

SUMMARY

MA2010 Foundations of Statistics

1.	Probability	1 – 18
2.	Number of ways to sample r items from n	19 - 26
3.	Continuous Population Distributions	27 - 31
4.	Exponential Population Distribution	32 – 44
5.	Normal Population Distribution	45 – 55
6.	Chi-square and t Distributions	56 – 61
7.	Discrete Population Distributions	62 – 63
8.	Poisson Population Distribution	64 – 72
9.	Binomial Population Distribution	73 – 83
10.	Geometric Population Distribution	84 – 89
11.	Expectation and Variance of a random variable	90 – 101
12.	Maximum Likelihood Estimation	102 – 120
13.	The Simple Linear Regression Model: Theory	121 – 138
14.	Multiple Linear Regression: Theory	139 – 154
15.	Regression Models – Examples	155 – 177
16.	Bibliography	178
