“ADD-A-PEARL” NECKLACES

The Pearl has a distinction and charm of beauty that are historic, and the fascination of gradually acquiring an ornament of character and ever-increasing intrinsic worth is one of the many joys peculiar to the Add-a-Pearl Necklace. It can be started with just a single Pearl on a chain or, if desired, a group of Pearls. Either will make a beautiful ornament that can be worn at once. Further Pearls can be added as occasions demand, and the expenditure can always be regulated as required. The Goldsmiths and Silversmiths Company maintain a large stock of loose Pearls from which a selection can be made, and the experience and advice of their experts are always at the disposal of Customers desirous of building up a Necklace in this way.

A comprehensive collection of loose specimen Pearls for matching and strengthening the gradation of Necklaces always in stock.

Platinum chains cost from £3 10s. 0d. upwards.

If a necklace of coral or onyx beads should be preferred to a plain neck-chain, these can be supplied, and Pearls can be substituted for the beads, the beads being gradually eliminated as the Pearl Necklace grows.

Onyx and coral bead necklaces, with Pearls interspersed, are shown on page 59.

CAUTION

THE GOLDSMITHS & SILVERSMITHS COMPANY caution purchasers against cheaply-made Silver Spoons and Forks

Many Buyers think, and it is represented by some Dealers, that all Spoons and Forks made of Silver are equally good. This, however, is not the case, as to be durable and continue to look well in wear they must be thoroughly *forged* and hammered by hand, which is not done with the cheaper quality.

The Company keep in Stock only the highest quality, but can make to order the second quality at 6d. per ounce less than the prices on the opposite page; they do not, however, recommend it.

Estimates will be sent on application.

RUSTLESS STEEL CUTLERY

Does not rust or tarnish, and is not affected by damp or acid

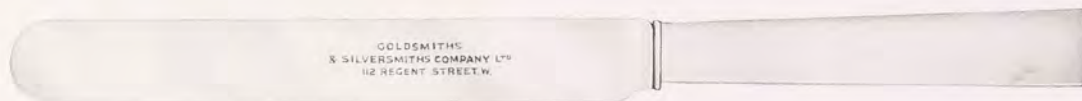

The Company's Rustless Steel is tempered and ground from the best material.

It is Stainless, Rustless, entirely unaffected by ordinary acids such as Vinegar, Salt, etc., and has been thoroughly tested and found to be satisfactory in wear.

Rustless Steel Cutlery means a great saving of labour, as it needs only to be washed in hot water, and does not require to be polished in a machine or with knife powder. It has a better and more lasting appearance than ordinary steel, and is much more durable.

Rustless Steel Blades can be sharpened as effectively as the ordinary steel blades.

MILITARY PLATE CHESTS

The Company's Plate Chests are London made, of well-seasoned Oak, with dovetailed corners; they are strongly bound with iron, and have patent stop hinges, iron end handles, and four lever locks and keys. The larger sizes are also fitted with strong iron hasps and staples, for greater strength and security. They are lined throughout with green baize, a separate division being made for each article, and are a great convenience to officers on foreign service, or families changing their place of residence, or for the storage of Plate, as no packing is required.
