## PREFACE.

HIS, the third edition of THE JEWELERS' WEEKLY COMPLETE DIRECTORY, is in many particulars an improvement upon former editions. To the matter constituting the first and second editions illustrations of American trade marks for sterling silverware and silver plated ware, cut glass and art pottery, tables for a ready computation of the prices of diamonds of various weights and of gold and silver, a table of wages, by which the rate per hour can be easily determined from the rate per day, and lists of legal and religious holidays have been added.

The labor of revising the text of the body of the Directory has been carefully and conscientiously performed, and the publishers are confident that this edition of THE JEWELERS' WEEKLY COMPLETE DIRECTORY will be found the most accurate and complete jewelry trade list ever published. The errors of former editions have been carefully eliminated, and the book will hereafter deserve even higher praise than has been bestowed upon it in the past.

The thanks of the publishers are extended to the many members of the trade who have contributed information of errors in former editions and who have assisted in rendering the work complete by promptly responding to inquiries.

Link Buttons.

Chain Mountings,

Neck Chains,

Glove Buttoners,

Bracelets.

Crosses.

Earrings, Bar Pins

# HENRY BLUNDELL & CO., Nos. 35, 37 and 39 Clifford St., PROVIDENCE, R. I.

HIS ATTACHMENT is designed as a labor saving device for Toolmakers. It has an elevation of six inches and is guaranteed to read to one-thousandth part of an inch on the elevation of the slide; it has an index plate of one hundred and twenty teeth, which can be changed to facilitate the work; it also has a split chuck which holds the work perfectly to the centre, also a split chuck for holding

the arbors which holds the cutters; the head is made to swivel both ways and is provided with a degree circle; it is also provided with a stop screw, perfectly locating the depth of cut.

This Attachment will make its own cutters' thereby making it a complete machine in itself.

The work we claim for this attachment is Milling Plungers, Cutters, Straight and Taper Reamers, Index and Angle Milling, Milling Drawing-up Tools, etc.

This machine has been in practical use for nearly four years and has been tried and tested by many of the most expert mechanics and toolmakers.

THE UNIVERSAL Milling Attachment for Lathes.
