffith & Son Co.; Samuel Wild, S. Noble, S. S. Wild & Son; Thomas E. Bennett, T. E. Bennett & Co.; Peter Lind, Heimberger & Lind; C. O. Valentine, Thomas W. Lind and Fritz Kraus, with Thomas W. Lind; Charles A. Eddy and Frank P. Eddy, P. S. Eddy & Co., Providence; H. M. Williams, H. M. Williams & Co., Attleboro; Thomas McWilliams, McWilliams Mfg. Co., Providence; W. F. Kilkenny, H. M. Williams & Co., Attleboro; Charles F. Denison; C. T. Barbour, Plainville Stock Co.; A. L. Young, Young Bros.; B. Billinger, with C. Minahan and the Cutler Jewelry Co.; and Adolph Lederer, H. Lederer & Bro.

The committee in charge of the reunion and banquet consisted of J. Thomas Inman, chairman; A. E. Donley, secretary; E. W. MacAllister, treasurer; A. W. Strandberg, John Fleming and Joseph Catlow.

L. Gutmann & Sons, Cincinnati, O., have purchased the Cyclone manufacturing plant at Kokomo, Ind., for the manufacture of the "Cyclone" steel soldering flux, hard soldering flux and anti-oxidizer, which are a new discovery in the watchmaking and jewelry world, and will prove a revelation in the work room.

The store of the R. E. Olney estate, Mansfield, Pa., will be reopened.

French Reciprocity Not Dead.

Indications Are That Jewelers Have Only Postponed Action.

ATTLEBORO, Mass., April 13.—Recent developments have brought to the front once more the French reciprocity treaty and the question whether this measure is dead or only sleeping. As is well known now, the manufacturing interests of the jewelry industry would like to know that it is dead, but it is by no means certain that it is. On the contrary, there are signs that certain interests are endeavoring to bring this treaty into active existence and push it through Congress either in its original or an amended form.

A canvass of National Senators and Congressmen was made a few days ago, in relation to the French treaty and the possibility of that measure being killed and a new one covering the same ground favorably reported to the next Congress.

John A. Kasson, who framed the measure that created so much anxiety among the jewelers a few months ago, is said to be at work on more than one treaty measure at the present time, with the understanding that they are to be introduced next Winter.

Those who have been looking into the matter have undertaken to learn the policy of the Republican party on the subject of reciprocity and the general conclusions seem to point to the fact that the reciprocity idea is not dead. The interest this has to jewelers is that every movement in this direction has a direct bearing on the prospects of the proposed French reciprocity treaty, and the passage of the French treaty would mean, they think, the extinction of the particular branches of the jewelry business located in Attleboro, North Attleboro, Plainville, Attleboro Falls, Mansfield, Chartley, Pawtucket and Providence.

The jewelers are of the idea that President McKinley is on the side of the passage of the treaty, but when it has come up in the past Senators Aldrich, of Rhode Island, and Lodge, of Massachusetts, have secured postponements, amounting to defeat. Senator Aldrich was the special champion of the jewelers. In fact, it was the opposition of the jewelers alone which defeated the ratification of the French treaty. The jewelers have been the victors for over a year and the credit is due to a small committee appointed by Co. C Association in Attleboro.

For the purpose of extending their business the J. E. Limeburner Optical Co., 1702 Chestnut St., Philadelphia, Pa., intend to incorporate the company under the laws of Pennsylvania and have applied to the State Department at Harrisburgh for a charter. The company will manufacture and sell at wholesale and retail optical, surgical and scientific instruments of every description. Recently John E. Limeburner & Co. absorbed the Standard Optical Co., Reading, Pa., and transferred the factory to 313-315 Vine St. The firm will comprise J. E. Limeburner, P. S. Reid, J. E. Reid and Professor J. E. Haines.

A Pair of Pennyweighters That the Trade Should Beware of.

One day last week, about 6 o'clock in the evening, a man and a woman called at the store of a well known New York retail jewelry firm and asked to be shown some diamond rings. The clerk placed a tray before them and the woman, who did most of the talking, explained that they wished to purchase the ring as a wedding present for her sister, as they desired to give her something handsome and at the same time useful. After carefully examining a number of rings, one valued at \$75 was laid aside at their request and on their promise to return for it at 5 o'clock the following afternoon. Instead of returning at the hour mentioned the two appeared at 6.45 o'clock, just as the store was about to close. They requested to be shown the ring and selected also another for \$75. These two rings were removed from the tray and the man held them up, apparently with the purpose of examining them better under the light. They finally decided that they would take the ring originally selected and, after leaving a \$2 deposit to have the ring reserved for them, they left the store. The next morning it was discovered that a ring valued at \$140 had been removed from the tray and another one, an imitation diamond, substituted for it, presumably by the woman while the man was examining the rings. The police were immediately notified and are looking for the swindlers.

The man is described as about 33 to 35 years old, about five feet 10 inches in height, of slight build, his face rather emaciated, of sallow complexion and typical Yankee physiognomy. He had a small black moustache, dark hair and dark eyes and a peculiar broken nose, which looked as though it had been smashed in the middle. He weighed about 140 pounds and was dressed genteelly, like a clerk, and wore a light Spring overcoat. The woman was about 30 years old, about five feet one inch high and looked like a refined American woman. She had steel gray eyes and a somewhat elongated face, and wore spectacles with thick glasses. A peculiarity noticed about her was that in speaking she showed all her teeth, which were in bad condition. Her complexion was rather pale and her weight is estimated at 125 pounds. The stolen ring had a Tiffany setting and the diamond was a fine white stone, weighing 1 1-64 karats.

The next monthly of the Imperial Mfg. Co., to be issued the latter part of the month, will contain among other interesting matter four pages of attractive advertisements for the retail jeweler's use, any one of which would amply repay the jeweler for writing for a copy. They are practical advertisements to be used by the jeweler in his home paper or in circulars to his customers, and are written by a man who has had 15 years' experience in the retail trade and is qualified to advise in such matters. The average jeweler is too apt to look upon the Fall as his only sales period and to be content with his repair work the remainder of the season. The Imperial Salesman Monthly, Masonic Temple, Chicago, tells how to do business each day in the year.

News Gleanings.

A. E. Jaqua has opened a jewelry store in Elysian, Minn.

The death is reported of P. J. Slider, Lake Crystal, Minn.

The Messrs. Hartman will erect a building in Bowbells, N. Dak., and will open a clock, watch and jewelry business.

M. Barr, formerly in business in Howard Lake, Minn., contemplates opening a jewelry store at Annandale, Minn.

James C. Bates, Haverhill, Mass., has made an assignment to John A. Colby. No figures are given out, but poor business is given as the cause for the action.

The branch store of the Greenleaf & Crosby Co., at Nassau, N. P., Bahama Islands, is closed for the season. It was managed during the Winter and Spring by Ralph Payne, from the main store at Jacksonville, Fla.

Owen & Clark have begun business at York, Neb.

N. W. Lickfold has opened a store at Gadsden, Ala.

Mr. Croy, Dahlonga, Ga., will move to Fairmont, Ga.

H. O. Richardson has opened a store at Rutland, Vt.

Frank Brown has opened a store at Wilkes-Barre, Pa.

Hiram Barricklow, Arcolo, Ill., will enlarge his business.

Edward J. Spall will open a store at Pittsfield, Mass., May 1.

E. L. Heinrich has succeeded Green & Heinrich, Watertown, N. Y.

A. J. Schneider has opened a new jewelry store at Lyon's Falls, N. Y.

M. Hutchinson intends to go into the jewelry business in Stockport, O.

Edward Saks will establish a jewelry and optical store at Mansfield, Pa.

Fisk & Co., Napoleon, O., have moved to improved quarters in the same town.

The Emerich pharmacy, Nottingham, O., has added a jewelry and optical department.

F. F. Wesley, recently located at Atlanta, Ga., is branching out to cover nearby towns.

F. C. Smith, Watertown, N. Y., has had his entire store newly papered and redecorated.

Hosea D. Fisher, of Watertown, N. Y., will open a jewelry store at Oswego, N. Y., about May 1.

G. A. Schlechter, Reading, Pa., has secured a contract for 7,000 Pan-American Exposition badges.

E. C. Haywood, Potsdam, N. Y., has been confined to his house by illness for several weeks past.

L. P. Juvet, Glens Falls, N. Y., has removed to a new location opposite the soldiers' monument.

George H. Church, Oak Grove, Mo.,

has sold out to E. A. Church and moved to Greenwood, Ind.

George R. Rogers, Lisbon Falls, Me., lost \$1,200 by fire damage, April 6; nearly covered by insurance.

A. Miller, formerly of Marsh & Miller, Fort Dodge, Ia., has opened a store for himself at Fort Dodge.

George Burdoin, Freeport, O., has returned to his home in Orrville, O. His son will conduct the business.

E. L. Rinkenback, Harrisburgh, Pa., is improving a new and larger store into which he will move about June 1.

John E. Bell, Ogdensburg, N. Y., has presented a handsome oak clock to the new Hotel Norman, that city.

Charles A. Thorpe, of Olean, N. Y., has purchased and taken possession of the business of John Joy, Potsdam, N. Y.

Fourteen watches, 83 rings and 15 chains were stolen from the store of C. Pardee & Co., Lattimer, Pa., last Saturday.

M. F. Warren, Colorado Springs, Col., has been appointed official watch inspector of the Colorado Springs and Cripple Creek District Railway.

Sam Cusbert was arrested recently in Jacksonville, Fla., on a charge of robbing Louis I. Stephens, of that city, of jewelry, much of which was found on the prisoner.

A. M. Felson has been making many improvements to his store at Gouverneur, N. Y. These include an extension of 15 feet to the storeroom and several new deep show cases.

Joseph A. Smith, designer and engraver for John E. Parker, Morristown, N. J., has resumed work, after having been confined to his bed for nine weeks, due to an operation for appendicitis.

The C. H. Willis Jewelry Co., who commenced business on Dec. 1 last, at 13 S. Royal St., Mobile, Ala., report a gradually improving trade. They have a work-

shop run by electric power, the first and only one in Mobile.

William Oscar Ladd, Tilton, N. H., and son of the late H. H. Ladd, who was for many years engaged in the jewelry business in Manchester, died April 4, aged 57 years. He was an Odd Fellow.

J. A. Bland & Son, Jeffersonville, O., who have been in the jewelry business in Jeffersonville for the past few months, are moving to Jamestown this week, where they will engage in business.

On account of poor service, Fred L. Hall, Carthage, N. Y., has removed electric lights from his store and installed a system of gasoline lamps, and he now has the most brilliantly lighted store in town.

George E. Arnold, Worcester, Mass., has filed a protest against the erection of a proposed sidewalk clock near the Worcester City Hall. He argues that the illumination of the present city hall tower clock, although more costly, would benefit more people.

Arthur Carr, of Newton, Pa., has been jailed on a charge of larceny and false pretense preferred by jeweler Oscar Heyer, Scranton, Pa., who alleges that Carr took home a \$32 watch on approval, promising to return the next day and settle, but that he failed to appear.

L. L. Freeman, formerly of Chicago, Ill., has opened a jewelry and optical establishment at 317 Alamo Plaza, San Antonio, Tex. Mr. Freeman sold out in Chicago on account of failing health and went to San Antonio thinking the climate would benefit him.

E. B. Steele, Newark, N. Y., will open a branch jewelry store in the place where E. W. Scribner has been located for the last two years, at Phelps, N. Y. George Whittleton, of Ogdensburg, will have charge of the store. Mr. Scribner will locate at Sag Harbor, L. I. Mr. Steele was previously in business at Phelps.

THIS TIME OF THE YEAR

ought to be the **most important** of any to the manufacturer. In another month the buyers will begin to look 'round and ask "**Who's got it?**"

We produce something new almost every day and have time in between to make up special patterns. **Sample time** to you is precisely the same as **seed time** to the tiller of the soil. A very few dollars invested in this way may make your fortune, and certain it is that you can't lose much.

GEO. W. DOVER,

80 Clifford St., Providence, R. I.

P. S.—Mix a few of Dover's ideas with yours and *watch* them effervesce.

TAKES ITS WAY

WESTERN SUPPLEMENT

VOL. XLII.

NEW YORK, WEDNESDAY, APRIL 17, 1901.

No. 11.

Chicago Notes.

All communications in reference to the Chicago department of *The Jewelers' Circular-Weekly*, addressed to Stephen Parlin, 134 Van Buren St., Room 414, Chicago, will receive prompt attention.

TRADE CONDITIONS.

Business continues about unchanged for the week, though reports from the various lines are rather mixed, some lines reporting encouraging trade for the season while others regard trade quiet. In sterling silver and optical goods there has been a good business all Spring, while in silver plated ware things are very quiet. Watch movements seem to have reached normal conditions again and the watch case business is fairly good. The general jobbing houses are receiving rather more orders than a year ago this month, and while there is complaint from a few houses, on the whole the jobbing trade is satisfactory. The general mercantile trade of the west is from 10 to 15 per cent. ahead of the corresponding week last year, and it is fair to assume that the jewelry trade is holding its own as compared with other lines. Interviews with leading jobbers indicate that about this rate of increase has been true in their individual cases.

Charles Peck, South Ottumwa, Ia., will discontinue business.

Word is received that E. W. Davis is opening a store at Grand Rapids, Mich.

H. Eyster, formerly in the jewelry business at Mansfield, O., is reported to be in China.

D. L. Thomson, Grand Rapids, Mich., has been sent to the Kalamazoo Insane Asylum.

J. L. Goldstein, Springville, Ia., visited a week in this city, accompanied by his daughter.

Fred E. Hyatt, of the Philadelphia Watch Case Co., is on a 10 days' trip to western cities.

James H. Howell, for many years located at Sharon, Wis., has moved to White Pigeon, Mich.

President Hulburd, of the Elgin National Watch Co., returned from New York, Saturday, after a two weeks' visit east.

A. Vander Zee, Pella, Ia., is enjoying a vacation at Leeuwarden, Holland, his native town, and will be absent from the country two months.

Jacob Franks, president of the Illinois Watch Case Co., is back from a five weeks' visit in southern California, principally at Coronado Beach.

O. F. Thomas, auditor for the International Silver Co., arrived, Friday, for a visit of a few days at Chicago in the interests of the company.

J. C. Herkner, Grand Rapids, Mich., has joined the army of Mystic Shriners

who are visiting at Honolulu. He will return early next month.

H. L. Dodge, Bryant, S. Dak., has sold his business to M. F. Troxel. Mr. Dodge contemplates entering the jewelry business in the State of Washington.

W. F. Rogers Mfg. Co., of Chicago, have incorporated with a capital of \$20,000 for manufacturing silver ware; incorporators, W. F. Rogers, K. Scanlon, Louis H. Carr.

S. C. J. Peterson, Morris, Ill., is improving in health, but very slowly. He has been confined to his bed for 15 weeks past and the chances for his recovery are now favorable.

W. C. Schoelkopf, dealer in watch materials and jewelers' supplies, Norway, Mich., was last week in the city to make arrangements for direct purchases from manufacturers in those lines.

The arrival of the first baby in Harry A. Gowdy's household at Coldwater, Mich., is announced under date of April 3. He will be known as Kellogg E., when he enters the jewelry business.

Francis Jewelry Mfg. Co., of Chicago, have been incorporated with a capital of \$12,000 for the manufacturing of gold and silver jewelry; incorporators, Thomas F. Rooney, Ferdinand Goss, David H. Jackson.

The house men at Otto Young & Co.'s are making up their slate for a ball team and will begin active practice at the commencement of the early closing season. They have some great talent in this line this year and will soon issue a sweeping challenge to the trade.

A handsome line of Meriden Cutlery Co. carvers in stag, rubber, pearl and celluloid was installed last week in the salesrooms of the International Silver Co., with whom arrangements have been made to carry the line. The goods will be looked after by J. K. Caldwell.

A. W. Thoma, Mineral Point, Wis., visited the trade on his return from the funeral of his father at Kalamazoo, Mich. Five brothers in the jewelry business attended the funeral—A. W., of Mineral Point, Wis., C. C., of Battle Creek, Mich., G. H., of Three Rivers, Mich., and Thoma Bros., of Kalamazoo.

The Towle Mfg. Co. are displaying a handsome line of trophy cups in *art nouveau*, quite different from anything heretofore made in this country. It is a distinctive style of work brought out by the 20th century, giving patterns of remarkably graceful outlines in marked contrast to the long continued styles of

the 15th century which have ruled for five centuries past.

Buyers were here in fair number last week, though but few are reported in the following list: A. A. Burbank, Rochelle, Ill.; Mr. Douglas, Dysart, Ia.; F. E. Mills, of Mills & Hupp, Streator, Ill.; K. C. Pedersen, Warsaw, Ill.; C. F. Graff, Elkhorn, Wis.; F. E. Shortess, Jr., Traer, Ia.; Mr. Streeter, Spearfish, S. Dak., and J. A. Masters, Doon, Ia.

L. E. Erickson, the Evanston jeweler who is suffering from auto-hypnotism, was taken to the Detention Hospital, April 11, on the advice of his physicians, Dr. James Baird, and Dr. Frank Edwards. Dr. Edwards stated that the hypnotic spells which Erickson was subject to indicated mental trouble. All Wednesday night a policeman watched beside Erickson, as it was feared that he would become violent. Plans are being made to have him taken to a private sanitarium for treatment. Erickson has long been a believer in spiritualism.

St. Louis.

TRADE CONDITIONS.

The trade conditions last week were most unfavorable. The weather was bad and trade not only among jewelers but in all other lines suffered. A well known jeweler said that the retail trade in all classes in St. Louis alone suffered at least \$100,000 last Saturday. This he knew from what several well known retail men told him.

S. A. Rider, of S. A. Rider Jewelry Co., became an Elk last Thursday night.

Joseph McKenna, of the Bauman-Massa Jewelry Co., has left with his wife and family for a two weeks' vacation in Texas.

Sam H. Bauman, of the Bauman-Massa Jewelry Co., will leave the last of this month for Europe. He will visit many places of interest, and while away will lay in a stock of diamonds.

The Bauman-Massa Jewelry Co. have sent out notices that they will close their salesrooms at 5 o'clock p. m. every day until further notice, except on Saturdays, when they will close at 1 o'clock p. m.

Charles Schoen, of the International Silver Co., Holland building, has just returned from an extended trip through Missouri. He says that conditions are good everywhere and he predicts a fine trade later on in the season.

The retail and wholesale jewelers are working to elect Morris Eisenstadt, of Eisenstadt Mfg. Co., a director in the World's Fair Association. He is a progressive business man and he would make a good representative for the jewelers.

D I A M O N D S .

If you expect to be in the market for Diamonds this year now is the time to place your orders ∅ During the past few months there has been an additional advance in Diamonds and there is still a strong upward tendency ∅ At present we are filling orders for Diamonds at prices that have ruled throughout the Winter, but we cannot say how long this will continue ∅ However, considering our large and well-assorted stock, we feel sure we can meet any demand you may make upon us at present.

S P R I N G C I R C U L A R .

We will issue, within a few days, a Spring Circular which will contain new Jewelry and other articles particularly desirable from the standpoints of both quality and price ∅ Our main aim will be to make this announcement interesting to you in a most substantial way—by acquainting you with the new Spring ideas and by advising you of special opportunities in Watches and other lines which you will find most advantageous ∅ When you receive the above-mentioned circular, examine its pages carefully—it will pay you.

Cincinnati.

Sol. Fox, of Fox Bros. & Co., leaves this week for a trip to Europe.

L. Langdon, Baltimore, Md., has contracted with Albert Bros. to represent them in the southwest. He will sell clocks and silver ware.

There is no change in the strike situation at the Wadsworth Watch Case Co. factory. There is a probability that in future there will be no soldiering. The factory is still running, turning out cases daily.

The Florentine Statuary and Importing Co., Cincinnati, have been incorporated with a capital stock of \$10,000. The incorporators were Edward Cline, Ed. Oetting, Henry Kranning, Alexina Emery and Albert Andrews.

Joseph Phillips and M. Geigerman have returned from a very successful trip, the former in the west and the latter in the east. They will go out again in a few days. Mr. Phillips is detained home by the serious illness of his mother.

Loring Andrews & Co. were a few days ago robbed of a \$300 diamond ring by an old trick. The ring was taken from the tray and a "phony" substituted. The man supposed to have played it was in the store two weeks ago. He was in twice, so it is presumed he called the first time to see the ring he wanted and get a proper substitute. The thief is, no doubt, a professional.

Rookwood Pottery Co. are completing a collection of the various styles of the wares they manufacture for exhibit at the Pan-American Exposition. Mr. Taylor, president of Rookwood Co., is aiming to make this exhibit rival their Paris exhibit of last year, and will show Americans some types of pottery that have no equal in the world. They will occupy space in the Court of Honor in the Manufacturers building.

Indianapolis.

E. M. Wilhite, Danville, Ind., is conducting an auction sale.

Julius C. Walk has returned from a several weeks' sojourn south.

L. Snodgrass, New Palestine, Ind., has sold out and gone to Oklahoma.

J. W. Hudson, jeweler, Fortville, Ind., is putting in a soda fountain for the Summer.

Silas Baldwin, of Baldwin, Miller & Co., left April 11 for a trip to Washington, D. C.

Gus Craft, of A. P. Craft & Co., visited the trade in northern Indiana last week.

H. A. Comstock is making many changes and improvements in the room at 48 E. Washington St., which he will soon occupy. Meanwhile he continues his "Removal sale."

Simon L. Kiser has withdrawn from the Indianapolis Jewelry Co. and will start in business for himself under the firm name of Simon L. Kiser & Co., 403 and 405 Stevenson building. Isidore Grohs will continue the business of the Indianapolis Jewelry Co. Mr. Kiser has gone east to buy goods for his new firm.

Minneapolis and St. Paul.

Henry J. Hansen, a pioneer jeweler of St. Paul, with a store at 353 E. 7th St., is dead.

C. D. White & Co., Minneapolis, have an elaborate display of trophy cups and other articles for which the Minneapolis Whist Club are now contesting.

Louis Pearlstein has left for the North Dakota trip for J. S. Cohen & Co., St. Paul. J. S. Cohen has also gone for a fortnight's trip through southern Minnesota.

H. E. Schloss, manager of B. Schuette, Minneapolis, is back from a trip to Duluth and Superior. E. R. Apt, traveling for the same house, is back from northern Michigan, Wisconsin and Minnesota and has left for the Dakotas.

Among the country dealers in the Twin Cities the past week, were: Lewis Bros., Eau Claire, Wis. and Eveleth, Minn.; Albert Ross, Webster, S. Dak.; Joseph W. Plyhel, Washburn, Minn.; G. R. Simons, Langford, S. Dak.; Gus. Huber, West Superior, Wis.

Frank C. Worrell, Minneapolis, has discontinued his auction sale of his stock and advertises a sale at cost until April 25, on which date he will close his store. Mr. Worrell is taking a thorough course in optics with C. A. Snell and will remain in Minneapolis for about two months. When he completes the course he will leave for the far west in search of a new location.

Charles Horwitz, jeweler and bicycle repairer, Minneapolis, was arrested, April 5, charged with disorderly conduct. The officers who arrested him are serving as bicycle inspectors. They wanted to look over Horwitz's premises. The proprietor objected, saying it was a proceeding wholly unwarranted by law or common fairness. The officers thought otherwise. Horwitz got excited and pulled a revolver.

The Minneapolis Jewelry Mfg. Co., Minneapolis, will move from their present quarters on Washington Ave. to the Andrus Block as soon as their rooms on the second and third floors of that building are completed. The Minneapolis company have been engaged in the jewelry manufacturing business in Minneapolis for 15 years and this is the second move they have been forced to make owing to an increase in business. H. L. Carpenter, who is connected with the company, has also been given charge of the Oliver typewriter branch here, which includes Minnesota, North Dakota and South Dakota.

Denver.

Col. J. D. Lewis, who has been conducting auctions in this State, left, last week, for Atlanta, Ga.

M. F. Warren, Colorado Springs, and Mr. Brannan, of Brannan Bros., Loveland, were in Denver last week on business.

T. J. Lewis, president of the Lewis Jewelers' Supply Co., has just returned from a three weeks' trip in Texas and the southern part of this State.

Louis Hattery has purchased the stock of jewelry of William B. Sherratt, Wapello, Ia.

San Francisco.

J. A. Young has gone on a three weeks' northern trip.

G. Wallin has entered the employ of Shreve & Co.

H. E. Hall, of A. I. Hall & Son, has returned from his trip to Honolulu.

Ben Bleibel, formerly with Neil O'Neill, is now with James A. Sorenson, 103 6th St.

P. W. W. Murthin, formerly watchmaker with A. I. Hall & Son, is now with Neil O'Neill, 20 Market St.

A. Huegenin, who was head watchmaker for Shreve & Co., has left their employ. He will take a rest of several months.

Among the visiting jewelers in town last week were: L. Katz, Sutter Creek, Cal.; Peter Johnson, Angel's Camp, Cal.; J. L. Ryder, San Jose, Cal.; W. Smith, Salt Lake City, Utah, and C. H. Leggett, Merced, Cal.

The annual Easter decorations at Shreve & Co.'s were unusually attractive, consisting of sprays of tamarack, cork elm, varied fruit blossoms, honeysuckle. Beauty of Glazenwood and other roses. A bunch of St. Joseph lilies was among the most striking features.

Mr. Powers, who has been with the New Haven Clock Co., Chicago, has recently arrived in San Francisco and assumed the duties of manager of the New Haven Clock Co.'s department of George Greenzweig & Co. This week he will leave for an extended missionary trip covering the entire coast.

David Glickman, jeweler, Devisadero St., has been sentenced to six months in County Jail. He gave a chattel mortgage on his furniture to C. T. Rea and afterward disposed of it to another person. He was arrested several times by customers for pawning watches and jewelry left with him for repairs.

Pacific Coast Notes.

J. F. Ferguson has opened a stock of jewelry, notions, etc., in Hemet, Cal.

George A. Sparks has opened a watchmaking and repair shop on California St., Redding, Cal.

C. W. Wickersham, for several years watch inspector for the Southern Pacific Railroad Co., opened up a jewelry establishment at 1231 19th St., Bakersfield, Cal., last week.

Walter Steele, of Santa Barbara, Cal., who has returned from a prospecting trip through the Los Prietos Rancho, just over the summit of the mountains, has brought back some interesting specimens of white topaz. There is a tract over a mile square on the Los Prietos where topaz is found. Steele discovered the place 15 years ago. The stones lie on the surface and glitter in the sunshine. They may also be washed out of the dirt like gold dust. Steele says he collected about 100 of these stones in two hours. In size they vary from a sixteenth of an inch across to the size of a small bean. It is stated that the larger stones are worth from \$1.50 to \$2.50 each. The Monte Cristo Oil Co. will investigate the supposed mine and will develop it if there seems to be reason to go ahead with operations.

AN AUCTION

conducted by me is an assured success and a positive guarantee against injury to your future business. Having conducted nearly all the large sales in the United States and Canada in the last twenty-one years, I am prepared to give the best of reference, and do give any manufacturer or jobbing house, or jewelry or silverware salesman in America as a special reference.

Pacific Northwest.

C. H. Gasser, formerly at Hailey, Idaho, has located at Soda Springs, Idaho.

P. G. Johnson is reported to have started a jewelry store at Rockford, Wash.

W. L. Coppennoll and R. S. Smith have formed a partnership at Cottage Grove, Ore., and will establish a jewelry store there.

D. T. Pritchard has moved his stock of goods from Medford, Ore., to Jacksonville, Ore., and has located at the Masonic building.

E. D. Elwood, Medford, Ore., has leased a piece of ground for a term of five years and will erect a one story brick jewelry store.

The jewelry store of D. N. Keene, North Yakima, Wash., was recently robbed of gold watches and diamond rings valued at \$250.

M. Schwartz, a jewelry manufacturer of Minneapolis, Minn., is in Everett, Wash., looking for a favorable location for a jewelry establishment.

B. Forcimmer has opened jewelry stores at Extension, B. C., and Ladysmith, B. C. Mr. Forcimmer was formerly engaged in the jewelry business at Nanaimo, B. C.

Charles Turner, the colored man tried and convicted of stealing a diamond ring from a jeweler at Portland, Ore., has been sentenced to two years in the penitentiary for his offense.

William Ainsley and Jeweler Culp, Boise, Idaho, own an opal field located at the head of Squaw Creek, Owyhee county. Some fine specimens have been secured and an offer of \$50 was refused for one.

F. C. Lawrence, formerly of Port Washington, Wash., recently purchased an outfit of tools and materials for manufacturing purposes from Joseph Mayer & Bros., Seattle, Wash., and left for Dawson City, Y. T., to start a manufacturing shop.

The Lawrence L. Moore Co., Seattle, Wash., have been incorporated with a capital of \$50,000, by Lawrence L. Moore, C. H. Black and F. W. Baker, to deal in and manufacture jewelry. The company succeed Graham & Moore, reported dissolved last week.

Charles H. Winter, for the past 15 years with S. H. Clausin & Co., Minneapolis, Minn., has accepted a position with Joseph Mayer & Bros., Seattle, Wash., as manager of the tool and material department. George McCormack, of San Francisco,

Cal., has accepted a position with Joseph Mayer & Bros.

Pittsburgh.

TRADE CONDITIONS.

Spring trade is excellent and everything points to a continuance of the favorable situation. Many firms have been in a state of ferment during the past four weeks, preparing for a change of quarters and the subsequent settling therein. Very little business was lost by these changes, as considerable work necessitated thereby was done in the evening after shopping hours. The downtown section of the city has been benefited by the addition of these new stores, which have been beautified by the latest and most handsome fixtures, and in every instance by the newest stock. Graf & Niemann, on 6th St.; L. W. Vilsack, on Fifth Ave., and Hardy & Hayes, on Fifth Ave., have spared no expense in the fitting up of their new establishments, while A. E. Siedle, East End, is justly proud of the handsomest store in that busy section. Of the wholesale people who were obliged to "fit" by April 1, West, White & Hartman to the Bijou building, and A. E. Siviter & Co. to the Goddard, Hill & Co.'s building, are pleasantly situated and ready for business. All the above mentioned firms had "opening days" last week in most appropriate fashion. The majority of other dealers are doing a great deal of fixing up and altering interiors. All the local travelers are out on the road and sending in most satisfactory orders. Collections are a little slow, but in no way doubtful. Money is plentiful in this district and good, firm prices are generally being maintained, so there is no doubt concerning a prosperous season.

C. S. Wylie, Oakland district, has taken the entire establishment in which he is located.

Mr. Murray, formerly with W. W. Wattles & Sons, is now with E. P. Roberts & Sons.

The marriage of Emil Geilfuss, of Heeren Bros. & Co., and Miss Clara Heeren, will take place April 19.

E. P. Roberts & Sons are improving their store front by painting. Their building had a narrow escape from destruction in the recent fire on Market St.

Kidd Bros. & Burgher's Steel and Wire Co., McKee's Rocks, Pa., have just closed a contract with the American Waltham Watch Co. for watch springs. The contracts are reported to amount to \$15,000. The plant is overcrowded with orders.

Jacob Eckles, formerly a jeweler, died, April 12, at the Allegheny City Home, where he had been an inmate since March of last year. He had rich relatives in Germany. They were notified by cable of his death and replied immediately, asking to have the body buried decently and that they would defray the expense.

Detective Jesse Pavey brought back Herman Schmidt from Washington, D. C., who

is wanted for false pretense. It is alleged that last July he gave a check for \$220 to Samuel F. Sipe for a diamond and a clock and later the check was found to be worthless. Schmidt gave himself up to the Washington police last week, saying that he was wanted in Pittsburgh.

Omaha.

E. A. Dayton & Co. now have a mammoth clock erected over the sidewalk in front of their store.

The Reichenberg-Smith Co. have purchased a lot on Harney St. for \$9,000 and will erect a new building on it.

K. D. Yeaton, S. Sternau & Co., New York, was last week in the city. He has had a splendid trade in his line.

The Shook Mfg. Co. are driving a good business in Parker alarm clocks, having sold over 5,000 in the last 12 months.

James Donnelly, of Sproehle & Co., Chicago, was in the city last week and reported the best business he had had for a long time.

T. L. Combs & Co. are gradually working into the wholesale business and intend to develop this branch in the coming year more than they have done in the past.

Cleveland.

George S. Dales, aged 59 years, a well known jeweler of Akron, died recently of consumption.

L. M. Sigler, of Sigler Bros. Co., is building a three-story store and hotel at the Cleveland and Pittsburgh railway crossing in St. Clair St.

Walter Wingerter, son of B. Wingerter, a prominent jeweler of Akron, was on trial, a few days ago, for participation in the riot in that city, last August. Saturday last the jury returned a verdict of guilty of burglary and larceny. Young Wingerter was charged with breaking into the store of the Standard Hardware Co. and stealing a revolver. The case was fought hard. State Senator Sieber and Judge Grant represented Wingerter, and Attorney Rogers assisted Prosecutor Wanamaker. Four men previously convicted of participation in the riot were brought to Akron to testify against Wingerter. Wingerter's father, mother and two sisters were in court all the week. Young Wingerter seemed unconcerned during the trial, but broke down completely when taken to jail after hearing the verdict.

J. R. Mercer slipped on some steps and sprained his ankle. He is now around on crutches.

S. E. Woodstock has returned from Hot Springs, Ark., where he had been spending the past month.

G. E. Gilmore, Paola, Kan., was here, last week, buying goods for the store he opened recently in Paola.

J. J. Stott, a jeweler and old resident of Paola, Kan., died last week at the In-sane Asylum at Osawatomie, Kan.

The case of Emma Farrington against the Streicher Watch and Jewelry Co. has finally been settled. The woman, who claimed that her goods were sold when the company sold her husband's jewelry stock for debt, will receive about \$425.

For stealing a tray of rings valued at \$25 from the Barr Jewelry Co., two months ago, John Holbert was given 90 days in jail, last week, by Justice Ross. Holbert created considerable excitement on Main St. by his efforts to escape from the police after snatching the tray from Barr's.

The out of town buyers who visited Kansas City, last week, were: George H. Young, Moberly, Mo.; J. A. Schmidt, Leavenworth, Kan.; Leslie White, Lee's Summit; J. B. Hayden, Topeka, Kan.; J. W. Schmandt, Holden, Mo.; George Bedell, of Bedell Bros.; G. E. Gilmore, Paola, Kan.; Otto Burklund, Osawatomie, Kan.; George Killam, of the Lindsborg Jewelry Co., Pittsburg, Kan.; Dick Kolstad, Pleasant Hill, Mo.; J. A. Hathaway, Parkville, Mo.; J. A. Hayes, Effingham, Kan.; C. H. Hubbell, McPherson, Kan.; C. A. Clement, Springfield, Mo.

Detroit.

F. W. Hinricks, for the past year in the employ of Pyl & Wyckel, Grand Rapids, has severed his connection with the firm and will embark in the jewelry business at 114 S. Burdick St.

John C. Dullam, of Flint, Mich., a traveler for the Rockford Silver Plate Co., Rockford, Ill., died very suddenly last week at Cleveland, O. A widow and two daughters survive him.

J. W. George, New Palestine, Ind., was prostrated recently by a ruptured cerebral blood vessel.

PHOTOGRAPHS OF MEN.

ONE of the traditions of photography is that men always want to look like some one else. So they hook you up with a high check and martingales, and tell you to throw out your chest, to make you look like John Drew or Hackett.

I am one of the people who can't get over the isness of the is—and the way that simple, manly, characteristic pictures sell proves that the tradition is a fallacy.

ISSUE OF APRIL 9, 1901.

671,519. DECORATING ARTICLES OF MANUFACTURE. EDWARD KASEBIER, Brooklyn, N. Y., and CARL VIGELIUS, Elizabeth, N. J. Filed June 18, 1900. Serial No. 20,747. (Specimens.)

The within-described improvement in decorating articles of manufacture, the same consisting in molding the body of the article with embossed ornamental portions, in then molding thin overlay-sections corresponding in their inner faces with the contours of the said embossed portions, and then uniting the said sections to the embossed portions of the body of the article, by softening the same and applying pressure to force them together.

671,616. ORNAMENTAL BUCKLE OR CLASP. FRED. D. THOMPSON, Providence, R. I., assignor to B. K. Smith & Co., same place. Filed Feb. 14, 1901. Serial No. 47,363. (No model.)

In a clasp, the combination of the parts each provided with an outer slot and a shorter inner slot adapted to receive a belt, with clasp means adapted for holding the parts in an angular position, relatively to each other.

671,793. FINGER-NAIL CLIPPER. JOHN C. ERNST, Ansonia, Conn., assignor of one-half to Rudolph N. Johnquest, same place. Filed Feb. 12, 1901. Serial No. 46,971. (No model.)

A finger-nail clipper comprising members provided with cutting-jaws, one of said members having a connecting-piece with a central strip and an end piece and the other member having a pivoted operating-lever with a slot at its forward end which receives the central piece of the connecting-strip and a groove which receives the end piece.

671,881. FOUNTAIN-PEN. CLARENCE E. FOWLER, Washington, D. C., assignor of one-

half to Frederick Briggs, same place. Filed Feb. 7, 1901. Serial No. 46,364. (No model.)

A pen substantially as herein described having the transversely-curved shank and provided with an integral fountain attachment comprising a shank extended longitudinally from the rear end of the pen-shank and curved in cross-section correspondingly thereto, and a reservoir at the free extremity of said fountain and so related to the pen-point as to underlie the same when adjusted for use.

671,830. DIAMOND-CROSS-CUTTING MACHINE. ERNEST LOESSER, New York, N. Y. Filed May 2, 1899. Serial No. 715,304. (No model.)

In a diamond-cross-cutting machine, the combination of a vertical rotary cutting-disk, a pivoted arm extending over said cutting-disk, a stone-holding chuck supported by said arm on one side of its pivot, and a counterbalance-weight acting downwardly on the opposite end of the arm.

671,831. ART OF WORKING DIAMONDS. ERNEST LOESSER, New York, N. Y. Filed July 26, 1900. Serial No. 24,917. (No model.)

The method of removing a portion of a diamond while preserving the integrity of the removed portion, and at the same time partly finishing a face of the stone, which consists essentially in starting the cut at a corner or angle of the diamond, continuing said cut through that part of the stone, in a plane at an angle to the grain or planes of cleavage of the stone, and at the same operation polishing both surfaces of the cut.

DESIGN 34,341. SPOON. SAMUEL J. LARGE, Bristol, Conn., assignor to Bristol Brass & Clock Co., same place. Filed March 9, 1901.

Serial No. 50,521. Term of patent seven years.

That this department shall prove mutually beneficial to our readers, it is desirable that the members of the trade generally communicate with THE JEWELERS' CIRCULAR-WEEKLY regarding any advantageous device or plan that they are utilizing in connection with their business.

PRIZE ESSAY COMPETITION, NO. 3.

SUBJECT:

"How to Foster Spring Trade."

**No. 4.
PRIZE ESSAY COMPETITION.**

**First Prize, \$20.
Second Prize, \$10.**

These prizes will be given to the writers of essays on the subject

"How to Promote a Bric-à-brac, Pottery and Cut Glass Department."

The prizes will be for the best and most reasonable essays, not for the language in which the ideas are expressed. Anyone may enter, whether he be a retailer, salesman or any employe.

The standing of the judges who have kindly consented to act is a guarantee that the contest will be carried on strictly on its merits and in an absolutely fair and impartial manner. We shall designate each contribution by letters, keeping a list of contributors with the letters of their articles. Thus the judges will not even know the names of the writers whose products they pass upon.

RULES:

Essays must be in this office by June 15, 1901.
Essays must be written on one side of paper.
No limit to number of words, and specimens of records are admissible.

NOTE. THE JEWELERS' CIRCULAR-WEEKLY reserves the right to publish any or all of the competing essays received.

Preference will be given, all other things being equal, to those whose contributions reach us at the earliest date.

A. B. Welbavsky, Peekskill, N. Y., uses the following wording in an advertisement, which has some good points, even if the construction is a trifle uncertain:

Enjoy Yourselves! Do not be flim-flammed about good time. If you want good time spend \$10. Others may give for a dollar, some for 85c., but if you haven't the ten dollars come here and I'll give you a good timepiece from 75c. to \$250. I know you will smile, but no matter if it is a watch or a clock it will give you good time.

ORLAND, Me., April 11, 1901.

Editor THE JEWELERS' CIRCULAR-WEEKLY:

Enclosed find money order for \$2 for subscription to THE JEWELERS' CIRCULAR-WEEKLY. It is a grand paper for the retail jeweler and I could not get along without it.
Very truly, E. O. SUGDEN.

COMPLETE directions to produce the above result would, no doubt, include advice that is good at all times of the year, but we will take some things for granted.

It is to be supposed that one has a good location, a neat and attractive store and a stock suitable to the demands of the location. As ladies form a large part of the customers of a successful jewelry store it is good policy to avoid tobacco smoke, or the odors of benzine, gasoline, ether or other unpleasant gases connected with repairing.

In passing would say that a well conducted repair department is a great help as a means to increase business. If allowed to become an end instead of means a man may fix all the broken down clocks, table ware and dry goods store jewelry in town and then barely make "day pay" at it. On the other hand some have no more repairing than 10 years ago because the work has been done by apprentices; watches have been "started up" instead of thoroughly repaired to please short sighted customers who think they know what their watches need, and watches in a fair state of preservation have been repudiated to make an exorbitant profit on an inferior movement.

But supposing the repair department is self-supporting. When the customers come in after Christmas to get articles left to be engraved or repaired, or to exchange goods, then is the time to begin missionary work for the Spring trade. In stocking up after the holidays, I would have some new designs not shown before to point out to prospective purchasers.

Newspaper advertising is heard much of because the newspapers puff themselves. It depends greatly on the papers used as well as the manner employed. "A pleased customer is our best advertisement."

During the holidays, many visit a jewelry store that never did before. Don't overcharge them. Treat them well and give them goods that are just as represented. They may not trade with you again for 10 years, but their friends may be the very ones you are dependent upon for your Spring trade.

Do not have cleaning up spells, but rather keep your store and stock clean from day to day; wiping the floor with a damp mop removes a great deal of dust that would otherwise get on the show

cases. Electric fans will clear the frost from the show windows. Do not get slack about decorating the windows. The duller the day the more need of attracting purchasers.

Unless in a place frequented by tourists, do not indulge overmuch in novelties for Spring or any other time; but conditions vary so that if a man has not the business instinct he might as well commit the dictionary to memory as platitudes gathered from "Men Who Have Succeeded" in different times and under different circumstances.
R. H. G.

TWO GOOD OPTICAL ADS.

APPENDED are two sample ads. for opticians that have been used recently. Each is likely to attract the attention of people whose eyes are troublesome.

Stop Frowning

over your work. It makes wrinkles and mars beauty. Frowns frequently indicate eye strain, which can be relieved and your eyesight corrected by the use of appropriate glasses or spectacles which we can fit for you. Our eye examination is free, our actual charges for the glasses themselves well within bounds.

W. A. FLOWER, Optician,

At Flower's Jewelry Store, 514 Main

All Eyes At All Ages

can be perfectly fitted with glasses, no matter what their defect is, at this store. Accuracy is our watchword and it guarantees perfection in the testing and fitting of the sight. If your eyes trouble you, bring them here and have the trouble remedied—we will fit them with glasses to your entire satisfaction.

ARTHUR C. HANGER,
Optician and Jeweler, 514 E. Locust St.

Ludy & Taylor, Cedar Rapids, Ia., have been conducting a "give away" watch contest in combination with a local newspaper.

NG and HINTS to JEWELERS

Notable Jewelry Store Interiors.

FRANK HERSCHEDE, CINCINNATI, O.

THE store of Frank Herschede, Cincinnati, O., is one of the largest and most magnificent in the west. The stock is fine, rare and most artistically displayed. The grouping of the fixtures is distinctive, in bringing out the salient points most effectively. The cases were built for the space and are solid glass with mahogany mouldings. The wall cases are solid mahogany, elaborate and massive. The entrance is both imposing and spacious. The case on the right contains watches, that on the left fine novelties.

JEWELERS' IDEAS AND SCHEMES.

This is the way a man introduces himself through the advertising columns of the local newspaper of Howe, Tex.:

"I would like to get acquainted with the good people of Howe and community. I have had seven years' experience in the jewelry business and will do you right. I am prepared to do all kind of watch, clock and jewelry repairing at lowest prices. One price to all. Can fit your eyes if in need of glasses. Call around and see me at Edwards' old stand. All work guaranteed.

"T. A. LONG."

As imitation is the most desirable form of flattery, George E. Feagans, Joliet, Ill., will probably not object if others in the trade choose to make use of an idea or two contained in the following outline of

accurate these days. Seconds run with minutes, minutes with hours, and they, in turn, with the New Century, where, as before, Our Jewelry and Watches take the lead for use and beauty."

This is a sort of "House that Jack Built" style of advertising used in Albany, Ore.:

"AN ATTRACTIVE WOMAN.

A beautiful engagement ring,

A heavy gold wedding ring,

A set of silver ware,

A life of happiness.

For the rings and silver ware see

FRENCH, the Jeweler."

VIEW OF THE INTERIOR OF THE JEWELRY STORE OF FRANK HERSCHEDE, CINCINNATI, O.

with the diamonds at the head of the long center double aisle cases. The wall cases contain the silver ware and art pieces. The art room in the rear is, perhaps, the most exquisite of its kind in the city and contains a collection both rare and beautiful. The cases are entirely of glass, with canopy tops and brilliantly illuminated with tiny incandescent lamps. Large pedestals and electric vine wreathed lamps and art pieces are artistically arranged in convenient niches.

A way of advertising is used by Maier & Berkele, Atlanta, Ga., which consists of a series of articles on the "history of jewels." These little ads. are published in the Atlanta dailies and are attracting universal attention.

a booklet he has in use to advertise his business and describe the advantages of his repairing and manufacturing departments. It dwells upon the necessity of the timely overhauling of a watch like any other piece of machinery, stating manner of guarantee for such work and price for repairing and inserting mainsprings. The remainder of the booklet is devoted to mechanical facilities, the resetting of jewelry and jewelry to order. The closing chapter is a sensible argument for the optical department.

M. A. Rose, Colfax, Wash., uses this line of argument in his local advertising:

"Father Time, like every other wise man, needs a good timepiece in his business. One must be

The J. D. Grant Co., Lowell, Mass., have been attracting attention lately in several ways. First, they put in a 10-ton safe that blocked the street for five early morning hours. Second, they gave away a lot of imitation jewelry to all who called at the store while the lot lasted. Third, they made sure that both these happenings were duly published in the local newspapers.

An idea of the window dresser of Os-kamp, Nolting & Co., Cincinnati, O., is that of draping the window in black for a background, which has a wonderful effect of bringing out the articles in fine relief. The articles thus displayed can be seen plainly across the street.

BUYERS' INFORMATION BUREAU.

Questions as to the makers of certain lines of goods, where to buy certain lines, where certain kinds of work are done, the owners of certain trade-marks and other matters relating to the buying branch of a jewelry business will be cheerfully answered under this department. The reader cannot ask too many questions. All queries received are also answered promptly by mail.

HAMILTON, Ont., April 10, 1901.

Editor of THE JEWELERS' CIRCULAR-WEEKLY:

Kindly let me know who makes the "Colonial" pattern sterling flat ware, and oblige,
Yours very truly,

AMMON DAVIS.

ANSWER:—Towle Mfg. Co., Newburyport, Mass., and Chicago, Ill., make the "Colonial" pattern in sterling silver flat ware.

GREENSBURG, Pa., April 8, 1901.

Editor of THE JEWELERS' CIRCULAR-WEEKLY:

Kindly inform me where I can procure small seamless copper or brass tubing, one-eighth inch inside diameter and three-sixteenths inch outside diameter. It need not necessarily be seamless, as soldered tubing would answer, but would prefer the seamless if it can be procured.

Yours respectfully,

J. S. MURPHEY.

ANSWER:—The Edward N. Cook Plate Co., 144 Pine St., Providence, R. I.; John H. Knapp, 23 John St., New York.

WATERBURY, Conn., April 8, 1901.

Editor of THE JEWELERS' CIRCULAR-WEEKLY:

I would like to know who makes little coral hearts as charms, in sterling gilt.

Yours truly,

M. W. HALL.

ANSWER:—For coral hearts we would refer correspondent to Samuel Lawson, 2 Maiden Lane, New York; for the charms to Charles J. Meyer, 4 Maiden Lane, New York.

ALBANY, N. Y., March 30, 1901.

Editor of THE JEWELERS' CIRCULAR-WEEKLY:

Kindly inform us the names of manufacturers of German silver and plated chatelaine bag tops for bead chatelaine bags.

Respectfully,

R. P. THORN & SONS.

ANSWER:—The E. A. Bliss Co., Meriden, Conn.; 1 Union Sq., New York.

LORAIN, O., March 28, 1901.

Editor of THE JEWELERS' CIRCULAR-WEEKLY:

Will you kindly tell me address of party making the Horton fountain pen? Thanking you in advance,

Yours very truly,

GEO. A. CLARK.

ANSWER:—The Horton Fountain Pen Co., New Haven, Conn.

CHICAGO, Ill., March 18, 1901.

Editor of THE JEWELERS' CIRCULAR-WEEKLY:

Can you give me the addresses of jewelry manufacturers making Pan-American souvenirs, in Chicago or Buffalo?

Very truly yours,

A. B. KOHLER,
Siegel, Cooper & Co.

ANSWER:—The American Souvenir Co. (E. A. Muth), 319 Main St., Buffalo, N. Y., have a concession for the souvenir spoon and souvenir china. The Pan-American Badge and Souvenir Co., 421 Ellicott Sq., Buffalo, have the concession for the official badges, buttons and medals. Both concerns have souvenir novelties, buttons and badges of various kinds.

FAIRPORT, N. Y., April 2, 1901.

Editor of THE JEWELERS' CIRCULAR-WEEKLY:

Will you please inform us where we can get programme clocks for school houses, a mother clock and eight secondary ones constructed?

Yours,

A. G. HARDICK.

ANSWER:—If correspondent will write to the Prentiss Time Improvement Co., 49 Dey St., New York, he will probably be able to get what he wants. If the company do not have them in stock they will make them.

PRINCETON, Ind., March 29, 1901.

Editor of THE JEWELERS' CIRCULAR-WEEKLY:

Please give us the names of manufacturers and jobbers of two-inch clock dials made of celluloid, ivory or enameled. Also of second hands for the same size movement.

Very respectfully,

PRINCETON CLOCK CO.,
WILLIAM R. WRIGHT, Pres.

ANSWER:—For celluloid watch or clock dials we refer correspondents to the Baldwin & Gleason Co., 58 Reade St., New York; for watch and clock hands to J. H. Winn & Son, Winchester, Mass.

NORTH ADAMS, Mass., Feb. 12, 1901.

Editor of THE JEWELERS' CIRCULAR-WEEKLY:

I write to inquire if you could give me the names and addresses of any persons who teach ornamental and fine letter engraving with whom I might correspond, or if there is a school for engraving in New York. I am an engraver and wish to perfect myself in the art. Trusting you may be able to help me, I am,

Yours truly,

E. A. STEBBINS.

ANSWER:—Almost all of the horological schools have an engraving instruction department. The nearest horological school to correspondent is the Waltham Horological School, Waltham, Mass. Among others we give the addresses of the following engraving schools: R. O. Kandler, 103 State St., Chicago, Ill.; M. L. Landis, 94 Miami Ave., Detroit, Mich.; the Elmira School of Engraving, Lake and Water Sts., Elmira, N. Y., and Ezra F. Bowman Technical School, Lancaster, Pa. There are others, but none, as far as we know, in New York.

CHEMICAL ACTION OF LIGHT ON THE EYE AND ON ASSIMILATION.

FROM THE FRENCH OF M. E. VARENNE.

HAVING had occasion for a certain experiment to regulate a strong incandescent burner, and consequently to absorb its very intense light, I will state the facts ascertained. The direct entrance of the rays into my eyes lasted about 100 seconds, which is a long time for this intense light. The operation ended, my eyes, somewhat dazzled, were cast on an open book lying on the table, on whose pages were pictures of animals. Large black spots took the place of the animals. At first glance each of the black spots appeared of a ruby red color, while the white portions of the paper seemed almost invisible. Some seconds later the blacks ceased to be visible (in red), while, on the contrary, the whites, scarcely visible during the first period, assumed a superb emerald green. These two successive colors were of remarkable intensity and purity. Green, as generally known, is the complementary color of red. In reality, the eye had made a successive spectroscopic analysis of the white light sent through the incandescent burner.

How was this possible? The problem is more complex than that which confronted Helmholtz in 1865; than Koenig, on sounds in acoustics. In these, mathematical physics can explain almost everything. But to solve the optical question, anatomy, physiology and chemical phenomena must all be summoned. The vibrations of ether act upon the retina, beginning with line A, of the Fraunhofer spectrum. In these observations we must note that the red rays give 481 billions of vibrations per second and the green rays 607 billions. In this case the red, with slower vibration, appeared before the green with the more rapid vibration. Mariotte, as long ago as 1668, demonstrated that a portion of the retina is not affected by the light; that is the spot which anatomists call "the blind spot." Then Henri Müller recognized that the rods and the cones are the only parts sensitive to light. Now, the rods and cones are extremely sensitive, since they can perceive an electric spark lasting only 0.000,000,868 of a second! When they are destroyed in certain parts of the retina there are corre-

sponding gaps in the visual field. The rods and cones are mobile; they shrink under the influence of light and lengthen in darkness. Chemically they contain albumen, nuclein and neurokeratin. The cones contain some colored, fatty globules named chromophanes. The rods enclose a red substance named retinal purple, which seems to play a very important part in vision. It fades in the light and regains color in darkness. In reality, according to Kuhne, the retina behaves like a photographic plate, and it is probable that luminous sensations are due to a chemical action, principally on the purple retina. There is produced in the eye a series of chemical phenomena of assimilation and disassimilation, of which the cones, and especially the rods, are the principal agents.

My observation would, therefore, confirm the theory of Ewald Héring. According to this physiologist, the visual substance (that is, the *ensemble*, of which I have spoken above) would experience during the work of vision the effect of disassimilation. On the contrary, during the period of rest it is renewed by a process of assimilation. Therefore, the maximum disassimilation—that is, the maximum work—would produce the white sensation; and the maximum assimilation—that is, maximum repose—would give the black sensation. Naturally, the intermediate colored sensations would correspond to the intermediate chemico-physiological efforts. According to Héring the red and yellow sensations correspond to disassimilation, the green and blue sensations to assimilation. If, then, we accept (and I believe we ought to accept) Héring's theory, we see: At the first moment, action of an intense white light on the eye, whence a maximum disassimilation; then, perception of a red light, indicating that the disassimilation is diminishing; finally, the production of green light, showing that assimilation recommences; lastly, the quickness of vibrations of the colored rays, increasing from red to violet (red equals 481 billions, indigo equals 676 billions) enables us to deduce this interesting hypothesis: That the assimilation—that is, the vital energy—is in direct ratio with the velocity of vibration of the ether.* This quasi-experimental conclusion would seem logical.

*We can support this hypothesis by considerations drawn from experiments made on the action of static electricity and of glazed cages of different colors on animals and vegetables. If a more material comparison is allowable, while the food, air and exercise act on our muscles (and other

Eyesight and Shooting.

DEFFECTS in eyesight are very common, and it is very strange that, in spite of Sir Ralph Payne Gallwey to the contrary, with whom we cannot agree on this occasion, it is not only possible but a frequent occurrence to find men shooting from the right shoulder who align the game, the foresight and the left eye, some entirely, others partially. Those who do it, it is true, as he says, cannot align the rib with the left eye; it is mechanically impossible. What they do is to align the rib to the right eye, but they put the bead on the object between it and the left eye. This is even easier to a man who does not align his rib at all, and there are many shooters who do not and whose guns are so straight that they could not accomplish the task if they would. The firing try gun is not superior here, because the throwing up of the gun at an object is all that a gunmaker desires to see in order to suggest a cure. The cure can be of different kinds: (1) a treatment of the eyes; (2) an amount of cast-off that shall bring the rib at the false breech opposite to the left eye; (3) shooting from the left shoulder; (4) shutting the left eye. But there is a middle way between aiming with the right eye and aiming with the left. There are, for instance, gunners who with both eyes open are influenced by the left eye to pull the muzzle over toward the left, and yet in reality do not put the bead on the spot with either eye, although they think that they do so. Here, again, the try gun has tampered with the defect and encouraged it to continue. Cast-off has been given to counteract mechanically the optical defect. Soon the shooter gets used to the greater cast-off, and the bead once more finds itself somewhere between the line of the two eyes, and as Mr. H. Harriss says, a deformed gun is the result; no permanent object has been gained. It is perfectly true that aiming is not all a question of sight; the touch has a great deal to do with it and if it were possible to deceive the touch it might also be possible to cure erroneous aiming by cast-off and cast-on. It is possible to do so for a short period, but the senses soon find out—perhaps not during measurement at the shooting school, but afterward, when the new gun has been built.—*Forest & Stream.*

macroscopic organisms) in developing them, it may be admitted that certain vibrations of the ether under the forms, light, heat and electricity, act on the microscopic elements of the organism, by exciting their vitality. Laboratory experiments and medical practice daily confirm this view.

Optical Department.

DIOPTRIC CONDITIONS OF THE EYE AND HOW TO DISCOVER AND MEASURE THEM.

[Commenced in issue of Feb. 13.]

HYPEROPIC PRESBYOPIA.

[Continued.]

The correction of hyperopia is the correction of the eye for distant vision, so that, with its static refraction only, or perhaps a little accommodation due to spasm of the ciliary, no accommodation is necessary. The lenses make the eyes artificially emmetropic, or as near em-

14a.

Hyperope of 3 D., uncorrected, at age of 53 years, attempting to see objects at infinity.

metropic as lenses can make them. The presbyopic correction is the plus element that is added to the distance correction to take the place of the accommodation. A hyperopic correction is, therefore, for the assistance of the insufficient static refraction, and since the static refraction is positive, the hyperopic correction is

15a.

Same eye as in fig. 14, corrected for distance, viewing distance.

plus. A presbyopic correction is, on the other hand, for the assistance of the insufficient dynamic refraction, and since the dynamic refraction adds plus to the static refraction, and is plus itself, the presbyopic correction is always plus. It represents, not the comfortably usable part of the accommodation, but that part of accommodative action required of emmetropes that cannot be comfortably used, or used without strain. What accommodation the eye can exercise comfortably for any desired point of near vision, that it should use, and no lens should take such action from it. But the deficiency of the accommodation, and that only, should be covered by the plus lens needed to take the strain from it. Hence, for hyperopia, prescribe the highest acceptable plus lens, but for presbyopia prescribe the weakest plus lens that gives easy vision at the desired near or reading distance, the divided accommoda-

tion being available, by relaxation, of enabling the eye to see objects at a greater distance, or by slight or momentary effort, objects at a nearer point. The correction of presbyopia, when combined with hyperopia, is exactly like its correction for emmetropia, for the correction of hyperopia makes the eye, as nearly as possible, artificially emmetropic—its action like the action of an emmetropic eye—and the presbyopic correction is merely more plus imposed over or on the hyperopic correction to take strain from the ciliary for the reading or working distance, or to relieve the dynamic refraction.

The presbyopic correction makes the eye artificially myopic for distance. If one have 3 D. of hyperopia and an amplitude of accommodation of but 2 D., the amount for one at the age of 52

14b.

Same eye attempting to read at 13 inches.

or 53, the hyperopic correction is +3 D. This makes the eye artificially emmetropic, for it relaxes the ciliary by adapting the waves of light from the distant object to the insufficient static refraction of the eye. Such an eye may use about 1 D. of the accommodation without strain. But this would be only sufficient to

15b.

Same eye, corrected for reading at 13 inches, trying to see distant objects.

overcome +1 C. curvature of the waves, or to enable it to see at 40 inches comfortably. To see an object or printed matter at 13 inches distinctly it requires to overcome +3 C. curvature of the waves. It is, therefore, 2 D. short of the required amount of easy or comfortable accommoda-

16a.

Same eye as 15, corrected for reading distance of 13 inches.

tion, when fully corrected for distance. With +2 D. added to the distance correction, or with +5 D. lenses, its in-

sufficient dynamic power is also supplemented so as to make vision of objects at 13 inches easy, comfortable and clear. But with its correction of +5 D. it is no longer able to see at a distance clearly. It uses but 1 D. of accommodation for an object 13 inches distant. Hence, if the object be moved away and the curvature of the waves coming to the eye, or lens before the eye, is reduced, when reduced to +2 C. the accommodation is completely relaxed. This results when the object is 20 inches distant, and to move it farther unavoidably places the focal points forward of the retina and blurs the images. The lens (+2 D.) adds to the static power of the eye, for it is as unchangeable as the static power. Its purpose is not to enhance the dynamic power, but to change the range of accommodation. For instance, the above eye with its +3 D. hyperopic correction has a comfortable accommodative range of from 40 inches to infinity—40 inches is the comfortable near point, infinity the distance point. But with the +2 D. presbyopic correction added, its distant point is 20 inches and its comfortable near point is 13 inches, for its absolute near point, or *punctum proximum*, is with 2 D. amplitude, at 10 inches. This range is much more satisfactory for reading and near work, but to see at a distance the 2 D. presbyopic correction must be taken away, although the +3 D. hyperopic correction is still required.

The usual and better way to correct a pair of eyes in the above condition is with two pairs of glasses, one pair (+3 D.) to be worn ordinarily or for distant vision, the other pair to be worn for reading. Of course for reading the glasses are +5 D., for they embrace the correction of the static refraction and give also the needed assistance to or relief of the weakened dynamic refraction. Many hyperopic presbyopes have regular glasses for their hyperopia and a pair of what are called "grab fronts" to impose over them. The latter represent the presbyopic correction only—as +2 D. in the case cited—but as they are imposed over the hyperopic correction light passes through the two lenses, +3 D. and +2 D., or +5 D. in all, before entering the eye. The grab fronts have no temples or bows, but short hooks by which they are attached to the frames of the distance glasses. When not reading the grab fronts may be carried in the pocket and imposed only when occasion requires. Bi-focals are, perhaps, more common than grab fronts. These are glasses in which the upper area

16b.

Same eye, corrected for distance, trying to read at 13 inches.

is the hyperopic or distance correction, the lower the reading correction. There

Optical Department.

(Continued from page 54.)

are several varieties: Split bi-focals are divided half and half by a horizontal line, the glass consisting of two equal parts that meet along the central line. They may be put up in frames that are reversible, so that either glass can be worn below—the distance glass or the reading glass. This arrangement has the advantage of enabling the wearer to look downward through the distance glasses, as he would need to in coming down a flight of stairs, or looking at objects upon the floor. In cement bi-focals the main or full lens fills the entire space in the rim, but the presbyopic segment or wafer is cemented to a lower area so as to give the added power to that area required for near seeing. Perfection bi-focals appear similar to cements, but in these the lower and upper area are different sections grooved together and held there by the tension of the rims. The lower glass embraces the hyperopic and presbyopic correction in the one glass. There is a bi-focal known as the "composite" in which the added power required for reading is obtained by imbedding a flint glass lens, or lens of a higher index of refraction, in the lower area. They are a very pretty glass but really possess no advantages, except their expense, over ordinary kinds. Solid bi-focals, or those in which a lower area is ground with greater curvature, are little used and are not in favor because of their somewhat awkward appearance.

Optical Queries.

TYRONE, Pa., April 7, 1901.

Editor of THE JEWELERS' CIRCULAR-WEEKLY:

What is a "Toric" lens and what is it used for? Are there any lenses used in spectacles that have to be imported on account of inability to grind them in America? Is the Philadelphia Optical College a legally chartered institution?

Yours truly,

W. M. S.

ANSWER:—1. The toric is a lens having a surface of greater curvature in one meridian than in the opposite; in other words it combines in one surface the optical effect of a sphero-cylinder. The advantage of this form of lens is that in weak sphero-cylinders it enables the optician to supply the periscopic lenses and in strong numbers it enables him to divide the spherical curvature between the two surfaces instead of concentrating it all into one. 2. There are no better lenses than those ground in this country. 3. The Philadelphia Optical College is a legally chartered institution.

Mrs. L. L. Freeman, a graduate of the Northern Illinois College of Ophthalmology and Otology, Chicago, Ill., is now in charge of the optical department of her husband's business, recently established at San Antonio, Tex.

The Mississippi Valley Pearl Button factory, Burlington, Ia., is soon to be located in the old McCutcheon house, which will be fitted up for factory use.

Optical Briefs and Notes

J. H. Caruss, traveling optician, was in Norwich, Conn., last week.

The machinery of the Southbridge Optical Co. has been moved to the works of the American Optical Co., Southbridge, Mass.

John Emdin, optician, Utica, N. Y., will remove May 1 to the Gardner building from 56 Franklin Sq., where he has been located 24 years.

The Merry Optical Co., Kansas City, Mo., have employed A. M. Rankin as bridge bender. Mr. Rankin was formerly with G. B. Lichtenberg, same city.

The Solomonson Optical Co., Cleveland, O., celebrated their removal to 88 Euclid Ave. with a public reception last Saturday. The handsome store room was crowded with visitors all day and evening.

Maine papers state that Sylvester I. Hooper, the traveling optician who died in Wiscasset, Me., a short time ago, left property to the amount of \$50,000, and what is more surprising to his acquaintances, who supposed he was a bachelor, he leaves a wife and three children in Brockton, Mass.

The Michigan Optical Co., Detroit, Mich.,

recently increased their capital stock from \$15,000 to \$50,000. The concern enjoyed an excellent business during last year and will probably erect an addition to the present factory this Summer.

The regular monthly meeting of the Optical Society of the City of New York was held Wednesday evening in parlor D R of the Fifth Avenue hotel, New York, and was opened by Professor Fox's lecture, the subject of which embraced the "transposing of cross cylinders." Then followed the business session at which Philip W. Hoffman was proposed for membership and A. S. Barker and E. Borsch were elected. The subjects of legislation and education for the optician were again generally discussed and the Society voted that the time is now ripe for beginning work to obtain favorable legislation at the next session of the New York Legislature.

Judge Henry has granted a *pro forma* decree of incorporation to the Hirsch Optical Institute, of Kansas City, Mo., an institute in which will be taught the science of optics and which will confer the degree of Doctor of Optics. The incorporators are H. A. Hirsch, E. W. Slusher, of Kansas City, and W. E.

Optical Department.

[Continued from page 55.]

Lobenstein, of Cedar Rapids, Ia. H. A. Hirsch has gone to Jefferson City, Mo., whence he will go to Memphis and later return by way of St. Louis.

Jack Adams has opened an optical stock at Piedmont, Ala.

C. H. Jaquette, Scottdale, Pa., has added a new optical parlor to his jewelry store.

G. B. Lichtenberg, an optician of Kansas City, Mo., has advertised that he will quit business at that point.

Dr. Mecklenburg, formerly of New Haven, Conn., has opened a branch office in Figle's Pharmacy, Middletown, Conn.

John Lynch, southern salesman for D. V. Brown, wholesale optician, Philadelphia, Pa., has started on another southern trip.

Dr. Harold G. Goldberg, a widely known oculist, has been elected a resident surgeon of the Wills Eye Hospital, Philadelphia, Pa.

George Morgan, who recently started in business in Loup City, Neb., has purchased a trial case from J. C. Hutson & Co., Omaha, for optical work.

Mr. Toms, of Barnes & Toms, Richland Center, Wis., left Chicago for home, recently, having completed his course of advanced optics there.

The plant of the Stevens Optical Co., absorbed by the American Optical Co., has been removed from Providence, R. I., to Southbridge, Mass.

The Southwestern Optical College, Kansas City, Mo., have applied for a *pro forma* decree of incorporation. The incorporators are S. W. Lane, I. R. Lane and E. A. Lane.

Fred Mehmert, who took an optical course in New York, the past Winter, has opened up an optical department in his father's store on Freeman Ave., Cincinnati, O.

C. A. Shoptaugh, trading as the Geneva Optical Co., 10th and Sansom Sts., Philadelphia, Pa., has turned over his business to C. S. Gill, retail optician, 15th and Arch Sts., Philadelphia. Mr. Shoptaugh intends entering another business.

A meeting of the Canadian Association of Opticians was held in the Ophthalmic College, Toronto, April 5, 20 members being in attendance. E. Culverhouse, of Ryrie Bros., presided. Papers were read by W. G. Maybee, St. Catherine's; Mr. Lewis, of B. & H. B. Kent, Toronto, and L. G. Amsden.

John H. Hardin, of F. A. Hardy & Co., Chicago, will return from his California visit the latter part of the month. He is recreating in southern California as far north as San Francisco and incidentally looking after the business interests of the house.

P. H. Mullen has opened an optical department in his drug store, 232 Mineral Spring Ave., Pawtucket, R. I. Mr. Mullen is a member of the new firm of opticians, Owen & Mullen, who have started in business in the Conrad building, 385 Westminster St., Providence.

The Shook Mfg. Co., Omaha, Neb., are making a good thing out of an idea of Mr. Shook's. He had a number of flat spectacle cases made with glass top, in which 72 pairs of spectacles could be arranged, and named them after a former salesman of his, "Duby." These cases he gave with the goods and the scheme pleased his customers so well that the firm have sold 200 cases since last Fall. One traveling man alone has disposed of 75 of them.

At the April meeting of the New England Association of Opticians, held last evening at Young's hotel, Boston, Mass., the address was delivered by Channing M. Wells, of the American Optical Co., Southbridge, Mass., whose subject was "The Optical Business Viewed from a Manufactory Standpoint." The matter was treated in a very interesting manner and was much enjoyed by those present. Mr. Wells is a cousin of Edwin P. Wells, of the Globe Optical Co., Boston, and was his guest while in town.

The opticians of Minnesota are greatly pleased at the passage of their bill by the State Legislature, providing for the licensing of opticians. The oculists of the State had a bill before the Legislature which meant extermination of the opticians, but the bill was killed. The opticians' bill provides for a board of five examiners, to be appointed by the Governor. It requires practicing opticians to be licensed, though those now practicing are exempt from the requirement of an examination. The Governor has given his word that he will sign the bill. This bill has been the first fruits of the Minnesota State Optical Society. Considering that it was formed but last June the result is extremely gratifying. Two years ago a similar bill was proposed and those backing it were told that it would take a great deal of hard work and lots of money to get it through. There is no doubt about the work that it took to get this bill through, but the money spent was practically nothing. The men who have worked the hardest and are entitled to the credit for the bill are Frank A. Upham, of St. Paul, who drafted the bill, C. A. Snell, of Minneapolis, and S. B. Millard, of Litchfield.

The Greenleaf & Crosby Co. have closed their branch store in the Royal Poinciana hotel, Palm Beach, Fla., and J. F. Lane, of the company, and Hayden Crosby, who have been in charge during the season, have returned to Jacksonville. The season was a very successful one.

WORKSHOP NOTES.

Moire on Brass.—Dissolve $\frac{1}{2}$ kilo of blue-vitriol in one liter of water and place the articles in the boiling solution. The formation is furthered by putting some small iron nails into the solution during the boiling.

To Protect Tools from Rust.—Carefully heat benzine and add half its weight of white wax, which dissolves completely in this ratio. This solution is applied to the tools by means of a brush. It is also said to protect against the action of acidiferous fumes.

To Clean Fire-Gilt Articles.—Fire-gilt articles are cleaned, according to the conditions, with water diluted hydrochloric acid, ammonia or potash solution. In case hydrochloric acid is employed, a thorough dilution with water is especially necessary. The acidity should hardly be noticeable on the tongue.

To Recognize Whether an Article Is Gilt.—This is often necessary for bronzes that are simply varnished. All that is required is to touch the object with a glass rod previously dipped into a solution of bichloride of copper. If the article has been gilt the spot touched should remain intact, while it presents a brown stain if no gold had been deposited on its surface.

Partinium, a New Metal.—A new metallic alloy consisting of aluminium and wolfram is used of late in France, in the construction of conveyances, especially

carriages, bicycles and motor vehicles. The French call it partinium; the composition of the new alloy varies according to the purposes for which it is used. It is considerably cheaper than aluminium, almost as light and has a greater resistance. The strength is stated at 32 to 37 kilograms per square millimeter.

Colored Lacquer.—To obtain a colored lacquer or varnish, commence by making a strong solution of a coloring matter soluble in methylic alcohol, the materials conforming to this requirement being especially cochineal, saffron, the aniline colors, etc. Filter through fine linen and to the solution thus filtered add brown shellac reduced to small pieces. The proportion is about 150 grammes per $\frac{1}{2}$ liter of alcohol. Leave alone for eight days, except for shaking the receptacle and the contents once a day, and if it is noticed that the shade is not as desired add more lac or alcohol as the case may be. As regards application, it is preferable to put it on in a warm room, the articles to be covered being absolutely free from grease or even humidity and previously heated. It is advisable to put on several successive coats of light varnish, allowing to dry thoroughly before applying the next. A small camel's-hair brush is best employed and when the work is finished the object is placed in front of a strong fire, but only for a few minutes.

Cadmium for Admixture to Gold Solder—Gold solder formerly consisted only of gold, silver and copper, hence it possessed

the same ingredients as the articles to be soldered. As a consequence it was necessary to make the solder less fine than the article worked upon, since it has to be more readily fusible than the latter; the refractoriness of the solder, however, stands in a direct ratio to its percentage of gold; that is to say, it increases the purer and richer in gold the solder is. This fact entails a danger as regards the export to countries where a strict control is maintained, where, in the sample, a difference in fineness might be established owing to the inferior solder, which would cause the confiscation of the article in question. Recourse was, therefore, had to take the difference in fineness occasioned by the solder into account already in alloying the raw material by using a small excess of gold. This drawback can be obviated by the addition of cadmium to the solder, since it renders the latter more easily fusible than an equal amount of silver or copper, and the fineness of the gold is but slightly diminished thereby. Following are the compositions of various cadmium solders: (a) Solder for 500 thousandths fine: gold 500 parts, silver 200 parts, copper 200 parts, cadmium, 100 parts. (b) solder for 550 thousandths fine: gold 550 parts, silver 150 parts, copper 180 parts, cadmium 120 parts. (c) solder for 583 thousandths fine: gold 585 parts, silver 115 parts, copper 186 parts, cadmium 116 parts. (d) solder for 750 thousandths fine: gold 750 parts, silver 30 parts, copper 100 parts, cadmium 120 parts.

WATCHES, JEWELRY, SILVERWARE, TRAYS, CASES FOR
S. A. BORGZINNER,
82-84 NASSAU ST. NEW YORK
CASES FOR TOILET ARTICLES, MANICURE, PAPER BOXES.

Jewelry Store Built in 1565.

PROBABLY the most interesting jewelry store in St. Augustine, Fla., from an historical point of view, is the little shop occupied by J. P. Dodge, a practical jeweler at 55 N. St. George St. This store, which is in the heart of the old city and a short distance from the old gates which are still standing, is in a building claimed by its proprietor and others to be the oldest in the United States and to

THE ANCIENT SITE OF J. P. DODGE'S JEWELRY STORE,
ST. AUGUSTINE, FLA.

have been built in 1565. Though another building in the city claims the same honor, there is no doubt that this is the oldest building in which a business is conducted, and Mr. Dodge's customers, it is claimed, stand on the same concrete flooring and see much of the same interior that the first occupants of the house did, back in mediaeval times. Mr. Dodge has been in business at this address for about 15 years.

An Alarm Clock That Will Make No Noise.

HERE is a suggestion that some clock manufacturer might find useful. At any rate the idea is offered by a New Jersey newspaper man in these words:

A noiseless alarm clock would prove a boon to a host of sufferers from unseasonable din. The suggestion is made that a silent alarm can be given by focusing an electric lamp upon the head of the person to be awakened, and arranging a switch so that the current to light the lamp would be turned on by the clock at the desired time. It is claimed that the flash of light would invariably arouse the sleeper.

A fire in a show window of J. Katz & Co.'s store, Baltimore, Md., recently, caused considerable excitement in and out of the store and did several hundred dollars' worth of damage. The fire was caused from an electric wire, from which the insulation had been worn off.

Malden Lane and Why So.

A JEWELERS' CIRCULAR—WEEKLY reporter found an old jeweler in a reminiscent mood the other day, and forthwith proceeded to pump him for the edification of such of our readers as occasionally take a few minutes' vacation from engrossing business activities to think of other things than breast pins, watches and gems, for there was a time when Maiden Lane was the antithesis of activity, at least so asseverated the aged jeweler.

"I presume," began he, "that there are now but few of my generation who remember the last representatives of former industries in 'The Lane.' Up to about 1860, at 11 Maiden Lane, was to be found Richard Richard's needle store, a survival of the several dry goods stores which were at one time located on 'The Lane,' and in the adjoining John St. Old directories indicate many and varied businesses in Maiden Lane, which is now, at its upper or Broadway end, given over exclusively to the jewelry and kindred trades.

"A casual glance at the present topography of 'The Lane' and its vicinage will open up to us a mental vista in harmony with tradition as to the origin of its name.

"The top of 'The Lane' is at Broadway; let us stand a moment at the crossing of Nassau St., the first crossing easterly from Broadway. We now stand as it were in the bottom of a deep saucer, our lines of vision limited to four directions by the tall buildings of Nassau St. and Maiden Lane. Now, looking westerly toward Broadway, we find a rise of ground equal to a vertical of four and a half feet; northcrly toward John St. a vertical of five feet, and again southerly to Liberty St. a vertical of five and a half feet; easterly 'The Lane' declines easily toward its foot at the East River.

"Thus it is indicated that this former country lane, before it and its vicinity were margined and covered by buildings, was a linear depression, a sunken roadway, lying between what was then Golden Hill, now John St., and the former Liberty Ridge, now Liberty St. Spreading out to the eastward and down to the shore at the East River were vast areas of meadow lands. On these commons were pastured the kine of the thrifty Dutch burghers of what was then New Amsterdam.

"At night the town gate was locked and the huge key thereof, with due ceremony, placed in the custody of the burgo-master; the wall, wherein was the gate, was located at approximately Wall St. of the present day and hence its name.

"At close of the Summer day the maid-

ens of New Amsterdam, at least some of them, after gathering their kine in the pastureland, led them toward the gate of the town for safety from Indian marauders during the night, and their course led them up 'The Lane.' Just before reaching where is now the crossing of William St., a cowpath diverged on the southerly side of 'The Lane,' and followed the crest of Liberty Ridge, now Liberty St., overlooking 'The Lane.' That cowpath afforded a short cut to the town gateway, and was, therefore, used by those who did not heed the flattering attendance of the swains loitering in the adjoining lane.

"Beyond Liberty Fork the seclusion of 'The Lane,' as it continued toward Broadway between the two high ridges on either side, afforded opportunity for the *Jongen Meid*—young maid—to chat with a favorite *Jongen Heer*—young man—during this leisure and plodding. With the close of their day's domestic industries they were attired as neatly and as primly as was in accord with their Dutch attributes. The young men also were inclined, as was and as is their nature, toward sympathetically assisting the attractive, buxom, industrious maidens.

"Maiden Lane was an ideal trysting place; why shouldn't it have been named 'Maiden Lane'? The Dutchmen, with their directness of nomenclature, gave the name with which the lane was associated. 'All the world loves a lover,' and these Dutchmen were a part of the world. Maiden Lane it was to them; Maiden Lane it is to-day, minus the sentiment of it.

"No; there's no sentiment nowadays in Maiden Lane. It's all business, millions of business," and after a musing moment the old jeweler queried: "I wonder how many of the occupants of 'The Lane' have sentiment enough to appreciate and note the fact that they, workers and dealers in gold, are located so close to 'Golden Hill' of olden times?"

"It may interest some of them to know that within pistol shot, diagonally across the lot or what was a lot at the time, northeasterly from the Nassau St. crossing, where we stood observing the grade of the lane, is a bronze tablet memorial of a Golden Hill incident. It is at the northwest corner of John and William Sts. and announces:

Golden Hill.

Here Jan. 16, 1770,
The Fight Took Place
Between the Sons of Liberty and the
British Regulars, 16th Foot.
First Blood Shed in the
War of the Revolution.

Erected by the Sons of the Revolution
Nov. 25, 1892.

"Thus, we see that our comparatively obscure Golden Hill antedates Concord and Lexington. But it is a commendable trait of native New Yorkers that they rarely boast of the many merits of their beloved city. Their civic pride, however, is none the less profound and sincere."

Professor Maxwell Sommerville has presented a valuable collection of medals of France to the University of Pennsylvania.

THE RAMBLER'S NOTES.

WHAT THE RAMBLER SAW AND HEARD AMONG THE DEALERS IN ART POTTERY, CUT GLASS, BRONZES, ETC.

IMPORTED DECORATED GLASS WARE.

THE lines of imported decorated glass ware shown by Charles Ahrenfeldt & Son, 52 Murray St., New York, contain this season many interesting and pretty novelties in decorations and shapes. The line is replete with all kinds of iridescent, opalescent, gilt, jeweled, enameled and engraved glass ware in vases and small ornaments of every description. In stem ware are some striking pieces having large gilt flowers at the bottom, whose petals appear to be holding up the bowl of the glass. A strawberry design engraved on the underside of nappies, bowls, compots and trays is also especially attractive. The strawberry is in natural colors and the leaves in green and gold. Mention should also be made of a line of shaded colored vases with heavily enameled floral decorations.

A NEW line of jardinières and pedestals has been introduced by the J. B. Owens Pottery Co. in an effect similar to Royal Worcester. These pieces are decorated in light colors on a matt finished ivory ground and their bodies are of porcelain and will not craze. The company are now getting out a new line of lamps in the same ware, which is expected will prove most successful with jewelers. At their New York warerooms, 70 West Broadway, the company are showing one of the largest lines of jardinières in wares suitable for the jewelers' Summer trade they have ever carried. In this line are pots and pedestals of many grades and a combination pot and pedestal in one piece.

HARRIS & HARRINGTON, 32 Vesey St., New York, are experiencing an unusually heavy demand for their fine wood hall and mantel clocks. In the mantel clocks are a number of novelties in shapes, while a number of new designs are promised within a short time. Among these latter is a ship's bell clock, wherein the dial is surrounded by a representation of the ship's steering wheel. The clock comes in but one wood—mahogany. Another popular piece is in Tu-

dor style, ornamented with rich marquetrie work. THE RAMBLER.

The Pompeiian Statue.

EARLY in December last a large block of volcanic slag was discovered at Pompeii which appeared to contain an object in bronze. This discovery was immediately communicated to Prof. Paul Orsi, director of the Archæological Museum of Syracuse, Italy, at that time en route to Pompeii. Prof. Orsi gave orders that the greatest precautions should be taken to insure the freeing of the object

STATUE DISCOVERED AT POMPEII.

from the enveloping slag in its perfection. Thus there was brought to light in succession the legs, feet, trunk, arms, and, finally, the head, of the most marvelous of statues. It represents a young man, who holds in his right hand an *aplustre*, a kind of ornament in former times placed at the stern of ships.

The height of the statue is exactly one meter, 19 centimeters. It was found on the property of one Angulus-Felix Surburbanus, not far from the place where, some months ago, a magnificent cooking vessel of silver was discovered. Prof. de Petra, director of the Naples Museum, agrees with Prof. Orsi in assigning to this statue the greatest scientific and artistic value. He regards it as a copy, but one of great perfection, of a Greek original dating back to 500 B. C. It is in no respect inferior to the famous *Idoline*, the most beautiful ornament of the Florence

Museum. For 50 years so important a relic has not been unearthed at Pompeii—not since the discovery of the famous faun in bronze, now in the Naples Museum.

Renowned Collection of Oriental China.

A CABLE dispatch to New York last week from London stated that one of the most renowned collections of Oriental china in England, begun by Arkwright, has been sold to Duveen Bros., dealers in antiques, for a large sum, and is to be sent to the United States.

The collection includes specimens of the rarest Chinese porcelain, including the largest peach-blow vase in the world. This vase is 18 inches high and nearly twice the size of the famous vase from the Stephens collection, now in the Walters collection in Baltimore.

The vendor of the collection is a grandson of the original owner, Arkwright. There are in the neighborhood of 150 or 175 pieces in the collection, some of them being of very great value. The collection was begun about 78 years ago and gained its note by reason of some especially fine examples. Mr. Duveen, when seen about the dispatch, said that he was not sure that the collection in its entirety was to be brought to this country, but that he hoped it was.

Premium on Victorian Coins.

A SPECIAL cable dispatch to *The Sun*, under date of Feb. 9, says: A peculiar impression has spread among the public that the coins issued in 1901 are of special value as being the last struck with Victoria's effigy. Jewelers and coin dealers have encouraged this idea and have been selling for the past few days hundreds of sets of bronze coins, penny, half-penny and farthing, for sixpence. The penny brought three pence, the half-penny two pence and the farthing a penny. But the bottom must soon fall out of the market, for the people will soon discover that the mint has already issued over 4,000,000 pennies of 1901, and it is stated that probably at least 8,000,000 more will be issued before new dies are adopted. The gold and silver coins of 1901 have not yet been issued. They will probably have a somewhat enhanced value, but collectors should remember that British institutions do not know the meaning of the word hurry. No Victorian pennies were put in circulation until 1841 and no other Victorian coins till 1848.

(Commenced in issue of Feb. 6, 1901.)

SPECTACLE AND EYEGLASS FRAME REPAIRING.

(Continued.)

EYEGLASSES are usually broken in the spring or in the eye wire. These breaks are easily repaired by taking the frame apart and pinning the broken parts together on the charcoal soldering block. But if the spring is broken near the hole where it is attached to the stud, remove the eye frame and nose guard and prepare the joint as already described. It would be the safest plan for the repairer to pin the work onto the soldering block, but the quickest way is to hold the larger side between the fingers of the left hand and the smaller in a pair of tweezers, which are held in the right hand.

The instructions for repairing spectacle eye wire apply to the repairing of the eye frames of eyeglasses.

There is no good way to repair rubber or zylonite eyeglass frames. Sometimes a hole is drilled on either side of the break and the ends drawn together with a piece of binding wire. A better plan is to put in a new eye. Springs are secured to rubber or zylonite eyeglass frames with pins, which are riveted.

If a gold or gold filled spring is broken at the screw hole, drill a hole in the end and replace it in the eyeglass frame and reshape it to suit the nose of the wearer.

New cork is easily placed in eyeglass guards by removing the old and slightly bending back the edge of the guard to receive the new piece of cork. Then the sides, or edges, are pressed over the cork, which is finished with a medium fine file. There is a narrow strip of metal beneath the cork of nose guards, in the end of which is a hole for the screw which secures the guard to the eye wire. Should this break, draw it out about one-fourth of an inch, drill a hole to insert the small screw and insert as before.

Shell or zylonite for guards can be bought in strips. From this the desired size piece is cut and fastened to the nose guards with rivets.

The repairer occasionally will have trouble in removing screws from spectacle and eyeglass frames. Should the screw be rusted in the end piece or hold from any other cause, lay the end piece on a small anvil or block and lightly hammer the gold between the head and end of the screw. This will spread the gold around the screw and it can then be turned with ease if a good, strong screw-driver is used, which the repairman can grasp firmly in the hand.

If lenses are loose, either in eyeglass or spectacle frames, file away a very little of the gold or metal between the joint or sides of the end pieces, so that the parts can be screwed closer together. This failing, move the joint back on the eye wire. The careful workman will not countenance the practice of putting sheet lead or tinfoil between the lens and eye wire to tighten the glass. Great care should be exercised in filing between the joints or end pieces, either to tighten the lens or the side piece. In the latter case it would be better to use washers or to put in new rivets. Some workmen have an idea that side pieces can be tightened by laying the joint on an anvil and hammering the rivet. This is a mistake, because the gold is stretched more than the rivet is compressed and, consequently, the side piece will be as loose as before, or, if tighter, will work itself loose in a very short time.

But if one wishes to tighten the side piece without putting in washers or rivets, lay the joint on an anvil and strike the rivet several sharp blows with a punch of the same diameter as that of the rivet. This will compress the rivet and tighten the side piece without any injury to the gold joint.

If lenses are too large for the spectacle or eyeglass frame and a grinding stone is not at hand, use a slightly coarse, flat file, wetted with water, for reducing the size. In filing move the file toward the lens at an angle of about 45 degrees.

The jeweler is often called upon to drill a hole in an eyeglass lens for a cord. This is an easy matter if one has a lens drilling machine, but if not the case is different. Secure a large, three cornered file and grind the three sides smooth and to a point, and sharpen on the Arkansas stone. Moisten the lens with the lens drilling mixture—sewing machine oil will answer nicely—and make a small mark on the lens where the hole is to be. Then place the lens against the edge of the bench or any other firm place, insert the three cornered point, which is given a rotary motion back and forth. After drilling about one-half way through, turn the lens and proceed in the same manner from the opposite side. A three cornered drill used in the pump drill will do this work nicely. In using lay the lens on a large, flat piece of cork and use the drilling fluid freely. When a small opening is made moisten a fine rat-tail file with the drilling mixture and broach out the opening to the size desired.

(To be continued.)

Thorwald Kolstad, Pleasant Hill, Mo., is the successor of O. Kolstad, who died recently.

The above illustrates one of a large variety of styles in our new Silverware and Toilet Cases. Patent applied for.

VOL. XLII. No. 12.

ART IN GLASS CAMEO WORK.

A COMPANION piece to the beautiful 500 guinea cameo plaque illustrated in THE CIRCULAR-WEEKLY three weeks ago is here depicted and shows the same exquisite treatment and artistic perfection in glass work as does the one already published. Like the former it is a product of Thomas Webb & Sons, Stourbridge, England, the artist also being Mr. Woodall, the acknowledged master of cameo cutting to-day. The subject here, while similar to the Moorish Bathers already described, shows less figure work but contains the same beautiful conception of female form as well as equally elaborate detail in the surrounding scene. The effective border of Arabesque ornament in the former is here replaced by one more fantastic in conception and less symmetrical in outline, but, withal, beautiful and appropriate to the subject.

Rarity of the Nef.

WHEN the Duke of Saxe-Coburg died it was stated that he had left a

finest in the world is owned by the Czar. It was presented by Queen Elizabeth to the Czar of that time. The collection of the late Duke comprises more than 40 nefs

and is, undoubtedly, the largest and finest in existence. It includes beautiful specimens manufactured in the 16th, 17th and 18th centuries. Very little is known regarding the early history of these articles, but in olden days such models were frequently presented by one royal personage to another. Their primary use was in the character of a table ornament and a receptacle for wine. They were constructed with the greatest care and skill, and unstinting pains were taken by the smiths to render them faithful models in every detail of the vessel they were meant to represent.

PLAQUE IN GLASS CAMEO. MADE BY THOS. WEBB & SONS. [One-third size of the original.]

unique collection of nefs, which are small models of ships executed in silver. They are very rare. The nef believed to be the

The Duty on Watches.

Judge Townsend Gives Decision in Important Test Case.

The test case in regard to the tariff on watches, involved in the appeal of Hipp. Didisheim & Bro. and Adolphe Schwob from the decision of the Board of Appraisers, handed down Sept. 27, 1898, was decided, Wednesday last, by Judge Townsend, of the United States Circuit Court, before whom it had been argued, April 15. The argument and the contention of both the Government and the importers were published in full in THE CIRCULAR-WEEKLY last week. Judge Townsend's decision sustains the Board of Appraisers and upholds the contention of the United States Government and the domestic watchmakers of the United States, that for tariff purposes a watch movement is any mechanism that involves the "train" or more than the "train" of a watch. The importers, who had brought in movements with the dial, hands and minute and hour wheels removed, contended that such movements were parts of watches and should have been assessed for duty as such. Judge Townsend's decision is as follows:

"The merchandise in question comprises certain articles, consisting of watch plates, with the complete mechanism between them adjusted so as to run, but with certain parts above the top plate lacking, namely, in some cases, only the dial, in other cases the dial, the hour hand, the minute hand and second hand, the hour wheel and the minute wheel. They were assessed for duty under the provisions of paragraph 191 of the Tariff act of July

24, 1897, as 'watch movements' at 35 cents each and 25 per centum ad valorem. The importers protested, claiming they were 'parts of watches not otherwise provided for.'

"The importers contended that the term 'watch movement' in trade and commerce covered the complete watch except the case. The Board have found upon conflicting testimony that there was no such trade designation; and, furthermore, that such articles were unknown at the time of the passage of the act in question and have, therefore, never been the subject of trade and commerce and, therefore, could not be within any such commercial designation. The finding of the Board, therefore, on this point is controlling. Counsel for the importers further contends that these are mere parts or movements, and as there is no provision for parts or movements, they fall within the provision for 'parts of watches not specially provided for.'

"It is unnecessary to decide the contention of counsel for the Government that in the term 'watch movements' in its narrow sense is included the 'motion' of the watch, which comprises the motion works, consisting of balances and wheels, and in the broadest sense is included the complete watch except the case and dial. The others comprise everything essential to keep time. The only missing parts are those above the watch plate, which are essential to register rather than to keep time. It further appears that the articles were wound, set and were timed. That they were watch movements within the understanding of common speech is shown by the dictionaries and

by the testimony, and is found by the Board. The decision of the Board of General Appraisers is affirmed."

Meeting of the Creditors of J. T. Scott & Co.

A meeting of the creditors of the bankrupt firm of J. T. Scott & Co., New York, was held Thursday, at the office of Seaman Miller, referee in bankruptcy, 346 Broadway. At this meeting the composition offer of 15 per cent., submitted last week, was withdrawn, and George C. Comstock, attorney for the mother and sisters of the bankrupt, moved that a committee of four be appointed to examine the assets and see whether their value was such that any compromise could be offered, or whether the law would have to take its course and the estate be liquidated and wound up. The committee as appointed were: D. L. Safford, representing the creditors in The Jewelers' Association and Board of Trade; Mr. Marden, representing the eastern creditors; Mr. Bennett, representing the American Exchange National bank, and Mr. Comstock.

Mr. Stuart, the trustee elected by the creditors at a former meeting, resigned his position and some of the members present asked that a new trustee be elected. This Referee Miller refused to do at this meeting, but will call another meeting of the creditors about May 1, for the election of a trustee.

L. J. McHugh, Blanchard, Ia., has put new fixtures into his store. He recently came into a small fortune by the death of a relative.

**Retail Merchants' Association of Canada
Win Against Trading Stamp Companies.**

TORONTO, Canada, April 18.—The Retail Merchants' Association have achieved a great victory in the adoption of the bill giving power to municipalities to abolish the use of trading stamps which came up again before the Provincial Legislature of Ontario.

Mr. Graham moved that the House go into committee on the bill. He explained the principles of the measure and asserted that most of the names on the large petitions received against the measure were signed by children who at the request of the trading stamp people subscribed the names of their parents.

Messrs. Joynt, Kidd and Matheson, Conservative members, warmly assailed Mr. Graham, the promoter of the bill, charging that he was using the measure as a means of making political capital and had misrepresented the position of the Conservatives in relation to the bill. Mr. Graham replied at some length, after which Mr. Whitney, the Opposition leader, said that he was opposed to the bill because it embodied the principle of local option. If one municipality abolished trading stamps and another retained them it would result in confusion and local jealousies.

Attorney-General Gibson said that if trading stamps were the evil that they were alleged to be, the system ought to be suppressed outright. Trading stamps might not be a legal fraud, but might be an evil which should be abolished. The

bill, unfortunately, did not touch the main question.

Mr. Pattullo said that trading stamps were a public nuisance which ought to be suppressed. The mode of dealing with the liquor traffic presented an analogy to the method embodied in the bill, as liquor selling might be a crime under the law in one municipality and not in another. He favored the local option principle. He was prepared to say that two-thirds of those whose names were appended to a large petition from his county against the bill never saw the petition and the signatures were mainly those of women and children, half a dozen names being sometimes signed in one handwriting.

Several other speeches were made, most of the speakers favoring the bill, the most noteworthy exception being that of Mr. Breithaupt, of Berlin, who favored the trading stamp companies on the ground that his town received large orders for furniture from these concerns.

On the question being put the bill was adopted by an overwhelming majority and reported to the House. It was thereupon ordered to be incorporated with a Government measure comprising numerous amendments to the municipal law, which received a third reading and was finally passed.

Phillips & Bailies have dissolved partnership at Aikin, Minn. Mr. Phillips retaining the business. Mr. Bailies has bought A. A. Wendal's stock of jewelry and will continue the business.

THE "ANJOU"

"1835-R.WALLACE"

Stamped on an article of Silver-plated ware is a guarantee of worth and quality.

Every dealer, when selecting a line of plated ware, always has in mind two leading qualities, and these usually are durability and design, as these are the ones on which most depends his reputation as a dealer in honest ware.

Our goods are made of the highest grade of Nickel Silver, plated with FINE Silver. Our extra, or A 1 grade, is plated 20 per cent. heavier than the regular standard. Triple and sectional plates are also carried in stock.

In designing patterns we endeavor to select only such as are graceful in outline and thoroughly artistic in decoration, and which conform most closely to the taste of a discriminating purchaser, which our long experience enables us to do.

Our line consists of the following patterns: Tipped, Fiddle, Windsor, Shell, Joan, Virginia, Astoria, Stuart and Anjou.

Any dealer who is not already familiar with our line will find it much to his advantage to write for Catalogue and discounts.

The Dodge Jewelry Seizure Case.

Important Points Involved Argued in the U. S. Circuit Court of Appeals.

The appeal in the action known as the Dodge jewelry case from the decision of Judge Brown and a jury in the United States Circuit Court, a year ago, awarding to Mrs. Dodge the pearl rope and pearl dog collar necklaces valued at \$64,000, which were seized from her, June 24, 1899, was argued last week before Judges Wallace, Lacombe and Shipman, in the United States Circuit Court of Appeals, in New York. As has already been told in these columns, the jewelry, with some other small pieces, was taken from Mrs. Dodge when she arrived on the steamship *St. Paul*. She had been met by a customs agent, who spoke to her about jewelry not enumerated on her declaration, and she had given him a satchel which contained the pieces in question, which were afterward seized by a Government official. An action to declare them forfeit to the United States for improper entry was tried, in August, 1900, in the United States District Court, and after a long legal fight resulted in favor of Mrs. Dodge. The United States Government took this appeal on account of the important points involved in the case, among which were the questions whether or not a passenger had the right, as contended by the attorneys for Mrs. Dodge, to declare dutiable articles up until the time of leaving the dock; second, whether the passenger's declaration, as at present indicated, was defective, and third, whether or not the \$100 clause of the present Tariff act applied to all articles purchased abroad or only to articles purchased abroad by such residents, as it substantially states.

When the case came up, Thursday, General Henry L. Burnett, United States District Attorney, opened for the Government and, after briefly reciting the case, made a long and careful argument on the points in law involved. They were briefly on the question whether or not, under the statute, an intent on the part of the passenger to defraud the revenue and conceal the articles brought in is essential to work a forfeiture; whether the articles seized were merchandise in contemplation of the law; whether the baggage declaration did not conform to the statute, and lastly, whether the jewels seized, if presents to the claimant, were barred from free entry under section 697 of the Tariff act. On all these points he took the affirmative, citing many authorities. He claimed that the necklace was not essential for the journey and did not come under the clause exempting wearing apparel, toilet articles, etc., so considered. While interpreting the declaration signed by Mrs. Dodge, Judge Lacombe interrupted General Burnett and stated that the declaration provided for the enumerating only of articles purchased abroad for others or for sale, and did not provide for anything in the baggage for the passenger's personal adornment.

In making his argument to the Court, General Burnett stated that this is a very important case and if the Government are

wrong in their contentions there must be an entire revision of the present laws on the subject of the entry of goods by passengers. If the other side were correct, he said, it would open a door to wholesale smuggling, as smugglers would make no declaration, but take their chances of having to enter articles after discovered. He stated that the Government were more anxious to obtain a clear and true interpretation of the statutes and rightful construction of the law relating to smuggling than to succeed in this case without settling these points.

W. Wickham Smith, counsel for Mrs. Dodge, answered General Burnett and began by calling the Court's attention to the procedure of the staff officers, who get about 50 declarations from the passengers within an hour, and claimed that if every article not enumerated by the passengers can be seized, then it was nothing less than a trap set for every American who has brought goods from the other side. He claimed that the declaration by the passenger has no warrant in law, saying that there were two methods provided for collecting duty on baggage; one by examination on the dock and the other by a regular entry. He claimed that the declaration was simply a part of the regulations of the Treasury Department and that under these regulations an official was not authorized to seize baggage unless a clear intent to defraud was shown. There was no evidence, he said, of such intent in this case. He analyzed the declaration and said there was nothing in that of Mrs. Dodge's that was not particularly true in every detail. A passenger, he claimed, had the right to enter his dutiable goods with the Custom House up until the time he was about to withdraw them from the dock, and cited the Keck case, in which the Supreme Court decided that smuggling cannot exist until after all chances to declare the goods had passed. His point under the \$100 clause was that articles of personal adornment necessary for the convenience of the passengers were admitted free, and that the \$100 clause simply recited "but not more than \$100 in value of articles purchased abroad by such residents" shall be deemed free of duty upon their return. As these necklaces were not purchased abroad by Mrs. Dodge, but had been given to her as presents, they were not barred from coming in free by this clause. If these goods were free, he claimed, they were not subject to seizure. Briefs were submitted on both sides and decision was reserved.

The jewelry at issue in this case consists of the pearl necklace with diamond studded charm, valued abroad at \$35,000; a pearl and diamond dog collar, \$4,500; a set of diamond dress buttons, \$250; a turquoise and diamond scarf pin, \$150, and some imitation jewelry, the aggregate value being placed at \$40,083, which with the 60 per cent. duty, would make the full value in this country \$64,871.

GEO. M. HARD, President.

W. H. STRAWN, Ass't Cashier.

Creditors Do Not Favor W. A. England's Offer of 60 Cents.

WORCESTER, Mass., April 18.—There is little probability that the creditors of W. A. England, 394 Main St., will accept his offer of 60 cents on the dollar, divided into three payments. Since this offer was made three suits have been commenced against Mr. England, the writs being from the office of Rice, King & Rice. The plaintiffs in the first case are the Chapin & Hollister Co., doing business in Providence. This company sue Mr. England for \$1,000 in an action of contract.

The plaintiffs in the second suit are Dutee Wilcox & Co., Providence, and the suit is for \$800. The third suit is brought by John T. Mauran Mfg. Co., Providence, the *ad damnum* of the writ being \$300. All are actions of contract to recover on accounts.

Writs are returnable in Central District Court and were all served by deputy sheriff W. W. Scott, who served the first writ attaching property in England's jewelry store.

Arrested for One Robbery, Is Held and Sentenced for Another.

KANSAS CITY, Mo., April 17.—Mike Ragan, who, with a companion, stole a diamond ring from J. R. Mercer's store, a month ago, pleaded guilty to grand larceny to-day and was sentenced to two years in the penitentiary by Judge Wofford. The ring was valued at \$45 and was not recovered, as the police have not succeeded in locating the other man. Ragan claims the other man was a stranger, whom he met a short time before in a saloon. The clerk who waited on the men detained Ragan until the police arrived, the other man escaping with the ring by stepping outside the door to brush some cigar ashes from his coat.

Ragan was recognized at the police station as the man who had been arrested a couple of years ago for obtaining goods from Mr. Stevens, who has a pawn shop and jewelry store on Main St. At that time he was released on bond, which he jumped, and nothing had been heard of him until he was arrested in Mr. Mercer's store. He was held on the old charge.

Gilchrist Bros., Portland, Me., have moved from 421 Congress St.

George E. Hooper & Co. are selling at auction the stock of H. E. Carner, Frankfort, N. Y., which was recently bought by the C. J. Wells Co., Utica, N. Y.

Burglars entered the general store of A. Freund & Co., Clinton, Ia., on the night of April 12 and looted it of a number of watches and a large quantity of jewelry. The loss was several hundred dollars.

Big Store Deal in St. Louis.

Mermod & Jaccard Jewelry Co. Buy the Business, Etc., of Merrick, Walsh & Phelps Jewelry Co.

St. Louis, Mo., April 20.—The Mermod & Jaccard Jewelry Co. to-day bought out the entire business, stock and good will of the Merrick, Walsh & Phelps Jewelry Co. for \$250,000, spot cash, and took charge at once. The selling firm agree to retire from the jewelry business in St. Louis and the business will be concentrated at the store of Mermod & Jaccard Jewelry Co., although the contract calls that the store of Merrick, Walsh & Phelps Co. be kept open for three months.

By absorbing their principal business rival the Mermod & Jaccard Jewelry Co. become the second largest establishment of their kind in the country. Joseph B. Urden, of Barr & Urden, with offices in the Commercial building, engineered the deal. In an interview he said:

"The deal was really begun a year ago, when Mermod & Jaccard tried to buy out the E. Jaccard Jewelry Co. At that time I made a trip to New York to consult with the creditors of the latter firm. Finally, Merrick, Walsh & Phelps Co. bought out the bankrupt stock of the E. Jaccard Co. and moved into the location at 6th and Olive Sts. This was last Fall. The present deal was broached a month ago. There was no difficulty about the terms, Mermod & Jaccard agreeing to pay cash, but some details over the lease have delayed matters. These were not straightened out until Friday, April 19."

Merrick, Walsh & Phelps Co. have control of the big store for nine years, their lease being for four years, with a four year renewal clause. The assets of the company, according to the report submitted by experts, amount to \$297,000.

The officers of the Mermod & Jaccard Jewelry Co. are: A. S. Mermod, president; Goodman King, vice-president and secretary; C. F. Mathey, treasurer, and these, with E. A. Jaccard and R. O. Rolt, directors. By the consolidation the Mermod & Jaccard Co. secure possession of the assets of both the Merrick, Walsh & Phelps and E. Jaccard companies, their oldest and strongest rivals. The E. Jaccard Co. were started in 1828, Mermod & Jaccard Co. in 1864 and the Merrick, Walsh & Phelps Co. in 1878. Mr. Merrick, Mr. Walsh and Mr. Cuendet will go with the Mermod & Jaccard Jewelry Co., and all have entered into an agreement not to go into other jewelry business for several years.

The details of the consolidation, so far as removing the stock, etc., have not yet been completed. A. S. Mermod, who was to have left for Europe this week, postponed the trip until next week on account of the big sale.

F. Witherstine, Herkimer, N. Y., has recently removed to a more desirable location in that village.

Edward J. Spall, for several years manager for Mrs. Ida M. Edwards, Pittsfield Mass., will open a store in Pittsfield, May 1.

The "Illinois" Silver Service.

Creditors' Bill and Replevin Suit Likely to Delay Its Deliverance to the Naval Vessel.

CHICAGO, Ill., April 20.—The beautiful silver service of the United States battleship *Illinois*, illustrated in THE JEWELERS' CIRCULAR-WEEKLY of April 17, is in the vaults of the Northern Trust Co., Chicago, with a creditors' bill and a replevin suit hanging over it. The cases for mounting the set are in the rooms of the Towle Mfg. Co., this city. The simple facts of the case are that the committee in charge of the presentation of the service have been made parties to a creditors' bill filed by the receiver for the Stewart building and directed against Stevens, Wallace & Co., who had the contract for furnishing the service but meantime had failed, owing the receiver rent. When Stevens, Wallace & Co. found they could not carry out their contract they assigned it to the Towle Mfg. Co. This assignment was made in March. When the service arrived in Chicago it was unpacked and at Mr. Nixon's request, he being one of the committee, it was displayed at the office of Mr. Nixon for the inspection of the full committee. At that time it was stated that the committee desired to keep back \$400 or \$500 of the purchase price for contingencies, implying that the money, except these amounts, would be paid over that afternoon. The committee, later in the day, telephoned Manager Todd that they did not want to pay for it before the cases were de-

And Other Precious Stones.

livered and they would put it in a safety vault, which they did. The next thing was a creditor's bill by Mr. Hubbard receiver for the Stewart building, for rent due from Stevens, Wallace & Co., making the committee parties to it. Mr. Todd met Mr. Nixon on the latter's return from Washington and asked the return of the set to the Towle Mfg. Co., to which Mr. Nixon replied that it would be impossible for him, being but one of the committee, to give it up.

Mr. Todd, besides holding the assignment from Stevens, Wallace & Co. of last March, had paid for the service with the Towle Mfg. Co.'s money several days previous to the inspection of the silver at Mr. Nixon's office. On the refusal of the committee to return the silver to the Towle Mfg. Co. the latter filed a replevin suit, which included also the Northern Trust Co. bank, and made a demand for the service, which, of course, the bank refused to give up. The committee have the money to pay for the Illinois silver service. The Towle Mfg. Co., to whom the contract was assigned by Stevens, Wallace & Co. last March, have paid the manufacturers for it and own it. There are no differences between the silver company and the committee.

This service was designed and made by the Whiting Mfg. Co., New York. The design was submitted by Stevens, Wallace & Co. and after it was accepted the order was placed with the Whiting Mfg. Co. to make the service. Before it had been completed Stevens, Wallace & Co. failed, but the makers continued the work on it and, two weeks ago, shipped the service to Chicago, care of the insolvent concern or their receiver. President Bulkley, of the Whiting Mfg. Co., stated, Friday, that his company had been paid for the service and that they were not parties to the suit in any way.

It Assists You In

selling larger and finer stones—that's one of the advantages of our system of GRADING DIAMONDS. In a large percentage of cases where we send goods on memo. for special sales, it is the finest stone that is sold. When a customer sees the difference between several qualities, as shown by our grading system, he generally selects the best. Our many customers have found this to be so. A system like this, that induces larger sales, is appreciated by the progressive jeweler.

When you have a customer for a fine or extra fine diamond, a trial order will convince you of this, and our prices will bear favorable comparison with any in the market—they are such as induce sales. Remember, we guarantee every stone to be exactly as represented.

Deardurff Gets Another Chance and Finds a Friend in Need.

KANSAS CITY, Mo., April 17.—William Deardurff, formerly shipping clerk for Edwards & Sloane Jewelry Co., who took a tray containing \$3,000 worth of diamonds from his employers, several weeks ago, has been paroled by Judge Wofford. His parole was due to the earnest solicitation of T. R. Prest, of the Prest Heating Co. Mr. Prest became interested in the case through the newspapers and made an investigation. He called upon the boy's family and found them well bred and refined. He then went to the county jail and secured an audience in the Marshal's office with Deardurff, where a few minutes' talk was sufficient to convince him of the boy's worth. Judge Wofford finally acceded to Mr. Prest's entreaties. After lecturing Deardurff and telling him this was his opportunity to make an honest man of himself, he released him on \$500 bond on condition that he report to the Court on the first day of each term of court for the next two years. Mr. Prest signed the bond and will give Deardurff employment at his foundry.

The Arrest of an Alleged Dishonest Salesman.

BOSTON, Mass., April 18.—Word has been received here from Troy, N. Y., announcing the arrest in that city of George E. Abbott, a former salesman for Henry A. Prentice, a jeweler at 630 Washington St., Boston. Abbott is wanted here for two alleged criminal transactions. One is the larceny of \$105 worth of watches from Mr. Prentice and the other the larceny of \$1,200 worth of diamonds from the firm of D. C. Percival & Co., 373 Washington St. Abbott has been missing from Boston since February, 1900. Just before his departure he left the employ of Mr. Prentice. Through his connection with Mr. Prentice, Abbott got the diamonds from Percival & Co., the salesman there believing that Abbott was still in the employ of Prentice.

The fact that Abbott was not with Mr. Prentice did not become known for several weeks. Then inquiry was made and it was learned that the diamonds had been pawned and the ticket sold. The police went to claim the property and learned that the goods had been redeemed. On learning of this, Mr. Prentice secured a warrant for the arrest of Abbott. As soon as the necessary papers are received Abbott will be brought here for trial. He had been living in Troy under the name of George Edwards.

O. R. LaMontague, Terry, S. Dak., has just recovered from illness.

The store of J. B. Johnson, College Springs, Ia., had a very narrow escape from being burned out recently. A disastrous fire swept the business part of the town, destroying some of the largest stores in it. The flames reached the store building next to Mr. Johnson's jewelry establishment, which would have been lost also had not ropes been attached to the burning building and it dragged out into the street.

Salesman Requested His House to End His Spree; They Did.

MILWAUKEE, Wis., April 18.—At the instance of Omar L. Rosenkrans, president of the Weber Jewelry Co., this city, Thomas B. Delaney was arrested, Tuesday, at Escanaba, Mich., on the charge of having taken watches and jewelry to the amount of about \$1,500.

A rather novel feature of the case is the fact that Delaney himself informed the Weber Co. that he was not doing right. He wrote to the effect that he was on a "spree" in northern Michigan and that the company had better send a man to look after the property he had for sale. He said he had spent considerable money that belonged to the firm and that if something was not done to restrain him he would go deeper into the hole. A representative of the firm went north and found Delaney's accounts in bad shape.

Tried to Substitute Imitation Ring for Genuine One.

CAIRO, Ill., April 17.—Two men made an unsuccessful attempt to rob John A. Miller of a diamond ring, Monday evening. They entered as customers and were shown some rings. Then they wanted to see rings in another tray, and as the clerk handed out the tray he noticed a substitute in the first ring tray in place of a \$175 diamond ring. He immediately handed the substitute back to the swindlers and demanded the real ring, which they denied having; but the clerk detected the ring in the hands of one of them and made a grab for it. They then gracefully admitted the theft and asked the clerk to keep quiet about it. They were afterwards arrested.

Bill in Pennsylvania Legislature Affecting Pawnbrokers.

HARRISBURGH, Pa., April 21.—Mr. Yates has introduced a bill into the Legislature affecting pawnbrokers. It is to regulate the loaning of money where the securities are furniture, jewelry, etc., and providing that not more than 6 per cent. interest shall be charged and 5 per cent. for collection. A penalty clause imposes an imprisonment of one year in jail and \$500 fine, or both, and gives the informer a reward of \$100.

Much Ado Over the Badges for the Boston Common Council.

Boston, Mass., April 18.—The badges furnished the Boston Common Council in February were in court, Monday, the reason being a suit brought by the maker, J. P. Harriott, engraver, 3 Winter St., against the Thomas Long Co., jewelers, 77 Summer St., who had the contract to supply the Council, for the payment of the badges. The evidence submitted was contradictory. Lawyer Gaffney handled Harriott's side and Lawyer Knowlton had the two Davidsons, composing the Thomas Long Co., and their head salesman, C. P. Durgin, who engineered the deal.

Mr. Harriott, Sr., said that the defendants had left at his place of business, after he had rejected them, the badges he had made for them. He had furnished them with 75, for which he was to have received \$5 each. There were only 72 returned, all more or less jammed up and three of them broken. Bertram Harriott, a son, repeated the story told by his father. He told of the visit by President Kiley, of the Council, in company with Durgin, and said that Kiley wanted his full name on his badge and the committeemen did, too.

Durgin, examined for the defence, positively denied the stories of the Harriotts and told how a desire to have the Common Council fittingly adorned came to grief through a substitution of brass for gold. He told how Harriott came to his office and wanted the best job he could get and never impugned in any way the character of the body. He said Harriott, Sr., said he would take the badges back and melt them up, but he also admitted that he did try to settle with Harriott personally "purely out of friendliness."

Charles Davidson, president of the

OPPENHEIMER BROS. & VEITH,
Importers and Cutters,

CORNER NASSAU AND JOHN STREETS, NEW YORK.

Amsterdam, 2 Tulp Straat. - - London, 45 Holborn Viaduct.

Thomas Long Co., repeated the story told by his salesman, also denying the claims of the plaintiffs. His testimony was interrupted just before recess to admit that of a chemist and assayer, S. B. Sharpless, who affirmed his evidence, declining to be sworn. He said that what gold there was in the Harriott badges was 10 karat, all right, but that there was not exactly a mother vein running through them. There might be 5 dwt. of 10 karat or about \$2 worth, leaving the balance of the \$5 for composition metal, enamel, engraving and workmanship. After hearing the arguments the Court took the case under advisement.

Death of Samuel Garman.

WILLIAMSPORT, Pa., April 19.—Samuel Garman, who died Wednesday, at Renovo, aged 77 years, was a pioneer in the jewelry business in this section. He was born and reared in Dauphin county and in early life came to Lycoming county and located at Jersey Shore, where he started the watch and jewelry business, which he conducted there until 1855, when he removed to Williamsport.

In this city he carried on the business for over a quarter of a century and was for many years the leading jeweler, his location being in Market Sq. He was one of the city's most prominent merchants and a gentleman possessing the honor and respect of all citizens. About 20 years ago he removed to Renovo and conducted a jewelry store there up until within 10 days of his death. He leaves a widow, three sons and one daughter—George J., William H., Samuel Z., and Mrs. Alice Fox. His brother, Daniel, now over 80 years old, conducts the Garman house, in Renovo. Samuel Z., one of the sons, conducts a jewelry store here.

Liabilities and Creditors of Arthur A. Carmer.

EATON RAPIDS, Mich., April 19.—The liabilities of Arthur A. Carmer are between \$4,000 and \$5,000. Among the creditors in the trade are the following:

The Howard Sterling Co. Sold.

The Property of the Company Brings \$87,000 at Public Auction.

PROVIDENCE, R. I., April 20.—In the presence of a large number of manufacturers and retailers, the property of the Howard Sterling Co. was sold at public auction to-day. The amount received was \$87,000, the property being knocked down to attorney Frank M. Tyler, of Boston, at that figure. Mr. Tyler said that he represented Col. Francis M. Edwards, of Boston, although it was rumored that Mr. Tyler was acting for the Loring interests. Mr. Tyler, however, denied this.

The sale was held at noon in the office of the company, 7 Eddy St. It was a re-

ceiver's sale, held by virtue of an order of the Circuit Court of the United States, District of Rhode Island, entered on March 28, 1901, in the cause in equity, Francis C. Welch *et al.*, trustees, *vs.* Howard Sterling Co. At the time when the sale was scheduled to begin there were several well known manufacturers in the office, a number of retailers who were anxious to see how the sale would go, and several attorneys representing different interests. Hiram Howard, who founded the business, was one of the interested spectators.

Alderman James F. Freeman, of this city, who acted as auctioneer, called the assemblage to order a minute or two after 12 o'clock. An opportunity had been given prospective purchasers to look over the plant and the stock prior to the time that

the auctioneer announced the terms of the sale. These were that the purchaser would be required to pay on account of the purchase \$5,000 in cash or by certified check at the time of sale, the balance of the purchase price to be paid upon the delivery of the property within one week from the time of sale, the \$5,000 to be forfeited if the balance was not forthcoming.

Mr. Freeman then called for bids. The first offer made was \$50,000. This was made by attorney Francis I. McCanna, this city, who declined to give any information as to whom he was representing. Mr. Tyler, of Boston, jumped this offer to \$75,000. The next advance was \$10,000, made by Mr. McCanna. The figure hung at \$85,000 for a moment or so before Mr. Tyler bid \$87,000. Mr. McCanna had evidently bid as high as he was authorized to do, and as there were no further offers the property was knocked down to Mr. Tyler at the figure given. The entire transaction occupied less than five minutes and there were but these two bidders. It was rumored that Mr. McCanna represented the Gorham Mfg. Co., but he refused to say anything about the identity of the parties for whom he was acting.

The price seemed to be regarded as a fair one by the majority of those present. As one manufacturer put it: "It is difficult to tell just how much stock the company have on hand, but from what I have seen, it seems to me that the figure was as large as one could have anticipated that the plant would bring." It is not known what will be done with the plant. Mr. Tyler was unable to say as to this, stating that it was too early to make any outlines of future plans until after a consultation had been held. There is a strong feeling, however, that the plant will continue to be operated in this city, for it is understood that the receiver has been running the concern at a reasonable profit.

Among those present at the sale were Colonel Potter, of Potter & Buffinton; Silas H. Manchester, of Fessenden & Co.; Colonel Howard; Mr. Thomas, salesman for a Philadelphia house; L. D. Cole, of the Towle Mfg. Co., Newburyport, Mass., and several retail dealers.

Company Forming to Make Clocks Wound by Electricity.

WORCESTER, Mass., April 21.—Worcester capitalists are subscribing liberally for stock in a new \$300,000 corporation that is being organized by Col. William A. Gile for the manufacture of an electric clock. The new corporation are to be known as the National Electric Clock Co. and the men at the head are Col. C. C. Corbett and William Waite Gile, son of Colonel Gile. The home office is at 505 Colonial building, Boston, and the plant is at Bangor, Me. The plant and the patents are owned by Gen. Joseph S. Smith, of Bangor.

The new clock is run by an electric battery, it being necessary to replenish the battery only once a year instead of winding the clock at least every week.

F. W. Steadley has succeeded Steadley Bros., Carthage, Mo.

Receivership of the Lazarus Jewelry Co. Made Permanent.

MACON, Ga., April 20.—The following order has been handed down in the United States Court, in the Lazarus Jewelry Co. bankruptcy proceedings, in an opinion of the Court:

It is now upon consideration ordered, adjudged and decreed that the receivership heretofore temporarily made, be and it is hereby made permanent, and John Randolph Cooper, the temporary receiver, be and he is hereby made permanent receiver on the execution of a bond in the sum of \$5,000 for the faithful performance of his duties, and

It is further ordered that the complainants do execute a bond in the sum of \$10,000 to be responsible for any damages which the defendants or either of them may receive or incur as the result of this application in case the cause should fail on its final hearing, and on the failure to execute said bond within the next 10 days the receivership hereinbefore granted be and the same is annulled and made of no effect.

After the above order was passed, a petition was filed by the attorneys of the creditors calling for a revocation of the discharge from bankruptcy of Max and Arthur Lazarus. The following order was issued by Judge Speer in reference to the petition of the creditors:

The petition of S. Lindenborn, Eichberg & Co., The Duck Brand Co., S. Seward & Co., Carrollton Woolen Mills, Tapp, Leathers & Co., R. Wallace & Sons Mfg. Co., Jacob Strauss & Sons, E. & J. Swigart, E. Ira Richards & Co., Meriden Silver Plate Co., having been read and considered:

It is ordered and adjudged that the defendants therein named, to-wit, Arthur Lazarus and Max Lazarus, do show cause before the United States District Court, at Macon, Ga., on the 29th day of April, 1901, at 10 o'clock A. M., why the discharge in bankruptcy heretofore granted to Max Lazarus and Arthur Lazarus should not be revoked and set aside upon the grounds of said petition.

The Lazarus Jewelry Co., whose affairs have been entangled with legal actions for some time, concerning which an opinion of Judge Speer, of the United States Circuit Court, was published in THE JEWELERS' CIRCULAR-WEEKLY, March 27, have sent out a circular letter to their creditors.

Death of a Noted Mineralogist and Mining Expert.

Richard P. Rothwell, editor of the *Engineering and Mining Journal*, who was noted as a mining engineer, as a mineralogist and as metallurgist, died, Wednesday, at his home, 250 W. 139th St., New York. No man in the country was more eminent than Mr. Rothwell in the lines he pursued.

The deceased was born at Ingersoll, Ont., Canada, May 1, 1837, and was educated at Trinity College, Toronto, Rensselaer Polytechnic Institute, Troy, the Imperial School of Mines, Paris, and the Mining Academy, at Friedburg, Saxony. He commenced work in 1862 in England, coming back to America in 1864, to the coal region of Pennsylvania, where he had charge of large interests, and designed and built the largest wire rope plant in the world. Mr. Rothwell's practice as a mining engineer rapidly increased until he was forced to move to New York, in 1873. Shortly afterward he acquired an interest in the *Engineering and Mining Journal* and was its editor until his death, being likewise president of the Scientific Publishing Co., who publish this paper and many scientific books of interest.

One of Mr. Rothwell's most noted works, which he commenced to publish in 1892, is known as "The Mineral Industry," an encyclopedia of mining and metallurgy, which is issued annually. Mr. Rothwell was a member of many clubs and societies, and was the recipient of many honors and decorations of distinction, both at home and abroad. He had charge of the statistics of gold and silver for the census of 1890.

McConahay-Sharp Jewelry Co. File Articles of Incorporation.

SALT LAKE CITY, Utah, April 16.—John N. Sharp has secured a half interest in the jewelry business of William M. McConahay, this city. The business will be continued by the McConahay-Sharp Jewelry Co. Articles of incorporation have been filed with the County Clerk. The capital stock is \$12,000, divided into 120 shares of the par value of \$100 a share.

The stockholders are John Sharp, with 30 shares; W. M. McConahay, 50 shares; John N. Sharp, 40 shares. John Sharp is president of the company; William M. McConahay, vice-president and manager; John N. Sharp, secretary and treasurer. These also form the directorate.

Decision In Re Memorandums.

Opinion on the Question as to When Right to Sell Includes Right to Pledge.

An interesting opinion on the question, when the right to sell jewelry includes also the right to pledge the same, was handed down by the Appellate Term of the Supreme Court, Friday. The decision was on an appeal by Harris Baruch and another, pawnbrokers, from a judgment of the Municipal Court granted to Charles Ludwin, jeweler, who has sued the pawnbrokers for conversion of jewelry pledged with them by an agent of Ludwin. The opinion, which is written by Judge Leventritt, reverses the judgment with costs and reads as follows:

SUPREME COURT—APPELLATE TERM.

Present: Hon. Henry Bischoff, Jr., P. J.; Hon. David Leventritt and Hon. John Proctor Clarke, J. J.

CHARLES LUDWIN,	}
Respondent.	
vs.	
HARRIS BARUCH and another.	}
Appellants.	

Appeal from a judgment in favor of the plaintiff, rendered in the Municipal Court of the City of New York, Borough of Manhattan, for the Second District.

Geo. W. McAdam for appellants.
Leventritt, J.:

Judgment was rendered below in favor of the plaintiff in an action in conversion brought to recover of the defendants, who are duly licensed pawnbrokers, the sum of \$166, being the value of certain jewelry pledged by the plaintiffs' salesman, one Fröhlich, without the former's knowledge or consent. Although the plaintiff demanded the return of the goods, they made no tender of the sum of \$78, advanced by the defendants.

The agreement between the plaintiff and Fröhlich, placed in evidence, as well as the testimony, show that he was an agent with an unrestricted, general power to sell; that many pieces of jewelry were continuously in the regular course of the business supplied to him.

There is nothing in the record showing knowledge on the part of the defendants that Fröhlich was not the true owner, and nothing in any wise impugning their good faith.

There being power to pledge flowing from the general power to sell, where the agent or factor has possession of the goods (Pegram vs. Carson, 10 Bosw., 517), it follows that the defendants acquired a special property in the jewelry to the extent of their advances; that no action in conversion will lie against them and that they are entitled to retain the goods until their lien has been satisfied (Fitzgerald vs. Fuller, 19 Hun, 180; Smith vs. Clews, 105 N. Y., 286; 114 N. Y., 190). While the maxim that no one can confer a better title than be himself has protects an owner against the acts of an agent converting property to his own use, the rightful owner may nevertheless be estopped by his own acts from asserting his title. "If he has invested another with the usual evidence of title, or an apparent authority to dispose of it, he will not be allowed to make claim against an innocent purchaser dealing on the faith of such apparent ownership." (Smith vs. Clews, 114 N. Y., 190, 194; McNeil vs. Tenth National Bank, 46 N. Y., 325). The extent of the agent's authority may always be shown, and where it appears, for instance, that in place of a general power to sell, he received the goods merely for disposal to a specified third party, an innocent purchaser or pledgee will not be protected. (Heilbronn vs. McAleenan, 16 St. Rep., 957; Anderson vs. McAleenan, 29 St. Rep., 406.) In this case the plaintiff vested Fröhlich with more than the naked possession for a particular purpose. By virtue of the general power of sale and disposition resting in him, he had the indicia of ownership, on which the defendants were justified in relying. Having parted with valuable consideration on the faith of it, they are entitled to reimbursement before being compelled to surrender or return the property.

Judgment reversed and new trial ordered, with costs to appellants to abide the event.

this decision could be used by the pawn-brokers in defense of transactions growing out of memorandum agreements between jewelers and brokers, George W. McAdam, the counsel for the appellants and who is also counsel for the Pawn-brokers' Association, said: "This opinion is only in line with a series of decisions on this question since 1857. It in no way conflicts with the protection afforded hitherto to those who make conditional sales or intrust goods on pure memorandum. It applies only to cases where goods are intrusted into the possession and control of an agent with unrestricted power of sale. The agent thus becomes a *factor* and those dealing with him in good faith are hence protected under the factor's act."

Death of George W. Gooding.

CENTRAL FALLS, R. I., April 19.—George W. Gooding, for 20 years in the jewelry business here, died Wednesday, after an illness of four days, of pneumonia.

Mr. Gooding was born in Lonsdale, R. I., May 4, 1839, and would therefore have been 62 had he lived until May 4. He secured his education in the public schools of Smithfield. He learned the trade of machinist with Fales & Jenks, of Pawtucket, and that of jeweler in Providence. In the '60s he conducted a grocery business in partnership with his brothers, William H. and James B. For the past 20 years he was engaged in the jewelry business on Central St. He never held public office. He was a member of Jenks Lodge, F. and A. M.

Philadelphia Branch of The Jewelers' League Forms Aid Society.

PHILADELPHIA, Pa., April 22.—A meeting of the executive committee of the Philadelphia branch of The Jewelers' League was recently held and an aid society founded to aid members in need and distress, and to enlarge the membership and to forward the interests of the League in this city. In order to create a fund it was decided to give a theatrical benefit, Thursday, May 2, at the Broad Street Theater, the play being "The Burgomaster." Since these arrangements were made the project has been heartily approved and encouraged by all classes of Philadelphia jewelers, and its object is already assured.

The gentleman credited with having originated the Aid Society and comprising the committee are: B. H. Lyon, manager of the G. S. Lovell Clock Co.; William F. Michael, with Roller & Speidel; Abe Sickles, 726 Chestnut St.; Richard Pinkstone, 20th and South Sts.; J. Stemler, 611 Sansom St.; William G. Blair, 804 Chestnut St., and W. H. Long, J. E. Caldwell & Co. Tickets can be obtained from any of the committee.

Samuel M. Prentiss, Bangor, Me., has brought suit against the Bangor Electric Clock Co. to recover money which he claims to have expended for the benefit of that corporation. The case will not be tried during the present April term of the Supreme Court.

Decision In Re Memorandums.

Opinion on the Question as to When Right to Sell Includes Right to Pledge.

An interesting opinion on the question, when the right to sell jewelry includes also the right to pledge the same, was handed down by the Appellate Term of the Supreme Court, Friday. The decision was on an appeal by Harris Baruch and another, pawnbrokers, from a judgment of the Municipal Court granted to Charles Ludwin, jeweler, who has sued the pawnbrokers for conversion of jewelry pledged with them by an agent of Ludwin. The opinion, which is written by Judge Leventritt, reverses the judgment with costs and reads as follows:

SUPREME COURT—APPELLATE TERM.

Present: Hon. Henry Bischoff, Jr., P. J.; Hon. David Leventritt and Hon. John Proctor Clarke, J. J.

CHARLES LUDWIN,
Respondent,

vs.

HARRIS BARUCH and another,
Appellants.

Appeal from a judgment in favor of the plaintiff, rendered in the Municipal Court of the City of New York, Borough of Manhattan, for the Second District.

Geo. W. McAdam for appellants.
Leventritt, J.:

Judgment was rendered below in favor of the plaintiff in an action in conversion brought to recover of the defendants, who are duly licensed pawnbrokers, the sum of \$166, being the value of certain jewelry pledged by the plaintiffs' salesman, one Fröhlich, without the former's knowledge or consent. Although the plaintiff demanded the return of the goods, they made no tender of the sum of \$78, advanced by the defendants.

The agreement between the plaintiff and Fröhlich, placed in evidence, as well as the testimony, show that he was an agent with an unrestricted, general power to sell; that many pieces of jewelry were continuously in the regular course of the business supplied to him.

There is nothing in the record showing knowledge on the part of the defendants that Fröhlich was not the true owner, and nothing in any wise impugning their good faith.

There being power to pledge flowing from the general power to sell, where the agent or factor has possession of the goods (*Pegram vs. Carson*, 10 Bosw., 517), it follows that the defendants acquired a special property in the jewelry to the extent of their advances; that no action in conversion will lie against them and that they are entitled to retain the goods until their lien has been satisfied (*Fitzgerald vs. Fuller*, 19 Hun, 180; *Smith vs. Clews*, 105 N. Y., 286; 114 N. Y., 190). While the maxim that no one can confer a better title than he himself has protects an owner against the acts of an agent converting property to his own use, the rightful owner may nevertheless be estopped by his own acts from asserting his title. "If he has invested another with the usual evidence of title, or an apparent authority to dispose of it, he will not be allowed to make claim against an innocent purchaser dealing on the faith of such apparent ownership." (*Smith vs. Clews*, 114 N. Y., 190, 194; *McNeil vs. Tenth National Bank*, 46 N. Y., 325). The extent of the agent's authority may always be shown, and where it appears, for instance, that in place of a general power to sell, he received the goods merely for disposal to a specified third party, an innocent purchaser or pledgee will not be protected. (*Heilbronn vs. McAleenan*, 16 St. Rep., 957; *Anderson vs. McAleenan*, 29 St. Rep., 406.) In this case the plaintiff vested Fröhlich with more than the naked possession for a particular purpose. By virtue of the general power of sale and disposition resting in him, he had the indicia of ownership, on which the defendants were justified in relying. Having parted with valuable consideration on the faith of it, they are entitled to reimbursement before being compelled to surrender or return the property.

Judgment reversed and new trial ordered, with costs to appellants to abide the event.

Death of Simon Castelberg.

BALTIMORE, Md., April 20.—Simon Castelberg, junior member of Castelberg & Sons, proprietors of the Castelberg's National Jewelry Co., of Baltimore and Washington, D. C., died, Thursday, at Atlantic City, N. J. Several weeks ago Mr. Castelberg fell from his horse. Serious results were not expected at the time, but subsequently spinal meningitis developed and death followed quickly. Mr. Castelberg was the son of J. Castelberg, and was one of the energetic young business men of Baltimore. He was born and educated in this city, graduating from the City College about seven years ago.

Two years ago he was made a junior partner in the firm. He was a Mason and a member of the Phoenix Club, of the Fraternal Order of Eagles, and of Western Star Council, Jr. O. U. A. M. He was very popular in Jewish society circles. The funeral was held here, today.

Arrested While Stealing Chain Links from Employers.

ATTLEBORO, Mass., April 22.—Charles Reynolds, a polisher for the D. F. Briggs Co., was arrested this morning in the act of stealing chain links, and in the District Court pleaded guilty and was placed under \$1,000 bonds to go before the Superior Court the first week in June. Reynolds had always been considered a reliable man and had been with the firm five years. He had been suspected and watched for several months. When arrested he had eight pounds of gold chain links in his pockets, valued at 80 cents an ounce, which he would have sold to a fence for 10 cents an ounce. In Reynolds's house were found bracelets, charms, locket, gold chain, links and bits of precious metal.

Thieves broke the plate glass window of the jewelry store of D. L. Switzer, Staunton, Va., Friday night, and stole from the window all the articles within reach, amounting to \$372.

United States Watch Co. Purchased by Philadelphia Watch Case Co.

The Philadelphia Watch Case Co., Riverside, N. J., have bought the United States Watch Co., Waltham, Mass. The business was turned over April 17. The new owners intend to enlarge the business and improve the present existing conditions, and every necessity required to effect the same will be carried out. They will boom the business.

The United States Watch Co. were the outcome of the Waltham Watch Tool Co., purchased in 1883 by Charles Vander Woerd immediately after resigning his position as superintendent of the American Waltham Watch Co. factory. The company were then making a variety of jobbing tools for watchmakers. After the transfer to Mr. Vander Woerd the company were regularly incorporated and engaged in the manufacture of watch manufacturing tools. It was eventually decided to manufacture watches. There was some controversy with the American Company about carrying on manufacturing of timepieces under the old name, and it resulted in the new company incorporating under the name of the United States Watch Co. and the older company changing their corporate name to the American Waltham Watch Co. Mr. Vander Woerd continued for several years to be superintendent and general manager, but eventually more capital was needed and Emil Hammer took hold, supplying the money and becoming treasurer and financial manager. Mr. Vander Woerd and Mr. Hammer have been dead several years, and the latter was succeeded by his brother, who was virtually in charge at the time of the sale.

The purpose of the Philadelphia Watch Case Co. is to have a large output of high grade watches, and it was for this purpose that the United States factory was purchased.

Owing to misstatements in daily newspapers it has been reported that the Trenton Watch Co., Trenton, N. J., were the purchasers of the United States plant, but the Trenton company are not concerned in the matter in any way.

Report of Another Silver Plate Consolidation Denied by Parties Mentioned.

The Hartford, Conn., *Times* published the following news in its issue of April 17:

"Negotiations are under way for the organization of a combine of silver plating concerns against the International Silver Co.

"The movement has its start in New York, and the firms that have been approached are the following: Simeon L. & George H. Rogers Co., Hartford; William A. Rogers Co., limited, New York; C. Rogers & Bros., Meriden; R. Wallace & Sons Mfg. Co., Wallingford, and the American Silver Co. (formerly the Bristol Brass & Clock Co.), Bristol.

"Other independent concerns are to be invited to join in making this combination against the International and the promoters claim that a strong consolidation can be formed. Letters from New York, briefly setting forth the proposition, were received by the Connecticut firms, this morning."

In order to ascertain what truth there might be in the above, THE JEWELERS' CIRCULAR-WEEKLY has inquired of all the concerns referred to, and has received the following statements:

R. Wallace & Sons Mfg. Co.: "We beg to say that the first knowledge we had of the matter was the article which appeared in the newspapers, and we have no other knowledge. The article was entirely without foundation so far as we are concerned."

The American Silver Co.: "The announcement of the Hartford *Times*, so far as it pertains to the American Silver Co., is incorrect."

The Simeon L. & George H. Rogers Co.: "In regard to consolidation of silver firms to fight the trust, would say that we know nothing definite regarding the matter. We heard that it was rumored that such a movement was on foot, not for the consolidation of concerns, but merely the combination of these firms, in an effort to control prices. Would say that this company has not been asked to join any such combination and we treated the story as simply a rumor."

President C. B. Rogers, of C. Rogers & Bros., Meriden, Conn., is quoted as saying that so far as C. Rogers & Bros. are concerned there is absolutely no truth in the reported combine.

William A. Rogers, the general manager of the William A. Rogers, Ltd., was seen at the New York salesrooms of the company, 12 Warren St., yesterday afternoon, and said that the report that his concern were to go into a combination with other silver ware manufacturers of Connecticut, was not true in any way. The William A. Rogers, Ltd., he said, were independent of all others at the present time and would remain so.

F. C. Bennett & Co., Gloversville, N. Y., have been making extensive improvements, the most noticeable being the widening and deepening of their floor space, giving much needed additional room.

The Giant of Collar Buttons

IN QUALITY,
IN SALES.

One Million Five Hundred Thousand Kremenz One-Piece Collar Buttons made and sold within the last year.

WHY?

Because of their HIGHEST QUALITY, BEST CONSTRUCTION, GIVING THE MOST WEAR, AND GREATEST COMFORT and their IRON-CLAD GUARANTEE.

To verify this we invite the trade to read "The Story of a Collar Button, with Illustrations," which may be had FREE for the asking, and to try the experiment suggested on page 5 of that booklet."

Extract from "Printers' Ink," Nov. 23, 1898.

The Little Schoolmaster now suggests, to every pupil in his class, to send a two-cent stamp to Kremenz & Co., 49 Chestnut Street, Newark, N. J., and ask to be favored with a copy of their leaflet, "The Story of a Collar Button." Afterward, if any pupil will send to *Printers' Ink* another leaflet, new or old, that is half as good as this one, or that approaches it in excellence, the deserving student will be rewarded with one of *Printers' Ink's* souvenir spoons as an acknowledgment of his discovery and contribution. "The Story of a Collar Button" is the best piece of advertisement construction that has come to *Printers' Ink's* attention in the year of our Lord 1898.

Should you wish to utilize this booklet to increase your collar button business, we will, on receipt of your order, print your card upon and send you a quantity of them.

Kremenz One-Piece Collar Buttons are stamped as follows, ON BACKS:

Patent sustained by United States Supreme Court.

NEWARK, N. J.

Death of John W. Steele.

NEW ORLEANS, La., April 19.—John W. Steele, who was traveling in this city for C. G. Alford & Co., jobbers in watches and jewelry, New York, died suddenly, Thursday, of Bright's disease, in the St. Charles Turkish bath establishment. Wednesday evening Mr. Steele, accompanied by D. W. Cooke, went to the bath, and while in one of the private sleeping rooms began to feel ill and complained of pains in his throat and chest. He eventually fell asleep, but in the morning felt worse and Dr. Sexton was sent for. The physician made an examination and went away, and when he returned, 10 minutes later, Mr. Steele was dead. Death was pronounced to be due to an aggravated case of Bright's disease. Mr. Cooke took charge of the remains, which were removed to an undertaking establishment and later shipped to Mr. Steele's family in New York.

Mr. Steele was the best known traveler who has ever come to New Orleans, having visited the jewelers of this city for 51 years. His popularity was unbounded, both within and without the jewelry trade, and no visitor from the north was ever more thoroughly welcome than "Uncle John," as he was generally known.

John Wesley Steele may truly have been termed the dean of American traveling jewelers. For more than half a century on the road, he was known person-

ally to the entire jewelry trade of the south, while by the merchants in the manufacturing and jobbing trades of the east he was considered a traveler and salesman without a superior in his line.

THE LATE JOHN W. STEELE.

Mr. Steele was born in Warren County, N. J., Sept. 13, 1832, and was the son of Robert Steele, a Justice of the Peace and mill owner of his native place. After receiving his education he com-

menced his business career as a boy in the employ of Carter & Pierson, now Carter, Hastings & Howe. This was about 1847, and within three years he had so mastered the jewelry business that he commenced traveling for the firm about 1850, becoming a partner a few years thereafter. From the first Mr. Steele traveled in the south and continued over this territory throughout his life. About 1859 he severed his connection with Carter & Pierson and formed the firm of Douglas & Steele, manufacturing jewelers, in Brooklyn. As their business was principally with the south it was completely wiped out by the Civil War, which broke out a few years later. Mr. Steele, after the war, resumed his connection with John R. Pierson, who was then in business for himself. About 1870 he formed the firm of Brainard & Steele and continued for some time alone after Mr. Brainard's death, 10 years later.

In the Fall of 1886 Mr. Steele was compelled to make an assignment, and at once took a position as southern traveler for C. G. Alford & Co., which position he continued to fill until Thursday last. In his 15 years' connection with this house he added materially to its growth, and in the language of Mr. Alford, the firm have never had a man so important to them or whose work was such a factor in the development of their business.

Mr. Steele knew practically every jeweler in the south, from Texas to the east and from the Mason and Dixon line to the Gulf, for the past half century, and his contact with them resulted in the strongest kind of friendship, which gave him a hold on his customers that was generally looked upon as remarkable. He was a man of natural magnetism and was not only generally popular but constantly made friends that he retained ever afterward. He was of large physique, about five feet 11 inches in height and weighed over 260 pounds. To the trade he was familiarly and affectionately known as "Uncle John." He was noted for the high standard of commercial morality which marked his entire career, and his honesty, integrity and ability.

Mr. Steele was married in 1859 to Miss Mary A. Block, of Girardeau, Mo., and his widow, three sons and four daughters survive him. Of his sons, two are in the jewelry business, John W. Steele, Jr., with C. G. Alford & Co., and Robert B. Steele with Kohn & Co. The third, is an electrical engineer. The deceased was a member of St. John Lodge, F. & A. M., of Newark, and was one of the charter members, No. 18, of The Jewelers' League. He belonged to no other clubs or fraternities, devoting his entire time to his business and his family. The funeral services were held, Sunday afternoon, from his late residence, 374 Jefferson Ave., Brooklyn, and were largely attended and marked by an unusual number of floral offerings. The interment took place the same day at Greenwood Cemetery.

Dio A. Hauk, Logansport, Ind., has sold out to H. B. Smith and Warren Flynn. Mr. Hauk expects to relocate in the west.

E. L. SPENCER & CO.,

NEW YORK OFFICE:
9-11-13 Malden Lane.

53 Aporn Street,
PROVIDENCE, R. I.

the early part of the insolvency proceedings, Mr. Walsh was allowed one-half of his claim of \$88 while Mr. McDonnell was allowed nothing on his claim of \$66 for board. An order was passed by the Court to pay a claim of \$220 to the city of Meriden for sewer assessments.

City Treasurer Charles C. Strong, Hartford, was in the jewelry business for a number of years previous to becoming a member of the firm of Strong & Woodruff, retail hat dealers.

At the annual meeting of the Wallingford Board of Trade, the following officers were elected: President, W. J. Leavenworth; vice-presidents, Andrew Andrews, John J. Prior, C. D. Morris; secretary, R. D. Perkins; treasurer, W. H. Newton; directors for three years, George D. Munson, A. I. Martin, William Luby, Jr., R. E. Badger, L. M. Hubbard.

Boston.

At a meeting of the Ancient and Honorable Artillery Co., held last week, Marcel N. Smith, of Smith, Patterson & Co., was elected to membership in that organization.

The Boston Co-operative Clock Co. have filed a certificate of organization with the Secretary of State. The capital is \$5,000 and the officers of the company are Abram Tartakoff, president, and Benjamin Huberman, treasurer.

As the result of an investigation by the police, James W. McDermott, 16 years old, an employe of Smith, Patterson & Co., was arrested last Wednesday on a charge of larceny. During the last two weeks five clocks, valued at \$23, disappeared, and McDermott is alleged to have taken them.

The police are trying to find the three men who, on last Tuesday evening, stole a tray of rings from the store of Abraham Lipkin, 33 Green St. According to Mr Lipkin the three strangers entered his store about 10 o'clock and asked to be shown some rings. After they had gone he discovered that 36 rings, valued at \$80, were missing. He made an unsuccessful attempt to find the men and then reported the case to the police.

Some time between last Saturday night and Monday morning the jewelry store of Alexander Romm, 92 Stamford St., West End, was entered by false keys and the following articles stolen: One ladies' diamond ring, 12 Liberty watches, two china clocks, one small black clock, three gold filled chains, 35 gold plated rings, three pairs of opera glasses, five dozen charms, three dozen stick pins, 60 bracelets, one dozen table spoons, one rope pattern gold chain.

An alarm was sounded late on the afternoon of Patriots' Day, April 19, for a fire on the third floor of the four-story stone building at 364 Washington St., in the rooms occupied by Woodman-Cook Co., dealers in silver plated ware. The fire started from some unknown cause and was discovered by a fireman on a passing electric car, whose attention was called to smoke curling about the window casings. He immediately sounded the alarm. Fred. W. Rauskolb, a gold beater, sustained a slight damage, the total loss being estimated at \$500.

Canada Notes.

TRADE CONDITIONS.

Business has been quiet for the last few weeks, for which the backwardness of the season may to some extent account. The change in ladies' fashions, caused by the discarding of the blouse, has seriously affected the jewelry trade, as the pins, buttons, links, etc., worn with the blouses are no longer in vogue. The watch trade is fairly good and diamonds are selling well, considering the season. The clock trade is in a satisfactory condition and has latterly been better than for some years past. The bulk of the sales are the ordinary staple goods of the cheaper grades. There is little demand for porcelain clocks. They have never been popular here and are now less so than ever. Black wooden and black enameled iron goods suit the popular taste for a medium priced article. The souvenir trade promises well and wholesalers report large orders, as retailers closed last season's business with but small stocks on hand. There is a tendency on the part of jewelers to confine themselves to high grade silver goods in this line, and leave the trade in cheap metal lines to the department stores and fancy goods dealers.

The stock of F. Hogue & Co., Montreal, has been sold.

J. Pyefinch, Portage La Prairie, Ont., has suffered some small damage by fire; insured.

A. McTaggart has issued a writ against George Knowles, jeweler, Sandon, B. C., for \$800.

E. J. Smith, Toronto, is offering a compromise of 40c. on the dollar to his creditors.

J. Hamilton, formerly of Kingsville, Ont., has removed his business to Ridgetown, Ont.

Henry K. Patterson, jeweler, Lakefield, Ont., has given a chattel mortgage for \$117 to D. Conroy.

Harry Stenson, jeweler, Kaslo, B. C., has given a chattel mortgage for \$1,585 to Gertrude Newswander.

C. H. A. Grant, manager of the Montreal Watch Case Co., is traveling in the Lower Provinces.

F. K. Dahl, who forged a number of checks on the jewelers of Victoria, B. C., has been committed for trial.

H. K. Danford, who was recently with the Montreal Watch Case Co., has engaged with Smith, Patterson & Co.

Richard Moses Pierce, Montreal, is doing business as wholesale jeweler, under the name of "The Montreal Jewelry Co."

George Appleby, for many years with James A. Pitts, jewelry jobber, Montreal, has left to take a position with Alfred Eaves.

B. & H. B. Kent, Toronto, have recently put in a new store window which will afford greater space for the display of their goods.

Alfred Eaves, Montreal, is making extensive alterations and additions to his premises, whereby they will be nearly three times larger.

T. D. Spike has just moved into new quarters on Barrington St., Halifax, N. S., directly opposite the city hall, which have been tastefully fitted up.

I. W. Vidito, of M. S. Brown & Co.'s jewelry establishment, Halifax, N. S., has just returned from a business trip to Boston, New York and Philadelphia.

L. H. Hills, manufacturing jeweler, Nanaimo, B. C., has received a stock of diamonds and jewelry and now carries one of the best assorted stocks in the province.

The Canadian demand for high grade watches is still very active. A. R. Harmon, of the American Waltham Watch Co., says that it continues to be impossible to fill orders for these goods.

Mr. Grundy, of the Toronto Silver Plate Co., is closing at Sydney, Australia. He has opened a number of new accounts and extended the business of the company.

H. W. Patterson, of Smith, Patterson & Co., was in Montreal last week in the interests of the firm's business and afterwards left for Toronto, in the company of A. R. Harmon, of the American Waltham Watch Co.

George E. Trorey, Vancouver, B. C., is spending a few days in Toronto, where he was formerly in business. He has prospered exceedingly on the Pacific coast and has recently fitted up in Vancouver perhaps the finest jewelry store west of Winnipeg.

Benjamin Kent, of B. & H. B. Kent, Toronto, leaves Boston on the 24th inst. for Liverpool per steamer *New England*, accompanied by Mrs. Kent and daughters. They will be absent for two or three months, during which time Mr. Kent will visit the leading markets of the European continent.

It is understood that the property at the corner of Bay and Wellington Sts., Ottawa, has been sold to G. Seifert & Sons, jewelers, of Quebec. The tenants have been notified to vacate by May 1, when the necessary alterations to the building will be made so as to turn the residences into a factory, which the above firm will operate.

New clocks have been placed at all the terminals of the Canadian Pacific railway, which are guaranteed not to vary more than 30 seconds from the standard time in a week. Any of them found not to do as guaranteed will be discarded at once. All stations along the lines are now being supplied with new clocks, and in future it will be necessary for all trainmen to carry standard timepieces.

The J. E. Ellis Co., Toronto, are displaying an elegant piece of workmanship of their own manufacture, being the Toronto Bowling League championship trophy for the season of 1901, won by the Q. O. R. Bicycle Club, which they have just finished. It consists of a silver shield of chaste design having a suitable inscription, surmounted with crossed bowling pins and bowls, the shield encircled by a gilt laurel wreath and the whole being solidly mounted on golden oak.

Benjamin Chapman, jeweler, Toronto, who died last month, left an estate valued at \$7,352.56, consisting of stock in trade, \$6,000; cash, \$802.56; debts and notes, \$500; household goods, \$50. R. Watson and his son Edward are executors. The business on Yonge St. is to be sold with-

in one year, and either son to be given the right of purchase. The residue is to be divided among the five children: Mrs. Watson, Mrs. S. R. Hanna, William James, Edward Gilbert and Benjamin Montgomery.

Henry S. Poole, of Halifax, N. S., who has just retired from the active management of the mines of the Acadia Coal Co., has been presented with a handsome silver set by the directors of the company. It is considered the handsomest set ever seen in Halifax. It is in the form of a punch bowl and ladle and claret jug, a suitable inscription being engraved on the two larger pieces. The bowl and jug are copies of similar articles said to have been made use of on one of the ships of the Spanish Armada. The jug, or flagon, standing about 18 inches high, is of Florentine design, the chasing in high relief being very elegant and striking. The plate was manufactured in Great Britain. It is contained in a handsome mahogany case, brass clamped.

Trade Gossip.

The Simeon L. & Geo. H. Rogers Co., Hartford, Conn., have issued a circular regarding Rogers trade-marks and presenting a statement showing the relation of the members of the company with the original manufacturers of Rogers silver plated ware in 1846.

A fine line of silver mesh chatelaine bags and purses has just been gotten ready for the market by D. Stone & Son, 532-534 Broadway, New York. These bags are made in a number of different styles of mesh, some of which are entirely new and all of which are attractive enough to assure a ready sale.

Henry Freund & Bro., 9 Maiden Lane, New York, are showing a line of new La Vallieres, made up in various designs of pearl ornamentation with baroque pearl drop pieces attached to necklaces of 10 karat rope and cable patterns, which they are selling at from \$7 to \$10, complete. This line is one which up-to-date jewelers cannot afford to overlook.

Last Week's New York Arrivals.

THE CIRCULAR-WEEKLY has perfected arrangements for obtaining the names and hotel addresses of all the latest buyers visiting New York, and each day posts in its office, at John St., cor. Broadway, a bulletin which every member of the trade is cordially invited to copy.

TRADE CONDITIONS.

Trade among the big retail jewelers was livelier last week than any other three weeks of the current year. The volume of business was vastly increased by the large number of fashionable weddings. At one wedding alone, that of Miss Whelan and Craig Biddle, it is estimated that \$50,000 was spent in gifts of gold and silver. There are indications that the Spring trade, though somewhat belated, will be heavier than ever before.

Herman Naegele has removed from 55 N. 13th St. to 1220 Filbert St.

J. H. Knerr, Camden, N. J., is in California with his wife on a pleasure trip.

Lou. Sickles, of M. Sickles & Sons, was in New York, last week, three days on business.

John Martin has returned from Florida

and resumed his old duties with Simons, Bro. & Co.

The store of E. W. Mitchall, 619 Market St., was robbed of \$300 worth of jewelry last Monday night.

Howard Stratton has sold out his retail store in Mt. Holly and is now with H. N. Bolte, Atlantic City.

Al. Metzner, retail jeweler, 916 Passayunk Ave., is reported to be so ill that his life is despaired of.

William Keifer, watchmaker, has left Wanamaker's and opened a retail store at 15th and Cumberland Sts.

O. F. O'Neill, Kensington Ave. and Cumberland St., has had some handsome new cases added to his store.

Jeremiah Neill and John Lang, two Sansom St. jewelers, retired from City Coun-

cils at final sessions of the old councils.

William Kammerer, Jr., formerly in business with his father at 20th St. and Fairmount Ave., is now with Francis Pritty, jobber.

Elwood Bailey, until recently a retail jeweler at 8th and Chestnut Sts., has opened a jewelry auction house at 227 N. 9th St.

Charles Paasch, watchmaker, Newburgh, N. Y., has taken a position with Simons, Bro. & Co., succeeding William H. Todd, resigned.

E. P. Percival, 221 N. 8th St., rented a store in 9th St., near Chestnut St., last week, and is now conducting a series of auctions there.

The Western Gold and Silver Refining Co., of Chicago, Ill., have opened a branch office in this city, at 924 N. 3d St., under the management of E. Stern & Bro.

It is stated, though not authoritatively, that the shad dinner of the Jewelers' Club, to be given April 30, will be held in the restaurant in the Bourse building.

Simons, Bro. & Co. and William P. Sackett have the contracts for the trophies and prizes to be distributed at the annual relay races of the University of Pennsylvania.

Handsome souvenir badges to retail for \$2.50 are to be contracted for by the Knights Templar, of this city, for distribution during the conclave, to be held here in September.

Richard Wilde, Philadelphia agent of the Meriden Cutlery Co., intends to take offices in the new establishment of L. P. White, at the southwest corner of 7th and Chestnut Sts.

Lewis Jackson and Vera Jackson, professional shoplifters, who robbed the jewelry store of Jacob Singer, 1821 Columbia Ave., in January, were last week sentenced to jail for three years each.

William Linker, of Davis & Galt, is convalescing from a severe attack of tonsillitis. Mr. Linker is also under medical care for an affection of his right eye, which is yielding to successful treatment.

Albert Hart, Frank Allen and Charles B. Lynch, all notorious diamond thieves, who were arrested in this city for robbing the store of S. Desio, 1012 F St., N. W., Washington, D. C., about 10 days ago, were, last Wednesday, held in \$1,200 bail and later were taken to Washington.

A partnership change of general interest to the trade was effected recently, when J. E. Caldwell & Co., 906 Chestnut St., changed from a general to a limited partnership under the laws of Pennsylvania, with J. Albert Caldwell, 1531 Pine St.; Hugh B. Honston, 3915 Walnut St.; Frederick Shaw, 400 W. Walnut Lane, Germantown, and Joseph Riley, 3940 Walnut St., as general partners, and Joseph H. Brazier, 1803 Pine St., as special partner. Mr. Brazier contributes \$200,000 in cash. The change in partnership went into effect April 1, to continue until March 31, 1903.

The Produce Jewelry Co. have been incorporated to do business at Brookings, S. Dak., with capital, \$25,000. Incorporators: Frederick H. Durfee, William R. Kronneid and George P. Hall.

ALL ABOVE STRICTLY FIRST CLASS AND EQUAL TO NEW WORK.

THE J. B. FAIRBURN CO., 54 Maiden Lane, New York.

Max Freiman, a jeweler at 802 Washington St., was arrested, Thursday, charged with uttering a forgery. The amount involved is only \$6.30, but the circumstances are a little unusual. It is alleged that Alfred Dearing owed Freiman a small amount on a ring which he had purchased. There was some difficulty about the payment and Freiman is accused of having forged Dearing's name to an assignment of the latter's wages. Freiman claims he knows nothing about the affair.

The latest developments in the affairs of the Wilson Jewelry Co. are the sale of all the assets, book accounts and good will of the company by the receiver, Henry S. McPherson, to a number of men interested in forming a new company. The purchase was made on the basis of 55 cents on the dollar. It is impossible to obtain now the names of the men composing the new company, but it is learned on good authority that a meeting will be held on Thursday of this week, at which time the future plans will be made public. It is the intention, however, to continue the business, presumably in the present quarters. An auction is in progress for the purpose of disposing of the old stock, so that the new company may start in with a new and complete line of goods.

Newark.

Ziruth & Moore are succeeded by John N. Moore.

Benjamin Jefferson was arrested at his home in Paterson recently, charged with stealing \$100 worth of rings from his employer, a Newark manufacturer.

James Ewing, 26 years old, was arrested at an early hour Tuesday morning of last week, after smashing a large pane of glass in the window of the jewelry store of George A. Scheller, 286 Market St. The prisoner, who said he had no home, admitted his intention to steal a tray of rings and watch chains which had been left over night in the window. Later,

when arraigned in the First Precinct Police Court, Ewing was committed, in default of \$1,000 bail, to await the action of the Grand Jury.

William Clinton King, 67 years old, died at his home, April 13. He had been confined to his home for 13 months with Bright's disease. Mr. King was a prominent Republican. He was a member of the school board and was at one time Tax Assessor. Mr. King was a jewelry manufacturer, with a factory in Mulberry St., the firm being known as King & Co., but six years ago he retired. His son succeeded him and the firm's name was changed to King & Dreher. Mr. King leaves a widow and four children. He was born in Newark and resided here all his life.

Lancaster, Pa.

J. M. Kryder has opened a jewelry store at Denver, this county, with an extensive stock.

C. P. Reynolds, Reynoldsville, Pa., a student at the Philadelphia Horological School, was a visitor at the L. C. Reisner & Co. establishment, last week.

W. G. Atherholt, western representative of L. C. Reisner & Co., has returned from a 12 weeks' trip. He will remain at the home office for a week before taking up his labors in a more distant territory. John Smedley, of the Philadelphia house of L. C. Reisner & Co., was at the local office of the firm from Saturday until Monday. L. C. Reisner, the head of L. C. Reisner & Co., owing to a prolonged and close application to business, has been compelled to take a vacation. He will spend a month in the mountains.

The Addison Conkling Co. have been incorporated by Guyon de Goll, Henry A. Haines and William T. Day, all of Elizabeth, N. J., with the object of taking over the business of the manufacture and sale of the late Addison Conkling's calendars and other devices and inventions and doing a general stationery business; authorized capital, \$50,000.

A JOURNAL DEVOTED TO THE INTERESTS OF JEWELERS, WATCHMAKERS, SILVERSMITHS, ELECTROPLATE MANUFACTURERS, AND ALL ENGAGED IN KINDRED BRANCHES OF INDUSTRY.

Member of the American Trade Press Association.

Our editorial columns will contain our own opinions only, and we will present in other columns only what we consider of interest or value to our readers. Advertising matter will not be printed as news.

Advertising rates in THE JEWELERS' CIRCULAR-WEEKLY are lower, considering the number of tradesmen reached by its large circulation, than in any other jewelry journal.

Notices of changes in standing advertisements must be received one week in advance; new matter can be received up to Monday.

INFORMATION FOR SUBSCRIBERS.

Terms of Subscription, Postage Prepaid.

	PER ANNUM.	
United States and Canada, - - -	\$2.00	
Foreign Countries in Postal Union, - - -	4.00	
England and Colonies, - - - - -	16s.	
France and Switzerland, - - - - -	20 fr.	
Germany, - - - - -	16 marks	
Single Copies, - - - - -	.10	

New Subscribers can commence at any time. Payments for THE JEWELERS' CIRCULAR-WEEKLY, when sent by mail, should be made in a Post-Office Money Order, Bank Check or Draft, or an Express Money Order or Registered Letter. All post-masters are required to register letters whenever requested to do so.

Pay money only to authorized collectors having proper credentials.

Returning Copies. Returning your paper will not enable us to discontinue it, as we cannot find your name on our books unless your address is given.

Changing Address. In changing address always give the old as well as the new one. Your name cannot be found on our books unless this is done.

Discontinuances. We will continue to send papers until there is a specific order to stop, in connection with which all arrearages must be paid; but such an order can be given at any time, to take effect at or after the expiration of the subscription. All such orders will be promptly acknowledged by mail.

Liability. The courts have decided that all subscribers to journals are responsible until arrearages are paid in full and an order to discontinue has been received by the publisher.

THE JEWELERS' CIRCULAR-WEEKLY IN EUROPE.

Among the places in Europe where it is on file are the following:

- LONDON—First Ave. Hotel, Holborn, E. C.; Holborn Viaduct Hotel, Royal Hotel.
- PARIS—Hotel de L'Athene, Rue Scribe.
- BERLIG—Handels-Zeitung für die gesamte Uhren Industrie.
- BERLIN—Deutsche Uhrmacher Zeitung, Jager Strasse, 73.
- GENEVA—Journal Suisse D'Horlogerie.
- AMSTERDAM—Continental Club, Hotel Amstel.
- ANTWERP—Diamond Club, Rue de Pelican.

Every line of reading matter in THE JEWELERS' CIRCULAR-WEEKLY, with the exception of a few brief extracts from exchanges, always properly credited, is written exclusively for this journal. Each issue of THE JEWELERS' CIRCULAR-WEEKLY is copyrighted. Permission to quote is extended to other publications provided such quotations are properly credited.

A Quarter's Failures *BRADSTREET'S*, from whose *in the Jewelry Trade* pages we often cull

most important data for editorial comment, in its endeavor to satisfy the appetite for statistical information entered into an inquiry that had for its object the determining of the number of failures, with the resulting liabilities, in all lines of trade in the first quarter of the present year and of the corresponding period of 1900. From the inquiry we learn that there were 3,014 failures of firms, individuals or corporations in the first quarter of the present year, with liabilities of \$31,046,468 and assets of \$14,080,159; the gain in number over a year ago being a trifle less than 12 per cent., while the liabilities decreased about 18 per cent. The proportion of failures and liabilities in each branch of trade is as follows:

	Percentage of No.		Percentage of Liabilities.	
	1901.	1900.	1901.	1900.
Retail	45.2	46.4	20.8	18.2
Wholesale	5.1	6.8	9.8	14.3
General store	13.1	10.4	9.3	5.2
Total mercantile	63.4	63.6	39.9	37.7
Manufacturing	15.2	14.1	27.5	44.8
Industrial	7.2	9.0	15.3	9.5
Financial8	.4	8.4	2.9
Miscellaneous	13.4	12.9	8.9	5.0

Special interest, of course, attaches to the failures in the retail branch of business, because that line of mercantile traders come into contact directly with the general public and would seem to be likely to reflect business conditions among the people at large with accuracy. The numbers of failures, with the assets and liabilities, in the first 14 classes of retail business are, therefore, given for the first quarter of the past two years:

	No. failing.		[000's omitted.]		
	1901.	1900.	Assets.	1901.	Liabilities.
Grocers	457	420	\$552	\$474	\$1,227
Dry goods	94	96	584	413	1,042
Meats	75	76	42	52	143
Drugs	74	63	102	80	258
Clothing	67	79	243	333	566
Hardware	61	39	190	179	379
Boots and shoes	61	73	137	188	311
Jewelers	61	46	137	170	328
Furniture	47	51	147	307	339
Cigars and tobacco	41	22	45	16	110
Millinery	41	33	33	39	83
Confectionery	33	27	30	12	94
Men's furnishing	27	29	111	43	209
Harness and saddlery	20	19	18	27	53

Totals, above 14 lines..... 1,159 1,073 \$2,378 \$2,338 \$5,149 \$5,272
 Totals, all retail

1,364 1,250 2,905 2,914 6,426 6,903
 From the above table it can be seen how the retail jewelers fared in comparison with other traders. It will be seen that with the dealers of boots and shoes and of hardware the jewelers rank sixth as to number of failures for the quarter of 1901; sixth as to amount of assets and sixth as to amount of liabilities. The number of jewelry failures increased about 33 per cent., the largest of all the groups with the exception of the dealers of hardware, 57 per cent., and the dealers of cigars and tobacco, 86 per cent.; while the liabilities were about 10 per cent. less than in 1900, which was offset by a decrease in assets of about 19 per cent. The average amount of the assets of the jewelry failures in the quarter of 1901 was \$2,246 and of the liabilities, \$5,377, while those of 1900 were

\$3,697 and \$7,913; the percentage of assets to liabilities in the former case being about 42 and in the latter case about 48. From this analysis it must be admitted that the jewelry business of the first quarter of the present year cannot compare favorably in commercial soundness with the same period of 1900; though other classes of traders, such as the hardware, boots and shoes, furniture, cigars and tobacco, millinery, men's furnishing, and harness and saddlery dealers fared, at least, as badly, and in some cases worse.

End for the Time of Reciprocity.

THE second chapter of the effort to enlarge our export trade by reciprocal trade agreements has come to an end with the resignation of Mr. Kasson, commissioner for the negotiation of treaties under the Dingley tariff. This reciprocity policy grew out of Mr. Blaine's ambition to develop the pre-eminence of the United States on this continent. To this end the Pan-American Conference was invited, and out of this grew the reciprocity idea. The popular attention was caught at once and a reciprocity provision was inserted in the McKinley tariff, though it was not Mr. Blaine's proposition. Of all the reciprocity agreements entered into at that time the only one which benefited our trade was the one with Cuba. Mr. Dingley put two reciprocity sections in his tariff bill; one provided for a very limited class of agreements that could go into effect without ratification, and the other for a somewhat more comprehensive plan which required the assent of the Senate. This rather reduced than increased the power of the President to negotiate commercial treaties, for, under the Constitution, he may negotiate any kind of a treaty if he can only get the Senate to assent to it. But though the field of action was very much circumscribed Mr. Kasson was able to negotiate several treaties that were very liberal to the United States. But every interest whose rate of protection it was proposed to reduce at all protested so effectively that all these treaties have failed and Mr. Kasson has resigned, hopeless of securing the ratification of any of them.

LETTERS TO THE EDITOR.

PLEA FOR SUSPENSION OF JUDGMENT ON FRED. L. BAKER.

WASHINGTON, D. C., April 13, 1901.
 Editor THE JEWELERS' CIRCULAR-WEEKLY:

Being aware of your fairness to the craft in general, I would kindly suggest through THE CIRCULAR-WEEKLY to the public the advisability of suspension of judgment as regards Fred. L. Baker and Hayden W. Wheeler & Co.'s late unpleasantness, as it would be only justice to both parties concerned to defer fixed opinions until the facts are brought out in a court of justice later on, when the case will be judged on its merits by a jury of fellow-citizens.

Sincerely yours,
 ED. W. DRURY,
 Of the Non-Retailing Co.

The C. J. Wells Co., Utica, N. Y., have purchased the jewelry stock and fixtures of H. E. Carner, Frankfort, N. Y.

Prospects of the DeGraw Bill.

Strong Opposition to Its Passage from Several Quarters.

ALBANY, N. Y., April 22.—The bill relating to the marking of silver and generally known as the DeGraw bill, which was put into the hands of the Committee on Miscellaneous Corporations in the Senate, after it had passed the Assembly, was reported out of that committee into the Committee on Rules. It is now on general order and may be taken up at any time for passage before the Legislature adjourns to-morrow night. The opponents of the bill firmly believe that it will not be passed, although there is a chance of its going through in a rush at the last minute. It cannot come out of the Committee on Rules without unanimous consent, and as three Senators, at least, have pledged their words to the silversmiths and jewelers interested in the defeat of this bill that they will vote against it and oppose it, it is not thought that the bill can be brought out for a vote.

During the past week the merchants in the jewelry trade and others interested in the defeat of the bill have been quite active in their work. THE JEWELERS' CIRCULAR-WEEKLY early in the week made a compilation of all the matter relating to the bill that had been published, printed it on a single sheet and sent it to the members of the committee in the Senate who had charge of the bill, as well as to the Senators generally. A representative

of THE CIRCULAR-WEEKLY appeared before the chairman of the finance committee of The Jewelers' Association and Board of Trade, Thursday, and explained the bad features of this bill and the havoc it would work on the laws already on the statute books, which thoroughly protect the trade and public. As a result a motion was made and passed that the president of The Jewelers' Association and Board of Trade write a letter of protest against the bill in behalf of the organization, and this was done Saturday. The letter of The Jewelers' Association and Board of Trade, which is signed by president C. G. Alford, is a long and strong one and embodies most of the objections against the bill that have been outlined in the last three issues of this journal. THE CIRCULAR-WEEKLY received from Senator Goodsell, chairman of the Committee on Miscellaneous Corporations, a letter stating that he was opposed to the bill and did not think that it would come out of the committee.

Report of Condition of American Waltham Watch Co.

BOSTON, Mass., April 22.—The American Waltham Watch Co. have filed the following certificate of their condition March 28, with the Secretary of the Commonwealth:

Assets: Real estate, \$668,744; machinery, \$1,082,859; cash and debts receivable, \$486,695; stock in process, \$2,135,789; patent rights, \$188,663; total, \$5,162,730.

Liabilities: Capital stock, \$4,000,000; debts, \$45,153; balance profit and loss, \$1,117,577; total, \$5,162,730.

To Prevent Employment of Women and Children at Polishing and Buffing.

ALBANY, N. Y., April 20.—An act to amend the labor law, so as to forbid the employment of women and children at buffing and polishing, was delivered to the Governor to-day. It passed the Assembly Feb. 28 and the Senate yesterday. The text of the bill follows:

1. Section ninety-one of chapter four hundred and fifteen of the laws of eighteen hundred and ninety-seven, entitled "An act in relation to labor, constituting chapter thirty-two of the general laws," as added by chapter three hundred and seventy-five of the laws of eighteen hundred and ninety-nine, relating to the employment of women and children at polishing or buffing is hereby made section ninety-two.
2. This act shall take effect immediately.

There Is No "Official" Pan-American Exposition Watch.

In reply to an inquiry, THE CIRCULAR-WEEKLY has received the following information from Frederic W. Taylor, Director of Concessions, Pan-American Exposition, Buffalo, N. Y.:

"I beg to inform you that the following is the condition as to the sale of watches upon the grounds:

"The W. F. Doll Mfg. Co. have the right to use the Beck design upon cases or parts of watches to be sold outside the grounds, but have no right to take watches inside the grounds for sale; neither have they the right to use the term 'Official.' The C. H. Ingersoll Co. have the right to use the Beck design upon watches for sale inside the grounds. Neither of these people, nor, in fact, any one else, up to this time, has the right to use the term 'Official,' as applied to watches. In the case of Ingersoll the right granted them simply applies to watches for less than \$5. The right to sell more expensive watches than that has not yet been granted."

Trans Atlantic Voyagers.

TO EUROPE.

Leopold Stern, of Stern Bros. & Co., New York, Ben. F. Rees, of Zimmern, Rees & Co., New York, accompanied by his wife, and Antony Wallach, New York, accompanied by his wife, sailed, Thursday, on the *Deutschland*.

J. G. C. Cottier, of C. Cottier & Son, New York, and George Garreaud, of Garreaud & Griser, New York, sailed, Thursday, on *La Lorraine*.

W. T. Gough, of Carter, Hastings & Howe, New York, and A. Guggenheim, of Arnstein Bros. & Co., New York, sailed, Wednesday, on the *Majestic*.

M. Schenkein, of H. Schenkein & Sons, New York, and Henry Cowan, Boston, Mass., sailed, Saturday, on the *Campania*.

Meyer Goodfriend, of Goodfriend Bros., New York, sails, to-day, on the *St. Louis*.

FROM EUROPE.

Irving Baum, New York, and M. H. Van Bergh, Rochester, N. Y., returned, last week, on the *Oceanic*.

O. M. Thorp has opened a watch and clock repair shop at High Bridge, N. J.

E. R. Smisor, Ponca City, Okla., has moved to Wakita, Okla., and will conduct his jewelry business there.

If this happens

THREATEN TO RAISE DIAMOND PRICES

ANTWERP, Sunday.—Diamond merchants here declare that the De Beers company intends to raise the price of diamonds thirty per cent on April 1 or May 1.

The company's reason for the projected raise is said to be the reported determination of the English government to make the largest part of the financial burden of the Transvaal war fall on the backs of the Rand mine owners. The mine owners have indignantly protested against such a course, and if their protests prove ineffectual their reply will be a general raise in prices of diamonds. Only in this way, they are said to contend, can they meet the heavy demands of the government.

will you get caught short? No better time to get your customers to invest in diamonds, or to invest your money in diamonds. We have a very complete stock, and while it lasts, it is subject to your call at present prices.

Anything you want, loose or mounted, "on memo."

CROSS & BEGUELIN

Importers and Cutters of Diamonds and Precious Stones

43 Rue de Meslay, PARIS

Telephone, 2183 Cortlandt

17 Maiden Lane, NEW YORK

New York Notes.

A. F. Dejonge has entered a judgment for \$464.99 against Julius Kahn.

J. Thomas Lynch, precious stone dealer, has moved from 1 Maiden Lane to 22 Maiden Lane.

J. Beck, manufacturer of gold chains and jewelry, 100 William St., will remove next week to the Prescott building, 65 Nassau St.

Douglas B. Thompson, formerly with Harris & Shafer, Washington, D. C., is now with the International Silver Co., 9-13 Maiden Lane.

Herman Kohlbusch, Jr., manufacturer of scales and balances, 194 Broadway, who has been ill for several months, has recovered and returned to his office last week.

Margaret Hebbard, widow of the late Alonzo Hebbard, of Hebbard & Bro., died, Thursday, in her 68th year. Funeral services were held, Sunday, from her late residence, 257 W. 127th St.

The large and beautiful loving cup presented to State Senator T. D. Sullivan by his friends, Saturday night, was made by the Mauser Mfg. Co., silver-smiths, 14 E. 15th St. The cup will be placed on exhibition this week.

A second lecture on the bankruptcy law was given last night by the New York Society of Accountants and Bookkeepers, at 117 W. 23d St., and was a continuation of the former address by Hugo Kanzler, of the New York Bar.

It is announced that Columbia University is soon to have a co-operative store, under the general supervision of the faculty, which will sell books, jewelry, stationery, etc., for the benefit of the students, at a discount of from 5 to 25 per cent. from catalogue prices.

Mrs. B. Myers, the mother of S. F. Myers and M. A. Myers, of the S. F. Myers Co., jobbers, 48-50 Maiden Lane, died, in this city, recently, in the 82d year of her age. Mrs. Myers was one of the earliest settlers of Fond du Lac, Wis., where her sons, Samuel F. and Marcus A. Myers, were born.

A slight fire occurred last week in the jewelry store of William Goldman, 670 Broadway, Brooklyn. The fire did damage to the amount of \$50 and was caused by the ignition of a can of benzine. The can exploded and Goldman escaped without injuries, though his father was burned in trying to extinguish the blaze.

Henry E. Oppenheimer & Co. have greatly enlarged their offices and now occupy the entire first floor of 12 Maiden Lane, their present floor space being three times that occupied by their former offices. The offices are handsomely furnished and fitted up, and when the work on them is finally completed, will be among the finest diamond offices in Maiden Lane.

The benefit association organized by the employes of Munter Bros., 499 Broadway, gave an entertainment on the evening of April 13. Among those who attended were the two members of the firm and several representatives of Broadway houses, as well as friends of the organization. The dance after the entertainment lasted until 3 o'clock p. m. and was generally enjoyed by all who participated.

On the complaint of Reuben Moses, who said he was a jeweler of 140 Canal St., New York, Samuel Green, of Philadelphia, was arrested as he was about to board the S.S. *Majestic*, Wednesday, for Europe. Moses claimed that Green had not paid for some rings and earrings

given him on approval. Green was taken to the Jefferson Market Police Court, where he settled the case with Moses and hurried away to catch the steamer.

Charles Meyer was a prisoner in the Yorkville Police Court, Wednesday, charged by Frank Jensen, jeweler, 144 W. 47th St., with grand larceny. Meyer had been employed by Jensen and, according to the jeweler, had been stealing from him for several months. The prisoner admitted taking watches and jewelry to the amount of \$1,000. Meyer skipped, April 2, and was arrested last week. He was held in \$1,000 bail for the Grand Jury.

George Wilson, alias Leniae, whose picture is in the rogues' gallery, was arrested last week in New York and when searched about \$2,000 worth of jewelry was found on him which the police believe to be the proceeds of a recent robbery. The jewelry includes:

One lady's ring set with two diamonds and an emerald, one lady's ring set with three diamonds and three emeralds, one lady's ring set with two diamonds and a sapphire, one marquise ring set with a turquoise and pearl, one pair diamond screw earrings, each diamond weighing 1 1/4 karats; one small diamond stud, one gold peacock brooch, one scarf pin, fly shape, set with four diamonds and three rubies; one sword pin set with a diamond, one lady's gold hunting case watch, Illinois Watch Co. makers, movement No. 934,695, and case No. 60,899; one lady's gold hunting case watch, Seth Thomas make, movement No. 118,931, case No. 2,235,354; double gold rope chain and oval shaped locket set with small diamonds.

The police are endeavoring to find the owner of the articles.

Testimony was taken last week in the United States District Court, in an investigation into the recent sale by the receiver of the stock of Solomon Seligman, bankrupt jeweler and picture dealer, 10 E. 14th St. D. L. Safford, secretary of The Jewelers' Association and Board of Trade, who was elected the trustee for

DON'T FORGET THE JEWELERS' CIRCULAR PUBLISHING CO.'S BOOK LIST when in want of any technical work in the Jewelry or Kindred Trades.

the creditors, informed Judge Brown, of the United States District Court, that he had heard that many dealers at the auction of the stock had obtained unusual bargains and had found solid gold goods among lots of plated ware. Mr. Safford asked that the sale be looked into in the interest of the creditors of Mr. Seligman, whose trustee he was. Judge Brown examined a number of witnesses, including the appraisers of the stock, and later caused the testimony to be taken of several dealers who had purchased lots at the sale. These dealers admitted that gold goods had been among the brass and plated goods purchased, and all admitted that their purchases were very advantageous. The testimony will be submitted to Judge Brown for his action, and it is hoped that the proceeding in this case may lead to a change in the policy now in vogue and that temporary receivers in bankruptcy will not, hereafter, be authorized to sell the stock at auction until the creditors are in possession.

George W. Street, of G. O. Street & Sons, has returned from Washington, D.C., where he spent a week with his family.

The suit in the City Court by the International Silver Co. against George Latham has been settled and was discontinued by an order of Judge McCarthy, Friday.

W. L. Pollack & Co., who were discharged of their debts in bankruptcy two months ago, obtained from Judge O'Gorman, of the Supreme Court, Monday, an order discharging a judgment for \$5,531.60, entered against them by the United States Diamond Cutting and Polishing Co., Oct. 21, 1897.

The Appellate Division of the Supreme Court, last week, affirmed the decision of the Court of Special Sessions, sentencing James M. Peterson, jeweler, 50 Nassau St., to 13 months' imprisonment for attempting to blackmail Carl Fisher Hansen. Peterson and Carl Lorich formerly boarded with Mr. Hansen, who was then unmarried. The cook of the household was Christina Sogren, who later sued him for \$20,000 for breach of promise, and Peterson and Lorich aided in getting evidence. Hansen's lawyers caused the arrest of the three. Peterson kept out of prison

awhile by appealing his case, but must now go to jail.

At a continuation of the examination into the affairs of M. J. Davidow, the bankrupt jobber in jewelry, late of 510 Broadway, F. J. Shea, of Wilkes-Barre, Pa., at one time attorney for the bankrupt, testified in corroboration of testimony submitted by Davidow and also gave evidence as to the latter's reputation and good character while in Wilkes-Barre and Scranton. Mr. Shea came to New York just before the failure, having been sent for by Davidow, who wanted to borrow some money. Davidow made Shea his assignee. F. L. Crawford, counsel for the creditors, tried to get from Mr. Shea some idea of the value and nature of the stock in the store at the time of the failure, but the latter testified that he had only glanced over the store in a superficial way and then had left it in charge of others. The examination was continued yesterday.

In the Tombs Police Court, Saturday, Julius Froelich, a jewelry salesman of 68 E. 88th St., was a prisoner before Magistrate Cornell, charged with grand larceny. The complainant, Alfred Krower, of Albert Lorsche & Co., 37 Maiden Lane, claimed that he had obtained two unset diamonds, valued at \$280, on a forged order, purporting to be signed by D. Stone & Son, of 532 Broadway. He first asked for the goods on memorandum without an order, but when an order from his firm was demanded returned with one the following day, written on D. Stone & Son's note paper and purporting to be signed by that firm. A duplicate memorandum sent to the Stones resulted in exposing the fraud. Froelich, when arraigned, admitted the forgery of the order and said that the diamonds were in the possession of Herbert Frank in Harlem. Detectives who made the arrest were unable to find Frank. Froelich was held in \$1,500 bail for examination. Similar charges are made against Froelich by other precious stone firms. Froelich was arrested again, Monday, on the charge of Charles F. Wood & Co., 1 Maiden Lane. He went to Wood & Co.'s office and secured a diamond, saying it was for a customer of D. Stone & Son. He went back on Monday morning and asked for a bill for the first diamond and

O. D. Leidal, Fergus Falls, Minn., will move into new quarters after May 1.

Mrs. Eikenbary, Skeeter Bottom, Neb., has purchased a stock of jewelry.

John H. Sweger, of Mifflintown, Pa., has opened a jewelry store in Lewiston, Pa.

C. E. Davidson's residence and jewelry store, Grantsburg, Wis., were burned out last Wednesday.

W. C. Stairs, late of Manchester, Okla., has opened a jewelry store at Lamont, Okla.

Thomas Walker, Sterling, Kan., has opened a stock of jewelry at Manchester, Okla.

J. B. Fricke, Pine Island, Minn., is making improvements to his jewelry store.

J. P. Roerig, Evansville, Ill., has opened a jewelry business in Wilmont, Minn.

The jewelry establishment of J. Wiseman, Hamburg, Ark., has been destroyed by fire.

James A. Turner & Co., Mound City, Kan., have paid off a chattel mortgage for \$275.

M. A. Gaskell, Rochester, Minn., has expanded his store and taken in the room adjoining.

Aaron Wood, Shelby, Ia., has moved his stock of jewelry and dry goods to Neola, Ia.

Kvech & Lubrecht, Pine City, Minn., have dissolved partnership, F. W. Kvech succeeding.

The Illinois Watch Co., Springfield, Ill., have 470 employes and are working 10 hours a day.

R. J. Kewin, Clearfield, Ia., has sold a half interest in his jewelry store to F. Van Brocklin.

W. B. McClellan, Pocahontas, Ia., has sold his jewelry stock to E. G. Martin, of Storm Lake, Ia.

Dillon Rogers is erecting a building to be used by him as a jewelry store, at Madisonville, Tenn.

Charles F. Hussey, Portsmouth, N. H., was married last week to Miss Celia Preble, of York, Me.

Camden, N. J., jewelry stores will close every evening at 6 o'clock, except on Friday and Saturday.

A. M. Snover has purchased a new stock of jewelry and is preparing to open it in Toronto, Kan.

F. A. True, of Purcell, I. T., has opened a store at Kingfisher, Okla., having sold his business at Purcell.

Johnson & Co. have succeeded to the jewelry and drug business of Paul W. Jones & Co., Peterson, Ia.

John Foutron, lately with Henry S. Zinn, Hutchinson, Kan., has opened a store at McPherson, Kan.

The C. A. Banister Co., Auburn, N. Y., have recently refitted their store, using mahogany, rosewood and plate glass as principal elements in the renovation.

The jewelry store of G. E. Gleason, of Houghton, Kan., was one of many business houses recently destroyed by fire.

The Fort Scott Novelty Works have succeeded to the manufacturing jewelry business of G. L. Samuels, Fort Scott, Kan.

The business of the late F. S. Stark, of F. S. Stark & Co., Hanover, Pa., will be continued by his son, George W. Stark.

Thieves stole a case of cheap jewelry from M. Goldberg, Youngstown, O., last week, and were arrested with part of the property.

Watertown, N. Y., citizens have ordered a town clock from the E. Howard Clock Co., to cost \$1,771. It will have illuminated dials.

Charles M. Rich, who was in business at Frankfort, N. Y., for 15 years and then sold out to F. A. Russell, will re-establish himself at Frankfort.

Henry J. McGrade, Iron River, Wis., died in Ashland, Wis., recently, of typhoid fever. He was 29 years of age and a widower, leaving two young children.

Burglars broke a large plate glass in the front of Frederick Baier's jewelry store, Salina, Kan., recently, and stole 10 watches which had been left in the window over night.

Extensive decorations and improvements are being made in the store of John Krank, Schenectady, N. Y. A handsome new mahogany wall case adds greatly to the store equipment.

We are pleased to note the convalescence of John D. Greene, watchmaker for W. S. Taylor, Utica, N. Y., who was recently operated upon for appendicitis at the Faxon hospital, that city.

J. E. Brostrom, for several years in the jewelry business at Northville, N. Y., has

discontinued his business in that village and has re-entered the service of A. D. Norton, Gloversville, N. Y.

Mrs. Mary David, widow of the late Louis David, died at her home at Natchez, Tenn., April 16, aged 88 years. Her husband was at one time a leading jeweler of Natchez.

Leopold Schneider, Brushton, N. Y., has recently removed to a larger and very neatly fitted up store. His store is entirely lighted by gasoline lamps and is the most brilliantly lighted store in town.

Crane & Rouse, Mount Pleasant, Ia., have dissolved partnership. Fred B. Crane, having purchased the interest of James P. Rouse, will carry on the business at the old stand.

Anderson & Houghton, Little Falls, N. Y., have recently refitted their store throughout with new mahogany and plate glass show and wall cases. A new floor has been laid and a steel ceiling put in.

E. L. Pancoast, Stroud, Okla., has sold a half interest in his jewelry business to J. E. Mitchell and the firm will be Pancoast & Mitchell. They will put in a much larger stock.

A. J. Rehm, for some time past with J. K. Wiggins, Middletown, N. Y., is now watchmaker for W. B. Wilcox, Utica, N. Y., succeeding Mr. Barker, who has entered a new business in Chicago, Ill.

Fire in the establishment of Constanz O. Cerimele, 7th St. and Pennsylvania Ave., N. W., Washington, D. C., caused a loss estimated at nearly \$500, April 15. The cause of the blaze is not known.

On account of failing health, Lew Phelps, for some time past watchmaker for F. C. Bennett & Co., Gloversville, N. Y., has resigned his position, removed to Chicago, Ill., and entered the soap business.

Henry Sauer, a young jeweler of Hastings, Minn., who recently returned from El Paso, Tex., was taken to the Rochester asylum, April 18. His mind became deranged on account of despondency.

Smith R. Thompson and S. M. Thompson, brothers, Bellefontaine, O., have made a trade whereby the latter comes into possession of the former's stock of jewelry. The new owner will continue to conduct the store.

W. J. Nelson, of W. J. Nelson & Co., Henry, Ill., has sold his interest in the business to H. Thacker, Waukegan, and the jewelry business will be continued by H. Thacker & Son, the son being G. L. Thacker, of the old firm.

The jewelry store of Samuel Stone, Fall River, Mass., was broken into recently. Stone has been adjudicated a bankrupt and since his adjudication the store has been locked up. Nothing is reported missing.

C. Christensen, who has been with C. E. Ryan, Baraboo, Wis., for the past year, has resigned to go to Chicago and take charge of his father's jewelry business. F. G. Eaton, of West Unity, O., succeeds him at Baraboo.

Charles Lavelle, a Montreal, Can., jeweler, is suspected to be somewhere in upper New York State in a denuded condition. Mrs. Lavelle says he left home Sept. 25, bound for New York city, to secure employment. She has not heard from him since, but is anxious to do so.

B. W. Lee, E. Stroudsburg, Pa.

New York Notes.

(Continued from page 37.)

presented a forged order, purporting to be from D. Stone & Son, for six more diamonds. While leaving Wood & Co.'s office he was followed and arrested. He was later admitted to \$2,000 bail.

J. Warren Alford, of C. G. Alford & Co., left last week for Iowa on a pleasure trip.

Blancard & Co., manufacturers of settings, galleries, etc., have removed their office and factory from 45 John St. to 96-100 Maiden Lane.

The Treasury Department has acquiesced in the decision of the Circuit Court of Appeals, in regard to certain agate wares found to be dutiable as cut precious stones, involved in the protest of Rud. C. Hahn. Three other appeals by the Government to the United States Circuit Court of Appeals from decisions in Mr. Hahn's favor have been settled, this Court, Monday, dismissing the appeals by consent.

A new proposition in the bankruptcy of J. T. Scott & Co. was submitted yesterday to Judge Brown and approved by him. This was to the effect that the American Exchange National bank, who hold collateral security for the bankrupts' debt to them, take over the assets of the concern and pay to the creditors thereof 15 per cent. of the amount of all claims. A settlement on this basis will probably now be made.

In the window of the Gorham Mfg. Co., downtown branch, 21 Maiden Lane, there is exhibited a magnificently engrossed copy of resolutions of sympathy, passed by the employes of the Holmes Electric Protection Co., at the death of Edward Holmes, the president of this concern. Besides the fine engrossing work, the resolutions bear a half tone picture of the deceased in the center, and are handsomely framed.

The strike in the watch case trade, told of in the last issue of THE CIRCULAR-WEEKLY, continued throughout the week and up to the time this paper went to press. The situation up to yesterday was without change, slight advantages being claimed by both the manufacturers and the workmen. The factories most affected, as already told, are those of the Fahys Watch Case Co., Sag Harbor, the DuBois Watch Case Co., Brooklyn, and the Crescent Watch Case Co. and Courvoisier-Wilcox Mfg. Co., Newark. An attempt was made by the strikers to settle the strike by a conference with the two last named concerns, and some of the leaders among the workmen consulted with them last week, but without avail. The men demanded a recognition of the union and to this, the employers said, they could not agree. The workmen have held meetings throughout the week and claim to have been strengthened in numbers, while the employers, on the other hand, claim that their shops have been running and that there have been slight increases in the number of hands each day during the week. They all say that the situation is about the same and that all departments of their factories are running and that they have sufficient goods at the present time to fill orders. The employers all express the conviction that they will continue their works as non-union shops.

SCHOOL Watchmaking Optics and Engraving Winona Minn. W. F. A. WOODBROOK

Attleboro.

Francis A. Adams, foreman of the Bliss Bros. Co., was quietly wedded last week to Miss Bessie A. Small.

George H. Herrick, of G. H. Herrick & Co., retailers and jobbers, has the sympathy of the trade in the death of his father, last week.

Very pronounced improvement is noted in the condition of John C. Cummings, of J. C. Cummings & Co., whose severe illness has been referred to in these columns.

David E. Makepeace awarded the contract for his new jewelry factory building, Friday, to Grant Bros., who have built the greater part of the present large factories of the town.

Louis J. Lamb and William H. Lamb, partners in C. H. Allen & Co., the "goldine" house, attended, last week, the golden wedding of their parents, Mr. and Mrs. Norval B. Lamb.

William Nerney, of William Nerney & Co., has purchased the interest of his partner, C. Sidney Smith. He will conduct the business of the house under the same name with the same line, and no other change will be apparent. Mr. Smith plans to take an interest in one of the local novelty houses.

The wedding of Fred H. Hill, of F. H. Hill & Co., to Miss Mabeth L. Wolfenden on the date of the last issue of this paper, was one of the most brilliant events in the town's Winter season. Mr. and Mrs. Hill left for New York, Washington, Old Point Comfort, Buffalo and home, and on the day of their departure ground was broken for their new dwelling.

Andrew Kaas, 5 S. 13th St., Philadelphia, Pa., will go abroad with his family in June.

North Attleboro.

Fontneau & Cook announced formally to the press, last week, that they have closed the deal for large space in the new jewelry factory of David E. Makepeace, now under way in Attleboro.

Foster Clark, of W. G. Clark & Co., Percy Clap, of the Daggett & Clap Co., John E. Tweedy, of Cheever, Tweedy & Co., Wallace G. Franklin, of E. I. Franklin & Co., Fred A. Howard, of the Frank M. Whiting & Co., and Louis A. Morse, of H. D. Merritt & Co., were successful participants in a big shooting contest by the North Attleboro Fish and Game Association, Friday.

The insurance on the recent big fire in Attleboro Falls was settled by adjusters, last week. They visited the ruins, inspected the whole environment and reached a settlement satisfactory to the insured. All that could be learned officially was that the sums paid to E. E. Thomas, Jr., & Co., W. N. Fisher & Co., and J. F. Sturdy's Sons aggregated a little over \$45,000. This applies solely to the mechanical departments of the three plants. The estimate of \$95,000 as a total damage remains substantially unchanged in the minds of those interested. The building, individual property of employes and stock uninsured make up the difference. The firms are now shipping goods and are in full swing, except the dissolved E. E. Thomas, Jr., & Co.

In court, at St. Joseph, Mo., April 12, Herman Davis was held on the charge of robbing the store of F. Albert Wey of jewelry, on the night of March 24. John Adams, charged with the same offense, was discharged.

Providence.

Some of the shops which a week before last, and for several weeks prior to that, were shut down, ran on short time last week. Eight hours a day were the general average for these establishments.

A midnight sound, as of an explosion, raised visions of a robbery in the manufacturing jewelry district, Wednesday, but the police could find nothing to warrant the temporary excitement.

Under the direction of G. L. M. Mitchell, of this city, trustee, the stock, fixtures, etc., of a retail jewelry store at East Greenwich were disposed of at public auction at trustee's sale, Thursday. The property brought a fair figure.

The Appellate Division has handed down a decision on the petition for a new trial of the breach of promise suit brought by Trase V. Mainz against Benedict B. Lederer. The decision denies the petition. Miss Mainz received a verdict of \$12,500 when the case was originally tried, in 1897.

The stock, plant, etc., of the Harvard Button Co. were disposed of at private sale the past week. Thomas Temple, of Boston, was the purchaser, and it is rumored that the price paid was in the vicinity of \$3,000. Statements have been sent out to the creditors of the concern by the receiver, James C. Collins, Jr., and the greater part of the claims have been presented. No decision has been reached by the purchaser, it is understood, as to what he will do with the plant, but it is stated that it is probable he will engage in business on a somewhat smaller scale, along the same general lines.

Lowe Bros. have begun business as enamellers and general art metal workers. The firm are composed of Bert Lowe, re-

IF OPPORTUNITY

knocks at every man's door once in a lifetime, then the manufacturer of jewelry and wares ornamented with metal is specially favored. Twice each year buyers from all over the country come to this market. They are interested in that which is new in general; but more especially in that which is both **new** and **artistic**. **This is your opportunity**—are you preparing for it? **We are ready to help you** with our **Jewelers' Findings, Metal Ornaments and Jewelry Components**.

P. S.—Mix a few of Dover's ideas with yours and *watch* them effervesce.

cently with Geoffroy & Co., New York, and George Lowe, formerly with The E. A. Bliss Co., Meriden, Conn.

Gus Rodenberg, Chicago representative of S. & B. Lederer Co., is in Providence on a visit.

The marriage of E. W. McAllister, of Tuck & McAllister, was announced for Tuesday last.

A. C. Stone goes to Europe on an entirely business trip for George W. Dover, and not partly for pleasure, as reported last week.

It is reported that within a few weeks the shop of M. F. Williams & Co. will be found at 99 Stewart St., instead of 226 Eddy St., its present location.

The Acme Pearl Works, Taunton, have purchased the pearl interests of the City Pearl Works, Providence. The latter firm were located at 25 Callender St., this city.

Indications of a brightening in business and of renewed activity are to be found in the advertisements for toolmakers which appear in abundance in the daily papers.

Favorable reports are being received from Mr. Ostby, of the Ostby & Barton Co., who was injured by a fall from a horse in California. Mr. Ostby's right hip was broken but recovery is progressing as rapidly as could be expected.

A mortgagee's sale of the personal property, stock and fixtures of the jewelry shop at 357 Eddy St., known as the O'Donnell Jewelry Co., was advertised for Tuesday, April 23, at 10 o'clock. The sale was held by order of the assignee of the mortgagee, Terence M. O'Reilly being attorney for the assignee.

The S. & B. Lederer Co. have been sued for damages of \$2,500 by Mary Day, of Providence. Mary was in the employ of the company. She ran a drop press or stamper. Near her was a case. It was not properly secured, she says. Unbalanced by the jar imparted by heavy machinery, it toppled over and struck her. Her face was disfigured for life, she received a bad nervous shock, and was otherwise injured, she says.

William Brand, jewelry setter for M. E. Nabstedt & Sons, Davenport, Ia., and Miss Anna Wiese, of that city, were married last week and went to Chicago on a wedding trip.

The store of Wright, Kay & Co., Detroit, Mich., will be remodeled, inside and out. An adjoining store will be added in which a line of cut glass and china will be carried.

Traveling representatives may consider these columns open for the publication of any news or items of interest regarding themselves or their conferees.

Charles Adams, salesman for Lapp & Flershem, Chicago, for a number of years, has resigned his position to accept one with J. P. Traf-

ton & Co., jobbers, Los Angeles, Cal., the change being necessitated by the health of Mrs. Adams and the fact that California is her home. Mr. Adams takes with him the best wishes of a large circle of personal friends and business acquaintances. He is going into a territory where a good man counts.

Mr. Cloudman, representing the Elgin National Watch Co., has been traveling in the lower provinces of Canada.

Julius A. Young, San Francisco, and Mr. Sideman, of Redlich & Co., New York, visited the Portland, Ore., jewelers last week.

Herbert Cuppel, the youngest traveling man that ever went out of Kansas City, Mo., with a jewelry line, is making a trip for the Meyer Jewelry Co.

Among the traveling salesmen who visited Denver, Col., the past week were: Mr. Freer, Hickock & Freer, San Francisco; Mr. Price, Byron L. Strasburger & Co.

Henry Freund, of Henry Freund & Bro., New York, left Thursday for New England and New York State. After returning from his present trip he will start for the west and southwest.

Recent travelers in Omaha, Neb., were: T. E. Rogers, Riker Bros.; K. H. Clarke, Towle Mfg. Co.; I. Price, Byron L. Strasburger & Co.; F. R. Horton, Carter, Hastings & Howe; Steve Smith, manufacturers' agent, Kansas City, Mo.

C. D. Maughan, representing the Goldsmiths Stock Co., Toronto, Can., has just returned from a protracted trip to the northwest and the Pacific coast. He reports the outlook for the Summer trade as encouraging but merchants a little disposed to be conservative in placing orders.

Traveling men in Indianapolis, Ind., last week included: Fred. E. Hyatt, Philadelphia Watch Case Co.; A. Vretzfelder, for Manasseh Levy; W. J. Le Moin, The Ames-Bonner Co.; Robert B. Steele, Kohn & Co.; Mr. Steigerwald, Buffalo Jewelry Case Co.; Charles Melchor, Aikin, Lambert & Co.; and a representative of Joseph Fahys & Co.

The following travelers were in Minneapolis and St. Paul, Minn., the past week: Otto Schneider, Hammel, Riglander & Co.; Thomas Rogers, Riker Bros.; Lawrence Smith, Bippart, Griscom & Osborn; Mr. Leubuscher, the Bell Watch Co.; Mr. Hull, The Pairpoint Corporation; and representatives of S. O. Bigney & Co., Louis Manheimer, The Johnston Optical Co., Reed & Braillard, Enos Richardson & Co. and Leo Goldsmith.

Travelers in Pittsburgh, Pa., last week were: Edwin L. Mumford, Waite, Thresher Co.; H. W. Sherrill, Sincock & Sherrill; E. C. Delman, The Ansonia Clock Co.; Charles C. Orcutt, Chester Billings & Son; Lewis L. Squire, F. H. Cutler & Co.; Jules Franklin, L. Tannenbaum & Co.; Mr. Bliss, Kremetz & Co.; Mr. Steigerwald, Buffalo Jewelry Case Co.; A. W. Wagner, Wagner Bros. & Co.; Herbert W. Van Houten, for C. Sydney Smith; B. Hyman, Hirsh & Hyman; Mr. Shute, Jones & Woodland.

The traveling representatives of eastern firms who called on the Kansas City, Mo., trade last week were: J. S. Adler, J. S. Adler & Co.; J. W. Stoneburner, Ford & Carpenter; M. Baum, Rothschild Bros.; Henry H. Jacobson, Jacobson Bros.; Thomas E. Rogers, Riker Bros.; Frank R. Horton, Carter, Hastings & Howe; Arthur H. Vivian, Benj. Allen & Co.; DeWitt A. Davidson, Wallach & Schiele; N. B. Rogers, N. E. Whiteside & Co.; George Heidet, C. F. Rumpp & Sons; E. Lange, P. W. Lambert & Co.; E. W. Brannon, J. W. Reddall & Co.

Connoisseurs of Jewelry....

Factory, 33-43 Gold St.,

NEW YORK.

Chicago Office, 149 State St.

New and attractive designs at popular prices are now being shown to the jobbing trade.

HOWARD STERLING COMPANY, SILVERSMITHS,

PROVIDENCE, R. I., U. S. A.

NEW YORK, 860 BROADWAY, Samples only.

PROVIDENCE, R. I., March 12, 1901.

I have this day been appointed Receiver of Howard Sterling Company, and by order of court am authorized to continue the business of the company as heretofore.

I shall therefore continue to run such business, and will take and fill orders as promptly as the company has heretofore done. The same salesmen who have heretofore represented the company will call upon you for your orders.

Thanking you in advance for a continuance of past favors, and promising prompt attention to all orders given, I am,

Very truly yours,

BIRNEY C. PARSONS,

As Receiver of Howard Sterling Company.

Birmingham, Ala.**TRADE CONDITIONS.**

Business is splendid, both as regards volume and profits, in the Birmingham territory, according to reports of the local jewelers. It is fully up to the same season in other years.

A. E. Laughlin has opened a jewelry store at Union Springs.

T. B. Dilworth, Jasper, has been chosen Tax Assessor of his town.

A. P. Taliaferro, Columbus, Miss., has moved his jewelry store into a more comfortable building.

W. A. Parrish, formerly of this city and later of Anniston, has opened a jewelry store at Ensley.

Bessemer has a new city clock, which weighs 1,400 pounds. It was made by E. Howard Clock Co.

W. L. Crabb, who has been at Eutaw for some time, is now again with the Nettleton Jewelry Store, Greensboro.

John B. Rosenstihl, formerly of Rosenstihl Bros., has accepted a position with H. C. Abbott & Bro., this city.

Business in the city is keeping up very well and a much better class of goods is being sold than formerly.

William Rosenstihl, Jr., of this city, who was formerly of Rosenstihl Bros., expects

to open up again as soon as he can obtain a suitable location.

Edward F. Herzog, watchmaker and jeweler at H. Mercer's, has applied to become a member of the Elks.

Paul Calame has been appointed inspector of watches for the Southern Railway and Kansas City, Memphis & Birmingham Railway, at this point.

Geo. R. Calhoun & Co., Nashville, Tenn., have leased a store in this city on 19th St., under Florence hotel, and will open a jewelry store within the next few days.

The Birmingham Lodge, No. 79, of Benevolent P. O. of Elks, will have a street fair in this city, beginning April 29, and continuing one week. The jewelers of this city have contributed beautiful prizes for the special Floral Parade.

A beautiful piece of work has been furnished by F. W. Bromberg—a solitaire Elks' charm—presented to Past Exalted Ruler D. E. Drennen, of the local lodge. The diamond was set in an elk's tooth and reflects great credit on the house turning it out.

H. J. Rosenstihl, jeweler, Union Springs, has been appointed Assistant Adjutant General of the Alabama National Guard, by Gov. W. J. Tamford. Mr. Rosenstihl is a brother of secretary William Rosen-

stihl, of the Alabama Retail Jewelers' Association, who lives in Birmingham.

A young woman, who registered as Miss Cone, at Selma, one day last week, is said to have caught jeweler J. Hirschfeld, who cashed a check for her for \$35. The check was pronounced worthless. The woman left town before the alleged worthlessness of the paper was discovered.

The city Democratic convention, of Montgomery, took place a few days ago. C. L. Ruth, head of C. L. Ruth & Son, was not a candidate for re-election as Alderman. He has held the place for several years, but did not desire another term. Mr. Ruth made a fine record on the board.

Savannah, Ga.

J. W. Flynt, Culloden, Ga., has filed a petition in bankruptcy.

E. A. Russell has succeeded Russell & Dobyns, Fitzgerald, Ga.

P. M. Childress, Valdosta, Ga., has given a chattel mortgage for \$700.

J. A. Ingram, whose stock was sold out at Sheriff's sale, recently, is now with Albert Ingram, 22 Broad St.

Emile F. Fegeas, who was painfully burned in the recent fire at his store and dwelling, is able to be out again, but is unable to use his hands yet.

Theus Bros. have had on exhibition a processional cross presented to St. Paul's Episcopal Church by the Victoria Society, as a memorial to Queen Victoria. The cross cost \$150 and was made by J. & R. Lamb, New York. It is of brass and mahogany, of rich design, finished and polished a rich red tone and is eight feet high. It consists of an angel with uplifted wings holding in her hands a scroll on which appears the word "Victoria." At the intersection of the arms of the cross there is an enrichment consisting of the symbols of the four evangelists grouped around the symbol of the "Agnus Dei." All figures are in relief. The face of the cross is elaborately chased. Below the feet of the angel is a large ball upon which appears the inscription, "To the glory of God and to commemorate the love she won." On the shaft is the inscription, "Given by the British residents of Savannah, Ga., Easter, 1901."

Atlanta, Ga.

Charles W. Crankshaw has returned from New York.

The improvements in the store of Davis & Freeman are now completed and their windows are attracting the admiration of all.

Beginning April 15, the entire stock of diamonds, watches, jewelry, sterling silver ware, cut glass, clocks, bronzes and art goods belonging to Charles W. Crankshaw, 22 Whitehall St., has been offered to the public at auction. Mr. Crankshaw has decided to dispose of his stock on account of the building of the Whitehall St. viaduct and the consequent interruption of business during the Summer months. The sale is being conducted by John H. French and will be to a finish.

J. H. Percy, Ravenswood, Mo., has moved into a new building in another part of the town from that in which he had been located.

The J. M. Blake Jewelry Co., Hot Springs, Ark., are having a liquidation sale. The auction continues daily until further notice.

Brown & Co., Burlington Junction, Mo., are figuring on auction sales and have laid in a large supply of watches to begin on. This is a result of competition. Mr. Arnold, formerly with Brown & Co., left that firm and established himself in business across the street, and his old employers are disposed to make him hustle for success.

Chicago Notes.

All communications in reference to the Chicago department of *The Jewelers' Circular-Weekly*, addressed to Stephen Parlin, 134 Van Buren St., Room 414, Chicago, will receive prompt attention.

Frank M. Sproehln is spending a few weeks at Hot Springs.

A. N. Sperry, manager for A. L. Sercomb Co., returned, Tuesday, from his 10 days' New York visit.

George Rockwell, International Silver Co., was in Chicago last week on a visit to the Chicago branch.

M. Loeb, Chicago manager of the Wadsworth Watch Case Co., has left for a week or 10 days' visit with jobbers at western cities.

M. Newhouse, Chicago agent for Workman & Newman, Providence, reports business continues steady right along in white stone lines.

F. C. Happel Co., 84-86 State St., are remodeling their salesrooms, increasing the number of their safes and making other improvements.

L. Newhouse will be in the latter part of the week from the west. Reports from him indicate he has had good trade throughout his territory.

The sudden change from California to Chicago in April was a little too much for F. G. Thearle and he was confined to the house for a few days with a bad cold.

D. T. Martin, jeweler and druggist, Pomeroy, Ia., is in town, taking treatment for sciatic rheumatism and incidentally giving lectures to the medical students.

Chris. Morgan, of Factory J, International Silver Co., Rogers & Brother, was in the city a few days on a very satisfactory trip—not an unusual happening for Mr. Morgan.

W. J. Miller, manager of the Seth Thomas Clock Co., returned from a business trip to Buffalo with a severe cold, which temporarily kept him at his La Grange home.

Colonel H. E. Cobb, of Daggett & Clap Co., left, Saturday morning, for the east, to be away till the middle of May. He will spend the greater part of his time at the factory.

Keystone Jewelry Mfg. Co., Chicago, have been incorporated; capital stock, \$2,500; manufacturing jewelry, incorporators: Francis E. Matthews, Carrie Hodes, L. Kortz.

G. Rodenberg is spending a month at his Providence home, dividing his rest-up time between his family and the

factory of S. & B. Lederer Co., for whom he looks after the western territory.

Sims & Elrick is the name of a new jewelry firm at Waco, Tex. Mr. Sims made heavy purchases here last week for the new store, which he claims will be among the best in the State. The partners were formerly in business in Australia.

A. C. Bard & Co., dealers in diamonds and precious stones, will open an office at 704 Columbus Memorial building, May 1. They will do business with the regular jewelry trade. Mr. Bard has been in touch with the diamond trade for 15 to 16 years and has had road experience as well. He has been 11 years with Otto Young & Co., the last seven years as diamond man. His partner is D. H. Wagar, a man of capital.

There were last week fewer buyers in town than usual and most of those in from distant points were on pleasure trips rather than for business. Seaman & Morris, of Odessa, Mo., were both here buying, as were Mr. Gleason, of Gleason & Morel, Clifton, Ill.; C. B. Tousley, of Fort Atkinson, Wis., and all the nearby trade that are accustomed to make weekly visits to this market.

Theodore Kuehl returned from abroad, Saturday, after a stay of three days in Paris, two weeks in the Black Forest and a week in Switzerland. He reports the cuckoo clock exhibit for the Pan-American Exposition at Buffalo has been shipped, 300 cases arriving at New York Saturday on the steamer *Concord*. This clock exhibit will be a remarkable one, says Mr. Kuehl, as also will the exhibit of hand carved grandfather hall clocks.

Burglars went through the flat of J. A. Limbach, Chicago representative for Theodore W. Foster & Bro. Co., Thursday afternoon, during the temporary absence of Mrs. Limbach, who had stepped to the market and was gone but 40 minutes. When she returned she found everything in disorder and every drawer in the house turned out on the floor. A diamond ring and pair of pearl opera glasses belonging to Mrs. Limbach and a revolver owned by J. A. were taken, besides a number of small trinkets. The loss was less than \$200. No arrests.

Denver.

Tony Lubelsky, Cripple Creek, has opened up a branch store at 28 Tejon St., Colorado Springs.

C. O. Hunter, Fort Collins; A. B. Allen, Pueblo, and I. H. Hart, Manitou, were in Denver, last week, on business.

Cincinnati.

Frank Herschede will go east this week to buy new goods.

The Watch Case Engravers' Union have applied for membership in the Central Labor Union of this city.

S. C. Citroen, diamond cutter, received some rough diamonds found in this State, and when they were cut four of them were less than one-quarter of a karat, or about one-sixteenth each. They were the smallest diamonds ever cut in this country, Mr. Citroen said, and each had as many facets as are cut on larger ones.

The Fall Festival Association have sent out circular letters to the jewelers, asking them to cooperate in making the festival next Fall one of the grandest events in the history of Cincinnati, and suggest a big jewelry float. Frank Herschede has signified his willingness to contribute to this and will give his personal attention to organization of the jewelers for such an event.

The men at the Bell factory, at Mansfield, are not out on a strike as rumored, but are satisfied with the company's system and the wages they receive. The factory is running full time and is rushed with orders. There is no truth in the rumor that the Mansfield plant will be moved from that city. It is one of the finest buildings in the State for its purpose and the company do not intend to relinquish it.

The Wadsworth Watch Case Co. posted up notices last week which read: "On and after April 16 only non-union men will be employed in this factory." The union members are very indignant and say they will go elsewhere. The Wadsworth Co. are firm in their stand and declare they will hold the fort on these principles. They claim they have lost too much money on the old system of letting the men do as they pleased and now they intend to know how much a man does and pay him for it. They pay the union price and expect to and they also work union hours.

Pacific Coast Notes.

John Bond, Groverland, Cal., will leave that place shortly, to seek a location elsewhere.

C. W. Wickersham has opened an up-to-date jewelry establishment in the Willow building, 19th St., Bakersfield, Cal.

A. H. Ewert, Ukiah, Cal., has arrived in Mendocino, Cal., and is preparing to open up an auction of a portion of the stock from his Ukiah store.

Pacific Northwest.

E. D. Elwood, Medford, Ore., will erect a new building.

Charles Riggs, Hood River, Ore., will move to a new location.

W. L. Coppernoll, Cottage Grove, Ore., has removed his store to new quarters in the Allen building.

A. & C. Feldenheimer, Portland, Me., have had on exhibition in one of their windows the Waverly Golf Club prizes, consisting of loving cups, mugs, goblets, etc.

The new sapphire mines syndicate will in a few days resume operations at their mines near Yogo, Mont. The managers anticipate the most successful season they ever had. The Burke & Sweeney sapphire mines, not far from the syndicate's claims, will be extensively worked this season. These may be sold at any time.

The booty of a successful burglar was unearthed near Colfax, Wash., on March 6 and the police were informed a few days ago, by Adam Wertz, a young Russian lad, whose parents reside in the town of Colfax. The boy's discovery, including six gold watches and 18 gold rings, all of considerable value, was made in the sand along the banks of the Palouse river. He kept the matter quiet, he said, as he hoped to find the owners. The jewelry was stowed in tobacco sacks and had evidently been hidden for quite a while, for the works of the watches were badly rusted. A local jeweler, M. A. Rose, says some of the movements were worth \$50 or \$60. The rings are all solid gold. It is presumed the goods were the result of some jewelry store robbery in those parts, and the party who cached them was either caught and sent to the penitentiary or jail, or else has died. No jeweler hereabouts is able to identify the recovered booty.

Minneapolis and St. Paul.

George Greenleaf, Minneapolis, who has been ill for some weeks, is again able to be around.

F. Shapira, Little Falls, Minn., and H. T. Segerstrom, Ironwood, Mich., were buyers in the Twin Cities, last week.

L. H. Deeny, of Fagerstrom & Deeny, watchmakers, St. Paul, was married, April 15, to Miss Ada Stolz, of that city.

Charles Carlson, who has been watchmaker for Lewis Finkelstein, St. Paul, for 10 years, has gone on an extended vacation to Europe.

Fiske & Co., Minneapolis, announce that they will move their store, May 1, from 32 Washington Ave. S., to 17 Washington Ave. S., in the Nicollet House block.

The trustee for the A. H. Simon stock, St. Paul, has sold it to C. S. Sutter, who has been a watchmaker for Mr. Simon, and M. L. Finkelstein, for \$3,200. The new

S. C. CITROEN & CO.,

Diamond Cutters and Polishers for the Trade.

Special attention given to repairing stones.
Cutting of Rough Diamonds at 1%.

415 to 419 Race St., CINCINNATI, OHIO.

owners will move the stock to a ground floor location soon. It will be kept separate from the store of Mr. Finkelstein.

B. Schuette, Chicago, has concluded to close his Minneapolis branch, and June 1 will remove the stock and consolidate it with the Chicago house. The house will continue to cover the northwest as closely as heretofore and believes that it can give better service in attending to the wants of its northwestern trade direct. H. E. Schloss, the manager, will be transferred to Chicago at that date, and will, thereafter, make his headquarters there.

Indianapolis.

C. L. Van Winkle has succeeded E. L. Sloan, Gaston, Ind.

Simon Kiser is back from his purchasing trip to New York.

Smith T. Nichols attended the meeting of the Grand Commandery of Knights Templar, at Muncie, Ind., last week.

The following jewelers are active members of the Indianapolis Commercial Club: Silas Baldwin, Enrique C. Miller, Horace A. Comstock, Ed. Ducas, F. M. Herron, William T. Marcy, Jacob C. Sipe, Carl F. Walk, J. C. Walk. F. M. Herron is one of the directors and a member of the finance committee.

TOWLE MANUFACTURING CO.,

CHICAGO.

NEWBURYPORT, MASS.

Shelbyville, Ind., were in the city last week.

April 15, the board of trade of Vincennes, Ind., closed a deal with Joseph Backler, Chicago, for the erection of a watch and clock factory in that city.

The recent finding of diamonds in the hills of Brown County, Ind., has again called attention to that wild and almost deserted region. Several diamond men who saw the stones have become very much interested and think that where a few are found there must be more. So far the finds have been made in the streams where the gold is also washed out. Iron sand and blue clay are said to abound there. Garnets are found in considerable numbers. No real effort at mining has ever been made. There are a few old men who live in the hills and spend their time and claim that they make a living out of gold washing.

Omaha.

Trade continues quiet, both with wholesale and retail dealers, on account of the bad weather. All local retail establishments complain of lack of business, and traveling men out from Omaha state the business and collections throughout the country are bad.

O. C. Zinn, Hastings, Neb., visited the wholesalers of Chicago, last week.

F. G. Chessman, York, Neb., is selling his stock at auction, but is not going out of business.

F. F. Willard, Council Bluffs, Ia., has been engaged by M. D. Franks as manufacturing jeweler.

Fred. Brodeguard has much improved his store by the addition of the latest style of glass counter cases.

Charles E. Gaskill, for several years with Mawhinny & Holliday, has engaged in business in Hiawatha, Kan.

Charles Woodmansee has returned from his vacation passed in Chicago and at his home in Prairie City, Ill.

T. H. Winn, formerly with Mawhinny & Holliday, but now with the Webb C. Ball Co., Cleveland, O., is in the hospital with smallpox.

C. H. Brasfield, formerly of Omaha, but now located in Ness City, Kan., is doing an excellent business. He says that the crop prospects are good all over Kansas.

Louis Borscheim, of Brown & Borscheim, has been confined to his home for a week by illness. Louis Borscheim, Jr., who has been engaged in the jewelry business in Austin, Tex., has returned home on a visit.

Harry Mohr, Exeter, Neb., is a musician of note as well as a good jeweler, and is making preparations for Decoration Day, when the band, of which he is the director, will furnish the music for the exercises in York.

The father of Theodore Simms, Council Bluffs, Ia., died suddenly a week ago and Mr. Simms has gone to Hastings, Neb., to settle his father's estate. He will not return to the jewelry business before next fall.

Carl Tonner, son of L. H. Tonner, Red Oak, Ia., is taking a course in watchmaking and engraving in the Omaha Horological School, to fit him to assist his father in business. Robert McLaughlin, of Boise

City, Idaho, has also entered for the full course.

J. M. McGee was in the city, last week, from Cherokee, Ia. His business has been pretty fair this year, especially in the watch trade, and he expects good business the rest of the year on account of the buildings which are going up in Cherokee and bringing workmen into the place.

Webb C. Ball, of the Webb C. Ball Watch Co., Cleveland, O., was in this city last week. When the change was made in watch inspectors on the Union Pacific railroad, a year ago, some of the grades of the Ball watches were discriminated against and Mr. Ball came west to adjust the matter, which he did to his satisfaction.

T. L. Combs & Co. were incorporated, last week, for the manufacture of, and the wholesale and retail trade in, jewelry and optical instruments, with a capital stock of \$25,000. The incorporators are T. L. Combs, and his brother, B. B. Combs, E. O. Furen and E. J. Sullivan. Mr. Combs has been in business in Omaha since 1893, and in his present location for three years.

David H. Wells, representing the American Waltham Watch Co., was in the city, last week, introducing the new railroad watch his company have just produced. The face has the seconds numbered. This style of watch has never before been sold in the west. It is called the consecutive minute hand dial. Mr. Wells came to Omaha from a trip through Kansas, where he says business is very fine. The prospects for the wheat crop, he says, are better than Kansas has ever known, and as a consequence business is booming.

San Francisco.

Arthur W. Tipson, son of Wm. A. Tipson, manufacturing jeweler, died on April 15.

George Staffler, of Wessendorf & Staffler, of Santa Cruz, Cal., is calling on the trade of San Francisco.

Fred Roth, with L. & M. Kahn & Co., New York, and Mrs. M. Schussler, of this city, were married last Sunday and went south for their wedding trip.

Jesse H. Waterman and Amy F. Schussler, daughter of the late Michael Schussler, were married in this city last week. The groom is connected with the business which the bride and her mother inherited on the death of the founder, two years ago.

H. E. Hall, of A. I. Hall & Son, is glad to get back to California. He thinks the climate of Honolulu not nearly as desirable as ours. There are only a few thousand white people in the entire trade of Honolulu, which will not equal that of a small city here.

Elmira, N. Y.

William H. Frost, the veteran jeweler, who for over 20 years has occupied the store at the corner of Lake and Water Sts., is to retire from business. He is now selling his entire stock at auction.

Edward Saks, for years one of Canton's merchants, has leased the Robert E. Olney property, Sullivan St., Mansfield, Pa., and will open a new jewelry store there. He will also carry a line of optical goods.

Pittsburgh.

Otto Heeren sails on May 4 for Europe. W. F. Eyles, lately of Vandegrift, Pa., has removed to Dayton, O.

Mr. Harris, of Moundsville, W. Va., has purchased the store of H. Bissett.

Robert Wolf, of Biggard & Wolf, has gone on a European tour in search of art goods.

Pickering & Jelleff, Mansfield, O., have moved into a handsome new store on Main St.

Schmidt Bros., New Castle, have removed from Mill St. to Washington St., that city.

Max Niemann, McKeesport, Pa., will start an auction sale on April 25. He will remodel his store.

Emil Bieler, of the late firm of Heckel, Bieler & Co., have gone into the manufacturing business at 237 Fifth Ave., fifth floor.

Emil Gerliuss and Miss Clara Heeren, both of Heeren Bros. & Co., were quietly married on April 17 and are now residing in Knoxville borough.

Heeren Bros. & Co. have the contract for 20,000 badges, rural delivery, Knights Templar and others. The factory is working day and night.

Announcements were sent to the Pittsburgh friends of Robert W. Brady, last week, informing them of the opening of his handsome new store, 111 S. Main St., Washington, Pa.

The Pittsburgh Diamond Cutting Co. have opened an establishment at 237 Fifth Ave., and are composed of J. B. Janssens, Pittsburgh's only diamond cutter, and Frank Klein, lately a member of the former well known firm of Klein, Kraus & Co. The firm are issuing an instructive booklet monthly relative to the art of cutting diamonds.

St. Louis.

The Broadway Bazaar, Broadway near Washington Ave., is closing out at auction. The goods sold are guaranteed by the E. H. Kortkamp Jewelry Co.

A. S. Mermod, president of the Mermod & Jaccard Jewelry Co., will leave, this week, on his annual tour through the centers of Europe in search of productions for his establishment.

A well known gentleman of this city has an Italian railroad man's watch, which was presented to him by a friend. These watches are carried by all Italian railroad employes and are manufactured by the Government for their especial use. Three years ago the Italian Government abolished the regular time table and introduced the 24 hour system. To-day the Italian railroad crews know no other reckoning of time but that of 1 o'clock to 24 o'clock. The number of accidents has been lessened by the introduction of the new time table by more than 50 per cent. statistically. These watches, which are three times as large as an ordinary hunting case watch, are quite heavy, are stem-winders and electricity proof. They are worth in Italy about \$12 in American money. This is the only one ever seen in St. Louis.

Columbus, O.

Frank B. Ross, who has been with Shreve & Co., San Francisco, Cal., has returned to Columbus.

J. C. Goodman, of Goodman Bros., has just returned from New York, where he spent some time buying new goods for the house here.

The Columbus Polishing and Plating Co. have increased their capital stock from \$5,000 to \$25,000. The company have been doing a good business.

The Columbus Board of Trade are organizing an investment company who will take stock in concerns that wish to remove from other cities to this place.

Charles Castlebury, a traveling jeweler, was married to Miss Cora Bugbee, of Gonzales, Tex., and the groom will take charge of the jewelry store operated by the bride's mother.

It cannot be learned whether the union labor matter will affect the Columbus Watch Co. or not. It has been stated in the news dispatches that this company are not included with the others in the agreement not to employ union labor.

Harrington & Nonnenmacher will move into their new room about the middle of this week. They hoped to get in earlier, but were delayed on account of its not being finished. The room has a handsome tile floor, with a nicely designed steel ceiling. They will fit it out with new counters and counter cases, using the fine wall cases they now have.

While there has been some correspondence with the Appleton parties, it is not believed the Columbus Watch Co. will move from this city. Neither Manager Reel nor President Klic could be seen Saturday, but it is understood that conditions at Appleton were not at all satisfactory. So far as a combination with the Bell Watch Co. is concerned, nothing has been said.

The Watchman's Signal Recording Co., of Cincinnati, were incorporated a few days ago, with a capital stock of \$10,000. The articles of incorporation authorize the company to receive and record signals of watchmen, special policemen and other persons guarding and protecting property, and selling and renting automatic recording and electric clocks. The incorporators are W. K. Maher, J. Millard Chamberlain, E. S. Sanderson, F. M. Harper and Robert Simpson.

A motion for a new trial in the case of Walter Wingerter, of Akron, convicted of burglary and larceny, has been overruled by Judge Hayden. Young Wingerter is the son of a prominent jeweler at Akron and during the riot in that place last August it is claimed he broke into a hardware store and took a revolver, supposedly to take part in the trouble they were having there. It is not charged that the lad did this with the intention of robbery, but it is a part of the prosecution that has resulted from the riot, with the intention of preventing a repetition of such trouble in that city.

Kansas City.

The Underwood Jewelry Co. have opened their store.

A. E. Pittenger has established a school

for teaching watchmaking at 811 E. 12th St.

F. O. Parker, of the material department of the Norton-Paulson Jewelry Co., spent the first of the week in Topeka, Kan., calling on the trade.

Edwards & Sloane Jewelry Co. have completed two fine medals for S. J. Huey, Excelsior Springs, Mo., which are to be presented to Haynes Academy.

Out of town merchants who called on the Kansas City trade last week were: G. E. Gilmore, Paola, Kan.; H. W. W. Starcke, Junction City, Mo.; Otto Burk-lund, Osawatomie, Kan.; C. H. Paxton, Richmond, Mo.; C. A. Clement, Springfield, Mo.; C. Wayland, Mendota, Mo., and L. D. Everhart, Warrensburgh, Mo.

H. C. Carswell has purchased the furniture and fixtures of Charles H. Harsch and will, after May 1, occupy the store now occupied by Mr. Harsch. Mr. Harsch will sell his stock at auction as soon as possible. He expects to go to Armourdale, where he will conduct an auction jewelry store.

The usual number of Spring weddings have been taking place in this locality. T. L. Ricksiker, jeweler, Armourdale, was married to a young lady from Kansas City, last week, and Fred Nyman, traveler for the Norton-Paulson Jewelry Co., whose territory is Nebraska and northern Kansas, was married at Atchison, Kan., April 16, to Miss Adelia Berlin, of that city.

A New Discovery

CYCLONE
STEEL SOLDERING
FLUX

FOR
BRAZING STEEL
... AND ...
Nickel-Plated Articles
without Bluing or
Destroying Nickel.

DIRECTIONS.
Coat over article to be soldered with the Flux; take small parcel of spelter and wet freely with Flux. Place the pieces to be soldered in position for soldering, put spelter on joint, then fire.

Every Bottle Guaranteed. Price
of Flux and Box of Solder
50 Cents.

Caveat filed Nov. 17, 1900.

With this Flux you can Braze Malleable Iron, Brass and Steel and leave no enamel crust or lump, as this Flux contains no Borax. ❀ ❀ ❀

Always ready for use and will keep in all climates. ❀

No use of cleaning or scraping article to be brazed as this Flux will cause solder to flow freely and leaves article brazed tougher than before broken.

CYCLONE
ANTI-OXIDIZER

FOR
Preserving the Color
and Polish of Gold,
Silver, Nickel and
all other
polished metals while
passing through the
fire in act of
soldering.

DIRECTIONS.
Warm article and drop in Anti-Oxidizer from two to three times before soldering; see that the article is well coated over. No need of cleaning Anti-Oxidizer out of joint before soldering.

Every Bottle Guaranteed. Price
35 Cents.

Caveat filed Nov. 17, 1900.

Cyclone Anti-Oxidizer leaves no scales, crusts or lumps after using, like all others on the market do, as it contains no Borax; no boiling in acid pickle as the Oxidizer preserves the color. ❀ ❀ ❀ ❀

Always ready for use and will keep in all climates. ❀

If you use it once you will always use it as it holds the color. ❀ ❀ ❀ ❀ ❀ ❀ ❀

CYCLONE
HARD SOLDERING
FLUX

FOR
SOLDERING GOLD,
Silver and Roll-
plate Goods.

DIRECTIONS.
Coat article to be soldered over with Cyclone Anti-Oxidizer. Wet solder and joint with Flux. Hold article over alcohol lamp. After solder flows drop article in Soldering Flux while warm. Rinse in water. For larger articles use blow pipe.

PRICE 50 CENTS.
Caveat filed Nov. 17, 1900.

This is what Cyclone Hard Soldering Flux will do: ❀ Will cause solder to flow with less heat; can solder 8-karat gold goods with 18-karat Gold Solder. No danger of melting article you are soldering. No use of cleaning article and joint to be soldered as solder will flow freely. You can also solder all grades of plated jewelry and not destroy plate. After soldering you will find article to be much tougher than before broken. ❀ ❀ ❀ ❀ ❀

Always ready for use and will keep in all climates. ❀

It will pay for itself four times a day. You will say so when you try it. ❀ ❀ ❀ ❀ ❀ ❀ ❀

The Latest Patents.

ISSUE OF APRIL 9 1901.

671,949. SEPARABLE BUTTON. ELMER B. HAVERLY, Sayre, Pa., assignor of one-half to John B. Hutchins, same place. Filed June 9, 1900. Serial No. 19,675. (No model.)

A separable button comprising two parts, the one having a shank with a wedge-shaped point and a flat-faced notch above the point, and the other provided with a tubular socket to receive said shank, said socket being split longitudinally from its free end and having inward projections at said free end forming two straight parallel jaws across the end.

672,143. TELESCOPE TRAVELING BAG. CLAUDE BOUGHNER, Greensboro, Pa. Filed March 22, 1900. Serial No. 9,781. (No model.)

672,159. HAIR-RETAINER. WILLIAM S. BECHTOLD, Newark, N. J., assignor to Eschwege & Cohn, New York, N. Y. Filed Sept. 22, 1900. Serial No. 30,765. (No model.)

In a hack-hair retainer, the combination with a curvilinear one-piece frame having short comb-teeth, extending inwardly and upwardly from its lower curved edge adapted solely to retain the loose neck-hairs engaged by them; of a holding device applied to the frame for securing it in position on the hair, adapted to be passed into the bunch of hair embraced by the frame.

672,178. INDICATOR FOR LAMP-FOUNTS. WILLIAM A. PENFIELD, Meriden, Conn., assignor to the Bradley & Hubbard Mfg. Co., same place. Filed July 16, 1900. Serial No. 23,699. (No model.)

672,179. MAGNIFYING-GLASS. JOHN B. PORTER, Canady, Miss. Filed Sept. 1, 1900. Serial No. 28,833. (No model.)

As an article of manufacture, a reading-glass comprising a thimble formed at one end with an upwardly-projecting flange; a magnifying-glass; and means for securing the glass to the thimble consisting of a wire surrounding said thimble and extending through said flange and diverged at its ends for attachment to the lens.

672,184. PHOTOMETER. ERNEST W. CUSHING, Boston, Mass., assignor to Eastern Electric Co., same place. Filed July 13, 1900. Serial No. 23,467. (No model.)

In a photometer, having a white opaque disk, and a translucent spot thereon, with two mirrors, one on each side of said disk, and at such equal angles therewith as to reflect the image of said disk and of the translucent spot thereon, at each side, to the eyepiece of the photometer, which is in the plane of said disk and on a level therewith, and at a distance of about three feet therefrom, two more mirrors, one on each side, and at equal distance on each side, from said disk and spot, and in a plane in each case at an angle of forty-five degrees with the plane of said disk, and also at an angle of forty-five degrees with the direction of the source of light which illuminates said disk and spot, by reflection from said mirror, last mentioned.

672,204. SAFETY-RAZOR. JOHN A. BUTLER, Southington, Conn., assignor to the Southington Cutlery Co., same place. Filed Jan. 28, 1901. Serial No. 45,039. (No model.)

A fountain-pen provided with a detachable point-covering cap, and means within the cap for pumping fluid into the cap when removed from the pen.

672,295. CAP AND FILLING DEVICE FOR FOUNTAIN-PENS. THOMAS STEVENSON, Victoria, Canada. Filed Sept. 27, 1900. Serial No. 31,235. (No model.)

As a new article of manufacture, a medallion-hadge having a convex front face, a flat back face with a slot therein, and a spring-pin arranged in said slot.

672,326. TIME-INDICATOR. ALEXANDER F. HUMPHREY, Allegheny, Pa., assignor to L. J. Seleznick, Pittsburgh, Pa. Filed May 10, 1900. Serial No. 16,122. (No model.)

In a device of the character described, a concentric base having a suspending-ring secured to its periphery, said base provided on its front face with a circumferentially-arranged dial near the rim of the base, combined with a disk concentrically pivoted to the base and rotatable thereon, said disk being of a less diameter than the base so that the dial-marks on the latter will appear around the rim of the disk, the disk having a series of radially-arranged inscriptions which are spaced equidistant so that one will appear opposite to each dial-mark, and a pointer mounted on the pivot-pin of the disk and rotatable upon said pin independently of the disk.

672,330. MACHINE FOR BUNCHING HAIR-PINS. IRVING H. PECK, Derby, Conn. Filed Oct. 25, 1900. Serial No. 34,250. (No model.)

672,357. CLOCK-DIAL. GREGORY C. DAVISON, U. S. Navy. Filed Nov. 28, 1900. Serial No. 38,045. (No model.)

A toy comprising a clock-face, a plate in the shape of the legs of a ballet-dancer forming the hands of said clock and mounted upon a central pivot, a second plate mounted on said pivot outside of and at a distance from said legs, said second plate representing the skirt and upper portion of the body of the ballet-dancer, with outstretched arms, and a rigid connection between one or both of said arms and said clock-face, said outer plate being small enough to permit the legs of the ballet-dancer to be seen at every portion of their movement.

672,366. RING. JOSEPH L. HERZOG, New York, N. Y. Filed Jan. 11, 1901. Serial No. 42,868. (No model.)

A ring having an opening provided with a seat for the stone to prevent outward movement, and a recess at the inner end of said opening, a stone-holder located at the inner portion of the opening, to hold the stone against inward movement, and a fastening device, likewise located within the inner portion of said opening, at the recess thereof, and engaging the peripheral portion of the holder and the ring to lock the holder in position against sliding and against turning.

DESIGN 34,359. SILVER SOUVENIR-MEDAL.

JOSEPH LESHER, Victor, Col. Filed Feb. 14, 1901. Serial No. 47,381. Term of patent seven years.

DESIGN 34,360. FINGER-RING BAND. MAX L. WEISS, St. Louis, Mo. Filed Feb. 4, 1901.

Serial No. 46,087. Term of patent 14 years.

DESIGN 34,362. STRAP FOR EYEGLASSES. OSCAR W. MEYROWITZ, New Rochelle, N. Y.,

assignor to the Meyrowitz Mfg. Co., of New Jersey. Filed Jan. 4, 1901. Serial No. 42,134. Term of patent seven years.

DESIGN 34,361. HANDLE FOR SPOONS, FORKS, ETC. JOHN CLULEE, Wallingford,

Conn., assignor to International Silver Co., Meriden, Conn. Filed March 25, 1901. Serial No. 52,868. Term of patent seven years.

DESIGN 34,363. BASE FOR CLOCK-CASES.

ERWIN M. JENNINGS and CHARLES S. MOSMAN, Bridgeport, Conn., assignors to the

Jennings Bros. Mfg. Co., same place. Filed March 20, 1901. Serial No. 52,109. Term of patent seven years.

DESIGN 34,370. KEY-RING. HENRY A. WEHMAN, Philadelphia, Pa., assignor to John F. Simons and Thomas Maddock, same place;

Frederick M. Simons, Swarthmore, Pa., and Edwin S. Simons, Orange, N. J. (trading as Simons, Bro. & Co., at Philadelphia, Pa.). Filed Dec. 22, 1900. Serial No. 40,824. Term of patent 3 1/2 years.

TRADE-MARK 36,242. ORNAMENTAL HAT-PINS. McRAE & KEELER, Attleboro, Mass. Filed March 20, 1901.

Essential feature.—The representation of a bell. Used since Jan. 1, 1901.

TRADE-MARK 36,271. CERTAIN NAMED GLASS. THE LIBBEY GLASS CO., Toledo, O. Filed March 12, 1901.

Essential feature.—The representation of a star inclosed within a circle. Used since Feb. 19, 1901. TRADE-MARK 36,273. WATCHMEN'S TIME-DETECTORS. ROBERT KOPP, New York, N. Y. Filed March 20, 1901.

Essential feature.—A three-winged figure, two of the wings projecting upwardly to the right and to the left and having square ends and one of the wings projecting downwardly and terminating in a point. Above this figure is a representation of a lighted match, and around this figure and said representation of the lighted match is arranged a ring or circle. Used since March 4, 1901.

TRADE-MARK 36,277. CERTAIN NAMED METAL WARE. GORHAM MFG. CO., Providence, R. I. Filed March 20, 1901.

ATHENIC.

Essential feature.—The word "ATHENIC." Used since January, 1901.

PHOTOGRAPHS OF MEN.

ONE of the traditions of photography is that men always want to look like some one else. So they hook you up with a high check and martingales, and tell you to throw out your chest, to make you look like John Drew or Hackett.

I am one of the people who can't get over the isness of the is—and the way that simple, manly, characteristic pictures sell proves that the tradition is a fallacy.

PIRIE MAC DONALD,

141 BROADWAY, NEW YORK.

If a Day's Supply of Ink is Good, a Year's Supply is 364 Times Better.

Blair's is the only Fountain Pen in the world having a year's supply cartridge of correspondence and cheque security ink free! Right in the penholder, needing water only to instantly produce a uniform ink everywhere. Holders non-leakable and jointless. New ink supply, which will not freeze or mold, 10c. each. Ordinary ink may also be used. Particularly good for Jewelers, as a year's supply of ink is given free to every purchaser.

BLAIR'S FOUNTAIN PEN CO., W 163 BROADWAY, NEW YORK.

ALOIS KOHN & CO., SOLID GOLD CHAINS, 4 MAIDEN LANE, Near Broadway, N. Y.

We call the attention of the Trade throughout the country to our line of

LORGNETTE AND GUARD CHAINS.

Will send Samples on Memorandum on receipt of satisfactory reference. Correspondence Solicited.

That this department shall prove mutually beneficial to our readers, it is desirable that the members of the trade generally communicate with THE JEWELERS' CIRCULAR-WEEKLY regarding any advantageous device or plan that they are utilizing in connection with their business.

PRIZE ESSAY COMPETITION, NO. 3.

SUBJECT:

"How to Foster Spring Trade."

No. 4.
PRIZE ESSAY COMPETITION.

First Prize, \$20.
Second Prize, \$10.

These prizes will be given to the writers of essays on the subject

"How to Promote a Bric-à-brac, Pottery and Cut Glass Department."

The prizes will be for the best and most reasonable essays, not for the language in which the ideas are expressed. Anyone may enter, whether he be a retailer, salesman or any employe.

The standing of the judges who have kindly consented to act is a guarantee that the contest will be carried on strictly on its merits and in an absolutely fair and impartial manner. We shall designate each contribution by letters, keeping a list of contributors with the letters of their articles. Thus the judges will not even know the names of the writers whose products they pass upon.

RULES:

Essays must be in this office by June 15, 1901.
Essays must be written on one side of paper.
No limit to number of words, and specimens of records are admissible.

NOTE.—THE JEWELERS' CIRCULAR-WEEKLY reserves the right to publish any or all of the competing essays received.

Preference will be given, all other things being equal, to those whose contributions reach us at the earliest date.

Just a Word of Praise.

PENN YAN, N. Y., April 8, 1901.

Editor THE JEWELERS' CIRCULAR-WEEKLY:

Enclosed we hand you money order for \$2 in payment of our subscription to your valuable journal. We do not desire to lose a single copy, so remit at once, so as to keep "a good thing coming."

We feel that we could not keep store without THE CIRCULAR-WEEKLY coming in every week to keep us posted on what is going on in the jewelry business and kindred lines through this broad country of ours. May continued success attend your efforts to supply the trade with the best trade paper we have any knowledge of.

Yours truly,
E. H. HOPKINS.

At the beginning of every year the wide-awake jeweler has had his whole mind, time and attention taxed to their utmost in the holiday rush. After a few days' relaxation and rest he finds himself facing the difficult problem: What next, to be ready for Spring trade? What is necessary to make it a success?

Spring trade with the jewelry, as with many other branches of business, is the most difficult to handle, as it follows so closely the holiday trade, when pocketbooks are generally well drained and when it requires more effort on the part of the merchant to induce buying.

In this day of sharp competition the question before the jeweler is not so much "How much can I induce people to buy?" but "How many of them can I get to buy my goods? How can I get them into my store before they buy, and sell after getting them in?"

I doubt whether the bare subject, "How to foster Spring trade," can be successfully treated except in a sort of general way, not only for its own sake but for the sake of a successful business career, of which Spring trade is a part.

Certain things are necessary all seasons of the year in order to have their effect at this most trying season:—Generally speaking, a liberal amount of advertising in the right way; always treating customers kindly and courteously, giving them the best of attention, whether rich or poor, great or small, making them feel welcome in your store and easy in your presence; and, above all, a fair and honest deal every time, both in price and quality, never charging one customer more than another for the same thing; in short, be a wide-awake, courteous and honest man in every transaction. Practice the above few suggestions and you have a foundation upon which to build the Spring trade in question.

The month of January seems to be well calculated for the preparation. While there is always some business, January is generally quiet. As soon after the holiday trade as the required rest has been gained, go carefully over the entire stock. First select every article that is in any way depreciated in value, whether shopworn, or out of style, or if it is especially a holiday article and not fit to carry over. Put these to one side for after-consideration. This leaves you a clear stock.

Now, go over the latter and thoroughly clean and recard every piece of card goods. All others clean and polish where necessary to make them just like new. Brush out the trays and, if necessary, re-line them. Polish the show cases inside and outside. Now, take all your clean goods, replace them in the trays and cases as tastefully as possible, using some new lining and drapery here and there to make everything look like coming out in a new Spring suit, as it were. Now you have a stock of goods that any honest man can advertise as a good, clean stock, well worth the time and attention of any customer who wants to make a purchase.

Now go back to your goods laid aside. Treat them in the same way as the above in regard to cleaning, polishing and recarding. By the reduction in size of your stock which follows the holiday drain and the culling you have done you will have at least one show case and some trays to spare from your regular stock. Clean these up nicely, trim to suit, and arrange your second class stock in good shape.

Now, go to one or more of your best papers of largest circulation and in a few short locals right to the point advertise your business just as it is. Never exaggerate; never make offers you cannot meet. Tell your customers what you have done and just what you have. Tell them you have a line of bargains, some of which are slightly shopworn, or a little slow in style, and others same as new, only you do not want to carry them over to another holiday. Invite the people in. It is not hard to get people in to see bargains. Get them in and then treat them nicer than you ever did in your life. Be sincere; show them your bargains; and, by the way, make them bargains by putting the price down—down. Better get something than nothing. If they see something they want, sell at some price. You have advertised it a bargain, therefore, stick to your assertion. These are goods you don't want in your stock.

Here is the opportunity you have been working for. Now sow seed that will bear fruit a little later. Do not let one get away before you have shown him or her through your clean, bright, up-to-date stock, and whether anything is wanted or not this time be careful to tell the prospective customer you are preparing as never before for the Spring trade; that you will be adding new goods all the time.

NG and HINT Sto JEWELERS

Invite the people to come often to see new articles; to come in whether they want to buy or not. Tell them to bring their friends along. Spend a little time pleasantly with each one; walk to the door and, as they leave, close it with a kind "good-bye; call soon again."

These may seem small items, but they do their work. They leave an impression with the customer that he or she has, at least once in his or her life, been treated like a friend.

Having started in this good work it will not take much work to keep stock in good, tasty shape, and it will not cost much to keep a few pointed locals in your paper every few days.

But above all things, always be truthful in representing goods; always be honest in every particular; be sincere in what you say to customers and you will not only be rewarded with a good Spring trade but you will gradually grow in the estimation and confidence of your customers, until they will not only stay by you in your Spring season but through the years to come, and they will bring their friends into the place where they can be treated nicely and always "depend upon what the jeweler says." Begin at once and see how well it will work. XX.

JEWELERS' IDEAS AND SCHEMES.

R. A. Dickson & Co., Montreal, Can., light their store by their own acetylene gas plant.

W. M. Farrington, Pittsfield, Me., sends THE CIRCULAR-WEEKLY some specimens of his advertising. One feature is a card folder which will not stand handling, because of its likelihood to split into two, with calendar for 1901-2, which might have been much improved if the printer had done his work better. It pays to have such things as attractive and substantial as possible, otherwise they go the way of the average card or circular and the advertiser fails to get value for the money he pays. Mr. Farrington sends another leaflet that probably cost from a third to a half less than the calendar-card, but it is from two to three times as valuable as a means of letting the people of Pittsfield, Me., know of Mr. Farrington's business. This leaflet contains, as conspicuous features, two half-tone cuts. One shows a youngster on the point of bursting into tears as he reaches for something. The other cut shows the same youngster with happiness and satisfaction spreading from eyes to toes as he clasps in one hand a watch. It is safe to say that this leaflet will be preserved for the pictures long after the more elaborately planned, more expensive but poorer made calendar-card is brushed aside. As to an advertisement of Mr. Farrington's business, this seems to be an illustration of the now out of date idea of many a printer that the

more styles of type he gets into an advertisement the better it looks. This treatment is apt to spoil even the best written appeal for trade, and it isn't necessary, even in small towns, nowadays. Mr. Farrington is surely inspired with enterprise to boom his business by modern methods and doubtless uses the best available means at hand.

Henry Copley, Omaha, Neb., the special watch examiner of the Burlington railroad, has a very striking advertising card. It is made out in the shape of a railroad pass with the trade-marks of the road and one of the principal branches in the corners. On one side is the following:

Annual * Ticket.

Burlington
Route

ISSUED TO

Quincy Route

Mr. Bearer,

This ticket entitles the holder who may want to buy a Watch, a Diamond, Cut Glass, Sterling Silver, Chain, Ring, Brooch or other article of Jewelry to COPLEY'S universal honest treatment.

You are allowed to stop at COPLEY'S at any time between 8 o'clock A. M. and 6 o'clock P. M., and will always receive a courteous welcome.

OMAHA, NEBR.

No. 215 S. 16th. Henry Copley

PAXTON BLOCK. WARES OF GOLD AND SILVER.

The reverse bears this bit of information concerning Mr. Copley, who he is and what he has done:

silver cup. The cup will be presented to the winner in a series of individual shoots.

Mrs. M. E. Hoyle, Riverside, Cal., gave away 1,000 downy, imitation, just hatched chickens as an Easter advertisement.

C. R. Damuth, Redfield, S. Dak., has a mocking bird from Texas in his store that attracts much attention.

E. L. Heinrich, Watertown, N. Y., has two window attractions which draw many sight-seers. One of them is an elaborately carved wooden clock, which shows a procession of Apostles every hour when the

clock is about to strike. The other is an immense clock dial, about five feet in diameter, on his front show window, with

INFORMATION.

COPLEY is well known as a watch expert. He is the special watch examiner for the Burlington and Missouri River Railway Co. He is chief watch inspector for the Omaha, Kansas City and Eastern Ry.; Omaha and St. Louis Railroad and the Kansas City and Northern connecting railroads. Copley equipped the B. and M. depot with the most reliable time service in the West, and has entire charge of these fine timepieces. He has spent 20 years of his life studying watches. No piece of work left with Copley is too large and none too small to receive his personal, careful attention.

Some weeks ago C. V. Stephens, Carthage, Ind., offered a prize of silver ware to the one writing "Stephens, the Jeweler, guarantees his work," the greatest number of times on the back of a postal card. Morton Barber, of Greenfield, Ind., got the prize for writing it 1,011 times. The writing was too fine to be read with the naked eye.

A. G. Doten, Lewiston, Me., has presented to the Androscoggin Gun Club a handsome

hands of proportionate size, and he who passes can catch the time of day at a glance.

A solid silver spike has been made by a Watkins, N. Y., jeweler, which is designed to be the last piece of metal to be driven into the new M. E. parsonage there. The privilege of driving it will be sold to the highest bidder and the maker started it off with \$50. The name of the successful bidder and the date will be engraved on the spike.

BUYERS' INFORMATION BUREAU.

Questions as to the makers of certain lines of goods, where to buy certain lines, where certain kinds of work are done, the owners of certain trade-marks and other matters relating to the buying branch of a jewelry business will be cheerfully answered under this department. The reader cannot ask too many questions. *All queries received are also answered promptly by mail.*

NEW CASTLE, Pa., April 12, 1901.

Editor of THE JEWELERS' CIRCULAR-WEEKLY:

Please let me know where I can get a book giving values of old coins.

Yours truly,

JACOB EWENS.

ANSWER:—From The J. W. Scott Co., Ltd., 36 John St., New York.

WILLIAMSPORT, Pa., April 13, 1901.

Editor of THE JEWELERS' CIRCULAR-WEEKLY:

Will you kindly send me the addresses of some large and reliable umbrella manufacturers at your very earliest convenience, and oblige,

Yours respectfully,

P. B. HULING.

ANSWER:—Follmer, Clogg & Co., 395 Broadway, New York; White & Major, 25 Union Sq., New York; Simons, Bro. & Co., 19 Maiden Lane, New York.

SNOWVILLE, Va., April 10, 1901.

Editor of THE JEWELERS' CIRCULAR-WEEKLY:

Will you please tell me in the columns of THE CIRCULAR-WEEKLY if Virginia Treasury notes, Series A, dated Richmond, Va., July 21, 1862, and are signed correctly, etc., and are in good state of preservation, would be redeemed by said Treasury? I enclose some Confederate States of America postage stamps. Will you please tell me if they are worth anything and are they in demand by stamp collectors? I also enclose some United States stamps used about 1830 to 1849. Is the little blue one with locomotive on it a United States stamp? Please return all of the above, and any information you can give me will be greatly appreciated. Thanking you in advance, I am,

Very truly,

J. W. MOORE.

ANSWER:—For the Virginia Treasury notes dealers offer two cents each; for Confederate States stamps, 25 cents per 100 and for United States stamps, 10 cents per 100 for the red and 25 cents per 100 for the blue.

GREENFIELD, O., April 12, 1901.

Editor of THE JEWELERS' CIRCULAR-WEEKLY:

Please give me the addresses of firms manufacturing the electric clock systems, and oblige,

Yours truly,

M. O. DEVOSS.

ANSWER:—Self-Winding Clock Co., Grand and DeKalb Aves., Brooklyn, N. Y.; E. Howard Clock Co., 403 Washington St., Boston, Mass.; Johnson Electric Service Co., Milwaukee, Wis.; Standard Electric Time Co., Waterbury, Conn.; Prentiss Clock Improvement Co., 49 Dey St., New York.

TULLAHOMA, Tenn., April 13, 1901.

Editor of THE JEWELERS' CIRCULAR-WEEKLY:

Will you be kind enough to give me the address of some foundry and rolling mill that makes German silver plate rods, tubes, etc.? By giving me the above information I will appreciate it very much.

Yours very respectfully,

L. P. HARVEY.

ANSWER:—For German silver material write to J. Briggs & Sons Co., 65 Clifford St., Providence, R. I., and John J. Jackson Co., 91 Mechanic St., Newark, N. J.

PHILLIPSBURG, N. J., April 15, 1901.

Editor of THE JEWELERS' CIRCULAR-WEEKLY:

Can you inform me where I can purchase watchmen's clocks? Both imported and domestic.

Respectfully yours,

S. ACKERMAN.

ANSWER:—E. Imhauser & Co., 206 Broadway, New York. We do not know of any imported watchmen's clocks.

ELMWOOD, Tenn., April 17, 1901.

Editor of THE JEWELERS' CIRCULAR-WEEKLY:

Where can I buy artificial pearls? Answer and oblige,

W. L. HARDCASTLE.

ANSWER:—J. A. Deknatel & Son, 438 Broadway; Albert Lorsch & Co., 37 Maiden Lane; Goodfriend Bros., 13 Maiden Lane; Allen & Jonassohn, 65 Nassau St., all of New York.

Among the catalogues received last week was one from Strasser & Rohde, Glashütte, Germany, giving full page illustrations of jewelers' wall regulators, hall clocks and chronometers and also portable clocks for geodetic observation, electric second ticks and clock parts. The catalogue is a 48-page book and is profusely illustrated with large wood cuts.

The United States Smelting and Refining Works (L. & M. Wollstein) have moved their office from 25 John St. into the large and attractive store at 16 John St., New York. The firm, besides assaying and refining sweeps and jewelers' wastes of all kinds, sell gold and silver bars, platinum, chemically pure copper, and Eureka and other alloys.

NOTE—Under this department, all matters of a technical or of a news character bearing upon the optical branch of the jewelry industry will be considered. Address communications to The Jewelers' Circular Pub Co., 11 John St., New York.

PROGRESSIVE OPTOMETRY.

AN ingenious lady optician of Chicago has devised a system that all opticians and oculists will hail with delight. It consists of the progressive treatment of defective eyes with lenses, each new pair of glasses complementing the action of the first partial correction worn in quieting all the ocular muscles and nerves until an exact state of artificial emmetropia is reached. Each new pair of lenses are furnished at prescription prices and a client thus remains "in the toils" for some months at a remunerative price for each successive consultation. Why couldn't some masculine optician have devised this system, at once so simple, so sensible and, yes, so gratifying to all lovers of optometric art? Really, the lady optician is abroad in the land and will make her influence felt among all craftsmen.

PORTENTOUS PROGNOSIS.

THE coming convention of opticians, in Chicago, August next, has already set the wheels to going round. The signs of its approach multiply on every hand.

[Adapted from "Alice in Wonderland."]

The slithy brillig waps the sail
That draves the coming jubilee;
The opt ophthalmic optoquem
Ingulphs the drave with uphish glee.

He slaves the rudder, slants the keel,
And bears afrong the burbling main,
To where the whurling stars conclave
To mark his course to Durndigshane.

And in the vorpling metroplix,
Where soon the chortling throng will meet,
Dioptric rig-rags tear the air
And snicker-snack along the street.

It fills the soul with frabjous joy
And tunes the lips "Callooh, callay;"
To tulgy shout and brosky sing,
To usher in the borpeous day.

Then gyre and gible in the glare,
Pile high the momeraths unglite,
Until the brillig whirling stars
Shall pinkle into blosky night.

The T. L. Combs Co., Omaha, Neb., incorporated for the wholesale and retail jewelry and optical business, will not at present, however, put in a line of the latter goods, the incorporation being made in this form to allow the introduction later.

Pennsylvania Opticians Will Conduct Quiz Class Exercises.

PHILADELPHIA, Pa., April 20.—The Pennsylvania Optical Society will hold a special meeting and smoker at the office of secretary C. A. Longstreth, 228 Market St., Tuesday evening, May 14, at 8 o'clock. The exercises will consist of a "quiz class." Every member of the association is requested to send to the secretary between now and May 10 two questions relating to some branch of optics, eye testing, the fitting of frames, or anything else in which he is interested or about which he wishes to be informed. At the meeting each question will be read by the chairman, and as no name will be given with the question, it will be strictly impersonal and the members can give their ideas as to the correctness of the answers given by the chairman, or express their views on the subject. This is expected to produce a discussion on various practical topics and be advantageous to every one present. Each member of the association will have the privilege of bringing a friend with him.

Iowa Opticians to Consider Matter of Legislation in June.

DES MOINES, Ia., April 19.—An important meeting of the Iowa Association of Opticians will be held here June 12 and 13. An invitation to be present has been extended to all opticians in the State, whether members of the association or not. One matter of importance to be considered is the presentation to the Iowa Legislature of an optical bill, similar to the bill recently passed in Minnesota through the efforts of the optical association of that State. The Iowa Association's committee on legislation will make a report on the subject. Among other attractions procured by the entertainment committee will be an interesting and helpful talk by Walter Wyatt, president of the Illinois Association of Opticians.

Kansas Opticians Surprised That New Medical Law Applies to Them.

TOPEKA, Kan., April 20.—Opticians from all corners of this State are objecting to the application of the new medical law to their profession, and as they are not mentioned in the title to the bill and there are several other loopholes through which they could probably escape the application of the bill, if they so desired, it is stated by the secretary of the State Board of Health that

the law will probably not be made to apply to them.

This bill did not originally include opticians, but was afterwards amended to make it apply to them, upon the request of an optician of Garnett, Kan., and the discovery was not made by other opticians that they would be compelled to register and submit to a rigorous examination until it was too late to object.

A meeting of Kansas opticians has been called to meet in Topeka, May 1, when the bill will be considered. It is claimed that the new medical law will wipe out the business of all opticians unless they be graduates of an optical college, have studied the anatomy of the eye and contiguous parts, human physiology and natural philosophy under a competent teacher for six months, and are able to pass an examination such as it may please the board to propound; also, that if after Sept. 1, 1901, any optician fits a pair of glasses without taking an examination prepared by the medical board, he will be liable to a fine of \$200.

Dates Set for the Annual Meeting of the American Association of Opticians.

SOUTH BEND, Ind., April 19.—The dates for holding the annual meeting of The American Association of Opticians, at Chicago, have been set for Tuesday, Wednesday, Thursday and Friday, Aug. 13, 14, 15 and 16. On account of the many and important subjects that will be presented to the society at this meeting, the executive committee have decided to hold a four days' session, instead of a three days' as heretofore. The following named opticians have been accepted as members of the association:

J. L. Hunkins, Asper, Cal.; Max Stern, Chicago, Ill.; Mrs. M. U. Cousin DeLeMar, Detroit, Mich.; Dr. V. B. Thayer, Memphis, Tenn.; J. Valaras Bonnette, M.D., Pollock, La.; Walter Wyatt, Peoria, Ill.; J. M. Johnson, Chicago, Ill.; J. T. Brayton, Chicago, Ill.; Frank Davis Osmond, Sedalia, Mo.; James Littlefield, Topeka, Kan.; J. C. Gibson, Northport, N. Y.; Samuel Wood, White City, Kan.; James P. Malin, San Diego, Cal.; H. E. Tuttle, Jefferson, O.; Morris Cheska, Dayton, O.; Gertrude Ayers, Glencoe, Minn.; Dr. C. M. Stanton, Minneapolis, Minn.; E. S. Bugbee, Minneapolis, Minn.; Mark Witzenski, Vancouver, B. C.; Pearl L. Sagelbiel, Dayton, O.; J. H. Arnold, Columbus, Ind.; Dr. Horace Lichty, Easton, Pa.; H. C. Lederer, Springfield, Tenn.; George M. C. Bartmess, Clinton, Ind.; A. Smith, Wellsburg, W. Va.

John Gordon Gray, president of Quen & Co., Incorporated, Philadelphia, Pa., is a nominee for vice-president of the Manufacturers' Club, Philadelphia. The election is to be held May 20.

DIOPTRIC CONDITIONS OF THE EYE AND HOW TO DISCOVER AND MEASURE THEM.

[Commenced in issue of Feb. 13.]

DIAGNOSIS OF HYPOTHETIC EYES.

HAVING discussed and illustrated two of the anomalous conditions of the eye—hyperopia and presbyopia—we are now able to give a systematic plan of diagnosing these errors. For this purpose we must have hypothetical eyes to work upon. A hypothetical eye is a suppositious eye, one whose condition is assumed to be of a certain character to begin with, for the purpose of illustrating the method of determining the kind and quantity of its error. As these conditions are best shown pictorially, we illustrate our case and then show the means of determining that such is really the condition. These diagnoses will not, in all respects, be the same as latterly, when the relation of other factors in the action of the eye has been discussed, but as a primary means of diagnosing hyperopia and presbyopia with

FIG. 17.

trial lenses they will prove of practical value, especially to beginners.

CASE I.

The above figure represents an eye viewing the distant object. Plainly, the eye is emmetropic. The waves come to the eye plane and its static refraction focuses them upon the retina. Whatever is the accommodative power of this eye, it needs none of it for distant vision. If there is any trouble with it, it must be for near seeing, and that the figure does not show. We, therefore, supplement the above cut with the following:

This figure (Fig. 18) represents the

FIG. 18.

same eye as Fig. 17, viewing the object at a distance of 13 inches. The accommodation exercised is 1.50 D., its total amplitude. But this is insufficient to neutralize the +3c. waves coming to it from the object at 13 inches. Hence a part of its static power (1.50 D.) is engaged in neutralizing these +3c. waves. But such

use of the static power, all of which is required to focus plane waves upon the retina, leaves insufficient power to focus the neutralized waves at the retina. They center or focus at a point 1.50 D. back of the retina and, consequently, circles of diffusion, rather than exact foci, impinge upon the retina, resulting in a blurred image. It is impossible for this eye to distinctly see type or anything else at a distance of 13 inches. It would require 3 D. of accommodation to see at 13 inches distinctly. Even with 3 D. of accommodation it would be unable to see at 13 inches for any length of time, for that would require the exercise of all of its accommodative power and very quickly so fatigue the ciliary muscle that it would have to relax, and by the recession of the foci to points back of the retina cause diffusion at the retina and blur the images. As 1.50 D. is its total accommodation it is also evident that this eye cannot get as near a focus as that represented in the figure but for a moment. Then, by ciliary relaxation, the images will become even more blurred than shown with the foci 1.50 D. back of the retina. But, of course, such facts as these are all unknown to the optician when his client first appears upon the scene. Let us see what the optician does know to begin with, what he is able to find out by testing the eye and what he is able to do about it. This is diagnosis.

DIAGNOSIS.

1. Enter lady apparently of 40 to 50 years, not wearing glasses but with a spectacle case in her hand.

2. History.—She tells you that her glasses don't seem to fit her any more; that her eyes get tired and she wonders if the glasses do not need changing. She can see perfectly well at distance and only wears her glasses in reading or sewing. You neutralize glasses and find they are +.50 D.'s. She says she bought them at The Fair two or three years ago, but they never fitted her well, etc.

3. Prognosis.—You hesitate to ask her age, and conclude not to, judging her to be 50, or thereabouts. If so, the +.50's would not be enough, even if she were emmetropic, so you have no right to presume or prognose anything but presbyopia of a greater amount than her glasses correct.

4. Diagnosis.—As you have not seen her before and never tested her eyes, you request her to seat herself and test her on distant reading type without lenses. You find O. U. V. 20-20, O. D. V. 20-20, O. S. V. 20-20; the astigmatic chart is equal in all meridians and distinct everywhere. She is unable to read anything but the larger type on the reading type at 13 inches.

5. Placing trial frames on and adjusting them so that the lenses, when inserted center over the pupil, and the frames are in the most comfortable position possible, you insert before each eye +.50 D. S. They make the distant vision dim and blur the type to 20-30. A pair of +1.00 D. S. blurs distant type worse. Leaving left eye covered with +1.00 D. you substitute +.75 D. for +1.00 D. in right eye, inserting the +.75 D. in forward cell be-

fore withdrawing +1.00 D. from rear cell. It improves vision of distant type slightly. Substitute +.50 D. S. for +.75 D. S. in same manner. The improvement is slight. Follow by +.25 D. S. in place of +.50 D. S. Improvement continues. Hold -.25 D. S. before +.25 D. S. This clears everything. A -.50 D. S. makes letters a trifle blacker, but no clearer. As normal vision results from +.25 D. S. -.25 D. S., which neutralize each other, your diagnosis is emmetropia. You might find slight astigmatism, but that is not to be considered here. The left eye shows same condition.

6. You ask her at what distance she usually holds book or paper or sewing and she holds at about 16 inches. If her age is 50 years and her amplitude 2.50 D., one-half of which can be used comfortably, +1.25 D. lenses should be her correction, ordinarily. You insert a pair of +1.25 D. S. She is able to read at 16 inches or beyond that point, but at a nearer distance feels strain. You change the glasses to +1.75 D. She can read at 13 inches, but not clearly any nearer, and she can see the letters distinctly at 20 inches; at 16 inches comfortably for fine print. This is her presbyopic correction.

7. She desires rimless eyeglasses, but has a flat, broad nose, with sloping sides. You try various styles of guards with unfavorable results and persuade her that spectacles would be preferable. Rimless 10 karat gold bows are selected, riding temples. P. D. 2 $\frac{3}{8}$, height of bridge $\frac{1}{8}$, $\frac{1}{8}$ back, width of base $\frac{3}{8}$, temple width and length average, angle of crest 60 degrees.

8. She inquires the price of goods with steel case. You state the price as \$8. She demurs. You reduce to \$7.50. She will see, and leaves you without ordering, but as you have a card in the window, "Eyes Examined Free," you have no legitimate complaint. She may come again another day, or maybe she won't.

CASE II.

Your next case is as follows:

Your last case was one of isometropia—

FIG. 20.

equality of the eyes. This, you observe, is slightly different. The right eye is 1.75 D. hyperopic, the left is 2.50 D. hyperopic. This is plainly shown by the pictures, where one eye is using 1.75 D. accommodation, the other 2.50 D. for plane waves or the distant object. This is quite a bit of hyperopia, but would not be serious or cause great inconvenience before the age of about 30 years. It would be a continual strain upon the ciliary and for a person of nervous temperament would be apt to be

Optical Department.

[Continued from page 54.]

reflexed to other organs, causing indigestion, nausea, headaches or even more serious troubles. These they might "doctor" for years through the ever-present all-pervading patent medicine course and finally become disgusted and go to a high priced nerve specialist, who would combine, on his own favorite basis, the same ingredients as the patent medicine contains. The effects of these "treatments" can easily be seen. They would saturate the system with drugs, perhaps, and introduce elements from far-off climes, including among other things various potent poisons, but they would have no effect whatever upon the hyperopia. At this stage it would be proper to diagnose appendicitis and to perform the operation for the removal of the vermiform appendix. This operation is performed and the patient lives, but still has the same old hyperopia he had in the beginning. Advancing years now begin to tell him that there is something wrong with his eyes. Let us see their condition when he reads, which he

FIG. 21.

may be required to do a good deal of the time, at 13 inches. Here they are:

You see that 4.75 D. of accommodation is required of the right eye and 5.50 D. of the left. The pictures represent their action when fatigued. Neither eye is able to focus light on the retina. Type or reading or near work of any kind "blurs" and "runs together," although at other times he may see near objects distinctly. It is a good case, but a very ordinary one. Your client hasn't much faith in you or your craft, but he has fear of the doctors and their bills and has exhausted other resources. He thinks his eye troubles are due to other troubles that have gone before. He don't expect to pay you much of anything or get any help from you, for your work is "free." He is accustomed to paying for "good" things.

DIAGNOSIS.

1. Enter man of apparently 30 to 40 years, well dressed, intelligent looking, but with appearance of care and trouble. Has no glasses on.

2. History—Tells you something of his story. Thinks his eyes may be a little off. Is a bookkeeper. Has to use his eyes for near work a good deal. The chief trouble with him is want of appetite—stomach is out of order; has bad headaches a good deal of the time—sick headaches frequently. Carries a bottle of bromo-seltzer in his pocket. Has never worn glasses. Thinks his eyes would be all right if it wasn't for his stomach troubles.

3. Prognosis.—Everything points to hyperopia. At his age (35) he ought to have no trouble in doing close work, but still his stomach may be the organ at fault or his liver or kidneys. These things are out of your line. You will find out what shape his eyes are in.

4. Diagnosis.—He submits skeptically to your tests. You find open vision as follows: O. U. V. 20-20, O. D. V. 20-20, O. S. V. 20-20, but not so positive. He sees there is a difference between the two eyes, which he never suspected before, and becomes slightly interested. You try him on the reading card at 13 inches. At first it blurs badly, but by looking at it steadily the letters finally come up. He feels the strain, however, and says so. The astigmatic chart appears uniform.

5. Adjusting trial frames, you insert pair of +.50 D. S. He sees the distant type quite as well, or a trifle better, and easier. You try +1.00 D. S. with the same result. You insert +1.50 D. S. and then +2.00 D. S. The latter blur up the distant type somewhat. He, however, still reads 20-30. You go up to +3.00 D. S. and that blurs everything to 20-60. Leaving +3.00 D. over left eye, you fog down the right. A +1.25 D. S. is the highest he accepts. Fogging down left eye in the same manner +1.75 D. S. is the highest lens acceptable. With either vision is at 20-20. Removing

opaque disc from the right eye, O. U. V., as above corrected, is 20-20, and the glasses feel easy.

6. With this correction you try him for near type. He sees distinctly at 16 inches or 13 inches, or even at 10 inches. He can also see distinctly at arm's length. Is surprised, but thinks the glasses may help him for reading. You tell him they should be worn constantly. He thinks his natural eyes are better and "proves" it by reading 20-15 without the glasses. You explain to him why the glasses should be worn constantly. He smiles superciliously and says he has had the advice of the best physicians. You begin to think "What a fool," but say nothing so emphatic. But you begin to talk to him about the effects upon him of such uncorrected hyperopia, and any man with knowledge can make an impression. He decides to try the effect of your glasses. When you tell him they will cost \$15 he begins to feel something like respect for you. You are simply charging him a fair price for your "talk."

7. You receive his order. The frames are duly fitted and the goods gotten ready and delivered. These glasses, although they do not cover the full hyperopia, will prove a great relief and blessing to him. You may change the lenses to the full amount a little later. The anisometropia may make it necessary to harmonize one eye with the other by reducing or increasing the correction of one of them. But \$15, less the cost of the glasses, doesn't represent the benefit you derive from the case. Others come who have heard this skeptic's story. No doubt his "stomach" troubles will abate greatly or disappear altogether. He'll lay that to the last bottle of patent medicine he took, not to the glasses. But the glasses are good enough of themselves.

(Series to be continued.)

Optical Briefs and Notes

J. W. Arney, optician, Green Bay, Wis., will devote attention to De Pere, Wis., one day a week.

Harry Shellenberger and George C. Allis, Shelton, Conn., are completing optical studies in New York.

The optical business belonging to the estate of G. B. Lichtenberg, Kansas City, Mo., has been sold out.

A. H. Towle, of Grand Rapids, Mich., has purchased the business of the Chicago Optical Co., Lansing, Mich.

C. T. Loudon has recently opened a jewelry and optical store in Rushville, N. Y., and not in Geneva, N. Y., as previously reported.

W. D. Fennimore, vice-president of the California Optical Co., San Francisco, Cal., has just returned from a four months' eastern trip.

H. C. Pratt, formerly optician for the Jaccard Jewelry Co., Kansas City, Mo., who went to Birmingham, Ala., last Winter, has returned to Kansas City.

A. Bollack, of the Standard Optical Co., San Francisco, has gone south for a six weeks' trip. He had just returned from the best northern trip he ever had.

O. P. Bourbon, who had an optical store at 1202 Grand Ave., Kansas City, Mo., has moved to 202 E. 12th St. and will occupy a part of the store of the Gem Jewelry Co.

E. Holsworth, a former Philadelphian, latterly instructor in the optical department of the Ezra F. Bowman Technical School, Lancaster, Pa., has resigned his position and gone back to Philadelphia.

A. I. Agnew, manager of the Columbian

Optical Co., at Omaha, Neb., spent several days in Des Moines, Ia., last week, visiting the office there on his way east to Buffalo.

A. Kohen, a traveling optician, was in Kansas City, Mo., the past few days. He left the first of the week for Buffalo, N. Y., where he expects to assist in one of the exhibits.

A large addition to his floor space has been made by G. H. P. Stone, Ilion, N. Y. A new dark room for optical work and a new steel ceiling are noticeable features of improvement.

Ben Marsden, salesman for D. V. Brown, wholesale optician, Philadelphia, Pa., made his first trip through Pennsylvania last week since he was so badly injured in the Erie railroad wreck about seven weeks ago.

Will Clark, St. Cloud, Minn., who has been taking a course in optics at the Bradley Polytechnic Institute, Peoria, Ill., has concluded to remain another month, and will take advanced work in optics and engraving.

The Columbian Optical Co. have purchased the fixtures of G. B. Lichtenberg, optician, who had rooms in the Altman building, Kansas City, Mo. The Columbian Co. are now using for an office the entire room which they formerly used as a workshop.

O. H. Dearing, traveler for the Merry Optical Co., Kansas City, Mo., whose territory is Arizona, New Mexico, Colorado and western Kansas, has just returned from a very successful trip. John J. Brands, who represents the Merry Optical Co. in Missouri and Kansas, has returned from his first trip.

Carl B. Rickarts, a son of jeweler Charles W. Rickarts, Rochester, N. Y., who has served in the army in Cuba and the Philippines and who only returned from the latter place in the early part of April, is at present at the Philadelphia Optical College, Philadelphia, taking their three months' attendant course.

The California State Association of Opticians held their quarterly meeting in San Francisco, April 14. By-laws were adopted and A. J. Shoey was elected as recording secretary and J. Rinner as financial secretary for the unexpired term. The next meeting will be a two days' session, beginning the third Monday in July, for the display of optical instruments and goods.

Earle Eli Barnet, Kansas City, Mo.; Al-

fred Hickman Price, Minneapolis, Kan.; Cora Anna Ilkehans, Armourdale, Kan.; Jessie Mae Hamblen, Santa Fé, N. M.; Mary Elizabeth Dodderidge, Kansas City, Mo.; Edward L. Chamberlain, Kansas City, Mo.; Mary Agnes Anderson, M.D., Freemont, Neb., and George Elliot Edwards, Kirksville, Mo., are recent graduates from the Southwestern Optical College, Kansas City, Mo.

Dr. J. Will Terry, of the Columbian Optical Co., Omaha, Neb., who has been spending several months in El Dorado Springs for the benefit of his health, stopped over in Kansas City, Mo., last week on his way east. Mr. Terry was married at El Dorado Springs, on April 15, to a young lady of that city and they are now taking a wedding tour. They will visit Buffalo, N. Y., before returning.

The optical catalogue of Oskamp, Nolting & Co., Cincinnati, O., is out and is being mailed to the trade. It is not only a very comprehensive book on this line of goods but it is so systematically arranged as to immediately direct the optician to the goods he wants. Harry Emrie, who has charge of the optical department of this house, has for months been at work in getting the catalogue classified and has made an ideal volume for opticians.

John S. Miles, 33 years old, of Brookline, Mass., was arrested, last Wednesday afternoon, on the charge of embezzling \$1,500 from the Lamb Eyeshield Co., 510 Albany St., Boston, Mass. He was employed by Benjamin F. Lamb, the proprietor, and was well connected in Brookline. Miles had complete charge of the books of the company and when a discrepancy was discovered Miles was arrested. Through the assistance of friends the District Attorney's office was persuaded to *not prosequere* the case. It is presumed that a settlement was made with the Lamb Eyeshield Co.

Moses Drury died last week at Paterson, N. J., aged 87 years. About 1835 he learned the trade of watch and clock maker at his home in New Hampshire, but he did not follow that work long, for he removed to Florida and established a boot and shoe business. Soon after he moved to New York and had a boot and shoe shop in the lower part of the city. About 1859 he moved to Paterson, where he had lived since.

Time and Distance Meter for Hackney Vehicles.

MR. KRATZ-BOUSSAC has brought to the notice of the authorities a model of a horo-kilometric meter, called a taxameter-indicator. This apparatus has been already operated in several towns of Germany and Central Europe and met the necessary technical conditions. His application for eight licenses for 160 vehicles has been examined by the Municipal Council and the Préfet of the Seine has authorized its

The mechanism of the taxameter is enclosed in a metallic box and is perfectly protected from moisture and dust. It adapts itself with ease to the different forms of vehicles and to all the local exigencies. The transmission may be mechanical or pneumatic. On the left is the indication of the price of the ride in francs and centimes; beneath, the extra charges; at the right, the rate to be paid. The traveler has only to compare the rate charged with that printed and suspended in the carriage. In any case, a sum higher than that indicated on the dial in the part, "price to be paid," and

without first raising the flag indicating "free." Likewise it is impossible for him to put the register in use without first lowering the flag.

A button, placed beside the handle and turning in the same direction, permits the marking of the allowable extras for baggage, passing beyond the fortifications, etc. These extras can only be recorded while the apparatus is in use. Besides the list of fares and extras which concern the traveler, the dial bears lists of four totals for the information of the owner of the vehicles. These consist of a register of the daily receipts, of the extras, of the number of trips and of the kilometers traveled. When the taxameter is placed in service the fact is recorded and the successive changes are increased by steps of 10 centimes. This arrangement results in rendering short courses better paying. In longer rides the rates are essentially those of other carriages for hire.

The apparatus consists of a system of transmission from the rear wheel. When the vehicle is in progress a pneumatic pump moves, by means of a lever, a notched wheel, one notch for each revolution, the notched wheel corresponding to the periphery of the rear wheel of the vehicle. A train of gearing actuates a fork, mounted on a bracket on the outside, and connecting with the taxameter, which is supported by the same bracket. This connection is by means of a transverse pin on the lower side. The pin is on a shaft which, by means of gearing, works an endless screw, moving the wheel of distances. This wheel actuates another on the same shaft, whose teeth raise and lower an oscillating lever. The lever works by means of mobile cones, the wheel of *decimes* (tenths) advancing one tooth marking 10 centimes for each course of 400 meters. On the axle of the distance wheel is also placed the time wheel, controlled by clock-work.—Translated from a French exchange.

TIME AND DISTANCE METER AFFIXED TO A VEHICLE.

attachment under conditions to be specified later.

The taxameter, as the illustration shows, is an apparatus having a dial for registering both the distance traversed and the time occupied. By an ingenious combination it also indicates the price to be paid, the extras, if any, and the fixed rates. It is kept in action during the ride by one of the wheels of the carriage; when this stops, it is actuated by clock-work. It registers in visible figures the price of the journey, according to the kilometers traversed, and the price of the stops, according to their duration, combining automatically these two figures, so that the sum appears instantaneously and legibly.

the "extra," if any, cannot be charged.

While the carriage moves at a walking pace, either by request of the traveler or by reason of an ascent, as well as during a stop on the traveler's account, the clock-work movement intervenes and maintains the price at a definite rate. The manipulation of the machine by the driver is by means of a handle behind the register, and consequently turned toward the seat. This handle is mechanically connected with a signal placed on the side of the register and visible at a distance. This signal consists of a red flag, bearing in white letters the inscription "libre" (free). The mechanical combination makes it impossible for the driver to keep the apparatus out of use

A Human Sun Dial.

WHEN I was living in Essex, 30 or 40 years ago, says a correspondent to the London *Spectator*, the laborers, few of whom had watches, used to make of themselves the gnomon of a sun-dial in the following primitive fashion: The furrows of the fields were always ploughed north and south as far as possible, to allow of the sun's rays getting between the drilled rows of corn or root. When, therefore, their own shadows fell full along the furrows, they used to strike off work and go to dinner.

A Buffalo Watch.

THE unique "Order of Buffaloes," now spreading itself over the country, has been responsible for many queer things in its short existence. Like many fads, it has had a bearing on the jewelry business and several manufacturers are now producing and selling Buffalo rings and Buffalo pins in such quantities as to make these lines quite prominent features of their business. But Edward E. Pidgeon, who claims the honor of being Chief Brander of this peculiar organization which has no corporate existence, has an

President McKinley visited Buffalo and drove the first stake upon an island in the Niagara river where, at the time, it was proposed to hold the exposition. The Spanish war intervened and put a temporary stop to the Pan-American idea, and when the subject was again taken up it outgrew all original proportions and it was found impracticable to carry out the original scheme. In the meanwhile the watch, which was to be an exhibit of the highest attainment of the jeweler's art and typical of the city, had been made at a cost of \$700, the order having been placed with one of New York's most prominent jewelers, of whose trade exhibit it was in-

BUFFALO WATCH OWNED BY "CHIEF BRANDER" EDWARD E. PIDGEON.

insignia of the "order" such as no manufacturer is likely to duplicate often or other men to purchase. It is a Buffalo watch, with a history which runs this wise:

The watch is hand carved and is a marvel of the watchmaker's and engraver's handicrafts. It was ordered three years ago when the Pan-American Exposition was first talked of as a Buffalo international function. It was at this time that

tended to form a part. Since then it has been in a safe deposit vault until Mr. Pidgeon saw it and acquired possession of it, on account of both its oddity and especial significance of the "order" to which he belongs, and the Pan-American Exposition of which he is eastern chief of publicity. Mr. Pidgeon is now located in Boston, Mass., and carries the watch daily. The illustration shows a good view of the engraved case.

Accurate Clock for a Cleveland School.

RIEFLER, of Munich, the celebrated maker of astronomical clocks, recently completed a chronometer for Case School, Cleveland, O., which cost \$1,000 and is the only one of its kind in this country. This timepiece is a veritable wonder for accuracy, as it will reduce the total of all errors arising from three different sources to less than one-hundredth of a second. It will be used in connection with the almucantar, in Dr. Howe's original research work.

The whole clock will be enclosed in two bell glass cases, one for the works, which will be fastened to a bracket in the wall, in order to eliminate errors of vibration. These errors result from anything which may jar or shake this instrument in the least. For instance, the footfalls of a man walking on Euclid Ave., over 30 feet away, are sufficient to have perceptible effect on such an instrument. The fact that the air is not always of a uniform weight gives rise to another source of error in clocks, because it is harder for the pendulum to sway back and forth in heavier air than in lighter; so this must be obviated to secure absolute results. In the new clock, this will be achieved by enclosing the pendulum in another bell glass case which is air tight. An air pump will then exhaust part of the air from the field through which the pendulum swings, so that it will always be of exactly the same weight. The third source of error arises from variations of the temperature in the room in which the clock is kept. The new clock will be kept in a small room, with very thick walls, and artificial heating will keep the heat uniform every minute in the year. A Cleveland man is the donor of the clock, but refuses to allow the publication of his name.

The United States Watch Case Co., manufacturers of solid gold cases, Cincinnati, O., are at work on sample cases and will have out in a few days a lot of 80 sample hand engraved special cases. They are prepared to fill any order for special work.

THE RAMBLER'S NOTES.

WHAT THE RAMBLER SAW AND HEARD AMONG THE DEALERS IN ART POTTERY, CUT GLASS, BRONZES, ETC.

F. KROEBER & CO., 14 Maiden Lane, New York, whose salesrooms

have for many years been looked upon as headquarters for cuckoo clocks, report that the finest varieties of these clocks are at present proving most successful with jewelers. Elaborately carved hanging clocks—in particular, those covered with leaves and decorated with stags' heads, birds and other game—are having a ready sale, while the plainer and less expensive pieces no more than hold their own. This firm's assortment at present is very fine and includes many sizes of clocks—cuckoo alone or cuckoo and plain—in which dark wood varieties predominate.

TWO NEW CUT GLASS PATTERNS.

TWO new patterns in the cut glass of the International Silver Co., now to be seen at the company's New York salesrooms, 9-13 Maiden Lane, show novel features that will interest all dealers carrying art glass. The first, known as the "Chummy," has no large cutting, but consists of a mass of fine detail work composed of vertical divisions filled alternately with small rosette stars and hobnails. The second, appropriately named "Garland," has as its salient feature four crescent festoons holding plain concave lens cuttings of graded sizes, filled in with checkerwork. Both cuttings are of high grade and now appear on all articles common to cut glass. In silver mounted glass ware a complete and beautiful assortment is here to be found, which is notable for the large variety which it numbers in small pieces, such as scent bottles, perfume vases, cruet pieces and like articles.

LAMPS FOR THE SUMMER SEASON.

WITH the Summer season comes the demand for fine lamps suitable for country homes, and dealers wishing to complete their assortment will be interested in the new lines which the Bradley & Hubbard Mfg. Co. will put on the market within a few weeks. These lamps will, as usual, be found in a full assortment of shapes, sizes and finishes at

the company's New York salesrooms, 21 Barclay St. and 26 Park Place, where, in addition, will be shown at the same time their latest colorings and finishes in vases and other art metal ornaments which they manufacture for the jewelry trade. Their American imitation bronzes will, of course, receive additional subjects and finishes, as will their small fancy articles, such as mirrors, bonbon boxes and jewel cases.

PORCELAIN SOUVENIRS AND FAVORS.

JEWELERS having a demand for small articles suitable for card prizes, cotillion favors and banquet souvenirs will do well to put in an assortment of the many pretty novelties in china and porcelain which importers and domestic manufacturers generally are showing. All indications point to the fact that these wares are not only growing in demand for the uses above mentioned but that china and pottery have already made, and will continue to make, inroads on other materials as a substance popular for favors and prizes. The souvenir of the banquet of the 117th anniversary dinner of the Society of the Friendly Sons of St. Patrick, held in New York recently, indicated this tendency, being a pretty, white porcelain cross and base, made for this occasion by the Ceramic Art Co., Trenton, N. J. New York dealers report that the demand for china novelties suitable for whist and euchre prizes is growing every day.

THE RAMBLER.

Glass Exhibit at the Paris Exposition.

CONSUL Hughes sends from Coburg, March 21, 1901, translation of a speech made before the Technical Union of Hirschberg on artistic glass ware at the Paris Exposition, from which the following notes are taken:

The French glass exhibit showed the intelligence, inventive genius and assiduity of this people. The factory of St. Gobain, in particular, had a fine display. Seventy-seven million kilograms (77,000 tons) of glass were used in 1900 in its 10 branches, against 41,000,000 kilograms (41,000 tons) in 1889. It produces 30 per cent. of the entire output of glass in Europe. Among other things, it had a mirror eight meters (26.4 feet) high and four meters (13.2 feet) broad, and it was stated that it could have been furnished of still larger size if transportation facilities had been available. This firm's principal aim is to use glass as a building material. The broad area of 2,500 square meters (26,900 square feet) above the railway tracks in front of the Esplanade des Invalides was covered with glass flagstones, which, though exposed to the open air, sustained the enormous freight traffic

during the exhibition. In the "Palais Lumineux" the factory of St. Gobain erected a building which, if it did not show the practical use of glass in construction, yet in its fantastic shape, when lighted by electricity, produced a fairylike effect. A number of important technical innovations, as wire glass, glass troughs for accumulators, colored glass, etc., are connected with the name of Leon Appert, president of the Society of French Engineers. There are now employed in the glass industries of France 42,000 men. Emile Galle, of Nancy, is hailed as an artist and technical expert in this line, manufacturing glass vases in almost perfect imitations of nature.

There was little representation from England or America in this line, which is to be regretted, as a good occasion was offered for comparing the glass industries of foreign countries. Tiffany had some examples of enamel on copper which were remarkable and beautiful, and in hollow glass ware the new colors exhibited by him were the delight of connoisseurs.

The German glass concerns did not exhibit largely, though Seivert & Co., of Dresden, took the grand prize for hollow glass ware articles blown with the help of mechanical apparatus—for instance, a bathing tub; its punched glass, glass sheets decorated with colors by rollers, etc., were also highly praised.

Prices of Sevres Pottery.

THE prices obtained for Sèvres work have always been high, but of late years those of the old ware have attained the gigantic. Single plates have been sold for £200 and cups and saucers for £150 each, but I believe the record price to be £10,000 for a set of three small jardinières, which were sold by auction at Christie's not many years since. The Queen possessed a replica of this set in "Rose Dubarry," which is even finer than that mentioned above. The dessert service belonging to the Queen and now in the Green Drawing-room at Windsor is valued at £60,000. It is complete with the exception of one plate and was made for Louis XVI., but after the revolution was sold to George IV. Hard or true porcelain, which may be distinguished from *pâte tendre* by the crude and less brilliant appearance of its coloring, has been made at Sèvres since the discovery of kaolin in France about 1770.—*Leisure Hour.*

High Prices for Old Porcelain.

PORCELAIN sold well at Christie's, London, recently. An old Worcester dinner and dessert service, painted in medallions with emblematical and classical subjects, and presented by George IV. to the King of Hanover, realized £1,053 13s.; and a pair of oviform Chelsea vases, with beaker shaped necks and foliage handles, dark blue ground, richly gilt with peacocks and pheasants, 1,180 guineas.

CLEANING BIFOCAL LENSES.

THERE are many forms of bifocal lenses, from the "split" glasses, invented by Benjamin Franklin and, consequently, so named, down to the present cement bifocal.

The dirt which accumulates between the former form of bifocal lenses is easily removed by taking the glasses from the eye frames and wiping them with tissue paper. The cement bifocal, which is very popular at present, is very neat, but it has several serious drawbacks. In wiping these lenses great care must be taken that the heat and friction do not cause the segments to become loosened from the distance glasses or the space between will be obscured by vapor bubbles. Another drawback is the fact that a sudden jar is liable to cause "Newton's rings," a beautiful iridescent phenomena, which present all the colors of the rainbow when the glass is held in a favorable position.

To clean these lenses it is necessary to remove the dirty or spotted cement which unites the two parts of the lens and re-unite them with new cement—Canada balsam. Many prefer to use the cement prepared by optical companies. Canada balsam, however, is the nicest form, as it is put up into tubes and a drop can easily be pressed out whenever wanted. In cleaning lenses of this description it is necessary to take the lens from the eye frame and to remove the segment from the larger glass by slightly heating the latter on the side opposite the segment. Both pieces are allowed to cool, after which they are cleaned with alcohol and wiped perfectly clean and dry with a soft rag or tissue paper.

The large glass is then held in a pair of tweezers and a drop of the cement is placed on it. This is heated over a small alcohol flame—but not allowed to ignite—until a vapor is given off, at which time the segment should be applied to its proper position and pressure given to force all bubbles from between the two glasses. If, however, spots or bubbles remain, remove the segment and, after cleaning both glasses, repeat the operation. The cement, after heating, becomes hardened in a very short time and can be chipped off with a graver or scraper. The residue is removed by the use of alcohol and a medium stiff brush.

BROOCHES A SPECIALTY.

JEWELRY REPAIRING.

There is nothing, aside from personal attributes, which more easily makes or mars a jeweler's reputation or affects his trade than the character of his repair work. It is not more difficult to do a job nicely than it is to "botch" it, if care and judgment are exercised in the work. To become expert at jewelry repairing the workman should be able to see at a glance exactly what is necessary to be done in each job and then do that in the best and quickest manner possible.

Many jobs in themselves are not worth the repairing, but the owners prize the articles for the sake of associations, of which the repairer knows nothing, and for this reason, as well as for his reputation, the jeweler should not slight the meanest job.

Replacing a Pin Tongue.—Replacing a broken pin tongue in a brooch is considered an easy matter and so it is if the work is done in the right manner. In many cases the pin tongue is broken off at the joint. The first thing, then, to be done is to remove the rivet from the joint. This may be pushed out with the tweezers or any other point, and if it does not yield to this treatment use the rivet pliers. The rivet removed, select a pin tongue whose joint is about the same size as that of the joint on the brooch and cut it to fit into the joint. Then hold the brooch with the top side down and in this position the catch will be nearest the body of the workman. Then, with the right hand insert a round brooch—the round ones are the best, as they stretch the stock instead of cutting it—into the joint and through the pin tongue joint until the end appears on the left side of the joint. Then care must be taken that the pin tongue will move up and down on the brooch—which serves as the rivet—without causing the latter to move. When this is satisfactory, remove the brooch and, if necessary, cut the pin tongue to the required length and rejoin it. This is done by placing the tongue in a small pin vise and laying it in a groove on the bench pin and giving it a rotary motion between the thumb and forefinger of the left hand, while a fine file is passed back and forth over it with the right hand. This done, the rivet is filed in the same manner, excepting that the taper is not so acute, and inserted from the right, always; and when the pin tongue will work nicely—not too tightly or too loosely—without causing the rivet wire to move, cut off the ends close to the joint with a pair of cutting pliers or a saw and file them off smoothly, but not quite even with the joint. Then finish by hammering them lightly on each end, so as to prevent any possibility of their working out.

To remove a rivet that has been inserted in this way hold the brooch so that the catch will be farthest from the body and file the right side of the rivet and then force it out with the pliers. All rivets in new work, as brooches, locketts, match safes, watch cases, etc., are inserted from the right, and when this is fully understood the repairer will not have much trouble in removing rivets.

(To be continued.)

THE MAKING OF LOVING CUPS.

A BEAUTIFUL loving cup was presented to John F. Miller, retiring superintendent of the Indianapolis division of the Pennsylvania Railroad Co., by the employes of that division, recently. The cup is set in a heavy silver platter and stands about eight inches high. It is of solid silver inlaid with gold. It is heavily embossed and has three handles of handsome design. On

hours—660 feet long, 50 feet high and strong enough to bear all the loaded trains that could be pulled onto it. It was built to take the place of one destroyed by the Johnstown flood and is considered a great engineering feat. The third place on the

Capt. E. Merle Bixby, commander of the First Machine Gun Battery, of the R. I. State Militia, has given a handsome silver loving cup to be contested for by the various military organizations of the State. The company having the largest number of men to win marksmen's medals the coming season will win the cup, which is an excellent example of art in silversmith-

LOVING CUP PRESENTED TO JOHN F. MILLER, OF THE PENNSYLVANIA RAILROAD CO.

one side of the cup are the emblems of Mr. Miller's early experience as a railroad brakeman—lantern, switch keys and coupling link and p.n. A third of the way around the cup appears the bridge he constructed at Johnstown, Pa., in 48

cup shows Mr. Miller's private car, one of the finest in the United States. All are handsomely inlaid in gold. The cup was furnished by P. C. Krouse & Co., of 232 N. High St., Columbus, O., who have received many compliments on the work.

ing, standing 15 inches in height with a base of ebony. The cup is graceful in design and suitably inscribed with a reproduction of the guidon of the Machine Gun Battery. The cup is from the Bixby Silver Co., Providence.

THE NEWER SILVER WARE.

A LADY'S RAMBLES AMONG THE JEWELERS.

The wedding season inaugurated with Easter week has brought silver ware into increased prominence, for, in spite of fashion's passing fluctuations toward other things, this remains the *pièce de résistance* in gifts for matrimonial occasions.

*

Nothing more strikingly characterizes the newer work in silver than what has been called the "natural growth" movement. This seems to be one phase of that influence which reveals itself in the "new art" jewelry. The ornamentation of silver ware is generally grouped under two styles—the conventional and the natural. When nature's order of development in a plant is disregarded and the parts of an object serve only as a basis for forms evolved by the designer's fancy, the treatment is conventional; where there is exact imitation of an individual growth it is "natural." The new method confines itself neither to one nor the other of these. It follows nature, yet not slavishly. The natural habit of the flower or plant is kept in view. All its parts—stem, leaf and blossom—are utilized; not, however, in such a way as to give the impression of a separate applied adornment, but so that the lines of the design blend with the constructional lines of the object to be enriched. Take, for instance, a silver vase. Up the side of its slender, bell shaped body, and dividing it into three

sections, run stems and leaves of wild rose, ending in blossoms above. These shoots spring from a tangle of branches at the base of the vase; through part of their career they are in high relief or even separated from the body of the vase, as are the flowers. Still better, as an illustration, is a fancy spoon, whose handle is in its middle portion, a twisted vine which spreads out at the top into flower and leaf forms and at the bottom throws out leaves upon part of the bowl.

*

The new art has been described as an attempt to reduce all forms, both the constructional and the ornamental, to the curve—the line of beauty. It employs the constituent elements of a plant but so arranged as to suggest some fantastic vegetable scroll device. This kind of decoration might be taken for a design that had developed under the easy, distinctive play of a hand and eye that abhorred the straight line and wandered freely in all ways of grace. Curves long drawn out and slow, curves short, quick and sharp, curves in fascinating series and in indescribable compounds rule in the kingdom of new art. Thus it comes that the trail of the serpent is over so much of this art, and all sorts of vines, the honeysuckles and the roses, run riot therein.

*

To dwell upon the prevalence of plant and flower ornament in present high class silver designing would be superfluous; it is the character alone of the design that

claims attention. In complete harmony with the method of which a partial description has just been attempted, is a bread tray—the work of leading American silversmiths. This tray is of graceful oval shape and its sole adornment is a raised border of the wheat plant, the stems, leaves and heads of grain being exquisitely rendered. Now, wheat at first thought might be considered a very stiff *motif*, yet it is here manipulated to follow the beautiful outline of the tray and becomes in every part a thing of curves, with never a sharp angle nor straight line to mar its fascination.

*

Genuine handwork, which gives individuality to each piece, is, of course, the acme of artistic silversmithing, and next to this comes such a departure from the usual machine made patterns as shall suggest, as nearly as possible, the hammering up of the ornament by hand from the flat. The new art style of decoration facilitates this purpose. A beautiful design for a rose bowl in such style consists of three repeats of iris leaves and flowers arranged in rounded and flowing lines, which enhance its decorative effect.

*

The coloring and shading of silver ware has become a thing to be distinctly studied. The newest touch is the very dark, almost black shadow, introduced into the center of flowers and around and between the raised portion of the design.

*

The elaborations of new art, it is but fair to say, represent only one, and, per-

CHAS. L. TROUT & CO.,
5 and 7 Maiden Lane, NEW YORK.

haps, not the greatest, phase of silver ware designing. On the other hand stands severe simplicity, made even more charming by contrast. Nothing could be plainer than a tiny beaded edge carried across the top and along both sides of a fork or spoon handle. Yet this is a very taking pattern and prevails throughout a huge chest of wedding silver.

Among odd pieces for wedding gifts are lettuce forks, asparagus racks, celery trays, bread and toast forks, fruit dishes, grape dishes and scissors, tea balls, macaroni knives, olive dishes, toddy kettles and spoons, as well as other forks and spoons for innumerable purposes.

In tea and coffee sizes the golf spoon makes a popular souvenir.

Dessert knives include ivory, pearl, silver, gold plated and decorated Dresden handles.

The extent to which gilt is now employed, not only as lining but as the entire finish for various fancy dishes, forks and spoons, is remarkable; rich enameling colors is also often combined with it.

Bonbon dishes in a case make a pretty little gift. One of the newest is in French gray finish, with a floral border, which, if not hand wrought, might pass for the same with all but the initiated in art.

The day of the silver candlestick has

undoubtedly come again and a pair of these make a very useful wedding gift. Queen Anne and Colonial models complete the harmony of this revival. Among simple designs nothing is prettier than the fluted column. Eight or nine inches high are some of the candlesticks and they are elaborately wrought.

Queen Anne and Colonial remain standard tea set patterns, but of late other old English designs have been introduced, among them the Georgian. Few things could be quainter than the James I. style, each piece a compound of comfortable curves. Short legs are attached to the rounded base of squat tea pot, broad, shallow sugar basin and fat little cream jug of a set in this fashion.

Spiral fluted tea sets represent a safe and pleasing style, though no novelty can be claimed for them.

Among successful new table pieces the combined fernery and candle holder takes the lead.

Berry sets bear off the palm of timelessness. They may include a bowl and spoon in a case; a berry spoon, sugar sifter and cream ladle in a case; a spoon, sifter and 12 berry forks or several other combinations.

Low berry bowls are eight to nine inches across and come in chased or pierced silver.

"1835-R.WALLACE"

Stamped on an article of Silver-plated ware is a guarantee of worth and quality.

Every dealer, when selecting a line of plated ware, always has in mind two leading qualities, and these usually are durability and design, as these are the ones on which most depends his reputation as a dealer in honest ware.

Our goods are made of the highest grade of Nickel Silver, plated with FINE Silver. Our extra, or A 1 grade, is plated 20 per cent. heavier than the regular standard. Triple and sectional plates are also carried in stock.

In designing patterns we endeavor to select only such as are graceful in outline and thoroughly artistic in decoration, and which conform most closely to the taste of a discriminating purchaser, which our long experience enables us to do.

Our line consists of the following patterns: Tipped, Fiddle, Windsor, Shell, Joan, Virginia, Astoria, Stuart and Anjou.

Any dealer who is not already familiar with our line will find it much to his advantage to write for Catalogue and discounts.

DIAMOND CUTTER

and **POLISHER** FOR THE
 TRADE.

Rough Recutting, Repairing and
 Matching a Specialty.

The Diamond Markets.

ANTWERP, April 12.—On account of the Jewish and Christian Easter holidays of last week and this, the diamond market was very calm. Polished goods are finding buyers because the prices are favorable. Within a week or two buyers will be obliged to pay higher prices, as the stock of rough goods will then be very small. Notwithstanding the holidays we had several buyers here, including Mr. Hoffmann, New York, who bought lots of méléés, and S. H. Levy, of L. & M. Kahn & Co., New York, who left for Amsterdam.

The *Amsterdamsche Diamantbewerkert*, an Amsterdam newspaper, says, concerning the erection in Antwerp of the statue to Lodewyk Beicken, the inventor of diamond polishing, that this man never existed. This is false, the statement being due to the jealousy existing between Antwerp and Amsterdam. Besides the honor to the memory of Beicken, it will bring financial profit to Antwerp to erect such a statue. The committee in charge are making good progress, large subscriptions having already been received.

A new machine for cleaning rough diamonds invented recently in America, that is said to give very good results, will soon be employed here in one of our largest diamond shops.

AMSTERDAM, April 11.—It can certainly be said now that we have entered upon a new period of firmness. A very good demand for méléés rules in our market and sales were numerous, notwithstanding the Easter holidays. Samuel H. Levy, of L. & M. Kahn & Co., New York, arrived here after a visit to the Antwerp market. Other American buyers are expected to arrive in May.

News is received from Hanau, Germany, that the trade is much better there. The shops are working more than last year and a new syndicate has been formed which, it is expected, will maintain itself more successfully than its predecessors.

LONDON, April 11.—The rough market is much better now and the same can be said of the polished goods. The situation of the diamond industry is becoming better and better, notwithstanding the continuance of the war in the Transvaal. American buyers are awaited and dealers are hoping to do a large business with them.

An excellent inquiry rules for very white pearls and fancy colored stones, the prices paid for this merchandise showing new rises.

American firms are giving orders, especially in Wesselton and Jagersfontein diamonds, and they also ask for crystals and silver capes.

THE CHATHAM NATIONAL BANK, NEW YORK.

H. P. DOREMUS, Cashier.

GEO. M. HARD, President.

W. H. STRAWN, Ass't Cashier.

Jeweler in Politics Accused of Shortage in Post Office Accounts.

KANSAS CITY, Mo., April 26.—Charles L. Frost, formerly a jeweler of Odessa, Mo., but recently a prominent citizen and politician and since 1898 postmaster of Odessa, was indicted by the Grand Jury, Wednesday, charged with embezzlement. He was arraigned before Judge John F. Phillips, of the United States Court, and on motion of his counsel the case was continued until the November term.

The amount of the alleged shortage is \$159 and it was discovered in February by Assistant United States Post Office Inspector O. B. Weik. The office at Odessa is in the third class and pays a salary of \$1,400. The postmaster is required to furnish bond for \$500 and Frost was released upon a continuation of this bond.

Prior to being appointed postmaster by President McKinley, Aug. 1, 1898, Frost was a leading jeweler of Odessa, where he went from Kansas City, several years ago. He also ran a jewelry store in Kansas before going to Odessa. He has made good the shortage, it is said.

Anchor Silver Plate Co. Answer Charge of Violation of Alien Labor Law.

MUNCIE, Ind., April 24.—The Anchor Silver Plate Co. have filed an answer to the complaint filed against them a month ago in the United States Court, charging violation of the alien contract labor law. It was said in the complaint, which was filed by District Attorney Wishard, that the

company made a contract with Frank Haywood, of Toronto, Can., in which they agreed to pay Haywood \$18 a week. The District Attorney says Haywood's expenses to Muncie were paid in August, 1899. Owing to the violation of the law, Mr. Wishard says, the company are indebted to the Government in the sum of \$1,000, and he asked the Court for judgment for that amount.

The company, in their answer, demur to the complaint and give a number of reasons. The chief reason given is that an engraver is not a laborer within the meaning of the law. It is held that it is not a violation to bring an engraver into the country under contract, although it is not admitted that Haywood was brought in.

In explaining the difference between a laborer and a skilled engraver, the company say in their demurrer: "It is the educated brain, not the developed muscle, which brings about the desired result. An intention to exclude highly skilled men who perform such services, from this country, would involve an absurdity and could not with propriety be imputed to Congress."

The company, in support of their claim, cite the case of the New York Store, Indianapolis, the proprietors of which imported a skilled window dresser. In that case the Court held that the window dresser was not a laborer and the law of exclusion does not apply to highly skilled workmen.

W. B. Clifton has engaged in the jewelry business in Pocatello, Idaho.

Coming International Exposition of Modern Decorative Art at Turin.

WASHINGTON, D. C., April 24.—According to mail advices received here, an international exhibition of modern decorative art will be held in Turin next year between April and November. The committee who initiated the present proposal have united with the committee who organized the exhibition of 1898, the presidency of the general committee thus formed having been accepted by the Duke of Aosta. The exhibition will include all artistic embellishments for the interior of houses. It will also include an infinite variety of picturesque decorations for houses, such as glass ware, mosaic, metals—cast, forged and chased—repoussé work, gold and silver wares, medallions, seals, monograms, clocks and of everything that can furnish an example of æsthetic taste as applied to familiar objects. Reproductions of antique styles will be excluded, as also will copies of historical objects and the productions of arts and manufactures not inspired by an artistic taste. The exhibition must have a modern character without excluding, however, the productions or the elements of antique art adapted in a new manner to modern needs.

The committee have decided that exhibitors are not to pay for the space occupied by them, but only a small registration fee. The exhibition of 1902 will be held in the Valentino Park on the left bank of the River Po.

PEARLS.

Business Reasoning.

In doing business with "specialists" devoting all their time and attention to but one line of goods, the dealer reaps all the benefit of the specialists' expert knowledge.

Jeweler, Sued for Rent, Enters a Counter Suit for Services.

CEDAR RAPIDS, Ia., April 23.—R. B. Stevenson's jewelry stock was attached last week, for rent for \$171, by F. M. Ottmar, in whose shoe store Stevenson has had one window and counter room for some months. Following the attachment, Stevenson brought suit against Fred. M. Ottmar, who has been running the shoe store for some months, claiming the sum of \$1,250 alleged to be due plaintiff on goods sold by defendant to plaintiff's customers, while assisting in waiting on the trade, all of which the defendant denies most strenuously.

Stevenson is the young man who reported to the police, some months ago, that his place had been robbed during the night of several hundred dollars' worth of watches and other valuables, but he could not supply the numbers of the watches which he claimed were missing and the officials dropped the case without investigation.

Recognized Stolen Watch and Caused Arrest of Thief.

BATAVIA, N. Y., April 24.—The alertness of Mr. Prescott, of Austin & Prescott, resulted in prompt return of a stolen watch and the arrest of the thief. A young man of the town entered the store and asked for the loan of \$1 on a ladies' watch, which Mr. Prescott at once recognized as one which he sold last Christmas to J. J. Ryan and which had been given to Mr. Ryan's daughter as a present. He refused to make the advance, but immediately notified Mr. Ryan, who discovered that the watch had been stolen from his daughter's room that afternoon and dispatched his bartender in quest of the man, who was found and who gave up the watch, a fine gold one, on demand. He had been working around Mr. Ryan's hotel, but had been discharged a short time before.

Incorporation of the Howard Watch Co.

TRENTON, N. J., April 25.—The Howard Watch Co. have been incorporated. The capital stock, \$125,000, is divided into 1,250 shares. The incorporators and the number of shares held by them are: Ernest Stanley Smith, eight shares; John Reginald Turner, one share, and Edward T. Magoffin, one share.

Death of Peter Smith.

HASTINGS, Minn., April 25.—Peter Smith died Sunday, at the advanced age of 81 years. He was a native of Germany and located here in 1855, being Hastings's first jeweler. His wife died June 26, 1896. He is survived by six sons and three daughters. He has not been engaged in active business recently.

Burglars Traced and Arrested with Plunder on Them.

DUBOIS, Pa., April 25.—The jewelry store of J. W. Hoy was robbed, Sunday, of a large amount of jewelry and silver ware. Chief of Police Roney traced two negroes to Punxsutawney and placed them under arrest. The entire lot of plunder secured at the jewelry store, valued at about \$60, was found on them. They were brought here, bound over for court under \$800 bail and taken to the Clearfield jail. The burglars ransacked the store, but were unable to secure the more valuable goods.

Jacob Epstein, Elmira, N. Y., is reported to be offering to his creditors 25 cents on the dollar.

Hearing on Bill to Regulate Liability of Employers to Employees.

ALBANY, N. Y., April 27.—A hearing was given by Governor Odell, yesterday, on a bill introduced by Assemblyman Costello, entitled: "An act to extend and regulate liability to employers and others for injuries received by them." From the wording of the bill, it would, if it became a law, affect all jewelry and other manufacturers in the State, although there seems to be an impression that only railroad corporations would be particularly affected.

The opposers to the bill stated to the Governor, yesterday, that the bill was a fraud, that no employes had asked for it and that it was not in the interests of the people whom it pretended to benefit. Representatives of labor organizations, of the Brooklyn Bar Association and of the District Attorney's office all opposed the bill.

Assemblyman Costello explained that it was intended to effect a compromise between capital and labor. Conferences were had at which both elements were represented and the bill was drafted on lines that were agreed to by both sides. He declared that labor had secured something that it never had before. He termed the opponents of the bill negligence lawyers.

Prof. Charles A. Collins, who had taken part in the conferences while the bill was being drawn, defended the measure. He compared it with the Massachusetts Employers' Liability act and declared the Costello measure to be a better one with a number of the objectionable features of the Massachusetts act stricken out. The intent of the bill was to make employers and employes more careful. He said that instead of the 60-day notice provision being a hardship, it would be a beneficent one to the employe.

The Governor took the matter under consideration at the close of the hearing. The Costello bill was passed by the Assembly April 16, and by the Senate a few days later. It now rests with the Governor whether it becomes a law of the State or is pigeonholed.

Burglars sawed a lower panel from a rear door of M. S. Rentschler's store, Centreport, Pa., Saturday, and secured 15 watches, valued at \$300.

Lawrence W. Pennington Seeks an Extension from His Creditors.

WORCESTER, Mass., April 28.—Lawrence W. Pennington, manufacturing jeweler, 6 Elm St., has asked for an extension from his creditors. A conference of the larger creditors was held, Saturday, in the office of Blackmer & Vaughan, Mr. Pennington's counsel. A poor Christmas trade and recent bad weather combined to financially embarrass Mr. Pennington and he decided to call a meeting of the larger creditors and ask for an extension.

The creditors present at the meeting represented more than three-fourths of the indebtedness, which is somewhere in the vicinity of \$10,000. It is expected Mr. Pennington will pay dollar for dollar if the extension is granted him. No attachments have been made.

Mr. Pennington moved into his new store on Elm St., last year. Besides his jewelry business he has done artistic poker etching, having reproduced some of the great works of art in burnt wood.

Strict Enforcement of Boston's Second-hand Goods Ordinance.

BOSTON, Mass., April 27.—On May 1 the new order recently issued by the Superintendent of Police goes into effect. This requires all dealers in old gold and silver to take out a license such as is required by all "second-hand" dealers. The Chief Inspector, who has charge of the enforcing of this law, says that the jewelers generally are making their applications and that he anticipates no trouble. From the fact that all licensees are required to make daily reports of their sales and purchases, some of the jewelers have determined not to bother with this branch of their business and will discontinue it.

This law has been on the statute books for a long time, but has not been strictly enforced, especially as regards the reputable jewelers.

J. F. Boepple, the pioneer pearl button manufacturer of Muscatine, Ia., has sold his interest in the Muscatine plant and will hereafter devote his entire attention to the factory at Davenport. The Boepple Co. have been incorporated to operate the Davenport business. The capital stock is \$25,000.

Wisconsin Farmers Victims of a Jewelry Agency Fraud.

GREEN BAY, Wis., April 25.—A new swindling scheme has developed in this vicinity and reports have come in from several quarters of farmers having been "fleeced." The scheme was worked as follows: A man representing himself to be a deputy sheriff establishing agencies for a bankrupt jewelry store made the rounds of several towns and took orders for a number of watches. The next day two other men made the rounds armed with the orders signed by the victims and demanded the cash for several dozen watches as per order. When the victims protested they were told that the money must be forthcoming or they would probably lose their farms. If they would settle for what they had it would be all right. In this way the "agents" obtained notes for \$300 and cash amounting to \$110. They left a cheap watch or two in each case to serve as a compensation.

Davidson and His Attorney Enter Pleas of Not Guilty.

CHICAGO, Ill., April 20.—A. Davidson, the ex-jeweler of Dixon, Ill., now in jail in Chicago, along with his attorney, Max Kunze, of Belvidere, has pleaded not guilty in the United States Court on charges preferred against him. The charge against Davidson is concealing assets when he applied to pass through bankruptcy. The charge against Kunze is receiving property from Davidson after his petition had been filed, with the intent to defeat the law. Their cases were set for next week.

Tucker & Parkhurst Co. Property Sold and Bid in by Mortgagee.

OGDENSBURG, N. Y., April 25.—The stock, machinery and fixtures of the Tucker & Parkhurst Co.'s silver ware factory were sold under mortgage foreclosure to-day and bid in by the Ogdensburg bank, the mortgagee, for \$4,000.

Jewelers' Gold Bars Withdrawn and Exchanged.

Week Ended April 27, 1901.

The U. S. Assay Office report:

Gold bars exchanged for gold coin.....	\$139,120 27
Gold bars paid depositors.....	67,509 83
Total	\$206,630 10

Of this the gold bars exchanged for gold coin are reported by the Sub-Treasury as follows:

April 22.....	\$20,648
" 23.....	1,014,560
" 24.....	574,722
" 25.....	40,847
" 26.....	41,347
" 27.....
Total	\$1,692,124

Of this sum over \$1,550,000 was the value of bars withdrawn for export.

Seizure of Jewelry from a Well Known Canadian Banker.

Customs Inspector Donohue, at the Port of New York, Thursday, seized about \$800 worth of jewelry which he found on the person of John Curry, a passenger on the *Teutonic*. The jewelry, which Curry claims he was carrying to the Canadian relatives of a friend, who died abroad, include one solitaire diamond bracelet, two opal and diamond bracelets, one gold bracelet, one sapphire, pearl and diamond brooch, one diamond and opal brooch, one diamond ring and one turquoise and diamond ring.

Mr. Curry carried the jewelry in his pockets and said nothing about it, although he declared two pieces of baggage, which will go to Canada in bond.

At Deputy Collector Phelps's office Mr. Curry showed by papers which he had with him that he was a banker of Windsor, Ontario, and the jewelry belonged to an estate and was intrusted to his care to be delivered to relatives in Ontario. He was told that if he had only declared the jewelry it could have been sent through in bond. An application to release the goods has been forwarded to Secretary Gage, giving his statement of the matter, and the opinion was expressed that the application would probably be granted.

MR. CURRY DESCRIBES THE INCIDENT.

WINDSOR, Ont., April 26.—Windsor people were somewhat startled by a report from New York, this morning, which stated that John Curry, a well known banker here, who had just returned from a trip on business connected with the estate of his late partner, Alexander Cameron, was detained by the customs officers as he left the *Teutonic* and \$4,000 worth of jewelry taken from him. Mr. Curry arrived in Windsor to-day and explained how it came about that he was reported as a smuggler. Mr. Curry said:

The news that has reached here is incorrect in several particulars. A great deal has been made out of nothing. The jewels were worth only \$600. They belonged to Mrs. Cartright, the daughter of my partner, Mr. Cameron, who died near London, and I was given the authority to bring her effects home to Canada. When I demanded the jewels from the agent in London he asked for my authority. I wrote to Windsor for the necessary permission. The lawyer here cabled the London agent, "Give Curry the jewels," but the message reached him three days after I had left London and was up in Scotland. The valuables were forwarded to the steamer *Teutonic* and placed in the care of the purser unknown to me, and I didn't find out that they were on the steamer until the boat was ready to sail. It was then too late to put them in bond. When the officers on this side asked me what I had I showed them the jewels and told them they were not mine, but were to be taken to Canada. They said that was all right, but that I would have to make official application and show my papers of authority. I left the valuables in their custody and as soon as the matter is examined they will be forwarded to me. The officers were very pleasant about the matter and there was no arrest or seizure. I will have the jewels in a few days.

Daniel A. Cooke & Son, Jacksonville, Fla., have assigned to N. A. Hull.

The store of C. W. Stevens, East Barre, Vt., was broken into April 21. The large plate glass window was broken by a stone. The store had been closed because of the absence of Mr. Stevens, who had been called to West Fairlee, Vt., by the illness of his father.

A Truly Fraternal Dinner.

First General Banquet in New York of The Jewelers' League.

The first general banquet given in New York under the auspices of The Jewelers' League to their members was held, Thursday evening, at Mouquin's, Fulton and Ann Sts., and proved to be a most enjoyable and successful occasion. The banquet was the outcome of a suggestion made at the annual meeting and was in charge of the advisory committee of the League. Theodore L. Parker was mainly instrumental in the work for the banquet and presided during the evening. It was his idea, as well as the committee's, that by means of the banquet the members would be brought together outside of business, and in this way it would tend to develop the social side of the League and instill into the new members that spirit of fraternity and good-fellowship that was so prevalent when the organization was first formed; also the bringing of the members together in this social way would act as an aid in getting new members for the League and call to the attention of non-members the advantages they would enjoy by joining.

The guests began to gather shortly before 6 o'clock, but it was not until three-quarters of an hour afterward that they took their places at the two long tables which stretched at right angles to that at which the toastmaster of the evening sat. The attendance was about 80 gentlemen and included among them were a large number of the older members, whose faces have not been seen at the annual meetings or other gatherings of the League for many years. On the other hand were to be found many young men and new members of the League, together with the usual contingent who have faithfully attended all the proceedings of the organization for nearly a quarter of a century. The keynote of the evening was good-fellowship, and no guest in this respect was out of tune, the two hours which were consumed by the dinner being passed in a most enjoyable and jolly manner.

At 8 o'clock Mr. Parker arose and on behalf of the advisory committee welcomed the guests and members, stating in a brief speech that they had assembled there to give the social side of their natures an outing, in response to the natural law which governs mankind in this respect. "Let us keep alive," he said, "the social side of the League life and see to it that the League attains its true standard." He spoke of the character of the organization, telling how it was one of the best mutual companies in existence, and then spoke of the duty of the members to give the officers all the support possible. Mr. Parker called attention to the necessity of developing the fraternal spirit in the League and told how this dinner was an experiment in this direction, the social "board" being the means of lifting the members above the cares of life and helping them to know one another better. He said that he had no idea he was to preside until he appeared at the meeting, when the venerable president, Mr. Hayes, declared that he must do so.

He, however, recalled the Scotch phrase "that where the McGregor sits is the head of the table," and said that at the head of the banquet table was where Mr. Hayes sat, and then called upon him for a few remarks.

Mr. Hayes made one of his usual humorous and instructive and, at the same time, interesting, addresses, saying that the feast was prompted by the advisory committee and the thanks were due that committee for its unqualified success. In speaking of the success of the League and the esteem in which it was held by its members, he cited instances where insurance agents of old line companies were members of the League and that while they sold to others insurance, for themselves they retained their membership in the League. His remarks brought forth many laughs and he was heartily applauded at their conclusion.

William Barthman then arose and proposed a silent toast to the memory of the late Joseph B. Bowden, formerly vice-president of the organization, which was drunk by the members standing.

B. Russell Throckmorton, a clever professional entertainer, then put the members into good humor by telling some amusing stories, and concluded with a recitation, which was roundly applauded.

Before the next speaker was introduced, Mr. Parker exhibited 200 postal cards in a bundle, which had been received from members from Maine to Texas, all but one of whom endorsed the movement of the banquet and would have been present had not distance kept them away. A postal from A. M. Hill, of New Orleans, reserving a chair, and a letter from a Mr. Schott brought forth laughter and applause, after which the second president of the League, Gilbert T. Woglom, was introduced.

Mr. Woglom's address was mainly reminiscent of the early days and older members of the organization. He told of the first meeting that brought the League into existence and gave anecdotes of the founders who here attended. Among others he spoke of D. H. Hopkinson, the founder of THE JEWELERS' CIRCULAR, and paid a tribute to Mr. Hopkinson for his work on behalf of the League through this journal, and also called to the attention of the members the fact that this paper was as interested in support of the organization and offered as many facilities to it to-day as it did in that time. Mr. Woglom told of the many methods that had been used to bring in new members, and said that while in the early days it had only been necessary to invite aid, on the part of the members, to increase the ranks of the organization, to-day it was necessary to incite them to this work. He finished by calling attention to a plan which was proposed many years ago and which was to the effect that a banquet be held annually, at which all members who had brought in a member during the year should be invited as an honored guest. The future of the organization depended upon work and not words, he said, and that it lay with the members to do that work.

After a letter from Charles G. Alford had been read, Mr. McDonald, of Jersey

City, was called upon and kept the members laughing for many minutes with amusing stories and interesting anecdotes.

Mr. Woglom had been referred to as the "father" of the League, and in introducing the next speaker, William C. Kimball, the toastmaster, said that if Mr. Woglom was the "father" Mr. Kimball was surely the "nurse" of the organization. Mr. Kimball's remarks were brief and pointed and were heartily received.

Among the gentlemen called upon by the chairman to address the assemblage were Alfred Krower, who made some brief remarks of a congratulatory character, and F. Kroeber, who, amid applause, proposed his son for membership and promised that he would see that Mr. Karsch's two sons would be proposed. He urged that all the grey haired members should make their sons members of the League. Mr. Throckmorton next recited "The Jolly Old Pedagogue" and "Myself and Godt." The enjoyable affair soon after came to a close.

AMONG THOSE WHO ATTENDED.

Notes of the Banquet.

Among the older faces present that had been missed from the meetings for some time were those of N. H. White and F. Kroeber.

The firm of Jung, Staiger & Klitz entered the dining hall together and were much in evidence during the evening.

John R. Greason, Jr., the leader of the younger element, enjoyed himself as usual and helped others to do likewise.

At the speakers' table beside Mr. Parker were the following gentlemen, all well known members of the organization: R. A. Breidenbach, William C. Kimball, S. B. Kent, G. T. Woglom, John R. Greason and Bernard Karsch.

Theodore L. Parker was fit with a capital and performed the duties of the evening with becoming dignity.

William F. Ackerman smiled self-consciously when President Hayes referred to insurance agents whose faith in the League was unshaken.

This was the first League event not attended by Vice-President Bardel, who is now in Bamberg, Germany, as American Consul, and his absence left a gap that was noticeable.

The venerable Louis Bonet was prominent among the white haired contingent who added dignity to the occasion.

George W. Street and Alfred Krower laughed

enough during the dinner to keep away all danger of indigestion.

Among the guests was Charles Hayes, the brother of president Henry Hayes.

John A. Carney, one of the attorneys for the League, showed that he enjoyed a good dinner with genial companions.

Secretary Levi Stevens beamed as usual and seemed as proud of the success of the banquet as he is of his son, Harry Stevens, who accompanied him.

The chair for A. M. Hill, New Orleans, was conspicuous at the head table opposite the toastmaster, and hanging from it was Mr. Hill's postal asking that it be reserved.

The letter from Mr. Schott, which was received with so much laughter by the assembled guests, read as follows:

MR. T. L. PARKER,

37 Maiden Lane, City.

DEAR SIR:—Please reserve two (2) seats for me for the 25th inst. I am probably the only "dead alive" or "alive dead" member, because, through an entirely excusable mistake, the notice of my death was sent to all the members several years ago.

For this reason, to be present and alive at a dinner with fellow members is a pleasure which an "officially declared" dead man seldom enjoys.

Yours truly,

(Signed) CHARLES H. SCHOTT.

There was quite a representation of the traveling fraternity, among the well known faces being those of C. A. Gallagher, with Sinnock & Sherrill; James A. Cheney, with Alfred H. Smith & Co., and M. Stratton, Jr., with Alling & Co.

W. H. Einhaus was a dignified figure near the head of one of the tables.

Charlie Fox's story of the Frenchman will soon become a classic in the trade.

Owing to the great success of this banquet of The Jewelers' League and also to the number of expressions of approval of the scheme of the Advisory Committee, from the members generally, it has been decided to hold another banquet in September, to which the members of the League all over the country and their friends will be invited. The banquet will probably be held about Sept. 20 to 27.

Engravers and Polishers in Chicago Form an Association.

CHICAGO, Ill., April 27.—Jewelers, engravers and polishers to the number of over 100 met at the Great Northern hotel, last evening, and organized an association for protection and social progress.

The organization has been contemplated for some time. Within a few weeks the new association expect to have a membership of over 400. The officers elected last evening were: President, Herman Stern; vice-president, H. Nickoll, Jr.; treasurer, C. H. Rixon Bisson.

Vermont Clock Co. May Locate Factory in Fort Dodge, Ia.

FORT DODGE, Ia., April 25.—A movement is on foot for the location here of the plant of the Vermont Clock Co. A proposition has been extended by the company to the city, through E. H. Phelps, formerly of Fort Dodge and now a stockholder of the clock company.

Death of Julius R. Bloom.

Boston, Mass., April 29.—The local trade was shocked to hear to-day of the death in the suburb of Hyde Park, of Julius R. Bloom, long identified with the jewelry business in Boston. He was a member of the manufacturing firm of Norling & Bloom, 386 Washington St. Mr. Bloom died at his residence, 38 Pond St., after an illness of long duration, having been confined to his house since Jan. 29.

Julius R. Bloom was born at Stockholm, Sweden, Sept. 8, 1839, where in his boyhood days he learned the jewelry manufacturing business. At the age of 17 years, with an older brother, he came to America and located in Boston. About 35 years ago he established with his brother-in-law, who has also died, the firm of Norling & Bloom. The business will now be carried on under the same name by his son, Andrew R. Bloom.

The deceased was married in Boston, Nov. 17, 1879, to Miss Annie S. Norling, who survives him. He also leaves a son and four daughters. He took up his residence in this town, April 3, 1871. He was a veteran of the War of the Rebellion, enlisting as a private in Company A, 44th Massachusetts volunteer infantry, Sept. 12, 1862, and was honorably discharged, June 18, 1863, by reason of expiration of his term of service. He was a member of Timothy Ingraham Post 121, G. A. R., which he joined June 7, 1896. He was a member of Hyde Park Lodge, F. and A. M., and Cyprus Commandery, Knights Templars, of Hyde Park, and St. Paul Royal Arch Chapter and Boston Council, R. and S. M., of Boston, and Massachusetts Lodge, I. O. O. F., of Boston.

The funeral will be held at his late residence at 1 o'clock, Wednesday afternoon.

S. Silverthau & Sons Were Not Street Railway Bribers.

NEW HAVEN, Conn., April 28.—A peculiar story that had sensational features, involving an attempted bribery of a member of the State House of Representatives, by a member of the firm of S. Silverthau & Sons, jewelers, this city, has been attracting considerable attention in the State, this week. But the facts prove it to be only something of a joke.

It appears that Representative E. F. Thompson is a member of the Committee on Railroads, who have in hand a petition for a street railway extension from New Haven to Derby. It appears also that a brother of the senior member of the jewelry firm indulges somewhat in politics and he made a "bribery" offer to Mr. Thompson if the latter would vote in favor of the petition. This brother, known locally as "Benny" Silverthau, is not, so THE CIRCULAR-WEEKLY representative is assured by the senior member of the firm, interested in the business in any way, except as an employe. His political aspirations do not seem to be taken seriously either by his relatives or by those who are acquainted with him.

A. A. Davidson, Vancouver, B. C., was in Toronto, last week.

EDMOND E. ROBERT, 3 Maiden Lane,
 SOLE AGENT,
New York.

Death of James R. Taylor.

James R. Taylor, a retired jeweler, who 50 years ago was one of the most prominent wholesale dealers in the trade, died at his residence, 268 Henry St., Brooklyn, New York, early Sunday morning, from an attack of apoplexy. Mr. Taylor was in his 90th year and had been in excellent health until the time of his death. He retired from the trade 25 years ago.

James R. Taylor was a native of New York city and was born in April, 1812. As a young man he commenced business with Henry Young & Co., an old jewelry firm of New York, later Young, Smith & Co. With this firm Mr. Taylor learned the jewelry business and finally acquired an interest, remaining until his 25th year. In 1837 he formed the partnership with Ezra C. Read, formerly of the firm of Fellows, Read & Co., jewelers, 17 Maiden Lane, and the concern, known as Read & Taylor, commenced business at 12 Maiden Lane as importers and wholesale dealers in watches, diamonds and fancy goods. The business grew and the concern later moved to 9 Maiden Lane, where they became one of the leading houses of the trade. In 1843 Daniel H. Wickham joined the firm and they greatly enlarged their business of importing watches and manufacturing watch cases. Mr. Taylor was the foreign buyer for the firm and often visited Europe in packet ships, steamers then being unknown. Henry Olmstead was also a partner in the concern. Mr. Wickham left them to form the firm of D. H. Wickham & Co. and Mr. Read, the senior member, retired from the concern in 1869 to become president of the City Bank of New Haven. The firm became Taylor, Olmstead & Co., under which style the business was carried on when Mr. Taylor retired in 1876.

From the time of his retirement Mr. Taylor was not actively engaged in business, but held large financial interests in many industrial enterprises. He was a director in the Delaware & Hudson R. R. Co., Meriden Gas Co., Seamen's Savings bank, the Seamen's Port Society, in several insurance companies and many other enterprises. He was also identified with the Brooklyn Children's Aid Society and other charities, to whom he gave large and frequent donations. During his 40 odd years in the jewelry trade Mr. Taylor was a well known figure in the jewelry district of New York and was known personally to the leading jewelers throughout the entire United States. He was not married and is survived only by nieces and nephews, one of his nieces being the wife of Henry E. Ide, of H. C. Hardy & Co., and one of his nephews being G. Carrington Taylor, a diamond and jewelry broker in the Havemeyer building.

The funeral services will be held this afternoon at 2 o'clock at the First Presbyterian Church, Henry St. near Clark St., Brooklyn, of which the deceased had been president of the board of trustees for the past 24 years.

Tools and machinery of H. Androtta, Passaic, N. J., were damaged by fire and water, Friday.

Last Week's New York Arrivals.

THE CIRCULAR-WEEKLY has perfected arrangements for obtaining the names and hotel addresses of all the latest buyers visiting New York, and each day posts in its office, at John St., cor. Broadway, a bulletin which every member of the trade is cordially invited to copy.

John F. McKay's Business Troubles Temporarily Adjusted.

WEST DERRY, N. H., April 25.—The business troubles under which John F. McKay, jeweler and optician, has been laboring have been so adjusted that he has opened his place of business and is doing work at his old stand. John Folsom was found as receiver and thus Mr. McKay was enabled to proceed along business lines.

It will be remembered that Mr. Folsom placed an attachment upon the goods under two mortgages, which he held. This began the trouble which resulted in the placing of three other attachments. Mr. Folsom later came to an agreement with Mr. McKay, whereby the latter was to open the store and continue business. This would have been done but for the placing of more attachments by other creditors. Mr. McKay then claimed he had a right to do business such as repairing, etc., at his bench in his store. This he was denied, but was given the privilege of removing his tools and bench. This he declined to do. He then began action against the deputy sheriff and sued him for \$3,000 damages, as noted in THE CIRCULAR-WEEKLY, last issue. Mr. Folsom previously sued the same man, deputy sheriff C. A. Norton, for \$1,500. These cases, however, cannot come up till next October.

Traveling representatives may consider these columns open for the publication of any news or items of interest regarding themselves or their conferees.

The traveling representatives of eastern firms who called on the Kansas City, Mo., trade last week were: Al. Vretzfelder, for Manasseh Levy; W. H. Gregory, Strobell & Crane; Mr. Bliss, Kremenz & Co.; S. A. Bolles, David Kaiser & Co.; Charles E. Bride, Bride & Tinckler; N. Gunzburger, L. & M. Kahn & Co., and A. Barker Snow, Snow & Westcott.

"Count Weil," of the Electric City Box Co., and J. H. Flagg, the Silver Plate Cutlery Co., were in Denver, Col., last week.

Travelers in Toronto, Can., last week were: J. P. Kilfedder, Jennings Bros. Mfg. Co., Bridgeport, Conn.; J. Ira Seebacker, New York; H. L. Lyman, Dennison Mfg. Co., New York.

A. McDowell Bailey and C. H. Rudolph, representing Goddard, Hill & Co., Pittsburgh, Pa., returned to that city on Saturday last, to remain until Wednesday of this week. They report an excellent Spring trade.

Recent travelers in Omaha, Neb., were: E. C. Weidlich, William Weidlich & Bro.; J. R. Payne, Meriden Cutlery Co.; H. M. Black, The American Art Leather Co., Pasadena, Cal. This is the first time the latter company have been represented in that section, and Mr. Black has done a good business.

The following were in Minneapolis and St. Paul, Minn., the past week: Mr. Price, Byron L. Strasburger & Co.; Mr. Weiser, Heintz Bros.; A. L. Reed, A. L. Reed & Co.; E. F. Erzinger, Landers, Frary & Clark; T. Hoefler, M. A. Mead & Co.; Mr. Goldsmith, Goldsmith Bros.; and a representative of Herman Scheuer & Bro.

J. T. Pierce and N. R. Fuller, travelers for Edwards & Sloane Jewelry Co., Kansas City, Mo., were in town for a few days last week. W. C. Schuman, traveler for the material department of the Norton-Paulson Jewelry Co., Kansas City, and E. S. Villmoare, of the jewelry department of the same firm, were in the city several days last week.

Traveling men who called upon the jewelers of Indianapolis, Ind., last week were: G. V. Dickinson, Elgin National Watch Co.; F. J. Aicher, Alvin Mfg. Co.; S. A. Bolles, David Kaiser & Co.; E. A. Tyler, Ansonia Clock Co.; Fred. L. Pettee, Waterbury Clock Co.; G. W. Payson, Seth Thomas Clock Co.; and representatives of J. C. Dowd & Co. and Julius Wodiska.

Among the traveling salesmen who recently passed through Detroit, Mich., were: Mr. Parker, Osmun-Parker Mfg. Co.; E. A. Rose, Weigle & Rose; George R. Angus, Goodnow & Jenks; H. D. Cuther, Hayden W. Wheeler & Co.; Joseph S. Frank, Sussfeld, Lorsch & Co.; Carl M. Fishel, Fishel, Nessler & Co.; H. A. Reichman, Joseph H. Fink & Co.; P. M. Layman, Riker Bros.; J. W. McClannin, Wilcox Silver Plate Co.; Lawrence H. Smith, Bippart, Griscom & Osborn; A. T. Snyder, A. N. Wright & Co.; Walter S. Noon, W. F. Cory & Bro.

Travelers in Pittsburgh, Pa., recently were: Arthur Bradshaw, International Silver Co.; Charles B. Bartlett, Whiting Mfg. Co.; J. Fred. Crane, Mandeville, Carrow & Crane; R. L. Seely, Joseph Fahys & Co.; D. Wile, Buffalo Jewelry Case Co.; H. W. Sherrill, Sinnock & Sherrill; Samuel Heller, L. Heller & Son; Charles Stiner, Bracher, Becker & Barnett; Emil Pick, Hammel, Riglander & Co.; E. E. Stockton, The E. Ingraham Co.; W. F. Koch, American Morocco Case Co.; C. M. Dillon, Meriden Cutlery Co.; Jules Franklin, L. Tannenbaum & Co.; Albert L. Stearns, Roy Watch Case Co.; M. W. Potter, J. M. Fisher & Co.; S. H. Fink, Fink, Bodenheimer & Co.; Lewis P. Cook, S. Sternau & Co.; M. E. Van Bergh, Van Bergh Silver Plate Co.; W. R. Cobb, W. R. Cobb

& Co.; George W. Beardsley, George W. Shiebler & Co.; Frank E. Whitmarsh, Alvin Mfg. Co.; J. E. Simonson, Ludwig Nissen & Co.; Mr. Bleecker, William S. Hedges & Co.

Calling on Syracuse, N. Y., jewelers during the past two weeks were: Conrad Schickerling, Schickerling Bros.; H. Allyn Parker, Gebhardt & Parker; C. D. Hintze, Enos Richardson & Co.; S. Glenn Walmsley, for Hermann Baum; A. W. Bogart, Waterbury Clock Co.; G. B. Osborn, William Smith & Co.; W. H. Pullman, E. A. Lehmann & Co.; M. L. Hammel, Gattle, Ettinger & Hammel; G. H. Sluter, Carter, Hastings & Howe; C. S. Fake, Whiting Mfg. Co.; T. E. Bowne, E. Ira Richards & Co.; James Panton, Mabie, Todd & Bard; C. F. Wellenkamp, Alfred Field & Co.; Leon H. Coffin, Landers, Frary & Clark; R. T. Supple, William B. Durgin Co.; E. A. Porter, International Silver Co.; E. E. McCarter, Wilcox & Wagoner; J. Rothschild, Ingomar Goldsmith & Co.; John C. Hull, The Silver Plate Cutlery Co.; C. E. Mott, J. B. Bowden & Co.; R. H. Stevenson, E. G. Webster & Son; Lawrence H. Smith, Bippart, Griscom & Osborn; T. Parker, Osmun-Parker Mfg. Co.; W. R. Shute, Jones & Woodland; Elias Markens, for L. Witsenhausen; Walter S. Noon, W. F. Cory & Bro.; F. W. Morris, R. Wallace & Sons Mfg. Co.; Mr. Ford, Ford & Carpenter; A. H. Schutrunk, for David Marx; J. W. McClannin, Wilcox Silver Plate Co.; Frank H. Dana, The H. A. Kirby Co.; Harry L. Gleason, Coddling & Heilborn Co.; E. H. Cox, Sussfeld, Lorsch & Co.; Henry W. Sherrill, Sinnock & Sherrill; Henri Ducollet, Ducollet Bros.; Frank G. Moyer, American Watch Case Co.; Benjamin Westervelt, New England Watch Co., S. & A. Borgzinner and Van Bergh Silver Plate Co.; Fred. J. Foster, Unger Bros.; E. Horton, Mandeville, Carrow & Crane; J. N. Beckwith, Beckwith, Grant & Co.; William B. Osgood, Joseph, Bennett & Co.; Edwin L. Mumford, Waite, Thresher Co.; J. Goldberg; W. S. Gardner, The Bassett Jewelry Co.; C. C. Rosenberg, W. H. Terhune & Co.

Birmingham, Ala.

TRADE CONDITIONS.

Business is reported up to the average for the season, with slight indication of Spring dullness, which, however, does not affect this place to any great extent because of the fact that it is a manufacturing center.

A. P. Taliaferro and B. H. Chevis will open a jewelry store at Columbus, Miss. The store now occupied by Mr. Taliaferro will be remodeled for the new establishment.

R. Heine, recently elected a member of the City Council at Talladega, has been well cared for in committee assignments. He is chairman of the cemetery committee and on the judiciary, the police and the light and water.

Three first prizes for the Floral Parade are on exhibition in the window of F. W. Bromberg. They are a monster cut glass punch bowl, a large silver berry bowl and a handsome silver water pitcher. Mr. Bromberg has also just turned out a beautifully engraved gold watch, which was presented by the pupils and admirers of Prof. J. C. Weissner, manager of the dancing carnival, recently held.

C. Gildemeister, San Antonio, Tex., has given a bill of sale to Mrs. Lottie Gildemeister.

Goetz & Yaffee, Knoxville, Tenn., have adjusted their financial difficulties and the receiver has been removed.

The Standard Watch Co., Terre Haute, Ind., have been incorporated with capital stock, \$150,000. The directors are: Anton Mayer, Louis Dueniveg, J. H. Keyes, Charles M. Gregg and Benjamin G. Hudnut.

Tariff Decisions & Regulations.

DECISION AS TO SPECIFIC DUTY.

WASHINGTON, D. C., April 19.—The Treasury Department has been informed that a decision has been handed down by the United States Circuit Court of Appeals for the second circuit, to the effect that where imported merchandise is subject to a specific duty at a rate to be regulated by the value thereof, and in no case less than 50 per centum ad valorem, the fact that the importation paid such a rate does not relieve the Appraiser from inquiring into and determining the value of such goods, and importers who fail to accompany their entries with a true and correct invoice, stating the cost or market value thereof, are required to pay the additional duty imposed by the provisions of section 32 of the present Tariff act.

DUTY ON AMMETERS AND VOLTMETERS.

The Treasury Department have decided to appeal from a recent decision of the United States Board of General Appraisers finding ammeters and voltmeters to be scientific instruments, as will be seen by the following letter to Collector Bidwell:

TREASURY DEPARTMENT, April 16, 1901.

SIR:—The Department is in receipt of your letter of the 12th instant, inclosing a copy of an unpublished decision of the Board of United States General Appraisers, dated March 26, 1901, on the protests of Messrs. Tice & Lynch, in which it is held that certain ammeters and voltmeters are scientific instruments within the meaning of paragraph 638 of the act of July 24, 1897, and entitled to free entry, the same having been imported for Cornell University, at Ithaca, N. Y., thus reversing the ruling of the Board in a similar case (T. D. 12347; G. A. 1119).

In such case the protestants claimed that the articles were philosophical instruments and entitled to entry under the provisions of paragraph 475 of the act of 1883, which provided for a duty of 35 per cent. ad valorem on "philosophical apparatus and instruments," and the Board held that they were not intended for philosophical purposes, or even for scientific experiment, observation or investigation; and if that reasoning held good then, it holds good now, the fact that since the act of 1883 the word "utensils" has been added to the paragraph allowing free entry of "philosophical and scientific apparatus and instruments" for colleges, etc., affording no grounds for a more liberal interpretation of such paragraph, as it has been held that the terms "philosophical and scientific," as used in paragraph 638, qualify the words "apparatus, utensils, instruments and preparations," which immediately follow (T. D. 9414 of June 1, 1889).

You are, therefore, requested to take an appeal in such case under the provisions of section 15 of the act of June 10, 1890, in order that the following question may be determined, viz.:

Inasmuch as the decision of the United States Supreme Court in the Oelschlaeger case arose on the question whether certain instruments were philosophical in character, it would seem that the definition laid down by said court as to philosophical apparatus and instruments (T. D. 10603 of Jan. 16, 1891) should apply to scientific apparatus, instruments, preparations and utensils, as found in said paragraph 638.

Respectfully,

O. L. SPAULDING,
Assistant Secretary.

COLLECTOR OF CUSTOMS, New York, N. Y.

Among the decisions handed down the past week by the Board of Classification of the United States General Appraisers, New York, were the following:

Fensterer & Ruhe imported several kinds of glass ware which were assessed for duty at 40 per centum ad valorem, under paragraphs 88, 89 or 90, Tariff act of 1894. The importers claimed that the merchandise was dutiable at 35 per centum ad valorem, under paragraph 102, same act. Former decisions of the Board in favor of protestants in cases similar to this one have been reversed by

the United States circuit courts a number of times, so this protest is, therefore, overruled.

Oelschlaeger Bros. imported thermometers and chemical and scientific glass ware, claimed by them to be entitled to entry free of duty, under paragraph 585, of the Tariff act of 1894. As no evidence was brought forward to show that the instruments were "specially imported for the use of a society or institution," the protest was overruled. The same house imported ophthalmoscopes, which were assessed for duty at 40 per centum ad valorem as optical instruments, under paragraph 98, of the Tariff act of 1894, and claimed by the importers to be dutiable as manufactures of glass not specially provided for. The protest was overruled.

George Borgfeldt & Co. imported (1) magic lanterns, which were assessed for duty at 45 per centum ad valorem, under paragraph 111, Tariff act of 1897, as optical instruments, and were claimed by importers to be dutiable at 35 per centum ad valorem as toys, under paragraph 418, same act; (2) glass pens, which were returned for duty as colored glass and assessed at 60 per centum ad valorem, under paragraph 100, act of 1897, and claimed by the importers to be dutiable as pen holders at 25 per centum ad valorem, under paragraph 187, or as manufactures of glass not specially provided for, or at 45 per centum ad valorem, under paragraph 112. The Board sustained the protest in regard to the magic lanterns, but overruled the one relating to the glass pens.

Death of Frederick Sauter.

PHILADELPHIA, Pa., April 30.—Frederick Sauter, for many years one of the best known retail jewelers in Philadelphia, died last week after a short illness at his home, 2627 Girard Ave., where he was in business.

Mr. Sauter was born in Germany and learned the trade of watchmaker in the old country. He came to this country at an early age and located in Kensington, Philadelphia. For many years he was in business at 2d and Georgia Sts. and it was only about six years ago that he removed to 26th St. and Girard Ave., where he continued in business until the time of his death. He was buried Thursday. Mr. Sauter is survived by a son and daughter. His son, Al. Sauter, will continue the business in Girard Ave.

United States Watch Co. Plant Being Put Into Shape for Business.

WALTHAM, Mass., April 26.—The new owners of the United States Watch Co. plant have been busy for the past few days taking an inventory of the property. Granville Nutting, who was superintendent of the factory when it was last in operation and is now with the New York Standard Watch Co., Jersey City, N. J., has been assisting with the work. He says the machinery and tools are in excellent shape, far better than was expected. It is probable that by mid-Summer more than 100 new hands will be at work and that by another Spring the factory plant will be enlarged to at least double the present capacity.

Pearl Buyers Secure Specimens in Minnesota.

WINONA, Minn., April 24.—I. E. Anthony, of Comanche, Ia., was in the city to-day and closed several deals with local clam diggers for slugs and pearls that have been found by resident diggers. The slugs and pearls bought are sold principally to manufacturing jewelers in New York. The price paid ranges from 25 cents to \$2 for slugs and from \$2 to \$200 for pearls.

DUEBER- HAMPTON WATCHES.

Largest Distributors in AMERICA.

No Goods
Sold at Retail.

John W. Furwood & Co.
No. 3 Maiden Lane, New York.

Three Receivers Appointed for J. V. Alfriend & Co.'s Business.

NORFOLK, Va., April 27.—J. V. Alfriend & Co., who conducted a jewelry and stationery business at 190 Main St., are now in the hands of a receiver, or, more properly speaking, of three receivers, appointed in bankruptcy proceedings in the United States District Court. An involuntary petition in bankruptcy was filed, Thursday, against the firm by the New England Watch Co., New Haven Clock Co., Jennings Bros., and two publishing houses, in which they allege that the concern had committed an act of bankruptcy in allowing a judgment note for \$12,000 to be taken by the Citizens' bank, of Norfolk. The bank and Hayden W. Wheeler & Co. and other creditors in the jewelry trade have also commenced proceedings, attacking a bill of sale given by the junior partner to one Paul, a local jeweler, covering stock inventoried at about \$25,000. Three receivers have been appointed, one on behalf of Mr. Paul, one by the petitioning creditors in bankruptcy and one in the proceedings brought by Hayden W. Wheeler & Co. and others. The receivers are to take an inventory and to continue the business at retail until the election of a trustee.

The liabilities are not more than \$21,000 and probably may be shaved down to \$18,000. They include \$7,500 to the jewelry trade, \$1,500 to the stationery trade and \$12,000 to the bank, and this last amount may be brought down to \$9,000. Should Mr. Paul's bill of sale be declared valid by the court, the creditors will have about \$9,300, to be divided up, less expenses; while, if the bill of sale be declared void, the stock, valued at \$25,000 will go in for general distribution. The adjudication in the bankruptcy proceedings takes place, Thursday, May 2, and if the firm consent to being adjudicated bankrupts, an election of a trustee will probably be held May 12.

Women and Children Prohibited from Being Polishers or Buffers.

ALBANY, N. Y., April 28.—Governor Odell has signed the Costello bill prohibiting the employment of women and children at polishing and buffing. The bill passed the Assembly Feb. 28 and the Senate April 19. The text of the bill follows:

1. Section ninety-one of chapter four hundred and fifteen of the laws of eighteen hundred and ninety-seven, entitled "An act in relation to labor, constituting chapter thirty-two of the general laws," as added by chapter three hundred and seventy-five of the laws of eighteen hundred and ninety-nine, relating to the employment of women and children at polishing or buffing is hereby made section ninety-two.

2. This act shall take effect immediately.

Worcester, Mass.

It is now thought the creditors of W. A. England will accept his offer of 60 cents on the dollar.

The stock of the George H. Corbett Co., corner Main and Exchange Sts., is being sold at auction.

The Giant of Collar Buttons

IN QUALITY,
IN SALES.

One Million Five Hundred Thousand Kremenz One-Piece Collar Buttons made and sold within the last year.

WHY?

Because of their HIGHEST QUALITY, BEST CONSTRUCTION, GIVING THE MOST WEAR, AND GREATEST COMFORT and their IRON-CLAD GUARANTEE.

To verify this we invite the trade to read "The Story of a Collar Button, with Illustrations," which may be had FREE for the asking, and to try the experiment suggested on page 5 of that booklet.

Extract from "Printers' Ink," Nov. 23, 1898.

The Little Schoolmaster now suggests, to every pupil in his class, to send a two-cent stamp to Kremenz & Co., 49 Chestnut Street, Newark, N. J., and ask to be favored with a copy of their leaflet, "The Story of a Collar Button." Afterward, if any pupil will send to *Printers' Ink* another leaflet, new or old, that is half as good as this one, or that approaches it in excellence, the deserving student will be rewarded with one of *Printers' Ink's* souvenir spoons as an acknowledgment of his discovery and contribution. "The Story of a Collar Button" is the best piece of advertisement construction that has come to *Printers' Ink's* attention in the year of our Lord 1898.

Should you wish to utilize this booklet to increase your collar button business, we will, on receipt of your order, print your card upon and send you a quantity of them.

Kremenz One-Piece Collar Buttons are stamped as follows, ON BACKS:

Patent sustained by United States Supreme Court.

Quality and Construction have made our reputation.

Providence.

Thomas J. Gardner has severed his connection with Brown & Dean Co.

Sullivan Ballou, formerly treasurer of the Howard Sterling Co., is now associated with the Joseph Banigan Rubber Co.

W. S. Hough, Sr., of the Wightman-Hough Co., has returned much refreshed in health from an extended sojourn in Florida.

Fred W. Nichols will sail, this week, for Europe in the interests of Allen & Jonassohn, of which concern he is traveling representative.

Thomas Catlow, formerly of Catlow Bros., and now salesman for William H. Goff, Jr., & Co., Attleboro, was married last week to Miss Mary Sprague, of this city. C. H. Brown, with J. L. Crandall & Co., gave a reception in honor of the newly married couple at his residence at Pawtuxet, on the evening following the ceremony.

Representatives of the Gorham Mfg. Co. have recently made a protest that is likely to prove effective against the lenient treatment in the District Court here of offenders charged with the larceny of silver from the factory of the Gorham Co. at Elmwood. Sentences or fines have been suspended and prisoners discharged upon the payment of costs in some cases, and it is reasonable to argue that the moral effect has not been sufficiently strong to deter others from possible petty thefts of stock. In the future it is probable that convicted culprits will receive more nearly the full penalty of the law.

The property contained in the plant of the O'Donnell Jewelry Co., 357 Eddy St., was bid in for \$80 by T. M. O'Reilly, attorney for the assignee, at the assignee's sale, held on the premises, last Tuesday. The property was sold under the foreclosure of a chattel mortgage, held by D. F. Goff, and given for \$200, Oct. 8, 1900, by the members of the firm, Edward F. Seery, Mary O'Donnell and Rosella O'Donnell. Mr. Seery, who is a veteran of the Civil War and well and favorably known by the old time members of the jewelry trade in this vicinity, will retire from business and go to the Soldiers' Home, at Bristol, R. I.

The committee of judges have just rendered their decision in the contest by students in the Rhode Island School of Design for the annual prizes given by the New England Manufacturing Jewelers' and Silversmiths' Association. The subject chosen for this year's competition was a seal for the Association, modeled and cast in plaster of paris. The prize winners were Miss Ethel Pierce, first, Ernest Lohrman, second, and George L. Turner, third. The members of the committee from the Association were: Frank T. Pierce, president, George L. Grant, Roswell C. Smith, John L. Remlinger and John M. Buffinton.

J. Nielson & Sons, Biloxi, Miss., have moved to new quarters.

Thieves broke the window of W. J. Lohead's jewelry store, 1052 Pennsylvania Ave., Baltimore, Md., recently, and stole a tray of jewelry valued at \$125.

Attleboro.

Peter Nerney, of the Bay State Optical Co., was elected to office last week at the annual meeting of the Episcopal church.

Walter F. Eldridge, the local jobbing jeweler who filed a petition in bankruptcy in February, has been discharged from liability.

Rhodes Bros. & Rothschild have requested an investigation by the post office department into the non-delivery of considerable mail from their office.

Local houses have begun the manufacture on quite an extended scale of Buffalo exposition novelties, the leader at present being a frying pan with a bison's head in the pan.

Miles L. Carter, of Carter, Qvarnstrom & Remington, and Mrs. Carter, are leaders in the formation of chapters of the Daughters and the Sons of the American Revolution in Attleboro.

George H. Herrick, of G. H. Herrick & Co., has applied to the Probate Court for the probating of the will of his late father whereby he is named as administrator. There will be a public hearing May 17.

The Y. W. C. T. U. have opened an information bureau in Attleboro which comes as near as the law allows to an intelligence office, aiming to get jewelry shop work free of charge for girls and women.

Six local jewelry manufacturers are having investigation made by a civil engineer with a view to erecting in the center of the town a steam heating plant

to dispense steam for heating purposes to dwellings.

Sidney O. Bigney, Frank W. Bliss and Oliver P. Bliss have been associated as the Bristol Mfg. Co., makers of silver novelties, for some months. Last week they incorporated under Rhode Island law with \$36,000 capital.

Charles O. Sweet, Regnell, Bigney & Co.; John M. Fisher, J. M. Fisher & Co., and Everett S. Horton, Horton & Angell Co., were last week made officers in the corporation which has assumed the maintenance of the historic Old Kirk Cemetery in Attleboro.

Henry Wexel, a retired jewelry manufacturer, formerly of H. Wexel & Co., was thrown from his carriage during a runaway at Attleboro Falls, April 28, and so badly hurt that his life is despaired of. His age, 73 years, is also against his recovery. Mrs. Wexel, who was in the carriage, was badly hurt.

Through friends, two young men employed in a Rhode Island pearl working house have purchased two good sized pieces of land on the extreme western edge of Attleboro. They announce that they are about to erect a small pearl works for themselves and a double dwelling which they will occupy as a home.

At a special town meeting, May 2, one of the articles to receive attention is a petition from the firms in the Sidney O. Bigney & Co. building for a fire alarm box in front of the shop for their use. Another matter is the consideration of new by-laws drawn up to regulate the

construction, material and alteration of any future factory buildings which may be erected.

The Attleboro jewelers, with James E. Blake and Frank Mossberg as moving spirits, invited the Rhode Island Automobile Club to be their guests of May Day and it was accepted. Many of the auto owners of the little neighboring State will come to Attleboro to-day, where the local manufacturers have arranged to treat them with fine hospitality.

Herbert A. Clark, of the Horton & Angell Co., was last week appointed inspector of rifle practice on the staff of Brig.-Gen. Jophanus H. Whitney, of the Second Brigade of Massachusetts Volunteer Militia, with rank of major. Major Clark has been for many years a militia man, rising through several grades, and also saw service in the Spanish war.

Attleboro jewelers who are fighting the French reciprocity treaty read with interest, but hardly with approbation, of the dinner given last week by business men and capitalists of New York city to Senator Jules Siegfried, of France, in the Waldorf-Astoria. At that banquet the French reciprocity treaty was extolled as a most desirable measure by M. Siegfried, from the point of view of his country.

Where a traveling salesman is wrongfully discharged the measure of damages is the amount of his salary for the unexpired term of his contract less the amount he had earned or could have earned during such period.

Simmons Watch Chains

Why you should carry a fuller stock of them

There is an actual and growing demand for them.

Simmons Chains are the highest grade gold-filled chains that are made—that can be made.

Every part and appendage of them is made in our factory. Swivels, spring rings, bars, toggles, seals and lockets, as well as the seamless wire (which all other chain manufacturers buy outside).

No chains—not even excepting expensive

solid gold chains—are made with greater care or thoroughness. None are handsomer in design or finished more perfectly to the last detail.

Simmons Chains are the only watch chains that are advertised outside of trade publications.

You can buy no other goods with more safety nor sell them with so little effort.

Demand Simmons Chains of your jobber.

JEWELRY

HENRY FREUND & BRO.,

THE JEWELRY HOUSE,

9-11-13 Maiden Lane, New York.

North Attleboro.

Charles H. Ohler takes steps this week to remove his chain manufactory from Attleboro Falls to Pawtucket, R. I.

The employes of R. Blackinton & Co. are preparing for a grand field day of sports with a clam bake at Lake Mirimichi.

J. Albert Sweet, for some years in charge of the express office at Attleboro Falls, will leave this week to assume charge of the New York office of J. F. Sturdy's Sons.

Wallace G. Franklin, Clarence W. Fisher and Elton B. Fisher are now the partners in E. I. Franklin & Co. W. G. Franklin is son of the late E. I. Franklin. The others are new members.

George K. Webster, G. K. Webster & Co.; George W. Cheever, Cheever, Tweedy & Co.; William H. Riley, Riley, French & Heffron; Fred. S. Gilbert; Walter B. Ballou, retailer; John E. Tweedy, Cheever, Tweedy & Co.; Frank L. Shepardson, F. L. Shepardson & Co.; Charles H. Randall, H. F. Barrows & Co., and Albert Totten, retired, are members of the committee of 15 entrusted by North Attleboro with the general direction of its finances.

Charles H. Tappen, of the D. F. Briggs Co., Attleboro, has been placed at the head of the executive committee of The Attleboros' Driving Club. With the revival of interest in horses among the local jewelry manufacturers, an organization numbering nearly 100 from both Attleboros and vicinity has been formed. There will be a meet Memorial Day. The number of new and speedy horses bought in the past three weeks by local jewelers and added to their stables or to be the nucleus of new stables, numbers over 20, with a similar increase in Attleboro.

A movement of importance to North Attleboro was made last week when the N. Y., N. H. & H. R. R. Co. voted to build a new line from that town to Pawtucket. For the first time in its history North Attleboro will have a direct outlet, instead of being limited to a branch road, to connect the town with the main line. To the jewelry manufacturers it means access for western buyers, better, swifter and more frequent mail service, better traveling facilities for their outside help, and better shipping facilities. For a long time the town's nightly jewelry shipment had to go over the road in wagons to Attleboro, for lack of train service. Such crude methods will cease with the new road. A direct road from Providence to Boston, nearly as direct as the present air line and about parallel to it, will be completed by the construction of this last connecting link.

Canada Notes.

L. Boivin, St. Francois, Que., was sold out, April 30.

John Sterling, Simcoe, Ont., will open a store at Selkirk.

A. G. Hamilton, Kingsville, Ont., is moving to Ridgetown, Ont.

Moses Cochenthaler, Montreal, returned home, last week, from New York.

The stock of H. A. Hattie, Yarmouth, N. B., is advertised for sale by tender.

A. R. Carr, Sydney, N. S., has had a writ issued against him for \$1,504, by J. Carr.

R. L. Douglas, Sackville, N. B., is offering to compromise at 15 cents.

R. Curry, Sydney, N. S., has given a chattel mortgage for \$1,700 on his stock, to H. W. Curry.

Amos Chatfield *et ux.*, Berlin, Ont., have given a renewal chattel mortgage for \$371 to H. F. Pearson.

William Bramley, of Bramley & Robertson, Montreal, has been elected president of the Montreal Lacrosse Club.

The Levy Bros. Co., Hamilton, Ont., have issued a writ against H. J. Stiefelmeyer, New Hamburg, Ont., for \$216.

W. J. Brotherton, Regina, Assiniboia, has sold his business to F. G. England and has bought the jewelry business of G. A. Luno, Medicine Hat.

The stock of H. W. Revell, Meaford, Ont., has been sold to W. H. Wegenast, formerly of Drumbo, Ont., who will continue the business.

Richard Moses Pearce, who acted as manufacturers' agent in Montreal for years, is now conducting an importing business, under the name of Montreal Jewelry Co.

Large crowds continue to attend the auction sale of jewelry and silver ware in the establishment of R. A. Dickson & Co., St. Catherine St., Montreal, and other local jewelers are naturally suffering from the effects of it.

A. F. Milliken, of Milliken & Co., Cornwall, Ont., who for the past 25 years carried on business as jeweler in Cornwall, died April 21, at Brockville. Deceased was about 46 years of age. He was a prominent Mason and belonged to several other societies.

The liabilities of the Attleboro Export Co., Montreal, who recently compromised at 30 cents on the dollar, were about \$10,000. M. E. Stern was the sole registered proprietor and the business had only been established about two years. The business was all in cheap jewelry and all the creditors were American manufacturers.

The jewelry store of J. A. Johnson, Atwood, Ont., was broken into on the night of April 23, and watches, rings and other jewelry of the value of \$300 were stolen, in addition to \$20 in cash. The safe had not been locked by Mr. Johnson in closing his store for the night. The robbers gained an entrance to the building by prying open the front door.

C. D. Maughan, of the Goldsmiths Stock Co., Toronto, left, last week, on a trip to the Maritime Provinces.

F. S. Sherry, Joseph Fahys & Co., New York; Mr. Sherrill, Sinnock & Sherrill, New York; George B. Kenrick, Reed & Barton; Irving Clarke, Whiting Mfg. Co., were in Toronto, last week.

John McEwen, with Rylie Bros., Toronto, has just returned from a purchasing trip to New York and the eastern jewelry centers, where he placed considerable orders for novelties for the coming season.

The Toronto trade was considerably improved, last week, owing to the fine Spring weather and the holding of the Horse Show, a social function which has attracted large numbers of wealthy people from outside places.

Connecticut.

The Armstrong Braiding Co., Yalesville, have moved to Sandwich, Mass.

C. H. Barber, Jewett City, is selling out his stock with a view to moving to Stonington.

The Miller Bros.' Cutlery Co., Meriden, will enlarge the capacity of their new brick addition by adding another story, making three in all, 75x35 feet.

The factory of the Barbour Silver Co., Meriden, was flooded so that six inches of water covered the first floor, during the recent high water in the Connecticut river.

The Benicia Diamond Co., Hartford, have closed their store there. N. A. Rich, the proprietor, says he sold 51,000 "diamonds" during the six months he was there.

F. Biernazki, a wealthy importer of Hamburg, Germany, has been in Meriden on a visit of inspection of the factories of the International Silver Co. Mr. Biernazki entertained at dinner president Samuel Dodd and other officials of the International company.

Augustus D. Hendrick, Ansonia, was found dead on a sidewalk of that city April 21, having died, evidently, of heart disease. Mr. Hendrick was born in Forestville, June 17, 1832. He was employed by the New Haven Clock Co. for over 30 years, and was a skilful, ingenious workman, being the inventor of several styles of clocks. Later he commenced the manufacture of reels for fish rods and continued that business for a number of years. The deceased leaves three sons and a daughter.

Richard Colburn, one of the leading and most respected men of Norwich, who died April 21, aged 85 years, went, when a young man, to Lowell, Mass., and entered the employ of the Merrimac Mfg. Co. He became a skilled mechanic at an early age and manifested an especial aptitude for watch making although he never engaged in the business. At the age of 21 he had charge of all the clocks in the manufactories in that city. For many years Mr. Colburn had charge of the city hall clock in Norwich.

B. F. Kessler, Mt. Carmel, Pa., has purchased real estate in that town.

 - AMSTERDAM—Continental Club, Hotel Amstel.
 - ANTWERP—Diamond Club, Rue de Pelican.

Every line of reading matter in THE JEWELERS' CIRCULAR-WEEKLY, with the exception of a few brief extracts from exchanges, always properly credited, is written exclusively for this journal. Each issue of THE JEWELERS' CIRCULAR-WEEKLY is copyrighted. Permission to quote is extended to other publications provided such quotations are properly credited.

THE jolly, jovial dinner of The Jewelers' League, comprehensively reported in another part of this issue, was permeated with the finest spirit of fraternity. A succession of such affairs is bound to cement the good will and fellowship of the members and to serve as an attractive force in enrolling new names to the long list of those who already enjoy the great benefits of The Jewelers' League.

Diamond Imports in April.

THE monthly returns by Gen. Geo. W. Mindil, Jewelry Examiner at the Public Stores of the Port of New York, showing the imports of diamonds and other precious stones, continue to evidence that unusual increase in the amount of gems coming to this country that has been noticeable since the first of the year. Gen. Mindil's figures for April are the largest ever reported from his department and show that altogether \$2,298,036.85 worth of precious stones and pearls passed through the port in the last 30 days, of which, \$1,579,491.72 was cut and \$718,545.13 uncut. A comparison with the figures for April of the preceding four years is interesting and is as follows:

	Cut.	Uncut.	Total.
April, 1900.....	\$298,021 87	\$53,632 57	\$351,654 44
" 1899.....	533,210 65	472,903 16	1,006,113 81
" 1898.....	336,172 04	109,265 79	445,437 83
" 1897.....	21,639 72	31,671 58	53,311 30

The total importations for the first four months of this year amount so far to \$8,402,934.68, being far ahead of the largest four similar months of any previous year and larger than the importations of some full years.

What is a Memorandum Transaction?

THE decision of the Appellate Term of the New York Supreme Court in the case of Ludwin against Baruch, published in full in THE CIRCULAR-WEEKLY, last week, while not distinctly on a memorandum transaction, took up the conditions often entering into an ordinary memorandum transaction in such a way as to make it exceedingly interesting to the jewelry trade. Although there is nothing in the opinion written by Judge Leventritt that is new law, he has, however, brought together tersely so many points in the questions that have come up in previous transactions as to make the decision worthy of careful study. One point it particularly emphasizes, and that is that the entrusting to another of merchandise by a dealer under an agreement whereby the dealer gives an unrestricted power to sell, makes the party to whom the goods are entrusted a factor, and that a pledgee in good faith is protected to the amount of his lien under the factor's act. The Court, however, goes on to expound that the extent of the agent's authority may always be shown, and where goods are given merely for disposal to a specified party, the innocent purchaser or pledgee will not be protected. It will, therefore, be seen that the transaction between a dealer and his agent, no matter of what kind, is to be judged from the circumstances entering into the transaction. Unfortunately, many jewelers are constantly entrusting goods on what they

call "memorandum" but what gives to the person a general or unrestricted power to sell and other indicia of ownership which would put their transaction in the same catalogue with the one just decided by the Court and give a pawnbroker with whom such jewelry was pledged a lien upon it for the full amount of his advances. The mere fact that these transactions are called memorandum does not change their status in any way. "Memorandum; there is no magic in that name," said Magistrate Hogan, at a hearing recently held in the Tombs Police Court. "You jewelers by calling a sale memorandum expect to use the criminal law to collect your debts." Unfortunately, there is some truth in the Magistrate's criticism and many members of the trade often think that by calling a transaction memorandum, though making it a sale in fact, they have, by some magic in the name, protection which the law does not otherwise allow. Memorandum, it should be understood, to be effective should be nothing more than what is legally known as *bailment*. The goods entrusted on memorandum properly cannot be transferred from the hands of the agent, except back to the original owner, and no sale can be made or title passed except by the original owner. There is no safety for the jeweler except in pure bailment.

Letters to the Editor.

JUDGE LEVENTRITT'S DECISION ON MEMORANDUM GOODS.

NEW YORK, April 29, 1901.

Editor THE JEWELERS' CIRCULAR-WEEKLY:

I note that in your issue of the 24th inst. you print verbatim the decision rendered by Mr. Justice Leventritt in regard to memorandum goods. There seems to be a good deal of misapprehension among the trade as to its scope. It seems, according to the opinion, that where a salesman, who has unlimited power of sale, pledges them with a pawnbroker, the broker has a lien on them to the extent of his advances. The Court reasons that where a person entrusts to another goods with a general power of sale, thereby clothing him with all the indicia of ownership, "he will not be allowed to make claim against an innocent purchaser dealing on the faith of such apparent ownership."

The question then arises, Does the pawnbroker deal with the pledgor "on the faith of such apparent ownership"? Suppose A walks into the shop of B, a pawnbroker, and offers to pledge a ring; is there any one who believes that the pledgee makes any inquiry as to the social or business status of A? If the broker takes it on faith from an utter stranger without question, the faith is such a confiding one that the law takes no cognizance of it.

The pawnbroker is allowed an excessive rate of interest because in his business he must take many risks. There would otherwise be no equity in allowing ordinary citizens to charge 6 per cent. and the brokers 30 per cent.

The Court further says, "he had the indicia of ownership, upon which the defendants relied." This being so, then the only way to win a case of this character

from the brokers would be to establish affirmatively that the defendants did not act in good faith or take all precautions that a reasonable and prudent man should. But this would be contrary to our decisions, which hold that one need not establish that he is entitled to the goods in question, and after having done so the burden then shifts to the defendant to show that he received the goods bona fide, relying on the apparent ownership in the pledgor.

This decision does not change the law as regards memorandum goods to any appreciable extent—in fact, it practically reaffirms it when it states that where given "for disposal to a specified third person, a purchaser or pledgee will not be protected."

Some question has been raised as to whether a failure to file the memorandum bill would prevent recovery, and it is the humble opinion of your correspondent that even where there is a failure to file the bill, in cases similar to Heilbronn vs. McAleenan and Anderson vs. McAleenan, there may still be a recovery.

The question as to whether the offender could confer a good title has been gone over in our courts very exhaustively, and the cases hold that if the goods are obtained by trick, artifice or fraud he cannot confer a good title. In such cases a failure to record the transaction would not bar recovery. As to any other case, where goods are sold conditionally and the transaction recorded in due course, there can be no question but that a recovery can be

had against any purchaser, pledgee or mortgagee in good faith (Chapter 418 of the Laws of 1897). Yours very truly,
MILTON M. GOLDSMITH.

Status of the Engravers' Strike in Newark Watch Case Shops.

There was practically no change in the situation of the strike in the factories of the Crescent Watch Case Co. and the Courvoisier-Wilcox Mfg. Co., the past week. Both concerns report that their factories have been working and that the force has been gradually increased by individual applications from the old members who have quit the union; a few men going back every day. They claim that they have all the men necessary for the work at the present time and are able to add to the force whenever they so desire. The strikers continue to claim that there has been no breach in their ranks and are still hopeful of obtaining recognition. A meeting was held Friday morning at Shawger's Hall, Rossville, but there were no speeches made, the time being taken up in reading communications from various local unions, encouraging the men in the stand they have taken. Attempts will now be made to raise funds for the support of the men out of work, among the first schemes being a drawing for a gold filled watch, which will take place at Shawger's Hall, May 4. At the meeting of the Central Federated Union, last week, it was decided to loan \$100 to the International Watchmakers' and Engravers' Union to assist them in the fight.

Optical Notes and Briefs.

C. S. Apple, of Indiana, Pa., who has purchased the business of D. A. Tobias, Charlottesville, Va., will develop and make a specialty of the optical department.

The State Department at Harrisburgh, Pa., will pass, next Monday, on the application of J. E. Limeburner & Co., 1706 Chestnut St., Philadelphia, Pa., manufacturers of optical and oculists' instruments, for articles of incorporation.

The following named in the optical trade were present, last night, at the dinner of the Home Market Club, in Boston, Mass., to Vice-President Roosevelt: Edwin P. Wells, president of the Globe Optical Co.; Albert G. Barber, treasurer of the Globe Optical Co.; E. H. Cox, of Sussfeld, Lorsch & Co.; George W. Wells, president of the American Optical Co.; Hiram C. Wells, Albert B. Wells and C. F. Hill, also of the American Optical Co.

Spitzley Bros. have sold their sash, door and blind factory, including all buildings, land and machinery, located on the north and south sides of Beacon St., Detroit, Mich., to the Michigan Optical Co., now located on Miami Ave. and who have outgrown their present quarters. The company will have one of the best equipped plants in the country in their line and will employ about 200 hands. The total consideration is in the neighborhood of \$20,000.

Equity proceedings were instituted in Philadelphia, Pa., courts, Thursday, by Anton Wagner, optician, 1018 Chestnut St., to have John L. Borsch & Co., opticians, Juniper and Walnut Sts., restrained from making an alleged infringement on Mr. Wagner's alleged patented improvement in an elliptical lens for optical instruments. Mr. Borsch denies that there is any infringement and explains that he has documentary evidence of the most convincing kind to prove that the lenses referred to were used in Germany and elsewhere long before Mr. Wagner began their sale.

The Boston optical trade is to receive an addition by the opening of a new firm, who, under the name of L. W. Bugbee & Co., have been preparing quarters at 352-4-6 Washington St. The firm will manufacture all kinds of optical goods and will also do a prescription trade. The men composing the firm are L. W. Bugbee, who, up to April 1, was the president of the Southbridge Optical Co., now absorbed by the American Optical Co., Southbridge, Mass. W. H. Wyman, manager, also a former employe of the Southbridge Optical Co. and previous to that in the employ of the Elgin National Watch Co., the Dueber-Hampden Co. and the Illinois Watch Co. The name of the third man was withheld at the office of L. W. Bugbee & Co., but it is said to be Albert Lord, of Lord Bros., Tilton, N. H. Mr. Lord was in business in Boston about two years and will be remembered under the name of the Boston Optical Co. The firm of L. W. Bugbee & Co. have secured fine quarters and will have one of the best equipped plants in New England. The main room for manufacturing purposes is 80x22 and is lighted by an immense skylight.

(Optical Notes continued on page 56.)

If this happens

THREATEN TO RAISE DIAMOND PRICES

ANTWERP, Sunday.—Diamond merchants here declare that the De Beers company intends to raise the price of diamonds thirty per cent on April 1 or May 1.

The company's reason for the projected raise is said to be the reported determination of the English government to make the largest part of the financial burden of the Transvaal war fall on the backs of the Rand mine owners. The mine owners have indignantly protested against such a course, and if their general raise in prices of diamonds. Only in this way, they are said to contend, can they meet the heavy demands of the government.

will you get caught short? No better time to get your customers to invest in diamonds, or to invest your money in diamonds. We have a very complete stock, and while it lasts, it is subject to your call at present prices.

Anything you want, loose or mounted, "on memo."

CROSS & BEGUELIN

Importers and Cutters of Diamonds and Precious Stones

43 Rue de Meslay, PARIS Telephone, 2188 Cortlandt 17 Maiden Lane, NEW YORK

New York Notes.

Munter Bros., jobbers in jewelry, have moved from 499 Broadway to 500 Broadway.

William E. Cohn and the Diamond Cut Glass Co. have moved from 37 to 51 Maiden Lane.

John C. Dueber, president of the Dueber Watch Case Mfg. Co., Canton, O., spent a few days in New York, last week.

Aaron Lauterbach, dealer in diamonds and precious stones, formerly of 41 Maiden Lane, is now located at 14 Maiden Lane.

George C. White, formerly president of Rogers & Bro., returned yesterday from his trip to California, on which he was accompanied by his wife.

L. Heller & Son, importers of precious and imitation stones, are now installed in their handsome new quarters, at 51-53 Maiden Lane, where they have greatly improved facilities.

Jacob Strauss, of Jacob Strauss & Sons, left Thursday, for Europe, where he will visit London, Amsterdam, Antwerp and Paris, purchasing diamonds and precious stones for his house.

Mrs. Leonard Miller, of Philadelphia, formerly Miss Grace A. Parke, of Camden, N. J., for several years private secretary to George F. Kunz, with Tiffany & Co., was burned to death, last week, in Philadelphia.

The engagement has been announced of Miss Katrina Brandes Ely, of Philadelphia, to Charles L. Tiffany, 2d, of New York. Mr. Tiffany is the son of Louis C. Tiffany, of the Allied Arts Co., and grandson of Charles L. Tiffany, of Tiffany & Co.

A horse attached to a florist's wagon ran away along Fifth Ave., Friday afternoon, and when headed off by some street cleaners, plunged into a store at 59th St. and Fifth Ave., which is about

to be opened as a jewelry store. An \$800 window was broken and the horse badly injured.

Work has been commenced at Sag Harbor L. I., on an addition to the Fahys Watch Case Co.'s factory. The new part will be built up between the water tower and the main building and is to be 125 by 20 feet in dimensions, of brick with a fireproof roof. The room, when completed, will be occupied by the engravers of the Alvin Mfg. Co., silversmiths, whose factory is in this building.

It was reported, Monday, that warrants had been issued for two Italians whom the New York police believe to be the murderers of Meyer Weisbard, the instalment jewelry salesman, whose mutilated body was found in a trunk on the Old Slip pier, Jan. 16. The suspects have been traced to Sullivan county, N. Y., then to Port Jervis and from there to Pennsylvania. Their immediate capture is expected.

Jacob Rapport, a dealer in jewelry at 529 Broadway, filed a voluntary petition in bankruptcy, in the United States District Court, Thursday. The schedules show liabilities of \$2,724, while his assets are about \$264, the amount of accounts due him. The debts were all contracted in 1900 and are to about 40 creditors, none for large amounts. Among those for more than \$100 are: Chase Mfg. Co., \$150; C. H. Cooke Co., \$176; P. J. Cummings & Co., \$178; Joyce & Co., \$110; Harvard Button Co., \$110; McRae & Keeler, \$178; George J. Smith & Co., \$122; Taunton Pearl Works, \$105; Crossin Jewelry Co., \$117; Fontneau & Cook, \$178.

A young man entered Henry Miller's jewelry store, 645 Fifth Ave., recently, and said he had been deputized by Albert Johnson to select a diamond ring for him. The jeweler, who knew that the man had worked for Mr. Johnson, let him select a diamond

ring worth \$40, and it was agreed that the ring or the money would be returned within 24 hours. Several days later the ring was pawned in a Washington pawn shop for \$15 and the ticket was sold. Miller, not hearing from his customer, called on Mr. Johnson, who denied authorizing the transaction. The upshot was the arrest of W. F. Downs, of 736 Madison St., who, Miller said, was the man who got the ring from him. Downs pleaded not guilty, last week, in the Butler St. Court, and was held in \$500 bail for examination.

In the Supreme Court, Brooklyn, before Justice Maddox and a jury, last week, a verdict in favor of E. B. Hayden, manufacturing jeweler, 75 Nassau St., Manhattan, was rendered in the action brought against him for false imprisonment by W. N. Vreeland, a lawyer. The suit grew out of an event which occurred in Mr. Hayden's office in September, 1899, when one, Lloyd Taylor, called after he had had a ring repaired. Taylor and a young woman who was with him brought back a ring and claimed that a substitution had been made in the stones. Mr. Hayden, by referring to an envelope originally sent to Taylor, which had contained the jewelry, showed by a memorandum on it that the articles brought back were not the articles repaired. Taylor called later with his lawyer, and, when the envelope was shown the lawyer, the latter told Taylor to take it and keep it. A dispute ensued and a policeman who was called on the scene took Taylor and Vreeland to the police station. Taylor was released, as was Vreeland, but the latter brought his suit for false imprisonment. After a two days' trial the jury found a verdict in favor of Mr. Hayden.

Charles P. Goldsmith, of C. P. Goldsmith & Co., who was confined to bed for three weeks with a severe attack of pneumonia, is again about and attending to

WEDDING Season Coming! Is your
 Display of **CUT GLASS**
 Attractive and Complete?

business, and is receiving the congratulations of his friends upon his recovery.

The auction sale which had been going on at the jewelry store of M. Straus, 409 Fulton St., Brooklyn, was discontinued last week, and business is now continued as before.

A sale of the fixtures, furniture, silver novelties, etc., of the bankrupt firm of J. T. Scott & Co. was held at 4 Maiden

The Looks of a Case

go a long way in helping the selling. No matter how good the quality, if the case doesn't look well it will be hard to sell. On the other hand, if the appearance is good but the quality poor the case is a fraud and, like all frauds, will prove a boomerang. But attractive appearance and high quality are a combination that is irresistible. Such are the **BELL 14-K. GOLD-FILLED WATCH CASES**. They are all hand engraved and made and finished in every respect as well as the best, and will last longer than many, solid gold cases. There is no limit to the variety of designs. If nothing in stock will please a customer we will engrave anything to order, and, remember, this is the only filled case that will permit of this.

The "Bell Special" Gold-Filled Watch Cases are 10 dwt. standard and are the only filled cases made with the quality and quantity of gold stamped in the cases.

BUY OF THE MAKER.

The Bell Watch Co.

Factory, Mansfield, O.

General Offices,

Champlain Bldg.,

CHICAGO, ILL.

Lane, Saturday. James P. Silo was the auctioneer. The selection of a trustee for the bankrupt estate went over yesterday for one week. The 15 per cent. settlement offered by the bank to the creditors is in process of adjustment.

T. S. Afflick, the floor man and detective at Hegeman & Co.'s store, 196 Broadway, who is well known in the jewelry trade, has gone into business for himself at 231 Fulton St. Before going with Hegeman & Co. Mr. Afflick was for 10 years with Tiffany & Co. and nine years with the Gorham Mfg. Co., but had to abandon the silver business on account of ill health.

David Lowenthal, of 215 Washington St., Jersey City, was fleeced out of \$25 last week in the purchase of a diamond from an itinerant jewelry vendor. The man showed Mr. Lowenthal a diamond, which was tested by a jeweler and found to be genuine. After Lowenthal had paid \$25 and received the stone he discovered that an imitation diamond had been palmed off on him in the place of the one tested. The police are looking for the swindler.

Two auction sales of assets of jewelers now in bankruptcy are advertised by Seaman Miller, referee in bankruptcy, to take place at the auction rooms of Joseph Shongood & Son, 26 Lispenard St., May 9, at 11 o'clock A. M. Both sales are of outstanding accounts on instalment leases, one lot being due to Jacob Kornreich and estimated to aggregate \$25,000, and the other to David Linder, estimated at \$10,000. The trustee in each case reserves the right to withdraw the accounts from sale unless they shall bring at least 75 per cent. of the appraised value.

Among the judgments against W. L. Pollack & Co., declared canceled last week, owing to the firm's discharge in bankruptcy, were the following: By J. Heilbronn & S. Marchand, \$1,625.93, entered Oct. 21, 1897; by S. Sondheim, \$2,070.60, entered Oct. 21, 1897; by D. Untermeyer *et al.*, \$708.16, entered March 17, 1898; by J. Wertheimer, \$717.21, entered Oct. 15, 1896; by A. L. Strasburger *et al.*, \$622.97, entered Oct. 8, 1896; by A. L. Strasburger *et al.*, \$905.12, entered Oct. 15, 1896; by E. F. Kipper *et al.*, \$838.24, entered Oct. 15, 1896, and \$431.33, entered Oct. 8, 1896.

Two burglars were surprised in a daring attempt to loot the house of Daniel Krause, a broker and jeweler, living at 60 E. 108th St., early Friday morning, and were chased several blocks by policemen, who fired at the fugitives freely with their

pistols. A man, supposed to be one of the fugitives, was captured in a hallway, hatless and wounded, and was identified by Mr. Krause as one of the thieves. The prisoner, who gave his name as Frank Miller, of 137 E. 77th St., was held in \$2,000 bail for examination. The police say he is an ex-convict and has served several terms in prison.

An involuntary petition in bankruptcy was filed in the United States District Court, Thursday, against Fanny Morris, a dealer in jewelry and musical instruments, 22 Bowery, who assigned March 11. The petition is by the following creditors: Rosenbaum & Adler, \$215; Dattelbaum & Friedman, \$91; S. & I. Berman, \$102, and David Mayer, \$98. It was alleged that she committed an act of bankruptcy by making an assignment. According to her schedules, as published in *THE CIRCULAR-WEEKLY*, the liabilities are \$1,775 and the assets are worth nominally \$925 and actually \$716.

The regular bi-monthly meeting and dinner of the New York Credit Men's Association was held, Thursday evening, April 25, at the Drug Club. About 150 members were present. A. H. Watson, president of the association, presided and read letters of regret from Samuel Rosenthal, president of the Baltimore Credit Men's Association, and communications from ex-Senator David B. Hill, ex-Speaker Thomas B. Reed, George W. Ray, William Sherry, manager of the Clearing House, and Bishop Henry C. Potter. Marcus M. Marks, president of the Wholesale Clothiers' Association, was the first speaker, and was followed in succession by Rev. Dr. William S. Rainsford, Hon. Abraham Gruber, M. C. Wilbur and B. I. Shoninger. The association will not resume their meetings until Fall.

The nervous manner of Prince Henri de Croy, a Belgian nobleman, who arrived Sunday, on the *Potsdam*, excited the suspicion of customs officer Andrew McCort, who took the passenger aside and insisted on searching him. In the prince's clothes and hidden away in various places Inspector McCort found an emerald and diamond ring, an emerald and diamond bracelet, three silver snuff boxes and two angora shawls. The jewelry was first said to be worth about \$2,500, but the value later placed on it was about \$500. De Croy was allowed to depart and the jewelry was taken to the Custom House, on Monday, and sent to the seizure room. It was expected that an application would be made for its release, on the ground that the passenger was soon to take it out of the country, but no proceedings to have it released were taken up to Tuesday morning.

The Mercantile National Bank

OF THE CITY OF NEW YORK,

BROADWAY AND DEY STREET,

Solicits Accounts from the Jewelry Trade.

Philadelphia.

John Lang has recovered from a serious illness and is back at his office again. William P. Sackett sails for Europe to-morrow on a 10 weeks' business trip.

George Spoerhase, son of Louis Spoerhase, retail jeweler, Lancaster Ave., was married last week.

John Frewen, Jr., jeweler, 910 N. Watts St., was married, last week, to Margaret La Barte, 1512 N. Warnock St.

Julius Batorie, well known to the jewelers of this city as a retailer, has sold out and returned to Germany, his native place.

Jacob Garber, of Garber & Chattin, manufacturing jewelers, 8th and Sansom Sts., has returned from a southern pleasure trip.

George Fife, watchmaker, has resigned his position with S. Kind & Son to start in business for himself at Freeport, Staten Island.

Harry G. Kammerer is with Francis Pritty, not William Kammerer, Jr., as reported in this column last week. William, Jr., is with J. Warner Hutchins.

Prof. F. W. Schuler, of the Philadelphia College of Horology, who has been confined to him home with grip, has recovered and resumed his old duties.

L. P. White, 706 Chestnut St., has rented a cottage at Atlantic City for the Summer and will reside there after June 1, as has been his custom in past years.

Mr. Beans, of the Philadelphia Watch and Jewelry Co., Bordentown, N. I., was in this city the past week making arrangements to have his store altered and enlarged.

The hearing of the motion to squash the indictment against Herman Keck, accused of smuggling diamonds, was to be argued in the United States District Court here to-day.

H. N. Allebach, 120 N. 7th St., is having alterations made to his store. Mr. Allebach makes a specialty of repair work for the trade, particularly grandfather's clocks.

Thaddens S. Adle, jeweler, Norristown, has been elected District Grand Master of Stichter Lodge, Free and Accepted Masons, and attended an anniversary of the lodge at Pottstown last week.

Harry Michael has resigned his position as manager of the silver ware department of Wanamaker's store. Others to leave the same house are J. Niskey, in charge of the silver novelties, and John Teal, a salesman.

Jules Graff, in charge of the watch repair department of B. F. Williams Co., has gone to Switzerland to visit his father.

Frank Riggs will have charge of the watch repair department during the absence of Mr. Graff.

The will of Oliver S. Hemphill, for 40 years a retail jeweler at 8th and Race Sts., and who died recently at 2019 Wallace St. was probated last week. An estate worth \$11,000 is disposed of. His widow is named as sole legatee and executrix.

A jewelry store window display that has attracted the attention of scores of pedestrians and which has been highly commented upon by the trade, was that of the Bailey, Banks & Biddle Co., who have been exhibiting a fac-simile reproduction of the Electric Tower at the Buffalo Exposition. The model cost \$2,000.

At the annual shad dinner of The Philadelphia Jewelers' Club, Saturday night, at the Bourse building, about 150 guests attended from this city, New York and the east. The committee who had charge of the dinner were: J. Warner Hutchins, chairman, William H. Long, William P. Sackett, A. G. Lee and Newton B. Eltinge. A unique menu was distributed as souvenirs.

The stock, fixtures and machinery of the Missimer Manufacturing Co., Sansom St., near 9th St., bankrupts, were sold at auction, last week, and brought only \$750. According to the statement made to a CIRCULAR—WEEKLY reporter by Louis Hutt, the attorney, the firm are entirely insolvent, the assets being about \$300 and the liabilities \$7,000. Mr. Hutt also states that William G. Earle, diamond dealer at 9th and Market Sts., is involved to the extent of about \$6,000, having advanced large sums to the firm and holding much of the business stock.

Harrisburgh, Pa.

The Galvin pawnbrokers' bill has been recommitted to the Law and Order Committee of the House, by request of Mr. Galvin.

For the twelfth time within a year the store of W. Zimmerman, at Derry Church, this county, was robbed Sunday night. The robberies have occurred regularly every month and the cash drawer suffered so often that Mr. Zimmerman began to take every penny home with him at night. The burglars secured about \$100 worth of goods the last trip.

Where an agent contracts as principal, and does not disclose his agency, he is personally liable as principal. (88 Ill. App. Ct. Rep., 452.)

The following return has been filed with the Secretary of State by the A. Stowell & Co., Inc., by C. S. Cook, treasurer: Cash and debts receivable, \$55,929; manufactures and merchandise, \$244,593; miscellaneous, \$4,583; total, \$305,375. Capital stock, \$200,000; debts, \$74,101; profit and loss, \$21,274; reserve for depreciation, \$10,000; total, \$305,375.

Derry & Bigelow have sold out their stock of jewelry at 61 Temple Pl. and retired from the field. The store has been leased to A. J. Landry, now at 51 Temple Pl., who will move in at once. This change on the part of Derry & Bigelow was due to their other business interests, which kept them from devoting as much time to the Temple Pl. store as was necessary.

Through some delay the application for a charter for the newly organized Wilson Jewelry Co., Tremont Row, has not, as yet, been filed at the State House. Mr. Woodman, who is now conducting the business, stated, on Monday, that the application probably would be filed this week, but until that time the names of those interested in the new company would not be made public.

E. A. Bigelow, of the E. Howard Clock Co., states that many inquiries have been made as to whether the company are to continue the manufacture of the Howard watches. He says arrangements are being

made to do this and that this Fall they will have a general line of high grade movements. The E. Howard Clock Co. have recently received contracts for establishing their watchman's clock system in the Medfield, Mass., Insane Asylum, and the Sullivan Machinery Co. plant, Claremont, N. H. Orders have also been received for 12 special clocks for the switch towers of the Boston Elevated Railway Co.

Magnus A. McSwain was arrested in New York, last Friday afternoon, charged with the larceny of a lot of watches, diamonds and other jewelry, all valued at \$1,300, from Oscar E. Berry, 694 Washington St., known as the Hub Mfg. Co. McSwain worked for the concern and, on Thursday, was given the goods to sell in Massachusetts on leases. Instead, it is alleged, he jumped over to New York. The New York police were notified and he was arrested, so it is said, while trying to pawn some of the property. He will be brought to Boston for trial as soon as requisition papers have been issued.

George E. Bennett, formerly a jewelry manufacturer in Attleboro, Mass., and well known to the Boston jewelry trade, was arrested in Springfield, Monday, and brought to Boston to answer a charge of polygamy. In the Superior Criminal Court, April 23, Bennett was held for the Grand Jury in the sum of \$800 and, in default of bail, was committed to the Charles Street jail. Bennett is a man 45 years old and has a large acquaintance among the jewelry trade in New England. While in Boston he lived at 546 Tremont St. and also 876 Harrison Ave. The complaint on which the arrest is based came from Emma L. Hotchkiss, who calls herself wife No. 2. She lives at 430 Columbus Ave., South End. It was on Jan. 12 that she changed her name, she says. Justice of the Peace George F. Bicknell, of Attleboro, performed the marriage ceremony. The complaint made to the police alleges that Bennett remained with her a single night and then departed with \$70 belonging to her, which was given as a loan. It is also charged that Bennett married Gertrude Ferroll on Feb. 4 last.

Broken Glass Worth More than the Stolen Watches.

SALINA, Kan., April 20.—Burglars broke into Frederick Baier's jewelry store a few days ago and secured about \$50 worth of watches. The watches were hanging on a string in one of the display windows. An iron rod, taken from the brake of a freight car, was used to effect an entrance. A hole was punched in the plate glass window on a level with the string of watches and the string broken. Then two more holes were punched through the glass at the bottom of the window and seven watches, which had fallen from the broken string, were removed. The value of the glass broken is \$70, insured.

Trans-Atlantic Voyagers.

TO EUROPE.

F. R. Appleton, of Robbins & Appleton, New York; Bert Sinauer, with Oppenheimer Bros. & Veith, New York; Sol. Fox, of Fox Bros. & Co., Cincinnati, O.; H. M. Carle, Chicago, and H. J. Deveen, New York, sailed, Wednesday, on the *Oceanic*.

It Assists You

in selling larger and finer stones—that's one of the advantages of our system of **GRADING DIAMONDS**. In a large percentage of cases where we send goods on memo. for special sales, it is the finest stone that is sold.

When a customer sees the difference between several qualities, as shown by our grading system, he generally selects the best. Our many customers have found this to be so. A system like this, that induces larger sales, is appreciated by the progressive jeweler.

When you have a customer for a fine or extra fine diamond, a trial order will convince you of this, and our prices will bear favorable comparison with any in the market—they are such as induce sales. Remember, we guarantee every stone to be exactly as represented.

S. C. SCOTT MFG. CO.

9, 11, 13 Maiden Lane,
New York.

A. J. Dundas will open a jewelry store in Quitman, Ga.

A jewelry store has been opened at Worthington, Minn.

J. M. Kreider, of Lexington, Pa., will open a store at Denver, Pa.

L. C. Smith, Gainesville, Fla., has moved his business to a new location.

N. C. Adlon, Oskaloosa, Ia., expects to open a store at Oklahoma City.

Petit & Carson, New Rochelle, N. Y., will open a branch store at Larchmont, N. Y.

H. M. Goldstein and William Weisser have opened a store at Peoria, Ill.

Charles Chase, Omro, Wis., has made interior improvements to his jewelry store.

Floyd C. Day, Utica, N. Y., will locate at Frankfort, N. Y., in business for himself.

J. E. Gustafson, McPherson, Kan., has sold out to J. F. Fontron, of Hutchinson, Kan.

George K. Munro, Grand Forks, N. Dak., has moved his jewelry store into new quarters.

Richard Henderson has occupied a hardware store in Emmons, Minn., with a stock of jewelry.

A. H. Dey, formerly of W. L. Young & Co., Geneva, N. Y., has opened an optical parlor in that city.

E. W. Cady, who was in business at Browning, Mo., for several years, will locate in New Mexico.

Harold E. Child, Clyde, N. Y., has recently added to his stock a line of sheet music and is finding a good sale.

William J. Smith, of Lowville, N. Y., is about to open an up-to-date, well stocked jewelry store, at Canastota, N. Y.

A Neenah, Wis., jeweler was caught

spearing fish at night, with the aid of a torch. He was arrested and fined \$14.

Ottumwa, Ia., jewelers will close their stores at 6.30 P.M., except Saturdays and except during the month of December.

Two peddlers were arrested at Atlanta, Ga., last week, charged with doing business without a license in selling fake jewelry.

Frank L. Chase, Caledonia, N. Y., is holding an auction sale of his entire stock and will locate at Wayland, N. Y., in the near future.

J. H. Howell, of Sharon, Wis., has purchased the stock of Mrs. S. T. Marcy, White Pigeon, Mich., and will enlarge the business.

Fire damaged the store of L. Faust, Donora, Pa., recently. Mr. Foust was asleep in the store at the time and had a narrow escape.

For stealing and disposing of two watches from the store of J. Jaffe, Birmingham, Ala., a negro named Baldwin was held for the Grand Jury, last week.

James Southgate, for many years in the jewelry business at Honeoye Falls, N. Y., and afterwards of Rochester, N. Y., died, recently, after a very short illness, of pneumonia.

The C. A. Bannister Co., Auburn, N. Y., have recently placed in their store an entire new outfit of mahogany wall cases and show cases, the latter being placed in the horse-shoe pattern.

Jeweler E. R. Fitch, formerly of Auburn, N. Y., has removed to Binghamton, N. Y., and embarked in the real estate business. George T. Talmage & Co. have succeeded him at his former location.

E. A. Lancaster, for the past 10 years with the Brown Mfg. Co., has purchased a half

interest in the jewelry store of Rosenblatt & Co., Greenville, Tenn., and the firm name will be Rosenblatt & Lancaster.

Vautrot & Sidells, Warren, O., who have been in business there for 15 years, have dissolved partnership, Phil Vautrot and Charles Myers purchasing Mr. Sidells's interest. The firm will hereafter be known as Vautrot & Myers. Mr. Sidells retires on account of poor health.

H. W. Overtake has opened a new jewelry business in Chickasha, Okla. Not only jewelers but men in all lines of business seem to be flocking into Oklahoma and Indian Territory and every town is filling up with new stores. There seems to be a business boom in that part of the country.

Mrs. Sarah Margot, widow of A. C. Margot, who conducted a jewelry store in Port Jervis, N. Y., for nearly 20 years, died at the home of her sister in Sharon, Mass., April 20, of paralysis, after an illness of two years. About 14 years ago Mr. Margot died and the following Summer his wife went to Sharon, which has since been her home.

A progressive euchre, attended by almost 300 members, was given in Lancaster, Pa., a few days ago, by the local B. P. O. of Elks. The prize, a handsome Elk badge, a product of the L. C. Reisner & Co. factory, was won by Clayton Seldomridge. The Reisner establishment is now making a specialty of emblem, notably Elk, goods.

George J. Seeles, who has completed a continuous service of 25 years as watchmaker at Auburn, N. Y., is about to take a long and well earned rest. With his wife he will sail, Saturday, on the *Waldersee* and spend several months of recreation in Europe. During his long service at the bench he has served under Jewelers Smith, Bannister and the present proprietor of the same business, W. A. Tice.

WRITE AND ASK US—THAT'S THE WAY.

When we subscribe ourselves as makers of **Jewelers' Findings, Metal Ornaments and Jewelry Components**, we are aware that it is hard for you, who are strangers to us, to become interested.

It is impossible for us to give a comprehensive idea of our line in an advertisement. Here's the way a firm wrote us last month: "Seeing your ad. in 'THE CIRCULAR,' we think you make some things we can use—write and tell us about your line." We did, and they are our customers now, and they're glad of it—so are we

It's wonderful what a lot of good a postal card or letter will do.

GEO. W. DOVER,

80 Clifford St., Providence, R. I.

P. S.—Mix a few of Dover's ideas with yours and *watch* them effervesce.

National Monthly Import and Export Statistics.

WASHINGTON, D. C., April 28.—The records of the Treasury Department contain the following comparative statistics of interest to the jewelry trade for March, 1900 and 1901, and for the nine months ending March, 1901:

factory of the M. S. Benedict Mfg. Co., brought in a verdict for \$6,000 for the plaintiff in Justice Merwin's term of the Supreme Court, Wednesday afternoon last. The defendants are protected under an employers' liability insurance policy, issued by the Fidelity and Casualty Co. Miller, who is about 17 years old, lost a portion of his right hand while operating a metal rolling machine in the factory of the Benedict Mfg. Co. He said that he was set at work at the machine without any knowledge of its mechanism and asserted that he was hired to work in another department.

Syracuse, N. Y.

James H. Morse returned, Monday, from a few days' stay in Boston.

E. B. McClelland has been elected one of the directors of the Syracuse Catering Club. They have leased the Crownhart

Inn, at Onondaga Valley, and will fit it up in attractive style.

The jury in the suit brought by Frederick Miller, by guardian, against M. Stuart Benedict and Harry S. Benedict for injuries sustained while at work at the

Chicago Notes.

All communications in reference to the Chicago department of *The Jewelers' Circular-Weekly*, addressed to Stephen Parlin, 134 Van Buren St., Room 213, Chicago, will receive prompt attention.

TRADE CONDITIONS.

Trade has run along about as usual with the jobbing houses, not much in excess of last year but fully up to it. There may be a little less doing in the way of selections by buyers in person, but mail orders are more numerous than last year and they foot up well. Agents for eastern factories are growling a little and it would seem that manufacturers' sales are hardly keeping up with the jobbing trade. Local manufacturing jewelers are busy on new work and have had no opportunity as yet to accumulate stock. Clock business is holding up well, considering it has entered upon its quiet season. Sterling silver continues in good demand. While there is no special mention of the fact in the orders sent in, they are presumably due to the approach of the June weddings. In calling on the Chicago houses one finds a better feeling prevailing than a year ago in this respect. Nothing has occurred to curtail the Fall business, as did the November elections, and a large distribution this Fall is looked for. The jobbing trade are making preparations for Fall trade at least a month earlier than has been their custom.

Stevens, Wallace & Co. have filed a petition in bankruptcy.

W. S. Sparrow, manager for Stern Bros. & Co., is spending the week in New York.

W. F. Adams, of Simpson, Hall, Miller & Co., left, Saturday night, for the north and northwest. C. M. Stone, with the same house, leaves this week for Ohio.

J. R. Davidson, Chicago manager of the Philadelphia Watch Case Co., returned the middle of the week from his St. Louis business visit.

John R. Lilja, diamond man for Benj. Allen & Co., sailed from New York, April 27, on the *Umbria* for a visit of some eight weeks to the foreign diamond markets.

G. T. Frazee and wife, Osage, Ia., were in town, last week, attending the graduating exercises at Hahnemann Medical College, at which their son was a graduate.

Mr. Loer, of the F. C. Happel Co., left, Monday, on the Michigan trip for Mr. Compton, the latter remaining here during May to attend to the traveling men from the eastern factories.

George D. Lunt returned from San Francisco, last week, for the first time since last October. He goes from here to the Towle Mfg. Co.'s factory at Newburyport, Mr. Lunt's old home, and returns to the coast in July.

There were no new developments this week in the case of the receiver for the Stewart building vs. Stevens, Wallace & Co. and the committee in charge of the silver service to be presented to the United States battleship *Illinois*. The set is still at the vaults of the Northern Trust bank.

The rearrangement and redecoration of the salesrooms of Stern Bros. & Co. have been completed and show a marked improvement. The new fixtures are all in quarter sawed oak. W. A. Burrows, watch jobber, occupies a part of the remodeled office, separated from the customers' waiting room by a low solid rail of quarter sawed paneled oak.

A true bill was voted by the grand jury on the morning of April 23 against B. F. Davis, formerly representative in this city of the importing watch house of Hipp, Didisheim & Bro., New York, who mysteriously disappeared last Fall with \$10,000 against him on the books of the firm. For months nothing was heard of him, but he was located in New York this Spring and extradited from that State.

Cincinnati.

Mrs. Constant Van Reeth has gone on a visit to friends and relatives in Europe. She will be gone all Summer.

M. Loeb, of Herman & Loeb, has returned from a western trip and says he had a very good trip and that the wheat crop in the west is one of the largest in prospect for years.

The John Holland Gold Pen Co are having one of their busiest seasons. They have been too busy on orders to pay attention to their new fountain pen, which they will push for the Fall trade.

C. H. Thompson, for many years with E. & J. Swigart, was prostrated a few days ago and was obliged to go to a sanitarium near Indianapolis to recuperate his health. A complete rest and general building up of his health have been recommended by his physician.

Señor M. Altschul, Commissioner from Honduras, arrived in Cincinnati last week en route to Buffalo with a comprehensive exhibit of gold and precious stones. The gold is in bars, ingots, dust and coin. The gems are principally diamonds, opals and turquoises. Two soldiers accompany him as guard.

Exhibits of Rookwood pottery will shortly be sent to St. Paul, Minn., to an art display. Recently a very elaborate display was sent to El Paso, Tex. The Confederation of Women's Clubs, of

Derby, Conn., has asked for a sample line to be exhibited there for educational purposes.

Owing to the existing flood in the Ohio valley, business along the river is stagnant. The dulness is felt in Cincinnati. There has been a dearth even in repair and jobbing. While most of the factories are busy on stock there is no rush anywhere. Many of the travelers are water bound in flooded towns.

The new safety catch invented and recently patented by Gebhardt Bros. is now on the market and is conceded to be a very practical invention. The catch may be applied to any pin, large or small, and is made in various sizes in gold, German silver or composition, as required. Orders have been received from local factories and eastern firms.

Omaha.

J. H. McEachron, Berlin, Neb., visited the wholesale tra'e recently.

S. P. Pearson, Oakland, Ia., has begun the erection of a \$1,000 residence.

O. R. LaMontague, Terry, S. Dak., has sold out his business on account of ill health.

Mr. Metzger, of Grau & Metzger, Manning, Ia., was in the city, last week, attending the wedding of his brother.

George W. Ryan is selling out his stock at auction, preparatory to removing to his new place of business as partner with Mr. Mawhinney.

Gardner Bros.' store in Edgar, Neb., was broken into and \$200 worth of jewelry, watches, rings and silver ware stolen. A few days later Ely Jones, a 17 year old boy recently released from the reform school, was arrested on suspicion.

Griffith & Hall, who have been engaged in the jobbing business in Omaha for several years, take in a third partner, to-day, the firm name to be changed to that of Griffith, Hall & Williams. Mr. Williams formerly resided in Omaha and traveled over Nebraska, Kansas and Missouri, in which three States he has a large acquaintance. He will continue covering this territory. For the past year he has been in the retail business in Chicago under the firm name of C. A. Williams & Co. The new firm carry a full line of jewelry, materials and findings, and a line of watches and other goods needed by the retail trade.

O. M. Campbell, Denison, Ia., has published a "Watchmaker's Combined Register," which is expected to prove of great advantage in keeping accurate rec-

ords of watches. The Shook Mfg. Co. have taken the Nebraska agency.

Fred. S. Pease, Dunlap, Ia., has recovered from his recent illness.

Rollin Austin, Onawa, Ia., has moved into his new store building.

Hiett Bros., Charter Oak, Ia., with a population of only 772, bought a gross of 17 jewel watches from Shook Mfg. Co. recently.

O. M. Campbell, Denison, Ia., has taken an interest in the Aerial Navigation Co., with headquarters in San Francisco. The company propose to provide means for travel by air ships from one side of the continent to the other in 36 hours.

Watelsky & Price, from Chicago, Ill., are opening a wholesale jewelry store in the Bee building, under the name of the Sterling Jewelry Co. They will have several men on the road. In addition to jewelry they will make a specialty of American and Swiss watches.

Abraham Mandelberg recently made the Anderson gold medal for the Omaha Medical college. It was a Maltese cross suspended from a scroll bar and was given for proficiency in surgery. Mr. Mandelberg is also manufacturing an Elks medal of unique design.

Kansas City.

F. A. Ryer & Co. have engaged in the jewelry business in this city.

E. P. Campbell is making some improvements in his store, putting in a new show window, etc.

G. E. Gilmore, Paola, Kan., was last week in town, buying stock for his store, which he recently opened.

L. S. Grimm, Jewell, Kan., visited Kansas City on his return from Pennsylvania, where he went, three weeks ago, to attend the funeral of his mother.

L. H. Ludwig, of the material department of the Edwards & Sloane Jewelry Co., who has been making a business trip for the firm, spent last Sunday in St. Joseph, accompanied by his wife and baby.

H. B. Carswell, who bought out Charles H. Harsch, 1005 Walnut St., will move from his present location, 1015 Walnut St., this week. The store will be remodeled and will be conducted as an up-to-date jewelry establishment. May 1 was the 21st anniversary of Mr. Carswell's advent into the jewelry business in Kansas City.

George Edwards, the young son of George H. Edwards, of Edwards & Sloane Jewelry Co., wholesale jewelers, broke his leg above the knee joint, last week, by falling under the wheel of a wagon. Young Edwards is the boy Deardurff threatened to kidnap at the time of the recent diamond robbery.

Harry B. Carswell, jeweler, had quite a coincidence to record, last week, when he repaired a couple of watches belonging to J. A. Calvin and O. H. Pitkin, both residents of Kansas City. On Monday he received from the two men, within a few minutes of each other, two watches of the same movement, with cases of the same make, with numbers close together, both suffering from the same derangement and the repairs to each to cost the same.

Only a few out of town customers visited

the local market the past week. They were: Mr. Graves, Memphis, Tenn.; Ben. Hoffman, Leavenworth, Kan.; C. H. Paxton, Richmond, Mo.; L. S. Grimm, Jewell, Kan.; J. H. Whiteside, Liberty, Mo.; Ralph Campbell, Westphalia, Kan.; F. W. Bartlett, Leavenworth, Kan.; J. E. Hathaway, Parkville, Mo.; A. W. Thistlethwaith, Tonganoxie, Kan.; M. H. Fuchs, Independence, Mo., and Horace Shadel, Rogers, Ark.

Denver.

Gus Ehret, engraver for Gottesleben & Sons, this city, has gone to work for R. Ashby, Colorado Springs.

Tony Lubelski has closed out his Cripple Creek store and is devoting all his time to the Colorado Springs store.

Col. J. D. Lewis, auctioneer, has returned to Denver from Atlanta, Ga., and will conduct several auctions in this State.

Arthur West, formerly with David Lamon, this city, has gone to work for M. F. Warren, Colorado Springs.

The wholesale jewelry store of Samuel R. Zwetow, 1633 Arapahoe St., was last Saturday night robbed of opera glasses valued at \$45.

M. F. Taylor, one time the most prominent dealer in native stones in the city but now reduced in fortune, is sick with pneumonia.

Frank S. Kennedy, formerly with Tony Lubelski, Cripple Creek, as watchmaker, has gone to Kansas City, where he will enter the field as a jewelry auctioneer.

Last Friday night the jewelry store of R. E. Reich, 1510 Champa St., was entered. The thieves stole a number of cheap watches. The police believe that the thieves are boys.

Charles Peck, Ottumwa, Ia., is selling out.

The business of the late George S. Dales, Akron, O., will be continued by George B. Dales & Co.

D. A. Tobias, Charlottesville, Va., has sold out to C. S. Apple, Indiana, Pa., and expects to move to New York and engage in the wholesale business.

TOWLE MANUFACTURING CO.,

CHICAGO. NEWBURYPORT, MASS.

San Francisco.

F. F. Barss, Placerville, Cal., called on the trade of San Francisco recently.

T. E. Smith, father of L. H. Smith, with A. I. Hall & Son, died on April 23.

Frank Golden, Carson City, Nev., recently visited the trade of San Francisco.

Julius A. Young has returned from a satisfactory northern trip. Trade conditions there indicate a good year.

Adolph Huguenin, formerly with Shreve & Co., will shortly open a jewelry establishment at 824 Market St.

Andrew M. Armer, of Armer & Weinschenk, is in southern California on a two weeks' trip.

Schussler & Co. will move into their new quarters in the Claus Spreckels annex, June 1, where increased space will enable them to give their patrons better service.

M. L. Levy, wholesale jeweler, has been visiting the Vallecitos oil district of California. Mr. Levy and several other parties will form a company to drill for oil in the district.

The suit of Col. H. I. Kowalsky against Nat. Raphael, jeweler, this city, to recover \$299.99 has been on trial. The testimony showed that Kowalsky executed six notes for the future payment of a bill of jewelry bought from Raphael. One of the notes, for \$265, was turned over to the California Jewelry Co. by Raphael, who was credited with cash to that amount, and the company in turn gave it to a collector. The collector recovered judgment by default for \$265, principal, and \$115 interest, and levied on money in bank belonging to Kowalsky. In the meantime Kowalsky had compromised on a settlement of the six notes, as he thought, by paying \$300 to Raphael, but he afterward discovered that the judgment on the sixth note had been satisfied. He accordingly sued to recover the money paid to Raphael, less one cent, to bring it within the jurisdiction of the Justice's Court.

Pacific Coast Notes.

A. Hohmann will open a store in Riverside, Cal., under the name of the Hohmann Jewelry Co.

G. M. Oberlin, formerly with M. Saier, Fresno, Cal., has opened a jewelry establishment in that city.

Leggett, jeweler, opened a store in the Mace building, Madera, Cal., last Monday. Mr. Leggett was formerly located in Merced, Cal.

The family of S. P. Anderson, who recently bought out the jewelry business of R. C. Richmond, Arcata, Cal., arrived there, last week.

Minneapolis and St. Paul.

E. D. Herrick, an engraver for J. B. Hudson, Minneapolis, has resigned.

G. Hellaver, watchmaker and jeweler, Minneapolis, has removed to Kansas City, Mo.

Weld & Sons, Minneapolis, have put up a new tower clock in front of their present location.

A. E. Paegel, Minneapolis, has returned from a short vacation spent at Glenwood, Minn.

Rentz Bros., Minneapolis, are enlarging their melting room and are putting in an annealing furnace.

L. H. Vehon, representing Lewis Finkelstein, St. Paul, has gone on a trip to northern Minnesota.

R. B. Wegner, wholesaler, St. Paul, has left for a trip to Duluth and Superior and the Iron Range country.

Mr. Wolsey, who was formerly in business in Minneapolis, is now working for Charles D. White & Co. as watchmaker.

J. Kersting has gone out on the northwestern trip for the tool and material department of the Reed-Bennett Co., Minneapolis.

Oliver Bush, found loitering in the stairway leading to E. Lytle's diamond store, St. Paul, early on the morning of April 22 was sent to the workhouse for 10 days.

Among the dealers in the Twin Cities from the country the past week were: A. J. Krueger, North Branch, Minn.; John J. Uhlir, Lowry, Minn.; Peter Weinzerl, Waconia, Minn.; F. J. Hipp, New Brighton, Minn., and Mr. Haueter, of Fernald & Haueter, Bellingham, Minn.

The A. H. Simon stock, in St. Paul, has been removed from the rooms in the Ryan block by the new owner, M. L. Finkelstein. Part of it has been placed with Mr. Finkelstein's retail store and part has been placed in another room on 7th St. in charge of A. Blumenthal, who is Mr. Finkelstein's father-in-law.

The strike of the carpenters in Minneapolis has caused a delay in the removal of the Minneapolis Jewelry Mfg. Co. to their new quarters in the Andrus building. There has been no work done in the building for two weeks and instead of being able to move May 1, it will be May 15 or later before they can get into the new building.

Detroit.

TRADE CONDITIONS.

Until this week weather conditions were not favorable to any line of business and the jewelers of Detroit reported a dull and unsatisfactory trade until real Spring came. Now they are busy again. There was a lively demand for silver ware this week owing to numerous weddings.

Arthur Bennett, of Jackson, has joined the ranks of the Detroit people who are suing the Tontine Surety Co., of Detroit and New Jersey. Last week he began suit for \$960 alleged to be due on eight diamond contracts. He claims that the transfer of the Michigan company to the New Jersey concern was illegal, the result of a conspiracy. He also charges that the liabilities of the Michigan company are \$100,000 and assets not more than \$500. He claims to have paid the company \$960 and never received a cent in return. An injunction was issued restraining the company from paying out any of their cash.

Wright, Kay & Co. yesterday began an auction sale of high priced art goods, the first of the kind in Detroit. The stock will be cleared out preparatory to enlarging the store to take in the adjacent room where this auction will be

held. The new room, when finally equipped, will be divided into four sections and the only entrance will be the present one on the corner. The partition between the new room and the old store will be cut through to four departments, which will contain china ware, silver ware, cut glass and clocks. This will give Wright, Kay & Co. as large a floor space as any store in town.

Pittsburgh.

Thomas Lanyon, bookkeeper for A. E. Siviter & Co., is quite ill at his home.

Steele F. Roberts, of E. P. Roberts & Sons, is ill at his home on College Ave.

Studer & Gaus, Federal St., Allegheny, are holding an auction sale before making a business change.

Bygate & Co., formerly in business at Scottsdale, Pa., have opened a store on Wood St., Wilkinsburg, Pa.

The many friends in the trade of Jacob Grafner, of Grafner Bros., will be grieved to learn of his very serious illness of typhoid fever.

A. Brady and George Fisher are two new jewelers in Sharon, Pa. A. Brady is the son of Patrick Brady, a well known jeweler of that place.

The Barrios Diamond Co., one of the Goldsoll branch stores, have opened up at 209 Fifth Ave., in Hardy & Hayes's old store.

Goddard, Hill & Co., 237 Fifth Ave., are getting their store into shape quite rapidly. Two large new safes were added last week.

Nathan Rosenfield has opened a wholesale establishment on Fifth Ave., near Washington St., in Henry C. Berger's store. Mr. Berger was recently adjudged a bankrupt.

John M. Reynolds, of Hennegen, Bates Co., Baltimore, Md., 35 years ago an employe of Goddard, Hill & Co., visited relatives in this city, last week. Mr. Reynolds has not been in Pittsburgh for many years, and expressed his amazement at the growth of and the numerous changes in the city and its beautiful suburbs.

Among the visitors to the Pittsburgh trade last week were: H. H. Weylman, Kittanning, Pa.; E. H. Kennerdell, Tarentum, Pa.; H. C. Morrison, Mt. Pleasant, Pa.; J. V. Rosendahl, Irwin, Pa.; Robert Wolf, Smithton, Pa.; J. Walter McKeon, Charleroi, Pa.; Bert Thorn, Burgettstown, Pa.; W. E. Curran, Zanesville, Pa.; Charles A. Loughman, McKee's Rocks, Pa.

Among a lot of stolen property taken by Pittsburgh police from a gang of robbers recently arrested here is a diamond brooch, which is estimated to be worth \$250 to \$300. This is believed to have been stolen in Erie, Pa., last November, when a robbery was committed there on the jewelry store of S. Loeb. One of the brooches in the possession of the gang under arrest exactly answers the description and photograph of a brooch stolen from the Erie store.

J. L. Mitchell, Houston, Tex., was called to New Orleans, La., recently, by the death of an old friend, Robert J. Dunlap.

St. Louis.

The heads of the former Merrick, Walsh & Phelps Jewelry Co. and almost all of the older clerks will be kept in the employ of the Mermod & Jaccard Jewelry Co.

Among the buyers in the city, last week, were: A. J. Blackstock, Van Buren, Ark.; C. S. Poole, Joplin, Mo.; George Pettee, Cairo, Ill., and M. E. Schmidt, Boonville, Mo.

Sam and Morris Eisenstadt will go east in a week or two, taking in the Pan-American Exposition en route. They will spend some time in New York and the eastern cities.

Alexander S. Mermod has started for Europe. He intended going sooner, but the big deal whereby his firm bought out the Merrick, Walsh & Phelps Jewelry Co. kept him here several days longer.

J. C. Adams, watch expert, for several years in charge of the watch department of the Mermod & Jaccard Jewelry Co., severs his connection with that firm, to-day, and will take a position in the Texas oil fields.

It is reported that there may be a new jewelry store in the field next Fall. Negotiations are pending to this end. One report has it that eastern capital will be back of the deal, with a local manager in charge, and another is that it will be backed by local capital.

Articles of incorporation have been filed by the Collins Electric Clock Co., with a capital stock of \$100,000. The shareholders named are W. F. Kemper, Ulysses L. Collins, F. William Graudemann and William S. Cowan. The purpose of the incorporation is to manufacture and sell electric clocks at wholesale and retail.

S. H. Bauman, president of the Bauman-Massa Jewelry Co., sailed yesterday, from New York, on the *Kaiser Wilhelm der Grosse*, for Europe, to bring home his son, Leo, who has been attending school at Frankfort, the past year. While in Europe he will select a lot of European novelties and bric-à-brac in the jewelry line. He will be away a couple of months.

May 1, 2, 3 and 4 being the 56th anniversary of the Mermod & Jaccard Jewelry Co., they will celebrate the event by having a great opening. Flowers and souvenirs will be distributed, there will be music by an orchestra each day and evening, and in the evening the store will be illuminated. At the same time they will inaugurate an auction sale at the former store of Merrick, Walsh & Phelps Jewelry Co.

Columbus, O.

Charles Axens, who has been connected with the Bell Watch Case Co., Mansfield, O., is now with the Wadsworth Watch Case Co., Dayton, Ky.

Alvin, son of Frank F. Bonnet, has been dangerously ill for some days, but is now improving slightly. His parents were very uneasy in regard to his condition early in the week.

Curran Bros. have opened their new store in the old Bonnet stand at Zanesville, O. They held an opening one day last week when the store was visited by hundreds of people of the town.

Death entered the home of William J.

Nonnenmacher, of Harrington & Nonnenmacher, Thursday evening, taking away little Arthur, five years of age and the only boy in the family. He ran out to get the evening paper while his father was eating supper and, seeing a wagon passing, caught a rope attached to the brake beam. In some way he was thrown against the wheel in such a way as to break his neck.

Manager William Reel says there is absolutely nothing in the report that the New Columbus Watch Co. are contemplating removal to Appleton, Wis., or any other place. The same was intimated in THE CIRCULAR—WEEKLY, last week. So far as the union labor movement is concerned, that does not touch this factory, as no cases are manufactured. The factory is now very busy turning out movements, for which the demand is increasing.

Pacific Northwest.

There is an opening for a first class jeweler at Joseph, Ore.

W. B. Cipton has opened a jewelry store at Pocatello, Idaho.

H. Neely, Bandon, Ore., has returned from a business visit to Curry county.

Charles Johnson is permanently settled in the jewelry business, at Ione, Ore.

Ralph Kerr, Kalispell, Ore., has established an agency at Bonner's Ferry, Idaho.

Arthur Lord, a recent arrival from Boston, Mass., has opened a jewelry establishment at Anacortes, Wash.

Several jewelry peddlers have been in Albany, Ore., working quietly without a license and on the sympathies of the people.

J. L. Lindsay, recently from Dakota, has purchased a site at Sumas, Wash., and will erect a jewelry shop thereon and engage in business.

Excavation for E. D. Elwood's new jewelry store on 7th St., Medford, Ore., is under way, this week, and the building will be hurried to completion.

Jewelry to the amount of \$75, consisting

of several silver watches, half a dozen chains and articles of jewelry, was stolen from the second-hand store of J. Packer, Vancouver, B. C.

J. H. Leyson, Butte, Mont., has had on exhibition a handsome display of high grade solid silver work, comprising tea sets of massive weight and exquisite ornamentation, and a dainty chocolate set of beautiful Oriental design and rare workmanship. This is the largest shipment Mr. Leyson has ever made.

Lawrence L. Moore & Co., Seattle, Wash., have completed a handsome badge of office for O. M. Moore, executive commissioner to the Pan-American Exposition for the State of Washington. It consists of a miners' pan in gold. In the bottom of the pan in black lettering appears the name "Washington." Around the edge appear the words: "Executive Commissioner, Pan-American Exposition." Crossed within the pan are two miners' shovels. The handles in the pan are in the form of large nuggets. The badge is made from pure native Washington gold.

Indianapolis.

Markle & Day have succeeded W. H. Markle, Rigdon, Ind.

L. F. Kiefer & Son are occupying their new room in the Knights of Pythias building, Massachusetts Ave.

W. M. Heaton, of Knightstown, Ind., visited his son, Robert Heaton, last week. W. M. Heaton is a member of the firm and Robert is manager of Heaton, Sims & Co.

The following dealers were in the city, last week: August Anderson, North Salem, Ind.; George S. Drake, Pendleton, Ind.; E. A. Wiley, Mooresville, Ind.; J. A. Meissen, Cicero, Ind.; Hilton Pauley, Bloomington, Ind.

W. W. Case, Jr., Canandaigua, N. Y., now occupies the entire store in which he is located and has fitted it up in very neat shape.

HENRY ABBOTT, 9 Maiden Lane, New York.

The Latest Patents.

ISSUE OF APRIL 23, 1901

672,456. MATCH-BOX. HENRY C. PAUL and
FRANK HILBIG, St. Louis, Mo. Filed March
3, 1900. Serial No. 7,185. (No model.)

A box comprising a receptacle having a series of
compartments, a lid at one end of the box, a cork-
screw confined in one of the compartments and
adapted to be withdrawn in the direction toward
the lid; the latter being adapted to close after the
screw is swung outwardly.

672,545. MATCH-SAFE. THOMAS A. BELL, New
York, N. Y. Filed Feb. 14, 1900. Serial No.
5,163. (No model.)

A match-safe having a containing-body and an
upper hinged lid or cover of ordinary form, and a
snap or locking spring for the lid or cover secured
within the body and disposed vertically, the said
snap or locking spring having an igniting device
of V-shaped form comprising vertically-arranged
wings converging toward the snap or spring and
having inner roughened faces, the said igniting de-
vice being wholly within the confines of the body
of the safe, and constituting the sole igniting
means therefor, the upper outlet end of the body
being wholly clear for the unobstructed removal
of the matches which are ignited at the time of with-
drawal from the body independent of any function
of the lid or cover.

672,561. TRAY FOR FINGER-RINGS. WILLIAM
LOEB, Providence, R. I. Filed Dec. 24, 1900.
Serial No. 40,848. (No model.)

In a tray for holding finger-rings the combina-
tion with the tray, of slides made of sheet metal
cut out to form side arms having tongues on
their ends set at right angles to the arms to form
hooks to enter the rings, said slides being attached
to the under side of the middle division of the tray
between the rows of ring-receptacles.

**672,609. STEREOSCOPE ATTACH-
MENT.** RODDO Y. YOUNG, New York, N. Y.
Filed Feb. 14, 1901. Serial No. 47,231. (No
model.)

672,619. COLLAR OR CUFF BUTTON.
GEORGE B. GREEN, Greenwich, Conn. Filed
Sept. 20, 1900. Serial No. 30,617. (No model.)

The shoe and shank of a button, formed of a
single piece, the shoe being composed of a complete
loop or ring, an overlying half loop or ring, spaced
from the complete loop or ring, and the shank be-

ing formed with a round curve at the point where
it is turned up from the half loop or ring, the
complete loop or ring being provided with a bend

or depression at a point opposite to the rounding
curve.

672,728. WINDING AND SETTING WATCH.
ARCHIBALD BANNATYNE, Waterbury, Conn.,
assignor to the Waterbury Clock Co., same
place. Filed Dec. 4, 1900. Serial No. 38,651.
(No model.)

In a stem-winding and stem-setting watch, the
combination with the movement-plate formed with
a clearance opening or slot, of an inner interme-
diate winding-pinion located on the inside of the
said plate, and an outer intermediate winding-
pinion located on the outside of the said plate and
rigidly connected with the other pinion and ro-
tating therewith, and also vibrating therewith in
the said clearance opening or slot for "ratcheting
back."

672,796. CORKSCREW. JOHN R. MURPHY,
Harvard, Mass. Filed Feb. 2, 1901. Serial
No. 45,782. (No model.)

In a corkscrew, the combination with the shank
provided with a screw portion and an opening-
handle, of a head mounted on said shank and pro-
vided with a single spur or tooth projecting up-
wardly from its lower portion and acting both as
a wire-breaker and to remove a metal seal-cap from
a bottle.

672,816. HAIR-FASTENER. LOTTIE BASSETT,
Cedarville, Cal. Filed Nov. 22, 1900. Serial
No. 37,331. (No model.)

A hair-clamp, comprising a flat body provided at
one edge with a bearing and at the opposite edge
with a keeper and a serpentine pin, the transverse
portions of the bends in the pin lying practically
at right angles to the longitudinal line of the pin,
for the purpose specified, one end of the pin being
mounted loosely in the bearing and the other end

DON'T FORGET THE JEWELERS' CIRCULAR PUB-
LISHING CO.'S BOOK LIST when in want of any techni-
cal work in the Jewelry or Kindred Trades.

of which is arranged removably to engage the keeper, the pin lying directly adjacent to the body in a plane parallel therewith when engaged with the keeper so that the hair may be passed through the bends in the pin and held pressed against the body to keep the clamp engaged with the hair.

DESIGN 34,390. ADVERTISING-BADGE. MAT-

THEW J. OWENS and FRANCIS M. OWENS, Boston, Mass. Filed March 28, 1901. Serial No. 53,367. Term of patent 3½ years.

DESIGN 34,391. BADGE. NETTIE STADLER, New

York, N. Y. Filed March 27, 1901. Serial No. 53,152. Term of patent 3½ years.

DESIGN 34,392. BADGE OR SIMILAR ARTICLE. CHARLES F. BURKHART, Buffalo, N. Y. Filed May 6, 1899. Serial No. 715,886. Term of patent 3½ years.

DESIGN 34,393. PIN OR SIMILAR ARTICLE.

WILLIAM A. SPIER, Attleboro, Mass. Filed March 25, 1901. Serial No. 52,869. Term of patent 3½ years.

DESIGN 34,394. RING. CHARLES P. GOLDSMITH,

New York, N. Y. Filed March 21, 1901. Serial No. 52,243. Term of patent 3½ years.

DESIGN 34,395. RING. WILLIAM F. JUERGENS,

Chicago, Ill. Filed Feb. 19, 1901. Serial No. 48,019. Term of patent seven years.

DESIGN 34,396. SPRING-SUPPORT FOR ORNAMENTS OF HAT-PINS OR SIMILAR

ARTICLES. ARTHUR A. McRAE, Attleboro, Mass., assignor to McRae & Keeler, same place. Filed March 20, 1901. Serial No. 52,101. Term of patent seven years.

DESIGN 34,397. SPRING-SUPPORT FOR OR-

NAMENTS OF HAT-PINS OR SIMILAR ARTICLES. ARTHUR A. McRAE, Attleboro,

Mass., assignor to McRae & Keeler, same place. Filed March 20, 1901. Serial No. 52,102. Term of patent seven years.

DESIGN 34,399. TYLER CALHOUN, Ridgeway, Tenn. Filed March 18, 1901. Serial No. 51,785. Term of patent seven years.

DESIGN 34,400. HANDLE FOR SPOONS OR SIMILAR ARTICLES. CHARLES OSBORNE,

New York, N. Y., assignor to Whiting Mfg. Co., same place. Filed April 2, 1901. Serial No. 54,092. Term of patent 14 years.

EXPIRED PATENTS.

[Reported specially for THE JEWELERS' CIRCULAR-WEEKLY by R. W. Bishop, Patent Attorney, Washington, D. C., who will furnish complete copies of patents at the rate of 10 cents each.]

Issued April 22, 1884.

297,106. DEVICE FOR HOLDING PENCILS OR OTHER OBJECTS. C. W. BOMAN, New York, N. Y., assignor to Joseph Reckendorfer, same place; Babette Reckendorfer, G. A. Goldsmith and William Strauss, executors of said Joseph Reckendorfer, deceased.

297,123. WATCH-CASE SPRING. W. H. FITZGERALD and G. C. SMITH, Chicago, Ill.

297,213. ENGRAVER'S TOOL. WILLIAM WILDT, Richmond, Va.

297,217. CASE FOR TICKETS. PHILLIPS ABBOTT, Brooklyn, N. Y.

297,248. AUTOMATIC TIME REGISTER. G. W. FOSTER, New York, N. Y.

297,355. THIMBLE. MARIE DEMME, Muhlhausen, Germany.

297,375. POCKET KNIFE. GEORGE FREUND, Durango, Col.

297,396. COMBINED APPARATUS FOR ATTACHMENT TO PENCILS. JAMES HICKISSON and WILLIAM LEE, London, England, said Lee assignor to said Hickisson.

297,420. FOUNTAIN-PEN. A. J. KLETZKER, New York, N. Y., and C. H. COURT, Jersey City, N. J., said Court assignor of one-half to said Kletzker.

297,421. WATCH-CASE. JAMES LAMONT, Sag Harbor, N. Y., assignor to the Fahys Watch Case Co., same place.

297,446. FINGER-RING. CHARLES PRAHL, Cranford, N. J., assignor to Stern Bros. & Co., New York, N. Y.

297,498. WATCH-CHAIN HOOK. C. B. CARPENTER, North Attleboro, Mass., assignor to E. A. Bliss Co., same place.

297,516. WATCH-PROTECTOR ATTACHMENT. J. C. GRIMMELL, Brooklyn, N. Y.

297,520. AUTOMATIC WINDING SIGNAL FOR CLOCKS. EDWARD JUNGERMANN, Gettysburg, Pa.

297,521. COMBINED KNIFE SHARPENER AND FORK. WILLIAM KAUFMAN, New York, N. Y.

297,533. WATCH-CASE. DANIEL O'HARA, Waltham, Mass., assignor to Robbins & Appleton, Boston, Mass.

Designs issued April 24, 1894, for seven years.

23,210. FINGER-RING. W. O. HUTCHINS, Providence, R. I.

23,213. COVERED DISH. MARTIAL REDON, Limoges, France.

Designs issued Oct. 19, 1897, for 3½ years.

27,736. HANDLE FOR BUTTON HOOKS. FERDINAND THIELKE, Brooklyn, N. Y.

27,742, 27,743 and 27,744. DISH. W. H. GRINDLEY, Congleton, England, assignor to W. S. Pitcairn, New York, N. Y.

RETAIL MERCHANDISE

That this department shall prove mutually beneficial to our readers, it is desirable that the members of the trade generally communicate with THE JEWELERS' CIRCULAR-WEEKLY regarding any advantageous device or plan that they are utilizing in connection with their business.

PRIZE ESSAY COMPETITION, NO. 3.

SUBJECT:

"How to Foster Spring Trade."

No. 4.

PRIZE ESSAY COMPETITION.

First Prize, \$20.

Second Prize, \$10.

These prizes will be given to the writers of essays on the subject

"How to Promote a Bric-à-brac, Pottery and Cut Glass Department."

The prizes will be for the best and most reasonable essays, not for the language in which the ideas are expressed. Anyone may enter, whether he be a retailer, salesman or any employe.

The standing of the judges who have kindly consented to act is a guarantee that the contest will be carried on strictly on its merits and in an absolutely fair and impartial manner. We shall designate each contribution by letters, keeping a list of contributors with the letters of their articles. Thus the judges will not even know the names of the writers whose products they pass upon.

RULES:

Essays must be in this office by June 15, 1901.
Essays must be written on one side of paper.
No limit to number of words, and specimens of records are admissible.

NOTE.—THE JEWELERS' CIRCULAR-WEEKLY reserves the right to publish any or all of the competing essays received.

Preference will be given, all other things being equal, to those whose contributions reach us at the earliest date.

IN order to reach the greatest number of jewelers in an essay on the subject, "How to Foster Spring Trade," it is necessary to address particularly the jeweler with moderate stock, who does his own buying and most of his selling; perhaps employing a watchmaker, or even two or three assistants, but to whom nearly every detail of business is a personal matter. And let me say right here that it does not pay a jeweler to stiek to the repair bench a day longer than necessary. Of course, a young man who starts in business with a few hundred dollars and his knowledge of watchmaking must, of necessity, for a time, do his own repair work. But when he has worked his stock up to an invoice value of, say, \$4,000 or \$5,000, his time can be used to far better advantage in pushing sales than in sitting at the

repair bench. He should employ a capable watchmaker at a good salary to take care of the repairing as it should be taken care of and then he should push his stock for all it is worth.

Pushing Spring business entails pushing business the year around, strictly honorable methods, unhesitating performance of every promise and, above all, utmost courtesy toward every man, woman or child who enters the door.

As a direct help to Spring trade I have found the engraving of wedding invitations, visiting cards, etc., very efficient. You need not be actually able to execute the work yourself, but pay a visit to some establishment where it is done and learn enough of the methods of plate engraving and printing to talk intelligently to the customer who is thinking of placing an order. With this knowledge you can, nine times out of 10, capture the order over the head of the stationer, who, as a rule, knows nothing of the practical work.

It is not at all necessary to keep a stock of wedding stationery. Samples are all you need and with a little window and newspaper advertising it is not hard to work up a nice business in this line. The wedding work itself will not bring large profits, but it leads to other things. For instance, if you make the invitations for a wedding you are almost sure to sell the wedding ring; you will very probably sell the groom his present to the bride and the fact of your making the invitations will be told to all the most intimate friends, who will naturally think of you when casting about for a suitable gift. In fact, your store becomes a sort of headquarters, as it were, for this particular wedding. In my own case, during the past year my profits on wedding invitation work have probably not been more than \$50, but it has brought in many times that amount of business. The foregoing is, of course, especially applicable to Spring business, as most of the weddings occur during that season.

And in this connection let me say that nothing pays better than a nice stock of small pieces of table silver to retail from \$1.50 to \$5. Don't get the stereotyped sugar spoons and butter knives, but make an effort to have original pieces. The small jeweler who has never made a specialty of this will be surprised to see how much of a show \$100 worth of well selected pieces of small wedding silver will make and how quickly they will sell.

One of the most important points in making Spring sales is having everything about the store fresh and new looking. In the dark days, before Christmas and in the rush of holiday business, people will buy with an enthusiasm that overlooks slight defects in articles offered for sale. But in the brighter Spring days people are in a more critical mood and your goods must be in a more tempting state to secure buyers. Devote the dull days in February to a thorough renovation of stock. Buff up your ring stock and give every set ring a good washing in hot soap suds. Treat the brooches in the same way. Even some of the engraved watch cases will not be injured by a good scrubbing.

Don't forget, meanwhile, to put on fresh tags in place of the old soiled ones, for customers are quick to recognize an article as being old stock from a grimy, soiled price tag. Possibly you are not prepared to properly buff the larger pieces of silver ware; if so, do not hesitate to spend a few dollars in packing up such pieces as really need buffing and send them away to be refinished. You will find money spent this way to be well invested.

I have found a very efficient manner of increasing Spring sales is to get up a neat folder containing illustrations of novelties which manufacturers always get out at this season and, in addition, possibly a few cuts of watches or other staple goods at special prices, and place one of these folders in every house wherein a sale is possible. The cost of these will not be great. If you are particular to get up your folder nicely and in dignified wording, this form of advertising will not lower the plane of your business, but, on the contrary, containing as it does illustrations of the latest Spring fads, will give abroad the impression that you are "up-to-date," a very desirable reputation for a jeweler.

In conclusion I would say that to foster Spring trade you must keep wide-awake and be ready to seize upon any idea of your own or any one else that may present itself. Study your business, your public, yourself; and don't, for lack of effort, lose a single sale, where it can be honestly and legitimately made.

Horace Condy, Sedro-Wolley, Wash., offers a watch as a prize to the boy or girl attaining the highest scholarship average in the sixth, seventh and eighth grades of the public school in the last two months of the term.

ING and HINTS to JEWELERS

ADVICE AND CRITICISM ON RETAIL JEWELERS' ADVERTISING.

[This department is free to every retail jeweler and optician. Forward for criticism your newspaper ads., booklets, catalogues, novelties, circulars, etc. Ask advice and offer suggestions. Replies in these columns are unbiased. Make letters full and particular as desirable. Every letter and ad. sent will receive full attention, though the publication of the matter may sometimes be delayed some weeks. Address all letters and other matters to The Jewelers' Circular Pub. Co., 11 John St., corner Broadway, New York.]

TWO CONTRASTING ADS.

THE "art of advertising," to use a phrase of the professional advertising experts, is not always easy to acquire, any more than the "art of jewelry selling" is a

For Fine Watches
and Jewelry
at Lowest Prices go to

WILS PIT
LEADING JEWELER
OELWEIN,
IOWA.

thing to be picked up without effort or practical experience. It is not likely that many jewelers in the retail trade would pay \$5 apiece for clocks and sell them for \$1 each, as a regular thing. But there is many a retail jeweler who pays \$5 for an advertising space in his local newspaper

Bring On Your Clocks...

We feel the response to our invitation of last week, to let us do your Clock Repairing—but we want more.

We'll come after your Clock and bring it home when it's fixed.

What's more, we'll fix it so it will stay fixed.

About a dollar for the big ones—50 cents for the little fellows.

GEORGE E. FEAGANS, Jeweler.

and then fills it with a \$1 idea, as a regular thing. Sometimes a dollar would be too high a valuation on the idea. It is sometimes—almost always—a man who can't af-

ford this wasteful method who indulges in it.

No matter how small the town or how well known the jeweler may be, he can do more than keep his name before the people, which is all Will S. Pitt seems to be striving for in the ad. which is reproduced herewith. This ad. is taken at random, just to illustrate the argument. Mr. Pitt is in a town of 1,000 people and probably it is well known to many of those people that he is a jeweler and sells watches. But it is more than likely that his ad. would have brought him in more business if he had used less space for his name, etc., and more to tell of some particular thing he could do. It is more than likely that in several Oelwein homes there are striking clocks that don't strike, alarm clocks whose alarms don't work, other clocks that fail to keep time, and more that need some minor repairs to make them efficient timepieces. If Mr. Pitt would remind the possessors of such clocks that he can repair them, and give an idea what ordinary repairs cost, his cash returns from the same space in the Oelwein Register should be about 50 per cent. more than a general ad. like this is apt to bring. Or, if he wishes to advertise watches, let him say something about them—something definite and in detail and give prices of two or three grades. The same idea holds good, whatever the line may be.

Perhaps it is not the custom for Oelwein merchants to advertise in this way and, perhaps, the newspaper doesn't care to make frequent changes of the wording of its advertisements. If so, all the more reason why the "leading jeweler" should do it. In any event no such general statement as occupies the upper part of this ad. should be put alone into a space that has to be paid for.

Mr. Pitt may think THE CIRCULAR-WEEKLY is taking some unasked for trouble to criticize his business methods. Well, the only reason his ad. is taken for an "awful example" is that it happened to come out first from a pile of such that are on the editor's desk. And it is all done for the good of the retailer, be he in Oelwein, Ia., or somewhere else.

Just by way of contrast, look at the other ad., used by George E. Feagans, Joliet, Ill. Isn't there a difference? Each originally occupied about the same space—about five inches deep across two columns. In Mr. Feagans's ad. the fact that he handles

clocks and his name and business are just as prominent as are the corresponding features of the other ad. In addition it has a neat look that creates a favorable impression and tells some interesting things that ought to appeal to any person with a sick clock, and all in a little less space than the other man uses to say next to nothing new.

Towle & Winterhalter, Butte, Mont., used the following timely wording in their March advertising in the Anaconda Standard:

The March Birthstone Is the Bloodstone.

THE POET SAYS:

Who on this world of ours their eyes
In March first open shall be wise;
In days of peril firm and brave,
And wear a bloodstone to their grave.

We have the bloodstone mounted in an endless variety of rings.

Solid Gold Misses' Rings, set with bloodstone, from \$1.50 up.

Solid Gold Ladies' Rings, set with bloodstone, from \$2.50 up.

Solid Gold Gentlemen's Rings, set with bloodstone, from \$4.00 up.

We repair all kinds of watches and guarantee the work at very moderate prices. Our expert optician will test your eyes free of charge.

TOWLE & WINTERHALTER,

Manufacturing Jewelers,

28 W. PARK ST.,

BUTTE, MONT.

While the advertisement below puts forth strongly the repairing department of Mr.

Careful With Your Watch.

No wonder a possessor of a good watch is careful into whose hands he leaves it for repair when it fails to do its work. Many a good watch is left in bad hands, and is spoiled by incompetent or careless repairing. Does your watch need attention? Don't run the risk of having it spoiled. We do thorough, guaranteed watch repairing.

J. C. SIPE,

Importer of Diamonds,

Rooms 2, 3 and 4, 18½ North Meridian Street,
INDIANAPOLIS, INDIANA.

Sipe's store, the specification of a few jobs with prices would have enhanced its value.

Where commercial paper is indorsed in blank by the payee it is transferrable by mere delivery; and one who in good faith takes the same as collateral security for a debt and extends the time of payment of such debt becomes a purchaser for value, though his transferrer may in fact have had no title.

Trade-Mark Information.

Note.—The publication of our work, "Trade-Marks of the Jewelry and Kindred Trades," containing over 2,250 marks, all told, the accumulation of various works of reference and the ramifications of our business enable us to trace to their origin nearly all marks that may be found on jewelry, silver ware, art pottery and kindred lines, of both American and foreign make. All questions in regard to trade-marks will be cheerfully answered. We would be pleased to have the trade seek the benefit of our facilities regarding the identity of any marks they cannot trace. We would prefer to receive the article for examination; for if the mark is of foreign origin, the slightest difference between a drawing and the original is of great importance.
No question is too trivial nor too complicated for consideration under this department.
All queries received are also answered promptly by mail.

BATON ROUGE, La., April 20, 1901.
Editor of THE JEWELERS' CIRCULAR-WEEKLY:
Kindly inform me whose trade-mark is on the

enclosed card and oblige,
Yours truly,

J. K. ROUMAIN.
ANSWER:—Try Donley & Co., 4 Addi

son St., Providence, R. I. See page 11 of "Trade-Marks of the Jewelry and Kindred Trades," published by The Jewelers' Circular Pub. Co.

MINNEAPOLIS, Minn., April 20, 1901.
Editor of THE JEWELERS' CIRCULAR-WEEKLY:
Will you tell us who the manufacturers are who stamp their swivels of their chains:

D. & T.

We cannot locate them in your trade-mark book. Kindly answer the above and oblige. We remain,
Respectfully yours,

JACOBS JEWELRY Co.

ANSWER:—We have not been able to trace this mark. Can any reader enlighten us as to its identity?

HUNTSVILLE, Ala., March 20, 1901.
Editor of THE JEWELERS' CIRCULAR-WEEKLY:
The mark herewith is on an article of pottery finished to resemble ivory. It resembles a tree

stump with a cupid standing in front. On top of the stump is a fancy cup to hold a candle. The piece stands about 14 inches high and measures

about 4½ inches across the base. Please let us know who made the article, and oblige,

Yours truly,

E. KARTHAU'S SONS.

ANSWER:—This trade-mark is used by A. Stellmacher, Teplitz, Bohemia, whose wares are controlled in this country by Bawo & Dotter, 26 Barclay St., New York.

Production of Platinum.

THE production of platinum, which metal, owing to its high melting point, is esteemed especially as a material for crucibles and incandescent wires, amounted to 4,800 to 5,100 kilos during the last year. As the demand last year exceeded the production, which was about 4,950 kilos, the price has advanced considerably. Russia must be regarded as the chief source of this valuable metal, more than 90 per cent. of the above total production having been furnished by that country. The production of Russia in 1900, for example, amounted to no less than 4,590 kilos. The price of platinum has risen within the period of about seven years from 1,800 marks to 2,600 marks (\$430 to \$620) per kilo.

NOTE—Under this department, all matters of a technical or of a news character bearing upon the optical branch of the jewelry industry will be considered. Address communications to The Jewelers' Circular Pub. Co., 11 John St., New York.

MINNESOTA LEGISLATION.

THE effect of legislation in Minnesota regulating the practice of optometry in that State, along the lines proposed in several States but not successfully carried out, will not be in Minnesota alone. Minnesota has merely taken the first plunge; other States will follow, some more slowly than others and a few hanging out to the last, and with legislation of about the same kind. It took some years for all of the 13 original States to agree to the constitution, but they all did eventually. The scene has, therefore, changed and we enter upon a new phase of the optical business and of optometric practice. The opponents of this class of legislation may as well "lay down," for it is to be. Opponents of such laws are negative quantities. Those who favor them are positives. Opticians, as a rule, want such laws in their respective States and they are going to have them. There will be some bigotry shown in introducing the system. Some well qualified men will be turned down, and others not so well qualified, but who have a "pull," are going to be advanced. There is bound to be partiality shown by those who are favorites themselves, for it is impossible to legislate fair-mindedness into the heads of men who have no basis therein for this quality. The State boards will be composed of opticians, and popularity with politicians, rather than qualification, will be more than likely to determine the appointments. It is to be hoped that radicalism of any sort may be duly held down and that these boards will disappoint those who expect the least of them. It must not be presumed for a moment that opticians will be any better satisfied under the system than they are now, for every person who knows the lenses in a trial case and can fit a pair of frames to the face will expect to sail through the examinations with flying colors. When he finds he cannot do it, he will be as ready to damn the whole affair as he now is to glorify it. Illinois, Michigan and Iowa, perhaps Wisconsin, Indiana and Ohio, will be among the first States to follow Minnesota. The more the western States are inclined to be liberal, the more the eastern ones are inclined to be conservative. What Kentucky, Tennessee, Virginia, the Carolinas, the Gulf States and Texas will do remains to be seen. We imagine that

New York and Pennsylvania will back water a long time before they enter the constellation of States recognizing the qualifications of any but doctors to do anything in the nature of "repairs" to defective human beings. Still, New York recognized the opticians this Spring, in a negative way, and may do so later in a positive manner. The denouement during the next two years will be watched with great interest and attention by every one connected with the optical business.

Kansas Opticians Need Have No Fear, Says State Board of Health.

TOPEKA, Kan., April 23.—According to a statement made by secretary W. B. Swan, of the State Board of Health, the opticians of Kansas have no cause to fear regarding the operation of the medical practice bill passed by the last Legislature.

The section of the bill which alarmed the opticians as referred to in THE CIRCULAR—WEEKLY, last week, is as follows:

"Provided, any person holding a diploma issued by an optical college and who has studied the anatomy of the eye and contiguous parts, human physiology and natural philosophy for at least six months under a competent teacher, and who shall pass examination satisfactory to the State board of medical registration and examination shall be eligible to register as an 'Optician' or 'Doctor of Optics,' and shall be otherwise governed by this act so far as the same is applicable."

This section was included in the bill at the suggestion of Representative Noah L. Bowman, of Anderson. He feared that unless some provision of this kind was inserted the opticians would be prevented from doing business in the State. Dr. O'Donnell, the author of the medical practice bill, objected to the clause being put in it, claiming the measure affected only oculists and not opticians. Mr. Bowman could not see the difference and, to save the bill from defeat, Dr. O'Donnell was forced to accept the amendment.

Speaking of the matter, Dr. Swan said: "The clause was inserted in the bill by a friend of the opticians. So they have no one to blame but themselves. I think the board will not make them any trouble. The intent of the law is to regulate the practice of medicine and surgery, and not to govern the fitting of glasses.

"We could not convince Mr. Bowman of the difference between an oculist and an optician. He was afraid the opticians would be hurt and had the clause inserted for their protection, whereas if it were followed, it might instead prove a hardship. An oculist is a specialist who makes a practice of treating an organ of the body with other remedies than mere spectacles. It is right he should be included.

"We protested against the inclusion of opticians. The idea of making a six months' study of the anatomy of the eye and contiguous parts is amusing.

"Besides, the clause being inserted as it was, there is no mention of opticians in the title and that part of the law would be invalid in the courts. The law says opticians will be 'eligible' to register.

I do not think they will be compelled to do so. There is no fee stated for them to pay."

H. G. Palmer, optician, Concordia, Kan., has expressed his views on the medical bill, and incidentally on optical matters in general, as follows:

"As an optician I want to say I think the new law is all right. I think all opticians should study the anatomy and physiology of the eye. They should be able to know as much about the eye as a physician, if not more, because, in taking a course at a medical college, as much time is given to every other part of the body as to the eye. Dr. Swan says: 'The idea of making a six months' study of the anatomy of the eye and contiguous parts is almost amusing.' I want to say that if all physicians who graduate from medical colleges would give six months' study to every part of the body, there would be fewer physicians, and their course of study would be 14 years instead of four.

"I believe a person can learn the anatomy of the eye in six months sufficiently to fit glasses and also to treat the eye medically. I believe opticians should abide by this law and make a thorough study of the eye. It will make them much more efficient in the science of optics. In fact, I do not see how an optician (unless he is an optician in name only) would want to try and fit people with glasses unless he had studied the eye thoroughly and had graduated from a reliable optical college. You will find that the ones that are complaining the most are those who have just picked it up, and about all they know about optics is a plus and minus sphere—one for near-sight and one for far-sight.

"I think this law will and ought to put the science of optics in the hands of proper persons—people who will know how to fit glasses scientifically and treat the eye properly."

Permanently Restrained from Using Name of Fox Optical Co.

BUFFALO, N. Y., April 26.—An injunction restraining George R. Fox and others from using the name "Fox Optical Co." has been made permanent by Justice Childs, but it is modified so as to permit the defendant to advertise "formerly connected with the Fox Optical Co."

Justice White, on Dec. 13, 1900, granted a temporary injunction restraining George R. Fox from using the name of Fox Optical Co. for business purposes. The application was made by John W. Jarvis. Mr. Jarvis, in his affidavit, said that in March, 1890, Ivan Fox opened the store now occupied by him at 461 Main St. At that time the name of the concern was Fox Optical Co. Mr. Jarvis bought out the entire business for \$10,000, \$5,000 of which represented the good will of the company. The affidavit then alleged that on Dec. 1, 1900, George R. Fox, a son of Ivan Fox, opened the store at 618 Main St. and advertised his business as the Fox Optical Co. After the temporary injunction George R. Fox announced that he would conduct his business under the name of "George R. Fox, manufacturing optician," and he has so continued it.

Champigny Aplanatic Twins and Micrometer Sight Piece.

OPTICAL twins are two perspective glasses joined parallel to the axes of the eyes and which, by increasing the apparent size of objects, make them appear as if near at hand. They are most frequently arranged according to the system contrived by Galileo, with which he made a study of our planetary system. This arrangement consists of the association of two glasses, the one placed in the direction of the object and called the ob-

FIG. 1.

Galileo's telescope. Course of a luminous pencil through the objective and the ocular.

jective; the other placed near the eye and called the ocular. The ocular of Galileo is a divergent glass; it presents an upright image and magnifies remote objects.

Fig. 1 shows the movement of a luminous pencil emanating from a distant point and penetrating the pupil completely, after having traversed the objective and the ocular. It is easily seen how the enlargement of the image is produced: The direction of the point considered makes, with that of the central point, an angle, a , which, by the effect of the instrument, becomes the angle A , magnified in the proportion of the focal

with two crossed prisms (Porro ocular). The images thus have great distinctness. The cost, by reason of their complicated nature, is necessarily high.

It has been a natural inquiry whether the optical arrangement conceived by Galileo, which has great simplicity and reduced size, was not capable of presenting images sufficiently clear for the moderate magnifying power practicable for glasses held in the hand. This problem has not been studied by the physicists who have devoted their efforts to the instrument with converging ocular, in which they can introduce a reticle of spider lines; and opticians have confined themselves to improving Galileo's glasses by making use of achromatic objectives, the ocular being often a simple glass of biconcave form.

The distinctness of the images, with equal magnifying power is much less than in the usual astronomical telescope.

The study of the improvement of Galileo's construction was still to be made. This study has now resulted in the

Champigny aplanatic twins. The word "aplanatic" has become familiar through the great extension of the art of photography. It means that a point of an object has an exact and corresponding point in the image and that the contours are well defined and without distortion. In the Champigny twins it is principally the ocular that has been improved. This is either a single compound glass or a junction of two glasses, both achromatic and aplanatic.

The achromatism in optical systems, avoiding the formation of colored fringes, was realized long ago by coupling

two glasses of crown glass and flint glass, substances of different dispersive properties. In respect to aplanatism the problem was new for divergent glasses. Champigny has demonstrated mathematically that aplanatism was always realizable on the condition of giving a suitable curve to the common surface of the conjoined

FIG. 2.

Champigny aplanatic twins (double ocular) and micrometer sight piece.

distances, F , f , of the objective and of the ocular.

For some years "twins" have also been constructed, whose optical arrangement is copied after that of astronomical glasses. The ocular is a convergent glass, but as the image of the objects would be inverted, this is remedied by the addition of three special lenses (Dolland ocular) or

glasses. The glasses of the ocular of the Champigny twins are of three different curvatures: Curve of the surface at the entrance of the rays, interior curve, and curve of the surface at the exit of the rays. They are calculated by a method similar to that in use for photographic objectives and realize the three conditions of a determined focus, of

achromatism and of aplanatism. The twins can be arranged so as to afford two different magnifying powers with the focus preserved. For this there are two interchangeable eyeglasses with draw tubes, regulated automatically.

Fig. 2 represents the Champigny twins on a reduced scale with duplicate ocular; one of the draw tubes is supposed to be cut away to enable the operator to see the duplicate glasses. On the left is represented the micrometer sight, which completes the instrument for some purposes. It allows of measuring the magnifying power and adapts it to the measure of the distances. The micrometer, properly so called, is a flat glass with parallel, equidistant lines. The space of the center is divided on one side into two equal parts and on the other into four. This micrometric scale is seen with the aid of a lens, which has a new arrangement. It magnifies only through its edges, its center being in the state of ordinary flat glass.

Looking through the center, exterior objects are seen as they are, but around

FIG. 3.

Micrometer sight appliance (actual size).

this central part is distinguished a zone marked with parallel lines. A very slight shifting of the eye brings these lines over the objects themselves and furnishes the means of ascertaining the number of spaces which they subtend. Each of these spaces is one degree; at the center are the half and the quarter degrees. The micrometer serves, then, to measure the small angles and even to mark the horizon, if it is provided with a suitable suspension. Let us see how it indicates the magnifying power.

On a wall attach two strips of paper, 1 centimeter wide and distant about 35 centimeters. Placing ourselves at 20 meters and coming nearer or withdrawing, as necessary, we ascertain that the divergence of the strips is exactly a degree by the micrometer. Then, adjusting the sight apparatus on the ocular, where it is fastened by small snap catches, and again looking at the strips with the glass in focus, we find that the divergence of the magnified strips subtends several degrees of the micrometer. This number of

Optical Department.

[Continued from page 54.]

degrees expresses exactly the magnifying power.

The micrometer sight (Fig. 3) applied to a lens measures also the distances according to the apparent height of a man. For example: A man standing with his hat on will average about 1.75 meters in height, which corresponds to 1 degree at 100 meters. Suppose the glass has a magnifying power of five. The man standing is seen in the micrometer under an angle of 5 degrees at 100 meters; of 1 degree at 500 meters; of 1/2 degree at 1,000 meters, with the apparent sizes as represented in Fig. 4. A table of the micrometer degrees and fractions and of the corresponding distances gives the indication almost instantaneously.

A perspective glass is graded by its magnifying power, which, in reality, is its *raison d'être*; then, by its field of vision and the distinctness of the images produced.

hand, are not suitable when their power is higher than 10; it is usually between 3 and 6.

Telescopes with support have a large field of vision of the ocular image, 25 to 30 degrees. If it were otherwise the field of vision of the objects examined, which is the quotient of the angle of the image divided by the magnifying power, would be too much reduced. The human eye sees with precision only in a field of one degree and should turn in its orbit for

FIG. 4. Landscape, with two persons at distances A and B of 100 and 500 meters, as seen through a glass of 5 magnifying power, furnished with the micrometer sight.

the examination of more extended objects or images. In the twins the field of vision of the ocular image is seldom more than 20 degrees. As we have seen, the micrometric apparatus allows of measuring the enlargement and the field of vision.

The giving of distinctness of images is the function of the optical instrument and of its magnifying power. The average visual acuteness, according to experts, is that which allows the perception of a

black line on a white ground, subtending for the eye one minute in width and five minutes in height, and also the reading of printed letters of the same proportion. The eye which takes in the smallest angles and reads the smallest letters has an acuteness superior by one, and less in the contrary case. All that can be demanded of a perfect glass is, that it increase the visual acuteness in proportion to the enlargement which it gives to the images; if it magnifies five times, for example, it should allow of the distinction at 20 meters of letters that the naked eye can only read at 4 meters. In practice the distinctness of a glass is calculated in a simple and rapid manner by reading a sign or an inscription where the characters are of different sizes. With an optometric scale such as opticians employ an accurate determination can be made.

Fig. 5 is an optometric scale designed for reading at the distance of 2 meters. The figures at the left of the lines indicate the height of the letters in millimeters. At 2 meters the average sight reads letters 3 millimeters in height. Suppose a visual power, reading at 2 meters the smaller letters, with the naked eye or with the usual lorgnette, letters whose height is *n* millimeters; that sight would read at 20 meters letters of the height of 10 *n* millimeters. When the optometric scale is placed at this distance of 20 meters it is ascertained that with the glass letters much smaller than 10 *n* and of height *n*₂ can be read. The quotient of 10*n* by *n*₂ expresses the increase of visual acuteness that the glass affords. With a good glass this quotient is not notably inferior to the magnifying power.

If the proportions mentioned allow us to appreciate the properties and qualities of a magnifying glass, there is an advantage in respect to the services desirable

FIG. 5. Optometric scale for examination of the distinctness of images seen through glasses.

Telescopes having firm support are alone fitted for high powers, but they ought to be protected from earth vibrations and even the force of the wind. The most powerful observatory telescopes attain a magnifying power of 4,000 to 6,000; open air instruments, mounted on a tripod, do not afford higher power than 50, and generally not more than 25. The glasses arranged as twins, held in the

to be obtained in keeping a good account of the magnifying power. As regards the twins, we will say, that for the theater and the museum a magnifying power of three is to be preferred; for travel one of four or five, and for the mountain, the sea and the special service of the army and navy, a power of eight, or even 10; and that it is preferable to make use of glasses with two powers—for example, four and eight.—Translated from *La Nature*.

Annual Meeting of the Colorado State Optical Association.

DENVER, Col., April 25.—At the annual meeting of the Colorado State Optical Association, which was held, April 10, at the residence of R. B. Finch, this city, the election of officers resulted as follows: Mr. Finch was chosen president for the present year. J. C. Bloom was elected vice-president and R. H. Biegel was re-elected secretary and treasurer. The following directors were chosen: G. E. Jacobs, U. S. Trowbridge, S. G. Lippen-cott and J. H. Galiup. Miss E. H. Chapman was elected recording secretary. Eight new members were admitted and the affairs of the association were reported to be in a flourishing condition.

First Annual Meeting of the Tennessee Optical Society.

MEMPHIS, Tenn., April 25.—The first annual meeting of the Tennessee Optical Society will be held in Memphis, May 29. It is the desire of the society to have as large an attendance as possible and invite every optician of the State to meet, whether a member or not. The railroad rate will be one cent a mile from all points in the State. As this will also be the occasion of the Confederate Reunion, it will be necessary for those opticians intending to meet to engage rooms in advance by writing to the secretary, E. B. Meyer, 341 Main St., Memphis. There will be a three days' reunion—May 28, 29 and 30—and there are expected to be over 100,000 visitors; therefore the necessity of securing rooms in advance is apparent.

The Present Owners of the Alvan Clark Telescope Lens Factory.

BOSTON, Mass., April 26.—It has appeared in evidence this week at the trial of Charles R. Eastman, in East Cambridge, that the telescope lens factory on Brookline St., Cambridgeport, which was run so successfully for many years by the late Alvan Clark, was purchased, in March of 1900, from the Clark heirs by Mrs. Richard Grogan, Jr. It has appeared also that Mr. Grogan, who met his death from a revolver held by Mr. Eastman, conducted the factory until the time of his death, July 4, 1900; but what has not appeared before is that the lens factory passed from the possession of Mrs. Gro-

gan, the widow of the deceased, into the hands of the Alvan Clark & Co. Corporation, so called. This new company are already actively engaged in carrying on the work and have many contracts on hand.

Optical Briefs and Notes.

(Continued from page 34.)

R. Bishop, Chicago, Ill., will open a jewelry and optical office in Mitchell, S. Dak.

A. J. Douglass, optician, of Seattle, Wash., has opened parlors at Virginia, Nev.

J. S. Leo, of the Montreal Optical Co., sails for Europe, on May 25, on a business trip.

John T. Adams, Jr., of Talladega, Ala., has opened a branch optical stock at Piedmont, Ala.

J. H. Hempel, optician for R. C. Crawford, Temple, Tex., is in Chicago, taking an optical course.

Rodney Pierce Optical Co., Pittsburgh, Pa., removed, Saturday last, to the third floor of 237 Fifth Ave.

C. L. Merry, president of the Merry Optical Co., Kansas City, Mo., has been on the sick list for several days.

William Ryan, optician, 124 S. 7th St., Philadelphia, Pa., who has been ill, has fully recovered and resumed business.

The Kansas State Medical Association of Oculists and Physicians will meet at Pittsburg, Kan., May 2, 3 and 4.

Raoul Branchaud, a jeweler of Cavalier, N. Dak., has gone to Minneapolis, Minn., where he will take a course of optical instruction.

Prof. J. Jorgensen, a prominent optician and jeweler of Burns, Ore., has just returned from the east and is now visiting at Ontario, Ore.

The optical store of R. H. Biegel, 1517 California St., Denver, Col., was entered, last Saturday night, and opera glasses and spectacles stolen to the value of \$22.

Mr. Kaiser, of Hirsch & Kaiser, wholesale and retail opticians, San Francisco, Cal., was in Chicago a few days ago, going thence to Southbridge and the east.

J. D. Parker, Joplin, Mo., and O. M. Atwood, Clifton, Kan., called on the wholesale opticians of Kansas City, Mo., last week. Mr. Atwood was on his way east.

W. M. Morgan, formerly with the Kansas City Optical Co., Kansas City, Mo., has accepted a position in the manufacturing department of the Columbian Optical Co.

H. L. Bancroft has purchased the jewelry stock of J. Sutcliffe, Woodburn, Wash., and is adding considerably to the stock. Mr. Bancroft is a graduate optician.

W. R. Woodworth, St. Joseph, Mo., is making some changes and additions to his optical parlors, as his rapidly growing business demands considerable increase of stock.

Optician Dammers, Providence, R. I., is moving from 25 Westminster St. to a fine new store at 169 Westminster St., nearer the center of the Providence shopping district.

J. H. Pratt, who was formerly optician

with the Jaccard Jewelry Co., Kansas City, Mo., until he went south, returned, last week, and has accepted a position with the Columbian Optical Co., Omaha, Neb.

The following students graduated last week at the Ophthalmic College of Canada, Toronto: T. H. Weeks, Toronto, J. Henderson, Toronto, A. Hotson, Delhi, C. H. Campbell, Comber, and W. Hayber, Ottawa.

W. E. Hess, retail optician, San Francisco, Cal., is on an eastern trip, the first in 10 years. He spends 10 days in Chicago, leaving this week for Philadelphia, New York and other eastern cities and manufacturing towns.

The William B. Brown Optical Co., Baltimore, Md., have been incorporated by William B. Brown, Alonzo Wolf, George R. Gaither, Clarence E. Downes and Louis McKim Kines. The capital stock is \$5,000, divided into 100 shares of \$50 each.

Mr. and Mrs. Charles Lawrence Merry have announced the engagement of their daughter, Bertha Louise, to Harry Llewellyn Goodwin. The marriage is to take place June 12. Mr. Merry is president of the Merry Optical Co., Kansas City, Mo.

Lionel G. Amsden, of Cohen Bros., Limited, Toronto, Can., will leave for England about the middle of May in the interests of the company. M. M. Cohen, vice-president of the company, left on April 26 on a business trip to New York.

The Imperial Optical Co., Toronto, Can., have started business as wholesale manufacturing and jobbing opticians at 67 Victoria St. W. Levi, late with the Cohen Bros., Ltd., and well known to the trade, is manager. P. Hermant will shortly take the road for the company.

The funeral of Alexander Hirschler, optician, Cincinnati, O., who died of grip, took place, April 23, from his residence, Avondale. He had been in the optical business in the same place on Main St., above 4th, for 20 years. He leaves a widow and three children.

A fashionably dressed woman, accompanied by a man of equally natty appearance, entered the Western Optical Co.'s store, 1655 Welton St., Denver, Col., last Saturday night, and asked to see some opera glasses. Between them, as they examined the goods, they managed to secret a fine pair of glasses; no clue.

A. I. Agnew, manager of the Omaha, Neb., branch of the Columbian Optical Co., has gone east to be present at the opening of the Pan-American Exposition. Mr. Agnew expects to be gone a month or six weeks, and during his absence W. G. Riggs, formerly of Chicago and brother of Elwood Riggs, manager of the Kansas City office, will act as manager.

The White-Haines Optical Co., Columbus, O., are now at work on a new catalogue, which will be issued as soon as the work can be completed. It will be a very complete affair and will show at a glance a description of the goods with prices. J. B. White will likely start on his first trip on the road this week. Business will be pushed from the start, the territory at first embracing Ohio and surrounding States.

WORKSHOP NOTES.

A Screw Rusted in may be removed by placing the flat extremity of a red-hot rod of iron on it for two or three minutes. When the screw is heated, it will be found to turn quite easily.

To Remedy Worn Pinions.—Turn the leaves or rollers so that the worn places upon them will be toward the arbor or shaft and fasten them in that position. If they are "rolling pinions," and you cannot secure them otherwise, you had better do it with a little soft solder.

Making Brittle Gold Strong.—Gold is sometimes so brittle that the jeweler cannot work well with it. This is most likely due to phosphorus, which, not being a metal, is, of course, not detected in the assay. The remedy is to pass chlorine gas through the molten gold, by which treatment most of the gold which had otherwise been set aside as unfit for certain kinds of work can be redeemed.

Tarnish on Electro-Plate Goods may be removed by immersing the article from one to 10 or 15 minutes, or until the tarnish has been removed, but no longer, in the following solution: Rain water 2 liters, cyanide of potassium $\frac{1}{2}$ pound; dissolve and put into a stone jug or jar and cork closely. After immersion the articles must be taken out and thoroughly rinsed in two or three waters, then dried with a soft linen cloth, or, if frosted or chased work, with fine, clean sawdust. Tarnished jewelry may be speedily restored by this process, but make sure work of removing the alkali, otherwise it will corrode the goods.

Gilding Wheels on the Pinion.—A gilt wheel stretched afterward, how badly it looks, especially in a new watch! And yet there is often no alternative but to stretch it, and this process, if well performed, is almost always preferable to putting in a newly bought wheel. If it is desired to restore the original appearance to a stretched wheel it is, after the deeping has been corrected, ground flat nicely with slate. Then take 14 karat gold shells (very well adapted for this purpose are the eyes for long braids of hair, but one has to have them on hand in various sizes and thicknesses) and fill them with a wax composition, consisting of the following ingredients melted together: Wax 4 parts, white turpentine 3 parts, some oil or lard for softness and a little bole to render it more visible. Place a shell thus filled upon the pinion and an-

other one on the other side of the arbor, taking care that both set well on the wheel, and shut off the pinion entirely. Next put a small quantity—as much as can be taken up with the point of a knife—of cooking salt into an evaporating dish, grind it with a little water and pour to it a little more than an equal part to two-thirds, according to strength, of fuming nitric acid, mixing these substances well. The wheel, held by a horse hair on an eye of the gold shells, is now dipped into this bath. Immediately a dark, dirty coating will form on it, which, however, quickly makes room for a golden color. At this moment the wheel must be quickly dipped into water and rinsed well, then placed again in the acid, and, after the appearance of the said gold color, rinsed once more. This process is repeated four to six times in succession, inspecting the wheel closely every time until the desired fine grain has been reached. By the frequent interruption of the etching and the admixture of water and salt one can quickly attain any required graining, which, by the way, can only be distinguished by close inspection from the customary silver grain. When this is accomplished satisfactorily, the wheel is left in the water and a gold bath (electro or contact gilding) is prepared, in which it is gilt, whereupon it is brushed off by means of a clean, worn off but coarse brush, with sour beer. Next, the gold shells are taken off the adhering wax dissolved with benzine and the wheel washed in soap water, laid in alcohol and finally dried in sawdust. A wheel thus treated cannot be distinguished from the other ones, and after a little practice the work will proceed quickly.—Albert Huettig in *Deutscher Uhrmacher Kalender*.

Pierced work is very much in vogue. Toast racks are becoming better known on American breakfast tables. Chafing dishes, forks and spoons continue as useful and popular as ever.

A Fine Presentation Badge.

ONE of the most brilliant and expensive badges given to a public official in New York was presented recently to M. F. Donohue, deputy commissioner of sewers, of New York, by his friends, at a reception at the Nameokin Club, as a token of their esteem and appreciation, as the legend engraved on the reverse indi-

JEWELED BADGE.

cates. The cost was \$950. The gold foundation is over three inches across and represents a sunburst on top, over which is poised an eagle with outspread wings. In the center is the coat-of-arms of the City of New York, while below are crossed a tomahawk and calumet, representing the Tammany Society, of which the recipient is a member. Around the sides is old English carving in high relief, and four big diamonds and 175 brilliants are so set as to cause a remarkably striking effect. Dieges & Clust, 25 John St., New York, were the makers.

Handsome serving trays are of inlaid, polished wood, protected with heavy glass and surrounded by a silver railing.

WORKSHOP QUERIES.

NOTE.—Questions bearing upon the various departments of the jewelry or silver ware workshop will be answered under this head. THE JEWELERS' CIRCULAR-WEEKLY has facilities for answering in a practical manner technical queries of this character, and offers its services to the trade.

ANTRIM, Pa., March 20, 1901.

Editor of THE JEWELERS' CIRCULAR-WEEKLY:
Being an old reader of THE CIRCULAR-WEEKLY, I write to ask what is the best way to clean paper clock dials without destroying the figures, and also what will flow the easiest, easy flowing gold solder or silver solder on hard soldering?

Yours truly,

T. J. DUNNIGAN.

ANSWER:—To clean paper dials rub them with a small piece of stale bread. Easy flowing gold solder melts before silver solder. As solders differ, we would advise correspondent to lay a small piece of each in stock on a piece of brass and blow upon them to determine which will flow most easily.

MILFORD, Mass., March 11, 1901.

Editor of THE JEWELERS' CIRCULAR-WEEKLY:
Can you give us recipes for the making of good silver polish in paste, powder or liquid?

Yours truly,

G. W. B.

ANSWER:—*Paste*—A good liquid silver polish can be made by taking pure ammonia, and after diluting it with four times its volume of water, stir into it sufficient infusorial earth to make a thin, cream-like paste. *Powder*—A cleaning and polishing mixture which is used in the form of a powder is composed of one part of jewelers' soft rouge and six parts of carbonate of magnesia. To apply, dip a moistened rag into the powder and

briskly rub the article to be polished until it is nearly dry, when a soft cloth or chamois skin should be used. *Liquid*—A good silver cleanser is made by intimately mixing: Rain water, 11 oz.; crystallized nitrate of silver, 1 oz.; cyanide of potassium, 2½ oz.; powdered chalk, 5 oz.; cream of tartar, 1 1-16 oz.; table salt, ¼ oz.

PORT ROYAL, S. C., April 3, 1901.

Editor of THE JEWELERS' CIRCULAR-WEEKLY:
Will you please inform me how to make a good pickle for restoring the proper color to gold after being soldered, such as rings and other jewelry? Thanking you in advance for the information, I remain,

Yours respectfully,

W. W. PARKER.

ANSWER:—There is no such a thing as a pickle to restore the color of gold jewelry after it has been soldered. Correspondent should preserve the color of the gold, before soldering, by anti-oxidizing the article. After soldering, the article is cleaned by boiling it in sulphuric acid pickle. Recipes for the anti-oxidizer and pickle will be found in "The Jewelry Repairer's Handbook," page 66 of THE CIRCULAR-WEEKLY, Feb. 20, 1901.

PHILADELPHIA, Pa., April 13, 1901.

Editor of THE JEWELERS' CIRCULAR-WEEKLY:
Some time ago you had a recipe to remove cement or shellac from goods, and it got lost. If you have it, will you please send me it, as it may be better than I have. By so doing you will oblige,

W. F. ENGLEHART.

ANSWER:—A substitute for alcohol for removing cement from work is made of:
Rain water.....1 gallon
Lime.....2 pounds
Washing soda.....1 pound
Slack the lime in rain water. Then pour

off the liquid and in it boil the washing soda for one hour. To use, place the articles to be cleaned in a boiling cup and cover with the liquid, which is heated to the boiling point. Then rinse in water and dry. This recipe was published in THE CIRCULAR-WEEKLY, Feb. 27, 1901, page 62.

MONTREAL, Can., April 11, 1901.

Editor of THE JEWELERS' CIRCULAR-WEEKLY:
Will you be kind enough to let me know of some good method for cleaning shop-worn silver articles, such as ladies' guard chains, bracelets, etc.? That is, some solution that will give them a thorough cleaning without injuring the article in any way. By doing so you will greatly oblige,

Yours truly,

H. CAFLAN & Co.

ANSWER:—On pages 165 and 166 of "Workshop Notes for Jewelers and Watchmakers," published by The Jewelers' Circular Pub. Co., correspondents will find the following recipes: "According to Prof. Davenport, hypo-sulphurous soda is the simplest and best cleansing agent for silver ware. It operates quickly, is cheap and has not yet been proposed for the purpose. A rag or brush moistened with the saturated solution of the salt cleans, without the use of cleaning powder, strongly oxidized silver surfaces within a few seconds." "Carbonate of ammonia, 1 oz.; water, 4 oz.; Paris white, 16 oz.; well mix the ingredients together and apply to the surface of the plate by means of a piece of soft leather or sponge." "The following solution will be found to produce a high brilliancy in silver work: Cream of tartar, 30 parts; sea salt, 30 parts; sulphate of alumina and potash, each 39 parts; water, 1,500 parts. Boil the article in this mixture."

"B. A." Gold Shell Collar Buttons
are guaranteed as follows: "We will replace every 'B. A.' button which for any reason proves unsatisfactory." This guarantee is on the back of each card and our trade-mark embossed on the front.

THE RAMBLER'S NOTES.

WHAT THE RAMBLER SAW AND HEARD AMONG THE DEALERS IN ART POTTERY, CUT GLASS, BRONZES, ETC.

FINE EXHIBIT OF CUT GLASS.

NOT since the strike at the factory was settled have the New York salesrooms of J. S. O'Connor, 39 Union Sq., shown such a fine collection of new and rich pieces in cut glass ware as that just put on exhibition. Among the most striking pieces are some large new shaped vases, 20 inches high, with swell bodies, ornamented with crescent shaped pillar cuttings and rich cut chrysanthemums and hob nails. Many new shapes are also to be found in decanters, both in the tall and flat varieties, the former containing variations in forms of neck and handle, both graceful and attractive. Large stoppers, highly cut, seem to be much in vogue in this line. Tall vases and water bottles now come in full assortments for Summer trade and show some pretty cuttings, among which should be mentioned the "Pan-American," consisting of a combination of stars and prisms and a new variation of the bull's-eye and prism pattern, showing also many small six pointed stars.

J. B. McCARTY, of the J. B. McCarty Co., returned recently from Europe, where he has been visiting the markets of the Continent for exclusive products in art novelties for importation by jewelers. This company make a specialty of fine fancy pieces in glass, bronze, metal, pottery and china suitable for the jewelers having a most exclusive trade, and the samples which Mr. McCarty brought with him are now being put on display at his warerooms, in the Jacot building, Union Sq., New York, where they are about ready for inspection by jewelers desiring to give import orders.

AN INTERESTING BROCHURE.

THE experiment made by Bawo & Dotter, 26 Barclay St., New York, in directly introducing to the public their Elite brand of Limoges china, by advertising for the benefit of the dealer, has proved successful both to the firm and their many customers throughout the United States. In fact, such a demand was created by their patrons for the booklet, which was published on Limoges and its china,

that the work has already gone through several editions. Owing to this demand they have just issued an entirely new edition, which has been thoroughly revised and contains not only new illustrations but much additional new and interesting reading matter that will make this brochure more valuable than ever to the house, their customers and the public to whom it is sent.

THE RAMBLER.

Etruria of Old.

I KNOW no historical study more fascinating than that of the Etruscan race, says a correspondent, as to who they really were and from whence they came. Egypt and Greece may claim them as the outcome of their high civilization, but history is silent. If the Etruscans were, as some writers affirm, of Greek origin, how does it happen that the tongue of this people has not been deciphered even by the most learned of scholars? The three classes of hieroglyphical ciphers which learned scholars have mastered unfold to us the magic story of Egypt, of Babylon, and of Nineveh, while the writings of Homer and Virgil have in immortal verse told us of Greece and Rome; but for Etruria's story we have to depend on indirect historical records.

It is possible that the Etruscans were, as is hypothetically assumed by some writers to be, the forerunners of the Imperial Roman power, inasmuch as the Tarquins appear to have ruled over that remarkable people, and possibly the licitors, fasces, and curule chair, the supposed symbolic emblems of the Etruscan form of government and "manners," may lend in a sense credence to the supposition.

But if history is silent on this point, divine art speaks with no uncertain voice of the genius and of the culture of the Etruscans. Three thousand years have passed and their examples of the potter's art are still considered the perfection of symmetry and beauty. The Continental centers of art pottery, as well as England's Etruria and America, faithfully interpret this truth.

It may possibly be interesting to the readers to know that Westropp says that the potter's art was introduced into Etruria by Demarcatus of Corinth, who, flying from that city, took up his abode at Targuino.

Tuscany occupies the locality of ancient Etruria and that state is contiguous, as the map points out, to the Papal States, in which Imperial Rome is situated.

Two Women and Some Old Cameos.

THE returning popularity of old cameo jewelry was the cause of a slight unpleasantness last week between a New York woman and a girl from the far south who has been spending the Winter here. They met at the house of a mutual friend, and on this occasion the New York woman wore as a belt buckle an old cameo pin of curious cutting and unusual setting.

"I never saw but one pin like that," said the southern girl.

"It is a part of a set which my mother gave me," said the New York woman, "and I am glad that cameos are coming in again so that I may wear it. I have an old cameo bracelet which just matches this pin and I am going to have the cameos in it reset."

"Is the bracelet complete?" asked the southern girl with much interest.

"It seems to be, but I have never examined it closely."

"Are the cameos in it like this one?" asked the girl, showing a small cameo in a twisted gold setting. The New York woman said that not only were the cameos like the one shown but the setting was the same.

"I did not suppose," she said, "that my set had ever been duplicated. My father had it made for my mother just after they were married."

The southern girl was laboring under great excitement and the other guests noticed it.

"Your set of cameos is like one that my family lost," she said.

"Yes, apparently it is," said the New York woman.

"I have only this one cameo from our set left," said the southern girl. "It was part of a bracelet, such as you have. I have always understood that the set was made for my father and had never been duplicated. I have kept this cameo, hoping to find the rest of the set some time in a northern shop. The other cameos, including a pin such as you now wear, were stolen from us by soldiers during the war."

There was now no mistaking the insinuation. "My parents," said the New York woman, after an awkward pause, "were married in 1853, and this set of cameos was given to my mother in 1854. The war was some years later, I believe."

Later in the evening the southern girl offered an apology, but she added that she still hoped to find her cameos in the north.—*The Sun.*

Among the collection of art pieces, jewelry and watches of W. Lewis Fraser, sold in New York recently, were a number of interesting old watches, most of them picked up by Mr. Fraser in Europe, representing specimens of beautiful work in repoussé, silver and gold, chased metals and enamel work, French and English, of the 18th century. One curiosity among the watches was a "deaf man's repeater," by Lenoir, of Paris. This watch strikes the hours and quarters so that the concussion may be felt on the case; the outer case is of tortoise-shell, the inner of repoussé gold. One big Bavarian peasant wedding ring of silver is so made that a heart or medal can be added for every child born to the couple.

**THE JEWELRY REPAIRER'S
HANDBOOK.**

BY JOHN G. KEPLINGER.

Copyright by THE JEWELERS' CIRCULAR PUB. CO., 1901.

(Commenced in issue of Feb. 6, 1901.)

JEWELRY REPAIRING.

(Continued.)

To Make a Pin Stem.—Pin stems having regular joints are made as follows: Take a piece of hollow wire and file small grooves crosswise on the seam, and lay this on a thin, narrow piece of stock and, after binding the two securely together with the binding wire, coat the line of contact with borax paste and on this lay small pieces of solder. Then, when the borax has dried, apply the flame until the solder flows and unites the two pieces. The binding wire is then removed and the stock "boiled out" in the sulphuric acid pickle. Then cut the flat stock off to within one-sixteenth of an inch of the hollow wire and the stock is placed on a flat piece of charcoal, with the hollow wire beneath. The pins, which have been pointed, are arranged with the butt ends on the plate and with sufficient distance between to allow for cutting, etc., and fastened there by sprigs made of binding wire or by mixing plaster of paris and water and pouring the mixture onto the ends of the pins. This, when dry, will hold the tongues in position, while the butt or thicker ends are being soldered to the joint stock. After all soldering is done remove the sprigs or plaster of paris and clean the work in the sulphuric acid pickle. The pins may then be separated as they are wanted.

Pin stems for ball joints are made by drawing the wire to the thickness of the pin desired and cutting it about one-eighth of an inch longer than necessary. The end is then melted into a ball, which, when hammered, will spread sufficiently to allow the drilling of a hole through it and, at the same time, serve as a spring.

To Straighten Pins.—Very often it is necessary to make pin tongues and scarf pins in bulk, and it is necessary to have the wire perfectly straight. This may be accomplished by annealing the wire after it is drawn to nearly the required thickness and fastening one end in a vise, while the other is secured in a drawing tongs and the wire stretched as much as possible without breaking it. When relieved of the strain the wire will be found to be perfectly straight.

(To be continued.)

W. A. Thompson, Jewelers building, Boston, Mass., has an interesting specimen of the jewelers' art in the shape of a belt, the buckle of which is composed of nuggets of virgin gold picked up on the sands of Cape Nome and in the Yukon district. The framework of the clasps is perforated with monograms, the borders being made of the nuggets. The belt was made in Dawson City and belongs to an actress playing at one of the Boston theatres.

The above illustrates one of a large variety of styles in our new Silverware and Toilet Cases. Patent applied for.
